 USA-CNN is planning to beam news to pagers. It will put text on 600,000 pagers nationwide initially. Prices range from \$15 to \$40 a month. It may or may not use SCS in some markets. The deal is with Dallas-based Page-Cast. "Stations with Internet audio should give net surfers the option of chasing the main channel, or the 67 or 92 kHz subcarrier!"

GA Midway WGCO 98.3 with Jesup, not with Brunswick. Now "Cool FM" (from "Oldies 98.3").  
 NY Plattsburgh-Burlington VT WBTZ 99.9 adds Montreal PQ, adding "live" jocks. "WXXX

95.5 South Burlington VT is trying desperately to compete with way too many stations [in the market playing similar music], from AC to AAA to CHR to classic rock, even an occasional country-AC crossover. Pathetic sometimes!"

**Selected AM Happenings**

CA Concord KRHT 1480—license up for revocation.  
 CA Rancho Cordova KSTE 850 fired morning talk host Jeff Katz after Katz said on the air that any driver who hit an illegal immigrant should be given a sombrero bumper sticker. Ten stickers would qualify the driver for a free meal at Taco Bell. Among the complainants was the National Hispanic Media Coalition.  
 CO Aspen KRKE 1280, silent since May, 1993, faces license revocation. The station was to have been donated to the Aspen schools as a teaching tool, but failed to request of the FCC more time to be silent.  
 CT Middletown WCNX 1150 sold for \$300,000 in April. "The 50-year-old station was dangling from a long string of bad luck. It had been put in receivership, its hours limited, its programming mostly satellite news and talk shows." The number of advertisers has grown to over 70—up from five. "Those five were all tradeouts for office supplies." [to return by next June.  
 FL Tallahassee WHBT 1410 silent, expecting /  
 GA Thomasville WSTT 730 former licensee Southern Broadcasting fined \$2500 for exceeding an FCC-granted special temporary authority to be silent for 30 days. It failed to reapply for an extension of the time to be silent. Originally the fine was \$5000, but the FCC mellowed.  
 ME Fort Kent WLVC 1340 and WSJR 1230 Madawaska continue to be silent. The FCC has given them 30 days to file a written report to show cause why their license shouldn't be revoked. Both are owned by Lamolille Broadcasting.  
 IA Anamosa KLEH 1290—license up for revocation; has been silent "too long."  
 MI Grand Rapids WCUZ 1230 drops Don Imus as "too expensive." He only got a 1.0 share. The market also has Howard Stern and Bob and Tom, all on FM with better ratings. "Commercials had to be sold on WCUZ-FM 101.3 to try to cover the fees for Imus on the AM. ... WCUZ AM now carries the (el cheapo) 'USA Daybreak' morning show."  
 MI Lapeer WMPC 1230, at 70, is the oldest continuously running religious radio station in the U.S., according to an article in Popular Communications by "Alice Brannigan." WMBC Chicago is older, but was off for a time during the Great Depression. "WMPC was originally Methodist but is now interdenominational." It broadcasts from the Calvary Bible Church, 923 S. Main St. "There is also a museum on the premises with much of the station's antique radio apparatus on display." [deleted by the FCC.  
 MN Monticello KMOM 1070 officially /  
 NJ Plainfield WERA 1590 being bought by WWRL 1600 New York. WWRL wants to increase to 25 kw days but is precluded by WERA. WERA will most likely shut down after the \$1 million sale.  
 NY New York—Colorworks, a division of FLM Graphics, took to WFAN 680 as part of a \$30,000 promotion to promote its new Heidelberg Quickmaster DI 4604 direct-imaging press. Even though morning drive time radio in New York city can be pricey, Brian DeWitt, VP of marketing for FLM, says it's worth it. "You're not going to sell web press services on the radio, but digital imaging is virgin territory and it helped to give us an advantage in getting our name out there." Three weeks after the initial ad ran, Colorworks reported more than \$94,000 in potential new business.  
 TN Dayton WREA 1520, silent since 1994, deletes.  
 TX Bay City KFCC 1270 faces a revocation hearing. The FCC believed it lied about the loss of its original transmitter site. It had "voluntar-

lly" moved its site to less than two km from Houston. FCC men visited both sites and found AM equipment, a studio and three towers that appeared to be in working order at the Bay City site. They even got an affidavit from the site's owner stating that KFCC has always had access to the site. KFCC now must cease operations at the Houston-area site and resume use of its original site, some 80 km away, or file for silent status. KFCC had 30 days to respond, and could be liable for \$250,000 in fines.

UT Tremontion KNFL 1470 had its license up for revocation, but returned to the air at the last minute, doing news, talk and sports. KNFL-FM 106.1 not affected.

VA Waynesboro WAYB 1490, silent since March, 1995. The FCC investigated its silent status and found that it has viable plans to resume, with a sale to go forward to Valley Communications. WV Hinton WMTD 1380, off since Jan., 1993 when landowner ordered it to remove its facilities from the property. No new site has been found. FCC gave the station 20 days to present evidence of its intent to soon resume operations. "Are you sure the ATS-909 doesn't scroll? No mention of RT (radiotext) in the instruction book? If not, tell Sangean they shouldn't be advertising 'full RDS reception' as one of the radio's features (as in Oct. '96 Popular Communications, p. 7)1. . . I still want a portable scrolling RBDS-SCS radio by next spring so I can check out stations when I travel."

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AL Greensboro 99.1A, Oct. 21, Nov. 5

**Bechtel Strikes Again; Wants FCC to Decide Hearings Issues**

Susan Bechtel and 12 others applied 10 years ago for FM 97.9 Selbyville DE. It is now on the air as "B 98," WSBL. But she does not own the station. As the unsuccessful applicant, she later succeeded in getting the Washington appeals court to declare the criteria used to select among applicants as "arbitrary and capricious."

I checked, and she is the wife of Gene Bechtel of the Washington law firm of Bechtel and Cole. So there is plenty of legal expertise in the family. She had opposed the integration criteria by which applicants who planned to be involved in the daily operation of a station were to be favored in awarding a station permit.

In the latest, she is joined by August Communications, principally owned by John Barger. August is among several applicants for Round Rock TX 105.9. Those applications have been languishing since 1988.

In February, 1994, the FCC froze action on all contested new station cases. It has since asked for and received comments on possible new criteria. In an effort to reduce the application backlog, the FCC last fall temporarily lifted its prohibition against money changing hands in settlement agreements. As many of you know, I received benefit from that temporary policy change. I withdrew my application for Hermantown MN 92.1A in favor of Harbor Broadcasting, which then received the construction permit. It is on the air as WWAX, and operated along with WRSR 104.3 Two Harbors MN.

However, the lifting of the monetary compensation ban only cleared up 55 station proceedings. Another 200 stations are not on the air because of the FCC's lacking criteria for selecting applicants.

Bechtel and August Communications Group are asking the U.S. Court of Appeals in Washington to step in. Their court petition says, "The lengthy delay without any public sign of progress. . . are signs that the FCC would like the problem to go away rather [than] solve the problem, correcting its unlawful comparative integration factor and clearing out the logjam of frozen applications."

Herman Stamps, D.D.S., along with wife, Ann, own WSBL, which still lacks a license. Dr. Stamps told me that 13 initial applications eventually went down to three. Several withdrew who were unwilling to pay the FCC's \$6070 hearings fee.

The FCC finally awarded the construction permit to Anchor Broadcasting in 1991. Then followed land acquisition,

change of residence for the Stamps family and local acquisition of special permits and tower rights, with "full expectation of licensure." It has been on the air since March 1, 1993. Besides Anchor and Bechtel, the third applicant was Galaxy Broadcasting. After losing to Anchor, Galaxy failed to get the U.S. Supreme Court to review the case. Then Bechtel and Galaxy together appealed the Commission's grant to Anchor. In Dec. 1993, the court reversed and remanded the Commission's decision. This was after WSBL came on the air. The Commission notified WSBL's owners in Aug. '94 that "where program tests have already commenced, operations may be continued so as not to deprive the public of existing service. However, any application for license to cover a construction permit will be held in abeyance until the issues raised by the Bechtel remand are resolved."

Herman Stamps said the "FCC presented a very weak case [to the court]. Bechtel and Anchor won by default. The Commission wasn't concerned. Said a new station would be sold in a year anyway. Now the FCC is trying to draft a policy on how to deny Bechtel the award and give it to us." All the FCC had to go

by at that time was the integration credit; it had already thrown out the female preference credit. Stamps, who is black, told me he had everything going for him. He had retired from his dental practice, lived in the area and qualifies for the award. However, he claims he cannot sell a station with a disputed construction permit and can't LMA it. But he could buy another station. He believes this latest by Bechtel might actually help him, once the FCC figures out what criteria to use. After that his station could be licensed. "But right now there are people out there who would want to take it away from me," he sighed.

The Bechtels had not returned FMedia's call.

**Small-Print Happenings and FM Industry News**

The lead article last month was about CBC/CBL appearing to have won the coveted 99.1 spot in Toronto. That has all changed, with Industry Canada telling the CBC not to proceed with the proposal to reserve the FM frequencies (Sept., p. 6). The government's Department of Canadian Heritage notified Industry Canada of its recommendation to reopen the frequencies (including Montreal and other cities) to other

applicants. "The FM frequencies need to be best employed to serve Canadians," Susan Baldwin, director general of broadcasting policy of the Canadian Heritage department, declared. "The CRTE [Industry Canada] public hearing process is a valuable one, so that there is full public scrutiny of complex issues." Groups vying for the valuable FM frequencies had heard unofficially that the application process would be reopened. Those included the CBC. Harold Redekopp, vp-English Radio, said he had no official word from Industry Canada, but that he had heard "rumours . . . from colleagues and from Ottawa" that CBC Radio "wouldn't be given the FM berth."

Redekopp again stated CBC's problem: It "can't adequately serve its audience (which has been declining in number) with its current radio signal. We are on the AM band that is declining. Among the AM players, we have demonstrably one of the poorest signals. We ought to be audible and we ought to be accessible." He feels there is a good deal of support for CBC Radio. "We want to make sure those voices are heard."

An editorial by Michel Valpy in the "Toronto Globe and Mail," explains why central Toronto can't listen to CBL AM. "The CBC's AM signal is the weakest in Toronto—but that's almost beside the point, because AM is on its way into history. Fewer than one-third of Toronto radio listeners now listen on a regular basis to AM. More than half of Toronto radio listeners never listen to AM. The cheap portable receivers being bought these days don't have AM frequencies [7]. Ten years from now, digital radio will be in place and every 10-watt radio station owner in the country will be able to reach the big urban markets. That's in the future. Between now and then, some of the finest public broadcasting in the world will not be heard where it is needed most—in a central urban area where hundreds of thousands of people from around the world are learning about Canadian society."

I recently visited my second-cousin in Thunder Bay ON and noticed the radio on CBQT \*88.3. I asked, and she said she listens to that [monophonic] station all the time. CBQ (AM) 930 had been given up, its frequency now vacant. Talk there, including on the hilarious "Royal Canadian Air Force" (heard 1:15 p.m. EDT Sunday), was of CBC Radio's having a budget cut and having to air commercials.

Meanwhile, CBC has become the first public web known to have real-time programming on the Internet. Redekopp said the on-line service will "help Canadians abroad keep in touch with what's happening at home and reach new listeners from other countries who want to know more about Canada." The service uses RealAudio 3.0, a software program that can be unloaded free by following instructions at [www.radio.-cbc.ca](http://www.radio.-cbc.ca).

The FCC's not much of a regulator, so it behooves another federal agency to check on the unbridled growth of radio mergers. That agency is U.S. Department of Justice. Two markets are under Justice scrutiny—Rochester and Cincinnati.

American Radio Systems' control over eight signals in Rochester is legal under FCC rules. ARS is taking over stations formerly owned by the Lincoln Group. After that takeover ARS will have WCMF-FM 96.5, WRMM 101.3, WVOR 100.5, WPXY-FM 97.9 and WNVE 95.1 South Bristol Township, plus three AMs.

Those stations control 62 percent of Rochester's nearly \$30 million in radio revenues and nearly 49 percent of the audience. Justice is involved because of concerns over potential adverse effects on competition. Other broadcasters in the market fear ARS will dictate rate structures, either by raising or lowering rates or in combination/package deals. The combined group could raise rates and offer better contest awards to listeners, forcing stations outside that group to raise rates. Andrew Langston of WDKX 103.9 Rochester was interviewed by "Broadcasting." He fears a station in that group might

change its format to urban, directly competing with his stand-alone. Another concern is that the mega-group will hire all Rochester's top radio sales people, making it more difficult for the other stations to sell time.

Heritage Media is upping its holdings in Rochester, buying WHRR 93.3 Avon (but not sister WYSL 1030 AM). It owns WKLX 98.9 and WBEE-FM 92.5.

Cincinnati is another market Justice is looking at. Justice would like to hold Jacor to 50 percent of the radio revenue there. Its recent acquisitions place it at 53 percent. However, Jacor has agreed to sell one, as yet unannounced, station. The American Association of Advertising Agencies says Justice didn't go far enough. Fifty percent allows too much concentration, said John Kamp, a vice-president of the association.

Justice is also said to be studying mergers in Honolulu (Patterson Broadcasting owns four FMs, 2 AMs), Lincoln NE (Triathlon Broadcasting owns 4 FMs, 1 AM), and Orlando. In latter market, Chancellor Broadcasting owns 4 FMs, Cox 4 FMs and 3 AMs; Paxson 4 FMs, 2 AMs.

One station recently sold was WFCC 107.5 Chatham MA. It was sold to WCRB 102.5 Waltham-Boston. The result so far? On-air staff at WFCC was let go. It is not supposedly a simulcast, but the only announcers heard are WCRB's. The programs are "delayed slightly" and all for local news, Cape Cod activities and a bird-watcher's report. The only local presence at WFCC are operations manager Ed Cochran and the sales staff, which includes former on-air personality Janice Gray.

Evergreen Media is expanding in San Francisco. It is buying KDFC-FM 102.1 and KFSF 103.7 to add to its KMEL 106.1, KIOI 101.3 and KYLD 107.7 plus AMs.

Jacor is adding to its holdings, buying KHS-FM 102.7-AM L.A., as well as maxing out in Tampa. It is buying WUSA-FM 100.7-WDAE AM. Added to these are its existing holdings: WDUV 103.5 Bradenton, WFLZ 93.3, WTTB 105.5 New Port Richey and WXTB 97.9 Clearwater.

In June the FCC released a notice of proposed rulemaking to make it easier for grandfathered short-spaced FM stations to modify their facilities. The NAB went along with the proposal, but asked for more time. The NAB study made use of the expertise of Thomas Keller, an engineering consultant. Keller's study showed that auto radios were much better at rejecting 1st and 2nd adjacent channel interfering signals than most home stereos or portable radios.

The NAB identified 312 short-spaced stations having problems with their second and third adjacent channels (but not first adjacent channels). States with the highest number of stations with spacing problems were: CA with 50, PA 32, NC 25, IL and NY each 24, MD and NJ each 17, MI 16, MA 15. Second and third adjacent stations are affected the most by the FCC proposal. They could move freely within each other's coverage area.

Watch WYSY 107.9 Aurora IL go Spanish. That's because Infinity is selling it to bring it within the five FM station limit for Chicago. Spanish Broadcasting System will acquire.

CBS gets an FM-FM duopoly in Washington DC. It is swapping KRRW 97.9 and KTXQ 102.1 Dallas-Fort Worth for SFX Broadcasting's WHFS 99.1 Annapolis MD. WHFS will pair with WARF 94.7 Bethesda MD. The CBS merger with Infinity still puts CBS one station over the limit in Dallas; it will have to spin one more off to be legal.

In nearby Baltimore, American Radio Systems buys WVMX 106.5 for \$60 million and WOCT 104.3 for \$30 million. It already owns WQSR 105.7-A M.

Benchmark Communications buys its third FM in Columbia SC. It spends \$4.1 million to get 100.1 WSCQ. It owns WCOS-FM 97.5 and WHKZ 96.7 Cayce. In Jackson MS it is buying WKXI-FM 107.5 Meigs-WJMI 99.7 and AMs. Paying just under \$15 million to CLG Media of Jackson.

The CHUM Group is buying CFLY 98.3-AM

Kingston ON. It owns CHXL 103.7 Brockville, all of which serve Watertown NY.

DAB in the United States dealt a major setback. Two more manufacturers have called it quits, as far as testing is concerned. AT&T/Lucent Technologies and Amati Communications said they're pulling out because no station in San Diego would volunteer for the experiments.

"The concept of in-band on-channel DAB has been wrought with problems because of poor performance in the lab," says the "M Street Journal." Gary Shapiro, president of the Consumer Electronics Manufacturers Association, questions the future of IBOC, saying any new designs "must be skeptically weighed against broadcasters' interest in delaying digital radio and the realities of present-day physics."

"Smooth Jazz" isn't the only syndicated format going bye-bye (see p. 2, col. 3). ABC radio is folding its Z-Rock format at the end of the year. Z-Rock, through the years, has been plagued by stations having poor signals in their metros. It has used KDGE 94.5 Gainesville (trying to serve Dallas) and WZDR 102.7 Mount Clemens-Detroit, for example.

The NAB has urged the FCC to allow the placing of a station's public file at the main studio, even when that main studio is outside the station's city of license. It is obvious to the public that the studio is where the file should be located. However, some stations that lock the doors and go home before 5 p.m. might still have to locate the public records file at a place like the public library. That invites danger. Without the station staff nearby, pages of documents could be taken out, and the station would be responsible should the FCC find out.

Louisville's WVEZ 106.9-WTFX 100.5-AM fined \$16000 for EEO violations. Prism Radio, the licensee, failed to recruit minorities for 23 of the 60 full-time vacancies between June, 1993 to March, 1996. The FCC also placed reporting conditions to monitor the stations' future EEO efforts.

Deleted station WLUD 92.3 Deltaville VA stays that way. It was denied reinstatement of its expired construction permit. The station claimed it was waiting for WMYK 92.1 Moyock NC to file for a new site. That would have enabled the Deltaville station to modify its facility. The FCC ruled, however, that WLUD had not made "substantial progress" toward construction.

Industry Canada is allowing FM-AM stations more hours of simulcasting. They can now simulcast 42 hours per week. That is in addition to the midnight to 6 a.m. simulcasting now allowed.

Spring '96 RADAR Report shows the combined audience of commercial network radio in the U.S. at over 135 million persons 12+ in a week. This represents 62 percent of that population group, or 66 percent of men, 60 percent of women and 55 percent of teenagers. Statistical Research, Inc. will have software packages ready for agencies and advertisers before the end of the year. The programs, which are part of the RADAR PC 2001 desktop data access series, will provide multi-week reach and frequency estimates.

The NY Times had an article, "Book Sales by Public Radio Raise Protests," by Gayle Feldman, Aug. 26. Two affiliates of National Public Radio are getting into the bookselling act. This is disturbing to smaller bookstores, who often underwrite public radio programs. Minnesota Communications Group, the self-styled "parent support company" of Minnesota Public Radio, is planning a national mail-order operation, as is the WHYY "90.9 Philadelphia-originated program "Fresh Air."

Joyce Meskis, owner of the Tattered Cover bookstore in Denver called it "a bit of a slap in the face," since booksellers and NPR have up to now enjoyed a cordial relationship. David Unowsky, owner of the Hungry Mind bookstore in St. Paul MN, pointed out that the American Booksellers Association spent several million dollars to sponsor Garrison Kellor's "A Prairie

Home Companion" for a couple of years, and local programs about books are often subsidized by bookstores.

The aim of the MN operation is to help subsidize the 29 local MPR stations in the Upper Midwest. The Minnesota Communications Group has a successful track record in generating retail sales of records through the Music Source and other merchandise through the "Wireless" catalog. The book project is a \$700,000 effort, and will run from early 1997 through mid-1998. It will be known as the Book Source.

WHYY's effort is to attract a "secure financial foundation" for the "Fresh Air" show. It will fill orders through Borders bookstores. The plan is to take the concept national, beyond affiliates of "Fresh Air," and even offer an on-line version, according to David Othmer, WHYY station manager.

The National Association of Radio Reading Services has a new president—Beth Jones, from SC Educational Radio for the Blind. Their 1997 convention to be June 12-15 at the Radisson Metrodome, Minneapolis.

Bob Brummond from NC answers a question about radio reading services being on the cable. "If you get approval to be the audio background to a menu channel, you will not only have the best place on the cable with listeners needing only to turn their TV sets to get that channel, but you will get great public awareness of your program. The downside is that if you offer sexually explicit programming you will incur the wrath of everybody and probably lose your appeal. Be careful."

The "Maine Sunday Telegram" discusses stations employing satellite automation in the Portland market. WCYY 94.3 Biddeford is the best local example of a station that uses a satellite and prerecords all DJ shifts. "It's an ever-growing trend at radio stations... made possible by computer technology and driven by radio companies' desire to cut costs. Critics of pre-recording say it cuts down on DJ spontaneity and misleads the public into thinking they're listening to a live voice. Proponents say it allows stations to use their best talent more often and that most listeners today don't care whether the voice is live.

"Movies and literature paint DJs as jolly rebels, folks on the fringes of society who say and play what they want. But DJs lost the power to play what they want years ago. Market research and computer programs now determine the playlist, because stations think that's more profitable. And rising profits are the reason pre-recording DJs is catching on." Area stations were listed. For example WPOR-FM 101.9 is live, WMGX 93.1 live, WBLM 102.9 live, WHOM 94.9 live and syndicated programming, WCLZ 98.9 pre-records DJs for night and weekend shifts, and WCSO-FM 97.9 occasionally pre-records DJs.

The 1996 Broadcasters Clinic is Oct. 29-31 at the Ramada Capital (formerly Holiday Inn Southeast) in Madison WI. This was formerly the FM Clinic, and held since the '60s. It is mainly for engineers. One session is "Advanced Digital FM Exciter Technology," 9:15 a.m. Oct. 29. At 3:45 that day is "New Opportunities Available in Short Spacing—FM Allocations." For a brochure or to register by phone, call Don Borchert at (608) 237-3462.

Gerry Turro (see June p. 7, col. 1) is said to be selling his translators W276AQ 103.1 Fort Lee NJ and W232AL 94.3 Pomona NY to Press Broadcasting for \$1.5 million, according to the NY Daily News. Among Press' other stations are WKXW 101.5 Trenton and WJLK-FM 94.3 Asbury Park NJ. The FCC had recently accused Turro of operating W276AQ illegally. Turro couldn't be reached for comment, but earlier said the sale should satisfy the FCC, and that Jukebox Radio will continue uninterrupted. NY Daily News columnist David Hinckley wrote: "The stake here is a modest but healthy advertising market in an affluent part of New Jersey, which both WJUX and WVNJ want to tap and would

rather not split. Right now Jukebox Radio is staying in it." WVNJ's attorney doesn't think broadcasting WJUX will make enough money to justify Press' investment and wants the FCC to investigate whether other deals are going on.

From the classifieds: Wants to sell KONS 95.5 Lindsborg KS, C3. No direct competition in growing community. Lindsborg is a quaint Swedish town with ethnic restaurants, gift shops. Must be reacting to KSKG's recent switch to country (see above, "Fomats"). Serious offers only. KONS Salina KS, (913) 826-9636.

Scanners—Pro 2006 400 memories featuring "Hyperscan." The Shack's best ever, done in by the law forbidding scanners easily modified to get cellular. Gets FM, 88 to 108mz, with tunable SCS, L-E-D, and snipped diode. \$499 plus \$6 shipping. Includes import duty. I have three in stock.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

[Continuing with comments by Peter Hughes on digital audio broadcasting:] "I believe we will have analog FM radio, and AM for that matter, for many years to come. [And] what is the FCC doing in extending the present AM broadcast band to 1700 kHz, rather than putting the focus on an extension of the present FM band? I guess I do have the answer: that's government! Seriously, I am quite aware that the VHF part of the spectrum is pretty well accounted for [and] the FM band is 'clogged' at least in the most populated parts of the country.

"Finally, I am aware of a phenomenon that you really don't hear that much of: Pirate unlicensed radio stations. With a downsizing having been done on the FCC, you can imagine that this type of activity must be quite common... Both the FM Atlas and FMedia! are worthy of my interest. Keep up the good work!"

Former WPXC 102.9 Hyannis MA program director Phil Manicki lost a lawsuit against his dismissal, and to overturn a covenant not to compete. The trial lasted two days and included six witnesses. But Judge Richard Connon found for the defendant—the radio station. The judge said the covenant was not overly burdensome, and that the station had just cause to fire Manicki. Allison Makkay v.p. of WPXC said that Manicki refused some duties of a program director, such as picking the songs to play, wouldn't take a temporary 6 a.m. to 10 a.m. shift, and had not responded to Pixy's ratings plummet when WKPE 104.7 Orleans MA began competing with Pixy in earnest. WPXC and WRZE 96.3 Nantucket, along with WCIB 101.9 Falmouth, are owned by Makkay Broadcast Group. The other big Cape ownership group is Boch Broadcasting, which has WXTK monophonic 94.9 West Yarmouth, WCOD 106.1 Hyannis, and WWKJ 101.1 Mashpee.

WBUR \*90.9 is fourth nationally among all public radio stations. It is No. 9 among all Boston stations for listeners 25 to 54, and is known for syndicating "Car Talk." In February, it moved to new, "palatial offices" down Commonwealth Avenue from its old digs. Bob Gilbert supplied information in the above three paragraphs.

Don Imus' radio show has begun on MSNbc, the 24-hour cable network owned by NBC and Microsoft. It is still a radio program, albeit on television. Imus said he plans no changes either in presentation or

toning down his outspoken political comments.

Walt Gebhardt sent news about Jacor buying into Tampa-Sarasota. A \$12.6 million purchase will leave it with WSRZ 106.3, WYNF 94.9, WDUV 103.3, WCTQ 92.1, WFLZ 93.3 plus AMs. Pres. Randy Michaels said, "Jacor sees huge upside in maximizing regional synergies. The New Wave stations are a significant complement to our existing Florida presence. We're looking forward to working with existing management and helping the stations fully realize their potentials—so long as this all can happen during the brutally cold Midwestern months of November to February!"

"America's Network" magazine had a list, for information purposes only, of web sites for phone phreaks and hackers' lines. They are: Phreak 33 at <http://home.sprynet.com/sprynet/dukenuke/phreak33.htm>. 2600 Magazine at <http://www.2600.com/>. Phrack at <http://freeside.com/phrack>. Silicon Toad's Telephony Resources: <http://www.network.com/~silicon/hackfon.html>. Cold Fire's Home Page: <http://www.paranoid.com/~cold-fire/>. A newsgroup, alt.2600, is 2600 Magazine's forum for discussing everything from video game CD piracy to billing pay phones. Another news group is alt.phreak, "a focused newsgroup of postings on specific information with little of the usual flaming and pointless postings that plague alt.2600."

The magazine pointed out that there isn't much the FBI, FCC or carriers can do to stop those activities. As long as the individuals post their materials "for reading purposes only" they "are not legally inciting anyone to do anything." After playing cat and mouse between the Secret Service and 2600 magazine, the U.S. Court of Appeals reached a decision (<http://www.200.com/secret/pc/pc-appellate.html>) that the Secret Service could not exempt any documents and had to hand over the goods. "With the power of the law on their side, hackers pose a threat that network security professionals will always have to address. If any security specialists doubt the powers of organized hackers and their desire to share information, they need only to visit the sites" mentioned.

Houston's Bill Turner FAXes: "I'm a fan of low power FM. Would like to convince FCC to permit Class D commercial or noncommercial for communities with no full power AM or FM assigned to the community. For example, a 10-watt FM in a town of 1500 can pull a profit but town is too small to service the debt of a full power. How do we get the FCC to consider LPFM just as they did with LPTV? ... Got any subscribers out there interested in seeing low power FMs in markets without local radio service?" [Write him at 5455 Timber Creek Pl, Dr. No. 50B, ZIP 77084; or FAX (713) 373-5599.]

Glenn Morris of Mc Connellsburg \*88.7 fame called and mentioned the station would like to be in the PA Turnpike tunnels once it gets its CP. He sent a large envelope with information on the project. He's concerned with how many FM and AM stations have emergency power. More on this next month.

Until November, *Bruce F. Ehling*

**On air--Real Stations and Pirates (Selected)**

FL Fort Pierce WCLB-FM, "Country 95.5," is the only country station carrying Howard Stern.

FL West Palm Beach area pirates—"WMTL" 88.5 with heavy metal music, after local WKPX signs off. "This one has been around since 1987!" "WASP" 91.5, heard in northern Broward County with "headbanger" music. "Mix 96" 96.1 black/urban music with ads—even heard as far south as Miami—"a potential DX target!" A pirate with Jamaican music, "solid reggae," 100.3. "Yesterday USA" old time shows from a satellite feed on 105.5. "This is not a cable leak."

GA Atlanta—the top three stations, summer Arbitrons: WVEE 103.3, WSB AM 750 and WKHX-FM 101.5. Dr. Laura on WSB has better ratings than Rush on WGST-FM-AM. Moby helped WKHX-FM's ratings.

HI—address of "Seairer Radio" or "C-101 FM" (last month, p. 3, col. 2) is Waianae H.S., 85-251 Farmington Hwy., Waianae HI 96792.

IA Ames KURE \*88.5, having moved from 91.5. K206AW \*89.1 "now with more power. Good inside bus on G-E Superadio II, even with antenna down."

ME Portland W245AA 96.9 for WKZS 99.9

Auburn. Now offering a "new, stronger Portland signal."

MD Frederick W220- \*91.9, blocking out WGTS \*91.9 Takoma Park reception. WGTS had protested this CP.

MN Esko "WORP" 103.9, \$, r and c interspersed, using a modified Ramsey transmitter, h, and aimed WSW from the local high school. Hopes to apply soon for 88.7. "On Monday, the 30th of September, the young men and women of the radio station were excited to learn that the new transmitter had arrived. [Certain people] hooked it up, and the station was ready to broadcast. . ."

MN Glencoe KARP 96.3, having moved from 96.1. "Hit 96" (not strict). John Linder, owner, wrote to WNCB \*89.3 Duluth MN about WNCB's 96.3 translator in Minneapolis: "As you know, we are already experiencing a high level of interference complaints as adjacent stations, so co-channel interference will be serious for both of us. I hope you can find a better home for your translator, so we both do not experience too much damage from your interference."

MN Owatonna K280EC \*103.9, but from a poor location, rendering their more than 100-watt status coverage like a 10-watter.

NJ Harmony Township W245AA \*96.9, now carrying WFDU \*91.1 Teaneck NJ, but "still on WWFM's (91.1 Trenton) translator list read every night before they sign off at midnight (see Oct., p. 2, col. 2)."

NY Binghamton area—107.5 gt, mono, relaying "American Radio Network," and "not WKGG 107.5 Endwell NY" which is not yet on the air.

NY East Windham W202AJ \*88.3 with WFRH 91.7 Kingston; not yet displaced by WFSO 88.3 Olivebridge.

NY New York (somewhere) "WGRK" 91.9, \$, a Greek language/music station. They're on Thursdays in stereo. "Phone number is the same as the one given by 'WBAD' which is still on weekends with dance music."

PA McConnellsbury 103.7? "I heard a station on testing Oct. 29 for about four hours playing rock music. The Beatles were prominent. . . I never heard them say anything, so I don't know if they are in McConnellsbury PA (which is about 70 km from here), or not."  
 PA Swarthmore WSRN \*91.5 still pr, but on Sundays has '50s and '60s Broadway show tunes. "Highly unusual for a college station, even on Sunday, although certainly a ton better than what passes for music on Drexel's WKDU (91.7)."  
 VT Burlington area 89.7 gt, mono, with someone broadcasting the American Radio Network, gave ID as KHWC 1350 Johnstown and KTMG 1370 Deer Trail.

WA Olympia K211CA \*90.1, with KEAR 106.9 San Francisco.  
 PQ Sherbrooke CBF-FM2 \*90.7, in \$[tereo]  
 MB Portage la Prairie CFRY-FM 93.1, since Aug. 19. "It's the only private FM station in Canada allowed to rebroadcast an AM station indefinitely and Red [Hughes] says that's what he'll be doing. The arrangement gives him the quality of FM in Portage and the coverage area of AM to reach his full audience. There's been great response to the FM, said Red."  
 PQ South of Montreal—mono signal on 88.5. "Don't think it was receiver overload."  
 CHILE—San Fernando region: Punte 9 92.9 2 kw, Fantastica 95.3 2 kw, San Remo 96.9 1 kw, Niebla FM 99.7 2 kw, San Fernando FM 101.9 2 kw, Tinguirica FM 102.5 2 kw, Trigal FM 103.9 2 kw, Colombina 104.5 2 kw. Nearby city has Radio Vision 100.5. "FM networks . . . provide satellite broadcast service direct to every part of Chile."  
 SINGAPORE (and nearby Malaysia) "information to carry on your Indonesian item in the Oct. FMEDIA! It was impossible to pin down the foreign language involved on most of the stations. I was lucky to find the time to compile the info I have, as we had a busy week there in Singapore. . . \$=stereo; FL=foreign language (Malay, Tamil, Chinese, Islamic, etc.). AM band dead—only two stations noted at about 580 and 1310 kHz."

**Off Air--Or Not Yet On**

CA Rio Dell KMGX 107.3  
 DE Wilmington WMPH \*91.7: "Although there have been numerous reports over the past year of this being back on after a multi-year absence, this one again not noted on drive-through 10-8 and earlier on 8-28 and 29."  
 MI Grand Rapids WBYW \*89.9—silent a year now! "I wonder if the FCC knows? Ameritech Directory Assistance has no phone number for WBYW."  
 MN Minneapolis—our tax dollars at work: "The Beat" 97.7 left the air Nov. 1 after U.S. agents seized the equipment. Magistrate John Mason in St. Paul MN signed the order.  
 On KMSP (TV-9) was shown a surprised Alan Freed, the operator, who looked like he just came from the shower. Pictured was what looked like all the station's equipment being carted

away—a console, CD player, a transmitter said to be worth \$1000, a two-element antenna, hauled in from outside the building where it apparently dangled from a cable or rope, plus boxes. The Beat's attorney, Marshall Tanick, said earlier he intends to "vigorously contest" the judge's actions. He called the government's equipment-seizure an "end run . . . They're going after us on a different statute, trying to get around the

restriction on enjoining a station." In attacking only the equipment, the FCC refused to act on "The Beat's" so-called right to be on the air. Freed told me that another hearing Nov. 7 might ultimately decide the issue. If denied the right to return, he pledged to be more effective in fighting the FCC than even Duniere was in California. He is soliciting donations for "The Beat's" legal defense at (612) 391-BEAT. Jeff Stromquist of WNCB \*89.3 Duluth, whose 97.7 translator was told by the FCC to vacate that channel, elaborated on last month's remarks (p. 4, col. 1): "No calls or license. The FCC doesn't seem to care. Could it be a friend or relative of an FCC person running 'The Beat'? Or is it safe to operate as long as the power is much less than the minimum licensable 100 watts and no interference complaints arise? WNCB moved to 96.3 from 97.7 to please KNXR [97.5 Rochester MN]. Will KNXR help shut down the pirate?" Freed sent a videotape of the news coverage three of the major Twin Cities' TV stations had of "The Beat." "City Pages" newspaper had a discussion of "The Beat." It reported what appeared to be intentional jamming of "The Beat" for more than an hour Sat., Sept. 21 starting at about 8:19 p.m. "Instead of the usual high-tech club beats, listeners were subjected to polka, jokey country waltz music, and Michael Jackson's 'Bad' played beneath the menacing sound effect of jingling change." Freed charged that the interference must have come from the IDS Center, and caused by one of the licensed broadcasters using that tower. One listener to "The Beat" was Rob Pendleton, a producer at KSTP (AM) St. Paul MN, who listened it in his home in the lakes area of Minneapolis and while driving. Another listener e-mailed "The Beat," saying the complaining stations (KTIS-FM \*98.5, KTCZ 97.1 and KNXR 97.5 Rochester) must be doing so mainly because of losing audience to "The Beat." Freed, 34, continues to wait for the Minnesota Broadcasters Association to mail a copy of the organization's bylaws that says an unlicensed station cannot join. I will try to run comments by Mr. Freed in "FM Forum" next month.

"City Pages" quoted Freed about the federal hearing: "We just hope they're reasonable. This just points out the power of big media and the misplaced priorities of the FCC. Ultimately, the listeners are the losers." Stromquist said the new Telecom law is holding the FCC "hostage to multimillionaire station owners. They're going to declare religious radio a secondary service, much like FM translators. Stations like KTIS-FM \*98.5 and KNOF \*95.3 Minneapolis-St. Paul are in jeopardy of having their licenses confiscated," since they are occupying valuable commercial frequencies. Brian Lambert of the St. Paul Pioneer Press had a long article on Freed ("The Pirate"), KNXR's Tom Jones ("Mayo Man") and Stromquist ("The Christian"). "We're strange bedfellows, all right," said Freed, of his seeming alliance with The Christian. "I think we are in agreement that Rochester is way out of bounds, asserting interference in the middle of Minneapolis," he said, adding that Jones "has been very rude and piggy." The article included a picture of Robert Ryan outside his south Minneapolis home, showing a yagi antenna WNCB installed so he can

hear his favorite station, KNXR. WNCB installed antennae on eight homes of people complaining of their 97.7 interference. Still the FCC wasn't satisfied and forced WNCB's translator to move. NH Walpole WLPL 96.3

**Selected AM Happenings**

- AK Barrow KBRW \*680 off the air after fire burned its transmitter building to the ground. The FM transmitter (91.9) is at a different site and wasn't affected. It was the nation's most northernmost AM station. "KBRW-FM is now the only station serving the entire North Slope borough (about the size of Wyoming). The FM only covers the city of Barrow, although FM translators in villages should be on air since they are linked by satellite and did not take the AM off-air."
- AR Marianna KZOT 1460—given 20 days by the FCC to file in writing a statement that it will appear at a hearing about its silent status. Has been off since Feb. 20, 1989.
- CA Eureka KGEO 1480, having been on 105.5 FM. It "strictly repeats KGO [810 San Francisco] except for an ID on the hour. [My clients] informed me that a lot of people they knew were upset about the change because the AM doesn't have as good a signal into the surrounding area, especially at night. Eureka-Arcata-McKinleyville is surrounded by mountains."
- CA Ridgecrest KZIQ 1360 had been Christian country. Now it is reported silent.
- CT Hamden WQUN 1220 silent, but to come on the air after Quinnipiac College becomes the owner.
- FL Chattahoochee WTCL 1580 silent. WBCD 105.3 must have gotten its approval to move to Headland AL just in time! [See above, "Facilities."]
- FL Pine Island Center WDCQ 1200 talk; had been silent. [call letters ID Eagle KIDH 1000—cancelled CP, deleted/ IN Bloomington 1590 is a TIS station with a vertical antenna, cost \$1600 to build, says Bill Taylor, publisher "NTIRE News," of the [AM] TIS Industry at PO Box 51, Zeeland MI 49464. IA Ames WOI \*640 is offering a G-E Superadio for a \$200 pledge. "They were giving details of the radio during the pitch for dollars." ME Gorham WASY 1590, off for three years. The FCC deleted the station.
- MA Boston—Norm Nathan, 70, longtime announcer dies. His 52-year career began at WCOP, then WESX Salem, WHDH and WEEI. "I don't think anyone could last this long long again," Nathan said in 1994, upon his 50th anniversary in radio. "Now there is so much with television, cable and FM. Back then there was no FM. There was no television and just a handful of AM stations."
- MA Framingham WKOX 1200 dumped local programming in favor of Spanish and Haitian ethnic. This after WROR AM 1150 dropped its ethnic in favor of KidStar, a service to the 6-11 year old crowd.
- MI Saline (Ann Arbor) WDEO 1290 to religion from Eternal Word [Catholic] Television.
- MN Minneapolis area—KLBB 1400 and WL0L 1470, sister stations, have gone to the same disfeed (Music of Your Life) from 6 p.m. to 6 a.m. To save money, I guess."
- MS Forest WQST 850 silent after World Radio Network ended its LMA. Not affected: 92.5 FM NV Sun Valley KHIT 1590 silent.
- NH Concord WNHA 1140 cancelled CP; deleted. Also denied FM station WRHF 106.5 Farmington. NH reconsideration of its cancelled CP.
- NM Farmington 1610—Kenn-Land Bcstg. granted an experimental license.
- NY Cobleskill WDSC 1190—sold by Kevin Smit for \$30,000. This daytime now on the air as WLAL with adult standards.
- NY New York—former WMCA 570 and WL1B 1190 personality Leon Lewis, 81, died. He was best known for the all-night "Leon Lewis Show" on WMCA, 1978-88.
- NC Burgaw WVBS 1470 silent. It lost its transmitter site but plans to return to a new site.
- PA Ebensburg WRDD 1580 "silent pending sale."
- UT West Valley City KRGQ 1550—show cause why its license should not be suspended. It left the air Jan. 31, 1995, when it was evicted from its transmitter site.
- WA Bellevue (Seattle) KBLV 1540 now satellite fed country in a simulcast with co-owned KQWZ 1230 Everett. "Had tried satellite-urban (which had about as much soul as a computer-generated voice) but gave up after country KRPM-FM 106.1 Tacoma became KBKS 'Kiss 106' with soft urban."
- BC Vancouver CFUN 1410, "one-time legendary top 40 turned AC has now dropped AC in favour of 'hot talk' with syndicated shows such as Dr. Laura, Dr. Joy Brown's show. Still using 'C-Fun', which now sounds absurd. Rumoured to be changing calls soon. . ."
- CJVB 1470 e, to be all-Chinese talk and music "My one-time employer will shuffle the multilingual programming to its new FM on 96.1, which will be a music-intensive static

NORM NATHAN

with up to 15 languages and will rely on a wide mix of world music." It is building a new studio to accommodate the FM. "The AM and the FM will be broadcasting from our new facility at West Broadway and Cambie. It joins our other studio in Richmond, where there is a high concentration of Chinese. The FM will target a younger age group, with more music. The AM will have more talk," said Donny Tong, project coordinator. "Apparently all is not lost for the two unsuccessful FM applicants, CKST and Telemedia," reports "Broadcast Technology," hinting that one more non-mainstream FM frequency could become available in the spring.

"Regarding AM radio in general: I have noticed in my travels that there seems to be a sad state of technical affairs existing with some AM stations. Poor audio quality at times from satellite feed; an indifferent attitude to have the proper wattage/directionality prevail as per day/night hours of broadcast—and on time! Also, some AM stations are not keeping their transmitters from overmodulating, which results in a form of soft annoying static on adjacent frequencies. An example locally is 1260 kHz, WNSS [formerly WNDR] Syracuse NY will create static on 1300 kHz, thus making listening to WZZZ 1300 kHz Fulton NY unpleasant... I know deregulation allowed for these conditions to prevail, but still, even in some instances of FM and television audio... there is less technical par than when compared to Industry Canada, which is quite persnickety in their technical standards... The FCC in pre-Reagan administration years was better at maintaining superior technical standards for American broadcasting," writes Dwight A. Crabtree, La Fayette NY.

"The FM Atlas is a big help. I love to DX. Keep it up," P.C.A., Kenosha WI.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- FL Hobe Sound 105.5C3 from Jupiter 105.5C3, WADY, Nov. 25, Dec. 10
- FL Nocatee 105.3A, Nov. 12, 27
- GA Augusta 101.7C3 for 102.3A, WEKL, Nov. 25, Dec. 10
- GA Gibson delete 94.3A, with Thomson.
- GA Thomson 94.3A from 101.7A, WTHO-FM, Nov. 25, Dec. 10
- IA Anamosa 95.7A, Dec. 16, 31
- KS Cawker City 96.3C3, Dec. 2, 17
- KY Mount Vernon 101.9A, Nov. 25, Dec. 10
- KY Sturgis 105.7A, Dec. 23, Jan. 7
- MN Belview (Redwood Falls) 105.9A, Dec. 2, 17
- NM Raton 97.7A, Dec. 2, 17. Or: add 97.7A and 107.7A. This would eliminate a hearing for the two applicants.
- NY Windsor 106.7A, Dec. 23, Jan. 7
- OH Portsmouth 107.5A, Dec. 16, 31
- OR Portl and 98.7C1 for 98.5C, KUPL-FM, Dec. 9, 16 ["show cause/why not?"]
- OR Seaside 94.9A or 102.3A from 98.1A, TN Marti 101.3C3 for 101.7A, WCMT-FM, Nov. 25, Dec. 10
- TN Tiptonville delete 101.3C3, with Marti.
- TN Tullahoma 107.1A, Dec. 9, 24
- TX Taylor (move from Temple) 104.3C2, KKIK, Dec. 23, Jan. 7.
- VA Goochland 100.5A counterproposal

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AR Batesville 99.5A, no filing window announced. [dow announced.]
- AR El Dorado 101.5A, no filing win-/
- CA Del Rey Oaks (move from Greenfield), 107.9B—dismissed KSEA's bid.

- CA Johannesburg 100.A, Nov. 12-Dec. 13
- CA Tehachapi 100.1A, Dec. 2-Jan. 2
- CA Temecula 103.3A, Nov. 18-Dec. 19
- CO Limon 93.7A, Dec. 9-Jan. 9
- CO Yuma 100.9C3 to Nov. 18
- HI Keaau 105.1C2, Dec. 9-Jan. 9
- HI Princeville 98.9C1, 99.9C1. No additional filing window for the new channel (99.9C1). This eliminates the need for a comparative hearing for the two applicants.
- KY Stamping Ground 96.1A from 99.1A, WKYI
- MI Negaunee 101.9A. Adding a second frequency to avoid a hearing.
- MN Faribault 107.5C2 to Nov. 18.
- MS State College 104.5C3 to Nov. 18
- MO Owensville 95.3A to Nov. 18
- MO Wheeling 105.9A to Nov. 18
- MT Sidney 93.1A to Nov. 18
- NV Wendover 102.3C to Nov. 18
- NH Jackson 99.5A to Nov. 18
- NM Clavis 101.5C1 to Nov. 18
- NM Grants 105.5C to Nov. 18
- NM Santa Rosa 95.9A to Nov. 18
- OK Wynnewood—dismissed 106.1A bid.
- OR Pendleton 103.7C1 for 103.5C1, KWHT
- PA Reynoldsville 106.5A from 99.5A, WDSN
- TX Brownfield 104.3C2 to Nov. 18
- TX Cameron 94.3A to Nov. 18
- TX Hemphill 103.9A, Dec. 2-Jan. 2
- TX San Angel 105.7C3, Nov. 25-Dec. 26
- TX Winters 96.1A to Nov. 18
- WA Wilson Creek 103.5C1 for 103.3C3, KVVY (with Pendleton OR)
- WV Romney 104.1A for \*88.1A, WJGF

**Shock Jocks, Owners Face New FCC Crackdown**

A backlog of 90 complaints against broadcast indecency has prompted the FCC to begin action on several fronts this after ignoring the issue for a year. Action comes in time to stall pending ownership mergers, including that of Howard Stern's employer, Infinity Broadcasting, with Westinghouse/CBS. It also affects the employer of Chicago's Mancow Muller, Evergreen Media Corp., which is in an acquisitions mode. Muller, however, said he's unaware of any FCC complaints against him.

One station that was fined—WVIC 94.9, "Buzz Rock 95," East Lansing MI. The FCC hit it with an \$8000 forfeiture, referring to indecent language "that describes sexual and excretory activities or organs in patently offensive terms." The action's from a June 3 on-air exchange between morning announcer Jaz McKay and a listener. This was the first fine issued by the Commission since April, 1994, when it gave \$12,500 fines to KNON \*89.3 Dallas and KFMH 99.7 Muscatine IA. WVIC president Jim Jensen stressed that the indecent material was uttered by a guest on the show. That show was not using a pre-delay.

In Richmond VA the level of protest against Stern's show that was on WVGO [now WBZU] 106.5 was so intense that his show was dropped. Local ministers were prominent in getting that program removed. [See Sept. p. 3, col. 2; p. 7, col. 1.] From transcripts I've read, it appears Stern has not learned. He's as indecent as ever. Perhaps James Quello won't stay mello either. He may yet get a blast at Stern before he (Quello) retires from the

Commission.

The dropping of the show was not enough, however, to forestall an FCC Fine. WVGO-WBZU now hit with a \$10,000 fine for the way Howard described sex with his wife on a broadcast of Oct. 23, 1995.

**Small-Print Happenings and FM Industry News**

Sending shivers down the collective spines of the nation's largest group owners is the latest from the Justice Department looking into anti-trust actions in the Rochester NY radio market. Broadcasters who had feared only the FCC, now have to contend with scrutiny from another, potentially more powerful, agency.

Originally, American Radio Systems of Boston was to have bought stations controlling 60 percent of Rochester's radio ad revenue. It will not, as a result, buy WHAM 1180 AM, and will end its sales agreement with WNVE "The Nerve," 95.1. It will also seek independent buyers for WVOR 100.5 and WCMF AM 990. This will knock ARS's local revenues down to 40 percent. It will be allowed to add WPXY 97.9 to its holdings. It retains WCMF-FM 96.5, WRMM 101.3 and WHTK 1280 AM. And it is putting WAQB 94.1 Brighton-Rochester on the air. "The station has been so 'hush-hush' about their format... WDKX [103.9], one of the few remaining independent FMs, is terrified that their format might end up urban contemporary... The local radio scene, outside of public radio, has been dull, dull, dull, so it will probably be another boring classic rock, 'light FM' or oldies format," FAXes Phillip Dampier.

Joel I. Klein, acting attorney general, said the Justice Department will stop any single company from dominating a local market. "Competition helped make radio an effective and affordable advertising medium, and we intend to keep it that way. [The joint sales agreement] simply eliminates price competition between two radio stations without creating any benefits for consumers," he said.

The Justice Department action has set a huge precedent in the industry, according to Alan Bishop, g.m. WMAX-FM 106.7 and WRCD 107.3. "There have been many instances in the past of people taking over their competitor. This is the first time the government has said that's not such a good idea. Now, nationwide, if one rock station says it wants to buy another rock station, they'll be looking over their shoulders at the Justice Department." The decision means "we can compete. The WDKXs, WJZR (105.9) and us now especially can do relatively well," he said.

Steve Dodge, ARS president, said the company "reluctantly" agreed to sell the stations. "We disagree with the theory that radio is its own unique market and that competitive abuses would occur in a circumstance of more significant ownership concentration," he told Bloomberg Business News, as quoted in the "Rochester Democrat and Chronicle." [See last month, p. 7, cols. 1-2.]

WXXI-FM \*91.5-AM there, along with SCS Reachout Radio, had an all time high fundraiser, hauling in \$145,643 in pledges. The previous high was \$109,888 in Feb. '95. The FM had a 3.5 share, ahead of WRCD, for 11th place.

WBCL \*90.3 Fort Wayne celebrated its 20th birthday with an open house. It renamed its main studio as the Jeff Carlson Studio, in memory of the former morning d-j who was tragically killed in a car accident last December. He had spent hours researching and ordering new digital audio studio equipment that was installed in September.

The FCC fined KIXA 106.5 Lucerne Valley CA \$10,000 for not keeping enough independence, even though programmed only eight hours a week in an LMA with KZXY 102.3-AM Apple Valley from 1992-1995. Topaz Broadcasting provided the studio, transmitter to studio link and supervised construction of KIXA.

According to the FCC, this "far exceeded the boundaries" of an LMA. The fine was reduced from the originally-announced \$20 K. This signals that both the the FCC and Justice Department are giving tighter scrutiny to LMAs, but may allow more relaxed standards to already existing ones.

The M Street Journal raises its rates to \$139, "due to increased costs of obtaining information and publication costs, as well as an increase in the average page count." Subscribers receive a copy of the annual M Street Radio Directory. Call Pam Riggins at (800) 248-4242 to subscribe to that weekly, which covers AM and FM, and with which FMedia! has a news-sharing agreement.

That publication reports merger mania in Omaha. Journal Broadcast Group is buying KOSJ 97.7 Nebraska City NE to go with its KEZO 92.3 and KKCD 105.9-AM. Triathlon is picking up longtime ratings leader KFAB 1110 AM and KGOR 99.9 for \$39 million. It owns KTNP 93.3 Bennington and KXKT 103.7 Glenwood IA, both serving Omaha.

Jan Lowry, an ABC employee, publishes Broadcast Pro-File. He's done that for 25 years, and may know more about the history of your station than you do. His service was featured in "Radio World," but I've used it when I bought two FM station histories. He even has a Pro-File on WINS-FM New York. Never heard of WINS-FM? Neither had I. It held a CP for 105.1 in March, 1950, but was not built. It couldn't find a site. "Lack of tall buildings?" asked RW. Crosley executives decided an FM in New York city would not be profitable, and turned in the permit in June, 1950, citing "a lack of interest in FM" in the market. It would have cost Crosley \$42,450 to build the station, and they were not visionary enough to realize by 1996 the going price of a NYC FM station could be \$100 million. Seems I can recall another Crosley project that was short-lived. A neighbor had a small 1948 Crosley car. They were made until 1952, and had a "tin can engine." A cute car, but it had "no marketplace."

Lowry will do custom station histories, but for a catalog of already researched station histories send \$1 to:

Broadcast Pro-File  
28243 Royal Road  
Castaic CA 91384-3028

"The Sept. 4 Radio World, p. 5, had a letter about WHA and the early WJ FM network," writes John Ebeling of Bloomington MN. "In it the writer makes reference to KUOM-FM [Minneapolis]. I never logged KUOM-FM (assigned 91.7) either in Duluth or here in the Cities. I believe they never operated—just held a CP. I found my old White's Radio Log, spring 1950, and never had them marked as received. Some old powers I had noted: KTIS-FM \*105.9 5.3 kw, KWNO-FM 97.5 Winona 55 kw, KSTP-FM 102.15.5 kw, KBUR-FM 92.9 Burlington IA 63 kw; KGLQ-FM 101.1 Mason City IA 16.5 kw."

Soon to celebrate 25 years on the air—WSDP \*88.1 Plymouth MI. It went on the air Feb. 14, 1972, and helped the careers of many albums. Ken Coral, 27, remembers that his early days at WSDP led to his job as an admissions representative at Specs Howard School of Broadcasting in Southfield. "I did play-by-play sports and had a Monday night alternative rock show. I wore all the hats, but music is the thing that drives you. It's what your friends talk about. And the memories are nothing but great." One regular listener is Bob Barberio, 25, a restaurant employee. "You can kind of tell that high school kids are the DJs," he said. "But other than that, the station sounds really great."

Hurricane Fran knocked out many forms of communications, but WGNI 102.7 Wilmington NC stayed on the air to pass on emergency messages. Both electricity and telephone service were cut. The station suspended its adult contemporary format, answering questions like where people can buy gasoline and ice, and "What is a fair price for removing a tree?"

Not doing as well were several unnamed FM and TV broadcasters having their antenna on Cedar Hill, south of Dallas-Fort Worth. A 457-m transmission tower went down, killing three workers who were trying to install a TV antenna. A gust of wind caught a hoisting pole, breaking a guy wire, causing the tower to fall. The victims worked for Doty Moore Tower Service. Emergency crews used power saws to free two of the bodies from the wreckage. One of the two Cedar Hill towers stands. I have not heard of any stations being off the air; alternate tower sites abound in the market.

From the classifieds: Station manager WGGL \*91.1 Houghton MI. Its only employee now is Mark Wilcox, news director. Min. 5 yrs mgmt, sales experience, knowledge of radio operations, appreciation of public radio a must. Contact MN Public Radio, % MCG Human Resources (330-M), 445 Minnesota St., Ste. 500, St. Paul MN 55101.

Roger A. Mattson, M.D., 1501 Cliff Ave., Duluth MN 55811-2427; (218) 724-3687, reports that Juice Plus is "a convenient and cost effective alternative to juicing with live enzymes, vitamins, nutrients and fibers." Available to readers of FMedia! for \$45 for about a three months' supply. It is juice blended live (not frozen or cooked, and with no pesticides or preservatives), then flashed dried and compressed into capsules. Price includes shipping and handling. Charge card orders to (800) 605-2219.

For sale Tepco J-317 FM translator \$1300, also a TTC translator 10-w. S. Bush, Bountiful Bcstg., 3595 S 1300W, Salt Lake City UT 84119; (801) 264-8250.

"My son is now in college and these are his old units." Sony ICF-2002 portable AM-FM-short-wave radio in good condition, with Sony's AM-1 active antenna, \$75 for both units. The "other is a Pioneer TX 8500 II tuner modified by Doug Allen in CO with three 150 kHz IF filters. Tuner works normally in stereo wide mode. Filters kick in in mono narrow position. I have another DX unit which I use, so we no longer need the Pioneer. Has a metal cabinet and the silver front panel—very good condition." \$100 postpaid. Call long-time "FM Atlas" reader Don Meno in CT, 7 a.m. to 4 p.m. EST at 1-800-365-9888 ext. 262.

FM FORUM  
COMMENTS FROM READERS

Glenn Morris is hoping soon to get the construction permit for McConnellsburg

PA \*88.7. It will be oriented toward emergency service to the area. He wonders about other stations now on the air:

Do stations know what station to listen to for EAS messages? Any readers knowing of such a survey let me know. He's hoping for a CP this month. "The FCC has been a great help from many branches and we owe them a few pizzas!"

"Bruce—in 'Selected AM Happenings' July—you mention the Maine duopoly WREM/WEGP. You should know what this is all about!" writes Karl Zuk. "WEGP's new owner is Elaine Heitner. Ten years ago, WREM was owned by Al Weiner, of RNI pirate ship fame. Al had to sell WREM in distress after the FCC balked at the usage of WREM's auxiliary station KPF-941 on 1622 operating from Yonkers NY as a primary broadcaster. Elaine is Al's 'main squeeze', so in essence, Al operates both WREM and WEGP along with doing

engineering for several other Maine stations. By the way, Al is busily building another radio ship!"

I read in the "Times of London" an article, "When FM is Caught on The Hop" by Brenda Maddox (July 17, p. 22). It reads in part:

*When we drive out of London on a Friday evening and head for Wales, my husband and I have switched to long-wave by the time we hit Reading. We have to if we want to listen to Radio 4 all the way. For Radio 4 is carried not only on FM but on the blessed long wave, which stays with you up hill and down dale.*

*For our three-hour journey we have tried to stick to FM. It offers superior quality and easy access to lots of other stations we like. But that would require retuning along the way because the short range of the transmitters have to be dotted all over the country and inevitably there are gaps in between. . . The BBC's engineers could not be more helpful. "When you get to the middle of the M4, between Reading and Swindon, leave 93.5 and switch to 94.3. Then when you get Raglan way, go over to 93.1, then between Abergavenny and Brecon back to the 94.3." Even so, near Abergavenny, "under the flank of the hill—the 94.3 goes terrible."*

*Better, it is suggested, that we upgrade to a technology designed to meet the needs of the listener on wheels. An RDS radio is programmed to track any given station. . . Dare we take the plunge? True, the price has come down to about £ 100 for the cheapest sets. Alas, I am reliably informed, they don't live up to their promise.*

*They have a habit of racing through the dial, hopping from one FM transmitter to another in search of a signal that meets their standard. . .*

*"They get confused quite easily" . . . It is a fact of life: FM is a fickle waveband. Fine for those fixed on one spot—in the kitchen, bedroom or building site—but a pest on the road. A passing motorbike or tall building can cause a splat of static.*

*So why should 25 groups be fighting to own the last London-wide FM station likely to become available? Not for the quality of its promised reception. . . The allocation up for grabs, 104.9 FM, is about to be vacated by Melody Radio because of its unsatisfactory coverage in southwestern stretches of Greater London. [But FM] revenues are soaring, and radio now takes a healthy 4 percent of all spending on display [that is, nonclassified] advertising. A local radio station can be run on a shoestring and big audiences are available.*

*Capital Radio is one of the bidders for the new London FM licence because of the new Broadcasting Act. This allows, for the first time, a single owner to own two stations on the same waveband in a single area. Were Capital to win the new licence, it could put another one of its services, Capital Gold, now on medium wave, onto FM. Atlantic 252 nourishes similar hopes. [The Radio Authority must decide based on a mandate to further "plurality and diversity." This could be defined as allowing for a station for the Irish, the French, the middle-aged, the old, the Tamil-speaking and the reggae-loving, as well as allowing Capital Gold or Atlantic 252 to reach, for the first time, an FM audience.] Shining temptingly over all this expansion is the American example. In most cities there seems to be a different station for each demical point on the FM band. But America has the luxury of geographical separation. Broadcasting frequencies can be re-used, assigned in one city to*

*My technical advisors warn me against swallowing all the current enthusiasm about the next radio wonder: DAB (for digital audio broadcasting). DAB is coming, beyond a doubt. And it will certainly allow a much wider expansion of commercial uses of the airwaves. But these are much more likely to be found in personal communications, such as mobile telephones and pagers.*

Until December, *Bruce F. Ewing*

frequency is clear, "we at KVPA 101.1 would like to expand, except that I hear there is a vacant allocation in Reynosa on 101.1A. I'll be checking on that and will let you know. When are you going to come here to beautiful South Padre Island for a vacation? There are bargain rates this time of year!"

**Stereo-or to be Stereo**

AL Eva WRJL-FM 99.9, g  
CO Ignacio KSUT \*91.3. Trying to improve the technical operation, but "radio waves in the terrain of southwest Colorado are extremely tricky... Finally we settled on a plan that would give us the opportunity to double the signal power we had originally anticipated. However, there were

two catches. Number one—KSUT would have to construct our own tower. Number two—the original price tag would double." Doubling of the \$110,000 figure meant "another challenge. After several meetings with the Tribe's Economic Development Department we decided to [apply] to the Southern Ute Tribe's Division of Gaming for the use of gaming revenues to see the revised project through to fruition," which was approved. "As this is being written we anticipate an early fall sign on for 90.9 FM stereo." KSUT just passed its 20th anniversary. It's now connected to Public Radio International. "A satellite dish, donated by a hotel on the front range, caused considerable excitement. KSUT's Operations Director Scott Henning and a group of Tribal members transported the dish back to Ignacio where it was installed, and still stands today providing a landmark on Highway 72 that's hard to miss."

WI Brookfield WFMI 106.9, now known as "The Oasis" with smooth jazz. "It comes in pretty well here for a 6 kw station. It competes with WJZI 93.3," P.C.A., Kenosha WI,

**Format Changes**

*Formats are the same as in the "FM Atlas"*

- AL Tuscaloosa WTUG 92.9 sr

- MA North Adams WMNB 100.1 mr
- MI Muskegon WSNX 104.5 rs, uses calls. No longer "104.5 Sunny FM."
- MI Whitehall WKBZ-FM 95.3 rs. Sold by Grand Valley State University to Holy Trinity Church's Bishop Nathaniel W. Wells, Jr., and two other principals. Sale includes WKBZ 850 AMuskegon and WQWQ 1520 AM. The new format is similar to what "Magic 108" featured before it changed calls to WSHZ. Frank Landingham is v.p. and general manager.
- Wells' company, WLC Broadcasting, has no other stations, but Landingham said it's considering other purchases in the future. The WKBZ stations were owned by Grand Valley State University. Officials of the school had hoped to either convert them to public radio stations or use their revenue to help support the WGVU stations, including WGVU-FM \*88.5 Allendale-Grand Rapids. However, the new telecommunications act and policy changes at the Corporation for Public Broadcasting persuaded university officials to sell the WKBZ stations to a commercial business. The new format on 95.3 also includes rap, blues and jazz. Also included: high school sports, which were also part of the old WKBZ-FM programming. [See FM Atlas-16, p. 2, for more on WKBZ-FM.]
- MT Billings KBBB 103.7 r, hot AC, "B-104." In a combo with KCTR-FM 102.9, KKBR 97.1, KMHK 95.5 Hardin.
- NJ Ocean Acres WQNJ 98.5 r, having modified its format slightly (along with WJLK 94.3 Asbury Park). "Also WZVU 107.1 Long Branch NJ recently got sold to Odyssey Communications, which owns WRGX 107.1 Briarcliff Manor NY... Speculation is that WZVU will drop its oldies format to simulcast WRGX's progressive rock format."
- NM Las Cruces KXDA 103.1 pr [talk show]
- NY Cortland WIII 99.9 rt, with Imus' the only/ NY New York WMXV 105.1 rp, "The New 105.1 FM, The Buzz" (from "Mix 105"). Applies to the FCC for calls WDBZ. On-air staff was let go. The only on-air staff thus far is the morning duo of Bill Kelly and Al Kiene, who came from Hartford, and midday DJ Judy France. The "day before they started the new format they played all Broadway show tunes." Its legal ID is: "WMXV New York—for now!"
- NC Beech Mountain WECR-FM 102.3 mr
- NC Burlington WRSN 93.9 mr, still "Sunny 93.9" [sic Hits 103-9"]
- NC Fuquay-Varina WZZU 103.9 op, "Class/ NC Greensboro WQMG-FM 97.1 am, "soft R&B love songs." [KRRB 92.1]
- ND Dickinson KCAD 99.1 k, owned by/ OH Bryan WGBE \*90.9c], parallel to WGTE-FM 91.3 Toledo
- OR Ashland KKKJ 107.5 rm, joined with KZZE 106.3 Eagle Point
- PA East Stroudsburg WESS \*90.3 tp. Now on 24 hours a day, even during the summer. When students aren't on hand it uses a satellite downlink that cost about \$12,000 for the BBC World Service. This includes world news, interviews, sports, documentaries and "cultural programming." Coverage overestimated by the station as 48 to 80 km "depending upon the terrain." See the current "FM Atlas" for a truer estimate of its coverage.
- PA Harrisburg WYMJ 94.9 m, all Christmas
- SD Lowry KMLQ 100.7 k, parallel to KPLO-FM 94.5 Reliance
- TX Arlington KEWS 94.9 k, \$. It is temporarily repeating co-owned KYNG 105.3 which is at low power following tower collapse (see last month, p. 8, col. 2). Format to change when sale to Salem Communications is finalized. Also off for a brief time [but now on with lower power]: KRBV 100.3, KOAI 107.5.
- TX Franklin KLTR 101.9 op, \$[tereo] resumed

TX Sulphur Springs KDXE 95.9 op, "Dixie"  
WV Ravenswood WFYZ 93.1 kg, including bluegrass, southern gospel. It is parallel to an AM. [great year!] S.F., Waltham MA. "Bruce—Looking forward to another/

**On air--Real Stations and Pirates (Selected)**

- DE Newark W207AA \*89.3 (see last month, p. 1, col. 1): "Evidently the repeater for WHYY [\*90.9 Philadelphia] was not turned off as reported. I also heard it on the air following the earlier report."
- DE Wilmington WMPH \*91.7 [last month, p. 4, col. 1]: "This station has a recent history of being off the air while school is closed. Their most recent down-time was due to the school being renovated and the station had to be moved, then returned. WMPH has been on the air on a fairly regular basis for the last three years. One should not immediately assume a station is 'off', especially a high school station, when they pass by the station on the highway..."
- FL—near Palm Beach International Airport "Italia Canta" 100.5, playing popular Italian songs, even an RAI mention. "Another strange one!"
- IA Waukon KNEI-FM 103.5, having moved from 103.9.
- MD Salisbury WICO-FM 94.3, not yet on 97.5. Off air is WFBR 94.3 Salisbury. "Part of the deal was to have the new owners of 94.3 pay to move WICO-FM when they were ready to go on the air. Due to the Cambridge station not being able to find a transmitter site or erect a tower in Cambridge or St. Michaels, the station has never been built [with] the owner of the 94.3 CP having very limited funding. Unless someone has some very deep pockets, it's going to be a while before the WICO-FM switch takes place, if it ever does!" [DE and MD info from Dave Schmidt, Mid-Atlantic Radio Service, Wilmington.]
- MO Malta Bend KRLL 97.5
- NH Keene W288AM 105.5, apparently the only WZSH 107.1 Bellows Falls VT translator to operate. [on 104.3 as W282AD.
- NY East Windham W210AP \*89.9, not yet/ PA Clarks Summit W212AT \*90.3
- PA Jersey Shore WJSA-FM 93.5, not yet on 96.3
- BC Vancouver CHQM 103.5 is running in a "dead heat with Kiss (CKKS 96.9). It's a horse race, but it keeps us on our toes."
- ON Toronto area 101.3 with announcing that Industry Canada is testing with a series of tones. Frequencies announced are 400 and 1000 Hz. The program repeats about every 15 minutes. Preliminary DAB testing, but on VHF?
- CUBA Ciego de Avila-CMJP 98.3, \$[tereo] Havana CMBC-FM 92.1, t, mono
- CAYMAN ISLANDS Radio Cayman \$ on 89.9, 91.9, 93.9, 105.3
- GUAM Agana Heights KSDA-FM \*91.9, "Joy 92." Class C2, 4000 h y; 344 m. "Run by the Guam Micronesia mission of the Seventh-day

Adventist Church. Programming is mostly syndicated religious shows with a couple of local programs. On 7 days a week 6 a.m.-midnight. Sunday mornings are ethnic with the "Voice of Prophecy" in Tagalog, plus Chinese and Japanese programs."

**Off Air--Or Not Yet On**

- AK Anchorage KWOJ 92.9. Applies for more time to build.
- CA Desert Center KZAL 105.5—delete format, Its license renewal has been designated for hearing by the FCC. Meet Eugene White and the late Ralph Savage, who each owned 40 percent interest in the station. In 1991 White was found guilty in courts in FL and NC of racketeering,

fraud and sales of unregistered securities, and sentenced to 12 years in prison. In 1992, Savage entered guilty pleas to similar charges. But on the day he was to appear in NC for sentencing he committed suicide. They were involved with Sunrise Management Services, which collected money from clients to file for FM stations in various markets. Those activities were later found to be fraudulent. Sunrise's activities were covered in these pages several years ago. KZAL has been off the air over three years, claiming it couldn't find a transmitter site for its C1 CP, and that it was looking for a buyer. ID Caldwell KCID-FM 107.1 reported silent. Owned by AGM, which is buying KJOT 105.1 Boise/KQXR 100.3 Payette for \$5.1 million. IN Chesterton WAJW \*89.5. "If it ever comes on, it will hurt WONU \*89.7 Kankakee IL, which has an audience in the area." MI Grand Rapids WBYW \*89.9. "Now off over one year! Wonder if FCC will pull their license?" NY Oswego WZOS 96.7 reported silent. PA Mill Hall WZRZ 98.7—had been testing, but not heard in over a month. PA Renovo WXKW 106.9 "still testing irregularly" as "Y-106.9" with stereo. PA Williamsport W211AM \*90.1: "Still not on." TX Brownfield KLZK 103.9 (to go to 104.3). This station clings to its license, despite the recent filing window for 104.3C2 (see last month, "Rulemakings," p. 7, col. 2). KLZK has been silent three years, but after receiving an FCC letter, promptly found a new transmitter site and obtained a bank letter covering costs of construction and operation. PQ Jonquierre CHOC 92.5. Silent. Must reveal plans to return to the air to Industry Canada by Feb. 28.

 "I don't care for your [Brother P-Touch label generating system] because the type size varies so much. It gives FMedia! an inconsistent, 'patched together' look. Example (from last month) 'Format Changes' p. 2 has a squashed appearance, while 'Call Letters Assigned' screams out in huge, overly gigantic letters (p. 1)."

SC Services, 57-92 kHz  
 Syn. sigs are as in the "FM Atlas"

CA Oxnard KCRW \*89.1 † Q (92 kHz). This differs from KCRW \*89.9 Santa Monica, which has its Russian on 67 kHz.  
 CA Redwood City—Command Audio Corp. based here hopes to begin broadcasting nationally on 66.5 and 88.5 kHz Will require two to three transmitters in a market. "These are multiples of the 19 kHz stereo pilot (3.5 and 4.5). It will be a high speed data service with subscriptions sold to the public. We will favor the 66.5, but the NAB tells us that broadcasters often have the 67 kHz in use, and when that is the case, we'll utilize 85.5 kHz." This might affect broadcasters' ability to turn off the \$[tereo] pilot when airing monophonic fare, such as play-by-play sports.  
 CA Sacramento KXOA-FM 107.9 †  
 CA San Diego KGB 101.5 †  
 GA Gainesville WFOX 97.1 †(), RBDS-controlled billboards coming to these three stations. The billboards will show the title of the song currently playing.  
 IA Des Moines—IRIS is on the 92 kHz of WOI-FM \*90.1 Ames. John Taylor, director, tells me that not only was WOI(AM) offering a G-E Superadio III for a \$200 pledge, but WOI(AM) 1040 has been selling that same radio for \$52.00.

MD Westminster WGRX 100.7—its †() mentions call letters, format ("real country") and accurate time.  
 MN Mankato KMSU \*89.7 †X, alphanumeric paging. No 92.  
 MO Springfield KTXR 101.3 no SCS. "This ends 10 years of it having background music," 67 kHz.  
 OH Youngstown WBBG 93.3 †M[usic], 67  
 PA Pittsburgh WDUQ \*90.5 has a new manager for its Radio Information Service on the 67 kHz. She's Helen McCaffery, who has been a reader and personality on the SCStation 18½ years. It is one of the oldest in the National Association of Radio Reading Services and operates on a \$320,000 a year budget. The newer radios they offer get regular FM and AM stations as well as RIS.  
 "I enjoyed reading your long FM DX article at <http://www.users.scoast.net/daustin/fmdx.html>. You mention line cord antennas. I never heard of those..." [A line-cord antenna is common on table model (AC-only) radios. It uses part of the AC wiring of the house for the antenna, but mostly the cord running from the wall outlet to the radio. Best reception is by having the cord unfurled, and laying broadside to the direction of the station you are trying to receive.]

**NewsIDs, Not Just Slogans**

Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour).  
 AL Birmingham WENN 107.7 uses calls, not "Jammin' 107," "Win 107" or any of their variants. When used, such slogans are only "on a random, haphazard basis. Despite this disarray, the station remains a strong No. 2 in the Birmingham market."  
 AL Tuskegee WTGZ 95.9 Tiger 95.9  
 FL Jacksonville WAPE 95.1 Big Ape  
 WROO 107.3 jumps to Kangaroo Radio (from "Rooster Country")  
 IL Marshall WMMC 105.9 Magic 106, no ID with Terre Haute-Charleston. "We can't even be heard in Charleston because of another station to the west of us."  
 MI Detroit WCHB-FM 105.9 is 105.9 FM (strict). Forced to give up "The Beat," as it is a "direct competitor [to] market leader WJLB 97.9. Evergreen owns both WJLB and KKBT 92.3 'The Beat' in Los Angeles, and claims they have the rights to that name."  
 MI Muskegon Heights WMRR 101.7 uses calls, no longer "Rock 101.7"  
 MS Artesia WSMS 99.9 99-9 The Storm  
 NH Dover WOKQ 97.5 uses calls, not "New Country 97.5." IDs with Rochester-Portsmouth-Manchester, adding Rochester.  
 NY Poughkeepsie WNSX 96.1 is really The X 96.1. "Signal doesn't seem so strong as when they first came on. Anyway, your reader in Hyde Park could listen to WAMK \*90.9 Kingston for classical music if he can't get WOXR" [96.3].  
 TN Chattanooga WDOD-FM 96.5 River Country 96.5, and not "River Country D 96.5." "I listened for four solid hours and never heard the 'D' version."

**MULTI CITY IDS IN USE**

SC Gray Court WSSL 100.5 with Greenville.

**Selected AM Happenings**

CA Concord KRHT 1480 has been silent since Jan. 31, 1993, due to financial difficulties and loss of transmitter site. However, it is on the list to migrate to the expanded band and operate nondirectionally. This will mean it can find a new site, requiring far less land. The Commission found the delay in returning to the air "reasonable."

CA Fresno KEYQ 980 silent. Owner said to be seeking a party to broker its time.  
 FL Sarasota WQSA 1220 silent pending sale.  
 GA Atlanta WKHX 590 embraces Radio Disney. [See above, "Call Letters," under MN Golden Valley for more on this service to the 12-and-under crowd.] Other cities getting the service initially are Salt Lake City and Birmingham AL.  
 WGKA 1190 has been classical as a daytimer for 41 years. Part of that time there was a WGKA-FM 92.9. But for several weeks this fall WGKA carried University of South Carolina football on Saturdays "for revenue purposes." Can football and classical coexist? Atlanta Journal-Constitution reader Robert L. Brannon wrote in to express his disappointment. He tuned in to hear classical, "only to find the station carrying a football game."  
 GA Macon WNEX 1430 silent. Station claims its studio had been destroyed by fire and vandalized. FCC designates it for hearing regarding its silent status.  
 IN Gary WWCA 1270 off the air. It came on for about a week with black gospel and no announcing, "probably just enough to keep their license."  
 IA Anamosa KLEH 1290. Off air since Feb., 1995. Its call letters deleted.  
 ME Madawaska WSJR 1230, off since Mar. 7, 1994. FCC deletes the license and call letters. Not yet deleted is co-owned WLVC 1340 Fort Kent, also off air since 1994.  
 ME Portland WLOB 1310 had its property flooded out recently, turning its Christian programming over to WWMR 96.3 Rumford. WLOB "suffered significant damage during the recent floods. The flood waters engulfed the building, destroying much of the Warren Avenue broadcast facility." Although the "devastation was complete," the company promises its "full attention" in returning WLOB to the air.  
 MN Duluth KQDS 1490 back on the air after vandals attacked the transmitter site. "We were off about three months, but finally got it on Friday night [Nov. 22]. It's at about 1/10 power. Engineers are working on it. Thanks for telling us it's no longer listed in the local paper." KQDS along with KQDS-FM 94.9 given a permanent waiver of the rule to allow a merger with Fant Broadcasting, owner of KNLD (TV-21). A taller tower will be built for KQDS-FM-KNLD. Now KNLD is on the air only three hours a morning, 8-11, with home shopping.  
 MO St. Louis KSD 550 sold by EZ Communications for \$10 million. It paid \$15 million for it along with KSD-FM 93.7 in 1993. Buyer is Dorsey Group, which has been associated with the programming of WIBV 1260 Belleville IL. Much of WIBV's programming expected to move to KSD, according to the "M Street Journal."  
 NY Newburgh WGNV 1200 has filed a petition to the FCC to deny an upgrade to WKOX 1200 Framingham MA to go to 50 kw. "We conclude that WKOX should make some modifications in its proposal, with a possible change in transmitter site or a change in power." WGNV also pointed out that WKOX would be in a flood plain. WKOX was among stations involved in the CBS-Infinity purchase.  
 NC Fayetteville WFLB 1490 silent, but joining a combo with WAZZ 96.5 Laurinburg-WKML 95.7 Lumberton. It plans to return to the air this month.  
 SC Sumter WSSC \*1340 was news-talk. It goes religion, in an LMA with Sumter Baptist Temple.  
 TX Port Neches KUHD ("Under His Direction," Inc.) 1150 (Beaumont area). Has been silent since Aug. '94, and must show whether it has the capability and intent to return to the air. "Thanks for your time, and keep up the good work, as always," J.G., Toms River NJ.

**FM Rulemakings Proposed**

First date is for filing comments at the FCC; second date is for replies. Stations affected, if

any, are listed.

- CO Pueblo West (move from Pueblo) 104.C2, KYZX, Jan. 6, 21

- TX Brownfield 104.3C2 filing window mentioned last month was listed in error.
- TX Cut and Shoot 94.9A—dismissed Ben Walker Broadcasting's petition because of a short spacing to KYKR 95.1C1 Beaumont. However, once KYKR goes to its 128-m site, Walker can resubmit his proposal.
- WI Manitowoc 102.3A—affirmed move from Two Rivers for WQTC-FM where the channel is deleted.
- WI Two Rivers 98.9A, Dec. 30-Jan. 30

**WFUV 90.7 NY Given Green Light To Construct Tower**

After a costly two-year legal battle, the New York State Supreme Court ruled that WFUV has a right to complete construction of its 146 m tower on the Rose Hill campus of Fordham University in Bronx. The court ruled construction "as of right" part of the university's educational mission. It rejected pleas of the NY Botanical Garden, across the street from the new tower, which claimed the structure to be an eyesore.

Fordham President Joseph A. O'Hare commented, "All the appropriate New York city agencies have heard the arguments, reviewed the facts, and upheld Fordham's right to build this tower and continue operating WFUV as an integral part of the university and an important contribution to the people of New York. Now is the time to end the long confrontation between two great institutions. Both parties have much more critical challenges and demands upon their limited resources than is warranted by continuing this dispute." But the Botanical Garden isn't going away. It has appealed, and suggested Fordham build a tower less than half the height proposed, and disguise

that as a flagpole, which would be "just as effective."

Fordham says that will not do, and accuses garden officials of trying to influence the FCC not to allow for completion of the tower. Karl F. Lauby, a spokesperson for the garden, said the flagpole idea wasn't a stalling device. The garden, he said, has come up with several plans that meet the needs of both institutions. Several engineers had contributed to those plans. He questioned the real reason for building the tower, noting that its great height would allow for leasing to other broadcasters, making for financial gain.

Garden officials say the steel structure, even at its unfinished height, intrudes on huge swaths of pristine glens and flower beds on the 250-acre property, casting an especially ugly shadow over the conservatory, which is undergoing a \$25 million renovation. "This part of the Bronx is one of the most beautiful areas," Lauby said. "The tower has a jarring impact visually. It mars the garden and really

looms over the conservatory. The tower is a slap in the face to the Bronx. This tower would not be tolerated in Central Park or Prospect Park. It does not improve this part of the Bronx. It denigrates it and devastates it." The picture shows the partially completed tower looming over the conservatory across the street.

Fordham agreed to study other possible sites, but decided to stay with the original site. [See p. 4, FM Atlas-16 and FMedial issues dating before March, 1995, for more information on this subject.]

**Small Print Happenings and FM Industry News**

The note, above, "On Air," mentioning a mysterious tones and voice station on 101.3 in Toronto may have to do with the imminent starting of fulltime digital audio broadcasting there. Eight of Toronto's broadcasters announced plans to transmit from the downtown CN Tower some time in 1997. Once on the air, "EKA-147" services will signify the commercial launch of DAB in North America, according to James Careless, a writer for "Broadcast Technology" and "Radio World." Rogers Broadcasting, CHFI 98.1 and CHUM 104.5 are among the 18 CN Tower users who'll be participating, as well as some AM stations. Initial coverage will be 40 km. Carol and I had fun riding the CBC DAB van in Winnipeg in 1994. I don't believe the 1996 CAB convention in Edmonton last month offered anything new in the way of DAB demos.

In this country, they continue to beat the dead horse known as in-band on-channel digital audio broadcasting. USADR has supposedly gotten a new lease on life, obtaining increased funding from one of its sponsors, Westinghouse/Group W. Also involved is Gannett Broadcasting. Westinghouse expects that IBOC's coming about

will be challenging, and even its ability to deliver a robust data stream is in doubt. The maximum usable data rate for audio programming will only be 96 kb/s "with little or no overhead remaining for auxiliary data (as long as IBOC signals must coexist with analog FM broadcasts)." Broadcasters willing to test IBOC have been hard to come by. The NAB had to abandon such tests in Las Vegas, for example, when a host station could not be found. USADR is expected to work with the NAB and possibly AT&T/Lucient Technologies, the only other IBOC DAB proponent, in an effort to have more tests.

Alan Freed's "The Beat" 97.7 Minneapolis seems to be gone. A local rag "Main Street Traveler," said the end came at 4:45 p.m. Fri., Nov. 1 when it signed off in the middle of a segue as government goons swooped down on a clean-appearing Mr. Freed, taking into custody what appeared to be all his broadcast equipment. Freed called me after the report of last month and said the antenna had not been hanging or dangling outside the window of his apartment, but was mounted securely inside, pointed out a window. "There's no word about whether Freed would continue his battle in the court to either stay on the air, or retrieve his equipment." Broadcast thugs to protect the "public's airwaves"? One broadcaster who wished to be anonymous said about impounding Freed's equipment, "If the Fed's weren't going to do it, I was going to hire someone who would. When you operate without a license you're stealing the public's airwaves!"

Apparently picking up nationally on the "Beat" story is the National Association of Broadcasters. In "RadioWeek," it reported that the Federal Communications Commission is urging licensed stations to TIP. Not turn in poschers, but turn in pirates. Beverly Baker, chief of the FCC's compliance and information bureau, said at the recent NAB radio show that the FCC likes to act against such stations—when they know about them. But Baker said the FCC doesn't get a lot of complaints from broadcasters, adding that, "People are supposed to be licensed according to FCC rules and we'll proceed against them where we can, but it would help us if we heard more from you."

I have had my own problem with the FCC. Bob Greenberg is the main authority on SCS in the mass media bureau. He called and was concerned about a neighboring state wanting to buy 70 tunable 67 kHz radios from me. I told him that there is no other use of 67 kHz in the entire state, with Muzak having left the FM SCS airwaves in favor of direct satellite reception to the stores. My request to his boss, Roy Stewart, for a declaratory ruling to allow the sale of tunable SCS radios has been pending since mid-September. Stewart threw the matter back to Greenberg, who said he does not expect the FCC will allow the radios to be sold, even though ownership would be by the agency. People would have to return them if they move, or relatives return the radios if the person dies. Whereupon I asked Greenberg if I should be in jail. "I have no comment," he said. If the decision is against me and the tunable radios, I may do the following: 1) ask for reconsideration; 2) appeal the order; 3) ask for FCC rulemaking to allow for tunable SCS radios; 4) ask for reconsideration of the rulemaking request if it is turned down; 5) rephrase the rulemaking proposal; 6) work to get the Telecommunications Act and the Electronic Communications and Privacy Act of 1986 amended to provide for tunable SCS radios; 7) move to Canada; 8) be jailed. While all this is going on I merrily plan to provide SCS radios to agencies and others. This noble (?) plan may have to be put on hold, as I go for surgery to correct a valve in my heart in late January. Your prayers and concerns will be appreciated. It's possible a couple of FMedials will be combined. The 17th edition "FM Atlas" is well on the way to being ready and should be at the printers before I have the procedure taken care of. I feel fine, but the doctors have been pestering me to have the operation soon and to extend my life. It should

correct a heart murmur problem.

The National Federation of Community Broadcasters says that WGLS \*89.7 Glassboro NJ was hit by tragedy when its public affairs director Cindy Nannay was killed, the victim of an abusive relationship. Nannay was in a counseling program for domestic violence when her ex-boyfriend shot her outside the station. Friends at the college have set up a scholarship in her memory. Donations may be sent to the Cindy A. Nannay Scholarship Fund, 201 Molecka Hill Rd., Glassboro NJ 08028.

WBCL \*90.3 Fort Wayne, now in its 20th year, is for the fifth year in a row doing its Prison Fellowship Angel Tree. It is to help children of prisoners in IN, OH and MI. Volunteers will personally deliver gifts to the children, with only brand new toys and clothing accepted. "Our listeners donated over 6000 gifts last year," said Terry Foss, WBCL's director of outreach ministries. This year they've added a new collection site in Marion IN.

It is not just me that is waiting for an FCC declaratory ruling. The consulting firm of Hammett & Edison filed a paper with the Commission about FCC station application Form 301. The issue concerns Sec. 73.315b of the rules, which states that an FM station must have a clear line-of-sight path from its transmitter to its city of license. The petition points out three rather blatant instances in which the applicants say they have a clear line-of-sight path when H&E's evaluations indicate they do not. The petitioner claims that any such applicants answering "yes" to Question 11, Form 301 are filing falsified documents. Nevertheless, even when confronted with such evidence, the Commission has sided with the applicants, saying such complaints should come earlier in the process--at the construction permit stage.

H&E thus claims the FCC's refusal to consider later objections to applications--probably in contested cases where there would have been a hearing or a settlement agreement reached--encourages stations to answer Question 11 falsely. The Commission will not verify whether or not an affirmative answer to that question is true. The petition was filed Oct. 7, 1996, and has not received any response from the FCC, according to a story in "BE Radio."

On the heels of last month's lead article is word that Mancow Muller, on WRXC 103.5 Chicago, is heading toward some kind of showdown with the FCC. One complaint is about his broadcasting a hoax and two complaints are for indecency. Evergreen Media owns WRXC, as well as WLUP 97.9. Evergreen paid \$10,000 in 1994 because of complaints against former WLUP hosts Steve Dahl, Garry Meier and Kevin Matthews.

Mancow Muller

The hoax allegation stemmed from a broadcast last May in which a caller claimed a bomb was planted in Lincoln Park. Chicago police responded. They found nothing. Then they filed a complaint with the FCC. FCC regulations forbid broadcasting false information that may cause public harm or divert law enforcement people from their duties.

Norman Goldstein, chief of the mass media bureau's complaints branch, confirmed that two other complaints against Muller were under review by the Commission. Both allege indecency. Mike Fowler, vp and gm, WRXC, said he knew only of the hoax complaint.

USA Radio has a 30-minute show, "A Way to the Manger" for use during this season. It looks at Christmas through the eyes of eight children struggling to reach the stable the night Jesus is born. For info call Steve Davis at 1-800-829-8111.

The Justice Department approved the merger of Westinghouse and Infinity. Only two radio

stations will have to be spun off--WBOS 92.9 Brookline-Boston MA and WMMR 93.3 Philly. Having done that, the combined owner will have about 40 percent of each market's radio revenue. The FCC has yet to approve the deal. The new group will own 77 stations in 13 major markets.

Emmis Broadcasting, owner of KSHE 94.7 Crestwood MO, moves across the river, buying up WKQB-FM 104.1 Jerseyville IL and WKKX 106.5 Granite City IL plus an AM. WBUC-FM 101.3 Buckhannon and WVUC 93.1 Barrackville WV bought by McGraw Communications for \$1.3 million; it already owns WBTQ 93.5 Buckhannon and WELK 94.7 Elkins. WCHZ 95.1 Harlem GA sells for \$1.2 million to the owners of WGOR 93.9 Martinez, WAJY 102.7 New Ellenton SC and WGAC AM Augusta.

Your NAB dues at work. The NAB and RAB have teamed to educate the U.S. Department of Justice on issues related to the new Telecom Act. NAB Praxey Eddie Fritts convened a meeting with anti-trust attorneys of 21 major radio groups to discuss the matter, then met with Joel Klein. He's the assistant attorney general in charge of anti-trust matters. The NAB must have been persuasive. Fritts said Klein is "genuinely interested in our concerns [and] indicated he wanted to work with the NAB and the industry."

However, Deputy Asst. Attorney General Lawrence Fullerton said the DOJ is taking a close look at LMAs leading to sales. Fullerton said the DOJ wants to "stop practices we believe prematurely transfer beneficial ownership [and] not to punish those who may have engaged in those practices before learning of the [government's] position." NAB advises any station considering an LMA to consult antitrust counsel.

WSDM-FM 97.7-AM Brazil-Terre Haute IN should be back on the air by now. It and the AM were hit by fire, which destroyed the building containing studios and transmitter. An intruder, who was later arrested, was discovered about 5 a.m. The FM hoped to be on the air by now from temporary studios in Terre Haute. A new transmitter had been ordered. The AM will return "somewhat later." Owner Equity One recently agreed to buy WJSH 1300 AM Terre Haute, "which is currently off the air but their studio contains much of the equipment necessary to broadcast as a temporary site," reports the "M Street Journal."

When I was in New York in 1978 I heard hard liquor advertising on WQXR-FM 96.3. Now the Distilled Spirits Council of the U.S. announced it is lifting its voluntary ban on hard liquor advertising on radio and TV. The council cited loss of market share to beer and wine as a reason for dropping the ban, and has drawn up guidelines for placing the ads. The NAB said "over the years, individual stations have adopted their own standards regarding the acceptability of hard liquor advertising. NAB believes this process has served American consumers well, since individual stations make, and will continue to make, judgments every day on what is most appropriate for their local audiences." Reminds me about when the NAB had a code of good practices, and the Code disallowed personal products advertising, such as Preparation H. Ah, we've come a long way, baby!

Hey, do I list it on the air or off air? WDBS 102.1 Bolingbroke (Macon) GA is one of those on-again, off-again situations. Once before the FCC considered it deleted. Only to have it rise up and begin broadcasting. As it supposedly is doing right now. Joseph Kendrick is accused of not filing an application for review of his cancelled CP. Originally, he did not construct on time. When he did, it was after his CP had expired. The FCC ordered WDBS to cease operation. I'll wait and see if it actually goes off the air before de-listing it.

KTFM 102.7 San Antonio hit with a \$7500 fine for airing Prince's "Erotic City" unedited in afternoon drive. Also fined--KFMS 101.9-AM Las Vegas' former licensee Broadcast Associates, Inc. \$15,000 for EEO violations. Fine was

originally \$25,000. WINL 98.5 Linden AL was hit with an \$8000 EEO fine.

A young person came here with a tape made at 2 a.m. of KEGE 93.7 Minneapolis, supposedly containing all the bad songs and words therein. I had no interest in listening, and probably couldn't hear them anyway. But I fear for the youth who do.

Make FM off limits to children? Or force only public or Christian stations down their throats? It only gets worse as you read on.

Some of the songs youth have to endure, when listening to popular FM stations, include the following heard on WJMN 94.5, and listed in the "Boston Globe." At 8:02 a.m. on a Wednesday there was a moan-filled ode by a lusty pair of female vocalists who produced, "Do you mind if I stroke you? Don't mind. Do you mind if I stroke you down? Don't mind. All through the night Until your body's high. Get it up, ooh that's what I want to do. Make it come in. Does it feel good? C'mon. Up and down, up and down. Oh yes. . ." From "Stroke You Up" by Changing Faces, Big Beat Records, Inc.

Andrew Avorn, a fifth grader and listener to "Jam'n," concedes he does not understand why the people in such songs moan. But 13-year-old Kerry White does. She "adores" Jam'n. She likes the intricacies of the rhythm, blues and rap, and says she knows "Stroke It Up." Asked what was getting stroked, "the talkative teenager blushed, then fell silent."

At 8:08 a.m.: "Any way you want it, girl, Let's spend an hour in the shower When it's nice and wet. Ready for your love. . . I like it. Any way you want it, girl Hit me off. Come hit me with the flavor Let me taste it baby." From "Hit Me Off," New Edition, MCA Records, Inc.

"In the 1950s, Frank Sinatra crooned; in the 1960s, Elvis grinded his hips and the Kingsmen topped the charts with the reputedly filthy but unintelligible 'Louie Louie'. And Marvin Gaye's 'Sexual Healing' and some disco songs spared few details in the 1980s. The difference between then and now is the explicitness and frequency with which the popular culture today glorifies sex." Dr. Alvin Poussaint, a child psychiatrist at Harvard Medical school, said, "There's no message of responsibility or abstinence. Children are being exploited and we have no idea where that's going to leave the next generation."

8:25 a.m.: "I can imagine you Touching my private parts With just the thought of you I can't help but touch myself. . . Moonlight, with you there beside me All night doin' it again and again. The very thought of you Makes me want to get undressed," from "You're Makin' Me High," Toni Braxton, Arista Records, Inc. It thus behooves parents to know what their children are listening to and to set limits, Poussaint declared.

Ron Della Chiesa's "MusicAmerica" was canned by WGBH \*89.7 Boston last year. Now it has a home on WPLM-FM 99.1 Plymouth Saturday nights starting Jan. 4. But Ron remains on WGBH for weekday "Classics in the Morning." A group has formed, "Save MusicAmerica," which objects to his show being on only one night a week, and on a different station. It sent out a newsletter stating, "WGBH is hurting!" It points out that the fundraising goal for Ron's morning show was 195 callers and \$11,700; he only heard from 122 callers pledging \$8,946! The goal for the afternoon classical show: "140 callers and \$8,200; the result was only 110 callers with \$5791. . . Add it up: 'GBH heard from only 69 percent of the listeners it sought, and their pledges met only 75 percent of the goal. . . 'GBH's daytime programming is failing to meet even management's modest expectations. There's an important lesson here: even 'professionals' make mistakes and, yes, even 'professionals' either don't know or are too embarrassed to get out of a mess of their own making." It goes on to reveal that Ron's morning show is now taped. "Yup, here's a station management with the chutzpah to give us a canned host for a morning show featuring news, weather, and traffic. The

radio professionals we've consulted tell us that it is unprecedented for a 100,000 watt morning show like this one." [It looks like that morning show has power—100,000 watts of it!] Save MusicAmerica can be reached at 63 Hillside Ave., Melrose MA 02167; (617) 662-0853.

Interesting perhaps to DAB or SCS fans is a new integrated circuit from Temic Telefunken Microelectronic GmbH, Heilbronn, Germany. It's said to be the first complete chip to support the broadcast of digital audio data over radio transmitters. It uses error correction to handle audio, text and even video digitally through a standard antenna. At Electronica 96 in Munich, Temic showed an RF front end, a channel decoder, and a source decoder, which, when combined, form a complete digital audio broadcasting circuit.

A U.S. Army study found 140 confirmed cases since 1959 where communications towers have failed due to icing conditions. Of these, more than half (74) were TV or FM towers and only 9 were AM towers. The study found that all but two tower failures were east of the Rocky Mountains and two-thirds were north of 37° north latitude. The costliest tower failure in the study was in December, 1989, when two 610-m towers in Raleigh NC collapsed within one hour of each other. The collapses cost the insurance company \$18 million. Losses also occur when ice falls from the towers or guy wires. Ice usually lands within a radius of one-half the tower's height. Information from the study conducted by Nathan Mulherin, a research physicist at the Army's Cold Regions Research and Engineering Laboratory in Hanover NH, was made available by the NAB.

Broadcast station prices could rise even more, under a proposal by the FCC to allow common ownership of a VHF and an UHF station in the same market, or two UHF's, as well as one or more FM and AM stations.

Station totals as of Oct. 31: FM, 92,1-107.9, 5398 on air and licensed; 1854 88.1-91.9. That compares to an AM total of 4864.

From the classifieds: General manager for KRSQ 101.7 Laurel MT. It is a commercial, nonprofit station, receiving income from both sales and donor support. Resume with cover letter to Mark Plulmer, Bethesda Christian Broadcasting, 1465 Kelly Johnson Blvd., Ste. 200, Colorado Springs CO 80917. EOE.

"I was able to sell the Pioneer TX 850011 tuner. . . The buyer saw your listing. I still have the Sony ICF2002 available." See last month, p. 8, col. 2. Don Meno, (800) 365-9888, Ext. 262.

## FM FORUM

### COMMENTS FROM READERS

*[Continuing with comments about FM reception and digital audio broadcasting in England by Brenda Maddox, in the "Times of London":]*

*Even the Department of Trade and Industry, whose enthusiasm for DAB is second only to the BBC's, acknowledges the snag. To provide any new national radio networks with digital transmission will require the replacement of all transmitters and, unless these are converted, of all radio sets. And when the DTI admits to doubts, you'd better have doubts yourself.*

Doug Vernier sent a blurb about his FM frequency-finding software, which includes SEARCHFM, now with the ability to use a computer mouse with an allocation map. It can often identify new drop-ins within 150 km from the search site. It allows a series of "what-ifs." Upgrade or downgrade the class, change the channel or the site coordinates of any station you come across. It comes with the latest FCC data base, but subscribing to monthly updates can be expensive, I know. For info, 1-800-743-DOUG, or % 1600 Picturesque Dr., Cedar Falls IA 50613.

Bob Gilbert sent a story about WAVX 106.9 Thomaston ME making "high brow" music popular. It is simulcast on 101.7

Searsport, WBVA. Of 50 commercial classical music stations nationwide, four are in Maine. Ad sales are up, with most advertising coming from small businesses, such as art and gift galleries or bookstores. When it first started some listeners thought it was noncommercial and sent donations. As a way to use such funds, it created a "Conductors Club," entitling donors to a quarterly newsletter and invitations to members-only events. There is also a small amount of show-tunes' broadcasting amidst the classical.

A mystery reporter in NY state writes: "I enjoyed the DX sections in the June and July FMedia's but you still didn't print that I heard KNTU 88.1 Denton TX and KGLY 91.3 Tyler TX around 3:30 p.m. EDT May 31—the same day your eastern MD reporter heard TX. The 'More FM' I heard from 'City 2000' on 94.9 was definitely not in Bermuda. It came in very clear and they mentioned the Bahamas several times. That was Cable Beach in the commercial, not 'Caue'. Wish I could find out how many watts they have! . . .

"WCWP 88.1 Brookville NY doesn't belong on the NYC FM Dial list in the Atlas. When you first included it, it might have belonged there, but in those days there was no WARY 88.1 Valhalla NY, no WYGG 88.1 Asbury Park NJ, and WMNR 88.1 Monroe CT was a much weaker station than it is. Besides, WBGO 88.3 Newark NJ is stronger than it used to be, making it harder to get anything on 88.1." [The NY Times lists WCWP as the only 88.1 station, and I recall getting WCWP's program guide for many years mentioning NYC coverage, and having heard WCWP clearly in Queens in the mid-60s on a not very sensitive radio. This person thinks that WJLK 94.3 Asbury Park NJ should be on the NYC Dial list. "It's strong in all the boroughs except the Bronx!" Then, I might ask, why not WMJC 94.3 Smithtown?]

Besides my FM DX article being on the World Wide Web (see above, p. 4, col. 3), "I've seen FM Atlas mentioned on the Internet at 'rec.radio.shortwave (AM/FM DXing)' by Scott Fybus and Earl Higgins, and the info is outdated; the Atlas price is given as \$10.95. I did find some SCStuff on the Web, including 'The History of Muzak'. Also an FM SCA info site by Chris Smolinski, who says the best SCA sound can be obtained by using a shortwave radio that tunes below 100 kHz and can demodulate FM. URL is <http://www.access.digex.net/caps/sca.html>. FCC SCA info at <http://www.fcc.gov/mmb/asd/subcarriers/sub.html>. . . Among the stuff in this Website: 'The broadcast licensee not the subcarrier user must retain control of the programming with the right to reject any material it deems inappropriate, undesirable or illegal! See 47 C.F.R. Sect. 295(e). . . Tunable subcarrier receivers are prohibited. The courts have determined that [they] violate the Communications Act since subcarrier transmissions are not intended for the general public. See KMLA Broadcasting Corp. and Musicast, Inc. v. 20th Century Cigarette Vendors Corp. 264 LF Supp. 35 (D California 1967).' It also says stations with subcarriers can legally increase their total modulation up to 110%

maximum. . . A new product, Real Audio version 3.0 makes it possible to hear stereo over the Internet. Info at <http://www.real-audio.com>."

Louis J. Sicilia: "I wish to correct the remarks of John Hadden concerning WKTU 103.5 Lake Success-New York, which appeared in the September FMedia! [p. 5, col. 3]. Actually, it all began with WGLI-FM (duplicating WGLI) which began broadcasting in 1958 from Babylon NY (55 km east of NYC). The station was purchased by Friendly Frost in 1961, relocated to Fresh Meadows, Queens, and changed call letters to WTFM. It was the first full-time FM stereo station in the New York area. Lake Success was chosen as its city of license, with its studios and transmitter located in Fresh Meadows section of Queens. Nothing was ever located in Lake Success. FCC regulations prohibited them from using New York as its city of license.

"Transmitter was moved to the Chrysler Building in midtown Manhattan in 1966 and moved again to the World Trade Center, Tower 2 in 1978. Ownership went to Doubleday in 1982 and call letters became WAPP. Emmis purchased the station in 1986 and changed call letters to WQHT. Westwood One became the new owner as the result of a swap of stations, with WYNY's country format and call letters moving from 97.1 to 103.5. This took place September 22, 1988.

"It is a bit ironic that, with its city of license being a community about 23 km east of Manhattan on Long Island, the station moved its studios across the river to New Jersey in 1994 (Newport Centre Tower, 525 Washington Blvd., 16th Floor, Jersey City NJ 07310); directly across the river from the World Trade Center."

Tom Rothrock of Hagerstown had another DX catch. Aug. 22 at 7:36 a.m. EDT he received CHAY-FM 93.1 Barrie ON, playing music, announcing the winner of a sports trivia contest and after 8 going into provincial news. The last time he received Canada it was also 93.1. In Aug. 1989 he heard CFNO Marathon ON, probably by skip.

Jim Duncan's getting into FMapping. His "Facilities of American Radio," 1996-97 edition, has over 1300 station coverage maps. They were researched at the FCC by J. T. Anderton. Covers markets 1 to 100. Shows stations' 70 and 60 dBu contours, "same scale throughout the book, allowing instant signal comparison. Transmitter locations—not just coordinates, but actual street and highway addresses. One copy \$335 from Duncan's American Radio, PO Box 8446, Cincinnati OH 45208-0446; (513) 731-1800. An expensive substitute for the "FM Atlas"?

Glenn Hauser sent schedules for his "World of Radio" shortwave programs. He also publishes, on paper, "Review of International Broadcasting" and "DX Listening Digest." These mostly cover shortwave radio. Sample copies \$2.50 in North America, or get a ten issue subscription for either publication at \$26 from Hauser at PO Box 1684, Enid OK 75702. He offers a lot of information for the money for the radio-hungry enthusiast.

- SL San Luis Potosi \*88.1 Radio Universidad 93.7 "Super 94"

### Call Letters Assigned

- AL Birmingham 94.5 WYSF (from WMXQ), "Soft Rock 94.5"
- AZ Prescott \*89.3 KPUB
- CA Bakersfield 96.5 KSMJ (KHIS-FM), j, "Smooth Jazz"
- 107.1 KCWR (KTIE), still k, Real Country 107.9 KUZZ-FM (KUZZ)
- CA San Diego 94.1 KXGL (KFSD), o, "The Eagle." Classical format moves to 92.1 (see below, "Formats").
- CA Stockton \*89.5 KJON (KSJC)
- CO Estes Park 102.1 KEZZ
- FL Port St. Joe 93.5 WEBZ (WOWW), m, parallel to WDIZ 590 AM Panama City; "The Breeze." Not on "93." as shown Dec., p. 1, col. 2.
- FL Tampa WU:KS (WUSA-FM), still "Kiss 100.7." No longer being simulcast by WDAE 1250. Latter now sports, "Sports Animal."
- FL Trenton WLUS-FM (WDJY); AM is in Gainesville.
- GA Clayton 104.1 WRBN (from WRBN"-FM" and before that WQXJ)
- GA Toccoa 106.1 WSTE, k, "South 106." Drops its 111 SCS; adds 1, U [telemetry] 92 kHz.
- ID Mountain Home 99.1 KTPZ (KLVJ-FM)
- IN Bremen 96.9 WHPZ (WYEZ), gr
- IN Charlestown 104.3 WLVS
- KS Wichita \*90.7 KZZD (KIBN), gr
- KY Russellville 101.1 WJZC (WJCE-FM), j, "Jazz" non ID. Rumors had it WJCE AM 680 Memphis had changed, "but in fact it's the FM that's affected. Transmitter is in eastern Robertson County TN, and the station seems to put a city-grade signal into Nashville. It's LMAJ by WLAC 1510, WLAC-FM 105.9."
- ME Pittsfield \*99.5 WJCX (WPBC), noncommercial, g, relaying KAWZ 89.9 Twin Falls ID.
- MI Marshall 104.9 WWKN (WRCC), o, "Keener 104.9"
- MI Le Roy Township \*88.1 WLGH
- MI Oscoda 95.7 WCMV"-FM"
- MI Pentwater 103.1 WMOM
- MO Bethany 95.5 KAAAN"-FM" (KAAN-FM; AM gets new calls)

MO Joplin 102.5 KIXQ (KJKT), still k, now "Kicks 102.5"

MO Kirksville \*90.7 KHGN

MO Lebanon 103.7 KJEL (KIRK)

MO Webb City 93.9 KJMK (KIXQ), rm; its calls and format move to 102.5 Joplin.

MT Butte 95.5 KMBR (KQUY), op

MTEast Helena 104.1 KHKR-FM (KHKR-FM; AM gets new calls)

NJ Cape May \*89.1 WWCJ, to replace the nearby 89.1 translator "within two years." WWNJ \*91.1 Dover Township expects soon to get a construction permit to increase to 50000 watts. WWFM \*89.1 Trenton picks up its first affiliate by satellite—an unnamed translator in Steamboat Springs CO, owned by Western Slope FM. A second translator in CO may also so affiliate.

NY New York 105.1 WDBZ (WMXV), "The Buzz." In other local news, program director Steve Young left WNEW, fueling speculation on what's next for 102.7, which finished 22nd in the last Arbitron. Mel Karmazin becomes the station's boss with the Westinghouse/CBS merger now approved. Some say WRGX Briarcliff Manor/WZVU Long Branch NJ and WWHB Hampton Bays NY, all 107.1, "sped up their switch to country in case 'NEW had been thinking of going to that format." See below, "Formats."

NY Rotterdam WTRY-FM (WYSR), o, '60s-'70s. It drops Imus and splits from WTRY AM in the morning to do its own oldies. SFX Broadcasting paid \$1 million for the 98.3 outlet. SFX owns 78 radio stations in 23 markets, including WGNA-FM 107.7-WPYX 106.5. [-FM], now "CIZ"

NY Watertown 93.5 WCIZ-FM (WTNY-/ 97.5 WFRY (WCIZ-FM), k, "Fry Radio, sizzlin' music of the North Country." Apparently, trying to keep some of the CIZzle from escaping to 93.5.

NC Asheville 99.7 WZAX

NC Old Fort 104.3 WMXF (WDLF), "Mix 104"

NC Pinetops 95.5 WEQQ (WWRT), r, parallel to WEQR 102.3 Goldsboro

NC Thomasville 98.3 WLAM-FM (WFAZ); AM is in Columbus GA.

OH Athens 95.9 WJKW

OH Circleville 107.1 WAZU, p, "hard rock," now "The Big Wazoo." [ex-WAHC] Country 105"

OH Marysville 105.7 WHQK (WAKS), k, "Kix/ OH Upper Arlington 98.9 WZAZ (WLLD), pr, "Channel Z"—all three of these in the Columbus area owned by Jacor. "I don't know if they all ID with Columbus, and we don't have artwork ready for the call changes we've applied for."

OR Corvallis 106.1 KLOO-FM (KFAT), o, "Oldies 106," but used with call letters. "Switched at midnight on Christmas."

OR Seaside 98.1 KCYS (KULU), k. Frequency should have read 98.1, not 98.9, Nov. '95, p. 1, col. 2.

OK Ardmore 98.5 (move from 96.5) KACO (from KRXZ), k, returns to air.

PA Harrisburg 94.9 WRBT (WYMJ), k, "Bob 94.9"

PA McConnellsburg 103.7 WIYQ

SC Bluffton 106.9 WIJY (WLOW), j, smooth jazz, "Joy 106.9."

SC Hilton Head Island 107.9 WLOW (WIJY), m. "WIJY and WLOW trade dial positions."

TN Crossville 102.5 WOWF (WSWJ), k, "Wow FM" [AM is in Chattanooga.]

TN Soddy-Daisy 102.3 WGOV-FM (WFXS);/ TX Arlington 94.9 KDFX (KEWS), g, \$. Moving from 1190 AM.

TX Franklin 101.9 KZTR (KLTR), still op

TX Haltom City 93.3 (KNBR-FM), Stereo, pr, "93-3 The Zone" (strict), ID with Dallas-Fort Worth. [See "Deletions," TX Dallas.]

TX Lampasas 98.9 KJFK (KUTZ), t, sports, mono, remove \$ listing.

TX San Antonio 107.5 KXTN-FM (KXTN-FM; AM gets new calls).

WA Dayton 102.3 KZZM

WA Moses Lake \*91.5 KLWS

WA Naches 96.9 KZTA (KHHK), "La Zeta"

WA Yakima 99.7 KHHK (KZTA), "The Hawk"

WV Fisher 103.7 WQWV (WJBQ)

WI Madison \*102.5 WNWC-FM (WNWC); AM is in Sun Prairie [pr, "The Buzz"]

WI Trumpeleau 105.5 WFBZ (WKBH-FM);/ WI West Salem 100.1 WKBH-FM (WQJY), still op, ABC's classic rock.

are a commercial station, even though affili-  
ated with Toccoa Falls College," getting a  
network feed from WRAF \*90.9 in GA.  
"We will be adding a Crown 2000 watt  
amplifier, and staying all horizontal. When we  
put the station in, we had to generate our own  
power. It was more efficient to be just  
horizontal. Your efficiency goes down real  
fast with circular. I know we're missing some  
valleys by not being circular. I run this station  
myself from a shack on the top of a hill where  
I live. We billed (grossed) only \$23,000 last  
year. I can't afford any newsletters, especially  
after spending \$2000 for EAS equipment.  
We're the only broadcaster in these parts to  
do so. Even the state of WV has no plan. My  
wife divorced me because she didn't like the  
radio business, plus she ran off with another  
man": J. W. A., owner and engineer.

They have more ads for Catskill-area businesses than previously, but their main focus is still NJ, with frequent reminders that they're broadcasting from Bergen County NJ, the birthplace of FM radio."  
 NJ Long Branch WZVU 107.1 k, "Y-107." See below, NY Briarcliff Manor. Sold for \$12 million.  
 NJ Newton WNNJ-FM 103.7 o, classic hits from the '70s. New owner Princeton-based Nassau Broadcasting Partners targets a different audience. AM WADB 1310 Asbury Park takes on the croonings of 81-year-old Frank Sinatra and other adult standards, from country. "All the counties we service are very wealthy, and they're an advertiser's dream," said Dan Henrickson, an executive with Nassau. Christian radio may be doomed at WCHR 94.5 Trenton, which Nassau is also buying. Company says its buying spree across NJ is complete, with only fine tuning remaining for the stations it has acquired.  
 NM Clovis KSMX 107.5 r  
 NY Briarcliff Manor WRGX 107.1 k, "Y-107, and simulcast on WWHB 107.1 Hampton Bays NY. No longer IDs with White Plains.

Call letters expected to change. Buying the three stations (including WZVU) for \$20

million is Odyssey Communications. It is estimated that 85 percent of NYC can receive one or the other pretty well, but the Daily News says in some areas the signals compete with each other and the stations may apply for power increases." Odyssey also owns the three "Y-107" stations on 107.1 in the Los Angeles area. "We are negotiating with Arbitron for call letters which will be good for reporting in diaries, so can't tell you what we might be seeking. We are using the old call letters on the hour." Dave Letterman, it seems, enjoyed WRGX, his favorite rock station, but when the format changed, Dave said he was "too lazy to change the presets," and is now "addicted to that country music," according to a pr blurb FAXed from the trilmaster.

NY Copenhagen WWLF 106.7 o, '70s, '80s with local DJs, "The Edge" (from "Z-Rock").

NY East Hampton WEHM 96.7 rj, with classic rock days, jazz at night. Sold by singer Billy Joel and partner Wall Street banker Frederic Seagal.

NY Hampton Bays WWHB 107.1 k, "Y-107," facing country competition from WLIE 102.5 Bridgehampton. WWHB has been owned by singer Paul Simon, his brother Eddie, and Saturday Night Live producer Lorne Michaels. They expect to get \$6 million for WWHB, which had been simulcasting WNEW 102.7 New York for the past six years. WNEW's owner, Group W, wanted out of the simulcasting contract, which had four years to go. A local resident, Tom Clavin, said, "We'll have to go cold turkey without our WNEW. We'll miss it." WWHB collected \$400,000 a year from Group W for simulcasting WNEW.

NY New York WNEW 102.7 op, uses calls, saying "102.7" followed by the call letters. "Format now 'classic rock', a term that's fast becoming meaningless. They play hard rock from the '60s to the '70s and also some new songs. Their main competitor, WAXQ 104.3, plays mainly late '60s to mid '70s stuff. WNEW hired some of the DJs fired a year ago by WXRK 92.3, including Pete Fornatale, Dave Herman and Vin Scelsa. Programming VP Mark Chernoff said, "We know we're never going to get the sheer numbers of a WKTU or Hot 97. But we can do very well as long as we get listeners 25-54." Last December it had a "WNEW-FM (sic) Classic 500" rock'n'roll songs of all time. Also heard on WNEW: Dennis Elsas from 7 to 10 p.m. and Carol Miller 10 a.m. to 1 p.m., as well as Pat St. John, moving from mornings to afternoons, 4 to 7.

NY Ravenna WABY 94.5 increases to 24 hours a day, adding midnight to 5 a.m., with a commercial-free format. This in wake of nearby WTRY-FM 98.3 expanding (see "Call Letters," above).

On Air-Real Stations and Pirates (Selected)

AL Athens W261CL 100.1 and AL Madison W278A.A 103.5, but on primary WPZM they're read as "W268CL" and "W271AA."  
 CA Weed K'NHO 102.3, but kicked off its tower by the Forest Service. At a new, temporary low location downtown.  
 CT Bloomfield—here's proof pirates come with every format. "Hartford's Praise FM" is "WPRZ" with a fulltime format on 105.3, "quasi-erec." "They are apparently broadcasting from a business complex in Bloomfield CT with a two-bay antenna on the roof. Rumored power output is 60 watts. "Evidently the creator of 'Praise FM' feels he is immune from FCC judging from the frenzy of Internet controversy on unlicensed operations, as they are out on force selling time! Local urban format 500-watt daytimer WKND AM, serving the same communities and demo, is outraged—not over the existence of 'Praise FM' but that they are directly and unfairly competing with WKND." Range is 10-15 km, due to the rather low antenna height. "I traced them down and warned the operator of the consequences, but he said that he was aware of the rules. Please don't print my name."  
 FL Parker-Panama City WPBH 94.5, "Beach 94.5." It started out as a Class A on 93.5 from Port St. Joe (rim-shot Panama City) and is now a Class C from a Panama City suburb."  
 KY Paducah WGCN \*89.3, g.  
 ME Bar Harbor WMDI 107.7 still o, with high school sports, but speculation is that's about to change in wake of imminent sale. It has fired g.m. Mark Kanter, "who was also an on-air personality and the station's jazz and blues coordinator." Station has been losing money the past two years. "We're not at break-even, but we're only a couple of months away from that point." Richard Bush owns 72 percent, but the Kanter group only owns 20 percent. They allege Bush can't sell it without their approval. Prospective buyer is R. Scott Hogg of Athens GA, who has agreed to pay \$140,000 with an LMA for \$4000 to allow Hogg to operate the station in the interim. Hogg is optimistic: "I have a legal document signed by Richard stating he's sold me the station. We may need to have a judge determine who's the owner and who's not, and I'd hate to have it come to that."

ME Boothbay Harbor WCME 96.7 still simulcasts WXGL 95.5 Topsham. "A lot of overlap of the signal and they are not using an STL to get WCME. I think they are just picking the signal off the air 'cause it sounds almost mono and fidelity is terrible."  
 ME Lewiston WTHH 107.5 now on with 91000 h,v; 283 m, tower in Poland ME.  
 MI Adrian—"Radio Free Lenawee" 97.7 is run by Pastor Rick Strawcutter of the Church of the Lord Jesus Christ. The church sits behind

Radio Free Lenawee  
**97.7 fm**

**MADE AMERICA**  
**LET'S KEEP**  
**ALL THREE**

"no trespassing" signs. The station's on 24 hours a day, with a 30-m tower and gets out 16 to 24 km. "The fact that the FCC won't approve it won't stop me," he said. "This is the Rosa Parks of radio."

MN St. Louis Park KDXL \*106.5—well, sort of on. Transmitter was on, but "has a hum in it. They mostly just had a carrier on, but did some hard rock programs for a day or two."  
 MN Worthington KWOA-FM 95.1 after tower fell, but with only a one-bay antenna atop a telephone pole. Very low power, serving city and about a 32-km radius. Many days of icing led to the tower collapse. Since power was off in the area, a standby generator was used 41 consecutive hours. Jim Wychor, former manager, said the original tower stood on the Buffalo Ridge, a glacial moraine prone to winds and icing. It forms the border for watersheds to the Missouri and Mississippi Rivers. Wychor had been head of the MN Broadcasters Association, but has retired and becomes a consultant to the group. Jim du Bois is the new president/CEO as of Jan. 1. One of Wychor's projects is to write a history of all MN stations for the 50th anniversary MBA convention in 1999. A special feature of the MBA winter conference and telecommunications expo Jan. 27-28 at the Radisson South Hotel, Bloomington MN, is an FM transmitter school to be led by Dave Chonoweth, Continental Electronics. He's worked with transmitters since 1958, and has been with Continental after it purchased Collins Radio in 1980. Collins was a long-time Cedar Rapids IA manufacturing company.  
 NY Brighton Beach—a pirate playing continuous dance music. "Sounds pretty good": New York Daily News.  
 OR Eugene KRVM \*91.9, one of the most active high school stations in the nation. It claims to be the oldest high school FM station in the

Pacific Northwest on its website: www.krvm.com. KRVM is on 5:30 to 2 a.m. weekdays; from 7 a.m. weekends, with sign off Sunday morning (Sat. night) 5 a.m.  
 OR Portland 88.7 mono. "Heard very well in downtown Portland," with electronic, am-

bient and techno music 24 hours a day, with no talking. Also has some "jazz and hip-hop, but could try a little rock to add some variety. Still, you might not hear Tricky on any other station."  
 102.7 "FM Stereo 102" from the Troutdale neighborhood, east side of town. Must be a guy in his 40s or 50s, as the music is mellow, some jazz, some Christmas. Heard up to 4 km away, on irregularly.  
 PA Mifflinburg WWBE 98.3 has its new antenna on a hilltop owned by Merle Corbin. "A lifelong friend of the Voice of Prophecy ministry, Corbin agreed to lease the site, provided the station agreed to air the broadcast every Sunday morning. The station's signal reaches a potential audience of many thousands along the Susquehanna River."  
 TN Cookeville WHRS \*91.7 (see "Stereo," above). It is 100% owned by the Metro Nashville Public Library, "but they're trying to spin it off to an independent nonprofit organization."  
 TN Donelson WAMB-FM1 106.7 is still on, not yet displaced by WNPL Mount Juliet TN. "There's nothing locally to suggest its debut is imminent."  
 VT Lynden WGMT 98.3, not yet on 97.7. "Of course now Burke Mountain is covered in snow, so installing a new antenna could be difficult, not to mention dangerous."  
 WI Baraboo-Madison WOLX 94.9—but at lower power from an 18-m tower after eight days of ice buildup caused their historic 199-m tower to fall, narrowly missing the residence of a nearby family. Was off air "for a few days," then came on at only 40% of power. This is the former pioneer FM station WWCF, which used to have an engineer with a raspy voice give the IDs: "WWCF high atop the Baraboo Wisconsin bluffs, in Greenfield Township, in the heart of Wisconsin's vacationland, transmitting from the tallest FM antenna in the State of Wisconsin." It carried "The Old Timer's Jamboree," with polka music in the evenings, getting requests from as far away as the Quad Cities in the late '40s and early '50s.  
 ENGLAND—a new station will broadcast Muslim prayers five times a day; silent otherwise. "The imam wants us to supply single channel receivers, and we don't know of any sources of supply now that FixTune Electronics' J.H. Bergman is retired." SCS was suggested, but the idea rejected by the imam.

**Off Air—Or Not Yet On**

GA Bolingbroke WDBS 102.1—remove format, \$tars status. Competitor found it built after construction permit expired, forcing FCC to order it off the air. But who knows? Maybe they'll again try, even without FCC license.  
 GA Conyers W263AA \*100.5. "Olympics-related construction on Stone Mountain forced an antenna move to a location that no longer provided reliable reception of the primary; at times it relayed the wrong station (WMSL \*88.9 Athens GA). WMBW is now investigating a direct Ku-band satellite link."  
 GA Cordele WKKN 98.3—reported silent.  
 GA Folkston WOKF 92.5 may or may not be off. The number, (912) 496-3511, is "out of service."  
 GA Jesup WLPT \*88.3 off for 60-90 days after a teenager set fire to its transmitter building Dec. 6.  
 IL Carthage WZBN 92.1, but plans to return after its sale to Bick Broadcasting takes effect.  
 ME Eastport WSHD \*91.7. "Antenna on a pole fell off and they don't have it back up yet."  
 NY Cape Vincent WKGG 102.7, "during ownership battle. Set to return 'within 90 days' and will have new calls (not specified)."  
 NY Ossining WDFH \*90.3 since Nov. 1. "Its landlord had them evicted! A music school moved in across the hall and every guitar and piano amp picked up the station. . . Their

Shively two-bay antenna and tower were dismantled. Owner Marc Sophos is looking to reinstall the antenna on a nearby AT&T tower in New Castle a few km away and rebuild studios in Mount Kisco. He expects to return to the air with only 25 watts, since the AT&T tower is so much higher than the previous office roof tower. No date has been set for the rebirth of the station."  
 OK Holdenville KCMA 106.5, KRAF 1370, but plan to return in February.  
 TX Gainesville KECS 107.9, owned by KICI 107.9 Corsicana. May consolidate and have only one station closer to Dallas. KIKM 96.7 Sherman also is looking. It wants to shift other stations around and move to a Dallas suburb.  
 TX Madisonville KMVL-FM 100.5

**Deletions**

AZ Yuma K220DU \*91.9

**Selected AM Happenings**

CA Fresno KEYQ 980 back on air—with Spanish religion, parallel to KMRO \*90.3 Camarillo.  
 FL De Funiak Springs WGTX 1280 talk along with some "positive country." It had been silent.  
 GA Atlanta WQXI 790 goes to all-children's, dropping features like Kathy Henderson's Garden Show, which had been on 6 a.m. to 10 a.m. Saturdays, and with a loyal following. WQXI becomes the second all-children's format in the market, with Disney having signed up WKHX 590. [Int. Back on with sports.  
 GA Gainesville WGGG 1230 had been si- / KS Topeka WREN 1250, which had been silent, gets OK to move to Kansas City KS, 15 kw days, 3.7 kw nights, separate directional patterns.  
 ME Fort Kent WLVC 1340 deleted by FCC. Earlier, its sister station, WSJR 1230 Madawaska, had its license revoked. WLVC had been silent since Sept. 4, 1995.  
 MA Boston WBNW 590 sells for \$6 million to Salem Communications Corp. of Camarillo CA. Salem also owns WEZE 1260 AM, whose call letters will go to 590. After about six weeks'

simulcasting, "Praise 1260" will have the WBNW call letters and a separate Christian format. That format will feature Christian contemporary music and local ministries. Bloomberg Business News will be heard on WADN 1120 Concord MA, along with sports, talk and acoustic music. It's seen as a temporary move for Bloomberg until a new, more powerful affiliate can be found.

WBZ, so called "News Radio 1030," actually has been found to "rip'n'read" news from the

Boston Herald and the Boston Globe. "We're not talking about run-of-the-mill press conferences or widely covered spt news events. It's the scoops and exclusives only one paper has." Stories run word-for-word with "not a word of attribution, and not a bit of shame at Radio Ripoff, where the slogan should be 'The News Team You Can't Trust.'" [An unsigned, caustic article in the "Boston Herald."]

MA Dedham WBPS 890 picks up Radio France Internationale, based in Paris. Boston is important to RFI, given the "high density of French-speaking people here." WBPS had been an all-

sports talk station, but has converted to ethnic programming.

MN St. Paul WDG 630 back on air with golden oldies, but it has been sporadic in its operation lately. WIMN 1220 Stillwater MN now WEZX with easy listening.

MO Salem KFPS 1440 voluntarily surrendered its license after getting an FCC "show cause" why the license shouldn't be revoked.

NJ Atlantic City WUSS 1490, silent since Feb. 28, 1996, is in bankruptcy, lost its transmitter site. The FCC granted a waiver of its rules to allow it to be taken over by WMGM 103.7 and WMGM-TV 40 Wildwood NJ.

NC New Bern WCOO 1380 silent.

OR Coos Bay KRSR 1420 "silent pending sale." RI Providence WPNW 550 offers Bloomberg business reports—a sister station to WBNW 590 Boston. It can be heard in Boston from

"Braintree south." WPNW also owns WWKX 106.3 Woonsocket. There are no plans to sell WPNW. Owner Peter Ottmar would like, in fact, to buy another station in the market, plus seek more power for WPNW.

SC Abbeville WABV 1590—FCC reinstates its permit after the station showed that it'll return to the air under new ownership of Mark Hellingner.

SC Surfside Beach WCKN 1270 reported silent. TN Shelbyville WHAL 1400 silent, expected to return after a sale. [1280 silent.]

TX Gilmer KBNB 1080 silent; Longview KARW/VA Rocky Mount WFYN 1290—license cancelled and call letters deleted.

WV Charleston WVSR 1240 silent, but plans to return to the air in February

ON Kapuskasing CHYK 1230 licence revoked by Industry Canada. Had been silent, due to "losses resulting from a weak local economy and competition from a community FM station." That must be CKGN 89.7. But CKOY AM Timmins has rights to return the station to the air, since it "has abandoned its local programming" and relayed CKOY anyway.

CANADA—Radio Canada International set to end service to the world Mar. 31. It was given a one year reprieve last year, but this looks like it could be for keeps. "Closure of the station's transmitter in Sackville NB could cause disruptions for the BBC and other radio services that use it to reach North America."

### FM Rulemakings Proposed

First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.

AK Valdez 93.3 A, Feb. 8, Mar. 5

- AR Pangburn 99.1A, Jan. 27, Feb. 11
- CO Salida 93.7C3, Jan. 27, Feb. 11
- GA Bainbridge 101.9A, Feb. 10, 25

### Religious Broadcaster Raises \$1.2 Million in Recent Shareathon

KTIS-FM \*98.5, flagship station of the Skylight Satellite Network, concluded its 1996 shareathon recently. It surpassed its goal of \$1.2 million. "This is the best response in the station's 47-year history," said general manager Donald Rupp, as reported in "Religious Broadcasting" magazine. KTIS-FM started on 105.9 and later moved to 98.5 after commercial station KBTR Minneapolis deleted.

### Small Print Happenings and FM Industry News

KKHI 100.7-AM San Rafael CA fined \$15000 for EEO violations when it was KTID-FM. Interesting how stations often change call letters after they become aware of a fine coming. LA Monroe KNOE-FM 101.9-AM hit with a petition to deny by the National Rainbow Coalition. However, the FCC granted the renewals, with the caution that the stations analyze their EEO efforts more thoroughly and increase use of minority sources for job recruitments. A station not changing its call letters is KKIQ 101.7 Livermore CA, fined \$10,000 for failing to file adequate EEO records.

As radio groups expand, look for acquisitions in small markets to increase. Jacor, for example, is adding geographically to its holdings after buying WLKT 104.5 Lexington and WLRS 102.3 Louisville. It's going after WMCC 102.3-AM Munfordville, said to be silent stations; and is going into the Lima OH market in a big way. It

will own WIMT 102.1, WBUK 107.5 Fort Shawnee and WLTV 103.3 St. Marys. OH. Letter is not yet on the air. [I thank Robert Unmacht for FAXing info from the Jan. 15 "FM Street Journal," which helped make the "FM Atlas," now on its way to the printer, up to date as of its Jan. 17 deadline.]

Also from "M Street": The FCC declined to reinstate the deleted construction permit for WOAJ \*90.5 Vero Beach FL. The school board decided against building the station, but wanted to transfer the permit to the Moody Bible Institute. The FCC, however, said there was an obligation to timely construct the station.

The FCC granted a temporary waiver for Cox Radio, Inc. to exchange WYSY 107.9 Aurora IL and WCKG 105.9 Elmwood Park IL for WHTQ 96.5 Orlando FL, owned by Infinity.

The MI Association of Broadcasters host their Great Lakes Broadcasting Conference & Expo Feb. 25-26 at the Lansing Center, downtown. This year's theme is re-engineering the broadcast industry. Susan Ness, FCC Commissioner, is scheduled to be keynote speaker. For more info, (517) 484-7444.

The NAB is asking the FCC to rethink how the annual fees for radio stations are based. The NAB would like fees based on population served, based on a six category system. Presently, stations are charged based on their technical class.

Radio mergers have affected staffers of NY's Inner City Broadcasting—WBLS 107.5/WLIB 1190 AM. More than a dozen people were reportedly let go. "WBLS' dilemma stems directly from the switch of rival WRKS 98.7 to a 'classic soul' format in early 1995. Previously, WBLS had a comfortable edge on WRKS among listeners 25 to 54, the age group that draws the most advertising dollars." WBLS feels it can match Kiss on the air, "but without a deep-pocketed corporate owner hasn't had the same resources to promote its product."

"Popular Communications," Jan., 1997, quotes from a blind SCS user, Joan Drezhlo, Schenectady NY: "I think that a radio without SCA is incomplete," and feels such radios should be legally sold in the U.S., as they are in Canada.

Doug Smith has a feature in the Jan. "Monitoring Times," on "The Stations Within the Stations." It's an interesting way to think of SCS. Besides talking about SCS at 57, 67 and 92 kHz, he mentions TV's pro channel and SAP.

The MN Broadcasters' newsletter speaks of digital audio broadcasting, and cautions broadcasters that, while the FCC says the service will most likely target alternative formats, "broadcasters must watch this carefully and be prepared. The development of DARS will chew at the very core of our local radio listenership."

K.W. Walter of Toronto sent a brochure on how CBL 740 AM would like the \*99.1 spot for CBC expansion. I summarized that in the new "FM Atlas." For my 1998 edition, K.W. points out that Toronto will expand its borders, taking in such places as North York, which will affect CHRY 105.5. "Although I know that Toronto is Canada's largest city and still growing 100,000 or so each year, it has a population larger than all of Minnesota. And you can understand why PBS-Buffalo, the 'little' neighbour, is so conscious of agglomerations like Greater Toronto, Hamilton, Niagara... It is a definite 'no no' to talk about 'up in Canada' when part of Canada is south. New York state gets far more snow than Toronto (remember when you lived in Syracuse)—and they make sure on [the] weather that the 'cold coming from Canada' sounds as odd as United Statesians hearing Canadians going north to the states when they visit."

Richard Jewell is taking legal action against WKLS 96.1 Atlanta. He's the security guard the media bungled when it mentioned him as a prime suspect in the olympics bombing. His complaint is billboards 96-Rock erected that supposedly invade his privacy. The suit seeks unspecified money damages, plus asking the court to take them down immediately. The billboards show

the likeness of a guy who looks like Jewell, with the words "Freebird" and "Lynyrd Skynyrd" and the 96 Rock logo. The suit alleges that the likeness of Jewell on the billboards depicts him as "an evil, sinister person" and that the use of the word "freebird" has a criminal connotation. As a result, Jewell has experienced "mental pain, suffering and anguish."

On Oct. 11 WVNJ 1160 Oakland NJ (see Oct. p. 8, cols. 1-2) hosted a benefit concert to raise money for a sick kid. Somebody phoned in a bomb threat, and everybody left the auditorium for 25 minutes until it was determined there was no bomb. A six week investigation resulted in the arrest of Virginia Kondrat, a salesperson at WJUX 99.7 Monticello NY/W276AQ 103.1 Fort Lee NJ. She had used a pay phone to make the threat. If convicted, she could get 18 months in jail.

This issue is being rushed to the printer before I go to the hospital. Many thanks for all the good wishes. The computer keyboard has been plagued with problems, but I was able to place back in service a spare keyboard that had other problems after doing some repairs. Ignore any intrusive I, w, or d characters that seem to appear on their own. It is expected that the next two issues, February and March, will be combined so I can get some rest.

From the classifieds: WORQ \*90.1 Green Bay WI, a youth-oriented Christian station, seeks an experienced radio professional for general manager. Lee Dudek, (414) 498-1522, or FAX (414) 498-3739.

1 kw FM transmitter needed by community station on a limited budget. M. Friend; WNRN \*91.9, 2125-L Ivy Rd., Charlottesville VA 22903; (804) 971-4096.

FM FORUM

COMMENTS FROM READERS

Ed Locker had correspondence in 1993 with the FCC about WCLT-FM 100.3 Newark OH generating interference at about 99.9 in addition to 100.3. "I have written follow-up letters to WCLT-FM with no reply." They must have made some repairs, but never acknowledged the letter, nor had the FCC replied.

A long-time FM listener is Larry Deming of Cadillac MI. "Back in 1961 I picked up KDKA-FM 92.9 (47 kw), Pittsburgh PA. That was before WWTW-FM here in Cadillac, also at 92.9, came on the air. I also collect topographic maps, mostly U.S. and Canada. But I have maps covering New Zealand (both north and south islands), Tasmania (Australia) and Barbados. U.S. G.S. topo maps are very good sources for locating radio and television transmission locations." [I prefer the aeronautical sectional charts, 1:500,000, for locating towers and doing station coverage maps—b.e.]

Elmer W. Wallezen, La Grange Park IL, sent one of Art Vuolo's Pontiac/Delco radio guides for St. Louis MO. He mentions that the tri-folder country radio guide is a "Handy list for country music fans," and "Your FM Atlas is very good."

Craig Pattillo has updated his "Portland Area Radio Slogans with Call Letter Meanings and Frequency, 1922 to Present." This is the revised third edition, 24 pp. of material, mostly in paragraphs. Send \$10 to Craig at PO Box 25296, Portland OR 97298.

An organization is pushing to get locally originated public radio on Cape Cod. It's called Cape and Islands Community Public Radio, Inc., and has received \$173,110 in federal construction funds. Another \$57,000 must be raised locally. The project has

been four years in the works, and hopes to sign on with a station in winter 1997.

Russ Edmunds finds the discussion of the WJUX (99.7 Monticello NY with translator in Fort Lee NJ on 103.1) case "interesting. It seems that some seem to think that because WVNJ AM isn't being directly harmed, and because it has limited coverage, that they have no reason to complain. Aren't we forgetting that when someone flouts the rules on a whim that it doesn't require someone either harmed or whatever in order to report the violation to the authorities?"

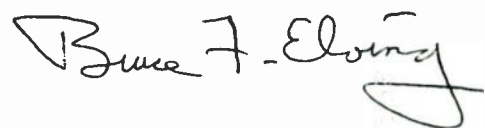

Alan Freed of the now-closed "Beat" in Minneapolis faxed: "A Jim Wychor (no affiliation stated, but executive director Minnesota Broadcasters Association) called and was interested in advertising on Beat Radio. But [when called back] he never asked about advertising. Instead, he launched into a diatribe, based on Beat Radio's unlicensed status. He was on a fishing expedition. Mr. Wychor stated that other broadcasters were unhappy with Beat Radio. When I asked why, he invoked the tired 'interference' line, that Beat Radio was interfering with other stations. I take particular umbrage to his characterization of my attitude in citing the Dunifer case during our conversation. At no time was my attitude 'nonchalant'..."

Later, "Wychor said something very interesting: that Beat Radio could interfere with every station in town, just by being on the air. Oh! I get it. So it isn't technical interference! It's competitive interference. That seems to sum it up nicely, thank you." From off the air "Beat Radio: a mini radio station for Minneapolis (it's not the size of the transmitter. It's what you do with it)."

Danny Buntin adds comments of his own to part of a commentary from the leftist Food Not Bombs Radio Network that airs on RFPI 7.385 mhz Monday mornings at 12:30 a.m. CST, as printed in the "VHF-UHF Digest" of the Worldwide TV-FM DX Association, now based at PO Box 17333, Asheville NC 28816: "Choosing to work with the FCC is Roger Skinner, who wants to submit a petition outlining his plans for LPFM to allow for stations under 100 watts. To make things attractive to the FCC a filing fee of up to \$6000 is suggested. And the potential LPFM broadcaster would be responsible for much of the work and research required to secure a license. [This is just one of many things] to [make] the FM band clogged worse than ever."

A history of Montana broadcasting is now available. It's called "Voices in the Big Sky," by C. Howard McDonald, a 45-year broadcasting "survivor." He was born in Bozeman, but worked in the Twin Cities at WCTS \*100.3, WPBC-FM 101.3, and WAYL 96.1 or 93.7, and at KWFC \*89.1-KTTS-FM 94.7 Springfield MO. Check or money order to Big M Broadcast Services in the amount of \$12.95 plus \$4.00 shipping, PO Box 1672, Bozeman MT 59715. Also on cassette read by the author at the same price.

Until,

 AR Van Buren KLSZ-FM 92.7 r [adult]. It and KOMS 107.3 Poteau OK enter an LMA-to-buy with KMXJ 95.9 Sallisaw OK.

CA Glendale KSCA 101.9 S, 17 LMA-to-buy with KLVE 107.5 AM Los Angeles. Gene and Jackie Autry paid \$15 million for KSCA in 1985. Heftel/Clear Channel Communications signed an option to buy KSCA for \$112 million on Gene Autry's death. It is part of the Autry's continuing liquidation of assets; Autry is 89. KSCA's ratings were only a 1.1 share, placing it at 30th in the market. KSCA becomes the market's 11th Spanish station, but loses its former blend of socially and MF electronic, pop and roots music, along with live studio performances. "When we go away, there'll be a lot of artists who'll be homeless," said Nicole S. Sandler, KSCA's music director.  
 CA Hanford KGEN-FM 94.5 S, 17 LMA-to-buy with  
 CA Los Angeles KJUSC \*91.5 still by date to a traditional classical format. Formerly, Wally Smith (pictured), led a "New Country" approach. Here's what happened—in Smith's own words as excerpted from "Current" newspaper: "The great classical music experiment was not a failure. It was ended by the tenacity of a small but vocal cadre of short-sighted classical music purists who believe they are saving a precious treasure from the barbaric masses but who are, in fact, strangling it to death by guarding it so closely that they are squeezing out its life. The truth is classical music will survive if it is allowed to exist in the context of the world in which it is performed. It will, however, diminish or be left to the custody of private conservatories and library archives. If it is not allowed to compete freely in public with all the other music that commands the attention of today's audiences."

"The future of classical music radio is very much in doubt. The declining interest in traditional Western European classical music, the vast changing demographics in the United States, and increased competition from other information and entertainment options threaten its future. The economics of broadcasting also work against the format. Classical music radio can exist only with a direct or indirect subsidy from its owners. The profit margin is not high enough for those commercial operators who do not have a personal commitment to the classical music format."

"Most public radio stations that succeed with classical music are those that build their classical music programming around the national news

**Stereo—or to be Stereo**

CA Chester KCMT 98.9, but mono most of the time, "apparently turning on the stereo just for some satellite program which may be sticky about that."

CA Esparto KZAC 97.9. "Not part of La Zeta!"  
 CA Gridley KMJE 101.5, "Magic"

FL Indian River Shores WOSN 97.1, to 23000 h,v; 106 m, d-a, one-step C3.

FL Naples WSRX \*89.5, g  
 IL Neoga WWGO 98.9, ID with Effingham Mattoon

IN Seelyville WTHC 95.9, ID with Terre Haute  
 KY Lexington WLKT 104.5

MI Grand Rapids WBYW \*89.9, ek, ethnic, country and big band. On 20 hours a day; hopes to be 24 hours soon. Came back on the air 2-7-97, "just beating the FCC deadline. Had been off since October, 1995... They're burying WTHS [89.9 Holland] here, so must be close to full licensed power." WTHS "totally obliterated outside its 3.16 mv/m contour (about 3 km around their downtown Holland transmitter) when WBYW is on."

MI Hartford WZTY 103.7, ID with South Haven; parallel to WYTZ 97.5 Bridgman.

MS Ocean Springs WXOR 92.5, "Real Country 92.5" (strict)

programs. Very few fulltime traditional classical music stations remain in public or commercial radio.

"At KUSC, we were in the process of creating a new format for classical music radio that would honor the tradition of Western European classical music, as well as the classical traditions and contributions of living composers, women, and the many cultures that have a significant presence in the Los Angeles radio market today. We were required by circumstances to pursue an evolutionary approach to these changes. We did not have the personnel or financial resources required to create, test, promote and introduce the 'new sound' as a completely new public radio format for our audience. It took too long. Only in January 1996 did we complete the host package necessary to deliver the new sound programming and we never had the money to promote it. The normal attrition in core audience during periods of such long transitions had a negative but not devastating effect on our ratings and subscriber revenue. . .

"The current programming on KUSC is exactly what the existing audience for classical music wants: uninterrupted presentation of 18th, 19th and early 20th century classical music with a minimum of talk by musicologists. KUSC has chosen, for the moment, to grow old with the audience for that style of classical music programming. Only time will tell whether their decision is a wise one. As you might guess, I do not think so." Smith tried to tie in classics with jazz and New Age music, along with soundtracks ranging from "Immortal Beloved" to "Braveheart." A spokeswoman at KUSC told me Smith left in September, and it had to do with "programming and finances."

Serving part of the market being abandoned by "pure" classical stations in the 88-92 part of the FM band is Sony's SW classical network, which has only 20 affiliates, including KCFM 94.1 Okmulgee-Tulsa OK. This service could expand as owners of new duopolies consider an alternative to offer that could be inexpensive and provide programming that is different in its sound than what other stations in the market are doing. Fred Child joins the network as morning host, while Kaaren Hushagen moves to the 10 a.m. to 3 p.m. time slot. She worked at WONO 107.9 Syracuse, along with now deceased Alan Rockford, in the early '70s when it was a classical station owned by Steve Jacobs and a partner. CA Tipton KZZC 104.9 o, "Cruisin'." Had been stunning, playing the tune, "I Heard it Through the Grapevine" for nine months. "The stunt, one of the longest running in American radio history, kept the station on-air while its previous owner looked for a buyer. The format, which featured four versions of 'Grapevine', attracted numerous listener phone calls but failed to show in the Visalia market Arbitron ratings." It has an LMA-to-buy with KJUG-FM 106.7-AM Tulare.

- CA Yucca Valley KSES 106.9 sr, \$[tereo] resumed, "Kiss FM." [Dr. Laura.
- CO Kremmling KRKM 106.3 still k, adds/

**On Air—Real Stations and Pirates (Selected)**

- CA Colusa KKCY 103.1—on full power after nearly two months at "flea power"
- CA East Porterville KOJJ 100.5 S, r, Spanish hits; had applied for KRLG calls, but FCC refused the application.
- CA Santa Rosa KRCB \*91.1, not yet moving to 91.3.
- CA Watsonville K276AX 103.1, but to be displaced by K277AH 103.3 there.
- IL Decatur W252AR 98.3 and W266AD 101.1 "The 98.3 doesn't get out. The 101.1 gets out better than \*89.5" (WJMU Decatur).
- IN Indianapolis "Radio Free Indianapolis" 90.5 near Butler U; 466-2800. Plus there's another station also apparently on 90.5 from near Broad Ripple High School on E. 62nd St. Both run 1/10 watt, but 1 watt on weekends.
- IN Muncie 107.5 mono, all talk, carrying "USA Patriot Network."
- IN Terre Haute W236-- \*95.1: "I don't know why it's on. Near Terre Haute you pick up WFIU better than the translator."
- ME Houlton "CRAMP 89.1," a 9-watt operation the owners claim doesn't need a license. Covers most of Houlton most of the time. It supposedly a 24-hour station, but does not always make that goal. Noncommercial, but "will credit contributors on the air." It follows the tradition of long-gone WRNE \*89.1 Houlton and another local station, WREM (AM?) that closed a year ago.
- NJ Fort Lee W276AQ 103.1 has its own web site ignoring WJUX 99.7 Monticello NY at <http://www.jukeboxradio.com>.
- NJ Freehold Township WRLJ \*89.7, simulcasting WCNJ 89.3 Hazlet. It gives a joint ID, but WRLJ spoken at a lower level and harder to hear. Both are \$, o.
- NJ Passaic County—"Basement Radio" 87.9, "playing folk and Celtic music with an occasional Cajun song"; said to be 25 watts.
- NY Manhattan, Lower East Side "WSTR" 88.7 "Steal This Radio," mono, community-oriented.
- BC Vancouver 88.8 mono pirate, heard Jan. 19 with Beatles "Revolver" album played in its entirety; then the "Hard Days Night" album. "No announcements, IDs, nothing!"
- JAMAICA—two new translators for Radio Waves were noted—102.1 and 102.9, both with stereo.

**Off Air—Or Not Yet On**

- CA Avenal KAAX 105.7
- CA Coalinga KNGS 100.1
- CA Corcoran KLCZ 102.3
- CA Davis KDVS \*90.3 since at least Dec. 31, and for reasons unknown. "They've had two several-day outages earlier in 1996, so perhaps their equipment is just worn out and nothing is budgeted for major repairs."
- CA Firebaugh KAJF 94.7
- CA Grass Valley KJFA 99.3
- CA Sacramento KEDR \*88.1
- CA Sutter Creek KSAC 107.5, "after testing in May of 1995!"
- CA Tahoe City KKTO \*90.5, "although KXPR expected to have it on last fall."
- KS Liberal KQZD 105.1. FCC granted Mario Loredto right to keep the CP for the station, but at first the FCC was concerned because Loredto was a citizen of Mexico. He then advised the FCC of his intent to become a U.S. citizen before he would build the station. In December of 1995 Loredto achieved his goal of citizenship. The FCC now looks forward to Loredto being able to serve the Liberal KS Hispanic community.
- TX Eastland KCYX 96.7

"I wish you a speedy recovery." J.G. Tompkins

**Deletions**

AR El Dorado K220DW \*91.9 (see "New," above)  
 NE Blair KMRV 97.3

**SCServices**

CA Modesto KATM 103.3 no 92 (had light rock)  
 NY New Rochelle—a new SCA web page tells about Ramsey kits and an SCS receiver from a company based here. Includes instructions for SCS mods at <http://www.glasscity.net/users/bruceh/sca.htm>.

"You really should put your catalog online. Every so often the various radio newsgroups carry questions about how to receive FM-SCA. The responses usually mention FM Atlas. . . Sometimes people give misinformation, though. One message claimed FM Atlas was in Ely MN; another gave the location as 'Isko'. One guy (Max Swanson) wrote, 'Bruce Elving can't sell the adapters to just anybody because of the ECPA; however, there is a blind exemption for the reading services'."

"I would like to compliment you and your helper for the fine job of adding the SCA mod to my Sangean 818. . . I am buying your FM Atlas from Universal Radio. I'll be there with your mod and my Sangean tomorrow. Very good work!" J.T.W., Pickerington OH.

"Hope you are blessed with health, happiness, and good DX!" J.N., Warren MI.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

- AL Tuscaloosa WBHJ 95.7 95.7 Jams
- CA Camarillo KMRO \*90.3 Radio nueva vida ("new life"); also on KGZO \*90.9 Shafter, moving to 91.9.
- CA Sacramento KRYR 103.5 La Zeta, having a joint ID with KZSA 92.1 Placerville
- FL Mexico Beach WSHF 99.3 She 99.3. The first affiliate of Radio One's "Choice/AC," pr format with music of the '80s and '90s with an alternative flavor, to appeal to 25-44 year-olds with the audience expected to be 60% female. For more info on the format call (800) 746-2141.
- ID Rupert KKMV 92.5 The Cat
- IA Waterloo KOKZ 105.7 Cool 105.7
- MS Marion WZRW 95.1 The Arrow
- MS Taylorsville WBBN-95.9 Pine Beit Country (from "B-95")
- MO Joplin KSYN 92.5 Kissin' 92.5 (from "The Heat"), now CHR
- OK Ardmore KACO 98.5 K-Cow
- WI West Salem WKBH-FM 100.1 K-Rock

**Multi-City IDs in Use**

- IL Maroa WDKR 107.3 with Decatur
- IN New Albany WRVI 94.7 with Louisville KY, "The River"
- NE Terrytown KCMJ 96.9 with Scottsbluff-Gering
- NM Farmington KNMI \*88.9 with Aztec-Bloomfield-Blanco
- WY Rock Springs KUZW \*90.5 with Green River "I'm looking forward to the new FM Atlas when it's available. I hope you're healed and back in action soon!" M.C., Vancouver BC.

**Selected AM Happenings**

- AL Opelika WZMG 1520 silent.
- AK Eagle River (Anchorage) KFFR 1020 all weather, but "look for a new format soon." Had been silent.
- AK Long Island (Anchorage) KABN 840 back on with all weather; had been silent.
- CA Concord KRHT 1480 all weather; had been

silent. Believed to be on with only 25 watts. CA Salinas KHTX 1460 had been silent; on with only 100 watts, simulcasting KDON 102.5 there. CO Buena Vista KDMN 1450 silent. CO Vail KSKE 610 silent; both awaiting sales. IN Terre Haute WJSH 1300 returns to air with oldies; had been silent. Parallel to WSDM-FM 97.7 Brazil IN. WSDM 1130 off the air because of a fire, but expects to return next month. LA Lake Charles—FCC dismisses an application by Ladas Broadcasting Corp. for an experimental station to relay KEZM Sulphur LA on the same 1310 frequency, but with 40 watts fulltime. MD Indian Head (Washington DC) WNLT 1030 had been silent. Returns to air, simulcasting WINX-FM 94.3 Warrenton VA, which it has an LMA with.

MA Dedham WBPS 890 with Radio France occupying part of its morning hours is a critical success, but yet to prove its worth in attracting advertisers. "I'm astonished. We did expect to do well with it, but the response has been terrific," said g.m. Patrice Donley, who does not understand French. Besides French, WBPS has Hispanic programming 9 a.m. to 3 p.m., Chinese (Cantonese) 6 to 8 p.m., Polish 8 to 9 p.m. and on weekends there's Portuguese and also Russian. Its former sports programming is on only in late afternoon and 10 p.m. to midnight.

MA Middleborough WCEG 1530 had been silent; now a radio reading service from the MA Radio Reading Network.

MI Detroit WXYT 1270 fires Bill Bonds (pictured), having been displaced by Imus who in turn is displaced by Howard Stern on WYST 97.1. Bonds, "a longtime fixture on Detroit TV, provided an initial ratings boost after joining WXYT last May. However, his 6 a.m.-9 a.m. program sank to 13th place in the station's worst morning performance in years."

MI Frankenmuth WJZZ 1210 silent. This will enable co-owned WCHB 1200 Taylor MI to have a power increase.

WKNX 1250 o, returns to air. MO Salem KFPS 1440 license cancelled and call letters deleted.

NJ Plainfield WERA 1590 silent as of next month, to enable WWRL 1600 New York to expand. See also, "Call Letters," above, NY Sag Harbor.

NY Auburn WAUB 1590 silent; may be related to above.

OK Sallisaw KKUZ 1560 reported silent.

OR Salem KSLM 1390 oldies; had been silent since 1994. "Salem is Oregon's capitol and this was the city's big station for decades. It first signed on in 1934. They have a new tower location and that's what took so long to find. Co-owned with KYKN 1430 Keizer."

PA Columbia (Lancaster) WNZT 1580 silent; had been talk.

SC Chester WGCD 1490 on air with gospel; had been silent. It had been off the air since July 31, 1993. Owners were unsuccessful in selling the station, and had until Feb. 8, 1997 to return it to the air, or face FCC license cancellation. On Jan. 4, 1997 it returned to the air with an LMA with prospective buyer Frank Neely.

SC Hemingway WKYB 1000 surrendered its license, with the FCC deleting its call letters. It had been silent.

WA Bellevue KBLV 1540 "format of the month" now talk: "Your personal achievement station," with syndicated programs, such as Earl Nightingale. [talk; had been silent.

WA Oak Harbor KJTT 1110 back on with/ WA Enumclaw KENU \*1330 had been silent. Returns to air, replacing KGRG 89.9 Auburn WA. WA Tacoma KRLM 1090 still has those calls, but is "full simulcast of 106.1" KBKS "Kiss 106."

KKMO 1360 "Smooth Jazz" when not carrying ethnic programs. Music feed differs from KWJZ "Smooth Jazz" 98.9 Seattle, "which uses its own in-house music programming."

VI Charlotte Amalie WVWI 1000; Ernie Cooper, U NI in MA picked up a DX test from this station in 1961 earlier, "only to find that, while on vacation in MA May [1996] at Frederiksted, that WVWI had gone silent!"

BN Tijuna XETIN 540 had been all Beatles; to be classical, parallel to KKG0 540 Costa Mesa (Anaheim) CA. The new KBTL 1650 Costa Mesa to be all Beatles.

"Best wishes for a successful operation and a speedy recovery. Don't worry if you have to skip the newsletter for a month or two. Just concentrate on getting your strength back. . . Congratulations on 10 informative years of FMedial I've kept every issue, including the (now rare) Prototype Ten more, please!" C.P., Portland OR.

Last minute AM news from Roger Winsor: IL Chicago WJJD 1160 simulcasting WJMK 104.3 with oldies, until it becomes "The Score." Eight-twenty (now "The Score") is to become motivational talk.

IL Chicago Heights WMPP 1470 off the air. IN Valparaiso WNWI 1080 has been off the air for three months. No phone; people at WAKE 1500 Valparaiso don't know what the problem with WNWI is. WNWI supposedly had problems with its tower. "This was a low power station, run more as a hobby by some rich people. I got my first job in radio there. WNWI was a daytimer, adult contemporary."

