WI Kaukauna WKFX 104.9 no tY, 92  
 SCMO a threat to main channel? ON Toronto CHIN-FM 100.7 denied SCMO for South Asian Radio Services, Inc. The CRTC denied the application because of possible financial impact on other licensees and independent producers of such programmes in the area.  
 Elimination of tY, above, represents the last of MultiComm's FM/SCS stations, the network being bought out by president Dr. Raymond Rask for \$12,050,000, and getting out of data broadcasting. It may re-enter broadcasting, possibly including audio delivery via SCS or ownership of stations. MultiComm was once owned by Amway and Mutual. If it enters broadcast ownership, expect it to be in medium-size markets.

"Thanks again for modifying and repairing my DX-440. It's working great."

**NonIDs In Use**

Mentioned usually without calls; "strict" if a station only uses call letters once per hour as required by the FCC (at or near top of hour)

**AM Happenings Most Likely Caused by FM**

In a last-ditch effort to save the faltering AM service, the FCC expanded the band from 1610 to 1705 kHz, creating 10 new channels. The new frequencies are reserved for existing stations willing to move to the new channels to relieve

interference, with five years dual operation on the new and old channels allowed, with possible extension. The FCC is encouraging the buying of "interference rights," whereby a station receiving or causing interference is taken off the air. Rather than expanding the band, the FCC had the opportunity a few years ago to give the U.S. nine kHz spacing, which would have opened at least ten new channels, without having to expand the band. Most of the rest of the world is on 9 kHz station spacing. Words like "moribund industry" and "anachronistic" have been used to describe AM's recent plight. This move is clearly a desperate attempt by the FCC to help the ailing medium. FCC Chairman Alfred C. Sikes called AM radio "very, very sick." More than half of all AM stations are losing money, according to the NAB, with the median loss \$11,000/year, and the FCC said 197 AM stations are silent, "generally because they were unprofitable, and the owners could not attract buyers for their licenses." Preference in the new stations will go to those proposing AM stereo, and spacings will be such that there will be less interference among stations. Travelers Information Stations (TIS) would be allowed to migrate to any assignable frequency in the band, not just 530 and 1610 kHz. "The new rules should go a long way towards restoring the economic health of many AM stations," said FCC Commissioner Andrew C. Barrett. An anonymous reader: "Hah! Heh! Heh!" FCC Commissioner Ervin S. Dugan generally supported the AM band expansion, but would like 10% or one channel open for new entrants to promote diversity in media ownership. **Time Brokerage Limits Urged**

Limits on time brokerages among radio as well as TV stations were introduced into Congress by Reps. John Dingell (D-MI) and Ed Markey (D-MA). The bill would require the FCC to begin a rule-making to develop regulations to govern "bulk time sale" agreements, and would require: \*Bulk time sale agreements be filed at the FCC and be available for public inspection; \*Authorize a licensee to discontinue such an agreement whenever it concludes the pact is no longer in the public interest; \*Allow the licensee freedom to preempt such programming whenever it decides such would serve the public interest; \*Forbid bulk time sales with anyone not qualified to be an FCC licensee; \*Limit the amount of time sold to any one programmer to 10 percent; \*Limit the amount of time a station can sell to 25 percent of its operating hours; \*Not allow a bulk time sale agreement with anyone to whom it is seeking to sell the station.

Only when a bulk time sale agreement might allow a failing station to stay on the air does the legislation allow for exceeding the limits established by the bill. In order to grant such permission, the FCC must: ■Show that without such authority the station could no longer broadcast; ■Give the public an opportunity to comment on the effect that such permission could have in the local market; ■Notify the licensee that it will not automatically be entitled to renewal expectancy; ■Provide for periodic review of the FCC decision to allow limits to be exceeded; ■Provide incentives for any licensee receiving permission to resume full service to its community of license.

The NAB expressed concern about harm to broadcasters' competitiveness, saying the bill appears to "kill" rather than "define" time brokerage agreements.

**Small-Print Happenings and FM Industry News**

The Canadians have continued to test out-of-band DAB systems, this time in the proposed 1500 mhz L band. Preliminary results are that coverage for the same power was equivalent to regular FM. Testing was done around Ottawa and Montreal. Early results show that foliage doesn't attenuate L-band signals as much as had been thought, but is skeptical of any study showing coverage equivalent to FMs at a much higher frequency, albeit with a different modulation scheme.

Being fined: KCNA 102.7 Cave Junction OR \$4,000 for indecent programming, WKTC 96.9 and AM Goldsboro NC \$7,000 for EEO violations; KHLT 94.1 and AM Little Rock \$8,000 for EEO sanctions. Being sued: WHFS 99.1 Annapolis for over \$3 million by former national sales manager Patti Ebbert, saying the station billed advertisers for spots that didn't run while falsifying the station logs and using on air "plugola" for items announcers have an interest in. Attorney Mark Tone denied all the charges and added: "We categorically deny that any of it, even if true, had anything to do with her dismissal."

An LMA cancelled: WKLS 96.1 Atlanta and WALR 104.7 Athens GA after only three months. WALR and WCNN AM found no billings improvement in that time. Not moving to that market: Tom Gammon's WHMA-FM 100.5 Aniston AL to stay there. One reason: interference in the area between WHMA-FM and WUSY 100.7 Cleveland TN would be too great from a site near Atlanta, the FCC decreed.

A rare public criticism of an FM station by an ad agency figure came against KBEQ 104.3 Kansas City by Tracy Thomas, who found fault with the station's playing 45 minutes of "commercial free" music and then jamming all the spots into the final 15 minutes for a "commercial ghetto." She said the practice encourages tuning out during commercials, and thinks advertisers deserve on-air respect, not scorn.

From the classifieds: Program manager for gospel formatted station. Tape and resume to Paul Hollinger, WBYN (107.5), Box 3022, Lancaster PA 17604, EOE.

FM CPs wanted—will consider dark/bankruptcy. E. Polleek, 1st Broadcasting, Box 691, Wilmette IL 60091; (301) 263-6868.

Want to buy Realistic STA-2100D FM-AM tuner, L. VanLuyen, WGMC, 60 Rochelle St., Rochester NY 14612.

CONTRIBUTIONS FROM READERS

Continuing with "Doc" Searls' reportage of Hawaiian transmitter sites: "You'll see that KKUA [90.7 Wailuku] has the highest height above average terrain in all your listings—1687 meters or 5535 feet. The mountain is over 10,000 feet high. So here is, by FCC measures, the highest transmitter in the entire country, and yet it is hammocked between and below the peaks that are only a few feet away. Needless to say, those peaks cast big shadows. True, KKUA's antenna has line-of-sight to most of Maui's populated regions, and in the other direction it faces the entire northwest side of the Big Island. But the shadows fall across two of the island's coasts, including the famous 'road to Hana'. . . My guess is that there are restrictions (by the observatory, I suppose) against raising a sizable tower anywhere on the site. . . On the west side of the island where we stayed, KKUA's sister from Honolulu (which it repeats), KHPR, came in much better. In fact, so did all of the Honolulu stations. An interesting item for your map is that KPOA, Lahaina's Class A on 93.5, appears to transmit its 160-watt signal from atop another island: Lanai. I determined this by listening and looking at where the station's STL pointed. I found KPOA to be an excellent station as well, playing nothing but authentic Hawaiian music, all

day long. Apparently they can make this succeed commercially, which I think is terrific.

"Closer to home, I cannot let the [temporary] demise of KPIG [107.5 Freedom CA] pass without notice. 'The Pig' was the most recent incarnation of Gilroy/San Joe/Santa Cruz's KFAT (which is now strictly 'The Fox'—KUFX), a legend with a substantial cult following. KFAT had passed into history before I arrived, but KPIG was one terrific station while it lasted. It had a real personality, unplasticized by the tyranny of consultation." [That station has just returned to its KPIG call letters after a fling as KHTX, and presumably reclaimed its former lifestyle—b.e.] Searls continues: "Speaking of life signs, I detect a strong pulse at KVVN (99.3) in Napa, at the south end of the wine country. With it, you get the feeling that you're listening to somebody's record collection, rather than a strict format of some kind. Ben Fong-Torres, the veteran radio critic, wrote about it in the San Francisco Sunday paper a few weeks back. By the way, it non-strictly calls itself 'Vine' or 'The Vine' as well as its actual call letters. Not 'K-99' as the Atlas says.

"The Hawaiian trip actually started in Hong Kong, with a brief stop-over in Japan. The most interesting thing I heard was a new Japanese station called 'J-Wave', with mostly American pop music, some new age jazz and a presentation that is completely bilingual, alternating between English and Japanese. It was my first and last chance to use my tiny Sony digital all-band radio. Among other things, it covers the Japanese FM band, which is below the FM band used by the rest of the world, approximately where VHF TV channels 5 and 6 are found in the U.S." He's now moved to a location high above the Bay area where stations come in on every FM channel, but yet far enough away that there is no local station overload. He's looking for recommendations for the most directional FM antenna available, including sturdiness to withstand the high winds there. "FMedia! continues to look terrific, and I have about worn out both my *FM Atlases* already," he writes.

With a new FM Atlas at the printer's in Benton Harbor MI, this issue presents all the news up to the publication deadline—Nov. 22, 1991. Using small type, about eight weeks' of station news has been crowded into this issue, with the next FMedia! slated to come out in late December or early January. A Canadian reader kindly sent an official listing of the on-air facilities and call letters of stations there, and careful checking of that information with what was already on hand, resulted in many updates and revisions—all shown in this issue and all making the

new "FM Atlas."

Late word from the "M Street Journal": A new network is North East Satellite Entertainment, an all-night service targeting stations from OH to New England, with "rm" type music, talk features, farm news and commercials. It also plans live remotes. Some charter affiliates: WTOJ 103.1 Carthage, WFLR-FM 95.9 Dundee, WENY-FM 92.7 Elmira, WKPO 105.3 Hornell and WKGW 104.3 Utica, all NY; WZWW 95.3 Bellefonte, WDSN 99.5 Reynoldsville and WGBI-FM 101.3 Scranton PA.

Two Las Vegas stations have agreed to advertise on each other's facilities—a rarity among separately-owned stations. KEYV 93.1 is running spots for college and pro football games on KENO AM, with KENO carrying spots for KEYV during the games. Said a KENO official: "What we're doing is against all traditional logic. Radio stations just don't advertise with each other." "Just because KEYV listeners tune into a football game on KENO doesn't mean they're suddenly going to become a fan of oldies. All we [at KEYV] want is for them to listen to a football game for two hours. When the game's done, they're most likely going to switch back to KEYV."

Writes an engineer in IN: "Something you might do with your readership is to survey them for their wants for a digital audio broadcasting system. I'm sure you have some idea of the broadcaster issues involved and how strongly they are trying to push the design of the system in their favor. Just how important is local news and information to the typical listener? Would 100 channels of different kinds of music with little talk, for example, be useful?" [In Japan, a cable system is offering 100 channels of music and even background sounds so you can call home and have "alibi" ambiance playing to fool a wife, for example; this may expand to 1000 channels if the public wants it, but it's strictly cable—b.e.]

"What is lacking is a spokesman for the end user. The broadcasters know very well how to influence the FCC, but theirs is a very parochial viewpoint. What does the ultimate customer want? . . . Some of the broadcasters are behaving like a group of candle manufacturers banding together to sue and restrain Thomas Edison from developing the light bulb. DAB, of course, represents a threat to their business, and many of them would like to see it go away. The customers, I suspect, merely want better reception and more choices of programming. The technical problems are relatively simple. It's the 'political' issues that are tough. . . Yours is a radio-oriented readership, and I'd like to hear what their ideas are like."

Until about 30 days from now,

*Ben F. Fong-Torres*

 open house, "so naturally I went nosing around.  
 They have spent a great deal of money by the  
 looks of things. The entire second floor of a bank  
 building. . . The entire operation is automatic  
 [and] owned by the same group which operates  
 WBOQ 104.9 in Gloucester. . . I am not happy  
 with the whole set-up and I told them so. I was  
 really a pain in the butt to all the executives, who  
 to give them credit, listened to me. My major  
 complaint is that the tapes they are using are  
 heavily processed to avoid any variation in  
 volume—classical elevator music. . . When I  
 pointed out that I can receive six other classical  
 music stations and didn't need another, I was  
 jumped by half a dozen visitors who wanted to  
 know how I could get so many when they  
 couldn't. I asked them if they had an outside  
 antenna; not one of them did. I told them to do  
 so and see what else is on FM besides a few loud  
 rock and rollers. This also didn't suit the station  
 management. . . I also suggested that they give up  
 classical music and convert to sports. We cannot  
 get the Red Sox, Bruins or Celtics on any local  
 FM or AM station."

- ON Wingham CKNX-FM 101.9 denied bid to simulcast with CKNX AM the all night "Coast-to-Coast" program

**On Air (Selected)**

- CO Durango K213AD \*90.5, "but looking for a new site" to serve town better [upgrade
- FL Bonifay WTBB 97.7A—but still no sign of/
- IL Ava WXAN 103.9 g, S, voted the number one southern gospel station in the nation by the Southern Gospel Music guild. It recently had its 10th anniversary.
- IN Nappanee WLRX 95.7, heard with sports
- IA Iowa City KRNA 94.1, moved from 93.9
- MD College Park WMUC \*88.1 "is a classic example of FCC oversight. It is trounced so badly by WJHU (88.1 Baltimore) you can't even get it outside of the 495 Beltway."
- MA Boston WCDJ 96.9, and no longer for sale by Emmis Broadcasting Corp. Bolstered by the \$70 million in the sale (subject to FCC approval) of WFAN 660 AM New York, Emmis no longer needs the cash infusion of a WCDJ sale. Station on market two years hadn't sold anyway.

- MA Brookline WBOS 92.9 sold to Granum Communicaitons for \$9 million, less than half what Ackerley Communications paid in Jan. '89—a sign of the recession nationally and its effect on radio station values.
- MI Kalamazoo WMUK \*102.1 back on with full power after a signal which was "weak to nonexistent" September through November.
- MI Port Huron WSAQ 107.1, now with 6000 h,v
- NM Farmington K221DJ 92.1, having moved from 105.5. Primary KISZ 97.9 Cortez CO now has its studios in Farmington, using a two-hop STL to get audio to its CO transmitter. "I'm leaving KISZ for new adventures in radio in 1992!"
- OH Westerville WBBY 103.9, but not for long, unless FCC recants. U.S. Supreme Court rejected appeal of an FCC order revoking the license of this stereo, jazz station, serving Columbus. WBBY has only until Feb. 11 to wind up its affairs and leave the air, after which the FCC will call a 30-day window for new applications. The FCC said the market has enough stations so that it won't call for an interim operator for the channel. What irked the FCC is that Station Manager Richard Nourse was to have put in 40 hours a week on station business, but instead was found working at Pioneer Cadillac-Chevrolet in Marietta OH, far outside the WBBY signal area. Dealership is owned by Richard's father Carl, and licensee never told FCC that Nourse was no longer residing in the Columbus market. In 1985 an FCC administrative law judge ruled in favor of WBBY, saying the licensee had been "misleading and lacking in candor," but that denial of license renewal would be too severe a penalty. The FCC Review Board disagreed and ruled that WBBY was guilty of "a pattern of willful, deliberate and repeated violations." Can today's deregulatory-oriented FCC really be that harsh on an on-air station that otherwise seems to be serving the public interest?
- VI Christiansted WAVI 93.5 (formerly 94.3); had been silent since Hurricane Hugo
- AB Lac La Biche CFWE 89.9 on air, on satellite, and getting calls from various areas of Canada and the northern U.S.
- AB Red Deer CIZZ 98.9 now 100,000 h,v (225 m), and "heard in some parts of Edmonton

Installing the new transmitter at Z99

and Calgary"

**AM Happenings Most Likely Caused  
by FM**

AL Jacksonville WJXL 810 silent  
AK Eagle River (Anchorage) KCFA 1020 silent  
FL Fernandina Beach WQAI 1570 silent (had  
been travel information)  
FL Lynn Haven WFBN 770 deleted; FCC  
dismissed application for extension of time  
IL Chicago WPNT 820 silent by FCC authority to  
Sept. 9, 1991, "and a subsequent silent authority  
request is pending"  
IN Noblesville W.YIC 1110 deleted by FCC  
KY Bowling Green WLBK 1410 silent. "There are  
no plans for this station to ever return."

KY Murray WNBS 1340 silent pending sale  
MD Baltimore WCAO 600 now g. "Was pop-  
rock'n'roll until 1982 when it went k. Had gotten  
1/3 of k audience with FM WPOC 93.1 getting  
other 2/3. In its heyday it once received  
unprecedented 63% rating! Going country didn't  
get much attention in Nov. '82, but this change  
has 'everyone' talking (old DJs all gone)."  
MA Concord WADN 1120, for the last 2 1/2 years  
operating as "Walden Radio" with acoustic folk,  
now adding contemporary folk and some rock.  
"Economics can be sobering. . . We're still  
definitely a new business, and under the best of  
circumstances we'd expect it to take three years  
to become established. . . the station is still  
severely in the red."  
MA Fitchburg WXLO AM 960 (formerly WGGL)  
leaves air "for good," and lays off two of four  
employees, with the others going to FM. Station  
had been for sale for over a year. Its demise an  
example of "the general decline in AM radio."  
Except for morning drive-time, W/XLO simulcast  
WXLO-FM 104.5.  
MI Grand Rapids WMAX 1480 being donated to  
Grand Valley State University, licensee of  
WGVU-FM \*88.5 Allendale. "Some time early in  
1992, AM 1480 will become WGVU and  
simulcast the 'jn' format of WGVU-FM. The  
university had long sought a way to beef up its  
radio signal in Grand Rapids, which is not  
covered well by WGVU-FM, a Class A located 23  
km west of the city. WMAX, a perennial  
loss-leader in G. R. radio, had been religious in  
the 1980s, changing to a relay of CNN Headline  
News in July, 1991. Exact date of transfer  
depends on when FCC approval is made."  
MI Rockford WBYY 810. "New station with a  
format of all commercials. Ads are in seven-

minute 'clusters' with a one- or two-minute 'live'  
break (weather, time) in between. AM sinks to a  
new low!"  
MN Richfield KMZZ 980 no longer stereo. Only  
AM stereo in the market is WCCO 830 Minne-  
apolis. KMZZ being sued by KQRS-FM 92.5  
Golden Valley MN for a TV ad saying "KQRS has  
abandoned today's new generation of rock'n'  
roll," and to tune for such music to KMZZ.  
KQRS claims to play a lot of "classic" rock as  
well as "substantial amounts of new and current  
rock and roll music."  
MS Yazoo City WAZF 1230 silent.  
NY New York WZRC 1480 seeking a waiver from  
FCC for a year to find a buyer in wake of  
Infinity's buying WFAN 660 AM for \$70  
million—highest price ever paid for an AM station  
from cash-starved Emmis Broadcasting. Infinity  
also owns WZRK 92.3, home of Howard Stern,  
with rival Don Imus (WFAN personality) now in  
the same fold. Speculation is that WABC AM 770  
may be up for sale, although Capital Cities/ABC  
denies that. Other talk centers on poor ratings  
performer WPLJ 95.5 becoming a clone of  
WABC's talk format, much like WLS-AM-FM  
Chicago now simulcast. "WPLJ is getting worse  
with all the A/C 'safe' recurrent burnouts. [Scott  
Shannon] could have taken a bold approach with  
WPLJ. . . He had his chance to make WPLJ  
exciting, but he blew it!"  
NC Fuquay-Varina WNBK 1460 silent.  
PA Easton WEEEX 1230 "gives up its legendary  
call letters to become WODE-AM, total simulcast  
of the FM, except for New York Giants football.  
The WEEEX call letters had been in the building  
for over 40 years, starting with the original  
WEEEX FM 98.3, which signed on in 1950.

moving to 99.9 after WSAW-FM [Allentown] vacated that frequency in 1956. WEEX-AM 1230 was added in 1957. Both stations were owned by the Easton Express, a local newspaper, which is still publishing. During the 1960s and early 1970s, WEEX-FM and AM were a powerful top 40 simulcast combo. The FM would later be

**HOT 99.9**  
**WHXT-FM**

V'QQQ, WHXT and (today) WODE-FM. As program director, I had high hopes of restoring the historic WEEX-FM calls, but the owners, Roth Broadcasting, would not permit it. In its final days, WEEX-AM was satellite, running SMN's Pure Gold format, with some local dayparts. I spent my weekends with the AM station, never suspecting that I'd be the last program director of WEEX. On the day of the format change, the owners chipped off the WEEX call letters from an outside stone wall at the radio station, where they had proudly stood for so long. . . Today, WODE-FM 99.9 mentions 'AM 1230' twice an hour or so, as an after-thought. I will miss WEEX, but too will miss the never-reincarnated WEEX-FM, which I still hear in my mind's ear."

WA Seattle KVI 570 drops o for all news and talk. "With KJR 950 all sports, there are no longer any AM standalones programming oldies. KZOK-FM and KBSG (which simulcasts on AM) have the format all to themselves."

NF Grand Bank CKXJ 610 and NF Harbor Grace CFIQ 970 close their studios—to rebroadcast CKIX 99.1 St. John's.

LUXEMBOURG—Radio Luxembourg shutting down its 1440 kHz AM station, according to Glenn Hauser's "World of Radio," heard Saturdays 11:05 p.m. EST on WWCR 7520 kHz shortwave radio.

### FM Rulemakings Proposed

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AL Hartselle 106.1C3 for A, WYAM, Jan. 27, Feb. 11
- FL Dade City 96.1A by the Bernaths, site to be 5.4 km E because of WMTX 95.7C1 Clearwater FL and WRXK 96.1C Bonita Springs FL, Jan. 24, Feb. 10
- GA Hinesville 104.7C3 for A, WHVL, site to be 12.8 km W because of WFYV 104.5C Atlantic Beach FL, Feb. 3, 18
- IL Maroa 107.3A by TNT Communications, site 12.6 km SW to avoid a short spacing to WPGU 107.1A Urbana IL, Jan. 24, Feb. 10
- MN Detroit Lakes 102.5C2, Robert D. Spilman, Jan. 30, Feb. 14 [with Branson
- MO Ava 92.1A for 92.3A, KKOZ-FM, /
- MO Branson 106.3C2 for C3, KRZK, Jan. 30, Feb. 14 [KCMG-FM, with Branson
- MO Mountain Grove 92.5A for 106.5A, /
- NY Campbell 101.9A, Markey Bcstg. Co., site to be 3.9 km W because of WECQ 101.7A Geneva NY and WAVT 101.9B Pottsville PA, Jan. 16, 31 [Atlantic Beach
- NC Atlantic 94.5A for 107.3A, with /
- NC Atlantic Beach 107.3C1, Robert L. Purcell, site to be 28.8 km NE to avoid WNCT-FM 107.9 Greenville NC short spacing, Feb. 3, 18
- NC Hatteras 101.5A for 94.3A, with Atlantic Beach [Jan. 21, Feb. 5
- OK Sulphur 100.9C2 for C3, KFXT, /

- OR Altamont 96.5C1 for 101.3C, KCHQ, Jan. 17, Feb. 3
- OR Eagle Point 107.5C3 counterproposal
- OR Harbeck-Fruitdale 98.3C2 for A, KAJO-FM, Jan. 16, 31 [30, Feb. 14
- WI Altoona 98.1C3 for A, WISM-FM, Jan. /

### FM Rulemakings Finalized

*Dates are when FCC filing windows are open*

- AL Bay Minette 106.5C3 for A, WFMI
- AR Bald Knob—dismissed KKSJ's bid for 107.1C3 for A and substitution of 104.1A for 107.3A at Clarendon AR (affecting KXRC). FCC found that 40% of the city would have an obstructed signal at the station's proposed site, citing 73.315 of the rules which requires a 70 dBu signal over the entire city of license.
- AR Danville 105.5A, Jan. 10-Feb. 10
- AR Prairie Grove 94.9C2 for A, KDA8
- FL Callahan 93.3C2 (move from St. Marys GA), WAIA
- FL Cape Coral 103.9C1 for 103.7C2, WXKB
- FL Carrabelle 106.5C1, Jan. 22-Feb. 21. FCC agreed with Allen Audio and disallowed an upgrade to WOYS 100.9A or WAPY 105.5 Apalachicola, both wanting 106.5C1.
- GA Americus 98.7C3 for A, WPUR
- GA Cusseta—denied Gary P. Albaraz' 101.3A bid because the only available site would be on the Fort Benning Military Reservation, and presumably not available to commercial applicants.
- GA Dublin 95.9C1 for C2, WQZY
- GA LaFayette 107.5A, Feb. 4-Mar. 5, denying the channel to Wildwood GA.
- ID Hayden KKCH 94.5C for A
- IN Churubusco 96.3B1 for A, WKQM
- IA Albia 96.7C3, Feb. 4-Mar. 5
- IA New Sharon 99.9C3, Feb. 4-Mar. 5
- KS Belle Plaine 92.7C3, Feb. 4-Mar. 5
- KS Minneapolis 92.7C2 for A, KILS
- LA Clayton 107.9A, Jan. 14-Feb. 13
- LA De Ridder 92.1C3 for A, KROK
- MO Memphis 106.5A for 96.7A, KMEM, with Albion
- OH Hubbard—denied WRKU 95.1 Grove City PA's objection to the assignment of 101.9A as untimely
- SC Ridgeland 104.9C3 for A, WSHG
- TX Bay City 102.5C1 for C2, KMKS
- TX Claude 95.7C1 for A, KARX
- TX Crane 101.3C1 from 100.9A, KAIR
- TX Crystal Beach 101.5C3 (and not to Gilchrist TX), Feb. 4-Mar. 5
- TX Dimmitt 100.5C3 from 95.9C3, KDIU
- TX Electra 94.9C2 from 95.1A, KWTA
- TX Odessa 107.7C2, Jan. 14-Feb. 13
- VT Derby Center 92.1C3 for A, WM00
- VT South Burlington 95.5C3 for 95.3A, WXXX
- WA Colfax 102.5C3 for A, KRAO
- WI Cleveland 98.1A for 103.1A, WKTT
- WI Kaukauna 103.1C3, but denied WKFX's request to upgrade from 104.9A; other applicants are eligible to file during the Jan. 22-Feb. 21 window.

### FCC Proposes Rule Changes Concerning Conflicts Between FM Allotment Petitions and Applications

The Commission wants a way to resolve conflicts between rulemaking petitions to

amend the FM table of assignments and applications for new or modified FM facilities, including move-ins to nearby cities. Two examples follow. Tom Gammon's WKKJ 93.3 Chillicothe OH applied for a site closer to Columbus, but that request was blocked by a petition for an FM channel to the small town of New Washington OH by a company calling itself "Good News Broadcasting." Then Gammon's WTJY 92.7 Taylorville IL tried to move into the Springfield market and was thwarted by an allotment request for Virginia IL by "Panther Creek Communications." Both "Good News Broadcasting" and "Panther Creek Communications," it was learned, are really Saga Communications, owner of WSNY 94.7 Columbus OH and WYMG 100.5 Jacksonville-Springfield IL. In order to plug this loophole, the FCC wants to make the deadline the same—for filing petitions to deny against new and major change applications and for filing new rulemaking petitions. The FCC tends not to make any distinctions between proposals for new first or second aural services or mere upgrades to existing stations, but is interested in comments from others by Jan. 22, or reply comments by Feb. 6.

### FCC Streamlines FM Application Process

Now that fewer applications for new or major changes in FM are being filed at the FCC, the agency can devote more time to going over each one, even allowing applicants a "second chance" to correct technical deficiencies that would previously have disqualified an applicant. In 1985, the FCC took its "hard look" approach to applications "at a time when carelessly prepared and/or speculative applications were frequently received," and it allowed only limited opportunity for amendments to be made. Under the new policy, the FCC would give applicants more opportunity to correct defects in an otherwise acceptable filing. During each year 1985 to 1988 an average of 1441 new station applications were received—contrasted to today's volume of only 450 applications. "All of the filing windows for the Docket 80-90 channels have closed and the Mass Media Bureau is currently receiving an average of only 450 applications for new FM stations per year. The number of applications currently pending is approximately 600, the lowest it has been since 1977. In view of the decreased volume of applications, consideration of curative amendments prohibited under the 'hard look' procedures may now be possible without concomitant processing delays." Additionally, the FCC says the quality of FM applications has improved and speculators, who often submitted hastily-prepared applications, have been weeded out.

This action followed the FCC's FM Branch doing an informal review of the licensing process, in which the most

common errors found had to do with transmitter power output being miscalculated, towers constructed to the wrong height, antenna and transmission line types listed incorrectly, and the construction permit allowed to expire before the license is filed.

### Birch Ratings Cease; Arbitron Now Sole National FM-AM Ratings Service

VNU Business Information Service shut down its Birch Research radio ratings last month, striking a deal with former rival Arbitron to publish the "Scarborough Report" on advertising expenditures. "A lot of stations were unprofitable in 1991 and those clients with both Birch and Arbitron—who had to cut one out—were retaining Arbitron. . . Stations just stopped paying their bills. The economy slowed some payments and some clients simply stopped honoring their contracts," Birch officials said. Not known is the fate of markets in which only Birch surveyed. These included Santa Maria CA, Fort Collins CO, Danbury CT, Ocala FL, Pocatello ID, Quincy IL-MO, Elkhart IN, Port Huron MI, Laredo TX and Wausau WI.

Arbitron, too, may be hurting, especially if broadcasters follow the lead of EZ Communications' Alan Box who is boycotting the ratings service, claiming the fees are excessive. The chain of 14 stations is dropping Arbitron at a savings of more than \$1 million a year. Without subscribing how do stations sell based on ratings? "Easy," says Gil Rozzo, general manager of WIOQ 102.1 Philadelphia. "The same Arbitron book I pay \$150,000 for advertising agencies buy for \$75. When I walk in the door, they already know what's in it." Other alternatives to Arbitron include Willhight Research in Seattle and perhaps colleges and universities might once again do meaningful audience research for radio, or at least point stations in the direction of do-it-yourself research projects. It is hoped that Arbitron will honor existing Birch contracts, expand to include Birch only markets and integrate public FM station audience figures along with commercial station figures in its reports, as Birch did.

### Small-Print Happenings and FM Industry News

From *Broadcast Technology*, Canada has 702 stations—385 AM and 317 FM; 63% of the population has FM receivers. Quebec is the only Canada region having more FM than AM stations. The Ontario government is poised to pour \$1.78 million to support community radio stations—all believed to be FM—in native and francophone communities in the province. Grants will be available from the Ontario government by April for hiring staff and for operating expenses.

Philly pubcasters WHYH \*90.9 and WRTI \*90.1 both did well in their recent fund drives, netting \$303,075 and \$275,000 respectively. Utah's KUSU \*91.5 Logan, meanwhile, complained of a lack of support for its "quiet" fundraiser, and planned to launch a more obtrusive drive to raise \$49,000. Tape machines replacing two that are 19 years old at a cost of \$10,000 was a high priority. A \$3,500 tube for

### Court Goes to Bat for Volunteers in Miami

the transmitter had to be replaced. WAMC \*90.3 Albany, which sought \$200,000 in its fund drive, actually raised \$209,000 from 4,500 pledgers. WMHT-FM \*89.1 Schenectady raised \$100,434 from 1,292 contributors, 525 of them new members.

Bankers turn deaf ear on broadcaster wanting to upgrade—that's experience of Robert Rowland, owner of WHKR 102.7 Rockledge-Titusville and WCAC 105.5 Sebring FL. WHKR, an A, has a CP to become a C2, but that will take a \$75,000 cash infusion which Rowland can't get from the bank. Going to 50,000 watts will "almost double the value of [the station's] collateral. To keep my loan payments current, I have had to sell my home, my wife's car, used my savings and sold my stocks and securities. You can lower the prime rate to 5% and it won't help me one iota if the bank won't lend the money. I'm trying to hold on to two small stations and 17 employees. I can't last much longer." No wonder stations often find it advantageous to sell after receiving FCC approval for an upgrade.

A local marketing agreement (LMA) has been reached between KRMX 94.9 and KSON-FM 97.3 and AM San Diego for assistance in their programming and sales efforts. The FCC now starting to field-inspect LMAs. "While time brokerage agreements need not be in your public file, they must be made available to FCC personnel," the NAB cautions.

National Association of Broadcasters DAB Task Force issued these criteria for any system of Digital Audio Broadcasting: CD quality sound, it should replicate or improve existing coverage areas, accommodate all existing AM-FM broadcasters, be immune to multipath and fading, no interference, minimized cost to stations to implement, low-cost, small receivers for the public, have data broadcasting capacity and allow for gradual rather than abrupt signal degradation when leaving the service area. The NAB has named an FM Transmission Committee, among several other committees. Purpose of this FM committee not immediately clear, but it's headed by Bert Goldman, KMLE 107.9 Chandler-Phoenix AZ, (701) 255-5757.

The NAB told the FCC it should reject pay-to-use radio services provided by cellular companies because they would compete with similar services provided (free) by broadcasters.

Country is the strongest format among those 65+, according to a survey reported by the NAB. Next in order: sports (men; for women it's too small to measure), religious/gospel, easy listening, then classical and talk (a virtual tie), trailed by jazz and classic rock.

The NAB offers these tips to harried executives about reclaiming their desk: Clear your desk every night, continuously refine what goes on the desk top, do not use it as a file cabinet, keep 20% of the drawer space empty, keep desk and surrounding area clean, and leave the desk periodically.

One of the services the NAB offers its members is an FM CP mod status check. Using FCC-provided listings, the NAB can check on where an application is in the "queue" and whether or not there are any "blockages" such as FAA objections and application deficiencies. For more info call (800) 545-5728. Speaking of the FAA, the newsletter of the Milwaukee SBE Chapter 28 reports an item from Evans Associates that the FCC has relaxed restrictions on issuance of CPs for FM facilities which received an FAA objection due to electromagnetic interference. "In cases where the FAA had given the opportunity to renew their objection to the FM proposal, but did not take advantage of that opportunity, the FCC will issue a CP conditioned upon one year of operation without interference to avionic receivers."

Chicago disc jockey Irene Mojica awarded \$160,000 for racial discrimination from Gannett's WGCI-FM 107.5 in federal court. She had filed suit for \$3.4 million, charging racial and sexual harassment. No word as to any appeal.

Alliance Broadcasting of Walnut Creek CA, which tried to buy KMGC 102.9 Dallas is buying

instead KRSR 105.3, "Star 105.3." Classical WRR 101.1 there may be hamstrung by rules passed by the city council calling for the municipal station to broadcast all meetings, including briefing sessions. Loss of revenues and lower ratings might cost the station \$70,000 as a result. Council previously demanded the station make money, but the latest may be counterproductive. One city council member charged that WRR is a "station for elitist Europeans." Al Lipscomb complained that WRR doesn't play rock, country or blues, and said he was a "fool" for not voting to sell the station when it was discussed. WRR's ratings have been near the bottom, tied at No. 20 with KKDA AM.

And what about WABE \*90.1 Atlanta, which paid \$50,000 for a survey of listeners to 90.1 and TV-30? The survey proposed controversial changes, such as eliminating its classical music, but "members felt that conclusions were determined before facts were gathered, that the report didn't answer the basic questions and generally they did not get their money's worth from the report," said a local newspaper answer column. The report would make WABE "multicultural," and probably more like what is on WRAS \*88.5 than what it is now. WABE, however, brought in \$210,011 during its fall membership drive. Interestingly, WABE has filed a petition to deny GA Public Telecommunications Commission's bid for a 50-watt FM translator in Atlanta (100.7) to bring in WJSP-FM \*88.1 Warm Springs GA.

WCRB 102.5 Waltham-Boston MA has commissioned its own symphony with composer Ned Rorem. The work, "Swords and Plowshares" premiered on the station Nov. 14 with the Boston Symphony, conducted by Hugh Wolff. The piece has 14 parts, the first seven telling the horrors of war, the second seven the effects of peace.

KLON \*88.1 Long Beach facing a license renewal challenge from St. Joseph Radio, which produces a weekend program on KGER AM 1390 there. William Hulsey, a lawyer for the Catholic group said: "One of the questions to be raised is whether playing jazz is fulfilling a public service need." If the challenge succeeds, KLON would turn into a Catholic instruction station. Seems that the challengers could benefit from learning what FM/SCSubcarriers can do. Another problem for KLON—California Public Radio's nightly newscast "Calnet" ran out of money and taken off the air by producing station KLON, just two months short of its third anniversary. Rick Lewis, KLON manager, hopes it can return some time this year. The program staff had gone from six to three, but the cutbacks were not enough to save the show.

Monophonic WDNA \*88.9 Miami was the scene of a battle between its management and a group of volunteers who were forced off the air. Score a victory for volunteer deejays when Dade County Circuit Judge Amy Steel ordered WDNA to find a way to put the ousted folks back on the air. Station dismissed them in wake of cutback in hours from all night and in moving toward a latin/jazz mix. Volunteers hope to turn the station back to an eclectic music format. But stereo—when is it coming?

The FCC has waived the \$35 fee for radio operators/announcers at noncommercial stations—in response to filings by the Intercolligate Broadcasting System, the National Association of College Broadcasters and others. However, when such a person gets a job at a commercial station the fee must be paid.

A merger creating Colorado Public Radio has been approved by the FCC. It's between KPRN \*89.5 Grand Junction and KCFR \*90.1 Denver, with the Grand Junction station to get KCFR's programming across the Rockies by satellite. FCC was involved because five of seven KCFR board members tried to stop the merger and keep KPRN's local productions intact; this followed General Manager Marsha Thomas cancelling volunteer deejays' eclectic music programs last February. The FCC rejected the petition and approved the license transfer. First it was the

controversy, then a more consistent program format which were cited as actually raising the station audience. Listeners to 10 translators grew from 5,700 to almost 12,000 in one year, while the Grand Junction audience went from 4,200 to 6,300, Thomas claims. The stations are governed by the combined boards of KCFR and KPRN, and have invited independent public stations in the state—such as at Aspen and Durango—to join in.

Moving into new studios—KFAL \*90.3 Minneapolis, WUFN 96.7 Albion MI. WUFN's move came one year ahead of schedule, with \$280,000 pledged during a campaign to aid this Family Life Radio Network station.

Surviving a fire: KPFA \*94.1 Berkeley, Oct. 20, when one of the worst urban fires in CA history hit the transmitter area on Grizzly Peak Boulevard behind the hills of Berkeley. Helping was the fact that the grass had been well mowed near the transmitter building. The fire had entered the fenced area in only two locations and about three meters from the building "an old antenna and some aluminum-coated copper wire were melted down," and an emergency generator and an old car were "burned to a crisp." But the tower remained standing, and about 24 hours later broadcasting was resumed with the help of another emergency generator.

CBS allowed to buy WCCO-TV-AM, WLTE (FM) Minneapolis and was granted a waiver to the "one to a market" rule allowing for multi media holdings in the market, which was cited as having "over 30" media choices, as well as retaining satellite TV stations in Alexandria, Walker MN, Green Bay WI and Escanaba MI. It can own WLTE, which brings it over the 12 station FM limit, but must sell one of its FMs within 18 months.

The FCC has adopted rules to bring the agency into compliance with the Anti-Drug Abuse Act of 1988. These rules deny federal benefits to those who have been convicted of drug-related offenses. "Federal benefits" include FCC licenses.

Now, let's meet some of the other broadcasters that inhabit—or infest—your FM dial:

Because an FCC audit found KPLX 99.5 Fort Worth to have sold political advertising at higher than the lowest per-unit price, the station received no fine but an "admonishment." Similarly, KKMg 98.9 Pueblo CO not fined because of a complaint by the manager of rival KIKX-FM 102.7 Manitou Springs CO that a KKMg employee called KIKX-FM and then engaged in unauthorized editing and broadcast of the conversation, making it seem like the person called could not add 2 and 2. Profanity was also heard on the air as was a "drug deal." The FCC found that the profanity was at 2 a.m., outside the FCC "safe harbor," and it was because a mike was left on. The "drug deal" was a visit by an acquaintance during his air shift who said, "I have some Coke; do you want some Coke?" The all-perceptive FCC concluded this did not necessarily mean cocaine, the profanity on air was not intentional, and it saw a conflict of interest in one station rattin on another.

Not getting off so easy: WXBm 102.7 Milton FL had its license renewed but fined \$20,000 and required to submit annual reports through 1993 to the FCC listing all job vacancies, job titles, dates of hire, race, sex and national origin of all those hired and whether full- or part-time. It must also give details on efforts to recruit minorities for each position filled, as well as any other relevant EEO information the FCC deems necessary.

Also fetching a 20-kilodollar fine: WFAV 98.3 Cordele GA and its AM, WMJM, for an unauthorized transfer of control. Since the FCC found no misrepresentation was involved, the fate would not be as severe as meted out to WBBY 103.9 Westerville OH (see "On Air," above). In 1985, the FCC began an investigation of the Cordele stations which included al legat-

tions that Silver Star Communications, the licensee, had abused the Commission's distress sale policy by secretly agreeing to resell the stations to the Rivers [James S. and Ronald, as well as Sara Howell] and that Silver Star, in fact, transferred control of the stations without FCC authorization by permitting the Rivers to regain control.

WZZU 93.9 Burlington NC fined \$5,000 for EEO violations, and it must supply employment and recruitment data involving minorities similar to what was imposed on WXBm (above).

WKXD (formerly WRJT), which has just moved from 107.1 to 106.9, Monterey TN also fined, but for \$6,250. Hmmm—is that an odd multiple of the station frequency or X times its highest rate? Anyway, it seems when occupying 107.1 Mike Neal found a key in the "Jet 107 Missing Key Caper," and won the \$1,000 portion of his prize, but not the other portion—the lease of a car for one year. The contest was to be paid for by the Warren Motor Company to promote its business, with the dealership to spend 50% of the cost of the lease during the next 12 months. The station regarded this as a paid ad for Warren Motors, not a contest. Warren Motors was subsequently sold and the new owner refused to abide by the agreement, insisting that the station, not the prize winner, be named on the lease. "Because this would increase your potential liability, you [WRJT] refused to sign the lease resulting in Mr. Neal not being awarded the use of the car pursuant to the lease," the FCC stated. WRJT said it was the dealership's, not the station's, contest. However, the FCC found that WRJT "willfully violated Section 73.1216 of the Commission's Rules with respect to the [contest] by not awarding a portion of the announced prize. It is evident that WRJT advertised a one year lease as a prize but did not award it, even though it may have been a result of a third party's refusal [and that] WRJT failed to conduct the contest as announced."

WVIC-FM 94.9 East Lansing MI fined \$2000 because of a caper on the "Michaels in the Morning Show" during the 6-10 a.m. period and outside the FCC's "safe harbor." The FCC found a particular program, Sept. 27, 1989, indecent; and at the time it made news in the trade press for its asking callers-in to place a headline on a story where a man on a honeymoon lost his testicle down the hot tub drain. The story originally appeared in the authoritative "Weekly World News." As the drama unfolds, the man, Michael Aleman, was in the hot tub with his bride, Antonio. He turned, well, the wrong way and "one of the tub's big drains sucked in the, well you know... Vital equipment... Right, and held it fast and now what happened was they called in... an ambulance showed up [and] Mrs. Aleman already passed out... Paramedics tried but failed to retrieve Aleman's testicle from the drain but weren't able to retrieve it... This kind of a story needs a headline, it needs something to stand, I mean something like that sucks or something (gunshot sound effect)... Oh, that poor man." Now for all(!) of the responses which earned WVIC-FM its fine: "Man's honeymoon goes down the tubes"... "Future children along with it"... "More tasteless crap" [Rich Michaels: "I can't hear a thing you're saying. That's the man that calls up every week and doesn't like anything that he ever hears on the morning program here."] "Another jewel down the drain. Sounds good to me" (female caller). Male caller: "Honeymoon couple has a ball in a hot tub"... "Man ties knot, loses nut"... "Yeah, there are a couple of things that come to mind on this. Rich, like I was wondering if the paramedics actually tried to use Drano. Or maybe he should have screamed the ever so popular commercial, let go my egg-oh." [Michaels: "Oh, that's terrible, sir, terrible."] Female caller: "Drain sucks off man... A good headline, honeymoon drains testicle"... "Man falls victim to ball sucker." Male caller: "Well, how a hot tub goes nuts"... "(Unintelligible) goes nuts over new bride"... "Honey-

mooners happiness hindered as prospects go down the drain." Michaels (laughs) "Or, gonad done gone." Male caller: "Headline would be, man gets ball sucked on honeymoon."

A station's not getting fined, but if a certain radio tower is not dismantled, it could. The tower, in Manchester TN, was used by WKQD 93.3 (now WHVK) and stands 230 meters tall. It has not been used since April 30, 1990, when the station started using a structure closer to Huntsville AL. Nobody else is using the tower and the electrical company ceased supplying power to the site, which means the lights aren't lit. The Communications Act states that when a tower ceases to be used for the transmission of radio energy, the owner is required to maintain the prescribed painting and/or lighting of said tower until it is dismantled. I can recall the local seven-tower array of the former WREX 1080 AM Duluth having its lighting paid for by St. Louis County until the towers could be dismantled; the site now has a single tower on it, used by WWJC 850 AM.

Heading for hearing; license renewal in jeopardy? KJON-FM 95.5 Ogden UT filed against by Rees Broadcasting, Inc. Also involved: an informal objection to the renewal application by Ryan Frenzel, a KJON-FM listener. Frenzel claims KJON-FM announcers, during the past license term, have been verbally abusive, insulting and condescending and disrespectful to listeners who call the station on its on-air request line. However, the FCC said "Frenzel's informal objection will be denied. The Communications Act of 1934, as amended, authorizes the Commission to license broadcast stations and to regulate content to some extent. However, the First Amendment to the U.S. Constitution and §326 of the Communications Act of 1934, as amended, prohibit the Commission from censoring broadcast material or interfering with the licensee's discretion in selecting material or interfering with the licensee's discretion in selecting and broadcasting particular programming," adding a footnote saying that broadcast of obscene, indecent, or profane language may be regulated, citing Title 18 U.S.C. § 1464; FCC v. Pacifica Foundation, 438 U.S. 726 (1978); Infinity Broadcasting Corp. of Pa., 2 FCC Red 2705 (1987), recon. granted in part and denied in part, Infinity Broadcasting Corp. 3 FCC Red 930 (1987), aff'd in part and remanded in part sub nom., Action for Children's Television v FCC, 852 F.2d 1332 (D.C. Cir. 1988). FCC takes more seriously an application filed on its proper forms for usurpation of a station's frequency, concerned that Rees find a site "resolving the tower height discrepancies noted in ¶13, above." The hearing then is "to determine which of the proposals would, on a comparative basis, best serve the public interest."

Long-time pain in the butt to WFBQ 94.7 Indianapolis Attorney John Price got turned down when he again complained to the FCC about the Bob and Tom Show, when the station turned on him and attacked his credibility. He asked the FCC to revoke the station's license, but the FCC says it lacks the power to revoke station licenses. References to him as a "Yankee Doodle Hitler" and other comments comparing him to a Nazi caused Price to claim this was an attack on his character and integrity. The station did offer Price an opportunity to answer the charges, with the FCC saying: "The personal attack rule requires that an opportunity to respond on-the-air to a personal attack be offered to the attacked person or group. Although WFBQ-FM [sic] believed that no personal attack had taken place, the station made its first offer to respond three days after the program, which you apparently rejected. Because the station provided you with response time, and thereby satisfied the rule's requirement, no further action by the Commission is warranted."

KROQ-FM 106.7 Pasadena CA admonished, but not fined, for the hoax involving the call-in by a person who said he killed his girlfriend. The

caller, it later turned out, was a soon-to-be-hired announcer at the station William Grimes, on air as Doug Roberts, a friend of announcers Kevin Ryder and Gene ("Bean") Baxter. The FCC noted that Infinity Broadcasting has since suspended the announcers without pay, provided on-air apologies for the incident, required the announcers to do community service and provide full restitution to the Los Angeles Sheriff's Department for the cost of its homicide investigation. "The licensee also agreed to underwrite the cost of preparing and distributing an educational pamphlet on the broadcast of false and misleading information to radio and television stations nationwide." The FCC concluded: "It is expected that Infinity Broadcasting Corporation of Los Angeles will take such steps as are necessary to assure that such violation is not repeated. This matter is being made a part of KROQ-FM's permanent record."

Maine Public Broadcasting has laid off eight employees, part of an effort to trim \$171,000 from its operating costs. Positions eliminated include the MPBN radio station manager, Les Myers; the director of engineering; a staff engineer at the Bangor studio; MPBN state house correspondent, Al Diamon; meteorologist Brian Perry; three master-control operators in Portland's TV studio; and a secretary. Despite economic tough times, the network membership drive actually showed an increase over last year. Members provide about 25 percent of the \$5 million budget, with another 25 percent coming from federal funds. "We won't have our own weatherman, and reports from Augusta won't be so detailed, but we'll have a stringer in Augusta to be part of our news team on the radio." Myers did a weekday reading program on MPBN radio, which will be replaced by a syndicated program, most likely Dick Estell of WKAR-FM Lansing MI, "The Radio Reader."

The Minnesota Broadcasters Association revealed that Minnesota Public Radio grosses \$90 million annually. It's "a privately operated nonprofit company and its four for-profit subsidiaries now amount to a \$90,000,000 annual dollar enterprise. MPR founder and president Bill Kling mailed a copy of the article (from the Dec. issue of *Corporate Report Minnesota*) and a cover letter to every Minnesota broadcaster, accusing MBA Executive Director Jim Wychor of being 'obsessed' with MPR. In the letter Kling tells broadcasters that 'one respected broadcaster in rural Minnesota and a number of his colleagues' are embarrassed by Jim's crusade'. . . The article quotes Kling as saying the MBA will not accept MPR's membership. Wychor points out that to his knowledge MPR has never applied for membership and that the three MPR entities that have applied are members. They are KSJR Collegeville, KLSE/KZSE Rochester and the Minnesota News Network.

"The MBA membership at its 1990 business meeting passed a resolution directing Wychor and the Board to seek to limit MPR's 'unfettered growth'." Leaving the MBA membership fold as general manager of KDAL-FM 95.7 Duluth and AM to join WSCD \*92.9-WSCN \*100.5 there is John Snee. He had been at KDAL 30 years, oversaw the building of KDAL-FM in 1985, and wanted to try something new. "I became involved with Minnesota Public Radio through the MBA and got to know them," Snee said. He was responsible for instigating an anti-MPR campaign in 1990 after attending a Duluth businessman's luncheon where MPR President Bill Kling castigated Minnesota's commercial radio stations for "abdicated their responsibility to provide their communities with good news coverage," according to the MBA's *Broadcaster*. Snee replaces Daniel Schmidt at MPR, who left to join the Chicago Educational TV Association. He denied when I asked him if Shockley Communications wanted him to move to Milwaukee, where it had acquired WZTR 95.7. His plans at MPR include wanting to expand local programming on WSCN, the local monophonic news and information station.

Not likely to get the FCC's attention: WIFC 95.5 and AM Wausau WI baked cookies for its advertising clients—something that didn't cost the station much and appealed to their tastes. Pam Peterson of the sales staff came up with the idea, which was also used successfully in 1990. Sales manager Tom Chapman brought his entire staff to his home on a workday to bake cookies and listen to Christmas music. "The cookies and coupons generated more positive response than anything we had done in the past. There is simply no comparison as far as the amount of money we spent and the good will we received," Chapman said. The coupons are for four 60s or six 30s for use in January or early February.

Massachusetts accents on local FM across the country? It's not an on-air "pah-ty" or cookie bake, but could be. Boston-based City FM is putting together the best voices in the market for use exclusively in other places. Voices like WBCN's Mark Parenteau, WBOS' David O'Leary and WXXS-FM's Lady Di. It's a satellite-fed low-cost service for stations which had been taken over by banks until they could be sold. "We designed City FM to cut programming for a station from \$1 million a year to \$50,000 a year and still keep a 3 share in the ratings," John Garebedian, founder, said. "Our core audience is 25 to 34 years old and a little bit more male than female. We don't play classic rock or mushy ballads, and we do play everyone from John Mellencamp and Tom Petty to Prince and R.E.M." The first station, not identified, is in Huntsville AL, with up to 90 stations expressing interest. Local disc jockey contracts in Boston block City FM from being picked up in its home market.

Europe's Radio Data Systems announces a new receiver, the Grundig Satellit 700, billed as "the world's first portable RDS radio." Features

include, on AM, a display of service names, like what we would call "call letters" or "slogans." Alternative frequencies can be programmed into memo files that take 60 service names and 2000 frequencies; however, "in comparison to all these features, the RDS for FM reception appears to be only a modest implementation but this is a misleading first impression. There are in fact some quite sophisticated RDS test functions available.

"Unfortunately, the consumer can be confused with a similar model that looks the same but does not have the RDS on FM. That radio is called 'Satellit 500' and is almost as sophisticated. The problem with these products appears to be that you have to be a real enthusiastic radio amateur to understand how such a radio functions. However, if you already manage to use all available functions on today's video recorders, you may well be the right person to use this little technical wonder, available now for about DM 800. The Grundig people said that they now want to work on simpler, and cheaper, RDS portables."

WICB \*91.7 Ithaca NY sanitizes its programming, excluding music that is blatantly offensive to any group. "If it's offensive, we won't play it." Elaborating on the policy, WICB's Jay Frank said, "If a white supremacist asked you to display a big 'Down With Blacks' poster on your front

lawn. . . as an educated person you would politely decline. Yet when we decline to play a CD containing lyrics promoting gay-bashing, we are called censors." *College Media Journal* then asked: "If you cut out all music that offends anyone, what's left?"

On air as of Nov. 30: 4990 AM stations, nearly all of them commercial; FM commercial 4559, FM educational 1502, for an FM total of 6061, plus another 1884 FM translators and boosters. All of them to be shown in the "FM Atlas," as well as the 600 or so CP holders, which should be viable licenses during 1992. The new "FM Atlas" is still at the printers, with the 14th edition expected to be ready next month. We have selected cover colors through the 24th edition, and ISBN numbers have been assigned through the 103rd edition. Let's see, that edition should be published in 2081!

From the classifieds: The only Christian station in south AR and north LA for sale. Currently operating as a Class A, an upgrade to C2 has been granted. Contact Wayne Brevies at (501) 798-4107 (office) or (501) 862-0468 (home). My guess is this is KTJC 92.3 (moving from 92.1) Rayville LA.

SCA available on new 30 kw FM in NE IA: serves SE MN and SW WI. D. Voss, KRDI Decorah IA 52101; (319) 382-4251.

SCMO available, 67 kHz, Toronto Class B, downtown site, 267 m HAAT. John McKay, chief engineer; (416) 378-1829 and leave message.

Broadcaster with 10+ years seeking to buy AM or FM station in Richmond VA area. H. Pollard. Box 13081, Richmond VA 23225; (804) 748-2399.

Gran Prix TVP-5 5" B&W TV with FM-AM radio, AC-DC, modified with TV-SAP and FM-SCS adapter, tunable to 67.92 kHz SCS and TV-SAP and Pro Channels, \$124 incl shipping, B. Elving, FM Atlas Publishing, 241 Ancerson Road, Esko MN 55733.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Continuing with some of the concerns expressed last month by a radio engineer in IN, he'd like FMedia! readers to respond to such issues as: should DAB be satellite or terrestrial; who should get the licenses; will all channels or services be equal; how much local content; what happens to AM and FM; what frequency spectrum should be used; how many channels?

Ernie Wilson, who publishes *Electronics and Radio Hobbyist's Newsletter*, from CA had a report on a would-be controversial station, an extra-legal low power FM station that promises to be different from the public and Christian stations found in the 88-92 part of the dial. Further, it is asking the FCC for 5 watts at a height of 15 m or less and thereby make low power FM a reality. The FCC is not expected to approve the thing and there is no indication what vacant FM frequency Bill Dougan, its organizer, will seize, Phoenix AZ.

Bill Cheek, who modifies scanners like the Radio Shack Pro-2006, which also tunes FM, 88-108, has an article on FM/SCS in this month's *Monitoring Times*. His two scanner modification handbooks, Vol. I and Vol. II, are available at \$17.95 each plus \$3 shipping and handling. He also publishes a newsletter. Contact him at Commtronics Engineering, P. O. Box 262478-FM, San Diego CA 92196-2478.

Until February, which should feature more FM Forum, *John Snee*

**NAB Asks FCC for FM Freeze; Changes Gears on DAB; Nix to Hoax Rule**

The Radio Board of the National Association of Broadcasters urged a freeze on new FM stations while the FCC reviews FM allocation and licensing policies. Reasons given: current economic conditions, high number of stations and over-

saturated marketplace, and "FCC has taken similar steps to improve climate for AM." An FM freeze should begin "promptly." The board also asked the FCC to set forth standards for LMAs, stating that joint ventures/time brokerages "can enhance broadcasters' abilities to serve their communities to the benefit of the public." For now, however, the FCC has said it won't advise on the legality of LMA deals, agreeing only to "study complaints filed against LMAs." When stations are sold, LMAs do not seem to enhance a station's value—such deals "add zero value," Dick Blackburn, media broker, said.

Further changes the NAB board would like to see: Relax the radio duopoly rule to provide for AM-AM or FM-FM combo ownerships in the same market, and eliminate the current 12-station ownership rule. Limiting the number of stations one owner can have does not affect the "diversity of voices available to listeners in any market."

The board endorsed a digital audio broadcasting plan that promotes in-band DAB development to maintain radio's current level of competition, including accommodation of AM stations. Rather than endorsing the Eureka L- or S-band system, the NAB said "given the current government position on new frequency allocations for DAB, in-band solutions present the preferred option for broadcasters. The industry needs development of a high-quality in-band system to assure the industry remains competitive with emerging digital audio delivery systems," such as cable radio using digital, noise-free transmissions. Getting out of radio, for instance, is Paragon Cable, with headquarters in Houston. They are stopping FM radio delivery in all systems, going to 30 channels of CD-quality music formats. It also plans to air commercials in clusters, "just like over the air radio stations." Many radio broadcasters have not viewed cable as a "threat" to their market share or ad rates. However, "with the potential of every cable system providing their customers with 30 different audio music formats, with today's automation technology, the competition for the advertising dollar could become very fierce," warns the MN Broadcasters Association. A major form of cable distribution of music is DMX, which was launched last September. It offers 30 channels of music at a cost to the subscriber of from \$4.95 to \$14 per month, which includes a digital tuner converter and remote-control device.

Meanwhile, an NAB meeting to discuss DAB scheduled for Jan. 23-24 was cancelled due to a "lack of interest." Real reason may have been suspicion on the part of potential participants, especially among those advocating an in-band system, which has yet to be demonstrated over the air. They were afraid of giving away

trade secrets to competitors. Canada, meanwhile, is pursuing the merry road toward L-Band DAB (1500 mhz or 1.5 ghz area), claiming on-air tests showed coverage similar to FM for the same radiated powers. Systems other than Eureka have not been tested because of "lack of money," according to John Marino of the NAB, who spoke at the Minnesota Broadcasters Association Winter Conference. He also cautioned broadcasters to be aware of what is on your subcarrier, citing a major MN Class C having drug deals going over the paging channel (must have been WLTE 102.9). I asked Marino about the future of independent translators when DAB comes, wondering if they might be relegated to "gap fillers." He said they have not considered the matter, but doubted translator ownership would confer on one a DAB spot. The confab also heard much talk about RBDServices, and the pioneer work of KBEM \*88.5 Minneapolis with its jazz and frequent (every 10 minutes during drive-times) traffic reports; it plans to blend RBDSUB-carrier technology on a 57 kHz signal. The station does a good job of covering certain major highways with TV camera surveillance, but not other major roads.

The NAB told the FCC that its proposal to ban on-air hoaxes could chill broadcast speech and reduce program diversity. It cited First Amendment concerns, and said if any rule is adopted it should be narrowly drawn so as to avoid intruding on broadcasters' freedom of speech. Under the proposal, "broadcast of material which the licensee knows to be false," would preclude dramatic programs, which are fiction and "which intentionally subject large numbers of viewers to emotional discomfort could violate the proposed rule."

**FCC Kicks WCFL 104.7 Morris IL Off Air**

The FCC has pulled the plug on WCFL, SW of Chicago, for operating at "twice the legal power" and using a nondirectional antenna instead of its required d-a. Such a sudden move by the FCC is unusual and indicates how strongly the agency feels about technical indiscretions at stations. The FCC has given authority for WCFL to run 50000 h.v; 150 m, but with a d-a, to keep it from trampling the signals of WJMK 104.3 and WOJO 105.1. Station built the taller tower but mounted its old, nondirectional antenna on the top, "until it could afford to buy and install the more expensive d-a." In the interim, the FCC allowed use of the old nondirectional antenna, but only at a restricted power of 11,000 watts. Last summer, after other stations complained, an FCC inspection revealed it was running over twice the non d-a authorized power, 23,000 watts. WCFL has been cooperating with the FCC and

watts (ERP) and we are now reaching into parts of Washington DC."

**Off Air or Not Yet On**

- AK Nome KNOM-FM \*96.1 expected on this spring, mainly simulcasting KNOM AM
- CA Hayward KCRH \*89.9. "Haven't heard in years, and I check about once every other week."
- CA Los Gatos KDBQ-2 99.1
- CA Mountain View KSFH \*90.5. "Also haven't heard it in quite a while."
- CA San Jose KLEL \*89.3. "I have never heard this station."
- CA Santa Cruz KFER \*89.9
- IL Morris WCFL 104.7 (see story below)
- IA Eldora KXGA 99.5
- IA New Hampton KCZE 95.1
- IA Winterset KTDG 99.5
- KS Girard KYPG 99.1, "silent pending sale"
- KY Burnside WJDJ 93.9 o, LMA with WSEK 97.1 Somerset
- KY Louisville WZKS 103.9 still r, LMA with WDJX 99.7; while WXLN AM 1080 ends its LMA with WXLN-FM 105.7 Eminence KY
- ME Caribou WCXU 97.7 m
- ME Portland area "WOBS" 105.3, a pirate which made a brief appearance 12-25-91 playing Christmas music. This pirate seems to operate once a year, most likely by a college student.
- MN Nisswa KZPX 93.3, but may be on by "late summer." To lease space on a new 229 m tower; being bought, subject to FCC OK, by Sari DiSanto, a parttime employee of KTCF 101.7 Crosby.
- MO Sparta KLTQ 96.5 k, LMA with KHTT 98.7 Springfield and KWTO AM
- NH Conway WMWV 93.5 m
- ND Minot KIZZ 93.7 m
- OH Chillicothe WVXC-1 \*89.3
- OH Westerville WBBY 103.9 (see below "Dele-")

- NC Raleigh WKNC \*88.1 no SCS; the blind service now exclusively on WUNC \*91.5 Chapel Hill [(still †R, 67)]
- PA Philadelphia WWDB 96.5 no †Y, 92/

RBDS (see above, IN, MI) is the Americanized version of Europe's RDS system for on-radio display of call letters, slogans. "You'll love the RBDS light when it flashes your call letters on the dashboard," John Marino, manager of technical and regulatory affairs for the NAB, said at a recent MN Broadcasters' Association meeting. Other uses for RBDS include weather and traffic alertings and seeking by format—although format seeking is controversial, since broadcasters do not seem to agree on format names. RBDS may also later include ID Logic (see story below). RBDS is being promoted heavily in the U.S. by Jerry LeBow, Sage Broadcasting, who developed the flu and was unable to attend the conclave in Minnetonka MN. The NAB is surveying broadcasters by asking for input as to the formats to be included in any format searching system, and how might AM stations be included in RBDS, which to now has been FM exclusively. ID Logic does include AM.

"Back in the '70s my wife and daughter bought me a G-E Superadio with the subcarrier. I got much enjoyment out of it."

"The [SCA adapter] in my first scanner works great!. Please send me one Elf-II adapter kit for my Realistic Pro-2004 scanner."

"How do I find an SCA broker?"

**FMistakes, FM Atlas-14 (Selected)**

- MN Lakeville KZPZ to be on 105.1, not "05.1," p. 53
- OK Holdenville KXKY 106.5 listed as "KXXY," p. 188. KXXY-FM (96.1 and AM) is in Oklahoma City
- TX Belton KOOC 106.3 listed as "KYZZ" p. 188. KOOC fined \$5000 by FCC for failing to award an announced prize according to terms of a contest.
- TX Mirando City KZZQ listed both on 100.5 and 100.9; eliminate listing on p. 175.
- TX Tyler (not "T2yler") KNUE 101.5, p. 176 On p. 9, "you don't seem to know where your Station Directory by frequency starts!" [It starts on p. 145.]
- "The first thing I noticed was that the printer used considerably less reduction than last time, so much so that I thought you had redesigned the cover. Less reduction makes the maps easier to read and subjectively less crowded... I was disappointed you chose not to have the ultra-slick, high gloss finish for the cover that you used last time... The cover on the new edition is already beginning to look a bit worn after only a few days' use... The Alabama, Mississippi and Louisiana maps look good, but I'm afraid I can't say the same for Michigan and Minnesota. Michigan, especially, is hopelessly confused, and reminds me of a jumbled up puzzle!.. Likewise, Minnesota would benefit greatly from a two-page north and two-page south. And I won't say anything about Texas, since you yourself acknowledge a problem there. Quebec also needs work."

**NonIDs In Use**

**AM Happenings Most Likely Caused by FM**

AL Bay Minette (Mobile) WBCA 1110 silent, "sold last year to new owner who couldn't pull it off"  
 AL Pritchard (Mobile) WLPR 960 silent. "Will try to stay silent until station is sold or picked up in an LMA."  
 FL Jupiter WEXI 1000 "call sign deleted"  
 GA Albany WGPC AM 1450 and FM carry WALB-TV's 6 p.m. "Newscaster 10" news  
 ID Boise KUCL 730 silent pending sale  
 KS Pittsburg KSEK 1340 silent pending sale

LA New Orleans WTIX 690 "has been sold again. . . Onetime top 40 granddaddy" to play New Orleans jazz. Other AMs in the market said to be having financial difficulty—WVOG 600, WSHO 800, KKNO 750, WBOK 1230, WYAT 990; WNQE 1060, WQUE goes to news/sports, WSMB 1350 "sold for third time in 10 years"; KGLA 1540 Spanish.  
 ME Bangor WZON 620 and other AM stations lose "The Worst Talk Show in America" hosted by Paul Bicknell and Gary St. Onge, "The Ted Byrne Show," and "Doctors on Call." Baltimore-based American Radio Networks, facing severe financial problems, bought out by Independent Broadcasters Network of Clearwater FL. New owner let most of the network's talent go, and the shows' losses were not announced in advance to affiliates. "They just yanked them. It sent us scrambling to find out what else is available. . ."  
 ME Gorham WLAM 870 and East Lewiston WKZN 1470 simulcasting WMTW (8)'s 6 p.m. news, "TV commercials and all." WTME 1240 Lewiston and WKTQ 1450 South Paris simulcast WGME (TV) 13's 6:00 "Maine Evening News."  
 MA Boston WBZ 1030 fires hosts Upton Bell and Steve Martorano from their weekday shifts, expanding its news.  
 MA Fitchburg WXLU 960 "never simulcast 104.5 FM. They had a satellite nostalgia format. Doesn't matter really, since they're gone for good."  
 MI Grand Rapids WLAV 1340 "goes back to simulcasting WLAV-FM 96.9 after running 'Z-Rock' for nine months. This is the second time 'Z-Rock' was tried on AM in this market, and both times it failed miserably. Hard rock on AM just won't work—the teenage audience will NOT listen to AM for ANY reason!"  
 MN Minneapolis KTCJ 690 not AM stereo for now. "We need to do some upgrading and have not been stereo for nine months. We will be constructing new towers and going fulltime at which time we plan to resume stereo—by around June. It's a matter of money. The owners have been putting most of the money into the FM, but we do plan to go AM stereo in the future."  
 NH \*1330 still not sold—buyer who planned an AM talk net backed out, office closed.  
 NH Peterborough WRPT 1050 apparently gone for good. "I drove by their tower in broad daylight and it was silent."  
 NH Portsmouth WCLL 1380 ceases simulcasting

(919) 833-4487 has dejected-sounding voice of owner Henry E. Vale: "We're off the air because of technical problems and working to solve other problems."  
 NC Spring Lake WCIE 1450 silent  
 OH Ashtabula WAST 1600 off air, disallowed reconsideration of FCC order revoking license, which was held by Quests, Inc. One of the minority stockholders, Phillip J. Cantagallo, wanted license transferred to him, but the FCC said "Cantagallo has provided no newly-discovered facts or public interest considerations relative to the revocation of Quests' license. . . Thus, reconsideration of the revocation of Quests' license is unwarranted."  
 OH Marysville WUCO 1270 silent  
 PA Altoona WFBG 1290 now satellite rm 7 p.m. to 6 a.m. "Just 10 years ago, WFBG was an unbeatable top-40 giant with a 30% audience share; but they faltered in the late 1980s, one of the last AM CHR's to fall." [classical  
 PA Canonsburg (Pittsburgh) WWCS 540 sold/  
 PA Loretto WQM 1400 back to "total simulcast of WBXQ 94.3 Cresson PA after a brief fling with satellite rm. . . No longer 24 hours."  
 PA Mount Carmel WMIM 1590 switches to "total simulcast of WSPI 95.3 Shamokin (except for Sat. afternoon polka show). So, in a strange turn of events, the Mount Carmel AM has been paired with the Shamokin FM, while the Shamokin AM (WISL) is running the Mount Carmel FM (WXMH). Perhaps they should swap FM stations in the future!" WXMH-WISL announcers themselves seem confused as to the stations' identities, with missed IDs like: "Whistle AM and FM in Shamokin" for "many hours running. Station now answers telephone 'WISL AM and FM' so I presume acquisition of WXMH is imminent!"  
 There originally was a WISL-FM 95.3 in Shamokin, "but in 1982 WISL AM and FM were sold to different companies, and the FM became WSPI, which it still is. . . WISL AM and WXMH are both in the historic studios at Rock and Sunbury Streets in downtown Shamokin, where WISL has been since its sign-on in 1948."  
 PA Pittsburgh KDKA 1020 no longer No. 1 in ratings—for the first time, yielding the spot to WDVE 102.5 (Arbitron 12+)  
 SC Dorchester (Charleston) WVVO 910 silent  
 NF Grand Bank CKXJ 610 silent  
 NF Harbour Grace CFIQ 970 silent. "There are no plans to return CKXJ or CFIQ to the air."  
 ON St. Catharines CKTB 610 becomes hub of "Super Seniors Network," with true "oldies" music as outgrowth of one weekend show with Don and Meegan Hildebrand. Expects to be heard across Canada this year. "Stations spend all their time chasing after kids and advertising agencies are 99 percent controlled by young people who ignore the enormous seniors market."  
 PQ Quebec CKCV 1280 silent  
 PQ Sherbrooke CKTS 900 "has signed off after 45 years of broadcasting," the only English-language commercial station in Quebec outside Montreal. Telemedia had lost \$2.9 million on it since 1969, \$250,000 of that in 1991. Still on air, but merely relaying CJAD 800 AM Montreal.  
 CJRS 1510 has asked CRTC for permission to drop local programming in favor of Radiomutuel network and/or a relay of CJMS 1260 Montreal through Dec., 1992.

FM 95.3 for all sports, mostly syndicated from Sports Entertainment Network, based in Las Vegas, and CBS Sports.  
 NJ Newark WNJR 1430 has some Haitian French during the day, competing with "Radio Tropicale" on the 92 kHz of WFME \*94.7 Newark.  
 NY Brooklyn AM pirate on 1260 most nights with Haitian French. "It took four letters before the FCC finally came. I can tell you their address, too, but won't. The FCC said, after visiting them, 'we're letting it go because it's not safe'. I don't know if they use call letters, as I don't understand French." Has even carried commercials, "but advertisers don't seem to stay because the station is not on the air every night," especially after an FCC raid. Other French is on WNYE \*91.5, four hours every afternoon, but it is not Haitian, and "the two groups distrust each other." [works, studios are still there."  
 NC Fuquay-Varina WNBR 1460 off air. "Phone/NC Garner WHEV 1000 off since Christmas, and before that the sound was "really distorted," indicating need for work. Answering machine at

has just received its license to cover the changes. It hopes to be back on the air "in a few days."

### Reject Satellite CD Radio DAB Petition, NAB Tells FCC

The FCC should deny an application by Satellite CD Radio to operate a satellite digital audio service, until the FCC has a chance to regulate the service and after there has been sufficient planning, the NAB told the federal agency. In its filing, the NAB asserted larger policy questions about digital radio must first be addressed.

### Small-Print Happenings and FM Industry News

Canada's CBC got good news in the form of an extra \$46 million this year—a bonus that will allow the network to avoid major layoffs, station or studio closures and service reductions. The money won't cover the entire expected shortfall, estimated at more than \$5 million, "but the CBC expects to make up the other \$5 to \$6 million by improving productivity." It's the "best fiscal news that the CBC has received in years," with "great optimism" reported there.

Also from the pages of *Broadcast Technology* is the news that the CTV network plans this spring to start a drive-time radio news feed in 3.5-minute and 10-minute versions via satellite for use during the local 5 and 6 p.m. periods. The radio newscasts will carry advertising, as well as having avails and adjacencies for spot selling by the local stations. Cost to the station is free, except for having to carry the national ads, but at least 20 stations are needed before the network can start up; however, a CTV spokesman said 70 stations are expected to be in or on the web within 18 months.

The CRT, mulling over the best use of the vacated Toronto CKO 99.1 frequency, asked existing broadcasters interested in upgrading to a C1 to submit a letter of intent by Jan. 13, followed by a formal application, along with technical documentation, by Feb. 14.

Alpine Electronics is the latest manufacturer to include ID Logic in its car radios—in its model 1310, which was unveiled at the Las Vegas Consumer Electronics Show. With ID Logic, a listener can locate a favorite format among 24 available at the touch of a button. ID Logic contains a computer chip with a database of call letters, formats, geographic location and frequencies for over 13,000 stations, compiled by the "M Street" corporation. Alpine's receiver joins the Panasonic ID-60 and ID-90 radios which incorporate the feature. Cost of the new Alpine 1310 not announced; it should be available this summer.

WFMX 105.7 Statesville NC was mentioned by Arbitron for ratings bias for promotional announcements, which included: "Write down things about WFMX FM like you would a diary," "keep a daily diary," "every time you hear a reason write it down, keep a list, like a diary." The ratings service said the announcements "have the potential to bias survey participants or distort survey results." Also nailed for ratings bias—KBOZ-FM 93.7 Bozeman MT, after running a newspaper ad which said: "Public Notice: If someone calls you and asks what radio station you listen to, tell them the Phrase that Pays, I listen to KBOZ-FM. You could win \$93.70 in cash!" As a result, Willhight Research dumped KBOZ-FM to the bottom of each page's list in the report, along with the noncommercial stations. WLTJ 92.9 Pittsburgh went to court to fight Arbitron and had its case thrown out. WLTJ alleged that Arbitron had credited diary entries under its former call letters, WPNT, to go-formatted WPIT; "lite" entries to WWKS Beaver Falls PA and claimed for itself entries for WDJQ 92.5 Alliance OH. The judge agreed with Arbitron, pointing out that the ratings service

gave WLTJ credit for WPNT entries for a year since it changed call letters and reverted to its standard methodology after that; WLTJ was not entitled to all "lite" entries; and diary entries of 92.5 did, indeed, belong to WDJQ.

Karns-Knoxville TN WWZZ 93.1 recently dropped its music for 24 hours. In its place, it aired a campaign for listeners to support its advertisers and confront those who aren't clients, even going so far as to name names of stores like Hardees and McDonalds which don't advertise. It urged listeners who patronize such places to "tell them who you listen to." McDonalds protested after being "deluged" by WWZZ listeners, so the station relented by no longer mentioning names of non-advertisers, but it did send a "no-charge" ad invoice for the mentions it ran. A tempting thing for any station to try when management has done everything else to entice a stubborn advertiser to come on board.

NY New York WFUV \*90.7 denied a Public Telecommunications Facilities Program (PTFP) grant to cover half the cost of \$2.5 to \$3 million for new studio equipment. Reason? It carries a Catholic mass Sundays to an "audience of between 5,000 and 10,000 listeners, many of whom are shut-ins." Richard Harland, senior program officer at PTFP said: "No PTFP-funded equipment can ever be used for sectarian programming while it's in the hands of the grant recipient. It's a First Amendment issue." Since Fordham is identified as Jesuit, manager Ralph Jennings says "it strikes me as odd that Fordham, as an independently accredited, secular institution, is eligible for federal educational money, state educational money" and CPB funds, but not PTFP funding. Harland said WFUV could qualify for the funds by discontinuing the Sunday morning broadcasts—which it refuses to do—or by routing the remote signal from the church around any federally-financed equipment. Jennings claims other stations have obtained PTFP funding for equipment upgrades and still carrying religion, but Harland says he is unaware of any such cases, pointing out that at Abilene Christian College in TX, "we put in place a community advisory committee whose charter required that they report annually whether the program was properly secular [but conceded] that once it gave grants, the small agency could not actively monitor the content of programming." Other public stations are known to have religion, including WCAL \*89.3 Northfield MN, which airs a daily chapel service at 10, and a Sunday worship hour at 10:30 a.m.

Free, free at last? That's the refrain of WBEZ \*91.5 Chicago and soon WNYE \*91.5 New York—at least if WNYE finds a buyer. Since the summer of 1990, WBEZ has been cut loose from the Chicago Public Schools and free to hire its own staff and do its own fundraising, which has grown to account for the previous 20% of the budget the school board provided. Big gain is being able to hire their own people rather than go through the schools' bureaucracy. Much of the success of this attributed to Carole Nolan, general manager, who has been with the station 20 years. WBEZ has upgraded its computer to give a better tab on who donates. With the new setup, the station discovered its membership had been stagnant. Though it gained 8,000 new members last year, 7,800 others lapsed. 1991's fundraiser pulled in more than \$390,000 in pledges, exceeding the \$300,000 goal and last year's \$268,000. Meanwhile in Brooklyn, the board of education is considering ways to sell WNYE \*91.5 and WNYE-TV; the FM is considered more valuable. The board has initiated an "aggressive" effort to sell the stations, both of which are noncommercial, educational. WNYE-TV at 30 kw, in January increased to 60 kw with a new transmitter atop the Empire State Building.

The new WWIO \*89.1 Brunswick GA must raise \$90,000 by June to meet FCC construction deadlines and NTIA grant provisions. Studio and tower site would be shared with an unnamed commercial broadcaster. WWIO would be an

affiliate of Peach State Public Radio, relaying WSVH Savannah initially.

Designated for hearing by the FCC—mutually exclusive applications of KVDP \*89.1 Dry Prong LA to upgrade and a new application at Alexandria.

From a correspondent—"Our neighborhood association is filing a petition to deny the license renewals of WAER \*88.3 and WJPZ \*89.1 Syracuse—to get them to clean up their act." After several urgings, an FCC inspector visited Syracuse and agreed that there is too much intermodulation caused by the two stations interfering with the signal of WRVO \*89.9 Oswego. Supposedly a \$5,000 filter would do the job, but so far WAER has spent \$15,000 fighting the neighborhood group, which is hinting at my involvement, since I am a former manager of WAER.

KUCB \*89.3 Des Moines still fighting for its license. It's cleaned up its act, not straying off frequency, maintaining its authorized power and doing relevant programming to the community, yet its past is haunting it as the FCC is about to look at competing applications for the channel. The FCC is angered by months of inactivity at the station and the violation of technical rules, but said station manager Kalonji Saadiq: "When we got to Washington, if we're judged on the present instead of the past, we'll win."

The Senate passed by a 73-18 margin S.12, the Cable TV Consumer Protection Act, which the NAB hailed as "an overwhelming victory for consumers and broadcasters." Cable has been tough for radio for the advertising dollar, now adding audio services of its own with CD-like sound quality. If that margin prevails in the House, it could be Bush-proof when override time comes.

Three pirate radio broadcasters sentenced in Texas. They ran unlicensed FM stations "KROX" and "KFRE" in Odessa as the "Pirate Radio Network." A posse from the U.S. Border Patrol, U.S. Marshal's Service and the Odessa Police nailed the suspects, Thomas E. Barnes, Mark Anthony Chanez and Richard Lane. Barnes was given a one-year jail term, because of a 1986 conviction for running a similar station in Elgin OR, for which he was fined \$750. The other men were ordered to perform 100 hours of community service (presumably as nonbroadcasters) and placed on three-years' probation.

A sales tax on small businesses could hit radio stations when they sell—at least in MN, where such a tax has been added. On a station sale of \$650,000, the state would receive between \$22,750 and \$29,250. Other states, looking for revenue, could also add such levies.

One of the shows on WVBU \*90.5 is "Prisoner Requests," Sunday afternoons. The two-hour show serves a "captive audience" at the Federal Correctional Institute in Lewisburg PA and the state women's prison in Muncy. Two coeds are doing the show, which has a 10-year history at WVBU.

Harvard's WHRB 95.3, a commercial station run by students transforms itself between breaks went into its annual "orgy" mode, with virtual nonstop music. This year it culminated in a five-hour concert by the Grateful Dead, recorded at MIT 22 years ago. During the almost month-long orgy there were breaks for Harvard basketball and hockey games, as well as for a weekend church service. The marathon music programs are designed for students finishing term papers or studying for exams. Also in Boston news, a strange disappearance—this by Lisa "Lipps" Tedesco who made no announcement about leaving and was found four days later at a NH motel. She is a morning personality on WZOU 94.5. Her disappearance was not a station stunt, but because "I'm under a lot of stress because I have a condo I'm trying to sell," she said. "I have been having financial problems. I let things go. I didn't want to tell anybody."

LISA LIPPS

EEO fines by FCC: WOKD-FM 98.1 and AM Arcadia FL \$18,000, KRMD-FM 101.1 and AM Sheveport, WWKZ 103.5 and AM New Albany MS \$7,500.

FM Atlas first edition, 1972, very good condition, taken in trade on new 14th edition, \$2.50 list, asking \$10. Me.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Reluctant FM stations forced to go 24 hours by cable? That's experience in Cloquet MN where GM Larry Lund, who plans to have WKLK-FM on the air later this month, related that the local cable company did not want to feature WKLK as background to its public access VHF channel, unless the station broadcast 24 hours. Cable might be at least in part responsible for the proliferation of stations into 24 hour operation when the number of listeners during the wee hours of the morning is probably too few to justify the cost of electricity to power the transmitter, especially in small markets.

Bob Gilbert said that I mentioned in FMedia! about the end of the Seattle Radio Guide. "Do you know about any local radio guides that you could give me the address for?" [Sorry, I think just about every local guide is out of business, unless you think of individual program schedules put out by many public stations and a few commercial concert music stations. I have a thick folder of such guides. If anyone has ideas of what to do with the collection, let me know. An issue of FMedia! could easily be filled up with that kind of stuff--b.e.]

Tuning in Boston media is Larry Weil, who sent some clippings. "The article that says WBUR (\*90.9) is increasing news coverage with WEEI converting to sports, I can only say that WBUR is known for running the same NPR program two or three times in a day, and stretching NPR programs by repeating the same segments over again. They are the only station I know to run day old newscasts!

For WBUR to call themselves a news station is as phoney as WCDJ (96.9) calling themselves a jazz station."

John Major at KCMA 92.1 Tulsa: "You were very kind to quote so much from my talk at the CMBA meeting this year. It's kind of funny that it all began in 1976, when I read in Gary Deeb's column that the CMBA was meeting that weekend in Chicago. When I told Lee I thought I would go, she replied, 'You can't do that--you're not even a member!' I went anyway, sat in the back row, met Ray Nordstrand of WFMT and others, and it started the whole thing. Four years later I was president--and again ten years after that! Lee was an archivist at the Tribune Company while we were in Chicago, and offers a few addenda to the story on WGN on the same page of FMedia! (August, p. 7). WGN's inaugural program (with those call letters) was on March 29, 1924. Colonel McCormick (correct spelling) was not a gentleman of English background, unless having studied in England qualifies. Marion Clair, wife of Henry Weber (not Webber), was scarcely the Colonel's daughter, although he may have introduced her as such; she was his mistress. Mutual was my favorite network in the late '30s, with programs primarily from WOR (Alfred Wallenstein's Sinfonietta and Bach cantatas Sunday evenings), WGN (Saturday Evening Playhouse [?]), often featuring Henry Weber, Marion Clair and invariably the Colonel with an interminable talk during intermission." Enclosed were some reports from KCMA surveys, showing such things as 84% college graduates in its audience, 20.8% having a Ph.D., M.D. or J.D., and 50% professional/technical. Among classical devotees, 55% said they'd like to hear more classical (1750-1800), 53% more romantic (1800s), 39% late romantic (1900-1950), 35% more baroque (1600-1750), with fewer favoring medieval, modern, "very modern" and "avant garde." I'm not sure of the year, but Carol and I were in Chicago and visited the CMBA. I remember talking to Roger Elm, Jr., there from Parkway Productions; I had worked with him at WWJC Duluth, where his father is executive director. We found a babysitter at the motel in the western suburbs to watch our daughter and then drove to the hotel on the north side of the Loop where the meeting was. Major used to hear Robert J. Lurtsema 1973-74 when in Boston; "he was alternately stimulating and exasperating. Incidentally, ever since we went on the air in 1981 we have always warmed up the transmitter with 10 minutes or so of an Environments cassette--English countryside, surf, or (in midsummer) an Alpine thunderstorm. Lots of birds, too, even though Rober J. started doing it 10 years earlier. . . Sorry Radio World couldn't find room for your

story about KCMA, which I find far more interesting than John Cumata's columns on how to motivate, manage, etc. Radio World has steadily improved and certainly has more hard news on radio than Broadcasting. FMedia! continues to delight me--how you keep track of all the stations is beyond me. Your database must far surpass that of the FCC. Know anyone interested in a Class C2 in Tulsa?"

Several readers brought to my attention the PBS documentary Jan. 29 on the "Men Who Made Radio," featuring David Sarnoff, Lee deForest and Edwin H. Armstrong, based on a book by Tom Lewis, *Empire of the Air*, and produced by Civil War series producer Ken Burns. I saw the show and had to agree that from a business point of view Sarnoff was right in kicking Armstrong off the Empire State Building. One had to feel sympathetic to Armstrong, the lonely inventor wronged by the Supreme Court in his lawsuit against deForest, and it showed deForest as the arrogant self-styled "father of radio." I disagree that it was Sarnoff who persuaded the FCC to shift FM frequencies in the 1940s so as to scuttle the new medium. From what I have read, Sarnoff had nothing to do with that FM shift. Steve Bornfeld writing in the Albany newspaper said it was an interesting show for radio buffs, but thought this Burns production "doesn't pack the bitter, confrontational wallop of 'The Civil War'--sometimes comes across as a lecture, despite the melodramatic trimmings." Among the visuals, I was most impressed with the pictures of Armstrong high atop the WEA tower in downtown New York.

Doc Searls: "I just got around to reading the latest FMedia! and was impressed at how much 'air time' you gave excerpts from my letter. And good to read KPIG is back. I finally got to hear it when I was down in Santa Cruz. . . I think you should charge more for the newsletter, by the way. In the computer business, which is what I traffic in, newsletters run in the hundreds to thousands per year. My own company's yearly 'consultant and analyst newsletter' budget was \$20K for quite a while, but dropped to about 1/10 of that this past year, which was a lean one for us. . . I agree with the engineer from Indiana that there is no spokesman for the end user, but I differ with his labeling of listeners as 'customers'. The difference between listeners and customers is one of the oldest problems in broadcasting. While listeners are the consumers of broadcasting, the actual customers are advertisers. Programming for one population while being paid by another is one of the oldest problems in broadcasting. It is into the gap between these two populations that consultants have inserted themselves. . ."

TX Dallas 105.3 KRRM (KRSR), "Young Country 105.3" (and "FM-105"). The area

now has "three full-power country FMs, plus two other rimshotters. KSCS 96.3 has topped the ratings frequently in this market, but with this recent dilution of the country audience, KSCS will find it tougher to stay on top. And KPLX 99.5 does fairly well. I wish one of the two would shift their musical selections more in the direction of a 'classic country' format similar to that of KTLR 107.1A Terrell TX, and perhaps start giving regional highway condition reports aimed at the trucking audience—similar to what KWKH-FM 94.5 Shreveport LA has done. KWKH-FM has the information and personalities of a big-time clear channel AM country station, with the audio quality of stereo FM. It's the best of both worlds."

 ON Ohsweken (new) 100.3 to be nonprofit, but  
 commercial, with eight hours a week of  
 native-language material  
 BN Tijuana XHTIM 91.7 (from 103.3), but  
 temporarily on 91.5. I am second-guessing  
 they will move to 91.7, which KUSC's chief  
 engineer agrees will be a "workable solution."  
 XHTIM moved at the urging of KJOY 103.7  
 San Diego. It was to have been built 24 km  
 south of the border; but area broadcasters  
 suspect its tower is right in Tijuana. "The  
 Mexicans are trying to fill up all the border  
 frequencies." Also in Tijuana is XETRA-FM  
 on 91.1. XHTIM is an A and apparently of  
 little concern to XETRA-FM, a C, with a  
 directional signal toward Los Angeles. KUSC  
 \*91.5 Los Angeles is trying to get the FCC to  
 persuade the Mexican authorities to change  
 XHTIM's frequency because of "hundreds"  
 of audience complaints.

625 BROADWAY □ SUITE 1200  
 SAN DIEGO, CA 92101

**Stereo—or to be Stereo**

AZ Cottonwood KVRD-FM 105.7, "Country  
 105"  
 FL Miami WDNA \*88.9  
 GA Sylvania WZBX 106.5  
 GA Valdosta WWRQ 107.7, rp, "Q-107"  
 KY Madisonville WTTL-FM 106.9  
 LA New Iberia KKZN 93.7 rp, "Z-93.7," ID with  
 Lafayette, parallel to KVOL-FM 105.9  
 Opelousas-Lafayette

 MO Springfield and its AM; "Hot Country 96.5."  
 Not "off the air," as shown last month  
 NE Lincoln KFGC 105.3  
 NM Roswell KVN8 104.7  
 NY Ravena WRAV 94.5  
 OR Harbeck-Fruitdale KAJO-FM 98.3  
 PA Berwick WKAB 103.5, o, SMN Pure,  
 "B-103." A "surprisingly good signal in  
 Wilkes-Barre."  
 TN Harrogate WXJB 96.5  
 TX Amarillo KAEZ 105.7, no commercials and  
 "very weak."  
 TX Floresville KWCB \*89.7  
 VA Narrows WZFM 101.3

**Monophonic**

CA Fallbrook KBAX, e, and Ventura KAXX  
 107.1, e, both mono, as is KMAX Arcadia,  
 getting the KMAX signal via 7.5-kHz phone  
 lines. "The FCC does not care whether a  
 station actually sends out a high fidelity  
 signal—only that it is capable of it, and  
 besides it has done away with the annual  
 proof-of-performance tests for stations."  
 IN Sullivan WNDI-FM 95.3. "Has been known to  
 simulcast Terre Haute NWS for up to 10  
 minutes. Has an erratic schedule."  
 IA Des Moines KDPS \*88.1, KUCB \*89.3  
 IA West Des Moines KWDM \*88.9, remove \$  
 listing  
 PA Stroudsburg WSBG 93.5, but temporarily.  
 "The station's Optimod stereo generator was  
 stolen by thieves, who were later caught, but  
 the Optimod is being held as 'state's evidence',  
 and who knows how long it will be until they  
 get it back?"  
 TN Manchester-Nashville WWTN (not "WMTN,"  
 as shown on p. 172, FM Atlas-14) 99.7 back  
 to full mono after a brief fling with stereo for  
 use during themes and occasional 'mj' pieces  
 during their talk programming. "Apparently,  
 it limited their coverage too much, as the  
 pilot came back off. WPLN 90.3 does  
 occasionally turn off their pilot during talk  
 programming."  
 NL Sabinas Hidalgo XHSAB 89.5, "strong but  
 audio was scratchy and weak." Assume  
 temporarily monophonic.

 TX Tulia KJMX 104.9 m, "Mix 104.9"  
 VA Arlington WAVA 105.1 g, "following owner-  
 ship transfer from Emmis to Salem. The  
 turnover was preceded by an hour-long  
 tribute to WAVA's nine years as a top 40  
 outlet. With the death of WBSB (Baltimore)  
 and WAVA, there is no true top 40/CHR  
 station in either Baltimore or Washington."  
 VA Berryville WAPP 105.5 o, parallel to WBPP  
 104.9 Strasburg  
 WA Camas KMUZ 94.7 m, to team with  
 now-silent KKGR 1230 Gresham OR (Port-  
 land market). "The FM will be more straight-  
 faced. We'll do a lot of remotes on the AM  
 side for Gresham, but few on the FM  
 station." Owner Dick Schwary's "lean and  
 mean approach has extended to his negoti-  
 ations with the federal government. Broad-  
 cast lawyer time is so expensive that on  
 occasion Schwary has found it to his advantage  
 to fly to Washington DC and deal with the  
 FCC in person. . . Schwary said the key is  
 finding the right person, but the FCC staffers  
 so rarely see an actual broadcaster instead of  
 the broadcaster's lawyer, that he was well-  
 treated. 'I think I got more for my money by  
 going there in person.'"  
 WI Minocqua WMQA-FM 95.9 mr  
 "I have not yet, as of 2-20-92, received my  
 February FMedial I really miss it."

AZ Flagstaff K276CF: "Heard into the fringes of  
 Kingman, many, many miles away!" [k, \$  
 FL Summerland Key WPIK 102.9, back on with/  
 GA Fort Gordon WFGG \*88.3 "is staying where  
 it is for the moment; the licensee for WUOZ  
 88.3 Belvedere SC may be trying to sell. If  
 that 88.3 begins to operate, WFGG will shut  
 down rather than change frequency." How-  
 ever, another reporter contends that WFGG  
 will look for a new frequency, "and fast.  
 Maybe they should try 89.9—old WYFA  
 frequency, now abandoned." WFGG has  
 moved its antenna off a water tower and back  
 on top of the studio building.  
 GA Valdosta WVFS \*89.7, "V-89," still on lower  
 power, but having a fundraiser; \$35,000  
 needed for it to upgrade to 2,700 watts.  
 IL Morris WCFL 104.7, with the FCC modifying  
 its directional antenna permit  
 IN Loogootee WKMD 94.3, but "does not ID. In  
 fact, it doesn't usually have announcers.  
 Their format varies as to what's loaded in the  
 CD changer. . . No ads either. The station is  
 owned by the local printer and he only sells  
 ads during basketball season. This is southern  
 Indiana, remember! It's at low power because  
 they can't afford final tubes."  
 LA Kentwood WXL (having moved from  
 McComb MS) 94.1 is "applying for a  
 transmitter location near Clinton LA, NE of  
 Baton Rouge. BR will be saturated."

 all carry KBJR-6 Superior-Duluth's 5/6 p.m.  
 news [LMA with KXXR 106.5  
 MO Independence KIDZ 1510 silent, had/  
 NJ Oakland WVNJ 1160 "still not on air!"  
 NJ Trenton WBUD 1260 simulcasting WKXW  
 101.5 overnights, "with no mention of the AM  
 station and AM/FM ID 'buried' between com-  
 mercials at :50; cost cutting, perhaps, or is this  
 the beginning of the end?"  
 NJ Washington WSRR 1580, silent for "several  
 years, has now vacated the premises. The tower is  
 still standing, but the equipment and studios are  
 gone. Rumor is the station (i.e., tower and  
 license) is for sale, asking \$75,000."  
 PA Allentown WAEB 790, "which had been part  
 news/talk and part oldies, has cut back its music  
 in response to success of WODE-FM 99.9 Easton;  
 oldies now heard mostly on weekends; WAEB's  
 billboards now say 'NewsRadio'. So in this  
 market where three AM oldies stations had  
 managed to coexist, one FM now effectively  
 owns the format."  
 WKAP 1320 switches from rock oldies to big  
 bands/standards (Unistar "AM Only" format).  
 Like WEEEX 1230 Easton, WKAP was doomed by  
 the arrival of FM oldies on WODE-FM 99.9. . .  
 'Super KAP' was a major top 40 station in this

a station only uses call letters once per hour as required by the FCC (at or near top of hour)

 Secondary Audio Program underutilized on TV.  
 MacNeil/Lehrer Newshour has a Spanish  
 translation, available to stations with SAP  
 encoders; 38 stations use this Spanish feed.  
 The NAB, however, says most of the U. S.  
 population lies within coverage area of at  
 least one SAP station, and more than 30% of  
 U. S. homes have an SAP TV or VCR.  
 KTLA-5 Los Angeles has 20 hours a week of  
 SAP, employing its own Spanish interpreter.  
 Also on SAP-DVS, descriptive video ser-  
 vices, with 59 PBStations offering audio  
 commentary of the picture to blind people.  
 Some stations, such as in Urbana IL and  
 statewide in NE, have reading to the blind on  
 SAP, while others diversify. WNET \*13 New  
 York uses its SAP 24 hours a day, filling the  
 schedule with NOAA weather, BBC audio,  
 reading for the blind, four DVS programs a  
 week and the MacNeil/Lehrer Spanish audio-  
 cast.

"Think of me as an SCSupplier than a competitor,  
 but I guess I'm a little of each," writes Dave  
 Jackway, SCS Technology, Springfield MO.  
 Frank Karkota at Compol in NH, (800)  
 722-0755, is working on several new SCS  
 designs, including a fixed-frequency unit that  
 plugs between the car antenna and radio  
 allowing hearing a reading service station on  
 the AM car radio. He expects SCS to become  
 wide-open for the public to hear, with any  
 broadcaster desiring privacy to encrypt, and  
 he's working on an encryption system. The  
 Music 4 system, which he tested, "is a failure.  
 The equipment was too expensive, lacked  
 portability, and the sound was not that  
 great." Only in Los Angeles and Atlanta has it  
 been used, and Atlanta is believed to be the  
 only market where it is currently employed.

"The 1992 FM Atlas is great—another job well  
 done!" "The FM Atlas certainly is up-to-date.  
 Thanks again for modifying the radio and  
 please send me Catalog No. 12 when it comes  
 out."

"Jut wanted to thank you for the great radio  
 (Gran Prix) with mods. It's nice not to have to  
 listen to commercials any more!"

**Court Strikes FCC Female Preference Policy**

The FCC policy of giving "preference" to [FM] station applicants in a comparative hearing because of being owned by women has been held unconstitutional. The 2-1 decision came from the U.S. Court of Appeals in Washington DC. No decision has been made by the FCC as to an appeal. Written before being appointed to the Supreme Court, Judge Clarence Thomas said, in his opinion, the record did not support the FCC's contention that women owners were more likely to program women's or minority programming. Since "the government has failed to show that its sex-preference policy is substantially related to achieving diversity on the airwaves," Thomas wrote, "the policy violates the Constitution."

The original female preference case, *Lamprecht v. FCC*, involved award of the construction permit for WAFY 103.1 Middletown MD, now owned by Barbara Marmet. Without an appeal, it is conceivable the FCC could yank Marmet's station and award it to a competitor.

Possibly helping women own (or retain) stations is a Commission action eliminating the spousal attribution rule in broadcast ownership. The FCC said it is "recognizing the increasing number of married couples with dual careers," and wants to give marital status equal treatment as that accorded other family relationships. This means that the media interests of one spouse won't necessarily count against those of another in such things as the multiple ownership rules for FM stations. When, however, the FCC feels the media interests of spouses are subject to common influence or control, then they will be attributed to one another.

**Court Rejects FCC 24-Hour Indecency Ban**

In a second blow to the Commission, a court--this time the U.S. Supreme Court--refused to hear an appeal by the FCC of a lower court ruling against a 24-hour ban against indecency. It's back to the drawing boards for the FCC, which now has to define a "safe harbor" for indecency, which includes "dirty words" and other

language considered offensive to children. For now, the FCC will enforce its ban during the 6 a.m. to 10 p.m. period, which would include the time that Howard Stern is on the air (except for the West Coast, which could take him live outside the so-called "safe harbor" period). Absolutely forbidden is "obscenity," which has been defined by the court as words appealing to prurient interests without any redeeming artistic, literary, political or scientific value.

**FCC Radio Ownership Limits to be Drastically Lifted?**

In a move likely to raise congressional concern, a staff report by the FCC is recommending that a single company be allowed to acquire as many radio stations in a city as it wanted until it had 25 percent of the audience. Medium to small markets with fewer than eight radio stations could find one owner with as many as four of those licenses. Under current law, one owner is not allowed to have more than one FM and one AM in a market. If the programming is good and the audience shares of the combined stations one owner has rises above 25 percent, it would not have to sell any of the stations. Furthermore, the national limit would rise from 12 AM and 12 FM stations one owner could have to 200 stations.

The report was prepared by Roy J. Stewart, chief of the FCC's mass media bureau and supported by FCC Commissioner Sherrie Marshall and FCC Chairman Al Sikes. It is not certain they can persuade their fellow commissioners to go along with the proposal. It sides with what the NAB and others in the broadcast establishment see as "bigger is better." This argument holds that many stations have the best chance of remaining profitable and better able to serve the public. Rep. John Dingell, D-MI, was quoted as saying, "There is the outside chance that these things could do some good, but there is an enormous opportunity here to create mischief and a major threat to diversity."

The proposal would likely benefit large group owners of stations, including CBS, Group W-Westinghouse, Capital Cities/ABC and Roy Park Broadcasting.

**FCCautions Stations About LMAs**

Stations involved in local marketing agreements (LMA)s or other types of joint ventures should be aware of two warnings the FCC has issued. Stations that air brokered programs during substantial parts of their broadcast day and don't provide programming responsive to the needs of their communities risk losing their licenses; and joint ventures that meet all applicable FCC regulations might still be subject to challenge by other governmental authorities or private parties for violating antitrust laws. Conceivably, the Justice Department or listeners'

groups could challenge such station agreements. A recent FCC survey identified only 17 stations engaged in time brokerage, nine AM and seven FM. Of the 17, at least 12 were airing programming provided by a broker not associated with the station licensee. Of those 12, at least three aired 154 hours of non-licensee programming per week.

**Small-Print Happenings and FM Industry News**

Day sponsorship on public radio is not a forum for political beliefs—at least that's the story out of WOI-FM \*90.1, Story County, Ames IA, which writes in its program guide: "The day sponsorship program is *not* designed to be a forum for the expression of political, editorial, or controversial viewpoints, or the advocacy of such causes; or to promote or acknowledge organizations or individuals who are involved in the political process. It is also not the appropriate forum to express dissatisfaction with our programming or services; or to promote anyone's goods, services or products (day sponsors are not underwriters, so the messages should not sound like underwriting credits); or to advocate or promote particular religions, religious viewpoints, religious figures, practices or church activities." And that in the Bible Belt!

Apparently other public broadcasters are cracking down on the freedom of expression of day sponsors, since credit was given to Jayne E. Marsh at WKAR-FM \*90.5 East Lansing MI, who shared their experiences with perhaps too pushy or too pesky day sponsors or would-be day sponsors.

Now in more lavish studios is KAOS \*89.3 Olympia WA, on the top floor of the College Activities Building. "Not only is there enough room for a programmer and two or three guests to stretch legs, minds and arms, but the new on-air studio also provides a sumptuous picture-

window view of real trees, grass and skies so that one can see what one's talking about when giving weather reports." Its recent fall pledge drive fetched \$16,500, representing a 25% increase over last year and 50% over the average of the last three years.

WPFW \*89.3 Washington has been playing with something strictly out of the space age. It's called, appropriately enough, RadioSpacecasting, and WPFW's tests have been with a firm called Satellite CD Radio. The small receive antenna, about half a centimeter thick and 40 cm on a side, provided C-band reception when faced out a window. A stronger signal might result in an antenna only 5 cm on a side. To prove this was no hoax, a person placed his hand in front of the antenna, blocking the line-of-sight. A sharp drop in audio quality was heard, "making us all true believers." Satellite CD radios could be ready for the consumer market by 1995. The service, however, would not be free. It would be ordered via touchtone telephone. The CD radio will output to any standard amplifier, with power supplied by an AC wall plug, car or battery pack. The earliest generation radios are expected to sell for \$200 each, plus costs of subscribing. WPFW plans to uplink its signal to a satellite for direct spacecasting, and quite immodestly makes the statement that "WPFW will be the public radio voice on CD Satellite Radio."

After losing out on getting WHMA-FM 100.5 Anniston AL moved to a site near Atlanta GA,

owner Tom Gammon called the FCC decision "patently ludicrous." In his 24-page appeal, Gammon said the FCC "twisted and turned, misapplying the law, ignoring the facts and creating unprecedented doctrine. It is a strained and unsustainable staff decision." It charged the FCC gave loss of service far greater weight than it has ever received, and ignored Atlanta's need for more service. The FCC, on the other hand, contended that changing the city of license would not serve the public interest, since Anniston would lose service and Atlanta, a "well-served" market would gain.

The Canadian Radio-Television and Telecommunications Commission appears ready to grant more flexibility to FM stations to do their own programming. Stations in border markets, stations facing stiff competition from U. S. outlets, and those in small and/or unprofitable markets and FMs in single-station markets would benefit. The CRTC may grant the same flexibility to first service FM stations as it does to AM stations, with respect to format definitions, advertising content, and Canadian content requirements. Other FM stations may enjoy greater flexibility regarding the level of hits to nonhits and the maximum repeat factor. FM radio stations in Windsor ON have been given special status since 1985, having to air only 15 percent Canadian content as opposed to 30 percent for FMs in other markets, reports *Broadcast Technology*.

Last month it was reported that CKXJ 610 Grand Bank and CFIQ 970 Harbour Grace had shut down, apparently permanently. They were owned by NewCap, which still has five stations in Newfoundland, including CJYQ 930 AM St. John's. CJYQ and the rest "appear healthy, although CJYQ has laid off five employees," says Sandra Porteous, writing in that Canadian magazine.

Folio: Publishing News reports that ad pages in radio and television magazines were at 8,998 in 1991, down from 10,262 in 1990, or a 12 percent decline, with ad dollars down nine percent. No wonder *Broadcasting* has looked so thin lately! Watch for a shake-out in titles in that field.

It's not official, but word is out that the General Services Administration has picked a new home for the FCC. In 1993 the agency could leave its M Street address for "The Portals," a massive office development along the Tidal Basin in southwest Washington DC.

WDUQ \*90.5 Pittsburgh lost its antenna in a fire at its tower site just outside town at Mt. Washington. Instead of running 25 kw, it will be only 500 watts until the antenna can be replaced.

KUCB \*89.3 Des Moines appears to be in more hot water (see last month, p. 7, col. 3). "Not only is their license being challenged by two community organizations, members of the Des Moines Police Department are filing a petition to deny its license renewal. After an alleged incident of police brutality, several callers to a talk show urged retribution and even death to the accused officers," writes in Neil Griffin.

AM stations off the air—the National Radio Club recently ran a list running three pages of stations from official FCC files. Some of those are known to have returned, and the club was nice enough to mention my new "FM Atlas." A yearly subscription to their "DX News" (mostly an AM radio publication) is \$22 from NRC Publications, PO Box 164, Mannsville NY 13661-0164.

Stations fined by the FCC: WOKD-FM 98.3 and AM Arcadia FL \$18,000 and short-term renewal, KRMD-FM 101.1 and AM Shreveport LA \$20,000 and short-term renewal, WXNJ 94.3 Avalon NJ \$20,000, WDAR-FM 105.5 and AM \$12,000, all for EEO violations; WYBB 98.1 Folly beach SC \$3,750 for broadcasting indecent language (repeated use of "crap" and other scatological references).

Broadcast totals as of Jan. 31: AM 4984, FM commercial 4588, FM educational 1514, for an FM total (licensed and on the air) 6102. A total

of 1887 FM translators and boosters was on the air.

From the classifieds: BE FC-30 67 kHz SCS generator \$650, Wane, Woollard Labs, PO Box 1097, Castroville CA 95012; 408-663-5512.

Marti SCG 10 SCA generator tune to 92 kHz, \$400. S. Crum, WKRC, 1906 Highland Ave., Cincinnati OH 45219; (513) 763-5520.

Looking for a job? You can buy the "Professional Job Finder," at \$15.95 plus \$3.50 shipping from 7215 Oak Ave., River Forest IL 60305. It even mentions "FMedia!" as running some job ads. Let me warn you that it only lists other publications you can subscribe to having job ads—there are no jobs listed in that book, *caveat emptor*.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

[Continuing with Doc Searls' comments on advertisers as customers of broadcasts on advertising:] "Unable to listen to a whole population, stations instead listen to a single consultant who speaks for the population. It's a bad 'system', but I think we are stuck with it until we develop an alternative that gives listeners both economic clout and voices that count."

WRTI's Mark Humphrey comments on new stations in PA and the interferences they might cause. "In response to the WIXQ news item on p. 5 of the November-December, 1991 FMedia! let's not forget that WBJC \*91.5 in Baltimore was 'cheated' out of a large portion of its Lancaster County listenership when WIXQ [Millersville PA] went on the air at 91.7, and the problem worsened when WIXQ increased power several years ago. Of course, WBJC is not protected from interference outside of their 60 dBu contour, so WIXQ is not legally at fault. But then again, WIXQ is not protected beyond a six km radius from their transmitter in Millersville, so why is WJAZ at fault for interference in York County? I've driven around the WIXQ 60 dBu service area with WJAZ operating, and have not detected an interference problem. I'm not convinced that WIXQ attracts any significant audience from outside the Millersville University campus. The programming is clearly targeted toward students—they use silly slogans like 'crank it up and--off your roommate'--and the format is the typical campus-oriented 'hipper than thou' alternative rock. Not to mention that WIXQ is off the air several months each summer, several weeks each winter, and somewhat unpredictable during the academic year. Convenient for the students, but not necessarily in the public interest.

"In the 11 months that WJAZ [Summerdale-Harrisburg PA] has been on the air, I haven't heard a single interference complaint from any WIXQ listeners except for Mr. --, who seems more like a DX hobbyist than a devotee of WIXQ programming. On the other hand, when WIXQ returned to the air this fall, we had a number of irate WJAZ listeners in Lancaster County call me to complain about them. I'll get off my soapbox now. Enclosed is a check for another year of FMedia! Your

publication is still interesting and fun to read-hope you haven't lost too many subscribers in the current economic downturn."

"Enclosed is the FCC Order of Oct. 8, 1991 that clarifies the applicability of restrictions placed on FM booster stations operating within 320 km of the Mexican and Canadian borders," writes Bruce Miller Earle from San Antonio. "This is good news as it clears up the long-standing confusion over the 50 watt (ERP) limit that booster stations next to Mexico have lived with since the Nov. 9, 1972 US/Mexican FM treaty went into effect. Until the new FM treaty between Mexico and the US is ratified, this will give many present 50-watt boosters a chance to turn the 10 watt (TPO) into some much higher (ERP) numbers than they enjoy presently. [Later] there is a good chance that the limits will be raised to a full 20 percent of main channel class as long as the FM booster's 40-dBu F(50,10) contour is within the 40-dBu F(50,10) contour of the authorized facilities of the main channel." KZZQ 100.5 Mirando City TX should be on its 183-m tower by March. "To say the least, I was taken aback when I read in your Sept., 1991 FMedia! that the FCC had granted the South Laredo 106.1 class A the call sign of KZTQ as our sign is KZZQ. From our site 16 miles SE of Laredo, we blanket that town with predicted 70 dBu city grade signal with 42 kw at 163 m. Since both of our proposed stations cover much of the same area it could be the battle of the Q's unless somebody blinks. No firm plan for format yet. The final format will be chosen after the technical plant is finished and working properly. . . Keep up the good work in '92."

Ohio's Bill Fait thinks the proliferation of formats in FM is because of cable-as you read last month, some services offer 30 different music formats. Networks, too, are increasing in importance-such as MTV, BET, CMT or TNN. "I look for NBC, CBS and ABC to get out of television and back into radio. FM radio stations will have to network, like never before, to compete with cable." Reminds me of the MBA seminar I attended last month. George Marti of Cleburne TX, founder of the remote control systems used in much of the world, spoke on how his microwave units permit stations in small towns to be programmed from another small town station and to stay on the air. He has helped bring back about 50 of the nation's estimated 500 stations that are/were off the air. Marti has been in the business since 1936 and is a true pioneer, having started KCLE-FM 94.3. He said he remembered my writing and mentioning hearing KCLE-FM in Duluth (when it was a 250-watt station) in the early '50s. Getting back to Bill's letter, he

says that radio people are "angry about being forced to play a song only because it is out on a video. Local control on the radio is one of the most important issues we face in the 1990s." George Marti would agree, I am sure, but what of the station that can't afford to do its own programming? That's where technology and LMAs help. "There will always be a need for local radio, but we will continue to see many music format changes in the future. The choices we make now will decide what sort of radio programs will carry over into the next century," Fait says. He sent a news story about Amy Perkins, wife of WGAR-FM 99.5 disc jockey Dave Perkins, slain after being abducted from a downtown Cleveland parking lot. A suspect was arrested.

Henry Studebaker sent information on "Radio on Wheels," a book that gives highways and stations along with formats, and written by Paul Rocheleau; it's in eastern and western editions. I believe each sells for about the same as my FM Atlas. I saw copies in a Rand McNally bookstore, and have made a pitch for them to carry my FM Atlas. For more information contact Berkeley Publishing Group, 200 Madison Ave., New York NY 10016. Henry publishes his own Country Music Atlas and says the '92 edition should be ready soon, including a kind plug for my FM Atlas. To be notified when his new book is ready write him at PO Box 369, Port Hueneme CA 93044-0369. "I found so many changes in your Jan. FMedia! that I have delayed my '92 edition somewhat to accommodate them," he writes.

Bill Nienajadly from NJ: "I highly suspect that the 105.7 in Manahawkin NJ will rebroadcast WKXW 101.5 Trenton NJ. The FCC should seriously review their rules and look over the proliferation of all these unwanted FM stations popping up all over the place. Without a doubt, a lot of these will fold in a tight economy. Just the thought of a Manahawkin 105.7 rebroadcasting WKXW makes me really wonder. WKXW is easily heard in Manahawkin and the other shore areas. Are all of these new FM stations rebroadcasting real close FM and AM stations really in the public interest? It is a waste of valuable spectrum space and further erodes the FM band. FM will soon be called Finally Moronic."

WRR's classical format discussed in several letters to the editor, Dallas Morning News. Writers claimed the 101.1 outlet is not for whites only and not for "elitist Europeans." Thanks to Jim Cumbie for being such a good reporter from that area-for that story and other contributions. Earlier he mentioned KJZY had raised \$31,000 from the public to save its jazz format, but that was not enough and all those contributors now have to put up

with "Z-Rock" on 99.1; I wonder if any asked for and got refunds?

From New Orleans, Mike Dorner tells about stations having problems, embracing LMAs, etc. "All this, no doubt, is due in large part to the bad local economy, but compounding it are (1) the proliferation of FM stations thanks to Docket 80-90, and (2) the aging of the baby boomers. We are seeing the beginning of a tuning out that will increase with time, leaving more stations to fight over a dwindling audience. Mark it well, we have crossed a watershed in the history of radio. Add to all this the growing functional illiteracy [and] you have a populace that wants only base entertainment. Intelligent programming is not to be found on the commercial FM band any more. . . WADU-FM 94.9 Reserve LA has had its channel upgraded to C3, and expects a CP for 25 kw by spring. Still, it gets out amazingly well for a Class A."

The National Association of College Broadcasters announces on Mar. 20-22, the fourth annual Western Conference of College Broadcasters, USCS-Los Angeles; for information call 401-863-2225; on Apr. 4 the third annual Mid-Atlantic Regional Conference for College Broadcasters, Luzerne County Community College, Nanticoke PA; 717-821-0932.

Bart Cronin drove along the west coast "and noticed radio, both FM and AM, all sounds the same with a few bright spots, most of which are 88-92 on FM and several AMs. Mostly the radio was off or looking for news/weather." Helping set the mood for that letter was an article in the Shoreline Community College of Seattle student newspaper, "I Hate Radio and It Hates Me." The article talks about the increasing homogenization and declining quality of FM programming, the increasing numbers of commercials, "shallow deejays who act like cheerleaders or robots and finally the trend toward relentless self-promotion and hype-babble by the station itself." Folks who feel that way about their friendly local broadcasters should try FM-SCS, which is in a world by itself, sans hype.

Also out west-a worker fell to his death, on or near the center leg at tower of the KGON 92.3 Portland OR. He was wearing two safety harnesses; the accident is under investigation. He was Curtis M. Irwin, 22, an employee of Clackamas Communications, Inc. of Milwaukie OR.

One station probably not carrying an excessive number of commercials is WCDA 96.3 Voorheesville-Albany NY, which is looking for \$200,000 in private financing for its long-term growth.

James Nahirniak found, from the former Birch Radio Ratings for Detroit, three commercial FM stations with less than one percent of the audience: WGPR 107.5: "This badly-managed urban contem-

porary station has dropped to 0.8 against strong competition from WJLB 97.9, WMXD 92.3 and WJZZ 105.9." CKLW-FM 93.9 "registers .3, but has since tinkered with their oldies music mix, concentrating on 1970s material, and beginning a television and bus card ad campaign. . . New age won't work in Detroit-WXCD 102.7 registered 0.2-small AM religious stations do better!" [WXCD has just changed to "Z-Rock."]

"Please let me know your deadline for FMedia! each month, and I'll hopefully cram all this information into one letter per month instead of three," says Clarke Ingram. [There is no deadline; I do not like to be inundated just before sending this to the printer. Doing this newsletter is overwhelming, and it is a struggle to get it out each month, with the press of business in modifying radios and producing FM subcarrier kits taking much more time than before-even with an employee.] Clarke kindly sent a tape of the radio broadcast of "Empire of the Air," heard on WNYC-FM \*93.9 New York, and originating at WETA-FM \*90.9 Washington DC. "The book itself is a must-read, especially (I'd think) for you, having been such an ardent supporter of Edwin H. Armstrong and his work."

Oldsmobile writes that they no longer have a need for an FM stereo station directory such as I supplied them for several years. Delco did, however, order several copies of the new "FM Atlas" for their technical staff and library use.

FM radio in Upper Michigan does not appear to be a bright spot, with too many stations, including several unbuilt CPs, according to an Associated Press article. "I know not all the radio stations in the area are going to survive," said Alice Sabuco, general manager, WYKX 104.7 Escanaba. "It's a madhouse out there. The sales dollars only stretch so far." Jack LaForest, general manager WFXD 103.3 Marquette agreed, saying, "At some point there's going to be a shift. The market won't bear forever what it has now. The shift is coming. The only question is when and who gets hurt." It's a fight for radio advertising dollars in a stagnant economy. WAAH 102.3 Houghton MI has filed for bankruptcy, but at last report was still on the air.

