A TELOS ALLIANCE COMPANY

Red Carpet Ready.

The best digital recorder design is the one you already know.

In a world full of digital recorders, we still love the handheld microphone's intuitive design and familiarity. The iXm's ingenious, onboard LEA engine gives you perfect audio levels every time. Our dual power system uses rechargeable lithium ion and AA batteries and lets you choose your primary power source. Removable capsules give you cardioid, super-cardioid or omnidirectional pickup patterns.

Bring an iXm to the most demanding locations in the world and get ready to be amazed.

 **YELLOWTEC**

World Radio History

Your annual resource

You have projects. It's part of what we do on the technical of radio. And when it comes time to specify equipment and services, you need a resource to find the available vendors and providers that will ensure the highest success for your project. The annual Buyers Guide from *Radio* magazine is an ideal tool to use for your next project.

The information within is organized in two parts. The first lists suppliers and manufactures by categories. Access the product and service categories and you'll find what you need. The second part has contact information and additional details about the company.

This data was collected from the manufacturers. As we do each year, we reached out to them to provide their information to be included in this year's edition.

The *Radio* magazine is a resource you can use all year. Keep it handy on your desk or on your shelf. You'll be surprised at how often you will access it.

Have an idea on how the *Radio* magazine Buyers Guide can be improved? Let us know. **0**

Chris Schen

Power Tools for AES

AESDA

The AESDA provides extremely high quality AES Digital to Analog conversion while providing diagnostic analysis of the incoming digital signal to help in troubleshooting signal faults.

- 110 Ohm balanced and 75 Ohm unbalanced inputs.
- Dual function level meters display either digital input signal level or analog output level.
- Dual function LEDs display digital input information or signal condition/fault type.
- Separate balanced XLR and 3.5mm headphone outputs, each output has its own volume control.

AESAD

The AESAD is a portable battery powered device for converting mic or line level analog audio into an AES/EBU digital audio stream.

- The AESAD has two high quality transformer based mic preamps and outputs a single, variable level, AES/EBU digital signal. Phantom power is available to power condenser microphones.
- The output sample rate is selectable by the user and a word clock input is provided for synchronization with other AES/EBU equipment.
- Metering is provided to monitor both the analog input and digital output signal levels.
- The AESAD has a headphone output with level control.
- Operates from 4 AA batteries or the supplied wall power supply.

AES QBOX

Generate into or monitor from your AES digital sound system with this handy tool. Also doubles as a quality A/D and D/A converter and impedance transformer.

Receive Section

- Receives 32k, 44.1k, 48k, 88.2k, 96k, 176.4k, and 192kHz.
- Identifies Pro/Consumer mode, sample rate and faults.
- Converts AES digital to analog and outputs the analog via built in speaker or Line Out / Headphone jack.

Transmit Section

- Transmits 48k, 96k and 192kHz.
- Generate AES digital from analog Line In jack, built in dual tone generator or built in condenser microphone.

The right tool makes all the difference.

Internet Radio is the future, and until now staying on top of your streaming audio performance has been a real challenge. Limited software tools and unreliable PC based solutions just aren't cutting it.

Introducing the **Inovonics 610**. Finally, a dedicated tool for uninterrupted monitoring of your Internet Radio stream. Professional outputs, live metadata display, alarm logging, and email alerts are just a few of the features guaranteed to let you know immediately when things go wrong.

Get the full picture at:

www.inovonicsbroadcast.com/model/610

610 Internet Radio Monitor

- ✓ Locks to your stream.
- ✓ MP3, AAC and Ogg decoding.
- ✓ Alarms: Audio, Stream & Internet loss.
- ✓ iOS, Android & web control.
- ✓ 100% Automated.
- ✓ Email and text message alerting.

ON THE AIR

SANITIZED FOR YOUR PROTECTION

SOME WORDS SHOULD BE OBSCENE AND NOT HEARD

Eventide Broadcast Delays are designed to keep profanity off your air, and angry listeners, embarrassed advertisers, and the FCC off your back. We invented the obscenity delay and have a solution for stations large and small that provides up to 80 seconds of the highest quality revenue and license-protecting delay.

Our new HD compatible BD600, 24-bit delay, comes standard with AES/EBU, and provides up to 80 seconds of memory — twice as much as other delays. There are fully adjustable Delay and Dump functions, and a Sneeze function which “edits” audio entering the delay, allowing the host to sneeze, cough, or make a short comment without being heard on air.

The BD600 offers two different methods of delay buildup and

reduction: Eventide’s catch-up and catch-down system, and an exclusive fast-entry-and-exit feature which allows starting a broadcast with the delay already built up to a safe amount and ending it with a rapid reduction of delay.

For HD, the BD500 offers MicroPrecision Delay™ mode which allows up to 10 seconds of delay to be adjusted in real time in 100 nanosecond increments. This is useful for synchronizing analog and digital signals while on-air, without audible artifacts, to maintain a seamless user experience.

Whatever your size, whatever your format, you can’t expect to protect the integrity of your air and the foundation of your business without an Eventide Broadcast Delay in your rack.