 ENGLAND (north of) Southport—Diamond FM  
 would like to start a permanent station. It  
 temporarily operated (frequency not an-  
 nounced) for two 28-day periods in 1995 and

1996. Broadcasts "were received so enthusias-  
 tically that it has been encouraged to apply  
 for a permanent licence. It would serve  
 Southport, Formby, Ormskirk, West Lancs-  
 shire, Crosby, Bootle and North Liverpool.  
 Unlike other applicant groups, it would not  
 share programming with stations in other  
 parts of England but would broadcast 24  
 hours a day from its home base." It is  
 "backed by Marcher Sound, an experienced  
 radio operator which already runs four  
 successful stations, including one on the  
 Wirral... Its musical style would be based on  
 popular classic hits. For this to happen,  
 however, it needs your support. The Radio  
 Authority, which licences all commercial  
 radio in the U.K., needs to be convinced that  
 there is a real need for a station in this area. If  
 you agree, write to the Radio Authority and  
 tell them so."

**New Speaker Technology May Revolutionize the Way FM Radio is Listened To**

A garage-shop tinkerer, Elwood "Woody" Norris, 57, Poway CA, holds more than 100 patents. Most notable among those is one for a product his American Technology Corp. might use to turn the \$1 billion plus speaker market on its ear. The new solid-state sound system is called the Norris Acoustical Heterodyne. "The market potential is huge," said John Robb, senior analyst at Boston-based Forrester Research.

The acoustical heterodyne has two main parts; a proprietary signal processor that shifts audible sound up into the ultrasonic range and a microphone-sized unit made up of a collection of customized transducers that projects the silent ultrasonic energy into the air. When connected to a sound source, such as a small FM

radio, the energy becomes audible when it hits a surface, such as a wall or your head.

The unit can also be made to produce sound at a specific distance from the source, such as the driver of a car. The result, according to a report in *Electronic Business Today*, is near-concert-hall sound quality without the baggage of conventional speakers. The unit is also expected to work well with personal computers, occupying a daughterboard of about 25 square centimeters. Because sound can be focused directly on the user, other people close by will not be disturbed. Other possibilities include home theater and movie theater sound systems.

Norris realizes it could take years for his technology to take off, but says he's talking to 30 companies, including PC, auto and consumer electronics companies from the United States, Asia and Europe. It expects soon to announce a licensing agreement with Carver Corp., based in Lynnwood WA. Jim Croft of Carver's R&D department said, "If this works out the way we think it will, it will be a dramatic improvement over previous loud-speaker technology. It's very important to Carver."

**Small-Print Happenings and FM Industry News**

The town of Pittsfield ME may have found itself subsidizing religion when it had loaned local station WPBC 99.5 more than \$16,400. The station came on the air in 1994, billing itself as "the hometown radio station." But the format changed several times and it soon became evident that the station was in trouble. It abruptly shut down within a year of going on the air. It was owned by Beverly Dodge and her son David Turek (also known as Chuck Foster) of Action Communications of Bangor ME. It has been sold to CSN International of Santa Ana CA for \$85,500, with \$10,000 as a deposit and the balance to be paid to Dodge and Turek in monthly installments of \$1500. CSN International owns KAWZ \*89.9 Twin Falls ID and numerous FM translators (see last month, p. 1, col. 1). CSN International is a nonprofit corporation with four voting members: Charles Smith of Newport Beach CA; his son, Jeffrey W. Smith of Costa Mesa CA; John A. Laudadio of Long Beach CA; and Michael Kestler of Twin Falls ID. Charles Smith and Laudadio are directors of Calvary Chapel of Costa Mesa, while Jeffrey Smith is director of Calvary Chapel of Twin Falls. Public broadcast funding in NY state could suffer even more than originally thought under a proposal by Gov. George Pataki. Albany area stations WAMC \*90.3 could suffer a 20 percent state funding cut—from \$50,000 to \$40,000, while WMHT's (TV-FM combined) cuts could come to more than \$330,000, which would be "really, really devastating," according to W. Donn Rogosin, president.

The new EASystem is in effect, with the FCC granting no beginning-of-year stay in its implementation. However, stations are cautioned to keep their old EBS equipment connected and operational during this transition period. By Jan. 1, 1998, the old EBS equipment can be dismantled.

The Society of Broadcast Engineers announces two new categories for certification. These are Certified Engineer/Audio (CEA) and Certified Engineer/Video (CEV). The new categories were created to allow engineers who work in the industry, but do not operate transmitters, to be certified. "The certification program is

well-known and highly respected by broadcasters everywhere. Certification is preferred, and many times required, from an ever increasing number of employers. Surveys have shown that employees with SBE certification are better paid than those without certification," says the Milwaukee SBE newsletter. SBE and NAB will co-present the engineering conference at the NAB convention, April 6-10 in Las Vegas. A new SBE Preparation Guide for taking their tests can be had for \$19; it is recommended that local groups buy it and study the materials together. It is a print guide, with an on-line version to come later. For more info contact the SBE at 8445 Keystone Crossing No. 140, Indianapolis IN 46240; (317) 253-1640; FAX (317) 253-0418; convention (317) 253-0122; job line (317) 253-0474.

A violent cloud of magnetically charged hydrogen and helium was spewed from the sun Jan. 6. It hurtled toward earth, making contact with our atmosphere Jan. 10, with an electrical charge of 1 million amperes. That is believed to be the cause of Telstar 401 burning out. That failure caused several video channels to be redirected to the satellite used by NPR, "creating signal problems for some NPR affiliates due to cross-polarized transmissions." But most problems were corrected with "fine tuning" of the dish azimuth to null out the unwanted signals.

Doug Loney called from San Diego, where he's spending the winter. He says the CRTC (Canadian Radio-Television and Telecommunications Commission) is alive and well. Industry Canada still takes care of the technical side of things. "Industry Canada" is the new name for the old Department of Communication, and is in line with an array of new, confusing names, such as "Heritage Canada."

Loney's magazine, "Broadcast Technology," has a "must reading" item on a book, *Turning on DAB: A Primer for Canadian Radio Broadcasters*. It's a "complete manual that can tell any broadcaster how to get started in digital," said CAB president/CEO Michael McCabe. The book is only 56 pages and costs CAB members \$25, non members \$50 CDN. Call Lynn Buffony at the CAB, (613) 233-4035 to order.

Richard Jewell got his way in Atlanta, to some extent. The WKLS 96.1 billboards were removed. They depicted his likeness with words like "freebird." The suit is going forward. It asks for punitive damages. [See last month, p. 8, cols. 1-2.]

WANY-FM 106.3-AM Albany KY should be back on the air at reduced power by now, having lost a tower in a tornado. The tower and station roof were destroyed in the January twister. Full power and final tower replacement should be by next month.

Birch Research is said to be coming back to selected radio markets this fall. It will use a seven-day diary-based service. In 1989, the company was sold to Dutch publisher VNU, only to have it dropped two years later. The original research Birch did was based on phone recall, rather than a diary.

WCRB 102.5 Waltham-Boston MA has found a way to merge classical music with pop culture. During Super Bowl Sunday it showcased the Boston and Green Bay symphony orchestras. It featured voice-overs by Patriots play-by-play man Gil Santos and owner Bob Kraft, plus BSO music director Seiji Ozawa and GBSO musical director Shinik Hahn. I'm not much of a TV sports watcher, but enjoyed the game while in the hospital, recovering from surgery.

The "New York Times" had an article on foundations that provide funding for National Public Radio. It raised the question whether or not those foundations influence what stories are carried on programs like "All Things Considered." For example, the Pew Charitable Trust spent \$1 million with various media outlets. NPR maintains its integrity in choosing news stories uncompromised. Bill Buzenberg, who is leaving NPR as vice president for news, told of a time

when his organization turned down a benefactor that wanted increased coverage of Hawaii news. He told them, "We will cover Hawaii when we need to, but we will not allow someone to buy coverage anywhere." Buzenberg is leaving to take on a book project.

In-band on channel digital audio broadcasting won't work. It's on too low a frequency. Even without a host analog signal in the way, 88 to 108 is not meant to carry DAB, a well-known West Coast FM station engineer told me. That's why no San Francisco FM station was willing to host any station demos. DAB requires the L-band or S-band to work, and for that reason Canada is well ahead of the U.S.

However, in the US the NAB doggedly pursues the seemingly elusive goal of in-band DAB. Eddie Fritts, whose salary is around \$500,000 as president of the NAB, said the "responsible approach" to digital radio for the United States is the terrestrial in-band, on-channel technology. He thinks the in-band approach is superior for three reasons: 1) the conversion will be less expensive 2) no new spectrum is needed; 3) it will not disturb the radio infrastructure developed over the past 75 years. Huh? Sounds like the same arguments used against FM in the '40s and '50s.

Furthermore, Fritts is mad at the Consumer Electronic Manufacturers' Association for its request to have the FCC allocate L-band spectrum for DAB. CEMA went directly to the FCC, rather than first checking in with the Fritts organization. So Fritts has named his strategem the "mother of all challenges." He condemned the CEMA's "underhanded-backhanded tactics [that] will not engender future cooperation. You can be sure NAB will be standing in the doorway to block any of your cockamamie schemes."

Bob Fitzgibbon, writing in Canada's "Broadcast Technology," said it is obvious why the IBOC system appears as of the moment to be a "clutching at straws" solution to digital broadcasting in the U.S. There is a fear that if the U.S. assigns new spectrum for digital radio, channels would be auctioned to the highest bidders, leaving many of the 11,000 FM and AM stations out in the cold as companies with deep pockets scoop up the spectrum. "It was apparent that when U.S. broadcasters discuss digital broadcasting, their concern is primarily with short-term economics, rather than the long-term goal of providing a quality radio service!"

A gift with strings attached—that's what WCAV 97.7 Brockton, MA is awarding the New England Country Music Historical Society. Station gets most of its programming via satellite, hence its need for records or CDs is diminished. It donated 62 CDs, 98 cassettes, 300 45 rpm singles, 68 albums and 13 reel-to-reel tapes under the stipulation they are to be returned if the station ever needs them. Gordon Brown of the historical society is on the lookout for more recordings, including old call letter signs or microphones with call letters from old country music stations in the area. It hopes to move to a permanent home in Pawtucket, R.I. For more info on the New England Country Music Historical Society, call (617) 924-6585, or write PO Box 575, Watertown MA 02272-0575.

The catalog of WFMU "91.1 PO Box 1568, Montclair NJ 07042, features a variety of things. It started out offering leftover station bumper stickers and T-shirts. It includes cassettes and record albums, and paintings at \$6 by one Steven Keene, who churns out about 30 a day in his "dry, angular style." WFMU claims to be the country's largest distributor of theremin, a spooky-sounding electronic instrument used in the Beach Boys' "Good Vibrations" album. "There is stuff in there to offend everybody," said Ken Friedman, WFMU's station manager, including a recording of the Jim Jones massacre and Nazi propaganda broadcasts. "Every time we do a mailing we are inundated with hate mail, which to me means we are doing a good job."

Heritage Media and the Journal Co. make a swap resulting in Heritage getting KQRC 98.9

Leavenworth KS, to add to its KCFX 101.1 Harrisonville MO, KCIY 106.5 Liberty MO and KXTR 96.5 Kansas City. Journal winds up with WWST 93.1 Karns TN, WMYU 102.1 Sevierville TN, both in the Knoxville market.

Beasley Broadcast Group is buying WWDB 96.5 Philadelphia for \$65 million. Beasley already has WXTU 92.5, WDAS-FM 105.3 plus AMs. Gulf Coast Radio Partners is buying its LMA partners in Biloxi-Gulfport for \$2 million. It is getting WXLN-FM 107.1, WXRQ 96.7 and WXYK 105.9 Pascagoula. But former LMA partner WXOR 92.5 Ocean Springs is going it alone, according to p.d. Billy Hunter. WXOR is owned by Gulf Coast Radio Services.

Brill Media, based in Evansville IN, is expanding in its home territory. It is buying WKDQ 99.5 Henderson KY for \$8 million cash. Brill owns WBKR 92.5-AM Owensboro.

Cox Broadcasting is adding another Class A to its L.A. collection. For \$19 million it is getting KRTO 98.3 West Covina CA to join with Cox's KACE 103.9 Inglewood and biggie KOST 103.5-KF1 AM Los Angeles. "M Street" figures at 650 watts, Cox is paying \$29,230 per watt for KRTO.

KFQU-FM 99.1-AM Clayton-St. Louis MO finally had its license renewed for a full term, subject to reporting conditions and EEO requirements. [See FM Atlas-16, p. 5, for background information.] The FCC, however, found that the Lutheran Church-Missouri Synod, which owns the stations, had made misleading statements about its EEO practices, but decided to lower the fine from \$50,000 to \$25,000. The Commission was especially concerned that "Lutheran training" and "classical music expertise" were needed for certain positions, especially those not involving on-air presentation. Those policies were unacceptable because of having an adverse impact on black people. The church argued that the FCC's requirements violated its constitutional right to religious freedom. However, the Commission pointed out that, where a job description has no substantial connection with program content, enforcement did not violate the licensee's First Amendment protections.

KCIL 107.5-AM Houma LA received license renewal, subject to a fine of \$10,000. The FCC found no evidence of employment discrimination, but the licensee's overall EEO efforts with respect to recruitment of minorities were considered deficient. The National Rainbow Coalition had filed a petition to deny the stations' renewal.

The CHR format may soon be an option for Canadian FM broadcasters, reports the "M Street Journal." The CRTC is considering relaxing its 20-year-old limits on the amount of "hit" music that FM stations can play. The limits were adopted to protect AM music formats against FM competition. Now the CRTC recognizes that the number of hit-intensive AM stations has declined, with the current law protecting relatively few broadcasters. Too, the law limits FM's ability to fill a programming niche.

FCC totals as of Dec. 31. FM radio on air and licensed stations, 92.1 to 107.9 mhz 5419, FM 88.1 to 91.9 mhz 1864, AM radio 4857.

From the classifieds: Wants to buy a G-E Superadio II. Victor Leavery, 536 Webb St., Clayton NY 13624-1229; (315) 686-4930.

"I did it! I made the world's smallest SCS adapter. Fully enclosed, about the size of a quarter! Works good on 67 kHz. Let me know how to advertise my FM 100." Dave Jackway, SCS Radio Technology, (417) 881-8401.

Reviving a student-run radio station for the State University of NY in Canton. Seeking donations of used equipment, Rick Pendleton, "WATC-FM" SUNY Canton, 34 Cornell Dr., Canton NY 13615; (315) 386-7218.

Looking for airchecks from the '50s-'70s from any and all markets, country, top 40, beautiful music, soul. Need radio-related material and video. Bill Scott, OCA, PO Box 365, Mustang OK 73064-0365.

## FM FORUM

## COMMENTS FROM READERS

I enjoyed Bob Doll's thriller, "Sparks Out of the Plowed Ground, the history of America's small town radio stations." He traces 75 years of small town (mostly Midwest) radio, including FM, in a 300-pp. book. Price and ordering info from Streamline Publishing, 224 Datura St., Ste. 718, West Palm Beach FL 33401; (800) 226-7857.

I finished the book while recovering from open-heart surgery. The operation was Jan. 22. I was in the hospital six days. Recovery is going very well. I try to get in daily walking plus a mid-day nap. Doing this newsletter was no problem, except for balky equipment. It took about a whole day to restore the keyboard on this 11-year old Data General 64-K computer. No heart bypass was needed, with the surgeon able to use my own tissue in correcting the leaky valve that had created a heart murmur. I think I will outlive my computer, but like to nurture that as long as I can, because it works so well with the IBM Composer equipment I have. The IBM includes an ESC [Electronic Selectric Composer], 1975 era, designed to work as part of a mag card system, but modified to work [only] with the particular Data General computer I own. I also use an IBM Standalone Composer. Latter is a 1968 era machine used on the "FM Atlas" maps and for paste-up work and last minute corrections in FMedia! I thank many of you for your prayers, concerns, cards and notes.

"By now you have probably seen the review of RadioShack's amplified indoor FM antenna, model 15-1833, on p. 217 of the November 'Stereophile,'" writes Nick Lombardi. "It's no Stereo Probe 9, but at \$29.99 it's a real bargain, especially for those who, for whatever reason, don't care to fool with an outside antenna. I've used one for more than a year with excellent results. Amplified indoor antennas are usually unmitigated disasters. What sets this one apart is its moderate gain (6 dB) coupled with a continuously variable tuning control that allows the user to precisely zero in on the desired frequency. But this high selectivity comes at a price: the antenna is slightly mistuned (easy to do; the dial calibration isn't perfect) it can create images and overloading from any strong, nearby signals which may be present. For this reason, it seems to work best with tuners that have an analog signal strength meter, or at least something more precise than four or five LEDs. All in all, an excellent device that is clearly superior to anything I have seen from Terk, Parsec or Sony." Its list price is \$29.99.

In November the Shack had the Optimus 12-603 FM-AM "Superadio" on sale. I've since bought 18 and modified some for SCS. I was impressed with the radio. It has all the features of the G-E Superadio III, and performed better. The newer G-Es are being made in Indonesia, while RadioShack's 12-603 model is made in China. I suspect it is being made in the same factory that used to produce G-E Superadios. Perhaps G-E's Indonesia people will catch on to how to improve the products. For now, however, radios come with either

very poor FM sensitivity, or a tendency for FM stations on the upper part of the dial (100 mhz and higher) to appear in more than one spot. After working with G-E Superadio III's for about nine years, it is still a mystery radio to us—yet it's one we've sold the most of.

A local talk show host, Lew Latto, keeps praising the G-E Superadio on his morning program on WEBC 560 AM, and my place where to buy them. It's great publicity, but I only wish the radios' quality were more consistent. Listeners to his show often complain to me about how poor AM reception is after sundown. No radio can control that, although a more sensitive set like the AM section of the G-E tends to be, can help. A better solution would be to have the talk shows on a local SCS station, which would offer more consistent day and night coverage. Local AM stations go directional at night, excluding part of the audience outside their patterns.

RadioShack has a similar "Superadio" with FM-AM and UHF and VHF TV audio. It sells for \$79.95, and I have several in stock ready to modify for SAP/SCS at \$115.00 plus \$6 shipping. It is the Optimus 12-604. The FM-AM version, the Optimus 12-603, I offer with SCS, tunable adapters, 57 through 92 kHz SCS tuning, at \$103.50 postpaid.

K.W. Walter elaborates about CJRT \*91.1 Toronto filling the cultural voids for many residents of Ontario and western New York state, as well as satellite reception to cable systems. They have a clever idea of encouraging "perpetual donors" to come up with credit-card giving of so much a month. That lessens the need for regular

**COVERAGE AREA**

CJRT-FM, broadcasting from the CN Tower, can be heard within a 160-kilometer radius of Toronto, and is also available via satellite to cable in other major population centres such as Thunder Bay, Sudbury, Ottawa, Kingston, London and Sarnia, and throughout Ontario via satellite dish (ANIK E2, KU band, T26, 5.76/5.94 discrete stereo).

on-air money appeals. About digital broadcasting—"Over the years I have always been interested in your observations about this—particularly after your experience in Winnipeg. The CBC is testing a digital station from the CN tower covering north to Newmarket." Canada and Europe have defined the standards, with the U.S. dragging its feet. "How will we have continental standards? How will digital affect the SCMO—with your particular interest? . . . Keep getting better. We need your experience and 'grey matter' for the next decade." [SCS and SCMO type services will be available as ancillary signals on DAB, but would require new ways of decoding, which would probably not be available to a garage tinkerer such as myself. I will try to get fame and riches while the present FM band is in place!]

Tom Cornell visited Singapore. He visited two tower sites and saw all the antennas. The two sites are at Bukit Timah and the Singapore Labor Federation Building. Bukit Timah is a hill ("tin hill"), sprouting two large self-supporting towers with all the TV antennas and most of the FMs. The SLF buildings have one tower on

top with two separate antennas. "Power is not high by our standards. Most people in Singapore live in high-rise apartments which have central antenna systems. Singapore is not large either." It is 24 by 55 km in size. "Imagine 3.5 million people in that space and you get the right idea. It's dense. . . It is definitely neat and clean and safe. As long as you don't chew gum, you are fine. By 2000, they also hope to eliminate smoking. Anti-smoking signs are everywhere. The airport is one of the best I've seen, and Singapore Air is great! The food is highly varied and good."

Here is Tom's list of Singapore FM stations. You might want to compare it with John Ebeling's list (Nov., p. 4, col. 1). Program content was identified by local citizens, "and I took them at their word. I also consulted the 'Straits Times', the local newspaper" in the official language, English. "Stations above 100.3 are presumably in southern Malaysia or Indonesia." All are from Bukit Timah except for 91.3 and 100.3, which are from the SLF Building. All are 12000 h,v, at 187 to 199 meters, except for 88.9 and 98.0, with powers and heights unknown.

MI's Phil Boersma: "While I think the telecom law of 1996 was a terrible piece of legislation, and while I believe big-money interests 'bought and paid for' it, I still have little sympathy for the 'micro-broadcasters'. It seems to me that most of these people haven't the discipline or drive necessary to operate a licensed radio station; so therefore they invoke all sorts of reasons to violate the law. In the end, it boils down to the philosophy of 'I can do anything I want and no one better try to stop me'. For example, that guy Alan Freed in Minneapolis broadcasting dance music on his 'The Beat' pirate station—I'll bet dollars to donuts he wasn't paying music licensing fees to ASCAP or BMI for his public performance of this music. . . He was stealing other people's intellectual property for his own gratification. . . But hey, he can do anything he wants, right? And then the MBA are the bad guys for not welcoming him into their organization.

"As for the lawyer (Nov. FMedia!) who stated the FCC might try to make Christian-formatted stations 'secondary, like translators': what an idiot. As it is, Christian stations get preferential treatment (Moody, Family Stations, AFA, WPCS, et. al.) in

what they can do—I don't see any NFCB stations putting up networks of hundreds of translators—only the Christian stations apparently can do that! The FCC has been so spooked by the (still-active) letter-writing campaign mounted anonymously for 20 years [claiming] the FCC is about to 'outlaw Christian radio'. . . I think this campaign is being kept going by certain right-wing Christian broadcasters (on the sly, of course) to keep the Commission cowed, so it will never check the wholesale abuses of organizations like Family Stations, Moody, WPCS and others.

"I also remind you that the 'golden rule' of Satanism is "do what thou wilt". This seems much closer to the philosophy of the microbroadcasters ("Christian" or not) than anything out of the Christian Bible. . ."

Henry Studebaker does the "Country Music Radio Atlas." He's also an FMedia! subscriber. In the new "FM Atlas" I mention his taking time off and moving to MI from CA. "I haven't had a chance to work on my country music radio atlas for over two years. My work travel schedule was overwhelming. Maybe when we get settled down a little and my out of town travel calms down, I'll get a chance to get a new edition out. In the meantime, I have been sending orders and checks back to customers and a note I will notify them when a new edition is ready. . . I'll keep you posted about any developments."

The FCC has defined a new set of RF radiation limits to apply to all broadcasters, reports the Milwaukee SBE newsletter. For FM broadcasters the present maximum of 1000 uW/cm squared will become the new "controlled/occupational" limit. And, for the general public, the specification will be tightened considerably, down to 200 uW/cm squared. This will impact mostly those stations mounted on short towers on high buildings. For them, the new standard means that their limit is now just 1/5 of the previous level allowed. It's important to remember that these standards are not going into effect until after [FM] stations have submitted their renewal applications. . . The FCC has indicated that they [soon] will be publishing formulas for calculating exposure under the new guidelines.

Now that EAS is required at all stations, new companies have their equipment certified. In addition to SAGE and TFT, Gorman-Redlich has been granted FCC approval, and Burk Technologies is close behind. A new entry from a company called HollyAnne Corporation has been advertising. "We're very fortunate here in Wisconsin to have our state plan so far along—it's already been submitted to the FCC. . . Wisconsin can lead the way to the new system in 1997!"

Until March,

*Boersma*

## New FM Station, Translator Grants

Translators have less than 100 watts unless shown otherwise

- AZ Show Low \*90.7 100 watts h,v (horizontal and vertical effective radiated powers); 259 m (eters above average terrain), AZ Board of Regents. [San Francisco translator]
- CA San Diego K205- \*88.9 (KEAR 106.9/ CA Woodland K284AG \*104.7 (KLVC 88.3 Magalia), h,v
- CO Cedaredge K271AE 102.1 (KJYE 92.3 Grand Junction), 250 h,v
- CO Ignacio \*90.1 3000 v; 599 m, KUTE, Inc.
- FL Mangonia Park (West Palm Beach) W296AW 107.1 (WJFP 91.1 Fort Pierce), h,v
- GA Dublin \*88.3 1000 h,v; 25 m, American Family Assn. (see also "Deletions")
- GA Waycross \*91.9 1000 h,v; 45 m, Am. Fam. Assn. (see also "Deletions")
- HI Hilo \*90.3 14000 h,v; 50 m, Hilo Christian Bcstg. Corp. [Bcstg. Ltd.]
- ID Wallace 100.7 8200 h,v; 662 m, Alpine/ IN Hartford City \*88.1 100 v, 5 h, d-a (directional antenna), Blackford County School Corp. [tol TN], v
- KS Bel Aire K219DD \*91.7 (WHCB 91.5 Bris-/ KS Manhattan K204CT \*88.7 (WYFG 91.1 Gaffney SC), 120 h,v
- MN Glencoe K202CH \*88.3 (WNCB 89.3 Duluth), 220 h,v
- MS Waynesboro W216AZ \*91.1 (KAWZ 89.9 Twin Falls ID translator), h,v
- MO New Bloomfield (NW Jefferson City; SE Ashland) \*90.3 150 h,v; 66 m, g, New Life Evangelistic Center (may threaten K211AC \*90.1 Jefferson City).
- MT Ronan K231AF 94.1 (KQRK 92.3 Ronan), h
- NH Concord W282AF 104.3 (WBCI 105.9 Bath ME), h,v [H. Wiggins]
- NM Jal 107.1 100000 h,v; 113 m, John/
- NY Jamestown W205BA \*88.9 (WYFG), h,v
- TN Lake City \*90.7 140 h,v; 628 m, Am. Family Assn. both h,v
- TX Huntsville K248C \*91.5 (WYFG), 210 h,v
- TX New Braunfels K218CF \*91.5 (KAWZ), h,v
- TX San Marcos K201DQ \*88.1 (KHCB-FM 105.7 Houston), v, KHCB-FM now considered noncommercial (\*).
- JT St. George K201DP \*88.1 (KAWZ), h,v
- NY Casper 97.3 90 watts h,v; 551 m, Bruce L. Erickson

- WY Sheridan \*91.3 450 h,v; 354 m, U. of WY
- AB Calgary \*105.9, g, 15 watts, to be on only 5-31-97 for "March for Jesus"
- MB West Hawk Lake \*103.7 22 watts v; t; tourist info station
- MB Winnipeg \*106.3, g, 15 watts; on 5-31-97 (as it was a year before) for "March for Jesus"
- NB Saint John CHSJ 94.1 50400 h,v (from 700 AM) [(to move from 1340 AM)]
- NF Corner Brook CKXX 103.9 47000 h,v/
- NS Halifax \*93.9 15 watts, g, 15 watts, to be on only 5-31-97 for "March for Jesus"
- ON Ottawa \*92.3 800 h,v, g. A similar station on 92.3 was to have been granted to Hull PQ with 800 watts, but interference would make the two mutually exclusive.
- ON St. Catharines 103.7 250 h,v, Brock Radio Collective (not a CHXL 103.7 Brockville booster)
- ON Sturgeon Falls \*93.5, 50 watts, temporary station on June 21-22, 1997
- NT Yellowknife CJCD 100.1 400 h,v (move from 1240 AM), CJCD Radio
- BN Tijuana XHRCP 107.7, mono, l, "with a signal about equal to XHFG 107.3's. There also was a pirate on 89.1 playing offbeat ethnic music."

## Call Letters Assigned

- AL Eutaw 104.3 WQZZ (WWQZ), sr, "Q-104"
- AL Stevenson 101.7 WMXN-FM (WMXN), rm; AM is in Fort Payne AL
- AZ Gilbert 103.9 KPRY (from KBZR), "Arizona's Party Station"
- AR El Dorado \*91.9 KAUG
- AR Gould 102.5 KAFN [ta TX]
- CA Alturas 106.5 KALT-FM (AM is in Atlan-/ CA Carlsbad 95.7 KMCG (KUPR), s, "adult urban," now "Magic"
- CA Escondido 92.1 KFSD (KOWF), now classical and on with 580 h,v; 312 m.
- CA Kingsburg \*106.3 KLVK (KLVS), "K-Love"
- CA Madrone \*90.1 K211CX
- CA Quincy 102.1 KHJQ (KQNC), rm, back on air, linked with KJDX 93.3 Susanville-AM.
- CA San Diego 97.3 KSON-FM (KSON)
- CA San Rafael 100.7 KKHI-FM (KKHI)
- CA Santa Barbara 107.7 KLDZ, seeks 930 h,v; 496 m

- CO Brush 106.3 KPRB ["KS 107.5"]
- CO Lakewood 107.5 KQKS (KHHT),/
- CO Longmont 104.3 KCKK (KQKS)
- FL Carrabelle 106.5 WCAF ["Mix 102.3"]
- FL Jensen Beach 102.3 WMBX (WHLG),/
- FL Monticello 105.7 (from 101.9) WTAL-FM (WJPH), 16000 h,v; 125 m, t, mono; AM is in Tallahassee. Now "W-Talk."
- FL Port Charlotte 100.1 WXRm (WFSN), mr. WXRm 105.5 Naples Park is country, "Q-105," and seeking new call letters.
- FL Tampa 100.7 WAKS (WUKS), "Kiss 100.7." Facilities to 414 m (100000 h,v).
- IL Glenview \*88.5 WGBK (WMA)
- IL Mount Vernon \*90.5 WAPO, g, on air
- IL Teutopolis 102.3 WKJT (WAES), but off the air until April.
- IN Crawfordsville \*106.3 WVXI (WNDY)
- KY Glasgow 94.1 WGBV, on air.
- LA Mamou 101.1 KBON ["The Beat"]
- LA New Iberia 93.7 KTBT (KDEA), s,/
- MA Boston \*90.9 WBUR-FM (WBUR). It acquires WUOK 1240 West Yarmouth MA, renaming it WBUR. The station was donated by Bock Broadcasting, owner of monophonic WXTK 94.9. "Besides this station, we own four FM stations on the Cape. We really have no use for it. We've been thinking about it for quite some time," said Bob Wakely of Bock Broadcasting. WBUR AM serves part of the Cape and "all of the islands." WUOK had tried a variety of formats and most recently simulcasted WXTK, but failed to achieve any ratings success.
- MI Glen Arbor 95.5 WJZJ (WTHM), j; LMA-to-buy with WGFN 98.1 there.
- MI Holland 96.1 WVTI (WAKX), r, "hot AC," now "I-96," but used "Variety 96.1" during a Jan.-Feb. transition period.
- MI Jackson 94.1 WXIK (WBHR), "Kicks 94"
- MN Albany 105.5 KDDG (KASM-FM), k, "The Big Dog"
- MS Durant 101.1 WLIN"-FM" (WKOZ-FM)
- MS Gulfport 96.7 WLRK (WXRg), rm, owned by WXYK (below)
- 107.1 WXYK (WXLs-FM), r, "Kiss 107"
- MS Pascagoula 105.9 WXRg (WXYK), op, taking format that was on 96.7
- MO Kennett \*89.9 KAUF [still k
- MO Mountain Grove 106.5 KELE-FM (KCMG),/

World Radio History

daily. ID with varying second city and ending with Rice Lake WI. Co-owned with WAQE-FM 97.7 Rice Lake.

WY Cheyenne KRRR 99.9, facilities to 50000 h,v (-7 m), C2. Format is o for now, with no commercials. Said to be on equipment tests, and asking listeners what they would like to hear, so the format might change. It plays CDs with very little announcing. Has a "weak signal. You drive behind the mountain they're near and you lose the signal. Three Cheyenne stations are now owned by Magic City Media—100.7 KOLZ, 'Colt'; 97.9 KIGN, 'King FM'; and KLEN 106.3, which they just bought." [(from "Mix 100")]

ON North Bay CHUR 100.5, "The Mix"/ Monophonic  
 CA Stockton KSTN-FM 107.3. "Has had a stereo carrier for over a year, but has yet to show any channel separation, so should be listed as mono." Perhaps their 41 kHz telemetry is triggering the reporter's stereo light.

### Format Changes

Formats are the same as in the 'FM Atlas'

AL Dothan WAGF-FM 101.3 sr, "Love 101"  
 AL Fairhope WGCX 92.1 r, modern AC  
 AL Montgomery WLRO 96.1 mr  
 WBAM-FM 98.9 r, CHR  
 AL Orange Beach WCSN 105.7 rm  
 AZ Phoenix KHTC 96.9 still o, now classic hits; LMA-to-buy with KZZP 104.7 Mesa.  
 AZ Wickenburg KRDS-FM 105.3 m  
 AZ Window Rock KWRK 96.1 j  
 CA Calipatria KSSB 100.9, on air.  
 CA Los Angeles KLOS 95.5 op: "We've become more classic rock lately."  
 CA Mount Shasta KMJC-FM 107.9 m  
 CA Pasadena KPCC \*89.3 t, mono, "the region's first all-talk alternative radio station." Its audience said to be increasing, but still short of the mark. This means the loss of \$175,000 in federal funds from its \$1.5 million budget. The feds want to see increasing local support in fund raising and audience growth in order to keep supporting such stations. Federal funds may also be cut off from the following stations, because their audiences and local finances fell short of expectations—KDHX \*88.1 St. Louis, WYSO \*91.3 Yellow Springs OH, WFUV New York and KBOO Portland OR, both 90.7.  
 KPFK \*90.7 Los Angeles had been under fire, according to a Feb. 10 "New York Times" article, but a year ago imposed more structure on a chaotic programming schedule. It eliminated programs devoted to medicinal hemp, atheists and Central America. Some defiant programmers accused KPFK of going mainstream. Pacifica stations like KPFK do not accept corporate underwriting. KPFK's audience and giving have increased to the point where federal funding is not jeopardized. [900 h,v; -343 m  
 CA Quincy KSPY 100.3 nt, mono, seeks/

 ON Bracebridge CFBG 100.9 o, still "The Moose"

**On Air—Real Stations and Pirates (selected)**

CA Davis KDVS "90.3, but only with about 30 watts. During renovation something fell on the transmitter and damaged it. During their recent hiatus, a pirate operated on 90.3, even interviewing a KDVS employee. The only "ID" heard was "This is not KDVS."  
 CA Sacramento 100.1—a rap-playing pirate in mono, asking for financial support. "What they need is brains! They're adjacent to KSSX 99.9 Marysville, which has billboards in the Sacramento area. Why not 97.3, 96.5, 95.7 or 93.3? . . . I'd vote for 97.3. . . Anything would be better than Alas @ 97.3 (KLLC San Francisco). They can't even pronounce their name right, rendering it 'Alice' (but the brain-dead lyrics and tone-deaf 'music' prove it's really 'Alas'. As for KLLC's billboard here

**Alice @ 97.3**

in Antioch, it's uglier than most graffiti. At first sight, I mistook it for a very old ad which had faded and been mutilated by vandals with spray paint." That station, along with KALC 105.9 Denver and WALC 104.1 Jerseyville IL, think the Alice name to be "hip and whimsical," and set apart—at least for female listeners—from "power" or "star" slogans. The stratagem seems to have paid off, at least for KLLC, which had been KRQR. Within two ratings periods it is said to have gone from a 1.3 to a 2.2. Steve DiNardo, g.m. of KLLC, said a name gives an edge to a station: "All successful stations tend to endow themselves with human characteristics over a period of time. It's that sense of personality that makes a station bigger than its music. It builds a relationship with the listener." Around here in MN, stations build not a human character, but are animalistic—with bears, bees, eagles and cats cluttering the airwaves.

CA Santa Maria 88.9—a station playing continuous music on weekends from a CD changer, and heard for about six months. It can be heard several km around the area. In Grover Beach is another FM pirate (frequency not given), "Excellent Radio," with a storefront location, giving out bumper stickers and advertising on an LPTV.

CT "WXKQ serving western and central CT" 92.9, heard at 80 km, "so this one must have decent power." Programming in some foreign language, with English IDs.

MD Sandy Point State Park—a temporary station on 97.5 by the Dept. of Natural Resources for the "Lights on the Bay" celebration Jan. 4, 1997. A verification received by Hank Holbrook from Sgt. Fran A. Gower, park ranger supervisor: "This was only for the light show. It was designed to add a pleasure backdrop while viewing the lights." Tower 5 m high with a tape loop put on by the Anne Arundel Medical Center Auxiliary.

now "hot adult contemporary," and "Kiss 92.1" (from "92-X"). IDs with Duluth MN-Superior WI. It returned its all-commercials format for a week before going to the new format. Owner J. Thomas Lijewski and announcer Jim Young interviewed many people on the air as to their preferences for a new format. It was all commercials for a while (as it had been in June '96 when it signed on), because "music is over-rated." Does its own programming, having snipped the satellite connection.

Lakeville, KREV 105.1 pr. All three (this, Cambridge, Eden Prairie) are "X-105 MN's

 Phone: (312) 321-1000

MN Redwood Falls K295AD 106.5, but KXAX 101.5 St. James MN interferes with reception of primary KCGN 101.5 Ortonville MN, "which causes great interference. Engineers are working on the problem."

MN Renville K291AB 106.1, but the FCC has opened 105.9 at Belview MN, "which would force this translator to change frequency."

MN Willmar K293AH 106.5—but the FCC opened 106.5 for Sunburg MN, which "will force a channel change" costing about \$800.

NY Crown Heights, Brooklyn, "Radio Moshiah and Redemption" 91.9, commercial. "I heard it loud and clear on a Walkman from the elevated train in Brooklyn. Stereo light was on but they had a talk program so I don't know if they have real stereo." On fulltime except on the Sabbath. Run by Lubavitcher Hasidim; near Eastern Parkway (south side) and Kingston Avenue. "Dedicated to the belief that Lubavitcher Rebbe (head rabbi) Menachem Schneerson, who died in 1994, is the messiah (moshiach) and will soon return to life. Programming includes recorded speeches by the Rebbe (all in Yiddish), Hasidic songs in Hebrew, old Lubavitcher programs from WEVD (formerly 97.9 FM, now 1050 AM), and live commentary on religious topics, mostly in English. Gave a mailing address for contributions—383 Kings-ton Ave., Ste. 94, Brooklyn NY 11213. I'm about 11 km from the station; I can always get it but it's very weak... Most of their target audience lives within a few blocks of the station so they could probably get by with two or three watts of power."

NY Queens 87.9—a new Haitian station. The FCC closed down a Haitian pirate on this frequency in 1994; see Aug. '94, p. 4, col. 2."

ND Ellendale K252CW 98.3. Coverage may be reduced to the city of license because of the new KYNU 98.3 Carrington ND. "May be OK, but channel change would be best," costing about \$800.

OR Eugene 104.1—unlicensed station, or possibly cable radiation, no DJ, no ID. Soft adult rock, heard since Feb. 28.

PA Bethlehem W289AH \*105.7

PA Jersey Shore WJSA-FM 96.3, having moved from 93.5 [from 96.3]

PA Lewisburg WCXR 103.7, having moved/

PA Muncy WHTO 93.3, having moved from 103.9. "The above three moved on March 7 at noon."

PA Waynesboro W210BE \*89.9 "continues good service" for the area. It is owned by Antrim Faith Baptist Church.

SD Aberdeen K253AB 98.5—"fundraising underway to move equipment to the west side of town. After \$1200 is raised it takes a year for FCC approval." New site to be on a silo promised at free rent. "Right now we are paying \$150/month for rent, plus \$45 for electricity. . ."

SD Brookings K292E1 106.3—applied for higher power and move to 107.1; "however, the FCC now opened that channel for Clear Lake SD. Reapplying for another channel, causing 6 month delay."

SD Redfield K249CX 97.7: "Application for another station on 97.7 in Redfield will force channel change. About \$800."

SD Sioux Falls K252- 98.3, "but has problems, especially with receiving the 101.5 signal from main tower at Summit. Please pray!"

WI Chippewa Falls WCFW 105.7, having moved from 105.5, now a C3, "C-106" (not strict). Still has polkas in the morning and 5-7 p.m. "That's 'chore time'. The cows are supposed to give more milk when polka music is played in the barns!" Listeners hearing an improved signal are asked to call (715) 723-2257. Also on is W256AE 99.1 there, and announced on WCFW.

ON Toronto 101.3 100 watts h,v, affiliated with CHIN 1540 and CHIN-FM 100.7. "CHIN AM

gets plenty of interference in metro Toronto from clear channel stations WDCD Albany and KXEL Waterloo IA, and was looking into the possibility of an FM booster (sic). This testing is very preliminary."

**SCServices**

*Symbols are as in the "FM Atlas"*

CA San Francisco KOIT-FM 96.5 t(!). It scrolls calls, format, plus weather and emergency data (such as news of chemical spills). Sixty-seven continues to be Bonneville data, while 92 is "KLDS," the Mormon service common on Bonneville stations.  
 CO Colorado Springs KRCC \*91.5—The Radio Reading Service of the Rockies finally came on the 67 kHz. "We were hung up for a long

time because the owner of the property on the mountain where KRCC broadcasts from wanted \$200 extra a month for the subcarrier. They're smart people and know that only a small area on the mountain gives line-of-sight into both Colorado Springs and Pueblo. We got a grant from the Civitan Club to pay the \$200 for six months, which goes to KRCC and they make the payments. . . Since you won't sell radios to us, can we mention you when listeners call wanting radios?"

IL Chicago WGCI 107.5—"WHCI," Hellenic Communications, Inc., announces that the signal will be stereo and not receivable on present radios. It is on WGCI's 92. Not known if it is moving to another subcarrier or subcarriers, or to main carrier FM. WEJM-FM 106.3 Lansing IL is being sold to Crawford Broadcasting (WYCA 92.3 Hammond IN) for \$14.75 million. WEJM-FM must be sold as a result of the Evergreen/Chancellor/Viacom merger. Might WYCA lease WEJM-FM to the Greeks, and not turn it into religion, or if "WHCI" moves to other subcarriers it could have 67 for the left channel and 92 for the right channel, and modify people's stereo boomboxes accordingly? Change was to have taken place as of Mar. 16.

KS Lawrence—the Audio Reader website (Jan. p. 5, col. 1) has added a section on the history of SCS. It says in part that in the early days of FM, "Some FM broadcasters played easy listening music and preceded all commercial breaks with a subaudible tone. Then, they sold the signal to stores, with receivers that would mute the commercials when the tone was detected. The FCC outlawed this practice, saying that although it would be legal to build a radio that could detect commercials and dump them, it would not be legal for broadcasters to generate any kind of special signal on the air to identify commercials. But this practice helped create a market for commercial background music." One station I recall having such subaudible tones for dumping commercials was WFMF 100.3 Chicago, the "functional music" station.

NY New York WBLS 107.5 tL, 92, "GRD," standing for Grupo Radial Delgado. It is a subsidiary of a large NY-based travel/courier company. Programming is aimed at Latinos in general; there's no emphasis on a particular country. Contact 'em at Delgado Travel's main branch, 79-08 Roosevelt Ave., Jackson Heights NY 11372.

TX Austin KUT \*90.5—67 is for the TX Senate; 92 is the reading service (tT,T). This is the opposite of what they initially planned.

BC—address for "Apna Sangeet," the Indo-Pak SCSMO that may be on CJJR 93.7 and on an Edmonton SCS station (Sept. p. 4, col. 3), is Apna Sangeet Radio, 7711 128 St, Apt. 23, Surrey BC V3W 4E6; (604) 590-3555.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour, as required by the FCC and Industry Canada (at or near top of hour)*

GA Leesburg WJAD 103.5 103.5 The Rock

HI Pearl City KUCC 101.9 CD-101.9  
 ME Auburn WKZS 99.9 no longer "Kiss 100."  
 Now Mix 96.9 & 99.9, "with emphasis on their Portland translator on 96.9. A 50/50 mix of yesterday and today. They sound same; added a few more oldies. A little boring. Bet it won't improve ratings!"  
 MN Proctor-Duluth-Superior (WI) KUSZ 107.7 Z 107.7 (sometimes "Twin Ports Power Country Z 107.7 FM") from "USA Radio." It "pairs music from today's top country artists with that of their mentors—for example, LeAnn Rimes and Patsy Cline. It plays four 107-minute blocks of straight music daily." Not strict: gives calls twice an hour.  
 MO Kansas City KLTH 99.7 Lite Rock 99.7 (from "Lite 99.7 FM")

 Glad to hear you're doing better. Looking forward to the new FM Atlas," J.G., Toms River NJ.

**Selected AM Happenings**

AL Evergreen WIJK 1470 returns to air, parallel to WPGG 93.3.  
 CA Palo Alto KDCC 1220—simulcasts classical from 102.1 FM, with the demise of KidStar Radio.  
 CO Aspen KRKE 1260—deleted after FCC learned licensee "will not appeal and present evidence" in its show cause case. It had been off the air since May, 1993.  
 CO Windsor KEZD 1580 deleted; FCC dismissed more time to construct bid.  
 CT Waterbury WQQW 1590—is another station that deleted so that WWRL 1600 New York can expand. (see last month p. 4, col. 2, under "NJ Plainfield"). It was bought by Unity Broadcasting, WWRL's owner.  
 FL Cocoa Beach WXXU 1300 becomes travel information—"the first affiliate of Florida's statewide travel network." It will cover 19 stations within six months. FDOT plans to install

4600 blue information signs on highways throughout the state. The talk programming will feature information on the state's tourism, attractions, restaurants, and will carry emergency information and public service announcements. FDOT is spending \$12 million on the project. Not announced if the stations will still play some of their regular programming and local commercials, or if the entire broadcast day is to be given over to the FDOT.  
 FL Mount Dora WNTF 1580 had been silent; now on with news and talk.  
 GA Atlanta 540 and 730—the GA DOT frequencies are hard to hear and signs mentioning to tune them in have disappeared along the highways. Atmospheric conditions plus the granite in the area have made grounding the radio signal difficult, but the "DOT has no plans to give up on the project and is trying to move to the FM band to improve reception."  
 WGST 640 now has some different programs from its mono talk affiliate on 105.7, with NASCAR racing on AM, while keeping Rush Limbaugh and "Saturday Morning Live" on FM. Also, a gardening show, "The Home Landscaping Show with Dottie Myers" comes to the AM, 6-10 a.m. Sat. and 10 a.m. to noon Sundays, which "fills the void left when Kathy Henderson's popular gardening show fell victim to a format change at WQXI 790 AM" (see Jan., p. 6, col. 3).  
 GA Nashville WNGA 1600 had been silent; now religion.  
 IL Chester KSGM 980 had been silent. Returns with country, parallel to KBDZ 93.1 Perryville MO.  
 IL Chicago WJJD 1160 now inspirational talk—at least temporarily. "I don't know what gives. It's totally boring to listen to." See last month, p. 4, col. 3.  
 IN Terre Haute WJSH 1300 still silent; claiming that a flood is preventing its return.  
 MD Rockville WINX 1600 to change calls (WINX now being used as the calls for Indian Head MD 1030), and be converted to traffic information. It will be bought by the Montgomery County Dept. of Public Works and Transportation for \$450,000. The department then would improve the technical facility of the station, spending up to \$150,000 for the upgrade. Half of the cost to be paid by the state. "The purchase drew skeptical reactions from some council members."  
 MA Ashland WRPT 650 had been silent; returns with talk.  
 MA Boston 590 is now WEZE; while 1260 is WPZE (formerly WEZE), both with Christian programming. [KidStar folds.  
 WNFT 1150 k, parallel to WKLB-FM 96.9, after/MA Natick WJLT 1060 had been silent; now on with contemporary Christian.  
 MI Dearborn WDOZ 1310 parallels WNIC 100.3 after KidStar folds.  
 MN Richfield KKMS 980 is all Christian talk radio, taking over the former studios of KEGE AM. Employees are scraping the Kurt Cobain and Nirvana stickers off the station walls. It'll also have MN high school hockey games and St. Paul Saints baseball. Owned by Salem Communications, its target audience is 25-54 year olds, typically female, well-educated and homeowners.  
 MN St. Paul KSTP 1500 had Barbara Carlson as talk show host. She is the ex-wife of MN Governor Arne Carlson. She said she was bored after seven years on the air. In her tell-all fashion, she mentioned intimate details of their marriage. "Her ratings peaked about three years ago, but have fallen slightly since then, particularly in the key 25-54 demographic group." In her book, *This Broad's Life*, she had "unflattering references to her ex-husband, and told about their stormy 12-year marriage, including details of their wedding night, her battle with the bottle and other intimate details of her very public life." Her ex-husband had been a guest on the show. [adult standards; had been silent.  
 NJ Bridgewater WBRW 1170 back on with/ NJ Oakland WVNJ 1160 is hard to get, even in its target area. W276AQ 103.1 Fort Lee NJ now

sounding a bit distorted 5 km from its transmitter, and still carrying WJUX 99.7 Monticello NY. "This is probably due to a new high-rise building in the vicinity. [But] I can hardly receive WJUX's competitor, WVNJ. . ."  
 NJ Paterson WPAT 930 Korean plus Spanish language sports. It is leased by Heftel to AM Korea. "This is the New York area's second Korean language station, not to mention the Korean SCS religious station on WAXQ 104.3 [67 kHz]. WPAT had been programming continuous Spanish popular music with no commercials or hosts. The Korean programming is interrupted for play-by-play sports in Spanish. It also simulcasts the Korean newscast on low-power TV station W178M New York, ch. 17 (9:00 to 9:30 p.m.). AM Korea and KTV could be in common ownership."  
 NY Auburn WAUB 1590 back on air with classic rock, parallel to WLLW 93.7 Clyde; LMA-to-buy with WFLK 101.7 Geneva, WNYR 103.5 Sodus. NY Rochester WCMF 990 was to be donated to a local college, but instead found a buyer in the form of Crawford Broadcasting Co., for \$550,000 cash. Crawford will combo it with WDCZ 102.7 Webster NY.  
 NY Sandy Creek WSCP 1070 silent, but expects to return to air later this month.  
 NY Schenectady WGY 810—endures a threat of a boycott by blacks after a newspaper ad for the station depicted an aboriginal warrior, spear in hand, dancing. The caption said staying young in radio requires "an almost primal disregard for dignity or civility." Anne Pope of the local NAACP said, "The ad was despicable, and the wording was insensitive and offensive to a person of color." WGY then discontinued the ad. But black leaders said the station didn't go far enough and called for the ouster of talk show host Mark Williams, who they believe is part of "the racist nature of WGY's programming." Williams remained defiant and said on the air, "A select group of racist individuals chose to take our celebration of 75 years of service. . . and twist it to fulfill their own racist agenda."  
 NC Burgaw WVBS 1470 was silent; back on with gospel.  
 NC Fayetteville WIDU 1600 wasn't notified when a new cellular tower was built close to its transmitter. The new tower, WIDU contends, interferes with WIDU's coverage pattern. Wes Cockman, WIDU president, stated that he still has trouble receiving the gospel station in areas where there were no reception problems before the construction of the Fayetteville Cellular tower. WIDU can't afford the expensive engineering analysis to prove that the cellular tower is still disrupting the WIDU pattern. Public mobile service licenses, according to Sec. 22.371 of the FCC's rules, that construct or modify towers within 1 km of a nondirectional AM station or within 3 km of a directional AM station, must notify the AM station in advance of the planned construction or modification. Thus Fayetteville Cellular must pay the FCC—not WIDU—a \$4000 fine. Fayetteville Cellular had protested the fine, but the FCC denied the protest and upheld the fine.  
 OK Wagoner KXTD 1530 had been silent; on with Mexican—an LMA with La Tremenda Radio Medico, Inc.  
 PA Doylestown WBUX 1570 had been silent; comes on with all news.  
 TX Highland Park KDMM 1150 with traffic and news, and in a combo with KLTy 94.1 Fort Worth.  
 UT Spanish Fork KHQN 1480 is the nation's only fulltime Hare Krishna radio station. It is owned by one Caru Das. The station's programming is 40 percent music, including Krishna rock, "the counterpart to Christian rock music," and lectures on vegetarianism, as well as giving vegetarian recipes.  
 VA Richmond WVNZ 990 had been silent; returns with AP news.  
 WA Everett KWYZ 1230 had been silent; to be Korean. KKBV 1450 Puyallup also converts to Korean, an LMA-to-buy with Sea-Tac Korean Radio.

WA Seattle KKDZ 1250 silent after KidStar network closes down.

WV Weston WHAW 980 reported silent. "Hope that you are feeling a lot better. Keep up all of the good work," T.R., Hagerstown MD. "Hope you are recovering nicely. . . Good health," K.O., Joliet IL.

 MN—Minnesota Public Radio offers its programming in many cities through translators. But "translators are not protected from interference or encroachment from other stations. MPR will begin the process of protecting

**What? FCC Hearings for Educational Stations?**

these translators. Also, some communities, like Ely, Albert Lea and Fergus Falls have only one translator which means that some listeners don't have adequate access to both MPR's services. We'll work to improve that, too. MPR must accomplish three steps for that to happen: 1) locate reliable tower space; 2) be granted radio frequencies by the Federal Communications Commission; and 3) raise the necessary dollars to pay for the project. That may include some funds from a legislative appropriation as well as funds from your region," writes Valerie Arganbright, in the MPR section of the March "Minnesota Monthly."

Milestone (Kilometerstone?) Communications had also applied during a 1990 filing window that the CRTCC disallowed, and would play "world urban contemporary music." Denham Jolly of that company said his station would offer rhythm and blues, jazz, soul—with a beat from all over the world. CHWO AM of Oakville would offer a "blend of contemporary easy listening music and nostalgia music from the late '30s, '40s and '50s." Douglas Bingley of Toronto proposes for his station "rhythmic contemporary hits." Vancouver-based Radio One asks for a station offering an "adult pop/world music format." J. Thomas Wood, another previous applicant, specifies a dance music format. Hearings before the CRTCC start April 14 in Toronto.  
 ON Welland 91.7 27400 h.v.—CHOW AM.  
 Several conflicts among U.S. noncommercial FM station applications have forced the FCC to designate the following for hearing. The Commission hopes to determine 1) the number of other reserved channels there might be in the area; 2) whether a share-time arrangement could be done; 3) which of the proposals would best provide a fair, equitable and efficient distribution of radio service. The conflicts are for:  
 CA San Ardo \*91.7 Pataphysical Broadcasting Foundation for a repeater for KUSP 88.9 Santa Cruz, while Central Coast Educational Broadcasters wants 91.3 in nearby King City CA.  
 LA Jena \*88.1—Educational Radio Foundation, which conflicts with American Family Association's application for \*88.1 in Marksville LA.  
 MD Leonardtown \*91.7 for a satellite for WETA \*90.9 Washington DC, while WGTS \*91.9

Takoma Park MD wants to increase to 25000 h.v; 150 m.

OH Defiance \*91.9, as a satellite of WGTE-FM \*91.3 Toledo. This conflicts with WKO \*91.9 Howe IN wanting 6000 h.v; 93 m.  
 WV Point Pleasant \*88.1—Positive Alternative Radio applies for this channel, while WMUL \*88.1 Huntington wants 9000 h.v; -12 m.

  - VI Frederiksted 101.7B1, Apr. 14-May 15
- "I'm glad your recovery is going so well. It was a nice surprise to receive the February FMedial (although the P.O. must have lost it temporarily—it took 14 days to get here! [NY state])."
- Hope you are feeling better as time moves on. Keep up the good work," D.J.V., Chicago.

**Satellite Digital Radio Service Given FCC Nod**

After five years of hearing the pros and cons about a national satellite CD-quality radio service, the Federal Communications Commission has acted. It set aside certain frequencies in the 2 GHz band. Four companies are expected to bid on licences. They are CD Radio of Washington DC, American Mobile Satellite Corp. of Reston VA, Digital Satellite Broadcasting of Seattle, and Primosphere in New York City.

Frequency blocks assigned are: A 2305-2310 and 2350-2355 mz. B 2310-2315 and 2355-2360 mz. C 2315-2320 mz. D 2345-2350 mz. The U.S. has been divided into 46 major economic areas, plus six for AK, HI, the territories and Gulf of Mexico. Blocks are to be auctioned, and license terms are for 10 years.

Most of the broadcast industry has opposed satellite-to-home radio. It perceives it as a threat to radio's "localism." Satellites may send signals out nationally or covering only a certain region. It will take some three years for a service to get underway, once licenses are given. A special radio with a tiny disc-shaped antenna would have to pull in the signal. Such a radio might include tuning in the present FM and AM bands.

It would be a pay service, with costs to consumers estimated at \$5 to \$10 a month.

Reaction from broadcasters has been swift. Marc Morgan, g.m. at WSB-FM 98.5 Atlanta, says pay services "had better be unique and significantly better than what people are getting for free or, in the long run, nobody will go for it." But the future of pay radio might not be in big cities like Atlanta, well served by conventional media as they are. David Margoese, chairman of CD Radio, says the real market is rural America. People who like classical music might enjoy pay radio when the local station only has farm news.

Reception in vehicles might be possible, but any such pay service would have to install millions of "gap fillers" or terrestrial repeaters to cover underpasses, tunnels and shadow areas near tall buildings and mountains.

**Small Print Happenings and FM Industry News**

Chancellor Broadcasting and Evergreen Media merge in a stock swap worth \$659 million. The merging companies agreed to buy 10 Viacom radio stations for an inflated price of about \$1.08 billion. The surviving company is to be called Chancellor Media Corp. It will own 103 radio stations, including five FMs in Minneapolis-St. Paul. Those are KTCZ 97.1, KDWB 101.3, KEYE 102.1, KQQL 107.9 and WBOB-FM 100.3.

Is RBDS at 57 kHz a failure? An editorial in "BE Radio" makes it seem so. Seven long years have passed since the RBDStandard was established in this country. But the format "is still hardly a blip on the consumer's radar screen. The rare consumers who want RBDS radios not only find them difficult to obtain, but learn that it's tough to find a sales outlet where anyone even knows what they're talking about.

"Minimal penetration, awareness, interest and availability ... that's a pretty definite flop by anyone's measure. Whether it will remain so is an open question, but to paraphrase Frank Zappa, if RBDS isn't dead, it sure smells funny. The format's resuscitation will only get harder as time goes on."

The author, Skip Pizzi, mentions that the European version, RDS, is doing just fine, which makes its lack of acceptance over here puzzling. The only bright spot in the 57 kHz arena is

leasing by paging companies—but there's still room in the 57 kHz spectrum for a station to deliver its own call letters' and format messages. Right now, the display function is more of a toy, and no real communication service that benefits the broadcaster or enables the station to make money has emerged, Pizzi alleges.

TIP would stand for "turn in a pirate," if the Minnesota Broadcasters Association has its way. Its newsletter mentions hobby transmitters that can be modified for more output. The newsletter repeated the story of "Beat Radio," which was shut down in Minneapolis, and which "interfered with licensed stations," although stations suffering the alleged interference were not named.

"Aspiring pirate broadcasters may view the budget cuts at the FCC and the subsequent decline in enforcement activities as a window of opportunity to go on the air unchallenged. It is imperative that our industry take an aggressive stand against illegal broadcasters. Whenever you hear of an unauthorized broadcaster operating in your area, please make an effort to record the transmissions and assemble any other documentation of the broadcasts that you can. Forward this information to the MBA office. You can be rest assured that we will work diligently with legal counsel to shut down the pirate."

And the FCC's cracking down on scanners. In a release the FCC said Sec. 15.121 of the rules states that they cannot tune in frequency bands allocated to cellular radio service, or be readily modifiable to tune in those bands. "The modification of scanners on a substantial basis to receive cellular frequencies will be considered to constitute manufacture of such equipment in violation of FCC rules." Apparently, the lone hobbyist modifying a few radios at a time is immune from such FCC persecution or prosecution. Also, you can't intercept and divulge cordless telephone conversations. Apparently you can listen, but not listen and divulge. And there is no limitation on the manufacturing of scanners that tune in the cordless telephone frequencies.

Pres. Clinton has called again for free air time for candidates to use in their home states and adjoining states. NAB is trying to block the McCain/Feingold bill, which Clinton favors. And the administration introduced a budget calling for \$47.2 billion in expected spectrum auction revenue, part of which might come from selling satellite DAB spectrum.

Don't mess with radio station limits—that's the message to the FCC from Sen. Conrad Burns. He's chairman of the Senate commerce committee. Burns made it clear to FCC chairman Reed Hundt that only the Justice Department has authority to determine if a merger in stations would harm local competition. If the FCC studies mergers for their effect on diversity or competition, Burns said that would "negate the very deregulation of the radio industry that Congress intended [and] add unnecessary regulatory hurdles." Whether or not Hundt listens remains to be seen.

Also notifying Hundt was Billy Tauzin (R-LA), who is House commerce telecommunications subcommittee chairperson. In a letter, he told the FCC chairman that the current review by the Commission of radio ownership applications for "competitive impact" in a local market was "inconsistent with the intention of Congress to relax radio ownership rules, [and] ownership of multiple radio stations in the local market by one licensee is precisely what Congress intended to permit" with the enactment of the Telecom Act. Another Hundt pen pal was Sen. Judd Gregg (R-NH), chairman of the Senate appropriations subcommittee that provides FCC funding. He wrote that he "expects the FCC to administer its radio ownership rules consistent with Congressional intent."

There are 10 cases nationally where mutually exclusive applications have been filed and not resolved. These are carryovers from when the FCC would have allowed parties to settle

differences with the winning party paying the others for withdrawing their applications. Now the FCC has lifted the settlement caps for those 10 cases. The applications had been frozen by a court action that threw out the Commission's comparative licensing standards. Now the parties involved are free to settle for any mutually agreeable amount.

Downsizing at Canada's CBC is having an effect on morale, according to an article in "Broadcast Technology" magazine. It's the network's attempt to deal with a \$414 million cut in federal subsidies, and affects both radio and TV. Some 996 workers are getting "redundancy letters." Another 700 were cut last year, and still another 700 got buyouts or their jobs ended by attrition. And 800 more are expected to lose their jobs later in 1997, for a total job loss of 3,200. The Chretien Liberals had pledged long-term stable funding for the CBC. Former CBC President Tony Manera, who resigned in 1995, wants the CRTC to investigate whether CBC is still able to meet the conditions of its licence.

Hard hit by the CBCuts are regional radio positions, where 81 jobs are being axed on Canada's West Coast. Midday and drive time radio shows are scheduled to be eliminated with the loss of 22 on-air personalities in British Columbia alone.

Canada obits: Larry Wilson, 55, died in his sleep; he left CHUM-FM 104.5 in 1988 after working in news and sports for almost 20 years. Bill Ballentine, who was a leader in the development of FM policy after "a brief illness." No age given. He started at the CBC, and moved to CKFM 99.9 Toronto in 1964, becoming vice president and general manager in 1975. He later helped launch CJEZ 97.3.

For the first time in nearly a decade the New York Philharmonic returns to the air with radio broadcasts. The orchestra will be heard on a network including WAMC \*90.3 Albany NY-WAMQ 105.1 Great Barrington MA. They'll carry the concerts the last Saturday of the month through May. Jamie Bernstein Thomas, daughter of the late Leonard Bernstein, will do commentary. Program host is Gregg Whiteside, morning announcer at classical WQXR 96.3 New York city. Listener response to the five-month trial series of broadcasts will help determine if there is a future for the Philharmonic and other orchestra broadcasts.

WAWZ \*99.1 Zarephath NJ completed its recent sharathon, netting over \$400,000 in pledges. Not to be outdone, KGB1 \*100.7 Omaha NE raised \$627,000. That was \$2000 over its goal.

The FCC proposes raising the fees it charges stations, and chances are the new fees will be enacted. For FM the fees look like: Class C, C1, C2, B . . . . . \$1750  
Class A, B1, C3 . . . . . \$1050  
AM Fees range from \$1750 for a 50,000 Class A to \$480 for a small local fulltime station or a daytimer.

CBS and Greater Media arrange a swap. Greater Media gives up KLSX 97.1-AM, while it gets Boston area's WBOS 92.9, WOAZ 99.5 and Philly's WMMR 93.3. These are added to Greater Media's WMJX 106.7 and WKLB-FM 96.9 and WROR-FM 105.7. CBS's L.A. holdings also include KTWV 94.7, KRTH 101.1, KROQ-FM 106.7 and KCBS-FM 93.1.

In another swap, Bonneville gets KPX-FM 95.7 San Francisco to combine with its KOIT-FM 96.5, while CBS gets KITS 105.3 to go with its KFRC-FM 99.7, KLLC 97.3, KOME 98.5 San Jose and KYCY 93.3. CBS gives up KLOU 103.3 St. Louis, which Entercom gets in a complicated three-way deal.

Jacor buys three more in the Rochester NY market—WMAX-FM 106.7, WMHX 102.3, and WRCD 107.3. Earlier, it announced plans to buy WVOR 100.5 and WNVF 95.1. Saga Communications is picking up WFMR 98.3 Menomonee Falls WI and WFMI 106.9 Brookfield WI for \$5 million from Dick Harris. Harris, according to the

"M Street Journal," is a former president of Group W/Westinghouse Broadcasting. Saga owns WKLH 96.5 and WLZR-FM 102.9.

KUAD 99.1 Windsor CO ordered by the FCC to pay \$3000 for violating FCC sponsor identification rules. KUAD said the ad included an 800 number which would lead people to the sponsoring company, but the FCC said that wasn't good enough. The ad must state who is buying the time, or name the product. Similarly, the FCC told a group of Oregon broadcasters that the real sponsor, the Tobacco Institute, must have been mentioned in a series of political spots. Time was bought by the "Fairness Matters to Oregonians Committee." The FCC held that the stations had a duty to find out what the FMOC was and who funded it.

The Justice Department has stopped Gulfstar's plan to buy KFAY-FM 98.3 Bentonville AR and KKEG 92.1 Fayetteville to add to its holdings of KEZA 107.9, KKZQ 101.9 Lowell, and KKIX 103.9. The deal would have given Gulfstar 62 percent of the radio ad revenue in the market.

Wisdom from *Religious Broadcasting* magazine by D. Scott McIntire, program director, KJOL \*90.3 Grand Junction and KDRH \*91.9 Glenwood Springs CO: "While your station may have a target demographic, God has no limits on the demographic He wants to reach, so be open to the changes necessary to fulfill your mission statement."

Station totals as of Feb. 28—FM radio 5433, 92.1 through 107.9 mhz. For 88.1 through 91.9 it is 1862, for an FM total of stations on air and licensed 7295, plus oodles of translators.

From the classifieds: Looking for a copy department editor, also an anchor/reporter. Tap, resume and news scripts to Keith Edwards, news director, Central Radio Group (WAXX 104.5-WIAL 94.1-WECL 92.9), PO Box 1, Eau Claire WI 54702.

SCS generator, Moseley SCG-8, rebuilt and tuned to frequency desired, \$295, Rick Johnson, Hall Electronics, 706 Rose Hill Dr., Charlottesville VA 22901; (804) 984-4255.

FM allocation study \$149. Complete FM application \$1200. Scientific Broadcast Systems, 1680 Hwy. 62 NE, Corydon IN 47112; (812) 738-3482. He tells me he's retired and only takes work he has time for.

Media communication faculty position, tenure track. Must have some media experience, Ph.D. preferred, and agree to spiritual mission of Asbury College (% Provost), Wilmore KY 40390. Minorities and women encouraged to apply.

Class A educational FM for sale in the Portland ME market. Get license, tower and transmitter for \$150,000. WMSJ \*91.9 PO Box 432, Freeport ME 04032. Att. Kory Vandenhouten, (207) 865-3448. Must be WMSJ for sale, with them keeping \*89.3, which should be getting call letters real soon.

Harris 2 kw transmitter for sale. Currently on air at 89.3 FM, \$5000. Jeff Stromquist, WNCB, 2828 Piedmont Ave., Duluth MN 55811; (218) 722-3017.

MICROCOMM is the newsletter covering the exploding personal broadcasting field, including low power FM and free radio operators. Free sample from PO Box 5354, High Point NC 27262.

FM FORUM

CONTRIBUTIONS FROM READERS

The Daily Hampshire Gazette in Northampton MA had a letter to the editor by reader Brian Anastasi, who reacted to the news of commercial station WTTT 1430 Amherst MA receiving NPR programs from public station WFCR \*88.5. [See last month, p. 2, col. 1.]:

"I for one am not thankful for the collaboration of the public radio station WFCR and commercial radio station WTTT in Amherst. Rather than seeing this as some sort of 'improvement' for radio listeners, I feel this sets a dangerous precedent.

"The takeover of two-thirds of the

weekday programming on WTTT by WFCR effectively removes one more source of local news and information from our area. . . WTTT made an attempt to reasonably serve Amherst. . . The 'leasing' of 40 hours a week of airtime for one year for \$67,000 means that WTTT has become a commodity, accessible only to those who can afford it. The increase of syndicated programming from outside the area is particularly lamentable [where there is] a wealth of people knowledgeable in just about any imaginable subject.

"When WTTT signed on the air on April 2, 1963, the past president of the Amherst Chamber of Commerce called it 'the most exciting new development in town since the Amherst theater took over the livery stable'. Now, the radio dial in Amherst sounds exactly like the radio dial in Springfield MO or Springfield IL."

Tom Davis, g.m. WTTT and its FM affiliate WRNX 100.9, said the arrangement makes perfect sense, in that it taps the programming capabilities of public broadcasting and the marketing and business strengths of commercial radio. "There's no better place to (expand public broadcasting) than the Pioneer Valley. This was a niche that needed to be filled," said Davis.

A person checked the Internet and found me mentioned several times, when searching where to buy the G-E "Superadio." Also mentioned was SCS Radio Technology in Springfield MO at (417) 881-8401; Bennett Brothers of Chicago and Mahwah NJ, Gilfer Shortwave in NJ, (800) GILFER-1 (US); and Universal Radio, Reynoldsburg OH, (800) 431-3939. Both SCS Radio Technology and I offer the model modified for SCS reception.

"Your comments about the G-E Superadio III (February, pp. 7-8) were very interesting; FMedia! would benefit from more of this sort of thing. The radio's highly variable quality probably is responsible for much of the dissatisfaction some of your customers express concerning your SCS modifications. Perhaps you should just stick with RadioShack and avoid the grief!" writes Nick Lombardi. Now the latest G-E SR III I tested was quite good. Problem is that people perceive the G-E as superior. I have had two RadioShacks returned by people wanting the G-E, thinking the General Electric will be better, but I have my doubts.

FM Atlas-17, is now ready. We took delivery of 51 boxes of the books March 13, so they're ready to mail. The new edition features 109 pages of maps, and is 224 pages total, listing FM stations by geography and frequency, showing main stations, translators and SCS stations—and if at 57, 67 or 92 kHz.

The book shows main station formats, stereo status, nonIDs, and multi-city IDs in use. Price is only 45 cents more than the last edition, or \$16.95 cover price, or \$18.50 with shipping; discounts for two or more copies. Order by mail or charge card at 1-800-605-2219.

I had to pay the printer extra to clean the negatives. Their process even picked up White-Out and other corrections on the maps.

Until April, when I hope to have an issue out earlier in the month.

Bruce F. Elving

day, taking over from 1600 AM. "FM switchover is due anytime."

HI Aiea KGMZ 107.9 o, "1 Oldies 7.9" (from "Quality Rock for the Islands")

IL Aurora WYSS-FM 107.9 keeps announcing it is going Spanish, but keeps people guessing as to when.

IL Joliet WLLI 96.7 pr, "by popular demand. It is a good-sounding classic rock station that plays a lot of the standard classics, some deep cuts, and about 7 to 9 currents from heritage artists. It avoids the triple (AAA—Gin Blossoms, Sheryl Crow) and the grunge (Bush, Sound Garden) and gives straightforward listenable 'rock and roll'. It has a good signal and can be heard with no problem. [This station is] like it was prior to 1996, when it experimented with country—a format that swelled from two stations to six in the Chicago area last year. The station also makes its position clear: 'Why listen to talk, when you hear great rock & roll?' By taking a poke at various talkers in the market—Steve Dahl, John B. (Brandmier), Howard Stern and Eric 'Mancow' Muller. . . The jocks always have something good to say during breaks (news-worthy or funny).  
"As for the Howard Stern/Mancow war—it's getting close: Robert Feder of the Chicago Sun Times says that Howard Stern has moved from 13th place in the fall book to inside the top 10. . . I am a big Stern fan!"

IN Auburn WGLL 102.3 nt, mono, parallel to WGL AM Fort Wayne.

INCrawfordsville WAQN \*91.3 pr, "alternative."

IN Hammond WYCA 92.3 gt, shifting to more talk after acquiring WYBA Lansing IL (see "Call Letters," above). "These two stations will represent the premier gospel program sources—particularly among Afro-American listeners—in the market," said Taft Harris, g.m. of WYCA. New, expanded studios will be added to accommodate WYBA.

ON Owen Sound C1XX 106.5 rk, with 30 percent new country and 70 percent rock. Still "K-106.5." It is second in the 110,000-person market, which makes it larger than Thunder Bay. CFOS (AM) began in 1940 and is a 7500-watt station on 560, and still rated No. 1. "Recently, we had the distinction of being turned down by the CRTC for an AM repeater in Collingwood. You'd expect to get a medal for an AM application!" said Ross Kentner, g.m., as quoted in "Broadcast Technology." The FM, with its rock and country flavours, covers "the demographic spectrum, and it has worked well for us."

PQ Verdun CKOI 96.9 m, mixing '70s disco with current dance hits in English and French; ID with Montreal.

JA Guadalajara XHPI 93.1 rl, "Mix FM"

**On Air—Real Stations and Pirates (selected)**

CA Oakland "KRKD" 103.3 with 250 h, at a minus HAAT. Uses a two-bay directional antenna, with signal best to the NW and reaches San Francisco. "I used to work at KMPX 106.9 before Tom Donahue was there. I built this transmitter, with a gas company pipe standing about [11 m] high near my

house." Only on Friday 8:30 p.m. to midnight, with jazz, stereo, plus two SCSes—67 is for radio dramas, which "are on about 80% of the time the station is on," and 92 is music. "The 92 sounds great, with response up to about 9000 Hz, and -50 dB crosstalk from the main carrier. I built the transmitter in 1965 and it uses tubes. Many people have 67 kHz units—old McMartin radios—but only one person has a 92 kHz receiver. That's why I'm turning to you." It's on only one night a week, because "I want only seasoned jazz announcers to be on the air. We may expand and use some people from the former KJAZ"—FM 92.7 Alameda.

FL Sarasota WSRZ 106.5, now a C3.

FL Venice WCTQ 92.1, now 25000 h,v; 100 m. South FL pirates on 91.5 and 96.1 "are still around, but gone silent are the 88.1, 100.3, 105.5" stations. A new one in the Miami area is "88.7 FM" with rap.

GA Gray WWIQ 96.5, not yet on 96.7.

IL Kewanee WJRE 93.9, having moved from 92.1.

IL Mount Vernon WAPO \*90.5. "I know it's supposed to have call letters but it never IDs."

MI Houghton WGGL \*91.1, but at low power after a neighboring TV antenna came crashing down. WGGL lost the top two bays of its antenna, while WBKP (TV-5) lost the top-most part of its tower. Weather was not unusually stormy at the time, so the real cause of the partial tower collapse isn't known. Both WGGL and the TV station are using temporary low-power antennae. Snow up to 5 meters deep has hampered access to the site.

MN St. Louis Park KDXL \*106.5, but with constant hum in their transmitter. "Been that way for months."

NY Brooklyn, probably around Nostrand Avenue and Linden Blvd.—the Haitian station that was on 87.9 moved to 87.7 and is now \$[tereo]. Mostly Haitian ballads, "in contrast to the fast-tempo stuff that predominates on the Haitian SCAs. Probably moved from 87.9 because of interference from the illegal Brooklyn booster of WYGG 88.1 Asbury Park NJ, a Haitian religious station which has been running commercials for years. Guess the FCC doesn't understand French!"

NY Valley Stream (Long Island) "WNVS" 91.9, \$, with Tom, the Master of Disaster, playing '70s and '80s songs. Heard mainly on weekends from late morning to mid-afternoon."

ON Peterborough CFFF is moving from 96.3 to 92.7 because of having been plagued by interference from CFMK Kingston and CFMX-1 Toronto, both on 96.3.

SK Saskatoon CHSN 102.1, "Sun FM," has been sold for \$985,000, but "has been unprofitable for the past three years."

**Off Air—Or Not Yet On**

CA Joshua Tree KJKT 92.1 reported silent.

GA Atlanta KB2XB (airport) 94.5—deleted.

GA Bolingbroke WDBS 102.1—continues off.

GA Mableton W--- 102.5

GA Milledgeville WXGC \*91.9 or \*88.9

GA Montezuma WLML 95.1

GA Roswell WTHA 107.5

NY Brooklyn Radio Moshiah 91.9 (which seems to have been noncommercial) has been off since mid-March (see last month, p. 4, col. 1). "Maybe they're busy preparing for Passover. Last time I heard 'em they were planning to use low-power stations to spread their message all over the world. When they were still on, several people wrote comments about them on the Internet, although nobody

not "Sunny 103.7."

spelled Moshiah right. One said, 'Every day they are asking for money over the ILLEGAL airwaves. These guys are clearly getting away with murder. I told the FCC many, many times where their location is. . . Religion should be preached in a church or synagogue, not over the radio.' A spelling-impaired person responded, 'Be a man and kill these power or snip there ant. Blow em up for all I care but. . . you are a snitch if you use the FCC or any grovntmental agcey with the power to enforce.' If the FCC shut the station down I haven't heard about it."

- PA Ridgebury WMKB 96.9—first had gone mono, now silent. Is aging equipment centimetering up on them?
- AB Edmonton CKUA-FM \*94.9, CKUA 580 AM and 14 FM relayers throughout Alberta are reported silent.

- VT Lyndonville WGMT 97.7 (not 97.9), p. 154. However, it is still on 98.3. When it switches to 97.7 it will "cause a garbled mess for the loyal CHOM (97.7 Montreal) listeners in extreme northern Vermont. They're unknowing of the switch." WGMT had planned to do the upgrade, but found its antenna was one

meter too short, so they filed for an extension of the CP. 'They're selling the Newport VT area, telling clients they'll be a local station. CHOM is practically a local station in most of Newport! I guess in most markets there's going to be one sleazy operation!'"

BC Nakusp 103.1 CKKC-1's former calls were C1C-F-1, not CJAT-1. See also "Deletions."

On p. 7 (bottom of, FM Atlas-17), it should read "with late-..." Only the first three letters of "with" printed.

"Can't use radio. Too much sterick. Make it clear, M.N.—State Services for the Blind has a proposal to do the reading service digitally, replacing the analog SCS. No timetable was announced.

MO Mount Vernon KHTO 106.7 no SCS (had †S,A).

NC Concord V:PEG 97.9 no †M, 67.

RI Providence WWBB 101.5 may be going †Q, Greek, but not sure if at 67 or 92 kHz. It would replace one of WHRB 95.3 Cambridge's SCSes. "The stations won't tell, but I'll let you know after I get my radio."

CA Berkeley KPFA \*94.1: "A person at San Francisco State University posted this message on the Internet early in March about the 67 kHz SCS of KPFA . . . further going the private route [saying it was to have kicked] the Broadcast Service for the Blind off the air March 31. The reason? A [data] company is paying far more than BSB can afford to use the subcarrier. Besides taking them off the air, KPFA is trying to avoid previously negotiated terms (finding another carrier, assisting in converting the specially equipped receivers and assorted promises), and has been generally unpleasant in the proceedings. The BSB, a unit of the Rose Resnick Lighthouse, is currently seeking another outlet. It is hoped that they will be able to continue this much-needed public service.' The following response was posted by Philip M. Kane: 'I am the attorney representing BSB in these negotiations. Your "report" contains some very bad factual errors. When the negotiations—which are in a critical phase—are concluded, and with my client's consent, I will post the details.' If I come across any more stuff on this I'll let you know. You can contact BSB at the Rose Resnick Lighthouse; I found two addresses for it but this is probably the newer one—214 Van Ness Avenue, San Francisco CA 94102. Phone is (415) 431-1481.

"The FM Atlas says KPFA already has data (†X) on 92, so don't they have to let the reading services stay at 67? The FCC rules say, 'Educational stations may use subcarriers for profit-making purposes. However, an educational FM station is required to provide another subcarrier for any radio reading services which may request such use (47 C.F.R. Section 73.593). The educational station is limited to charging the radio reading service for the fixed or operating costs, but may not charge on a for-profit basis. For additional information regarding radio reading services, see the Commission's Policy Statement, Docket 87-9, 3 FCC Record 6323, released 10/28/1988.'"

CA Los Angeles KUSC \*91.5 †, X, still Armenian, but scrambled, using voice inversion. KUSC has no receiver even to monitor this broadcast. A Chinese company is building receivers with descramblers. It probably

won't sound as good as with no inversion, said Eric Small of Modulation Sciences. Frank Karkota, Compol, agreed.

IL Chicago WGC1-FM (calls are not "WGC1," Mar., p. 4, col. 3) 107.5 still †, Q, Hellenic Communications, Inc. The change so far is that it is changing its Internet address, supposedly going there in stereo.

MI Detroit WDET \*101.9 †, E, 92, not sure of language (retains †T, 67). The †C on WCSX 94.7 Birmingham may also be gone; reporter is checking into it.

MN—State Services for the Blind has a proposal to do the reading service digitally, replacing the analog SCS. No timetable was announced.

MO Mount Vernon KHTO 106.7 no SCS (had †S,A).

NC Concord V:PEG 97.9 no †M, 67.

RI Providence WWBB 101.5 may be going †Q, Greek, but not sure if at 67 or 92 kHz. It would replace one of WHRB 95.3 Cambridge's SCSes. "The stations won't tell, but I'll let you know after I get my radio."

"Glad to hear you came through your surgery okay," D.M., Barton VT.

"It's a wonderful, wonderful thing you're doing for FM. I can't praise the work you're doing enough. . . Now with the FCC about to release low band TV for high definition TV, with those broadcasters to go to UHF frequencies, there is a real opportunity to add 60 new channels to FM—from 76 to 88 mhz. Some of this could be given for SCS to become main carrier stations, some to education, the rest to commercial FM. You should work on this idea, and promote expansion of the FM band," M. McK., Fatima Response, Long Beach CA.

"Regards to Carol, and glad to hear you're feeling better. Looking forward to FMA-17," S.F., Rochester NY.

"Glad to see one [FM Atlas edition] come out just before the DX season! Hooray!" F.W.M., Macomb IL.

"Ah—at last comes the heralded FM Atlas! It will be welcome here," E.C., Provincetown MA.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

AL Tuscaloosa WBJJ Jamz 95.7 (from "95.7 Jams"). Here are some of the 2500 listeners

who showed up in vain on April 1 to wait for a helicopter to drop \$50,000 in plastic eggs containing certificates for merchandise. The fact that it was April Fools' Day didn't deter the people from coming. WBHJ planned the drop for noon, and it promoted it heavily that morning. Seems the chopper couldn't get close enough to make a good drop. Many of the folks who showed up "vowed never to listen to the station again," with some injuries from people throwing rocks. "Police reported the incident to the FCC." [Associated Press picture story with quotations from the 'M Street Journal.']

Grand Rapids WOOD-FM 105.7 uses calls, not "Easy 105.7 FM."

Lompoc KTME 1410 had been silent; returns h oldies and classical (c 8 p.m. to midnight).

Redding KLXR 1230 had been silent; now on h talk and sports. LMA to buy with KARZ 3.1 Burney-KNNN 99.3 Central Valley-KRDG 5.3 Shingletown.

Ansonia WADS 690. Its on-air host Berel ward celebrates 50 years of doing the Jewish riety Hour. It's a Yiddish language program, h Jewish folk songs, cantorial music, popular

Israeli music and songs from the Yiddish theater. It is a 60-minute weekly program, which Howard started in 1947 at former station WBIB 100.7 New Haven CT. After WBIB's demise, he went to other stations before joining WADS in 1958. It may be the longest-running Yiddish show in the nation.

FL Inverness WINV 1580 had been silent; back on with standards, parallel to WGUL-FM 96.1 New Port Richey.

FL Sarasota WQFA 1220—back on but "real low power. Wants to lease space in the airport for its studio."

GA Americus WISK 1390 returns to the air, parallel to 98.7 FM.

GA Savannah WSGA 1400 had been silent. Back on, parallel to WZAT 102.1.

IN Terre Haute WJSH 1300 returns to the air with o, parallel to WSDM-FM 97.7 Brazil IN (see last month, p. 5, col. 2).

KS Topeka WREN 1250 silent, but expected to return, broadcasting from its new city of license—Kansas City KS.

KY Glasgow WCDS 1440 had been silent; now oldies, parallel to WXPC 106.7 Horse Cave KY.

MO Cuba KGNN \*1410 silent; said to be in the process of selling; had been: parallel to KGNN-FM \*90.3.

NV Reno KIRS 1590—another of the few Catholic stations in the nation.

NJ Plainfield WERA 1590; had been silent; surrendered its license with call letters deleted.

NJ Toms River WJRZ 1550—denied extension of construction permit. The station, licensee of WJRZ (FM) 100.1 Manahawkin NJ, had sought a review of this decision, citing loss of loan commitment and difficulty in obtaining zoning approval, but the FCC was unconvinced.

NY Schenectady's WGY 810 former air personality Arthur "Art" H. Murphy, 54, dies. He was best known for hosting the midnight to 5 a.m. program for almost six years, leaving "abruptly" in 1993. Now that time period for most stations is filled with automation or distant satellite voices. Murphy had received the Purple Heart, after losing his left leg above the knee in Vietnam.

TN Kingsport WKCV \*1090 had been silent; to be religion, parallel to WHCB \*91.5 Bristol.

TN Nashville WMAK 1430 has "returned to the air after a long silence. It's a 100 percent relay of WAMB-1160. The provisions of last year's Telecom Act require the FCC to revoke the license of any station that's been off the air more than a year. . . You should expect to hear many long-silent stations back on the air, often with strange and exotic programming!" writes Doug Smith in the April "Monitoring Times."

TX Abilene KBBA (had been KNTS) 1470. Returns to air with Tejano, and LMA-to-buy with KEYJ 107.9-AM.

TX Port Neches KUHD 1150 back on air—now with Spanish contemporary Christian.

TX Dallas-Fort Worth airport T1Stations on 1640 and 1680, said to be 60 w, "have been heard on both coasts and in the middle as well."

One of the East Coast's hearers is Ernie Cooper, Provincetown MA, who sends this verse, "An Irish Blessing."

*I believe in the Sun. . .  
When it is not Shining*

*I believe in Love. . .  
Even when I feel it not.*

*I believe in God. . .  
Even when He is Silent.*

VA Brookneal WODI 1230 had been silent—now on with oldies and talk.

VA Norfolk WCKO 1110 silent, but expected to return next month.

WA Seattle KKDZ 1250 returns to air—with ABC children's.

WV Beckley WIWS 1070 had been travel information—now oldies.

WV Hinton WMTD 1380 had been silent; back on with simulcasting WMTD-FM 102.3 with classic rock. [deleted call letters.]

WI Altoona WAJP 1560—cancelled CP./

WY Orchard Valley KGAB (had been KMRZ and silent) returns to air. Now has talk.

PR Moca WZNA 1040, Quebradillas WKVN 960. Both had been silent. Now simulcasting Spanish standards.

ON Toronto CHUM 1050 goes automation after 10 a.m. It's "the station that brought rock'n'roll to Canada [and will program] with a digital hard disc computer system. Live news, traffic and weather breaks are provided by the CHUM-FM [104.5] newsroom."

"Glad to hear you are back in action. Thanks for all of your good work over the years," H.G., Baltimore MD.

"I'm glad to hear you are doing better. Keep up the great work," K.S., Lancaster PA.

**School Board Okays Religious Programs  
 On Gary's WGVE**

It could be the "saviour" of small, financially-strapped FM stations run by school districts. It could mean expanded weekend hours for many stations, normally on the air only when school is in session. It could mean enhanced visibility in the community at large. Or, it could mean entanglements between "church and state."

Small school stations around the country might well look to WGVE \*88.7 Gary to see how its relations with the religious community--and its own school board--are played out.

In March, 1996, Vernon Williams, who was station manager at the time, took it upon himself to make an agreement with several local ministers to sell weekend air time for \$150 an hour. The board didn't find out about the agreement until November, when it was tipped off by an employee who had not been paid for his weekend work. The board stopped the programs, suspended Williams and ordered an audit.

Nobody had complained about the programs until they were stopped in December. Dr. Alfonso Holliday, board president, said the board thought the station was off the air weekends. During the week the station plays news and educational programs, along with student rock music. It recently added stereo, but transmits a horizontal-only signal which limits its car radio reception to about 30 km (13 km, 60 dBu). It also hosts a reading service to the blind at 67 kHz.

The board subsequently voted to allow the religious broadcasts to resume. Supt. James Hawkins at first opposed the plan, which calls for seven ministers to pay for airtime for their sermons and gospel programs. Hawkins was concerned this

is a violation of church and state separation. But the board decided to sell the airtime and follow the same procedures that allow it to rent classroom or gymnasium space to community groups. An official of the Indiana Civil Liberties Union, Sheila Kennedy, was concerned that the district might be tacitly endorsing a particular religion.

Steven Shapiro, national legal director of the ACLU in New York, mentioned the station's call letters—WGVE. WGVE stands for the city's vocational and educational training center. "This in itself lends an implied endorsement of what the station will and will not broadcast," Shapiro said. In addition, he said the station might have no legal right to refuse broadcast requests from groups like the Ku Klux Klan.

Students from seven high schools in the city and three surrounding districts attend the Gary Area Vocational Education Center—many of whom are active in the WGVE operation. Neither the Gary school district nor National Religious Broadcasters had ever heard of a case where a public school station had sold airtime to religious groups. Rochelle Moody, lawyer for the Gary schools, knew of no other stations selling such airtime, while Ron Szczepk, with the NRB in Manassas VA, said the approval was a departure.

Moody's expertise may be called for, to build a lawsuit develop. No mention of a suit was made in a "New York Times" article [March 23] on WGVE, but Ivan Densteiner, law professor at nearby IUPUI [IN] University thought the courts might have the last word. Williams, former WGVE station manager, is still employed by the board; he's been reassigned to an administrative position. Thanks to Alex Nardacci for sending this information.]

### Small-Print Happenings and FM Industry News

The Lutheran Church-Missouri Synod, which operates KFUV-FM 99.1-AM Clayton MO, is going to court to contest a Federal Communications Commission decision about its compliance with broadcast EEO rules. [Feb., p. 7, 12.]

Both the \$25,000 fine and the fact that the MS must file detailed annual reports concerning station recruitment efforts and employment diversity through October, 1999, are being appealed. Filing with the U.S. Court of Appeals in Washington DC, the stations allege that the *King's Garden* case is too restrictive. King's Garden policy permits a religious broadcaster to consider theological beliefs when hiring and promoting employees for positions connected to "spousal" of the broadcaster's religious views, such as announcers or producers. The exemption doesn't apply to "non-spousal" positions, such as secretaries and engineers. The case involves the former KGDN-FM 105.3-AM in Fond du Lac WA (now KCMS [FM]).

Joining as a friend of the court, National Religious Broadcasters urged the FCC to revise *King's Garden*. The NRB backs a policy for giving religious broadcasters greater freedom to hire a staff which fully shares a common faith or

religious affiliation. Both NRB and LCMS point out that allowing religious broadcasters to discriminate against those outside a certain faith would still allow for the seeking out and hiring of women and minorities. But such seeking out would be within the confines of the broadcaster's faith—something the courts and FCC might not be willing to allow.

The era of digital TV may not be far off, with the FCC having approved the system. Anywhere from eight to 30 years has been proposed as a timetable. Last night a friend of mine mentioned that even the furniture to hold such a set would be different. His new analog TV sits in a cabinet designed to hold a set with a screen almost as tall as wide; the new sets will have wider screens. And he claimed the new DVD compact disc playback system doesn't provide for recording, as the older analog video cassettes do. "It is easy enough to provide an advanced television signal. There is plenty of film that can be scanned directly into the new format, and live sports are always available. The problem is changing all the existing equipment in a television station to handle the signal," said Lee Goellen, a television consultant.

With television to someday leave channels 2 to 6 there is room for FM radio to expand into the below megaHertz. A subscriber pointed out that I ought to champion that expansion. Below Ch. 5 is a band for point-to-point newsgathering, and below that are channels 1 to 4. What happens to Channel 1 I won't get into here. Anyway, with super duopolies, this may be a way for the public to get back some of the diversity in station ownerships that was lost with the Telecomm Act. Think of all the new stations that could be added to an FM band having 12 more megaHertz (channel 5 and 6 area). Or, the expansion might come at the time when stations move en masse to the 2500 mhz range for digital audio broadcasting.

Fulltime digital audio broadcasting in Toronto will be up and running as of the middle of this year. It will carry the programming of 15 area radio stations, including Rogers' 680News, CHFI, CHUM-FM, CFNY, CJEZ, The Fan 590, Q-107 and Talk 640, as well as CFRB, Mix 99.9, CHIN-FM-AM, and CJRT. Existing programming will be simulcast, offering CD-quality audio, plus the possibility of ancillary data and SCS-type music and talk services. Nationally, the CBC plans to provide DAB service to about 75 percent of its listeners by 2000, according to my most reliable source of news from Canada, Broadcast Technology magazine.

WKPS \*90.7 State College PA has only been on the air since Oct., 1995. The station has a student staff of 200. Its only faculty person is an advisor, who is also on the staff at the CPB-qualified station on campus, WPSU \*91.5. The 100-watt WKPS received approval from the university budgeting committee for an annual budget of \$25,500. A separate request for \$17,000 to install digital production studio equipment was also approved. "We want to add our feelings of pride in our staff for doing so much with so little the past year. In the beginning, we had no budget and no production facilities, but through their dedication, WKPS-FM [sic] has grown and prospered. Their continued efforts insure a bright future for our station," wrote Jeff Ecker and Ed Banks, seniors at Penn State, in "College Broadcaster" magazine.

WAMC \*90.3 Albany NY and its satellites took in \$350,000 in pledges. This was a record for three days, and ended with Kate Smith's classic "God Bless America," and Ray Charles' "My Country 'Tis of Thee." It took cross-valley rival WMHT-FM \*89.1 two weeks to squeeze \$100,000 from its audience.

The CAB is to Canada what the NAB is to the United States. Canada's Eddie Fritts is Michael McCabe, president of the Canadian Association of Broadcasters. McCabe says the radio business needs to be rethought. People loved radio's programming, but "our sole revenue source, our advertisers, were deserting in droves." CAB

developed a plan calling for the stripping away of a regulatory structure that was keeping costs high and "holding back the hottest part of the radio industry, FM.

"The industry has come a long way, but has still a way to go to bring radio back to profitability." With digital coming along, conversion costs will be high and payback will be slow. New "smart" digital car radios will have a "good-size digital display and a data port to hook up to a large screen or a printer. The door is open to the provision of program-associated data such as song title, artist, news and information." Specialty music or data should be available to subscribers, with advertising not expected to fully subsidize the transition to digital.

A "coats for kids drive" was done by 98.5 The Ocean and its AM in Victoria in December. Over 3220 coats were collected, and timed perfectly for the bitter cold of the Blizzard of '96. This exceeded the station's goal by more than 50 percent. The Ocean, just over a year old, is a finalist for Station of the Year in the Canadian Music Industry awards to be held in Toronto.

A reporter told me WDCU \*90.1 is for sale. Asking price—\$5 to \$11 million. WETA \*90.9 might want it for a Washington DC duopoly. Also in the area, WJZW 105.9 disc jockey, Gregory P. Fitzgerald, was indicted on manslaughter charges in the death of a man after a fistfight. Fitzgerald had been the afternoon drive time jazz host since 1993. Fatally injured was William F. Deal. The fisticuffs were over a girlfriend both men had their eyes on. The trial was expected to be brief, and the station had made no decision about letting Fitzgerald return.

Help is solicited by WNCB \*89.3 Duluth to bring back its 97.7 translator in Minneapolis. They were buoyed by the news that the FCC decided that the issue of resolving interference caused by the 97.7 translator to reception of KNXR 97.5 Rochester MN deserved further consideration. The FCC asked WNCB to come up with a plan to resolve only 36 KNXR complaints, "acknowledging our conclusive handling of a previous 51 complaints. We have submitted our plan to the FCC, and it is now our prayer that the FCC will remain active with us to review and approve our plan, and allow us to perform it, and then to allow us to resume fulltime operation in Minneapolis on 97.7 FM!"

WNCB mentions costs to get the plan moving—over \$2000 in legal bills, \$735 monthly for IDS Center rent and \$1410 in monthly satellite bills. "We will soon face a \$2500 insurance bill and additional travel technical expenses to fix KNXR reception for their listeners. This is a small price to pay for the opportunity to reach over a million people. . . WNCB has refused to relinquish our Twin Cities audience, and we ask you to stand with us on the 'home stretch' as our Twin Cities station gets 'born again'."

SFX Broadcasting of Austin TX is the licensee of several stations, including WGNA, WPHYX and WYSR in the Albany NY area. A former sales manager, Tracy J. Christopher, has filed a lawsuit alleging discrimination against pregnant employees. She charges that she was fired last fall because of her sex and in retaliation for taking pregnancy-related leave earlier in the year. She, like Karen Bell, a woman who previously filed a lawsuit against SFX, is challenging SFX's requirement that she sign away her legal right to sue over such disputes.

The document they signed stated that they could be fired at any time and agreeing to resolve any dispute through private, binding arbitration rather than the public courts.

Bell and Christopher allege that they ignorantly signed the document under threat of ouster and without realizing they were waiving their constitutional rights. The company contends they knew exactly what they were doing and did it to keep their jobs. Bell had been business manager and Christopher sales manager of the Albany stations. Christopher's complaint further

charges that the atmosphere at the stations was one of "intimidation, mental and verbal abuse, sexual harassment and blatant disrespect for women." It alleges that the stations' general manager Robert Ausfeld and John Hirsch, now an official with SFX, began the harassment after she announced her pregnancy in July, 1995. Hirsch declined comment, and Ausfeld was out of town and could not be reached.

The attorney for Ball and Christopher is John E. Higgins of Latham NY. He must convince the court that the binding arbitration agreement is invalid.

KLSX, "Real Radio" 97.1 in Los Angeles, must pay a real fine. It finally agreed to cough up to the U.S. Treasury \$105,000. The forfeiture has been on the books of the FCC since December, 1992, for two broadcasts by Howard Stern. Each cost the station \$52,500. As part of the agreement, KLSX "admits no wrongdoing or liability."

Big local broadcasting groups are sitting there—like so many pot bellied pigs—just waiting. Waiting for what? Why, they're targets for union organizing activities, that's what. A "Radio World" article mentions that employers are getting smug after a 15-20 year decline in union membership nationally. One major market news director, who asked for anonymity, said changing ownership and large consolidations create an "atmosphere for discombobulation. . . . Some people at some of the stations who are not used to the unrest [will] be upset and fearful for their jobs and livelihood. And that's definitely the right atmosphere for union activities. . . . In my experience with unions, you are not going to get a lot of benefit with them. Your main benefit is your own ability. That's your safety net. If you have a lot of ability, you are going to be held back by a union contract."

Hurting employment in radio, according to Pat O'Donnell, with the Washington/Baltimore American Federation of Television and Radio Artists (AFTRA), are industry efforts at outsourcing—such as Metro Traffic Control, Metro News and Shadow Traffic. AFTRA nationally has begun a campaign, not just in radio, but to organize workers in cable.

SFX Broadcasting is buying several Hearst broadcasting properties. It's getting WLTO 97.3-AM, "Lite 97.3," Milwaukee. In Pittsburgh, WVTV 96.1-AM, WDVW 102.5, WJJJ 104.7, and WXDX 105.9. That leaves Hearst radio with only WIYY 97.9-AM Baltimore.

Last month was mentioned an ad put out by WGY AM Schenectady NY that was perceived as racist (p. 5, col. 3). Another local station, WKLI 100.9/WKBE 100.3, presented an ad from the stations' president Paul Bendat. Those stations have "struggled in the ratings since changing format from soft rock K-Lite in spring, 1996." The ad, in letter form by Bendat, was "published to announce our latest on-air campaign, which fights racism," and promised PSAs to combat racism. A sample script reads: "Imagine what it feels like to be judged by the color of your skin. Racism hurts everyone! K100 cares about the Capital Region."

A cynic was Fred Horton, operations manager, WGNA-FM, WPYX and WTRY-FM, who said the proof of a radio station's commitment is what a station puts on the air. "It's nice to see a radio station commit itself to such a high moral ground," Horton said. "But to flaunt it is wrong. Just go ahead and do it. This looks contrived."

A classical station winning high audience ratings—that's WCRB 102.5 Waltham-Boston MA. It's not that WCRB is such an excellent station, nor the only station in the area with classics. WGBH '89.7 has classics, as does WBOQ 104.9 Gloucester. But WGBH is not rated along with the commercial stations, and WBOQ's signal sits by the sidelines, not covering all the metro. In fact, WBOQ is eclipsed in Boston itself by little WRBB, also on 104.9.

WCRB earned a 5.5 share of the 12-plus market, Arित्रon, for fifth place in the market.

Some of the stations below WCRB were WMJX, WBCN, WODS, WBMX and WKLB-FM. Dean Johnson of the Boston Herald wrote, "It's not as if new Beethoven or Shostakovich works have suddenly appeared on the scene and taken the music world by storm. What we're seeing, in part, is one result of the '90s radio trend toward niche broadcasting; there are so many pop stations, and they're all so focused on carving out their slice of the audience pie, they're slowly bleeding each other to death." This leaves WCRB much to itself with a distinctive format. "After all, in these days of profit-driven radio, success invariably breeds imitation, and if WCRB continues to rack up good numbers, someone else in local radio is likely to notice and start thinking."

Chester P. Coleman was denied a review by the FCC of an application to replace the expired CP for his new commercial FM station in Palmer AK. The station was KEEN 95.5. Coleman had filed an application to replace his expired permit two weeks before cancellation of the permit, but two months after the deadline for filing such an application. Coleman said the lack of construction progress was due to a delay in receiving commissions from another sale, and that he inadvertently neglected to file for the extension.

FCC chairman Reed Hundt has asked for another \$30 million to move the Commission to The Portals from M street in Washington DC. He's proposed a budget of \$219 million—up \$30 million from the present year's funding.

U.S. Broadcasting will soon own four FM stations in Macon GA. It is buying WAYS 99.1, and already owns WDEW-FM 105.3, WPEZ 107.9, WMGB 93.7 Jeffersonville GA, plus three AMs.

KJUL 104.3 North Las Vegas NV fetched \$15 million in a sale to Allen Shaw's Centennial Broadcasting. Shaw is also buying KQOL 105.5 Boulder City NV.

License renewals were granted to WZOM 105.7-AM Defiance OH. Dismissed was a petition to deny filed by the National Rainbow Coalition. But the stations were admonished for failing to adequately self-assess their EEO programs to address the lack of Hispanics and other minorities from its applicant pools.

WDFG 100.3-AM Middletown RI was ordered to pay \$3500 for failure to comply with the FCC's EEO rules. The stations have failed thus far to respond to the forfeiture notice. Strange that when the violations occurred, the FM call letters were WOTB.

An FCC form that is used to notify parties of Commission approval of assignment and transfer applications has been changed. It is Form 732, and allows for 90 days for the notifying, not 60 days as before. This policy is to allow more flexibility to set closing dates in accordance with business accounting practices. It decreases paperwork and the need to file extension of time requests.

A digital audio broadcasting auction netted the U.S. Treasury \$173 million. American Mobile Satellite Corp. spent \$90 million, while CD Radio spent \$83 million. Two other prospective licensees dropped out of the bidding. Each plans to have the new services on air within three years (see March, p. 7, cols. 1-2).

Longtime subscriber Bill Weisinger, c.e., WSTB '88.9 Streetsboro OH, and formerly 91.5, sent an article he wrote for the Northeast OH Society of Broadcast Engineers newsletter. It is about the complex frequency changes affecting a number of stations. It reads in part (and to follow this, it's best to turn to the map, p. 47, in the new "FM Atlas"):

*Most radio engineers go to work for a station that exists on an assigned frequency and pretty much leave well enough alone. However, in the cramped major market arena it often requires a radical approach to improve one's coverage. As this mess unfolds, you'll see how in just a few years the entire landscape of the lower end of the NE Ohio FM*

WILLIAM WEISINGER  
Director of Engineering

band has changed significantly. . . .

First, there was WSTB Streetsboro with 300 watts on 91.5. With the move of WAPS Akron from 89.1 to 91.3 (precipitated by WKSU Kent wanting to move its 89.7 site to the TV49 tower in Copley), WSTB lost its Akron audience.

So WBWC [Berea] applies for and receives a construction permit for 91.5, a WSTB co-channel. Kent applies for a high-profile repeater on 91.5 from Dover/New Philadelphia. With loss of signal on several sides, WSTB seeks a move to 88.9 and a power increase to 1 kw. Remember WAPS was moved by WKSU from 89.1 to 91.3. This allowed for WSTB to apply for 88.9 and increase power. The hang-up was the FCC would not approve the move until WAPS was a "done deal." Construction permits didn't cut it. Finally, the Commission approves the WAPS license and allows the consideration of the WSTB CP application for 88.9. Whew. . . [but] there's more. The Commission finally approves the WSTB CP for 88.9 and construction begins.

Meanwhile, at WKHR the 100 watt on 88.3 Bainbridge, station management seeks a better signal. With the powerful WZIP 88.1 Akron on one side, the 50 kw (d-a) WYSU 88.5 Youngstown on the other side, and co-channel WBWC Berea in the middle, the puny 100 watt WKHR signal is getting clobbered! . . . The only option, at the time, was to push the 88.3 signal north with a directional antenna. Therefore, WKHR 88.3 applies for a construction permit to change to a directional antenna and a power increase to 1000 watts. After the usual long wait, the Commission grants the DA-CP.

Meanwhile, remember WBWC and Oberlin's WOBG agreement to swap frequencies, 88.3 and 91.5? Construction permits are applied for and granted. Time passes. Construction on the swap falters and the CPs expire. At about this time the WSTB license for 88.9 is being processed. WKHR (remember the new 1000 watt DA on 88.3) is advised by their engineer to apply for the soon to appear frequency of 91.5. On 91.5 WKHR could drop the directional pattern and increase power to 1000 watts. Since 91.5 has not been formally vacated by WSTB (one must wait for the Commission to issue a license for the new frequency), it again became a game of near-perfect timing and more waiting for the WKHR CP.

Finally, the Commission grants the WSTB license, accepts the WKHR CP application and the rest is history. . . WKHR received its license for the 1100-watt non-DA station on 91.5.

A footnote is that WZIP on 88.1 has been granted a CP to let out its directional pattern that protected the WKHR 88.3 contour. This will improve the 88.1 signal to the northeast. [WZIP's CP calls for an increase in power and height to 7500 h.v.; 252 m.] I'm sure I must have left something out, but none of that will be on the quiz!

Alvin Toffler says we are in the Third Wave. The First Wave was an agrarian society. This required a widely dispersed populace, while the Second Wave brought people physically together in its industrial modality. Now dawning is the Third Wave, with an information-based structure. This allows for either of the first two approaches, with a return to a less-concentrated population distribution a possibility.

All this summarized by Skip Pizzi, editor, BE Radio, who had commented on the lack of success of RBDS radio (Mar., p.7, col. 2). "Perhaps you should send a copy of the February, 1996 FMedia! (p. 4, col. 1) to Skip Pizzi," said Nick Lombardi. "My comments last year were prophetic."

From the classifieds: Sales management at AM-FM in small college town. Solid radio sales required. Bob at KDEC/DC100.5 (must be their new nonID), Decorah IA; (319) 382-4251

Operations director—someone with knowledge of FCC rules, able to do simple repairs, degreed announcer for a classical station. Salary mid to upper 20s, EOE. Letter, resume, demo tape to Sharon Dudgeon, g.m., WAUS '90.7 Barrien Springs MI 49104.

Until May, when FM Forum returns,

*Bruce F. Elving*

 OH Delaware 107.9 WLYR (WCEZ), mr, "Lite Rock 108"  
 PA Central City 101.7 WSRA (WYSN), mr, "Star 101.7." Its previous format goes to WYSN 1330 (formerly WADJ) Somerset PA.  
 PA Jenkintown 103.9 WPHI "-FM" (WDRE), "Philly 103.9"  
 PA McConnellsburg 103.7 WEED (not WEED), o[ldies]. Calls missing from the p. 21 FM Atlas map. The interference signals reported last month (p. 1, col. 3) were probably computer noises from a bank. "That type of interference usually ends by 4 p.m. after the banks close." The application by Eagle 88 for 88.7 is delayed because of a 2 km interference zone with WVEP \*88.9 Martinsburg WV. "It would cost a few thousand dollars to find out exactly how many people would be affected in that area, so we're going to bite the bullet and go directional. That will add a few thousand to our costs, too. We could have moved our site, but would have run into a problem with a Confederate army bivouac area. There is a marker on that spot." Eagle 88 would have a 57 kHz with global positioning satellite data.  
 PA Olyphant 95.7 WKQV-FM (not WKQV); AM is in Pittston  
 SC Parris Island 92.1 WGZB (WOCW; briefly after that it was WLWS).  
 TX Bells 93.1 KMKT (KASK)  
 TX Harker Heights 105.5 KYUL (KNRV), still oldies. Now "Cool 105.5."  
 UT Richfield 93.7 KCYQ (KKWZ), "Q-93"  
 WV Buckhannon 101.3 WBRB (WBUC-FM), "The Bear" [old calls as of 5-9, but live now.  
 WI Brookfield 106.9 WXPT (WFMI). Still using/  
 WI Sheboygan 93.7 WBFM (WWJR), k, "B-93.7"  
 WI Sheboygan Falls 106.5 WWJR (WBFM), rm, "JR 106.5"  
 WI Sturtevant 104.7 WEXT (WZXA), k, "Extreme Country 104.7." Before switching formats, they "buried" the new calls. Co-owned with WIII 95.1 Kenosha WI.  
 BC Vancouver 98.1 CHKG. This multi-cultural station is expected on by early summer.  
 ON Kingston \*91.9 CKVI, rt, "The Cave." CKVI is owned by KCVI, the Kingston Collegiate and Vocational Institute, with students to be communicating with the community. On air when school is in session, 50 hours a week, of which 37½ hours are current popular music and 12½ hours spoken word. It has \$50,000 worth of donated equipment. The school has spent \$3000 over the past two years on the radio project. "I live 2 km from KCVI. Very good signal, but mono. . . It would be a shame if CBC AM network gets 99.1 in Toronto. It is mono and all talk. What a waste!"

**Facilities Changes Granted**

**Stereo—or to be \$[tereo]**

IN Anderson WBSB \*89.5—"stereo and same programming as WBST(\*92.1 Muncie). Their relay in Marion should be an improvement" (WBSW 90.9).  
 OR Cherryville KLVP-FM \*89.7, gr, ID with Portland; "K-Love." Its transmitter is located "just above Timberline Ski Lodge on Mount Hood (highest point in Oregon). AM station KEZF 1040 Tigard now KLVP as of February. Stations fed by KSKD \*107.1 Sweet Home are K242AF \*96.3 and K226AI \*93.1 both Portland; and K273AB \*102.5 Gresham. They will continue to be fed by KSKD until KLVP-FM has completed an upgrade in six months to a year." Applies for 3700 v; 532 m, C1 at a new location.  
 KLVP-FM bumped off a pirate—the 10-watt "Subterrado 88.7," which had been on the air since June, 1996. K-Love did not begin broadcasting until March, 1997, but they discovered the pirate on their frequency earlier and complained to the FCC about it. The FCC tracked the signal to the downtown area, where DJ Schmeejay was holding forth. It was nothing personal, the FCC's Binh Nguyen said: "You have to comply with the rules. You couldn't drive a car without a driver's license. You can't operate a station without a license from the FCC." But don't tell that to Radio Free Berkeley's Stephen Dunifer, who has encouraged others to follow his lead with the rallying cry, "Let a thousand transmitters bloom."

One of Dunifer's attorneys, Luke Hiken, said the driver's license comparison is unfair. "The FCC has created a licensing scheme for the super-rich." That is true in Portland, where KINK 101.9 was just bought by Boston-based American Radio Systems, which already owns KBBT 107.5, KUFO 101.1, KUPL-FM 98.5 and KJKZ 106.7.

Three times Nguyen visited a building at 333 SW Park Ave., only to be turned away by the building manager. Because Nguyen didn't have a warrant, he couldn't search the premises, and Subterrado stayed on the air until KLVP-FM's more powerful signal drowned it out.

Schmeejay says he considered fighting for the spot, but has opted to pursue another place on the dial, "so he can spend his days behind the turntables [Horrors! They play records?—b.e.] instead of before a judge."

"If they need it to get the Lord's message out, then it's OK, we'll move," said Schmeejay. Both Schmeejay and the FCC's Nguyen advise listeners to stay tuned for further developments.

SD Canton KIXK 102.7 "B 102.7," still oldies, adds Bob and Tom, IDs with Sioux Falls.

**Monophonic**

PA Jersey Shore WJSA-FM 96.3. Did not go stereo when it moved from 93.5

MI Muskegon Heights WMRR 101.7 r, "adult rock"

MN Minneapolis WBOB-FM 100.3 rt, rock and Howard Stern, "Real Rock 100" (strict); no DJs. Was "Bob-FM." "Stern is absolutely the linchpin to this thing," said WBOB-FM's g.m. Kevin McCarthy. Stern's arrival poses a threat to Tom Barnard, whose morning show on KQRS 92.5 has been No. 1 for a decade among the 18-34 crowd. Other stations regard Stern's coming as good news, as it could lower KQRS' ratings and level the playing field. The morning show on KDWB 101.3, for example, stands to benefit. It is hosted by Dave Ryan, and is a relatively clean-cut show, appealing to families and young women. And Howard has caused another problem for Barnard—a possible lawsuit. Barnard and his sidekicks had recorded a comedy CD and Howard played it to make fun of how lame it was. A guy named Red Peters called in and said he wrote one of the songs in 1990. The CD didn't credit Peters, so he's talking to a lawyer about suing Barnard.

MS Vicksburg WJCK 98.7 rm, "Love 98" (from "Kapital Country")

**On Air—Real Stations & Pirates (Selected)**

AK Anchorage "Spenser Free Radio" \*93.1; "K-Buzz" 103.5

AK Girdwood "Glacier City Radio" 88.5. It's an experimental project of the Girdwood Community Club, and an effort to bring local radio to this isolated city. Anchorage FM signals at 80 km don't make it into this valley. Only a KSKA 91.1 Anchorage translator exists on 91.9.

The station has a program log, officers, volunteers and a phone number ([907] 754-

2489), a bank account and a lawyer. "But it doesn't have a license from the federal government, and that's illegal." Everyone in the town of 2000 knows the station is a pirate, but that may change. Organizers say they're in the process of filing papers with the FCC to make the operation legal. In the meantime, they insist the station isn't a luxury; it's a necessity. Even licensed KSKA wishes Glacier City Radio well. Locals accuse KSKA of becoming mostly a talk station, but Susan Reed, g.m. for KSKA said, "More power to them! Community involvement is the whole reason for public radio." Reed would like to see what Girdwood is doing spread to other communities where KSKA has repeaters. She wouldn't mind if they would insert their own programming into KSKA's translators.

For \$130 a low power transmitter was purchased in Canada. Total expenses for the project have been \$1500.

"We're not interfering with anyone's signal. We're not taking away anyone's audience. It's an eggshell issue. We don't want to get the FCC mad at us so they won't give us a license. But we're going to do what we have to do. I am going to see this project go legal," said club president Lewis Leonard. The public can comment to the FCC about pirates or abuses among commercial stations, including duopoly issues, to (888) 225-5322, or to the Justice Department's anti-trust division at (888) 736-5287.

Glacier City Radio plays an eclectic mix of new age rock, classical, blues and experimental "weirdness like evangelical sermons played at double speed." Live announcements are few. According to its Internet posting, it uses a 3-watt transmitter. Hopes are to raise the power to 10 watts, or even 60 watts, even before any FCC authorization comes. At 60 watts, it would serve all of Girdwood, as well as the eastern part of Turnagain Arm.

AZ Quartzsite KBUX 94.3 operates in stereo but probably in lo-fi. Buck Burdette runs the station from a spare bedroom in his house, and uses 25 cm reels at 1 7/8 ips. "I had this engineer from Palm Springs stop by and he was amazed at how good the sound was, considering the speed of the tapes." It is run 24 hours a day with Buck's second-hand automation system, and with no employees. Buck sells the advertising, according to an article in "Radio World," grossing \$17,000 last year. Tower is in his back yard. He hoped there would be sales volume to justify locating the tower in the mountains. He's 65 and plans to keep running the station, which has become more of a hobby than a viable business.

CA Fairfield (Vacaville?) K218- 7 91.5 just noted on the air, in their "plot to fill the band with their band of gospel garbage." It's on with an "alleged 10 watts from atop Mt. Vaca (where KUIC 95.3 Vacaville is) despite the CP for KASZ 91.5 Fairfield. I say alleged, for they're hitting an 8 on my meter at 48 km (vs. a 5 for KAWZ's Stockton 88.1 which is 16 km from here) and killing KYDS \*91.5 Sacramento in West Sacramento. It relays not KLVR 91.9 Santa Rosa, which is nearby, but KLVC 88.3 Magalia. KLVR is behind Mt. Vaca from their transmitter and can't be received adequately. Unfortunately, I notice when Magalia is coming in well here it tends to be weak up on Mt. Vaca. Often KQED-FM 88.5 San Francisco shows up on 91.6, along with white noise on 91.3. Sometimes the entire signal dissolves into white noise, obliterating KCSM \*91.1 San Mateo and KRCB \*91.3 Santa Rosa, KUOP Stockton and KNIS Carson City on 91.3, KCHO Chico and KXSR Groveland on 91.7 (KALW S.F. is unusable anyway), and KLVRI Of course, KKUP Cupertino and KSJV Fresno on 91.5 are annihilated regardless of whether the translator is working right or not. All this lost for a program source I already had on 91.9 always, 88.3 usually and 93.3 often."

CA Sacramento area-103.3, barely getting

through KATM Modesto. "Thought at first it might be KUKI Ukiah, but the format didn't match their country. Eventually, they mentioned K-Love and I then noted the parallel programming with 91.9. Don't know whether it relays KLVR or KLVC but I'm guessing it's in the foothills east of Sacramento or else in the Chico area."

CA Upland or Rancho Cucamonga 104.7—a pirate there has been heard "a lot, and it's in stereo, with metal and other loud AOR but never any identifications."

CO Steamboat Springs K219DA \*91.9, with WWFM 89.1 Trenton NJ.

FL North Miami Beach "Radio Classique" 91.9, a Haitian pirate.

IL Chicago WSSD \*88.1 "has openly had commercials, since they came back on a few years ago, but I was still surprised to hear a 'call our sales manager' promo at the end of a string of spots!"

IL Harwood Heights 90.5 pirate in stereo, "tracking '70s hit compilation CDs, but have heard voices a couple times. I actually tracked down the site, but I don't want to see it in print as there's bound to be an FCC stooge out there." Harwood Heights is a suburb surrounded by the northwest side of Chicago.

IL Monee WGNR \*88.9—"heard this ID on several stations in the Midwest and West before I finally heard the originating station." Moody Bible seems to feed WGNR everywhere now instead of WMBI-FM or WJSO Pikeville KY. "Wimpy signal, especially compared to WMBI-FM." [lege Radio

IN Huntington "HCR" 87.9, Huntington Col-/ MA Springfield to Hartford CT area-92.1 a religious station. "I heard several national religious programmers but no station ID." Also heard was "Praise 105" 105.3 Hartford, which continues on the air. "Black gospel with lots of paid commercials. . . Hmmm—it seems piracy is abounding!"

NJ Teaneck "WFDD" 91.9, Fairleigh Dickinson University. "Unlike their real station (WFDU \*89.1), this one is meant to be heard only on campus. Plays mostly hip-hop and alternative rock; funded by Student Government Association."

NY Brooklyn 87.7—the name of this pirate is "Radio Konbit" (last month, p. 3, col. 3), pronounced "comb-BEET." The word "konbit" originally referred to a community harvest where the work is shared by many people. Station is on from about 4 p.m. to 1 a.m. nearly every day."

NY Poughkeepsie "WMCR" 88.1 Marist College, 1/10 watt, \$. On 10 a.m. to 2 p.m., seven days a week with "contemporary music," news and campus sports. Formerly on 90.1, but moved shortly after WXHD \*90.1 Mount Hope NY went on the air.

TN Johnson City area "WMCR" (another one!) 90.5, Milligan College, on 7 a.m. to 10 p.m. daily. Low power for now, but hopes the FCC will let them increase it to where they can reach an 8-km radius. "Students have been divided over the format, with some wanting only contemporary Christian music and others pushing for secular rock."

TX Laredo KBDR-1 100.5: "It's a lifesaver!" WV Ripley WCEF 98.3. FCCancelled its license. FCCclaims license had not been renewed since 1981. However, WCEF is on the air, and is challenging the FCC's finding as erroneous.

ON Toronto CFMX-1 96.3 building a state-of-the-art downtown studio, to take over broadcasting studios for CFMX 103.1 Cobourg. It will retain an office in Cobourg. Pres. Martin Rosenthal said he was pleased to announce the expansion, "in a difficult competitive business where many radio services are seeing huge budget cuts."

Partial list of FM stations of Haiti from the Worldwide TV-FM DX Association bulletin:

100.5 Radio Cap Haitien. Port au Prince 90.5 Signal FM, 91.3 Tropic FM, 95.3 Radio Tropicale, 100.1 Metropole, 100.9 Magik Stereo, 102.9 Superstars, 103.7 Radio Lakanayel; 104.5 Galaxy.

And from the same source, Cayman Islands. Radio Cayman stations:  
Cayman Brac . . . . . 93.9 250 h,v  
Grand Cayman . . . . . 89.9 3000 h,v  
" " . . . . . 105.3 5000 h,v  
Little Cayman . . . . . 91.9 250 h,v  
Private stations (Grand Cayman)  
"I.C.C.I." . . . . . 101.1 500 h  
"Z-99" . . . . . 99.9 5000 h,v

Off Air—Or Not Yet On

CA Pacific Grove KAZU \*90.3: A fire May 7 damaged its studio, LP records, CD collection and the transmitter in an adjacent room. Cause unknown. "We will be off the air for an unspecified period of time [and] are eagerly accepting any financial donations" at PO Box KAZU, ZIP 93950. [strike]

FL LaBelleWKZY 92.5."Off due to a lightning/GA Roswell WTHA 107.5. It was to have come on shortly after Jan. 1. Now the owners say it will probably be "summer." It is expected to relay WHTA 97.5 for a clearer signal in the north Atlanta metro.

KY Stamping Ground WKYI 99.1 MO Ironton KYLS 92.9, nor on its old 92.7. WI Madison WSUM \*91.7. To avoid interference, its tower must be in southwestern Dane County. "The only possible place is the Township of Montrose, a farmland community. But many in this area are opposed to a large tower there. . . Residents have been circulating petitions, and even the town board is against it." But not all are opposed. Farmer Mario Gobel has offered to lease some of his land to the UW for the tower to raise some cash. Station would replace "WLHA," a carrier current AM and extra-legal FM station on 91.5 at the University of Wisconsin.

AB Edmonton CKUA-FM \*94.9 (last month, p. 4, col. 1) and its relayers. The stations signed off the evening of Mar. 20 due to a funds shortage. Only \$1.4 million was raised, compared to \$2.8 million needed. The decision to go silent was made after losses of \$7000 per day. Only 4000 of the estimated 80,000 listeners contributed. This was the second of two years of provincial subsidies, with the stations to be transferred to private ownership. The AM (580) came on Nov. 21, 1927 and believed to be the oldest public radio station in Canada. CKUA-FM came on in 1948. It became Canada's first stereo station, and the first to broadcast real-time audio on the Internet. The network reached 85 percent of Alberta listeners.

"One other element to this is that the CKUA network is the official relay of the province's emergency alert system. CKUA has offered to keep the transmitters operable for this purpose for as long as possible. There are a number of grassroots movements to help CKUA return to the air. One of the events [is a] benefit concert to be put on by popular [lesbian] country/folk singer k.d. lang who is from Alberta."

Deletions

HI Waimea KAGB 99.1

NJ Jackson Township W284AA \*104.7—replaced by W209AR 89.7 Long Branch  
NY Brockport WBKT \*93.3; "could hardly coexist with WQRV 93.3 Avon." Calls have been assigned to Norwich 95.3.

唐努烏梁海收藏家協會

Hope you are feeling well, and getting back into regular routine," R. O'C., Kodiak AK. Glad you're out of the hospital and OK. Take care," E.K., Fairfax VA. I love that shade of green on the Atlas-17 cover! Queens correspondent.

SCS/SAP Services

Symbols as in the "FM Atlas"

- A Berkeley KPFA \*94.1 Still running "Radio Reading Service for the Blind" on 67 kHz (last month, p. 4, col. 2). "I heard through the grapevine that Seiko was buying 20% of injection at 57 kHz for the watch radio project on KPFA and paid off the Reading Service for the Blind \$86,000. Would Lou Hill like to hear this news?" RBDS 57 kHz has radio text which repeats: 'JOIN US 1-800-439-KPFA' with PTY of 'Public' and no time transmitted."
- A Los Angeles KFSG \*96.3 tX, 67. "Had a '102.7 Kiss FM' relay for a week in 1993" before converting (pun intended) to data.
- KLA-FM 99.5's two SCSes are O and O. The 67 is Mandarin; the 92 Cantonese.
- KGO 105.1 no 67 music. Its 92 is tX, single sideband compounded with KKH1 100.7 San Rafael for the benefit of the manager who lives in Los Angeles to hear. The special receiver was made by SCA Data Services, and is no longer available. With an ordinary SCS receiver, "You hear nothing—

except you can sometimes tell there's some activity there."

CA San Diego KPBS \*89.5 add t ,O, Tagalog, retaining tT, 67.

CA San Francisco KALW \*91.7 t ,Q, Ethnic/American Broadcasting New York, with Russian. This is a temporary duplication of KUSF 90.3's 67 kHz SCS. KALW continues its 67 kHz Sinocast, a locally produced program by Charlie Chan. The 57 kHz has a PTY of "Public" and relays National Public Radio clock, said to be "accurate to .1 second per hour, dynamic text information (RT) indicates actual real-time broadcasts [example]: 'On Air Now—All Things Considered With Next Metro Traffic at 4:19 PM'." KALW runs RBDS TP (traffic program) in both drive times with newsroom microphone activated (dynamic) RBDS TA (traffic announcement) triggers RBDS sub-codes in home/car receivers. Dave Evans there offers free software applications for RE 533/523.

KEAR \*106.9: Its 92 now t ,K, Korean, having lost 92 kHz music. The 92 service Bill Battles had on KEAR and the former KEBR 100.5 Sacramento is still on the air, but going directly to the stores in each city on the 900 MHz band.

DC Washington WASH 97.1 tI, 67, ANA, which stands for Arabic something.

GA Toccoa WSTE 106.1 no SCS (drops tU, 92), "South 106.1."

IL Chicago WKQX 101.1 tO, 67, Chinese

IL Highland Park WVVX 103.1 tQ, 67, Polish

IL Pittsfield WIPA \*89.3 tT, 67

IL Skokie WTMX 101.9 still t ,G, LDS, which is listed on the LDS web site. It offers radios at \$95 from Compul (NH) and Corvus (AZ).

IL Warsaw WIUW \*89.5 tT, Radio Information Service

MA Cambridge WHRB 95.3 still tQ,Q, with the 92 being Greek. That is expected to move to a Rhode Island station (see last month, p. 4, col. 3).

MN Brainerd WJJY 106.7 tU, 67

NJ Newark WBGO \*88.3 92 is Radyo Pinoy. "The lawsuit against Lino Celle of Radyo Piny is still active, despite his telling you it was 'thrown out' (see Oct., p. 4, col. 1). In the two years since Kathy Enriquez-Ty first brought the suit against Celle, Judge Michael Mukasey has dismissed most of the original charges, including obscenity and violations of FCC rules, but the defamation charge still stands. On April 8th Mukasey issued a 10-page 'opinion and order' on the case. He wrote in part that even though Celle didn't mention Ty or her company by name (Jan. '96, p. 6, cols. 1-2), 'it is reasonable for persons who know the plaintiffs to conclude that Celle's allegedly defamatory statements were of and concerning them'. But this is not the last word; the case still has to go to jury for the final decision (not "verdict:" as this is a civil case) unless the two sides settle out of court."

Now working at her family's sausage plant in Irvine CA, Ty told the Filipino Reporter that the 'ordeal' caused her to abandon her business in Bronx and cost her a huge amount in legal fees. 'But I will not stop until my honor is vindicated,' she said. 'I think I made the right decision in suing Celle despite the high cost of prosecution'."

And Lino Celle is suing the Filipino Reporter for \$10 million because they wrote that AT&T will not renew its ad contract with Radyo Pinoy due to complaints that Celle used "foul language" on the air. "In fact, an AT&T spokesman told another paper that AT&T likes his program and the contract remains in force." The Filipino Reporter ran a front-page story Apr. 25 saying Celle tried to stop the sale of the 4-18 edition (which reported on the Ty case) by threatening to sue stores that sold the newspaper.

NC Asheville WHNS 21, the Fox affiliate, has Triange Radio Reading Service on 92 kHz. "It was moved from SAP, 78.67 kHz, because people complained their TVs or VCRs only got the reading service, not knowing how the SAP function operates. The reception is fine on the

TV band's 92 kHz."

WUNL \*26 has the reading service from WCQS \*88.1's SCS 6 a.m. to 6 p.m. After that the channel goes to DVS—descriptive video service to the blind.

NC Charlotte WFAE \*90.7 still has a radio reading service on 92 kHz. It is repeated on the SAP of WTVI \*42.

NC Lumberton WUNU \*31 is a new station getting the reading service on itsSAP. "Radio reading services will be available to 98 percent of

78 HAYWOOD STREET, SUITE 08 ASHEVILLE, N. C.

the state," including both FM-SCS and TV-SAP, reports Bob Brummond of Asheville, who runs RAISE.

SC Anderson WROQ 101.1 tU, 67 (from tX)

TN Chattanooga WTVC Ch. 9 has a pro channel carrier on all the time; programs five hours a day with newscasts for in-studio monitoring. ItsSAP is with occasional audio—election coverage news, holiday specials and information on a variety of topics and seasons. "Our greatest need is for a pro channel receiver."

TX Mirando City KBDR 100.5 still t(), with GPS from Digital Corrections, Inc., 10121 Miller Ave., Ste. 201, Cupertino CA 95014; 1-800-446-0015; att. Jim Bradley. By using GPS on SCS and comparing that with orbiting satellites, accuracy of the readings is increased to within 1 meter. Electronics Now magazine, June issue, has an article on how to build an FM transmitter. It will supposedly produce a "clean, stable, broadcast quality FM stereo signal."

"Continued best wishes in your recovery. I had quadruple bypass surgery in June '94 and had a completely uneventful recovery even though I live alone," J.B., Easton PA.

NonIDs, Not Just Slogans

Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)

- AL Fayette WTXT 98.1 98-TXT. "I called the station and they told me they never use '98-X'."
- CA Calistoga KGRP 100.9 The Grape
- CA San Diego KIOZ 105.3 Rock 105.3, now with Howard Stern after leaving XETRA 91.1 Tijuana.
- GA Folkston WOKF 92.5 The Eagle 92½ (from "K-92"). ID list starts out with Kingsland-St. Marys. It moved its studios from Folkston about six months ago, as "the business really went down in Folkston. We are six blocks from WKBX, but they are competitors." New phone number is 1-800-762-5087.
- IL Dundee WZCH 103.9 La Zeta (not "Z Spanish"). It is simulcast with WRZA 99.9 Kankakee IL, except for separate ID at top of hour. "Would find call signs easier to understand in Spanish than in heavily-accented English!"
- MI Detroit WYST 97.1 97.1 K-Rock (from "97 Rock"). New program director is John Gorman, former p.d. at WMMS 100.7 Cleveland. He's the guy who ordered staff members to cut wires during a live Stern broadcast in June, 1994. Howard recently called Gorman a "scary guy" and added, "I'm glad he's on our side now." [21000 h.v; 225 m
- MI Glen Arbor WJZJ 95.5 Jazz. Seeks/
- MN Staples KSKK 94.7 The Arrow (not strict; used only on the half hour; calls heard otherwise). [102.3 (from "Cool")
- MO Columbia KOQL 102.3 Oldies/
- MO St. Charles KCLC \*89.1 89-1 The Connection
- NH Newport WVRR 101.7 V-101 (from "The River")

NY Mount Hope WXHD \*90.1. "You may as well list WXHD's nonID as WFMU; they show no sign that they plan to have any original programming." [from "Super Q"]

- OH Mount Vernon WQIO 93.7 93-Q/
- OR Portland KXL-FM 95.5 Mix 95.5
- PA Berwick WKAB 103.5 Oldies 103.5 (from "B-103.5"); IDs with Bloomsburg—Hazleton—Freeland—Wilkes-Barre.
- PA Dallas WDL5 93.7 Kool 94
- PA Elizabethville WYGL-FM 100.5 Big Country (from "Wiggle 100")
- PA Mifflinburg WWBE 98.3 Big Country (from "B-98") [from "Wiggle 92"]
- PA Riverside WLGL 92.3 Big Country/
- PA Sunbury WQKX 94.1 uses calls, "94-1 WQKX," having dropped "94-KX."
- SC Ridgeland WZGR 104.9 Gator 104.9
- TN Jackson WJXA 92.9 J-92.9 (back to)
- WI La Crosse WTRV 95.7 95-7 The River (from "River 95")
- PQ Montreal CITE 107.3 (and CITE-1 102.7 Sherbrooke) Citay Rock-Detente (from "Citay, cent, sept")

**Multi-City IDs In Use**

- FL Marco WAVV 101.1 with Naples-Fort Myers and Cape Coral, still "Wave 101"
- PA Altoona WFGY 98.1 no ID with Johnstown-State College
- PA Avis WQBR 99.9 no ID with Lock Haven
- PA Beaver Springs WLZS 106.1 no ID with Middleburg. [ID any more.]
- PA Bloomsburg WHLM 106.5 no multi-city/
- PA Canton WHGL-FM 100.3 (not "WHGL," p. 200 FM Atlas-17), with varied second and third cities.
- PA Carbondale WSGD 94.3 no ID with Wilkes-Barre—Scranton; now parallel to WDL5 93.7 Dallas.
- PA Covington WDKC 101.5 no ID with Wellsboro and other cities, and it is "still mono."
- PA Muncy WHTO 93.5 with varied second city.

**Selected AM Happenings**

- AL Alexander City WRFS 1050 reported silent.
- AL Brantley WLVN 1080 deleted.
- AK Anchorage KABN 840 still simulcasting KLEF 98.1 with classical. "It is owned by Chester Coleman—the same one you mentioned [last month, p. 8, col. 2]. Since 'Cabin' wasn't quite off the ground and faced with the prospect of losing the license for being off the air for over a year, San Francisco broadcast broker Coleman decided to ask to duplicate KLEF's programming. Coleman decided to set up shop in Alaska about four years ago when he bought a ticket in the Mat-Su Borough's 'Free Land' lottery and won."
- AZ Casa Grande KFAS 1260 deleted.
- AZ Flagstaff KCLS 690 deleted.
- AR De Witt KDEW 1470 deleted. See "Call Letters," p. 1.
- CA Coalinga KKFO 1470 returns to air with Spanish contemporary.
- CA Costa Mesa KNOB 540 not yet classical as reported last month, p. 5, col. 1. It is all Beatles, and misIDs as "The New KGIL," with official call letters spoken fast on the hour, mentioning three stations without saying their frequencies. "It sounded pretty good. Automated but not satellite delivered. Enjoyable to listen to."
- FL Clermont WWFL 1340 had been silent; now all Elvis.
- FL Marianna WTYS 1340 deleted.
- FL Monticello WMFL 1090 deleted.
- FL Pompano Beach WRBD 1470 was silent; now talk and in a combo with WJBW 99.5 Jupiter-AMs.
- GA Carrollton WLBB 1100: Newly appointed g.m. Amy Bullington, 24, is jailed and charged with murder and arson. She had worked there since she was 16. She's accused of shooting her fiancé in the head and torching the log cabin they shared. It was the third time in the past two months in Carroll County where a fire was set to cover up a killing; one of the incidents remains unsolved. There were no reports of violence or abuse. Steve Conner worked as a mechanic at a

- car dealership. WLBB is a 1 kw country daytimer. Said a work associate: "I know it's a relief [that she's alive] even though she's in terrible, terrible trouble. Maybe she was fighting for her life."
- GA Claxton WCLA 1470 returns to air with black gospel.
- GA Cordele WUWU 1490 deleted.
- GA Dawson WHIA 990 deleted. [talk.]
- GA Woodbine WCGA 1100 returns to air with/
- HI Honolulu KIKI 990 returns to air, simulcasting KIKI-FM 93.9.
- KISA 1540 returns with talk.
- IL Chicago 1160 now WSCR with sports. Had been WJJD, whose venerable call letters retire. WSCR had been on 820, which becomes motivational WYPA (see March, p. 5, col. 2.).
- LA Vidalia KAIN 1040 deleted.
- ME Lincoln WTOX 1450 deleted.
- MD Bel Air WHRF 1520 deleted.
- MA Boston—Christian Science Monitor wants to sell its radio service, "Monitor Radio," and its shortwave stations. Radio is draining \$8 million from the church, which would like to plough the money into the newspaper. It would not disclose the asking price or if there's a prospective buyer. Monitor programs, "Midday," "Early," and "Daily" editions have been carried on 200 public stations.
- MA Framingham WRPT 650 is a new station with syndicated talk programming, such as G. Gordon Liddy. It's a daytimer whose 250-watt signal is trying to squeeze in among the Boston biggies on AM: "It's small, but the signal is unbelievable. We've gotten calls from southern New Hampshire, downtown Boston, Providence and Cranston. It might be low power, but it covers a lot of area."
- Co-owned with WJLT (formerly WBIV) 1060 Natick MA, now with Christian programming.
- MI Detroit WJR 760 is "down," while WWJ 950 keeps "chugging along [as] the new king of morning radio." WJR's trailing WWJ in the morning wasn't its only bad news. WJR had tried to re-invent itself since the death of popular morning host J.P. McCarthy in 1995. It has dropped to third place overall behind WJLB 97.9 and WNIC 100.3. This was the "first third-place finish for WJR in memory."
- MN Minneapolis KTCJ 690 classic country, now that co-owned WBOB-FM 100.3 has dumped country (see "Formats," above). Features mostly "old standards" in country music—songs recorded before 1990. "It should especially appeal to fans of KJJO, a former classic-country station at 104.1 FM that changed to an adult contemporary/jazz format in 1995." KTCJ and WBOB-FM are owned by KEEY, K-102, another country station.
- MS Hattiesburg WHSY 1230 deleted. [rm.]
- MS McComb WHNY 1250 had been silent; now/
- NE Lincoln KHAT 1530 deleted.
- NJ Pleasantville WUSS 1490 silent; was to have returned with sports; previously simulcasted the oldies format of WMGM 103.7 Atlantic City.
- NJ Washington WSRR 1580 deleted.
- NM Santa Fe KTRC 1400 had been silent; returns with adult standards.
- NM Taos KKIT 1340 silent.
- NY Jamaica, Queens JFK Airport T1 Station now on 1630 (from 530)
- NY New York (Woodside, Queens) WWRL 1600 soon to go to 39000 from 5000 watts. Now with an urban oldies format (from g); "100% Pure Soul," mostly '60s and '70s.
- NY Sandy Creek WSCP 1070 returns to air with a country simulcast of WSCP-FM 101.7 Pulaski.
- ND Minot KTYN 1430 deleted.
- OH Delaware WDLR 1550 silent.
- OR West Klamath KWSA 1070 had been silent; now on with adult standards.
- PA McConnellsburg WVFC 1530 had been silent; on with country.
- PA Scranton WTSS 1320 deleted.
- PA Somerset WVSC 990 back on air, but barely. "Nobody is there—it uses a satellite feed. Even its IDs are garbled, sometimes running two things at once." [now on with country.]
- TN McKenzie WHDM 1440 had been silent;/

- VA Broadway WBTX 1470 back on air after 97 days after losing its tower and transmitter to the remnants of Hurricane Fran last September.
- VA Herndon WRHX 1440 deleted.
- VA Newport News WTJZ 1270—license cancelled by the FCC, but is on the air, and it believes cancellation is the result of FCC error.
- VA Waynesboro WAYB 1490 deleted. All these deleted stations had been off the air at least a year, with all pending applications for these stations dismissed by the FCC.
- WA Lacey KBRD 680 silent, with its programming moving to KLDY 1280. The standards format will return to KBRD after the sale of KLDY to Washington State University.
- WV Logan WLOG 1230 had been hot AC; now silent.
- POLAND Radio One—the longwave station's antenna collapsed Aug. 18, 1991, and it's still not back on. At 616 m, it used what was called the world's tallest structure. Apparently Poland has other priorities at a time when listeners are defecting to FM.

 "Sorry to hear about your recent heart surgery, but glad to hear it was successful, and I hope you are recuperating in good spirits and good health," C.I., Rochester NY.  
 "Get well. God be with you in your recovery," K.O., Joliet IL.

**Watch Piracy Prevail**

Nothing short of repeal will undo the effects of the Telecommunications Act in the United States. That Act has led to mergers unthought of up to last year. Markets like Portland OR where one owner has five FM stations are illustrative of the trend.

Docket 80-90 created some 700 new FM stations. That Docket was cited by the industry in convincing Congress and the FCC to deregulate radio station ownership, leading to duopolies and huge new ownership groups. The industry said with all the new FM stations coming on the air, existing stations needed to combine and expand in order to survive.

However, Docket 80-90 was not abuse. It was no threat to the existing order. It was an instrument for scores of AM only stations in small markets to get an FM affiliate. It also provided for enterprising new blood to join the ranks of broadcast owners.

The industry succeeded spectacularly in achieving the deregulation it wanted. Against this backdrop is a group of microbroadcasters who exist without benefit of federal license. This newsletter has not condoned piracy, despite the background I have as its publisher. This background includes having helped two educational institutions start "extra-legal" radio stations as a step toward full licensed broadcasting, and I am aware of individuals who went on to success in commercial broadcasting who were pirates.

Stephen Dunifer has to date prevented the courts from silencing his unlicensed station in Berkeley CA. Whether or not he is forced off the air is almost irrelevant. He speaks of 1000 microbroadcasters coming on the air. I am sure that number is close to being achieved as of now.

The industry has for years harped on the need for "deregulation." It would stop at full technical deregulation, however, wanting the FCC to act as an electromagnetic "traffic cop."

The microbroadcaster movement could force a form of "deregulation" upon us in the technical sense as well. Brace yourselves as a certain amount of chaos takes place in FM, TV and digital audio broadcasting, as it did in AM radio in the 1920s. Any such chaos will have emanated from a need to counteract an industry—both commercial and noncommercial—motivated by a desire to grow ever larger. In so doing, it is the public interest that will have gotten lost.

Blame or credit your colleagues—the big group owners—for helping to bring "deregulation" full circle.

**WFUV (Again!) Given Green Light To Build Tower**

A Manhattan appeals court has ruled that Fordham University may complete a 146-m tower it started building, and which was about half constructed when opposition arose.

The tower is on the Bronx campus across from the New York Botanical Garden. By a 4-0 vote, the State Supreme Court's Appellate Division upheld a lower court ruling last June that the tower is a valid accessory to the school's expansion of the radio station which has been on the air since 1947.

The Botanical Garden's opposition based on aesthetic grounds was rejected. Justice Sheila Abdus-Salaam said it would be an "arrogant abuse of judicial power" for her to reverse the board since it did not act arbitrarily or capriciously, and "there is no perceivable injury" to the garden.

Denis O'Connor, the Botanical Garden's lawyer, said the ruling has no immediate practical effect because of a pending environmental impact study ordered by the Federal Communications Commission. He claims construction can't be resumed until the FCC gives its OK.

**Small Print Happenings and FM Industry News**

ABC Radio is the beneficiary of the recent Chancellor/Evergreen merger. It is buying WDRQ 93.1 Detroit and WJZW 105.9 Woodbridge VA. Chancellor was required to spin off the two stations. ABC already owned WHYT 96.3-AM Detroit [see "AM Happenings," above for news about WJR, WHYT's AM adjunct] and WRQX 107.3-AM Washington.

In Jackson MS Capstar is spending \$60 million for FMs there, as well as in Biloxi, Daytona Beach and Wichita. It will get WMSI 102.9 and WSTZ 106.7 Vicksburg, WGNE-FM 98.1 Titusville FL, plus KKRD 107.3 Wichita and KRZZ 96.3 Derby KS.

Capstar also gets all the 36 stations that Patterson Broadcasting owned for \$215 million. These include WZZO 95.1 Bethlehem PA, where it already owns WAEB-FM 104.1 Allentown. In Grand Rapids it is getting WGRD 97.9 and WLHT 95.7.

Capstar is also buying the Knight Quality Stations of New England. It is getting WEZF 92.9 Burlington VT, WGIR-FM 101.1 Manchester NH, WHEB 100.3 Portsmouth NH and WSR5 96.1 Worcester MA.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

Z Payson 99.3A, June 16, July 1  
 A Blue Lake 106.3A, June 16, July 1

Gulfstar and Capstar are about to merge. The deal will create a 229-station group valued over \$1 billion. Steve Hicks will run the combined company.

Susquehanna Radio is buying its third FM in Indianapolis—WGLD 93.9 Noblesville, to combo with WGRL 104.5 and WFMS 95.5.

Among Jacor's recent acquisitions is KBKK 106.5 Spanish Fork UT. It owns KODJ 94.1 Salt Lake City, KZHT 94.9 Provo, KKAT 101.9 Ogden and KURR 99.5 Bountiful. In Cleveland it's getting WLTF 106.5-WTAM AM. In Boise, KCIX 105.9 is added to KXLT 107.9 Eagle. Jacor already owns KLTB 104.3 and KARO 103.3 Caldwell.

Deschutes River Broadcasting is buying KKKY 97.9 Milton-Freewater OR. It already owns KEYW 98.3 Pasco, KORD 102.7 Richland and KXRX 97.1 Walla Walla WA.

Odyssey Communications buys two Chicago areastations, both on 103.1. They are monophonic WVVX Highland Park IL and stereo WJDK Morris IL. It owns 107.1 stations ringing New York city and Los Angeles. The NY area stations go by "New Country Y-107," while the Los Angeles area stations are known as "Southern California's Modern Rock, Y-107." Mike Kakoyiannis, pres., said, "With the purchase of WVVX and WJDK, Odyssey Communications is now positioned to tap into the approximately \$1.3 billion revenue stream of the top radio markets in the country, using Odyssey's unique operating strategy of Synchronized Total Market Coverage (STMC)."

Arbitron decided not to produce a spring 1997 radio book for the Grand Forks-East Grand Forks ND-MN market because of the floods that inundated virtually all of the towns for several days. The company will not charge stations in the market for the book and plans to make a donation to the flood relief fund for the area, according to the "M Street Journal."

The FCC has given the green light to DTV, digital television. DTV signals are already on the air in a few markets. But by 2006 the FCC thinks the analog system will be phased out. Digital and analog channels would co-exist for a while. Digital stations might occupy temporary channels up to 59, and then go back to their original channels after analog expires. One version calls for low band, channels 2-6, remaining for TV. Heretofore, speculation was that Channel 7 would be the lowest channel remaining for TV, with FM and other services free to invade the below 87.9 mhz range. It is highly unlikely the move to digital will be complete in only nine years. If not, the FCC would have to extend the deadline. Unless prices of the new sets come down considerably from the \$2000 they're expected to sell for at first, the public might be reluctant to convert.

One problem with the low band (channels 2 to 6) is the propensity of signals to skip. A station 1600 km might wipe out the digital image of a local station, or they could "swap signals." No interference or ghosting would occur. Audio would be intermixed throughout the 6-mhz band of the TV station, which would probably make it impossible to manufacture TV audio radios.

My petition for declaratory judgment allowing for tunable FM/SCS radios has languished at the Commission since September. Working on the problem was engineer Bob Greenberg of the mass media bureau. Word was received after last month's issue was keyboarded of the untimely death of Greenberg. Greenberg, 42, was the main SCS expert at the FCC, and was scheduled to attend the NAB in Las Vegas last month. Bob was "a fine engineer and administrator," notes the Milwaukee SBE newsletter. "He will be missed."

Besides WDCU reported being for sale (last month, p. 7, col. 3), another public station may be sold. WYCS \*91.5 Yorktown VA is owned by a school system that could use the money. It has been seeking bids for the 20-kw station. Four groups have expressed interest, including WHRV 89.5-WHRO-90.3, and two religious outfits.

Commercial station KNXR 97.5 Rochester MN broadcasts classical music Sunday nights. It turned the weekend of Apr. 19-20 over to a Radiothon to benefit the Rochester Orchestra and Chorale. The total raised was \$35,000.

WFMT 98.7 Chicago announces an overnight jazz service, similar to the classical "Beethoven Satellite Network." BSN is never announced as such on the air, but WCAL \*89.3 Northfield MN carries it overnight. Wisconsin Public Radio carries it 9 p.m. to midnight when sign off occurs. The new jazz service started Mar. 11, offering 11 hours of music starting at 10 p.m. Host is Bob Parlocha, former p.d. KJAZ 92.7 Alameda CA. It was expected to debut on 50 stations in the U.S., said David Levin, WFMT syndication director. [See ad below about their SCS availability.]

No wonder WKXK 94.7 Chicago changed (see above, "Formats"). Robert Feder had in his column in the "Sun Times" that WKXK was tied at No. 26 with WGCI AM 1390 (former WGES), and barely above such stations as WMVP 1000 AM, WYCA 92.3, WIIL 95.1 Kenosha, WRZA 99.9, WJJD [now WSCR] 1160 AM, WYLL 106.7, WXLC 102.3 and WZCH 103.9.

Gaining fast in the ratings was WLIT 93.9, "Lite FM." It moved up to No. 3 Arbitron, "posting the highest audience share ever achieved for a station in its format. [This] impressive showing comes on the verge of its sale by Viacom, Inc. to the newly combined Evergreen Media Corp. and Chancellor Broadcasting Co."

Totals as of Mar. 31, stations on the air. FM 92-108 mhz 5442, FM 88-91.9 1865. Compare that total to AM, 530 to 1710 kHz 4821.

From the classifieds: Radio technician-engineer. "We have a CP to build a second station, 12 translators, and a satellite uplink system to be installed. Salary plus benefits. Christian station in a small town. Resume to Don Hughes KJIL \*99.1, PO Box 991, Meade KS 67864. EOE. I'm glad they pay a salary!

Wants to buy a Denon TU-680 NAB AM stereo-FM stereo tuner in excellent condition. Aaron Coffey, Local Broadcasting, 1411 Waverly, Joliet IL 60435; (815) 722-4824.

Looking for FM translators, 10 watts or more. Prefer TTC. Ben Thompson, Raider Communications, 1638 NW Darden Valley Blvd., Roseburg OH 97470; (800) 341-5761.

Martin Theil would like old CB radios, scanners or other types of electronic equipment which might otherwise be discarded. "He says he is paralyzed but needs activities to keep his hands occupied." Send to Mr. Theil, 3521 Atlantis Dr., Holiday FL 34691.

Marti SCG-8H subcarrier generator. Excel. cond. several available, best offer. P. Wahl, WWIB 103.7, Hwy. 53, Chippewa Falls WI 54729; (715) 723-1037.

For lease—the most powerful SCS subcarrier in Chicago—stop John Hancock Building, 15.5 kw at 357 m. Dan Schmidt, (773) 279-2000. So WFMT finally wants to embrace an SCS!

## FM FORUM

### CONTRIBUTIONS FROM READERS

"I've stopped expecting great performance from the FM tuner sections of audio/video receivers and tuner/preamps; since the yen soared, the tuner sections have hit the skids," writes Edward J. Foster in "Audio" magazine. The Kenwood KC-Z1 A/V tuner/preamp "is comparatively good in most respects"—but it should be at \$2800!

K. W. Walter sent an editorial from the Toronto Globe and Mail, "The Licence that CBC-AM Needs" by Michael Valpy. Valpy doesn't want to hear dance music, nostalgia, or have CISS move off 92.5. He wants CBL off 740 and onto 99.1. "Relocating the [CBL] transmitter is pointless. AM transmission is on the same road as the telegraph and the dodo bird. Radio receivers are being sold these days without AM transmission bands [makes and models?]. It is yesterday's technology.

"Indeed, AM transmission in all large cities is technically problematic and, especially among listeners under 30, dated. Some years ago the CBC proposed a total move from AM to FM. This was rejected by the CRTC, which at the time wanted to preserve the vitality of AM. The CBC revised its plan to state that it would apply for AM-to-FM moves case by case." He cited two polls that state seven of 10 Tronto people support CBL's move from AM to FM.

NY City's Y-107 [1] stations FAXed that their country audience continues to grow—an increase of over 85 percent in just two months, to 411,200 listeners a week. They claim to have over three times as many listeners as WMJC 94.3 on Long Island, with one of the stations being WWHB 107.1 on the Island. Adrienne Austen has been hired as news director and morning show personality. She had come from Z-100 and WBCN 104.1 Boston, and most recently at Metro Traffic (as "Adrienne Nardo").

WBCL \*90.3 Fort Wayne notifies that its annual Easter dinner baskets project provided food for 357 needy families in NE IN and NW OH this season. Food for the baskets was collected from listeners during a four-week period. The project was part of a series of such endeavors organized by WBCL "to meet the practical needs of those in the communities they serve, as well as to reach them with the love of Jesus Christ."

A book about radio written by 27-year-old Sarah Vowell takes aim at everything from Rush Limbaugh to National Public Radio smugness and the banality of music playlists. The book is entitled, "Radio On," and was reviewed in the Feb. 24, "Newsweek," p. 67.

Another book is by Howard Stern. No, it's not "Private Parts." The newest is "Howard Stern: King of All Media," and outlines his first 12 years in the business. His earnings are estimated at \$17 million a year, but he's sensitive in discussing that. Writes an anonymous contributor: "Howard Stern is truly King of All Media now that Private Parts is the No. 1 movie and its soundtrack the No. 1 album. The only problem is that his radio show has been a big bore lately because the movie is all he talks about! I haven't seen the film but the main complaints among his fans is that the story ends before Howard signs with K-Rock/Infinity; only his early days in radio are covered."

A former "FM Atlas" subscriber and long-time radio personality has died at 93. Dick Gilbert moved from WHN in New York city in 1946 to Arizona, and founded several stations in that state. The term "disc jockey" was coined by Variety editor Abel Green to describe Gilbert's work on WHN in 1942. Earlier, Gilbert had tap-danced on radio. Stations he started included KXTC 96.9 Phoenix (now KHTC) and KQST 102.9 Sedona. He was always critical of my showing KQST on 102.9, where it only had a construction permit. It had languished on 100.1 for years, only recently moving to 102.9 as a full Class C. And correct FM Atlas-17, p. 76, to note KSED 107.5 Sedona as on the air.

Until June,

Most of the Mexican information was searched on the Internet by Chip Kelley and only heights above average terrain are known. The FCC apparently does not care about effective radiated powers. Many of the stations are shown at potential powers or heights, probably not yet achieving the class status shown (also applies to facilities changes; see below, "Facilities").