David Bush sent a "Dear Abby" letter mentioning how travelers don't know where a radio station is when it only gives its call letters and weather but not mentioning the city of license. Both he and I wrote Abby mentioning the "FM Atlas" as a reference to help find the station for the traveler. He takes my book when he travels, but finds "there is only so much time to hear a station (especially if it's a Class A). I listen until some of them fade out and by then I still get only a slogan, nothing or a muffled ID," and

The People Win vs. WEVO in NH

he'd like me to tell all the stations to be sure to ID more than the once an hour as the FCC requires.

People of NH can rejoice--their public radio station is not dropping its folk and jazz, only shifting those shows to the weekend. It's the result of a public outcry against WEVO \*89.1 Concord that got the station to relent, with the local paper saying, "Audience talked, loudly, and WEVO listened." Several letters to the editor were published, there were public

meetings and editorials written. The Public Radio Interest Group was quickly formed, and it got action. Besides the program restorations, the station agreed to include WEVO listeners and the community advisory board in on any future programming changes.

A reader sent literature on Digital Music Express, being tried on cable in San Antonio, as one of the first markets to test that CD-quality system, which hooks up to a stereo amplifier in the listener's home. "My friend who works at the cable company gave me copies of this material. I went to his house last weekend and spent about three hours listening to this music service, and it is outstanding. Only employees have the service now, and cable subscribers will start getting home installations after March 15. My installation will be probably April 10 or so. As much as I hate to say it, this service is probably the beginning of the end of broadcast FM penetration into homes having cable. If you should want to mention this system in your newsletter, be a bit vague about what publications and papers I sent you, and if you want to mention me, just refer to 'charter subscriber David X.' The Superadio [modified with FM-SCS] arrived and is working fine. Locally, all we have on 67 and 92 is the usual telemetry squawks and one station with 'Radair' slow-scan TV weather for aircraft. I will let you know as soon as (and if) any type of talking book shows up on SCS."

Dietmar Kopitz, chief engineer of the European Broadcasting Union, updates me on RDS: "You may be aware of the fact that the Radio Data System RDS is now in the process of being adopted also as an American standard. The specification is drawn up by the National Radio Systems Committee of the EIA and NAB. The standardisation process is expected to be completed in April, 1992. I shall myself present RDS, as implemented now in Europe, during the forthcoming NAB

convention at Las Vegas on 15 April 1992. For more details about RDS standardisation work in the US, you might like to contact John Marino of NAB and perhaps Terry Beale of Delco and Jerry LeBow of Sage Broadcasting."

FM AS IT WAS—OR MIGHT HAVE BEEN

Introducing the Motorola auto radio model FM-900 with seven tubes and a transistor audio output, designed for underdash mounting in most cars, from April, 1960. It has a receptacle for rear speaker connections and a switch to permit operation with an AM radio, using the same speakers. "The service area for FM stations is approximately 25-50 miles. The short wavelengths of FM are reflected by surrounding objects, such as between buildings and they are bounced into the entrances of tunnels and underpasses. As a result, a strong FM signal can be picked up in many places in the city where AM signals are weak." Byron E. Blanchard used

that model in several cars "until the mid-'80s, but then the cars got too small. The only radio that I have had with better weak signal performance is a Fujitsu-Ten that came with a Toyota. Specifically, a Pioneer Supertuner II radio in the early '80s wasn't as good as the old Motorola FM-900. Alas, the radio was thrown away several years ago." It reminds me of a Blaupunkt "Frankfurt" FM-AM car radio I bought in 1960 for a new 1960 Studebaker Lark; that radio was installed in two other cars and later sold. It, too, had tubes and transistors, but was a complete FM-AM monophonic car radio—and a good performer.

Michael Collins says: "You may remember about 20 years ago I sent along histories of WHCN/WLVH/WDRG-FM Hartford. I thought you might find this from the 1948 Hartford Times to be of interest. WTHT-FM 106.1 went off the air in 1950; WTHT 1230 went off in 1954. WKNB-FM 103.7 went off around 1950." I had summarized the special Mar. 29, 1948 issue of the "Hartford Times" in another publication, but will use a few tidbits here. Besides articles on the stations, stars of the time (Bing Crosby, Groucho Marx, Jimmie Fidler, Ted Malone), were many ads for FM radios. All the radios were console or table models. Table model radios—remember these were 1948 dollars—varied from \$49.95 for an Emerson to an RCA Victor at \$95.00, or \$2.00 weekly from Kay Jewelers, 985 Main Street. How about a Fada table radio with FM for \$34.95?

**On Air (Selected)**

CA Paradise KCHH 103.5, having moved from 92.7. "Major improvement in coverage, though not in format."  
 MI Gulliver WCMM 94.7  
 MN St. Peter-Mankato KNGA \*91.5, mono talk, no SCS. "Another waste of spectrum space in Minnesota."  
 MO Columbia KARO 101.5, having moved from 101.7. Now a C2, with C1 pending.  
 MO Springfield KWFC \*89.1 now 100000 h.v; 112 m  
 NJ Manahawkin WJRZ 100.1 with 1600 h.v; 137 m, but claiming "3000 watts"  
 NY Mayville W211AE \*90.1. "Nice signal along NY 17."  
 NY Middletown WOSR \*91.7, a WAMC Albany relay, was to have been on as of now. WJFF \*90.5 Jeffersonville "tried to block the startup of WOSR because of concerns that it would have an unfair competitive advantage and hurt WJFF. However, the FCC found that there would be little overlap in the stations' listener areas."  
 OR Medford KOPE 103.5, "with nt as advertised"  
 PA Denver-Richland W214AL \*90.7, serving the Ephrata-Lebanon area  
 PA Erie W252AB 98.3, W285A1 104.9  
 PA Mountaintop WYRM 97.1, "Warm," simul-casting WARM AM Scranton with talk, pseudo-stereo with stereo light on. Some

music; checking to see if the music is actually in stereo.  
 PA Philadelphia WPEB \*88.1 apparently has had a power increase and gets out much better, but "can't seem to contact anyone who knows any details."  
 PA Sellersville WBYO \*88.9 on air, mono, r, parallel to WRDV \*89.3. "The old translator is gone as a result."  
 PA Susquehanna WKGB 92.5, still "KGB-FM," and ID with Binghamton NY where its studios are

**Off Air or Not Yet On**

CA Rohnerville (to move to Fortuna 100.3) KOEX 100.5, due on "soon," and plans to serve Fortuna "as opposed to Eureka, the nearby 'city'."  
 IN Kokomo WIWC \*91.7, but had a booth at the local Home Show. "Various churches have been contacted for donations. I'd expect this to be a selective campaign."  
 IN Roanoke WQTX 94.1 (moving from 105.1)  
 MS Ellisville WJKX 102.5  
 NJ Manahawkin 105.7 local newspaper says it is WJRZ which will move from 100.1 to 105.7, while a reader contends that WKXW 101.5 Trenton will be relayed. "I totally disagree. . . I can't imagine where he could have gotten that information from!" However, the losing applicant is appealing the FCC grant, so it is possible 105.7 will go either way.  
 NJ Ocean Acres WQNJ 98.5; although never operated, it has a local address, 53 Nautilus Dr. ZIP 08050 and telephone: (609) 597-6700.  
 NY Avon WYNQ 93.3  
 NY Jamestown WCOT \*90.9  
 OR Tri-City KTRQ 104.3, had been mono before apparently dying  
 PA Erie WYZB 94.7  
 PA Girard WGAE \*88.3  
 PA Mount Carmel WXMH 99.7 still off, with WISL 1480 Shamokin taking over its former studio, and said to be negotiating to buy another FM, "which from the description is probably WSP1 95.3 Shamokin, the original WISL-FM! If true, this AM/FM combo will have come full circle. WISL has probably suffered the worst possible outcome of an LMA, moving its oldies format from the poor-signal AM to the FM, only to watch the FM LMA fall apart. Only the most faithful listeners are likely to have returned to WISL on the AM band. Such is the inherent danger of LMAs over ownership."  
 PA Ridgebury WMKB 96.9  
 TX El Paso KESB-FM 93.9 and AM, in receivership, "silent pending sale"  
 WV Pocatalico WTUN 98.7  
 WV Spencer WVRC-FM 104.7

**FCC Relaxes Radio Ownership Rules**

Acting with lightning rapidity, and with virtually no public notice—unlike when it does an FM station rulemaking—the FCC showed it could make drastic changes in the ownership makeup of FM (and AM) radio. The recent action is similar to what was reported last month: One owner could have up to three AM and three FMs in markets having over 40 stations, provided the total does not initially exceed 25 percent of the audience. In smaller markets the breakdown goes as follows:

- 30-39 stations: 3 AM, 2 FM, not to exceed 25 percent of the audience share.
- 15-29 stations: 2 AM, 2 FM, not exceeding 25 percent of the audience share.
- In markets with fewer than 15 stations, one owner could have up to three stations (two FM), if they do not constitute half or more of all local stations. FM-AM combinations will be permitted in any event.

A change from last month's report (p. 5) is that the national ownership limit goes to 30 AM and 30 FM stations (up from the present 12 of each), instead of 200 as speculated earlier. The FCC imposed further restrictions on LMAs, saying stations doing time brokerages "will be considered to have an attributable ownership interest" in the brokered station and will have to be counted for multiple ownership purposes. Giving the listeners a slight break is a rule forbidding same service (AM-AM, FM-FM) simulcasting of more than 25 percent of either station's programming if there is 50 percent or

more overlap of the stations' service areas.

Licenses involved with time brokerage agreements will have to keep copies of those agreements in their public files, and will have to include copies of the agreements when they file ownership reports with the Commission. The rules are set to go into effect Aug. 1, allowing time for publication of the complete text and for possible reconsideration.

The National Association of Broadcasters was generally elated with the new ownership rules. Richard Novik, radio board chairman and president of WRNQ 92.1 and AM Poughkeepsie NY, told the Senate Communications Subcommittee "joint ventures are useful tools that can allow struggling stations to stay on the air, while preserving diversity of programming within local markets." The NAB does, however, "share congressional concerns about maintaining diversity and preventing major media concentration."

It may not be clear sailing for the FCC and NAB, however. Congress may apply pressure to force the FCC to amend the rules so that prospective women and minorities could more easily get into station ownership. And it is thought that the new rules might "wreak havoc" with station owners trying to lease their signal to other operators. Dean Johnson, writing in the Boston Herald, said "This would almost certainly kill daytime-only WILD's impending deal to lease WMEX's 24-hour signal, because WMEX owners, Greater Media, may be unwilling to sell their AM signal until the smoke clears."

And Eddie Fritts of the NAB acknowledged that the new rules would likely be modified because of a "sense of outrage" among members of Congress about the FCC's procedure used in arriving at the ruling. Fritts said Congress is probably more willing to go along with national ownership of 25 AMs and 25 FMs, with 30 in each service for minority investors. Because ultimate ownership caps may be lower than what the FCC proposed, Fritts advised broadcasters to put off any business plan based on the new rules.

Also speaking to the subject was FCC chairman Al Sikes, who said the FCC based its decision on studies which showed, among other things, that radio's position in the marketplace has changed with the growth in cable and broadcast TV, newspapers and magazines. Radio accounts for only 11 percent of mass media advertising, and even if every group owner acquired the maximum number of stations allowed, there would still be 166 radio owners nationwide. Other "worst case" situations: in 96.2 percent of the markets there would be at least four separate radio owners; in 84.2 percent, at least five; in 65.8 percent, there would be at least six; in 26.2 percent of the markets there would be at least nine separate owners.

### NAB Urges Action on FM Station Freeze

Calling it euphemistically a proposal on FM station allocation and licensing, the NAB has persuaded the FCC to put its idea for a national FM station freeze on public notice, giving broadcasters and others the chance to file comments. The NAB proposal, embodied in FCC "RM-7933," suggested that, "in light of the vast number of radio stations and the high levels of program diversity, the FCC drive for more stations should end and that greater reliance should be placed on improving service from existing stations [and] emphasized how FM station congestion has created increased levels of interference and has impaired FM technical quality."

The NAB asked the FCC to delete licenses and allotments of silent stations (fostering the upgrade of co-channel and adjacent channel stations) and make a more realistic assessment of radio service levels before adding new stations. The FCC was also urged to require new station applicants/petitioners to demonstrate that the market to be served can support another station.

Another FCC rule-making proposal, "RM-7932," embodies the NAB's original request for an FM freeze during which time the FCC could reassess its overall FM policies. That rule would keep out outsiders, but the NAB "asked that no suspension apply to efforts of existing broadcasters to expand or otherwise change their technical facilities."

Those who want to comment on either or both of the rulemaking proposals can send an original and five copies to the FCC. If you want each commissioner to have a personal copy, send a total of 11 copies (one of which is an original), or you can informally comment by sending a letter. The "RM" numbers must appear on the first comment page to Secretary, FCC, 1919 M Street, N.W., Washington DC 20554. No deadline was mentioned, so comments should be sent as soon as possible.

### Small-Print Happenings and FM Industry News

The FCC has started a re-examination of its criteria for broadcast hearings—a policy that has been in effect since 1965. The Commission is considering whether to retain, eliminate or modify four of the criteria: integration of ownership with operation, proposed program service, past broadcast record and auxiliary power. And it is considering the adding of two new factors: a service continuity preference and a finder's preference. Under the service continuity preference, credit would be awarded those who could commit to ownership of a station for at least three years, and a finder's preference would be awarded applicants who successfully request new broadcasting allotments through rulemaking. The FCC is considering a point system to try to more objectively weigh the various factors when it comes to a hearing. FCC Commissioner Ervin Duggan supported his colleagues on most of these items, but expressed concern about the possible elimination of the program service criterion, saying: "I believe that the public interest is served by encouraging applicants to embrace an explicit commitment to news, public affairs, minority and foreign language programming, and other types of public service program-

A House committee is reportedly investigating the FCC's refusal to move from its M Street location to new quarters in southwest Washington. While FCC officials said the new building would not be large enough and take too long to build, an attorney for the new site's developers speculated that "apparently FCC Chairman [Al Sikes] doesn't want to move beyond walking distance of Duke Zeibert's" restaurant. Rebutted the FCC through managing director Andy Fishel: "The decision was not frivolous, but based on such requirements as a guaranteed occupancy date in order to set up computers [and] the FCC's decision not to move will save at least \$1 million a year."

Stations fined: WNMB 105.5 and its AM North Myrtle Beach SC \$10,000 and short term license renewal for EEO violations; and KRYS-FM 99.1 and AM Corpus Christi TX \$6,250 for "willfully and repeatedly violating the anti-lottery broadcast provisions of the United States Code and the Commission's rules."

The FCC granted the license of KEZV 101.1 Spearfish SD to Duhamel Broadcasting Enterprises, owners of KOTA-AM-TV Rapid City. It did so as a waiver of the one-to-a-market rule under the Commission's "case-by-case" standard. In support of its waiver request, Duhamel contended that its proposal would yield increased public service benefits including economies of scale, cost savings, along with programming and service benefits. Duhamel pointed to the financial distress of both KEZV and KOTA (AM) and noted that the market is well served by other broadcast media—and the FCC agreed. FCC Commissioner Andrew C. Barrett issued a dissenting statement, however. He expressed concern over the loss of diversity in that market, saying the market is too small to be considered under its "top 25 television/30 broadcast voices test, or our failed broadcast station test." He also questioned whether or not the operating efficiencies gained by allowing a merger should outweigh the other factors, and pointed out that the facilities owned or to be acquired by Duhamel are "all substantial in terms of power, coverage and size," including 100-kw KOTA-TV, channel 3. KOTA-TV is on nine cable systems, and relied on KSGW, channel 12, Sheridan WY and KHSD, channel 11, Lead-Deadwood SD. KHSD "has no employees and is serviced entirely from Rapid City." Both KSGW and KHSD have maximum power for their channels and are carried on area cable systems. By taking over maximum-power KEZV, Duhamel would also acquire an FM translator in a different market (presumably K276DH 103.1 Pierre). Duhamel would take over too big a piece of the pie, considering most of the other media voices mentioned in its petition are noncommercial, educational, Barrett charged. "There are not a sufficient number of separately owned broadcast voices remaining in the Rapid City market for me to feel that diversity is not impacted significantly." And in view of the recent FCC decision to allow radio ownership up to 60 stations on the national level, "I question whether further regional concentrations of control will not evolve as the result of these one-to-a-market waivers and the new radio rules adopted by the majority."

The World Administrative Radio Conference (WARC) allocated space for digital audio broadcasting service worldwide in the 1500 mhz L band for satellite and terrestrial use, but granted the United States an exception—for space in the 2300 mhz S band. Scorned the NAB: "Allocating space in the 1500 mhz band for terrestrial and satellite DAB paves the way for a worldwide DAB satellite service. We see the decision as a threat to our system of local over-the-air terrestrial broadcasting." Pressures are expected to be put on the U.S. government to assign DAB to the worldwide 1500 mhz band by moving military telemetry out of the 1500 mhz band. The WARC wants to hold a conference by 1998 to set technical parameters for the regulation of DAB in the 1500 mhz band.

The NAB wants the FCC's public file requirements at stations to be updated to eliminate references to the former three-year broadcast license terms, an obsolete political broadcast primer, and mentions of the discredited Fairness Doctrine. The wording is contained in a book stations are required to have available for public inspection, *The Public and Broadcasting—A Procedure Manual*. Some stations have reported recently of being fined by the FCC for not having this book available to the public, "even though inspection of such a document would result in misleading, rather than informing, the public," the NAB said.

KGTS \*91.3 College Place WA will soon be available by satellite for direct home reception or for downlinking to other stations. "The availability of such a signal will encourage local churches and institutions to foster Adventist radio stations in their communities," Ed Schwisow, spokesman for the North Pacific Union of the Seventh-day Adventist Church, said. Broadcasting via satellite, while costly, would be cheaper than the average program costs for one fully-manned radio station in North America. The cost of the KGTS uplink is estimated at \$58,000 and annual transmission costs are estimated to be \$35,000.

It's not getting there via satellite, but it's direct and over the air loud and clear—too loud and clear. Unwanted listeners to the rock folks of WHEB 100.3 Portsmouth NH are local folks irritated by the station coming in on their telephone answering machines and over church loudspeakers. A public hearing with WHEB representatives and those from the NH Public Utilities Council was to have been held to help resolve the problem. I wonder if anyone was getting rock music through their bridges or braces?

WAMC \*90.3 Albany and its network of repeaters garnered \$200,000 in pledges in March, up from \$150,000 a year ago. It is one of three fundraisers the station holds annually. Strange. The National Religious Broadcasters magazine urged stations to hold only one annual fundraiser—and that should not last over three days. I have argued with people in public radio on many occasions to hold down the begging, and to expect the kind of response Christian stations get, but have only received flippant answers such as "God is on their side." The religious paper said when people know there will be only three days of fundraising, people are more likely to respond. Perhaps it will take a migration of people from Christian to public radio so that public broadcasters will get enough faith in their own product and the listeners' proclivity to respond to a limited-time fundraiser that those of us who enjoy and support public broadcasting can expect such events to become more humane and listener-friendly.

A new commercial FM station in England slated to have a 28-day trial starting April 13. XFM 101.2 mhz in North London, sponsored by the rock publication NME, will carry 70 percent music and 30 percent speech during its 24-hour broadcast day. No power mentioned for this alternative rock station, owned by Chris Parry, head of Fiction Records in England, but it will probably be comparatively low.

The new WBSI 103.1 Bay Shore NY is owned by six women, who paid \$1 million to buy out five other applicants for the channel, and expect to spend another million to put it on the air; WBLI 106.1 in nearby Patchogue was expected to oppose the WBSI call letter request. No format has been announced for the yet-unbuilt station.

Arthur Liu, of Sino Radio Broadcasts of NY (and on an SCS in San Francisco), has showed up on main channel FM. He's president of Multicultural Broadcasting, Inc., whose bid to take over WNWK 105.9 Newark was approved by the FCC. His plan involves paying \$5.1 million to five competing applicants, and he is out to "prove to the bank that the station is viable." WNWK will continue its multicultural programming, not

being just Chinese as Liu might personally want. It was Liu who threatened to sue me in 1978 when I sent him a flyer mentioning SCS decoders. We've on more friendly terms now, and he's been an FMedia! reader. In 1978, he was on the 67 kHz of WRVR 106.7 (now WLTW New York).

Possibly bolstering FM's ratings in NY would be a plan by which WYNY 103.5 would carry the Giants' games, along with WNEW AM. Sports are profitable for WNEW, accounting for about half the station's \$7 million annual revenue, which is a remarkable sum, considering that the regular season runs only 16 games. "People are buying the New York market already when they advertise on the games on 'NEW,'" said Don Nelson, WNEW general manager. "You add 'NY, you get more bang for the buck.'" Apparently Westwood One has the rights to place the Giants on FM, but is seeking the team's consent just in case. A decision on the simulcast is expected well before football season.

FCC admonishes Detroit school board for errant ways of WDTR \*90.9. Since 1989, station's license renewal has been held up for an investigation of payola, sponsorship identification violations and unwarranted restrictions on access to the station's public records files. WDTR failed to disclose that professional staff and volunteers personally benefitted from promotional announcements and programs during 1988 to 1990, and in order to use the public records file you had to supply a driver's license or other ID, three station people must be present, and you could only look at the file for 15 minutes at a time. Allegations arose during tenure of Mary Wilkes, who was the general manager during the late 1980s. She left in 1990 on extended medical leave, but later was rehired by the schools as an assistant area superintendent. The FCC complaint said WDTR hosts, including Wilkes, repeatedly praised gospel singer Ortheia Barnes, promoted her local performances and encouraged listeners to buy her recordings. On other programs hosts or guests promoted "uterine healing" audio cassettes, a holistic center offering health treatment based on eye color and skin care products retailed through a pyramid marketing scheme. The FCC found the announcements clearly "promotional" and a violation of federal law and FCC regulations. Detroit resident Christopher Trey blew the whistle on WDTR. He says management no longer unreasonably restricts the information available in public inspections, but is pushing for more student involvement in the station's operation. Indeed, an advisory panel in 1990 recommended WDTR streamline its programming and encourage more student involvement. Caryn Mathes, present general manager, said the station's format "now is more issue-oriented and includes programs that involve and interest students."

The chairman of WXEL-FM \*90.7 and TV West Palm Beach FL, Lewis "Dusty" Sang, is out as the result of cataclysmic changes stemming from his "autocratic ways and penchant for being a high spender." Stations face an estimated \$174,000 shortfall, but after the Sang shakeout, morale seems to have improved. A January FM pledge drive lasting 2½ weeks netted just \$16,000, but a fundraiser after Sang's resignation netted \$64,000 in just five days. While not accused of violating any laws, Sang was charged with operating the public franchise "as if it were his own, while at the same time raising money from the public pocket and tax dollars," according to a document written by the staff attorney. Getting into the act was the *Palm Beach Post* saying in a headline, "Sang should go for hiring his crony." The "crony" was John Dover, a banker and former board member, who Sang put in as executive vice president—at \$85,000 per year. Staffers contended hiring Dover without advertising risked FCC sanctions for EEO violations, while Sang said there was no violation. A petition signed by 55 of 64 staff members asked for Sang's (and Dover's) resignations. An emotional, eight hour hearing was

## WXEL Underlings Topple Bosses

held in a crowded WXEL studio. "You couldn't have scripted a better trial movie," said Laura Lee Mall, director of TV programming and production. The hearing, well attended by local TV news persons, snagged Sang's resignation. Station people then turned on Dover. After a confrontation in the studio with several station volunteers, Dover agreed to quit. Although pledge results are on the upswing, relations between the remaining board members and management are "not guaranteed to be cheerful."

Digital Cable Radio sent a report noting that it's available in over 40 markets with three million potential listeners. At 20,000 subscribers, it remains "the highest [penetration] in the cable audio industry." Now if the NAB succeeds in getting an FM station freeze, it won't stop new competition, if DCR and similar cable services continue to grow.

Serving up jazz via satellite and cable audio is KLONG \*88.1 Long Beach CA—a station contending to be more involved in cable audio than any other in the U.S., notwithstanding WPFW Washington's claims (last month, p. 6, col. 1). One payoff is that eight percent of pledges in its last fund drive were from cable listeners outside of CA. Some 750 members outside the state pledged, including some as far away as Jamaica and AK. It is relayed by Digital Planet based in Carson CA; and this spring is being relayed in Europe by EuroJazz. A Dutch company is the first local European distributor of KLONG's programming, complete with Dutch language announcements.

Station totals from the FCC as of Feb. 29: AM radio on air and licensed 4984, FM 92-108 mhz 4605, FM 88-92 mhz 1518, for an FM total of 6123.

From the classifieds: Want to buy AM/FM station in SE in trouble or off the air. K. Thompson, WWIC, 815 W. Willow St., Scottsboro AL 53768.

Indian educational FM station needs equipment to train future broadcasters. R. Tohe, KGHR, PO Box 160, Tuba City AZ 86045; (602) 283-6271.

Wanted G-E Superadios, new or used in good condition. A national shortage of this model exists until it is replaced by a newer model in August. Contact me.

## FM As It Was—OR MIGHT HAVE BEEN

[Continuing from last month] There was an ad in the special FM radio edition of the "Hartford Times," Mar. 29, 1948 for a Fada table radio with FM for \$34.95 from Case-Warner Co., 212 Asylum St. I am sure many of those tube radios with FM are still fine performers if you can find them. Two old FM-AM tube table model radios are at this estate—both listed in my radios and electronics catalogs and for sale—a 1949 or 1950 Zenith and a 1946 or 1947 Westinghouse.

WKNB-FM has a fulltime program director for FM. Betcha it wasn't a country or rock station! Both WKNB-FM 103.7 and AM will have the Braves-Red Sox in 1948. Another ad proclaimed, "Ban Lifted on FM, favorite network programs now available on this better radio system. Now enjoy the best of FM with a Stromberg-Carlson—there is nothing finer!" Consoles were \$325-\$495 and a table model \$83.95 ivory; \$79.95 brown. Admiral was also touting FM; about a year later they ceased offering FM in consoles which included TV-AM. WTIC-FM 96.5 and 45.3 mc. advertised its NBC programs. Pictured is the Magnavox Berkeley, featuring two 12-inch speakers "and is complete with FM in an 18th Century mahogany cabinet." My aunt and uncle had that model, and I remember that the sound was very good, as was the FM

## Magnavox Offers Varied Designs

THE MODEL illustrated above is the new Magnavox Berkeley which features two large 12-inch speakers and is complete with FM in an 18th Century mahogany cabinet.

reception.

A special issue devoted to frequency modulation was Radio-Craft magazine, 1948. It quoted a 1928 "Proceedings of the Institute of Radio Engineers," which stated a consensus that "static, like the poor, will always be with us." Armstrong persisted and, as well all know, developed the FM system of broadcasting which did away with the static problem. The 1948 magazine said: "The problem of static, both natural and man-made, has ceased to be a problem. FM reduces [part of page missing] to 1/100th of its energy on an AM signal on the same frequency, and since the system operates in the very [missing page area] frequency ranges, still further immunity from atmospheric static is obtained."

In another part of that magazine, it was mentioned that "reliable FM ranges may extend far beyond the horizon, K. A. Norton of the Bureau of Standards reported. Experimental research undertaken by the Bureau has shown that atmospheric 'ducts' and boundary layers in the lower troposphere both reduce the attenuation of high-frequency radio waves with distance at points beyond the line of sight. These results are expected to provide a firmer basis for the prediction of the service ranges of FM broadcasting stations; they should also aid in the solution of problems that may occur in connection with other users of the spectrum above 30 megacycles. . . This general behavior [of signals] has been observed for the fields of FM broadcast station WCOD [98.1] Richmond VA, as received at the National Bureau of Standards in Washington DC. On Aug. 4, 1947, for example, the station began broadcasting about 6:25 in the morning. Throughout the day the fields gradually increased until a little after midnight. At this time the received field increased markedly, and the fading, which had occurred at a fairly rapid rate during the day, decreased both in amplitude and frequency of occurrence. The calculated field intensity corresponding to propagation in a vacuum over a flat earth was exceeded for the half hour just prior to 1 a.m., when the station went off the air. Presumably this favorable propagation condition lasted throughout the night since the fields were again very strong on the following morning when the station began broadcasting at 6:25 a.m. The mechanism responsible for the strength of these

fields and for the comparative absence of fading is considered to be atmospheric refraction.

"From analysis of the field-intensity data obtained by the Bureau, it appears that external receiving antennas may be used with considerable advantage for reception of FM broadcasts at points far beyond the horizon of the transmitting antenna. The FM fields from stations at large distances may be expected to reach their maximum levels in the early morning hours during the summer months; at these times effective ranges up to several hundred miles may be expected."

Facsimile newspapers will soon be broadcast in rural areas if a plan suggested by William G. Finch of Finch Telecommunications, Inc., is approved by the FCC. Mr. Finch is now negotiating for the construction of six FM stations in northern New York, with the idea of using them in a facsimile network as well as for FM broadcasts. "These facsimile papers would furnish farmers with a permanent record of livestock prices, weather reports and farming tips, as well as news flashes and pictures. Such a service would also provide a big market for rural advertising." [The only station I can remember being owned, or named for, Mr. Finch was WGHF 95.1 Brookfield CT (now WRKI).]

Copy of a letter I, along with fellow Duluthian Richard Gottschald, sent to Edwin H. Armstrong, July 17, 1951: "It was indeed a pleasure receiving such a fine complimentary letter from the father of FM in regard to our defense of FM in Broadcasting-Telecasting. It must be very encouraging to you, as it was to us, to note the heartening response in rebuttal to the editorial slurring FM, without a doubt, the finest medium of sound broadcasting. We are inclosing a carbon copy of the letter we sent to the editor of Broadcasting. If they had enough courage (or space) to print our letter in its entirety, it probably would have gained the attention of the FCC, who then might realize that the public wants, needs and demands FM. But said publication is so prejudiced in favor of promoting TV and AM at any cost, they think nothing of the more than 7,000,000 faithful FM listeners whom they would deprive with their idiotic plan to reduce the static-free FM band. I suppose we have become too outspoken in our criticisms of those who oppose FM, but we share the opinion of fighting for what we believe in. We certainly appreciate and thank you for taking the time and trouble of sending the photostat of the FM discussion, and we look forward to receiving it very much. If there is any way we can be of service to you, Mr. Armstrong, we will be only too glad to respond. Again, many thanks. Respectfully yours." I am still trying to find Armstrong's answer to that letter; it was a long, friendly letter written on the stationery of River House and mentioned how people in rural areas would miss the service from a variety of cities that metropolitan listeners would likely continue getting, if the FM band were reduced in size.

FM FORUM

COMMENTS FROM READERS

"Couldn't help but notice the comments in the 2-92 issue about the Burns PBS

Watch Out For "Wimpy" Class Cs!

documentary based on what is the best book to date on the history of radio," writes Al Germond, owner of KARO 101.5 Columbia MO. "None of your readers was alert enough to notice the brief but fascinating almost home-movie clip of the world's first superpower FM station about 40 miles west of Boston outside Worcester. The shots were pre 1-1-41 of W1XOJ, one of two stations opened by the Yankee Network before WWII shattered FM's pre-war dreams. One scene shows the drive up to an impressive transmitter building, a view of the tower and 12-bay turnstile antenna; other scenes are of a car and trailer including interior views. This was hauled all over New England to demonstrate FM on the old 42-50 mc band. The station had a 50 kw REL transmitter and an unusual transmission line (actually many lines) combined and feeding the 12 bays. Of course, ERP calculations did not appear until the new band was opened in 1945 but if you assume a conservative/modest gain of 10 from the 12 bays, the ERP by current standards would have been in the 500 kw range. Of course, polarization was horizontal. I will try to dig up an article about the station and include it. Another first was the use of 133 MHz STL from the Boston studios to the transmitter site: no expensive leased lines.

"Found something else in the files which is copied and sent along, a charter listener certificate signed by the late John Shepard, a Boston department store exec-

utive (Shepard Stores) and owner of the Yankee Network, its two FM stations, WNAC Boston and perhaps some other properties. W43B was the commercial reincarnation of W1XOJ; it was later called WGTR after General Tire and Rubber (O'Neill interests) bought the station and it went off the air in the late '40s after the FCC's disastrous band-shift and power reduction ('single market plan') decrees.

"The other station, W39B, was atop

Mt. Washington NH. It bears no relation to the present WHOM 94.9, but it was a high-altitude wide-coverage pioneer which rebroadcast W43B via off-air pickup.

"I must also strongly agree with you that Sarnoff did not persuade the FCC to shift FM 'upstairs'. Folks get a little emotional/carried away defending Armstrong and the 40 mc band. Recall there were only 35 channels (plus 5 educational) and there was a skip problem. FM needed more room to develop and expand and there wasn't a lot more available either above or below 42-50. Of course, Sarnoff was protecting RCA, its network O&Os and did a lot of anti-EHA things. But the FCC had its own reasons for upgrading the band."

KARO has recently upgraded to a C2, having moved from 101.7. "A C1 upgrade is still pending. Several years ago, I purchased KMAG, a Class C in Fort Smith AR. We moved the transmitter 57 miles from Mt. Magazine AR to Cavanal Hill near Poteau OK to better serve the city of license. Perhaps this is a record move for an FM transmitter. I would be curious to know.

"We applaud what you do with the FM Atlas and if you ever find another copy of the first edition, please put us on a list for one. We have all the others. Our only critique is the maps. They are terrible! I know the format of the book is constraining; size permits only so much. But as a traveller, it is essential that major thru highways (interstates) be shown. Where space allows, it would be a service

to show certain wide-coverage transmitter sites.

For example, on p.63 of the latest edition outside Poteau a little 'X' showing Cavanal Hill as the sites of KZBB 97.9, KMAG 99.1 and KTCS-FM 99.9, all of which are maximum coverage Class Cs [not those wimpy Cs which go up to 301 meters on some TV mast and hog the band while not getting the added coverage 299 more meters gives!]. KBSY 107.3 which approaches being a full C actually transmits

from a mountain in Arkansas!"

If you want a radio directory which shows road maps, I believe "Radio on Wheels" does. I just heard from the Berkley Publishing Group, which says the two editions (eastern and western U.S.) each sell for \$8.95 with quantity prices available. Contact them at 200 Madison Ave., New York NY 10016.

Until next month,

**On Air (Selected)**

- AZ Phoenix KPHF \*88.3, Family Radio, on air 7:30 p.m. to 4 a.m. seven days a week. "Family Radio shares the frequency with another station, but these prime time night hours help to ensure a receptive listening audience for our Christ-centered programs." Other station is KNAI. I have written Harold Campingsuggesting that KPHF get on KNAI's SCS so that listeners can hear the programming on special receivers all the time.
- CA North Highlands (Sacramento) KEBR-FM \*89.3. Family Radio newsletter does not mention new KEDR \*88.3, which just received FCC permission to move from Ione to Sacramento. Will KEBR-FM be rendered unnecessary? [from 92.5]
- KS Baldwin City KNBU \*89.7, having moved/ ME Sanford WSEW \*88.5, 24 hours, Moody, with no local origination. WSEW stands for "We SEnd the Word."
- MI Bloomfield Hills WBFH \*88.1, now with 360 h.v; 55 m, d-a [AM-FM simulcast]
- MN Cloquet WKLK-FM 96.5, \$, rm./ NY Queens "WHIL" 87.9, Richmond Hill High School, 89-30 114th St., ZIP 11418; (718) 441-0089, "Electric Radio 87-9," rock/rap, \$, on 8 a.m. to 4 p.m. school days. "The DJs are all students at RHHS. Gave a commercial for a local carpet store. . . If you print this in the newsletter, don't use my name."

**Off Air or Not Yet On**

- AK Anchorage KWQJ 92.9, KXDZ 103.1
- AK Soldotna KAZO 96.5
- CA Atwater KVRQ 92.5, Auberry KSLK 105.1
- CA Chowchilla KXDA 93.3, Coalinga KNKS 100.1 ("still silent")
- CA Corcoran KLCZ 102.3
- CA Ford City KZPE 102.1

- TX San Saba KFRJ 97.1
- WY Cheyenne K204AC \*88.7
- PR Lajas 103.7, grant remanded to FCC

**SCServices, 67, 92 kHz, SAP/Pro Channels**

*Symbols are as in the "FM Atlas"*

- CA Corona [Los Angeles] KVNA, channel 52 has Spanish on its SAP—Spanish traffic reports, no less. For \$125 you can buy a device to convert your AM car radio to hear the Spanish traffic alertings.
- CA Long Beach KLON \*88.1 still tU,E, but the 67 has administrative announcements to the schools for about half an hour a day; 92 is Persian [same as KPCC's 67]
- CA Northridge KCSN \*88.5 tE, 67/ [92]
- FL Jacksonville WIVY 102.9, "Y-103," has tS./
- MO Columbia KOPN \*89.5 "We're considering using both our SCS channels and possibly one of them for children. Radio Aahs, WWTC Minneapolis, may go satellite and we'd be interested in that."
- NH Manchester WZID 95.7 tS, 67 (occasional audio; was tM)
- NJ Newark Italian is on WBGO \*88.3's SCS, "ICN." Translating its ad in the Italian paper, "Oggi": "With this radio on, you're never alone—on sale through better Italian variety stores." Radio "looks like the FMystery radio shown in FM Atlas-13 but I don't know if it's tunable or if it only gets one station." Also in Italian, WNWK 105.9's 67, "Radio Uno"

- NY Garden City WDRE 92.7 tE, 67, "Antenna FM," 24-hour Greek programming.
- Telemetry warbles migrate to 92 kHz (tU)
- NY New York WSKQ-FM 97.9 tE, 67 (tE, 92). The 67 is Radio Soleil d'Haiti, headed by Dr. Leclere Addison of South Orange NJ, and complements (but is different from) "Radio Tropicale" on WFME 94.7's SCS at 92 kHz. "We are on the air now and will need at least 1000 adapters." For a while played a Haitian Creole song over and over, instead of "I Can Hardly Wait for Christmas." Now on 24 hours a day with varied Haitian music. Haitian also on WSOU \*89.5 South Orange NJ's 92, "but it is weak here in Brooklyn. Can you change our radios so they get both the Haitian channels?"
- NC Chapel Hill-Raleigh WUNC-TV \*4 uses descriptive video service (DVS) parttime and the reading service the rest of the time on its SAP. Is considering using its Pro channel for amateur radio linking (repeaters).
- NC New Bern WTEB \*89.3 reading service to be on 92, not 67 kHz, "to minimize crosstalk from the main carrier. It will include local readings and In-Touch with New York."
- PA Ephrata WIOV 105.1 tR, 92 (tM, 67)
- PA Lancaster WNCE 101.3 tR, 92 (tM, 67)
- PA Reading WRFY 102.5 tR, 92 (tM, 67)

- PA Hollidaysburg WHPA 104.9 uses calls with "FM 104.9"
- SC Greenville WESC-FM 92.5 Country 92 (not strict); ID with Spartanburg-Anderson-Asheville (NC)

**Multi-City IDs In Use**

- CT Bridgeport WEZN 99.9 quits four city IDs; only Bridgeport now. "They only did that for one week."
- PA Harrisburg WRVV 97.3 with York-Lancaster-Lebanon
- WI Brule WHSA \*89.9 drops ID with Superior

**AM Happenings Most Likely Caused by FM**

- CA Los Angeles KMPC 710 all sports. In that market, "nothing above 1260 that isn't religion or foreign language." [1150 silent]
- MD Gaithersburg (Washington DC) WMET/MS Jackson WSLI 930 LMA with WHJT 93.5 Clinton, except for carrying own morning drive time show
- NC Beaufort WBTB 1400 loses out on LMA which involved WFXC 107.1 Durham and WCAS (now WFXK) 104.3 Tarboro, which go it together, shunning the AM
- PA Allentown WXKW 1470, which has just been LMA'd by the owners of WKAP 1320/WZZO 95.1, has a large sign on its site, "available: 3+ commercial acres." "I wonder if we have an upcoming AM Happening here?"
- PA Harrisburg WKBO 1230 silent. "For most of two decades, WKBO was THE top 40 station in the state capital, highly rated, widely imitated. In the early 1980s they leaned AC, then oldies and finally (with the arrival of WWKL 94.9) ended up running CNN Headline News. A tragic loss of a legendary station, but only to those who cherish it from its CHR heyday. . . It was Harrisburg's first radio station, dating back to 1922. It occurred to me how dead the AM dial is in Harrisburg these days: WKBO 1230 gone, WNNK 1400, ex-WHGB, simulcasting FM 104.1, WNIX 1460, ex-WCMB, simulcasting FM 99.3. WHP 580 is the sole survivor, and under new owners they have suffered massive cutbacks—more proof that AM has little hope for the future."
- TN Oak Ridge WOR1 1550 silent since May,

1990, with the FCC issuing a "show cause" why its license should not be revoked.

**FM Rulemakings Proposed**

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AL East Brewton 95.7A, May 22, June 7

- TX Colorado City 106.1A for 106.3A, KAUM

**NAB Shuns RBDS, Wants AM Included**

The radio broadcast data system (RBDS or RDS in Europe) is a worldwide standard at 57 kHz FM, permitting displays of call letters, scanning by format, sending traffic alertings and data to selected locations. Since it benefits only FM, the National Association of Broadcasters has withheld its approval of the system. As well, several major radio groups, heavily involved in AM, are also not taking kindly to RBDS. These groups include Capital Cities/ABC and the CBS owned stations. Mean-

while, Jerry LeBow, Sage Alerting Systems, is trying to promote the system without the benefit of the NAB's blessing—an uphill battle, the outcome of which is not certain. LeBow told me that he would be at the NAB promoting the system. There are efforts to create a hybrid system, which would include AM, with Charles Morgan, an engineer with Susquehanna Radio Corporation working on the project, but he's not certain of any success in that avenue. It is possible that groups like the EIA (Electronics Industries Association) will push for an FM-only system, along with broadcasters willing to go along, but RBDS may never capture the heart and fancy of the majority of U. S. broadcasters and listeners.

**In-Band DAB Demo Planned for Radio '92**

A custom integrated circuit may be the salvation of in-band digital audio broadcasting, permitting stations to stay where they are, not gobble up new spectrum, and benefit from FM's present coverage, minus multipath and plus CD-like audio quality. USA Digital is said to have such a chip, which will also permit picking up the FM analog signal. This would permit listeners to tune in DAB and regular FM on the same spin across the dial. A competing firm, SCI, Inc. plans to test a nonmobile, over-the-air demonstration at the NAB radio show in New Orleans in September. No station has been named as a possible candidate for that demo, and work on a mobile in-band DAB receiver is not very far along.

**FM (and TV) Translators Must Notify Public of License Renewals**

The FCC has modified its rules to require FM translators to inform the public that it can participate in the license renewal process. Translators that originate announcements can notify listeners about an upcoming renewal on the air, but others must resort to newspaper notices how to participate in the renewal process. "The Commission said that while these services do not originate programming, it is interested in obtaining public comment on these services during renewal time on matters such as EEO or technical violations."

**Small-Print Happenings and FM Industry News**

Great American Television and Radio has been granted a waiver of the FCC radio-TV crossownership rules and allowed to buy KSLX 100.7 and KOPA AM Scottsdale AZ. Great American owns KTSP (TV 10, CBS) Phoenix. The waiver was granted based on the "top 25 markets/30 voices" standard, which considers situations of market diversity having over 30 separately owned stations. The Phoenix market is No. 20 and has more than 30 "voices," the FCC pointed out.

Digital Music Express expands with the forming of DMX/Canada, subject to CRTC approval. The new firm will be 80 percent owned by Edmonton-based Shaw Cablesystems, Ltd. and 20 percent by International Cablecasting Technologies of Los Angeles. "DMX/Canada will bring new technology to Canada, while promot-

ing Canadian music," said James R. Shaw, president of Shaw Cable.

**Broadcast Technology** reports that a national aboriginal radio service should be in place in Canada by 1992. Four stations are already on the air: E2, providing programming to 94 northern communities. These are CFWE 89.9 Lac la Biche AB, CFNR AM Terrace BC, CKNM 101.9 Yellowknife and CHON 98.1 Whitehorse. Of those, only CKNM and CHON are known to broadcast in stereo.

A quirk in Canadian regulations might allow the CHUM Group of Toronto to own two AMs and two FMs in Windsor-Detroit. It already owns CIMX 88.7-CKWW AM, and has applied with the CRTC to buy CKLW-FM 93.9 and AM. The CRTC policy allows such multiple holdings in cases where the two commonly owned AMs and two commonly owned FMs program in different languages. Now, let's see—CIMX staying "89-X" in English and CKLW-FM becoming Polish?

FCC proposes annual fees for use of the spectrum. Examples include FM Class B, C1, C2, charged \$550 per year, while FM Class C3, B1 A and [educational] D would be charged \$125/year. Fees for AM stations would range from \$550 to \$125 per year. Translators, boosters and low power TV stations would all be charged \$125 per year. Even broadcast auxiliaries (such as studio to transmitter links) would be charged \$125 per year—those strange call letters you hear when a station signs off. If a broadcaster thinks by paying the fees they are helping the FCC financially, nothing could be farther from the truth. The money would be deposited into the General Fund of the U. S. Treasury. Then why are the fees needed? "The new user fees are patterned on the fee collection program in H.R. 1674, as passed by the House of Representatives in 1991. The fees would apply to most current licensees and to other entities which benefit from the commission's non-licensing regulatory activities, such as cable television systems." No mention is made of possible comment by the public and broadcasters. It seems a bit inequitable that the fee for an FM translator or a studio-to-transmitter link should be the same as for a full-powered Class C3 station.

Hoaxes are back in the news, and with April 1 passed, an incident in Norfolk VA came to national attention when it was reported WNOR 98.7 suspended its general manager and several staffers after the station aired "news" of a potential explosion that panicked listeners that day. The FCC is investigating the incident.

Philip Y. Hahn, who has been interested in starting an FM station since I met him at the NAB in 1967, had his application for 105.5 dismissed at Brockport NY. Seems the FCC inadvertently accepted the application for filing, but then an engineering review showed a problem with regard to the U.S.-Canada FM Broadcasting Agreement of 1947. Hahn's application for 3.6 kw exceeded the maximum of 3 kw for a domestic Class A FM station within 320 km of the border. Rather than allowing Hahn to amend, the application was thrown out. Hahn headed a wholesale drug firm in Rochester NY.

As expected, the FCC-proposed increase in FM station ownership from 12 to 30 that one company can own nationally has stirred controversy in Congress. Rep. John Dingell (D-MI) and Rep. Ed Markey (D-MA) both scolded the FCC for "yet another ill-advised policy that will have devastating effects on consumers and broadcasters alike," and Markey has promised to introduce legislation reinstating the old ownership rules.

The merry-go-round involving KUCB \*89.3 Des Moines continues to turn. The FCC issued a statement decrying numerous letters it had gotten about the station, presumably from KUCB listeners. "Because this proceeding involves mutually exclusive applications, it is 'restricted' until such time as a Commission decision is made and is no longer subject to reconsideration or review by the Commission or the courts." In other words, don't be a pen-pal to the FCC about KUCB!

More stations hit for indecency—KFMH 99.7 Muscatine IA and WWZZ 93.1 Karns-Knoxville TN. The FCC is going after KFMH for two off-color jokes aired Aug. 30, 1991 on its morning show, while WWZZ poked fun on Apr. 10, 1991 at the shrinking "testicles" of a rival station, and concluded, "it takes balls to rock hard; Z-93—we keep it harder, longer." No names are mentioned, and the FCC at this point is only asking the stations for information while the Commission ponders what, if anything, further it should do.

Cold-shouldering any NAB freeze on new FM stations is FCC Chairman Al Sikes. Others have come out against a freeze, including "Radio World," which editorialized against the need for a freeze, saying the "marketplace," which the NAB so often champions, should dictate whether stations come on and remain on the air. Eddie Fritts of the NAB said his group has not done much lobbying on the issue, but did conduct some initial contact among its members. "It could be in the FCC's wisdom to reject our idea. If this is the case, we still think we laid out the best plan," he said.

Maximum amount of FCC fines now \$20,000—an increase from \$10,000, and this action follows a 1989 amendment of the Communications Act to allow the FCC to substantially increase fines it can impose. A station having the dubious distinction of getting such a fine is WSKS 97.7 Sparta GA, for failure to light an antenna tower and not notifying the FCC that the lights had malfunctioned. Also fined was KYQX \*89.5 monophonic Weatherford TX \$5,000 for "repeated violations of the Commission's rules," which forbid noncommercial stations from airing ads. KYQX tried to get the amount reduced to \$2,500 because of financial hardship, but the Commission turned down the request because it had not seen a station profit and loss statement. The FCC agreed, however, not to impose a fine for advertisements aired after the notice of apparent liability was issued. WSKZ 106.5 and WGOW AM fined \$11,000 for EEO violations. While there was found to be no evidence of a pattern of discrimination by WSKZ, the FCC did find "a record of inadequate efforts to recruit and employ minorities, especially Blacks, the dominant minority group in the Chattanooga (TN) market."

Holding their most successful spring fundraisers ever were these community FM stations: KRCL \*90.9 Salt Lake City UT surpassed its \$65,000 goal by more than \$13,000. In Tampa, 3,658 listeners pledged over \$183,000 to WMNF \*88.5. WYSO \*91.3 Yellow Springs OH got \$12,000 over its goal (goal amount not specified). KMUN \*91.9 Astoria OR reached its \$9,000 goal in nine days.

WDIZ 100.3 Orlando's morning team of Baxter and Mark laid off after CBS announced it would syndicate WYNF 94.9 Tampa's "Ron and Ron Morning Show" to WDIZ. If the ratings are good, watch for further CBSyndication of the show to other markets. XETRA-FM 91.1 Tijuana BN has "indefinitely" suspended its morning team of Mike Berger, Jeff Prescott and Russ T. Nailz after they played portions of an Andrew Dice Clay album. Station followed by airing apologies to the San Diego market each hour April 23.

The travails of Bloomington Community Radio in IN are outlined in the latest "NFCB Community Radio News." Group, which holds a CP for the stereo station on 91.3, was formed in 1975, and in 1980 applied for 90.5 FM, but they hadn't reckoned with a power increase that had been approved at WUOL Louisville. "Several months later the FCC rejected the application on the basis of objectionable interference with the Louisville station." During a period of relative inactivity that followed, the group learned of a TV channel 6 problem with WRTV Indianapolis, 80 km away. The group decided to find a commercial frequency and sought \*95.1; however, Bruce Quinn, "a former pirate broadcaster

from Bloomington, also submitted a petition for rulemaking for 95.1 at the same time of BCR's submission. Phone conversations between Quinn and BCR were adversarial at best. The two parties drew battle lines. Then Quinn made a strategic maneuver—he withdrew his petition for Bloomington and resubmitted a petition for the same frequency to nearby, tiny Nashville, the county seat of neighboring Brown County. A three-year struggle followed. In June, 1989, the FCC ruled that Nashville deserved the allocation because it would provide a first service to Brown County. BCR argued that Nashville was too small to support a station and that any station licensed to Nashville would try to reach the Bloomington market anyway. This argument ultimately did not carry the day. Interestingly, Quinn never applied for the frequency. A construction permit for the Nashville frequency has since been awarded [WVNI] and, not surprisingly, the coverage area is aimed squarely at Bloomington." NFCB then offered help and through the firm of Bechtel and Cole, Washington DC, they found the frequency 91.3, and engineered a solution to the Channel 6 TV problem in that the site will be 16 km SW of town. In April, 1990, BCR submitted its application to the FCC and in December, 1991, the construction permit was granted. "It's been a long, arduous trip through these past 16 years, and yet, the permit represents a whole new beginning and challenges us to build and operate a station that truly reflects the diversity and talent of our community. We never thought in our wildest dreams that it would take this long. But you know what? It was all worth it." [An excellent solution—and one that keeps a public station in the educational band where it belongs; 95.1 was justifiably allocated as a commercial station—b.e.]

FCC totals as of March 31: AM radio 4982 stations, FM 4625 (92-108 mhz), FM 1522 (88-91.9 mhz), for an FM total of on-air and licensed stations 6147.

From the classifieds: Flea market book sale from "FM Atlas," Box 24, Adolph MN 55701. "Educational AM and FM Radio and Educational Television Stations by State and City," U.S. Dept. of Health, Education and Welfare, 1963, \$4.50 postpaid. "World Radio-TV Handbook," 1989 edition, \$4.50 postpaid. "Shortwave Radio Listening with the Experts," published by Sams, 1988, over 500 pages, includes a chapter on FM by me; \$19.00 postpaid.

Jim Duncan has a couple new publications. The winter 1992 supplement to his "American Radio" covers most medium to large markets and is \$49 per copy, while a new book, "The Relationship Between Radio Audience Shares and Radio Revenue Shares," is \$85 each. Contact him at Duncan's American Radio, Inc., PO Box 90284, Indianapolis IN 46290.

Has 2400 McMartin TR55 SCS receivers, 900 brand new and 1500 used in good condition, supplied lens crystals. Choice of 67 or 92 kHz; used ones \$68 each, and new ones \$97 each; less in quantity. Crystals can be supplied at \$10 each and a manual is \$10. Marvin Birnborn, Surplus Traders, PO Box 276-FM, Alburt VT 05440; (514) 739-9328.

#### FM AS IT WAS—OR MIGHT HAVE BEEN

Here's an FM station history I got from Broadcast Pro-File, PO Box 982, Hollywood CA 9078-0982, with permission to reproduce. It concerns WESC-FM 92.5 Greenville SC, now IDing as "Country 92," with Spartanburg-Anderson-Asheville (NC).

WESC-FM were the call letters assigned to the Greenville Broadcasting Company when its new FM station, to operate on 92.5 megacycles with 12 KW effective radiated power, was granted in mid-1947 by the Federal Communications Commission. The new "Class B" FM station went on the air in March, 1948 from studios located at 1 College Street, Greenville, South Carolina, duplicating fully the WESC

daytime program format, which included programming from the Mutual Broadcasting System network. Transmitter and tower were located at a site in Greenville County. Scott Russell was

That power increase took place in 1967. Multiplex stereo operation began in 1969. In 1971, power of the station rose to 100 KW (horizontal and vertical polarization) and its

virtually fulltime on itSCS.

Ned Horton's been running WRLT 100.1 Radio Lightning, Franklin-Nashville TN virtually single-handed. In a long, complicated turn of events, his group is trying to buy back the station after its previous owner put it on auction. For a while WPLN \*90.3 was interested in bidding, so that WRLT could become fulltime classical music. Even the Nashville mayor, Phil Bredesen, got into the act, questioning if the WPLN Foundation had the authority to use money people donated to the station's operation for acquiring new stations. Apparently, WPLN was outbid by Horton, who has the vision of preserving an alternative rock format and making money. He still holds the CP for WYPE 94.1 Smyrna TN, which would also serve Nashville as a rimshotter. Horton said "We're fired up, we're enthusiastic and we're confident that this thing is going to turn out for the better. We'll be moving forward rapidly."

Successful purchaser of the first edition "FM Atlas" was Clarke Ingram: "Thanks so much for the first-edition FM Atlas, which was something of a revelation! It was especially interesting to get 'Atlas' 1 and 14 in the same package and make the comparison. As the cigarette ad says, 'you've come a long way', Bruce! I had almost forgotten the small typeface in Atlas-1 (Hermes, I think), which was an immediate flashback to my early years [of knowing you]. It's amazing to see how many stations (in Atlas-1) are in mono, or not there at all! I still need the 3rd and 6th edition FM 'Atlas' to complete my collection, and I have three 'almost-like-new' 5th editions (1978) to offer in trade if anyone is interested! My FMedia! collection is complete, and fortunately has survived three moves intact. . . Someone asked me recently, upon seeing the FM Atlas for the first time, if radio stations paid to have their logos published in the Station Directory section; that struck me as not a bad idea, and I thought I'd pass it along to you as a possible money-maker!" [Clarke can be reached at 1141-D W. Lafayette St., Easton PA 18042, if anyone wants to trade atlases.]

A feature article on a NJ state representative, John R. Weingart, appeared in the New York Times. It showed him spinning records at WPRB 103.3 Princeton, and is host of the state's longest-running folk music program, on 6:30 to 10 p.m. Sundays. Although the station is commercial, he's unpaid for his stint there.

An AM is a-building an 1500 for WJRZ-FM 100.1 Manahawin NJ, which could be on this fall with CNNNews. "It will be nice to finally hear a local AM news station, instead of listening to WCBS 8&0 AM from New York or KYW 1060 from Philadelphia, both of which do not have clear reception in the Toms River area," says Jim George.

Until June, *Bruce F. Elving*

# WESC-FM 100,000 WATTS COLLEGE STREET GREENVILLE, SOUTH CAROLINA 29601 STEREO 92.5

president and general manager of the new FM station.

In 1949, WESC-FM affiliated with the Liberty Broadcasting System network while retaining its Mutual liaison. President and General Manager Scott Russell died on April 21, 1950. Later in that year, Mrs. Scott Russell was appointed president of the Greenville Broadcasting Company, and Glenn P. Warnock was named general manager of the WESC stations. Power was raised from 12 KW to 12.5 KW in 1950. In 1951, the station's Mutual affiliation was dropped. The Greenville Broadcasting Company was reorganized, as the FCC approved the transfer of control on October 22, 1951 from Christie K. Russei, as administratrix of the estate of the late Scott Russell to Mrs. Russell individually (56 percent interest) and to Alester G. Furman, Jr. Mr. Furman paid \$44,000 for his 44 percent interest in the firm. W. Ennis Bray was then named general manager of WESC-FM with the title of vice president added in 1952. On May 16, 1952, the Dallas-based Liberty Broadcasting System folded. WESC-FM continued to duplicate the independent program schedule of sister station WESC.

Mrs. James G. Meade (the former Mrs. Scott Russell) became president in 1953. In that year, Buddy Starcher succeeded Mr. Bray as general manager of the WESC stations. Mrs. Meade became both president and general manager upon the resignation of Mr. Starcher in 1954. [He left to manage a Birmingham, Alabama AM station in that year.] In 1955, the Greenville Broadcasting Company incorporated. Also in 1955, James G. Meade became general manager. In 1956, he was succeeded in that post by John Y. Davenport. Also in 1956, power of WESC-FM was reduced to 11.5 KW, but a year later, the station's power level changed to 12 KW ERP.

The FCC approved the sale of WESC-FM (along with WESC) March 27, 1958 from Mrs. Christie M. Mitchell to the Broadcasting Company of The Carolinas for a purchase price of \$267,000 (both AM and FM) with the new ownership taking control April 8th. Robert A. Schmid was president of the new licensee, while J. Y. Davenport rose to vice president and general manager at the time of the transfer. By 1960, the station aired an "adult music" format with studios located at 1 College Street. In 1963, WESC-FM began a fully non-duplicated programming schedule. Its antenna height was now 360 feet above ground. WESC-FM now operated daily from 6 a.m. to 12 midnight. It duplicated the WESC program schedule from 6 a.m. to 8 a.m. and thereafter broadcast "Carousel," a mellow format of light classics, popular music and Broadway cast album music.

Power was increased from 12 KW to 32 KW (still 360 foot antenna height) in 1965. On October 7, 1966, the FCC granted WESC-FM a construction permit to raise power to 36 KW.

antenna height was reduced to 340 feet. In 1975, WESC-FM's tower height increased to 612 feet. In the same year, studios were relocated to 223 West Stone Avenue. By 1976, the independent FM station was airing a "beautiful music" format. This change in 1976 [was] to "middle of the road" music. In 1977, the station began duplicating fully the WESC "country music" format as well as the station's ABC Entertainment network programming.

John Y. Davenport became president and general manager in September, 1977, while Robert A. Schmid concurrently rose to chairman of the board of the Broadcasting Company of the Carolinas, Inc. Antenna height was raised to 2,000 feet in 1979. It continued to operate with a power of 100 KW. In 1980 the station began 50 percent non-duplicated programming. This changed to 75 percent non-duplicated programming in 1984.

Today WESC-FM operates on 92.5 mHz with a power of 100 KW (horizontal and vertical) from an antenna height of 2,000 feet. Studios are located in Greenville, South Carolina at 223 West Stone Avenue. The stereo station operates 24 hours a day and simulcasts WESC's "Metro Country" format from 6 a.m. to 10 a.m. and again from 3 p.m. to 6 p.m. daily. Robert A. Schmid is chairman of licensee The Broadcasting Company of the Carolinas, Inc., while John Y. Davenport is president and general manager of the "country music"-formatted station.

The above report is about 10 years old. Both AM and FM are country, and WESC-FM is listed as duplicating AM 100 percent. I have a letter from them, verifying my June 27, 1973 reception: "WESC-FM stereo broadcasts 24 hours a day with 100 thousand watts, both horizontal and lateral [?]. Our format consists of middle of the road music from eight a.m. till sunset, at which time we go modern country music until eight the next morning. We have received verification of signal from the Grand Bahamas and Texas. Sincerely, Lowell Fletcher, manager."

### CONTRIBUTIONS FROM READERS

Jeff Tomasin was pleasantly surprised to learn that K10T 102.3 Espanola-Santa Fe carries the BBC world service newscast three times in the morning and at 5 p.m. He wonders if any FMedia! subscribers know of other stations in the U.S. rebroadcasting the RBC. I know the news and information stations of MN Public Radio do so, and I wouldn't be surprised if American Public Radio distributes the BBC, although the BBC has its own office in New York, which I visited in the 1960s—a party where Mitch Miller was one of the guests. And at least one public FM station in Virginia has the BBC

## SCS Services, 67 and 92 kHz

*Symbols are as in the "FM Atlas"*

- MN Rochester KFSI \*88.5 tU, 67 (not tX)  
 KRCH 101.7 tU, 92 (retains tM, 67)  
 NJ Atlantic City WMGM 103.7 tR, 92 (tE, 67); the 92 is the same music service as on WQCD 101.9 New York's 92.  
 TX "Here's an ad from the June, 1972, *FM Guide* magazine, which they have in the Jamaica (NY) library. I don't recognize the address; guess the guy isn't in the subcarrier business any more." The ad reads:  
 Get "Music Only" FM Programs. SCA Adaptor fits any FM tuner or receiver. Free list of Stations with order. Kit \$14.50 (with Squelch \$19.50). Wired and Tested \$25.00 (with Squelch \$29.95). All plus postage and insurance. Thousands sold. SWTPC, Box FM32040, San Antonio TX 78284.

I bought one of their kits with squelch control in 1974 and it worked fine for several years. At that time I knew nothing about power supplies and had a student wire a power supply because the board took too much juice from my Fisher 500TX receiver (still in use). The unit was mounted in a separate cabinet, with audio cables to and from the receiver. I credit Southwest Technical Products Co. for supplying this adapter which helped get me started in tuning in the elusive world of FM subcarriers—and introducing that world of pleasure to many others. The May *Popular Communications* has a letter in the Mailbag column from someone who wants information on SCS adapters and "Tom Kneitel doesn't mention you in the answer (although he did several years ago in response to a similar request). And Alice Brannigan mentions Bill Finch's WGHF sending fax transmissions over FM in 1946 (she says WGHF [101.9] was in NYC—before the CT station mentioned in April's FMedia! began operation)."

"You probably saw this in the June *Popular Communications*. A former/potential customer?"

Uninterrupted music, news, sports, book readings from hidden FM channels. Article and plans tell you how to tune in. Send \$8 to AJL, Box 5354, High Point NC 27262.

## FMistakes, FM Atlas-14, FMedia!

**AM Happenings Most Likely Caused by FM**

AR Marked Tree KPCA 1580 deleted by FCC  
 AR Pine Bluff KCLA 1400 and KZYP 99.3 FM enter LMA with KPBB 101.3 Pine Bluff  
 GA Brunswick WHJX 790 silent pending sale  
 LA Farmerville KTDL 1470 silent  
 ME Portland WLPZ 1440 business radio, from "Z-Rock"  
 MD Gaithersburg WMET 1150 shut down after Satellite Music Network sent sheriff to seize all unattached assets. SMN was owed \$460,650 by Beltway Communications, station licensee. Value of seized property, including office equipment, only came to \$15,000. Sondra Linden, general manager, has been labeled by employees as an "eccentric," who consulted a psychic before making decisions. The station later returned to the air after working out an LMA with WPGC 1580 AM Morningside MD.  
 MI Albion WALM 1260 silent, along with Battle Creek [in Marshall  
 MI Battle Creek WELL 1400, along with FM/

MS Gulfport WQFX 1130 silent  
 NJ Lakeside WKNJ 550 not on air—slow in building, as is NJ Oakland WVNJ 1160.  
 NY New York WNEW 1130 threatened by a buyout by Salem Media (owner of WMCA 570), which would probably turn it into religion. WNEW-FM 102.7 has separate owner. "Westwood One, realizing that it might not own WNEW by next fall, already is planning to put the Giants on the FM station it owns, country WYNY" 103.5. However, disagreement between owners Robert Sillerman and Westwood One makes the sale unlikely. In the meantime, the station continues to lose money, but is rich with nostalgia buffs who would miss the Frank Sinatra sound of this big AMer.

**FM Rulemakings Proposed**

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

AL Jackson 94.5C2 for A, WHOD-FM counterproposal  
 CA Carmel Valley 105.9A, July 6, 21; FCC also moving to grant 95.1A there.

**FCC Urged to Consider Canadian Radio Population Policy; CRTC Urged To Allow Religious-Licensed FM Stations**

Twenty-two Christian radio and TV broadcasters from across Canada recently met in Winnipeg to launch the National Christian Broadcast Association (NCB). Like in the U.S., there is an air of change in the regulatory climate in Canada. Stations owned by churches or religious institutions have to date been forbidden in Canada. Only in Newfoundland are two such stations found, both on AM; and they predated that province's coming into Canada in 1949. One of these, VOAR St. John's, was recently granted an increase from 1 to 10 kw and move from 1230 to 1210 kHz. Attention to the lack of Christian stations was focused on several unlicensed TV transmitters in western Canada. As a result of publicity over that issue, CRTChairman Keith Spicer agreed to hold public consultations to discuss existing religious broadcasting practices. According to newly-elected NCB regulatory affairs chairperson Gloria Kieler, the group will approach the CRTC soon with an "unified request for the long-awaited liberation of Canada's airwaves."

The FCC would do well to study what the CRTC does in Canada, says the National Association of Broadcasters, when it comes to authorizing new FM and AM stations. In its reply comments to a request for a freeze on new FM stations, the NAB included a Dec. 17, 1990, CRTC radio market policy paper. The CRTC lays out economic criteria a market must meet before a new station can be approved, to "give indications at an early stage of the capacity of markets to support additional commercial radio stations." The introduction of another AM or FM station must not affect the ability of existing stations to "discharge their programming responsibilities." The CRTC paper said restrictions on new entrants into radio broadcasting is likely to be a more efficient means than unlimited competition "to foster a continued, varied and comprehensive service." The NAB, in its comments to the FCC, also urged "prompt, comprehensive and remedial action" to improve FM allocations and licensing policies. NAB charged that current policies have congested the FM band, causing interference and hindering broadcasters' efforts to upgrade their signals, which in turn has diminished FM's sound quality for the listeners.

**FCC Adopts Broadcast Hoax Rule**

After a spate of on-air hoaxes since 1989, the FCC has clamped down on false broadcasts that are harmful to the public. The new rule stops stations from knowingly broadcasting false information concerning a crime or catastrophe if "it is foreseeable that broadcast of such informa-

tion will cause substantial public harm, and broadcast of the information does, in fact, directly cause such harm." The new rule gives the FCC greater flexibility in fining errant broadcasters. Fines could be as high as \$25,000, but short of license revocation. "In deference to First Amendment concerns, the Commission crafted the rule narrowly, thus restricting hoaxes that result in substantial public harm." Stations which were cited by the FCC for hoaxes included KSHE 94.7 Crestwood MO, which interrupted its programming for a fake report of a nuclear attack on the nation, "complete with sound effects that simulated the warning tones of the Emergency Broadcast System." That was on Jan. 29, 1991, during the Persian Gulf war. Other examples of hoaxes: KSLX 100.7 Scottsdale AZ announced in March, 1989, that the station had been taken hostage. It hadn't, but the broadcast caused local police to rush to the scene. Avon CT has no volcanos, but WCCC-FM 106.9 Hartford and its AM in March, 1990, spooked residents there of a volcanic eruption. And in June, 1990, KROQ-FM 106.7 Pasadena CA aired the famous segment of an anonymous caller talking to disc jockeys in June, 1990 about killing his girlfriend, and the truth did not come out until 10 months later--during which "Unsolved Mysteries" on NBC was taken in. The danger in such a rule, however, as NBC pointed out to the FCC, is that drama like Orson Welles' "War of the Worlds," might not be possible under an anti-hoax policy.

**Small Print Happenings and FM Industry News**

The FCC has fined WIYY 97.9 Baltimore MD \$2,500 after violating "anti-lottery" provisions. WIYY "inadvertently" ran 12 spots that detailed a Superbowl party at a local bar where patrons paid \$20 for food, beverage and a ticket to a random drawing for a mountain bike and a weekend getaway at Day's Inn. The fine was reduced from the normal \$6,250, because the violation "occurred over a relatively short period of time and was voluntarily disclosed to the Commission." Also fetching a fine--KGB 101.5 San Diego, \$25,000 for airing indecent programming during the Friday morning "Blow-Out Show," Feb. 23, March 16 and April 13, 1990. Songs the FCC found improper were "Candy Wrapper" and "Sit on My Face." Although \$12,500 is the normal fine for broadcast of obscene material, the FCC said the violation was exacerbated because "the broadcast of indecent material was repeated and, with respect to the song 'Candy Wrapper', was egregious, given the prior Commission determination that that particular material was indecent."

The Satellite Music Network now has a kit which outlines strategies for local marketing agreements (LMAs) that may evolve into multiple acquisitions in the same market, under new FCC rules. The kit contains both a video and audio cassette, as well as full text of FCC Docket 91-140. For prices and more information contact Martin Raab at (214) 991-9200.

Included in a broad FCC inquiry on relaxing national and local TV ownership restrictions is a statement that the Commission is looking for comment on eliminating the crossownership of radio (FM-AM) and TV stations in the same

market. As an alternative to eliminating the restriction completely, the FCC wonders if a relaxation is in order which might permit the ownership of one AM, one FM and one TV station in a market. The FCC points out that the marketplace is expanding, and here's a chart showing the growth in radio stations licensed by the FCC. As of April 30, there were 4982 AM,

**ON AIR RADIO STATIONS (1948-1991)**

4652 FM (92-108 mhz) and 1530 FM educational (88-92 mhz), for an FM total of 6182.

The FCC's been acting on its own, with or without a rule. It has just agreed to allow KEYN 103.7 and KQAM AM Wichita to be assigned from Radio Management Services, receiver, to Clear Channel Communications, licensee of KSAS TV-24, the Fox affiliate, disagreeing with several petitions to deny. The radio stations met the "failed station" standard of the FCC, after being placed in receivership after defaulting on two notes held by The Central Trust Company.

FCC raiders swooped down on "Radio Guinan," the 1260 kHz Brooklyn NY pirate mentioned to me by a contact at Family Radio. The seizure of "Radio Guinan" took place under federal civil forfeiture provisions initiated by Assistant U. S. Attorney Christopher Lehmann. FCC engineers triangulated a building at 141 E. 40th Street and found Jean Lucien Borges there, who had been the subject of an FCC investigation in November, 1991. The investigation was initiated by complaints from radio stations WADO and WFME. WADO was interested because it operates on nearby 1280 kHz. But why was WFME concerned and why should FMedia readers be interested? Because the operation was Haitian French, and competing for listeners and advertising dollars (remember, this was a commercial pirate!) with Radio Tropicale, on WFME's 92 khz SCS. Borges, besides losing his radio equipment, faces a possible \$100,000 fine and one year in prison. Lehmann continues to handle the case. "We hope this action sends a message to future would-be pirate radio operators. Unlicensed radio operators cannot disregard Federal authority," Alexander Zimny, engineer-in-charge, New York FCC office, said.

The New York area is a hotbed for pirates, and the latest, which operates quite openly is being run by, or at, the Richmond Hill High School in Queens, "WHIL," 87.9 stereo and with commercials. Real commercials--I heard a tape kindly sent by a reader--and not just commercials like KMOJ \*89.9 Minneapolis runs, that are labeled "funded announcements." The tape included a used car commercial, station ID, very slick-sounding, done by the school baseball coach, and a girl dedicating a song to "all the fly niggers in the lunchroom." I am told "fly" means "cool/hip/good-looking," and on the tape you can hear the other kids say "oh, no," probably thinking that remark will get them kicked off the air.

How do you latch onto call letters another station has discarded? Well, take it from the good ol' FCC. They've just come out with a sheet discussing "relinquished call signs." It says: Under Sec. 73.3550 of the Commission's Rules,

call signs for broadcast stations are awarded on a first-come, first-served basis. When requests to change call signs are pending, the call sign to be relinquished is not available for application by other broadcasters until the effective date of the change. Effective dates for call sign changes are specified in Public Notices released on a weekly basis. Prior to the effective date, no applications for the relinquished call sign will be accepted. If the effective date falls on a weekend or holiday, any request for a call sign to be relinquished should be filed no earlier than the next business day. Agreements between licensees to call sign changes will not determine the award of any such relinquished call signs. For further information, call Alma Hughes at (202) 634-1923.

New from the FCC—Form 301, application for construction permit for commercial broadcast station has been revised. As well, Form 340, application for construction permit for non-commercial educational broadcast station has been revised. Both forms are printed and available for use, but the FCC said it will continue to accept applications on the old forms until June 12, 1992, recognizing that many might be in the midst of putting together an application.

Public radio fans probably already know that "American Radio Company" host Garrison Keillor has announced he'll move his show back to the World Theatre in St. Paul, from New York. This will be his first season based in MN since 1987, and he has reportedly bought a house near River Falls WI. No mention in any of the news stories in this state as to whether his Danish wife is with him. Hmmm.

Also in MN news, the Minnesota Broadcasters Association reaffirmed its resolution against Minnesota Public Radio, including "MPR for-profit subsidiaries." Although Bill Kling, president of MPR, claims the network and the for-profit Greenspring Company have only an "arm's length relationship," the MBA pointed out that invoices mailed out with merchandise includes the printed instructions to "Please return remittance copy with your payment to Minnesota Public Radio." The MBA's resolution authorized it to take appropriate actions including, but not limited to, seeking Federal Communications Commission relief that would apply ownership rules uniformly to broadcast companies" whether commercial or noncommercial. In a recent letter to Kling the MBA pointed out that since Oct., 1990, "the MBA Board has been aware that your company added at least four FM stations and several translators to its holding. This was a topic of concern to our general membership meeting in the fall of 1990, and continues to the present day. On Oct. 22, 1990, the MBA's membership passed a resolution regarding MPR. During our most recent Board meeting, the Board unanimously reaffirmed the resolution. A copy of said resolution is enclosed."

The MBA pointed out that "buried in the Omnibus Appropriations Bill passed by the 1992 MN legislature is an equipment grant of \$278,000 for MPR. The funds would be used for the second MPR stations in Moorhead, Thief River Falls, St. Peter/Mankato and a new station in La Crescent MN." The bill also awarded \$116,000 to 11 non-MPR public/educational stations in MN making up AMPERS, and \$720,000 for public TV equipment needs.

NAB's "supertuner" to re-emerge? After four years of no news on this once-heralded radio which would include AM stereo and FM stereo, it is still not ready for production. The Denon/NAB project suffered a recent setback when Allegro Microsystems announced it could not produce the integrated circuit needed to produce AM noise blanking nor the related FM chip in the 2,000 quantity the NAB proposed. Some NAB attendees expected to order the radios at the recent convention, but were told that no orders are being taken—at least until Denon can get its act straightened out. Part of the problem involves production concerns between Denon of America

and its parent company in Japan.

From the classifieds: Young students would appreciate donations of working broadcast equipment for new FM. "WACK," 935 High St., Victor NY 14564; (716) 924-3252.

Two shipments of G-E Superadios, model 7-2885, came in. It's an excellent radio for broadcasters with very good sensitivity and selectivity, \$54.00 plus \$4.50 shipping. Modifiable for even better selectivity and/or with FM SCS circuit(s). These are the last until a new model appears in August. Me.

AM/FM combo in eastern WY. Nice community support, nice small town, \$90,000 cash. Serious inquiries only; (307) 358-3636, ask for Brett. My guess is that it's KKT-Y-FM 99.3 and AM Douglas.

**FM FORUM—CONTRIBUTIONS FROM READERS**

In April it was mentioned how the NAB wants the FCC to update what stations keep in their public inspection files. Phil Bradford of the Chicago FCC office supplied a checklist for broadcasters, which consists of: 1) records at accessible location; 2) applications tendered after 5-13-65; 3) latest license renewal application; 4) ownership reports after 5-13-65; 5) political use requests; 6) annual employment reports; 7) the obsolete "Public and Broadcasting" manual; 8) letters from the public (as required); 9) issues/programs list; 10) statement certifying compliance with license renewal pre-filing and post-filing announcements; 11) materials available for reproduction; 12) materials retained for proper period; 13) donor announcements (noncommercial stations).

The FCC announced a proposal for high definition TV, but it would require dual operation four years on present channels and 1700 new channels; there would be a two-year "window" in which to apply.

David Goodling enjoys the new WRVV 97.3 Harrisburg, "The River," since it does not seem to be consulted, lacks gimmicks and self-promotion, and its commercial breaks are short. He sent along news of Temple University's translators, including the new one on 90.7, which comes in in Lancaster 32 km away. "I was surprised to see Mark Humphrey's comments regarding WIXQ 91.7 vs. WJAZ 91.7. I agree with him except for one thing--91.7 WIXQ did not impede reception of WBJC 91.5 nearly as much as 91.3 WLCH has. WLCH [Lancaster] has also cheated WXAC 91.3 Reading out of most of its coverage in southern and western Berks County. Mr. Humphrey is quite correct that I'm more DXer than anything else, but I still can't believe I'm the only one complaining. All this is still no excuse to introduce a needless co-channel interference when 90.1 in Harrisburg is still blank! [I plan to send my issue of] FMedia! with Mr. Humphrey's bit to Millersville University, because they seem to be oblivious to any problems." And, of historical interest, David sent along a story about the dismantling of the highest tower in Lancaster, a 140-foot spire atop

the former Harold Building. At one time that tower served WGAL TV-8, WGAL-FM 101.3 and WLPA 1490 AM. The tower existed in various segments since 1938, and in 1944 WGAL added an FM station, "one of the first in the nation," using a special antenna on the top of the Harold Building. In 1951, it installed a triplexer to broadcast AM, FM and TV signals from that spot. "Unfortunately, WGAL only lives on as a TV station since 1978, no FM, no AM," writes Goodling. My 1951 *White's Radio Log* lists WGAL-FM as being on 101.3.

A reader mentioned that WNYE \*91.5 Brooklyn is for sale with a minimum bid of \$3 million. "Wanna bet it ends up religious?" he muses. He notes WPLN \*90.3 Nashville does kill its pilot during mono talk shows. Wisconsin Public Radio is expanding by taking over some of the formerly student stations in the state, such as at Superior, Eau Claire, Green Bay and La Crosse, while apparently at WWSP Stevens Point the students successfully fought off the state. I believe the students won at River Falls, too; for I do not hear the network programs on WRFW \*88.7 any longer.

Some time ago the NAB asked if your company has a visionary mission statement? It could precede an employee personnel manual and be on annual reports to shareholders. "As the name implies, a mission statement simply outlines the general goals and purpose of a company." Use of mission statements vary by company, some printing them only in annual reports and others serve as a daily guide that affects virtually every step a company pursues in the business world. The mission statement of Meyer Broadcasting Co., Bismarck ND, is brief and to the point: "Produce and provide information and entertainment services." The NAB's mission statement includes: "NAB fosters and promotes continued viability of free over-the-air broadcasting. To that end, the Association protects its members from unnecessary government intrusions. . . The Association encourages and promotes policies and procedures that strengthen and maintain the broadcast industry to the end that it may best serve the public." I call mine a "Publisher's Credo." It goes like this:

HERE RESIDES THE HOME OF BRAVE  
NEW IDEAS;  
THE CENTER OF A PUBLISHING  
ENDEAVOR WITH READERS IN ALL THE  
STATES AND MANY FOREIGN LANDS;  
WHERE ELECTRONIC PRODUCTS OF  
QUALITY AND UNIQUENESS ORIGINATE.  
EVERMORE OUR COMMITMENT TO  
EXCELLENCE MUST PREVAIL—  
TO SECURE FOR OURSELVES AND OUR  
POSTERITY THAT WHICH,  
WITH THE WILL OF GOD, WILL BE OUR  
PROPER GOAL.

On that lofty note, I'll close. Until July,

**On Air (Selected)**

AL Birmingham WVSU \*91.1 and "really pushing the definition of non-commercial. When heard, they were running oldies rock, and a 60-second spot for Cellular One! Why doesn't the FCC just drop the pretense and re-label them 'nonprofit'?" [92.7  
 AR Wynne KWYN-FM 92.5, having moved from/  
 MN Brownville KXDL 99.7, o, \$, uses calls  
 MO Chaffee KYRX 104.7, "Y-106," r  
 MO Joplin KKUZ 102.5 along with WMBH AM being sold to KBVA 106.5 Bella Vista AR; a possible LMA in the making with KKUS adopting KBVA's "middle of the road, elevator-type music?" [100.1)  
 MO Vandalia KLRK 104.3 (having moved from/  
 NY New York city area pirates include "WJQR" 91.9 Jamaica NY, "weak signal and distorted, due to "WNCR" Nassau County Radio Broadcasting on at same time. The stations seem unaware of each other, but both reported having 'technical difficulties'." Later calls were announced as "WJCR, Jamaica Center Radio," and "seemingly forgetting that yesterday they were 'WJQR'. Then the Spanish stuff was on for five hours. If the FCC catches the guy and hits him with a 'per dirty-word' fine, he'd better be rich!" Spanish included a tape "with obscene songs and an

announcer making dozens of, uh, scatological references." Later played heavy metal, with a guy named Fred grunting and growling "like a caveman" over the music. Not believed to be WNTI \*91.9 Hackettstown NJ, or any other licensed station. An upstate NY pirate is "WFFT" 104.9 at SUNY Buffalo north campus. Mostly modern rock and mono, but off the air for the summer, an "LPFM non-licensed station."

OH Columbus W272AT \*102.3, 10 w circular, omni. "I am repeating WDUB \*91.1 Granville OH, which is a well-to-do school with more money in its console than my whole set-up. They are 100 w vertical, a by-product of being within the Grade B Ch. 6 contour. They are, of course, very difficult to receive here in downtown Columbus. . . Unfortunately, WDUB is off for the summer four months. I will let you know if I run alternative programming during this time. I was the first guy to apply under the new rules, as I delivered my application personally to the Mellon Bank at 12:01 a.m. the day of the rule change. The new rules allow NCE-FM on the commercial band and go by ERP instead of TPO. . . I receive no money from Denison, and I'm a nonprofit corporation according to city, state and feds. I will attempt to recover my paltry expenses by begging on the air every 60 minutes for 30 seconds. Wish me luck."

ON Newmarket (Toronto) CKAN 1480 still silent. Landlord boosted rent from \$12,000 to \$60,000 a year for its transmitter site. Station has debts of about \$200,000. With help of an interim receiver-manager, it's hoping for small investors to buy in and help it get back on the air. The following Canadian stations have applied to move to FM, according to *Broadcast Technology* magazine: CJLM 1350 Joliet (for 103.5), CFLS 920 Lewis (102.9), CKMG 1340 Maniwaki (99.3), CFZZ 1040 St-Jean-sur-Richelieu (104.1), CFGT 1270 Alma, all PQ (frequency of latter not given); CFOR 1570 Orillia (105.9), CKMP 1230 Midland (104.1) both ON. The CRTC has called for other applications in the Lac-St-Jean area, with deadline of May 25, 1992.  
BN Tijuana XEKAM 950 silent

FM Rulemakings Proposed

First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.

- AR Wrightville 107.7C2 for A, KYTN, July 27, Aug. 11
- CA Dunsmuir 100.1C3 for A, KRKD, Aug. 7, 24
- IA Grundy Center 97.7C3 for A, KGCI, Aug. 10, 26 [with Half Way
- MO Greenfield 107.7A for 93.5A, KXBR, /
- MO Half Way 93.1C3 for A, KYOO-FM counter-proposal [Half Way
- MO Ozark 93.5A for 92.9A, KZPF, with/
- NY Copenhagen 106.7C3 for A, WWLV, Aug. 10, 26
- NY Mexico 103.9A, Aug. 7, 24
- OR Canyon City 94.5A, Aug. 10, 26
- VT Hartford 104.3C3 for A, WGLV, July 20, Aug. 4 [with South Hill
- VA Lawrenceville WHFD 98.9 to 105.5A, /
- VA South Hill WSHV 105.5 to 98.9A
- VA White Stone 104.9A for 100.1A, WNDJ, Aug. 10, 26 [98.9, July 20, Aug. 4
- PR Canovanas 98.3A from Vieques Island/
- PR Culebra 98.7A from 106.5A July 20, Aug. 4
- PR Las Piedras 98.3A, July 20, Aug. 4
- PR Mayaguez 98.7B for 99.1B, WKJB-FM, July 20, Aug. 4 [July 20, Aug. 4
- PR San Juan 99.1B for 98.5B, WPRM-FM, /
- PR Santa Isabel 98.1A, July 20, Aug. 4
- VI Christiansted (from Fredericksted) 106.1B, WVIS, July 20, Aug. 4
- VI Fredericksted 98.5A, July 20, Aug. 4

FM Rulemakings Finalized

Dates are when FCC filing windows are open

- AZ Prescott dismissed 98.3A bid
- AR North Crossett 102.7C2 for A, KWLT
- CA Fort Bragg 95.3B1 for A, KOZT
- CA Quincy 100.3C3 for A, KSPY
- FL Inglis 104.3A, July 21-Aug. 20
- GA Hannahs Mill deleted 101.1 Assignment, after Radio Georgia, Inc. proved to the FCC that Hannahs Mill is not a community for assignment purposes. Hannas Mill appeared in the 1980 U.S. Census, but did not make the 1990 census, and "has never been considered a separate community," according to a local sheriff. Radio Georgia, Inc., WTGA-FM 95.3 and AM, would feel the effects of competition in nearby Thomaston. Hannas Mill shows up in the 1992 Rand McNally "Road Atlas," but not on the official Georgia Department of Transportation road map, 1989-90.
- HI Poipu 95.9A, July 21-Aug. 20
- KY Radcliff 103.5C3 for A, WUOX
- LA Reserve—denied Lacombe Community Broadcasters reconsideration of FCC's substitution of 94.9C3 for A
- MN Faribault dismissed 107.5C2 bid
- NM Corrales \*95.1C1 for 95.1A, KSWA
- NM Los Alamos 107.5C, July 14-Aug. 13
- SC Branchville 105.1A, Aug. 4-Sept. 3
- SC Richmond Hill 105.3C3 from A, WRHQ
- SC Walterboro 93.7A from 105.3A, WONO
- TN Monterey dismissed 104.7A bid
- WI Lomira 94.9A for 106.7A, WFDL
- WI Sheboygan 93.7A for 97.7A, WWJR; dismissed WKTS' bid to allocate 93.7A to Sheboygan Falls

**Strife Tears Apart KUNM**

A long-standing dispute involving staff, volunteers and the University of New Mexico administration threatens to erupt anew at KUNM \*89.9. During rein of general manager Tim Singleton in 1987 a format change was implemented from freeform programming to jazz, NPR's *Performance Today* and an additional hour of *Morning Edition*. As a result, a group of listeners, the "Friends of Freeform," filed a lawsuit, alleging that changes were made just after a pledge drive. As well, several volunteers filed a separate \$6 million suit after they were suspended from the air. The lawsuit was later dropped when the university allowed the volunteers to return to the air and three hours of freeform were returned to the afternoon. Singleton resigned in 1989, with new manager Malcolm Gault-Williams jumping into the "snake pit."

After a brief cease-fire, Gault-Williams attempted to take control by ousting volunteers from two hours of daytime programming and adding WXPN's Philly's *World Cafe*. Members charged that Gault-Williams made no effort to achieve consensus and was running roughshod over the settlement agreement. Into the morass steps Provost Paul G. Risser, who has apparently fired Gault-Williams. All he would say is that an interim manager has been hired until the regents vote on a successor; Gault-Williams was on vacation and not available for comment. Risser wants the university to take more control, but rebellious staff and volunteers think otherwise—and promise to continue the fight. In the meantime, the station continues on the air, winning programming awards and breaking pledging records among listeners.

**FCC Sticks to 30 FM-AM Radio Ownership Rules, Despite NAB**

Despite grumbling from the NAB and Congress, FCC Mess Media Chief Roy Stewart says the new ownership rules will go into effect Aug. 1. The new rules will permit one owner up to 30 FM and 30 AM stations, while the NAB would have hoped for a national 25 station limit, except if it is a minority owner, the limit would be 30. It is possible the NAB will succeed in at least delaying the new rule until its petition can be heard.

**Small-Print Happenings and FM Industry News**

In band digital audio broadcasting (DAB) systems have yet to be demonstrated in the real world, but two show promise. Under the USA Digital/Acorn system, the digital system was observed, in closed-circuit test at the NAB, at 35-45 dB lower than the analog system, with no interference to the FM signal. The next test will be over-the-air when any effects of multipath should be noted. Strother/Lincom also demonstrated at the NAB convention, using a first-adjacent in-band system. The exciter was at 100.1 mhz and the digital signal at 100.35 mhz. This signal was said to be compatible with the

main channel but did spill into the 100.5 second-adjacent channel. For satellite use of DAB, the "U.S. lost heavily," at the World Administrative Radio Conference in Geneva, since it refused to go along with the 1.5 GHz band (along with India). "The U.S. public will be saddled with an inferior 2300-mhz service, if DAB is feasible at all at this frequency," charges Jeffrey Krauss, consultant, in *Communications Engineering and Design* magazine.

Getting fine crazy—the FCC: WEGX 106.1 Philadelphia \$5,000, KCNA 102.7 Cave Junction OR \$2,000 and WXLO 104.5 Fitchburg MA \$4,000—all for not notifying a person of the intended broadcast of a telephone conversation. WNEW-FM 102.7 New York may be fined because Ken Dashow's "Wake-Up Call" puts the caller on tape without his or her prior knowledge. The tape is later edited, and used only with permission. The FCC hard-nosedly said that a person cannot be put on the air without permission, even if it is on tape. Dashow sees no harm in the practice, and is starting a campaign to have listeners write in to the FCC and complain. Also fined: Ellwood Beach Broadcasting, Ltd. \$25,000 and dismissal of its application for violating FCC rules with intent to deceive. Ellwood failed to report that its proposed transmitter site was not available. Strange that a mere FM station applicant would be hit with such a fine. One would think dismissal of its application would be sufficient punishment. WMPR \*90.1 Jackson MS \$7,500 for carrying commercials. Here's the ad the FCC didn't like: "I'm Kerry Prishock. Together we can make a difference. WMPR is proud to welcome the Committee to Support Kerry Prishock for Chancery Clerk as an underwriter." WMPR has not replied to an inquiry of mine about this matter. WMXZ 95.7 New Orleans \$7,000 for a misleading contest in the summer of 1990. Winner was to have gotten \$100,000 worth of cars, but the winner actually got just one car, and it was not a \$100,000 Rolls Royce or Bentley. It was also fined for not airing legal IDs. Stoner Broadcasting got the fine reduced from \$8,750 because its legal ID omissions were "inadvertent and infrequent."

Remar Communications granted a waiver of the FCC one-to-a-market rule to buy KIDI 103.3 Albuquerque NM, which is also buying unbuil KBQE (TV). Also given a waiver is Paseo del Norte Broadcasting Corp. to buy KEZB-FM 93.9 and AM; it also owns KINT (TV-28), El Paso TX. Mid-State Television, licensee of WVNO 106.1 and AM Mansfield OH, granted waiver of rules to acquire WCOM (TV-68) there, despite objection from WNCO-FM 101.3 and AM Ashland OH. It rejected WNCO-FM's claim that the grant would reduce diversity, noting that WCOM had been off the air, and this grant might enable another media voice to return.

The FCC denied the appeal of Jeffrey C. Sigmon and Steven C. Stewart, former applicants for a new FM station in Kershaw SC (106.1), seeking refund of their hearing fees. Settlement agreement was filed after the "notice of appearance" deadline. Complicating matters was a third applicant, which did not indicate a willingness to settle; however, that applicant never filed its "notice of appearance" and withdraw from the case.

KOKS \*89.5 Poplar Bluff MO has its license renewal in hearing with the FCC. On air since Sept. 29, 1988, the stereo, Christian FM station, has been causing interference to neighbors' radios and TVs. An FCC investigation found that KOKS is causing FM blanketing, "a phenomenon whereby the strong signal from a nearby tower can completely overwhelm receivers in the FM and TV bands." Station was ordered to resolve all blanketing complaints, but after it failed to resolve many of the complaints, Jean Hillis and Doris Smith, Poplar Bluff residents, filed a petition to deny KOKS' license renewal. They included 900 petitions from other residents, and charged Calvary Educational Broadcasting Net-

work with misrepresenting facts to the FCC about the nature and extent of the interference problem. Paying more than a courtesy call to the station, the FCC found "numerous technical violations in the station's operation and inadequate efforts to resolve the interference complaints [and] found substantial material questions of fact remained regarding the licensee's operation of KOKS and its truthfulness and candor in dealing with the Commission" concerning the blanketing problem.

KNXR 97.5 Rochester MN may be the only FM station where you can hear the "John Doremus Show." Doremus, a former syndicator of easy listening, and one-time program director of WLOO 100.3 Chicago, retired in 1989. Only in his 50s, he is reputed to have Alzheimer's Disease. When KNXR found out that a collection of Doremus shows from the last 20 years was available, owner Tom Jones rented a U-Haul trailer, drove to Chicago and loaded up on seven-inch reel-to-reel taped song intros (music was on discs). Station has converted music and announcing to CDs. "KNXR has to have about the finest FM audio quality of any station in the United States," a blind engineer who used to work for MN Public Radio told me. Doremus did much voice recording of commercials in Chicago, but was "hard to get along with. He knew he was good and wanted things his way," according to my source.

The proposed \$3 million plus sale by the Board of Education of WNYE \*91.5 New York is being protested by several ethnic groups which program the monophonic station nights and weekends. Haitians, Greeks and Italians are included in the protests, and it also carries Syracuse University La Crosse (along with WAER \*88.3 Syracuse). No decision has been made as to which of the groups which applied to the Board might be favored. It is well known that WBAI \*99.5 New York would like to acquire 91.5, and then be able to sell its current frequency at a \$20 million or so profit. Economic rollerblading in public broadcasting is rough this summer in upstate NY, where WMHT-FM(\*89.1)-TV lays off four unnamed employees after suffering a 15 percent cut in state funding, amounting to a loss of \$194,078.

Creator of the legendary WABC (AM 770) top 40 sound, now largely carried over to WCBS-FM 101.1 New York, Rick Sklar, dies at 62 during minor foot surgery. NY personality

**RICK SKLAR**  
*Radio innovator.*

Dan Ingram said "He allowed the people on the air to be personalities and rise to their full potential. Most program directors are threatened by that. Today people play a laundry list of records and don't say anything. Rick recognized personalities."

It's not the old Rural Radio Network of NY state, but the Rural America Radio Network, based in Lincoln NE, in America's heartland. The one-year-old web claims 45 affiliates and in May distributed its first program, "Health Care in Rural America: a National Town Meeting." If the network is to have more than occasional one-time shows, it must gain more than the \$75,000 the CPB has chipped in and more affiliates.

On air: AM 4978, FM (92.1-107.9 mhz) 4662, FM (88.1-91.9 mhz) 1537, for an FM total as of May 31: 6199. With all the AM stations being deleted by the FCC, it might not be long before the FM commercial total eclipses the AM total.

"The most technically efficient machine ever created by human intelligence is the book. Television: What you see is what you get. Radio: What you see is what you imagine. Book: What you see is what you think. Multimedia is an ingenious technology for avoiding thought."

-Frank Romano.

From the classifieds: Station manager KZUM \*89.3, \$17,500 (negotiable). Resume to Search Committee, KZUM, 941 "O" Street, Lincoln NE 68508-3608.

"Help Wanted," is a small magazine of media jobs with single price \$10.95; maybe you can get a free sample. Most jobs do not list salary (only the KZUM job did—and that was also in "NFCB Community Radio News"). Call "Help Wanted" magazine at (800) 822-2003.

Full powered class C, 115 kw, midwest capital city for sale, \$1.5 million cash; (515) 274-6961. This has to be KDMI 97.3.

RCA BTF 3B 3kw FM transmitter working when yanked, \$350, Karen, KYKA, 1109 W. Chestnut, Yakima WA 98902.

**FM As It Was—OR MIGHT HAVE BEEN**

Here's some information as follow up to the reportings on WGHF, which I mentioned as being in Brookfield CT, 95.1. "Prior to that, WGHF was here in New York city with studios at 10 E. 40 St. For a while WGHF (101.9) was affiliated with the Rural Radio Network [and] owned by W. G. H. Finch," writes long-time FM listener Max Engel. "At one time during the '40s (I don't remember the exact year), WGHF was marketing a FAX attachment to an FM receiver, similar to SCA. It was the hope of Mr. Finch that people could receive their newspaper by radio." The information Max sent included a sheet describing the Rural Radio Network, with all the locations in use today, such as DeRuyter 105.1. There were some surprises. WVBN Turin 107.7 was located between Watertown and Rome, and the Ithaca station was WVFC 95.1. WVFC left the air in 1949, with WHCU-FM 97.3 becoming the Ithaca affiliate, and Bristol Center took over 95.1 (it had been on 101.9). Max sent a copy of a letter he received from Phyllis Guterman, program department, at RRN's Ithaca headquarters, dated June 28, 1948, mentioning their plans to do a printed program schedule. The network was on with uplifting programs for farmers from 6 a.m. to 9:15 p.m. Mon.-Sat. and from 8 a.m. Sundays. The schedule was designed for children, "minus the blood

and thunder," with weather reports from the high-altitude transmitter sites, and news analyses. "Recognized analysts who understand Northeastern agriculture will interpret the news in terms of what it means to farmers." By March, 1949, the network was heading into decline, with it giving up Sunday broadcasting and delaying sign on to 6:30 a.m. and sign off at 7:30 p.m. "Although some programs will be eliminated, none of the basic service programs—such as newscasts, weather and market reports—is affected by the change. The fundamental objective of the Rural Radio Network is to provide these services to farm people. Surveys and analyses of listener mail has demonstrated that the hours at which farm people want their services are 6:30-8 a.m., 12-1 p.m. and 6-7 p.m. Rural Radio Programs are concentrated in those hours." My only contact with the Rural Radio Network was in

with selected high-fidelity aural programs plus Finch Facsimile. 'Finch Facsimile' means: illustrated printed matter sent by radio to homes and there reproduced on rolls or sheets of sensitized paper, which can be read at leisure and kept for reference. The combined sound and printed facsimile programs of WGHF will include the finest in music, art, literature, science, illustrated news, sports, features and commentaries—besides printed and illustrated advertising." The WGHF transmitter was atop 10 E. 40th Street, "which for years was the original site of WNCN 104.3 and Muzak's WBFM 101.9. All this info is from 'The Journal of Frequency Modulation', March, 1946, later known as 'Frequency Modulation Business', a short-lived publication. . . WGHF 95.1 Brookfield CT went on the air June '57. There is no evidence Finch owned the station, but may have been associated with it."

**RURAL RADIO NETWORK** Also included was an ad for WDRG-FM 102.9 Hartford CT, mentioning its experimental call letters, W1-306 EAST STATE STREET • ITHACA, NEW YORK XPW, and PHONE 4-6357 TWX 43 showing its

1953, with George B. Holland, Jr., Controller, writing: "Your reception report for July 11, 1953, at 1:00 p.m. CST has been checked with the Rural Radio Network log of WHCU-FM, the Cornell University station, and found to be correct. . . We are forwarding your report, as well as a copy of this letter, to Michael R. Hanna, General Manager of the Cornell radio stations, for their report of reception file. We are not certain about your distance being the greatest for WHCU-FM. During the last few years, Rural Radio has been providing the major portion of the WHCU-FM programming, and during that time we have not seen a report from a greater distance."

Al Germond in Columbia MO also comments on Finch, who is believed to have died "just a few years ago." Finch manufactured FM transmitting antennas, and his WGHF advertised in March, 1946

**wghf**

as "hear, see and read WGHF 99.7 mc. This new FM station (now being equipment- and program-tested) will cover the quality high spots of greater New York

horizontal-only antenna atop Meriden Mountain. W1XPW was described in an earlier 1939 article as using an experimental FM system that was a "vast improvement" over present [AM] radio reception. The 1960 Motorola FM 900 car radio owner's guide and schematic were sent along. That set boasted a circuit with seven tubes and three transistors with automatic frequency control to lock in stations with minimum drift, and a 6" by 9" speaker. In the days before there was an "FM Atlas," owners were advised to check with the radio editor of the local paper. "In more populated parts of the country, it is possible to tune to a station in an approaching town. In a trip from New York to Boston, for instance, it is possible to maintain continuous reception by tuning in Hartford and Providence stations." I just played with the original radio in a 1965 Thunderbird. Its FM was very scratchy and stations had poor volume; I suspect this was a tube-transistor hybrid.

**FM FORUM—CONTRIBUTIONS FROM READERS**

Somebody sent a New York Times article on Jerry Johnson, 62, "The Bama," who does a blues program seated in a wheelchair at WPFW \*89.3 Washington DC. His audience, said to include many whites, enjoys the show 11 a.m. to 2 p.m. Saturdays. His show reflects his rural black roots.

WEVO \*89.1 Concord NH, which survived a battle with its audience and

agreed to give back much of its jazz and other non-classical music programs, is in a financial pinch, resulting in a freeze on travel, conferences, training and purchases of supplies. It was mentioned during a recent meeting that if every WEVO member became a day sponsor at \$120 the entire \$1 million budget would be covered—but apparently WEVO never thought of asking its audience to ante up such a large amount individually. That kind of thinking works in Christian radio, but public radio seems just too timid. . .

Thanks to John Herndon of the Austin TX Arizona Statesman and Julie Newberg of the Arizona Republic, Phoenix, for recent mentions of the new "FM Atlas." Herndon's column also mentions the success of a recent fund drive by KUT \*90.5 Austin, reaching its \$168,000 goal in less than the 10 days allocated for fundraising. Newberg's column also has news of two pay radio schemes for airline travelers. In-Flight Phone Corp. of Oakbrook Terrace IL is working on a system of digital broadcasting of 12 channels. A network of ground transmitters—presumably not FM but on some other VHF or UHF frequency—will send the signals upward. Some of the stations will have commercials. Delta Airlines is working with another company, Sky Radio in Arlington VA, for a satellite-delivered digital talk signal. One channel will be news; the other, sports. Reception will be via a motor-driven antenna to track the satellite while the plane is in motion.

Also favorably reviewing the Atlas were *Radio and Records*, *Popular Communications* and *Monitoring Times* magazines.

An FM Atlas reader, Bill Rogers, Florence AL, sent copies of petitions to deny two FM translators in AL. Rogers, a translator licensee himself, has asked the FCC to dismiss the application for a 107.1 translator of WZYP 104.3 Athens AL in Huntsville and Madison AL 103.5 for WHVK 93.3 Tullahoma TN. Rogers and his family operate three department stores. Rogers, 39, is authorized to bring into the area via translators WKDF 103.3 Nashville TN, as a public service. He filed for 103.7 in Huntsville for another WKDF translator, which conflicts with the WZYP application there for 107.1. He points out that new translators would serve no useful purpose for WHVK or WZYP, since the areas in question already receive good service from those stations. Athens Broadcasting Co. (ABC) "has long pursued a policy of jealously protecting its turf against unwanted competition. As long ago as 1985, when Mr. Rogers proposed to establish a translator at Killen AL, just barely within the WZYP 1 mv/m contour, ABC filed a petition to deny in an unsuccessful effort to block the establishment of that translator." Rogers points out that the WZYP and WHVK translators have a common ownership and he mentions the time brokerage agreement in force between the primary stations—something spotlighted in the intro-

## Rogers Tries to Import WKDF Nashville

ductory pages to the 14th edition "FM Atlas."

"Rogers suspects and alleges that the ABC and Tennessee Valley translator applications are simply part of a scheme to corner the market for translator frequencies in the Huntsville area. In early December, 1991, a petition drive was conducted in the Huntsville area and more than 3,500 signatures were obtained on a petition asking Rogers to establish a translator in Huntsville and import the signals of a true 'rock' station, i.e., the signal of station WKDF Nashville TN." Rogers has filed for a translator at Capshaw AL, but the WHVK application for a translator is only 91 meters from Rogers' proposed Capshaw translator "and the output frequency specified by Tennessee Valley is directly adjacent to the operating frequency of WKDF (103.3). Thus, the effect of the WHVK translator, if implemented, is to make it virtually impossible for Rogers to receive a clean signal from WKDF for rebroadcasting." Further, Rogers contends that an unauthorized transfer of WHVK has occurred, and that a full FCC investigation should be made. There was also no public notice of translator applications filed in the local newspaper. "This furnishes still another reason why both of these applications should be denied," Rogers' petition states. Both applications are "strike" applications, not intended to serve the public, but "rather to prevent somebody else from providing new service."

WHVK and WZYP reportedly filed their applications more than two weeks before Rogers, and Bill Dunnivant, "an opponent of Rogers' plan to bring in WKDF," denied he was filing for new translators simply to block Rogers' signals. An FCC official who was contacted, Tom English, said that unless Rogers and WHVK work out matters on their own, the FCC will have to act, but with a backlog of several hundred applications, "there would be no action on our part for some time," with predictions that it could take at least a year to get the issue resolved. Though WHVK and Dunnivant filed first, the FCC won't take that into account, said English. But one thing that helps WZYP and WHVK is that the translators they filed for would help improve reception in their "primary service contour." Ultimately, the FCC would require the applicants to prove the "need" to install the translators.

"I was in the main library in Manhattan (42nd St. and Fifth Avenue) and thought I'd see if they had any early editions of the FM Atlas, since the Queens library only has recent ones," said Jeannette Johnson. "The computer had five items listed under your name (see printout), FM Atlas from 1972 and 1973, also the 1980 edition, and your Ph.D. thesis! The first edition was at the 'annex', 43rd St. and 10th Avenue, so I went down there. Looking at it, I was thinking of that 'you've come a long way' ad and that was before I received the May

July, 1992

FMEDIA! where another reader had exactly the same comment! I used to be proud of having heard 110 FM stations from one location until I read that you heard 1000 (you must have used those antennas pictured on the back cover!). I noticed there was not one word about subcarriers and that the maps had a scale of miles, not kilometers. I couldn't borrow the books; they're reference only."

Richard Steinberger sent an article on the overpopulation of FM stations on Cape Cod. Most are not making money, some are in bankruptcy or in LMAs, but all remain on the air. "In the early '80s the Cape was recognized as a true FM market and FM was recognized as where you could make a lot of money," said Ed Perry, owner of WATD 95.9 Marshfield and WATB 103.9 South Yarmouth. He is also a consultant who has helped set up several educational and commercial stations in the past 20 years.

New Jersey's Bill Nienajadly speaks of stations that all sound the same. Recently joining that group is WJRZ 100.1 in Manahawkin, now "safe-dull-boring with 'safe' burned-out selections. Why did they change from a decent mass appeal station to another meaningless dull, lackluster, lame station? As it is, the FM dial around the Jersey Shore has WOBM, WFPG, WMGM, WJLK, WVLT, WJBR, WEAZ, WMGK, WMGQ, WLTW, WKSZ, WMXV and several others on Antique Modulation and now WJRZ all playing the same artists, same songs, same dull presentation. Radio has really become unlistenable. . . Is it any wonder that country music is on the rise? Listeners are beginning to be turned off by A/C and going to country. And, talking to others, they are just not listening to FM much, but are playing tapes in their cars. Can you blame them?" Another reader sent a piece about cable radio. Digital Cable Radio is one company offering CD-like quality with 19 formats, all quite distinct from each other. These include jazz, a kids' channel, hard rock, classical, one-a, country, gospel, contemporary Christian, oldies, love songs, but so far it's not available to motorists.

Walter Garrett tried to contact WMHK \*89.7 Columbia SC to find out if its W296AK \*107.1 Aiken SC is active, but nothing specific came. [Put \* next to its listing on the p. 26 map!] J. David Morrison, WMHK general manager, wrote: "We have an ongoing interest there on our part since before 1983 and an interest expressed by contributions from your community dating back almost as early. We continue to maintain funds on deposit designated for the Augusta translator project, probably enough to complete at least two-thirds of the project. In the short term, other translators already partially developed and other growth ventures in progress at WMHK are consuming our manpower resources."

Until August, Bruce F. Elving

*Symbols are as in the "FM Atlas"*

- AL Montgomery WLWI-FM 92.3 tC, 92 (adds WLWI AM 740 relay); retains tC, 67
- AL Phenix City WGSY 100.1 tX, 67; o[l]dies] main carrier
- MO Kansas City KLJC \*88.5 no SCS ("Roy couldn't get any subscribers for his tG")
- NJ Newark WBGO \*88.3 the 92 kHz "WRMN" Radio Pinoy translation (July, p. 4, col. 2) should be "all day, all night" (not "all day, every day") and "just for us" (not "just for you"); 67 kHz is ICN, Italian Communication Network. An Italian broadcaster, soon to be displaced from WIBF-FM 103.9 Jenkintown PA, has called and expressed an interest in TV-SAP receiving equipment for an UHF channel in Philadelphia.
- NY Binghamton WSKG-FM \*89.3 tS, 92, testing for relaying of news to its WSQC \*91.7 Oneonta NY (retains tT, 67)
- NY Garden City WDRE 92.7 no 67 (had Antena FM, now exclusively on WQHT 97.1's 67); retains tU, 67
- NY Lake Success WYNY 103.5 back to relaying WNEW 1130 but with "no off-mike activity heard," 67 kHz. Its 92 is "La Voz de la Gran Colombia," and unearthing the text from last month (p. 4, col. 2) which was covered by the

- logo: "at 83-04 Broadway, 3rd Floor, Elmhurst NY 11373; (718) 672-9494." [67 kHz is tS.]
- NY New York WFUV \*90.7 still tE, 67 (no 92), Mandarin. "As for the name of the company on WFUV's SCA, someone in charge told me 'I don't pass out that information for other than legitimate business reasons'. Well, excuse me! I didn't realize that SCA was in the 'top secret, classified' category!"
- WXRK 92.3 67 is Cantonese; different from WSKQ-FM's 92 (no 92 on WXRK). "When [I] asked WXRK's engineering department, they said 'uh... It's oriental... It's either Korean or Japanese.'" A few weeks later, "having figured out it was Chinese, I still wanted the name of the broadcasting company so I called again. After speaking to three different people, who said 'I don't know, but I'll connect you to someone who can help you', I was transferred to Infinity Broadcasting, who called back and said the SCA is Sino Broadcasting... I can't tell if this is Arthur Liu's company or not."
- WNYC-FM \*93.9 tS, 67, on with occasional audio. It relayed WNYC AM recently for about 10 days; now silent.
- OH Cleveland WCPN \*90.3 back on with tT, 67. "I am happy to report that the 67 kHz is fully active with programs for the blind."
- PA Philadelphia WRTI \*90.1 tE, 67 (was to have come on late July; nationality not specified); 92 is still tX, "Music 4," a "contemplated double sideband scheme," not receivable on normal SCS decoders. "Thanks for sending me the old WRTI program guide. You wondered how old it is. There is a reference to the next year being an election year, so I would guess it was published in the fall of 1959. The station has really come a long way since then!"
- PA Philadelphia WWDB 96.5 confirms its 41 kHz SCS is "on all the time for remote uses, except weekends when the main channel is stereo" and still tR, 67 (same as WUSL's 92)
- TX Snyder KSNY-FM 101.7 t(D) 57, X (slow speed data) 67
- TX Tyler KVNE \*89.5 tM,R
- ON Toronto listener: "The radio I ordered from you with the two Elf-3 SCA boards installed works like a charm. Found one station in Toronto with both 67 and 92 kHz subcarriers in use and the Niagara Frontier Radio Reading Service on the 67 kHz subcarrier of WMJQ FM in Buffalo. I am very happy with the unit and you can quote me on this if you wish."

**AM Happenings Most Likely Caused by FM**

AR Jacksonville KOKY 1500 FCC cancels CP, deletes calls  
 CA Yucca Valley KSES 1420 silent  
 IL Chicago WJPC 950 now "all rap"—the second such after KYOK Houston. "WJPC (formerly WGRT) was a popular soul music station during the '60s and '70s and featured such personalities as Tom Joyner and LaDonna Tittle. The station then nosedived in the ratings as urban-formatted WGCI-FM 107.5 rose to become the city's second-rated station. In recent years, WJPC simulcast its sister station, WJPC-FM (formerly WLNR) 106.3 in Lansing." Also in Chi-town, WKQX, now r, claims to be "female-based adult contemporary/rock," but a subscriber visiting the Publishing Estate from the area claimed the station is not at all successful in positioning itself to females—"just another rock station," which retains its "Q-101" moniker.  
 MS Magee WSJC 810 silent  
 NC Winston-Salem WSMX 1500 silent  
 SC Pageland WPSC 1510—FCC revokes its license after "repeated attempts to contact the licensee, Sandhill Broadcasting Company." It has been silent since Sept. 13, 1989.  
 AB Medley CHCL 1450 silent  
 BC Vancouver—"The trend of AM tuning shifting to FM continues. AM hours tuned are down by 9%, while FM hours tuned are up 5% from Fall ('91) to Spring," reports Mary Ann McKenzie, reporting in the Canadian magazine *Broadcast Technology*.  
 ON Lindsay CKLY 910 silent  
 ON Sault Ste. Marie CFYN 1050 and CKCY 920 give up ghosts; now only on FM (CHAS 100.5 and CJQM 104.3). In an LMA-type move, the first for Canada, CHAS and CJQM will operate from one studio.

**DABroadcasting, Digital Cable To Not Impact Over-the-Air FM?**

The investment banking firm of Veonis, Suhler and Associates studied digital audio broadcasting (DAB) and the various schemes of digital cable radio and found no significant impact on FM radio as we know it today. "Customers currently have digital audio music available in the home and automobile via compact disc technology," and there seems to be no further unsatisfied demand for more, according to the researchers. The existence of compact discs and digital cable might have satiated consumers, who would presumably not want to buy additional equipment "to duplicate what they already have," nor are they seen as eager to install special antennas, as in the case of satellite DAB.

Obviously taking a cue from the NAB, the firm found that satellite DAB would be hampered by lack of local programming. Even digital cable audio services were perceived as little threat to FM, finding that digital cable radio represents "only a modest increment to the fierce competition for in-home listening."

The National Association of Broadcasters, in a separate action, issued statements declaring itself pleased with the decision of Satellite CD Radio, Inc., to withdraw its application for an experimental DAB system, and with the National Radio System Committee's RBDS system for cars

which has been amended to include AM as well as FM. The NAB did not, however, endorse RBDS<sup>1</sup> format scanning feature or its list of format codes. The RBDS standards committee can ignore the NAB if it wishes, and its next move is a vote by the full NRSC committee.

### "Control Freaks" at Minnesota Public Radio = Unhappy Journalists

Two respected journalists heard on the monophonic news and information network of MN Public Radio have left: Karen Boros, 51, after getting a "brutal" job review from boss Loren Omoto. "I suppose," said Boros, "I could stick around and fight. . . But why bother? The summer's too short; life's too short." Boros is off to write a book and will do some freelance work for non-news divisions of MPR. Jim Neumann, 44, news director of WSCN-WSCD Duluth, quit after a decade at MPR. He was angry at so-called "control freaks" at MPR. "What MPR wants," said Neumann, "is a snapshot of Minnesota. In their view, that snapshot is the ring of suburbs, doting wife, two children and consumer power. MPR's snapshot of Minnesota doesn't have rural poverty or urban anger or environmental neglect." Neumann had become increasingly disenchanted with the relationship between MPR stations outstate and network headquarters in St. Paul. His disenchantment boiled over into quitting the day after he and his staff had filled the local airwaves with news of the recent chemical spill in Superior WI, which resulted in most of Duluth and nearby towns (including the south half of Esko [not the "Publishing Estate" area, which is northeast of Esko]) being evacuated while the railroad tank car which had plummetered off a bridge and ruptured in the Nemadji River was pumped out and removed. Early in the story, Neumann tried to talk with Omoto and his assistants in St. Paul. For hours, he claimed, they didn't return calls and didn't seem interested in the story, other than how it might affect tourism. The day after the spill, when his staff was exhausted, Kate Moos in Omoto's office, requested staffing from Neumann's crew. She was irritated when Neumann didn't immediately respond. "I wasn't properly obsequious to Omoto and Moos," said Neumann. The Duluth MPR stations have been advertising for Neumann's replacement.

### Small-Print Happenings and FM Industry News

FM radio interference too through appliances is a major problem in Oak Park MI where Bob Tilden's electronic door chimes spew radio broadcasts day and night. Jerry Novatsky's home, 1 km from the tower for WJZZ, WORS, WLTI and WDFX, has unwanted reception on his stereo and VCR, even when they're off. Eighteen neighbors are suing the tower's owners for \$180,000 in damages and a court order to force the tower and stations to tone down the noise and pay for a survey to see if residents are developing health problems. "These people are

living in a very dense radio frequency field," Nhoj Douglas, an audio consultant, said. "The whole plumbing network of the building is one big radio aerial." The FCC stated, in a case involving CB interference in ME, that it is overworked, and will act only when there are repeated complaints. All most people get is a form letter telling about installing filters. When filters won't help, expect no relief from the FCC. It is only in extreme circumstances that the FCC will issue a fine, and then the charged party has the opportunity to challenge the FCC.

Four MI FM and two AM stations fined by the FCC. Fines ranged from \$2000 (WKLO 94.5 Holland) to \$7,500 (WMAX AM) for apparently not hiring enough blacks. WFUR-FM 102.9 and AM were the only stations fined for not recruiting women. "When [William E.] Kuiper owned WKJR/WQWQ Muskegon, he refused to hire a woman for the job of station manager, even though the woman candidate was most qualified," writes Phil Boersma, a former WQWQ 101.7 employee. "His reason: he says the Bible prohibits 'women being in authority over men'. People like him should not own radio stations." Named but not fined: WWJQ/WJQK 99.3 Zeeland. Also fined: WLLR-FM 101.3 and AM East Moline \$12,500 for not being able to follow through on payments to a 1989 winner of Unidyne's Last Number Bonus Game. Even though the prize company went out of business, the FCC held that the station presented it as a station contest, and thus should have awarded the prize.

