"Today, May 18, at 2:25 p.m. (NY time) I noticed channel 2 on the TV was flickering and had horizontal lines across the picture, so thinking this might be a tip-off to some FM DX coming in, I checked NYC's 'dead' frequency 91.9 and sure enough, WMVB, a 62000 watt g station was coming through in full \$ from Dixons Mills AL! This lasted a couple of minutes, then they faded almost completely out, then came back full strength again, but by 2:40 they were off for good. This was heard on the [Sangean] ATS 803A with only the telescopic antenna," reports another subscriber.

**FCClarifies EEO Clampdown on KFUO-FM**

At the heart of the stricter enforcement of the Federal Communications Commission's rules regarding equal employment opportunity is its nailing of KFUO-FM 99.1 and AM Clayton MO (St. Louis). Fines could go well above the base forfeiture of \$12,500, which applies when a broadcaster fails to recruit females and minority applicants for at least two-thirds of the vacancies during the previous license term. [See March, pp. 5, col. 1; 6, col. 3.]

The KFUO stations are owned by the Lutheran Church-Missouri Synod (LCMS), and the stations, besides being liable for a fine, must face an administrative hearing concerning their being qualified to hold broadcast licenses.

Writing in Religious Broadcasting magazine, former FCC chairman Richard E. Wiley says: "The LCMS case is a reminder that religious broadcasters are not fully exempt from the agency's EEO rules. It has been established that religious broadcasters may require employees who work on religious programming adhere to certain beliefs. However, such stations may not discriminate on religious grounds for posts that are not 'substantially connected with religious programming', including jobs in sales, engineering, and production of non-religious programs."

The FCC found that KFUO-FM showed very low levels of female recruitment and hiring and almost none for minorities. The LCMS claimed it had a policy of seeking out qualified minorities and women, but it kept no records to show the recruitment contacts used for each position or the gender, race, or natural origin of applicants interviewed. Further, the FCC found that KFUO-FM rarely used employment agencies to fill openings. Rather, in exchange for the rent-free use of studio space at Concordia Seminary,

the LCMS often hired seminary students or their spouses for station positions. The FCC considered this "free space for jobs" arrangement to be clearly contrary to the LCMS' EEO obligations. The stations claimed that the low rate of minority hiring was because of the low proportion of minorities with either "classical music expertise" or Lutheran "theological training." The LCMS, however, failed to convince the FCC that such skills were needed for sales or other non-programming posts. Besides, the FCC found that several non-minorities hired had neither qualification.

"Ultimately, the LCMS' difficulties were compounded by what the FCC viewed as a lack of candor in responding to its inquiries. Over a year-long period, the agency sent repeated, increasingly probing queries to the stations which eventually revealed the nature and extent of their compliance problems. Obviously, broadcasters should avoid magnifying possible compliance errors by appearing to be evasive with the agency," Wiley warns. While the industry is working to get the FCC to reconsider and clarify its EEO policies, Wiley advises religious broadcasters especially to review carefully their EEO record-keeping and recruitment efforts.

**Will Low Power FM Be Next? FCC Allows LPTV Stations Use of Four Call Letters With Suffix**

The FCC has amended its rules to allow low power TV (LPTV) stations to use four call letters with an "-LP" suffix. This will replace, over time, the current five-character call signs consisting of letters and numbers. LPTV station licenses include schools, colleges, churches, community groups, publications, radio stations and regular TV broadcasters.

LPTV stations may not request call letters used by another station unless the stations are commonly owned, or the LPTV has the other station's written consent. "In the case of identical requests filed on the same day, the call letters will be assigned to the station with the longest continuous record of broadcasting . . . A full-power television station will prevail in the situation where a full-power station and an LPTV apply for the same call on the same day. AM or FM radio stations applying for the same call sign on the same day will prevail over an LPTV station," the Commission stated.

**Small Print Happenings and FM Industry News**

More fines for Stern stations—\$200,000 for broadcasts on four Infinity-owned stations. The latest came from a listener in Buffalo NY to WWKB AM, which was not fined. This brings the total of [unpaid] Infinity/Stern fines to, uh, \$1.8 million.

Meanwhile, the way has been cleared for Stern, er, Infinity, to pick up WPGC-FM 95.5 and AMorningside MD. The African American Business Association (AABA) of Washington DC

says Infinity execs will attend sensitivity training classes as part of the bargain, which includes \$2.75 million for minority businesses in the DC area. In return, the AABA has dropped its objection and is encouraging the FCC to grant the station transfers—a \$60 million deal.

The deal is what Infinity calls "enlightened self interest," in which Infinity hopes minority businesses it funds might one day become advertisers. Lost in the deal, however, is the fact that the AABA thought Stern himself is racially insensitive. It is unlikely he would attend the classes.

NY Senator Al D'Amato took to a nearly empty senate floor to accuse James Quello, Stern's nemesis on the FCC, of conduct as offensive and insensitive as anything Stern has been accused of. D'Amato, who has been a guest on Stern's show, read excerpts from a 15-page letter Quello wrote him. Quello wrote, in part: "It would embarrass any responsible adult, let alone we Catholic Italian-Americans, to condone the egregious Stern broadcasts. . . Please don't share [the enclosed examples from Stern shows] with your priest, even in the confessional and risk excommunication." Infinity, said D'Amato, "is not receiving its right to due process [and Quello] seems to be trying to impose his personal views on all Americans."

Not taking sides on religious issues, but with Stern, is a group of broadcast associations which have filed briefs with the federal appeals court in Washington DC in an attempt to overturn a lower court ruling that found the FCC's indecency procedures constitutional. The group argues that the FCC procedures are unconstitutional because such proceedings do not provide for prompt judicial review.

At least three readers sent stories on the possible sale of WNYC-FM \*93.9 New York. Brokers such as Gary Stevens (pictured when he was one of the WMCA [570] "Good Guys" in 1965, say that NY stations don't turn over very often, and with new duopoly rules in place, "there's a pent-up demand." Stevens thinks WNYC-FM would command a \$35 to \$45 million price tag, but such a thing as corporate ego could drive the price up 25 to 50 percent more.

Mayor Giuliani would have to spend some of that money buying a less expensive station in the educational part of the dial. Most often mentioned is WNYE \*91.5, which the city already owns through its board of education, and which has its own slate of school and ethnic programs that might get displaced. WNYE was started on the old 42-50 mc FM band in 1938 and suffers from the disease of being monophonic. So far the board of education, which runs WNYE, has had only preliminary conversations with Giuliani aides about either selling the WNYE license or melding WNYC-FM and WNYE programming. Stuart Bedell, a lawyer with the FCC's mass media bureau, reminded the city that there are no vacant FM channels in New York city. If the city had to approach other stations at various colleges, it would find less coverage and, perhaps, a great unwillingness to sell. WNYE is the most powerful of the noncommercial stations in the city limits at 20 kw, but because its transmitter is in downtown Brooklyn it does not reach the outlying areas WNYC-FM does. Martin Wisniewitz wonders "how much it would cost the city to replace WNYC-FM with WNYE and use translators to match the current coverage WNYC-FM now has?"

Broadcasters may have a chance to get Small Business Administration loans soon. The SBA has been forbidden to lend government-backed loans to stations and newspapers because of the fact that such media mold opinion.

The NAB at work: It has seen to it that legislation has been introduced to set fair user fees for broadcasters who use federal land for their towers. The original proposal would have hiked the fees by some 8000 percent; the new legislation might only double most fees. And broadcast groups are temporarily enjoying a respite from Sen. Strom Thurmond's bill that would have warnings in beer and wine ads. The NAB and various state broadcasting groups are urging that members lobby against such a measure, in case it gets revived, if not revised.

In duopoly news, WKRG-FM 99.9 Mobile AL and WWRO 100.7 Pensacola FL, along with their AMs are merging. In NW Lower MI, MacDonald Broadcasting, owner of WLXV 96.7 Cadillac, is buying WKHQ-FM 105.9-AM Charlevoix, from Walker Communications for \$1.5 million. Bonneville's KIRO-FM 100.7-AM Seattle announced it will buy KING (AM) from the Bullitt sisters and handle ad sales for KING-FM 98.1. The Bullitt sisters recently donated KING-FM, which is a commercial classical music station, to a local arts consortium.

American Public Radio's St. Paul Sunday Morning, noted for its chamber music and commentaries by D. Michael Barone, has reached the 200 list in number of affiliates.

Extra TV channel capacity is pitting the broadcast industry against other spectrum users, who would like to be able to engage in paging, land mobile, digital NTSC, electronic publishing, and data transmission on an equal level. Broadcasters want to keep all of channels 14 through 69 for such uses, even if stations eventually move to other parts of the spectrum with the advent of HDTV. While broadcasters will have the spectrum for free, other users would have to buy spectrum at auction. Besides wanting the new channels for HDTV, the broadcasters want to be sure enough space is available on those channels for them to make money from such ancillary services.

Shades of WGNB 98.7—WGN AM Chicago is eyeing the FM spectrum, hoping to reverse a colossal blunder it made in 1951 when it allowed WGNB to delete. That move paved the way for a small independent station, WOAK 105.9, to move to 98.7 and become WFMT. Even though the "duopoly" policy of the FCC would allow an AM-FM or FM-FM merger in the same market, rules forbid new newspaper-broadcast cross-ownership. WGN is hoping that will change, and it would consider buying an FM station which would be converted to monophonic talk. WGN lost an estimated quarter-million listeners in the latest Arbitrons.

FM stations are included with citizens band, amateur and AM in an FCC release pinpointing the causes of interference with telephones. When a phone picks up a station, the FCC found that station power was not a factor. One third of the stations used powers less than 10 watts. The FCC gets about 25000 complaints a year about telephone interference, which is only a fraction of the actual instances of interference. Most phones are vulnerable to such interference, but two models were much better than others: the Western Electric/ATT desk model and the TPXL-D desk model from TCE Laboratories of Canyon Lake TX.

The Commission has proposed making it easier to type accept certain models of electronic equipment that can radiate RF signal. Examples are radios, computers, VCRs and radio transmitters. The action would remove certain inconsistencies in the existing rules and consolidate rules which have been published in various places, including letters. The new rules would permit manufacturers to 1) advertise and display products; 2) take orders for nonconsumer products, provided the prospective buyer is advised in writing that the equipment must comply with the rules before delivery; 3) operate the products for compliance testing; 4) operate the products for performance evaluation at the manufacturer's or the user's site; 5) operate nonconsumer

products at a user's site for determination of customer acceptability; and 6) demonstrate the products at trade shows. Any party modifying a product after its compliance would be responsible for ensuring that the product continues to comply with the appropriate standards.

WBBM-FM 96.3, B-96, Chicago fired morning team Jo Bohannon and Eddie Volkman, after they defamed TV anchor Joan Esposito for

Joe Bohannon Ed Volkman  
Disclosure enraged CBS bosses

saying she was carrying the child of a Chicago Bulls basketball player. The charge was completely false, and the incident made the May 30 "Newsweek." The dismissal came about after an agreement was broken to make the \$8 million lawsuit settlement confidential. The story was leaked to the Chicago Sun-Times "Celebs" column. Newsweek, in its story, said "radio shock jocks have never been confused with Walter Cronkite, or for that matter, Woodward and Bernstein. Bad taste has made Howard Stern into a huge ratings hit," but then mention is made of a suicide. Bob Richards, a married weatherman at KSDK TV St. Louis, made the talk shows after an alleged affair with another woman. WKQB-FM 104.1 Jerseyville IL-St. Louis aired a live, impromptu interview with the woman, Donna L. Henry. She played an answering machine tape which Richards had left her, pleading to see Henry again. That night, Richards took his plane out for a flight and nose-dived it into the ground. He died instantly, Newsweek reported. DJs permit people to call in with wild assertions about the rich and not so famous. "As long as DJs don't encourage such gossip, they probably can't be held liable, either in courts or by the Federal Communications Commission. In the current media environment, dirty linen—even if it's not true—is fair game."

WCCC-FM 106.9 Hartford's shock-jock Sebastian, whose morning show is similar to Howard Stern's, is being hit with a sexual harassment complaint after Sebastian insisted on referring to the station's new traffic reporter by the size of her breasts. Angela Diana refused to allow the reference, and had to quit her job. The M Street Journal commented: "It's always nice to see a broadcaster promoting a good image for radio." Maybe this is who's behind some of the names in broadcasting and duopolies:

NON SEQUITUR

I was listening to Pacifica Radio News over WOJB \*88.9 Hayward WI when I heard of public radio backing down in its agreement to carry commentary by convicted killer Mumia Abu-Jamal. His comments were to have begun on "All Things Considered" on NPR. The story was subsequently picked up by the NY Times, which

quoted NPR managing editor for news Bruce Drake as having "serious misgivings about the appropriateness of using as a commentator a convicted murderer seeking a new trial." Pacifica, as expected, took NPR to task for backing down from its previous commitment to carry one Abu-Jamal comment a month for six months. Abu-Jamal could not be reached for comment. He is allowed to make two telephone calls a month. Prison policy is also against paying a prisoner for commentaries. NPR had planned to pay him \$150 for each commentary that aired and \$75 for each that did not.

The governor of MN, Arne Carlson, included in his veto list a measure to increase the minimum wage by 75 cents. "Most stations from the smallest station in the state to the largest TV station employ part time high school and college students," with most stations telling the MN Broadcasters Association they would put more automation to work and reduce the number of parttime employees if the measure passed. It's been something like three years since there has been an increase in the minimum wage, and I am sure most station owners are Republicans like the good governor and see no merit in government trying to help out the lowest paid element of society, many of whom are not students but often full time college-educated people trying to make a career out of broadcasting. I would like to hear of the experiences of readers having to work at minimum wage in broadcasting—and what your education and prior work experience may have been.

Also in the MN Broadcasters Association newsletter is a report by Doug Wood saying that stations cannot use ASCAP and BMI music in most commercials. They may have a license for "public performance," which includes playing the music on the air, but in order to use most copyrighted music in commercials a station would have to subscribe to a library music service. Use of such services can usually result in better quality audio productions, since the cuts available are blended to fit a variety of radio needs. In a legal opinion, college stations were advised that music beds can be used in underwriting announcements, so long as they don't promote a product or contain a "call to action."

From "Radio Ink" is word that Howard Stern, heard on WNCX 98.5 Cleveland, is the morning drive time ratings leader, beating out WMJI 105.7's John Lanigan. The victory is hardly impressive—less than half a rating point separates the two. A Las Vegas resident (not Al Westcott, Stern's nemesis) has filed an indecency complaint with the FCC against KKLZ 96.3 for alleged sexual and excretory-oriented remarks.

The WNCN Listeners' Guild has dropped its federal suit and all petitions against the license renewal of WAXQ 104.3 New York. GAF Broadcasting has since reimbursed the Listeners' Guild more than \$100,000 in legal fees. This marks the unceremonious and probably final element in the fight to keep classical on 104.3.

"Radio Ink" had a good article by William P. Suffa on translators and boosters in FM. He

doesn't especially like boosters, but feels many stations can take advantage of the benefits of translators, especially if they are not on a channel adjacent to the main station. For more, you might want to get hold of the April 25-May 8 RI; call (800) 226-7857 for subscribing info.

"College Broadcaster," now with Mark MacLeod as editor, reports WMSV \*91.1 Starkville on air with 14000 watts for full Class C3 coverage, with fees for its operation coming from students of Mississippi State University. It takes underwriting; call Steve Ellis at (601) 325-8034.

A question answered by Cary Tepper of the Washington DC law firm of Meyer, Faller, Weisman & Rosenberg has to do with commercial stations that may object to a college station playing top 40 music and competing. He says there is nothing illegal with a college station having a similar format to a commercial station, and that commercial stations will often try to intimidate the noncommercial stations for fear that the educational station is attracting too much of the local audience. "Noncommercial radio and TV stations are free to program as they choose. . . . However, in order to fulfill your noncommercial educational (or religious) commitment, I recommend that at least 10 hours each week be strictly devoted to educational or religious programming, such as talk, news or special events. If you do this and also comply with all other FCC rules and regulations, you should have nothing to fear from your complaining competitors."

NPR biggie WGBH \*89.7 Boston has time-shifted its "Celtic Sojourn" to a spot overlapping the popular WERS \*88.9 program "Celtic Traditions." WGBH has allegedly moved other programs to times opposite other noncommercial stations' specialty programs. New time for the Celtic show not mentioned, nor is the host's name, who reportedly got his start on WERS.

Bowing to Christian opinion, WHJY 94.1 Providence RI has taken down a controversial billboard which said that 50000 watt WHJY had "more power than God." It was designed to let listeners know the station was back to full power after a period in March when a transmitter problem forced low power operation. The billboard drew dozens of complaints and a protest from the Greater Providence Council of Churches, some members of whom may have been descendants of Roger Williams, who founded RI for religious freedom reasons. In taking down the billboard, Jim Corwin, g.m., said "Any attempt at levity is falling on deaf ears. When we put this board up, we never intended people to take us as literally as they did."

[Thanks to Bob Gilbert for sending that story.]  
From the classifieds: Carlson Travel Network/Media Travel USA specializes in the travel needs of broadcasters. Call to save money on your next corporate meeting or incentive trip, (800) 283-8747.

"American Radio" (fall 1993) by James Duncan (see review of it below) an \$86 value, buy the one copy I have for \$19 plus \$6 shipping.  
"Broadcasting Yearbook," 1990, binding is bad but otherwise in good shape, \$25 postpaid, also from me. If you order one of these books and it is sold I reserve the right to substitute the other one.

FM FORUM

CONTRIBUTIONS FROM READERS

[We continue a discussion of charges that Alan S. Chartock, board chairman of WAMC \*90.3 Albany NY, is biased.]

Chartock dismissed the charges, pointing to the station breaking its previous March fundraising effort. Some \$250,000 was raised from 4700 callers, 1200 of them new. Chartock said, "I categorically reject these claims. WAMC is balanced and we will not be threatened into skewing our programming because of a small group with an obvious political agenda. Since our reading of their demands suggests that they were calling on people to boycott WAMC, and since this was the most successful fund drive in March history, we draw a conclusion that people love what we do and are pretty much satisfied with it."

Jim Duncan sent his "American Radio," fall 1993. It covers the major markets and

has a new section called the "Duopoly Report." It's huge, comb bound and is \$86 from PO Box 90284, Indianapolis IN 90284, or write for info on other Duncan publications. I met Jim in the early '70s when he was selling KalaMusic out of Kalamazoo MI.

A person who tried to order a Kenwood tuner from my catalog, Ed Hanlon, writes about top-of-the-line FM tuners. "I already have a much modified Magnum Dynalab Etude, which includes a revised filter section for the DXer in me, and solid silver wiring and Rifa caps for the audiophile part of me. Other tuners in the stable are an MR-78, updated by Modaferreri; and a B&K TS-108 with revised filters. This B&K may be the current bargain in over-the-counter digital FM tuners. They aren't so hot fresh out of the box, but if you have it aligned and change the filters, it will perform magnificently. A couple of years ago, we held a tuner shootout at my home, with several DXers, Don Scott (tuner reviewer of Stereophile), and Jon Grosjean (designer of Magnum-Dynalab's tuner line). The Don Scott modified B&K outperformed a Carver TX-11, MR-78, T-9090ii and my beloved Etude. It even walloped Mr. Grosjean's prototype top of the line Magnum. Needless to say, I bought one. Having added benefit of presets, the B&K is ideal for the DXer on a budget. Don Scott has a [Kenwood] 600T, and it's unbelievable (after being modified). Should you ever get your hands on one again, consider it sold. I'd be interested in advertising my new FM antenna in your publication. It's bigger than the Probe 9 by 97 cm, and it performs even better." [Contact Ed at PO Box 9597, Bolton CT 06043-0597; messages to (800) 926-7809.]

A NYC reader said Infinity CEO Mel Karmazin was set to receive the broadcaster of the year award from the International Radio & Television Society until the full IRTS board got together and nixed the idea. Board member and former CChair Al Sikes lobbied against Karmazin. Because of the FCC actions against Infinity the board felt that giving Karmazin an award would make it appear IRTS was taking sides. Howard Stern commented, "Why not take sides? You don't stick up for the First Amendment? You don't stick up for a fellow broadcaster who's defending your right to free speech, you jackasses?"

For the second year in a row NY City transportation committee chair Noach Dear, "an orthodox Jew, is taking exception to an ad in NY subways for WQHT 97.1 New York [Sept.-Oct. '93 p. 8, col. 2]." The ad features rotund Dr. Dre and Ed Lover in a rather unglamorous pose, mornings on "Hot 97." And "it looks like the campaign against the disgusting Hot 97 ad wasn't successful—I just saw the ad in the subway station," writes

a reader a month after Dear's complaints were made public.

Broadcast DXing columns in Popular Communications (written by Roger Sterckx) and Monitoring Times (Joe Eisenberg) have had favorable comments on the new "FM Atlas." Sterckx's article mentioned Panaxis as a good source of low power equipment. If you don't have it, send for Ernie Wilson's catalog, and enclose \$1 for handling, to Panaxis, PO Box 130, Paradise CA 95967-0130. He sent me his latest "Radio Station Development," a \$14 book which is a good primer for people wanting to start a low power FM, AM, cable or carrier current station. Copyright 1991, it leaves out some studio equipment a station must have, such as a CD player, and it doesn't recognize unlicensed "Part 15" FM broadcasting, which a few drive in theaters, churches and billboards use.

Another person who enjoys my publications is Raymond Nahl, White Plains NY, who sent some bumper stickers. "I really like the new 15th edition FM Atlas and your products and publications catalog."

Alaska's R. J. O'Connor supplied information on Anchorage radio, noting the KWQJ 92.9 CP is still that—not yet on. KANC 103.1 is also not on, but will return as a duopoly with KWHL 106.5-AM, with no hint of what the new format on 103.1 would be. An article he sent was on KTOO \*104.3 Juneau losing an underwriter, Echo Bay Alaska, Inc., because a reporter, Bob Tkacz, used the term "mine-iacs" in a news report about mining. The mining company responded by withdrawing its \$7800 annual subsidy of the station's "Morning Edition." The story "went beyond the bounds of reasonable reporting," David Stone of the mine development firm said. The station may have over reacted. It put Tkacz on probation and took him off the mining beat. O'Connor: "I enjoyed your feature on FM As it Was—Or Might Have Been in April's FMedia! I was stationed at Governor's Island NYC from 1971-75 and remember a lot of the old stations. There were at least four easy listening stations, no 'shock radio,' although Alex Bennett's overnight talk show on then WPLJ 95.5 kept me and many other Coastguardsmen awake on mid-watches. By today's standards he was tame—but 20 years ago he was quite risqué."

"I remember FM Guide, also a publication called 'Forecast FM' which was published in Philadelphia, I believe [also Washington DC]. And 'quadrophonic' sound, which survived what? All of three or four years. I bought a Radio Shack Realistic quadrophonic receiver at a close out sale for \$99 in 1977. It never did receive anything quadrophonic, but it was inexpensive. It also lasted only three years or so before power supply burnt out..."

Until July, *Bureau of Energy*

MN Duluth 98.9 KTCO (WAKX), "Cat Country" but always used with call letters. Started out, while still WAKX, as "hee haw country," with Minnie Pearl and Johnny Cash. Now the music's somewhat more modern. KTCO (AM) Manor TX must have deleted; it's not in the latest "Broadcasting Yearbook." A non-renewing reader writes: "One of the problems I have with FMEDIA is that the editor gets off track and writes about things he knows nothing about. When I read your comment about country music radio [June p. 3, col. 1], I checked to see when Tammy Wynette was last heard on the radio. She was last on a chart in Billboard magazine in 1980. How could a newsletter editor who has not listened to

country radio in 14 years claim to know anything about modern country music?" [The comment about "Tammy Whine-ette" was not mine—but that of one of the writers in the *Duluth News-Tribune*.]

- TX Wichita Falls KMOC \*89.5 (not shown as \$, p. 162 FM Atlas-15)
- WI La Crosse WQCC 106.3, "Coulee Country, CC 106" (strict). Call letters said very rapidly somewhere between :58 and :04.
- WI Lake Geneva WLKG 96.1, mr
- WI Park Falls WCQM 98.7, having moved from 98.3, ID with Phillips and Minocqua. "We could have gone to 100,000 watts, but only gained 10% in coverage what we have with 50,000 watts. We're calling advertisers in the outlying area, and as of today we will have established a record in sales!"
- BVI Tortola Z-Gold 91.7, o, "with hum in satellite reception."
- 94.3 Z-Hit. "Pump up the volume, Tortola, to The Heat," SMN satellite affiliate with local tunes thrown in.
- ZROD 103.7, r, "pop music in stereo. Open carrier starts mid-evening until dawn." Monophonic (unfortunately)
- AZ Green Valley-Tucson KEKO 92.1, but probably only temporarily without \$. Now rm format. "I'm glad you don't play that head banging music," I heard a listener call in and say. "The Echo" nonID.

AR Conway KUCA \*91.3  
 CT Middletown WIHS \*104.9. They have stereo equipment, but stay mono to reach farther. But if they could easily switch the stereo on or off they might consider adding stereo for music programming. "It is a good station and the only Christian station receivable in Groton. Our cable system had it off, but is buying a new, directional antenna and will be sending it out on 99.3. Hearing it on cable means I won't have to install my own antenna. They charge \$15 for an FM radio hookup, but then there are no monthly charges."

IA Des Moines KUCB \*89.3, still low power. The battle over who will get this frequency drags on. It was over a year ago when the FCC decided KUCB's license should be given to a group called Minority Communications, Inc., headed by Larry Nevilles. Nevilles, pictured,

said, "This is the longest procrastination process I've ever seen. To me it's insane. They can file these appeals, knowing they can't win." The fight is keeping KUCB barely limping along, "chronically short of money, not broadcasting in stereo. By comparison, Waterloo's minority station, KBBG \*88.1, is much healthier, and has a united community supporting it," said Des Moines lawyer Alfredo Parrish, who represents KUCB. He says KUCB is in the battle for the long haul and may yet win back its license. KUCB barely heard half way to Ames, overridden much of the way by Family Radio translator K206AW \*89.1 Ames. KMOJ \*89.9 Minneapolis, another noncommercial black station, back on with full power.

MO Bethany KAAN-FM 95.5, ID with Albany. "We don't want stereo; it would cut down our range during sports programming where we make our money. We make very little from our music programming. Besides, this is the cheapest station in the chain!"  
**KAAN**  
 Hwy. 69 South  
 P.O. Box 447  
 Bethany, Missouri 64424  
 (816) 425-6380  
 Has TX, 67, farm

data. The display was mildly impressive—if you want to see the price of, ugh, pork bellies! It was a cluttered display, which couldn't be scrolled to the next page, but you had to be patient for it to turn. Agribusinesses and farmers subscribe. Anyway, it lit my car radio's SCS L-E-D a bright red, helping to compensate for the lack of a stereo indication.

NY Montour Falls WNGZ 104.9, but assumed to be temporary.

NY Pomona W232AL 94.3, with W276AQ 103.1 Fort Lee NJ and "primary" WJUX \*88.7 Franklin Lakes NJ. The group, "Jukebox Radio," uses the "103.1 frequency as primary in their hourly ID, leading you to believe the 88.7 outlet is a translator. They say 'and now serving Rockland County on 94.3.'" See below, FMakings, for an application to expand the group into Oakland NJ.

VI Christiansed WIVH \*90.1, g, with free program guide and bumper stickers offered. "This is a small 'ma and pa' station—often very sloppy with lots of dead air!"

**Format Changes**

Formats are the same as in the "FM Atlas"  
 AZ Glendale KTWC 103.5 m, "soft oldies," with a playlist of some 3000 songs from the '50s through today.

AR Clinton KHPQ 92.1 k, \$, "Q-92-FM," no SCS  
 AR Conway KTOD 92.7 tk, mostly talk during the week, \$, f(1) 57 kHz

AR Mountain Home KKTZ 107.5 r, no SCS (open carrier, 67 kHz)

AR North Little Rock KZQA 101.1 t (NOAA weather radio relay; said to be changing formats this fall), mono, but in pseudo-stereo. No commercials. IDs twice an hour.

CA Fresno KSXY 101.1 k, LMA-to-buy with KNAX 97.9-KFRE AM

WI Shawano WOWN 99.3 r  
 WY Sheridan KROE-FM 94.9 rm

PR Guayama WMEG 106.9 op, English music, Spanish announcing, "La-Mega-Sta-She-on."

VI Charlotte Amalie WIVI 96.1 rk. Most times adult contemporary rock, but country music request show with lady DJ 7-11 p.m. Tuesdays.

WTBN 102.1 sj, "The Breeze"  
 WIYC 104.3 r, "Isle 95," programmed with WJKC 95.1 Christiansted. "Heard playing on radios in almost every shop in Charlotte Amalie."

"I have listened to rock music and rap music, but I prefer country. Country music has clean lyrics. The words spoken on radio by Howard Stern are much like the lyrics of rock and rap music. The only objectionable material I have

heard in modern country music is of a feminist nature. The increase in country radio stations indicates a desire to put old time family values back into music and radio broadcasting."