**Stereo—or to be \$tereo**

CA Patterson KZMS 97.1  
 MI North Muskegon WLCS 98.3—back in stereo  
 after several weeks without it. "Dunno why"  
 it was mono.  
 MN Nashwauk (new) 102.9. "I'm working to get  
 it on by September. It's too early to tell what  
 its music format will be. Some other station  
 in the area might change format by then."  
 NJ Bridgeton WNJB-FM \*89.3  
 NJ Trenton WNJT-FM \*88.1. They may program  
 separately at times. "The difference [in  
 reported formats as shown in the 'FM Atlas']  
 comes in because different reporters may  
 view the same programming as being different  
 formats, or, say hear at different times of the  
 day when formats vary. Both stations do fair  
 amounts of talk, soul and jazz."  
 NY Minetto WKRH 106.5, "K-Rock." "We ID it  
 as Oswego, not Minetto!" Assumed ID with  
 Oswego. If they fail to mention Minetto on  
 the hour that would be a no-no as far as the  
 FCC is concerned.  
 PA McConnellsburg WEEO 103.7, to be oldies.  
 Heard testing starting May 8. Expects to be  
 on the air officially "very shortly." IDs with  
 Chambersburg-Hagerstown (MD)-  
 Waynesboro. No further tests of "Eagle 88.7"  
 there have been heard. "I'm no engineer, but  
 I can't help but wonder if a frequency other  
 than 88.7 would be better for other people in  
 McConnellsburg. Since WFWM in Frostburg  
 is moving to 91.9, maybe they could try 91.7  
 or perhaps 91.1..."  
 TX Big Spring KBTS 94.3, S, k, Tejano, "94.3  
 The Signal."

 Tejano 95"  
 TX San Augustine KCOT 92.5, rm. Had been  
 parallel to KDET-FM 102.3 Center. KCOT  
 still uses "Texas 102" as a nonID.  
 WI Chetek WATQ 106.7, k, ID with Rice  
 Lake-Menomonie-Eau Claire, "Moose Coun-  
 try" (strict)  
 NB Balmoral CIMS 103.9  
 NB Inkerman CKRO 97.1  
 NB Sackville CHMA \*106.9  
 ON Hearst ("hurst") CINN 91.1  
 ON Kapuskasing CKGN 89.7  
 Monophonic  
 NY De Ruyter WOIV 105.1. "We use only one  
 STL channel, and that is played into both  
 stereo channels at the transmitter. It's not  
 pseudo stereo. It's 'mono stereo!'" Remove

"Classical 105" nonID from "FM Atlas-17,"  
 p. 213.  
 NY Mexico WNDR 103.9 also "mono stereo."  
 They hope to be full stereo, but I will wait to  
 see if full stereo is implemented for the  
 comparatively few hours these stations have  
 music during the week.  
 TX Madisonville KMWL-FM 100.5

**Format Changes**

*Formats are the same as in the "FM Atlas"*  
 AL Abbeville WIZB 94.3 gr, simulcast with  
 WGZS 700 Dothan  
 AL Citronelle WHXT 102.1 g, southern gospel  
 AL Dora WZJT 92.5 r, expected on mid-June  
 AL Tuscaloosa WRTR 105.5 still r, now simulcast  
 with WOEN 103.7 Gadsden  
 AZ Mesa-Phoenix KZZP 104.7 rp, uses calls,  
 "KZZP your hit music station" ("but not  
 really top 40, though").  
 AZ Oro Valley KSJM 97.5 sr, now without Spanish/  
 Spanish/Tejano  
 AR Ashdown KARQ 92.1 still k, now parallel to  
 KDQN-FM 93.1 De Queen  
 AR Lonoke KMZX 106.3 rs, "Laser 106" (from  
 "Touch 106.3"); LMA with KDRE 101.1  
 North Little Rock, until sale to Arkansas  
 Media is finalized. "It's to be competitive in  
 this market... There's a void for that type of  
 music." Willis Broadcasting continues to own  
 KMZX's AM, KLRG 1150, with gospel  
 music. "It wasn't the FM but it was the AM  
 that always carried a large share" of the  
 market, Darryl White, operations manager,  
 said. KMZX "has received a number of  
 complaints around the area about the format  
 change" from gospel.  
 AR Magnolia KVMA-FM 107.9 rm, "Hits 108"  
 AR Marion KANG 107.1 sr, "hip-hop and R&B"  
 AR Monticello KGPO 99.9 rm  
 AR Pine Bluff KUAP \*89.7 s: soul/rhythm &  
 blues  
 CA El Cajon KHTS 93.3 sr, ID with varying  
 second city and then with San Diego,  
 "Channel 9-3-3."  
 CA Oildale KLLY 95.3 r  
 CA San Francisco KPIX-FM 95.7 rp, a temporary  
 simulcast of WTMX 101.9 Skokie IL.  
 "Sounds like they're getting the audio from  
 an ISDN. Usually sounds OK and it's stereo,  
 but kind of strident audio, squashed; too  
 much compression. 'Alice' sounds much  
 better!" The time given is Chicago (CDT) and  
 only Chicago area commercials are heard.  
 [See below, "Selected AM Happenings," for  
 news of KPIX AM.] KPIX-FM's nonID is  
 "KOYT."  
 CO Lakewood-Denver DKQS 107.5 sr, "KS  
 107-5 The Beat of Denver"  
 CO Pagosa Springs KWUF-FM 106.3 m  
 CT Hartford WZMX 93.7 o, classic hits  
 FL Century WPFL 105.1 sg  
 GA Atlanta WKLS 96.1 still rp, but squeezes out  
 Bubba The Love Sponge. Station surveys  
 showed that listeners "didn't want talk in the  
 evening; they wanted music."  
 GA Claxton WCLA-FM 107.3 s, urban gold  
 IL Carterville WXL 95.1 o, classic hits; LMA-to-  
 buy with WXF 97.9 Effingham (which it  
 simulcasts 1 1/2 hours a day)-KEZS 102.9  
 Cape Girardeau (MO)-WCIL-FM Carbondale-  
 WOOZ 99.9 Harrisburg  
 IA Mount Vernon KRNL \*89.7 pr, college rock,  
 "free form." It is off for the summer, but  
 plans to be back on in the fall, running from  
 about 1 p.m. to 3 a.m. daily (from 11 a.m.  
 Sat. and Sunday). It wants to increase to 100  
 watts, but because of other nearby stations  
 on 89.7 (principally KRUI-FM Iowa City) it  
 expects to be licensed at 85 watts. "We get  
 out 2 to 5 miles depending on the direction.  
 With the power increase we hope to reach  
 Cedar Rapids."  
 IA Pella KAZR 103.3 r, adding Mancow Muller  
 KS Columbus (not "Columbia," May p. 3, col. 2)  
 KODC 105.3 k, "K-105.3" (from "Rock  
 105")

- KS Hill City KKQY 101.9 k
- KY Grayson WUGO 102.3 m
- KY Louisville WLRS 102.3 was "stunting," playing the Beatles' "I Am The Walrus." Now it is pr, modern rock.
- LA Munfordville WMCC 102.3 pr, parallel to WLRS, as is WLOC 1150 AM.
- LA Basile-Lafayette (dual city ID) KQIS 102.1 r, "Kiss 102-1"
- LA Dubach-Ruston KPCH 97.7 o, "K Peach 97 FM Super Hits of the '70s"
- MD Bethesda WARW 94.7 still classic rock, adds the Greaseman, Doug Tracht, who returns to the Washington market. The show will originate at "Arrow 94.7," now a CBStation.
- MA Lawrence WEGQ 93.7 o, classic hits
- MI Marquette WUPK 94.1 still r, now parallel to WIMK 93.1 Iron Mountain; LMA-to-buy with WZNL 94.3 Norway MI.
- MI Muskegon Heights WMRR 101.7 op, classic rock—"an oxymoron. [With] a playlist similar to WLAV 96.9 in Grand Rapids."
- MI Port Huron WSAQ 107.1 heard playing classical on a Sunday, but assumed to still be country. W265AA 100.9 Petoskey MI was also heard with classical, leading to suspicion its primary has changed from WKPK 106.7 Gaylord.
- MI Walker WQFN 100.5 mr, "100.5 The River"

(strict; from "Smooth 100.5"). In an LMA-to-buy with Patterson Broadcasting/WGRD-FM 97.9-AM-WLHT 95.7 Grand Rapids. "The soft AC format is aimed at 35-to-54 year olds [and] is very similar to that of WOOD-FM 105.7. WOOD-FM is owned by Clear Channel Communications (along with WBCT 93.7 and WVTI 96.1).

"Patterson and Clear Channel are the two multi-station owning hogs in the market, and it is quite clear the entire purpose of 'The River' is to hurt WOOD-FM enough so that WLHT can beat WOOD-FM in the Arbitrons (just as the entire purpose of WVTI is to hurt WLHT); both having similar 'hot AC' formats). Thus we see the fruits of multi-station ownership; not more format diversity, but attempts to knock off the competition by programming similar-sounding stations. This results in the entire FM dial being basically clogged by three or four formats.

"In any case, Grand Rapids loses its only 'smooth jazz' station in the area, gaining yet another redundant AC (there are only about 10 on FM in West Michigan). Hooray for the media hogs and predatory capitalism."

MS Durant WLIN 101.1 mr, "Breezy." Its license was returned by the FCC. The station had sent in the incorrect fee with its renewal, but that has since been corrected.

MO Buffalo KBFL 99.9 t, mono, all sports

NE Blair KDCV \*91.1 pr, still mono, but off the air for the school year. This is contrary to a report the station has been off for a long time. It will return to the air this fall from about 4 p.m. to midnight weekdays. Some 30 to 35 students are normally involved in the KDCV activity. "We don't think we have the resources to increase power," said Paul Clark, sports information officer. It is 10 watts. A new general manager comes in this fall, Vern Wirka. The station is expected to become a greater part of the academic program at Dana (dann-uh) College when broadcasting resumes.

NV Las Vegas KEDG 103.5 still p, adds Mancow Muller

NJ Ocean Acres WQNJ 98.5 m, top 40, "B-98.5," plus "a lot of dance-oriented music." No longer simulcast with WJLK 94.3 Asbury Park. [classic hits

NJ Atlantic City WMGM 103.7 still o, now/

NM Angel Fire KAFR 99.1 k, "progressive country"

- NY Chateaugay WYUL 94.7 "stunting." New format later this month.
- NY Newburgh WGNY-FM 103.1 rj, adding jazz 7 a.m. to 4 a.m.
- NY Norwich WBKT 95.3 k
- NY Noyack WSUF \*89.9 nt, mono. Carries "Morning Edition" and "All Things Considered" with co-owned WSHU \*91.1 Fairfield CT, but not the classical music of WSHU.
- NC Murfreesboro WDLZ 98.3 sr
- NC Winston-Salem WXRI \*91.3 g, southern gospel
- OH Hillsville WHQK 105.7 still k, now parallel to WHOK 95.5 Lancaster.
- OH Troy WRNB 96.9 s, urban gold, with Joyner in morning drive.
- OK Stillwater KXPX 98.1 m
- PA Philadelphia WMMR 93.3 r, LMA with WMGK 102.9-AM
- WJZZ 106.1 js. It "says it's smooth jazz, but I call it jazz and soul in about equal parts, because a lot of what they play is normally considered soul. A jazz purist would cringe at calling some of what they play jazz. . . One of the reasons I switched my office radio from commercial classical WFLN 95.7 to WWFM 89.1 [Trenton NJ] (and later the 107.9 translator) was the former's insistence on playing copious amounts of Gershwin, Copeland and others of what I call 'modern pops' composers in addition to a disproportionately large amount of opera, in my view. Now, 4-5 years later, WWFM has increasing amounts of all these creeping in. In that sense, I suppose, I'm something of a classical purist, which is also why I wish both stations would program a little choral music. . ."
- PA Sharon WYFM 102.9 still o, now classic hits; still "Y-103" [and in stereo.
- TX Brownfield KLZX 104.3 op, back on air, /
- TX Freer KBRA 95.9 k, returns to air.
- TX Nacogdoches-Lufkin KTBO 107.7 op, uses calls (no more "Q-107").
- TX Sonora KHOS-FM 92.1 is still k, uses calls, no more "Kicksie" nonID. ["98 Rocks"
- TX Texarkana KTAL-FM 98.1 op, still/
- VA Charlottesville WTJU \*91.1 still pc, but programs about 40 hours of classical a week. "We think (immodestly) that our classical programming compares favorably with that of any other station." [sic country
- WA Dayton KZZM 102.3 tk, talk and clas-/
- WI Brookfield WXPT 106.9 r, CHR, "The Point" (strict). "They bury their call letters." With "very few commercials; no dee jays."
- PR Lajas WCFI 103.7 r, Spanish hits, parallel to WXRX 100.7 Bayamon
- PR Vieques Island WVIS 106.1 m, romantica, goes Spanish. It has moved from Christiansted VI.
- ON Marathon CFNO 93.1 and relayers r (from k)
- ON Thunder Bay CJSD 94.3 rp
- SK Buffalo Narrows CIBN 89.3 r, parallel to CKRW 610 AM Whitehorse YT

**On Air and DX Ready (Selected)**

- CA Fairfield 90.1 "Grizzly Radio, Home of the Big Pink," playing mainly Pink Floyd.
- CA Gilroy KUFX 94.5 now 34000 h.v; 179 m. It lowered its height from 773 m, but raised power from 1200 h.v. This lower height has increased the station's multipath problems. One reporter called it a "multipathy" station with "half the coverage it had. . . It doesn't cover Santa Cruz any more."
- CA Sacramento KEDR \*88.1 testing with about 250 watts. "Mostly they're duplicating KEBR 89.3 North Highlands and KEAR 106.9 San Francisco, but Sunday all three had separate church services. They're co-sited with KVIE-6, but even so I expect that if they ever go to full power they'll create havoc for TV viewers! . . . Apparently the mystery K-Love translator on 103.3 (May p. 4, cols. 1-2) was cable leakage. At least, K-Love has never heard of it."

- MD Grasonville WRNR-FM 103.1 rumored to be going progressive rock, now that it's sold.
- MD Hurllock WAAI 100.9, not yet on 100.5. "The move to 100.5 has been put on hold for a while."
- MI Ironwood W220BJ \*91.9. This is interfering with pick up of WXPB \*91.7 Rhinelander WI for relaying on W265AI \*100.9. "Your FM Atlas told us who was causing the problem!"
- MN Two Harbors KZIO 104.3 now m in true stereo, as "Sunny, Unforgettable 104.3." It preceded this with about two weeks of "stunting," playing "The best mix of the same 14 songs." Songs included "Unforgettable," as done by Nat King Cole, and the version where his daughter Natalie's voice was dubbed in with the voice of her late father.
- NJ Atlantic City WNJN \*89.7, simulcasting with WNJT-FM \*88.1 Trenton.
- NY Troy WRPI \*91.5 isn't a trashy station—it's just that it has a program, "Talking Trash," concerning the recycling issues of our time. It's a one-hour 8:30 p.m. program heard the first Tuesday of each month, leading off with a half-hour of "expert" opinion, followed by a roundtable discussion by municipal officials talking about recycling. Plans are to invite call-in guests. "The more people we can get educated [about trash recycling], the less that goes to our landfills," said Ken Mogul, host of the show, and city of Albany recycling specialist. It's been compared to "Car Talk," the NPR show with the Brothers "Click and Clack," but this program lacks a sibling in its host. It adds an awareness that, to get an audience, people have to talk in everyday terms about refuse and recycling. Reminds me of a friend who has been salvaging from the dumpsters at a local college. He picked up a good vacuum cleaner and color TV from students who would rather trash items than have to take them home.
- ND Ellendale K252CW 98.3, but KYNU 98.3 Carrington ND wants them off. "Ellendale should raise \$1000 and apply for a different frequency very soon. Also, consider a power increase for about \$2500."
- OH Cincinnati "Free Radio 105-5," 24 hours a day with contemporary Christian. It had a "mix"-type format, but according to Bill, the operator, no other station had this format, hence the change. "There is a lot of great Christian rock," he said.
- WV Lindside WHFI \*106.7 returns to air with rk, plus variety.
- NT Yellowknife CKLB 101.9 still ke, with 75% in aboriginal languages and 25% in English. "We are broadcasting in Dogrib from 1000 to 1300 [with] local news in both English and Dogrib, so people can get information in their language as well as in English." CKLB is commercial, but nonprofit, serving an area "that traditionally has been impoverished."
- YT Whitehorse CHON 98.1 now relies more on advertising. Historically, government funding was close to 100%. The goal is to cut funding completely and become fully commercial. "We are trying to get there. It will not happen soon, but that is our goal."

**Off Air—Or Not Yet On**

- AL Headland WBCD 105.3; moving from Chattahoochee FL.
- FL Marianna WBNF 94.1, while AM W/TYS 1340 had its license revoked. The AM had been silent.
- GA Roswell WTHA 107.5. Plans to sign on in July, with an audience expected to be up to 30% white, and to simulcast WHTA 97.5.
- MN Ely K272BL 102.3
- TX Victoria KEPG 100.9
- ON Longlac CJLL 89.9—"no signal." But it is low power, and possibly heard in rural areas, like around the Indian reserve, and not in town.
- ON Nipigon CFJQ 96.1

**Deletions**

CA Marysville K220AG \*91.9. It must have shut down when primary KCHO 91.7 Chico moved from 91.1 in the '80s! "I haven't heard it mentioned in years, and it now would only serve areas well covered by the primary."  
 CO Rocky Ford KHUG 95.9  
 GA Dawson WAZE 92.1  
 IA Vinton KLLT 107.1

 "I gave the extra Atlas to a friend who really appreciated it," B.D., North Haven CT.  
 "Get well, Bruce," J.J.K., Jr., Stamford CT.  
 Most of the above corrections from R.R., Jersey Shore PA, who writes, "I hope this is useful."  
 "The first substantial FM Es of the season here took place May 30, to the Oklahoma-Texas area. . . Great job on the FM Atlas! That's a great spring color on the cover," B.T., Buffalo NY.

**SAP/SCServices**

*Symbols are as in the "FM Atlas"*

AL Anniston WHMA-FM 100.5 t(1)M. "The 57 kHz was not discontinued as I reported earlier; rather, its injection level was lowered and it is often covered up by, and difficult to separate from, the tM, 67, at my distant receiving location (145 km)."

CA Berkeley KPFA \*94.1 no92 (had ↑, X). Also, the 67 ↑ left June 1. There is a temporary hiatus in the reading service until July 7, when it migrates to Oakland Channel 2's SAP. "When the dust settles we'll be in a much better situation, with better coverage. The people at KTVU like us so far." [See last month, p. 5, col. 1, and read about Seiko's plans for a robust data stream centered at 57 kHz, which KPFA will have, May '95, p. 8, col. 1.]

CA San Bernardino KZKI Channel 30 heard with Worship Network on iSAP. Previously had a KGI-L (location not available) on it. The Worship Network seems to be a visual source, with reminders to "watch this."

CA San Diego KPBS \*89.5's 92 kHz is Tagalog (last month, p. 5, col. 2), and probably Radio Manilla, based in Los Angeles (see Dec. '94, p. 4, col. 3). "I spoke to them a couple of years ago and they were very friendly but refused to tell me which San Diego station they were on. They just kept changing the subject!"

GA Columbus WVRK 102.9 ↑ resumed.

MN Minnesota Public Radio—the Radio Talking Book will go digital only for its satellite delivery initially. Full digital will occur only when the main channels convert to digital. Has been talking with a data company for using the SCS baseband of its monophonic news and information stations. Carol and I will be at the radio reading service conference Thursday, June 11, staying that night at the Radisson Metrodome, hosting an in-room reception for area blind customers. Area readers are free to call and stop by.

NJ Toms River WOBM-FM 92.7 ↑, C, a relay of WOBM 1160 Lakewood Township NJ.

OR Portland KKSJ-FM 97.1 drops ↑M. The main channel is "97.1 Kissin' FM," and again

speaking the false "KISN" call letters. "We're up for sale with sister station KKRH 105.1 (Salem). I'm guessing ECI, ARS or Citicasters will take us. They own most everything else in this market! The entire Heritage Media Group is on the block nationwide. Our G.M. has flown. We just have two program directors running the show, or shows!"

"Regarding your now-languishing petition for declaratory judgment allowing for tunable FM/SCS radios, if I were in your shoes I would be strongly inclined to let 'sleeping dogs lie,'" N.L., Atlanta GA.

"We use your book all the time in our quest to understand FM radio reception and is an invaluable tool for easily determining what station we might be listening to and where it is. . . . Keep up the good work," D.M., Project Engineer, Delco Electronics, Milford MI.

"I had ordered a radio with 67 and 92 kHz SCA from AJL Enterprises. I finally received it the other day, and it works really well. . . . [They also publish] the MicroComm newsletter. You ran an ad for them in the classified section of the March FMedia!" J.G., Toms River NJ.

"The FM Atlas is, as usual, a great piece of work! So, keep it up! I hope your heart recovery is right on track, and FMedia! is still one of the most informative works published anywhere. Thanks, as always, for your efforts!" G.H., Tarzana CA.

"I'm director of engineering and vice-president of Beat Radio with Alan. Just a note of thanks for your publications and your understanding of Micro Radio," K.P., Minneapolis MN.

Reader Miffed That FM Atlas Went Metric

"Thank you for doing such a great job with the FM Atlas. Enclosed is a sticker from radio station 'RADIO SCHLESWIG-HOLSTEIN', Northern Germany for your collection. From Southern Bavaria to Minnesota, with kindest regards, long-time FM Atlas user, Herbert Sturm."

"I quit buying your book several editions ago when it went metric. Even though I'm an engineer, I cannot get onto the metric system. I used to buy five of your books at a time. I suppose it would take too much space to print both side by side." CA caller.

NonIDs, Not Just Slogans

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

campuses with an increased radiating pattern." "The Klaw" claims to be legal as a Part 15 transmitter. "We are basically... set up to train students for broadcasting careers."

MA Boston WNFT 1150 being bought by media giant American Radio Systems for about \$4.2 million. The 5 kw AM station was owned by Greater Media "and has been little more than a distraction for the company that owns Boston FM operations WMJX, WBOS, WOAZ, WROR and WKLB". FM. Once known as WMEX, the 1150 frequency had KidStar, business news, and at times ethnic. The new station will be cheap to run for ARS and provide an outlet for sporting events its WEEI (AM) might not be able to clear. The \$4.2 million figure is "chump change for ARS, which owns more than 100 stations nationwide. But it's also a tidy sum for a station that had been languishing under Greater Media, which had no desire to jump into the AM fray."

MS Yazoo City WAZF 1230. FCC deletes the license of this silent station.

NH Madbury WWNH 1340—a Brian Dodge-owned station with Christian programming that's been on the air since 1989 without an FCC license. It held construction permits, which were rescinded in 1992. Dodge has requested reconsideration, which has been pending at the FCC since. The state of NH does not grant his "New England Love Church" recognition for tax purposes. He was unwilling to furnish documents to the New Hampshire Sunday News of Manchester. "I'm not going to comment on who, what, where or when. I don't trust you as far as I can throw you... That concludes this interview," he said, slamming the phone down.

NH Manchester WWXL 1450 silent; had been contemporary Christian. Expects to return in mid-month. [on with classic country.]

NM Hobbs KUCU 1390 had been silent; now/ NY Schenectady WGY 810—a prayer vigil was held outside its offices, attended by more than 50 people. Their prayers were to put an end to what they saw as divisive and hateful speech, broadcast by the station, particularly by afternoon host Mark Williams. They pointed out on Feb. 26 Williams attacked all

Palestinians as "tree-swinging savages."

The vigil was held because the Capital District Communities Against Hate had been unable to meet with WGY management. Tom Parker operations manager of the station said he wanted to meet with leaders of the various groups individually. "That way we can try to get a sense of what they need or are looking to convey to us, as opposed to a large group where things can get misconstrued."

- NC Warsaw WTRQ 1560 deleted.
- NC Whiteville WTXV 1540 deleted—but reported to be on the air. Owner said to be working to get license reinstated.
- PA Columbia (Lancaster) WNZT 1580 silent; was to have returned as WVZN with "variety."
- PA Lewisburg WTGC 1010 reported silent, but plans to return "soon."
- PA South Williamsport WFXV 1450 silent. Off due to technical problems, it's reported.
- SC Belton WHPB 1390 back on air—with black gospel.
- SC Burnettsville WKRU 1510 deleted.
- SC Greenwood WLMA 1350—license revoked, but it is still on the air. Owner said to be working to get license reinstated.
- SC Marion WKXS 1430 deleted.
- TN Shelbyville WZNG 1400 had been silent; now country.
- TN Somerville WSTN 1410 had been silent; now on with g, including black gospel.
- TX Atlanta KALT 900 had been silent; now on with talk and Reach southern gospel, simulcast with KPYN 100.1.
- UT Murray KMGR 1230 reported silent.
- VA Bassett WCBX 900 had been silent; now on with oldies.

**FCC May Relax Main Studio, Public  
 File Rules**

With more and more stations joining duopolies and even super duopolies, there is a move to consolidate studios. This becomes more complicated when stations in a local area have different transmitter sites and different cities of license.

Now comes the FCC proposing to dramatically relax the main studio rule. Final decision has not been made, but the FCC is looking into relaxing the "principal city contour" where the studio must be. That contour is the 70 dB/u, or 3.16 millivolt per meter contour for commercial stations. For public stations it is the 60 dB or 1 millivolt per meter contour. The FCC is considering placing the contour within any of the licensee owned stations,

or adopting a kilometerage standard.

Rather than requiring the public inspection file of a station to be in the city of license, the new rule would allow for it to be at a station's main studio. This would be more logical for the public, but it might deprive residents of the city of license some access to the station which they might not otherwise have.

**Small Print Happenings and FM Industry News**

The FCC has taken upon itself the consolidating of several issues against Gerry Turro and his translator in New Jersey, as well as against primary WJUX 99.7 Monticello NY. The FCC dismissed a request to assign the license of W276AQ 103.1 Fort Lee and W232AL 94.3 Pomona NY to a trustee.

Oakland NJ's WVNJ AM had filed a petition to deny the renewals. The FCC will consider "information suggesting that Turro and Monticello Mountaintop Broadcasting may have willfully and repeatedly violated [FCC] rules and made deliberate misrepresentations and/or lacked candor concerning the operation of these stations." If Turro should fail to appear at the hearing, the renewal applications would be dismissed.

Family Stations, Inc. translator department is poised for further growth. It has renamed the department the Family Radio Expansion Department, with new staffers added.

The notorious death-row inmate Mumia Abu-Jamal had his commentaries taken off National Public Radio—a move that some claimed was censorship. A Pacifica public affairs show, *Democracy Now*, was preparing to air a new series of commentaries by Abu-Jamal. They would be broadcast on the WRTI \*90.1 Philadelphia network, which constituted one-third of the program's outlets.

Just minutes before the first of the commentaries was to be aired, Temple University pulled the series from the air. The decision was made by TU v.p. George Ingram, not by WRTI. Ingram wrote to Pacifica's Julie Drizin: "Quite frankly, the decision [to take the show off the air] was accelerated by news that *Democracy Now* would air the Mumia Abu-Jamal commentaries."

Some question Abu-Jamal's conviction and sentence. Noelle Hanrahan of the Prison Radio Project says: "Pennsylvania would not be able to kill with impunity if Abu-Jamal's voice was heard." That's "why it's doing everything it can to silence him." [For more information on this person, see May, '95, p. 8, col. 1.]

FCC chairmen Reed Hundt to step down as soon as a successor is named. He's been chairman 3 1/2 years, and his term would have ended June 30, 1998. Hundt was a caretaker chairman, helping the Commission implement the Telecommunications Act, and not as much of an activist as the Justice Department proved to be.

The ballyhooed movie by Howard Stern, "Private Parts," was somewhat of a dud as far as attendance figures go. [This despite what was printed last month, p. 8, col. 3.]

Sharon Waxman of the Washington Post wrote: "It's hard to tell who ought to feel sillier after the disappointing run of [the movie], the studio or the media that declared it a hit before it even opened. . . Five and a half weeks later, the movie is all but a memory. After a strong opening weekend in which the film took in \$14.6 million in 2100 theaters, 'Private Parts' has taken a nosedive. . . With the run nearly over, 'Private Parts' has earned just over \$40 million."

"In Hollywood, this does not remotely qualify as huge; the movie cost more than \$20

million to make, and the studio spent \$11 million more to market it. . . To turn a profit, the movie will have to sell extremely well on video and strike lucrative television and cable deals."

The June "Stereo Review" rated the Sansui RZ-8150 AV receiver, saying its FM performance "was mediocre at best, and the receiver [had] brutally slow pushbutton seek-tuning. . . Reception of truly weak and distant signals was close to nonexistent, and all but the strongest broadcasts were plagued by noise and multipath distortion."

WGST-FM 105.7 Canton GA (and 640 AM Atlanta) are merging news with talk in an effort to better compete with WSB 750. Six newscasters were let go. It's supposed to be "The Planet,"

**WGST AM/FM**

but Atlanta Nick Lombardi hasn't said it's OK to list that as WGST-FM's nonID.

From the classifieds: A blind radio hobbyist would like to hear from those with shortwave who enjoy African DXing; she uses a Kenwood R-2000, Carol Slegel, 6839 Parsons Ave., Baltimore MD 21207-6423.

I'm researching the histories of WTHT-FM-AM Hartford CT on the air from 1936-1954 and 1948-50, respectively. The stations were owned by the now-defunct Hartford Times. Anybody having knowledge of the stations please send photos, newspaper articles, program listings, etc. Robert W. Paine, 3875 Bristol Dr., Chesapeake Beach MD 20732. [Seems I ran something about WTHT-FM Hartford in an early FMedia! or in the WTFDA bulletin a few years ago. I've thrown away most of the original material, which included an entire yellowing section of the Hartford Times.]

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

"After 23 long months since the last edition, it's great to finally have an accurate, up-to-date reference [in the FM Atlas 17th edition]. I find the nonIDs/slogans to be extremely helpful in identifying unknown stations, and am pleased that you were so meticulous in updating them," says Nick Lombardi. "The state headings in Part I of the Station Directory are much more attractive," using the old Kroy giant labelmaker, rather than the Brother P-Touch. He finds the print quality lighter than the last edition, with some of the maps still confusingly crowded. "I still can't make any sense out of Quebec (pp. 110-111)."

Lombardi sent articles on the local Atlanta radio scene, including the fact that Don Imus is going onto WQXI 790 from 6 a.m. to 10 a.m. weekdays. The entire station is being leased to Big League Broadcasting. It is programming something new to the market: Guy Radio—talk appealing to men 25 to 54. Much of it will be sports talk. The earlier-announced deal to broadcast children's programming fell through when KidStar network folded.

Bob Gilbert passed along lots of information on New England FM. WZBC \*90.3 Boston College plans one of its rare fundraisers. It is trying to raise \$20,000 to buy new equipment. They need to buy new computers for the RealAudio they're getting on their web site, and for other equipment. The last fund drive on WZBC was five years ago. So far, it has raised \$7000.

Until July, Bruce F. Elving

CKMO \*103.1 pt—a mix of student rock, public affairs, classical and folk music. It is now on from 10 a.m. to 10 p.m.  
ON Hearst CINN 91.1 rm, French adult contemporary. "They didn't play any song with English lyrics."  
PQ Trois Pistoles CJTF 93.9 rm, a relay of CJFP 103.7 Riviere-du-Loup, except for 10 hours a week when it will do local programming.

**On Air—Real Stations and Pirates (Selected)**

AR Fayetteville \*90.1—"a religious translator with no ID. It sounds pretty strong—perhaps 100 to 250 watts with a good tower location."  
K261AX \*100.1—the only listed translator there which is on the air.  
CA Los Angeles KIBB 100.3 apologizes for balloon mishap, and dodges a fine that could have been as much as 50 grand. The June 5 stunt was on the "Breakfast Jam with Patty & Gary" show. An "anatomically correct" balloon was sent into the Burbank skies, but then drifted into the path of a jet and caused what airport officials called an "air flight hazard." Station promised to not do such a stunt again.  
CT Hartford—97.1 a Spanish pirate with some English. Plays Hispanic gospel music, "in stereo, although often missing left channel. Range is about 10 km. Transmitter site seems to be in the 'Frog Hollow' section of Hartford. I've already heard from several listeners to WZBG 97.3 Litchfield who are getting interference from the new 'station'. The 105.3 Praise FM pirate from Bloomfield still going strong after close to six months on the air. Please don't use my name."  
GA Atlanta deleted translator W300AB \*107.9 comes back to life for "strictly experimental" purposes. The original W300AB was shut down "by the FCC for causing interference to WPEZ 107.9 Macon GA. The signal seems stronger than before, and includes the primary's t( )T SCS."  
IL Aurora-Chicago WYSY-FM 107.9 still hasn't changed to Spanish. They said they're in "musical metamorphosis." "What a juicy word!"  
IL Lansing WYBA 106.3—with WEJM-FM giving up the frequency at midnight June 1. This was preceded by a taped message heard over 12 hours, saying "We made the switch to your new home for hip-hop, WEJM 95.0 AM; now you do the same. . . Thank you for listening to WEJM-FM Lansing." It was silent for about 24 hours before WYBA took over. This permitted DXing the open channel by Chicago area listeners. Then came on a carrier and finally WYBA, "Your born-again Christian station!"  
IL Morris WJDK 103.1's sale to Odyssey Communications (May, p. 8, col. 1) did not include WCSJ 1550 AM. WCSJ is going to Grundy County Broadcasters Corp. for \$425,000. Odyssey reportedly wants to strike a deal with WAIZ 95.7 Mount Morris for their call letters "by mid-August at the earliest."  
IA Sioux Rapids KTFG 102.9—puts its program on a telephone line, supposedly in stereo, from KTFC 103.3 Sioux City. This is "cheaper than satellite. They have trouble with it (the phone line). We lose the program once in a while. The line corrodes..." [stereo."  
ME Houlton WHOU 100.1 "definitely on air in /  
MD Baltimore "Antena FM," the Greek service normally found on SCS. It "jumps around" its 98.3 frequency, and "on every June until Labor Day. I tried to call the FCC. They put me on hold. Must be some guy who gardens and wants to hear it outside. I tracked the signal down, and there is a big satellite dish on his residence."  
MA Falmouth WCIB 101.9 did not renew with the Boston Red Sox, and reception of the

games on the Cape is iffy. The best daytime signal is WFAN 660, while at night it varies from a fady WPRO 630 to WEEI 850. One fan who wants to hear the games is Robbert Harmon of Osterville, who said he's willing to collect signatures if it will persuade a station to carry the games. "I'll be 67 this month [June] and I've been a baseball fan for years, as long as I can remember." Another fan is Howard Bearer, also of Osterville. "I couldn't believe it when I heard the games weren't going to be on WCIB. I've never had any luck getting an off-Cape station. It's OK for two or three minutes, then it fades." The club has even offered a Cape station a free feed, if only it would carry the games.  
NY Radio Konbit 87.7 Brooklyn "back on after a six-week absence." The FCC website "has hardly any info on actions against pirates."  
NY Rochester WIRQ \*104.7, having moved from 94.3.  
OH Cleveland 96.9 FM, "The Grid," from a gay night club, The Grid, 1281 W. 9th St, and featured in an article in the "Cleveland Free Times." Jerry Szoka purchased some \$2000 worth of radio gear in Canada, including 10-watt transmitter ("which is the size of a loaf of bread"), booster and vertically-polarized antenna. Now it is 100 watts with clearest signal downtown, with live broadcasts from the club plus six-hour tapes. The local SBE chapter threatened to take action

against the Grid by notifying the FCC. So Szoka came to the SBE (Society of Broadcast Engineers) meeting and began publicizing "The Grid." The SBE decided to notify the FCC about the pirate, but the FCC already knew, taking its time to send a warning letter. That did not stop Szoka, who increased the operating hours to 4 p.m. to 3 a.m. daily. Szoka is concerned that if the FCC does act, it may take more than the transmitter. This might include turntables and the console. "We are operating at a risk. But this is what Cleveland radio needs. I like being on the edge. I believe we are the only nightclub in the country operating their own radio station." DJ Randy says, "We hope that we can keep it up because we like what we do. And we have discovered that Grid Radio has a growing audience. Tune in, Cleveland. Who knows how much longer we will be around?" Ohioan Bill Fait says: "We read about Radio Free Berkeley in FM Atlas 17th edition on page six. Another question that must be asked is how can we make the best use of the FM band? . . . Could more stations be permitted than what we allow today? . . . It may be time to review the way we assign FM channels. We may want to extend the FM band below 88 megahertz when we convert television to digital. . . Only a micro-broadcaster would want to use 87.9 FM." He hopes there might be a better way for new stations to come on the air without going back to the "chaos" of the 1920s.  
OR Lake Oswego KKJZ 106.7 now 100000 h.v; 440 m, moving from Mt. Scott to Sylvan Hill

**106.7 kkjz now has a stronger signal, richer sound and crystal clear audio.**

where the other A.R.S. stations are. KUPL-FM 98.5 will move to Sylvan Hill from Mt. Scott, where it has been since 1948.  
VT Lyndon WGMT 98.3, not yet on 97.7.

“Supposedly it’s all set to go, but the ‘switch’ hasn’t been flipped. Even the employees don’t know why there’s a holdup.”

WA Olympia K281AD 104.1. “I get it here (in Tacoma) rather well.”

WV Clarksburg WVHF 92.7, not yet moving to 92.1.

WV Ripley WCEF 98.3. The FCC had cancelled the license, but realized its error and reinstated it.

AB Alberta CKUA stations back on air. “A new board of directors planned to return to the air four weeks” after the stations closed down. Three weeks after the closure, the foundation board stepped aside in favor of the Save Alberta Public Radio Society, led by musician Tommy Banks. Questions were raised about where some of the CKUA money went. Former chairperson of the CKUA Foundation was Gail Hinchliffe, who was asked to resign. Her annual salary in 1995 was \$146,000, plus a \$10,000 expense account and \$6000 in accommodation subsidies—“this while station employees were being laid off or taking wage cuts of up to 40%,” reports “Broadcast Technology” magazine.

ON Algonquin Provincial Park info in mono on 102.7. “Low power, as I was only able to pick it up on my truck’s stereo in the vicinity of the east and west gates.”

ON Ottawa CHR199.1, Christian Hit Radio, and is a unique partnership of Roman Catholics and evangelical Protestants.

CZECH REPUBLIC Prague Radio Bonton 99.7—Clear Channel Communications is buying it for \$1 million, with further expansion planned in Eastern Europe. It already has stations in Australia and New Zealand.

**Off Air—Or Not Yet On**

AR Fayetteville K244DS 96.7, K272DQ 102.3, K276CO 103.1 [1370 AM

CA Quincy KCMT 98.9, along with KPCC/

IL Crete WEMG-FM 102.3—“It’s a bankrupt black gospel station, but Crawford Broadcasting will try to make it profitable. Used to be a nice MOR station as WTAS years ago” (last month, p. 2, col. 1).

IL Pinckneyville WCCZ 104.3

ME Eastport WSHD \*91.3—for the summer.

ME Lincoln WHMX \*105.7

MA Braintree “WHDL” 102.1—busted by the FCC in 1991, had his fine reduced to \$250, from \$750. Lawrence Scott Gallagher protested and demanded a hearing. He was supposedly a “poverty-stricken” pirate.

MS Laurel WMX1 98.1. Expected to return with a new format later this month.

MO Houston KUNQ 99.3, along with KBTC 1250 AM

MO Huntsville KAAM-FM 103.5.

MO Kansas City “KCMG” 107.9 left the air after being on two months.

“I only learned of it after reading this article” in the Kansas City Star. “I suspect the FCC, which claimed that it only takes action after a complaint, received one—from the public or more likely a supervisor.” Michael Gonzalo Calderon tried to get a station licensed to play Spanish in the early ‘80s. Lawyers’ fees, feasibility studies, trips to Washington wiped out his bank account. “I did it their way last time, and did it my way this time,” Calderon said. He used a CD player to keep the music on 24 hours a day, with a phone line connecting his home to the top of a nearby apartment building. A second hand transmitter and audio processor put him on the air for \$1200. He heard it in his maroon Chevrolet south to Peculiar, west to Leavenworth and east to Blue Springs. “I wrote to the FCC,” he said. “They sent me a lot of papers about fines and imprisonment. But if anybody should be upset with me for throwing a signal up in the sky, it should be God, not the FCC.” While growing up in Zacatecas, Mexico, Gonzalo Calderon never dreamed he’d be an English-speaking voice on

U.S. airwaves. He was on KTRV (now KQRC) 98.9 Leavenworth KS for 15 years. He quit in 1983 when management changed. His hopes apparently dashed, he said “KCMG” was on the air “So I can go on with my life and my dreams.”

MO Parkville KGSP \*92.3 and not yet on 91.1. “I tried to phone them . . . but no one returned my call.”

NY Crown Heights, Brooklyn “Radio Moshiah and Redemption” 91.9. “We were just a Part 15 station, but the FCC did not like it, so we left the air. Our only hope for going on the air is you! What can you do for us?”

OR Bend K209BJ \*89.7, K257BK 99.3

PA Williamsport W211AM \*90.1

TX Big Sandy KBAU \*90.7. Ambassador University, licensee, is closing and will sell KBAU.

WA Spokane 92.9—a pirate attacking KZZU-FM—like Tyson to Holyfield’s ears! Mostly between 10 a.m. to 5 p.m. he’d broadcast things like “KZZU sucks,” or “Don’t listen to the Zoo, the Zoo sucks.” He was believed to be mobile, and disrupted reception in certain neighborhoods. The jamming has apparently stopped, but KZZU is offering a reward. I’m cynical enough to think this might be a hoax

dreamed up by KZZU to increase tuning in to its channel. A conference of pirates was held June 20-21 in Carson CA, the second annual Micro Power Radio Conference. It offered workshops on buying, installing and repairing equipment, and I suppose on dodging the FCC. If I find out in advance about next year’s conference (if there is one) I’ll mention it.

AB Rocky Mountain House 94.5—to relay CIBW 92.9 Drayton Valley, except for 15 hours a week for its own programming.

BC Vancouver—the 88.9 mono pirate has been quiet as of late, “but there is rumored to be a new group that is putting a station on 88.9. The existing pirate never had any announcements and I suspect was more interested in providing himself with nonstop music, either driving or at work. . .”

NB Saint John CHSJ94.1 not yet on, but when it comes on a condition of its licence has been imposed by the CRTC—not to sell advertising in Fredericton. CIBX, CIHI and CKHJ had opposed CHSJ’s original application.

PQ Granby 104.9—this new 200-watt station will be the first local station since CHEF 1450 AM closed.

**Deletions**

AR Fayetteville K202BN \*88.3, K205AA \*88.9, K269BE 101.7

CA Fresno K251AA 98.1 is “gone.” It “was on the air for five days. Screwed up the main channel signal, KNAX 97.9, in downtown Fresno, and was determined useless.”

 CA San Jose KOME 98.5 no tE,E  
 KBAY 100.3 no tX, 67, but has low injection t ,I. "It must be about four percent injection."  
 CA San Mateo KCSM \*91.1 t(), RBDS. "The subcarrier situation around here is in a constant state of change."  
 MN Minneapolis—Carol and I hosted a hospitality room at the National Association of Radio Reading Services June 12, where several blind people came, as well as one subscriber.  
 Dave Andrews, director of the MN Communications Center for the Blind, said the Radio Talking Book, at least in some markets, may go to 92 kHz to permit more activity at 57 kHz. Reading services are concerned about funding. A session by Ms. Chancy M. Kapp of Raleigh NC pointed out that people are living longer, with the 85-plus group among the fastest-growing segments. This means more demand for reading services. There's a tremendous growth in non-English speakers, especially Spanish.  
 "We need to explore second-language services," Kapp said. Special events (such as remotes) give visibility but don't raise much

money. And reading services shouldn't be shy about asking their volunteer readers and board members to contribute.  
 At the conference I met Bill Kling, pres. of MN Public Radio. He along with Engineer Bob Watson helped found the Radio Talking Book—the nation's first radio reading service—in 1968. Kling spoke on the history of the talking book service. Watson mentioned at the time that SCA wasn't feasible. "It wouldn't work!" I was one of four radios' vendors there, with Watson saying my modified Radio Shack 12-604 model (with FM-AM-TV audio, channels 2-69) and SAP/SCS Elf-2A system sounded good.  
 I talked with a representative of The Beat 97.7, which hopes to return to the air. One card passed out by The Beat was headlined, "Maybe Lawyers Are Good For Something After All." The FCC took Beat Radio off the air, "but we're fighting back in federal court. . . Lawyers don't work for free. Please send a donation to the Beat Radio Defense Fund, PO Box 3333, Minneapolis MN 55403; (612) 391-BEAT." [resumed.]

Radio reading for blind, visually impaired and elderly people

**RTBN**

Radio Talking Book Network  
 7101 Newport Avenue, Suite 206

OH Uhrichsville WTUZ 99.9 with New Philadelphia, "Z Country."  
 "I still very much enjoy both your FM Atlas and FMedial I've been ordering your FM Atlas continuously now, since I discovered it in 1982... I very much agree with you about the G-E Superadio 3. It certainly doesn't compare to those great Superadio 2s! One problem that I have really noticed with the Superadio 3 is really serious lack of tuning calibration on most of the models that I've tried, particularly on the AM side. I don't believe that the FM side is as sensitive as that of the Superadio 2, either. Of five Superadio 3s that I've tried, I found one that I considered satisfactory... Keep up the great work with your publications. I intend to subscribe to them for at least another 15 years!" J.C., Greenfield NY.

**Selected AM Happenings**

CA Johnstown KHNC 1360—the FCC had cancelled its license, but the station remains on the air and "working to have the license reinstated." [an STA with 25 watts"]  
 DE Wilmington WAMS 1380 now c, but "on/  
 FL Gulf Breeze WRNE 980 license cancelled by the FCC, but the station is still on the air.  
 FL Marianna WTYS 1340 was silent. Now on with news and talk.  
 GA Columbus WTMQ 1270 was silent. Now on as WMLF with gr. It has an LMA to buy with WVRK 102.9-AMs.  
 GA Decatur WATB 1420 off the air. It was Atlanta's only "urban Christian" radio station, and was supported entirely by listener donations. A listener was said to be applying to buy the station, which had been programming to inner-city blacks. DJ Larry Young says he hopes to be back on the air sometime this summer.  
 GA Thomaston WSFT 1220 deleted.  
 KY Central City WMTA 1380 (June, pp. 6-7, cols. 3, 1) is forming an association, the American Community AM Broadcasters Association, to pick up where they say the NAB has left off. Group wants FM translators for small AM stations. "Inside Radio" says 102 stations have plunked \$100 each to be part of the association.  
 MD Rockville WINX 1600—the plan to convert it to traffic info at a cost to the county of \$450,000

is all but dead (Mar., p. 5, col. 2). An agreement would see the WINX owner, William Parris, keeping the county's \$50,000 deposit in exchange for traffic and public service announcements. Also being worked on is a plan for the county to lease nearby land for a new transmitter site and upgrade for WINX. The county would thus retain its TISystem, through 12 10-watt transmitters along the I-270 and 29 corridors.  
 MI Lansing WITL 1010—dismissed license renewal.  
 MN St. Paul WDGY 630, with power reduced to 900 watts and tower in Hudson WI, only serves the eastern part of the Twin Cities. It adds Don Imus and G. Gordon Liddy. Imus used to be on KCFE 105.7 Eden Prairie (now KXXR), and was only heard in the extreme western part of the metro. So there's very little overlap between his former and his new audience. Same ownership as WMIN 740 Hudson WI, which just changed from adult standards to classic country.  
 NC Mebane WGSB 1060 had been silent; now contemporary Christian, parallel to WRTP 1530 Chapel Hill and WRTG 1000 Garner NC.

PA Columbia WVZR 1580, "Vision 1580," has newspaper reading to the blind, plus music from the '40s through the '80s. It is a daytimer. Jay Dodna saw to it that the reading service bought this off-the-air station when the owners of WLAN-FM 96.9 changed. He received no assurance the SCS reading service would remain on WLAN-FM's 67. It is still on, but it "may go off SCS." [See June, p. 7, col. 2.]  
 VT Newport WIKE 1490: "We had a letter and tape from a guy in Finland who picked up our AM side, WIKE, all 1000 watts... The tape checked out (at a break at 2:40 a.m. EDT)..."  
 WA Silverdale (Seattle) KITZ 1400 said to be silent and for sale.  
 USA—Eastman Radio did a survey showing 40% of the population listens to at least some AM radio in a week, with the audience primarily upscale adults, strongest in the 35+ group. The report said duopoly and an aging population should be favorable to AM. "One surprise: AM finishes lower in cities where much of the population grew up somewhere else—in fast-growing markets with a transient population, like some Southeast cities." Lee Shoblom of KFWJ AM and KBBC FM of Lake Havasu City AZ says, "We're still alive!" [Material abstracted from the "Small Market Radio Newsletter."]  
 TURK AND CAICOS ISLANDS—Radio Vision Cristiana 530 from South Caicos Island was received on a two-hour ferry crossing from Cedar Island to Ocracoke NC in the daytime. It was broadcasting in Spanish.

 PA Shippensburg WSYC \*88.7 for 7000 h,v; 0 m—returned application (see last month, p. 7, col. 3). "We had to get out the big guns with a high priced Washington attorney. WSYC would have walked all over our application for \*88.7 in McConnellsburg PA. They want to serve Chambersburg. I suggested they do it with a translator, but they would not compromise. As you can see from the proposed coverage map I am FAXing you, WVPE \*88.9 Martinsburg WV would also be interfered with. I saw the note about applying for 91.7 or 91.1 (last month, p. 3, col. 2), but we have been advised to hold tight and stick to the 88.7 application. Changing it would mean a new FCC file number and more delay. Later we might want to move to 91.7. We offered the peace pipe to WSYC, which has the backing of the state of Pennsylvania, but they put on their war paint instead. And WSYC leaves its carrier on all night, which is illegal! Sometimes it is dead carrier during the day, waiting until a student can come in and do a show." [Glenn Morris also FAXed WV Public Radio underwriting information, with rate card that looks remarkably similar to a commercial station's rate card. AAA times are 6-10 a.m. and 3-8 p.m. M-F and vary in price for an announcement from \$29 one time to \$19 with a 400+ buy in a year. Glenn asks: "Now who really makes a profit?"]

**DX Doings—An Occasional Feature**

This time of year is usually when FM skip reception is at its best. However, 1997 has been virtually a dud. Bill Thompson reported hearing Oklahoma

and Texas May 30 from Buffalo NY.

After receiving a tip from John Ebeling that GA and SC were coming in in Minnesota, I turned on the stereo the night of June 26. The dial was jammed with stations, some in clearly for a few seconds only to be replaced by others. I did get WUVA 92.7 Charlottesville VA, WALI, "Wally," in Walterboro SC on 93.7 and The Wiz, WIIZ 97.9 Blackville SC in full stereo. Also heard were WGO 98.3 Midway GA, which I received in June, 1977, as WSOJ 98.3 Jesup GA. Also heard were WQDR 94.7 Raleigh and "Oldies 107.9" Greenville NC. Some of the station news this month is the result of what was received via FM skip.

Harold Ort, editor of *Popular Communications*, magazine said an article I wrote on FM DXing is "set to go" in the September issue.

**Paxson Selling Radio Group to Clear Channel for \$693 Million**

Lowell "Bud" Paxson, a leading Florida FM station owner, is selling his group of 46 radio stations to Clear Channel Communications, Inc. for \$693 million. The deal also includes six regional radio news and sports networks and billboard companies with 526 signs. He began in radio ownership in the 1950s, and later created the Home Shopping Network on UHF, with one VHF. Based in West Palm Beach, Paxson has 12 TV station purchases pending.

One of the stations he owns is upgrading and moving into the Milwaukee market—WHKE 55 Kenosha WI. It is moving across its county, jumping to just south of the Milwaukee County line, from a site near the IL border. Its 5 million watt signal is replacing a 750,000 watt visual effective radiated power facility. The changeover was to have happened by late last month. WHKE has a nonstop advertising format until 10 p.m. after which it is religious.

Another station Paxson is buying is WSCO-TV channel 14 Suring WI, which has been noteworthy for either not broadcasting at all, or being at exceedingly low power. Vic Eliason [WVCY-FM \*107.7-TV 30 Milwaukee] and the VCY/America network have been in charge of WSCO. Paxson will undoubtedly upgrade WSCO, in order to cover the Green Bay market.

**Small Print Happenings and FM Industry News**

The Tribune Company is selling its WQCD 101.9 New York for about \$140 million to Emmis Broadcasting. Emmis already owns WQHT 97.1 and WRKS 98.7. Tribune keeps its WPIX ch. 11. Emmis is expected to keep the smooth jazz format on CD 101.9. Initially a three-year LMA is to be entered into, with the final price partially dictated by the market three years hence. It had paid under \$1 million for it in the '60s.

A casualty of the flooding by the Red River of the North was KRJB 106.3 Ada MN, whose transmitter was destroyed. The studio site was unaffected. KSNR 100.3 Thief River Falls lost \$29000 worth of studio and office equipment, and KCNN 1590 AM East Grand Forks MN had

losses at its transmitter site of \$125,000. All the Grand Forks ND stations were off at various times.

Hal Botham died a day before his 61st birthday. He started at CJET-FM 101.1 Smith Falls ON, and worked in Montreal, Cornwall and Ottawa. He returned to Smith Falls, hosting mornings on CFMO, "Lite 101," when he died.

The Apr. 9 Wall Street Journal had a feature on George Tobin, 54, weight lifter, who is a heavyweight in Las Vegas radio. He's the owner of KEDG 103.5. It is one of the few stations in the market not in a duopoly. He had bought it for \$2 million six years ago.

George Weiss

Just over a year ago, American Radio Systems offered him \$13 million for it. But within weeks ARS bought two other Las Vegas stations and changed their formats to directly compete with Tobin's alternative rock format. ARS "can throw all the bombs they want at me and I'll keep doing what I want to do," he said. The actual running of the station is up to his son, Dax Tobin.

George says of his 27-year-old son, "He's methodical. I'm not." George has been known to reject offers as high as \$20 million from companies other than ARS. Besides "The Edge," the article mentioned Jerry Lee, stand-alone operator of WBEB 101.1 Philadelphia. Lee said if he sells, "I'm just another rich guy."

The New York Times had several articles on radio, one of which quoted me. Iver Peterson on May 12 mentioned how Pacifica stations are getting rid of much of their eclectic programming and "dancing toward the mainstream." Another article mentioned the smooth jazz format like on WQCD and WHRL 103.1 Albany. "As a result," Peter Watrous wrote, "160 radio stations around the country have adopted the format." Smooth jazz is the "'90s version of easy listening, once dismissed as 'elevator music'... Smooth jazz is just a fancy name for easy listening."

Steve Knoll had a story in the June 16 NY Times about RDS, a 57 kHz radio technology that seems to be destined to join the eight track tape and Betamax as a flop in the United States. Despite a strong push by the Consumer Electronics Manufacturers Association, with hardware furnished to many major market stations, "the technology arrived here stillborn." Ed Schwartz, c.e. of WCBS-FM said, "I don't see or hear much about it." The article mentioned my showing an RBDS display to the manager of a local radio station (KDNW \*97.3) who had never seen his own display on a receiver. Elving regards RBDS as a missed opportunity for broadcasters. It's "an excellent promotional tool," since call letters and format are displayed continuously. The article says I have not given up hope for the technology, comparing it to the slow acceptance of color TV. But unless RDS can be "resuscitated, it will follow the path of Dolby FM which went the way of the dinosaur." I don't recall mentioning dinosaurs when Steve Knoll called, but I think the rest of the article is accurate. Stephanie Hemphill of KUMD \*103.3 Duluth was one of those sending the article, saying: "I'm impressed to see you quoted in the New York Times!"

The NY Times had another story on WFUV \*90.7 and the Botanical Garden. The FCC has ruled the tower would have an adverse effect on the garden, and wants both sides to work things out. Federal officials will step in to begin formal mediation of the dispute. The decision does not end the conflict, nor does it mean the 146 m tower won't be completed. But the letter, sent by the FCC's audio service division to both the Garden and Fordham University, provided strong backing for the garden's contention that the tower would adversely affect the Garden's "aesthetic qualities."

Fordham looked at the cheery side of things, as if having just taken a stroll in the garden. "The

ruling dismisses the exaggerated claims that the tower will undermine the character of the Botanical Garden and allows us to move ahead with the one outstanding issue to be resolved," said Brian J. Byrne, Fordham's vice president for administration. "We look forward to working with the FCC to demonstrate that we are willing to take every reasonable step to reduce the visual impact of this very necessary radio tower," Dr. Byrne said.

Gregory Lang of the Garden saw things differently from across the street. Obviously smelling the roses, he said, "We believe an alternative is necessary and possible... We are hopeful that through mediation we will find an alternative which respects and protects beautiful and historic landscapes in the Bronx, and serves the broadcast needs of WFUV."

The mediation would not be binding, and both sides could pursue their claims in court if they decided to.

Some on Wall Street think it's time for the New York Times to get out of radio. There's speculation the long-rumored sale of WQXR 96.3 and WQEW 1560 might finally take place. Both stations could fetch \$150 million. WQXR had revenues last year of \$17 million, with a profit margin of 40 percent, which is less than the typical 50 percent margins in the market. WQEW had \$5 million in revenue. The company also publishes the Boston Globe and owns 10 TV stations.

Somebody sent me a piece on the "Death of Talk Radio." It mentioned Gene Burns, who has consulted talk stations in Boston and a talk show host, who charges that there's no such thing as a free market in radio. Instead, he argues that commercial enterprises operate radio stations as government-protected monopolies. His solution, "total deregulation," which would allow anyone to launch small radio stations without the approval of the Federal Communications Commission, "thus legalizing pirate operations..."

My editorial (May, p. 7) about piracy preceded a "Radio World" article in the May 28 issue by Kent Waterman. He wants to make microbroadcasting legal. He mentions Pastor Strawcutter's church radio station in Adrian MI: "As long as his signal is clean and unobstructive, his message fair and direct, the country beyond Adrian owes to Adrian and Strawcutter to be heard."

Missouri broadcaster Al Germond had an article in "Radio World" (Apr. 30) on the early history of FM, including Armstrong's battles with RCA and FM's spectrum needs clashing with TV's. "Armstrong operated a dual-frequency facility from Alpine [NJ], eventually settling at 93.1 MHz. His suicide Jan. 31, 1954 was also the death knell to the facility; his executor closed the station March 6 of that year. A Paterson NJ AM station [pu:] WPA-FM on the air at 93.1 MHz in March 1957; the station changed hands last year for some \$90 million!"

NPR announced the name of its new 5 a.m. program designed to fill the void left by Monitor Radio's Early Edition. It will be called, "Early Morning Edition," and began June 30 with host Carl Kasell. This thought came to me at a retreat I attended this spring: The nation's first high definition visual system is something most of us have always had—eyesight.

Studs Terkel, 85, is the oral historian and book writer whose morning program has been a fixture on WFMT 98.7 Chicago for decades. The show he's done for 45 years is leaving the air. He plans to take his cigar-smoking ways to the Chicago Historical Society, and work up an archive of his interviews and documentaries.

Psalms 1:1-3 cautions about the counsel of the ungodly. This describes much of the programming of contemporary FM, both commercial and noncommercial. The broadcast and the tobacco industries have something in common. Each denies any deleterious effects of using their products. I believe the indecent and even obscene language on many FM stations is contributing to moral laxity, with out-of-wedlock pregnancies and abortions the result. This language is both

spoken and hidden in songs that younger people are listening to. I have responded to this situation by opposing the sale of MN's Rev 105 stations to Capital Cities/ABC/Disney/Viacom, about which more later.

KDNI \*90.5-KDNW \*97.3 Duluth had their best sharon ever, with \$167,000 from 1052 pledgers. The goal was \$215,000, but the difference will probably come in during the July to June fiscal year.

Michigan [Public] Radio scooped \$293,526, exceeding their previous best drive by \$64,500. Some 4000 listeners phoned in pledges.

Late word is that WDCU \*90.1 Washington DC, "a really nice jazz station," was sold to Salem Communications and will go religious. WETA \*90.9 Washington was mentioned as also being interested in WDCU. Salem is reportedly paying \$11 million for WDCU, and will be selling WAVA 105.1 Arlington VA. Salem is also buying WITH 1230 AM Baltimore, "with [WITH's] oldies going." WPFW \*89.3 Washington said it will increase its jazz programming. Several big media groups, such as ABC, CBS and A.R.S., are interested in WAVA, which might go for as high as \$80 million.

Jesse Jackson is calling off his protest against Viacom selling certain of its stations to Evergreen Media. Some \$2 million has been pledged for minority scholarships to appease the Jackson interests. Evergreen Media will hold WBIG-FM 100.3, WGMS 103.5, WASH 97.1, WGAY 99.5 and WMZQ 98.7 in Washington DC. WJZW 105.9 will be spun off to ABC.

Millionaire George Weiss owns WBBQ-FM 104.3-AM and WZNY 105.7 in Augusta GA. He's learned that he has lung cancer, and has been battling a neurological disorder called dystonia. He wants out of the business, and rather than sell, he is donating the stations to the Medical College of Georgia Foundation. The M Street Journal expects the foundation to sell off the stations eventually. The call letters of WBBQ-FM had been incorrectly listed as changing to WYFK, which are the same as for Columbus GA \*89.5.

From the classifieds: New York city area dial guide \$1.50 + SASE to Radio Dial Guide, % Elsie Evans, 35 Grove St., Paterson NJ 07503.

Bill Cheek's World Scanner Report is full of modification advice, particularly for the Radio Shack Pro 2004-2006 models. One year (10 issues) \$35 from PO Box 262478, San Diego CA 92196.

FM DX tape. Now's the time to develop your tuning-in skills while the skip season rages (?) and before my article appears in "Popular Communications." Hear long-distance receptions from Duluth MN (with narration) and Kearney NE. The tape has IDs from both coasts, much of it vintage material from as early as 1964. Cassette dubbed from reel to reel originals, \$8 postpaid from me.

FM FORUM

CONTRIBUTIONS FROM READERS

Glenn Hauser was "very glad to learn that all went well" with my operation Jan. 22. His "World of Radio" is on WWCR shortwave Nashville TN on the following schedule, all CDT/EST: Thur. 3:30 p.m. 15685, Sat. 12:30 a.m. 5070, Sat. 6:30 a.m. 7435, Sat. 8 a.m. 15685, Sun. 2:30 a.m. 5070, Sun. 6:30 p.m. 5070, Tue. 7:30 a.m. 15685. I tried 15685 on a recent Tuesday and heard nothing. Either WWCR wasn't on the air, or reception conditions were terrible.

A stupid article in the New York Times by John Tierney [Sunday Magazine, Mar. 2] was about WFUV \*90.7's trying to build a giant tower. The article missed the point completely—that FM reception is largely dependent on antenna height, and that from its present site there is possible environmental danger to people working nearby on the Fordham campus.

Until August,

*Bruce F. Elving*

PQ Quebec CBV \*106.3 20000 h.v (moving from 98.0 AM). Calls on \*95.3 remain CBV-FM.

The AM frequencies in Montreal and Quebec expected to be applied for by others.

MEXICO—In the June issue was stated that effective radiated powers for many stations were unknown "However, there is a site on the Internet that has an FCC database where you can type in a station's call letters, and it comes back with all of the technical info, including ERPs." Check out: <http://www.radiostation.com>. "I did not look up all of the stations you had listed, but the ones I did look at all had ERPs that were horizontal; there were no vertical powers listed." Information like that can be notoriously incomplete and misleading, especially when larger-than-100 kw ERPs are shown as all horizontal. Stations have been known to add their v and h powers for double their effective radiated powers, which the FCC disallows in this country. Anybody is welcome to take the June FMEDIA to that web site and produce a list with ERPs. That will help to make this work more accurate, and save me time. Updates to June p. 1, cols. 2-3, p. 2, col. 3, and p. 3, cols. 1-2 would be most appreciated.

**On Air—Real Stations and Pirates (Selected)**

AR Springdale K203CE \*85.5. It's a "new one, repeating WYFG Gaffney SC, 91.1." The mystery religious translator on 90.1 in the Fayetteville area is still operating (see July, p. 3, col. 2); K201AX \*100.1 is now reported off the air.  
 IN Griffith area 87.9 pirate with disco music and no announcing. Can be heard near Hammond.  
 IN Muncie area—107.5 a pirate picking up the American Freedom Network. Reporter notified the FCC in Chicago that "this is no Ramsey ki... This pirate is a powerhouse which blankets most of Delaware County... I asked the FCC if this type of operation is legal, and if so, when did the law change? I also asked whether it was true that stations like this were springing up 'all over the place'. Will let everyone know if I get a reply."  
 ME Harpswell WMSJ \*91.9—for sale, with three potential buyers. It can go to 150 m at 10 kw—farther up on the WPOR-FM 101.9 tower. Once 91.9 is sold, it will take over the new \*89.3 frequency, which doesn't have call letters yet.  
 MN Duluth K292EZ 106.3, serving downtown and surrounding area, v & h, from atop its studio building in Canal Park, next to Duluth's famed Aerial (lift) Bridge. Has been heard in stereo when main station, KZIO 104.3, was temporarily mono.  
 MN Mankato K296ER \*107.1, with WJLY 104.5 Blue Earth "coming in quite well."  
 MO Kansas City "KCMG" 107.9 is on, despite what was written last month (p. 4, cols. 1-2). But KCCX 107.3 Lexington-Kansas City wants it off. Michael Gonzalo Calderon doesn't think his little station with 65 watts is capable of interfering. And KCCX isn't sure that KCMG is interfering. The FCC had Calderon sign a paper acknowledging he had been warned his station is operating illegally. FCC might actually help the pirate apply for a license. Calderon spent his life savings on KCMG, saying, "I struggled so hard to get where I am at." A local correspondent says "that proves that the policy of being both toothless and brainless still applies to the FCC. But no way does 107.9 65 watts interfere with 107.3!"  
 NJ Teaneck WFDU \*89.1 still broadcasts from Armstrong's tower. "I visited Armstrong's tower in Alpine NJ on a recent trip... It is no longer owned by Columbia University. Back home I clearly heard WFDU... on my antique REL [Precedent] tuner late at night when propagation was good" at 139 km.  
 PA Philadelphia "SSPR" 97.7, heard since March, but rarely has talking. It claims to broadcast from West Philadelphia, with rap during the day and R&B at night. "Lousy mono audio with no bass. Estimate power at 20 watts. Turns their volume up at night."  
 TX Snyder KSNY-FM 101.7, not yet moving to 101.5, saying "Your Country 101."  
 WA Tacoma 87.9 mono, a Korean language pirate, with top of hour "Radio Korea, KBLA, Santa Monica-Los Angeles" 1580. The pirate is on 24 hours a day.  
 ON Whitby 88.3—"Whitby Town Crier" with a community calendar. Heard in a 2 km radius.

A student from Paris was staying here, and after his return I will look forward to a report on which stations have stereo, as well as any updates.

**Off Air—Or Not Yet On**

AL Fairhope WGCX 92.1, being sold to WAVH 106.5 Daphne and hopes to return later this month.  
 ME Winslow WWSA \*95.3  
 MI Flint WFBE \*95.1, going commercial and will return under the ownership of Liggett Broadcasting. The Flint Board of Education is

receiving \$6.8 million for WFBE, which is on a commercial channel. A community group is considering an attempt to block the sale. The board has operated the station for 44 years. There's no word on the type of music to be broadcast by the new owners, according to a closed-circuit newscast by the Michigan Radio Networks. Jim Hughes of Mount Pleasant: "I stopped in once and your letter of hearing them in Duluth was framed and hanging on the wall. Would be nice if the letter were sent to you."

On Aug. 24, 1960, Robert G. Boston, manager, WFBE, wrote: "You have no idea how much excitement your letter has caused here at WFBE... There seems little doubt that you did hear us because your description of our frequen-

Station WFBE is owned and operated by the Flint Board of Education--95.1 megacycles, FM, 3700 watts. Studios and transmitter are located on the Oak Grove Campus in Flint, Michigan. WFBE is a member station of the National Association of Educational Broadcasters.

cy, of the time of day and date, plus the program material on the air at that time all match perfectly... By our calculations, Duluth is 25 times farther than the original design of WFBE's transmission was set to achieve. Your letter goes in a frame on the wall." In 1979, I met Stephen A. All, WFBE program director, at a convention. He mentioned that the framed letter had just been taken down. WFBE now has 50000 watts as a B; in 1960 it had 1300 watts. "Until this summer, WFBE operated only during the con-

**PROGRAM SCHEDULE**  
**MAY 1962**  
**WFBE**

ventional school months of the year, but this time we decided to continue broadcasting through the summer as a 'good music' station. The results have been gratifying. We are receiving cards and letters daily from listeners, but yours, by far, comes from the farthest distance," wrote Boston 37 years ago.

- MO Mountain View KXOZ 96.9
- TX Abilene KROW 92.5, "Still not on the air."
- TX Eastland KCYX 96.7 "silent."
- VT Rupert WMNV 104.1. It plans to return next month, relaying newly co-owned WMYX 97.3 Schoharie NY.
- WI Mayville WMVM 98.7
- WI Nekoosa WXEC 93.9
- SK Canoe Lake CFCK 103.9 reported silent

**Deletions**

- GA Savannah W201AU \*88.1 (see "New," above)
- MS Greenville W236AC \*95.1
- MS Laurel W215AN \*90.9 (see "New")
- NY Garden City WBAU \*90.3. Its last broadcast was Aug. 24, 1995, with the frequency taken over fulltime by WHPC there. Nothing has been heard about the appeals that were to have been filed. The station is assumed to be deleted.
- NC Ocracoke WAHL 92.7
- OK Laverne K224AU 92.7—because of deletion of primary.
- TN Tullahoma W203AK \*88.5 (see "New")
- TX Palestine K202CE \*88.3—unnecessary because of new station grant there.
- WI Lake Geneva W269AU 101.7. "We turned the license in to the FCC. The owner couldn't find a good tower site."

**FM mistakes, FM Atlas-17, FMedia!**

- AR El Dorado KAGL 93.3 \$ symbol not on p. 180. Not on "p. 100," July, p. 4, col. 3.
- IN Charlestown 104.3 WLWX (not "WAVX"), July, p. 4, col. 3.
- IN Noblesville WGRL (formerly WGLD) is on 93.9, not 95.9, heading, July, p. 1.
- KY Morehead WIKO 96.3 \$ symbol not on p. 189. ["WLCC"], July, p. 4, col. 3.
- KY Munfordville 102.3 WMCC (not LA Lafayette KSJY \*90.9 \$ symbol not on p. 173).
- MN Spring Valley KVGO 104.3 out of sequence, p. 211. "Kool 104" not printed there.
- NC Highlands WHLC 104.5 \$ symbol not on p. 143.
- OH Sandusky \*89.5 calls are WVMS, not "WUMS," July, p. 2, col. 3, under OH Thompson.
- PA Columbia 1580 calls are WVZN, not "WVZR," July, p. 6, col. 2. Jay Doudna (not "Dodna") bought it. [ly, p. 2, col. 2.

- AB Lethbridge 95.5 CHLB. Its former calls, CKRX, not mentioned, July, p. 2, col. 1. Heading July, p. 8, says "June."

**SAP/SCS Services**

*Symbols are as in the "FM Atlas"*

- CA Oakland "KRKD" 103.3 recently tested stereo SCS, using 67 and 92 kHz for left and right channels and separate l and r radios. "Your adapted radios worked nicely."
- CA San Bernardino KZKI Channel 30 (Its, p. 6, col. 1) uses the Worship Network on itsSAP. It is "a cable/satellite TV network out of Safety Harbor FL, which is also carried by the 44 TV stations of Paxson Communications (10 p.m. to 7 a.m.)." KGIL, previously on the SAP,

- was an AM station on 1260 in San Fernando CA. There no longer is an AM station in San Fernando. KGIL's legacy must have accrued to KNNS 1260 Beverly Hills CA.
- FL Mount Dora WMGF 107.9 still tZ, but at 69 kHz, rather than the more normal 67 kHz.
- MD Braddock Heights WVZZ 103.9 t ,G, LDS (Mormon), coming by October, joining the t ,G, of Bonneville's WWZZ 104.1 Waldorf MD.
- MA Framingham WROR-FM 105.7 t(), RBDS. "Radio World" newspaper picked up on the New York Times article (last month, p. 8 col. 1) on the failure of RBDS. It mentions that Access Global had hoped to establish a national RDS paging network, but "has lost its backing from Panasonic."
- MS Drew WOHT 95.3 no SCS, "Never has. By the

way, WDHT and WDTL 92.9 Cleveland broadcast from the same tower. They are diplexed into a common antenna. That's still fairly rare in small markets." WDTL plans to activate an SCS in the next several months. It will be used exclusively for voice cues.

NJ Montclair WnJN \*50 has NJN Radio on itsSAP (which includes WNJT-FM \*88.1 Trenton) and WBGO \*88.3 Newark overnight. The NJN-FM stations recently increased their broadcast day from 18 to 24 hours by simulcasting WBGO midnight to 6 a.m.

NY City area—Jonai Singh would like to start an SCS Indian-Hindi station and start promoting the project soon. "Fifty years of India independence" is to be celebrated Aug. 15, 1997, she told me.

- PA Philadelphia WWDB 96.5 tC, 67, a five second pre-delay of the main channel. That pre-delay had been on 41 kHz.
- MB Winnipeg CITI 92.1 t1, primarily East Indian languages, 67 kHz assumed.
- CYBERSPACE—The RDS Forum website "mentions a radio I never heard of, the Supertech SR-01RDS, a portable that sells for \$159. It has non-scrolling RDS. If you are familiar with it, let me know what bands it receives besides FM."

The Radio Shack 12-604 Optimus with FM-AM-TV audio (VHF and UHF, 2-69) and modified for FM/SCS and TV/SAP reception "performs like it's worth twice as much. . . The SAP is especially very clear. SCA is very good. The radio's selectivity is very good. I will write a review of your radios for *The Braille Forum* in August." Nolan Crabb, American Council of the Blind, Washington DC.

"Thank you again for such a great publication as 'FM Atlas', and I support you in this endeavor 100%," M.C.B., Jasper AL.

"I hope you are feeling better, and are fully recovered from your operation," J.G., Toms River NJ.

"I look forward to the next FMedia! Take care and keep them coming," L.J.S., Fairview NJ.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

- AZ Oro Valley KSJM 97.5 Power FM 97.5
- DE Laurel WDNO 95.3 The Light FM (back to, from "Sky 95"), and resumes simulcasting WXPZ 101.3 Milford.
- FL Arcadia WWRZ 98.3 The Rose
- GA Blakely WBBK-FM 93.1 B-93
- IL East St. Louis WVRV 101.1 The Valley (strict)
- IN New Carlisle WGTC 102.3 The Pulse (from "Country 102"). Now parallel to WHPZ 96.9 Bremen. But no calls were heard recently on the hour.
- KS Oberlin KFNF 101.1 uses calls, no "K-101"

- KS Ogden KQLA 103.5 Q 103.5
- KY Jeffersonton-Louisville WMJM 101.3 Magic 101 (strict), having moved from 101.7.
- ME Boothbay Harbor WCME 96.7 The Music Station (from "96.7-CME"). "It is unattended and sometimes the music stops, and there is dead air for an hour or more."
- MD Towson WTMD \*89.7 uses calls, stills "The Breeze"
- NJ Freehold Township WRLJ \*89.7 still Oldies 89.7. "Some of the underwriting statements are way too long and sound like commercials."
- NY Hudson Falls WENU 101.7 uses calls, "The New WENU," no longer "We-N-U."
- TX Abilene KHXS 106.3 Talk America
- TX Ballinger KCSE 103.1 Case 103, Oldies Radio
- TX Lubbock KXTQ-FM 93.7 Magic 93.7 (from "Magic 93 FM")
- TX Monahan-Midland-Odessa KCDQ 102.1 uses calls, "KCDQ 102 Home of Rock'n'Roll" (not "Texas 102")
- TX Stephenville KCUB-FM 98.3 uses calls, no "Sunny 98.3." It is parallel to KCLE-FM 92.1 Glen Rose TX.
- WI Fort Atkinson WSJY 107.3 uses calls, no "Joy 107." It is still b, but the loss of joy may have to do with its playing more vocals. The only instrumentals are those which were originally recorded that way. It plays no instrumental versions of popular songs, unlike WEZY 92.1 Racine, which is still a true "beautiful music" station.
- WI Reedsburg WBDL 102.9 B-102 (strict)

**Multi-City IDs In Use**

- KY Greensburg WGBK-FM 103.1 with Campbellsville
- KY Hawesville WXCM 97.1 with Tell City IN
- KY Shelbyville WTHQ 101.7 with Louisville, "Thunder 101" (strict), having moved from 101.3. ["Classic Rock 104.3"]
- TX Brownfield KLZK 104.3 with Lubbock, /

**Selected AM Happenings**

- AL Abbeville WARI 1480 deleted.
- AL Alexander City WRFS 1050 had been silent; now on with ABC's adult standards.
- CA Fresno KEYQ \*980 changes to noncommercial. [try; now silent.
- GA Thomaston WSFT 1220 had been coun-/IL Taylorville WTIM 1410—plans are for this station, which has only 63 watts at night, to sign off its talk format and delete. The format would move to 97.3 in the area, which is not yet a construction permit. Applying against WTIM and WMKR 94.3 was WXKO-FM 100.9-AM Pana IL, which were bought out in order to make the 97.3 application uncontested. Randal J. Miller, WMKR-WTIM, says about talk radio on FM: "In small markets, it doesn't matter how you deliver it, as long as you have a product people want to tune in for."
- TN Harrogate WRWB 740 silent.
- TX Crane KXOI 810 had been silent. Returns with Spanish Christian.
- VA Virginia Beach WVAB 1550 silent.
- WA Puyallup KKBV 1450 was country; now Korean. Parallel to KQYZ 1230 Everett, which had been silent.

**FMakings—Selected FCC and Industry Canada applications**

**Sale of WDCU \*90.1 Washington Elicits CPB, NPR Protests**

The proposed \$13 million sale of WDCU by the University of the District of Columbia for \$13 million to Salem Communications has been noticed by people other than FMedia! readers (see story buried last month on p. 8, col. 3).

Delano Lewis, president of National Public Radio, was the first to protest the sale. Station would go to a newly-created noncommercial arm of Salem Communications called Community Resource Educational Associates, Inc. This would close the gap on the U. of DC's \$10.9 million budget shortfall.

At issue is whether Congress ever intended broadcast entities that were essentially like public parks to be snapped up in the commercial marketplace. Although there was speculation Salem's WAVA 105.1 Arlington VA might be sold for as much as \$80 million, recent talk is that Salem might keep both properties.

And, stepping into the act is the Corporation for Public Broadcasting, which wants WDCU to pay back a million dollars it has granted the station since 1991. This is money that should go back to the taxpayers, Robert Coonrod, chief financial officer of the CPB, wrote the U. of DC executive control board. But board executive director John Hill said efforts by public broadcasters to save the jazz station are for naught. That board previously dismissed Lewis' plea to halt the sale.

Coonrod said the sale gives the university only a one-time benefit. "But the city should look at this as an important cultural institution, not just a commodity." A CPB report said WDCU has the fourth-largest black audience of any public station in the nation. Coonrod promised if the university would annul the sale and keep the station, CPB would help WDCU become independent of university funding.

Public broadcasters are uneasy with the sale. While for the first time in history it demonstrates the marketability of public radio stations, it has engendered fear that budget-strapped administrations may sell from under them the very stations that are the livelihood of many a public station employee.

"This sale dramatically changes life below 92 FM. It represents the loss of a major frequency to NPR and public radio," said Craig Curtis, program director, WETA \*90.9 Washington. "It can happen anywhere, to any kind of licensee [and] can be played out in television. If WDCU is worth \$13 million, what's nearby WAMU worth? What's joint licensee WETA worth?" WETA was an unsuccessful bidder for WDCU at "much below \$10 million."

The public newspaper Current notes that while a reserved frequency can't be sold for commercial purposes, it can go to a religious outfit who can turn a profit

by selling an unreserved station (like 105.1 Arlington VA) and transferring its donation-based operation to the noncommercial station. Even within the 88-92 part of the band reserved for noncommercial operation, religious broadcasters are usually more successful with their "sharathons" than publicists are with their fund drives. Syndicated programs on a Christian station track where the listener response comes from, and often kick back to the noncommercial station a portion of the revenue received—on a "per inquiry" basis. Ambassador Advertising Agency in the Los Angeles area is notable in lining up broadcasters with programmers and arranging the per-inquiry payments.

"This is heading to the courts," said Nolan Crabb, who called from suburban Virginia. Blackburn & Company brokered the deal. Blackburn & Co. also approached WJHU \*88.1 Baltimore MD. Blackburn was told a definite "no" by licensee Johns Hopkins University, whose officials "see a good public radio station as a good reflection of the university," according to WJHU chieftain Ray Dilley.

To ward off attempts to take over, public broadcasters in an area could consolidate, form local management agreements and develop financing strategies dedicated to public service. Already in place is a public radio station cooperative known as the Station Resource Group. The SRG has been identifying vulnerable stations, and is seeking to devise ways to respond to future buyout attempts.

#### Small Print Happenings and FM Industry News

Commercial radio is eyeing the public radio audience. That's the word from Robert F.X. Sillerman of SFX Broadcasting, who spoke at a public radio conference. The increasing consolidation of commercial station ownership is making smaller, targeted audiences more attractive to station owners, Sillerman said. SFX owns or has LMAs with 80 stations in major and medium markets. He also knows public broadcasting, as chancellor of Southampton College of Long Island University, licensee of WPBX \*88.3. He said, "We in commercial broadcasting are not particularly experimental. We do what's always been done. . . We have a huge laboratory of stations and see what works, and copy it."

The growth of "lite" jazz stations will continue, and he sees opportunities for copying intelligent voice programming. "You have demonstrated that there is an intelligent audience out there that wants it, that you can go in-depth." He took a jab at his colleagues in commercial radio, saying "If we do gravitate to [programming of the kind heard on public radio], it will be one percent out of conscience, and 99 percent out of greed."

In Florida, the legislature yielded to a conservative senator, John Grant (R-Tampa), and cut \$104,000 out of the grant for WMNF \*88.9 Tampa. Grant objected to on-air criticism of himself, heard "music lifting up Kurt Cobain . . . was intrigued by music that talked about 'backseat sex' [followed by] a live concert from 'the nudes'. So far, I haven't heard anything that would be worthy of sufficient public value to warrant public funding."

The conflict was well publicized, and mobilized station supporters, who came through with \$122,000 during 28 hours of pledging. Normally,

WMNF would have gotten only \$3000 during such a drive. The station, not affiliated with any university, had for years lobbied the legislature for a piece of the \$1.2 million pie that went to a dozen public stations in the state, most affiliated with colleges. WMNF only recently succeeded, and its allotment was only a year old.

WAMC \*90.3 Albany NY completed its fund drive with \$350,575 from 5181 callers—a record for a five day July appeal. WXPB \*91.7 Rhineland WI recently collected \$32,000. Its goal was \$25,000.

WFNP Rosendale NY will have to keep on sharing its 88.7 frequency with WRHV Poughkeepsie. SUNY-Rosendale petitioned the FCC to add 102.5 to the table of allocations. Since SUNY failed to ask that the channel be reserved for education, the FCC had problems with the request. Arista Communications was eyeing the channel for commercial use.

BroadcastingPublications reports the number of radio stations in duopolies jumped 47 percent in 1996. Two-thousand four-hundred thirty-nine were in duopolies at the end of 1996, compared to 1660 at the end of 1995. Fifty percent of stations in 91 major markets were in a duopoly in 1996, compared to only 28 percent in 1995.

The report on FM in Paris (see above, "On Air") is in line with news that the FCC of France, the Conseil Supérieur de l'Audiovisuel (CSA), will work to end 15 years of chaos on the FM band by the end of this year. A new law by the French parliament has made this possible.

Like many other parts of the world, demand for FM frequencies in France has far exceeded supply. The 6100 channels are fully in use in the country, with public service broadcaster Radio France controlling half the frequencies. The rest are filled by community licensees, commercial stations and networks of stations. In 1981 the FM band was liberalized by Pres. François Mitterand. Many stations jumped in, often without approval. This activity was not noticed for a while, until FM gained dominance in listening, gradually overshadowing previously dominant long-wave radio.

The new legislation is expected to give CSA authority to better allocate frequencies. It is believed that between five to 20 percent of the frequencies in France are underutilized.

An FM station makes Ripley's "Believe it or Not." That's WWWW 106.7 Detroit. Seems some guys there had the idea to drive a Zamboni ice cleaning machine like you see at hockey games all the way to Philadelphia. It left May 31 and arrived June 3, amidst much station-generated publicity, according to "Radio World" newspaper. Jim Bosh, the W-4 Country, d-j is caricatured in the Ripley feature driving the machine on his way to see a Stanley Cup hockey playoff game, going 939 km at an average speed of 30 km per hour. Bosh's efforts may have helped the team, with Detroit sweeping the series to take its first Stanley Cup in 42 years.

Now that retired CBS personality Charles Kuralt, 62, is dead, there's uncertainty about the future of WELY-FM 92.1-AM Ely MN. Kuralt, who vacationed in the area, bought the off-air stations in 1995 at the fire-sale price of \$37,000, but reportedly sunk in another half-million into improvements, including a new tower. At the funeral in North Carolina, Kuralt's widow, Julie, told manager Mike Hillman that "I don't know what arrangements have been made [for the future], but I wanted you to know that the greatest joy Charles has had since he left CBS was the little radio station in Ely."

Hillman said he and his wife would like to buy the stations, and keep it all local, live. Hillman said he'd do everything possible to keep from operating the station with a satellite feed. That kind of programming would be anathema to Kuralt's dream for WELY, Hillman said. "If the station is sold, I just hope that it doesn't turn into one of those soulless boxes of wires."

WJZW 105.9 Woodbridge-Alexandria VA disc jockey Gregory P. Fitzgerald sentenced to five

years in prison for wounding a businessman, William F. Deal. Fitzgerald struck Deal in an altercation over a former girlfriend. Deal died six days later. Fitzgerald remained on the air until he was sentenced June 12, with the station looking for a replacement. Fitzgerald's attorney, Bob Battle, said his client will return to radio after he serves his time "if avenues are open."

Milwaukee indie FM stations form a joint sales agreement. Affected are WLUM 102.1-AM and WJZI 93.3. Under the alliance, advertisers can buy time on one, two or three of the stations. All-Pro owns WLUM and Shamrock has WJZI. They are faced with competition from major group owners in the market—Saga, Heritage, and Clear Channel. Latter just announced its purchase of WZTR 95.7 from Shockley for \$14.5 million, to go with its WMIL 106.1, WKKV 100.7 and WOKY AM.

Watch for the format of WFMZ 100.7 Allentown to change soon. That's because Maranatha Broadcasting is selling the FM for \$23 million to Citadel Communications, to pair with Citadel's WLEV 96.1 Easton. Maranatha will use the money to upgrade WFMZ-TV 69 to convert to digital, as well as possible cellular and personal communications sorties. Persons alarmed that the easy listening music will leave WFMZ should know "there are market changes that affect broadcast operations. Change is inevitable," said Richard C. Dean, WFMZ president. Maranatha is buying WEST 1400 AM, probably as a public relations ploy to carry easy listening music for a while to deflect criticism over any format change on 100.7.

WWKZ 103.5 is moving about 150 km from New Albany to Como MS, in the Memphis market. It's co-owned with WGKX 105.9 and WSRB 98.1. Also moving—from Carson City NV to the Sacramento CA suburb of Fair Oaks is KBYA 94.7. It's also a good time to sell, reasoned owner Susquehanna, which probably never had a flaming desire to serve Sacramento with good radio. It was sold to Joe Field's Entercom for \$15.9 million.

An early FM radio announcer, courtesy NBC and that network's instance on its affiliates building FM stations, was George Fenneman, 77, who recently died. He was the announcer on the Groucho Marx show, among other programs. *You Bet Your Life* had him as host from 1947 to 1950, when the program moved to television.

Radio Canada International has signed an agreement for program cooperation with a Mexican group. RCI Spanish-language programming will be available on Mexican stations via the PanAm satellite, according to "Broadcast Technology" magazine.

CKUA-FM and its affiliates in Alberta now back on the air. Helping in the process—\$1.1 million in pledges from Alberta citizens. Money was raised during a two-week fundraising drive. About 16 staffers were rehired, taking pay cuts of from 10 to 15 percent. Mismanagement was a problem under the former foundation. Directors had paid themselves \$800,000 during the 1994 to 1997 period, and chairperson Gail Hinchliff received \$350,000, despite having no previous broadcasting experience. [For an early story on the CKUA problems, see FMedia! 2-87, p. 8, col. 3. There it was noted CKUA had a \$3 million budget, and an Ed Kilpatrick headed a "Save CKUA" committee to prevent its being sold.]

CanWest Communications of Winnipeg buys the "More FM" group of stations in New Zealand, with FMs covering Wellington, Christchurch and Dunedin.

A little cynicism from "Monitoring Times," June, p. 7, quoting Robert Feder of the Chicago Sun Times that broadcasters are the most self-congratulatory bunch in the world. So many awards are passed around, they really don't mean much. For example, the Illinois Broadcaster's Association's annual "Best Personality of the Year" went to WBBM-FM's Ed Volkman and Joe Bohannon. Feder found that odd because they didn't even start hosting the show until 1997, not

in 1996 when the award was announced. Even if Volkmann and Bohannon were disqualified WBBM-FM's sex-talk show, *Private Lives* was runner up. Oh well, I guess it's encouraging that an FM station was named in three of the top awards!

Taking over Willhight Research, Seattle, are Travis Gamble and Dave Hastings, who had worked under retiring Jim Willhight. The ratings' firm continues solidly in its northwest base, but has clients in markets such as Rutland VT and Bemidji MN. Jim Willhight's current project is running KENU 1330 Enumclaw WA, just purchased by Green River College as a training facility for broadcast students.

The Detroit schools announce plans to fix, not sell, WDTF \*90.9. The station needs leadership quickly, wrote Steve Raphael in *The Detroit News*. Its listenership is "virtually nonexistent," according to Arbitron. Its budget is \$413,000, but generates no revenue. This is unlike the situation in Flint, where WFBE \*95.1 was sold. WEMU \*89.1 Ypsilanti even made an offer to buy WDTF a few years ago, but "they never responded." WDTF is "a valuable community tool. It is a training ground for our students. We just need someone to put some spark in it." WFBE's sale for \$6.8 million was brokered by Blackburn & Company.

KAZU \*90.3 Pacific Grove CA plans to soon return to the air, after fire and smoke destroyed its quarters May 7 (see May, p. 4, col. 3).

I'm betting that WQRS 105.1 Detroit and WFLN 95.7 Philadelphia stay classical, even though both have been sold. Neither has commercial station competition in the format and their ratings are better than some rock stations in their markets. Greater Media bought WQRS, which also owns WRIF 101.1 and WCSX 94.7. Tom Bender, new general manager, said WQRS will remain classical. "It's a classical radio station. I'm interested in keeping it classical and making it better."

Greater Media is also the buyer of WFLN. It is also owner of WMGK 102.9, WMMR 93.3 and an AM. WFLN has had several ownership changes lately, largely "because it is not a huge cash cow." Robert Unmacht of the *M Street Journal* is quoted: "When a large group takes over a classical property, it usually looks to do something else," and will look for a greater return for its investment than what classical can provide. John Beitel, who lives in the area, said, "The classical format, I'm afraid, is probably doomed. Thankfully I am within range of the WWFM translator at 93.1 in Easton."

Four media giants own 24 radio stations in Detroit, and critics say they've used that leverage to boost advertising rates. Dick Purtan (pictured)

owns WKQI 95.5 for WOMC 104.3 where his rates on a 60-second spot command \$750. Radio revenues in the market have risen 23 percent in the last year.

Ron Steiner, marketing consultant, said it's time to give the heave-ho to advertising commissions. This is especially a problem with in-house agencies. He thinks agencies should charge advertisers a straight rate depending on the number of hours worked. Stations, if they continue to go along and pay commissions, will see "undervaluing their inventory by 15% and see less revenues to compete in the real race."

WBCL \*90.3 Fort Wayne hosted an appearance by Joni Eareckson Tada, the wheelchair lady, in an event designed to encourage physically challenged people. It was one of the stations conducting a "Wheels for the World" rally, where used wheelchairs are collected and distributed.

Ad from [www.buysellradio.com](http://www.buysellradio.com): Facility 200 watt KBUX FM, Quartzsite AZ, between Phoenix and Los Angeles. Price: \$475,000.

Mike Ferner, after reading the article in the May *FMedial* (p. 4, col. 1) said, "I just had to send this in. A hobby... if he sells it at that price—well, I'll be nice and not say such bad thoughts. To my mind this would be grossly overpriced!" The ad goes on to say it is a true Mom & Pop station (except there's no "mom"). I-10 is used by 18,000 cars and 9,200 trucks per month, with 5000 vehicles entering Quartzsite year 'round. Quartzsite plays host to the largest tailgating and mineral shows in the world during January and February, with an estimated 1,200,000 annual visitors. Why not buy a radio station where the climate is almost perfect? A sun is available year-round. The air is pollution free, and there are very few insects. Contact Jayne F. Cushman, realtor, PO Box 37, Quartzsite AZ, (520) 927-5464; FAX (520) 927-5211.

Last month, p. 4, col. 2, was mentioned that Ambassador College is folding and looking for a buyer for KBAU \*90.7 Big Sandy TX. Not being sold is WFMU \*91.1 East Orange NJ, which is going it alone after Upsala College closed. It is saying goodbye to the "ghost campus," and moving to a building in downtown Jersey City. It is one of the rare free-form stations that "plays everything." It is now a community radio station that relies on donations from listeners. It did concerts that earned it \$400,000 so far toward the \$1 million cost of acquiring the license.

WKCC \*89.3 Chicago is a student-run station at Kennedy-King College that's learned it is all right to play gospel songs, but not necessarily to broadcast Bible readings. The college's trustees heard about the Bible readings and decided to suspend James Kelly, an instructor who manages WKCC. Students have rallied to Kelly's defense. The ACLU said Bible readings are OK, as long as they are a part of a diverse day of programming.

KYEA 98.3 West Monroe LA is accused by Arbitron of accepting and returning four diaries of the market. A rep paid \$100 for them and filled them out, all showing "extensive entries" for KYEA. Arbitron, a bit heavily handed, is delisting the station and asking \$100,000 in actual damages and \$5 million in punitive damages.

The FCC fined WUMX 107.5 Charlottesville VA \$10,000 for building its facility at variance with its CP and running program tests for 1 1/2 years without a proper license. "Mix 107.5" has 30 days to contest the finding.

The JBC-FM stations of Jamaica are being sold for \$2 million by the government owned Jamaican Broadcasting Co. They are to be shut down temporarily and reopened as a public broadcast service, reports the *M Street Journal*. [For a listing of the FM stations of Jamaica see the 2nd or 3rd edition "FM Atlas and Station Directory," 1973 or 1975.]

Craig Fox, who put WAQX 95.7 Manlius NY on the air, and now involved in ownership of WVOA 105.1 De Ruyter, has bought silent WZOS 96.7 Oswego for \$65,000 in a bankruptcy court auction.

Dunifer's Free Radio Berkeley will be publishing a book, "Seizing the Airwaves: A Free Radio Handbook." It will analyze "free radio" in Springfield IL, Berkeley and in other countries, as well as printing a technical guide and schematics. I wouldn't be surprised if it will include a catalog of what Dunifer sells. Slated for publication this fall. Information from (510) 464-3041. There might be less pirating if translators were given more freedom. Now there's a translator info page at <http://www.fcc.gov/mmb/asd/trans&b.html> INFO. It includes:

"An FM translator may only rebroadcast the signal of an FM station or another FM translator, not an AM station or any other service."

FCC public notices "and all that stuff" is at their website. "At first most documents have only a short summary but within 24 to 48 hours you can click on them and see the whole thing. The site is down from about 6 p.m. to 6 a.m. daily, and on weekends and holidays."

Former NPR news exec Bill Buzenberg moves to Minnesota Public Radio, as senior director of news and information. He's still working on that book project I mentioned a few issues back, but started MPR as a consultant in May and gets on their fulltime salary in January '98. He'll also have news responsibility for MPR's classical stations. There was speculation he had been fired by NPR President Delano Lewis. Buzenberg's replacement at NPR is Canadian journalist Jeffrey Dvorkin. Dvorkin was a managing editor at CBC Radio. He becomes vice president for news and information at NPR.

Leaving Minnesota Public Radio for Canada is Eric Friesen, long-time afternoon classical music host. He'll be doing his soft spoken deejaying and narrating live music concerts for CBC Stereo. Rick Breitenfeld, Jr., 65, president of WHYY-FM \*90.9-TV to retire at the end of 1997. He spent most of his career after getting his Ph.D. at Syracuse University at Maryland Public Broadcasting.

The former owners of KSOL 98.9 San Francisco agreed to pay almost \$1 million to settle a class-action lawsuit brought by drivers on the Oakland Bay Bridge. This followed a May, 1993, prank where KSOL decided to give a staffer a haircut on the bridge. The station van was parked across several lanes of traffic, snarling traffic during the morning commute. Motorists will get their payback May 13-15 when the usual \$1 toll will be eliminated. The station's former owners will pay \$500,000 to cover the tolls, plus another \$450,000 for highway improvements and toll-collectors' training.

"A guy named Gavin on the Internet wanted to know where to get Atlas-17, so I posted my address. A couple of days later I got an e-mail from [a person in] Charlotte NC, saying 'Although I wasn't the original poster, thanks for providing information about Elving's new book.' Scott Fybush also posted ordering info a few weeks earlier."

A state politician wanted to force Minnesota Public Radio to sell KSNJ-FM \*99.5 Minneapolis. That station was commercial WLOL until MPR bought it for \$13 million in 1990. Some \$12 million in public bonds were illegally used, said Mike Osskopp (R-Lake City MN). He claimed a group would have bought the station that would put urban contemporary music on it.

This would have forced the sale of the former WLOL, or cause MPR to lose its \$809,000 state subsidy. At last word, a House committee deleted the portion of the bill which would have affected MPR. Rep. Dee Long (Dem.-Minneapolis) said she didn't think it was fair to pit "rap versus Rachmaninoff." MPR chairman Bill Kling agreed the organization used taxpayer funding, but that it was obtained after the purchase agreement was signed.

Minneapolis entertainment producer Thomas Ross said he made inquiries about buying WLOL, but never offered a bid because station officials told him it wasn't for sale. "This is far from over. This is about our basic right to communicate," Ross snorted.

The FCC decided to bend its rules to allow one owner to have all the commercial stations in the tiny market of Havre MT. It allowed KPQX 92.5-AM to buy silent station KRYK 101.3 Chinook. The FCC was persuaded that a long history of operating losses by KRYK owner Rick David Davies and his saying the station would go silent permanently warranted giving the permission. No other buyer could be found. Chinook is about 32 km from Havre.

The FCC announced that filing windows for Palmer AK 95.5C1 and Longview TX 97.3C2 were given out in error (see last month, p. 7, col. 2).

From the classifieds: I will put sections of FMedia! on cassette tape for blind people if they send a snail cassette and mention the items they want. I have a lot of time and don't mind doing it. Ken Onyschuk, 331 Pine St. No. 1, Joliet IL 60435.

Wanted tube type audio equipment, older speakers, mikes, etc., 1-800-251-5454.

For sale: 25 kw FM station, Corpus Christi area (106.1). E-mail: kztxfm@juno.com or PO Box 337, Yorba Linda CA 92885.

Nonprofit station seeks donations of a console and production equipment. Our mod monitor is broken; we need another. We are a Christian ministry; can give a tax receipt for donation. Charles Sivley, WVCT \*91.5, 968 W. City Dam Rd., Keavy KY 40737.

Propagation forecasting: Jacques d'Avignon, 965 Lincoln Dr., Kingston ON K7M 4Z3 Canada.

Audio Classics has quite a list of pre-owned audio and FM gear, including McIntosh, Carver, Fisher, Magnum-Dynalab. Write for the list at P.O. Box 176, Walton NY 13856-0176; or call (607) 865-7200. They allow "liberal trade in allowances" for your old gear.

Radio station airchecks from various markets done on a custom basis. Info from Mark Strickert, 3005 Beau Dr. No. 1, Des Plaines IL 60016. He writes: "A friend loaned me this April '97 FMedia! Good to hear 'KRKD' (103.3) is still around. Used to listen to them in my Oakland days, good mix of jazz, good signal in stereo, obviously engineered to not interfere with any other stations." He and another person mentioned the new, taller tower at Addison IL for WMBI-FM \*90.1-AM, built close to the old tower, which "vanished" over a weekend. The other person mentioned having to see the old tower go, as it was a landmark.

## FM FORUM

### CONTRIBUTIONS FROM READERS

An anti-WFUV tall tower essay in the New York Times by John Tierney, quoted him as saying, "Of course, it's . . . big and ugly. But that's the price of safety. And that's why we need this titan!" Environmentalist Paul Brodeur, in books and New Yorker articles, has been warning that electromagnetic fields created by radio antennae and power lines cause cancer. "Pure bunk, I say. Most scientists think these fears are overblown. . . . With your help, we'll soon link hands, look to the sky with tears in our eyes and say proudly—A tower grows in the Bronx."

Rick Strawcutter, 46, of Adrian MI, was the focal point in a battle between ABC and NBC news. He received a videotape from California cult members before their mass suicide. NBC offered \$45,000, but he sold the tape for \$50,000 to ABC. Strawcutter said he didn't know why the cult sent him the tape. "I really don't know, other than my history of being supportive of people who might not otherwise get a fair hearing," he said. "It's possible they selected me as a person who would get their information out." Strawcutter is the operator of "Radio Free Lenawee" 97.7 (Jan. p. 5, col. 1), which is run from his church. Strawcutter declined to talk about his church, and escorted a Detroit Free Press reporter from the church building while videotaping her.

Bill Thompson of Buffalo NY is concerned about the overpopulating of the 88 to 108 mhz FM band, what with Canada appearing to be giving up totally on the AM band. "I'm afraid I'm going to get quite a few new semi-locals across the border in the Niagara Peninsula, and a new local in

Crystal Beach ON less than 16 km from here when the CBC switches everything to FM. Interesting to see Canada going ahead with their own DAB standard; a few years ago, I would have bet money that in-band DAB was going to be the standard on 88-108 in North America. Looks like all bets are off now!

"When the spectrum auction and 're-farming' finally comes to an end, I guess we can look forward to plenty of interference from everything from devices like wireless keyboards, cordless phones, and similar gadgets on 54-108 mhz! I hope 88-108 mhz doesn't suffer the same fate. I've talked to digital engineering types who complain that wideband FM is a waste of spectrum, and analog modulation is a waste of energy, and all broadcasting should be UHF and above. If they end up getting their way, I guess we'll need dishes to DX everything!"

"The Rev 105.1 (.3 & .7) change to X-105 has really caused a furor in the [Twin] Cities. There have been several articles in the paper, and it even made Page 1. Looks like radio programming is now at the mercy of the big boys in radio, with their multi-station holdings," writes John Ebeling.

Alan Freed, formerly of The Beat 97.7 Minneapolis, FAXed a story from the U of M's Minnesota Daily. The article was a reaction to Rev 105 being sold to ABC, Inc., which owns KQRS 92.5 and KEGE, The Edge, 93.7. Jim du Bois, president of the MN Broadcasters Association was quoted: "A lot of companies will decide I have two choices basically, either to get big or get out." The article mentions that the premise of the new telecom law was to promote diversity. Instead, the exact opposite has happened—"a flurry of mergers and consolidations, a roster of the disgustingly rich being bought by the obscenely rich."

Speaking of obscene, I heard and taped on KEGE 93.7 enough to prompt a petition to deny the ownership transfer of the Rev stations to KQRS/Capital Cities/ABC/Viacom. Here's some of what I sent the FCC with copy to Mark Steinmetz of KEGE-KQRS:

*It has come to my attention by a reader that KEGE regularly broadcasts obscenity in violation of FCC rules and community standards. I recorded KEGE at a time when I told that obscene utterances were most likely to be heard. These are apparently so profane that not even the FCC's so-called "safe harbor" offers the broadcaster protection.*

*I taped part of the early Sunday morning show known as "The Ultrasonic Bum," with announcer Greg Comstock. [The tape, a copy of which was sent to the FCC, contains numerous four-letter words, some in a song and others in a clear-voice promo with no background music.]*

*Also I noted no legal station ID within plus or minus 15 minutes of 4 a.m. CDT Apr. 6, and was told by a regular listener there never is a legal ID during that two-hour weekly show. [This person has*

*younger ears than I have and claims to pick up subtle obscene language I did not hear, including in many of the records, some heard before 10 p.m. local time. I believe I heard such language in a song just before the 6 p.m. legal ID Apr. 6 but did not tape it.]*

*It is clear that KEGE and KQRS lack the requisite qualities to be a broadcast licensee. . . . Clearly The Edge has gone over "the edge!" Management at KEGE is obviously so lax as to permit indecent and obscene speech. . . . Those stations and their corporate owners would be unqualified to properly operate KCFE, WREV-FM and KREV [now KXXR, KXXU and KXXP] in the public interest, convenience and necessity. I respectfully petition the Commission to deny the applications for ownership transfers of those three FM radio stations.*

Some FM DX news: Skip June 26 in Queens came from WXDJ 95.7 North Miami Beach with Spanish music and WIKX 92.9 Charlotte Harbor; at 8:50 p.m. KCMO-FM 94.9 Kansas City. A KS DXer got WWRX 103.7 Westerly RI the same night. July 14 "Independencia FM" 105.7 in the Dominican Republic and an unidentified 92.9 station with a song about Cuba with a taxi commercial were heard in Queens. Finally, MOR (More 94.9 FM) Nassau, Bahamas "came in crystal clear for 25 minutes with dance music and a report about a garbage strike." July 16 at 1859 CDT I heard and taped WSCL \*89.5 Salisbury MD.

John Clark finds my publications somewhat useful, and agrees that the General Electric Superadio 3 has "a really serious lack of tuning calibration on most of the models that I've tried. . . . I don't believe that the FM side is as sensitive as that of the Superadio II, either. Of 5 Superadio 3s that I've tried I found one that I considered satisfactory. . . . I would like to buy a Sony FM/AM Walkman model SRF M40W." Anybody having such a radio can contact John at 15 Bockes Rd., Greenfield NY 12833; (518) 893-2313.

Ed Goldman, 50, comes back home—to Boston. As reported in Feb., 1996, p. 5, col. 1, he went away to become vice president of CBS AM stations. He's back at WBZ 1030, after being displaced by Mel Karmazin, surviving czar in the wake of the CBS-Infinity-Group W merger. Goldman bumped his replacement, Ted Jordan, to WODS 103.3 manager, and moving WODS manager Bob Pates to a still unspecified job in the CBS organization. Mel likes to do everything himself. He has been known to have to approve any purchase over \$500.

FMedia! has been running eight pages a month lately. Does anybody know when the last six-pager ran? I show 1-95, 6-93, 2-93, 9-92, 6-92, 5-92 and 4-90 as months when it was only six pages. What months did FMedia! not publish? It must be about three years since an issue was missed. I have advanced the deadline for FMedia! about a week for the last several issues, due to the large backlog of material.

Until September,

*Bruce F. Ebeling*

## New FM Station, Translator Grants

Translators have less than 100 watts unless shown otherwise

- AL Maysville (in the Huntsville antenna farm) W264AI 100.7 (WVNA-FM 100.3 Tusculumbia)
- AK Fairbanks KUAB \*104.7 10500 h.v.; 134 m, University of Alaska. This may be a temporary station to serve the translators for KUAC \*89.9 until the translators are tuned from 104.7 to 89.9. [P. Coleman]
- AK Houston 99.3 6000 h.v.; 80 m, Chester/AZ Phoenix K210BZ \*89.9 (KEFX 88.9 Twin Falls ID), h.v. [net Communications]
- AZ Tuba City KAXB 97.9 30000 h.v.; 327 m, Sky-/CA Auburn K279AE \*103.7 (KVMR 89.5 Nevada City CA), 250 h.v.
- CA Cottonwood K207CE \*89.3 (KAWZ 89.9 Twin Falls ID), h.v.
- CA Gonzales K254AG \*98.7 (KEAR 106.9 San Francisco), v
- CA Soledad K210CA \*89.9 (KEAR), v. But KLVW 89.7 Prunedale is protesting this grant.
- CO Vail K222AJ 92.3 (KZGO 92.7 Glenwood Springs), v [Savannah], v
- GA BrunswickW285DK \*104.9 (WYFS 89.5/IL Taylorsville W205BC \*88.9 (WYFG 91.1 Gaffney SC), h.v.
- N Bedford W205BB \*88.9 (WYFG), h.v.
- A Cedar Rapids W206AO \*89.1 (KLVC 88.3 Magalia CA), 250 h.v.
- S Alma K215CI \*90.9 (KLVC), 250 h.v.
- S Hugoton K222AK \*92.3 (KANZ 91.1 Garden City), 170 h.v.
- MI Mackinaw City W268AD \*101.5 (WHWL 95.7 Marquette) [146 m, S. V. Beilfuss]
- MI Reed City WDEE"-FM" 97.3 2850 h.v./MO Potosi \*89.7 2300 h.v.; 80 m, New Life Evangelistic Center [don], 210 h.v.
- JE Valentine K258AI 99.5 (KSDZ 95.5 Gor-/JV Eureka K278AK 103.5 (KNEV 95.5 Reno), v [88.9 Pemberton], 120 v
- JJ Burlington W236AF \*95.1 (WBZC/IM Las Cruces K220GF \*91.9 (WPCS 89.5 Pensacola FL), v [Port Jervis]
- IY Middletown W239AC 95.7 (WTSX 96.7/IK Durant KAYC \*91.1 1000 h.v.; 28 m, American Family Assn. (see also "Deletions," below) [91.7 Stillwater), h.v.
- IK Oklahoma City K246AF \*97.1 (KOSU/IR Klamath Falls K210BY \*89.9 (WPCS 89.5 Pensacola FL), v
- A Clearfield W284AK \*104.7 (WPSU 91.5 State College), h.v. [Kane), h.v.
- A Du Bois W221BD \*92.1 (WPSB 90.1/I Westerly WBLO \*88.1 100 v; 20 m, RI Public Radio. This is the second RI station on 88.1!
- DSioux Falls K211DE \*90.1 (KAWZ), h.v. This might be a short-lived translator, as American Family Assn. has applied for a 1000 h.v.; 36 m

station, on that channel.

- TN Hohenwald WAUO \*90.7 1000 h.v.; 71 m, Am. Family Assn. (see also "Deletions")
- TN Paris W258AJ \*99.5 (WKMS 91.3 Murray KY), h.v.
- TX Amarillo K235AL \*94.9 (KAWZ), h.v.
- TX Pampa \*90.9 250 h.v.; 63 m, American Family Assn. (see also "Deletions")
- TX Washburn (between Claude and Amarillo) K217CS \*91.3 (KAWZ), 170 watts h.v.
- UT Cedar City K247AG \*97.3 (KUSU 91.5 Logan), v
- UT Roosevelt K261CL \*100.1 (KUSU), h.v.
- WA Sunnyside KAYB \*88.1 250 h.v.; -58 m, Am. Family Assn. (see also "Deletions")
- WY Casper \*91.3 420 h.v.; 556 m, U. of WY—to relay KUWR 91.9 Laramie.
- AB Banff CFHC-1 106.5 200 h.v. (to move from 1340 AM), Rogers Bcstg.
- AB Canmore CFHC 106.5 360 h.v. (to move from 1450 AM), Rogers Bcstg.
- MB Selkirk 105.5 44000 h.v, Native Communications, Inc., to relay CINC 96.3 Thompson.
- ON Paris-Kitchener \*89.1 5000 h.v., to relay CBL 99.1 (below)
- ON Toronto CBL \*99.1, 35200 h.v. To move from 740 AM. Calls of \*94.1 remain CBL-FM.

Thus no urban music station is awarded to Toronto. Denham Jolly of Milestone (Kilometer-stone?) Communications again failed to persuade the CRTC that a "world urban contemporary" station was needed. He previously tried to win 92.5, now Rawlco's CISS. The new FM transmitter should be on by March, with a simulcast of monophonic CBL 740. In September, 1998, CBL AM will be deleted, with the frequency available to new applicants.

K. W. Walter: "I am glad that the 5 million people in the Greater Toronto area will soon be able to hear this good general noncommercial station on the prime FM channel of 99.1—clearly now, instead of shaky reception in spots. Whenever the CBC moves its stations from AM to FM, the listeners greatly increase in number. . . I find it interesting that 200+ stations of National Public Radio are transmitting programs such as 'As It Happens' from CBL. Obviously, U.S. listeners appreciate thoughtful programs, too." The CBC has an existing, "ancillary FM frequency now surplus to its needs—93.5 in Peterborough, [CBCP] east of Toronto.

"CBC president Perrin Beatty telephoned Mr. Jolly immediately after the CRTC decision to offer the CBC's assistance in determining whether 93.5 FM, if it were to be moved to Toronto, could meet Milestone's requirements," wrote Michael Valpy in the "Globe and Mail." The Toronto Sun's Gary Dunford scorned the decision, writing, "We got a 'new' FM station to bring us. . . more of the same." The CBC "has more Toronto radio licences than it has services,"

scoffed a private broadcaster who called the decision a crock. Advertising money that might have stayed in Toronto "now will flow south to Buffalo, home of the urban music station WBLK."

ON Welland CHOW 91.7 27400 h.v, moving from 1470 AM. It is a threat to CFLZ 91.9 Niagara Falls. CFLZ is a Class D station on an unprotected frequency.

PQ Mont-Tremblant CIME- 103.1 800 h.v, Diffusion Laurentides, Inc. To relay CIME 103.9 St-Jerome.

CY Colima XHCIA 91.7, "Magia FM"

QU Cancun 91.5 "Super Turquesita," \$[tereo] 92.3 "Radio Formula," \$, parallel to a 740 AM station.

93.1 "Mix FM," pseudo stereo "with only one channel wired in mono from the turntables. Format was Ray Charles back-to-back with Jimi Hendrix."

QU Chetumal XHROO 93.3 5000 h.v, "Radio Cancun" (even though it cannot be heard in Cancun).

VC Xalapa [Enriquez] (not "Jalapa") XEOZ 91.7, \$[tereo]. Apparently the town name has changed. Affects other stations listed under "Jalapa," a city of 205,000.

 PA Easton 96.1 WCTO (WLEV), k, saying "we're  
 building a new country station in the Lehigh  
 Valley, 'Cat Country 96,'" and "This is a  
 construction zone," running periodic growls  
 prior to the call letters changing. It's the only  
 local source of country music, and might help  
 keep WLEV 100.7 Allentown b[eautiful  
 music]. Country is said to not be as popular  
 in the East as it is in other parts of the  
 country. It lags behind adult contemporary,  
 news/talk, Christian and oldies in that region.  
 Said former WLEV listener Cheri Cusait, who  
 works for Bethlehem dentist Robert Ruyak,  
 "We changed it right away. It was kind of  
 grating. Not everyone likes country-western  
 music." [t, sports, mono

 CA Atherton KCEA \*89.1-66 m (100 watts h,v);  
 seeks 39 m. It's noncommercial, but its  
 56-year-old manager is not. Frank Spinetta  
 has pleaded no contest to embezzling \$90,000  
 in donations meant for the station. He ran the  
 scam apparently by using a secret bank

account with a name similar to the account  
 used by the station, owned by Menlo-  
 Atherton High School. Spinetta faces up to a  
 year in jail.

CA Bay Point (town name change from West  
 Pittsburg), affects KZWC-1 92.1. Voters  
 approved changing the name "as they wanted  
 to break the association with Pittsburg.  
 Pittsburg has a reputation because part of the  
 town is populated with poor minorities, and  
 crime there is higher than in surrounding  
 towns."

 TN Belle Meade (Nashville); move from Mount  
 Juliet) WNPL 106.7. However, WAMB-FM1  
 106.7 in nearby Donelson TN is still on the  
 air.  
 WAMB 1160 AM has been plagued by  
 nighttime Cuban interference, so the FCC  
 granted it nighttime only use of 106.7, according  
 to information in "Radio World." The FM "was  
 an instant hit, especially with listeners who  
 apparently didn't know that WAMB (AM)  
 existed." WNPL briefly tested, but interfered  
 with air traffic; perhaps the move to Belle Meade  
 will help. WAMB-FM-1 has a backup frequency  
 in mind. Owner William Berry said his operation  
 has been noted by others. "A station operator  
 from Florida once called me. He was having a  
 similar interference problem and asked me how  
 you get one of these FMs. I said you begin by  
 writing a letter every day for five years to the  
 FCC. That's when he hung up."

 "One of the advantages of FM Atlas over the M Street Radio Directory is that you include Mexican station info." J. K., San Francisco CA. One reporter says, "Individual station websites are not always helpful; ERPs are not always listed, or may be exaggerated."

**Stereo—or to be Stereo**

CA Arnold KCFA 106.1, IDs as "Christ-centered programs 24 hours a day, KCFA Arnold."  
 Heard going into UPI News, then a short spot asking for contributions, "Because we are a young station and not yet self-supporting."  
 Gave address as Box 907, Arnold 95223.  
 CA Berkeley KPFB \*89.3 finally converts. Most of the programming is parallel to 94.1; indeed, heard saying "KPFA 94.1."  
 FL Hobe Sound WTPX 105.5, but temporarily only with the time. It's on 24 hours a day. Its says, "U.S. Naval Observatory Master Clock. At the tone, Eastern Daylight Time 15 hours, 25 minutes, 45 seconds. Beep. Universal Time, 19 hours, 25 minutes, 50 seconds. Beep." It gets its time from the observatory in Washington DC. The master clock's voice is a digital recording of an unidentified man "who died a few years ago." WTPX breaks every 30 minutes for a public service announcement and station identification. "It's the Big Ben of Palm Beach," said Tricia Dahlin, v.p. of Intermart Broadcasting of Punta Gorda, station owner. "If you want to set your clock, tune in my radio station." WTPX is being run under program test authority of the FCC and announced it is being sold to American RadioSystems of Boston. It lacks a studio, with format and studio location to be decided by the new owners.

FL Port St. Lucie (no call letters given) 101.3 with an urban format. "There was also a pirate on 96.1 in West Palm Beach in mono playing urban, dance—listenable signal, too!"  
 IL West Frankfort WQUL 97.7, on with Class B facilities. [rock.]" "The Fox."  
 KY Clinton WCBF 102.1, r, "adult/  
 KY Glasgow WGBV 94.1, k, "The Beaver," parallel to WVVR 100.3 Hopkinsville and WBVR 96.7 Bowling Green. WBVR is now k[ountry]; "no longer rock."  
 MI LeRoy Township WLGH \*88.1, ID with Lansing, "so obviously not south of Cadillac as shown in FM Atlas-17 (p. 48)... Near Lansing (probably with antenna on the WLNS TV-6 tower)." [See Feb., p. 2 col. 1.]  
 MO Potosi KHCR 97.7  
 NY Bridgehampton WBSQ 102.5, now "Q-Rock" (from "Q-102.5")  
 NC Carolina Beach WLGX 106.7, "The Breeze"  
 NC Nashville WZAX 99.7, rm, "New Mix 97.9, 99.7" (see "Formats," below, Gaston NC).  
 NC Pinetops WEQQ 95.5, parallel to WEQR 102.3 Goldsboro. Both "Double Q."  
 PA Allentown WJCS \*89.3  
 PA Cambridge Springs WAQM 104.5, ID with Meadville  
 SC Atlantic Beach WSEA 100.3, heard testing with sounds of the surf crashing onto the beach—all in glorious stereo. But it was "off the air the next time I checked in August."  
 TN Cookeville WHRS \*91.7, although believed to drop stereo during monophonic programs like "All Things Considered."  
 VA White Stone WNDJ 104.9, m, still "Windy 105" [braces stereo.]  
 WA Mount Vernon KSVR \*90.1, "now em/  
 ON Tyendinaga CKWE 105.9, on 15 hours a day, starting at 7 a.m. "I don't know what our antenna height is." NonID is "KWE," pronounced "guay," which means "Hello" in the Mohawk language. Town misspelled, FM Atlas-17, p. 216.

**Monophonic**

AL Union Springs WSFU 94.1 still mono, sg  
 CA Camarillo KMRO \*90.3  
 CA Eureka K230AA \*93.9 and Scotia K272CH \*102.3, but "They're supposed to be in stereo, unless they can't get the input signal well enough."  
 CA Hayward KCRH \*89.9 still mono. Its signal was interfered with 5 km away by KCDS Angwin. It called self "KCRH FM 90," with no nonIDs heard. [and KMRO Camarillo]  
 CA Shafter KGZO \*90.9, both "Radio Nueva Vida" (good life radio). Affiliated with WAVA 105.1 Arlington VA, one-time interested buyer of WDCU \*90.1 Washington DC (last month, pp. 5-6).  
 CT Hartford area "Praise FM" 105.3 now mono. "It took 5-6 clients away from WKND 1480 Windsor CT, which wants the pirate off." However, WKND has a puny signal, squashed into a severe E-W path, and cannot be received in Hartford.  
 PA Havertown WHiHS \*107.9 "still mono"  
 VA Warrenton WINX-FM 94.3, n, all news, parallel to WTOP (AM) Washington DC. Going mono. Bonneville bought it, plans to double its power. "WTOP AM doesn't come in well in the buildings of downtown Washington." Calls to change to WTOP-FM. "We're going where the listeners are. Our hope is that people who currently listen to music on FM, or who listen to NPR news on FM, will see us as an alternative." In 1950, there was a WTOP-FM on 96.3. That station's equipment was donated to Howard University, now running the very successful commercial station WHUR 96.3. Published "gossip 6-12 months ago had CBS

considering making one of their FMs here all news... V.I.O.P is a CBS affiliate."

**Format Changes**

Formats are the same as in the "FM Atlas"

AL Birmingham WZRR 99.5 op, parallel to WVNA-FM 100.3 Tusculumbia

 KY Stamping Ground WKY1 99.1 g, returns to air, parallel to WJMM 106.3 Versailles  
 ME Presque Isle WOZI 101.7 o  
 MD Salisbury WSCL \*89.5 cn, with transmitter

in Seaford DE.  
 MD Takoma Park WGTS \*91.9 g, "Positive Life Radio." It drops classical music. Classical only took in \$35000 last year from member pledges for 122 hours a week on the air. The station's 40 hours of gospel raised \$195,000 in donations.  
 "Therefore, all religion [with] bright inspirational [music/Christian] soft rock... Some of the older Adventists in our audience may not like this music, but it's popular music and a service people want," said John Konrad, 27, manager, "who like WGTS' top brass, is a graduate of Columbia Union College, the small Adventist school that owns the radio station." WGTS was noted for playing classical pieces in their entirety. It fired its entire staff of 25 paid and volunteer announcers.  
 "I was summarily dismissed at 5 o'clock," host Richard Carter said. "The income numbers are just a convenient excuse to change the format. There's been no real attempt to market

the station as a classical station. There was no genuine love for the music," he said.

Although Christian music is often associated with conservative evangelism and politics that make up the menu of most Christian stations, the Seventh-day Adventists say they're not out to win converts. "We have a little more liberal tradition," Konrad said. "We believe in a firm separation of church and state. We've never seen WGTS as a way to convert people to Adventism. . . I'm not going to debate that there are a lot of religious radio stations in town, but we have to ask ourselves: Are you accomplishing any mission if you're only reaching 8000 people?"

In other District news, Bonneville plans to take over WGMS 103.5-WTOP AM as part of a six-station swap with Chancellor Broadcasting and Evergreen Media later this year. Bonneville owns MD-licensed WWZZ 104.1-WWVZ 103.9. No format changes are planned. Bonneville is a 30-year-old company owning 14 radio stations, and an arm of the Mormon church. In keeping with church philosophy, the stations carry virtually no debt. [and brokered.]

OR Bend KOAB-FM \*91.3 tf  
OR Pendleton KRBM \*90.9 tf

OR Portland KOPB-FM \*91.5 tf—all three stations dropping most classical music for "repeated hours" of "Morning Edition" and programs such as "Talk of the Nation." Most of the station's music will be on weekends—"Thistle and Shamrock," "Afropop Worldwide," "Schickele Mix," and "Prairie Home Companion."

Several listeners said they planned to cancel their memberships. Martin Goldsmith's morning "Performance Today" was to have been axed, but the OPB board overruled the station's staff.

KBPS-FM \*89.9 remains full classical, and not an IPR affiliate. KBPS-FM wasn't interested in PT because it would have cost \$17,000 a year and it talks too much," Darryl Conser, g.m., KBPS-M, said. His listeners "prefer straight music."

BREEN

Virginia Breen, 47, at OPB stands behind the decision, despite saying she received "personal threats." Breen is making the changes at a time when there's unprecedented growth at OPB. Portland's population boom has helped triple the station's audience in 10 years. OPB has 119,000 members, with radio pledges 33 percent over last year.

The changes occur years after Portland's last commercial classical FM station bit the dust. The cultural dearth is in evidence even at the Portland public library, which cut its hours and eliminated music rooms. Last May the library sold its valuable collection of 15,000 LPs.

Said Frances Storrs, City Club president, "OPB may be losing sight of its mission of working in the community. We were distressed to hear Virginia Breen talk about how important the numbers are to them."

A group of 1000 listeners gathered to protest. At the rally, which included a 60-voice choir, \$675 was raised for the cause. The money will go for mailings and possible newspaper advertisements. Organizer Gil Seeley said, "I was very happy at the turnout. I didn't know what to expect. The next step is trying to keep this going. 'PT' isn't enough." A daily web site has been set up to inform about the changes at <http://www.teleport.com/~opbwatch>.

Former 1950s TV conductor and RCA Victor recording artist Norman F. Leyden, associate conductor Oregon Symphony Orchestra, Portland, wrote: "I am shocked and dismayed by OPB's abdication of its responsibilities. If OPB's decision stands, it will only accelerate the decline and collapse of our culture."

Ruth E. Chapin, Portland, wrote the Oregonian: "My family was recently back east, where we listened to WHYY in Philadelphia, which has a format similar to what OPB has planned. After a while, all the talk became tedious. . . Do listeners really need four hours of 'Morning Edition' and another four hours of 'All Things Considered'?" Another listener promised not to pledge if Breen's plan is carried out. Arts patron Anthony Boutard said, "Do we really need repeats of 'Morning Edition' three, four hours a day? How dumb do you think we are?"

One person writing in support of the changes was Peter Barab, Portland: "Far too much attention is being given to the programming that will be dropped, and not nearly enough to the value of what will be added. . . Civilization will not die without classical music, but democracy will die without an informed and educated populace—and we are losing the battle."

Marian McPartland, whose "Jazz Set," is being axed, called the decision "cold-blooded. . . It seems so arrogant. Even if my show wasn't getting cut, I'd still like to be involved. Let me know what I can do. I would certainly try to help, send money." McPartland's program is broadcast on 260 stations.

The turmoil even involved the Golden Hours reading service on KOPB-FM's 67 kHz SCS. Arthur and Judith Goldberg, who hosted a Wednesday morning opinion show, quit on the spot when they were informed there was to be no more opinion and commentary on the air. The day before another reading service host, Marge Cole, had read an editorial from the Oregonian on the OPB flap. This caused Breen to issue the edict that "Golden Hours" not include editorial material in its broadcasts. "Golden Hours" manager Jerry Delaunay had the task of informing the Ginsbergs that they couldn't do their show, "The Deuce Is Wild," because of content. OR Portland KWJJ-FM 99.5 may be in for a change. An announcer keeps saying, "JJ is calling it quits. Listen Sept. 9th." Callers to the station only get a "We don't know" response. Would the station scrap its country format or long-held call letters?

VA Harrisonburg WQPO 100.7 r, CHR, still "Q-101"  
VA Strasburg WBPP 104.9 k, "Apple Country"; had been silent since July 21.  
WA Mabton KLES 98.7 gr  
WA Walla Walla KHSS 100.7 m  
WV Romney WJJB 100.1 r  
WY Cheyenne KZCY 104.9 pr, "Z-105"  
PQ Montreal CHOM 97.7 still rp, adds Howard Stern, for his first Canadian affiliate, at the paltry sum of \$350,000 a year. The Quebec government is concerned because Stern called French Quebecois derogatory names, and may have violated some of their laws. In an early program heard on CHOM he "began railing against efforts by the province's French-speaking majority to promote their language over English."  
ON Toronto CILQ 107.1, still rp, becomes Canada's second Stern station.  
Stern left KEGF 97.1 Fort Worth (last month, p. 3, col. 1), even though his show was No. 1. "KEGL was recently bought by Nationwide Insurance, which says Howard's high ratings haven't translated into sufficient revenue to warrant keeping him. They don't like the fact that it's necessary to hire a special sales team just for the Stern show and complain that many Stern listeners aren't rock fans and tune out as soon as the show is over. . . Howard says that makes a lot of sense, dump the program everybody likes and put on more of the stuff nobody listens to. He says that's what happens when a company that knows nothing about broadcasting buys a radio station. Stern has not yet signed with another Dallas area station. Asked if he would consider going on an AM station, he said, "Probably not. I want to be where I can compete. I guess I kind of consider myself an FM guy."

On Air—Real Stations and Pirates (Selected)

AL Muscle Shoals W274AA 102.7—"In mid-record, they cut in inviting advertisers to reach the 18-34 age group on the 'KDF Translator Network' (referring to primary WKDF 103.3 Nashville) at (205) 764-8261. The cut-in ended :30 later and they dumped back into the middle of the record."  
AR Fayetteville area \*90.1 with American Family Radio "can't be cable radiation since we don't have cable. [It] must be a pirate. The FM band is getting more and more stations that are less and less interesting."  
AR Osceola KOSE-FM 107.3  
CA Berkeley "Free Radio Berkeley" 104.1, mono. "It puts out a great signal, heard on east side of Caldecott Tunnel. . . They get out over Berkeley-Oakland very well. Also mentioned a 'Radio Kalipha' on 102.5, which was not heard." When the FBI was looking for the Unabomber, they knocked on Free Radio Berkeley's door. In the area is a more secret pirate location for Free Radio Bethel 92.3. The Bethel station is 20 watts, serving a 4.8 km radius or lobe. Ninety-two point three is also the frequency of KSJO San Jose, "but for now the commercial station isn't pursuing them."  
CA Oakland "KRKD" 103.3 with "obscure jazz music." No IDs heard, and Modesto's signal [KATM] "gives this one trouble, fading in

and out even while driving along I-880."  
 CA Pleasanton area \*90.5 a new KCJH 90.1 Stockton translator said to be in operation.  
 CA San Francisco Liberation Radio 93.7 says on its website: "We are a micro radio station . . . not licensed by the government and we accept no advertising or corporate support. We are entirely listener-supported. We specialize in topics such as social justice, the environment, animal rights, poverty, homelessness, police brutality, prisoners' rights, etc." On seven afternoons and evenings a week. Website at <http://www.slip.net/~dove/>.  
 CA Santa Barbara area 102.3 mono with variety of music, no announcing, except once heard, "Our station on 102.3." It is full time, but low power.  
 CA Wasco/Bakersfield \*87.9 Radio Free Bakersfield, "It seemed to come on the air each day at noon [with] disc jockeys playing hard rock music," covering a radius of about 17 km. Mono. Music had bad language.  
 GA Athens WNGC 95.5 to air women's University of Georgia basketball games. For the last six seasons they've been on sister station WGAU 1340, "which is limited to the Athens area. The FM station's signal also reaches to Chattanooga, Greenville SC, Macon and Augusta." ["vulgar" words.  
 GA Atlanta 100.3 mono rap pirate, with/  
 IL Mount Vernon WAPO \*90.5—and WAPC \*91.9 Terre Haute IN now giving legal IDs, but not AFR's WATI \*89.9 Vincennes.  
 IN New Albany W284AD \*104.7, which enables WSOH 88.3 New Washington IN to serve Louisville, in spite of WJIE 88.5 Okolona KY. It was heard as far as 32 km east and west of Louisville recently.  
 IA Forest City KZOW \*91.9. FCC deleted call letters and cancelled the CP, but "this station is still on the air and knew nothing of the cancellation."  
 ME Houlton "Cramp FM" 88.1, 9 watts.  
 MD Frostburg WFWM \*91.9, having moved from 91.7.  
 MD St. Michaels WFBR 94.3  
 MA Boston "Radio Free Allston" 106.1 with 20 watts. It gained city council approval to "acquire nonprofit status and thus qualify for grants and tax-deductible contributions." Steve Provizer, 46, runs the "anti format" station from the "88 Room" art gallery on Brighton Avenue. It's on 5 p.m. to 2 a.m. Mondays through Thursdays, with hopes of expanding.  
 MI Adrian—Rick Strawcutter's "Radio Free Lenawee" 97.7 continues in operation, so the FCC has asked a Detroit judge to allow U.S. marshals to seize its equipment. It was uncertain when U.S. District Judge Julian Abele Cook, Jr. might accede to the request. Patrick Edwards, Strawcutter's attorney, said he will fight the Commission. Edwards claims the broadcasts are not interfering with any other station. Court documents, however, show interference to an Ohio station. That station might be far-away WTKN 97.7 Lima or, perhaps, WGGN 97.7 Castalia-Sandusky.  
 MI Wyoming WYCE \*88.1, but the land its tower is on was sold and it has to move. It wants to build a \$60,000 tower at 28th St. SW at Clyde Park Ave., doubling the height to 61 m, and it wants to increase from 1 to 8 kw. "It's a huge project for us. This upgrade will give us a net gain of 100,000 listeners," station manager Phil Tower said. The area it can relocate to is very small because of other nearby stations. WYCE is a 24 hour, seven-days-a-week station run by a small staff plus volunteers.  
 MN Cook K280AZ \*103.9, but not as good coverage as Gilbert.  
 MN Gilbert K280CO \*103.9 back on air—huge signal at 92 watts h, covering nearby Virginia MN, up to Lake Vermillion. "A balun was broken. It was free radiating and heard nowhere!"  
 MN Minneapolis KEGE 93.7: After my protest

they've been bleeping out the bad words in songs, despite the FCC rejecting my petition to deny the ownership changes of the "X-105" stations. On the early Sunday morning "Ultrasonic Burn" program the board operator (not Greg Comstock) said, "We can't say any naughty words on the air any more. We might get in trouble."  
 K242AI \*96.3, but may go to 97.7, where it has a disputed CP.  
 MO Kansas City "KCMG" 107.9, "with someone at the FCC being reported to have said he would try to help the operator get a license. Meanwhile, 107.3 has been complaining about interference, which is a crock with 100 kw overwhelming 65 watts rather handily" (see Aug., p. 3, col. 2).  
 MO New Bloomfield KNLG \*90.3, with g. This is the first station in a planned network for Missouri and Arkansas. [to 105.3  
 NC Jacksonville WXQR 105.5, not yet moving/  
 ND Ellendale K252CW 98.3—must soon leave the air so KYNNU 98.3 Carrington ND can be heard there, but there is hope. "The good news is that if \$1000 can be raised, we can apply for a new frequency. . . The FCC will soon order it off. At this writing, approximately \$400 of the needed \$1000 has come in. If the money comes in quickly, time off the air may be avoided."  
 OH Clevelandarea—an unlicensed Spanish station on 90.7, "90 punta 7 stereo, Cleveland." It was especially strong downtown. WJW-TV 8 interviewed Spanish speaking people who think this service is needed. WJW-TV contacted the FCC, but their response was that no action will be taken against a microbroadcast station unless the FCC gets a formal complaint. . . "I am curious about the 'National Radio Quiet Zone' on p. 24 of the latest FM Atlas. I thought that radio astronomy ended in West Virginia with the closing of the Green Bank observatory years ago. Is such a 'Quiet Zone' still in the public interest?"  
 OH Highland Heights "Tantrum 95.7" or "TNT," with songs from '68 to '94, plus "Begin the Beguine" by Ray Coniff, which is the favorite record of Tim, the operator.  
 OR Portland "KOAN" 95.9, stereo, progressive rock. On Fridays and Saturdays 10:30 p.m. to midnight, hosted by "Forest Range."  
 PA Philadelphia "WZXL" 95.3 recently on, from Friday afternoon to late Saturday night, with "all sorts of weather, ads, PSAs (all of which could have themselves [been] pirated." It has not, however, been heard the last two weekends of August. The 97.7 pirate in West Philly has been off all summer.  
 SC Johnsonville WPDT 105.1  
 SC North Myrtle Beach WMIW-FM \*88.9, but a billboard heralds the soon coming of "Christian Radio WMIW 88.9."  
 VA Harrisonburg W234AH \*94.7, with WOTC 88.3 Edinburg mentioning it on the air.  
 VA Richmond WSMJ 101.1, not yet on 105.7, while WDYL Chester is still on 105.7, not yet on 101.1. "The only thing holding up WDYL's move to 101.1 was 'final approval from the FCC', whatever that means."  
 WV Fairmont W209AX \*89.7, Morgantown W204AX \*88.7, both relaying WYFG 91.1 Sumter SC.  
 PQ Thetford Mines CFJO 97.3, having moved from 103.3. "Decent signal to Sheffield Heights VT, when all Canadian signals die, except for CITE-1 102.7 in Sherbrooke PQ. You'd be surprised at how much English-American music is played. Nights and early mornings about 80/20 English. . . They even get the jump on songs before American stations start to add them."

Off Air—Or Not Yet On

CA Delano KDNO98.5, believed to be implementing a facilities change. LMA with KKXX-FM 105.3, KRAB 106.1 Greenacres, KSMJ 96.5 Bakersfield-AM.

CA Fairfield KAZK \*91.5. Meanwhile an illegal KLVK 88.3 Magalia translator seems to have usurped the frequency in stereo, but not mentioned in the KLVK ID list.  
 CA Ford City KZPE 102.1.  
 CA Modesto KEJC 93.9  
 CA Sacramento "CPR" 100.1. "The FCC confiscated their equipment."  
 CA Windsor KMHX 104.1  
 FL Fort Walton Beach 89.9. James Pierrilus voluntarily surrendered his extra-legal transmitter. FCC agents acted on complaints, supposedly from broadcasters and the public.  
 GA Atlanta—WABE's experimental 107.9 translator. "They can't seem to get it right," while WVVFJ93.3 Manchester is changing to 27000 h.v, but claims to be "200,000 watts." And WGST-FM 105.7 "may go music on FM, 640 staying talk."  
 GA Milledgeville WLRR 100.7  
 IL Flora W219BL \*91.7. It tried 88.5 "for a few months and really got out, but is now gone!"  
 KY Carlisle WCAK 100.7, ending its LMA and being bought by Mortenson Bcastg.  
 MI Flint WFBE \*95.1, said to be converting to country, but "snagged in the courts." Has a d-a (directional antenna), it is being consulted by recently departed WWWW 106.7 Detroit's Mark Hamlin. Hamlin is hoping WYCD 99.5 would switch formats and lead a challenge to the adult contemporary audience dominance of WNIC 100.3 Dearborn. But "nobody seems real interested in taking on WNIC."  
 MN Clara City K224BT 92.7. "Equipment malfunctioning. It may cost close to \$200.00 for repairs. Earmark your gift."  
 MN Hoyt Lakes K280AW \*103.9, but "may get reengineered with a d-a aimed southeast." Lower power than K280CO \*103.9 in nearby Gilbert MN.  
 NH Walpole WLPL 96.3  
 NJ Freehold Township WRLJ \*89.7  
 OR The Dalles K207BL \*89.3  
 TX Amarillo KPQZ 100.9. Its tower fell; no word when it will resume broadcasting.  
 WA Spokane—the pirate that interfered with KZZU 92.9 (July, p. 4, col. 2) could have been a citizen's band user near the station. CB audio "goes in the audio chain at stations. They could solve the problem with RF chokes from Radio Shack that attach to the station equipment power cord."

 KS Hays, with studios in Bunker Hill, KOOD \*9  
 has the KS Audio Reader on iSAP. "It is our  
 first venture using the SAP channel [and] is  
 comparable to the FM SCA channels we  
 currently broadcast on... The funds for this  
 expansion were provided by a PTFP grant  
 from the Department of Commerce."  
 NY New York City—"At least one Chinese SCS in  
 NYC is offering a small receiver, the Success  
 model ML-978.

"It sells for \$30 and runs on four AA batteries  
 or a 6-v adapter. It doesn't work well in fringe  
 reception areas, but it has good sound and the  
 tone isn't muffled like it is on some other SCS  
 radios... It only gets the one SCStation, no main  
 FM band." And Charlie Chan in the online  
 version of Hearssay says, "Many of you are aware  
 of operations in New York and Los Angeles that  
 are selling imitation models of our SCA portable  
 radio receiver (model 922). We are the original  
 designers that manufacture this unique radio. We  
 are pursuing legal action against them. Therefore,  
 do not be fooled by these outfits. Thank you for  
 your many years of support."

TN Chattanooga area—"I'm a consultant for  
 several regional telephone companies that  
 would like to put a Spanish subcarrier service  
 on the air. With deregulation and new  
 technology, you'll find telephone companies,  
 along with cable, are interested in all forms of  
 communications opportunities."

TX Houston KHCB-FM \*105.7 †(). It is a "data  
 service, and on for a trial period. I can't reveal

relay of KHCB 1400 AM, with Spanish  
 weekdays, and Vietnamese and Chinese on  
 weekends. The Chinese varies from Mandarin,  
 Cantonese and Taiwanese. We need SCA  
 because AM 1400 is a local channel in  
 Galveston with poor coverage at night. All the  
 subcarrier programming is Christian." An  
 unusual and thorough history of KHCB is  
 "For it is God Who Works," by Dolly Martin  
 Monroe. She is director of Spanish program-  
 ming on the FM and AM stations. It's 126 pp.  
 and well illustrated. I call the book "unusual,"  
 because few stations have gone to the trouble  
 of researching and publishing their histories.  
 For price and availability, contact KHCB at  
 2424 South Boulevard, Houston TX 77098.  
 It's probably free, but I'm sure a donation to  
 the KHCB-FMinistry would be appreciated.  
 WI Suring WRVM 102.7 †(), Cue Paging at 10%  
 injection, "so that only leaves us with 92  
 kHz," on which CSN (†, G) has begun.

USA—The National Association of Radio Read-  
 ing Services is asking VP Al Gore to help find  
 new spectrum to the visually impaired. Group  
 fears companies like Seiko can pay far more  
 than a reading service for precious SCSpace.  
 One option is to designate spectrum specifical-  
 ly for reading services for the blind, according  
 to "Current" public broadcasting newspaper.  
 "Rich Warren has an interesting article, 'RDS:  
 What's the Story?' in the August Stereo  
 Review. If what he says is correct, it's now  
 'RDS' rather than 'RBDS', N.L., Atlanta GA.

SURVEY—The National Association of Radio  
 Reading Services did a survey of their  
 members. Average salary for manager/  
 director \$26 K, program assistant \$25.6 K,  
 technician \$10 K, volunteer coordinator \$18  
 K, community services \$30 K. Average  
 fulltime staff 2, parttime staff 3. Extremes  
 fulltime to 6; parttime to 10. Average number  
 of listeners 5,100. Extremes 400 to 50,000.  
 Average number of volunteers 120. Average  
 budget for a radio reading service \$92,000.  
 Extremes \$700 to \$314,000. Transmission  
 methods FM/SCS 34 services, TV/SAP 15  
 services, main channel four services. Conduc-  
 ted by Lori Miller, 3021 W. 27th Terrace,  
 Lawrence KS 66047-3211. To request a copy  
 call (913) 864-4600.

"My G-E-7-2662 small portable radio far out-  
 performs the G-E 7-2887 Superadio 3. The  
 SCS doesn't have the hiss as in the other  
 radio, but it doesn't work with batteries the  
 way you modified it," C.C., Washington DC.  
 [Dave Jackway, SCS Radio Technology in  
 Missouri, told me how to improve the  
 sensitivity of the newer Superadio IIIs. It is a  
 fix I plan to include in future modifications  
 of this radio.]

"Great article in Pop-Com!"  
 "Once again, excellent job on the FM Atlas. It's  
 very complete as always," P.B., Rockville  
 MD.

### Selected AM Happenings

AL Daleville WTKN 1560 returns with talk. It  
 had been silent since February.  
 AK Nome KICY 850 knocked off the air after a  
 mall plane sliced into the tower in dense fog,  
 killing its two occupants. KICY normally runs 90  
 minutes of Russian a day plus six hours of  
 skimo music a week, as well as adult contem-  
 porary music. The 10 kw station staff hopes to  
 have a new tower up by the middle of this month.  
 After that it will be too cold and snowy to do the  
 work until summer. KICY-FM 100.3 continues  
 in the air from a different site. A long wire from  
 the KICY-FM tower might enable the AM to  
 come on earlier, but with impaired coverage.  
 A Carmel Valley KIEZ 540 returns to air as  
 Power 540," urban.  
 A Chico KNSN 1060 taken off the air by  
 PAY, which moves from 1060 to 1290.  
 A Hesperia KVVQ 910 standards; was silent.  
 A Salinas KDON 1460 silent.  
 - Tallahassee WHBT 1410 had been silent. It  
 turns with only 50 watts on a special temporary  
 authorization of the FCC and rebroadcasts  
 BZE 98.9.  
 A Atlanta WCNN 680 unplugs "The Fan,"  
 making it all news-talk, in response to WGST-FM's  
 15.7-AM, lessening their news emphasis as  
 "Planet Radio." WCNN is owned by WSB-FM  
 15-AM. Speculation is that WSB (750 AM) is  
 going to own the talk radio market in Atlanta,  
 similar to the country dominance enjoyed by  
 KHX 101.5 and WYAY 106.7 (although  
 here's speculation WYAY might change format;  
 country ratings have not been good lately).  
 YAY seeks 432 m (100000 h.v.). Latter are  
 owned by Capital Cities/ABC/Disney. WQXI 970  
 "ecstatic. The evil empire is dead. We're the

only game in town now. This is the only place for  
 sports talk," enthused Steak Shapiro, head of  
 The Zone. And, one of the most talked about  
 songs by people on and off the picket line, was a  
 spoof on the Beach Boys' "Surfin' U.S.A." It was  
 called, "Strikin' UPS." Spiff Carner played the  
 song (artist not disclosed) on the Randy & Smith  
 morning show on Fox 97.  
 HI Hilo KHLO 650 silent. Its tower was  
 destroyed in a windstorm.

ID Caldwell KCID 1490 has been "repossessed  
 by KCID-FM, KGEM, KUOT and KQXR."  
 ME Portland WLOB 1310 had been silent from a  
 flood. Now religion, parallel to WWMR 96.3.  
 MD Annapolis WANN 1190 has an 88-year-old  
 owner who wants to find a buyer and retire. The  
 50-year old station signed off 11:45 one recent  
 night and hasn't returned.  
 MD Indian Head (Washington DC) WNTL 1030  
 silent, ending its LMA with WINX-FM 94.3  
 Warrenton VA. Expected to return this month as  
 WWGB, black gospel.  
 MA Boston WNRB 1510 has been sold at the  
 inflated price of \$8 million to One-on-One  
 Sports, Inc. of Northbrook IL. Communicom  
 bought the religious station for only \$1.5  
 million. Although WNRB has 50 kw, its signal is  
 puny compared to the 50 kw on 850 of its main  
 sports rival, WEEL.

MI Dearborn WDOZ 1310, with KidStar gone,  
 g.m. Steve Schram says, "It was not stable. Kids  
 radio programming is in a highly volatile  
 situation."  
 MI—Because of poor coverage on AM, Michigan  
 State football, basketball to be on WFGR 98.7  
 Grand Rapids, "one of only two classical stations  
 in America that will broadcast play-by-play."  
 The other is in Washington DC (WGMS 103.5).  
 Games will also be on WBBL 1340 AM. WFGR's  
 Tom Beauvais thinks the games might attract  
 listeners to stay with the classical music, "And  
 since two of my children have bachelor degrees  
 from Michigan State, I figured this would be a  
 good way to get some of my money back."  
 MN KUOM, "Radio K," \*770 has a long heritage  
 that might give 9XM (WHA \*970 Madison WI) a  
 run for the money. WHA claims to be the "oldest  
 station in the nation," and sired the "Wisconsin  
 State Broadcasting Service" (now Wisconsin  
 Public Radio) and the first statewide FM  
 network in the nation. WSBS' network was  
 completed in September 1952 when WHSA  
 \*89.9 Brule and WHHI \*91.3 Highland signed  
 on. That's 35 years ago this month! Anyway,  
 KUOM traces its history to early electric  
 engineering experiments from 1912-20, mainly  
 radiotelegraphy. But in 1922 WLB (later KUOM)  
 received its license from the Department of  
 Commerce. It was one of 34 stations getting the  
 first licenses, reports the Minnesota Broadcasters  
 Association's *Broadcaster*.

"During the early 1990s, the station [KUOM]  
 found itself in a struggle to survive. The Board of  
 Regents in 1991 passed a resolution designed to  
 refocus the University's priorities—and cut pro-  
 grams and budgets. . . Among the targets was  
 KUOM, which, according to a tersely worded  
 section of the resolution, was destined for  
 elimination." Eventually, KUOM was not to shut  
 down, "but rather find ways to operate" without  
 "a heavy reliance on University funding." The  
 university did agree to fund it at \$100,000 to  
 \$150,000 annually if it could find a way to train  
 students and still provide a program service. The  
 carrier-current WMMR station and KUOM then  
 were merged.

KUMD \*103.3 Duluth is in the same univer-  
 sity system, yet has had no problems about being  
 axed. Its being on FM has helped, as well as being  
 on 20 to 21 hours. KUOM has a daytime only  
 license. For decades, it shared the daytime hours  
 with WCAL \*770 Northfield MN. The sharetime  
 came to an end when KUOM received exclusive  
 use of the daytime facility. This happened when  
 the university gave WCAL-FM (now WCAL  
 \*89.3) a long term lease on a site at the  
 university's Rosemont Experiment Station, just  
 south of the Twin Cities. Radio K is handicapped

by not being able to reach its younger audience in  
 the evenings. Ratings there, however, improved  
 after changes occurred at The Edge (93.7) and  
 the loss of The Rev, according to Paul Schmitz,  
 KUMD Duluth.

KUMD has a good audience, and in the past  
 three years has doubled its support—from  
 listeners and underwriters alike. This is something  
 that has not gone unnoticed by the university  
 administration, Schmitz pointed out.

The MBA's history of KUOM notes that in  
 the late 1940s "University is granted construction  
 permit for an FM station, but elects not to  
 construct it." KUOM-FM would have been on  
 91.7. In the mid-50s I wrote Burton Paulu, then  
 director of radio at KUOM, and mentioned that  
 Minnesota should emulate Wisconsin with a  
 statewide FM network, but he wrote back and  
 said such a plan is "not in the cards." The MBA  
 mentions that in 1970, "University applied for  
 an FM frequency, but a petition to deny filed by  
 Minnesota Public Radio was upheld by the  
 FCC."

MO Joplin KWAS 1230 expected to have  
 returned by now with religion.  
 NH Manchester WKBR 1250 was silent; but  
 returns with a simulcast of WXRV 92.5 Haverhill  
 MA.

OR Coos Bay KMHS 1420 (had been KRSR)  
 back on with [lock]. It was donated to the  
 school board, and is student run.  
 OR Portland KEWS 620 "is the new name for  
 KOTK, formerly KGW, before it went under in  
 1991." KEWS, promoted as "K-News," is owned  
 by Jacor, also owner of KKCW 103.3-KKRZ  
 100.3-KEX AM.

KEX and KXL 750 "both took forceful hits,  
 losing audience shares from the last rating  
 periods and even from the summer rating period  
 of a year ago, while KKCW 103.3 went up  
 significantly from a 6.1 to a 9.9 for No. 1."  
 PA Ebensburg WRDD 1580 had been silent; now  
 oldies, parallel to WNCC 950 Barnesboro. WNCC  
 itself comes back on the air.

TX Nacogdoches KEEE 1230 silent.  
 WV Wheeling WVVVA 1170 had as its nighttime  
 host from 1950 to 1972 W. Lee Moore. Moore,  
 82, died in a nursing home in Troy NY. "Because  
 of the station's power, Moore reached a genera-  
 tion of East Coast nocturnal country music  
 fans," said Bill Knowlton, who produces "Blue-  
 grass Ramble" for WCNY-FM \*91.3 Syracuse  
 NY, and who knew Moore over 20 years. Moore's  
 was the only country music program available to  
 many listeners.

USA—ACAMBA, the American Community AM  
 Broadcasters Association, has formed and wants  
 the FCC to license FM translators to relay AM  
 stations, as well as FM's. [See Aug., p. 7, col. 3.]  
 It "is in the process of preparing a petition for  
 rulemaking . . . to establish this," taking the  
 example of AM stations in Alaska being relayed  
 on FM translators. It claims AM stations in the  
 other 49 states are being discriminated against. If  
 the FCC rejects the proposal they plan to "take  
 this matter of discrimination before the U.S.  
 federal courts."

ON St. Catharines CHSC 1220 is "a bad AM  
 assignment [which is close to] WECK 1230  
 Cheektowaga-Buffalo. Perhaps the FCC could give  
 WECK a frequency in the 1610-1700 band. As it  
 stands, the Niagara River separates the stations  
 with high frequency splatter on AM."

### FM Rulemakings Proposed

First date is for filing comments with the FCC; second date is for replies. Stations affected, if any, are listed.

- CT North Canaan 103.3A (from Sharon), WQQQ, or change WQQQ to 102.5A, "show cause/why not?" Oct. 6, 21.  
FL Fort Meade (move from Arcadia) 98.3C2, Sept. 8, 23  
HI Kaunakakai 102.3, Oct. 20, Nov. 4  
ID Hailey 106.7C counterproposal  
IL Glasford (from Canton) 101.1A, Oct. 16, 31  
IA Patterson 105.9A, Oct. 20, Nov. 4  
KS Hutchinson 95.9A, Sept. 15, 30  
KS Lindsborg 101.7C3, Oct. 16, 31  
MI Macon 96.7A, Oct. 20, Nov. 4  
MS New Augusta 101.7A, Oct. 16, 31  
MO Arcadia 101.7A, Sept. 22, Oct. 7  
MO Ironton 95.9C3 for 92.9A, KYLS counterproposal  
MO Malden 92.9C2 for C3, KMAL, counterproposal  
MO Salem 92.9A for 95.9A, KMMC, counterproposal  
NV Indian Springs 102.3C for 99.3A counterproposal  
NY Newport Village (move from Old Forge) 99.7 99.7A, Oct. 6, 21  
NY Rosendale 98.9A for 102.5A, with Sharon CT—or add 98.9A to West Hurley  
NY Walton 97.5A for 92.1A, WDLA-FM, Sept. 14, 30 [96.7A, WXPS, Oct. 16, 31  
NY Willsboro (from Vergennes VT)/  
PA Susquehanna 92.5B1 for A, WKGB, Sept. 15, 30 [A, WCRS-FM, replies Sept. 17  
SC Abbeville (from Greenville) 96.7C3 from/  
SD Ipswich 107.9A, Oct. 20, Nov. 4  
SD Murdo 104.9A, Oct. 20, Nov. 4  
SD Presho (Pierre) 100.3C, Oct. 6, 21  
SD Roscoe 105.3A, Oct. 6, 21  
TX Hamilton 104.9C3, Sept. 29, Oct. 14  
TX Lexington 105.1A, Sept. 29, Oct. 14  
VA Nassawadox 98.3A, Oct. 20, Nov. 4  
WA Winthrop 97.5A, replies Sept. 17  
WV Kenova 97.9A, Oct. 6, 21  
WI Coon Valley 103.9A, Sept. 22, Oct. 7  
WI Hawthorne 106.5A, Oct. 6, 21. But the FCC is making me "demonstrate whether it [Hawthorne] has any commercial establishments, social, economic, cultural or religious organizations, municipal services, or governmental units that identify specifically with that locality."  
WI Superior 106.5A counterproposal to my Hawthorne bid filed by Mark Heller, Pres., WTRWAM [1590], Two Rivers WI. "Superior qualifies as a community for allotment purposes, citing Beech Mountain, North

Carolina. 6 FCC Rcd 5835 (1991). . . There is no major employer if any in the unincorporated area of Hawthorne Wisconsin. . . The Hawthorne proposal should be dropped, without unduly impeding the fair, efficient and equitable distribution of radio service. The counter-proposal to allocate Superior, Wisconsin its third FM radio service serves the public interest and needs."

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AZ Parker 93.9C3, Sept. 2-Oct. 3
- CA Susanville 92.3C2 from 102.1C2, KHJQ
- CA Truckee 101.5A, Sept. 2-Oct. 3.