Not fetching a fine, but a reprimand—WLAB \*88.3 Fort Wayne IN—for promoting a music store during a remote broadcast. "The station was admonished, despite assurances that the station received no direct remuneration from the record store."

KMEL 106.1 San Francisco fined \$25,000 for "indecent material" broadcast during p.m. hours various dates from Aug. 20 and Sept. 16, 1991. The ruling, against Century Broadcasting, was announced shortly after Century's sale of KMEL to Evergreen Media, which also is on the FCC hit list for broadcasting obscenity. KMEL's broadcasts, the FCC asserted, "aired at times when there was a reasonable risk that children may have been in the audience."

It was smooth sailing through the FCC—the transfer of KSOE \*91.1 Wichita to New Life Fellowship. The station is now KZZD, whose transfer was opposed by Friends of KSOE, who had charged that the Rev. David Brace of New Life misrepresented its ability to finance the \$205,000 KSOE purchase, along with paying \$1.05 million for KSPG and KBUZ 99.1 El Dorado KS. Brace claimed to have "financing in place." Although New Life has taken over KZZD, it appears that Friends of KSOE will continue the opposition. It has asked the full Commission to establish limits on how many stations a noncommercial entity can control in one market. "The petitioners don't say what the limit should be, but they note that letting Brace and New Life have four FMs and one AM (if all of their applications are granted) in the Wichita area is too much."

Arson destroyed the studios of WSOS 105.5 [to go to 94.1C3] St. Augustine FL shortly before 8:10 p.m. June 23 when a neighbor spotted the blaze that took firefighters 30 minutes to put out. Fire detectives believed the station's recent switch to a satellite "fm" format may have been the motive for setting the fire. The station returned the next night from the transmitter site.

The FCC has modified its "hard look" approach to FM station applications. Now stations have a 30 day period after the close of a filing window to amend an application and another 30 days to correct any mistakes in the application, which the FCC may point out to them. Two applicants that were hit by the "hard look" stance of the FCC were Pike Family Broadcasting for Rancho Mirage CA 99.5 and the

Morris for 95.3C2 (KZTT) at Central NM. Both Pike's and Morris's bids was denied because they did not timely comply with the power and antenna height limitations set forth in a treaty with Mexico. Morris cited another apparently similar case (Ludlow CA 105.7, KDUQ) where the applications were accepted for filing and claimed that a clear notice as to how the Commission would treat applicants requesting international coordination for a higher station class was not provided until May 30, 1991, when the FCC released the FM Class A and C3 Reconsideration Order. In denying Morris, the FCC said that allotments occurred in by Mexico are separate and distinct from its kilometerage separations requirements. "Therefore, Morris' claim of satisfying Class C mileage separations did not excuse its non-compliance with the antenna height and power limitations specified for the existing international Class B allotment for which it sought a station assignment [and] the Commission reiterated that a 'hard look' waiver will not be granted where other applicants for the same allotment have timely complied with the acceptability criteria. Moreover, the Commission is without authority to waive the provisions of an international agreement." The FCC said that Ludlow involved a "comprehensive settlement agreement. Morris was not involved in such an agreement and the other applicants for the same allotment as Morris complied with the Agreement [with Mexico]."

An analysis of what constitutes a "market" was sent by the MN Broadcasters Association, conducted by Greg P. Skall and John Garziglia of Pepper and Corazzini of Washington DC. This has relevance to the new rules, which the FCC is expected to allow, with markets having fewer than 15 stations where one owner can have 3 stations, a maximum of two being FM. For markets of 15 to 29 stations one owner can have 2 AMs and 2 FMs. For markets of 30 to 39 stations one owner can have 3 AMs and 2 FMs, and for markets of 40 or more stations one owner can have 3 AMs and 3 FMs. For counting stations in a "market" only commercial stations count—and only those having "principal city contours." The rules become quite complicated as to when stations in outlying areas that enjoy some coverage in the market are counted. For a copy of the notice send \$1 to help defray copying and postage expense.

Howard Stern, notorious morning person on WXRK 92.3 New York, and a major factor in Philly and L.A., isn't cutting it on TV. WWOR (TV) is dumping him and his show, citing "budgetary concerns" and "an inability to distribute the show widely to other stations."

Sports and classical music coexisting? They're trying it in Washington DC. Because of the poor nighttime coverage of WTEM 570 AM, the Washington Redskins games will be simulcast on sister station WGMS 103.5, usurping the c. Now if WGMS would use an SCS for sports and promote same to the public. . .

From the classifieds: New 6 kw FM transmitters for under \$18,000. Bill Hoffman, 518-583-9490.

AM-FM CP in central MI with real estate, \$350,000. L. Henley, WDAK, Box 95, Opelika AL; (205) 705-0368.

Magnum/Dynalab FT-101 tuner made in Canada with FM-SCS modification and selectivity modification, \$425 plus \$8 shipping. B. Elving, Box 336, Esko MN 55733.

SCA decoder, high quality micro-miniature 67 or 92 kHz, prewired and ready to install, with squelch circuit, \$15. D. Jackway, 5742 Fair Oak, Springfield MO 65810. Reminds me that I owe Jackway for a bunch of adapters he sent.

### FM As It Was—OR MIGHT HAVE BEEN

Charles E. Fitch supplies some historical information from Baltimore, where he saw an unusual transmitter for WCAO-FM 102.7. "I passed the transmitter site

nearly every day on my way to and from Loyola while in school. However, I was only allowed an inside tour once while a freshman in 1961. The transmitters were arranged in the customary inverted 'U' fashion with the main rig, a Westinghouse 5 kw I believe on the left, as it replaced what I was told was the original main, now standby, RCA 5 kw which was directly ahead of a centralized operator's console. Racks with associated equipment and the phasor were shoehorned in between this equipment.

"On the right was an extraordinary transmitter which is really the reason I'm writing to you [as well as Popular Communications]. WCAO was a technically aggressive station as well as an aggressive programmer. Not only did they seriously go into FM early on but stayed in it for the long haul. The transmitter on the right was a 5 kw FM Westinghouse of an extremely exceptional design. Most AM and FM transmitters tend to be tall, broad and deep multi-cabinet affairs for space, cooling and maintenance purposes. This rig had a 'low boy' design with the top of the unit coming to just above waist height. The large, clocklike meters were tilted at a 45 degree angle along the front top for exceptional viewing. Essentially, this unit had three large, coffin-like cabinets. These were a self-contained exciter and 1 kw IPA (really a complete transmitter), an equal size and style final power supply and a 5 kw final amplifier from left to right. The tubes were placed in the lower front in each cabinet behind glass for observation while operating.

"In my lifetime of travel as a broadcast consultant engineer I have only seen two examples of this rig. The transmitter at WCAO and a 1 kw unit at WCBM-FM (106.5) both in Baltimore. At the time of the tour, this unit really caught my imagination as it was just so different from the usual concept. Seeing this site was one of a handful of experiences that sent me into my present work. This FM transmitter, via coax, fed a 5 or 6 bay horizontal only antenna mounted on one of the back towers for 20 kw ERP. WCAO-FM for many years simulcast the AM so that it was one of the first FM rockers in the country. It had fantastic fi and many of the young technocrats in Baltimore (like myself) would prefer the FM feed. When the limited simulcast rule came in, WCAO-FM was one of the first to automate with the revolutionary IGM classical tape service. This was the grandfather of the present satellite radio network operating concept.

"The operating engineers did not have much time to spend with me the day of my tour as they were working on the telephone lines from the studio. During the '60s, FCC technical standards for all stations were probably the most demanding ever. Plants were considered systematically. Audio performance specs were for the total system starting with the furthest microphone input through the antenna system. Obviously, noise contributed by the audio mixer amplifiers and the phone line circuits was a lot easier to attenuate than transmitter noise. That was what they were working on diligently that day with the phone company, substituting circuits and amps for lowest noise.

"Not only was the station technically extraordinary, but it also attracted some substantial technical and creative talent. Most notable in the latter category was a disc jockey who worked at the station in the mid '60s. Singlehandedly he brought to the station a 'with it' and very trendy reputation (and substantial ratings) in both the music areas and just plain style. Twenty-five years later Kerby Scott (Kerby Confer) now owns a group of radio stations of equal stature to what WCAO was. His group, Keymarket Communications, is one of the most significant and progressive radio operators in the country." Fitch says he has lately been moving a number of AM stations to cheaper land, as well as diplex work whereby many AM stations can be accommodated on one tower. "Land expenses are one of the highest factors in the delivery costs per hour for an AM station. One site allows for divisional costs." Finally, he says, "If you or any of your readers have information about the WCAO-FM rig, such as an instruction book or pictures, I would really like to see them." Contact Fitch at 45 Sarah Drive, Avon CT 06001.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Continuing from the letter of J. David Morrison of WMHK \*89.7 Columbia SC, explaining their lack of progress in putting certain of their translators on the air--"In the long term, probably about a year to 18 months from now, we will likely turn our focus entirely to the translator proposals that have not yet been put on the air. The totally new projects for which we have received substantial funding are Augusta GA and Andrews SC. . . The Augusta translator project cannot be completed until substantial engineering studies to address the new technical environment are finished." He mentions the tedious process of putting a translator on the air, and the fact that each translator required over five years for its successful completion.

Jim Duncan's new, "Radio in the United States: 1976 to 1992 A Statistical History," with ratings trends and market revenue figures, is out: \$125 per copy from PO Box 90284, Indianapolis IN 46290. "This is absolutely my favorite publication. It is the culmination of all the work I have done. You will keep it on your shelf and refer to it for years," says Duncan.

Glenn Gutmacher, executive director, National Association of College Broadcasters: "Regarding FM Forum in the May issue, you referred to NJ state rep John Weingart's folk show on WPRB 103.3 Princeton by saying '[a]lthough the station is commercial, he's unpaid for his stint there.' Don't make WPRB seem cheap: you're only telling half the story. WPRB is licensed to Princeton University and, as in college radio generally, is mostly student-staffed and treated as an extracurricular activity. In addition, like most of their college-commercial counterparts (only about 20 broadcast FMs of this type exist), their advertising income is not comparable to a professionally-staffed commercial station. College radio is more oriented towards broadcasting diverse programming not offered elsewhere, thus it is well known at these stations up front that on-air positions are not paid. It is the privilege of being able to share material in unique program genres without a professional PD's strict oversight that volunteers such as Mr. Weingart come to stations like WPRB." [And I even know some commercial stations that use unpaid help--such as those volunteering to do small town ethnic programs on weekends--b.e.]

Glenn Hauser comments about the new KDEM 94.3 Deming and KSCQ 94.5 Silver City NM. "The Deming 94.3/Silver City 94.5 situation is absurd. Distance may be legal for adjacent channel, but two neighboring towns with much in common, including media advertising, are in odd situation of being unable to hear the other town's station." Glenn's program, World of Radio is highly recommended. Tune it in on shortwave, times given are Central Daylight (Eastern Standard). Friday 4:15 p.m. 15690 kHz, Sat. 7 p.m. 7355, 10:05 p.m. 7435, Sunday 3:30 p.m. 15420, Sunday 5 a.m. 15690 and Monday 3:45 p.m. 15690. "As for the FM Atlas, I beg you to re-configure Texas to get rid of the inserts--it's simply unusable currently," he writes. "Not only insets, but overlapping insets. It would be worth taking six pages for it if necessary, and waste a little white space like you easily do with so many other states. Like road maps, by inseting ONLY the western wing OR the panhandle, it could still be done efficiently. . . I walked around Juarez and dropped in at a number of FM stations, but it was siesta time and most management was away. Many of them are using towers atop downtown buildings, accounting for bad coverage,

none very high off ground; shudder to consider the RF dangers. There are, of course, mountains to the south of the city, and some radio towers are visible there; I assume most of the TV stations at least are up there, though their coverages don't compare to El Paso stations, either. . . . Wish you would devote some space to running lists of stations carrying particular programs, e.g. Harry Shearer's public radio show out of L.A., which I've never found anywhere in NM/OK. Riders Radio Theatre can't get in OK unless I find out which Tulsa station it is on, if any, since leaving KWGS. Shickele Mix has turned up on KCSC [Edmond OK], glad to note. Missed Dr. Demento for some months [while living] in Las Cruces, not finding it anywhere late Saturday or Sunday nite, until happened to see newspaper ad for it on KASK 103.1 Sundays 5-7 p.m. It is also on 1340 AM in Santa Rosa Saturday or Sunday afternoon; Demento expects us to pay 900 phone toll to find out station he is on."

The M Street Corporation came through with a copy of their attractive, 1992-93, "M Street Radio Directory." The usual FM and AM station listings are surrounded by essays by Steve Apel, Gregg P. Skall, Sean Ross, and Greg Monti. Plus it has ratings, including the soon-to-disappear Birch reports, and a great alphabetical listing by call letters. Alas, it does not mention which FM stations have stereo, and not all the addresses are there. I tried to find out John Wagner's new address at KZSR [92.9] Reno; it's not there, and the post office returns mail, "insufficient address." An interesting feature is the listing of former station call letters, which has another year added to it—from 1989. As the list gets older that section of the book should prove more and more interesting. Order the 690+ pp. "M Street Radio Directory" at \$32.95 + \$3 shipping from M Street, 304 Park Ave. S., Floor 7, New York NY 10010, or get the directory and a one-year subscription to the "M Street Journal" for \$99 total.

Mark Humphrey at the WRTI stations sends along the latest program guide, "Tempo," with an article about the FM Atlas and other radio publications. With the impending sale of WIBF-FM 103.9 and its rumored going to stereo and acid rock, the ethnic broadcasters are clamoring to get on SCS or SAP; two have contacted me about receivers, and WRTI appears to be the beneficiary of one on its 67. "The construction permit for WRTQ \*88.1 in Harrisburg is being transferred to the University of Pennsylvania (WXPN), which will use it as a repeater. I recall that you asked about this last year. We will retain the call letters, which will probably be reassigned to our pending Ocean City NJ construction permit for \*91.3, which we expect to be granted later this summer. New Jersey Public Broadcasting Authority

has agreed to withdraw their application for 91.3 in Vineland, which was mutually exclusive with ours." Mentioned in the WRTI guide are *Radio on Wheels*, \$8.95 for east OR west U.S. editions from Berkley Books, 200 Madison Ave., NY NY 10016; *WHIMPUR Map* (Where Is My Public Radio) by Margarie Lee, "a large map of the U.S. showing call letters, frequency, location and estimated coverage of NPR affiliates," price not given, from PO Box 11354 Memphis TN 38111; the old, but maybe not yet out of print *Go Public! The Traveler's Guide to Non-Commercial Radio* by Natalie McClendon; and *The Travelers Radio Guide* by Jess Gregory, an East Coast strip map listing about 500 FM and AM stations along I-95, \$4.95 plus \$1.50 shipping from Roadway Radio Guides, PO Box 2292, Westfield NJ 07091-2292.

WJPZ \*89.1 Syracuse in June received a letter (no fine) from the FCC admonishing it for being "too commercial"; text of the letter to be sent by a subscriber. Another noncommercial station that is known to run commercials is KMOJ \*89.9 Minneapolis. Kent Peterson sent a tape, saying "They have been airing what I feel are full-fledged commercials; and I thought you would find an aircheck interesting." The tape included spots for Gladiator (concert), Smokehouse Bar-B-Q, a party, Golden Limo Service, Hammer Concert, KMOJ DJs for rent, Minnesota Lottery and Big Night at the Orpheum.

Thomas L. Newcomb, Ph.D., presides over "The Grand River Radio Network." The what? "Yes, we are legitimate," he contends. "We are a nonprofit educational association registered with the State of Ohio and with the IRS. Newly formed and still building, we are not on the air yet. We are experimenting with low power alternatives for localized public broadcasting." I doubt they aren't really on the air. Pirates perhaps? "We are experimenting with mini-repeater AM transmitters, negotiating with two cable systems for cable FM, and possible dropping in an FM signal over an LPTV system. My partner is a semi-professional musician and businessman. I am a career educator, although I had four years experience at a college AM station several years ago. We have enjoyed your FM Atlas as a good reference book. We hope to have some experimental work going by the end of 1992." The stations are "WMPO" Mesopotamia and "WPKN" Parkman OH. "At this time we are still searching for the best frequencies on the AM and FM dial. Most likely we will be found at the same dial locations in both towns. We will announce our hours of operation and FM and AM frequencies in a later newsletter. . . . GRRN will not need FCC licenses at this time; however, we will fully follow all FCC guidelines under Part 15 FCC rules for low power broadcasting. Public comment and input is welcome. We

have no phone service specifically for GRRN, but you are welcome to write to us. We have been very encouraged by all the interest that is being shown to us for the establishment of GRRN." For more information contact Dr. Newcomb or Brian Milgate at 19130 Nelson-Parkman Road, Garrettsville OH 44231.

Following up on earlier references to the Toronto 99.1 spot given up by the CKO network, K. W. Walter sent a story about the continuing battle for the frequency, involving CFMX, CJEZ and Rwlco 92.5—all wanting 99.1 to upgrade. "No decision is expected on the disposition of 99.1 for several months," although 2600 letters were received at the CRTC, more than 2,000 of them from people supporting CFMX's bid to spray a better classical signal around town.

WDRE 92.7 Garden City NY, which recently lost its 67 kHz Greek "Antena FM," reports having another group interested in its 92, which would displace its telemetry. "WDRE is a directional FM station. We protect a cochannel in Middletown NY and two second adjacent channels in New York city. I have two applications sitting in front of the Commission, waiting, and waiting, and waiting for some type of decision. The first is for a slight reorientation of my directional pattern. I don't have much hope for this one, though. We would be increasing our power towards our two second adjacent short spacings--WXRK and WPAT-FM. As I'm sure you know, they got a lot of money, to pay a lot of lawyers, to bust my chops.

"The second application, filed in February of 1990, is for a power increase as per Docket 88-375. On this, we would change the pattern altogether. We would continue to protect our short spacings, and punch out double the power towards the east. You guessed it, WXRK and WPAT-FM are trying to block us on this as well. So we sit and wait. I hope this did not bore you too much. I know I always appreciate a good FCC application story; I'm sure you get a million of them. Thanks for the good work, and the great publication," writes John W. Caracciolo, chief engineer. "I can't tell you how much I use it. I would be lost without it. Keep an eye out for Jarad Broadcasting. We are a very young radio company, and we plan on making some moves soon."

Another broadcaster who writes in is Frank Martin, Mars 103.1 in the L.A. area: "One of the themes of 'FMusings' has been the effective decrease in public service that results from satellite and other kinds of networks, LMAs and other shared programming arrangements. You have a point. The situation with KSRF and KOCM, however, was simply untenable. It is a mystery to me how the two stations were ever allocated so close to each other on the same channel (103.1). They are the closest spaced

**MARS  
103.1<sup>FM</sup>**

co-channel facilities in North America. As a result, the two stations only served a small area and interfered with each

other over most of the Los Angeles basin. Using TFT's FM Booster System seemed the most viable thing to do to increase useful listening area, although we would rather just be one station in between the two sites we operate now. A great number of FCC waivers would be needed to achieve that goal. Meanwhile, we will try to compete with what we can get without too many waivers from the FCC. Be on the lookout for KSRF ERP to be granted a CP for 4.5 kw and KOCM to become 3.3 kw, the most that a Class A in Los Angeles can hope for. Three translators are in the works. Actually, two KSRF applications are for on-frequency boosters, a KOCM translator is requested from the Commission by an operator in Riverside CA to use 98.3, a frequency that became available when a CP in Yucaipa expired when it was never built. Because of our small Class A coverage area, we operate no SCAs, but do have a 67 kHz 'Sidekick' generator around for experiments. Hope you are able to sell your Magnum-Dynalab tuner. For difficult reception cases, we've been using the Onkyo T-9090, specifically to feed a cable head end. The translator operator in Riverside will be looking for something at least as good as the Onkyo for his feed. Thanks, as always, for the Atlas."

I just had a crew over to install a 42' tower with a rotating yagi FM antenna on top, and it gets tremendous reception--especially from the formerly poor directions of N, W and SE. This makes three outdoor FM antenna installations at the Publishing Estate for simultaneous reception or Part 15 transmitting. Now I get a clipping from Alex Nardacci saying all that stuff might not be necessary. Two GA Tech inventors have developed a "small and inexpensive broadband antenna" that they say is less expensive and more versatile than existing antennas. Their device is called a spiral-mode microstrip antenna, and said to cover a broad frequency range. It is only 2½ cm thick and about as wide as your hand, and expected to work in cars, molded to a surface or plastered onto a wall.

Bill Nienajadly sent an article on Howard Stern attacking John DeBella of WMMR 93.3 Philadelphia. Howard's show originates on WXRK 92.3 New York and relayed on WYSP 94.1. Stern staged a rally by 5000 of his listeners outside WMMR's studios to celebrate his victory in the ratings over DeBella and to mock DeBella's pending divorce. "It's all kinda foolish," DeBella said. "Lots of people go through a divorce. But, until you go through it yourself, you can't imagine what a stressful and painful process it is. . . . When Johnny Carson makes fun of his divorces, maybe

it's okay. But when it comes from a third party, it's not funny. Howard goes up against some 250 stations in the cities that air his program, but I seem to be his only target on a regular basis. To stoop this low, and to make material out of me must mean I'm a threat to him. He also pokes fun at my losing my hair. That doesn't bother me. I even did a song parody, 'I'm Bald', in response to one of the parodies from his show, 'He's Bald'. "About the possibility of regaining the No. 1 lead from Stern, DeBella said, "In this business, anything can happen. Stern is certainly on a roll, but these things are cyclical. No one stays No. 1 forever." At the Philly rally, Stern showed up dressed as a gladiator, as did three of his sidekicks, while Robin Quivers showed up as Cleopatra and Gary Dell'A-bate was a chimp. DeBella denied that during his show he stuck his head out the window to shout at Stern. A similar rally is being planned in Los Angeles, where Stern competes against such deejays as Mark and Brian, Rick Dees and Jay Thomas. "After we're No. 1, we'll be partying in the streets of California," said Stern. Nienajadly sent a piece, "What Call Letters Mean":

Mike Collins in CT says "for several years I have been attempting to write a book on the history of modern radio, and have taken 500 pages of notes so far. In 1988 I left Associated Press after 15 years to operate WSNB AM Torrington CT. In March I and my friend Jerry Wiese became the two key day-to-day operators at WZBG 97.3 Litchfield, the station of Susan Saint James and Dick Ebersol. We will get 20 percent ownership without having to invest money." Saint James, by the way, is co-star of the former CBS sitcom "Kate & Allie," and she's married to Ebersol, who is president of NBC Sports. Putting the station on the air required three years of

**FM 97.3 WZBG**

49 Commons Drive • Box 1497 • Litchfield, Connecticut 06759

planning and financing. WZBG is the only FM station in Litchfield County, and it covers northwest Connecticut.

"Born in 1947," continues Collins, "I missed FM's 'false start' of the late 1940s, which must've been interesting in Stratford CT where I grew up. Within range of the NYC/Newark and CT stations I would have heard these stations (all deleted by 1957, when I got FM): KE2XCC (WFMN) 93.1 Alpine NJ, WAVZ-FM 95.1 New Haven, WGCH 95.9 Greenwich CT, WGYN 97.9 NYC, WNLC-FM 99.5 New London CT, WMGM-FM 100.3 NYC, WBIB 100.7 New Haven, WNJR-FM 102.7 Newark, WFHA 103.7 New Britain CT (Rural Radio Network), WFDR 104.3 NYC (ILGWU), WTHT-FM 106.1 Hartford and WELI-FM 107.9 New Haven. Starting in 1957 . . . stations in this area started coming on, and to my knowledge, not a single commercial station that began from 1957 on, or which survived to this point, was subsequently deleted. While I am familiar with some of what these FM stations were programming, I don't know if any NYC, New Haven or Hartford FMs had transit radio." [From articles I read on transit radio, I do not recall its being in those markets--b.e.]

In the same neighborhood as WZBG is WMHT-FM \*89.1 Schenectady, which is experiencing problems finding a manager, with the candidate they wanted withdrawing from the race, because of money problems at the station. James Delmonico has been filling in on an interim basis, commuting from Syracuse two days a week. WMHT came up a little short on its June fund drive. It had set a \$55,000 goal but revised figures gave it only \$52,880, while the competing WAMC stations raised \$250,000 in six days, exceeding the previous record of \$200,000.

Al Germond mentions that GE is discontinuing the Superadio II, but it is being replaced by the Superadio III this month--a model sporting a more black front and an AM narrow-wide switch, though lacking coverage of the expanded 1600-1700 AM band. "Let me state unequivocally that the Superadio II is without doubt the finest AM-FM portable ever produced in the general entertainment class of set. Of course, there are sophisticated battery-operated communications sets (but surprise, the GE runs circles around the multi-hundred dollar Sony all-wave units!). And some discounters were offering the GE for under \$45. The AM section in the GE is almost as sensitive as a \$2000 lab-grade field intensity meter used by AM station engineers for critical measurements. . . . Let's sound off on the atrocious quality of radios for sale in all the stores today. Go to Wal-Mart, Target, etc. and try 'em out. Look for the big names and see how they've slipped. The Japanese who have been so hyper-elevated in our minds for 'quality' are sending us junk."

Until September. *Bruce Elving*

## Call Letters Assigned or Changed

AK Dillingham 99.1 KPVV  
 AZ Phoenix \*89.5 KBAQ  
 AR Springdale 104.9 KBEV (KCIZ), k, "The Beaver." KBEV and KQXK AM enter LMA with KEZA 107.9 Fayetteville.  
 CA Lake Arrowhead 103.9 KCKC-FM (KBON), k; AM is in San Bernardino, with which the FM identifies. Bought by All-Pro Broadcasting of L.A., owner of KACE Inglewood. There's speculation both of the 103.9 stations will simulcast, with KACE expected to drop the "Quiet Storm" slogan.  
 CA Long Beach 97.9 KLAX "FM" (KSKQ-FM), still Spanish, but now rancheras (S, k)  
 CA Modesto 103.3 KATN (KBEE), k, "Cat"  
 CO Aspen 107.1 KPWW  
 CO Pueblo 100.7 KGFT (KATM), g  
 FL Baldwin 105.7 WUFC  
 GA Cordele 98.3 WKKN (WFAV)  
 GA Macon 92.3 WMKS (WVPI), k, "Kissin"  
 HI Hilo 100.3 KHVI (KIPA-FM) 95.9 KPVV  
 ID Idaho Falls 105.5 KPVT  
 IA Clarion 96.9 KIAQ (KRIT), k, "Double Country"  
 KS Olathe 92.3 KCCV-FM (KQRC), AM is in Overland Park, to be g  
 MI Detroit 99.5 KOWF (WDFX)  
 MI Menominee 103.9 WHYB (WCJL-FM)  
 MI Muskegon Heights 101.7 WMRR (WQWQ, which is now 1520 AM with a b format, and not involved in an LMA), rp. Has an LMA with WSNX-FM 104.5 Muskegon. "Format was evolving, played almost anything while DJs being hired—used students and 'guest DJs' to play whatever they wanted and simulcast WSNX-FM overnights, all other times sounded like a high school FMI" Format seems to have stabilized as "Muskegon's Rock and Roll," but always mentioned with call letters.  
 MO Jefferson City \*88.9 KJLU (KLUM), j  
 MT Great Falls 106.1 KQDI "FM" (KQDI-FM; AM gets new calls)

**Stereo—Or to be Stereo**

CA Los Angeles KKLA 99.5 confirmed stereo, even though it largely shifted to a religious talk format. "Yes, they have music—a beautiful program of spirituals at night." Its SCS is Mandarin at 67 ("sounds religious," like the main channel); Cantonese 92 kHz. Main channel's talk is "friendly counseling, all very low pressure, 'reasonable' type. No ranting, raving, shouting, pulpit pounding, fiery delivery. Very low-key, conversational, friendly tone."  
 CT Litchfield WZBG 97.3  
 IA Harlan KNOD 105.3, embraces \$ as it moves from 105.5 [Dry Ridge  
 KY Williamstown WNKR 106.5, ID with/  
 MI Grand Rapids WFGR 98.7, c. "Tapes are from KDFC San Francisco, I believe." They are digital audio tapes, rather than cassette or compact disc. It shares a tower with WLHT 95.7, and will have a local studio and staff, "as opposed to WVGR [\*104.1] / WUOM, which has no Grand Rapids staff or studio."  
 MO Warrenton KFV 99.9, ID as "KFV," Warrenton, St. Charles, St. Peters," said "real quick and soft between spots at five minutes before the hour. Warrenton is a rural town, population 3300... St. Charles and St. Peters are in very fast-growing populated areas that have become the northwestern suburbs of St. Louis in recent years."

**On Air (Selected)**

AL Capshaw W251AC 98.1  
 AK Haines KHNS \*102.3 "good in Skagway with  
 the usual whining for funds. Note in the  
 Skagway paper said some businesses in town  
 weren't satisfied with the station and weren't  
 going to send in a contribution."  
 AK Kachemak City translators as noted. "I think  
 Kachemak City is another phoney town. Not  
 ever found or seen on maps. The NPR AM  
 890 was deleting two fulltime staff positions

and putting the music director on part time  
 and noted they had to drop one of the NPR  
 program packages due to funding. . ."  
 AK Skagway K220BK \*91.9. "There is an AM on  
 690 relaying the Juneau 800 AM. This station  
 was also on in 1967 when I was there, but I've  
 never seen any listing for it."  
 AK Valdez K220AD \*91.9, "but I think they  
 gave other 'W' calls than WMBI-FM [WJSO  
 90.1 Pikeville KY?]. Also, I think the  
 antenna is behind a house about a dozen  
 blocks from the main center of town. The  
 local public station, KCHU \*770 announced  
 they could also be heard on \*88.1 Cordova  
 and \*88.3 Whittier."  
 IA Council Bluffs KIWR \*89.7—Iowa Western  
 Community College agrees to keep it on the  
 air through the end of the year, allowing more  
 time for it to collect enough money to  
 operate. "IWCC dropped KIWR from their  
 budget for next year, and originally told the  
 station to be off by the end of June unless  
 they could come up with some money. In  
 response, KIWR has had many fund raisers.  
 Even their bumper stickers cost \$5 each!  
 There was a good response from the public, so  
 IWCC gave them an extra six months."  
 KS Great Bend KHCT \*90.9 with \$[tereo]  
 MO Kirksville—"all three FM translators are on.  
 K210AU and K220CN are both stereo. I  
 don't think K214AE (WMBI-FM's) has  
 stereo."  
 NY Endicott W227AB \*93.1  
 NY Rensselaer WQBK-FM 103.9 now on with  
 6000 h.v, and after a \$50,000 investment, as  
 well as increasing its studio/office space 2½  
 times  
 PA Catawissa W219- \*91.7 [107.1  
 PA Scranton WEZX 106.9, having moved from/  
 TN Nashville (downtown area) a mysterious  
 relayer of WAMB 1160 on 99.3 FM. It is not  
 W257AR Donelson. It relays the AM, because  
 it is on when WAMB-FM1 106.7 is off the  
 air—and seems to be running about 5 watts.  
 TX Mirando City KZZQ 100.5, but testing only  
 (a new CP; never operated on 100.9)

**AM Happenings Most Likely Caused by FM**

CA Thousand Palms KPSP 1010, which had a classical music format, silent. "Its FM, KZAL 105.5 Desert Center CA, remains on the air, but the combo is for sale for \$1.9 million."  
 DC area—WMET 1150 Gaithersburg MD has settled with SMNews, which had a \$446,000 judgment against the station, and which had seized "much of the contents of the office," and was threatening to seize the transmitter. Details of settlement not given, but WMET is reported to still be having problems with its landlord, the Montgomery County Parks Board, which wants to evict the station.  
 IL Casey WKZI 800 silent  
 IN Decatur WADM 1540 silent "due to equipment problems"  
 MN Minneapolis KUOM \*770 to be taken over by students in fall of 1993, with the University of MN giving up financing of the station. Its audience, estimated at 9000 weekly, was dwarfed by that of WCAL \*89.3 Northfield (65,000) and Minnesota Public Radio's three Twin Cities stations (300,000). By fall, most of KUOM's staff—12 fulltime, eight parttime—will be laid off.  
 MN Monticello KMOM 1070 off the air. "I tried everything I could think of," said owner Greg Davis, but the station did not have the necessary advertising support. Davis had pleaded for advertisers at a Chamber of Commerce meeting in mid-July, but the only calls that came in were from listeners. Davis and a dozen employees lost their jobs.  
 NY New York WNEW 1130 being sold, subject to FCC approval, to Michael Bloomberg for \$13.5 million. He is an investor with "absolutely no experience in broadcasting," and will drop the station's m-o-r music and go to all financial news. A move is under way to try to buy WZRC AM 1480 and transform that into a station with WNEW's present format.  
 MS Amory WDAT 1170, a silent station, had its license revoked by the FCC  
 TX Huntsville KKNX 1400 silent  
 UT Provo KFMV 960 goes modern rock, and "operated by area college students separately from similarly-formatted sister station KXRK" 96.1.  
 "Keep up the fine work."

 WV Ravenswood denied WRZZ 106.1A bid to change to Williamstown WV

**FCC Relaxes Radio Rules**

The FCC won some and lost some. Retreating from its earlier proposal to allow one owner to have 30 AM and 30 FM stations, it settled on 18 stations in each service, which will increase to 20 in two years. Group owners would be allowed to exceed the national limits if they create a plan to help small businesses or minorities become station owners. The FCC did not define what it means by a "small business." In local markets a single owner will be allowed to have a maximum of two AM and two FM stations where there are 15 or more stations—down from three each in the original proposal. The reductions in ownership numbers from the FCC's original proposal come in response to anticipated congressional pressure, and even pressure from the National Association of Broadcasters. The FCC came out a winner in that the national limit for station ownership rises from 12 in each class to 18.

**Blow to Background Music Services: Court Lets Stand "Home Style" Radios' Exemption**

In a move that favors small retail stores which use radio as background music, the U.S. Supreme Court decided not to hear two court appeals by Broadcast Music, Inc. A previous court decision, which is allowed to stand, says that stores using radios such as found in the home with no more than two speakers are exempt from having to pay music license fees. BMI argued that because the two cases concerned large retail chains who provided stereo systems to their outlets, the multiple systems should be viewed in total and thus would be large enough to fall outside the homestyle exemption. The courts disagreed, stating that the focus in the exemption is the type of equipment, not the amount of equipment owned. Even though the speakers were installed in a dropped ceiling there was no effect on the exemption. Unanswered by the court is just how sophisticated a stereo system must be before royalties are due. "The systems described in both appeals are very common and should clear up confusion for many retail operations," muses the Minnesota Broadcasters Association in its newsletter.

**Canada's CRTC Reverses Self on 99.1 CKO Spot in Toronto**

The Canadian Radio-Television and Telecommunications Commission has decided not to award the 99.1 frequency, which has been vacant since 1990 after the collapse of the CKO network, to any of the three stations that applied for it (see August, p. 7, col. 3). Apparently stalling for time, or responding to political pressure, the CRTC said it would begin a study of the Toronto radio market before asking for new applications. The CRTC had limited applications to existing FM stations wanting to improve their facilities, but the decision was strongly criticized by groups wanting to establish a black/dance station—the people who had been turned down when the 92.5 frequency was granted Rawlco for a country music station. The old CKO channel is one of the best technical facilities available in the area. The study is to provide an indication of the economic impact of a new station on the market. The CRTC said that CJEZ (97.3) and Rawlco had not substantiated their claims that a move to 99.1 would improve their technical, financial or marketing performance. It acknowledged CFMX (96.3)'s claim that technical difficulties kept its signal unheard in much of downtown Toronto, "severely damaging its advertising sales." However, the CRTC feels there is a technical solution to the problems, including the possibility of moving the CFMX-1 antenna from Mississauga to Toronto's downtown. The CRTC sympathized with CFMX's Martin Rosenthal, who told the commission it had lost \$8 million since beginning CFMX-1 in Toronto in 1988. He said that without an improved signal he would be forced to sell the station or shut it down. "We would like them to run a low-budget experiment for a month or two right in downtown Toronto, where the problem is," CRTC's Keith Spicer said. The technical solution "is certainly worth looking into."

**Small-Print Happenings and FM Industry News**

Fire last month at the John Hancock Center in Boston had only a minimal effect on WZLX 100.7. When WZLX staff got the word to evacuate the smoke-filled building, Jeff Gonzer put on an 18-minute song, loaded up with albums and ran down 42 flights of stairs to rival WMJX 106.7, a few blocks away. He put the Allman Brothers' *Whipping Post* on the air before leaving. At the new location, Gonzer discovered that WMJX has not just a different CD system, but a drastically different music library, playing music of Lionel Ritchie and Bette Midler, more than Janis Joplin and Bruce Springsteen. "I grabbed fairly generic stuff, like the Rolling Stones and Led Zeppelin, but it turns out they have some closet rockers here," Gonzer said as he came across a George Thorogood album. The station planned a fire sale after it returned to the Hancock building—to get rid of a lot of smoky WZLX T-shirts.  
 WZLX, as it happens, is being courted by Infinity Broadcasting, as part of a \$100 million deal involving the buying also of WZGC 92.9 Atlanta and WUSN 99.5 Chicago. Complicating

the deal is what might happen to WUSN's revenues if the expected format change to country at WLS-AM-FM takes place. WUSN's country format accounts for "more than half of the cash flow produced by the stations," but the Atlanta revenue picture is looking good with the 1996 Summer Olympics scheduled to take place there. The Boston part of the deal would make for one of the first FCC-sanctioned radio duopolies in the nation, with Infinity already owning WBCN 104.1—a station which the FCC is investigating for carrying an off-color joke. Howard Stern's show, not now heard in Boston, would probably be carried by WZLX. Transfer of the stations won't be allowed until the new FCC rules are printed in the *Federal Register*.

It's a long shot, but many of WHYH (\*90.9) Philadelphia's listeners pine for the return of classical music instead of so much talk. The agitation has gotten Rick Breitenfeld of WHYH to quietly consider acquiring a second FM station, which would be c. Problem is, there are no frequencies available, and buying an existing station would be at least a \$14 million investment, and so far no benefactor has come forward with that fat a wallet. Discussions have gone on for a year—very quietly. Breitenfeld worries that to pursue a second station could divert attention and money away from what he considers more pressing matters: the upgraded technology needed for the fast-approaching high definition TV and a capital building fund. Breitenfeld, a Syracuse University grad, is a long-time TV proponent, who found his way into public radio mainly by default after leaving Maryland Public TV and joining the WHYH/WJHY stations.

There's an even chance WBBS 105.1 Great Barrington MA will be sold, and if so one of the buyers may be a public FM station. Bidding against each other are WMHT-FM \*89.1 Schenectady NY and WAMC \*90.3 Albany. WAMC bid first, and was quite annoyed to learn that WMHT-FM is competing in the bidding war. The WMHT stations have a new general manager, W. Donn Rogosin, who comes from public broadcasting in Beckley WV, and he may decide how seriously to pursue the stations' interest in WBBS. Alan S. Chartock, manager of WAMC, expressed his dismay at WMHT's actions: "From the very first, I made it clear that we would give our eye-teeth for this station to bring in a pristine signal to some people in the Berkshires who had not been able to get it in the past. In fact, we have been working assiduously and have been in contact with Mr. Thurston for several months," saying WMHT is "acting as a spoiler." Donald A. Thurston of WBBS, confirmed being approached not only by WMHT and WAMC but by a third, unnamed noncommercial broadcaster, but said that with improving market conditions for a commercial station, and the possibility of new partners, there is a 50-50 chance he may just decide to keep WBBS. The "New York Times" had an article on all the radio stations for sale nationally, but that buyers are holding back because of high debt service by the stations being sold, as well as bankruptcies among major advertisers, and competition from MTV and other cable music programs. About 300 radio stations are off the air, and those not yet deleted by the FCC are most likely all for sale. New FCC rules will mean more consolidation of radio stations, drawing the concern of people like Lynn Chadwick of the National Federation of Community Broadcasters, who says: "These new rules bode ill for radio because localism is the bedrock of the industry. Big nationwide corporations are not local."

KBHW \*99.5 International Falls MN had a three-day share-a-thon in which 618 people pledged \$132,000. It was the best ever for this religious station, but fell short of the \$175,000 goal. Many contributors were from Canada, where religious-owned stations are not allowed.

The complicated action involving 105.7 in Manahawkin NJ got a bit more complex when the FCC decided to allow an appeal by another party, Seashore Broadcasting, that would challenge a settlement. WJRZ 100.1 has been one of

the contenders to move to 105.7 and upgrade.

Fetching fines: KALF 95.7 Red Bluff CA \$10,000 for relocating its studio to Chico CA without authorization, KRYS-FM 99.1 Corpus Christi TX \$6,250 for promoting a lottery, and KMZQ 100.5 Henderson NV \$12,500, also for a violation of the FCC anti-lottery rules. Not yet fined, but it's reported the FCC's interested in Howard Stern's utterings on various stations, including KLSX 97.1 Los Angeles. WWDC-FM 101.1 Washington DC is also falling under federal scrutiny. [No first name] Greaseman on WWDC-FM is being investigated for discussions of masturbation and the line, "I'll bet you'd like to stick 10 centimeters of meat into my sausage grinder." WJXQ 106.1 Jackson MI is also being investigated for naughty language.

The National Conference of College Broadcasters has been announced for Nov. 19-22 at the Omni Biltmore Hotel, Providence RI. Included will be the unveiling of a five-year plan for the association, the ASCAP Music Showcase, and program awards. For more information call (401) 863-2225.

From the classifieds: For sale Collins 900 F-1 67 kHz SCS generator tuned to 93.3 and other gear. R. Egan, WIZM-FM, 432 Cass St., La Crosse WI 54601; (608) 785-7914.

#### FM FORUM

**CONTRIBUTIONS FROM READERS**  
[Continuing with Al Germond's comments on the quality of Japanese FM radios coming to this country] "Even the more expensive 'jam' boxes while sounding better are insensitive, overload-prone and generally wanting for performance. What happened to those marvelous American-made KLH or Advent table radios? The KLH-6 from the early '60s is a classic that still works great years later. Or the solid-state KLH-21 in a single box. Broadcasters spend millions of dollars to buy the latest equipment, keep up with technology, go digital, etc., etc., only to find listeners tuning in on a 19-dollar blue-light special! Something has to be done about this!"

"The only pleasant-sounding AM radio I ever heard was my boyfriend's old Scott 399 AM/FM tuner-amplifier, a mono tube model from the '60s with separate AM-FM sections," writes Jeannette Johnson. "I'm enjoying the '91 FMedials [back issues]. First I looked through all the SCSections and now I'm reading the rest. . . I hope your family wasn't affected by the chemical spill. . . On CBS Radio news they had Roger Johnson from WAKX (98.9 Duluth) who said some people were feeling 'woozy' from the fumes. WCBS-AM described the location as being between Superior WI and Duluth, which they noted, 'is about 100 miles northeast of Minneapolis.'" [The location was actually about 10 km south of the Superior city limits. Subscriber Roger Winsor, who is also a railroad buff, and I later went to Saunders WI about 8 km S. of Superior (on no map newer than 1959) to see the railroad switching yards, and we came upon the damaged cars on a railroad siding. All local radio (and TV) stations stayed on the air with KDAL-AM-FM doing rare simulcasting of the phoned-in reports; the local hams (amateurs) were also busy exchanging emergency information. One ham told me he was four hours atop Duluth's famed Enger Tower

with a handheld, relaying information; he was one of 83 involved in that effort. I believe KDNW \*90.5 evacuated, as phones were not answered; but their automation continued them on the air. Phone service later became virtually impossible to or from Duluth.]

NY's *Newsday* just happened to have a story entitled, "AM's Decline: Is It the Radio?" mentioning people deserting the AM band during the past two decades. One of the reasons FM sounds better than AM is the quality of radios the public has. Herb Squire, chief engineer, WQXR-FM 96.3 and AM New York, played a tape of WNEW AM recorded on a 1988 cassette recorder-radio and another made on an RCA antique radio from 1923. Guess which sounded better? The old set made the "m" type music virtually distortion-free, while on the new set the music "was awash in audio fuzz." Squire goes so far as to suggest that the decline in WNEW's AM ratings might be due to the poor fidelity available to even the most ardent fans of Astaire, Frank Sinatra and other singers as played on 1130 AM. Squire said, "Very possibly, AM's future is in the past, as far as quality is concerned. It is difficult to understand speech, let alone enjoy music, on most of the AM radios made during the last 15 years or so." A 1970 aircheck of Ron Lundy laughing his way through a meat commercial on the old WABC 770 recorded at the time off a Lafayette transistor radio "offers booming evidence that the Top 40 powerhouse profited as much from the radios then in use as it did from big hits and popular jocks."

Normally newspapers don't devote much attention to FM station owners, devoting more space to the jocks that people hear. *Newsday's* done the unexpected, focusing on Mel Karmazin, 48, elusive head of Infinity Broadcasting. Seems jocks get fired just mentioning his name on the air, and even Howard Stern knows who not to offend. Eleven years after taking over the sleepy disco station WKTU 92.3 (now WXRK) and four other stations, Karmazin has expanded the firm into the largest radio-only company in the U.S. with 18 outlets in 12 major markets, with estimated revenues of \$135 million a year. All that is known about Karmazin's private life is that he lives in a NJ house he bought in the '70s, and he halts inquiry into his personal life by saying that he has "a very nice dining-room table." Presumably, very few of his associates are invited to admire it during a meal.

"Maybe the election of Clinton will reverse the bad trend of deregulation and make radio listening better, as well as other things better," writes Walt Breville from St. Louis.

Until October—and I'm shooting for FMedial to come out all 12 months this year,

## Sony Vice Chairman Michael Schulhof

U. S. official for Japan's Sony Corporation,  
 which also includes CBS Records and Colum-  
 bia Pictures.

NY Essex 101.3 WVZM  
 NY Kingston \*91.7 WGMK (WRHE)  
 NY Mechanicville 104.5 WXLE (WVYD)  
 NY New Rochelle 93.5 tries to get WNEW calls  
 from WRTN, after legendary 1130 AM

changes calls (and formats). Move may hit a snag since there is a WNEW-FM 102.7 in the market, and the FCC hasn't allowed separate FM stations to have hyphenated and non-hyphenated calls. WQXR 1560 AM may also seek WNEW calls, as it considers bolting from simulcasting 96.3 FM and switching to big bands.

- MI Dearborn WNIC 100.3 no tD, 57
- MI Detroit WKOL 95.5 no tD, 57
- WLLZ 98.7 no tD, 57
- [The tD is only on WHYT 96.3 and WJOI 97.1 Detroit]
- MI Midland WUGN 99.7 tG, 67, Children's Sunshine Network (replaces telemetry). "We want the radios to include a main channel switch, because we do our fund-raising on the main channel; the subcarrier is a bonus we offer our listeners."
- NE Fairbury KUTT 99.3 tU, 67 (had tM, U)
- NE Lincoln KFGE 105.3 tC, 67, relaying KLIN 1400 AM (with which KFGE has an LMA, along with KLIN-FM 107.3)
- NE Norfolk KZEN 94.7 tU, 67 (not tX)
- NE Omaha KEZO-FM 92.3 tX, 92 (tD, 57)
- KGBI \*100.7 tG, the Children's Sunshine Network—first known use of that network on 67 (along with Midland MI) instead of its more usual 92 kHz
- NE West Point KWPN-FM 107.9 tU, 92, sometimes IDing as "AM 84"; has a spur on 107.5, or an unknown translator to its east
- NJ Newark WNIW 105.9 tE, 67, with Radio Uno, no 92 (open carrier only). "RBC seems to be off permanently." Until recently, WNIW's 67 was ICN, "the same as heard on WBG0 \*88.3's 67 kHz." Radio Uno New York Corp. offices are at 7212 21st Ave., Brooklyn NY; (718) 232-8220; Italian Communications Network, 69-29 Eliot Ave., Middle Village NY; (718) 779-6777."
- NY Garden City WDRE 92.7 no 67, having stopped testing its middle-eastern music; still tU, 92. Its 67 has been "on again-off again; if they start actually broadcasting I'll try to let you know." The signal is so weak in Queens that "I don't know how they expect to reach the other four boroughs."
- NC Asheville WKSF 99.9 tR, 92 (retains tM, 67)
- NC Columbia WRSF 105.7 tC, 67, relay of WDLX 93.3 Washington (whose nonID now "Best Mix 93.3" [from "Lite 93.3"])
- NC Elizabeth City WKOC 93.7 tU, 67 (from tM), "The Coast" (as is the nonID for WKOD 94.1 Yorktown VA)
- SC Gray Court WSSL-FM 100.5 no SCS (had tX), no multi-city ID. The official ID is: "WSSL-FM Gray Court, WSSL Greenville-Spartanburg-Anderson"
- UT Salt Lake City KUER \*90.1 tC (not tT), 67, "for distribution of the signal of the student-carrier-current station, K-UITE"
- ISRAEL—67 kHz is for defense applications, but its exact use was not revealed.
- NEW ZEALAND, Auckland—interested in decoding equipment for the Music 4 system.
- McMartin's Super S, with five discrete subcarriers, was "not compatible with other systems."

We never sold a single system." Stations using a 57 and 67 kHz SCS find complaints from users. There is no guard band between the two, and one or the other has to compromise, such as being injected at four percent or less, instead of at the normal 10 percent, according to Bill Abbott, manager of customer services, Radio Engineering Industries, 6534 L Street, Omaha NE 68117. They also supply crystals for SCS receivers and have taken over the old McMartin line, although sales to the background music industry have gone "way down" after Muzak went satellite (and supplied their own receivers).

**AM Happenings Most Likely Caused by FM**

AL Andalusia WTXQ 1400 "silent pending sale"  
 CA Los Angeles area KJQI 540 now c, simulcasting KKKO 105.1. Poor Arbitron ratings promoted

the change from Mantovani to Mozart. "The sad, unfortunate fact of live in L.A. is if you don't have Arbitron ratings, you can't sell advertising. Our FM station is doing fine, but the AM was operating at a loss. We decided to cut our overhead."  
 CA Simi Valley (Los Angeles) KWNK 670 enters LMA with XETRA 690 AM Tijuana BN—the first known by a U.S. with a Mexican-licensed station.  
 IN Indianapolis WTUX AM 1310 now simulcasting FM 105.7 as WTLC AM. WTUX format migrates to WQFE 101.9 Brownsburg IN. "The ratings drawn by WFFF 96.3 are the culprit here, and they affected WTUX-WTLC."  
 MA Boston WEEI 590 fires one of its original sports personalities and its only on-air female, Janet Prensley, amid speculation that the station is a sinking ship. It is burdened with long-term obligations, such as \$520,000 left on Andy Moes' contract (he may work it off during the 5 to 6 a.m. shift), \$2 million to Eddie Andelman and \$700,000 for Bruins Broadcast rights, plus equipment leases. With ratings down, it's a hard station to peddle to new owners.  
 MA Leominster WCMX 100G silent  
 MN Austin KQAQ 970 still off the air; this station has a history of being on and then off since the 1960s.  
 NE Lincoln KFMQ AM 1480, which simulcasts 101.9 FM, "did not appear in the Arbitron ratings." [repairs]  
 NH Lancaster WLGW 1490 "silent for/  
 OH Campbell WYWR 1330 and PA Farrell WRQQ 1470, both in the Youngstown area, have the same k program  
 SC Abbeville WABV 1590 off the air  
 SC Darlington WJAR 1350 "silent for repairs"  
 MB Golden West Broadcasting, Ltd. operates four AM stations all from studios and control point south of Winnipeg at Altona. The four nearby stations are CFAM 950 Altona, CKMW 1570 Winkler, CHSM 1250 Steinbach and CJRB 1220 Boissevain MB, each with 10 kw. "A magnificent setup. They make money and program to their market with an interesting mix of local, provincial, religious and nighttime symphonic programming. Altona is only 4000 population, and it is 85% Mennonite." The broadcasters are "keeping track of FM, but so far FM has not had the popularity of AM in Canada." [of license  
 NF Grand Bank CKXJ 610 granted revocation/  
 NF Harbour Grace CFIQ 970 granted revocation of license  
 NS Wolfville CHIC /90 silent

**FM Rulemakings Proposed**

**A Bad Dream Comes True at NAB New Orleans '92: FCC Stands Pat (Part News; Part Editorial)**

A fellow attendee at a radio conference in Omaha last month had me thinking that the FCC and its relaxation of the duopoly (FM-FM) rule was a bad dream. He contended that, because of the closeness to the elections, an injunction had been obtained to delay the rules. Since he is an engineer and a consultant—and he had left for the meeting later than I did and presumably possessed more recent information—I wanted to believe him. Alas, such was not to be.

The new rules are now in effect, and applications for common ownerships for two FMs in the same market have already hit the FCC. Goodbye diversity in media. Goodbye opportunities for programming experimentation. Goodbye employment opportunities. These trends were going on anyway; now they'll be accelerated. Applications at the FCC for media combos affecting FM include:

Jefferson Pilot Communications buying KRXY-FM 107.5 and AM Denver [Lakewood CO] for \$7 million; it already owns KYGO-FM 98.5 and AM. In Boston, Atlantic Radio, which owns WBMX 98.5 and WRKO AM, is merging with Pyramid Broadcasting, which owns WXKS-FM 107.9 Medford and WXKS AM, and forming a new company, Boston Radio Group. The group announced it is also buying WHDH AM 850. The five stations which would be owned by the new group account for nearly 25 percent of the total ratings, according to Arbitron, spring '92. BRG will seek a waiver to keep WXKS AM, since what's left of FCC "regulations" allow for a maximum of two AM and two FM stations in a market the size of Boston. And WAPE 95.1 Jacksonville FL owner Evergreen Media filed to take over

## Small-Print Happenings and FM Industry News

One of three Twin Cities' noncommercial religious FM stations in the commercial band is being sold, WCTS \*100.3, for \$10 million to VerStanding Broadcasting. WCTS is turning around and buying WMin AM 1030 kHz Maplewood for \$1.5 million. The 100.3 station will become commercial, while WCTS (AM) will be 50000 watts day, 1000 nights. Not being sold—WNYE \*91.5 New York, after Mayor David Dinkins agreed to close the school system's budget gap to permit the station to stay in school board hands, and continuing to suffer from the disease of being monophonic. The school system may decide, however, to lease—in LMA style—its WNYE-TV to WNET (TV).

The FCC has clarified what it means by a small business when it counts the number of stations one group may own [September, p. 5, col. 2]. If a station has revenues of less than \$500,000 a year and assets under \$1 million it is a "small business."

Stations cluttering their schedules with other material during *Morning Edition* and *All Things Considered* are causing concern at NPR headquarters. NPR President Doug Bennett says he'll consult with stations before deciding exactly what action to take. Originally a ban was proposed, but the ban provoked "a firestorm of protests from station managers." One program which has invaded the NPR-produced shows is *Marketplace*, produced by American Public Radio. Its nine-minute modules are designed to replace the hourly arts segment in *Morning Edition*. APR's Phelps Hawkins called NPR's policy "antithetical to the system's stated desire for diverse voices and points of view [and] out of step with the developing public radio news marketplace." NPR VP Bill Buzenberg dismissed Hawkins, saying that the rival network had "waded in in a very destructive manner, which is typical." Under present policy, stations can put in local, state and regional news in any program segment, but other nationally-distributed inserts are often mistaken for NPR-produced material. Tom Livingston, WETA-FM \*90.9 Washington DC, expressed shock at the "hard-edged" document. "It completely reframes 12 years of NPR-station relations," he said, adding that he was offended by the document's "preemptory tone." But Dale Ouzts, general manager WOSU-FM \*89.7 Columbus OH, said "you don't get the 'New York Times' with the 'Washington Post' sports section in it." He said his station was guilty of the practice, and "we're going to have to stop." WOSU-FM and its AM and TV adjuncts are cutting back operating hours and the size of their program guides after suffering a \$400,000 budget shortfall—half due to state cutbacks and half to increased costs. It is hoping to raise the 1992-93 fundraising goal from \$1.6 to \$2 million, and has garnered \$500,000 in its endowment due to a grant from the estate of Prof. Donald R. Glancey.

Fined \$18,000 for EEC violations were WOKD 98.3 and AM, Arcadia FL, while WENZ 107.9 Cleveland OH and WAOR 95.3 and AM Niles MI were given license renewals, subject to EEO reporting conditions. WDRM 102.1 Decatur AL and its AM have their licenses heading for hearing because of petitions to deny filed by the National Black Media Coalition. CJMF 93.3 Quebec's licence has been renewed by the CRC despite CJMF's failure to spend \$20,000 it had promised for developing Canadian talent, saying its finances didn't permit that. The CRC has warned that if CJMF becomes profitable again it will have to make good on the promise. Also, the CRC approved the application of CJMF to form a network including CFEI 106.5 Ste. Hyacinthe and an AM station in PQ.

Tower flattened in Miami—that of WCIX (6) and several FM stations. The TV got back on the air at reduced height shortly thereafter, but some of the FMs were still off as of this issue's deadline. Off the air because of the storm: WXDJ 95.7, WMCU \*89.7, and WRTO 98.3 in south

Metroplex's WFYV 104.5 Atlantic Beach-Jacksonville. Finally (for now) Ragan Henry's U.S. Radio, which is taking over KMGR-FM 107.5 Orem-Salt Lake City UT, has announced an LMA-to-buy KBCK 105.7 Centerville UT and KBBX AM.

Jim Duncan: "I had expected this radio conference in New Orleans to be more upbeat and more optimistic than the past two or three. In general it has not been that way. Perhaps it is this city. New Orleans is a strange city. At best it is stagnant and at worst it is a metro in decline. In the summer the climate is insufferable. This has been a gloomy convention in a gloomy city." He goes on to mention that getting loans for radio station acquisitions from banks continues to be difficult. And he does not see any great technical changes happening within the next decade, with DAB to be in band, with no FM-AM parity, but "I am not sure there will be much consumer demand for DAB anyway."

Besides the mugginess of the weather and the decline of the host city, the meeting was out of the ordinary because of the sweeping new changes in radio station ownership which had just been acted on by the FCC. "All everybody is talking about is who is going to buy who, and if you end up as an independent station, then how are you going to compete against the other guys," mused John Gehron, general manager WNUA 95.5 Chicago.

At Omaha I had the chance to meet several FMedia! and FM Atlas readers, and I think my after-dinner speech was well received. Fred Vobbe, Lima OH, led out in a discussion of audio processing in FM, and a small transmitter, equipped with an Optimod, was demonstrated. Videos of the meetings should be available later. Here at the "Estate," I have been experimenting with FM transmitters and passive antennas—used for audio distribution and generating SCSignals from out-of-the-area stations for bench testing 67 and 92 kHz subcarrier receivers. The licensed translator on 103.9 continues [Hermantown MN], with one broadcaster interested in buying it, and another in leasing it.

#### NAB Denon AMAX Tuner A Turkey? New G-E "Superadio III" Announced

Al Germond is back from the NAB and found the "hit of the place was the in-band [but closed circuit] AM digital demonstration from USA Radio. It works and the fidelity approaches FM. Actual tests are underway in Urbana IL on WILL AM 580 [and on an experimental FM there at 93.5]. Disappointing was the \$500 Denon 'AMAX' tuner being demonstrated closeby. After waiting more than a few minutes for an NAB representative to give us his attention, we pressed for the true test of this pitiful unit: how well does it haul 'em

in? In hand was the fabulous GE Superadio III... The GE hauled in WSUN/620 over 475 miles of the Gulf of Mexico [at] 5 kw [outside at the beach]... When the NAB representative acknowledged us, we asked how well this \$500 baby hauled in the locals. We set the GE on top of the Denon, centimeters from the puny loop antenna. Inside the New Orleans Convention Center is a tough spot for AM but the GE outperformed the Denon hauling in the locals... I was prepared to spend the money on the Denon if it proved exceptional; I think it will be hard to rival the GE until in-band AM digital is introduced. The Denon is a turkey!"

The new G-E 7-2887A, "Superadio III," is ready, and I had six on hand here at the "Estate." Gone is the multi-ganged tuning condenser; it is replaced by the standard found on almost all radios; AM sensitivity seems to be much poorer than on the earlier model; FM is about the same. Probably to compensate for the poorer AM performance, G-E added a "wide-narrow" selectivity switch to give the AM from local stations more "fi." AM range extends to 1700 kHz, but the radio is not advertised to be AMAX certified. Germond goes on:

"As a broadcaster, the attitudes of our peers amaze us. The gent happily demonstrating FM vs. AM AMAX didn't seem to have a clue about what we were up to. He claimed to own a small station on an AM graveyard channel. But how concerned is the typical AM operator about the quality of receiver available to the public—when was the last time a broadcaster visited the local discount store to observe the other side of the communications process? Ironically, broadcasters are trying to reinvent conventional AM receivers. By 1935, the E.H. Scott Company of Chicago was producing high-quality AM rigs with variable selectivity, high fidelity amplifiers, throwing in tweeters and so forth. Fortunately for radio, AM-FM car radios in production-line vehicles are frequently very good and the Delco AMAX car radio on display in New Orleans—although not available for actual off-air testing from the local stations—advances the quality Delco has usually maintained. Many broadcasters also are totally unaware of the horrific interference that plagues AM. Interference suppression during the '20s and '30s was serious business to eradicate noise from power lines, motors, diathermy machines and streetcar lines. Today, there are expanses of interstate highways where anything but local AM reception is marred by noisy power lines and distribution networks. Yet how many broadcasters are screaming at power companies, makers of dimmer switches and so forth about the trashing of their band? But wait, the in-band digital AM system will be the cure; question is, how much longer can some AM stations wait?"

FL; and KMDL 97.7 Kaplan LA, and its AM. The FL tower which went down also housed the antenna of WDNA \*88.9, but WDNA has been off anyway for some inexplicable reason. WWL AM New Orleans was heard IDing with three other stations relaying its hurricane coverage—another AM, WLMG 101.9 New Orleans and KMEZ 102.9 Belle Chasse LA. The NAB's Science and Technology unit is seeking equipment donations to assist hurricane-damaged stations. If you can help, call NAB's John Marino at (202) 429-5391. Offering "sales relief kits" to FL and LA stations affected by Hurricane Andrew is the Radio Advertising Bureau. The kits tell stations the best accounts, such as lumber dealers and hardware stores, to call upon as reconstruction gets under way.

WGCI-FM 107.5 Chicago's Irene Mojica is suing the station again. In 1990, she charged the station with sexual and racial discrimination and won \$45,000, but she had asked for \$150,000. Both sides are appealing. Mojica claims she was passed over for a recent promotion from overnights to nights as retaliation to the first lawsuit.

WFMU \*91.1 East Orange NJ netted about \$30,000 from a five-day Music/Art Convergence fundraiser to help with legal bills, brought on by a dispute with WFUV \*90.7 New York and other stations near its frequency who object to WFMU's having too much power. Manager Bill Suggs fears if the FCC rules in favor of the other stations, WFMU will have to reduce its range to where it could lose half its listeners—mostly those in Manhattan who enjoy its free-form music.

It looks like Seattle-based Willlight Research is more and more stepping into the shoes of Birch, having joined with the Corporation for Public Broadcasting in going into some Midwest and eastern markets—Bangor ME, Bowling Green KY, Duluth MN, Hilton Head Island SC and Morgantown WV. Watch to see if Willlight audience figures include commercial and public FM in the same breakouts.

Recent grants of Austin-Hornsby TX \*91.7 have generated controversy, with the FCC telling the U. of TX Student Publications Board it can operate Tuesdays, Thursdays, Saturdays and alternate Sundays, and Austin Co-op Radio Mondays, Wednesdays, Fridays and alternate Sundays. The U. had offered the Co-op the hours of 2 a.m. to 2 p.m., but the Co-op is not agreeable to that, and the FCC says if the feuding doesn't stop it will step in again. In fact, the FCC is considering a rulemaking to tighten its criteria for choosing among noncommercial FM and TV applicants, rather than expecting time-sharing to work out. Time-sharing isn't considered an option for choosing among commercial applicants and is "more or less foisted on noncommercial people" when they must compete for frequencies, which happens more frequently as populated regions run out of vacant channels, such as in Austin. The FCC's current criteria are so "vague as to make rational choices among noncommercial applicants difficult if not impossible," the FCC said in its rulemaking notice.

The final program guide of WOI-FM \*90.1 Ames has hit the mails. "We can't keep spending \$20,000 per year sending a one-page program guide when costs keep increasing," said Catherine Watkins. The needs for equipment—a new transmitter and antenna, a new computer and other playthings—take precedence, but she held out hope a guide might become available in the future. Also cutting back—KQED-FM \*88.5 San Francisco, going silent from 1 to 5 a.m. and cutting staff by 15% (including KQED TV's). Staff morale said to be at an all-time low, although a year ago it moved into a \$19 million headquarters, from cramped quarters on Eighth Street.

Another publication that's ending its career is Dietmar Kopitz' *RDS Newsletter*, partly because they've got the message about RDS and RBDS to most of the target countries and to the manufac-

turers of radios, mostly car radios. "What is still missing is the easily tunable portable RDS radio which was highly publicized by the BBC. Development of such a model [should be user friendly but] the major radio manufacturers in Europe and Japan have not so far supported this project."

The dispute at KUNM \*89.9 Albuquerque NM [July, p. 6, col. 1] has simmered down with the naming of Jane Blume as interim manager. She had been a volunteer producer and a monthly talk-show host for the last four years. She replaces Malcolm Gault-Williams, whose contract expired in June and was not renewed. However, Gault-Williams says he "absolutely" plans to reapply for the p.m. position as soon as it is formally advertised. All's not well at the station, however. After only two weeks on the job, Blume fired a secretary following a physical altercation between the secretary and KUNM's development director. Gault-Williams said, "Although I garnered a lot of criticism, I did the right thing. I'm not ashamed of my record at KUNM. I'm very proud of it."

The hospital where WABC NY personality Rick Sklar died during minor foot surgery (July, p. 6) has been found by the NY State Dept. of Health to be "deficient." Doctors supposedly knew about a malfunctioning piece of monitoring equipment but decided to go ahead with the operation anyway.

KVMR \*89.5 Nevada City CA is almost out of debt, having paid \$30,500 to the IRS for delinquent payroll taxes and \$28,000 to others it owed—down from \$110,000 original debt.

The FCC has proposed an update to the Emergency Broadcast System, changing it to an "emergency alerting system" that could be partly automated and include technologies such as cellular, cable and amateur radio.

"KAPW" 88.7 Phoenix AZ silenced by the FCC, but its operator, Bill Dougan, has filed charges against FCC Chairman Al Sikes, saying, "As Arizona's first low power broadcaster, I am committed to this fight until the end."

Britain's first national commercial network, "Classic FM," started Sept. 7, with stations found between 100 and 102 m. Coming back to life for one month ending approximately Oct. 15 is "X-FM," a modern rock station somewhere on the dial in London.

Jack Stiehl, former c.e.o. of the "Wisconsin State Broadcasting Service," and later Wisconsin Public Radio, has been inducted into the Wisconsin Broadcasters' Association Hall of Fame. He built the web in the 1940s and 1950s, creating the first state-wide public FM network in the U.S. I met him in the 1970s and he told me how the stations matrixed the stereo signal so that each station along the line did not have to install its own stereo generator. Later, I applied his technology in building small FM transmitters and translators which could carry a matrixed signal from the originating station, with both stereo and SCS multiplexing.

From the classifieds: 6 kw FM covering Waterville and Augusta ME CP for sale. John Bulmer will build it for \$250,000. "LMA opportunity abounds," (216) 964-3823. Must be WJBI-FM 95.3 Winslow ME.

Wants to buy 100 w FM transmitter, late model, R. Murphy, (800) 582-7625. Marketing and development director, KUHF \*88.7. Must have a minimum three years' fulltime membership/fundraising, plus a degree, \$34,000+ with full benefits. EOE. Letter and resume to John Proffitt, general manager, KUHF, U. of Houston, Houston TX 77204-4061.

Back issues of the *FM Atlas* for sale. I recently bid on some at auction, plus discovered other copies at my mother's house. "FM Station Atlas," 32 page 1971 edition, three copies, fair condition, \$2 each. "FM Atlas" 2nd edition, revised, 1973, marked copy, original printing, fair condition, not a reprint, \$2.50 Third edition, 1975, poor condition, \$2.50. Sixth edition,

1980, like new, \$4.50. 7th edition, 1982, like new, \$6.95. Eighth edition, 1983, \$6.95. 9th edition, 1984, cover dog-eared, \$7.50. Add \$1.50 postage per order. I reserve the right to substitute if the book you want is sold.

**FM AS IT WAS—OR MIGHT HAVE BEEN**

"Some more background on the Rural Radio Network of upstate New York," writes Al Germond from "K 102" Columbia MO. "It was associated with GLF, the large NY State farmers' cooperative, Grange League Federation, and they commissioned an unknown receiver manufacturer to produce a high quality bakelite AM-FM table model, transformer powered with tuning eye. Nine tubes + the eye, had tuned rf on FM, and the one I have works quite well 40+ years later. At the center below the speaker is the 'GLF' logo. . . Some memories of the old RRN. In the morning they did a round-robin 'weather roundup' which was aired on WQXR-FM, whose programs were in turn relayed for years on the remnants of RRN. Someone

**NEW UPSTATE NETWORK FOR WQXR**

from each site, often an engineer, would come on as they flipped across the state and describe the weather at each location." [Wisconsin Public Radio did the same for years, too, until engineers ceased being at each site-b.e.] The receiver sold for \$87.50 in 1940s dollars, so expensive that "no wonder it did not sell! And the network went through cash quickly so demise was all but assured."

"Another memory from the QXR Network days was how the former WKIP-FM would try receiving WFLY 92.3 Troy NY from its Poughkeepsie studios while trying to buck WHOM-FM, also 92.3, which cast off from NYC's Chanin Building. Some nights the tropo up the Hudson River Valley pushed 'HOM' way over 'FLY. WKIP-FM broadcast from atop Mount Beacon near Newburgh NY and tossed a good signal into the NYC area. This confused listeners who wondered why a Poughkeepsie station came in so well not knowing Mt. Beacon was quite a

few miles south of Poughkeepsie. Perhaps this was a late-'40s pioneer 'move-in'!

"On WBFM, the Muzak Corp. stubbornly held onto its 'simplexing' technique of functional music broadcasting into the early '60s. This relied on 25 cps to mute special crystal-controlled receivers leased to business establishments. WBFM would play 10 minute blocks of low-fi 'Muzak' type fare and then sound the 25 cps tone. The hundreds of muted receivers would go silent while the public at 101.9 would be inundated with a barrage of equally low-fi messages. Occasionally, the station would discover an 'illegal' muting system at a business. And the FCC challenged simplexing for years, specifically going after WFMF 100.3 Chicago and dragging them through the courts. For reason enough, multiplexing had been authorized in 1955 and there was a generous grace period to facilitate conversion from simplexing. Then there were various subcarriers in use; 41 and 67 kc were used by many stations, but the former was incompatible with stereo on 19/38 kc. Some early stereo mx listeners will recall the chattering and 3 kc tone when stereo decoders were unmuted while a station was using 41 kc. It seemed NYC's WNCN (104.3) took forever to go stereo, because they had a good thing going with their 41 kc SCA in the mid-'60s."

[I recall KROS-FM 96.1 Clinton IA broadcasting to Eagle supermarkets in 1957-59 when I was living in Iowa City. The commercials were louder than the music, they were always for grocery products and came on with a timer, with the music fading down for the commercials. Later, WAYL 96.1 Minneapolis broadcast to IGA grocery stores from 9 a.m. to 6 p.m.; commercials were inserted manually with a Wollensack reel-to-reel recorder at 10-minute intervals, and the station was advised to play the commercials louder than the music and to only use easy-listening instrumental music; after 6 the station could play whatever it wanted, but the grocery store managers were not wildly enthusiastic about the Broadway show-tunes that came on from 8 to 9 p.m. over the stores' speakers.]

A 1949 *Standard Rate and Data Services* listing of the Rural Radio Network showed the basic network of upstate NY stations as costing \$210 per hour one time down to \$168 per hour 312 times, with an optional buy including WGHF New York, WACE-FM Springfield MA and WFHA Hartford CT adding to the costs. Transcriptions could be vertical or lateral, and scripts for talks, programs or commercial continuity had to be submitted at least five days in advance.

From *Seeds That Grew—A History of the Cooperative Grange League Federation Exchange*, by Joseph G. Knapp (Hinsdale NY: Anderson House, 1960) we read that "The Rural Radio Network was beset

with difficulties from the start. Farmers were not accustomed to F.M. radio broadcasting, and their acceptance was slow. Most already had A.M. broadcasting sets and hesitated to buy the new G.L.F. AM-FM table model radio until the superiority of F.M. reception was demonstrated, and the programs of the network were well established. Moreover, at that time it was necessary to use a rather complicated antenna to obtain F.M. reception. This was not only a nuisance but it added \$10 to \$15 to the cost." Debts increased to \$442,000 by April, 1949, with loans from the G.L.F. and the Dairymen's League coming to nearly \$1 million to keep the stations in operation. Supplies of the AM-FM radios piled up and to move the initial order of 2500 it was necessary to sell about one-third of the radios at a cut price before the line was discontinued in 1950. The loss to G.L.F. from the radios was \$50,000. By Aug., 1950, the deficit had mounted to \$665,000. Hurting FM at that time was the advent of television and the licensing of new AM stations by the FCC--both of which took public attention away from FM and the Rural Radio Network.

The Rural Radio Network began relaying WQXR-FM 96.3 New York in mid-1950, according to an article sent by Jeannette Johnson. The relay was entirely off-air by radio, saving costs of network telephone lines. Also relaying QXR were WBIB New Haven and WFMZ Allentown PA.

A May, 1955 article showed FM stereo pioneer Williams S. Halstead discussing multiplexing, which at that time would have been SCA. WGMS-FM 103.5 Washington DC used Halstead patent no. 2,709,254 to broadcast "two programs at once." While it had been demonstrated on WGYN 97.9 in 1950, it was not until 1957 when more serious experimenting in NY was done. The NY station to have two programs at once was WFMX 104.3, with studios in the Hotel Pierre, as of 1957. The 104.3 channel had been WFDR, and shortly after 1957 became WNCN. The WFMX tests were done in secrecy. Walter Wiehl, formerly with WABF New York (99.5), will be the general manager and program director, when regular programming starts in one month. Armstrong got into the

act, and by 1953, shortly before his death, had actually put three separate programs on one FM station. This sounds like 67 and 92 kHz SCS doesn't it? "Under the system, a set owner would tune his FM set once as at present and receive the first program. Then he could flip a switch and receive a second program. Flip the switch again and he would receive a third program. Under the new system, the existing thirteen FM stations in New York City could offer a total of thirty-nine programs at the same time. Present FM transmitters could be modified for the new system at a cost of a few thousand dollars", according to Dr. Armstrong, but listeners at home would have to buy new FM receivers."

A 1941 article explained the call letters system of FM, such as "W51NY," standing for a station at 45.1 mc and being in New York. A special experimental FM transmitter at Alpine NJ was assigned Edwin H. Armstrong at 43.1 mc. Additional FM radio grants in 1941 went to the Stromberg-Carlson Co. of Rochester NY and the Moody Bible Institute of Chicago (for noncommercial operation). "For a broadcasting system that only a few months ago received its first commercial impetus in the form of construction permits, the FM idea has progressed rapidly. Only last May the FCC decided to vacate the then No. 1 television channel and reassign it to static-less radio. On eleven FM channels thus created seven New York stations already are assigned. All are classed as experimental. Four now are broadcasting daily--W2XMN at Alpine, W2XQR Long Island City, W2XOR, 444 Madison Ave., and W2XWG atop the Empire State Building. Ten station applications are pending for the four remaining New York waves. There seems to be no dearth of interest on the part of those qualified to operate FM stations."

FM FORUM

CONTRIBUTIONS FROM READERS

Thanks to Bart Cronin for supplying almost all the NW Canada and AK news last month. He kindly noted stations along the way, but his van radio's stereo light went out just before leaving, so he wasn't able to check on the \$[tereo] status of stations, and he was using FM Atlas-13 with updates from FMedia!

NJ Newark "WRMN" is on the 67 kHz of WBGO \*88.3, and "occasionally relays their affiliated FM station in Manila, 'WKC' 93.9, 'the number one pop music station in metro Manila'. Actually, 'WKC' is a strict nonID; the real calls are DWKC, but they never use the ID on the air. They play mostly Filipino records with a few American ones mixed in. Most commercials are for movies and upcoming concerts. All the announcing is in English. They take requests and dedications, but they say 'if you're listening in New York, don't call collect!' "WRMN offering radios at \$65 with the two SCS channels. "It sounds like the FMystery radio" in FM Atlas-13. Call (201) 224-8360 or 224-8311. "WRMN Radyo Pinoy" wants to start stations in Los Angeles, San Francisco and Toronto.

WNWK 105.9 tE, 92, had been testing Chinese music over and over, but has settled into a Colombian Spanish service, "Radio Internacional," and not the same as WYNY 103.5's 92 kHz, "La Vos de la Gran Colombia."

NY Garden City WDRE 92.7 tE, 67, Radio Sedaye Iran ("all Farsi—no English"). It's "still weak, distorted and crosstak"; tU, 92.

NY New York WFUV \*90.7 still tE, Mandarin, 67. On 92 they're saying: "You're listening to one of two subcarrier channels operated by WFUV FM New York. If you're interested in the possibility of leasing one of these channels, please contact WFUV during regular business hours at (718) 365-9070." The Mandarin on 67 is Chinese American Voice, 135-42 39th Ave., Flushing NY 11354, and it is offering two radios—a Panasonic for \$108 and a Chinese brand for \$75. A Queens buinessman, Hoe-Peh Lee, is "chairman" of this station.

VA Big Stone Gap WAXM 93.5 tC, 67, WLSO AM relay 24 hours, along with its 92.5

On Air (Selected)

FL Goulds WRTD 98.3, back on after Hurricane Andrew hit, with unlisted facilities from the former site of WSUA 1260 AMiami

FL Homestead WXDJ 95.7 back on, with 12 kw from the same 66-m tower WMCU is using

FL Miami WMCU \*89.7 using a temporary site with 15000 h,v from a 66 m tower, and covering "80-85% of our market"

IN Gary WGVE \*88.7: "They hope to increase power and go stereo in the future, but when—they don't know."

LA Grambling KGRM \*91.5 still weak, not yet having upped to 50,000 h.v. "Given the rough times this state government is in, who knows?"

MN Lakeville KZPZ 105.1, but only testing in stereo, with occasional IDs

translator having those features (from tS).  
 VA Harrisonburg WXJM \*88.7 tC, relaying  
 WREL-FM 96.7 Buena Vista with main  
 carrier programming "for EBS purposes"  
 WMRA \*90.7 tU, 92 (from tB, BBC news  
 relaying); retains tT, 67  
 VA Lexington WMRL \*89.9 tT, 67. Main  
 channel duplicates in stereo the signal of  
 WMRA Harrisonburg, as do the SCSes; tU,  
 92.  
 Muzak has installed a 572 SPL computer from  
 Symetrix in the Moreno Valley Mall, Riverside  
 CA. The 572 SPL senses changes in crowd  
 noise and raises or lowers the system volume  
 to ensure every musical note is "intelligible  
 but not overpowering."

 classical  
 CO Littleton (Denver) KDKO 1510 silent  
 IA Waterloo KWOE 850 silent  
 ME Gorham-Bangor WASY 1590 silent. "Was on  
 the air three weeks. WASY was simulcasting  
 WZON (620 Bangor) from 6 a.m. to noon and  
 using the SENetwork the rest of the day."  
 WZON is on the air, but most employees have  
 quit after their paychecks bounced. Owner  
 Danny C. Lemmon has been charged with  
 mail fraud and could not be reached for  
 comment.  
 MA Boston WEEI 590's foul-mouthed Andy  
 Moes, now on only 5 a.m. to 6 a.m. for his  
 \$250,000 annual pay, is suing for more job  
 security and less harassment from a consultant  
 who has been critiquing what's left of his  
 on-air performance. Employment prospects

MOES

for Moes, who is earning  
 \$1000 an hour, "appear  
 bleak at best [and he] is  
 hanging on for dear life."  
 MI Grand Rapids WOOD  
 1300: "Drops all adult  
 contemporary records  
 for a news-talk format.  
 Has been moving in the  
 'news-information' direction  
 for a long time. . .  
 People who like soft  
 rock can get it on  
 WOOD-FM as well as  
 other FMs."  
 MN Minneapolis KTCJ 990  
 now simulcasts KTCZ

97.1.  
 MN St. Paul WDGY 630 now simulcasting KDWB  
 101.3 Richfield, with most on-air promotion  
 going to KDWB.  
 NJ Camden WSSJ 1310 "is running music tapes  
 which repeat as often as every four hours (at  
 least on weekends), with the same songs in  
 the same order, and even the same jingle  
 between every song! I have visions of  
 unattended auto-reverse tape decks, repeating  
 endlessly; no commercials were heard on  
 Camden's only commercial radio station  
 (both WTMR 800 and WKDN 106.9 are  
 religious). Perhaps a last gasp?"  
 NJ Mount Holly WWJZ 640 heard testing  
 (Philadelphia suburb). "How does this station  
 expect to survive only a few miles from such  
 a big market?"  
 PA Easton WODE 1230 silent. "Ostensibly for  
 tower repairs, but I wouldn't be too surprised  
 if they never came back. Had been simulcast-  
 ing WODE-FM 99.9 after an illustrious  
 history as WEEX (see Jan. '92 FMEDIA!), but  
 has now been off since August. . . WODE-FM  
 has meanwhile been operating at low power,  
 with 5000 watts at about 30 m on one of the  
 AM towers. . . This place may have a curse on  
 it!"  
 PA Harrisburg WIMX 1460 dumps simulcast of  
 FM 99.3 for "News/Talk 1460." "I think this  
 is doomed against powerhouse WHP 580,  
 especially with 1460's tight signal; in fact,  
 many years ago, it was WHP who dumped  
 1460 and moved to 580!" says Clarke  
 Ingram, who goes on:  
 PA Mount Pocono WPMR 960 now rp, "presum-  
 ably in anticipation of their new FM 107.9,  
 calling itself '960 - the AM band experience'.  
 Album rock on AM is an experience, all right,  
 but one I'd rather forget!"  
 PA Philadelphia WEAZ 560, formerly WFIL,  
 nonID: "Wish Stereo 560" with b. "This is  
 another legendary top 40 AM station which  
 has fallen into a sad retirement. In visiting  
 their transmitter site recently, I found that  
 they had boarded up the building and torn  
 down the WFIL call letters, which nearly  
 broke my heart. Certainly AM radio is dead,  
 or at best terminally ill, but can't the new  
 owners of legendary radio stations respect  
 their heritage?"  
 WPGR 1540 "Geater Gold Radio" (strict) in  
 honor of DJ Jerry Blavat ("the Geator"),  
 heard from 3-6 p.m. weekdays. "Never in the

running Unistar 'Hot Country' format. When  
 I came into KCQL/KKFG on April 1, I was  
 looking through the AM engineering files.  
 The AM was constructed back in the late '50s  
 and a tower sketch shows a four-bay FM  
 antenna mounted on the AM tower. The calls  
 then were KNDE. I could find no trace of any  
 FM engineering info beyond that. Then, this  
 summer, while installing a new transmission  
 line for the AM from the studio to the tower,  
 I came across not only the old AM transmis-  
 sion line buried in the ground but some 3-inch  
 heliax also, which apparently was for the  
 FM," says Dan Kelly. "An older fellow who  
 works here said he had stopped at this station  
 in the late '60s and recalls an FM transmitter  
 in the building, though there was no FM on

history of radio have I ever heard of a station naming itself after one personality, no matter how popular he (or she) might be! Probably a desperation move to gain credibility, but it does make me wonder if a station called 'Howard Stern Radio' is around the corner."

- SC Batesburg WBLR 1430 silent
- TN White Bluff WJKZ 1030 "silent for repairs"
- UT Springville KRDA 780 denied reinstatement of expired permit, deleted call letters

- IA Clear Lake dismissed KLKK 103.7C3 bid/IA Osage dismissed KCZY 92.9A bid from 103.7A (still on 92.7A)
- IA St. Ansgar 95.5A, Nov. 17-Dec. 17
- LA Lafayette 95.5C2 from A, KRRQ
- MI Lake City \*104.9A, reserved educational
- MI Rogers City 99.9C2, Nov. 20-Dec. 21
- MN Pequot Lakes \*102.7C3 for 100.1A, KTIG
- MN Rochester \*92.9A from 88.5A, KFSI, denying bid to make 92.9A commercial
- NC Atlantic 107.3C3 for A, WTKF, denying bid to change it to 94.5A
- NC Atlantic Beach dismissed 107.3C1 bid
- NC Bayboro 97.9C3 for A, WKZF
- NC Clinton 107.3C3 for 107.1A, WMXS
- NC Englehard denied 101.5A bid
- NC Hatteras denied 101.5A bid
- NC St. Pauls 107.7A for 107.3A

- OR Sisters 104.1C1 for A, KPXA
- SC Georgetown 97.7C1 for C2, WBPR
- SC Moncks Corner 105.3C3 for 105.5A, WJYQ
- TN Camden 95.9A for 98.3A, WRJB
- TN Dyer 94.3A, Nov. 6-Dec. 7
- TN Germantown (new) 107.5C3 for A
- TN Henderson 95.7A for 95.9A, WFKX
- VA Fort Lee (from Williamsburg) WDCK 96.5B
- VA White Stone 105.9A for 100.1A, WNDJ
- WA Gledendale 102.3C3 from A, KYTT
- WA Winlock 95.1A, Nov. 20-Dec. 21

**Religious FM Stations May Come to Canada**

Earlier this year the National Christian Broadcasters formed in Winnipeg, and one of its objectives is to convince the CRTC to allow the licensing of religious radio and TV stations. This comes about after the closing of several illegal TBN translators in Alberta and Saskatchewan. Only two AM stations in Canada are licensed to religious groups--VOAR by the Seventh-day Adventist Church and VOWR by Wesley United Church--and they were in operation before Newfoundland became part of Canada. Doug Loney, publisher *Broadcast Technology* magazine, makes these observations:

Loney

"The views of many must be heard to devise suitable criteria for licensing such stations. Some of the thoughts that come to this observer are:

- Where ownership is by religious denominations, a formula similar to that applied to Vision TV should be used, requiring diverse denominations (a minimum of three) to participate.

- Programming of (for want of a better word) doctrine should be limited to perhaps 50 percent of broadcast hours, and should be allotted on a fair basis to those who wish to help program and/or finance the station.

- Doctrinal programs should be 100 percent Canadian content.

- There must be strict limitations on the solicitation of funds, to avoid the abuses which have characterized some U.S. religious programming.

- Diversity in programming should be encouraged, if not required. For example, Canadian radio listeners have had little opportunity to hear the wide range of religious music available--and there is a market for it: a religious music station is near the top of the ratings in Dallas TX [KLTY 94.1-b.e.]. The religious format could also include various types of talk shows.

"Religious people--and many who do not practice a specific religion--are concerned that our society, in its rejection of narrow sectarian doctrine, is also losing its sensitivity to spiritual values and ethical behavior. We are, it seems, 'throwing out the baby with the bathwater'."

**Digital Radio Coming on Fast--in Canada**

Both private and public sectors in Canada are pushing for DAB, digital audio broadcasting, by 1995. Three experimental transmitters are being considered: in Montreal, Toronto and a third to move from city to city. "These would enable broadcast people to get on-air experience with the equipment," according to Loney's magazine. CRC President Gerard Veilleux is quoted as saying the CBC will take "full advantage of approaching digital technology." The FCC's on the way to making it official, proposing 2310-2360 mhz for satellite DAB services in the U.S., and is asking for comments on proposals for both satellite and terrestrial DAB services, as well as comments on an in-band DAB system.

**Small Print Happenings and FM Industry News**

When your favorite public station comes on begging for funds, you might not be able to take your "FM Atlas" and search for similar formatted stations for alternate listening. National Public Radio is studying coordinating pledge drives nationally. Taking the cue from public TV, the radio people are following up on a study it began two years ago. Some stations are skeptical. Ken Hodgson, station manager at WAMU \*88.5 Washington DC, said "anything as mundane as having a place for our volunteers to park during a week when no one is on campus can influence the choice of a pledge week. But if NPR can come up with a week that everyone agrees on, it may even in some curious way strengthen fundraising because listeners can't "miss it." Most NPR shows have some specially designed fundraising editions, and national hosts record pledge drive promos for local stations to use. Without a national pledge drive week, those special programs are released in advance, such as on tape.

The boards of AK public radio and TV have decided to consolidate, but programming for KSKA \*91.1 FM and KAKM TV will be separate. Administrative, fund-raising and engineering will be combined.

LMA news: KQIZ-FM 93.1 and KLSF 96.9 Amarillo, along with KAEZ AM, have formed a sales local marketing agreement. WZZK-FM 104.7 and AM Birmingham are taking over WIKX 106.9 via an LMA. The FCC has eased its main studio personnel requirements in LMAs. Previously, a station programmed in an LMA had to have one management-level and one staff-level employee at the station during business hours. Now the management person can be almost any titled employee, such as a secretary called an "office manager," so long as that person reports to the station daily and spends a "substantial amount of time" there. Clear Channel Communications, owner of KAJA 97.3 and WOAI AM, announced it will acquire KOXT 101.9 from Group W--all in San Antonio. Stoner Communications plans to obtain WTUE 104.7 and WONE AM to go with its WWSN 107.7 Dayton, while Stoner's KGGO-FM 94.9 and AM would acquire KDMI 97.3 Des Moines--strange bedfellows, with "evil" rock on 94.9 and religion on 97.3. Rumor has it KHOW-FM 95.7 and AM Denver would be paired with KBCO-FM 97.3 and AM Boulder. KNDD 107.7 Seattle might be linked by ownership with KBSG-FM 97.3 Tacoma WA and AM. Cox's WSOC 103.7 Charlotte would go to EZ Communications' WMXC 104.7 there. Cox would get WHQT 105.1 Coral Gables in addition to holding WFLC 97.3 and AM Miami. Greater Media announced plans to buy WCDJ 96.9; it already owns WMJX 106.7 and AM Boston. To make it easier for the FCC to find out when the 25 percent audience total is reached in an FM-FM situation on Arbitron said it will give the agency its ratings services for \$125 per filing. It is also offering other research services at \$500 to

\$10,000, and said it will clamp down on stations for not using listed slogans or nonIDs. Slogans to be listed in its books must be used at least four times an hour; or if there are fewer breaks, at least during 50 percent of the breaks, and they must reflect exact on-air usage.

NPR plans hourly newscasts 24 hours a day in 1994. Cost of increased service to reach night-owls: \$300,000 a year. NPR is working on a pricing scheme that will minimize contributions from stations. Phase-in starts this January when newscasts at 11 p.m. and midnight are added. Competing APR says it will distribute 24-hour "Monitoring Radio" newscasts.

Ken Davis has resigned at WBEZ \*91.5 Chicago as program director after he leaked a memo to the *Chicago Sun Times* saying that the evening jazz programming would be simulcast from WDCB \*90.9 Glen Ellyn IL. At that point, WDCB had not even been contacted. Davis said he is applying for the job as host of NPR's *Talk of the Nation*, which is vacant after John Hockenberry left in August. And WBEZ is undertaking a nationwide search for a program director, with hiring expected in November. Send resume to Carole Nolan, general manager, at 1819 W. Pershing Road, ZIP 60609. Commercial classical WFMT 98.7 Chicago has decided to reinstitute its ban on recorded commercials, effective Jan. 1.

The NAB/Denon "Super Tuner" which broadcaster Al Germond dismissed as a "turkey" last month, was recently reviewed by Len Feldman, using the archaic technique of counting the stations received in stereo (rather than using side-by-side testing of two or more tuners on the same weak stations), and his review implies that the tuner has a defect found in poorly-designed equipment—the stereo and muting are combined on the same switch.

WBEC-FM 105.5 and AM Pittsfield MA, which are operating in court-appointed receivership, have four would-be buyers, but it is doubted that any major format changes will occur. One group reported interested is Berkshire Broadcasting, owner of WMNB 100.1 North Adams and AM and WBBS 105.1 and AM Great Barrington.

Good news to broadcasters: For the second year in a row a plan to impose a user tax on broadcasters and translators has died in Congress. Charges would have been \$125 to \$550 annually.

In fine news, KNNG 104.7 Sterling CO had its reduced from \$4500 to \$2800 and KCCY 97.9 (moving to 96.9) Pueblo had its reduced to \$4000 from \$4750. WBNS-FM 97.1 and AM Columbus OH had licenses renewed, despite complaints from the NAACP and the NBMC. It seems the FCC is challenging Infinity Broadcasting head-on and its carrying of Howard Stern. The FCC has imposed a record \$105,000 fine against KLSX 97.1, which carries Stern in L.A., with the FCC not amused that Stern would "strip and rape" rival KLOS 95.5 morning hosts Mark and Brian. Helping the FCC in its crusade are reportedly Donald Wildmon and Sen. Jesse Helms, who are opposing Infinity's acquisition of three Cook Inlet stations because it would lead to more "outrageous sleaze" by Stern. Stern claims to be innocent in any L.A. charges, since his program originates in New York.

WHA AMadison, affiliate of WERN \*88.7, still claiming to be the oldest station in the nation, but that claim may be up in the air. Others, such as KFJM Grand Forks ND, claim the same or earlier starting date than WHA's 1917. But WHA may be the boldest station in the nation for its persistence in making the claim; WHA now 75 years old, and looking for a new executive director after Paul Norton went back to his native Utah. Question is should the new appointment be a joint one with the Educational Communications Board and the University of Wisconsin? Norton had worked for the ECB, with programming coming from the stations' studios at the university.

Media definitions from the Milwaukee SBE newsletter. Radio: "A conduit through which prefabricated din can flow into our homes,"

Aldous Huxley. Television: "The triumph of machinery over people," Fred Allen.

FM stations on the air: 4742 commercial, 1570 educational as of Sept. 30 for an FM total of 6312; AM has 4963, almost all commercial stations.

From the classifieds: Managing editor/reporter and Morning Edition host, requiring three years experience in news, \$23,490-\$27,000 fulltime, EOE, in town not connected to U.S. road system. Resume to Rich McClear, KCAW, 2-B Lincoln St., Sitka AK 99835 by Nov. 13.

Lafayette LTD-725 AM/FM/SCA stereo tuner, just tweaked, \$100 or best offer, Dave, 703-751-9346. Yes, Lafayette had a tuner with built in SCA in the 1970s. Muzak made them stop.

Wanted to buy WI AM/FM/TV stations' history, print/tapes/photos for book of broadcasting history, D. Kerl, WHRM, 3200 Park Road, Wausau WI 54401.

For sale C2 FM in Clifton/Safford AZ, \$395,000 terms, S. Greeley, (602) 855-1051. Has to be KJJJ 102.1.

For sale Ottawa transmitter site or equipment, formerly CBO, CBOF AM, about 55 ha of land and nine 73 m towers. Written offers by Nov. 11 to Paul Munson, regional engineer, CBC, 25 Lanark Ave., Ottawa ON K1Y 1E4; (613) 724-5144.

#### FM AS IT WAS—OR MIGHT HAVE BEEN

A 1938 story in which W.G.H. Finch was already testing fax on a frequency of 35 mc, was mentioned by Jeannette Johnson. An article from 1958 mentioned the U.S. Court of Appeals setting aside FCC rules aimed against WFMF Chicago and Functional Music. I believe that court action also made transit radio legal, despite claims by some bus riders that they were forced to listen to radio against their will.

On my trip to Omaha in September, I picked up a reprint from a 1947 engineers' book on the 50,000 watt voice of KFAB, which started out in Lincoln, Neb. The only thing said about FM in the three-page article is that "KFAB has also established a frequency modulation station—KFAB-FM—in Lincoln. This transmitter is located in the KFAB studios on the fourth floor of the Sharp Building. It is a Westinghouse transmitter and has a power output of 3,000 watts on 97.9 megacycles, or Channel 250. The antenna system now in use is a temporary one—employing a folded quadrupole antenna only 20 feet above the top of the Sharp Building. The present computed service area extends 36 miles. A 100-foot tower will soon support a Western Electric 54-A 8-unit Cloverleaf antenna, which has a power gain of 4.7. This will more than double the present service area. Frequency modulation offers advantages over the standard amplitude modulation for local coverage, since it greatly reduces static and interference from other stations and is capable of high fidelity transmissions. It cannot supplant the 'AM' system since it is not possible to reach a large audience such as that of KFAB." [KGOR 99.9 Omaha is KFAB's FM affiliate; it was KFAB-FM in the early '60s, when its tower was south of Omaha. I recall its signal as being excellent to the Kansas border as I listened on a Blaupunkt FM-AM car radio.]

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Good news to FMedia! subscribers. When Roger Winsor, a contributor of station news and subscriber from Indiana, was here in July we went through the newsletter records and found that the subscription rate has stayed fairly constant, except that I have not had the time to promote new subscriptions. And I feel great, so I plan to continue FMedia! indefinitely. Most subscriptions will fall due in December, and promotions lately have offered a lower price per issue when you subscribe for six months rather than 12 months, but that might change. Keep up your support, and FMedia! should continue into 1993 and beyond.

Plugola department: Bob Gilbert offers a "Maine Radio News" for an SASE; it should come out about eight times a year. Expect to pay postage due; he usually stuffs his envelopes with lots of radio material, mostly culled from area news-

papers. Write him at 144 Harris Avenue, Portland ME 04103-1531. He says WZEA 102.1 Hampton NH is in stereo, and enclosed their logo.

**Seacoast**  
**102**  
FM

Glenn Hauser recently sent a long report on his travels from OK to northern Canada, published in his "Listening Digest." It was published in August, and I am not sure if copies remain, but you can try by sending \$2.50 for that sample issue or \$25 for 10 issues (\$26 in Canada) to Hauser at PO Box 1684, Enid OK 73702. There is plenty of good reading in his monthly publication, much of it devoted to shortwave listening. Regarding FM station news he sent, "Note especially the big format change at KWGS \*89.5 Tulsa and the fact that they have killed stereo except for a few hours a week when they really have stereo content. Shouldn't there be some special indication for that, like both \$ and mono? Technically they are stereo, but odds are you will hear them while in mono."

"Muzak no longer has any appreciable pauses between selections," notes John Ebeling. KSTP-FM 94.5 St. Paul "keeps the carrier on all the time—no need for a mute circuit. I do not even recognize any Muzak selections any more—nothing is even familiar. Twenty years ago I liked to listen to them. Years ago, you could set your watch by their pauses; music would start at the hour and each 15 minutes thereafter. . . Had to fix the SCA unit I use with my Fisher. It had served for 20 years and finally a capacitor gave up the ship. By the way, remember how I got you started with SCA? Back in 1961 or so, I gave you my first adapter built on a copper plated high voltage cage cover from a Motorola TV set. I had just completed a more complex adapter. Look what that gift led to! . . . During a good [long distance] FM

opening I was amazed at how much crap is put out on the air. Almost every station must have a younger program director, as most of the 'music?' is programmed for bone-heads. It's not only 'lame', it's sick!"

Fernando Garcia in Cd. Guadalupe NL sent a complete, updated Mexican FM station list. Additions or changes to the information in my FM Atlas and FMedia! during the past few months have been noted and helped fill this newsletter two months ago. "Please tell me when is your closing date for your 1993 FM Atlas edition, so if I note some changes I'll send it to you on time. . . I really found useful your 1992 FM Atlas edition," he writes. Late last year I wrote the SRT in Mexico for an updated list and have yet to hear from them, so it was great to get Fernando's list. I'm updating the listing of Mexican states, using a two-letter system to put them all in alphabetical order and using letters not found in the U.S. or Canada. One improvement for FM Atlas-15 is an updated map of Mexico, with call letters, frequencies and state boundaries--and, oh yes, a new map of TX must be done!

Peter Horton corrects on the height of KFUE-FM Clayton MO, now 313 m, not 101 m, although the FM Atlas coverage shown is correct. He writes, "I must be the only subscriber appreciating a classic format, vs. rock noise--whether 'oldies', 'progressive', 'classic' or whatever! Seriously, your editing is normally so good, I knew you'd be interested in this correction."

WRFG \*89.3 Atlanta is having its listeners get involved in raising \$25,000 for a new antenna and transmitter, which will soon be placed in operation. Listeners showing up for an open house were urged to kick in at least \$50 each. And Nick Lombardi sent an item about an SCSports gadget. The Sporting News SportTrax electronic data receiver, said to be available starting this month, will bring the latest scores, statistics, pre-game injury reports, betting odds and weather conditions from around the world to your fingertips. The device resembles a hand-held video game and LCDisplay (10 characters wide and four lines high), a keypad and a special FM receiver to which information will be transmitted in 38 U.S. and Canadian cities. The receiver will sell for \$495 and subscriptions for \$60 to \$79 a month. News will pour out 24 hours a day using the resources of The Sporting News and three electronic data suppliers; for information call (415) 377-3500. I wonder if that system will be any more successful than the Seiko paging wristwatch, which is on the air using 57 khz only in Portland OR, to my knowledge. Dr. John Oldfield sent a brochure from Seiko, depicting the various functions that watch can perform when it intercepts the proper local 57 kHz SCS datastream. Messages vary from "call home" to a coded number, and a printed-out weather forecast and current temperature. Oh yes, it gives the date and time of day.

Oldfield sent a copy of a letter to the chancellor of Syracuse University, critical of the operation of WAER \*88.3 and its higher cost of federal and other forms of public support when compared to other noncommercial stations in the area. Public support per subscriber for WAER was \$222.99, while for WAMC \*90.3 Albany it was only \$12.04. For WCNY-FM \*91.3 Syracuse it was \$61.40 and WRVO \*89.9 Oswego it was \$70.97. Little WJPZ \*89.1 Syracuse, a student operated station, had a higher audience than WAER, but its operation is more secretive, with researchers not given access to its financial picture. Excerpts from the Oldfield letter: "My concern is that the University should expect a better return on its investments in WAER, by providing more opportunities for creative contributions by students from any school or college, with a professional framework, as required by the CPB. . . The station could be operated with fewer than 11 fulltime professionals. . . WAER can already be heard clearly and continuously well beyond the bounds of Greater Syracuse, e.g. I listened to it on my car radio at 54 miles east of Syracuse, i.e., beyond Utica--what's the object of a 15-fold power increase when any electromagnetic engineer would confirm that increased power at this level would bring extremely marginally returns? For comparison, the WJPZ (100 w) signal could be heard clearly and reliably 34 miles east of Syracuse. . . As far as the University's contribution is concerned, WAER operated as a student-run station until 1981, when your predecessor decided to alter its basis to CPB standards. I would guess that it took much less than a million dollars per annum in those days, although the University's indirect contribution was quite substantial." Oldfield wrote that letter in January, and at last report he was still waiting for an answer from the chancellor. He sent it "in view of your WAER management experience in earlier years." I was there 1966-69. While at Syracuse, I was involved in the Eastern Associates partnership, applying for 100.9A against WSOQ, which ultimately got the channel in North Syracuse. "I never realized you were one of the applicants for WEZG," writes Phil Wayne. "Thank God you didn't get that property--it's been plagued with technical and financial problems for years. I only hope the new ownership has the smarts to conquer all of them." Wayne sent a story about WKKO 99.9 Toledo's lack of stewardship where human life is at stake. WTOD AM announcer Dan Dixon was shot at during a remote broadcast by an unnamed woman who had come to town from TX, and carrying a hit list of "communist and leftist" personalities she wanted to assassinate. When police started calling names on the list, Clyde Roberts, general manager of WTOD-WKKO, frantically started calling media begging them not to use the story in order to protect the

folks from any copycat who might want to finish the job. Lo and behold, the list did get out and made Inside Radio and Billboard. "How could they have got wind of it unless someone from the station phoned it in? Are ratings THAT low, Clyde?" asks Alan Abrams in the *Toledo Blade*. He then speaks of an old ploy by WRQN 93.5 Bowling Green mailing a so-called "survey" to people who are "assigned" to listen to WRQN and evaluate programming, promising 25 cents per response to a children's charity. Problem is, only WRQN was "assigned" to be listened to.

"The AM/FM column in NY Newsday Aug. 5 says that classical station WNCN 104.3 is still looking for someone to host their upcoming morning talk show now that Jay Diamond, previously mentioned as a possibility, signed with WABC 770 and will do a show from 11 p.m. to 3 a.m.," says Jeannette Johnson. She found an old *Popular Communications* magazine (June '83), and "noticed your article in the Free Radio Focus column about building an FM translator using an FM receiver or tuner and two smaller radios. It was quite interesting, although you lost me beginning around the part where modulation is introduced into the translator, as I have no technical knowledge of radio. Almost didn't realize you had written this as they have the regular columnist's byline on the first page of the article, though he didn't write one word, and not until the very end do we learn that you were 'this month's guest columnist'." [Copies of that article are available from me for one dollar handling.]

Johnson goes on: "This may not belong in FMedia! but I heard two commercials that are sure to make parents throw fits--one for a company that gives skydiving lessons (on WBAB 102.3 Babylon NY) and one for a tattoo parlor, on WKHI 99.9 Ocean City MD (both rock stations)." Regarding Howard Stern, "If that gay SCStation goes on the air in NY, he'll probably want to order a modified radio from you--just so he can listen to it and make fun of it on his show!" [At \$105,000 per off-color incident per station he is on, it might not be profitable for broadcasters to put up with Howard much longer--b.e.] An SCS historical note: WFLY 92.3 Troy NY began what it said was probably the first commercial multiplex service, Jan. 15, 1956. "WFLY plans to sell its 'pickaback' music programs and other features to banks, factories, restaurants and other business houses."

Sports might be more prominent on NY FM if the Giants move from WNEW AM to WFAN, owned by WXRK. On days when there is a conflict with WFAN's carrying of the NY Knicks and Mets, the Giants might be heard on WXRK 92.3. In other NY news sent by Johnson, Arthur Liu has officially taken over WNWK 105.9 Newark from Global Broadcasting after Supreme Court

Justice William Renquist nixed last-minute appeals from Global. Cousin' Brucie Morrow's CBS radio show is being axed for financial reasons; he may not even remain on local WCBS-FM 101.1. The show cost \$500,000 per year to produce.

From the December 1953 *Radio Electronics*, Karl Zuk excerpted the "Radio Month" column: "Two FM programs on the same channel are made possible by an invention demonstrated by Maj. Edwin H. Armstrong and John Bose at Columbia University recently. The system provides for two high-quality FM programs on an existing FM channel. The second or side channel operates as a subcarrier of 27.5 kc, which is frequency modulated  $\pm 5$  kc, by the second program. The 27.5 kc subcarrier in its turn modulates the main carrier  $\pm 20$  kc. The frequency range of the second channel is 8000 cycles, and the 15,000 cycle range of the main channel is unimpaird. The signal-to-noise ratio of the side channel is 10 to 20 db poorer than that of the main channel, but still meets FCC specifications for a normal FM broadcast. Interference between the two channels was virtually inaudible. Four to six extra tubes are needed in the receiver to extract and demodulate the side carrier. . . The additional equipment may be attached to an existing FM set, though Major Armstrong strongly pointed out that only receivers with excellent noise discrimination characteristics could be used. The new transmission system immediately suggests the possibility of binaural broadcasting without cumbersome two-station setups now required. Other uses include a special news, sports or other service to a specialized audience, while the main channel could be used for high fidelity music or other types of general program. Revenue from the special program would offset costs of the general one." Zuk says "This must certainly be the birth of SCA. Since I can't possibly live without your FM information, I am sending in my subscription to FMedia! so I can see it first-hand instead of the hand-me-down copy I get from Monitoring Times." Karl writes an informative column, "American Bandscan" in that magazine; for subscribing information call (800) 438-8155.

Louis J. Sicilia sent much SCStation information, including the fact that the Korean newspaper and KBC Radio are connected, and they operate low power W53AA (TV) from the Empire State Building. "Just before signing on at 12 noon, while transmitting color bars, the audio usually carries KBC Radio (simulcasting with WQXR 96.3's 67)." And "I would like to share some memories concerning Edwin Armstrong's FM station, KE2XCC. It's referred to at times as WFMN but I never heard those call letters announced. I remember, in the early '50s it carried programs from the Continental Network.

The music was mostly classical and semi-classical and there were no commercials. I remember that after Dr. Armstrong's death, the station remained on the air for a month or two and the last day on the air featured his favorite selections. I believe that was in March or April of 1954. The tower in Alpine NJ has been in use since 1971 by WFDU, Fairleigh Dickinson University, Teaneck NJ, at 89.1 mhz. . . Finally, I object to the comment in the August issue from a reader regarding WPLJ's (NY 95.5) dropping rap recordings from 'American Top Forty', suggesting that WPLJ might be racist. The fact is that since WPLJ changed to a more adult contemporary than a top 40 format, rap just doesn't fit in. There are also many black people who don't care for rap. It's simply a matter of musical likes and dislikes." He also sent an undated article, "Subcarriers: Hitchhikers on Our Cities' FM Airwaves," written by freelancer Jon Kalish.

"Hurricane Andrew brought to focus a major problem with satellite-driven FM stations," observes Mike Dorner. "In Houma, live country music KCIL 107.5 did a yeoman service with live call-ins and remote reports all during the hurricane. KHOM 104.1 Houma, with transmitter midway between New Orleans and Baton Rouge, ran oldies on a satellite feed. The night the storm was bearing down on Houma and Morgan City, it was running oldies live in the studio with occasional halts to cover the storm. . . I sure don't want to hear oldies when a storm is bearing down on me. Say what they want, satellite programmers cannot dispute that slim-staffed satellite-fed stations do not have the resources to service their communities when the chips are down. . . Late item—KHOM is now 'live' and bills itself 'the new KHOM'. A lesson learned?"

**Special Historic Feature, Part I (to be continued)**  
**Religious Stations Account For Much of the 92-108 mhz Activity on the FM Dial in Minneapolis-St. Paul (MN)**  
 By Bruce F. Elving, Ph.D.

The Twin Cities' FM dial is unique in that three of the prime commercial frequencies are taken up by noncommercial, religious stations. KNOF \*95.3 is a monophonic Pentecostal station, with many paid programs, plus upbeat gospel songs. KTIS-FM \*98.5 is the oldest FM in the Twin Cities from point of continuous operation; indeed, it was the only FM station on the air in the market from late 1954 until late 1956. It is the highly successful key station of the Skylight Satellite Network, and is the flagship of the Northwestern College radio stations. WCTS \*100.3, owned by Central Baptist Theological Seminary, is similar to KTIS-FM, but has more conservative religious music in stereo, and with no national preaching programs. An agreement has

been reached whereby WCTS is being sold to VerStanding Broadcasting for \$10 million and become commercial. WCTS, in turn, is buying WMIN AM 1030 kHz, Maplewood, for \$1.5 million.

#### AM Still a Factor

AM radio remains strong in the Twin Cities, with WCCO 830 having the largest share of audience among any single station, although several FM stations are centimetering toward 'CCO's lead. WCCO and its FM, WLTE, were sold to CBS in 1992; CBS owned WCCO in the 1940s—up to 1952.

#### Public Radio—Strongest in the Nation?

Probably the strongest bastion of public radio in the country is in downtown St. Paul, where Minnesota Public Radio has its studios and control centers for two networks—one a largely classical music network in stereo—and the other a monophonic news and information service, both with transmitters and translators serving much of the state. Uplinked by satellite are also Minnesota's Radio Talking Book network for the blind, which is carried by many MPR stations plus a few commercial stations, utilizing an FM subcarrier frequency. MPR is a founding member of American Public Radio, and is known for bringing Garrison Keillor and his highly popular *American Radio Company of the Air* to the nation. It also owns the Minnesota News Network, a service to commercial stations, and operates in conjunction with successful publishing and direct-mail selling ventures to consumers. The Radio Talking Book network was the first radio reading service in the nation, having started in 1974.

An unusual development occurred in early 1991 when commercial rock station WLOL 99.5 was bought by Minnesota Public Radio for \$12 million from Emmis Broadcasting. The Minnesota Broadcasters Association filed a petition to deny the

**WLOL 99½ FM**  
 716 North First Street  
 Minneapolis, MN 55401

transfer with the Federal Communications Commission, and non-MPR public stations were also concerned. The FCC, however, promptly approved the sale. This enabled MPR to establish its dual-network service in the Twin Cities on FM. Classical music moved to 99.5 as KSJN, disrupting the dance-rock format which was WLOL. What was KSJN on 91.1 changed to KNOW-FM, dropping its stereo to become fulltime monophonic, even though carrying some music, such as the weekend *American Radio Company of the Air*. It is said that 30 former WLOL employees lost their jobs. . .

SCServices, 57, 67, 78.67, 92 kHz  
 Symbols are as in the "FM Atlas"

DC Washington communications attorney ordered FM Atlas-11 to see what SCStations in the area existed in 1987-88 for a lawsuit he is engaged in: Korean Broadcasting Company?  
 MA—FMX a turn off nationally? Seems last station with it was WODS 103.3 Boston. A new SCS customer at 92 kHz was afraid FMX would interfere. No evidence of interference, but 'ODS turned it off; only one listener had FMX, a guy in NH who would call whenever there was a problem with it. No other stations are known to have FMX anywhere!  
 MN Brainerd KLIZ-FM 107.5 tS, 92 (from tC, relaying AM only during baseball season); retains tM, 67 [keeps tM, 67  
 MN Walker KLLZ 99.1 tS, 92 (from tC),  
 NJ East Orange WFMU \*91.1 tD, 57, no other SCSES. Was testing tE, 92, Haitian music.  
 NJ Newark WBGO \*88.3 "RMN" is on 92, not 67; "and Manila has only one I." [See Nov., p. 3, col. 3.] [kHz, resumed  
 NY New Rochelle WRTN 93.5 tX, tone, 67/  
 NY New York WKCR \*89.9 testing music on its 92, tM. Its 67 continues to be tT, "In Touch" for the blind. The 92 music seems to be from a CD player, "with music by the Ink Spots, Nat King Cole, Johnny Mathis, plus oriental and classical discs, so who knows what this is gonna be?"  
 WFUV \*90.7 main channel format to fj. Its signal stops short of Brooklyn and Staten Island until it goes to 150 m, which should

happen in 1993. "New York radio is boring—it's like audio Valium," said Jimmy Buff (part of the team with Curt Chaplin who is buying time on WNWK 105.9 for the show they call *Radio Free New York*, heard 6-9 a.m. daily). On SCS it is still tE, 67, but no longer is there a 92. Off is the announcement about leasing the SCA.  
 WNYC-FM \*93.9 tZ, 67. In August it was used for a couple of weeks to relay WNYC AM, "but has been quiet since."  
 NC Statewide public TV will have the reading service on SAP, as well as on FM-SCS. Goal is to have 98% of the state covered. Public TV in Raleigh and Winston-Salem features RRS during the day and early evening, after which DAV, descriptive audio video, takes over.  
 OH Cleveland WGAR-FM 99.5 t(D), 57, RDS  
 WA Tacoma KVTI \*90.9 tD, 57, Seiko's Receptor system, having expanded to the Seattle-Tacoma market from Portland OR. "1-81 began broadcasting on its new 51,000-watt transmitter that reaches from Seattle to Centralia. The deal with Seiko helped make that more powerful transmitter possible." KVTI refused to say how much the 15-year deal with Seiko pays.  
 KBTC-FM \*91.7 t(D), 57  
 BC—BCTV now provides a translation of its "News Hours" for Cantonese viewers on SAP, a 60-minute nightly program; plans to expand to sister CHEK-TV Victoria. "The World Series presented a problem: there's no Cantonese expression for 'home run'." "By the way, my GE 7-2885 radio [with SCS] is great! Thanks."

AM Happenings Most Likely Caused by FM

AL Parrish WKIJ 1130 call letters deleted by FCC; station had been silent  
 CA KGIL 1260 will soon start simulcasting KJQI 540 "for complete coverage of the L.A. market. KGIL is In San Fernando and KJQI Orange County CA. They are both owned by Los Angeles CA classical FM KKKO" 105.1. CA Thousand Palms KP5L 1010 returns to air with classical, but it is only on from 10 a.m. to 10 p.m. daily. "The station had been silent since May 15, 1992. In a rather ironic move, its sister station, KZAL 105.5 FM Desert Center CA, is now silent and will remain so until a new transmitter site is found."  
 CO Walsenburg KFLJ 1380 FCC dismissed renewal of license; station silent  
 CO Limon KLIM 1120 silent  
 KY Glasgow WCDS 1440 silent  
 KY Hyden WSLK 1600 FCC dismissed renewal of license; station silent  
 ME Gorham WASY 1590 off the air "because of problems at WZON 620 AM Bangor." WZON still on, but drops most local programming.  
 MI Grand Rapids WLAV 1340 picks up the "alternative" (p) format dropped by WLAV-FM. "But it's being done on the cheap—with none of the old WLAV staff retained; rather 1340 AM is run by college kids. No commercials heard as yet, either. The AM picked up this format simply to try to deflect criticism for the FM change."  
 MS Prentiss WKPO 1510 FCC deletes call letters. See also FM Deletions, above, Lake Arthur LA.  
 NJ Newark WNJR 1430 back on air with new owner who turned it into a "mix master," with multi-ethnic programming, including Haitian French—competing with several SCSES, and other black programming.  
 NY New York WNEW 1130 temporarily simulcasts the k sounds of co-owned WYNY 103.5, until Jan. 4, when the ownership transfer takes place and it becomes all business WBBR. Middle of the road music now on WQEW 1560 (formerly WQXR AM).  
 NY Schenectady WGY 810 and FM 99.5 file for bankruptcy protection. The AM is one of the industry's oldest, owned by General Electric, 1922-1983. Debt payments cannot be made, "especially in light of a recession that has hurt businesses that depend on advertising for income." Once the bankruptcy action is approved a buyer in the form of one of the creditors, Pegasus Capital, Inc. of Philadelphia, is considering making a bid for the company. Among listeners 12 and over WGY AM is No. 3 and the FM No. 8, according to the most recent Arbitrons.  
 PA Mount Carmel WMIM 1590 silent. "WMIM was acquired by WISL 1480 as part of the WSP1 (Shamokin) purchase. There is talk of donating the station to a local school."  
 SC Greenwood WLMA 1350 (had been WGSW, silent) back on with all talk.  
 SC Ridgeland WNFO 1430 had been silent; back on with tourist information.

