D-3 1/2 DIGITAL
Panasonic

© 1991 Matsushita Electric Corporation of America

D-3 ACQUISITION IS JUST THE *START* OF SOMETHING BIG.

Panasonic's D-3 is the *only* system that gives television producers the quality and reliability of digital technology from *start-to-finish.*

Panasonic's D-3 system starts with a family of digital processing cameras including the AJ-D310 camcorder, the AQ-225 Studio/Field Digital camera, and the highly successful AQ-20, the world's first all digital processing camera. The D-3 system includes a truly field-portable recorder as well as a state-of-the-art studio VTR, the AJ-D350. Now, each and every producer—from sports, to programming, to commercials—can originate in digitally recorded video.

DIGITAL FINISHING ROOM

For Panasonic, a fully digital camera/recorder is just the start. D-3 post-production on the AJ-D350 is exactly what post-production should be—precise and agile. While a newly developed 8-14 Channel Coding approach to composite digital assures excellent pictures, shuttle speeds provide viewable video at up to 100 times normal; a special edit guardband provision assures accurate editing every time and maximizes tape interchangeability, VTR to VTR. A special audio recording system and a flying erase head allow cross-fades, V fades and the conventional editing techniques that fine programs require. Plus, Panasonic D-3 recorders support 4 channels of PCM audio. RS-422 control, thorough attention to connectivity, and easy interfaces to digital as well as the analog worlds, assure users of smooth systems integration.

Panasonic's D-3 is already off to a great start. It's the official video recording system for the production of the Games of the XXVth Olympiad in Barcelona, and the choice of prestige broadcast producers here and abroad for drama and sports program production and post-production.

Panasonic D3 proves an adage known to producers everywhere: The only thing as important as a great start is a great finish.

Official Video Equipment Sponsor 1992 Olympic Games

HASTAD ENGINEERING

The wonders of sound and vision found in nature are hard to reproduce. In fact, if anyone has come close it's EEV.

Whatever your broadcast requirements, you'll find EEV has the technology to match. High-efficiency UHF Television Klystrons from 5kW to 70kW for Television Transmitters. A range of Broadcast Tetrodes and Vacuum Capacitors for AM and FM transmitters, and Leddicon® camera tubes to fit virtually every broadcast color camera available today.

Our experience is the key to technological leadership. Our manufacturing know-how ensures the highest quality and reliability.
Above all, our professional dedication to our customers' needs makes us the natural choice of broadcasters the world over.

® Leddicon is the Registered Trade Mark of EEV Lead Oxide Camera Tubes.

Index to Contents—Television & Cable Factbook No. 60

The Television & Cable Factbook is divided into 3 volumes - **TV Stations, Cable Systems,** and **Services.** The first volume is **TV Stations** and contains sections A, B and C. The second volume is **Cable Systems** and contains section D. The third volume is **Services** and contains sections E, F and G.

Each section begins with alpha-numeric folios that correspond to the section letter (e.g. section A begins with page number A-1, section B with B-1, etc.) The following condensed index gives a brief overview of the contents of each volume. Following this index are additional detailed indexes that will help you find specific information and companies quickly.

cable and broadcast data

TAKE ADVANTAGE of this unique opportunity to develop the valuable market research you need to:

- Market new products and services
- Target promotions
- Pinpoint media acquisitions
- Monitor your competition
- Conduct numerous other types of research & analysis

HAVE ACCESS to our TELEVISION & CABLE FACTBOOK DATA:

- On diskettes for your PC (Macintosh & IBM compatible formats available)
- On 9-track magnetic tape
- On customized printouts
- On mailing labels (Cheshire or pressure-sensitive)