- WY Centennial 92.7A, Sept. 2-Oct. 3
- WY Glenrock 98.3A, Sept. 8-Oct. 9

**DX Doings—An Occasional Feature**

The morning of Aug. 27 produced reception on a small radio in a 50-story Philadelphia highrise. Russ Edmunds heard the out-of-area stations "on a cheap little GE mono desktop radio I picked up for my office about 15 years ago for \$10, so no one would be likely to steal it. The antenna is simply the power cord, which I have run across the lower part of the window, fortunately, facing south. WRSF and WERX were also heard in the car radio on the way to the office, alerting me to the opening. Never thought I'd be able to DX in the office!"

Some of the stations heard were WERX 102.5 Edenton, WRSF 105.7 Columbia and NGNI 102.7 Wilmington, all NC. From SC: NSYN 106.5 Myrtle Beach, as well as several in VA, MD and DE.

DXing from the Florida panhandle is Pat McCrone, Pensacola, who last spring heard stations from Miami, Tampa, Atlanta, Houston and Corpus Christi, and earlier heard skip from Upper Michigan, Cape Cod, New Mexico and Iowa. "I have a lot of fun playing audio tapes of my 'catches'. It really trips my friends out."

Maryland listeners Hank Holbrook and Tom Rothrock both enjoyed skip. From 5 to 6 p.m. EDT Aug. 12 Holbrook heard KLQP Madison and KRUE Waseca, both 92.1 and in MN, as well as KVSC \*88.1 St. Cloud MN and KNSR \*88.9 Colleagueville MN. "Noted many stations breaking thru on the educational band but I'm sure many went unidentified here."

Rothrock heard skip to AR, MO, IA, SD, and NE the early evening of June 19.

Another person read on the Internet about

the Rembrant 500 antenna at \$25 from Fair Radio Sales in Lima OH; (419) 223-2196. "This is an antenna you mount on a pipe on the roof, bring down the cable to a box with a knob on it, and then hook to your FM radio. In theory, it does away with the need for a rotator, since the switch does the rotating for you by activating different combinations of antenna elements."

**Auctions Forced on Commission as Way To Decide Winning Applicants**

As a way of overcoming the problem of not being able to decide comparative cases involving mutually exclusive applicants for broadcast facilities, Congress has forced the FCC's hand. Buried within recent budget legislation was a requirement that auctions be used to determine winning applicants. That was language Sen. John McCain of Arizona had inserted into the legislation.

The law allows a six month period for applicants to settle among themselves, but only for those who applied before July 1, 1997. Applicants for 102.5A Mableton GA have reportedly come to an agreement because of this provision.

Initial response to the legislation has been favorable among those locked into situations where there would have been hearings, said Gregg P. Skall, communications attorney. The reaction among that group was positive in that they could settle separately, rather seeing their monies going to the government.

"The sad side, however, is that possibly the last significant avenue to ownership for committed and experienced young broadcasters who lack the significant capital required to buy broadcasting properties has now been closed. In that regard," Skall writes, "resorting to the auction process represents yet another step in the seemingly irreversible trend to broadcast properties at all market levels and abandonment of local ownership as public policy."

One broadcaster told me this will probably cut down the number of applicants for new FM stations.

**Small Print Happenings and FM Industry News**

The "Save WDCU" (\*90.1 Washington DC) movement has taken a new focus. Instead of being sold to a subsidiary of WAVA 105.1 Arlington VA and monophonic KMRO \*90.3 Camarillo CA, it will be going to C-SPAN. Sale price will remain \$13 million, and the format is expected to change by Oct. 1 to monophonic public affairs. "There won't be any commercials, and there won't be any auctions and there won't be any on-air pitches for money," said Brian Lamb, a C-SPAN executive. [See story, last month, pp. 5-6.]

Salem didn't want to buck the opposition to the sale and asked C-SPAN if it wanted to buy the contract for the same amount of money it had offered. C-SPAN had been runner-up with a bid of \$10.5 million. This has not satisfied opponents to the sale. "This is not a satisfactory resolution," said Andy Schwartzmann, director of the Media Access Project which opposed the sale.

This is C-SPAN's first entry into radio. It does not anticipate buying other radio stations across the country but would franchise its format to

existing stations.

WDCU was sold by Georgetown University a few years back for one dollar! The 1980 sixth edition "FM Atlas" listed the call letters as WGTB and format as progressive rock, stereo.

A Washington Times editorial, "Save WDCU," ended with the words, "Without Jazz 90, the cultural life of the nation's capital will be badly and sadly diminished. It is not too late to save the station."

Canada's English radio networks are changing

their names. CBC Radio becomes CBC Radio One and CBC Stereo is to become CBC Radio

Two. One notable change is the blurring of national, local and international news. Some long-standing programs are gone. These include *Sunday Morning*, *Gilmour's Albums*, *Double Exposure* and *Radio Canadian Air Force*.

Harold Redekopp, v-p CBC English Radio, said that the new names follow many years' debate about making such a move. The CBC found that listeners were confused about the existing names. The CBC wants to "brand" itself with the public well in advance of digital radio in the next 10 to 20 years. Later with the added capacity of digital radio there might be a CBC Radio Three, Four and so on.

CBC Radio One will go by the added name of "News. And More," while CBC Radio Two will be known by the subtitle, "Classics. And Beyond." Radio One's new program will be "This Morning." It will be hosted by Michael Enright (formerly of "As It Happens") and Avril Benoit. It will be recycled into the evening with a title, "This Morning... Morning... Tonight," in a money-saving move.

A new program on CBC Radio Two is a five hour omnibus of classical music hosted by Shelagh Rogers weekdays from 10 to 3, and a pair of shows hosted by Eric Friesen, who returns to the CBC after more than 20 years with Minnesota Public Radio. Those programs are *The Music Room* (9-10 a.m. weekdays) and *Radio Two Performance, Performance*, featuring CBC-recorded concerts from 7 to 10 p.m. Monday through Thursday.

The move might presage Radio One's embracing stereo, should the new 99.1 Toronto station choose to embrace that technology.

KNXR 97.5 Rochester MN is a commercial station that's acting more and more like a public station. Its newsletter mentions deregulation in the radio industry causing several stations in the same market to have one owner.

"In a time when there is much talk about diversity and choices, just the opposite is happening in the radio business. As you tune across the dial, you've probably noticed that stations seem to be clones of each other," but KNXR presumably is different. "Some of our listeners in Minneapolis and suburbs have been plagued with interference from a translator station from the top of the IDS Building at 97.7 MHz, and, after the FCC ordered this translator station off-the-air, from an illegal 'pirate' station operating at 97.7 MHz from an apartment building on Hennepin Avenue near downtown Minneapolis. Listener complaints to the FCC resulted in the elimination of these two sources

**Redekopp**

*Shelagh Rogers*

**Friesen**

of interference."

Station founder Tom Jones included a pitch for financial help by listeners joining a "KNXR Listeners Club" at \$45 for a membership and coffee mug, along with cassette albums. He told

of an "up-hill battle... educating and convincing some potential advertisers that spending their advertising dollars on KNXR will pay off. Some business people and advertisers remain in the dark or are unwilling to recognize the facts and potential [of] KNXR's mature audience... Try to imagine what life would be without KNXR. Your Listeners' Club membership will help prevent that scenario from happening..."

The FCC has just made life a little easier for short-spaced FM stations. Stations on co- and adjacent channels can move their transmitters or change facilities if they meet these criteria:

- 1) There will be no increase in either the total predicted interference area or the affected population.
- 2) No total increase in interference to any individual station, but interference areas might shift.
- 3) In any new area of interference the applicant must show that there is adequate reception from at least five AM or FM stations.
- 4) Copies of any such application must go to stations affected by the application. This will give the affected station an opportunity to file an informal objection without allowing the objector to hold the station's improvement application "hostage."

Affected are pre-1964 grandfathered FM stations like WBCT 93.7 Grand Rapids MI.

KRTM \*88.9 Temecula CA is—again—notified of an apparent liability for broadcasting advertisements as a public station. This is the second offence, and is the reason for the \$6000 fine. In 1992 it was fined \$5000 (later reduced to \$3500).

Hicks, Muse, Tate and Furst, Inc. is to buy SFX Broadcasting for \$1.2 billion in cash and \$900,000 in assumed debt. It will become the nation's third largest radio broadcaster with 314 stations in 79 markets. SFX will have contributed 79 stations to the total. Hicks Muse uses the name of Capstar to identify its radio operations. SFX Broadcasting, headed by Robert Sillerman, was the nation's seventh-largest broadcaster, with stations in Tacoma, Nashville, Jacksonville, and several in New England.

Sillerman will be left heading up SFX Entertainment, which owns, operates or leases 20 concert venues in five states. Jacor dropped out of the bidding for SFX, leading to speculation Jacor will bid for American Radio Systems based in Boston. ARS is the fifth-largest station group. Jacor, meanwhile, is buying its third FM in the St. Louis market—Class A WCBW 104.9 Columbia IL—for \$13 million. Jacor may "un-convert" it from religion.

Saga Communications is paying \$3.3 million to convert WQLL 96.5 Bedford NH to ownership from being in an LMA. Ed Christian's Saga Communications also owns WZID 95.7-AM Manchester. Not a bad price for a station that hasn't been on the air very long. Saga's WNOR-FM 98.7 Norfolk/WAFX 106.9 Suffolk fined \$15,000 for EEO problems. FCC claims licensee didn't track the race or gender of applications until near the end of the license term, even though they made a certain number of minority hires.

The National Federation of Community Broadcasters reminds that there are no longer operator licenses. "The FCC no longer requires them for board operators or chief engineers. And the FCC is no longer issuing them. You may want to issue your own... Noncommercial stations are not required to keep letters from listeners in the public file. It is generally recommended that you

not keep anything in the public file that is not required."

WFBE 95.1 Flint's sale not going overly smoothly (see last month, p. 3, col. 3). The Committee to Save Local Radio has persuaded a judge that the sale process was faulty—that it didn't comply with the school's open meeting policy. So the board intends to repeat the process to make every thing legal, and hopefully be able to sell the station to Liggett Broadcasting.

Claritin only on TV? Not for long most likely, since the FDA has relaxed its ancient rule that prescription drugs cannot be on TV—and radio. Now the FDA is allowing stations to include a toll-free number to provide full disclosure.

WKLS 96.1 Atlanta has settled with Richard Jewell, the security guard it described as an "evil, sinister person." WKLS also erected about 100 billboards with a Jewell likeness and the word, "Freebird," which had a criminal connotation, implying that he had been a "jailbird." Terms of the out-of-court settlement were not disclosed.

Pres. Clinton has nominated Bill Kennard, 40, to be Read Hundt's successor as chairperson of the FCC. If confirmed, Kennard would be the first black FCC chair. Michael Powell, son of Gen. Colin Powell, would get a Republican-designated seat on the Commission. Kennard's nomination might not be smooth.

Sen. Jesse Helms (R-NC) might block the nomination because of an FCC action that forced WZLS 96.5 Biltmore Forest NC off the air in favor of rival WZRQ. WZLS was locally owned, while WZRQ has out-of-state owners (July, p. 5, col. 3).

A champion of death-row inmate Mumia Abu-Jamal (June, p. 8, col. 2) is University of Massachusetts professor Martin Espada. He is a poet who is fighting National Public Radio. NPR commissioned Espada to write a poem last April, then refused to broadcast it. The poem, "Another Nameless Prostitute Says the Man Is Innocent," is about Abu-Jamal. The network said Espada was trying to use the air time to advocate for Abu-Jamal. But the 39-year-old Espada has charged censorship and cowardice, and is speaking out in hopes NPR's decision will be overturned.

Seven pirates were discovered in Milwaukee recently, and going to work against them was a group of commercial stations—the Milwaukee Area Broadcasters Association. Twenty stations signed a letter that got the quick attention of the FCC office in Chicago. "A group letter is very unusual," said Mike Moffitt, FCC district director. "I haven't seen that before."

The FCC then went to Milwaukee where it identified some of the pirates and sent them warning letters. The pirates were all broadcasting from the same part of south Milwaukee between 93.0 to 99.9 mhz. Powers ranged from 1 to 100 watts. Heritage Media Chief Engineer LeRoy Wolniakowski tracked them down with the help of a neighborhood resident who wanted them shut down. "You could drive down the street and see their antennas on their rooftops. One had an FM dipole; another had a whip antenna," said Wolniakowski. All but two were believed to have quit, but they've been known to "migrate."

Nobody but the FCC and Christian broadcasters seem to care—care about what? Why, lottery issues, of course! The loser was KRCY 105.9 Kingman AZ. The FCC has just denied it reconsideration of its petition to reduce a \$3500 fine that was imposed for violating anti-lottery provisions of the FCC rules. The M Street Journal says "It's a bellwether case because it signals that the FCC will continue to take a hard line on gaming issues."

The latest FCC "rate card" is out. It lists in detail the kinds of fines a broadcaster can "earn." Fines range from \$10,000 for operating without a license or violation of public file rules down to \$1000 for failure to provide station ID. Fraud, by wire, radio or television, would only cost you \$5,000. But Howard Stern fans watch this one—Transmission of indecent/obscene materials \$7000. This is a reduction of past fines against Infinity Broadcasting, which were closer to \$2 million for a series of them, Stern, incidentally,

just generated more fines for his employer—Westinghouse/CBS. For airing offensive material on WXRK 92.3 New York (in addition to WBZU 106.5 Richmond, WEZB 97.1 New Orleans) the fine is \$6000. That is in line with the new FCC "rate card." CBS/Group W had the usual 30 days to appeal.

Stern affiliate WBUZ 106.5 Delta-Toledo OH is suing the syndicator and alleges it's lost listeners to more recent affiliate WKRK-FM 97.1 Detroit, owned by CBS. The suit seeks unspecified damages and the right to drop the show, or have WKRK-FM drop it (which is unlikely). WBUZ's problem is it is a Class A trying to rim-shot Toledo.

Good news to FM translator operators near the U.S.-Canada border—many may be able to increase to 250 watts. This the result of joint agreement designed to "permit added flexibility" in the translator service. It also increases the 34 dBu contour from 32 kilometers to as much as 60 km. There will not be a need to get the other country's concurrence where the 34 dBu contour does not extend beyond the border. Class A stations near the border will also find it easier to increase from 3 to 6 kw. The FCC says "Many translators within 320 km of the border can now realize the maximum service for translators permitted under the FCC rules." It claims the agreement will more efficiently utilize the spectrum. Applicants can get an early start: "Pending the modification of the pertinent FCC rules, applications which seek facilities that comply with the terms of the revised criteria will be considered acceptable."

From the classifieds: FM transmitter Gates/Harris FM-10K, with FX-15 exciter. On low end of band, can retune and install. Was making 10 kw when replaced last year. Don Roden, Huntsville AL, (205) 539-8411.

Looking for Gates 10 kw FM transmitter tuned close to 95.3. Charles Lutz, WGMO 95.3-AM, PO Box 190, Shell Lake WI 54871.

Nonprofit community station seeks donations for production room upgrades, receipt available. D. Chaos, KNON \*89.3, 4414 San Jacinto, Dallas TX 75204; (214) 828-9500.

FM FORUM

CONTRIBUTIONS FROM READERS

Kris Roenigk of Oshawa: "I was saddened to read that Larry Wilson of CHUM-FM had passed away (Mar. p. 8, col. 1). I really enjoyed his evening show. Not too long after he left, CHUM-FM went from rp to mr. I haven't listened to them in years."

Hoard Stern's show is on WRQC 100.3 Minneapolis—a station that has FAXed rate information and wants me to advertise on it. WRQC has jumped in the morning ratings, and Stern helped the station (with the call letters then being WBOB-FM) achieve third place after only one month of being on.

Columnist William Safire wrote, July 23, that "the broadcast media's use of their power to protect themselves from competition and to enrich themselves at public expense is an abuse of power." In talking about TV stations getting free use of the digital spectrum, he makes a point that might be applicable to FM radio.

This concludes the largest FMedia! ever produced. The news continues to pile up, with a lot more to be saved for next month. I had hoped earlier deadlines would help, but there is no stopping the FM industry and all the good readers who contribute news. I'm also dabbling in the Internet, with the FCC Home Page on the computer's list of "Favorite Places." Send e-mails to the address on the masthead.

Until October *Bruce F. Edinger*

calls. See last month, p. 5, col. 2.  
PA Hollidaysburg 104.9 WMXV (WHPA), "Mix 104.9"

PA Philadelphia 95.7 WXXM (WFLN), r, "Max 95.7," with ads but with no personalities.

"It's some kind of rock. I can't classify it, nor can my young nephews. It's a rock machine [with] no announcers. The classical has left for half time on WRTI \*90.1, 12 hours a day, with jazz the other half." On Sept. 5 Philadelphia's only classical music station ended 50 years with that format. "Listeners were confused and angry and called the station to voice their dismay [with] over 1,000 calls in three days," said an unnamed receptionist quoted in the Philadelphia Inquirer. WFLN was a victim of the pressure for greater corporate profits. The \$5 million or so it generated in revenues was hardly enough to justify the \$41.8 million Greater Media paid for it. "I like to be able to turn on jazz when I want jazz and turn on classical when I want classical," said James H. Straw, a Philadelphia architect, who started listening to WFLN in 1971. "It has to do with what you're doing, what mood you're in, whether you want something quiet or bouncy in your environment. It's unbelievable that a city of our size and culture can't support both."

In response to WFLN's demise, WWFM \*89.1 Trenton with translator in Philadelphia on 107.9 has increased to 24 hours a day, carrying the Beethoven Satellite Network from Chicago overnight. It is hoping to add another FM station 32 km outside Philadelphia, and "had hoped to persuade Haverford High School—which owns the 107.9 FM signal on the Main Line (WHHS)—to sell it or work out a mutually beneficial arrangement with WWFM." That "would be the golden door and there are benefits," said WWFM general manager Walt Gradzki. "But unless there's a lot more community support [for the idea] that option is dead."

WCRB 102.5 Waltham-Boston would like to increase its station holdings nationally, and Cynthia Scullin, its president, would like to start in Philadelphia. She would like to persuade one of the group owners to sell a station which would be classical. [For another option, refer to "SAP/SCServices" below to see what Saul Levine has (or had) in mind for Philadelphia.]

WFLN had five owners during the last 18 months, and the price kept going higher with each new transaction. WRTI's jazz audience had been declining because of WJZ "Smooth Jazz 106" Philadelphia.

One former WFLN advertiser who isn't remaining on 95.7 is Cunningham Piano, which had been a strong supporter of WFLN "because we wanted to push classical music," said sales manager Richard Galassini. WFLN was the favorite advertising vehicle for Hendrixson Furniture in Furlong, Bucks County. "We did usually four campaigns a year for our sales," and spent \$6000 to \$10000 a year. AIA Bookstore in Philadelphia spent about \$9000 a year with WFLN, "and it was worth every penny," but won't be returning to "Max 95.7." But Electric Factory Concerts wanted to be the first advertiser on the "Max" when it displaced WFLN.

Writing to the Inquirer were Greg Ryan, Media: "A poor corporate citizen like Greater Media, Inc. deserves the blame for the resulting impoverishment of the Philadelphia area's cultural life." Kile Smith, Philadelphia: "It [Greater Media] knew that WFLN with classical music already made a profit and it knew that with tinkering, the station could make even more. But now we know what Greater Media already

knew—that the station must make more and more. It must make the most before we can be satisfied." Sal Hepatica, West Creek: "Restoration of the antitrafficking rule would stop the wild speculation that is inflating the station prices and freezing minorities and small businesses out of the broadcasting industry. Restoration of the multiple ownership rules, along with a requirement that the large group owners divest all properties exceeding the limit would assure a diversity of radio voices in each community."

"This has been the busiest 2 months I can remember in terms of changes around here—from Allentown area to Philadelphia, to Delaware—wonder what's next?" R.E. via e-mail.

 TM Martinez de la Torre XEHU-FM 104.5 Monophonic

AR Huntsville KREB 99.5, t, sports, remove \$ listing  
 CT South Kent WGSK \*90.1 still mono  
 CT Torrington WAPJ \*89.9 rc, relaying WMNR 88.1 Monroe noon to 4 p.m. From 4 to 8 p.m. they do their own thing, and then they relay John Ramsey's WWHU 91.3 West Hartford. Signal is bad in downtown Torrington, so is applying for a 200 watt h,v translator on 107.7, which will have more power than the main station. "WDRG AM is still on the 67 kHz of WDRG-FM" 102.9 Hartford.  
 DC Washington WCSP \*90.1 going mono talk, after being silent in early October, with C-SPAN taking over. Has vestiges of stereo. Most of the programming will be a duplication of C-SPAN's national audio feed. Marc Fisher of the Washington Post thought much of the jazz programming formerly on WDCU could be heard if only WETA \*90.9 and WAMU \*88.5 would reduce the number of hours each station repeats the daily feeds of "Morning Edition" and "All Things Considered."

A protest by three musicians in front of C-SPAN headquarters entertained passersby. "While it may have been the most peaceful and pleasant demonstration ever in the nation's capital, the musicians and station supporters are serious in their efforts to keep the only station in the area featuring traditional jazz."

The FCC, meanwhile, has quietly awarded the station transfer to C-SPAN, having rejected about 75 letters from "Jazz 90" listeners. It found that C-SPAN, while not an educational institution, is qualified to hold the license. It also ruled that the University of the District of Columbia is entitled to make a "profit" on the sale, saying, "We find no basis for precluding an NCE licensee from maximizing profits on the sale of its stations unless there is evidence that the receipt of such profits would affect the licensee's nonprofit status."

FL Clermont WLAZ \*88.7. "Mono. It's Spanish, and I can't understand anything on it, except the music sounds popular."  
 NY Port Henry WMNM 92.1, t, simulcasting WSYB 1380 AM Rutland VT, probably received by SCS. "I don't know if this is permanent. It's mono and sounds like an AM on FM, format is news/talk. WSYB is the AM side of WZRT 97.1, so some other format may be in the works."

### On Air—Real Stations and Pirates (Selected)

AZ Apache Junction "KRAJ" 88.9 on with 1 watt, 24 hours as "Radio AJ" and "The Rage," playing hits of the '80s. "Apache Junction's only licensed station broadcasts in Spanish, and he feels he's filling a void. He gives his phone number" as (602) 288-7960, and claims Phoenix has a similar station, "Radio Carolyn," at 89.9.  
 CA Davis KDVS \*90.3, with more power than the 30 watts they had for several months, "but still weak." Estimated only a few hundred watts, but registers stereo in West Sacramento "and banish the KAWZ Tahoe translator from that town." Returned after a fire, but "not a sign of the much closer KUSF (\*90.3) San Francisco."  
 CA Fort Bragg KLLK-FM 96.7, not yet having moved to Willits 93.5. "Your reporter should have waited for a station ID, or tested 96.7 to see if KLLK-FM was still there. It is... KWNE has translators on 93.5 in Willits, Lakeport and Fort Bragg, which are still operating, and one of those is what the reporter heard! And I heard KJZY 93.7 Sebastopol referred to as 'Jazzy 93.7' since Labor Day. Perhaps they vary their unID usage depending on the DJ's whim." KLLK-FM is not parallel to KWNE 94.5 Ukiah.  
 GA Roswell WTHA 107.5 has been heard testing in stereo with no announcing. "It played its own music, separate from WHTA 97.5 Fayetteville." A "big kickoff is planned for the official launching at a yet undetermined date. But station owners are testing the signal periodically and listeners might be able to catch it during a trial run." [lousy signal."  
 IL Monee WGNR \*88.9, but "still had a/ IN Indianapolis "WCER" 88.1 claims 3000 watts, "Cutting Edge Radio" launched in July. Plays local artists and "hardcore, punk, ska, rockabilly and... alternative/modern rock," 8306 S. Union St., Indianapolis IN 46227.  
 MA Boston WGBH \*89.7 "The World" 4-5 p.m., along with 110 other stations carrying this PRI-distributed program. In Boston the loosely-put-together show has lost ratings over what the previous Ron Della Chiesa's popular "Music-America" had. "The World" was billed as the largest public launch since "Morning Edition," but has been discounted and probably not

making money. A review in the "Boston Globe" makes it appear to be monophonic talk, put together by second-string personnel mostly in foreign countries.

MI Wyoming WYCE \*88.1 won the support of the Wyoming Zoning Board to build a new tower (last month, p. 6, col. 1). But it will cost "at least \$40,000 more," because the board wants it to build a 61-m tower which is a "monopole" design with less visual impact on neighbors, because it would look like a needle rising from the ground.  
 NM Des Moines K291AD \*106.1 "has excellent coverage—almost from Boise City OK to Springer NM; in fact, it was my only source for NPR 'Weekend Edition' at least on car radio when in Guymon OK, an hour not carried by KANZ." NM Santa Rosa K220BH \*91.9, but KAWP 95.9 there is off.

NY Manhattan (upper) "WBAR" 87.9, now in its fifth year from Barnard College, on 8 a.m. to 4 p.m. 7 days a week "with a staff of 150. Intended to be heard only on the Barnard/Columbia campus which is on Broadway from 114th to 120th streets."

NY Syracuse area—two malls claim stations. Shoppingtown Mall, De Witt, is on 87.9, while Carousel Mall, Syracuse, has "WCRL" on 94.1. Both are mono, "one watt or less," using a continuous tape loop.

NY Wellsville "91.7 FM" on an irregular schedule, affiliated with 100.9 'Black Swan Radio' Rochester NY. "I am thinking of adding an SCS MPX generator to one of my FM transmitters. Pan-Com International had such a kit (no longer available) for their excellent Panaxis FM transmitters. There's a group of us in the USA and New Zealand that have Part 15 AM/FM stereo transmitters. . . Your FM Atlas books are indeed a source of vital information to me. . . Congrats on your article in Popular Communications! . . . Please continue your observations in the FM Atlas—FMusings, etc. I share those views. Lord bless," P.S., Wellsville NY.

NC Wake Forest 91.1—a mono/automated station with 85 watt h.v; 28 m, recorded scripture from CDs. Repeats every 27 hours. Heard about 10 km in the home, 32 km in cars.

NC Winston-Salem WTQR 104.1 won an award for Best Personalities in morning drive from the Country Music Association in Nashville. The people are Paul Anderson and Aunt Eloise. WTQR won in the large market category. "It's a local station here in Reidsville."

OH Jefferson WCWJ \*90.9 on with 1850 h.v; 196 m, "a full-gospel, nondenominational, nonprofit ministry, (216) 294-3854."

OH West Chester-Liberty Township (not the "Liberty" OH west of Dayton).

"Spry Lavn Care looks like a typical, pseudo-rural, farm based landscaping business. However, a tour of Bill Spry's basement reveals a hidden, yet very public, operation. Spry operates Free Radio 105.5 from his Liberty Township home. Spry says he is a microbroadcaster. The FCC says he... is a pirate." It is on with 95 watts 24 hours a day, with a 46 m tower sprouting out of Spry's field. "Many stations broadcasting on 2000 or 3000 watts are given 6000 watts of broadcast space. These stations, usually located in smaller communities where long-range broadcasts are costly and unnecessary, do not fill their allotted airspace. It is this unfilled space that microbroadcasters such as Spry use. . . Spry calls the 6000 watt standard 'overkill' . . . Commercial stations in Washington Court House (WCHO) and Sidney (WMVR-FM) also use the 105.5 frequency. The chance of Free Radio 105.5 overlapping with those stations is minimal, but Spry directs his signal south as a precaution." Coverage to the north ends at Middletown. Volunteers, mostly teens, work in the basement studio as well. The station programs Christian rock from a computer. "It's something that really isn't heard that much in this area."

OR Astoria KMUN \*91.9 thrives on listener support, and "bucking the trend of special-

ized radio and will continue to provide an entertaining, enlightening and diverse radio experience." This is unlike the experience of nearby KOPB-FM Portland (last month, p. 5).

PA Philadelphia "WZXI" 95.3 "is still there, just not coming on until noon or so on Saturdays."

VT Lynden WGMT 97.7, having moved from 98.3. Another six-weeks' delay and Burke Mountain would have been snow covered.

WA Mount Vernon KSVR \*90.1 still \$, Ir, with most programming in Spanish. It is 1Ded on the hour with KSJV \*91.5 Fresno CA and "a long list of stations which included KSVR. Remainder of programming time on KSVR continues to be student-run modern rock."

BC Victoria 88.7 \$, no announcing. Heard playing a 10-minute tape loop of music fragments, "possibly testing signal. . . Seems to be coming from Sidney (north of Victoria) or it might have been the previously reported 88.9 pirate from the south end of Salt Spring Island trying a new frequency."

PQ Montreal CHOM 97.7 has had at least six advertisers quit after Howard Stern came on board. They include Bell Mobility, Bell Canada and Adventure Electronique. They left to protest what one executive called Stern's "filthy, contemptuous and racist language." A reader wrote: "It is interesting that it did not take long for advertisers to start to abandon CHOM as punishment for importing crap from this 'ugly American'. . . As a rock station in Montreal, CHOM is desperate to get out of the cellar in ratings. . . Similar to slipping rock stations in Toronto, such as Q-107." Written comments against Stern have been pouring in to the CRTC. Those comments have been passed on to the Canadian Broadcast Standards Council (CBSC), which represents 400 private radio and TV stations in Canada. "It is clear that Canadians are concerned in very great numbers, and we must respond with the greatest possible speed," Ronald Cohen, CBSC president said. Should the CBSC find Stern's show violates an industry code on human rights, the stations would be forced to air warnings during peak listening hours. CHOM was not Stern's first foreign station; he had been on XETRA-FM 91.1 Tijuana BN.

JAMAICA—The government has privatized parts of the JBC service with the sale of the FM stereo service, JBC2 and JBC-TV to Radio Jamaica Ltd. (RJR). RJR operates RJR AM and FM stations, as well as Fame FM. "The sale price of US \$2 million will help revamp the mono predominantly AM service, JBC1, which the government will retain. . . JBC1 will continue to be commercial and will dump its phone-in talk shows and partisan political programming for an arts/cultural/educational service not unlike NPR. . . JBC began in the late 1950s [but] degenerated to the sensationalist talk and partisan politics now dominant. Meanwhile, RJR is gearing up some programming changes for JBC2 which include more music and less talk. . . RJR is currently undertaking expansion of its studio facilities including digital audio and other state-of-the-art production facilities."

FRANCE—Paris area: Nostalgie 90.4 popular, Cherie FM 91.3 popular, Fire et Chansons 97.4 popular and comedy, CFM 99.9 popular, Europe 2 103.5 popular, Europe 1 104.7 is not news, mono (Aug., p. 3, col. 3), but has popular music.

**Off Air—Or Not Yet On**

CA Manteca KVFX 96.7 "due to sabotage. . . since 8/19."

FL Lutz—Arthur and Cheryl Kobres' pirate station from Lake Shore Dr., which was on various frequencies, 87.9 to 107.9.

IL Crete WYAA 102.3, and not yet taken over by WYCA-WYBA.

ME Lincoln WHMX \*105.7: "I was fairly easily able to hear WHMX a year or two ago in its 'former life'."

MA Nantucket WNAN \*91.1 and a new station on Martha's Vineyard on 90.1 will have as a

partner WGBH \*89.7 Boston, with funding and staff help. Programming supposedly will not duplicate. "The new station will be totally separate and programmed specifically for listeners of the Cape and Islands," said Leah Hollenberger from WGBH. Some programming will also come from WBUR \*90.9 Boston. WNAN, at least, is expected to sign on next summer.

MI Charlotte WMMO 92.7 reported silent.

MN Minneapolis K242AI \*96.3. WNCB 89.3 Duluth is "frustrated over the FCC taking its time to act on its application to return 97.7 to the air." Severe interference to KARP 96.3 Glencoe occurred in the western part of Minneapolis and suburbs.

NJ Freehold Township WRLJ \*89.7, but should be back on by the end of this month with the same o format. It had been off the air since July. The FCC busted a 104.7 station in Howell NJ in September that was related to WRLJ's hiatus.

"WRLJ went off the air on July 28 rather abruptly (I was listening at the time). Then, on Sept. 5, a front page article in our local paper caught my attention. A pirate station was busted in Howell NJ, which was run by the program director of WRLJ [one Salvatore DeRogatis] (who used the name 'Sal Anthony' on the air). He dismantled WRLJ's transmitter and started a pirate station on 104.7 on Aug. 1. The format was oldies and it used the call letters WZVU, which were the calls of an ex-oldies station on 107.1 in Long Branch NJ. He was running 1200 watts, and on 24 hours a day, using volunteer DJs, and also running commercials from 10 local businesses. . . The FCC ultimately received complaints from WRDR 104.9 Egg Harbor NJ because the pirate station was causing interference to their station. . . There's also speculation that WRLJ was never licensed to be on the air, even though they came on last November, 1996." The FCC still lists WRLJ as being a construction permit. The fake WZVU used a fire station building for its antenna.

NM Santa Fe K244CX 96.7. Was licensed, now a construction permit. Expected to return to the air. [move from Ada.

OK Newcastle KTLS 93.3—making the/ ARGENTIA—low power community FMs at 98.5 and 98.1 were shut down after being on nine years with a provisional permit. "This permit is a legal and valid document possessed by all low power radio stations." Ernesto Arrieta, director of FM Business (98.5) was handcuffed and had a gun pointed at him. The police chief in charge of the break-ins claimed they were going to "clean up" 160 radio stations in a 150 km radius of where the break-ins occurred. The owner of FM News at 98.3 claimed interference. FM News was granted a license only after journalist Daniel Haddad used contacts he had in the government to get the license for himself. Previously, Haddad had offered to buy the municipal radio station of the Buenos Aires government, but the plan was dropped after protests were lodged to the proposed transfer. [From the NFCB's "Community Radio News," Oct.]

Broadcasting in Argentina is "predominately AM radio stations. FM stations are not regulated; many unlicensed stations operate on unauthorized frequencies," according to a report in "Religious Broadcasting" magazine.

**Deletions**

CA Victorville K244DR 96.7—because of deletion of primary.

OR Beaverton K251AD 98.1, not needed now that KUPL-FM Portland has moved to 98.7, with transmitter "just above Beaverton."

**FMistakes—FM Atlas-17, FMedia!**

AL Alexander City WSTH 106.1 was "Kix 106" (not "Mix 106"), Sept. p. 9, col. 1.

AL Jasper WOWC 102.5 Wow Country (not

"New Country"), Sept. p. 8, col. 1.

CA Double Mountain \*91.7 is K219AO, not "K219AD," Sept. p. 2, col. 3.

CA Fairfield \*91.5 calls are KASK, not "KAZK," Sept. p. 6, col. 3. The KLVC Magalia translator is not illegal. It is really K218CC Leisure Town CA at 38-23-32; 122-05-46 with 10 watts h.v. "We could not get a reliable KLVV (91.9 Santa Rosa) signal so changed to KLVC (88.3 Magalia). This may not be one of our longer-lived translators. We are aware of the Fairfield CP."

CA Morro Bay 94.1 KBZK—its old calls were KAGR, not "KABR," Sept. p. 1, col. 3.

CA Shafter KGZO \*90.9 "Radio Nueva Vida" means new (not "good") life, Sept. p. 4, col. 2.

GA Atlanta, northeast (not "Northeast Atlanta")—William Tullis' application for a WABE \*90.1 translator (Sept. p. 10, col. 1). Atlanta addresses are given as "N.E.," "N.W.," etc. "It's simply an indication of what quadrant of the city an address is in, which can be very helpful given our often confusing street layout." [97.7, Sept., p. 7, col. 1.

GA Eatonton (not "Eatontown") WMGZ/ I.—address of Mark Strickert—he's the airchecks provider—was wrong, Aug. p. 8, col. 1. It is 300 South Beau Dr., No. 1, Des Plaines IL 60016.

MD Hurlock WAAI 100.9 is not moving to 100.5. Wording shouldn't have been "Not moving to 100.9," Sept. p. 2, col. 3. But FCC shows it as having a CP for 100.5 dated 8-20-97, which I tend to disbelieve. [p. 2, col. 1.

NM Taos KHYF 99.9—town misspelled, Sept./ NY Queens (heard in) DX from MO and IA was from 5 to 6 p.m. (not 5-8 p.m.), Aug. 12, Sept. p. 8, col. 3. "The same time as the two MD DXers were getting MN, p. 11, col. 1."

OH Akron (not "Dayton") WONE-FM 97.5, Sept. p. 5, col. 1.

TN Walden (under, Sept. 7, col. 3) W278AB (not "W278AC") 103.5 is in Durham NC.

TX Amarillo K235AL \*94.9 is to have KANZ 91.1 Garden City KS (not KAWZ 89.9 Twin Falls ID), Sept. p. 1, col. 2. "That would bring NPR to that God-forsaken city for the first time, thanks to the stupidity of Amarillo College in allowing KACV \*89.9 to be a student rocker, not a public radio station. Amarillo is quite a distance from Garden City." [not KAWZ, Sept. p. 1, col. 2.

TX Washburn K217CS \*91.3 to have KANZ./ WA Hoquiam 95.3 is KGHO-FM, not "KGHO-FMN," Sept. p. 3, col. 2.

ON Kitchener CKWR \*98.5—the \* missing, Sept. p. 3, col. 2.

PQ Plessisville 95.7 new calls are CKYQ, not "CKTL," Sept. p. 8, col. 1.

YT Tagish VF2128 90.5 is 1v, not "1V," p. 172. "The September FMedial was great! I really appreciate your 'going the extra mile' (1.6 kilometers?) to put out the 12-page issue!" P.B., Spring Lake MI.

**SAP/SCServices, 57-92 kHz**

*Symbols are as in the "F! Atlas"*

CA Huntington Beach KOCE"-TV" \*50's SAP is Minnesota's Radio Talking Book for the blind. [al audio, replacing TC (KHOW AM).

CO Denver KH IH 95.7 tS, cueing with occasion-/ KOSI 101.1 no tM, 67, KXKL 105.1 continues with tM, 67, but "nothing really exciting on subcarriers in Denver."

DC Washington WAMU \*88.5 drops t(). Now keeps \$ pilot on, even for mono shows.

GA Gainesville WFOX 97.1 no SCS, no t(). Recently tested tW, 67, NOAA weather, "but all is quiet now."

GA Toccoa Falls WRAF \*90.9 tB, 67 (USA Radio Network); no t().

MA Haverhill WXRV 92.5 tQ, Greek, 67, same as on WH RB 95.3 Cambridge's 92.

MN Duluth KKCB 105.1 tC, relay of WEBC (AM) on 67 kHz. It is for relaying Lew Latto's talk show to Latto's WEVE (AM) Eveleth MN. Pick up of the AM station at the KKCB transmitter will be by a G-E Superadio I am providing. WEBC 560's transmitter is at Parkland, outside Superior WI, while the KKCB transmitter is on the Duluth hill, overlooking downtown and Lake Superior.

MN Minneapolis KLGT 23's SAP since August is a Hmong service. On officially 8 a.m. to 4 p.m., but usually it is on 7 a.m. to 5:30 or 6 p.m. "We could go 24 hours if we had the resources. But the Hmong community doesn't support it for advertising. We only want \$210/month for a 30-minute program length ad once a week. Is a 30% commission too little for an ad salesperson? We need someone to sell ads for us!" Uses a VCR for five hours of audio at a time. "Chalee does the programming. I don't speak Hmong!" says Grover Sanders, founder.

OH Dayton WPDY \*16 has the radio reading service, shared with DVS (descriptive video services). The same reading service is on the 67 kHz of WQRP \*88.1 West Carrollton OH.

PA Easton WODE 99.9 still has tT, 67 for the blind. But "everytime there's a new manager at WODE, they threaten to take the reading service off. We got a 10-year contract at no charge to us, and WODE always asks us to FAX a copy of the contract, because they never seem able to find it."

PA Philadelphia WTGI 61 supposedly will relay KKGO-FM 105.1 Los Angeles CA via satellite in wake of WXXM 95.7's quitting the classical format. [See "Call Letters," above.] After a month of carrying the L.A. signal the station would begin local programming and advertising. "The idea is to get a foothold in the market while the station looks for an available radio signal." I spoke to Saul Levine of KKGO-FM, and he seemed mildly enthused about converting a Radio Shack 12-604 with UHF TV audio to receive SAP, but thought demand could go into the thousands. The 12-604 is being discontinued.

RI Providence WWBB 101.5 tQ, 67, same as on Haverhill MA's 67.

VA Hampton WWDE 101.3 t(), RDS

### NonIDs, Not Just Slogans

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour, as required by the FCC and Industry Canada (at or near top of hour)*

### Selected AM Happenings

CA Stockton KWG 1230 had been Spanish, "La Bonita," now relaying KQOD 101.1 there. "Oldies 100" superimposes a quick "KWG Stockton" over the music just after the hour, shortly before Oldies 100 gives its legal ID. CA Yucca Valley KYVV 1420 had its license renewal returned for failure to pay the fee. It is a silent station.

CO Buena Vista KDMN 1450 returns to air; talk. CO Vail KSKE 610 had been silent; now talk, parallel to Buena Vista.

CT Torrington WSNR 610 "went bankrupt" and was silent. Came back on, relaying WDRS 1360 AM Hartford, probably getting the signal from SCS (see above, "Monophonic").

CT Westport WMMM 1260—going to Sacred Heart University, owner of WSHU \*91.1 Fairfield. Temporarily silent.

DC market—Capitol Kids Radio is selling its two area stations to Mega Broadcasting. They are WKDL 1050 Silver Spring MD and WKDV 1460 Manassas VA. "We did the best we could for five years," with no plans to replace the formats with other kids' programming.

ME Greenbush (town off) WVHA shortwave leaves the air. It had not paid its electricity bill, its taxes or its legal bills. It bought the shortwave transmitter for \$5 million, and had been making payments. Its mailing list was only 10,000 people, and it was disdained by the mainstream Seventh-day Adventist Church, a more liberal body than the "historic" Seventh-day Adventist Church, founded by John Osborne of Orlando FL, who did "Prophecy Countdown" on the Trinity network. Three fulltime and one parttime employees were let go. "A security company has patrolled the site since." It was foreclosed upon by Finova Capital Corp. of New Jersey. In a statement, WVHA officials "acknowledged they had been having financial problems since May, 1995, and thanked Finova for not foreclosing earlier."

MA Hibernia WPZE 1260 takes on Radio Disney. It had an ill-fated children's program in the KidStar network, which went bankrupt. It was heard locally on WMFT AM (frequency not available).

MO Kansas City 710 becomes KCMO with talk, while 810 becomes WHB with country and farm—swapping frequencies.

NY Mount Kisco WVIP 1310 silent. Initially was taken off the air because of "a devastating fire," but managed to return for a couple of days. "It's now silent, as employees wait to see what owner Martin Stone decides to do with the station." Stone, 82, was briefly hospitalized after the fire, according to the "M Street Journal." WVIP would have been 41 years old this month. NY Riverhead WRHD 1570 had been silent. Returns with rock, parallel to WRCN 103.9. It has an LMA with WRCN.

NY Troy WHAZ 1330 has a long history, dating to when it was a noncommercial station owned by Rensselaer Polytechnic Institute in 1922. For decades it shared time with what is now WWRV 1330 New York city and the former Jehovah's Witnesses' WBBR in Brooklyn. WHAZ finally got a directional antenna with lower power at night, eliminating the sharetime. It has been contemporary Christian since 1967, and is owned by Paul F. Lotters. It has expanded to include WMYZ 97.3 Schoharie-WBAR-FM 94.7 Lake Luzerne and has just bought WMLV 104.1 Rupert VT. Buying the stations was seen as a way "to get the word of the Lord out."

OK Holdenville KRAF 1370 had been silent; now on with AC, parallel to KKNZ 106.5 Holdenville. [now classic country.]

OR Reedsport KDUN 1030 had been silent; TN Brentwood WHEW 560 on air, replacing WYOR, which was silent. WHEW is sports.

TN Franklin WHEW 1380 silent. "An LMA-to-

### Multi-City IDs in Use

CA Copperopolis KRVR 105.5 with Modesto-Stockton, and being relayed by KCDR 1390 Turlock. KCDR had been Spanish, parallel to KWG 1230 Stockton (see "Selected AM Happenings," below).

CA Stockton KSTN-FM 107.3 with Modesto-Sacramento.

CA Tracy-Stockton KMIX 100.9 adds Modesto. ID in English finally heard, "after I've listened at least a dozen times before, during and after the hour (as much as 10 minutes on either side of the hour)."

OR Lincoln City KSND 95.1 with Newport "That was quite an impressive FMedia! last month (12 pages!), but I see you have quietly raised the subscription price as well to \$75.00 (ouch!). The new masthead has a clean, professional look, but the FMedia! logo

buy failed to close."  
 TX Gilmer KBNB 1060 had been silent. Now on with CNN Headline News.  
 TX Seymour KSEY 1230 is "quite successful" with Spanish. Because of excellent ground conductivity, it gets out 240 km days, 80 km at night. KSEY-FM is still on 94.3, but should go to 93.9 "before the end of the year. It's not stereo. I have to work on the exciter. We will have a new exciter after we change frequencies, and will be stereo. When the old exciter is pulled from service, I can work on that and then sell it. FMedia! is my favorite publication. Radio Ink doesn't pay attention to small markets. Your publication covers all the markets far and near, including microbroadcasters," M.A., owner.  
 TX Wichita Falls KWFT 990 silent. It is about to begin a migration to Farmersville TX, and to serve Dallas-Fort Worth. [on with talk.  
 UT Murray KWUN 1230 had been silent; now VA Claremont WVNS 670 now on with all news. "Theirsister station is WVNZ 990 in Richmond."  
 WA Everett KWYZ 1230 had been silent; becomes Korean, simulcast with KSUH 1450 Puyallup WA (which had been KKBV, a country station with an FM simulcast on 104.9).  
 "Keep up the good work," T.R., Hagerstown MD, who recently received Beckley, Huntington WV and WDGG 93.7 Ashland KY via trans-Appalachian tropo.  
 "I wrote William J. Stank, publisher of the book, 'Highway Radio' about a year ago to send him some information about a TV station in Fort Smith AR. He wrote back... to thank me for writing him and to let me know that he will no longer be publishing the book," D.L.M., Mabelville AR.

 USA—Global Broadcasting Co. for a "developmental broadcast station" for event broadcasting, with call letters already held by them of KF2XBF. If granted, this station would be allowed to broadcast anywhere in the U.S.A. with 10 watts on any available FM channel. They've also asked for 10 watt TV authority and 40 watts on AM. "This would be similar to the temporary stations frequently authorized in Canada."

**Applicants Oppose Auctions as Way of Determining Winners in Comparative Cases**

One of the applicants for Temecula CA 94.5A is willing to go to court to force the FCC to reinstate the hearings process, rather than have auctions. "This is unfair," said Steve Cilurzo, who originally filed for the station in 1989. Cilurzo claims to have spent \$300,000 in legal and engineering fees. And he claims his application had made good progress, including a 1993 initial decision that favored his application over six competing bids.

Three of those applicants had appealed, and Cilurzo says the appeals were about to come before an FCC review board when regulators put the comparative process on hold, in the wake of the Bechtel decision. "I'm worried about auctions. Those people [in government] see big dollar signs." Other applicants are considering whether to pursue a court challenge to the FCC's auction plan [see last month, p. 11, col. 2].

FCC officials say their hands are tied. Any decision to award broadcast licenses based on the old procedures is unlikely to be upheld in a court challenge. But the Commission does plan to invite some input from applicants, according to a story in Broadcasting Mass media bureau chief Roy Stewart was quoted as saying the FCC will conduct a rulemaking in the

next six months "to determine any further appropriate Commission action toward resolving the pending applications."

Cilurzo says if the FCC maintains auctions as a means of settling contested cases, he will be looking for more frustrated applicants to join any lawsuit of his. "We had no clue there could ever be anything changed" he said of the regulatory situation.

**Small-Print Happenings and FM Industry News**

As reported last month (p. 5), the format changes at Oregon Public Broadcasting just keep rollin' along. Now there are charges that Martin Goldsmith unfairly manipulated the board and staff to keep his "Performance Today" on the air. Other public radio program directors are incensed that Goldsmith (pictured) and producer Don Lee acted as allies of the protesters.

It will be recalled that PT was one of the programs saved. But the program directors (of other, unaffected public stations) interpreted Goldsmith's public comments and Lee's online comments with OPB opponents as activism. "The last thing any NPR employee should ever do is make local programming decisions more difficult for the local stations," said one unidentified manager.

Goldsmith has labored vigorously to build his program's circulation among public stations, and naturally wanted it to continue in Oregon where it enjoyed good ratings. "When the reporter at the Oregonian asked me questions, I answered as honestly as I possibly could," said Goldsmith. "In the opinion of some, the comments were taken out of context."

Maynard Orme, pres. of OPB, said Goldsmith's remarks "certainly didn't help us." They were "sad and hurtful to us." Goldsmith, Lee and NPR music host Marion McPartland—who had complained bitterly, calling the decision "arrogant"—all apologized to OPB program director Virginia Breen. Now National Public Radio is trying to muzzle other program producers, saying they should not comment publicly about any NPR member station's programming decisions.

Latest word is that the OPBoard agreed to revisit the decision to cut music programming. The board was "stung by criticism from hundreds of members" about the program changes. "We acknowledge that the process was seriously flawed," said board chairman Robert S. Ball. The changes as outlined in the last issue of FMEDIA were implemented Sept. 1, but within 90 days the board will poll members, music groups and civic leaders from Portland and outstate to reconsider changes. Ball said the board will fully explain any decision it makes.

Arts groups met the news with reservations. "Polling isn't enough. They need to bring some leaders in on this," said Gil Seeley, conductor of the Oregon Repertory Singers. Ball admitted at a meeting that the network's citizen advisory committee hadn't met for a year, "since the chairman moved out of state." Steve Kafoury, a former school board member, urged the OPB board to reactivate the citizen's advisory committee as "an essential institution that should be re-established as soon as possible." [From stories in The Oregonian and "Current" newspapers.]

An FCC administrative law judge has decided to revoke the station licenses of Michael Rice, group owner, who was convicted of molesting five children. Rice's company owns WZZQ-FM 107.5-AMs, Terre Haute IN, and Missouri stations KFMZ 98.3 Columbia, KBMX 101.9 Eldon, and CPs for KAAM-FM 103.5 Huntsville and KFYE 102.1 Cuba.

Administrative Law Judge Arthur Steinberg also found that Rice's companies had misrepresented facts to the FCC. The stations plan

an appeal, and will retain their licenses or construction permits while the appeal is pending. Jerold Jacobs, an attorney for the stations, said that the companies should not lose the stations because of the conviction of the owner. "The corporations were not convicted. They are model stations," said Jacobs, who predicted the challenge to the FCC's decision may take two to four years.

More troubles for Alan Freed? He's the microbroadcaster that the FCC confiscated equipment of last November. Now Dist. Court Judge Michael J. Davis has granted the government's motion for judgment against Freed. Freed FAXed the media: "The judge's ruling on a procedural motion by the government did not address the merits of the arguments, only the jurisdiction of the case. . . Beat Radio will continue to fight the FCC's ban of licensed low-power FM broadcasting (LPFM) to prevent what is a deprivation of first amendment rights of both citizens and broadcasters. . .

"Further, the FCC has, judging by its actions, a policy of selective enforcement. With some three dozen community-based unlicensed low-power radio stations operating openly and with regular schedules throughout the country, Beat Radio is one of less than 10 such stations which the government has silenced over the past year. [The FCC] ignores violations by licensed stations; items such as failure to reduce nighttime power, commercial announcements broadcast by non-commercial stations and failure to legally identify at the top of the hour are examples of violations the FCC cites inconsistently or not at all. . . Beat Radio [97.7 was its frequency], self-described as 'The Station on Vacation', continues its community interaction and fund-raising at key Minneapolis nightclubs to publicize the station's legal battle with the FCC. The public can play an active role in the issue by contacting their elected federal representatives in support of citizen access to the airwaves and by contributing financial support for legal expenses." Freed reports \$11,000 has been received in the Beat Radio Defense Fund; its website can be checked at [www.beatworld.com](http://www.beatworld.com).

The CRTC has denied CKGE 94.9 Oshawa's bid to have its AM, CKDO, simulcast 100 percent. Power Broadcasting cited financial difficulties, and the need for more program flexibility while maintaining full local service. The CRTC said current rules permit simulcasting of 42 hours a week, and said there is ample opportunity for program experimenting by the stations. Additionally, it reaffirmed its policy of encouraging program diversity through separate AM and FM services.

Journal Broadcast Group adds a fourth FM (KESY 104.5) to its Omaha mix. It already owns KEZO 92.3, KKCD 105.9 and KOSJ 97.7 as well as two AMs. Cox advances in Birmingham, buying the call letters-less 97.3 Homewood station for \$5.5 million. It already owns WZZK-FM 104.7, WODL 106.9, WBHK 98.7 Warrior AL, and WBHJ 95.7 Tuscaloosa, while it is selling WENN 107.7 to Dick Broadcasting.

One of the biggest sales of the month is Group W/Westinghouse-CBS buying 98 radio stations owned by American Radio Systems. Mark Landler of the New York Times speculates this may be the end of a wave of consolidation that started last year with the passage of the T Telecommunications Act. By buying ARS, Group W/CBS gains a presence in several medium-sized cities, such as Charlotte NC, Portland OR and Sacramento CA, and winds up with a total of 175 stations, "making it once again the undisputed titan of the radio industry." Hicks, Muse will still have more stations—400 in all—but Westinghouse/CBS has them in larger markets, generating some \$1.5 billion in revenues. Hicks, Muse stations generate "only" \$1.45 billion, according to Jim Duncan, Jr., a media analyst based in Indianapolis.

Jacor is being a bad boy at the Commission. It was fined \$4000 for remarks made by Bubba the

Love Sponge on WEBN 102.7 Cincinnati. Jacor says it won't pay.

Also opposing the FCC is CBS, which is protesting a \$6000 fine for indecency on Howard Stern's show. It claims the fine was imposed without a listener complaint, and is taking aim at the indecency standard itself. CBS is undoubtedly under Mel Karmazin's influence in defending Stern.

Birch Research tried a test survey in Des Moines and was impressed enough with the methodology and results to announce a rollout to other markets. It used a diary approach, coupled with followup questions. WHO (AM) came out on top, followed by KSTZ 102.5, KIOA 93.3, KAZR 103.3 Pella, KJJY 92.5, KHKI 97.3, KLYF 100.3, KRKQ 98.3 Boone, KKDM 107.5, and KMXD 106.3.

A new FCC Form 345 is to be used for filing transfer of control or assignment of license or permit for an FM translator. New forms can be ordered from the FCC at (800) 418-FORM; or use FAX-on-demand at (202) 418-FORM.

The sale of WFBE 95.1 Flint to Liggett Broadcasting has been blocked by a county judge, who has issued a temporary injunction. And the Corporation for Public Broadcasting is demanding that the school board give back \$2 million in past CPB grants. Also from the "Michigan Broadcaster" I read that due to tremendous audience response, WDET \*101.9 is offering audio tapes of *July 1967 Detroit, Michigan: A Look Back*. The tapes are of a week-long special examining the 1967 riots. The five part series and one-hour companion special recall the violence and examine the impact of the riots. The documentary includes actual tape of the event and features interviews with eyewitnesses and historians, along with music from the era. When I was in Detroit a couple years ago, I saw boarded up buildings from the riots along Gratiot Avenue.

Left-leaning talk show host Bill Freeman (pictured) was fired by WGVU-FM \*88.5 Allendale MI. His show aired 9 to 11 a.m. Freeman said he was hardly surprised by the move, and blamed his views on the dismissal. WGVU general manager Michael Walenta said plans of Freeman to publish a "partisan" magazine conflicted with the station's goal to have an objective host. Freeman joined the station in 1993, but "constantly tussled with the station management over the show's content. He wanted to inject partisan politics and humor into the show; management wanted to keep it thoughtful. In February, the show was cut back from three hours to two, ending an open phone 'free-for-all' hour."

The local teachers' union had sponsored the show. President Esther Turner said, "Bill was certainly a person who was open-minded and willing to take a risk in that he gave everyone an opportunity to give their opinion." The union plans to advertise in Freeman's new magazine.

After admitting that an on-air attempt to rescue a cat from a tree was a hoax, disc jockey Alex Randall quit his job at WTCF 100.5 Carrollton MI, according to a clipping sent by Phil Boersma. Randall, 21, called himself Alex Grunwald. Randall had claimed to get stuck in the tree while rescuing the cat. He claimed program director Mark McGill was involved in planning the stunt. McGill denied that and called Randall a "disgruntled ex-employee." Randall claimed to be planning to quit before the tree affair took place. "You get a lot of hours and not much pay," he said.

Jonathan Brandmeier is calling it quits at WLUP 97.9 Chicago. We worked there and for Chancellor Media 15 years. His move was

triggered by the sale of WLUP, and Chancellor's request that he move to Los Angeles. Brandmeier, 41, was said to earn \$2.8 million a year as "Chicago's top-rated radio personality among listeners between the ages of 25 and 54."

Former NY governor Mario M. Cuomo is trying his hand at radio—again. This time he'll be doing a weekly half hour commentary on WAMC \*90.3 Albany NY. The show will be offered free to other public and also to commercial outlets. The show will reunite Cuomo with Alan Charlock, manager of WAMC, who is also a political science professor at the State University of New York at Albany.

Balking at the use of new television technology are broadcasters—at least that's the perception of some. And there's fear that digital won't really offer anything different from the analog images we see now. Deregulation means that TV's definition might be lower than expected. Crowding into the spectrum may be all kinds of data, or other audio or video services that can command a subscribing fee. The rules require stations owned by or affiliated with ABC, CBS, NBC and Fox in the top 10 markets to begin producing digital broadcasts within two years, but some stations have plans to offer such programs in time for the 1998 Christmas shopping season. But the rules don't require stations to offer HDTV. Instead, stations are free to decide how they might parcel out their part of the spectrum. Only CBS and NBC have said they will offer "some" HDTV in prime time (but not necessarily at other times).

The radio version of Percy Ross' newspaper feature, "Thanks a Million" is available to stations with market exclusivity via a barter arrangement. Ross is a septuagenarian who gives money to people who write and show a need. Four out of five days a week a caller is awarded a check to help turn around their financial situation, but once a week a caller is turned down so "as to create an element of suspense. It's human interest at its peak." For more information, Nancy Webber, 800-328-6300.

Two Boston area obituaries. Roland Nadeau, music scholar, who hosted "A Note To You" on WGBH \*89.7, at 69 from cancer. His show ran 34 years on WGBH and had been syndicated to more than 40 other public stations. It had most recently been on at 6 p.m. Sundays. William Pierce, 77, announcer for the Boston Symphony died of complications of diabetes. He announced the symphony for 38 years until retiring in 1991, and also announced on WGBH-FM-TV from 1954 to 1984. A "New Yorker" cartoon of 1974 showed an affluent couple seated in front of the radio, with the caption, "Now Arthur Fiedler bows and motions to the soloist who bows and now he and Arthur Fiedler bow to each other and again to the audience and now Arthur Fiedler motions to the first violinist and all three are bowing to the audience and each other and Arthur Fiedler asks the orchestra to stand and they and Arthur Fiedler are bowing to the audience and now the audience stands and is bowing to the orchestra and the audience is bowing to each other and the members of the orchestra are bowing to each other and Arthur Fiedler and the audience is bowing and I am bowing and all the boys up here in the control room are bowing to each other and to the orchestra and to the audience."

An implication of the sale of WCSP \*90.1 to C-SPAN (see above, "Monophonic") and the loss of jazz programming was a ripple effect caused by the Telecommunications Act of 1996. That according to a letter writer in "Radio World," Bruce Carter of Holly Hill FL gives another example. WCIE \*91.1 Lakeland FL had "up-tempo Christian music [that] appealed to young people and families into their 40s. Its signal reached both the Tampa Bay and Orlando metropolitan areas. WCIE had 30,000 people on its mailing list. Its last fund raiser generated more than \$800,000 for its 1996 budget. Yet the highly successful WCIE was bought out. Why?

Because Paxson Communications was allowed to own more stations in the Tampa Bay area after passage of the Telecom Act.

"WKES (now WILV 101.5) in the Tampa Bay area has a powerful signal on the commercial part of the band, and was owned by Moody Bible Institute. Paxson offered Moody a substantial amount of money for the frequency, and they sold. Moody, wishing to maintain a presence in the area, went shopping for a bargain, and unfortunately targeted WCIE. . . The WCIE owners were offered so much money by Moody that they quickly sold. The result is one more generic soft rock station, and the loss of a very popular niche format in the Tampa Bay area. Former WCIE listeners are not served by Moody Bible Institute programming, which is targeted toward a much older, much more conservative audience. The two formats are as distinct as classical and rock.

"The Telecom Act is allowing large conglomerates (including religious) to absorb smaller stations wholesale, creating ripple effects that eliminate all kinds of niche formats. . . The needs of niche format fans are ignored ruthlessly, even by religious organizations."

WJTL \*90.3 Lancaster PA received help from competitor WDAC 94.5 in raising funds for a power increase. The two stations appeal to different parts of the religious spectrum, WJTL being Christian contemporary. WJTL raised power modestly, to 12 kw, and went directional.

The K-Love radio network, based in Sacramento, recently completed its annual fund raising drive with \$5.5 million pledged, an increase of 23 percent over the 1996 total. It is a network of 12 noncommercial Christian music stations and 22 translators. Its signal goes out on satellite from KLVG \*88.3 Magalia CA, and recently KLVN \*93.3 Chowchilla CA was announced as a satellite originating station, perhaps with a different format, or reaching a different satellite.

Your IRS at work: Agents told the FCC they "seized and sold a taxpayer's interest in an FCC FM broadcast license to satisfy federal taxes." It seized KEGP 100.9 Victoria TX, with intention to sell the station owned by Yolenda G. Dorsett to KIXS 107.9-AM. This is a new aspect to station operations—the fear that the IRS will take over a station—just as in a bankruptcy lenders might take it over.

Now maybe even you can do the FCC "one step." For facilities changes all it takes is filing a modification-of-license application once the station's changes have been implemented. No need to file an application requesting a construction permit. In practical terms, this means that a commercial station not at maximum power or height for its class can dance the old FCC "one-step." Noncommercial stations will be able to do the same, provided they're not located near a Channel 6 TV station. This rule becomes effective 60 days after publication in the Federal Register. This might make it harder to predict stations about to increase their facilities; readers could note stronger signals from nearby FM stations without realizing a facilities increase has legally taken place.

Back on the air—CKUA-FM \*94.9 and relayers across Alberta, but there are charges of criminal activity with the past operation. The Royal Canadian Mounted Police wants to get their man—or woman. Allegations of financial misdeeds have arisen, with probable grounds for criminal action and civil suits against former board members. The volunteer directors apparently paid themselves more than \$800,000 over a period of three years, among other problems,

with the total money not accounted for being as high as \$5 million Canadian.

A Canadian station doing well—CJRT \*91.1 Toronto. It will be among the first in the market to go digital in the summer of 1998, according to Bill Onn, chief engineer. Going digital won't obsolete the regular FM emissions of CJRT and other stations: "To begin with, digital signals will be a simulcast of existing stations' programs. You'll have a choice. . . It is expected that digital radios will have AM/FM receiving capability and that AM/FM signals will be broadcast along with the digital signal for some time." Prototypes of digital radios should be available soon, most likely in Europe at first. By the time digital broadcasting begins next summer, receivers should start appearing in Canada. CJRT would not be found at 91.1 in the new spectrum. "For example, CJRT could be assigned channel 4A. Since the digital signal can contain data information there will likely be a small screen built into the receiver with alphanumeric data on it. As well as displaying the station's call letters a listener could see on the screen the name of a song and artist performing it, should the station want to provide this service."

CJRT now gets out 100 km from Toronto, but with digital the distance will be shorter—perhaps 40 km. "However, digital radio service is a cellular type of transmission—like cellular telephones. A moving receiver—such as a car or a person with a walkman—will pick up the signal from the next cell transmitter. The reach of a station therefore will depend on the number of these cells that are provided. This will be a costing issue."

Another way CJRT will be available digitally is through Canada's ExpressVu, which is a direct-to-home TV and audio service. It is all digital and will be carrying CJRT as part of their audio services. "The service will be of the very best quality audio because it will be digital all the way from our studios in Toronto to the in-home ExpressVu equipment."

Onn then compares Canada's progress with digital radio with other countries. "Many parts of the European Union are already broadcasting digitally. Canada has decided to go with the world standard digital transmission systems and frequency allocations in sync with Europe. The United States has decided not to do this. This places Canada in the position of being the same as the rest of the world but different from our close neighbour to the south. For starters, we will have to restrict our Toronto digital transmission to the Buffalo direction. It is too soon to know what other ramifications this will have." Digital radios are expected to cost \$600 to \$800 to start. "Within a year or two, depending upon public acceptance, it's expected that prices will drop substantially." That report was from the *Open College Newsletter Listeners Network*, published by CJRT, fall 1997, and sent by K. W. Walter, who asks "Why [restrict transmissions toward Buffalo]? As the U.S. Digital is dead-in-the-water, [why] should FCC restrict Canadian progress?"

Media activist targets Howard Stern's show in Canada. Valerie Smith, a Toronto-area media activist, is organizing a campaign to tell Canadian advertisers that they could face consumer boycotts if they buy airtime on that show. "This is Canada. Where do these two media giants get off in giving our radio airwaves to an American? I am just incensed that they have the nerve to do this," she said. "Stern is a misogynist, racist—he insults and abuses everyone." Like the U.S. Federal Communications Commission, the

Canadian Radio-Television and Telecommunications Commission, as well as Industry Canada, has no preemptive powers, and complaints against Stern will be dealt with "through the usual process," using the Canadian Broadcast Standards Council. Unchanged through it all is CBC's *This Morning*, whose executive producer Ira Basen isn't worried about the shock-jock's impact on his audience. Michael Enright and Avril Benoit's program will "be the refuge for people who don't like penis jokes," Basen said.

Actor and disc jockey "The Real" Don Steele, 61, died in Los Angeles of cancer. Steele was afternoon host at KRTH 101.1 from 1992 until mid-May, when his health worsened. Earlier, on KHJ 930 in the mid-60s, Steele coined the phrase "Boss Radio in Boss Angeles." Tapes of his shows were studied in broadcast schools and mimicked at other stations. He was given a star on the Hollywood Walk of Fame two years ago.

An article in "Pro Audio Review" mentioned the "shipshape" sound system aboard the NY Waterway (ferries) motor vessels. Speakers are everywhere—and they're designed for loud parties as well as for public-address type functions. The system is everywhere stereo, and includes, interestingly, five Rolls RS78B FM tuners. I've never heard of a Rolls tuner, and wonder if that might be the name for radios installed in Rolls-Royce cars?

For quite a while BayGen has had the Freeplay wind-it-yourself radio with AM-mono FM and shortwave, but now it's introduced a smaller-looking FM-AM radio. It is the FPR2, at about \$70, or some \$20 cheaper than the original model. The new model offers extended playing time for up to one hour on 20 seconds of cranking. "I'd recommend one of these radios for every family. Put it on the bookshelf or in the family room and use it every day; or fire it up as a second, back-up basic receiver; or have it ready when Mother Nature unleashes her fury," writes Harold Ort in the October *Popular Communications*. BayGen is on the Web at [www.freeplay-pair.com/](http://www.freeplay-pair.com/).

"I want to mention the excellent review of FM receivers in The Audio Critic magazine issue No. 24, Spring 1997. They said the Yamaha TX 950 was almost as good as the \$2995 Accuphase T-109. The Yamaha TX 950 costs \$429. The review said that the Accuphase and Onkyo T-90911 had better selectivity than the Yamaha. Richard Modafferi performed a lot of the tests on the FM receivers," writes Larry Dobbins of King of Prussia PA. He mentions The Audio Critic's address: 1380 Masi Road, Quakertown PA 18951-5221, subscribing price \$24/year.

The National Federation of Community Broadcasters notes that the FCC ruled against a noncommercial station in California (last month, p. 12, col. 1 if you want to know the station involved). John Crigler of Haley Bader & Potts [communications law firm based in Washington DC] points out that the ruling clarifies some issues of language: First, truthfulness is no defense. You cannot use language that is promotional even if it is true. One of the phrases in question was "oldest transmission service." Since this is comparative it is not allowed. You can not use it even if it is true that it is the oldest transmission service. In addition, the FCC ruled that mentioning "warranty" is prohibited because it is price information and an inducement to buy. Finally, the ruling appears to indicate that the FCC may be looking closely at remote broadcasts to be sure that they are serving the interests of the general public and not those of a

for-profit entity.

Pacifica Radio's New York station, WBAI \*99.5, is to relocate to larger offices in downtown Manhattan. It will be located with a group of 40 other nonprofits at the Association Center, 120 Wall Street. "The center allows tenants to take advantage of a city law that seeks to keep nonprofits in New York city by exempting them from real estate taxes. As a result the new space will be 40 percent larger than WBAI's current location on Eighth Avenue, and at much less rent" per square meter. Umm. Since WBAI is on a commercial channel, it too could be sold, like WFBE 95.1 Flint MI. I wonder if Pacifica has gotten bids upwards of \$30 million or so for this prime facility? If it has, it isn't saying. It had been commercial station WABF, and in the mid to late '50s, it was donated by Ira Hirschmann to Pacifica.

KNID 96.9 Enid OK is to move its transmitter to near Crescent OK, half way to Oklahoma City, according an e-mail received from Glenn Hauser. By making the move (for which a construction permit has not yet been given out), "a half million more people. . . might listen to the country format abandoned by KEBC [94.7 Oklahoma City; now KNRX] . . . The original KGEO, channel 5, did the same in its transition to KOCO Oklahoma City."

From the classifieds: Radio pro looking for a professional station that wants a hard worker with great experience. I love radio, phones, remotes, production. Marty Hembre, (507) 637-3406.

KJLY \*104.5 seeks an experienced announcer for morning drive. A generous benefit plan and liberal starting salary are offered. Individual wanted with Christian maturity, radio skills and creativity who will be able to move into the p.d. or g.m. slots eventually. Tape, resume, salary history and cover letter to Matthew Dorfner, Minn-Iowa Christian Broadcasting, PO Box 72, Blue Earth MN 56013. EOE.

Looking for a 67 kHz SCA generator, Roger Paskvan, KKBJ-FM 103.7, 3516 Mill St., Bemidji MN 56601; (218) 751-3077.

Wanted—the Northwest FL Radio Reading Service is looking for a donated or low priced synthesizer and screen-reading software. Call Ben Bazo, 888-941-2888, or write The Voice of Print, 6102 Chicago Ave., Penacola FL 32526.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

Continuing with the writings of William Safire: "Reed Hundt, outgoing chairman of the Federal Communications Commission—a Gore man, but market-oriented—has been against giving the broadcasting moguls a free ride into the financial future. . . Media power pressured and paid government officials to protect and extend media monopolies. Journalists must ask themselves: Where were we during this abuse of power?"

Mafia influence in broadcasting? A subscriber sold a station and found the payments had stopped. They were buying the station only for the license, but came back and told the previous owner the equipment wasn't up to par. "I had to fight to get the rest of the money owed, but it finally came. The lawyer got a fistful!" This broadcaster said it is a standard trick when the Mafia takes over a station to stop the payments and say the equipment isn't

what it should have been. The Mafia still allegedly owns the small market Indiana station in question. When selling, it's best to state in the contract that the buyer agrees to take the station's assets "as is."

"One oh four point nine is the last frequency left unassigned [in the Niagara Peninsula]," writes Stephen E. Tuura. "I remember WUSJ-FM's application years ago for 99.3 in a Vane A. Jones listing. They are in Lockport NY [AM calls now WLVL]. They could get 104.9 now with 3 kw 91 m on the U.S. side of the border. CKEY 101.1 is no longer physically in Fort Erie-Stevensville. It is owned by CJRN 710 Niagara Falls and the studios are on Queen Street in Niagara Falls ON. Communications Yearbook 1997 edition has it running 52 kw from the Hayes-Dana industrial mast in Thorold South. [Must be illegally combining v & h powers and adding another 12600 stray watts to come up with 52 kw!] However, it is directional away from Toronto, so as not to interfere with CIQB 101.1 Barrie. I can barely receive CKEY on top of Hamilton mountain with my Realistic DX-390 radio. However, it comes in strong on the car radio in the direction of Dunnville ON."

Ian G. Masters wrote an article about radio technologies in a Canadian newspaper. [I have the clipping, but don't know which paper.] Ted Rogers' flagship station, CHFI 98.1 Toronto began broadcasting 40 years ago. Rogers did not acquire it until it had been on the air a couple of years. "I began listening to the station from the time it went on the air because, true to its call letters, it did offer the best sound quality; other stations were still playing 78s at the time, even though the more advanced record formats had been around for a decade. They were still programming for their AM outlets, on which 78s didn't sound any worse than anything else.

"FI was strictly LP-based and it sounded it. Unfortunately, the programming was pretty awful; a 'beautiful music' format, featuring such unlamented artists as violinist Floriana Zabach and the 101 Strings, who sounded right at home in elevators. Even 20 years later, when the station issued its first 'Candlelight and Wine' promotional LP, it contained cuts by the likes of Frank DeVol, Percy Faith and Andre Kostelanetz. The station's mix is a good deal better now.

"But CHFI's launch was a breakthrough anyway, because it represented the first real commitment to the FM band. In 1957, there were 32 FM stations in all of Canada; three were low-powered university stations, and of the rest, all but one were owned by existing AM stations, and simply rebroadcast the same signal. CHFI was then, and remained for some years, the country's sole FM-only station. Now everybody's catching up, even the CBC. Happy birthday, FM 98."

"As I order a copy of your latest labor of love, let me say how much I appreciate your diligence and expertise in preparing each issue of the 'FM Atlas'. Several times I have been prompted to send you a note about current FM happenings around Lincoln, but before I do so, something else changes; it's pretty hard to keep up, and you seem to publish the latest info without me!" writes Robert D. Mitchell. "Local commercial radio in Lincoln (3 AMs and 10 FMs) is now concentrated in four studio locations. Also, between 6 p.m. and 5 a.m. (later for some) almost everything is automated. . . Some stations do this day and night. Whatever happened to 'local' radio? Right—the bottom line.

"You may find it personally interesting to know that KUCV, the former Union College station that is now the flagship of the Nebraska Public Radio Network, has requested a move from 90.9 to 91.1 mhz, with an increase in power from 16 to 20 kw but with the same antenna on the same tower in Cortland NE. This should be good for those of us who like to vary our public radio listening by dialing up Omaha stations KVNO 90.7 mhz, 3 kw, and KIOS 91.5, 55 kw, with KUCV exactly between them, instead of adjacent to the weaker of the two. Perhaps we can hear all three acceptably.

"Ever since KUCV moved off the Union College campus (6 blocks south of our home, where it managed to show up in all sorts of places in the radio spectrum where it didn't belong), and onto the Cortland tower (shared with KKNB 104.1 and KTGL 92.9), people in some parts of Lincoln have had a tough time getting a good signal from the station. But KUCV must protect the Omaha stations. . . I was just chatting with the writer of the local newspaper's media column, Tom Johnson, and among other things he reminded me that he included a plug for the FM Atlas in a recent column!"

A witty FM station owner told me, after I was shot down by the FCC in trying to thwart the sale of the X-105 stations in Minnesota to ABC/Capital Cities (owner of KEGE, 93-X, and KQRS 92.5) because of obscene language, about a communications law firm. Stations having problems only have to go to the law firm of Haley, Bader & Potts. They will "get you out of trouble." And, sure enough, it was indeed Haley, Bader & Potts that took care of things with the FCC through attorney John Wells King. King is a former FCC commissioner and well liked by broadcasters.

My tape of indecent material on what was then known as "The Edge" was attacked by ABC's attorney, David Cohen: "This is not a case of 'hard core' pornographic material graphically depicting explicit sexual behavior, as was the court's concern in Miller. The words complained of here are lyrics from a song played as part of KEGE's programming of 'alternative' rock

bands [The song, entitled 'A.D.I.D.A.S.', was played during the Greg Comstock Show (aired between 2 a.m. and 4 a.m.). . . The song is one of several cuts on the album 'Life is Peachy', by the band Korn, which also recorded the Greg Comstock tag line heard at one point on the tape (and which contained the f--- word in clear voice)] . . . Although it contains adult subject matter and repeats one vulgarism, the song does not depict specific sexual conduct in a patently offensive manner nor does it, taken as a whole, appeal to the audience's prurient interests." And, he's quick to point out that the broadcast occurred during the FCC's "safe harbor." My charge that there was no legal ID at 4 a.m. April 6, 1997 does not hold up because the tape I sent, "provided no evidence" of a missed ID. "Accordingly, this charge of an isolated rule violation should be dismissed."

In my reply to the FCC I was able to quote a regular listener to "The Edge," and specifically its early Sunday morning program, "The Ultrasonic Burn": "It [the program] suddenly changed three weeks ago. . . They're running scared. It plays more techno, not so much hard rock. Techno is a form of disco—but much heavier. Mostly instrumental like in night clubs."

Linda Bair, chief, audio services division, mass media bureau, FCC, wrote me and others in the case. Her letter makes it seem like I am the villain for even questioning such a worthy station's service to the public. "Elving failed to supply an affidavit of any person with personal knowledge supporting the allegations of fact in the pleading [and] failed to file his pleading within 30 days following the issuance of public notice by the Commission of the acceptance for filing of the subject applications." My letter was dated and mailed May 1 with an SASE for the FCC to stamp date received. The SASE did not come back, so I have no way of knowing if the FCC received my complaint by the May 3 deadline or not.

"Elving has failed to establish that the material on the submitted tape is obscene. See *Miller v. California*, 413 U.S. 15 (1973). . . The Commission does not have authority to act against indecent material broadcast at the time Elving alleges the subject broadcast occurred. . . Therefore, the broadcast is not actionable and may not form the basis for a petition to deny. . . Elving has not submitted any evidence of KEGE (FM)'s failure to provide the station identification announcement required by Section 73.1201. Therefore, Elving's allegation on this matter fails to raise any material or substantial question concerning KQRS's qualifications. KQRS is reminded, however, of the importance of complying with all Commission rules, including Sec. 73.1201. Accordingly, the petition to deny filed by Bruce Elving is **HEREBY DISMISSED.**"

Alan Lloyd sent the first issue of his "Microcomm" newsletter, saying it will be bimonthly, but I have seen no issues since the one mailed in May. His newsletter is about low power radio. His electronics

catalog mentions the G-E Superadio III with 67 or 92 kHz SCS at \$90, or with 67 and 92 kHz \$110 postpaid. All from AJL Enterprises, PO Box 5354, High Point NC 27262.

The August "Braille Forum" from the American Council of the Blind includes a nice review of the RadioShack "Optimus," model 12-604, modified with tunable adapter for SCS and SAP reception. The radio, a larger FM-AM with TV audio, 2 through 69, is an ac-dc model the size of the G-E Superadio. Nolan Crabb reviewed it: "The radio is very selective, making it a joy to listen to those hard-to-hear FM stations. . . This radio's magic lies in its convenience and excellent performance. I can listen to a game or the radio reading service and easily flip to the TV bands for some Descriptive Video Service programming. For me, this is an all-in-one product that makes great sense. . . This modified radio costs \$115 plus \$7 for shipping. . . Elving's work is warranted, and in the 10 years or so that I've dealt with the company, I've found him to be honest and willing to assist his customers in any way possible." The 12-604 model was on sale, with RadioShack earlier telling me it will be discontinued. I tried to persuade them not to discontinue it, and it's possible RadioShack has changed its mind. The local store manager said there is no notice that it is to be discontinued. I have sold about 100 of the modified radios at \$115 plus \$7 shipping, and still working to fill all the orders.

Plugging one of my products—the 17th edition "FM Atlas," is *Monitoring Times* magazine, with the headline, "Happy 17th, Dr. Bruce." "Elving's unique work lists 10,000 FM stations and translators across the United States, Canada, and Mexico and plots their location on 109 pages of maps. . . Articles include the new Telecom Act and how the listener and broadcaster might be affected, monophonic talk radio . . . a CBC 'power grab' in Canada and FM 'microbroadcasters'." Only \$14.95 from Grove Enterprises plus \$2.50 shipping. Order from Grove at 1-800-438-8155.

Cloquet (MN)'s "PineKnot" newspaper also mentioned the book and that I am trying to create another FM station in the area "in Hawthorne, Wis. on 106.5. . . Elving was a student founder of KUMD radio in Duluth [now 103.3 FM], from 1956-57, which did not operate with benefit of an FCC license."

Nick Lombardi sent an item from "Stereo Review" of 30 years ago, quoting Hans Fantel in May '67 saying the FCC's ruling to restrict program duplication between FM and AM stations "may well result in increased availability of mature musical fare on FM channels." Lombardi mused: "When did the 'program duplication restriction rule' end?" I think sometime around when FMEDIA! began, around 1986 or 1987. Maybe a reader knows for sure. Fantel is right, if by "mature musical fare" he means the kind of music KEGE plays—even with some of the words bleeped out, as now happens on that station.

WNCB #89.3 Duluth passed out a

mailer prior to its on-air fundathon. It is concerned about loss of its translator in the Twin Cities, 97.7 and more recently 96.3. It wants people to: pray hard; petition senators and congressmen; pledge financial support; and praise the Lord for His faithfulness. The letter does not make it clear what we are to petition our politicians about.

California's John Jefferson mentions "bad sounds" on FM. "KXPR #90.9 Sacramento, notable over the years for their excellent sound, now has acquired a trash compacter. The results vary from bad to ludicrous—some day the flute pianissimos are as loud as the full orchestra, others they actually have a few db contrast. With KKHI 100.7 San Rafael and KVPR #89.3 Fresno already having gone that sorry route, and that unspeakable K-Love translator on 91.5 on Mount Vaca compromising KCHO 91.7 Chico, the classical scene has become rather grim. KDFC 102.1 San Francisco sounds the best it's ever sounded. Alas, they suffer multipath here and KSSJ 101.9 Shingle Springs is stronger, so I can only get KDFC reliably [in Antioch] with the tuner in super-narrow mode, which further compromises the sound."

Also from CA is Doc Searles, who chided me on not having an e-mail address. As all of you may know, my e-mail address is on the masthead, and it has worked very well. My FAX machine is down, however. It seems to be a belt in the paper feed that has slipped, and the machine awaits repair. If the FAX you want to send does not come through, then use mail or e-mail.

In updating the Portland (OR) FM Dial History, Craig W. Pattillo learned that KQIV 106.7 was off the air before KMJK signed on. "After researching Oregonian newspaper microfilm, it appears KQIV did go silent between May 17, 1976 and June 30, 1976. I could not find an article stating this, but Sunday papers did drop the once a week radio listing. . . I did confirm that KMJK signed on Aug. 1, 1977. I did not remember this happening 20 years ago."

Wait Breville doesn't care for spellings used here in "FMEDIA," as he calls it. "These variations from regular spelling of the words confuse me! Also, I have lost more of my interest in both TV and FM because of the increasing numbers of translators and relay operations. . . Bruce, give up that silly idea that only the metric measurements are good. It is not just a matter of inconvenience. It is a tool of the wicked internationalists and free-traders to impose an evil one world economic system upon the U.S.A. and all other countries that will make the multinational corporations richer and the great majority of the masses poorer. . ."

"The last two FM Atlases are pretty. I love the lime-green color of the 17th edition [Pantone 802C green basic], also the pink 16th edition [Pantone 183C pink]. I suggest lavender for the 18th if you haven't decided." He, too, mentions *The Audio Critic* magazine, saying the "Onkyo T-9090II is the DXing champ of all tuners under \$1000. Only the classic McIntosh MR-78 (out of production for years) and the Accuphase T-109 (currently made but \$3000!) rivals or slightly surpasses the T-9090."

Until November,  
*Bruce F. Elving*

NE Omaha KGBI \*100.7 still g, but moving toward some Christian contemporary. Saturday nights it has "Heart and Soul" at 7, hosted by Lincolnite Heath Kramer. Said one listener, "He sounds like he's cool but he's not!" In drawing on a younger audience, KGBI risks alienating some loyal listeners who enjoy traditional music. "Life changes. The people who were 35 when this station first signed on are now 66. And so we're going for the broad middle group, the people who now have children, some who have grandchildren, people who have jobs and are fairly active in their community and church," said p.d. Tom Sommerville, as interviewed by Tom Johnson in the "Lincoln Journal-Star." It is considering using one of its SCSignals for Sacred Favorites Radio, "but because some equipment modifications will be required, a final decision has not been reached." Sommerville said, "There are people who would like us to be less contemporary. No radio station can be all things to all people. Overall, we feel pretty good about where we are."

WI Shawano WOWN 99.3 o

BN Tijuana XHTZ 90.3 s

**On Air—Real Stations and Pirates (Selected)**

CA "Radio Free Bakersfield" 87.9 is on 5 days a week (Monday-Friday) and heard on occasion as far as 40 km.

DE Wilmington WMPH \*91.7 was off the air for six years, "never telling the FCC they were silent. They will have lost half their former coverage area because of a [new application for] West Chester PA 91.7," and having to go directional.

FL "Free Radio Gainesville" 94.7 is on Wed. and Sat. evenings with hard rock and dance music. In the Miami area is "KRAP, Crap Radio" 93.5 with rock and comedy records.

FL Temple Terrace (Tampa) 102.1 has a pirate station run by Doug Brewer (picture story from the Wall Street Journal).

The signal supposedly goes out 32 km with "biker rock and raunchy talk." Brewer's station is well known to the FCC. He has thwarted efforts to have his station shut down for two years. WHPT 102.5 Sarasota has complained of interference. But Brewer, 43, has "stalled the enforcement process by engaging it head on. Unlike most pirates, he has applied for a legitimate license and has also sought 'special temporary authority' to remain on the air." Both requests have been denied, but they gave Brewer time. He's even made a guerrilla move at the FCC, driving up to an FCC car and yelling, "Smile," taking the agents' picture and posting it on his Internet

Doug Brewer

site. Said Ralph Barlow, district director of the Tampa field office of the Commission, "This guy is going off the deep end because he's been getting away with it for so long. Sooner or later I'll nail him."

Brewer, thrown out of a technical high school, landed a job as a telephone installer. A few years ago he fought the local government for the right to erect a 45 m ham tower at his house. After winning, he lit the tower like a huge Christmas tree, then attached a tiny FM transmitter that played Christmas music on a blank spot on the dial. He subsequently upped the wattage until it reached its present 125 watts. Advertisers range from strip clubs to record stores.

Brewer claims they provide him with \$1000 a month in revenue. He also makes money selling an electronics store and selling FM transmitter kits on the Internet. Advertiser Scott Harris, owner of Disc-Go-Round, a used CD store, says customers frequently mention the store's spots and tell him, "We're glad you guys are on there because we believe in it."

Such sentiments are not shared by licensed broadcasters or the NAB. Jeff Daumann, exec. v-p and general counsel of the National Association of Broadcasters, says his group is concerned that the FCC is slowly losing its ability to bring order to the radio dial, and the NAB is worried about interference to legitimate stations. "It's not a nuisance. It's a serious problem," Daumann said.

IA Cedar Rapids "RFCR" 97.5 with a claimed power of 50 watts, and translators on 87.5 and 89.9, owned by Shawn Garringer. Plays music varying from Dr. Demento to top 40 and Christian rock, but has an unpredictable schedule during the school year. "If you are interested in becoming an RFCR translator, please e-mail" at rfcrc@mail.geocities.com.

KS Lawrence "KAW-FM" 88.9, "Lawrence Community Radio." Has been on 6 months; got an FCC warning Oct. 9 about "unlicensed

broadcasting." This 10-watter is in Liberty Hall, 644 Massachusetts Ave. The station responded to the FCC, noting its "Voice of the Nations" program (5 p.m. Wed.) is the only program in the area devoted to Native American issues. Lawrence is the home of Haskell Indian Nations University and has a large native population. It also has a Klezmer (Jewish music) program and a "No-Hit-Wonder" show featuring bands that don't usually get airplay.

- ME Bangor W275AE \*102.9, relaying WERU from "a listener's house on a high section of the city." WERU is looking for a translator site in Brunswick. WERU, a volunteer-staffed station, expanded its broadcast day to 24 from 15 hours. [WERU 89.9 Blue Hill ME.]
- MA Worcester College has "WSCW" 94.9 on 15 hours a day, while "WNCS" 95.1 at Nichols College is also on. Nearby "XRCU" 95.1 Clark University is hoping to come on soon.
- MI Muskegon (Montague Lakeshore area) "WLRX, Laser 93.5," with '80s-'90s rock and rap, 100 mw, serves "100 people at an apartment complex and then some."
- MN Minneapolis—"Ballot Box Radio" 95.7—came on a week preceding the mayoral election.

It was set up by Charlie Stroud in support of the candidacy of Barbara Carlson, ex-talk show host on KSTP (1500 AM), who gave the pirate \$500 as seed money. She's the ex wife of MN Gov. Arne Carlson. She portrayed herself as allied with the community of low-power broadcasters who are challenging the FCC.

Sometimes called "Radio Free Babs," its signal traveled I-94 to the St. Paul city limits from an undisclosed location. "This is the first time ever that a clandestine FM station has been set up for political purposes in the United States," one of my sources mused. The station also played alternative music and aired comments of a group opposed to rerouting Hwy. 55 through Minnehaha Park.

The story on "Ballot Box Radio" was originally carried in the alternative paper, "City Pages." Carlson handed out copies of the article as she shook hands with students and other prospective voters. She lost the election, however, to incumbent mayor Sharon Sayles-Belton. I expect the broadcasts will continue, with other causes to be championed. It is said to have no connection to "Beat Radio" 97.7, currently off the air.

- MN St. Louis Park KDXL \*106.5 back on. "This time without the hum they had. However, they are not on every school day."
- NM Clayton K228DP \*93.5 and Des Moines K291AD \*106.1, heard recently rebroadcasting KBLJ 92.1 La Junta CO instead of K221DM \*92.1 Wagon Mound NM, which was off the air. "It went on for some hours that way."
- NY Voorheesville WPTR 96.3 still k, but soon to be "changing the whole image of the radio station. We'll be debuting it soon." No announcers now. Morning host and p.d. Steve Warren has taken a job as an editor of "Radio Ink," based in West Palm Beach FL. New sound may be urban, but rumors favor its remaining country, with a more contemporary or "hot country" format.
- OH Dayton W258AI \*99.5, despite the presence of local stations on 99.1 and 99.5. "How can they get away with it?"
- OR Vista Gorge (Columbia River Gorge) 97.7—a TISation with a recorded message about the

history, etc. of the area, and mentioned on a sign. "It was all very interesting, but the audio quality was terrible." Toward Multnomah Falls KACI-FM The Dalles cut in suddenly.

- OR Portland 104.1—the pirate that had been on 88.7, "Subterrado 88.7" (May, p. 2, col. 3): "It's the perfect cover! He broadcasts on 104.1, KRRC's frequency! The Reed College station doesn't broadcast that much or that far. I heard Subterrado almost to the Washington State line! But he's not the first pirate to broadcast on this frequency. There's another one in the Oregon City area, playing blues music."
- TN Memphis "FRM" Free Radio Memphis 94.7, but received an FCC warning letter Oct. 17. The station told the FCC that not to allow microbroadcasting is "clearly a form of discrimination. The airwaves are a public resource which should be available to all, not just the elite few who have the hundreds of thousands of dollars, if not millions, which are required by the established process."
- VA Culpeper WARN \*91.5, good signal at 48 km.
- HAITI—additions to the list of May (p. 4, col. 3): Les Cayes 106.7 Radio Lakay. Port-au-Prince: 89.3 Radio Adventiste, 90.1 Radyo Timoun ("youth radio"), 97.5 Mega-Star, 98.5 Radio Ibo, 99.3 Vision 2000, 100.5 Radio Eclair.

**Off Air—Or Not Yet On**

- CA Arcata "Free Radio Arcata" to return to the air, this time on 106.1 Was on 89.7 in 1995.
- CA Sacramento Community Power Radio 100.1, after agents had seized the equipment, it had been shut down twice before. It's the "fourth well-publicized 'bust' made recently by the Commission." But late word is that Afro-American-owned businesses have donated enough money to replace the FCC-seized equipment, and it may soon return. Its format was urban music, along with occasional speeches by the likes of Louis Farrakhan.
- CO Hesperus K232DA 94.3, K237CR 95.3. "I was told they're sitting on the bench. They've been off since February. He's going to be snowed in pretty soon. I will call the FCC if they don't come on the air!"
- FL Tampa WA2XNY 106.1—to test the development of a system to enable the transmission of both analog and digital signals on the same channel. No ERP or HAAT given.
- IA Forest City KZOW \*91.9—actually the FCC deleted its call letters, but has applied for reinstatement. It had operated up to last month.
- ME Lincoln WHMX \*105.7.
- ME Yarmouth WYAR \*88.3. "Last I knew, he was having problems with the zoning board, not because of the tower, but because of running the station out of his house. . . even though it is non-profit, educational and most likely just his family doing it."
- MD St. Michaels WFBR 94.3; its frequency still being used by WICO-FM Salisbury, which has not moved to 97.5.
- MA "Radio Free Alston" 105.1 (Sept., p. 6, col. 1) and "WDOA" 89.3 Worcester. Two agents came to Steve Provizer, RFA founder, and showed identification proving they are with the FCC. Agents took pictures and readings from the transmitter. No equipment was confiscated. The FCC said "RFA" was causing co-channel interference, but didn't mention the station(s) allegedly interfered with. The pirate shut down voluntarily. Mike Malone, "WDOA," was visited the next day. Agents were civil and talked with Mike 30 minutes. They had no complaints of interference. "The agents seemed sympathetic to our situation, but seemed to be 'just following orders'."
- MI Caro WIDL 92.1, along with WKYO 1360 AM, seized by the IRS. The feds claim more than \$100,000 in payroll and unemployment taxes have not been paid. They seized the stations' studios and their two tower sites.

- Jackson Communications can still appeal, and once paid up can return to the air.
- NH Manchester WRWD \*91.7.
- NJ Howell (last month, p. 5, col. 2): This pirate even had a billboard on U.S. 9, advertising "Oldies 104.7."
- PA Pittsburgh "WLMD" or "Radio Pittsburgh" 99.1 plans to sign on this month with 50 watts. [1260 "are reportedly for sale."]
- TX Tulia KJMX 104.9, along with KTUE/

**Deletions**

- AL Mobile WTOH \*105.9—silent, assumed deleted because of WYDH 105.9 A more

PQ Degelis CFVD's 12500 h.v power not mentioned on p. 187 (95.5).

Heading Oct. p. 8 should read "Goldsmith," not "Goldberg."

"The FM Atlas, with the tremendous detail which it covers, is exceedingly accurate," D.S., Santa Barbara CA.

"You can take your FM Atlas, your catalog and shove it. What good is a \$16.95 book with no addresses to a DXer? ... I can get half of what that book will tell me by just listening. I have thousands of dollars invested in this equipment looking me in the face here and when I hear CT, NY, MI, I can't write them 'cause your book has no addresses. ... I'll continue going to the library and get the addresses, etc.," E.H.L., Portland ME.

Nolan Crabb's excellent review of my modified Radio Shack 12-604 radio with FM-AM-TV audio, both VHF and UHF, and with FM-SCS and TV-SAP can be read at [www.acb.org/1997](http://www.acb.org/1997), and then "August, 1997."

"Get rid of the metrics in your FM Atlas and newsletters. Show station coverage in miles and antenna height in feet. I hate the metric system with a passion!" T.H., Tacoma WA. My wife, Carol, writes: "Take his suggestion to heart!"

**SCS/SAP Services, 57-92 kHz**

Symbols are as in the "FM Atlas"

CT Groton WQGN 105.5 tM, 67

FL Miami WEDR 99.1 t H, Radio Collective International. "So far, about 2000 Haitians have bought radios, which range from \$40 to \$60. The first year's rent is \$4750 per month. Run by Carmelau Monestime, 66, who had a program on an AM station for 19 years. He faces competition from at least three Haitian pirate stations on 90.1, 91.9 and 104.1." The 90.1 and 104.1 stations are known to have stereo with strong signals. "Radio Classique" 91.9 North Miami Beach is still on the air (May p. 4, col. 2). Monestime can be reached at 334 NW 110th St., Miami FL 33168-3243; (305) 754-5932.

GA Atlanta WPCB 94.9 no t, K WNNX 99.7 t, K. The Korean moves from WPCB. On main channel FM, both Atlanta country outlets are owned by Disney. They are Y-106.7 (WYAY) and Kicks 101.5 (WKHX "-FM"). Even the boss is the same general manager, Victor Sansone. "He concedes that it's a very unusual—and cushy—situation." He says, "We own country here. And, yeah, it's great. I don't care if people listen to Kicks or Y; just listen to us." But some people do care—the jocks themselves, such as Rhubarb Jones on Y-106.7 and Moby (on Kicks 101.5). "The rivalry between them is notoriously fierce, and genuine."

J.E. and I.E., Bloomington MN "just finished a 3000 mile (not km) trip down to the Great Smoky Mountain National Park and other areas. I found the FM dial to be virtually useless while traveling across country. Too many stations now occupy the band and cause interference. Any station now has a much shorter range than that of 20 years ago. Too bad it is such a mess now. AM and cassettes saved many a day. Whenever we stopped to spend the night, I did an SCA(S) bandscan. Results are as noted."

**Selected AM Happenings**

CA San Fernando KGIL 1260 has all Broadway and Hollywood musicals. It is a brainchild of Saul Levine, who wants to put classical on in Philadelphia on SAP. KGIL is hoping for a 1.5 to

2 market share, or about 300,000 daily listeners by 1998. Songs from some shows, like "Heart," which is a recent successful show, are "played only sporadically because of the rough language." FL Catonment WNVV 1090 had been silent; now on with black gospel.

FL Pompano Beach WHSR 980 has resumed daily French language broadcasts. They're aimed at visiting Quebec snowbirds. Gerald Edwards and Madeleine Martel are doing a two-hour daily show through Apr. 17.

MD Indian Head WWGB 1030 on the air with black gospel, as predicted, Sept. p. 9, col. 2. "They have 50 kw" and serve Washington DC.

MN Minneapolis WWTC 1280 and Radio Aahs to call it quits Jan. 30. Financial difficulties were cited; the marriage with Disney "didn't work out." Chris Dahl, president, was quoted by Minnesota Public Radio as having "a great sense of disappointment." CBC (Children's Broadcast Corporation) hopes to use the Internet and satellite services to distribute kids' programming.

WWTC had earlier been all-weather radio, with no success, and it pioneered in offering data bursts on AM radio to computers. Watch for some other format to take over 1270 AM.

NJ Newark WNJR 1430 has an R&B program 1 to 4 a.m. six days a week, hosted by "Sal Anthony," whose pirate station was busted by the FCC (Oct. p. 5, col. 2).

NJ Paterson WPAT 930 adds Caribbean midnight to 6 a.m.; otherwise, it's fulltime Korean. "All programming is through brokerage agreements and originates in the producers' own studios in Flushing, Queens, NYC. There is also play-by-play sports, some in English and some in Spanish. The long-running Catholic church broadcast from Paterson is still carried Sunday mornings 7 to 7:30."

NY Mount Kisco WVIP (last month p. 6, col. 3)—Mark Farrell, mayor, wrote the Mount Kisco Patent Trader newspaper about "the sound of silence at 1310 on the AM radio dial. WVIP has been a part of Mount Kisco, my home town, virtually all of my life. The 'Studio in the Round' (referring to the building shape) even lent its prominence to the street on which it stood, Radio Circle. As a kid I listened to 'the information station' on snowy mornings hoping to hear school was canceled. In more recent years, I turned to 'the source for local news and information' to get a perspective on area issues. As a public official I have relied on WVIP as an outlet for information important to any community. . . . As a forum for local viewpoint on our local issues, events and lifestyles, WVIP spoke with a familiarity that other stations have never quite captured. After 40 years of WVIP broadcasts, there is a void now. . . a sort of black hole at 1310 AM. We are the worse for the silence. To owner Martin Stone and the staff of WVIP, we wish the best. Their loss is our loss too. May they come back soon."

Stone was mentioned in a July 15, 1997 article in "Broadcasting" as being the co-owner (along with E. Monrow Flynn) of the new WVIP. WVIP was to go on the air Sept. 1. "The new station originally had been granted the call letters WWES, but requested and received its new designation, WVIP, as a promotional aid to its 'VIP Merchandising Bonus' for advertisers. . . WVIP will operate as a 'good music and news' outlet with heavy emphasis on local coverage through its own mobile unit." [Information researched and supplied by Richard L. Antos.] NC Eden WETR 830 was silent. It returns as WXII with AP News, and owned by WXII-TV, channel 12, Winston-Salem.

NC New Bern WCOO 1380—off air, with license cancelled by FCC.

ND Wishek KDRQ 1330 silent.

OH Cleveland area—1610 "Ohio Department of Transportation" repeating a short message, female voice.

1620—"WJTQ," a tourist information station from the Cleveland airport.

OR Portland KPAM 860 on with contemporary Christian. It's a return of the KPAM call letters, which were previously heard on 1410 and 97.1 FM. KPAM is a 50-kw daytimer, Eric Norberg, publisher of an adult contemporary radio newsletter, told me.

KOTK 1080: It had been KWJJ since 1927 and country since 1965. It is expected to go talk, having taken the call letters that were dropped by KEWS 620 in August. KWJJ"-FM" remains on 99.5. "I have five boxes of [Portland] radio stuff sitting here," E.P.R., Portland OR.

SC Surfside Beach WCKN 1270 deleted by the FCC. Had been off the air.

VT Rutland WHWB 970, off air, license cancelled, call letters deleted.

USA: The FCC claims to have granted 30 of the 65 applications for expanded band operations. Other approvals are expected to follow shortly.

ON Toronto 1670 1 kw, Radio Asia, Inc. This is Canada's first expanded band application. "I read with interest your article in 'Popular Communications' magazine about FM/TV DXing. Am looking forward to the one about DXing the FM subcarriers," P.B.S., Baltimore MD.

 PA Coatesville \*89.3 1 h, 280 v, 119 m, Mercer  
 County Comm. College (WWFM 89.1 Trenton  
 NJ). This would help fill the void when  
 commercial station WFLN 95.7 dropped  
 classical and changed to WXXM. A WWFM  
 antenna would be mounted on the side of a  
 tower in Coatsville, owned by Suburban  
 Cable; it would have a primary coverage of 19  
 km, WRTI \*90.1 Philadelphia, which dropped  
 half its jazz programming for 12 hours of  
 classical a day, would not change its program-  
 ming back to all jazz, even if WWFM expands.  
 WWFM sought unsuccessfully to get WHHS  
 \*107.9 Havertown PA to convert to relaying  
 all or part of its programming. But jazz  
 supporters won't leave WRTI alone. They  
 want it to return to fulltime jazz. A petition  
 drive collected 4000 signatures, and a protest  
 was staged at Temple University. The group is  
 asking people who pledged money to WRTI  
 during its fund drive to ask for it back. WRTI  
 has promised to give back any pledged money  
 if asked to have it returned. Saxophonist  
 Gary Bertz thought WRTI should take jazz  
 completely off the air. Then jazz lovers could  
 work to create their own station. Other  
 WWFM relayers would be at Penn Argyle,  
 Lake Wallenpack PA, and potential applica-  
 tions may be filed in Montgomery County  
 PA and Wilmington DE.

 which is applying for a move to Lethbridge  
 and 1090 from 1570 kHz.  
 BC Castlegar 93.3 330 h.v, CKQR (move from  
 760 AM)  
 BC Robson Bight on Vancouver Island's north-  
 east coast—"ORCA-FM" 88.5 would carry  
 the sounds of whales by means of submerged  
 microphones to nearby researchers. The call  
 letters pertain to orcas, otherwise known as  
 killer whales. As whales swim, they emit  
 clicks, whistles and other sounds that can be  
 heard for kilometers underwater. Each family  
 has a unique dialect. Nobody lives in the  
 area, but hundreds of whale watchers gather  
 there each summer, and all will be able to  
 tune in ORCA-FM if it is approved and begins  
 broadcasting. It will have only 1 watt, and  
 designed to reach a 10 km radius, where a  
 telephone line can pick up the signal and  
 carry it to the Vancouver Aquarium. Power  
 will be by solar batteries, according to a story  
 in "Radio World."  
 BC Trail 104.1 20 watts (CKQR AM—if its app.  
 for a move to FM is granted)  
 BC Victoria—the new CBC station would be on  
 90.5, but the CBC has two or three more  
 months before they hear if it is approved.  
 "There doesn't appear to be any significant  
 objection from any sources," said CBC  
 director Mike Daigneault. [CJCJ AM

 a year when [W269AC]101.7 dropped classical  
 music for an all-news and information format."

**FM AS IT WAS—OR MIGHT HAVE  
 BEEN**

"I wish to correct what appeared in  
 the October FMedia! concerning the  
 origin of WBAI 99.5 New York as a  
 noncommercial station," writes Louis J.  
 Sicilia. [See last month, p. 11, col. 1.]

"Commercial station WABF, owned  
 by Metropolitan Broadcasting and Tele-  
 vision, Inc. (Ira Hirschmann, president)  
 was sold to Broadcast Associates, Inc.  
 and changed call letters to WBAI, signi-  
 fying the initials of the station's new  
 licensee, in June, 1955. WBAI was sold  
 to Louis J. and William P. Schweitzer,  
 who donated the station to Pacifica in  
 January, 1960. Incidentally, WABF's  
 original licensee operated experimental  
 television station W2XMT in the 1940s."

Supplying even more information  
 about WABF/WBAI is Richard L. Antos.  
 A June 21, 1954 clipping mentioned  
 that the Book of the Month club seeks  
 to buy WABF from Ira Hirschmann. The  
 station earlier received FCC permission  
 in July, 1953 to remain silent temporar-  
 ily for purposes of reorganization. The  
 station had a deficit on Feb. 28 of  
 \$371,800. The article mentions that  
 WABF was founded in 1941 by Abraham  
 & Strauss and Bloomingdale's and was  
 directed by Mr. Hirschmann, who sub-  
 sequently purchased control. Hirsch-  
 mann was expected to continue with  
 the station after the sale as a consultant.  
 [Another New York city FM station to  
 bite the dust around the same time was  
 WFDR 104.3.]

The station has specialized in classical  
 music programming. Under Book of the  
 Month Club ownership, it will continue  
 to stress music, but will give added  
 emphasis to books, authors and literary  
 subjects of timely interest.

Call letters had changed to WBAI by  
 Feb. 10, 1955, when it began broadcast-  
 ing live Chicago Symphony concerts  
 each Thursday, 9:15 to 11:15 p.m, over  
 a newly-installed 15,000 cycle telephone  
 line. Those extra-high fidelity lines are  
 unmatched by any station in the country,  
 reported "Broadcasting-Telecasting" mag-  
 azine.

Commercials on WBAI will be limited  
 to 30 seconds and occur only four times  
 an hour, Ted Deglin, president, announced  
 in July, 1955. Programming will be  
 non-classical music on high fidelity tapes  
 and records. Deglin hoped the station  
 would gain its audience by "offering the  
 kind of music that large groups of  
 people actually listen to, not merely say  
 for prestige reasons they would like to  
 listen to."

By May, 1956 Deglin reported 350,000  
 people listened regularly to WBAI, with  
 more and more sponsors interested in  
 advertising. Deglin expects shortly for  
 the new FM outlet to be in the black,  
 reported the "New York Daily News" in

Randy Bergman's "What's on?" column.

The New York Times in an article believed to be from January, 1960 mentioned that WBAI is being formally taken over by the Pacifica Foundation. The station, operated commercially until now, was donated to the foundation by Louis and William P. Schweitzer. This week it began broadcasting announcements asking listeners to become subscribers at \$12 a year. About 50 people have subscribed to the plan so far. David Susskind was to be the moderator of a panel discussion on "Payola and Mental Poverty" on the opening day as a noncommercial station.

Gov. Rockefeller and Mayor Wagner were to speak on the dedicatory program 1-2 p.m. Sunday. Other speakers will include Louis J. Lefkowitz, attorney general; Harold Winkler, president of the foundation, and Louis Schweitzer.

Although music will account for the major portion of WBAI's programming, the station will have talk and discussion programs. One scheduled during the week is "The Coming Death of Caryl Chessman," and whether the convicted author, now sentenced for the eighth time to die, has received fair treatment.

Across the country in Portland OR is the saga of KQIV 106.7 Lake Oswego OR and its successors. Pat Roberson referred to p. 12 of the Oct. FMedial "Yes, 106.7 was silent for some time before KMJK came on the air. I just brought two more boxes of radio stuff out of storage. I have all of those articles saved and I should be able to give you exact dates."

A Sept. 14, 1972 article mentioned that KQIV, the area's first quadrasonic radio station, will go on the air at midnight Friday. Imagine signing on at midnight! Owner Walter Kraus said KQIV will program two 10 minute newscasts a day, plus short wave reports from Radio Moscow, Radio Peking, Hanoi and the British Broadcasting Corp. These broadcasts will be picked up by KQIV's own short wave system.

Kraus was aiming to serve the 18 to 35 year old group, and expected to have the biggest impact on KINK-FM, KPAM and KISN. It will stress quadrasonic music. "Quadrasonic will be stereo just as stereo was to monaural," Kraus said. "You'll have four distinct sounds to enjoy. It will be just as if you were sitting in a concert hall. The deejay will have a joy stick which can make the sound louder out of one speaker, he can go up on the strings, for example." KQIV is getting the last radio channel available in Portland. Kraus filed for the station in 1969, but came against two other applicants—KYXI and a MI group known as Willamette Broadcasters. KYXI later withdrew its application and Kraus, after negotiating a year, bought out

Willamette Broadcasters. He was considering a country format, but said "very few FM stations play country-western." Kraus estimates 88 percent of the families in his area have FM sets. KQIV will have 100,000 watts of power, horizontal and vertical. KQIV had hoped to go on the air in August, but the starting date was delayed when vandals damaged some of the new equipment.

The first advertisers were expected to be dealers of quadrasonic audio equipment, but those dealers have been caught short of stock. KQIV's music is progressive rock, jazz and blues, with some folk

ABSOLUTELY LIVE  
24 HOURS A DAY  
KQIV QUADRAPHONIC  
FM 107 LAKE OSWEGO

music, and "absolutely live 24 hours a day." "Q-4" was not after the "Kixy crowd," referring probably to an AM station. KQIV's music is "first class progressive all the way," with commercials limited to six minutes an hour maximum, according to a station blurb.

By June 7, 1976, KQIV, Portland's jazz and soul music station has been placed in receivership and its assets scheduled to be sold off in late July. But station manager Roy Jay was optimistic, saying, "We'll be on the air indefinitely." The station went into receivership over a debt of \$115,000. Jay claims to have \$150,000 to cover the debt, but the receiver refused the money. "The receiver thinks he can get the station for \$115,000 which is dirt cheap," Jay said, and asked for an FCC hearing on the matter.

Jay said the station lost \$478,000 while it was progressive rock from 1972 to 1974, but claims losses have been "minimal" since KQIV changed to soul, jazz and "full people" format. Nothing was said about quad in 1976. A cartoon in the "Oregonian" showed a tombstone with "KQIV R.I.P." with a question mark drawn through it.

#### Canadian AM Broadcasters Wary of CBC Moves From AM to FM

Canadian AM broadcasters are wary of the CBC moving away from AM, such as in Toronto. "I think the CBC moving to FM is not a good deal for AM radio," said Gordon Rawlinson, CEO of Calgary's Rawlco Communications Ltd., which owns 11 stations. Even without the CBC's move, AM has been floundering as blocks of listeners have been drawn to FM for its better sound quality and more youth-

oriented programming. Canada's AM stations have lost money every year since 1991, and have seen declining revenues for 16 years, according to a CAB study. Total ad dollars spent on AM fell \$93.6 million between 1985 and 1996, a 22 percent decrease, while FM revenues grew by 200 percent to \$488.8 million. The CAB wants more approvals for duopolies, which have not been allowed, except in certain markets such as Windsor, whose citizens generally are attracted to Detroit MI stations.

Adding duopolies in Canada is likely to meet opposition from such groups as Friends of Canadian Broadcasting, which argues that concentration of ownership will reduce diversity of voices and make it harder for new players to enter the market. But many AM operators are happy to just hang on, knowing that once digital audio broadcasting comes along, each AM and each FM station will get at least one digital broadcasting slot. The feeling is "we'll keep the sucker going to make sure we get at least two slots on the new [digital] spectrum," said Gary Slaight, president of the radio division of Standard Broadcasting, owner of CFRB (AM)-CFRX (6070 shortwave) Toronto.

#### Small-Print Happenings and FM Industry News

Thinking of merging—Public Radio International of Minneapolis MN and National Public Radio. "It's just in a very, very initial stage, but it is something we're looking into," said Judy Reese, NPR's acting communications director. "We had exploratory conversations with NPR's chief, Delano Lewis," said PRI's Stephen Salyer.

NPR and PRI each distribute programs to 600 stations nationwide, and each is said to serve 17 million listeners weekly. Merging could save the services money and make it easier for them—not competing with each other—to bring in financial support, such as from underwriting and foundations.

Bill Kennard heads the FCC now, replacing Reed Hundt. Kennard seems to get along with Jesse Helms (R-NC). Helms is satisfied that Kennard "will work in good faith with me and others" to resolve the tangled Biltmore Forest 96.5A radio licensing controversy.

From the classifieds: Program director, \$28,000 to \$42,000. Join a paid program staff of 12 and volunteers of 150. Bachelor's degree plus 5 years experience. Resume and letter to general manager, KPFA \*94.1, 1919 Martin Luther King Jr. Way, Berkeley CA 94704. EOE.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

"I must berate you for filing a petition to deny the transfer of KEGE's license [Oct. pp. 11-12]," writes Louis J. Sicilia. "It is wrong to encourage the FCC's violation of the first amendment by its censorship regulations. Those who find a station's programming offensive need only tune to another station. The broadcast media should enjoy the same constitutional protection as the print media. . . I look forward to the next FMedia! Keep up the good work." Until December's expected big issue,

 CA Tehachapi K202BR \*88.3 (KEFR, not KEAR)  
 CA Woody K220AA \*91.9 (KEFR, not KEAR). "I was driving around Wasco on Sunday morning (Oct. 26), tuned to 91.9 and it was jumping back and forth between two stations every few meters, all around town. It turns out that it was the one hour of the week that some Family Radio stations broadcast separate church services (generally 11 a.m. to noon, local time, which is what KEAR's LPFMs were apparently doing). KEFR and its translators were not (simply doing recorded music during that hour). So, K220AA and K220EY are of equal strength in Wasco, depending on one's exact location as to which is received. K220EY has KEAR IDs, confirmed while driving north from Wasco with K220EY predominating. K220AA has KEFR IDs, and, indeed, at one point (Oct. 26 at 7:29 a.m.), KEFR identified, in particular, translator 'K220AA Delano and Caliente' (transmitter probably on a peak near Woody, where KDNO [now KKDJ] Delano presumably still is)."

Stereo—or to be Stereo

CA Rosamond KLKX 93.5  
 CA Sutter Creek KSAC 107.5, S, I, parallel to KSQR 1240 Sacramento, heard testing. "I wish you wouldn't describe Latino formats as 'k' or 'r'. The worst Latino songs do have musical roots, and the worst Latino artists seem to know something about singing, so the 'k' and 'r' designations are rather an insult to them. . . . I read in the paper that KLLC 97.3 San Francisco is now one of the most popular stations in the area. Good grief! Are there that many tone deaf, brain-dead people out there? Rock in the '60s had a certain validity as social protest, I suppose, but Alas @ 97.3 sure doesn't let any relevance spoil their

non-stop sewerage leak of audio effluents! On a scale of -10 to +10, with zero being white noise, KLLC rates a -10," J.M.J., Antioch CA.

DC Washington WCSP \*90.1, m, with usually several 30-second to one-minute segments of classical music between news features hourly. The classical features true stereo separation.

FL Clermont WLAZ \*88.7—was mono, but now in full stereo.

FL Edgewater WKTO \*88.7, gr, on air. Seeks 88.9, 25000 v, 108 m, d-a, C2 from a new site.

FL Holly Hill WANX \*88.1, to be gr. Expected on in stereo in six months.

IL Decatur WNLD \*88.1. It IDs separately from parent WBGL \*91.7 Champaign IL.

IN Winamac WFR1 100.1, g, parallel to WFRN-FM 104.7 Elkhart. "I can receive two WFRN-FM relays—Winamac and WFRR 93.7 Walton. Also Moody stations in Kokomo (91.7) and West Lafayette (89.9), all with stereo."

MN Bagley KKCQ-FM 96.7, "Q Country 96.7 FM" (strict). "Weird timing for news": ABC Information news heard at varying times each hour, legal ID heard on the hour only once in three hours' listening.

ND Fargo KFBN \*88.7, testing with conservative g. "We're currently running equipment tests. KFBN is a 100 kw FM station with studios in Fargo and transmitter in Amenia ND." That's where KDSU \*91.9 has its tower. Heard using the slogan or non ID of "Heaven 88.7."

OH Columbus WUFM \*88.7. Also on in stereo is W201AK \*88.1, relaying WCDR 90.3 Cedarville.

WV Petersburg WAUA \*89.5, heard with test programming. "Their signal is loud and clear here, which I think is amazing, considering that they are probably about 216 km from here" [Hagerstown MD].

WI Superior KUWS \*91.3—was temporarily mono due to studio to transmitter link failure. Signal was sent to the Duluth transmitter site by a remote broadcast unit.

WY Casper KNLD 97.3, o, "Melody 97" LMA to buy with KTRS-FM 95.5 Casper-KYOD. KYOD 104.7

QT Queretaro XHOZ 94.7, "Estereo 94.7" Monophonic

CA Stockton KSTN-FM 107.3—two reporters confirmed this station is monophonic, with a false stereo light. "I used my cassette deck to check out KSTN-FM's signal after listening to them in my car. They don't sound like they have any stereo separation, but the signal meters for the left and right channels do bobble independently." Another person says, "There is no stereo effect at all. It has a stereo beacon indication but is simply mono. . . I drove to northern California Oct. 25-26 and checked KSTN-FM on the way with the car radio."

NY Port Henry WMNM 92.1 still mono, rebroadcasting VT's WSYB AM, "and reaching farther than before."

OH Canton WHK-FM 98.1, "The Word." It has all religious talk, including listener call-ins, and no music. Format now gt. IDs as "WHK AM Cleveland-WHK-FM Canton-Akron." Has

no stereo [pilot]. "During my childhood years in the 1950s, I listened to WHK on 1420 AM. I had never heard that call sign used on FM until last night." Simulcast with 1420 AM. "In the 17th edition of the 'FM Atlas' you tell us about your concerns with monophonic talk shows displacing music on FM. This is what happened with the former WTOF Canton-Akron at 98.1 FM," B.F., Paynesville OH.

PAMartinsburgWJSM-FM 92.7—remove \$ listing.

PA Smethport WQRM 106.3—believed to be temporarily mono

MA Northfield WNMH \*91.5 rt, adding CHR, \$[tereo] resumed. It should have been listed as mono, p. 175, FM Atlas-17.

MI Caro WIDL 92.1 op, returns to air, along with WKYO 1360, with same format as before.

MI Detroit WQRS 105.1 pr, "105 Dot 1, the Edge." Even before the change from classical took place, reports leaked out about a format change. This angered many listeners. "We're disappointed, but not surprised," said Jill Woodward, with the Detroit Symphony, whose concerts were sometimes carried on WQRS. The station had gone through five owners in the last year, something causing a bumper sticker to be printed, "Honk if you've owned WQRS." Ed Christian of Saga Communications, Grosse Pointe Farms MI, said, "With the resurgence of Detroit and talk of the renaissance, part of the culture is being robbed from the city by the abandonment of fine-arts programming. I'm hopeful that some other private broadcaster or noncommercial outlet, maybe the Detroit school board's

WDTR (\*90.9), will understand the necessity of preserving the culture and again demonstrate a positive, good-faith effort for the city's resurgence." WQRS had a party at the Roostertail to thank its classical music listeners.

WQRS had been classical 37 years. The staff gathered at noon Nov. 21 and heard that the rumors were true. Classical was to end in just five hours. G.M. Tom Bender said that Greater Media, which owned the station since April, couldn't make enough money under the classical format to justify its \$30 million investment. The same story was true in Philadelphia, where Greater Media's WXMN 95.7 replaced WFLN. Detroit is one of only two cities in the top 10 markets without a commercial classical music station. The other is Philadelphia. There is one source of full time classical music, left on the Detroit dial, CBE-FM \*89.9 Windsor. [The word "left" in the previous sentence has two meanings.]

Nine people were fired from WQRS, but staffers generally accepted the news well. Said RadioGuide publisher, self-described as "Radio's Best Friend," Art Vuolo of Novi MI: "It's the advertising community, along with the folks at Arbitron, who are telling us what we're going to hear. Radio is chasing the listeners away."

Among WQRS listeners were "Dr. Death," Jack Kevorkian, and his attorney Geoffrey Fieger. Callers to Fieger's office heard WQRS when put on hold. "This is another sign of the degeneration of the culture of Detroit," Fieger said. [See p.8 for more reaction to the format change at WQRS.]

Just after 5 p.m. Nov. 21, WQRS segued from an opera aria to its "Edge" format. The first song played, *Closer*, by Nine Inch (23 Cm?) Nails, included the lyric, "I wanna (bleep) you like an animal." Greater Media owns classic rock WCSX 94.7, alternative rock WQRS and in-between rock WRIF 101.1. "I assume they want to corner the male listener," wrote Jim Nahirniak of Warren MI.

MI South Haven WCSY 98.3 mj. It has smooth jazz 8 p.m. to midnight.

MN St. Louis Park KDXL \*106.5 s. "It sounds more like KMOJ (89.9 Minneapolis) than anything. . . Good signal in Eden Prairie."

MS Forest WMBU \*89.1 g, Moody

MO Kirksville KHGN \*90.7 gr

NM Red River KRDR \*90.1 kr

OH East Liverpool WELA 104.3 o

OR Pendleton KWHT 103.5 all k now, LMA-to-buy with KUMA-FM 107.7-AM.

SD Little Eagle KLND \*89.5 re, plus country

TN Dresden WCDZ 95.1 o

TN Harrogate WLMU \*91.3 r, receiving as a gift WRWB 740 AM, to be operated along with WLMU.

TN Oliver Springs WXVO 98.7 r

TN Seymour WJBZ 96.3 g, Reach southern gospel

TX Abilene KROW 92.5 o, classic hits, "Crow"

TX Daingerfield KCLK 106.9 mr, parallel to Winfield

TX Shamrock KRMN 92.7 m

TX Terrell KZDL 107.1 S, lr, adding Spanish rock 8 p.m. to midnight; otherwise, simulcasts monophonic KZDF 106.9 McKinney.

TX Victoria KTXN 98.7 S, l, regional Mexican.

relayer—pirate or cable leakage? FCC shows no such station.

WI Berlin WISS-FM 102.3, not yet on 104.7.

**Off Air—Or Not Yet On**

CA "Radio Free Bakersfield" 87.9 not heard on two recent weekday afternoons, so may be off entirely (see last month, p. 3, col. 1).  
 K227AB \*93.3. Repeated calls to primary KUFW resulted in no answer.  
 FL Sulphur Springs "87 X" 87.9, near Tampa. Kelly Benjamin, 22, is in more trouble. Agents found drugs in his studio.  
 IL Freeport WNIE \*89.1  
 IL Mount Morris WSEY 95.7  
 IL Oregon WOXM 106.1  
 IL Sterling WNIQ \*91.5  
 MN Hermantown W28OCT 103.9: I told the FCC I wouldn't object to the license renewal being delayed until after it applies for a facilities change and change of primary station.  
 MO Kansas City "KCMG" 107.9 (Sept. p. 6, col. 2). The FCC confiscates all equipment except Michael Calderon's transmitter. Calderon previously lost about \$45,000 in legal fees and other expenses trying to establish a licensed station. Nearby "KAW-FM" 88.9 (Nov., pp. 3-4) was shut down for almost five minutes during an FCC search, "but is said to be back on now."  
 NM Lordsburg KQTN 97.9  
 OH Columbus W294AH 106.7. All other listed Columbus translators are on, and in stereo.  
 PA Boalsburg WVCV 93.7  
 PA Laporte WRPA 103.9  
 PA Pittsburgh "WLMD" 99.1 (last month, p. 4, col. 3) may not sign on at all. The info about its signing on this month has been posted for several months. But "Radio Carson" 91.7 with 20 watts from a "high hill and having exceptional coverage" is on in stereo, but "the sad thing it's all techno, computerized rock." Has d-ings who come in, but automated at times. On 24 hours seven days a week, and has been on almost a year now.  
 PA Ridgely WMKB 96.9  
 PA West Philadelphia "WSKR" 97.7 (last month p. 4, col. 3) shut down by FCC. It had hip-hop, rap and talk programs, even Islamic, and had leased space on a 9-story building at 23 S. 52nd St. Station owner Mike Stone, a.k.a. Monroe Campbell, in a Sept. '96 visit to his studio by the FCC, assured them he would cease broadcasting. It had also used the calls "SSPR" (Aug. p. 3, col. 2) and "WSAR" (July, '96, p. 3, col. 2). On Nov. 19 FCC agents came and removed the transmitter and antenna. The FCC first became aware of the pirate in 1996 when WPST 97.5 Trenton NJ reported interference. John Winston of the FCC in Washington DC was quoted in a Philadelphia Inquirer article as saying piracy is "not a major problem, but it is a growing problem—people taking to the airwaves without a license." When the FCC confronts an illegal operator, 90 percent comply with the FCC and shut down, Winston said. He said the FCC handled eight cases of piracy last year and one the year before.  
 The FCC engineer who traced Stone to the 23 S. 52nd St. address in 1996 was David C. Dombrowski, who discovered that the station operated at least three times since Stone promised he'd quit broadcasting. Dombrowski couldn't understand why Stone would spend the money, time and trouble to set up a radio station that was doomed to be shut down. "It wasn't bad," Dombrowski said of its sound. "He had a clear signal, and I believe he was operating a stereo transmitter. He seemed to have a pretty good technical background." There's not much chance Stone could get a license to broadcast in that area even if he wanted one. "The band is pretty full of commercial stations here. It's almost impossible to get into Philadelphia," Dombrowski said.  
 PA Williamsport W211AM \*90.1  
 WI Antigo WACD 106.1, despite the FCC's saying it is licensed and on the air.

TX Winfield KALK 97.5 mr, LMA with Dangerfield.  
 VI Christiansted WMNG 104.9 o, "Mongoose 104.9"  
 ON Fort Erie CKEY 101.1 r, modern AC, "The River" (blows up "The Planet"). It is teaming with WEDG 103.3 Buffalo to fight the "huge ratings" of WLCE 92.9. "Indeed, almost every break has some Alice bashing [saying] 'we also play songs that Alice won't', capitalizing on the fact that Alice has about a 20-song playlist." In a joint sales agreement with WEDG, WHTT-FM 104.1-WGRF 96.9 Buffalo NY, plus CHSC AM-CJRN AM.  
 PU Puebla XHORO 94.9 m, "Radio Oro," with "romantic ballads in English and Spanish from the '70s-'90s."

**On Air—well, er, sort of, and/or Really On—Pirates and Authorized Stations**

CA Auburn K279AE \*103.7, mentioned on primary KVMR 89.5 Nevada City. This translator dominates KODS Carnelian Bay reception near Sacramento to the west. "K-Odious has a terrible signal compared with the other Slide Mountain stations, so it doesn't take a lot to beat them out."  
 CA Davis KDVS \*90.3—now full power and in stereo. [from 107.3; still stereo]  
 CA Madera KMMM 107.1, having moved/  
 CA Tahoe City KKTO \*90.5, testing. It was stereo, but more recently heard in mono, with "heavily processed audio, so that it sounds terrible." Promises to have a "full schedule of news, classical music and jazz."  
 FL Immokalee "Radio Kiskeya" 100.5, Haitian, founded May '96 by Agenord Auplant and four others. Serves a 16-km radius. It relays, in part, Radio Tropicale from NY.  
 FL Temple Terrace—Doug Brewer's 102.1 "Party Pirate" back on six days after the FCC came and downed his 45m tower. It took them six hours to dismantle the equipment and haul everything away in a Ryder truck. Not known if with same outreach (Nov. p. 3, col. 3). Now off air: "Patriot Radio" 96.7 Lutz FL (Oct., p. 5, col. 1; and June '96, p. 3, col. 2). Owner Arthur Kobres, 53, charged with 14 counts of operating a station without a license; he could be fined \$250,000. Several other FL pirates remain on the air, including Spanish pirates in Tampa on 89.3, 90.1 and FL Lake Worth "New Latin Radio" 101.3 continues on, although FCC inspectors ordered it off. It transmits from a 46-m tower. Inspectors from Miami visited the studio after complaints of interference to the Palm Beach airport were made known, but it is not believed to be the station causing interference. However, "the powerful signal on 101.3 FM drew the attention of two AM stations that compete for Spanish-language listeners. Both WCEQ 1190 and WLVS 1380 complained to the FCC about the pirate. They were tipped by ads placed by "New Latin Radio" in Spanish-language newspapers. The station runs free ads and psa-type announcements, but advertisers can make donations. Radio consultant Gary Minker said five unlicensed stations are in the area, "littering the spectrum with garbage." And something the travel brochures don't tell you: Mosquitos that spread encephalitis are at large in Palm Beach county, causing nighttime activities to be cancelled until colder weather comes.  
 FL Orlando "WFRI Radio Impacto" 97.1 on 6 days a week with Spanish, but recently got an FCC "cease and desist" letter.  
 GA Atlanta 94.5—mentioned on a Haitian radio website, saying a Haitian program is on Saturdays from 9 p.m. to midnight. The program's address is 1024 Gwinnett Station, Tucker GA 30084, % Jim Inelu, program host.  
 MI L'Anse WCUP 105.7 testing with low power, tie in with WUPY 101.1 Ontonagon.  
 NY Brooklyn "WPIR" 87.9, Pratt Institute, 215 Willoughby Ave., (718) 636-3755. Said to be 30 watts.  
 GA Valdosta WYZK 96.7 still with Class A facilities, but signed a lease for a new tower site, and should be constructing its C2 facility "very soon." Nearby WBTY 105.5 Homerville had been listed as deleted, but it is on the air. "It's all automated, the owner lady usually isn't there." Later she called and confirmed that it is on the air, automated, which she doesn't especially like, but is an economic necessity in such a small market. WBTY will move to 98.7 after the CP owner of WHFE 105.9 Lakeland GA pays her to move; so far WHFE is only a construction permit. Also listed as deleted by the FCC were WRDO 96.9 Fitzgerald and WKAA 97.7 Ocilla GA, both remaining on the air and in stereo.  
 IN Anderson WXXP 97.9-AM being sold, subject to FCC approval, to Moody Bible Institute. Expect a format change to g, and operation to noncommercial. It's a \$5.5 million purchase by Moody, which is based in Chicago.  
 IA Ames KCCQ 105.1C3, having moved from 105.1.  
 IA Forest City KZOW \*91.9—FCC reinstates its CP, and supposedly it's on the air (Nov. p. 4, col. 2), although the station did not return my phone call.  
 MI Pontiac 106.3 in Spanish, no ID. "Pretty unreal, mostly segueing music." Has "good coverage." Another reporter heard it ID as "Radio Musical, and stereo, "very professional. I enjoy the music." The other person said it's mono. Perhaps two stations in the area with the same format on 106.3? Also in the area is a 94.3 station with "enthusiastic preaching in Spanish, good stereo signal." These are full-time signals. "I hear them everywhere I drive over many" kilometers.  
 MI Rogers City WMLQ 96.7 being sold to Xavier University, Cincinnati, but only for \$75 K. Watch it turn noncommercial, jr, like across-the-state WVXM \*97.7 Manistee.  
 MN "Radio Free Duluth" 93.5, supposedly 80 watts, stereo, clean signal, heard only in the eastern half of the city. I heard it only one weekend night with Arabic music, English announcing; call it "sort of" on. "I can just barely get it on the fourth floor of Ostrander Hall [Superior WI] because of all the intermod." It has not been heard since I e-mailed it at random@cp.duluth.mn.u.  
 MN Warroad K208CN \*89.5. The next on-air translator will be K274AL \*102.7 Mankato, followed by W218AW \*91.5 Brainerd. WNCB \*89.3 Duluth has "six other translator projects currently under construction and nine more under development."  
 NY Manhattan "WBAR" 87.9 (Oct., p. 4, col. 3). "If this is a legal microbroadcaster they have a great site/antenna. Music is urban hip-hop, rap and such. Range must be at least 1 km."  
 NY Ossining WDFH \*90.3—from a new site, up the hill from the original site, but with lower power (last month, p. 2, col. 3)—an AT&T tower in nearby New Castle NY, with an 8 km primary (60 dBu) compared to 11 km they had before, according to my computer program which calculates FM station coverages. "Marc Sophos is still looking for a studio site. The first tests were done by generator because Con Edison hadn't run power for his yet!" K.Z., Croton-on-Hudson NY.  
 OR Portland 98.1—playing "whole sides of albums," no announcing, with "a fairly good signal." Suffers from the disease of being monophonic.  
 PA Pottsville W235AD \*94.9  
 PA West Philadelphia "WPPR" 91.3, "R. Mutiny," 20w, on a year w. Native American, Caribbean, hip-hop, African, Jewish, punk rock, despite getting FCC "cease and desist" epistle.  
 TX Wichita Falls \*91.5—a KCB 1 90.9 Dallas

**Deletions**

**SCS/Pro Channel/SAP Services**

*Symbols are as in the "FM Atlas"*

- CA Los Altos KFFG 97.7 tX, 76 kHz (from 67)
  - CA San Francisco KFRC-FM 99.7 tX, 76
  - KKSF 103.7 tX, 76; KMEL 106.1 tX, 76
  - DC Washington WASII 97.1 t, L (from t, C).
- "The relay of the Spanish AM has ended and WASH is just starting their own Spanish

subcarrier. If your small radios work out well, we'll buy them in quantity for listeners to take to soccer games."

IL Des Plaines WYLL 106.7 t, K, by about Jan. 1. "I'd prefer it being on 92, but they might get 67. He's been on main carrier FM—WVVX 103.1—but that station's been sold and will change format Jan. 1 (possibly embracing stereo). There's a need for car radios converted to SCS so that he can keep his large car radio audience. Some services are paying as much as \$100,000 a year to rent their SCSes. I don't know what we'll be charging; I'm only the engineer," D.D., Oak Grove Village IL. Dr. Kamil Helmi of Radio Sedaye Iran asked me to help broker an SCS lease in Los Angeles. I said I'd do so for 15 percent of the first year's lease income, payable by him or the station.

IN Indianapolis WTLC 105.7 still tZ, but it is at 69 kHz, not 67 kHz. [have tM, 67. WTPI 107.9 tM, R. WFBQ 94.7 may still/ MA Boston WGBH-TV \*2, WGBX \*44's guide mentions FM Atlas, with phone number: "This device can also receive radio reading services." It also mentions companies with pre-tuned SAP receivers: Compol, (800) 972-0881; Avocet Instruments, Inc., (800) 443-0728. Avocet sent a brochure on their Pro Channel receivers, designed to work in a TV station's remote van, as well as a combined TV-SAP and TV Pro Channel receiver.

MN Eveleth WEVE-FM 97.9 t(!)  
 NY New York WCBS-FM 101.1 tX, 76 kHz, as well as 57 kHz t(!), non RDS. This and the CA stations have Digital DJ information, which includes stock quotes, traffic information, general news, weather and sports. This can be viewed on a small radio selling for \$89 with registration and activation. A monthly subscription is required to access most of the information services, but they also offer an option of a \$179 one-time payment which includes the radio and "free basic services." The radio gets FM stereo and AM and has a speaker and headphone jack. Their website has a picture of the radio, a program chart for the San Francisco area, and under "Our Technology", an explanation of the advantages of using 76 kHz" from <http://www.digitaldj.com>.

SC Greenville WFBC-FM 93.7 still tM, C  
 WMUU-FM 94.5 still tM, U. "All other Greenville area SCSes still active, as well. I was very surprised to read (Nov. p. 5, col. 3) the above SCSes were silent; perhaps your reporter was simply out of range and didn't realize it. Due to the low injection levels typically used by SCS broadcasters, a station's SCS doesn't carry as far as its main channel. This is especially noticeable in fringe areas, where it's not unusual to encounter a station whose mono signal is becoming in, whose stereo signal is noisy, and whose SCS is buried so far down under the noise floor that it's completely inaudible."

WI Superior KBJR 6 uses the 102.271 kHz Pro Channel around 5:30 to 6 p.m. for remote cueing (occasional voice) of its news crews. It takes its 78.67 kHz SAP (tW) off the air, "because the weather gets into the pro channel radios."

WY Casper KTRS-FM 95.5 t(!), paging. "There is a KTRS AM in St. Louis. They're not the same ownership."

"I am a farmer and do not own a radio station. I just enjoy reading about stations," G.L.H., Munden KS. [edia] D.M., Barton VT. "Looking forward to another year of FM/

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour, as required by the FCC and Industry Canada (at or near top of hour)*

- AR Arkadelphia KSWH \*91.1 The Switch

AR Little Rock KSYG 103.7 The Signal, still t, mono. "Is Little Rock the only city with two all-talk stations on FM?"

AR Malvern KBOK-FM 93.3 CD Country (from "CD 93"), while KISI 101.5 there heard IDing as "KBOK." Calls change expected.  
 CA Bakersfield KIWI 92.1 Radio Lobo (from "Keewee")

KISV 94.1 still Kiss 94.1, but very strict. The "new real ID heard at top of hour quickly in low tone under blaring music. . . Couldn't tell [what the call letters were], even though the station was locally received."

CA San Jose KBAY 100.3 Soft Rock 100.3 (strict; from "K-Bay") ["FM 91"]  
 CA San Mateo KCSM \*91.1 Jazz 91 (from/ FL Panama City WPFM 107.9 Rock 108. Not yet on, but coming is the new 97.9 Woodville FL assignment. That station will "bump the WAFT 97.9 translator" in Tallahassee, W250AE. [(from "Stereo Country 102")]

IL Dixon WIXN-FM 101.7 FM 102/  
 IL Morrison WZZT 95.1 95.1 The Z  
 IL Polo WLLT 107.1 The Light, 107.7 FM  
 ME Topsham WXGL 95.5 Eagle 95.5. It alternates its ID with Brunswick, Portland (no longer with Lewiston).

MN Rushford-Winona KWNO-FM 99.3 99-3 CD Country (from "99.3 The Heat"). "KWNO-FM was a call sign back in the '50s—97.5 then" in Winona. . . KOVZ 100.9 Blooming Prairie heard with Spanish music and talk at 6:45 p.m. (probably a weekend), legal ID at 7 CST, "and then into normal r, no announcement!" It IDs only with Owatonna now, not with multiple cities. . . MN's KZNR 105.1 Lakeville and KZNN 105.7 Eden Prairie suffer from reversal of their stereo channels with respect to each other. . . Some 8100 people pledged \$750,000 to Minnesota Public Radio recently. The average donation was \$93.90, "an all-time high."

NY Voorheesville WPTR 96.3 Power Country 96.3 FM. It is trying to challenge market

leader WGNA-FM 107.7 with a young country approach. Before revving up "The Power," it stunted with all Halloween music Oct. 31, followed by a computerized voice countdown. They play plenty of promotions and contests, much like sister station Fly 92 (WFLY 92.3). Ronald E. "Buzz" Brindle, WGNA-FM program director, said in other markets where a challenger has gone up against a market leader, the challenger usually fails. "We'll see what they do, but we're not overly concerned about it. But competition makes things more fun and keeps you on your toes." WPTR now is local/live or on hard drive.

- OH Canton WHBC-FM 94.1 Mix 94.1 (strict; from "HBC-FM")

 OH Gahanna WCVO \*104.9 with Columbus  
 OH Johnstown WSMZ 103.1 with Columbus  
 OH Lancaster WHOK 95.5 with Columbus; also on in stereo is their W272AT 102.3 Columbus.  
 OH Marysville WHQK 105.7 with Columbus. Not heard on the north side of Columbus was W WAZU 107.1 Circleville, which might have been out of range.  
 "Enclosed is a check for another year; keep up the good work!" R.T., Pleasanton CA.

**Selected AM Happenings**

AL Fairhope WABF 1220 deleted.  
 AL Lineville WZZX 780 silent.  
 AL Red Bay WRMG 1430 silent.

AL Selma WTOX 1570 deleted.  
 CA Oakland KDIA 1310—Disney children's, with Jim Gabbert collecting \$6 million to unload this station to ABC. ABC says it has 13 stations—all AM—with Radio Disney.  
 CO Limon KLIM 1120 silent.  
 GA Fitzgerald WAYX 1230 deleted.  
 GA Savannah WIZA 1450 deleted.  
 GA Sylvester WXZE 1540 deleted.  
 GA Waynesboro WBR0 1310 deleted.  
 KY Hawesville WKCM 1160 had been silent; now Reach southern gospel.  
 KY Manchester WWXL 1450 had been silent; now on with news and talk from the United Broadcasters Network.  
 MN Minneapolis WCCO 830 quietly dropped AM stereo "three months or so ago." That leaves these AM stereo stations in the market: KUOM, "Radio K," \*770, WCTS \*1030, KYMN [Northfield] 1080, WWTC 1280 (still with children's). MN St. Paul WDGY 630, but IDing as "Hudson [WI]-St. Paul-Minneapolis," still has Imus In The Morning. But its other programming is a hodgepodge: polka, religion, a variety of music. Seems to program more to the small town of Hudson than to the adjoining metro.  
 NY Buffalo WWKB 1520 now all sports; had been Real Country. As WKBW in the 1960s, it was the leading Top 40 station in the market. "How about the Buffalo area having ABC's Pure Gold on a small FM station? Cruisin' was great on Saturday nights with it. . . Or someone on an expanded band AM could carry ABC's Pure Gold?" D.S., Eden NY.  
 NY Huntington WGSN 740 no longer simulcasts WMJC 94.3 "New Country 94.3 WMJC" Smithtown. It has Radio Disney kids' format.  
 PA Johnstown WJAC 850 now ABC's Pure Gold, automated, with "some live sports."  
 SC Beaufort WBEU 960 deleted. Wasn't materializing. [now Spanish.  
 TN Franklin WHEW 1380 had been silent/  
 WA Lacey KBRD 680 had been silent. Now "fine arts," with 20th century classic music and show tunes.  
 WA Port Angeles KKNW 1290 silent, but expected on later this month with country and in a combo with: KONP 1450 there.

 WY Chugwater 99.5A, filing window to be announced later

**Investing in Radio Stocks? Big Mergers, Aggressive Groups Seen as Best Places For Investing, But Spectacular Price Increases May Be Thing of the Past**

FM radio has been around—at least in the present band—for 50 years, AM even longer. As such, radio hardly looks like a growth industry to investors. But look around at all the mergers, such as Mel Karmazin's goading Group W/CBS/Infinity to shell out \$1.6 billion plus taking on an additional billion in debt to buy American Radio Systems. The deal will give the CBS group 175 stations with \$1.5 billion in annual revenues.

What might it mean for the small investor? Barrons, in its Oct. 6 issue, mentions that radio, as an industry, has seen increased revenues every year since 1962. The lone exception was 1991 when

a recession cut into revenues by three percent. Last year, radio revenues jumped 8.2 percent—that on top of a 7.4 percent increase in 1995. Especially attractive to investors are the savings brought about through mergers among stations and groups, including not hiring local talent when stars such as Howard Stern, Rush Limbaugh and Don Imus can be subscribed to. Buying such shows allows small stations to reduce local production costs and, if they so choose, spend a bit to develop their own morning or afternoon personalities—or use the money for billboard and TV promotion.

There are some 12,000 radio stations in the U.S., with an estimated 3000 of those having been acquired by big, aggressive broadcast groups. Most of the 3000 are in medium to large markets. The groups to consider investing in, according to the business paper, are the publicly traded companies which control 15 percent of all radio stations.

One way to jump in is to put money into stocks of the emerging giants, which include Westinghouse, Clear Channel Communications, Jacor and Hicks Muse Tate and Furst. Latter is an umbrella organization consisting of publicly-traded Chancellor Media, which was formed when Chancellor Broadcasting merged with Evergreen Media. The Long Island deal includes SFX getting Chancellor's two Jacksonville FL stations, WAPE 95.1 and WFYV 104.5, and \$11 million. SFX already owns four stations there, some being AM.

The other route for investing is to buy shares in smaller radio outfits in the hope they'll not only survive, but grow. One of those mentioned is Emmis Broadcasting, based in Indianapolis, which has 12 stations, most in medium to large markets. Rita L. Zanella, an analyst at Gruntal & Co., thinks Clear Channel's profit/earnings ratio is too high, and instead goes for Emmis. It hasn't been as acquisitive as its peers, but she feels the company is attractively priced.

Frank Bodenchak of Morgan Stanley Dean Witter picks Jacor as one of the industry's "more attractive stocks." Jacor should be able to increase its earnings through internal growth as well as through acquisitions. On average, Jacor commands 34 percent of the advertising dollars spent on radio in its 35 markets. JCOR was recently at 44 (up 2 in the last month), but Bodenchak thinks the stock could hit \$65 in two years. Personally, I like telephone stocks. I sold GTE when it was about \$45, after paying around \$36 for it some three years earlier, and bought Nokia when it was \$70. Now it is \$83, but it was as high as 101 before the "Hong Kong flu" hit. I was interested in Nokia when it was \$36 a share, but my broker had no information on the company and didn't put through a buy order when the stock was reasonably priced.

Bodenchak is also partial to Cox Radio, †See related story, p. 9, col. 1

giving it a "strong buy" rating. Cox is an aggressive company, now owning 49 radio stations. Markets range from Orlando where Cox owns seven stations, to Atlanta where it has WSB-FM 98.5-WJZF 104.1-AM, and San Antonio with five FMs and two AMs. In L.A., it has KOST 103.5, KACE 103.9, KRTO 98.3 and KFI AM. Cox is strong in Miami, Tampa, Birmingham, Tulsa, and Syracuse. It also owns WEZN 99.9 Bridgeport CT and WHIO-FM 99.1-AM Dayton OH. Cox is headed by Robert F. Neil, 38, pictured, whose stratagem is not to buy the biggest station in a market, but good turn-around prospects. "I like turnarounds. It's easier to grow value when you're building something up," he said. Cox, owner of the Atlanta Journal-Constitution newspaper, newly went public. It did this to help drive its lust for acquisitions in wake of the relaxing of the duopoly rules. "This business is now driven by Wall Street," Neil said. "Until the 1990s few stations ever traded hands. Now virtually every one of the top 10 companies has flipped."

Neil believes that with an economic downturn some owners won't be able to keep their new radio stations. That's when Cox intends to be ready to jump in, picking up properties at bargain prices. [Thanks to Nick Lombardi, Atlanta, for supplying much of this information.]

#### Small-Print Happenings and FM Industry News

FM piracy a life or death issue? The NAB's "RadioWeek" reports the FCC shut down two FM pirates accused of interfering with air traffic control at two Miami area airports (105.5 near the Miami airport and 106.5 near the West Palm Beach airport). Richard Lee of the FCC Compliance and Information Bureau said, "There is an increased problem for public and aircraft safety because of unlicensed FM operations. Hopefully, we can eliminate this problem before a catastrophic accident resulting in loss of lives occurs due to interference on the airwaves." A former FM pirate who is now a licensed broadcaster told me that "those Ramsey kits have stronger harmonics. If you use one have it checked. Some have been known to interfere in the UHF public service bands. You don't want all those scanner hobbyists out there after you!"

WCSP \*90.1 Washington DC is the radio arm of C-Span, the national cable public affairs service. Unlike the TV service, WCSP is not committed to carrying the proceedings of the House and Senate, freeing it to pick up whatever's most newsworthy. That might include campaign finance hearings or speeches from the National Press Club. On the first day of WCSP radio's existence, the program seemed to be a simulcast of the TV version, but with frequent mentions of the new radio service. Congresspersons who had a radio background were interviewed, but audio said things like "You're looking at WCSP-FM's new radio studio."

Also in DC news, WETA \*90.9 and relayer took in \$668,000 from 5700 listeners, or about six percent more than the preceding marathons, while WAMU \*88.5 got \$976,000 in its begathon.

CBS, in its acquisition waxy, will most likely have to dump one of its Boston stations. It

already owns WBCN, WZLX and WODS, as well as WBZ AM. It's adding WBMX, WEGQ and WAAF, plus two more AMs. But if WAAF is considered a Worcester, not a Boston, station, then maybe nothing would have to be sold or traded. Once CBS deals in any stations, it is seen as the last major acquisition, sell off or trade among major stations in the market in the foreseeable future. Nationally, CBS may be forced to sell or trade off up to 20 or as high as 40 stations, with St. Louis being another market with too much CBS concentration of control.

Saga Communications, based in MI, is expanding from owning FM stations to buying the Illinois Radio Network. Saga owns stations in the Springfield IL market, and this gives Ed Christian's group its first state network.

Low-rated public station WDTR \*90.9 Detroit may get a new look, thanks to a professional staffer hired and, presumably, an infusion of new money into its operation by the Detroit school board. It's hiring broadcast journalist Cliff Russell as program coordinator—the first non-academic to preside over the outlet in its 49-year history, according to the "Detroit Free Press." Russell has been a consultant to WDTR since spring. While not discussing any specific plans for the station, it's believed he has received a mandate to professionalize the station to increase its audience.

WDTR costs the board almost \$500,000 annually to operate a schedule that runs only from 8 a.m. to 8 p.m. Audience data show that WDTR has fewer listeners than marginally-received stations from Flint, Toledo and Sarnia ON. "The waste of the WDTR frequency is absolutely tragic," said Dick Kernen, a local broadcast educator and long-time radio observer. [See also Aug., p. 7, col. 1.]

WUOM \*91.7 Ann Arbor has been in touch with Russell about possible program origination. One possibility is that Russell is grooming the station preparatory to its being sold. If sold to a well-heeled religious group, WDTR could fetch \$10 to \$15 million, according to Kernen's estimate. With WQRS 105.1 quitting the classical format, there's the option that Ed Christian suggested (see above, "Formats") that WDTR be taken over by a community nonprofit group for the purpose of broadcasting classical and fine arts programming. [Christian's group is involved in classical music through its ownership of WFMR 98.3 Menomonee Falls-Milwaukee WI (see March, p. 8, col. 3).]

Meanwhile, the quest for the ultimate in bottom line profits resulted in Greater Media jettisoning the classical format at WQRS. That's an outcome considerably different from what I predicted in Aug. (p. 7, col. 1). There I wrote, "I'm betting that WQRS 105.1 Detroit and WFLN 95.7 Philadelphia stay classical, even though both have been sold. Neither has commercial station competition in the format and their ratings are better than some rock stations in their markets. . ."

Some letters to the editor about WQRS' format change, include Pamela A. Frucci, Grosse Ile: "The owners are unhappy with a \$2 million profit? Those of us who love and appreciate both the music and the disc jockeys will find our lives diminished. There's more to life than money." Alvin H. Byam of Beverly Hills MI said, "I will tune in their new format to find who is advertising with them. Then I will let the advertisers know my feelings."

Chris Brockman, Lake Orion MI: "I'll make it a point not to spend my money at any advertiser

that uses a Greater Media station." Janet Friedman, West Bloomfield MI: "No city can aspire to be a world-class city without a classical music radio station." Jeannette A. Szulec, Grosse Pointe Shores: "Dave Wagner [of WQRS] and his superb staff have provided an important cultural service to our area. . . I propose that we salvage this treasure through a university-operated public-funded broadcast similar to what is being done by the Indian River Community College in Fort Pierce FL."

Also in area news, the Michigan Association of Public Broadcasters is the new name for Michigan Public Broadcasting. The name change is part of an effort to help the public see the

## M A P B

organization as an association, not just a corporate entity. Probably there was confusion with the WUOM stations, which go by the name of "Listener Supported Michigan Radio" on the air.

Music is back, at least in part, on Oregon Public Broadcasting. The OPBoard listened, and reinstated more than Martin Goldsmith's "Performance Today." Final details await a board meeting scheduled for Dec. 9. For instance, it is not known exactly what types of music will be brought back. In the midst of the turmoil, OPB conducted the most successful fund drive in its history. This was seen as bad news to music lovers. It raised \$190,000 in one third less time than usual. But OPB is now committed to offering music, said its president Maynard Orme. It's also expected Virginia Breen, program director, will keep her job. [See Sept. p. 5; Oct. p. 8, col. 3.]

However, Portland's local classical station, KBPS-FM \*89.9, has picked up support from disgruntled KOPB-FM listeners. Its pledge totals were up in the first days of its drive. Suzanne R. White, its new manager, said, "We have been getting a huge amount of people saying, 'I'm giving my money to you, not OPB.'" White isn't thinking of making significant changes at KBPS-FM, but might pick up certain programs dropped by KOPB-FM, including Karl Haas' "Adventures in Good Music."

Lite FM in New York is back. WLTW 106.7 is the top-rated station (Arbitron 12+) with a 6.4. It is followed by WQHT 97.1 with a 6.2, then WSKQ, WCBS-FM, WKTU, WRKS, WHTZ and WINS AM. Then WXRK, WABC AM, WCBS AM, WOR AM and WQCD. Lite FM had not been No. 1 since 1994. Its resurrection is due to the fact that it hasn't seen competition in the format after WMXV switched from soft rock to "The Buzz," 105.1 then WDBZ [now WNSR] last November. As WMXV a year ago it was 18th with a 2.4 share. "The real 'buzz' is how much longer WNSR, which pulled a 1.6 share in the summer ratings book, is going to hang on," writes Christine Burke in the New York Post.

This story is partly New York and partly historical. "Radio World" had a feature on the "five femmes" of WNEW-FM 102.7. When the FCC decreed in the 1960s that AM-FM stations in larger cities have separate programming fifty percent of the time, WNEW AM and FM scrambled. It chose a "now sound" which wasn't all that different from what other stations were doing. But the decision to hire five female disc jockeys was news. Allison Steele was the most famous of the five. For trivia fans—the others were Margaret Draper, Arlene Kieta, Ann Clements and Nell Bassett. The format and fun

continued for a year, but the ratings weren't there. Progressive rock WOR-FM 98.7 was No. 1, but it dropped that format and soon went top 40. WNEW-FM then went progressive rock, and that format proved successful on 102.7, sans the ladies, except for Ms. Steele.

The Spanish population continues to increase in the market, which benefits WSKQ 97.9. "Mega" finished third place overall with a 5.1 share, up from 4.9 last spring. The "wonderful summer weather" also helped WSKQ. Carey Davis, g.m., WSKQ, thinks listeners took their radios to outdoor parties and tuned them to Mega's largely salsa and meringue music. "Suave" WPAT-FM 93.1 Paterson NJ also saw increased listening.

The Justice Department is seeking to block the sales of WBAB 102.3 Babylon and WBLI 106.1 Patchogue to Chancellor Media Corp., which owns Long Island market leader WALK-FM 97.5. The \$54 million acquisition would also include WHFM 95.3 and WGBB AM. This would give Chancellor 65 percent of the radio advertising sales in Suffolk County, according to the Justice Department. Under an agreement with SFX Broadcasting, Chancellor has been running the stations since July 1, 1966, but cannot complete the purchase until it receives Justice Department clearance. This is the first time that agency has gone to court to block a radio merger based on antitrust grounds.

CBL is free to move to 99.1 Toronto after the federal cabinet refused to interfere with the switchover from 740 AM. The cabinet supported handing over the 93.5 Peterborough frequency to Milestone (Kilometerstone?) Communications and moving it to Toronto. Members of the city's large Caribbean community had asked the cabinet to reconsider the decision. CBC plans to move to 99.1 in March, with a six month simulcast to follow with 740 AM. Also angry are native Canadians, who think the government is paying too much attention to black people. Gary Farmer, head of Aboriginal Voices magazine, filed an application for a native radio licence in Toronto. He argues that natives have a right to radio frequencies as they become available. The natives have contended for years that the CBC "gives them short shrift in its own programming."

The FCC gives licenses to two players in the digital satellite business—CD Radio, which paid \$83.3 million and American Mobile Radio Corp. with its bid of \$89.9 million. That despite opposition by the U.S.' National Association of Broadcasters. lecture format along with classical music on a single network, rather than the dual web feed, which tethers the largely monophonic web to telephone talk, while the other network has classical music in stereo and NPR news.