**On Air—Real Stations and Pirates**

GA Helen WHEL 105.1 "since d-a change (June p. 2, col. 1), reception in Atlanta is poor, and consistent with what one would expect from a Class A at that distance."  
 IA Perry KDLS-FM 101.7, not having moved to 105.5. Also on 101.7 is nearby KAYL-FM Storm Lake. [to 104.7, Bosque Farms NM Socorro KMXQ 92.7—not yet having moved/ NY Queens Village Radio Concorde 87.5 in \$. "They signed on in early June with a lot of music, a minimum of talk and no commercials so far (who would want to buy time on a station that can't even be tuned in on some radios?)... Meanwhile, Radio Central e 87.9 has added some English programming on weekends, aimed at kids, and they have lots of commercials."  
 OR Cottage Grove K248—97.5  
 SD Aberdeen K253--98.5 (having moved from 106.3). "Funds are needed to pay the final bills. Some fine tuning still in progress. Contact Ken at 225-2871."  
 SD Volga KKQQ 102.3 with 25000 h,v; 74 m, not yet moving to 102.5. Strange their upgrade took place on the old channel.  
 WI Green Bay WGBW \*91.5 now with 710 h,v; 226 m  
 PR Roosevelt Roads? "AINB," NBS or AFRTS IDs, 92.9 m. "No call letters ever! Satellite classic rock mixed with CNN Headline News and sports evenings. "Hada fund-raising "Radiothon" with live DJs "and bad pop records." AP Net news during the day. Weakly received in the Virgin Islands.

**Off Air—Or Not Yet On**

AR Conway KHOX \*93.1—may be difficult for them to come back on the air with KTOD 92.7 there.  
 AR Little Rock K249CR 97.7; but a relay of KALR \*91.5 Hot Springs heard near North Little Rock on 96.9; not the rebuilt Maudelle AR station on 96.9.

### Multi-City IDs in Use

FL Fort Pierce WKGR 98.7 with Port St.  
Lucie-West Palm Beach (IDing temporarily  
with WOKC—to change to WFRI—103.1 [to  
move to Indiantown FL] and become "Frog-  
gy"). WFRI "blasting into the Palm Beaches  
may be a reality soon. WOKC is still  
broadcasting out of Okeechobee though."  
GA Cleveland-Gainesville WCGX 101.9 adds  
Cornelia in middle of ID list  
KS Olathe KCCV-FM 92.3 with Kansas City; its  
coverage nibbled into by KOEZ 92.3 Newton  
KS as close as Harrisonville.  
MS Hattiesburg WBBN 95.9 with Laurel-  
Hattiesburg, still "B-95"  
MO Nixa KGBX 105.9 with Springfield, having  
recently moved to a site where it serves all of  
the Springfield market with a Grade A signal.  
"Springfield MO is probably the most plagued  
market in the country with these new  
channels, move-ins, upgrades, etc., some of  
them with severe coverage flaws. KGBX was  
plagued with shadowing problems from its  
former site near Pleasant Hill, licensed to  
Bolivar MO. When the FCC allowed in certain  
cases for new cities-of-license to be designated,  
KGBX successfully petitioned for reallocation  
to Nixa, another hamlet within the Springfield  
metro, and recently moved to a new, closer-in  
tower near Strafford MO, which pushes their  
70 dBu (3.16 mv/m) contour over all of  
metro Springfield."

WI West Bend WBWL 92.5 with Germantown-  
Milwaukee

### AM Happenings Most Likely Caused by FM

AL Andalusia WKYD 920 silent  
AZ Laughlin-Las Vegas NV KOWA 870 in early  
June reverts to its original owners (who had the  
station when it was known as KROL). "This due  
to the financial difficulties encountered over the  
last couple of years by KOWA's owner, Paul  
Bowman. Bowman, in conversation,  
said KOWA's problems were due to the expensive  
synchronous transmitter setup (main transmitter  
is in Laughlin, with a synchro in Las Vegas)  
which among other things required six micro-  
wave STLs between the two cities. Bowman is  
disappointed in the lack of impact on the Las  
Vegas ratings: "If this format had been on FM, it  
would have been number 3 or 4 in the market" he  
said. The station will assume new call letters and  
become Spanish-language," as the transfer to  
new owners proceeds.  
CA Monterey KIDD 630 silent  
FL Ocala WTMC 1290 silent  
FL West Palm Beach WEAT 850 simulcasting the  
FM. WEAT AM had been playing the elevator  
music which was the original format of the FM  
before it became "Sunny 104.3 FM." Another  
rumor has WTRU 99.5 Jupiter changing. It was  
bought by the owners of WWNN 980 in Pompano  
Beach, a motivational talk station. The possibility  
here is another talk station—on FM and in  
English... Howard Stern is on Real Radio 104.1  
in Orlando (WTKS Cocoa Beach). Could there be  
a Ron & Ron funeral soon in Orlando? I'm still  
surprised he hasn't come to Miami yet; if he did  
numbers would go through the roof."

MI Grayling WGRY 1230, normally country,  
adopts its FM affiliate's fm format while the FM  
is off the air for upgrading.  
NJ Mount Holly WWJZ 640, 50 kw, has been off  
over a year. After the music stopped a person  
phoned the station only to be told there were  
"managerial problems," plus an estimate they'd  
be on in a week. Nothing has been heard since,  
reports the July "Popular Communications."  
PA Wilkes-Barre WYCK 1340 silent, looking for a  
new transmitter site.  
WI Oshkosh WXOL 690, carrying People's Radio  
Network. It "apparently flipped to the PRN  
channel, locked the doors, and walked away. No  
IDs, no spots, just PRN. Nobody is answering the  
phone at the station." In conflict with WCWC  
(AM) Ripon WI, which has first rights to PRN  
programs, allowing WXOL to carry only what  
WCWC doesn't. A sale is planned to the owners of  
WVCY 107.7 Milwaukee, who would turn it into  
religion, the "VCY Radio Network."  
GREAT BRITAIN. The Radio Authority turned  
down pleas by Richard Branson for a nationwide  
pop station between 105-108 FM, and to switch  
his Virgin 1215 station from AM to FM. He  
enlisted listeners to lobby the Radio Authority  
for the creation of a fourth independent national  
radio network. Such a license would have almost  
certainly drawn legal challenges from competi-  
tors, such as Atlantic 252 and Capitol, "which  
would have been disadvantaged by the move."  
The Authority instead may create a series of  
regional stations to afford all parties a part of the  
FM action.

### DX Doings—An Occasional Feature?

With FM skip in full swing across the  
country, this isn't such an occasional feature! A  
reader reported excellent long-distance reception  
in a moving Greyhound bus around 2 p.m. June  
28 SW of Minneapolis. He received KERA-FM  
\*90.1 Dallas and KALK 97.7 Winfield TX. An  
IN person was getting AZ on his truck radio,  
while I received such goodies as WBBN 95.9,  
B-95, Taylorsville MS, WQZX 94.3 Greenville  
AL, WAGP \*88.7 in stereo Beaufort SC, KALP  
92.7 Alpine TX and KEKO 92.1 Green Valley-  
Tucson AZ. Part of this "FMedial" was key-  
boarded while listening to classical music on  
KNAU \*88.7 Flagstaff AZ. The day before  
[June 27], WROO 107.3 Jacksonville FL was  
taped at 7½ ips reel-to-reel with its legal ID at  
12:02 p.m. for an excellent addition to my  
audio collection. The causes of sporadic-E FM  
skip reception are unknown, but may be related  
to tornado activity; there were tornado warnings  
in GA June 27 when the skip was pouring in.  
Another reader says that the hurricane season is  
good for DXing. "Whenever there's a hurricane  
down south, usually at the end of August to the  
beginning of September, I get stations from  
Philadelphia, DC, Baltimore and various cities  
along the coasts of DE, MD, NC, plus VA—all  
within a few hours on the same day."

From eastern MD a person received FM  
skip, including Oldies 92.9 Colorado Springs  
CO and KGLS 93.1 Pratt KS, May 23, early  
evening.

A NJ resident heard at least nine FL stations  
June 10, 11:30 a.m. to 1 p.m. "The one station  
that came in exceptionally well was WAYJ  
[\*88.7 Fort Myers FL]. It had crystal clear  
reception and full stereo sound. . . I received  
the stations on my JVC receiver, using just the  
wire antenna that came with it, pinned on the  
wall. . . On June 12, between 8 and 9 p.m. I  
also received stations from KS, MO and IL. This  
year's 'skip' season is definitely underway!"

### FM Rulemakings Proposed

*First date is for filing comments at the FCC;  
second date is for replies. Stations affected, if  
any, are listed.*

AL Cordova 95.3A for 92.5A, WFFN (which  
remains on 95.3A)  
IL Galatia 98.9A, Aug. 8, 23  
LA Jonesville 105.1A for 101.1A, with Mamou  
LA Mamou 101.1C3 for A, KAHK, Aug. 9, 24

MO Neosho 99.7A, with Commerce OK, Aug. 1,  
16 [the channel at Commerce]  
OK Commerce 104.3A for 99.7A (or deleting/

### FM Rulemakings Finalized

GA West Point 106.1C—dismissed WSTH's bid to  
change from Alexander City AL  
LA Clayton dismissed PDB Broadcasting's  
107.7A bid.  
MD St. Michaels—dismissed WFBR's petition to  
move 94.3A from Cambridge  
MN Buhl \*92.5C2, reserved for educational use,  
no filing window. [Sauk Rapids  
MN Olivia 100.1A for 101.7A, KOLV, with/  
MN Sauk Rapids 101.7C2 for A, WHMH  
NV Alamogordo—dismissed 93.5A bid.  
NV Austin—dismissed 99.7A bid.  
NV Lund—dismissed 100.7A bid.  
VA Chester 105.7A for 93.1A, WDYL  
WI Ellison Bay—denied Eden Broadcasting  
Group's bid for 92.5A there.

### FCC Solicits Comments on Comparative Criteria for Hearings

The Commission is asking for com-  
ments on how the criteria for selecting  
winners in hearings cases might be changed.  
This is in response to the court decision,  
Bechtel v. FCC, which found the Com-  
mission's integration criteria to be arbitrary  
and capricious, and therefore invalid. The  
FCC noted that the comparative criteria  
had not been examined in 27 years, and  
changes in the marketplace, in broadcast  
technology and in the FCC's own regula-  
tory policies warranted a revisiting of the  
criteria.

The FCC's asking people who comment  
to address what criteria should be used to  
evaluate applicants' comparative qualifi-  
cations in light of Bechtel. In particular,  
it is concerned about the weight given  
such things as local residence and civic  
participation, minority status and broad-  
cast experience. And the FCC wonders  
what weights should be given those factors  
to pending cases. "For example, commen-  
tators may wish to consider under what  
circumstances it would be appropriate to  
permit applicants in pending cases to  
amend their proposals in light of newly-  
adopted standards," the FCC said.

### Small-Print Happenings and FM Industry News

Speaking of the FCC, they've admonished  
KMAL 92.7 Malden MO, a quaint Class A with  
stereo, for failing to notify Jim Darnell, William  
Johnson and Bobby Cronan of a broadcast  
editorial endorsing a candidacy of Clark Duckett.

Why do some Christian stations rake in the  
money on fund raising and others barely get by?  
The answer may be found in an article in June's  
"Religious Broadcasting" magazine. Mark Ward,  
Sr., mentions that stations with preaching and  
teaching programs do very well with donations,  
while contemporary Christian stations do not.  
The latter do better with on-air advertising.  
"Advertisers favor Christian stations . . . that are  
seen as progressive rather than bound to the old  
formats of 'religious' radio. Yet donors to  
broadcast ministries prefer a teaching and  
preaching focus, and may even be disinclined to  
support stations that air contemporary Christian  
music." The same article mentions KHAC-FM  
103.1 Window Rock AZ, which will come on the  
air with donated equipment, and plans to  
increase to Class C3 status. This station, which  
hopes to evangelize the Navajo, expects to be  
on the air by late summer or fall. They wanna be  
stereo and are asking for such items as a stereo  
generator, an FM exciter, and cassette decks.

Donations to Western Indian Ministries, PO Box F, Window Rock AZ 86515; (506) 371-5749.

I attended the convention of the Association of Radio Reading Services in North Little Rock AR early last month, along with Dave Jackway, SCS Radio Technologies, Springfield MO. Bob Carson was there; he's taken over the company that used to sell SCS receivers called Target Tuning. They aren't producing any radios, waiting for UL approval of their circuitry. I met Frank Karkota of ComPol; I've had dealings with him since the late '70s and it was nice to finally meet. Charlie Chan, Sinocast of CA, was there. He's importing SCS radios, but denies he's the person supplying \$25 radios to ethnic broadcasters. Also present was Jay McMartin, SMC International of Omaha. The convention was

FM Radio-Electronics Engineering

uneventful except for a rather spirited discussion about the legality of using tunable SCS receivers. I got into it with Betty Young, WUSF Radio Reading Service, Tampa, and Dave Lewis, director of the WV Library Commission's Talking Book Center (see June, p. 4, col. 1). I accused the services of wanting privacy because they broadcast pornography, but Young said her husband, John (director of WUSF; a person through whose body I later sent electricity in an experiment set up in the vendors' area), is a minister and would know whether or not it's porno. Another fracas centered on a dispute between new and former board members. About 70 people were there, and it was fun to visit the antique radio convention and bazaar in the hotel's parking lot. Besides buying a 1952 Zenith AM-FM table radio, I bought a 1943 issue of "FM Radio-Electronics," a 25 cents' magazine, for eight bucks! I'll share tidbits from it in a future "FM As It Was—Or Might Have Been." Early in July I'll be at the Westin Hotel, Renaissance Center, Detroit, exhibiting SCS radios at the National Federation of the Blind, and hosting a non-alcoholic hospitality suite in my room. Back in Little Rock, Dave Johnson, AR Radio Reading Services, proved to be an excellent convention host and one who listened quietly to our discussion.

Coming back through Kansas City, I was saddened to see that McGee Radio was closed.

and by the mid-'70s "rock'n'roll had pretty much taken over the FM band." But back to Top 40? It doesn't seem so. Pat St. John of WNEW 102.7 New York said "I don't see a move back to Top 40. But, hey, radio changes all the time. A year or two, who knows what could happen?"

WBBQ-FM 104.3 Augusta buys WZNY 106.3 for \$3.9 million, subject to FCC approval. E. B. "Bernie Florie," WBBQ president, worked out the arrangements with Benchmark Communications of Baltimore, which is selling. The companies said most of the WZNY staff would be retained, as well as the station's call letters and programming, but there would be a consolidation of the news departments as soon as possible. Also in Augusta, there's word that the combination of WAEG 92.3 Evans and co-owned WAEJ 100.9 Waynesboro may be operating under the wrong call letters. It seems they failed to notify the FCC of the call letters request (the stations had been WYFZ and WAGW, respectively), but their "attorneys are looking into it," and by now those calls have probably become official.

The shoe has dropped in Boston with WXKS-FM 107.9 buying WJMN 94.5. Formats should stay the same, with Matt Mills, general manager of both stations, saying: "Hopefully we'll improve it [the format of WJMN], but when you pay \$22 million for a radio station you don't just blow it up and start over." WJMN's studios in Wal tham will be closed and merged into the WXKS-FM headquarters in Medford. Paul Fleishman, president of the Long Island Broadcasters Association, was appointed by Liberty Broadcasting to run WBAB 102.3 and AM, which "appeared to signal that they will be operated separately from WBLI 106.1 FM when the company closes on the purchase of the Patchogue outlet." Fleishman's hiring "seemed to herald some head-knocking and fine-tuning at WBAB, L.I.'s album rock leader. Despite better ratings, WBAB drags way behind WBLI in commercial revenues." Estimates are that WBLI pulled in \$6.7 million last year, compared with about \$5.7 million at WBAB. "With a glaring disparity like that, Fleishman wasn't brought in to measure the joint for new drapes," quipped "Newsday."

Liberty Broadcasting is grouping WHJY 94.1 Providence RI with WSNE 93.3 Taunton MA, while WYSR 104.1 Waterbury CT and WHCN 105.9 Hartford are paired, and in Albany it's WPYX 106.5 and WGNA-FM 107.7. Jacksonville FL has Prism Radio Partners, owner of WKQL 96.9, acquiring WIVY 102.9. Trumper Broadcasting, owner of KKCW 103.3 Beaverton OR buys KXYQ-FM 105.1 and AM Salem OR for \$5.6 million. In Albuquerque, KKJY 94.1 being sold for \$1.75 million to Bengal Communications for a duopoly with KAMX-FM 107.9.

Speaking in Minneapolis is to the 1994 convention of the American Women in Radio and Television, FCC chairman Reed Hundt predicted that, with the arrival of new communications services like PCS, there will be many opportunities for women, both in ownership and management. He said, "Competition in the wireless industry could generate 100 million subscribers

within 10 years; that's 84 million more customers than now subscribe to cellular service." He said legislation permitting the FCC to auction off radio spectrum for such services as PCS "asked us to ensure that small businesses, women and minorities have an opportunity to get in on the ground floor of this exciting new technology."

WBEZ '91.5 Chicago did the unprecedented—it signed off for one hour in the middle of the day to honor talk show host Sondra Gair, who died of cancer at 70 on May 25. The dead air (pun intended) was at the beginning of her usual program time May 27. Carole Nolan, longtime general manager of WBEZ, who hired Gair in 1974, made the announcement: "In tribute to what she has given us, the love, the wisdom, the courage, and in memory of a vital part of WBEZ now lost, we will sign off for Sondra's hour today..." However, Jean Davidson in the Chicago Tribune was not so sympathetic. "Potential listeners—and contributors—may have been lost. Others probably thought the station was having technical troubles." At a date in July to be determined, WBEZ plans to air segments from her many broadcasts as a final tribute.

NPR, Denon and RE-America team up to test RBDS technology at 26 NPR stations where encoders will be placed; 10 other sites are pending. The stations will be allowed to keep the encoders and radios in exchange for on-air promotion of the technology and Denon. I was surprised at the large number of 57 kHz SCStations, with either RBDS or Cue Paging, I've heard lately in the Midwest.

FM listening nationally now at an all-time high—79 percent. This is up from the 77 percent reported in the 1993 "FM Atlas." The 79 percent estimate is from the Spring 1994 RADAR® report. The current RADAR results reflect radio usage on 12000 respondents during the year from May 1993 through April 1994, and sponsored by ABC, American Urban, CBS and the Westwood One Radio Networks, major advertisers and agencies.

The 19th annual Upper Midwest Communications Conclave is set for July 7-10 in the downtown Minneapolis Hilton, with a theme, "We Were Wrong—This IS Rocket Science!" For more info call (612) 927-6427.

WKBH La Crosse WI must have had an early FM station. The newsletter of the Milwaukee SBE chapter mentions the death of Alvin Leeman, 85, an engineer who helped WKBH enter FM in 1947 and TV in 1954. "In 1947 when WKBH ventured into FM and the supplier of an antenna could not deliver as promised, they devised a slot antenna out of a discarded water heater tank which tuned up as well as any commercial product." By summer, 1949, WKBH-FM must already have been deleted, as it does not show in my old "White's Radio Log." [WKBH-FM is now on 105.5, licensed Trempealeau WI.]

A kids program on public radio, "Rabbit Ears Radio," has quietly been amassing affiliates—more than 200 nationwide. It's sent out on Public Radio International (American Public Radio) at 10 Saturday morning, and has used such stars as Jack Nicholson, Mel Gibson and Robin Williams. WKSU \*89.7 Kent OH decided to dump NPR's "Soundprint" to pick up the kiddie show. "We think it offers unique promotional value because it has big stars," said Robert J. Burford of WKSU.

Shock jock Howard Stern visited Cleveland after word got out that he had squeezed by his competitors at WMJI 106.7 and WMMS 100.7 in the ratings. He and his entourage staged a mock execution and funeral for his competitors, which included the decapitation of a large stuffed buzzard, WMMS' mascot. A man was arrested for cutting the wire that fed the Stern broadcast, interrupting transmissions for about five minutes. WNCX 98.5 is the Stern affiliate, whose satellite feed was also interrupted for about an hour by a "pirate" who screamed obscenities over the air. Besides thanking his fans for the new No. 1 status, Stern took potshots at Cleveland, saying "My favorite place in Cleveland is the airport in about four hours."

## McGee Radio

### NOW AVAILABLE... SUMMER '88 CATALOGUE

The Better Business Bureau told me they had several complaints against the firm, which at the end operated out of a post office box. Long gone—another mail-order firm in Kansas City. I visited them in 1959 and bought a 12" Electro-voice triaxial speaker and other items; the speaker is still here, mounted in a Bozak enclosure. Burstein-Applebee was also in mail order. It's been gone so long the K.C. BBB did not know about it. This ad is from the 1943 magazine.

The NY Daily News had a story about the decline in Top 40 radio, with fragmentation of formats by FM stations. By the late '60s owners of sleepy FM stations decided to give rock a try,

It was only an applicant—yet it had aroused the wrath of the FCC with a threatened \$25000 fine. Now the Commission's relented, and decided there were insufficient grounds to fine Westerville Broadcasting Company, which had its application for 103.9A dismissed. The applicant was accused of misrepresenting facts in a June 9, 1993 pleading before the FCC. The channel has since been granted to another applicant, but no call letters have been issued; it formerly was used by jazz station WBBY, which lost its license.

Radio newsrooms are closing down, the direct result of duopolies, as found by the NAB. Duopolies end up "hurting the working news people in those stations. . . . Producing local news is one of the more expensive things that a radio station does," said Doug Willis, director of media relations, National Association of Broadcasters. That story was in "Radio World." John Gatsky, news editor, called and cleared details of a feature on my modified G-E Superadio III to be published in their July 13 issue. "We have a lot of readers," he warned. "Don't be surprised at the responses you'll get to your tunable SCS radios."

Latinos are turning the heat on WJXQ 106.1 Jackson-Lansing MI after a May 5 parody that said the station would give away "real live Mexicans" to mark Cinco de Mayo, a Mexican holiday. "The radio station [is] trying to cloak their prejudice with humor," said Magda Sanchez of Lansing. "But this is not funny. We want to be a constant thorn in their side." Certain advertisers, including the State Employees Credit Union and Lansing Community College, have agreed to cancel commercials, and picketing of the station is planned. Pickets would be called off if the station agreed to give Latinos an opportunity to respond on the air to sensitive parodies, pay for full scholarships in each of the next five years for nonwhite students at LCC, hire two nonwhite interns per year for the next five years, and sponsor a media forum to sensitize other outlets on race-related reporting. Tim Barron, a deejay, told listeners: "Imagine your own personal Mexican. They'll wash your car for you, clean your house, pick your crops. . . . Bathing and delousing of Mexicans is winner's responsibility. Station assumes no liability for infectious diseases carried by Mexicans." Marylou Mason, executive director of the state Commission on Spanish Speaking Affairs, commented: "That's not comedy. It's offensive and degrading."

WCAL \*89.3 Northfield MN, owned by an ELCA-synod Lutheran College, is intensifying its connection with that denomination. Its studios at Central Lutheran Church, downtown Minneapolis, are being expanded. The new facility offers separate control rooms for the church and WCAL. Microwave connects the church with the station in Northfield, which will soon have video and data interconnection. Although a public station, it does broadcast live services 11 a.m. Sundays from Bethlehem Lutheran Church in Minneapolis, and carries *Compline*, a 9 p.m. Sunday contemporary service from Central Lutheran Church.

The FCC seeks more minority broadcast owners, but its policies allowing duopolies have largely thwarted the effort. "The absence of minority owners meant the pressure to hire people unlike oneself was very low," said David M. Rubin, dean of the Newhouse School of Public Communications at Syracuse University.

New FCC commissioners are Rachelle B. Chong, 34, a Republican, who has a law background, and the first Asian American to serve on the FCC. She fills the spot vacated by Sherrie Marshall. Another woman, Susan Ness, 45, a Democrat, was named to fill Ervin Duggan's slot. She, too, is an attorney. Both appointments were made by President Clinton and confirmed by the Senate.

WCCP-FM 104.9 Clemson SC may find it clear sailing, as the FCC confirmed the dismissal of competing applicant FM 104 because the latter's application was defective under the

former "hard look" policy. The FCC would not reconsider FM 104's application, because amendments were not sent in during the filing window period.

The M Street Journal reports that Arbitron has introduced a "First Preference" report, which lists the percentage of a station's audience that's "core listenership"—listeners who report hearing that station for more quarter-hours than for any other single station.

WYKL 98.1 Millington-Memphis TN, according to M Street, had the management of Dayton-Hudson's Target Stores all "a quiver." When the station switched to '70s oldies last month it went to a Target 98 FM logo featuring a blue and orange bull's-eye. Except for the color (Target's is red and white), the logos looked identical. The stores say they've gotten negative calls, thinking the stores and the station are related. WYKL prexy David Gingold said in a "Memphis Commercial Appeal" interview, "We hope we can resolve their concerns in a nonlitigious manner, but we don't see any reason to change." The station, at last report, is still using "Oldies 98.1" as its on-air positioning statement.

The FCC granted a CP to increase to C1 status (from Class A) and a transfer of ownership to C&C Broadcasting—all part of the same action affecting KGAL 102.3 Brownsville OR. It denied a petition against the assignment filed by McKenzie River Broadcasting (KMGE 94.5 and two AMs) and McCoy Broadcasting Co. (KPNW-FM 99.1 and AM). C&C is also licensee of KUGN-FM 97.9 and AM Eugene. The facilities improvement is part of a plan for KGAL to move its transmitter to the KUGN-FM site. The opponents to the transfer argued that the transaction must be evaluated on the basis of the proposed modified facilities of KGAL, not on its previous Class A facilities. They said this will result in excessive concentration, with KUGN-AM-FM already having 25.8 percent of the Eugene market, according to Arbitron, "and that KGAL will quickly gain substantial audience share in that market after its facilities are modified." However, the FCC rejected the 25.8 percent analysis, saying that when the application was filed it was the spring Arbitron which should be used, and those showed an audience of 25 percent even.

The FCC has adopted a new fee schedule designed to recover costs in carrying out its enforcement, policy and rulemaking services. This is in addition to application fees that the agency has been charging. If a broadcaster is facing financial distress, the rules provide for a petition for waiver, reduction or deferment of a fee before the fee is due. "The filing of a petition for reduction permits the payor to make only a partial payment until disposition of its petition." The notice mentions that fees for FM translators and boosters don't kick in until next year. Payments can be made by check, money order or charge card. FM radio fees are due by Aug. 10. If you pay late, you'll be assessed a 25 percent penalty, and any pending applications may be dismissed and possibly face a revocation hearing. For more info call Thomas Holleran at (202) 418-1925. Annual fees for FM: Class C, C1 C2 or B: \$900; Class A, B1 or C3: \$600. These fees affect only commercial FM stations; stations licensed noncommercial are exempt.

Broadcast totals from the FCC, stations licensed and operating: AM 4928, FM (92-108 mhz) 5030, FM educational (88-92 mhz) 1689, with another 2183 FM translators and boosters as of May 31. Commercial FM now has a lead over AM of 102 stations (5030-4928), which is 50 more than I reported in my letter to the editor, "Broadcasting & Cable" magazine, April 18, p. 51.

From the classifieds: Jampro 2-bay antenna, 99.3, coax, etc. D. Denver, KUTT, 414 4th St., Fairbury NE 68352; (402) 734-5521. KUTT must now be on 99.1 as a C1.

Wants to buy Technics ST9030 stereo tuner,

B. Cai thamer, WMBI-FM, 820 N. La Salle Dr., Chicago IL 60610.

Managers needed for several stations in the SE—FM and AM. Sales and program experience preferred. Resume to CEO, Positive Radio Group, PO Box 889, Blacksburg VA 24063.

## FM FORUM

### CONTRIBUTIONS FROM READERS

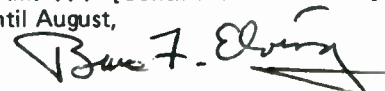

Doug Loney from the Toronto area says "irresponsible politicians and bureaucrats have put us into the position where at least a third of our taxes goes to pay interest on the debt—instead of for education, health care, the arts, etc. You know all that! Thanks for the kind words about BT [magazine]. I appreciate FMedia! and often find Canadian news there I haven't heard, and lots of other interesting items as well. The powers that be in Canada seem to be 'gung ho' on DAB in the L-band. I'm very dubious that it can fly without the U.S. going the same route."

WNIB 97.1 Chicago "is the mom and pop classical station that has at least three dogs and eight cats strolling around the office and studios. They are doing well [the station, not the cats], beating rival WFMT 98.7 (the guys with the new, loud, buzzing data subcarrier) in the last 3 or 4 books. WNIB transmitter is on the Amoco Building. The old 1973 FM Atlas shows 850 watts, 1190 feet!" writes Mike DiSandro. He says the Blaze, WWBZ 103.5, had its worst book, falling to 19th place and a 2.3 share, "beaten by all rockers a sister station WLUP-FM (talk), which soared into the 4s (share). Musically, the Blaze has become more mild, some water thrown on the 'blaze,' but still sounds good. "I think NOAA weather radio should pick an AM or FM station to simulcast on for use in the car. Not too many car radios can get 'WX'. . . Finally, the '73 FM Atlas was interesting and very simple. The one thing I didn't see was SCA coverage—but that was then and it must not have been developed well enough for listing it yet."