TX Cibola (San Antonio) KBUC 830 silent  
 TX Georgetown KOPY 1530 silent  
 VA Danville WDMA 1260 silent  
 WA Bremerton KBRO 1490 silent  
 WV Huntington WHRD 1470 had been silent;  
 back on with tourist information  
 "Hi, Bruce, keep up the good work!"  
 "Have a great holiday and I'm looking forward to  
 another year of FMedia!"  
 "I'm glad to read that you plan on continuing  
 FMedia indefinitely. FMedia is now my sole  
 source of radio news: I can't afford the 'M Street  
 Journal' and have no access to "Broadcasting,"  
 and dropped out of NRC due to lack of interest  
 in AM. . . Keep up the good work--and thanks!"  
 "I was very surprised to see material in the  
 November issue that was not intended for  
 publication. I thought my comments were  
 appropriate to send to you personally. . . I guess  
 I'll have to be more specific in future."  
 "Thanks for holding the renewal rate at \$45 per  
 year, and good luck in continuing FMA and  
 FMedia!"  
 "You really should raise the rate. . . It's worth it,  
 and you must spend an awful lot of time on it."

**FM Rulemakings Proposed**

**Stern's Antics Draw Angry Protests**

A Filipino broadcaster challenged  
 "shock jock" Howard Stern, whose pro-  
 gram originates at WXRK 92.3 New York,  
 to a duel over remarks Stern made, such

**Stern**

cast literally heard around the world--over  
 41 RMN (Radio Mindanao Network)  
 stations, including "WRMN" on the 92  
 kHz SCS of WBGO \*88.3 Newark. A  
 subscriber says "WRMN" refers to a  
 "CowardStern." Apparently not interested  
 in explaining to their readers what SCS is  
 in the context of their Stern reportage,  
 none of the local NY newspaper stories  
 mentioned "WRMN," although "WRMN"  
 broadcasters were interviewed. Cruz said  
 he'd be willing to face Stern "any time,  
 any place" in any type of duel. And the  
 Filipino-American Citizens Group is suing  
 Stern for \$65 million in a NY court,  
 charging that he insulted "the entire  
 Filipino race" with his remarks.

The most serious threat to Stern and  
 the stations carrying his show is from the  
 United Snakes' Federal Communications  
 Commission, which had fined three sta-  
 tions which carried a "Christmas Party"  
 bit four years ago \$2,000 each. Those  
 stations are WXRK, WYSP 94.1 Philadel-  
 phia and WJFK-FM 106.7 Manassas VA.  
 [January, '91, p. 7, col. 1.] That is not to  
 mention the \$105,000 fine imposed by  
 the FCC last month against KLSX 97.1,  
 another Stern affiliate [buried in Nov., p.  
 6, col. 1; p. 7, col. 3]. The morning hours  
 of Stern's show are clearly outside the  
 FCC's "adult" hours of midnight to 6  
 a.m.

It took one Al Wescott, 45, Las Vegas  
 (who head Stern while in L.A. and NYC)  
 to nail Stern after taping and transcribing  
 about six weeks of Stern's morning show  
 and calling it to the attention of the FCC

in such a way that the agency responded.  
 Westcott submitted an 11-page document  
 listing "47 specific instances which I  
 found to be possibly obscene and indecent."  
 He contacted potential sponsors of the  
 shows and said he succeeded in convincing  
 12 companies that had bought time on  
 KLSX to pull their ads from the morning  
 show. "I used that in my complaint with  
 the FCC to establish that these companies  
 didn't want to be associated with the  
 show because it didn't meet contemporary  
 community standards in the Los Angeles  
 area. It was up to the FCC to determine if  
 my examples were obscene or indecent  
 and they obviously determined they were,"  
 Westcott said. Stern's program--a triumph  
 for FM radio over AM?--has the largest  
 morning audience in Los Angeles, New  
 York and Philadelphia.

Groups like the American Family Associ-  
 ation (WAFR \*88.3 Tupelo MS), and  
 Morality in Media have reportedly been  
 involved. A former Stern fan, Joe DuPont,  
 has been onto Stern for a couple years,  
 pointing out things to the FCC that  
 elicited no response until Wescott got  
 results in the form of a massive FCC fine,  
 which may be multiplied by each station  
 carrying the show. In 1990, DuPont  
 wrote most of Stern's advertisers, suggest-  
 ing that they take their products off such  
 a show. Several promised to pull out,  
 including Rickel, Sears, Uniroyal and  
 Radio Shack. Exxon and Chrysler said  
 they were concerned. Great Bear, The  
 Wiz, the New York Lottery, Nintendo and  
 others said they would stay in. WXRKnew  
 of DuPont's work, but claimed it has no  
 trouble selling ads in the show. Forging  
 ahead, DuPont sent a letter to Mel  
 Karmazin, Infinity Broadcasting [WXRK]  
 chairman, claiming Stern "could jeopardize  
 the entire future of your organization,"  
 leading to an FCC crackdown that could  
 spell censorship throughout the industry.  
 DuPont himself listens mainly to John  
 Gambling (on, horrors! AM radio), but  
 thinks Stern sidekick Robin Quivers is  
 fantastic. "If she had her own show, I'd  
 listen to that," he exclaimed.

Expectedly, KLSX's \$105 K fine is  
 being appealed, but if the FCC expands  
 the fines as expected to \$315,000 for  
 different stations carrying the show, it  
 would be the largest ever imposed by that  
 agency. James Quello of the FCC ("who  
 admits being a fan of Stern's but thinks  
 it's time for Mel Karmazin to 'take him to  
 the woodshed'") said a "public outcry"  
 from Sen. Jesse Helms, *Focus on the  
 Family*, and Phyllis Schlafly's *Eagle  
 Forum*, and the other groups mentioned  
 above prompted the FCC action. The fine  
 could expand to \$750,000 and cost  
 Infinity a \$100 million deal to take over  
 Cook Inlet properties (notably WUSN  
 99.5 Chicago), and the FCC might hold  
 hearings into Infinity's fitness to be a  
 broadcast licensee. Infinity would have a  
 lot to lose: it is said to be the most  
 profitable radio group in the nation.

Karmazin says cracking down on Infinity won't muzzle Stern since "he's already airing on stations we don't own."

Before the election, Stern encouraged listeners to vote for Clinton and help end his problems with the FCC, and mocking religion, he said he was "praying" that the prostate cancer recently treated in FCC Chairman Al Sikes would spread to his other organs. Don't expect the anti-Stern mood to change when a new administration takes over next month. Al Gore, who will oversee U.S. telecommunications policy, will be responsible for filling two FCC seats—and Democrats are known to be more activist in government than Republicans. Stern himself said the \$105,000 fine was "completely insane. . . \$100,000 is for all the dirty stuff I said and the \$5,000 is for the big parties they throw themselves over at the FCC. A kid can't spend five minutes on a playground without hearing much, much worse than what I ever said on this radio station. I'm so sickened to my stomach . . . by this FCC and what's happened in my lifetime with censorship."

Infinity Broadcasting was one of the groups filing comments at the FCC not to cite stations for indecency unless the Commission can prove there are an "appreciable" number of listeners under 12 out there. The comments were filed as part of a brief against a proposed overnight indecency ban. Other parties joining in the brief were the National Association of Broadcasters and the major TV networks.

An industry voice raised against Stern is Woody Tanger, president, Marlin Broadcasting of Boston, and owner of WFLN 95.7 Philadelphia, among other classical-formatted stations. Using his own airwaves, Tanger said, "It's the first time in 43 years that the station has done an editorial," and he said he was trying to rally other broadcasters around the country to the menace that Stern poses to the industry. "We are not going to let Stern get away with this," Tanger railed. "Stern got me on the air the other day and he refused to apologize for what he had said. If George Bush can apologize for some of his remarks, so can Stern. I've heard that Sikes' family is extremely upset by his remark. But any family would be. I'm not against freedom of speech, but people don't have the right to yell fire in a theater, incite a riot or intentionally inflict emotional distress on any individual. What Stern said was disgusting. He's a bully. And I hold Infinity Broadcasting personally responsible for the mess. They ought to be ashamed of themselves. Broadcasters who do not stand up to Stern are abdicating their responsibility to police themselves and are inviting government intervention."

Scraping the barrel, Infinity has hired Doug (The Greaseman) Tracht, 42, to join

the group when his pact with WWDC-FM 101.1 Washington DC ends next month. Tracht will relocate to Los Angeles, where he will most likely be heard on KROQ-FM 106.7 and beamed to other stations. Said the NY Daily "Snooze," "What's the world coming to? Stern in the a.m. and the Greaseman at night. Pass the Excedrin." Tracht's salary was not disclosed, "but the shockjock reportedly turned down a five-year \$6.5 million deal last year to remain at WWDC." [See Sept., p. 6, col. 2, "Fetching Fines."]

It's not just Stern; a whole generation will have grown up listening to major market rock stations having audio sleaze; it all started with Bob and Tom at WFBO 94.7 Indianapolis, and despite efforts by Attorney Price and others, that show continues, although with advancing age those hosts may be mellowing. This all spells an interesting conundrum for the new FCC to grapple with in '93. Stations with formats other than rock/talk might be candidates for "audio sleaze"; Tanger's own group next?

#### Scuffles Among and About Public Broadcasters Leave Tarnished Images

A self-appointed gadfly by the name of Glenn Heller has emerged to challenge the proposed takeover of WBBS 105.1 Great Barrington MA by publiccaster WAMC 90.3 Albany NY. Heller claims WAMC is not fit to hold an FCC franchise because it has only one Hispanic woman in a 27-person staff and no other minorities, it "has a history of contempt and disregard for the opinions and good-faith criticism of listeners that bears on its fitness as a licensee, that WBBS is the only commercial FM in the South Berkshires and assigning it will remove any possibility of a viable commercial FM being established there, and that WAMC is 80 km away and cannot possibly deal with community issues where the original FCC license was granted. Heller has had problems with government before—being fined \$204,000 for selling gas at inflated prices between 1976 and 1979, when he owned a station in Boston, but he has not paid. Alan Chartok of WAMC said that the station in 1991 hired 14 new staffers, including two blacks and one Hispanic; that area-wide news would be covered, including local weather emergency news; and that the area is underserved by public radio because of its hilly terrain. He claimed the station is responsive to public needs, citing a "listener-reaction phone line, and letters from listeners published in the station's monthly program guide." In its most recent fund-drive the WAMC stations raised \$272,722 from 6,080 callers, 2,000 of whom were new members. Said Chartok, "We're just overwhelmed by the love and generosity of our listeners. We do it the hard way, by 25s and 50s, one pledge at a time. People just keep coming through. It's incredible."

Rival WMHT-FM 89.1 Schenectady didn't do as well. It had a goal of 2,000 new members but only attracted 1,157 for a total of \$78,346 from new and renewing members.

Dissatisfied former members of WHYY 90.9 Philadelphia have filed a class-action lawsuit seeking to force the station to reinstitute its classical music format, or at least refund donations. The suit contends that WHYY deliberately misled the classical music fans into donating money, while all the time "secretly plotting a format change." Apparently the listeners had been trying to persuade the FCC, but "the FCC never did want to get involved in a station's program content. These people have been fighting the station for weeks ever since the announcement about format change was made," says reporter Bill Fahber.

Across town, WXPB 88.5 has dumped NPR. "We're doing this for two reasons," said manager Mark Fuerst. "First, the money (\$50,000/year). We want to use that money to improve local programming and *World Cafe*. Second, we want to cut down on duplication" with public stations WRTI 90.1 and WHYY.

KLON 88.1 Long Beach CA lost its news staff due to budget cuts, but the program director told subscriber Marc Marino that they expect to get some news people back in a couple of weeks.

Iowa's public broadcasters aren't too cordial to each other when it comes to translator expansion. A plan by KUNI 90.9 Cedar Falls to put a translator into Des Moines has run into opposition by WOI-FM 90.1 Ames. A report by the staff of the Iowa State Board of Regents said that its fund-raising effort in Des Moines "would be hurt if a KUNI translator were to be established for the same market." The proposed KUNI relay would reach about 60 percent of WOI's listeners, and an analysis by ISU showed only about 25 percent of KUNI's programming is different from that provided by WOI (AM-FM?). The report mentioned areas of the state with poor public radio where translators are more needed—Ottumwa and Fort Madison. Until recently, KUNI was available via Heritage Cablevision in Des Moines, but recently the cable firm decided to go with a satellite-delivered digital radio service. KUNI's rebroadcaster would be on a tower used by KDPS 88.1 at a cost of \$1200 per year. Doug Vernier of KUNI said the regents set a precedent when they agreed last spring to allow KSUI 91.7 Iowa City to broadcast in Dubuque, where KUNI had a translator (\*98.3) for years. The Dubuque translator has not yet been granted by the FCC.

Another case of public broadcasters protecting their turf when it comes to translators is reported by Kurt Tuckerman: "I own W272AT [102.3] in Columbus OH. I think I have an unusual situation in

that I located my translator in a very populated area. I meant to target the young listeners of the O.S.U. campus area. You see, OSU, a very large university, plays classical and news and uses no students. Unbelievably, with a five million dollar annual budget they are worried about me! They succeeded in pressuring the first station I was repeating, WVXU \*91.7 Cincinnati, into withdrawing their permission to me. WCBE \*90.5, the Columbus Board of Education station, also uses no students, and also was a participant in this maneuver. Finally, by employing a Scala 2CA5-150 array, vertical, with two Tel-Wave eight inch cavity filters, and advanced gas-fet preamp, I am able to get WDUB \*91.1 Denison University, Granville OH, on a good day.

"This college is upper-class, so they don't solicit donations on the air, which seems to be keeping the money-grubbers off my back. But, more importantly, they use an all-student staff and DJs, and play whatever they want. My translator is located within a kilometer of one Class C, five Class Bs, a Class A, TV channel 10 an 800 trunking system and hundreds of two-ways. I located on top of an old folks' home which had never allowed anything else, so at least I have the elevator shack to myself. One message per day is for the old folks' home, the rest I try to get sponsors. WDUB is erratic, though, off the air May-September and off air a lot during the year also, which sponsors don't get. I will try to get a fill-in station for the summer—if there is any I can reach that aren't afraid. Another problem is the Channel 6 TV here. They have been historically paranoid about their grade B contour, so even stations 55 miles away have to run vertical, sometimes as little as 100 watts, like WDUB, so my choices are slim. With all the RF problems, I decided to buy all the best and new. I drive a \$200 Chevette, but I bought a Tepco 10-watter with modulation and both types of receiver sections to experiment with, the analog and digital, and polyphaser panel for [lightning] protection, a Shively one bay circular-polarized 6812, 7/8 inch Andrew line to the translator and half inch from the receiver. I will get a power increase shortly to 50 watts, which I was afraid to apply for at first because of an IF problem with a religious group nearby. He lost, though, I heard because he rubber-stamped his name on the application, so I can go up, but not to 250 watts because of Canada. You should try to get free rent for ads instead of paying. I'm only at 140 feet, but with my increase I have a .5 mv/m contour covering 330,000 people. Henry Radio is making a 250 watt power amplifier for \$1,000 that is Part 73 acceptable. I talked to their independent lab man before I specified it on my 349 and they indeed are paying to have it legal."

#### Small Print Happenings and FM Industry News

Other public stations in the news—WVGR \*104.1 Grand Rapids MI received \$94,624 from the U.S. Department of Commerce's Public Telecommunications Facilities Program for equipment upgrades, including a new receive system, most likely microwave, from parent WUOM \*91.7 Ann Arbor, and to make it easier to do specialized programming for the area. WMPG \*90.9 Gorham ME is being investigated by the student senate of the University of South Maine for an unhealthy work environment. Currently two police investigations are going on; the station's record library was robbed over the summer and "one staff member has a protection order out on another." An anonymous newsletter has circulated among the staff, and it contained a threat against the station manager. The student senate said it did not want to interfere with the day-to-day operation of the station, just to create a "healthy work environment for our employees, our staff" and targeting problem areas.

WUPQ97.9 Newberry MI to become noncommercial if FCC sale application approved. Northern Michigan University (WNMU \*90.1-WUPX \*91.5 and TV) wants to buy it for \$140,000. NPR, which includes WNMU as an affiliate, plans a move next fall to 635 Massachusetts Ave., N.W., Washington DC 20001.

Public FM listeners and public TV viewers have a toll-free number for calling and expressing opinions as to whether programs appear to be balanced or not. Call (800) 356-2626 or write the Corporation for Public Broadcasting, PO Box 50880, Washington DC 20091-0880. When federal funding for public broadcasting was questioned by conservatives, Congress enacted more accountability rules while approving \$1.1 billion for public radio-TV through 1996. The toll-free number is part of that accountability process.

The FCC has warned broadcasters that failure to safeguard tower workers from RF radiation could result in fines. This particularly affects popular FM stations. The FCC said: "The licensee may not refuse to reduce the power on the grounds that it could result in a temporary loss of advertising revenue. Further, the licensee may not avoid complying with . . . guidelines even if a particular tower crew is willing to accept RF exposure levels."

Media maverick Tom Gammon has given up trying to move WHMA-FM 100.5 Anniston AL to a suburb of Atlanta GA. Instead, he's selling the station, along with its AM and KIZS 94.7 Carson City NV. He found running a radio station more expensive than running a brokerage business. He said he spent \$660,000 to check more than 2,000 potential move-in sites around the country "and will personally lose more than \$1 million."

Top 40 FM radio could be closer to reality in Canada, with the CRTC accepting applications from stations that want to reduce their library size and eliminate the maximum repeat factor requirement. Canada FM will still, however, have to deal with a 50 percent non-hit requirement as well as Canadian content rules.

The CRTC is also cracking down on easy-listening stations. They have been allowed to broadcast only 35 percent instrumental, but most stations have "buried" that music at night. The CRTC has told them to distribute the instrumentals throughout the day, or apply for adult contemporary licences. The CRTC's actions are seen as affecting notably CHQM-FM 103.5 Vancouver and CJEZ 97.3 Toronto.

It's designed to help Canadian stations select their instrumental music and is the brainchild of Paul Richards, CHAY 93.1 Barrie ON, still a b station, and is called "Project Easy." The project has to date produced 25 original selections in year one and 73 on five CDs in year two. "Paul reports positive response from the U.S., as well as Canada," says the Canadian periodical, *Broadcast Technology*. Call CHAY at (705) 737-3511 and help the concept spread!

In duopoly/LMA news: KSFI 100.3 Salt Lake City has a local market agreement with option to buy KRSP (FM) 103.5. The FCC granted transfer of control of KCML 107.5 Hanford CA to Harry J. Pappas, owner of 99 percent of KMPH (TV-26) Visalia-Fresno. The transfer was OKed because it involved stations in the top 25 markets with 30 or more signals, and it involved at least one "failed" broadcast station. KFRG 95.1 San Bernardino and KQLH 92.7 Riverside CA plan to merge; KQLH are the former calls used on 95.1. WHRS-FM 100.1 Winchester-Lexington KY being bought by Trumper Communications, which plans to merge it with WMXL 94.5 and AM. WCQL-FM and AM York Center ME-Portsmouth NH has turned over its sales to rival WHEM 96.7 and AM Rochester NH, which also launches WXBB 106.3 Kittery ME, "giving it a grand total of five stations in the Portsmouth area to sell," according to the *M Street Journal*. WAVZ AM New Haven CT, which owned WAVZ-FM 95.1 in the late '40s and early '50s, has finally come to the realization FM is here to stay. It agreed to be sold for the grand total of \$10 to Clear Channel Communication, owner of WKCI 101.3 Hamden-New Haven CT, which had been LMAing WAVZ anyway. WIBM-FM 94.1 Jackson MI has entered an LMA-to-buy with WJXQ 106.1; they're the only two FMs licensed to Jackson, but it's considered part of the Lansing market, so the two locals can become same-owned.

In fine happenings, Eagle 106, WEGX, hit for \$5,000 by the panhandling FCC for recording for broadcast a phone call without informing, uh, the victim. Seems morning man John Lander makes "nutcracker" phone calls in which he lies about who he is and then has fun with the callee. "It can be great radio—unless you're the target," said Joe Logan, Philly Inquirer staffer. "This time he accused a woman of stealing something during an open house. She was not amused" and asked "EGX not to air the bit, but the station denies that. After it aired, she complained to the FCC, who said something like, "hey, you're not supposed to record people unless they know it. Word is, lots of stations do it, but the FCC decided to make an example of "EGX," said Logan. Footnote to the story is that the woman's sister asked the station to make the call, thinking she'd get a laugh out of it. WRSF, "Dixie 106.7," fined \$20,000 for "willful, continuing violation of the Commission's rules by relocating its main studio outside the station's principal community contour." WRSF contended unsuccessfully that the new site would "enable the station to attract a broader sample of guests for public affairs shows." KWOD 106.5 Sacramento CA fined \$10,000 for using pirated copies of the Selector music software, but owner Ed Stolz said he will appeal.

Commercial Christian FM station KCGN 101.5 Ortonville MN ended its three day "care-a-thon" with \$92,460 pledged to the nonprofit Windsent, Inc., which operates the station. The entire station budget is \$190,000. "Specialized media often scrambles [sic] signals and requires a subscription. Windsent doesn't operate with subscriptions or monthly bills for the listeners; it operates on the "honor system." [Romans 15:27, which they paraphrase to read: "If you've come to share in their spiritual blessings you ought also to be of service to them in material blessings."]

The NAB has opposed an FCC staff decision encouraging the greater use of directional antennas at FM stations, claiming this will "only lead to the same kind of interference and overcrowding problems" that hurt AM.

From the classifieds: Campus "leaky cable" station "KSCR" 104.7 needs donated cars, 5 minutes or longer. Call Duncan Shaw from 2-6 p.m. PST at (213) 740-5727. Better do it early this month when school is in session. The other station across the USCampus is KUSC \*91.5, and Lyle Henry, its chief engineer, recently paid a friendly visit to the student station. Henry is an SCS guru who has lectured in China on the subject.

Speaking of 104.7 FM in lower CA, Jon Bruce

has picked up a pirate on that frequency in the Banning-Idyllwild area, a "KCHZ," with new rock, "but it is only on the air on national legal holidays! A recent call to the owner (he gave his number over the air) revealed he has 80 watts at about 91 meters off the ground. . . It was overriding nearby Class B KDES-FM Palm Springs CA in spot!"

FM/SCA space available in Dallas metroplex area. Ron, (713) 473-5585.

Lafayette Radio Electronics catalog, 1964, its 43rd year, for sale. Very good condition; see 2N2222s priced at \$6.75 each (now they're about 25 cents), read about the latest receivers/tuners from Pilot, Sherwood, Bogen, McIntosh, and of course Lafayette. Find out what life was like without CDs and even the lowly cassette recorders. \$20, me.

**Special Historic Feature, Minneapolis-St. Paul FM Station History, Part II:**

Another change is that the background music subcarrier which had been on WLOL's 99.5 spot since about 1957—and indeed was the reason for creating WLOL-FM in the first place, according to a 1958 article in the magazine *Hi Fi Music At Home*—was moved from that station to KSTP-FM "KS-95" 94.5. FM listening in the mid-'50s was so low that by coming on the air with a Muzak subcarrier the station was assured a revenue source and could program something else to the public. FM subcarrier broadcasting was a newly-authorized service, and it preceded FM stereo, which did not come to the market until 1961 when easy-listening WAYL 96.1 bought a stereo transmitter which had been used by Jim Gabbert's KPEN (later KIOI) San Francisco. WAYL subsidized its operation for many years by broadcasting in-store to IGA outlets from 9 a.m. to 6 p.m. KWFM 97.1 embraced stereo in 1962. WLOL-FM started out in 1956 simulcasting its rock music AM on 1330; later that 1330 frequency would become "KNOW (AM), owned by Minnesota Public Radio. MPR has been trying to sell KNOW; if sold it would change call letters and probably become commercial.

WLOL-FM displaced the former WMIN-FM, which had departed the 99.5 frequency by 1954. WMIN-FM, "The News of the Hour Station," for a brief

FRANK M. DEVANEY  
GENERAL MANAGER

time around 1951 offered Transit Radio—music, commercials and short newscasts to bus riders. It was one of only 20 such FM stations in the nation ever to have offered bus radio—another being pioneer WEBC-FM Duluth MN.

**Early Commercial FM the Scene of Classical Music Battles**

During the late '50s and most of the '60s, KWFM 97.1 and WLOL-FM were to engage in a fierce competitive battle as commercial classical music stations. However, even the snob merchants on Nicollet

Avenue were loath to advertise on FM, and it remained for Minnesota Public Radio to take the impetus and go directly to listeners, business owners and foundations for support. An attempt by KTWN 107.9 Anoka in the '70s to offer a commercial classical format failed. Signal problems were cited, along with Minnesota Public Radio's ascendancy.

Except for a brief fling at simulcasting in late 1956 on WLOL-AM-FM, there was no rock on FM in the market until the mid-1960s when KQRS-FM 92.5 and WRAH 101.3 offered the format. Country was to wait until the advent of KTCR-FM 97.1 in the late '60s; the 97.1 spot is now KTCZ "Cities 97," an FM-AM simulcast of contemporary music mixed with jazz. Country has moved to KEEY "K-102" 102.1 and KJJO-FM "Thunder 104-1." Urban contemporary is largely the province of KMOJ "89.9 "FM-89.9." KBEM "88.5 is a jazz station owned by the schools, and its schedule is punctuated by local traffic reports; its frequency is mentioned on area highways as the place to tune for such reports. WCAL "89.3 Northfield has moved its transmitter to just south of the St. Paul city limits, and now covers the entire Twin Cities market. It retains its old site just north of Northfield as a standby. WCAL, a Lutheran station, offers classical music, jazz, a morning Chapel Service, and is an alternative to Minnesota Public Radio. KFAI "90.3 is an alternative to everything, as a community station, licensed to Fresh Air, Inc.

Lacking in the market's FM picture are Christian contemporary and easy listening. Easy listening vanished when KLXX took over the former WAYL facilities on 93.7 in 1989—its ratings with rock never as high as when it was beautiful music in stereo. It is now KRXX "93-X." Poised to come on the air from the southern suburbs is KZPZ 105.1 Lakeville MN, which has been heard testing in stereo. WLOL (formerly KXLV 105.5) Cambridge MN has upgraded on 105.3 and claims coverage in the northern metro area. KWNG "K Wing 106" 105.9 Red Wing is to upgrade to where its strong primary signal will come close to St. Paul. WIXK-FM 107.1 New Richmond WI reaches to near St. Paul, as does WEVR-FM 106.3 River Falls WI, but neither promotes or programs to the Twin Cities. To come on the air probably in 1993 is KOOU 105.7 Eden Prairie MN. . .

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

John Ebeling comments on the Minneapolis-St. Paul FM dial history (next month, and printed in part in the Pavek Museum of Broadcasting Newsletter). "WNOV '89.1 [St. Paul] was not on in 1954. Doubtful they were ever on! I moved down here [to Bloomington MN] Dec. 14, 1952 to attend then Northwestern Vocational Institute. They (the school) had moved from St. Paul to south Minneapolis (38th and Minnehaha) during the summer. My class was the first to start at the new location," but its radio station was not on the air—not until the founding of KWFM 97.1 in 1956.

Mike Cherry sent an article from the Rohde and Schwarz newsletter mentioning the expansion of FM sound broadcasting in Portugal. FM stations there are 1) national programmers covering the whole country; 2) regional broadcasters covering the north or south part; or 3) local broadcasters serving only small areas and specific target groups. A regional broadcaster is Radiopress, serving north and central Portugal. Founded in 1989, it has 50 kw FM stations in Porto, Lousã and Marçã, and 10 other stations of 10 kw power. Tower sites appear to be at high elevations, and programming caters to young people "with international pop music."

Tuning in TX FM stations is Paul Hake who airchecked KJCR "88.3 Keene TX, "the SDA station in the SDA town," where even the post office is open Sundays and closed Saturdays. "The programming was true stereo, but the audio fidelity was lacking in frequency response. . . I remember a while back, reading about talk radio on FM possibly becoming a trend in the major markets. Although I wouldn't mind this happening, I have concerns that as talk radio moves to FM, it may displace some musical formats, moving them from stereo hi-fi FM to virtually mono, lo-fi AM. In my opinion, talk radio needs to maintain its prevalence on AM, to enjoy the benefits of long-distance reception and the lack of a need for stereo, thereby allowing musical programming to remain on FM. . . Dallas-Fort Worth has four fulltime 100 kw stereo FMs with a country music format, with the switch to classic country on 94.9 (formerly '60s and '70s rock oldies). The new KYNG "Young Country" handles the other end of the country spectrum, playing a tightly-controlled mix of upbeat, new country releases, with an emphasis on air personalities and promotional activities." Also playing country are KPLX 99.5 and KSCS 96.3, but "one has to wonder if the market can support all four on a long-term basis. . . I have never considered myself a country music listener, but I find the classic country format of KSNN interesting, and I have kept the preset on my digital walkman, despite the loss of 'Oldies 94.9'.

"There is still the ongoing controversy over 101.1, WRR, the Dallas city-owned fulltime classical music station. Some are urging the city to sell the station and get out of the radio business; others fear that such sale will result in the loss of the classical music format on FM in Dallas-Fort Worth. With an advertising base aimed at affluent listeners, the station has been shown to be self-supporting and netting a profit most years, and is not a drain on the city budget. Granted, this 100 kw outlet would probably be even more profitable in private hands, but at the risk of losing fulltime classical music on stereo FM, who really needs yet another CHR, adult contemporary or urban format anyway? I am in favor of Dallas retaining ownership of the station in the interest of diversity of available FM stereo choices on the dial at no expense to the Dallas taxpayers. It is also interesting to note that not long after rimshotter 99.1 KJZY Denton-Dallas-Fort Worth switched to 'Z-Rock', bringing hard rock to the market, the 106.9 in Conroe switched to 'Z-Rock' also, rimshotting Houston and its northern suburbs."

Suffering from the disease of being monophonic, all-news KBBM 99.5 Winterset-Des Moines IA, which has no staff of its own, but uses CNN 24-hour headline news and the local staff of KCCI Channel 8 Des Moines, was highlighted in a clipping sent by Chuck Gysi. He says: "Someone from WCAZ 92.1 Carthage IL called me after I wrote about KYAT's plans (Keokuk IA) to go on air and was surprised about it all. Caught them off guard and they wanted KYAT's owner's phone number." Chuck is one of the few radio columnists in a newspaper who understands the technical workings of the medium, and he edits the scanning column in "Popular Communications" magazine.

A happy holiday season from the FM Atlas/FMedia! family, including

A NEWSLETTER OF FACT AND OPINION ABOUT  
FM RADIO AND RELATED TECHNOLOGIES—  
FROM THE PUBLISHER OF THE FM ATLAS

1993

Volume 7, Number 1—January, 1993

WELCOME to readers of the former "FCC-FM" feature in the monthly VHF-UHF Digest of the Worldwide TV-FM DX Association. I have given up that column after 22 years, and several in that group have come aboard as FMEDIA subscribers. This publication should continue to fill their need to know about changes in FCC and as a Forum for their views. All FMEDIA readers should benefit from the contributions of station information and critiques from these FM DX listeners, some of whom possess state-of-the-art tuners and antennas—and the know-how to tune in FM at great distances ("DX listening") when conditions for such reception are unusually good.

### New FM Station, Translator Grants Translators have less than 100 watts unless indicated otherwise

- LA Lacombe 94.7 KPXF
- ME Bangor 92.9 WSHZ (WPBC)
- MD Grasonville 103.1 WXZL (VJHVY)
- MA Great Barrington \*105.1 WAMQ (VJBBS)—if sale is approved by FCC, despite a challenge by self-styled troublemaker Glenn Heller (last month, p. 6, col. 2). The Heller challenge is "without merit," said seller Donald A. Thurston, head of WYBS AM. Had it not been for the challenge, the FCC probably would have approved the station sale by now. With a new administration coming in, it could be five more months before the sale is approved and the call letters actually changed. If it takes that long, Thurston said he might change his mind, since business is improving. That would make several local residents happy—people concerned about WBBS being controlled from out of the area and losing nighttime service, "which was especially valuable during [the recent] snowstorm."
- MI Ann Arbor 107.1 WQKL (WJMX), o, "Kool 107"

- MI Coleman 101.5 WPRJ-FM (WPRJ), g, AM is in Mount Pleasant "Praise Radio." Its "office and studio is in a former gas station, operated by Gary "B" Bugh.
- MI Grand Rapids \*88.9 WQMB (WGNR), cj, being bought by Twin Lakes' WBLV \*90.3. WGNR, owned by Moody Bible Institute of Chicago, faced the need to move its transmitter and decided to sell instead and concentrate on its WGNB \*89.3 Zeeland, which serves most of Grand Rapids. WBLV, on the other hand, had poor G. R. coverage and welcomed the opportunity to expand. Cost to WBLV for the move: \$200,000 to \$300,000, including buying the license from Moody and for "station linkage." WQMB to be off the air for three or four months, forcing the SCSight Seer reading service for the blind to go cable for that period. Sight Seer, founded in 1984 by Ken Van Prooyen, now 71, has 230 listeners with a waiting list of 75 for the receivers which cost \$100. Van Prooyen had owned G. R.'s first FM-only station WKLV 95.7 in the mid-'60s, although in the early '50s there was a WFRS 92.5. He founded Sight Seer when retired, using \$20,000 of grant money; volunteers do the reading. "Who says there's not fierce competition between public broadcasters?"

 NJ Fort Lee W276AQ 103.1 has WNEW 102.7 New York NY on it (from WBAB 102.3 Babylon). Licensee Gerry Turro "has formed Bergen County Community Broadcast Foundation and purchased WRRH \*88.7 Franklin Lakes NJ for \$100,000, subject to FCC approval. It may be that he plans to repeat that station, which is 10 watts noncommercial, on his Fort Lee translator." [I have written Turro and asked if he plans also to have WRRH on his W232AL 94.3 Pomona NY, which now carries WNEW 102.7 New York, sometimes in stereo, sometimes not. "Aren't translators supposed to be owned and operated by independent parties than the stations and their employees? I guess it's better than four months of rebroadcasted static (in the case of the 94.3 Pomona station). This guy (Gerry Turro) does this just hoping for the day that low power FMs are finally allowed so he can have his foot in the door. WNEW needs translators in these areas like a hole in the head." [Since the translators are within the primary service area of WNEW, they can legally be owned by WNEW or a station employee, such as Turro—b.a.]

**On Air and DX Ready—Real Stations and Pirates**

AK Petersburg K276BD \*103.1, upgrading and serving mainly Scow Bay.  
 AK Point Baker (Duncan Mountain) K216AA \*91.1, applying to increase from 80 to 200 watts. "This should provide a much better signal to the Port Protection translator (K201AL \*88.1—also on air) and to the commercial fishing fleet. . . Boats report hearing the signal in the Sumner Strait and Rocky Pass areas. Boats have a harder time getting the signal because they are moving and the vertical 'whip' antennas used on many boats are not so good for picking up weak FM signals." The Port Protection translator "provides a fair stereo and excellent mono signal to residents of both Port Protection and Point Baker, and can be heard very well in the lower Rocky Pass area." Primary KMXT is in Petersburg, known as the "Little Norway" of Alaska. "Bet you didn't know that, did you?"  
 AK Seward K272DG 102.3. Primary KPEN 101.7 Soldotna now IDs with Kenai, Seward, Homer and Kodiak.  
 K285EG 104.9. Primary KWVV 103.5 Homer now IDs with Kenai, Soldotna, Seward and Kodiak. "Strict nonlder still using the same, sappy 'K-Vave' nonID. . . These two translators must have come on air within the past week or two." The new translators are forcing KSWD AM Seward to change to "golden oldies," and stress its local programs, but the stations defend invading Seward with their signals: "When people are in a situation of having only a couple of choices they get tired of listening to the same old thing, so we know that we'll have a lot of people listening to us," said Dave Becker, Peninsula Communications general manager.  
 CT Bridgeport W285- \*104.9 now on only a few hours a day, when the guy comes home and turns it on. It is on for Portuguese programming from 5-9 p.m. from primary WFAR \*93.3, but not on when WFARelays Family Radio.  
 CT Naugatuck W250- \*97.9 (not "W249-97.7," as given last month, p. 3) is on and "not causing interference to WPKX 97.9 Enfield CT, which is actually in Springfield MA. The 97.9 in New York city is stronger—that is what I hear when the translator is turned off. Howard Enstrom in FL does our

engineering, and he calculates our 54 dB signal misses WPKX by 5 km."  
 FL Key Largo WJZMQ 103.9 now on with 50000 h.v; 73 m, and getting well into West Palm Beach on a regular basis  
 FL Tallahassee 91.9 church station has a \$(tereo) carrier on fulltime, but not always with programming  
 WHBX 96.1 (having moved from 95.9 over a year ago, correcting FMedial Dec. p. 3, col. 3, but still at Class A facilities  
 IA Sheldon KIWA-FM 105.3, having moved from 105.5, now 50000 h.v; 89 m [Omaha  
 IA Sioux City K269- \*101.7 with KGBI 100.7/  
 NY New York WNCN 104.3, but gives boot to Matthew Field, 16-year g.m. in favor of Randy Bongarten. Station plans to remain c, but to fine-tune the format so as to get back into the ratings race with WQXR-FM (now a 1.2, compared to WNCN's "paltry" .9% share of listeners).  
 NY Oceanside "WOCN" 91.9 claiming stereo, but not received in \$, and with Christmas music various times during the holidays.  
 ND Valley City KOVC-FM 101.1, having moved from 100.9  
 ON Toronto Rawlco's call-letters-less 92.5 station on—well sort of. It's been testing, possibly in stereo by now.

**Off Air—or Not Yet On**

CT West Hartford W251- \*98.1 "can't get my signal there, but may have to use phone lines at night, carrying WFAR's Portuguese that way, and Family Radio via satellite," but there is a site 16 km SW where WFAR can be received, and this translator may change sites. It, too, is legal regarding WPKX 97.9 Enfield CT, since its site is "below average terrain."  
 FL Five Points WCJX 106.5  
 FL Lake City WOLR \*91.3  
 GA Martinez WKBG 107.7  
 GA Waynesboro WAGW 107.1, will return after FCC approves sale  
 IL Marshall WMMC 105.9  
 IL Tuscaloosa WITT 93.5 "have gone belly up," but ownership application change filed with FCC.  
 KY Whitesburg WXKQ 103.9 and AM "silent due to fire."  
 ME Machias WALZ 95.3 since May, '91. "No known plans afoot to go back on the air." Remove \$, format data for this station.  
 MD Hagerstown WETH \*89.1, but should be on by early May and claiming coverage equal to 20 kw. It will relay WETA \*90.9 Washington DC, but to have capability to offer local programming. PTF Program to provide \$145,000 toward its \$255,000 start-up cost, with \$85,000 to be raised by VJETA.  
 MA Nantucket WNTX 96.3, but may be because of wind and rain storm. Also off at various times following the storm: WUMR \*91.9 Provincetown MA, WBOQ 104.9 Gloucester. WOMR suffered a sudden power surge, which might have been prevented if it could afford a \$5,000 circuit breaker.  
 NC Grifton V'TND 99.5 "silent for repairs."

"FMedial continues to be a work of art and insight. If you ever decide to pull the switch on this, I would like to be your sorcerer's apprentice. You do us a wonderful service with this publication that even the big boys like Broadcasting, Radio World and the M Street Journal can't match, because you include all the input of the FM listeners and DXers that read your paper. Have a wonderful new year, and please let me know when the new FM Atlas comes out. That reference material is a gem, and a bargain as well."  
"Looking forward to another year of FMedial Sorry to see you do away with WTFDA column, but as I mentioned before, I can see where it would have been an extra burden."

**SCServices, 57, 67, 92 kHz, TV-SAP, TV Line 21**

*Symbols are as in the "FM Atlas"*

CA Long Beach KLOM \*88.1 tU, E. Its 92 is Persian from noon to midnight, "and the other half of the day they run a European jazz service... They have had bad cutbacks here at the University and KLOM only has one news person and only three local newscasts a day."

CO—"The NY papers had articles on the Colorado-based gay service (FMedial Sept. '92, p. 4, col. 1), but they said only that the station was on satellite, nothing about the possibility of its being on SCS. They did say that some 1994 cars may be equipped to receive it, but didn't explain how."

GA Atlanta area—"There are several local SCA tests/changes I am following which I don't want to report until I am reasonably sure they are permanent. I assume the deadline for FM Atlas-15 isn't any time soon."

MD Annapolis WHFS 99.1 tX, 67. "I'm a ham radio operator, and the data sounds a lot like what we hear on the ham bands."

MD Baltimore WLIF 101.9 no data (had tX, 67)

MN Alexandria KXRA-FM 92.3 tU, 92 (no 67)

MO Springfield KTXR 101.3 tM, 67 (back to; had tM several years ago when KTXR was on 101.5); same music as on KTTFS-FM 94.7's 67

NE Agri-Vis on Line 21 of the ETV network signed off Dec. 31. It gave farmers low-cost commodities' information. "With the emergence of pay services, our user donations have decreased to the point where we can no longer continue subsidizing Agri-Vis," said associate general manager Ron Hull of NETV.

NJ Newark "WRMN," on the 92 kHz of WBGO \*88.3, may introduce a clock radio in addition to the \$65 "FMystery" radio, "said announcer and co-manager Lino Celle (correct spelling from previous report). Celle is also president of a company called CNS Inter-Global Media," believed to be in the importation of radios. ICN now offering five different radios, including two with built-in cassette recorders, with prices starting at \$70. "Thanks for not printing my name in relation to the 'WRMN' stuff!"

WFME 94.7's 67 kHz Russian station, "WMNB" (222 Bridge Plaza South, Fort Lee NJ 07024) "got a mention in NY Newsday in an article about their new affiliated cable TV station. However, the article said the 'WMNB' radio is a 'five-year-old Russian language station based in Fort Lee', nothing about its being on the SCA band, so Russian-speaking Newsday readers may be searching their FM and AM dials for the station to no avail!" WFME's 92 is still Radio Tropicale, Haitian.

WNWK 105.9's 92 kHz "Radio Internacional" is also called "Colombia al Dia" and has been on the main channel 90 minutes daily, simulcast on both main and SCS 10 to 11:30 a.m. "I don't hear it overnight so it's not on 24 hours. Their address is 79-05 Roosevelt Ave., Jackson Heights NY 11372; (718) 478-8382.

Another Spanish language program has replaced Italian programming from 11:30 a.m. to 2 p.m. weekdays. Incidentally, V:NBK now carries 50 percent Caribbean programs (84½ hours)."

NJ Trenton WKXW 101.5 no SCS (had tX, 92)  
NJ Zarephath WAWZ \*99.1 t(D), 57

NY New Rochelle WRTN 93.5 tE, 67, Italian (no 92), Radio Maria, "una voce cristiana nella tua casa," which means "the Christian voice in your home." Studios are in Manhattan, (212) 246-9620 and Long Island, (516) 486-8850. "They have Catholic programs as well as classical and popular music. No commercials so far; no English either..."

NY New York WNYC-FM \*93.9 tZ is on 92, not 67 ("67 has been quiet for four months")  
WBAI \*99.5 no 67; its tX has been off "for months," just an open carrier, while the 92 is still tZ.

NC Murfreesboro WBCG 98.3 tU, 67. "I sold WIST Lobelville TN and made a little money; now I'm running this station. The SCS is in connection with NC Power and Light for telemetry readings."  
OR Portland KBOS \*90.7 tE, 67, testing for Korean Radio Communications Services, Jerry Chanj.

TX Houston KUHT \*8's SAP is a reading service for the blind, same as on KUHF \*88.7. It promotes the service to folks having SAP-equipped VCRs, and urges such people to return their radio which picks up KUHF's SCS "so that others can get the signal."

TX Laredo KBNL \*89.9 t(D), 57, Cue Paging. Still tG, Moody Network, 67; tU, 92. "Unlike most stations which have a foreign language on the subcarrier, we have Spanish on the main channel and English on the subchannel. English is a foreign language in Laredo. Eric Small recommended an SCA receiver made by ComPol, Inc., 415 Campbell Hill Road, Mason (Brookline) NH 03033; (800) 722-0755. They have an oak cabinet receiver for \$85 including shipping. No extra charge for main-sub switch or filter for 57 kHz."

RUSSIA Moscow—Radio 7 is using SCAs to beam information to area news services. It's a digital signal, probably at 57 kHz. "Because of the badly outdated phone system in Moscow, news services such as Federal News Service and the Associated Press needed an alternative way to get news into the Moscow bureaus... Incoming information can be relayed to the station by phone line or satellite, then beamed to the services via SCS."  
"I found both the design and execution of your SCS modification to be lacking in the sample I received [and] I must again request a refund."  
"Thanks again for repairing my GE SCS. It is back in excellent working condition."

**AM Happenings Most Likely Caused by FM**

CA Hemet KHSJ 1320 drops music for all talk  
CA San Fernando KGIL 1260 temporarily simulcasting KMGX 94.3, but expected to be bought by KKKO 105.1 L.A. and KJQI AM 540, with 540 and 1260 to simulcast.  
CO Pueblo KDZA 1230, had been simulcasting KRYT 107.9, "silent pending transfer"  
CT Waterbury WQQW 1590, formerly WBRY, "went dark in April 1992 and is still dark. No sign of when it will come back on."

DC—Ten years after the fact, the FCC has proposed the Motorola C-Quam as the single AM stereo standard—a move delayed since the 1982 decision to allow stereo AM. The marketplace eventually settled on two systems—Motorola's and the competing and noncompatible Kahn system. Only 660 of 5000 AM stations have stereo and of those 90% use C-Quam. One year after the rules are effective, stations employing the Kahn System would have to discontinue it, and new stereo stations would have to embrace the C-Quam system.

FL Babson Park WXPQ 1530 sold by Webber College. "Student apathy and lack of advertising in this small, isolated community led to the station being dormant. Since the late 1980s, its studios were primarily used as a museum for old radio equipment." It had recently been relaying commercial WAUC 1310 Wauchula FL.  
GA East Point WMLD 1160 deleted by FCC  
MD Baltimore WHLP (formerly WEBB) 1360 all help-wanted, "the first AM of a planned all job-ad network"

MA Norfolk (Boston) WJCC 1170, had been silent, returns with talk  
 MN area—city not announced—"is making application to transfer their license and operation to [K] CGN [101.5 Ortonville MN]. Lord willing, they will become the first full AM affiliate of the "Clean Air Network." But "any listener support for programming on this new station would have to come from their own local area."  
 NH Manchester WKBR 1250 silent  
 NJ Newark WNJR 1430, which dropped live announcers and carried "Radio Tropicale" from WFME's 92 kHz SCS for about six weeks last summer, "has relocated studios from the transmitter in Hillside NJ to downtown Newark (1 Riverfront Plaza, Suite 345); is offering all available time to independent producers, just like WNWK 105.9 does. Black contemporary, disco, rhythm and blues and gospel music is programmed during time periods not sold. Included in paid programming is 26 hours of Spanish fundamentalist Christian, 34 hours of Caribbean, eight hours of Jewish (Nachem Segel who also is heard mornings on WFMU 91.1 East Orange NJ), Greek for five hours (formerly on V/NWK), Haitian Creole for four hours and 26 hours of paid black gospel music."  
 NY New York WBBR 1130 (formerly WNEW) temporarily simulcasted the big bands sounds of WQEW 1560 (formerly WQXR AM), until its business format took over Jan. 4. Between Dec. 12-15 it had been simulcasting WYNY 103.5 with country music, receiving the signal via WYNY's 67 kHz SCS. During the time WBBR was simulcasting WQEW, one reader mused, "Why don't they just shut WBBR off for 20 days? It seems dumb to have the exact same stuff on two different frequencies. . . The WYNY 67 kHz SCA is off now."  
 OH Cincinnati WKRC 550 goes talk, has LMA with WLW 700 AM  
 TN Crossville W/CSV 1490 silent pending sale, after which it will return "in mid-'93 with travelers' info"  
 TN Etowah WCPH 1220 silent  
 VA Manassas WPRW 1460, WITH 1230 Baltimore, WNTR 1050 Silver Spring MD to simulcast children's programming with a satellite feed from WWTC 1280 AMinneapolis MN.  
 VA Virginia Beach WVAB 1550 silent  
 "Thanks for your fine column and Atlas!"  
 "I look forward to the next issue of FMedia!"

 [The above stations are swapping frequencies]  
 "Keep up the good work."

### Fine over Stern Upped to \$600,000, But Infinity Deal to Acquire Three Cook Inlet FMs OK'd by Sen. Helms' FCC

It's not really Helms' Commission, but it might as well be. It was Sen. Jesse Helms of NC who gave the FCC the green light to allow Infinity Broadcasting to buy three Cook Inlet stations for \$100 million. All of this follows the FCC's upping the fine to \$600,000 for the on-air antics of Infinity's morning shock jock. Helms mellowed toward Infinity when he learned that Stern's program would not be heard on the new stations Infinity would be acquiring. In a Dec. 7 letter to Cook Inlet President Roy Huhndorf, Infinity Prez. Mel Karmazin stated he had no plans to air Stern's shows on any of the Cook Inlet stations. Somehow, Helms got his hands on that letter and from then on it became smooth sailing for Infinity.

A reader writes, "I know you won't print all this since you devoted so much space to Stern stuff in Dec.," but the Congress of Filipino-American Citizens plans to ask each Stern sponsor for "the reason they are supporting this program which is detrimental to the curing of the racial tension which is now prevailing in this country." The CFAC is inviting all ethnic groups to an anti-Stern rally, Journal Square, Jersey City, Jan. 17, 12-3p.m.

Finally, and I know you're probably tired of all the space given over to Howard Stern, but a media analysis showed Woody Tanger virtually alone in his drive to excise Stern from the airwaves (Dec. p. 6, col. 1). He called for broadcasters to police themselves so that the government doesn't step in and do it for them. These sources were cited as opposing action against Stern: Broadcasting magazine, Electronic Media, and Radio & Records. However, the M Street Journal said: "Has Stern really been given any sort of mandate by millions of satisfied listeners? If 'Deep Throat' ran on prime time network TV, it too would probably find millions of satisfied viewers. That wouldn't have much bearing on whether it was indecent. And while 10% of New York's morning radio audience is formidable, it doesn't make Stern the prevailing com-

munity standard. The other 90% of the radios in New York are NOT tuned to Stern. . . Like it or not, the airwaves are still a public trust and the FCC still has their mandate to regulate them as they see fit—even if we agree that they might not be doing such a good job. . . You also have to wonder at the audacity of Stern's parent company, Infinity, for asking that the FCC might decide to back off its anti-Stern actions, then give Stern a semi-exclusive franchise for what he does. . . Popularity isn't the key; one of the key tenets of First Amendment law is that it protects unpopular speech, too. This, again, is why it's time for some consistent rules once Clinton's FCC takes shape." Let's now revisit an editorial from the May, 1987 "FMedia!"

### Stop Audio Pornography/Indecency on FM

Although not endorsing censorship, this newsletter supports the FCC's latest codification of its constraints on broadcasters, both commercial and public, and announcers, like Howard Stern, who employ poor taste in the spoken/suggestive word format to generate ratings. The current FCC has been criticized in various quarters for being too "marketplace" oriented, and not enforcing the rules that are on the books. Here now, the FCC is finally giving direction in a controversial matter. That there is a danger that too much direction may be given—such as having unpopular programming of all sorts taken off the air—is a minor concern. It is a big step from removing somebody talking about grafting a horse's excretory organ to a person to removing somebody discussing an unpopular political or social cause.

Too, we should be concerned with the economics of the so-called "shock jocks," like Howard Stern, who, it is reported, earn between \$100,000 and \$300,000, as well as a society that turns to such "entertainment" and thus justifies paying such salaries (and the higher ratings those folks bring to stations). It is encouraging that almost all the obscenity complaints have centered on FM stations, that FM has "come a long way, baby," but FM, as a medium, will continue to grow, despite the on-air presence of those kind of broadcasters. If management wants to offer audio pornography and pay out huge sums to attract an audience for such shows, let it discover subcarriers, where pornography has reigned supreme in many markets for years. Many radio reading services broadcast audio pornography (sometimes as early as 8 p.m.), and the FCC has not been concerned, because SCA is not "radio," just a subscription service. The theory is that the blind and print handicapped should have access to the full spectrum of the printed word, just as anybody else has. If the FCC makes it too hard for WXRK to carry Howard Stern in full off-color on its main

channel in stereo, WXRK could "bury" Mr. Stern on an SCA, replete with music, sound effects, and maybe visual graphics in slow-speed color TV to special receivers. Receivers could be sold, rented, or given away, and advertising sold. With the proper promotion, a station carrying audio pornography, even if relegated to SCA, could become a smash success, especially if backed by the kind of financial resources used to pay the salaries of such jocks. And once pornography became an integral part of commercial stations' SCAs, then watch this column for an editorial about the practice!

[That editorial was written almost six years ago, and it remains the function of this newsletter not only to report the

news but to sound a call to action when trends such as what Stern represents might disrupt FM as we know it. Stern must be taken to the woodshed as the FCC's James Quello said; and if Infinity is unwilling to do so, the FCC must step in. FMedia! is one voice in the industry that continues to take a stand against the antics of Stern and his ilk.]

**FM Radio Con Thomas Root Jailed**

If your collection of FMedia! newsletters goes back to Aug., 1989 (pp. 6-7) or Sept. '89 (p. 7), you can re-read about Thomas Root, whose plane landed in the Atlantic Ocean, but he was rescued and was found with a mysterious gunshot

wound in his leg. He was a Washington communications attorney, but "it was later discovered that Root was under investigation for bilking thousands of investors who bought FM radio partnerships sold by Sunrise Management," reported *Monitoring Times* magazine, which said that in October "the story came to a close when Root was sentenced to 15 years in prison and fined \$5,000. According to Associated Press reports, the company had raked in \$16.3 million on the scam before it was stopped."

Root

**Special Historic Feature, Minneapolis-St. Paul FM Station History, Part III  
Tower Sites Varied in Area**

Most of the commercial FM stations transmit from the large TV-FM towers in Shoreview, north of St. Paul. WCTS and KQQL "Cool 108" 107.9 Anoka are considerably north of the Twin Cities, in Nowthen MN. When those stations broadcast at reduced power, it is difficult to receive them in the Twin Cities; KJJO-FM 104.1 transmits from Somerset WI. Possibly to insure better reception in its city of license, St. Louis Park, KJJO-FM held a construction permit for an FM translator on 105.5, K288DE. K288DE was never built, probably because owner Park Broadcasting of Ithaca NY felt that coverage was adequate from the Wisconsin location—plus the fact that K288DE would eventually be displaced by KOUO Eden Prairie 105.7. A new rim-shotter is WQPM-FM Princeton MN, which in December 1992, changed from a Class A on 106.3 to a C2 on 106.1. It gives Twin Cities' traffic reports, IDs on each hour with a different Twin Cities' suburb and solicits advertising from the market. Its antenna is on the KXLI (TV) tower at Big Lake MN.

School stations generally broadcast from their campus locations. KMOJ \*89.9 transmits from north Minneapolis, while KFAI, close on the dial at \*90.3, is on the Foshay Tower, once the tallest building in Minneapolis. KTIS-FM has migrated from its historic Golden Valley transmitter site to Shoreview, but maintains a standby transmitter in Golden Valley.

**Minneapolis-St. Paul (MN) FM Radio Dial History**

All stations licensed Minneapolis unless indicated otherwise

Footnote references to cities: 1) St. Paul; 2) Northfield (WCAL-FM was a commercial station on 95.7; then after a hiatus, it resumed broadcasting as a noncommercial station on \*89.3); 3) Golden Valley; 4) Forest Lake; 5) Richfield (WRAH, WYOO-FM and KDWB-FM); 6) St. Louis Park (KDXL moved from \*91.7 to \*106.7, but remained a minor, 10-watt educational station, having embraced stereo in 1992); 7) Anoka; 8) New Prague (this station exists with a short-spacing to KNOF \*95.3 St. Paul—a condition which KNOF agreed to); 9) Lakeville; 10) Cambridge; 11) Red Wing (KWNG); 12) Princeton; \* = a noncommercial station.

**Phantom Stations, Too!**

KUOM-FM \*91.7 Minneapolis was a construction permit, which was never activated. Similarly, KFMV 100.3 and KMSJ 102.1 (both Minneapolis) were commercial station construction permits, which never came on the air. WMCN \*91.7 St. Paul is a minor, 10-watt educational station with limited outreach—similar to KDXL \*106.7. KSTP-FM started life on 102.1; then deleted in 1952, saying, "We discontinued the operation of our FM transmitter December 1st because of the limited number of receivers and the very apparent lack of interest in that mode of transmission." It resumed broadcasting on 94.5 in June, 1966—the first FM in the market to utilize vertical or circular polarization for better reception in automobiles.

Sources: *White's Radio Logs*, Vane Jones' *North American Radio-TV Station Guide, Broadcasting Yearbook*, my *FM Atlas*, 1972-, and personal experience in monitoring most of the stations listed, 1948-. No area stations are listed before Spring, 1947, when "White's Radio Log" showed WTCN-FM 97.1 Minneapolis and KSTP-FM 102.1 St. Paul. I can remember WTCN-FM, shortly before it folded in 1954, talking about the high fidelity FM signal and how it is transmitted from atop the Foshey Tower, then MN's tallest building.

### Motoring With FM—1952 Style

In October 1952, the family and I drove from Duluth to the funeral of an uncle in Minneapolis. I had a Zenith tube AM-FM table radio and tunable Jerrold TV-FM booster connected to a Terado inverter which used a vibrator [to convert the car's six volt d-c system to 110 v a-c] and an FM antenna, mounted to the car's rain gutter. The antenna was bought used from the Duluth bus company, following the demise of transit radio and WEBC-FM 92.3. The radio and booster sat on the deck behind the back seat of our 1946 Chevrolet, connected by extension cord to the inverter, which plugged into the cigar lighter outlet. With that then state-of-the-art equipment, I could tune in KTIS-FM \*98.5 prior to 3 p. m., the only Twin Cities' station to begin broadcasting at such a daringly early hour. At 3, WTCN-FM 97.1, WMIN-FM 99.5 and KSTP-FM 102.1 signed on, all simulcasting their AM affiliates.

### Musical Frequencies

KWFM 97.1 Minneapolis started out as 10-watt \*WNOV 89.1 St. Paul (Northwestern Vocational Institute). However, it is not certain whether or not WNOV ever operated. If it did, there was a hiatus before KWFM came into being, as the school moved from St. Paul to south Minneapolis in 1952. KWFM claimed to have equipment "to match the finest sound systems" of listeners. Later KWFM was sold and became country music KTCR-FM (and after that, the "Cities 97" KTCZ). KTIS-FM moved from \*105.9 to \*98.5, after the deletion of commercial station KBTR, which operated in 1948 and 1949. WAYL started life on 96.1, but it was short-spaced to WJMC-FM 96.3 Rice Lake WI, so when WAYL increased power it moved to 93.7. Briefly before that move, WTCN-FM held a construction permit for 93.7, but WTCN-FM, which previously existed on 97.1, was never resurrected. Little KDXL St. Louis Park moved from 91.7 to 106.7.

### Little SCAActivity in the Market

FM subcarriers—the method by which a station can send out two or three programs that are different from the main channel stereo—are below par in the market. Nobody is transmitting at the newer 92 kHz frequency. At 67 kHz, data is on some stations, Muzak is on one and reading to the blind on another. The following stations once had SCAActivity, and probably still have equipment, which could easily be activated: WCAL, which was to have used its subcarrier for remote broadcasts from Central Lutheran Church in Minneapolis; KTIS-FM which had both 67 and 92 kHz data; WCTS with 92 kHz paging; WLTE with Market Quoters data at 67 and paging at 92; KQRS-FM with Physicians Radio Network at 67 and with transmitter telemetry at 92; KJJO-FM 104.1 had—and occasionally uses—transmitter control telemetry at 67; years earlier, it had background music. KEYE was to have embraced a data service. One of KTIS-FM's was a test for utilities load control by Brown, Boveri, Inc.; it would seem logical that KTIS-FM return its SCA for a service which could complement its main channel, such as the Children's Sunshine Network, out of Grand Rapids MI, and carried on its Skylight satellite channel. With WCAL Northfield having improved its signal in the market, that station might shed its timidity and offer a distinctive service on a subcarrier. Some broadcasters harbor the now-irrational fear that a subcarrier will impair their main channel stereo—and this fear seems more widespread in the Twin Cities than in almost any other major market.

FM broadcasting in the Twin Cities, after being virtually wiped out in 1955, has made a resounding comeback. Those who are in broadcasting, or just media watchers, will do well to observe FM developments as they unfold there.

### Small Print Happenings and FM Industry News

The sale of WCTS \*100.3 Minneapolis for \$10 million to Radio 100, Ltd. has been approved, but as of early January, 100.3 is still religion. WCTS is to acquire WMIN 1030 AM for \$1.5 million; and the FCC has approved that deal as well. Radio 100 is poised to acquire KQQL, "Cool 108," Anoka MN for the Twin Cities' first FM duopoly. KVNW Duluth, an unbuilt CP on 101.7, has been transferred to Segue Communications, licensee of WQPM-FM Princeton MN, which now gets into Minneapolis. In Denver, the FCC has granted the license application of KOSI 101.1 and KEZW AM to Tribune Denver Radio, Inc., licensee of KWGN (TV-2), over the objection of Nesweb Corp., permittee of KTVJ (TV-14) Boulder CO. Denver is the 21st national TV market and has more than 30 signals. KTVJ argued that the waiver would not serve the FCC's goal of "promoting competition and diversity."

FCC fee plan scuttled. The proposal to charge a \$125 annual fee for even a small FM station or translator was eliminated from the budget. "An earlier version of the 1993 federal budget included some fees, but the historical exemption for noncommercial stations was maintained [and] the House/Senate joint committee deliberating the subject eliminated all such fees from the '93 budget. So rest easy—until they start on the '94 budget!" says *College Broadcaster* magazine.

Rumor in Gotham is that someone's a courtin' WHTZ 100.3 Newark, and speculation is that Malrite might just merge with Infinity (WXRK 92.3, WFAN AM), Emmis (WQHT 97.1) or Shamrock Broadcasting. Latter is based in Burbank CA and lacks a NY affiliate, but would love to have one. An announcement is expected this month.

KRQQ 93.7 and KNST AM Tucson AZ being sold, subject to FCC approval, to Prism Radio Partners for \$4.5 million. Prism is also buying KWFM-FM 92.9 and AM there for \$4 million. KOLT-FM 105.9 Santa Fe-Albuquerque is being sold to Commonwealth Broadcasting Co. for

\$1.3 million—the same company that owns KNUA 107.1 Armijo NM, KDEF AM Albuquerque. WORD-FM 104.7 Pittsburgh PA being sold for \$4 million to Entertainment Communications. It's going out of the religion business to be co-owned with WDSY 107.9 and VJEP AM Pittsburgh. Duopoly city, Boston, gets another as WBOS 92.9 Brookline-Boston owner Granum Communications announced it's buying WSSH-FM 99.5 Lowell-Boston. These moves will leave Boston with fewer but stronger competitors. Advertising revenue of \$135 million "a few years ago is now down to \$114 million." The soft adult music of WSSH-FM will stay the same, but studios will likely move to WBOS's site on Soldiers Field Road, and some of the personnel will be merged (or purged). Barnstable Broadcasting, owner of WGKX 105.9 and WHBQ AM—Memphis buying WPYR 98.1 Millington-Memphis for \$4.25 million. WWLI 105.1 Providence owner Tele-Media is picking up WPRO-FM 92.3 and AM there from ABC. KSRR 92.9 San Antonio sold to Tichenor Broadcasting for \$3.8 million, pairing it with KCOR AM and taking it out of a duopoly with KONO-FM 101.1 and AM.

The Cleveland NAACP and Southern Christian Leadership Conference have filed a petition to deny against the sale of WJMO-FM 92.3 and AM to WZAK 93.1's Lynn Tolliver and Bobby Rush in conjunction with WZAK owner Xen Zapis. The petition says Tolliver and Rush are front men whose sole purpose is to get Zapis a minority tax certificate. And Zapis' V:AAF 107.3 Worcester MA was hit with a \$4,000 fine for airing a conversation without informing the other party.

Lynn Chadwick of the NFCB has written and clarified a cover story in their "Community News" of November. Two public stations have asked the FCC to protect what they call "white space," which is defined as geographic areas not served by a "full service" radio station, so they could establish translators. Here the definition of what is a "public station" comes into question. WRTI \*90.1 Philadelphia had filed against

WXLV \*90.3 Schnecksville, WLVR \*91.3 Bethlehem and WMUH \*91.7 Allentown PA, claiming that they do not fit the definition of "public stations." The other station wanting to declare itself "public" against nearby educational stations, according to Chadwick, was WSHU \*91.1 Fairfield CT, which requested translators in Ridge, Selden, and Huntington Station, all on NY's Long Island. "The NCE stations have not been listed in FCC correspondence," but are most likely WFMU \*91.1 East Orange NJ, WPBX \*91.3 Southampton NY and WSHR \*91.9 Lake Ronkonkoma NY. The NFCB pointed out that the FCC treats all licensed noncommercial stations alike, whether or not they qualify for CPB funding, meaning that they operate with a minimum of 100 watts and are on the air at least 36 hours a week, with some exceptions for student stations when school is not in session. Last summer National Public Radio asked the FCC to declare "white space" as "areas where, although there may be NCE-FM stations, there are no stations broadcasting national programming from NPR and other producers." This was a content-based distinction that the National Federation of Community Broadcasters objected to in a letter to the FCC. On Sept. 30 the FCC reaffirmed the rights of smaller educational stations and the NFCB position, saying it "does not distinguish between NCE-FM stations that carry 'national programming' and those that do not, nor does it make content-based distinctions in applying the translator rules." The NFCB promises to "monitor developments that threaten community radio licensees and the issues of localism in programming. As time goes on, we expect that more and more stations will be pressured to give up signal areas to other stations seeking signal expansion."

A community station was fined \$2,500 for violating Sec. 73.2527(d) of the FCC rules regarding access to the public file. A member of the public was denied such access and subsequently filed a complaint with the FCC; it had received a warning in 1991 for a similar violation.

Chadwick, in her letter, identified the station in question as KKF1 \*90.1 Kansas City MO.

The 1993 NFCB conference is April 1-4 at the Holiday Inn Metrodome Hotel, \$70 per night at (612) 333-4646. Conference fees for members \$100; \$200 for nonmembers; call NFCB at (202) 393-2355 for more information. "Did you notice that the NFCB conference will be in Minneapolis. . . Is that in your neighborhood?"

KMUD \*89.7 Garberville CA netted \$30,000 in 12 1/2 days of fundraising in a community of 25,000. "I think we made our goal because now there are enough people listening to us," said Simon Frech of that NFCB-affiliated station.

WONU \*89.7 Kanakakee IL, the voice of Olivet Nazarene University, held its "most successful Sharathon ever this year. The annual fundraising drive, held this past spring, totaled \$150,346 in listener pledges." The money will go towards student scholarships, equipment costs and renovations. "It's incredible the impact that WONU is having in the Chicago area," said Bill Dewees, operations manager of the student-Christian station. "We're providing something for the local market that nobody else is—Christian music—and people are now turning to us first when that's what they want." [From "College Broadcaster," winter 1992-93 issue.]

In the closing hours of the 102nd Congress, a bill to curtail 900 exchange telephone abuse passed. Little noticed was a rider that amends Sec. 302 of the 1934 Communications Act to force the FCC to deny certification of any scanning receiver that 1) receives cellular frequencies; 2) like the Radio Shack Pro-2006 can be readily altered to receive cellular frequencies (870-890 mhz mainly); or 3) is equipped to descramble digital cellular calls into analog (clear voice). "Similar to the ill-proposed Electronic Communications Privacy Act of 1986, the new law will have no effect on those who wish to tune in illegally on cellular telephones, but will give the cellular industry what they were after: the illusion of privacy so that they can continue to misinform their customers that cellular telephone calls are private," says *Monitoring Times* magazine.

KLON \*88.1 Long Beach, which as reported above ("SCServices"), has cut back on its news production, lost its general manager. With *Calnet* and *Marketplace* gone, Rick Lewis realized the place was top heavy with management, saying of the future, "KLON is just going to play jazz and raise money [and] that's not the kind of place I came to operate." The 13th annual Long Beach Blues Festival was sort of a "last straw." KLON planned for the two-day event to raise \$433,000, but attendance on one of the days was one-third what was expected, and the station lost \$300,000. KLON is still on the satellite sending

Lewis

jazz 24 hours a day to Holland and is planning to expand distribution to France, Germany, Switzerland and Japan. It is also heard on cable radio in some 30 medium-sized markets around the U.S., Canada, Mexico and the Caribbean.

Another public figure in the news is Patricia Wente, former general manager KWMU \*90.7 St. Louis, who is being sued for unfairly dismissing an African-American employee. She changed the station's programming from an eclectic mix to mainly classical and news/information. Local magazines have detailed allegations of Wente's abuse of employees and, especially, harassment of black employees. "The critics picture of Wente contrasts with that of the energetic

Wente

young manager elected by her peers to the NPR Board," writes John Wilner in *Current* newspaper. However, the KWMU situation has improved since the "St. Louis Magazine" article. Its fall, 1991 fund drive raised "a record amount of money" and its summer, 1992, Arbitron ratings "were the highest in the station's history."

Also from "Current," and this may have implications regarding Howard Stern vs. Jesse Helms: David Giovannoni analyzed the best times and stations to carry indecency, finding that the fewest teens (the group presumably that regulators would least like to have in the audience when pornography is broadcast) are listening to radio between 1 and 7 a.m. any day, and during the school year only 6-9 percent of teens are tuned in from 8 a.m. to 2 p.m. weekdays. "These facts run counter to intuition. For instance, the FCC and others have proposed to limit 'indecent' material to late evening and after midnight. But the facts show that teens are the most likely radio listeners then." Also, the appeal of the station to a certain age group might mean more or fewer teens listening. "Rap, rock and contemporary formats appeal to teens; news and talk, classical and beautiful music formats do not. Public radio is not a format, but with an audience of 97 adults to every teen, its appeal is essentially adult. . . For instance, any program element—'indecent' or otherwise—aired on a public station Monday morning at 9 would be heard by more than 5,000 adults and only 27 teens in a market of 1 million people. The same program element, aired on a rap station at 4:00 on a Sunday morning, might be heard by more than 300 teens and only 600 adults in the same market. . . As the appeal of the station carries as much weight as the time of day, arriving at the appropriate balance requires putting both on the kitchen scale."

Commercial and public stations sharing—in underwriting, WBOS 92.9 Brookline-Boston and WBUR \*90.9 have shared, as do WCLV 95.5 and WCPN \*90.3 Cleveland. WCLV has underwritten *All Things Considered* on WCPN, while WCPN uses a variety of run-of-schedule announcements on the commercial station. "The result has listeners on each station hearing about programming on the other," says David G. Kanzeg, WCPN program director.

KIWR \*89.7 Council Bluffs IA to change—like soon. Officials at IA Western Community College voted 6-3 to sell the classical music station. Six colleges, which have been approached, expressed an interest in the station, with bidding expected to be completed by Jan. 18. The board hopes to transfer KIWR's license by Mar. 15, but would expect the new owner to take over responsibilities for the station's operation by Feb. 1. The board said it worked for six months to earn enough money to keep the station running, but wasn't able to raise the funds.

One of George Bush's "Points of Light" is WRBH \*88.3 New Orleans, which is a stereo reading service to the blind on open carrier. Manager Tim Green and "many volunteers" have labored long and hard to keep the 54-kw outlet on the air. Without the backing of a university nor a social agency, WRBH needed community support to keep operating. Green did what was natural in New Orleans. As a musician he formed a jazz group and booked a prestigious club for a concert that was well promoted in the media. That helped turn the tide in WRBH's favor and it got the attention of the White House, which named it as the 257th Point of Light, resulting in a meeting by Green with Bush at Disney World. WRBH now has \$500,000 in equipment alone, and hopes to produce dramas and to rent the studios for outside productions. Green envisions repeater stations covering the rest of the state. I'd guess some of those "repeaters" would be on SCS, due to cost factors and lack of available frequencies. WRBH is one of two stations having a reading service on main channel; the other is WYPL \*89.3 Memphis TN.

The MN Broadcasters Association reminds stations that the local public file must contain brokerage agreements covering LMAs—local

marketing agreements. "Confidential or proprietary information may be excised from the agreements where appropriate. The agreements must also be filed with the FCC within 30 days of execution and must remain in the public file for the term of the agreement."

"Radio Guide" magazine to call it quits? Seems there's not enough industry-related advertising to make it a viable publication, unless they charge for subscriptions. I've been getting a free sub and found the technical articles and classified ads of interest. If you wanna subscribe send \$24.95 to Radio Guide, PO Box 7001, Rochester MN 55903.

Bob Baker sent an item about MN Public Radio planning to expand in the area served by KCRB \*88.5 Bemidji, bringing a second, mono, news/talk station; no frequency mentioned. "KCRB staff and volunteers will go to work raising the money to make it all possible. We'll keep you informed!" KCRB celebrated 10 years on the air Dec. 22.

Will it ever stop? The FCC has again asked an end to people writing regarding a nonexistent rumor regarding a petition to "stop religious broadcasting." There is no such proposal now—not since Dec. 1974 when Jeremy C. Lansman and Lorenzo W. Milam filed a petition asking the FCC to inquire about the operating practices of religious stations on reserved-for-education FM frequencies (88-92 mhz) when such a station would not be owned by a local religious college or school. The FCC points out that the Lansman-Milam petition was denied by the FCC Aug. 1, 1975; it has generated millions of unneeded pieces of mail at the Commission.

Fine news: KCHQ 101.3 Altamont OR \$1,000 for operating with reduced power and for having an unauthorized booster station. KRJY 96.3 St. Louis and KARO 101.5 Columbia MO had their licenses renewed, conditioned on EEO reporting conditions. "Juke Box 96" was admonished to contact minority sources for every vacancy that occurs because of previous violations, and "K-102" was hit with a four kilo-dollar fine.

The "M Street Journal" says these markets now surveyed only twice a year by Arbitron: Johnson City-Bristol-Kingsport, Roanoke-Lynchburg, and Youngstown. Tupelo and San Luis Obispo get their own books; Orlando lands a Hispanic breakout. "Dropped from the rolls completely this year are Albany GA, Lufkin-Nacogdoches TX, Pascagoula-Moss Point MS, Sioux City IA, Terre Haute IN and Victoria TX, while Casper WY's fate has not yet been finalized." And quoting from the Small Market Radio Newsletter—KSHN 99.9 Liberty TX did a no-no as far as FCC rules are concerned: it carried separate high school football games on its two stereo channels on a Friday night. Listeners were told to adjust their balance control for the game they wanted. Poor mono listeners!

FM stations on the air 4766 commercial, 1585 educational for an FM of 6351, along with 1943 FM translators and boosters.

From the classifieds: Model 108 "the most sought-after Marantz tube analog FM stereo tuner, rare, collectors quality," \$599 list, your cost \$2999, Audio Classics, PO Box 176, Walton NY 13856.

Experienced board operator 7:30 p.m. to 12 a.m. Audio production skills a must. Excellent verbal and vocabulary ability required, \$4.50/hour. Call Walter Reeves, weekdays, (404) 873-3930, Georgia Radio Reading Service for the Blind. EOE. "Most people pay their maid more than that!"

For sale two TX Class As with CPs to go to 50000 watts in markets close to 1 million. Priced to sell. Bill at (817) 559-2343. KCRM 103.9 Cameron one of them?

TFT EBS10 stereo generator, tuned to 94.7, \$350, B. Brinitzer, WDNK, 1000 Park Forty, Durham NC 27713; (919) 361-1429.

FM FORUM

CONTRIBUTIONS FROM READERS  
Name change—from the Concert Music Broadcasters Association to the Classical Music Broadcasters Association. Houston to be host city for their conference, Apr. 29-May 1, 1993. George Stokes, KRIS 92.1 and KRTR 97.1, is the conference organizer.

Until February, *Bruce F. Elving*

### On Air and DX Ready—Real Stations and Pirates

- CA Lone Pine K292BP 106.3  
 CA Ukiah KQPM 105.9, back on with k. "They had been off ever since the call change."  
 CO Fort Collins K260AC \*99.9, "The first time KGNU has been heard in the commercial band. For 15 years the station had been limited to Boulder County and not much beyond because of its relatively low signal strength (1300 watts). The station was originally licensed for more power (on 88.5) but was turned down to prevent interference to Channel 6. This extension of signal nearly doubles the number of potential listeners."  
 IA Fort Madison KILJ-FM 105.5 now with 24000 h,v; ("23888 watts"!)."Very noticeable improvement in Burlington, their new target... but down by the river here at work, forget it. WAAG 94.9 Galesburg IL seems to be selling more to SE Iowa accounts lately, so they're watching out for KJ. WAAG still has a better signal in extreme SE Iowa."  
 KY Whitesburg WXKQ 103.9, FM back after fire, but AM's start is delayed.  
 ME Dexter WGUY 102.1, with Class B facilities  
 ME Portland W245- 96.9 with WKZS 99.9 Auburn, a 50-watt translator. "I can pick it up in the car about 32 km away... Any way to improve the Maine map in the Atlas?"  
 MI Traverse City W264AC \*100.7 on reduced power; "soon to go full power."  
 NJ Phillipsburg "WCB-FM" 108.5, \$, announcing as 100 milliwatts, per Part 15 of FCC rules and 107.7, "but definitely on 108.5, and probably at least several watts."  
 NM Alamogordo KZZX 105.5, not yet having moved to 105.3  
 NYC Area—pirate on 108.3 heard playing Spanish/salsa in \$[tereo] Christmas Eve; reception was weak in Secaucus NJ  
 PA Allentown W246- \*97.1, having moved from 104.9. Has an "excellent signal, obliterating WYXY 97.1 and WQHT 97.1—you'd think it was a Class A—must be high on the Fountain Hill TV/FM tower farm!"  
 PA Easton WODE-FM 99.9 new tower and back to 50000 h,v; 137 m oldies, \$  
 TX Canyon KPUR-FM 107.1, back on with/  
 WI Ashland WJHH 96.7 now on with 50000 h,v; 79 m  
 A Minneapolis-area reporter heard FM skip to

NJ, NY and OH while a ME reader picked up southern MN stations 11 p.m. to midnight EST Dec. 20. Early winter skip reception on FM is fairly common at night, and it coincides with the peak summer season in the southern hemisphere.

**Off Air—Or Not Yet On**

- CA Red Bluff KFXS 102.7 "silent pending sale"
- FL Miami WDNA \*88.9 still off; local folks pick up WQCS Fort Pierce on that frequency; WDNA applies for a new tower site.
- MI Lakeview WRIZ 106.3. "The State Police at the Lakeview Post are investigating the owner(s) and expect to soon file charges in Montcalm County." Remove \$, format information for that station.
- MN Minneapolis WCTS \*100.3, having moved to AM 1030. New owner of 100.3, new call letters yet to debut. I'm getting WRHN Rhinelander WI and KLYF Des Moines with WCTS gone.
- OH Lancaster WFCO \*90.9 "has discontinued operation." Remove \$, format data.
- OK Perry KJFK 105.1
- OK Spencer KROU \*105.7, to use Channel 43 tower near OKC. "Was supposed to come on in mid-January, relaying KGOU \*106.3 Norman, but not heard yet, including one day when tropo was up and I could get KGOU itself."
- OR Corvallis K264- \*100.7, but "almost ready to go on the air."

**Deletions**

- AK Cantwell K216BZ \*91.1
- AK Denali National Park K215BM \*90.9
- AK Tok K216CA \*91.1
- AR Fayetteville K249CE 97.7
- AR Waldron K280CA 103.9
- CA Borrego Springs K232CC 94.3
- CA Bieber K220CJ \*91.9, after State of OR protested
- CA Burney K220CW \*91.9, after OR protested
- CA Garberville K280CR \*103.9 (see "New," above)
- CA Susanville K247BW 99.3
- CA Walnut Creek KCEQ \*100.5
- FL Lady Lake W257AD 99.3
- NH Keene W211- \*90.1 (see "New," above)

- OK Ponca City K269BF 101.7
- OK Seminole K215BJ \*90.9
- OR Cottage Grove K206AL \*89.1. Apparently KQFE \*88.9 Springfield is coming in so well that it has forced K206AL to quit.
- PA Erie W25AB 98.3
- WA Bellevue K281AA 104.1; this deletion may be related to the new CP for KMIH \*104.5 Mercer Island
- WI Janesville W238AC \*95.5
- WI Spooner WXMG 106.3
- "Just got Henry Studebaker's new guide. Can't travel without it" [the Country Music Radio Atlas].
- "Thanks for continuing on."

**SCServices, 67, 92 kHz**

*Symbols are as in the "FM Atlas"*

- CA Los Angeles KBIG 104.3 tG, 92, Mormon, and "sometimes carries the news from Channel 5 in Salt Lake City"; retains tX, 67
- IL Chicago WNUA 95.5 still tE, 92, Italian, run by a Mr. Liberati. "Signal is not the greatest." Several Chicago stations have data, but none related to the Chicago Board of Trade, as a reporter found out. The computer data SCA—"I use it to put me to sleep if I play it low." The SCS of WWBZ 103.5 "sounds like a distant snow blower running amidst a waterfall... I really like the SCA radio [Gran Prix C830] that I got last summer—it's wonderful."
- IL Skokie WTMX 101.9 tG, 9 (not tM), LDS,

- with Channel 5 Salt Lake City at times; retains tX, 67
- KY Whitesburg WMMT \*88.1 still tB, 67. "The folks at WMMT are really enjoying the BBC on 67 kHz using the G-Es."
- MI Birmingham WCSX 94.7 tC, 67, relay of WHND AM 560 Monroe MI. "I can get WHND much better on the SCS, especially at night, except for all the crosstalk from the main channel."
- MI Ishpeming WJPD 92.3 tS, 92. "We were relaying WDMJ (AM) to WJPD (AM), now WIAN (AM), using the 92 kHz on WJPD. It's been replaced by STL, but still used for remote pickup relays to the studio or return to the remotes. We can also monitor remotes during setup without direct studio contact."
- MN Brainerd KLIZ-FM 107.5 tC, 92, relay of KLIZ AM 1380, in conjunction with FM Atlas Publishing for testing of 92 kHz SCS devices (had been tU, 92, but will keep KLIZ AM programming on indefinitely); retains tM, 67.
- MN Mankato KYSM-FM 103.5 tR, 92 (retains tM, 67), now "(New) Country 103 FM" (strict), from "FM 103"
- MN Northfield WCAL \*89.3 tE, 67, Iranian, Russian and Chinese; Ali Haghghi in Eden Prairie is leasing the SCS at \$900/month and hoping to sell advertising. The ad rep of the Russian newspaper, "Zerkalo" (mirror), Alex Serov, is doing Sunday 2-6 p.m. and Tuesday, Thursday and Sunday 7-8 p.m. Hmong is on 6 a.m. to 8 a.m.; Islam 6-7 p.m.; the head of the Fridley Mosque does the show; he is a business professor at Augsburg College. "Interesting that they have hired me. It's a Lutheran College and I am a Moslem." This issue of FMedial is partly delayed by my visiting Ali and consulting about receivers. Chinese music is playing afternoons, using an auto-reverse cassette and CD players. Receivers are being lent out to Chinese restaurants, hoping that the Chinese community will support the new station, which has no call letters or name on its office door.
- MN Owatonna KRFO-FM 104.9 tX, S, tone on 67; sports and special events on 92.
- MN Walker KLLZ-FM 99.1 tC, 92 (from tS), retains tM, 67 (with KLIZ-FM 107.5 Brainerd)
- NY New York WKCR \*89.9 tE, 92 (from tM), all oriental music (most likely Chinese), the same large batch of songs over and over. "I wanted to know what language it is so I called and asked for the engineering department, but was told they don't have one; they do have a couple of engineers but 'they don't come in regularly'. The second time I called an announcer told me 'We play jazz and classical, not oriental, and we're on 89.9. I don't know what a 92 subcarrier is'. I'll have to wait 'til they start actual broadcasting to find out what it is." In-Touch still on 67. Music on 92 is "mostly soft rock, with a bit of harder rock and some songs done by little kids. This has excellent sound here in Queens; can't say the same for the crosstalky, often muddy-sounding In-Touch Networks on their 67." [In-Touch has since called me and I told them about the poor quality of their signal, as reported by this person.]
- NYC—"I was thinking, maybe hotels in NYC and at JFK airport could have SCA radios available for their foreign guests. The main problem would be how to keep them from being stolen; they'd have to chain them to the furniture or something similar."
- WI Fort Atkinson WSJY 107.3 tS, 92, remote pickup relay to the studio.
- AUSTRALIA—Radio Mindanao Network plans to come on the air here, and also to start an SCStation in Rome, Italy. If so, this would be the first known non-data use of SCS in Europe.
- Thanks to Doug Faunt and to a Tom, apparently at Ohio State University, for mentions on a computer bulletin board, ARRNET, read in Australia: "Bruce Elving is the owner and he

is VERY helpful. I have bought products from his company which work fine. One in particular is the G.E. Superadio modified to include one or both subcarriers. Write them. You'll be happy. Tom."

Regarding the \$26 SCS radios imported from China, a CA electronics person said, "They're really crappy radios—so cheap it's worse than a \$12 dime store radio with an adapter. Other SCA radios are much clearer."

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by FCC (at or near top of hour)*

- AZ Safford KXKQ 94.1 Kat
- AZ Willcox KWXC 98.3 City FM, returns to air
- FL Palm Beach WRMF 97.9 uses calls, not "Smile 97.9 FM"
- LA Shreveport KMJJ uses calls, now "Mo' Jamz KMJJ," and sheds "Magic 100"
- MI Zeeland WGNB \*89.3 FM-89
- MN Pine City WCMP-FM 92.1 92 Country
- NJ Belvidere WRNJ-FM 107.1 Country 107 (strict) and partial simulcast with WRNJ AM in morning drive. Identifies with Washington-Hackettstown-Phillipsburg. "Good signal in the Poconos, poor signal in Easton/Phillipsburg and most of the Lehigh Valley, fighting WKDN \*106.9 and WZVU 107.1 all the way—truly a 'shoehorned' allocation!"
- OH Hamilton WZRZ 96.5 Y-96 (from "The River")

- PA California WVQC \*91.9 Power 92 (from/PA Emporium WQKY 99.3 Y-99 (from "99-Q"), simulcasting WLEM AM, along with some "WLEM" jingles ["Q-106-3"]
- PA Huntington WOHG 106.3 106-3 (from/TX Bay City KMKS 102.5 K 102.5 The Bridge (from "K 102.5"), "for bridging the gap between Houston and Corpus Christi"
- TX Carthage KGAS-FM 104.3 K-Gas 104.3
- TX McKinney KRVA-FM 106.9 Latin 107
- TX Prairie View KPVV \*91.3 Original 91.3
- TX Sulphur Springs KYXS 95.9 FM 95.9
- PR San Juan WCAD 105.7 Alfa Rock

**Multi-City IDs In Use**

- MN Lakeville KZPZ 105.1 with Apple Valley-Minneapolis-St. Paul, but still "on air for equipment testing purposes only"
- PA Bloomsburg WHLM 106.5 with Berwick and varied third city, "The New Mix 106.5"
- WA Seattle KXRX 96.5 with Tacoma

**AM Happenings Most Likely Caused by FM**

- AR Lowell KK'P 1440 silent
- CA San Jose KEEN 1370 evicted from site, looking for a new transmitter location
- ME Caribou WFST 600 silent
- ME Machias WMCS 1400 (along with WALZ 95.3) off the air
- MD Pocomoke City WDMV 540 silent, but plans to move to Brinlow MD, closer to Washington DC
- MA Boston WEEI 590 has finally given boot to Andy Moes, but g.m. Gerry Walsh would not comment on specifics. Moes is looking for "new opportunities" (November, p. 4, cols. 2 and 3). "I spent the last year making my professional life a shambles," he said. "Now I'd like to spend some time doing the same thing to my personal life." Arbitron shows WEEI having fewer listeners lately than when its all-sports programming started 18 months ago.
- MI Reed City WDEE 1500 silent
- MN Maplewood WCTS \*1030, having moved from 100.3 FM Jan. 30. "Sorry we are moving from FM. We'll miss it," said a receptionist when called early in January. "Ham's Music of Your Life moved to WRPX 740 Hudson WI. At least WMIN was 50 kw days; WRPX must be 5-10 kw at most. Another famous FM call gone?" [WRPX is 500 watts directional daytime only.]

MOCamdendon KFEX 1520 dismissed extension of time. "The station was new in 1986 and has never been on the air."

OK Pawhuska KXVQ 1500 "silent due to fire"  
OK Perry KRAD 1020 silent

PA Bellefonte WBLF 970 to simulcast WRSC 1390 State College PA once the WBLF/WIYQ [Ebensburg] sale is approved  
PA Easton WODE 1230 now on at diminished power of 250 w, and getting "clobbered by the nighttime graveyard-channel interference" at less than 2 km from their transmitter. "Still simulcasting FM 99.9, so one wonders, why even bother with the AM?"

PA Lewisburg WTGC 1010 has given up separate programming and now simulcasting WUNS 96.3 FM.

PA Olyphant WWAX 750 "silent pending sale"  
TX Cleveland KLEV 1410 silent

TX Mineola KMOO 1510 "silent pending sale"  
VT Burlington WDOT 1390 had been silent; now talk

WI and MI stations owned by Goetz broadcasting: "All our AMs are prospering. Programming is local news, sports and information-oriented. Our news departments are very important. All other programming is from satellite and any music is CD. We don't have many working turntables."

**FM Rulemakings Proposed**

and changing the channel to noncommercial

WI Reedsburg 102.9A, Feb. 26-Mar. 29

WI Rudolph 99.9C3 for A, WIZD

**FCC Sets Times When Indecency May be Aired**

Actually the Commission established times when indecency may not be aired, but turning it around, if you're a broadcaster wanting to shelter or schedule Howard Stern or others you'd best place that type of programming on from midnight to 6 a.m. If a public station goes off the air at midnight or earlier, it can schedule indecent material after 10 p.m. [The FCC does not say what a commercial station can do if it signs off by midnight, as many, especially in small towns, do.] And the FCC quickly reminds: "Obscene broadcasts are prohibited at all times." Watch for the rule to be challenged in court, but probably not by the NAB. The NAB knows its members are divided on such matters as Howard Stern, and it wants to keep a "low profile" on the issue. Stern, meanwhile, made a fool of himself when he blasted L.A. rival KLAX 97.9 for being number one in Arbitron, saying many diaries improperly credited KLAX with the listening instead of the station carrying Stern, KLSX 97.1. However, after a diary audit, KLSX admitted that Stern was wrong and that KLAX indeed had jumped from 21st to first place in just four months. No, millions of Los Angeles people did not suddenly learn Spanish; KLAX had changed call letters and modified its music to earn itself the top spot among those 12 and over.

**FCC Slaps Turro by Refusing Upgrade; Allows WRRH Ownership Transfer**

If you look at your "FM Atlas" at north New Jersey, you'll see a small listing for Franklin Lakes, \*88.7 WRRH, "off the air." WRRH has been owned by Ramapo Indian Regional High School District, and I can remember a student at Syracuse University, while I was there in the 1960s, saying she was studying there because of having been involved at WRRH during high school. Apparently, Gerry Turro, owner of FM translator W276AQ 103.1 Fort Lee NJ, which gets into New York city, has been eyeing this Class D station for some time, and he tried to get its facilities improved to a Class A. By using WRRH as the primary for W276AQ—Turro would have found a round-about way of doing

program origination on a translator. The FCC has just dismissed WRRH's bid to grow up and become a Class A, saying it would have created forbidden overlap of its signal with those of second-adjacent WFDU \*89.1 Teaneck NJ and WBGO \*88.3 Newark. Interestingly, the FCC did grant the application of transfer of WRRH ownership to Bergen County Community Broadcast Foundation. The address of this new "foundation," according to the FCC "Public Notice" of Jan. 7, 1993, is 687 Orchard Street, Oradell NJ 07649—Turro's home.

Turro apparently has fixated on 88.7, for as you can see above, "Facilities Changes," his W232AL 94.3 Pomona NY is now relaying WNWK \*88.7 Nyack NY. Wish him luck in picking up the 10-watt WRRH signal at Fort Lee! Perhaps WRRH will become portable and move closer.

**Small Print Happenings and FM Industry News**

DAB further delayed. The Electronics Industries Association has pushed back to July 1 the timetable for submitting hardware to be tested. Previously, the deadline was April 15 with actual testing to get underway by July 1. To date, four of five system proponents have presented their system descriptions. And a new company has surfaced, Seattle-based Digital Satellite Broadcasting Corp., which would provide up to 500 digital channels, some national and some regional. According to the company, "Large sections of the country have very limited radio services today. Our system will give people a wide range of CD-quality programming wherever they go, and make travel simpler, safer and more enjoyable." It's expected terrestrial radio interests, such as the National Association of Broadcasters, will oppose this proposal.

The NAB announced, at the recent 1993 Winter Consumer Electronics Show in Las Vegas, its approval of the 57 kHz SCS Radio Broadcast Data Services (RBDS). Cost to the average FM station expected to be \$2,500 minimum to buy equipment to encode such things as format tuning, call/slogan identifier, traffic alerting and paging. "It should be the biggest thing to come along in years for consumer electronics," said Philip Roberson, Denon product manager for RBDS. "It's really easy for the consumer to understand. I think these radios will be ubiquitous in a few years."

Motorola announced an AMAX chip to providemanufacturers a low-cost way to produce AM stereo radios, with the noise-blanking circuitry now found in several Delco radios and one Denon tuner.

Proposed changes in the TV rules might result in more information for the hearing-impaired or data devotees on line 21, field 2, as well as better pictures with the optional use of line 19 for a ghost-cancelling reference signal. The FCC said that TV manufacturers are designing sets to comply with the closed-captioning circuitry mandated by the 1990 Act, and if the new proposals can be implemented soon there will be no disruption to the process.

The FCC has upheld a \$4000 fine against WXLO 104.5 Fitchburg MA for broadcasting a telephone conversation without permission. The station had argued for the fine to be reduced to \$2000, saying an FCC Policy Statement was not in effect when the 1989 broadcast occurred. "The reference to the Policy Statement was merely for guidance in determining the amount to assess. The Commission was not legally required to issue a Policy Statement prior to assessing increased forfeiture amounts," the FCC maintained. The NABoard is asking the FCC to relax the prior notification rules on taping of phone calls. The NABoard has also gone on

record opposing the FCC's current forfeiture rules. WBAW-FM 99.1 and AM Barnwell SC also fined for unannounced telephone taping—a total of \$5,000.

KBZE 105.9 Berwick LA fined \$4,500, KMBH \*88.9 Harlingen TX fined \$6,400, and KAHR 96.7 Poplar Bluff MO fined \$9,300 by the FCC for violations related to tower lighting and/or painting.

Playing the oral sex rap song, *Yodel in the Valley*, netted a \$23,750 fine against WSUC \*90.5 Cortland NY. Mused the *M Street Journal*, "unless you count 'The Candy Rapper,' it's the first time that an actual rap has been the target of an FCC action." Song was on in mid-afternoon, "when there was a reasonable risk that children may have been in the audience, it is legally actionable," said the FCC. The "base amount for an indecency violation is \$12,500. The Commission believed the egregious nature of the material exacerbated the violation." The FCC upheld a \$25,000 fine against KMEL 106.1 San Francisco for broadcast of indecent material during the 2-6 p.m. weekday "Rick Chase Show." The National Federation of Community Broadcasters newsletter had a warning that the FCC is expanding its on-site inspections. "An NFCB station was visited by the FCC recently and cited because the EBS tests were not logged."

In other fine news, a slot machine tournament commercial cost KWAZ 97.9 Needles and its AM \$12,500. KMZQ 100.5 Henderson NV was hit with \$12,500 for gambling spots, and WJZZ 105.9 Detroit \$6,250 for not conducting a "count-the-song" contest as it had advertised. WBHL \*91.3 Florence AL hit with a \$5,000 fine for playing announcements that promote the sale of goods and services. Another non-comm station hit with a \$5,000 fine was KRTM \*88.9 Temecula CA "for violating the Commission's rules prohibiting noncommercial stations from broadcasting announcements that promote the sale of goods and services." Failure to comply with EEO rules fetched WGUL-FM 105.5 and AM New Port Richey FL a \$15,000 fine. The FCC pointed out that the stations failed to implement a formal EEO program except for the last five months of its license term. They also failed to interview or hire any minorities for 14 openings during that term, but had hired a part-time Hispanic announcer and had just promoted him to fulltime.

Biggest fine-earner of the month: T. Kent Atkins, \$250,000. He controls six TX and LA stations. The FCC has designated for hearing the license renewals or license applications of KLMN \*89.1 and KRGN 103.1 both Amarillo, KENT-FM \*90.5 Odessa (and its AM), KAMY \*90.1 Lubbock, KBTT \*90.5 Bridgeport, all TX; and KOJO \*91.7 Lake Charles LA. Atkins controls several of those stations under the Caprock Educational Media Foundation, and they have a Christian format. An FCC investigation revealed that he concealed facts and knowingly submitted false documents in the construction and operation of the stations. Besides the fine, there's a chance the FCC will not renew the license applications of the stations.

The \$600,000 fine levied against Infinity Broadcasting (January, p. 5) was justified by the FCC as "the measured and appropriate response to Infinity's apparent misconduct. [The FCC is] seriously concerned that Infinity's pattern of apparent misconduct may reflect an ongoing indifference to the requirements of federal law governing indecent broadcasting," and the FCC threatened that "any new facts discovered in connection with existing complaints or pending enforcement proceedings or any future violations will result in further enforcement action, which may include forfeiture proceedings, short-term renewal or license revocations."

The eight-year battle over WNWK 105.9 Newark appears to be over, with Arthur Liu's Multicultural Broadcasting taking over from interim operator Global Broadcasting Group. Liu, long on the SCS airwaves with Chinese, is

operating this station with multiple nationalities, including two ethnic SCSes. The Committee to

Multicultural  
Broadcasting  
Inc.

ARTHUR LIU  
President  
General Manager  
449 Broadway  
New York, NY 10013  
(212) 966-1059

Preserve Multi-Ethnic and Multi-Lingual Programming and the Committee for Jersey City Radio asked the FCC for reconsideration of its action. "The Commission denied these petitions, finding nothing in them to warrant changing its original decision."

It happens very rarely, but the FCC death knell hit WYLR 95.9 Glens Falls NY, which failed to get its license renewed because of misrepresenting various aspects of its operation to the Commission. The license was awarded to Lawrence N. Brandt, who had filed a competing application.

The FCC has proposed modifying license renewal application forms so that licensees can note whether the stations are actually on the air or not. Licensees have to notify the FCC when a station is not on the air 30 days or longer, and "must turn in their licenses to the FCC when discontinuance is permanent." These regulations have not always been followed, and the FCC has become aware of stations that have discontinued operation without notifying it. By asking on Form 303-S, the Commission hopes to be able to track the status of such stations. I recently sent an informal objection to the FCC's renewing of the licenses of two FM translators known to be off the air—K244AU 96.7 Two Harbors and K244CZ 96.7 Pierz, both MN.

Last month (p. 6) I revisited Thomas Root, the "FM radio con," and I tried to find out which prison he is spending his 15-year sentence in. He's not at the Federal Prison Camp in Hermantown MN, and scanning their records they could not tell me which facility he might be in, not knowing his middle name and Social Security Number. Jerry Kautz is in the MN prison, and we have made contact by letter. He's holed up because of fraud involving selling FM transmitters and not delivering them.

Duopoly news: WRMM-FM 101.3 Rochester NY and AM were to have been paired with WPMY-FM 97.9 and AM, but instead will go with WCMF 96.5. KHFI 96.7 Georgetown-Austin TX is to be paired with KPEZ 102.3. WFMS 95.5 Indianapolis plans to take over a baby FM station when it is born—WGGR 106.7 Greenwood IN. No indication what the format of WGGR will be when it debuts this spring. WFLY 92.3 and WPTR AM in the Albany NY market will be paired with WROW-FM 95.5 and AM, pending FCC approval. Each pair of stations has 35 employees; no word as to whether or not the combined work-force of 70 would be maintained.

Ministry-minded WCSG \*91.3 Grand Rapids MI walked away with \$411,000 in pledges in a three-day drive. The fund-drive helped the station complete a \$310,000 renovation project. The excess amount will enable WCSG to buy digital equipment for a new studio, and probably part of it is being ploughed into the Children's Sunshine Network, which goes out on satellite to many stations' SCSes. A correspondent writes from the area: "Public FMs have trouble raising ¼ that amount in 10-day drives!"

The Americans with Disabilities Act (ADA) will affect many broadcasters, especially those

with 15 or more employees. However, Richard E. Wiley, former FCC chairman, pointed out that certain religious broadcasters may be exempt. A religious "corporation, association, educational institution or society" may give a job preference to members of its own faith even if such a preference would result in discrimination against a disabled person.

WQMG 97.1 Greensboro NC is a short-spaced station wanting to change its transmitter location, but the FCC nixed the application, saying that it would place an excessive amount of power in violation of the FCC rules. The short-spacing is most likely to the SW—to WKTC 96.9 Statesville-Charlotte.

Stanley E. Hubbard, 95, founder of KSTP-TV St. Paul and other Hubbard broadcasting stations, dies. He was an "eccentric" who saw the benefit in TV early on, and pioneered KSTP-FM 102.1, which was to fold in 1952 (last month, p. 6, bottom of the page). KSTP-FM came back on the air on 94.5 in 1966. "He was a strong, tough businessman, but he was a helluva nice guy—and a totally different person when he was away from a business setting," said George Carlson, transmitter supervisor. His son, Stanley S. Hubbard, continues the tradition, trying now to get up and running USSB—United States Satellite Broadcasting, with direct-to-home reception.

"Beyond 2000: New Frontiers in Communication" is the theme of the National Association of College Broadcasters at Columbia College, Chicago, Feb. 26 and 27. Registration is a reasonable \$30 per person and for more information call the NACB hotline, (312) 663-1600, Ext. 185. Columbia College is at 600 S. Michigan Ave., Chicago IL 60605-1996.

The "M Street" database showed there were 577 AM-FM station call letter changes in 1992 vs. 534 in 1991. There were fewer format changes this year than '91—991 vs. 1018. There were 69 frequency changes this past year, three fewer than in 1991; 13 stations changed their city of license—the same as last year. In 1992 there were 273 new stations, compared to 425 in 1991.

From the FCC as of Dec. 31: AM radio 4961 licensed, FM (92-108 mhz) 4785, FM (88-92 mhz) 1588, for an FM total of 6373.

From the classifieds: Looking for a job in public radio or TV? Call the CPB Jobline, (800) 582-820 or (202) 393-1045. The NAB Jobline after 6 p.m. EST (202) 429-5498, and the NPR Jobline is (202) 822-2777. RTNDA (Radio-Television News Directors' Association) is (203) 659-6510.

Fulltime and a parttime disc jockey at KSTP-FM. Resume to Bob Davis, KSTP-FM, 3415 University Ave., St. Paul MN 55114.

Director of Information Services, KSJN \*99.5, KNOW \*91.1, cover letter and resume to Human Resources/INFO, MN Public Radio, 45 E. 7th St., St. Paul MN 55101.

General Electric "Superadio II" and the new "Superadio III" at \$50 plus \$4.50 shipping. FM Atlas Publishing, Box 336, Esko MN 55733-0336. We are set up for VISA and MASTERCARD; call at (218) 879-7676.

FM FORUM

CONTRIBUTIONS FROM READERS

Don Wilkerson, living in WV, recently visited his home in central IL after a long absence and he said "I can't believe how many new FM stations there are."

"Thank you, Bruce, for letting me continue with FMedia!" writes Warren Bird, a "retired FM nut! and music lover" from NC. "Will be looking forward to next year's news. Our listener-supported WCPE [\*89.7 Raleigh] is going slightly apace over the 100 kw prospect by the end of the year (Christmas present maybe?). Keep the good job up!"

Not quite enough material for two more pages, so I'll sign off here. Until next month, when there should be more FM Forum, Bruce F. Young

1993

Volume 7, Number 3—March, 1993

### New FM Station, Translator Grants

*Translators have less than 100 watts unless indicated otherwise*

- CA Healdsburg 95.9 850 h,v; 264 m, Deas Communications, Inc.
- CA Joshua Tree 92.1 6000 h,v; 100 m, Desert Willow Bcstrs. [Share Bcstg.]
- CA Lompoc 104.9 700 h,v; 207 m, Lion's/CA Patterson 97.1 3000 h,v; 100 m, J. B. Bcstg.
- FL Port St. Lucie 101.3 6000 h,v; 100 in, Hoston Bcstg.
- FL Samsula (west of New Smyrna Beach) WTKO \*88.7 1000 v, 46 m, vertical only, Mims Community Radio
- GA Brunswick 104.1 6000 h,v; 78 m, CGB, Inc.
- GA Unadilla 99.9 6000 h,v; 100 m, Dallas W. Tarkenton [m, C. Radio]
- IN Clarksville (Louisville KY) 93.1 3000h,v; 100/IN New Washington \*88.3 1000h,v; 83 m, g, Lou Smith Ministries [R. Victor Bell]
- IN Princeton WSJD 100.5 3000 h,v; 100 m./MN Bemidji \*91.3 60000 h,v; 297 m, nt, mono, MN Public Radio [County Bcstg.]
- MN Sleepy Eye 107.3 1130h,v; 160 m, Brown/MT Great Falls \*90.9 100000 h,v; 145 m, g, Brightness Ministries [the Simpsons]
- PA Clarendon 106.9 4700 h,v; 113 m./TN Clinton \*89.9 200 v, 598 m, vertical only, Cumberland Communities Communications
- VA Lynchburg WVMC \*90.9 100 h, 184 m, Liberty University
- WV Ravenswood 93.1 3300 h,v; 136 m, Osborne Enterprises, Inc.
- WI Goodman (31 km SW Iron Mountain MI) \*91.3 420 v, 36 m, vertical only, Schools
- ON Orillia CFOR-FM 105.9 50000 h,v; 150 m, taking channel from CBC (see "Facilities")
- PQ Alma 95.5 50000 h,v, m format, a new company with interests in CHRL Roberval, CJMD Chibougamau and CHVD Dolbeau
- BAHAMAS Nassau ZNS-FM 104.5 5000 h,v from Channel 13 tower in the center of New Providence Island. Operations on 107.1 and 107.9 are now believed to be low-power relayers of ZNS-1 (1540 AM) Nassau.
- BARBADOS: Joining two AM stations, "CBC-TV" channel 8 and "YESS 10-4" at 104.1 are Faith FM at 102.1, Radio Liberty at 98.1 and BBS FM Stereo 98.1.
- CAYMAN ISLANDS: One FM, operated by Radio Cayman at 105.3 is on the air, with two others to follow, "likely low to moderate power," and to replace AM stations on 1205 and 1555 in July.
- SAINT LUCIA—Radio St. Lucia is on 97.3, 103.3, 107.3 and 660 AM.

LA Rayne 106.7 KCRL (KVTO)

ME Bar Harbor 107.7 WEJS

MD Ocean City 106.9 WLGE

MD Salisbury 103.1 W276AW

MA Framingham 105.7 WCLB-FM (WVBF), k, uses calls, "The Country Club, WCLB." WCLB AM is in Camilla GA. Had been WVBF since 1971, and before that was WKOX-FM; †E, Haitian French, 92 (from †Z, retains †U, 67, telemetry). WKOX AM simulcasts, except for a local morning talk show.

MA Great Barrington \*95.1 to be WAMQ (from WBBS) if sale to WAMC Albany is approved by the FCC

MA Turners Falls 93.9 WPVO

MI Ann Arbor 102.9 WIQB "FM" (WIQB-FM); AM in Saline gets new calls

MI Hillman 94.9 WKJZ (WYHE)

MI Muskegon 107.9 WKBZ-FM (WMHG), to be rt, changing with Whitehall.

MI Whitehall 95.3 WMHG (WKBZ-FM), to be s, but "Less rap, because rap is starting to die" (?). This is the second LMA in the Muskegon market, but it has been delayed ostensibly due to technical problems in adjusting satellite dishes, but most likely it's because of the outcry from the black community. Manager of WMHG Sammie Jordan (pictured) and his wife, former announcer Brenda Jordan, have been let go. Stations refuse to give reasons for the firings. WMHG, still on 107.9, was "stereo-phony," a "mono feed to a multiplexed signal," but back to full stereo and using live jocks during the day (has SMN "Touch" at night). The change will benefit WKBZ-FM with a 25000 watt upgrade on 107.9. WMHG studios now co-located with WKBZ-FM. Deregulation has cut into the Muskegon market, with most stations said to be killing each other for the advertising dollar. "This is the second LMA in Muskegon. The other is between WSNX 104.5 and WMRR 101.7 (which WSNX is buying)."

MN Albert Lea \*103.9 K280EB

MN Eden Prairie 105.7 KCFE (KOUO), jm, \$, new age, "Cafe," testing, expected on 3-15

MN Faribault 107.5 KCVN

MN Lakeville 105.1 WTCX (KZPZ), rm, \$, legal ID heard between :50-:55 and "lots of singing '105 WTCX' jingles"

MN Minneapolis 100.3 no call letters (WCTS now on AM), and off the air  
 MS Meridian 105.5 W288BD  
 MS Woodville 107.7 WLGG  
 MO Gallatin 101.7 KGOZ  
 MO Joplin 102.5 WMBH-FM (KKUZ), k, no SCS (had FM, R)  
 MO Lexington 107.3 KISF (KXXR), "Kiss 107"

 BN Tijuana XHQF 98.9 a full Class B now, with approximately 50000 h,v; 150 m, "from high atop Mt. San Antonio. Announcing is mostly in Spanish, but the DJs have recently been adopting quite a few English slang expressions. Their slogans are 'More FM', 'level ninety-eight/nivel noventiocho'. This station provides much-needed variety in a conservative radio market overloaded with sappy adult contemporary 'love songs' stations. . . Little Class A XHTIM in Tijuana is still broadcasting on

91.5 from Mt. San Antonio, despite interference from Class CXETRA-FM on 91.1. When XHTIM was using 103.3 on Mt. San Antonio, the alternate-channel interference to San Diego's 102.9 and 103.7 on Mt. Soledad wasn't all that bad. Despite all the exaggerated publicity, the interference caused by XHTIM operating at 103.3 was similar to the 'interference' situation which exists between several other alternate channel combinations using the Mt. Soledad (San Diego) and Mt. San Antonio (Tijuana) transmitter sites. These channel combinations include the 94.1-94.5-94.9 trio, the 97.7-98.1 duo and the 102.5-102.9 duo. These channel combinations are successfully utilized because XHTY 94.5, XHTIJ 97.7, XHUAM 102.5 and KCLX-FM 102.9 all utilize directional antennas. The use of 103.3 at Tijuana poses the same short-spacing problems as exist with respect to 94.5, 97.7 and 102.5 [and] shouldn't pose a problem if a directional antenna is mandated."

**Stereo—Or to be Stereo**

- AK Tal keetna KTNA \*88.5, and using some records from the music library of the former KABN (AM-830) "that went belly-up a few years ago—was co-owned by silent KXD? 103.1 Anchorage."
- AR Prairie Grove KDAB 94.9
- FL Zolfo Springs WZZS 106.9
- MA Charlton WBPV \*90.1, r, "very top-40ish—no longer rebroadcasts WCUW in Worcester"
- MI Marquette WUPK 94.1, but it has "really bad sound, over modulated." Relays WIMK 93.1 Iron Mountain exclusively and the pickup of that signal must not be good at the WUPK location.
- NJ Ocean Acres WQNJ 98.5, rm. First air date was to have been Mar. 1, but that is later than the summer '91 startup which was promised. It is to relay WJLK-FM 94.3 Asbury Park.
- OR Gleneden Beach KSHL 97.5, k
- PA Tobyhanna WPMR-FM 107.9
- TN Nashville WFSK \*88.1, back on air after a 14-month hiatus, following a fire in the Academic Building on the campus, "which demolished the station." Format: js. On 8 a.m. to about midnight. "We have approximately 200,000 people in our listening area. We welcome all our old listeners back, and invite new listeners to tune us in." It is owned by Fisk University.
- TX Carthage KGAS-FM 104.3
- TX Denison KDSQ 101.7, confirmed stereo
- WI Brillion WEZR 107.5, b, but testing only. "A good signal here in Appleton. With that kind of coverage, I hope they do well."

**Format Changes**

*Formats are the same as in the "FM Atlas"*

- AL Fairhope WZEW 92.1 still rp, but now in an LMA (local marketing agreement) with WTKX-FM 101.5 Pensacola FL, instead of with WDLT 98.3 Chickasaw AL
- AL Tuscaloosa WFFX 95.7 mr

- WI Wisconsin Rapids W228--93.5

**SCS services, 41, 57, 67 and 92 kHz**

*Symbols are as in the "FM Atlas"*

- AR Fayetteville KUAF \*91.3 no SCS (had 1M.R); see Pittsburg KS, below
- CA Alameda KJAZ 92.7 tX, 67, Mainstream data; X, 92, Interactive Network at 9600 baud. "It takes a strong FM signal for interactive television, and we have to go around the neighborhoods in a van with a spectrum analyzer to find out where the system will work." [Network CA Livermore KKIQ 101.7 tX, 67, Interactive/CA San Francisco KSAN 94.9 tX, 67 (from 92, which is now blank), IN
- GA Atlanta WZGC 92.9 tS, 67, cueing for special events/remote broadcasts; still t(D), 57.
- WPCH 94.9 tE 92; keeps t(D) 57, no 67
- GA Manchester WVFJ 93.3 drops tM, 92; retains t(D), 57
- IL Decatur WSOY-FM 102.9 tS, 41 kHz; tD, 57 kHz, tM, 67; apparently runs tS when main carrier is mono, such as during play-by-play sports. No 92.
- IA Cedar Rapids WMT-FM 96.5 tB, 92, to relay Rush Limbaugh in the early afternoon to restaurants that have separate rooms for discussion groups. The SCS feed is earlier than when WMT (AM) carries it. Retains tM, 67.
- KS Pittsburg KKOW-FM 96.9 tM.R, apparently taking the service from KUAF Fayetteville AR and WMBH-FM 102.5 Joplin MO (see "Call Letters," above). NonID is "96.9 The Cow."
- NY Garden City WDRE 92.7. Radio Sedaye Iran reappeared after being off three weeks. "I don't think it's going to last; it's still

cross-talky and thin-sounding in central Queens, where lots of Iranians live." The 92 is still telemetry warbles. Last year, "Antena FM" (Greek) also lasted only three months on "DRE's 67 before switching to WQHT's 67 (97.1 NYC). WDRE's address and phone number are in FMedia Feb. '91, p. 8, col. 2 under "From the Classifieds."

NY New York WKCR \*89.9 92 is Mandarin Chinese, based in CA; "the phone numbers in the commercials have San Jose or San Francisco area codes. That makes 18 ethnic services on New York City's FM-SCS dial, 1/3 of which have gone on in just the past year. There are three Italian services, 3 Haitian French, 2 Korean, 2 Colombian Spanish, 2 Cantonese, 2 Mandarin and one each in Tagalog, Greek, Farsi and Russian. Eleven are on 67 and 8 on 92 (which adds to 19 because Korean Christian Broadcasting is simulcast on two NYC SCAs). WKCR still has tT, 67."

NY White Plains WFAS-FM 103.9 tU, 67, from tC. It had WFAS AM. Now "there's an open carrier, and every so often there's a tone, 2 or 3 seconds long... This tone always occurs just before WFAS AM (1230) gives a traffic report (with an on-the-ground reporter; their helicopter traffic reports are not preceded by a tone)... Nothing on the 52 SCA."

The Feb. 2 "Wall Street Journal" had an article, "Small Broadcasters Reach Asian-Americans," mentioning "sideband radio." It estimates 35 to 40 such sideband broadcasters exist in NYC and other markets. "The advantages for advertisers include low costs and the opportunity to pinpoint audiences they otherwise might miss." Those audiences are not counted by ratings services, "so broadcasters have to negotiate special deals with advertisers." Radio Mindanao USA estimates it reaches 40% of the NY-area Filipino population. One advertiser on "WRMN" (WBGO 88.3's 92) is American Telephone and Telegraph, which pays \$720 monthly for 120 60-second spots. AT&T says it uses foreign-language media to reach immigrants.

"The SCA radio that you modified this summer... has been a great source of pleasure for me and many other blind people. Thanks again for your good work and continuing efforts that make life just a little more enjoyable for those of us who can't see."

"You did an excellent job on my G.E. Superadio installation."

"How nice to have met you over the phone. You were not a high-pressure salesman and respected my indecision. This I won't forget."

"Enjoy the spring—thanks for your outstanding newsletter!"

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by FCC (at or near top of hour)*

- CA Auburn KHYL 101.1 Cool 101.1 FM (from "Solid Gold 101")
- GA Athens WNGC 95.5 uses calls: "FM 95" and several other slogans are used, "but always with call letters."

- LA Monroe KNOE-FM 101.9 Mix 102 (from "FM 102")
- ME Bangor WSHZ 92.9 Soft Hits 92.9
- MN Moorhead KVOX-FM 99.9 Red River Country K-100
- MN St. James KXAC 100.5 The New Lite FM
- NH Hinsdale WYRY 104.9 Y-105
- NY Horseheads WQIX 100.9 Country 101
- NY New Paltz WBWZ 93.3 Z Rock
- NC Grifton WTND 99.5 Thunder Radio, now 16500 h.v.; 257 m, with an "excellent signal"

OK Ponca City KLVV \*88.7 Love 88-7 (from "The Love Station") [Coast WA Aberdeen KDUX 104.7 The Rock of the/WA Auburn KGRG \*89.9 Today's Rock. Their winter fund drive raised money to help pay for a \$100,000 power increase. "As you know, KBTC-FM \*91.7 Tacoma simulcasts KGRG... They must use the 89.3 translator in Sumner WA to receive KGRG, as I can get 89.3 quite clear in downtown Tacoma, but can't receive 89.9 at all due to KGHP Gig Harbor, also on 89.9."

BC Victoria CFUV \*101.9 FM 102  
MB Winnipeg CITI 92.1 Cee Tee FM (from "Power 92")

"I received my copy of the 14th edition of the FM Atlas, and it is great."

**Multi-City IDs In Use**

- IL Virden WCVS 96.7 with Springfield, not with Auburn-Girard
- IA Waterloo KOKZ 105.7 with Cedar Falls, instead of Cedar Rapids
- WA Bellingham KISM 92.9 drops Victoria BC and adds Seattle to its ID list. Still "Kissum," r, but dropping rap and dance music. "They play only rock, old and new (not heavy metal)."