A consortium of Toronto broadcasters announced it is applying to the CRTC for a licence to beam North America's first digital audio broadcasting service from the CN Tower. "This really is a revolution for radio. It's a pre-emptive strike," said Michel Tremblay, executive vice president of the Canadian Association of Broadcasters. "We have to remain competitive in the future... Everything is going digital and we can't be the only analog medium in this mix." Master FM is the consortium, which consists of 15 broadcasters plus the CBC, and including CJRT \*91.1. The group hopes to be on the air by late next summer with 20 signals or "programmes."

Master FM hopes to erect the new system at a cost of between \$1 million to \$3 million. It would include five transmitters, one of which

would be for standby use. Maybe Howard Stern's show would be broadcast from that tower. The Cultural Environment Movement, a group of 150 organizations based in the U.S., is supporting the efforts of those who want to have Howard Stern's show removed from Canadian airwaves. George Gerbner, a professor at Temple University, Philadelphia, is CEM president. He wrote: "A true issue is the sovereignty of Canadian legislation on hate propaganda—in the country's Criminal Code, Human Rights Code and CRTC regulations. CEM's Canadian members include Canadians Concerned About Violence in Entertainment (C-CAVE) and the Coalition for Responsible Television (CRTV).

Both C-CAVE and CRTV have urged the Canadian Radio-television and Telecommunications Commission to act against broadcasters who breach federal radio regulations with hate speech based on race, gender, ethnic origins or religion. The CRTC reported 483 written complaints have been filed about Stern's show since Sept. 2. Pat Cardinal, p.d. at Toronto's Q-107, said "only a couple" of advertisers have pulled out because of Stern, while several other clients, such as the Toronto Star, requested their spots not air during his show. New clients have come on board since Stern. "It's pretty much equalled off," he said, except the new clients are paying higher fees. In Minneapolis, Stern temporarily raised the ratings of WRQC 100.3, but Tom Barnard, KQRS 92.5, is back with an even larger lead for the morning audience than he had before.

A Toronto Globe and Mail editorial, "Bulletin: Stern is Crude," said in part, "Howard Stern's show was in violation of the high standards of the broadcasting industry had set for itself," and went on to quote some of the not-so-delicate wording Mr. Stern used to describe French Canadians, feminists and women in general. It mentioned an earlier case of profanity on CKTF 104.1 Gatineau-Hull, which was scorned by the CBC. The council, in describing Stern's show, said, "This may be comedy in Stern's WXRK studio [but] it is not in this country," and called his show, "absolutely discriminatory." "Mind you," the editorial reads, "the Montreal station that carries the Stern show [CHOM 97.7] has seen its ratings soar. A good number of the new listeners are women. Must be American tourists."

The radio business is so bad in Uganda, according to the M Street Journal, "the government is ordering Radio Uganda to shut down because it's losing so much money. [Same for Uganda Television.] They could go off the air because the government-owned radio facility has spent its entire budget."

Earlier in this issue was news of WQRS 105.1 Detroit going rock from classical. There's concern that KXTR 96.5 Kansas City could go the same route. Robert P. Ingram, who founded Ingram Media with the fortune he made selling Rubbermaid products, last year sold KXTR to Heritage. After buying Heritage, News Corp. sold KXTR to Sinclair—four owners in a year! Local classical music listeners were peeved when Sinclair shifted KXTR to Sony's classical music service [which is being discontinued]. The Kansas City Star called the programming "a disgrace," and speculated that Sinclair would change the format to pay for its costly acquisition. KXTR has been classical since 1959, the year I set up a yagi antenna in Manhattan KS, where I enjoyed KXTR and KCMO-FM 94.9 Kansas City. I lived in Manhattan two years; by

about 1960 KXTR had changed to IGM's automated classical music service out of Bellingham WA. That was the same service WLOL-FM 99.5 Minneapolis MN had at about the same time.

What happens when disc jockeys stay at a station too long and can't any longer relate to the target audience? Fire 'em! That's what WBCN 104.1 Boston did with Mark Panenteau. He was with WBCN 20 years, and the last of the station's longtime legends to go—a gang that included Charles Laquidara, Matt Siegel and Ken Shelton. Panenteau, in his mid-40s, proved to be too expensive for the station to reach its young audience. His salary was reportedly in the \$250,000 to \$300,000 range. His show was being beaten by the crew of Opie and Anthony at WAAF 107.3 Worcester among the prime male 18-34 demographic. He supposedly has a non-compete clause, but there would be nothing banning his coming back on another station in the CBS Radio Group, including WZLX 100.7, WODS 103.3 or WBZ AM.

CBS and Westinghouse are now aligned, and in Boston it brings the above stations together. Robin Young, now 46, used to work at WBZ AM in the early '70s, and returned to do a three-week stint at WBOS 92.9. But back in the days when there was a WBZ-FM 106.7, "I distinctly remember the AM guys there telling me then, 'Oh, you know, FM isn't going to last,'" Young said. In fact, writes Dean Johnson in the Boston Herald, "Station owner Westinghouse felt so strongly about the lack of FM's future that it sold WBZ's FM signal for roughly \$24 in beads and colored glass. That station eventually became the money machine WMJX FM and the flagship of the local Greater Media franchise that now includes WBOS."

In Maine, WTOS 105.1 Skowhegan is being sold to Cumulus Media of Milwaukee and Chicago. Formed only last year, Cumulus intends to own more than 200 stations in the U.S. within a year. It has agreed to buy WQCB 106.5 Brewer ME and WBZN 107.3 Old Town.

Joni Eareckson-Tada, the Christian radio host from a wheelchair, helped in many markets collect wheelchairs for the needy. WBCL \*90.3 Fort Wayne and its affiliates collected 415 used wheelchairs, folding walkers and other mobility aids during a four-week period. KDNI-KDNW Duluth MN collected 75 wheelchairs in an effort that those stations coordinated. The wheelchairs will be distributed to many in foreign countries, where there's an estimated need for 18 million chairs. And WBCL is helping to collect donations for children of prisoners in the areas it serves. The sixth annual Prison Fellowship's Angel Tree will help collect gifts of toys and clothing for kids up to age 16.

The FCC fines WXCL 104.9 Pekin-WKZW 94.3 Chillicothe IL-AM \$9000 for "deficient EEO recruitment efforts."

Petitions to deny have been filed by the National Hispanic Media Coalition against several L.A. stations, notably KLSX 97.1 for obscenity in the Howard Stern Show.

In Fort Smith, Capstar is adding KTCS-FM 99.9-AM, along with its KMAG 99.1. Across the border in Oklahoma, Caribou Communications is paying Bott Broadcasting \$5 million for Class A KNTL 104.9 Bethany OK. Kent Nichols' Caribou Broadcasting already owns KATT 100.5, KTNT 97.7 and KYIS 98.9. Watch for a format change on 104.9. Bott keeps QOCV AM, and plans to expand as it builds KABH 95.1 in nearby Shawnee OK, a Class C.

New people at the FCC are pushing their own agendas, especially when it comes to ownership issues. FCC chairman Bill Kennard wants to move quickly toward auctions, and reportedly the Commission will be flexible about allowing settlement agreements, whereby one applicant can pay the other applicant or applicants more than the actual expenses in applying. Commissioners Michael Powell and Gloria Tristani urged the FCC to get more women and minorities into station ownership through Notice of Proposed Rulemaking 97-397. The other new commissioner is Republican Harold Furchtgott-Roth. He takes the seat vacated by Andrew Barrett, with term ending June 30, 2000. Powell takes over for Rachel Chong, and his term ends June 30, 2002. Tristani's term ends July 1, 2003, and she takes over for Reed Hundt, although not as chairperson. Gone is Jim Quello, who was Howard Stern's most vocal opponent at the FCC—"will Quello mellow; will Stern learn?" as I used to write. Well, it looks like Quello mellowed before leaving the Commission, but Stern, uh, he's still the same, they tell me.

Duncan radio research shows a trend toward less listening to radio. Jim Duncan found that average use of radio is down for the fourth straight year, and says, "We are greatly troubled by this trend; it's not due to losses in a few markets," but it's across the board.

A tower collapse near Jackson MS killed three workers who were on a 609 m structure for WMSI 102.9 and two TV stations. WMSI is operating with a reduced signal from another location, causing the M Street Journal to muse that while many broadcast companies are rushing into the tower business—it does have some definite liability exposure in terms of human life and broadcast down-time.

Sony is selling its long-form networks, including its full-time classical network. The Beethoven Satellite Network, based at WFMT 98.7 Chicago, could benefit. And America Online is launching a competitor to radio, the "AOL Radio Channel." It will offer music with no commercials to its subscribers, but format or formats not announced.

The Klan sues KWMU \*90.7 St. Louis for, guess what? Not agreeing to take their underwriting. The Klan has gone to court, calling it a First Amendment issue. KWMU says it has a right to refuse underwriting it thinks inappropriate, even though organizations like Parents and Friends of Lesbians and Gays underwrite. Here's what KWMU rejected: "All Things Considered is brought to you in part by The Knights of the Ku Klux Klan, a white Christian organization, standing up for the rights and values of white Christian America since 1865."

Robert Herman, attorney for the Missouri Ku Klux Klan, says he's opposing the hypocrisy of the public station. "NPR is a very liberal station [sic] . . . If this were the Temple Israel, and they applied to *All Things Considered* and the station said, 'We don't think Jews are in the public interest', there'd be outrage." Herman is also representing the Klan in a complaint against the state for refusing to allow the Klan to "adopt a highway."

Jack Mitchell resigns from the helm of Wisconsin Public Radio, a post he's held for 22 years, but he'll stay on at the faculty of the University of Wisconsin-Madison School of Journalism and Mass Communication. He fielded questions on the WPR news and information stations, including hearing a comment from a

long-time listener who liked the former format, which featured broadcasts of college lectures and classical music on a single network, rather than the dual web feed, which tethers the largely monophonic web to telephone talk, while the other network has classical music in stereo and NPR news.

Back on the air—Argentina's community stations FM Del Sol, FM Ilusiones and four other stations (Oct. p. 5, col. 2). Judges there found there is no case against the stations, and ordered the return of the confiscated equipment. The interested community broadcasters thank the "AMARC Solidarity Network" for its support. That support helped exert pressure on the authorities to drop the charges and return the equipment. AMARC is affiliated with the National Federation of Community Broadcasters and has a website at [www.amarc.org](http://www.amarc.org).

An NFCB affiliate is KDHX \*88.1 St. Louis, now 10 years old. It started with a non airconditioned shack next to its tower out of town, and has moved into a former bakery on the south side of St. Louis. It acquired the property at a discount, as the building had been condemned. Volunteers restored the roof and interior of the building in short order, and it is serving the needs of the station and community very nicely now.

A religious broadcaster giving back—that's what "Focus on the Family" did for KCGN 101.5 Ortonville MN. The station, which is commercial, held a sharathon. The program guide doesn't say how much the sharathon netted, but it did mention that the broadcast, headed by Dr. James Dobson, donated \$1000. They're trying to get a signal to the Sioux Falls SD translator on 98.3. The latest is they're trying a different brand of translator to bring the signal from the Brookings relay on 106.7. "Also have sent a letter to the FCC asking to use phone lines part of the way," but the FCC shot down that proposal. The FCC does not allow phone lines to feed a translator, because the results would most likely be mono, stripped of any SCS subcarrier and of lower fidelity.

But main stations can be phone-line fed, as is with KTFG 102.9 Sioux Rapids IA (see "IA's KTFG Tethered by a Phone Line That Corrodes," July, p. 3, col. 2). If the other brand of translator being tried in Sioux Falls doesn't pick up Brookings, the only "fix" is for KCGN to establish a translator in Madison SD or Pipestone MN, "two areas that have expressed an interest in a translator."

Pirate operations nationwide have been buoyed by a court decision in California. Score another victory for Stephen Dunifer of Free Radio Berkeley, who convinced Federal Judge Claudia Wilken to deny the FCC's request that she shut down Dunifer's station. She went further, ordering the FCC to explain why it feels Dunifer's claim that banning low-power stations such as his is unconstitutional. Her ruling sets the stage for a possible trial that Dunifer and his supporters describe as necessary for the micro-broadcasting movement to gain legitimacy. "We're pleased," said Dunifer's attorney, Louis Hicken. "We think the FCC is getting closer and closer to having to go into court and justify why they give the airwaves only to the super-rich."

Beat Radio 97.7, celebrating one year off the air, FAXed, mentioning a victory party was to have been held in Berkeley celebrating the decision. The Beat, and probably other micro-broadcasters, are encouraged by developments in

California. Alan Freed's Beat Radio filed an appeal to its FCC silencing on Oct. 31. It

requested a review of Judge Michael J. Davis' decision which placed his case under the Washington DC Court of Appeals. Beat Radio maintains that the U.S. District Court in Minnesota is the proper jurisdiction for Beat Radio's challenge to FCC regulations.

Freed himself has gone legal, doing three hours a week, 2 to 5 a.m. Mondays, "Beat Radio on KFAI," \*90.3 main and \*106.7 translator. "This is not a substitute for Beat Radio. We still are fighting for the larger issue," Freed said.

An organization that refused Beat Radio's membership is the Minnesota Broadcasters Association, whose newsletter reports some FCC updates. Included in the one-step process is the ability of a station to change from noncommercial to commercial, and vice versa. FM stations may start program test operations at 50 percent power while awaiting FCC staff review and approval of the license application; and requests for a waiver of the main studio rule may be filed by letter rather than filing a Form 301 or 340 application.

Low power radio comes to Lincoln NE, at least temporarily, and I think it's legal under Part 15 of the FCC rules. Joe Eisenberg has allowed the use of his massive, self-supporting ham tower for 94.5 FM. Car radio listeners can tune in for details about the 30 illuminated displays in Mahoney Park, northeast Lincoln, known as Lincoln Lights. Those driving through the park get to see the light show at a cost of \$7 per vehicle through Jan. 4. Sponsors are the Lincoln Journal-Star, KLKN Channel 8 and Woods Bros. Realty, with proceeds going to the local Boy Scouts council.

Most of the nation's stations were asleep the day after Thanksgiving, if my experience is indicative. I tried calling several that Friday—mainly to find out if they had stereo, but either no answers or only answering machines were encountered. These included WMXQ 94.5-WAPI Birmingham AL and the KOLL stations of Tulsa. If I were an advertiser, or somebody with a hot news tip, there would be nobody to get hold of. Radio's claim about immediacy is largely negated when nobody can get through to a station, even during prime business hours.

In my quest to have 106.5A allocated to Hawthorne WI, one Mark Heller, WTRW 1590 AM Two Rivers WI, has approached the FCC to have it allocated to Superior WI instead. In his "final reply comments," he wrote that "Elving's pessimistic view on the population trends of Superior WI and his slandering that community for having 'taverns' . . . serves no use to the Commission. Extrapolating Mr. Elving's comments, then, Wisconsin should have no radio stations." [I had said that WI has more liberal liquor laws than MN, with the bars open later, attracting late-night patrons from the bordering state.] "Elving is not using fact or logic, only slander, innuendo and guesswork common with a soothsayer, not a Ph.D. as he states that he actually is."

I managed to get the last word in to the Commission with a set of "Final Comments," where I said, "Mr. Heller may be filled with idealism about improving the image of Superior by locating a new station there, but I maintain the realities will be such that he will soon ignore his commitment to Superior and program to Duluth almost exclusively on his 106.5A station. . . No way would a station at a site at least 26 km outside Superior serve with a 70 dBu signal 70 to 80 percent of the licensed community. . . Kindly ignore Mr. Heller's fantasizing that far-off Superior WI could be sufficiently served by a 106.5A signal, and allow the allocation to go to Hawthorne, a growing community—one that is close enough to the 106.5A transmitter to give a quality signal to its residents, as the FCC rules are designed to do."

From the classifieds: *"We've found a supplier of low-noise SCA decoder boards, on a fixed frequency of either 67 or 92 kHz—ready to install into FM radios. They're only \$20 each, and kits are available for \$15. Ready-made SCA radios are available from \$40," writes Ray Topp in "Radio Shopper." Call SCS Radio Technology at (800) 944-0630. I was surprised to pick up the Oct. 23 "Supplement to Electronic Design" magazine to read "best ideas for design" included an "SCA Receiver Demodulates Additional Subcarriers." It is by David L. Albean, Thomson Consumer Electronics, Indianapolis, and the design is based on the ancient LM565 integrated circuit. That design is at least 25 years old, and not as good as what SCS Radio Technology offers or I offer with the Elf-4 or the Elf-2A circuits. The Elf-4 uses the CA3089/CA or LM3189, which can play on 4 to 16 volts, while the 565 circuit requires at least 9 volts. My Elf-2A tunable SCS circuit with L-E-D can play at 3.5 volts.*

*Looking for broadcast equipment inventories of both older and newer equipment, parts, etc. Early (1954-1963) transistor radios wanted. Jon Hall, 706 Rose Hill Dr., Charlottesville VA 22901; (804) 984-4255.*

*High school wants studio equipment for FM 88.3, tax deductible donation. Another pirate coming on? Anyway, send your stuff to Alden Williams, HHS-AFJROTC, 1175 E. College St., Brownsville Tn 38012; (901) 772-3358.*

*M Street Radio Directory, 1997 edition, isn't ready, despite ad seen in "Radio Shopper." When it is out it'll be called the "Eighth Edition." The delay, my friends at M Street tell me, is due to all the ownership changes. Hopefully, by the time the \$55.95 book is shipped the rate of ownership changes will slow down and the book current until a later edition comes along. Call in credit card orders to (800) 248-4242. If I get a supply in later I may offer it at a discount.*

## FM FORUM

### CONTRIBUTIONS FROM READERS

A reader, whose letter was partially printed in October, wondered about the colors used on the "FM Atlas" covers. Those colors are selected based on the Pantone chart. The 18th will be Pantone 157C, yellow reddish; the 19th ed. 284C blue; the 20th 397C pea green; the 21st 4655C brown; the 22nd 493C warm red; the 23rd 521C lavender; the 24th 5425C blue slate. The colors are further defined. For example, the 18th edition, Pantone 154C yellow reddish is 6 parts yellow [37.5]; 2 parts rubine red [12.5]; and 8 parts trans. white [50.0]. But don't avoid

buying a certain edition because you don't think you'd like the color!

Bruce Miller Earle, B-100 Mirando City TX, would like to lease its SCS. "We augment our main Class C-2 transmitter site at Pescadito TX with a 10 kw on-channel booster in center city Laredo TX. We purchased a Harris digital exciter that is the most transparent to robust multiple SCA injections. . . I feel that Spanish is not an option, as we are the highest percentage Mexican/American city in the United States, and bordering Mexico, we have no shortage of Spanish programming [on radio]. We do have a small but affluent Asian and Hindu (Indian) community that I feel might support an SCA program stream if available for us to feed."

Clarke Ingram is glad my surgery of January was successful, but my account of the Rochester events in the latest FM Atlas "requires a few minor corrections. ARS did not 'agree not to buy' any radio stations, but was allowed to purchase all of the Lincoln Group stations (WPXY 97.9, WVOR 100.5 and AM stations WHAM and WHTK). However, upon the close of this sale, ARS immediately spun off WVOR and the two AM stations to Jacor, and also assigned to Jacor its option to purchase WNVE 95.1. . . Finally, ARS did not put WAQB on the air; this was done by Brighton Broadcasting in Oct. 1996, and ARS purchased the radio station [now 'The Zone' WZNE] in April of this year. WAQB repeatedly played the same five CDs with a cart machine automatically playing the station ID every half-hour. The five CDs heard were Rhino Records' 'Rock Instrumental Classics,' Volumes 1 through 5. Bumble and the Stingers have presumably never gotten so much royalty money!"

Steven C. Wiseblood installed a Radio Shack 6-element yagi antenna on his girlfriend's house near Ciudad Mante TM. During the first weekend, he was "very impressed with the results. I received several unlisted stations from the Tuxpan area of Veracruz. I also heard all the Tampico stations, and an unlisted station on 93.9 which seems to be near the Aldama area, about 100 km east of Ciudad Mante. Most fascinating are stations being received from the states of Puebla and Hidalgo, 200 to 300 km south/southeast."

My daughter Kim, e-mails from ND: "Warning! If you receive an e-mail titled 'Join The Crew' do not open it! It will erase everything on your hard drive!" She received the message courtesy IBM and the Army National Guard.

Longtime subscriber John Clark writes: "I found your article about KQIV (106.7 Lake Oswego OR, Nov. p. 8) very interesting. I remember that progressive rocker WAAF Worcester MA began broadcasting in quadrasonic in January, 1972. By the time I worked there, in 1978 (my first radio job), the music had been tightened up considerably, and quad was long since forgotten! . . Please add my voice to those requesting a return to miles and feet,

instead of the metric system in your FM Atlas. To this day, I still grab my early 1980s FM Atlases, or even my 1973 re-issue to translate. Other than that, keep doing what you're doing! Happy Holidays!"

Bob Brummond, a vice president of the National Association of Radio Reading Services, is an advocate for preserving spectrum for reading services when digital audio broadcasting comes along. He wants 150 Kbs of the 19 mbs digital channels for the distribution of accessible information to disabled citizens. Allocation would probably be: Audio format—30 kBs to deliver local newspapers and periodicals; 30 Kbs for delivery of books; 30 Kbs for descriptive video. For video—30 Kbs for closed captioning; other formats—30 Kbs for bulletin channel for all disabilities, such as for emergencies' notification. Brummond sent the e-mail package to the Public Interest Advisory Committee, care of Karen Edwards at piac@ntia.doc.gov. Brummond, who is blind, has on his signal viability distribution committee of the NARRS such people as NH's Frank Karkota, Compol; Steve Terry, WYPL Memphis TN, Steve Kincaid, KS Audio Reader; Bob Watson, MN State Services for the Blind.

John Oldfield, Ph.D., is hammering the drums against WAER \*88.3 Syracuse, whose signal beats against that of WJPZ \*89.1 to block reception of WRVO \*89.9 Oswego NY. "This is the 50th anniversary of WAER, and I thought you might be interested in some recent 'happenings' locally. The station is still running 50,000 watts under program test authority (since Feb. 1996), but in a letter dated Oct. 20, WAER was given 45 days to review a list of 97 pages of complaints, mostly unresolved. . . The University identified the problem as WJPZ's transmitter, and installed a couple of filters to suppress the intermod products, but the students went in and disconnected them without permission! The FCC is very concerned about that, too."

When I was at WAER, 1966-69, it was 3.5 kw on Day Hall, and still monophonic. It had just started broadcasting urban music in the daytime, much to the delight of high school students who could hear it on the black and white TV sets common in the classrooms of the day when fine tuned to Channel 6. Other WAER alumni and friends can check out its website at <http://web.syr.edu/~waerfm88>. The station fired its previous manager and is re-emphasizing its commitment to serving students. Manager Jon Lee sees it as a training ground for tomorrow's broadcasters. "Our mission is to ensure that students. . . are well-prepared going into the workplace." Oldfield wonders why they need 50 kw to do that. Former engineer John Soergel also thinks 50 kw from Day Hall is too much power.

"Radio's Best Friend" Art Vuolo has a bunch of new brochures, mostly mentioning stations across the country by format, and each having sponsors or co-sponsors. For example, the "young country" guide is brought to us by the Chevy Blazer and Young Country 99.5 Detroit. Art also sent guides for talk radio; for Michigan and one for Detroit. He has a video of radio airchecks, Sept. 1993, produced for the NAB. Disc jockeys and stations they worked at are listed. It is not an NAB production, nor is it endorsed by the NAB. "Parts of the tape may be objectionable to some viewers. However, almost everything on this tape was taken right off the air!" His "best of" video air-chex is \$29.95 plus \$3 shipping (\$6 outside USA) on VHS hi-fi stereo from Vuolo Video Air-Chex, PO Box 880, Novi MI 48376. Or write him with \$2 and I'm sure he'd send some copies of his dial guides plus a video price list, noting who's on the tape(s). "These tapes are a labor of love, and we hope you truly enjoy what we have produced."

Peter Russell says WHOM 94.9 NH claims "North America's largest geographical coverage," but my FM Atlas shows KRUZ 103.3 Santa Barbara and KPFK \*90.7 Los Angeles with more. I think they took that claim from an early FM Atlas, when they did PI advertising for the book. Nobody noticed that the CA station coverage figures are higher, although WIPR-FM \*91.3 San Juan PR was noticed with more coverage than WHOM has, hence the idea that WHOM had the greatest "North American" coverage. I guess PR is not in North America! "When I talked with the fellow at Shively about tuning the 88.3 antenna (WYAR Yarmouth ME), he mentioned that he and the technical dept. had just tuned WMSJ's antenna for 89.3, which is all vertical, half-wave spaced design. I understand that the transmitter is going to be a Nautel, made up in Nova Scotia. . . I worry about WPOR-FM on the same tower (they have a Harris FM-25K tube PA) about intermod, but the tuned Nautel might work out. I would have been very doubtful about a wideband, solid-state transmitter in that kind of environment. Blackstrap Hill where the tower is located is just loaded with two-way, cellular, two standby TV transmitters, and the new 'kid' on the block has to foot the expense of cleaning up any radio problems that result. There is an association of radio owner/operators for the hill. They run intermod studies beforehand to look for possible conflicts, and help in resolving problems that arise.

"Do you think the low power, 10 watt, class D type station will come back? My friend out in L.A. has figured out a way to get his L.A. station by dropping in an educational station in Indio CA to the west of Palm Springs, and then putting in some

translators."

After four years of trying, construction is about to begin on OmniAmerica's first 372 m tower. OmniAmerica is one of the very few companies equipped to erect new towers, which are increasingly in demand for high definition TV, cellular, PCS communications and FM. The new tower will be in Milwaukee, and provide digital TV for the city's two public stations. It will allow for 12 TV stations total and 14 FM radio stations. The \$7 million tower is expected to be completed in 1999, "but it will not fill up for about eight years," said Anthony S. Opepek, chief operation officer of OmniAmerica.

Ernie Wilson, Pan-Com International: "I have enjoyed reading your newsletter. Quite so now that you're including news from the 'free radio' side of broadcasting. Not that I advocate breaking the law, you understand. There is a need for responsible low power broadcasting. Unfortunately, there seems to be a number of yo-yo's that get downright aggressive and lately even obnoxious and profane. The alt.pirate newsgroup has people with some very off-the-wall language. It's disappointing that low power broadcasting cannot proceed in a civil manner. . . We have a Part 15 certified broadcaster which is doing very well. The present catalog has been devoted only to broadcasting, both domestic and export. . . I was just thinking—a student assistant of mine put me onto the FM Atlas a little over 20 years ago. Must be having fun. The time is sure flying by." Visit Ernie's website at [www.panaxis.com](http://www.panaxis.com), or e-mail: [ernie@panaxis.com](mailto:ernie@panaxis.com).

Ohio's Bill Fait: "I find myself thinking back to the early 1960s when most FM services were AM-FM simulcasts. Fifteen or 20 years ago, I was working for a daytime only radio station, WELW. When we decided to go to an AM-FM simulcast as WELW AM and FM on 107.9 and 1330 kHz, I thought, 'This will never work!' It didn't work! The idea of the AM-FM simulcast still lives, despite attempts by the FCC to outlaw the practice. If you look in the Second edition of FM Atlas from 1973, then you will find: 'In Canada, the Canadian Radio-Television Commission has recently proposed that all AM-FM simulcasting must cease'."

CA's Dan Ramos sent a copy of the L.A. Weekly, an alternative paper. "The article I want to bring to your attention is entitled 'Deadly Frequency', written by David Cogan. It is about microbroadcaster Michael Taylor and his attempts to go on the air in the Hollywood area. He helped start a group that wanted to broadcast to the black community. Two of those members are now accused of murdering him. This article shows the dark side of microbroadcasting that we rarely hear about. These guys are definitely not teenagers with a small station in a bedroom." The article

mentioned that the two groups would use 100.7 and 101.5, but apparently never made it on the air, except for a two-week period when "KLLR" broadcast soul music and a taped interview with Michael Taylor, who by then was dead. "The signal was scratchy and only partially intelligible in the vicinity of La Brea avenue."

Ramos likes the arrangement of the FM Atlas, and finds it reminds him of the old North-American Radio-TV Guide published by the late Vane Jones. "He published his guide during the early 1960s and '70s. I was in junior high school when I picked up my first copy. That guide helped keep my interest in radio going. Hope your guide is doing the same thing for younger guys today." [I have several of his guides from the first edition, 1961, to the 15th, 1984. I use those plus old "White's Radio Logs" from 1948 to 1954 in helping to construct FM radio dial histories.]

Still playing jazz music on WGBH \*89.7 Boston is Ray Smith, 75. It's on Sundays 6-8 p.m., his "Jazz Decades" show, having celebrated 25 years on the air. The show is carried on about a dozen other stations across the country. It focuses on traditional jazz from the 1920s to 1930s, including the likes of Bix Beiderbecke, Louis Armstrong, Jelly Roll Morton and Benny Goodman, according to an article sent by Alex Nardacci.

SMITH

Alaska's Rod O'Connor spent two weeks in Hawaii. "The radio dial has expanded a lot since when I was stationed there from 1982-84. Quite a few more stations, but many of them still have the same format: KSSK-FM 92.3 (formerly KULA), KQMQ 93.1, KIKI-FM 93.9 (formerly KMAI), KAIM-FM 95.5 (still gospel) and KPOI 97.5, alternative rock. KUMU-FM 94.7 is one of the last easy-listening stations left in any major city. Surprisingly, I found them to be very pleasant, and they sounded quite healthy—lots of ads. Also pleasant to listen to—KUCD 101.9 "smooth jazz" with some Hawaiian at times included. All the other FM stations from 98.5 up are fairly new. . . Glad you included the items I sent you several months ago on pirate radio around Anchorage. Haven't seen any updates [on the pirate scene] in Alaska."

Phil Boersma in western MI reluctantly agrees with my editorial in May entitled "Watch Piracy Prevail." "In other words, I've changed my mind on the subject of 'microbroadcasters'. The deregulated media pigs, comfortable in their government-sanctioned near-monopolies, have made the FM dial here so homogenized and incredibly lame that I no longer listen to commercial FM radio (except to check out stations to report to you!). Noncommercial FM is also well on its way to featuring only two types of stations: NPR's all-talk, and clones for Jesus. Maybe illegal FMs will end up being the only FM worth listening to!"

Until January, *Bruce F. Ehling*

**Stereo—or to be \$tereo**

AL Trussville WENN 105.9, s, "Win 105.9." It

has no ID with Birmingham.  
 FL Sarasota WKZM \*104.3—stereo resumed.  
 MI L'Anse WCUP 105.7, format not announced. Heard testing, carrying some of the programming of WUPY 101.1 Ontonagon.  
 OK Collinsville KMRX, ID with Tulsa.  
 PA Slippery Rock WRSK \*88.1  
 WI Whitewater WKCH 106.5, to, with mainly talk/news and some oldies music, all parallel to WFAW 940 AM Fort Atkinson that it IDs with. "So far, the WKCH calls only get mention during legal IDs and special announcements, and the rest of the time the station refers to itself as 'WFAW'."

**Monophonic**

CA Los Angeles KKLA-FM 99.5, tg, remove \$ indication.  
 CA Rio Vista KRVH \*101.5, with a stereo pilot, "but I haven't noticed any separation on the car radio."  
 CA Rosamond KIKX 93.5—notation last month was wrong. The station "is mono with a false stereo indication—simply a stereo beacon with no stereo effect."  
 PA Covington WDKC 101.5, "back in mono." Remove \$ listing.

**Format Changes**

*Formats are the same as in the "FM Atlas"*

AL Birmingham WRAX 107.7 p, new rock, "107-7 The X." "After all these years, it's a bit of a shock to tune to 107.7 and not hear the thump-thump-thumping of urban ghetto music." [with KSED 107.5 Sedona-AM  
 AZ Williams KWMX 96.7 o, in a combo/  
 CA Davis KQBR 104.3 sr  
 CA Fair Oaks KSSJ 94.7 j, "Smooth Jazz 94.7 The City," ID with Sacramento. Now owned by Entercom, and having moved from Carson City NV. It was testing in parallel with Shingle Springs 101.9, now KRRE. [See below, Sacramento and Shingle Springs.]  
 CA Roseville KRXQ 93.7 k, may become KRAK. Changes its nonID to "Gold Country 93.7."  
 CA Sacramento KRAK 98.5 rp, may trade calls with Roseville. Format change expected to be completed by March. ARS is trading the 101.9 frequency to EXCL Communications as part of a deal involving other stations in the area, some as far away as San Jose. KRAK to become "98 Rock."  
 CA San Jose KBAY 100.3, S, I, "Radio Romantica" (as it was when it was on 104.9, Fremont). Call letters to change, with the KBAY calls going to 94.5 Gilroy, "The Bay 94.5" (from "The Fox").  
 CA Shingle Springs KRRE 101.9 S, I, the first "full power Spanish FM station" in the market. Its jazz format goes to 94.7.  
 CO Fort Morgan KBRU 101.7 k, having dropped its Spanish. [plus some talk  
 CO Kremmling KRKM 106.3 o, classic hits, / CO Pagosa Springs KWUF-FM 106.3 o  
 CA Thomaston WTGA-FM 101.1 o, loses "Fun 101"  
 GA Rome WQTU 102.3 mr  
 IN Alexandria WAXT 96.7 rm  
 IA Alta KBVU 97.5 r, modern AC  
 IA Bettendorf KORB 93.5 tp, adding Howard Stern  
 KS Dodge City KDGB 93.9 op, "Ralph"  
 LA Hammond WHMD 107.1 rm  
 LA Minden KSYR 95.7 rm. It had been silent pending an upgrade and move to the Shreveport market (see "Facilities," Nacogdoches LA).  
 ME Freeport WMSJ \*89.3 gr  
 MI Detroit WDTR \*90.9 sc, now playing "some sort of classical broadcasting. . . But it. . . won't totally satisfy the still-simmering for-

mer WQRS (now WXDG 105.1) audience. Bloomfield Hills' Nitsa Stoddard has emerged as the leader of a 'grassroots movement' to restore classical FM in Detroit. She's trying to launch a petition drive at PO Box 1132, Birmingham MI 48009-1132; and e-mailers can reach ex-WQRS program director Dave Wagner at DOWAGNER@juno.com."

MI Grand Rapids WBYW \*89.9 expected to become gr, \$ in an LMA-to-buy with WCSG 91.3 Grand Rapids MI and WAYK 88.3 Kalamazoo, and said to soon be simulcasting WAYK, but for the Christmas period was monophonically relaying Sacred Favorites Radio, which resides on WCSG's 92 kHz SCS. "WBYW calls will probably change when the ownership transfer occurs." Its IDs mention "an outreach of Cornerstone College." And "speaking of 89.9, WTHS Holland has been all-Spanish for at least the last two weeks. I don't know if that is temporary (while Hope College is on Christmas break) or a permanent change. I'll monitor 89.9 and let you know on both stations. . ."

MN Minneapolis KTCC 97.1 p, while WRQC 100.3 [still rt, with Howard Stern], "has a broader rock, more like KQRS [92.5 Golden Valley MN, still op]. Chancellor is going after the KQRS audience with its WRQC, and the older audience with KTCC." Frequent on-air mentions on WRQC attack KQRS.

MT Columbia Falls KKMT 95.9 m, "The Mountain," LMA to buy with KBBZ 98.5-KDBR 106.3 Kalispell-AM.

NJ Cape May WSJL 102.3 j, "Sax," along with WSAX 99.3 Pleasantville.

NM Alamogordo KNNM 103.7 op, owned with KPSA-FM 92.7 La Luz-AM.

NY Glens Falls WCQL 95.9 still o, but it's being marketed as "classic hits. Quite honestly, to my ears it really sounds like a rather sloppy AOR, and they do plan some current, or at least very recent music." WCQL has "gone through several different formats during the 1990s. It was a classic rock station before it flipped to contemporary country as North Country 95.9 two years ago."

NY Loudonville WVCR \*88.3 r, after college administration took heavy metal off. Rev. Kevin Mackin, Siena College's president, said the radio station's music must be consistent with the school's religious traditions: "How can we . . . talk about tolerance and acceptance of people—and then we have something from Siena on the airwaves going against that value system?" WVCR now signs off at midnight, but is about to go 24 hours with automation equipment donated by Albany Broadcasting Co., which owns four local commercial stations. Meanwhile, student groups have been considering an urban format, blended with rap and modern rock, "but any proposed formats must be reviewed by the station's board of directors [with] music the directors aren't sure about must be reviewed by the faculty advisors." Nearby WPTR 96.3 apparently wasn't identifying with its call letters, even at or near top of hour, and not with city of license, Voorheesville, only saying "The capital region's all new Power County 96.3, Albany, Schenectady, Troy." I have postcarded them. Now I hear they're doing it properly (see "Multi-City IDs," below).

ND Williston KYZZ 96.1 k

OH Piketon WXZQ 100.1 r, CHR

OK Bethany KNLT 104.9 j, parallel to KTNT 97.7 Edmond, and linked to KATT 100.5-KYIS 98.9.

OR Hermiston KQFM 99.3 o[Idies]

PA Pittsburgh WVTY 96.1 r, modern AC, "The River" (bottoms out from "Variety 96").

SC Clemson WCCP 104.9 t, mono, One-on-One Sports

SD Winner KWYR-FM 93.7 m

TN Belle Meade WNPL 106.7 sr, expected on this month, run along with WQK 92.1 Hender-

sonville. WRLT 100.1 Franklin has dropped its ID with WYYB 93.7 Kingston Springs TN. The 106.7 frequency is still occupied by WAMB-1 Donelson. WAMB-1 is even advertising on bus signs. "They've been fighting the Belle Meade station almost from the start."

TN Kingston Springs WYYB 93.7 f, blues and folk, "The Phoenix."

TN Springfield WDBL-FM 94.3 fp, folk as well as its previous format later at night, also known as "The Phoenix." WRLG 94.1 Smyrna has not changed format yet, as expected. WRLG and WRLT 100.1 Franklin have stronger signals in Nashville, while "93.7 and 94.3 are both in intermod-riddled (and affected by interference from other middle-Tennessee Class As)." WLAC-FM and WGFY call letters' swap (see above, "Call Letters") has not taken place as of early January.

TX Falfurrias KPSO 106.3 still k, Spanish, with country 6 a.m. to 1 p.m. and Tejano 1 p.m. to 10 p.m., but drops religion. Former KPSO 1260 AM sold to The Evangelistic Worship Center and has both English religion and Spanish religion.

TX Howe KHYY 95.3 still k, but has "that terrible brokered Tejano dance program that used to be on KZDL 107.1 Terrell. It seems to start at 10 each night."

TX Wichita Falls KTEO \*90.5 g, Children's Sonshine Network. "KTEO becomes the network's first mainline CSN affiliate, as the network is usually heard via subcarrier delivery (800-819-5437)," with the danger that KTEO will become monophonic.

V A Radford WRIQ 101.7 mr, "Easy 101" (from "Q-102")

WI Racine WEZY 92.1 mr, "Soft and Easy Hits."

**On Air—Real Stations and Pirates**

CA Santa Barbara "KPRV" 102.3, variety of pop music, mono. Female announcer says, "Santa Barbara's Private Radio Station," later a male announcer called it KPRV. "It has been observed strongest in uptown Santa Barbara but not as strong in either downtown or Goleta." When KPRV isn't on sometimes a weak K272DI 102.3 Fillmore makes it into town. Historically, KFOX-FM 102.3 Long Beach made it into Santa Barbara. "It is now KJLH Compton, presumably a change of city of license, though I wonder about its transmitter location. The last time I was in Long Beach . . . the old KFOX-FM tower with its cloverleaf antenna could still be seen along the light-rail Blue Line, though I don't know if today's KJLH uses it or a new location. In Santa Barbara, its signal was overridden by KEAR's K272CB Santa Cruz Island when it was on, and also now by "KPRV." Also around Gold's Gym, a chain of commercial exercise places, are signals having TV audio at 96.9 or 96.1. A clerk said that the TVs are on but with the sound turned down. If desired, one could exercise with a portable FM headset to hear the TV audio. It could be heard within 80 m.

CA Santa Rosa "Jazz Rogue Radio" 87.9: "It's great. There's nothing else out there like it," said Bob Lucas, a jazz musician and former radio disc jockey. "I don't know who the rogue radio guys are, but I admire them. They know what they're doing and they know jazz." It operates in defiance of FCC rules, according to a story carried in the Sacramento Bee. Station is not identified on the air, "nor do they have commercials or announcements."

FL Miami WAEM \*102.3—continuous tape loop TISation in six languages with a welcome message and tips on how not to get carjacked.

IN Delphi WNJY 102.9—but in a forced bankruptcy. "Owner Bill Diehl won't turn it over to a trustee."

IA Waukon KNEI-FM 103.5, now in stereo, and having moved from 103.9.

KY Louisville 93.9—a pirate serving the eastern section of town with big band, latin music and classical.

MI "Radio Free Lenawee 99.3" Adrian—Rick Strawcutter called and said it moved from 97.7 voluntarily to protect a translator on 97.7 in Toledo OH. However, I show no translator in the Toledo area on 97.7, and a check of the FCC database showed nothing. "Our case is being handled by a judge who seems sympathetic. We're hoping for a favorable ruling." [See Jan., 1997] p. 5, col. 1.]

MN Mankato K247AL \*102.7, but "stereo is slow in coming in. Equipment isn't adjusted well yet."

MN Minneapolis—a Christmas pirate on 107.5, same voice as was on "Ballot Box Radio" 95.7 (Nov. p. 4, col. 1). It plays (or played) Christmas music because "commercial stations were doing a poor job with it." But KS95, WLTE and KQQL were all programming Christmas music. "It kind of cheapens their cause to go on the air with the same thing as everyone else."

MN Redwood Falls K295AD 106.9, but at reduced power "as amplifier got damaged because of ice on the antenna. Will be sending it in for repairs. Should cost less than \$300."

NJ Hazlet 96.7—supposedly a classic rock pirate on Friday-Saturday nights and Sunday afternoons. It is "WHRX."

NY Brooklyn Radio Konbit (Apr. p. 3, col. 3 and May p. 4, col. 2) now on most nights, 87.7, and early Sunday mornings. Their phone number (718) 693-9699 is listed for Gayrol Friedman, 1685 Nostrand Ave., Brooklyn NY 11226. The Haitian Cargo Co. advertises; it is at the same address.

NY Liverpool 101.3 temporary stereo Christmas for "Lights on the Lake" event, believed to be using the W267AL 101.3 Syracuse facilities—owned by WTKW 99.5-WTKV 105.5.

NY Nyack 91.9, Action Radio, 20 watts.

NY Queens (or possibly in Brooklyn)—the old "WJQR" 91.9 (Apr. '96 p. 3, col. 3) goes by different names—"WDRX," with "Dr. X" on Thursdays and Fridays.. On weekends it's "Noventa y Uno Punto Nueve FM Stereo," with Latin music, a Spanish-speaking DJ and lots of ads for business in Jackson Heights and Corona.

NY Skaneateles 103.3 \$[tereo] information station, run by the Chamber of Commerce.

OH Bainbridge WKHR \*91.5 now on 24 hours from Kenston High School. "This station is located in Bainbridge Township OH . . . Since there is no post office in that township the street address is 17425 Snyder Road, Chagrin Falls OH 44022. Since this can be confused with the incorporated municipality of Bainbridge in south-central Ohio, I wonder why the FCC did not license it to Chagrin Falls? The FCC recognizes this as a town, but the postal service does not. If the township were to be incorporated as a municipality, the name might need to be changed to something, such as 'North Bainbridge'. This type of thing happened before in Ohio, in place of two towns named Salem, we ended up changing one place to 'West Salem'.

"Earlier this year, the Kenston High School Radio, WKHR, was operating at reduced power due to damage from a thunderstorm. WKHR held a membership drive to get funding for repairs. Things went so well that the radio station returned to full power and expanded programming to 24 hours a day. This station is being run as a community service, by and for members of the communities that are served by the Kenston School district, which includes the town of Chagrin Falls, a center of tourist attractions. The tourists are the main 'industry' of this area of Ohio. A couple of major theme parks are found a few [kilometers] south of Chagrin Falls, 'Geauga Lake' and 'Sea World Ohio'," B.F., Painesville OH.

VT Tourism Radio operates a network of 15 very

low power FM stations between 89.7 and 90.5, at various rest areas along the highways. WI Wausau W265AY 100.9 has a "poor signal. . . Many hours and many dollars have been spent during this past year working on a solution. . . A possible solution has been found and that sometime in 1998 we hope to be able to improve the WRVM signal in Wausau on FM 100.9. To correct the problem requires that a modification to the current translator license be filed with the FCC. . . Approval could take up to six months after the application is filed. Improving the signal will require the purchase of new equipment." To help, contact Henry Tilloson, (715) 845-2548. He's president of Wisconsin Valley Christian Radio, the translator licensee. WRVM 102.7 Sureing recently voted to change to noncommercial operation, about which more will be written later.

ON Simcoe CHCD 106.7 now simulcasting 1600 AM. CBL Toronto's move to 99.1 will mean a relay in Crystal Beach will get approved.

"How about 740 AM going to WTOR Youngstown NY, CP instead of 770 daytime?"

CHINA—Clear Channel Communications signed a sales deal with 13 stations of state-owned Radio Shanghai. Included are two FMs, 8 AMs and three shortwave facilities in this market of 50 million.

DENMARK has 300 local FM stations "open to Christian programs. . . The Lutheran church in Denmark shows no interest in Christian broadcasting, other than an occasional formal church service. . . Danish Christians have no broadcasting experience and so far no international Christian broadcasters have been willing to work in partnership with the Danes to produce programs. Like many countries in western Europe, Denmark's need is great. But it does not have the glamour of the eastern European countries, where in fact both the church and Christian broadcasters are usually fighting fit—unlike the church in Denmark." [From the Fellowship of European Broadcasters, as reported in "Religious Broadcasting" magazine.

TURKEY has a Christian commercial station, Good Music FM (frequency not available), Istanbul, with a potential audience of 30 million. It features contemporary Christian music and light adult contemporary.

### Off Air—Or Not Yet On

AK Anchorage "Free Radio Spensard," 93.1, operated with 10 watts from Janice Powers' Old Firehouse Cafe. FCC visited and found its operation illegal, and persuaded them to take it off the air. "Station supporters have removed the equipment from the Cafe." Also pulling the plug—Girdwood's Glacier City Radio. They did this after receiving a warning letter from the FCC. This left Girdwood residents with no locally originated service. "In the meantime, we're hearing of more and more so-called 'pirate' stations hitting the air in town and some out of town that are pumping 20 watts."

CA Grover City KIXT 107.3, but expected back later this month with a new format and a combo with KSLY 96.1-KSTT-FM 101.3 Los Osos-KX FM 99.1 Santa Maria.

IN Indianapolis—all known pirates there were "scared off."

MA Allston "WLMR, Local Music Radio" 105.3, needing money and a permanent location. Mailing address: 214 Harvard Ave., Allston MA 02134.

ND Fort Totten KABU \*90.7, but should be on shortly. Its manager is Peter Coffey, former

g.m. KMHA \*91.3 New Town ND.

OH Southwestern OH stations on 105.5, 106.3 off air. Free Radio Liberty 105.5 West Chester ran a tape loop saying they're going off the air (Oct. p. 4, col. 3).

### Deletions

CA Santa Barbara K201CU \*88.1. It went to 90.5 briefly, but is now off, being displaced by the new KMRO-2 90.3, a booster of a monophonic Camarillo station. FCC still lists K201CU 88.1 as licensed, however.

CA Walnut Creek KSOL-1 98.9

CO Montrose K206AG \*89.1 (see "New," above)

GA Atlanta W264AE \*100.7: "The FCC awarded the frequency to another station," referring to the move by flea-powered WGH R Marietta from 102.5 to \*100.7 to accommodate the new WAVE 102.5 Mableton (not yet on air; see Nov. p. 2, col. 1)."

KS Arkansas City K217CH \*91.3 (see "New")

MS Natchez W220BN \*91.9 (see "Facilities," above)

MT Hamilton K252CC 98.3 (see "New")

### FMistakes—FMedia! FM Atlas-17

CA Double Mountain (not "Bakersfield") K219-AO \*91.7, Dec. p. 2, col. 2.

CA Porterville K220EY (not "K220EV") \*91.9, Dec. p. 2, col. 2.

CO Glenwood Springs 92.7 KKCH (was KZGO), not the other way around, Nov. p. 2, col. 1.

IL Virginia WVIL 101.3—town misspelled, p. 202. [not "WAJQ," p. 201.

MI Crystal Falls 100.7 calls are WAQJ/J

MO Kansas City KOZN 102.1—frequency not

"1092.1," Nov. p. 2, col. 2. FCC still shows its calls as being KYYS.

MT Kalispell \*99.7 K259AD, not "K249AD," Nov. p. 2, col. 2.

NM Kirtland 93.9 K230AF (not "K203AF"), Nov. p. 1, col. 2.

NY Conklin—ID with Binghamton misspelled, WCDW 100.5, p. 200.

NC Charlotte WA2XKB \*98.7—\* missing, Nov. p. 2, col. 2. All three transmitters are on 98.7, none on 98.9 as of April, 1997.

ND Bismarck 98.7 is KACL, not "WACL," Dec. p. 2, col. 3.

OK Frederick KSYE \*91.5 is the mystery "Wichita Falls TX" station heard. Frederick is between Wichita Falls and Lawton. "They are 100 kw and relay KCB!" (Dec. p. 4, cols. 2-3).

TX Winnie KOVE-FM 100.7 is "K-Love," not "The Dove" (Dec. p. 2, col. 1.)

VA Virginia Beach 103.5 calls were W278AF, not "W278AE," Dec. p. 5, col. 1.

WI Port Washington WGLB-FM 100.1 6000 h.v (not 3600); (97 m, d-a), p. 199.

ON Barrie CIQB 101.1 is 800 h.v (not "1800"), 194 m, p. 202.

ON Ottawa CKDJ 96.9 charges \$3 for a 30-second commercial, not \$30, Nov. p. 2, col. 2. I'm still considering it a commercial station, because the charge is for a definite length of time, unlike what U.S. noncommercial stations are supposed to do. It is licensed to Algonquin College as a "campus instructional radio station."

USA—the Braille Forum article URL (Nov. p. 5, col. 1) should be <http://acb.org/Magazine/index.html>, then August, 1997. The word "Magazine" is missing from November's mention.

"Great Dec. issue—12 pages! I sure enjoyed it, although I'm sure it must have been a lot of work for you—lots of good info, Happy New Year," R.O.C., Kodiak AK.

### SCS/SAP/Pro Channel Services

*Symbols are as in the "FM Atlas"*

CA Huntington Beach KOCE \*50 has "In Touch" radio reading service on itsSAP.

MA Springfield WGBY \*57 has Radio Reading Service of Western New England on itsSAP, as well as the service's being on the 67 kHz of WTCC \*90.7.

MN Duluth WDIO 10 has a pro channel, 102.271 kHz. "Are you authorized to tune in? We are using it for our own purposes. It's run from our master control." Carrier remains on all the time, occasional audio, especially around news times. Good sounding audio; seems to feed promos to area radio stations.

WI Milwaukee WYMS \*88.9 still has a radio reading service at 92 kHz, but that is expected to end soon. "I was on the board of the Wisconsin Radio Reading Service when that closed, but was unable to stop it." If WYMS' reading service closes, that will be the end of radioreadingservices to the blind in Wisconsin.

"I find it interesting that car radios (in Britain) not only have all bands, but shortwave as well. Of course, they all still have the display (RDS). Tuning to London displays 'Capital', tuning to any BBC Radio 1 Station displays 'BBC R1', etc., and all the stations use it," C.K., TX, via e-mail.

"I'm thrilled with the modified Radio Shack 12-604 radio with tunable SCS/SAP. I was amazed how rapidly the other radio I sent you went through the mail. We sent it on a Monday. It arrived back here on Friday of the same week. You must have sent it back the same day you received it. . . After you adapt this one, I will have three (RS 12-604s). That is plenty for a one-person, two-dog household," Dr. M.B., Claremont CA.

### NonIDs, Not Just Slogans

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour, as required by the FCC and Industry Canada (at or near top of hour)*

NJ Freehold Township WPDQ-FM \*89.7 Q-89.7, but has been IDing only as Freehold. They "assured me they will re-do the IDs." They also ID with Howell. I wonder if they correctly give their calls as WPDQ-FM, and not as "WPDQ"? No longer IDs with Belmar-Toms River.

TN Jackson WTNV 104.1 uses calls, no "V-104."

### Multi-City IDs in Use

CA Carlsbad KMCG 95.7 with Poway-Pacific Beach, "Magic 95.7."

CA El Rio KMLA 103.7 with Ventura-Oxnard-Santa Paula, mono Spanish rock. "Has been strictly mono, but in recent weeks has a stereo indication. It is a false indication, however. It is still mono. Is there a notion by some mono FM stations that they do not want to appear 'old-fashioned' on receivers, so transmit a stereo beacon and nothing else and expect listeners not to notice lack of two channels?"

CA Paso Robles KDOB 92.5 with San Luis Obispo-Santa Maria, still "B-92." Nearby KSYV 96.7 Solvang, listed as kg format, says it is "The world's smallest radio station with the world's biggest variety of music."

GA Roswell WTHA 107.5, with Atlanta. "Except for rap, the station apparently considers

anything by a black artist—regardless of musical style—to be an 'R&B oldie', so their playlist is a bit schizophrenic-sounding." Afro-American Frank Johnson (pictured)

heads the operation, but to get the frequency he had to buy into a partnership with Radio One, owner of WHTA, Hot 97.5. The station is so new the music is seldom interrupted by commercials, and so far there's no disc jockeys. On a recent morning, "It was nonstop music for the entire 30-minute drive to work. For me, it's great cruising music. The station could be picked up from the northern suburbs to just south of downtown Atlanta." There was concern that "Magic 107.5" might be confused with another "Magic," that of WMKJ "Magic 96.7" Peachtree City. But WMKJ's g.m. Joe Pedicino says that WHTA's "signal doesn't come anywhere near south Atlanta. Realistically, people here won't be listening to it, so I don't think there will be any confusion."

- NY Ballston Spa WXCR 102.3 with Albany
- NY Clifton Park WDCD-FM 96.7 with Albany
- NY Schenectady WRVE 99.5 adds Albany-Troy
- NY Stillwater-Saratoga Springs WJKE 101.3 adds Clifton Park
- NY Voorheesville WPTR 96.3 with Albany-Schenectady-Troy
- VT Manchester-Albany NY WEQX 102.7, drops ID with Rutland
- MB Winnipeg CKJR 97.5 Power 97 (from "97.5 FM")

"I've declined to renew. I liked the information you publish, but I'm going to try WTFDA again. My funds are very limited. . . I do have access to Broadcasting and Cable magazine, though so little of it is devoted to radio lately. Perhaps I'll renew another time," K.O., Joliet IL.

**Selected AM Happenings**

- CA Concord KRHT 1480 was to have been sold at auction Dec. 17, with de aimed at Alcatraz Island.
- CO Deer Trail KTNG 1370 silent.
- CO Johnstown KHNC 1360 gutted by fire. Agents for the CO Bureau of Investigation were called in to investigate the conflagration at the extreme right-wing station. "The station airs the American Freedom Network, a show that promotes survival gear, separatist movements and extreme right-wing philosophy." The fire also destroyed the publishing office of a magazine, "American Freedom." Cause of the fire turned out to be nothing more sinister than a hot plate that belonged to a couple who lived at the rear of the building at 39 South Parish Street.
- CT Westport WMMM \*1260 now owned by WSHU \*91.1 Fairport, and becomes noncommercial.
- GA Atlanta WGKA 1190 adds other music, like jazz and blues, to its classical format. It still plays classical 10 a.m. to noon and 2 to 4 p.m., "but the rest of the day it's a grab bag. Fans say that's the station's charm." It was bought by Joe Weber, 52, for \$2 million, and it had revenues of \$1 million in 1996. It claims to have 52,000 well-educated listeners who tune in the daytime only signal. [with oldies]
- HI Hilo KHLO 850 had been silent; now on/IL Chicago's Channel 50 [WPWR Gary IN] acquires its second AM in the area—WCFJ 1470 Chicago Heights, for \$425,000. It also owns sharetimer WSBC 1240, which it paid \$5,550,000

for. WCFJ and WSBC are expected to simulcast with brokered ethnic.  
 LA Jonesboro KTCC 920, along with KTCC-FM 104.9, reported silent.  
 ME Brewer WNSW 1209 apparently gives back its license to the FCC, but the Zone Corp. still owns and operates WKIT 100.3 Brewer and sports WZON AM Bangor.  
 MS Oxford WSUH 1420 off air. Lost its transmitter site; looking for a new one.  
 MS Tupelo WELO 580 silent, supposedly making technical improvements.  
 MO St. Louis WKBQ 1380 AM donated by Emmis to the Northside Seventh-day Adventist Church. It currently simulcasts WKXX 106.5 Granite City IL. Emmis has two other FMs in the area—KSHE 94.7 and WALC 104.1 Jerseyville IL.  
 MO Springfield KTOZ 1060—vandals toppled its tower. It's "all scrap metal." Station needs \$40,000 for a new tower so the big-bands' format can resume. Some listeners have called and volunteered money toward getting it back on the air. Anyone with information on who may have perpetrated the evil deed should contact the Springfield Police Department.  
 WV Welch WXEE 1340 silent. It "has been donated to Council of Southern Mountains WV and must return to the air by 1-31-98."  
 "Bigger is definitely better when it comes to FMedia! It's the only thing I read that isn't boring, so the more pages the better," J.J., NY, via e-mail.

**FM Rulemakings Proposed**

*First date is for filing comments with the FCC; second date is for replies. Stations affected, if any, are listed.*

CA Point Arena 107.1B1 for 102.3B1, Jan. 26,  
 Feb. 10  
 FL Otter Creek 95.9A, Feb. 2, 17  
 MS Tchula (move from Belzoni) 106.3C3 for A,  
 WGNG, Feb. 2, 17 [counterproposal  
 NY Malone 96.5C3 for A, WVNV/  
 NY Willboro (move from Vergennes VT) 96.7A,  
 iXPS counterproposal  
 OK Guyton 99.5C1, Feb. 2, 17  
 OR Hermiston 99.5A for 99.3A, "show cause/  
 why not?" KQFM, Feb. 9, 24  
 TX Baird (move from Eastland) 95.1C3 for A,  
 KVMX (moving from 96.7), Feb. 2, 17

TX Kerrville 106.1A, Feb. 9, 24  
 TX Wink (move from Pecos) 97.3C1, KKLY,  
 Jan. 26, Feb. 10 [9, 24  
 WA Walla Walla 99.1C2 for C3, KUJ-FM, Feb./  
 WV St. Marys 105.3A, Feb. 9, 24  
 IL, MO, TN counterproposals by Lyle Broad-  
 casting Corp. with 3 options. All substitute  
 101.5C1 for B for WCIL-FM Carbondale IL.  
 Option 1 would also put 101.3C3 in Tipton-  
 ville TN and 97.3A in Arcadia MO and 93.5A  
 for 97.3A in Marble Hill MO, affecting a CP  
 holder. Option 2 also places 97.3A in Arcadia  
 MO and 93.5A in Marble Hill MO, but moves  
 the Tiptonville allocation to Steeleville IL,  
 101.5C1, instead of Carbondale. Option 3  
 keeps 101.5C1 in Steeleville and changes  
 Arcadia IL to 103.9A, but moves the CP for  
 KAUL in Ellington MO from 103.9A to  
 106.7A.

**FM Rulemakings Finalized**

 [has] failed to establish that Hawthorne  
 qualifies as a community for allotment  
 purposes and therefore it would not serve the  
 public interest to allot a channel to Haw-  
 thorne. See Mokelumne Hill, California, 4  
 FCC Red 7108 (1989) and Lupton, Michigan,  
 11 FCC Red 14428 (1996)."

**Filing Windows Stay Shut; FCC Declares Freeze On New Commercial FM Station Applications**

The FCC has frozen the filing of any new applications for commercial FM stations (92-108 mz) until further notice. This results from the Nov. 25 notice of proposed rulemaking (Docket 97-397). Way is being cleared for auctions, now that several outstanding applications have been cleared up by settlement agreements.

The FCC said, "In order to relieve prospective applicants of the time and expense of filing applications under existing procedures that will likely be changed and streamlined under the new rules. [There is] a temporary freeze."

**Small-Print Happenings and FM Industry News**

Lynn Chadwick, president and CEO, National Federation of Community Broadcasters, issues a challenge to her colleagues: In an instance of the "increasing demand for decreasing signal space, there is evidence that religious broadcast-

ers are applying for noncomm frequencies and swapping their successful applications between themselves. The moral of the story: pay attention to any signal interference when a new station signs on and promptly complain to the FCC. If there is the idea of increasing your station's signal, there will be no time like the present to prepare your application. Available frequencies are being taken up and the trend will only continue."

Chadwick has just announced her resignation, having joined the staff of the Pacifica Foundation in Berkeley CA. "There will be a transition period when she will be serving on the staff of both organizations through March."

Michael Huntsberger, chair of the NFCBoard of Directors: "Lynn leaves a legacy of organizational strength and visibility that continues to benefit all community radio stations. Through Lynn's guidance and leadership, NFCB has been able to achieve some significant [kilometer]-stones in service to listeners across the nation and around the world." The board was to have met to discuss selection of a new director.

Also from the NFCB's "Community Radio News"—some historical information on KPFT \*90.1 Houston: It signed on in March, 1970, with an eclectic mix of music, news and public affairs, and went off with a bang three months later. The station's transmitter was dynamited by people with connections to the Ku Klux Klan. Then in Oct., 1970, it was again bombed, and the station was off the air "several months." KPFT is the only broadcaster in America known to be taken off the air by a terrorist type action. Remnants of the bombed transmitter are on display for station visitors to see.

A staff of six fulltime employees plus 75 volunteers keep KPFT on the air. Its annual budget is \$530,000. A new tower site, perhaps at

KPFT HOUSTON

an undisclosed location, "has improved the station's signal." The new antenna is 91 m higher than the old one, along with a backup transmitter. This new location "has greatly reduced multipath problems and improved reception in the interiors of Houston's many office buildings."

The station strives for community growth and improvement. It has a 6.0 average share of the audience in the nation's ninth market, and hopes to do better. "The station's local advisory board is going to play a key role in the community outreach arena," with a public meeting planned for next month "to begin an improved effort at community outreach."

The NFCB's annual community radio conference is March 13-15 at Holiday Inn Bethesda MD. For more info, call the NFCB, (415) 771-1160. There's also a pre-conference workshop Mar. 12 on planning digital conversion.

Filing fees need not be paid by FM station applicants who modify an existing license (like raising power to the maximum allowed for the same class of station). For more information, check out public notice DA-2568 from the FCC, and get the supplement to FCC Form 302-FM that helps determine eligibility.

Cox increases its presence in San Antonio. It's paying \$23 million for KONO-FM 101.1 Helotes-Aim, which includes KRIO-FM 94.1 Floresville TX—but will either sell or swap the latter. Cox already has KCY 100.3, KISS 99.5, plus KCJZ 106.7 Terrell Hills, KSMG 105.3 Seguin, plus two AMs. "This fill-in acquisition completes our station cluster in San Antonio, another high growth Sun Belt market," said Robert F. Neil, 38, president and CEO of Cox [see picture story last month, pp. 7-8]. Cox now controls 55 stations in 12 markets, and is one of the 10 largest radio holding companies nationwide.

In the Atlanta area, Radio LaGrange is buying WZLG 98.1 Hogansville-AM from JANZ Broadcasting for \$975,000. The buyers also own

WMKJ 96.7 Peachtree City-AM, and they've begun an LMA, pending FCC approval. In Maine, Mariner Broadcasting is adding WPKM 106.3 Scarborough. It already owns classical 'W Bach' WBQQ 99.3 Kennebunk and WQEZ 104.7 Kennebunkport. [in Alameda CA]

Former jazz station/KZSF's been sold to Radio One, along with KZWC 92.1 Walnut Creek. KZSF 92.7 and KZWC have been Spanish, "La Zeta." Radio One is based in the East, and has a \$500,000 grant to move its home office from DC to suburban Lanham MD. John Borders and Don Turner of Sunburst Media just closed on a \$3.3 million purchase of KTOZ-FM 95.5 Pleasant Hope MO, giving them their fourth FM in the Springfield market. [This station is separately owned from KTOZ AM, the station which lost its tower. See "Selected AM Happenings" above.]

Arthur Liu, who began in broadcasting in the mid-'70s on the SCS airwaves of WRVR \*106.7 New York, with his Sino Chinese Broadcasting, has long since advanced to main-channel FM. He's owner of WNWK 105.9 Newark NY. He's selling WNWK to Hefel for \$115 million, plus Hefel's WPAT AM Paterson NJ. Liu is apparently using part of the proceeds to buy eight AMs, scattered from the Seattle market to Los Angeles, San Jose/San Francisco, as well as WNJR Newark and WZRC New York. Liu's Multi Cultural Broadcasting is already the licensee of ethnic WKDM New York, KALI San Gabriel and monophonic KALI-FM 106.3 Santa Ana CA. Sale is to John Douglas, Douglas Broadcasting, Inc., who is in the ethnic broadcasting business. I mentioned Liu's success to an ethnic SCS broadcaster in New Jersey, who said with Liu "the timing was right."

Justice is taking hard looks at Citadel's holdings in Scranton/Wilkes-Barre, and in Colorado Springs. In the PA market, Citadel runs WMGS 92.9 Wilkes-Barre-AM, where Justice is questioning its buy of WDL5 93.7 Dallas, WSGD 94.3 Carbondale-AM. It's also questioning the proposed purchase of WGGI 95.9 Benton PA by Sinclair. In Colorado Springs, the Justice Department is concerned about Citadel's joint sales agreement with Triathlon. There, Citadel owns KKFM 96.5, KKKL 106.3 Widefield and KKMG 98.9 Pueblo, while Triathlon owns KSPZ 92.9, KVUU 99.9 Pueblo and two AMs.

Emmq to get its third FM in New York city—WQCD 101.9 from Tribune, with plans to expand into other markets. This leaves Chicago-based Tribune with WGN AM there plus FMs in Denver—KOSI 101.1 and KKHK 99.5 plus an AM.

Fined by the FCC—\$2000 to KUPD 97.9 Tempe AZ. It pertains to indecent material broadcast Aug. 2, 1997, during morning drive time by Larry McFeele. According to the M Street Journal and "Radio and Records," FCC chairman Bill Kennard has a "solid draft" of the long-promised indecency guidelines ready to go. The FCC promised "a useful and concrete set of guidelines as part of the settlement with Evergreen Media in Chicago back in 1994."

WOHT, "Hot 95," Drew MS fined \$15000 for unauthorized transfer of control. The FCC found not one, but three instances of unauthorized transfers of control affecting the 95.3 station.

As followup to the story last month (p. 10, col. 1) about losses in radio listening, Duncan research has tracked a "four year decline." Here are some reasons that radio may be making trouble for itself: 1) Less money being spent on marketing and promotion to make the immediate bottom line look fatter; 2) loss of some listeners' favorite formats—like classical, easy listening; 3) a "disturbing trend away from localness"; 4) "program segmentation has gone a little too far"; 5) "increased commercial loads." Researchers J. T. Anderton and Thom Moon noted that FM's share of listening continues to grow, "mostly because AM listening has declined." Anderton e-mailed to thank for the mention on p. 10 in December. He also had a comment on WHOM [94.9 Mount Washington

NH] having "North America's largest geographical coverage" (last month, p. 12, col. 3):

"Mr. Russell is right—mostly. Following publication of the second edition of my FM coverage map atlas late last year, Radio Ink magazine invited me to work up a list of the AM and FM signals which cover the most land area and which cover the most population." The lists and coverage maps for the top stations on each list "are posted on our Duncan web site, 'Web Site Bonus' at duncanradio.com. After about a week of evenings of running coverage studies of all possible high-power candidates, I determined that yes, WHOM does indeed have the greatest land-area coverage among the FM stations licensed in the U.S.

"The key here is land area. In all of my calculations, I determined the amount of square mileage that was over water and subtracted it from the final square mileage figure. This land area qualifier eliminates KRUZ and KPFK, since almost half of their signals are over water. Now, what we do have at KRUZ is the commercial station which transmits an ERP/HAAT combination which generates—at one point on the compass (south, of course)—the greatest distance from its transmitter to its 60 dBu contour. Straight over the ocean, KRUZ does indeed have the hottest signal of all commercially-licensed FMs in America. In no direction over land does it achieve that distance. KPFK may be larger. . . I don't follow noncommercial radio.

"The square mileage and population figures were calculated using Peter Moncure's RadioSoft software. Peter's program, extensive as it is, provides no means of separating out over-water areas. I did that the old-fashioned way—by hand! Yes, it was hundreds of calculations, and it took quite a while, especially for the big coastal AM stations! This information cannot be determined from the book. It only covers the top 100 markets, and many of the biggest signals are outside of the top 100 markets."

The contested 96.5A Biltmore Forest (Asheville) NC channel is held by WZRQ, but that's not the original holder of the channel. WZLS was previously on the air and owned by Zeb Lee, who was the original applicant. Lee was selected by the FCC over other applicants as the most qualified. However, the Bechtel decision caused the FCC to invite the other applicants plus Lee to reapply and run the station as a nonprofit organization until a license was awarded. This Lee refused to do. WZLS was taken off the air, and the operation is by the other four applicants as Biltmore Forest Radio, Inc. [See Feb., p. 1, col. 3 and later articles.] Latest is that the FCC acted "arbitrarily and capriciously" in rescinding the grant and must reinstate the permit. That was the ruling of a three-judge federal appeals court, as reported by The Associated Press.

"The Commission abused its discretion and acted arbitrarily and capriciously," Judge Douglas H. Ginsburg wrote for the U.S. Court of Appeals for the District of Columbia. The FCC plans no appeal. Barry Lee, Zeb's son, said they're pleased with the decision, "But after all we've been through the last few months, we're so tired that our elation is tempered." Sen. Jesse Helms has been a penal of FCC chairmen, both past and present, urging that Lee be given the broadcast license. This has prompted Biltmore Forest Radio to file an ethnics complaint against Helms.

Decisions hostile to Howard Stern have plagued his Canada affiliates, CHOM 97.7 and CILQ 107.1. Now that the Canadian Broadcast Standards Review Council has found the "notoriously rude and crude talk show" violates the nation's standards, there's a move to force the CRTC to lift the broadcast licences of those stations. Ian Morrison of the Friends of Canadian Broadcasting plans to tell the CRTC that those stations deliberately broadcast programs that offend Canadians. "Lifting a few licences would discipline the whole system," the group contends. "In crowded markets like Toronto, it would also

open precious FM frequencies for competition."

Also getting into the anti-Stern attack is C-Cave, Canadians Concerned About Violence in Entertainment, which charges that the Stern show breached the industry's own code of ethics and sex-role portrayal code. The show was criticized for being at an inappropriate time, when children can listen. Both stations responded with brief statements declaring they are complying with the CBSC ruling by broadcasting a summary of the decision in prime time, as stipulated. Q-107 further announced a "four-point" plan that includes hiring a producer to "monitor" the show and instituting a 60-second delay, as well as devoting \$200,000 to the development of home-grown Canadian talent.

All sides seem to agree that Stern has developed a huge following in Canada, helping both stations' ratings considerably. A previous success for the CBSC was when the imported TV children's show *Mighty Morphin Power Rangers* was found to be violent. Subsequently, YTV and Global Television agreed to drop the show. But Stern's affiliates appear steadfast in not yielding to the CBSC. "There's no indication that Q-107 is planning on obeying the codes," Ronald Cohen, CBSC's national chairman said. About all the CBSC can do is kick the stations out as members, and then appeal to the CRTC, as the "Friends" group is about to do. Montreal's CHOM promised to "take appropriate measures to ensure that [the show] remains in compliance with Canadian broadcast standards." However, at last report the CRTC does not plan to get involved.

Lise Plouffe of the CRTC said, "We'll see how the situation evolves. There's always the possibility that the original complainants can ask the commission to address the complaints process." Some of Stern's opponents asked for the resignation of Duff Roman, chairman of the Canadian Association of Broadcasters. They accused him of having a conflict of interest because he is also a vice president of CHUM, owner of CHOM 97.7. Roman said he believes the process is working and there is no need for changes in the organization. "The CBSC is doing its role, and as far as we're concerned, CHUM is abiding by the decisions of the organization."

Stern's show reportedly hasn't said much about Canadians lately, allowing both sides to cool off. There are rumors that more Canadian stations might pick up the show.

An AM promotion gone awry—WBRR, the Bloomberg-owned talk station, mailed 250,000 single frequency radios to New York households in September, hoping to increase listening to the business news station. But the New York Post reported that many, if not all, were mistakenly tuned to WCBS-FM 101.1, instead of to 1130 AM. "This snafu could affect the fall '97 Arbitron ratings, scheduled for release Jan. 7." Apparently no AM-only radios were available to convert for the promotion—a sign of FM's increasing dominance even in manufacturing.

Golden Valley MN's KQRS 92.5 has fired Lee Mroszak, 28, who went by the air-name of Cabe (cah-BAY). It's all over a hoax about Green Bay Packers' Brett Favre being in a hotel room with a woman, and Cabe supposedly calling from the hallway. KQRS apologized on the air. The Packers and Favre are considering suing Cabe and KQRS.

A multi-page article in the Boston Globe featured WBUR's manager Jane Cristo, 56. It said her bet on news/talk paid off for WBUR in terms of ratings, budget and increased employment. I show WBUR, however, as having news and jazz—with enough music apparently to justify listing it as a stereo station.

The station's budget is \$9 million, much of it coming from fund-raising, it has 115 employees, and is known as the originating station for "Car Talk." It's a troubled workplace, however, with one former employee saying the management shows favoritism. "It's all who's up, who's down." And "nobody knows what's going to happen next," said an anonymous staffer.

WBUR attributes much of its success to a consulting firm, Mage, which reportedly gets \$10,000 a month.

Getting the attention of *The Nation* (a magazine) are pirate broadcasters. In the Dec. 15 issue, the decision of Judge Wilken in Oakland CA, upholding the right of Free Radio Berkeley to remain on the air, is reviewed, as is the 12-hour siege of Doug Brewer's station in Temple Terrace FL. The siege included federal agents and a SWAT team. Brewer was not shown the search warrant until two hours into the raid (Dec. p. 4, col. 1). When Brewer returned to the air Nov. 22, he issued a statement, "I am back. . . Myself and my wife are just happy to be alive at this moment, as we really thought we may have been killed on the morning of the raid. The agents suggested they would be glad to 'kill us' for our purported federal crime." Alexander Cockburn in *The Nation* goes on: "The Brewers are lucky to be alive. It doesn't take much—an incautious movement, an extra-jumpy cop—for menace to turn to massacre as the Branch Davidians found out. It's part of an overall repressive climate, in which the cops reckon with good reason that they can tear up the Bill of Rights with impunity."

Also mentioning the cause of pirates or so-called "microbroadcasters" was the *New York Times*, Dec. 8. The article centered on Stephen Dunifer of Free Radio Berkeley, but mentioned a local pirate at 88.7 FM, *Steal This Radio* collective. It broadcasts on the Lower East Side with an antenna built from plumbing supplies. Dunifer cautions his colleagues to take care that they don't interfere with other signals, including those of commercial stations. However, the article quotes John Earnhardt, a spokesman for the National Association of Broadcasters: "We want to make sure unlicensed broadcasters and their illegal activities won't be tolerated." The NAB has pushed the FCC to step up its enforcement.

Holding out a slight bit of hope is new FCC Chairman Bill Kennard, who said, "I am personally very concerned that we have more outlets for expressions over the airwaves. I have made it a point of my tenure here as chairman to try to spotlight the fact that the broadcast industry is consolidating at a very rapid pace. And as a result of this, there are fewer opportunities of entry by minority groups, community groups, small businesses in general. And I'm very interested in hearing ideas to remedy the unfortunate closing of opportunities for a lot of new entrants."

Another article in *The Nation* (Jan. 5) was an interview by David Barsamian with Garrison Keillor, host and author. Keillor hosts PRI's "A Prairie Home Companion." Keillor thinks NPR's "All Things Considered" has seriously failed its obligation in recent years. It has not reported on the Republican revolution for control of Congress "that has absolutely turned politics upside down in this country. . . This is a crucial story. It goes on under their noses. To ignore that and to do little audio documentaries about old ballplayers and celebrate Paul Robeson's birthday and do a documentary on maple syruping in Vermont is just perverse."

Keillor attacks large commercial stations and group owners: "These stations have been cut down and channeled into one of several formats. These formats are the same across the country. A headbanger, heavy-metal station in Boulder CO is not going to be any different from one in Minneapolis or Savannah or Sacramento. It's all the same product. In the end it really doesn't connect with people. It doesn't really make for loyalty. Nobody's talking to people. Those disc jockeys who would ever talk at all are mostly all gone. So it's become simply a kind of mechanical purveyor of a certain format of music. But this is a dangerous limb to get out on economically. You can be replaced. It will be possible in not too long for people using the Internet to very quickly

download music and listen to it for a very small fee. When music becomes so absolutely accessible, I doubt there's going to be a place for those radio stations."

The public prevails in Oregon. There listeners and contributors to Oregon Public Broadcasting have gotten most of the music which was dropped to be restored. Martin Goldsmith was proven to be right to have "meddled" and lobbied to have his program, "Performance Today" restored, much to the consternation of his superiors at National Public Radio. An editorial in *The Oregonian* said, "The whole experience was searing but also shows the strength of OPB's support—support that is crucial to its future. Members have a sense of ownership in OPB and care a lot about what it does. Owners expect to be consulted when important decisions are made, but they also have a stake in the continued success of the operation."

The newly restored music hours include a two-hour bloc at 9 p.m. weekdays, and an hourlong afternoon show with David Christensen, featuring a mix of classical, jazz and folk music. This will leave five hours each weekday with music. Despite this progress in restoring music, there will be one hour less of music on weekday afternoons than before. Robert McBride was host of an eclectic music show from 1 to 3 p.m. That issue may be revisited after the Arbitron ratings are released in February.

A cartoon showed a burly guy in OPB's "all classical talk radio" studio, with the title, "A compromise is worked out at Oregon Public Broadcasting." The burly guy at the mike snarls: "You're a moron, caller! Everybody knows the second movement of Bach's Brandenburg Concerto number three in G major consists of only two chords that form a Phrygian Cadence!!!"

KRVM \*91.9 Eugene is a teen radio station at middle age. This 50-year old station run by the schools has 1100 watts, and has a surprisingly large audience. Arbitron ratings show KRVM in the middle of the pack among the area's two dozen radio stations. It plays a mix of alternative rock plus school board meetings, live sports and other specialty shows. It was founded in 1947 with \$10,000, and was one of only a dozen educational FM stations in the country, allegedly the first west of St. Louis. When it hit the air Dec. 6, 1947, there were only about 12 FM radios in Eugene and Springfield, according to a station history written by its first manager, Roger Hougum.

Hougum wrote that he called the school board office, which had an FM receiver, and a secretary replied, "We're all listening down here—it's coming through very clearly." KRVM was on the air only two hours a day at first, but now it is on 24 hours a day and has an annual budget of \$250,000.

There is a move to name Mount Greylock, the highest spot in MA, and home to WAMC \*90.3 Albany NY and other transmitters, to the National Register of Historic Places. But broadcasters can relax. An official with the Massachusetts Historical Commission said the towers wouldn't be affected. Sandra Curro of the commission said the towers "would be grandfathered and there are lots of listed observatories that are on the register that do have towers." TV stations WTEN/WCDC, amateur radio repeaters and the National Weather Service all have towers or antennae there. Furthermore, future towers would not be banned from the summit if it is listed in the register.

More jobs for Boston. "The World" is a program co-produced by WGBH \*89.7 and the BBC. It's moving its London production staff to Boston. This affects about a dozen reporters who have been in England. The show is distributed to 111 PRI member stations, with the move cutting some costs. Things like "hourlong transatlantic conference calls will disappear," said spokeswoman Jennifer McCauley.

Above, "Facilities," is reported that WLUM

102.1 Milwaukee is regressing to Class A status. This may only be temporary, as WLUM is one of the stations slated to move to a new 372-m digital transmission tower just north of Capital Drive (last month, p. 12, col. 2). A panel antenna will accommodate up to 14 FM stations.

FM FORUM

CONTRIBUTIONS FROM READERS

Michigan's Phil Boersma sent an article by Robert Feder of the Sun Times, quoting WLUP's 97.9 Jim deCastro, when it was owned by Chancellor Media; now it's part of Bonneville's holdings. Boersma says, "Here we have the chief operating officer of one of the biggest media hogs admitting 'there are no great-sounding radio stations' [any more]. Why? He admits the hogs no longer feel 'compelled to put a great radio station on, figure out what the audience want(s) and deliver it to them.' Instead, it seems [their] strategy is to put the safest, blandest pap on the air, except of course in morning drive when filth rules (especially on their FM stations), and then try to corner the advertising market. With direct satellite digital services becoming a reality, and new ways for consumers to get information and entertainment popping up, I wonder how long it will be before such attitudes render radio totally extinct? People are learning they don't need radio—the hogs, by their short-sighted stupidity, will end up killing their own golden goose."

Tom Rothrock of Hagerstown enjoyed my article on long-distance FM listening in the July "Popular Communications," and mentions hearing ducting from Roanoke VA with WVTF \*89.1 reception, "in spite of the fact that WETH [right in Hagerstown] also on 89.1 was on at the time." He also noted that WFBR 94.3 St. Michaels MD is still not on the air; the frequency in use by WICO-FM Salisbury, which has yet to move to 97.5. and the best of New Year's greetings.

Ontario's K.W. Walter comments on the difference between how Americans and Canadians handle personalities like Howard Stern. "The U.S. Constitution's First Amendment and the Canadian Charter of Rights and Freedoms are similar in allowing freedom of speech, except that the U.S. approach is that 'anything goes' whereas in Canada broadcasters are constrained from allowing obscene or profane language.

"Both Americans and Canadians determine free speech issues slightly differently. But this does not mean that democracy and society are less robust in Canada than in the U.S., particularly when they approach borderline free-speech issues differently.

"In the U.S. an FCC payment fine is supposed to neutralize rough/obscene speech of racism, gender slurs, etc., whereas in Canada such degrading speech may be used as a deterrent when a station applies for a broadcast licence renewal.

"Your batting average at the FCC is now 0-2 in getting an allocation," writes Mark Heller regarding Hawthorne WI (last month pp. 10-11). "Be sure to tell your newsletter subscribers how you used personal attacks and innuendo towards me in your filing. Real good procedure for a man of your supposed education!"

Until February,

*Bruce F. Elving*

**Call Letters Assigned**

- AZ Globe 100.3 KDDJ (from KHOT-FM), "Edge 100.3"
- AZ Oro Valley 97.5 KOAZ (KSJM), t, mono, but "look for a new format after KOAZ's sale to KCUB (AM), KIIM-FM and KHYT."
- AZ Paradise Valley 105.9 KHOT-FM (KBUQ), "Hot 105.9"; AM is in Madeira CA.
- CA Alameda 92.7 KZSF-FM (KZSF); AM is in San Jose.
- CA Fremont 104.9 KUFX (not KVFX, and not "Kava Radio"; Brad Kava is the radio-TV columnist of the San Jose Mercury-News), op, "104.9 K-Fox."
- CA Gilroy 94.5 KBAY (KUFX), mr, "Bay 94.5."

The change started with a countdown, and on Fremont 104.9 dial turners heard a rocket launched, followed by the "Around the Dial" song by The Kinks. Meanwhile, on 94.5 one heard a boat pulling into a dock on The Bay. The station gave \$25,000 to the 945th caller who identified the first song, Fleetwood Mac's "Don't Stop." P.D. Bob Kohtz said, "We counted every call. It took an hour and 45 minutes." KBAY's facilities change to 1230 h.v; 773 m; its 34 kw CP cancelled. Meanwhile KFOG 104.5 San Francisco has filed suit against KUFX 104.9, saying the calls are too similar and the spot on the dial is too close to KFOG, which "could very well lose ratings and suffer significant damage." The battle is most intense in the East Bay and on the Peninsula, where both 104.5 and 104.9 are strong. KFOG is owned by Susquehanna Broadcasting of York PA, owner of KSNB 107.7 San Mateo and two AMs. On KBAY, "it's obvious they don't like using their legal moniker." At about :05 a quick "KBAY Gilroy-San Jose" is said, "otherwise they're strictly '94.5 The Bay'." KUFX gives its ID at :10 as "KUFX Fremont—we're the music button in your morning commute. Classic 104.9 K-Fox."

CA San Jose 100.3 KBRG (KBAY), romantica. KBRG "gives their calls quickly, in English, 'KBRG San Jose', with a swooshing sound almost covering it, but as the sounds fade out they rattle off their slogan, 'La nueva 100.3 Radio Romantica,'" on or close to top of hour. Parallel to KRRE 101.9 Shingle Springs, but with automation providing separate slogans, ads and legal IDs.

CO Gunnison 98.3 KEJJ (KKYY)

FL Ponte Vedra Beach (pon-ta VEED-ra beach) 106.5 WBGB (WTLK-FM), op, \$, "Big 106.5." ID with Jacksonville. "Our call letters haven't changed, but they should by the time your readers get their newsletters. We were stereo even with the talk format."

GA Elberton 106.1 WDDA

ID Nampa 94.9 KFXJ (KFXD-FM)

IL Alton 100.3 KATZ (KATZ-FM); AM in St. Louis apparently has new calls. FM format to so, R&B oldies, "100.3 Kiss FM" (from "Z-100")

IL Highland Park 103.1 WXXY (WVFX), now so, "heart and soul," ID with Morris 103.1. "There is a big distance gap between Highland Park and Morris... WXXY's signal is now hurt by being in stereo (for the first time ever?). It was a bit choppy down by work in Oak Brook, even on my good Delco car radio, and at home on my boom box... When I want my urban oldies, I'll stick with WGCI-FM and

WVAZ." WXXY "has a huge pole with a three-bay antenna on it." When it was mono, it had a "consistent signal, phenomenal coverage." Richard Marston has been named manager and Liz Janik program director. Marston was g.m. WXTU 92.5 Philadelphia for six years, had been at WBMX 98.5 Boston and before that was at WMMR 93.3 Philadelphia. Janik was founder and president of her own radio format consulting company. Her clients included KKDM 107.5 Des Moines, CKEY "The Planet" Fort Erie-Buffalo and CIMX "89-X" Windsor-Detroit. She used her expertise in programming the Chicago area stations. Automated, but "the station's music will continue to evolve over the next few weeks. DJs will be added shortly." Big City Radio recently went public, and is on the American Stock Exchange under the symbol YFM.

- IL Monee \*88.9 WMBY (WGNR)
- IL Morris 103.1 WYXX (WJDK), so, parallel to Highland Park. Both stations now owned by

**BIG CITY RADIO, INC.**

Big City Radio, Inc.

- IN Anderson \*97.9 WGNR-FM (WXXP), g, Moody, taking over the frequency Jan. 20 and turning it into a noncommercial station. Also in that town is WQME 98.7, g. WXXP left the air without fanfare just before midnight Dec. 30. WHUT AM was also off the air and returned as WGNR AM. "Seems like a strange way to operate a business... A co-worker liked the 'Music of Your Life' on WHUT AM and was greatly disappointed when he heard the station was sold to a religious group." WXXP's previous owner was Gary Todd, formerly of WIBC AM Indianapolis, who thought he could make WXXP an Indianapolis station. Todd "created a mess when he bought the station several years ago by not accepting advertising from Anderson businesses. His 'circle north' concept failed and the FM never recovered." WGNR-FM features easy listening music in stereo. "Sounds like a total waste of a Class B channel. I didn't listen to it before [when it was rock] and have no reason to now," T.C. by e-mail. [still "Ralph"]
- KS Dodge City 93.9 KRPH (KDGB),/
- KS Pratt 93.1 KDGB (KGLS)
- ME Scarborough 106.3 WBQW (WPKM)
- MD Leonardtown \*91.7 WETW
- MI Whitehall 97.5 WEFQ"-FM" (WEFG-FM); AM has new calls.
- MS Tunica 96.1 WJOI (WAUF)
- MO Cuba \*90.3 KGNN (KGNN-FM). "AM 1410 is off the air and [was] for sale." The sale did not go through, and the FCC has deleted KGNN (AM). Format on 90.3 is gm, mono, simulcasts KGNV 89.9 Washington MO.
- MO Kansas City 99.7 KYYS (KLTH), "99.7 KY"
- MO Ozark 92.9 KYO (KCTG), "Coyote Country"
- MO Osage Beach 93.5 KRMS-FM (KYLK)
- MO Wheeling 105.9 KULH, seeks 100 m
- NE Nebraska City 97.7 KESY (KOSJ), mr, format moving from 104.5
- NE Omaha 104.5 KSRZ (KESY), r, hot AC, "Star 104.5" ["Smooth Jazz"]
- NJ Cape May 102.3 WJSX (WSJL),/
- NY New York 105.1 WBIX (WNSR), r, "Big 105" (strict). It played the song, "Big Time"

by Peter Gabriel around 6:30 p.m. Jan. 22 to help usher in the new format and call letters. It plans to air a wide variety of artists, including Elton John, Genesis, Melissa Etheridge, Madonna, Jewell and Alanis Morissette. An hour before the big switch came a countdown, saying, "In 60 minutes, something 'big' is coming to New York radio." Unlike its previous incarnation, Big 105 is aimed at older folks, 25-49.

- NC Biltmore Forest 96.5 WZLS (WZRQ), 280 h.v; 339 m, "Z-96.5," with an FCC reversal of its previous decision in favor of Orion Communications, owned by Zeb Lee, taking Biltmore Forest Radio's WZRQ off the air. WZRQ is appealing.
  - NC Burlington 101.1 WKXU (WPCM"-FM")
  - NC Elkin 100.9 WIFM (WIFM-FM). FCC deletes WIFM (AM) 1540.
  - NC Goldsboro 96.9 WKIX (WKTC), "Kix"
  - NC Pinetops 95.5 WKTC (WEQQ)
  - NC Raleigh 96.1 WBBB-FM (WKIX), r, "96 Rock" (AM is in Burlington). It was stunting with WPTF AM. Its country format still heard on 96.9 Goldsboro and WKXU 101.1 Burlington.
  - OH Marietta 105.7 WKFX (WHQK), o, "Fox." No longer tethered to WHOK 95.5 Lancaster.
  - OH McArthur 98.7 WYPC (WCLX), m
  - OH University Heights \*88.9 WJCU (WUJC)
  - OK Holdenville 106.5 KTLS-FM (KTLS)
  - OK Newcastle 93.3 KKNG (KKNG-FM); AM in Holdenville has new calls.
  - OK Shawnee \*95.1 KQCV-FM (KABH); AM is in Oklahoma City. [AC, "The Eagle"]
  - OR Warm Springs 96.5 KWEG (KTWL), r, hot/PA Boalsburg 93.7 WBUS (WVCV)
  - PA Harrisburg 99.3 WWKL-FM (WWKL), o, simulcast with 1460 AM.
  - TN Gallatin 104.5 WGFY (WLAC-FM), o, still "Arrow 104.5." Change with Nashville 105.9 not taking place.
  - TN Nashville 105.9 WLAC-FM (WGFY), op. WLAC-FM "plans to unilaterally switch to classic rock... and has 'stolen' John Boy and Billy from Arrow."
  - TX Crane 101.3 KKKK (KXXL), g, taking the heritage of Odessa 99.1.
  - TX Electra 94.9 KOLI
  - TX Jacksonville 102.3 KLJT (KSIZ), gr, LMA-to-buy with KOOL 106.5-AM.
  - TX Kerrville \*88.7 KBAB
  - TX Markham 92.5 KGFJ
  - TX Odessa 96.9 KMCM (KQIP) [dale CA]
  - \*99.1 KLVW (not KLVM, which is in Prune-/TX Pasadena 92.9 KKBQ"-FM" (KKBQ-FM); AM 790 in Houston has new calls.
  - TX Rockport 102.3 KZJM (KXCC), sr, "102.3 Jamz." It had "no DJs," and then went silent after one week of the new format. This silent period is believed to be temporary.
  - UT Spanish Fork 106.5 KOSY (KBKK), "Cozy"
  - VT Williston \*90.9—deleted station WTBC changes calls to WTBC-FM. WTBC-FM deleted in 1995, and is no longer on the FCC engineering database, but it must be listed on its call signs' desk. Change was because WTBC 1230 AM Tuscaloosa AL took back its old call letters.

Monophonic—main stations, as well as translators which should be in stereo and which are not CA Eureka K230AA \*93.9 CA Garberville K203BU \*88.5 DC Washington WCSP \*90.1, t, now fully mono. Even its classical themes are now mono with no \$ pilot.

MO Washington KGNV \*89.9, gm.

TN Murfreesboro WFCM-FM \*91.7. "WFCM AM puts in a good signal during the day before it drops its nighttime power. The major problem with WFCM-FM with its signal in Nashville is

white noise in the background. South of Nashville WFCM-FM can be heard without any problem." IDs with WMBW \*88.9 Chattanooga, WMKW \*88.3 Crossville. WFCM-FM wants to improve its signal in Nashville, but "I'm not sure how."

**Format Changes**

*Formats are the same as in the "FM Atlas"*

- AZ Window Rock KWRK 96.1 m
- AR Glenwood KWXE 104.5 still k, now classic country
- AR Sherwood KOKY 102.1 sr
- CA Indio KCMJ-FM 92.7 sr
- DE Ocean View WRKE 101.7 s, adding Doug Banks from ABC.
- FL Fort Pierce WCLB-FM 95.5 k, dropping Howard Stern, who can be DXed from WBGG-FM 105.9 Fort Lauderdale.
- WKGR 98.7 r, drops jazz, adds Bob & Tom from Indianapolis, as is WCVS 96.7 Virden IL.
- FL Fort St. Lucie 101.3 off the air, remove format indication.
- GA Canton-Atlanta WGST-FM 105.7 still nt, but LMA with AM 640 is changing to an outright purchase. New g.m. Pat McDonald says the format on 105.7 is "still to be determined," with speculation it might change soon and embrace stereo.
- GA Ringgold WSGC-FM 101.9 sr, parallel to WKXJ 97.3 South Pittsburg TN-WDRZ 103.1 Etowah TN, all "Hot Jamm'n' Kix FM." WDRZ adds an ID with Knoxville. WSGC-FM does not ID properly; it's saying simply, "WSGC."
- GA Thomaston WTGA-FM 101.1 k
- IL Bethalto-St. Louis MO WFUN-FM 95.5 still "Fun Radio," now doing its own children's programming after Radio Aahs folded.
- IL Crete WYAA 102.3 sg, [tereo] resumed
- IN Bloomington WFHB \*91.3 fp, plus jazz, Cajun, blues, Celtic and a Latin show, as well as talk. Its Bloomington translator, W251AG 98.1, is on the air, and designed to counteract "in-town building interference." WFHB has been on five years, and operates from a former fire house, with a dalmation as its mascot. That dog helps pinpoint the "spot" on the dial where WFHB is found.
- KY Lexington WKQQ 98.1 k, had been stunting with "All Garth Radio." Its rock format moves to Winchester. Calls' change expected.
- KY Winchester WWYC 100.1 rp, expected to change calls to WKQQ.
- LA Baker WTGE 107.3 o. "WTGE can't seem to maintain a format (AC WBBU, jazz WGGZ, new rock WTGE and now oldies)," C.K., TX, by e-mail.
- MI Brooklyn WKHM-FM 105.3 r, hot AC
- MI Caro WIDL 92.1 still op, returns to air, along with WKYO 1360 AM, which comes back with country.
- MI L'Anse WCUP 105.7 k
- MI Ontonagon WUPY 101.1 o, still "Y-101"
- MI Oscoda WCLS 100.7 r, "Super 100.7" (from "SuperStation CLS")
- MS Utica WJXN-FM 92.9 sg, simulcast with WJNS-FM 92.1 Yazoo City (now also sg). Heard in Queens Dec. 9 via skip around 4:30 p.m.; also heard there was WKOR-FM 94.9 Columbus MS.
- MO Jefferson City KJMO 100.1 m, soft AC, "Kiss 100.1" (from "FM 100")
- NE Kearney KLPR \*91.3 jf, jazz and blues
- NV Las Vegas KEDG 103.5 still p, dropping Mancow Muller
- NH Gorham WXLQ 107.1 r, adult rock.
- NJ Hazlet WCNJ \*89.3 r, "89.3 CFM" (from "CNJ"). "It's a good station, and comes in Queens if you use a tuner with narrow FM. There's still some e and g programming on weekends."
- NJ Villas WFNN 98.7 op, LMA-to-buy with WCZT 94.3 Avalon
- NY Poughkeepsie WSPK 104.7 r, "K-104"
- OH Coal Grove WBVB 97.1 o
- OH Gibsonburg WIMX 95.7 sr, along with Joyner

- in the morning. [with AM
- OH Sidney WMVR-FM 105.5 rk, simulcast/
- OH Wilberforce WKSU \*88.9 s
- OK Bethany KNTL 104.9 t, mono, sports.
- OK Wagoner KRQZ 102.1 op
- OR Portland KXL-FM 95.5 m then rp, still "Mix 95.5," a station "whose format has been restyled more often than Hillary Rodham Clinton's hair." Has expanded its playlist to appeal to an older audience. Carl Widing, who left KINK 101.9 after 13 years as p.d., is the new p.d. of KXL-FM. He does not believe in research and national playlists, saying he'll "program the station as a listener, not as a PD."
- PA Bedford WAYC 100.9 r
- SD Mobridge KOLY-FM 99.5 m, "Star 99," in a combo with KMLO 100.7 Lowry.
- TN Springfield WDBL-FM 94.3 ks, along with "Americana" afternoons.
- TX Bryan KKYS 104.7 m, automated.
- TX Dallas KERA-FM \*90.1 tr, "AAA-ish type music 3-4 hours a day only; the rest is talk, news, NPR, etc. Adds BBC World Service overnight." [grammed for a 25-54 audience.]
- TX El Paso KBNA-FM 97.5 S, m, "pro-/
- TX Jataaviha KRYL 98.3 op, "The Rock" (from "Great 98")
- TX Pilot Point-Dallas KTCY 104.9 g, "Praise 104.9" (from "Joy 104.9"). Now "praise, teaching and talk."
- TX Sulphur Springs KDXE 95.9 r, gold based AC, still "Dixie 95.9."
- UT Ogden KBER 101.1 pr, adding Bob & Tom from Indianapolis.
- UT Spanish Fork KBKK 106.5 m, LMA-to-buy with KISN 97.1 Salt Lake City-KUMT 105.7 Centerville-AM-KSNU 107.9 Roy.
- ON Bracebridge CFBG 100.9 o, classic hits
- ON Elliot Lake CKNR 94.1 o, "good time oldies FM 94.1"
- ON North Bay CHUR 100.5 m
- ON St. Thomas CFHK 103.1 o, classic hits, LMA with CFPL-FM 95.9 London-AM.
- ON Sudbury CJMX 105.3 m, "Mix 105"
- PQ St-Augustin CJAS 93.5 E, r, switching to relaying VOCM-FM 97.5 St. John's NF (from CFTH-2 98.5 La Tabatiere PQ)
- CI Ciudad Juarez XHH 100.7 m, "Majica Digital"
- XHGU 105.9 m, "La Romance"

**On Air—Real Stations and Pirates (Selected)**

- AL Parrish WALN \*89.1—"I live right in Parrish, and didn't know about this station until I received your FM Atlas. It seems to be a low power station, and you have the frequency wrong on the map," p. 34.
- AZ Phoenix 89.9 "Radio Caroline" (not "Caro-lyn," Oct., p. 4, col. 2 under Apache Junction). Since July '97, 5 watts, "serving the gay community," supposedly on Friday and Saturday nights.
- CA Eureka K238AD \*95.5, but heard on 95.3—transmitter drifting? FCC says it's 95.5. [rock, etc. weeknites starting at 8
- CA Fullerton "Zoo Station 90.5," hard/
- CA Reedley (Fresno County) 91.1 "Border Radio 911 FM," run by 48-year-old Kirch.
- CA Santa Clara 87.9, Sunday morning music and church services, with broadcast supposedly heard 1.6 km from North Valley Baptist Church, 941 Clyde Ave.
- CA Vallejo 92.3 "Dz's Radio," on "after business hours."
- FL Boca Raton "WOWL" 91.7 from FL Atlantic University, said to have less than 1 watt, but has an elaborate web page. It moved from

**WOWL 91.7 FM**  
**Florida Atlantic University Radio**

WOW!.! That's great Radio! (ouch.)

1610 AM three months ago. On eight hours a day with everything from ska to classical.

- FL Columbia WLGD 107.5, having moved from 107.9, heard 55 to 65 km along the highway, directional, stereo. [WRUC" 88.7
- FL Orlando "Radio Unidad Christina/
- FL Stuart 96.7 ex tralegal station. "Listened all the way up to Vero Beach, had an oldies soul format, no talking, no ID, just music."
- FL Tampa—tune a scanner set to NBFM 25870 kHz and you might hear WFLA 970 being repeated. It is on most of the time and known to skip out.
- 99.1 anti-semitic, white supremacist. Several people recently complained of its interfering with reception of a Tampa Bay Buccaneers game on WQYK-FM 99.5. Interference was in a 5 or 6 block area of downtown Tampa.
- "WQXN" 106.1, fulltime Spanish, supposedly legal and 1.9 kw. It is actually believed to be experimental WA2XNY, otherwise known as "106.1 FM" with English IDs. Has a two-year license to test digital and analog signals on one carrier, and listed officially as 100 watts. Owned by Veltek Industries, on since Oct. 1, 1997, with commercials.
- FL Wellington "WSUV" 88.7, strong near where US 441 and US 80 meet. Has a web page at WSUVMAN@aol.com. Most of this FL information is from a very detailed website for low power stations maintained by Terry Krueger at <http://home.earthlink.net/%7Etcocobagadxl/flortis.html>. "Every state should have a site like that!"
- GA Roswell WTHA 107.5 still only 6 kw but claims to be 25 kw, "with plans to go to 50 K by June, and a full 100 K by the middle of summer," which I am skeptical about. "I can't wait to see the Arbitron ratings, because this station is definitely going to be a force to reckon with! Stay warm!" B.P., Atlanta.
- IL Chicago (north side) "WARP" 90.7 featuring local rock groups, live jam first and third Thursdays from 2053 W. Chicago Ave. There is also a seldom-heard real station on 90.7 in Chicago, WBHI.
- IL Peoria "WCPR" 90.3, on since '91 with rock, owned by Jim Vaughn. [from 106.3
- KY Flemingsburg WFLE 95.1, having moved/
- ME—Several stations lost power and were either off the air or using emergency generators, due to the massive ice storm. WMME 92.3 Augusta lost its antenna because of ice falling from farther up the tower, as did WLNH 98.3 Laconia NH. WBLM 102.9 went off the air and moved their programming to sister station WCYY 94.3 Biddeford and WCYI 93.9 Lewiston. WBLM, after it returned, had a continuous announcement that ran for about a week telling listeners to tune to 94.3 or 93.9. Off the air for over a week were W WABK 104.3 Gardiner and WKCG 101.3 Augusta. One of the most notable performances during and after the storm was by monophonic WVOM 103.9 Howland. This talk station kept its emergency generator fueled, and provided news and information, such as when power would be restored to various neighborhoods. It won the respect of some people who aren't normally attracted to its talk shows, which include Rush Limbaugh. Maine Public Broadcasting lost all its transmitters for a while. This frustrated people who oversee Maine's emergency broadcasting system, because the primary relay to the state's stations was off the air. MPB applied for a state grant for emergency generators but was turned down. Next time it asks, it might receive money for the generators.
- MA Boston (east Boston neighborhood) 101.3 "EB 101," r.
- MA Bradford "WHAT" 87.9, supposedly 10 watts from Bradford College, but may not be currently on.
- MI Detroit WCHB-FM 105.9-AM sold to Radio One, "a minority-owned company. WCHB had been owned by Bell Broadcasting since its founding. The media hogs didn't get this one!"

MI Dowagiac—the 8 km Drive-In Theater, 28190 State Rte. 152 uses 87.9 for in-car speakers.

MI Grand Rapids WBYW \*89.9, but phone is disconnected "temporarily at customer's request." Has not been giving a legal ID but person I talked to at WCSG \*91.3 Grand Rapids promised to correct the situation. "Everything is up in the air. It's supposed to be sold, but I have no information, and we don't know if it will relay WAYK (88.3 Kalamazoo) or do something else. The Sacred Favorites Radio is a temporary thing" [on WBYW]. It is temporarily mono. "Stereo pilot is sometimes on, sometimes off, but audio feed is always mono."

MI Holland WTHS \*89.9 back on with student Christian rock/gospel (pg) from 8 a.m. to 2 a.m. daily. Had fulltime Spanish during winter break when the students at Hope College were away. Retains Spanish 8 am to noon Saturdays and Sundays.

MN Duluth "Random Radio 93.5" is on late afternoons and evenings. I traced the signal in about 20 minutes to 1510 E. Sixth Street, where a thick wire came from the basement to a double bay conical-type TV antenna aimed at Superior WI. This site overlooks Lake Superior, eastern Duluth and much of Superior WI, but is below the crest of the hill. There is no reception in western or northern parts of the city. [going CHR.

KLDJ 101.7 still o, but rumored to be/

MN Grand Marais K220BI \*91.9, Silver Bay W280AA \*103.9, now with WNCB \*89.3 Duluth, while WNCB's Minneapolis translator, K249DF \*97.7 is off. WNCB people installed filters on all the radios of people who complained of interference to KNXR 97.5 Rochester MN reception. However, one listener wanted a filter installed in a car radio, and KNXR insisted that be done. KNXR paid an engineer to supervise that installation, but that car could not be fixed because the radio could not be removed. WNCB has filed a request with the FCC to allow the translator to resume operation.

MN Mankato "WFS" 88.7, 2 w, on at nite.

MO St. Peters 90.1 "KWAOW The Oasis," is a new outlet for Bill Owens, with plans to go 24 hours a day with music from the '40s-'60s. Offers free ads to businesses that tune their radios to 90.1. Owens can be reached at bowens5643@aol.com.

NV Reno (south side) "KRFR Radio Free Reno" 94.7 claims 10 watts with rock, jazz, blues, etc. [a tone.

NH Lancaster WNHT 102.3—heard testing with/

NH Wolfboro WLKZ 104.9: Employees used chainsaws and a snowcat to get a generator to its site during the ice storm. GM Bob Adams climbed to the tower site several times to keep the generator fueled. The NAB and New York State Broadcasters Association got the FCC to give a one-month extension of station license renewals, which were due Feb. 2. This applies only to areas that were hit by the ice storm.

NY Carthage WTOJ 103.1, but without a roof, using a generator after the ice storm. Most likely the roof is repaired by now. WKOL 105.1 Plattsburgh was knocked off the air by for a while by the storm.

NY Highland W279AJ 103.7 with WQXR.

NY New York City area—a "WEUS" 88.7, upper east side of Manhattan, with jazz, discussions of audio, etc.; a one man operation. "When on the air, the following are blocked out: WPSC-FM Wayne NJ, WRHU Hempstead NY." In Crown Heights, Brooklyn, "Radio Moshich and Redemption" (Mar., p. 4, col. 1 and July p. 4, col. 2) had been on 87.9, having moved from 91.9. Said to again be off, having experienced interference from Radio Konbit 87.7 and WYGG's unauthorized relay in Brooklyn on 88.1. Two unrelated pirates are on on 90.1. One has Haitian music with no announcing and seems to be in Queens; heard

mainly Saturday nights. The other is a Chinese station near Houston Street in Lower Manhattan. "Reception of this program is gravely impaired by WKCR" 89.9 New York NY. Possible location of "WBAD" 91.9 is at 55th St. and 9th Ave., Brooklyn. "If you contact any of the pirates... please don't give my name or address!"

NY Plattsburgh WBTZ 99.9, WMNM 92.1 Port Henry were off two days because of the ice storm, and WIZN 106.7 Vergennes VT was off part of one day. All Montreal FM stations appear to have stayed on the air (see "Selected AM Happenings" for other storm-related news from there).

TX Henderson KDVE 99.9 returns to air, k.

TX Refugio KZTX 106.1, installing C3 facilities. It is linked with KCCG 107.3 Ingleside-AMs.

TX San Angelo 100.9 "Skull'n'Crossbones Radio," run by Tim McTaggart.

WA Colville "102.5 Community Micro-Broadcast Radio" with a "too strong" signal. It carried BBC News at top of hour.

ECUADOR—David Gleason, who was originally from Cleveland, several years ago started the first commercial FM station in Quito. HCTM1, "Teleonda Musical" 95.1. "The station is still on the air with half the original ownership—my ex-wife and daughter at the helm. The format is rock and alternative. "The reason I built the station is itself interesting. When in school, I worked for WCUY 92.3 in Cleveland Heights OH. The money I saved and invested put my first AM (HCFM1 570, Radio Musical) in Ecuador on the air while I was in my senior year of high school in Ecuador. So I felt indebted to FM. In '67, when my then 3 AM stations were making nice money, I decided to apply for an FM. There were none, so the guy in the telecommunications ministry asked why I would want one and I told him my story. He then allowed me that I could apply for several FMs for the same fee as one, especially since it did not seem that anyone else wanted them. So I got one for each of my AMs and two independents. The first of the indies went on the air in about April '67 with a light AC format with lots of Latin American traditional music. I decided not to sell spots the first year, and kept the station with no commercials until a friend begged to be on the station. At that point, we decided to sell only 20 second spots an hour, or two minutes of spots and 58 minutes of music. Since I was running the station for fun, and enjoying building my own equipment, I priced the spots so high that when the inventory filled up about six months later, the FM became my highest billing property! "At the time that the station went on the air, the band was absolutely empty except for a link owned by HCJB that covered the northern part of the city of Quito. By 1970, HCTM was the No. 1 station in upper income levels in Quito (Datos, S.A.). It even made the top 10 in middle income." Gleason mentioned his was the not only the first commercial FM indie in Ecuador, but the first in northern South America. Almost all the equipment was home made. "There was the morning the transmitter would not go on because a rat had crawled in and gone to sleep. He/she exploded when the rig was turned on! We went 24 hours the next night!"

UKOGBANI—to use Glenn Hauser's word for the United Kingdom of Great Britain and Northern Ireland—a pocket guide published by the Radio Authority was sent by reader Alan Hobson of England. Hobson was recently in Ottawa, the first such trip in 20 years. He "was anticipating an exciting FM band but found it quite dull." On the trip 20 years ago, there was no youth/young adult music to be found. "Now, looking for an adult slant to music—nothing! Relatively new CHRI 99.1 seems to be struggling for a strong signal. Giving on air instructions how to improve reception for their Greely ON transmitter approximately 30 km south of the city... Discovered boxes of radio memorabilia at my family's home, including your FM Atlases

right from the start—interesting reading."

The British pocket radio guide is 66 pages listing all the stations, even giving their logos and includes a map with stations keyed by numbers. The Radio Authority is supervising activity on the 105-108 mhz part of the band, which has been comparatively underutilised in England.

"The Authority will continue to advertise licences from its current working list of areas according to the timetable which was updated in April 1997. These licences would, on the whole, utilise FM frequencies between 105-108 MHz. It is hoped that around two licences a month will be advertised... throughout most of 1998. Licences are usually advertised in the order in which frequencies are cleared." I assume the clearing is of other non-FM services, such as point-to-point radio, with VHF television having been cleared out of Britain years ago. It doesn't give a price but I'd guess if you mailed a couple of pounds (kilograms?) or U.S. dollar equivalent you'd get a copy from the Radio Authority, Holbrook House, 14 Great Queen St., London WC2B 5DG.

GREECE—"Private radio stations were legalized in the early 1990s and there are now one or two Christian broadcasters in Greece. One group has 16 FM stations around the country and Ch. 62 in Thessalonika has just been bought by a Christian businessman." In a population of nearly 11 million, "only 15,000 are committed Christian believers. But 98 percent belong to the Orthodox Church. There are a few Orthodox believers, but nearly all are entirely ignorant of the Christian gospel," according to a report in NRB magazine. Many of the letters of the Apostle Paul were written to the Greek people in the early days of Christianity, and form part of the New Testament.

**Off Air—Or Not Yet On**

CA Hydesville KLVG \*103.7

CA Rio Dell KMGX 107.3

CA Santa Barbara "KPRV" 107.7; it was on four days, having moved from 102.3.

CA Santa Rosa 87.9 pirate.

ME Yarmouth WYAR \*88.3 "waiting to finish the tower project. The antenna is all tuned and ready. The Sparta transmitter has a Henry Radio 100 watt amplifier which we hope to tune and test on the bench soon, and I picked up a nice Bird 43 wattmeter cheap."

NY Endwell WRGG 107.5. Nearby WJIK \*90.1 Binghamton stands for Jesus Is King. Automated gr from satellite. "They can't afford to do anything from their local studio." WJIK is perilously close on the dial to WHRW \*90.5 there. [a construction permit.

NY Wurtsboro (Hills) W241AC 96.1, still/

NC Plymouth WPNCFM 95.9

TN Belle Meade WNPL 106.7, but its "antenna showed up on our loading dock... It has only two bays, so either they're going to run a fair amount of transmitter power or put it relatively high on the tower."

 NJ Linden WNJU 47's pro channel is really an open carrier, but a phone call was heard, with both sides audible. With the Radio Shack Optimus 12-604 modified for SCS/SAP which tunes in TV, VHF and UHF, as well as FM and AM, "This is the first time I've ever checked out the UHF-TV SAP band; most stations here have the main channel audio on the regular SAP frequency, and as with the VHF-TV band the sound is better on the SAP than on the main channel (?). I wonder why ethnic broadcasters favor FM-SCA over SAP, since SAP sounds better and is available on many VCRs. . . The 12-604 mod came out real nice. . . I like that green light in the window. It seems to be a very good radio; I don't see why they want to discontinue it. . . My only complaints are that they they couldn't have made the numbers on the dial any harder to see if they tried. They could have used white for the numbers and made them a little bigger and a lot thicker," J.J. NY via e-mail.

### Selected AM Happenings

AL Daleville WTKN 1560 had been silent; now  
 talk.  
 AL Fairhope WABF 1220 delete.  
 CO Boulder KBCO 1190 silent pending transfer  
 to the University of Colorado.  
 CO Deer Trail KTMG (not "KTNG" as shown last  
 month p. 5, col. 1) still silent, while KHNC 1360  
 Johnstown returns to air.  
 FL Mulberry (Tampa-St. Petersburg area) 780  
 AM—investors or joint venture people wanted for  
 this new CP. Contact Frederic K. Gauthier,  
 WPNP, PO Box 154, San German PR 00683-  
 0154; (787) 264-3802. Also has an application  
 for FM in St. Croix VI 98.5A. It will upgrade and  
 move to a new frequency.  
 GA Macon WNEX 1400 silent; had been travel  
 information.  
 IL Chicago WGN 720—Wally Phillips, 72, retires  
 after 42 years there and 51 in radio. He has been  
 inducted into the NAB's Hall of Fame. "At the  
 peak of his popularity as morning star at WGN,  
 Phillips attracted half of all Chicago area radio  
 listeners—an audience of nearly 1.5 million each  
 day." He wants to quit while still in good health.  
 "I have the scary recollection of [late broadcast-  
 ers] Franklyn McCormack, Frazier Thomas,  
 Fran Allyson and others promising to save for  
 themselves some time for retirement... but never  
 getting there," he said.  
 IL Geneva WFXW 1480 fined \$11,000 for EEO  
 violations. Denied Rainbow-PUSH Coalition's  
 demand to have the license revoked.  
 IN Indianapolis WSYW 810 is "real country"  
 after losing Radio Aahs. "It's the sixth format for  
 810 in recent memory. They've been easy  
 listening, gospel, urban rap and classical... Of  
 course, their signal coverage has got to be the  
 worst of the Indianapolis AMs, especially north  
 of the city." WSYW-FM 107.1 continues classical.  
 ME Millinocket WSYW 1240 had been silent;  
 now oldies.  
 MA Boston WNFT 1150, "a station with a so-so  
 signal," rebroadcasts WAAF 107.3 Worcester,  
 but one morning it was carrying WJMN 94.5  
 Boston. It seems the cleaning crew working at the  
 WNFT transmitter happened to prefer the  
 sounds of WJMN to WAAF and changed the  
 tuner, not knowing they were affecting the AM  
 broadcast. Though "Jam'n" is always looking for  
 new listeners, they "just don't want people to  
 forget that 'Jam'n' is and will always stay at  
 94.5."  
 WNRB 1510 has all sports, but Fred McClennan

wants to bring home the WMEX call letters,  
 reminiscent of when 1510 played the hits. If the  
 plan worked, McClennan would return to the old  
 format weekends, keeping the sports at other  
 times. WMEX (AM) would share calls with  
 Westport NY 102.5, which would become  
 WMEX-FM.

MA Gardner WGAW 1340 rebroadcasts WEIM  
 1280 Fitchburg: "WEIM has expanded its  
 coverage area and is providing Gardner and  
 vicinity with their very own local radio. Tune in  
 1340 WGAW... Toll-free local phone call at  
 632-1340."

MA Worcester WTAG 580 drops sports director  
 Steve Bantle, and with it his position. "It wasn't  
 that we were unhappy with him. You have only  
 so much air time and so many people. It was a  
 numbers game," said g.m. Bud Paras. Bantle was  
 parttime.

MS Cleveland WDSK 1410 is "one of the few AM  
 stereo stations in the state."

MO Sikeston KRHW (formerly KMPL) 1520  
 pleaded poverty and got its FCC fine reduced  
 from \$8000 to \$1000. It was for technical  
 deficiencies, including a faulty directional anten-  
 na. Reportedly, a "snake carcass" messed up the  
 directional pattern, and that a contract engineer  
 supposedly failed to connect the automatic  
 alarm which might have detected the slithery  
 intruder.

NE Grand Island KMMJ 750, one of the oldest  
 stations in NE, switches from news, talk to  
 Spanish contemporary from the Hispanic Satellite  
 Network.

NM Hobbs KREL 1480 reported silent.

OR Tigard KLVP \*1040 (its FM is KLVP-FM  
 Cherryville, 88.7). "Last year at this time 1040  
 was using call letters KEZF. Then when their new  
 FM signed on \*88.7 they became KLVP and  
 KLVP-FM (Mar. '97 p. 2, col. 1). Their sister  
 station in Sweet Home OR \*107.1 KSKD  
 changed calls to KLVU (Sept. p. 2, col. 2).

K-Love then moved the KSKD calls to 1040  
 Tigard; 88.7 became KLVP-FM (Nov. p. 2, col.  
 2). Now 1040 has reverted to KLVP... K-Love  
 says that when the KLVU calls became available,  
 they took them for 107.1 Sweet Home, but one  
 of their radio station friends wanted the KSKD  
 calls for their station. For some reason the  
 mystery station couldn't drop their current calls  
 for KSKD at that time. So K-Love transferred  
 the KSKD calls to hold and store at 1040 Tigard,  
 until the mystery station could take them, which  
 happened Dec. 22. This was done of course to  
 protect the calls from going up for grabs. K-Love  
 said it wouldn't happen again... I think I know  
 what K-Love stands for now. They love to change  
 call letters!

PA South Williamsport WFXW 1450 deleted.  
 TX Huntsville KLYR \*1400 now religion,  
 parallel to KHCB-FM 105.7 Houston.  
 WI Eau Claire WEIO 105U simulcasts sister WISM  
 98.1 Altoona, in wake of Radio Aahs folding.  
 WI Hudson WMIN 740 no k, now simulcasts  
 WDGW 630 St. Paul MN 6 a.m. to 2 p.m.,  
 followed by its "Radio Rey" daily (which had  
 been on WMIN weekends only).

ON Toronto 740 AM. New hearings to determine  
 who will get the channel vacated by CBL (moving  
 to 99.1 FM). "New hearings could mean huge  
 new expenses for the applicants and a very tough  
 political-correctness issue for the CRTc: should  
 the licence go to a black/contemporary station or  
 an aboriginal group that would be flagship for a  
 string of aboriginal community stations; and  
 should 93.5 and 740 go together as one has  
 suggested? It's another no-winner for the Com-  
 mission," writes Jerry Fairbridge in BTMP  
 (Broadcast Technology Management Production  
 magazine).

The CBC says it will relinquish its 740 licence  
 this fall, and is advertising for a site-sharing

## CBC Radio

agreement to accommodate the new licensee of  
 its 740 Hornby facility. "The CBC has already

received several enquiries about this matter from  
 potential applicants and their representatives,"  
 wrote Martin Marcotte, mgr., transmission and  
 distribution, CBL Toronto, PO Box 500, Station  
 A, M5W 1E6.

PQ Montreal CBM \*940 and CJAD 800 were off  
 the air following the recent ice storm. Both  
 reverted to FM to get emergency announce-  
 ments out. CBM-FM \*93.5 temporarily took  
 over the monophonic service. Then the new  
 88.5 frequency, which will displace 940 AM,  
 was prematurely activated. After CBM re-  
 turned to the air, CBM-FM reverted to CBC  
 Radio Two, with 88.5 in an experimental  
 mode until its scheduled advent this spring.

CJAD saw its four 206 m towers fall to the  
 ground. It was a victim, but continued to person  
 its help line for bringing food to shelters. It also  
 used CJFM, "Mix 96," for emergency announce-  
 ments, and then took over the old tower site of  
 CFMB 1410 AM, and switched to that frequency.  
 CFMB had moved to 1280. "We told listeners  
 how to file insurance claims, how to fight  
 employers who didn't want to pay them because  
 they couldn't get to work or how to deal with  
 landlords who wouldn't help them during the  
 storm. Now work has started to rebuild this radio  
 station. Our engineers are working hard so that  
 we can leave our shelter at 1410 AM and return  
 to our home at 800 on the dial," wrote Rob  
 Braide, vp-gm, CJAD-CJFM. A new 91-m tempo-  
 rary tower will enable CJAD to return to its 800  
 kHz frequency.

"The FMedial logo looks a lot better now that  
 it's black and white," J.J. NY via e-mail.

- WY Mills 105.5A

**FM AS IT WAS—OR MIGHT HAVE BEEN**

Bruce Cramer in Pennsylvania has comments about Edwin H. Armstrong's historic tower in Alpine NJ: "The company which operates the tower provides service for pagers and cell phones. The WFDU transmitter (89.1) at the tower is remotely operated from nearby Fairleigh Dickinson University (hence the call letters). The tower is underused, I would say.

"The young man who manages the site showed me a collection of ancient tube equipment, some pre-FM radios (with their separate speakers), but mostly test equipment. No working displays, however. And nothing from the early FM days. He referred me to a collection of Armstrong's experimental equipment at the World Trade Center in lower Manhattan, but this is uncertain. John Bose, Armstrong's chief engineer, told me (many years ago) that Marion Armstrong sold most of her husband's historical equipment to a junk dealer at six cents a pound! I think this says a lot about her appreciation of his work. [Some important items did make it to the Smithsonian, however.]

"When I listened to WFDU from my Jenkintown location, it was about 3 a.m. and the nearby Trenton NJ station on the same channel had left the air. Reception was on the first floor using a pair of rabbit ears. Propagation was unusually good, providing noise-free reception. I bought my first R-E-L tuner new in 1954 for \$325. There is a collector now interested in buying it. Anybody know what it's worth?" [See May, p. 4, col. 2, about a little sister station to WFDU.]

♦♦♦♦♦♦♦♦

Remembering how FM reception was in Santa Barbara in the '50s is Dennis Smith: "KFOX-FM 102.3 Long Beach was often the strongest on the FM band in Santa Barbara. The closest FM in those days was from Los Angeles/Long Beach, 90 plus miles distant. The multi-kilowatt transmitters from Los Angeles were over somewhat irregular land, while KFOX-FM's 1 kw was mostly over water. KWIZ-FM 96.7 and KFIL 106.3 Santa Ana (both 1 kw in those days) were sometimes good with some over-water paths, too, though not heard these days with so many FMs now in the way. . . In the '60s and '70s various Tijuana FMs became evident. XETRA-FM 91.3 simulcast XETRA (AM) 690 ('X-TRA News'), later 'X-TRA Music' in Kahn stereo AM and mono FM. XETRA-FM later went to 91.1 and is now '91-X'. XHRM 99.3 was 'Radio Moderna'; XHRM is now on 92.5 and XHKY is on 99.3. XHOK 100.1 was 'Stereo Rey', later to become two stations with XHIS 90.3 'His Radio' and XHERS 100.1 'Hers Radio'. Ninety point three is now XHITZ and 100.1 is apparently off the air. Back then, too, KCSB, University of California, Santa Barbara, was a 10-

watter on 91.1, then went to a mountain with approximately 60 watts on 91.5. KCSB is now on 91.9 with 880 watts. Family Radio (KEAR 106.9 San Francisco) had two LPFMs serving Santa Barbara in the early '90s: K213AR 90.5 Las Cruces with mountain site and K272CB 102.3 Montalvo out on Santa Cruz Island. Both are now off the air. In the '90s, KAWZ Twin Falls ID had LPFM in Santa Barbara with K201CU 88.1, later changing to 90.5, but in recent weeks has not been heard."

◆◆◆◆◆◆◆◆

"Enclosed is a chatty, 'stream of consciousness' sort of early tech history for some selected Baltimore FM stations," writes Charles S. Fitch, engineer from Avon CT. His history may be tarnished by 30-year-old memories, which can be "a little vague and to quote an old sage, 'There is no truth in the past, the good gets better and the bad gets worst'. Since FM is your area of special expertise and interest, I thought you might like to review this:"

88.1 WJHU took over the old frequency of WBJC that started on 88.1

91.5 WBJC—"I worked there in the 8th grade as both volunteer and as a paid engineer. . . With an empty FM dial and a metro location, this 120-watt horizontal only station seemed to go forever." Later it went to 1000 watts, and even more power after that, the equivalent of 50 kw. On the tower they moved to is also the old WCAO-FM, now WXYV 102.7.

92.3 started out as WSID-FM, which simulcast WSID AM during most of the day, "and ran just long enough at night to meet the simulcasting rule concerning the minimum [AM-FM] program separation. . . When the Eaton family (UBC) put Channel 24 on the air in Baltimore they built a tower behind their studios on Park Heights Ave. and 92.3 moved there. I think they're still there but at 50 kw. . . Since the FMs of all these simulcast stations sounded so much better, all of us young engineering cognoscenti listened to the FMs. One Sunday WSID was running some great live early Motown when suddenly the FM went off. I switched over to the AM and after about 30 minutes and no mention of the fact that the FM was off, I called down to the studio to see when we could expect it back. The combo operator on the air was started it had kicked off. He reset the overload remotely and turned it back on, thanking me for calling and making me promise I wouldn't tell the boss."

93.1 The Smith family put this on as a compliment to their radio school, with WPOC eventually moving to a tall tower.

94.7 was WWIN-FM, which I (Bruce Elving) received in 1951 from Duluth MN on a small

engineer, wrote: "Yours is the most distant report we have had on FM and is indeed, quite unusual. . . We use a 10 kw Westinghouse transmitter feeding a Western Electric 8-bay antenna on top of a 250-foot tower in the northwest section of the city. The antenna radiates. . . 20 kw." Later, WWIN-FM was to come on the air on 95.9 in Glen Burnie, owned by an AM there on 1590.

95.1 "A handful of FM stations came and went in Baltimore. One of these were where the FM stereo trials were held. The Zenith and Motorda systems were tried out on an FM that was strapped on the old nondirectional tower of WCBM AM when they were a fulltimer on 1400 Khz. When WCBM gave up this frequency (for 680) it became WWIN (AM) with a new transmitter site." This station became WRBS. "The same people ran a recording studio in the same building and reportedly it made more money than the FM station."

97.9 started as WBAL-FM, NBC, from a TV tower right away. "For a while ran the News and Information Service from NBC radio making it one of the few all-news FM operations until recent time."

99.1—this station has always been licensed to Annapolis MD, with antenna originally on one of the towers of WNAV 1430 AM. "My earliest recollection of this station was of 'bland, restaurant music'. In fact, the station's raison d'être in the '50s was to be a 'main channel' musack station. The station would broadcast primarily prerecorded proprietary music (make that to read 'no familiar melodies and about as creative as loosening up piano scales') in at least a 30 minute straight play and usually about 55 minutes. Then they would send a trip tone which would turn off the speaker output of the rental receivers they had placed all over their coverage area. At the end of the commercial break they would send another tone and it would switch back." "Since the tone for going into and coming out was the same, sometimes restaurants would get three minutes of announcements and long periods of silence, instead of the opposite. Eventually they went to a two-tone system, "unfortunately just in time for the Commission to eliminate this 'saving grace' for FM."

Later the station moved its site to maximum height where "good look angles into both DC and Annapolis" were provided.

101.9 started out as WTOW-FM in 1960, adjunct of a daytimer in Towson on 1570. They were 20 kw from a low site, and I [B.E.] can remember driving around Washington DC in 1967 and wondering why its signal was so poor. "Eventually they were sold and the new owners built a humungous tower between Towson and Baltimore and made it into WLIF with peppy elevator and dentist office music and were a huge hit."

102.7—Plough, Inc., known for St. Joseph's aspirin, built this station, WCAO-FM, in the late '40s. They had an allocation in the old 40 megacycle band, but it appears that was not built, and instead chose 102.7 from a high location in northwest Baltimore. "This station was exceptional and my tour there in 1961 changed my life. I took one look at this beautiful,

almost art deco Westinghouse FM-3 and I knew right there I wanted to work in broadcast engineering. The rig had a long life as reportedly it moved over to a DC FM and was installed as a standby transmitter in the late '60s. When the simulcast rule came in, the FM split from AM completely and ran the IGM 'good music' tape bicycle service essentially classical music and commentary 18 hours a day." Later the station moved to the new WBJC 91.5 site for best elevation.

104.3—this station started as WITH-FM, owned by a prosperous Class IV AM on 1230 kilocycles. "The FM technical plant was absolutely first class when put in in the early '50s. This included a classic red brick Western Electric designed and built transmitter/studio building. Ownership bought over 100 acres (an entire farm) on Rte. 40 on a hilltop at what is now the beltway interchange, a WE 20,000 watt grounded plate transmitter, two bay superturnstile antenna and 3 inch copper coaxial hardline for transmission line. The tower was a healthy Blaw-Knox 300 ft self supporter and is still there today.

"The location was viewed as midway between Baltimore and Washington and was expected to serve both as there were only 3 or 4 FM stations on the entire dial in Baltimore—WBJC, WCAO-FM, WITH-FM." [The total dial was really empty in the late '50s—one educational and two commercial Baltimore FMs, two in Annapolis, about three DC FMs. You needed an outside antenna and a really good tuner to get all these. WITH-FM probably had the best and highest site.] "The state then wanted the site for their communications, and forced the station to move, now being east of Baltimore. This gives WOCT excellent Baltimore coverage, but poor Washington DC coverage. [I'm wondering if any Washington DC FM stations were engineered to also serve Baltimore, and if they succeeded? b.e.]

105.7: This station had the oldest and most painful birth. Originally applied for before there was a table of allocations, it "got caught up nearly forever in petition to deny hearings where the complainant was none other than Red Lion [PA] radio." The station would be licensed to Catonsville MD. "Just to get rid of this case, the judge approved the station and made new case law covering city of license issues and specing as a sole determination of no interference. It signed on using the original WITH-FM Western Electric rig, and was still using that as late as 1970.

"In the '70s, WBMD AM bought the station for a princely \$300 K (eat your heart out ARS who paid \$39 mil last go around with the AM) from the religious group that owned it and simulcast their AM on it during the day and running at night. . . Shortly thereafter, WBMD moved WBMD-FM to their AM stick on Moravia Blvd., raising power to 50 kw. To achieve this, they had to become one of the most directional FM stations in the country running the maximum (15 dB) directional pattern. The station, with its new, big signal, began separate programming starting with 'underground' and slowly migrating to 'phiscodelic' and ending that phase with 'early heavy metal.'" The station is ultra close spaced to WQXA-FM 105.7 York PA and WJZW 105.9 Woodbridge V A. It now only

Zenith FM-AM table radio. H.A. Kemp, chief

mentions "Catonsville once an hour at the legal ID and then only in the first community served position, and then loudly BALTIMORE!

"For a short time in the '70s they were 'quadrasonic FM' using the SQ system, I believe. . . WKTK was one of the few that were doing live quad concerts so actually had a handful of relatively name groups appearing who were promoting their quad albums."

106.5 started about 1960 as WCBM-FM, with antenna strapped to a WCBM AM tower in Owings Mills. It had "just-so metro coverage" due to a lower location. Later the license was bought by WMAR-TV and moved to the T Television Hill TV tower site of WBAL-FM. "Apparently it is still there under new ownership and after a dozen format changes."

107.9—Famous Maryland broadcaster Morris Blum put this on the air as a companion to his WANN 1190 Annapolis MD. Its antenna was strapped to the AM tower, and basically simulcast the black, R&B format of his AM. At night, as WCBM-FM and WPGC-FM (95.5 Morningside MD) did, it would run the minimum operating time. "To give the station its own identity it had its own call—WXTC, ecstasy radio. I used to love that call. Apparently, Mr. Blum loved AM more than FM and sold off the FM to Family Stations, Inc., to help pay for his cable TV ventures and AM upgrade (for a short time WANN was 50 kw and a full timer on WOWO's frequency [Fort Wayne IN]). The FM moved to its own site and is still religious" as WFSI.

#### FCC To Look At Local Ownership Limits

The Federal Communications Commission, at the urging of Rep. Billy Tauzin (R-LA) and Sen. John McCain (R-AZ), will be looking at a wide range of ownership issues in communications. Included will be a revisiting of local ownership caps, and possibly a redefinition of the word "duopoly."

Tauzin would create a trust fund for public broadcasting. This would be funded by commercial broadcasters. They would have any public interest obligations transferred to the public broadcasting system. No legislation has been introduced, but one suggestion is that a portion of profits that broadcasters make on digital subscription services go to public broadcasting.

Enmeshed in the discussions are proposals to keep the Internet free of regulation, and to allow cable systems to charge what the market will bear. Out of the conservative Heritage Foundation came a report that would be dear to the hearts of the NAB and others championing unfettered media holdings and local monopoly power in communications. It was published in the February-March NRB magazine.

Adam D. Theurer issued a 14 point checklist that would render the FCC totally impotent, with no regulatory authority, except to perhaps clamp down on pirates and insure that no interference accrues to licensed broadcasters. He feels the 1996 Telecommunications Act did

not go far enough in deregulation. I agree with him that the goal of diversity in service providers, such as for local telephone service, has not been met. However, those who see broadcasting as having public interest obligations, and who would like to see less, not more consolidation in broadcasting, might be dismayed by the following:

1. Require expanded regulatory forbearance and complete merger and acquisition freedom. [of the FCC.
2. Initiate comprehensive reform/
3. Sunset all interconnection and open-access provisions according to a strict timetable and constrain their short-term effects. [know it."
4. End telecom "welfare as w/
5. Allow complete pricing freedom and reject calls for price controls.
6. Disallow FCC standard-setting authority. [He probably would create another technical debacle, such as happened with AM stereo.]
7. Prohibit Internet taxation.
8. Protect the Internet from regulation.
9. Allow spectrum flexibility and move toward spectrum property rights.
10. Eliminate remaining broadcast media ownership restrictions.
11. Eliminate foreign protectionist rules.
12. Eliminate all "public interest" requirements. [ity for all media.
13. Guarantee First Amendment par-/
14. Prohibit government-mandated encryption standards and controls.

With those ideas being prominently proclaimed, there is little doubt that the FCC will further loosen radio station media caps. This would leave any effective media regulation to reside with the Justice Department.

#### Small-Print Happenings and FM Industry News

Some broadcasters and would-be broadcasters are opposing auctions as a way of assigning new frequencies. Public broadcasters, for example, asked that they not be forced to bid on licenses. Commercial stations asked that modifications to their facilities not be subject to auctions. A few broadcasters who have not settled among themselves, but survived the FCC's hearing process, want to have their applications go forth, even when subject to appeals and other legal challenges.

National Public Radio and the Corporation for Public Broadcasting did a joint filing, saying that the Commission "should implement a selection process which furthers universal public radio service, promotes diversity and localism and does not harm existing public radio stations." Others suggested to the FCC that women and minorities be protected through the auction process.

Watch for call letters' changes in the Reno market. The KLCA and "Alice" format are expected to leave 100.9A Sparks NV for 96.5 Tahoe City CA. The KRZQ calls would move to 100.9. The new Salt Broadcasting Company hopes for a third FM in the market. It is one of 12 applicants for 94.5B2.

A new format is "Hit Classical Radio" from John Garabedian's Superadio. This in wake of demise of the SW network. He's been working with the experts at WCRB 102.5 Boston and hopes to see a commercial classical outlet in each of the nation's top 50 markets. Affiliates to date

include KBOQ 95.5 Carmel CA, KFSD 92.1 Escondido CA, WCVT 101.7 Stowe VT, WBQQ 99.3 Kennebunk ME and WFMR 98.3 Menomonie Falls WI. The format is available through a combination of cash and barter.

In Cleveland, according to the M Street Journal, classical WCLV 95.5 is selling its tower, office, studio and real estate, but not the license. Its physical assets are going to OmniAmerica, a fast-growing tower company that just happens to be based in Cleveland. The tower also holds WZJM 92.3 Cleveland Heights, and several non broadcast antennas.

Getting a reduction in its FCC fine—WVPI 104.3 Charlotte Amalie VI—from \$15,000 to \$1000. This was after the station persuaded the FCC that it was following guidelines set up by the bankruptcy court. Fine was for unauthorized transfer of control.

KSLY 96.1-AM San Luis Obispo CA had hoped for a reduction of its \$12,000 EEO fine, but the FCC didn't budge. The FCC was unconvinced the stations' EEO efforts were adequate, and was unmoved by their saying that they couldn't afford to pay the fine.

Eric Bunemann e-mailed St. Louis ratings. Notable is KMOX 1120 AM for being No. 1, the only .FM in the top 10. Following were WIL 92.3, KMJM 107.7 now 104.9, and KEZK. Classical KFUE-FM 99.1 was No. 12, but ahead of Class B or C/1s KIHT 96.3, KSD 93.7, WVRV 101.1. KXOX 97.1.

Regulatory relief for Windsor stations CIDR 93.9 and CIMX 88.7: The CRTC gave them programming freedom to change their formats at will. They had asked for that ability, in view of intense competition from Detroit stations, which have been known to switch their programming suddenly. The most recent is WXDG 105.1 going rock from classical WQRS.

Making a dramatic turnaround is CKUA-FM \*94.9 and its network of Access Alberta stations. It's gone way into the black—to the tune of \$500,000 by the end of its July, 1997 fiscal year. "We're doing better than we ever anticipated," said board chairman Bud Steen. Slipshod financial management saw the previous board giving some of its directors more than \$800,000 in salaries over three years. Fund drives plus new programming have turned things around. A fall drive netted \$511,000, plus new underwriting is expected.

Bonneville is about to convert its LMA with WTOP-FM 94.3 Warrenton VA into full ownership to the tune of \$2.6 million. That outlet enhances WTOP 1500 AM's reach into the western suburbs of Washington DC.

Many settlement agreements have been brought before the FCC, as of the Jan. 31, 1998 deadline. It is expected that they will be reported as granted by next month. One of the contests is for Two Rivers WI 98.9A. I talked to g.m. Chuck Mills at WKTT 98.1 Cleveland WI. His Tri-County Broadcasting is in a three-way contest for that channel, reportedly not involved in a settlement agreement. He and WTRW (AM) Two Rivers WI opposed the new 97.1A allocation in that city. Two religious groups expressed interest in the channel. Mills uses Mark Heller for his engineering expertise, saying "he's very intelligent," but is not a lawyer. I've tried repeatedly to get from Heller some constructive information on the so-called "quiet village" doctrine that he used against me in convincing the FCC not to allocate 106.5A to Hawthorne WI (see last month, p. 8, col. 3). When I call Heller at (920) 794-1800 he invariably hangs up. He threatened to sue, saying I had damaged his business as a consulting engineer.

Mills checked with the FCC and found that applicants for new FM stations that don't settle could wait 10 years or longer. Court challenges are expected to the auction process, so there is no certainty when—or how—decisions will be made on various applications.

What's the deal with FM translators you

might ask? Suddenly it's become very controversial. Recall that WGEN AM Geneseo IL is losing its FM affiliate through a sale, and move-in to an Iowa town. WGEN wants an FM translator for its AM for better nighttime service and school closing type announcements. The NAB was goaded, and, well, they've backed off. A purported NAB memo said only 100 to 125 of the possible beneficiaries are NAB members. Perhaps the NAB is concerned that others who don't own stations might want translators or work toward the creation of a "low power" FM service?

Dan Ramos, in fact, was cleaning out his archives and ran across an FCC petition from 1986 written by John La Tour, Power Dupree Broadcasting of Fayetteville AR. It proposed to change the FM translator rules to allow for low power FM. Advantages cited were: a) full spectrum utilization; b) satellite feed; c) local origination; d) protection from interference; e) networking; f) uniform 10 watt coverage. Regarding point (c), LPFM would "seek out" narrow appeal formats. Translators should be "deregulated" so that the translator operator can be free to arrange with the primary station which part of the translator broadcast will be local and which part will be a rebroadcast of the primary station. And translators should be protected so that their facilities are not taken away by new or expanded primary stations.

"If current full power broadcasters are doing such a splendid job, what do they have to fear from a little additional competition? And if they are not doing such a splendid job, why should anyone object to a little additional competition to spur them on to a greater level of programming quality? ... If protectionist rhetoric is somehow allowed to kill this petition for rulemaking, the prospects of a strong LPFM industry will also die. Along with it will die the hopes of Americans all over this country for true choice in FM programming. America surely deserves better."

We know La Tour's petition was killed when the FCC placed severe restrictions on translators, especially denying funding to third party operators when outside the primary coverage of the main stations. The FCC Commissioner most opposed to translators was Jim Quello, who is no longer at the Commission. Lately, the micro-broadcaster movement has made waves, in government, in being noticed in the media, and by the NAB. All these happenings might do much to revive interest in a low power FM service. La Tour may have been ahead of his time.

There supposedly is a petition to allow low power FM broadcasting, and like the translator-for-AM move, the NAB isn't interested. It calls low-power stations "spectrum inefficient." Free Radio Berkeley's Stephen Dunifer thinks the petition bad because it's too commercial. Dunifer would like a hunk of TV spectrum to go to low power FM, specifically 82-88 mhz from Channel 6. That could happen after TV goes digital. Another possibility is the raising of the legal range of unlicensed stations, now a maximum of about 30 meters for FM.

Ramos also sent a California Historical Radio Society Newsletter, which mostly goes into the restoration of old tube [AM, AM-FM] radios (PO Box 31659, San Francisco CA 94131). Ramos adds: "KCRW 89.9 operates out of Santa Monica and is one of Los Angeles' most popular public FM stations. As a subscriber, I get the monthly newsletter 'Splice'. The nationwide shows, 'Le Show' and 'Good Food' originate from here. KLON \*88.1 operates out of Long Beach, 32 km south of L.A., and is the only FM station devoted to traditional jazz. ... Chuck Niles has been a jazz d.j. in Los Angeles for over 30 years, including a stint on the old jazz station, KCBA (103.1). Mr. Niles' voice is very unforgettable. It sounds like he gorges with gravel every morning. ... Its transmitter is atop Signal Hill.

"The 9 cassettes I have enclosed were ones I came across while cleaning out my tape rack. ... Five I made are of KIIS-FM 102.7 when they

were owned by Gannett. . . Happy reading and listening!"

Doug Brewer's "Party Pirate" (last month, p. 8, col. 1) in the Tampa area is back on the air, supposedly reaching out 32 km, and he's taking ads, according to a story in the Jan. 14 "Inside Radio." He's charging \$100 for run-of-schedule spots through the day. "Something that is not illegal. Aside from stealing the frequency. Local business owners reap the benefits of low cost and community identity. Customers apparently like the idea of businesses advertising on a station that reacts to the personality of the neighborhood. Something group-owned stations cannot do. Record companies are also sending pirate operations promotional compact discs and tapes. Now it becomes apparent why the NAB is leading the charge to keep pirate radio out of broadcasters' business."

"They got smut off the bus" reads the headline in the Jan. 13 *Women's World*. Story was about 10-year-old Laura Brown telling her mom about the shock radio she had to endure on her way to school. "As Laura blushed and stammered [about a landlord getting into bed with his tenant], Diane [Brown] listened incredulously." Diane is a teacher in Saverna Park MD, and they were probably reacting to Howard Stern on WJFK-FM 106.7 Manassas VA. She thought, "Why shouldn't bus drivers have an approved list of radio stations?" She appeared before the school board, which agreed with her that the principal—not the bus driver—would determine what was appropriate on all district busses. Diane said, "Laura started this, and I just followed through. I did what any mom would do."

In wake of virtually unfettered media mergers, CBS has cut benefits of parttime workers. Affected are health benefits and stock options, which won't be available regardless of number of hours worked. A parttimer in Boston had a hard time finding this out. That person said, "There has been very little in writing from Westinghouse (owner of WBZ) since the merger with CBS." A CBS person in New York declined comment, saying it is not company policy to discuss internal decisions.

In the technical realm, a single chip device promises to capture functions such as video, broadcast audio and stereo FM radio. Unlike earlier devices that support only video capture, the Fusion family of ICs provides broadcast media technology for video e-mail, video and still editing, radio and data services. The Bt series is supposedly the first of its kind to use an intelligent architecture to grasp broadcast TV audio and FM radio without cabling and added components. Such a device might lead to smaller, lower cost TV audio radios with VHF and UHF, as well as FM radio. Cost in small quantities for prototype designers is \$22 to \$24 from Rockwell Semiconductor Systems, Newport Beach CA, (800) 854-8099.

ZGM, "Gem Radio," Montserrat 94.4 with a power listed at 20 kw, but advertised as 230,000 watts, is being sued for overstating the coverage of its FM stations. Cumulus' Caribbean Communications is taken for task for claiming coverage from the U.S. and British Virgin Islands in the north to St. Lucia to the south, a distance of 320 km. Plaintiff is Caribbean Broadcasting, which charges that CCC has a monopoly over U.S. advertising in the eastern Caribbean.

Somebody sent a life insurance company organ called "Current," which summarizes Arbitron radio research. It found that radio listening at work comprises 27 percent of all listening. Among fulltime workers, 40 percent of their listening is at work, 33 percent in the car and 26 percent at home. A total of 78 percent of at-work listeners either pick the station they listen to or cooperate with a small group to choose a station. People listen to all kinds of stations at work—

easy listening, classic rock, hard rock, oldies, even alternative rock and country.

More than half the study respondents report that listening at work makes them more productive, with virtually no one reporting it makes them less productive.

Broadcasting Partners is a group that bought four Maine stations through its Pilot Communications entity. The group has several stations in the Ithaca-Cortland NY market. It is acquiring stations from Martz Communications—WBPW 96.9, WOZ1 101.7 and WQHR 96.1 in Presque Isle. Latter simulcasts WHRR 102.9 Dennyville, which is not in the transaction. They're paying \$5.1 million for the stations, which are in Aroostook County "in a chronically depressed economic area. I think \$5.1 million is top dollar even with today's prices," wrote Bob Gilbert who does the Maine Broadcasting News.

In December, it was mentioned that Saga Communications is branching out into owning state networks. [See p. 8, col. 2 about the Illinois Radio Network.] Now Ed Christian's group is buying the assets of the Michigan Radio Network. It's a news and sports web with some 55 affiliates statewide. Christian said, "This acquisition is excellent for Saga as it expands our activity in the state network business as well as it being located in our home state." Saga owns 24 FM and 13 AM stations and one TV station.

Craig Pattillo works at KKSJ-FM 97.1 Portland OR, which is being bought by Entercom of Philadelphia. It's also buying KKRH 105.1 and an AM from Sinclair Broadcast Group. Entercom already owns KGON 92.3, KNRK 94.7 and another AM. For a couple of months both Entercom and Jacor have been in court, each claiming it has the right to buy the Sinclair stations. But a Cincinnati judge ruled Jacor had no basis for blocking the sale. "With our three and the Rochester [NY] stations they said in the meeting that Entercom will be the 10th largest radio station owner," Pattillo wrote. KKSJ-FM has had four owners since March—Heritage, which sold it to Rupert Murdoch's News Corp., then Sinclair, and finally Entercom.

The Michigan Association of Broadcasters holds its Great Lakes Broadcasting Conference and Expo Feb. 24-25 in Lansing. Registration as low as \$45. Contact MAB at (800) 9768-7622.

The 23rd annual community radio conference is Mar. 13-15 in Bethesda MD. Featured will be Skip Pizzi, editor of BE Radio, and audio technical manager for a branch of Microsoft, who'll be at a pre-conference workshop on planning for digital conversion, Mar. 12. For more, call the NFCB in CA, (415) 771-1160. Call that number, too, if you want a job description for Lynn Chadwick's position (last month, p. 6, col. 3).

Skip Pizzi, in his magazine, earlier wrote about the transition to digital by radio broadcasters and interviewed E. Glynn Walden, Group W Radio's director of engineering. I met Walden in Winnipeg at the CAB/CBC's unveiling of digital audio broadcasting in 1994. He said: "I think we've accomplished more [since mid-1997] than we did in the prior five years, probably. [Hybrid IBOC using existing FM subcarriers] is going to work. It makes great sense. We've got the right team put together. And it's not only the technical progress that's being made, but also all the ancillary issues that are important. We're feeling really good about it."

WWFM \*89.1 Trenton NJ is trying to move into the Philadelphia market in a big way. Above, "FMakings," you'll see it has applied for a 107.9 translator in Jenkintown. In its program guide, Walt Gradzki, g.m. and c.e., mentions installing a directional antenna to try to receive the station, such as the Radio Shack 15-2163 at \$20. The antenna can be aimed at 89.1 Trenton or the Society Hill Tower translator at 107.9. He then clarifies about a report of a takeover of WHHS \*107.9 at the Haverford PA high school. "The facts are that we approached WHHS and asked if they were on the air 24 hours a day. If they were

not, WWFM would have liked to provide them with our signal to broadcast. However, since they were not interested we dropped the matter."

WWFM is also carrying specially produced programs culled from over three seasons of the Philadelphia Orchestra. The concerts will be available nationally over a network created by WFMT 98.7 Chicago. It will be a 13-week series of two-hour programs.

A DJ has been punished for driving blindfolded. It happened at WFBC 93.7 Greenville SC where Paul Thomas Breakfield, known as Tom Steele of the morning "Hawk and Tom" show, drove on two local streets before turning onto I-385. He was assisted by a radio producer who relayed instructions from the passenger seat. Part of the stunt was broadcast live. This landed Breakfield a \$200 fine plus 240 hours of community service. He claimed to do the rush-hour blind driving as a tribute to Ray Charles.

Raunch radio is a problem to those who know Spanish and listen to Spanish radio. Shock jocks in Spanish are on in the mornings on the Z ("seh tah") Spanish Network, according to an article in the San Jose Mercury News. The programs appeal to farmworkers who hear the owned stations or affiliates in such diverse places as Wenatchee WA, Liberal KS, Avon Park FL and Calexico CA-Mexicali BN. Major markets receiving the programs are Dallas, Chicago, the Bay Area of CA and Denver. Listeners can call the Sacramento studio via a toll-free number. Callers are screened and must be 18.

Victor Hugo Santos of Sunnyvale CA listened to the sex talk program once or twice, out of curiosity, but never again. "As much as I try, I can't find anything positive in it," he said, adding that the show was "vulgar." Main offender seems to be sex talk host Joaquin "El Chulo" Garza. He appeals to the employees at All Pro Auto Detail in San Jose. The dozen employees turn off the vacuum cleaners so they can hear the explicit callers and Garza's dirty jokes. "It makes us laugh. There are other disc jockeys who are very good, but they're missing something," said manager Harvey Corral, 27.

A Schenectady woman who was the butt of a skit by radio shock jocks Mason and Sheehan can sue for damages. Annette Esposito-Hilder can let a jury decide about the emotional damage she was said to have suffered at the hands of the WPYX 106.5 jocks. She was selected as the "ugly bride" or "most photographically challenged" by the announcers. They left WPYX shortly after that and are now at WXCR 102.3 Ballston Spa NY. They identified her by her full name and place of business, all without her consent. She filed an \$800,000 lawsuit, with her lawyer maintaining the on-air spoof was a vindictive act that was meant to cause harm. "Annette has worked in the broadcast industry for years, and she takes the First Amendment very seriously," said Nora M. Murphy of Albany, her attorney.

Judge Ann T. Mikoll wrote in the court's decision to allow the lawsuit: "We are not unmindful of the constitutional issues implicated in this case. We have determined that the state's relatively strong interest in compensating individuals for harm outweighs the relatively weak First Amendment protection accorded defendants."

WRVM 102.7 Suring WI has voted to become noncommercial. The benefits of changing status are: 1) Greater freedom and ability to expand our listening area through translators. Now they have to work with community groups, and cannot fund such efforts, and other help they might give is restricted. 2) Reduced expenses for music licenses. Currently, it's costing \$15,000 a year just to play music; as a noncommercial station this would be cut to about \$360 a year. "That's a significant savings!" wrote Mike Cornell, manager, in its program guide. 3) We would not be required to air political spots. "Many years we are required to play spots that normally would be unacceptable to us. Noncommercial stations are not required to air political

spots." 4) There would be no commercials on WRVM. "For 30 years, revenue from advertising has helped bridge the gap between expenses and donor income." The station receives about \$40,000 in advertising revenue, but this loss can be offset by convincing more listeners to contribute. The station also hopes to see added revenues from leasing tower space, and it hopes to retain many of its current advertisers through underwriting, or what WRVM calls "sponsorship spots."

"We are confident that this move is of God, that He has directed the decision. Just as He has provided for our needs for 30 years, we are trusting in His faithfulness to continue to provide our needs as we continue to be faithful to Him in what He has called us to do," wrote Cornell.

Religious stations taking in money from sharathons or pledge drives include WBCL \*90.3, etc. Fort Wayne and nearby OH. They took in \$888,868, which is over the goal of \$865,000. The sharathon lasted only two days. With its sharathon success, WBCL is advertising for a news reporter to cover the 11 counties of northwest Ohio they serve. Letter, references and dates when worked in the field to Dir. of Personnel, WBCL, 1025 W. Rudisell Blvd., Fort Wayne IN 46807. EOE.

KGBI \*100.7 Omaha NE took in \$650,000 from 3700 listener-pledgers. It reached its goal, with 1000 new members added. WGNV \*88.5 Milladore WI had a record number of pledgers and a total of \$175,000, which exceeded its goal. WCSG \*91.3 Grand Rapids MI took in \$620,500 with 4700 listeners contributing. "However, for the first time in 16 years, the station did not reach its sharathon goal."

Monophonic WPRE-FM 94.3 Prairie du Chien WI has been sold to Robinson Corp. (David and Jane) from Prairie Broadcasting (the Schlaughts) for \$500,000. Perhaps the new owners will add stereo.

Obituaries—Dave Evans, 55, chief engineer KALW \*91.7 San Francisco, "joined the big transmitter in the sky." He was a pedestrian and hit by a car. "It was very tragic."

Tony Griffen, news director WMUK \*102.1 Kalamazoo MI, died after a battle with lung and bone cancer. The article in the MAB/MAPB newsletter didn't give his age, but he'd been with the station 25 years. "He established himself and WMUK as a respectable and reliable news source." He is reported to have started the first regular weekly programs on African American and women's issues.

Also dying—Natalie Roe, 91, who with husband Douglas, founded WPEL AMontrose PA in 1951 and WPEL-FM 96.5 in 1961. She participated in a daily program on the station until Aug. 1997. Douglas was active at the station until the time of his death in 1984. Natalie was vice president of the board of directors at the time of her death Nov. 8. I recall reading that WPEL-FM used oxen to carry the equipment up the mountain they broadcast from. It would be a station "to singe the hair of sinners over a wide area," one of my correspondents to a column I wrote for the Newark News Radio Club mentioned.