A reader, Brian Anastasi, differs with me on the value of AM radio. After getting his letter, I thought of writing an editorial, "Time for the FCC to Scuttle AM," but thought better of the idea. Here are his views:

I beg to differ with what appears to be your viewpoint that AM radio is all but dead. With the coming of the information superhighway and perhaps 500 TV channels, I frankly can't see any one form of media surviving, much less thriving. The three and one half commercial TV networks will be first to fall, but most local stations will survive. I just think TV will be less and less of a mass medium. Now on to radio, where we seem to have the idea of AM vs. FM. No one can deny the advantages in audio fidelity that FM has over AM. . . ." [Continues next month.]

Until August,

 BC Houston CJFW-7 105.5  
 BC Smithers CJFW-6 92.9  
 GERMANY Berlin 101.3 (2 kw) "InfoRadio 101" all-nw station, but now silent.

**Format Changes**

*Formats are the same as in the "FM Atlas"*

AR Huntsville KREB 99.5 gr  
 AR Little Rock KKPT 94.1 op, still "The Point"  
 CA Copperopolis KRVI 105.5 rm, "River"  
 CA Fremont KBRG 104.9 S, r  
 CA Fresno KKDJ 105.9 o ('70s), LMA-to-buy with KSKS 93.7 and AM  
 CA Glendale KLIT 101.9 p, "Southern CA's Album Alternative" (from "K-Lite"). The "flip happened on 7-1-94 at 5 p.m. . . New calls are pending."  
 CA Newport Beach KBCD 103.1 jm, "CD 103.1"  
 CA Santa Monica KACD 103.1 jm, "CD 103.1."  
 The new format on KBCD, KACD includes "instrumental tracks by the likes of Grover Washington, Jr. and Earl Klugh with more pop-leaning vocals by Anita Baker, Al Jarreau and others." Being bought by Cox Broadcasting Co., from former NFL athlete Willie Davis. To be paired with Cox's KOST 103.5 and KFI AM.  
 CA Yucca Valley KROR said to be changing in Sept. to mono tal k, and calls to KNWZ. KROR is objecting to an FCC application for a KAWZ \*89.9 Twin Falls ID translator in Yucca Valley.  
 South Kent WGSK \*90.1 mc, relays WMNR \*88.1 Monroe weekends only; otherwise it has public affairs, big bands, folk and Broadway music.

FL Homestead-Miami WXDJ 95.7 still Spanish, but ran an ad looking for a PD for an English language '70s format. "With WFLC, WHYI, WLYF and WTPX, not a real good choice of formats for Miami."  
 FL Jensen Beach WHLG 102.3 mr, now lite AC  
 FL Jupiter WJBW 105.5 o, "Jukebox"  
 GA Americus WDEC-FM 94.7 rm  
 GA Bostwick WOMQ 92.3 to be k, expected on this month  
 GA Brunswick WSEG 104.1 m  
 GA Cleveland WCGX 101.9, S, I, ID with Gainesville (no longer with Cornelia) at about :50 in English, followed by a Spanish ID. "About 45% of the population around Gainesville is from Mexico and TX. Many of them work in a chicken factory. Strange that Atlanta has no Spanish station on FM; there are some AMs here with Spanish; 102.5 in Mableton was to be Spanish but nothing has been heard of it lately."  
 HI Aiea KGMZ 107.9 j, "Surf 107.9"  
 IL Chicago WKCC \*89.3 s, \$  
 IN Nashville WNSR 104.7 mr  
 KS Andover KDLE 93.9 s, "Power 93.9"  
 KY Morehead WIKO 96.3 k  
 LA Baton Rouge WTGE 100.7 op, with p.m. drive time simulcast with WEZB 97.1 New Orleans  
 LA Lake Charles KZWA 105.3 s, going after Beaumont TX—a market KHYS 98.5 Port Arthur-Beaumont gave up after moving tower closer to Houston.  
 ME Kittery WXBB 105.3 was k, now running a computerized countdown with silly sayings in between. Will be changing formats within "a few days."  
 ME Searsport WBYA 101.7 rm, to reach a 35-40 mile radius. "Two people have been hired to sell advertising and provide on-air talent."  
 MD Catonsville WOSR 105.7 o, "Good Time Oldies 105.7" (not strict)  
 MI Detroit WJZZ 105.9 j  
 MI Glen Arbor WGFN 98.1 op, parallel to WGFN 105.1 Cheyboygan  
 MI Houghton WAAH 102.3 o  
 MI Marquette WFXD 103.3 o  
 MI Tawas City WKJC 104.7 k  
 MS Cleveland and WDMF \*98.3 p, parallel to WAFR 88.3 Tupelo  
 MS Colwater WVIM-FM 95.3 gs, "contemporary Christian/black gospel"  
 MS Tupelo WZLQ 98.5 k  
 MO Rolla KOMX 94.3 rm  
 MT Red Lodge KMXE 99.3 r  
 NJ Wildwood WZXL 100.7 rp  
 NJ Wildwood Crest WDOX 93.1 p, changing from "beautiful music to modern rock." New program director is Christopher Allen, who has no radio experience, "But radio's my life. I've been listening to radio since I was 14 years old." Allen plans to air music by Pearl Jam, Alice in Chains, Smashing Pumpkins, House of Pain and the Beastie Boys.  
 NM Albuquerque KAMX-FM 107.9 rm  
 NM Clovis KWUA 102.3 k; FCC reinstates permit for 25000 h,v; 54 m. Its listing, July, p. 3, col. 3, should have been under "New."  
 NM Gallup KXXI 93.7 op  
 NM Tucumcari KQAY 92.7 rm  
 NY Cobleskill WQBJ 103.5 op, parallel to WQBK-FM 103.9 Rensselaer, including Howard Stern  
 NY Copenhagen WWLF 106.7 p, "Z-Rock," returns to air  
 NY Jamestown WUBJ \*88.1 jc, parallel to WBFO 88.7 Buffalo  
 NY Utica WVVC 100.7 gr  
 NY Woodstock WDST 100.1 still p. Now some New York city listeners who visit WDST-land would like to create a similar station in the Big Apple, but the big broadcasters are "scared" to try such a format, said Gary Chetkof, WDST owner, who used to work at Metromedia. He calls his "one of those great little stations." "New York has the worst

radio in the country," according to Chetkof. "And a big part of the reason is all the stations that were sold for inflated prices in the '80s through leveraged buyouts." With a huge debt service the corporations that own them don't want to take a chance on anything too different in programming. "Even if a station changes formats it just hires the same consultants as everyone else and ends up sounding the same" said Chetkof. If nobody else tries a WDST-type format in NY, Chetkof vows to return and try it himself.  
 OK Pauls Valley KGOK 97.7 k, "Super Charged Country" (as is AM 1470). Seeks 16000 h,v; 125 m, C3.  
 OK Ponca City KIXR 100.1 rm  
 OK Poteau KZBB 97.9 rp, "Red Hot Radio 97.9, Star 98"  
 OR Bend KXIX 94.1 r, "hot AC"  
 PA Coudersport WFRM-FM 96.7 k, still "The Wizard"  
 PA Philadelphia WMGK 102.9 op ('70s), "Magic 102.9" (from "Magic 103"). They play "everything from Led Zeppelin to much slower selections."  
 PA St. Marys WKBI-FM 94.3 rm  
 PA Smethport WQRM 106.3 rm, parallel to WKBI-FM  
 SC Newberry WNMX 106.3 k, "Bubba 106" (from "Mix 106")  
 TN Waverly WVRV 105.1 k

 TX Carrizo Springs KCZO 92.1 Spanish gr  
 TX Comfort KRNH 95.1 k, "The Ranch"  
 TX Premont KMFM 104.9 S, gr  
 WA Seattle KXRX 96.5 k, "Young Country" (strict), preceded by a weekend of all comedy. "This puts three FMs in Seattle-Tacoma with k format and only KISW 99.9 with AOR." KJR-FM 95.7, which recently changed to oldies with the legendary calls of AM 950, 1950s-1960s, uses a modified form of the original "KJR Seattle Channel 95" jingle, saying "Channel 95 Point 7." The "jingle was written by long-time KJR PD and DJ-extrodiinaire Pat O'Day."  
 KIRO-FM 100.7 t, mono  
 WA Tacoma KUPS \*90.1 p. "Rarely is strong enough to ignite the stereo indicator" in Vancouver.  
 KBTC-FM \*91.7 op, no longer relaying minuscule KGRG Auburn WA  
 BC Vancouver CFOX 99.3 still p, "The Fox" (strict). "Persistent rumours have it that new owner Shaw Communications of Edmonton will change call sign and format to k—competition for the very successful CJJR, 'JR Country' 93.7. CFOX, once the ratings leader in Vancouver, trails far behind CFMI 'Rock 101' 101.1. Also ahead of CFOX are JR Country and upstart CKZZ 'Zed 95.3 FM'. AC stations CHQM 103.5 and CKKS '97 Kiss FM' 93.5 show signs of defeating the once mighty CFOX, which has now backed itself into a corner."  
 ON Sault Ste. Marie CHAS 100.5 rm  
 ENGLAND—the Radio Authority has granted low-power FM licenses for a travelers information service along Britain's busy M20 Motorway using a single (not announced) frequency and RBDS. All Classic FM stations ("Classic Hits" and "Classic Gold") now using RDS Radiotext to give listeners information about artist, composer and CD catalog number of the music being played.  
 ISRAEL: Government has licensed two 60 kw FM stations for Palestinian areas. One will be in the West Bank and the other in the Gaza strip. "Government financing will keep the stations alive initially, although commercial operation is eventually planned."  
 SWEDEN Stockholm 101.9 "Z Radio," rs. Other private FMs there (frequencies unknown): Radio City, Radio NRJ (satellite r with primary station in France) and feminist Radio Q.

**On Air—Real Stations and Pirates**

AL Citronelle WHXT 102.1 returns to air with  
 CA Los Angeles KPFF \*90.7—plans to set up translators and share bilingual programs with other Pacific stations, using a new Ku-band satellite relay.  
 CO Paonia KVNf \*90.9 temporarily 39 watts because of wildfires, which included the loss of several homes in Paonia. It will take a month before KVNf returns with its full 3 kw. A fund for fire victims has been started by KVNf; donations to Paonia State Bank—Fire Victims Fund, PO Box 597, Paonia CO 81428.  
 FL Jacksonville WROO 107.3, WAIA 93.3, WSTF 97.9 and two AMs are all operated out

from a new transmitter site.  
 MN St. Paul area—a pirate on 88.1 with 20 watts and owned by an engineer for MN Public Radio. "I lived five miles from him, and his signal knocked out my reception of KRLX Northfield and KVSC St. Cloud." He is off the air, but believed to still have the equipment and potential to fire it up.  
 FCC Office—Maplewood MN, (612) 774-5175. Paulette Barterian, FCC Public Affairs, called and said a station running less than 90 percent of its authorized power must notify the FCC if 10 days of such operation or more.  
 NY Queens area "Radio Centrale" 87.9 off the air. "I stopped it two weeks ago. We were testing with 15 watts, not pirating. I hope to get a regular license. Can you help me?" asked Samuel Menager, who claims to be an FMedia subscriber. Also the Queens Village 87.5 Haitian pirate is off. "All of a sudden they just disappeared!" The M Street Journal says the FCC shut down the two stations, supposedly using mobile direction finding equipment "after several residents complained about the interference." Each station said to have been fined \$20,000. It was a bad month for the Haitians in NY. Radio Soleil, on the 67 kHz of WSKQ-FM 97.9, said to be off the air. I'm assuming technical difficulties, but who knows if they'll ever return?  
 PA Renovo WMHU 93.1, remove format, \$ data, as its outage seems to be a long one.  
 SC Ellora WORG 100.3 and WMNY 1370 AM WI La Crosse W299AC 107.7  
 ISRAEL "Voice of Peace" silent. "Abbie Nathan's ship-based station was on FM and AM for many years. Financial contributions were not enough to keep this Christian station on the air. Other off-shore broadcasters have been successful by selling commercial advertising. Israel government plans to combat off-shore broadcasters by allowing private broadcast licenses in the near future."

VT Vergennes 96.7 WWGT not on p. 15 map  
 VA Norfolk WHRV \*89.5 is listed as WHRO-FM (which is on 90.3), p. 162. Correct entry to read 223 m (23000 h,v).  
 WCMS-FM 100.5 is 50000 h,v (not 500000 watts), p. 191. [p. 158  
 WY Dubois (not "Douglas") K217BP \*91.3, /YT, not WY, Watson Lake CKRW-98.7, p. 187  
 "Enclosed is \$65. I am in business about radio, but not in the radio business. I used to be in radio. Remember the old saying, 'Having a foot in the door?' Well, I had my foot in the door, but I 'stepped out' to reassess where I wanted to go in the business. While I was out, the door 'slammed shut', and I wasn't able to get back in. Nobody answers my 'pounding on the window' [big grin]."  
 "We teach Delco/General Motors people how to solve radio reception problems and use the FM Atlas."

A service of Paxson Broadcasting, Inc

8386 Baymeadows Road • Suite 107 • Jacksonville

of 8386 Baymeadows Blvd., Ste. 107, ZIP 32256, and owned by either Paxson Broadcasting or Todd Communications.

MI Holland WTHS \*89.9 back on—for 12 hours a day, 9 a.m. to 9 p.m.—with a temporary Spanish gospel format, provided by G-R-based "Radio Bible Class." Student-run "p" programming in English resumes next month.  
 MO Ashland KBXR 106.1, in building with KARO 101.5 Columbia, and merging. "This consolidation will continue and continue."  
 NJ Ocean Acres WQNJ 98.5, but off July 14-19 after transmitter received a direct hit from lightning. "This was kind of ironic because just a couple of weeks earlier they got a brand new transmitter. . . The station they simulcast, WJLK-FM 94.3 Asbury Park, was still IDing them every hour! I kept getting this picture that people were trying to tune in 98.5 and it wasn't there!"  
 NY Queens-Nassau County Long Island area "WQNR" 91.9, \$, playing "moldy oldies" from the '60s and '70s. NonID, "sort of, is 'Q'n'You'. Usually heard after midnight."  
 NC Lenoir WKVS 103.3 with k,\$. It has a "clean record, despite a challenge to the facility. Has live production, providing an excellent service." [moved from 91.1  
 PA State College WPSU \*91.5, having/  
 SC Columbia WMHK \*89.7 now on at 426 m (100000 h,v), with improved signal in places like Sumter, Florence, Kershaw and Kingstree.  
 WY Cheyenne KFBQ 97.9 was briefly silent, now on with CHR from a secret location, believed to be the owner's house.  
 BC Salt Spring Island 88.9 "Radio Void" mono 1-watt. Station is mobile and tends to operate from mountain tops on the island, trying to reach Victoria or Vancouver, "although I've warned them this is a foolish move. . . Hours are irregular. . . Station has been heard by me 70 km away with full quieting."  
 ENGLAND London (coming soon) 226 m range (one 10 kw plus three 1 kw transmitters), Crystal Palace. BBC to test DAB using Eureka-147 system in stereo.

**Off Air—Or Not Yet On**

AZ Prescott Valley KXLL 105.9—turned down by local planning and zoning board to build an 11 meter tower camouflaged inside a fiberglass saguaro, on a 5.4 acre parcel atop Mummy Mountain. The board turned down the permit request on aesthetic, technical and safety grounds, saying they want more information.  
 CT Ridgefield "WRFD" 103.3—was on until "Q-103" Sharon CT signed on. "I told the kid he could stay on until we signed on the air in Sharon, and then he better get his butt off so I can monitor my own station! He has since left the area and gone on to college."  
 KS Ottawa KZTO 95.7, plans to return in the fall

 JAPAN: "I want to listen to Chinese SCA radio. Japanese subcarrier radio is digital audio. The listen of Japanese subcarrier radio is limited. I live in Osaka area. I hear Chinese SCA by sporadic-E skip."  
 The June "Broadcast Engineering" magazine had an article on the Message Watch, pioneered by Sei ko, and which would use 66.5 kHz SCS nationally. Send 50 cents for a photocopy of the article, if interested.  
 "The wealth of SCA information uncovered during your recent trip to Arkansas and surrounding areas suggests that much of the Atlas is out of date in this regard. It would be interesting to know what areas of the country you regularly receive SCA reports from. I suspect many markets—and, indeed, entire regions—haven't been updated in years."

**RBDS: A Broadcast Technology Whose Time Has Come**

This publication has mentioned RBDS, radio broadcast data systems, which is a U.S. Adaptation of the European RDS, centered at 57 kHz on the SCS baseband of an FM station. It's a technology full of promotional value to the station. It can do such things as display a station's call letters and enable automatic switching to a sister station or a translator as a listener drives.

What sold me is the flawless way the signal can be transmitted at a low

rate of injection and not causing interference to the main channel or to other SCServices.

Not until I had experience tuning in RBDS carriers on my car radio did I appreciate the rather wide utilization of the system that now exists, nor did I realize how well the RBDSignal stands out on an FM station's subcarrier baseband.

Like the chicken and egg situation, it would behoove broadcasters to embrace RBDS, even before large numbers of receivers are available. The promotional and engineering potentialities of RBDS are magnificent. Broadcasters should go for it—and soon!

**Multi-City IDs In Use**

AR Lake Village KUUZ 95.9 with Greenville MS, now on with 20000 h.v

- FL St. Augustine WSTF 97.9 with Jacksonville
- MI Cadillac WLXV 96.7 with Traverse City, where their studios are; simulcast with WLXT 96.3 Petoskey.
- MI Munising WHCH 98.3 with Marquette-Escanaba; now \$
- NY Olean-Bradford (PA) WPIG 95.7 adds Jamestown (no longer with Wellsville PA)
- PA Emporium WQKY 98.9 (having moved from 99.3) with St. Marys; no nonID had been "Y-99")
- TX Hurto KIKY 92.1 with Austin, "Kick 92"

**AM Happenings Most Likely Caused by FM**

- CA Soledad KSUR 700 silent, but being sold to KBRG 104.9 Fremont CA and to be Spanish
- FL Panama City Beach WDLP 1290 goes to tourist information
- GA Atlanta: Only WSB 750, among AM stations, made it into the top 10 in the spring Arbitron ratings. It was No. 5. "Maybe the rest should just sign off!" Ratings leaders were WVEE 103.3 and WKHX-FM 101.5.
- IL Chicago WJPC (formerly WAAF) 950 "is now simulcasting the urban contemporary format of sister station WJPC-FM 106.3 Lansing IL and has dropped the all-rap format. Rap may be popular with young blacks, but apparently it can't support an entire radio format."
- ME Augusta WMDR 1340 (formerly WFAU) silent.
- MN Minneapolis KNOW \*1330 plans to cease simulcasting monophonic \*91.1 FM and join a new 24 hour Associated Press radio network Aug. 15. "This has not been announced yet, so don't use my name!" It has not activated its CP to move towers to Savage, on the MN River bottoms, with the FCC permit expiring in September. MPR is facing opposition from bird lovers who contend that the towers will be in an important flyway which follows the MN and MS rivers. The towers are also opposed by Edwin

Martini, Jr., head of the MN Masonic Home in Bloomington, who says, "We feel the vistas on this side of the river are of some of the more beautiful and undisturbed lands in the area." MN St. Paul WDGY 630 off the air. Its land has been sold to an apartment developer and the towers are already down. The owner said to be looking for another site east of St. Paul, "but the feeling around here is that it won't be returning. Property is more valuable than what an AM station is worth."

NV (not "AZ" as shown last month, p. 6, col. 1) KOWA 870 off the air and "will likely remain silent for several months until new owners install their Spanish format. KOWA owner Paul Bowman said to be looking for an FM.

NJ Mount Holly WWJZ 640, a 50-kw station, back on the air after a one-year hiatus, offering music from the '20s through the '40s. NJ Newark WNJR 1430 "has just added Chinese programming to its multi-ethnic schedule," including Chinese opera weekdays 10 to 11 p.m. NJ Toms River WJRZ 1550 still silent, now no longer in phone books, with the former numbers disconnected. A call to WJRZ-FM in Manahawkin elicited the response that the AM station has been "indefinitely postponed." A call to their Toms River office received a similar answer. "Nobody knew anything about it and didn't have anyone there that I could talk to about it. So, with the AM station still not on, and with its phone lines disconnected, it looks like it may be postponed for a lot longer." However, the sign remains on the AM studio building. It was supposed to be all-news, local and CNN Headline, and on the air as of a couple of years ago, "so who knows?"

SC Charleston WUJM 1450 silent

SC Walterboro WALD 1080 silent

TN Crossville WCSV 1490 travel information (had been silent)

TX Denison KDSX 950—the FCC doesn't mention those call letters, but judging from the FCC news release it is the only station which fits the description in the Denison-Sherman market. The FCC titled its release, "Abandoned Radio Station": The Dallas FCC office sent an inspector to Denison TX to check an AM station and was surprised to find that the station was operating completely unattended. The station did not change to its nighttime pattern, had no disc jockey, and no one watching the EBS receiver. Pre-recorded programming and commercials were brought in periodically by an employee, but the station had no telephone or apparent contact point. FCC inspectors finally tracked down the station manager who explained that times were hard and he had to lay off the station's employees. A violation notice is being prepared and further action will be coordinated with the Mass Media Bureau. The FCC noted that "many AM directional stations are not properly maintaining their signal patterns. As a result, FCC inspectors have been randomly inspecting these stations to encourage compliance."

UT Tremonton KNFL 1470 silent, but may "return as a sports station."

WI Oshkosh WXOL 690 now off the air (see July, p. 6, col. 2). "I'm afraid that given the state of the economy, we're going to see more of this. People just can't operate stations profitably, so they either turn off the station and walk away, or even worse, they leave it running and walk away... As businesses move out of town and the K-Marts and Wal-Marts start gobbling up small town businesses, station owners are more and more on the edge and more and more on a thinner margin," said Wyatt Cox of the People's Radio Network, some of whose programs WXOL had been running without permission on an unattended basis without local IDs or commercials.

FINLAND—Lahti Longwave station on 252 kHz shut down by the government for economic reasons and will be replaced by an FM transmitter. "Government also plans DAB tests in the currently unused 104-108 mhz FM spectrum."

"I always look forward to the next issue of FMedia! Keep up the good work."

**FM Rulemakings Proposed**

First date is for filing comments at FCC; second date is for replies. Stations affected, if any, are listed.

- AL Cloverdale 98.7A, Sept. 3, 20
- AL Ider 98.7A, Aug. 19, Sept. 3
- AL Pine Hill 96.7A, Sept. 1, 16
- AK Kasil of 93.7A, Aug. 19, Sept. 3

- SD Madison 103.1C2 for A, KJAM-FM
- TX Pilot Point (move from Denison) 104.9C2, KTCY [NC] WKOC 93.7C
- VA Chesapeake (move from Elizabeth City/ WI Brillion 107.5C3 for A, WEZR

**DX Doings—End of the Skip Season?**

From all across our reading area reports of FM sporadic-E skip reception have come in—from Mexico, British Columbia, Michigan, Quebec, New York, Florida—you name it. Phoenix AZ \*88.3 heard June 27 in British Columbia, but the reporter wasn't sure if KNAI or timeshare KPHF, "no ID to verify," followed by two hours of Tijuana, San Diego and Los Angeles reception. "With our already crowded local dial, there was virtually a station on every frequency. . . DX heaven!" Later, tropo ducting brought FM in from south central OR, and skip July 5 from KS, with Hill City, Garden City and Hays.

FM waltzed into "Lon Guy-Land" from FL June 27 and 30, including WOLZ 95.3 Fort Myers and 700-watt monophonic WJED \*91.1 Dogwood Lakes Estate with ID. "I got the Jacksonville FL area (WJXR 92.1 Macclenny) the same day you did, two hours after you heard WROO 107.3." A person driving north from Miami heard skip from southern MN June 27 and from Midland TX and Durango CO Aug. 1. June 26 Bermuda provided a treat for a Toms River NJ person. "I couldn't believe it! I'm not

too positive on the call letters, but I believe they were 'ZBS-FM'. It was on 89.1 and in stereo. Their format seemed to be top 40 off a satellite. They ran a couple of local commercials and did an ID at the top of the hour." July 14 KTCL 93.3 Fort Collins and KRFX 103.5 Denver reached the Grand Rapids MI area. "All this on a boom box with a whip antenna!" In eastern IL a person has received almost 100 new stations since May 14, including New Orleans, Panama City FL, Norfolk and Washington DC, some of it lasting two hours a time. A Quebec reader has enjoyed FM reception from WHRK 97.1 Memphis, Little Rock AR 94.1 (when it was "K-Lite") and FL, including WOLZ. A Madison-WI area listener picked up Flagstaff AZ and NC stations in early July.

The best reported DX comes from the state of Hidalgo in Mexico, where KUPI-FM 99.1 Idaho Falls was received at 23:31 UTC July 7. "Unfortunately, the Atlas had not arrived yet so I was unable to tune for other stations in the area. However, a shotgun approach produced KRIC \*100.5 at 23:35. . . A rough map check shows the distance as slightly more than 3000 km, so a double hop must have been involved, my first experience with this type of DX. . . I use a 6 element FM antenna, rotatable and with a preamp."

Reception by early August usually settles back to "normal," with only day to day variations in the quality of semi-local and more distant stations, plus occasional tropo ducting that can go well into October. It's a good time of the year for you to scan through the stations you regularly receive and note any program format changes, changes in non-ID or multi-city IDs in use, or stations embracing stereo, and write in and share that information. And if you travel, let us know what you receive or don't receive.

**WFUV Tower Construction Halted Because of Botanical Garden Concerns**

When the new WFUV \*90.7 New York tower started to rise above the neighboring conservatory of the NY Botanical Garden, people took notice. They had not been warned that a 146-meter monster, the height of a 45-story apartment building, was rising just across the street. "Rupturing decades of amicable relations, the battle over the new tower is unusual in pitting one vital New York cultural institution so publicly against another," wrote David W. Dunlap, in the NY Times. Fordham University, WFUV's licensee, must move its antenna from atop Keating Hall to comply with FCC guidelines seeking to reduce public exposure to radio frequencies as a potential health hazard. The FCC construction permit calls for construction on the highest land on the Fordham campus, which happens to be next to the gardens.

Lawyers for the gardens persuaded the NY city buildings department to halt construction after the tower had risen to 66 meters. WFUV claims the tower has to be built, or the station may have to be silenced after 47 years. The tower's initial price tag of \$1.5 million compares to the conservatory's having spent \$24 million for restoration. The conservatory owes some of its grandeur to "its magnificent backdrop of unimpeded skyline." The radio tower, they feel, "mocks the effort" to rebuild and renovate the area around the conservatory with a new visitors' center, restaurant and children's garden. The tower has been described as jarring

and inappropriate, not only for the Botanical Gardens, but for the nearby Bronx Park and Zoo.

Fordham has agreed to compromise and look for a different place in Bronx for its tower. However, if such a site is not found, WFUV's tower will still rise across from the gardens. Presumably, the partially completed structure will remain standing for now. Costs are now pegged at \$2 million to move the tower, plus \$750,000 the university has lost on the unfinished structure.

Thanks to Alex Nardacci for supplying that information. Another reader, Louis J. Sicilia, corrects on one of the statements about the possible sale of WNYC-FM (June, p. 6, col. 3): "WNYE 91.5 New York, at 20 kw, is NOT the most powerful noncommercial station within the city. WFUV 90.7 New York, at 50 kw, has that distinction." Louis says the NY city budget has passed and it does not provide for the sale of WNYC-FM \*93.9.

**Small-Print Happenings and FM Industry News**

The FCC has proposed that persons who qualify for a commercial radio operator license, but have not yet received the license, be allowed to temporarily operate stations. This usually means announcing at small to medium size radio stations where the announcer must also turn on and off the transmitter and enter meter readings into the transmitter log. Comments are due Sept. 1; replies Oct. 1.

In the event you want to file in the above, or any other FCC proceeding, the Commission has stated exactly what format to use. The FCC wants you to use at least 12-point type. Text double spaced and on 8 1/2 by 11 inch paper with printed material not exceeding 6 1/2 by 9 1/2 inches. The FCC's gone metric with everything else, but not in their paper requirements! None of the regular type in FMEDIA is 12 point; the largest (p. 1, top right) is 11 point.

When can you make inquiry of the Commission without violating the *ex parte* rules? Here's how the FCC tries to clarify: "A status inquiry which states or implies a preference for a particular party or position in a proceeding, or which states why timing is important to a particular party, or which in any other manner is intended as a means, direct or indirect, to address the merits or outcome, or influence timing, of a proceeding" is not permitted under the rules. Status inquiries must be limited to a "request for information relating to the status of a proceeding." A loophole involves your favorite congressman: "Any congressional or other communication expressing concern . . . will be treated as a status inquiry . . . provided that no view is expressed as to the merits or outcome of the proceeding; no view is expressed as to a date by which the proceeding should be resolved; and no specific reasons are given as to why the proceeding should be resolved expeditiously, other than the need to resolve administrative delay."