**AM Happenings Most Likely Caused by FM**

- AL Daleville WTKN 1560 silent
- AR Trumann KXRQ 1530 silent
- CA Concord KWUN 1480, which recently went to country, "is now silent"
- DC area—WPGC's (1580 Morningside MD) business news format now heard on an unknown area FM subcarrier, following the demise of the nighttime simulcast agreement with WMET 1150 AM Gaithersburg MD.
- FL Miami WWFE 670 fights to stay on air after banks withdrew advertising and especially after Barnett Bank called in a \$500,000 loan used to start the station, known as Radio Fe—Spanish for "Faith Radio." Emilio Milian, a controversial talk-show host who has criticized anti-Castro groups in FL, and who lost both legs in a car bombing, refuses to be silenced. He is accusing Barnett Bank of taking offense at a commentary of his that mocked an official of the bank. Station is up for auction, with Milian's son one of the bidders for the facility, now valued at \$1.9 million, from a high of \$5.25 million at one time.
- IL Sycamore WSQR 1560 had been silent, returns with modern rock, but temporarily run by Northern IL U. students from De Kalb.
- MD Silver Spring WNTR 1050 silent pending sale, then planning to return with a children's format and new call letters
- MA Clinton WBSO 650, FCC dismisses application to change city of license to Lancaster MA, deletes call letters
- MN Minneapolis KUOM \*770 taken over by U of M students by the end of June, after the university refused further funding. The students operate carrier-current WMMR, and will try to carry the modern rock sounds vacated by KJJO-FM 104.1 St. Louis Park, which is now country. It will be known on the air as "Radio K." On weekends it will be "Radio K International," mixing modern rock with music from around the world. "KUOM will have to be careful about the songs it plays because the university can't afford the sort of fines the Federal Communications Commission has been slapping on stations that broadcast indecent material. If that were to happen," Jim Musil, director, said "the station would have to start playing 'The [Minnesota] Rouser' all day long." The student management is open to suggestions from listeners on or off campus; call KUOM "Info Line" at (612) 625-9673.
- MN St. Paul WDGY 630 has taken a middle of the road format off the satellite, which WRPX 740

Hudson WI now simulcasts. "The legal ID is WDGY 630 and WRPX 740. . . WDGY is the key station, as everything revolves around them." It is a different service from Ham's "Music of Your Life," formerly heard on WMIN 1030 Maplewood MN (now religious WCTS).  
 MO St. Louis KASP 1380 AM, was sports, now fulltime simulcast of WKQB 106.5 Granite City IL-St. Louis, which nonIDs as "KHTK."  
 NE Lincoln KFMQ 1480 "silent for repairs"  
 NY New York WBBR AM 1130 shot down by the NY Transportation Department for placing radios that played the business-news station in mid-Manhattan—a \$150,000 investment, including posters. "The radios were installed without . . . approval," forcing Gannett Outdoor Advertising to pull their plugs. Perhaps Gannett will have better luck with sky advertising as it tries to persuade airliner riders to use USA Today Sky Radio, a live audio service, heard through headphones in 74 aircraft flown by Delta and United Airlines. It hopes to get to all the nation's 2000 commercial planes. The radio formats all carry commercials, about eight 30 or 60 second spots per hour.  
 NC Rose Hill WEGG 710 silent for repairs; its schedule is on WBSY 104.7.  
 PA Ephrata WGSB 1310 deleted by FCC  
 TN Hartsville WJKM 1090, deleted by FCC, but said to have come on the air, with the FCC having misplaced its application for authority to return after being silent.  
 TN Lebanon WCOR 900 silent  
 TN Trenton WTNE 1500 "silent pending repairs"  
 BC Vancouver CHQM 1320 adds Chinese, nights, "brokered talk"

**FM Rulemakings Proposed**

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- DE Bethany Beach 95.9B1 for A, WVTR, Mar. 29, Apr. 28
- FL Charlotte Harbor (from Punta Gorda) 92.9C1 for C2, WIKX counterproposal
- FL Marco 98.9A for 92.7A, WGUF counterproposal. This would include adding "91.7A as a noncommercial allocation at Marco.
- ID Rupert 92.5C for A, KNAO, Apr. 1, 16
- IL Fairbury 107.7A counterproposal
- LA Blanchard 102.1C3, Mar. 29, Apr. 28
- LA Buras Triumph 103.5A for 94.1A, with Galliano [29, Apr. 28
- LA Galliano 94.3C2 for C3, KBAU, Mar./
- MS Durant 106.3A counterproposal
- MO Kennett 104.3A, Apr. 12, 27
- NM Silver City 92.9C2 for 94.5A, KSCQ, Mar. 29, Apr. 13 [Apr. 12, 27
- NY Rosendale \*102.5A for \*88.7A, WFNP, /
- OR Cannon Beach 98.9A counterproposal
- OR Coos Bay 102.1A, Apr. 12, 27 [13
- TN Paris 94.1C3 for A, WMUF-FM, Mar. 29, Apr. /
- VA Remington 104.5A, Apr. 12, 27 [13
- WA Spokane 96.9C3 for A, KSPO, Mar. 29, Apr. /
- WY Cheyenne 104.9A, Apr. 12, 27

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AZ Sun City 106.3C2 for A, KONZ
- AR Camden 104.5A, first come/first serve
- AR Huntsville 99.5A for 92.9A, KFAY-FM
- FL La Crosse 99.5A, Mar. 19-Apr. 19
- FL Monticello 101.9C3 for A, WJPH
- GA Douglas 99.5C for C1, WDMG
- IL Canton 100.9A window ended Mar. 9
- IL Oregon 106.1A ended Mar. 9
- IN Clinton 93.9A ended Mar. 9
- IN Walton 93.7A, Apr. 6-May 6
- IA Lamoni 97.9C3 for 97.7A, KLAL
- KS Liberal 102.7C1 ended Mar. 9
- KY Hyden 97.9A for 92.3, WRNG
- Y Jackson 106.5A for 97.7A, WJSN
- London 92.3C2 for 92.5A, WYGE
- LA Thibodaux 106.3C3 for A, KXOR
- MN Proctor (Duluth) 107.7A, Apr. 6-May 6
- MN Grand Marais 95.3C ended Mar. 9
- MN Worthington 93.5A ended Mar. 9
- MO Greenfield 107.7A for 93.5A, KXBR

- MO Halfway dismissed 93.1C3 for A bid by KYOO-FM
- MO Seligman 93.3C1 for C2, KESE
- NE Chadron 94.7C, first come/first serve
- NE South Sioux City 107.1A ended Mar. 9
- NM Bosque Farms (from Socorro) 104.7C, KMXQ
- NM Clayton 93.5A, first come/first serve
- NM Grants 92.7C2, Mar. 26-Apr. 26
- 100.7C2 from 100.9A, KZNM
- NY Brighton 94.1A, Mar. 23-Apr. 22
- NY Lakewood 106.9B1, Mar. 23-Apr. 22
- NY Norwood 96.1A, Mar. 26-Apr. 26
- NY Old Forge 99.7A, first come/first serve
- NC Manteo 98.1C2 ended Mar. 9
- NC Warrenton 107.3C2 ended Mar. 9
- ND Devils Lake 96.7A, first come/first serve
- OH St. Marys 103.3A, first come/first serve
- PA Clarendon 104.3A for 106.9A, new CP
- SD Aberdeen 106.7C1 ended Mar. 9
- TX Amarillo 105.7C3 for A, KAEZ
- TX George West 104.1A, first come/first serve
- TX Plainview 106.9C2, first come/first serve
- UT Moab 96.7C3 ended Mar. 9
- WA Leavenworth 97.7A, Mar. 26-Apr. 26
- WA Yakima 99.7C3 for 99.3A, KZTA-FM
- WY Sundance 103.1A, first come/first serve
- PR Aguada 105.3B1 for 105.5A, WRFE counterproposal
- PR Carolina 107.9B for 107.7B, with Aguada
- PR Gurabo (from Utuado) 104.1B, WERR, with Aguada
- PR Ponce 104.5B for 105.1B, with Aguada
- PR San Juan 104.9B for 104.7B, with Aguada
- VI Charlotte Amalie 107.5B for 104.3B, WIYC, with Aguada PR
- VI Christi ansted add 102.7A counterproposal
- VI Frederiksted add 104.3B counterproposal
- VI Cruz Bay 101.3B for 92.3B, WDCM counterproposal

**Broadcast Indecency Rules Stayed by Court**

The effectiveness of the FCC's recent order changing the hours for enforcing the ban on broadcast indecency has been stayed by the Circuit Court of Appeals in Washington DC. A "safe harbor" when indecent material may be programmed was generally from midnight to 6 a.m. (last month, p. 5). The rule was scheduled to take effect Feb. 25.

The Court ordered the case to be set for oral argument on the first available date on its fall calendar. Until the court takes action on this matter, the Commission says it will continue to enforce its current policy of not permitting indecent programming between 6 a.m. and 8 p.m.

**Small-Print Happenings and FM Industry News**

Infinity Broadcasting has taken over the management of the Unistar Radio Networks from Dick Clark-Nick Verbitsky. "Cash-rich Infinity [is] acquiring a company that already has a well-organized advertising, sales and program syndication apparatus in place with which to distribute shows hosted by Infinity stars Howard Stern, Don Imus and Doug (Grease)man Tracht." Clark and Verbitsky would probably stay on, but the agreement allows for Infinity to acquire an equity interest in Unistar. This ties into a story in a recent "Folio: Publishing News" about the clout of pornographers in the U.S. of A. General Media, one of broadcasting's and publishing's group owners, has a history of not settling First Amendment cases, getting its way as either defendant or plaintiff in the courts. An example:

■ In the 1980s, Attorney General Meese's watchdog commission had, by letter, hinted that certain convenience stores could be construed as distributors of pornography, after which most of them stopped selling *Penthouse* and *Playboy*. When faced with a lawsuit, the Washington DC district court forced the Commission to retract the letter, but denied the magazines monetary relief.

WEZB 97.1 New Orleans is trying to syndicate morning team of John Walton and Steve Johnson via satellite; they'll pay a \$1000 finders' fee to anyone who gives a lead on a substantial station that they are able to bring to contract. If you want in on their action call (504) 469-1402.

Christian FM station WHCF \*88.5 Bangor raised \$360,000 in its 10-day share-a-thon. It gets 80 percent of its support from such donations, and devised a way to generate support by selling \$10 pledges for one one minute of airtime. WHCF has 50 percent music and 50 percent teaching programs.

Not collecting money, but having to pay it are KSIR 107.1 Brush and its AM \$2200, KRCC \*91.5 Colorado Springs \$550, KBRU 101.7 Fort Morgan \$3150, KSEC 93.3 Lamar and its AM \$1300, KGLL 96.1 Greeley \$3450, KCDC \*90.7 Longmont CO \$5150, KOZX 98.1 Cabool \$4250, KJEZ 95.5 Poplar Bluff MO \$3750, KJTN 106.3 and AM Mercedes \$20,000, KMFM 104.9 Premont TX \$9800, KLEN 106.3 Cheyenne \$3750, KRQU 102.9 \$1900 and KIMX 105.5 \$2700 both Laramie WY—all for violating technical rules or failure to light or paint their towers.

A station falling short of its fund raising goal is WMHT-FM \*89.1 Schenectady NY. It had hoped in the two-week drive to get \$100,000 but only raised \$92,588 from 1165 contributors. This has brought about speculation that its classical music format may be in jeopardy, particularly since WAMC \*90.1 Albany offers much of the same. WAMC, in the meantime, has been cutting back on its classical content, although it still fills some 50 percent of the airtime. Both stations claim their programming will stay the same, but for now the speculating continues.

WYEP \*91.3 Pittsburgh recently conducted its most successful fundraiser in its history, drawing in 1,575 members and \$75,388. This is a 25 percent increase in dollars over February, 1992's fundraiser.

Uprioriously, a group of listeners to Vermont Public Radio has clashed with the stations' board of directors about how the stations can be more responsive to their wishes. The stations' programming has been under fire for six months from "Folks for Responsive and Eclectic Vermont Public Radio—FREE VPR." FREE VPR was formed in September after a three-hour folk music program was taken off the air, but now members have their sights set on more overall diversity on the stations.

A minor uproar affecting Americans with a French background in Maine centered on a character, "Frenchie," who was a frequent caller-in to WBLM 102.9 Portland ME. While the calls were a popular feature on the morning show, the ethnic stereotype "infuriated" many French Canadians and stirred protests from anti-discrimination groups. An Ernie Gagne owned up to the character, saying "The current and ongoing controversy surrounding this humorous character has left me and my friends astonished and anguished. As I value my career and privacy above my hobby of being an amateur comedian, I have decided to withdraw my services and contributions to the WBLM morning program effective immediately." This happened after a Jewish lawyer from Augusta complained to the Maine Human Rights Commission. "I had never come in contact with Franco-American prejudice until I came to Maine," said Jed Davis.

A public station that's making it on its own—that's WFAE \*90.7 Charlotte. Two years ago it received a fifth of its income from NC, and then it happened—the state voted to phase out funding to the five public stations licensed to state universities. WFAE and the university agreed to a divorce, which the FCC ultimately approved. Studios were already off campus. It dropped Garrison Keillor's *American Radio Company* to save costs, cut travel, hired a fulltime underwriting sales person and added a third fundraising drive.

A new managing editor named to the Superior Radio Network based in Duluth. She's Debra

Smith (pictured), who began her radio career 15 years ago at WDTN \*103.3, which later changed calls to KUMD. She is a Native American who will be working on coverage of native American and natural resource issues for the stations, which are in a band across northern WI and MN.

The first in-band digital demonstration was on WILL-FM \*90.9 Urbana IL. If applied successfully to the industry, DAB could assure a smooth transition to the new technology for FM stations, allowing them to keep their present frequencies. Mike Starling, NPR director of technical operations, is optimistic that digital radio can be broadcast from within the FM band. The FCC has not set any timetable for digital radio broadcasting to begin. "We're definitely talking the late '90s before we see much [digital audio broadcasting] in the marketplace," said Starling. Costs may not be great to convert to digital, since many FM studios are already largely digital, and through multiplexing the analog signal may be continued along with the digital on the same station. This is because the digital signal is only 1/1000 the wattage of the analog signal. This disparity means the digital won't interfere with the analog. A 100-kw FM station's digital component would thus be only 100 watts. A key computerchip to make such experiments possible was developed on the University of IL campus, after which General Manager Donald Mullally of WILL-FM offered his station as a guinea pig. The first in-band digital broadcast took place on WILL-FM when few listeners could be bothered—at 4 a.m. Aug. 29. The system was packed up and used at the NAB in New Orleans at WWNO \*89.9 and "since then has been operating without much notice in WILL-FM's transmitter room." However, only one custom-built prototype receiver in the state can receive the digital signal.

The requirement that the booklet *The Public and Broadcasting—A Procedure Manual* be kept in the local public file of FM stations has been suspended while the document is being updated by the FCC.

"Radio World" recently spelled out when it is legal for an FM broadcaster to own another station in the same market under the new FCC "duopoly" rules. The FCC's new duopoly rules state that any application involving an ownership change that would result in a duopoly must include a technical exhibit that accurately depicts the locations of all station transmitter sites and placement of the stations' primary (3.16 mV/m FM, 5 mV/m AM contours), and that those stations are actually on the air. All one has to show is that there are six commercial stations with an overlap somewhere in their primary coverages in that market to the station or stations to be acquired. The acquired stations count in that total, and the audience share of the stations in the duopoly must not be over 25 percent. Docket 80-90, which helped create hundreds of new FM stations, is given as the reason for allowing duopolies—to help make stations profitable in view of increased competition. The same rule applies to LMAs when over 15 percent of a station's time is brokered by another station.

Fired program veep at KUSC \*91.5 Los Angeles Tom Deacon is suing licensee the University of Southern California and morning host Bonnie Grice. He says he was wrongfully fired because he criticized her on-air performance. Grice is married to KUSC's manager Wally Smith—an event that happened after Deacon was hired in 1989. Deacon, a Canadian citizen, lost his work permit when the job ended and is in the Netherlands working for Philips Electronics. His suit charges breach of contract and violation of state anti-discrimination laws, including nepotism and conspiracy. It could take three years before the case comes to trial.

An affiliate of MN Public Radio is inviting public stations to carry on-air announcements about a new direct-marketer of compact discs and tapes called Public Radio MusicSource. In exchange, stations will receive a royalty on gross sales and station personnel could receive discounts. MusicSource will experiment with selling classical music recordings from a catalog operated by the group's Rivertown Trading Co., which publishes the "Signals" catalog for WGBH \*89.7 Boston and the MPR "Wireless" catalog.

Last month (p. 6, col. 1) it was reported KRTM \*88.9 Temecula CA was fined \$5000 for airing commercials. The station was fined double the normal amount, after the FCC investigation showed it used "non-identifying verbosity," which the FCC defined as "unnecessary repetition of information that would otherwise be permissible." Fifteen repetitions of "Nissan of Temecula," aired by KRTM last April constituted "non-identifying verbosity." The FCC also frowned on this language, which "impermissibly conveyed price information": "At Pinky's Bar and Grill every Thursday night is ladies night," and "David A. Lander believes that if his client does not recover damages, he does not collect a fee." Also not to the FCC's liking: "Overland Bank reaches out to the business community to deliver quality financial services to your place of business" and "Do yourself a favor and come out to the Murrieta Hot Springs Resort."

J. C. Maxwell Broadcasting, WMPR \*90.1 Jackson MS, notified by the FCC that it must pay \$7,500 for violation of its rules regarding broadcasting advertisements by a noncommercial station. This is not the first fine WMPR has had, and in inquiries to it, I have failed to get any response.

Would the real grantee for 105.7 in Manahawkin NJ please stand up? The FCC has denied Jersey Shore Broadcasting Corp. and Press Broadcasting Co. reconsideration of an Order which granted an application for review filed by Seashore Broadcasting Corp. The review concerns a settlement agreement among competing applicants. According to the agreement, Press was to have gotten the channel and then under an option agreement it could ultimately swap the newly constructed station for the existing station licensed to Jersey Shore. In other words, VJZR-FM 100.1 would move to 105.7 with more power and Press would acquire the 100.1A facility. The Order has remanded the case to a judge for further action.

Thought for today from FCC chairman (interim chairman) James Quello—I wouldn't be a bit surprised if someday a lightning bolt comes out of the sky and hits him right in the crotch—regarding that talk/shock jock Howard Stern who might have to answer to a "higher authority" for his religious jokes.

The NAB, ACLU and Infinity Broadcasting are among groups filing a lawsuit against the FCC, charging the agency with denying their right to a fair and speedy trial by not giving them a faster avenue for redress of grievance rather than waiting for the FCC to collect its fines for "indecent" broadcasts through a civil suit. They want the court to throw out all pending indecency fines and keep the FCC from issuing new ones.

How did the World Trade Center explosion affect FM? It seems only two FM stations were off the rest of that day—WNYC-FM \*93.9 and WKCR \*89.9 with its two SCSes. "WYNY 103.5 was slightly distorted and mentioned using different equipment, and their Colombian SCS was off. CD 101.9/Cool FM (WQCD) was on but their two music SCSes were off almost 12 hours. All other SCSs were on. WCBS-TV2 was on; the other six VHF's were off until 11:30 p.m. (except for cable subscribers whose TV reception was unaffected)."

The CHUM group gets control over the two sets of FM-AM stations in Windsor, and the CRTS has given CKLW-FM 93.9 several exemptions from its usual programming requirements. CKLW-FM, close to Detroit MI, can compete

better by not having a limit on the number of "hits" it plays and the spoken word requirement is only five percent instead of the usual 15 percent. It must, however, up its Canadian content from 12 to 20 percent.

With the cold war over, budget cutters are looking at the shortwave Voice of America and Radio Liberty, and guess who's interested? None other than the Corporation for Public Broadcasting, which would like to control the budget and facilities of the USIA and other services involved in international broadcasting. They see the taxpayer money directed to those entities as a new source of funding for domestic public broadcasting.

Little KZSC \*88.1 Santa Cruz was forced to apologize to shaken listeners for its "War of the Worlds" type report of a bogus earthquake in southern CA. "I didn't intend to do this to harm anyone. I'm sorry. The station is sorry," said student Roger Takacs, who created the fictional program that was carried on a Thursday night. It said a major quake had just occurred in Los Angeles, killing thousands and causing huge fires, floods and mudslides. It was intended to increase earthquake awareness, Takacs said. A disclaimer was read twice, but many listeners thought the broadcast was real. Takacs had earlier contacted the FCC to see if such a broadcast was legal, but failed to notify station management.

The NAB has filed a brief in a Supreme Court case—U.S. vs. Edge Broadcasting (WKOC 93.7 Elizabeth City NC). Edge says it is entitled to run VA Lottery ads, even though there is no lottery in NC.

Sioux City's on the rise. In January (p. 8, col. 3) it was mentioned that IA town was dropped from Arbitron, but it will get its book back. Too late for this spring, it will get a summer ratings book in 1993 and be back on the spring schedule next year.

In duopoly news, KIOA-FM 93.3+AM Des Moines, KRNO 102.5-KRNT AM team up under ownership of Saga Communications. Midwest Communications' WIXX 101.1-WGEE AM Green Bay get paired with WHET 99.7 Sturgeon Bay WI.

Broadcast totals from the FCC: AM 4960, FM (92-108 mhz) 4796, FM (88-92 mhz) 1592, for an FM total of 6388. FM translators and boosters, one of which I own (W280CT Hermandtown MN), 1966.

From the classifieds: General manager KIWR \*89.7 Council Bluffs IA. Resumes to personnel office, IA Western Community College, 2700 College Road, Box 4-C, Council Bluffs IA 51502. EOE. Seems they are serious about wanting to keep the radio station.

Looking for an account executive: Resume to Judy Sher, g.m., WHOM, 477 Congress St., Portland ME 04101.

Want to buy 4-8 bays on \*91.7, including 122 m of line, prefer Shively antenna, M. Taylor, KNEO, 700 Spencer Dr., Neosho MO 64850.

Ken Diebel, now a C3 CP holder, wants a 6-bay circular antenna, prefers Phelps-Dodge on or near 92.3, KTJC, 1207 Louisa, Rayville LA 71269.

For sale Sony STJ-75 FM tuner, 8 presets, seek/scan, like new, \$175 or BO, L. Snyder, Box 182, Floral Park NY 11001; (718) 347-2940.

FM FORUM

CONTRIBUTIONS FROM READERS

One of Howard Stern's imitators is a pirate radio station, "W'HIL" 87.9 at the Richmond Hill (Queens) high school, back on in \$, 11 a.m. to 2 p.m. and for a while they were using naughty language and playing a song about a "Detachable" appendage every day "until the teachers made them stop. They're only four watts but there are at least 75,000 people within range of their signal," says Jeannette Johnson. "VJCR" 91.9 (100 watts, \$[tereo]) had a live jam session with station owner "Fred" and his friends on guitars and drums, and heard in Queens.

"Latest pirate on 91.9 is 'WOCN,' mono, Oceanside, Long Island, with current hits, rock oldies and novelty records," including anti driving-drunk PSAs; call 'em at (516) 763-3046.

Johnson also reports that WEHM 96.7 East Hampton NY is on as of Mar. 1. Station manager is Paul Conroy. Singer Billy Joel, his wife (model Christie Brinkley) and Sony Vice Chair Michael Schulhof (Oct., p. 1, col. 3) are owners. Format is adult contemporary; stereo status not indicated. She noticed that the Howard Stern Show on WKBW (AM 1520) Buffalo is 60 seconds behind the WXRK 92.3 NYC transmission. "I don't know if this is because they want more time to bleep out any extra-sleazy remarks. . . One of WXRK's station IDs goes like this: 'This is FM the way it's supposed to be—Howard Stern all morning, classic rock and roll all day, 92.3 K-Rock'. Actually, they should put him on AM only—he doesn't play records, and FM should be For Music. . . I was under the impression that you stopped writing for the WTFDA DX Association paper some time ago, not just now, or I would've subscribed to it about a year ago when I started FM DXing. . . I might still subscribe anyway—I know I'd like it, and also Monitoring Times, but I'm trying to keep costs down." [The WTFDA address is PO Box 514, Buffalo NY 14205-0514, subscribing cost U.S. \$20, Canada \$22, overseas \$32 in U.S. funds.] Back to WXRK, it looks like they can add to their slogan, to say ". . . and Greaseman at night." Meg Griffin was ousted from her 6-10 p.m. slot after seven years in favor of Doug Tracht, who's doing the show via satellite from Los Angeles. Griffin moves to the 10 p.m. to 2 a.m. airshift. "I just heard Tracht for the first time and he tells stories and jokes throughout the show; the only music is various instrumentals he uses to punctuate his tales. He's sort of raunchy, but without the unending stream of disgusting words that Howard Stern spews. He's not very funny, though, and I'm not sure if he'll fit in here in NYC. Also, K-Rock's classic rock format is very popular, but nobody can hear it during the week now unless they're home all day or awake all night, so the classic rock fans may start looking elsewhere for their music, like WNEW 'FM,' even though 'NEW tends to play many lesser-known songs.

"The CFAC anti-Stern rally (Jan. p. 5, col. 2) attracted only 100 people (in a city where 20,000 Filipinos live) even though the weather was good. The rally was not publicized by 'WRMN' partly because their opinion is that rallies don't accomplish much and that Filipinos won't be taken seriously unless the Philippine government complains to the FCC about Stern, which is unlikely. Stern has, however, been declared 'persona non grata' by the Philippine government and is barred from entering the country—not that he would

want to. . . Stern is not taking any steps to placate the Filipinos; 'WRMN' played a tape of a recent Stern comment that American model Cindy Crawford moves 'like a Filipino hooker' in her exercise video."

An article Johnson sent mentions WYNY 103.5 being sold for \$50 million by Westwood One to NY-based Broadcasting Partners, Inc. The money will be used to pay off debts. Westwood bought WYNY from NBC for \$39 million in September, 1988. The station would remain country. This leaves Westwood with only one station—KQLZ 100.3 Los Angeles. When asked if KQLZ is also for sale, a Westwood person declined to comment.

Filipino FM SCStation "WRMN" is trying out a new radio. "From the description it's probably the G-E Superadio" with an SCS modification. Malrite's WHTZ (Z-100) 100.3 NYC can now be heard in Japan, via telephone lines and USEN, the Japanese company that's paying most of the costs for the effort. It's being done in the interest of goodwill and good business. Also being heard in Japan is KPWR (105.9 Los Angeles).

"While in the library I tried to look up what jail Thomas Root (Jan., p. 6, top, and Feb. p. 6, col. 2) is in, but the most recent article about him (Jan. '92) said only that he'd just been sentenced to 33 months by a DC judge (that's in addition to the 15-year sentence from a NC judge). It also mentioned that Root (middle initial L) had recently moved with his family to Norwalk OH from Alexandria VA, and that he would surrender to federal authorities on June 30, 1992. The name of his lawyer (at the DC sentencing) was Eugene Propper." Jerry Kautz has written, saying he has been transferred from the MN prison camp to the Omaha NE area. He claims prisoners get transferred to "stir the pot" and prevent conspiracies among inmates. He is a few months away from getting released, wants to go into business for himself again in broadcasting, but sees no opportunities for an ex-con except "flipping burgers" for a while.

Martin Wishnewitz is from NYC and he's quite interested in all aspects of radio monitoring, including FM. "A question I have for you concerns WBAI \*99.5 here in New York city, which claims to have 50000 watts, with its antenna atop the Empire State Building. Could this be possible?" WBAI is fudging a bit on that power. They are only 4300 watts (415 m), with coverage EQUIVALENT to 50000 watts, but surely not 50 kw from atop the ESB. A legal-appearing ad he sent invited people to consider a bequest to WBAI-Pacific when making out a will. For more information contact Valerie van Isler, station manager, WBAI, 505 Eighth Ave., NY NY 10018; (212) 279-0707. I had the pleasure of meeting Martin in Omaha NE in September, as well as others, including Duncan Shaw (see "From the Classifieds" December). "I

hope to continue to be a regular subscriber to your newsletter and look forward to seeing the 15th edition of the 'FM Atlas' coming out soon," writes Martin. [I hope to put out a new edition by mid-1993; stay tuned for further details.]

Dave Beauvais says "If we ever get out of this economic mess alive, digital radio is going to be the next generation of superlative broadcast technology—every bit as far advanced over FM as FM was over AM. Do you plan to promote the new medium as enthusiastically as you did FM, which is evidently going the same route as the vinyl LP? It just strikes me that if you're locked into championing a 60-year-old broadcast technology, FMedia! risks becoming the equivalent of a hobby newsletter for eccentric nostalgia buffs and antique radio collectors!" [I still have a fixation on good old FM, and as you can see in many places throughout these newsletters I can't resist taking a jab at AM, but I do see the need to report on change. Report on change, I do; not necessarily advocate change for the sake of change. I think I'm ahead of the masses in advocating wider use of "medium fi" SCS, which most of the public and the press ignores, and technologies such as TV-SAP, data transmission by FM and TV vertical blanking intervals enrapture me, as do translators, low power FM and pirate broadcasting. But enough of what turns me on. . . ]

Another MA writer is Brian Anastasi who produces "Valley Voices" on (pardon the expression) AM radio, WTTT 1430 Amherst MA, Sundays 1-4 p.m. It's three hours of alternative programming such as you might expect from a college or community FM station, and discussing such issues as national health insurance, homelessness and affordable housing.

Now, this from reader William H. Lindsay, with credit to "The Far Side."

"Listen, you want to come over to my place? I get great FM."

Hanalei Publishing announces the 1993 edition of the *Traveler's Country Music Radio Atlas*, the first of the radio annuals to hit the presses so early in the year. A glove-compartment sized book with 80 pages, 49 of maps covering the 50 states and 10 Canadian provinces, can be yours for \$4.95 plus \$1.25 shipping for one copy; discounts for more. Order from Hanalei Publishing, PO Box 369, Port Hueneme CA 93044-0369. And, correct me if I'm wrong, Henry Studebaker, your town is pronounced "Port Y-Nee-Mee."

Rob Bates endured the emissions of a pirate on 89.1 in Bremerton WA earlier in 1992 using the call letters "KRAB," formerly used in Seattle on 107.7. He thought this was a new station, "but have not heard that station since then. What was funny about that station was that they were making fun of the lame music. During a song they would add a burp and other weird noises."

Dave Sinclair sent word about an application heard in Hull PQ for an English language FM station in Vancouver for 94.5. Western World Communications would surrender its licence for CKST AM 1040 if the FM were granted. The CRTC hearing took place Nov. 30; no word as to whether or not they have granted the new station. "It seems that AM radio is disappearing everywhere," Sinclair writes. "CKST 1040 has only been there since about last March; they previously had a lower power AM at Langley BC, about 80 km east of Vancouver. The station which had 1040 AM previously was on the air for only a little over a year with an oldies format and Larry King for nine hours."

A mystery lady on WQHT 97.1, "Hot 97" mornings is or was Stephanie Miller. Her father is more famous as Barry

**Stephanie Miller: Goldwater girl or sex-starved shock jock?**

Goldwater's running mate, the late William E. Miller. By the way, Stephanie is the only Democrat in the family," says the *Queens Tribune*.

Alex Nardacci sent several articles related to FM, including a "New York Times" piece (Feb. 7) on the top orchestras in classical music departing the airwaves.

Reasons range from high costs to stations wanting more control over their programming. A major factor is that sponsors are hard to find these days. Already the Philadelphia Orchestra and New York Philharmonic are off the air. The Boston Symphony Orchestra is on locally but not nationally. Barely hanging on are the Chicago Symphony Orchestra (where Amoco, long time benefactor, has asked for others to share in sponsorship, but Henry Fogel, executive director, has failed to find any) and the Cleveland Orchestra. When BP, an oil company, withdrew its sponsorship in December, the orchestra began distributing a 13-week series of Mozart concerts from its archive, hoping a new sponsor will be found by May. They are still looking, thinking they might find alternatives involving more than one sponsor. Even sponsoring a small orchestra can be expensive. Alamo Rent-A-Car pays \$250,000 a year for a series of concerts on a network featuring the seven-year-old Florida Philharmonic. The three-year 13-week hour-long series is heard on 43 stations across the U.S., and Alamo considers it a bargain.

Computers to replace FM? A new satellite service, "Internet Talk Radio," is set to start a 30-minute radio talk show on Internet, which links about 10 million high-tech executives and hobbyists. The show can be heard live on computers with speakers, as well as stored and later heard. As such systems develop they could compete with over-the-air broadcasting, causing Paul Saffo, a computer industry analyst in Menlo Park CA to say, "It's proof that the era of mass media is past." Computerized video may also come about, as network links are upgraded to fibre optics for VP Al Gore's "data superhighway."

Albany NY is a market where Howard Stern did not come out on top. WGNA-FM 107.7 is the ratings' leader, while WPYX's (106.5) Mason & Sheehan triumphed in the morning over WQBK-FM's (103.9A); Howard Stern Show. Cockily, Stern had said the "PYX pair would be "history" after his arrival.

WJJW \*91.1 North Adams MA is operated by students of North Adams State College, and officials of the school are concerned that no obscene language is aired. A workshop to brief the students on use of language was conducted by an unnamed broadcast professional (Howard Stern?). Harris Elder, chairman of the English department said: "We're obligated to let students know that if they do things like they have been doing in the work world, people will just fire them."

Sending a report on Gerry Turro's buying WJUX \*88.7 Franklin Lakes NJ for \$100,000 is Bill Nienajadly, who wonders about the efficacy of the combination of a 10-watt FM station and a translator: "What about WPSC \*88.7

Wayne NJ, only 9 miles away?" Turro has hired some old friends as DJs, moved the studio to Dumont NJ, which is closer to the translator than to the primary, and claims coverage from Manhattan to Paterson. Underwriting announcements, rather than commercials, will be aired. It should surprise no one that Turro and colleagues are hoping to persuade the FCC for a power increase.

From Burlington IA Chuck Gysi sent word that John Pritchard will take advantage of duopoly rules and put a second FM on the air. He owns KKMI 93.5, and the contested frequency of 103.1 has been given up by Chip Giannettino, owner of KCPS AM. Giannettino wanted an FM to complement his AM, but said the toll of time and the cost soon convinced him to scrap the FM plan. While no CP has been issued, it is expected that the FCC will soon accept Pritchard's application. KCPS 1150 has had a ragged history. Founded in 1965, KCPS had been off the air when Giannettino bought it in 1987 and put it back on the air in 1988, but he claims it's had its best year ever in 1992.

Now ready: "Duncan's Radio Yearbook." Says Jim Duncan: "I believe "Duncan's Radio Yearbook" will be the only yearbook you will ever need. At only \$59.00 I feel it is a fine value." Order from Duncan's Radio Yearbook, 14595 Avion Pkwy., Ste. 500, Chantilly VA 22021.

Stanley Swanson, looking over a Mexican FM list, "found several [stations] that I did not know about. . . I recently ordered a complete Mexico list from Dataworld; their latest printout was up to 1985, with no definite plans to update! The latest word I heard regarding the U.S.-Mexico radio treaty is that nobody is pushing it. . . You state XHTIM on 91.5 Tijuana BN. I have it on 103.3, with XETRA-FM on 91.1 (second adjacent channel). Perhaps you can clarify this." [See above, pp. 2-3, "BN Tijuana," for word on XHTIM's existence on 91.5.]

Eric L. Nelson says "I have been a subscriber to the FM Atlas since the Eighth edition and a subscriber to FMedia! since its introduction back in 1987. I have thoroughly enjoyed the wealth of information these two publications have been providing." He's moved from PA to Charlotte NC. "As you can see, I have moved out of the crowded Northeast and into the Southeast, located in FCC Zone 11. . . I still have not grown accustomed to the much larger coverages of the Class C stations in this region. My JVC TX-900 FM tuner (which has been modified for greater selectivity) has no problems pulling in some Class Cs over 80 miles distant with a simple indoor dipole! . . . Let me say, however, that I am an avid FM enthusiast, who really enjoys reading the Newsletter and Atlas. . ."

Until April, *Bruce J. Elving*

## The FM radio newsletter

 BN Tijuana XHTIM 91.7 (from 91.5), "finally." Now Im, "mariache bands and mournful Mexican ballads." "Estereo Fiesta" (from "My Kind of Station—Estereo Rey"), all Spanish. "Sounds like it is broadcasting from a cave [due] to excessive reverberation, echoes and ambience. DXers will easily distinguish this signal from the other stations on 91.7. Its move has significantly reduced the interference between XHTIM and XETRA-FM 91.1. This situation illustrates a shortcoming inherent in the existing FCC kilometerage separation tables—the same separations are often specified for 400-kHz-spaced assignments and 600-kHz-spaced assignments. The 600-kHz table columns do not accurately approximate the reception characteristics of 'modern-day' (post-ceramic-filter) FM receivers. Few, if any, receivers have IF selectivity curves where the response at 400 kHz is substantially the same as the response at 600 kHz. As a practical matter, all else being equal, assignments spaced apart by 600 kHz cause considerably less interference to typical consumer radios, as opposed to assignments spaced apart by only 400 kHz. This effect was observed in the XHTIM-XETRA-FM situation, where the spacing was changed from 400 kHz to 600 kHz, but all other relevant factors remained the same."

**On Air and DX Ready (Selected)**

AK Anchorage KRUA \*88.3 with the U. of AK administration receiving complaints about its music being offensive. It has come under departmental scrutiny because of programming "that includes sexually explicit and profanity-laced songs." Student Senator Mike Muller received 26 student complaints that lyrics on KRUA were offensive, and he began to question station manager Suzi Pearson. Pearson (pictured) defended the program-

ming, saying "KRUA was only following a long tradition of alternative college radio." She said, "If it weren't for the college stations playing new kinds of music in the past, you wouldn't have the classic rock of today. This is what college radio is about. There is profanity in some of the music, but I see an artistic value there. . ."

AR El Dorado KBLT 96.1, having moved from 95.9 with \$.  
 KLBQ 99.3, not yet having moved to 98.7.

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AL Northport 100.7C3 for A, WLXY; deleted 100.5A at Northport
- AL Repton 101.1A, May 11-June 10
- AZ Bagdad 103.9A, May 11-June 10
- AR Dardanelle 102.3C3 for A, KWKK
- CA Alturas 101.3C for 94.5C1, KYAX
- FL LaCrosse 99.5A—FCC stayed the Mar. 19-Apr. 19 filing window and the effective date for substituting 99.5C for C1 at Douglas GA, affecting WDMG-FM.
- IL Carlyle 96.7A, May 7-June 7; dismissed bid to add 96.7A to Dix or Mount Vernon or 96.5A to Flora.
- IN Ferdinand 98.5A, May 7-June 7
- IA Belle Plaine 95.5C3 for A, KNJS
- KS Olathe 92.3C3 for A, KCCV-FM
- KS Silver Lake 92.5A, May 3-June 1
- KS Topeka 99.3A for 92.5A, KESC
- KY Bowling Green 93.3A for 98.3A, WDNS
- KY Elizabethtown 98.3C3 for 98.5A, WQXE
- MS Macon deleted 100.5A
- MO California 94.3C2 for A, KZMO-FM
- MO Rolla 106.3A for 94.3A, QOMX
- MT Columbia Falls 95.9C2 for A, KCVX
- OK Lawton 94.1C2 for 94.3A, KQLI
- OR Seaside 98.1A for 94.7A, KBRD
- TX Brenham 94.1C3 for A, KULF
- TX Cameron 94.3A for 101.3A, KJKS
- TX Centerville 105.9A for 103.1A
- TX Ganado 104.5C3, Apr. 16-May 16
- TX Hearne 103.1A for 94.3A, KHRN
- TX Hempstead 105.3C3 for A, KEZB
- TX Jourdan 95.7A, May 3-June 1
- TX La Grange denied KBUK 104.9C bid from A
- TX Matagorda denied 104.7A bid
- TX Port Comfort 94.1C, Apr. 16-May 16; denied

bid to add 104.9A to Port Comfort.  
 TX Rollingwood denied 104.9A bid  
 TX Rosenberg denied KMIA 104.9C1 for A bid  
 TX Seadrift 105.1A, Apr. 16-May 16  
 TX Three Rivers 94.5C2, Apr. 20-May 20. FCC  
 denied KBSO Corpus Christi bid to change  
 from 94.7A to C2.  
 WA Camas 94.7C2 for C3, KMUZ-FM

**FCC Plays Into Hands of Pirates; Upholds Dismissal of Application to Share Time With WNYE New York**

The Commission has upheld the dismissal of an application by Westchester Council for Public Broadcasting (WCPB) to share time with noncommercial WNYE \*91.5 Brooklyn. WCPB filed its application on April 30, 1984 in timely fashion against WNYE's license renewal. On May 14, 1985, WCPB's application was dismissed by the FCC staff for failure to respond to an official FCC request for more information and for failure to prosecute the application.

The FCC said there was no evidence that any of the required information had been filed, and the Mass Media Bureau had acted properly in dismissing the application. Makes me wonder if WCPB's application was thrown out on a technicality, rather than the FCC's having to tackle the real issue—whether WNYE is a fit licensee for use of a channel that is not fully utilized in the crowded NYC market—or does the FCC have the interests of pirates in mind when it apparently endorses less than fulltime use of the 91.5 facility?

**NFCB Confab in Minneapolis Draws 315, Tackles Issues Facing Community Radio**

A cold early April greeted the 315 delegates from as far as Alaska to the National Federation of Community Broadcasters at the Minneapolis Holiday Inn Metrodome Hotel. Lynn Chadwick, president, reported that long-range funding for community stations was a priority at the board meeting held at the beginning of the confab. Community broadcasters ranged from native American outlets, some in incredibly small towns like Pine Hill NM (KTDB); others are affiliated with universities and not qualified for full membership. Large market stations like WFUV \*90.7 New York and several Pacifica stations were there. People I enjoyed meeting included Ralph Jennings of WFUV, Dan Cooley ("Dr. Science," of the IA Radio Project), Don Mussell, engineer/consultant, and user of some of my SCS devices from Staunton VA, and "Dr. Radio," Gray Frierson Haertig of Milwaukee OR.

Much of the time I was near the engineers' table in the commercial exhibit area. The engineers get to exhibit free, said the NFCB's David LePage, because they provide a service to the membership. Don Mussell walked me through programs

like "Search FM," devised by Doug Vernier of Cedar Falls IA. The computer screen came alive with colorful maps of regions of the country, showing open FM channels and opportunities to place full powered stations or translators. We found, for example, that Ely MN could have a full Class C (100000 h,v; 600 m) on 101.3—enough coverage to serve all the loons, wolves and moose of that Boundary Waters Canoe Area of northeastern MN!

I was, however, appalled by the atheism expressed by some of the delegates, and couldn't agree much with Michelle Richards from People for the American Way for opposing religious stations and their influence in banning or severely restricting abortion "rights" and gay bashing. A session I was unable to attend was to have outlined the great influence the religious right wields on the media, including, presumably, being the licensees of religious FM stations. Twenty years ago it was fashionable to smear "right wing extremists"; now it is the "religious right" that is blamed for many of society's problems. At a luncheon I was talking with someone from WEFT \*90.1 Champaign, and I mentioned a person I knew had been a volunteer there. "Yes, I remember him. He moved to northern Indiana and got mixed up with religion." Another person told me the Tepco-Robert Jones translators are good, but you "support religion" by patronizing Jones equipment, which is often used to spread the signals of religious stations. Despite those incidents, it was a fun convention to go to, and the food choices at the hotel included alternative fare for people on a vegetarian kick like I am.

**Small Print Happenings and FM Industry News**

The FCC continues in its fine ways notifying WGZM 101.9 Cleveland GA it owes \$17,500 for violation of rules which require a licensee to maintain a meaningful management and staff presence in the city of license, and to provide a toll-free phone number for residents of Cleveland.

It's a commercial station, but, hey, that didn't stop KXOK-FM 97.1 Florissant MO from airing announcements asking the public to contribute to replace its tower. Was the FCC amused? No way. It claims KXOK-FM owes \$2500 for "fraudulent solicitation." Amusing that both WGZM and KXOK-FM had other call letters at the times of violation. WGZM was known as WGGG-FM and KXOK-FM was KHKT. Hmmm. If you're fined, you immediately change call letters in an effort to remove the stigma.

WGTX 92.9 Eaton OH (which must think a lot of its call letters and isn't changing) fined \$5,000 for unauthorized phone taping. The FCC says that even saying "Hello" before the called party is informed that taping for broadcast is going on can result in a fine.

Designated for hearing—WNCN 104.3 New York city. Two challengers are after its frequency, including problems they see with RF interference from its proposed new antenna. Salt Lake City area stations KBER 101.1 and KQOL 106.5, which had a frequency swap a few years ago, are being examined by the FCC to see if owner Chris Devine was exercising control over both FMs at once—something that was illegal at the time. The hearing will decide if the licenses of KBER and KQOL should be renewed and/or if a fine should

be imposed.

The National Association of Broadcasters favors Sen. bill S.335 that would exempt radio from many spectrum auctions, legislation sponsored by Ted Stevens, AK Republican, and Dan Inouye, HI Democrat. The FCC is believed to be opposed to competitive bidding for stations or spectrum space—despite what the Cato Institute first advocated about 10 years ago, at the high point of the Reagan administration.

Working together to develop in-band DAB standards are the NAB and the Electronic Industries Association. They'll be sharing costs and working through the National Radio Systems Committee. NRSC hopes to test an in-band system by June 30, 1994, and "will recommend a single in band system if appropriate."

As part of its comments to ask station renewal applicants if they're actually on the air, the NAB has asked the FCC to shut down FMs that have been off for more than six months. "The comments are in keeping with similar protection-style NAB statements over the past 18 months. Watch for the Commission to take a tougher stand on silent and long-unbuilt licensees in the coming months," predicts the "M Street Journal," which counts 382 silent stations.

Al Sikes, darling de-regulator of the Bush era, won't be practicing communications law as most FCC Commissioners seem to do when put out to pasture, but he'll be hired by the Hearst Corporation to head its efforts to marry its journalistic resources with satellite, computer and other emerging technologies. "The job is a

**Al Sikes**

business job," Sikes said. "It is not to be the Washington representative for Hearst." His new title: Vice President for New Media and Technology. Sikes, now 53, was named FCC Chairman in August, 1989.

WAMC \*90.3 Albany raised \$250,000 in its March fund drive, with none less than NY Gov. Mario Cuomo helping out. The good governor read from his diary on air and this had the effect of coaxing donations from otherwise reluctant listeners. This good news for the WAMC stations comes despite a local recession that had worried Alan Chartok, manager, that things wouldn't work out so well. Other good news for Chartok was the FCC's approving the sale of WBBS 105.1 Great Barrington to the WAMC group; it's now WAMQ and noncommercial.

Publication of an updated Communications Act of 1934 as amended has been announced by the FCC. Officially entitled *Compilation of Selected Acts Within the Jurisdiction of the Committee on Energy and Commerce—Communication Law*, the 498-page publication includes major communications-related legislation enacted by the latest Congress. Buy it for \$16 from the Superintendent of Documents, Government Printing Office, Washington DC 20402; credit card orders to (202) 783-3238; ask for stock No. 052-070-06857-4.

A broadcaster turning down commercials—it always happens—not! KEZZ 94.3 Aitkin and its AM turned down a \$600 order from Pamida discount stores for ads promoting the chain's

new local store. The station learned that no regular ad schedule would be forthcoming, that this would probably be the store's only local radio buy, as Pamida is strongly oriented toward print. Whereupon owner Mike Patterson "very graciously returned the order to Pamida's advertising department with a letter expressing that the monies would be better spent taking the local employees out for dinner. At least you would get the employee's interest—rather than put that kind of burden on radio on a one-shot deal, while the local newspaper was getting thousands per month on a yearly commitment!" said the MN Broadcasters' newsletter. After that letter, a phone call and other correspondence, Mike is definitely known at Pamida headquarters. "I don't think I'll ever get another advertising order in my lifetime," he said. Their advertising manager said that was the first order ever turned down in his 16 years in that position.

New LMAs/duopolies include WERQ-FM 92.3 and AM sold to Cathy Hughes, owner of WWIN-FM 95.9 Glen Burnie-Baltimore and its AM; sale price \$9 million. An end to the WYAY 106.7-WYAI 104.1 LMA in Atlanta may be in sight. Capital Cities/ABC has agreed to pay \$19 million for WYAY, "Y-106," Gainesville GA, subject to FCC approval. The deal does not include WYAI, "Y-104," La Grange GA, which remains for sale.

In news news, ABC has announced a partnership with the BBC, covering both radio and TV. In time there may be joint bureaus, but for now it covers "the exchange of worldwide news coverage, joint planning for major news stories, and the exclusive sharing of correspondents and production teams."

Partly affecting FM, the lower part of the dial stations, are proposed FCC guidelines regarding RF radiation standards. The Commission proposes new restrictions in fields below 100 mhz, and could affect transmitter specifications as well as station monitoring systems. For more information, call Robert Cleveland at the FCC's office of engineering and technology, (202) 653-8169.

A growing number of stations is broadcasting Howard Stern on a tape delay basis and quietly excising his "indecentcy." L.A. Times writer Claudia Puig forced KLSX 97.1 to admit it had done such editing, and it was later revealed KFB1 107.5 Pahrump-Las Vegas NV also admitted delaying such broadcasts. Both are stations that, interestingly, anti-Stern crusader Al Westcott has monitored. Stern has been appealing to his listeners in other cities to help him find an outlet in Atlanta. "Maybe he's just worried about Doug Tracht... a former Stern rival in Washington DC, who [is now on] WZGC 92.9. Both talk show hosts are syndicated by Infinity Broadcasting, which also owns Z-83," reports an article sent by Nick Lomberdi.

Infinity's other noted radio personality, Doug "The Greaseman" Tracht, is said to be bombing in New York (WXRK) and Philadelphia (WYSP). Listeners are have greeted Greaseman with negative faxes and phone calls. "Those who complain have to give the guy a chance," says WXRK General Manager Tom Chiusano. "We believe in him as a performer." Dryly, the NY Post said, "What Infinity should believe is that its \$6 million man is turning out to be a bad investment." It seems that whenever WXRK runs a promo for Greaseman during the Stern show, Stern turns down the volume and says "there's something wrong with the equipment," then when the promo is over he says, "there, now it's OK." Newsday had an interesting story on Stern:

A reporter, Robert Friedman, entered a NY cab with his 9-year-old son and the driver was listening to Stern. "I asked the driver to turn down his radio, which he did grudgingly, though I still couldn't avoid hearing what Stern had to say... the conversation was exclusively about sex—sex with reptiles, sex with her husband, sexually explicit exercise videos." With his son, Willy, Friedman felt trapped in that cab. "When Stern asked [guest La Toya] Jackson to come sit

on his lap, I decided I'd had enough.

"There was only \$2.50 on the meter, which means I couldn't have been in the cab very long when I asked the driver to turn off the radio. What happened next surprised me: He stopped his cab, put his face to mine and ordered me out. That will no doubt please Howard Stern. Here was a loyal listener so intent on hearing Stern talk that he didn't care about losing business. He didn't even try to collect what was on the meter." Son Willy later wrote in school that Stern was "gross, disgusting and sick."

The driver, whose number Willy took down and against whom action is to be taken, did not follow NY taxi regulations. Rule 2-46C states: "All audio equipment controlled by the driver shall be turned on or off at the request of the passenger." Wrote Friedman, "I hope Howard Stern won't think me a prude for reporting his loyal listener to the Taxi and Limousine Commission."

FM station totals as of Feb. 28: On air and licensed (92-108 mhz) 4808, educational (88-91.9 mhz) 1597 for a total of 6405. AM has 4957 stations.

From the classifieds: College radio station ratings from Arbitron offered through the National Association of College Broadcasters "at unprecedented low prices. Professional ratings can help you dramatically increase underwriting revenue and let you determine what programming is pulling audience, with packages starting as low as \$250... There's no charge or obligation to see if your station is rated. Please call NACB's JoAnn Forgit at (401) 863-2225."

Classical music announcer, WGMS 103.5, seeking lively, upbeat individuals, parttime. Classical experience not necessary; will train. Aircheck, resume to WGMS, 11300 Rockville Pike, Ste. 905, Rockville MD 20852. EOE.

General manager KPFK \*90.7, B.A.+experience, such as managing a community or public radio station "or progressive organizations," \$40,000+benefits. Letter and resume to KPFK Management Search, David Salniker, Executive Director, Pacifica Radio, 1929 Martin Luther King, Jr. Way, Berkeley CA 94704. EOE. I wonder if a background working at a religious institution would qualify as a "progressive organization."

News director, monophonic WSCN-stereo WSCD. Hire, train, supervise personnel and production of news stories. B.A., three years radio or TV news experience. Salary "open, plus benefits." Letter, resume and audition tape to John Snee, general manager, MPR, Holiday Center, Ste. 224, Duluth MN 55802. EOE.

SCS Technology, the little company which modifies radios like the GE Super and which produces 67 and 92 kHz wired and tested circuit boards with muting for \$19.95, is run by Dave Jackway from Springfield MO. It has a new toll-free number, (800) 944-0630. He can special produce boards for frequencies like 78.67 and the Pro Channel as well.

Thanks in part to a review by Bob Grove in the current "Monitoring Times" magazine of my SCS-modified G-E Superadio II (the older model), almost the entire stock of 100 radios is sold, but I am offering a tunable Elf-II adapter in the newer Superadio III at \$89 plus \$4.50 shipping. Because of expected higher wholesale

SCA-Capable FM Radio From FM Atlas

prices, those figures will rise to about \$93 plus \$7

shortly. Some people prefer... Superadio II (factor... Superadio IIs are sold out white bc... ) to the III. Superadio IIs can be ordered unmodified while supplies last for \$50 plus \$4.50 shipping. I am limiting people to no more than two SR IIs each. I also thank Glenn Hauser for mentioning the availability of the SR II on his shortwave program, "World of Radio" heard on WWCR Nashville (now burned out and hoping to come on in a month or so) and WRNO New Orleans, and to the National Radio Club for its mention of this model available from "FM Atlas."

Listen to Hauser's *DX Daily* 9:30 p.m. EDT M-F on WHRI 7315 kHz shortwave from IN and a 2 a.m. rebroadcast on 7315 and 9495 kHz, while Friday's program is repeated 10 a.m. EDT Saturday on 9465 and 15105 kHz. Glenn's more famous "World of Radio" now heard on 15420 at 4:30 p.m. EDT Sundays and 10 p.m. EDT on 7355.

FM AS IT WAS—OR MIGHT HAVE BEEN

Stephen N. Raymer, curator of the Pavek Museum of Broadcasting, featured FMedia! reports on the Twin Cities FM history (Nov.-Jan. issues) in the November issue of the museum's newsletter. The article centered on "Motoring with FM—1952 Style," and it included the area dial history. It updates information presented in this newsletter about 100.3 and 107.9 in the Minneapolis-St. Paul area. Colfax Communications has bought KQQL 107.9 ("Kool 108"). "In moving to buy the Minneapolis-based KQQL, Colfax becomes the first in the Twin Cities to take advantage of the new FCC rules that allow an individual group to control two FM stations in most large, single market areas. This is likely to change the radio business dramatically." Colfax is controlled by former WCCO AM general manager Steve Goldstein and Steve and Mitchell Rales of Washington DC, which had already agreed to buy WCTS \*100.3 from Central Baptist Theological Seminary for \$10 million. WCTS is now on 1030 AM and the 100.3 spot is vacant, awaiting an FCC rule-making to move the site south-east and closer to St. Paul. It has been considerably north of the Twin Cities at Nowthen MN—a site shared with KQQL.

Another feature in that magazine is how radios were sold in the early days. A picture showed a well-dressed man walking down a stairway carrying a briefcase. "Selling radios was a competitive business. The door-to-door salesman offering premiums and credit plans was standard practice for aggressive retailers." Under the picture is the caption, "When canvassing an apartment house begin at the top floor and work down. The superintendent will not stop you if you appear to be on the way out."

June Persons is the new grantee of Brainerd MN 103.5, and in the July issue of the Pavek newsletter is featured Charlie Persons, who incidentally is a long-time "FM Atlas" subscriber. He took back KVBR AM 1340 after a buyer could not make payments and at age 83 looks forward to retiring, although he still flies his own airplane. I interviewed him a few years ago for an article on the history of pioneer WEBC-FM Duluth MN (Superior

WI); he was one of three founders of that station and the only one still living. The articles, co-authored with subscriber John Ebeling of Bloomington MN, were published as a three-part series in "Radio World" newspaper. I think June is Charlie's daughter.

Raymer talks about FM in the museum paper: "I searched through all the magazines in our library from 1938 through 1947 and found surprisingly few references to FM. Events of that era help to explain part of the puzzle; World War 2, television, and a reluctance on the part of many engineers to learn a mysterious new technology that appeared to have little practical value.

"One engineer who chose not to ignore the future was frequent correspondent and pioneer broadcaster A James Ebel, who in 1941 was chief engineer for WILL (AM) in Urbana, Illinois. At that time there was only one FM station in the entire state of Illinois, run by Zenith in Chicago. There were only 25 licensed stations in the entire country. 'I went to a national conference and heard Major (Edwin) Armstrong speak', Ebel said recently. 'I was enthused about the possibilities, so we started by building a high-gain receiving antenna in the attic of the old auditorium to receive the weak signals from the Zenith station in Chicago. We were able to demonstrate clear, static-free reception during thunderstorms. FM did everything it was supposed to do'. Circuit drawings and articles explaining how to transmit an FM signal had been published in trade magazines. With only this basic information to guide him, Ebel designed WILL's first FM transmitter. . .

"At first the station played to a very small audience. Its signal did not reach beyond Champaign-Urbana, and its audience numbered only 15 to 20 people—the total number of FM receivers in the area. 'The station used to have about six small FM receivers we would loan out upon request', recalls Jean West, transmitter engineer in the early days, 'but sometimes we would go to people's homes and convince them to take a receiver. We wanted people to try us'.

"In spite of pioneer efforts by Ebel, Armstrong and others, FM continued to be misunderstood by many of the major manufacturers. Excerpts of an article written in 1948 by Homer A. Ray of KIRO Seattle quote James D. Shouse, then vice president of Crosley Radio Corporation and reinforce existing bias against FM: 'It will never replace AM. Its high fidelity is largely a myth. There are on the air at this time hundreds of AM stations putting out programs that meet the FCC's distortion, frequency response and noise level requirements for FM stations'.

"Recent correspondence from Ebel explains some of the reasons for the

change from the old FM band to the new. 'I was very disturbed when the shift was made from 45 mc to 88 mc. I felt that surely it would kill what little development had been made. I have since learned that the shift was necessary and important. As a member of six USA delegations to World Administrative Radio Conferences, where I was representing broadcasting in the USA, I had many conversations with FCC engineers on spectrum matters. The shift was the result of considerable study during an allocation process seeking more space for TV and FM. Incidentally, none of the networks were in favor of FM from the beginning, because almost anyone interested in becoming a broadcaster could get an FM license that would give them as good market coverage in major markets as the 50-kw AM stations owned by the networks. The FM station I put on the air in Peoria, Illinois, in 1946, was initially prevented from carrying CBS programs. . . When the shift was made we were able to convince the University of Illinois to let us purchase a 250-watt Raytheon FM transmitter. As a consultant I owned several FM stations in the Midwest. I was part owner of an FM station on the highest hill between Grand Rapids and Kalamazoo, Michigan, in 1947. A group of Army service men got financing from their parents for the project. Unfortunately, the money ran out before we could make any profit, so we gave it up since no one was interested in buying the station. If we could have held on, it would probably be worth millions today'."

Raymer gave FMedia! a plug, and he quoted from a letter Al Germond wrote in the April, 1992 issue about the Yankee Network, and stations W43B Worcester-Boston and W39B atop Mount Washington NH, which received the W43B signal off-air and relayed it.

Speaking of Al Germond, in the files is part of a March, 1959 WQXR-FM New York program guide he sent showing the Grange League Federation logo. The GLF sponsored a weather roundup 6:25 to 6:30 a.m. on what had been the Rural Radio Network, and WQXR-FM. It was that group which offered a tube-type table FM radio to listeners of the Rural Radio Network.

Dusting off an April, 1970 *FM Guide*, we read this by publisher Harry Maynard: "The Youth Culture is here, and you can't ignore it. . . The better-educated youth that I have met have surprisingly broad tastes, and show it in liking both classical as well as their own contemporary music. . . Youth also seem to 'understand media' better. They often show a greater appreciation of FM as the superior medium of musical presentation than the 'older generation' who were brought up on AM radio.

"When four-channel FM stereo hits the marketplace, in full force, as it eventually will, and I am not alone in this opinion, FM will make its technological superiority over AM even more self-evident. I believe four-channel stereo is an even greater achievement over two-channel than the latter was over monophonic sound. Eventually, it will dominate the musical recording scene the way two-channel stereo does today.

"We, at FM Guide, plan to widen both our coverage of the contemporary music scene as well as our coverage of the medium which makes it all possible, FM radio." From the ads in that magazine—WCTO 94.3 Smithtown features "52 min-

utes of beautiful music with only four brief interruptions" in an hour.

WRFM stereo 105, "all music...all the time," played "familiar favorites by Mancini, Mantovani, Andy Williams, Tijuana Brass, Boston Pops. All in magnificent stereo 24 hours a day. Special no-commercial 'Music Bonus Hours' daily, yet never more than seven commercials in any hour. And minimum talk, just occasional brief news, weather, time-checks. . ."

WTFM advertised a handy checklist to help you remember where you enjoyed its beautiful sound today: At home, the car, beauty parlor, doctor's office, bakery, barber shop, dentist's office, restaurant, supermarket, cocktail lounge, drug store, optometrist's, shoe store, dress shop, men's shop, "plus any we may have missed. It's all right being modest but not when everybody is playing our song."

It wasn't "Z-100," WHTZ, but WVNJ-FM 100.3 where you could hear operas on Sundays.

In the June, 1970, *FM Guide* publisher Harry Maynard said that FM is what is happening now. "Wait until next year" used to be the motto of the late lamented Brooklyn Dodgers. Wait until the next five years used to be the motto of the FM broadcasters. Now the motto is 'Today is Our Future'. FM audience ratings and penetration figures have gone up spectacularly all over the country.

"If this were happening just in New York it would be understandable but such cities for example as Philadelphia (84.1) and Phoenix, Arizona (88.2) have even

THE WORLD'S GREATEST  
**OPERAS**  
IN COMPLETE PERFORMANCE  
EVERY SUNDAY  
**9:05**  
P.M.  
IN FULL STEREO  
**WVNJ**  
62 AM 100 FM  
THE GROUND OF SOUND OF TODAY

higher penetration figures than New York. Some major AM stations have had according to Pulse dramatic audience losses in the first quarter. Some FM stations have had considerable audience increases. . . Maybe the public has learned to appreciate FM's better sound and the extra added spatial information of stereo FM. Who wants to listen to music monophonically at 5000 CPS? I don't."

WLIB FM stereo 107.5 advertised as "New York's only all jazz station in stereo from noon to midnight." WABC-FM "stereo 95%" advertised personality Dave Herman. WQXR-FM and AM carried "The Sounds of Israel" 7:30-8 p.m. Tuesdays, sponsored by the First Israel Bank & Trust Company of New York. WBAI \*99.5, in its ad, mentioned the need for free speech. "I hope that at our best we will be presenting the provocative with such serious artistic intent and that we will achieve such high standards that we will broaden the definition of what is acceptable on the air," Edwin Goodman, new general manager, is quoted.

One of the stations which has changed the least since 1970 is WPAT-FM 93.1 which advertised, "A feeling. A time. A place. A mood reflected in an enchanting blend of Baez, Brahms and Brubeck, Streisand and Stravinsky." "The quality touch" is WLIR-FM 92.7 stereo, and where do you turn "between the blahs and the blares," naturally it's to WPIX-FM 101.9, "slightly feverish!" both in full-page ads. More from other FM Guides in future months.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

KWPN-FM 107.9 West Point NE mentions it has corrected a problem with its Harris MX-15 exciter which caused it to be heard on 107.5 and 108.3. The failure of two 20 microfarad, 50-v capacitors in the RF amplifier was peculiar to that type of exciter. This failure, according to Harris, occurs two to four years after installation and should be routinely checked. "I trust you will use the same diligence in notifying the FCC of our corrective action as you did in alerting them to our problem," writes David M. Kelly, president and general manager.

Don Mussell, mentioned above as one of the engineers at the NFCB conference and a user of Vernier software for FM station searches, can be reached at Route 5, Box 307, Staunton VA 4401; (703) 886-5162, or FAX (703) 885-5122.

K. W. Walter comments about the situation in Windsor ON, where: 1) it's "unusual to have all four stations in the same city (2 FM, 2 AM) under same owner; 2) All four stations to have one facility (economies of scale); 3) Windsor (south of Detroit) has population of around 200,000; 4) remember when 25 years ago CKLW (AM 800) was the leading station in Detroit-Windsor area

before FM came of age? . . . Noted that since CFMX-1 96.3 Toronto has changed transmitter site, listener surveys show it has increased from 240,000 weekly to 320,000."

A reader of my former WTFDA column, W. R. McIntosh, sent word about KLAX 97.9 hitting No. 1 in the L.A. ratings as a Latino station. "This is of interest to me. Don't like rock and roll. Do like Latino music, particularly ranchera. Also like country and western and classical. Am going to miss your column."

Bill Thompson, writing in the WTFDA's "VHF-UHF Digest," says: "After an incredible 20-year stint as V.U.D. FM News editor, Dr. Bruce Elving has stepped down. We owe many thanks to Bruce for his dedication to the FM broadcasting side of the VHF DXing hobby. A couple of members believe that Bruce's run as editor may well be the longest anyone has ever done such a column in the history of DXing! Despite the DX world's rumor mills, Dr. Elving is not 'retiring' from DXing. To the contrary, he's continuing to publish . . . FMEDIA! newsletter. . . We can hardly wait to see the next 'FM Atlas'."

Dominating the Dallas-Fort Worth ratings is KSCS 96.3 with a 9.8 Arbitron share, according to word sent by Jim Cumbie. This positioning of the country station was especially heartening to it because of new competition in that format.

KNDE-FM 94.9 Aztec NM did exist, and John Ebeling of Bloomington MN wrote to say that it was logged by him via E-skip July 3, 1962 (Nov., p. 4, cols. 1-2).

Bob Baker sent an article making it official (see also "From the Classifieds," last month, p. 6, col. 3) that the Iowa Western Community College board voted not to sell KIWR. Three bids were received but were rejected, "because none met the specifications. The bids ranged from \$100,000 to \$525,000." One option the board is considering is using KIWR for instruction at the college; it is mostly classical music.

Foxy 103, WFXA Augusta GA, buys WAKB FM 96.7 (moving to 96.9) Wrens, subject to FCC approval, so says an article W. R. Garrett sent. Part of the agreement is for WAKB owners not to compete with WFXA for five years; the purchase price is about \$1.25 million. He also sent an article that was in the Atlanta Constitution and NY Times about the fragmentation of the market for rock radio, "fueling the demise of Top 40 stations. . . . Almost overnight, Top 40 has become a dinosaur, a victim of upheavals in radio and pop music that have deeply shaken the symbiotic relationship between the music industry and the medium that it has traditionally counted on to sell its wares." Radio & Records found that the audience for Top 40 stations declined by 40 percent in the top 30 markets in just three years. There is

only one Top 40 station in Atlanta—WSTR 94.1.

Gerry Turro's WJUX \*88.7 Franklin Lakes and its translator with more coverage on 103.1 has been carrying announcements by local politicians welcoming the 24 hour station to Bergen County, "the birthplace of FM radio," according to Jeannette Johnson. "WJUX does play a few stereo records; I guess that's why they left the generator on.

"I was surprised to see in the March FMEDIA! that WBZO 103.1 Bay Shore has enough of a signal to impair NYC reception of W276AQ; WBZO is so weak here and W276AQ so strong that I would think W276AQ would be more likely to interfere with Nassau County L.I. reception of WBZO, if indeed WBZO's signal is intended to reach Nassau County (the westernmost ¼ of L.I.) and not just Suffolk County (the other ¾).

"WHIL 87.9 Richmond Hill H.S. is running commercials again, including a new one for an insurance company and one of the teachers hosts an oldies show Thursday evenings 6-9 p.m. . . . Latest Stern flap is over a parody he did about the two Cleveland Indian baseball players who got killed in a boat crash. Doug Podell, the p.d. of the Cleveland station that carries Stern (no calls given), bleeped out the whole 90-second parody, saying that he supports Stern but felt that 'this particular parody at this particular time' was in poor taste. All this resulted in a lot of Stern hate mail at the station and at the Cleveland Plain Dealer where the story had been reported. Stern said nobody in Cleveland should be complaining since they didn't even hear the parody, which, according to him, was intended to convey the message that driving a boat under the influence of alcohol is stupid."

A NY Post article Johnson sent has the watchdog group, FAIR (Fairness and Accuracy in Reporting) attacking NPR for "lack of diversity." At the time of the survey, 1991, 85 percent of commentators were white males and much of the reporting was from inside the Washington (DC) beltway. Now that it's 1993, the survey is a bit out of date. NPR, admitting it should be doing better, says nine out of 30 commentators are now women, and there are three African-Americans, one Hispanic Eskimo and an Asian American as staff commentators. Reminds me that the NFCB, at one of the conference sessions, chastised the Corporation for Public Broadcasting for setting up a toll-free number for people to complain about lack of objectivity in its shows. The NFCB saw this as a give-away to the right wing. Stations were ambivalent as to whether or not they should promote the number. On one hand, it would acknowledge the validity of a system that might undermine the authority of independent program producers, but on the other hand, each call costs the CPB money.

Until the merry month of May *B.B. King*

- BC Vancouver—CRTC denies CKST a change from 1040 AM to 94.5 FM. It argued that its "modern rock format needed FM to succeed. WW claimed that of 360 U.S. stations programming modern rock, 97% are on FM and the 3% on AM aren't getting any audience." However, the CRTC "noted that WW's projection for FM was the same as for 1040—a 3% audience share by 1994—and that there was no evidence of technical problems, the usual basis for switching to FM." No applicant granted 94.5 yet, with the CRTC also rejecting CJJR's contention that a 94.5 station would interfere with CJJR's 93.7 signal. "Clint Forster was deciding the future of Vancouver's Coast Radio after the CRTC turned down his application for a switch to FM. At least one group was interested in buying the station. If

sold, it just may end up a news station," speculated Jerry Fairbridge, in *Broadcast Technology* magazine. See also March, p. 8, col. 1. Dave Sinclair has since sent the complete CRTC text. "I intervened in this application, opposing CKST's request for an FM frequency. I am pleased with the CRTC's decision. Prior to March, 1992, CKST occupied another AM frequency in greater Vancouver (800) but with much lower power than on 1040 AM. The previous station on 1040 AM was not there long, and played mostly music from the '40s and '50s and overnight talk programs—Larry King, etc. I was sad to see that station go off the air in February, 1992." Originally CKST had said, because of its unique musical format, "it did not perceive any significant disadvantages associated with AM, as opposed to FM, transmission." The CRTC at that time said, "Based upon the available evidence... and given the potential for closure of two AM stations in the same market, the Commission concluded that approval of Western's application to move to the 1040 frequency would offer an enhanced opportunity for CKST to improve its financial situation and to continue to provide service." Some 70 interventions were filed, "the majority of which expressed support of Western's request to move to the FM band. Three interveners... all Vancouver radio licensees, opposed the application... In the Commission's view, persuasive evidence has not been presented to demonstrate that CKST could not be successful on its present AM frequency." ON Cornwall 92.1 19200 h,v, Radio Communautaire, originating 98 hours a week with the remaining 70 rebroadcasting CIEL 98.5 Longueuil PQ. See also "Deletions," below. This French station was opposed by CFLG 104.5 and its AM, but the CRTC "judged that Cornwall could support the new FM station without jeopardizing the viability of the English stations. Also rejected was the CBC's request that the new FM use 106.5, now allocated to Brockville, so that 92.1 could remain in the CBC Long Range Radio Plan. ON Leamington CHYR 96.7 19300 h,v; moving from 710 daytime and 730 at night. "CHYR has been unable to find a suitable single AM frequency for Leamington, located just 50 km from Detroit. Costs to implement FM service are placed at \$590,000." ON Midland CKMP 104.1 130 h,v; k format, with AM 1230 to be dismantled after a three-month simulcasting period. See also Formats, below, Orillia, with CFOR moving from AM to FM.

MN Brainerd 103.5 KABO  
 MN Minneapolis 100.3 WBOB-FM (AM is in Galax VA). FCC approves tower move to 281 m (97000 h,v) at Shoreview MN. "We are still WBOB, and have been since former owner Robert Morris founded the station in 1947. They paid for the call letters. . . I won't tell you how much they paid." I asked "was it under \$10,000?" and no answer came. New user of the call letters in MN, WBOB-FM; "didn't tell me what the format would be." Station appeared about midnight early Sunday morning, May 2, with a synthesized countdown, sometimes over a CD that kept repeating. Lately the countdown has ended, but it plays stupid audio, like comedy records, sound tracks from TV shows like Andy Griffith, with what seems like "indecent" bits added to the tracks, including references to urination. Its one redeeming feature to date is that it's in stereo. Announces: "A station with a construction permit, 100.3 FM." It gives its call letters once per hour as "WBOB Minneapolis," not as WBOB-FM; asking listeners for format ideas.  
 MN Spring Valley 104.3 KNFX (KVNG), k, "Fox Country," parallel to KMCX 102.5 Lake City, and in a duopoly with KRCH 101.7-KWEB AM Rochester

 PA Clarendon 106.9 WOVU  
 PA Media-Philadelphia 100.3 WPLY (changing to, from WKSZ), "Y-100" (strict). Newark's "Z-100" had complained (April, p. 3, col. 2):"

recently heard WKSZ's 'Z-100' format. WHTZ had a right to complain—I mistook it for WHTZ; it features a similar rock format with very similar voices and promos. Ernie Anderson, the famous voice-over announcer, does promos for both stations. WKSZ had the nerve to blatantly copy a co-channel neighbor like this!" Former WHTZ announcer and now air personality at WPLJ 95.5 Scott Shannon has been advising WKSZ, but "only the music," denying urging them to embrace the "Z-100" nonID.

SCOTT SHANNON

Still r. "Despite WMMR 93.3 being a likely beneficiary for those who prefer music and used to listening to WYSP 94.1, and despite the continuing benefit of the new WIBF-FM [WDRE] 103.9 from the WEGX (106.1) demise, I believe that there will be more changes beyond the WKSZ/WPLY switch, which isn't really a format change at all. I wouldn't be at all surprised to see either WMGK or WYXR or even WPLY try to move in at least partially on the classic rock audience, as I still can't comprehend four in the city (with WJBR 99.5 Wilmington DE and WLEV 96.1 Easton both quite listenable here) with essentially the same format."

 by FM**

AZ Nogales KFRB 1340 silent  
 AR Horseshoe Bend KHAM 1000 kHz: FCC  
 deletes call letters; had been in receivership.  
 CA San Luis Obispo KIXT 1400 goes all ads, with  
 listeners calling a 900 number to place their  
 classifieds. Station wants to syndicate its "Radio  
 Home Shopping" concept. Meanwhile, WHLP  
 1360 Baltimore dumps its help-wanted classified  
 ad format in favor of adult standards.  
 CO Limon KLIM 1120 daytime, 250 watts. "We  
 could go higher, but management never put  
 through the application. We are working with  
 KBDI \*12 to be on their SAP and are looking for  
 a good quality SAP radio to take and demon-  
 strate. It is to help KBDI, which is hurting, and to  
 help our signal be heard better in Denver. It  
 should be on in about six weeks."  
 GA Soperton WJHH 1000, silent since 1989  
 "because the licensee has been financially unable  
 to expeditiously resume broadcast operations."  
 FCC issues an order to show cause why its license  
 should not be revoked.  
 IN Fort Wayne WLYV 1450 silent  
 KY Danville WKLO 1000, silent since 1989  
 "because the licensee has been financially unable  
 to return the station to the air." FCC orders a  
 Show Cause why its license should not be  
 revoked.  
 MD Baltimore WITH 1230 was scheduled to go  
 to children's radio, but its sale to new owners  
 hasn't closed, forcing it to go to music (adult  
 standards) and hire d-j's.  
 MI Muskegon Heights WQWQ 1520: "Since  
 morningman Cliff Martin's retirement in January,  
 WQWQ has been all satellite-fed (SMN 'Stardust').  
 Only local programming now is Saturday after-  
 noons (a polka show). WQWQ also is in an LMA  
 with WLCS 98.3 North Muskegon, which remains  
 'o'."

NE Lincoln KHAT 1530 silent, while KMEM  
 (formerly KFMQ) 1480 returns with standards,  
 and owned by KLDZ 95.1.  
 NY North Syracuse WNSS 1200 now simulcasts  
 WEZG 100.9 mostly, but still carries some call-in  
 shows, "but beyond that their FM prevails over  
 their AM airways."  
 VA Danville WDVA 1250 silent. Had been for  
 sale, but they'd received no serious offers. "Even  
 with its small staff of three, the owner felt he did  
 not wish to continue subsidizing the operation  
 without viable buyers on the horizon. Therefore,  
 he closed the station after 48 years of broad-  
 casting."  
 VA Highland Springs (Richmond) WCLM 1450  
 silent; had been jazz.  
 WI Hudson WRPX 740 now with separate music  
 from WDGY 630 St. Paul. Now on days only,  
 "with poor taped commercials. At sign off they  
 just quit, sometimes in the middle of a record.  
 Heard them give a sign off once and noted night  
 authorized power of 7.7 watts (to protect \*CBL  
 Toronto). The way the station is being run, I  
 wonder how long it will continue. I would  
 imagine still a tie-in with WDGY, as same 'dollar  
 power' commercials are being aired. No longer  
 combined IDs."

**FM Rulemakings Proposed**

First date is deadline for filing comments at the  
 FCC; second date is for replies. Stations affected,  
 if any, are listed

**NH Politician Puts Heat on Christian  
 Stations in NH, ME**

There they sit—two small monophonic  
 FM stations close to Rochester NH,  
 where owner Ronald R. Malone lives.  
 WSEW \*88.5 Sanford ME and WWPC

\*91.7 New Durham NH are the successors  
 to Malone's SCService that used to be on  
 the 67 kHz channel of WHOM Mount  
 Washington NH.

Lacking the booming coverage of  
 WHOM, the two stations together reach  
 only part of the area where Malone used  
 to broadcast to citizens owning specially-  
 equipped G-E Superadios. Trouble is,  
 there is another Christian broadcaster,  
 Brian Dodge, who is apparently behind a  
 move to get Malone's two FM station  
 permits revoked. Rep. Julie Brown, a  
 Republican from Rochester NH, wants  
 the FCC to conduct a full investigation of  
 the stations' operations. The flap, Malone  
 states, is being stirred by Dodge, general  
 manager of local WWNH 1340 AM, and  
 applicant for other FM stations around  
 the country. Malone would not comment  
 to the Boston Globe, but he had plenty  
 to say when I called him.

"Brian Dodge's FM applications are of  
 a questionable nature and are being investi-  
 gated by the FCC; they are all on hold,"  
 Malone said. "He [Dodge] is indeed the  
 source of the petition to the FCC; he is  
 bankrupt and in Chapter 13 in New  
 Hampshire," Malone went on.

Dodge claimed, in the Globe article, he  
 is not involved in the Brown petition.  
 WSEW went on the air March, 1992, and  
 WWPC in December, 1992. The stations  
 do local origination in the morning, but  
 otherwise are satellite-fed, and are, like  
 their SCS predecessor on WHOM, strictly  
 mono. Indeed, I may have been the first  
 person to ask Malone why they weren't  
 stereo. He said it's for better range. Each  
 station has about 100 watts, vertical only.

Also concerned is Donald Crown, one  
 of the owners of WCDQ 92.1 Sanford  
 ME, who claims there is interference to  
 his station's signal from WWPC, and he  
 wants the FCC to investigate the technical  
 parameters of Malone's 91.7 station, in-  
 cluding whether it was built to the  
 correct height or not. Brown said the  
 original FCC construction permit called for  
 WWPC to be 30 meters tall, but it was  
 only built at 14 meters. Malone told me  
 that the operation was downsized to 130  
 watts vertical from the original 300 h,v,  
 but its height above average terrain appar-  
 ently remained at 151 meters. Brown's  
 petition to the FCC also calls into question  
 WWPC's ownership: Morning Star Acad-  
 emy. Malone confirmed that Morning  
 Star Academy is not a school, and that he  
 and his wife run the stations from their  
 home in Rochester. Zoning is also not a  
 problem, he contends, because the oper-  
 ation is a continuation of when he was an  
 SCS broadcaster, with the same studio  
 facilities in use. He claims that no neigh-  
 bors have complained about the radio  
 station in his home.

Brown insists she did not file the  
 petition at Dodge's request, or that she  
 objected to the religious programming.  
 "It is not a religious issue. I've been a

member of the same church for 25 years. Everyone has a right to their religious beliefs. If the local zoning board says OK and the FCC checks it out, fine. It's the most I can do," she said.

R. H. Perrin writes, "My recent letter to you said there are too many FM stations too close together. This proves it."

**FM Station in Poland Takes on Catholic Church/Establishment**

A reporter from RMF-FM (frequency not available) went underground and contacted women about Poland's new, restrictive abortion law. She claimed to a poor pregnant peasant girl who needed help getting an abortion. Of the 20 or so groups contacted, only one offered her shelter so she could give birth. "The rest just yelled at her, warning that getting an abortion simply because she didn't want the child would be a sin and illegal under the new law," according to an article by John Pomfret in the *Washington Post*. I didn't call Poland to check further, but the report, after airing on the Krakow station touched off a "furor" in southern Poland. Church officials accused the station of being "anti-church," which is the "equivalent in Poland to 'anti-state' during Communist times." RMF-FM is large according to Poland standards; it is commercial and has \$7 million in state-of-the-art equipment, and has an estimated 67 percent of the market share in the area of Poland it covers with 28 transmitters, with an average power of 10 kw, serving a potential audience of 6 million. RMF-FM would like to go nationwide. "We have succeeded by our own sweat," Stanislaw Tyczynski, president, said. "No foreign investment. No bank loans. Nothing. We're ready to go nationwide. The only thing that could stop us is politics."

**Small Print Happenings and FM Industry News**

Canadians have formed a committee to work on SCMO/RBDS matters. The RABC Broadcasting Committee is headed by Tom Young, and its purpose is to develop a Canadian standard for Radio Broadcast Data Services (57 kHz SCMO).

Undoubtedly, the group will decide which features of the European system would best fit Canadian needs, including the ability of a user's radio to follow programming of CBC stations as one travels across Canada. Young's company is behind CFMO 101.1 Smiths Falls ON, having recently changed from CHEQ.

And the CBC has joined with representatives of the private Canadian Association of Broadcasters to form Digital Radio Research, Inc. (DRRI). "Digital radio will be a regular part of our broadcasting lives within the next couple of years," predicted Michal McEwen, CBC senior vice-president of radio. McEwen heads DRRI, which has a budget of \$2.3 million. Canada, by forming this committee, "is taking the lead in the transition from conventional AM and FM stations to digital radio broadcasting," McEwen stated. The prototype stations will initially broadcast "a strange hybrid of existing CBC and private programs."

More music and less talk, and possibly more commercials is what Canadian FM listeners have to look forward to, thanks to the easing of

certain CRTC regulations. Policies dictating the amount of news and talk programs are being eliminated. Statistics Canada showed the nation's 500 private stations losing an estimated \$41 million in 1991 and \$26 million in 1990. The new rules should ease the burden on FM stations, which had to devote 15 percent of their programming to the spoken word and at least three hours of news a week. Commercial FM stations in markets with more than one commercial station must now devote one third of the broadcast week to local programming. AM stations don't have to abide by such a rule because of the financial difficulties many of them face. Campus FM stations will also be allowed 504 minutes of advertising a week, with a maximum of four in any hour. Of that total, 126 minutes may be regular ads, with the remainder underwriting spots, similar to what we hear on U.S. public radio. The Canadian Association of Broadcasters had opposed that change, fearing campus stations would eat into the dwindling revenues of commercial stations.

The parttime stereo status of KFCF \*88.1 Fresno is a thing of the past. Christmas Eve, 1992, it hooked up to parent KPFA \*94.1 Berkeley via satellite. Reception was so bad in the mountains from which its microwave feed was obtained that it could broadcast stereo only when doing local programming. KFCF decided to go to a full stereo digital satellite system with a \$30,000 investment and \$1,000 a month for the channel rental. It had used the microwave system in the mountains since 1975, "but as new stations were licensed in the FM band, the signal gradually weakened." Let's speculate as to what those new stations were: How about KTAA 94.3 Kerman CA? Even KUFY 94.5 Gilroy might have plagued a receiver that was not too selective, and maybe KLFA 93.9 King City-Salinas. Local KSKS 93.7 Fresno would also be a problem in the mountains where signals would be strong.

Many FM stations are owned by colleges, but none that I know of have gone as far as WAWL \*91.5 Red Bank TN, in recruiting students to its parent institution. Listeners who win prizes at the station now end up on the recruitment roster of Chattanooga State Technical College, if they are of the right age. DJs are told to ask the winners for their name, address, age and plans about attending college—information which is sent to the marketing department of the school which places the names in its database for continuing education mailings. "Not only is this information useful to the college, it also gives the radio station a better overview of its listening audience's demographics," quipped *College Broadcaster* magazine.

It's or. FM all right, but strictly in the world of "unsolved mysteries." A terse announcement from the FCC gave the call letters K02XEC to Signwaves, Inc., "new experimental [station] to operate on frequencies 88-108 MHz to test new product configurations for low power transmitters" in the continental United States. No word as to where Signwaves, Inc. is or what other activities that company is in. I wonder if it's testing for talking billboards or real estate radio? Or perhaps low power FM. The FCC has proposed to amend its rules for low power TV to relax standards for accepting applications, narrowing the definition of a major change, and expanding where terrain shielding can be used to show the absence of interference. With such liberalizing of LPTV rules, might low power FM be allowed, especially now that Quello is slated to become just a commissioner, instead of interim FCC chief?

A black woman as head of the FCC? That's the rumor leaking out of Washington, with Antoinette D. Cook, an aide to Sen. Daniel Inouye, being suggested. She would be the first black and the first woman to hold the post of chair. She helped the Senate draft the tough new cable legislation which George Bush vetoed, but which was passed anyway. Cook, 36, is a Democrat who is said to be in favor of reinstating the Fairness Doctrine and an activist in favor of children's programming. She would take over

from James H. Quello, Democrat.

April 30 FCC Commissioner Sherrie Marshall left. She announced she is starting her own firm, The Marshall Company, to provide strategic planning, policy and acquisition advice to communications companies. It will be headquartered in Los Angeles at the Ziffren, Brittenham & Branca law firm, and will have an additional office in Washington DC. Marshall had been with the FCC since 1989, and was interested in the FCC allocating new technologies such as high definition television (HDTV) and personal communications systems (PCS); she holds a J.D. degree from the University of North Carolina-Chapel Hill.

As HDTV approaches the marketplace there is a need for electrical engineers to help design the integrated circuits to make such broadcasting possible, but the employment of engineers is seen as "modest" at best, according to "EDN News." Companies that must wait for the FCC to act are readying teams that can go into high gear once a standard is set.

Boston's mega-merger falls through, with Pyramid Broadcasting (WXKS-FM 107.9 and AM) and Atlantic Radio (WHDH-WRKO AM-WBXM 98.5 FM) saying that they have abandoned plans to become a single entity, The Boston Radio Group. Inability to resolve certain key business terms was given as the reason. But the deal involving WSSH-FM 99.5 Lowell-Boston and WBOS 92.9 Brookline-Boston is going forward.

WMXB 103.7 Richmond has asked the FCC to deny the sale of WRXL 102.1-WRNL AM to the owners of WRVQ 94.5-WRVA AM. WMXB contends that even though the four stations add up to 24.7 percent of the local audience, they at times come over 25 percent.

KMOJ \*89.9 Minneapolis is involved in a legal battle as to who can take administrative control. At question is an April 8 board of directors election; the skirmish was reported in the St. Paul alternative paper "Insight."

It's well known that TV channel 6 can be heard on FM at 87.75 mhz, and capitalizing on that is KHQ-TV 6 Spokane. It bills the signal as "KHQ-FM 87.7," and the promotion mentions the availability of its newscasts on FM radio. KBJR-6 Superior WI-Duluth MN has done that a few times in its advertising.

Coming events from the Pavak Museum of Broadcasting. May 21-22 a big radios' garage sale, with collectors of antique radios (some early FM-AM radios can be had) descending on the Hotel Seville in Bloomington and selling radios

from the tailgates of their cars and vans. Call Don Hauff, (612) 374-9739 for details or send a long SASE to Radio Daze '93, NARC, PO Box 18362, Minneapolis MN 55418. A couple of years I was there buying, trading and selling radios. This logo must be from an old radio.

Fined \$18,750 is Emmis Broadcasting, WBCS 96.9 Boston (formerly WCDJ), for EEO violations. The local chapter of the NAACP claimed the station had no meaningful EEO program, which the station denied. The NAACP then withdrew its claim against WBCS and settled privately. This led the FCC to do its own investigating, and it found the station did not engage in affirmative recruitment efforts for most of its vacancies and failed to maintain adequate records. Because of this, the FCC imposed more stringent reporting requirements on the licensee and the fine.

WBZZ 93.7 Pittsburgh said to be heading for an FCC license renewal hearing. It stems from Liz Randolph's late 1980s sex discrimination/wrongful discharge suit. WKYS 93.9 Washington DC is also being sued—by former night d-j Kevin James, for \$1.2 million. He cites breach of contract and invasion of privacy. He claims WKYS didn't give him the amount of program-

ming freedom they had promised and that station people broke into his locker and dubbed off his personal carts.

The NAB, not unexpectedly, is opposing a bill in the Senate and House, the "Sensible Advertising and Family Education Act" (S.647) which would force alcohol ads to carry a rotating series of disclaimers. NAB feels this will mean a loss of ad revenue for over-the-air stations and networks, and drive some programming, like sports, to cable.

ABC has announced that a national morning show for the Satellite Music Network at the beginning of 1994 will feature Tom Joyner, who has been at WGCI-FM 107.5 Chicago and KKDA-FM 104.5 Dallas.

WECC \*100.7 Springfield OH took in \$375,000 in pledges, reaching its goal in three days. Previously, it had taken "several months" to reach its goal. That Christian station has only recently been classified by the FCC as noncommercial.

The former WBBY 103.9 Westerville OH facility is being sought by seven applicants; the FCC has designated them for hearing. No interim operator has been named, and the channel remains in the realm of DXing to Columbus folk.

Glenn Hauser says his "World of Radio" is on WHRI shortwave 7315 kHz 7:30 p.m. Friday and 10 p.m. CDT Sundays, and "quite shorty" WWJCR in TN will be restored; it had a fire. His "DX Daily" show is 8:30 p.m. CDT M-F on 7315 and 1 a.m. CDT on 7315 and 9495 kHz.

This from the "Daily Digest" for April 1, 1993: FCC appoints Howard Stern as decency board czar; Jessica Hahn to be chief of staff.

"Due to considerable experience in area, Mr. Stern is to initiate proceedings attempting to accurately define 'decency'. 'Looking at cable TV lately, I haven't seen any' said Mr. Stern. 'What's the Weather Channel thing, anyway?'"

The FCC didn't have a quote from Ms. Hahn. I still think Howard belongs in North Adams MA advising WJJW \*91.1 (see March, p. 8, col. 2)

From the classifieds: KLUH \*90.5 for sale, PO Box 1313, Poplar Bluff MO, CP for 700 watts h.v.; \$75,000. D. Parsons; (314) 785-0006

General manager KUGS \*89.3 Bellingham WA, B.A. and experience and ability to teach broadcast/journalism at the college level. Letter, resume, references to Christina VanWingerden, MS 9106, Western Washington University, Bellingham WA 98225. EOE.

A student station in Denmark wants contacts at American stations. "What can we learn from you?" asks Lars Rikart Jensen, Radio Energy, DTH (Technical U. of Denmark), 2800 Lyngby, DENMARK.

McMartin SCS generator #200, R. Johnson, 1705 Liberty St., Mexico MO 65265; receivers, too; (314) 581-2900.

## DX Doings—An Occasional Feaure

These early spring mornings (up to about 10 local time) have been unusually good for producing long-distance (DX) reception in the Midwest. May 4 brought excellent reception from NE, SD, ND, the 5th to MI, and on the 6th I heard WVCY 107.7 Milwaukee on a stereo boom box with no outside antenna. WVCY-FM-TV were pitching for money and by 9 a.m. had received \$63,883 in the \$320,000 goal. Naturally, reception faded out before I found out if they made that goal! WFMT 98.7, "V-103" 102.7 Oak Park and WBEZ \*91.5 Chicago were all noise free—when later tuned in on the FM set connected to a rotating yagi antenna. All heard here in Esko, which is about 22 km west of Luth and the western tip of Lake Superior. Try FM DX listening as you get up; tune in frequencies not occupied by strong local stations. The "FM Atlas" should be useful to help you identify the stations you receive. After about

May 15 until around July 20 listen for sporadic-E skip. Best hours are from 10 a.m. to 6 p.m., and skip is first noted low on the dial, such as 88 to 90 mz. If the "opening" intensifies, skip will be heard higher on the dial, sometimes as high as 107.9 mz. Check channels not filled with strong local signals. DXing is a good way to sleuth out formats and promotions of stations outside your local market.

WFMT was heard giving two-in-a-row commercials, something they didn't use to do, but all commercials were live and there was no repetition of addresses or phone numbers. I like the fact that they always announce the time to the exact second—an art forgotten by every other commercial station in the nation, I dare say!

WGGL \*91.1 Houghton MI had only an open carrier SCS. Bob Watson at MN State Services for the Blind said they are supposed to have the SCS, and he called them to see that the SCS is restored. Yes, even SCServices can be heard well out of their normal service areas when conditions are exceptionally good—as they have been early this month.

## FM FORUM

### CONTRIBUTIONS FROM READERS

Returning to last month's discussion of the CPB toll-free complaint number, the National Federation of Community Broadcasters members present at a seminar I attended seemed to agree that if millions were spent servicing incoming calls, then the line might be given up. [See December, p. 7, col. 2.] A sort of compromise has been reached whereby the total programming effort of a station or network, like APR or NPR, is considered, rather than each program having to be balanced.

Perhaps the NFCB's anti-religious bias may be in part justified when one considers what one of the nation's foremost religious broadcasters, Harold Camping, president of Family Stations, Inc., is saying. His doomsday forecast, in a vanity-press [Vantage] published 576-page book, "1994?" claims the world will end in September, 1994, with the second coming of Christ. Although the Bible says no one will know the day or hour of Jesus' return, the 71-year-old Camping, who holds a degree in civil engineering and is best known as host of the "Open Forum" radio program, says it is possible to know the century, decade, year or month of Christ's return. Camping's Biblical research leads him to believe that creation was exactly in 11,013 B.C. So far, about 42,000 copies of his book have been sold, but public response has been "by and large a studied silence," with Camping saying theologians are "not very happy" with his prediction. Phil Boersma, who used to work at a Christian station in western MI, muses, "I wonder if he's still in the Christian Reformed Church? They used to kick people out for stuff like this."

A list of Family Radio FM translators

was kindly sent by Craig Pattillo; however, I don't have time to go through the list and compare what it shows with my "FM Atlas." If any reader volunteers to go through the list and write additions or corrections to it, let me know and I will send it. I hope to have a new "FM Atlas" ready by August, but making that deadline will require time and discipline that has so far been lacking. FMedia! is on the rebound, with the print run increasing for the first time since I started publishing. A huge backlog of radios' orders has come upon us, and most of the time I have a technician working to modify radios for the SCS feature. Out of print is our radios' and electronics catalog—last published in 1991.

The top orchestras may be departing the FM airwaves (March, p. 8, cols. 1-2) but writers to the NY Times mentioned that the San Francisco Symphony and the St. Louis orchestras are both doing fine. SF continues to benefit from Chevron sponsorship, while the St. Louis orchestra is heard 52 weeks a year on National Public Radio. Underwriter there for the last six years is Southwestern Bell. An NPR producer, Don Lee, wrote in and said the new way to listen, what with people using radio for brief drives in the car, etc., is the program *Performance Today*. That program series offers a "daily snapshot of concert activity all over the country. To orchestras, it offers the opportunity to reach more listeners with each concert, because the series presents music from a single concert across a span of several days, [and it is] also the opportunity to maintain a regular broadcast presence for far less money than it takes to produce traditional concert broadcasts." KING-FM 98.1 Seattle's program director, Peter Newman, said "It is not the job of the 50 or so fulltime commercial classical radio stations to serve as an outreach service for a handful of orchestras. Our task is simply to broadcast classical music to as many people in our respective markets as we can.

"After dropping all of KING-FM's syndicated concerts and introducing a live local show that brings musicians into the studio to perform—as well as continuing our broadcasts of the Seattle Symphony Orchestra—we saw a 33 percent increase in audience share."

After last month's FMedia! was mailed, Jim Wychor called and said that June is Charlie Person's wife, not his daughter (April, p. 7, col. 1). She is 81, and "Charlie [83] just got his pilot's license renewed." They have announced the sale of KABD 103.5 Brainerd to Jim Ingstad Broadcasting, owners of some 20 Upper Midwest FM and AM stations.

The Pavek Museum of Broadcasting is hoping to move to larger facilities and hiring more staff. You can help by joining its "Kilowatt Club," by sending a donation

like \$1000 for the 5100 to 10,000 watts club to the museum at PO Box 16030, St. Louis Park MN 55416-0030.

Tom Cornell visited Philadelphia three months ago and "saw an interesting transmitting antenna. Belongs to WMMR 93.3 and is built into pointed spire on top of tallest building downtown, One Penn Center, I believe. From distance, it looks like decoration. When a few blocks away, you can recognize what it is if you are familiar with transmitting antennas. It's a panel array."

Dave Alpert at ABC sent a wire story about a station disserving the mono listener. KTUI-FM 100.9 Sullivan MO had the problem of how to broadcast two local high school games at the same time. It decided to run one game on the left channel and the other on the right. By adjusting the stereo balance control, the listener could hear the proper game. Disc jockey Sam Scott said the station publicized the special event heavily "so that listeners wouldn't be caught off guard when they tuned in and heard two games at once." Like I said before regarding a similar broadcast on another station: poor monophonic listeners!

ABC is to be the major supplier of programming for FlightLink-On-The-Air. The live airborne audio system will digitally transmit nine to 12 channels of stereo programming to aircraft passengers, offered in conjunction with a system which will offer in-flight phoning.

Steven R. Bartholomew: "Your feature illustrating the history of the FM radio dial in Minneapolis-St. Paul was enjoyable. . . Thank you for your words of encouragement regarding my legal/engineering work. Please mention my services in one or more future FMedia issues. If you wish, you may reduce, reproduce and/or print my business card." I've misplaced the card but you can contact Bartholomew at 1583 Miss Elle Way, Alpine CA 91901-3983; (619) 445-4777. He's the one who discovered that XHTIM Tijuana has "finally" moved from 91.5 to 91.7. "We'd be interested in seeing the same information on translators that you list for primary stations [in the FM Atlas]. Specifically, we'd like to know the power output, polarization and height above average terrain for translators." [The FCC is just getting around to mentioning polarization information on some of the new translators, but does not give HAAT data yet—b.e.]

"Just writing to say I have a big stack of FMedia's in front of me and love them all," says Michael DiSandro, who hears Howard "Potty Mouth" Stern on WLUP AM 1000 Chicago. "When he came on here the first day you almost thought they would have yanked him off the air the next day. He insulted many listeners and made vicious insults against Steve Dahl and Gary Meier, who are on sister station WLUP-FM 97.9. But since then

his ratings have moved up about 1/2 a point. . . I think he's funny. . . As for Steve Dahl, he can be considered the 'Howard Stern of Chicago'—both are in trouble with the FCC dating back five to seven years. . . I would assume the Infinity-owned stations, WJMK 104.3-WJJD AM or country WUSN 99.5, have been taping his show at times and sending the tapes to NYC for Howard's approval and to see that he's not being stepped on." Chicago has almost "overkill" in rock stations, "but they all get the job done quite well. Even a city like New York could use more rockers."

Your AM-FM-TV station log on disk, IBM or compatible. That's the claim of Daija Enterprises, Box 24, Cambridge WI 53523-0024; (800) 824-4359. "The computer disk version contains the latest from the FCC/CRTC and many updates from our network of radio listeners, plus the latest from the networks themselves. Data current the day we ship the disk! Allow 2-3 weeks for delivery." Computer disc \$19.95; book versions \$16.95 each. Specify AM/FM/TV.

Thanks to Doc Searls for perfecting the Macintosh program to produce the masthead, seen on p. 1 since January for most subscribers.

Chuck Gysi interviewed me about plans to allot 97.5A to Mount Pleasant IA, and wrote a story appearing in the Burlington Hawk Eye newspaper. It mentions KILJ-FM 105.5 upping its power and "turning its back on Mount Pleasant" and broadcasting to a wider area, including Burlington. "Elving said that if the FCC approves the allocation, he would apply for a construction permit to build a 6000-watt radio station that would primarily serve Mount Pleasant." The FCC has returned my petition wanting more technical information, which I plan to submit, along with a petition to add 92.1A to Hermantown MN, where I operate a translator. I will be trading out a G-E Superadio to Don Mussell for a printout of the FM channels his computer told him are available. For Hermantown to grow into a Class C3, two stations would have to change channels—WCMP-FM 92.1 Pine City and WELY-FM Ely. Pine City could go to 100.9A, with no site restriction, since the former WCTS (it's WBOB-FM now) 100.3 is moving its site about 18 km SE, and WELY-FM could move to any of six possible channels, including 101.3C.

Facts from Muzak. Now only a quarter of Muzak's direct satellite customers subscribe to its "environmental" channel (the original SCSounds on FM). More than 50 percent subscribe to one of its two "foreground" channels. The "FM One" foreground channel is designed for 20-to-50-year-olds, while "Hitline" is for 12-to-30-year-olds. Blue jeans stores might subscribe to Hitline; electronics stores FM One; furriers and jewelry stores, light

classical. Next time you're in a store think of which demographic group the store's background (or foreground) music thinks you are in as you listen.

An SCS customer, Fr. Lawrence S. Brey of St. Cloud MN, says "The main reason I am interested in the SCS modified radio is the fact that on the normal FM band in this area I can find no station whatsoever that has soft or light instrumental music. As far as I am concerned, the FM band is one vast wasteland of rock, country western, etc., and that's it except for public radio (but who wants to listen to classical music all day long?). I was planning to write to Franklin Hobbs about this situation. He used to announce on KEEY-FM, which together with WAYL-FM featured light instrumental music. Now they are gone, and there is WLTE 102.9, but it has mostly vocals rather than instrumental music. . . 1992 marked the 75th anniversary of Madison station 9XM (now WHA), 'the oldest station in the nation', and which was the hub of the Wisconsin State Broadcasting system network, which later was mostly FM, the pioneer of 'public radio'. When I was a boy, radio was a hobby, and once I built a simple super-regenerative FM receiver, and remember picking up early FM stations in Milwaukee, notably W9XAO and/or W55M; their theme was a Fritz Kreisler melody on violin ensemble, and their station 'ID' was the sound of a bell, followed by the words, 'clear as a bell'. That was before the FM spectrum turned into the vast wasteland mentioned above."

"Regarding the G-E Superadio (April, p. 6), it's hard to understand why, in 1993, the new model III still lacks digital readout," says Nick Lombardi. "I've noticed that some GM/Delco car radios—usually the ones with electronic, stepped volume control, power antenna and equalizer—have outstanding sensitivity, and very good selectivity and freedom from front-end overload, characteristics which make them ideal for sniffing out weak, distant signals. Is there anything of similar quality in a portable unit? Most of the walkman-type stuff I've tried is pathetic with regard to front-end overload. Perhaps your readers can share their experiences with different models, or suggest a specific unit for you to test." [I have improved the FM selectivity of both my Delco car radio with graphic equalizer and the older G-E Superadio II with a Toko 110 kHz filter or Murata 150 kHz filter in place of the factory-installed filter(s).]

"I was delighted that Mr. Turro was successful in repeating WJUX on his translator," writes Louis J. Sicilia. "However, I think Turro should have taken his application to originate programming to the courts. Of course, that would probably cost him more than the \$100,000 to purchase WRRH [Franklin Lakes NJ]."

Until June,

*Bruce Elving*

MN—somewhere between Willmar and Brookings SD—a new company plans an FM on 106.3 and has served notice to KCGN 101.5 Ortonville that its translators on 106.3 in Willmar and Brookings SD will have to change frequencies or go to more power to overcome interference.

"The manager of this new station visited KCGN to give early notice that his new project... would most likely cause fringe interference for these two translators. This is the only frequency available from the FCC for his project, which leaves him no choice in the matter. He said he regrets the inconvenience this would cause the community translators, and wanted to give enough time for the communities to make application for their changes." Probably also to be affected are the Renville and Marshall translators of KCGN, both on 106.1.

**FCC FM Station Freeze Proposed (news and comment)**

The NAB's at it again, this time getting to the interim FCC chairman on the subject of a freeze on new FM stations. Yes, James Quello is interested in that possibility. Unlike previous freezes, this one would be strictly for economic reasons--to protect existing stations from new competition. Although Docket 80-90 was a

severe pill for the industry, it hardly seems in the public interest to impose a freeze merely to protect broadcasters from additional competition, or are we learning from the Canadians? The CRTC long has had a policy of not allowing new stations when existing licensees make a compelling case for no new competition. The FCC should tread lightly, lest opportunities for new voices which could spell diversity in media ownership and programming might be snuffed out.

Docket 80-90, which created hundreds of new FM station possibilities, was not a mistake. Even without that docket, ingenious station owners and engineers would have found scores, if not in the low hundreds, of opportunities to create more FM stations. The trend for more FM will continue inexorably, freeze or no freeze. A freeze would only delay matters; after that the floodgates would open, as well they should.

With duopoly (FM-FM) situations becoming more common, there is a need for countervailing action to assure that other independent media voices come into being. More signals from more diverse sources are what are needed—not more duopolies—and surely not an FM freeze.

"A freeze—it's a good idea," one subscriber said. "But it should be to prevent interference, not for economic reasons. There are too many FM stations cluttering the dial. As an example, Q-101 Chicago is interfered with in NW Indiana by the new Q-101 South Whitley IN."

#### Religious Broadcasters Move to Block Fairness Doctrine

During the Reagan-Bush era, the Fairness Doctrine was virtually made into law, with both houses passing a bill that would have imposed "fairness" in handling controversial issues of public importance, only to have it vetoed. With a Democrat in the White House it is possible such a bill can now pass. National Religious Broadcasters is one group which has come out against such a move. "On the surface, the Fairness Doctrine may appear to be little more than a benign statement of good journalistic practice," writes Richard E. Wiley (pictured), former FCC chairman,

whether broadcast coverage of important issues has been 'fair'. As broadcasters have demonstrated in the past," he explained, "the doctrine has sometimes led to stifling the expression of unpopular viewpoints and to 'chilling' coverage of controversial issues."

The NRB passed a resolution, mentioning that religious broadcasters enjoy freedom in presenting the gospel of the Lord, and that the Fairness Doctrine can have a "chilling and stifling" effect on broadcasters everywhere. "Therefore let it be resolved that the National Religious Broadcasters goes on record as strongly opposing an attempt to reinstate or make the Fairness Doctrine the law of the land and pledges to vigorously oppose any such action."

Broadcasters, commercial, public and Christian, can lose sight of the fact that it is not broadcasters who deserve freedom, but it is the public which has the need for freedom in the receiving of a fair treatment of ideas, whether or not such presentations (or their lack) exert a "chilling" effect on unpopular views. Indeed it is this so-called freedom for broadcasters that has been advocated as a reason for keeping indecent programming on the air; yet the courts and the FCC have been following a course that might mean censorship—with the view that it is not the broadcaster who needs "freedom," but listeners who deserve the freedom to receive programming which meets community standards, however those standards are defined.

#### Small Print Happenings and FM Industry News

A federal judge—Royce Lamberth—rejected a claim by Infinity Broadcasting and others that the FCC's enforcement actions against Howard Stern amounts to unconstitutional censorship and prior restraint. At issue were \$606,000 in fines the Commission has assessed Infinity and other stations carrying the Stern show. Infinity and other broadcasters and civil liberties groups had complained that the FCC uses large fines to "browbeat" broadcasters into self-censorship.

The FCC, on its own, has upheld other actions of the Mass Media Bureau in imposing \$2,000 fines against three Infinity stations for previous Stern broadcasts. In upholding the fines, the Commission said the stations failed to provide any new facts, and that the \$6000 in fines must be paid.

It's not a fine, but, er, a payment of \$17,157.18 that the FCC says Peter Wayne Lechman, licensee of WBOP 106.3 Churchville VA, must fork over to Commonwealth Audio Visual, WLCC Luray VA, for reasonable and prudent costs of WLCC's frequency change to 105.7.

Germany says no to DAB in the L or S band—at least for now. The German public broadcasting group, ARD, voted to delay considering the technology from 1995 to 1997. The group said financial concerns and questions about the ability of the system to handle all programming currently on FM are the issues. A similar situation is in the U.S. where the NAB has withdrawn its blessing of out-of-band DAB in favor of an in-band system, such as provided by USA Digital.

The Commission has amended its rules to provide for optional transmission of a ghost cancelling reference signal on TV line 19, and enhanced closed-captioning and other broadcast related information on line 21, field 2 of the vertical blanking interval. Modern TV sets are less disturbed by changes in the blanking intervals than earlier sets, hence the ability to provide texts and auxiliary services hidden from the ordinary viewer, much like FM-SCS does.

Competing groups in the high definition television race have called the feuding quits for now. They'll come to the FCC next year with a system using the best of each company's technology, said Richard Wiley (pictured above). Wiley said the merger of the four groups will lead to a new digital broadcast standard that will "emulate the motion picture experience" and lead the world in television technology. Unlike the analog system in Japan and elsewhere, digital offers the prospect for more channel capacity and growth. "It's great to see people working together to develop the best HDTV in the world," said interim FCC chief James Quello. It's possible that the merger will shorten the time to get HDTV sets to the market, with the goal of having it in time for the 1996 summer Olympics in Atlanta mentioned. The groups had been under pressure to form this so-called "grand alliance," after about \$24 million had been spent privately without any clear-cut winner emerging.

In LMA/duopoly news, WBEE-FM 92.5 and AM Rochester NY has entered an LMA-to-buy WKLX 98.9. WSSX 95.1 Charleston SC is being sold to WSUY 100.5, both of which have separate duopolies. WSUY is teamed up with WDXZ 104.5 Mount Pleasant SC, which would be sold. WSSX's partner, WSSP 94.3 Goose Creek-WUJM Charleston, would also be sold. WJMO-FM 92.3 Cleveland Heights and its AM sold to principals of WZAK 93.1, several months after local minority groups filed a petition to deny. The protesters claimed that Lynn Tolliver and Bobby Rush were being used as a front for the white-owned stations' duopoly efforts (January, p. 7, col. 2).

Capstar Communications has closed on its acquisition of WMYI 102.5 Hendersonville NC, co-owned with WSSL 100.5 Gray Court SC. WLQR 101.5 and AM are being paired with WVKL 92.5 in Toledo, while WKKO 99.9-WTOD AM there are being yoked with WRQN 93.5 Bowling Green. This will probably end WTOD's LMA with WRED 95.7 Gibsonburg OH. Saga Communications is buying WYNZ-FM 100.9 Westport-Portland ME and its AM to team with its WMGX 93.1-WGAN AM. WTKW 99.5 Bridgeport NY has filed a petition against the WYYY 94.5 and AM Syracuse duopoly with WBBS 104.7 Fulton-Syracuse, saying that to allow them to avoid the 25 percent share cap are "anomalies."

To go commercial: If the FCC approves, WAJC 104.5 Indianapolis will go to WFMS 95.5 for \$7 million in a duopoly. WFMS is backing away from a previously-announced duopoly with WGGP 106.7 Greenwood IN.

KKFI \*90.1 Kansas City's fine for \$2,500 for failure to show its file was not to an ordinary member of the public, as implied in January (pp. 7-8), but it was a former employee who was refused permission.

Richard E. Wiley is a former chairman of the Federal Communications Commission and is general counsel for National Religious Broadcasters.

in *Religious Broadcasting* magazine. "The problem lies in the government judging

KLOL 101.1 Houston TX fined \$33,750 for a 1991 morning show in which penis size was discussed. The fine is against former owner Rusk Broadcasting, with the sale to Evergreen Media going forward.

Arbitron says it will call station "nonIDs" or slogans by the term "station name" in its diaries. It disqualified WMMQ 92.7 Charlotte-Lansing from its recent ratings report for ratings bias (mentioning on the air that a survey is going on).

A comparative hearing for an educational FM frequency, practically unheard of until now, but that's what faces Toccoa Falls College, which wants 88.5 in Belton SC, and Nazareth Communications, which wants 88.3 in Williamston SC.

A hearing could also happen in MA. WOMR \*91.9 Provincetown applies for 1000 h, 20000 v and change from an A to B1; meantime, WUMB \*91.9 Boston applies for a station in Falmouth on 91.9, at the base of the Cape. WLNE TV-6 New Bedford MA-Providence RI files a petition to deny the WUMB application. "I have no use for WUMB; it would swamp my nearby translator on 92.1, and would really restrict WOMR's signal to part of the Cape," says a subscriber.

Steve Shannon and D. C. Chymes have been "suspended" at WKBQ 106.5 Granite City IL-St. Louis MO, because of an on-air tirade about the lack of attention paid to "white history." The station, co-owned by black-formatted KXOK-FM 97.1 Florissant MO and AM, is suing the pair \$50,000 for lost ad revenues due to the controversy. The duo had called a black listener a "nigger," and suggested that Jesse Jackson be assassinated. KXOK-FM jocks had been campaigning on-air for listeners to call and urge that WKBQ's morning team be ousted.

Shades of Tom Root, the disbarred former communications attorney: The FCC has designated for hearing the application of Petroleum V. Nasby Corporation for renewal of license of WSWR 100.1 Shelby OH. Root has supposedly given up his interest in that station, but the FCC feels a hearing is necessary to find out for sure.

The FCC has denied an application by the state of Oregon for \*88.9C1 in Redding CA. In 1988 the University Foundation, CA State U.—Chico filed for 88.9, and its application appeared in an FCC list mentioning a Jan. 10, 1990 cut-off date for competing applications. Then that application was erroneously mentioned on a second list that mentioned Feb. 1, 1990 as the cut-off date. On Jan. 29, 1990, OR filed for the channel. The FCC rejected OR's application. In asking for reconsideration, OR argued that the FCC committed a procedural error by failing to give clear and adequate notice, and said it was confused by the two dates given by the FCC. However, the FCC found no merit in OR's request and denied its petition.

Auctions—not like what public TV often employs—but auctions to use part of the spectrum are what the Clinton administration is eyeing to collect revenues from services like cellular communications. The bill would not affect broadcasting stations, which would still be awarded by merit-based hearings. The auction bill would pour money into the FCC based on the prospect of future earnings, such as through royalty-sharing arrangements or installment plans.

The manager of WMPG \*90.9 Gorham-Portland ME resigns amid controversy over the station's method of governance. Peter Twitchell quit, citing his need to attend graduate school. Staffers seem to want strong staff participation on the station's board. Twitchell called the station's licensee, trustees of the University of Maine System, an "absentee landlord" that didn't properly oversee the station's operation, although the trustees are held responsible by federal law for what the station airs. Program host Ed Noys said "everything WMPG has become has been a result of the vision of the staff... I don't think Peter ever saw the forest for the trees. He didn't understand the management structure."

"Lovephones," heard on WEGX 106.1 Philadelphia, has parents protesting the late-night show. Even WEGX vice president Dave Noll is uncomfortable with the show, saying "I have a hard time defending some of this stuff." He didn't expect it to be as graphic as it became. A group of parents was to have picketed the Eagle 106 offices in Bala Cynwyd PA. "Don't be shocked if 'Lovephones' isn't long for Eagle 106's world," mused Joe Logan in the Philadelphia Inquirer.

Postal Service v. Minnesota Public Radio? That could be the scenario with the postal service claiming MPR, through its "Wireless" catalog, which grosses \$94.6 million in sales and earning \$8.4 in profits, takes advantage of non-profit mailing rates for a profit-making subsidiary. The postal people want MPR to pay \$3.1 million, which they claim was cheated from them. MPR spokeswoman Ginger Sisco said the network did nothing wrong and that critics are confounded by the "entrepreneurial way we do things." With the federal deficit crisis, restrictions on who qualifies for nonprofit mailing rates are being tightened, and the rates themselves will probably rise. Postmaster General Marvin T. Runyon has gone so far as to ask Congress to abolish cheap postage for all but absentee voters overseas and the blind. Many other organizations may be worthy of public support, but "it's really not our position to be the social conscience of the country," Runyon said.

FM totals as of April 30: 4853 licensed commercial stations, 1613 educational for an FM count of 6466. This does not include new stations (having construction permits) that are temporarily broadcasting without benefit of an FCC license.

From the classifieds: Fourth edition "FM Atlas," 1976, 112 pages, red cover, very good condition, which I took in trade. \$2.95 list price, asking \$10 postpaid.

Professional SCA demod card with excellent cross talk rejection \$20; Superadio III with SCA, \$85, performance guaranteed, 1-800-944-0639.

Want to buy complete translator packages and SCA receivers, M. McNiell, KNON, PO Box 710909, Dallas TX 75371; (214) 823-1326.

FM radios custom modified to become low powered transmitters, \$49 plus \$4.50 shipping. Miller Transmitters, (218) 878-0042, or write, % 776 Laurel St., Cloquet MN 55720.

FM FORUM

CONTRIBUTIONS FROM READERS  
WJUX \*88.7 Franklin Lakes NJ (and its near-NYC 103.1 translator) now totally

monophonic, having dropped what little stereo it had. "I love the music on WJUX and receive it perfectly on my G-E Superadio but when I try to hear it on a walkman-type radio I have a problem. It picks up the WJUX signal [when translated on 103.1] half of the time and the other half WNEW and WYNY are heard," writes Louis J. Sicilla. "Maybe you or one of your readers could suggest a walkman radio which would overcome this problem. . . I'm near to WHCR \*90.3 New York, which is owned by City College of New York. It's interesting to note that WHCR presents Islamic devotional programming on early weekend mornings and also programs which are anti-white racist. Since City College is a taxpayer-supported institution, it seems to be a violation of the First Amendment. I phoned the station's comment and suggestion line and left a message complaining about it.