Junior Hernandez, 34, who had chronic asthma, died of a heart attack as he walked by the building housing his employer, WSKQ 97.9 New York. He was co-host of a morning show, "El Vacilon de la Manana," that was second in popularity only to Howard Stern's in the market. The station, Mega 97.9 (as it is known in English), was literally inundated by grieving fans. A crowd of about 12,000 gathered outside the Ortiz Funeral Home to get a glimpse of a man they knew only through his voice.

Like Stern, his jokes could be crass—so much so "that many of his fans did not dare to repeat them." The show will continue with Hernandez's co-host, Luis Jimenez, and two assistants.

The M Street Corporation adds a daily FAX sheet called the "M Street Daily" to its holdings.

It came out Jan. 6. They offer a limited time trial period at (800) 248-4242, or e-mail Tom Taylor at MStreetTom@aol.com. Subscribing price is \$295/year.

From the classifieds: FM broadcast engineer. Install and maintain tube and solid state transmitters and translators. Excellent character and ethics necessary, some travel needed. Resume with full work history to Marsha Shrader, PO Drawer 2440, Tupelo MS.

We are a small rural school district in the Willamette Valley and are looking to start up a low power FM station in our high school. We need anything and everything, in good working order, for a good price (or donation). We could also use good advice on how to get the station up and running by next year. Dave Lund, Amity School Dist., PO Box 138, Amity OR 97101; (503) 835-2181.

Erko Custom Crystals, Inc. TR-6 FM/SCS receiver, features a one-switch volume/on-off control. Fixed frequency. The TR-7 is a fixed frequency radio that can be factory set for FM/SCS or TV-SAP. Prices and other information from Larry Mardn, Erko, 4541 S. 88th St., Omaha NE 68127; (402) 331-2632.

Damien Pickering of The Rose Resnick Lighthouse for the Blind, operators of the SAP radio reading service on KTVU Channel 2, Oakland CA, is mentioning my modified—and fully tunable—radios for SAP in their program guide. An agency in Vallejo, between Oakland and Sacramento (where the reading service is on the SAP of Channel 6), ordered a modified Sony ICF-34W with TV audio, 2-13, plus FM-AM and SAP. That radio I sell for \$65 plus \$7 shipping. A reader in Atlanta thinks it has excellent FM radio selectivity.

News reporter/anchor WAMC \*90.3 Albany NY, interviewing ability, 3 plus years in public radio, etc. \$20 to \$25 K/year with benefits. "It's a dream job for the right candidate. . . You'll be joining a tight-knit newsroom with 5 other reporters who all share chocolates. Visit our website at <http://www.wamc.org>." Resume and cassette tape to Reporter Search, WAMC, 318 Central Square, Albany NY 12206. EOE.

Ratec International announces its line of SCS and SAP radios. Albert Lin is about to sign me up as a dealer for their line of shirt-pocket single-frequency radios having a main-SCA switch on the back. He also reports development of an SAP radio with frequency user changeable by dip switches. One of my blind customers has one and likes it for receiving the 67 of WLTR \*91.3 Columbia SC.

Small FM transmitter, tunable from 88-108 mhz using DIP switches. Can also be used as a translator. Powerful enough to cover a town or small city, \$200. Also, pro channel radios and decoders. Johnson SCS 880A boards, \$35 each. SCS Radio Technology, (800) 944-0630.

FM FORUM

CONTRIBUTIONS FROM READERS

"I note with glee that you published both my remarks about Spanish-language formats and my tirade against Alas @ 97.3 [in December]. That should keep your mailbox full for a couple of months," writes John M. Jefferson of northern California. "I do hope it isn't corroded too much by the rockheads' and country fans' venomous replies! To their inevitable claims that I'm narrow minded, I challenge them to listen seriously for 35 years to medieval, Renaissance, baroque, rococo, classical, romantic, post-romantic, neoclassical, electronic, and minimalist 'classical' music, folk/traditional music from America, England, Canada, western and central Europe, Mexico, Central America, South America, Japan, China, India, Africa and the near east, as well as jazz and new age. If they can still stomach their rock or country, then yes, they are broader-minded than I!"

So ends another 12-page FMedia! This issue contains more lines of copy than any other. I think I'm catching up on the backlog of material. As always, your input is welcome—via mail, FAX or e-mail.

Until March, Bruce F. Elving

Call Letters Assigned

AL Brewton \*90.9 WPHY (WPHG), to be g, \$, returning to air later this month.  
 AL Chickasaw 98.3 WDLT-FM (from WDLT); AM is in Fairhope  
 AL Troy \*91.1 WAXU  
 AR Lake Village 103.5 KZYQ (KDTL)  
 AR Lonoke 106.3 KKYK-FM (KMZK), r, parallel to KDRE 101.1 North Little Rock. KKYK-FM now "Z-101" (sic). I am calling it KKYK-FM rather than KKYK (FM) because there is a low power TV station, KKYK-LP, channel 22, in Little Rock. This station used the KKYK calls before KKYK-FM changed from KMZK.  
 AR Maumelle 96.9 KSIZ, s, "Hot 96.9," but has

no phone listing and other Little Rock broadcasters I called had not heard of this station. [smooth, "Jazz 107.3"  
 CA Grover City 107.3 KQJZ (KIXT), j,  
 CA Los Angeles 100.3 KCMG (KIBB), "Mega 100 FM"  
 CA Roseville 93.7 KRAK (KRXQ). Uses calls: "Gold Country 93-7 KRAK."  
 CA Sacramento 98.5 KRXQ (KRAK), "98 Rock"  
 CA Santa Barbara 107.7 KLDZ (was KLDZ-FM briefly), o, "Oldies 107.7," stereo. It teased with an electronic heartbeat sound with references to an "electronic monster" (like Frankenstein) coming. Then it alternated with an hour long radio program, playing stereo mood music in the background. KLDZ has "quite nice stereo sound and separation, which one might expect from a new station, with many of those oldies (though not every one) broadcast in stereo." Its 1340 AM, formerly KIST, goes all sports, KXXT, after being an FM simulcast as KLDZ (AM). "In my opinion, the 60-plus-year-old KIST call letters should not have been discarded."  
 CA Walnut Creek 99.7 KFRC-FM1 (from KFRC-FM 3 because of "Deletions" (see below)  
 CA Yucca Valley 106.9 KYOR"-FM" (KSES)  
 CO Estes Park 102.1 KRKI (KEZZ), o, classic hits. It swaps calls with 1470 AM.  
 FL Fort Pierce 95.5 WXFG (WCLB-FM), "Frog 95.5" [is in Orange Park FL  
 GA Brunswick \*90.7 WAYR-FM (WAQC), AM/  
 GA Donalsonville 107.5 WWGF  
 GA Roswell 107.5 WAMJ (WTHA), still "Magic 107.5." They claim to be at 26500 watts now, and hope to be 100 kw by summer, despite the FCC saying it's still a Class A at 6 kw. "I was traveling to Chattanooga yesterday, and carried them to the Tennessee state line!"  
 ID Pocatello \*91.1 KISU-FM. KISU (TV) is channel 10 there.

 IA Davenport 103.7 WLLR-FM (KUUL), k,  
 KS Colby 97.9 KWGB  
 KY Lexington 98.1 KBUL-FM (WKQQ); AM is in Shepherdsville KY; "The Bull."  
 KY Mount Sterling \*88.1 WAXG  
 KY Winchester 100.1 WKQQ (WWYC), "100 Rock Double Q"  
 LA De Ridder \*91.1 KBAN  
 LA Houma 104.1 KUMX (KHOM), still "Mix 104.1" [smooth, "Jazz 97.1"  
 MD Ocean Pines 97.1 WQJZ (WLFX), j,  
 MI Houghton 102.3 WHKB (WAAH), facilities to 38000 h,v; 150 m, C2  
 MI Oscoda \*95.7 WCMB"-FM" (WCMV)  
 MN Deer River 105.5 KBAJ  
 MS Liberty 107.7 WAZA  
 MT Dillon 98.3 KBEV"-FM" (KDBM-FM)  
 MT Missoula \*91.1 KMZL  
 NH Lancaster 102.3 WXXS (WNHT)  
 NJ Trenton 94.5 WNJO (WCHR), o, "New Jersey Oldies" ("how trite!") Prior to going oldies was stunting with construction-type sounds in a five-minute tape loop: "You're listening to the construction crew—your chance to witness the birth of a new radio station is nearly here." Sounds included music in the background. "The Christian programming will continue on 920 AM," formerly WTMM. The station went off the air for a few hours, coming back mid-day Mar. 2 with ticking sounds. Then after 5 p.m. came its '60s oldies format. The new morning team of Don and Michelle asked NJ Governor Christie Whitman if she'd name a highway rest stop after them, like she did for Howard Stern. She said she would do so only if they endorse her and have a book on the best seller list like he did.

NY Arlington 96.9 WRRB (WDSP)  
 NY Attica 101.7 WXOX (WBTF), r, now "The Spot." Speculation it might simulcast KEYKY 101.1 Fort Erie ON, now "101.1 The River," if such a "multi-international simulcast is allowed." IDs as "Attica-Amherst-Greater Buffalo" (no longer with Batavia). "Could this have something to do with the 92.1 allocation in Amherst, since that town was mentioned?"  
 NC Aurora 104.5 WFPF  
 NC Murfreesboro 98.3 WSAZ (WDLZ), k, parallel to WSAY-FM 98.5 Rocky Mount

the Milbank SD FM-AM is expected to buy it. "Have you heard anything about the freeze on new translator applications and facilities changes for commercial translators? We have been ordered off 98.3 in Ellendale ND because of the new KYNU Carrington ND, also on 98.3, but can't do anything about it for now, except possibly to go off the air." [Jim Durst of the Commission's mass media bureau researched this for me. The freeze is in effect. It affects commercial translators—new and "major changes," such as going to a new frequency. "The freeze may be lifted by late summer or fall. It's tied in with the auctions, for some reason." He suggested I try making a "minor change" in off-air W280CT 103.9 Hermantown MN in order to keep it on the air. I've been planning a major change, but have not yet made an agreement with the proposed primary station.]

MS Sumral WJSJ 97.3, mr, ID with Hattiesburg. Uses calls.

MT Deer Lodge KQRV 96.5, kr, "country with some rock." ID with Butte-Anaconda, "The River."

MT Great Falls KGFC \*88.9

MT Helena KVCN \*103.1

MT Plains KPLG \*91.5. These three all ID with KXEI \*95.1 Havre. Plains just came on with a g format. Also on are eight translators. "Some are direct fed; others by satellite. All are stereo," says g.m. Ed Matter.

NE Hastings KFKX \*90.1, p, alternative on 4 p.m. to midnight. KCNT \*88.1 Hastings is still mono and on only 8 a.m. to 4 p.m. The two could share time but don't. The "90.1 Family Stations" translator in Grand Island "moved to 90.7 because of us" (see "Facilities," above).

NJ Atlantic City KZZP 107.3, testing with r, classic rock, new rock and rock oldies.

NC Hertford WFMZ 104.9, gr

OK Pawhuska KTGP, k. "Playing canned C&W numbers at present."

PA Boalsburg WBUS 93.7, heard testing with r and k, ID with State College.

TN Belle Meade WNPL 106.7, r; "Planet 106.7" ID with Nashville. It has displaced WAMB-FM 1, which has moved to 106.7 (see "New," above).

TX Seymour KSEY-FM 94.3. Has a new Armstrong 100-watt exciter with stereo. "The people at Armstrong are very nice to work with. When we increase power and move to 93.9, they will allow a full trade in allowance." Interested in microbroadcasting. "There are a lot of small towns around here who could use a local radio service. We are live 12 hours a day, and automated at night only because it's an economic necessity in such a small town."

TX Shamrock KRMN 92.7, mr. "Funny you should ask if we're stereo. Nobody has ever asked us that question before."

WA Leavenworth KLVH 101.1. "But we're only testing, running smooth jazz, easy listening, m-o-r, adult contemporary. Call back in 30 days and we'll know what the format is. I'm having enough trouble trying to stabilize the stereo. We can't get to the mountain because of the snow. The room heats up, and we can't

get air conditioning equipment to it. We're running it 24 hours a day."

WI Antigo WACD 106.1, m, parallel to WATK AM; IDs as Crandon-Rhineland.

GN Irapuato XHJTA 94.3, "Stereo Amistad," 25000 h,v

**On Air—Real Stations and Pirates (Selected)**

- CA Sacramento 100.1 back on, mono, after having been busted by the FCC. A soul pirate on 92.9 in the Freepoint area, south of town, is on, while the 90.5 pirate not heard recently because of the new KKTO \*90.5 Tahoe City (see below). "Bethel Island's 92.3 was heard in mono, overmodulated, with several obscenities and hard rock. . . Not a good argument for legalizing microbroadcasters!" Giving publicity to the microbroadcasters' cause was a Feb. 27 USA Today article. It focused on Stephen Dunifer, who has sold some 300 of his transmitter-antenna kits.
- CA Santa Barbara—Gold's Gym has added 96.3 to its 96.9 for hearing TV while exercising.
- CA Tahoe City KKTO \*90.5 cn, NPR, co-owned with KXJZ \*88.9 Sacramento, supposedly stereo, and serving part of Sacramento, "but I haven't heard them. I have Concord's KVHS [90.5] to contend with."
- CO Telluride KRYD 104.9.
- FL Orlando "WFMA Radio Maranatha" 92.7, \$, Spanish, g, on since Dec. '96. On 8 a.m. to midnight Sat., Sun. 8 a.m. to 9 p.m., weekdays 6 p.m. to 10 p.m. Run by Rev. Miguel Miranda at iglesias@bellsouth.net. Address on their website: 7303 Forest City Road, ZIP 32810.
- IN Alexandria WQXT 96.7 still on, taking the format that WXPX 97.9 there had.
- IN East Chicago 87.9 "plays house music or something and there is almost no talking."
- MA Wellesley—Babson College Radio is on the Internet (not on FM). Students like its world-wide potential. It takes downloading a special audiocard that appears at <http://radio.babson.edu> to hear it.
- MI Detroit—the Detroit Free Press says a group is close to a deal LMAing a station to air a classical format (in the wake of the demise of WQRS 105.1). "The article says the station may be WGPR 107.5."
- MI Grand Rapids WBYW \*89.9 still mono, "Sacred Favorites Radio"
- MI Muskegon W215AS \*90.9 on with FL's WPCS. "Signal is weak but audible in stereo

deck with a switch to select between "mike" and "line" input, they enjoyed making announcements and speculated on owning such a transmitter. They thought it to be a very fine piece of equipment, despite its small size. It could substitute for my licensed translator, which is rated at 10 watts. For more information on the \$200 transmitter, see "From the Classifieds," last month, p. 12, col. 3. The relay was of KDWB 101.3 Richfield MN. Said a local media student: "Now if you could get KDWB's signal up to the hill and put that on your translator, that'd be something to listen to! It's a format that Duluth programmers don't want to put on because they think it's too 'ethnic'. It's a racist attitude if you ask me. They seem to think that white people don't listen to rap or dance music, even though more white people listen to KDWB than black people. . . They say something like 'well, when you see a black person at the mall, you're likely to listen to black music' (actual quote from an actual Duluth radio person, who I won't name)."

NJ Florence "WNJL" 99.7—1 w, smooth jazz usually on from 5 p.m. to 9 p.m. "Our signal can be heard throughout Florence Township, but in downtown it gets pretty static."

NY Brooklyn—Radio Mostish and Redemption 87.9 now back on most of the time. "Signal seems slightly weaker than when they were on 91.9 last year; so far nobody has complained about them on the Internet this time around (see April '97 p. 3, col. 3). Still asking for contributions to be sent to the same mailing address (see March '97, p. 4, col. 1). They also want to hear from prospective advertisers. Meanwhile, 24-hour Radio Ideale on 90.1, Brooklyn, is planning to hook up with radio Lumiere, a religious network in Haiti." Radio Ideale (see day AHL) is \$, Haitian, with Sunday church service, live newscast 6 to 7 weeknights, PO Box 037080, Elmont NY 11003. Adjacent to WKCR \*89.9 and WHCR \*90.3. "They might also interfere with WHPC \*90.3 Garden City and WXHD \*90.1 Mount Hope NY."

NY New York city area—Radio Konbit 87.7 still on, now about eight hours a day. "I guess the three local Haitian SC stations and WYGG \*88.1 Asbury Park/Brooklyn are not pleased at having to compete with two pirates!"

NY Ticonderoga WANC \*103.9 back on after a transformer in its transmitter was damaged by power fluctuations in the ice storm. It was a difficult drive up the ice-covered, downed-tree-strewn road. When power came on, after the transformer wire was repaired, "smiles came across our tired faces. Of course, my smile faded when I realized we had to get back down the mountain, only this time, in the dark."

OH Kent WKSU \*89.7 announces: "Due to circumstances beyond our control, WKSU cannot be heard in certain inner city areas of Cleveland as a result of the pirate radio station operating at 89.7 FM." Area reporter "was not aware of any pirates on or near 89.7. If I find out any more information, I will let you know."

OK Comanche KDDQ 96.7, not having moved to 97.1, "which when on will bother K246AF Oklahoma City."

OK Oklahoma City K246AF \*97.1 with stereo during NPR's "All Things Considered," "unlike policy on KDSU \*91.7" Stillwater. Translator must have a separate stereo generator and be incapable of shutting off if main station leaves the air. KRou \*105.7 Spencer and KGOU \*106.3 Norman were off Jan. 6 due to icing problems.

OR Portland pirates heard on 95.9 (music, no slogan heard) and 89.5 with stereo rock, but at last report was off the air.

PA West Philadelphia 91.3 "Radio Mutiny" (Dec. p. 4, col. 2) is still on, and the operator is planning an East Coast Microbroadcasting Conference Apr. 3-5 in Philly. Details at

- (215) 382-4992 or [wppr@svaha.com](mailto:wppr@svaha.com). Deadline for registration was Mar. 5, but if you called right away they might make an exception.
- TN Nashville 97.3 \$[tereo], p (underground), no announcements, heard irregularly.
- TX San Antonio KPAC \*88.3, but not up to full strength. Off air was STSX \*89.1. Both stations believed affected by icing.
- TX Wichita Falls K204CB \*88.7
- WA Seattle 101.9 "NLNR," which stands for "neither left nor right," run by Burton James.
- WI Public Radio's two networks to go 24 hours Apr. 6. The classical network will carry Beethoven Satellite Network overnight, while the news/talk stations will have BBC World Service. KUWS \*91.3 Superior's student programming to expand to 1 a.m. weeknights and 2 a.m. Saturday and Sunday mornings. "KUWS and WSCN (100.5 Cloquet-Duluth-Superior) will be broadcasting the same thing at the same time to the same area."
- CI Ciudad Juarez XHH 100.7, XHGU 105.9 and 5 AMs are all co-owned and in one building.
- CL Ciudad Acuna XHCDU 92.9 is one of many stations nationally carrying syndicated programming 100% of the time or partially. "In Monterrey; it's XEFR 970."
- CL Monclova-Muzquiz XHMZI 91.1 is one of the most widely heard FM stations along the border. The reason: it's a full 100 kw, h.v, from 600 meters. It has studios in Monclova and antenna on Muzquiz Mountain.
- CL Villa Union XHVUN 104.3, with studios in Piedras Negras, but transmitter in Villa Union.
- TM—a mystery 104.9 station. May be part of the Radio Tamaulipas network.
- BARBADOS—95.3 is Hott FM, a new station, "tied in with Yes 104.1, same studios." In a telephone survey of those 18 to 25, Hott FM 95.3 burst ahead of its competition, claiming 65% of the market share. "In just 20 days, Hott FM lost the competition in the smoke that was left behind. Never before in the history of radio has this feat been accomplished." Also there is Radio GED, owned by the Barbados Community College. It's on four hours a day, Monday through Friday, 106.5. The schedule (SHED-jol) is strangely broken up: 11 a.m. to 1 p.m. and 4 to 6 p.m. Programming consists of music, such as reggae, and news. It's a teaching tool for the school. Some former students now in the industry are Hott FM's Cassandra Samuels and DJ Fuzz, Liberty FM's Nikki Bowen and Stokeley Murray, and 104.1 FM's Gaynelle Marshall. Other local stations are 90.7 and 98.1, and 102.1. A bandscan on the south shore of the island, when conditions were above average for reception, showed 37 stations, with 18 in stereo, including Hott FM and GED. Granada 95.7 and 103.3 were heard; the latter in stereo, "Superadio." When receiving conditions were more average only 9 stations were received, of which five were locals. Most of the stations from outside the island were in Spanish, "so any ID is impossible."

- EL SALVADOR YSKM 89.3, 88.9 San Salvador, 91.3 "Soyapango" heard, plus San Salvador 92.9, 98.9, 101.7; also a station on 94.7, city not known.
- GUATEMALA—Coatepeque 94.7 "Radio Coatepeque El sonido de la Costa." Quetzaltenango 96.7.
- HONDURAS—91.5 La Ceiba, "Radio El Patio"; 96.3 "Radio Stereo Copan, currency lempires." 106.5 "Excel, relay en 89."

**Off Air—Or Not Yet On**

- CA Santa Barbara "KPRV Santa Barbara's Private Radio Station," after having been on 102.3, 107.7 (before KLDZ-FM signed on), and later 88.1.
- CT New Haven "La Nueva Radio Musical" 104.5,

Now on Air!

# 90.9

Muskegon, Michigan

## Rejoice

THE GREAT MICHIGAN

here in Spring Lake MI (16 km south)," MN Esko—I had two broadcasters from the local Shockley stations here. They enjoyed playing with the modified Ramsey transmitter set to 88.7 FM. Feeding an FM tuner into a tape

after the FCC paid a "courtesy call," Pedro Jimenez and Hipolito Cuevas were told they faced a \$10,000 daily fine if they continued to run the extra-legal station, so they signed off. They said they believed the FCC visit was prompted by a complaint by WYBC 94.3, which they accuse of being unfriendly to community broadcasters. "WYBC has been in the media spotlight recently for its attempts to take over urban-formatted WNHC (1340)."

IA Sageville KIYX 106.1  
MO Kansas City—106.3. The FCC hands Edwin Raices and Andres Rivera Regis a \$5000 fine for an unauthorized station. Earlier they said they'd dismantled it, but it came back on and the Commission wasn't amused.  
PA Renovo WZYY 106.9. "I noticed this a couple of weeks ago."

WA Vancouver (Portland OR) 105.9, but Jacor has paid \$20.5 million to one of 11 applicants to buy out the other 10. Then Smith Broadcasting turned over the license to Jacor, with Smith collecting \$2.2 million, including a \$360,000 brokers' fee Smith collected. Each of the other applicants collected just under \$2 million. Jacor already owns KRCW 103.3 and KKRZ, as well as two AMs.

Greg Smith of Smith Broadcasting is a former Portland Trail Blazer, who retired from the NBA in 1975 and began a career as a radio account executive, who dreamed of owning his own station. Smith, 51, congratulated the others for persevering nine years with their applications. He was one who counted on FCC minority preferences for a license. But then regulations changed, allowing for duopoly and super duopoly ownerships. "If anyone had told Smith nine years ago that the FM frequency was worth \$20 million, he would have doubled over in fits of laughter," wrote Pete Schulberg in "The Oregonian."

In 1989, radio was a great mom-and-pop business, Smith said. "But there is no way in today's market that we could put on a station and get a decent return. But we wanted to win, and we offered the applicants more dollars than others had." The deal is subject to FCC approval; Jacor's stations account for 27 percent of the market's radio revenues.

AB Falher 95.7. "I will check next time I travel north and get back to you."

**SCServices, 67, 75 kHz**

- CA San Francisco K10I 101.3 is advertising its SCS availability. Station "with the highest ERP (125 kw) west of the Mississippi River." Contact Doug Irwin, (414) 356-5566.
- ID Twin Falls KBSW \*91.7 + T, talking at 75 kHz. It's an instructional program known as "Radio Classroom," sharing the 75 kHz SCS with other forms of talk, and which is also on KBSU Boise's 75 kHz, 90.3 m. The Classroom is also on the Internet.
- MN Duluth KKCB 105.1 no SCS (had TC, relay of WEBC AM, 67) [for the blind, 67.
- NY Watertown WJNY \*90.9, +T, talking book/Operator of a 102.3 station in Good Thunder MN has an SCS Radio Technologies modified Ramsey transmitter. "Dave did an excellent job on it... I love it. It's great stereo sound; I also like that it is tuned with dip switches instead of stupid variable capacitors, which can drift off frequency. I believe that the station is sending out an ERP of 10 watts, because it is coming in twice as strong as it used to. I tested it with a signal meter last night. I can get the signal inside the local store. That's something it didn't used to do." [See above, "On Air," Esko MN.]

**NonIDs, Not Just Slogans**

- CA Kerman KTAA 94.3 with Fresno
- CA Los Osos-Baywood Park KSTT-FM 101.3 adds San Luis Obispo-Santa Maria, still "Coast 101.3"
- CA Oakdale-Modesto KHOP 95.1 adds Stockton. "Also, KVPR \*89.3 Fresno and KPRX \*89.1 Bakersfield (its satellite) were not going completely off the air at night, [on] with 'white noise'... presumably the KVPR transmitter did not switch off when iSTL went off... I wonder if anyone at the FCC reads and then acts upon such things in the VUD or FMedia! in regard to pirates and irregular signals?" [The WTFDA club, publisher of the VUD, "VHF-UHF Digest," has a new address: PO Box 501, Somersville CT 06072, with Mike Bugaj handling administrative duties.]

CA San Luis Obispo KSLY 96.1 adds Santa Maria  
CA Santa Margarita KWEZ 106.1 adds San Luis  
Obispo, "Country Oldies 106"

**Selected AM Happenings**

AL Atmore WGYJ 1590 silent, planning to delete. Its format moves to WPHG 1620 there.  
AL Dadeville WDLK 1450 silent; to be talk, parallel to Prattville.  
AL Opelika WTLM 1520 had been silent; now on with adult standards.  
AL Prattville WIQR 1410 silent, but to return later this month with talk.  
AK Anchorage KASH 1080 classical, parallel to KLEF 98.1. Was country, parallel to KASH-FM 107.5. KABN 840 Long Island AK had been classical, parallel to KLEF. Now silent.  
CA Barstow KIQQ 1310 had been silent; now adult standards.  
CA Los Angeles AM stations KABC 790 and KTZN (former KMPC) 710 are having a downturn in their ratings. At the time of Disney's takeover in February, 1996, KABC was the No. 2 talk station in town, but has lost audience to KFI 640. KTZN's audience has plummeted after ABC took over the venerable KMPC from old Gene Autry, and turned it into a talk format for women, "The Zone." KMPC had been on the air 70 years, but was 40th in the L.A. ratings when ABC took over.

Disney broadcast the Zone for six months, during which a massive promotional campaign was conducted. "In August, after six months of ratings data showed the station's listenership slipping even below KMPC's previous pathetic levels, KTZN became the Twilight Zone." But the ratings remained "lame," and the Zone's "femme-friendly format was replaced with a canned 24-hour company infomercial known as Radio Disney. Since then, KTZN has been broadcasting to an audience aged 12 and under, which ratings-house Arbitron doesn't even measure."

There is speculation that Disney does not want to be in the radio business at all, and may try to sell off the ABC Radio division, wrote Ray Richmond in the L.A. alternative paper, "Buzz." "At some point," observes a former KABC staffer, "somebody is going to realize that maybe Disney just doesn't belong in radio. I mean, running a radio station doesn't have a lot in common with marketing Flubber T-shirts. Those are significantly different skills."  
CA Morro Bay KBAI 1150 silent. "Jacor takes KBAI silent to upgrade sports KXTA L.A., also on 1150 kHz."

FL Jacksonville WOBS 1530 had been silent; now Reach southern gospel.  
FL West Palm Beach WBZT 1290—extensively vandalized, with enough equipment torn up to put it off the air for about an hour. Vandals also tried to burn the building down. It is normally 5 kw, but now with "limited power."

IN Valparaiso WNWI 1080 changes city of license to Oak Lawn IL, goes to 1900 watts nondirectional days from a new site.

MN Minneapolis—Beat Radio, which formerly operated on 97.7 as a microbroadcaster in mono, is back, again in glorious mono, but on selected AM stations, as partial replacement of Radio Aahs, Children's Broadcasting Corporation. Programs are carried from 6 p.m. to 6 a.m. CST. Affiliates are WWTC 1280 Minneapolis, WJDM 1660 Elizabeth NJ,

KAHZ 1360 Fort Worth TX.

It's a "defacto Beat Radio Network [with] this unique dance/club music format. Only L.A. has a parallel: Groove 103.1. The CBC stations had until recently broadcast Aahs World Radio. [Beat Radio] thanks Children's Broadcasting Corporation for this unique opportunity to work together." Beat Radio's Alan Freed continues his quest for FM micropower radio. His aim is to "establish a national low power FM radio class which will provide a means for new community stations to serve their respective neighborhoods, towns or segments of a city. Beat Radio, which was first launched as a low-power or 'micro' FM radio station of 20 watts in July, 1996, is pursuing its goal in federal court with the FCC because the agency refuses to license low-power FM stations (those with under 100 watts)." Beat Radio continues on licensed KFAI "90.3 Minneapolis Monday mornings, 2 to 5.

MO Springfield KIDS 1340 "has been silent for several months." Had been travel information.  
NY Hyde Park WHVW 950—owner "much in debt." Station is expected to soon go off the air.

NY New York "WBAR" 87.9 also has an AM on 1680, which was received 64 km away.

WFAN 660 for the third year in a row was the nation's highest billing radio station with \$47.7 million. It has sports and Imus and owned by CBS. Other top billers: WLTW 106.7 there \$37.9 million, CBS' WXRK 92.3 there \$37.3 million, WINS 1010 AM there \$36.5 million, WGN 720 AM Chicago \$34.5 million, KRTH 101.1 Los Angeles \$34.3 million, WKTU 103.5 Lake Success-NY \$34.3 million, KKBT 92.3 Los Angeles \$34.2 million, and CBS' KVIL 103.7 Highland Park-Dallas \$32.8 million, followed by Cousin Brucie's WCBS-FM New York with \$32.7 million.

NY Spring Valley WTMM 1300—dropped Mason and Sheehan's morning show, which was simulcast from WXCR 102.3 Ballston Spa NY. Their "audience on the AM was pretty minimal. We don't think it will have an effect on their ratings." [been Radio Aahs.

NC Wilmington WAHH 1430 silent; had/  
ND Grand Forks KKXL 1440, m, "Star 1440," on after being off the air more than a year because of floods. KUND \*1370 still off the air.

OH Marietta WYLI 910 silent.  
OK Duncan KRHD 1350 reported off the air.  
OK Frederick KTAT 1570 had been off; now on with middle of the road music.  
OK Guthrie KOKC 1490 silent.  
OK Muskogee KMUS 1380 silent; had been children's.

PA Berwick WSQV 1280 silent.  
PA Olyphant WMXH 750 silent.  
RI Providence WRCP 1290 being bought by Boston University for \$1,975,000 to bring WBUR "90.9 Boston's programming to the area, "and create the state's first public radio outlet."

WA Camas KNRK 94.7 is now broadcasting its alternative format on shortwave, "in the 11 meter band" on 25950, Portland OR.

WV Wheeling WOHZ 1600 silent; had been Radio Aahs, children's.

RadioShack is reviving the Sony SRF-42 AM stereo-FM stereo walkman, as the model 12-127. It receives the Motorola C-QUAM system of AM stereo, now the defacto standard. "This walkman does indeed perform quite well when receiving strong AM stereo broadcasts, dare I say rivaling FM. Tuning is somewhat difficult, as is the case with most walkman-style receivers, due to the small analog tuning dial. Reception in the AM stereo mode produces whistles and noise between stations, and the desired station must be fine tuned for clear reception," writes Bruce Conti in "Popular Communications," Feb., p. 61.

CHINA—Digital Audio Broadcasting may originate from here on shortwave through the

"Digital Radio Mondial" consortium that includes Sony, Telefunken and Sangean. They agreed to have standards for digital shortwave, and sets in stores by 2003. Possibility exists that a shortwave radio could be developed that would automatically retune to new frequencies during the broadcast day.

**Howard Stern Under Fire By Christian Group**

The American Family Association of  
 Tupelo MS has finally turned its attention  
 to radio, after years of fighting programs  
 like "Saturday Night Live" with what  
 they consider unwholesome programming.  
 Target of their latest interest is the  
 Howard Stern Show, which originates at  
 WXRK 92.3 New York.

His show is broadcast in 38 markets in  
 the U.S. and two in Canada. A video

version of the program is on nightly on the E! Entertainment [cable] channel. The AFA has volunteers in 20 cities who tape the Stern program to track advertisers. "Hundreds of letters go out each week to companies that sponsor Stern asking them to drop the program."

On his show, Stern is quoted as saying the AFA "is probably run by two people and a computer and a bunch of \*@ letterhead they printed up themselves." Stern threatens to take the AFA's money and bankrupt them. "I'll find out the names of whoever's printing that crap out of their basements on their computers, and I'll wreck their @\$%\* lives. I'll take their homes. And they won't be part of the American Family Association; they'll be part of the American Homeless Association."

The AFA pledges to let the advertisers know of the "filth" of the Stern show. One advertiser targeted is America On Line. "We have repeatedly contacted AOL and informed the company of the nature of Stern's programs and asked them if they want to be identified with Stern's offensive content? To date there has been no official response from AOL."

Stern is reported to be "pleading with his listeners to support the sponsors of his radio show, after his advertisers were inundated by thousands of cards and letters from AFA supporters protesting his vulgar program. Stern called AFA supporters nuts and wackos."

The Stern project is headed by Bill Johnson, AFA of Michigan state, who said in Boston 128 out of 153 sponsors discontinued advertising in the show, nearly 84 percent. Success rates claimed for Cleveland 82%, Detroit 87%, Pittsburgh 87%, Washington DC 82%, Grand Rapids 95%.

"Nationally the project has seen 1600 sponsors (out of 1871) drop Stern," Johnson said. On his Feb. 5 radio broadcast, "a panicky Stern begged his listeners to support advertisers that keep him on the air." He said, "We are under siege, ladies and gentlemen. If you love this program we ask you to stand behind every one of our sponsors." He said he has received about 10 letters from station program directors mentioning the AFA targeting "all of our sponsors, writing them letters and relentlessly going after them trying to get them to cancel their advertising."

The show, too, has received about 2000 post cards in two days, urging Stern to reform his act, and use his talents to glorify God. They also mention praying for Stern, "something the shock jock ridiculed." He said: "We are under siege from religious zealots and nuts. Mostly so-called Christians. Not Christians like you meet in the street every day. I'm talking about those hell-bent, holy raisers,

holy rollers that sit around and try to control the country, the ones that are against abortion. They don't want women to have the right to get rid of a fetus they don't want. Those nuts. Those wackos..."

The AFA mentioned needing monitors in several markets, including Albany NY (WQBK), Chicago IL (WCKG), Hartford CT (WCCC-FM). Bill Johnson can be reached at (616) 924-4050 or e-mail him at afa@afamich.com, or follow the progress of the anti-Stern campaign on-line at <http://www.afa.net/stern>.

I am not an AFA supporter; in fact, I oppose their methods of applying for over a hundred noncommercial FM stations and countless translators. The FCC accepts their applications for free. Those applications are supported by commercial broadcasters, which must pay for similar filings. However, I oppose smut on the radio, particularly that which can easily reach the young, but I admire an organization willing to challenge the corporate might of CBS/Infinity, and yes, Howard Stern. I have started tuning in his program from time to time to see if it is as bad as his detractors say, or as good as some of FMedia's subscribers claim it is.

On one program, it was obvious WRQC 100.3 Minneapolis had censored out a word. If most affiliates are that good at catching the bad language, there is probably not much of a problem. It is the errant affiliates--the miscreants in the business--and Stern himself--that deserve the scrutiny of AFA types and all other decent citizens. Yes, Stern does need a saving knowledge of Jesus Christ, or he will go to hell and with him legions of his fans. Most other broadcasters are strictly secular, but when Stern attacks religion, he deserves all the attention caring Christians can give him.

**Religious Broadcasters Allowed To Discriminate on the Basis of Faith for All Their Employees**

The FCC has ruled that religious broadcasters can now establish belief or affiliation as a job qualification for their employees.

This constitutes a modification of the FCC's EEO (equal employment opportunity) rules. Previously, religious broadcasters were only allowed to discriminate for vacancies involving the espousal of religious views on the air, such as announcers. The rule did not apply to people like secretaries, janitors or engineers.

The Commission pointed out, however, that licensees cannot discriminate against women and minorities. When vacancies occur, religious broadcasters will be able to recruit within their denomination, but must recruit applicants who are of color or who are women.

This new approach is at the behest of religious broadcasters who held that the

prior approach excessively entangled government in the affairs of religious entities. A "religious broadcaster" is defined as a licensee which is, or is closely affiliate with, a church, synagogue, or other religious entity, including a subsidiary of a religious entity. "Specific determinations of whether a licensee is a 'religious broadcaster' will be made on a case-by-case basis."

FCC Commissioner Harold W. Furchtgott-Roth concurred, but in a separate statement questioned who is a "religious broadcaster." He called the criteria for determining same an "ambiguity as to [its] coverage." He also questioned when dissident members of a group not wanted by the main denomination apply for positions. He does not want government put in a position of determining who is or who is not a bona fide member of a religious group.

**FCC Receives Two Petitions Favoring Microbroadcasting**

The first was a modest proposal by Nickolaus E. and Judith F. Leggett of Reston VA. It was submitted by attorney Donald J. Schellhardt of Waterbury CT. Their request is for one AM and one FM channel to be designated for the purpose of a "very localized and/or specialized broadcast service to the public." It asked for one watt or less at an antenna height of 15 meters or less, with coverage of a few square kilometers. "Proposes licensing by first-in random selection, a minimum operating schedule, and minimum station technical requirements."

That was a petition for rulemaking, not a proposed rule making, which could be the FCC's next step. The other proposal was by Rodger Skinner, TRA Communications Consultants. I printed out a couple pages of his 25-pp. document from the Internet. It promises to bring back localism in American broadcasting, "something lost when big corporations with distant owners buy of hundreds of stations. . . Under this plan, the applicant must live within 80 km of the proposed antenna site and not own any other 'primary service' media (stations)."

Skinner, too, hopes for an FCC Notice of Proposed Rule-Making. His petition envisions three different classes of "low power" FM stations: LPFM-1 Primary Service (protected) 50 w to 3 kw, 100 meters maximum, 23 km maximum coverage (like the old Class As). LPFM-2 Secondary Service, 1 w to 50 w, 45 m, 6 km coverage (1 mV/m). LPFM-3 Secondary Service, special events station, 1 w to 20 w, 10-day only permit, 30 m, 3.7 km maximum coverage.

If you want to read all 25 pages of Skinner's comments and then send your own to the Commission he offers forms and instructions. Click on <http://www.con>

centric.net/~radiotv. Or e-mail him at radiotv@cris.com.

Skinner e-mailed me: "Thanks for the mention of LPFM. The movement is growing by the minute and is unstoppable."

Eddie Fritts of the NAB said, "At a time when spectrum used for radio stations is overly congested, it would be folly to authorize hundreds of low-power stations that would surely cause additional interference." He noted that interference prevention is exactly why the FCC was formed, and "that should remain its number one priority."

FCC Report No. 2254, RM-9208, pertains to low power FM, a summary of which the FCC FAXed me. Comments can be made on the LPFM petition for rulemaking to the FCC by Apr. 27.

The NAB took specific action against a microbroadcaster. Earlier last month it filed a friend of the court brief supporting the government's seizing of Alan Freed's equipment. Freed continues to fight a public battle on behalf of microbroadcasters.

Some bad news for pirates: In Tampa a jury returned a guilty verdict against Arthur Kobres, 54. He was found guilty of 14 counts of operating an unlicensed station. He faces prison and fines for running "Lutz Community Radio." Kobres said he's "disappointed in the American people, if that jury's a cross-section of the American people." Each of the 14 counts represents a specific day that FCC agents detected transmissions from his home. This may be the first case where an unlicensed radio operator has been prosecuted—or persecuted—for an alleged crime. Lowell Becraft of Huntsville AL is Kobres' attorney. He promised to appeal the case and try to get the law requiring having a license to operate a radio station declared unconstitutional.

Jurors in the case focused on Kobres' intent. Did Kobres intentionally violate the law, or was he acting in good faith and simply mistaken, as his lawyer alleged? Jurors were reminded that Kobres was warned several times that he was violating the law by broadcasting without a license.

Doug Brewer of Temple Terrace FL, the so-called "Party Pirate," was stunned by the verdict. "I just can't believe anybody could find anybody guilty of operating a radio transmitter," he said. "I'm sorry; operating a radio station is not a . . . crime."

Radio & Records had an expose of "Kiss 97.1 FM" Valdosta GA, a commer-

cial pirate. After all the industry exposure, it went off the air, reappearing at much lower power on 88.5.

FCC chairman Bill Kennard, before some radio industry leaders, "did not rule out the possibility of licensing scores of low

power, 1-watt radio stations."

#### Small-Print Happenings and FM Industry News

In the Orlando market, Cox buys and sells. Cox is buying WTLN-FM 95.3 Apopka FL for \$14.5 million. "Joyful 95.3's" religion format is expected to change. Cox already owns WWKA 92.3, WMMO 98.9, WHTQ 96.5, WCFB 94.5, plus two AMs. It sells WZKD 95.0 Orlando to Moffitt, former owner of WTLN-FM.

Washington DC is seeing further consolidation as Chancellor Media takes over WWDC-FM 101.1-AM for \$72 million. Chancellor already has WASH 97.1, WGAY 99.5, WMZQ 98.7 and WBIG-FM 100.3. Its AM holdings are WTEM 57.0, moving to 98.0 with all sports, and the former WRC AM 98.0, which goes to 57.0 with a business format and new call letters.

In Utah, Simmons is adding a fifth Salt Lake City FM—KXKR 96.3 Provo. Simmons Family interests include KRSP 103.5, KMGR 92.1 (Toole), KSFI 100.3, and KQMB 102.7 Midvale, expected to sign on soon with a modern AC format. Simmons owns two AMs, not including KSL 1160. Jacor buys KRSS 98.5 Chubbuck ID, to be sold by CSN International, for \$800,000. Jacor already has KPKY 94.9, KID-FM 96.1 nearby, plus two AMs. Formerly silent AM station KSWD 95.0 Seward AK is being bought by Phoenix Media Group.

Stevie Wonder owns KJLH 102.3 Compton CA, and his own employees decided to not unionize at the boss's request. Ironic, because Wonder belongs to AFTRA, as reported in the "M Street Journal."

President Clinton's proposed budget would give the FCC \$213 million in the next fiscal year, up \$26 million. Part of the money would go for a move to the FCC's new home in The Portals in Southwest Washington. The agency has been dragging its feet on that move, but there could be a "silver lining." It could move the FCC physically away from lobbyists and insider trade magazines like "Broadcasting" which are ensconced in the NW part of The District. It would give the lobbyists more exercise, or if they don't prey upon the FCC as much, give the Commission a better ability to develop policy on its own—with maybe better input from the public that the broadcasters are supposed to serve.

Obituary: Harry Plotkin, 84, a Washington communications attorney. One of his activities in the 1970s was to study the extent of FM subcarrier usage prior to deregulating SCA, and its being called SCS. He used "FM Atlas" data to note the extent of SCS usage in the United States.

National Religious Broadcasters are over with their Washington DC convention. They've outgrown the Sheraton. Next year it will be at the Opryland Hotel in Nashville. Coming up, the NRB hosts a prayer breakfast for NAB attendees Apr. 8 in Las Vegas.

Focus on the Family founder Dr. James Dobson attacked the Republican Party for forsaking evangelicals who helped elect the current Congress, and then hinted he might take a leave of absence from Focus to do political work. I know he's been mentioned as a possible presidential candidate. More than 5 million people a week listen to Focus programs, which are based in Colorado Springs, on hundreds of FM stations, religious as well as secular.

USA Today (Feb. 9) did a profile on satellite radio company CD Radio. It features 50 signals, beamed from New York, and programmed to a silver-dollar-sized antenna on the rear window of a subscriber's car. Subscriptions will cost \$10 a month plus a one time \$200 fee for a radio card that fits into a cassette or CD opening. Customers can "install both in seconds." CD Radio's David Margolese said, "Radio is to the car what television has been to the home. . . The ultimate market is the new-car market. Whether it's cellular phones or FM radio, Detroit will watch the success of a product in the aftermarket and then slowly migrate the product into their

product lines."

A picture accompanying the article showed the selection on the display of a unit that fits into the cassette deck opening. Clearly visible on the display: "Duke Ellington Solitude 07."

The Department of Justice seems to favor agencies and advertisers over big group owners of stations. DOJ official Reid Horwitz spoke to a group of agency people and urged them to talk to his agency when they have a concern about radio overpricing or monopolization. But the NAB contends that if ad rates go up it's because of demand, not consolidation.

A reader sent an item from "Radio World" about stations able to increase their power to the maximum for their class, using FCC Form 302, without first filing for and waiting for a construction permit. I had a story on that, Oct., p. 10, col. 1. Anyway, the change became effective Dec. 1. "The change eliminates about a four-month processing period for such power increases," said Dale Bickel, an engineer with the FCC's audio services division. For a list of the 470 qualified stations visit (or get lost trying to visit) [www.fcc.gov](http://www.fcc.gov) and look under mass media bureau, audio services division. When I told FCC engineer Jim Durst that I have that website in my computer's "favorite places," he laughed. But finding the right information there is not a laughing matter, especially when you ask it to do a search. All kinds of old information comes up, and I usually call or e-mail the FCC and ask them to FAX me any document on the subject of interest.

The National Association of Radio Reading Services holds its conference June 4-6 in Cleveland OH at the Embassy Suites. Its theme is "The Digital Environment." For more, call the Ohio Radio Reading Service (for the blind) at (419) 241-1183, or Carol Ann Denhardt at (309) 298-3403.

But before that convention is the NAB, which opens in Las Vegas Apr. 6. Co-founder of Apple Computer, Steve Jobs, is slated to give the keynote address. The technology exhibit opens the day before, Sunday, April 5 at 8:30 a.m. Both USA Digital Radio and Digital Radio Express plan to exhibit. The USADR exhibit will feature a computer simulation of both the AM and FM system designs, "which will allow attendees to hear the dramatic difference between the analog systems of today and the digital systems of tomorrow." Prototype transmission equipment will be operating, which are expected to undergo "rigorous lab and field testing later this year." USADR will also present two papers Apr. 5 as part of a preliminary engineering congress.

At DRE's exhibit, prototype FM IBOC hardware (exciter and receiver) will be operating. DRE's vice president of engineering Derek Kumer is expected to be present to discuss their system; he will also be describing DRE's work at Sunday's pre-conference. For more info on NAB98 visit <http://www.nab.org>.

At an earlier NAB fly-in, FCC Commissioner Michael Powell mentioned that "consolidation has made radio more efficient and a more effective competitor." But Powell reminded the audience that the Justice Department will continue reviewing radio mergers to prevent anti-competitive practices. He said many people believe that if DOJ signs off on a merger then the FCC will too. "As with all things in Washington, don't count on it," he cautioned.

Jim Duncan said it. Now some radio columnists are in on the act. Robert Feder, Chicago Sun-Times, had a report Jan. 12 that rock stations have saturated the dial and are suffering reductions in their ratings. Feder quotes Arbitron figures that "showed virtually no audience growth for any of the players in Chicago's crowded rock arena. WKQX, WXCD, WXRT and WLUP declined, while WRCX and WTMX were essentially flat."

WGCI-FM 107.5 boosted its status as the market's top-rated station. WGN AM's Bob

Collins dominated mornings, and Howard Stern on WCKG 105.9 isn't even mentioned. "The most stunning upset of all was the meteoric rise of Mexican music newcomer WLEY (107.9), which knocked off WOJO (105.1) after 17 years as Chicago's top-rated Spanish-language station. *La Ley*, as the station is called, also led WOJO in all major demographic groups. WNND (100.3), another newcomer, opened with a higher share than its predecessor, WPNT, but still proved no threat to WLIT (93.9), longtime front-runner in the adult-contemporary format. WUSN (99.5) declined despite the absence of a country music competitor in the city." In classical music, WNIB 97.1 widened its lead over WFMT 98.7, "which bade farewell to esteemed host Studs Terkel after 45 years."

In Boston, classical music writer Ellen Pfeifer, focused on WCRB 102.5. That station will syndicate its music nationwide. She said the good news is that an all-classical format is not only surviving but thriving and able to share its programming in other cities. The bad news is that such easy-listening tactics (the "breezy, perky, or soubretish announcers [who] relentlessly intone the call letters") create a patronizing attitude toward the world's greatest masterpieces—like saying, "Isn't Handel wicked, awesome?" in its zeal to attract new listeners, the station offends its core audience of more sophisticated listeners, which can result in an audience decline. One person who stopped listening after 25 years said, "I want WCRB to make a profit. I just don't think they have to be repetitious and boring in order to do so."

**RADAR**—Radio's All Dimension Audience Report—announces it will be issuing its reports four times a year, instead of twice a year. It has gained a new sponsor, Chancellor's AM/FM stations. Because of using improved software, the reports will be fully summarized within 45 days after close of measurement. It is using RADAR's PC 2001 reporting software. RADAR focus on trends in network radio listening, and usually reports the percentage of FM versus AM radio listening.

Radio being used by gangs? It happened in Albany NY, and maybe to a radio near you. WVCR \*88.3 Loudonville NY had aired "shout-outs," where listeners call in and dedicate songs or send messages to their friends. This happened during the station's urban music programs. [See January p. 3, col. 1 for a story about college administrators taking heavy metal off that station.]

Some teens were using the free airtime to tout their gangs, using gang letters and call-signs. This prompted the station to stop airing live shout-outs during the urban music shows, which are on 6 to 9 a.m. and again 3 to 9 p.m. Instead, the DJs are screening the shout-outs by taping and listening to them before airing them. A school security guard heard the youths' shout-outs on WVCR and alerted police. DJs now have a list of gang-related acronyms or slang, provided courtesy the local police.

WRPI \*91.5 has two disc jockeys who take requests, and the shoutings only bother their hearing. J. Swift and a person by the name of Toast read the callers' requests on the air and edit out anything inappropriate. Since WVCR stopped live shout-outs, only one gang name appeared on the air, which "probably slipped through."

Green Bay WI's WGBW \*91.5 to get religion. The State of Wisconsin Educational Communications Board sells it to Evangel Ministries for \$175,000.

WCSP—"FM" \*90.1 Washington DC, which was purchased by C-SPAN, so far has been "a flop." Its first ratings show it losing 60 percent of the audience it had as a jazz outlet, "putting the service in the ratings basement with Spanish language and rural country stations." Marc Fisher of the Washington Post also mentioned that WAMU \*88.5, "a ratings powerhouse," ranks fourth among Washington adults. "Only Howard Stern on WJFK-FM, Tom Joyner on WHUR and Jack Diamond on Mix 107.3 draw

larger audiences in this demographic." Helping affect the ratings for commercial radio in the market was Donnie Simpson of WPGC-FM, who was offering a \$1 million cash prize. At WETA \*90.9, "the winter beagathon ended with 6,177 listeners ponying up \$864,100, a record."

Jacor, even though it is growing as a group owner, can't seem to get profitable. Its 1997 revenue grew 137.1 percent to \$530.6 million, but the company posted a net loss of \$4.05 million for the year. The year 1998 might be a turn-around. "Revenue paces so far this year are double-digit, and fall ratings are exceeding our expectations," said CEO Randy Michaels.

Jacor owns 194 radio stations and WKRC-TV, channel 12, Cincinnati. It completed 53 radio station deals in 1997 at a cost of \$842 million.

A major review of broadcast ownerships is expected to begin soon. Congress mandated that such be done every two years as part of the Telecom Act of 1996. Included will be a review of local ownership rules and concentration of control. "NAB will be monitoring this issue closely and will be an active participant." [See lead story last month, p. 10.]

New Country Y-107 stations near New York city are "proud to announce the grand total pledged during Y-107's Annual St. Jude Radiothon was \$426,058!" The 39-hour pledge drive occurred over Valentine's Day at a mall in Woodbridge NJ and over the air. The drive included an anonymous \$20,000 donation made at 3 a.m. Feb. 14.

Inuit and Cree broadcasting are advancing in Canada. They have an organization of Inuit and Cree Radio & TV Broadcasters in the Nunavik (or Kativik) region of northern Canada. I received an e-mail outlining the address of each station, such as Taqramiut Nipingat, Inc., PO Box 360, Kuujuaq QC J0M 1C0; (819) 255-8822; <http://www.tvnc.ca/Members/tni.html>. First language for the stations is Inuktitut and Cree, "but often English is the second language. Most Cree speak French as their second language." That sounds like doubletalk!

After Jan. 1, 1998, stations' old EBS equipment can be discarded. This according to a report in "Radio Shopper." The "shakedown" year of EAS development is over as far as broadcasters are concerned. SBE member Glenn Finney suggests donating your decoder to a school, hospital or local government that might not have any warning system at all. EBS equipment "will still demute on the 8 second attention tone within the EAS message."

The M Street Journal reports that Dick Cavett is suffering from depression. He was supposed to be the star of a new "high-brow syndicated morning show—but Cavett didn't show up at the studio very much. Producer Jim Moskovitz was forced to pull the plug and he sued Cavett for startup costs of \$650,000 plus future earnings." Moskovitz says he wasn't told about Cavett's problems with depression. A New York judge dismissed a larger suit by Moskovitz and denied his request to keep Cavett from accepting other radio jobs.

Fined by the FCC: WFXD 103.3 Marquette MI \$6000 for violation of the political programming rules.

Station totals: FM, 92-108 mhz 5554, 88-91.9 mhz 1934, AM 4753, as of Jan. 31, from the FCC, licensed and operating.

From the classifieds: General manager KCAT-

## POSITION ANNOUNCEMENT

### General Manager

### KCAT University Radio Station

FM, the radio station of Central Washington University, \$34,000 to \$36,000 for 12 months. Additional employment contingent on funding and FCC licensing. [See "New," above, Ellensburg WA.] The call letters may be wishful thinking, as there is a KCAT 1340 Pine Bluff AR. For more info call (509) 963-1515. EOE.

Looking for 3.5 to 5 kw FM transmitter with

exciter in good condition. Steve, (314) 586-8697.

The NAB is selling the BIA 1998 Radio Yearbook, with up-to-date data on every radio station in the country. All 263 Arbitron radio markets are profiled; non metro stations are listed by city of license. Has detailed technical, contact and ownership information. Address, phone, ratings and demographic data, equipment suppliers, etc. This is not the more famous "Broadcasting & Cable Yearbook." List price \$64 from the NAB, 1-800-368-5644, or check their online catalog, [www.nab.org/NABStore](http://www.nab.org/NABStore). I have not seen the BIA Yearbook. If any reader has, please share your comments about how useful this book was to you.

## FM FORUM

### CONTRIBUTIONS FROM READERS

A Nov. 14 article in the Boston Phoenix is critical of modern radio: "With its restrictive formatting and increasing reliance on syndicated material, corporate radio is devouring itself, failing to develop new talent, play new music, or foster new ideas. Since chains can now load up their stations with cheap, nationally syndicated shows that they already own (Stern and Imus, for instance, were both part of Infinity founder Mel Karmazin's Westwood One syndication service, which he brought with him to Westinghouse), young performers now have fewer and fewer opportunities. . . . Whether you like Stern or not, what you hear on the radio every morning is the result of years he spent honing his act. Today, though, there are no fledgling Sterns at stations in the hinterlands, slowly improving and hoping for a shot at the big time. After all, those stations are already carrying Stern," writes Dan Kennedy.

John Clark: "I use an early 1980s ten element Radio Shack yagi FM antenna, which has been off the market for years. It has always performed superbly. When I lived in Casco (Portland) ME, I was able to regularly DX Montreal, as well as Albany NY 106.5 WPYX. . . . On some occasions, I was even able to pull in 3000 watt WZZM 93.5 Corinth NY. Of course, as you well know, the FM dial was considerably less congested 15 years ago than it is today. From where I am in Greenfield, north of Saratoga Springs NY, I can still DX west to Rochester (even Buffalo on occasion), north to Montreal, south to Newark NJ and east to Boston. I regularly pull in WAER \*88.3 Syracuse when local WVCR signs off."

Bill Cheek in San Diego writes: "I was the typesetter and graphic artist for two books not my own: Skip Arey's *Radio Monitoring* and Jerry Pickard's *Scanner Modifications and Antennas*. Since I had liberties and some control, I plugged FM Atlas and FMedia! in each, since the authors were apparently nescient of the existence of these fine pubs. . . . By the way, the *World Scanner Report* isn't all that highly focused on the Pro-2004, Pro-2005 and Pro-2006 any more. We're evolving to higher planes of scanning and are less limited to the radios any more."

Dan Ramos, besides sending John La Tour's old low power FM proposal (February, p. 11, col. 1), included a clipping saying KLSX 97.1 in L.A. fired talk show host Riki Rachtman. That's because he punched colleague Doug Steckler in the office. No, that's not part of Steckler's body, but the place at the station where the fisticuffs occurred. Rachtman, 35, had

been at KLSX one year after having been at KROQ-FM 106.7 two years as host of "Loveline." Another item he sent was about poor health forcing KRTH morning host to retire. Robert W. Morgan planned to work to 2000, but lung cancer is cutting short his career, which already spans 40 years.

"Morgan, 60, didn't give in easily. Since announcing his illness last May, he's remained on the air at oldies station KRTH (101.1) for the past six years." The article didn't say whether or not he smoked.

"Partners in crime" writes Karl Zuk about translators near New York City. "Why does W244AS 96.7 [Oakhurst NJ] relay WQXR [96.3 New York]? For the same reason W276AV 103.1 Stanford CT relays WQXR—to keep the translator on the air! W244AS is owned by Wes Weis and W276AV is owned by Gerry Turro of WJUX fame. Check the license of W322AL Pomona NY, which relays WJUX and you'll see both their names listed. I spoke to Turro a long time ago—and his answer was to get as many translators on the air in the NY metro area so if the FCC ever grants LPFM, he's gold. As I recall, W244AS relayed WHTZ "Z-100" from NYC for several years—also for no real reason except self-motivation.

The FCC and Muzak still taking a hard line against tuning in FM/SCS by the non-authorized. Art Wall, chief, consumer branch, FCC, wrote to a Mormon book store in Mesa AZ which was selling radios to get the ♯, G of KGLQ 96.9, giving the store 30 days to mention who manufactured the radios and if they are certified as non-radiating so as not to cause interference. "Willful violations of the rules and the Act may subject the violator to a monetary forfeiture of not more than \$11,000 for each violation or each day of continuing violation." When they tried to contact Wall, he was out of the country. Muzak then wrote in response to an SCS inquiry from a Missouri manufacturer: "Our SCA signals are proprietary and not available to the general public. They are available to business by subscription only, Chuck Walker, Licensing Administrator."

Eric Norberg sent samples of his adult contemporary "Music Research" newsletter. Like similar reports, it gives the songs receiving the most airplay. One of the songs recommended in the Oct. 13 issue was Jim Brickman with Collin Raye and Susan Ashton, "The Gift." Elton John's "Candle in the Wind" was No. 1. Norberg's people do the music tests "blind," without knowing the title, artist, or label, and he thinks this is a truer test.

In the Oct. 20 issue, he said the massive consolidation in radio station ownerships had the unfortunate trend that owners are increasingly thinking of stations as cards in a card game, and are trying to complement the other stations in the market, rather than compete with them. "This sort of thinking leads to boring stations and ever more narrowly-defined formats; there even seems to be a widespread feeling that the music shouldn't overlap at all, even if the listeners to station "A" might really enjoy a song played on station "B." This makes even the leading stations sitting ducks for aggressive competition—competition

which only the independently-owned stations may be willing to provide."

Norberg's 191-page book, "Radio Programming Tactics and Strategy," is available from Focal Press, \$26.95. It's billed as a practical handbook for program directors. His newsletter costs \$320/year, but has a guarantee that if you're fired he'll continue the subscription until you find another job. Order from (800) 929-5119. Phone and FAX (503) 232-9787.

Doug Loney FAXed a response to an anonymous comment (Jan. p. 4, col. 1) about 740 AM Toronto maybe "going to WTOR Youngstown NY instead of 770 daytime?" Loney wrote that "740 is a Canadian assignment and with the move of CBL to FM it will be occupied by another Canadian station. . . Taking a broader look at the information gap, I find my American friends are astonished to learn that up to five U.S. networks, plus a number of U.S. satellite channels, are readily available to virtually all Canadian homes. Yet, most Americans see NO Canadian channels. Where is the reciprocity? Any mention of Canada is almost sports-related. (It was interesting to note that during the recent winter Olympics, many of those in the U.S. who do have access to CBC-TV remarked on how superior the Canadian coverage was to that of CBS). I believe that distribution of CBC-TV and/or CBC's Newsworld channel would be a breath of fresh air, as well as a wealth of information, to the American public.

"The DX Ontario publication had a nice mention of the FM Atlas way back in May '97—am FAXing it (in the unlikely event that you may have missed it—you don't miss much!)." [It's one I did miss. The article writer, "Dan," mentions when looking for DX (or unusually good receiving conditions) to place some car radio pre-sets to open or unoccupied frequencies. This is easier to do when your car has 12 or more FM pre-sets. His FM1 band is set to local stations, and FM2 band to open channels. He can then scurry to a place like home to log the receptions, or use a note pad in the glove compartment and drive to a nearby high spot. The FM Atlas, he says, "is compact and provides the station info in several formats to assist you in your DXing endeavors." Current edition is still the 17th, 1997, \$18.50 postpaid from address shown on top of p. 1.]

Frank J. Romano, writing in "Electronic Publishing" magazine, mentions that on weekdays adults listen to radio for an average of 3 hours and 20 minutes, "in many cases, in their automobiles. Listening to Howard Stern while driving may be a moving violation."

"If FMedia! were based in Alabama, perhaps the local Klan could come by for a friendly visit and 'enlighten' you on the personal and professional advantages of using the U.S. system of weights and measures," writes Nick Lombardi. He sent an article about the Alabama Department of Transportation taking down \$3.2 million worth of kilometer markings, and reverting to miles. Drivers there won't accept kilometer signs. Congress is apparently making no progress toward implementing metric on the federal highway system, although there is or was a mandate for

metric by 2000. The signs cost \$3.2 million to erect, plus another \$345,172 was spent surveying roads so the markers would be accurate. But the state is keeping metrics for its highway construction blueprints.

Ian G. Masters writes in "Stereo Review" something I've known for some time, and that is how poor the FM radio performance is in the new digital receivers for home theatre. About the Denon AVR-3200, Masters says: "the radio section was no record-setter but gave solidly adequate performance by current receiver standards. FM performance on strong stations was good; clean and comparatively dynamic. Weak-signal quality was average, which is to say terrible by old-tuner standards. Like nearly all current receivers, the AVR-3200's FM section is clearly intended for casual listening to powerful, urban, commercial broadcasts, not to classical concerts on small or distant noncommercial stations." A person stopped by with a new Denon receiver with full RDS. He wanted to use it as a partial trade for an older Magnum/Dynalab FT-101A FM tuner. I sold him the tuner without the trade, so pathetic was the Denon's FM performance. [Article, "The Future of Radio," is in the Oct. '97 "Stereo Review." It also discusses Canada's going it alone in digital audio broadcasting.]

"Inside Radio" had a report recently about pirates, saying the FCC is strong-arming the relatively few pirates they do go after, but those measures have largely been ineffective. "No official number of unlicensed broadcasters exists. Coinciding with the NAB-98 will be a microbroadcasters' conference, Apr. 4-9. Free Radio Berkeley wants to turn NAB onto micro-broadcasting. Lead opponents away from 'pirate' moniker in favor of 'community radio', licensed or unlicensed. NAB will be invited to an open forum for discussion. Doubts it will agree. . . An East Coast conference is also in the works for the same weekend. West Philly-based Radio Mutiny to be the host. Conferences are designed to attract people from places that don't have a 'pirate' or community station yet—to teach newcomers how to get up and running and meet the movement's goal of having '1000 antennas radiate'."

CJRT #91.1 Toronto's president and station manager Cam Finley (pictured) retires after 33 years. He says of his staff: "My confidence in our staff and in CJRT's future has never been higher." The staff replies, in the "Listeners' Network" program guide, "We will miss him enormously, and say 'thank you for giving so much to CJRT.'"

K.W. Walter of Toronto calls CJRT "a high quality station," and commends Cate Friesen and her "Absolutely Folk" as "one of the best examples [of that type of program] in North America." She might be the wife of Eric Friesen, who worked at Minnesota Public Radio. She describes the folk market as burgeoning, "partly because it's so easy for new artists to record CDs, and partly because the world is so much smaller. . . ." Until April,

 107.7 WTOP-FM (WUPP), n, mono, swapping frequencies with 94.3. "In eight months it will have gone from one of the worst signals in the market to a combination that should reach from Baltimore to Richmond to Charlottesville to the Eastern Shore." Marc Fisher of the "Washington Post" writes: "AM radio, once the dominant entertainment medium, is nearly dead in this market. WTOP, struggling like all news operations to capture a younger audience, is moving aggressively to become an FM voice. . . . The news station

will be known as 'WTOP 107.7 FM and 1500 AM' with the FM getting top billing."  
 Program director Jim Farley said, "There are news junkies who never leave the FM dial, especially public radio listeners, and that's where the potential is for much greater growth for us." The majority of the station's listeners will still tune in on AM, but "I can see a time when that will switch," said General Manager Steve Swenson.

 NJ Long Branch WWZY 107.1, NY Briarcliff Manor WWXY 107.1 and NY Hampton Bays all showed facilities improvements last month (p. 3, col. 2). This will "double the signal power of [the] three New York radio properties. When implemented, the signal enhancements to Big City Radio's New Country Y-107 trimulcast will enable the station to broadcast to approximately 90% of the New York metropolitan area's Arbitron population. . . . The company anticipates that its signal increases will allow listeners to spend more time listening to the station each day, positively affecting the station's overall Arbitron ratings in one of America's largest radio markets [and] moves us one step closer towards the completion of our New York signal upgrade. When the upgrade is complete, we will market the station using a series of on-air promotional ads and a highly focused advertising campaign. We anticipate that our increased Arbitron coverage in New York will make our station more attractive to advertisers," wrote Michael Kakoyiannis, president.

**On Air—Real Stations and Pirates (Selected)**

AR Hampton KKDL 107.1, having moved from 106.5.  
 CA Davis "Not KDVS" 98.9 has reappeared from 90.3. It's an alternative, free-form station founded when KDVS 90.3 was off the air, and will be known as "Davis Live Radio."  
 CA Sacramento area—a new rap station on 107.1, with coverage similar to the new 92.9 Freeport pirate. This may or may not be the same as the 107.2 station, listed below as being taken off the air.  
 GA Atlanta metro—somebody's been doing naughty things to the signal of WSTR 94.1. They shouted obscenities on "Star 94's" morning show, cutting into reports from a station-commissioned helicopter, interrupting roving reporter Tom Sullivan. Even Howard Stern would blush at the language, according to a Mar. 4 story in the Atlanta Journal-Constitution. "Our switchboards lit up like a Christmas tree," said g.m. Mark Kanov. Bob Grove in Brasstown NC, publisher of "Monitoring Times," has a theory that someone knew the remote traffic frequency and must have been quite close to the WSTR studio. "He could have been sitting in the parking lot." Grove said the best way to catch the guy is if he mentions it to someone else. He'd probably tell someone to listen at 8:10 to the traffic report, "and you're in for a big surprise." The person is "not doing it just for himself. He needs feedback. Witnesses and leads are the best way to catch someone like this." Now traffic reports are pre-recorded, and released within one minute.  
 GA Ellijay Georgia Mountain Radio "around 91.2 FM" on Saturdays. Announced it might change frequencies "for security reasons." Someone claimed to have heard it in the north part of Atlanta more recently on 105.7, but that could have been a news story on WGST-FM 105.7 Canton-Atlanta.  
 IL Decatur 99.7 Black Liberation Radio, on despite being "inspected" by an FCC "engineer."  
 IN Kokomo W291AM \*106.1 testing, stereo, but weak at 10 km. Farther away, "it is very fringy and subject to adjacent channel interference from 105.9 Wabash. . . It's not a very big spark."  
 KS Lawrence KJHK \*90.7 uses calls, but over the Internet feed, which I expect is the same as the real FM station, I heard a commercial for a bagel bakery.  
 KY Mount Sterling \*88.1, either WAXG or its predecessor, W218B. It had American Family Radio, and no ID was heard on the hour, making me think it's still the translator. Another American Family Association translator in the area is W216AT \*91.1 Ashland KY. It transmits from the tower of WTSF (TV-61).  
 LA Grambling K214CE \*90.7. Primary KDAQ 89.9 Shreveport now goes by "Red River Radio."  
 ME Portland 97.3—was strongest in "the area around the Maine Mall in South Portland. . . '1-97.3 Irreverent Radio from the Center of Nowhere.'" But after an FCC visit, the power's allegedly been cut way back.  
 MD Salisbury WICO-FM 94.3, not yet on 97.5.  
 MI Pontiac "Musical Radio" 106.3—but FCC fined Edwin Valentin \$5000 for broadcasting without a license. It has been on since October, 1996 and sells ads. He's represented before the FCC by Patrick Edwards, who's also defending Rick Strawcutter in Adrian. That case is expected to go to trial this summer in federal court in Detroit.

MN Marshall KKCK 99.7 was only 1 kw due to weather-related problems for most of the day Apr. 1. Normal ERP is 100 kw. There were heavy winds in N.E. MN Mar. 31 with a 91 km gust that damaged my largest FM antenna. "Bruce Elving, who lives north of Esko, lost the top third of a radio antenna. The antenna was used to listen to radio stations from long distances," wrote David McLaughlin of the Pine Knot newspaper in Cloquet MN. He also took pictures with a digital camera.

MN St. Peter KRBI-FM 105.5-AM lost its tower in the tornado which went through the area Mar. 29. That storm also killed two people. The KRBI-FM studio is undamaged, although the town "looks like a war zone." An FMedial reporter assisted with the clean up and installation of a ground plane antenna for the FM. Two 12 m poles were put up, with a longwire between for AM. A separate 12-m pole is for the FM. KRBI-FM is temporarily 250 watts, vertical only, and heard quite well in the Mankato area, while the 1310 AM can only be heard from 8 km north of Mankato to St. Peter itself. Minnesota Public Radio's satellite dish and studio in St. Peter, on the Gustavus Adolphus College campus, were damaged. KMSU \*89.7 Mankato has generously allowed MPR to use its studios. For a while KNGA \*91.5 St. Peter was picking up the monophonic MPR signal off the air, with a joint ID on KNOW \*91.1 St. Paul MN. Now that station and KGAC \*90.5 are receiving the signal by phone lines.

MS Meridian W209AS \*89.7 with KEAR San Francisco, was heard "complete with an EAS severe thunderstorm warning probably for Solano County CA."

NE Hubbard KAYA \*91.3, with American Family Radio. Serves Sioux City IA. Station manager is Warren Wilson, formerly at KAKU 90.1 Springfield MO. Call 'em at (712) 255-9191.

NY Brooklyn 87.9 ID at top of hour: "You're tuned to the highest frequency in radio "WWMN", Radio Moshlach and Redemption." The calls stand for "We want Moshlach now." Claims to have an AM on 1640. The 87.9 station is strong in midtown Manhattan. "I'm guessing at least 100 watts. . . They have the fidelity of a bullhorn with bad batteries. Mono. . . They wipe out 'WBAR' from Baruch College on 87.9." In the area, "91.9 is hot, too. Powerful Cuban music station in Spanish nearly every Friday night."

OH Cleveland area pirates: Regarding the "area reporter unaware of much pirate activity," and the story about interference to WKSU \*89.7 Kent (last month p. 5, col. 2), engineer Bill Weisinger of Streetsboro OH writes: "There's an explosion of pirate activity in the Cleveland area—6 or more. Most of it Spanish language and often religious. "It's quite a scene, with WKSU just turning on their long-awaited and new (and very expensive) transmitter site on the west side of Akron (which was supposed to improve their downtown Cleveland signal), and at almost the same time a powerful downtown-area Cleveland pirate sprouting up on first adjacent 89.9 (they were on 88.3 but were 'advised' to get off due to WBWC being on the same frequency and 16 km down the road), so they moved to 89.9, right next to the mighty WKSU! Now their 89.9 carrier wipes out any 'KSU signal improvement and at times the WKSU signal is even worse than before. The FCC covers in DC, and the mighty NPR giant is steaming. "Meanwhile, the newest 88.1 pirate is bound to interfere with Akron U's (88.1) WZIP, as well as Baldwin-Wallace U's WBWC at 88.3. . . An excellent 'official' contact is Mark Krieger, C.E., WGAR (99.5), local SBE coordinator and seasoned pirate tracker pro, (216) 328-9950." Weisinger included several articles, including an SBE list of known pirates in the area. The pirate list includes "WRVC 89.9 Radio Maranatha" from Room 812, United Office

Building, 2012 W. 25th Street, which interferes with WKSU. "The office is leased in the name of Dones." Another was detected on 94.3, splashing onto 94.1, southeast of Cleveland; believed shut down by the FAA.

Other pirates known to be currently on air: 88.1 Hispanic on Cleveland's west side. 90.7 WSPL Super Potencia Latina, W. 34th Place, Cleveland's original microbroadcaster. 91.9 RPC Radio Puerto Rico, from Belinda's Bar, 9613 Madison, Cleveland—"a recent addition. Hispanic entertainment. Plenty O'power." Grid Radio 96.9—from Grid Night Club, 1281 W. 9th, Cleveland. "It's still there. Same old same old." 99.9 FM Rap—"Latest pirate on E. 61st Street."

The SBE paper goes on: "You can assume this is only a partial list (I haven't listed Radio Menorah at 90.7 in Beachwood yet, as they claim that they are trying to comply with Part 15). Intelligence reports indicate that we will be seeing an outbreak on the AM band shortly. I also got a call from a business community repeater on 540.650! I informed this gentleman that this was not permissible. He seemed to think that was not the case. And so the ride has just begun. I know, the best is yet to come. Hold onto your hats!" PA Renovo WZYY 106.9. "Was only off a short time."

PA Tobyhanna WKRF 107.9 (see "Facilities," last month, p. 3, col. 2): "I believe the change there has been on for over a month, as within that time they've become major interference to WWNJ's Philadelphia translator at my home (about 29 km) NW of the city."

TX Brazos (county at 30-38-51; 96-16-42) WA2XNX 87.9 1 watt/h.v, 2 m, Federal Signal Corp., developmental station. This station may be portable and used in other cities. TX Sanger KXIL 104.1 back on; it had been off for a while. "KXIL sometimes disappears for days or weeks." Has IDed with Denton-Dallas-Fort Worth.

TX San Marcos "KIND" 105.9, the station of Elbert "Pappy" Morrow, Jr, who advocates smokingpotamong other things, was featured in the Feb. 27 "USA Today."

TX Weatherford—a KLIF 570 AM relay on 89.1, heard in town proper, but weak otherwise. Not believed to be cable radiation.

WI Muskego "Lake 101.5 FM" in stereo from a Ramsey transmitter, beautiful music, probably 1/2 watt, fed into a Comet CFM-95SL 5/8 wave antenna and on air Saturdays and Sundays. Also has some polka music and talk. Website at <http://ods.ods.net/jlntz/lake.html>.

WI Wisconsin Rapids 93.5 a reported WWIB 103.7 Hallie WI translator, but the FCC database shows no translators on 93.5 in WI.

ON Kingston CFMK 96.3. The tower containing this and CKWS (TV) "crumpled. . . Several days later, Country 96 was limping along at 18 watts through an antenna on the roof."

ON Nepean VX9IVV 97.9, for experimental purposes only. May be portable. Parameters unknown.

AFRICA—The BBC is about to launch an FM service in Kenya, to reduce reliance on shortwave. Nairobi 93.7 is the first on-air station "in a chain of FMs all around Africa." BBC inaugurated a similar FM service in Madagascar (known as Malagasy Republic, 1960-1975), and soon starts another in Rwanda.

### Off Air—Or Not Yet On

AR Camden KAMD 97.1 reported off. CA Penryn K203CP \*88.5 was briefly on, heard "easily in West Sacramento 2-23, trashing KQED-FM \*88.5 San Francisco there (and not itself usable). Another FCC atrocity! Apparently someone complained, though; it vanished almost immediately. Channel 6 interference, perhaps. It's amusing that KXJZ protested that translator (Feb. p. 3, col. 1); it probably would be a slight benefit to them by eliminating KQED-FM as an alternative NPR source."

CA Sacramento 107.2 because of airport interference. Heard overhead at Napa CA and around Sacramento, emitting spurs at 119.5, 122.2, 125.0 and 126.8 mhz, sometimes varying its frequency. Originated from Dollar and Sense Productions, 2251 Florin Rd., Ste. 128, Sacramento. "It shut down voluntarily."

CA Vallejo D'z Nutts Radio 91.3 signed off voluntarily after getting word it was interfering with air traffic on 136.24 mhz.

GA Brunswick WAYR-FM \*90.7, but being sold to Good Tidings Trust, Inc.

PA West Philadelphia "Radio Mutiny" 91.3: "I've never heard this one, and I've tried, even from close range."

ENGLAND—West Midlands: A group of Christians is planning an FM station. "Their goal is a 24-hour music and ministry station with contemporary Christian, gospel, and quality praise and worship as well as Christian news and local and international news stories."

**SCServices, 57, 67, 76, 92 kHz**

*Symbols are as in the "FM Atlas." Most of the t(ks are RDS [at 57 kHz.]*

GA Atlanta WRFG \*89.3 adds tO, 67, Vietnamese  
 ID Boise KBSU \*90.3, Twin Falls KBSW \*91.7—the tT is at 76 kHz not 75 kHz (last month, p. 6, col. 2), per Jim Paluzzi e-mail. I told him I thought an SAP adapter set to 78.67 kHz would work to decode those instructional emissions. The local reading service for the blind is on the 67 of KQFC 97.9. A reader wants to know how 76 kHz and the Pro channel differ from the usual FM/SCS frequencies of 67 and 92 kHz. The 76 kHz channel is only being used in Idaho to my knowledge. It was selected to have wider audio bandwidth (up to 10 kHz), and to not infringe on SCS receivers. TV SAP is at 78.67 kHz from the center of the audio TV carrier, while the Pro channel is at 102.271 kHz. The Pro channel is meant for internal station use, and is centered far enough from the TV SAP channel where the normal SAP receiver or VCR wouldn't get it.  
 IL Chicago WNIB 97.1 t( )  
 WFMT 98.7 t( )  
 IL Highland Park WXXY 103.1 tQ, Russian  
 MN Hibbing WTBX 93.9 no tM, open carrier only. "No, we don't offer that service any more." It was removed after about 20 years of faithful service.  
 MN Park Rapids KDKK 97.5 still tB, 67, but with KSKK 94.7 Staples MN. KDKK has the same satellite service on the main carrier as KZIO 104.3 Two Harbors MN, but "KDKK has much less (poorer) stereo, a real big difference!"  
 MO Kansas City KCUR \*89.3 no tT,T. "It only comes from KANU \*91.5 Lawrence."  
 NY Utica WOUR 96.9 no tM. "They went to satellite."  
 VT Burlington WVPS \*107.9 t,Q. Will soon begin transmitting an ethnic signal, Canadian Hellenic Broadcasting, intended for Montreal reception. "The only radio station that we found capable of leasing us an SCMO channel is located 90 km away from our audience. . . Clear reception can be obtained in a car radio or with any good quality radio. So we will use their SCMO channel at 92 kHz for audio programming at 8% modulation. . . If you can provide us with [a sensitive and selective] receiver, I'll buy lots of those for distribution to our audience."  
 WV Beckley WVPB \*91.7 t( )

**Multi-City IDs in Use**

CA Garden Grove KIKF 94.3 with Anaheim-Los Angeles

CA Goleta K295AH \*106.9 with Santa Barbara

**Selected AM Happenings**

AR El Dorado KELD 1400 off. KDMS 1290 there does not use its 106-watt night power, at least on Sundays. "This means there are no AM locals at night in this city of 25,000 people."  
 K220DW \*91.9 is still on, to be replaced by KAUG (which is applying for 88.9).  
 AR Pine Bluff KYDE 1590 deletes.  
 GA East Point WERD 1160 had been silent; now classic country.  
 IL O'Hare International Airport has parking and traffic info on 88.1 FM. On AM 800 is "Chicago Midway Parknet" KP456 and "O'Hare Parknet."  
 IL Pontiac WPOK 1090 silent, "returning its license to the Commission."  
 LA Farmerville KTDL 1470 delete.  
 LA Lafayette KJCB 770 delete.  
 LA Rayville KXLA 990 delete.  
 ME Greenbush, town of—WVHA shortwave sold to the Lester Sumrall Evangelistic Association of South Bend IN for \$1.5 million, considerably less than the \$5 million the Historic Seventh-day Adventists were committed to pay, but couldn't. It was sold by FINOVA Capital Corp., the NJ-based lender, which had foreclosed. The Historic Seventh-day Adventists are an offshoot, led by John Osborne of Orlando FL, whose ministerial credentials are not recognized by the Seventh-day Adventist Church.  
 ME Machias WALZ, in an ownership with WQDY 1230 AM, 92.7 FM Calais (kal-es) ME, rather than being LMA'd and totally simulcasting. They hope to have 2-3 people in Machias to give the station its own identity. Studios at WALZ have been moved to a trailer adjacent to the tower, rather than having to pay rent for in-town studios.  
 MD Bethesda WTEM 570 has moved to 980 Washington DC with sports and Imus. Similarly, WWRC 980 has moved to 570.  
 MN Minneapolis—writer Kristin Tillotson, in the [Star-] Tribune newspaper, claims to have

discovered AM radio. She says it's the band for variety, what with the area being "an undersigned FM market, meaning that FM owners can't afford to take as many format risks as AM can." She's noticed the real rock on Radio K (770), nostalgia on Club 14, and the techno-dance on Radio AAHS' former 1280 frequency at night. "You can't hear most of these stations after sundown . . . And yes, there's more static than on FM. . . FM is an expensive, conservative suit. AM is the comfortable old clothes you want to wear all the time."  
 MN Sauk Rapids WVAL 660 now Radio Disney, after having simulcast WHMH 101.7.  
 MS Amory WDAY 1170 deletes.  
 NJ Newark WNJR 1430 still has Sal Anthony's "Overnight Oldies." It's also heard in southern NJ on a WSJR 1680. "I don't know if that's a licensed station or a pirate."  
 NC Lumberton WAGR 1340 reported silent; had simulcast WJSK 102.3, now WFNC-FM.  
 OR Portland KFX sports talk 1520 often relayed on 25.950 mhz in real time audio, whereas the AM has an 8" delay. Serves announcers at remote locations who must hear it in real time. On all the time, but sometimes with KGON 92.3 or KNRK 94.7. ERP is 400 watts, wide band, claiming 30 hz to 15 kHz audio response. "We plan to eventually convert from AM to FM modulation, which will make it hard for casual listeners to pick it up, but will greatly improve the interference-free range of the station for our purposes." Claims to have received DX reports from New Zealand, which is in its prime lobe, since it is somewhat directional.  
 VA Norfolk WCKD 1110 had been silent. On with black gospel.  
 WI Eau Claire WEIO 1050 simulcasts WISM 98.1 Altoona WI, except for 2 hours on Saturday morning when it is Hmong.  
 WI Superior KXTP 970 drops country for ABC's Radio Disney.  
 USA—the International Radio Club of America announces the fourth edition of its Mexican log. It lists all AM stations in Mexico by frequency, including call letters, state, city, day/night power, slogans, schedule, formats and networks. There are also listings by call letters, by state and then by city. "an indispensable reference for anyone who hears Mexican radio stations." It's \$9.50 from IRCA Bookstore, 9705 Mary NW, Seattle WA 98117-2334.  
 ON Toronto—the CRTC denies Radio Asia's 1670 kHz bid for a Tamil language station. The CRTC felt the applicant didn't go far enough to seek out other language groups to be served.  
 CANADA—"Some large cities like Barrie and Sault Ste. Marie are now completely void of local AM stations; the fact is that young Canadians just don't listen to music on AM. . . The tide from AM to FM has turned into a flood (however, DAB is not guaranteed future success)," W.H., Ontario, via e-mail.

**FCC Streamlines Broadcast Procedures**

The FCC took action that could signifi-  
 cantly reduce certain regulatory burdens  
 on broadcasters. This rule-making proposal  
 includes the following reforms:

- Liberalizing station ownership reports  
 from every year to every four years.
- Streamlining transfer and assignment  
 processes.
- Allowing the submitting of reports  
 and pleadings electronically by the broad-  
 casters.
- Extending to three years the deadline  
 for building a station under a construction  
 permit.
- Adopting newer, shorter application  
 forms that would rely more on an appli-  
 cant's "self-certification" than on having  
 to file lengthy supporting documents.
- Creating an automated system for  
 selecting and reserving call letters.

The proposal calls for creating "spot  
 checks" of certain filing information and  
 increased penalties for broadcasters sending  
 in inaccurate information. It would also  
 call for automatic forfeiture of expired  
 construction permits. Electronic filing,  
 the Commission feels, will enhance the  
 public's participation in the application  
 process.

Also at work is the FCC's mass media  
 bureau, which has reported it has submit-  
 ted to the full Commission a proposed  
 liberalizing of the broadcast main studio  
 rules and public file requirements. NAB  
 chieftain Eddie Fritts called the FCC  
 proposals "a proactive deregulatory step.  
 We strongly support efforts to reduce  
 unneeded paperwork on broadcasters."

**Small-Print Happenings and FM Industry News**

With the relaxing of the hiring rules relating  
 to religious broadcasters (last month, p. 9, cols.  
 2-3), I have noted the classified ads in "Religious  
 Broadcasting" magazine no longer say "EOE."  
 Another result of the change is that the  
 Commission announced it will revisit the \$25000  
 fine issued to KFUFM 99.1 Clayton MO. The  
 FCC was not pleased that KFUFM had hired  
 its own people, including students at Concordia  
 College, and not gone to the community at large,  
 including the finding and hiring of minorities.

Arbitron has announced ways radio stations  
 can carve out markets for themselves, instead of  
 being beholden to, say, TV ADIs (areas of  
 dominant influence). For a change to happen,  
 at least 75 percent of the subscribing station owners  
 in a market must support an evaluation process.  
 If there are fewer than four in a market, all must  
 agree. Once changed, metro geographics can't be  
 adjusted for three years—that's an effort to keep

down frivolous inquiries. Entire counties would then be assigned the new market designation. That being done, there is a danger counties would be dropped from the former metro, and that metro could then be threatened. I can see market changes coming in Lincoln-Grand Island-Hastings-Kearney NE. That market was created largely by the late A. James Ebel of KOLN (TV) Lincoln-KGIN (TV) Grand Island. He did not want to have to compete with Omaha, so his transmitter was installed west of Lincoln and then was added the Grand Island station to complete the TV market. Radio stations in Grand Island and Kearney are thus grouped with Lincoln stations for ratings purposes. The two markets are clearly separate, especially for radio.

Metromedia International has invaded Europe with a seven-year license to run "News Talk 93.6" in Berlin, Germany. The Berlin-Brandenburg area is a \$100 million radio market with a population of 4.5 million, according to the M Street Journal. Metromedia also has broadcasting interests in Estonia, Latvia, Russia and Hungary.

Plugola or payola coming back to radio? It seems so, but this time it is the station owners—not the DJs—getting the bucks, and it's supposedly legal. Capitol Nashville is interested in promoting its country artists, such as Garth Brooks, and is courting Jacor. The record company would buy blocs of time, such as one hour, for promoting its artists. Exact language of the blurbs before and after might help a station stay away from FCC troubles. But the FCC's Chuck Kelley said, "I am not sure that 'presented by' is going to cut it."

Low power radio—even the Commission's talking seriously about it—FCC Chairman Bill Kennard, speaking in Chicago, embraced Jesse Jackson's concept that consolidation in the media is creating "resegregation." Kennard sees low power radio as a way "small businesses and churches and community groups can access the airwaves to broadcast to their communities. . . How can we have a strong democracy when most stations are concentrated in the hands of only a few?"

The mass media bureau home page starts off with big headlines about low power radio. Greg Skall (pictured), writing in the Minnesota and other states' broadcast association newsletters, gave an historical background to the microbroadcaster proposal, and then came to a startling conclusion. "With each high profile Commission bust of a pirate, more pirates seem to spring up, as in retaliation. Indeed, some of the fringe elements of this faction seem to relish an all out war with the 'feds' who try to stop them. With limited Commission resources to devote to keeping the lid on this pressure cooker, and with the NAB openly declaring war on pirate radio in the press, this is not a situation that seems to have a happy ending."

Skall warns his audience of commercial broadcasters that "given the hostility generated in Washington and expressed among numerous small market existing station licensees, these petitions [for low power radio] must be read as a wake up call to the industry that hundreds of new, legal micro radio stations may be on the way. The petitions are extremely well written and appeal to many of the values traditionally expressed in FCC rulings and Congressional pronouncements. They make the point that there is such a demand for community broadcasting that people are willing to break the law and face the consequences of criminal prosecution in order to take to the airwaves. These are entrepreneurs, they argue, who will now bring the most innovation to broadcasting. Given these factors, and the determination of 'pirate'

stations we are currently experiencing at the grassroots community level, it is very likely that we may have a legal micro radio station service in the near future."

The Cleveland Plain-Dealer takes up the cause of WKSU \*89.7 Kent OH being interfered with by a microbroadcaster on 89.9 that's not so "micro," calling it a "rogue operator." The paper says, "You can't blame WKSU for taking this hard-line approach. While many misguided types romanticize pirate radio operators as little guys who just want to be heard, let's keep a grip on reality here: Illegal is illegal."

A local e-mail intercept shows the Cleveland area pirate on 88.1 as having about 20 watts (see above, "On Air"). It causes interference to WBWC \*88.3 as far west as West 98th and Lorain. "An increase in their power is inevitable, along with the attendant increase in interference. . . I have kept the Detroit FCC office completely up to date on all developments, but I am not encouraged by their response. The problem is clearly in Washington, and the celebrated Dunifer case is nothing but a fig leaf for a defacto policy that is a recipe for disaster. . . I am expecting illegal activity in the RPU and STL bands as well."

The FCC announces notice of \$11,000 fines to each of the following, who are accused of operating unlicensed stations: Keith Perry, Leander TX; Jerry Szoka, Cleveland OH; Joseph F. Ptak, San Marcos TX; Mark A. Rabenold, Oroville WA; Lewis B. Arnold, Chewelah WA.

WDR \*90.9 Detroit won't be going all classical—despite efforts to nudge it that way after the demise of commercial classical station WQRS 105.1. The Detroit public schools decided against selling the poorly-performing station, which costs taxpayers \$437,000 a year. It's only on 6:25 a.m. to 8:30 p.m. weekdays. The Detroit News estimates WDR would fetch \$1 million if sold. The station's own manager, \$65,000-a-year Cliff Russell said WDR's sound quality is often abysmal, the programming meandering and listenership minuscule. Broadcaster Edward K. Christian of Saga Communications, said "It's unconscionable that the Detroit Board of Education, with its financial difficulties, would spend \$500,000 a year to operate a radio station that has no audience." He feels if the board keeps the station it should at least be turned into classical, thus serving an identifiable radio need in the community. Broker Gary Stevens who helped sell the St. Louis \*91.5 frequency to Bott Broadcasting, said such deals are "very difficult," but thought WDR could fetch more than \$3 million.

WDR's audience is estimated at 4000 people a week. "Somebody could stand on top of the school center with a megaphone and reach more people than this radio station serves," Christian cajoled. "It shows to me the school system's complete and utter disdain for the arts." Board members "are so out of touch with the reality of the situation that they might as well be orbiting Pluto."

A frequency swap is said to be on the way in Dayton. Dayton Public Radio has filed to transfer its WDPR \*89.5 to WQRP \*88.1 West Carrollton OH. It would then get the 88.1 frequency. Nothing is said about what might happen to 89.5 sharetimer WDPS, owned by the schools.

AM Korea is suing to keep its three-year brokerage contract in effect at WPAT Paterson NJ. It fears Arthur Liu will put its programs on an inferior facility. Liu is selling WNWK 105.9 Newark to Heftel for \$115 million, plus WPAT 930 AM. The Daily News headlined the story, "Seoul-searching and a lawsuit." The article says Radio Korea has been offered the 1480 kHz frequency of WZRC, but it prefers 930 for its "stronger signal." Both are 5 kw stations, Louis J. Sicilia says. "The major Korean populations are here in Bergen County NJ and in Queens County NY. Both stations give adequate signals to those areas. The only advantage of WPAT is its dial position, away from the New York-New Jersey ethnic ghetto."

Heftel is acquiring KKPN 102.9 Houston, to add to its Spanish holdings on FM—KLTN 93.3 Port Arthur, KLTO 104.9 Rosenberg, KLTP 104.9 Galveston, and KOVE-FM 100.7 Winnie. Around June 1 it expects to close on the sale, and create a new Spanish format, effectively blowing up "The Planet."

Hughes Space has signed a deal to build two satellites for American Mobile Radio, one of the two national digital audio radio services. General Motors is said to be interested, and the industry is watching to see if GM makes DARS radios standard in cars, which would give the technology a big boost.

On some cars like certain Cadillacs is ITS (intelligent transportation systems) via global positioning satellites. Locations can be charted much more accurately if FM subcarriers can be used. At the NAB in Las Vegas, Jim Chadwick of the Mitre Corp. was to have discussed its subcarrier traffic information channel for ITS. Compared to competing systems by Seiko and Digital DJ Systems, it did significantly better before the "onset of message errors" occurred. OME takes place when signals start getting weak, or where there is multipath. Error rates were higher in urban fast driving, compared to rural fast and urban slow. It is expected those stations involved with ITS will use 57 kHz at a not-too-robust injection percentage in order to allow for other subcarrier services at 67 and 92 kHz.

The NAB has come out with a booklet that might benefit Howard Stern and others who announce on the air. It's the *Guidebook for On-Air Radio Personnel*. It talks about the need to notify parties of the intention to broadcast telephone conversations prior to recording or broadcasting, steps to take to avoid payola and plugola problems, and legal traps when it comes to announcements, commercials or programs.

National Public Radio announces it's launching a new service to bring programs like "Car Talk" and "All Things Considered" to Europe. Some NPR Worldwide programming will be a direct satellite service, as well as being on terrestrial stations in cities like Stockholm, Helsinki, Geneva and Dublin. A previous attempt to cooperate with Public Radio International to distribute programs in Europe failed.

Minnesota Public Radio sells its mail order catalog company Rivertown Trading to Dayton Hudson Corp. for \$120 million. This gives the department store company its first major entry into direct mail. Executives of Greenspring Companies, Rivertown's holding group, which is closely related to MN Public Radio, will collect \$7.3 million. Bill Kling, president of MPR, gets \$2.6 million and continues as head of MPR and Greenspring, which publishes "Minnesota Monthly." MPR vice president Tom Kigin will collect \$1.4 million from the sale. Rivertown was designed to earn money for MPR, and it succeeded quite well from its founding in 1991 to 1996. That year it had a \$5.7 million loss, but it is projected to have revenues of \$195 million this year. Remarkably one person, who called it Minnesota Profit Radio or Minnesota Public Rape: "Glad I never have sent them a pledge during their pledge time when they were 'crying' for money."

Those wanting to file comments on the petitions for rulemaking on microbroadcasting now before the FCC (especially No. 9242) have until April 27 to do so. In that context, James E. Price III and his father, working as Sterling Communications, Inc., 219 Dodd, Ringgold GA 30736; (706) 965-2355, are offering to help. "It is imperative that we show the FCC our support of this new rulemaking, and we urge you to take part. The big ownership interests will aggressively oppose this rulemaking. . . We urge you to contact us [so] that we may file formal 'comments' on your behalf. If you wish to participate we will file these 'comments' for \$100 and send you a copy of the original petition, and a copy of the 'comments' for your

Commission resources to devote to keeping the lid on this pressure cooker, and with the NAB openly declaring war on pirate radio in the press, this is not a situation that seems to have a happy ending."

Skall warns his audience of commercial broadcasters that "given the hostility generated in Washington and expressed among numerous small market existing station licensees, these petitions [for low power radio] must be read as a wake up call to the industry that hundreds of new, legal micro radio stations may be on the way. The petitions are extremely well written and appeal to many of the values traditionally expressed in FCC rulings and Congressional pronouncements. They make the point that there is such a demand for community broadcasting that people are willing to break the law and face the consequences of criminal prosecution in order to take to the airwaves. These are entrepreneurs, they argue, who will now bring the most innovation to broadcasting. Given these factors, and the determination of 'pirate'

records. . . If this proposal results in a rule change we will begin filing applications for our clients all across the country, and we would be happy to file an application for you."

Station totals from the FCC, 2-28-98: AM 4741 plus 245 CPs, 4986 total. FM (92.1-107.9) 5577 licensed, plus 575 CPs, 6152 total. FM (88-92 mhz) 1947 licensed, 362 CPs, 2309 total.

From the classifieds: Eighth Ed. M Street Radio Directory, approx. 900 pp., is said to be ready at \$65 + \$5 shipping to M Street Publications, PO Box 1479 Madison TN 37118; credit card orders to 1-800-248-4242.

Back issues of the "FM Atlas and Station Directory" by Dr. Bruce F. Elving—fourth ed. \$5, 5th ed. \$3, 7th ed. list \$6.95, just \$1; 8th ed. 1983, \$6.95 list, just \$2. Other radio-related books from a closed mail-order dealer. Add \$3 per order shipping. Donald Erickson, 6059 Essex St., Riverside CA 92504-1599, erickson@can-sys.com; (909) 887-5910, "no answering machine." J.J. in Queens: "I bought a 7th ed. Atlas from them in Feb. and received it in two weeks."

General manager for radio information service for the blind, B.A. plus 5 years experience preferred. Will manage small staff plus 250 volunteers, will answer to a 30-member board. R.I.S., attn. Joe Wassermann, 2100 Wharton St., Ste. 140, Pittsburgh PA 15203. Jim Aldrich in Billings MT tells me there is no staff running the reading service there; it's all In-Touch from NY on the satellite. He thinks there may be an opportunity for somebody to take it over.

Cincinnati is also looking for a radio reading service manager. Contact D. Wesseier, Cincinnati Association for the Blind, 2045 Gilbert Ave., ZIP 45202.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

Continuing with comments from Canada's Cate Friesen about the burgeoning market in folk music: "It's easier to borrow musical styles from other cultures and artists. It's thrilling really. In Ontario alone, there are 25 folk festivals and countless clubs and associations. I'm glad to be part of it." Her program is on Saturdays 12 to 2 p.m., or check [www.interlog.com/cfriesen](http://www.interlog.com/cfriesen).

The December "Sky and Telescope" magazine had an article that read, "FM Atlas is a useful reference that lists station location, frequency, power and antenna height." Philip Gebhardt is the author of the article, "Observing Meteors on Your FM Dial." We got quite a few orders from astronomy buffs who use FM to track the direction and intensity of meteor showers.

In reference to the story (Mar., pp. 8-9) about Stern's show, I sent an e-mail to Steve Case, Chairman, America On Line, who is one of the show's sponsors, which included these thoughts:

In my FMedial newsletter, Stern has been a frequent subject. While I disapprove of censorship, there is nothing wrong with citizens banding together to express preferences to have media changed. This is more effective—and sends a better message—than simply turning the radio off or to another station.

I therefore hope you change your minds and realize that you can reach your desired demographic market by utilizing other stations, networks and media besides being on the Howard Stern Show. I look forward to your response as an AOL user. If I hear nothing, we will consider soon switching to a different Internet server.

E. Neal, office of the chairman, responded for Steve Case: "Although America Online has bought advertising time on the show, one of our partners lately has been a major buyer to advertise their discount long-distance telephone service—"AOL Long Distance". So even though you hear the 'AOL' name, we are no longer buying those ads.

"I certainly appreciate why you have such strong feelings. Our decision to advertise on this program in no way endorses everything Stern does or says. That said, I agree that Stern's show is not

appropriate for children. . . It's up to parents to ensure that their children see and hear the right kind of content—whether on the radio, TV or the Internet."

Pete Schulberg of the Oregonian reviewed Stern's show, newly on KUFO 101.1. He said he won't repeat 70 percent of what Stern said, and that does not count Stern's references to "broads," blacks, gays and Jews (which he is). Three other local stations ousted their morning personalities, bringing in different people. Stern is seen as a threat to Mark and Brian on KGON 92.3—another show brought in from outside. That one comes to Portland from Los Angeles.

Mike DiSantoro mentions that in March I said that Howard Stern wasn't mentioned anywhere in the morning race. "Well, according to Chicago Radio Online Watch and Robert Feder (Sun-Times) Howard is No. 1 in 25-54 and in 10th place overall. . . His main competitor, Mancow Muller, has fallen a bit while Howard has gained. . . As for rock stations, we have at least 8 rock stations serving the Chicago area, 6 licensed to Chicago, and two rimshotters—96.7 in Joliet and 95.1 in southern Wisconsin. The amount of classic rock is tremendous. You can hear the Rolling Stones on 7 of those stations (WXCD and WLUP being the primary classic rockers in quite a heated battle, I might add)."

A central Indiana subscriber who doesn't want his name used said that not long after Stern was on WNAP in Indianapolis, "I was tuning up the dial to check something and happened to stop on the station. I heard a man with an obvious eastern accent telling a very vulgar story. . . It's my understanding that he wanted badly to be on a station in Indianapolis where he could compete directly with Stern-wannabes Bob and Tom whom I like to describe as the 'cackling cretins'. They are filthy in their own way, and in either case, it's much like taking your morning shower in the toilet.

"Unfortunately a lot of younger people listen to Stern or Bob and Tom, and they thereby pollute these minds with their filth. I'm told Stern has a fixation on excretory organs, and that fits exactly what I heard. Frankly, I hope religious groups do go after them and scare off their advertisers. None of these three does anything to improve society, and we would be better off rid of them. Trouble is, there seems no end of smut.

"He and those like him give me cause to worry about our civilization. Can he look himself in the mirror and ask if what he does makes the world a better place? The same, of course, for Bob and Tom. When I arrive at work, the man sitting adjacent to me often has them on his radio. If he's not there, I turn it off quickly, and I've complained to my boss about it. I certainly support any effort to get them off the air."

Four Stern shows were cited for "abusive or discriminatory comments" in Canada. The violations were all on Toronto's Q-107 (not on the Montreal station carrying his program), and were cited by the Canadian Broadcast Standards Council. But the council noted there have been improvements in the program. Q-107 made 77 deletions in 17 recent shows, ranging from a few words to segments of 20 minutes. But it has been ordered to broadcast a statement to listeners that it violated the standards on the four dates in question.

"I resent your using the pages of FMedial a secular publication, to promote your particular religious views," writes a NJ reader. "The fanaticism of the so-called Christians and other fundamentalists is dangerous to our basic constitutional freedoms. The AFA and their ilk should be condemned, not supported. The concern for children is the responsibility of parents to monitor their listening. My own personal spiritual paradigm is obviously quite different from yours. I see no value in making a fetish of Jesus and worshipping the fetish."

My faith in younger people is reinforced by a letter to the editor by a freshman student at the University of MN-Duluth. Josue Cervantes wrote the campus paper, the Statesman: "It is quite

clear in the Bible that exploitation of sex is wrong. . . Porn is the ultimate perversion of a beautiful gift we were given out of God's love for us. Sex has a divinely ordained purpose. Pornography makes it dirty, cheap and meaningless."

And I'll add that I only shared my faith in the secular arena much like Bing Crosby did in his TV early movies and Mohammad Ali did in his TV interviews. Look this month at all the stations (under "Formats") adding Howard Stern and Bob and Tom. One station owner, Chancellor Media, as mentioned below, admits having no "standards of decorum." If the media have no standards, it behooves the informed public to step into the vacuum, and help formulate standards of decency—something the NAB Code of Good Practices used to do.

Here are two examples. In an April Fool's joke that backfired, WAAF 107.3 Worcester-Boston reported for several hours that Mayor Thomas M. Menion of Boston died in a car accident in Florida, where he was vacationing. The story was false, the station knew it was false, and phone calls came from relatives and friends wondering about the story. Later that day the station called and apologized to the mayor. Menino threatens, however, to complain to the FCC and file a lawsuit. He did offer a new nickname for himself, "Lazarus."

The other example is an announcer at KYLD 94.9 San Francisco posing as a San Jose Unified School District administrator who called a mother saying her son was caught selling drugs. The tormenter at the mike kept insisting the kid had been nabbed selling dope. [I wonder if she was notified that she was on the air and had given permission for the broadcast, as FCC rules require?] "Her voice began to shake. He demanded to know if the mother used drugs herself." Finally, as she broke down and cried, the announcer admitted it was a prank. This is the same station that was fined \$1.5 million in 1993 for a stunt that involved blocking traffic while a station guy got a haircut on the Bay Bridge at rush hour. KYLD is owned by Chancellor Media of Irving TX. A San Francisco Chronicle writer, Jerry Carroll, tried to get a reaction from the FCC and "got passed around four dozing bureaucrats." Then he got to Stewart Leweck, a spokesman for Chancellor, who said he's not aware of any "standards of decorum and decency" that Chancellor's stations are expected to follow.

Raymond Nahl of White Plains NY sent updatings on the WFUV \*90.7 Bronx towers situation. An article from September, 1997, was about the court battle between Fordham University and the New York Botanical Garden, as described in the "FM Atlas." It said the NY Court of Appeals will rule on whether construction of the tower can be completed.

A more recent article from Jan. 21 goes into the reasons WFUV wants the tower increase, and mentions WFUV's alternative programming. "Other noncommercial stations that remain free-form consider objectionable that WFUV uses any format at all. One such station is WFMU 91.1 FM from East Orange NJ, where an electric [eclectic?] mix of personalities makes sure that anything goes. Being free form is an integral part of WFMU's philosophy," writes Elizabeth J. Murray, of the local "Reporter Dispatch." WFUV's signal was better 30 years ago, when there were not as many physical obstructions on the horizon of New York, "a problem that became prevalent with the building boom of the 1980s."

Until May,

*Bruce F. Elving*

 AB Fox Creek 92.1 CFFC (CKSK), monophonic  
 BC Trail 104.1 CKOR-1, on air and parallel to  
 CKOR 760 Castlegar, rm format. "Our main  
 station [CKOR 99.3 Castlegar] won't be on  
 the air for another month. I don't know if it's  
 stereo or not."  
 ON Atikokan \*90.1 CBQI (CBLA or, as I showed  
 it last month, CBL-).

CH Tonalá 89.5 XHNAL  
 CY Colima 92.9 XHMZO, I, 50000 h,v. This was  
 one of three stations of western Mexico  
 received by FM Atlas reader Sheldon Remington  
 of Kea'au HI—from about 4 to 6:15 a.m. recently  
 as the result of tropospheric FM DXing. He's 793  
 m up a mountain facing the ocean to the west. At  
 about 5280 km, this is probably a world record  
 for non-skip FM reception. He's using a pair of  
 stacked Channel Master Probe 9 antennas, "with  
 a clear shot at the ocean horizon." After  
 preamplification, the received signals go to a  
 solar-powered Pioneer KEH-P8200 receiver  
 ("Super Tuner IV")." Also heard were XHME  
 89.5 and XHPVA 90.3 Puerto Vallarta JA.  
 PU [Santa Isabel] Cholula (not Puebla) XHCOM  
 (not XHSIC), \*105.9 3000 h,v; list it as  
 noncommercial.

Facilities Changes Granted

AZ Clifton KWRQ 102.1 674 m (2800 h,v)  
 CA Big Pine KRHV 93.3 d-a (directional  
 antenna)  
 CA Byron—moves from Stockton where this  
 translator was known as K201AT \*88.1. Now  
 K209CQ \*89.7, with less than 100 watts, v.  
 CA Clarksville K265AG \*99.1 no longer with  
 K.LVC 88.3 Magalia, but with either KLVR  
 91.9 Santa Rosa or KLV5 99.3 Grass Valley.  
 I assume with KLVR. "Since KLVR and  
 KLV5 give a joint ID, it's impossible to tell  
 which is the actual primary until one of them  
 goes off, but KLVR would seem the easier  
 target given KJOY Stockton is nearly as close  
 to Clarksville as is Grass Valley and with  
 flatter terrain intervening."

**Stereo—or to be Stereo**

CO Estes Park KRKI 102.1, rp, "r to rm with an edge toward progressive... Their signal is quite strong despite being... in a valley in the mountains. They are promoting Estes Park in their station IDs—they attach 'K Rocky' after they ID on the hour."  
 CO Glenwood Springs KKCH 92.7, "Colorado's Western Choice," but not country. It is r—"rm to top 40."  
 MN Grand Marais WTIP \*90.7, temporarily using its exciter with about 100 watts ERP. Has an automation system to give the ID, connected to a timer. Is mono for now, but when the new transmitter comes in in about two weeks it will convert to stereo. "If it's not going to be stereo, we'll call you." Relays KUMD \*103.3 Duluth via an antenna and receiver.  
 MN St. Charles KLCX 107.7, ID with Rochester, op format, "CD 107.7."  
 MT Sidney KTHC 95.1, rm, "Power 95," 24 hours, satellite fed. Owned with KYYZ 96.1 Williston ND, but no joint IDing going on.  
 NE Hubbard KAYA \*91.3, ID with Sioux City. Has local programming, also done in stereo, 8-9 a.m. and 4-5 p.m. Monday through Friday. "We have some contemporary Christian music on weekend nights; otherwise all the American Family Association stations are middle of the road Christian music. Some praise music, but not much that's Christian contemporary during the week." Seeks 5100 h,v; 97 m.  
 NH Lancaster WXXS 102.3, rm, ID with St. Johnsbury (VT)-Littleton "from atop Dalton Mountain."  
 NM Las Cruces KRUC \*88.9, S, g, on 24 hours a day. It is the station which is on the satellite, not the originating station for its network, KVMV \*96.9 McAllen TX, as one would expect, and only KRUC's ID is heard on the satellite feed. That is so K213BY Astoria OR can receive the program with the proper main-station ID on it.

OK Woodward KMZE 92.1, rm, with stereo resumed. Still "Z-92."  
 VT St. Johnsbury WCKJ \*90.5. It had been on the air testing, but is temporarily off due to "some kind of interference. We hope to have that cleared up, and, yes, I expect it will identify jointly with WCMK" \*90.5 Bolton VT. "I'll tell Alex McEwing [of WGLY 103.3 Waterbury VT] that you called."  
 WA Port Angeles KNWP \*90.1, cn, parallel to KZAZ 91.7 Bellingham—with a dual station ID. "Due to a CBC relay on 91.7 in Chilliwack BC these areas have so far been unable to access Northwest Public Radio." Serves the Olympic Peninsula of WA, Victoria BC and the "Gulf islands here in Canada."  
 AB Peace River CKKX 106.1  
 ON Lindsay CKLY "Y-92" 91.9, mr, "adult soft rock." The "AM frequency (910) is off... I'm not sure if this is permanent or for transmitter maintenance... Signal level here in Toronto is so-so, but way over TIS CFLZ (91.9) Niagara Falls." Has Blue Jays' baseball.

**Monophonic**

AR North Little Rock KDRE 101.1, t, "101.1 The Mouth." From whence it came—when it signed on a few years ago they were running NOAA weather radio in mono with a pseudo stereo light.  
 NY Sag Harbor WLNQ 92.1—Paul Sidney called and said they have no intention of going stereo. "It's a beautiful signal, and we really get out. With stereo you lose 20% of your coverage area. I think if more broadcasters saw how we're doing they'd go mono! I remember when WEVD 97.9 New York went stereo you couldn't get them any more out here!"  
 TX Carrizo Springs KCZO \*92.1. "We're mono, amigo. No plans to go stereo."

**Format Changes**

*Formats are the same as in the "FM Atlas"*

AL Headland WBCD 105.3 r, CHR, "Z-105" (from "Kool 105")  
 AL Warrior WBHK 98.7 s, calling their music "classic smooth R&B."  
 CA Berkeley KBLX 102.9 sr  
 CA Fremont KOHL \*89.3 r

 TN Dyer WLSQ-FM 94.3 pr, parallel to Humboldt  
 TN Humboldt WLSZ 105.3 pr  
 TX Eagle Pass KEPI \*88.7 English gospel (from Spanish), Moody Network feed.  
 TX Memphis KLSR 105.3 parallel to KGNC-FM 93.1 Amarillo—no longer parallel to KMLL 96.9 Amarillo. Still country.  
 WI River Falls WRFW \*88.7 rt, carrying Ideas Network 2 a.m. to noon. Student programming other times. Wisconsin Public radio is now on 24 hours. WRFW is not forced to carry a certain amount of network programming, which KUWS \*91.3 Superior is. KUWS can only carry 25 percent student programming.

WY Lander KDLY 97.5 still r, but having classic rock and hot AC. It plays live classic rock 6 a.m. to 5 p.m.

AB Rainbow Lake CJRA 93.1 k, relay of CKYL 610 AM Peace River.

BC New Westminster CFMI 101.1 still rp, but rumor it will go to a modern or AAA hybrid format, "which CFMI did quite successfully back in the late '70s to mid '80s. This is fueled by some key personnel moves."

### On Air—Real Stations and Pirates (Selected)

AK Anchorage KSKA \*91.1, with C1 facilities. "Their Palmer translator on 89.5 and Eagle River translator on 88.5 are probably already off the air, although I haven't confirmed it."

The station's program guide claims it has tripled its power and tripled its coverage area, serving all the way from Willow to Anchorage. They're getting the word out to Mat-Su residents through newspaper advertising. Increased signal in the "Valley" has resulted in assigning reporter Joanne Lobelle to that beat. The transmitter move is not without problems. The old 36 kw transmitter sat next to the studios "and anyone close by could receive our signal with virtually any radio, with or without an outside antenna, even in the basement of buildings. With the move of the transmitter to Goose Bay, north of Anchorage, that's no longer the case. Most of Anchorage is receiving better coverage, but pockets of the city have problems, particularly those where several other 100,000 watt stations are broadcasting (Dowling and Lake Otis and 36th and Denali, for example). Our engineering staff is researching possible ways to improve the KSKA signal in problem areas."

KFAT 92.9, but IDing as "KAXX AM 1020 Eagle River and KAXX 92.9 FM Anchorage" on the hour, so a change in call letters may be forthcoming. It is a 24 hours' simulcast. "In my opinion, that's a terrible waste of an FM frequency, just to simulcast a sports AM. But then the FM dial in Anchorage is oversaturated, so they probably had to find some format to hold on to their CP. Anchorage now has two sports stations—KTZN 550 (formerly KENI) and KAXX 1020."

CA Fresno KVPR \*89.3/KPRX \*89.1 Bakersfield mentioned as broadcasting white noise after sign off: "Your reporter needs to listen more closely! They broadcast ocean surf from midnight until Morning Edition every night, with IDs on the hour (unless the timer gets off, in which case the IDs may come at strange times). They've been doing this for over a decade! It's actually rather restful, though as a DXer I obviously prefer that a station go off when not running real programming."

CA Goleta K295AH \*106.9, but since returning to the air it's had a varied career. It has been picking up mono station KMRO \*90.3 Camarillo directly, instead of with a 1-second delay, as before when it used a satellite feed. And some mornings, thanks to tropospheric induced reception, it picked up XHITZ 90.3 Tijuana, "complete with stereo beacon," instead of KMRO. After several days of being a Mexican repeater, it has settled down to relaying KMRO, perhaps again by satellite.

CA Santa Barbara KMRO-2 \*90.3 believed to be on the air (but with a booster it's hard to tell). "KPRV Santa Barbara's Private Radio Station" came back on the air on another frequency, 96.9. This caused interference with the 96.9 Part 15 transmitter at Gold's Gym, so perhaps that's why it moved to 96.5, and is on with an estimated 100 watts. That's about six frequencies for this station in a short time.

FL Fort Meade WWRZ 98.3, having moved from Arcadia, "and putting a strong signal into Tampa," C2. Seeks 26000 h.v.; 209 m.

IL Chicago WOUJ \*88.9, but seems to have no regular schedule. "One trip into town you'll

hear it; the next trip at the same time it won't be on. It's like a pirate station."

IL La Grange area—an apparent pirate \*90.5, rp format. On the hour only said "91-X." "It covered WRTE \*90.5 Chicago, but quickly got weaker as I drove south."

IN Danville WSYW 107.1 has been pre-empting some of its classical music for Indianapolis Indians baseball. "This really irritates me and I have let them know it. They obviously are not very serious about classical music. I'm sure there is a sports minded AM station in Indianapolis where this would fit into the schedule."

IN Valparaiso WVUR \*95.1. It had been off for some time, but has returned. However, there are "often long periods of open carrier."

MN Cambridge KZNT 105.3 was off the air parts of two days, and remains hobbled, while its simulcast partners—KZNR 105.1 Lakeville and KZNX 105.7 Eden Prairie—are on, and at full strength. This causes me to speculate the trimulcast will split up, with the owners not pouring money into maintenance of the 105.3 facility. However, one person said, "Why does he get so concerned when a station is off the air for a short time?" In the Twin Cities, where KZNT used to be strong, it remains "low power, as heard weakly through KYBA Stewartville," said a reporter who "can't stand to listen [to them] for legal IDs."

MN Northfield KRLX \*88.1—back on air. "Haven't heard them for over a year," but expected to leave the air for the summer and maybe longer.

MN St. Cloud KVSC \*88.1 also believed to be low power. "Car radio signal, usually good, has been very intermittent lately."

MN St. Peter KRBI-FM 105.5, not yet full power, but receivable in far fringe area in mono.

NY Bronx "Radio Mission Evangelistica" 95.1, [tereo], 24 hours a day, 7 days a week from the East Tremont section. Has preaching and Caribbean-type religious music.

OH Greenville WDPG \*89.9 "seems to have fixed their problems and back on the air."

OR Nahalem K216DM \*91.1 and Tillamook K208CY \*88.9, both with KLVG \*88.3 Magalia CA.

PA Bensalem W300AA \*107.9, normally with WRDV 89.3 Warminster, but when WRDV is off, it relays "whatever it hears on 89.3."

PA Village Green W278AK \*103.5: "WXHL Christiana-Wilmington and 103.5 Chester-Philadelphia" as it calls this translator. Has good altitude and well received in Philadelphia. Note that the primary on 89.1 identifies with Wilmington. [a C2.]

TX Commerce-Greenville KEMM 103.3 now/TX Sanger KXIL 104.1 on in stereo, heard testing with KKZN 93.3 Haltom City audio.

WA Gig Harbor K283AH \*104.5, mono like primary KGHP 89.9 is. "This translator is to primarily serve Tacoma."

MEXICO—A new Mexican government website lists 479 FM stations with calls, frequency, power and directional antenna information. No EHAATs or polarization information given, but is the most complete source of Mexican station information known to date. Go to <http://www.sct.gob.mx/infraestructura.html> then choose Radio de Frecuencia Modulada and select a state.

AUSTRALIA—South Coast: After 15 years of effort Living Sound Broadcasters has been granted a temporary community broadcasting license (TCBL) for an FM station (frequency not available). Also, in Toowoomba, "the local Christian FM radio station has been granted a TCBL. Permanent licenses expected to be granted later. Australia now has 21 Christian stations on the air."

AUSTRIA—Vienna "Rock and Pop Non-Stop" 92.9, or "RTL Wien," owned by a group that has 21 other stations in Europe. "Austria just

recently opened itself to privately-owned radio stations."

### Off Air—Or Not Yet On

CA Arnold KBYN 95.9, since early February. "KKBN 93.5 Twain Harte was off briefly when KBYN vanished, but has been on since, so I assume major equipment failure, rather than economics."

CA Isla Vista K254AH \*98.7, but it might have appeared earlier, testing with KMRO 90.3 Camarillo, instead of with KPFK \*90.7 Los Angeles. "Possibly K254AH just wasn't strong enough to get over KYSR (98.7 Los Angeles), which comes into Santa Barbara fairly well. . . Maybe the operators of that facility will try again after some changes, such as a power increase."

FL Tampa Radio Amore 90.1, from a Latin church on Martin Luther King Jr. Blvd. and Nebraska Ave., and La Primerisima 89.3, from just north of the Ybor City area—both shut down by the FCC. "The feds refrained from brandishing weapons this time around."

IN East Chicago 87.9 (March, p. 5, col. 1). "A record company put it on the air; 87.9 is clear now."

KY Munfordville WMCC 102.3 and WLOC 1150 AM. Had been relaying WLRS 102.3 Louisville. "Silent pending purchase to Royce Radio."

ME Dennysville WHRR 102.9, but expected on this summer under ownership of Pilot Communications. [tion 87.9]

NY Brooklyn Radio Moshiah and Redemp-/NY "Pirate Jenn" 88.7 from Manhattan's Lower East Side, using the nonID "Steal This Radio" pulled its plug after the FCC threatened to seize its equipment. The 20-watt station is fighting back, claiming to have returned to the air "just minutes after suing the FCC, Attorney General Janet Reno and the Justice Department" over so-called free-speech rights. "We're here today to make the FCC answer to the Constitution because we have the right to communicate," STR co-founder Greg Reggierie said at a news conference, reported by the Associated Press. The station began broadcasting in Nov., 1995, but in March, 1998, the FCC received a complaint from Hofstra University, licensee of WRHU \*88.7 Hempstead NY, that STR's signal was interfering.

ND Ellendale K252CW 98.3, as ordered by the FCC, because of KYNU 98.3 Carrington ND.

### FGG FREEZE

The F.C.C. in Washington, DC has put a freeze on all commercial translator applications. We don't know how long it will last.

We had applied to change frequencies in Ellendale, ND and also to move the translator in Aberdeen, but those applications were returned to Windsent because of the freeze. Please pray that the freeze will be lifted soon.

Applying for 97.3, but the FCC freeze on commercial translator applications applies. "Please pray freeze will be lifted and KCGN will be back on in Ellendale by the start of school in the fall."

OH Cleveland "WRVC" (also listed as "WRCV") 89.9—the station that interfered with WKSU \*89.7 Kent OH—had its equipment seized by federal marshals. However, it might have since returned with other equipment. It was operated by Angel R. Dones, who publishes a twice-monthly hispanic newspaper, Nuevos Horizontes. The seizing of equipment came as a surprise because Dones reportedly just settled a civil lawsuit with Kent State University. The station, also known as "Radio Maranatha," has asked a federal judge to give the equipment back, claiming it was never formally ordered to stop broadcasting.

[See stories last month, p. 4, cols. 1-2 and p. 7, col. 2.]

WA Hazel Dell K281AK \*104.1. It is just 20 km north of KRRC \*104.1 Portland OR, owned by Reed College. "K-Love said its translator will be on in the next few months. I couldn't talk with anybody at KRRC (which is usual) to get their opinion. It will be interesting to see how they will coexist, or will KRRC be forced to move? If so, it will be the third time since 1984! They signed on in 1958. The channel here has also been used in the past by pirates, since KRRC's signal is so weak—just seven watts. Most listeners would mistake pirates as the college station."

**SAP/SCServices, Pro Channel Services**

*Symbols are as in the "FM Atlas"*

AZ Phoenix—Corvus supplies radios to the Mormon book stores, but "they don't give us a wholesale price. That means we have to sell the radios way too high for most people to afford." Sells a modified G-E Superadio III

with a Compol (Frank Karkota) board for \$138, and a Sony CFS1055 stereo modified with 92 kHz for \$189.95. SCS frequencies are nontunable. Check out their station list and other offerings, including white clothes for Mormons to wear in the temple at <http://www.ldcreeations.com/marketplace/ldsradio.html#areas>. Also gives the LDS 92 kHz program schedule, Mountain Time.

FL Miami WFOR-TV 4 (AM is in Hattiesburg MS) has weather on itsSAP.  
 WTVJ 6 has a tone and occasional audio in English (had been Spanish), SAP, 78.67 kHz.  
 MINNESOTA—The legislature killed a bill that would have provided funding for new radios for the Radio Talking Book service. RTB wanted to move to 92 kHz statewide and adopt digital technology for its studios.

OREGON—Golden Hours Radio Reading Service is converting statewide to SAP from SCS. It is already on in Bend, Channel 3, and going to Eugene, Channel 7, and soon Portland Channel 10. Expected to leave SCS in a year. "It hasn't been the best signal around the state," said director Jerry Delauney. "It's especially bad around Ashland OR."

PA Avis WQBR 99.9 tU  
 PA Bellafonte WZWW 95.3 t ,R  
 PA Philadelphia WIOQ 102.1 still t(), but adding Clariti Telecommunications International (formerly Sigma Alpha) digital voice paging. The new service may be at another SCS frequency, or might cover a broad spectrum. It is said to be a low-cost, high speed voice paging system "with digital audio quality."

WIOQ is the first station having this system.  
 PA Scranton WNEP 16's pro channel "sounds like it is relaying a public safety scanner."  
 WYOU 22 has NOAA tW on itsSAP  
 WVIA \*44 has WVIA-FM 89.9 on SAP  
 PA Tyrone WGMR 101.1 no SCS (had tM)  
 PA University Park WQWK 97.1 tC, relaying WRSC 1390 AM State College  
 PA Wilkes-Barre WBRE 28 has an open carrier SAP  
 PA Williamsport WKSJ 102.7 t ,T (no tM, 67)  
 WILK 105.1 tX

WI Superior (transmitter Duluth MN) KBJR 6 changes itsSAP from NOAA weather relaying to uptempo foreground music, similar to the Muzak II that was on the 92 kHz of WAVC 105.1 Duluth (now KCCB). "We're playing it off a CD carousel, but it will change to a computer drive. Super I has signed up to receive the music with in-store commercials, and that'll start soon. . . I'm glad the signal is so clear and good for you to test SAP radios with. The SAP equipment is at our transmitter," said general manager Bob Wilmers.

KBJR suffered a fire a few months ago that destroyed its studios. Its programming comes from temporary studios at WDSE \*8 on the University of MN—Duluth campus, with rented offices downtown Duluth, "and we usually have four or five cars at the transmitter site, where a lot of activity is going on." It's waiting for the insurance company to complete its investigation, but indications are its building in downtown Duluth is a total loss. Wilmers told me that nobody complained that the weather was taken off SAP.

BC Vancouver CJJR 93.7 has two ethnics. The 92 kHz is Radio Rim Jhim, East Indian, 24 hours. The 67 is believed to be Apna Sangeet Radio, also East Indian, and available on the Internet in Real Audio. Apna Sangeet supposedly also has a station in Edmonton.  
 An FM Atlas website has been put up by John Zondio in Oklahoma. It's <http://members.aol.com/fmdxweb/fmatlas.html>. When I last checked "bruce elving" 26 entries came up on the Internet.

"I've installed yourElf2Aadapter in my [Radio Shack] 12-604, and am pleased with the results. I didn't realize it would tune as high as TV-Pro," R.R., Jersey Shore PA.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour (at or near top of hour) as required by FCC and*

*Industry Canada*

- CA East Porterville KOJJ 100.5 The Party, along with KTAAs 94.3 Kerman
- CA Sacramento KWOD 106.5 Quad 106.5, The Alternative (from "Quad 106.5")
- CA San Jose KEZR 106.5 still "Mix 106.5," but legal ID is amusing: "Federal bureaucrats list this station as KEZR (pause). San Jose knows us as 'Mix 106.5, Today's Best Mix.'"
- FL Springfield WRBA 95.9 Arrow 95.9 (from "Bay 96 FM")
- GA Brunswick WAYR-FM \*90.7 Way Radio
- GA Waycross WWSN 103.3 Sunny
- IA De Witt KQLI 104.9 Lite FM
- OR Banks KBBT 107.5 The Beat 107.5
- OR Eugene KKT 97.9 Cat Country

**Multi-City IDs in Use**

- CA Lindsay KZPO 103.3 with Visalia, "King's Radio 103-3," still m, along with one Elvis song every 15 minutes. "I wonder if KZPO will cut at least a little into KRUZ (Santa Barbara's) big coverage?"
- CA Modesto KATM 103.3 with Stockton.
- IL Seneca WJDK 95.7 with Morris and other

cities, such as Wilmington and Coal City. Latter are mentioned on a rotating basis. "We try to list them all" within a 32 km area.

**Selected AM Happenings**

CA San Marcos (San Diego) KPRZ 1210 has teamed with Christian Pirate Rock on the Internet to provide contemporary Christian music. "We're going beyond conventional FM broadcasting to offer this revolutionary service in cyberspace," said KPRZ g.m. Mark Larson. CPR can be heard through KPRZ's site at [www.kprz.com](http://www.kprz.com).  
 CA Santa Rosa KMXN 1150 silent, "pending the upgrade of KXTA (115) Los Angeles."  
 GA Alphretta WVNF 1400 has been sold to WNIV 970 Atlanta owner Genesis Communications for \$475,000. Genesis had been operating WVNF under an LMA; both stations have religious formats.  
 GA Atlanta WALR 1340, "Glory 1340," becomes an urban gospel station, distinguished from other religious stations there because it will have no preaching, "Just music. . . 24 hours a day, seven days a week."  
 GA Savannah WSGA 1400 silent, but plans to return with Cumulus Communications taking over. Cumulus also taking over WZAT 102.1, which goes CHR from "rock," and WIXV 95.5, WJCL-FM 96.5-AM and a WSGF.  
 IL Chicago WGN 720 back on top, Arbitron, displacing WGCI-FM 107.5. WCKG 105.9 with Stern is No. 13, at 2.9 up from 2.3. Classical WNIB 97.1 is No. 22 at 1.9 and WFMT 98.7 is tied for 25th place at 1.2, along with WMVP 1000 and WGCI 1390. Leading in morning drive are WGN's Bob Collins and John Hultman and Felicia Middlebrooks on WBBM 780, according to Robert Feder in the Sun-Times.  
 IL Oak Lawn (Chicago) WNWI 1080, having moved from Valparaiso IN, 1800 watts, nondirectional. It "is playing nothing but polka music with no commercials." Making possible its westward move is the deletion of WPOK 1080 Pontiac IL.

IN Portage WNDZ 750 is mainly religious but has ethnic weekends and a "gay Christian program" mornings. "I used to work there and never listen to it any more."

MN Minneapolis WCCO 830 fires afternoon personality and sales person Ruth Koscielak. Advertisers liked the personal attention she brought them. When Anderson Windows asked her to do a personal endorsement, she insisted on a two-hour tour of the plant, then had the windows installed in her house before agreeing to pitch them to her listeners. Some advertisers—like Jeff Byrd of Eagle Realty—have taken their commercials off the air—either permanently or temporarily "until we assess the situation." Byrd said Ruth "was our primary source of advertising, and one of the main reasons we became as big as we are." Eagle spent between \$30,000 and \$50,000 per year with WCCO, "but had canceled all ads to reconsider its strategy." Others defecting were Osseo Fireside Corner, which spent "well in excess of \$50,000 per year." Markman Capital Management, Inc., and Chanhassen Dinner Theatre. WCCO's ratings still keep it first in the market, with little change, although Howard Stern on WRQC 100.3 was down. Stern lost in two key areas—those 25 to 54 and those 18 to 34. Barnard on KQRS 92.5 appears to have gained audience.

NE Omaha KBBX 1420 Spanish AC—the first known Spanish station in Nebraska.

NY Mount Kisco WVIP 1310—There's "nothing left but a burned out studio building. Transmitter hut and towers are still there and operable. I'll bet this dies under the one-year off-air rule."

NC Jacksonville WSTK 910 silent. Expected to return this month with news, talk.

NC Mount Airy WPAQ 740, owned by Ralph Epperson, 76, said to play "true mountain music." That music is defined as acoustic music played by small groups of musicians who generally use fiddles, banjos, guitars and a bass. The music's been dying on radio since 1948, but Epperson hopes to reverse a 50-year trend, saying the music itself "is enduring. Even the sad songs serve a purpose. Certain people need sad songs." Epperson said he's never made much in broadcasting, but did earn enough to buy WBRF 98.1 Galax VA.

OH—The Cleveland Indians games are mainly on AM, but a few FM stations have them. The flagship station, 1220 AM, fades in and out at 50 km, while nearby 1460 suffers from co-channel interference at night. Sometimes the games are pre-empted. "It was a pleasant surprise when I first heard major league baseball on WMVX FM 106.5. Last month, during baseball games the legal ID was often wrong as 'WKNR 1220 AM and 106.5', now corrected as 'WKNR and WMVX Cleveland'." The FM calls are given during games each 10 to 20 minutes during sports play-by-play, as "Cleveland's New Mix 106.5 WMVX." WMVX does sports play-by-play "with stereo generator turned on." FM stations listed as having the games are WMVX, WBNU 93.5 Barnesville, WBNO 100.9 Bryan, WQEL 92.7 Bucyrus, WDOH 107.1 Delphos, WJAW 100.9 McConnellsville, WLKR 95.3 Norwalk, WQKT 104.5 Wooster, WYBZ 107.3 Crooksville (Zanesville).

TX Bay City KFCC 1270 license revoked by the Commission for lack of candor. It had moved its transmitter site without authorization closer to Houston. It lied to the FCC when it said the previous site was no longer available. The FCC said, "Honesty and reliability are fundamental obligations of a licensee."

TX Gilmer KBNB 1060 was not operating the minimum hours, had been silent over 30 days without authority. Therefore, pen pal Roy Stewart of the FCC's mass media bureau sent them a letter of admonishment.

WA Quincy KWNC 1370 silent pending sale.

**DX Doings—An Occasional Feature**

Sheldon Remington in Hawaii elaborates on his record-shattering DX reception from Mexico (see above, "Call Letters," p. 2, col. 2).

I've been an FM Atlas fan for ages—have every edition except the 13th, and have always kept the latest one within arm's reach of the FM receiver.

The reception was from my residence, up the hill in Glenwood HI. Incidentally, I also sent my original announcement and a tape to Glenn Hauser who aired it on his *World of Radio* shortwave listeners' program. A brief writeup will also appear in the May "QST" VHF column.

The Hawaii/West Coast tropo path has been observed, mainly on 144 mhz, since 1958; there is a chapter in "Beyond Line of Sight" (ARRL publication) about early ham results on this path. My first FM DXing here was in June '88, when I heard a dozen southern CA FMs on a hand-held Sony portable. In the intervening decade, I've gradually improved my equipment and techniques. I've thus far managed to log about 200 FMs in Oregon, California and Baja, all at distances between 3800 and 4240 km. I've kept extremely detailed records of every opening, and filled some 80 hours of tape with densely-packed highlights, some of which has yet to be carefully analyzed (bought a mini-disc recorder to help with that process, but it made so many errors, so next I expect to equip a PC with hardware and software to process all those audio recordings). I also keep track of ham ducting reports out here, and will eventually write it up in a lengthy scientific-type report for publication. But that will have to wait the analysis of the tapes, so it may be years away.

You asked about the date of the event: it was, rather surprisingly, an off-season opening, on 1998 Feb. 13 UT (Thursday evening, the 12th, Hawaiian time). The general pattern of the ducting season has a broad peak from about mid-June to early August, containing about 90-95% of the openings. September thru November is next best, but openings have been recorded at least once in every calendar month of the year. I'm the only Hawaiian DXer who

pays serious attention to broadcast signals on this path. As an audiophile, I have always loved FM DXing because of the great sound quality. I've done just enough TV DXing out here to log at least one 3800+ km tropo catch on every VHF channel. I own at least five different models of SCA adapter, but have yet to get the courage to open up this little jewel of a Pioneer car receiver to hook up SCA. I use a car receiver because I live in a rural cabin with only 12-volt solar power—would much rather be using the old TX-9100 instead! Also, I want to eventually put 150 kHz filters into the Pioneer, and add a phaser to null the locals.

Soon I will be moving into my first self-owned house, so I'll finally be able to put up a real tower, and you can bet that the FM-DX antenna will be atop that tower, above the 6-meter yagi and whatever else I stick up there. John Jefferson [in CA] tells me the APS-14 antenna will at least equal a stacked pair of Probe-9s, so I will probably use that as my main antenna, but will erect the pair of Probe-9s on a lower separate mast kept pointing always at the West Coast so I can do instant spotchecks without having to rotate anything. Unfortunately, the new house is near the shore at 30 m elevation, so I expect to hear less tropo openings than at the present 790 m, but I should still have plenty of DX. I can always go portable if it seems necessary.

The website that contained my DX in RealAudio, unfortunately, has shut down, but since Glenn aired about 60 seconds of highlights on his program, those portions may be available through Glenn's archives or via the World Radio Network archives. It is hard to analyze the Mexican loggings because of the language problem, lack of clear IDs, and poor information. Fred Cantu's website at [www.onr.com/user/fcantu](http://www.onr.com/user/fcantu) is not as good as the new Mexican government website (see above, "On Air," p.4). I hope you can add every possible Mexican to your future Atlases—somehow I don't fully trust FM data unless I see it in the FM Atlas!

You asked about stereo for Hawaiian FMs, especially KKCR \*90.9 Hannalei. I have logged this one, with great difficulty (480 km, directly behind 4200 m Mauna Kea, through the 90.7 monster on Maui), but my records are at home, so I'm not sure if I had stereo on them or on the almost-as-difficult 91.9 Kilauea (KAQA) which is parallel.

Your FMaps show some stations on wrong islands, because in Hawaii many placenames occur on multiple islands (Kailua for example). Due to the tall mountains on each island, the lower-elevation FM transmitters do not cover more than a small area, so it's crucial that they be shown in the right place. I know it's impractical to use transmitter site coordinates to pinpoint every station in the FM Atlas, but you might want to make Hawaii an exception to that rule, since there are so few stations here, and there is so much confusion about placenames.

**Petition for Low Power, Class A, TV Service Presented to Commission**

It's not radio, but it has the potential to increase the number and diversity of TV channels, and thereby compete with radio. That's a petition for a "Class A" TV service presented to the FCC by Community Broadcasters, 1600 Aspen Ln., St. Cloud MN 56303.

Class A TV stations would not be unlike low power (LPTV) stations, but with interference and channel protection concurred. A station would be qualified to upgrade from LPTV to "Class A" TV if it met a minimum operating schedule, with at least three hours of weekly programming tailored for the local community. It would have to show that no interference would occur to the Grade B contour of a regular analog or digital TV station. Class A TV stations would, further, be allowed to convert to digital operation. Such stations could apply for full power TV allotments when or if channel assignments become available.

The petition proposes effective radiated

power limits of 10 kw for channels 2-6, 31 kw for channels 7-13, and 500 kw for UHF (14-69).

**Small Print Happenings and FM Industry News**

Micro radio has been the buzz word lately. A protest, led by Stephen Dunifer of Radio Free Berkeley, occurred outside the NAB convention building in Las Vegas. Also on hand was Dunifer's attorney Louis Hicken who claimed microbroadcasting is for the disenfranchised in radio. The NAB is "working with FCC Chairman Bill Kennard to address his concerns related to minority ownership in broadcasting. However, establishing an entirely new service to legitimize pirate broadcasters who flagrantly violate the law would be a prescription for disaster," the NAB said in *RadioWeek*, in an article, "Micro-Radio: Forget About It!"

Several state associations were to have responded to the microbroadcasting "threat" by filing comments of their own to the Commission in response to at least three petitions for rulemaking.

Bruce Quinn of WMRS 107.7 Monticello IN said in his comments to the FCC: "More and more broadcast radio stations in this country are falling into the hands of a few rich men. Average Americans and minorities are finding themselves without a legal means to transmit their ideas by radio." Quinn would create 1) a Class A-1 FM service with 3 kw at 100 m. 2) Any frequency that could support an FM translator should be made available for a low power noncommercial station of the same power and class. 3) The FCC should create a 1-watt neighborhood broadcasting service. 4) Amend Part 15 of the FCC rules to allow the manufacture and sale of devices with an output power of 1/10 of a watt. Those devices would require no license or permit.

The Community Radio Coalition filed comments that would require the new stations to do local public service to keep their licenses. That petition would forbid such stations to function as translators. It asked that applications for low power FM be granted on a "first serve/demand" basis, with powers ranging from 5 watts to 250 watts. It wanted ownership to be only one per entity, although in certain circumstances regular stations might qualify for one of the newer stations. Owners should live within 80 km of the transmitter site. LPFM stations would have to yield to new full power stations, but only if another frequency could be found for them. A minimum of 10 hours of each LPFM's schedule between 6 a.m. and midnight be for locally originated non-entertainment public service programs (9 a.m. to midnight weekends). A minimum of 90% of the programming, 6 a.m. to midnight, should originate from the main studio, rather than coming in off satellite. "The petitioner is concerned that without strict ownership and program origination restrictions, the new service may be usurped by non-local entities, thus defeating its intended purpose as a vehicle to provide local broadcast service." Bruce Quinn told me that the program service proposal by the CRC would "kill" microbroadcasting. Signing the CRC proposal were Thomas Desmond, Jeremy Lansman, William Pfeiffer, Kent Peterson and William Spry. Lansman issued a separate statement saying, "My support of this petition should not be construed to indicate lack of support of other ideas, many of which are not mutually exclusive with the concepts expressed herein."

The FCC is moving ahead with the idea of microbroadcasting, despite the NAB's lobbying efforts. FCC Commissioner Susan Ness said, "Control by the top four radio group owners over total radio advertising dollars in market areas across the country has gone from 80 percent in 1996 to a whopping 90 percent in 1997."

Not only does FCC Chairman Bill Kennard support microbroadcasting, but so might his political opposite on the Commission, Republican Harold Furchtgott-Roth. He spoke at the NAB and said the current inquiry "does not in any way, shape or form" compromise the existing system. Kennard reportedly told the Washington Post's Paul Farhi that the FCC could move to adopt LPFM after the inquiry's comments period ends later this month.

Washington consultant Harry Cole fears that a bunch of moms and pops cranking up their own home-grown broadcast gear will make interference problems that will "increase astronomically." He thinks that minorities will not like the low power stations, being at a disadvantage compared to big, licensed stations in the same communities. Despite the reduction in radio ownership diversity, "it seems actually wrong-headed to address them through some indirect mechanism like the creation of a whole new service. Problems with consolidation should be identified and addressed directly." Comments to the proposal were due April 17, with reply comments due at the Commission May 26.

At the urging of some of my readers, I submitted comments, stating the maximum power of a Class A1 FM station should be 1000 watts, the pre-1961 power level, at 91 m, with spacings, co- and adjacent- channel, being the same as in 1961. No spacing restrictions for second and third adjacent channels, because FM radios are more selective now.

I urged that FM translator rules be broadened, with a translator defined as a device that rebroadcasts a primary station 12 or more hours a day, 6 a.m. to midnight, five days a week. One-fourth of those hours could be for rebroadcasting an FM station other than the station usually carried. Low power FM stations, such as the Class A1s, could function as translators up to 8 hours a day, 6 a.m. to midnight, Monday through Friday, with unlimited relaying overnights and weekends. My proposal is only for relaying terrestrially-received stations, not signals received via satellite. Owners should live within 80 km of the transmitter or studio site. Allow for events broadcasting at ERPs up to 50 watts. Let nonlicensed stations exist, provided they do not interfere with other stations.

"This proceeding by the Commission is a breath of fresh air. It could well bring diversity in broadcasting by allowing long-time FM translator licensees like myself and others who are not large group owners of stations to create truly local, service-oriented stations. We know our communities and are poised to help bring good service to areas that the big broadcasters tend to ignore. Whether commercial or noncommercial, good radio is local radio, and this proceeding will do much to help make radio a local medium."

Public Radio International said it's signed up its 600th affiliate, just before observing its 15th birthday. PRI is the web that brings us Garrison Keillor, Michael Feldman's "Whad'Ya Know?" and "Marketplace" (its most listened to program with 3 million tuning in). PRI's rival National Public Radio is losing its chief executive. Delano Lewis said he's leaving the web later this year—after 5 years at the helm. Lewis turns 60 in

November, and says he'll work on a book with his wife, do some teaching and lecturing.

Here's a follow up to the story last month (p. 8, col. 3) about two

OPIE

WAAF Worcester MA 107.3 hosts falsely claiming Boston Mayor Tom Menino had died in a Florida car accident. The afternoon team of OPIE and Anthony are out of jobs, GM Bruce Mittman was suspended

ANTHONY

for 30 days, and program director Dave Douglas was suspended for a week. American Radio Systems President Steve Dodge apologized publicly for the April 1 hoax.

This firing might position the pair for a higher paid job in a larger market because "shock jocks" are in demand. However, M Street Journal editor Tom Taylor thought the stunt will hurt them and the station. "We have an inevitable collision here between creative people wanting to do cutting-edge stunts and economic reality with stations worth, in WAAF's case, tens of millions of dollars."

Jacor has acquired a seventh station in the Dayton area—WLSN 106.5 Greenville OH. It's paying Nick Bodi \$3.4 million, with Jacor beginning an LMA. Other area stations for Jacor: WTUE 104.7, WMMX 107.7, WBTT 94.5, WLQT 99.9 Kettering, WXEG 103.9 plus WONE 980. WONE and WTUE constituted the old "1-2" combination in Dayton.

Adverse fallout of Howard Stern being on CBS owned and affiliated TV stations in late night—Dr. Laura Schlessinger abruptly ended conversations with CBS on hosting a show. Her office responded with a statement that Eyemark's programming is "morally incompatible" with hers.

Soon you'll be able to reserve call letters electronically—just like you can send e-mails to the Commission. And you'll be able to check call letters' availability. Watch for the FCC to announce the online system that'll allow you to do that.

Shaw Communications, based in Calgary, is reporting a \$2 million (CDN) increase in radio revenues compared to the previous full year. Shaw notes its operating margin in radio decreased from 26.4 to 20.8 percent. Recently-acquired CING 107.9 Burlington ON is "approaching break-even" status.

Ed Christian of Saga Communications has roots in Iceland, and now his company has bought a 50 percent share in that country's largest radio group, Finn Midill, Ltd. Reykjavik, the capital, has nine privately owned FMs, with Finn Midill owning five of them, with a sixth "coming soon."

[The above seven stories were taken with permission from the "M Street Journal," "Radio's Journal of Record." Their M Street Radio Directory should be available in about two weeks. At last checking, the book was at the printer. It goes out with subscriptions or can be separately ordered from the M Street Corporation, PO Box 23150, Nashville TN 37116 (note new address); (800) 248-4242. See last month, p. 8, col. 1 for price information.]

Afternoon personality at KGON 92.3 Portland OR Bob Anchetta was let go, with ex-listener Thom Rasmussen, writing a letter to the editor of The Oregonian: "I hope Portland knows what they are missing by not having Bob

Anchetta on the air. I know that KGON and KKRH [105.1] have lost this listener for good." Pete Schulberg mentions in his column that Anchetta was let go in 1997 after 25 years at KGON, when Entercom bought it. He then moved to KKRH Salem-Portland OR and was there a year until Entercom bought that station, and was fired again. "With Entercom owning two classic rock stations in a single market, KKRH is softening up its music format—less Led Zeppelin-type fare," writes Schulberg. "My poor friend," writes a correspondent. Entercom also owns KUFO 101.1 in that market.

KUFO has begun selling "play for pay" to record companies. By giving, say, \$5000 to a radio station, so many songs by a record company are guaranteed airtime. KUFO began its playing of the Limp Bizkit song by saying, "Brought to you by Flip/Interscope." An FCC spokesman was concerned that that might not be sufficient to inform the public that the playing of the song was paid for. Other record labels are interested, and the public supposedly "hasn't noticed" the promotional playing. Watch for this practice to spread to other stations and other formats. Schulberg said you the listener will be able to play your own "Name That Tune" and try to decide "if the song you're hearing is just a song or a mutated form of commercial."

Long-time radio retailer Electronic Equipment Bank has quit that part of the business, according to Dick Robinson, company president. A division of the former company will exist to sell office products only to commercial and government entities. Slow sales in consumer electronics was cited as the reason. Another company that sold radios and books like the "FM Atlas" was Gilfer Shortwave out of Park Ridge NJ, which has also closed.

WMHT-FM \*89.3-TV took in a record \$518,000 in pledges from 6091 callers in their recent fund drive.

A three-judge federal panel deemed the FCC's rules requiring affirmative action in the hiring of minorities, but not necessarily the hiring of women, are unconstitutional. The broadcast industry is probably eyeing the report from the U.S. Court of Appeals with glee, but NAB President Eddie Fritts said he's confident stations will continue to diversify their workplace. The FCC has until May 28 to decide whether or not to appeal to the U.S. Supreme Court.

NAB '98 broke all attendance records, with 104,805 attendees exploring exhibits from 1307 companies. There were 22,654 international attendees, and news media attendance was 1750.

Broadcasters donated \$6.85 billion in public service announcements last year. The total includes both radio and TV. And, in a meeting in Washington, a group of NAB members let the Gore Commission know about it. That commission was set up to examine public interest obligations of broadcasters. But Clea Simon of the Boston Globe said such service is required by the FCC for a station to keep its license, because of the Communications Act of 1934, as amended. The mandate comes up at license renewal hearings. "But it is maddeningly unpecific. . . Radio stations do not have to meet any quantitative requirements—no particular number of minutes or dollars worth of time—for either the FCC or the National Association of Broadcasters." An earlier FCC requirement that stations address five to 10 issues each quarter was eliminated in the early '80s and never revived. . . So, while the dollar amounts listed. . . are

impressive, they should not be used simply to improve the image of . . . commercial broadcasters. Let them, instead, be seen as a baseline with which to compare other programs and possibilities, an opening statement for a national discussion. Because these special programs, these fund drives and free spots are not charity, they are the law."

Subcarrier data news—a committee quits and a revised 57 kHz RDS standard is adopted in the U.S. The activity of the former high-speed FM subcarrier committee was suspended.

Back in 1993, with the adoption of the RDS standard, broadcasters feared insufficient data capacity at 57 kHz. It was then decided to go for a second data standard for higher rate systems. Three systems evolved, but proved to be mutually incompatible. The committee showed that no single system can do all that various users of FM/SCS data might want done. Two factors militated against the committee's work: 1) Some data suppliers used proprietary technology and refused to be part of the study. "This was a contentious point throughout the NRSC's (national radio subcarrier committee) deliberations." 2) The unprecedented consolidation of the radio industry, as the result of the Telecommunications Act of 1996. "Broadcasters and especially broadcast engineers have been very preoccupied with the consolidation of their facilities and re-engineering their plants."

The NRSC did see to it that the FCC's EAS coding structure can go into the 57 kHz RDS signal. Through an "open data application" characteristic, new features can be added to the RDS signal without needing to get the standard modified.

According to the Consumer Electronics Manufacturers Association, there are 62 different RDS radios on the market in the United States. More are expected by the end of the year. "RDS radios are currently available in many popular vehicles, including most Cadillacs, Ford Explorers and Ford Ranger Trucks." A Delco engineer told me there are 59 satellites sending out global positioning signals to cars having a silver-dollar sized antenna. That antenna ideally should be in the center of the car's roof, but consumers don't like its appearance there, "so we have to hide it, sometimes inside the dash. It works pretty well there." Some 717 FM stations are said to have the RDS feature. For a list of stations and available radios there's a website at <http://www.cemacity.org/rds>.

The NAB asks stations sending out an RDS signal to be sure the automatic clock feature is accurate at the station. Some consumers have complained that the clocks in their cars are inaccurate. "The encoder's clock time is sometimes inaccurate because the station has simply never set it. Other times it is inaccurate because the digital clock circuitry in the encoder has drifted over time and is no longer accurate."

New president of the National Federation of Community Broadcasters Carol Pierson (pictured) has worked in their offices in San

Francisco since 1996, was program/production director of KQED-FM \*88.5 there 1985-95, at WGBH \*89.7 Boston '76 to '84, and at WYSO \*91.3 Yellow Springs OH '73 to '76. She fits the San Francisco stereotype, having served on the boards of the National Lesbian and Gay Journalists Association and Western Public Radio. She mentions in the NFCB

newsletter about possible liability if a station broadcasts material promoting the use of drugs. FCC regulations are vague in that area. If your station has someone who comes and promotes drugs, chances are somebody will complain to the FCC. An occasional "borderline song probably would not get you in trouble—but there are no guarantees. So proceed at your own risk!"

KDNK \*90.5 Carbondale CO has forged a mentorship with a Hawaiian FM station. It happened last year in Lincoln NE when Brenda Stolbach of the CO station met Roy Richardson at the NFCB convention. Roy, 51, is "a long bearded" person "who used to live in Aspen in the early '70s. Roy was trying to start a station in Hanalei Bay HI, Kauai. After sending as much help as possible to prepare our sister station KKCR for their first on air membership drive, Roy offered to put me up in a beach house and provide me with a rental car if I could get to Kauai. . .

"Our mission: help KKCR [\*90.9] raise \$28,000. We begged on the radio, told them about KDNK, offered a trip to Colorado. . . They raised the money and are off to a strong start. We got a perspective on another station's approach. These folks have state-of-the-art equipment, a very small music collection, and only a handful of volunteer programmers. . .

"The concept of community radio exchange started here. We sold a week in Kauai at the Labor of Love Auction. KKCR gave away a ski vacation to Aspen." Businesses contributed to the Aspen trip, including Snowflake Inn for lodging and four days of skiing and equipment rentals. "Look for the winners of the trip, Dr. Zimmerman and Dr. Zimmerman (Kauai locals who are both doctors) when they come to town.

"The Hawaii exchange is hard to top but we hope to foster more community radio networking even if the stations are in slightly less exotic locations. . . I wonder if there's a community radio station in the American Virgin Islands?"

A community broadcaster feeling the heat of the FCC: KNON \*89.3 Dallas fined \$5000 for broadcast announcements by a noncommercial station that promote the sale of goods and services for for-profit entities.

WUGN \*99.7 Midland MI regrets the loss of morning show co-host Lee Welch, 46, who died in a car accident. "This is a great loss for us," said g.n. Peter Brooks. "Lee was a true friend and brother in the Lord to each of us on staff."

WBCL \*90.3 Fort Wayne and its relayers concluded its 1998 sharathon with pledges coming to \$888,868, exceeding its goal by nearly \$24,000. The two-day event had 5510 listeners calling to donate. Now, if public and community stations could do so well in such a short period of time! The manager of KUMD \*103.3 Duluth, Paul Schmitz, told me religious stations do so well because of a perception that God is on their side. I still maintain that secular stations could learn a lot about fundraising by learning the techniques of Christian FM stations. Perhaps they could try a program or personnel exchange. WBCL recently provided Easter baskets to about 450 needy families in the area in its annual food drive. Radio listeners provided the money for the food items during a five-week period. The WBCL stations provide an 80/20 mix of inspirational

music and talk/news.

The Children's Broadcasting Corp. announces it's selling almost all its [AM] stations. Those include two in the Minneapolis market—WWTC 1280 and KYCR 1570. WWTC has been the host station for the network. Stations are being sold for \$57 million (that's \$5.7 million each—what one observer called a "super inflated figure"). Buyer is the Catholic Radio Network of San Diego. The deals are expected to close in September. "For years, Children's Broadcasting worked to develop a children's radio network. However, sluggish advertising sales, and a pending legal dispute with Walt Disney Co. and its ABC Radio Network, Inc. forced the cash-strapped company to put its radio stations up for sale last year," writes Melissa Levy in the [Star-] Tribune newspaper. There's a local book out by Jeff Lonto, *Fiasco at 1280*, available at certain B. Dalton stores at \$8.95. The new network will feature a 24-hour talk format geared to "Catholic Family Values."

"Presumably 'Beat Radio' will end on these former Radio Aahs outlets," muses Phil Boersma.

Following the death of Junior Hernandez (Feb., p. 12, col. 2), NY's Mega 97.9 retained Hernandez' former partner, Luis Jimenez, and added a co-host, Epi Colon. Jimenez said, "He's not replacing Junior. This is something new we're doing. Colon was selected from a talent search throughout the U.S. and Caribbean. He'd been a midday host at a San Juan station, which is not identified in the "New York Post" article. At a news conference Jimenez had to translate for Colon who speaks no English.