WAMC \*90.3 Albany NY reported \$250,000 in its mid-summer fund drive, setting a record for one day of \$80,000, which is above the \$71,000 one-day total of two years ago, according to Alan S. Chartock, chieftain. More than half that Monday's total was raised 4:30 to 7 p.m., thanks to a \$25,000 challenge grant from former Wall Street investor Stanford Lewis, a parttime resident of Essex County NY.

Classical music and Howard Stern mixing? Not exactly, as some opera fans found out who were watching KOED \*11 public TV in Tulsa OK. WXRK 92.3 NY's morning jock is also on cable's E! Entertainment channel, and somehow his program aired for six minutes, interrupting a concert from Los Angeles featuring Placido

Domingo, Luciano Pavarotti and Jose Carreras. Bob Allen, head of KOED, said "Evidentially, some very distasteful material aired, maybe even vulgar from the phone calls we received." Allen, who is probably not an opera listener himself, added: "It had something to do with Howard Stern and people taking their pants off."

Back in NY State, where Stern is running for governor on the Libertarian Party ticket, he's refusing to disclose his finances. Said an editorial in the *Albany Times Union*, "Ah, the political education of Howard Stern. It's enough to cast his candidacy in a new light. It's a vanity thing, pure and simple. He's playing cute with the rules because he's not serious about winning." A cartoon, entitled "Private Parts," showed Stern with a book "Financial Disclosure" held in front of his crotch. In the next panel he flings his gown in front of the book, and his face sports a frown.

Spectrum fees not going to help ease budget problems and to help pay for the implementation of the North American Free Trade Agreement. House Ways and Means Committee Chairman Sam Gibbons wrote NAB president Eddie Fritts: "We may change the budget rules, but you need not worry about the spectrum fees." The NAB, ever vigilant, quickly added: "While we are comfortable that the spectrum tax will not be proposed as a way to pay for GATT, we do not believe the concept of this spectrum tax will disappear forever."

KNXR 97.5 Rochester MN admonished by Arbitron—for writing in a mailing to listeners to participate in ratings surveys, "especially if you live in Rochester," and to let advertisers know you are hearing their commercials.

Again having trouble with the courts is the FCC. The D.C. Circuit Court has thrown out the FCC's forfeiture schedule. With that done, the NAB is asking the FCC to set aside its EEO guidelines for the same reason, and to vacate all EEO fines rendered thus far.

But those pesky FCC fees are here. For the latest call the FCC Fees Hotline at (202) 418-0220. The fees include FM station, new or major change, \$2335, minor change \$650, hearing fee \$7765, license fee \$135, renewal \$115, call letters new or change \$65. FM translators, new or major change, \$490, renewal \$45, license fee \$100.

Family Stations, Inc. continues to apply for translators across the country to relay its KEAR \*106.9 San Francisco. This is in contrast to head Harold Camping's prediction that in September the Lord is coming and nothing else will matter after that. He says that's when the "saved" will be raised up and the "unsaved" living and dead will be condemned to damnation.

Duopoly news has KQQK 106.5 Galveston-Houston teaming with tejano KXTJ 107.9 Beaumont-Houston. Benchmark Communications, owner of WBBO 93.3 Forest City NC, gets WESC-FM 92.5 and AM Greenville SC. For \$1.1 million, WGCM-FM 102.3 Gulfport MS is being bought by J. Morgan Dowdy, owner of WZKX 107.9-AM Poplarville. KFMS-FM 101.9-AM Las Vegas being acquired for \$7 million by Broadcast Associates, who are buying KRLV 106.5. Just in case two FMs are not enough in the market, they have a sales marketing agreement with KEYV 93.1. WOMP-FM 100.5-AM Bellaire OH allowed to merge with WRKY 103.5 Steubenville OH, even though their ratings total came to 28.6% share. The reason, according to the FCC: Less than 50% of the proposed signal overlap falls within the Steubenville-Weirton-Weirland area.

Emmis Broadcasting (WQHT 97.1) buys WRKS 98.7 New York for \$68 million. Jeff Smuyilan, president, says the similarity in formats makes them a "perfect match." No changes in personnel have been mentioned. Despite EEO objections, the FCC granted the assignment of WHFM 95.3 Southampton NY to Liberty Broadcasting, which also owns WBAB 102.3 Babylon. El Paso's KOFX 92.3 and KSET 94.7 merge under the Magic Media umbrella.

Wanna help spread Jarad Broadcasting's

WDRE 92.7 Garden City NY's modern rock programming? Digi-Net Syndication is offering the 'DRE format to other stations; call (813) 253-4500.

Fined \$5000 for calling a jock at a competing station (KRSP 103.5) without saying he was being taped—KBER 101.1 Ogden. The announcer who committed the dastardly deed is not named, and "no longer with the station." Suing for \$100,000 is former WRFY 102.5 Reading PA announcer Eddie Mitchell. He claims to have been fired because he speaks with an accent. Born in Romania as Emanuel Voda, he wasn't able to shake his accent even though he went to a speech therapist. [Radio Ink, July 11-24, 1994.]

It looks like Spanish for sure on KJAZ 92.7 Alameda CA. The station's having to refund \$1.5 million in contributions from listeners who wanted to keep the format jazz. The "Friends of KJAZ" group failed to raise the needed \$3 million. KJAZ is an institution in San Francisco, "but couldn't break even," according to the M Street Journal.

KUNM \*89.9 Albuquerque is getting close to normal after a period of hostility between the station manager, staff and volunteers. It is, however, without a manager, there have been incidents of "pushing, shoving and rolling around the ground" between volunteers and staffers, and charges have been made about advisory board election irregularities. Charlie Zdravesky, a 17-year volunteer, said "it's certainly not as bad as when there were armed police in the hallways," recalling the Radio Wars of 1987-88. The university administration is concerned about the continuing problems, with rumors they may "pull the plug" on KUNM and merge it with school station KANW \*89.1. The station continues its eclectic schedule, and community support remains strong.

A station with declining membership income is WUSF \*89.7 Tampa, headed by John Young, whose wife Betty is in charge of the Radio Reading Service on WUSF's 67. [July, p. 7, col. 1.] A study commissioned by Dr. George Bailey of UW-Milwaukee pointed the station in the direction of music at the expense of news. Pat Kemp (pictured), whose job as news director

may be on the line, is at odds with Mr. Young and PD Michael Crane. She had been denied the PD position four years ago and has charged management with sex discrimination, according to *Current* newspaper. Bailey's study was attacked as a "means to eliminate local and national news, and silence the dissent and criticism of station management." Bailey analyzed the probable fiscal impact of switching the station to all-classical, all-news or classical/news. "In all three scenarios, Bailey assumes the station will drop its local news," according to *Current's* Jacqueline Conciatore.

In Jacksonville FL unnamed broadcast stations were responsible for the Coast Guard receiving interference to its new communications system. The Tampa FCC office responded—a four-hour drive away. "The FCC engineers, using a spectrum analyzer and cavity tuned filter, demonstrated that the Coast Guard's new system

was not functioning properly and errantly picked up the broadcast signals," according to an FCC release.

WYKL 98.1 Millington-Memphis has decided to jettison its target logo after the Target discount store chain threatened to sue. Expect WYKL to make more of its "Oldies 98.1" slogan.

Cox Communications, besides buying KBCD-KACD (p. 3, col. 1), is one of the potential purchasers of KACE 103.9 Inglewood CA. However, Spanish KMQA 98.3 West Covina also announced it would buy KACE. Any LMA or purchase by Cox will have to wait until litigation is settled. No word on what might happen with simulcast partner KAEV 103.9 Lake Arrowhead CA. L.A. area Class As are merging: KMGX 94.3 San Fernando with KFOX 93.5 Redondo Beach.

WFMT 98.7 Chicago announces plans to build a permanent office and studio at 5400 N. St. Louis Avenue, adjacent to co-owned WTTW \*11. The \$2 million facility will include studios with digital audio capability as well as live performance space. WFMT's lease at 3 Illinois Center expires December, 1995. Despite the move from East Wacker Drive, a WFMT person said "we'll be able to serve our clients just as well. We're not taking a huge leap of [kilometers]. It's not that big a deal."

While WFMT is a commercial station that looks noncommercial, it's not a member of National Public Radio. NPR keeps gaining affiliates, having just signed its 500th station, KUSC \*91.5 Los Angeles, now back in the fold. NPR started in 1970 as a 71-station web. KUSC has three repeaters, which probably help fatten the NPR station count. "Los Angeles's demographics have changed dramatically in recent years [and] we think KUSC will draw new audiences to NPR programming," quipped Delano E. Lewis, NPR president.

Station totals from the FCC: FM 5044, AM 4929, both commercial on air and licensed, while there were (as of June 30) an additional 1697 educational FM stations. FM translators and boosters number nearly 2200.

From the classifieds: Managers needed for several FM and AM stations in the SE. Sales and program experience preferred. Resume to: CEO, Positive Radio Group, PO Box 889, Blacksburg VA 24063.

Engineer/air personality for WFRN-FM and a new FM to be constructed in Kokomo. Knowledge of PComputers, FCC compliance. Operation guided by Christian principles. Dewoy Moede, general sales manager, WFRN, Box 307, Elkhart IN 46515; (219) 875-5166.

High School FM wants to go \$(tereo). Seeking donation of a composite generator/processor; cart equipment; recorders/players; monitors, etc. John Willsback, WMSS \*91.1, 214 Race St., Middletown PA 17057.

General manager, 3 years experience, knowledge of CPB funding, salary \$20-\$25 K. Resume, etc. to KOPN \*89.5 General Manager Search, 915 E. Broadway, Columbia MO 65201. EOE. "KOPN is recovering from the loss of bingo income and redeveloping a strong base of support from listeners and underwriters." It is one of three community stations receiving CPB "Healthy Station Project" grants of just under \$30,000 each. Other grantees: WERU \*89.9 Blue Hill ME, WFSS \*91.9 Fayetteville NC.

FM FORUM

CONTRIBUTIONS FROM READERS

[Continuing with comments from Brian Anastasi in MA about FM vs AM].

This audio fidelity advantage has made FM radio mostly a purveyor of music, with economic forces causing this music to become extremely formulaic and "safe" in order to reach the highest audience possible and, in turn, bring in the highest advertising revenue possible.

Until September,

*Bruce F. Ewing*

 ME Kennebunkport WBQW 104.7, c, "W-Bach," but still not on. "I hear them every couple of weeks, usually on Saturday for two hours at a time. I heard a legal ID once." Sister station WBQQ 99.3 Kennebunk sent back to the drawing board because the local zoning board has ordered removed from its tower a microwave dish, horn antenna, and even a whip-type antenna. The board did allow construction of an equipment building, but limited the purposes for which it could be used, not allowing for paging or cellular companies. A hearing on the WBQQ request for more antennas on the tower might occur as early as this month.  
 MA Turners Falls WPVQ 93.9, k. Although the station is geographically located "strategically in the cusp of Hampshire and Franklin Counties," the "reality is that in all of Hampshire County the station gets overrun by the Hartford CT station on 93.7, and in most of Franklin County the hills make the signal cut out a lot. So they are basically already irrelevant in the local radio market."  
 MA Webster WXXW 98.9: "Finally (after two years) came on the air! Basically, they are a satellite run station, running satellite talk shows from 5 a.m. to 7 p.m., and satellite oldies from 7 p.m. to 5 a.m. and weekends. They use a stict nonID of '98 Double X'... They share facilities with WGFP 940 AM. [The transmitter is on] the side of a steep hill, and while the HAAT is 110 m, it actually works out to be significantly lower than that to the east. Even though I'm only 15 km east [and with WPLM adjacent at 99.1], their signal is only marginal... Recently, while driving down to Willimantic CT I could receive them fairly well onto Route 6 in the Danielson area."

 CO Castle Rock KYBG-FM 92.1 t, mono. The FCC investigated complaints that listeners in

south central Denver were experiencing interference. Station engineers worked for several weeks on the problem without success. The FCC identified the problem as an intermodulation product created within the receivers. "Many different models and makes of radio receivers were found to produce their own interfering signal. . . The complainants were encouraged to contact the receiver manufacturers for appropriate remedies," the FCC said, without identifying which receivers or types of radios worked the best.

- NY Babylon WBAB 102.3 closed on its purchase of WHFM 95.3 Southampton, giving Liberty Broadcasting its first duopoly. WBAB has been carrying commercials from the Reformed Bible Church of Suffolk County (L.I.) saying: "Behold He cometh! The great day of His wrath has come!" The spots graphically notify listeners of Harold Camping's prophecy on WFME \*94.7 of the Lord's coming (which some misinterpret as the "end of the world") some time this month. The church spent "in the few thousands" (paid for in advance) for the ads on WBAB. Few theologians agree with Camping's end-time prophecy. I checked with the manager of a Family station, and he said that the end time prophecy is "Harold's own. The network on Sept. 1 had an announcement that 'date setting is unbiblical and unscriptural.'" The Second Coming, as I see it, will be a loving act, not a "wrathful" one; and something to look forward to, much as the Millerites did in 1844, only to be followed by "the Great Disappointment."
- NY Patchogue WBLI 106.1 has its improved signal on the air—"not quite matching WALK-FM 97.5 also Patchogue—but very close!" [on 89.7
- NY Plattsburgh WCFE-FM \*91.9, not yet/
- NY Southampton WPBX \*88.3, moving from 91.3, but simulcast on the old 91.3 frequency through the end of August "so that it can direct longtime listeners to 88.3 FM." Plans to move tower farther west, perhaps causing interference with WBGO \*88.3 Newark and its "WRMN" 92 kHz SCS.
- OR Nedonna Beach (called "Manzanita" in KOPB advertising) K289-- \*105.7
- OR Ontario K298-- \*107.5
- OR Reedsport KRZ 99.5. It "sure raises havoc with KWJJ-FM Portland in Lincoln City. It's a crime that the FCC is no longer protecting [stations'] secondary coverage. . . I got to listen to KGAL 102.3 in Brownsville. They

were inviting listeners to change over and try listening to KSHO 920 kHz, as KGAL will be changing call sign and format in September."

 IL Chicago CRIS on the 67 of WBEZ \*91.5 was the beneficiary of a "Bye-Bye Blaze" cruise Aug. 10. Tickets at \$12 were available from "Major" Tom Johnson, fired as morning traffic reporter from WWBZ 103.5 when it changed call letters. Johnson, (312) 461-0740, is looking for a job in radio or TV. A San Francisco import, Mancow Muller, has taken over the morning drive show on WRGX. Johnson has been replaced by a character called "Traffic Boy." WRGX proclaims it is 50,000 watts from the top of the Sears Tower. "I don't believe that. FM Atlas only indicated 4200 watts. They are messing with people's minds! Anyway, the ratings are climbing, the SCA is still the same, and the heavy metal format was picked up by an AM station on the North Side—1330 WKTA. Kind of smacks of the old WVVX 103.1 situation of three years ago! Gary Meier of WLUP-FM 97.9 is leaving his solo show. I guess there was a ratings problem. . . I don't understand why Steve Dahl, his old partner on WMVP (old WLUP AM), hasn't gotten the axe. That station has fallen to the bottom of the ARBs as a sports station to 2.5 to 0.9. They were the ones who dumped Howard Stern last year. Even Howie had ratings!"

- NY Clifton Park WWCP 96.7 tU, 92. "The station has a great signal, covering all of

Albany, Schenectady and Troy. No subs as of yet, just transmitter data on the 92." NonID: "WDRE" (from "Capitol FM").

NY DeFreestville W226AC \*93.1 tC,U as on main station. Now it is like virtually all other translators, which preserve the same SCS components as their primaries.

NY Loudonville WVCR \*88.3 tU, 67  
 NY New York WSKQ-FM 97.9 Radio Soleil back on (tH), 67. Had tX during part of the interim; retains tO, 92, NonID (main channel): "Mega-Noventa y Siete punto Nueve." Former Haitian pirate on 87.9 was run by Samuel Menager, Menager Productions, 90-29 198th St., Hollis NY 11423, as shown in the new Queens phone book. "That's the same guy because the phone number listed, (718) 740-8245, is one of several given on the air when Radio Centrale was on. One Queens pirate still on the air is 'WJQR' (now using the nonID 'Nasty Radio') which is more obscure than ever, and now on several times a week for 1-2 hours at a time in \$ on 91.9. Their 'Snatch Line' for requests is (718) 422-6519, just an answering machine."

WCBS-TV 2 has a simulcast of the main channel on possibly the Pro channel, as its setting is different from other local TV stations' SAP. "During local newscasts you can hear conversations between the studio and field reporters."

WABC-TV 7 a silent SAP carrier. LPTV channel 38, licensed to Long Island City, "t as continuous Haitian and Caribbean music, no announcements on itSAP. This is the same music that has been on the SAP of co-owned LPTV channel 44 Mineola NY (licensed to Hicksville NY)."

"When you hear SCA data noise at 57 kHz, I think you are sometimes too quick to assume that it's RBDS instead of Cue Paging, which has been in widespread use a lot longer. . . In any event, I question whether John Q. Public will really want to see a flashing message scrolling across his dashboard while trying to drive, or that 'flawless signal changing when traveling from one area to another' is of much benefit to the average user." But as I say in my article in the September, 1994 *Monitoring Times* (pp. 26-27): "A few [stations] make use of 57 kHz for Cue paging and Selko data, which will merge with the national RBDS standard." Indeed, broadcasters have been cautioned against giving companies like Cue paging the entire 57 kHz channel. They are urged to reserve some of that space for station promotional purposes which are compatible with RBDS. Most of the stations reported above with t() are for RBDS, and based on sales of RBDS encoders to stations.

"I did enjoy reading thru each issue, but it is not really my field, and while most interesting and represents a great deal of work on your part, it is better not to waste a copy." [good work!  
 "I look forward to the next FMEDIA! Keep up the/ "I think you should try to steer your ethnic SCA radio customers toward the Superadio with the separate Elf-III adapters, because no other portable has as much SCSensitivity combined with good sound (plus high fidelity sound on the main FM band). I can get all three Haitian services on that radio, but most others won't get Radio Verite on the 92 of WSOU South Orange NJ. . . Thanks for never printing my name."

**AM Happenings Most Likely Caused  
 by FM**

AZ South Tucson KMRR 1330 silent  
 FL Immokalee WZOR 1490 silent  
 FL West Palm Beach WEAT 850 is at the  
 "bottom of the list (Arbitron) with a .4 and a  
 median age of over 70! Just to compare, WRLX  
 92.1 has a median age of over 67 and they were  
 No. 2 in West Palm Beach!" Now "New Radio  
 8-5-0" has dropped its simulcast with "Sunny  
 104.3 FM."  
 IN Decatur WADM 1540 back on air as a  
 simulcast of WNUY 100.1 Bluffton IN. "The  
 1540 facility had been silent for more than a  
 year."  
 IN Huntington WPDJ 1300 "is again in financial  
 straits, begging listeners to send them contri-  
 butions to keep this commercial station on the  
 air."  
 KY Gray WKYZ 1590 silent.  
 KY Russell Springs WIDS 570 silent.  
 ME Monticello WREM 710 back on air with talk  
 and an LMA with WEGP (AM) Presque Isle  
 MA Boston: A series of music-chair type moves  
 wipes out WHDH 850, which becomes WEEI,  
 while former WHDH personalities wind up on  
 WRKO 680. A new business station will emerge  
 on 590, WBNW. WBZ 1030 AM's chief Ed  
 Goldman "decried the sharp decline of AM radio  
 in general" and said of the changes, "I'm their  
 only competitor, not their main one. I don't see  
 a difference, other than a higher frequency and

more power. It's the same stuff reheated." A reader in Worcester: "The nighttime signal of WEEI 850 is nothing to write home about. It's highly directional, protecting areas to the west and southwest. Even at only 30 km away, the signal is almost unreceivable at my location. . . The switch to 680 is probably a good move. Even though WRKO has a similar nighttime pattern, its signal appears to be somewhat stronger and suffers from less co-channel interference at night. Perhaps WRKO should consider working out an agreement with some of the stations it protects, similar to the one proposed by WLIB 190 New York and WOWO 1190 Fort Wayne IN. Do any of your readers know of related changes on the Boston FM dial?"

MI Detroit WWJ 950 no longer calling self "Newsradio 95." Now "Newsradio Nine-Fifty." "Guess they didn't want to lose any of their ratings to WKQI 95.5."

MO California KZMO 1420 silent, but FM on 94.3 remains on air  
NH Manchester WKBR 1250 back on after two years silence with "m," but the station is believed to be for sale.

NJ Mount Holly WWJZ 640, a 50 kw station, back on air "offering music of the '20s, '30s and '40s, after a year's hiatus" (July, p. 6, col. 2).

NJ Newark WNJR 1430 with 40% of its schedule produced by Radio Nueva Vida, a conservative Christian organization (Spanish). "The rest of the time represents 10 ethnic groups." Like many small town stations it has a Sat. 1 a.m. to noon auction, with goods and services bartered for air time.

NY New York WKDM 1380—sale to owner of WNWK 105.9 Newark "dismissed by the FCC. However, program changes for both stations have taken place. Most of WNWK's non-music and ethnic shows, other than Caribbean and Spanish, have moved to WKDM. WKDM studios have been relocated from the transmitter site in Carlstadt NJ to the WNWK studio at 449 Broadway in Manhattan. Evidentially, Multicultural Broadcasting is leasing the WKDM facilities."

ON Huntsville-Parry Sound area. Several years ago 103.3 was applied for as an FM companion for CKLP AM. "The application was successful and the FM transmitter went on the air," later upgraded to 50000 h.v. "Ontario enjoys 10-11 percent ground conductivity—generally speaking, that's what stations down through Toronto, Hamilton, London and Windsor all enjoy. But up north, the ground conductivity is less than 1 percent. So AM radio is not really practical through the Pre-Cambrian Shield area, because of all the rock. FM undoubtedly was the most practical way to go." CKLP has gone on to win acclaim, "particularly through the station's strong presentation of news," writes Phil Stone in "Broadcast Technology" magazine, in a tribute to Bob Bowland, CKLP President.

ON Toronto CFRB 1010—for the first time this perennial ratings leader has been toppled from No. 1, bowing to CHFI 98.1 in the spring BBM with a total audience (12+) of 988,300.

RUSSIA—longwave station on 261 kHz "suddenly disappeared from the air." It was the country's most powerful transmitter. Left because Radio Rossi did not pay its electric bill. NY Chateaugay 94.7C2 for A, WYUL

TX Dublin—rescinded 93.1C3

TX Marlin 92.9C2 for A, KEYR

### FCC Resumes Processing FM Applications, Opens Filing Windows, Won't Collect \$6070 Hearing Fees

In light of being handed a defeat in the Selbyville DE 97.9A (WSBL, B-98) case, better known as Bechtel v. FCC, 10 F.3d 875 (D.C. Cir. 1993), the Commission has decided not to appeal. The freeze announced Feb. 25 is being lifted, at least in part. Effective immediately, the FCC has resumed processing of applications for new stations, applications for major modifications and upgrades. Requests for rulemakings for commercial FM (and TV) channel allotments are again being heard.

The FCC is opening new FM filing windows in the same manner as before the freeze. "We will suspend processing only of those applications that are or become mutually exclusive with other applications. However, if all mutually exclusive applicants submit a settlement proposal, we will take whatever further steps may be appropriate to effectuate the settlement. All applicants should be aware that when processing is precluded because mutually exclusive applications are filed, all applications and application fees will be retained by the Commission until resolution of the issues raised in Bechtel permit the Commission to take further action.

"Window filing periods that were suspended by the Feb. 25 freeze announcement will be reopened for a full 30-day period by future public notice and by publication in the Federal Register. New thirty day filing periods will also be published for previously announced filing windows commencing after the Feb. 25 freeze order. Applications already filed during a suspended filing window will be considered filed in the reopened window.

"Hearing fee requirements have been suspended. Thus hearing fees due on any date after Feb. 25 should not be submitted." Decisions will be made by the FCC only in cases where consideration of the applicants' comparative qualifications is unnecessary to resolve the case, and appeals entertained only of such decisions. Parties involved in such cases should not file or respond to motions to enlarge the issues, "except in those proceedings in which consideration of the applicants' comparative qualifications is unnecessary to resolve the case. . . We reaffirm that during the freeze, although we wish to encourage settlements, limitations on reimbursement and other current policies regarding settlements remain in place." In cases where construction permits have been challenged, owners are not permitted to build, since the outcome of the grant may be changed, depending on how the Commission is able to handle comparative hearings if and when the Bechtel issues are resolved. "Permittees who have commenced construction are advised that further construction is at their own risk and that, in any event, they should not incur additional

obligations directed toward construction or operation. Where program tests have already commenced, operations may be continued so as not to deprive the public of existing service. However, any application for license to cover a construction permit will be held in abeyance until the issues raised by Bechtel are resolved."

### Small-Print Happenings and FM Industry News

Citizens who tried and tired of keeping classical on 104.3 in NY as WNCN have been paid off by GAF Broadcasting to the tune of \$110,000. This clears the way for the FCC to grant the renewal application of WAXQ, "subject to final Commission disposition of a staff inquiry into WAXQ's EEO program and practices." Under terms of the agreement, Listeners' Guild will withdraw all its pending court and FCC actions. GAF will pay the Guild \$110,00 and grant authority to the Guild to use the WNCN Listeners' Club mailing list for a maximum of two mailings per year for two years. Guild, however, demonstrated expenses of \$280,000 in its fight to keep 104.3 classical.

WFUV \*90.7 New York is asking listeners to write or FAX Mayor Giuliani and say that the station should remain on the air.

Howard Stern has made it official: he's withdrawing from the NY governor's race. That comes on the heels of his refusal to file financial disclosure forms. Besides feeling his income is nobody's business but his own, there were "special circumstances" concerning his contract with Infinity Broadcasting that forbids his mentioning his salary on the air. He bowed out over the air in his typical vulgar style, "If you want to know how much money I make, screw you." Not mentioned on air as another reason for his withdrawal was the Libertarian Party candidate is that he'd have to quit his show in NY media markets unless other candidates received equal time. Party insiders were bitter, hoping he would have stayed on long enough to get 50,000 votes to give the party a permanent ballot slot in NY state.

The show is looking for college student interns in the NY city area. One intern, "Stuttering John" Melendez, started unpaid in 1986 and worked his way up to his current \$40,000 position as the show's celebrity interviewer. Those interested send resume and a cover letter to Cathy Tobin, % Howard Stern Show, 600 Madison Ave., New York NY 10022.

The FCC sent a warning letter to twin brothers in Kaneohe HI who were running an unlicensed station on 107.3 mhz. They used a mobile direction-finding vehicle to locate the station.

As of September 16 group owners who are at the current limit of 18 FM and 18 AM stations can file to increase their holdings to 20 stations in each band.

The FCC may, in a couple of years, be transacting business from an address it doesn't want. It lost a court battle to have cancelled a 1992 contract to move to a business/apartment development in S.W. Washington DC known as The Portals. The General Services Administration found the spot, near the Potomac River and Washington Monument, but away from lobbying offices like the NAB and INTV, without consulting Commission personnel. The U.S. Appeals Court found evidence that the FCC had a "campaign to scuttle" the move.

A reader mailed a 1994 subcarrier report by the NAB, conducted by Kenneth D. Springer, digital communications engineer, and Mark R. Fratrik, VP-NAB Research and Information Group. It showed that 47% of FM stations in the top 10 markets had leased a subcarrier, compared to 35% in markets 11-50, down to 16.5% in unranked markets (those considerably below the top 100). The percentage of stations with two subcarriers leased fell from 17.5 for the top 10 down to 10.2 for markets 51 to 100.

Average monthly lease price was \$4992 in the top 10, down to \$1160 in markets 101 and below. Companies leasing subcarriers were Cue Paging (26% of stations reporting that leased subcarriers), Muzak 22%, Comcast 2%, Data Broadcasting Co. 2%, others 48%. Frequencies of subcarriers leased: 67 kHz 93 stations; 57 kHz 49 stations, 92 kHz 48 stations reporting.

Factors limiting the market for FM subcarriers were: No buyer interest 55.2%, station not interested 25.4%, not enough \$ offered 9.7%, already using 26.4%. Stations planning to broadcast RBDS data 42.1%, not planning 41.5%, don't know 16.4%.

Canada's CBC is looking for a head. Four months before his term was up Patrick Watson resigned as chairperson, to return to his career as a writer and broadcaster. Tony Manera, named president earlier this year, has taken on the added duties of chairman. Watson was criticized for his performance, but he fired back that the critics "haven't done their homework," noting that CBC budget cuts had already been decided by the Mulroney government when he was appointed. He saw his job as trying to keep the CBC afloat and prepare it for new challenges. Watson claimed he wasn't consulted on 15 appointments to the CBC board by Mulroney. "There was a constant sense that this was a government that did not like the CBC. They looked on us as the enemy," Watson is quoted as saying in *Broadcast Technology*.

WFMU \*91.1 East Orange NJ may have to find new offices and studios if parent organization Upsala College closes its doors. The station, 95 percent listener-funded, "is in dire need of funds to cover the cost of the license purchase, the transmitter move and the possible [studio] move," writes Carmen Juri in the "Newark Star Ledger." Since WFMU is already independent of the college, it won't have to be auctioned, said station manager Ken Freedman. The station is still fighting to keep as legal an engineering error that found them with too much altitude and causing interference to other nearby public FM stations, notably WFUV \*90.7 New York, WSHU \*91.1 Fairfield CT and WKTW (now WVNJ) \*91.1 Dover Township NJ. [March, 1990, p. 7, col. 1.]