"Jean Swann (Mrs. Turro) is WJUX's community affairs director and is also an on-air reporter on WBBR 1130 AM (formerly WNEW). Every hour during its station ID, the old WNEW theme is played and at the start of each newscast you can hear the sound effects that the old 'NEW used. WJUX rebroadcasts public affairs programs from WFDU \*89.1 Teaneck NJ (Sunday 6-7:45 a.m.). Mike Prelee, WJUX news director, was the last news director of WNEW 1130 AM.

"Brian Dodge . . . caused the death of a person by reckless driving. He also had an illegal LMA between WKBR 1250 AM and WBME 1230 AM Belfast ME, an illegal STL to WWNH 1340 Madbury NH and an illegal transfer of control involving one of the stations," alleges a reporter. He is or was involved in the operation of WGLY 103.1 Waterbury VT, which is not yet on 103.3. WGLY is "all brokered gospel programming." [See last month, pp. 5-6.]

In a related development, Ronald R. Malone was given a variance by the local zoning board to have the studios and control center for his two nearby noncommercial FM stations in his home in Rochester NH. "Malone's supporters said the religious programming operation did not pose a threat to the neighborhood or cause problems." Rep. Julie Brown, the Rochester Republican, has 20 days to appeal the city's decision. The Malone FM stations are WSEW \*88.5 Sanford ME and WWPC \*91.7 New Durham NH.

The Upper Midwest Broadcasting Conclave is July 15-18 in the Radisson South Hotel, Minneapolis. Watergate participant-turned-broadcaster G. Gordon Liddy is scheduled to speak, 1000 registrants are expected, and there are exhibiting opportunities. Call (612) 927-4487 or write the Conclave, 4517 Minnetonka Blvd., Ste. 104, Minneapolis MN 55416."

I'm working on a new FM Atlas, with TX redrawn. Until later this summer,

 VA Waynesboro W220AB \*91.9  
 WV Buckhannon W209AK \*89.7  
 WI Neillville WISQ 92.7  
 "I hope you complete the FM Atlas soon. Mine has basically fallen apart from use. Another page falls out with each passing opening! . . . Also, I hope to see better Mexico maps in the next FM Atlas. Keep up the good work."

**SCS Services, 57, 67, 76, 92 kHz**

*Symbols are as in the "FM Atlas"*

CA Los Angeles KPFK \*90.7 still tZ; it is 9600 baud (tR, 92 kHz) [103.5 Chicago  
 KTWW 94.7 tX, 67, same service as on WWBZ/  
 DC Washington WKYS 93.9 tE, 92  
 GA Atlanta WRFQ \*89.3 tE, 67  
 GA Macon WPEZ 107.9 tD, 57  
 IA Fairfield KHOF \*90.5—it's a 100-watt station with great plans. To transmit from Maharishi International University campus with BBC news and ethnic music from around the world on main carrier. Its SCS will be for "mediating members of the community," and will play Maharishi Gandharv Ved music 24 hours a day. "A membership fee of \$6.75 will cover the cost of a month's subscription to the sideband which will be available only through the use of a decoder unit." Programming to vary according to dayparts. No target date announced, but you can submit ideas for programming the main channel to Brian MacQueen at (515) 469-3074.  
 LA Lafayette KTDY 99.9 no SCS (open carrier, 67; had tM)  
 LA Shreveport KRMD-FM 101.1 tM, 92 (no 67; had tP, 92, tM, 67)  
 MI Ann Arbor WUOM \*91.7 and Detroit WDTR \*90.9 test signals at 76 kHz for oral traffic reporting. "This is an experiment in conjunction with Marlin Ristenbatt, engineering professor at the U of MI. If it works out we will be ordering 1000 prototypes to go in or on new cars—in the radios or a thin card to stick on the dash. . . We developed the system and Tim McCartney followed through and installed a 76 kHz SCS at KBSU in Boise ID." Working on a similar system is LRG, Inc., based in Port Washington NY, with a separate radio card mounted on the dash, with voice information to tourists as well as traffic alertings. The company is working with Shadow Traffic, which is in many cities; will take Shadow data and reinterpret them for LRG clients. May use an alerting signal on RBDS, 57 kHz, then transfer the information to a 67, 76 or 92 kHz channel. "I'm 50 years out of college and still trying new things. We're using your Atlas to find the stations in different traffic corridors and will be contacting them and asking them to participate. If this takes off, I'll be a prospect for your newsletter."  
 MD Baltimore WBJC \*91.5 has tE, 92, in addition to talk at 67  
 MD Waldorf WXTR (not WXTR-FM, since there is no WXTR AM) has tE, 92, Spanish, Radio Sante Fe, transmitting from Fenton Street in downtown Silver Spring, and the brainchild of a group of Colombian businessmen. Modified boomboxes cost \$75 to \$120, but the station is not counting on selling radios to bring in revenues. Instead, it's hoping to be advertiser supported. Thirty-four-year-old Nicholas Arcila is heading the partnership, having expanded to Richmond where "XTRA 104" people own WMXB 103.7. WXTR identifies with Washington DC.  
 NV Las Vegas KNPR \*89.5 tE, 67 (no tU, 92)  
 NY Garden City WDRE 92.7 no 67 (had Radio Sedaya Iran). "Good move; it always sounded terrible." The 92 continues to be telemetry warbles.  
 NY New York WQHT 97.1 tE, E, "WMNB" (Russian) on 92, same as on WFME 94.7's 67; WQHT's 67 still Greek, Antena FM. "I'll let you know if WFME drops the Russian."  
 WNEW 102.7 no SCS, "but we are looking into the possibilities of it."  
 WNCN 104.3 RSI now on its 92 kHz, while 67 continues to be Korean Christian Broadcasting (tE, E)  
 WMXV 105.1 tC, relay of its main channel, 92. Briefly had tG, LDS programming from Salt Lake City and a relay of KSL AM there; tZ, 67.  
 PA Wilkes Barre WRMS 92.9 tC, 67 (relay of WARM AM Scranton); retains tR, 92  
 SC Charleston WSSX 95.1 tU, 92 (no 67)  
 SC Folly Beach WYBB 98.1 tU, 67, now "98-Rock" (from "B-98")

TX Houston KILT-FM 100.3 tX, 67

TX Tyler KNUE 101.5 tU, 67 (was tM)  
 TX Whitehouse KISX 107.3 tU, 67  
 VA Richmond WMXB 103.7 tE, 67, Korean, run by Moo Il Moon, a well-known Korean TV presenter, now living in VA.  
 VA Suffolk WAFX 106.9 tE, 67, coming soon, Korean, Moo Il Moon. Moon speaks poor English, but is learning along with many of his listeners who receive English lessons on the radio. Worldwide Radio Korea is at (804) 560-5555.  
 AUSTRALIA—There is a market for SCS receivers "due to the restrictions placed by our federal Department of Transport and Communications which limits competition with existing broadcast licence holders. The BBC World Service, which is satellite fed to Australia, is now available in Sydney, Melbourne, Canberra and shortly elsewhere as a subcarrier on FM radio stations. I know that two of the stations use 92 kHz subcarriers but one may be using 67 kHz. . . If the radio is suitable and reasonably priced, a market for a quantity could easily be found. . . I did subscribe to the BBC service but the only radio they have is very badly made, is insensitive, covers FM only, no stereo, and can only pick up with a small built-in telescopic rod—no provision for connecting an external antenna. Many subscribers have returned them and been rebated their subscriptions as the BBC accepts that their own unit has very limited acceptance."  
 "Your modified radios are quite convenient to take along on a trip. You can follow the stations all along the way. You have a good thing going."  
 "It's absolutely fabulous" (the modified G-E Superadio II). It's working very well. I'm getting things I never expected. I'm excited. It's superb. I couldn't be any more satisfied."  
 "For a person who's such a whiz at electronics, it's incredible that you have a phone system with so much hum that I can hardly understand you. It's a joke."  
 "Looking forward to the new Atlas; the old one is falling apart."  
 "I sense that many of your customers are unhappy with the results obtained from the relatively inexpensive SCA units you use; after the novelty wears off, even a very small amount of crosstalk from the main channel can be quite annoying and distracting. The sound should be crisp, clean and noise-free. . . I wonder how you plan to list the 57 kHz RBDS service which will apparently soon be quite widespread? You might consider the letter code 'I' and show it as t(I). But that may not be practical if virtually every station has either it or t(D); in that case it may be better to just ignore it, or use a completely different method. I'm not sure I've ever heard t(I), or would know how to distinguish it from t(D)." But most SCS activity is at 67 kHz, not 57 or 92: "This town is 67 kHz or bust!" One feature of RBDS is the potential to show "what song is playing, etc. It claims most stations will get subcarriers that didn't have them in the first place." Testing for the summer Consumer Electronics Show in Chicago at 57 kHz were: WBEZ, WGCI-FM, WLIT, WLS-FM, WLUP-FM, WNUA, WPNT-FM, WUSN, WVAZ, WXRT, WTMX and WWBZ. Access USA, Delco, Denon, Goldstar, Jensen, Sony and Coupon Radio demonstrated 57-kHz-capable radios at the CES.  
 "Thanks for sending this radio. But it doesn't pick up In Touch either. . . So, please issue me a credit on my card and take this one back, too."  
 "I found the FM Atlas an excellent tutor on SCS, and it answered the several questions I had."  
 "I'm glad to hear you're working on FMA-15 (especially the new TX map)."  
 "Looking forward to FM Atlas."  
 "Your Atlas is very valuable and I appreciate that it's a labor of love."

**FMistakes—FMedia! and FM Atlas**

AR Clarksville 106.9 calls are KXIO, not "KXIQ," May, p. 3, col. 2

 "Hope you find some of this information useful. There have been a lot of changes on FM and AM..."  
 "When is the 15th FM Atlas coming out? I haven't seen you mention it at all in FMedia!"

**AM Happenings Most Likely Caused by FM**

AZ Bisbee KBZB 1230, designated license renewal for hearing, with the FCC investigating its silent status  
 CA Banning KMET 1490 silent  
 FL Bradenton WJRB 1490 silent "pending sale"  
 FL Winter Park WWSN 1440 silent amidst a dispute among its would-be owners and to correct problems with its ground system  
 HI Honolulu KOHO 1170 silent, had been all Japanese  
 ID Payette KIOV 1450 along with KQXR 100.3 FM silent  
 ME Machias WMCS 1400—FCC deletes license and call letters for "failure to prosecute."  
 MA Gardner WGAW 1340 silent, in bankruptcy court  
 MN Monticello KMOM 1070 back on air. With a "local station format... We'll go on with a pretty basic schedule and add as we go. The reopening came because communi ty advertisers are taking a look at it as a valuable asset for the area."  
 MO Kansas City WHB 710 to parallel KMZU 100.7 Carrollton MO with country, farm news. It was spun off in the Malrite/Shamrock deal; being sold to Kanza, Inc., owners of KMZU and its AM.  
 NE Omaha KOIL 1290 silent for repairs, back on temporarily simulcasting KXKT 103.7 Atlantic IA-Omaha  
 NM Santa Fe KVSV 1260 "silent for repairs"  
 NY Mechanicville WMVI 1160 off air, in bankruptcy and majority shareholder John Farina is in seclusion. "Some of the advertisers who owed money to the station ended up paying it to Mr. Farina instead of the corporation." WMVI also solicited money from its listeners. The amount, believed to be about \$12,000, must also have been deposited in Farina's personal account. Court expected to put station up for auction soon.  
 NC Burgaw WVBS 1470 silent  
 PA Lykens (Harrisburg) WQIN 1290 silent  
 RI Providence—WPRO, WWRX, other stations cutting out or severely cutting back on news. This development hits AM radio especially hard. As the exodus of listeners continues to plague AM, "all-news radio may be a dinosaur now," said Nick Mills, journalism instructor at Boston University, and morni ng news announcer at WCLB-FM 105.7 Framingham MA. The number of people employed in radio news was about 19500 in 1982. By 1992 that number had dropped to 15700. In many major markets only two radio stations actually have reporters on the streets.  
 TN Germantown (Memphis) WNWZ 1430 silent; its LMA with KFTH 107.1 Marion AR ending TX Merkel KMXO 1500—FCC deletes license and call letters for "failure to prosecute"  
 TX Robstown KROB 1510 silent  
 UT Moab KCMY 1450—FCC designates license renewal for hearing, with the FCC concerned about its silent state  
 WV Berkeley Springs WCST 1010 silent  
 "Bruce: Still must reading. Also, I appreciate the Howard Stern comments."

### Nix to Vertical-Only Commercial FMs: FCC

In a stunning blow to small commercial stations eyeing the ever-increasing costs of electrical power, the Commission dismissed a petition by WOAB 104.9 Ozark AL to use vertical polarization only. Penny-pinching WOAB is not stereo, either. In its petition to the FCC, licensee Ozark Broadcasting Corporation contended that most FM receiving antennas are vertically polarized and therefore it is not necessary for stations to waste power by broadcasting both horizontally and vertically polarized signals. "Although it submitted no studies or data to support its claims . . . the proposed change would allow stations to operate at lower transmitter power, consume less energy, and still provide the same coverage."

Dismissing the petition, the FCC stated that no useful purpose would be served by proceeding further in this matter. The FCC rules provide for horizontal-only radiation, or a combination of h & v. You'll see above, "New" and "Facilities Changes," that most stations today use a combination of v & h polarizations.

It seems a strange inconsistency that vertical only is allowed for educational stations (between 88.1 and 91.9 mhz) and FM translators anywhere on the band (88.1 through 107.9). Perhaps the matter could be revisited if Ozark or some other party were to provide better documentation on the energy savings of having only vertical as opposed to both polarizations.

### FCC Clarifies FM Translator Rules

It's not the relief most translator operators were looking for, but the door has been cracked open, ever so slightly. The FCC has clarified that independent translators, whose ownership and financial support relationships with a primary station are temporarily "grandfathered," will not be required to comply with the new service rules through April, 1994, if the translator changes the primary station. "The Commission believes that a change in the primary station will reflect the preferences of local audiences in the community without altering the technical aspects of a translator's operation." But older translators which don't meet current technical standards of the FCC must do so when they implement a "major change," or if they cause interference. A major change is defined when the translator coverage area (1 mV/m) is increased by more than 10 percent.

The FCC announced it will accept FM translator applications in Channel 6 TV areas where there is a written agreement

with a Channel 6 station about interference. The FCC said the proceeding was initiated by various parties seeking reconsideration of the Order of Nov. 8, 1990, amending the FM translator rules. The petitioners sought more permissive uses of translators, including funding and maximum power. "Denying the petitions, the Commission found that it had struck an appropriate balance in the rules as adopted, and declined to either expand the role of the FM translator service or to place greater restrictions on the operations of FM translators."

### FCC Eases Way For Some FM Upgrades

Certain FM stations, interested in upgrading on their own channel, or which can slide onto an adjacent channel, can now do so without going through the cumbersome rulemaking process. It's a one-step solution spelled A-P-P-L-I-C-A-T-I-O-N. Under the old rules, stations had to request those changes through a two-step process in which a party first files a petition for rulemaking and, if the rulemaking is granted, then an application. Other parties were then free to protest the rulemaking during the time allowed for comments and replies. Upgrading stations must, however, make sure the transmitting sites they select meet all application criteria, including the proper distances from other stations on the exact channel and up to three channels on either side. The FCC would consider these "minor changes" (unlike the translator rules, where even a 10% increase in coverage triggers the "major change" mentality of the Commission), and free from challenges from other mutually exclusive applications as of the day the applications are received at the FCC.

### Small-Print Happenings and FM Industry News

A record price paid for an FM station—that's what KRTH 101.1 Los Angeles fetched when Infinity Broadcasting bought it from Beasley Broadcasting Corp., subject to FCC approval, for \$110 million. Infinity, of course, owns KROQ-FM 106.7 Pasadena-Los Angeles. This eclipses the previous high price paid for a stand-alone FM, the \$40 million paid recently for KXEZ Los Angeles by Viacom, which also owns KYSR 98.7 there, as well as the Star FM stations in San Francisco-Santa Cruz straddling 99 mhz. One caller urged me to spend \$15 in the multi-state lottery. The grand prize was about \$110 million. Hmm. If I entered and won, I could have bought a major market FM station with the winnings—but I don't gamble—unless publishing a book and a newsletter is a gamble. A businessman who attends the same church I do says there's a difference between gambling and taking a calculated risk. Running a business might seem like gambling, but it's really taking a series of calculated risks.

Of the KRTH sale, the first impression is that it's too much money, but Raymond Katz, senior vice president at Lehman Brothers, said "it's a good investment." The station generated \$22 million in ad sales last year, and in a market where folks are tied to their cars much of the day commuting, there's plenty of radio listening going on. KRTH wasn't even on the market, but Mel Karmazin of Infinity persuaded George Beasley to sell. Karmazin says he'll keep the station's oldies format.

FM in China—ComStream and Xinjiang Broadcasting of China have agreed to install a digital audio network throughout one of China's provinces. The network will carry one stereo and six mono channels from the provincial capital of Urumqi to 50 regional sites, which include FM stations. Probably one of the last areas of the vast nation we know as China, Xinjiang is the westernmost province and borders Afghanistan, Pakistan and several republics of the former Soviet Union. I question why the need for digital audio quality for a mono, probably mainly talking, network.

FM(?) in Ukraine—Jim Wychor of the MN Broadcasters Association took a trip there and found all three stations in Chervonograd, a city of 70,000, owned by the government. Each has 100 kw and they operate on 4, 4.5 and 5 meters. I haven't figured out the formula, but I think that's in the 60-66 mhz band, once used extensively in eastern Europe for FM. The three stations, in what must be a duopoly, share a staff of seven: a manager, a chief engineer, two technicians and three announcer/producers. Monthly salaries in U. S. dollars: manager \$12, technician \$8, announcer/producer \$7. Wychor kindly brought along tee shirts with radio slogans that were gleefully picked up and worn by the station people. Some 25 stations in MN had donated promotional material for the trip. "A t-shirt is not a big deal in the good old USA, but in Ukraine they cost a person a full month's pay," Wychor said. A full market economy is two or three generations away, and then only with a lot of help. "Everyone has a very large garden, two or five acres or more. If they did not have such a garden, it is doubtful they would survive. . . This trip reinforced the personal knowledge that we Americans are the luckiest people in the world and it is imperative that each of us do everything possible to make sure it stays that way for all future generations," he said.

Satellite digital audio broadcasting is one of the subjects the FCC plans to discuss at the 1993 International Telecommunication Union (ITU) World Radiocommunication Conference in Geneva, Switzerland, Nov. 15 to 19. The FCC has suggested that the conference also include a review of international radio regulations. These conferences are scheduled every two years. The NAB called on broadcasters to move faster in developing an in-band digital audio broadcasting system, and has set aside \$50,000 for such testing. The new experimental grant in Urbana IL (see p. 1) on \*93.5 is an example of domestic digital audio broadcasting experimentation, although I don't know if that station will participate in the NAB's largesse. Anyway, the NAB's board is calling on radio broadcasters to get into DAB "before satellite services are even considered."

Off to jail for a haircut? That was a possibility as KSOL 107.7 San Mateo morning host Mancow Muller and three accomplices faced the music in a court appearance on charges stemming from Muller's Bay Bridge haircut caper. Misdemeanors only, but the judge slapped a \$1000 fine on him and forced Muller to do 100 hours of community service.

Former KPWR 105.9 Los Angeles morning announcer Jay Thomas is reportedly suing the station \$900,000 for breach of contract, following his firing.

In fine news, WMPR \*90.1 Jackson MS \$7,500 for broadcasting commercials on a noncommercial station. WIFC 95.5 Wausau WI fined \$6,250 for violating the FCC's rules regarding the advertising of games. WDRM 102.1 and AM Decatur AL given short term renewals and assessed \$50,000 for failing to meet FCC EEO requirements. Following a petition by the NAACP, the FCC decided to fine WKRR 92.3 Asheville NC \$10,000 and give it a short-term license renewal for EEO reporting deficiencies. KOY-FM 95.5 and AM Phoenix fined \$25,000 for inadequate EEO reporting for 49 of its 72 vacancies.

It's not about a fine, but the FCC's and courts' nudging a station to mend its evil ways. WMYK 92.1 Moyock NC, which claims that 92 percent of its audience resides in Virginia, wants to carry lottery advertising, legal in VA, but illegal in its state of license, NC. The U.S. Supreme Court ruled 7-2 against WMYK's carrying lottery advertising from the neighboring state. The court stated that gambling is not a constitutionally protected right and thus not a free speech issue. The lesson: stations must be aware of their responsibilities in serving not only their cities of license but the states in which they are licensed.

KLON in Long Beach isn't the only CA station trying national syndication of jazz. KJAZ 92.7 Alameda on June 30 launched the National Jazz Radio Network, going out to other stations and cable systems. After WJZE 100.3 Washington dumped that format and became WBIG-FM, displaced program director Bob Linden has taken an ad promising to "Knock on the door of every radio station" until he finds a new home for the station's format and publicizing his home phone number, (301) 283-2076.

In duopoly doings, WYAI 104.1 La Grange-Atlanta, the station not included in the original WYAY 106.7 Gainesville transaction, to be paired with Cox's WSB-FM 98.5 and AM. Broadcasting Partners, owners of WPEG 97.9 Concord NC, picking up WCKZ 101.9 Gastonia, both in the Charlotte market.

The FCC has set for hearing an application to assign the unbuilt KCVI 101.5 Blackfoot ID from Richard Bott II to Western Communications, Inc. Bott prevailed in a hearing with another applicant, saying he would move to Blackfoot and serve as fulltime manager, operating a commercial religious station, but then changed his plans when another station in the market went to a similar format. The FCC charged that there were "substantial and material questions of fact concerning whether Bott, either in the course of the comparative licensing process or in the assignment proceeding, misled or lacked candor with the Commission about his intention to move to Blackfoot and act as fulltime general manager of his proposed station."

A meeting in Duluth of AMPERS (Association of MN Public Educational Radio Stations, an anti-Minnesota Public Radio group) was last month. Delegates agreed to apply for a \$62,000 state research grant to study the feasibility of a network-like arrangement for sharing of programs. All AMPER Stations were represented, except for KUOM AMinneapolis. KUOM's status as a student station is not all that assured, John Schmitz of KUMDuluth tells me. KUOM is still a public station, and at a meeting of the university board of regents there were discussions about KUOM's fate. President Nils Hasselmo said there may be other options besides a student operation for KUOM, which has been hurt by the exodus of listeners from AM to FM, and he is expected to make a final decision by next month. AMPERS did participate with MPR in seeking an increase in state funding for public stations, which amounted to \$3000 more per this year. This makes the basic state grant, which had been \$24000, now \$27000.

Again this summer WBUR \*90.9 Boston's programming is being heard on Cape Cod by means of WKKL \*90.7 West Barnstable MA. It carries WBUR Monday through Friday 4 to 10 a.m. and 4 to 7 p.m., as well as 5 to 11 a.m. Saturday and Sunday. WCCT \*90.3 Harwich and WSDH \*91.5 Sandwich also carry WBUR's programming.

WMJX 106.7 Boston was charged by WCLB-FM 105.7 Framingham-Boston with violating the FCC interference rules when it moved its facilities, causing blanketing interference. "Blanketing interference occurs when an FM station's signal strength is of such magnitude that it causes receivers near the transmitting antenna to be partially or completely blocked from receiving other broadcast stations," the FCC

defined. The FCC found that the interference was, instead, the kind known as receiver induced third order intermodulation effect (RITOE), and not blanketing. If it had been blanketing, the FCC said other stations would have been affected, and there were no complaints other than that of Fairbanks Communications, licensee of WCLB-FM. Lacking any complaints from listeners, the FCC concluded that the Fairbanks complaint was without merit.

The FCC affirmed the grant of \*90.5 to Rockford IL, now in use by Northern IL U. as WNIJ, and threw out a mutually exclusive application by Open Media Corp. for Chicago IL, saying its arguments were merely a restatement of what had been said earlier. Open Media's tower must have been planned for a spot where no interference would occur to WMBI-FM's \*90.1 Addison IL facility.

WWUS 104.7 Big Pine Key FL asked the FCC for full Class C protection and to avoid downgrading to a C1, charging that it could not construct a tower of enough height in its area because of FAA and other restrictions. Furthermore, it wanted 620,000 watts effective radiated power, instead of the current 100 kw maximum, at its 135 meters altitude, so that it would provide Class C-type coverage at a lower height. The FCC said it has historically refused to authorize excessive power in order to compensate for insufficient antenna heights, and urged WWUS to consider a directional antenna. The station's 34 dBu "interfering" contour would have fit into the Commission's scheme, but that its 60 dBu coverage (1 millivolt/meter) would extend 17 km less than that of a full Class C station, and that it is an "inefficient utilization of spectrum" to permit the station to such power with such poor resulting coverage. It also noted that such extremely high power at a relatively low antenna height "would greatly increase the risk of blanketing interference."

Shreveport LA 102.9 may not be a reality for a while. The FCC has remanded to a judge the proceeding involving four mutually exclusive applicants. One of them, NTW, Inc., had a principal die, Pete Harris, and now NTW wants to substitute his wife. FCC hearings can take so long that people die off.

"Communications News" had a story about a computer hacker who managed to get into the phone lines of three Los Angeles FM stations to win a luxury car, a trip to HI and more than \$20,000 in prizes for promotional call-in contests. Meet Kevin Poulsen, also known as "Dark Dante." "Poulsen will 'get his date in court,'" but this is seen as just a "drop in the bucket" compared to other, more serious computer crimes. The stations are not named, but you could probably guess which might be the affected stations.

The Spring, 1993 RADAR® Report reflects radio's stability in national usage. Surveying people 12 and over, the RADAR report found FM maintaining 78 percent of the total radio audience. RADAR studies are sponsored jointly by the ABC, American Urban, CBS, Unistar and Westwood One radio networks and major advertisers and agencies.

FM station totals from the FCC: 4895 commercial, 1625 educational, 2014 translators and boosters.

Invitation to bid: KSLH \*91.5 St. Louis MO, 12.5 kw, 368 feet, upgradable to full class C (has CP for 100000 h.v; 152 m), monophonic. "The St. Louis Board of Education is selling its noncommercial FM radio station. . . includ[ing] the broadcast license and transmission equipment. It will be necessary for the purchaser to establish new operating premises. Bids starting at a minimum of \$250,000 are to be submitted by July 30 to: Gary Stevens, Gary Stevens & Co., 49 Locust Ave., Ste. 107, New Canaan CT 06840; (203) 966-6465." [Ad seen in "Religious Broadcasting" magazine.]

Which leads to "From the Classifieds": Modulation Sciences SCA generator excel. cond. \$2200, Roy Swafford, PO Box 2501, Springfield

MO 65801; (417) 883-5488. "He's not getting out of the SCS business; this is an extra one he has."

Searching for qualified air talent: "The equipping of the Holy Spirit for the ministry of Christian broadcasting is what we will be looking for in your spiritual and professional resume and in listening to your tape." 50000-watt facility serving southeast MN and northern IA [KJLY 104.5]. Send requested information to Minnesota Christian Broadcasting, Inc., PO Box 72, Blue Earth MN 56013. Attn.: Matthew Dorfner; no EOE mention in ad.

Wanted to buy any FM 3 kw transmitter needing repair OK. R. Bell, WRVB, 4314 Cherry Ct., Evansville IN 47714; (812) 479-3377.

Marti SCG-10 67 kHz SCS generator, etc. plus receiver for sale, D. Sorenson, SBC, 604 N. Kiwanis, Sioux Falls SD 57104.

Lorenzo Milam has copies of three of his books, SEX and BROADCASTING, THE RADIO PAPERS and THE PETITION AGAINST GOD. Buy 'em singly or in bulk. "What a great premium idea!" Mho & Mho, PO Box 33135, San Diego CA 92163.

Non-comm educ. FM needs any equip. as tax deductible donation. B. Tyson, WSSD \*88.1 monophonic, 11026 S. Wentworth Ave., Chicago IL 60628; (312) 928-8800.

A new adult contemporary commercial Christian radio station is soon to come on the scene, covering a large portion of N.W. MN! Looking for experienced morning talent! Call KKCC-FM [107.1] Radio and ask for Phil, (218) 435-1919.

Growing two-station company has true career opportunity! If you have drive and integrity with a desire to move into management through sales, send resume to Magnum Radio, Inc., [WBOG 96.1] 1021 N. Superior Ave., Tomah WI 54660.

## DX Doings—An Occasional Feature

From a location in Queens, a DXer says "DX hasn't been very good this year; nothing farther than DE, until June 24 at 7 p.m. when I heard WYFO \*91.9 a g station in Lakeland FL. . . Also got a GA station on 88.1 with TT, 67 [WJSP-FM Warm Springs]." Some skip also heard in NW Indiana, and here in MN the band has been quiet except for several outbreaks of skip in July. TX heard July 1, 6 and 8, mostly in the evening. I enjoyed KNON \*89.3 Dallas' spoof on "Christmas in July" on the program, "From the Book," underwritten by the Half Price Bookstores. Other states heard the night of July 8: NM and AZ. An Omaha reporter says "DX has been great. I should say E-skip has been great. May 31-June 30 had 16 days with Es at 88 mhz and above. I hit 1000 FM stations heard in June after three years," and this enthusiastic person is only 17 years old! As I type this I'm listening to a little monophonic pirate station about 12 km away, receivable only with a large outside antenna at that distance. I often check TV channels 2 and 3 for skip reception to see if there are horizontal lines disturbing the pictures from nearby stations; if so, it is possible for FM skip to occur, starting at 88.1 mhz and possibly working its way up the entire band.

## FM FORUM

### CONTRIBUTIONS FROM READERS

Mark Humphrey: "After waiting three years, Temple finally received a construction permit for 91.3 in Ocean City NJ. If their 1993 PTFP funding request is successful, construction will begin this fall. A two-hop microwave system will link the WRTI studios with the Ocean City transmitter site, which will be co-located with WBSS in Corbin City NJ. The WNJS-FM-TV tower in Waterford

Works will serve as the microwave repeater site. This will enable Temple to send separate programming to Ocean City part of the time. The WRTQ call letters will be assigned to the Ocean City station, now that the original 'WRTQ' CP for 88.1 in Harrisburg has been transferred to the University of Pennsylvania (it will become a repeater for WXPB Philadelphia)." Mark has left WRTI and is director of engineering at WPLY, "Y-100," Media-Philadelphia.

Robin Shelton sent copies of a discussion of my radios' and electronics services in "Prodigy" computer bulletin board. It was Mark Humphrey who answered an inquiry with my phone number and address.

On April 7 a bomb threat was received at the building housing WYNY 103.5 NY. The entire building was evacuated from 11:30 to 12:30 p.m., with the NY Post saying, "WYNY staffers had only moments to put in a pre-recorded tape which lasted an hour, leaving a half hour of blank air time." In Philly, John DeBella, whose audience on WMMR 93.3 was surpassed in the morning by Howard Stern on WYSP 94.1, has made the move to afternoons.

Reporting on an upcoming expansion at WPSU \*91.1 State College PA is Ernest P. Maletto. WPSU plans a transmitter move to Lamont, a relay in Kane, and a translator near Altoona, plus a second station at State College which would be student-operated.

Here's background on the haircut story reported above. KSOL Morning people Mancow Muller and Chewy Gomez concocted the bit, but were suspended for a prank involving Mancow's getting a haircut on the San Francisco Bay Bridge. The haircut, which parodied Bill Clinton's L.A. airport caper, tied up bridge traffic four hours. The station claims it had no prior knowledge of the affair, and the station van was immediately impounded by the D.A.'s office.

The National Association of Broadcasters has come out against a waiver request by Satellite CD Radio for a satellite DAB transmission facility. It has asked the full FCC to take up the matter, rather than FCC staff. The NAB has long spoken for only terrestrial broadcasting, FM or DAB, not satellite.

"FM Gold" is the copyrighted station listing service for people playing their radios in or near airports. It's targeted at folks who rent cars at airports. "As very frequent airline travelers we have been looking for a convenient reference book or program that would provide us with

information on FM radio stations we could listen to, as we drove away from the many airports where we have landed."

this might come close. It's 170 pages of maps and station information by frequency drilled for use in a binder, and edited by

A sample screen of FM Gold database

The information is in a database requiring an IBM type computer to extract. Prices range from \$10 for a simple program to \$50 for those serving the travel industry. Al Hastbacka is the president, and you can get more information by calling (703) 281-9699 or writing Chatham Research, PO Box 439, Oakton VA 22124. I believe their demo disc is free. I have a couple but our second hand IBM compatible computer is down while the keyboard is repaired or replaced. Al even did one for the Duluth MN airport near me!

Still no new "FM Atlas," but I'm slowly making progress. New maps of TX, Mexico, ID, MT, WY, WI and most of CA are in the works. I don't know what to do with Puerto Rico, now occupying half a page by itself. Any suggestions? And nobody's offered to go through the list of Family Radio translators to compare what that list shows with my FM Atlas. There may not be an August FMedia! if I am close to the deadline and need extra time to get the new book out. The book will probably have 208 pages, along with a higher selling price.

"WWRB" (formerly "WBLZ") continues to broadcast in Cloquet MN, heard well throughout the town most of the time on 107.7 now that school is out. The owner of Miller Transmitters is soon moving to Mankato, and will probably take along his broadcast equipment. His station sometimes rebroadcasts other FM stations in stereo and with SCS, or plays tapes monophonically, mostly urban music.

While I'm plugging things, the National Radio Club's AM Station Map Book is ready. Some people have asked about an AM station version of the FM Atlas, and

the counties from which FM and AM stations broadcast. Very well organized, and only \$8.95 per copy from PO Box 164.

An offended listener to NPR's "All Things Considered" can't get sympathy from the FCC or the courts, according to information forwarded by Alex Nardacci. On Feb. 28, 1989, NPR broadcast a foul-mouthed interview featuring cursing by John Gotti. Peter Branton of Lookout Mountain TN was offended by the broadcast and filed a complaint with the mass media bureau of the FCC. The bureau took no action on the complaint, saying the tape was part of a "bona fide news story." Branton got nowhere with the U.S. DC Court of Appeals. The court said for Branton to have "standing," he'd have to show he was injured by NPR's conduct and that the relief he sought—the FCC taking action against NPR—would redress that injury. Branton's attorney, Ronald D. Maines, a communications lawyer, said "He just felt Gotti's language was inappropriate to be broadcast at 6 o'clock in the evening. It was pretty graphic." The decision by the court focused on procedure—whether Branton could challenge the FCC decision—rather than on the indecency rules.

From the funnies: Archie is listening to radio in the garage. "Achy Breaky Heart" ends, then "the all-new FM-104 rock'n'roll," and then "classic 104" with Mozart. "All talk 104," then "oldies 104." Jughead comes in and asks, "What are you listening to?" Archie: "Hard to say—I can't keep up with the format changes." The radio: "We will join the Howard Stern Show now in progress."

Until another 1½-2 months,

*Barney J. Sherry*

- TX Belton KOOC 106.3 rm, "Mix" (from "Double O Kountry," LMA continues with KOOV 103.1 Copperas Cove)
- TX Del Rio KTDR 1, "CHR in the drives, Rush in middays and Tejano nights"
- TX Denison KTCY 104.9 rm, had been simulcasting KDSQ 101.7 Denison
- TX Diboll KAFX-FM 95.5 m
- TX Seguin KSMG 105.3 r, "gold-based AC"
- TX Woodville KVLL-FM 94.7 k. Simulcasting

- AM station temporarily in mono, but "we are getting very close to the official change to 'Lakes Country V 94.7.'" It will operate from 5:30 a.m. to midnight.
- UT Ogden KKBE 95.5 gr
- UT Price KPRQ 100.9 o
- UT Smithfield KVEZ 103.9 kr
- VT Waterbury WGLY 103.3 gr
- WA Mercer Island KMIH \*104.5 p, modern rock
- WA Prosser KZXR 101.7 r
- WA Seattle KUBE 93.3 r, drops dance/urban
- KLTX 95.7 rj, soft jazz evenings, still "K-Lite" (strict) [dropped dance/urban
- KPLZ 101.5 rs, now that KUBE 93.3 has/
- WI Adams WDKM 106.1 k, to ID with Friendship, expected on by Sept. 1, "although I really don't think it will be"
- WI Platteville WKPL 107.1 k, "K-107"
- WI Sheboygan WWJR 93.7 k, uses calls, "JR 93.7, WWJR." "It doesn't cover as much as when it was 97.7..."
- WI Tomah WZFR 94.5 rm, "The Zephyr." Back to its previous format.
- WY Sheridan KWYO-FM 96.5 o
- BC Victoria CFMS 98.5 m. "Now that they and CHQM-FM (103.5) are both boring soft adult-contemporary, that leaves CKSR [Abbotsford] 104.9 as the only b station in southwest B.C." [and '80s
- PQ Quebec CJMF 93.3 b; was rock in the '70s/
- PQ Quebec CHOI 98.1 rp, "le son solide comme le rock," or "the sound hard like rock." It started as CHRC-FM in the '40s and for the next 40 years was classical, then "it changed to British rock, and after that relaxing music."

**On Air and DX Ready (Selected)**

- AK Chevak KCUK \*88.1, "mostly relaying KDLG AM 670 from Dillingham, similar to KUHB FM at Saint Paul island—but they do some limited, local broadcasts for Chevak."
- CO Telluride KOTO \*91.7, struck by lightning July 12, now at only 10 watts instead of their full Class A
- FL Crystal River WKTK 98.5, but may lower power temporarily as it replaces a damaged antenna and top section of its tower after a small plane clipped a guy wire and caused the deaths of all five in the plane.
- ME Blue Hill WERU \*89.9, but at reduced power after lightning hit, running about 1000 h,v (instead of 15200 h,v)
- NE Lincoln KEZG "EZ 107" ratings are "down," while those of KFGE, "Froggy 105.3," are up. KFGE is in a square brick building painted white with a red, elaborate tube-like lighted canopy leading to the front entrance. "You'll have to see it to believe it!" Still licensed to Lincoln is KYNN-FM 101.9, with its tower remaining at Eagle River NE, but which has moved its studio to Omaha. Moving "hasn't done them any good."
- NY Glens Falls WYLR 95.9 and WWSC AM seek federal bankruptcy protection, but still on the air. Ad revenues were \$753,392 in 1990, down to an estimated \$484,000 in 1992. This station joins several others in the market seeking bankruptcy protection, "including such notables as WGY (AM) and WQBK-FM" 103.9 and AM.
- TX Austin KMFA \*89.5 now 65000 h,v (from 6500 w). "Our goal was to regain some coverage area lost to interference from

short-spaced stations; improve signal quality in our existing coverage area; and to protect our existing coverage area from further interference by stations which would have been allowed to 'drop in' under current FCC rules." On 6 a.m. to 1 a.m. daily.

P.O. Box 459 Woodville, Texas 75379

WI Platteville WSUP \*90.5 still on, but heard signing off at 2 p.m. on a Tuesday. "Strange time!"  
 WI Prairie du Chien WPRE-FM 94.3, still mono, but on with C3 facilities and notable improvement in its signal.  
 WI Sun Prairie WMAD-FM 92.1 back on, \$, p, "says calls often, plus 'the cutting edge of rock'."  
 ON Huntsville CBCO- \*94.3  
 ON Orillia CBCO \*91.5 testing; still on \*105.9 until tests complete  
 ON Penetanguishene CBCM \*107.5, "but seems to be lower power"  
 PQ La Pocatiere CHOX 97.5  
 PQ Village des Hurons CIHW 100.3, Indian Community Radio

**Off Air—or Not Yet On**

AK Anchorage KRUA \*88.1, KATB \*89.3, both evicted from subdivision; tower dismantled. KRUA reassembling antenna in Eagle River area, with signal to be cut off to South Anchorage because of terrain shielding. KATB moving to Bear Valley in South Anchorage. Both stations expected back on shortly. [return Oct. 1]

**SCS Services, 67, 76.87, 92 kHz**  
*Symbols are as in the "FM Atlas"*

FL Clearwater WMTX-FM 95.7 tS, 67 kHz, talk-back to the studio. "You hear the station announcers when they are not on the air, and sometimes they're swearing. It's obviously a private service."  
 MI Grand Rapids WBLU-FM \*88.9—the Sight Seer returns to its 67 kHz. Director Kenneth Van Prooyen, Sr., says the program is midway through a drive to raise \$44,000 for equipment, including the possibility of expanding to additional stations. The service currently has 240 blind and otherwise print handicapped subscribers and a waiting list of 175. For more information call Van Prooyan at (616) 363-8838.  
 MI Houghton WGGL \*91.1 no SCS, open carrier only, 67. Had MN Talking Book for the Blind, which still wants to be on WGGL, but it's been inactive there for several months.  
 MN Detroit Lakes KKDL 95.1 tM,R  
 MO St. Louis KETC channel \*9 has DVS, descriptive video service for the blind on its 78.67 kHz SAP  
 NE Omaha—once the hotbed of SCS receiver building—now has none, with McMartin, SMC Technologies gone. Erko Technologies, Muziplex, selling crystals only, and headed by one-time McMartin executive Larry Martin. Also gone on the national scene are Johnson Electronics in FL and Sarkes Tarzian/Norver. Norver may still be selling a few, but its owner told me he's "well past retirement age." This leaves Compol and Dayton Radio as the sole SCS manufacturers in the U.S., as well as importers—notably Denis Van, SCA Radio Labs, in El Monte CA. SCS Radio Technology in MO continues to modify FM radios and offers adapter boards pre-wired for 67 and 92

kHz. Changing crystals in fixed tuned receivers costs "too much"; this is necessary when the main station changes services or when taking a radio into an area served by a different station or translator.  
 NY New York WMXV 105.1 tG, 92 (not tC), LDS/KSL AM; 67 is still tZ  
 ND Fargo WDAY-FM 93.7 no SCS (had tM); see MN Detroit Lakes (above)  
 PA Philadelphia WRTI \*90.1 had Greek, 67, "and he copied us, calling it Hellenic American Broadcasting, but he went broke. It's now Haitian. I think there is music on the 92 [actually it is tX, 92—L.e.]. Antena FM is on the 67 of WQHT 97.1 New York"  
 WHYY \*90.9 tE, 92, Hellenic Broadcasting Service (retains tT, 67)  
 SC Greenville (licensed Asheville NC) WHNS 21, a Fox affiliate, is to have the NC Radio Reading service on its SAP. "I have ordered the SAP generator. A company in Long Island City NY is marketing the Freddy 3 for \$45. It picks up the SAP with a wand mounted near or in the set. A technician should do the mounting in the set." Call Recoton Co. at (800) 742-3438 for more information.  
 TX Dallas KNON \*89.3 tE, E; 67 is Korean; 92,

Iranian. "We have leased our subcarriers to cultural organizations, interested in preserving the music of their native lands here in America." Station is directional, null toward Fort Worth, with the 1 mv/m signal coming only to the city limits of Fort Worth.  
 VA Charlottesville VVTV \*89.3 tT, 67, relaying WVTF 89.1 Roanoke's SCS.  
 VICTORIA Melbourne 3RRR-FM 102.7 tB, 92, relay of BBC World Service  
 3MBS-FM 103.5 tM, 67; tR, 92  
 3PBS-FM 106.7 tR, 67  
 "I'll pay anything for your current edition. I need to know what stations have available subcarriers."  
 "I received in good order the Sangean ATS 803A receiver and the Elf-II kit which I built quite readily. I have to report, however, that I am most disappointed by the results... Although reception of the FM stations' main programs is clear and can be received in stereo with full quieting, the subcarrier services are so noisy and 'hissy' that they cannot be listened to."  
 "You may want to clarify the documentation on your ship with each Superadio III. It might help other folks like me that were confused about the 67-92 kHz thing. I don't know how I got confused but I did! I honestly thought there would only be activity between 67 mhz and 92 mhz I should have realized the error in that logic, since commercial FM doesn't go down to 67 mhz!"  
 "Received radio today 7-21, and am sorry to tell you it will not work out for us—it is extremely weak, so there is not much point in having a radio that can barely pick up a 100 kw station 30 miles away."  
 "Thanks for fixing FM subcarriers, it works very good now."  
 "We appreciate your hard work!!"  
 "It was a nice surprise to get a July FMedia! when I wasn't expecting one 'til the end of summer. Can you fit Puerto Rico on the New Brunswick-Newfound and page?"  
 "I just bought the Elf-II adapter kit... It works fine." [than a big company, "  
 "I like the idea of dealing with one guy rather/

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC (at or near top of hour)*

- AR Benton KMKV 106.7 The Maverick, co-owned with KSSN 95.7 Little Rock, but it's a younger country format than KSSN has. It chose that format to compete better with KDDK 100.3 Jacksonville-Little Rock, "K-Duck 100." "KDDK, a one-year-old country station that is attracting a young audience, is giving KSSN the stiffest country competition it has ever seen." There are now eight country stations in central AR.
- FL Fort Myers-Naples WJYO \*91.5 The Joy FM
- GA Atlanta WPCB 94.9 no nonID, saying "Peach 94.9, WPCB" ["The Q"]
- GA Augusta WBBQ-FM 104.3 Q-104 (from/ GA Midway WGCQ 98.3 Oldies 98.3
- GA Swainsboro WJAT-FM 98.1 Kiss FM (and "Digital 98.1" as well as "Adult Rock Kiss FM")
- GA Valdosta WQPV 95.7 FM-96 (losing "Power 96)," and "only IDs as little as required; yielding the expectation on my part of a possible pending call change"
- IL Pontiac WJEZ 93.7 Lite Hits 93.7
- IN Decatur WQHK-FM 105.1 K-105
- LA Benton-Shreveport KLKL 92.1 Oldies 92 (from "Oldies 92.1 FM"). "It does not use call letters" [?].

- OR Klamath Falls KLAD 92.5 K-Lad Country
- PA Freeland WQEQ 103.1 Oldies 103 (from "QE 103")
- SC Seneca WBFM 98.1 Great 98, and operating only from 7 a.m. to 11:10 p.m., "in case anyone cares. It helped me DX other stuff on that channel."
- TN Chattanooga WDEF-FM 92.3 uses calls, dropping "Easy 92 FM"
- TX Fort Worth KTCU \*88.7 College 88.7 or FM 88.7 (strict; calls used only once per hour). Station manager Constantino Bernardez retired in June after 16 years; the new manager is Andrew Haskett, a professor in radio-TV film at TCU. "He was chosen from a field of 45 applicants. . . Our format will remain rock and jazz, with some classical."
- UT Provo KBYU \*89.1 Classical 89. "They are occasionally relayed by the 92 SCA of WMXV 105.1 NYC, which has the LDSer-service."
- WA Richland KEGX 106.5 Eagle 106.5 (from "Eagle 106")
- WI Brillion WEZR 107.5 Easier 107.5, "has big band on Saturday evening"
- WI Evansville WMBJ 105.9 uses calls, no

"J-106," saying "Classic Hits 106" with its calls

- WI Manitowoc WLTU 92.1 Oldies 92 FM
- WI New London WOZZ 93.5 Classic Hits 93 (from "Z-93")
- WI West Salem WQJY 100.1 K-Rock (from "Joy 100 FM"), simulcast with WKBH 105.5 Trempealeau, which IDs with La Crosse (no longer Holmen-Winona MN).

**Multi-City IDs in Use**

- OR The Dalles KMCQ 104.5 adds Hood River
- TX Jefferson KJTX 104.5 with Texarkana
- "I may order your monthly issues later, but I am retired and not very close to the industry and am really only interested in information about this local area. I am very interested in the next FM Atlas. Please advise me when it's ready."
- "Not personally affected by the flood, but it has made for a lot of interesting radio, both AM-FM and scanner."
- "I'm looking forward to your 15th FM Atlas, and I wish you good luck with it."

**AM Happenings Most Likely Caused by FM**

- AL Evergreen WIJK 1470 struck by lightning and "forced off the air"
- AL Montgomery WZTN 1000 FCC deletes license and call letters "for failure to prosecute"
- AZ Nogales KFBR 1340—FCC dismisses renewal application, deletes call letters
- AR England KLRA 1530 off the air
- AR Jacksonville KOKY 1500 off the air
- AR North Little Rock KAPL 1380 off the air; these three listed in the "Arkansas Gazette"
- AR Springdale KBRS 1340 FCC revokes license "for being off the air without Commission authority for an extended period of time."
- CA San Francisco KFRC 610, once a proud top 40 and later an oldies station, now merely relays KFRC-FM 99.7.
- CO Aspen KRKE 1260 silent
- DC—The NAB's AMAX standard for AM radios, specifying a range up to 7500 kHz, noise blanking and adjustable bandwidth, has met with indifference from manufacturers, except for Delco and Denon's TU-680 NAB "super tuner." Now the standards are being relaxed to permit certain portables, such as the G-E 7-2887A, Superadio III, to meet them. The NAB itself has been accused of not promoting AMAX. Manufacturers are loath to promote a technology which boosts AM, due to the perception held by the public that AM is inferior.
- FL Lehigh Acres WWCL 1440, had been classical, now Spanish, "La Caliente"
- GA Athens WXAG 1470 silent.
- GA Thomasville WSTT 730 fined \$17,500 for signing off after a fire in 1980 and not notifying the FCC within 30 days, and for not maintaining the public records file while the station was off.
- GA Valdosta WFVR 910, had been silent, returns with travel info in conjunction with the "Florida Welcome Center"
- KY Shepherdsville WBUL 1470 silent
- LA Baton Rouge WTKL 1260 silent
- LA Bogalusa KBOX 920 "is cutting its hours to daytime only; FM will still operate nights, now at 92.9"
- LA Farmville KTDL 1470 "silenced"
- LA Monroe KLIC 1230, KMLB 1440 silent
- LA New Roads KCLF 1500 silent
- LA Oakdale KICR 900 back on with business news
- LA Washington KNEK 1190 silent, but "its FM is going strong on 104.7" [sold]
- LA West Monroe KMBS 1310 silent, but "being/ MA Boston WEEI 590 adds Don Imus (after he arises from his hospital sick bed), syndicated from WFAN AM New York, replacing morning local live programming with Tom Doyle and Craig Mustard. They're paying \$200,000 to bring Imus in, which is still cheap considering the price of paying top local personalities.
- WMEX 1150 now plays French Creole noon to 6

a.m. weekdays; noon to midnight weekends. "The rest of the time V:MEX will revert to airing the music heard on WMJX" 106.7.

- WSSH 1510 silent
- MA Great Barrington WSBS 860 ends its broadcast day at 7 p.m., "ending about five years of nighttime broadcasting at reduced power" of 3.9 watts. "It was not economically feasible to continue nighttime broadcasts to such a limited audience," with some reduction expected in the parttime staff at the station.
- MS Brookhaven WJMB 1340 silent
- MO Brookfield KGNG 1470 silent. Was to have returned to the air, but "no date was given."
- NJ Newark WNJR 1430 carries Radyo Pinoy 7-8 p.m. local time, from the 92 kHz of WBGO \*88.3. The WNJR program will include a 20-minute program of news, commentaries and the latest hits from the Philippines "and frequent plugs for the \$65 SCA radio sets." The show is expected to be picked up by other stations owned by John Douglas, Douglas Broadcasting, which includes FM stations.
- NY New York WOR 710 retires its helicopter, leaving WCBS 880 AM the only station with its own traffic helicopter; this after 35 years. It's "a reflection of hard economic times" affecting WOR and AM radio. Pilot-broadcaster George Meade will retire to the [safer?] indoor studios of WOR to do weather reports during the morning show.
- WZRC 1480, owned by Infinity, now programmed by Radio Korea New York at 44 E. 32nd St., apparently unrelated to the Korean SC Services, KBC on WOXR 96.3's 67 and Korean Christian Broadcasting on WRKS 98.7's 92 and W:NCN 104.3's 67. Those services "are probably not too thrilled about this."
- NY Schenectady WGY 810 releases long-time talk show host Bob Cudmore (pictured) from his

6 p.m. to 9 p.m. time slot in favor of syndicated "Smart Money with the Dolans" from WOR AM New York. Economics said not to have anything to do with the firing, but it's well known that WGY, formerly owned by G-E, is in bankruptcy. Cudmore's union, the AFTRA, is objecting to the termination of his contract; he is one of two shop stewards of the union at WGY. Another person leaving is reporter Monica Mahaffey, taking a job at WNYT (channel 13). She "left for various reasons concerning the direction of the station." WGY has been auctioned off to Dame Media Consultants of Harrisburg PA for \$5.5 million, subject to FCC approval. Present owners paid \$11 million for the station (along with WGY-FM 99.5) in 1985; the AM is said to be the nation's oldest commercial radio station. Cudmore hopes the new owners will take him back.

OR Eugene KEED 1600 off the air since an arsonist's fire June 13, and the city has refused to issue a building permit for the transmitter which is in a city park. It was part of a duopoly with KKXO 1450.

VA Bassett WODY 900 silent

WA Bellingham KPUG 1170 now all news. "This onetime top-40 rocker has recently tried AC but shuffled that onto its FM, KAFE 104.3. They also tried oldies, but gave up on that as well."

WA Seattle KKFV 1250, "K-Fox," silent, but has been sold. Its demise leaves black-urban to AMers KRIZ-KZIZ. "It's amazing that Seattle-Tacoma has no fulltime FM urban." New owners rumored to be putting on an all-children's format.

BC Vancouver CKST 1040 "after losing out on an FM licence, has fired veteran progressive rock programmer Dave Marsden, with a sale of the station finalized. Too bad. They certainly don't deserve one of the last two available FM frequencies in Vancouver, but they certainly deserve a spot of some sort on the local radio dial. With them dies one more alternative to the soft rock, hard rock, classic rock and in-between rock that is dominating southwest B.C. radio. This and the demise of the b format stations reduces the variety and diversity in local radio which is contradictory to the CRTC mandate and policy of format diversification within a given market area." Marsden, before being fired, said: "People want to hear music on FM. Getting people to listen to music on AM is like getting people back to watching black-and-white television after they've been watching color."

MARSDEN

ON Ottawa CJSB 540 would move to 106.9 FM with 84000 h.y if CRTC approves its application. This would overcome "severe technical problems."

ON Windsor CKLW 800 now news in the morning, sports-talk all other times. Its nonDds include "Windsor's news, sports and weather station," "800 AM," or more rarely "Windsor 800 AM," and it broadcasts Blue Jays baseball. PQ Port-Cartier CIPC 710 would switch to 99.1 FM at 7,400 watts if CRTC approves AM owners who can't sell or even donate their stations can turn to the People's Network, a nonprofit group, which accepts towers, transmitters or complete stations for a tax write-off. Contact Wyatt Cox or Chuck Harder at (904) 397-2000.

"As always I enjoy the comments and editorials contained within FMEDIA! Keep up the great publication!"

**FM Rulemakings Proposed**

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AK Anchorage 103.1C1 for C2, KANC counterproposal
- AK Houston 92.1A, Sept. 24, Oct. 12
- AK Seward 105.9A for 103.1A, with Anchorage
- AZ Arizona City 106.5A for 106.3A, KONZ, Sept. 17, Oct. 4
- CA Esparto 97.9A, Sept. 9, 24
- CA Los Molinos 101.7A, Sept. 9, 24
- CA Point Arena 102.3B1, Sept. 9, 24
- FL Clewiston 99.5A for 106.3A, WAFC-FM, with Indiantown
- FL Fort Myers Villas 102.9C2 for 106.3A, WSUW with Indiantown
- FL Indian River Shores 97.1A, Sept. 27, Oct. 12
- FL Indiantown 103.1C1 for C2, WOKC-FM counterproposal [with Indiantown]
- FL Jupiter 106.3C3 for 105.5A, WADY/
- FL Marathon 105.5C2 for 106.3A, WAWK counterproposal
- FL Micco 95.9C3, Sept. 9, 24
- FL Naples 106.3C3 for 103.1C3, WSGL, with Indiantown
- FL Panacea 100.5A, Sept. 27, Oct. 12
- GA Donalsonville 107.5A, Sept. 9, 24
- ID Lewiston 105.1A, Sept. 3, 20
- KY Whitley City 98.3A for 105.9A, deleted station WHAY, with Colonial Heights TN
- ME Islesboro 105.5B1, Sept. 9, 24
- ME Westbrook 100.9B1 for A, WYNZ-FM, Sept. 3, 20 [WOMR, Sept. 13, 28]
- MA Provincetown \*92.1A for 91.9A/
- MI Tawas City 106.1A for 107.3A, WHST, Sept. 27, Oct. 12
- MN Hermantown 92.1A, Sept. 13, 28. In announcing the proposal, the FCC didn't give me any credit for operating translator station W280CT there.
- MN Slayton 103.1C2 for A, K, new CP, Sept. 27, Oct. 12 [Oct. 12]
- MN Staples 94.7C3 for A, KSKK, Sept. 24,/
- MO Ashland 106.1C1 for C2, KYUA counterproposal
- MO Farmington 99.5C3, Sept. 24, Oct. 12
- MO Half Way 99.1A for 93.1A, KYOO-FM, with

- Ozark
- MO Moberly 97.3C3, Sept. 27, Oct. 12
- MO Monroe City 107.5A for 106.3A, KDAM, with Ashland
- MO Osage Beach—ordered KYLC to show cause why its license should not be modified for 100.9A instead of 93.5A.
- MO Ozark 92.9C2 for A, KZPF, Sept. 3, 20
- MO Rolle 103.1C3 for 106.3A, QQMX (moving from 94.3A) with Ashland
- NY Grand Gorge 105.3A, Sept. 20, Oct. 5
- NC Ocracoke 92.7C1 for 92.9A, new CP, Sept. 17, Oct. 4
- OR Keno 98.3A, Sept. 17, Oct. 4
- SD Madison 105.5A for 103.1A, KJAM-FM, with Slayton MN
- TN Colonial Heights 95.9C3 (or C2 at different coordinates) for 105.9A, WLJQ counterproposal [Hope Radio]
- TN Monterey 104.7A counterproposal by New/
- TN Morristown 94.1A for 95.9A, WMXX, with Colonial Heights [Colonial Heights]
- TN Tazewell 105.9A for 94.1A, WCTU, with/
- WA Chelan 95.5A for 93.5A, KOZI-FM, with East Wenatchee [Oct. 12]
- WA East Wenatchee add 93.7C2, Sept. 24,/
- WA Ephrata delete 93.9C2, with East Wenatchee
- WA Clarkston 102.9A, Sept. 3, 20
- WV Princeton WA EY-FM 95.9A at new coordinates to permit the Colonial Heights TN upgrade [17, Oct. 4]
- WV Rainelle 95.3B1 for A, WRRL-FM, Sept./
- WI Menomonee 104.9A, Sept. 17, Oct. 4
- WI Stevens Point 104.9A for 104.9C3 at Marathon; WMGU wants to remain in Stevens Point; no dates given.

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AL Valley 95.3A from 98.1A, WRLD-FM
- AR Bentonville 95.7A, Sept. 11, Oct. 12
- 98.3C2 for C3, KOLZ
- AR Mountain Home 97.9C2 for 98.3A, KTLO-FM [F-M downgrade]
- AR Yellville 101.7A for 97.7C2, KCTT/
- CA Corning 100.7C1 for B, KCEZ
- CA Crescent North 97.9C2 for C3, KPOD-FM
- CO Glenwood Springs 92.7A, Sept. 11-Oct. 12
- GA Eatonton 97.7C3 from 97.7A Sparta, WMGZ
- GA Griffin 97.5C3 from 97.7A, WQUL
- GA Hogansville 98.1C3 from 97.5A, WEIZ
- GA Thomaston 101.1A from 95.3A, WTGA-FM
- LA Berwick, Opelousas—denied petition to amend FM table for these towns.
- MI Norway 94.3C3 for A, WZNL
- MN Rushford 99.3C3 for A, KWNO-FM
- MS Greenwood 104.3C2 for C3, WGNL
- NM Espanola 92.9C3 for 102.3C3, KIOT
- NM Los Lunas 102.5C for C2, KOYT
- TN Paris 94.1C3 for A, WMUF-FM
- TX Howe 95.3C3 for A, KHYI
- TX Temple 101.7C3 for A, old CP, but no call letters assigned [C3 for 104.3A]
- VT Hartford—denied WGLV-FM bid for 104.3/

**FCC Proposes Extending Station Holding Period to Three Years After Hearing**

The FCC has proposed to require successful applicants in station hearings operate their stations for at least three years before they would be eligible to sell them.

The Commission reminded that for many years previously it had a "three year anti-trafficking" rule, but during the Reagan era the period was reduced to one year.

**FCC Hits Stern Employer Infinity With \$500,000 in new Fines**

Infinity Broadcasting Corporation was told by the FCC it has to pay \$500,000 in additional fines for airing indecency by one Howard Stern. Each of four stations owned by Infinity was assessed \$125,000—WXRK 92.3 New York, WYSP 94.1 Philadelphia, WJFK-FM 106.7 Manassas VA, and WJFK AM Baltimore. This followed by a day the FCC's slapping KFBI 107.5 Pahrump NV \$73,750 for airing "indecency" by Stern on nine separate occasions

from Nov. 10, 1992 to Jan. 13, 1993. The forfeiture amount imposed reflects both the fact that the violations were repeated over a substantial period and the Commission's opinion that the violations were egregious, with Infinity exhibiting a pattern of apparent misconduct involving indecent broadcasts in the past, the FCC said. However, the FCC conceded that Infinity has made efforts to avoid further infractions and that "no actionable indecency complaints have been received by the Commission against Infinity or Howard Stern material in the more six months since the last broadcast" cited in the FCC's Notice of Apparent Liability. It looks like Stern may be cleaning up his act.

The Nevada action was because Stern's shows are delayed for airing 6 a.m. to 11 a.m. and "were replete with references to sexual and excretory activities and organs," with 19 pages of transcripts given the Commission said to be "patently offensive." L.A.-based Americom Broadcasting, which owns KFBI, declared it will "vigorously fight" allegations of indecency.

In related news, an anti-Stern group, Americans for Responsible Television, is fighting the recently-announced acquisition of KRTH 101.1 Los Angeles by Infinity for \$110 million from Beasley Broadcasting. ART founder Terry Rakolta, a MI homemaker who several years ago took on Fox's *Married With Children* by targeting show sponsors, maintains that Infinity has "no intention of deviating from a program formula that includes racist, anti-Semitic, misogynistic and indecent material."

The NY Post mentioned the mounting Stern fines, but that Infinity has paid none of them, now coming to \$1.1 million, ever since the first fine in 1988 for \$6,000. "Rather than pay the fines... cash-rich Infinity has preferred to wage an expensive defense that will end up costing far more in legal fees than the company would have had to pay in fines," Jill Brooke wrote.

"But that's OK with Infinity. From the outset, President Miel Karmazin has vowed to fight for what he sees as Infinity's right to broadcast whatever it wants, with Arbitron ratings serving as the yardstick for what's acceptable."

**Small-Print Happenings and FM Industry News**

The on-again, off-again fight for WNCN 104.3 New York is on again, with the FCC dismissing a motion for deferral of procedural dates filed by Fidelio Group, Inc., one of the applicants for the facility. This is a minor victory for the licensee, GAF, and the WNCN Listeners' Guild. One outcome is the dismissing of a court appeal by Class Entertainment and Communications, Inc. (CLASS). The FCC denied GAF and CLASS' motion to dismiss the CLASS application for payment of expenses by GAF.

Speculation by "Newsday" is that WHTZ, Z-100, Newark-New York may be for sale. Its ratings and revenues are down as it celebrates its 10th anniversary, and there's speculation other local owners like Cap Cities, which already owns

WPLJ 95.5 and WABC AM, might want to buy Z-100 to complement its advertising power, or that WNEW 102.7 might want to buy it merely to "defend against the possibility that a full-blown, alternative rock station might take shape on 100.3 FM and thereby steal younger listeners from "NEW," or go all news and compete against its WINS AM. Some staff defections have been cited, but the article concludes with the expectation that the likes of Bon Jovi and Nirvana will remain on Z-100 after all, regardless of whether it is bought by another company from Shamrock, or from a third party in a convoluted swap of stations.

Here's the ultimate success story: Boy rises from announcer at small market station, winds up in Big Apple, his show is networked, and goes on to buy five radio stations for \$13.5 million. That's "Cousin" Brucie Morrow of WCBS-FM, who's shelling out that kind of dough for WPKX

**COUSIN BRUCIE**

97.9 Enfield CT, WHMP-FM 99.3 and AM Northampton MA, WYAK-FM 103.1 and AM Surfside Beach SC. They're all Class As (with WYAK-FM having a C3 CP), and the AMs are of little consequence, but Brucie's learning.

The NAB has asked the FCC to take action against state and local laws that "unreasonably" keep broadcasters from building FCC-licensed towers, and accusing local authorities of "un-licensing FCC licensed facilities."

Garrison Keillor of American Public Radio fame has announced he's changing his show's name back to the original *A Prairie Home Companion*, from the *American Radio Company of the Air*, effective with the new season beginning Oct. 2.

In CO, KBCO-FM 97.3 Boulder and KTCL 93.3 Fort Collins are trying to get upgrades, but each has filed against the other, claiming that FCC rules have been violated.

New duopolies include WYNF 94.9 Tampa going to Cox, owners of WWRM 107.3 and AM, while KLRX 97.9 Dallas goes with KTXQ 102.1 Fort Worth. KYMG 98.9 Anchorage is buying KGOT 101.3, subject to FCC approval. Comco Broadcasting already owns KIAK-FM 102.5 and AM Fairbanks, and promises no "major" changes in Anchorage. The FCC has approved the sale of WAF 99.9 and AM Charleston WV from Inki in Communications Partners to WV Radio Corp., owners of WKWS 96.1 and AM there, even though the combined audience ratings went above 25% for the four stations after the license applications were filed; it denied Bristol Broad-

casting Company's (WQBE-FM 97.5 and AM) petition to dismiss. Also approved: KKIK FM 93.7 Lubbock TX to the owners of KJTV (channel 34, a Fox affiliate), and KTIE 107.1 Bakersfield CA to Buck Owens Production Co., which already owns KUZZ 107.9 and AM-TV. New annual spectrum fees for broadcasters, which probably won't take effect until early 1994, include FM Class C, C1, C2 and B \$900, Class A, B1 and C3 \$600 and FM construction permits \$500. Noncommercial stations are exempt from such fees.

KRCY 105.9 Kingman AZ fined \$3,500, reduced from \$12,500, for broadcasting commercials for a slot machine tournament. The FCC also reduced the fine of KRTM "88.9 Temecula CA to \$3,500 from \$5,000 for broadcasting commercials. And it fined KKIS-FM 92.1 Walnut Creek CA and its AM \$25,000 for EEO violations, as well as giving it a short-term license renewal and imposed better reporting conditions "to ensure better record-keeping and to encourage more meaningful self-assessment by the stations."

In Canada, limited duration special events' stations no longer need CRTC licensing. These include Montreal's stations which appear every year during the Mariposa Jazz Festival. "It's ironic that, as the CRTC is stripping away regulations, many FM stations have responded slowly to the new opportunities of a more free enterprise programming environment," says Howard English in *Broadcast Technology*.

Pirate stations fined by the FCC include the Beverly Hills Unified School District \$8,000 for operating a radio station, most likely FM, on May 27, 1993, without a license. Stephen P. Duniher of Berkeley CA was fined \$20,000 for operating an unlicensed FM station.

The FCC has a number to answer inquiries about call letters' availability. To check the status of pending call letters' requests phone (202) 634-1513. In person visitors are asked to see Dianne Beverly in Room 230.

Chuck Gysi from flood-ravaged IA wrote in his newspaper column that listeners to WOKO 98.9 and its AM Burlington VT pitched in and sent up to four semi trucks (or as the English call them, articulated lorries) filled with donations "from residents throughout the Champlain Valley of VT and upstate NY" to namesake town Burlington IA.

Pay radio may be just another gimmick. Despite promise of 30 channels of stereo music without commercials—and ultimately perhaps 4000 such channels—there's evidence few cable subscribers are opting for the added cost of pay radio, such as Digital Music Express. In Baltimore, for example, only 1000 out of 101,000 subscribers have signed up, and the company would be "happy" to double the number to 2000. Digital Cable Radio now has 57 formats, including news and commercial channels, with prices tumbling to \$4.95 in expected 1994 promotions by Time Warner. Archer S. Taylor of Malarkey-Taylor Associates said such new technology will only be widely accepted when the price and operational simplicity match perceived benefits.

Nominated to replace interim FCC Chairman James Quello is Reed Hundt, a senior partner at the Washington DC-based Latham & Watkins law firm. It's the same environment from which came former FCC Chief Mark Fowler, so what else is news?

Just this—the FCC has initiated an inquiry to explore rules relating to the definition of acceptable aural modulation limits. By controlling modulation, for example, interference to stations on adjacent channels can be reduced. In FM, the frequency of the station varies according to the loudness of the music or voices in the programming. "All forms of modulation generate energy in 'sidebands' which surround the main carrier," the FCC pointed out. The FCC's seeking to learn how the industry can accurately set modulation limits on peak amplitude, peak duration and peak recurrence rates and the time interval over which the peaks are to be counted.

The effect of this might be to alter the blinking rate of a station's modulation monitor, or to permit a wider variety of signal processing and measuring systems.

FM totals as of July 31. Commercial stations: AM 4951, FM 4903, plus 1630 FM educational, for an FM total of 6533, all licensed and supposedly on the air.

From the classifieds: Educational FM seeks studio, remote, test equipment for donation. P. Kessler, KWSC, Wayne State College, Wayne NE 68787.

For sale ERI 3-bay Rototiller antenna (not recently taken out of sewer service?) 1 5/8" line, 92.1 mhz, \$2500, (816) 635-5959.

Sony STJ-75 FM tuner, 75/300 ohm input, new condition, \$150 or best offer; also has SCA tuners, 67 kHz for sale, L. Synder, Madera Bcstg. Inc., Box 182, Floral Park NY 11001; (718) 347-2940.

Wants to buy: Broadcast catalogs, promotional material and sales literature from the '30s-'70s, Collins, RCA, etc., G. Lee, PO Box 5786, Beverly Hills CA 90209; (310) 695-0177.

**FM AS IT WAS—OR MIGHT HAVE BEEN**

"FM Profits" is an article from *FM and Television* magazine from September, 1948, sent by Mark Humphrey. "Sorry about the poor quality of the copies, but they are third generation from a bound volume I found in the Syracuse University Engineering Library about 15 years ago. I went back to SU last year to try to locate it again, but unfortunately, most of their old volumes of *FM and TV* were lost when these periodicals were moved from the old library building to Bird [Library] a few years back. I remember seeing your signature on the signout slips in a few of them!" The article centers on the Rural Radio Network. That network and its successors (Ivy Network and CBN) "have always been intriguing to me. When I lived in Ithaca in the early '60s, my parents gave me my first FM radio as a birthday gift—I think it was my seventh birthday in 1964. It was a G-E clock radio, and they had set it up while I was asleep, so that it would wake me up to the music of WEIV, the Ivy Network station on 103.7 there. I remember the 'Weather Roundup' very well, which included several stations not part of the network, including WOSC-FM 104.7 in Fulton and WBRV (AM) in Boonville.

"Later, while a college senior, I was the contract engineer for WBIV [107.7] in Wethersfield, and once was snowed in at the transmitter for two days during a severe early April storm. Fortunately, they had stockpiled food and water in the building. While waiting for the weather to clear up so that a tow truck could pull my car out of the ditch down the hill, I thought of the undeveloped potential the station had, and hoped that I might have the chance to buy it someday. Well, the opportunity came a few years later, but long before I had the money! My college roommate Lloyd Lane, who now owns WCJW(AM) in Warsaw NY also looked at it, but couldn't quite raise the \$650,000 that CBN was asking for what was essentially a 'stick' 40 miles from Buffalo.

"However, WBIV was sold to Stereo Seven Associates, a group which included

John Bunkfeldt, the former owner of WOUR 96.9 Utica and former CE of WAER \*88.3 Syracuse, and also Steve Church, former CE of WBUF 92.9 Buffalo, WFBO 94.7 Indianapolis, WMMS 100.7 Cleveland, and now owner of Telos (which makes broadcast phone stuff). They renamed it WUWU (Woo Woo FM) and changed the format to authentic progressive rock. While waiting for a studio to be built in West Seneca, near Buffalo, they set up a makeshift control room in the transmitter building, which had to be seen (and heard) to be believed. . . *FM and TV* also published some articles about the original 'super power' WMIT 106.9 atop Mount Mitchell in NC. As I recall, it was over 300 kw and had incredible coverage, reaching most of both Carolinas. . . I visited Mt. Mitchell a couple years ago and hiked up to the transmitter site, which is still in use by the present WMIT and WNCW, the new public station licensed to Spindale NC."

The article mentions how the Rural Radio Network started in upstate NY, with FM thought to be the perfect medium to reach farms because of its static-free signal. Promotion included ads in all the weekly and daily papers of rural NY 60 days before the network went on the air. "Along with this distribution of printed material went data on FM prepared and provided by the radio manufacturers, such as Zenith's FM booklet." Programming would include home economics features for rural women, with up to two hours of general programming from each of six studios across the state.

Mobile reception for testing the FM signals included a truck sporting a collapsible 12-foot tower with a folded dipole antenna, along with trained engineers to interpret the signal strength data. A generator delivering 110 volts at 60 cycles, rated at 800 watts, was mounted separately in a trailer. Equipment was spread out on benches so that the engineers could record the data as the truck moved at 15 miles and hour, and an intercom was provided so that they could contact the driver in the cab. The RRN went all FM from the outset. This meant no telephone lines to connect its owned and operated stations. Sites had to be chosen that gave 1) maximum broadcast service areas, and 2) line-of-sight communications between adjacent stations. Thus it came about that "RRN was the first all-radio, no-line network in the world."

Antenna recommended for use by the listeners was a two-bay turnstile, which gave more gain over a single bay, and the two-bay design "flattened out laterally as is the case with a transmitting antenna. Thus the response to interference sources on the ground near the antenna is reduced substantially." An ad for the W. F. Hoisington antenna, 8, 16 or 32 elements for FM and TV, "up to 91 times power gain over

a single folded dipole," appeared. Espey Manufacturing Co. advertised its AM-FM receiver chassis: "There are millions of console sets in existence today whose owners are now aware how easy it is to install a modern AM-FM Espey chassis. This large market is growing bigger every day, as more and more owners decide that they want FM. . ." As to the title of the article, "FM Profits," I can find nothing to show how to sell advertising on FM, or reports of any FM stations reeling in the profits. FM in 1948 was still a technological novelty—one where fledgling organizations like the Rural Radio Network were committing thousands of dollars—on what would prove to be a costly gamble so early in FM's history.

#### DX Doings—An Occasional Feature

A Philadelphia area listener reported rare reception to WPRO-FM 92.3 Providence RI on tropo, as well as eastern NC, with signals following the foggy or steamy Atlantic.

Another writer, near Miami, has caught "lots of" FM skip from Central America, Mexico and the Caribbean. "Radio Puntarenas 91.9 in Costa Rica came in three times in 1993!" Radio Puntarenas is only 250 watts.

The late night of Aug. 17 and early morning of the 18th provided intense St. Louis MO-area reception to northern MN. I picked up KCLC \*89.1 St. Charles MO in stereo and tried for KSLH \*91.5 St. Louis, the school board station which is for sale. I heard nothing on its frequency, so I suspect it is either off the air or on with very limited hours. With a special FM phasing box built by IL's Andy Bolin, and connecting two separate rotatable FM antenna systems, I was able bring in the clear KTPR \*91.1 Fort Dodge in full stereo, nulling much closer KNOW-FM \*91.1 St. Paul, which suffers from the disease of being monophonic. Also heard was WTCX 105.1 Lakeville-[. . .]-Minneapolis-St. Paul MN through local WAVC Duluth, although the latter was on with reduced power; it is now back to normal. The skip season for '93 is over (save for a little activity that can happen in mid to late December), but look for tropospheric enhancement, at distances up to 450 km, as fall approaches.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Digital Cable Radio (DCR) announces its introduction into Europe. The service is to be distributed initially by cable and later by direct broadcast satellite. It will feature the 50 channels of cable programming currently available to U.S. subscribers, with "Euro-specific programming" to be available in about two months. Demand for the service in Europe is expected to be greater than in the U.S., probably because of less FM programming locally. DCR is programming in the U.S. and Mexico and working to obtain regulatory approval to launch in Canada. Latin American service is expected later this year and the Far East in 1994.

A couple of people have sent the story about WBQQ 104.7 Kennebunkport ME

wanting to add another 10 meters to its tower to accommodate the antenna for the new WXPT 104.7. Local residents have objected, with Dr. Christ Angelos, a veterinarian, saying, "We feel expanding it violates our right to a scenic vista; it creates more visual pollution and it devalues our property." W-Bach has approval from the FCC and FAA to raise the tower, and it will not have any visual impact on the residents, according to Louis Vitali, WBQQ manager. R. H. Perrin says 104.7 will apparently get the WBQQ classical music format, with 99.3 changing to something else. WBQQ in Gloucester MA is also owned by the same people and calls themselves W-Bach, but they are on 104.9, adjacent to the other W-Bach. . . It is good to see that the management doesn't plan on another rock station. Using the scan on my receiver, I count 52 rock stations between 90.1 and 107.9 mhz. . . I still can't see the need for so many translators. WEVO \*89.1 Concord is well received, but they put a translator on 104.3 in Dover NH which I also get very well. I think the FCC, when they assign frequencies, assumes that all FM receivers are \$25 transistors, with no antennas, used by kids. When WBQQ came on the air, several people I spoke to at the open house had no idea that an antenna would help reception. They were pleased they could now get classical music and were surprised that here in Wells ME I can get eight stations with either all classical or parttime classical." Dr. Ken Garry, station manager of WUSI-FM \*90.3-TV Olney IL called; they're ordering several variable-tuned 67 kHz units for their new reading service on SCS. Being cautious folks, they checked with their attorney who contacted the FCC about the legality of using such receivers. The reply: "Keep a tight list of who receives the radios. Variable tuned radios are OK; any [monetary] damage to Muzak (or any other firm) by a blind individual would be insignificant. Radio reading services should retain control of the radios, however." Ken said that SCS circuitry is widespread; he knew of a shop class in Chicago which offered making an SCS an option for a class project, and I mentioned that SCS has been around since the 1950s, with so many receivers in the public's hands that it can be considered a "readily available" technology.

Surprised to see an August FMedia! so late in the month? So am I. Thanks to a breakdown of a type font (which is similar to an IBM Selectric type element), work on the new FM Atlas maps was delayed over a week pending font repair. With the demands of producing a 208-page book on creaky equipment dating from the late '60s through mid '70s, there are plentiful opportunities for breakdowns. This operation is like an FM station having no auxiliary antenna or transmitter.

Until, uh, September,

 they sign off somewhere between midnight  
 and 2 a.m.; sign on at 6 a.m. . . KSLH's signal [is]  
 the weakest of the St. Louis area FMs. . . I think  
 they are doing the right thing by not going to  
 stereo if they're stuck with a weak signal. . . The  
 present stereo FM system is a very lousy one for  
 automobile use; it is quite obvious that many  
 music lovers have switched to cassette or CD  
 players for that reason. I tried calling KSLH; all I  
 get is an answering machine at St. Louis Public  
 Schools with a voice telling me to push numbered  
 buttons for various departments, so I hung  
 up—some of this blasted modern technology  
 really makes me wish I could time-travel to the  
 1940s when radio DXing was lovely!" Another  
 reader writes: "Yes, they're still on the air,  
 playing traditional jazz, and you're right they're  
 strictly mono. I really don't have any interest in  
 listening to them. The School Board is trying to  
 sell it."

 town PA.

NY Briarcliff Manor WXPS 107.1 at a new site to  
 the N.E., sharing tower with WARY  
 \*88.1 Valhalla NY. "Unfortunately for WXPS,  
 the engineering was not up to par. The new  
 location has created holes in their signal in the  
 populous portions of the county. On top of that,  
 Westchester Community College has pulled their  
 tower lease! Reason: interference within build-  
 ings on the college campus... Why not move  
 back to the previous transmitter site? Can't do  
 that. The financially-strapped WXPS sold the  
 tower and real estate to a cellular telephone  
 company. The old WXPS tower is chock full with  
 antennas! [They are] going through another  
 engineering study to see if they can move the  
 antenna again. Problem is, there aren't many  
 towers in Westchester County and they won't let  
 you build new ones. Yikes!"

 around to updating the old one."

**SCServices, 57, 67, 69, 78.67, 92  
 kHz**

*This month a complete list from Data Broad-  
 casting Corporation of their QuoTrek 57 kHz  
 service. Thanks to one of their engineers, I had  
 the use of one of their receivers for about a  
 month. It did not work in Duluth some 190 km  
 from KTCZ 97.1 Minneapolis, which has it at 69  
 (not 67) kHz, but did work when tried out  
 locally; however, data injection is believed to be  
 low and the print rate was annoyingly slow. They*

*are all coded "Z"; some involve 20% modulation  
 and include the 67-92 kHz range, either centered  
 at 67 or 69 kHz. I also received a complete listing  
 of stations having RBDS subcarriers at 57 kHz.  
 The new code for 57 kHz SCS, either Cue paging  
 or RBDS, is t(), replacing t(D). Symbols below  
 are otherwise the same as in the "FM Atlas."*

 NJ Franklin Lakes WJUX \*88.7 tU,U—two sets of telemetry signals, heard over W276AQ 103.1 Fort Lee NJ.  
 NJ Newark WFME \*94.7 drops Russian, 67, for Italian music, Radio Azzurra USA, affiliated with IBS (Italian Broadcasting System), and run by Dino Clemente. Studios are at 111 Essex St., Hackensack NJ; (201) 489-0400 or (718) 387-8888. "They signed on Saturday evening Sept. 4 with a party for their friends and relatives, which included champagne and dessert, and they invited any listeners to come over and join them. Regular 24 hour programming started Sept. 6 with music, news and sports. . . Coincidentally, the main antenna of WBGO \*88.3 Newark was hit by lightning early in the morning of Sept. 4 and [for several days thereafter] could only be heard in and around Newark. Since one of their two SCAs is Italian (ICN), and nobody in Brooklyn or Queens could hear them, Radio Azzurra sure picked the right time to sign on. . . Radio Azzurra is unusually loud and clear. All the SCServices should sound that good." Now WBGO is back on with a new antenna, giving full power to its two SCses (tE,E).  
 WHTZ 100.3 t()  
 WNWK 105.9—its 92 is Colombian Spanish, having dropped the Italian service on 67, Radio Uno; now on 67.  
 NYC—"We are starting a Jewish service and are negotiating with two FM stations. If you say 67 kHz is better than 92, we'll try for that." The going rate for NYC FM-SCS, this person discovered, is \$12,000 to \$15,000 a month rental. "There are lots of Jewish people around Skokie IL and I know I could start out there at less cost, but who knows what SCS channels might still be around NYC if I wait?" WNYE \*91.5, whose signal is excellent in Brooklyn, center of the Jewish population, won't rent because of "separation of church and state." The Jewish service would be both cultural and religious. WFUV \*90.7 Bronx wants paying SCS subscribers, but its signal is too weak in Brooklyn. WQXR 96.3—its 92 kHz is "committed," leading to speculation it is Colombian. WNEW 102.7 only wants data on its SCses. WYNY 103.5 Lake Success has Colombian on its 92, but wants to kick it off. "Seiko wants to do data." The 67 is "in house."

 IN Indianapolis WGRL 104.5 The Bear. "Indianapolis got 'ripped off' with this sale and conversion of channel to commercial. FCC should never have allowed it without some quid pro quo. As a minimum, record library of WAJC (such as it was) should have been donated to one of two remaining classical stations (WFYI-FM or WICR), and purchaser should have been required to buy new transmitter for WFYI-FM to make it full power (50 kw, 150 m, or equivalent). Indianapolis now has no full power educational station, and coverage of those remaining is not what it could be. . . Also, city is now one of most poorly served by educational broadcasting in nation for its size. TV6 is also deserving of criticism for its militancy in preventing full development of lower part of band. This is why 104.5 was important channel as noncommercial. Butler did generally poor job with WAJC, so am not suprised they disposed of it. Student announcers were obviously disinterested in the programming and were very sloppy describing what was being played. I listened to WAJC once in a while as alternative to WFYI-FM [\*90.1] and WICR [\*88.7] for program choice. Laughed at stupidity of announcers. Many mornings, W WAJC was only station with NPR "Morning Edition" receivable without a great deal of interference from either co-channel or adjacent-channels (CIMX 88.7 Windsor or WBCL 90.3 Fort Wayne). As you know, propagation is often extended at this time of day, especially in this season. A real problem although I am only 40 miles from Indy transmitters."

 "Sample was pretty good."  
 "Thanks in advance for the information I have requested and for your great dedication to FM radio."

**AM Happenings Most Likely Caused by FM**

AL Selma WTOX 1570 silent  
 CA Fowler KRGO 1220 silent  
 FL Madison WMAF 1230 silent  
 GA Columbus WHYD 1270 "silent pending sale"  
 IL Chicago WLUP 1000 drops Howard Stern, with a lawsuit over the dropping of his show threatened. Howard says WLUP didn't give his show enough time to build an audience—especially necessary for an AM station. He's been on WLUP for less than a year. "Howard's book now has a definite title, 'Private Parts', and will be out in October."  
 KY Danville WKLO 1000 FCC revokes license for being off the air without authority since Dec. 18, 1992  
 MA Boston WSSH AM dumps Spanish in favor of Talk America, based in nearby Marlborough MA. Noble Broadcasting had hoped to sell the 50 kw station on 1510 "but didn't have any takers."  
 The FM in Lowell, now separately owned, is still WSSH-FM (99.5). The AM is being promoted as

"1510 Talk" to differentiate it from WSSH-FM. MI Grand Rapids WCUZ 1230 drops simulcast with FM "for a live, locally-originated 'traditional C&W' format; this move seen as an additional attempt to chip away at WBCT 93.7, which is the hottest station in town right now."

WOOD 1300 fell from No. 1 to No. 4 in the spring book, "or back to where they've usually been. Plus, they fired their local, live midday host, Phil Tower, and replaced him with the satellite fare of G. Gordon Liddy. WOOD is only local/live now in morning drive and for two hours in afternoon drive; otherwise, they're all satellite talk."

MI Lansing WITL 1010 off air? FM 100.7 heard giving its legal ID as "WITL," not "WITL-FM." "I did not receive WITL AM, but WITL AM is/was only 500 watts, probably directional away from my receiving location. The FM uses calls a lot, plus 'Whittle 100.7'."

MN Duluth WEBC 560—one of 997 stations filing a petition with the FCC to migrate to the 1600-1700 expanded AM band before the close of business June 30, 1993. This is a station enjoying good day and night coverage, so I called Paul Carroll, who is in traffic and engineering, who said "It's an insurance policy. We thought we'd better apply and get our foot in the door in case something happens with the expanded band." That probably is the reason many other stations, including WEBC's co-owned KQWB 1550 Fargo ND, also applied—although stations high on the AM band with daytime only or poor nighttime coverages have more to gain by migrating than does a station like WEBC.

MT Hardin KKUL 1230 "silent pending sale" NY New York WBBR 1130 with its all business-talk format, showing "virtually no measurable audience. . . WBBR needs to do significantly better, and soon [like] turn off the transmitter, send home the executives and engineers, and just read the copy into unplugged microphones. Tens of thousands of dollars per week saved, and hardly any listeners [according to Arbitron] lost in the bargain."

ND Wishek KDRQ 1330, although holding a CP for 5 kw, day and night, is "unlikely [to] make that change. It would involve a five tower array, and current thinking is that it's not economically justified. Look for the CP to expire." But it is moving ahead with KAEI (FM), hoping to head it on the air in about a month. FM will parallel AM except for live sporting events.

OK Sallisaw KKID 1560 silent due to fire that also affected KRUZ 95.9 and KOLX 94.5 Barling AR; only KKID will not return.

SC Chester WGCD 1490 silent TX Boerne (San Antonio) KBRN 1500 silent, but supposedly coming back with a simulcast of KUBR 1210 San Juan TX TX Lufkin KSRK 1420—FCC deletes call letters WA Vancouver KVAN 1550 silent BC Osoyoos CJOR 1240 has applied to move from AM to FM (180 w on 102.9) BC Vancouver CKLG 730 (its FM is CFOX 99.3): "After 30 years as Vancouver's reigning CHR station, has added open-line/talk shows 9 a.m.-4 p.m. and is rumored to be dropping all CHR soon. Their demise as a top 40 began with the sign on of Z-95.3 (CKZZ) and its siphoning off of CKLG's teen audience."

CKST 1040, "Coast 1040," owners have restructured to avoid bankruptcy and laid off 20 employees. It's expecting new owners to take over this fall, and is hedging by buying CFQC AM Sasakatoon, and hoping to turn that station into an FM, after failing to win approval for an FM in Vancouver.

CKFX shortwave off air, but may return later/ NB Saint John CFBC 930, "citing financial problems," has laid off manager Shirley Crawford and longtime talk show host Tom Young, but station claims no further layoffs are planned in its staff of 35.

ON Leamington CHYR 710 still on, but its new FM on 96.7 now 24 hours a day. "They always mention the broadcast frequency of 96.7. They never say anything about the AM frequency any more." NonID (not strict): "Country Music Radio."

ON St. Thomas CHLO 1570 has applied for 103.1—CIQM London's old frequency, with 50000 h.v, and would simulcast the AM for 90 days.

PQ stations applying to change from AM to FM: CHLC 580 Bale Comeau wanting 97.1 with 4200 h.v; CFVD 1370 Degells wanting 95.5 with 12500 h.v; and CKOD 1370 Valleyfield, 102.9 with 3000 h.v. [Atlas is ready.]

"Bruce, please let me know when the next FM/

### Whoa To FM Freeze Idea

When interim FCC Chief James Quello a while back proposed an FM station freeze (June, pp. 4-5) for strictly economic reasons, he was supported by the National Association of Broadcasters. Indeed, it was the NAB which allegedly pushed for such a freeze. Other commissioners don't back Quello's view, and apparently the idea of an FM freeze is dead for now. Commissioner Andrew Barrett contends a freeze would hurt small businesses seeking to break into broadcasting via the new-station route, while FCC Commissioner Ervin Duggan feels a freeze is simply a bad idea at this time, unless the FCC can think of a long-term policy toward FM station licensing.

### Religious FM Stations in Canada OKed by CRTC!

Breaking with a 70-year tradition, the Canadian Radio Television and Telecommunications Commission announced on June 3 a new policy which will open the door to religious TV and radio stations. It is now looking for proposals for such stations, but they must demonstrate how they will ensure "balance" or varied points of view. Rebroadcasters of U. S. stations will not be licenced.

### WQAQ \*88.3 Hamden CT Denied Upgrade

Sitting just north of New Haven, little WQAQ, owned by Quinnipiac College, has probably eyed that larger market and wished it could cover the area like its grown-up brothers which inhabit the FM dial. So WQAQ applied for an upgrade from a Class D to a Class A, but the FCC denied the action. Quinnipiac then sought a review of the FCC's decision, which the Commission also denied, stating that Quinnipiac "had failed to meet the threshold test to show that its site was no longer suitable for its current operation, and that there were no lesser short-spaced sites available." The problem is that WQAQ suffers an IF-relation problem, being 10.8 mhz away from WPLR 99.1 New Haven CT. According to FCC rules, the WQAQ site would have to be at least 15 km away from WPLR's site for WQAQ to be a Class A.

### Applicant for 103.9A Westerville OH Fined \$25 Grand

It's rare when a mere FM station applicant—rather than an actual FCC licensee—gets fined, but that's what happened to Westerville Broadcasting Company Limited Partnership, to the tune of \$25,000. Their offense? Violation of the Commission's rules forbidding applicants from making "any misrepresentation or willful material omission" in a written statement submitted to the FCC. WBC asked for dismissal of its application after being notified by the FCC of a potential forfeiture liability.

FCC Administrative Law Judge Walter C. Miller held that WBC and its general partner Freeman Edwards had attempted to deceive the Commission concerning WBC's financial qualifications. Such deceptive statements made WBC apparently liable for the fine, despite the fact that its application has been dismissed. The 103.9 channel, formerly home of WBBY (FM), is still the province of Columbus-area FM DX enthusiasts while some seven other applicants battle it out.

### Small Print Happenings and FM Industry News

A new experimental TV station has been granted in Salt Lake City to the Electronic Industries Association. Happens the new "TV" is on Channel 6 and is an audio-only station, receivable on many FM radios. The grant is to "gather technical data on multipath phenomena" in conjunction with EIA's digital audio radio subcommittee's research.

The Germans have slowed down their experiments involving DAB (digital audio broadcasting), due to the economic situation, with experiments delayed to 1997. Other European countries are undertaking DAB tests, as has Canada, but Germany has been the closest to implementing such broadcasts. Against the advice of those who would have DAB reside in the L or S bands is Henry Price, a BBC engineer, who points out that VHF transmissions can achieve much wider coverage and are more effective in transmitting to fast-moving vehicles. L-band is best suited to localized broadcasts, and to cover wider areas, "a very dense network of transmitters would be needed."

CISS 92.5 Toronto is claiming the most successful launch of a radio station in Canadian history. According to *Broadcast Technology* magazine, the spring BBM showed the total weekly audience of 777,000 and a 7.2 share. That makes CISS No. 3 in Toronto (after CFRB AM and CHFI 98.1), and the No. 3 country station in the world, "after stations in New York and Chicago." Other Toronto ratings show CHUM-FM 104.5 as No. 4, CILQ 107.1 No. 5, CHUM AM No. 6, CBL AM No. 7. Both CJEZ 97.3 and CFMX-FM 1 96.3 showed solid increases in circulation, but were not ranked. [See above, "On Air," for mention of CHUM-FM's anniversary.]

Both the Canadian magazine "Broadcast Technology" and the MN Broadcasters newsletter allude to the sad toll of smoking. The World Health Organization reports smoking is now killing three million people worldwide every year. "This is three times as many as in the 1960s, and the death toll is rising steadily. The tobacco industry still wants you to believe that smoking is 'sophisticated'. Fact is, and most smokers agree, it's just plain 'stupid!'" Carol and I attended the symphony earlier this month and sitting next to me was the widow of a professor I had in college, Dr. Robert F. Pierce; he was head of the speech department and advisor to KUMD (\*89.1 Duluth) shortly after it began. Joyce Pierce said he died of lung cancer after having smoked 40 years, and had been ill with the disease the last two years.

The MN Broadcasters Association newsletter had a tribute by Lew Latto (pictured), WAKX 98.9 Duluth, in honor of consultant-announcer and former radio program director Tac Hammer. "My life will never be quite the same because for more than 30 years Tac was not only a very close personal friend, but had been my first program director, a person I could call for advice and counsel and in recent years, I had used his services as a program consultant. Tac died of complications from cancer. Tac was born one month before me. He was 53. . . Please help someone you love stop smoking BEFORE it's too late!" There is a program aimed at helping people quit smoking that uses no hypnosis, but good dosages of group therapy, and is called "breathe free." I helped conduct one when I lived in NE, and 13 people kicked the habit. For information when a program like that may be held in your area contact a nearby Seventh-day Adventist Church. This program is said to have a 70 percent success rate.

The airwaves will be cleared for new interactive TV devices when the FCC holds a lottery soon for licenses to broadcast in the 218-219 mhz spectrum, which has been set aside for interactive video data services (IVDS). Such spectrum may make unnecessary the need for FM-SCS to provide signals to TV owners, with both the sending and receiving components possible in the 1 mhz-wide allocation in a local area.

In fine news, the FCC has hit KMJQ 102.1 Houston with \$2500 for rebroadcasting a pro-

gram, or portion thereof, from another station without permission of the other station. WBHL \*91.3 Florence AL fined \$1250 for "repeated violations of the Communications Act and the Commission's rules." KKAT 101.9 Ogden UT slapped with a \$5000 FCC fine for broadcasting a telephone conversation without first informing the party of its intention to do so. Joe Bohannon, morning d-j on WBBM-FM 96.3 Chicago, got hit with an \$8 million lawsuit alleging he defamed one of Channel 5's news anchors by spreading a rumor she was pregnant with the child of one of the Chicago Bulls players. Joan Esposito filed the suit, claiming the rumor "substantially reduced her salary."

The National Federation of Community Broadcasters clarified the FCC rules about translator applications. FCC will accept applications with TV channel 6 stations when agreements with those other licenses are filed. The FCC has brought the IF separation rules (such as affected WQAQ Hamden CT; see above) into agreement with other secondary station rules, such as for Class A stations. Translators of 100 watts or less are not subject to IF standards. And for translators broadcasting commercials under the 30-seconds per hour limit, it's OK for the time to be split during the hour.

The FCC has proposed to modify its technical rules to specify the manner in which applicants for FM facilities may round off distances when computing the extent to which they are short-spaced. Instead of being to the nearest kilometer, it's going to be to the nearest tenth-kilometer. "This degree of rounding yields a precision of 10 meters, which more closely conforms to the degree of precision associated with the FCC's requirement that transmitter site coordinates be specified to the nearest second."

The FCC has thrown out petitions to deny against 10 Philly area stations filed by a local gay/lesbian coalition, which felt they didn't provide enough coverage of homosexual issues. The FCC did, however, decide to look at EEO issues involving WXTU 92.5, WMMR 93.3, WYSP 94.1 and WJZZ 106.1, according to the *M Street Journal*. Also from that source: Jone Satellite hit the air in September with its new "FM Lite" format, an easy listening-soft AC format blended with some jazz and MOR cuts. The new service will be a bit more personality oriented than JSN's current easy listening format.

"Stern looped over Chicago loss," says "M Street" in a recent headline. As expected, Stern is suing WLUP (AM) for breach of contract in dropping his show. He's also seeking punitive damages, for a total of \$48 million. Evergreen Media, owners of WLUP-AM-FM, contends they were worried about the potential for another FCC indecency fine, after having been fined \$3000 for certain nuggets out of the mouths of Steve & Garry a few years ago. Garry Meier has moved to 97.9 middays away from former morning partner Steve Dahl.

Now that FM stations don't need to have type-accepted modulation monitors in use, but can rely on virtually any radio the station thinks can give a good indication of the station's on air modulation or sound. Consequently, there's a glut of unused and unneeded FModulation monitors on the market, with the FCC concerned about how to define and measure FM modulation, including "peak amplitude, peak duration and peak recurrence rates, and the time interval over which peaks are to be counted." Wish the Commission luck in trying to quantify loudness. The NFCB says stations considering whether to purchase that new Gyro-Holosonic HyperModu-Max your PD's been whining about might just want to wait and see.

The NFCB's annual conference, Jan. 29-Feb. 2, 1994, is to be in Tampa FL, to feature Erwin Knoll and David Barsamian, "engineering wizards," "legal eagles, internet and connectivity demos, production training, live performances, CPB and PTFP grant information," and more. For room at \$99 single/double contact Radisson Suite Resort, (813) 596-1100. For registration

info contact NFCB at (202) 393-5355.

Salem Broadcasting said to be close to buying WBEB 101.1 Philadelphia from Jerry Lee for \$4 million. It's a three-year-long process for Salem, which would probably convert WBEB to Christian, similar to what is in place at WORD-FM 101.5 Pittsburgh, and what Salem plans to implement at KHHH 94.7 Boulder CO, expected to change call letters.

FCC station totals as of the end of August, FM radio 4920 commercial, 1633 educational licensed and on the air, while AM has 4950.

From the classifieds: General manager KCAW, requiring three years in all aspects of radio, \$36,600-\$40,200, EOE. Reply by Nov. 1 to manager search committee, KCAW 28 Lincoln St., Sitka AK 99385. Manager Rich McClear will be in Tirana, Albania, advising Radio Tirana as it steers away from government. Wife Suzi will also be in Albania working on issues regarding women. The McClears founded KAXE \*91.7 Grand Rapids MN in 1975. I wonder what his plans are after Albania, since the job is not advertised as an interim one?

KAXE's looking for a program director. Call (218) 326-1234 or (800) 662-5799, or send cover letter and resume to Pam Leschak, 1841 E. Hwy. 169, ZIP 55781.

KROA \*95.7 Grand Island NE looking for evening announcer/engineer. Tape and resume to Gordon Wheeler, Box K, Doniphan NE 68832. EOE.

National Radio Club AM Station Map Book, Feb. 1993, 170 pages drilled for placing in binder. Has maps showing locations of stations on regional and clear channels across the nation, plus call letters. \$9.50 plus \$1 shipping from me. It's not the AM station version of the "FM Atlas," but I know at least one person using it as such. For \$19 get that and the new (1994) NRC AM Radio Log, about 300 pp., with much detailed station information. [A new "FM Atlas" should be ready later next month, but I'll wait until then to announce price and availability.]

## FM FORUM

### CONTRIBUTIONS FROM READERS

Al Hastbacka "thanks for the write up on 'FM Gold' in the July issue of FMedia! I am making a demo disk for both 'FM Gold' and 'FM SCAN' for a price of \$5 each (not free as you stated). I am also enclosing an article that appeared in the July 26, 1993 Washington Times featuring 'FM Gold' and 'FM SCAN'." Hastbacka is quoted: "Sometimes on trips you can get a real sense of cultural isolation, especially if all you hear is local programming. . . I'm always surprised at how many business travelers like to hear NPR." FM Gold covers airports, while FM SCAN covers the Interstates. "I believe FM SCAN would be of interest to many of your readers, particularly those readers who travel by car on the Interstate Highway System. FM SCAN is a program that acts like a Smart Radio. FM SCAN allows you to easily find an FM station broadcasting the type of format you want to listen to, when traveling on various Interstate Highways. . ." FM SCAN is available at \$33.95 (plus sales tax in VA) by mail from Chatham Research, P.O. Box 439, Oakton VA 22124; (703) 281-9699.

"A couple of comments on the April '93 edition of FMedia! p. 2, call letters-WRWD AM is in Cornwall-on-Hudson, not Croton-on-Hudson NY," writes Karl Zuk. P. 5: "The Westchester Council for Public Broadcasting, solely run by Marc Sophos of Dobbs Ferry NY, has been granted \*90.3 100 was WDFH. Construction has not yet started. The old claim on WNYE's frequency becomes, sort of, moot. WNYE \*91.5 has been on the air more than they used to—although their schedule remains irregular. They still do not have stereo. I'm sure the

injection level of their data service subcarrier is beyond legal limits. Almost any analog radio can pick it up by using slightly offset tuning. This is the only NYC area station that has this problem. Also, rumor has it that Z-100 WHTZ 100.3 FM is going 'alternative rock' soon. Their late-night sex-talk show sounds like an anatomy lesson combined with voyeur's delight. How can they give Stern a hard time when this unredeeming exploitive dung is on the air? Broadcasting has come a long way since Jack Paar was suspended for saying 'water closet' nationwide... I very much enjoyed your excerpts from the old 'FM Guide' magazine."

Regarding the May comments on Muzak, p. 8, Zuk shared a letter from that firm, stating that Muzak is a registered trademark of the Muzak Limited Partnership. "The designation MUZAK® since it is a trademark and a proprietary name, should always be used with a leading capital letter or fully capitalized... Improper use of the MUZAK® designation, such as an attempt to use it as a noun in reference to a product or service or to use it to refer to businesses other than Muzak Limited Partnership, threatens the valuable rights that this company holds in these valuable company assets," writes Ms. Leslie Ritter, director of marketing communications.

Pending FCC approval, WMMS 100.7 and WHK AM Cleveland are being sold to the Disney group of stations. "During the recent WMMS promotion for 'Fruit of the Loom', I walked up to the morning air personality at their remote broadcast in downtown Cleveland," writes Bill Fait. "During a break in the program I asked her about the sale of the station. She told me the sale was not final yet and everyone was thinking they would be better off working for the new company, but a look of panic crossed her face. It will be interesting to see how this works out for her... WQMX 94.9 Medina OH uses call letters followed by 'Akron's new country music station.' They've been running promotions saying that listeners have their own country music station in the Akron-Canton area with WQMX, and should no longer listen to FM stations from 'Youngstown and Cleveland.' Most likely, they're referring to WGAR 99.5 and 'K-105,' WQKX.

Another radio publication you can buy: "Duncan's radio comments." It's a newsletter expressing Jim Duncan's ideas on the industry, including books he recommends reading for recreation. Howard Stern v. the FCC are looked at in the April sample issue. Write for a sample to PO Box 90284, Indianapolis IN 46290.

Ray Topp, Rochester MN, writes and says his "Radio Guide" is "dead." "We were spending too much money in an attempt to compete with the other publications, when we should have remained true to our original concepts. And when clients didn't pay their bills on time, our small profit margin reduced our cash flow to a trickle. I've learned my lesson and have started a new publication called Radio Shopper. I'll be doing pretty much the same things that I did with the earlier issues of Radio Guide—classified ads and tech tips." Write for a sample to Radio Guide, 511 18th St., S.E., Rochester MN 55904.

"WWRB" has moved to Good Thunder MN from Clouquet; now it's an extra-legal 1 watt (11 m) on 105.9. It's in a town of 1000 south of

Mankato, and this pirate station seems to cover it all.

One of my readers recommends the Grundig Satellit 500 receiver, "now upgraded to Satellit 700 standards with Eprom chips for 2056 memories," presumably AM, FM and shortwave memory channels. The unit seems quite sensitive and selective, although I have seen no report on it being compared side-by-side with another radio or FM tuner.

Walt Breville says that "among unusual formats today, the Columbus area yielded the best one: 107.9 WCEZ Delaware OH, a real EZ listening station, or beautiful—no soft rock, strictly elevator music, etc. The most glaring omission in both Columbus and Indianapolis: No big band or Music of Your Life or similar nostalgia formats at all on either AM or FM: thousands or tens of thousands in each of these towns must be shunning radio listening and missing commercials as they listen to cassette tape or CDs instead... St. Louis is the best of the 1-70 towns, with a lot of choice, with WEW 770 a good big band/MOYL, a couple of jazz outlets plus a good soul/disco one: KXOK 630 and 97.1, with 630 being the old outlet receivable in the south half of the metro area."

"Porno" ads, courtesy WQHT "Hot 97" New York, have drawn fire. Brooklyn Democrat Noach Dear, who chairs the city's transportation department, has threatened to bottle up other issues of interest to the Transit Authority, unless they remove the posters from city buses and subways. One view shows a man standing behind a girl attempting to remove her pants, while others portray various forms of kissing and/or face biting. Dear thinks the ads go "beyond the bounds of decency and should be pulled." WHTZ 100.3 still has "Love Phones" (see Dec. '93, p. 3, col. 2 and Jan. '93, p. 3, col. 1) 10-midnight during the week, with a 10' delay, "which I guess they have in case a caller uses one of the seven dirty words forbidden by the FCC; there probably isn't much else they would bleep out on such a sleazy show. Anyway, some fans can now hear the show live, 10 seconds ahead of Z-100 on WMXV's (105.1) 92 SCA... Beats me why WHTZ is using another station's SCA instead of activating one of their own."

Matthew Field, former WNCN 104.3 NY general manager and a former FMEDIA subscriber, sues the station's owner, GAF Corp., charging that it dismissed him because of age discrimination and stock fraud. Field, 49, "who made WNCN profitable by implementing a hipper and sometimes irreverent presentation of the classical repertoire, alleges in papers filed in NJ Superior Court that GAF and two of its top executives conspired to defraud him of stock that he purchased as part of the company's leveraged buyout in 1989." The suit claims his dismissal will cost him nearly \$2 million. GAF said the suit is without merit and it would vigorously defend against it. On a separate matter, GAF faces an FCC hearing relating to two petitions challenging the company's license to operate the station.

An unauthorized book, *Howard Stern: Big Mouth*, will be published by Pinnacle Books in a \$4.99 paperback, authored by Jeff Menell. Michael J. Silverberg, Stern's attorney, pledged legal action, if necessary, against Menell. Menell, despite not getting a Stern interview or even pictures to use, is undaunted and plans to go ahead with the book. The authorized book about Stern, to be published by Simon & Schuster, will sell for \$22. "On WXRK (92.3 K-Rock) the Greaseman is now playing occasional records instead of just talking, but it's not gonna help—he just plain sucks." The NY Post, Jeff Weingrad, writing, can't believe anybody in the market likes the Greaseman and invited people who do to write in and tell him why.

"Regarding the comments about portable radios (May, p. 8, col. 3), I do almost all my DXing with a Sangean 818CS portable (modified with a tunable SCS adapter); it has digital readout, is at least as sensitive as the Superadio and has very good selectivity. You can record off the radio in stereo and the tapes sound great played back on a stereo deck. Drawbacks are no external antenna jack, hard-to-see stereo indicator, high price (\$250 modified from "FM Atlas") and an antenna screw that loosened after two weeks. Topples over easily when in a vertical position; this can be prevented by leaving the batteries in all the time to weigh it down... Pirate radio fans in the Long Island NY area should tune to 91.9 on weekends, especially Friday and Saturday nights. There is an informal 'network' with at least six or seven pirate stations in Nassau and Suffolk counties sharing the frequency. On a typical night a station will stay on the air for a half hour or so, then drop its carrier. Then another station comes on, and comments on the first station's signal strength and on which of the other pirates have been heard so far that night. Sometimes there's griping about WSHR (a real station on \*91.9 in Lake Ronkonkoma) having too strong a signal on a particular night." [Thanks to Jeannette Johnson for this information.]

AK's KPEN 101.7 Soldotna had a faulty fax machine—so faulty, in fact, that it sent out signals that interfered with a Coast Guard distress frequency. The fax sent out a signal on 121.5 mhz, which might have mixed with the station's 101.7 channel. It's "the first time I have heard of a fax giving off a signal," said Rod O'Connor.

Until November, *Bruce F. Elving*

**On Air—Real Stations and Pirates**

CA Berkeley "Radio Free Berkeley" 88.1 with  
one Stephen Dunifer broadcasting three hours  
each Sunday night from various locations in the  
hills overlooking town, using a 5-w transmitter  
and equipment connected to a car battery. He's  
been fined \$20,000 from the FCC but feels  
stations under 10 watts should not be licensed, so  
long as they don't cause interference.

GA Martinez WGOR 94.3, not yet moving to  
93.9 [WTIF-FM 107.5, \$

GA Omega ("o-mee-ga," not "o-may-ga")/  
GA Roswell W298AA \*107.9 (WMBW translator,  
which I consider deleted because of new  
Roswell CP on 107.5 [no call letters granted])

GA Waynesboro WAGW 100.9 g, temporarily,  
being simulcast with WYFA \*107.1 (correct  
listing p. 207 FM Atlas-15 to show calls as  
WYFA).

ME Biddeford WSTG 94.3 at sign off mentions to  
tune in WOKQ 97.5 for country music or  
WBLM 102.9 for rock. "We'll be back at 5  
tomorrow morning."

MA Boston—someone's interfering with WBCN  
(104.1)'s remote frequency, probably in the  
160 mhz band, when it originates programs from  
outside the studio. They get on and spew  
obscenities, similar to what Howard Stern is  
legally (?) doing in the mornings on that station.  
FCC engineer Vincent Kajunski said "We have it  
under investigation. We're monitoring the fre-  
quency and there are any number of ways we  
have to catch them."

MN Grand Rapids K265DD \*100.9 (having  
moved from 98.3)

MN Hibbing WTBX 93.9, but probably only at  
50 watts, making frequency clear to hear  
other stations. KKRC 93.9 Granite Falls was  
said to be on the air, but there's no sign of it.  
Instead, I'm getting KTSB Sioux Center and  
"KIA" Mason City IA, and WDOR-FM  
Sturgeon Bay WI. WTBX's translators, in-  
cluding W249AM 97.7 Duluth, off the air.  
People have been shooting the transmission  
line. "It's so bad it will probably have to be  
entirely replaced." Now back on, full power+xltrs.

NJ Atlantic City W230AA \*93.9, "located atop

Trump Taj Mahal Casino"  
OH Jefferson WCVJ \*90.9 still g, but only on 6  
FM 90.9/Agape School, Inc.

several times to the site [and] not a peep. I  
had earlier written to the chief engineer of  
KOAI (now KHKS) and requested info, but  
never got a reply. . . Incidentally, KHKS  
advertises as 'KISSFM', so most people think  
that's what the station call letters are."

VA Galax WPRH \*91.1

SCServices, 57, 67, 78.67, 92, 110  
kHz

*New formats I am considering adding to account  
for the ethnic SCSes: H Haitian French, I Iranian,  
India languages, Islamic/Arabic, J Japanese, K  
Korean, L Latin American/Spanish-Portuguese,  
O other Oriental languages, including Chinese  
languages and Tagalog, Q European languages  
(such as Greek, Russian, Italian). E would remain  
for miscellaneous ethnics and for stations em-  
ploying a variety of languages on their SCSes.  
Your comments are invited.*

Symbols are as in the "FM Atlas"

AR Reading Service for the Blind still on the 67s  
of KLRE \*90.5 Little Rock and KKEG 92.1

Fayetteville. In addition, it is on the SAP of  
Channel 2 Little Rock and 19 near Jonesboro,  
and will be coming on Channel 6 in Harrison-  
Mountain Home, 9 in Gurdon and 13 in  
Fayetteville. "We reach a few people who have  
SAPs on their VCRs that way."

CA San Francisco KOIT-FM 96.5 †G, 92,  
Mormon (†X, 67). They're using modified  
G-E Superadio IIIs.

IA Des Moines KDIN \*11, Iowa City KIIN \*12  
Descriptive Video Service for the blind, SAP.  
For DVS demo call (800) 333-1203.

MO Mount Vernon KELE 106.7 †S, 67, heard  
broadcasting from a remote at a pizza place in  
conjunction with KGMV-FM 100.5 Aurora MO,  
with "laughing in the background." Its SCS  
carrier is usually blank, but keps going on and  
off, as if sampling for audio. Same ownership as  
KGBX 105.9 Nixa MO.

NJ Newark WBGO \*88.3 Radyo Pinoy, 92 kHz  
(see March, p. 4, col. 2). AT&T will provide  
SCA radios free to those who want to tune in  
Radyo Pinoy. "This was announced on Radyo  
Pinoy's WNJR program (1430 AM, 7-8 p.m. M-F)  
and several hundred calls have come in. . . The  
radios (up to 1000 of them) will be distributed at  
many Filipino stores in NY and NJ, only to those  
who have called and left their name and number  
with Radyo Pinoy. There is 'no obligation' but  
AT&T will be trying to sign people up for their  
various overseas long-distance programs. Current  
SCS owners may be able to get a partial rebate;  
details are still being worked out."

WNWK 105.9 no 67. Radio Uno folded because  
the principal owner "got sick, retired and  
moved back to Italy. Our 67 is available, and for  
prospects wondering how our signal is, I loan  
them a radio and they can take it to various  
neighborhoods and check reception."

NY Buffalo WGRF 96.9 still †C,C. The 67 is a  
pre-delay of the AM with talkback to the  
studios from remote site; the 92 is also an AM  
pre-delay with no talkback. These SCSes are 7

seconds ahead of the AM station program.

And "we are looking at 110 kHz as a remote  
standby frequency in case our STL goes out."  
NY Lake Success WYNY 103.5 †C, 92, relay of  
main channel, having dropped Colombian  
Spanish. "I'll be looking for that Jewish station  
to show up. Too bad WNYE 91.5 doesn't want it,  
because it reaches the south shores of Brooklyn  
and Queens, which is definitely necessary for a  
Jewish service. WNYE couldn't have a talking  
SCA anyway with that extra-loud data SCA of  
theirs. Has the Jewish station considered WBAI's  
(99.5) 67? It's an open carrier now."

TN Memphis WYPL \*89.3 †(), RBDS demon-  
stration station for the area; also had  
experimental SCSes earlier this year in  
conjunction with the Association of Radio  
Reading Services convention.

WI Milwaukee WMVS \*10 has DVS on itSAP  
"John York, my chief engineer, bought a  
modified G-E Superadio from you and he  
really likes it. I'd like to order two radios now for  
myself."

"I recently had the pleasure of listening to music  
on the G.E. Superadio II purchased from you by  
my dentist. . ."

"Very disappointed in your SCS mod in my  
Superadio II—barely get Muzak with lots of  
noise. . ."

"A copy of your brochure was given to me by  
one of your customers, Mr. John Niermeyer. He  
spoke highly of your services related to his G-E  
Superadio that you modified to receive the  
broadcasts directed to the blind."

The radio "simply received a very poor, low-  
quality tone. It did not receive well. . . As far as I  
am concerned, you owe me the full price of the  
radio. If I do not receive this, I will take whatever  
action I can including notifying the postal  
service, your nearest Better Business Bureau or  
Chamber of Commerce, and the magazine in  
which I noted your advertisement in the first  
place of your poor business practices. . . Let me  
also suggest that you consider a course in  
customer relations for your business. I believe  
you would be far more successful. . ."

"The new radio is far superior in sensitivity and  
quality of tone to the single channel one supplied  
by IN TOUCH, plus that it can, if wanted, be  
used for normal radio."

"I like the G-E Superadio you modified several  
years ago. I also have a modified GPX TV set on  
my desk, which gets the reading service on SCA  
and the SAP. . . I bought that from LS&S Group  
in IL, with your modifications in it."

### NonIDS, Not Just Slogans

*Mentioned usually without call letters; "strict" if  
a station only uses call letters once per hour as  
required by the FCC (at or near top of hour)*

GA Augusta WGUS-FM 102.3 Froggy 102.3,

**AM Happenings Most Likely Caused by FM**

DC—FCC Selects Motorola C-Quam as the U.S. AM radio standard, as if anybody cares now. Most AM stereo stations here are C-Quam. Now will Leonard Kahn sue the FCC? The FCC will let stations with the Kahn system use it in stereo for one more year. Those using Kahn equipment with "stereo-phony," or the identical program fed to both channels of the exciter, may do so indefinitely.

FL Jacksonville WPDQ 690 silent. It's being sold to WOKV 600, which is expected to move to 690.

GA Atlanta WSB 750 and other Cox stations: AM stereo "is almost a non-issue. Most of our stations that put it in initially have taken it out. Program directors think it decreases the coverage. Since there are so few people out there that care, we just took it out," said John Swanson, v-p engineering.

IL Chester KSGM 980 silent. "Another flood victim; this one may or may not return."

MN Minneapolis KUOM \*770, the oldest station in the state of MN, has converted to student operation, as "Radio K," now rock, but will keep five or six of the old staff (half the old staff), including Andy Marlow, general manager. Some parttime students will be paid. Its budget drops from \$700,000 to \$500,000, but it plans to retain CPB funding, and remain noncommercial. "Radio K exists in part because the MBA (Minnesota Broadcasters Association) lent its support to our proposal. . . Most importantly Radio K is run by college students."

MS Cleveland WDTL 1410 and WYNO 1120 Nelsonville OH—each threatened with a \$250,000 fine for being silent without FCC authorization.

ND Wishek KDRQ 1330 silent  
 TN Etowah WCPH 1220 silent, but FM remains on

TX Borger KBBB 1600 deleted by FCC  
 TX Fort Worth-Dallas WBAP 820 takes top spot from sister KSCS 96.3, with a 5.9 to KSCS's 5.4.