COLON

A radio merger the Justice Department challenged in court was abandoned. Chancellor Media decided not to wage a fight to acquire for \$54 million four radio stations owned by SFX Broadcasting on New York's lawn-guy-land. Chancellor already has two stations there. Combined, it would have more than 65 percent of the local radio advertising market. Capstar Broadcasting was thus allowed to go ahead with its \$2.1 billion planned acquisition of SFX. But Capstar agreed to sell off four SFX Long Island stations and four in Greenville SC and one each in Pittsburgh, Houston and Jackson MS. And CBS agreed to sell four stations in Boston (including WAAF 107.3 and 3 AMs), two in St. Louis and one in Baltimore.

The Wisconsin Broadcasters Association joined 37 other state groups in protesting micro radio (see above, p. 8). Through the law firm of Fisher, Wayland, Cooper, Leader & Zaragoza, the response said, "Petitioners do not talk about public trustee responsibilities, only of the right to grab a microphone and talk. As the pirate radio broadcasters have taught, a \$300 investment in equipment provides no insurance of responsible conduct whether one talks about FCC rule compliance or matters of content and privacy. The enforcement problems likely will be catastrophic for the FCC and the nation's courts. Th Commission already has an orderly procedure

for establishing new full-time radio stations. [The new service would be] so inferior in every respect that the proposed service would make a mockery of the word 'broadcast'. The Commission should, therefore, decline to take further action in this proceeding, a proceeding which threatens to overwhelm the Commission's resources and jeopardize the Commission's regulatory regime." Seems odd the broadcasters want regulation in this area, but nowhere else.

The number of FM stations has grown by nearly 2000 since 1990, while the number of AM stations have declined for the first time, according to Arbitron research. More than 1950 stations, or 40 percent of rated stations, are in superduopolies. A superduopoly is defined as three or more AMs or three or more FM stations that are co-owned and serving the same market. The percentage of stations in just plain duopolies (two stations in the same service in a market) was 65.3.

It's not just in Windsor where legal radio duopolies can occur in Canada, but they can now happen across that vast land. Broadcasters can own up to two AM and two FM stations in big markets, and a total of three stations in markets having seven or fewer stations. But they must play more Canadian music—35 percent Canadian content, up from 20 percent. Also, the CRTC will no longer protect money-losing operations. In the past, if a channel could be opened, it would not grant the channel if the stations in that market were not profitable

The CRTC has shied away from doing anything about Howard Stern. It had been feared that the Canadian content rules would apply to spoken-word programs, which would have forced Howard off the air in that country. The CRTC noted, in a carefully-worded statement, that stations like CHOM 97.7 Montreal which carry Stern still have "very low levels of non-Canadian programming." But regulation against presenters like Stern can still be pursued on a "case-by-case" basis. Regulators appear pleased that the Canadian stations have used editing to remove content offensive to their listeners.

Toronto is a much larger market than nearby Buffalo, according to K.W. Walter. "In the Golden Horseshoe around Greater Toronto, there are more people than in the entire state of Minnesota [and it is] larger than Cleveland or Pittsburgh. . . Even B.F.E. seemed surprised that CIDC 103.5 Orangeville after moving its transmitter 16 km closer to Toronto acts as a big city station. It is significant that even people in the Greater Buffalo area have succumbed to being a suburb of the megacity. WNEB \*17 Buffalo now advertises its logo as Buffalo-Toronto. . . Who knows—even in the dim, dark past when B.F.E. was in Syracuse, he may have been more impressed with cities like Rochester and Buffalo, and didn't realize the large population agglomeration just over the lake, and its long term effect with continuing dynamic growth?" [I can remember leisurely stopping at Grimsby Beach and enjoying the solitude of Lake Ontario. Now that place is a thriving marina, probably part of Greater Toronto.]

CBL \*740 Toronto will continue a simulcast with the new CBLA \*99.1 for six months, but for now CBC Radio v-p Harold Redekopp has discovered FM: "It's a great, great, great moment for us. The new signal is terrific—it's absolutely pristine." Despite CBL's venerable history, Redekopp sees no cause for tears over its impending retirement: "The 740 frequency has served us well. . . It is a very good channel in non-urban conditions. But most of our listeners are in urban areas, where they get a lot of interference. I don't think there's room for nostalgia here."

During Cam Finley's tenure at CJRT \*91.1 (see story Mar. p. 12, col. 3) the listenership more

than quadrupled, and he spearheaded the move of the station to its modern facilities on Mutual Street in 1992. He never allowed the station to go into debt. When asked what he'll miss the most about the job, he said, "The people [but] of course, I'll stay in touch because I'll be listening."

It was "instant fame" for CIGL 97.1 Belleville ON's Peter Thompson. "He was flying his vintage Aeronca aircraft when the fuel line froze, the engine died, and he had to make an emergency landing on a beach at a provincial park. He landed fine, but then the landing gear dug into the snow and the Aeronca flipped. There was about \$10,000 damage but Peter and his passenger were unhurt. The fame came when photos were transmitted across the country," writes Jerry Fairbridge in Canada's BTMP magazine.

Fuller-Jeffrey owns 10 stations in Maine, and is adding WCLZ-FM 98.9-AM Brunswick, but promised to leave the formats alone. However, of the 10 stations it owns in ME, there have already been six format changes, according to Bob Gilbert.

In Portland is (or was) an all '80s unlicensed station on 97.3, calling itself "I-97.3." It airs or aired very little talk, and used to run around the clock. Lately, it's been intermittent, prompting speculation the operator is worried about getting nabbed. Its power was estimated at 10 watts, from southeast Portland.

Several legendary New York disc jockeys joined about 24 of their peers in an induction ceremony at the Rock & Roll Hall of Fame in Cleveland. In the new group are "Cousin Brucie" Morrow, Harry Harrison and Dan Ingram, all on WCBS-FM 101.1, Ron Lundy and Scott Muni formerly of WNEW 102.7, and Joey Reynolds, now on talk WOR 710 AM.

An alternative Atlanta newspaper, "Creative Loafing," had a feature on local radio. In it, the old idea of moving WHMA-FM 100.5 Anniston AL to a suburb of Atlanta is revived: "When Susquehanna Media Co. (99X's corporate owner) launches its second radio station here by mid-1999 [?], it will become the 23rd Arbitron-rated outlet in metro Atlanta. Having purchased a country station in Anniston AL for this move, the station will likely debut in Atlanta as a Triple

A formatted station." Nick Lomardi says to look at FM Atlas-14, 1992. "Why would the FCC approve the move this time?"

The BBC has completed its move to Boston. No, the whole British web isn't defecting to the United Snakes. It is only "The World" that's moving. A public radio program by that name has sent its five-person production staff to reside in cubicles at 125 Western Ave., home of WGBH \*89.7. Brian Jarman heads the BBC staff in Boston. The program is an international effort, beamed by satellite, and heard in the Boston market at 4 p.m.

Alan Haber announces that the publication "Tuned In" is quitting. It started as *Radio World Magazine* in September, 1994 and reborn as *Tuned In* in January, 1996. "Market conditions and other forces of nature" were mentioned as reasons for the magazine's folding. Subscribers were encouraged to get the expanded "Radio World" magazine. An article in "Tuned In" mentioned radio stations using the Internet. Some, like the Y-107 stations in suburban New York, try to reach listeners at work. "A lot of stations can't reach the skyscrapers, and in some offices the boss chooses the station. Now, you can just plug in your computer soundcard at the office and hear Y-107," said Jason Steinberg, director of marketing and promotions.

According to a study, 50-70 percent of listeners to radio on the Internet are actually local listeners, who don't happen to be near a radio. "This offers a tremendous advantage to local stations, as they have the opportunity to grab a section of another station's come and recycle them," said Brian Burns, director of programming for SFX stations in the Raleigh NC market, including WDCG 105.1, WRDU 106.1, WTRG 100.7 and WRSN 93.9.

FM totals from the FCC as of 3-31-98: 5591 (92.1-107.9 mz), 1961 (88.1-91.9 mz). AM 4724.

From the classifieds: RDS/RBDS "Mini-Encoder": With this simple, dirt-cheap encoder, your station can begin transmitting the more important radio-data IDs, service flags and text messages. Use any PC to quickly and easily enter your station's call letters or "street name," etc. Installs in minutes, locks to any stereo generator and works in any FM transmitter. Ask for model 701, \$390, Inovonics; 1305 Fair Ave., Santa Cruz CA 9500; www.inovon.com.

General manager KRZA \*88.7. It has a full time staff of three and a \$170,000 budget. Two years of noncommercial radio experience and a knowledge of Spanish would be helpful. Contact Debbie Nichols or David Sommerstein, KRZA, 528 9th St., Alamosa CO 81101; or e-mail david@krza.com.

General Manager WDBA 107.3 DeBols PA—a 50kw commercial Christian station. Minimum of five years experience, on-air abilities and production skills a must. Resume and salary history to Dan Brownlee, RR 5, Box 220, Brookville PA 15825.

Racom has announced an Automatic Voice Station Identifier to give your station an automated ID. That's just what the CBC relaying stations of Canada need! Contact Racom in Cleveland at (800) 722-6664.

Manager, assistant manager, staff for various stations in the southeast U.S. New, up-and-

coming please apply with resume to President, Positive Radio Group, PO Box 889, Blacksburg VA 2403.

FM FORUM

CONTRIBUTIONS FROM READERS

WFUV \*90.7 New York would like to complete construction of its tower, but is opposed by the New York Botanical Garden across the street. The station claims reception is difficult in downtown Brooklyn, "and a new tower would open up new neighborhoods on the Lower East Side and past the East River." WFUV, founded in 1947, claims 200,000 plus listeners a week. Its most popular weekend program is "Celtic Sounds," with Irish music that supposedly appeals to 60 percent of its listening audience. Two students host the program, which has been on 25 years. "The music is rah-rah Irish, green beer music," said Jennings whose first name was not revealed in the article, but must be Ralph Jennings, its general manager.

Raymond Nahl of White Plains visits a friend in Bronx, who lives half a kilometer from the present WFUV antenna. From a terrace on the 20th floor, "I could see the red light on the WFUV antenna which appeared to be lower than where I was standing. . . The ERP signal is too close to people where it is now" which presents possible health hazards.

Fred Vobbe visits a town 70 km N. Detroit. "I was doing a search in my parent's hometown of Altamont MI for an FM channel. I found something that is pretty clear, but it's blocked by Canada. The frequency is 94.3, which is for Chatham ON. I can only speculate that Industry Canada is holding that for CFCO 630 when they vacate AM sometime in the future. I would love to get hold of that frequency as I would build a station in Altamont in a heartbeat."

"Thank you very much for the extensive quotation in the February FMedia!" writes Charles S. Fitch (see pp. 9-10 of that issue). "Let me know if any of your readers send in corrections." He e-mailed a WITH-FM 104.3 Baltimore red verification card from 2-2-63, having the Forjay head with lightning bolt running through the mouth, and typed in FM power of 20000 watts.

Jim Duncan's American Radio publications catalog is out. His publications

include *American Radio, Duncan's Radio Market Guide, Duncan's Radio Group Directory, American Radio—Small Market Edition*. Prices range from \$55 to \$97 for the books, or \$335 for "The Facilities of American Radio," with FM signal coverage comparisons for 1300 stations in the top 100 Arbitron markets. Contour maps for stations' 70 and 60 dBu signal areas are given, with tower locations marked. Produced by J.T. Anderton, the cost is \$335. Subscription packages range from \$275 to \$95. For more information, PO Box 8446, Cincinnati OH 45208-0446; <http://www.duncanradio.com>.

"A few comments" on new stations by Russ Edmunds: "Re: 88.1 translator grant to Macon GA (Mar. p. 1, col. 2): WJSP-FM \*88.1 Warm Springs doesn't put in a lot of signal into Macon, although one would think that it might. I don't anticipate any problems here.

"Re: Grant to Machias ME 101.1: If this ever gets on, it'll be a surprise, and a bigger one if it lasts. The area is so poor that WALZ 95.3 was silent, closed its AM for good, and now mostly relays WQDY 92.7. Many other AMs have gone silent and then failed, and FMs have gone silent time and again. . .

"Re: AFA's application (FMakings) for Coatesville PA on 89.3: This is another of their questionable tactics—scan the new applications, find an area you like, then file an identical and competing app., using as much of the work done by the initial applicant as possible. They've done this before, and so has at least one other religious broadcaster."

Martin Wischniwick, who works at a New York city area Radio Shack, told of an FM-AM tuner/amp he likes that has been discontinued. I managed to buy a demo for \$79.95 of the 31-1991 model. With it I received a double-length warranty, since it was a demo. "Very good item," said Martin. I improved it by installing 110 kHz filters for more FM selectivity. Now the DX-390 with FM-AM-shortwave is being closed out at a reported \$99; this is the same as the Sangean ATS-808.

An article by T.L. Ponick in the Washington Times entitled, "Radio is New Polluter of the Air," mentions the loss of jazz on WDCU \*90.1 and the appearance of WCSP-FM. "C-SPAN works well on

cable, but on radio, the dryasdust format has ratings headed permanently South." Classical stations like WGMS 103.5 play selections of five minutes or less. Even public stations often stick to five-minute newscasts. "Once upon a time, the FCC watched over the airwaves, regarding them as a public trust, and even occasionally challenging a licensee on its programming. But deregulation seems to have swept the FCC into irrelevancy where radio is concerned."

About Howard and AOL (March p. 8, cols. 1-2), a reader says: "Yeah, AOL currently advertises only their long-distance service on Howard's show" (although even those ads may have stopped). AOL, after all, is pretty "moral." They have "hundreds of AOL-only message boards, including a few dozen Christian ones, where any obscene posts are removed (unlike Usenet where even the religious groups are overrun with junk posts). And AOL kicks people off for using objectionable words in their chat rooms and forums. Howard is an AOL user, and about a year ago his account was temporarily suspended because his two older daughters (then 11 and 14) used naughty words during a chat session and somebody reported them! . . . Thanks for the DX tape. I was especially impressed with how clear WNYC-FM \*93.9 sounded from Duluth!" [That tape is still available from me at \$8; it includes about 15 minutes' worth of long-distance receptions from Duluth MN and even more time on it with receptions from Kearney NE, \$8 postpaid, specify cassette or reel-to-reel at 7½ i.p.s.]

Bill Cheek updates on his publications and how to get them (see story, March, p. 11, col.3). His "World Scanner Report" is an excellent how-to publication for scanner fans who like to install modifications, or who listen a lot. It comes out 10 times a year, and is \$20 for a half year or \$35 for a year. He has selected back issues and samples at \$5 each to U.S. addresses, \$6 Canadian, \$7 other foreign.

His books include "Scanner Modification Handbook," Vol. 1 \$18.95 plus \$5 shipping and handling; "Scanner Modification Handbook," Vol. 2 \$18.95 plus \$5, and "The Ultimate Scanner Cheek 3" \$29.95 plus \$5. CA residents add 7.75% sales tax. He's at PO Box 262478, San Diego CA 92196-2478; (619) 578-9247, e-mail bcheek@san.nr.com

An old-time broadcaster is Elmo I. Ellis, former program director and manager WSB-FM 98.5-AM Atlanta. He writes for a suburban group of newspapers, and mentions that "unlike today's lean—and often mean—menu of talk and music, there was an era, fondly remembered by old-timers, when you could turn a radio dial and hear a diversity of clean, innovative programs. . . Broadcast managers were personally concerned about what they aired and how it was received by the listeners. . . Contrast that with current reports of radio and TV stations repeatedly violating laws and transmitting objectionable material. Numerous programs contain salacious scenes, excessive violence and ugly language. . . Unlike yesteryear, when each station owner took seriously the responsibility of knowing and serving the residents of a specific community, multiple station owners are remote from most of their audiences and advertisers."

I recall meeting Ellis at an NAB convention many years ago, and mentioned that I enjoyed reading his book, "Radio Station Management," which I still have. Its 1960 edition was co-authored by J. Leonard Reinsch. I even loaned the book to some managers of commercial stations in the '60s. Sol Taischoff, late editor of "Broadcasting" magazine, wrote in the foreword: "There are now more radio stations today (some 4000) than there are daily newspapers (some 1750). A town that used to boast a weekly newspaper now has one or more radio stations. Radio has become a basic news medium. 'Radio Station Management' emanates from a happy shop where team operation is practiced with a passion. The operating standards and programming criteria invoked under Reinsch's direction have established the stations in the Cox Group among the nation's best."

In their book they picture the NAB of long ago: "The National Association of Broadcasters was founded in 1923 as the broadcasters' trade association. Its issuance of a code of ethics for broadcasters has had a beneficial effect upon the entire industry. The code deals with standards of good practice and is concerned with the types of commercial announcements and programs, their quantity, length and quality."

Some FM stations are cashing in on the CD craze—by making their own. In the Los

Angeles area KPFK \*90.7, "Star 98.7" KYSR, KLOS 95.5, and KKBT 92.3 have produced CDs. They're selling the discs, using them in promotions or giving them out to benefit charities.

"Fresh Air" is a program aired on many NPR stations. It is hosted by Terry Gross, 47 (pictured). She was featured in a New York Times article, as doing a daily

one-hour [monophonic] interview program that began over 20 years ago. She guesses she has done 10,000 interviews. "Yet each one seems to begin a tale from the beginning. Though the show is conducted mostly by remote hookups, the atmosphere is invariably intimate and open. Ms. Gross is characteristically eager, but not naive." Her program started as a local show at WUHY-FM (now WHYY) \*90.9 Philadelphia in 1975. It went national in 1985 and daily in 1987.

KNXR 97.5 Rochester MN aired a Radiothon to benefit the local orchestra and chorale. They told me it raised \$40,330 in pledges. The goal was \$40,000.

Most of the 1997 17th edition "FM Atlas" books are sold, and soon I'll have to start working on a new edition. General Motors is still interested in analog FM, and bought 12 boxes of the books as classroom references for their training center instructors in the "STG Group," Warren MI.

An article on an FM station in a Geneva newspaper, Tribune de Geneve, was sent to Jean-Baptiste Suquet in Paris, who stayed here three weeks. The translation reads: "One FM" seeks a larger slice of the Swiss French-speaking market. "We are a radio station of young people for the young with a strong presence, especially at parties," One FM director Michel Colin said. The station celebrated its second birthday at its new offices on the "rue des baines." It is a birthday that augurs well for the financial future. It had 800,000 Francs in advertising in 1997, which is three times its 1996 income. However, the station—whose frequency is not mentioned—is not out of danger. [Continues next month.]

Until June,

 MB Pukatawagan CFPX 98.3 35 v, 41 m, 59 hrs. of English, 24 hours of Native language programming per week, Missinippi River Native Communications  
 MB Steinbach 96.7 50000 h,v; Golden West Bcstg. Ltd.  
 MB The Pas CITP 92.7 130 h,v; 41 m, A1, a CINC 96.3 Thompson relayer.  
 MB Winnipeg VF7039 95.1 (had been on 101.1, but moving because of the new CKUM 101.5 coming on the air) 14 watts vertical only, 125 m. Uses the nonID of CKVN, 'which is where I worked in Vancouver, before it was bought by CHUM and changed to CFUN. . . We ID at the top of the hour as VF-7039, but use CKVN-FM as part of our image, since I had jingles, T-shirts, letterhead, etc. before Industry Canada opened up the VF series of callsigns due to the number of applications they ended up processing.' It's an events station, mono., and on the air almost 200 days a year. It plans to be on June 12-20, with on air dates coinciding with veterans' holidays. When on, it operates 18 to 24 hours a day and is noncommercial. Music is m, adult standards, with lots of military band music, 'but not martial music as such. For example, we play the Air Command CD but they do mainly big-band style tunes. Frequently, we play the Air Command Band CD [or] a pipe band during some of the activities for Veterans Week in Canada for example. There sure can't be many stations which include bagpipe music in their format! Other broadcasts are planned this summer, but exact dates are not

**CKVN-FM Home Page**

known, except they'll be on for sure Nov. 5-11 for Veterans' Week in Canada. Transmits from atop a building in downtown Winnipeg, with coverage on a car radio out to 32 km. Its operation was opposed by CJOB

680 AM, and has a website with its history at <http://www.mts.net/~ckvnmf>. Its licence allows for up to 28 days' broadcasting at a time.  
 NB Dalhousie CIMS-1 96.7 8 v, 106 m, French  
 NB Lameque CBAF-18 \*90.3 930 h, 58 m, d-a, French  
 NF St. Andrews CBNH \*93.7 1000 h, 42 m, d-a, CBY AM Corner Brook relayer  
 ON Crystal Beach \*100.3 320 h, 98 m, d-a, Class A, but to 'change channel,' possibly to 90.5  
 ON Devlin CFNP \*90.1 10 v, 12 m, Naicatchewenin Reserve. 'It's off the air because the manager left. Yes, there might be a job opportunity for somebody. I don't think the station got out very far.' [Baptist Church  
 ON Saint Thomas VF8016 \*90.1 1 v, 12 m, \$, g, Faith/  
 ON Sorel Lake (71 km NW Thunder Bay) CKFW \*99.1 5 v, 15 m, TISation with a tape loop about the Wolf Tree Trail, on air May-October.  
 ON Whitesand (78 km E. Savant Lake) CHWR 89.9 10 v, 10 m, Whitesand First Nation Communications, programming in English and Oj-Cree.

 HI Waimea 99.1 is shown on p. 100 FM Atlas-17 correctly for the translator, but deleted station KAGB belonged on the big island of Hawaii at a place also known as Kamuela. "One-oh-six point one Kahaluu KLEO is not the Kahaluu on Oahu, but rather the one on the Big Island" between Kailua-Kona and Kealahou. "Those are two huge errors; there are numerous smaller errors in the placement of the city dots. The one that has always bothered me, and which I've previously submitted to you, is the placement of the Humuula 103.1 translator (though it's been dark for at least a couple of years [but still listed with the FCC as K276DG 103.1, with 130 h,v, d-a])." Show dot at 50 km east of where the FM Atlas dot is for that translator site. "You've shown it on the west coast of the Big Island, while actually it is in the 'saddle' between the two giant volcanoes. What makes this error especially bothersome is the a) actual site is so high, 2307 m, that it may be the only Big Island station able to 'illuminate' the HI-CA tropo duct at times . . . and b) its target area is actually the southeast corner of the Big Island, which couldn't possibly be achieved if it were located where you show it. I have personally visited this translator site, and observed the stacked yagis beamed southeast. Some smaller dot placement errors include Puueo 100.3 (should be about 5 km ESE), Poipu 95.9 (should be at the extreme S. tip of Kauai), Kaneohe 104.3 and 97.7 (should be at ocean's edge next to Kailua), Kahului 99.9 and 99.3 (should be right up against Wailuku, and well NW of Pukalani), Halimaile (should be where the Kahului dot is), and Maalaea 92.7 (should be in west Maui, west of Kihei, in an area you show as open ocean, but which in fact is the 'head' shape of west Maui—that whole island really ought to be redrawn to show the two bulbous ends with a narrow neck)."

 TX Winfield KALK 97.5 m  
 TX Winnie KOVE-FM 100.7 S, m, parallel to Rosenberg  
 VA Monterey WVLS \*89.7 kr, also folk, gospel, bluegrass and oldies. It doesn't sign on before 6 p.m., with WVMR \*1370 AM in nearby Frost WV providing daytime programming. WVLS gets by on a \$52000 budget made up of grants and donations. It's in Highland County, the state's least populated and highest in elevation, and run from a two-room clapboard building, "built on the high school campus by the local shop class. It has . . . no bathroom. When nature calls the DJs head for the high school across the way, taking care to remember the key."  
 WA Bremerton KRWM 106.9 m, adding Deiliah  
 PR Culebra WXZX 98.7 (S), g

**On Air—Real Stations and Pirates (Selected)**

CA Goleta K295AH \*106.9, receives KMRO 90.3 at low volume, mono, "and continues to be plagued by often rebroadcasting XHITZ 90.3 Tijuana (though no longer with stereo beacon). In its present condition, the translator is of no real use."  
 CA Penryn K203CP \*88.5, licensed by FCC.

CA Wasco area—"Truth Radio" 100.9, from 1305 Glenwood St., Delano CA 93215; (805) 725-2345, "mostly gospel talk, all mono."  
 CO Canon City K210BG \*89.9 "is not deleted. It is still alive and well, and will remain so." However, I contend that this translator will be unnecessary because of the new \*89.1 station there, owned by the same people.  
 CT Bloomfield "Praise FM" 105.3 still on after 1½ years with gospel music and preaching. "It shows no sign of going off the air, even though the FCC knows about them. Also on 97.1 (see below, Amherst MA) is a Spanish religious pirate in Hartford, not as strong as 105.3." The FCC is "cracking down on" a 107.5 pirate in New Haven. "It was started by a man who worked at the 1220 station in Hartford, WXCT, which was Spanish, but now is '40s and '50s music. He started 'Radio Musicales' to bring Spanish programming back to New Haven. I cannot understand why the FCC picks on this guy but leaves Praise Radio alone."  
 FL West Palm Beach "WILD" 96.1, sr, asking listeners to "write the FCC demanding a license for this station."  
 GA Manchester WVFJ 93.3 soon bumps its power down to 27000 h,v; but height up to 491 m, and lower in Newman, "nearly doubling its range into metro Atlanta. Its Arbitrons indicate about 101,000 listeners at any given time, but this is expected to double as its reach into Atlanta significantly improves. It's the only Christian contemporary signal available, except WVEV \*91.5 Cuming. WVEV's signal "is limited primarily to the northern suburbs." By July 4 WVFJ plans to move its studio to Peachtree City.  
 GA Marietta WGHR \*100.7, having moved from 102.5. "They've lost a lot of coverage" because of WUSY 100.7 Cleveland TN. Moved to make way for WAWA 102.5 Mabelton GA.  
 HI Paauloi-Kihehi KNUQ 103.7—has transmitter on Maui, and cannot be received in city of license. FCC rules state that a commercial station must supply a 70 dB/u signal to the city of license, while an educational station (88-92 mhz) only need supply a 60 dB/u signal. Why KNUQ is able to do this is anybody's guess.  
 KY Georgetown WRVG \*89.9 with C2 facilities, and satellite uplink, hoping to be the third national public radio network. "World Radio" expects to compete with NPR and PRI. Their mailing piece mentioned the proliferation of public radio stations, many in the same market broadcasting the same programming. Based at Georgetown College, World Radio will provide "much-needed programming options to stations nationwide." The new web also is seen as helping uphold the principles of **PUBLIC RADIO REINVENTED** Georgetown College locally to: ● communicate and enhance the school's public image, ● contribute to development and recruitment efforts, and ● encourage student participation and training. By fall, a second "station," WGTC 90.5 will be on for the students on campus via leaky cable. "WGTC will become the farm team for our major league franchise: WRVG . . . Soon your favorite radio programs can be heard on WRVG 89.9 FM and on WGTC-FM 90.5 on campus. Our goal: Radio you will talk about!" Last month, WRVG went from 140 watts to 50000 watts. Underwriting on World Radio is about one-third the cost for comparable time slots on other public radio networks.  
 LA De Ridder KEAZ 101.7, despite the FCC saying it "has terminated this station's license to operate." Station says they're working with the FCC to get the license properly restored. [Turners Falls  
 MA Amherst W246AM 97.1, with WFPV 93.9/  
 MA Provincetown WOMR \*92.1 still has March and Band

**PUBLIC RADIO REINVENTED**

**March & Band**  
**WOMR Land of Music**  
**& Forward March**  
**Ernest Cooper**  
 10 - Noon

music with Ernie Cooper, 10 a.m. to noon Saturdays.

MI Walker WQFN 100.5, Twin Lake WBLV \*90.3 and WBLU-FM \*88.9 Grand Rapids—all back on air after having been off for varying periods following the 5-31 windstorm. Some 20 stations were off the air, 10 returned within 24 hours, and the rest took up to 72 hours due to loss of electricity mostly. WTHS \*89.9 Holland is once again Spanish gospel for the summer while Hope College is closed. WBYW \*89.9 Grand Rapids still mono, "Sacred Favorites Radio."

MN Minneapolis KFAL \*90.3 celebrates its 20th anniversary, but its signal is hemmed in by buildings. It transmits from the Foshay Tower, once the Midwest's tallest building. The Foshay is now surrounded by other taller buildings, making KFAL's signal in the Powderhorn Park neighborhood of South Minneapolis, where the station got its start, difficult. Helping is its translator—K294AM \*106.7 West St. Paul MN.

MO Mountain Grove KELE-FM 92.5, having moved from 106.5 to allow KRZK 106.3 Branson become a C2.

NY Brooklyn "Radio Moschiach and Redemption" 87.9 isn't off. "They were off for Passover but are back on now. Before Passover they seemed to have a second transmitter for a time, maybe in Manhattan (see April, p. 4, col. 1). They were really booming in in Queens, but seem to be back to very low power." Later, it was again off, possibly because of the holiday Shavuot.

PA Bethlehem W289AH \*105.7

PA Center Valley W287AI \*103.5 with WBYO 88.9 Sellersville; list as low power (3 watts, 199 m).

PA Punxsutawney WPXZ 104.1, having moved from 105.5.

TX Laredo KBDR-1 100.5. Will be moving to a new tower. It enjoys good terrain shielding from the main signal some 35 km away. Both have 57 kHz DCI for GPS. DCI is a firm, Digital Corrections, Inc. By law, boosters must carry the same information, main and subcarrier, as the main station. The booster is fed by high fidelity, 15 kHz phone lines, while the main station program is microwaved to Mirando City from Laredo. The GPS helps synchronize the audio.

WV Union W218AT \*91.5

WI Adams WDKM 106.1 still k, from the back of a house on the N.E. side of Friendship WI, with no sign outside

WI Wausau W265AG 99.1 [lieved to be a pirate, and on ON Cornwall CKON 97.3 not found on database; be/ ON Tyendinaga "CKWE" 105.9 not listed by CRTC; believed to be a pirate, despite "its fancy website with audio clips!" Its calls actually belong to 103.9 Maniwaki PQ.

EL SALVADOR—FM information there can be looked up on the home page of one Humberto Molina at <http://www.geocities.com/CapeCanaveral/Lab/7104/fmam.htm>.

TRINIDAD AND TOBAGO—listed stations are 90.5 "R. 90.5," 91.1 "R. ICN," 93.5 "Gem Radio," 95.1 "Rhythm Radio," 96.1 "Energy Radio 96.1 WEFM," 97.1 "Music Radio" 98.9 "Yes FM," 100.0 (?) "R. ICN," 102.1 "Power 102 FM," 103.1 "103 FM Stereo," 105.5 "105 FM," 106.1 "Radio 106 FM."

**Off Air—Or Not Yet On**

CA San Luis Obispo KLFF \*89.3—applies for extension of time.

IA Oskaloosa KIGC \*88.7 \*application dismissed for 230 h, 37 m, and authority to operate [at those facilities]

terminated." Believed off air for the summer, remains a Class D station.

ME Islesboro WAYD 105.5

ME Winter Harbor WAKN 97.7

MA Worcester WDOA 89.3 is "dead on arrival" after the FCC took it and Radio Free Allston off the air, but there are two reported Spanish pirates left there, frequencies not available. WDOA's last song, with the FCC looking over the guy's shoulder, was the Replacements' *Left of the Dial*.

*If I don't see you, for a long long while I'll try to find you left of the dial.*

"Mike Malone [pictured] hopes one day his listeners will be able to rejoin him at the 'left of the dial.'"

MI—a Detroit area pirate interfering with WCHB 105.9 was shut down by the FCC. Edwin Raices had been warned and rather than close down, his "La Gigante" 106.3 moved to another location. "FCC agents discovered this location as well, and in cooperation with the U.S. Marshals Service, seized the radio equipment."

MN New York Mills K267AC 101.3—"but keep them in your lists. We want to upgrade and return them to the air."

MN Perham K296KX 107.1 (see above comment).

*Symbols are as in the "FM Atlas"*

AZ Flagstaff KNAU \*88.7 ↑U, 67. I also heard and could separate the ↑Q and the 67 kHz talk on KJZZ 91.5 Phoenix, using a tunable adapter during a recent skip session. Skip also brought in WHYI \*90.9 Philadelphia June 1, with my hearing in MN its ↑Q.

DE Wilmington-Philadelphia PA WHYY-TV \*12 has c on SAP from PRI International in MN in response to the elimination of WFLN 95.7's classical format, "even though the WWFM network went 24 hours earlier." Interrupts the c for DVS in *Mastropiaco Theatre, Nature and Nova*. WHYY \*90.9 Philadelphia still  $\uparrow$ , 67, and is about to sign a contract for the 92, "but don't print anything about that yet." There is no other SAP on VHF in Philadelphia.

DC Washington—FCC Chairman William E. Kennard is interested in video description on the SAP of TV stations, public and commercial. "As you know, video description can help television come alive for people with sight disabilities. I believe the Commission should explore whether providing video description services should be an element of broadcasters' public interest obligations."

WCSP-FM \*90.1  $\uparrow$ , 67, C-Span 2. There's also a different C-Span audio on the Internet.

MA Boston WFXI 25 has Spanish on its SAP. It once had the  $\uparrow$ , RService, now on WGBX \*44's SAP. WGBX has RIS for the blind fulltime. That service originates at Marshfield MA and is on WATD 95.9's 67. It is also on WERS \*88.9's 67. "You're right — the SAP is much clearer than FM radio subcarrier!"

MI East Lansing WKAR-FM \*90.5 uses its RDS at 57 kHz for promoting its programming, such as call letters and use of phone numbers during pledge drives. In the latest pledge drive, "one contributor was moved to donate after seeing the station's phone number on his RDS display."

MN Detroit Lakes KFGX 95.1  $\uparrow$ R,M (not  $\uparrow$ M,R) KRCQ 102.3  $\uparrow$ U, 67

MO Springfield KWFC \*89.1 on new tower at 342 m, d-a, and reaching out much better. Now injects Ray Swafford's  $\uparrow$ 6, 67, at only 5 percent. "Ray wonders why it's so low. He wants 10%. His signal is a little weak; wants to be able to get into Joplin... The people at KWFC are very finicky."

NE Columbus KKOT 93.5  $\uparrow$ , U. Still "Coyote 93.5," but not very strict; usually uses call letters. [AM 880 relaying]

NE Lexington KRWN-FM 93.1 no  $\uparrow$ Z, 67, retains  $\uparrow$ C, 92, KRWN/

NE Lincoln KUCV \*90.9  $\uparrow$ , 67, but signal weak in Lincoln. I received KVNO \*90.7 Omaha stronger in the high rise where I stayed.

NE Omaha KGBI \*100.7  $\uparrow$ 6, 67, Children's Sunshine Network, but running open carrier much of the time.

NJ Trenton WNJO 94.5  $\uparrow$ O, Filipino, "tentatively called Filipino Radio USA. ... So far they play music most of the time with an occasional live segment. They're offering Panasonic radios for \$55. Somebody told me Grace Rustia of Cherry Hill NJ, who operates the SCS, is a distant relative of Lino Cello, owner of Radyo Pinoy, but there's no connection between the two stations." Grace Rustia (ROOST-yah) keeps saying the station is "cable FM," "whatever that means. They're checking out their SCSignal in Philadelphia and south and central NJ. No real problems yet." They say, "Please don't judge us on a test broadcast. If you have something to say, come to us. We want to make friends with you." Phone number "as far as I can make out is (215) 723-0333."

OH Portsmouth WPAY-FM 104.1  $\uparrow$ , R, 92. "It's the only station in the region with musics on 67 and 92 kHz." Is "Power Country 104."

PA Altoona WFGY 98.1 no SCS (had  $\uparrow$ M); WTAJ 10 has main channel audio on its SAP.

PA Avis WQRR 99.9 no  $\uparrow$ U. "Not heard in several weeks."

PA Clearfield WPSX \*3 has a pro channel service.

PA Ebensburg WQKK 99.1 no SCS (had  $\uparrow$ X)

PA Salladasburg WMYL 95.5  $\uparrow$ , U, "chirps."

PA Scranton WGGY 101.3  $\uparrow$ M, 67 (not  $\uparrow$ X)

PA State College WTLR \*89.9  $\uparrow$ M, not  $\uparrow$ X, 67

PA Wilkes-Barre WMG5 92.9 no  $\uparrow$ , R (still  $\uparrow$ C)

SC Greenville WEPR \*90.1  $\uparrow$ O, adding 57 kHz

WA Olympia KXOD 96.1 no RDS. Equipment is on hand, "but is still not installed (and they've never) received any calls from listeners wondering why KXOD does not use RDS."

WV Charleston WVPN \*88.5 still  $\uparrow$ , 67, but local live only one hour in the morning and one hour in the afternoon. Otherwise In Touch from New York comes in via phone lines, "and it sounds terrible." Locally, WKEE-FM 100.5 Huntington still has music on 67, no 92, while WJLS-FM 99.5 Beckley still has music on 67, no 92.

[programs; main channel other times on its SAP.

"I'd cry if you take me off your mailing list," W.B., Durham NC.

## Selected AM Happenings

AR Conway KCON 1230 off air, being donated to the University of Central Arkansas, which will be operating it along with KUCA \*91.3. KTOD 1330 there reported silent.

CA Capitola KMDY 1540—delete.

CA Fortuna KAJK 1090 silent, "due to technical problems and expects to resume this summer," parallel to KAJK-FM Ferndale.

CA Glendale KIEV 870 still has Ray Briem's talk show

3:30 to 5:30 p.m. M-F. That show used to be on ABC

Talkradio. He's had a bypass and fibrillator installed, but

"otherwise in great shape. [He] still likes calls from hams, DXers, etc."

CA Los Angeles KHJ 930 lost one of the original DJs of its "Boss Radio" days from the '60s: Robert W. Morgan, 60. "Top 40 radio was really starting to take hold in the

country and KHJ was a leader in the format. Working with guys such as 'The Real' Don Steele, Wink Martindale and Kasey Casem, he helped set the standard that all Top 40 jocks would go by. I remember him as a 'morning man' when I first started listening to radio. In fact, one phrase that was associated with him was 'Good Morgan!' a play on the phrase 'Good Morning'. After KHJ he went on to various FM stations, ending up at the popular 'oldies' station, K-Earth (KRTH). KRTH started as KHJ-FM (101.1), owned by RKO General (part owner of KHJ-TV channel 9). He had the morning show on KRTH until his dramatic announcement of his illness late last year. Another radio voice is silenced." He was a smoker and died of lung cancer. [See story, col. 1, p. 12, March.]

CT Hartford WDDK (formerly WQDM) 1550 with Radio Disney. "Nobody in this part of town will ever know because we are in one of their nulls and you just can't hear them here [23 km] from their towers in the north end of Bloomfield," M.B. via e-mail.

GA Atlanta WSB 750 stays on top of the Arbitrons, thanks mainly to a foursome of Scott Slade, Neal Boertz, Dr. Laura and Clark Howard. "It's talent and a consistent lineup," said operations manager Greg Mocer. WGST 640 and 105.7's audience grew somewhat after the failed "PlanetRadio" experiment. But WCNN 680 lost half its audience after dumping sports/talk in favor of news/talk. It was "barely a blip in the ratings."

GA Milledgeville WKGQ 1060—license deleted by FCC. GA Savannah WSGA 1400 still silent, but not being sold to Cumulus as reported May, p. 5, col. 3. Instead, it expects to be sold to another buyer.

MD Funkstown WVPV 1160—delete  
MA Boston area WRPT 650 and WSRO 1470 each carry John Napolitano's Moneyworks talk show, prompting speculation the two stations simulcast.

MA Worcester WTAG 580 drops several more employees besides their sports guy Steve Bantle (Feb., p. 7, col. 2).

Morning host Tom Gorham, a 26-year employee, Ann Kenda, anchor of the 11 p.m. local edition of the news let go along with her position, and Skot Pare, another announcer. "Apparently, owners who reside in Texas do not believe that New England's second-largest city needs a late local newscast... Their only concern is for profits and losses, and not for the community. This purge at the local radio station was a terrible occurrence. I challenge Capstar to prove that it is a concerned citizen of the Worcester community," writes David M. Zimage of Sutton MA in Worcester Magazine. [Spanish.]

NJ Elizabeth WBAH (formerly WJDM) 1660, now/ NY Albany WABY 1400—long-time announcer Robert Kretzler died of cancer at 66. He presided over sock hops and spent much of his adult life raising money for charity.

NY Gouverneur WIGS 1230 off the air, reporting they have no plans to return.

NY New York WEVD 1050: Almost anyone willing to pay \$800 to \$2000 per hour can have a brokered show. WEVD is owned by The Forward Association, which publishes three weekly Jewish newspapers. One guy it had on was Bill Bresnan, who gave financial advice. He was canned after going bankrupt twice, owed back taxes, and had two different liens on his paycheck. But "the most egregious of former WEVD hosts is Richard Reynolds, who was convicted by a federal jury of mail fraud and witness tampering after prosecutors revealed more than 70 investors lost a total of \$1.3 million through Reynolds' investment schemes."

NC Lumberton WTSB 580 had been silent; now on with black gospel.

NY Youngstown WTOR 770 is on sunrise to sunset, 5 kw with three 61-meter towers. It has ethnic and classical music. 'No commercials yet. Target is western New York and adjacent parts of Canada.' [listening.

OH Delaware WDLR 1550 had been silent; now easy! TX Cuero KTXC 1600 off air "to allow KOKE 1600 Pflugersville TX to upgrade."

WI Durand WRDN 1430 back on. "Was off two or three times for a week or more while parts had to be ordered for the transmitter. WRDN-FM (95.9) now 24 hours with Smartcaster automation, AM-FM simulcast. We're down to five fulltime people—had nine at one time. I believe radio supplies three functions: 1) information; 2) entertainment; 3) companionship. It is the companionship that is lost when automation takes over. Our FM features modern country, sports and Brewers baseball play-by-play," said Gene Kirchner, president.

WI Hudson WMIN 740 now talk and sports, parallel to WDG 630 Hudson WI, serving St. Paul MN.

VA Norfolk WCKO 1110 silent. Expected to be on in March, "but now won't be on until this summer."

AB Taber CKTA's bid to move to 1090 from 1570 rejected. It would have taken over the CKRX Lethbridge facilities, "adding a low power transmitter at Taber."

**NY Court of Appeals Says WFUV Can Build Tower in Bronx**

Fordham University can finish the 45-story radio tower it started, despite objections from the New York Botanical Garden. Fordham is "thrilled" that it gets to complete the tower, which has been discussed several times in these pages. Construction can't begin just yet—not until the FCC gives its OK. The Garden wouldn't comment on the ruling, nor indicate if an appeal is likely.

**FM FORUM AND SMALL PRINT HAPPENINGS**

Glenn Morris sent a report from the FCC regarding his filing for \*88.7 McConnellsburg PA. That app is up against WSYC \*88.7 Shippensburg PA wanting more power and a new Middletown PA \*88.7 app. He called and FAXed, pointing out a footnote in the FCC comments that mentioned a new partial freeze on noncommercial educational FM applications pending the coming up with comparative criteria.

Chicago radio billings translate to big bucks, according to a Sun-Times article by Robert Feder. WGN 720 AM leads the pack at \$32.5 million, WLIT 93.9 \$23 million, WJMK 104.3 \$22.7 million, WGCI 107.5 \$20.1 million, WUSN 99.5 \$19.8 million . . . WNIB 97.1 \$4.3 million, WFMT 98.7 \$4.25 million, WXCD 94.7 \$4.2 million.

Z-Spanish buys its third FM in Sacramento—KQBR 104.3 Davis; it already has KZSA 92.1 Placerville and KSQR 1240 AM.

Jacor, among other dealings, is buying its third FM in Youngstown—WRBP 101.9 Hubbard. It owns WKBN-FM 98.9 and WNCB 106.1 Niles, plus two AMs.

The deadline for filing reply comments in the microstation proposal at the FCC has been extended to July 24.

Lack of qualified technicians has led to technical difficulties at KDUR \*91.9 Durango CO. Its studio DATs have malfunctioned, and worse, the station missed three days' broadcasting in February. They need \$30,000 for a new transmitter, with a bake sale and on-air fundraiser planned.

The FCC has announced new regulatory fees. They're defined by city-grade signals, and range from \$400-\$500 up to 20000 population and \$3500 to \$4250 for 1 million or more.

CCChairman William E. Kennard told of the decision to appeal the striking down of the EEO rules. "The rules merely require that broadcasters reach beyond the 'old boy network' and consider qualified minorities and women."

From the classifieds: TN high school needs your help in obtaining studio equipment for FM station: A. Williams HHS-AFJROTC, (901) 772-3358.

Until July,

 PQ Sherbrooke \*100.3 2300 h,v, Radio-Soleil Estrie—to relay CIRA 91.3 Montreal  
 NT Deline CBQO \*105.1 170 h, -8 m, CBC, A1, on air.  
**Temporary Stations—not to be found in the FM Atlas**  
 NB Miramichi-Newcastle VF7002 99.9, \$(tereo), 31 v, 15 m, commercial, French—to be on Aug. 16-18.  
 NB Neguac VF7001 99.9, \$, 31 v, 15 m, to be on July 12-25 for Festival du Rendezvous, commercial, French [Festival, July 29-Aug. 3, 31 v, " French  
 NB Rogersville VF7003 99.9, for "Brussels Sprouts/

- AR Lakeview 93.5 KBFY  
 AR Stamps 104.3 KLMZ (Paradise CA  
 CA Bakersfield 96.5 KXXX-FM (KSMJ), sr, AM is in/  
 CA Chester 98.9 KBNF (KCMT), "Cabin," still rm, gold-based AC  
 CA Delano 98.5 KSMJ (KKDJ), j, smooth  
 105.3 KKKJ (KXXX-FM), o. All these three in the Bakersfield market engage in format swaps.  
 CA Santa Ana 96.7 KWIZ (KWIZ-FM)  
 FL Holmes Beach 98.7 WLLD (WISP), "Wild 98.7"  
 GA Metter 103.7 WHCG-FM (WHCG)  
 GA Mount Vernon 101.7 WYUM (WAHZ)  
 GA Savannah \*88.1 WLXP  
 IL Anna 96.5 WKIB (WRAJ-FM), "B-96"  
 IN Lebanon \*91.1 WIRE (WWRE), gk, mono Gospel includes *Focus on the Family* and *In Touch*. "The information on p. 5 (June, col. 1) was totally incorrect, except that we're mono. We never had commercials, and were on a temporary antenna when the FCC came. That was because we wanted to go on the air quickly so we used the temporary antenna and cut our power back. We may have to pay a fine for that." [I have since learned that the FCC is issuing a notice of liability in the amount of \$11,000.] The station's underwriting is 30' maximum, and does not include any price information or calls to action. I know—we have the notice posted in our continuity room about KNON Dallas having to pay a fine. This room is shared by WYJZ 100.9 [formerly WIRE]. There are other stations in Indiana combining noncommercial and commercial facilities, including those in Austin and Columbus. WIRE is not a money-making venture—it's more of a mom and pop type operation for Lebanon. ... Thanks for helping me set the record straight," M. H., engineering consultant, WIRE.

Early in its operation with the temporary antenna there was reportedly some interference with WEDM \*91.1 Indianapolis, which caused the high school advisor and some students to contact the FCC. The advisor, Dan Henn, called and said he's now a supporter of community broadcasting in Lebanon, with the interference problem having been cleared up.

- 100.9 WYJZ (WIRE), light j, "Y-100.9"  
 IA Cedar Rapids 102.9 KZIA (KXMX), "Z 102.9" [Col. 1  
 KS Humboldt 94.3 KINZ. This CP listed twice, Jun p. 1/  
 LA Ball 105.5 KBFU  
 MI Bear Creek Township \*89.3 WTLI  
 MN Bemidji 95.5 KKZY. There's speculation it may be light AC or CHR, but not oldies—a format abandoned by WBJI 98.3 "There's too much risk in going oldies"  
 MS Stonewall 106.9 WMMZ

## Call Letters Assigned

- AZ Hotevilla \*89.1 KUYI  
 AR Colt 102.3 KTRQ (from KQMC) It is moving from Brinkley, Brinkley was misspelled, June p. 8, col. 2

 FL West Palm Beach area—89.5 reggae, no announcing  
 MI Whitehall WKBZ-FM 95.3 and Muskegon AMs WKBZ  
 850-WQWQ 1520, but they're filing for bankruptcy  
 protection. Assets: \$1 million; liabilities, \$1.4 million.  
 MN St. Paul KNOF \*95.3. "We were off air last Saturday  
 (June 27) and a portion of Sunday when the power  
 was knocked out from a recent storm. Our back-up  
 generator was not operational either," Larry D.  
 Johnson, operations manager

**KNOP Radio**  
 95.3 mhz FM

"Your Friendly Full Gospel Voice"

NY Brooklyn—Radio Konbit 87.7 on "at least eight hours a day; they now have a second frequency, 89.3. Unknown if the new frequency is [stereo] as the 87.7 is; they keep saying 87.7 is stereo and 89.3 is 'digital'. The other Brooklyn Haitian pirate, Radio Ideal(e) is still on 90.1 with a strong signal, 24 hours a day. Their e-mail address is Radioideal@aol.com."

WI Wisconsin Public Radio—eight of the talk stations carried WAUS \*90.7 Berrien Springs MI for over 10 minutes June 23, starting at 4:10 p.m. WAUS' signal overrode WHAD \*90.7 Delafield-Milwaukee, which is picked up in Madison. They carried the wrong station, "until someone at KUWS 91.3 Superior called Madison to tell them something was wrong."

NB Neguac-Allardville CBAL-1 \*101.9 [p. 3, col. 3].  
ON Cambridge CIZN 92.9. It's not in NT as shown, June!  
ON Paris-Kitchener CBLA-2 \*89.1, starting with regular programming July 20, call (416) 205-3345 to report any interference problems.

**Off Air—Or Not Yet On**

CA Berkeley "Free Radio Berkeley"—the Court in S.F. gives the old heave-ho to Stephen Dunifer, ordering his station off the air on a technicality. The NAB could hardly hold back its joy. Pres. Eddie Fritts said: "This decision represents a great victory for legitimate broadcasters who play by the rules. . . . The FCC deserves credit for putting Mr. Dunifer and other broadcast bandits out of business."

CA Merced KFIE 107.7, ending its LMA with KNT0 95.9 Livingston.

IN Indianapolis area—various pirates were on, but all are said to be shut down. When I broke the story last

**INDIANAPOLIS MICRO POWER RADIO**  
broadripple 91.9fm. south side 90.5fm  
south side 91.9fm. wash. sq 97.5fm  
east side 90.5fm. z'ville 90.5fm  
e tenth st 100.1fm. speedway 100.2fm  
mooreville 91.9fm.  
**CALL 684-9883 FOR INFORMATION**

month (p. 5, col. 1) about WWRE (now WIRE) \*91.1 Lebanon IN being mono and causing interference when it first signed on, an engineer called and said the station it was interfering with, WEDM \*91.1 Indy, was used by pirates who relayed its programming and then dumped out to do their own thing. However, three others in the Indiana broadcasting community called and said that's never been true. One said that a certain microbroadcaster is in his 40s "Why would he want to rebroadcast a high school station with its rock and rap and poor announcing?"

IA Iowa City KRUI \*89.7. Water got in transmission line during recent storms, is asking for anyone with technical experience in removing such water to help.  
ME Scarborough WPKM 106.3. To return as WBQW, "W-Bach," under combined ownership with WBQQ 99.3 Kennebunk. It was sold for \$1 million (see June, p. 2, col. 3).

MN Duluth "Random Radio" 93.5, with the FCC giving Scott "Starfire" Lunt 10 days to respond to its cease and desist order. Lunt is thinking it over, saying, "The first thing I'm doing is moving everything out of my house so they don't get it."

ND Toga—a pirate taken off the air by a U.S. District Court in ND. Farmer Roy Neset used 88.1 with less than 100 watts. Neset claimed the prohibition of broadcasts of less than 100 watts is unconstitutional.

WA San Juan Island—FCC ordered a one-watt community FM station there (frequency not given), to cease operations. There is no other local radio voice in the island area NW of Seattle and close to British Columbia. This "put the kabosh on plans by Orcas community volunteers to set up small FM transmitters for

community service possibly linked by the internet or through the local TV cable system."

**Deletions**

- AZ Phoenix KLVA-1 105.5
- AR Stamps 95.5—channel removed from FCC table.
- CA Sacramento K233AB \*94.5—because of KSSJ 94.7 Fair Oaks CA. "We still have two translators in the Sacramento area"—K258AC \*99.5 Elk Grove and K211DF \*90.1 Foothill Farms.
- CO Cortez K292AX 106.3
- CO Pueblo West K211CN \*90.1
- FL Gainesville W216AY \*91.1
- FL Punta Gorda W249AD 97.7, or its 100.9 CP, W265AO, and the FCC dismissed its 107.5 bid.
- GA Cordele W212AV \*90.3 (see "New," p. 1, col. 1)
- MN Marshall K294AO 106.7, replaced by K277AI 103.3 Russell MN. "On a taller tower on the Buffalo Ridge south of Marshall. Heard it in the car south all the way to Slayton and east to Hwy. 71 and 14 junction."
- MN Red Wing K241AC 96.1
- MS Columbus WMUW \*88.5. FCC contended the station did not broadcast for 12 consecutive months; however, WMUW claims its tower is down and will ask the Commission to reinstate the license.
- NV Oasis Valley K258AF 99.5 [to operate fulltime.
- OH Batavia WCNE \*88.7. WOBO 88.7 there now free/OK Broken Bow KCGX \*90.9 [are gone.
- OK Laverne K219CU \*91.7—now both translators there!
- TN Cookeville W245AD \*96.9
- TX Big Lake KWGH-FM 103.9. See "New," above.
- UT Provo K217CL \*91.3 [Balsam Lake WI
- WI Amery W285AK 104.9—displaced by WWLC 104.9/AB High Prairie CBX-1 \*90.9, "licence expired."

**FMistakes—June FMedial FM Atlas-17**

- CA Santa Barbara 1250 was KTMS, not "KDTMS," p. 2, col. 3.
- CT Hartford 1550 is WZDK, formerly WRDM. "Not 'WDDK' (formerly 'WQDM,' p. 7, col. 2) I know because I'm the chief engineer. . . . I anxiously await the next issue," J. R., West Hartford CT.
- LA Grand Isle 104.5—listed twice p. 1, col. 1.
- LA Homer 106.7 is KYLA, not "KYLLA," p. 2, col. 3.
- MS Aberdeen 105.3 is WWKZ (formerly WWZQ-FM), not the other way around, p. 2, col. 3.
- NY Lowville W261CP 100.1 p. 1, col. 2 didn't mention the 100.7 frequency of primary station WOTT.
- OR Winchester \*89.3 is KLOV-FM (not "KLOV")—see listing under ID Payette, p. 1, col. 1. [1, col. 2.
- SD Pierre \*90.3 is K212BH (not "K212BHL"), p. 1 [col. 2.
- WY Kaycee 92.3C1 rulemaking—town misspelled, p. 8/ WY Wamsutter 101.1C—town misspelled, p. 8, col. 2. [2.
- AB Caslan VF2244 89.9 frequency not printed, p. 1, col. 1/ AB Falher 95.7 is CKRP (not "CKKR") p. 3, col. 1.
- AB Heart Lake VF2252 89.9 facilities not given p. 1, col. 3. Is 4 v, 12 m, d-a.
- AB Marten Mountain—town misspelled for former CBX-4 \*89.7, p. 6, col. 2.
- BC Prince Rupert—the stereo station is CJFW-2 101.9, not "CFMI- 101.7," p. 5, col. 1.
- BC Revelstoke CBTO \*91.3 is 100 watts (not 1100), p. 2, col. 1.
- BC Stony Creek Indian Reserve VF2234 98.1—location is not shown on most maps, but it is at 53-56-40; 124-06-18, or about 80 km WSW Mackenzie. P. 2, col. 1. [99.1
- ON Sorrell Lake (town misspelled, p. 2, col. 2) CKFW/

**Selected AM Happenings**

- CA Quincy KPCC 1370 had been silent, now on with adult standards.
- GA Atlanta WSB 750 AM (plus FM 98.5-TV 2) gives the wrecking ball to the mansion known as "White Columns," where for the past 42 years many people prominent in the industry worked. Tom Brokaw of NBC couldn't make it to the party, but shared his greetings via videotape. A new facility designed for digital will take over. I'm sure Elmo Ellis, longtime g.m., was there. WSB-FM's now known as "B 98.5 FM" (from "B 98").
- GA Hapeville WWWW 1100 returns to air, to be brokered; LMA with WAEC 860. Moved its transmitter from Carrollton GA to better serve Atlanta.
- IL Chicago WYPA 820 was motivational talk, now Unica Spanish talk. Motivational goes to WNDZ 750 Portage IN.
- IL Mendota WGLC 1090 deletes.
- IL Pontiac WPOK 1080 deletes; see April, p. 5, col. 1.
- IN Shelbyville WSHY 1560 reported silent, to be donated to the New Life Evangelistic Center, Inc.

IA Davenport KFQC 1580 silent. I remember when the Epsteins owned it it was one of the top billing stations in the market.

LA Franklin KFRA 1390 had been silent; now gospel.  
MI Detroit WJR 760 is the only AM stereo station in the market. \*CKLW (800) gave it up. AM stereo's died in this market.\*

NY Cornwall-on-Hudson WWLE 1170 silent, but expects to be sold and return to the air. [and gospel]  
SC Walterboro WALD 1080 was silent, now R&B oldies/  
UT Salt Lake City KFAM 700 noted simulcasting KODJ 94.1 with oldies. [to the Virginia Tech Foundation.  
VA Christiansburg WNNI 1260 silent, being donated/  
VA Norfolk WCKO 1110 still off the air. It was a "dumb allocation on the part of the FCC! Even in the mid-'70s when 1110 was WZAM... It probably took more listeners away from WBT Charlotte NC than it brought in for itself. Before it started, WBT often showed up on the Raleigh area ratings, but not since!"

WA Tacoma KZTS 1360 was silent. Now back on, converting to religion and being sold to area stations KLFE, KGNW, KKOL and KAZJ

PQ Montreal CKGM 990 takes back its old frequency. After the ice storm of last winter it leased the frequency to CJAD, now back on 800 AM. [See Feb., p. 7, col. 3.]  
\*I really like the new format for the newsletter. Everything is very easy to read now,\* J.G., NJ via e-mail.

\*The Radio Shack radio (model 12-604 with tunable SCS and L-E-D) works great,\* J.W., Duluth MN via e-mail.

**FCC Proposes Negotiated FM Interference Agreements**

As part of its technical proposals for FM, the FCC is considering allow-

ing stations to negotiate mutual interference. If the amount of new interference is no greater than 20% of the combined new coverage added by the upgrades the proposal would be approved.

Total interference within each station's coverage area can't exceed 5% of the other station's coverage area in terms of population and area.

The FCC would create a Class C0 (C-zero) for Class C stations from 300 to 450 meters; a full C would have to be 451 to 600 meters. The proposal could be a back-door way of accommodating microradio. Included are ways for 10-watt Class D stations to snuggle among other stations across the dial, and for much more relaxed standards for second and third adjacent channel spacings.

**FM FORUM AND SMALL PRINT HAPPENINGS**

**Michael Rice loses out at the Commission**  
—because of his having sexually abused children Licenses are being lifted for WZZQ-FM 107.5-AM Evansville IN, KFMZ 98.3 Columbia, KAAM 103.5 Huntsville and KMBX 101.9 Eldon MO, as well as a CP for KFXE 102.1 Cuba MO. Probably the FCC will look for interim operators for the stations.

The vile Bob and Tom team from WFBQ 94.7 Indianapolis invades Chicago, displacing Mancow Muller at WRCX 103.5, where he's been four years. He was making about \$1 million at WRCX, but he's moving to WKQX 101.1, where his salary might be \$3 million a year. I understand Bob and Tom specialize in bathroom humor, probably more so than Howard Stern. If they do well in Chicago it would boost their syndication hopes in other large markets. Muller displaces 14th-place Wendy Snyder and Bill Leff. His boosting Q-101's ratings would bode well for his again trying to enter other markets.

Justice makes Capstar back off in Cedar Rapids. Capstar wanted to buy KRNA 94.1 and KXMX 102.9, but with it owning KDAT 104.5, there would have been too much concentration of control. So Capstar's only buying KXMX.

Passing—Martin Stone, 83, who produced "Howdy Doody" for NBC-TV, and later started WVIP-AM-FM Mt. Kisco NY. He hung around the AM until it left the air last year. Nobody came forward to buy it. [WZZN 106.3 is separately owned]

**Hank Holbrook, 69, a radio enthusiast and FMedia! subscriber.** I visited him and wife Mary Ellen in Maryland in the '60s. He was still getting good service from a monaural Scott FM-only tube tuner that he used since the '50s. He was an FM DX enthusiast, and enjoyed tuning in other bands, shortwave and longwave—especially ship-to-shore. He liked bicycling and was a nonsmoker. Unfortunately, he died shortly after being diagnosed with leukemia. My condolences to the family.

Tom Rothrock in MD reports hearing skip May 28 6-7 p.m.: KGRM \*91.5 Grambling LA, KAMX 94.7 Luling TX, KPYN 100.1 Atlanta TX (not yet having moved to 99.7), KBFB 97.9 Dallas, and KYGL 106.3 Texarkana AR.

Until August,

## New FM Station, Translator Grants

Translators have less than 100 watts unless shown otherwise

AK Kasilof (just S. of Kenai) \*91.5 50 watts h,v; 80 m, K. Public Radio, Class A.  
CA Blythe K216DY \*91.1 (KCZO 92.1 Carrizo Springs TX translator), h,v. FCC dismissed a translator application there for KAWZ 89.9 Twin Falls ID.  
CA Havilah (14 km SW Lake Isabella at 35-27-10; 118-35-25) K204DC \*88.7 (KAWZ Twin Falls ID), h,v  
CA Los Hills (42 km ESE McFarland) K220GU \*91.9 (KCZ), 170 watts h, v (horizontal and vertical)  
CA Point Reyes Station (SW Petaluma, NW Mill Valley) \*90.5 180 watts h,v; -87 m, W. Marin Community R.  
CA Running Springs (18 km ENE San Bernardino) K288ET \*105.5 (KEFX 88.9 Twin Falls ID), h,v. Granted despite a petition to deny by Citicasters, Inc.  
CA Santa Rosa K202CT \*88.3 (KCJH 90.1 Stockton), h,v. Granted despite petitions to deny filed by KQED-FM 88.5 San Francisco, and dismissed an 88.3 translator application filed by KRCB 91.1 there.  
CO Mesa (17.6 km NE Palisade) K210CE \*89.9 (KJOL 90.3 Grand Junction), v [Black Media Works, Inc.  
FL Clewiston \*88.5 3000 h,v; 89 m./ [Family Assn.  
IL Flora \*88.5 1000 h,v; 48 m, d-a, American/ [Corp.  
IL Mount Olive 105.3 6000 h,v; 100 m, Talley Bcstg./  
IL Newman W202BL \*88.3 (KLRD 90.1 Yucaipa CA), h,v  
IL Ramsey \*88.3 25000 h,v; 153 m, d-a, Countryside Bcstg. [Greenfield Center Community Schools  
IN Greenfield WRGF \*89.7 2000 v, 750 h, 50 m./  
IA Keokuk \*90.9 30 watts h,v (but FCC may mean 300); 98 m, Class A, Moody Bible Institute  
KS Hutchinson K201DL \*88.1 (KAWZ 89.9 Twin Falls ID), 250 v [m, Association Family Association  
LA Natchitoches \*89.3 500 h,v; 90/ [Communication  
MI Negaunee 99.5 1850 h,v; 182 m, Goetz/  
MI White Star (about 3 km WNW Gladwin at 43-47-3; 84-32-95) \*88.3 30000 v, 144 m, Superior Communications. The FCC dismissed Wax Paragon's 88.3 bid in Saginaw.  
MO Garden City 105.3 2200 h,v; 167 m, Jesscom, Inc  
MT Shelby 97.9 100000 h,v; 541 m, S. Media Assn.  
NE Kearney K260AF \*99.9 (KROA 95.7 Grand Island), 250 h,v [McCook Media Association  
NE McCook 98.5 100000 h,v; 299 m./ [(KAWZ), v  
NV Stateline ("South Lake Tahoe") K207CP \*89.3/  
NM Portales K204DB \*88.3 (KCZO), h,v  
NY Buffalo W207BB \*89.3 (WPCS 89.5 Pensacola FL), v  
NC Pinehurst \*90.3 400 w v[ertical only], 73 m, American Family Assn. (see also "Deletions," p 6, col. 2)

ND Minot K219DL \*91.7 (WPCS), 160 v  
K220GC \*91.9 (KLVC 88.3 Magalia CA), 250 h,v. The two translators are from different sites, but I quizzed the FCC how two translators on adjacent frequencies can be in the same town. Dale Bickel of the FCC: "I checked and there is no predicted interference between K219DL and K220GC, although it is close."  
NC Chocowinity W211BA \*90.1 (WYFG 91.1 Gaffney SC), 170 h,v  
OH Ashland W210BG \*89.9 (WYFG). Granted despite a petition to deny filed by WKSU \*89.7 Kent OH [on air  
PA Bradford W265BB \*100.9 (WPSB 90.1 Kane), h,v./  
TN Columbia W217AV \*91.3 (WYFG), h,v [SC], h,v  
TN Lawrenceburg W202BM \*88.3 (WYFG 91.1 Gaffney/TN Tullahoma W218BC \*91.5 (WYFG), h,v  
TX Plainview \*88.5 3000 h,v; 86 m, Paulino Bernal Evangelism (see also "Deletions," p 6, col. 2)  
TX Round Rock KFMK 105.9 4500 h,v; 397 m, R. Steven Hicks, [tereo], p, on air as "105.9 The Planet," parallel to KROX-FM 101.5 Giddings. Had stunted with two days of airing an old Lyndon B. Johnson speech. ID with Austin. "We don't have any logo yet."  
WA Enumclaw K205DF \*88.9 (KAWZ), h,v  
WA Everett K201EN \*88.1 (KAWZ), h,v  
WI Oshkosh W203AV \*88.5 (WPCS), v  
WY Glendo 100.1 2000 h,v; 40 m, Michael Radio Group  
WY Lost Cabin (66 km E of SSE of Thermopolis) 85000 h,v; 645 m, Idaho Broadcasting Consortium  
BC Fording River Mines (55 km NNE Sparwood) 96.9 15 v, 1030 m; station relayed not announced.  
106.9 15 v, 1030 m  
BC Fort Fraser CFMI- 101.1 36 watts h (relay of New Westminster BC 101.1)  
CISN- 93.1 36 h (relay of 103.9 Edmonton AB)  
CIRK- 94.1 36 h (relay of 97.3 Edmonton AB)  
CBU-FM- \*95.7 36 h (relay of Vancouver 105.7)  
BC Whistler CFOX- 92.3 47 watts h,v; -193 m, \$, (relay of 99.3 Vancouver)  
NB Grand Falls 93.5 5300 h, 67 m, \$, Carleton-Victoria Bcstg., relay of C.J.C.J AM Woodstock, with GF ads  
NS Fort Lawrence-Amherst CFNS \*90.1 9 v, 10 m, TIS  
PQ Chicoutimi CBJ \*93.7 50000 h, 140 m, (to move from 1580 AM; CBJ-FM there apparently staying on 100.9)

 NM Eunice KYRK 100.9 50000 h.v (90 m), C2  
 NY Altamont (move from Johnstown) WSRD 104.9 Its  
 Joey Caruso said current listeners will be unaffected,  
 but 445,000 more people will be able to hear the station.  
 "The move will bring local radio to Altamont for the first  
 time, while maintaining service to Johnstown and the  
 Mohawk Valley. . . We wanted to look around for an area  
 which could match the portfolio of the greater Mohawk  
 Valley and Altamont filled the bill." It could take one year  
 before ground is broken on the project, but WSRD has  
 received a new 6 kw CP. I think Caruso's statement  
 about maintaining service to Johnstown is a  
 smokescreen, as is his saying he wants to bring "local  
 radio to Altamont for the first time." Altamont is a tiny  
 burg, strategically close to Albany-Schenectady-Troy. In  
 order to deliver a 70 dB/u signal to Altamont, the  
 transmitter would have to moved too far away from  
 Johnstown to receive even a 60 dB/u signal. FCC  
 application to move has been filed.  
 NY Baldwinsville WBXL \*90.5 180 h.v, 63 m  
 NY Brockport WASB-FM 105.5 3000 h.v, 68 m  
 NC Kinston WKNS \*90.3 20000 h.v, 96 m, d-a  
 NC St. Pauls WUKS 107.7 5200 h.v, 200 m  
 NC Wilmington WWIL-FM \*90.5 2000 v, 1000 h (100 m).

Report in another publication that it's moving to 90.3 is  
 incorrect, according to FCC website information.  
 ND Watford City K206BV \*89.1 170 h.v—place in large  
 type, FM Atlas [h.v (118 m)

 TX Austin KOOP \*91.7 3000 h.v, 27 m. KOOP sub-leases  
 the KVRX transmitter (see below) for a seamless  
 station switchover. \*There is only one transmitter site.  
 This makes the switchover seamless. In fact, the  
 college kids (on KVRX) are usually just playing some  
 industrial noise trash. . . and then come on at the end  
 to say they are signing off. So one SCA unit is used on  
 92 kHz (See "SCS news," p. 11, col. 11.)  
 KVRX \*91.7 27 m (3000 h.v) [no d-a, Class C1

**On Air—Real Stations and Pirates (Selected)**

AL Birmingham "WSGN" 100.1, heard Tuesday evenings, 7-10, with '60s music and no announcing, unlike before when it IDded with an unknown AM station.  
 AZ Sun Lakes K207CD \*89.3  
 CA Clarksville W265AD \*99.1 still with KLVR 91.9 Santa Rosa CA, but lately KLVR has been off, so it's sending out "a garbled KZSA 92.1 Placerville, which is [a] pretty definite statement of its primary."  
 CT Bloomfield "Prayze FM" 105.3, but "on borrowed time—it's been unable to persuade federal regulators that it deserves to remain on the air." WKND 1480 AM, a black-owned station in Windsor, claims to have lost 10 percent of its listeners to 'Prayze's all religious format.' Marion Anderson, g.m., WKND said, "God didn't tell them to do it. God says, thou shall not steal." Prayze owner Mark Blake, 37, is a native of Jamaica who grew up in Hartford. He tried to get a license back in '83, but could only find one in Wilmamtic, 40 km away. It was rejected as "too far away from the Hartford community to be effective," so he defied the government and put in his station in a medical office building at 701 Cottage Grove Road. It hasn't paid music royalties for the CD it uses, yet it has commercials and an estimated 20,000 daily listeners. FCC engineer Victor J. Tagliaferro told the court the station is "adversely affecting" two licensed stations—WIHS 104.9 Middletown and WKND. Those stations have complained, along with Suzanne R. McDonald, vp and gm of WTIC-FM 96.5-AM Hartford. The only way the FCC may be able to get Prayze FM off the air is to attack the building Hagar the Horrible style with a battering ram.  
 GA Mableton WAVE 102.5—testing in stereo. "It sounds great, but I can't understand a word they're saying. Seems to play a variety of Spanish/latin music—Puerto Rico, Mexican, etc. I'm sure the call letters will change." [improvement!]  
 IL Macomb WJEQ 102.7 with C3 facilities—it's a 'vast/ IA Des Moines KKDM 107.5, although a tornado destroyed its studios. "No one injured."  
 MD Cumberland—former W280CP \*103.9 continues on the air, 'causing a lot of interference to WJGF [104.1 Romney WV]. Hopefully, they will move soon. After all, they are only a translator.' They are supposed to become W208CF \*89.5.  
 MD Frederick W219BX \*91.7—license to cover, but WGT5 \*91.9 Takoma Park MD files a petition for reconsideration.  
 MA Boston W267AI 101.3, helping to solve the problem of poor WFNX 101.7 Lynn reception in town. On in time "to greet returning college students."  
 MN Glencoe K202CH \*88.3, but other WNCB 89.3 Duluth translators aren't doing so well. K205CP \*88.9 Nicollet has its antenna almost on the ground after a windstorm, but is on the air with limited coverage. And K274AL \*102.7 Mankato can't get it, and is sending

out mush. Station said it's sending someone to fix the problem, but he's slow in coming. Meanwhile, Minnesota Public Radio has decided not to rebuild its studios in St. Peter. KGAC \*90.5 and KNGA \*91.5 to be programmed entirely from St. Paul. [stereo  
 MN Grand Marais WTIP \*90.7, on with full power and/  
 MN Madison KLOP 92.1 now a C3 and 24 hours. 'Tell 'em to call me and I'd be happy to tell my fellow broadcasters how they can save a lot of money by doing it themselves,' says station owner/manager Maynard Meyer, (320) 598-7301.  
 MN Shakopee or Chaska—107.5 with Paul Harvey from KSTP AM 1500 and pseudo stereo. Signal disappeared outside the valley. [Owego  
 NY Binghamton W273AB 102.5, with WLBT 101.7/  
 NY Brooklyn (Williamsburg section) "Free Radio 103.9"—a mobile station that features live music performances from local apartments and other venues. Also mentioned was a "Radio International" on 89.9, no location given. Radio Bonne Nouvelle was described as a Brooklyn pirate that has been on 88.1 'for about 10 years'; 'actually it's WYGG Asbury Park NJ, with an illegal Brooklyn relay (and illegally running commercials).'  
 Radio Ideale (last month p. 7, col. 1) has switched from 90.1 to 89.7, 'where it pretty much drowns out W209AR Long Branch NJ, at least in Queens.'  
 NY Cape Vincent WBDR 102.7 'The Border' programs to Kingston ON, and claims with its CHR format to serve 67 percent of Kingston's teens, and to be No. 1 with the 18 to 34-year-olds with a 22.2 share.  
 RI Block Island WVBI 95.9 still c, but heard 'with a poor signal' and in mono. Believed to be temporarily mono.  
 TX Waco KCKR 95.7, having moved from 95.5. Downgrade from C to a C2. And KKMJ-FM 95.5 Austin will downgrade from a C to a C1, but will stay directional. Thus ends "the strange arrangement with two Class C stations" 153 km apart.  
 VT Brattleboro "Radio Free Brattleboro" 88.1 was to have signed on July 13 from the Teen Center, 17 Flat Street, with "100 milliwatts."  
 WA Hazel Dell K281AK \*104.1 (see May p. 5, col. 1)—gets into SE Portland! KRRC \*104.1 in S.E. Portland takes a bite out of K-Love's coverage though.  
 WV Clarksburg W220BZ \*91.9 in stereo. "It sounded kind of funny hearing someone talk about the 'Spirit of the West Coast' while being [640 km] from the Atlantic Ocean."  
 WI Dodgeville WDMP-FM 99.3 goes 24 hours a day as of Labor Day (now signs off 11 p.m.).  
 AB Rocky Mountain House CHBW 94.5  
 BC Avola VF2315 89.7, VF2316 92.1  
 BC Blue River VF2317 90.3, VF2318 93.9  
 BC Houston CKEH \*104.7  
 BC Revelstoke 97.1 T1Station  
 BC Swaine-Robson Bight CJKW 88.5, 'Orca FM,' with a microphone 50 m below water level to catch the sounds of orca whales. Station is 200 km NW Vancouver. There are thought to be 750 killer whales in the area—each emitting unusual noises. CJKW is heard within a 15 km radius, and sent onto the Vancouver Aquarium, where an interested listener is Bjossa, the resident 2400-kg orca, who lept at the sound of the piped-in whales frolicking, eating, or snoozing. Eventually, the sounds of CJKW are expected to make their way to the Internet. Bjossa's mate recently died, and officials are unable to buy a replacment. "If you had a million and a half dollars in your pocket, and you wanted to buy a whale, you could not," said the executive director of the aquarium John Nightingale. Critics say the practice of holding whales is inhumane.  
 MB West Hawk Lake (Whiteshell Provincial Park) 103.7,

no call letters, English, no ID heard. It has "fairly good range."

NB Saint John CHSJ 94.1

ON Hamilton CIOI 101.5, but had been off for a while until a filter could be installed in its transmitter. It had been interfering with aircraft communications. It is using a temporary antenna on campus until a larger communications tower across the street can be readied. "Q-Sam" 88.5 there is an on-campus station at MacNab Secondary School, getting out about 100 m. Uses automation and digital technology. Fundraising by teachers and parents helped buy the equipment.

ON New Liskeard CJTT 104.5, having moved from 1230 AM. The AM transmitter was dismantled and the property sold within a week.

ON Peterborough CBCP \*93.5, but may move to 98.7.

ON Pickering 90.7 "The Nuke 90.7 FM," heard with \$, rap/alternative rock and taking on-air phone calls.

ON Seine River CHIX 89.9, heard with r, but has "poor coverage," serving a 5 km diameter.

ON Toronto—a 91.7 pirate said to be in the High Park area of mid-south-west Toronto. [Rick

PQ Châteauguay "Radio Libre" 96.3; operator's name is/  
**Off Air—Or Not Yet On**

CA Berkeley "Free Radio Berkeley" 104.1—attorneys for Stephen Dunifer are appealing the decision of Judge Claudia Wilken to close down the station on grounds it never applied for a license. Dunifer's legal team is filing a motion for reconsideration so the case can be "decided on its merits."

CA Reedley "Border Radio 911 FM" 91.1 (see Feb. p. 4, col. 2) was visited by an FCC agent who left a "Notice of Unlicensed Radio Operation" presumably on the door. It's not known for sure if the station is actually off the air. Run by special ed. teacher Kirch, who has been on for three years with city council meetings, community news and music. [not a usable facility.]

CA Goleta K295AH \*106.9. May not return, as it was/  
CA Sacramento—92.9, 100.1, 107.1 microbroadcasters are off, except for a brief appearance of one on 89.7. It had a diatribe against Republican governor candidate Dan Lungren, demanding a statement of why he didn't serve in Vietnam.

CA Yreka K214BS \*90.7

FL Tampa area—former microbroadcaster Arthur Kobres, convicted of 14 counts of broadcasting without a license fined \$7500 plus six months' house arrest and three years' probation. This case "should serve as a deterrent for other would-be violators of the airwaves," chortled the NAB.

IN Muncie \*107.5 FM—traced to David L. Costello's residence, 1405 E. Robin Ln. He's the chief engineer for Video Information Systems in the Ball State University library. He broadcast from a 61-m tower and carried the American Freedom Network, received by a satellite dish. The network feed was lost due to a fire that gutted its studios in Denver. On Christmas Eve he came on relaying KMAX 100.3 Orange Cove CA. A profane message was left on his answering machine to turn the "pirate station" off the air. "This was no Ramsey kit operation, with power estimated at 8 watts. Muncie has four other stations, 'Companion Radio' 101.3, 103.5, 105.3, and 107.9, with powers estimated at 1 watt. They serve nursing home residents. "The same informant wrote the FCC about this, but nothing has changed. . . Whoever told Bruce Elving that a 'WCER' on 88.1 with 3 kw was on the air in Indy was badly mistaken! Never, with WRTV-6 there. The two pirates on 90.5 with one-tenth of a watt are still on. They are weak and don't bother anything."

MI Berkley 92.7—a 12-watt mono pirate, which had been playing music from a computer 24 hours a day, was

voluntarily shut down by its operator, Tom, 18. He said two FCC guys came and told him he needs a license.

"I told them I shut it down, and it will stay shut down..."

Oh, well, it was fun while it lasted. I had tons of listeners! Time to sell my equipment, I guess—and I just ordered a stereo generator too! That sucks!  
NJ—"WFHR Oldies 104.7" believed to have been in Holmdel stopped by a U.S. District Court judge in New Jersey. It had its equipment seized in September, 1997, but continued to broadcast. The FCC reiterated that "all remaining illegal, unlicensed stations across the country should voluntarily cease their illegal broadcasting operations to avoid seizure and/or fines."

PA Laporte WRPA 103.9

PA Philadelphia "Radio Mutiny" 91.3. Equipment seized in a June 22 raid by FCC compliance and information bureau chief Richard Lee. Last spring Lee talked to members of Radio Mutiny, trying to persuade them to "cease and desist."

Andrew Yoder has a new magazine, *Hobby Broadcasting*, covering LPFM and shortwave pirate radio. Info at <http://www.fm.net/rfi>.

**SCS/SAP Services**

*Symbols are as in the "FM Atlas"*

- AK Anchorage KNIK 105.5 #M,R, "Channel 1 is environment music... Channel 2 is foreground music... The service starts at \$30 for on-hold telephone systems and \$35 for music in the business. Run by Sound Tech of Anchorage, the Muzak franchisee."
- KWHL 106.5 #K, assumed 67 kHz, receiving its programming from Los Angeles' Radio Korea (monophonic KWIZ 96.7 Santa Ana). It has some local news, but no local commercials, and charges its 100 subscribers \$15 per month each to get the program. Owned by Tee Soo Kim. The only other local SCS is Alaska Information Reading and Education Service on KSKA \*91.1's 67. There are no data or paging SCSes in the market, according to a story in the *Anchorage Daily News* by Mike Hinman. [kHz]
- GA Atlanta WABE \*90.1 †T, H, dropping †(). It adds Haitian French, 92/GA Macon WAYS 99.1 no SCS (drops †M, 67)
- GA Rome WQIU 102.3 no SCS (drops †C, 67)
- IL Bethalto WFUN-FM 95.5 †, J [services]
- IL Godfrey WLCA \*89.9 †T, 67, "part of a statewide network of reading/IL Granite City WKIX 106.5 †, X
- IL Litchfield WSMI-FM 106.1 †S, 67, sports and special events (no †F,X) radios any more."
- LA Baton Rouge WRKF \*89.3 has two SCSes, †M and †R (assumed)
- MO Columbia—the only SAP is Cable Channel 5, with KETC \*9 St. Louis and its descriptive video for the blind. "FM subcarriers are all boring musics here."
- MO St. Louis KWMU \*90.7 †X, 67
- KSD 93.7 still †M, but the music is "irregular"; no 92 (had †R)
- MO St. Louis KEZK 102.5 no 57 kHz RDS. It sent a signal to a billboard, but the city passed a law that billboards can't be moving. "Too distracting," the councilors said. Also drops its 67 kHz †M, retaining 92 kHz †R.
- KETC \*9, with DVS on its SAP, is the only SAP in the market.
- NJ Newark WBGO \*88.3—Lino Cello is still on its 92. He tells me that he and Kathy Ty are now friends. The case dated back to 1995, when Ty accused Cello of defaming her and her Bronx sausage business, following a dispute over an ad contract. On June 8, 1998, both parties arrived at court; however, at the last minute the two sides reached a settlement, which the judge approved, thus avoiding a trial. The settlement included an apology to Ty to be read both in court and over the air. Ty told a newspaper that all she wanted was an apology. "I just want my reputation back."
- On June 12 Cello read the following statement: "I, Lino Cello, for myself and on behalf of Radio Mindanao Network USA, Inc. (Radio Pinoy) hereby apologize to Miss Magdalena Enriquez-Ty and the New Calubayan Trading Corporation for my radio commentaries on Feb. 10, 1995 over Radio Pinoy, and which were rebroadcast at various times thereafter... We sincerely regret the pain, suffering and mental anguish that our actions have caused Miss Ty."
- NJ Trenton WNJO 94.5's 67 is Tinig Pilipino ("Filipino voice"), run by Grace Rustia, who had a program by that name on WNWR 1540 Philadelphia. The SCSStation, at 261 N. Lawrence St., Philly, may use the calls "WTPN." [June, p. 7, col. 1 should have said they have no real programs yet, not "problems."]
- OH Gibsonburg WIMX 95.7 †U, 67
- OH Lima WGLE \*90.7 †M, 67, the same background music as on WGTE-FM 91.3 Toledo and WBNO 100.9 Bryan OH. "The Van Bracket Company in Defiance is responsible for all three."
- OK Tulsa KTUL 8 has weather on itsSAP. "Very clear reception" at 96 km on a modified Radio Shack 12-604 radio.
- SC Greenville WFBC-FM 93.7 †M only (drops †, C, 92)
- WUUU-FM 94.5 †, U, dropping †M, 67
- SC Seneca WPEK 98.1 no SCS (drops †S, 67)
- TX Austin KOOP \*91.7 †, C, 92. KOOP shares time with student station KVRX. "The kids at the college station would like to give away some cheap portables, and get a better one for station use." KVRX programming would continue on KOOP's 92 kHz during the day. "KVRX is overnight... I use an accurized lawn sprinkler to switch them over," Bob N., c.e., via e-mail. "KOOP is not active on their own transmitter, and will most likely fold due to internal strife—before their five year lease with KVRX is over..." (See "Facilities," p. 3, col. 2.)

- KVRX \*91.7 †, C, (as above; see also "Facilities," p. 3, col. 2).
- TX Tyler KWNE \*89.3 still †M,R, but the †R was not recently heard.
- KNUE 101.5 †, U, 92, no 67 (only an open carrier)
- USA—Radio World had an article, July 22, "A New Life For FM Subcarriers?" USA Digital Radio has a plan to implement IBOC (in-band on channel) at 92 kHz, with "a minimal impact on the IBOC signal and an imperceptible impact at 67 kHz." Another system would involve ITS, Intelligent Transportation System, at 57 kHz. Lucent Digital Radio System's digital audio broadcasting is also believed to be protective of the 67 kHz channel.
- BC Prince George CIRX 94.3 †C (from †S), a fulltime relay of CICI 620 AM there. Sends the CICI program to CKQ 920 Quesnel. "It's 67 kHz."
- A sermon, "Down With the Sound of Muzak," can be read at <http://www.index.mis.net/lexave/sermons/muzak.html>. One person e-mailed: "I believe in Jesus Christ, and didn't think it a sin to listen to Muzak." I don't place any credibility in it, since it is by an anonymous person. Muzak originates in Seattle where 60 channels of music are beamed. It's not always the bland music the preacher must have had in mind. Two are found on FM SCS: background music (now serving fewer than 10 percent of the customers) and light rock. Muzak tries to tailor its music to customers' needs, such as Nordstrom department stores, which often feature live piano playing. The background music to those stores is also piano. A reader muses: "This probably explains why so many of the †M SCSes are dying; no customers."
- "We adopted two girls from an orphanage in China. Hope is 10, blind, and the modified radio with TV audio is for her," M.S., Wyandotte MI.
- "I just received your radio and adapters and I am very impressed," B.H., Perysburg OH via e-mail.
- "I have cancer, but before I got my pink slip, I hope to finish a book I'm writing about my life and about my blind son, Paul. It's going to mention you and how you were the first long-distance listener to WRSV (98.3) Skokie IL when we owned it," M. Earlene Stebbins, Millbrae CA. [Times easier to read, "R. O'C., Kodiak AK
- "Really like the new type, print format in June and July issues—100/

**Multi-City IDs In Use**

AL Jasper WOWC 102.5 with Jasper only, 'no more variable multi-city.' Now "Wow 102.5." Big Country 99.5 [donville VT, still "Kix 105.5"]

VT St. Johnsbury-Littleton NH WKXH 105.5 adds Lyn-/Just found my FM Atlas from 1973 which I got with my Heathkit AR 1500A. It is a terrific receiver and I still have it and the Atlas 'second edition revised' which has provided me with [all] kinds of useful information. It's fun to discover you're still at it," A.J.C., M.D., Cobourg ON via e-mail.

"Wow—50 years of DXing!" G.C. NY, via e-mail.

**Selected AM Happenings**

AZ Cave Creek KCCF 1100—was the best AM stereo station I ever heard. [It's] been sold and hucksters bought it out. The format is now quack medicine, colloidal silver salesmen, new age money grabbers... AM radio is sure going to the dogs and in a miserable state.

AZ Tempe KCWW 1580, which is said to be heard (by DXers from Finland to Australia) has changed from its country and western format to another wretched Disney station... Whatever happened to local programming and why all the satellite-fed monopoly?

GA Savannah WSGA 1400 had been silent, now stunting with "continuous barking dogs."

IL Chicago WGN 720 named Station of the Year by the Illinois Broadcasters Association. Bob Collins was honored as the Personality of the Year. Joe Durso, Jr., former WBBM 780 news director (1982-84), 54, dies of a heart attack in Montana. He had been dean of the University of Montana School of Journalism.

On 1550 is a legal micro-radio billboard on the Kennedy Expressway between Armitage and Division—a continuous 60" commercial for a clothing store. It's the first known commercial use of a TIS frequency in the Midwest. Installation came to \$2000, with operating costs \$500 to \$1500 a month, according to Andrew Miller, owner of Business Products Systems.

IL La Grange WTAQ 1300, IL Zion WTAU 1500 (both had been regional Mexican) to Disney children's.

IA Des Moines KKSO 1390 had been business news, now silent and about to delete. Its programming moves to the expanded (X) band as KBGG.

IA Iowa City WSUI '910 lost two of its three towers in a storm and left the air. Came back on with 1250 watts nondirectional (rather than 5 kw d-a).

MD Lexington Park WPTX 920 off the air, with its programming moving to WMDM 1690, "Baytalk 1690."

MD Rockville WINX 1600, now Top 40, but 'signal is pretty poor in DC.' At 16 km in a high rise, "WINX is almost nonexistent."

MA—David Brudnoy of WBZ 1030 named for excellence in news/talk by the Massachusetts Associated Press.

MI Ada (moving from Muskegon) WMHG 1600. This is a move of 24 km, to a suburb of Grand Rapids. But the new facility and 1680 dial spot will go instead to co-owned WKWM 1140. Goodrich Broadcasting also owns WSNX 104.5-WSHZ 107.9 Muskegon, WMRR 101.7 Muskegon Heights and WODJ 107.3 Greenville. "A precedent? Will we see other X-band allocations getting shuffled around? How long before the FCC starts 'shoehorning' in more X-band assignments, perhaps even allowing directional antennas?" wonders a reader.

MO St. Louis area AM stereo stations are 630 (KJSL), 690 (KSTL), 1120 (KMOX) and 1490 (WESL). Latter is 'urban, poor sound quality. No, it never used 101.1 (now WVRV). The only connection is they both have the same city of license,' East St. Louis I contend that 101.1, before the Catholics owned it, was the same as WTMV (AM). An Aug. 28, 1952 letter mentions that

WTMV-FM, 102.5 megacycles, is on the air daily except Sunday 3 p.m. to 9 p.m. Later, I heard the station on 101.1 mc as WAMV-FM. "Thirteen-eighty is an interesting station. Even though owned by a church, it has jazz—not the Kenny G. type, but real jazz." [in its license to the FCC ND Wishek KDRQ 1330 deletes—station voluntarily turns/

NY Youngstown WTOR 770, 5kw directional daytime only, on with ethnic music; ID with Toronto ON. "Signal level is about the same as WGR, WBEN, WJED."

OH Campbell WASN 1330 had been silent; now news and talk. TX Paris KGDD 1250 off the air. [WPES 1430 Ashland VA VA Hopewell WHAP 1340 off the air, ending an LMA with/ WV Charleston WVSR 1240 was off the air, moving physically from Dunbar WV; returns to the air as the first affiliate of the Wisdom Radio Network (motivational talk). WV Logan WVOW 1290 silent because of a fire, but hopes to be back on soon.

WV Madison WZAC 1450 deletes. WI Sussex WKSH 1370 off air, having moved to 1640 as WAZI with contemporary Christian.

ON Toronto CBL '740 scheduled to sign off permanently Oct. 20. PQ Montreal—the CRTIC is calling for applications for the 690 and 940 kHz facilities to be vacated by CBF and CBM AM. Letters of intent are due Aug. 24 and formal applications by Sept. 24. "Hear about the blonde that got an AM radio? It took her a month to realize she could play it at night!"

"You're doing a great work!" G.H., Enid OK.

## New FM Station, Translator Grants

*Translators have less than 100 watts unless shown otherwise*

AK Girdwood \*88.9 20 watts h, 114 m, Glacier City Radio, replacing a pirate which had been at 88.5. Seeks KGCR calls. "Legitimacy has brought the radio station back down to earth, literally. Instead of the funky studio with the incredible views, KGCR will operate from two buildings about a block apart on Linblad Street, at ground level. They'd be at 100 watts, except they "just don't have the equipment or the money. . . KGCR had applied for a Class D license, making it a 10-watt station, but the FCC is planning to phase out Class D licenses in Alaska as already has been done in the Lower 48." The station's founder is Lewis Leonard, "a pleasantly grizzled guy in Carhartts with a gold earring in each ear." He snaps back when somebody uses the term "public radio." "Call it community radio," he says. Leonard was responsible for bringing in a 10-watt repeater on \*91.9, but he found that KSKA doesn't fill the needs of Girdwood like its own station could. It is expected to sign on this month as a Class A. [Magalia CA]

AK Kodiak K210CF \*89.9 (KLVC 88.3/ CO Yuma 100.9 6000 h,v; 106 m, Arnold Bcstg. [Broadcast Equities Corp.

**On Air—Real Stations and Pirates (Selected)**

AZ Gilbert KPTY 103.9—fined \$7500 for "obscene language." It played Prince's *Erotic City*, with vile language, even though the station said it was playing the "clean version." This FCC action has "sent some CHR, dance and urban programmers running to the control room," according to *M Street*.  
 CA San Diego KGB 101.5—FCC reduced its fine from \$11500 to \$9200, which was for "egregious and repeated violations of 18 U.S.C. §1464 regarding indecent program-ming."  
 FL Clearwater WXTB 97.9 gets a \$4000 fine for indecency on the "Bubba the Love Sponge" show for material aired June 12 and 20, 1997. "That's two days at the rate of \$2000 per day."  
 ME Orono WMEB \*90.9—but was off the air for much of August for a technical upgrade.  
 MI Wyoming WYCE \*88.1 still pf, but has been hampered with only a 1000 watt sig-

nal. Has a CP for 7300 v, which will help, but it is also helped by being on the Inter-net with Real Audio. Its 88.1 frequency is said to be "the worst position on the FM dial," with programming that includes blues, jazz, folk, worldbeat rock, Celtic and reg-gae. It is said to be one of only 20 stations nationally with this format, said to appeal to Internet listeners. It is listed among hun-dreds of stations with Real Audio through the MIT list of radio stations on the World-wide Web at [wmbr.mit.edu/ stations/list.html/](http://wmbr.mit.edu/stations/list.html/).

MN Silver Bay—the local high school called and asked for help in reviving its radio station, which could not even be heard in the hallway near the studio. An SCS Radio Technology-modified transmitter was in-stalled in place of an old Ramsey FM 10, a double FM turnstile antenna on the roof hooked up, with good Part 15-type resul-tant coverage. "Would you help us apply for a licensed station as you did in Esko MN?"  
 NY Buffalo WNED-FM \*94.5, but at low power, and subject to going off the air inter-mittently. "They're relocating the tower."  
 NY Cortland WSUC \*90.5—fined \$4200 for mid-afternoon song lyrics "which appeared to be indecent."  
 NY Queens (probably in the Jackson Heights-Elmhurst area) "Radio Nueva Vida" 94.1, a Spanish Christian station, having been briefly on 89.7 Claims to be \$tereo.  
 ND KUND \*89.3/KFJM \*90.7, and both in stereo, and parallel, but that probably was because of school vacation.  
 ND St. Thomas K213BQ \*90.5, with WJCG 88.9 Monee-Chicago ID heard.  
 OH Hamler W205AT \*88.9—from the top of a grain elevator. "Hamler is in the middle of nowhere! A sign at a Christian church ad-vertised [it] as KASW, which is most cer-tainly is not!" W205AT is less than 100 watts, all v, at 132 m.  
 OH Jefferson WCVJ \*90.9, now on 24 hours a day, seven days a week with 196 m from

a new tower.  
 TN Chattanooga 88.5—Black Liberation Ra-dio, on 4 p.m.-12 a.m. M-F, noon to 2 p.m. EDT Sat. and Sun. "Claims to be running 40 watts." [EEO violations.  
 TX Bryan KKYS 104.7—\$16000 fine for/  
 TX Longview KYKX 105.7—\$35000 EEO fine.

TX Pasadena KKBQ 92.9—two on-air hosts charged with drug possession. They are Stephen Shane DeBusk (Shane Rambo) and Craig Bryant Caudill (Dusty McGee). They were arrested in a car in a South Houston nightclub. The two were broadcasting live for a station event. DeBusk and Caudill were suspended without pay pending the outcome of the case. DeBusk works at Chancellor's KKBQ parttime, while Caudill was identified in *Inside Radio* as having the evening shift.

BC Victoria CBCV \*90.5, mono, heard announcing its call letters.

MB Winnipeq CJUM 101.5 heard testing with tones. Plans a Sept. 8 air date. [33 watts.]

ON Killaloe CHCR 102.9—on with "a whole/  
SO Nogales XHNGS 96.7, XHNOS 97.5—heard from the "ton of Mexican new station grants" in the August *FMedia!*

### Off Air—Or Not Yet On

MN Roseau KRWB-FM 103.5

ND Cavalier KAOC 105.1

ND Pembina K280CY 103.9. "It was on until a year ago." Primary KVOX-FM 99.9 has no knowledge of this translator, "but we've discovered a lot of surprises after we took over the ownership."

ND Walhalla KAUJ 106.7

OH Cleveland—FCC agents shut down four unlicensed stations: Radio Ebenezer 88.1, "WSPL" 90.7, "WPRC" 91.9 and "WSLR" 93.7. "The equipment was seized." This is in addition to their earlier shutting down 15 alleged pirates in Miami. The FCC's Bill Kennard called this the most successful enforcement action against pirates ever. Altogether, the FCC claims to have recently closed 260 unlicensed stations.

WA Spokane KEZE 96.9. Its sale to KEZE, Inc. "appears to have fallen apart."

WI Balsam Lake WWLC 104.9. "Casey Communications took over the station. . . They will install a new antenna and survey the community to decide what the format will be when the station returns to the air [later] in September."

understand anything. I think it's a disservice to their advertisers."

CA San Francisco KALW \*91.7 was advertising one of its SCS channels available. Bids were due by Aug. 21 for the 67 kHz Chinese. Charlie Chan is still on the channel, and he was invited to be one of the bidders.

IL—remove the †FX from all stations so listed, as well as those in Indiana and Ohio. "The Farm Bureau Network moved to C-band satellite several years ago, and dropped the subcarrier service. Now, they are migrating to Comstream digital receivers."

MA Cambridge WHRB 95.3 is losing either its 67 or 92 kHz †Q, because they're "looking for parties interested in a subcarrier channel for Boston; (617) 495-4818." WHRB was reportedly DXed in New Jersey, "which is quite an accomplishment, considering they are weak in South Boston" (MA).

NJ Newark WBGO \*88.3's 92 kHz Radyo Pinoy—a New York federal court jury found the *Filipino Reporter* libelous with regard to seven statements they printed about Lino Celle and Radio (or "Radyo") Pinoy in three 1997 articles. The *Reporter* will have to pay \$15,000 in punitive damages, but not the \$30 million Celle had sued for. The false statements included claims that Radio Pinoy had "dwindling advertisers and listeners" and that its signal did not reach Jersey City (which has a lot of Filipinos), that AT&T would no longer sponsor Celle's program, that a judge had found Celle "negligent" in the Kathy Ty case (last month p. 7, col. 1), "Celle and his cohorts" disseminated "black propaganda," and that Celle "was not paying his debts." Celle told the *Filipino Express* "I feel happy because this attack on the radio and myself was cleared. The American system worked."

NJ Trenton WNJO 94.5 still †(O), with the †(O) having been off for a while.

WXW 101.5 still †(O), although the RDS comes and goes.

NY Syracuse WYYY 94.5 still †(O), while WCNY \*24 has an SAP parallel to the main TV audio, except for Thursday nights when it airs descriptive video for the blind.

OH Defiance—the Van Brackels operate several music SCSes in northwest Ohio. "Lately I had a most interesting conversation with Jamie Blank, who is sales director for the Van Brackel people. He told me that half of his customers have switched to their direct satellite feed.

They are now faced with a crucial decision as to whether to just abandon SCS. The cost to commercial customers is about \$50 per month for satellite installations which is the same as SCS service. He informed me that most of the cost is due to fees paid to BMI and ASCAP rather than to reimburse them for SCS fees. When I visited them 25 years ago, they were using reel to reel tapes for the SCA. . . Now, of course, it is a satellite feed of MOR music which I really enjoy. He also told me that with large volumes of licenses for satellite feeds, like 1000 customers, the cost drops. He admitted that SCS for background music will some day be a thing of the past. At least you and Dave can keep your customers for ethnic music, Radio Reading Services (those that are not

on SAP) and religious groups," said Bruce Hammond, M.D.

OH Lima WIMT 102.1 no †, F, but retains †M.

WLIO 35: "There was World Radio Network and [it was] very clear, much better than any FM subcarrier. . . Does Fred Vobbe have an e-mail so we can confirm what they are doing there?"

OH Piqua WCLR 95.7 †X, 67 still.

OH Wapakoneta WZOQ 92.1 †Z.

PQ Montreal CIRA \*91.3 is probably more properly coded †, Q, instead of †, G, Radio Maria (Italian)

"Some Australian dude has a page with an SCAdapter kit, at <http://www.nic.net.au/~bobp/acs.htm>. He doesn't make it easy to find the price information, so here it is—K5020 ACS Decoder 1-4 units US \$10, 5-9 units US \$8.50; 10-19 units US \$7.50.

It's a very nice radio. Like a magnet—I can't get away from it," J.S., Clay NY, describing the Radio Shack 12-604 with SAP/SCS.

"We would like to let you know how much you are appreciated for monitoring the [translator] signal in your area [of W203AL \*88.5 Duluth MN]. Reports from monitors like you are the only way we have of knowing when there is a problem with the translator," Marie Camping, Expansion Division, Family Stations, Inc., Nemo SD.

**Multi-City IDs In Use**

WA Port Angeles KNWP \*90.1 with Sequim ("squim"). Has its own ID but often mentions KZAZ \*91.7 Bellingham. Its signal clashes with tiny 10-watt KSVR 90.1 Mount Vernon WA at Skagit Valley College. Although almost 100 km away, the KNWP signal follows the "clear, long watery corridor of the Strait of Juan de Fuca." The migrant population KSVR's puny signal served is especially disadvantaged, as the interference came on at the harvest season. Dennis Haarsager, at WA State University—Pullman, said all the FCC rules were followed. Even so, they lent KSVR a better antenna and has offered to find KSVR a new frequency, as well as reimbursement for the cost of relocating the KSVR and boosting its signal.

**Selected AM Happenings**

AL Atmore WASG 550 off the air, but plans to return by October from a new tower site.

CA San Francisco KGO 810 still No. 1 in the ratings—as it has for 20 years. Believed to be the result of a great signal in the hilly city, plus consistent programming. Its manager is Michael Luckoff, who has been with the station since 1975. Talk show host Ronn Owens has been with KGO 23 years, but lately has been dividing his time with KABC 790 L.A., also owned by ABC. Luckoff thought Owens' attention was diverted, and he wanted to have Owens fulltime in San Francisco, where his show consistently outdraws Rush Limbaugh in the 9 a.m. to noon slot. It also spends \$5 million a year for a three-year pact to air 'Niners football, up from \$3.2 million in the previous contract. "We spent big-time," said Luckoff, who adds: "We have never made money on the 49ers, but it's good imagery, and it's brought us listeners we'd never get otherwise."

IL Chicago WMVP 1000 becomes "ESPN Radio 1000," once ABC buys it from Chancellor. It will be both local, with Bulls and White Sox games, and national with ESPN.

IL Chicago Heights WCFJ 1470 had been religious; now ethnic, parallel to WSBC 1240 Chicago.

IL—Bud Price, owner of WKXQ 92.5 Rushville IL, mentions someone having a '94 Chevy van with the original Delco radio in it.

"The AM is practically useless. . . Why do auto radio manufacturers continue to ignore AM radio?" And he asks, "When digital receivers hit the market, how much money do you think will go into the analog section?"

IA Des Moines 1390 off the air. It was KKSO and before that KCBC. Now at 1700 it is KBGG. The 1390 facility had four towers; now just one exists for the 1700 station, with transmitter in one of the original tuning sheds. All four sheds remain. "Suffice to say that the owners did not invest much in the transmitter building! [It's] now very much boarded up with a big sign that says something about it being a federal offense to tamper with broadcast equipment."

MI Taylor WCHB 1200 silent, but "Radio One plans to put WCHB back on the air in 90 days."

MO St. Louis WEW 770—on two hours after sunset (to 10 p.m. CDT), made "possible through an agreement with the FCC for post sunset operation with reduced power" (60 w).

NY Mount Kisco WVIP 1310 had been silent; returns to air with talk and jazz, parallel to WGCH 1490 Greenwich CT. [See July p. 8, col. 3.]

NC and SC coastal areas—with hurricanes bearing down, it was advised to check "for daytime only stations that may broadcast at night under emergency broadcast authority. [Some stations with low power at night] will be using their full daytime power under the same authority." [surrendered.]

ND Wishek KDRQ 1330—deleted. "License/

PA McConnellsburg WVFC 1530 off the air, with "no plans to return. It was owned by WEEO 103.7, and the owner wasn't making any money with the AM so he sold it to a Florida outfit which just went belly up."

VA Appomattox WWAR 1280 silent.

VA Pulaski WPUV 1580 silent.

WA Silverdale KITZ 1400 was silent, now talk. It is owned by a new talk network, Orbit 7.

WV Fisher WELD 690 is 100% simulcast with WCBG 1580 Chambersburg PA, but one reader contends that for the last four years it has failed to give a proper station identification. It simulcasts CNN Headline News, and is automated. It broadcast "the WCBG Cumberland Valley weather forecast (even though it is nowhere near the Cumberland Valley), at 11:59:30 a.m. No noon ID, no IDs 15 minutes before noon, no ID through 12:15 p.m. No IDs between 6:05 and 6:20 a.m. during CNN cut-aways. . . Another HJV station, WAYZ 1380 AM now simulcasts WAYZ-FM 101.5 Waynesboro PA. The station IDs throughout

each hour as WAYZ 101.5 FM. So much for deregulation!"

WI Milwaukee WEMP 1250 drops oldies for g. WEMP, now "eternally meaningful programming." So "now the Milwaukee area has 540 WZER, 1250 WEMP, 1340 WJYI, 1560 WGLB, \*88.1 WMWK and \*107.7 WVCY-FM with religious formatted programming."

PR Aguadilla WNOZ 1340 reported silent.

- CO Carbondale KDNK \*90.5 fears it will lose its translators because of applications filed by a Denver station "billing itself as Colorado Public Radio" (KCFR 90.1) has applied for the license for a frequency so close to our translator frequency that we would no longer be permitted to transmit at that number, and no other frequencies are available to us for that purpose. If they were to be granted this license it would reduce our listener area by more than half, thus cutting so heavily into our member base and underwriter base that it could effectively knock KDNK off the air." Joining KDNK is KAJX \*91.5 Aspen "to address what appears to be the common enemy of community radio here in our locale." A Sister Kate of KDNK mentions in the NFCB *Community Radio News* that translators are needed because of terrain problems in the mountains, and FM's need for line-of-sight transmission. Applications most likely being watched by KDNK and KAJX are for \*88.1 Glenwood Springs (see Nov. p. 6, col. 2) and \*88.5 Vail (see Sept. p. 10, col. 1). [County

ON Iroquois 107.7 50 w, Seaway Campus Community R. Some rather poor FM station coverage maps can be looked up at the FCC website at [www.fcc.gov/Bureaus/Engineering\\_Technology/Databases/mmb/fmdb/index/](http://www.fcc.gov/Bureaus/Engineering_Technology/Databases/mmb/fmdb/index/). I call these "poor" because they are featureless maps lacking any cities or lakes.

**FM Rulemakings Proposed**

**First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed**

- AK King Salmon 92.1A, Sept. 21, Oct. 6
- MT Whitehall 102.7A, Sept. 21, Oct. 6
- NC Avon 106.7A, Oct. 13, 28
- NC Buxton 99.9A and 101.5A, Sept. 28, Oct. 13
- OK Pauls Valley 104.5A, Sept. 21, Oct. 6
- TX Lufkin 100.1A, Sept. 21, Oct. 6
- TX Zapata 102.7A, Sept. 14, 29
- WY Sheridan 93.7C for 96.5C3, KYTI, Sept. 14, 29

**FM Rulemakings Finalized**

No filing windows because of freeze

- FL Big Pine Key 104.1C1 for 104.7C, WWUS
- FL Clewiston 99.5C3 for 106.3A, WAFB-FM
- FL Fort Myers Villas 106.3C2 for A, WJST
- FL Indiantown 103.1C1 for C2, WPBZ
- FL Jupiter 106.3C3 for 99.5A, WJWB-FM
- FL Key Colony Beach 101.3C2 for 103.9C2, WKKB (moving from 105.5)
- FL Naples 104.7C3 for 101.3C3, WSGI

- TX Robinson [Waco (move from Corsicana)] 107.9C2, KDOX-FM
- VA Nassawadox 98.3A—reinstated and then granted after a petition for reconsideration had been heard
- VA Powhatan 107.3A (from Warrenton 107.3C2), with WQNC to be downgraded. Dismissed was WQNC's bid for La Crosse VA 107.3C2.
- WA Royal City 93.5A, Oct. 5, 20
- WY Douglas 92.5C1, Oct. 5, 20

**FCC Adopts Auction Procedures for Commercial Station Applications**

As prelude to lifting of the freeze for new FM station applications and commercial station filing windows, the FCC has announced the use of auctions, as mandated by the Balanced Budget Act of 1997. After the disaster [to the FCC and many applicants caught in comparative hearings] of the Bechtel vs. FCC case, the Commission has decided that "auctions would be fairer and more efficient than comparative hearings." It decided to utilize auctions even for the few cases in which an initial decision may have been made before Bechtel.

The FCC noted that auctions would initially be limited to pending

applications that would otherwise be headed for comparative hearing.

Then, interestingly, the FCC listed merits an applicant might enjoy heading into the auction process. These include: ■ A "new entrant" bidding credit for applicants with no, or very few, media interests. The Commission believes this will help ensure that small businesses and businesses owned by minorities and women are given the opportunity to participate media ownership; ■ Applicants with no controlling interests in any media outlets will receive a 35 percent bidding credit. Those with controlling interests in no more than three media outlets, none of which serve the same area as the proposed station, will receive a 25 percent bidding credit.

The Commission said it would revisit the question of bidding credits in auctions after it has completed certain studies. Then it might alter the entry procedures prior to bidding. During any filing windows, if mutually exclusive applications are filed, the FCC would ask for only enough engineering data for the staff to determine groups of mutually exclusive applications. This would relieve applicants of having to file a long-form application, which only the auction winner or non-mutually exclusive applicant would have to file.

Future Commission announcements will give filing deadlines for short-form applications, the amount of and deadline for submitting any upfront payments, and the time, place and method of competitive bidding to be used. Auction procedures would also be implemented for secondary services like FM translators and low power TV where applications are mutually exclusive.

Auctions are only for commercial broadcast applications. The FCC said that the statute clearly forbids auctions to choose among applicants for noncommercial frequencies. The Commission is concerned about commercial frequencies where one or more applicants are noncommercial entities. It called those "difficult issues," and is looking for comments on how to handle such matters, as well as a further rulemaking to examine selection processes among mutually exclusive noncommercial

applicants. [Latter has already started as MM Docket #95-31.]

### Main Studio/Public File Rules Changed

The FCC issued revisions in its main studio/public inspection file rules. Stations can now relocate their main studio within: 1) the principal community contour of any of its stations; or within 40 km from the center of the station's community of license. Much to the relief of stations, they are allowed to keep their public files at the main studio, not necessarily in the city of license. The rule is very liberal. It permits the studio to be in the contour of any station in any service. This means a Class A FM in a Chicago suburb but owned by a 50-kw AM station could have its studio in Milwaukee.

"The effect is similar to the effect of using city-grade contours to define 'markets' for duopoly purposes. Those [stations] who have the larger signals were almost always able to create 45-station 'markets', regardless of the number of stations relevant in their core market," comments J. T. Anderton.

The FCC is questioning exactly how to define a "market." The matter might be addressed in its study of ownerships. In an Arkansas case, El Dorado Broadcasting claims that rival Noalmark will dominate the local market and "create a radio monopoly" with its purchase of KBYB 96.1. El Dorado Broadcasting says the "market" should be Union County, with six commercial stations, not how the FCC defines it—15 stations.

#### Small Print Happenings and FM Industry News

The radio duo of Opie and Anthony (see May, p. 8, col. 3) may be back on the air—at least somewhat—in Boston. Recall that they falsely announced over WAAF 107.3 that Mayor Tom Menino had died in a Florida car accident, and then they got fired. Well, they quickly landed a job doing afternoons on WNEW 102.7 in the Big Apple. Their hometown return will most likely be a syndicated version of what they're doing and on one of bean-town's CBS owned stations, such as WBCN 104.1. WBCN officials were mum about Opie and Anthony's possible on-air return.

Two WFLY 92.3 Troy NY disc jockeys were suspended after an airplane flew over a ceremony where Hillary Rodham Clinton was speaking. The plane had a banner reading, "Who's watching Bill?" Some in the crowd laughed and cheered, but more later called to lodge complaints against the station. The plane was chartered by morning show disc jockeys James Crowe and Leonard Wood. They were to have apologized "to the city of Troy" for the prank be-

fore they could be reinstated. The station aired an apology to Mrs. Clinton and the city, but there's no word she heard the on-air apology.

**Stern out in Montreal.** CHUM Ltd. announced its Toronto TV station CITY and Montreal radio station CHOM 97.7 will no longer carry Howard's show. Citing its commitment to "programming of high standards as called for in the Broadcasting Act" both the radio and TV programs were dropped, even though the Stern show "has built a substantial listenership in Montreal." Efforts to edit the show for Canadians were termed "extremely effective," but with the intro of the TV program into Montreal, "efforts in editing the show have been compromised as the radio program is now no longer heard in isolation," said Jim Waters, Pres., CHUM Group Radio. Stern's show can be DXed in Montreal via WIZN 106.7 Vergennes-Burlington VT. The show continues on CILQ 107.1 Toronto.

Stern's ratings fell in Chicago; his show on WCKG 105.9 is only tied for 10th place with WUSN 99.5's Ray Stevens and Trish Biondo. WCKG officials blamed the "major setback" on "Arbitron's flawed nature." But in Detroit, where Stern is on WKRK 97.1, his show went from a 2.8 to a 4.1. WKRK is ranked only at No. 19 overall, and the absence for back surgery took competing personality Drew Lane off the WRIF 101.1 airwaves. The *Free Press* headlined the story: "Drew-less WRIF's loss is Stern's gain."

In a move that might rival CBS in terms of size, several media giants are merging. Hicks Muse Tate & Furst, a closely held corporation, is combining LIN Television Corp. and Chancellor Media of Irving TX in a \$1.67 billion transaction. The move lets Chancellor enter the television business. It is the Chancellor name that will be used to consolidate all the holdings in radio, television and outdoor advertising. Comments one reader: "Big fish swallowing smaller fish. When will it end?"

Another TX media giant, Capstar, based in Austin, is expanding with the purchase of SFX Broadcasting for \$2.2 billion, "boosting its audience share by 68 stations in 19 markets. Capstar said the cost includes cash and assumed sumed debt." Capstar, according to Bloomberg News, owns or programs 299 stations in 75 midsize markets. Bloomberg also reports the CBS has completed the \$3.2 billion acquisition of American Radio Systems Corp. This gives "the nation's largest radio station owner a stronger grip on markets outside the top 10. CBS paid \$44 a share, or \$1.6 billion cash, and assumed \$1.6 billion in debt.

CBS has announced it will start selling program-length commercials and talk shows on weekends on WCKG 105.9 Elmwood Park-Chicago. This caused speculation that "infomercials" might spread to other CBS-owned stations, especially in "fringe times."

The FCC has cleared the way for Nationwide to acquire KEGL 97.1 Fort Worth. It dismissed some informal objections and issued a \$2000 fine for a Howard Stern broadcast in 1997. Tom Blackwell of Dallas and the "Dallas Association for Decency" objected to license renewal for KEGL based on the earlier Stern broadcast and Stern's June 12, 1997 remarks about pressure groups trying to lodge complaints against him at the FCC. The FCC did find Stern's Sept. 30,

1993 remarks about his wife's panties to be legally indecent, according to the *M Street Journal*. Nationwide, after it acquires KEGL, will be able to sell it to Jacor as planned.

Prominent among move-ins in Dallas is KNKI 96.7 Flower Mound TX, moving from Sherman where it was KDVE. ABC is paying \$23 million for the station, which is temporarily silent. It is upgrading to a full Class C. ABC is involved with yet another Dallas area signal—that of C2 KEMM 103.3 Commerce. It's reportedly an LMA-to-buy. ABC also owns KSCS 96.3 and two AMs.

Jacor buys KKTCL Cleveland TX for \$14.7 million; it is the former KRTK, which was part of a classical simulcast with KRTS 92.1 Seabrook TX. Perhaps the talk format will end and true stereo take over 97.1 once again.

WRNX 100.9 Amherst MA is being sold to local part-owner Thomas Davis. Davis said, "We are the only [FM] station left in the market that's locally owned." Davis bought WTTT AM in 1990 and later started WRNX, with the help of a principal partner and two limited partners. Former FCC chairman E. William Henry is the principal partner. Two limited partners, Harry Phillips of Memphis and Roger Horchow of Dallas TX, are involved, and "happy to sell their interest."

Ready for digital? They are apparently in Toronto. Here's what the digital dial will look like, with each DAB frequency able to carry up to five stations: 1456.304 mhz CFNY, CFTR, CHFI, CHUM-AM-FM; 1458.048 mhz CFRB, CKFM, CJCL, CJEZ, CJRT; 1461.536 mhz CBL-FM, CBLA, CJBZ-AM-FM; 1465.024 mhz CHIN-AM-FM, CHOG, CILQ, CISS. "All of the stations will operate with 5084 watts from atop Toronto's CN Tower."

Central Michigan University gets to keep public broadcasting after all. That comes after more than 300 students protested at the president's office when concerns were raised CMU may no longer support such stations as WCMU \*89.5 and WMHW \*91.5 Mount Pleasant, as well as WCMU-TV \*14.

The NAB has joined the Illinois Broadcasters Association in urging that state's supreme court to reject a decision allowing a "negligent hiring and retention" claim to be brought against WRXC 103.5 because of on-air statements by Mancow Muller. Muller is now at WKQX 101.1 (July, p. 8, col. 3). The suit is being brought by former Chicago Bear Keith Van Horn. Van Horn claimed Muller defamed him, and that the station should have known Muller had a "propensity" to engage in actions such as Van Horn complained about, and it was "negligent" in hiring Muller.

The NAB explained that, unless the court reverses itself, broadcast stations could not "safely employ" anyone with controversial views whose prior conduct may be unacceptable by some segments of society.

Featured speaker at the NAB Radio Show is FCC chairman Bill Kennard. That'll be at the breakfast Friday, Oct. 16 in Seattle. "A pirate/low power radio session also will be featured," which could be a session of interest to Kennard. Fly-in jock Tom Joyner hosts the Oct. 17 dinner.

AK Juneau KTOO \*104.3 is accepting underwriting from an unusual source—political candidates. Its board agreed to try it as an experiment. Ads won't include attacks, and will be limited to 15 seconds, all read by a station announcer, and there won't be more than 100 announcements for any one candidate. Station

expects to earn as much as \$20,000 in one year's worth of political announcements.

LifeTalk Broadcasting of Wapato WA found out you can't deliver satellite programming to translators in the commercial part of the FM band. It wanted to reach translators in Colledale TN and Sacramento CA. The FCC denied a request for a waiver.

Sand Springs OK KTFX 102.3 has a C2 CP which has attracted the attention of KWEN, K-95, Tulsa, with which it has had an LMA. Now that KTFX has the upgrade CP, an application of transfer of ownership to KWEN has been filed. Included in the deal is KTOW 1340 Sand Springs OK.

Saga Communications buys its first stations on the West Coast—KISM 92.9-KGMI 790 Bellingham WA—for \$8 million. KGMI also gets into Vancouver BC.

One Joseph Frank Ptak fined \$11,000 for operating an unlicensed station in San Marcos TX. Ptak didn't respond to a June 2 motion, and FCC ALJ Richard Siffel issued a cease and desist order against Ptak and anyone who may be aiding him.

The FCC's been writing licensees of auxiliary broadcast stations, such as FM translators, in an effort to find out the primary station the translator relays. The FCC says it will use this information to update its databases so that it can more accurately keep track of auxiliary license ownership. I told the FCC my off-air translator, W280CT Hermantown MN, will relay WUSZ 99.9 Virginia MN, although that might change.

An old-time radio engineer, Carl Smith, 91, died. Throughout the years, Smith (pictured), patented many design ideas, including circularly polarized antennas for FM and TV broadcasting (in 1948). This was about the time he built the first FM station in Cleveland (which is not identified in the *Radio World* article). It was not until the mid-1960s that circular polarized FM antennas appeared. The first I recall was KSTP-FM 94.5 St. Paul in 1966.

Another sad death to report—Zeb Lee, 87, who built WZLS 96.5 Biltmore Forest (Asheville) NC. He then was ordered to take it off the air so rival Biltmore Forest Radio could take over the frequency. But then he got it back thanks to a federal court and the efforts of Sen. Jesse Helms. Lee suffered head injuries in a fall in his driveway last March, and died Aug. 1.

Two satellite radio systems are American Mobile Radio Corp. of Reston VA and CD Radio, Inc. of Manhattan NY. "They'll compete to offer nationwide broadcasts of 100 channels of commercial-free, digital-quality music, news and sports programming, possibly beginning late next year," according to the trade rag *Electronic Business*. First, they'll have to have radios built, launch the satellites, and secure real estate for terrestrial "gap fillers"—an expensive proposition. AMRC has both public shareholders and deep-pocket owners like AT&T, General Motors' Hughes Electronics and Singapore Telecom., while CD Radio expects to be the first to offer the new technology. It hopes to break even at 1 million subscribers. AMRC hopes to break even with 2 million subscribers, and that should happen by 2003.

Costs are expected to be \$200 to \$400 for new car radios plus \$10 a month to subscribe.

The big question: "Are there 3 million kings of the road out there willing to pay for such a service?"

A Texas company offers a low-power FM transmitter, probably a Part 15 device. You set the frequency and record a message that can be stored on a chip and played over and over. No info on price, antenna, etc. but it can be found at <http://www.fmmarketing.com/>.

Spring Arbitons are hard to interpret for non-commercial stations, but a careful scrutiny of the records shows that the averages for non-com listening are 5.1 from last spring in the top 10 markets. Biggest gainers as reported in *Inside Radio* are: Philadelphia (44%) and Detroit (57%). Both markets saw commercial classical stations change formats and call letters. Best markets for educational radio: Washington and Houston with an 8.2 share. Worst: Chicago and Detroit at 3.3. Best station shares for NPR's *Morning Edition* were KQED-FM \*88.5 San Francisco, which ranks sixth in AM drive, WBUR \*90.9 Boston, seventh; WAMU \*90.9 Washington, ninth.

From the classifieds: RTW Micrographics, 207-B Leitersburg, Greencastle PA 17225; (717) 597-4785, offers microfiche readers, which can be purchased for reading NTIS databases on microfiche cards (as mentioned on p. 224 of the *FM Atlas*). Current databases are \$35 for the entire U.S.A., fiche readers \$95 handheld or \$235 desktop. Robert Wertime, owner.

FM transmitters 10 w \$950, 25 w \$1100, composite input, type N output, frequency agile, price reduction, PTEK, 888-411-5174 toll free.

Contemporary Christian group looking for engineers who are computer savvy to help find new FM noncommercial channels for translators and full powered stations. Resume to Bob Augsburg, WAY-FM, PO Box 887, Brentwood TN 37024-0887.

Realistic model TV-100 stereo TV receiver, 2-VHF and 1 UHF bands. "Very nice tuner," \$95, Jaxoni Electronics, 3149 E. Desert Inn Road, Ste. 94, Las Vegas NV 89121; (702) 791-3394.

Beier FM amplifier RFA-1 series \$150, Reynold P. Lark, Broadcast Services, 881 115th St., Amery WI 54001.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

Attorney Harry Martin said that National Religious Broadcasters wants the FCC to reconsider allowing DTV operation on Channel 6, claiming it could interfere with noncommercial FM stations.

I am scheduled to be the Sunday breakfast speaker at the Ontario DX Association, Mohawk College, Hamilton Oct. 4. They're honoring me on 50 years of FM listening. Others have been invited to take part in the seminar, "Communications into Our Future." Info from ODXA, PO Box 161, Station A, Willowdale ON M2N 5S3, CANADA; <http://www.durhamradio.ca/odxa/> . E-mail: 70400.2660@compuserve.com.

Consultant Don Markley tries to convince other engineers that it is absolutely necessary to convince station management and programming gurus "to allow regular scheduled shutdowns of the equipment," such as midnight to 6 once a month to go through the system. "Either plan for scheduled maintenance or experience unplanned shutdowns. . . Of course, the transmitter will still have an occasional failure that takes you off the air. But, if you maintain it properly, those failures will be at a minimum. The current mode of programmers seems to be to stay on the air at all times. If no interruptions are desired, the station must have a standby transmitter and antenna."

Until October,

FARMERSVILLE TX STATION CLAIMS TO SERVE DALLAS AS A "SUPER CLASS A." AND IT'S GOT STEREO.

**Stereo—Or to be \$tereo**

AZ Yuma KCFY \*88.1, "The Alternative" (not strict). "We have some other programs, like southern gospel Sundays and teen rock Sat

8 to 11 p.m., which I [Angel] do. I also hear Mexican stations on 90.7 and 98.3. The 90.7 is all Mexican music and language, while 98.3 is Mexican language and English music." Locations, calls of those Mexican stations unknown.

CA Rancho Mirage KMRJ 99.5, pr, "M-99.5,"

ID with Palm Springs. "Sure we're stereo. Why do you even ask? Are there still mono stations out there?"

CA Shasta Lake City KISK, rm, "Kiss." LMA with KEGR 102.7 Red Bluff-KNCQ 97.3 Redding-KEWB 94.7 Anderson.

CO Ignacio KUTE \*90.1, separate from KSUT \*91.3 there—with a public radio format after 9 a.m. plus seven hours of folk, rock, jazz, reggae—"a real blend!" A reader. "We drove via Aztec and Farmington NM to Crownpoint NM; 90.1 was clear most of the way! Only in valleys or south sides of hills did it fade! Wow!" [(from "P-103"

GA Blue Ridge WPPL 103.9, now "P 103.9"/  
 IN Hartford City \*88.1, on with no call letters assigned, and never saying any call letters, operating 8 a.m. to 3 p.m. school days, and saying: "88.1, a service of Blackford High School." Has r, k, and heard well at 22 km and somewhat at 32 km, with its mostly vertical signal. Not a pirate.

KY Garrison WOKE 98.3, g, southern, ID with Ashland-Portsmouth OH, "Joy FM" (strict).

LA Arnie ("ah-MEET") KTGG 96.5, still o, but adding West-wood 1 oldies "from the '50s, '60s and '70s." IDs with varying and rotating cities.  
 ME Rumford WLOB-FM 96.3, mostly mono with a tg format. "We turn the stereo off for mono programming because the coverage is so much greater, but other programs are in stereo, and we run music from 11 p.m. to 7 a.m."

MI Baraga WBUM 104.3, g, mostly from VCY America, based in Milwaukee. Owned by Dave Savolainen, Keweenaw Bay Broadcasting, but the number they announce on the air, (906) 222-8230, is an answering service. May ultimately be listed as non-commercial if the present format holds. No multi-city ID, no slogan.

MI Oscoda WCMB \*95.7. All CMU radio stations (6 in all) ID jointly.

MS Park Rapids KXXX 92.5, k, "Hot Country KX-92.5" (not strict). Its construction permit, issued to Bernadine A. Schumacher, was not shown in FMedia! Is 25000 h,v; 100 m. MS McLean WXAB 96.9 kf, Americana, which is 60% country, 40% bluegrass, to be parallel to WIGG AM 1420 Wiggins. "Its roots are in the American tradition; and is an album-oriented format. I developed it here after moving from Virginia. It's entirely a home-grown format. We expect the FM to be on by Nov. 1; any slogan is still in the works."

MS Richton WXHB 96.5, tm, owned with WKNZ 107.1 Collins, ID with Hattiesburg. MO Gallatin KGOZ 101.7, ID with Chillicothe, still "Z-101.7"

MO Knob Noster KCVQ \*89.7, parallel to KCVO 91.7 Camdenon, with which it has a dual-city ID on the hour. Its stereo comes via microwave link at a tower about 32 km away, feeding a "composite signal."

MO Malta Bend KRLI 97.5, m, "Curly," ID with Marshall, and owned by KMZU 100.7 Carrollton-AM.

MT Deer Lodge KQRV 96.5, k, but also bluegrass and elements from the Gavin Report's "Americana" format. Still "The River," ID with Butte-Anaconda. "We have a tower site that looks over all three towns. We're actually closer to Butte than to Deer Lodge."

NJ Manahawkin WYRS \*90.7. "They had been mono since they signed on in 1995."

NM Dulce (DOOL-see) KCIE \*90.5, ke, plus reggae, classic rock, oldies. On 18 hours a day. "We fund-raise throughout the year."

NM Eunice KYRK 100.9 stereo "when it's on the air. It comes and goes. It's a strange station," according to a competitor I called since the KYRK phone is disconnected.

NM Grants KTHR 103.7, ID with Gallup and rotating with Window Rock, Zuni, etc. Uses calls, "Thunder Country KTHR." Co-owned with KKOR 94.5 Gallup. KKOR IDs with Grants, and rotates among the other cities. Its KXXI 93.7 Gallup has a different transmitter site and doesn't ID with other cities. NC Semora WPXX 106.7, o, "Pix 106.7 FM," with Zippo in the morning. "I'm not sure what other cities we ID with. We get all our programming off a satellite service, and there's no announcer."

ND Cavalier KAOC, to be on later this month with k, "Can-Am Country 105.1." Towns it may ID with not yet decided.

ND Waihalla KAUJ 106.7, o, ID with Winkler MB-Grafton-Cavalier (ND). Uses calls,

Oldies 106.7  
**kauj**

"Oldies 106.7 KAUJ." Has "Zippo in the Morning" show. [serve Cincinnati OH Delhi Hills WJYC \*90.1, claiming to/ OK Tishomingo KTSH 99.7, uses calls with "Positive Hit Station." Seeks move to Tuttle OK, (comments Oct. 19, replies Nov. 3). OR Seaside KCYS 98.1, k[country] SD Dell Rapids KSOB 95.7, expected on this month; to ID with Sioux Falls.

TX Farmersville KXEZ 92.1, still m, "25% big bands, 25% old rock and roll, 50% popular popular music from the '40s to '60s," and is "EZ 92." ID with Plano-Dallas. "Yes, that's not just wishful thinking—we do get

into Dallas, and the signal is much better than we expected. It's a super Class A!" Owned by KHYI 95.3 Howe TX, which now IDs with Plano-Dallas-Fort Worth, the Gavin Report's "Americana Station of the Year." Bruce Kidder was named program director of the year, and "I'm not kidding," said Ken Jones, g.m. of both stations.

WI La Crosse WHLA \*90.3, but has stereo for only one hour a week: "Simply Folk" at 7 p.m. Sundays. "It's a strange situation. It's up to the engineers on duty. Some prefer to have stereo on for certain programs, and others, like in Wausau, who control WHBM \*90.3 Park Falls WI, choose never to turn it on."

TM Nuevo Laredo XHGTS 107.3, kl, Ranchera, "Radio Impacto" (not on 107.1 as listed previously), and all Spanish, with "some rare English advertisements," and saying, "sirviendo a ambos Laredos," which means "serving both Laredos."

#### Monophonic

OR Cannon Beach KCBZ 96.5, r, "mono!" Now "Z 96 dot 5."

WI Park Falls WHBM \*90.3—mono even for programs like *Prairie Home Companion* and *Simply Folk* (see comments above, under WI La Crosse)

ON Paris-Kitchener CBLA-2 \*89.1, mono, despite having a fraudulent stereo light.

#### Format Changes

*Formats are the same as in the "FM Atlas"*

MA Hyannis WPXC 102.9 rt, adding Howard Stern

MN St. Louis Park KMJZ 104.1 pr, adult alternative like "The Zone" 105.1. Now "104-1 The Point." Will get new call letters. "KMJZ staff had no idea the change was coming. CBS took over operation of KMJZ and KSGS/950 about a month ago, and just a few weeks ago told KMJZ staff there would be no changes. An announcer meeting was held on Wednesday (Sept. 23) to make plans for the fall ratings period. KMJZ was sponsoring a production at the Orpheum that doesn't open until Oct. 7. According to media reports, three

announcers and the program director were fired at 2 p.m. The sales staff was informed about the change just before it happened. CBS got an FCC waiver to acquire the stations from Jacor based on CBS' efforts for EEO outreach. The Commission finds CBS would have 27 percent of the Twin Cities' market radio revenues, which also owns WLTE 102.9-WCCO AM plus WCCO-TV 4. [(from "Kiss 107")

MS Gulfport WXYK 107.1 sr, "107-1 The Monkey!"

MS Jackson WJDX 96.3 k, to be WBKJ, changing calls with 105.1 Kosciusko, whose new calls and format are to be announced some time this month.

MS Liberty WAZA 107.7 r, hot AC

MS Lumberton WLNF 95.3 r, CHR

MS Newton WMYQ-FM 97.9 o

MO Columbia KCMQ 96.7 op, plus Bob and Tom

MO Florissant KXOK 97.1 p, parallel to KPNT 105.7 Ste.

Genevieve, now "The Point" (from "Mix 97.1"). Run by Sinclair Communications, which already owns WIL 92.3, KIHT 96.3, WVRV 101.1, KPNT and WRTN 1430 AM. "The historic KXOK call letters, which have been on the air in St. Louis since 1938 and transferred from 630 kHz in 1994, remain on FM for now. Unknown is whether the simulcast will remain, or go to a different format."

MO Lamar KHST 101.7 op, "Star" (returns to air, having been on 99.9; combo with KWXD 105.3 Asbury-KSEK-FM 99.3 Girard KS-AM).

NH Manchester WRND "91.7 cn, back on air, now parallel to NH Public Radio [from 97.7

NM Lordsburg KQTN 97.9 o, back on air, moving!

NY Kingston WBPM 94.3 still r, "B 94." Report Aug. p. 5, col. 1 was probably from a person who heard one of WKXZ Norwich NY's 94.3 translators. For instance, W232AT 94.3 Norwich has just been confirmed on the air (see above, "New"). [101.3 Boonville

NY Lowville WLLG 99.3 k, parallel to WBRV-FM

NY Montour Falls WMGZ 104.9 op, adds Bob & Tom

NC Fayetteville WQSM 98.1 r, adding "Bob & Sheri"

ND Grafton KXPO-FM 100.9 m,

ABC Standards, controlling

"Stereo," p. 4, col. 1). "The old time radio and country go to our AM. We think we're professional unlike what you wrote" (Sept. p. 2, col. 3).

OH Westerville WAXV 103.9 o, classic hits, \$[tereo],

"Eagle," LMA with WBXZ 99.7-AM Columbus.

OK Oklahoma City KOCC "88.9 gr, "K-Love," with that network buying it. WKY 930 AM has discontinued Christian music.

OR Seaside KULU 102.3 m, \$, "Coast 102.3"

TN South Pittsburg WKXJ 96.9 r

TX Beeville KYTX 97.9 m, adult standards

TX Midland KBAT 93.3 sr, "B-93"

TX Flower Mound KNKI 96.7 heard testing with o, possibly at low power before all affected stations clear nearby frequencies for the Class C upgrade. Speculation KNKI will go mono sports.

TX Fort Worth KTXQ 102.1 now so and "102" for now,

"jammin' oldies." It stunted by carrying other Chancellor stations, KYLD 94.9 San Francisco, KYSR 98.7 Los Angeles, WJMN 94.5 Boston, WHTZ 100.3 Newark NJ, every 15-20 minutes breaking away and saying "the old Q-102" is gone." It urged listeners to tune in KDGE 94.5 and KZPS 92.5. An irony of the situation is that eight months ago KTXQ employees and North Lake College did a seminar, "How to Succeed in Radio." Q-102 personalities Lex and Terry (from the morning show), PD Andy Lockridge, promotion director Jon Valmar and sales manager Dennis Sternitsky took part. Now "all these folks are fired and the station has dumped 25 years of being a heritage rocker to be the fourth station in town to play R&B oldies behind KKDA

730 "Soul 73", and R&B oldies-heavy urban ACs KRBV 100.3 "V 100" and KRNB 105.7." [92.5

TX Navasota KMBV 92.5 r, hot AC, "The Music Wave/WA Ephrata KTAC 93.9 lg, monophonic.

WA Spokane KEZE 96.9 gm, returns to air, but speculation its religion may go to KTRW 970 AM. KEZE being sold by Tom Reed to Queen B Radio.

WV Charleston WVAF 99.9 r [mornings

WV Westover WMQC 100.9 rm, plus "Bob and Sheri/"

WI Superior KRBR 102.5 still pr, nonID usually "New Rock 102.5 The Bear," with Bob & Tom excerpts at other times besides their morning program.

PR Vieques Island WVIS 106.1 sf, "urban AC and reggae" (see also p. 3, col. 2, "Facilities").

BN Tijuana XHRM 92.5 sr, with Jacor taking over its

programming; Jacor is already programming

XETRA-FM 91.1 Tijuana. This format moves from

Carlsbad CA 95.7 (see "Call Letters" p. 1, col. 3).

ZA Zacatecas XHZH 97.9 lc, "Radio Zacatecas"

### On Air—Real Stations and Pirates (Selected)

CA Sacramento area—K-Love Radio Network had pledged in its annual sharathon of \$7 million, a 13 percent increase from 1997. This amount includes \$255,000 in monthly pledges and one-time gifts.

CT Bloomfield "Prayze FM" 105.3 now has ads from one Joseph M. Suggs, supporting four Democrats running for the First Congressional District. Suggs chose to advertise on a pirate station when he must have known the station's status, despite saying he didn't. "His ad is actually helping to finance a violation of federal law. . . I have never heard of any politician running spots on a pirate before. This must be a 'first'." It won't take Hagar the Horrible to batter down the door. "I have seen the office building he operates out of. He has one heck of an impressive tower on top of the building. He is not trying to hide. And I doubt that the door is always locked. The FCC probably could just take down the antenna if it wanted to. I just don't think they are serious," M.B., Enfield by e-mail. Latest news is that the station has been given a big break by a federal judge Thomas Smith. Smith opted not to order it to sign off immediately. "But it was unclear how long the station would be allowed to continue broadcasting without a license," reported the *Hartford Courant* in a Sept. 25 story. Station owner Mark Blake and his lawyers said the station will try to obtain a temporary license. Previously, U.S. District Senior Judge Warren W. Eginton on Sept. 11 had ordered it to shut down until it obtained an FCC license. [See Aug. p. 5, col. 2.]

FL Boca Raton "WLYN" 30 watts estimated on FM, "same frequency as some of the Palm Beach pirates were using. . . There seems to be an 'FCC looks the other way' category when it comes to schools. Maybe they [the FCC] feel quilty about eliminating the 10-watt class." FL Newberry WNFQ 100.5 had been silent, now stunting. New format coming soon. In a combo with WTRS 102.3 Dunnellon-WMFQ 92.9 Ocala-WYGC 100.9 Gainesville.

FL Sarasota WSMR "89.1—ordered to evacuate when Hurricane Georges was threatening. "I'm not sure if they had to sign off, maybe they were without electricity." Calls to other area stations were unanswered.

GA Manchester WVFJ 93.3 27000 h.v.; 491 m, C1, but seeking 26000 h.v.; 498 m. One reader, Joseph Martin, objected to a June (p. 5, col. 3) article which states that WVFJ's Arbitrons show 101,000 listeners at any given time, which is expected to double when the new power and height are implemented. He checked published Arbitron figures "just to see how incredibly popular WVFJ is. It is not even listed in the Atlanta ratings. At the distance the current transmitter is from Atlanta, it would have a tough time putting a good signal [to] overcome

interference from WZGC (92.9) just 4 mz away. As it moves closer the problem will diminish some. . . Then I checked the Columbus listings and Arbitron says that WVFJ has an average of 700 listeners in a typical quarter hour there. Thirteen hundred listeners is roughly two orders of magnitude less than the claimed 101,000. [I have found that] so-called religious broadcasters like to lie a lot. A kinder soul would call what they do exaggeration, but I call it lying. Why they do this, God only knows. But the FMedia! folks should have checked the numbers a little more carefully before printing such outlandish claims.

"One other note: you mentioned WVEV "91.5 Cumming GA. I do not know if you or other readers have actually heard this station, but in my many travels around the country listening to many radio stations, both commercial and noncommercial, I have found that WVEV is the most commercial of the noncommercial broadcasters I have ever heard. They recklessly skirt the edge of the law on what is not allowed for broadcasters in the 87.9-91.9 portion of the band. They must go to bed each night praying that the FCC never gets around to checking their operation. . . Again, religious broadcasters practicing dishonesty! How appalling. These folks should be far, far above question, with almost super-human standards. The converse, however, is sadly the case in too many instances."

I offered the broadcasters mentioned above an opportunity to respond. Both did, within minutes of each other, by FAX. Rick Davison, WVFJ, included several points in his response: The new tower and facility should "more than double our current Arbitron coverage. Arbitron estimates WVFJ's cume persons at 101,200 . . . based on diaries from 1997. . . Cume persons are the estimated number of different persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. . . The new tower is located north of Pine Mountain among the rolling hills south of Atlanta.

"In the fall *The Atlanta Business Chronicle* listed WVFJ as the No. 20 station in the Atlanta market. . . This is remarkable in that WVFJ's signal reach[ed] less than 25 percent of the Atlanta market. . . I do appreciate the opportunity to correct the errors made in many recent articles. There is probably one truism upon which both of us as reporters can agree, it's difficult at best to 'get it right'."

Barry Holt, g.m., WVEV responds to the criticism of their underwriting: "WVEV is a nonprofit station, but nonprofit stations, both radio and television, are allowed to acknowledge support from the business community. These acknowledgement announcements may include the following information:

1. Name and address of the underwriter
2. Products and services including name brands
3. Telephone number [description is value neutral]
4. Description of product and services so long as/

Nonprofit Christian stations receive no federal support . . . and are supported by private contributions and business underwriting. Underwriting is not commercial and carries the following restrictions:

1. A call to action may not be included. For example: try product X or stop by and see us.
2. Comparative statements are prohibited. Example: better than, more powerful, etc.
3. Qualitative statements or words must be avoided like: good, best, big, etc.
4. In short, all statements must be 'value neutral'.

WVEV operates well within the boundaries of these regulations and is very careful not to even come close to the line. Our integrity is above question and our Christian position is well known and respected in the broadcast community."

IL Mount Sterling WBRJ 106.7 still t, mono, but with a pseudo stereo signal. It is a "100% simulcast of WTAD

930 in nearby Quincy. I figured that WBRJ was put on to fill a gap in WTAD's coverage to the east (the 930 signal has to protect WAUR in Sandwich IL, as well as WMIX 940 in Mount Vernon IL and WOKY 920 in Milwaukee WI, among others).

IN Fort Wayne W277AK \*103.3 with WQKO [91.9 Howe] in stereo, "but receiving interference from WKFR 103.3 Battle Creek MI."

KY Jenkins WIFX 94.3 now 4200 h.v.; 477 m, studios 201 Cowan St., Whitesburg KY 41858.

LA Natchitoches KDBH 97.3, having moved from 97.7 MD Oxon Hill "WDIS" 88.1 10 watts 24 hours daily from Discount Mart. Steven Franco is undaunted by an FCC warning letter he received.

MN Minneapolis KFAL \*90.3—at 10 watts since early August. "It promises a new transmitter soon, and is encouraging tuning to the 106.7 West St. Paul translator."

MO Troy KZMM 100.7 Troy is expected to be sold to KFNS 590 Wood River IL to fill in a gap to the west (the 590 signal has to protect WOW Omaha NE), but under the condition that the owner of KZMM buy another station in the area. The plan is for KZMM to move their calls and k format to a new frequency, while 100.7 would become KFNS-FM with t (sports) should the sale of the other station go through."

NJ Essex County "Krazy FM" 95.9, rap/reggae, mono, no ads, "heard in the Oranges and beyond."

NJ Hazlet WCNJ \*89.3, a licensed oldies station, is back on after being purchased by Sal Anthony. Anthony has a history of unlicensed broadcasting, having run an oldies station in Holmdel NJ. The NAB is celebrating Anthony's going legit.

NJ Long Branch WYYY Y-107 107.1 "wants to sell its building for \$600,000 and has moved to a studio in New York city. Programs are received by satellite from across the Atlantic Ocean," even though it is only 96 km from the studio. Studio is "out of state." It's a "double standard that affects those of us who are trying to serve our communities" when Big City Radio can get away with something like this.

NJ Newark WHTZ 100.3—with the Elvis and Elliot Morning Show, which is determined to overtake Howard Stern in the morning ratings race. Elvis Duran and Elliot Segal teamed up 2½ years ago. Their show has gone from "just about nowhere to the top five in New York," according to Arbitron.

NY Brooklyn or Queens 95.1 "La Mexicana" on 2-5 p.m. most days with Latin music and pre-recorded Spanish IDs, not connected with Radio Mision Evangelistica 95.1 in Bronx (May p. 4, col. 2), "which is still on nearly all the time." Also on in Brooklyn—a new Haitian all music station on 88.5, making three active Haitian pirates in NYC. It is secular, "unlike the other two pirates and WYGG 88.1 (Brooklyn) Asbury Park. The calls are 'WVBF' (or possibly 'WVPF') and they use a nonID that sounds like 'Radio Etensef'. It's mono. . . but one night two guys came on and talked in Creole about the other Brooklyn pirates and the FCC. They asked listeners to call in at (718) 856-9843, 9844 and 9845. All three numbers are unlisted, but most phones with the 856 exchange are in the Flatbush area." Heard full strength in Queens at 12 km, "despite being adjacent to WBGO \*88.3 Newark NJ." Another microbroadcaster is Radio Kiskeya 89.3, a non-religious Haitian from the Hollis/Queens Village area. "One of the phone numbers they gave belongs to an address on 202nd St., near 100th Ave. Kiskeya is the Creole spelling of Quisqueya, an old name for Haiti. . . The 100.5 Immokalee FL station of the same name (Dec. '97 p. 4, col. 1) was still on as of June, another Radio Kiskeya is on 88.5 in Port-au-Prince." A new Haitian pirate was heard on 88.9, \$, music, giving location as "New York." They signed off before \*88.9 stations WMCX West Long Branch NJ and WSIA Staten

Island signed on [and] WKCR \*89.9 New York was running its usual Sunday morning Haitian program—all this below 90.1.

NC Nags Head WNHV still on 92.5, not yet on 92.3, "Carolina 92," and parallel to "The Wind" WYND 97.1 Hatteras. [200 m, non d-a

PA Reading WIOV-FM1 105.1—licensed at 2800 h.v./ SC Hampton WBHC-FM 103.1, but applying for 92.1A. TX Conroe KKHT 106.9 now on with 97000 h.v.; 579 m, owned Salem Communications since 1995.

VT "Radio Free Vermont" in the Rutland area on 96.5 was visited by Victor J. Tagliaferro of the FCC, who took signal strength measurements. However, the station noticed and told Tagliaferro not to come onto the property, which he respected. He took measurements and then was informed that RFV felt their operation legal because the signal did not cross state lines.

WA Aberdeen K205DD \*88.9, Bremerton K201DM \*88.1, with KAWZ Twin Falls. "They have translator IDs at :59, a short prayer and then a local ID."

WA Everett K201EN \*88.1, \$, KAWZ 89.9 ID heard.

WI Madison WIBA-FM 101.5, but was "knocked off the air" around 9:30 p.m. Friday, 9-25 and remained off through 9-26. [Harrington Harbour CFTH-1 97.7 AB Banff CHFM-1 99.3, MB Winnipeg CJUM 101.5, PQ BC Sooke CBCV-1 \*99.5, CBCV \*90.5 Victoria, mono, relaying CBC Radio 1, except 6-9 a.m. and 4-6 p.m. CBCV's transmitter is on Salt Spring Island, along with that of CBU-FM1 \*92.1. "I'm unsure if [CBCV] has displaced K213BA 90.5 Bellingham WA (KUOM 94.9 translator) on Orcas Island, but presume so due to close proximity."

ON Saint Catharines CFBU 103.7 from Brock University. "The signal on my car radio goes west as far as Jordan ON."

PQ Montreal CHOM 97.7 still Stern-less. One thought was that the CHUM Co. would make the Commission more agreeable come licencing time and to increase the number of stations it owns in Montreal. . . Q107 in Toronto claims that they will keep Stern on the air. "In other words, it's still making money."

CUBA—Radio Rebelde 96.7 "is being heard in Florida."

AUSTRALIA—Perth Classic FM 97.7, c. 100000 watts ERP and Triple J 99.3, "a youth/rock network" with 100 kw. "Both the FM services are national and are delayed two hours to time correct for Perth/Western Australia."

Sydney 90.5—Good News Alive came on in July. "The station features Bible teaching, testimonies, Christian contemporary and praise music, and the new World Wide Christian News Service."

SWEDEN has 8.8 million people, with 90 percent claiming membership in the Lutheran State Church, "but only five percent of Sweden's people attend any church. . . Radio and television are privatized and there are 160 neighborhood radio stations, which broadcast church services and some Christian programs. . . The pattern in Sweden is similar to other nominally Protestant European countries with a serious decline in the state church, but a corresponding rise in the ministry of independent churches, particularly Pentecostals"—from the Fellowship of European Broadcasters in *Religious Broadcasting* magazine.

ZAMBIA Lusaka 106.2, \$, serving a 120 km radius, and on 24 hours a day from the roof of the Pamodzi Hotel. Known as Radio Christian Voice. Over 50 percent of the population is listed as Christian (in a population of 9 million, according to *Monitoring Times* magazine).

**Selected AM Happenings**

AL Andalusia WKYD 920 off air, with no plans to return.  
 AL Altmore WGYJ 1590 deleted by FCC  
 AL Monroeville WYNI 930 back on, classic country, parallel to WYDH 105.9 Altmore.  
 AZ—"The state of AM in Arizona is pathetic. They are left with no engineering, so to speak. . . . Stations are over-modulated, hum like KCWW (1580 Tempe), and have spurs all over the place. It's maddening. I say bring back the engineering staff and let them make the station sound nice again. Maybe people would listen more if the AMers did not sound worse than ever due to neglect," R.D., AZ.  
 CA Los Angeles KKTR 1650 "is falling apart at the seams. The modulation is gone, there is a very loud hum and it sounds like the transmitter will die soon. This is the result of not having engineers do repairs. Radio has become a rather deplorable medium; the listener be damned," R.D., AZ, via e-mail  
 CA Oakland KNEW 910 had been country, now hot AC, relay of KIOI 101.3 San Francisco. Jim Gabbert who founded KIOI and Channel 20 KOFY-TV, along with Mike Lincoln, "just made a bundle by selling KOFY-TV to Granite Broadcasting. . . . They're putting \$70 million of the

proceeds of the \$174 million sale into a trust to benefit the existing Trust for Public Land.  
 CT New Haven WYBC 1340 returns to air; had been WNHC, now parallel to WYBC-FM 94.3.  
 FL St. Petersburg WSUN 620—changing format. Now simulcasting Time Warner's News Nine cable TV service.  
 ID St. Anthony KIGO 1400 had been silent; now classic k  
 LA New Orleans WWL 870 had one of its rare silent periods as Hurricane Georges was bearing down. It was off Sept. 27 from 9.25 p.m. to midnight "due to tree damage at the transmitting sites." I tuned in to hear the frequency eerily silent; others reported some reception from an 869 kHz station in Colombia. Prior to leaving the air WWL said to tune to 101.9 (WLMG) for emergency information.

IA Iowa City WSUI \*910 from the storm of June, which knocked down two of its three towers: "To this date they remain laying smashed on the ground by Hawkeye Court. Don't know of any plans to fix it real soon."  
 KY Gray WKYZ 1590 deletes  
 MN Roseau KRWB 1410 had been silent; now country.  
 MO Kansas City WHB 810: "It changed to only 5 kw night in 1983 for better coverage to the west, but 50 kw day.

**THE FARM**

Still licensed Kansas City, but studios are here in Carrollton. . . I'm sure WGY (810 Schenectady NY) also likes the change we made.' In the same studio are KMZU 100.7-KAOL AM and KRLL 97.5 Malta Bend MO. "We only program from Kansas City half an hour a day" on WHB.

[ing moved from Topeka  
 WREN 1250 had been silent; now black gospel, haw-  
 NH: "In New Hampshire, only two AM stations went for stereo. The first was WTSL in Lebanon . . . on Oct. 10, 1986. Shortly afterward, WHEB in Portsmouth began broadcasting in AM stereo, but the experiment proved short-lived as the station went off the air in 1991. Interestingly, WFEA in Manchester considered switching to stereo in 1986 when a new owner moved the studios out of Merrimack and installed a new transmitter. A stereo jingle package was recorded in January, 1987, but WFEA remained in monaural." [From *Granite and Ether: A Chronicle of New Hampshire Broadcasting*, by Edward W. Brouder, Jr.] [months ago.]  
 NM Taos KK11 1340 "remains off as it was two/  
 NY Schenectady WGY 810  
 fired afternoon talk host Mark Williams, 42, who said he "was taken by surprise."  
 The station cited poor ratings  
 In a six-page letter, Williams told station officials, "I truly believe I have gone above and beyond and that I deserve better than a bum's rush out the door." He's being replaced by Jay R. Gach, 45, a conservative the *Buffalo News* called a 1990s version of Archie Bunker. Gach also worked in New Orleans radio.  
 NC Eden WCLW 1130 silent.  
 OH Lorain WOLW 1380 and WELW 1330 Willoughby added programs in Spanish following the FCC's shutting down of four Cleveland [FM] pirates that catered mainly to hispanics (last month, p. 4, col. 1). "It remains to be seen how the Hispanic community will respond to the FCC action." According to Duncan Radio estimates, the highest ranking AM station for revenue was WTAM 1100 at No. 9 with \$4.5 million.  
 Leading the market (all in millions): WMJI 105.7 \$11.9, WZAK 93.1 \$10.1, WGAR 99.5 \$9.2, WDOK 102.1 \$8.5, WNCX 98.5 \$8.25, WOAL 104.1 \$7.7, WMVX 106.5 \$5.4, WMMS 100.7 \$4.9; WTAM; then No. 10 WZJM 92.3 \$3.5 million.

MARK WILLIAMS

OH Marietta WYLI 910 had been silent; now sports.

**FM Rulemakings Proposed**

**First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed**

GA Covington (from Milledgeville) 100.7C3 (see Aug. p. 8, col. 3 for other Atlanta move-in proposals). This might be mutually exclusive with WHMA-FM Anniston AL's proposed move to College Park GA 100.5C3.  
 GA Sugar Hill (move from Toccoa) 106.1C1 for C, WSTE, Nov. 2, 17  
 IL Beaverville 106.5A counterproposal  
 MS Goodman (from Kosciusko) 103.3C3, WZKR, Oct. 19, Nov. 3  
 MO Linn 103.1A, Nov. 2, 17  
 MT Bigfork (move from Wallace ID) 100.7C, KSHL, Oct. 26, Nov. 10  
 NM Peralta (move from Grants) 105.5C1 for C, KQLV, Nov. 2, 17  
 OK Alva 99.9C1 for 99.7C1, KOLS, "show cause/why not?"  
 OR Mooreland 100.1C1 or 104.5C1, Oct. 19, Nov. 3  
 OK Woodward 106.3C1 for 100.1C1, KWFX, "show cause/why not?"  
 TX Refugio 100.5A, Nov. 2, 17  
 WY Cody 102.5C3 counterproposal

**FM Rulemakings Finalized**

No filing windows because of freeze

IL Carbondale 101.5C1 for B, WCIL-FM  
 IL Glasford (move from Canton) 101.1A, WBDM  
 KY Brownsville (move from Beaver Dam) 100.7C3 (for 100.7A), WKLX  
 KY Preston 101.3A—dismissed Joe Myers' proposal  
 KY Strugis 101.3A  
 MO Arcadia 97.3A  
 MO Ellington 106.7A for 103.9A, KAUL  
 TN Martin 101.3C3 for 101.7A—denied WCMT-FM petition

**Court Denies FCC EEO Appeal**

The DC circuit court ruled against the FCC in its appeal to have the equal employment rules apply to broadcast stations with five or more fulltime employees. Chairman Bill Kennard was "extremely disappointed" in the ruling. The NAB, meanwhile, is advising its members to support affirmative action. **M Street Journal** said the Commission shouldn't have picked the feisty Missouri Synod Lutherans in going after KFUD-FM 99.1-AM for EEO reasons. The FCC has now suspended the rule that stations must file an annual employment report, Form 396.