The FCC mentions a Lincoln NE FM station carrying illegal commercials for a keno. The station provided the FCC a FAX copy of the ad. The games were not run by the state or other government entity, so the FCC prepared a news release clarifying the rules about such games to the NE Broadcasters Association. Station involved was not identified.

Classical DJ a fugitive after slaying of his wife. That's Ben Jones, a former music host on WUSF \*89.7 Tampa FL. Police say Jones pulled his estranged wife, Lisa Jane, from her car in a

Once a popular host at WUSF, Jones was separated from his wife and is now charged with killing her.

K-Mart parking lot in Wilkesboro NC and shot her several times in the head. Before driving off, he fired shots at witnesses. "It was a pretty horrendous crime," says Wilkesboro Police Chief Gary Parsons. The FBI has charged him with interstate flight to avoid prosecution. The Welsh-born announcer held the afternoon shift at WUSF from 1988-90. "He was extremely good on the air. We still get calls about him—'Where's Ben?' they ask," said Connie McDonnell of the

station. [If you still have the May, 1990, FMedia! you'll see p. 7 is headlined, "Be An Announcer: Collect Thousands From Just One Listener!"] The story mentioned that Ben Jones had threatened on air to quit and go to New York city to improve on his \$17,000/year salary. A listener supposedly paid Jones \$30,000 a year for the next eight years to entice him to stay. His \$30,000 deal caused jealousy among other staff employees who were not offered money to stay, and had not pleaded their financial needs over the air. Turns out the \$30,000 offer was a hoax.]

Jones was fired in 1990 after management found out he hadn't graduated from the colleges he claimed to have attended. Jones, his wife and daughter, moved to Richmond VA where the couple separated. Jones apparently failed to find work after leaving WUSF. He applied for a job at WCVE-FM \*88.9 Richmond, according to "Current" newspaper. He put in a "mesmerizing" appearance at the station, but "several of us at the time said there's something wrong, something dark, a dark side," said Kaye Elliott, WCVE-FM's program guide editor.

When I was in Little Rock June 6 KOUN 102.1 Sherwood AR was just signing on in stereo. It was a stormy week, with transmitters coming and going all across the Ozarks. KOUN's power has been only 75 percent of what it should be. "First, the station's debut was delayed by the truckers' strike when its transmitter couldn't make it to Arkansas. Then, when it finally went on the air June 6, storms hit and the station was back off," after only one day. KOUN returned, but is cursed with pockets of poor reception, including an area in the west part of Little Rock where another station's music is "blending with KOUN's."

Duopolies making news—KZDG 92.5 Greeley CO being comboed with Shamrock's KXKL-FM 105.1 Denver for \$5.5 million. WDBR 103.7 Springfield IL acquiring WESZ 93.9 Lincoln IL for \$750,000. KATT 100.5 Oklahoma City enters into an LMA with KYIS 98.9. KTXV 106.9 Jefferson City gets KZMO-FM 94.3 California MO, sans the AM station. Rex Broadcasting, owner of KIIM 99.5 Tucson, acquires KCRZ 107.5 there. WNKI 106.1 Coming NY acquires WQIX 100.9 and AM Horseheads NY for \$1 million. Norm Alpert sells WISP 98.7 Holmes Beach FL to Entercom's WYUU 92.5 Safety Harbor for \$3 million. WRKU-FM 95.1 Grove City PA-Youngstown OH is being purchased by Zapis Communications of Cleveland (WZAK 93.1), owner of WHTX 95.9 Sharpsville-Youngstown (OH)-Sharon PA.

"Do you have an e-mail address?" asks a reader. Not yet, but we do have FAX. Just call our regular line, (218) 879-7676, and I can take FAXed station information and other documents. A new FAX number will be announced later.

Broadcast totals from the FCC: AM 4925, FM (92-108 mhz) 5055, FM (88-92 mhz) 1707, with FM's lead (commercially licensed and on the air stations) over AM now at 130.

From the classifieds: AM-FM combo for sale, Miles City MT, KMCM 92.5 100000 h, v; KTMA 1050, 10000 watts day, 136 watts nites, terms available. Paul Ballin, (612) 222-6555.

Seeks program director. Resume, three references, audition tape to general manager, WOJB \*88.9, Route 2, Box 2788, Hayward WI 54843.

Nonprofit station seeks tax deductible donations of reel to reel or cassette decks, CD players. S. Kutzko, WEFT \*90.1, 113 N. Market St., Champaign IL 61820; (217) 359-9338.

Cassette tape catalog of our radios and electronics devices. Meant for the blind, but you can get a copy for \$2 postpaid. FM Atlas, Box 336, Esko MN 55733-0336.

FM FORUM

CONTRIBUTIONS FROM READERS

[Here are more comments from Brian Anastasi about FM vs AM]

This brings us to AM, which, believe it or not, is still with us, and still has a very

respectable audience in many of our larger cities. Because of its poorer audio fidelity, AM cannot ever hope to reach the huge numbers of people that FM can. AM can reach other demographic markets with news and information, sporting events and talk formats that people with real needs. There is nothing on the FM radio dial any more that interests me. This even goes for the so-called "noncommercial" end, which is becoming as formulaic (boring) and commercial as its commercial brethren. Even most NPR stations are gravitating toward the combination of news and classical music programming, attracts opulent donors.

On AM, however, I can get traffic and weather every 10 minutes. I can call up a program and tell people I have a car for sale, or I can talk to any number of interesting guests on talk shows. Even though Rush Limbaugh infuriates me, he still stimulates me in a way no over-researched music format on FM radio ever could. AM is not the only medium I listen to, but it is the only medium I participate in, both as a listener and as the host of a weekly public affairs program.

Radio in general needs to prepare for the coming massive fragmentation of audience that this so-called "information superhighway" will be bringing. I think both AM and FM need to begin to come up with new ways to better serve smaller segments of the population. CNN and MTV revolutionized the television industry by going after what were, in the beginning, very small segments of the population, and radio could learn from their success. I think FMedia's blatant cheerleading for FM and continual AM-bashing is not only counter-productive, it could actually help bring the industry down as a whole. I really do appreciate all your dedication and hard work in putting out FMedia! and the FM Atlas.

An easy-to-install indoor FM antenna featuring a tuned RF section and L-E-Ds is available from Terk Technologies. It's called the "Q," and is a flat panel with a series of lights that indicate the part of the dial being amplified. It sells for about \$100. I have no experience with the unit, but its controls and L-E-Ds sound intriguing. You might want to check it out at a dealer handling Terk products.

Phil Eoersma sent a story about WKEZ 96.1 Holland MI merging with WCUZ-FM 101.3 Grand Rapids. "WCUZ is run by a very 'boomer'-obsessed company." With Harold Camping predicting the Lord's coming this month, Boersma muses: "What percentage of Family Stations' audience put stock in his predictions? If the answer to the above is a 'large percentage', will Family Stations' finances crash after September when he's shown to be wrong?" [Staff members have made a great effort to distance themselves from Mr. Camping's end-time prophecy, going so far as announcing over the entire Family network Sept. 1 that date-setting is unbiblical. Planning for expansion, including translators, continues at Family Radio. I am sure there will be no long-term negative problems for the organization.]

Until, hopefully, October,

*Bruce F. Elving*

"Although most of this comes from my fellow subscribers, can we knock off the bashing of program formats which we may not like? Everyone is different, and has different tastes, and that's good, but it doesn't mean that anything we don't like is worthless, and regardless of whether or not we all even agree on that, this detracts from FMedia!"

**On Air (Selected)**

FL Tampa WUSF \*89.7—its news department has a \$250,000 budget, according to Pat Kemp (Aug., p. 8, col. 2). Her job continues, but she's planning to quit in nine months and go back to school; she will have had 10 years in, enough to qualify for pension benefits. She does not believe George Baily, consultant who urged the station reduce its news offerings, visited the station in person. "It was flawed research," she contends. Kemp also says murderer Ben Jones has not been found (September, p. 8, col. 1).  
 FL Winter Park WLOQ 103.1 with C3 facilities—14000 h,v; 134 m, but saying "25000 watts"  
 GA Hogansville WEIZ 97.5, not yet having moved to 98.1  
 ME Harpswell WMSJ \*91.9, but relying on volunteer help; has only two paid employees. "Karen is also helping out with some computer work. . . She is working diligently (and if we can get funding for her position we will actually pay her). . . Do you believe that 'the worker deserves his wages?' (Luke 10:7)?" Plans to quadruple its power, but still has no heat and winter's coming—their second winter! Their former engineer says WMSJ has its "priorities a little mixed up; they put on concerts they have to pay upfront, get new bumper (or as they say in Maine 'bumpah') stickers, send people to the NRB conventions, but can't buy a furnace to heat the studio! Can't pay the workers now but want to add others to the payroll. Too bad they don't get moving on the new frequency and coverage which will perhaps quadruple their support."  
 MD Baltimore—tunnel radio on I-95. "I was driving through the Fort McHenry Tunnel and noticed that on both AM and FM you could hear a traveler's information message on all frequencies—presumably a leaky cable antenna broadcast on I.F. frequencies. I've heard this before on AM—but never on FM."  
 MD Catonsville-Baltimore WQSR 105.7: "Their 50 kw really gets out. . . Whatever they are doing technically, they are doing it right. They have a personality-oriented oldies format." ["test authorization"  
 NJ Harmony Township W245AC \*96.9, with/  
 NJ Newark WHTZ 100.3 now claims "digital stereo." "It is so loud now that it looks like a nicely formed unchanging rectangle on a spectrum analyzer. Their station sound is now almost as listenable as an over-modulated tone! I thought loudness was an AM radio trait. . . Who will be the loudest DAB station?"  
 NY Middletown WOSR \*91.7, "and now buries WXCI Danbury CT here" in S. NY state.  
 NC Roanoke Rapids WZRU \*88.5, having a trade-out with the local paper. They do a live news report and the station gets advertising space. "A win-win for both!"  
 OK Lawton KZCD 94.3, not yet on 94.1  
 PA Glenshaw W254AF \*98.7, now seeking 98.5  
 PA Pittsburgh WPTS \*92.1, from 98.5, making the Glenshaw application possible  
 TX Irving K213BP \*90.5. "It puts out a great signal. I get good reception at my home in northeast Dallas." Translator list read at 9 a.m. weekdays and 1 p.m. weekends.  
 VA Lynchburg WVMC \*90.9, the student station affiliated with WRVL \*88.3, uses automation for periods when students aren't around.  
 WI Ashland WBSZ 93.3, power reduced temporarily to 71000 h,v to try to alleviate interference to several public radio stations, believed to be WOJB \*88.9 Hayward, WHSA \*89.9 Brule, KUWS \*91.3 Superior and

WSCD \*92.9 Duluth. Bob Olson, who lives .6 km from the WBSZ tower, and 11 other citizens, filed complaints with the FCC asking it to resolve local reception difficulties. Meanwhile, local public radio fans are discussing how they might raise \$15,000 for a translator for one or more of the affected stations. "It's pretty frustrating," said Wayne Griffiths, who has listened to public radio for nine years. "There are mornings I could throw rocks at the receiver."

ON Cobourg CFMX 103.1, along with CFMX-1 96.3 Toronto, announcing CFMX Toronto 96 and 103 east of the city. "Here a relay takes over the role of the main transmitter. I note that you still have CFMX 103.1 as the main station and the Toronto outlet CFMX-1. Technically you may be right, but in a commercial view, the horse and carriage have been reversed."

"Coupon Radio," designed by David J. Alwadesh of NY city, is a system where a radio with a special slot allows for the insertion of a credit card for instant verification of special prices during a commercial. The technology would use 57 kHz, and is being pitched to Delco/General Motors. However, a Denon spokesman is skeptical. "What's the difference between that and a disk jockey announcing to listeners to go into a store and say 'spaceman' to get a 10 percent discount? It's the same thing." Coupon-capable radios would cost about \$20 more than standard RBDS radios. "I have enjoyed your 'Catalog No. 12'... I have neither need nor room for another radio receiver, but it's well worth it to me just to know what is going on at the cutting edge of your fascinating special interest."

**FM AS IT WAS—OR MIGHT HAVE BEEN**

A trip through the August, 1943, FM Radio-Electronics revealed several interesting ads and articles. The cover feature is about Paxton MA, and the caption next

**THIS MONTH'S COVER**

Paxton will always be known in the history of the radio art as the first commercial FM broadcasting station. Here is dramatic proof of the progress fostered by free enterprise in our United States. This station stands as a monument to the everlasting credit of John Shepard, 3rd, who financed it, to Paul de Mars who engineered it, and to Major Armstrong who, successfully overcoming static and eliminating inter-station interference by the use of Frequency Modulation, employed a system which mathematical physicists had previously proved to be inoperable.

to the picture should be readable.

The magazine had a roster of broadcast station chief engineers, "spot news notes" and an article by publisher M. B. Sleeper on the need for better receiving antennas. Sleeper criticizes Armstrong for not insisting on better aerials for FM sets: "Even Major Armstrong has, on various occasions, discounted the importance of the antenna in FM reception, stating that practically any kind of a wire is adequate. On the other hand, he has urged the use of a stage of tuned RF to assure a signal adequate to operate the limiter. [There are] headaches to 'no-antenna' sets. The fact is that while some listeners in favorable urban and rural districts are fortunate enough to have good reception from built-in antennas, they are the exception, and not the rule.

"As for FM reception, results depend directly on the signal fed to the set by the antenna. If the signals are adequate to saturate the limiter, results are perfect. If they aren't interference rides in. An outside antenna can be improved by increasing the height or changing the construction, but a loop must remain just as the manufacturer made it. . . Discuss the subject with the chief engineers of some of the broadcasting stations. You will probably find that they feel very keenly on this matter because built-in antennas are the chief cause of complaints

from listeners about weak reception, and interference from static, and dissatisfaction with program quality."

Dr. W. R. G. Baker of G-E is quoted from his speech at the Milwaukee conference of the FMBI: "It is of paramount importance that the FM receiving sets produced after the war be of a high-performance type [but] to satisfy the public, they must be able to bring in programs loud and consistently, without the use of special antennas. The set owner of today has become used to a radio with a built-in antenna, and the best salesman in the world is not going to be able to make him climb up on the roof and string a lot of wires around. Good sets, of eight tubes or more, and a strong station signal must be provided." I think history has proven Baker, not Sleeper, to be correct.

In "spot news:" Effective Nov. 1st all FM broadcast stations will replace their present frequency-indicating call letters with standard 4-letter calls. This decision, announced by the FCC on August 24th, is in response to a formal petition by Walter J. Damm, president of the association. In the case of an FM station owned by an AM licensee, when both transmitters are in the same city, the call letters of the AM station, followed by "FM" may be requested by the FM station.

W45CM 44.5 mc Columbus OH is planning for the day when commercial operation will be viable on FM, and is preparing some ad copy for postwar selling. The station will give time to advertisers free in order to try out the commercials.

Walter J. Damm, mentioned above, was president of W55M 45.5 mc and WTMJ AMilwaukee, and the trade group FMBI (FM Broadcasters, Inc.?). He was to represent FM broadcasters in the Radio Technical Planning Agency. It is interesting that he presided over the 1950 deletion of WTMJ-FM, which by then had moved to 93.3. It was to remain off the air until coming back as a much lower-powered station on 94.5 in 1959 (now WKTI). During the 1949-50 period I often heard WTMJ-FM, booming out with over 300 kw horizontal effective radiated power, in Duluth MN and Hancock MI, using FM radios with built-in aerials.

Dr. Baker of G-E is quoted in another part of the magazine: "FM is so much better technically than the present regular broadcast system that it can't fail of acceptance." Unfortunately, FM did fail for a few years, as shown by WTMJ-FM's early demise. That deletion attracted the attention of hundreds of FM station owners, and was probably the singular most telling event resulting in the turning back to the Commission of at least 500 FM station licenses and construction permits for unbuilt stations. A few years after that the massive Paxton FM transmit-

ter, WGTR 98.1, also folded. In 1950, as a high school kid, I visited the manager of WEBC-FM 92.3 Duluth, W.C. Bridges, after hearing rumors the station would be taken off the air. I urged him to reconsider, saying the best sound quality was on FM. He said the money is in AM, and besides, the Milwaukee Journal had just taken its FM station off the air. [The history of WEBC-FM and its previous experimental operations were the subject of a three-part article John Ebeling and I wrote for Radio World newspaper a few years ago.]

Robert T. Bartley, vice president of the Yankee Network, and active proponent of FM broadcasting, has resigned his post in Boston to serve in an executive capacity with the National Association of Broadcasters, under president Neville Miller. Bartley later went on to become an FCC Commissioner.

New York's municipal FM station W39NY \*43.9 mc, after seven months of test operation, is now on regular schedule, 5 p.m. to 10 p.m. daily. Part of the programs will duplicate WNYC AM, "but W39NY will continue to feature live programs from the concert halls. Reports indicate the contour of dependable coverage runs through Ossining N.Y., Princeton, Bloomfield, Elizabeth, East Orange, and Sea Girt N.J., and Riverhead, L.I. The last-mentioned point is significant because, long before Riverhead, reception of most New York AM stations is weak, and badly cut up by heterodyne whistles."

The Constitution Publishing Co., Atlanta, has applied for reinstatement of their FM application. Its application was bogged down in the FCC's newspaper inquiry. "If it had not been for this delay, their station would have been on the air long before Pearl Harbor, and listeners in their area, where AM receiving conditions are poor, and static is bad, would be enjoying FM reception now."

The Blue Network, which later became ABC, is planning future FM outlets in New York, Chicago, Washington, San Francisco and Los Angeles. "Under present FCC rules, the company is limited to the ownership of six FM stations."

Some of the advertisers in the 1943 FMagazine were Lingo antennas and Scientific Radio Products Co., producing tiny crystals for radio equipment that are putting "ants in his pants." A cartoon shows Hitler jumping uncomfortably in front of a factory. REL, Radio Engineering Labs, takes credit in an ad for building the 50 kw FM transmitter at Paxton MA, W1XOJ. "In fact, every 50-kw FM transmitter now operating in the U.S.A. is of REL manufacture. Today, in combined power output of FM broadcasting stations, REL leads all other manufacturers by a substantial margin. REL also made the famed "REL Precedent" FM tuner of the late 1940s and early 1950s.

General Electric advertised its full line of FM equipment, and pictured was a circular, horizontally polarized single bay antenna for W47NY 44.7 mc, Muzak Corporation, NY. It looked to be side mounted at the top of a building. Fred M. Link, engineer-manufacturer, took out a full page ad to promote his system of FM police radio. Pictured was a map of Connecticut and how his system effectively covers that state.

So ends our journey through a 1943

locked into a rigid program format from the outset, with hardly a reference to the fact that the station is new. Clarke writes: "This tape comes from a collector in New Hampshire. If you wish to give him credit in FMedia! here is his name and address:

Ed Brouder  
Man from Mars Productions  
159 Orange Street  
Manchester NH 03104

"You mentioned the 'prehistoric' WKBH-FM La Crosse in your July issue. According to my 1947 yearbook published by Radio Daily, WKBH-FM is listed as a CP on 92.1 mcs with 40.2 kw of power, a formidable amount for that era. I don't have the 1948 yearbook. In the 1949 book, WKBH-FM is listed as on the air, on 93.1; a typo, perhaps? In the 1950 book, the station is already gone."

As this journey through the pages of yesteryear winds down is mention in the Pavk Museum of Broadcasting Newsletter of Minneapolis' WPBC 980-WPBC-FM 101.3, which was run by the Stewarts--Bill and Becky Ann, from 1952 until the stations were sold some 25 years later. They'd say to tune in "near 100" on AM or FM. Before selling, they re-engineered the AM to broadcast at night from a site near Richfield, and as a result the FM was re-licensed from Minneapolis to Richfield MN, where today it is KDWB.

VOL. 3 AUGUST, 1943 NO. 9

## New FM Agreement With Mexico

The United States and Mexico have begun implementing a new FM Agreement, which replaces an accord signed in 1972. It affects all FM stations and proposals within 320 km of the border. The technical criteria adopted under this new agreement offer additional flexibility over those which were specified in the 1972 pact, and were negotiated in an effort to bring them more in line with the current domestic rules.

"Because of the additional intermediate station classifications (which include C1, C2, C3 stations), the new FM Agreement will afford numerous U.S. FM stations in the border area, including those short-spaced to Mexican FM stations, the opportunity to upgrade their facilities," the FCC said.

## Small-Print Happenings and FM Industry News

In-band digital audio broadcasting made a quiet debut in Chicago, during months-long testing on a signal buried in the analog emissions of WBBM-FM 96.3. When I was in Chicago, I noted the 57 kHz SCS of WBBM-FM and my young passenger saw to it that we listened to the urban sounds of their main carrier! Nothing unusual was noted in hearing the station, both main and subcarriers. Apparently, the testing went well, with no complaints from listeners or advertisers.

magazine I bought at a flea market in North Little Rock AR in June.

In other historic news, Frank Merrill sent a copy of a 1948 collect telegram, authorizing WNEK-FM 96.9 Macon GA to begin equipment tests. He wonders if I might have DXed that station in the early years, but the only Macon FMs to have skipped into Duluth that I know about were WMAZ-FM 99.1 (now WAYS) and the former WBML-FM 100.7, which probably deleted shortly after I heard it in the summer of 1953.

Clarke Ingram was kind enough to send a cassette tape of the dedication broadcast of WOR's early FM station, W2XOR, Aug. 1, 1940. The program was on both AM and FM, with most of the audience, of course, tuned to 710 AM. It was exciting to hear such a broadcast, including officials of WOR, both management and engineering, and politicians. Major Edwin H. Armstrong is mentioned as being present, but declined to speak. The contrast with today is striking. When an FM begins broadcasting these days, it's

*Symbol of Tomorrow*  
**LOOK TO LINGO**  
For Proven  
**FM EFFICIENCY**

The new famous Lingo Turnstile Antenna is our important contribution to the FM field. The years that have been devoted to development have already resulted in an outstanding performance record from an imposing list of actual installations. Even now, while our plant is engaged in all-out Victory production, we continue our FM antenna developments to meet the requirements of a greater FM industry tomorrow.

PATENTED TURNSTILE ANTENNAS  
CAMDEN, NEW JERSEY

Canada is looked to as a leader in digital audio broadcasting, and I will be attending the Canadian Association of Broadcasters convention in Winnipeg early next month, with press credentials to cover the DAB story for FMEDIA readers. On Sunday, Nov. 6 will be a joint CAB/WABE pre-convention session, "Digital Radio: Separating Hype From Fact," that I plan to take in. "Canada is moving ahead with plans to implement DAB in the L-Band. It is predicated on using the Eureka-147 wide band technology which should be the world standard by the end of 1994. Nevertheless, our American neighbours are still looking at in-band solutions," says the announcement promoting the seminar.

In the magazine *Broadcast Technology* is a report on the state of DAB there and what it promises to do. In a story by Wayne A. Stacey, it is alleged analog FM cannot provide the quality that the public has come to expect from CDs and other digital audio devices. Digital provides "pay radio" and has extra capacity for auxiliary data transmission, "thus providing potential new revenue sources for broadcasters." There are concerns, however, how digital can be tailored to existing station coverages, especially in rimshotting circumstances where nearby stations have expanded to cover major markets, and there's the prediction that the U.S. will be forced to embrace the L-band for DAB.

A system of audio description for TV, similar to the U.S.'s use of DVS on SAP comes from England, where a group of 10 companies has created the Audetel system. Audetel transmits through the existing teletext system and uses digital compression technology. Experimental transmissions using 140 special receivers have begun in England in July for about three hours a week over a four-month period.

Bringing Christ to the nations—or at least spreading Christian FM by means of translator to the U.S.—is a system of using a suitcase-sized electronic box that includes a complete translator/transmitter with stereo generator. Small stations are being built in many countries, notably Romania and the U.S. Crown International of Elkhart IN and HCJB of Ecuador have teamed to make the transmitters readily available. The FM30 with an output between 3 and 33 watts sells for \$4795, the FM100 (10 to 110 watts) is \$5695 and the FM200 (20 to 215 watts) goes for \$6695. Other accessories needed—a tower and transmit antenna and receive antenna or satellite dish. Total cost for such a "satellator" is about \$10,000. Leading the way in using the devices are such outfits as KWBI \*91.1 Morrison CO (which intends to cover all of CO, and then go out in waves to neighboring states), WAFR \*88.3 Tupelo MS and Family Stations, relaying KEAR \*106.9 San Francisco. Hey, Harold Camping's predictions were wrong about Christ coming last month! Here we are, and of course, Family Radio continues to build and expand, just as it did while Mr. Camping was predicting the Second Coming.

Jay Landers is out as manager of WUOL \*90.5 Louisville KY, being replaced by Gerry Weston, manager of WFPK \*91.9 and WFPL \*89.3 there. That's in preparation for the Library stations' taking over WUOL. Landers is going to a more miniature operation, KRCU \*90.9 Cape Girardeau MO. Weston says Landers left voluntarily and had been expected to stay with the stations in Louisville. Sometime next year the stations will all merge, with classical expected to stay on WUOL. WFPK might go to jazz, blues and bluegrass, while WFPL would probably become monophonic news and information.

The CPB announced a freeze on grants to new FM and TV stations while it undertakes a "comprehensive review of public broadcasting systems and program objectives." Stations which provide either sole service or the first noncommercial service to their communities, or that are operated by minorities are exempt from the freeze. The freeze is expected to last a year, but its practical effect might be to bar only five to 10 FM stations from receiving funds. A more serious issue is the reduction of already-announced

funds for public radio by \$21.1 million. Part of the cut is because of wanting to balance the budget, but \$1 million of it came in response to congressional hostility to KPFA \*94.1 Berkeley CA's broadcasting an anti-semitic program by some blacks. The practical effect is to reduce the typical station budget by a few thousand. KUMD \*103.3 Duluth, for example, is losing about \$2000 because of the cutback. While Pacifica is blamed for part of the cut, the cut-back is spread across all CPB station grants.

An anti-indecency group has sprung up to challenge the FCC's approval of the sale of WPGC-FM 95.5-AMorningside MD to Infinity Broadcasting. Americans for Responsible Television has filed a petition asking the Commission to reconsider the sale because the group claims the FCC broke its own rules when it did not release the entire text of its decision to approve the purchase. It also considers the indecency fine schedule "ineffective."

The man accused of cutting the cable which severed the Howard Stern show from Cleveland, William Alford, an assistant engineer for WMMS 100.7, pleaded guilty to disrupting public service and criminal trespass. He was supposedly fired over the incident, and faces a fine or imprisonment.

Sept. 16 FM-AM rules changed to allow one owner to have up to 20 FM and 20 AM stations; this is up from 18 in each service. Few companies own 18, so the rule means little—for now. Clear Channel Communications has 16 FMs and three more FMs it plans to acquire—in Miami, Tampa and Cleveland. Infinity Broadcasting has 16 FMs and is buying KLUV 98.7 Dallas for \$55 million; it already owns KVIL-FM 103.7-AM there. Another Dallas-area duopoly involves Bonneville's KZPS 92.5 buying rimshotter KDGE 94.5 Gainesville TX for \$11 million.

The FCC Mass Media Bureau asks for the death penalty for KFUD-FM 99.1-AM Clayton-St. Louis MO. Stations are accused of lack of candor in an attempt to cover EEO violations, which were alleged to have taken place in 1989. NAACP filed the original charges. Oct. 31 is the date KFUD-FM and the FCC have asked the court as deadline for reply briefs.

Fined by the FCC: KKLZ 96.3 Las Vegas \$8000 for indecency between 6 and 10 a.m., and WWST 93.1 Karns TN \$4000 for broadcasting indecent language.

KBOQ 95.5 Carmel CA is allowed to stay on the air. What's so newsworthy about that, you might ask? Well, KBOQ won out in a comparative hearing against Highlands Broadcasting, Inc. Now, because of *Bechtel v. FCC*, Highlands is reclaiming its status as an applicant, even though J&M Broadcasting prevailed, and has since built KBOQ. The FCC found that continued operation by J&M would serve the public interest, and that such operation would not prejudice Highlands in its renewed quest for the channel. The Commission told J&M when it chose to construct its station it assumed the risk that the comparative decision in its favor might be overturned. "The Commission stated that nothing in this decision can, or is intended to change the fact that J&M bears this risk," stated an FCC release.

FAX on demand now from the FCC—at least if you like the Daily Digest plus selected public notices—from (202) 418-2830. I often call and get the Daily Digest by dialing that number and then "1" "1." Our new FAX number is (218) 879-8333. Another new service from the FCC is a listing of the status of construction permits. It's an updating available the first and 15th of the month showing four types of actions: 1) grant, 2) return/dismissal, 3) deficiency letter, 4) notification that further action is blocked pending some other event. The FCC doesn't release this for free, but my FCC messenger service, Fair Press Services, (202) 463-7323, offers subscriptions.