Market Research and Data Sales

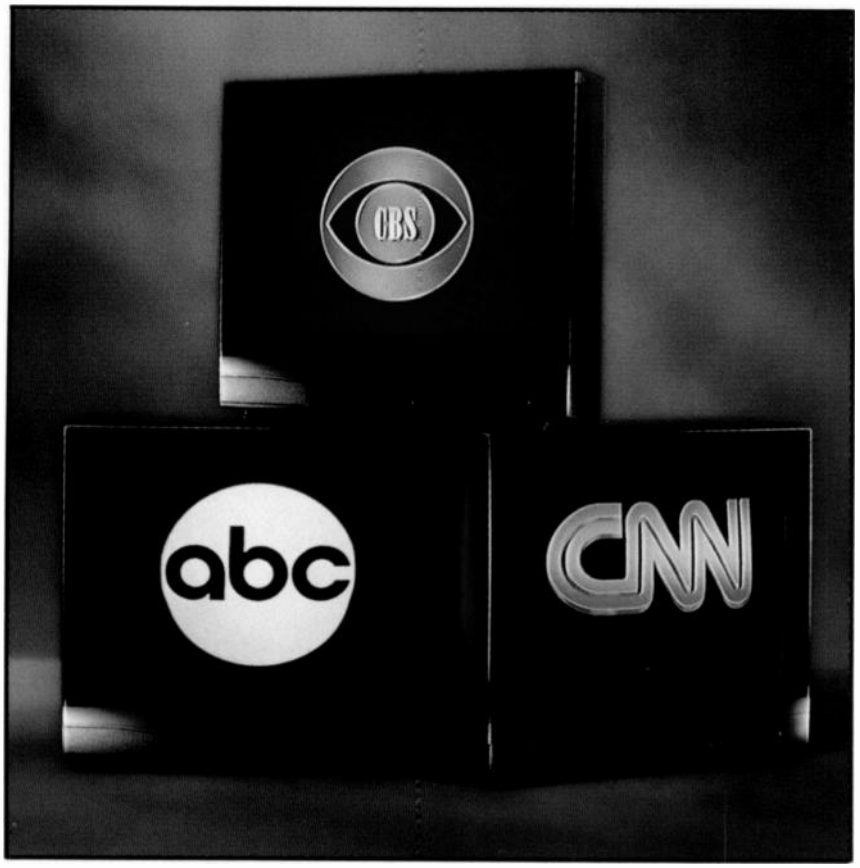
CALL US COLLECT 202-872-9200



WE'LL TREAT YOUR BROADCASTS AS IMPORTANTLY AS THEIRS.

Some of the biggest names in broadcasting rely on GTE Spacenet. So when you come to us for broadcast services, you'll be in good company.

You'll also be making a very popular choice. Last year alone, we carried more than 44,000 hours of news and sports events with broadcasters accessing our satellites over 53,000 times.

One reason so many broadcasters come to us is for our specialized services. Like News Express,℠ a satellite news gathering service for live, on-the-spot coverage. Sports Express,℠ a backhaul service for remote sports coverage. Full-time Transponder Service for program distribution. And Occasional Use Service for special or regularly scheduled events.

Broadcasters also choose us for the customer service we provide. Our computerized scheduling system ensures you'll get access when you need it. Once you're on the air, we monitor your broadcast to assure the highest quality service possible. And when you need customer service, call our toll-free number 24 hours a day, 7 days a week.

So when you have a program to broadcast, call GTE Spacenet. No one will do more to see that your show goes on.

GTE Spacenet

THE POWER IS ON

© 1990, GTE Spacenet Corporation. For more information, call GTE Spacenet at 703-848-1319.

Television Market Rankings

Listing 209 markets according to Arbitron Area of Dominant Influence Television Households

Asterisk (*) indicates no Prime Time ranking. Arbitron ADI & Prime, TV Household information & rank are based on the 1990 to 1991 Arbitron Television Markets and Rankings Guide.

Market	Arbitron ADI TV Households	Rank	Market Area Commercial TV Stations

The Silver Anniversary 25th Edition . . .

the 1991 Cable & Station Coverage Atlas

Your source for complete, accurate . . .