**Small Print Happenings and FM Industry News**

CILQ Q-107 Toronto yanked Howard Stern's show off for 90 minutes recently because it would have violated Canadian regulations. But the show is hanging on, and expected to last the three years of its contract. A "best of" past shows aired. Q-107 uses an eight minute delay.

More next month. Until,

 KY Midway WAHY 107.9, sr, "Today's R&B and Classics V-108," ID with Lexington. "The announcer gets out 'WAHY' in record time, and makes it 'very' hard to understand. There must be a call change in the works," although maybe they print the "Y" with a short stem to look like a "V." LMA to buy with WMXL 94.5-WBUL-FM 98.1-WLKT 104.5 Lexington, WKQQ 100.1 Winchester.  
 MI Flint WGR1 \*89.9, sg  
 TX Ingram KTXI \*90.1, cn, info from KSTX, classical from KPAC San Antonio. "All our stations are stereo!"  
 WA Royal City KRCW 96.3, S, I, grant to 19500 h,v; 241 m. A commercial station.  
 WY Green River KFRZ 92.1, k, ID with Rock Springs. Uses calls: "KFRZ The Freeze."  
 ON Paris CBLA-2 \*89.1: Had drama in true stereo, plus theme music with good audio separation, but a miserable nonidentifier. "CBC Toronto 99.1." Never heard the proper call letters and city of license as Industry Canada requires at or near top of the hour.  
 Bud Price, WKXQ 92.5 Rushville IL quoted from a letter I sent to his *Radio Shopper* column, mentioning how good a practice it is for a station to turn off its stereo generator, and I wondered if WKXQ did so for sportscasts. He said: "No, we don't turn off the pilot while broadcasting monophonic

programs. . . In the early days of stereo there was a lot of 'fooling around' with the pilot. KRCH [93.7?—b.e.] in St. Louis used to read the hourly news as the 'Channel Check' report. They would read alternate stories first on the left channel, then on the right. When I was Chief at WVPC [97.7] in Monmouth IL, in 1967, we put in two phone loops with two remote amps, and broadcast a basketball game in stereo. One announcer did play-by-play on the left end of the gym (or dial) and the other guy took over on the other channel when the ball crossed mid-court. We only did it once. It doubled the phone expense, and didn't bring any more revenue."

**Format Changes**

*Formats are the same as in the "FM Atlas"*

AL Dora WZJT 92.5 rp  
 AL Eufaula WDMT 97.9 o, using Jones Oldies 9 to noon and 6 p.m. to 6 a.m.; local classic hits otherwise.  
 AZ Glendale KWCV 103.5 drops country to keep up the ratings of co-owned KNIX 102.5, so now it's stunting. Z-Spanish is buying it for \$22 million.  
 AZ Phoenix KNAI \*88.3, S, I, still "Radio Campesina," sharing time with KPFI. KNAI is on 14 hours a day. All "Radio Campesina" stations are commercial except for KNAI and KUFW \*90.5 Woodlake CA, and programmed 50 percent of the time locally. The rest of the time they take a satellite feed from Bakersfield, according to engineer Chris Compton.

**On Air—Real Stations and Pirates (Selected)**

AL Ozark WAQG "91.7  
 AR Mountain Pine K215CP "90.9, claiming to serve Arkadelphia.  
 AR Washburn K212EV "90.3  
 CA Woodland K284AC "104.7  
 CT Bloomfield "Prayze FM" 105.3: "I'm still blown away at the unmitigated temerity of this blatant pirate. Snubbing its nose at the Commission. It is making a mockery of the FCC. Trouble is, in the Commission's own words, 'The longer Praise FM stays on the air, the harder it will become to get them off. Power level must be quite noteworthy, as coverage is impressive from the modest location. How much longer?' Jeff H., WTIC-FM Hartford, via e-mail (see also last month, p. 5, col. 2).  
 FL Big Pine Key WWUS 104.7 lost its satellite dish to Hurricane Georges, which gave the station a great opportunity to go live with a call-in format. It was the only source of info for its community during the storm, as FCC chairman Kennard noted in a speech to the NAB.  
 FL—several stations have transmitters in cities other than their city of license. Some outstanding examples are WKIS 99.9 Boca Raton (just south of Hollywood FL), WMXJ 102.7 Pompano Beach and WHQT 105.1 Coral Gables in Carol FL. Carol City is also the site for WHYI 100.7 and WPLL 103.5 Fort Lauderdale, while Fort Lauderdale's WBGJ 105.9 is at WKIS' site south of Hollywood FL, and WRMA 106.7 is in Miami FL. "I discovered these discrepancies while investigating why a signal from a station listed as Boca Raton was causing so much interference with my VHF receivers," W.J.K., Hollywood FL.  
 FL Tallahassee W250AE 97.9 is still on with WAFT 101.1 Valdosta, and suffering a monophonic pickup.  
 IL Chicagao area—87.9 with an eastern European language, according to a reported to Glenn Hauser's World of Radio.  
 MD Baltimore WJHU "88.1 carries World Radio Network via satellite from midnight to 5 a.m. The service may expand to other cities via National Public Radio. WRN broadcasts are from various nations, usually also on shortwave, but all in English. WJHU has been receiving "positive response from their listeners," according to an article in *Monitoring Times* magazine.  
 MI Adrian "Radio Free Lenawee" 97.7 continues on air. Michigan broadcasters are fighting to take it off the air. The case reached a U.S. District Court judge who refused to grant the government's motion, claiming the

court lacked primary jurisdiction. The Michigan Association of Broadcasters disagrees, and in its newsletter mentioned several politicians who appeared on a "Meet the Candidate Rally" on the station. The MAB sent a letter to all the candidates saying by appearing on the station it could legitimize it and thereby they'd lend support to an unlicensed station. Geoffrey Fieger, a candidate for governor, was one of the prominent politicians to appear on the station.  
 Jack Koehn, president of WLEN 103.9 Adrian, has taken a strong stand against the station, but so have Radio Free Lenawee listeners. They've contacted Koehn stating they would boycott all of WLEN's advertisers. One listener wrote that Koehn should publicly apologize for attempting to keep the candidates from appearing on the station. "However, radio stations from across the country have sent support letters to Koehn, praising WLEN in its efforts to take the station off the air." Radio Free Lenawee began broadcasting in 1996, and was off the air for a while because of complaints it interfered with an unnamed Toledo station, but later returned to the air. Its operator, Rick Strawcutter, believes the FCC is violating his First Amendment freedom of speech.  
 MI Detroit—"Mexicoville" area south of downtown—94.3 La Cadena del Milagaro, with Puerto Rico religion, estimated at 500 watts. Also one on 95.9, a bit weaker, "maybe about 10 watts," with "tropical" music. It was later reported the 95.9 station had equipment seized by FCC officials and U.S. deputy marshals. With guns drawn, they entered a second-floor apartment at West Vernor and Hubbard and ordered DJ Rafael Barrios to stop broadcasting his La Maquina Musicale. "They carted off the transmitter, antenna, fax machines and telephones. Myra Zemora, who ran the community station with her husband Pedro, said they had been on about eight months" and covered a 16-km radius. "In May, the FCC closed La Gigante-Caribe FM (106.3), which operated from a Michigan Avenue storefront."  
 MI Manistique W216BF "91.1, having moved from 99.7. "We were interfering with a WI station that upgraded" (WLTM 99.7 Sturgeon Bay).  
 MI Trout Lake W293AG "106.5: Primary WHWL 95.7 Marquette was asking on air for \$11,000 to upgrade this translator to a Class A FM station. It would seek 98.9 because of interference to WKPK 106.7 Gaylord MI. Also on is nearby W259AD "99.7 Newberry, which will continue to feed the Trout Lake station.  
 MN Winona K203BR "88.5.  
 K299AB "107.7. It is heard in the valley, but half way up the hill toward Rochester "there's a real mess with KLCX St. Charles interfering. On top of the hill it's only CD-107.7 you hear."  
 NJ Hazlet WCNJ "89.3: Regarding the mention last month, p. 6, col. 1 about Sal Anthony "buying" WCNJ, "I had the interesting pleasure of talking with Mike Selvanto, who used to own WCNJ. . . Mike told me that Sal Anthony is in actuality up to his old tricks again. Supposedly when Sal took over WCNJ, he neglected to renew the license, so now WCNJ is running as an unlicensed station with Mr. Anthony at the helm. . . Meanwhile, Mike is doing some questionable activity himself. He has set up a radio studio on the major highway that runs through Toms River, and he is in the process of setting up, not one, but TWO stations—one at 89.3 and one at 90.3 [supposedly testing]. When they officially go on the air, they expect to be stereo with 200 watts" at 91 m. "The legality of this operation is very questionable," J.G., Toms River, by e-mail.  
 NM Placitas K220GM "91.9, claiming coverage for the K-Love Radio Network of Albuquerque and 505,000 souls.  
 NY Brooklyn 88.5 Haitian pirate

heard on a recent weekend.

"It's just not on all the time like it was originally"

NY Queens, Elmhurst/Corona area "Radio Alerta" 96.5, mono, 24 hours a day with a Spanish Christian format.

"May interfere with reception of RBC, the Indian service on the 92 kHz of WQXR 96.3 NYC. Elmhurst has a lot of Indians. Also on occasionally is another Spanish Christian music station on 102.3, from somewhere in Queens."

PA Chambersburg 88.3, heard evenings in stereo and featuring Bruce Springsteen. "Very professional" audio, no announcing, possibly 10-20 watts. "Testing for a translator?"

PA Mercersburg "WMER" 102.1, believed mono, with a variety of music from Mercersburg Academy, possibly a Part 15 device, but heard up to 8 km away.

ON Hamilton CKLH 102.9—when this station came on it became heard to hear CFMX 103.1 Cobourg in Toronto, hence the need for CFMX-1 96.3.

ON Toronto CJRT "91.1 two years ago lost its Ontario government support, which came to 40% of its revenue, about \$1.3 million a year. Partially making up for the loss was increased individual contributions

coming to \$1,940,000 (up from \$1,106,000 the year before), but corporate underwriting is down to \$365,000 from a high of \$419,000

in 1997. Some 11,900 individuals donated for an average of about \$100. The station announced a new campaign to raise revenue to cover the shortfall. It is seeking approval to allow more corporate and sponsorship messages. It has requested the CRTC to permit "the same number of sponsorship messages (in minutes) as is provided to almost all college/campus radio stations, well below the level of commercial radio." CJRT claims it isn't "going commercial," but we'll have to wait and see how it sounds when and if the request is granted.

106.3 playing '70s-'90s music in stereo. Tape loop repeated every 10 minutes. Strong on the eastern fringe of downtown, near King and Parliament streets. No IDs heard.

ON Guelph CIMJ 106.1, but a listener in OH claims to have heard "Magic" from Guelph on 106.5; an unknown relay? [Burlington.

ON Woodstock CKDK 103.9, still parallel to CING 107.9/ "The Mexican stations on 90.7 mentioned in Oct. (p. 6, cols. 2-3) might be XHMOE Mexicali BN, judging from its location on the map, and maybe the 96.3 station is XHFJ Rumorosa BN."

### Off Air—Or Not Yet On

FL Immokalee WGCQ 92.1

IL Macomb W213AH "90.5 'has been off all summer."

MN Winona KSMR "92.5

TN "Radio Free Memphis" 90.7 did not leave the air voluntarily, so U.S. Marshal's service and U.S. attorney's office personnel seized its equipment. The NAB quipped it has the "Shut-Down Blues."

## SCS/SAP Services

### Symbols are as in the FM Atlas

- DC Washington WASH 97.1 still †, L The 67 kHz is "WWTU" (AM 700 simulcast) Arab-American Radio Network from Walkersville MD, while the 92 is WACA AM 1540, Radio América (Spanish, from Wheaton MD).
- IN Indianapolis WHHH 96.3 †M, light jazz. Until receivers get out to the public and the stores, it will exist for the engineers' amusement. "I have the equipment ordered," M.H., engineer with Hoosier Radio & TV.
- MI Ann Arbor WUOM "91.7 †(), no †Q,U
- MI Birmingham WCSX 94.7 no SCS [had †(X)]
- MI Cadillac WOLW "91.1 †G, simulcast with WPHN "90.5 Gaylord. The 67 is CSN, Children's Sunshine Network, while the 92 is Sacred Favorites Radio. SFR often has scripture and short programs, like *Back to Genesis*. Both have the nonID (on main carriers): "Northern Christian Radio."
- WKJF-FM 92.9 †M, U, adding 92 kHz telemetry.
- MI Detroit WKRK-FM 97.1 †W, 67, nondigitalized voiced NOAA KIG-53. A talk alternative to main carrier's Howard Stern!
- MI Escanaba WGLQ 97.1 no SCS [had †( )]
- WYIX 104.7 no SCS (had †X)
- MI Flint WFUM-FM "91.1 †( )U
- MI Gaylord WKPK 106.7 †U
- MI Harbor Springs WCMW "103.9 †, U. Had public radio programs as did "WXXU" "96.7 Rogers City, which gave a separate on-the-hour ID separately as WVXA (primary is in Cincinnati OH).
- MI Houghton WGGJ "91.1 †, 67, but at low injection, plus mutes frequently, obscuring content. Station seems at lower power. Its studio in Houghton was wide open but unpersoned, with no listing in the telephone book. An inhabitant of the office across the hall at Michigan Technological University said, "I only see somebody in the morning doing news."
- MI Houghton Lake WUPS 98.5 no †( ); has †U, 67
- MI Lexington WBTI 96.9 no †( ), but has †, U. Uses calls, no "B-96.9." Still IDs with Sarnia (ON)-Port Huron.
- MI Marquette WNMU "90.1 †W, 67, a relay of digitally voiced KIG-66; also heard on relayer W272AG "102.3 Marquette.
- WFXD 103.3 no SCS (had †M,U)
- MI Ontonagon WUPY 101.1 †, U
- MI Petoskey WLXT 96.3 †C (not 67) with WMKT 1270 Charlevoix
- MI Saginaw WKQC 98.3 still †M,R

MI Traverse City WLJN-FM "89.9 †G, CSN (not 92 kHz)

WTCM-FM 103.5 †U

NY Buffalo WNED-FM "94.5 †Z, 67 only, no †B, 92.

NY New York WNYC-FM "93.9 drops †( ); still has Polish on 67 and Z, "which seems to be somewhat below 92 kHz."

NY Niagara Falls WKSE 98.5 †C,C. The 67 is a relay of WGR 550 Buffalo and the 92 relays WBEN 930 AM Buffalo.

OR Portland KATU Channel 2 has NOAA weather on iTSA [now.

KOIN 6 had a barker channel and all commercials, but is off for/ KOPB Channel 10 has just turned on iTSA with a barker channel. That will become the home to the Golden Hours Radio

Reading Service. "We're worried about Bend, where it will be on Channel 28. Radio Shack only has five 12-604 radios in this entire region, and we're not sure we will find as

reasonable a radio with UHF TV audio and as good quality as you provide... Holly and I just love our radios," Jerry D.,

director, 6H Radio Reading Service.

KBOO "90.7 †K, 92 (not †E, 67)

USA and expanding to Europe—Mobiltrak, based in Chandler AZ, uses sensors near busy highways to measure the radiations of radio receivers to come up with ratings. "We need a good FM

reference like your *FM Atlas*." I suggested Timo Leponiemi of Finland who has published the "European FM Handbook" at

<http://www.sci.fi/~fmby/fm/efmh/efmh1999.htm>

Techamerica, a division of Tandy, has just published a new 656-pp. catalog (CB98) with technical products and publica-

tions. "There is an interesting SCS decoder kit by Vectronics that appears to have more components than the simple, tunable models you offer."

ON Brantford CKPC-FM 92.1 no SCS, open carrier 67 kHz only.

ON Guelph CIMF 106.1 †(), no †Z

ON Kitchener CHYM 96.7 †, U

ON London CFPL-FM 95.9 †U, 67 (no †()) [105.3 Kitchener

ON Toronto CHUM-FM 104.5 †M,R, same as on co-owned CFCA/ CFNY 102.1 †X, 67, no 92

ON Wingham CKNX-FM 101.7 †U, 67 (not †X), "FM 102"

very strict (did not use call letters on or near top of hour)

URUGUAY Montevideo and also Argentina, various cities—SCS is being used for children's programming, weather reports, traffic reports and music. "I will let you know if it is 67 or 92 kHz,

but we will need radios in the hundreds to supply our export clients."

## NonIDs, Not Just Slogans

*Mentioned usually without call letters; "strict" if a station uses call letters once per hour (at or near top of hour) as required by FCC and Industry Canada*

FL La Belle WWWD 92.5 Kix Country 92.5, parallel to WIKX 92.9 Charlotte Harbor ["Joy 89.9 FM"]

**MN Caledonia KHTW 94.7 with La Crosse WI, "Soft Rock 94.7 FM"** [Jackson  
**TN Henderson WHHM-FM 107.7 with/**

**Selected AM Happenings**

CO Brighton (Denver) KLDC 800 has AM stereo. "We're a teaching and music station. My pastor does *Prepare for War* (heard on WWJC 850 Duluth MN) that I know many people don't agree with."  
HI Honolulu KISA 1540 all Korean, no longer simulcasting KWA1 1080 Honolulu.  
IN East Chicago WWC4 1270 had been silent, but returned to the air with a satellite black gospel format and no staff. Sold for \$2.1 million to Alliance Broadcasting.  
IN Indianapolis WSYW 810 drops classical for brokered Spanish.  
IN Union City WBNN 1030 leaves the air "to clear the way for WNVR Vernon Hills IL, also on 1030."  
IA Iowa City KCJJ leaves 1560 for good, now on 1630 with a "huge signal. . . Neat format too; it's been a long time since I've heard a non-simulcasting AM station running music I actually enjoy," D.S., TN via e-mail.  
MD Ocean City WETT 1590 convinced the FCC it's a struggling low-power, small market station, and got its \$8500 fine reduced to \$1500. It had been found operating on its daytime pattern at night, over its legal power, and there were problems with its public file.  
MN Minneapolis KUOM "770 "Radio K" was off four days while KBEM "88.5 Minneapolis moved its transmitter and antenna from downtown Minneapolis to the KUOM site, Falcon Heights MN, near St. Paul. The job was only supposed to take a couple of hours. It happened during pledge time at KUOM, with KBEM now 2900 h.v.; 146 m, d-a. KBEM has jazz and traffic reports, appealing to some of the jazz fans who may have tuned to KMJZ 104.1 (last month, pp. 4-5).  
MN Shakopee KSMM 1530 has converted from Christian talk to smooth jazz, in wake of KMJZ's dropping that format. KSMM is also the flagship of a group of small AM stations on which ex-WCCO star Ruth Koscielak has started her "comeback." [See "Selected AM Happenings," May p. 6, col. 1.]  
MS Eupora WEPA 710 had been country, now silent  
MS Fulton WFTO 1330 reported silent  
MS Tupelo WELO 580 had been silent, now country. It was parallel to WZLQ 98.5 there when first returning.  
NC Hamlet WKDX 1250 had been silent; now gospel.  
OK Muskogee KMUS 1380 had been silent, now contemporary Christian.  
RI Wickford WKFD 1370 silent.  
TN—the following AM stations reported last month as deleted (p. 8, col. 2) are said to be on the air and working

on the "paperwork problem" with the FCC: WEAB 960 Adamsville, WUAT 1110 Pikeville, WTYR 1550 Soddy-Daisy, as well as WKYZ 1590 Gray KY.  
TN Memphis WSFZ 1030 silent. [bluegrass.  
VA Blacksburg WKEX 1430 had been country, now/VA Christiansburg "1260 now WWVT (had been silent as WNNI). It was donated to the Virginia Tech Foundation, and is run in a combo with WVTF "89.1 Roanoke.  
USA—the NAB has asked the FCC for a 22 dB reduction in the amount of AM band RF energy that is conducted back into the power lines. It argued the changes are needed to ensure "interference-free service from AM broadcast . . . operations." Microwave ovens and RF lights are examples of appliances that can re-radiate noise along the power lines. Test results pointed out by the NAB would have the RF energy conducted into power lines be reduced to approximately 20 µV, 22 dB lower than the strict FCC limit that now applies to computers and other digital devices (250 µV).

Sale of several Children's Broadcasting Corporation stations may have fallen through. Rumor has it that the Catholic Radio Network couldn't come up with enough money to purchase all the [AM] stations. Some may go to Radio Unica, a Spanish-language web. "The sale of CBC's stations to Global Broadcasting fell through earlier this year."  
ON Toronto CBL "740 and Montreal CBF "690 and CBM "940 were to have left the air Oct. 20 in favor of their FM affiliates, but they remain on past that date. "The change to FM was the best move they could have made. I live in what used to be Scarborough, now Toronto, and reception of the 740 frequency was terrible," V.F. by e-mail.

POLAND—255 and 1503 kHz are the only AM frequencies still active. Latter has a Christian format, aimed at Scandinavia, and operates only at night. [This updates the story in October p. 8, col. 2.]  
SOUTH AMERICA—tropical band AM radio, usually 2300 to 2500 and 3200 to 3400 kHz—is declining because of inroads by local FM stations and more telephones.

Tropical stations in the Andes regions of Bolivia and Peru may be the last holdouts, while those in Venezuela, as well as areas of the Caribbean, Africa, Asia and Australia are already on the way out. They typically conveyed personal messages, now more efficiently accomplished by phones, often cellular. The better fidelity of FM is also a major factor. Tropical band transmission utilizes short skip distances to cover a country with shortwave. Except for religious stations on the tropical bands, the prediction is that in 10 years all such stations will be off the air. The outlook is not, however, all that rosy for the new FM stations. A *Radio World* article said many of the small town stations are struggling. [monthly, "D.P.F., Ayer MA "I really enjoy your newsletter and look forward to it!

 BC Kelowna and Victoria—the CRTC has called for  
 applications for new FM stations in each city. Those  
 interested were to have sent letters of intent by Oct. 26,  
 with formal apps. filed by Nov. 26. This does not mean  
 any new stations will be approved, especially if it is  
 found new entrants might adversely affect the financial  
 health of existing stations. Digital Audio Broadcasting  
 apps. have been received in Vancouver from CBU,  
 CBU-FM, CBUF, CFSR-1, CFUN, CHQM-FM, and  
 CFSR. If granted, the new stations would simulcast the  
 existing stations.

**NAB Comes Out Against FCC's  
 FM Technical Streamlining Plan**

The National Association of Broadcasters studied the FCC proposal and decided not to support the idea of negotiated interference

agreements, "as they would have a negative impact on the band." It also objects to reduced kilometerage separations for second- and third-adjacent stations, which could work against IBOC development.

NAB did like the idea of allowing FM stations to file contingent applications, and goes along with calling certain applications "minor" changes rather than "major," as affecting main stations and FM translators.

The "benefits of downgrading certain Class C FMs to a new Class C0 status are outweighed by the impact on the affected Class C stations." It said that stations could be boxed in as Class C0s, and thus lose the ability to modify facilities to meet the changing needs of their communities. NAB noted that unlike cellular telephone, personal communications service and other wireless licenses, broadcasters are not licensed to cover a geographic area and then permitted to design systems that enable them to cover the area. "Instead, broadcasters are licensed to operate from a single antenna, and their ability to adjust the height, location and/or ERP of their antenna is their only means of addressing the changing needs of their community."

And the NAB opposes creating a Class D/microradio service as an "inefficient" use of the spectrum. [Ref. Aug. p. 8, col. 3; July, p. 8.]

**Small Print Happenings and FM Industry News**

The FCC extended construction permits for broadcast stations for three years, and eliminated the rule barring sales of construction permits for more than the permittee's cost. It also agreed with the NAB's proposal that stations not file ownership reports once every two years, rather than annually as it is now.

A group of about 50 low power FM supporters marched last month upon the FCC and the NAB. It attempted to broadcast on the unlicensed 97.5 frequency in Washington DC. High point of the effort was the hoisting of a Jolly Roger flag on the NAB flagpole—after removing the U.S. flag. In the midst of the procession were three large stuffed puppets. The largest symbolized Corporate Radio pulling the strings of the NAB, which in turn pulled the strings of "Kennardio," meant to represent FCC chief Bill Kennard, who was depicted by a Pinocchio puppet, complete with growing nose. The NAB seemed mildly amused, and refused to press charges.

The FCC holds fast to keep TV channels 60-69 clear of new stations, but is allowing existing stations and translators to remain. This is part of a move to preserve spectrum for HDTV.

Strapped-for-cash CBS is trying to get more by selling about 20 percent of its radio business to outside investors, and bringing back the Infinity name. "Troubles at the CBS television

network, which lost \$107 million last year, have fed rumors that its parent company could be a take-over target."

The biggest deal to report this month is Clear Channel Communications agreeing to buy Jacor Communications, Inc. for about \$4.4 billion, "doubling its stations in midsize markets, and challenging the leading radio company, Chancellor Media Corp." Clear Channel thus expands to 454 radio stations from 220.

Chancellor has announced plans to buy Capstar for \$4.1 billion in stock and debt. Both companies are based in Texas. The deal will give Chancellor 463 radio stations. In September it was announced Capstar was buying SFX Broadcasting, itself a \$2.2 billion deal [Sept. p. 7, col. 3].

The FCC is seeking comments on use of lotteries and/or a point system to choose between competing applicants for noncommercial broadcast stations. It is also concerned about how to decide among mutually exclusive applicants for commercial facilities, when one or more of the applicants are by noncommercial parties.

Now that duopolies and multiple ownerships in a market are legal in Canada, notes Mike Cherry, "the first significant takeover of a large broadcast company by even larger companies is about to occur. Vancouver-based WIC International, owner of a number of AM, FM and TV properties throughout Canada, is about to be broken up and absorbed by Canwest-Global Communications and Shaw Communications. Both firms attempted leveraged and hostile takeovers of WIC in the past, but this deal looks like it will please all parties. . . In Vancouver, this will pair hard rocker CFOX 'The Fox' 99.3 and hot AC CKLG 730, already owned by Shaw, with Fox rival AOR/classic rock CFMI 'Rock 101' and news/talk CKNW 980. CFOX and CFMI have been bitter rivals within the market for a long time. . . Similar duopolies will be created in other large Canadian cities."

Web intruders are rampant in broadcasting and other fields. WPOR-FM 101.9 Portland ME is using a web address <www.WTHT.com> against its cross-town competitor. Move restricts WTHT 107.5 from having a site with that [obvious] name. WTHT's Kevin Keogh said "It's a very small thing to have done. They must be afraid." In the past, taking such names might insure being sued or being paid a hefty "shake-down" fee. For now, WTHT has no plans to do either. Instead, it's decided not to have a web site.

My still-developing web site features a link to a religious seminar, "Net 98." There is a competing website with a similar name. Only the - is different. It is <http://www.net-98.org>.

LA Port Sulphur KKND 106.7 fined \$6000 for Howard Stern broadcasts of Feb. 7, 14 and Apr. 25, 1997.

The FCC found Leasnick Communications, licensee WTWR 98.3 Monroe MI guilty of violating § 73.1211 and 73.1216 of the rules regarding prizes promised but not delivered in a bridal show sponsored by the station. It wants \$4000. WTWR is one of a handful of FM stations once owned by the late Gene Autry. He long owned KMPC 710 L.A., and his last station in that market was KSCA 101.9, which Heffel is buying from his estate at about \$100 million.

The Broadcast Education Association announced a new Journal of Radio Studies, a publication dedicated to scholarly research in

radio, with commentary and reviews. To subscribe or to advertise contact Judy Hawkins, (202) 429-3935, e-mail jhawkins@nab.org; or visit www.beaweb.org

Turning 50—that's WABE \*90.1 Atlanta, which had an open house. It was operated by and for the schools in the early years, and in 1971 became a charter member of National Public Radio. WABE is still plagued by signal problems within Atlanta's perimeter. This has been a problem since it installed its 100 kw equipment atop Stone Mountain in 1983. No one seems to know what the problem is, but I would guess multipath, or need for beam tilt of its antenna.

Because of remarks against the Hmong community of St. Paul MN on the morning show hosted by Tom Barnard, KQRS 92.5 has lost several advertisers. The show is the highest rated in the market, but newly-formed Community Action Against Racism has put pressure on advertisers to have changes made, or at least elicit a sincere apology from Barnard. Brian Lambert of the *St. Paul Pioneer Press* has been criticized by letter writers for putting his own intense pressure against KQRS in his columns.

The June 9 show had a story about a newborn Hmong child killed by its 13-year-old mother, who had been raped. The conversation by Barnard and cohorts included several jokes about the Hmong culture with pidgin English dialect, and use of a character named "Tak." Advertisers who quit include Texaco, Perkins Family Restaurants, Norwest Bancorp, Kinko's and Prudential Insurance.

Later the station did apologize, sort of, in a news release saying Barnard "apologized for his insensitive comments," but he said "I will always be an insensitive guy and if that upsets you, I apologize." The activists still want a "sincere" on-air apology from Barnard. The use of the Asian character "Tak" will, however, be discontinued, and the station plans to air Asian-American announcements and establish scholarships.

An interview turned ugly—that's what happened at WBCN 104.1 Boston when Nik Carter had Pat Purcell publisher of the Boston Herald in for an interview. Carter lit into Purcell in what was described as a "tirade," questioning the newspaper's handling of issues such as race and homosexuality. The result: Some \$200,000 of Herald advertising is being pulled from the station.

A Washington law firm I've had dealings with recently lost Ed Kenehan, 85, who died of a heart attack. He was lead lawyer for the National Association of FM Broadcasters, which later merged with the NAB. I consulted with the NAFMB as a graduate student at Syracuse University, and met Kenehan and Frank U. Fletcher in Chicago in the late '60s. Fletcher has since died. The firm of Fletcher, Heald and Hildreth continues in business, with Dick Hildreth, 70, feeling fine, and enjoying his legal work with broadcasters.

Former Jefferson-Pilot Broadcasting President Charles Crutchfield, 87, died. He ran J-P from 1963 to 1977, overseeing the return of WBT-FM Charlotte on 107.9 (now WLNK). It previously operated on 99.9.

Not all morning shows last. The syndicated Scott and Todd Show ended its two-year run. It had been on in about six markets. They'll remain at WPLJ 95.5 New York.

Howard Stern won't be heard in Denver—at least not on KKHK 99.5 KKHK had announced plans to bring him in, but less than a week later reversed itself, noting too

much negative reaction from listeners. "It's a new situation for Howard Stern: canceled before the show even started," mused *M Street*.

Now to material carried over from the old computer, plus some new stuff.

FM FORUM

CONTRIBUTIONS FROM READERS

Continuing with the story of "One FM" in Geneva, Switzerland [May, p. 12], we learned that its income in 1997 was 800,000 Francs, which was three times its 1996 income. However, the station is not out of danger. That's because its expenses were around a million last year.

The Geneva station reaches 6.3 percent of those 15 and over; their initial goal of reaching 10 percent has yet to be reached. However, Director Michel Colin does not worry: "We are Switzerland first in what concerns the affinity with the groups we aimed at." To put it plainly, the listeners to the small station constitute a very homogenous population. A very large majority of them belong to the 15-30 year group. The station aims to create advertising that targets its prime demographic group.

This gives the small Geneva station wings. It already dreams of new horizons and more far-away listeners. "We have undertaken all the necessary steps to spread the broadcasting over the whole French-speaking area of Switzerland before the end of the year," Colin ambitiously announced.

Stereo stations in the Paris area are Skyrock, NRJ, Radio Classique, Fun Radio, RFM, RTL-2. "The others don't [have stereo] as you already know." [See stations listed, Aug., p. 3, col. 3; Oct. p. 5, col. 1.]

Jacor bought KLOO-FM 106.1-AM Corvallis OR from Oregon Trail Productions for \$2.5 million. Craig Pattillo writes: "With KLOO-FM on 106.1 and Jacor just acquiring the unbuilt KKLQ 105.9 Vancouver WA, I think you can see what they're up to."

WUOM \*91.7 Ann Arbor MI and relays were chosen as the best station(s) in America by the Public Radio Program Directors Association. The award covered stations in markets under 800,000, and was based on recordings of a typical broadcast day. The judges liked the "informed attitude" the stations conveyed and conversational style of announcers and news anchors. Todd Mundt, a talk show host, was chosen as the best and most versatile announcer.

John Clark, in NY state, came upon a treasure at a garage sale—a beat-up old General Electric Superadio I. He paid \$5 for a radio whose batteries probably hadn't been changed in 10 years. "I thoroughly cleaned it up, inside and out, and the radio works, and looks new! Having been an advocate of the Superadio II for years now, I was thrilled to pick up its predecessor, which in my opinion works as well as the Superadio 2. As I've mentioned to you before, I've never been quite as enthusiastic about the Superadio 3."

From the classifieds: For sale modified Ramsey FM 100 transmitter, about 2 watts output; complete FM stereo radio station \$550. Pocket SCS radio, specify 67 or 92 kHz, \$35; (800) 944-0630, SCS Radio Technology—a leading supplier of SCS adapters to "FM Atlas." Until December,

 MI Whitehall WKBZ-FM 95.3 to be tj, " . License taken back by Grand Valley State College, owner of WGVU-FM \*88.5 Allendale-Grand Rapids. GVSU obtained it and 1520 AM (to become WKBZ from WQWQ, with 850 changing calls from WKBZ and going public) as a gift in 1995. WGVU AM is 1480. WGVU enters the Muskegon market in direct competition with WBLV \*90.3 Blue Lake and WBLU-FM \*88.9 Grand Rapids. Expect the FM calls to change. "I think the university is stupid enough to dump the calls (in use in Muskegon since 1926!) for "WGV(something) AM and FM." Here are a few notes from Phil Boersma: "WGVU AM and FM already have the most frequent and longest pledge drives of any of the local public radio stations. WGVU's goals are also the lowest, meaning they're not exactly experiencing hoards of listeners throwing money at them. . . I'm really afraid that WGV(something) may hurt WBLV/ WBLU-FM (its true purpose, perhaps?). WBLV is the only public radio offering classical music in this area

any more, and if they end up crippled by WGV(something), we could end up with no noncommercial classical station on the radio. The only commercial classical station is low-powered WFGK 98.7, whose signal in Muskegon is weak. In short, this looks like a power grab by WGVU, and in the long run, it may only end up insuring that there is no quality noncommercial FM in Muskegon County. I'd sure hate to see WBLV end up getting sold to some religious outfit or worse yet, getting taken over by GVSU, who would then be free to sell the commercial 95.3 frequency for a profit—perhaps their long-term goal?"

 TX Brownfield KLZK 104.3 s, "Kiss 104.3"  
 TX Carthage KTUX 98.9 stunting with all Led Zeppelin before. Now rp, "traditional album oriented rock" and plain "99 X," not "99X the Rebel Rocker."  
 TX Falfurrias KDFM 103.3 S, gr, programmed along with monophonic KCZO 92.1 Carrizo Springs TX.  
 TX Flower Mound KNKI 96.7 m, "Memories 96.7," ID with Dallas-Fort Worth. Artists like Lionel Ritchie, Andy Williams and Christopher Cross are featured. "Pretty depressing, downbeat sound. . . Those who disliked KAAM 620's old MOR format because it played too many syrupy '70s songs really won't like this." It is in a combo with KSCS 96.3 Fort Worth-KEMM 103.3 Commerce-AMs.  
 TX Franklin KZTR 101.9 r, hot AC, "B-102," LMA-to-buy with KHLR 103.9 Cameron-KORA 98.3 Bryan-AM. Had been stunting.

TX Hillsboro-Waco KBRQ 102.5 r, 'Rock 102-5 The Bear' (from 'The Bear 102.5').

TX Plainview KBAH \*90.5: 'No ID heard (not even) on the hour.' When I e-mailed American Family Radio, they denied this is one of their stations, but directory listings confirm that it is. Stereo assumed. 'All our [AFR] stations are stereo. We've got so many stations it's hard to keep track of them all,' Marvin Sanders in Tupelo told me. (from '105.9 The Planet')

TX Round Rock KFMK 105.9 so, 'Jammin' Oldies'/ TX Tahoka WMMX 100.3 r, hot AC, 'Mix 100.3'  
VA Yorktown WYCS \*91.5 g, with Skylight network  
WV Romney WDNZ 100.1 mt, 'FM 100 Disney Radio,' and Disney's first FM affiliate. 'Yes, it's got beautiful stereo separation—we're getting about 10,000 responses a week from the kids of this area—phone calls to Disney, etc.

We were smooth jazz and the only commercial affiliate of NPR, carrying *All Things Considered* in the afternoon and Garrison Keillor weekends, plus Sony's smooth jazz which went out of business. With NPR that was a terrible story. We fulfilled an NPR goal of serving an unserved area with public radio programming, and would seek underwriting during those shows. There was some subtle pressure on NPR from other stations not to do this. We never got a contract from them, and then were told if a noncommercial station came in the area, we'd get six months' notice. That was the beginning of the end for our carrying NPR. We even proposed a parttime noncommercial license, because listeners liked getting NPR programs in our area, but the network turned that down. Now it's fun serving the kids and it's not one long commercial for Disney. They are very discreet, and promote kids first—before the Disney image. I'm running a lean and mean machine. I think we'll make it. Public radio now comes from Frostburg MD, WFWM, which just changed to 91.9, W.G., g.m. It's on 24 hours a day on two frequencies—the second being 100.5, a translator which signed on this summer in Cumberland MD, where the studios and offices are.

WV Saint Albans WKLC-FM 105.1 still rp, adds Bob & Tom, dropping John Boy & Billy.  
WI Milwaukee WLUM 102.1 still pr, adds Mancow Muller mornings. Many people in the area probably know about him, since he's been on radio in nearby Chicago so long. [a.m., 11 a.m. to 1 p.m., 2-5 p.m.]

WI Whitehall WHTL 102.3 mk, with standards 6-9/  
WI Shawano WOWN 99.3 o  
WI Shell Lake WGMO 95.3 mt, uses calls, but much of the talk remains religious, such as Marlon Maddoux from Dallas TX, Dobson's *Focus on the Family*, as well as Rush Limbaugh. Marlon's program is played one day late. Drops Skylight Satellite Network (g), and heard past its previous 10 p.m. sign off.

### Off Air—Or Not Yet On

CA Los Angeles 'KBLT' 104.7: The 24-hour variety format station had received good reviews in local newspapers. Shut down by FCC. 'Operator Paige Jarrett agreed to surrender her equipment, worth about \$500, rather than be subject to an \$11,000 fine.'  
FL Gulf Breeze 95.3—settlement agreement put aside. A third applicant, J. McCarthy and June J. Miller, was found to be qualified. List as an unbuilt CP for now.  
IL Clinton WHOW-FM 95.9 reported off.  
IL Farmer City WWHP 98.3 reported off. 'In fact, I heard W252AI Decatur right at Farmer City exit, on car radio! Too close to WWHP, why does this exist?'  
IN Union City—heard only testing during the evenings, gr. \$. 'They were on with equipment tests last year. But all they do is play music (gospel) with no announcements or station ID, and then suddenly went silent for over a year.'  
KY Stamping Ground WKYI 96.1, having ended its LMA with Mortenson Broadcasting.  
MA Worcester 'WSCW' 94.9 at the local state college, shut down by the FCC. It 'will revert to its former carrier-current operation.'  
NM Albuquerque K240BL 95.9, K254AB 98.7, K265CA 100.9, but FCC lists them all as licensed.  
NM Los Alamos KEFE 107.5  
NM Santa Fe KZXA 94.7  
NY Corning W228AS 93.5  
NY Hornell WSQA \*88.7  
NY Queens 'Radio Alerta' 96.5 (Nov., p. 5, col. 1).

PA DuBois W221BD 92.1  
PA Mansfield W201BZ \*88.1  
PA McConnellsburg WEEO 103.7 'bit the bullet' and left the air. It had to shell out \$500/month for its mountaintop site, 'and the owner was putting in his own money to keep it going. I hear some party is looking at it for a rap station. Now with WVFC 1530 also off the air, there is no radio station in this county.' However, a radio station owner in the area disputes the previous, saying that WEEO is working on a new control room and new studio, and will turn the microwave dish around to face the new site. The site will be within the 40 km allowed by the FCC for the main studio. 'It hurt when you said a station went belly up a couple of months ago. I know you don't have time to check out all the facts, but you should put in a disclaimer that opinions are those of the participants, and are not necessarily true.' He claims the tower site was traded out for use by another transmitter and did not cost \$500/month cash.  
PA Pittsburgh 91.7 'Radio Carson,' a techno-dance station—after being raided by the FCC in late October. Operator Mark Lange had refused an FCC request in May to shut it down. [See Dec. '97, p. 4, col. 3.] Also taken off the air—four shortwave pirates on 6955 kHz—in Tewksbury MA, Glendale Heights IL, Katy TX and Sierra Madre CA.  
TX Dimmitt KDIU 95.9—'I think this CP has expired, yet it stays on all the station lists as it has for the last three years. Also not on is KHFD 103.5 Hereford. I was one of the owners, but sold out. They had great

plans when they took over the CP, but have held it 18 months and haven't built it."  
 TX Littlefield KAIQ 95.5  
 VA Bowling Green WWUJ 96.9

 MN Minneapolis K242AI \*96.3/K249DF \*97.7. "We applaud WNCB's wise decision [to cancel the K249DF license] and for rising above their own private interests in favor of the greater good. WNCB [Duluth's] translator station at 97.7 mhz was the signal causing interference to your reception of KNXR which you reported to us," wrote Tom Jones of KNXR 97.5 Rochester to Twin Cities' area listeners. "KNXR has a sizeable audience in Minneapolis-St. Paul and their southern suburbs as evidenced by our listener mail and phone calls and the fact that KNXR has enough Twin Cities audience to appear in the Twin Cities Arbitron ratings." Brett Gibson, manager, WNCB wrote the FCC: "North-Central is forced to surrender the K242AI license and the K249DF permit due to the ever-increasing costs associated with defending the stations against relentless objections filed by its competitors in the Minneapolis market and the untenable burdens placed on it by the Audio Services Division [of the FCC] regarding the lengths to which North-Central must go to satisfy alleged interference complaints." It urges the FCC "to reconsider its position regarding the precedent it is setting by placing such burdensome requirements . . . to resolve interference complaints. The Audio Services Division must realize that few, if any, FM translator operators could afford to meet these costly requirements. The establishment of such precedent jeopardizes the future of FM translator stations and fails to recognize the fact that these are broadcast outlets that are highly valued and relied upon by the American public."

**SCS/SAP Services**

**Symbols are as in the FM Atlas**

AR Little Rock KKPT 94.1 †()  
 CT Fairfield WSHU \*91.1 †(), C, adding a relay of WSUF \*89.9 Noyack NY on 92 kHz. On Sundays, they cut away and go to a live service from the Trumbull (CT) Congregational Church.  
 GA Atlanta WRFG \*89.3 †(), Q, I, Forsi, 92, resumed.  
 LA Alexandria KLSA \*90.7 †(), no †U  
 MA Turners Falls WPPQ 93.9 †(), RDS  
 MN Breckenridge KLT A 105.1 †()  
 MN Duluth WDSE \*8 has NOAA weather on iSAP. That is a service which used to be on KBJR-6's SAP(now light rock with commercials).  
 MN Fergus Falls KJK-FM 96.5's 92 is open carrier (not †U). Retains Radio Talking Book for the blind on it67.  
 MN Minneapolis KJSJN \*99.5 no SCS (had †()). KTIS-FM \*98.5 briefly had its †() eff.  
 MN St. Paul KEYE 102.1 †X, 67, low frequency data. KYSM-FM 103.5 Mankato had both their 67 and 92 kHz on with no modulation, but back to normal now. "Something to watch?" A construction project to rebuild the backup FM transmitter facilities on top of the IDS Center in downtown Minneapolis is nearing completion. Testing begins early this month, which might allow for some open local channels for DX listening, possibly after midnight. "Testing could include all eight stations being dark at the same time for short periods (a very unusual occurrence) and several days of operation from the IDS site. When complete, the eight stations will use an average power of 40,000 watts from the new antenna for backup operation. Considering the prime location of the IDS, the vast majority of listeners will never notice when a station is using the backup site." When completed, eight Twin Cities stations (KQRS, KQXR, KTCZ, KJSJN, WRQC, KDWB, KEYE and KQPT) will share a new antenna recently installed on the West Tower of the IDS. Five stations (KQRS-FM, WAYL/KEGE,

WLWL-FM, KEYE and KRSI-FM) began using the site in the late 1970s as main facilities. The two 34 m towers on the IDS supported several antenna systems. After years of battles over interference and operating at reduced power, the site became a backup when those stations along with several others competed the move to a combined antenna on the KMSP (TV) tower in Shoreview MN in 1991.  
 MN Willmar KQIC 102.5 †M only, no †X  
 MO West Plains KSPQ 93.9 †T, 67, which might be a reading service to the blind (from †M).

 NY Buffalo WNGQ 102.5 to lose its 67 kHz †T reading service when the current contract expires in a year or two. "SCAs are getting too valuable for stations to use them for reading services to the blind." Same problem faces reading service users of WODE 99.9 Easton PA.  
 NY Montour Falls WNGZ 104.9 †C, relay of WWLZ 820 Horseheads. ID with Elmira-Corning, "Wings 104.9."  
 NY Olean WPIG 95.7 †(), X  
 NC Asheville—two area stations have the RAISE reading service on TV-SCS (not SAP). WHNS 21 uses 92 kHz for the RAISE service at 4-5% injection. "More injection, then it gets into people's SAP tuners, causing confusion." In Greenville TN it's on WEAT channel 39 at 67 kHz with 10% injection. By using TV SCS instead of SAP it shields the program from SAP tuners and allows for more robust injection. However, the TV station cannot use iSAP, only the Pro Channel at 102.271 kHz. Reportedly, an Indiana VHF public TV station also is using SCS on its audio, probably WILL-TV \*12 Urbana IL, which serves part of Indiana. Bob Brummond, head of NC's Raise, said people complained about the service when it was on SAP, confusing the reading for the blind with the regular TV audio. SCSolved the problem. NC PTV stations have RAISE on SAP 6 a.m. to 10 p.m., then descriptive video services for the blind.  
 NC Charlotte WFAE \*90.7 no †, T. The reading service "has been off a couple of years."

 SD Pierre KLXS 95.3 †X  
 WI Milwaukee WMYX 99.1 still has †M, with the contract good through 1999, but AEI Background Music in Seattle tells me it will drop the SCS in Milwaukee for direct satellite reception in the stores. LeRoy Wolniakowski, chief engineer, says there are 2000 background music installations using the service and he doubts they will make the conversion because of the expense. If it does go off it would most likely affect WKTT 98.1 Cleveland WI, which serves the northern part of AEI's area. "We're still getting our checks every month from Milwaukee, which is a nice income most small market broadcasters don't have," said Chuck Mills, president.

USA—voice paging via FM data subcarriers is possible at either 57 or 76 kHz. Cue Paging has a nationwide network at 57 kHz with 600 stations and 180,000 subscribers. It's reportedly the first time digitalized audio has been reconstituted to voice on an FM subcarrier, although voice pagings have been going on on both 67 and 92 kHz (coded †P in the out-of-print *FM Atlas*). The voice paging will also be supported by a newly-introduced high speed data subcarrier at 76 kHz known as DARC, DATA Radio Channel. Latter was introduced by NHK of Japan. "DARC provides significantly higher throughput than RDS (approximately 10 kbps vs. 0.7 kbps). DARC was one of the three technologies evaluated by the NRSC's high-speed FM subcarrier subcommittee. According to recent press reports, Cue will be rolling out its DARC-based service in 40 major markets over the next 23 months."

Another firm, Clariti Telecommunications, has plans for deploying digital voice paging, but focusing initially on China, Latin America and other emerging markets. Theirs is the Claricast™ digital voice paging system, which uses a technology capable of supporting 15,000 to 18,000 subscribers per FM station, based on an average voice message of 10 seconds and a "busy hourly rate" of 20%. Two test sites have been brought on line in 1998, one at WIOQ 102.1 Philadelphia in April, and another in Rio de Janeiro, Brazil, in July. Cue is at <http://www.cue.net> and Clariti is <http://www.clariti.com>. Information courtesy the NAB's *Radio TechCheck*.

Bonneville's LDS service at 92 kHz in various markets—being discontinued Dec. 31, 1999. After that the LDS Network will go cable, satellite, Internet, and possibly other means. SCS transmission is being discontinued because: 1) Five of the stations with the service are no longer owned by Bonneville. "Substantial fees are being paid in order to keep these signals on the air. These fees are going to increase dramatically in the year 2000 making the cost of delivering the signal prohibitive"; 2) Digital FM radio transmission "is on the horizon. These digital transmissions will occupy the area on the signal presently occupied by the subcarriers used by the LDS [Mormon] network. While digital subcarriers may be available, they would not be compatible with the existing

receivers. Consequently, all the stations, both ours and the ones we lease, will be unable to continue analog transmissions in the future." 3) The cost of satellite receivers has gone down substantially, and CD audio "is quality stereo. Continuing to support the subcarriers beyond 1999 is to support a dying technology." The entire text is on <<http://www.ldsradio.com/subcarriers.html>>. List of stations is on <<http://www.ldsradio.com/reception.htm>>. Somewhere USA—wants to lease an SCS channel for a paging service. <Patrick@memes.com>.  
 ON Hamilton CKLH 102.9 †Q, German, 67. It is the same service as on CIDC 103.5 Orangeville's SCMO. "The programming is produced by ethnic AM station CIAO 530 Brampton ON. The German service is said to be charging high prices for its SCMO-modified boomboxes—the price includes a 'membership fee'."

TAIWAN—data and voice at 67, 76 and 92 kHz, and "we'll be expanding to China," according to Dr. Ingrid Liu. "The newsletter looks better than ever, and it's first-rate, as it has always been. Thanks, and keep up the good work!" P. B., Spring Lake MI.

"I keep checking to see if the Mexican government FM page has been updated, but so far it's still the same old (late 1997) list. Probably as soon as you publish the book they'll put up the new list! Please don't print my name or initials in the Atlas."

**NONIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station uses call letters once per hour (at or near top of hour) as required by FCC and Industry Canada*

- AL Birmingham WZZK-FM 104.7 uses calls, no "Hot Country 105"
- AR Mena KTTG 96.3 Huggin' Country; different station from KHUG 96.5 England AR, also "Huggin' Country." [Lick!]
- AR North Little Rock KDRE 101.1 Lick 101.1. "Yes./
- GA Ringgold WSGC-FM 101.9 The Country Giant (from "Hot Jammin' Kix FM" when it simulcast WKUJ 97.3 South Pittsburg TN). ID with Chattanooga TN, after a period of trying to reposition itself as a north Georgia station. "This troubled operation seems to change formats every six months and continues to flounder. Their new positioning statement, 'The Country Giant', is used very haphazardly, and their on-air talent tends to ramble on for extended periods without telling listeners what station they're tuned to."
- KY Midway WAHY 107.9 The Beat (from "V-108"). Now owned by Jacor and simulcasts WTKT 1580 Georgetown.
- ME Thomaston WBQX 106.9 W-Bach, along with WBQQ 99.3 Kennebunk-WBQW 106.3 Scarborough.
- MN Moorhead KVOX-FM 99.9 Froggy (from "K-100")
- MN Olivia KOLV 100.1 K-100 (not strict)
- MN Tracy-Marshall KARL 105.1 Karl Country (from "FM 105")
- MT Billings KIDX 98.5 K-Bull ["105.5 JYY" Concord
- NH Peterborough WNHQ 92.1 92-1 NHQ, parallel to/
- NY Brooklyn WKRB \*90.9 just says 90.9 (from "Brooklyn's 90.9"), but not strict.
- NM Hatch KVLK 101.1 101 Gold

- NM Jal KPZA 103.7 Radio Que Pasa, strong in Hobbs and Maljamar. Has Jones' La Buena service.
- ND Bismarck KSSS 101.5 Kiss 101 Rocks, ID with Mandan; still has †( ).
- OK Lawton KBQZ 99.5 The Breeze
- OK Perry KOSB 105.1 B-105
- PA Bedford WWCW 107.5 Hot Country 107-5 (from "C-107") [107"]
- PA Hershey WRKZ 106.7 Cat Country 106-7 (from "Z-/
- PA Huntingdon WQHG 106.3 The Bear (from "FM 106.3") ["The Wiz"]
- SC Blackville WIIZ 97.9 The Wiz 97-9 (from/
- TX Dallas KRBV 100.3 V 100.3, the new adult Mix (from "V-100")
- TX Farwell KJUN-FM 92.3 Jesus Radio
- TX Lubbock KONE 101.1 Oasis 101.1 (from "K-101") KCRM 99.5 99.5 the Cream
- TX Wichita Falls KWFS-FM 103.3 Lone Star 103
- ON Cornwall CKON 97.3 Sekon Radio; calls its town Akesasne, but so-called town or Indian reserve does not appear on the official ON highway map. "No matter where they're from, they were live all the time I heard them. They were also on in more than one restaurant near Malone, and their bumper stickers could be found throughout the Saint Lawrence Valley. They gave a mix of country and oldies (and I think they run other formats), and were a delight to listen to. I can almost say that they were the best of all the stations that were coming in there. Funny the best radio has to come from a sovereign state, and not from the U.S. or Canada." CKON is not licenced but is listed in the out-of-print *FM Atlas*.
- NL China XHCHL 99.1 La Picasa, tied in with XHRL

- 98.1 Monterrey and XEG 1050.
- Multi-City IDs In Use**
- AL Decatur-Huntsville WDRM 102.1 adds Athens in middle of ID list.
- MN Collegeville KNSR \*88.9 resumes its ID with St. Cloud. [Coming
- NY Southport WOKN 99.5 with Elmira-/
- PA Clarendon WKNB 104.3 with Warren
- SD Pierpont KDSD-FM \*90.9 no ID with Aberdeen any more.

**Selected AM Happenings**

AZ Phoenix KIDR 740 reported off the air.  
 CA Pasadena KRLA 1110 abandons its "unique oldies format" in favor of talk. It was competing with Chancellor's "Mega" format at KCMG 100.3 Los Angeles, "which eviscerated the core of KRLA's audience." KRLA's talk includes Dr. Toni Grant, Michael Jackson (who is leaving KABC 790 after 32 years), Don Imus (moving from KLAC 570) and G. Gordon Liddy.  
 CO Boulder KVCU \*1190 was silent; now alternative.

CT New London WWJY 1510—FCC deletes license.  
HI Honolulu KZOO 1210 carrying sumo wrestling from Japan by phone line. KISA 1540 has Korean, which it gets via phone line. "These broadcasts include sports and music but there is no mistake that they are being rebroadcast from a very low-fi ordinary telephone line, not a dedicated analog broadcast or a digital line."

IN Fort Wayne WOWO 1190 still on with its old transmitting facilities at Roanoke IN. "The last word I heard they were supposed to redirect their nighttime signal and reduce it to 9000 watts to allow a NYC station to operate 24 hours. WOWO still has a deep null to the west after sunset. A few times lately they have forgotten to change the pattern and were operating directionally during the daytime."

IN Huntington WPDJ 1300 "seems to have found their niche with southern gospel. I wrote to you earlier about this station and their financial woes. With new ownership, a less directional signal and new format, they are attracting advertisers from the local area, including a couple of businesses in Warren," about 27 km south. "They claim their 500 watt signal can be heard as far as the Michigan line [at 110 km]. Wishful thinking, I suppose," B.Z., via e-mail.

IN South Bend WJVA 1620—heard in Seaside OR through much closer KYIZ Renton WA.

IA Cedar Falls KDNZ 1650, ID with La Porte City-Waterloo. Has Art Bell's syndicated show, which had been off the air for a while. Some simulcasting with KCNZ 1250 AM.

MA Orleans WFPB "1170 was silent, now back on air, simulcasting WFPB-FM Falmouth, WUMB Boston 91.9. MI Ada WJNZ 1680, "Stereo 1680 Jamz." Has ads for Grand Rapids places. Rap and R&B.

MI Battle Creek WOLY 1500 deleted.

MN Minneapolis WWTC 1280, WAUR 930 Sandwich IL, KPLS 830 Orange CA, KKYD 1340 Denver, KCNW 1380 Fairway KS, WPGA 1590 Chester PA, WZER 540 Jackson WI—all transfer to Catholic Radio Network, and IDed on the air as "Catholic Family Radio." Instead of having "Beat Radio" at night, listeners got a liberal dose of Gregorian chant music until talk programming could be

firmed up. CRN is operated by a conservative arm of the church. The new programming on WZER has not been welcomed by Milwaukee Bishop Remberl Weakland. MS Louisville WLSM 1270 had sports; reported silent. NY Manhattanville "WMLV" 1620 heard in an 8 km radius with all rock and rap. "Audio is usually pretty funky—loud and distorted."

NC Black Mountain WTKZ 1350 had been talk, now off the air, but "expects to return with a new format before the end of the year." WTZY 880 Asheville had been relaying its talk, but is now going it alone, in an LMA-to-buy with WMXF 104.3 Old Fort-WQNS 104.9 Waynesboro-AM.

NC Selma WBZB 1090 reported silent.

OH Jackson WLMJ 1280 deleted.

PA Lewisburg WTGC 1010 deleted.

SC Greenwood WLMA 1350 had the FCC grant its petition for reconsideration, and received renewed authority to operate.

WI Hudson WMIN 740 brings Spanish to St. Paul-Minneapolis Jan. 1. [in Cheyenne.]

WY Fox Farm KKWY 1630 on air, m, with address/ON Toronto CBL 740 to remain on air until at least December, 1999—to make sure everyone can receive the new [FM] transmitters. The other CBC stations mentioned last month (p. 6, col. 2) remain on the air.

CHEV 1610 in the Toronto area is a special events station, recently heard with live sports broadcasts as late as 11 p.m.

"It would be interesting if you listed the new 'expanded

band' AM stations as they come on the air. They make for some fun DX and it wouldn't take up much room," T.D., Tulsa OK. [I've started to do that—b.e.]

"Hope your health is good and all is well. Your rag is still my favorite read," K.Z., Croton-on-Hudson NY.

**FMakings—Selected FCC and Industry Canada applications**

AZ Bullhead City \*89.9 40000 v, 912 m, d-a, CSN Int'l.

**New York's Scott Muni Gets The Axe at WNEW 102.7**

Low ratings at the station and age

crept up on Scott Muni (pictured), who had been at WNEW over 30 years. He along with veteran jock Dave Herman were let go at the legendary rock station that in recent years has suffered an erosion in listeners.

Once the city's dominant rock station, WNEW has hit hard times lately. In the latest Arbitron it ranked 23rd, averaging about 1.5 percent of the radio audience. Several months ago the station dumped three other "classic jocks"—Pat St. John, Dennis Elsas and Pete Fornatale, and hired a younger, irreverent team from Boston, namely Opie and Anthony for afternoons. "This was the hardest decision I've ever had to make in radio," said g.m. Scott Herman, no relation to Dave. "We have tremendous affection for both Scott and Dave. . . but the station is going in a different direction." Muni was one of WMCA (AM 570)'s "good guys" in the late '50s. Later he went to WABC AM (770), and then to the new WOR-FM 98.7 to help launch radio's free-form revolution in 1966. When WOR-FM tightened its playlist a year later, he jumped to free-form WNEW-FM.

Small Print Happenings and FM Industry News

Look next month for those features. Have an excellent holiday season—from Carol and me,

*Bruce F. Elving*

**FM Rulemakings Proposed**

- CA Mission Viejo K208DD \*89.5, because of protests from \*89.3 Pasadena, but the FCC refuses to listen to WPKN \*89.5 Bridgeport CT, and allows W209BB \*89.7 Port Chester NY, which petitioned for reconsideration.
- CA Olancho and Big Pine K252CE 98.3
- CA Pioneer K276BA 103.1
- CA Portola K257BV 99.3
- CA Trinity Center K265AO 100.9
- CA Ukiah K272CD 102.3
- CA Willow Creek/Blue Lake K237CQ 95.3
- CO Colorado Springs K280AU 103.9
- CO Durango K296DF 107.1 [88.3
- CO Montrose K218BO \*91.5—to be replaced by KPRH/K251AF 98.1, K274AF 102.7
- GA Rome \*91.3
- IL Newmar W202BL \*88.3
- IA Cedar Rapids W206AO \*89.1. It was opposed by KHKE 89.5 Cedar Falls.
- KS Hutchinson K232BU 94.3
- MS Jackson W280DC \*103.9
- MO Overland KRHS \*90.1, "because of financial difficulties within the Ritenour School District, which owned the station. Also, WLCA \*89.9 may have caused some interference in the fringes of the KRHS listening area. There's also a co-channel station in Granite City IL (W211AD), and an adjacent channel station 8 km away (KWUR \*90.3 Clayton MO). "From a programming standpoint, KRHS (as KRSH) was basically an album rock format from its inception, and carried Ritenour High School basketball games. The station operated primarily on school days, from 8:30 a.m. to 4:30 p.m. (later for sporting events). When the station changed calls to KRHS, it became more of a modern rock station (a la KCFV \*89.5 Ferguson MO), and the basketball games were gone, moved to KFNS 590." It was "a regular" in Hazelwood, 10 km to the northwest. "The only interference was splatter from WLCA \*89.9 Godfrey IL. I have an aircheck of the station (as KRSH) from 1984 in my collection.

- WFUN-FM 95.5 Bethalto IL has been sold to Radio One of Baltimore MD. They own WERQ 92.3-AM in that city, along with WKYS 93.9-WOL AM in nearby Washington DC, WHTA 97.5 Fayetteville GA, along with leasing WAMJ 107.5 Roswell GA. The station's new format is being kept hush-hush for now, but the pre-teen format will be gone soon," E.B., via e-mail.
- NE Beatrice K288EK 105.5. "My daughter-in-law owned it. She had no interest in it any longer, and nobody took over the license. . . I think there is an opportunity for a commercial FM to make it in Beatrice, and there's a channel that could be allocated," H.H., Glen Elder KS. The 94.1 translator in Seneca KS was deleted some time ago. "Nobody was interested in continuing it."
- NV Caliente K272DK 102.3
- NV Carson City K201BI \*88.1 (now on 89.1 there). K201BI is in Cordova AK.
- NV Logandale K292CZ 106.3
- NV Lovelock K252BE 98.3
- NV Searchlight K280AM 103.9
- NH Laconia W243AH 96.5
- NM Clovis K228CH 93.5
- NY Castorland W240AV \*95.9
- PA Wilkes-Barre W216BG \*91.1—back to FCC pending file. It wants 90.3. [See Dec. p. 1, col. 2.]
- TX Lamesa K217BX \*91.3 (see "New," above)
- TX Nacogdoches K280DE 103.9
- TX Paris K224AZ 92.7
- VT West Rutland WRUT 107.5 stays deleted, despite Brian Dodge's petition for reconsideration.
- WY Casper K204AD \*88.7
- WY Thermopoli K269CK \*101.7 (see "New," above)
- VI Charlotte Amalie WSTA-FM 102.1. "Has been silent over 12 months," but is said to be working with the Commission to get things resolved, having been off part of that time because of Hurricane Georges. The FCC also announced several MN-ND radio stations as deleted, but on air and probably will stay that way.

**SCS/SAP Services**

**Symbols are as in the FM Atlas**

- CA Fremont—Balbir Singh wants to start an east Indian SCS station, and needs to know what the prospects are for stations with unused SCS capacity. He estimates a need for 7000 radios once his service in the San Francisco area is underway.
- DC Washington WAMU \*88.5 †( ) is back.
- MN Austin KAUS-FM 99.9 still †( ), with the RDS reading "KAUS-FM." "It automatically set the dock on my new Radio Shack 398 radio!"
- MN Mankato KYSM-FM 103.5 no SCS. Had †M,R. Now "not even unmodulated" subcarrier. "Will keep you posted if anything more develops."
- PA—the last remaining unknown format SCS station there is WCCC 101.7 Linesville. "Perhaps R.R. of Jersey Shore can check [on it]. . . As of early December there were still 88 'unknown format' SCS stations, including two each in Missoula MT, Ogden UT and Lynchburg VA. Why don't you visit some of those places during your next vacation?"
- WI Milwaukee—WMMX 99.1 mentioned last month as possibly not giving up its music SCS because of cost to convert all the radios (p. 7, col. 1), is questioned by a reader: "I really got a kick out of your misinformation regarding the last music-programmed SCS in the Milwaukee area. I've been listening to SCSince 1971, my first tuner being a McMartin TR-55. Here is the real situation. Wisconsin Music Network is the local AEI franchisee. They are tired of paying the outrageous SCS charges on WMMX. They have operated two 956 mhz systems in Milwaukee for about four years now. Their 'foreground' (vocal) programming is on 956.2625 mhz, and up until two months ago they featured classical music on 956.3375 mhz. Since the SCS contract expires in February 1999, they switched off the classical music on 956.3375 and replaced it with instrumental music that is now simulcast on the 67 kHz SCS of WMMX. Every day their technicians are out there replacing SCS tuners with 956.3375 mhz tuners. As soon as all the customers are converted, those checks that LeRoy likes (and I know LeRoy) will stop coming. The target, of course, is February, but they have 1200 receivers to replace!
- I got an e-mail from Tim Rupp, Wisconsin Music Network/Clef, Inc., 770 N. Jefferson, Milwaukee WI 53202; (414) 771-0783. He's the chief engineer of a company broadcasting music on 956 mhz in Milwaukee, and leaving SCS. "As such, we will have a large inventory of surplus FM SCA receivers. Rather than scrapping these serviceable items, I am looking for organizations that would like to put these items to use. I'm sure we would even consider donation of these items to recognized charitable organizations."
- Since Wisconsin Music Network only has one 956 mhz frequency in Cleveland WI, it will remain foreground music and the SCS will continue. Of course, the monthly rental for the SCS in Cleveland isn't even close to what WMMX charges! If you want to have some fun with LeRoy, have him tune in 956.3375 and compare the programming with hiSCS. Better still ask him to observe the two and three-element FM broadcast antennas aimed at his FM station being replaced by smaller 956 mhz

yagi antennas aimed at Waukesha WI. The 956 mhz transmitters are there on a 152 m tower. . . . Actually, it's kind of sad that the last music SCS is going away since I have quite a collection of receivers. Oh well, that's progress," T.O.M., Caledonia WI, who renews "after many years of subscribing to *FMedia!* and buying the *FM Atlas* since edition one."

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station uses call letters once per hour (at or near top of hour) as required by FCC and Industry Canada*

**Selected AM Happenings**

GA Atlanta—WSB 850 takes its duo of Neal Boortz and Clark Howard to syndication. Boortz' show is 8:30 a.m. to noon and Howard's is 3-6 p.m. weekdays, with portions of those shows (up to two hours each) heard in other markets. Boortz said, "These people [in Atlanta] are used to me. I can commit all sorts of high crimes and misdeameanors, and they say 'that's just Boortz'. But in Duluth [MN?] stations might want to take out an insurance policy." Howard's show is already on Cox owned WHIO 1290 Dayton OH and WDBO 580 Orlando FL. MD Brunswick WTRI 1520 silent; sale pending to Capital Broadcasting.

MI Taylor WCHB 1200 had been silent, now black gospel and talk, "Spirit 1200."

NY New York WQEW being leased to Disney-ABC in a local marketing agreement, valued at around \$40 million. After eight years ABC will have the right to buy the station. It does not affect WQXR 96.3. "WQEW 1560 turned Radio Disney 12-28 at midnight." An "urgent search" was underway to find a station for the popular standards' station—the only one left in the market.

About 100 protesters turned up at a rally outside the New York Times building, complete with big-bands' musicians. "Fans of the old format swing-danced to live big-band music as other supporters occasionally chanted 'QE!'." New York is a diverse city. There's room for Ella Fitzgerald and Mickey Mouse," said George Gee, who organized the rally. "The deal with Disney for a kids network will remove from the people of New York the last remaining outlet for American popular standards." "This deal proves that greed is alive and well in the '90s, WQEW fan Meredith Thomas said. [See also Dec. p. 4, col. 1.]

ND Wishek KDRQ 1330 off the air. "It comes and goes. I can't remember when it last operated. I listen to KFJR (AM 550) or Y-93 (Bismarck ND)."

TN Englewood WENR 1090, a daytimer, was off the air while its equipment was rehabilitated. "Previous owner left it a mess." Now *Music of Your Life*. It will be teamed with WCPH 1220 Etowah ("rhymes with Ottawa") TN, which also will have *Music of Your Life*. WCPH has 1 kw day and 108 watts night, and on 24 hours. "We're meeting a good amount of success," said Paul Wilson, owner of the 1220 station.

TN Hartsville WJEM 1090 delete.

TN Jackson WDXI 1310 delete.

TX El Paso KFNA 1060 was silent, now regional Mexican

TX Odessa KOYL 1310 delete.

WA Everett "KYZK" 1700 was on with all Christmas music, "The Season 1700."

WV Berkeley Springs WCST 1010 reported silent.

WI Milwaukee WEMP 1250 no longer uses AM stereo.

**A Back-Door Way for AM Stations To Get Into FM? Group Wants FM Translators for AM Stations—And the FCC's Listening**

Comments are being received at

the Commission on a petition by the American Community AM Broadcasters Association (ACAMBA). The National Association of Broadcasters so far has been neutral, but has asked the FCC to delay the comments' deadline from Jan. 11 to Feb. 10. That will be after the next NAB radio board meeting (Jan. 9-13). Public notice of the ACAMBA petition is RM-9419.

The FCC envisions only AM stations with daytime-only or limited nighttime signals should be allowed to be relayed on FM translators. "The idea's been kicking around for years and feelings run very deep, both pro and con," mused the *M Street Journal*.

**Small Print Happenings and FM Industry News**

The FCC's showing it is beholden to the industry and Congress. It pulled a consideration of the proposed broadcast ownership rules from its Dec. 17 meeting. It wanted to limit the number of radio stations in a local cluster to between four and six. Senate Commerce Committee chairman John McCain, in a second letter to FCC chief Bill Kennard reiterated his concern that the FCC follow the will of Congress as spelled out in the 1996 Telecommunications Act. Section 202(h) of the act "clearly and unambiguously directs the FCC to review its broadcast ownership rules biennially with an eye to lessening them, not increasing them." Even Disney's Michael Eisner went to Washington to lobby against the Kennard crusade. Almost lost in the shuffle—the Commission's crusade for microradio. It's date for consideration was changed from mid-December to January. The Commission did create a website for the various low-power FM proposals at <<http://www.fcc.gov/mmb/prd/lpfrm>>.

Partnering—Minnesota Public Radio and KPCC \*89.3 Pasadena CA. It's an unusual plan that might help ever-expansionist MPR get into the California market. MPR and Pasadena City College are exploring a relationship that could use KPCC as the cornerstone of a regional public radio network. MPR had learned that the two-year college was having problems maintaining a radio station, which prompted meetings between the two organizations. KPCC is supposed to be self-supporting, as required by the college, and exceeded its most recent pledge goal. But the station needs more resources to do the "deeper development" necessary to enlarge its audience and improve its programming—something MPR might be poised to do for it.

KPCC has a signal that reaches a potential audience of 11 million with its monophonic news, talk format. It carries a variety of student-produced programs, National Public Radio staples such as *All Things Considered*, and one MPR show, *A Prairie Home Companion*.

The new partnership might result in a bureau in Sacramento, where there is no statewide office for public radio. KPCC's annual budget is \$1 million, a fraction of MPR's \$23 million, even though Los Angeles has more population than in all of Minnesota.

None of this should cost MPR anything, according to spokesman Will Haddeland, but there is a potential benefit: a talent pool. "They have a wonderful program in digital technology. Like a lot of other entities, we're having a difficult time recruiting the kind of talent we need. This would allow us to integrate into an academic program," Haddeland said. He's "very hopeful" the college will accept the proposal, "but there's no guarantee."

Another deadline extension at the FCC is the dates for filing comments and replies in Docket MM 95-31. That docket is concerned with how the Commission will handle licensing of new noncommercial educational facilities, and major change applications when more than one party has filed. Comments are now due Jan. 28; replies Mar. 15.

Among the stations recently announced as sold are several in the Albany NY market. Tele-Media is picking up WABY-FM 94.5 Ravena-AM, WKLI 100.9 and WKBE 100.3 Warrensburg from Bendat Communications and Broadcasting. Bendat employs 15 people for all three stations; no announcement about staff changes was made. Tele-Media owns several stations in California, but is based in Bellefonte PA. One of its partners, Ira Rosenblatt, grew up in Albany. His father, Sam Rosenblatt, began a radio career at WROR (frequency not available; not the Framingham MA station) in the 1960s.

Albany Broadcasting adds WSRD 104.9 Altamont NY-AM to a stable that includes WFLY 92.3-WYJB 95.5 and WPTR 96.3 Voorheesville NY-AM.

Radio One is buying WWBR 102.7 Mount Clemens MI for \$27 million, and is expected to oust "The Bear." Radio One owns WDTJ 105.9 Detroit-WCHB 1200 AM Taylor MI. Latter is silent, "pending an engineering upgrade, but should return with black gospel and talk."

Sunburst Media is paying \$4.5 million for a station with the potential to cover Dallas, but not Fort Worth. The station, licensed to Bowie, is KRJT-FM 100.7. It has an application to change to Highland Village TX (a place not shown on the official TX road map), but will have its antenna on the mast of KDGE 94.5 Gainesville.

Indiana Radio Partners is buying WAXT 96.7 Anderson-WERK 104.9 Muncie, WLHN 101.7 Elwood and WWWO 93.5 Hartford City.

The FCC announced it will subject Jacor's \$7.5 million deal to buy various Intermarket stations in the Fort Myers FL market to "additional analysis" because of possible over-concentration. Involved in the look-see are WIKX 92.9 Charlotte Harbor, WCVU 104.9 Solana-AM. Chairman Bill Kennard wants the FCC to play a role in deciding matters of concentration of control, separate from antitrust rulings coming from the department of justice. But Republican FCC Commissioner Harold Furtgott-Roth does not want the FCC to interfere with Congress, along with two senators who agree with him.

Out on a limb for community control of the radio airwaves—that's where some activists were found. They climbed a giant 30-m redwood tree and set up shop on a large branch, on what looks like a treehouse or deer stand, judging by the APicture story of Dec. 5. They climbed the tree and vowed to keep broadcasting from half way up the tree (frequency not available). They were up about two weeks before federal marshals threatened to haul them away.

They went out on a limb to protest a court ruling shutting down Free Radio Berkeley. They were also trying to call attention to the need for micro-radio. DJs kept "Tree Radio Berkeley" going with a 40-watt signal powered by car batteries, and sending out an eclectic mix of punk rock, gospel and tapes made by death-row inmate Mumia Abu-Jamal. It was from the city's Willard Park, and the broadcasts stopped, partly in sympathy for the city's nightly park curfew, which had been waived for the occasion. Willard Park is also known to activists as Ho Chi Minh Park, a reminder of Berkeley's past as a hotbed of anti-Vietnam War protest.

Tree radio had been supported by residents, who brought hot food and other goodies to the broadcasters, but the weather was less cooperative, chilling the participants with wintry rains. The protest was thought by its organizers to have been a success in pointing the need for community radio, with plans for more protests. The next one probably won't be in a tree. "What we want to do is keep bringing public attention to it [microradio]" said the group's spokesperson Russell Bush.

Paul J. McLane, writing in *Radio World*, said some don't ever want to see digital broadcasting, unless it's a hybrid solution. Most listeners own multiple radios—in their living room, bedroom, bathroom, workshop, car and office. "When we replace radio with a digital-only system, those receivers will be obsolete. Consumers might buy one new digital receiver, but they are unlikely to buy four or five. Once the listener gets accustomed to not having radio in the bathroom or garage . . . they might not come back. Other media will serve them, and radio loses ground."

Digital broadcasting is to begin in Montreal, with several new digital frequencies assigned. All must simulcast their associated FM or AM stations except for 14 hours a week. Given digital slots at 1458.048-1452.816 mhz were CBF-FM, CBFX, CBM-FM, CBME, CKGM, CHOM, CITE, CKAC and CKMF.

A competitor to conventional radio is USA Digital Radio, which wants a 12-year transition period ending in an all-digital radio industry.

The NAB and the Consumer Electronics Manufacturers Association (CEMA) submitted to the FCC a document titled, "In-Band/On-Channel (IBOC) Digital Audio Broadcasting (DAB) System Guidelines, Part I—Laboratory Tests." This document was intended for the FCC to consider along with an earlier one asking for a petition for rulemaking filed by USA Digital Radio (USADR). The USADR petition asks the FCC to set rules and standards that will permit the introduction of IBOC DAB in the United States via existing FM and AM stations.

The guidelines drawn up by the NAB and CEMA "are the result of a cooperative effort among broadcasters, receiver manufacturers and IBOC system developers, and were designed to support independent testing of systems by either the DAB opponents themselves or by independent test contractors."

One company claims to have actually conducted IBOC tests. Digital Radio Express (DRE) conducted "a few hours of field testing of its FM system on San Francisco's KSN (107.7 San Mateo). DRE combined its digital FM signal with the host station's analog signal. Documents describing the van tests filed at the FCC said, "When sufficient IBOC RF field strength was available, the IBOC FM system performed as

expected, providing a recovered audio signal with noticeably higher quality than the analog FM receiver. However, there were digital audio failures (i.e. muting) particularly in the stop-and-go traffic in the downtown area."

The FCC says stations can ask for personal identification (name and address) of those seeking information from their public files. But they can't ask what organization they belong to, or why they might want to look at the file.

Gradually, the Commission is making its physical move away from the pressures of Congress and the NAB to The Portals in the southwest part of the District. The new mailing address for the FCC is 445 12th Street SW, Washington DC 20024-2101.

A computer hacker broke into the website of WHFS 99.1 Bethesda MD and "canceled" a station-sponsored concert. It happened over a three-day period, with e-mails sent to listeners saying the "HFSmas Holiday Nutcracker" show was off. The station then shut off its e-mail while trying to upgrade its security.

National Public Radio found Kevin Kose, a journalist and most recently director of the U.S. International Bureau, for its head. This follows the resignation of Delano Lewis.

*Internal Promotion* by Michael Langevin, Langevin Consulting and Publishing, is being distributed by the NAB. He's a consultant based in Duluth MN, and works at the local Shockley stations. I have several of his reports, and find them purposeful for a person or group interested in reaching a goal. Contact the NAB at (202) 429-5350; FAX (202) 429-5406.

The Great Lakes Broadcasting Conference and EXPO is Feb. 23-24 in Lansing MI. It's for broadcast owners, programmers, air talent, news directors and reporters, sales managers and for public broadcasters. "Registration as low as \$55." For more information call the MAB at 1-800-968-7622, surf to [www.michmab.com](http://www.michmab.com). Keynote speaker is Larry Csonka on "The Winning Edge."

Charles Persons, 89, Brainerd MN, who founded KVBR AM (later on FM as KFGI 103.5) and held a CP for an FM in Minneapolis on 102.1 in the early '60s, died. He was the original engineer for pioneer FM station WEBC-FM 92.3 Superior WI (and later Duluth MN, deleting in 1950). I interviewed him in the mid-'70s for a series of articles on the early history of WEBC-FM. The articles were co-authored by John Ebeling, and were published in *Radio World*. Persons, along with the late Walter C. Bridges, long-time general manager of WEBC, and Morgan Murphy, publisher of the *Superior Evening Telegram*, were early FM pioneers. Murphy owned WJMC-FM 96.3 Rice Lake WI and WEAU-FM 94.1 Eau Claire WI, and later KXLY-FM 99.9 Spokane WA, plus their AMs.

Persons was an aviator, having gotten his pilot's license at 54, his instrument rating at 65 and wrote articles for flying magazines. He died after he fell and struck his head; his son, Mark, is a broadcast technical consultant in the area.

Another obituary: John Mulvihill, 63, who founded EIES of New Jersey (on the 67 kHz of WSOU \*89.5 and on the SAP of NJPTV stations). In 1974 he founded the Electronic Information and Education Services of New Jersey in South Orange, a nonprofit agency for the visually impaired. EIES of New Jersey was one of the nation's first radio reading services for the blind. John sat next to me at a luncheon at the conven-

tion of the Association of Radio Reading Services in St. Paul two years ago. An interim director has yet to be named. Ms. Peemoy Walters has left the WUSF Radio Reading Service in Tampa FL, but will consult the group until a successor is named.

Another death to report is Dr. Kenneth Jernigan of Baltimore, former president of the National Federation of the Blind. "In the early 1970s he started an open channel radio reading service in Des Moines IA" (on KDPS '88.1). Jernigan was a nationally known leader in his field, and changed the way many people perceived blindness. He has been succeeded at the NFB by Marc Maurer.

The American Council of the Blind has petitioned the FCC to grant at least 60 kilobits per second (KB) of all digital television (DTV) signals for services "which allow for full access to information for persons who are blind, visually impaired, or who have other print disabilities." The ACB, in its petition, mentioned its long-time support of radio reading services "as a viable means of information access for people who are blind and visually impaired."

Minnesota has a new fighting governor, Jesse Ventura, of the Reform Party. He's been on Leno and other shows, written up in *Donesbury*, and the subject of a joke by PRI's Garrison Keillor. Keillor wrote in the Nov. 16 *Time Magazine* that "Minnesota is a \$12 billion a year operation, and we have taken the janitor and made him the CEO."

Ventura

Ventura shot back: "Garrison probably wouldn't like me anyway because I earned my living in the radio doing advertising, not at the public trough." Ventura has been a host on KSTP 1500 AM talk radio, and heard on KQRS 92.5 Golden Valley MN. "Besides, sometimes the janitor might be smarter than the CEO, because the janitor will know the business from the floor up."

WBCL "90.3 Fort Wayne and relayers did very well with the annual Prison angel tree drive. It generated over 7000 gifts for children of prisoners in the area. "The purpose of the project," according to Terry Foss, director of outreach ministries for WBCL, "was to share the love of Jesus by providing Christmas gifts for children of prisoners. Our listeners were so generous! Their giving demonstrated true Christianity in action!" Volunteers sorted and distributed the items.

The CRTC has announced it was to have accepted letters of intent to apply for new English language FM station to serve the London ON region by Jan. 8—for 102.3. Affinity Broadcasting has already shown an interest in the channel. There could be no grant, however, if the CRTC finds that a new station would have an adverse economic impact on existing broadcasters. Formal applications would be required by Feb.

Noncommercial KRTM "88.9 Temecula found that it went "over the line" in describing the Silverhawk real estate development, and is having to pay \$4000. The FCC reduced the fine from the \$6000 originally asked.

Also fined was KLBJ-FM 93.7 Austin TX \$5000 for a June 12 episode of the *Dudley and Bob with Debra Show* over an outburst with a

female caller. Said g.m. Scott Gillmore: "We're embarrassed and apologetic, and we've assumed some new checks and balances to make sure this doesn't happen again."

The FCC is going too easy on raunchy broadcasters, and a group of eight senators is asking the FCC to investigate and impose "severe penalties" on offenders. The senators cited an Aug. 25 *Washington Post* story about smutty broadcasts. "This is shock radio at its worst, but without effective FCC oversight it is, sadly, unlikely to change," they said in their memo, signed by: Herb Kohl (D-WI), Mike DeWine (R-OH), Byron Dorgan (D-ND), Dianne Feinstein (D-CA), Jeff Sessions (R-AL), Charles Grassley (R-IA), John Ashcroft (R-MO) and Strom Thurmond (D-SC).

Those feisty Missouri Synod Lutherans get their stations renewed: KFUD-FM 99.1 and 850 AM in the St. Louis area. Not only that, but they had the various EEO-related issues dismissed, including the originally-imposed \$250,000 fine.

Also in St. Louis, it's the Ku Klux Klan that loses. They weren't threatening the Missouri Synod Lutherans, but KWMU "90.7, which lost a court battle to force its underwriting on the public station. The Klan claims a First Amendment right to purchase underwriting announcements like, "A white Christian organization, standing up for the rights of white Christian America since 1865." KWMU feared the Klan connection would drive away other support, with donors giving about 22 percent of the station's \$1.8 million budget. Watch for this case to go to higher courts.

Speaking of EEO, the FCC's decided to play it safe and avoid the Supreme Court. Thus, the FCC won't be appealing its latest EEO setback, but will instead encourage the industry to hire more women and minorities. Move could actually help employment at small stations, where before if a broadcaster had five or fewer employees, it did not have to file EEO forms with the FCC. Now, presumably, broadcasters can add staff without having to worry about crossing an EEO threshold.

Scott Muni, who left WNEW 102.7 New York, (see story last issue, p. 8, col. 3) lands a job at WAXQ 104.3. He's probably only parttime, doing a one hour show from 12 to 1 p.m. weekdays.

KQRS 92.5 Golden Valley MN finally apologized for insensitive remarks toward the Hmong community by morning host Tom Barnard. ABC group vice president Mark Steinmetz said: "We apologize for these comments. It was not our intention to offend the Hmong community. Hmong are deserving of our fullest respect. Like all Americans, Hmong people have the right to free speech, life, liberty and the pursuit of happiness under the protection of the U. S. Constitution." Note it was Steinmetz, not Barnard, who apologized. Nevertheless, the community accepted the apology as sincere. KQRS also had to pay for ads in the *Minneapolis [Star-Tribune]*, the *St. Paul Pioneer Press* and ethnic newspapers.

Terms of the agreement call for a \$5000 scholarship and internships for Hmong and other people of color, expected to cost the station about \$25,000 a year. This is "a drop in the bucket to KQRS. But it represents a small bright spot amid a series of industrywide threats to programs aimed at bringing more diversity to broadcast staffs and ownerships."

From the classifieds: Wanted to buy AM or FM in New England area, noncommercial or commercial,

no station too small, will consider partnership. M. Cardillo, (401) 942-8341.

FM FORUM

CONTRIBUTIONS FROM READERS

Two Macomb IL area radio fans have created a new radio show devoted to AM, FM and TV info, call ins, "big ugly dishes, progressive politics, hi-tech, strange music." Hear the *Tom and Daryl Show* on shortwave WBCQ 7415 mhz from Saturdays at 2200 CST to early Sundays at 0100.

In October, I had a fine trip to Hamilton ON, with a breakfast audience Oct. 4. On the trip, I sold a restored G-E Superadio II and other electronics goodies. It was a pleasure to meet longtime newsletter and *FM Atlas* reader Dr. Ken Walter of Toronto, and to welcome Wayne Plunkett of Weston ON as a subscriber. Wayne has visited here at the "Publishing Estate," and in the '50s in Duluth.

A new Chicago FM history page at <http://www.zecom.com/zecom/museum/fm40.htm> includes station lists from 1940-49; *FM Atlas* 11th ed. 1988 is also mentioned as a source." My book is also mentioned in two consecutive paragraphs near the middle of the article in a report I wish the Internet would delete reference to: in the *American Atheist* magazine at <http://www.atheists.org/visitors.center/rm2493.html>. Their report used the *FM Atlas* to track how many religious broadcasters there were, and to lend support to the discredited Lanzman-Milam petition to curb applications for religious FM stations in the educational part of the band (87.9-91.9 mhz). That proposal generated so much mail to the FCC that the Commission has cried, "No more!" The petition was dismissed.

Allen Lloyd of High Point NC has sold SCS-modified radios, but e-mails that business has been slow lately and he might get out of it. "I'm sure you know by now that the main 'workhorse' in our decoders (LM 3089) has been taken off the market. . . This was SUCH a good FM chip, why is it suddenly 'obsolete'?"

Four people in a '98 VW Beetle proved you could stay confined for 38 days and win a prize from Smyrna GA's Star 94 WSTR. Only two VWs were awarded, with a drawing telling Sonja Banks and John Crow they won. Previous losers were on hand to congratulate the winners.

Until February,

BC Nelson VF7032 100.9 50 v, -305 m, a temporary station to be on Feb. 22-28; licensed to Kootenay Co-op Radio.

NF Gander CKXD-FM 103.7 6000 h,v; 100 m, to be [tereo], Newcap Bcstg., Inc.

ON Paris \*90.7 4000 h,v; \$, c, to relay CBL-FM 94.1 Toronto ON., CBC. [given.

BS Guerrero Negro XHGNB 94.1, parameters not/  
QU Cancun XHQOO 90.7 3000 h,v, "Radio Pirata," parallel to XEQOO 1050 AM.

## Call Letters Assigned

AZ Flagstaff 100.1 KBLC

AZ Lake Havasu City 96.7 KBBC-FM (from KANG)

AR Maumelle \*96.9 KWLR (KSIZ), g, in an LMA from Flinn Broadcasting by LifeTalk.

AR Paragould 107.1 KDRS-FM (KLQZ), r, "The Ridge," in a combo with KDEZ 100.5

Jonesboro-KJBX 106.7 Trumann-AM.

CA Roseville 93.7 KXOA (KRAK-FM), op, "Arrow 93-7," taking format which was on 107.9

Sacramento.

CO Holyoke 92.3 KKYT

FL Apopka 95.3 WYPO (WTLN), sr, dance, "The Party." Stereo resumes after a period of monophonic talk, when it was parallel to WDBO 590 Orlando. [AM is in Duneedin.

FL Beverly Hills 106.3 WGUL-FM (WXOF); AM/  
FL La Belle \*88.3 WBIV

FL New Port Richey 96.1 WBDN-FM (WGUL-FM), S, I, "Tropical." AM is in Bradenton.

FL Yankeetown 96.3 WXOF (WBKX), "The Fox," still k[ountry].

GA Albany 104.5 WKAK (WGPC-FM), k, with a new format expected by spring.

IL Lincolnshire \*88.1 WAES

IA Onawa 102.3 KZSR (KOLK), m format

KY Midway 107.9n WBTF (WAHY), "The Beat," ID with Lexington.

MI Benton Harbor 94.9 WCNF (WYKL), r, hot AC, "Coast 94.9."

MI Mount Clemens 102.7 WKSK (WWBR), mr, "Kiss." Owned by WDTJ 105.9 Detroit-WCHB AM.

MI South Haven 98.3 WCSY-FM (WCSY)

MN Alexandria \*89.5 KBHG

NY Albion 102.1 WBJA (seeks transfer to noncommercial CSN International)

NY Dansville \*88.7 W204AS

NY Jewett 97.9 WRIP (WAXX)

NY Voorheesville 96.3 WAJZ (WPTR), "Jarrz 96.3," s, "hip-hop and urban contemporary." "WPTR had been a distant competitor to local country giant. . . WGNA-FM 107.7." Also carrying the Tom Joyner show. WPTR is in Albany County, "the weakest county for country listening." The new format is considered more of a "metro format. . . It is a drastic change. For years people who liked this type of music had to switch on and off and flip through college stations."

NC Belhaven 101.1 WANJ (WKJA)

NC Havelock 105.1 WANG-FM (WANG)

OH Washington Court House 105.5 WCHO-FM (WCHO)

OH Willard \*96.9 WLRD (WHHA)

PA Mesontown \*88.5 WYFU (WLWJ)

PA Port Matilda 107.9 WNCL (WIKN)

TN Etowah 103.1 WLLJ (WDRZ), "J-103.1." FCC continued to show its calls as WDRZ, until I pointed out the error and then they corrected their listings. Station website was of no help; it did not mention calls, but two people there e-mailed with the correct info.

TX Lamesa \*91.3 KBKN

TX Port Arthur 98.5 KTJM (KHYS)

TX Sanger \*89.7 KTPW (KBJY)

TX Springtown \*89.1 KMQX (back to, from KTPW)

UT Levan 99.1 KBLN

UT Randolph 102.3 KAIO

WY Thermopolis 101.7 KBIK

AB Medicine Hat 96.1 CFMY (not CJCY)

BC Revelstoke \*97.1 VF2328

ON Iroquois (not "Iroquois Falls") 107.7 CISQ, \$, 40 m (50 watts) h, only. Iroquois is ESE Smiths Falls on the border; nowhere near Iroquois Falls, which is NNW of Kirkland Lake.

PQ Maniwaki 99.3 CFOR (CKMG)

NU Iqaluit \*93.3 CIQA (note new name for this part of the Northwest Territories—Nunavut).

CI Chihuahua 106.1 XHSU (not XHSO, which is 99.9 Leon GN), "El Lobo."

QU Cancun 91.5 XHCCQ, 92.3 XHCAQ 93.1 XHYI

QU Cozumel 89.9 XHRB

NU Nunavut—several cities, stations move to this new territory, carved from the eastern and north-eastern mainland plus most of the islands of the Northwest Territories. "NT" is still the Canada Post abbreviation for the entire province, but web sites are showing the new "NU" abbreviation. The rest of the province is expected to take the name Denendeh. Cities with FM stations in Nunavut are: Alert (a base with 9 people), Arctic Bay, Arviat, Baker Lake, Cambridge Bay, Cape Dorset, Holman, Igloodik, Iqaluit (its capital), Kangiutuqaqik, Kaujuitoq, Kugluktuk, Mittimatalik, Nanisivik, Pangnirtung, Pelly Bay, Rankin Inlet, Taloyoak, Whale Cove. All are to be listed in small print in the new *FM Atlas*.

CL El Pinalito XHZCN 96.5, exact location unknown, except it is near Monclova, as indicated by one web page.

NL Galeana XHGAL 93.7 11000 h,v

**Stereo—Or to be Stereo**

CA South Lake Tahoe KRLT 93.9. It seems to have finally settled into broadcasting in stereo. Now "The Lake" (from "FM 94").

IL Coffax WSNi 92.9, "Sunny 92.9"

IA Belle Plaine KZAT 95.5, "Classic Hits Z-95

FM, ID with Tama-Toledo.

IA Milford KUQQ 102.1, op  
 KS Colby KWGB 97.9, "B-97.9" (not strict); ID with Goodland-Burlington (CO).  
 KS El Dorado KBTL \*88.1. "Went full power last March. Our permanent license is still pending, but should come through soon." Students choose their music in two-hour shifts, and it is on 2 p.m. to 10 p.m. Monday through Friday when school is in session. Sometimes signs on weekends for sports. About 28 students are signed up for the activity. List format as rk, with a "preponderance of rock (with the variety ranging from classic to alternative), and both old and new country."

KS Salina KAKA \*88.5. "This is our new high-power station."  
 KS Winfield KAZY 95.9, ID with Arkansas City ["ar-KANS-es sitee"] -Ponca City OK  
 KY Benton WTRT \*88.1, g, Skylight Network, ID with Hardin.

KY Campton WCBJ 103.7, not yet on, but hopes to be on soon. Its stereo status is provisional. "If we find there's a problem with reception in this hilly area we'll turn the stereo off. Other stations in this area have gone mono. [Which ones?] I won't rat on them to a rag like yours. Click!" [Town misspelled last month, p. 2, col. 2.]

LA Many KAVK \*89.7  
 ME Islesboro WAYD 105.5, "The Bay 105.5," to ID with Camden, m format. Was to have signed on by Feb. 1.

MS McCook WAQL \*90.5  
 MT Hamilton KUFN \*91.9  
 MT Kalispell KUKL \*89.9, cj, IDs with KUFM 89.1 Missoula and its other relayers.  
 NE South Sioux City KSFT-FM 107.1, "Soft 107," no ID with Sioux City IA, where its studios are. [Kat Country]  
 NV Sun Valley KXXL 93.7, ID with Reno,  
 NY Brockport WASB-FM 105.5, ID with Rochester, "Sunshine Network."  
 NY Willsboro WXPS 96.7, ID with Burlington VT, "Kix 96.7."

OK Ardmore KLCU \*90.3, cn, "The Classic FM," receiving programming via microwave from KCCU 89.3 Lawton. Has a separate ID.

**KCCU**

**"The Classic FM"**

OK Idabel KQIB 102.9, r, hot AC, "Q-102," owned by KKBI 106.1 Broken Bow.  
 OK Shawnee KQCV-FM \*95.1, ID with Oklahoma City.  
 OR Cottage Grove KEUG 105.5, "Lite FM," ID with Eugene-Springfield.  
 PA Franklin WAWN \*89.5

TX Borger KQTY-FM 106.7, to be on by April. "Sure, it'll be stereo. I used to work in retail here and took over the station. It's kind of fun running a radio station. High winds are what might delay climbing the tower to put the FM antenna up."

TX Comanche KOXZ 94.3, but not yet on the air. "We'll be on during the first quarter of the year. I can't tell you about any slogans or cities we may ID with because of competitive pressures."

TX Plainview KVOP-FM 97.3, m, no longer parallel to KKYN-FM 103.9, which is k[ountry].

VA Emporia WJYA \*89.3, IDing with WJYJ 90.5 Fredericksburg. "I enjoy your newsletter," E.E., WJYJ.

WA Davenport KKRS \*97.3

WV Elkins WBHZ \*91.9, on air

WI Reedsburg WBDL 102.9, ID with Baraboo, "B-102"

ON Iroquois Falls CJWL 104.9, on air.

PQ Trois-Pistoles CIBM-2 104.9, facilities to 32 m, d-a (180 h).

**Monophonic**

KY West Liberty WLKS-FM 102.9 had tried stereo, but went mono (see above comments from owner of co-owned WCBJ 103.7 Campton KY). Now "Kick 102.9." "Yeah, it's mono. What do you have to know about its being stereo for anyway?"

**Format Changes**

WI Iron River WNXR 107.3 o, "Oldies 107.3" (strict, but operating at low power).

WI Marathon WKQH 104.9 op [Bay WI

WI Neenah WROE 94.3 m, parallel to WLTM Sturgeon/  
 WI Stevens Point WSPT-FM 97.9 r, modern AC.

WI Sturgeon Bay WLTM 99.7 m

MB Winnipeg CJAE 92.9 rs, plus blues. "Arts and Entertainment FM 93" slogan. Expected to start full operation this month. "It is run by a broadcast training school."

ON Ottawa CHEZ 106.1 op, "Classic Rock Chez 106.1" (from "Shay 106")

BN Rumorosa XHFJ 98.3 pr, English

CY Colima XHCC 89.3 rs, along with AVC ballads, about half Spanish and half English, but from midnight to 6 a.m. it's 70% English and 30% Spanish. Still "Volcan FM," but also known as "NRG Radio."

**On Air—Real Stations and Pirates (Selected)**

DE Newark area—95.3 pirate with '70s rock and R&B. "Audio quality is fair. Estimated power at 10 watts."  
 KY—the following have changed frequencies and are now on the air on the new channels shown: Carlisle WSTL 92.1, g format; Irvine 100.7 WCYO; WMOR-FM 106.1 Morehead (having moved from 92.1).  
 MA Dorchester or Braintree area—a station with French, possibly Haitian, to such an enclave in Dorchester  
 MN Bloomington KZ20EG \*91.9—back on with both stereo channels. "I stumbled across the one channel being dead and it was corrected soon afterward."  
 NY Brooklyn 91.9—Haitian pirate No. 7 in the area, with a name sounding like "La Radio des Entilles."  
 NY Fenner WXXE \*90.5, still mono and "will be in mono for most or all of 1999. . . . We are currently broadcasting from 6 p.m. until at least midnight (3 a.m. on Friday and Saturday). By mid-February we should be on 24 hours per day. Programming is the typical community radio patchwork of regionally focused volunteer produced music and public affairs, and a few hours of nationally produced public affairs." Not yet on is WXXC \*88.7 Truxton and an 89.9 relay.  
 ND Cavalier KAOC, "Can Am Country 105.1," is truly an international broadcaster, marketing to Winnipeg MB. Winnipeg has about half a million people, and less than a dozen stations. Those stations are said to be selling :30 spots in the neighbourhood of \$400 U.S., so along comes KAOC with a "half decent" signal and is charging only \$5 for such an ad. KAOC has set up an "agent" to sell the ads. "This way the ads can be deducted as a business expense. The 'agent' buys the ads from KAOC. . . . so why not?"

OR Portland—a drive starting in North Portland heading south gives you 104.1 reception of K281AK \*104.1 Hazel Dell WA, then in 6 km KRRC (mono) Reed College, "which since last spring has been running carrier only." Then in another 2 km "The Milwaukee Pirate (stereo), with Tec-Rock-Rap-Album Rock and no talk. Then in another two km The Oak Grove Pirate (mono) with TRN Talk Radio Network and USA Radio News, but no IDs—all a raw feed. "All this has been going on for months. . . Who knows what lies farther south on 99-E?"

PA Lancaster area—strong Spanish pirate on 106.3, with yelling, like a dictator, little music. Estimated at 200 watts. Audio often distorted, overmodulated. "The FCC needs some restaffing to bust some of these pests!"

TX Houston "Montrose Radio" 94.9, alternative rock since January, 1998.

VA Springfield-Washington DC area—a Spanish-speaking latino pirate, in stereo, probably vertically polarized.

WV Hansford "KCUF" 97.9, \$, oldies and local artists.

WI Muskego "Lake 101.5" with 1/2 watt, claims to serve a 1-km radius. Also still on is WCCX \*104.5 Waukesha (13 watts h.v.; 15 m).

BC Castlegar CKQR 99.3 JON Thunder Bay  
 MB Churchill VF2312 96.9 CJOA \*95.1  
 MB Moose Lake VF2313 96.9 JPQ Paspebiac  
 MB Oxford House VF2314 96.9 CIEU-1 106.1

NF St. John's 88.5 temporary station (until probably Feb. 9) for Tory candidate Rick Fifield. Since he won't have time to shake hands with all his constituents before the election, he's turned to a localized FM frequency in the Topsail neighborhood. From campaign headquarters, the station can be heard within 6 km. "The cost of advertising for a campaign is so high that trying to get your message out to people is difficult. Each day, I'll be giving updates on how the campaign is going, what I'm hearing and the views that I'm developing," said Fifield, a small business operator and former civil servant. He's up against two other candidates.

ON Toronto CIUT \*89.5 "may soon find itself without a microphone. Some members, after revelations that the plucky U of Toronto campus radio station is almost \$100,000 in debt, are even predicting it won't last past [the end of January, 1999]. Seven board members have resigned. "Business at the station has effectively stalled." Tensions between volunteers and management over how CIUT should be run "have come to a high boil amid charges of financial mismanagement." Said Gord Chaujan, a volunteer rep on the board, "We're going to have to do some quick thinking to get out of this mess, yeah. But to say CIUT is going down, that's a total exaggeration."

**Off Air—Or Not Yet On**

AZ Tucson area "Radio Limbo" 103.3, 20 watts, has been off since Election Day, 1998, when the FCC seized its antenna and transmitter from a wilderness area in the Cataline Mountains. It had been on since June '97 with a variety format. They recently held a fundraiser to buy new equipment, and operator "Edwin Armstrong Jr." and friends hope to have it back on the air by March. "Armstrong took his broadcast name from an inventor who perfected FM radio technology in the 1930s," reported the *Arizona Daily Star*, in an article which included comments from legal broadcasters: "Chuck Roast, program director, alternative rocker, KFMA 92.1 FM: 'It waws kind of cool, with a lot of neat, weird music. As long as it doesn't interfere wiht any other radio stations, that's fine. It should have to pay fees for usage of music and abide by rules that everyone else has to, but other than that, the more the merrier'. Jeff Rice, managing editor at classical station KUAT \*90.5 FM, and jazz-public affairs KUAZ \*89.1 FM,

speaking for himself, not the station: 'My tastes run all over the place. That's why I was interested in it to tune in. You never knew what you were going to get. They were so brash. They had a huge signal, and I sourt of couldn't believe they were doing it. I don't advocate illegal broadcasting, but I just sort of couldn't help tune it in. It added a lot to the radio dial. I think a lot of people sort of felt the same way'. Mark Landwher, program director, community radio KXCI \*91.3 FM: 'I felt pretty supportive of what they were doing. Knowing what we have to go through with the FCC to get things done, we have to wait so long just for routine beureaucratic clearance to improve our signal. It kind of makes me feel good to see someone able to bypass all that stuff and do pretty much what they want to with broadcasting.'

FL Gainesville "Free Radio Gainesville" 94.7 shut down by FCC Nov. 209 (see Nov. '97 p. 3, col. 3).

FL Monticello WTAL-FM WTAL-FM 105.7 'still off.'

GA Mableton WAWE 102.5, despite having been assigned call letters in fall of 1997. "The Hispanic owners must be taking a really long siesta!"

MI Grand Rapids WBYW \*89.9, probably gearing up for the switch to WAYG, "which should take place very soon."

MN Two Harbors KZIO 104.3, now and for about four days earlier in January. Its 106.3 translator in downtown Duluth remains on, fed by a studio line. "I complained about a similar occurence with 104.3/106.3 on my site in July '97. An engineer wrote to tell me that fill-in translators (within the primary contour) can be fed in any way they want, and they can stay on the air for a limited amount of time when the primary station is off. He said this was a recent change," Jon Ellis by e-mail. The manager of "The Candle," KNLD \*89.9 Angwin CA, tells me that K209AI \*89.7 Eureka CA gets its signal via microwave, which he claims is legal for educational licensees.

OR Brookings K208DC \*89.5, an unbuilt CP.

OR Sisters KPXA 104.1, seeks C1

TX Leander—an unauthorized station which used 88.5 and 95.9—ordered to pay \$11,000 by the FCC.

WA Chewelah 95.3, operated by Lewis B. Arnold "since at least August, 1997," and also subject to an \$11,000 fine. Also a "KYZK" 94.5 Everett WA (and before that known as "KOAX" in the late '80s. Since 1996 it was run by former broadcasting student Kaci Martin, 20, who ran it with "digital hardcore" electronic rock. She ran the 40-watt station with classmates and recently added AM outlets on 910 and 1700 playing Christmas music. The FCC people were very courteous, and "allowed us to finish the programming hour without any on-the-air interruptions. We have \$37,000 worth of studio and transmitting equipment and they could have taken it all. We were lucky."

WI Ashland W275AF \*102.9, W284AN \*104.7, but should be on in a month. They're working on a building to house the equipment. Will use Morse IDs hourly, "plus we'll mentijon them on some of the KUWS/WHSA IDs (more often when they first come on)."

\*The FCC is doing a good job of shutting down illegal radio operators. The Commission's actions are further evidence that pirates should not be legitimized through the creation of a microradio service," said the NAB. It denied Joel L. Efrein's petition for rulemaking to reserve FM channel 300 (107.9) for unlicensed (Part 15) low-power operation.

**Deletions**

YU Chemax \*90.5 XHCHX, not "XHCMX," Aug. '98, p./

Copyright date, last line of masthead, Jan., p. 1, still says '1998.'

"I have let my subscription expire as of 12-98. Reasons: Now being of senior age, with leanings toward classical and so-called beautiful music, I have little interest in the plethora of rock, country and talk stations now dominating the scene with sameness. Too, it bothers me that radio evangelism is filling in every available spot on the dial," K.T.C., Joplin MO.

"Yes, that was me in Muscatine IA, in the [1968 list]. I was in high school, and the early years of FM growth in eastern Iowa. My local KWPC-FM 99.7 didn't go stereo until the mid-1970s (as KFMH). Now it's KBOB and has moved to the Quad Cities. KFMH was a great, unique format and presentation. I miss it when I go home (KCJJ 1630 AM Iowa City comes in strong here!)," D.B., Tallahassee FL.

"I won't be renewing my subscription to FMedia! I do feel that it is an excellent publication for anyone owning or running an FM radio station! I do, however, own and run a standalone AM radio station without the possibility of ever being able to put an FM on the air in my market. Keep up the good work with the FM dial," D.M., KDWA Hastings MN.

**SCS/SAP Services**

**Symbols are as in the FM Atlas**

FL Clearwater area: W48Ay Oldsmar has "Greek Voice Radio" on SAP, and a variety of ethnics on its main channel. Co-owned with WPSO 1500 New Port Richey and WXYB 1520 Indian Rock Beach FL.

GA Atlanta WRFG \*89.3 (J O,O). The 92 changed from Farsi to Chinese. \*Atlanta now has four ethnic SCSes: Vietnamese, 67, and Chinese, 92, on WRFG, Haitian French, 92, on WABE \*90.1, and Korean, 92, on WNNX 99.7. The nearest music SCS is 145 km away on WHMA-FM 100.5 Anniston AL. This is quite a change from the early '70s, when background music SCAs were copious. Atlanta had three, and there were many more in nearby cities. After a period of consolidation which saw local Muzak operators gobble up many of their competitors, the much-discussed shift to direct satellite delivery began. This trend has accelerated in recent years, producing an end result of: the movie "The Last Picture Show."

IA Sioux City KGLI 95.5 (J), Cue Paging, plus, Z, 92 kHz high speed data. "We don't use 67 kHz any more!" KSEZ 97.9 (JX, 67, for Midwest Energy Company. It sends out a data signal to control air conditioners in the summer. "It's on all year, but I'm not sure what it sounds like!" T.M., g.m.

MA Cambridge WHRB 95.3 still Greek, Hellenic Radio, believed to be 92 kHz. "We've been buying our SCA radios from Sound City in New York. They sell Panasonic 430s with SCA for \$55.00, but I'm looking to see if there's a radio more sensitive. WHRB is a low powered station."

MI Battle Creek WBXX 95.3 (J, G, 92, African American Gospel, an "exciting new concept in Gospel radio

**We're African American Gospel**

**WAAG FM**

**SUBSCRIPTION RADIO**

programming. We at WAAG will prove to be a wonderful blessing to numerous families throughout the greater Battle Creek and surrounding areas."

MI Grand Rapids WBLU-FM \*89.9 still has the Sight Seer radio reading service on its 67 kHz, but that service is faced with having to move. Ken VanProoyen's service has been headquartered at Reformed Bible College 10 years, and now the college needs the space. VanProoyen, 77, doesn't look forward to having to move. The 16-year-old SCS station has 7000 listeners and 132 volunteers. VanProoyen and wife Ruth began the service in 1983 after he retired from a job in broadcast-

ing. They've sent letters to every real estate agency in town in hopes of finding a new place by this month. Once a site is found, they'll face the tedious process of wiring 900 m of cable and soldering 500 connections, a procedure that could take up to three months, said VanProoyen.

NY New York WCBS-FM 101.1 no (JX, 76 kHz. It apparently dumped Digital DJ, with the web page no help. "They no longer list the participating stations. Digital DJ uses the DARC technology mentioned Dec. p. 7, col. 1." The Digital DJ web page is <www.digitaldj.com>. [67 kHz.  
ON Toronto CJRT \*91.1 (J), 80% in the Tamil language./  
PQ Montreal CKUT \*90.3 (JX 67 or 76 kHz assumed; used for "multipoint data."

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station uses call letters once per hour (at or near top of hour) as required by FCC and Industry Canada*

AK Houston KQEZ 92.1 EZ 92.1 (spelled that way, not "Easy")  
CA East Porterville KMQA 100.5 La Maquina (proper spelling of its nonID (see June p. 5, col. 1; last month p. 1, col. 2).

KS Girard KSEK-FM 99.1 Real Rock  
NV Reno KRNO-FM 106.9 Sunny 106.9 (from "FM 107 K Reno")

NJ Egg Harbor WRDR 104.9 Stereo 104.9 (from "FM-105")

NY Mechanicville WXLE 104.5 The Beat (from "Mogai 104.5"), with a jammin' oldies format.

TX Dallas-Fort Worth KYNG 105.3 The New 105.3 FM Superstar Country or "Superstar Hits and a Young Country Attitude." It is de-emphasizing "Young Country" in favor of a format with a broader playlist and appeal. [Only Alternative

WI Stevens Point WWSP \*89.9 90 FM The/  
ON Ottawa CKKL 93.9 93 Dot 9 Kool FM (from "Kool 93.9") [; the format having moved from 95.7 in CA)

BN Tijuana XHRM 92.5 Magic 92.5 (from "The Flash"/  
CI Chihuahua XCHHH 94.9 D 95, "even though there's no D in the calls!"

CI Manzanillo XHMZO 92.9 Radio Turquesa

**Multi-City IDs In Use**

CA Modesto KEJC 93.9 with Stockton-Turlock, \$, "The Ranch"  
GA Talking Rock WNSY 100.1 with Canton  
MN Spring Grove KQYB 98.3 with La Crosse WI. Its 103.9 translators in Rochester and Winona are on.  
MN Spring Valley KVGO 104.3 with Austin-Rochester, now "Kool 104" (not "Kool 104.3").  
NV Incline Village KTHX 100.1 adds Reno, "100.1 X Radio" (from "The X").  
WI Trempealeau-La Crosse WFBZ 105.5 adds Winona MN to middle of ID list, still "The Buzz."

**Selected AM Happenings**

KS Dodge City KDCC 1550, a former Alf Landon station, now owned by Dodge City Community College, simulcasting KDNQ \*91.9 to noon, then it turns Hispanic. Remains commercial.

KY Covington WCVG 1320 has urban gospel. "We're the No. 2 Christian station in the Cincinnati market, second to an FM Christian station."

MO Independence KCTE sports radio 1510 had a fire at the transmitter, which is "a total loss. . . Off air pending replacement of the 20-year-old transmitter, which malfunctioned, causing the fire."

NJ Toms River WJRZ 1550 remains deleted. Petition for reconsideration dismissed by the Commission.

NY Huntington WGSW 740 drops Radio Disney (now on WQEW 1560). It is parallel to WHLI 1100 Hempstead, m. "No dual ID."

OK Cushing KUSH 1600 deleted  
OR Phoenix KTMT 580 (was 880) confirmed they won't be going to 1650 "basically because of cost and changes." KCMX Medford now on 880; both owned by Citadel Communications.

TN Farragut WTNN 670 reported silent; in a new LMA and expected to return to the air.

TN Lenoir City WBLC 1360 off air; expects to be on later this month in a new LMA with a different format; had been southern gospel.

USA—A federal court judge in St. Paul MN overturned a \$20 million jury award to Children's Broadcasting Corp. from Walt Disney Co. CBC claimed the demise of its kids' network stemmed from the ending of an agreement it had with ABC. Until last year CBC operated Radio Aahs. In 1995 the company made a deal with ABC to sell national advertising for Radio Aahs, but in 1996 Disney, Burbank CA, ended the agreement and set up its own kids' network, Radio Disney. The network was mainly on AM. In September, a federal court jury ordered Disney to pay \$20 million in damages. At the time CBC president Christopher T. Dahl hailed the verdict as a message that big companies can't push around smaller companies like his. ABC said it was very pleased with the verdict, but CBC issued a statement saying it will appeal.

PQ Montreal CBF \*690 off the air as of Jan. 22. Preceding that, it announced in French "the programming of CBF is no longer being broadcast on the frequency of 690 AM," and gave a list of FM frequencies, with two phone numbers to call in case of difficulty finding the broadcast.

"I'm sure many of your readers are wondering: Is there going to be a new FM Atlas this year, or are you going to let it remain out of print until 2000?" N.L., Atlanta GA.

"Good to hear a new FM Atlas is coming," R.T., CA by e-mail, who says 1470 was until recently using the KOMA call letters on the hour, but saying "KRAK 1470" at other times. As noted above, KRAK-FM 93.7 Roseville has emulated the former Sacramento CA 107.9 with a call letters change to KXOA.

Baulino Bernal Evangelism wanted an 88.1 translator to relay monophonic KCZO \*92.1 Carrizo Springs TX at a site 80 km south of Fresno. Although outside the "protected zone" of the KFCF signal radius, "the new station was well within our listening area. In fact, KFCF has several hundred subscribers in the area that would likely have experienced interference by another station at 88.1 . . . even at low power. We did not take the threat lightly!" wrote Vic Bedoian, executive director, KFCF, in the NFCB's *Community Radio News*. KFCF relays the programming of KPFA \*94.1 Berkeley CA, plus produces "some local offerings."

"The radio equivalent of 'televangelism' has been a growth industry in recent years, as various 'ministries' have sought to increase their flocks, and their treasures. Fueled by flexible FCC guidelines and their own fervant efforts, Christian broadcasters have gathered up many of the available non-commercial educational frequencies remaining in the spectrum. These are not neighborhood churches, mind you—they are large national organizations spreading their gospel via satellite from wherever they are headquartered to remote-control transmitters broadcasting in every corner of the nation. In our market, for example, there are two stations on adjacent frequencies broadcasting exactly the same program at exactly the same time. . . Somehow I doubt this is what the FCC had in mind for noncommercial, educational broadcasting in America.

"We had two options," continued Bedoian. "Either convince Paulino Bernal to find another frequency, or failing that, convince the FCC to deny their application. This is where the 'community' in community radio came in. That's the uplifting side of the story. After reviewing the application and its technical and geographic specs, I called ace attorney and gumshoe John Crigler of Haley, Bader and Potts in Washington, a firm specializing in communications issues. This was right up his alley—he knew the law and he knew how to map our strategy."

To have a chance of winning, they had to identify at least five KFCF lis-

**California Station Shows How Interfering Translators Can be Taken off the Air—Or Not Be Allowed in the First Place**

KFCF \*88.1 Fresno CA was quite concerned when it learned that

teners whose reception would be degraded as the result of another signal. "They had to sign a declaration that they lived in or drove through the 'official' signal area of the proposed station. However, the officially specified signal area of the translator (a.k.a. 60 dBμ contour) is a mostly rural area between two towns. Not many people actually lived there. Moreover, we had to make a persuasive technical exhibit to prove our case to the FCC." The story had been written up in the *Fresno Bee*, by media reporter Rick Bently, after which messages came with offers of help. After weeks of not finding anyone who fit their criteria, "we found listener Brian Barton, who drove through the area as part of his antique furniture business and wanted to help us out. Quickly thereafter, by following new leads on the phone, by word-of-mouth, from friend talking to friend, KFCF gathered 15 listener declarations to submit [to the FCC]. Meanwhile broadcast techie extraordinaire Don Mussell was working at his shop in the Santa Cruz mountains on a report showing that the proposed translator would wreak havoc with the KFCF signal. Now we had a solid case! Hopefully, it would be enough to sway the FCC, or even better, send a strong message to PBE that we could keep them off the air unless they backed off. We filed a petition to deny the PBE application. It was not up to them and the FCC.

"One afternoon in late September the good tidings from John Crigler arrived in my e-mail box. Paulino Bernal Evangelism had amended its application to seek another frequency. We had won!" A couple of weeks later the *Bee's* headline read: **INCUMBENT RADIO STATION RIDES WAVES, DIALS UP WIN.** "It had taken numerous days of office work, untold hours of phone consultation, endless strategy sessions, helping hands from our loyal listeners, and several thousand hard-to-come-by dollars. We made community radio really live up to its name. Sometimes the good guys win."

That outcome was considerably different from what faced KQED-FM \*88.5 San Francisco, which had objected to Stockton Christian Life Col-

lege's application for K202CT \*88.3 Santa Rosa CA. The FCC first dismissed KQED-FM's petition to deny, then it threw out a petition for review, and now KQED-FM has filed another petition for review. Last month (p. 4, col. 1) you'll recall seeing that the FCC deleted K208DD \*89.5 Mission Viejo CA because of protests from KPCC \*89.3 Pasadena.

Vic Bedoian, John Crigler and Don Mussell will be presenting a workshop at the 1999 NFCB Conference in March "on this very important topic. Don't miss it" advises its newsletter. That convention will be in San Francisco Mar. 18-21. For more info (415) 771-1160; FAX (415) 771-4343.

#### Small Print Happenings and FM Industry News

The U. S. seems isolated from virtually the rest of the world when it comes to digital audio broadcasting (DAB). Canada and the U.S. signed an agreement to implement DAB in the 1452-1492 mhz part of the spectrum for Canada's Eureka 147 system. Even China is said to be eyeing that system, while the U.S. persists in believing DAB will work on FM radio frequencies of 87.9 through 107.9 mhz.

The NAB reiterated to the FCC its "adamant stance against authorizing and licensing satellite digital audio radio service (DARS). It specifically opposed Wireless Communications Service's proposal for a third national DARS service. It called the proposal a waste of spectrum which could be "devastating" to local radio, "particularly in small markets. We also reiterated that DARS gap-fillers must not be allowed to originate programming." Speaking at the NAB Radio Luncheon Tuesday April 20 will be Sen. John McCain (R-AZ), as part of NAB99 in Las Vegas.

The late Wolfman Jack is to be inducted into the NAB Broadcasting Hall of Fame during the same luncheon where Sen. McCain is to speak. Wolfman Jack (born Robert Weston Smith) is best known as the howling disc jockey from XERF 1570 Ciudad Acuna MEXICO, and later went into TV.

Cox Broadcasting of Atlanta and 11 other broadcasters have announced plans to invest in USA Digital Radio, which would be a major DAB player. The support of these broadcasters is important because of a contest that's under way for a standard. Another player is Lucent Technology, which would use an incompatible system. The FCC is expected to pick one of these technologies as a standard. Joining Cox in the consortium are Chancellor Media, Clear Channel, Emmis, Gannett, CBS Radio, and others. CBS Radio and former parent Westinghouse Electric, along with Gannett, were the original investors in USA Digital Radio's new technology.

Canada's terrestrial DAB system is under way in Toronto, with an 800-watt signal. It's said to deliver "excellent coverage" from the CN Tower. Tests have been done using a DAB-equipped Volkswagen Beetle, known locally as the DABug. Achieving this coverage has cost each broadcaster \$50,000 (U.S.). Gap fillers will have to be added to bring market coverage to that of today's FM stations.

Pioneer supplied the equipment in the "DABug." Also promising DAB radios "early in 1999" are Kenwood and Sony.

Canada's CRTC is asking how well Canadian third-language and ethnic programming are doing, and ways those markets could be better served. Probably FM/SCS and DAB "ancillary" services will be looked to. And Singapore says it will introduce DAB this year, making it the first Asian country to do so.

CD Radio, Inc. has begun an FM repeater network in San Francisco for its satellite DAB service. System testing was expected to be complete by now. CD Radio is one of two FCC-authorized services in the field. It plans to offer 100 channels of "pay radio" by late 1999.

Jacor announces it is buying four Atlanta rim-shot stations: WMKJ 96.7 Peachtree City-WCOH AM Newnan, WZLG 98.1-WMXY AM 104.1 Hogansville. It's buying them for \$4.4 million from MetroSouth Communications. Jacor already owns Atlanta market stations WGST-FM 105.7-AM, WPCH 94.9, WKLS 96.1 and WHEL 105.1 Helen. "We operate on the philosophy of building hubs and surrounding them with spokes," said Jacor's Pam Taylor. "The idea is you can leverage some of the administrative overhead and programming overhead and other costs into smaller markets from your base and therefore reduce the overall cost of doing business." With the pending acquisitions, Jacor owns or represents 244 radio stations in 62 markets. Jacor also is exploring the possibility of boosting the signals of one or more of the stations to be a major Atlanta player. "The process of increasing the signal or moving in a tower can take years and is subject to FCC approval every step of the way," writes Miriam Longo in the *Atlanta Journal-Constitution*.

FCC Commissioner Gloria Tristani told a group of Texas broadcasters that she is "not convinced radio is headed in the right direction" with all its mergers. She and Susan Ness are two voices on the FCC who might turn the definition of ownership around, including a more strict definition of a "market." She's worried that consolidation will lead to pressures to centralize, homogenize and out-source everything. "Everything sounds the same," she's concluded.

The Department of Justice takes credit for blocking Capstar's purchase of KTWN 107.1-AM in Texarkana AR-TX. "If the acquisition had gone forward, businesses that rely upon radio to sell their products would have had to pay more to advertise," said assistant attorney general Joel Klein. If the sale had gone forward, Capstar would have had 62 percent of local ad revenues. Capstar already owns KKYR-FM 102.5-AM.

Earlier it was announced Detroit-based Saga Communications was adding KISM 92.9-AM Bellingham WA. Now it's picking up KAFE 104.3-KPUG 1170 AM. Saga will have virtually no local competition, and it will have two FM signals available to the Vancouver BC market.

New Jersey's Gerry Turro is being questioned about his monophonic 103.1 translator for "Jukebox Radio" in Fort Lee NJ. The FCC is concerned that Turro is using primary station WJUX 99.7 Monticello NY to program the translator in violation of its rules. Now in steps NJ state senator Robert Toricelli, who said, "I don't care what any FCC bureaucrat says about my meddling. I'm a New Jersey senator, and I believe a county the size of Bergen should have

its own FM radio station." And he's written an amendment to an appropriations bill that would allow this type of translator to originate programming—but only in counties with a population of at least 700,000 and that does not have an FM station licensed therein. I wonder if any other county in the U.S. would qualify?

CBS-owned KROQ-FM 106.7 Pasadena CA got hit with a \$2000 fine for airing a song called *You Suck* at 9:10 p.m. March 28, 1997.

Reducing its fine—WOHT 95.3 Drew MS from \$7500 to \$4000. In 1995 the station was known as WKZB. The FCC reduced the forfeiture after it was convinced Delta Radio had financial difficulty.

Last month (p. 8, col. 2) was a story about eight senators wanting the FCC to investigate so-called "raunchy" broadcasts, and to impose "severe penalties" on offenders. Oct. 28 *The Wall Street Journal* had a story about FM stations dropping rock for "risque talk." It mentioned Howard Stern, but concentrated on Tom Leykis (LIKE-iss), who is "at the vanguard of 'hot talk', an FM format of high-frequency, low-brow chatter that millions of

Shown next Tom Leykis

young people are increasingly piping through car stereos and Sony Walkmans." Leykis' show is on KLSX 97.1 Los Angeles weekdays 3 p.m. to 7 p.m.

"Until recently, FM was strictly play-the-hits," said Nick Kiemen of Westwood One, Inc., which syndicates *The Tom Leykis Show*, *Loveline*, and *The Don and Mike Show*, all talk shows on FM. FM talk veers into relationships, adultery and breast implants, "the kinds of subjects talked about between best friends and co-workers," said consultant Walter Saabo, who helped develop talk formats at WTKS 104.1 Cocoa Beach-Orlando and WKXW 101.5 Trenton NJ. Financial pressures as the result of consolidation might force more radio owners to push their FM stations "into the bawdy-talk mode." "MDore of them will be switching to talk over the next several years," predicts Erik Korman, executive producer at KIRO-FM 100.7 Seattle, which is largely talk. Despite the risque nature of much of Leykis' show, it is not obscene, and management at KLSX, where his show originates, says there has never been a run-in with the FCC.

WTKS, mentioned above, is being sued by the family of a convicted murderer who was killed in prison, alleging the host of a show on the station offered a \$1000 reward for his death. Donald McDougall was serving time for beating and starving a five-year-old girl in 1996. McDougall could have been released from prison as early as April, 1997. Less than a week before his death, a talk show host discussed his possible release and encouraged other inmates to prevent it. He was beaten to death. Inmate Arba Barr pleaded no contest to second degree murder and was sentenced to life imprisonment. Barr's attorney said that his client was "outraged" upon learning the details of McDougall's case.

The National Association of Broadcasters has asked the FCC to reconsider two of its revised rules in the non-technical streaming report and order. "We asked the Commission to re-evaluate its decision to exclude local zoning board delays as a circumstance that would stop the clock on construction permit periods. As the

rules were revised, local authorities would be able to stall a decision until a station's construction permit is automatically forfeited after the new three-year construction period expires."

One of the folks awaiting word on the FCC's microradio proposal is Wilmer Urgelles, who wants to do Sunday church services and Bible studies and Christian music in Spanish to the Princeton FL area. But before Urgelles and others can legally broadcast, the FCC has to decide what powers to allow the new stations, and how any interference conditions are addressed. Urgelles said his church has raised \$50,000 for a studio, which is already built. But he's flexible about the power level the church needs. "Whatever we can get, we can use."

Windy City Airchecks' operator Tim Benko died; he lived in Lansing IL, and for 25 years offered a service of taping the market's broadcasters. He was an *EM Atlas* reader as well.

Problems with its political file cost WFXD 103.3 Marquette MI \$4,800. The violations were to the station's former owner Vista Point Communications, which had been cited for "repeated violations" of §73.1943, the political file rule.

Heidi Damsky was one of the original applicants for 97.3 Homewood AL, now on the air as WEDA. The Commission found her to be financially unqualified to run a radio station, and awarded the channel to the other two applicants who had merged as "Homewood Radio." She tried to enlarge the issues against Homewood Radio and to charge "ex parte" contact between Commission Staff and attorneys for the other group. But the FCC rejected her latest bid. Cox has a deal to acquire the station, now calling itself "Hot 97.3," and which IDs with Birmingham.

The man convicted of stalking Howard Stern drew a 2½ year sentence from U.S. District Judge John Keenan. This is double the usual sentence for such offences. Michael Lance Cavin sent four threatening letters to Stern from Las Vegas last year. One threatened: "I will absolutely, without a doubt, kill you and this is 100% guaranteed." Keenan said the severe sentence was meant to "deter this defendant and others from engaging in this type of conduct."

Minority radio stations get less advertising revenues than other stations, even when the minority-owned station is a ratings leader. That's gist of a study by the FCC, entitled, "When Being No. 1 is Not Enough." In one example, cited in the report, BMW dealers in New York city refused to place ads on the area's highly rated black-owned radio stations even though research showed that 46% of the people who bought or leased such cars were African-American. In a now-infamous memo by Katz Media Group, its employees were advised against purchasing time on black radio stations because "advertisers want prospects, not suspects." After the damning memo, the company "issued the perfunctory apology and a promise to stifle such racist behavior." The article in the Jan. 19 *USA Today* mentioned the failure of the government's affirmative action programs in radio, with 97% of stations owned by whites.

Stores can now play radio legally without having to pay music licensing fees—that is, if they are smaller than about 1000 square meters. A further exemption accrues if the store or restaurant has six or fewer external speakers or four televisions measuring 104 cm or less.

The FCC went after KNON "89.3 Dallas to the extent of a \$5000 fine for underwriting

violations. It found, in a restaurant announcement, that "all you can eat" is a price violation. And "only" when describing features or attributes was a no-no. This caused the NFCB to conclude that the FCC may be getting more conservative about underwriting.

WMNF "88.5 Tampa has regained state funding. Programming is not supposed to dictate funds' granting or their withdrawal. Both Tampa newspapers supported the community station, in spite of opposition by a "powerful conservative state senator with higher political aspirations." Sen. grant later wrote:

*I have made it a point to spend many hours listening to WMNF over the last year, and while I might not agree with every perspective presented and might not find some of the music to be within my personal taste for listening enjoyment, I have come to appreciate the cultural diversity of the station which reflects the diversity of our community. I have actually found much of the programming personally enjoyable to listen to. I am impressed with the commitment of your station volunteers [and] many have made compelling arguments for their support for WMNF.*

From the classifieds: C. Crane Radio with high performance AM, FM and TV audio (2-13) and WB, about \$159; call 1-800-522-8863. It's said to be better for speech than music, but a new product I hope to explore some day. ((414) 363-9205.

KLH 21 FM reception system \$50. C. Collins/ Want to buy BASF and AEG tape reels and boxes prior to 1980. J. Morinelli, (610) 715-1720.

FM FORUM

CONTRIBUTIONS FROM READERS

"I'm enjoying the January FMedia! which arrived today (Jan. 9) with a Jan. 4 postmark. It was unsealed, so maybe they were reading it in the post office all week," mused a reader. "The articles you mentioned you wrote about WEBC-FM (Jan. p. 7, col. 3) are cited in a thesis somebody wrote about the station's history. On the MN-WI Broadcasting page, under Historical Information, click on WEBC Technological History, then click on Table of Contents then Chapter Four." That can be assessed from my web site (see top of p. 1 this issue), then click "microbroadcaster," and then the MN-WI Broadcasting page.

Ricbert Conrad, WCLV 95.5 Cleveland OH, had an open letter to FCC Chairman Keenan, claiming there is too much local concentration of ownership in radio. His station has seen national business go down from 25 percent of its billing to 5 percent. He'd like the FCC to limit the number of local stations one operator can have to four.

Doug Loney used to publish Canada's *Broadcast Technology* magazine. He retired, and tried to sell but to no avail. Advertising was falling off, but "like most retired people these days, we keep busy and wonder how we ever found time to work!"

Until March,

*Bruce F. Elony*

**Stereo—Or to be Stereo**

AK Barrow KBRW-FM \*91.9, jf. "The AM service is our main service, and existed many years before our FM went on the air. The FM format is designed for the city of Barrow. The AM format covers nearly all of the North Slope of Alaska. . . larger than the state of Minnesota. So we were given a waiver to use FM translators to give good coverage to the villages. By the way, the FCC gave waivers to Alaska noncoms to use satellite and terrestrial microwave to feed translators long before it was allowed in the lower 48—it was the only way to provide a sole service to many of those isolated communities.

"If you look at the FM band in Alaska, you will notice many noncoms in the commercial band and a few commercial stations in the noncom band (K203BY 88.5 Kuparik)... The reason for that is interesting. Well into the '70s the Air Force reserved frequencies from 86 to 105 mhz in Alaska for their own use. That is why you will find so many stations assigned into the top 3 mhz of the band. In fact, the military was using a frequency at about 94 mhz for some sort of data traffic as late as 1986 in southeast Alaska. Until shortly after statehood the Signal Corps was responsible for all communications in Alaska including civilian long distance and common carrier. It is interesting to go into the AT&T Building and see the old stickers in equipment bays: US ARMY—RCA Global Communications—Alascom—and finally AT&T.

"Wish that AM stereo was still viable; it would be neat to try up here, but the absence of receivers makes it a moot point. We are thinking of using an SCA for bilingual translation of the city council and borough assembly meetings. It is not a technical problem, rather a funding one with the local governments," Charles Lakaytis, chief engineer, KBRW-AM-FM, "the most northern broadcast station in North America, 72 degrees north, 155 degrees west, who adds: "I certainly miss your FM Atlas. And I think I bought an SCA receiver from you years ago."

AZ Payson KESP 101.1, o, classic hits, "Loop 101," so named after a beltway around Phoenix. It was doing tests and proofs of performance, and was "nice to hear music nonstop and to hear IDs."

"Rawlco had a time making it with country." CISS positioned itself for a while as "Power 92," but was opposed by CIXX 88.5 Newmarket ON, now "Power 88.5" (from "The X"). As result of the challenge, CISS is now "Kiss 92," a slight change from its previous "Kiss FM."

**On Air—Real Stations and Pirates (Selected)**

CA Sacramento (south) 92.9 from the 3600 block of Power Inn Road—a pirate with 'gangsta rap'  
 GA Toccoa WSTE 106.1 withdrew its request to build a 163-m tower in Hall County, a site 90 km NE of Atlanta in wake of opposition from local residents who say it would spoil their view of the North Georgia mountains. It was the second time it pulled the proposal amid opposition from residents and landowners. Local activist Gary Gibb said, "With a tabling, you allow the developer to make pudding out of our process. We need to go for denial and have these people pack their

bags." The station said it is checking into other sites—the same reason it gave for pulling the request last year. Earlier, in January, there was a slugfest between Clinton and Fannie Wilson, who were willing to sell their property to the station, and local activist Lamar Mullis. Mullis was taking pictures of the Wilsons taking down opposition signs. [See Oct. p. 8, col. 3.]  
 IN Lebanon WIRE \*91.1—Hoosier Broadcasting fined \$4000 for "willful violation" by constructing an antenna at a greater height (53 m) than authorized (25 m).  
 IA Sioux City K206DC \*89.1  
 ME Portland W281AC \*104.1, relaying WMPG 90.9 Portland. "The call letters for this frequency are W281AC, which is a mouthful, to be sure. But no matter, because what you'll hear on 104.1 is just what you've always heard on 90.9: live, local, grass-roots, award-winning community-based programming." The translator was seen as more helpful in improving coverage than adding power to the main station.  
 ME Sanford WCDQ 92.1 back to full power, after losing the top 21 meters of its antenna last winter. Repairs have finally been made, "so you should be able to hear the sounds of Mount Rialto even farther away than before."  
 ME Topsham WXGL 95.5 is one of the few area stations independently owned, but seems comfortable serving a niche market. "The pressures are really basic ones," said Christopher Outwin, station manager. "We can keep advertising costs at a level so that just about any business in the mid-coast area can afford to get on this station," and it is content not to compete for national advertising dollars.  
 MD Bethesda WARW 94.7 first suspended and then fired Doug Tracht, "The Greaseman," for insensitive comments after the dragging death of a black man by white supremacists in Texas. "I don't know whether his program was being carried by any other stations, and if it was, whether those stations dropped him as well," said a subscriber. He has apologized "to anyone and everyone who was hurt [by it]. It was a pathetic attempt at morbid racial humor." No saying if the apology will net him his job back.  
 MN Golden Valley K214DF \*90.7—from the IDS Center, downtown Minneapolis. "Really bangs in here. Knocks Wisconsin Public Radio off the air. I'm not real happy about imported programming," J.W. by e-mail. Is stereo, with only the KLOV (OR) ID heard, no local ID. It comes in while driving around Bloomington. Has a fade area in my driveway and behind Marty's TV shop in South Minneapolis," J.E., Bloomington, via e-mail.  
 MN New Ulm KXLP 93.1 appears to be back to full power  
 NE Lincoln K220GT \*91.9, another KLOV translator. It "isn't exactly a powerhouse. I couldn't get it on the receiver in my downtown office, but a car radio picks it up just fine. . . K-Love, which is operated by the non-profit Educational Media Foundation, is an expansionist enterprise if there ever was one. The network currently boasts 75 full-power stations and translators across the country, and is on file at the FCC with 100 more permit applications. . . As few as 150 pledges (\$35/month) would be all the [Lincoln station needs] to break even." K-Love operates a companion network, "Air 1" for the 12-18 demographic group. Both networks can be heard at <www.klove.com>.  
 NM Carlsbad-at Fiesta Drive-in Theatre, 401 W. Fiesta at San Jose Blvd., are three screens, each with its own FM stereo audio. Screen 1 is 101.1, Screen 2 is 102.1 and Screen 3 is 103.1. "All features are in stereo. Be sure to have a working radio as there are no speakers. Shows start at 7:45 p.m. only Friday, Saturday, Sunday and Monday."  
 NY New York city (somewhere) 91.9 "Kool 91.9 WATF" with Dr. X, formerly of "Nasty Radio" and "WJQR"

(April '96, p. 3, col. 3). Signal said to cover part of five counties in NY and NJ. He sells blocks of airtime to persons who want to host their own show, with some hip-hop, including former "WBAD" story hosts. "By the way, the TV station that did a newsy story about 'WBAD' was probably WWOR 9 and not WNYW 5 (Oct. p. 6, col. 3). Anyone who wants to buy time slots from 'Dr. X' can call (718) 716-3122."

NY Queensbury WNYQ 105.7 still 2450 h.v., 316 m, but has agreed voluntarily to take down its tower near Mo-reau Lake State Park after a two-year battle with residents who said it is unsightly and has been put up illegally. It offered to build a lower tower, one that would be unlit at night, trying to satisfy neighbor's concerns. "We thought we had met all the concerns of the neighbors," said Bruce G. Carr, lawyer for WNYQ. The company had spent \$350,000 to build the tower, but balked at spending another \$11,000 for an environmental study, which the town required. How long the company takes to remove the structure, which can be seen for kilometers, is another issue for the town board to resolve. The station wants two years to take down the tower. If a new tower can be built in the area, WNYQ programming will be uninterrupted.

OH Geneva WKKY 104.7 off Jan. 17-Jan. 23. "No reason was given for the silent period."

VT Rutland area "Radio Free Vermont" 96.5 (see Oct. p. 6, col. 2). "Operator Monty Butterfield is threatening to take the one-year-old big band/popular standards station off the air unless he gets advertising support from local businesses." He said this Jan. 29. "We have had positive comments from so many listeners and business people in this community. . . . We have the best advertising rates in the market. Period. However, despite this, very few have purchased advertising. . . . If you do not support Radio Free Vermont within the next 60 days, sadly, I will be forced to close this station. Please understand this breaks my heart. This has been my life's dream to own and operate my own radio station as a mom and pop small business. So many of you have told me that you love it, please help support it."

WI Ashland W275AF \*102.9, W284AN \*104.7, with full IDs on their respective primaries in Bruke and Superior. The translators are at a "paltry 30 watts," and WI Public Radio is looking for reports at (800) 300-8530 and donations to the "Clear Signal Campaign," % WPR, U. of WI-Superior, Superior WI 54880. Cost of the project is \$130,000 with WPR still trying to raise the last \$30,000, which will probably propel the stations to become Class As. The city of Ashland donated property in its industrial park; volunteers helped build the building and raise the tower.

WI Iron River WNXR 107.3 back to full power.

MB Winnipeg CKVN \*106.3, an events station officially known as VF7039 for two weeks in February, but the CBC has applied for a high power station with rock to a youthful audience on 106.3. The CBC outlet is not expected on before 2000 as "Radio 3." Industry Canada is looking for a new frequency for VF7039.

BARBADOS—92.9 stereo on air, to replace AM 790

"which is due to go off the air sometime in the future."

NEPAL—Kathmandu (or Kathmandu) 96.1 "Kantipur FM" stereo English and Nepali programming. "Has Top 10 Countdown. . . . '97.9 'KATH' [stereo] English rock. 100.1 \$, Nepali; 102.5 \$ Nepali; 106.7 \$ Nepali. "No FM elsewhere in the country," which is 5 hours 45 minutes ahead of UTC, according to J.K., Macomb IL via e-mail.

AUSTRALIA—"Lots more FM down there since my last visit a year and a half ago. The Sydney area is now literally just as congested with FM as any major US city. Most of their "public stations" tend to be between 88-92, although in between the major commercial stations there are local FMers with literally any type of format. Lots of foreign languages, especially Asian. Like the U.S.,

Australia is having a major problem with illegal immigrants, especially from Vietnam, Laos, Cambodia and Indonesia. The radio dial reflects a wide variety of foreign tongues, none of which I could understand. Also, Sydney has several "neighborhood" public stations. I don't know the power, but probably 50-100 watts or so. Several gay stations also on the FM dial, including one at 87.6 with party and disco music, along with some pretty colorful/profane language, which would make Howard Stern envious."

2CBA-FM 103.2 in Sydney "continues to be the only major FM in Australia I am aware of that broadcasts on an 'even' channel. Every other station is like the U.S. on odd frequencies. 2CBA-FM is also one of several religious stations around Sydney, although they focus mostly on easy listening, or 'beautiful music' similar to what most U.S. markets had during the '70s and '80s. And, surprisingly, they sounded well produced. Although they did air occasional religious messages and an occasional gospel show (including one with blistering commentary on Bill Clinton's behaviour) it certainly was not a 'Moody' type of station or satelitor.

"Most good-sized towns around Australia now have a public/alternative station, although most listening seems to be to commercial FM. And the Australian Broadcasting Corp. (ABC) has three separate networks scattered around the dial, including a news/info network (which even features NPR's *All Things Considered*), as well as a classical network, Alternative Network ("Triple J FM"), and a regional/state network.

"AM (MW) radio has really dropped off. In fact, one station which I did enjoy on my last visit along the Sunshine Coast of Queensland is no longer on the air, having been bought by a new FM. One other recent development is a tourist FM network, similar to our local infostations on 1610 or 530. These small repeaters (10 watts at most) are pre-recorded tourist info stations at major resorts and towns. They feature about a 15-minute rundown on local hotels, restaurants, beaches and travel advisories. And they are filled with ads for local businesses. I even heard a couple on 87.5 and 88.0. They are well marked at the approach to each town with blue and white hi-way signs with a big question mark, and saying to tune to the FM frequency. . . . A trip to Australia could be very interesting, and a fascinating and friendly country to visit," Rod O'Connor via e-mail, who says the FM dial in Anchorage "remains about the same."

**Off Air—Or Not Yet On**

AL Columbiana WQEM 101.5: Tower being repositioned closer to Birmingham, and could be on in 6 months. Speculation it will be parallel to co-owned WQEN 103.7 Gadsden-Birmingham. Capstar also owns WMJJ 96.5-WOWC 102.5-AM. WQEN has "Mark and Brian" show from Los Angeles. They got their start in Birmingham, and presumably still have some local following. WQEM seeks 1950 h.v., 178 m.

AR Viola KAUV 94.3. "We don't expect to be on the air for another 8 months, and will know our format and if we'll be stereo later."

CA Petaluma D'z Nutts Radios 91.3, 40 watts, shut off Jan. 23 for the second time in a year (the first time it was in Vallejo) by FCC agents, who said the station wasn't causing any interference, just operating without a license. May still be broadcasting from other locations; it had been "touring" the S.F. Bay area. [FCC.

FL Oakland Park "Vibes 89.1 FM" closed down by the/ MI Howell "Free-Living Radio" 89.7, 40 watts, shut down by FCC Feb. 5.

NJ Manahawkin WCHR-FM 105.7, despite an agreement in 1992 for WJRZ 100.1 to move to 105.7 as a Class B, and a new owner to take over 100.1. At the time I was urged to list WJRZ as 105.7, but didn't because

there was no clear evidence the move would actually take place. Also supposed to come on the air was a WJRZ AM on 1550. Muses a reader: "Where is FM 105.7 and AM 1550?"

PA Masontown WYFU \*88.5, but expected on in the first part of this month, and "will probably be in stereo."

TX Eastland KVMX 96.7 reported silent

WI Kewaunee WAUN 92.7. Silent for "quite some time.

The shareholders cannot agree on a new music format for the station. A recent local phone book listed the format as "polkas and heavy metal."

WI Milwaukee an 88.5 pirate shut down by the FCC Feb. 5. "This is believed to be the first pirate shutdown in our area which has included the seizure of equipment." Involved were the U.S. Marshals Service and the U.S. Attorneys office.

"What is happening on a new edition of the FM Atlas? Obviously the green 17th edition is now completely out of date," W. P., Weston ON. [Actually, I've been selling copies of the even-older 16th ed. 1995 at \$18 postpaid!—b.e.]

**SCS/SAP Services, 57, 67, 78.67, 92 kHz**

**Symbols are as in the FM Atlas**

- AL Troy WTSU \*89.9 †( )T, adds 57 kHz
- FL Miami WDNA †O, 67, similar to the service that used to be on Atlanta's 89.3's 92, Chinese Radio Network

FL St. Petersburg WTTA 38 uses SAP for talk. It's mainly "all that conspiracy crap from Chuck Harder and his *For the People Show* from Greenwood FL."

FL Tampa WFLA-TV 8 and WTVT 13 use their SAPs for "24 hour automated weather."

GA Atlanta WRFG \*89.3 †( )O only. Ninety-two kHz with Donald Chiang's Chinese Radio Network discontinued after six weeks. "WRFG's SCSes change so often that I'm about ready to give up trying to keep track of them!" N.L. there.

IN Indianapolis WHHH 96.3 still †M, 67, test music, but may go Spanish. WSYW 810 does not get into high-rise buildings well in the daytime and its signal is limited at night. It would like its Spanish format to be on SCS. "We are looking at getting more low-cost radios."

MN Mankato KEEZ 99.1 no †X, 67; carrier only. KYSM-FM 103.5 †M,R (again). It is "having trouble with its composite. The SCSes don't get out very far, but the stores with background music still have it, with antennas aimed the same way as before. They're looking for an engineer. Even the stereo is weak. It takes about three seconds before the stereo light comes on my tuner."

MN Rochester KLSE \*91.7 still †T, 67, now cutting away from the statewide service at 1930 for a half hour of local news from the *Rochester Post-Bulletin*. KVSC \*88.1 St. Cloud also has that service, seemingly cutting away for local news, but "signal very weak on car radio." Station has only vertical polarization.

MN Rochester KRCH 101.7 no †, U; retains †M, 67. KROC-FM 106.9 was weak, but recently heard well in the Duluth area with its †X data.

MT Laurel KRSQ 101.7 †U, 67. "Yeah, I think it's 67!"

SD Brookings KESD \*88.3 †( )T, and other SD Public Radio Stations to add 57 kHz data, effective July. "Your radios won't work after that date. Our subcarrier injection has always been good. I have more important things to do than talk to you!" D.C., chief engineer, who is opposed by Bob Watson, MN State Services for the Blind's chief technician, who said he has battled SD "for years" to raise the injection levels of their stations to somewhere close to 10 percent, but they refuse. Minnesota services the SD radios, with SD paying MN's RTB to carry the service statewide.

TX Dallas KZPS 92.5 still †, G, 92, but part of the time it is a barker channel for the satellite TV service known as "Encore."

KYNG 105.3 †M,R

WV Huntington WVVV \*89.9 no †T, but it remains on WVPN \*88.5 Charleston. It's mostly "In Touch" from New York, via phone lines, plus it has one hour in the morning and one hour in the evening of local readings—also by phone lines. "Sound is horrible. They could at least try to get 'In Touch' via satellite, but they don't!"

WI Burlington WBSD \*89.1 considering SCS for remote broadcasting (†S). "We have not ordered the SCS generator yet, and haven't decided if it

would be at 67 or 92 kHz. Send us one of your tunable radios first!"

USA—Seiko Communications announces it will be shutting down its Seiko Message-Watch system and its HSDS datacasting format by the end of 1999, "opening up a significant amount of the subcarrier spectrum in a few important markets (New York, Los Angeles, Seattle, Portland and Las Vegas). Meanwhile, Cue Paging is adding a wideband FM subcarrier datacasting system (76 kHz?) to its existing narrowband 57 kHz paging service. The new system will use the DARC format, developed in Japan by NHK. Cue has developed interfaces for a variety of mobile platforms, allowing the new data service to be displayed on the AutoPC and other similar devices," writes Skip Pizzi in *BE Radio*.

**NonIDs, Not Just Slogans**

TN Germantown WKSL 107.5 with Memphis, "Kiss FM 107.5" [92.3.]

VA Deltaville WSRV 92.3 with Gloucester, "Surf/

**Selected AM Happenings**

AL Atmore WASG 550 had been silent; now contemporary Christian. It is planning to increase to 25,000 watts.

AK Sr. Paul KUHB 540 deleted.

CA Santa Rosa KMXN 1150 deleted. [Life—gospel.

IL Shelbyville WDDI \*1560 was silent; now on with New/ ME Westbrook WJAE 1440 "calls itself WJAB; 1440 had those calls in the '60s."

MA Boston WNRB 1510, with its 50 kw signal, often creeps into people's phones—especially those within 4 km of the station's tower. The FCC isn't helpful, saying stations causing such interference are operating legally, and suggesting a \$20 filter in the phone. The cheapest phones at RadioShack were found to be better than the more expensive ones.

MA Dedham WBPS 890 and WNFT 1150 Boston become contemporary Spanish. WBPS had been ethnic, with programming in 11 languages, while WNFT had syndicated soul. Programming will be separate Spanish formats—WBPS will target a Mexican and Central American audience, while WNFT will be more for Puerto Rico and Dominican populations. The area also has parttime Spanish radio in WRCA 1330, "Radiolandia," with Spanish 21 hours a day Monday through Friday from 10 p.m. to 7 p.m., with weekend hours "intermittent."

MI Taylor WCHB 1200 had been silent; now black gospel and talk "with an upgraded signal from a new transmitter site."

NE Grand Island KMMJ 750 went all Spanish, "after finding success with weekend programming directed to Hispanics." KBBX 1420 Omaha picked up the same format, which features Tejano, tropical-salsa and mariachi music. "Only KMMJ stays local in AM drive." [tropical, "Classica."]

NJ Camden WSSJ 1310 had been silent, now Spanish/ NJ Newark WNRJ 1430, owned by Arthur Liu, to air popular standards 6 a.m. to 7 p.m. starting Apr. 1, and hopes to make the

format fulltime in a year. "Plans to change calls, move their operations to the site of co-owned WPAT 930 and increase power. . . The WNJR signal doesn't get out well after dark."

NJ Pompton Lakes WGH1 1500, a daytimer, is pumping its oldies programming plus nighttime play-by-play onto the Internet at <WGH1.com>. A solution to the problem of nighttime programming for daytimers?

NY Buffalo WNED \*970 was to have shut off its news programming and become a fulltime relay of WBFO \*88.7. Because of a public "outcry" the change won't happen. A survey of listeners is to take place. "They'll attempt to keep it alive."

NY New York WNYC \*820 takes some of the adult standards programming lost when WQEW 1560 went to Radio Disney. Jonathan Schwartz will do a show featuring Frank Sinatra 10 p.m. to midnight Saturday, and Sundays 8 p.m. to midnight will largely be devoted to m-o-r music.

WABC 770 has new morning shock jock Rocky Allen. He moved from afternoons on co-owned WPLJ 95.5, where he had been almost six years. WABC is "a talk station that's been struggling to find the right morning mix for several years."

NC Lexington WLXN 1440, with a talk format, has a new show on Tuesdays with live calls-ins from the Davidson County Jail. Sheriff Gerald Hege will be present while various inmates are given airtime. The inaugural show featured a man arrested for domestic assault. [spring]

OK Holdenville KTLS 1370 off air, but expects to return in the/PA Kane WQLE (frequency not available) deletes.

TN Murfreesboro WAPB 810 fined \$11000 for failing to reduce its nighttime power.

TN Pikeville WUAT 1110 has its license renewed. A report, Nov. p. 6, col. 2, had it deleted, but the station is working on a "paperwork problem" with the FCC.

UT South Salt Lake KKDS 1060, 10 kw days, 1 kw nights: "We're doing OK, with adult standards, talk, country and '50s oldies. Getting a tremendous response from our listeners."

PQ Montreal 690 and 940—the CRIC was entertaining applications: CBF has left 690, while CBM is still on 940. Applications are in from CKVL Verdun 850 for 690, with Mé-tromédia's C1CQ 600 wanting 940. CKVL would be French; C1CQ English. Radio Nord wants 940 for a country service, and 690 for a French station. Société Radio-Canada wants 690 for a third French language station to be called Info-Radio; if 690 is granted another applicant it would ask for 940.

"Saw your web page address listed in Jan. FMedia! so thought I'd check it out. Not bad," R.O.C., Kodiak AK via e-mail.

**FCC Low Power Radio Concept Generates Much Interest**

FCC Docket 80-90 of a few years ago created hundreds of new FM stations. Now an FCC proposal to legalize microradio could create thousands of stations—1000 watts, 100 watts, maybe even 10 and 1 watts. Estimates vary as to when the first of the new stations—if they are allowed at all—might come on the air. I've seen everything from "as soon as this summer" to two years from now.

Commercial broadcasters generally oppose the proposal, with Billy Tauzin (R-LA) urging FCC Chairman Bill Kennard to visit his subcommittee and explain his "ill-advised" crusade. Kennard sees microradio as a response to all the consolidation that has resulted from the 1996 Telecommunications Act. A *Billboard* article quoted Andre Marcel of WDKX 103.9 Rochester NY who wonders if the little stations will make enough money to stay on the air, if they are commercially operated. "Microradio could break the backs of us little guys by fragmenting our market. I think every station in town is my competition."

I have heard talk that the proposal for microradio is in itself such that sales prices of existing FM stations might go down. There's terror among stations looking for buyers who may

want to sit on the sidelines and see what microbroadcasting might do before committing to a purchase.

The FCC voted 4-1 to issue the *Notice of Proposed Rulemaking* for microradio, with only Commissioner Harold Furchtgott-Roth opposing. Views of the commissioners can be seen on the FCC website at [www.fcc.gov](http://www.fcc.gov). Kennard said the proposal "could create a whole new class of voices using the airwaves. . . opportunities for churches and community groups." The proposal would not bar pirates whose stations had been shut down, but would probably militate against those who refused to follow FCC orders to shut down.

The radio industry cites interference as its main objection to the new service, but Kennard said there are adequate safeguards. A 1000 watt station would serve a radius of about 15 km. A 100-watt station at 30 meters could get out about 6 km. The technical proposal for the new classes of stations is ultra-conservative. It gives LP1000 channel spacings as 101 km to a Class A co-channel, while LP 100 stations would have to be 92 km from a co-channel A. The FCC continues to keep 2nd and 3rd adjacent channel spacings. A further proposal is for the FCC to do away with the 3rd adjacent channel spacing for low power stations, and possibly the second adjacent channel spacings. If those spacings were given up, hundreds more new stations could be created, many in major metro areas. For example, Houston might get 5, Nashville 37, Columbus OH 36 and San Antonio as many as 40.

The Commission has proposed not permitting existing stations to own or have sales or marketing agreements with an LPFM station, and forbidding anyone from owning more than one LPFM in the same city. It asked for comment on whether a limit of five or 10 stations nationally should be enacted. The comment deadline is Apr. 12; replies by May 12.

**Small Print Happenings and FM Industry News**

See those features next month—when there is expected to be a coordinated deadline with *FM Atlas-18*. It's a book that will contain many new maps, more pages, and one that has been long-awaited by many readers.

Until April,