One of the pioneers in FM dies. T. Mitchell Hastings, 84, at his summer home, Edgartown MA. In 1951, while attending a funeral of a great-uncle in Philadelphia, he met a distant

relative, Laurence M. C. Smith, who told him he had just founded WFLN 95.7, a classical FM station as a tax write-off, adding that the only obstacle to the success of FM was the development of an FM car radio. Hastings rose to the challenge, and with the aid of Ed Brooks, a Raytheon engineer who built FM tuners as a hobby, developed an FM car radio they sold over WFLN. This led to further sales at other stations and a chance to demonstrate the device at the NAB's 1953 convention. Later that year, Hastings became involved in the group that became the Concert Network, Inc., operating WNCN 104.3 New York, WHCN 105.9 Hartford, WBCN 104.1 Boston and a Providence station. He was a president of the National Association of FM Broadcasters and more recently active as president of the Armstrong Memorial Research Foundation at Columbia University. [Thanks to Malcolm Kaufman for sending this current information.]

WFOF \*90.3 Covington IN raised about \$135,000 in three days of pledging, some \$5000 over their goal. Another religious station, WBSN \*89.1 New Orleans, collected \$116,000, which was \$46,000 over their \$70,000 goal. Share Media services coordinated the two drives.

In Albany-Schenectady NY the fund drive leader among public radio stations is usually WAMC \*90.3, which has classical music and a variety of other programs. WMHT-FM \*89.1, which specializes in classical usually does worse. Now listen to the chieftains talk about the other station: Marianna Cunningham, director WMHT-FM: "It's almost like having 10 different stations with 10 different formats and audiences," adding that the specialized classical music format narrows the audience base. Alan S. Chartock of WAMC: "I'm surprised by that. Everything we've been told in radio is that it is not an appointment medium, you should have one thing and stick to it, but we break that rule. If somebody shoved that one format only down my throat, I'd leave."

FM station totals as of Aug. 31: 5070 stations, 92-108 mhz, on air and licensed, while those from 88-92 mhz number 1708 for an FM total of 6778. AM has only 4923 stations. FM translators and boosters number 2233, compared to VHF TV translators 2441, and gaining fast.

From the classifieds: Want to buy FM transmitter, any size, any make, SCB Inc., PO Box 7762, Amarillo TX 79114.

JVC FM-300 FM-AM tuner for sale, 16 presets, \$100 plus shipping. E. Helvey, Summit Prods, 461 Layside Dr. No. 100, Winchester VA 22602; (703) 877-2717.

KPFA \*94.1 seeking a public affairs producer, \$2083/month. Send resume, letter and aircheck of live public affairs programs you have produced to Ginny Z. Berson, p.d., KPFA, 1919 Martin Luther King, Jr., Way, Berkeley CA 94704.

### FM FORUM

#### CONTRIBUTIONS FROM READERS

An Anchorage AK FM station is learning about the equal time rule in political broadcasting, almost the hard way. KASH-FM 107.5 had to give Ed Willis time to match that of Wayne Maloney, who has been doing news. Willis said he didn't know what he'd do with the free time, but he's glad to have it. KJJZ 101.1 Kodiak similarly learned it had to give free time, prompting reader Rod O'Connor to muse, "I thought this was basic required knowledge for anybody with a third-class FCC permit—but then, they don't require tests and broadcast exams any more."

Some of the FM Forum comments didn't print because the computer lost data keyed onto a damaged disc; however, there should be a larger FM Forum next month.

Until November,

 GA Atlanta W300AB \*107.9 (not W299- 107.7),  
 on air. Was to have been on 107.7 to prevent  
 interference to WPEZ 107.9 Macon. The new  
 frequency is to improve reception in the  
 Virginia-Highland, Morningside, Decatur and  
 Emory neighborhoods. The problem started  
 when WABE \*90.1 moved to Stone Mountain  
 in 1983. Still, some residents say there's been  
 no improvement. Drives from Smyrna to  
 downtown and going from downtown to  
 Midtown produced no improvement in recep-  
 tion. But folks going south on I-85 from  
 Phipps Plaza reported improved reception.

I've been advising some people having prob-  
 lems with WABE's 67 kHz SCS reading  
 service to give 107.9 a try, hoping the  
 translator doesn't filter out the sidebands.

 PA Slippery Rock WRSK \*88.1 p  
 SC Anderson WROQ 101.1 rp, with some newer  
 stuff, including classic rock . . . . .  
 "Classic rock—not classic 'hits' mind you—is  
 simply album rock oldies repackaged for aging  
 baby boomers who want to relive the early  
 years of their adulthood. It has a fundamentally  
 different sound than '70s-'80s hits, just as a  
 current-day album rock station would be ex-  
 pected to play different music than a Top 40 or  
 CHR station. Throwing The Carpenters, ABBA,  
 and Olivia Newton-John into the same category  
 as Jimi Hendrix makes no sense at all, and  
 corrupts the logic of your format coding  
 scheme. The new format code I am proposing  
 for '70s and/or '80s hits is 'ox', which represents  
 oldies of the X-Generation. The reader who  
 suggested o7, o8, etc., has an excellent idea, but  
 it couldn't be accommodated within your  
 current two-character limit and may involve too  
 much hairsplitting. Below are the three oldies  
 codes and how they relate to each other:  
 o oldies ('50s-'60s, '60s-'70s, or '50s-'70s)  
 ox '70s and/or '80s hits  
 op classic rock (album rock oldies)  
 "Like the other oldies formats, the new 'ox'  
 would apply to stations with that specific  
 format only, and not to a 'best mix of the '70s,  
 '80s and today' hodgepodge. [The 'today'  
 component knocks it out of any oldies group.]  
 From past experience [back in the '70s when  
 you belatedly added 'd' for 'disco' only to see it  
 promptly die], I can understand your reluctance

to modify your format codes every time a new  
 fad comes along. I'm sure you will agree,  
 however, that every effort must be made to  
 keep the information in the 'Atlas' as accurate  
 and up-to-date as possible. . . I did want to  
 speak out now, before everything is coded 'op'  
 and we've forgotten what classic rock really is."  
 My comment: I dislike using two letters to  
 describe a single format code. The "op" is a  
 combination of oldies and progressive rock,  
 which probably adequately covers most of the  
 stations carrying '70s music (classic rock), as  
 opposed to stations carrying the hits of the '70s  
 (classic hits), which would be classed as "o."  
 Those who can relate to the music of the '70s  
 are probably younger than most other readers,  
 and with them the use of the "o" symbol is  
 appropriate. If I changed anything it might be  
 to use the single letter "x" for Generation X  
 music. Others are welcome to join in this discus-  
 sion. Recall that my system of FM radio program  
 format categories must meet these four criteri-  
 a: 1) exhaustive; 2) mutually exclusive; 3) stand  
 the test of time; 4) be understandable to a wide  
 variety of users.

 alternative rock with Spanish announcing

**On Air—Selected "Regular" and  
 "Esoteric" Stations**  
 AZ Tuba City KGHR \*91.5, now with some NPR  
 received from KNAU \*88.7 Flagstaff. This is  
 almost the only radio station receivable in  
 Tuba City. "A popular hangout for local  
 teenagers is a place dubbed 'KUPD Hill',  
 where they go to receive that rock and roll  
 station originating from Phoenix" (97.9,  
 licensed to Tempe).  
 GA Roswell doomed W298AA \*107.5 still on,  
 but will have to put on vanishing cream when  
 the new full powered 107.5 CP there comes  
 on, which does not yet have call letters.  
 IA Storm Lake KAYL-FM 101.5, not yet moving  
 to 101.7  
 ME North Windham WLAM-FM 106.7, on  
 testing in \$, but "it looks like it won't  
 happen." Owner Ron Frizzell has instead  
 decided to buy WHTT 107.5 as partner to his  
 WKZS 99.9 and WLAM AM. "The only down  
 side to the transaction is that it will postpone  
 plans to transfer WLAM, located at 1470 AM  
 in the Twin Cities area, to the FM dial,  
 because new FCC regulations allow the  
 company to own only two stations on either  
 band," writes Michael Rosenthal in the  
 "Sun-Journal" of Lewiston. A reader asks:  
 "In October FMEDIA p. 3, col. 3 WMSJ

\*91.9, you mention a frequency change to  
 quadruple power. . . . Any new frequency for  
 them was not mentioned; it could be pure  
 speculation—b.e. (having moved from 88.1  
 MA Sudbury WYAJ \*97.7, [to 94.9  
 MN Albert Lea KCPI 95.3, not yet having moved/

 bankruptcy under Chapter 11, listing assets  
 of \$84,119; liabilities of \$60,163.  
 MN Pequot Lakes KTIG \*102.7, having moved  
 from 100.1  
 NY Potsdam WAIH \*90.3, variety format  
 WA Seattle (Alki Beach) K201-. "Definitely on  
 air and \$[tereo]."  
 AB St. Albert (Edmonton) CHMG 100.5  
 BC Port Hardy CBPD \*103.7 (see "New," above)  
 is "Weather Radio Canada," with tape loop  
 like U.S. NWS, "but inband, with 103.7  
 announced. . . . At Woss outside bus, only 92.7  
 and 95.5 audible, no AM." Vancouver cable  
 had lots of Seattle FM on it, as well as AM  
 KIRO, "but no NPR. . . . Also seemed to get it  
 direct at times. Seattle reception better in N.  
 Vancouver and across the bay." CFRO  
 \*102.7 is near Chinatown, "in old marble  
 building, maybe ex-bank, but covered inside  
 and out with graffiti, and evidently never  
 cleaned inside. CTR \*101.9 also visited,

relatively nice in suburban building on  
 UBCampus, though sometimes ran BBC  
 morning relay late when morning man  
 prevented by security from getting in."  
 BC Terrace 92.1 mono Country Music Radio,  
 parallel to an unlisted 990 AM.  
 BC Victoria CKMO 103.1, only on from noon to  
 5 p.m. weekdays. "Their stereo carrier is on  
 24 hours, 7 days a week. Since Camosin  
 College is not interested in turning their  
 equipment off when not broadcasting, I plan  
 a formal complaint to the D.O.C.," now  
 called Industry Canada.

**Off Air—or Not Yet On**

BC Vancouver "CJSF," Simon Fraser University, plans to expand from 93.9 Cable to an

unannounced FM channel. "It is working on its application for an FM licence from the CRTC, which would enable it to be heard by many more listeners than at present. It is hoping a CRTC hearing could be held by the fall of 1995. As a cable station it operates on an \$80,000 budget, which comes from student fees of \$1.50 per semester for fulltime students. To help CJSF, call (604) 291-3717.

**Multi-City IDs In Use**

- AL Anniston WHMA-FM 100.5 no more dual city ID with Gadsden
- MI Roscommon WGRY-FM 101.1 with Grayling, Mio, Luzerne, Lewiston, Gaylord
- WV Summersville WCWV with Frametown, Clay
- "I apologize for not getting in touch more frequently, but I've been working all hours of the day on the two models of FM antennas I've designed. Someday I hope to finish them!"

**AM Happenings Most Likely Caused by FM**

- CA Carmel KRML 1410 relays noncommercial
- KLON \*88.1 Long Beach, probably by satellite. "I'm not sure how many FMs simulcast on AM!"
- LA Ferriday KFNV 1600 silent
- ME Skowhegan WSKW 1160 drops music for sports, much of it by satellite from Prime Sports Radio. "With our previous format we were kind of just there; the format wasn't generating much revenue, but with all-sports we think we'll really stand out [but] it was pretty quick and surprised a lot of listeners. A lot of people called to say they're unhappy, they miss the music."
- MN Minneapolis KQRS-FM 92.5 edges ahead of WCCO 830 AM—the first time WCCO has ever been nudged from the top spot in Arbitron, and partially the result of the baseball strike. KQRS-FM had a 13.1 share while WCCO had a 12.6. At one time, "CCO claimed to have half the radio audience in the Twin Cities.
- NJ Toms River WJRZ never built, its former phone lines disconnected, and a sign on the WJRZ-FM sales office in Toms River that also mentioned 1550 AM "is now gone! It's been replaced by a sign which simply reads '100.1 FM' and next to it, the WJRZ-FM logo. . . What I don't understand is why they wasted three years, supposedly putting this station together, and now decided to toss it away and make believe it never existed? . . . Putting together a brand new AM station from scratch, and getting it on the air, is probably next to impossible, since there's more AM stations going off the air than on (which, obviously, explains the section of FMedial called 'AM Happenings Most Likely Caused by FM'."

PA Mount Pocono WPMR 960 silent

PQ Chicoutimi CJMT 1420 silent

PQ Gatineau CJRC 1150 silent

PQ Hull CKCH 970 silent after 61 years on the air; most of these changes the result of Radiomutuel and Telemdia merging. "The Quebec market has been hard hit in recent years and both companies felt these moves were required to make a profit in a very crowded marketplace," says the M Street Journal, which estimated that 100 people will be out of work. The loss of these 11 stations has raised the ire of CRTChairman Keith Spicer, who said, "The CRTC deeply regrets the closure of [these] AM radio stations, especially the impact this will have on the communities they served, as well on some very talented, dedicated employees." Spicer said, despite the best intentions of the CRTC, that "we must face the realities of the marketplace," referring to listeners increasingly turning to FM. The CRTC plans to talk to Radiomutuel and Telemedia to ascertain more of the facts about the merger and the station closures.

 WI Spooner 106.3A until 11-22  
 WY Casper 97.3A, Dec. 5-Jan. 5

Filing windows until 11-22 are for places where stations were not built. Selection said to be by the comparative hearing process, rather than "first come/first served," as the FCC used to say (and said for some of the others, such as Maumelle AR). Now that the courts have thrown out the FCC criteria for determining winners in hearings, it will be interesting to see how races are decided when more than one applicant files for one of these allotments.

**FCC Hikes Minority FM-AM Radio Ownership Limits; Keeps Lid on Other Limit Rises**

The Federal Communications Commission revised the national radio ownership rules to raise by five the number of stations a minority or small business can own. Minority owners will be permitted to own and control up to 25 FM and 25 AM stations. Nonminority owners, as of September, are allowed to own or control up to 20 FM and 20 AM stations. They are now permitted to hold a non-controlling interest in five additional stations, provided the additional stations are controlled by minorities or small businesses.

Unlike what some petitioners wanted, the FCC decided to keep the current local ownership rules, which generally permit ownership of two AM and two FM stations in large markets and a total of three stations (FM-FM-AM, AM-AM-FM) in small markets. However, additional control of local stations can be achieved by local marketing agreements or time brokerages. The FCC decided against modifying its rules regarding such arrangements.

In a separate statement, Commissioner Andrew C. Barrett found the goal of increased station ownership for minorities encouraging, but he was concerned that such a goal will be elusive unless there is greater support from the capital markets for such endeavors. Barrett said the FCC's radio ownership report, from which came the decision to increase the minority station-owning cap, doesn't give enough data regarding the extent to which minority-owned and small stations have benefited from the relaxed ownership rules and

local marketing agreements. "My sense is that they have not benefitted across the board. I hope that the Commission will seek further data in this regard and make additional adjustments, where necessary, to induce greater flexibility and capital formation support for minority ownership or minority LMA opportunities," he said.

The Commission's report showed that 2000 of the 10057 commercial stations are part of station combinations, like duopolies or LMAs, that would not have been allowed before. The average group owner has 6.2 radio stations, compared to 6.1 prior to the new rules. Many stations enter LMAs with the intent to later acquire the other stations. The data show a net gain of 18 minority-owned stations from 1993 to 1994.

Stations wanting to increase their minority employment are urged by a writer in "Radio World" newspaper to recruit at minority colleges. Thomas Pear mentioned such schools with communications programs as Norfolk State University (VA) and Florida A&M, Tallahassee. Presumably, some of the more successful minority employees will some day become station or group owners.

**Small-Print Happenings and FM Industry News**

A new International Bureau has been created at the FCC to better coordinate such activities as satellite use, dealing with Canada and Mexico, and planning. A reference center will be provided where the public can come and look at international and satellite documents at one central location. That location will be announced later. Heading the new bureau is Scott Blake Harris.

Characterizing broadcast radio and TV as "long on opinions, but short on facts," FCC chair Reed Hundt urged an audience of CT broadcasters to gather the facts and give them to their audiences, including children, minorities and non-English speakers. The FCC hopes to make its customer service more user-friendly. Earlier in the year, Hundt said, the FCC began making public notices and other documents available on the Internet, with some 4000 documents said to be downloaded to the public each week. "Ultimately, we hope to establish what one could call a 'virtual public reference room', where people have full, cheap, easy remote access to Commission decisions and parties' pleadings," he added.

FM translators will now be renewed on the same dates as primary stations. In some cases, the FCC said, a renewal will have to be filed for a very short period of time, but no renewal fees will be charged for such less-than-normal license periods. The FCC said the short filing will be a one-time burden, with the advantage being that applications for main and secondary stations (like translators and boosters) can be filed simultaneously.

The FCC announced "winners" among the stations that applied for the expanded AM band, 1610-1700 kHz. Stations not named for the migration will have 30 days to file for reconsideration, while those named can decline to apply. Local WEBC 560 Duluth made the list. It would go to 1680 kHz. Paul Kero, chief engineer, told me they filed "just in case," but does not expect to apply for the higher frequency. I doubt that stations having fulltime facilities, low on the dial, like WEBC will swap their good coverage for a spot on an unknown part of the band where receivers are only becoming available to the public, especially with FM having close to 80 percent of the radio audience.

Erwin Knoll, 63, editor of the "Progressive" magazine from Madison WI, and host of public radio's "Second Opinion" program, died in his sleep Nov 2. He was one of the most articulate spokespersons for the left. What will happen to his program is not known at this writing.

Fordham University is still having problems building the taller tower for WFUV \*90.7 New York. The city's building department reversed its earlier permit, saying the structure "constitutes an unpermitted obstruction." The tower is two-fifths complete. Fordham may either amend the plan or appeal the agency's decision before the city's board of standards and appeals. Fordham has already spent \$1 million on the project. Brian J. Byrne, the university's vice president for administration, said "If this is a mistake by the Buildings Department, it's a very expensive one for a nonprofit institution." Dr. Byrne mentioned that two possible tower sites off campus were found, but declined to mention where, except to say that one is at a highway interchange in Bronx and the other on city owned property outside the city limits.

Higher on the dial, at \*99.5, WBAI New York reached its goal of \$428,000 in pledges. "One announcer said he hopes at least one percent of that will go toward studio improvement, because the place could use a good cleaning and many repairs," stated one of our local reporters. He mentioned headphones that only work on one side, a microphone that's held together with rubber bands and a broken chair. "Who knows how management will allocate the money?" he said on the air.

It is possibly an error that Howard Stern is no longer No. 1 in NY's morning market ratings. WPLJ 95.5's morning team of Todd Pettengill and Scott Shannon achieved No. 1, thanks to "a

PETTENGILL

SHANNON

huge male audience." Arbitron believes there has been a "calculation error," and until that error is checked, WPLJ is not allowed to gloat about its ratings gain. Shannon, who once held the top spot in NY at WHTZ 100.3, left for Los Angeles, and returned to NY in 1991 to be program director and join his former rival as morning co-host. WPLJ has been moving up in the ratings in recent years, evolving into an adult-oriented pop station.

The FCC's 8 p.m. to 6 a.m. indecency standards are being attacked in court. The Clinton administration, as with the Bush administration, has backed the FCC in going after broadcast indecency. Two liberal judges sitting on an 11-member panel spoke out against the FCC's attempt to protect children from indecent material. However, Stern's main nemesis on the FCC is either mellowing or else Stern is. James Quello says he thinks Stern has toned down his act—that he now goes to the edge, but not over it. Quello attributed this to vigilance and a seven-second delay system instituted by Infinity Broadcasting. Infinity is appealing \$1.7 million in FCC fines. Quello knows that the case has already cost Infinity millions in legal fees, which is the real deterrent. With two new faces on the five-member Commission, Quello is not sure how much support he can count on among his colleagues.

Arbitron is reissuing the Albany-Troy-Schenectady book after it was learned that WWCP 96.7 Clifton Park, a DRE Network

affiliate, had all its listings credited to WDRC-FM 102.9 Hartford CT. The network identifies on air as "DRE," causing people who analyze the diaries to credit a station which is not even receivable in the local market.

A new network, a joint venture between Sony Software and Warner Music Group, has been announced. SW Networks will offer programs via satellite or CD. Three 24 hours networks are "Classic FM U.S.," not a classic rock service but real classical music; "SuccessRadio," a motivational network for monophonic FM and AM stations, and an unnamed jazz/new AC format. There'll also be short-form programs.

A Spanish-language Christian network available by satellite is Radio Cadena Manantial, based in McAllen TX. Call (210) 787-9700 for

## Radio Manantial

more information.

Serving senior citizens will be WMKV \*89.3 Reading OH, expected on the air May 17. An infusion of \$100,000 through a partnership with the Cincinnati Council on Aging and six other agencies helped keep station construction on schedule. Station equipment is coming from WGUC \*90.9. Music will be m-o-r, and the station will include senior activities information. If successful, watch for similar formats on FM stations, commercial and public, in other cities.

Last month, I wrote that KBOQ 95.5 Carmel CA can stay on the air (p. 8, col. 2). Now the FCC has ruled that WJOL 107.5 Germantown, near Memphis TN, can stay on the air, despite a challenge raised by David J. and Carole C. Bott. The Botts are claiming renewed status in their quest for the channel, based on the court's "Bechtel" decision, which found the FCC's integration criteria arbitrary and capricious. The FCC said that Omni Broadcasting Company chose to build WJOL, knowing it assumed the risk that its bid might be overturned.

Irene Mojica and WGCI-FM 107.5 Chicago have settled their differences. She had been doing overnights and filed suit, claiming the station had passed her over for promotions and paid her less because she is female and Hispanic. She was awarded \$160,000, but the judgment was later overturned. Now it is said that an amicable resolution has been reached.

A sign of the times from contributor R. N. Tyler: "The Carver TX-11 tuner is being discontinued. In its place is the TX8R, at \$350 list. But this is no replacement for the highly touted TX-11 super-tuner. The latest version does not include AM stereo, but other Carver innovations such as the FM stereo noise reduction circuit is on the TX8R. Carver people in the factory in Lynnwood WA informed me that they have TX11s stacked up to the ceiling, just waiting to be sold. The unit list price is \$800, but it's definitely the finest FM stereo tuner in the world! My local dealer has been able to order one for me direct from the factory."

WKTI 94.5 Milwaukee, making one of its rare forays outside WI, is venturing into Omaha. First, it was announced that WTMJ, Inc. was buying KEZO 92.3-AM, but now it is known that they are going for a duopoly, with the purchase also of KKCD 105.9 from Vantage Communications. KKCD is upgrading from an A to a C2. WVOR 100.5 Rochester, owned by the Lincoln Group, is being paired in a duopoly with WPXY 97.9 and two AMs. One of the AMs, WEZO, will have to be sold.

In the CRTC's bad graces are CHOC 92.5 Jonquiere and CIHO 96.3 St-Hilarion for failing to maintain logger tape recordings. Radiomutuel's CKMF 94.3 Montreal and several AMs are charged with having too few French-language vocals. Twelve-year-old CJSB 540 Ottawa goes off the air permanently at the end of this month, replaced by "The Bear," CKQB 106.9. CHUM AM Toronto cuts 11 jobs, four in news, three in programming and four support people. It's dropping one noon newscast and several evening

newscasts. AM revenues are down in the market. Earning top ratings in the BBM is CHFI 98.1, according to *Broadcast Technology* magazine. An AM happening from Canada is that CHER Sydney is bankrupt, but seven parties have expressed an interest in buying the 950 kHz facility.

The Alberta government has moved CKUA-FM \*94.9 Edmonton and its relay stations to a private foundation that will manage it until the CRTC provides permission to change ownership. CKUA started out as an AM 67 years ago. "In handing over to a private foundation, the provincial government is phasing itself out of radio broadcasting," writes Jerry Fairbridge. Format is unchanged for now, and the fall fund-raiser will go on as scheduled.

FM totals as of Sept. 30 5076 (92-108 mz) and 1715 (88-92 mz), while AM has a total of 4919 stations.

From the classifieds: New public station seeks low cost/no cost FM equipment. E. Truax, KEOS \*89.1, PO Box 78, College Station TX 77841; (409) 779-5367.

Dr. Newcomb, who dabbles in unlicensed low-power AM, wants to go FM with donated broadcast and studio equipment. Write him at Grand River Radio, 19130 Nelson-Parkman Rd., Garrettsville OH 44231.

G-F 7-2662 FM-AM small AC-DC radio, plays an included AC cord or four penlite batteries, modified with 67 kHz SCS \$42.50 postpaid; with tuneable SCS and L-E-D \$53.50 postpaid. A popular model with reading service patrons! Me.

### FM FORUM

#### CONTRIBUTIONS FROM READERS

"Smart Radios," with RBDS are featured in an article in this month's "Popular Communications" magazine. One of the pictures is of the Denon DCT-950R, a car stereo, with a fraudulent display on the panel, "WABC-FM," which should read "WPLJ." The mag also gave a free classified ad mentioning my modified G-E Superadio III at \$90.

John Ebeling from his "soap box": "The Frequency Madness of allocations in the past few years as practiced by the FCC has resulted in reduced coverage of virtually all FM stations. There was a time, for example, when one could listen to a desired FM station while driving between Minneapolis and Duluth. Today, forget it! It's like Russian Roulette now, wondering what station will be heard next!"

Glen Hauser sent a FAX with his "World of Radio" program schedule. That program is a great alternative to what you normally hear on FM and AM and includes some commentary with "bite" for the broadcasters. I'll often tune in Saturday night 8:30 Central Time on WHRI IN 7315 mz, or on RFPI 9400 single side band short wave from Costa Rica at 9 p.m. Saturday to hear the previous week's show tape delayed. Those lucky enough to be near KSIR-FM 107.1 Brush CO can get it at 11:30 a.m. MT Sundays; or WPKN \*89.5 Bridgeport CT 2:30 p.m. ET Saturdays. "Enjoyed your SCS article in [September] Monitoring Times. Picked up reading service schedule on KMWU \*89.1 when in Wichita recently; if only I could pull it in." Much of the station news this month from BC came

from his monitoring on a trip, which included part of the AK coastline. "If I can get to it, I want to do a World of Radio special with tapes of stations heard on this trip, and when I go thru tapes I might glean additional info. . . I think the two-nation station/nets [in BC] are especially interesting, and the long overdue expansion of CBC stereo outside the metro areas, but a long way to go yet. May I say it was a royal pain using your BC maps segmented as they are, with my route along boundary lines!"

Not a fan of my radios with SCS modifications is Larry Miller, writing in last month's "Monitoring Times": "We cannot endorse [Elving's] SCA modifications. My Superadio III modification took too long, the external installation reminded me of Frankenstein, and the SCA sounded scratchy." I think the Elf-2 Adapter with L-E-D has overcome the problem of scratchiness, and I have a Brother P-Touch 30 memory labelmaker, which will be put to use for the switch position and SCS tune labels, and possibly the FM Atlas titles. Miller, however, thinks my book and newsletter are O.K., saying "Where Elving sticks to print, however, he's fine. That's why we can endorse his FMedial newsletter. . ."

Once again the issue of safety in the FM workplace was brought home with the death of announcer Andrew Siehr, 22, of WKTT 103.1 Cleveland WI, who was killed when an antenna he was raising for a remote in Manitowoc touched a power line. Salesperson Nancy Kortbein was seriously injured in the accident, reports the Milwaukee SBE newsletter. Earlier this year, a CNN employee, Al Battle, was killed when raising a mast near a power line. "All of us need to be aware of power lines whenever we are in the field," the newsletter cautions. The same goes for installing FM receive antennas.

"I generally agree with the comments Brian Anastasi made about 'AM-bashing', although without predicting any dire consequences," writes Russ Edmunds. "I do believe that it detracts from the otherwise high calibre of the publication, and that it is decades past being relevant. FM has long ago passed AM in listenership, and long since proven its superiority for music transmission. The column header 'AM Happenings Likely Caused by FM' is not only an example of this type of FM chauvinism, but also highly presumptuous. As one example, the September issue cites a little AM gone silent, WKEM 1490 Immokalee FL. Over the past 21 years, this station has been in a 'hand-to-mouth' state, on again, off again. This has everything to do with a low-power, small-market underfinanced rural AM in an economically-depressed area and, given the history I've just cited, nothing directly to do with FM."

A new Atlas is being worked on, so I'll see you in 30-60 days! *B. Elving*

 KS Osage City 92.9 KBZB (KZOC)  
 ME Kennebunkport 104.7 WQEZ (WBQW), \$, b, being promoted over co-owned WBQQ 99.3. "They have drowned out their companion station, WBOQ 104.9 Gloucester [in S.E. ME]... I have talked to the manager [Louis Vitell, pictured] of the new station and he

just laughed at me... The FCC is in error in assigning a frequency too close to another local station. Small FM receivers don't pick up stations more than 40 km away, so owners of these receivers think there is nothing on the FM band except local stations. With my outside antenna I can receive clearly 66 FM stations... The FCCaters to the masses and forgets us people who know the capabilities of FM." It will also carry night games of the Portland Sea Dogs. "Now, your station for Easy Favorites will also be your station for Portland Sea Dogs baseball!"