- Grade B Contour Maps
- 35- and 55-mile Zone Maps
- Maps Showing Locations of Cable Systems
- Listings of all cable communities—state-by-state, county-by-county—with operator's company name and phone number . . . TO HELP YOU DEAL WITH SYNDEX!
- Listings of all operating television stations by market—with licensee names, call letters, affiliation and phone number.

The **1991 Cable & Station Coverage Atlas** allows you to obtain *quick, current, exact* information about cable system and TV station signal distribution and coverage. In one convenient source. At your fingertips!

ORDER YOUR COPIES TODAY!

Warren Publishing, Inc.
2115 Ward Court, N.W.
Washington, D.C. 20037
PHONE: (202) 872-9200 • FAX: (202) 293-3435

Description of Station Directory Section

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the **Factbook.**

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

(The composite maps and all other contents of this book are copyrighted by Warren Publishing, Inc., publishers of **Television & Cable Factbook.** *The American Map Corp. ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1990 and 1991.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1991 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys.

(Data from The Arbitron Company are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the The Arbitron Company, 142 West 57th St., New York, NY 10019.)

DEFINITIONS OF ARBITRON TERMS

Total Households—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1991 and rounded to the nearest hundred. These estimates include households on military installations.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Net Weekly Circulation—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

EDITOR'S NOTE: Total Households listed for each station in this Volume of the Television and Cable Factbook do not include households in any county in which the station's circulation is less than 5%. The counties appearing in the circulation report are listed alphabetically by state. The states are arranged alphabetically by two-letter state abbreviations.

SURVEY METHODS, DESCRIBED BY ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical

control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county.

At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.

2. BMPCT: Broadcast Modification of Permit Commercial Television.

3. DOC: Docket (designation applied by FCC to hearing cases).

4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number had not been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

U.S. Television Station Directory

Data updated to October 1, 1991 unless otherwise indicated. Includes rate digests, personnel, facilities and other data.

THE STATE PAGES

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Household Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 1, 1991.

STATION PAGES

Rates, personnel and other data supplied by stations.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks)

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each county individually. For definitions of Arbitron terms, see Introduction.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

We are pleased to announce that on January 1st, our low power signal on Channel 63 signed on, providing coverage of the populous Clearwater-St. Petersburg area, as shown on the map to your right.

Audience measurement figures don't show you audience involvement. Through a constant stream of promotions and giveaways, our viewers are involved. They aren't passive viewers. *They pay attention to what they see and hear!*

Audience measurement figures don't tell you anything about management attitude. TV-32 is one of the nation's few remaining locally owned and operated stations...*tuned to the community...and tuned to the needs of our advertisers.*

Need something special? Out of the ordinary? Talk to us. WTMV is advertiser friendly. *We'll try our hardest to make you an offer you can't refuse.*

Here's how to get in touch with Fred Procise, WTMV General Sales Manager: WTMV

Ownership: Burnham Broadcasting Co. (Group Owner).

Began Operation: December 17, 1958 on Ch. 13, and on Jan. 28, 1959 FCC granted temporary Ch. 13 operation by New Orleans Television Corp. (**Television Digest**, Vol. 14:51; 15:5). Supreme Bcstg. Co. started operation on Ch. 20 Nov. 1, 1953, using WJMR-TV call letters. In Oct. 1957, WJMR-TV began experimental operation on Ch. 12 but FCC ruled in 1958 that this operation was to close by Jan. 1, 1959 but WVUE did not begin on Ch. 12 until Sept. 1, 1962. Sale of 60% by New Orleans Television Inc. (Joseph A. Paretti and associates) to Screen Gems and contingent transfer by Rust Craft of its 40% to Screen Gems approved June 2, 1965 by FCC (Vol. 5:8, 23). Switched to Ch. 8 June 8, 1970. Sale to Gaylord Bcstg. approved by FCC June 30, 1977 (Vol. 16:26; 17:28). Sale to Burnham Bcstg. L.P. by Gaylord approved by FCC June 8, 1987 (Vol. 26:47; 27:3).
