World Radio History

970.461.0730

We Know Who, What, Where. You Decide Why.

Shopping for new gear and then seeing a completed project in your facility is one of the most enjoyable tasks for broadcast engineers. However, research is key to ensuring that you'll be happy with your choice for years to come.

Radio's 2018 Buyer's Guide is designed to make the process easier by consolidating information about broadcast equipment manufacturers and dealers, including contact details and company descriptions.

Keep this reference guide handy – you never know when you might need it.

- Cat5s for balanced inputs.
- XLRs for mics & Program output

Talk-remote studios Reinvented !!!

Powerful, compact, portable, and not needing a land line to take incoming calls, the 'ARC-talk-Blue' is ideal for talk studios or remotes that require a mic mixer with telephone caller interface. The revolutionary console features 5 high quality mic channels plus phantom power. Channels 6 & 7 on the console can be paired to any Bluetooth enabled audio device such as your Cell phone, MP3 player, MP3 recorder-editor, and more. Each 'Blue' channel features a button you push to connect an incoming caller and push again to disconnect from the caller. The channel One mic features 'Talk' buttons to talk to each Blue caller off line. No external hybrids are needed. OR... you can pair any Bluetooth enabled audio device such as an Ipad, Tablet device, or MP3 player and stream full bandwidth, high quality stereo (A2DP) audio into the console. The 'ARC-talk-Blue' also features a built in USB PC sound card on channel 8 so that you can play audio from your PC while recording the console Program output with your favorite software. Once again, Arrakis is 'The Leader' in Radio console evolution. Follow the Leader and visit our website today.

 ...the Bluetooth phone interfaces work with BOTH cell phones and Bluetooth headset enabled land lines.

Products/Services: Hybrid radio combines broadcast radio and the internet. A broadcast signal (FM, HD Radio, DAB, DAB+) continues to carry audio (and some data), but a radio with an internet connection (Wi-Fi,

3G, 4G, LTE) can seamlessly connect back to a station for multimedia and interactivity. It's an app-like experience for broadcast radio. RadioDNS creates and maintains the open technical standards for hybrid radio. We're a not-for-profit organization that promotes and supports the growth of hybrid radio.

THS TALKBACK
HEADPHONE
SYSTEMS 

Introducing
Whirlwind's THS Family of headphone boxes,
a new level of control for broadcast announcers.

THS boxes are ergonomically designed to put the control buttons within easy reach of the announcer even while shuffling through stat sheets. The headphone amplifiers are designed to deliver powerful, undistorted audio that can be heard over an arena full of screaming fans. From our THS 1 to our THS 5, you'll find the right configuration to suit your broadcast announcer's needs. Check out the whole line on our website and find out which THS box is the one for you.