### Call Letters Assigned

- AL East Brewton 95.7 WZEW (WAFN)
- AZ Phoenix 96.9 KCHT (KPSN), still o, but '70s hits like Elton John, Thin Lizzy, Rolling Stones, Bob Seger and Fleetwood Mac, appealing to the 30-44 age group, "K Hits 97" (from "Hot Oldies"). "The last thing the market needs is another rock-based format, said KSLX [100.7] program director John Sebastian. Seven stations in the Valley already cater to that segment."
- AZ Window Rock 103.1 KWIM (KHAC-FM), gr, plans to be on in early '95 with a move to 102.7
- AR Thumann 106.7 KKCEN (KWEZ), "Klickin"
- CA Bakersfield \*90.9 KFRB
- CA Carmel 101.7 KAXT (KXDC-FM), k, "Kat"; duopoly with KMXX 93.5 Hollister
- CA San Fernando 94.3 KYKF (KMGX)
- CA Stockton 100.1 KQOD (KFMR)
- FL Dunnellon 102.3 WTRS"-FM" (WTRS)

"There used to be a WTRS AM, a 500-watt daytime on 920 kHz. It went the way of so many daytimers. Too expensive to operate and a signal so bad it couldn't be heard across the street. With a No. 1 FM "money machine" we opted to put our effort where we could see a return. We also turned off co-owned WJBU 1080 kHz in Port St. Joe FL."

- MD Baltimore 104.3 WOCT (WSSF), "The Colt," with "the best of the '70s. This format seems to be taking over the classic rock format."
- MD Pocomoke City 106.5 WKHI (WMYJ)
- MA Lawrence 93.7 WEGQ (WCGY), op, '70s rock, still "Eagle 93.7." PD Greg Strassell said, "We wanted to pick up call letters more representative of the term 'Eagle'. We... didn't want the baggage of the old call letters, with all its various formats, and make it seem like this is just one more variation." However, some local pundits think the station will change to modern rock, or maybe jazz. But Strassell laughed out loud, saying, "The '70s appear to be here to stay," at least on 93.7.

**Stereo—Or to Be Stereo**

CA Thousand Oaks KCLU \*88.3  
 DE Wilmington WMPH \*91.7 rs, back on air,  
 signs on 3:30 p.m. and operates "into the  
 evening." [(from "Surf 107.9")  
 HI Aiea KGMZ 107.9, rp, "107.9 FM,"/  
 HI Hali'maile KPMW 105.5, the only all-Filipino  
 main channel FM station in the U.S. Its stereo  
 is on, however, only from 10:30 a.m. to 3  
 p.m., while the station itself operates 6 a.m.  
 to midnight.  
 MN Worthington KITN 93.5, rk, "old pop, new  
 country." Non ID is "Kitten," sometimes  
 "Kitten News," "Kitten 93.5." Facilites to  
 36000 h,v; 175 m, C2. Had been testing until  
 3 a.m. Nov. 21. Then at 6 a.m. that day it  
 signed on with regular programming "as if it  
 had always been on. There was no mention  
 that they were new"; (507) 376-9350.  
 NY New York WNYE \*91.5 after 57 years on the  
 air poised to go stereo. A stereo pilot has been  
 on since Nov. 14, but "they're stereo-phony.  
 . . I called to ask about it and was told, 'Yes,  
 we are planning to broadcast in stereo, but I  
 can't give you a date. We're testing now'. It  
 still has enough French to get an 'F' in the  
 Atlas." ItSCS is f(), but "spills over" onto 67  
 kHz.  
 NC Roanoke Rapids WZRU \*88.5, with ↑T, 92  
 kHz, In Touch plus two hours of local reading  
 repeated three times a day. Format—call it j,  
 k, for now, but also includes c, r, s, t, "very

unique programming." Also some m-o-r. It  
 hopes to move to a new tower site by  
 February from its downtown location. "I  
 think the present tower will be for micro-  
 wave." It is serving about 210,000 of the  
 500,000 people who had been without public  
 radio in NC.

NC St. Pauls WLRD \*107.7, s, serving  
 Fayetteville with "Flava"  
 NC Tabor City WYNA 104.9 sk. "Most of their  
 programming is relayed from AM 1370  
 WTAB Tabor City."  
 ND Bismarck KSSS 101.5, rm, Jones  
 PA Oliver WASP-FM 94.9

 CA Carmel KAXT 101.7 k, "Cat Country 101.7  
 the Cat." To 2350 h,v; 161 m, which will  
 "double the power."  
 CA Marina KRQC-FM 92.7 o  
 CA San Mateo KYLD 107.7 had been program-  
 ming to blacks and Hispanic women, with  
 contest winners allegedly all Hispanic women.  
 Twelve ex-employees of "Wild 107" said they  
 were ordered by station management to ignore  
 whites, blacks, Asians and men to make sure that  
 Hispanic females ages 18 to 34—the station's  
 target audience—would win contests. "It was  
 stressed to us that if we had a big prize—cash or  
 concert tickets—it had to be a Hispanic female,"  
 said Matt Menocal, 24, who worked in promotions  
 until September. "I'm Hispanic, but I always felt  
 it was wrong in a broad radio sense. We had  
 listeners from all over the Bay Area, all races, all  
 kinds of people, yet we were supposed to give  
 prizes to only certain demographics." Allen  
 Shaw, president of Crescent Communications,

which bought KYLD November, 1993, said, "We have a lot of work to do here. These allegations are quite disturbing. We do not operate this way." Wild 107 bumper stickers are "ubiquitous" around the Bay Area, "in part because of heavily promoted contests that promised \$107 or \$1000 prizes to drivers spotted with the stickers on their cars," reports Brad Kava in the San Jose Mercury News. However, employees said they were instructed to select only young Hispanic drivers for the big prizes and to give key chains or dog tags to people of other ages and races. The former employees said they were criticized for letting non-Hispanic voices on the air. "You wouldn't believe the racism," said former d.j. Mancow Muller, now at WRCX 103.5 Chicago (see September, p. 4, col. 3). Muller said he was unaware of contest-rigging at KYLD, but said, "I wanted to do my show for everyone, but if a man got on my show, I got yelled at. If a non-Hispanic got on my show, I got yelled at. It was racism."

The station was in a fierce ratings war with KMEL 106.1 and KHQT 97.7, and it bought a second station, KYLZ 99.1, which simulcasts the 107.7 signal, to reach more Hispanic listeners in San Jose. San Jose accounts for more than 35 percent of the San Francisco market. The FCC had received no complaints about the contests, but if found in violation KYLD could face a \$10,000 fine and lose its license.

In response to the charges, KYLD fired its program director of two years Rick Thomas, who many of the ex-employees said was responsible for the racially biased giveaways. A month earlier, his boss, Scott Fey, general manager, was let go. A contest to give away a Ford Mustang saw entry forms separated on the station kitchenette, with returns from Hispanic females making it to the promotions department. Former promotions director Michele Linn, 27, now at an unnamed pair of stations in Bakersfield, said she tried to conduct the weekly \$1000 giveaway in accordance with the law. "Every Thursday it happened. I would choose a name, hand it to them and hear another name being read on the air." But she didn't complain at the time, so she wouldn't be tagged a "disgruntled" employee. "When I work for someone, I give my whole heart and soul there. I really closed my eyes to it," she said of one of the contests. "I wanted to keep my job." Other employees pretended to be contest winners, and Muller even went along, thinking they were promotions for future contests.

Dave Lewis, 31, a disc jockey and producer at KYLD for two years, now at rival KHQT, said the contests to give a prize to the 107th caller were also rigged. He said he was told by Thomas to pick females, preferably Hispanic, to be the winning caller. "Caller 107 was subjective. We had to get someone who sounded good. They weren't always Hispanic, but ideally they were. If the name was Mary Lopez, that would be a home run."

Legal problems plagued Wild 107 two years ago when a Muller-orchestrated jibe at President Clinton's infamous airport runway haircut caused a huge traffic jam on the Bay Bridge. The station's vans were confiscated and later returned, and Muller had to perform community service. [Thanks to reader Rich Tebe for sending in this information.]

The station is shifting its emphasis away from Hispanic music and that demographic. This has caused Big Lou and Victor Zaragoza to leave, saying they weren't happy with the station's current racial tone. General Manager Bob Visotcky had no comment on the departure of the two air personalities, except to say that KYLD tries to reach all ethnic groups. Change its format code to rs.

 VI Christiansted WVIQ 99.5 mr  
 "With regard to your format codes for oldies (Nov., p. 4, cols. 1-2), two are enough: o—songs originally played on Top 40 stations; op—songs originally played on progressive/album stations.

Please publish the code that you want readers to report modern rock formats (like the syndicated WDRE format) and Z-Rock, a satellite delivered format, the format code of which should not vary from market to market." [Both are generally listed as "p" for now-b.s.] "The 'm' code has degenerated into a softening modifier for other formats—and what does 'r' mean? There seems to be a division between softer adult formats and harder edged, younger aimed ones, but with the way things are changing, I cannot make any suggestion. I wish you luck; keep up the good work."

"The 'ox' I proposed last month would have been a subset of 'o'. I now realize the logic was flawed, because you would also need a 'opx'. And what if '70s jazz, '70s country, or '70s gospel suddenly became popular again? I'm glad to hear you've started work on the new 'Atlas'. Presumably, the final deadline for changes is late December, with the book going to the printer in early January and becoming available in February."

"I'm returning the Magnum/Dynalab FT-101A tuner I bought from you. It gets images on the dial, and is no better than my 25-year-old Kenwood!"

**On Air—Selected FM Stations and Errant Translator**

- AL Center Point W226AE \*93.1, a translator for WBFR 89.5 Birmingham, but WGMZ 93.1 Glencoe wants FCC to "order suspending operation of W226AE"
- GA McRae WYSC 102.7, having moved from 95.3
- GA Leesburg WECG 103.5 and Tennille WJFL 101.9 simulcast "with dropped in IDs and sometimes commercials" [to 105.5]
- IA Perry KDLS-FM 101.7, not yet having moved/
- IA Storm Lake KAYL-FM 101.5, not yet on 101.7. "We moved to 101.7 for part of two days, because of Blair NE getting 101.5, but we interfered with KDLS-FM on 101.7. We promoted the frequency change on the air, and our letterhead says 101.7, but had to move back because Perry is waiting for Blair to pay them to change frequency. We would rather stay on 101.5, but now it's a mess!" It was on 101.7 from 6 a.m. one day to 1 p.m. the next day. "After we move to 101.7, there may be interference from a new translator in Sioux City for KGBI \*100.7 Omaha on that frequency; that translator is owned by a party other than KGBI. . . FM is so boring, I listen to it only in the car, and that includes the station I work for!" [to 94.9]
- MN Albert Lea KCPI 95.3, not yet having moved/
- NE Fairbury KUTT 99.1, having moved from 99.3, now with 100000 h.v; 195 m
- NJ Rio Grande W206AG \*89.1, probably receiving the input signal from W230AA \*93.9 Atlantic City. WWFM \*89.1 Trenton and its simulcast station, WWNJ \*91.1 Dover Township, just before midnight sign off "run down their entire list of simulcasting and translator stations, their locations, and their wattages. They also point out new stations that are 'under test authority' like W206AG.
- NY Huntington Station W217AF \*91.3, relaying WSHU 91.1 Fairfield CT
- NY Rochester WFCX—only a cable station at 99.3, but a local reporter suspects they might be radiating with a low power antenna; they're at 3690 East Ave., ZIP 14618; operates on 1130 AM which is supposed to only cover a campus, but "gets out quite well." [moved from 107.1]
- NC Clinton WCLN-FM 107.3, having/
- NC Raleigh W260AB \*99.9, even though primary WAHD \*90.5 Wilson has been off the air for "several months. Don't use my name in connection with this story, but the Raleigh translator is operating illegally with the primary station not on the air." The translator is originating its own programming and heard well in downtown Raleigh.

- OH Yellow Springs WYSO \*91.3 with 37 kw by "year's end. . . Listeners will be able to hear WYSO at work because they will have enough power to penetrate office buildings and industrial sites. This past October, WYSO moved into its new studio space in Fels Building on the Antioch University campus."
- SD Sisseton KSWS \*89.3, \$, e, on 4 p.m. to midnight, but plans to go 24 hours "as their programming supply increases"

**Off Air—or Not Yet On**

- AZ Prescott Valley KXLL 105.9. The town council voted down the idea of a tower hidden in a plastic saguaro (Aug., p. 4, col. 1). Only option now for the station is to explore tower sites away from Mummy Mountain where the fake cactus would have been.
- MN Deer River K272CM \*102.3. "I didn't realize Heartland Christian Broadcasters, based in Pequot Lakes MN, ever had a CP to relay us. Perhaps you can help get this translator on the air."
- MN Paynesville KZPK 98.9
- MN Sleepy Eye KNUJ-FM 107.3, but expects to be on later this month
- MN Two Harbors WRSR 104.3—FAA won't approve tower site anywhere in the area, except at one watt. "The FCC and FAA don't get along. This station will never be built!" Remove \$ listing found in the FM Atlas.
- NY Bridgehampton WLIE 102.5, considering Associated Press round-the-clock news, k, or oldies when it signs on this spring. Owned by WBAZ 101.7 Southold.
- NY Puleski WCSP-FM 101.7, silent along with WSCP 1070 Sandy Creek NY
- PA Kane WAIU \*90.1, but all equipment has been ordered. "We're still shooting for mid-December" as target date. "The local effort is part of a larger goal of expanding WPSU's coverage to 400,000 people throughout the central part of the state, identified as one of two largest under-served public radio areas in the United States." WPSU [State College PA] is moving to 91.5 and changing transmitter location to a higher elevation, activating its 106.7 translator CP in Altoona, plus working to establish translators in Clearfield, Du Bois and Lewistown in 1995.
- WY Cheyenne KFBQ 97.9, in Ch. 7 bankruptcy

**Deletions**

- MA Acton WHAB \*89.1: "The number listed in the M Street Journal is now a private residence. . . I called Acton-Boxborough High School and was told that the station had been shut down for several years and that they have no plans to return it to the air."
- MN Duluth W249AM 97.7, tower sold, ownership of translator changed, with no plans to return it to the air. "Do not list it any more!"
- MN International Falls K1CC \*91.5: "We took it off the air when MN Public Radio built a translator for their Bemidji station. That station filled most of the purpose ours served."
- MO Otterville KOTT 107.7
- MT Bozeman K207AL \*89.3
- PA Denver W214AL \*90.7, to be replaced by new WRTL 90.7 Ephrata [ings] below
- TX Tahoka KZUB 95.3, see "Rulemak-/
- VA Lorton WDCJ \*88.1

 Wausau WI as a point of reference; not a high  
 fidelity feed. [on itsAP  
 BC Vancouver CHAN-TV "8 has Chinese/  
 CFOX 99.3 f()S, from 1M, 67. The TS is used  
 for remotes, but "reception is so poor we  
 can't really use it." They have an older SCS  
 generator and are plagued by multipath in  
 most locations.  
 MB Winnipeg CITI 92.1 no SCS (had TS, 67), "92  
 City FM," gives legal ID near top of hour,  
 something it was not doing up to a month  
 ago. Also IDing are CHIQ 94.3, CJKR 97.5  
 and CKMM 103.1. CBW-FM \*98.3 not IDing,  
 but the engineer says, "I'll tell the program-  
 ming people" about the requirement. "What  
 agency told you it was required?" he asked. I  
 told him it is Industry Canada, formerly the  
 D.O.C. "This is squarely up our alley," an  
 Industry Canada employee told me, but he  
 said "We only act on complaints. We don't  
 want to go around bullying stations. We did  
 send stations a letter about a month ago  
 telling them that both FM and AM stations  
 must give a legal ID, which includes call  
 letters, once per hour, within 10 minutes of  
 the hour. This is waived for certain types of  
 programmes, such as opera broadcasts."  
 CHIQ 94.3 f()  
 CJKR 97.5 fX, 67  
 CBW-FM \*98.3 f(), very occasional; may have  
 been in conjunction with DAB testing (see  
 separate story, below)  
 ON Toronto CISS 92.5 f(). "We're hoping to get  
 an ethnic broadcaster" on SCMO.  
 Canada is gearing up in a big way to take  
 advantage of TV's vertical blanking interval,  
 VBI, with the CBC and The Sports Network  
 (TSN) involved. The CBC has signed with  
 BlueMont of Montreal to establish Skyway, a  
 \$1.4 million national data network. Skyway  
 services are already under way on French TV  
 stations in various parts of Canada. In the early  
 uses of VBI, broadcasters can expect \$3-\$4  
 million in new revenue per year, and this could  
 increase four-fold once the full potential of VBI  
 is exploited. In the U.S., where VBIs are widely  
 used, a variety of services are available. These  
 include paging, E-mail, real time weather and  
 traffic reports, subscriber based information  
 services and distance education. Like with much  
 of FM/SCS, users pay a monthly fee to lease the  
 equipment and subscribe to the service. BlueMont  
 and the Ontario Legislative Channel formed a  
 partnership to deliver road and weather infor-  
 mation to Ministry of Transport  
 offices across Canada. TSN is using commercial  
 stations, with less geographical coverage of  
 Canada than the Canadian Broadcasting Corpora-  
 tion can deliver; nevertheless, it is expanding  
 toward Whitehorse YT. TSN's software develop-  
 er, DataCast Communications, Inc., is hoping to  
 go national, in cooperation with national and  
 local broadcasters. To receive an electronic file of  
 the day's news, or other items of interest,  
 subscribers need an IBM-compatible computer  
 equipped with a voice synthesizer, a modem  
 connected to the local CATV system and a  
 teletext receiver. Users can then scan the  
 headlines or search for articles of interest using  
 key words. The capacity of VBI services could  
 increase four-fold when broadcasters convert  
 from analog to digital transmissions. These  
 services are expected to be marketed across  
 North America (including, of course, the United  
 States), Europe, Asia and South America. A  
 broadcaster should be able to set up a VBI service  
 for about \$50,000. [From "Canadian Communi-  
 cations Reports," Debbie Lawes, editor, 1296  
 Carling Ave., Ottawa ON K1Z 7K8.]

"Thanks for putting the catalog on cassette. It  
 was most enjoyable to listen to," T. K.,  
 Alexandria VA.  
 "The only hurricane Gordon DX noted [in  
 Queens] was WYFO \*91.9 Lakeland FL Nov. 18  
 7-7:15 p.m., intermittent \$[tereo]. Previously  
 received this station only in late spring-early  
 summer."

The employees have received backing by local Hispanic civil rights groups and the national president of the League of United Latin American Citizens, Belen Robles. The League plans to "monitor station management" and file a complaint with the FCC. Station was transferred to Haftel Broadcasting Corp. in August, and is somewhat on FM locally through a subsidiary which owns KICI-FM 107.9 Corsicana TX.

"I cannot, in good conscience, renew my subscription with your publication as long as you continue your strange anti-AM position. It's quite amazing, as it is all radio—people, transmitters, antennas, listeners. KOY Phoenix, in the Top 5, AM or FM, KFI, the same in Los Angeles, similar story in other cities, large and small across the country. My AM beats all other stations in the county with a dozen signals. Only the combined AM/FM facilities tie with it (it also makes more money!). With 'in-band' digital for both AM and FM, it's all a moot point. For some reason, you take pleasure in predicting the end of AM. Ain't gonna happen! I'd be hard-pressed to decide which station I had to sell, if I had to sell one.

When you get back to 'just radio', sign me up!" [This broadcaster's letterhead mentions his FM calls and frequency before the AM. As you can see, I have changed the title of this column, no longer calling it "AM Happenings Most Likely Caused by FM." Have I mellowed? Perhaps, but I stick to the goal enunciated in a letter to the editor published in "Broadcasting" in the late '60s, in which I compared AM to moribund technologies like the 78-rpm phonograph record; or my 1978 interview with author Harry Maynard in the WNYC-FM \*93.9 New York studios where I predicted FM would completely replace AM. I compared FM to police radio, which is only voice, and which switched from AM to FM decades ago. However, like this reader said, DAB might make the FM-AM discussion and divisions moot points. Read about my experience with DAB in Winnipeg below.]

"Bought a GE Superadio III (I have a II also). It works great and I like the wideband, although it's only useful for local [AM] stations. I can hear the 'drift net' transmitters up around 1700 kHz. These are small cw transmitters attached to large floating nets that are put out and then tracked down later by the fishing boats. I guess there is some question on whether those kind of nets are legal."

**FM Rulemakings Proposed**

**Canadians Grapple With DAB, Other Issues**

Under the banner "The Power of Broadcasting," the Canadian Association of Broadcasters and the Western Association of Broadcast Engineers held their trade show and national conventions in Winnipeg (Nov. 6-8).

Kicking off proceedings was a well-attended event, "Digital Radio: Separating Hope from Fact," with proponents Dr.

Chouinard

Paul Ratliff of the BBC and Gerald Chouinard, an engineer with Canada's Communications Research Centre, Ottawa, who were skeptical of the technical ability of U.S. in-band DAB. Chouinard stated that in-band is not easy to do; there's too little bandwidth for it to be feasible. Ratliff pointed out all the ancillary functions DAB can deliver, which might mean more dollars for the broadcaster. These include TV-like pictures, text and RBDS-type features (traffic alerting; scrolling messages, such as radio station promos, call letters and song titles). By 1998, 80 percent of the British population will be covered by a VHF DAB signal at 200 mhz; L-band (2500 mhz) will not be available there until 2007.

Glynn Walden from USA Digital, Chicago, presented materials favoring in-band on-channel, both FM and AM, as a compromise for broadcasters unwilling to change to another band, especially since

the U.S. military is not interested in releasing any of the 2500 mhz spectrum, even for DAB testing. Red Hughes, general manager, CFRY 920 AM, Portage la Prairie MB, mentioned that stations would be given frequencies for DAB, but to what contour would coverage be duplicated? He produced maps showing his stations' .5 mv/m to 25 mv/m contours. Consensus was that coverage in the new band would be to where the station has measurable audience, not necessarily where the signals go. Duff Roman of the CAB Radio Board, and with CHUM Ltd., Toronto, said that permanent DAB transmitters have been in operation in Montreal and Toronto since March, and that Canada fears satellite-to-home DAB less than do broadcasters in the U.S. However, reception of satellite signals in moving vehicles will not be good in urban areas—under overpasses, in tunnels and among tall buildings.

Shown was a video from a spectrum analyzer display. It depicted a fat, rather flat signal that faded as a vehicle drove in an urban environment. This was contrasted with a narrow, sharp signal of an analog FM station, whose signals often faded out completely due to multipath, while the DAB signal never fully faded because of its width, some part of it was always above the threshold of acceptable reception.

Even more impressive was a ride along "multipath alley," Portage Avenue, extending westward from downtown Winnipeg to the Polo Park mall and the CKY-CITI (FM) studios. Atop the building, at about 15 meters, was a small, portable antenna for the DAB, transmitting six digital signals simultaneously. One of the signals was that of CKY 580 with its oldies format; another was of classical CBW-FM \*98.3 Winnipeg, which about two years ago moved to a site west of the city with 160,000 watts effective radiated power, horizontal and vertical polarized. A special DAB receiver was in the rear of the Canadian Broadcasting Corporation van, connected to a small, white, round antenna on the top for reception of the 2500 mhz signal. The difference between AM stereo received on a Delco and the DAB in stereo was most impressive. Less noticeable was an A-B comparison of CBW-FM stereo with its DAB counterpart, except on the drive along Portage Avenue where multipath had been so bad that CBC engineer Kenton Nicholson told me that, "I fear we've lost a lot of our audience because of the multipath. Portage Avenue is a heavily-travelled street, and is the area having the worst multipath." Signals there were received direct as well as reflected off downtown buildings just to the east. The CBC has tried different kinds of audio processing, changing the station's power, and even its frequency (for a while it was on 91.1), but nothing helped.

While DAB solved the multipath problem along Portage Avenue, right up close to the CKY-CITI building the signal muted out completely, since it was sent out as a beam, aimed laterally at the city, but not downward. Reception of the 45-watt DAB signal was good only to about the eastern edge of downtown, limited because of the low antenna height in use.

Digital radio did provide compact disc-type sound quality, and the demonstration was judged to be a success by Digital Radio Research, Inc., which conducted the experiment. DRR1 is a consortium of the CBC and CAB, with additional support from the government of Canada. On the stage of the convention, a magician intro-

duced digital audio broadcasting to the delegates, while speakers blared, and from it all came a man with a water glass, who proceeded to blame the magician for not changing the water to champagne! He then, very dramatically, lifted the glass and made a toast to the new technology in radio, saying, "Go for it!"

**Other Convention Highlights**

Canada's privately owned radio stations reported a \$48.2 million net loss in 1993, largely due to poor earnings by AM stations. This, despite the fact that the CRTC (Canadian Radio-television and Telecommunications Commission) makes market entry difficult for prospective new stations. The broadcasters would like market-entry criteria enforced as new DAB entrants come in. CRTC chairman Keith Spicer (pictured), in an address to the broadcasters, noted that "these are uncertain times for the industry—especially tough times for radio stations. AM radio has been hardest hit as audiences drop off in favour of FM. But there are possible solutions." For television, the CRTC decided to

allow for the carrying of infomercials. This means lifting the basic 12 minutes per hour ad limit imposed on commercial TV during those hours. He urged a media Marshall Plan by which Canadian broadcasters can look to Europe and other areas of the world for "new challenges and new revenue sources."

Broadcasters also took aim at a so-called "killer tax" which could "knock up to 75 more stations off the air." [This follows the recent closing of 11 AM stations in Quebec for economic reasons.] So-called "neighbouring rights" would double the \$22 million a year broadcasters pay in music licence fees. Broadcasters argue that performers are already compensated through air play, and they note that the music industry had a \$136 million profit in 1993, while private radio lost \$48 million. "It hardly makes sense for the music industry to double-dip at radio's expense when the real problem, sales lost to illegal taping, could be offset by a tape levy which we support," said CAB President Michael McCabe.

It was fun being in snowless Winnipeg in early November, riding the DAB van, and being treated to a look at the radio receiver, the transmitting antenna close-up, and shopping there. Radio Shack stores in Canada still carry the Realistic Pro-2006 scanner, which has been taken off the market in the U.S. because it's too easily modified to receive cellular in the 800 mhz range. I was the only reporter from any U.S. media, except "Radio World" received FAXed reports from the site. I tried to interest some of the other trades in this information, but was told by one editor what happens in Canada doesn't concern him, and I pointed out to Harry Jessel at Broadcasting that the yearbook gives good coverage of Canada, but not the magazine.

Carol and I left the convention a day and a half early, turning back the banquet and luncheon tickets, but at a session we didn't attend, Ed Rogers, who pioneered FM stereo in Canada with CHFI 98.1 Toronto, in 1962, received the Canadian Association of Broadcasters Gold Ribbon for Broadcast Excellence.

Michael Buzzell of the CAB hosted an excellent press room, complete with telephones, FAX services, refreshments, and a steady outpouring of news releases.

The Winnipeg "Free Press" had a story mentioning CIRK 97.3, K-97, Edmonton was sold to Craig Broadcasting of Manitoba, subject to CRTC approval. Boyd Craig, the company's corporate secretary in charge of radio, refused to reveal the purchase price, but said, "I wouldn't buy anything I couldn't make money on." No decisions have been made about changes in format or possible staff reductions. Craig Broadcasting owns CKX-FM Brandon, which could barely be heard in Winnipeg, fighting with KOHT Crookston MN for dominance on the 96.1 frequency.

The CAB-WABE have joint conventions every two years; next year the two groups meet separately—the WABE in Regina and the CAB in Ottawa; the meetings combine in Edmonton in 1996. Every six years they hit Winnipeg, so perhaps I'll be in Winnipeg reporting for FMedia! in 2000!

**Small Print Happenings and FM Industry News**

Going soon—those pesky EBS tones—with the emergence of digital technology. The FCC has required broadcasters to begin replacing the present Emergency Broadcast System with an "Emergency Alert System" (EAS). The digital technology will allow for weekly tests inaudible to listeners, but there will be a monthly test you can hear lasting at least eight seconds. The new system requires stations to monitor at least two sources for alerts and allows for the transmissions of alerts in languages other than English. New equipment will have to be in place by July 1, 1996. The new rules also require cable participation.

This goes along with the FCC's soliciting comment on a proposal to allow unattended operation of broadcast stations. Stations can be unattended now, except that a person must be on duty at the transmitter site, a remote control point (such as the studio), or an automatic transmission system monitor and alarm point. The latter might be at the manager's or engineer's home. Now equipment is so reliable that continuous attendance of a duty operator is unnecessary at most stations, the FCC said. However, the FCC will continue to hold station licensees responsible for any rule violations or operations not in accord with their station authorization. Further, the FCC is proposing to waive the requirement that operators (typically, radio announcers) hold a restricted permit. Similar easing of the language in the rules for FM and TV translators is also asked for. And the FCC solicits comments on whether the effective date of any changes in this proceeding should be linked to the new EAS system for which the FCC has adopted new rules.