Eventide

HD COMPATIBLE

**DPS-100D True RMS
Digital RF Power Meter**

- Models available for all EIA transmission line sizes and include Type N and 7/16"
- Built in back-lit LCD simultaneously displays forward & reflected power, temperature, pressure and status icons.
- Built in web server for remote monitoring & control
- Error status alerts via email (user configurable)
- Browser friendly interface works on most popular browsers
- Suitable for Analog and/or Digital modulation formats and multi-carrier applications.
- Popular interface includes DC Voltage outputs, SNMP, and RS232/485 for connection to most remote control systems.
- Proprietary 3 Strike reflected power protection algorithm

Broadcast Devices, Inc

Tel. (914) 737-5032 sales@broadcast-devices.com

**2.5/5/10/20 kW CF Series
FM Bandpass Filters**

- Light Weight Aluminum Construction
- Temperature Compensated Resonators
- 3 & 4-section versions
- Cross-coupled or Non-cross-coupled
- Constant Impedance versions also available
- Ideal for use in combiners
- Field Tunable

P Cube FM band pass filters are a cost effective way to satisfy your station's filtering or combining needs. Low insertion loss and high rejection make them the best choice for cost-conscious stations.

ARRAKIS SYSTEMS INC.
ARRAKIS SYSTEMS INC.

ARC-10BP-Blue

ARC-15BP-Blue

'fast' hands free Cell phone interface & Stereo streaming

Bluetooth
inside

Arrakis leads the way again !!! The #1 selling ARC-10BP & ARC-15BP advanced Radio consoles have gone 'Blue'... Bluetooth enabled that is! This means that the last channel on the console can be paired to any Bluetooth enabled audio device such as your Cell phone, MP3 player, MP3 recorder-editor, and more. Just pair your cell phone to the console and answer your incoming calls with the 'Call' button and drop them with the 'Drop' button, just like a standard phone hybrid. The Caller receives the console bus mix ('minus' the caller audio) so there is no feedback. OR... you can pair any Bluetooth enabled audio device such as an ipad, Tablet device, or MP3 player and stream full bandwidth, high quality stereo (A2DP) audio to the last channel on the console. If a paired Cell phone call comes in, then the stereo stream is dropped and the call can be answered. Arrakis does all of this while still allowing an external phone hybrid to be connected to the same channel at the same time. Your imagination is the only limit !!!

ARC-10BP-Blue **\$2,795**

ARC-15BP-Blue **\$3,795**

Finally ...

an easier path to EAS/CAP compliance

Digital Alert
Systems

the DASDEC-II from Digital Alert Systems

When you're looking to expand or streamline operations and EAS/CAP compliance seems to be an issue you need the product and the people that know how to make it easier and there's no better partner than Digital Alert Systems.

With multiple award winning products, a flexible platform that supports direct network integration with the top automation companies like RCS™ and WideOrbit™ no one can match the power and experience of Digital Alert Systems.

Isn't it time to make EAS/CAP compliance easier? With prices starting at just \$1995 you don't need to waste any more time. The DASDEC - here today, and ready for tomorrow.

**Digital Alert
Systems**

Speakers, Headphones and Monitoring

305 Broadcast
42NET Radio Automation System

Try it for yourself: www.bwb.fm/v2demo

Monitor & control your transmitter, anywhere, anytime.

Advanced Remote Control - from any device!

All V2 Transmitters come with an Ethernet connection as standard, at no extra cost. There's no software to install and you can connect remotely from any web connected device such as a smartphone or tablet. Automatic email alerts instantly let you know of any faults - removing the need for regular site visits.

Amazing sound built-in! No need for a separate audio processor.

Sound great, right out of the box. One of the industry's cleanest exciters and ultra-low distortion modulator combine with 4-band audio processing and 14 presets to choose from.

Change parts in minutes and be back on the air!

If a lightning strike or power surge takes out your transmitter's power supply, you no longer need to remove it from the rack and spend hours disassembling it. You can simply slide in a replacement power supply in seconds.

Call SCMS today to book your
FREE V2 Transmitter trial.

Simian Gateway

Remote Control for Simian 2.2 **PRO** Radio Automation

Broadcast Software International

Simian Remote is available for PC, iPhone, and iPad

Simian Gateway opens a portal into your Simian 2.2 **PRO** Radio Automation, enabling real-time remote control and advanced Remote Voice Track creation over the internet.

Live Remote Control

The Simian Gateway offers a TCP/IP portal into your Simian 2.2 Pro automation system so that Simian Remote for PC and Simian Remote for iPad can connect to your automation system. The Simian Gateway manages up to ten connections from Simian Remote clients to a single Simian 2.2 Pro On-Air or Production installation over your local area network or across the internet. Each person in a multi-talent program can have their own interface!

Full Featured Remote Voice Tracking

With Simian Gateway and Simian Remote clients, you now have the ability to create and insert voice tracks remotely! We aren't talking a simple insertion of a recorded audio file. Simian Remote's advanced voice track editor can download into and segue cuts that the Simian Gateway creates for the songs surrounding your voice track so that you can fully preview and set cross-over points for your voice track!