WBAP now all talk, except for Bill Mack's overnight country-truckers' show. "Note also that KOAI 107.5 Fort Worth, The Oasis, is now in 12th position; in the last rating period it was No. 10. This was a good format change for them. Previously as KCDU, oldies rock, it was lost in obscurity. The new KOAI is being programmed much better than the old one. Its instrumental-based 'smooth jazz' format seems to be enjoying a multiethnic popularity. Those listeners who bemoan the lack of an easy listening station in their area might want to check out this type of format if it's available. Granted, it's an acquired taste, but most of the music is extremely listenable."

TX Pasadena-Houston KIKK 650 now all simulcast with 95.7 FM. "Larry Galla and the Kik oldies show will be missed."

WA Vancouver KVAN 1550 returns to the air after being off since Sept. 4 "after the prior owner, Fairmont Communications of New York, filed for bankruptcy." It will offer news and information.

ON Leamington CHYR 710 (or 730) confirmed off; replaced by CHYR 96.7

ON Niagara Falls CJRN 710 reported off. "I listened between 5 and 8 a.m. WOR from New York was the dominant station from 5:30 to 6:30. After that I got a clear station ID from CKVM Ville-Marie in French with network ID of 'Ici Radio-Canada'. Also heard WFNR Blacksburg VA" in N.E. OH.

ON Ottawa CJSB 540 applies for 106.9 FM and to "end AM service."

The FCC has reclassified AM stations into Classes A, B, C and D. Except for Class D, the classes in AM are the opposite of those in FM. A now includes the former I-A, I-B or I-N. B includes II, II-A, II-B, II-C or III. C includes Class IV, while D includes II-D, II-S, III-D or III-S.

### Five DAB Systems To Test by December 31

Cleveland is the city in which five DAB (digital audio broadcasting) systems are to be tested before the end of the year. The Electronics Industries Association, which is comprised of receiver manufacturers, will test systems that are not in-band, on channel--AT&T, Eureka, NASA/VOA. The broadcast industry group, the NRSC, will test USA Digital and Amati/AT&T, which are the in-band, on-channel systems. All systems are to be tested for field strength and signal quality, as well as interference to mobile reception. Scrutiny will be paid to how a signal degrades at the end of the coverage area. Systems using the FM band will also be tested to see how much interference is created between DAB and existing stations. I hope they check to see if the systems coexist with FM subcarriers at 67 and 92 kHz.

### FCC Sticks to Liberalized FM Broadcast Applications Policy

The FCC has denied a petition by a professional engineers' group seeking reconsideration of the processing procedures for commercial FM station applications. In 1992, the FCC modified its strict "hard look" processing system in favor of being more flexible. This allows applicants to correct what were previously fatal defects in their applications. The Association of Federal Communications Commission Engineers argued that the new minimum filing requirement errs in allowing applicants to correct the omission of certain engineering data. Being engineers, these folks felt that incorrect or missing technical data are too important to be lacking from an application.

In denying the petition, the FCC reasoned that although the engineering data are important, a few errors or omissions can be tolerated at the early stage of processing an application to allow for more flexibility of the system as a whole. And the FCC said that the modified "hard look" policy has been in effect a full year and is working well. "Although the [FCC] staff now gives applicants an opportunity to correct deficiencies there is no appreciable change

in speed of service, due to a more effective and efficient process," the FCC said. Obviously, AFCCE was trying to feather its own nest, hoping to discourage individuals from preparing their own applications.

### Small-Print Happenings and FM Industry News

The FCC has granted the application to assign the licenses of KJBR 101.9 and KBTM AM to Duke Radio Broadcasting, Inc., with an unusual one-year waiver to allow Duke to divest itself of either KJBR or its KFIN 107.9. Duke submitted an exhibit showing there are 15 radio stations in the market; however, according to Arbitron, the audience of the proposed ownership combination would be 34.19 percent. Because the combined audience share exceeds 25 percent, the proposed combination is "considered prima facie inconsistent with the public interest under the new rules," the FCC said. Duke claimed a permanent waiver should be granted because at least one of the stations is "financially struggling." However, the FCC rejected Duke's proposal that suggested the FCC look at a six-year schedule of ratings to prove that the 34.19 share is anomalous. The FCC did grant Duke a temporary waiver of one year "to allow for the divestiture of Duke's interest in one of the two FM stations." The Commission found that a limited waiver in this case would not unduly compromise the fundamental policies served by the local ownership rules.

Another sale involves the purchase of KEBC 94.7 Oklahoma City for \$7.5 million by the owners of KJYO 102.7-KTOK. The FCC must approve this sale, and it too has complications because of ratings. In the Spring, 1993 book, the combo had a 24.3 share, but by summer it had risen to a 29.

Arbitron, meanwhile, has discontinued its syndicated local market television and cable ratings, concentrating on radio, as well as research services for local TV and cable in as many as 25 markets nationally. Some 733 Arbitron employees have reportedly been given the axe. Stephen Morris, Arbitron president, said, "The company remains committed to its core business, radio, and is continuing to improve its new Maximi\$er and the development of the personal portable meter... We are excited about the range of products we will be offering to help [radio station executives] better position your medium to advertisers and marketers."

The merging of KIKK AM Pasadena TX (see above, "AM Happenings") and KIKK-FM 95.7 Houston with KILT-FM 100.3 and AM in a duopoly has resulted in 19 staffers losing their jobs, while 15 at WCXR 105.9 Woodbridge-WCPT AM Alexandria VA lost their jobs. Those stations have merged under the Viacom umbrella with WMZQ Arlington VA-WMZQ-FM 98.7 Washington DC. Also in Washington, Infinity, owner of WJFK-FM 106.7 Manassas VA, buys WPGC-FM 95.5 and AMorningside MD.

New duopolies/LMAs in Florida—Clear Channel Communications combines WMTX-FM 95.7 Clearwater-WMTX AM Pinellas Park with WRBQ-FM 104.7 Tampa and WRBQ AM St. Petersburg. A new Miami-area combo involve WHYI 100.7-WAXY 105.9 Fort Lauderdale. Evergreen Media is picking up KIOI 101.3 San Francisco for \$45 million, to be paired with KMEL 106.1, while Heritage Media acquires WEZW 103.7 Wauwatosa, to be operated with its WMYX 99.1 WEMP AM. In Virginia, WVLR 102.7 Appomattox, in an LMA (local marketing agreement) with

WVRV AM Lynchburg, is to go to WXYU AM-WJJS 101.7 Lynchburg VA in an LMA-to-buy. Austin TX KPEZ 102.3 and KHFI 96.7 Georgetown are in a sales-only LMA with KFON AM and KEYI-FM 103.5 San Marcos. Rockport TX KXCC 102.3 is in an LMA with KLTG 96.5-KDAE AM Corpus Christi. Sacramento's KRAK-FM 105.1-AM, already paired with KQBR 104.3 Davis CA, are acquiring KNCI 98.5. It is expected the lower-power KQBR will be spun off.

Communications lawyer Gregg Skall warns broadcasters to be careful of LMAs, especially in not allowing the assuming of unauthorized assumption of control for either the station doing or receiving the LMA. CanXus Broadcasting (WCXU 97.7 Caribou ME), for example, allowed the mingling of accounts receivable, checking accounts and accounts payable with another station, which even told what salaries to pay.

Westwood One and Infinity Broadcasting have announced the purchase of the radio network business of Unistar Radio Networks, Inc. for a little over \$100 million. This deal will give Infinity five million shares of Westwood One, and Infinity chairman Mel Karmazin will become chief of Unistar. Norm Pattitz of Westwood One remains chairperson of the board. Westwood One-owned "Radio and Records" newspaper is said to be for sale.

Public radio [-TV] mergers have hit AK and KY. KSKA \*91.1 and KAKM \*7 merge their community licenses—the result of an "unhurried examination" involving staff and volunteers at the two stations, as well as their boards. Loss of much of the state support was "the catalyst for such a merger." KSKA has 13 employees and an annual budget of \$1 million, while KAKM has 26 employees and a \$3 million budget. Cost savings—in administrative, engineering, development and programming staff—estimated at \$100,000 to \$125,000 a year. FCC approval could take three months, and then the AK Department of Commerce and Economic Development must also rule on the merger. Alice Walsh of KSKA will become vice president of radio and chief financial officer, while Dean Hoke of KAKM becomes president of the merged corporation.

In Louisville, WUOL \*90.5 and the city library's two stations, WFPK \*91.9 and WFPL \*89.3, plan to create a new nonprofit licensee. Their merger, as well, is for financial reasons, with format changes to follow. Both WUOL and WFPK have classical, and the metro area "simply cannot support two fulltime classical stations," said WFPL/WFPK General Manager Gerry Weston. The merger would result in three stations having separate formats, with one probably dropping stereo and becoming strictly a news-information station, another a classical station and a third would involve a "triple A format—adult, acoustic and alternative."

KSRQ \*90.1 Thief River Falls MN was on the air four weeks this summer from cozy but confining studios in a motor home, while the campus of Northwest Technical College underwent asbestos cleansing. Rather than go off the air, as so many school stations do anyway during the summer, KSRQ chose to relocate at its transmitter site 27 km away for its 18-hours-per-day schedule. "It was a real experience. We were very concerned about security, especially for our female staff late at night and on weekends. We made special arrangements with male staff members to be at the site after dark and periodically on weekends," wrote Don

Jorstad, in the MN Broadcasters Association Newsletter. "We were able to get a special dish from AP to keep our news service, and reprogrammed an old satellite dish on the site to get our CNN Network feed. . . All our staff are students learning the broadcast business and they deserve a lot of credit for seeing that the show went on despite mosquitos, flies, moths and the outdoor port-a-potty. . . We all appreciated our college studios when we were finally able to return. Everyone involved has their own favorite story about the summer of 1993. They can now all talk about real radio!" Pictured is the

motorhome parked next to the transmitter building.

It's not just the notorious Greaseman and Howard Stern who are being syndicated, but the pioneers in raunchy morning "humor," Bob [Kevoian] and Tom [Griswold] from WFBO 94.7 Indianapolis are to be featured in syndication. They've been signed to a new six-year contract, in spite of attorney Tom Price's efforts to get them silenced.

Infinity has hit the end of the road in FCC appeals over an old \$6,000 fine for a 1988 "Christmas Party" skit. It must now pay or go to court. Also fined, for reasons varying from public file missing or incomplete, using unlicensed operators, to Emergency Broadcast System faults, were these TX stations: KHER 94.3 Crystal City (\$2250), KBFM 104.1 Edinburg (\$4500), KPFT \*90.1 Houston (\$500), KBNL \*89.9 Laredo (\$250), KKHQ 98.3 Odem (\$20,000), KQTX 105.5 Portland (\$5000); KVLTV 92.3 (\$250) and KIXS 107.9 (\$125) Victoria.

Minnesota Public Radio has been granted a waiver of FCC rules to air a 35-hour radiothon for the St. Paul Chamber Orchestra. The ork is for-profit outfit, featured nationally on APR Sunday mornings. The radiothon was designed to raise money to help the orchestra through the end of its fiscal year. There could be a name change in the works for American Public Radio. They're not saying, but "City Business" newspaper had a story, "APR Plots Changes to Compete Against Biggie NPR." An ad agency, CME-KHBB Advertising, is consulting with the 10-year-old network on a "pro bono" basis.

National Public Radio has a new president. Delano E. Lewis succeeds Douglas J. Bennet, who resigned last May to accept a position in the Clinton administration. Lewis was president of Chesapeake and Potomac Telephone Company,

Delano Lewis

and probably a Democrat. Lewis leads a network providing news and other programming to 400 member stations in the U.S., with programming available to many stations in Europe, effective September. I know Radio Finland goes to NPR at 9 a.m. EST on 103.7 in Helsinki. NPR plans soon to move to its new headquarters building, 635 Massachusetts Ave., N.W., Washington DC.

Another use for the 57-kHz RBDS signal—for navigation, along with the global positioning satellite service (GPS). SCS, by using receivers in fixed locations, would permit more accurate finding of your kidnapped radio-equipped child, for example. Also promoted for RBDS is "CouponRadio," which would use an electronic memory card that listeners insert into specially made radios during commercials. Listeners then take the card to participating merchants who insert it into a special machine that reads the information and spits out a coupon good for a discount on certain products. The "coupon" would also point out to advertisers which commercials and stations were effective.

WGCI-FM 107.5 Chicago is the apparent winner this time in a sex-discrimination suit filed by Shannon Dell. She sued because the station's male drive time hosts, Doug Banks and Tom Joyner, were making more than she was. She sought \$2.9 million, but a jury found the station not guilty of discrimination. Her pay ranged from \$40,000 to \$55,000 per year, while the two male stars were paid between \$625,000 and \$750,000. The decision affirms a long-time policy in radio of allowing paying widely differing amounts to people doing essentially the same jobs.

Also being sued is WXGL 93.9 Lewiston ME—by Jon David Michael Scott for breach of contract. The 36-year-old d-j worked at WXGL 13 months, holding down a night shift. He claimed the station was to have aired spots for his private D.J. Hops company, with the ads run at "almost inaudible levels and at a considerable lower volume than other clients of the radio station." The suit seeks actual and punitive damages, but no dollar amount is mentioned.

The station being sued by Matthew Field (Sept.-Oct., p. 8, col. 3) has won a battle against Class Entertainment and Communications, which wanted the 104.3 frequency of WNCN New York. The FCC dismissed Class' application, and granted GAF Broadcasting, Inc. its license renewal.

See above, "Facilities," for the latest on the WFMU East Orange NJ problems with its fellow stations nearby on \*91.1. The FCC allowed WFMU the right to continue interfering with WSHU Fairfield CT and WVNJ Dover Township NJ. WFMU's previously-authorized height has been accepted by the FCC, which ordered the disputants to negotiate. WFMU will, however, move its antenna a little over a km away from a massive new water tower that might interfere with its signal, plus adding a directional antenna to reduce overlap with WSHU. WSHU, meanwhile, gets to raise its power in other directions—especially toward Stamford and Norwalk. WSHU and WFMU agreed to accept some mutual interference in an overlap area.

And, to the south, WVNJ has agreed with WFMU to accept limited mutual interference, with neither station actually giving up anything, according to WVNJ Chief Engineer Walt Gradzki. WVNJ is working with Philly's Channel 6, WPVI, on a matter of interference along part of the NJ shoreline; an agreement is expected soon. Tensions continue at WFMU, however. Ken Freedman, returning general manager, writes in the

WFMU program guide, "The aggressors have been rewarded" with power increases. In defense, he said "we're going to have to make the protection and expansion of our signal a high priority."

WFUV \*90.7 New York, which holds a CP for more power and wants paying SCSes, can't convince the Corporation for Public Telecommunications Facilities Program (PTFP) that it is a secular station, despite carrying a Catholic mass on Sunday morning. [See also Feb., 1992, p. 7, col. 2] G.M. Ralph Jennings had expected to receive a matching grant of \$286,000, which would help the station go to 150 m (50000 h.v), and thereby reach 170,000 new listeners up the Hudson River who now cannot receive public radio. That ordinarily would have qualified WFUV a high priority for PTFP assistance, according to "Current" newspaper. The principle of church-state separation doesn't require PTFP to withhold aid to a station airing a single religious program a week, Jennings contends. "There are ample ways to distinguish between a station that carries an insignificant amount of religious speech and a station devoted to religious propagation."

WRBB 104.9 Boston to go bye-bye? That's possible as the tiny 10-watt station finds WBOQ 104.9 Gloucester breathing down its back. The Northeastern University station interferes with WBOQ in Somerville, Cambridge and Dorchester. "And with WBOQ looking to increase its power down the road, something's got to give," said Dean Johnson in the "Boston Globe." WRBB might entertain a buyout by WBOQ, particularly if it results in enough money so that they could buy another radio station. Doug Tanger said there is an offer to Northeastern University, but it's nowhere near the six-figure sum that WRBB apparently wants. WRBB expects to be around, but the question is, "Will it be heard?"

Station totals from the FCC as of Sept. 30 (all licensed and operating): AM commercial 4949, FM commercial 4938, FM educational 1641. Notice that only 11 stations separate the commercial ly-licensed FM from AM stations? By the next report from the FCC, the gap may have closed in FM's favor.

From the classifieds: Miller Transmitters—ideal for low power distribution in your home or other AM-FM-TV-CD sources to walkmen or small radios. These are modified FM radios, which have the capability of having extended coverage with an outdoor antenna and booster. Only \$49 plus \$4 shipping from P. O. Box 114, Good Thunder MN 56037-0114; (507) 278-4635. Hmmm. Might this be related to the picture item on the back page of the last FMedia!

Various FM Monitors wanted, such as Marantz, Karg, RE.L. Scott, Fisher and McIntosh, L. Blackman, RG Studio, Lawson Rd., No. 4, N. Reading MA 08164; (508) 664-0174.

"Monitoring Times" mentions my SCS-modified G-E mono factory refurbished cassettes with FM-AM at \$71 postpaid; I also have a small quantity of factory renewed G-E Superadio IIs; call at (218) 879-7676 to find out about availability. Some of this stock will go to Dave Jackway, SCS Technology, at (800) 944-0630.

"FM Atlas," 15th edition now ready—a 208-page book covering main channel programming and facilities, SCS and stereo utilization, with station coverages computed; 102 pages of FMaps, directories by geography and frequency. Companion reference to FMedia! and a great travel aid as you sleuth out FM stations in other markets. One copy \$16 postpaid, two or more copies \$12.50 each plus \$1.50 per order postage. Order from "FM Atlas," Box 336, Esko MN 55733-0336, U.S.A.

#### FM AS IT WAS—OR MIGHT HAVE BEEN

Memories of the defunct KSTE \*88.7 a 10-watt college station in Emporia KS

from Paul Swearingen, Topeka: "I broadcasted on KSTE a time or two-as a member of the Broadcasting Club of KSTC-Emporia (Kansas State Teachers College). Don't know when it went silent. Had forgotten those call letters! Can remember when WIBW-FM (102.5) was almost the only station on FM available in northeast Kansas." The WIBW-FM exciter was later sold for \$1 to Kansas State College, Manhattan, where it formed the transmitter of 10-watt KSDB \*88.1, until that station upgraded on 91.9. I was faculty advisor to KSDB 1959-61; it was my first teaching job.

I can recall DXing KSTE using a modest FM yagi antenna connected to a Harman Kardon tuner; the antenna mounted to the second floor porch of a wood-frame house and rotated manually. Kansas City FM provided the most reliable out-of-town reception, with KXTR 96.5 classical (then and now) and KCMO-FM 94.9 with good, commercial easy-listening music. KBey 104.3 Kansas City was an interesting m-o-r type station that was new to the air while I was in the area; WDAF-FM 102.1 also came on new; they signed on about 3 p.m. Also new was KCJC 98.1 Merriam KS, which I visited. It had a 16-bay antenna (all horizontal in those days) that gave tremendous e.r.p. (effective radiated power) at not too much height. KXTR was playing Heritage classical tapes with studios in a house. KCMK was in a rather dingy hotel downtown; I met a "T. B." there, who later was involved in vending in Kansas City. Around 1980, he drove to Kearney NE and spoke to one of my classes in broadcasting. He wanted me to be part of an SCS undertaking involving 97.5 in El Paso-transit radio, but I was afraid to get involved because of his mafia connections. While I was in Kansas, KANU \*91.5 Lawrence lost its tower and it was off the air for about a year. KAFM 99.9 Salina came on the air, with about 3600 watts and rather poor fidelity, owned by Salina F-M, inc., which has recently agreed to sell the station. KTOP-FM 100.3 Topeka came on the air with rather low power; a downtown Manhattan drug store with an outdoor FM antenna would pick it up and play the music through the store; we called it the "FM Drug Store." KTOP-FM played comedy albums. Bernie Holbert owned a liquor store and was chief engineer of KSAC (AM). He wanted to tape the albums for the FCC to hear, as he believed they were obscene.

I hosted a Sunday afternoon classical program on KSDB, and recall keeping the station on the air after the usual 10 p.m. sign off to carry returns from the Nixon-Kennedy election. We had a few listeners; most of those we were aware of tuned to the nightly classical program. The only rock was when programming live from the "Dive" at the student union on

weekend evenings. KSDB was on 5 p.m. to 10 p.m. weekdays, 9 a.m. to 10 p.m. Saturday, and 1 p.m. to 4 p.m. Sundays.

Somebody sent a map from the "Massachusetts Historical Atlas," 1988, showing the locations of AM and FM stations there. It mentions 179 radio stations in the state, 104 of which are FM. "The two oldest (1940) operating FM stations were WSRS in Worcester and tiny 444-watt WCFM in Williamstown--the state's first public radio station. Other early FM stations were Boston's WJIB (1945; now WBCS), New Bedford's WMYS (1946), and Springfield's WHYN-FM (1946). The number of FM stations grew from 2 to 30 between 1945 and 1959, with the greatest growth between 1960 and 1979 (62 new stations). Twelve FM stations started in the 1980s. The most powerful station--Boston's 100,000 watt WGBH, a public station--opened in 1951." Other old FM stations in MA by year: 1947 WMAS-FM 94.7 Springfield; 1948 WJMN 94.5 Boston, WCAV 97.7 Brockton, WBMX 98.5, WODS 103.3 Boston; 1949 WJFD 97.3 New Bedford, WERS \*88.9 Boston; 1950 WBUR \*90.9 Boston; 1954 WCRB 102.5 Waltham; 1955 WAMH \*89.3 Amherst. I recall talking to Al Hulsen, now head of HI Public Radio, and formerly with WFCR \*88.5 Amherst, in 1966. He said Amherst was unique in having three public/educational FM stations, including WMUA \*91.1.

The history of KQRS-FM 92.5 Golden Valley MN is gone into in the Pavek Museum of Broadcasting Newsletter. Now owned by Capital Cities/ABC, "it has become a cornerstone of the ABC chain." On September 1, 1963 KEVE-FM went on the air at 92.5 mc. For a while after that the FM calls were changed to KADM, with the combo being "Adam and Eve." I think there was confusion with a big

agribusiness firm known as Archer-Daniels-Midland, so the KADM and KEVE calls were changed to KQRS-AM-FM. Format evolved from classical/m-o-r as KEVE-FM/KADM to lots of Latin jazz, some Broadway showtunes, public affairs and talk shows. One of the most popular programs was by the late controversial, syndicated Joe Pine (who was also on KAUS-FM 99.9 Austin MN). KQRS-FM began playing rock in 1968, but only late nights; it went fulltime "progressive rock" around 1970. In 1977 it went toward hard rock and album hits, and finally, in the fall of 1985, under new Program Director Dave Hamilton it adopted its present "classic rock" sound.

FM FORUM

CONTRIBUTIONS FROM READERS

While Michael J. McKenna waits for his 15th edition "FM Atlas" (see "From the Classifieds," above), he suggests I split OR and WA and enlarge the western halves of each state where FM station densities are greatest. Also, "add all allocations to your Station Directory list by state or frequency. Add major U.S. Interstate highways to your maps. It would make it easy for travelers to use your great book."

"The FCC paid a visit to Oklahoma City, visiting KOMA/KRXO 107.7 and KNTL. KOMA was fined for log discrepancies and KNTL 104.9 got a fine for faded tower paint!" according to David Merz. "In the last book KEBC 94.7 jumped to over a 10, combined with KXY's 16 (96.1), definitely a country-dominated market. KATT 100.5 is rumored to be in trouble, because KRXO is gaining in the numbers game. I did hear of a possible LMA."

Signing onto a computer network is IL's Joe Jesson, who mentions my SCA design using the CA3089 chip in SCS circuits, saying "I designed his XR2211 PLL SCA demodulator. . . David [Jackway]'s board is of excellent construction, with no jumpers and small size to be inserted in an FM receiver's detector stage. Anyway, three pretuned boards are available from SCS, 57 kHz, 67 kHz and 92 kHz, \$20 each, from SCS Radio Technology, 5742 Fair oak, Springfield MO 65810." The Elf-II, tunable board, is getting a facelift. It will include circuitry for L-E-Display, with the LED glowing brilliantly as an SCS program is tuned in.

Musical chairs on the FM spectrum in N.E. OH is the subject of a report from Bill Gruber at WAPS Akron. "In a nutshell, big budget WKSU Kent, 50 kw, 122 m, classical/NPR outlet from Kent State University, wants to move their transmitter site to a 1000' tower located in the middle of the Akron/Canton Cleveland corridor. Their signal coverage would be improved in all three population centers, especially in the western Clevelanc suburbs. Also, WKSU wants to put on an 11-kw repeater station in Thompson OH. Neither change can happen until WAPS moves to 91.3. WKSU's planned Thompson repeater application is for 89.1 (WAPS' current frequency), and is completely contingent upon WAPS moving to 91.3.

"So, WKSU plans on coughing up the funds to move WAPS to 91.3. They will cover all costs, including engineering, equipment, installation, and testing [but] they will not pay to move us until their application to move their main transmitter site gets approved--that's what we're waiting for. . . WKSU will remain at 89.7 licensed to Kent. WAPS will move to 91.3, directional, protecting 91.5 WSTB in Streetsboro, but WSTB is planning to move to 88.9 once WAPS is operating at 91.3."

Until December *Bruce F. Elving*

 ON Belleville CJLX 92.3 p. "This 50-watt station, which has stereo, has blocked reception of WBEE-FM 92.5 Rochester NY in the area; WBEE-FM used to be the station Belleville people tuned to for country music. I wouldn't be surprised if CJLX increases power to 3000 watts and then 50000 watts. I

think it was put on the air to block Rochester reception, and to help CJBQ 800 AM, which has just gone country." CJLX is licensed to Loyalist College.

SK Regina both CHMX 92.1 and CKIT 104.9 want to switch to "new country," with the CRTc in Ottawa to decide which station gets it. The switch to modern country is to appeal to younger listeners. "We applied first," cries CHMX.

**On Air—Real Stations and Pirates**

AR Waldron K201CB \*88.1, 250 watts d-a, maximum lobes at 38 and 130°  
 FL Tallahassee W231AC \*94.1, despite grant to nearby Crawfordville FL (WAKU 94.1)  
 GA Dublin W220AR \*91.9  
 GA Swainsboro WXR5-FM 100.5, having moved from 103.9  
 IL Macomb W209AL \*89.7 and W213AH \*90.5, both g, \$, but never on at the same time, apparently because of an agreement. During the day 89.7 is on the air, while overnight it's 90.5. Frank Merrill wonders if the two translators share the same antenna and have a timer to switch from one to the other.  
 MN Good Thunder "WWRB" 105.1 (from 105.9), "Power 105.1," ID with Mapleton-Mankato (where it cannot be heard). "I moved to 105.1 just a week after your October FMEDIA said that I was on 105.9. I moved because of three stations on the same frequency interrupting my station—Twin Lakes IA, Wadena MN and Red Wing MN. I like 105.1 because it's never interrupted. I like how you have shown the relationship between Miller Transmitters and WWRB radio."  
 NY New York WQHT 97.1, along with WHTZ 100.3 Newark NJ, overhauling their morning shows. Hot 97 takes on, after a nationwide search, Dr. Dre and Ed Lover of "Yo! MTV Raps." They take over from Ricky Ricardo, who

goes to weekends only. Z-100, meanwhile, gets the services of John Lander, who comes from Philadelphia. He replaces Ross Brittain, whose fate and that of the rest of the "Morning Zoo" is "being discussed."  
 NY New York WRKS 98.7, owned by Summit Communications Group of Atlanta, announcing that the Gordon Gray 1956 Living Trust, which holds 94.2 percent of Summit's common stock, is retaining the investment banking firm of Morgan Stanley to help evaluate the Trust's investments. The outcome might be the divestiture of some or all of the company's cable and/or radio assets.  
 OK Edmond KTNT 97.7, but "waiting for final FCC approval to move to 97.9, increase power to 6000 watts. Meanwhile KGOK 97.7 Pauls Valley is waiting for us to move so they can up to 25000 and remain on 97.7! There's also supposed to be a Class A station coming to Stillwater on 98.1 soon. Talk about some tight short spacing!"  
 OR Hood River K299AD 107.7, having moved from 102.3 [lite-fed "real country"  
 TN Lebanon WANT 98.9, with satel-/

**AM Happenings Most Likely Caused  
 by FM**

CA Lompoc KTME 1410 silent, except coming  
 on the air for high school football games; ends  
 LMA with KBOX 104.1

FL Cocoa WWKO 860 silent  
 GA Claxton WCLA 1470 off air because of  
 "technical trouble"  
 MA Boston WEEI 590 poised to be sold to WBZ  
 1030, subject to FCC approval. Celtics Com-  
 munications bought WEEI for \$6.5 million in  
 1990, but "falling ratings and advertising  
 revenue have brought the price down to less than  
 half that. Industry sources said the current sale  
 price is just over \$2 million." WBZ is owned by  
 Group W, which owned WBZ-FM 106.7 until  
 1982, when it sold the station to Greater Media,  
 "which has since named it WMJX."  
 MN Minneapolis WCCO 830—two prominent car  
 dealers pulled their advertising after feeling the  
 station charges too much for its shrinking  
 audience. Peterson Pontiac had been spending  
 \$250,000 to \$500,000 there, while American  
 Ford's budget with 'CCO was "worth more than  
 \$100,000." An East Coast ad agency, not named,  
 studied the situation and said that for what  
 American Ford was paying it "could do better on  
 other stations." The appeal of Pontiac to  
 younger buyers has caused a shift of ads from  
 WCCO to KQRS-FM 92.5, WLTE 102.9 (owned  
 by WCCO/CBS) and KTCZ 97.1. "After 27 years  
 with 'CCO... Their audience base has been going  
 downhill."  
 NY New York WQEW 1560 was to have been  
 syndicated by "The American Pop Music Net-  
 work," but the deal is off.  
 NY White Plains WFAS 1230 and WPAT 930  
 Paterson NJ carry the New York Islanders games,  
 but the broadcasts cannot be heard on Long  
 Island. WALK 97.5 has been approached about  
 carrying them, but so far it is not doing so.  
 TX Lubbock KJBX 580 silent.  
 WA Gardiner is where it happened. "Turn down  
 that radio and Rush Limbaugh, or it (the radio)  
 might get shot!" That was no idle threat, as a  
 crew building a house found out. The workers  
 had been warned as long ago as August to keep  
 the volume down. But they paid no heed, so on  
 Oct. 14 Harold Maddox had had enough. He took  
 a .22 and blasted the radio, but did that shut  
 Rush up? No it did not. Rush kept on a-blabbin'  
 from the not-so-pretty-any more AM radio.  
 Maddox pleaded innocent to "reckless endang-  
 erment and malicious mischief." No trial date has  
 been set.  
 WA Seattle KZOK 1590 drops Z-Rock to go 24  
 hour simulcast of "Classic Rock KZOK-FM  
 102.5"  
 AB Edmonton CHED 680 drops CHR after 30  
 years to adopt a hip talk format (like CKLG 730  
 Vancouver BC), aimed at listeners 18-34, mixing  
 in adult contemporary music "to break up the  
 talk segments."  
 BC Vancouver CKST 1040 now strict "Q-104"  
 with m format, taken from CHQM 1320, which is  
 about to become all-Chinese programming with a  
 call change. The Q in "Q-104" comes from  
 various nonIDs CHQM-AM-FM employed:  
 "QM-FM," "Q-1320," and "Q Music." Still using  
 C-Quam stereo.  
 ON Toronto CHOG 640—"call change pending.  
 Drops dance/urban for a mix of hip talk  
 programming aimed at 18-34 demo mixed in  
 with CHR. Evenings are CHR aimed at teens/  
 young adults."  
 "Greetings! As usual, I've been waiting for a new  
 FMAI Please rush—and please, don't ever stop!!"  
 The FM Atlas "map of southern Ontario is  
 terrible. I live in the area and can't even find the  
 cities of interest. You have to re-do that map!"  
 "The 15th edition is the best Atlas yet. The first  
 thing I noticed was the Mexico map which now  
 includes call letters. It must have been tricky  
 fitting them all in, but it looks good. Also, your  
 printer made better use of the margins than in  
 previous editions. The cover is a very nice color  
 (so was the 14th edition's)."  
 "I'm looking forward to receiving another year  
 of FMEDIA! And I can't wait to start looking  
 through the new FM Atlas."

A happy and joyous Holiday Season  
 from Bruce and Carol Elving, FMEDIA!

**FM Rulemakings Proposed**

First date is deadline for filing comments at FCC; second date is for replies. Stations affected, if any, are listed

- AL Warrior 98.7C3 for A, WLBI, Jan. 10, 25
- LA Franklin 98.9A, Dec. 27, Jan. 11
- MN Pequot Lakes 100.1A, Jan. 10, 25
- MN Pillager 95.9A, Jan. 10, 25
- NV Alamo 93.5A, Jan. 10, 25
- NV Austin 99.7A, Jan. 10, 25
- NV Ely 96.5A, Dec. 27, Jan. 11
- NV Eureka 94.5A, Jan. 10, 25
- NV Lund 100.7A, Jan. 10, 25
- NV Ploche 98.9A, Dec. 27, Jan. 11
- TN Morristown WMXK show cause why it should not move to 94.1 A from 95.9A, with Tazewell
- TN Tazewell WCTU-FM 94.1 show cause why it should not move to 95.9A, so WLJQ Colonial Heights can expand from an A to a C3 on 105.9.

**FM Rulemakings Finalized**

Dates are when FCC filing window is open

- AK Anchorage 103.1C1 for C2, KANC
- AK Seward 105.9A for 103.1A
- HI Volcano 107.7C1 for A, KKOA
- MN Staples 94.7C3 for A, KSKK
- MO Moberly 97.3C3, Dec. 28-Jan. 27
- WV Rainelle 95.3B1 for A, WRRL-FM
- WV Webster Springs 100.3B for A, new CP

**Congress Relaxes FM-TV Crossownership Rules**

The FCC has amended the radio-TV crossownership rules to allow waivers in "those top 25 markets where at least 30 other broadcast signals would exist following crossownership." Cox Broadcasting, based in Atlanta, had urged passage of this legislation, which would have the immediate effect of allowing it to obtain WYAI 104.1 La Grange-Atlanta GA. Cox already owns WSB-FM 98.5-AM-TV and the *Atlanta Journal-Constitution*. The WYAI transaction is opposed by Jacor Broadcasting.

**NY Department Store Bans Stern Book; Stern Hit For Racism**

A major bookselling chain, Caldors, has banned Howard Stern's best selling book, "Private Parts," and using poetic-type license, amended the NY Times best-seller list to eliminate reference to that book. "The furor began when the Caldor chain decided the shock jock's tome was too outrageous for its mainstream image," and it decided not to carry it in its 150 stores along the East Coast. Responding to criticism from the Times, Caldors has agreed to print the correct list. Next to the title will be printed: "Not available at Caldor stores."

Stern responded: "How can so-called responsible people distort the truth? It's what we heard about Nazi Germany when they changed history books to fan the fires of anti-Semitism."

Caldors responded: "We would get more customer complaints by selling the book than would warrant the sales we would make off the book."

[Cartoon by Etta Hulme, Fort Worth Star-Telegram, and sent by a subscriber.]

As if lawsuits and book-bannings were not enough, Stern has been hit with a charge of "racist pandering" from a black business association, the African American

Business Association. The AABA has filed two petitions with the FCC. Specifically,

it asks the Commission to ● deny Infinity Broadcasting's pending purchase of WPGC-FM 95.5 Morningside MD-Washington DC; and ● revoke Infinity's license to operate WJFK-FM 106.7 Manassas VA-Washington DC, which broadcasts Stern's morning show. The AABA cited several instances of "racism" on Stern's shows, including references to a black *Jeopardy!* game show, Stern's uncomplimentary descriptions of black athletes, and an interview with Klan spokesman Daniel Carver, who said "Niggers have destroyed most of our public schools. . . Niggers carry AIDS to school. Niggers stink up the whole classroom." The AABA said Infinity's purchase of WPGC-FM, a station said to have a large black audience, "will force black consumers to subsidize racist programming controlled by the same licensee." And the petition accuses WJFK-FM of violating FCC EEO policies by creating, through Stern's programming, a hostile working environment for blacks. Infinity President Mel Karmazin called the charges by the AABA "frivolous; it's absolutely absurd that anyone would think Howard Stern is a racist. He uses parody as a way of pointing out how wrong racism is."

**Small-Print Happenings and FM Industry News**

Media analyst Jim Duncan has trotted out figures showing that FM's rise in the share of listening has been halted. From 1975 to 1992 the rise was generally steady each year. In 1976 43.8 percent of radio listening was to FM, and by 1992 it was 74.6 percent. However, in 1993 it slid to 74.4 percent. [A previous slippage in FM listening was in 1988 when it was 71.4 percent, down from 1987's 71.8.] Duncan attributes the slight FM slip in listening to the popularity of talk radio on AM. "If not for the success of talk radio, FM share would probably have continued to show small increases," he said. The market he shows where FM's share is the highest is Tallahassee FL, with FM accounting for 98.6 percent of listening. Duncan's figures are slightly more skewed in favor of AM than the latest RADAR summary, reported in the "FM Atlas," which indicate that FM has a 77 percent hold on the national radio audience—the same as last year.

Bear Broadcasting of Rochester NH is selling WWEM 96.7 and WXBB 105.3 Kittery ME, along with WZNN AM. WWEM and WZNN are going to Precison Media Corp., while WXBB is being sold to Fuller-Jeffrey Broadcasting. Precison already owns WERZ 107.1 and WMYF AM Exeter NH,

while Fuller-Jeffrey owns powerhouse WOKQ 97.5 Dover NH. Each of the two buyers is paying "in the \$1 million range" for the stations. Class A WXBB, which went on the air a year ago with a country format, challenged WOKQ's dominance in southern NH, but is to become part of the same family, pending FCC approval.

In WI, Great American TV and Radio has agreed to sell Milwaukee's WLZR-FM 102.9 and AM for \$7 million to Saga Communications, owners of WKLH 96.5. This is in addition to the WEZW 103.7-WMYX 99.1 Heritage Media duopoly announced last month. Greater Media, owner of WCSX 94.7 Birmingham MI, is buying WRIF 101.1 Detroit for \$11½ million, while WMQX-FM 93.1 Winston-Salem's Max Radio is buying WJMH 101.9 Reidville NC.

All the commercial stations in Superior WI plus one in Duluth MN would be in one company as WAKX 98.9 and its AM along with KZIO 102.5 and AM, all with studios in Duluth, plan to merge, subject to FCC concurrence. WMMS 100.7-AM Cleveland being merged with WMJI 105.7, also subject to FCC approval.

A would-be duopoly that at least 13 OH stations are objecting to is that of a new 103.3 in St. Marys OH by Lima Broadcasting Co., with WIMT 102.1-AM. The competitors have told the FCC the AM-FM already have a 31.3 percent share of the audience. The CP has not been granted, but is the only one, since a competing app by Clear River Communications was dismissed. The group asks the FCC to dismiss Lima's application or designate it for hearing.

Hit with a short term license renewal—to April 1, 1996—and a \$12,500 fine for EEO violations is WHYN 93.1 Springfield MA and its AM. The FCC found that the licensee failed to adequately recruit minorities for a majority of its vacancies.

The Senate confirmed Reed Hundt as FCC Chairman, replacing Interim Chairman James Quella. Quella had served almost a year since Al Sikes' departure.

Being fined for offenses, such as EBS systems not working or tuned to the wrong station, public file documents missing, running excessive power, or operators not licensed, were these stations: KRZA \*88.7 \$6000, KASF \*90.9 \$2900 and KALQ 93.5-AM \$3000, all in Alamosa CO; KZYR 103.1 Avon CO \$2250, KSMT 102.3 Breckenridge CO \$2250, KQMT 101.5 Eagle CO \$6000, KBRU 101.7-AM Fort Morgan CO \$2500, KCME \*88.7 Manitou Springs CO \$4500, KSKE-FM 104.7 and AM Vail CO \$2850, KZRR 94.1-AM \$2000, KKJY 100.3 \$4500, both Albuquerque NM; KNUA 107.1 Arimijo NM and its AM in Albuquerque \$12000; KPER 95.7 Hobbs NM \$2000, KLEA-FM 101.7-AM Lovington NM \$2000, KMMW 105.1 Maljamar NM \$2600, WZNF 95.3 Rantoul IL \$12950, WQFL 100.9 Rockford IL \$900, WJVO 105.5 South Jacksonville IL \$5000, KINI \*96.1 Crookston NE \$4250, KTMX 104.9 York NE \$2000, WNCN 104.3 New York a mere \$300, KZSD-FM \*102.5 Martin SD and TV \$1000, KILI \*90.1 Porcupine SD \$8300, KWYR-FM 93.7 and AM Winner SD \$4250, KBMA 99.5 Bryan TX only \$250, KOKE 101.5 Giddings TX \$6250, KRVL 94.3-AM Kerrville TX a paltry \$250, KTRS 95.5 Casper WY \$2000 and KWOG-FM 99.3 and AM Douglas WY \$7600.

The creaky EBS, "Emergency Broadcast System," may be [finally!] on the way out. According to the New York Times, the FCC intends to bring the 42-year-old system into the digital age by letting federal and local disaster management officials use various technologies, other than broadcasting, to transmit direct to people, such as via pagers or personal computers. Gone may be the bothersome and usually ignored EBS test tones, FCC fines for stations not having the proper EBS equipment, and the need to train new operators in using the system.

"Making Waves" is an article on Christian broadcasters taking over the airwaves, and published in the November Progressive magazine. While centered on shortwave, or "world band

radio," it mentions "a network of FM stations in Ecuador and along the U.S.-Mexican border." The article charges that religious stations leave a version of Christianity that coddles right wing regimes and upholds U. S. domination in the Third World. Religious broadcasters are quite properly trying to reach every major language group by 2000, "rescuing Uzbeks, Turkmen, Mazanderanis, and Macedonians from a Christ-less eternity. [Their efforts] may seem harmless, even absurd. But they are creating cultural and political havoc around the globe." The article was written by Frances Rivers, with research "provided by a grant from the Fund for Investigative Journalism."

A "duel on the dial," at 89.3 in Washington DC involved participants at WPFW. The internal struggle left the station off the air for three days, with charges that parent Pacifica Foundation, based in Berkeley CA, was too aloof to help the struggling, predominantly black station. The station has tried to improve its financial base, such as going to businesspersons and seeking underwriting, only to be stopped by Pacifica. Leon Collins, former general manager, now employed in Houston public TV, said he had to fight Pacifica for everything from money for toilet paper to a new transmitter, after the old one blew up during his second week on the job. WPFW's budget is \$685,000, of which only \$350,000 comes from listener subscriptions. Other stations, such as KPFA \*94.1 Berkeley, raise about 75 percent of their funds from the public. The dispute started when several volunteer programmers came to the station and demanded that special programming be aired immediately to deal with the crisis at the station. One programmer, who had her show pre-empted, locked herself in one of the station offices. Finally, it was decided the station was "anarchistic" and taken off the air by station engineer Bob Daugherty. By Monday morning Oct. 4, the station had a new general manager and was back on the air. Daugherty believes the station needs to diversify its programming and have a more appropriate early morning format for commuters, and thinks the concept of a monthly program for participants to discuss, on air, their concerns is a good one. "The concept raises hackles in Berkeley, but would seem to be in line with the Pacifica charter, which calls for open debate leading to understanding 'between individuals of all nations, races, creeds and colors'," says Michael Hardesty in the Washington Post.

The FCC has upheld a staff action returning, under the "hard look" rules, an FM application filed by Roger D. Bouldin and Raymond Deakins for a new station on 103.1A in Tusculum TN. The application was timely filed during the appropriate window period, as were two competing applications. The FCC found that two pages of the engineering section were missing, and therefore returned it "to sender." The Commission was unimpressed with the Boulding/Deakins argument that the missing data could be derived from other portions of the application or its exhibits. "The Commission said the application was properly returned as insufficient for tender."

Another use for TV's SAP at 78.67 mhz is Autotalk, Inc., producers of continuous regional traffic reports for cars, which would use the Home Shopping Network's SAP. The system is in use in San Francisco and Los Angeles, and is hoping to expand to 30 markets in the next five years. For more information: Kamer/Singer & Associates, Inc., 145 Natoma St., Ste. 300, San Francisco CA 94105; (415) 512-6800.

KRXS 97.3 Globe AZ was to have received an upgrade from an A to a C3, but lack of concurrence by the Mexican government is delaying things. That and other requests within 320 km of Mexico are apparently on hold until that government gets around to agreeing to the upgrades. "Manana..."

Union MS 104.1 has no call letters yet, and it might never; that is, if Dorothy Torgerson remains a principal. She is confronted with a lack of candor/misrepresentation issue resulting from ownership in a Meridian MStation she denied being involved with during the Union MS hearing. She allegedly had a 49 percent interest in that unnamed station and was on its board of directors. The Commission is questioning her fitness to be a licensee; she could face fines up to \$250,000, whether or not she continues to hold the 104.1 license. Her company, which could be squashed by the FCC, is Lady Bug Broadcasting.

The "M Street Journal" reports that at the fall NAB Radio Show WCSX 94.7 Birmingham-Detroit programmer Ralph Cipolla said on a panel that his playlist is "all an illusion and basically we play the same songs over and over..." The tape of that panel somehow came to rival WRIF, which later played it over and over again on 101.1 as a promo for all to hear. WCSX is not commenting on that promo.

Arbitron decided to reissue the Wichita Falls spring '93 book after KTLT (106.3)'s Jim Schroder, in reviewing the diaries, found that "106" entries were credited to KHKS Denton-Dallas instead of to his station. Schroder knows what to look for; this is the second time his local book had to be reissued after one of his visits.

The federal government in Canada has referred back to the CRTC decisions approving two digital audio services for cable systems. Both Cogeco and Shaw were given five-year licences to offer pay services in association with U.S. providers; Cogeco with Digital Cable Radio, and Shaw with Digital Music Express. The government is concerned about "cultural sovereignty," and is asking if more Canadian music could be used, and for the companies to justify their failure to not make the services available to all parts of Canada. The music industry has appealed the decisions, terming them "cultural assassination." A music industry task force is working on a study of digital audio, to be released in January, according to *Broadcast Technology* magazine.

Broadcast totals as of 10-31-93. FM still hasn't surpassed AM in commercial stations on the air and licensed, but it will soon! FM, 92-108 mhz, now 4945, with AM, 540-1600 kHz only three stations ahead at 4948. FM educational, 88-92 mhz, 1650 stations.

From the classifieds: Complete FM studio for sale. Boards, carts, reels, mics, etc., Jim Phillips, 414 Washington Ave., Defiance OH 43512; (419) 782-8591.

As a new inspirational Christian radio ministry serving north central IA and set to begin on air broadcasting in February, we are looking for qualified air personality/PD who has the gifts and talents to grow into greater levels of ministry and responsibility at a beginning salary of \$18,000 plus full benefits. We are looking for quality, ministry-oriented communicators. Resume and tape to Michael Bayliss, KJYL \*100.7, PO Box 325, Eagle Grove IA 50533.

Wants to buy SCA plug in module for RCA BTE15A exciter. W.C. Florian, WNIB, 1140 W. Erie St., Chicago IL 60622.

Station for sale: KKVO \*90.9 Altus OK—Christian, noncommercial with Gates FM-1C 1 kw transmitter, with established audience; eight years on air, \$65,000 negotiable. P. Galloway, KKVO, PO Box 787, ZIP 73521; (405) 477-4110.

Panaxis FM 1500.5 to 15 w FM stereo exciter/generator/transmitter, frequency adjustable, almost new \$875. G. De Oreo, Big Island Public Radio, Box 1111, Kurtistown HI 96760; (808) 966-6543.

#### FM AS IT WAS—OR MIGHT HAVE BEEN

##### "FM IN THE CAR"

BY WILLIAM AND ANN MARON, 1958  
ARTICLE REPRINTED FROM "ELECTRONIC INDUSTRIES," CHILTON CO.,  
PHILADELPHIA 39, PA

"How about FM in the car? Well, here is a report by a radio engineer; he gives actual readings with an FM auto radio in urban, suburban and country driving. His conclusions will interest every FM broadcaster" says the preface to the article.

The authors took a road trip in a car equipped with a Blaupunkt AM-FM radio. Editor's note: FM auto radios and tuners are made in the U.S. by Franklin Electronics, Bridgeport PA, and Gonset, Burbank, Calif. The German Blaupunkt is imported by Robert Bosch Corp., Long Island City NY. The radio is installed in the dash and a meter installed below the set "for precise tuning and measuring signal strengths qualitatively." The antenna is mounted on the lid of the trunk, connected by RG-8/U cable to the radio, with several .05 mfd. capacitors connected to various automotive points to ground to reduce interference. A 10,000 ohm resistor is connected between the ignition coil high voltage terminal and the common terminal of the distributor.

General results: Reception of FM broadcasting in a car is outstanding. It is a unique experience to drive over hill and dale, under bridges, through short tunnels, on the streets of New York among the tall buildings, under trees and beside power lines and all the time have the program volume remain at a constant level. There is none of the "drop out" experienced with AM. There is no noise in passing a neon sign or a high tension line. Although the signal strength varies, as indicated by the meter, the listener is totally unaware of this. The vertical antenna is extremely effective for receiving FM stations. We received signals from WNHC-FM New Haven CT and WALK-FM Patchogue L.I., New York in the vicinity of Point A (see map [N.E. NJ]), the distances being about 70 miles or so by air. . . The speed of the car has no effect on the signal. We made observations on the New Jersey Turnpike and the Garden State Parkway at the maximum legal speed limit, 60 mph.

While all FM broadcast stations use horizontal polarization, a vertical antenna provides excellent reception. There is the added advantage of being virtually non-directional. Especially startling is the constant volume level of the program material in the presence of man-made structures and natural obstructions that tend to shield and degrade AM signals.

Touring: We made a 1500-mile trip to observe FM broadcast reception on an automobile receiver at localities away from New York City—to Buffalo, via the Queen Elizabeth Way to Toronto, Ontario. King's Highway 2 from Toronto was followed to Kingston, Ontario, the gateway

to the Thousand Islands, then over the international bridge back to the United States. From Alexandria Bay on Route 2 through the mountains to Utica NY, then to Albany, then the Massachusetts Turnpike to Boston and Gloucester. About three-quarters of the trip was made through mountainous regions, with many peaks over 2000 feet. Rugged terrain is supposedly detrimental to VHF propagation; however, all along the route we listened to FM broadcast stations. Nearly all FM stations broadcast the same program as the affiliated AM stations.

From time to time the receiver was switched to the AM broadcast band for comparison of reception with AM. The results on AM are so poor that no comment will be made. On leaving New York, WCBS-FM was tuned in. The meter reading being 5. By the time the Harriman exit on the Thruway was reached the signal was down to about 1. The program was no longer understandable and the background noise high. Afterward, WPIK Poughkeepsie NY provided program for about 70 miles. Some 30 miles south of Albany two stations were checked—WGFM Schenectady and WFLY Troy. The signal from both stations read about 3. Going west on the Thruway the following stations were tuned: WRUN Utica, 4, WDDS Syracuse 3, WSYR-FM Syracuse 3.8, WRNY Rochester 2.5. Numerous other stations were heard, but time did not permit identifying them, as at a speed of 60 miles, distance is covered quickly, and some stations give their call letters every half hour.

About 50 miles from Buffalo WBEN-FM and WBNY came booming in. Continuing into Canada several stations were heard with good signal strength. Going east toward Kingston, both WBEN-FM and WBNY had 2.5 signals in Coburg, Ontario, about 80 air miles from Buffalo. At Colburne, Ontario, WHCU-FM Ithaca NY has a 2 signal. The distance is 115 miles over rough terrain and Lake Ontario. Returning to the U.S., WFLY Troy was monitored, and going toward Springfield Mass., we heard WMAS Springfield, WMMW Meriden CT, WNHC-FM New Haven (65 miles). Approaching Boston the dial was alive with FM stations. In Belmont, a suburb, a few stations were checked: WCOP, WCRB, WEEI, WLLH (Lowell), WNAC. On the return trip, WXHR Boston was monitored. The signal dropped below 1.5 at Sturbridge, which is about 60 miles.

In Great Barrington, Mass., a check showed that WGFM Schenectady and WFLY Troy have 3 and 2.5 signals. On Route 9D, leaving Cold Springs, NY, WBAI was tuned in all the way to New York. The signal was over 5 near the

George Washington Bridge. The reception obtained with FM during this trip conclusively indicates that it is a highly desirable means of receiving programs in a car—with the same quality as obtained with FM receivers in the home.

Some of the stations listed on the Marons' chart: WHOM-FM 92.3 New York, WNRC \*93.5 New Rochelle, WAAT-FM 94.7 Newark NJ, WABC-FM 95.5 New York, WSTC-FM \*96.7 Stamford CT, WRCA-FM 97.1 New York, WHLI-FM

"the voice of long island..."

\*98.3 Hempstead N.Y., WOR-FM 98.7 New York, WBFM 101.9 New York, WFMX 104.3 New York, WWRL-FM 105.1 Woodside NY. \*Class A station, 1000 watts ERP maximum.

This article was "compliments of Robert Bosch Corporation car radio division," and I've had it since buying my Blaupunkt FM-AM car radio in 1960. All broadcasting then was monophonic and station polarization horizontal only.

FM FORUM

CONTRIBUTIONS FROM READERS

Continuing Bill Gruber's discussion about the musical chairs in northeast OH's educational dial: "WAPS will gain primary and secondary coverage," plus we are getting a new tower, ice-proof antenna, transmission line, top-line processor/stereo generator, mod monitor, etc. We need it all badly, and there's no money of our own to pay for any of it."

WSTB "would take a while to raise funds for the needed new antenna. If they eventually move to 88.9, WAPS would likely file to increase ERP or do nondirectional ... it's not too severe a null, though, and we might just live with it, depending on finances." One complication is that WTRUW \*91.1 Cleveland just got approval for an increase to 14500 h.v, directional, which might adversely affect WAPS on the adjacent frequency.

Freewheeling Robert J. Luertsema (pictured) of WGBH \*89.7 Boston has been

World Radio History

told to stick to a more predictable classical music format. In response, he agreed to disagree and will be only heard on weekends. He was told that music selected should be on its merits, not because of some composer's birthday or because it is a holiday, and between 7 and 10 a.m. most works should be under 20 minutes and fairly easy on the ear. News of his semi-retirement spread quickly, with Deborah Borda, managing director of the NY Philharmonic saying, "He was one of the great music educators in this country, and in that way he played a tremendously significant role. He proved that you could program classical music in a stimulating high quality yet accessible way."

Harry Staszewski, Jr., dangled key-chains at me through the mail and said, "FMedial is great. Thank you. Also, my G-E Superadio III works fine. Please find two samples of Key Tags that my company supplies to the radio market. I'll send a free sample to anyone that sends me a S.A.S.E. with 52 cents postage to HJS Diversified, PO Box 1132, Erie PA 16512."

The Classical Music Broadcasters Association's 1994 convention to be April 27-30 at the Century Plaza Hotel, Los Angeles, (415) 986-2151, and hosted by KKHI-FM 95.7, % Bruce Beebe, President, 335 Powell St., S.F. CA 94102.

Radio Shack quietly cans its battery club program. Current battery cards are being honored, but not much longer will you be able to march in and pick up a free, red 9-v or smaller voltage battery. I've had a minimum of five battery cards the last 18 years, and estimate I have received over 1000 free batteries from "The Shack."

Radio Shack BATTERY CLUB MEMBER

Entitles Member to One Free Battery Each Month for One Full Year

ISSUED TO: Bruce Edging

No purchase required, absolutely no obligation—It's just our way of encouraging you to visit our store. To get one FREE battery each month, simply present this card to salesperson or cashier at any participating Radio Shack store or Authorized Dealer. Offer applies to the four General Purpose EVERECELL® batteries shown. Only one card per member, please. Non-transferable. When this card expires, ask for a new one. Thanks for shopping with us.

Through the years, I have gotten free metric calculators, resistor charts, beach balls and flashlights. It seems all these premiums are gone, reducing the incentive to visit a nearby Radio Shack store. Now they're charging for their catalog, which used to be free when you went into the store. There are coupons which are said to make up for the price of the catalog—if you're inclined to buy from them anyway.

Ken Chatterton from the National Radio Club has heard from several FMedial readers in response to the July mention of the AM Station Map Book. You can get a copy from the NRC at \$9.50 (not \$19.95 as I said), PO Box 164, Mannsville NY 13661-0164. The new "AM Radio Station Log" (for 1994) is about 300 pp., \$19.95.

Reg. U.S. Pat. Off. Blaupunkt-Werke GmbH, Milschheim, Germany.

Ernie Wilson of Panaxis Productions has quietly folded his "Experimental Broadcasters Newsletter." Much of it pertained to pirate activity on FM and shortwave, but his equipment catalog continues from PO Box 130, Paradise CA 95967-0130. His latest mailing was an appeal from "KAPW;" 88.9 Phoenix AZ to continue broadcasting and for legal expenses in the fight with the FCC—mainly to pay off attorney William M. Platt of Phoenix. Bill Dougan says his "KAPW" serves only a 3-5 km radius and is true "community access" radio. For more information write PO Box 47473, Phoenix AZ 85068-7473.

Probably replacing Wilson's rag is one that talks about "sandbox radio," with Dougan quoted among others in "Radio Resistor's Bulletin." It's free (for now) from PO Box 3038, Bellingham WA 98227-3038. It, too, covers alternative radio, but seems too anarchistic for my tastes.

Sending a promotional sheet from Canada's CFMX stations is K. W. Walter, who says "it is encouraging to note that CFMX is now the leading commercial classical station in North America. I keep

CFMX—  
The Sound of  
A Different  
Drummer  
96.3 103.1  
Classical Music  
for Southern  
Ontario

hoping that more stations in the U.S. will see the 'profitable' light, and minimize the redundant talk or country-western styles." The CFMX blurb claims CFMX Cobourg-CFMX-1 Toronto have "320,000 listeners, making it

the No. 1 major market classical station in North America based on share of audience. . . We are patiently awaiting final CRTC approval for our 96.3 transmitter's new home in downtown Toronto on top of First Canadian Place."

Mike Cherry, in British Columbia, has received FM skip all the way to Mexico, getting several Mexicali stations, as well as supplying some CA non-ID information. He heard FM skip three times last summer; I'd guess all of it to the south.

The general manager of WAER \*88.3 Syracuse NY, David R. Anderson, wrote in response to concerns raised about WAER's efficiency in fund-raising (see November, 1992, p. 7, col. 2). "The issue concerning Dr. John Oldfield is very complicated and not easy to describe. Dr. Oldfield is on the advisory board of one of the other local public radio stations, a competitor of WAER. He has difficulty in picking that station up at home since it is more than 40 miles away (WRVO \*89.9 Oswego-b.e.). In addition, he feels that the reason he has trouble is due to intermodulation problems between WAER and the student owned station, WJPZ (89.1). We disagree on his findings. . . Dr. Oldfield produced

the 'support per subscriber' numbers by combining inaccurate department expenditures. In order to get the \$222.99 figure he included all of our expenditures that did not deal with membership. Examples of these expenditures would be telephone costs . . . general advertising of the station, costs for procuring underwriting donors, and non-membership printing costs.

"Some stations like WAMC in Albany are sole NPR stations and so they raise significant more money for their programming than WAER can when we compete with two other NPR stations in a medium size market. WJPZ is not associated with the university but owned by the students and is a private corporation. In addition, they do not raise funds from membership. [WAER's] mission is to serve the community and to provide a professional training ground for students. With a long list of famous WAER alumni serving in the industry and numerous local, regional and national awards won by students, WAER is a very good investment for Syracuse University. We give students that extra experience that cannot be learned in the classroom. . .

"When I came to Syracuse in 1982 the station was being run by the students. Most of them were not here for career experiences, but rather as a place to play their own music and do their own thing. It was dominated by nonbroadcasting people. This was very unlike the WAER of the '40s, '50s and '60s. The station now has a solid training program, state of the art equipment for students to use and the security of constant outside funding. . . WAER emphasizes journalistic and sports reporting training. WJPZ provides an excellent training program for students who want to be announcers. . . Dr. Oldfield's campaign to discredit the operations of both WAER and WJPZ is not based on fact, but rather on his own personal viewpoints. . . WAER is still one of the hardest working organizations that is training the future broadcasting professionals." In the latest "Public Notice" mailing from my FCC messenger service, it is noted WAER's application for license renewal was granted Oct. 26, 1993, despite a petition to deny, was filed back on May 1, 1991.

Charlie Persons, owner of KVBR AM Brainerd MN, retires after 67 years in broadcasting. "In 1936 he started the third experimental FM station in America, W9XYH in Duluth, whose only listener was the station owner; he had the only receiver in town," wrote the Minnesota News Council in its summer, 1993, issue.

"Howard Stern, in his book, mentions that his father, Ben Stern, used to work as an engineer at WHOM, for a well-known DJ named Symphony Sid. Howard says WHOM-FM later became WKTU and then WXRK"—all on 92.3. "I guess the 'Seven Dirty Words' (which he lists, by the way) are not forbidden in print media. They're

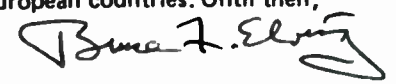

used throughout the book," reports Jeanette Johnson.

Another reader, who obviously is not a fan of much that is heard on FM these days, writes: "Just for the sake of controversy, I'd like to propose two new classes of rock music. First is 'trash rock'. This is a broad general category which can be characterized by gross over-processing and excessive loudness. Listeners require 'lame' brains and dead ears to be able to listen to it for more than a few minutes at a time. Let me nominate 103.3 Indianapolis (WRZX) as a perfect example. Best way to listen to one of these stations is with the volume at a minimum. Those who don't are prime candidates for hearing aids in a year or two. Then, there is 'tasteless rock' with a typical vulgar announcer who sees how close to getting an FCC fine he can get or already has. Best example is, of course, any station with Howard Stern. In the Indianapolis area, the nominee is WFBC 94.7. Bob & Tom are certainly a fine pair who do their very best to lower community standards. These stations are best heard in the vicinity of the city sewage treatment plant. Fulltime listeners probably think 'Deep Throat' was a boy scout movie.

"Several of your readers like to describe certain formats or programming as 'lame'. Let me offer my own idea what this means for classical stations. That is Baroque music. My own term is 'TOT's' or 'tired things'. At the opposite extreme are 'NMT's' or 'nasty modern things'. My own collection contains a preponderance of the latter, pieces the 'classical jukebox' stations like to hide at odd hours so nobody hears them. Well, enough poking fun. Hope that winter is kind to you and your family this year."

FM in England: Walter Garrett sent an article from the "Village Voice" mentioning the deregulation "revolution" in British broadcasting. It seems the new, local and regional stations are making money, so much so that a broadcasting franchise means a "license to print money." Three bids were recently heard for a nonpop FM service on 102.2 and possibly other frequencies, with the award going to Showtime, a company that bid twice as much as its rivals to the British treasury—£2 million plus—and "promised a cheery service of show tunes, the best of Broadway and West End musicals, and 20th century popular music as shaped by Gilbert and Sullivan. [But] when the day came for the company to put down the cash it couldn't. The Radio Authority passed the buck on to the runner-up, Classic FM." The new licensee will compete with the BBC's rather elitist Radio 3.

Next month, FM Forum begins with run-down of British and U.S. Voice of America stations on FM in various European countries. Until then,

NY New York 104.3 WAXQ (WNCN), "Q-104.3

**PURE ROCK  
Q104.3**

FM" (strict), now with p, having dumped classical. The demise of WNCN leaves only WQXR 96.3 as a commercial c station, although WNYC-FM \*93.9 has that format. "All the

station's current announcers will be given a chance to try out for the station's new on-air slots." This "came as a shock to classical music lovers [and was] something like what happened when the AM side of WQXR changed its format to big band music, preventing those who can't receive WQXR's FM signal from listening to classical music. . . I remember when WNCN carried all jazz at one time and there was a big battle over that when the station decided to go from jazz to classical. Now WBGO \*88.3 Newark NJ, another NPR station, and one other college station here in the New York area play jazz." WNCN "aired a significant amount of news, including 'The Wall Street Journal Report' each hour on weekdays when the markets were open. There were also morning and afternoon drivetime newscasts and features. There is no word yet as to WAXQ's non-music programming plans, though GM Randy Bongarten says he will not be hiring air personalities on a par with Howard Stern, preferring to emphasize a 'music intensive' format. . . If nothing else, they should do better than the late WZRC 1480 which ran Z-Rock until 5-27-93. Because: they're an FM station. I don't think the Z-Rock target audience touched AM. WZRC has a bad signal in a lot of the suburbs due to being directional—highly directional into the city and the ocean at night. WZRC had about a .3 share. How much worse could they do?" Before returning as WNCN, it was for a 12-day period in 1974 known as WQIV, "Quad Four" with an AOR format. Jim Cameron of JForum was drivetime jock on WQIV and worked with Tony Russomanno, who did news. "GAF bowed to heavy pressure from pro-classical groups and, after going dark for three days, returned to the classical format. WNCN remained classical until last month." Besides the short-lived WZRC 1480 AM, the metal market has been served by WSOU \*89.5 South Orange NJ. SAP/SCServices, 57, 60, 66.5, 67,  
71, 78.67, 92 kHz

Symbols are as in the "FM Atlas" and in  
November's FMedia

CA Los Angeles KUSC \*91.5 t1, Armenian (Islamic, Iranian category), 92 kHz. Centered near its 67 are three services not listenable on ordinary SCS radios, except for Icom receivers tuning below 100 kHz to which the output of an FM detector is fed. They are Arabic at 60 kHz upper sideband, French 71 kHz upper sideband, and negotiating with a reading service for the 71 kHz lower sideband. "Lack of receivers is slowing up the project." An ordinary SCS receiver at 67 kHz tunes them in as garbled talking, like listening to single sideband on an AM shortwave radio. "As we add more services the audio will sound even more jumbled on a regular SCS radio. . . I am consulting with Seiko for a 66.5 kHz data channel which will be in many markets across the country; it is locked to the stereo pilot. Seiko took over from AEI, which ran into financial problems. It is in place in Portland and OR, and gives everything from stock prices to sports scores. I may even go back to China to advise them on the system."

KTWV 94.7 tZ, 67 kHz, Data Broadcasting Service

KKLA 99.5 tO, O, two Chinese services  
KKGO 105.1 still has SCA Data System's Music 4, but only using it for internal station purposes to feed two other out-of-market stations the company owns for it to hear in the L.A. market.

KLVE 107.5 still tZ, 67, but no 92. The t1, Armenian, folded; however, the channel is still leased, hoping to find a different tenant.

CA San Francisco KUSF \*90.3 tO, 67, Russian KALW \*91.7 tO, 67, Sino Broadcasting, headed by Charlie Chan. "KFOG 104.5's 92—Arthur Liu's group folded, but he's mixed up with our Sino Broadcasting. We're selling FM-SCS receivers now, just like Denis Wan has been doing."

CA San Jose KBAY 100.3 t1, 92 (Radio Sedaya Iran, as on the 67 of KPCC \*89.3 Pasadena), headed by Mo Chehrzad, 2444 Wilshire Blvd., Santa Monica CA 90403-5811.

DC Washington WASH 97.1 tC, 92, relay of WMDO 1540 AM with Spanish programming.

KS Kansas City KUDL 98.1 t(), 57

MD Hagerstown WWMD 104.7 tS, 67. "I've heard Penn State football games and the Hagerstown Suns games—a minor league baseball team."

MN Faribault KOCL 95.9 no 92 (only occasional chirps); 67 still tS, sports and special events

MN Glencoe KARP 96.1 tU, 67

MO Branson KRKZ 106.3 tS, 67, heard with a ball game, same as on the main channel, but

without the commercials.

MO Harrisonville KCFX 101.1 tC, 67, repeat of

main channel, with music sometimes in place

of commercials

MO Kansas City KKFI \*90.1 tU, 92 (tL, 67)

KCMO-FM 94.9 tS, sports (occasional audio),

92 (tM, 67) [tX, 67]

KLTH 99.7 tG, 92, Mormons (no 67; had/

MO Springfield KXUS 97.3 no SCS. Had tR, 67

"but not heard in five months. They are very

paranoid and won't tell me whether or not it

might return."

NM Albuquerque KRQE channel 13 has been

running Sally Jesse Raphael in a Spanish

soundtrack on SAP 8-9 a.m. weekdays,

"except sometimes they forget to turn on the

SAP; if it is on they sometimes forget to put

the Spanish and instead play it in English."

It is the only program KRQE is known to use

the SAP for.

NY New York WQXR 96.3 still testing "on and

off" with Indian music, 92. "Still no sign

the Jewish service mentioned in Sept.-Oct.,

5, col. 1."

New York market—all three Italian SCServices

advertised their SCSets the week before

Christmas in the Italian paper Oggi. ICN (WBGO

88.3 Newark's 67) has five types starting at

\$99.99. Radio Maria, the Catholic service on

WRTN 93.5 New Rochelle's 67 and WYNY 103.5's 92, has radios for \$50 and \$75. Radio Azura USA (on WFME 94.7's 67) offers an Emerson AM-FM-cassette unit for \$65. "WRMN" the Filipino service on WBGO 88.3's 92 has started a promo (see Nov. p. 4, col. 2) at a store in Jersey City. "The way it works is you pay \$39 for their normally \$65 radio and you have to sign up for AT&T long distance service for three months. After the three months are up, the purchaser gets a \$39 rebate. So the radio is free, sort of." "Some celebrity once called TV 'a vast wasteland'. I would apply the same expression to radio. AM will soon be extinct and FM is a cacophonous discord of thumps, thuds and twang twangs, geared to 'the lowest possible denominator'! ... We have a lonesome FM here which purports to be 'easy listening', but their repertoire is a monotonous repetition of 'hits of the past', heavy on vocal s, such as by Doris Day, etc... I am not averse to some of this modern music. Picked up a tape of an English fellow named Chris Rae, and his stuff is quite decent. . . Even 'Muzak' has gone 'moderne'!" "I received the new FM Atlas and Elf-2A a few weeks ago and found both to be excellent. . . Please let me know when the next FM Atlas is out. Thank you for the help on the radio and your new, excellent FM Atlas." "I finally ordered SCS from you against my better judgment, having received complaints that your modification work was less than professional. I credit you with quoting my complaint in FMedial, however. Is the [tuning] backlash bed on all the Superadio IIs? Mine is horrible. At least it has nice audio for general listening." "I would agree that maps of Ontario in most editions of FM Atlas are awful. I would much prefer to look at a Great Lakes nautical chart from NOAA when FM DXing than FM Atlas charts. The NOAA charts clearly indicate the location of Windsor, Leamington, Chatham, St. Thomas and Tillsonburg, often showing the exact location of radio towers. . . You may want to consider having a separate Canadian edition of FM Atlas published with improved charts and maps." "Sorry, but will be unable to renew my FMedial subscription. Keep me on the list for future FM Atlases!" "I am not satisfied with my purchase and am returning it for a refund. I am disappointed in the quality of reception and do not feel this unit suits my needs." [the "Publishing Estate".] "Happy Holidays to you and everyone else at/ "The SCAdapter for my Pro-2006 scanner works fine. I only wish there were more stations in this area with an SCA." "I received my 'black box' from Dayton today. It's really nice and works well. It's rather easy (10 minutes) to set up, too!"

 "Great job on the new FM Atlas, as always!"

**AM Happenings Most Likely Caused by FM**

AR De Witt KDEW AM 1470 ordered to show cause why its license should not be revoked, with a possible liability of \$250,000 for continued violation of Commission's rules which require notification of discontinuance of operation of broadcast stations.  
 LA Baton Rouge KBRH 1260 talk format, and the commercial sister station to WBRH \*90.3.  
 LA Gonzales WSLG 1060 off the air since spring.  
 LA New Orleans WTIK 690, "the granddaddy of all top 40 stations, is now pretty much duplicating local (Covington) WARB 730, a 250-watter, until it goes off about 7 p.m., and then has its own talk shows (including) David Duke with his own local talk show."  
 LA Port Sulphur KAGY 1610, "given some years ago to a local Pentecostal church, has been off the air for months."  
 LA White Castle KKAY 1590 now black gospel  
 ME Presque Isle—FCC asks WTMS 1390 why it should not pay \$250,000 for not notifying of its being silent.  
 MI Flint WTRX 1330 faces an FCC hearing to determine whether it can "expeditiously resume broadcast operations."  
 MN St. Paul KLBB 1400, part of an apparent local conspiracy against older listeners that included WAYL 93.7 ditching easy listening, WCCO 830 "turning itself inside out in hopes of attracting more young listeners, and now KLBB radio [is] changing its 'Music of Your Life' format, probably to rock." KLBB is part of a new triopoly with WTCX 106.1 Lakeville and KBCW 1470 Brooklyn Park (Anoka). KBCW is silent pending sale approval from the FCC. The trio is headed by Brian Turner, who had been program director at KJJO-FM 104.1 when it was modern rock. They're planning a central studio in Minneapolis with spots for individual stations separately controlled, and hopes to be on satellite with the National Alternative Network. Programming on AM and FM would be similar to the student alternative rock found on KUOM 770 AM. "Turner is never in and fails to return phone calls—I want to bitch about the probable music and waste of spectrum space. There goes 'MOYL' from KLBB; Turner's number is (612) 338-2211."  
 MS Poplarville WRPM 1520, a 10-kw daytimer, "appears to be off for some time. It put 107.9 on the air 20 years ago, but the station was bought by a veteran MS broadcaster and replaced the Class A on 107.1 in Gulfport, which was sold."  
 NY Mechanicville (Albany) WMVI 1160 bought by ex disc jockey at auction for \$45,000. The new owner is Joseph Motto, "Boom Boom Brannigan," who had been on WPTR 1540 for 15 years until 1975, and then on WABY 1400 as a talk show host. WMVI, a 250-watter, had an FCCp for 5000 watts, but during the bankruptcy upheaval the 5000 watt permit lapsed.  
 NY Niagara Falls WJLJ 1440 plays old time rock'n'roll, but on Friday after Thanksgiving they ran four remotes in six hours. "Poor programming." WHTT-FM 104.1 and AM buys WBUF 92.9 Buffalo.  
 TN White Bluff WQSE 1030 silent.  
 TX Beaumont KZXT 1380 off the air.  
 TX Bellville KFRD 1090 off the air.  
 TX Dallas KAAM 1310 becoming KTCK, "The Ticket," and all sports talk station, dropping big band/nostalgia. "There are two ways to look at this: A) Hot ziggidy, we're getting a new

all-sports talk radio station; or B) civilization is crumbling to the beat of a different drummer." KAAM has been requesting all its listeners to send in a postcard with their address, so they can keep them informed of the future of its music. "Apparently an honest effort is being made to find a new home for it. After the changeover, AM stations in the Metroplex will fall into three basic categories: talk, religious, and Spanish."  
 TX Morton KRAN 1280 license revoked, call letters deleted.  
 AB Edmonton CJCA 930 turns back its licence to the CRTC. "The former news/talker often showed up with double digit ratings. . . Sister station CIRK 97.3 not affected."  
 ON Niagara Falls CJRN 710 "is on the air."  
 "The book always improves, but must admit I do wish Bruce would give up on the metrics and go back to numbers which match the road signs I see. I know it's like asking Duluth to see 80 degrees tomorrow, so am giving up on it, but as I see, this does somewhat limit the book; even the road signs in central WI, which were dual metric/English for a while I note are back to just English, so I suggest that is setting a pattern!"  
 "Overall, FMA 15 is an improvement over FMA 14 in legibility."

**FM Radio Wish List for 1994**

Here are some suggestions to help make running a radio station more fun for the owners and employees, as well as for the listeners. Such seemingly contradictory goals could be realized by the FCC and industry people agreeing on:

—Limiting duopolies to situations where licensees with stations to sell have demonstrated that they have tried without success to entice new radio owners in the market. If the classic assertion is true that broadcast facilities are a scarce resource, with only so much spectrum available, it behooves the FCC to favor licensees who can bring diversity in station ownership into the local marketplace. This should apply equally to public as well as commercial FM-FM services.

—Limiting LMAs to situations where 100% separate programming can be assured from the joint operators, both commercial and noncommercial. Encourage the full utilization of FM stereo, and scrutinize programming on FM which makes exclusive use of talk and no stereophonic or only pseudo-stereophonic operation. Bring back the proposal of the 1970s to force FM stereo stations to turn off their stereo generators when engaging in monophonic operations (programs of, say, 15 minutes or longer).

—Disallowing ownership transfers to licensees who have not paid FCC fines, or who face major court challenges that could result in revocation of a station license.

—Removing restrictions from the public's ability to easily receive FM subcarrier programs on tunable radios they may own. Services wanting privacy should be shown how to encrypt their signals. Only allow 57 kHz RBDS and RDS at low levels of injection, so as not to affect FM/SC Services at 67 kHz.

—Encouraging development of alternative talk and music services on FM subcarriers as a means by which licensees can offer additional local programming, without having to create new stations or take up valuable spectrum for a secondary service, such as a talk channel that might be complementary to a stereo music channel in the same market.

—Legalizing low-power FM, when conducted in conjunction with a licensed translator. Allow translators to do their own programming up to 12 hours a day, or a maximum of 50 percent of their time on the air, and to sell ads or receive compensation from the primary station. Compensation to be restricted or eliminated if a competitor within the translator service area objects.

—Allowing primary FM stations to establish translators anywhere in their time zones, commercial and educational, but each to be within its own part of the FM band. Station owned translators to be "bumped" if a local interest wants to establish an LPFM-translator and no other frequency is available. Force satellite programmed translators owned by the primary station (presently educational only) to sell off those which are not in the time zone of the primary. This will

encourage primary stations to mention time of day, and that these time announcements will be relevant to the translator audience. Permit third parties to own satellite-fed FM translators, commercial or educational.

—Reducing or eliminating FCC fines. Raise the FCC budget so that the agency can do a better job of warning stations in advance of rules that may be broken. It should send newsletters, news of local channel rulemakings and directions on how to file applications to licensees. This would help reduce the need for stations to hire Washington attorneys or an FCC messenger service. FCC people should be encouraged to pay friendly visits to stations to learn more about the business of radio, with fines to be assessed only against stations that were warned and failed to take corrective action, or stations that ignore FCC correspondence.

—Eliminating the cumbersome and inefficient Emergency Broadcasting System. OK unattended radio station operation, but make sure a local presence is available who can communicate over the air should emergencies arise in the absence of an EBS system.

—Empowering the public in meaningful ways in broadcasting—not just by being able to look at a perfunctory public records file at a station, but by showing community leaders and others interested in broadcasting, including minorities, how to form listeners' groups to participate in station hearings and in transfers of ownerships. This could help bring about diversity of program formats in an environment having too few types of music in commercial (and to some extent public) radio. That the WNCN Listeners' Guild persevered in New York city and saw to it that 104.3 was classical for 19 years is a tribute to what a listener's group should be able to do anywhere, if properly constituted.

If only a few of these suggestions were acted upon this year, 1994 could be a banner year for both the FM listener and the broadcaster.

**Small-Print Happenings and FM Industry News**

Here's this month's roundup of LMA/duopoly dealings. WMAG 99.5 High Point NC and WNEU 94.5 Eden NC are joined, along with Greenville SC's WLYZ 103.3 Greer and WLWZ-FM 103.9-AM Easley. In G.R. MI Bloomington Broadcasting, owner of WKLQ 94.5 Holland, is buying WLAV-FM 96.9 and AM for \$2.4 million. However the morning shows on the two stations promise to continue their feud against each other. "This is a good opportunity to expand our market base," said Tom Marshall, who rejoined WKLQ, after working 18 months in San Diego. He said no decisions have been made as to the future programming of WLAV-FM-AM. Also, WLHT 95.7 is buying WGRD-FM 97.9-AM. Great American's KSEG 96.9 "The Eagle" Sacramento buying KRXQ 93.7 Roseville from Fuller-Jeffrey for \$16 million. It is already running KRXQ under an LMA. "You already know about KGTR 106.7 Port Sulphur going fast-tempo country. New owners are owners of local WNOE-FM 101.1-AM [New Orleans]. WQUE-FM 93.3 and AM being sold to the owner of local WYLD-FM 98.5-AM. Both FMs program

urban contemporary; WYLD AM is black gospel. WQUE (1280) will be all sports, but is now all talk."

There's no further info on the Jewish SCStation for NYC, but word is out that WLIR 1300 AM Spring Valley NY, serving parts of the metro area, may have stolen the proverbial thunder from the SCS project. WLIR, with its Jewish format, is already on satellite and is carried on at least one cable system in Queens, on FM 93.5 cable in Manhattan and heard over WMCA 570 New York from 8 p.m. to 6 a.m. Saturday and Sundays. A little round-about, but perhaps formidable competition to an SCS.

An innovative idea from the pages of the M Street Journal—WRFB AM (frequency not available) Cocoa FL is a commercial station that is not charging for the ads—at least for now. Local "mom and pop" merchants can advertise for free, and they accept personal messages, but "as the station gains support it will sell advertising space to all businesses." Hmmm. What about FM? Free ads for small business to help them get started? Or free ads with purchase of a product or publication the station sells? And thanks, M Street, for the nice mention of my new FM Atlas, "the companion reference to their FMEDIA! newsletter."

The FCC's 24 hour ban on indecency has been struck down for the third time. The safe harbor policy was not ruled on, reports the National Federation of Community Broadcasters in its newsletter. "NFCB recommends maintaining your safe harbor rules in the meantime." The D.C. Court of Appeals said the FCC can't limit adults' rights for fear children might be listening. Undaunted, the FCC continues to enforce its current "no indecency" policy 6 a.m. to 8 p.m.

Howard Stern's \$45 million IL lawsuit against WLUP AM 1000 (now WMVP, with WMVP AM 1290 Greenfield WI changing to WMCS) Chicago thrown out on a technicality, but it has been refilled in a NY court. Stern's show continues to be missing from the Chicago airwaves.

KKLQ-FM 106.5 and AM San Diego have settled with the NAACP over alleged violations of EEO rules to the tune of a short term renewal with the FCC and \$18,750 in fines, "but clears the way for its sale to PAR Broadcasting, which will then have a duopoly with its KIOZ 102.1-KGRG AM Oceanside."

Don't expect programming soon from Richmond VA 101.1. This call letters-less station has had its grant remanded to the FCC by the Court of Appeals. The court has asked the FCC to find out more about the station's finances. An administrative law judge granted the application of James River Communications Corporation, which was affirmed by the FCC's Review Board, but the court disagreed and ordered the FCC to conduct a full hearing on James River's qualifications.

All across the country, FM stations are tuning out so-called "gangsta rap." Stations known to have tuned down or toned down the songs, either eliminating them from playlists, or recasting them without offensive portions, are KACE 103.9 Inglewood, KPHR 105.9 Los Angeles, WBLS 107.5 New York and KSJL 96.1 San Antonio. The trickle down effect has been immediate and nationwide. It's known, for example, that little KMOJ \*89.9 Minneapolis has tamed its act considerably, and I assume WJMO-FM 92.3 Cleveland Heights is doing the same, as it changes its call letters to WZJM, "Jammin' 92." Here's what one reporter said of WJMO-FM just last month. It was "Jammin' 92" with urban during the day, but at night it became "the mysterious '92 Channel X", with gangster rap music. This is an interesting new development in FM radio programming. While Howard Stern ran into trouble with the FCC for using [a certain] expletive, the late night rap music on WJMO-FM often uses the "—" expletive, [often] repeated dozens of times during a typical song. . . . While 92 had the Channel X music format, WZAK 93.1 had a phone-in talk show about why 'gangsta rap music' ought to be banned from

broadcast on radio." WBLS declared they "are simply not interested in broadcasting material that advocates violence against women, homosexuals and other groups." Songs that contain "derogatory, profane or misogynist lyrics, or lyrics which advocate violence" are the ones you can expect to be banned from the airwaves. Still there can be wholesome rap, and local WNCB \*89.3 Duluth plays some Christian rap.

An album rock station, WFRD 99.3 Hanover NH took part in a survey by "College Broadcaster" magazine, and mentioned that the music director has discretion to get rid of something if it's violent and not great music. WJMF \*88.7 Smithfield RI said "a lot of college music leans toward the violent. We cater to a community which holds a lot of different views and some want to hear it and some don't. Our station doesn't promote violence, yet we play the songs that are about the violence that some singers grew up with. . . . These songs may not be happy, but it's reality." WMUA \*91.1 Amherst MA says, "By making people aware, the media contributes to violence. Reaching a balance with art, journalism, and censorship is a complex issue. As far as our station goes, we don't censor anything other than FCC regulations."

Like my editorial above alludes to, one Harold Hallikainen of San Luis Obispo CA, owner of a company involved in transmitter control and telemetry systems, came out in the pages of "Radio World" newspaper in favor of the FCC's establishing a low-power FM service. A license-free, low power FM service would preclude the need for conflict, like "Radio Free Berkeley" (November, p. 3, col. 3) has experienced, in being fined \$20,000, but which continues to broadcast.

The FCC has said it is more spectrum efficient to license a few high-power stations than many low-power stations, but "such an allocations scheme creates gaps where low power stations would fit without interference. Software writers could find locations where such gaps exist and determine maximum powers and heights, with stores like Radio Shack perhaps able to sell the software and the transmitters." Hallikainen points out that under Part 15 of the FCC rules, unlicensed FM operation is limited to a field strength of 250 microvolts per meter at three meters from the antenna, or 165.8 picowatts per square meter. I am sure Miller transmitters (November, p. 7, col. 3) far exceed that.

The National Association of College Broadcasters magazine has a legal column in which Cary Tepper with the firm of Meyer, Faller, Weisman & Rosenberg in Washington DC answers questions. In view of the Cable Act's requirement to have permission of broadcasters before distributing signals on cable, the question is raised concerning campus FM radio. Answer: Radio broadcast services are covered under the 1992 Cable Act. Therefore, radio station signals might not be retransmitted over a cable system without the prior consent of the originating radio station. Although the text of the Cable Act does not make specific reference to noncommercial radio, it is my opinion that noncommercial radio services count with respect to these matters.

WMHT-FM \*89.1 Schenectady, along with its TV stations, had a \$500,000 turnaround in their finances in the fiscal year ending June 30. What was a 1992 deficit of \$317,723 became a 1993 profit of \$242,556. This was done with increased gifts from pledgers, tighter budgeting and reduction in non-salary compensation. They'd like to have a production studio in Albany to enhance visibility in the heart of the capital district, as well as continuing to use the studios in Rotterdam, which is four years away from being owned free and clear by the WMHT stations. WMHT-FM had 34 days of fundraising in 1993, which compares to only 20 days of fundraising by competitor WAMC \*90.3.

Community station KZUM \*89.3 Lincoln NE broke its previous record in its fall fundraiser, collecting \$36,000 in pledges from 800 contributors. The October pledges represent a 10

percent increase over its spring fund drive.

One of the most unusual programs heard on local FM is the "Drum Song" on WOJB \*88.9 Hayward WI (which mis-identifies as "Reserve" WI). The program has a new host, Sararesa Begay (pictured), who had been general manager of KGHR \*91.5 Tube City AZ. She is a Navajo and will also be working with satellite operations at the Lac Court Oreilles (pronounced la-coo-tu-ray) Ojibwe station. Mike Dukin, one of my first blind customers for radios and electronics devices, is a charter member of the WOJB announcing staff, living in a building adjacent to the station.

WDIY \*88.1 Allentown PA was awarded that frequency rather than the 89.3 channel it originally applied for. A religious group, Beacon Broadcasting, also applied for 89.3. The engineer then found the 88.1 channel, which the FCC okayed by waiving the application process for the second frequency. WDIY, not yet on the air, has received a \$125,000 PTFP grant and has raised a like amount locally. It also received a \$50,000 initiative grant from the PA senate and another \$100,000 is expected to be raised from private sources, reports the *NFCB Community News*. WDIY will begin searching for a manager and one other fulltime staff member early this year. "In preparation for an August or September launch," Geoff Chambers is the program director of this Lehigh Valley Community Broadcasting Association station, which also makes use of volunteers.

The 1994 NFCB Conference this year is in Tampa FL, Jan. 29-Feb. 1, entitled "Connecting Local Communities." For lodging contact Radisson Suite Resort, Clearwater, (813) 596-1100; for conference information call Lynn Chadwick at (202) 393-2356.

American Public Radio has officially changed its name to PRI, or Public Radio International, effective July 1. PRI plans a more international thrust in its program formulation and distribution.

FM radio's strength continues to show itself, according to the latest RADAR® report. "FM radio maintains its 78 percent share of the total radio audience of persons 12 years of age or older . . . The current RADAR® report results reflect radio usage based on 12,000 respondents during the measurement year of November 1992 through October 1993. The 1993 RADAR® studies are jointly sponsored by the ABC, American Urban, CBS, Unistar, and Westwood One radio networks and major advertisers and agencies." This report contradicts Jim Duncan's FM listening estimates, which he places at 74.4 percent of the total radio audience (December, p. 6, col. 2).

Station totals from the FCC, now reflecting the reality of the RADAR report's 78 percent of FM tuning in: AM 4945, FM 4959. This is the first time the FCC has shown commercial FM ahead of commercial AM, and by 14 stations! Additionally, 1654 educational FM (88-92 mhz) stations are licensed and on the air. To FM fans everywhere this is reason enough to break out the eggnog and toast the new year!

From the classifieds: Jack Straw Foundation, Seattle, seeking an executive director (licensee of KSER \*90.7 Everett WA). Bachelor's and two years experience, preferably with community radio and the arts. Salary 35-40k plus benefits. For more information write the foundation at 4261 Roosevelt Way, N.E., Seattle WA 98105.

Christian radio station looking for a top program director. On-air, production and management experience a must. Send tape, resume and salary history to Ronald Harris, g.m., KCBI \*90.9, 411 Ryan Plaza Dr., Arlington TX 76011.

Want to know what FM stations were on the air or not on the air in 1973? "FM Atlas," 2nd edition, revised, 1973, a few copies still left of this reprinted issue, \$2.50 plus \$1 postage from me.

Henry Studebaker's "Country Music Radio Atlas," 1994 now ready, \$4.95 plus \$1.25 shipping from Hanalei Publishing Co., P. O. Box 369, Port Hueneme CA 93044-0369. It's the seventh edition. The book speaks of the increase in country music stations. "Most of the increase has been in FM stations. The inherently superior music reception quality of FM transmission is a major factor. In Texas there were 23 high-powered AM stations in 1985 but only 14 now [with a country format]. There were 43 high powered FM stations in 1985 and now there are 76, versus 65 in our last edition. If you study the current edition carefully, you will also note many AM/FM station combinations are simulcasting." My copy of the book had to be replaced. "My printer used the '93 camera ready copy" for several pages. "The printer will not comment about how it happened. The printer chose to reprint rather than salvage what was OK. Did this ever happen to you?" [It never happened with us, but you sound a warning to check the manuscript. Usually my "FM Atlas" alternates between two or three different printers, based on the best bid they can give according to number of pages. Some printers more efficiently print at multiples of 16 pages while others do best on multiples of 32 pages. That's why the print size on pp. 207-208 is so compressed—so that the book would exactly equal the number of pages the printer bid on.

Lafayette Radio Electronics catalog, 1984, very good condition, and rare! 481 pp., first \$25, me.

FM FORUM

CONTRIBUTIONS FROM READERS

Both the British Broadcasting Service and the Voice of America are heard locally in different European countries on FM, as well as being available on shortwave. BBC "programmes" can be heard on many FM frequencies in Austria; the French and Italian Rivas in stereo at 106.3 and 106.5. Voice of America can be locally heard on FM in Sofia, Bulgaria, 97.6, Czechoslovakia three FM frequencies (not specifying which are in Czecho or Slovakia), Finland various cities on FM, Ajaccio, France 103.9, several locations in Italy, Norway and Poland on FM. Poland frequencies include both the old band and the new: 100.7 in Bielsko-Biala, 66.4 in Wegorzewo, and 72.26, 106.3 in Zakopane. VOA is heard in Aberdeen, Scotland, on 96.5 mhz.

In Cleveland, competition's heating up between WGAR 99.5 and WQMX 94.9 Medina. For several years WGAR had a listener request call-in show from 12:15 to 1 p.m. Now WQMX has a new call-in request show from noon to 1 p.m. Sometimes, I notice the same people calling both shows," writes Bill Fait, who wonders if every country music fan in Cleveland is tuning back and forth from 99.5 to 94.9. "During 1990 WGAR started a feature called 'Top 9 and 9'. Listeners call in and request their favorite songs. WGAR will tally the requests and count down the most requested songs at 9 p.m. Now, WQMX has a new show called 'Top 10 at 10' and it is very much like WGAR's. Sometimes I also listen to WZPR on 100.3 FM [Meadville PA]; they have 'Top 8 at 8'. The only thing I dislike about the WGAR 'Top 9 at 9' is that the air personality will tell you who to vote for. I am often told, 'You can't vote' for this or that one. WZPR and WQMX tend to be more democratic.

"As per your card of 10-14-93, I was surprised when the WCVJ program guide had nothing listed on Sundays. Why do stations on the low end of the FM dial often have such odd schedules? Ashtabula County stations have a lot of silent periods, usually in the wee hours of the morning, except for WKKY 104.9 Geneva OH. The Geneva station goes for days and weeks with no silent period, but they do have an occasional silent period during daytime hours. Another radio station in my area that seems more silent than others is WATJ 1560 AM. They were knocked off the air in a July storm and were not heard again until September. Their broadcast day is only 6 a.m. to 5 p.m. . . . When I find something that may be of interest to you and FMedial readers, I will pass it on to you. I enjoy having some of my writings put in your newsletter. My money situation is not good for the time being and I am unable to send \$3 [for a sample copy]. I always enjoyed listening to FM and writing about it."

Craig Pattillo has sent me oceans of information on the Portland OR area, and I have yet to update the dial history for that region. If you'd like to know the updated history of call letters, frequencies, slogans and formats, FM and AM, there send him \$5 for a copy of the 19-page typewritten report to P. O. Box 25296, Portland OR 97225.

Dave Freeman, a prospective subscriber collects and trades radio station surveys, airchecks, bumper stickers and other memorabilia. Anyone interested in trading can contact him at 83 Rolling Meadows Road, Middletown NY 10940.

Dave Jackway, SCS Radio Technology, feels that using an ordinary FM radio modified for SCS listening is perfectly legal. "The manufacture or sale of analog (or tunable) SCA receivers is legal as long as such a device is not designed primarily for a certain specific transmission [such as] a crystal-tuned set that gets only one frequency. When an SCA decoder is installed into a consumer radio, it becomes an analog SCA receiver and because such a device is capable of receiving various SCA programs, including radio reading services and other legal services, there cannot be any ruling against it. This includes public services, such as radio station network relay and NOAA weather broadcasts. Just because a device is capable of receiving a protected transmission does not hinder the receiver as being illegal. A large majority of SCA broadcasts originate from satellite transmissions and require no descrambler. To listen in on satellite transmissions on common over-the-market satellite receivers is legal and legitimate. So why can't a person hear the same thing on an FM [sub] channel?"

Next month, read how a listener continues to be bothered by high school WGAJ \*91.7 Deerfield MA interfering with a public station he's trying to get.

Until then, *Bill Fait*

 IL Aurora WYSY-FM 107.9 o, hits of the '70s,  
 "Star 107.9" (from "Y-108"), legal ID with  
 Chicago buried at about :41. Live mornings and  
 drivetimes, but middays are automated. Duopoly  
 with WCKG 105.9 Elmwood Park-Chicago.  
 "This could cause a stir with WZSR 105.5  
 Woodstock IL, because they have been calling  
 themselves "Star 105." Robert Feder, radio/TV  
 critic of the Chicago Sun-Times, seems to feel  
 that possible legal action may ensue. Back when  
 I lived in the southern suburbs I was a big WCKG  
 listener. I could get it good on my digital radios  
 but with analogs it was tough because 106.3  
 WLNR [now WJPC-FM] Lansing used to bleed  
 into it and wipe it out. WCKG should simulcast  
 on 107.9, rehab its library and use the 107.9  
 station to extend its signal beyond Aurora  
 towards De Kalb. . . Heavy metal nites ended  
 when Scott Loftus went to WWBZ 103.5. Loftus  
 was the man who brought the heavy metal  
 sounds to 107.9 last winter after pulling them off  
 WVVX 103.1 Highland Park. The difference was  
 107.9 has 50 kw and can be heard all over the 10  
 county Chicago metro and WVVX had only 3 kw  
 [monophonic] and it only hit the northern  
 suburbs of Chicago! You could hear it down  
 south where I used to live, but it was very tricky  
 at best and you needed to be in your car."

### On Air—Real Stations and Pirates

AZ Nogales K219BU \*91.7, financed in part by the mayor of this border city, Jose Canchola  
 FL St. Augustine WSOS 94.1, having just moved from 105.5 [ing moved to 94.7  
 GA Americus WDEC-FM 94.3, not yet hav-/  
 GA Blakely WBBK-FM 93.1, back on with country [93.3 Manchester  
 GA Douglas W236AB 95.1, relaying WVJ/  
 KS Great Bend KHCT \*90.9, \$[tereo]  
 MI Holland WKEZ 96.1 and AM—suing the city for "more than \$1 million" because of odors from nearby wastewater treatment plant and for basement flooding of sewerage. The suit asks the city to stop using the plant or pay for the stations' move to a new location. It also wants \$3500 to pay for basement rehabilitation. City claims it's WKEZ's problem—the stations should better protect its basement from sewer backups.  
 MI Twin Lake WBLV \*90.3, but was off about three weeks after four of its seven antenna bays burned out. Also forced off the air: co-owned WBLU \*88.9 Grand Rapids, whose antenna was fine. This is the third time in 12 months the WBLV antenna has been damaged, lightning causing the other two outages. WBLV is using only about 30 kw, and its signal at some distance—"normally a strong local—is weak and noise-filled (in stereo). . . WBLV is fine. But without local studio capacity, it is at the mercy of WBLV's problems. I don't know why WBLV is so vulnerable to antenna failure!"  
 MN Good Thunder "KODZ" \*96.3 with oldies, often relaying co-owned "WWRB" 105.1  
 MN Northfield KRLX \*88.1. It had been on the air last fall, contrary to a report of last month, but most likely on erratic hours. Bob Bonner, dean of students, said "It is on the air now. . . I'm afraid there isn't any talk about expanding the station."  
 NY Hunter Mountain, Hunter NY 91.9, a mono tape loop talking about the ski resort. Promoted on a sign there, and "gets out at least 8 kilometers." Hunter Mountain has not answered my inquiry about this station.  
 OH Sandusky WVMs \*89.5, relaying WCRF 103.3 Cleveland  
 MB Gilliam CBWG \*99.9

MB Lynn Lake CBDU \*95.1. "I was traveling in northern Manitoba in November, 1992, and both these stations were definitely on."  
 HAITI Cap-Haitien hasn't had electricity since Oct. 22. 4VEH AM has been off since Dec. 12. The transmitter site's large generator had a major breakdown. The FM, 94.9 (600 watts into five bays at 400 m), is broadcasting English and Spanish in the a.m. and French and Creole the rest of the day and evening. The embargo is killing many of the poor Haitians because food can't be transported. When you get gas it now costs \$18 a gallon. . . It's all very sad."  
 SOUTH AFRICA "Radio Pretoria," an unlicensed FM station (frequency not available) plays martial music and pro-apartheid material. It's been on four months, broadcasting "stop a treeless hill," with armed guards, razor blade impregnated barbed wire fences and a dug moat all helping to keep local FCC-types and political liberals out.

 WY Fort Bridger KBVZ 99.3  
 Regarding the vertical column lines in FM Atlas 15: "FMA-14 looks much better than the new one. What you really need is a PC with desktop publishing software and a good printer; it would dramatically reduce the amount of time to maintain your data and give the finished product a much more polished, professional look. It could even take care of the problem with the vertical lines!"

 "Your preface piece about noncommercial stations selling out to commercial is an idea I hadn't heard before, and may refer to or quote some on 'World of Radio'.  
 "I'm glad you have increased space for several states, and finally done Mexico; next: Brazil and Vi surely! However, Mexico is already too crowded to handle as you did. Suggest next time you devote one two-page spread to central Mexico, where congestion is heaviest and another to the rest of the country without insets. [Networks, such as StereoRay, Grupo Acir] are more useful to know than call letters. Dispensing with network information was also one of your worst moves for USA, though no doubt it simplifies your task... Lose all the lakes smaller or less important than Great Salt Lake, Tahoe or Okeechobee. Replace with basic interstate highway system if anything. When you have insets, use a solid wide dark line to make absolutely clear where the inset divides from the main map (i.e., just fill in the double narrow lines). In case of ND/SD and KS/NE if each does not merit a two-page spread, I would rather turn the book sideways and have the borders between them coincide with the page split!" [I couldn't do without the lakes! Look how bleak northern Canada would look, and state pride insists that I show at least some of MN's 16,000!]

"I am not renewing due to money, but rather a general lack of interest in radio—FM and AM. The continuing addition of stations is definitely not giving any diversity and all stations are rapidly drifting toward 'safe sounds'. One local radio person recently told me they didn't 'dare' play Christmas music before the 24th because that would upset their super-researched format. Baloney! Where are the creative types and those who dare any more? (And I don't mean the Howard Sterns.) You're doing a great job. The Atlas is mighty fine. Sorry I don't have the interest to stay on the train!"

**SCServices, 41, 57, 67 and 92 kHz Symbols are as in the "FM Atlas" and November FMedia!**

CA Arcadia KMAX 107.1 10, Taiwanese, 41 kHz; 10, Mandarin, 67 kHz; no 92; is a monophonic station. Each subcarrier is modulated at 15% injection. Its co-owned monophonic stations on 107.1, KBAX Fallbrook and KAXX Ventura, lack subcarriers.  
 CA Big Bear Lake KTOT 101.7 no SCS  
 CA Long Beach KLOK \*88.1 no f(), 57; had only been testing. Its 67 is 1S for schools' use, mostly a tone, but has occasional audio; the 92 continues as f().  
 KNAC 105.5 1U, 92, not 67  
 CA Los Angeles KUSC \*91.5 no 57 f(); 67 is tX, Music 4; 11, 92  
 KTWV 94.7 f(), 57; tZ, 92  
 KLOS 95.5 no fP, 67  
 KRTH 101.1 no tZ, 67  
 KOST 103.5 no 1U, 67  
 KPWR 105.9 no tS, 92  
 KLVE 107.5 tZ, 67; 1, Farsi, 92  
 CA Oxnard KCAQ 104.7 no 1U, 92; has f(), 57  
 CA Pasadena KROQ-FM 106.7 no tS, 67 [has f(), 57]  
 CA Ventura KHAY 100.7 1U, 67  
 MO Springfield KXUS 97.3 no SCS. Unlike the report in last month's issue, they were not at all paranoid, but told the local person that the 67 kHz fR is "permanently off."  
 NY Patchogue WALK-FM 97.5 no fM, 67. "I live across the water from there, and the signal is excellent. Much weaker stations come in with an SCS, but there is no activity on WALK-FM."  
 WI La Crosse WLSU \*88.9 no SCS; had Muzak 67, but "we have the generator. The Hmong community is interested in starting a service, and we need information on radios."  
 NATIONWIDE—Skip Pizzi, writing in "Current," says RBDS at 57 kHz is a transparent technology with injection typically at 2.6%.  
 "The 57 kHz location of this subcarrier (and its small size) means that existing 'SCA' services at 67 kHz and 92 kHz can remain in operation without change. [It] transmits data at the relatively low rate of 1200 bits per second (1.2 kbps), so its occupied bandwidth on the FM station carrier is very small," and any impact on the main channel or the station's coverage is minimal. Cost to the station of a rack-mounted RBDS encoder starts at \$2,500. RBDS includes such features as controlling listeners' radios to hear emergency messages, paging and alphanumeric displaying of station call letters or nonIDs.  
 A proposal by Wavephore, Inc. to the FCC asks for TV stations to use the "TVT1" system for digital data within the visual pass-band between 3.9 and 4.2 mhz "at an amplitude close to the video noise floor." It is said to cause no visual degradation of the TV picture.  
 "Thanks for returning the fixed up Elf-III adapter to me. I hooked it up to my G-E radio and it works great," D. P., Portland OR.  
 "Thanks for the January, 1994 FMedia! and FM Atlas-15 that came in the mail... I tend to use the Atlas until it falls apart. Recent editions have held together better than old editions, but sometimes I wish the post office would be more careful with the mail. It looks like it got caught in a conveyor belt..."

NY Albany WROW-FM 95.5, AM being bought by WFLY 92.3-WPTR 1540 AM. AM stations are simulcasting, with at least two firings at WROW AM. Bill Shallcross, 65, "the longest-tenured morning man in the area," is being let go along with newsman Dave DeMouplied, 63. Both want to stay in radio and remain in the area. Shallcross said, "I feel bad because we do have some avid-type listeners. Our audience is like a radio-family thing." AM to become "Newsradio 950," with a mix of locally produced and CNN reports while WPTR is to go all talk and sports.

NY New York WOR 710 rumored to be going all sports, whether or not it is sold to Capital Cities/ABC, and would compete with WFAN 660. "Chicago is the only city with two such stations and there is some question about whether both can survive."

NY Schenectady WGY 810 and FM 99.5 fires new manager Ron Kempff after only one week over a difference of opinion for the AM station. He wanted more local talk and news, but management wasn't interested in the fast changes he proposed. "I work quickly," he said. "I want to make everything happen yesterday."

NC Plymouth WPNC 1470 silent

OH Chardon WATJ 1560 now "The Acoustic Alternative," named for a local folk music festival. But "WATJ continues to be more off than on. During weekends the sign off comes as early as 1 p.m. The sign on is usually 8 a.m., but I have heard them sign on as late as 10 a.m. The music format includes folk, acoustic country, blues, rock and bluegrass music. They call the format 'Little Mountain Jamboree'. I wrote to WATJ to encourage them to keep the station on the air all day, but their broadcast schedule continues to be very erratic."

OH Nelsonville WYNO 1120, off air, FCC dismisses renewal application "for failure to prosecute."

- PA Waycross WAYX 1230 silent
- SC Hartsville WHSC 1450 changes from country to sports and on air only 6 p.m. to 8 p.m.

- WA Omak 104.3C2, Feb. 22, Mar. 9
- WI Ellison Bay 92.5A, Feb. 22, Mar. 9

**FM Rulemakings Finalized**

Dates are when my FCC filing window is open

- CA Tulare 96.5C for C2, KFLS-FM
- MN Hermantown 92.1A, Mar. 11-Apr. 11
- MN Staples rescinded grant of 94.7C3; KSKK to be a Class A

**Court Shakes Up FCC Hearings Policy**

Striking to the heart of the policy the FCC uses in determining winners in hearings for new FM stations, the U.S. Court of Appeals handed the FCC a defeat in the case Bechtel v. FCC. The court dismissed the integration credit, in which a principal in an application promises to live in the area and personally manage a station. Susan Bechtel argued that she would hire a professional manager and not be there personally. This did not convince the FCC, who awarded the

channel to Anchor Broadcasting, which has since come on the air as WSBL 97.9 Selbyville DE. Bechtel successfully appealed, and who knows if WSBL keeps its ownership or is even allowed to remain on the air? Beyond the local situation, "the implications for comparative hearings are major!" writes attorney Gregg P. Skall in the MN Broadcasters' newsletter. "There may be no further hearings for some time. The FCC or another party in the Bechtel case may ask for a rehearing by the full Court of Appeals, or may take a further appeal to the U.S. Supreme Court. Any Commission decision in a rule making is likely to face requests for reconsideration and a long appeals process of its own. Until the matter is resolved, it is unclear upon what policies the FCC would make a selection between applicants." All the other policies the FCC uses in selecting applicants—local ownership credit, civic involvement or minority ownership—are mere enhancements of the integration credit, claims Skall. "The only significant remaining criteria is diversity of media control. However, diversity is subject to the same lack of verification/criticism as was the integration criteria," and another lawsuit is seeking a challenge to the diversity criteria.

"The silver lining in this for broadcasters is that the diversity criteria and the multiple ownership limits created by the Commission may now also be subject to successful attack. . . Indeed, the clamor in Washington is to be a part of the political forces shaping the so-called 'information superhighway'. This new assumption underlying the coming government policies is that there will be a plethora of avenues for speech and thought. Thus the limits on broadcasting may soon be deemed artificial, and would then fall."

#### Small-Print Happenings and FM Industry News

Held up over two months because of the antics of Howard Stern is Infinity's buy of KRTH 101.1 Los Angeles. The FCC has finally approved the \$110 million transaction. Also held up was the transfer of ownership of WPGC-FM 95.5 and AMorningside MD. James Quello was the most vocal FCC questioner of Infinity's effort to grab those stations. The delay cost Infinity "millions of dollars" each month, since the purchase price of KRTH was tied to its cash flow. The FCC, however, did slap Infinity/Stern with an additional \$400,000 fine. FCC Chairman Reed Hundt disqualifed himself from the vote because his old law firm had represented seller Beasley Broadcasting Co. For a while Infinity stock dropped about 9 percent of its value over news the FCC was delaying the purchases. Before the KRTH approval came, Howard Stern said there was no official FCC statement about delaying approval of the sale: "It was just one 81-year-old man (Quello) voicing his own opinions."

Quello's speaking out against Stern hasn't stopped the NAB from recognizing him (Quello). He'll receive the association's Distinguished Service Award Mar. 21 during the opening session of NAB's '94 convention in Las Vegas. Quello is being recognized for his many years as an FCC commissioner, including having been interim FCC chairman.

Stern's being targeted by some Newark residents because of his "New Year's Rotten Eve"

pay-per-view TV special which opened with the line, "Live From ---ing Newark, the carjacking capital of the world." Event was in Symphony Hall, which is subsidized by Newark taxpayers. State and local nudity laws may have been broken, both at the pageant and at a "lewd and immoral" post-show party. The event was enough to scare the Fox Network from offering Stern a program, which it had been considering.

Radio Ink magazine names Stern's employer at Infinity Broadcasting Mel Karmazin its Radio Executive of the Year. Why the award? Karmazin's company "has made recent progress like no other. It would be a tragedy to judge Karmazin on the indecency issue alone when his company is doing so much more than just Howard Stern—which, like it or not, has been significant for Radio. . . He has focused on building a megagroup of Radio stations and now owns 22 major-market stations and is in the process of buying more, making his company the largest owner of Radio stations in the United States. Some call it luck. We see it as vision, keen focused strategy and persistence. In addition to Infinity's Radio holdings, Mel Karmazin has built a Radio network powerhouse, starting with the syndication of Howard Stern. He then gained control of the Unistar Radio networks," and he is in control of the Westwood One networks, which include Mutual and NBC Radio. "Who else has generated so much attention to Radio in business circles and with the general public? Mel Karmazin may not meet the conventional expectations of many broadcasters, but he is bullish on Radio and is forging a strong future for his company and the Radio industry," writes B. Eric Rhodes, editor-in-chief.

Rick Dees, KIIS-FM 102.7 L.A. morning man, is feeling sorry for anyone who may have paid \$39.95 to see Stern's raunchy New Year's Eve party. He said he was flooded with "hundreds" of calls from listeners complaining about the program, which reached more than 275,000 homes, but "promised far more than it delivered." So Dees decided to offer listeners a \$40 refund if they felt cheated by the Stern program. Dees estimated 50 or 60 people were offered refunds the first morning, and he intended to keep up the refunds. While Dees and Stern have had a mild feud over the years, Dees said he has nothing personally against Stern, other than the fact that "he has become that which he has railed against over the years: a rich guy living in the suburbs. I understand Jacques Cousteau is his pool man."

The NAB is urging the shut down of TV Marti, the U.S. anti-Castro TV station tethered to a balloon in the FL keys. Very few Cubans can see the early morning broadcasts, and it has triggered Cuban retaliation against U.S. AM stations with interference generated, notably at WHO 1040 AM Des Moines and numerous FL outlets.

Mairite Broadcasting's last station, WJZZ 106.1 Philadelphia, being snapped up by Pyramid Broadcasting, which owns WYXR 104.5 there. Pyramid's also buying WBCS 96.9 Boston to pair with its WXKS-FM 107.9 Medford-Boston and AM.

Inside Radio announces its Radio Only convention May 13-15 in Princeton NJ. Seems to be mostly a sales seminar and the price is a steep \$950, with hotel room thrown in. For more info call Steve Butler at (609) 424-6800.

The second annual Midwest Broadcasters conference and trade show is at the St. Paul Radisson Feb. 21-22. It's for managers, engineers, programmers, sales and news writers. Just \$75 per person nonmember, or \$39 MBA member. Contact MBA, PO Box 16030, St. Louis Park MN 55416-0030; (612) 926-8123. Thanks, Jim Wychor, for the "FM Atlas" mention in your latest issue!

Now that WAXQ has replaced WNCN 104.3 New York and displaced classical, the WNCN Listeners Guild has called it quits, right? Wrong! The group is—shall we say?—regrouping and "calling to arms." It's sending out flyers to recruit new members to "help restore the WNCN

classical music format." NY's new mayor Rudy Giuliani (pronounced "Julie-Annle") has mentioned the possibility of selling city-owned WNYC-FM \*93.9 as well as its WNYC AM and TV "to raise money for the city."

CBC Radio is placing some of its programming on the Internet computer network, which recently added audio material. The CBC is doing this along with Industry Canada.

MN Public Radio's Oct. fundraiser for the St. Paul Chamber Orchestra raised \$750,000, and that drive apparently didn't hurt the networks' own fund drive later in the fall. It may have actually helped, because 6000 new or renewing members signed up. The drive to help the orchestra ran 35 hours, and at the end of 24 hours \$495,000 had already been raised. "We were floored!" said Ginger Sisco of MPR. A normal day of fundraising by the network, in comparison, would bring in only \$50,000 to \$60,000. The ork isn't out of the woods, having had an accumulated debt of \$1.55 million. Because the music group is private, the FCC had to give its approval for MPR to fundraise for it.

KERA-FM \*90.1 Dall as listeners pledged \$127,000 during a 24 hour pledge drive, with the help of Patrick Esquerre, president of a local bakery. Esquerre promised to donate half the amount listeners pledged to local food banks—all "in top quality food."

Religious stations having share-a-thons include WMSJ \*91.9 Harpswell ME raising \$41000 in three days, or \$1000 more than its goal; WBGJ \*91.7 Champaign IL \$28,500 in 12½ hours, ending its drive 24 hours ahead of schedule. WBGW 101.5 Fort Branch IN-Evansville had a goal of \$130,000, which was exceeded by nearly \$20,000. Additional money will go to station expansion. The drive was coordinated by Share Media in Shakopee MN.

AZ Phoenix KBAQ \*89.5 reversed itself and decided to carry Saturday afternoon Metropolitan Opera broadcasts. GM Carl Matthusen estimated the broadcasts would cost the station \$30,000, but other sources placed it closer to \$14,000. Costs include fewer underwriting opportunities per hour, reduced pledges during operatic periods, the length of the Met season, and the "period of rebuilding after the season is over." Also balking at carrying opera is Wisconsin Public Radio. There a local group, which had been critical of the plan to dump opera, itself became an underwriter. The group, known as Save the Met Live Broadcasts, is encouraging members to write letters of Met support to WPR and its licensees.

Conservative radio interviewer David Horowitz (pictured) has been picked up nationally by only seven public stations, and he's charging bias in public radio. One station, KRCC \*91.5 Colorado Springs, recently moved his show to 5:30 Saturday morning, saying after one year on the air his show, "Second Thoughts," failed to attract any listener base. He compared the circulation of his program to one with a similar title, "Erwin Knoll's Second Opinion," which has a left-wing slant and, although newer, is already on 33 public stations. Knoll is longtime editor of the Progressive magazine, published in Madison WI. Horowitz's show originates at KCRW \*89.9 Santa Monica, where it's on during a Friday midday talk strip. KALW \*91.7 San Francisco also carries the program and has gotten some "furious" reaction from listeners. Most KALW listeners, according to Jerry Jacob, general manager, understand the station's commitment to airing dissent voices, and he wants to "carry a view that is not heard on public radio."

Lifting the news "almost verbatim" from the local newspaper is the charge that the "Reading Eagle" is making against WIOV-FM 105.1

Ephrata PA and AM. The paper is claiming in its lawsuit that the stations have no reporters or editors, while the newspaper has 33 reporters, 117 researchers, editors, photographers and other employees.

Hit with FCC fines: WCST-FM 93.5 Berkeley Springs WV and AM \$4600 for having defective EBS equipment and no station authorizations posted. WHLX 106.5 Bethlehem WV \$1800 for failing to maintain an EBS generator or transmitting a weekly EBS test. KPER 95.7 Hobbs NM \$2000 for not having public inspection file available and no Ownership Report. KQRC 98.9 Leavenworth KS \$5000 for not having its public records file in the licensed community; KBCE 102.3 Boyce LA \$4200 for inoperative EBS receiver and defective remote control. WHSY-FM 104.5 Hattiesburg MS \$11,300 for several faults, including EBS receiver and generator inoperative and remote metering of FM transmitter not working. WJKX 102.5 Ellisville MS fined \$3000 for no EBS receiver or generator at the remote control location.

In Canada, from "Broadcast Technology," it's reported that private, non-CBC radio, has lost more than \$10 million over the last three years and could lose up to \$50 million when 1993's figures are in; 60 percent of stations are losing money. "Digital Radio could earn new revenues for broadcasters, through datacasting, paging and direct response advertising. At CAB '93, Pioneer Electronics announced that it will take an active role in the introduction of digital audio broadcasting (DAB). Pioneer is forging ahead with the Eureka-147 project, which is working on a worldwide DAB standard. It hopes to have prototype receivers available early in 1995 for the experimental broadcasts slated then for Montreal and Toronto. Consumer radios should be available later in 1995. Pioneer, the first manufacturer outside of Europe to join the Eureka-147 project, believes that if Eureka becomes the world standard there will be sufficient demand to justify production of the radios, even if the U.S. opts for an in-band DAB system, using conventional FM stations.

From the classifieds: Wants to buy FM/CPs, commercial, noncommercial, Donald E. Wildmon, American Family Association, Tupelo MS 38803; (601) 844-5036.

New radio and electronics catalog available from FM Atlas Publishing, our first since 1991! Free from PO Box 336, Esko MN 55733-0336.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Dave Beauvais continues to be bothered by high school station WGAI \*91.7 Deerfield Academy in MA. He was distressed that the program New Dimensions heard over WHUS \*91.7 Storrs CT, at a distance of 80 km with a good signal when heard using a "decent antenna" was blocked out one morning by WGAI. "On a whim, I had set up a digital timer to auto-tape the 10 a.m. New Dimensions program on Thursday, Nov. 18, while I was at work, not knowing what I'd catch. I was rewarded with one of the most engaging conversations I've heard in months, if not years: Mark Gerzon's reflections about wisdom, aging, spiritual renewal in the change of life and its implications for the boomer generation. I was completely enthralled. He was saying precisely the things I've been thinking and feeling in the last few years.

"Unfortunately, WHUS' regional frequency (91.7) is 'shared' locally—God knows why the FCC permitted it—by a

low-powered elite prep school station in Deerfield MA. About halfway through Mark's conversation, the 16-year-olds, who operate on an erratic schedule at best, suddenly powered up with a splitting earful of adolescent industrial noise. And that was the dead-stop end of Mark's conversation on the wisdom of aging, and his expressed desire that younger people 'listen to the stories of their elders'. They symbolic juxtaposition could not have been more ironic, more frustrating, or more infuriating. This interference problem has been ongoing for years, and I am completely at my wit's end what to do about it."

Radio Shack doesn't charge for its catalog—not any more. I received mine free, and it included coupons, like \$3 off on purchase of any item priced at \$3 or more. I believe some Radio Shacks removed the coupon page from catalogs they gave out. The Pro-2006 scanner is still shown, but rumor is that it will be replaced by the new Pro-2032. The Pro-2032 is without FM (88-108) reception and it will not be possible to restore cellular (825-845; 870-890 mhz) coverage, as is true of the Pro-2006. Broadcast consultant Larry Fuss makes a point about Radio Shack. He says "Radio Shack built its company on the sale of radio receivers. In the current catalog, I counted 109 radios (AM-FM). Yet this same company, whose first name is 'Radio', refuses to advertise on local radio stations. You see their full-page ads all the time in the local paper, but hear nothing on the radio, except for an occasional network spot. Is it because nobody listens to the radio? If so, why does the store sell 109 different models?"

A new book about the history of NH AM and FM has been published, "Granite and Ether," from the NH Association of Broadcasters, 10 Chestnut Dr., Bedford NH 03110, \$12 postpaid. It shows WMUR-FM 95.7 Manchester which is listed in my 1950 "White's Radio Log."

J. E. Lewis of Kansas City has "a problem with large religious broadcasters and others in effect establishing networks with translators which have no local content at all. I prefer translators to relay local stations or originate some local programs not commercially viable on other stations."

Howard Enstrom, who does translator consulting, writes: "Last year, I got a translator CP for a Hamilton MT client. A few days after K211BT came on the air, a very depressed mom happened to come across 'the new FM station'. What she heard was hope, for she had contemplated taking the lives of her children and herself. Hearing the program, she sought spiritual help from a Christian pastor in town and she became a new creation. . . I think we share similar opinions about

broadcasting these days, including for TV and garbage such as 'NYPD Blue', etc. But then, how else will Biblical prophecy be fulfilled? And, what do you think is the other purpose of the Hubble telescope? Huh." His FM Technology Associates can be reached at 30925 Vista View, Mount Dora FL 32757; (904) 383-3682.

"Newsday" published an article Dec. 1 about satellite-delivered ethnic services on SCS, and Josh Friedman called me for some of the information; however, I was not mentioned. The only service in the article not mentioned in past issues is "Chinese Radio Network" (Mandarin) on WKCR 89.9's 92. "They're wrong about Chung Wah; it's Cantonese, not Mandarin and on WSKQ-FM 97.9's 92," writes a listener.

"I'm amazed at the steady, progressive disintegration of radio in this country," mentions LA's Mike Dorner. "I think the signs are there for any perceptive individual: the loss of advertising dollars to aggressive cable companies, the proliferation of new FM stations, the decline in listening as the baby boomers age, the abdication of format and programming control to satellite feeds and, worse, to consultants who galvanize listeners after having wired alleged sample audiences with electrodes; the fact that 75% of America's stations are losing money. . . Meanwhile the tide of cess rolls higher and radio slowly crumbles. Unfortunately, most modern management types could care less. They're in it for the short haul.

"Sad to see the demise of WAJC 104.5 Indianapolis, but I guess Butler University needed the money (remember WRFK 106.5 Richmond VA, owned by Union Theological Seminary?). The call letters stand for the Jordan College of Music, which received the construction permit May 23, 1950, for 91.9 mhz, 820 w at 50 feet. When one of the local commercial postwar FM stations closed, it gave its transmitter to WAJC, which went to 8.8 kw and 35 feet on Aug. 31, 1954."

Tom Cornell in IN mentions the "demise of WNCN [104.3] New York [which] deserves editorial comment even if from afar. Anyone connected with radio, even remotely, knows rock stations, as a class, make more money than most, so why don't all switch format? Well, there is the simple matter of public service and the sizeable portion of the audience which does not even like rock music. Thankfully, there are still some station operators who do not have the stomach for the likes of Howard Stern and other wannabees that infest the game. . . WNCN provided an outlet for the 'classics' to be enjoyed by a large audience, hopefully including the younger generation who might be able to hear them for the first time. . . Given the number of radio channels luxuriated on this area, one might think at least two commercial stations could be devoted to classical music." Until March *B. Chung*

GA Atlanta WREK \*91.1, of course, but on Feb.  
 12 it carried two play-by-play games at the  
 same time, expecting people to adjust their  
 stereo balance controls accordingly. It broad-  
 cast GA Tech's Lady Jackets basketball and  
 the [men's] Jackets' baseball game simul-  
 taneously. "I don't think it has been tried  
 before because most sports are on AM  
 stations," said WREK spots director Gray  
 Saunders, who would have known differently  
 had he read all the back issues of FMedia! "I  
 wonder if WREK realizes that many boom-  
 boxes and walkman-type radios don't have  
 balance controls," said a reader.  
 KY Pineville WRIL 106.3 back on with country.  
 MI Grand Rapids WBCT 93.7 soars to No. 1 in  
 ratings, while WKLQ 94.5, which had been 1  
 goes to 4 with a 6.8, down from an 8.6.  
 Interestingly, WOOD AM 1300 gained .3  
 point and is ahead of WOOD-FM 105.7.  
 MO Branson KLFC \*88.1, parallel to KCVO 91.7  
 Camdenon  
 PA Lancaster WJTL \*90.3—has CP to increase to  
 11800 h,v; 151 m, which "will nearly triple  
 its broadcast coverage area. The power

upgrade will emit a Grade A signal into York  
 County and will greatly improve WJTL's  
 signal into Harrisburg and surrounding  
 communities. WJTL plans to use a new tower site  
 and transmit from Ironville PA. WJTListen-  
 ers help raise its \$330,000 budget, but an  
 estimated \$90,000 more is needed to achieve  
 the power uppage.

**Off Air—Or Not Yet On**

CA La Jolla K206AC \*89.1—can't get KPBS 89.5  
 San Diego, because the cable, which they had  
 been using for the signal input, removed FM  
 stations in favor of CD-type audio. May be  
 looking for another way of bringing in KPBS,  
 which cannot be received directly because of  
 a mountain.  
 CT East Lyme WZXR 98.7, protected from  
 WMRW 98.5 Westhamton NY interference by  
 the latter's having a directional antenna.

 "I believe you need to slightly 're-think' what has been created in the FM Atlas. Being the professor that you are, I think from the beginning the emphasis has been technical (or technically correct) listings. Even if all of this is completely accurate, it may not be very user friendly. Perhaps one answer is to have a 'merged' listing, as one would receive stations without regard to whether the transmission is a translator, booster or true station... Perhaps an additional symbol could be added to indicate simulcasting in this type of situation."  
 "FM Atlas-15 is a winner; I sure like having Mexican FMs right on the map. Some of the maps still need lots of improvement, but you no doubt are aware of this. First class, Bruce."  
 "I love your FM Atlas, a great listening tool," E.B., Durham NC.

**SCServices, 57, 67, 92 kHz**

*Symbols are as in the "FM Atlas" and November FMedia!*

CA San Diego KJQY 103.7 tS, 92 kHz. "We use it in the mornings to talk to our remote crews." Still tM, 67. [t(), 57  
 CA Los Angeles KTWV 94.7 tZ, 67 (not 92); has/  
 CA Stockton KUOP \*91.3 asking for advice on SCS receivers; has no SCS  
 MD Ocean City WQHQ 99.9 tX, "hash noise," 67; tM, 92 (opposite of what is reported in FM Atlas-15)  
 MN Minneapolis is 956.33 mhz is music, "very melodic, strange arrangements, on 24 hours a day." Does not match the two Muzak SCServices heard in the Twin Cities. The FCC

St. Paul MN office said it is a "point to point service," but would give no further information without a visit to their office.  
 MN Northfield WCAL \*89.3 tM, Muzak, 67, but different from the Muzak on KSTP-FM 94.5's 67. Ali Haghighi's ethnic (mostly Russian) moves from 67 to 92 kHz. "It's costing less to rent the subcarrier now that I am on 92, and the sound quality is just as good!"  
 NY New York WKCR \*89.9 still tT, 67, In Touch reading for the blind. All engineers have been laid off, except for the chief, Joe Carideo. "They decided to go automation for most of the day, beginning 2-94. They've also cut the number of publications being read. They've been having readers come in between 8 a.m. and 4 p.m. Monday-Friday and rebroadcast those programs two more times to complete their day. In-Touch is now completely automated on the weekends, with readers coming in to tape a limited number of programs. They have all their programs recorded on DAT tapes now, too. They have seven DAT machines to play back all these programs. You can put more hours of reading on those little tapes. Some friends of mine have been listening to In-Touch and say they're not happy with this new programming. A lot of what they've read in the past (NY Times Sunday main section, of all things) are no longer read."

WRKS 98.7 no 92, "drops Korean Christian Broadcasting which for the past few months had had such low volume as to be unlistenable. KCB continues at normal volume on the 67 of WAXQ 104.3." Still data, 67 kHz.

NC Chapel Hill WUNC \*91.5 still tT, 67. The 92 is telemetry, "but we'll be pulling that and going with a talk experiment."

BC Vancouver CKKS 96.9 CRTS denies bid to carry Chinese and Vietnamese—gives nod to CHQM AM to go Chinese instead.

"Congratulations on the publication of 15th edition of FM Atlas. I enjoyed reading it and using it as a work of reference. I am involved in possibly the largest SCA broadcast service in U.S.A. and for that matter the whole world: Radio Sedaye Iran, now in its sixth year of operation. Radio Sedaye Iran broadcasts a 24-hour seven day a week program in Persian language. The program, via SpaceCom, is broadcasted in California, Washington DC, Texas, New York, Atlanta and other cities. I believe SCA broadcasters deserve to be mentioned in your book as they are the silent workers in the broadcasting industry... Once again thank you for your magnificent job," K.H., Ph.D., AFTT International, Los Angeles CA.  
 "Recently I purchased a Dayton AF-100 receiver from you and I am very impressed with the quality of it! I am extremely satisfied with my purchase!" T.J., Phoenix AZ.  
 "Received your 15th edition of FM Atlas. Very informative, as usual. I liked it so much that I'd like to begin receiving FMedia! again!" I.E., Staten Island NY.  
 "I love the FMedia! The news pages are very good. Also, the G-E Superadio 115 with SCS are good (all five of them), but I prefer your modification with switches on top and easily accessible," S.S., Madison NJ.

 MS Moss Point WGUD 1460 silent  
 NY New York WNYC \*820 takes the Curtis Sliwa  
 (of Guardian Angels fame) show from WABC  
 AM, which dropped it. WNYC did so at the  
 suggestion of Mayor Giuliani, with the city  
 owning the WNYC license, "but 90 percent of its  
 funding comes from the WNYC Foundation."  
 Some listeners object to the new show, which  
 replaces "Talk of the Nation" and "Fresh Air,"  
 but which continue on WNYC-FM \*93.9. "I  
 don't think it's possible to become a member of  
 just the FM station. Mayor Giuliani's new  
 budget plan, announced at the end of January,  
 made no mention of privatizing WNYC," contrary  
 to earlier reports, although there's the possibility  
 the stations would be transferred to the WNYC  
 Foundation, "which pays for most of their  
 expenses already." Employees of the station

### FCC Freezes Hearings Process; Urges Applicants to Jointly Settle

As was suggested last month, the FCC did close down its hearings process, the result of the Bechtel case (see February, pp. 6-7). The court of appeals left not enough time for the FCC to respond, so the Commission is taking the case directly to the U.S. Supreme Court. This information comes from one of the 10 applicants for Vancouver WA 105.9, whose hearing status is in limbo. They've all been in it five years, and are petitioning the FCC for reconsideration of the grant to Florinda J. Weagant (February, p. 1, col. 2). Last year was relatively quiet on the Vancouver WA front, with 1993 legal expenses for this applicant's two partners coming to \$50,000 each.

The FCC itself calls it a hearings freeze, which will apply to both new station and comparative renewal proceedings. Because of this freeze, no cutoff lists or FM filing windows will be announced, and it will not collect hearing fees. Applicants can still file amendments to update their applications. Decisions will be made only in cases where there is no considering of the merits of various applicants. Proceedings for the selection of noncommercial educational licenses are not affected, "because they involve standards unrelated to those considered in Bechtel."

Because the final resolution of this issue may take some time, the FCC is urging applicants to try to settle among themselves. "To this end, the chief administrative law judge will appoint settlement judges, who will have the authority to explore possible settlements." Settlements may be submitted to the full FCC, the Review Board or an administrative law judge. "In view of Bechtel, prevailing applicants will not be required to adhere to their integration proposals in such settlements," the FCC pointed out.

### MN Broadcaster Conference Addresses Problem of FCC Forfeitures

One of the main features of the Midwest Broadcasters Conference was a discussion conducted by attorney Gregg Skall of the Pepper & Corazzini law firm of Washington DC regarding EEO and technical matters which have recently elicited large FCC fines. The session turned out to be exclusively concerned with hiring policies and did not get into the technical areas which have also vexed broadcasters.

Only stations with five or more fulltime employees need be concerned. While the base rate is \$12,500 for poor employment practices at a station, certain factors can raise or lower that rate. The law firm advises that "Now more than ever, it is essential that every broadcast licensee reevaluate its EEO practices. Among other

activity, minority-specific recruitment sources must be contacted for every staff opening, sources should be expanded if minorities are not found in most applicant and interview pools, thorough records must document the referrals received from each source for each position, and all information contained in annual reports and renewal applications must be completely accurate." The fines can be adjusted upward by \$6,250 and/or short term renewals given for failing to recruit so as to attract an adequate pool of minority/female applicants or hires for at least 33 percent of all vacancies. The fine can go even higher if the local labor pool includes at least 20 percent minorities or a single minority group makes up 10 percent of the labor force. A history of prior EEO violations could bring the fine as high as \$250,000.

Downward adjustment criteria include a \$6,250 reduction if minority hiring represents 50% of the staff. Perhaps that is why stations like KDNI-KDNW (FM) Duluth have a fulltime staff of four plus a few parttimers.

Stations hit with EEO fines ranging from \$18750 to \$37500 are KEGF 97.1 Fort Worth, KNFM 92.3-AMidland, KPLE 104.9-AM Temple, KSAM-FM 101.7-AM Huntsville, KYKX 105.7 Longview, KGNC-FM 97.9-AM Amarillo, KOOL 106.5-AM Jacksonville, KIKT 93.5-AM Greenville, all TX; KEZX-FM 98.9-AM, KPLZ 101.5-AM Seattle WA; KHXY 97.5-AM Santa Barbara, KSLY 96.1 and AM San Luis Obispo CA. KOWF 92.1-AM Escondido CA given a short term renewal. The FCC found latter guilty of failing to adequately assess its EEO program. "Despite having few minorities in the applicant pools during its tenure as licensee, the licensee did not significantly expand its list of recruitment sources prior to the renewal year."

KFUO-FM 99.1 and AM Clayton MO (would-be buyers of KSLH \*91.5 there; see above, "FMakings") have their licenses designated for hearing. "This action is being taken because of, among other things, substantial and material questions of fact exist as to whether the licensee's employment practices are discriminatory in violation of our EEO rules," stated the FCC. "Further, review of the renewal applications and subsequent submissions raised questions as to lack of candor due to discrepancies in numbers reported." The FCC said fines in this case could go as high as \$250,000.

Bob Doll (pictured), former publisher of the "Small Market Radio Newsletter," was a panelist on radio programming/production. He said, "People won't listen to FM for talk, and they won't listen to AM for music." Later, somebody mentioned the audi-

ence for talk on public FM has always been strong, and I can recall reading that the audience of MN Public Radio's news and information service rose about five fold after it acquired a Twin Cities FM station (monophonic 91.1) in addition to 1330 AM.

An idea that was relevant to radio automation: "You can't afford to pay a guy to wait for the record to end!" I met some long-time "FM Atlas" customers, including Dave Reeder at KYCR (AM) Golden Valley MN, and Steve Brown, WLTE 102.9 chief engineer. One AM broadcaster, not far from the Twin Cities, said, "We are looking for any information we can find to help us in a search for an FM license."

**Small-Print Happenings and FM Industry News**

Seen in the "Small Market Radio Newsletter"—Bud Paxson of Home Shopping Network is recommending that radio broadcasters enter into LMA's with local TV stations so as to seize opportunities along the super-communications highway. Paxson predicts that the FCC will allow, within the next 12-18 months, radio and television crossownership, TV duopolies, an increase to three AMs and three FM's with the same ownership in a market, and moving small market audience shares for duopoly counting purposes to 50% from the present 25%. Why not have one family own all the stations in a city? Husband, wife, brothers, sisters, cousins? Then that family can go on and own all the stations in the country—and we'll all be much better served—maybe even a Mafia family to super-serve America!

WLLR-FM 101.3 East Moline IL fined \$8750 violating the FCC's contest rules. WBBM-FM 68.3 Chicago received a \$5000 fine for a similar offense. KFBI 107.5 Pahump NV issued a further fine of \$37,500 for "broadcast of indecent material during the Howard Stern Show." Dates when indecency was recorded: Sept. 30, Oct. 6 and 12, 1993, all between 6-11 a.m.

Voting reluctantly to award the transfer of license of KRTH 101.1 Los Angeles to Infinity Broadcasting (Feb. p. 7, col. 1) was FCC Commissioner Ervin S. Duggan, who said, "But for the need to clarify the impact of 'Action for Children's Television v. FCC,' No. 93-1092 on the Commission's indecency enforcement policies, I would have denied the grant of this application. In addition, I would have supported the launching of an administrative hearing at the Commission to determine whether the pattern of enforcement actions incurred by Infinity Broadcasting Corporation raises fundamental questions about Infinity's fitness to remain an FCC licensee.

"To take such action now, however, would not be prudent or responsible. The Commission must act with maximum regard both for Court decisions and for preserving this institution's long-term ability to continue enforcing against broadcast indecency. Accordingly, I am supporting the levying of an additional fine against Infinity for yet another indecency violation. I do so with the sincere hope that future Commissions will take seriously that we are acting without prejudice to any actions the Commission may deem appropriate should Infinity broadcast indecent material in the future."

KYA 93.3 San Francisco being picked up by owners of KFRC-FM-AM for \$17 million. A's AM, KSFO, not being sold. WMJC 94.3 Smithtown NY being sold to Starr Broadcasting, owner of WRCN 103.9-AM Riverhead. Also on "lawn guy-land," WBAB 102.3 Babylon is buying WHFM 95.3 Southampton for \$1.85 million. The stations have been simulcasting

since 1992.

WGLU 92.1 Johnstown PA going for \$1.9 million to Tele-Media, owner of WQKK 99.1 Ebsenburg. KDKB 93.3 Mesa AZ being paired through a sale with KUPD 97.9-AM Tempe. WWZZ 93.1 Karns TN being paired by Jacor with WMYU 102.1 Sevierville—a \$1.8 million deal. It's a sales-only LMA, but whatever they call it, it's bringing KBJZ-KAJZ 103.1 closer to KBIG 104.3 L.A. WEZX 106.9 Scranton being paired by Shamrock Communications with WYOS 92.1-AM Nanticoke.

When a personality leaves a station and goes to a competing station, what about his trademark/characters? WIOT 104.7 Toledo's former jock Jeff Lamb found out that the characters and voices he used remain the intellectual property of his former employer. Lawyers from both sides could find no precedent, so the judge ruled in favor of WIOT. Lamb now works for WXKR 94.5 Port Clinton OH, which is wondering whether or not to appeal. Lamb can use characters he used before his employment and presumably any new characters he might invent.

"M Street Journal" did a report on stations in duopolies and/or LMA's in several markets. Here are the ones where three or more FM stations are involved. Most include a combination of duopoly and LMA, and often involve family members, with offices and studios for all the local stations usually under one roof:

Market No. 33 Norfolk VA—WOWI 102.9-WMXN 105.3, WSVY-FM 107.7 Windsor.

Market 50 Jacksonville FL: WAIA 93.3 Callahan, WROO 107.3 Jacksonville-WSTF 97.9 St. Augustine. "All stations are under one roof and have combined operations but the separate ownership by a family member makes it legal."

Market 233 Monroe LA: KJLO 104.1-KLIP 105.3, KRUV 100.1 Bastrop, with KRUV owned by a separate family member to keep matters legal.

With the FCC collecting fees and fines, it is estimated that 35 percent of the agency's \$175 million budget will come from such sources.

KJAZ 92.7 Alameda CA, which propelled Ragan Henry to prominence in FM broadcasting, is for sale by Ron Cowan. Cowan needs the cash to develop his jazz radio network, which was started last year with KJAZ's its flagship.

WYSO \*91.3 Yellow Springs OH and WDRP \*89.5 Dayton have announced an educational-type LMA, this one creating a joint capital campaign to rebuild the physical plants of the two stations. WYSO wants to go to 31000 and WDRP 50000 watts. The "Twin Signals Initiative" has raised \$949,000 of a \$1.1 million goal. "The initiative is unique because of the level of cooperation that has been achieved between two stations that are popularly believed to lie at opposite ends of the [programming] spectrum." I think WDRP would like to get share-time WDRS off its back and onto a separate frequency.

The "Oregonian" had an analysis of Portland area public FM's, "The Blender Wars," claiming that noncommercial radio is no longer an alternative. It's changing in ways that make it look more like its commercial radio cousin. KMHD \*89.1 Gresham, with its jazz format, has little talk, saying, "The more talk, the more chance that 90 percent of your audience will tune out." State funding has been cut, affecting KBPS-FM \*89.9-AM and KOPB-FM \*91.5 and its relayers. Listener donations and corporate underwriting make for a conservative program environment, where a consistent style, an identity is sought after, "just like commercial radio." Some community stations, such as KBOO \*90.7 remain an alternative to commercial radio and to other public radio, but their financing remains iffy.

A firing at KBVM \*88.3, "the nation's first independent lay-sponsored Catholic FM station," has shattered the spiritual calm of this Portland station. Hundreds of angry calls and letters have come from listeners upset at the sacking of program director David Firth. Firth, who had

worked there three years, was let go for "musical and liturgical reasons." Firth said problems arose when board member Russell Niehaus asked him to donate air time to covering apparitions of the Virgin Mary in a town in Bosnia-Herzegovina. "I refused because those particular visions had not been approved by the church and it was my job not to mislead our listeners. That issue became Niehaus' personal agenda. My divorce just seemed to inflame his obsession with getting me out of the station," Firth said. General Manager Rick Schmidt also decided to leave, but not because of Firth. "The directors of the board are turning toward a micromangement style, and I don't want to be involved with that. So I chose to move," he said.

The future of Alberta's Access Network (CKUA-FM, et al.) is in the hands of the provincial government, which is making drastic cuts to balance its budget, reports the Canadian *Broadcast Technology* magazine. Access submitted its own recommendations to the government in a report filed early in February. CKUA Radio, with a \$2.4 million budget, is seeking interim financing from the province and hopes to survive as a separate not-for-profit corporation.

The FCC reminds translator owners that as of June 1, they must comply with the new ownership and service rules, removing any "grandfathered" status they may have had prior to Mar. 1, 1991.

The march toward a radio world dominated by FM continues. FCC reports as of Jan. 31 4970 commercial FM stations, 4938 AM and 1666 FM educational. FM thus continues its two-month lead over the moribund AM system in terms of numbers of stations!

From the classifieds: Looking for some really great people, join the area's No. 1 ARB rated stations. Finders fee of \$100 paid if we hire you, so mention FMedia! when you write so I can collect! "Why postpone your future?" 1-800-74-RADIO, (747-2346). It's KIAI 93.9, Ingrid Broadcast Group. Better you call during daytime hours. The Sunday night jock said, "You publish some newsletter? I don't know what you're talking about!"

FM mod and stereo monitors needed by WDFH \*90.3 Ossining NY, going on air this month. M. Sophos, WDFH, 21 Brookside LN, Dobbs Ferry NY 10522.

For sale full Class A FM package with mix of new and used. Harris FM-2.5H3 transmitter, 8000A Optimod, ERI antenna, coax, studio, etc., (816) 628-5959.

Wants to buy FM transmitter 20-25 kw on 98.7. R. Utneher, WBDK, PO Box 338, Luxemburg WI 54217; (414) 845-2922. Not sure which 98.7 station it would be used at, since WBDK [Algonia WI] is 96.7.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

"FM Forum" continues with remarks by a reader about the decline in classical music programming, and the change of WNCN 104.3 New York to WAXQ with rock: "The loss of WNCN suggests that the audience for fine music in New York city has diminished in size. Certainly, the quality of life there is now less; the bad has driven out the good. Sad." Included was an article, "Cultural Suicide," from the Jan./Feb. "American Record Guide," which warned:

*We are on the threshold of a new barbarism; we are losing all the benefits of our civilization, and we are becoming less civilized. We are failing to pass on a taste for and interest in the best things western civilization has produced. The biggest culprit is certainly the mass media, which have consistently conspired with the lowest possible elements in our culture to destroy good taste. In the name of "giving the public what they want" the media have manipulated the public into wanting more and more sleaze, and that has made the media people*

*richer and richer. Just as water runs downhill, the bad drives out the good. . . The kind of music a person listens to has a strong influence on the kind of person he will become. This is too important to leave to the marketplace.*

WQXR 96.3 sent a form letter to advertisers mentioning the WNCN format change, saying: "We want to reassure you that WQXR, now in its 58th year as the

oldest commercial classical station in the world, is committed to using this opportunity to serve our audience and you—our advertisers—even better, tomorrow, and in the years ahead."

From NJ, Scott McCleary says "New York metropolitan area listeners who appreciate format-free singer-songwriter rock probably already tune in progressive radio veteran Vin Scelsa on WXRK 92.3 for his 'Idiot's Delight' program on Sunday nights. XRK is also Howard Stern's headquarters, so it's quite possible that Scelsa's program is available on satellite. Scelsa's past radio homes have been Upsala College's freeform WFMU \*91.1, where he started out, then weekdays at WNEW-FM in its progressive days, and WLIR Long Island (now WDRE) where he did a Sunday morning show similar to 'Idiot's Delight'." Scott also likes WXPN Philly's "World Cafe," which is syndicated to a few other public stations. WXPN is "straining under a \$100,000 budget cut from last year as the CPB's start-up grant for 'Cafe' runs out. . . 'World Cafe' was recently picked up by Digital Cable Radio (DCR) for broadcast six days a week." WPRB 103.3 Princeton NJ was in mono, with stereo exciter problems; hopefully, they're stereo now.

From TX Paul Hake notes that talkers like Rush Limbaugh have helped WBAP AM get to No. 1 in the ratings, but he'd like to see the former m-o-r of KAAM 1310 AM move to another AM stereo station, or better yet FM. He read a review of the Denon NAB-680 TU FM tuner which was in Stereo Review, and wonders if any readers have experience with this unit, especially in its ability to handle overload from strong local stations. "Since I live in a strong-signal area and listen to distant signals imported via my rooftop 10-element rotatable FM antenna, I would like to be assured of good strong signal FM rejection performance before I lay down the \$600 for this unit."

The spring Classical Music Broadcasters Association conference to be April 28-30 at the Century Plaza Hotel, Los Angeles. For more info, check with Judith Handman-Cobb, general sales manager, KKGO 105.1 Los Angeles, (310) 478-5540.

I didn't buy Howard Stern's book to

see his autobiography, but James J. Nahirniak says Stern worked at WWWW 106.7 Detroit, "and lost his job when the station switched to a country format." Infinity still owns only one Detroit station—WOMC 104.3, and Howard's not in that market yet.

WBL5 107.5 New York remains firm on its ban against "gangsta rap" which might advocate violence or denigrate women, but refuses to name the tunes falling under that ban. Last month I wrote that KMOJ \*89.9 Minneapolis had mellowed its tune. An anonymous writer said the p. 3 reference to "rappers like Gangsta Lean and Dr. Dre" is not correct. "Gangsta Lean is not an artist, but a song," and supposedly a ballad, not a rap song. "I don't believe KMOJ Minneapolis has altered its programming in regard to 'gangsta rap', as was claimed. I have not noticed any change but if there has been change, the station certainly has not actively announced it to the community like the other stations noted. It was funny the way KMOJ was mentioned in the same breath as such powerhouses as WBL5 and KPWR because KMOJ is a poorly-run noncommercial community station with virtually nonexistent management who probably can't even comprehend the basic premise of the issue, much less respond to it. This is a station which currently runs outdated PSAs with references to last summer and for at least the last four years has been supporting itself primarily by running commercials!"

Chuck Gysi sent an article from "Security" magazine, "Tune in Intruders With Signals From FM Radio Stations." An antenna snatches the signal of a strong local FM station, which feeds a processing unit. When the signal from that station is disturbed by an intruder, an alarm is sounded. It's like when a TV picture is distorted by people moving around a room, when using rabbit ears as an antenna. The system requires no radio licensing; it can be mounted on walls, suspended overhead or buried. It differentiates intruders from animals, since the adult human body is about ¼ to ½ a wavelength tall at FM frequencies. The system described is by RadioGuard from InstanTel, Inc., Kanata ON, but other suppliers have similar systems.

Fred Suffield of N.W. WA state is a retired radio and radar engineer who is working on a circuit for connecting an outside FM antenna to radios not designed for such. "Did one radar that used six water-cooled triodes in the RF stage and took 30,000 volts with a 30 microfarad output capacitor! A real monster! Nearly a megawatt of peak power!"

Ernie Wilson of Panaxis Productions sent back a 1978 letter I wrote him, mentioning the new FM Atlas going up in price to \$3.95. I also said, "Personally, I am finding SCA a lot of fun, even though

I had to fight off two lawsuit threats so far. It seems entrenched interests do not want to have the public owning tunable SCA receivers, which I maintain is perfectly legal, so long as you use it privately your home or vehicle, and not in business."

Steve Garren would like to locate a Panasonic RF-2200, "in any condition," and he knows someone with a McIntosh MR78 in excellent condition which might be for sale. Contact Garren at 814 Boss Hardy Rd., Winder GA 30680.

The Station Directory planning in FM Atlas 15 was "in a word, atrocious!" says Nick Lombardi. "There is simply no excuse for wasting a whopping 55.17 column inches (the equivalent of 7.36 pages) on superfluous station logos and then, when you realize you are about to run out of space, blightily forging ahead, reducing type size and cramming everything together like sardines."

A new easy-listening FM station is on the air in London, Melody Radio, 104.9, according to Walter Garrett. Others are Capital Gold, 95.8 mhz, and Classic FM, MELODY RADIO 100-102mz (a national service of classical music), which operate in addition to BBC 1, 2, 3 and 4, found on various frequencies nationwide in FM stereo.

Stanley Swanson at KBNL Laredo TX writes: "The 'investigative journalist' article about religious broadcasting stations mentioned in the Dec., 1993 FMEDIA! contains more fiction than fact. The reporter obviously was interested only in expressing personal opinions."

"American Radio" by Jim Duncan, which should be out now, promises a study of duopolies in the 165 or so markets that it covers. His book is \$86 per copy or \$5 less if you send payment with order to PO Box 90284, Indianapolis IN 90284. Thanks to Zel Eaton for sending a radio article which was in "Star" magazine.

The CBC/SRC and Canadian Association of Broadcasters are sponsoring a symposium on "The Sound of 2000" with demonstrations of Digital Audio Broadcasting (DAB), Toronto, Mar. 14-17. A world transmission standard will be set for DAB this year, "paving the way for DAB worldwide." This event builds on the previous conference's experience in 1992 in Montreaux SWITZERLAND. Registration is a stiff \$795. More information? Call (613) 241-9333.

TAB Books announces a project-filled book on building audio and visual communications devices, "Incredible Audio & Video Projects," and invites me to review it, but where will I find the time? Suffice it to say, you can order it at \$16.95 plus \$1.50 shipping from "FM Atlas." I could special order the 224-page book.

Until April, *Bruce F. Young*

### Call Letters Assigned or Changed

AL Birmingham 93.7 WDJC-FM (from WDJC)  
 AK Anchorage 102.1 KKRO (KPXR), "Arrow 102," op. "Power 102" was popular with teens, but not those 25-54, which the station is going after for the advertising bucks. "I listened to the new music once and turned it off," said Shan Bedminster, an eighth-grader. "The new music is boring. It makes me sick." However, 43-year-old Dennis Stovall, one of Shan's teachers, tuned it in after so many students were complaining. "I liked the music the station played, because I like classic rock'n'roll. I can understand the students' frustration, however; it's like they were sold out."

n'roll, featuring such artists as Eric Clapton, Steve Winwood and the Beatles," or as some call it AAA, "adult album alternative." The format leaves out the extremes—syrupy ballads, piercing blues and rap. It targets the 36-59 year old group. Also in the area, interestingly, is a rock group calling itself FM Reception. WRVE is rumored to want to move studios to Albany from Niskayuna NY. Morning man Tom Mailey is fired, but he continues as a reporter for WRGB TV 6. He'd been there three years, and was told by John Dame of Dame Media that he "didn't fit into the station's future plans."

**Stereo—Or to be Stereo**

- AR Cabot KLPQ 102.5, to simulcast with KOUN 102.1 Sherwood, with an op format. KOUN, not yet on the air, may change call letters.
- CA Indio KCRY \*89.3
- CA Oxnard KCRU \*89.1, ID with Ventura. "Segregating the translators by transmitter site location may not give the listener a clue on looking up the station if that city is

different from, how the station promotes itself. I do believe it would be more user-friendly to have the translators follow the regular state listings. I would also suggest that somewhere in the "FM Atlas" there would be a merged (integrated) listing of both stations and translators by frequency, like Part III of the Atlas, but with the translators sorted in... The main reason for translators in the Los Angeles area is a result of population growth to many far flung, outlying areas which are distance or geographically (hills and valleys) isolated from the main transmitter."

MN Duluth KLXK 101.7, LMA with WKLK-FM

96.5-Am Cloquet, but with a separate satellite oldies format—Jones (same as on WJBL 93.1 Ladysmith WI), while WKLK-FM's is SMN's Pure Gold.

 NEW TOWER! MORE POWER!  
 and now at  
**93.9fm**

GA Marti nez WGOR 93.9, having moved from/

IA Atlantic KXKT 103.7: "Scuttlebutt is that KXKT has cut back power on the main station to favor the 11-kw booster in Omaha." In the city of license, Atlantic, "it's weak and fluttery."

ME Fairfield WCTB 93.5  
 NH Manchester WRND \*91.7 on M-F 8 a.m. to 11 p.m., but off during school breaks; talk and music (music types not identified)

NJ Asbury Park DWYGG \*88.1, with studios in Brooklyn, (718) 434-0613. "They don't seem to know they're deleted." [The FCC puts a "D" in front of the call letters of a station which is deleted.]

NJ Fort Lee W276AQ 103.1 applies for a power increase. "They're asking listeners to write the FCC explaining why the station should receive its requested power increase. ... I don't know how much of an increase they want; their signal comes in full strength in Queens and might interfere with WBZO 103.1 Bay Shore if it's too strong. After one year on the air the NY newspapers still don't include WJUX in their station lists." Its address is Jukebox Radio, PO Box 888, Paramus NJ 07653.

NY Jamaica, Queens "WJQR" 91.9, calling itself "Alternative Radio." "Broadcasts are obscure, but let the FCC find him!" Transmissions are very short and appear weekly.

NY Queens Village, a largely Haitian area just west of the Nassau County line, 87.9 has a "very professional-sounding monophonic Haitian French station, Radio Centrale," on from 4 p.m. to midnight; 10 a.m. to midnight weekends; number for requests (718) 740-8246, and it carries ads for several local businesses. "Comes in loud and clear in southeastern Queens and in Elmont L.I.; it's weak but audible in the rest of Queens."

OR Springfield K275AA 102.9, for about six months now.

PA York WQXA 105.7 short spaced to WQSR 105.7 Catonsville-Baltimore MD. "Why didn't the FCC place WQXA at 105.9 and WCXR Woodbridge VA at 106.1? I guess everybody can coexist, but it's strange to have stations squeezed like that. Sixty miles from here or there, you lose your favorite station."

TX Henderson KGRI-FM 99.9, having moved from 100.1 so its switch to 7100 h,v; 132 m could take place.

WI Milwaukee WMWK \*88.1, despite having WITI ch. 6 (87.75 audio) nearby. "There is not enough separation between the two. How can the FCC allow something like this?" Family Stations, like WMWK, have been cutting back at their transmitters, offering some formerly full time people parttime work, which many have rejected. They haven't been able to build all the stations for which they have CPs. FCC has seen to it that "they have slowed down the rate of their applications."

BARBADOS YESS FM 104.1, having increased

its audience in every time period, according to Dec. '93 Systems Caribbean Electronic Media Survey.

MARTINIQUE—about 30 FM stations are on the air, none listed with call letters. Seven are shown for TRINIDAD & TOBAGO, three of which mention stereo in their titles, and a "WABC" 103 FM "appears to cater to Hindi people."

Off Air—Or Not Yet On

 WI Sturgeon Bay WFNL 97.7 with Green Bay

**AM Happenings Most Likely Caused by FM**

AZ Flagstaff KVNA 690 silent; its calls move to 600, replacing co-owned KCLS  
 CA Chula Vista (San Diego) KURS 1040 fined \$20000 by the FCC for running daytime power of 9500 watts at night. They'd turn the power back to 4500 watts at sunset, but "after the local

FCC office closed for the day," they'd go back to the daytime power. FCC investigators found KURS had operated at excessive power on 10 separate dates.  
 CA Palm Springs KDES 920 drops its satellite oldies to simulcast KDES-FM 104.7 100 percent.  
 FL Kissimmee WMJK 1220 silent; had been travel information.  
 IN Fort Wayne WOWO 1190 being bought by WL1B 1190 New York, with the intention of restricting the WOWO signal so that WL1B can add night service for its Caribbean music and talk format.  
 GA Clarkston "WOTA" \*540 is run by DeKalb ("de-CAB") [County] College. Normally covers Atlanta extra-legally, is temporarily at reduced power until repairs are made to the main transmitter in May.  
 ME Fort Kent WLVC 1340-Madawaska WSJR 1230 leave the air, perhaps permanently. The "decision to go off the air four years after Chris Barbieri and Thomas Beardsley acquired the simulcast stations was a reluctant one." The stations "were plagued with financial problems that stemmed from hefty loan payments." It leaves only WCXX 102.3 Madawaska plus a public station and some translators in the area, as well as Canadian reception.  
 ME Presque Isle WFST 600 returns to air with Christian programming, using volunteers to work with the station rebuilding and for on-air talent. It "will run primarily as a listener-supported operation."

MD Baltimore area AM stations not making the ratings—WWLG 1360, big bands, but "making money... pleasant" sound. WOLB 1010 "simulcast of WOL Washington." WBMD 750 religious. WBGR 860 gospel.  
 MA Boston WEEI 590 being sold by the Boston Celtics to Back Bay Broadcasting, owner of WARA 1320 Attleboro MA and WWKX 106.3 Woonsocket RI, for \$3.8 million. Plans to keep the sports format. The sale price is \$3 million less than what the team paid in 1989 when it bought WEEI from Helen Broadcasting Co. Station losses, under Celtics ownership, were running \$50,000 a month. Next season, the Celtics will move their broadcasts to WRKO-WHDH and/or WBMX 98.5, stations owned by American Radio Systems.  
 MI Detroit: "AM only radios are still standard on some vehicles!" Highest percent models with AMono radios are Ford Aerostar van 28.3, Ford F-350 pickup 21.0, Ford Econoline van 14.7, Chevrolet Astro van 13.7, Chevrolet C/K 3500 pickup 11.8.  
 MI Grand Rapids WLAV 1340 off air. "Will remain dark indefinitely until the new owners figure out what to do with it!"  
 WGRD 1410, with the change of ownership (see "Formats," above), drops satellite sports-talk for simulcast of WGRD-FM's top 40. This until the new owners "get around to deciding what to do with the AM... At least they're keeping it on the air (unlike with the ownership change at WLAV-AM-FM, where WLAV AM is silent indefinitely!)."  
 MN Minneapolis KLBB 1400 to stay MOR, being paired with KBCW AM Anoka, as soon as purchase by Cargill is approved. Cargill also

decided to pair WL OL 105.3 Cambridge MN with its WTCX 105.1 Lakeville (now off the air for the time being), rather than disrupt KLBB's format. Strangely, "our research showed that the 18-to-34-year-old audience, when they're looking for an alternative to rock, it's often KLBB. . . What's cool is Ella Fitzgerald, Tony Bennett, Frank Sinatra, the Dorseys."

MS Crystal Springs WCSP 590—FCC deletes call letters and orders Wesley College to maintain all towers until they are dismantled.

NY NY City—Jack Spector, 66, a long time area DJ "who continued to smoke although he had heart bypass surgery in 1983, died of a heart attack Mar. 8 while doing a show on WHLI 1100 Hempstead. Best known as one of the WMCA (570) Good Guys in the 1960s, he was later on WCBS-FM 101.1 and WPIX (now WQCD) 101.9 among other stations. . . Several stations ran tributes and even Howard Stern said nice things about him."

NC Charlotte WCNV 1480 silent; had been news. OH Chardon WATJ 1560 back to news-talk with some MOR music. "Little Mountain Jamboree" (acoustical folk, etc.) is only broadcast on the weekends now.

OK Frederick KTAT 1570 silent, "technical trouble; hopes to be back on this spring."

SC Anderson WANS 1280 dumped by WJMZ 107.3 Anderson, enters an LMA-to-buy with WRIX-FM 103.1 Honea Path  
SC Easley WLWZ 1360 silent

### FM Rulemakings Proposed

*First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

FL Sebastian 95.9C3, Apr. 25, May 10  
LA Jackson 104.5A, May 12, 27  
MO Jefferson City 104.1A, Apr. 28, May 13  
MT Bozeman 103.5C1, May 12, 27  
ND Cavalier 105.1C2, May 12, 27  
OH Van Wert 104.3A, Apr. 25, May 10  
SD Belle Fourche 102.1C3, Apr. 25, May 10  
WA Mabton 98.7A, May 12, 27  
WA Pateros dismissed 107.9A bid  
WV Elizabeth (move from Ravenswood), 106.1A, WRZZ

### FM Rulemakings Finalized

AL Warrior 98.7C3 for A, WLBI  
AZ Buckeye 106.9C2 for A, KYNI  
AZ Paradise Valley 105.9C3 for A, KXLL  
NM Central 95.3C1 for C2, KNUW  
NM Silver City 92.9C2 for 94.5A, KSCQ

### FCC Freezes New FM Station Applications

Doing more than closing the application process (last month, p. 6), the FCC has quietly imposed a freeze on new commercial FM station applications. I have been preparing an application for 92.1A Hermantown MN, and was dismayed to read a letter to the editor of "Broadcasting" mentioning a freeze. I called the FCC, and Karen Mercer of the FM branch of the Mass Media Bureau returned the call. She did considerable checking and said it

is true, there is an FM freeze, and my application would not be accepted. She was uncertain whether or not the FCC would advise applicants when they could reapply, or if they would have to find out through news releases.

What should be routine information has been difficult to get—especially from one of the local Christian stations. I have been refused access to part of their public file, but I expect by the time you read this the matter will be happily resolved. I was told that if I were to be putting on a rock station they would have no problem, but knowing I am a Christian, they are afraid I would compete in that format. KQDS-FM 94.9 Duluth has been especially helpful, and it is for their tower I may apply. Now with the freeze, there is more time to apply, although also there is more time for any competing applications to come forth.

Mercer said she thought the freeze might end in a month, but how that would affect existing or new filing windows is unclear.

### Small-Print Happenings and FM Industry News

FCC and Evergreen Media settle their indecency differences. The FCC dropped its suit as part of an agreement that it will write new guidelines regarding indecency, while Evergreen, licensee of WLUP (now WMVP AM) Chicago, dropped its claim that the FCC's enforcement guidelines are unconstitutional. The suit reportedly cost Evergreen \$500,000, while the fines came to only \$40,000. But Evergreen agreed to pay the FCC \$10,000 without admitting any wrongdoing.

Duopoly pairing includes KBPI 105.9 and KMJI 100.3 Denver to Secret Communications, which is selling WWNK 94.1 Cincinnati to Great American Broadcasting, owner of WKRR 101.9 there. KEXX 100.9 Tracy and KWIN 97.7 Lodi CA being paired under Silverado Broadcasting. KQIX 93.1 and KKKY 95.1 Del ta CO being bought by Mustang Broadcasting. Terry Robinson buys KXLK 105.3 Hayesville and KEYN 103.7 Wichita KS. KVKI-FM 96.5 Shreveport is part of a duopoly with KITT 93.7, while KLLK 92.1 Benton is paired with KDKS 103.7 Houghton-Shreveport. A sales only agreement brings WNCX 98.5 and WENZ 107.9 Cleveland and together. Portsmouth NH's WHEB 100.3 and WCQL-FM 95.3 York Center ME are together.

KOMO-AM-TV Seattle given an FCC waiver to add KPLZ 101.5. WKRG-TV Mobile, owner of WKRG-FM 99.9, given the OK to buy WJLQ 100.7 Pensacola and its AM. WSIX 97.9 Nashville buying WYHY "Y-107" 107.5 Lebanon. In the Chattanooga area, WVXA 93.1 Signal Mountain is being sold to Wicks Radio, owner of WLMX-FM 105.5 Rossville GA.

Owning Long Island, or so it seems, will be Liberty Broadcasting, acquiring WBLI 106.1 Patchogue, WHFM 95.3 Southampton, WBAB 102.3 Babylon, WHCN 105.9 Hartford CT and WSNE 93.3 Taunton MA.

Another sale, or gift, is that of KING-FM, "Classic King," donated by the Bullitts to a nonprofit corporation, which includes the Seattle Opera, the Seattle Symphony and an arts council. The sisters plan to start a contingency fund in case the station fails to reach its revenue needs. KING AM is being put up for sale.

Cable music audio shows up in ME and are broadcasters concerned? Not Ron Frizzel, manager of WKZS 99.9 Auburn-Portland. "It's never gotten a big enough audience to show up on the ratings," he said. Frizzel sat on an NAB panel

which studied cable audio. Sammons Communications in NJ dumped its cable-enhanced FM service to subscribers without warning. People have been "flocking" to area electronics stores to purchase antennas. Atlantic City is one of the nation's largest cities without a National Public Radio affiliate—another reason cable subscribers used the FM service. But Sammons maintained that with more FM stations coming on the air, it became harder to receive the Philadelphia signals, and there was some interference to TV channel 6 on the cable.

A relative newcomer in the business is AccuRatings, which has measured the Boston market. What it tells there may be applicable to other markets, mainly in showing the ratings impact of public FM stations. WBUR "90.9 was No. 2, just behind WBOS 92.9. Arbitron segregates public from commercial FM, making it difficult to compare the audiences for the two types of stations. AccuRatings uses the telephone, while Arbitron uses diaries. The complaint against Arbitron is that the diary system didn't accurately measure radio listening of people too busy or too impatient to compile a diary over a two-week period—especially younger people.

Bob Wilson, publisher "Radio and Records," will stay on, even after its sale for a reported \$12-15 million. It reportedly turned down a \$40 million offer from an unidentified European company last year.

WLLI 96.7 Joliet IL, KTTI 95.1 Yuma AZ, KDVV 100.3, KKMY 104.5 Orange TX and their AMs all may go off the air, because owner Robert Tezak was convicted in IL of two counts of committing arson and one count of conspiracy to obstruct justice.

Not losing its license, but only fined—that's WBHT 97.1 Mountaintop PA \$3,500 for airing a taped conversation without prior permission. KBAC 98.1 Las Vegas NM fined \$20,000 for having its main studio outside its primary (70 dB/u) contour. Its studio has been in Santa Fe, where it has an on-channel booster.

WMPG "90.9 Gorham-Portland ME is working for a more consistent sound, with staffers getting training from management, under the leadership of Robert Rosenthal, who is new on the job. The community apparently supports WMPG, with 81 percent of pledges coming in after a single mailing.

The NAACP has supported the FCC's EEO fine schedule, while the NAB has opposed the FCC approach, which has been more activist lately. The dispute lies in the FCC's trying to establish a forfeiture schedule applicable to "every aspect of a licensee's employment practices."

The FCC denied John H. White a review of his application for La Crosse WI 106.3, now a CP as WQCC. White's application was dismissed because his hearing fee was submitted two weeks after the due date. White charged that he should have been given personal notice of the date, but the FCC countered that "White's lack of awareness concerning the hearing fee deadline does not constitute sufficient grounds upon which to grant a waiver of the fee requirements."

At an RAB seminar on duopolies in small markets two people agreed an advantage is reduced sales staff. "People get tired of seeing sales reps," and by offering different formats on the same band, you might pick up some non-radio advertisers. The RAB reports radio revenues rose 9.3 percent in 1993. Here's some RAB-type advice: "There is no man living who isn't capable of doing more than he thinks he can do," Henry Ford. Or, "I'm a great believer in luck, and the harder I work, the luckier I get," Stephen Leacock.

Back to the FCC third phone with broadcast endorsement? It may be, with the SBE introducing a Radio Station Operator Course. John Barcroft has written the "SBE Radio Operations Handbook," which includes an examination

request form that can be mailed to the SBE when ready to take a 50-question exam. The course fee will be \$35, which includes the postage and examination fee. Looks like a winner!

KCSN \*88.5 Northridge CA was off the air four days after the earthquake, but returned with equipment loaned from several L.A. stations. KCRW \*88.9 Santa Monica, farther from the epicenter, was off only two hours.

Tim J. Walstrom leaves the commercial radio world to manage KSJR \*90.1, mono KNSR \*88.9 Collegeville-St. Cloud and KBPR \*90.7 Brainerd; he had been station manager of KLZZ 103.7 Waite Park-St. Cloud and its AM.

Again shaking its finger at satellite-delivered radio is the NAB. It's come out against a proposal by Satellite CD Radio, Inc. to allow the public stock without losing its place among other applicants to provide a satellite-delivered digital audio service. However, there are plans to provide satellite audio, with DirectTV said to be ready by the end of this year, and it is the digital format which could give satellite audio the edge over terrestrial broadcasting.

Leonard Feldman, 66, dies of cancer. He was a longtime writer on audio and FM tuners, appearing in such magazines as Audio. He testified against anti-copying systems for digital audio tape recorders, and convinced Congress that the copy-code notch proposed for CDs would affect their audio quality.

Another audio columnist is Hans Fantel, who writes in the NY Times. He mentions, in an article sent by O. Murphy, Hampton Bays NY, how the FM band is overcrowded. Helping to overcome the situation are new tuners which do a better job of sniffing interference and compensating for it through an internal computer. The \$750 Onkyo T-909011 is said to include such refinements, as well as Yamaha's TX-3000 at \$749. Another tuner, Harman-Kardon's Citation 23 (\$699), uses a circuit it calls Active Tracking. Its exact mode of operation is not disclosed, but it supposedly enables tuning into weaker adjacent channels without interference from the stronger signals. I have not tried any of those tuners to see if the claims may be true, but the article concludes with the advice to consider getting a good FM antenna. "Even the best tuner cannot perform properly if it is not connected to a proper antenna," often meaning a rooftop antenna, which can be pointed to the desired station.

KCMA 92.1 Broken Arrow (Tulsa) did its seventh annual "KCMA-Tulsa Operathon," which was judged a "howling" success. There was a singing dog contest plus a pizza event. No indication how many \$\$\$ were raised, but the dog(s) musta howled! KCMA President John Major has helped preside over the growth of FM in Bulgaria. He returned from Sofia, a city of 1.2 million, which now has six private FM stations in addition to two Bulgarian National Radio stations and four foreign stations (BBC, Radio France, Deutsche Welle and Radio Free Europe). Dr. Major served as a "volunteer executive" at Radio Vitoshka, one of the six private stations in Sofia. Private stations are limited to 250 watts, while the government stations have 10,000 watts each. However, stations like Radio Vitoshka and others are developing networks of stations in other cities.

"Your reader is off base (FMedia! January, p. 3)," writes Dr. Major. "Things aren't at all bad at KCMA: our billings more than doubled last year, and the trend continues. We haven't thrown in the towel by a long shot. When the Edge of Insanity Network wanted to lease midnight to 6 a.m., we agreed—since we were off the air during those hours, and no station in the market carried any 'alternative music'. As a matter of fact, some of our new overnight listeners—predominately younger—even stuck around when we returned to classical at 6, and at least a few of our regulars tell us they enjoy the 'alternative'."

FCCommissioner James H. Quello addressed the Federal Communications Bar Association,

saying the new complaints against Howard Stern and Infinity Broadcasting could result in serious enforcement action. "In each case in fining Infinity, the Commission has stated it would consider further actions should Infinity broadcast indecent material in the future. Each time there has been another repeated violation. How many 'next times' can the public and the Commission tolerate? ... Fines have not had a deterrent effect." Quello concluded: "As a former newsman and broadcaster, I consider myself a strong advocate of First Amendment rights. I believe reporters and broadcasters have a right to be wrong; a right to even be insufferably smart [paraphrased]; but not a right to violate established indecency and obscenity laws."

KNXR 97.5 Rochester MN issues a "Call to Action" to its audience to help keep the MOR easy listening format from changing to rock or country. Pressures from ad agencies are cited: "After 28 years of broadcasting, KNXR is at a crossroads," writes President Tom Jones. "There are strong pressures for us to change and become like every other radio station... When we started [in 1965] FM radio was young. FM radios were few and far between. By the late 1970s, FM radio had come of age and we began to flourish. KNXR has been a profitable business venture [but] times are changing. Stations like KNXR are falling by the wayside. Audiences are getting older. Advertisers' buying habits are changing. Competition is greater. Operating costs are ever increasing." Listeners are asked to fill out Arbitron diaries, visit advertisers, mail enclosed preprinted postcards to businesses which should be advertising but aren't, and join a "KNXR Listener's Club" at \$60/year. Costs will be applied to regular operations and not profits, and not tax deductible. KNXR also wants folks in outlying areas to help establish translators.

The Dean of MN broadcasters is Charlie Persons, pictured in the MN Broadcasters Newsletter, along with his wife June. Charlie told me

he is 86, having started his career in 1927 at WEBG Duluth, and later building WEBG-FM 92.3. I forgot to ask him if he still flies his airplane.

FM totals as of Feb. 28: FM (92-108 mhz) 4986; AM 4934, FM educational (88-92 mhz) 1666, along with 2100 FM boosters and translators.

From the classifieds: Wanted editor/writer College Media Journal. Resume, writing samples to CMJ, 11 Middle Neck Road, Ste. 400, Great Neck NY 1021, attn. Editor. No calls!

General manager needed. Three years management experience, plus excellent verbal, writing, on-air, interpersonal skills. Knowledge of AK issues preferred, \$32-38k, EOE, plus benefits. KHNS search committee, PO Box 1109, Haines AK 99827.

As for permanent effects, you will have to ask a hearing expert." Ralph Nader wanted congress to study the problem of loud music on young people's hearing.

FM AS IT WAS—OR MIGHT HAVE BEEN

My box of "oldies but goodies" is full of old NY FM Guides, so I think I'll print some logos and summarize the issues before donating them to the Pavak Museum of Broadcasting or some other worthy source.

Long time FM listeners might remember WRFM 105.1, the old Bonneville station. Even if you don't live near NY you might have heard of it, or seen it listed in old publications, like my 1973

"FM Atlas." WRFM advertised, in June, 1970, "Begin to like radio again." On 105.1 mc you'll hear Mancini, Mantovani, Andy Williams, Tijuana Brass and Boston Pops 24 hours a day, "yet never more than seven commercials in any hour," all in magnificent stereo.

WNBC-FM 97.1 urged us to listen to the mets, and a schedule of their exhibition and regular season games was printed.

LISTEN TO METS PRE-GAME SHOW TEN MINUTES BEFORE EVERY GAME WNBC-FM RADIO 97.1

Philip Aronson wrote a letter to the editor complaining about WNBC-FM's change in format: "While retaining the pre-recorded program package, the station has chosen to program its classical music as background music. Roger Bowman and Gene Hamilton frequently fail to identify the works played, or refer to 'the Mozart Piano concerto', without letting us know which of the 27 it is."

WTFM 103.5 mc mentioned how people are discovering their delightful music every day. Bill Watson's "free-wheeling excursions into the realms of music, poetry and natural wit enrich the air waves," 10:10 p.m. to midnight on WQXR-FM 96.3-AM. The magazine kept urging people to send in \$1.50 to receive a handy FM transmitter map, "suitable for framing with antenna heights, power ratings, stereo/non stereo, educational/non-educational, and frequencies."

Writing a letter to the editor, Feb. 1970, was Lawrence Weil, East Rockaway: "At Hofstra University, where I attend school, there is what is known as the stereo room, with a Seeburg Stereo Music Center (distortion machine). This monstrosity is always playing hard rock music at top volume (maybe 100 watts). It is always possible to spot a student who has just come from this room because he is always asking the teacher to repeat himself. This seems to be only a temporary effect.

\* Harry Maynard reported, in Oct., 1969, that government may step in and forbid combination selling of jointly owned \*AM-FM stations, a far cry from today's

duopoly situation! 'The owning of both an FM and AM station, the theory goes, offers unfair competition to the FM only broadcaster. Cutting advertising rates on the FM or giving it away free in order to stimulate AM time sales shows some operators still selling FM short.'

WMMM 107.9 Westport CT will be going stereo late this year (1969) with a power of 50000 watts; its power has been 5200 watts. A four channel broadcast took place Oct. 26, 1969 10-11 p.m. on WNYC-FM \*93.9 And WKCR \*89.9. "You, the listener, will need two FM stereo sets." Listener reaction proved to be "highly enthusiastic," with such words as "far better than two-channel stereo," "out of this world," "truly extraordinary sound," and "the best in home listening I've ever experienced." Converting to four channel is not much of a problem: "In its least sophisticated form, it means another stereo receiver or a four-channel stereo tape head. The speakers can be added as needed. There's no use trying to fight it."

"Many major broadcasting empires which did not believe in the ultimate success of FM and which were offered FM stations at fire-sale prices are now kicking themselves. In its September 1 (1969) issue, Forbes magazine pointed out that . . . it is still possible to get in on the booming FM market. But you'd better hurry. The number of authorized stations has doubled to over 2000 since 1961, and the FCC already has received a record number of requests during the first six months of 1969. But prices of stations have escalated too, doubling and tripling in some areas," wrote editor Harry Maynard. "You can pay as much as \$750,000 for stations that are losing money," says Philadelphia Joseph Field, whose Entertainment Communications Co. owns six stations. "If you can find me one in New York for a million and a half, I'll buy it and pay you a finder's fee." Field paid \$750,000 for WAYL 93.7 Minneapolis around that time.

In January, 1970, Leonard Feldman, who died in 1994, was mentioned for an article on WNYC-FM \*93.9 that appeared in Audio magazine. He did make the mistake of saying WNYC-FM was not transmitting from the Empire State Building, which it was at the time. "One of the reasons for WNYC-FM's excellent stereo signal is that WNYC-FM has some of the best and latest stereo transmitting equipment produced by Gates."

There's a lot of diversity on the FM dial as 1970 begins, wrote Maynard. "Something for every mood or taste—including language courses on WNYC-FM and WVHC. . . . With some notable exceptions, the independent broadcaster has led the way to FM's current success by offering programming not available elsewhere in the market place and by using the full potentiality of the medium for stereo broadcasts."

WCBS-FM 101.1, by Dec., 1969, had kicked off the "Young Sound" and gone on with the "New Sound." It's a live format, with six new announcers who have been recruited from all over the U.S., and programmed in the direction of WOR-FM 98.7. The six are Tom Cloy, K. O. Bailey, Steve O'Shea, Bobby Wayner, Bill Brown and Gus Gossert. Gossert, the new p.d., said: "Too many pop music stations insult the intelligence of the listener in his twenties—what's more they are not even entertaining."

A Chase Manhattan report was printed showing FM station revenues for 1967 of

\$39.8 million, up from \$4 million in 1958. The industry lost an estimated \$4.2 million in 1967. Indeed, every year showed a net loss for FM. Still, the report called FM "a growing medium." Its audience had grown from 12 million adults a week in 1964 to around 32 million in 1967. FM radio set sales had risen from 1 million in 1960 to 17 million in 1968, with more imports than domestically-produced.

FM Guide had sold more newsstand copies the month before (November, 1969) than in its history, and it was available in 1500 more newsstands than before. Yet, in just a few short years "FM Guide" was to be no more.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

WYSY 107.9 Aurora IL, with its new slogan, "sounds good with their all '70s format but I give it time and it may become repetitive, similar to any oldies-based format," writes Mike DiSandro. "As for WLUP 97.9, Steve and Gary split back in the fall, and Gary went to the FM in middays and Steve is on the overkilled sports format WMVP (old WLUP AM) in AM drive. I'm afraid he's gonna sink worse than their experiment with Howard Stern—I miss Howie and think he would of fared better than what Steve is doing now. After 15 years in this market, I think Steve is pretty much headed to pasture! Gary Meier is doing quite well middays. He was always more funny!"

In upstate NY, Tom and Patsy Mueller are farmers who live next to 50 kw WRQI 95.1 South Bristol. For several years they and other families living within 450 m of the tower have experienced interference in their electrical appliances. But when Rock-it 95 signed on the Howard Stern Show, it was more than the Muellers could bear. "We are held hostage in our home and in our neighborhood by the programming of Howard Stern," said Mrs. Mueller. "I've heard him talking about sex. . . . I don't know him and I don't really care to know him. I have to live with him in my home every day whether I want to or not." The station not only covers 1/3 of the FM band in the area but can also be heard on TV sets and even on telephone lines. "What if my minister calls me?" asked one woman. But Howard Stern in their appliances is only part of the Muellers' complaint. "I've lost nine heifers in three years," said Mr. Mueller. "I think there are some things that we don't know about in our atmosphere from this electrical radiation. It's affecting my cows." The Muellers are battling to get the tower taken down. Rock-it 95 claims to have fixed the interference in some homes and promises to keep trying with the others. Howard hopes the Muellers will be counted in the next Arbitron ratings period. "At least they can't say they don't listen," he said.

The death of WNCN (now WAXQ) 104.3 has resulted in donations of the

station's large library of compact discs. WSHU \*91.1 Fairfield CT received the largest portion—nearly 6000 CDs. The donation comes at a time when WSHU is expanding its signal across eastern Long Island NY. Valley Stream (NY) Junior High School received 1000 CDs of guitar music for its music classes, while the St. Augustine School of the Arts, a private elementary school in the South Bronx, received about 2500 discs, as did the Choir Academy of Harlem, affiliated with the Harlem Boys Choir. No decision has been made on what to do with the "now-obsolete" LPs, numbering between 30,000 and 40,000 discs. Although the distribution of WNCN's record library may make some people happy, it also "renders almost moot any dream of resurrecting the station itself," concluded Peter Goodman in Newsday.

Standley W. Claussen took a two month motorhome trip from CA to ME and FL, including TX and the "deep south." His conclusions: The Midwest and the Northeast are blessed with several public radio stations in many medium-sized urban markets. This usually means you can choose between classical, news and public service and jazz formats. In the Far West and Deep South there are fewer public FM stations, but most have statewide networks using carefully-placed transmitters and translators to cover large remote areas: the models here are OR, NE and GA. While oldies music formats dominate the commercial FM stations with country and western edging every other format in the Far West and South, the quality of programming and signal output is very good in general. AM radio is dying (as everyone who has a chance to observe this has commented); but its terminal gasps are heard in right-wing commentaries almost nationwide; not just Limbaugh, Buchanan and the Watergate jailbirds, but many local wannabies who have newsletters and all seem to want to run for Congress. I have one problem with Mr. Enstrom's comments in FMedia! (Feb., p. 8): There is a lot of garbage on TV, agreed, but "NYPD Blue" doesn't fall into this category, no more than "Birdland" or "Homicide," or any other show "that tries something besides clever cliches out of the mouths of half-baked teenagers and their idiot parents."

WMRN-FM 106.9 Marion OH is available to a reader who lives much closer to WRQK 106.9 Canton OH. He's able to hear programs like "American Country Countdown" on Saturday afternoon using a vertically-mounted outdoor antenna. "While there is interference from 'Rock 107' Canton on this frequency, I find it is easy to get rid of the interference by using a vertical antenna with a preamplifier."

Until May,

*Bruce F. Elving*

**Stereo—Or to be Stereo**

CA Essex KHXY 98.9  
 CA Lenwood KIXW (not "KIXA," p. 207 FM  
 Atlas-15), to 144 m (2500 h,v)  
 CA Lucerne Valley KIXA 106.5  
 CA Montecito to KJEE 92.9. James Evans has put  
 this station on the air, and it's carrying  
 different formats each day. One day it's  
 underground rock, the next day nonstop  
 Elvis, the next Roy Orbison. On St. Patrick's  
 Day it was all Irish music. It's also been  
 Spanish, classical, reggae, Frank Sinatra, Ray  
 Charles, jazz, and "strange mixtures of what  
 are obviously his half dozen or so favorite  
 rock bands." Evans (pictured) said "I was

really surprised that so many people found  
 me on the dial so quickly. It's a thrill realizing  
 people are listening to my station without  
 knowing it's me." It's the kind of station  
 some listeners feel they would like to run.  
 "All radio stations are locked into format  
 now. It takes away spontaneity. This station  
 is just too much fun," said Linda Eveland,  
 who works at the Santa Barbara County  
 Court House. So far, no commercials, just a  
 recorded "KJEE Montecito" after every  
 song. It is on 7 a.m. to 11:30 p.m. daily  
 except Sundays. "I'm in broadcast radio jail.  
 You can't leave the board," Evans said. He  
 was one of 35 applicants for the 92.9 channel.  
 He plans a low-budget station in "the low  
 four-figure range" each month, with the  
 power bill alone coming to \$500 a month.  
 Soon, however, Evans plans to announce a  
 more conventional format for KJEE, but he

wants that to be a surprise. He plans to end  
 the current marathon by playing Ravel's  
 "Bolero" over and over, after which com-  
 mercial selling will begin.  
 CA Thousand Palms KLOB 94.7, "Radio Lobo  
 (strict). Lobo is Spanish for wolf. Spots on  
 local Spanish TV show a picture of a wolf in  
 the upper left corner with "Radio Lobo" and  
 in the lower right "KLOB 94.7." It has "full  
 stereo—great audio chain!"  
 HI Honolulu KKLV 98.5 op, stereo resumed. In  
 a duopoly with KIKI-FM 93.9 and AM.  
 IA Asbury KIKR 103.3, k, "Kicker Country"  
 (not strict), ID with Dubuque; studios at  
 5490 Saratoga Road, ZIP 52002; Dale A.  
 Ganske, manager. Offices are in the KLYV  
 105.3-KDBQ AM building in Asbury, but  
 KIKR has five employees of its own.

 SC Loris WVCO 94.9, k, "Y-94," duopoly with  
 WYAK-FM, "Y-103" (from "Country 103"),  
 Surfside Beach, parallel programming  
 SC Pawleys Island WDAI 98.5, rm, uses calls  
 TX Howe-Van Alstyne-Sherman-Denison KHYI  
 95.3, k, "Y-95, Real Country," with SMN's  
 format.  
 TX Odem KKHQ 98.3, k, back on air, ID with  
 Corpus Christi, has ABC Moby Show.  
 "Not to be contentious, but I think it is more  
 important how the size [of the FM Atlas]  
 relates to 'user friendly' than how convenient  
 it is for the printer. We have numerous real  
 examples of the larger format for radio listing  
 books of various kinds. The maps would be  
 more useful (easier to discern) and you would  
 have more room for other upgrades. I just  
 want to keep you thinking about it!"

MN Clouet WKLK-FM 96.5 now with Class C3 service, but still hard to get in parts of nearby Duluth. [KMFY 96.9 there was weak.

MN GrandRapids K297AD 107.3. For a while/ MN Marshall KBJJ 107.5 (ex-107.1)

MN Minneapolis KMOJ \*89.9 was off briefly after its transmitter was seized by sheriff's deputies. Leon Williams, Jr., was fired in 1989, for allegedly misusing station funds, after which he sued for wrongful discharge. The court agreed with Williams and fined the station. The station appealed, but it was still required to put up a \$25,000 bond in the meantime, which the station failed to do. KMOJ's bank account of \$9,000 was garnished. During the raid, complete with moving van, "the only thing of value we could find was the transmitter," worth about \$4,000. The station returned to the air that evening under what the Minneapolis Tribune called "cloudy circumstances," playing music in stereo and announcing after every record that they were on for "equipment testing purposes only." As I write this, KMOJ is not being received in St. Paul and other outlying areas, and is at 1/10 power, using a borrowed 100-watt transmitter from MN Public Radio. "We had a piece of equipment [in storage]. They needed it and we gave it to them. It's meant to bridge a problem until they get it solved," said Ginger Sisco of MPR. Thirteen-year-old Torry Redmond enjoyed KMOJ, waking to its gospel music at 5 a.m. He even credits the station for changing his life soon after moving from Atlanta. "I used to steal from my friends for money. But one day I was listening to a talk show on KMOJ and they had these guys who had been to prison talking about what happens to you when you keep stealing. Now, because of them, I have two jobs. KMOJ dares to be what other stations are not... The other guys stay in line. KMOJ goes over the line," he said.

NJ Asbury Park WYGG \*88.1 "still has not deleted." Seeks CP to replace expired permit.

NY New York WXRK 92.3 still carrying and syndicating The Greaseman (Doug Tracht), but his ratings are only half what they were when Meg Griffin held the 6-10 p.m. time slot. Still, bossman Mel Karmazin, stands by his man, saying he was their big competition in Washington DC, and by signing him up, they removed him as competition. "By getting him out of that market, our own stations went up so much that we've already made our investment back."

WNEW 102.7. "Eddie Vedder, lead singer of Pearl Jam, used the f-word more than a dozen times during the group's live-by-satellite radiocast April 3. . . Neil Barry, promotions director, noted that off-color or language is one risk stations take when they carry a concert live. . . There isn't much chance to bleep anything out. An FCC attorney said no complaints have been received." The concert was carried on 300 stations around the country, in addition to WNEW.

WMXV 105.1 had "a really convincing April Fool's Day gag. When I tuned them in around 9 a.m. on April 1 they were calling themselves 'the new Arrow 105.1' and playing 'all '70s, all the time'. They had a trivia contest about '70s TV shows, and they kept saying how exciting it was to be starting this brand new radio station. As all this was carried out in a normal tone of voice and without any horsing around, it really sounded legit. I was going to delete the station from my presets since I'm not particularly fond of '70s music, but I decided to stay tuned for a while to see if they had new call letters. At 10:00 they said 'April Fool! Now back to your regular station— WMXV Mix 105—with the best mix of the '60s, '70s, '80s and '90s'."

NY Queens [Jamaica] "WJQR" 91.9, back on air using the weaker of their two transmitters. DeeJay "Dr. X" played a CD by Evelyn Champagne King and wanted listeners to call in and say if they liked each song. He claims "WJQR" has been on since 1988.

NY Southampton WPBX \*91.3, but sometime this summer it will move to 88.3 and increase to 25000 v, 6000 h, 218 m, d-a. It will add a third full time staffer, in addition to utilizing volunteers, and will sport the "second strongest signal on Long Island."

NC Clinton WCLN-FM 107.1, not having moved to 107.3

OH Mount Gilead WVXG \*95.1

SC Georgetown WWXM 97.7 now 100000 h,v

WI Superior (transmitter and studios Duluth MN) KZIO 102.5, very weak, "working on transmitter."

WI Wausau WIFC 95.5 is weaker than normal

NS Eskasoni Reserve CICU 99.1 e, with 65% Micmac, 35% English. It is operating from the basement of Manager Greg Johnson's home, but will soon have its own building. Uses volunteers. "Audience reaction has been nothing short of fabulous," and Johnson says "listeners are really appreciative." No word as to whether or not it is stereo.

ON Toronto area "Irate FM" 104.9, heard only once, no regular schedule.

**Off Air—Or Not Yet On—Real Stations and Pirates**

AL Citronelle WXHT 102.1 "silent pending upgrade."

AZ Sedona KSED 107.5. Tom Rockler, (602) 299-9161, bought the CP "for this nightmare in Sedona," and was to have come on May 1. "The FCC took their time approving it because they did not believe that the two former groups that had owned the CP had actually spent that much money on trying to get it on the air. The price was way over \$100,000 (for a CPI)." Format not yet determined. It will use two STL hops to the top of a mountain in a national forest. "I think it has been a CP for over six years now. I had looked at it when it was being controlled by an old game show host, Art James. If it ever gets on, it will cover half the state, but the engineering to get it on the air is a lot to swallow."

CA Mecca 97.7, Rancho Mirage 99.5—no calls assigned to either

DE Dover WRTX \*91.7—"should be on by the end of this year."

IL Broadview "Power Radio" 87.9 unceremoniously shut down by the FCC, after Peter Sinadinos' mother told him the FCC was knocking on the door. There are more pirate stations on the air than ever, according to an April 15 Chicago Tribune story by Ted Gregory, with about 200 on shortwave, and possibly "thousands" on AM and FM—many found on the extremes of either dial where there is less interference. Pirate radio was featured in the 1990 film, "Pump Up the Volume," and mentioned in the Pirate Radio Directory published by Gerry Dexter's Tiare Publications of Lake Geneva WI. I have a copy for sale of "Pirate Radio Stations," tuning in underground broadcasts, by Andrew R. Yoder, \$12.95 plus \$3 postage. Back to IL: "More agonizing to Peter is coming without his frequency fix. . . The freshman at Riverside-Brookfield High School started gathering signatures on a petition supporting FCC licensing of his station." He says, "I want to get back on the radio so bad I'm calling all the radio shows in town just to get on the air." His station was put off only after a listener to WLTL \*88.1 La Grange IL complained of interference from "The Power."

MO Springfield KWND \*88.3. "The Wind" has been off "for quite some time."

NH Bedford WAEF 98.5

NH Farmington WRHF 106.5

NH Somersworth WRGW 98.7

NJ Ocean City WRTQ \*91.3, expected on by end of this month from the WBSS 97.3 Millville NJ tower in Corbin City.

NM Hobbs KOKN 102.9 "still not on"

NY Ossining WDFH \*90.3 "has stalled. It was

supposed to be on the air by the end of March, but they couldn't nail down a deal with the guy who owned the building they proposed to put it in. . . Mark Sophos now has to apply for a CP extension. It will eventually get on the air with a nifty compact Shively two-bay circular antenna complete with radcemes."

NC Charlotte W264AF \*100.7. Funds are being raised by local WNCW listeners who believe the "Charlotte market has become so stale and mainstream that some kind of alternative station is needed." WNCW reaches only good receivers on the north or west sides of Charlotte, and the translator will help in southeast Charlotte. But a citizen's group has formed to fight the tower in the neighborhood. "Stay tuned!"

OH Mansfield WVMC \*90.7

OK Oklahoma City KOCC \*88.9. The radio station of Oklahoma Christian College "sits behind locked doors."

TX San Angelo KYZZ 100.1, KKLK 101.9

The FCC's radio police have a new weapon—a car equipped with computers and \$75,000 worth of equipment. It's the first of 10 such vehicles to be deployed, but the FCC's mum on exactly where the rigs will be stationed. "With the equipment, an FCC agent can pick up a radio signal, delve into a data base to find out whether it is authorized and pinpoint the location of the transmitter," said Jim Hughes, an FCC engineer who helped design the system. Before, the FCC had to rely on triangulation, usually from fixed observation points, such as found at Grand Island NE and Allegan MI.

**Deletions**

*Symbols are as in the "FM Atlas" and November FMedial*

CA Los Angeles KUSC \*91.5's Music 4 loses the Persian doctor. "Not enough receivers from SCA Data Systems, so a Jewish guy took it over. He requires fewer receivers. I shudder to think what might happen if some Arabs still have the Music 4 receivers and hear the Jewish system!"

KPWR 105.9 ↑, 92 kHz, Islamic/Arabic, having moved from KUSC's Music 4. KPWR's 67's ↑ is on only momentarily.

CA Northridge KCSN \*88.5 no 67 (had ↑), and back to normal operations on the main channel after the earthquake.

CT Stamford WKHL 96.7 still ↑C, 67, but at times used for sports and special events. It's been utilizing the 67 for live broadcasts from various locations. "You can hear off-mike activity while the records play, unless the DJ moves too far from the microphone. They had a movie-trivia question and they mentioned the right answers over the SCA before taking any phone calls!" WSTC 1400 Stamford is still on the 67 sometimes, "and I once heard an off-mike conversation there, too."

FL Miami WTVJ, channel 4, had a talk radio network on iSAP. However, "it confused people with VCRs when they had it turned on and the sound did not match the picture," so they took it off.

WCIX, channel 6, still has Spanish on iSAP, but much fewer hours per week after CBS took over the station.

GA Atlanta WKLS 96.1 ↑(↑), 57 kHz

KS Pittsburg KRPS \*89.9 ↑X, 67 kHz, 1200 baud, printing out farm news, Dow Jones stock quotes, weather and miscellaneous data to computers having an SCS circuit board built in—via a DTN receiver—a computer with an antenna

MN Duluth WSCD \*92.9 still ↑T, 67, to carry local newspaper reports 9-11 a.m. starting in June in conjunction with State Services for the Blind. News from the Duluth News-Tribune, Duluth Budgeteer and Senior Reporter will be heard. Because of no cross-state cooperation, listeners in nearby WI won't be able to tune in.

MN Minneapolis—ASCAP and BMI are cracking down on businesses here and elsewhere playing music on hold on their phones. Even when a radio is used and the station has paid license fees, the businesses are still liable. Costs range from \$156 to \$1254 a year for ASCAP and \$143 to \$134 for BMI, depending on the number of lines. A store would need both licenses, or it could subscribe to a third-party provider, such as Muzak at a slightly higher cost and avoid having to pay two billing parties. Customized messages can then be put on. Muzak has 200 customers for its message and music packages in the Twin Cities and two other firms another 80. This business is growing at 20 percent a year. "It's more expensive than buying a license to use your own radio," said Bob Sheets, president of Homestead Mortgage Corp. "But at least you wouldn't be calling your office, the way I did more than once, and wind up listening to a radio ad from one of your competitors." A way out of that would be to have a talk station on, or NOAA weather.

MN Virginia WUSZ 99.9 no ↑U, 67

MO Maryville KXCX \*90.5 ↑T, 67, Kansas Audio Reader. The Audio Reader tends to be possessive of its receivers, and doesn't encourage people to tune in who are not authorized.

NJ Newark WHTZ 100.3 still ↑(↑), RBDS at a very low level of injection. "While its signal is very strong, its RBDS identification, 'Z-100', is slow to appear."

PA Philadelphia WRTI \*90.1 still ↑(↑), with the RBDS identification, "JAZZ FM," readable on specially equipped radios. It "comes in

powerfully and its identification appears quickly."

WFLN 95.7 ↑(↑). It transmits the call letters, but also "accurate time and date, program type and Radio Text, a scrolling display of alphanumeric messages for receivers so equipped." The Grundig "Yacht Boy" 500 is one of the few portable radios having an RBDS display; it's a pricey \$308.50 from Willabee & Ward, (800) 367-4534.

TN Memphis—the Association of Radio Reading Services, based at WYPL \*89.3, is proposing a set of standards for SCS systems. Standards will be for high speed data transmissions and their associated technologies. Data must be RBDS compatible, cause no degradation to regular FM stereo reception and will be transparent to other SCSes. "The only standard that has been written for SCA signals is that of the RBDS system. The RBDS system transmits data at a speed of 1.2 kilobits per second. This rate is fine for sending text to home and auto receivers but does not lend itself well to paging, vehicle tracking, and GPS data enhancement. This committee hopes to establish, very soon, a testing program to review the different proposals and then adopt a standard by the end of this year. Bob Brummond, a blinder of SCS in NC, is their liaison with the committee; he can be reached at (704) 251-2166.

VA Onley WESR-FM 103.3 still ↑X, but used for power load control by electric utility

BN Tijuana XHLTN 104.5 ↑T, 67, Radio Sedaye Iran, replacing ↑R. This is Kamil Helmi's SCS; Mo Chehrzad is their accountant; headquarters are in L.A. [the FM dial there

JAMAICA Montego Bay—no SCS activity on/ The FCC will hold auctions for personal communications services, as well as for some 1450 licenses for interactive video and data services. PCS is a cellular competitor that will offer two-way voice and data. Such spectrum auctions could raise \$7-\$10 billion over the next four years.

"The [Sangean] ATS-803A mod came out great! Those L-E-Ds (in the Elf-2 Adapter) are very SCS sensitive."

 and Jeff Kinzbach, whose morning show  
 lasted 17 years, said goodbye, after new  
 owner OmniAmerica Communications, took  
 over. Then WMMS discovered most of its  
 music library had been stolen, lost or  
 destroyed. "The loss includes most of the  
 vinyl albums, tapes and compact discs WMMS  
 collected since its on-air debut in 1968. Also  
 missing are irreplaceable tapes of live perfor-  
 mances and celebrity interviews the station  
 broadcast over the years." The loss has been  
 attributed to a combination of employee  
 theft, mismanagement and neglect over the  
 past eight years, when it was owned by  
 Malrite. A more recent "raid" took place as  
 the transfer to Omni was occurring. Included  
 among the missing items: a framed print of  
 the station's Buzzard logo, along with two  
 commemorative albums.

**AM Happenings Most Likely Caused by FM**

CA Desert Hot Springs KUTE 880—FCC deletes  
 license  
 CA Temptonet KXER 1060—FCC deletes station  
 FL Canonon (Pensacola) WKGT, "Voice of  
 Print," 1090, a reading service to the blind on  
 open carrier AM, has "succumbed to financial  
 hardships and is no more."  
 FL Fort Walton Beach WNUE 1400 silent  
 IL Chicago WMVP 1000: "Since the early '93  
 books until now, WMVP has fallen from 2.5 or  
 2.7 to the ones. As a sports station they are truly  
 overkilled! The station they meant to kill was  
 WSCR 820 AM, a daytimer, but 'The Score' (as  
 they are called) is beating them (WMVP). It's a  
 waste of a 50 kw AM station!" This reader  
 speculates that Howard Stern may return to  
 Infinity-owned WJJD 1160, which carries syndi-

cated talker G. Gordon Liddy, but "Liddy's  
 against another Clinton-basher from 10 a.m. to 2  
 p.m., Rush Limbaugh on WLS-FM 94.7 and  
 AM." Robert Feder, Chicago Sun-Times, claims  
 WJJD wants to go in a younger direction,  
 possibly abandoning its Frank Sinatra, Tony  
 Bennett/big bands format in favor of more  
 syndicated talk, including possibly Stern nemesis  
 Don Imus. "Boy would Howard kick up a  
 rumpus if he were on the same station as Don  
 Imus!" Feder also mentioned a possible country  
 format for WJJD, to go with the "k" of  
 Infinity-owned US-99 in Chicago.  
 IN Fort Wayne WOWO 1190: "I was saddened to  
 learn of WOWO's impending demise on AM. It is  
 the last surviving station that has any kind of  
 rock on AM as a clear channel that I can hear  
 easily, and I've been listening to it for more than  
 30 years. WKBW, CKLW and local WABC,  
 WMCA, and WINS have all gone to talk or news.  
 I understand Fort Wayne's mayor is raising a  
 stink about the sale. Maybe Inner City Broad-  
 casting is in for a fight."  
 ME Brewer WNSW 1200 goes to all talk, and will  
 be carrying the Boston Celtics, New England  
 Patriots and Boston Bruins.  
 ME Presque Isle WEGP 1390 back on air, after  
 being off since March, 1991, with 24 hours of  
 news and talk radio; had been WTMS AM.  
 MI Muskegon WQWQ 1520 AM sold to Kenneth  
 Vanderlaan and polka radio star Ed Panyrek,  
 keeping its "m" format with high school sports.  
 "This probably ends WQWQ's LMA with WLCS  
 [North Muskegon-Roosevelt Park] 98.3. WLCS  
 is currently co-located with WQWQ," which  
 means WLCS may have to move.  
 MI Rockford (Grand Rapids) WBYY 810 goes to  
 sports talk. "This is WBYY's fourth change in less  
 than three years."  
 MI Zeeland WISZ returns to the air with a  
 children's format by satellite from "Radio  
 Aahs," Minneapolis; 640 "operated briefly as  
 WBMX in 1990," and was silent for 3½ years.  
 MN Minneapolis WCCO 830 barely squeaked by  
 classic rocker KQRS-FM 92.5 Golden Valley in  
 the latest Arbitrons. In the 12+ category, 'CCO  
 was a 12.7, compared to KQ's 12.2. "No station  
 has ever been that close to 'CCO—at least since  
 woolly mammoths grazed Minnesota." Noel  
 Holston of the Minneapolis Tribune speculates  
 there could be a major shakeup at WCCO if its  
 audience slide continues.  
 MN St. Paul WDGY 630 "disappeared." Its site  
 has been sold to State Farm, which will clear the  
 land and put up an office building. "The station  
 will be silent until further notice," but said to be  
 looking for another plot of ground on which to  
 bury, er, build, the WDGY towers. "Variables,"  
 including zoning for the towers, make it impos-  
 sible to predict when broadcasting will resume.  
 NV Las Vegas KFMS 1410 sells the land its  
 six-tower AM array sat on to a real estate  
 developer for "much more than the station is  
 worth." KFMS continues to operate from a  
 temporary site with 250 watts daytime, 15 watts  
 nighttime nondirectional. They've applied to  
 return to 1400 with 1000 watts full time. Prior to  
 1980, KFMS AM (then known as KVEG)  
 operated on 1400, after which they moved to  
 1410 with 5000 watts directional day and night.  
 "KFMS-FM 101.9 is unaffected by any of this.  
 KFMS AM simulcasts the FM 100%."  
 NY New York WKDM 1380 being sold for \$6.9  
 million to Arthur Liu, Multi-cultural Broad-  
 casting, owner of WNWK 105.9 Newark, "where the  
 hosts lease airtime from the station. It is  
 expected that Liu will turn WKDM into a  
 so-called brokered pay-as-you-go station along  
 the lines of WNWK, which has registered  
 marginal but nevertheless unprecedented ratings  
 for its format, which is heavy on Caribbean  
 music!"  
 NY Sandy Creek WSCP 1070 silent because of  
 "technical trouble. Will be back, but they can't  
 say just when."  
 NY Warwick WTBQ 1110 silent

OK Oklahoma City WKY 930 all talk; had been easy listening after KKNG 92.5 changed to KOMA-FM, but as has been seen in other markets, that format did not transfer well to AM. OR Milwaukee KXYQ 1010 (formerly KZRC) tops Z-Rock to simulcast KXYQ-FM 105.1 Salem. "KZRC did not even make ratings in the fall book," while KUFO 101.1 Portland is especially "strong in ratings lately." OR West Klamath KWSA 1070 silent PA Hughesville WMRE 1190 silent TX Lubbock KJBX 580 silent "Good luck with your new station."

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AR Russellville 101.3A for 100.9A, KCJC counterproposal
- CA Dunningan (move from Willows) 105.5B1 for A, KQSC, no dates announced
- FL Midway (move from Quincy) 100.7C3 for A, WTPS counterproposal
- FL Panacea 95.3A for 100.5A, with Midway
- MS Bude 104.3C3 counterproposal of Douglas D. DeLawder, filed by James R. Cooke of the Washington DC law firm of Harris, Beach & Wilcox, 1200 18th St., N.W., Ste. 210, ZIP 20036.

**FM Rulemakings Finalized**

- IL Morrison 102.7A for 95.1A, WZZT to move
- IA Clinton KCLN-FM 97.7A to move to 94.7A
- IA Manchester 94.7A, with the FCC rescinding KMCH's 94.7C3 bid. Upgrade instead goes to Lancaster WI. [94.5A bid
- NV Eureka—dismissed K. E. Lamonica's/
- WI Lancaster 97.7C3 for A, WGLR-FM

**Applicants Defy Freeze, File Anyway**

Talk of an FCC "freeze" on commercial station applications [last month, p. 6], did not dissuade several would be station owners who presented the Federal Communications Commission with well-thought-out and well-engineered FM station applications. Several applicants—in markets as disparate as Athens OH and Hermantown MN—ponied up to the FCC with \$2030 in hand as an application fee. Blessed as they were with legal and engineering advice, they nevertheless indulged in the fantasy of being able to soon run a new commercial FM station, apparently oblivious to the machinations of government. [See FMakings above for the list of parties filing for the various channels.]

Meanwhile, the \$2030 fees which each paid languish at the FCC, while the completed FCC Form 301s with exhibits gather dust until such time as the FCC ends the freeze. The FCC isn't holding hearings—or deciding in any other way—how to select one applicant over another after the Bechtel/WSBL 97.9 Selbyville DE fiasco [February, pp. 6-7].

I have checked and rechecked with the FCC, since one of the filing windows was mine. When I received word that others had filed for the facility in question and I had not, I was afraid I did not ask the right questions or talk to the right people.

Karen Mercer of the mass media bureau and her supervisor both told me not to file; any application would not be accepted.

Besides paying the filing fees, all the applicants have paid for local newspaper announcements mentioning who is filing and where their applications can be read. After seeing one of the ads, wife Carol and I hurried to the city clerk's office where two of the applications lay waiting for our perusal. They were magnificent documents, complete with coverage maps, tower plan drawings, statements of financial qualifications, and promises that there would be no more than five fulltime employees. But, alas, they will only gather dust until such time as the FCC decides how to settle the matters that led to the freeze—or until they're withdrawn by applicants fearful of public scrutiny and until the applicants might decide to re-apply.

Dave Senzel with the FCC's general counsel office left no doubt that the freeze is for real and that I would be able to apply when a new filing window is announced. I asked him if there would be a problem with any future rulemakings, if I should not apply in this instance. [The granting of the channel in question was contingent on my promising the FCC that I would apply for it.] He said he didn't know. Knowing that two others have already filed for the channel in which I was interested, I may not be so likely to join in. Perhaps another frequency can be found, rather than slug it out for the spot I originally eyed. Preliminary checking shows a possible five additional that could be added, with a little "musical chairs," or moving of channels of other stations. Senzel was unable to guess when the freeze might be lifted—whether it might be in two months or two years, or longer.

It would be nice if the FCC would go along with consulting engineer Larry Fuss' proposal to award a "finder's preference" to the person or group suggesting a channel for the FCC to allot. That would have given the original petitioner an "edge" in any comparative proceeding to follow.

Freeze or no freeze, it is a sign of FM radio's maturity that filing windows are noticed and seized upon by savvy speculators across the country.

**Small-Print Happenings and FM Industry News**

Not all of Canada's elated about digital audio broadcasting (DAB). Commercial broadcasters there believe the technology is farther away than you might think. They fear another AM stereo debacle. "AM stereo is a complete and utter flop in Canada. The lack of receivers ensured that the technology is about as popular with consumers as quadrasonic and eight track tape," writes James Carliss in "Radio World."

Controversy about selling WNYC-FM \*93.9 and AM-TV New York abounds, at least in the press. WNYC-FM could be entirely financed through a foundation or continue to be supported in part by the city. The city contributes \$1.7 million to the stations annually. As a percentage of the city budget, the \$1.7 is "nothing," says media broker Gary Stevens. A sale of the FM station would net the city probably \$35 million, another "nothing" figure according to Stevens.

WNYC-FM went on the air in 1944 and benefited from the development of the 33 1/3 rpm high fidelity disc.

Following the death of Roy Park, Park Broadcasting announced it will sell the entire company, which is probably worth \$500 million. Park stations include WPAT-FM 93.1 and AM Paterson NJ. Topping the list of prospects for the stations is Capital Cities/ABC, owner of WPLJ 95.5 and AM. Capital Cities once owned WPAT-FM-AM, and may have at least a sentimental desire to buy them back. WPAT-FM was a bastion of instrumental easy-listening music until 1992 when more of today's pop vocals were added. The stratagem was to entice more of the prized 25 to 54 year olds. Last fall WPAT-FM's share of that group was 2.4, up from 2.0 of a year earlier.

Speaking of beautiful music, there's a book out which I haven't read. Joseph Lanza's "Elevator Music," published by St. Martin's Press, describes everything from Kotelanetz to Muzak and the Ray Conniff Singers. There is a "fascinating chapter" on the rise of beautiful music on FM and its descendants in the adult-contemporary format.

KSAN 94.9 San Francisco's national sales manager Diana Kimball won \$1.1 million in a wrongful discharge suit against Maritre Communications. She successfully used a CA law which challenges employers on the "at will" defense in firing employees. Maritre is expected to appeal.

Wanna enrich the telephone company and dial FM stations in different markets? Media Technology introduces Media Dial-up. Simple touch-tone commands allow the user to monitor broadcasts on a subscription basis from (214) 330-8393. For a sample of Dallas/Fort Worth media, try (214) 330-8821. Press 1 for FM, 2 for AM, 4 to skip to the next lower station on the dial and 6 to skip to the next higher station.

More duopolies in the news—KJOY 103.7 and KXYX 96.5 San Diego merge to the tune of \$17 million. WOOD-FM 105.7 and WBCT 93.7, both super-powered FMs, are being paired in Grand Rapids. Price to be 9.2 times cash flow, or close to \$1 million. Combined share of the stations is 24.5, just under the FCC-mandated maximum of 25 percent. Also in G.R. WCUZ-FM 101.3 announced a plan to merge with WKEZ 96.1. EZ Communications, which owns KMPS-FM 94.1 and AM Seattle, is acquiring KZOK-FM 102.5 for about \$20 million. KZOK AM is not included in the deal and might go religious.

The Clinton administration wants the broadcast industry to help pay for jailing illegal immigrants through user fees. This the NAB calls "unfair and outrageous." Such fees would raise up to \$4.8 billion over five years, which is probably only a drop in the proverbial bucket for such law enforcement costs.

Designated for hearing by the FCC—the mutually exclusive applications of Cumberland and Communication at Pioneer TN and Moody Bible Institute for \*89.3 in Crossville TN.

John W. Tyrone was denied a review of his informal objection to WYUU 92.5 Safety Harbor FL, claiming that the WYUU transmitter was causing FM blanketing problems and exposed persons in his home to excessive RF radiation. The FCC, however, found no basis for Tyrone's contentions. RF radiation measurements were taken Sept. 26, 1988, and the Commission's technical staff revied the data, and determined it fell within safe guidelines.

Radio Finland, which can easily be heard in the U.S. in English on shortwave at 15400 kHz, 9:30 a.m. EDT, is available to U.S. broadcasters. Some of its news (at other times) is in Latin; for more information call (800) 221-9539.

Fined \$12,500 for the explicit lyrics of the song, "I Want to be a Homosexual," was KNON \*89.3 Dallas. Also fined \$12,500—KBOB 99.7 Muscatine IA for a joke about a sex act. That was before KBOB changed formats and call letters, having been KFMH. Hmmm. Again, it seems if you're fined you change call letters immediately after.

This item made the national news: KYNG 105.3 Dallas tried to publicize the public library by announcing that money was hidden in books. The Fort Worth public library right away found 500 people rummaging through the books and making quite a mess. KSCS 96.3 and AM started fund drives of their own to help the library.

The Canadian Radio Television and Telecommunications Commission has rejected appeals for a three-year moratorium on annual radio licence fees, but it did the next best thing, so far as broadcasters are concerned. It has proposed a fee of only \$25 if annual station revenues do not exceed \$2 million for an AM or FM. Combo stations (FM-AM) would pay \$25 each for combined revenues of under \$4 million. Fees would be scaled upward for stations grossing over \$2 or \$4 million—this according to *Broadcast Technology* magazine.

Howard Stern (pictured) is the candidate for governor of the Libertarian Party of NY state. Some party regulars are shocked, but Stern with

his dancing entourage managed to push his slate through. Stern stations in NY state are deciding how to handle challengers who might want equal time. Winning the election is no cinch for Stern. Although he's known by 75 percent of all New Yorkers, "he is viewed negatively by nearly as many." Stern appears to favor such bizarre antics as putting the first NY execution on pay-per-view television, and he'd like to personally "give the juice" to the first criminal executed.

This from my FCC messenger service in a news release dated April 1: "Chairman Reed H. Hundt announced the appointment of 'two fine people, and decent squash players, as well' to fill the final vacant seats at the FCC. G. Gordon Liddy was named to one post, largely based on his past experiences with wireless equipment and authoritarian styles of government. Howard Stern is to fill the other seat; his considerable experience with a variety of communications issues pushed him into consideration. Upon hearing the news, Mr. Stern commented, but not in a manner fit for publishing."

Several radio stations drew the wrath of the FCC, and received fines for EEO violations. Fines ranged from \$6,250 to \$25,000. I bet most of the following wish they had five or fewer full time employees: WYXL 97.3 and AM Ithaca, WSPK 104.7 Poughkeepsie, WBPM 94.3 Kingston, WSEN-FM 92.1 and AM Baldwinville, WQXR 96.3 and AM NY, all NY. The NAACP went after WSEN-FM, while the National Hispanic Media Coalition (NHMC) went after the others in NY state. WOW-FM 94.1 Omaha NE, KMAJ-FM 107.7-AM WIBW-FM 97.3-AM Topeka KS were fined. In CA, KFSD 94.1 and KUSC \*91.5 Los Angeles were hit, while in UT it was KISN-FM 97.1 and AM Salt Lake City that felt the FCC's wrath. KMZQ 100.5 Henderson, KFMS-FM 101.9 and AM Las Vegas NV and KLPX 96.1 Tucson AZ were fined.

FCC as teacher? That's what it seems to be as the FCC launches the first radio spectrum management course for developing countries. Chairman Hundt welcomed 22 participants from Albania, Brazil, Colombia, Eritrea, Hungary,

Kazakhstan, Macau, Moldova, Poland, Romania, Russian Federation, St. Lucia, Turkey, Venezuela, Vietnam, and Zambia. The students will spend time at the Commission studying such issues as regulatory laws and processes, telecommunications technical standards and terrestrial coordination methods, plus cable communications usage and regulation.

Students will visit the industry's Advanced (high definition) Television Test Center in Alexandria VA, the FCC licence processing center in Gettysburg PA, and the FCC laboratory and monitoring station near Laurel MD. Lecturers will come from private firms, including Motorola and Comsearch. The FCC also teaches "Radio Spectrum Monitoring and Measuring" at its Laurel MD monitoring station, and "Radio Spectrum Monitoring Techniques and Procedures" at its Allegan MI facility. The courses for foreign broadcasters are offered through the United States Telecommunications Training Institute (USTTI), of which Chairman Hundt is a member of the board of directors. Training opportunities go to women and men who manage the communications systems throughout the developing world, and are tuition-free.

Station totals from the FCC--FM (92-108 mhz) 5001, AM 4933, plus another 1674 FM educational. Maybe you saw my recent letter to "Open Mike," Broadcasting, on that subject.

From the classifieds: FM antennas designed for your frequency, 1 to 12 bays and five power levels. Jimmie Joynt, (214) 335-3425. But just try to get an equipment proposal from him! I've been waiting about three months.

Ethnic community station needs low cost mics and mic preamps. P. Ryan, KYMC \*89.7 2100 Marconi Ave., St. Louis MO 63110.

Broadcast quality SCA modules. Why pay a bundle when you can buy direct from Broadcast Music Engineering? (800) 944-0630.

FM FORUM

CONTRIBUTIONS FROM READERS

[Continuing with comments from an OH listener who uses a vertical antenna to pick up more-distant Marion OH on 106.9, with little interference from a closer station in Canton which has only horizontal polarization:]

"WRQK has almost no signal at all in the vertical plane. WMRN-FM does have a tendency to fade away, now and then, but it is the best frequency (225 km from here).

"I got a good laugh from the comment by Nick Lombardi on p. 8, col. 3, March," continues Bill Fait. "It is interesting to note that most of the 'superfluous station logos' are at the start of the [FM Atlas] 'Station Directory'; pages 192 through contain only one of the station logos, from WQHQ. Next time: plan ahead!"

A NYC area reader keeps reminding me that WYGG \*88.1 Asbury Park NJ, with studios in Brooklyn, "still hasn't left the airwaves." Howard Stern's running for NY governor on the Libertarian ticket's mainly to "enact the death penalty in NY state so that cop-killers and other murderers like the LIRR gunman can be executed instead of going to jail. Gov. Cuomo, a Roman Catholic, has vetoed the death penalty bill several times."

In LA news, two AM stand-alone stations have applied for FM channels: WABL Amite for 96.5 and WFCG Frank-

linton for 98.9, both Class A. "Both will put a big signal over me," writes Mike Dorner, who lives in the New Orleans area. "Liked the editorial from American Record Guide. One of the liabilities of democracy is the thought processes of the masses."

Walter Garrett sent the WGORilla logo (last month, p. 3) and some information on British radio. In London we find News-talk 97.3, Capital Radio 95.8, GLR-FM 94.9, GMR-FM 95.1 (must be on opposite sides of the city with adjacent channels) and Jazz FM 102.2. From the "New Zealand Herald" is listed the following FM stereo stations: Whangare 96.8, Auckland 92.6, Waikato 91.4, Touranga 91.4, Rotorua 90.3, Taupo 98.3, Hawkes Bay 91.1, Whakatane 93.9 and Gisborne 97.2. Walter kindly used the Edward R. Murrow stamp on his envelope. I like to receive mail with commemorate stamps. I give my extra stamps to some young collectors in WI.

The Albany NY area is served by two FM (and AM) station duopolies, and the newspaper there [I think it's the Times-Union] had a report on duopolies, which Alex Nardacci clipped and sent. John Kelley, president of Albany Broadcasting (WYJB 95.5, WFLY 92.3 and AMs), said "What has happened throughout the industry is the strong stations are able to create even stronger entities. A lot of groups out there are attempting to do this. You want to take two and two and look for it to make five." Kelley said all four stations will be run as separate businesses and analyzed on their own performance, but there are some financial benefits from duopoly. "You don't need two business departments. You don't need two traffic departments. . . Once we get into one building, we'll save with rent and utilities."

John Dame of WRVE 99.5 Schenectady and AM would like to get involved in a duopoly there; Dame Media is involved in duopolies in two other markets. "It's not very difficult for us," he said. "We're already in a mode that each station is a profit center on its own. We like Albany because it's a good market. It would be easier for us to go into a place that we know instead of learning a new market."

WAMC \*90.3 Albany NY under attack by a leftist group, which is also attacking NPR. The group calling itself FAIR (Fairness & Accuracy in Reporting) charges that the station has had no programs on lesbian issues during its weekly women's issues programs. When conservative commentator Herbert London was replaced, "it took over a year for the station to find a progressive voice." And Alan S. Chartock, the WAMC board chairman, "with his establishment bias remains the dominant political pundit on everything from local to international news."

Until June *Burt F. Elong*

**Stereo—Or to be Stereo**

IN Austin WJLR 92.7, ID with Seymour-  
 Columbus  
 IN Churubusco ("chair-uh-bus-ko") WKQM 96.3  
 b, had tested with jazz; ID with Fort Wayne  
 IN Greenwood WGGP 106.7  
 IN South Bend WUBS \*89.7, sj  
 IA Cedar Falls KKCX 98.5, ID with Waterloo,  
 "The Hog," k  
 IA Des Moines K241-- \*96.1, but like its primary  
 in Cedar Falls, is one of the few FM stations  
 to properly drop the stereo signal when  
 carrying monophonic programs, such as "All  
 Things Considered." KAYL-FM 101.7 Storm  
 Lake IA also cheered for turning off its stereo  
 light when carrying monophonic programs.  
 IA Eagle Grove KJYL \*100.7  
 IA Sioux Rapids KTFG 102.9, but with poorer  
 fidelity than parent KTFC 103.3 Sioux City;  
 lots of religious talk in pseudo-stereo  
 IA Stuart KKRK 107.9, "K 107" (strict)  
 IA Winterset KZZQ 99.5, embraces stereo with  
 its new gr format [as stereo  
 ME Fort Kent WMEF \*106.5, confirmed/  
 MI Sandusky WNFR \*90.7  
 MN Jackson KRAQ 105.7, o, "105.7 FM" (not  
 strict). It has a lot of local news, apparently  
 serving its market well. IDs only as Jackson.  
 MN Spring Valley KNFX-FM 104.3  
 MN Worthington K202-- \*88.3. This is the first  
 of the WAFR 88.3 Tupelo MS satellite  
 stations I heard, and it's in full stereo—a  
 pleasure to listen to compared to similar-  
 formatted KTFG 102.9 Sioux Rapids IA. Its  
 music was clear, there was lots of it with no  
 preaching programs heard. Station references  
 were to Worthington MN and other locations  
 on the "AFR Network."  
 MS Indianola WDLJ 96.9  
 NH Belmont-Laconia-Concord WNHI 93.3, o,  
 "1-93.3" (strict), no SCS. Carries Don Imus  
 mornings, co-owned with WJYY 105.5 Con-  
 cord. Its antenna is atop Highlands Ski Area  
 in Northfield MA. They call their oldies  
 format "classichits [with] no obscure songs,  
 no deep album cuts. Everything was a hit in  
 its time. . . a station for people with adult  
 responsibilities who still like rock'n'roll."

NY Plattsburg WEXP 105.1 to be stereo, with  
 transmitter in Keesville NY, "just in front of  
 Burlington" VT. Information comes from a  
 reader who hears "The International Radio  
 Report" on CKUT \*90.3 Montreal, 10:30 to  
 11 a.m. Sundays. The program did not  
 mention any music format for WEXP.  
 OH Dayton WDPS \*89.5, having just converted  
 to stereo. Still shares time with WDPR \*89.5,  
 although WDPG \*89.9 Greenville OH serves  
 the area with WDPR programming. "What I  
 can't understand is why 89.5 WDPR Dayton  
 continues to simulcast WDPG. Certainly  
 WDPG covers the Dayton area and beyond.  
 WDPR is off during the day to allow WDPS to  
 share 89.5. WDPS is now 6 kw."  
 PA Hawley WYCY 105.3  
 PA Scranton WUSR \*99.5  
 Monophonic  
 IA Boone KFGQ-FM 99.3 still mono  
 IA Webster City KQWC-FM 95.7 t, mono, but  
 broadcasting in pseudo stereo, uses calls, not  
 "The Q." Talk features include Larry King in  
 the afternoon (who is cutting back on his  
 daily schedule)

**Format Changes**

**SCServices, 57, 67, 92 kHz**

*Symbols are as in the "FM Atlas" and November FMedia!*

MN Alexandria KIKV 100.7 no tM, 67; adds t() 57; retains tU, 92  
 MN Fergus Falls KZCR 103.3 no tX, 67  
 MN Glenwood KMGK 107.1 no tU, 67  
 MN Park Rapids KDCK 97.5 no tC, 67, only an open carrier; seeks 130 m  
 MN Wadena KKWS 105.9 tC, 67, programming to KNSP AM Staples with KWAD (AM) programming. KKWS' main channel now "Your Superstation" (from "K-106").  
 NE Hastings KHNE-FM \*89.1 t(), no tT, 67, as KUCV Lincoln has  
 NE Lincoln KUCV \*90.9 tT, Radio Talking Book from Omaha, as before, 67 kHz; tU, 92. It is the only NERN station to have this service on its SCS.  
 KFGE 105.3 no 67 (only an open carrier); its relay of KLMS AM ends, except for "once a week or less often when it carries a program I want to hear. I'm not telling you when that is, because the engineer could get fired!"  
 NE Norfolk KXNE-FM \*89.3 t(), 57  
 NJ Atlantic City WFPG-FM 96.9 tZ, 67 (no 92)

NJ Point Pleasant WADB 95.9 still tB, 67, carrying a lot of UPI stuff, including news updates, sports scores and weather reports for different U.S. cities. "They mute the carrier between items. I heard some Spanish on the SCA recently so maybe they're testing for the new service," which might be the CBS and UPI Spanish-language network about to start. "For some reason their SCS never comes in very clear here, even though I get WADB in full stereo."

NY New York WQXR 96.3 tC, a relay of WQEW AM. "Maybe KBC was losing sponsors to Infinity-owned Korean AM station WZRC 1480? [See Aug., '93, p. 5, col. 3.] WQXR's 92 still east Indian."

WV Charleston—a reader took my FM Atlas to the studios of the WV Library Commission's Talking Book in the Cultural Center, downtown. He showed them the article on the lack of SCS radios in the U.S., "and boy, they were just 'ooing and awing'. It was unreal! Then the guy who was running the board specifically said I did not have permission to monitor the Talking Book with my FM receiver! I told him that it wasn't Russia and that I will indeed listen to the Talking Book service which is carried via satellite on Spacenet-3 TR 4... The person said I would be violating copyright laws if I persisted in listening to them! Amazing, isn't it? They use taxpayer funds to purchase the books that get read on the 'public's' radio station, using the public radio net to distribute the material which is within the 'public' domain... Maybe by the time I return in June he will have a better attitude with regards to people listening to their broadcasts... I certainly agree 100% with your bit in the FM Atlas about people like them not wanting regular tax-paying people to actually listen—it certainly is a weird attitude to take. Here I thought their eyes were going to pop out from shock when they were reading your piece!" Now "I definitely intend upon ordering one of your portable FM radios with SCA built in!"

WVSR 102.7 t(), 57

SCS could be used by Indian tribes for broadcasting native bingo games if a proposal to lease a channel from National Public Radio works out. The FCC forbids lottery-type contests from being mentioned on the air, but does allow Native Americans to advertise bingo games on tribal lands. Chuck Kelley of the FCC says there is only a "possibility" that tribes may broadcast bingo. "But if the games are broadcast, the sideband signal would be received in homes and buildings on the reservation."

**SCA As It Was—  
OR MIGHT HAVE BEEN**

Frederick G. Suffield, a retired engineer, has cleaned out his files and sent a lot of stuff this way: "Not sure whether I told you about the time out here [in N.W. WA state] when the widow of a friend—he was a musician in Chicago years ago—had a turntable, receiver, AM/FM, and amplifier, Craftsman, and a speaker cabinet marked Jensen. She had problems with it and I went over and fixed the amplifier, redid

power cords, and in general realigned the set. After several years she had to move to a home and was about bed-ridden, so she sold her home and told me that I could have the equipment. She said the engineers in the Chicago CBS studio had built the speaker for them. I took them home and put the receiver, amplifier, and turntable aside, and started to clean up and refinish the speaker cabinet, prior to selling the whole thing. I opened the cabinet, expecting to find a Jensen dual cone speaker. Instead, there was a 15" Jim Lansing, a crossover and a high frequency horn! Now I have three Jim Lansing units!

The SCA stuff Fred sent included an ad for the MS-1 FM receiver modified by SCA Services Co., PO Box 601, Port Washington NY 11050. The receiver with speakers cost \$129.95. "Think of it. All this plus at the flick of a switch, this system becomes a commercial-free background music system—receiving programs you can't pick up at all with a conventional FM or FM/stereo receiver—at any price!" The company also offered SCAdapter kits with printed circuit board at \$49.95, or wired and tested solid-state decoders at \$64.50. There was an "iron clad" one year guarantee, but I wonder if any people tried to get warranty service after the company folded? The president of SCA Services Co. was none other than Leonard Feldman, audio writer who died earlier this year. No dates appear on the literature, but I'd guess late '60s to early '70s. The adapters did not use integrated circuits, but had three 2N3414 transistors and three 9059 Miller coils, three diodes and other parts. Here's how one of the letters ended:

Cordially,  
S.C.A. Services Company, Inc.

*Leonard Feldman*  
Leonard Feldman, President

JanZac Company, Box 177, Stamford CT 06904, sent literature in 1969 showing a modified Panasonic table radio model RE-7369-SCA in a walnut wood cabinet for \$89.95. "Commercial use of this unit is not advised without the consent of the originating station." Their SCA adapter featured a box with audio out, carrier input, adjustable muting, and DC power (from a small wall power supply). The adapter "produces commercial quality audio output, not a 'tinney' [sic] or limited range output as produced by some FM demodulation methods."

SCA Services Co. provided a listing of stations authorized to transmit background music. In Los Angeles, they were KABC, KADS, KBBI, KBCA, KBIG, KBMS, KFAC, KGBS, KHJ, KHOF, KPOL, KRHM, KRKD. Chicago had WEBB, WCLM, WKFM, WNUS, WXRT. Detroit had WABX, WBFM, WGPR, WLDL, WQRS. New York had WHOM, WOR, WPIX, WRFM, WHBI (Newark), and in Patchogue it was WALK, WGLI. Dallas had KEIR (?), WFAA, KMAP, KRLD, KVIL, WRR, WBAP (Fort Worth), KCLE (Cleburne). "Note: Not all stations authorized to transmit background music are necessarily engaged in providing this service, but nearly every major city has one or more which are doing so."

 Above decisions to be made at a CRTC hearing this month in Saskatoon.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC (at or near top of hour)*

AR Pine Bluff KPBO 101.3 101.3 Q Country 101 (from "Country 101")  
 CA San Mateo KYLD 107.7 Wild  
 GA Athens-Atlanta WALR 104.7 Kiss 104 (from "104.7") [(from "99-Ways")  
 GA Macon WAYS 99.1 Oldies 99.1/

HI Honolulu KTUH \*90.3 and KDEO 102.7 Waipahu both go by "Radio Free Hawaii." KDEO's features an entire format of songs listeners request, with ballot boxes provided "all over the island of Oahu. It is these lists alone that determine what gets played on the station. The DJs have had to play everything from Mantovani to Metallica, but the majority of votes are for reggae, rap and 'al alternative rock'. . . Radio Free now has an election party night every Friday at a club in Honolulu, broadcast live, where everyone can dance to the records that have gotten the most votes."  
 IL Champaign WHMS 97.5 the New Lite 97.5 (from "Lite 97.5 HMS")

 WI La Crosse WQCC 106.3 CC-106.3 or "Cou-/  
 "I find the current 15th edition FM Atlas is in too small a print for your listings by FM channel. I have much difficulty reading it even with glasses. . . This is the first edition that I've had trouble reading. Even though it may involve a few more pages could you go for a bit larger type so that your readers can read it easily? Raise the price of the publication, but for God's sake use type large enough to be easily read."

**Multi-City IDs in Use**

MN St. James KXAC 100.5 with Fairmont-Mankato, "The Lite FM"  
 PA Jersey Shore-Williamsport WWWD 97.7 no Lock Haven in its ID list  
 PA Lewisburg WUNS 96.3 drops Mifflinburg ID, still "V-Rock"

**AM Happenings Most Likely Caused by FM; "Management Brain Damage or a Combination Thereof"**

GA Augusta WRDW 1480 now simulcasts the news/talk format of WAJY 102.7 New Ellenton SC. And "with the sign on of WKBG 107.7 Martinez GA rumors are rife that WXFG 102.3 and/or WZNY 105.7 are about to be sold."  
 HI Honolulu KULA 1460 silent  
 KS El Dorado KSRX 1360, had been contemporary Christian, silent and "up for sale."  
 MI Bay City WXOX 1250 still silent. Speculation is WKNX 1210 Saginaw may move to 1250.  
 WCHB 1200 Detroit bought WKNX to clear the frequency so that WCHB can expand.  
 MI Grand Rapids 1340 returns to the air June 1 after four months of silence with new call letters [WBBL; was WLAV] and a new format, syndicated sports-talk. "In a market lacking big band, fulltime urban contemporary, alternative rock

and even Z-Rock, this is the second AM station to carry a satellite sports-yak format on a fulltime basis (the other is WBYY 810). Why this move was taken is difficult to fathom: WGRD 1410 was satellite sports talk for two years and never showed up in the ratings (even with no competition). WGRD AM began simulcasting its FM in March. So expect WBBL and WBYY to furiously compete for their listeners—all three of them!" MN—an AM broadcaster in a small market writes, wanting help in finding an FM channel: "We have been trying to find a channel for a couple of years. As you are well aware, FM is 'where it's at'. You don't know how many people, including area merchants, have asked us that same question. I really enjoyed your letter that was in Broadcasting. I agree with you 100%."  
 TX Lubbock KJBX 580 silent pending sale.  
 WI Milwaukee WLZR 1340 drops automated "p" (alternative rock) for a "total simulcast of WLZR-FM's album rock" (102.9).  
**AUSTRALIA**—"As we feared, the Aussie regionals are, indeed, gone from shortwave. The Perth outlets on 6140, 9610 and 15425 and Brisbane on 4920 and 9660 have all been discontinued. Even sadder is the fact that announcements asking that those listening to their shortwave broadcasts contact the stations brought not even a single response!" From Gerry Dexter's "Listening Post," Popular Communications magazine, May, 1994.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

HI Lihue 98.1C, July 11, 26  
 IA Muscatine 93.1A, July 5, 20  
 MN Nashwauk 101.9C3, Ingstad Bcstg. counterproposal  
 MN Roseau 103.5C2, July 5, 20  
 OH Richwood (CP held by Janice M. Scantland) 104.3B1 for A counterproposal  
 SC Bamberg 95.7A for 92.1A, WWBD, June 27, July 12  
 SD Flandreau 107.9C3, July 11, 26

**FM Rulemakings Finalized**

AZ Wickenburg 94.1C3 for 93.7A, KME0  
 MO Ashland 106.1C1 for C2, KBXR  
 MO Monroe City 107.5A for 106.3A, K DAM  
 MO Rolla 97.5A for 106.3A, KQMX (which was to have moved from 94.3A)  
 MT Butte \*106.9A for 91.5A, KMSM to move  
 NC Edenton denied WERX's bid to change from 102.5C1 to 102.5C2 at Columbia NC.  
 NC Ocracoke denied WAHL's bid to move from 92.5A to 92.7C1.  
 "I always appreciate your excellent work, and wouldn't dream of doing without it! No big local FM news—except for my continuing morning traffic reports for KCRW \*89.9/ KCRU \*89.1/KCRY \*89.3; K201AW/ K271AC/K272DI/K296AI; also for KTPI 103.1; KRUZ 103.3 (and XETRA 690) thru Metro Traffic and still with KABC as well."

**DX Doings—An occasional feature**

The FM skip season is upon us. I have not noticed any, but a subscriber in the Minneapolis area received sporadic-E skip from TX, NC, SC, FL, LA and AL May 14 and 15. An Atlanta person, who had

never heard long-distance FM, was quite excited when he received FM from NE and SD—all during the daytime hours in late spring and early summer when skip reception is most common.