Cost Effective

Simian Gateway comes at a very affordable add-on price to Simian 2.2 Pro. Contact BSI Sales for pricing information.

Simian Remote clients are completely free. All you need is the Simian Gateway and you can install and run a Simian Remote client on as many devices as you wish. There are Simian Remote client versions for both Windows PC and iPad.

Simian Gateway runs alongside Simian 2.2 **PRO** to manage TCP/IP communications between Simian Remote clients & Simian 2.2 **PRO**.

COMREX

The new STAC VIP VoIP Call Management System from Comrex leverages low-cost VoIP technology to save broadcasters thousands of dollars annually over the cost of traditional analog phone lines. But even more, it brings wideband "HD Voice" to call-in talk shows which can make telephone callers sound like in-studio guests when using HD Voice-capable VoIP apps on your smart phone. Plus, STAC VIP is "Plugged Into Skype™" making it possible to manage incoming and outgoing Skype calls. Learn more about STAC VIP in the Marketplace at the Radio Show.

GENELEC®

The award-winning 8000 Series represents the culmination of Genelec's 35 years of experience in monitor design and development. The range is suitable for a wide variety of tasks, including near-field monitoring, mobile vans, broadcast control rooms and surround sound systems. Models include for example 8020 and 8030, and all produce high SPL output, low colouration and broad bandwidth in a small enclosure size. Each monitor is fully compliant with EU ERP Directives, and the Series also features Genelec's ground-breaking Intelligent Signal Sensing, ISS™ technology for optimum power reduction in stand-by mode. The Minimum Diffraction Enclosure, MDE™ improves frequency and power response and the revolutionary Directivity Control Waveguide provides extremely accurate control of the monitor directivity.

Gorman-Redlich Mfg. Co.
CAP-DEC1

The CAP-DEC1, Gorman-Redlich is a stand-alone CAP-to-EAS converter for use with your existing emergency alerting equipment. This cost-effective device allows broadcasters to easily meet Common Alerting Protocol (CAP) compliance requirements mandated by the FCC without requiring the purchase of an additional encoder/decoder system or other costly equipment. The CAP-DEC1 is CAP 1.2 compliant and requires only one unit of rack space. Trust the experts with over 35+ years experience in the emergency alerting industry to help you meet your broadcasting needs. Visit our website or contact us today for more information about the Gorman-Redlich CAP-DEC1. We continue to support equipment we made 35 years ago.

- Compatible with any existing EAS encoder decoder made by any manufacturer
- Powerful 1.6GHz dual core processor and 1GB of memory
- Built-in text-to-speech conversion functionality
- FAST Gigabit network capability with built in firewall for security
- Options to print, store or email logs via built-in email server
- Nearly limitless storage capacity for logs and audio messages
- Five (5) USB ports for peripherals
- Automatic clock synchronization via NTP servers
- Software can be updated via LAN or USB
- Print alert reports to USB or network printer
- Polling 3 URL's currently with room for future expansion
- FEMA independent lab affirms CAP 1.2 compliance
- Printer for EAS logs no longer required

CircuitWerkes Web Power!

SiteSentry2 - \$329 Transmitter Controller

With 2 analog meter inputs, 2 status inputs, an audio sensor & onboard temperature sensor, you can monitor your site from any Web browser, anywhere! Six relays (2 DPDT & 4 SPST) give ample control for many stations. Automatically detects meter low & meter overload conditions for metering inputs, audio monitor and temperature sensor.

Sicon-8 - Web & Dial-up Remote Control

The Sicon-8 lets you control your site via Internet with its internal Web server, via telephone, auto-answering cell phone or our free software. Setup is a breeze using the Siconcontroller software that also includes scripting, e-mail alerts, multi-site management, virtual metering & more!

Silence Sentinel - Audio Monitor w/Web

Silence Sentinel ushers in a new era of analog audio monitoring. Monitor your audio from any Web browser. When silence is detected, it can perform user-programmed, automated, sequences of relay actions & can also respond to user control via the network or via external status inputs.

Compact Radio Console...

ARRAKIS SYSTEMS INC.
ARRAKIS SYSTEMS INC.

ARC-8

- Balanced & unbalanced in & out
- Cat5 cabling for today's infrastructure
- Analog & digital with USB sound card built in
- Ideal for professional Radio broadcast applications

conductive plastic faders and long life switches for reliability. Socketed ICs for fast on site repair.

the next generation of Analog-digital Radio console

speed ... power... and control

fully connectorized for ease of installation:

- RCA's for unbalanced IO,
- Cat5s for balanced inputs,
- XLRs for mics & Program output

- Eight channels
- Stereo Program output
- 2 mic, 4 stereo line, PC, & Phone in
- USB interface for play and record from a PC
- Mix minus in-out for an external Telephone hybrid
- BOTH balanced and unbalanced inputs and output for flexibility

The BEST of both analog and digital, the ARC-8 features a built in USB sound card to play and record in digital directly from both Windows & Apple *PCs. With BOTH balanced and unbalanced inputs and outputs, the ARC-8 works out of the box in any Radio application.

list price **\$795**

*USB sound card supports USB HID compatible PCs