Garrison Keillor celebrates 20 years as host of "A Prairie Home Companion," a show heard in most areas late Saturday afternoon on public radio. Our daughter was quite young when we heard Keillor live in Duluth in the early '70s, and when tickets were easy to come by. Now an accomplished novelist, he started out as morning show host on a couple of MN Public Radio Network's stations. He describes his show as "cheerful," and then makes comparisons: "A show like Rush Limbaugh's gets the menopausal

male audience. But it's not really going to grow much beyond grumpy guys. Howard Stern gets the young jerk audience. But he's kind of trapped there. After a while, you stay in your niche and you run out of material and end up saying the same thing over and over."

The FCC's continuing plan to make its data more accessible has resulted in their adding an 800 number. Dial (800) 322-1117 during regular business hours to reach the Consumer Assistance Branch. I've tried but only received busy signals. The FCC said, "within the next 18 months, customer service standards will be developed for other areas of Commission operation to ensure FCC customers receive the highest quality of service." It remains to be seen how user-friendly the FCC ultimately becomes.

In fine news, the FCC has fined KHSL-FM 103.5 Paradise CA \$2000 for broadcasting telephone conversations without permission. WNNX 99.7 Atlanta drew the same fine for the same offense. WZNL 94.3 Norway MI and WFNL 97.7 Sturgeon Bay WI each fined \$4000 for charging candidates more than the lowest unit charge and failing to maintain a political file. Noncommercial KOKS \*89.5 Poplar Bluff MO had its fine for "multiple violations of the FM blanketing interference rule" reduced to \$1000.

Stern's Philly nemesis, John DeBella, has exited WMMR 93.3 where he was morning person to join Stern affiliate WYSP 94.1, doing 2 p.m. to 6 p.m.

There's not more news on FM, but more promotion of combined FM-AM newsrooms. That's consensus of companies in Canada, as reported by "Radio Monitor" newsletter (published by Bohn & Associates Media, 235-1665 W. Broadway, Vancouver BC V6J1X1), such as CFRA AM and "Kool 93.9" Ottawa, as well as 680-News AM, CHFI 98.1 Toronto, and CKSL AM-Q 97.5 London ON. By having an AM adjunct well known for news, the top-rated FM can benefit by use of such phrases as "From the —AM newsroom, here's your —FM information update."

Gallup Research outlined their findings as to what is going on with Top 40 radio. Gallup found four indications that CHR is poised to return: 1) CHR is pulling listeners from three specific formats—AC, alternative, and rock; 2) CHR has historically been a "family format" and now the multiple person household response rate is returning; 3) Current artists are releasing more compelling music that attracts both 18-24 and 25-34 year olds; and 4) In most markets a station can have CHR exclusively without the rampant fragmentation happening to AC.

A new duopoly is formed in CT with WTYD 100.9-AM New London CT being bought by WCTY 97.7-AM Norwich for \$3.5 million. WBTU 98.3 Kendallville IN and WBYS 98.9 Van Wert OH, combine to cover Fort Wayne in an \$11 million duopoly. KTOF 104.5 Cedar Rapids to drop religion? That's a possibility as Quess Broadcasting, owner of KHAK-FM 98.1-AM there, pays nearly \$2 million for KTOF. WHTQ 96.5-AM Orlando being bought by Granum Communications for \$11.5 million; Granum owns WMMO 98.9 there.

RBDS might not just be a toy for car radios. Now Advanced Digital Systems announces a "Radio Rock-It RDS Card" you can plug into your personal computer to read info about traffic, weather, school closings, and promotions for your favorite RBDS-equipped FM station. It will retail for \$249, and contain a graphic equalizer and MIDI input jacks. It is expected to be available later this month. The NAB points out: "The ability of listeners to record RBDS data is expected to have a significant impact on the way radio stations market their product—and on the way they compete." For more information, call Mike McCoy, (310) 926-1928.

A commercial group that puts its principles where its mouth is—Bonnevillie radio, which has had a ban on casino spots, now turns down business from state lotteries. "The Mormon-

owned chain will, however, still take some business from beer and caffeinated beverages, two other businesses which conflict with Mormon beliefs," reports the M Street Journal.

Speaking of "M Street," let me highly recommend their new, larger and more-pages "M Street Radio Directory," \$32 postpaid from "M Street Corporation," 304 Park Ave. S., 7th Floor, New York NY 10010. An FMedia! subscriber noted the personnel listings now in that directory. Usually shown is the general manager, sales manager and program director. My caller wondered why the chief engineer wasn't also listed. It gives ratings by market, and under Milwaukee WI, where I used to live, WTMJ is the current market leader at a 10.7, while WMIL 106.1 is second at 8.6; winter '94 WMIL was the market leader. WJOKY 92.0, which was one of the top stations in the '70s, was most recently a 4.5 (Arbitron), behind most of the major FMs.

In response to a judgment of a federal appeals court, the FCC has explained the reasons for dismissing and returning as unacceptable for filing the application of Leland Broadcasting Group for a new FM station at Leland NC. Instead, the 94.1 channel was awarded to Hara Broadcasting for constructing its WAAY-FM. Leland's application was dismissed under the FCC's former "hard look" policy, which required that applications be "letter perfect" when filed. The application was deficient because it lacked a transmitter site map in the required form. Leland countered that despite the omission, the FCC could have determined the proper location from other information supplied. The court ordered the Commission to explain why the transmitter location could not have been verified using information in Leland's application. The FCC, however, said that finding the information in a round-about manner such as Leland proposed would take more staff time and diminish the ability of the FCC to serve other applicants.

The third annual Midwest Broadcast Conference and trade show is next month, the 30th and 31st, at the Radisson Hotel, St. Paul. For more info call (612) 926-8123.

Station totals from the FCC, as of Oct. 31: AM 4914; FM (92-108 mhz) 5090, FM (88-91.9 mhz) 1721, with 2252 FM translators and boosters and 2255 VHF-TV translators.

From the classifieds: Everything you've always wanted in an AM-FM radio and more. Buy now and save \$100! The incredible savings ends Dec. 21, says the NAB. They're talking about the NAB/Danon Tuner, which gets AM stereo, FM stereo and is AMAX-certified on AM. It has provision for outside antennae on both bands, expanded AM to 1700 kHz, 30 station preset memory and remote control. I could try to get one for you at the NAB member price of \$379 plus \$30 shipping and handling. Extra if you want it modified for FM-SCS. [Nonmember sale price \$479.00.]

General manager for noncommercial 100 kw FM in northern MN (probably KBHW \*99.5 International Falls). Experience required. Resume to Personnel committee, MN Christian Broadcasters, Inc., Box 409, Pequot Lakes MN 56472.

For sale KSYD \*92.1 Reedsport OR, Class A, owned by Eugene Public Schools, via sealed bid. Brian Steckler has the solicitations; contact him at (503) 687-6946. If sold, expect KSYD to go commercial or religious.

Must sell: FM radio station in Marshall IL [WMMC 105.9, which I list as off the air]. Get a 2-story building with 17 acres, studio and all transmitting equipment, \$55,000 cash; (800) 231-5171, ext. 102.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

Phil Boersma says the Grand Rapids Press has published about 36 letters protesting the format change of WAKX 96.1 Holland from easy listening to becoming the market's fourth country station.

Happy Holidays from Carol and me, as a new "FM Atlas" is being readied. Here's hoping this ailing printer gets well!

**On Air (Selected)**

CA Sausalito K265- 100.9: Even though only 80 watts, serves San Francisco from atop Mt. Beacon. "When the station first came on, I forgot which was the main and which was the translator, and couldn't tell the difference, even after driving around the hills... If KLVF weren't covering the entire South Bay with

their 8-watt translator on Mission Peak (Fremont, K265CV), KKHI-FM's translator would reach all the way to San Jose, which is why I also think you should list the wattages when they're under 100 watts..."

MA Worcester WICN \*90.5 has a new five year "strategic alliance" with WGBH \*89.7 Boston to provide financial, programming and operational assistance. "Although each station will continue to operate separately, the arrangement would strengthen WICN's programming while it expands WGBH's influence on Bay State listeners."

MN West St. Paul K294AM \*106.7, relaying KFAI \*90.3 Minneapolis. "This is a misuse of the frequency spectrum to have the station occupy two spaces on the FM dial." It has "excellent stereo separation. Signal at home using vertical antenna is same strength as 90.3 KFAI signal. Another local to contend with."

MO Richmond KAYX 92.5 returns to air with \$, g, parallel to KCCV-FM 92.3 Olathe, both serving the Kansas City market from different directions.  
 NC Lenoir W232AV 94.3 with primary IDing it hourly, and with a computer controlling local commercial insertions each hour.  
 OH Geneva WKYK 104.9, but soon moving to 104.7. "They are making an announcement from time to time that 'the seven is coming'... The move of WKYK to 104.7 would give me one relatively clear channel for my favorite music. It would also allow clear reception of 105.1 FM here (WQKX Salem OH), although Ontario is on 105.3 FM."

**Off Air—Or Not Yet On**

AL Camden WYVC 102.3, along with WCOX AM 1450. Reportedly a disgruntled engineer "did in the board and pulled the tower down."  
 CA Avalon KRCI 92.7 silent  
 IN Crawfordsville WNDY \*106.3 silent, as Xavier University, WXVU Cincinnati, prepares to take it over  
 MS Goodman WVTH \*89.5

**Deletions**

CA Willits K217AN \*91.3  
 CO Englewood "KGNR" \*90.5. "I think the city made them take down the antenna" atop Porter Memorial Hospital.  
 CO Lake City K265BS 100.9  
 ID Coeur D'Alene KETB 102.3  
 MN Collegeville KSJU \*96.5

**Multi-City IDs in Use**

- FL Fort Myers WSFP \*90.1 with Naples, "Concert 90"
  - MI Walker WQFN 100.5 with Grand Rapids
  - PA State College WPSU \*91.5 drops ID with University Park
  - SC Seneca WBFM 98.1 with Anderson-Easley-Greenville (order changed; Easley added)
- "Use 'nicknames' instead of 'NonIDs, Not Just Slogans'. I think these a more accurate label than the double-negative one you're using." However, I believe "nicknames" doesn't indicate a station's use of a slogan; I tend to exclude those spoken with call letters. The industry prefers the term "positioning statements," which can be equally ambiguous.

**Selected AM Happenings**

AK Eagle River KFFR 1020 silent; had been contemporary Christian, serving Anchorage  
 CA Banning KMET 1490 had been silent; returns as news and travel info  
 CA McFarland KJAZ 1590 silent, but to come back as a "La Zeta" affiliate  
 CA San Jose KEEN 1370, which left the air when its transmitting site was sold a few years ago, "is back on the scene as KKSJ, an excellent stereo station that plays old standards. . . Meanwhile, the new KPIX, which replaced the old KKHI 1550 AM and 95.7 FM, never mentions the AM except at hourly ID time, and even then the frequency is ignored. They also dropped AM stereo, even though they greatly improved the studios with all kinds of digital and other modern equipment. . . Group W may be using this station as an experimental site for improvements that might later be made to their AM powerhouses: KFWB, KDKA, WINS, WBZ, et. al. It's hard to believe that a group so successful at AM programming would let even its least facility (which KPIX AM is) go to waste. By the way, the new KKHI also has an AM, on 1510. Don't know if you listed it as 'silent' in the past, but it was."  
 CA West Covina KGRB 900 now has "contemporary standards" with nighttime NBC, and hopes to take the calls of KNBC AM.  
 GA Macon WNEK 1400 silent pending sale  
 MD Funkstown WPGV 1160 silent; lost its transmitter site  
 MN Minneapolis WCCO 830 loses program director Jim Ashbery. Despite new talk shows, ranging from conservative to liberal, he was unable to stop "the downward drift of WCCO's ratings. . . The slow slide had been going on for a decade." [its transmitter site  
 NY Plattsburgh WNWV 1070 silent; lost its/  
 OH Akron WSLR 1350, country, goes urban contemporary as WTOU, "The Touch." "It "could not compete with WQMX 94.9" Medina OH.  
 TX Highland Park-Dallas KDMM 1150 (formerly KVIL), "Hits of the '40s, '50s, and '60s," with a

strict "1150 AM" nonID, "which is odd, as KVIL 103.7 still announces with the -FM suffix. Except for Cowboys football games and related sports programs, the two stations are now programmed separately. This ends the oldest continual 100% AM-FM simulcast in the Metroplex."  
 TX Terrell KPYK 1570 has "big bands, great singers," and "trying to rim-shot Dallas carrying area traffic reports. . . However, one of the former KAAM announcers is said to be trying to

start a new station with the old call letters and format."  
 "As for your 'anti-AM bias', all I can say is stick to your guns. It (the "bias") might be overbearing if the FCC and NAB were facing up to reality and planning to phase AM out. . . but in fact the 'industry' continues to live in fantasyland for the most part (though not as much as a decade ago). In Grand Rapids only one AM shows up in the top 10: news-talk WOOD 1300; everyone else is at No. 13 or lower. WKWM 1140, the 13th-rated station (and second-highest rated AM) maintains its shares (in the 2 range) only because it has no FM competition for its urban contemporary format. . . Every AM in the market except WOOD and maybe WKWM, which is a daytimer, has signal problems due to low power combined with lousy ground conductivity.  
 "Sure, one can point to a news/talker in most markets doing respectably on AM; in some markets a couple of those do well, along with maybe a nostalgia station. But something like 90 percent of major-market AMs aren't getting ratings that are worth anything. Yet the FCC and NAB continue to fantasize that there's some 'magical fix' out there which will revitalize the dying medium of AM. Three years ago it was supposed to be AM stereo and 'AMAX'; now it's the band expansion. All have—and will—come to naught. . .  
 "AM is dead, and the reason is obvious. When even my semi-loafs (like the Grand Rapids AMs only 48 km distant) get buried by the increasing levels of buzz, hum and crackle caused by RF lighting, computers, dimmers and God-knows-what-else in this rapidly-developing area, trying to listen to AM is rapidly becoming a lost cause. I literally cannot hear WOOD 1300's talk shows much of the time due to noise. . . But FM remains crystal clear. Even a 3 kilowatt out of Grand Rapids like WFGR 98.7 or WQFN 100.5 is always extremely listenable, where WOOD's 5000 watts is buried in buzz.  
 "Trying to 'save AM' is like trying to make the airlines return to the DC-3 as their standard aircraft, trying to get Ford to mass-produce the Model T again, or trying to get Time-Warner (music division) to put all their hit rock music on 78 rpm shellac discs. It's just plain stupid. I have a nostalgic yearning for the days of the DC-3, the Model T (or even the Model A), and the 78 rpm with Glenn Miller music on it. I wax nostalgic when I see old pictures of room-sized 5000 watt AM transmitters, with huge tubes visible through large glass windows. But the days when it made economic sense (or any other kinds of sense) to function with those kinds of technologies are long gone. AM has outlived its usefulness. FM will also die some day—but not just yet, not for the rest of this century (and probably not in my lifetime). The best thing the FCC and NAB and all broadcasters could do is to develop an intelligent plan to phase out AM before the turn of the century."  
 The above "was written on a 30-year-old manual typewriter by a guy who is 100% computer-illiterate. So I don't practice what I preach!"  
 "I like it (FMedia!) and want to extend my six month trial subscription. I look at it once. Then I look at it again and get something different out of it each time."

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is deadline for replies. Stations affected, if any, are listed.*

- AK Houston 96.3A, Feb. 6, 21
- IL Knoxville 103.5A, Jan. 30, Feb. 14
- IA Sageville (Dubuque) 106.1A, Feb. 6, 21
- MS Liberty 107.7C3 from Woodville 107.7A, Gary P. Alvarez' counterproposal
- SD Dell Rapids (Sioux Falls) 95.7C3, Jan. 30, Feb. 14
- SD Rapid City 106.3C, Jan. 30, Feb. 14
- WI Dickeyville 101.1A, Feb. 3, 21

**FM Rulemakings Finalized**

- Dates are when FCC filing windows are open*
- AK Delta Junction 93.5A to Jan. 19
  - AZ Tuba City 97.9C3 to Jan. 19
  - CO Silverton 107.3C to Jan. 19
  - CO Vail—dismissed 95.3A proposal
  - FL Apalachicola 93.5A to Jan. 19
  - HI Princeville 92.9C1 to Jan. 19
  - IN Kentland 101.7A to Jan. 19
  - LA Lake Arthur 107.3C3 to Jan. 19
  - NC Calabash (move from Tabor City) 104.9C3 for 104.9A, WYNA
  - OK Mangum 97.7A to Jan. 19
  - TX San Saba 97.1A to Jan. 19. This is limited by treaty with Mexico to 3 kw at 91 meters.
  - VA Alberta 103.1A to Jan. 19
  - WV Fisher 103.7A to Jan. 19
  - WY Kemmerer 107.3A to Jan. 19
  - WY Thermopolis 98.3A to Jan. 19

**FM Listening Level Hits 80 Percent**

It's 80 percent! Yes, 80 percent! Fully 80 percent of all radio listening is now to FM radio. After a couple of years in which FM listening appeared to have leveled off at 77-78 percent, FM has gained to where its audience is now at that unprecedented high level. This according to the Fall, 1994, RADAR report. The RADAR report estimates radio usage for persons 12 and over. Those studies are supported by ABC, American Urban, CBS and Westwood One radio networks, major advertisers and agencies.

The total reached by each band varies by age. As many as 83 percent of teens listen solely to FM, as contrasted to 31 percent of persons 55 and over. About 25 percent of those 55 and over listen only to AM, while 32 percent of that group listens to both FM and AM. A more ominous statistic is that only 4 percent of those 12 and over listen to neither FM or AM, but as the age levels rise, the use of radio declines. Two percent of those 25-54 don't use radio, but in the 55 and over group 10 percent of the men and 13 percent of the women do not listen to radio. I call this ominous, for changes in programming, such as less easy listening music or more program sameness from one station to another, might contribute to this audience decline among the over 55 group—a growing segment of the American population.

This report comes at a time when attention to talk radio as the "savior" of

AM has been much discussed. While the Rush Limbaughs may be gaining a lot of media attention and comparatively high ratings on certain stations, the overall effect of that type of programming on the medium of AM and its ability to capture a mass audience appears to be limited.

**Small-Print Happenings and FM Industry News**

Two investors with limited media experience have agreed to pay \$711.4 million, or \$30.50 per share, for Park Broadcasting's stations. Roy H. Park, 83, of Ithaca NY died in October; his company owned nine TV, 22 radio stations and 106 newspapers. His 89 percent stake went to family members and a nonprofit foundation. Earlier, 33 of the smaller newspapers were sold to American Publishing Co., a Canadian-owned media company. The two investors are Donald Tomlin of Columbia SC and Gary Knapp of Lexington KY. They are being backed by a \$573.4 million loan by a pension fund looking for higher interest for its holdings. Retirement Systems of Alabama has loaned the money at an undisclosed interest rate.

Obituaries—John Lord Booth, 87, a pioneer who built one of the nation's first FM stations, WJLB-FM 97.9 Detroit, at home in Grosse Pointe Farms MI. The family was also involved in newspapers. "My husband loved his family and took great pride in his business, enjoying most the close camaraderie built between colleagues over so many years," his widow, Louise, said. Larry P. Lund, 53, former manager and part owner, WKLK-FM 100.9 (now 96.5)-AM Cloquet MN, of a massive heart attack. He had been selling broadcast computer equipment for Smarts Broadcast Systems of IA. Larry was a confident of mine and will be missed. He was a potential investor in my 92.1A Hermantown MN station. Several WKLK staff people were at the funeral. He knew the business very well; I can remember his giving a lecture to me and former WKLK owner Harry Newby, Sr. about how KFMG 103.3 Pella IA expanded and became a station serving the much larger nearby market of Des Moines. Newby, now in his 80s, is one of Carlton County's most articulate citizens, and has a weekly program on WKLK-FM-AM 10:30 a.m. Mondays where he interviews in-studio guests about politics, sports and other issues.

**Mr. Booth**

A double suicide in FL involved the former owner of Brown Institute of Broadcasting, Minneapolis, R. Castle Brown and his wife of 53 years, Helen. Brown sold his broadcasting school to CBS in the early '70s, and had a fortune estimated at \$10 million. The suicide was apparently prompted by their failing health. Mr. Brown, 79, and Helen, 76, had their will rewritten, giving most of the money to charity; there were no children or other close relatives. They had written a suicide note, sat in their Cadillac with the engine on and the garage door closed until they died of carbon monoxide poisoning, according to Police Detective Tom Mangifesta. The Browns lived in Fort Lauderdale's Sunrise Key, he having painful arthritis that confined him to a wheelchair, and she suffering from Alzheimer's disease; both had polio at an early age. CBS has since sold the schools (there was also one started in FL after the Browns moved there) to National Education Centers.

Both of the parties filing thus far for 92.1A Hermantown MN have specified they'll employ five or fewer fulltime people. Now comes Doug Williams of KWOC 101.1 Woodward OK, new NAB Radio Board Chairman. One of his goals is to get state associations to assist the NAB in getting relief for radio stations with 15 or fewer

employees. Such stations would not have to file detailed EEO reports; indeed, if such a change came about, I believe employment in radio would increase as stations with five employees see the need to add help without adding to the burden of more paperwork.

January, 1995, being celebrated as National Radio Month. The NAB says it's back, but doesn't say how long it's been away. Anyway, radiostations in the NAB have gotten promotional kits for the celebration's theme, "Radio—The Sound of Your Life." We are reminded that 77 percent of all Americans listen to radio an average of 3 1/2 hours a day, with 96 percent listening sometime every week. And we now know that fully 80 percent of all radio listening is to FM.

The NAB is backing lawyer ads before the U.S. Supreme Court. Who's opposing such ads? Other lawyers, namely, the Florida Bar, which opposes the ads attorneys have run since 1977. The court is not expected to rule on that issue before spring.

A noncommercial station cannot sell underwriting spots according to how long they run, such as 15 or 30-second announcements. Cary Tepper, with the law firm of Meyer, Fuller, Weisman & Rosenberg, Washington DC, advises that underwriting should not become promotional and not guarantee anyone a specific amount of air time in exchange for their financial support of the station. "As a general rule, if an underwriting spot takes longer than 15 seconds to announce, it is likely to be too promotional and should be withheld from broadcast until the copy is shortened," Tepper warned in the fall "College Broadcaster" magazine.

Radio salespeople are not always "broadcasters," or people interested in radio per se, as I used to think. Now the NAB's "RadioWeek" points out that many general managers suggest not hiring people from other positions in a radio operation, but that the most successful sales reps from other fields often do better. It's good when a station can occasionally tell clients they are "sold out." Even selling Sunday afternoon spots at \$2 each, if necessary, is better than having nothing sold in that daypart. But such stations should watch out, for the lowest rate sold is what politicians later can claim when they come to buy time.

Interested in buying your own FM station for \$25? Well, actually it's a chance to bid on a station by entering an essay contest. The winner will get a 100 kw FM stereo station—KSIT 104.5 Rock Springs WY! All you have to do is enter a contest and pay a \$25 entry fee. You must write a theme in 150 words or less, "Why I would like to own a radio station." The English department of Western Wyoming Community College will determine the winners. The deadline for entering has been extended to April 30, 1995; it had been Oct. 31, 1994. Second prize will be a Caribbean cruise for two, including air fare, and third prize a \$500 U.S. Savings Bond.

Charlie Reeves has owned the station for 10 years and all he's hoping for is to get his investment back if he has 30,000 entries. At \$25 a shot, that would enable him to make up his costs, and help him retire the station's debts. When Reeves took over, there was no FM competition, but since then another local station has come on, but Reeves claims he made a profit last year. A new owner should be able to come in debt-free in order to make a living, he said. To enter, you have to first send \$3 to get an information packet covering FCC ownership requirements and rules of the contest. Contact Reeves at PO Box 642, Rock Springs WY 82902, (307) 362-7034. If not enough people enter, Reeves plans to return the \$25 fees to the investors. He has not decided what he'd do if not enough entries come in during the extended period. There are also several FM translators in Rock Springs.

The FCC continues to examine broadcast ownership. Among the questions it's raising is what standards should be used in deciding whether one entity can own multiple TV and

radio stations in one market, and it would like to consider ways to encourage greater minority ownership of stations. Finally, the FCC is looking at reviewing its attribution rules, including changes in how non-controlling interests in corporations and partnerships are treated, as well as the use of limited liability companies in broadcast transactions. The regulatory treatment of "cross-interests" between local stations that do not involve ownership will also be addressed. These could include LMAs and SMAs.

The FCC has told stations that they can't ignore paid PSAs when figuring the lowest unit rate for political spots. It rejected the argument that the policy hurts non-profit organizations, which typically pay less than most commercial advertisers for the spots.

Speculation was abundant that NY's WNYC-FM was about to be sold to a commercial bidder, possibly Infinity Broadcasting in the \$50-\$55 million range. Mayor Giuliani had downsized his pledge to find a "comparable signal" for the mostly classical programming of \*93.9. That would mean WNYE \*91.5 could be a replacement. But if he went that way, he'd have to 1) yank WNYE away from the school board, and 2) pacify community and ethnic groups for whom WNYE is a major outlet. This could be the reason WNYE had been testing in stereo recently. Besides Infinity, and possibly others, a group called the WNYC Foundation expressed interest in buying the license. The latest is that the Giuliani administration has put off a decision on the sale of WNYC-FM and instead is eyeing WNYC-TV \*31 "as a more immediate source of sales revenue."

Infinity Broadcasting's WXRK 92.3 is home to the Howard Stern Show. During that show Dec. 7 a man walking on the George Washington Bridge called Howard from a portable phone and said he was going to jump off the bridge because he had nothing to live for. Howard talked to him on the air, urging him to stay alive for Howard's movie and co-host Robin Quivers' forthcoming book. Listeners came to the man's aid, including a woman who claims she held onto him until police arrived. Some reporters asked if the incident had been a hoax, but cops on the scene said the man appeared distraught. The man, Emilio Bonilla, was arrested and charged with cocaine possession.

WAMC \*90.3 Albany NY raised \$280,500 in three days of pitching—a goal usually taking six to eight days. That's a public station getting money from the public at about the same rate as a Christian station would! Now that the Republicans have won control of Congress, expect to see less—maybe even no—money poured into public FM and TV. Many stations, such as WAMC, which do well in receiving dough from the public, might get along just fine. Nearby WMHT-FM \*89.1 Schenectady usually does less well, prompting Clarence Fanto, writing in the "Berkshire Eagle," to muse that the time might come for WAMC and WMHT-FM to merge, while WMHT could concentrate on its two TV stations, "assuring their survival."

Abandoning the Beltway will be the National Federation of Community Broadcasters, in favor of San Francisco; they'll share a waterfront home with Western Public Radio. Details to be worked out in mid-1995.

Andy Marlow, station manager KUOM Minneapolis MN, writes in the Minnesota Broadcasters Association newsletter that commercial broadcasters should counter Newt Gingrich's move to end federal funding of public radio-TV. Here's why commercial stations should support continued government aid to public stations:

- Public stations have usually concentrated on public affairs programming, which has allowed the FCC to ease public affairs requirements for commercial stations.

- Public stations create programming that may not be commercially viable at the moment. Historically, as that programming gains accep-

tance, it finds its way onto commercial stations.

- Public stations often train people who will move onto commercial radio once they finish their college or vocational educations.

- Most public stations have exploited potential revenue sources, such as institutional support and memberships, to near capacity. The one possible exception is underwriting, which would put them in direct competition with your sales efforts.

Shades of Ben Jones? Nah, the murderer and former classical music host of WUSF \*89.7 Tampa is still on the loose, according to Rick Stone, news producer, who told me they periodically call North Carolina to find out if anything more's been heard of or from him. [See September, p. 8, cols. 1-2].

Stone's staying on, but his former boss, Pat Kemp (Aug., p. 8, col. 2) is leaving, along with her boss, station manager John Young and program director Michael Crane. Kemp was to have faxed me the report by George Bailey which pointed the station in the direction of playing music at the expense of news. I learned that Bailey wanted \$50,000 to be hired as a consultant, but he was turned down. Besides those three, former assistant news director Susan Lavery, who had joined Kemp in petitions against her bosses, was demoted earlier last year and quit in September. Crane described the action in removing the three by the university as "surgically removing the problem." University interim provost Michael Kovac told Crane that the decision was based on "the need for different leadership and management skills." Young is now director of technologies and "has a year to clean out his desk," said Stone. Betty Young, director of the Radio Reading Service on WUSF's 67, is unaffected by her husband's firing. The stations' general manager (including WSFP \*90.1 Fort Myers) is James Heck, who wouldn't discuss personnel problems.

The spectre of an FM band containing only data noises is raised in a "Radio World" article on DAB and RBDS. As I learned in Winnipeg, a broadcaster when using DAB, can parcel the spectrum virtually any way he or she pleases. Most of it could go for high quality audio broadcasting in stereo. Enough space is left over for data-type delivery systems or ancillary services, like what FM/SCS is all about. Digital audio broadcasting "will be a good business opportunity in that it will be a much better way to deliver data, and I think you're going to find that a lot of marginal stations get into the data business to the exclusion of music," said Dave Kelley, vice president of marketing for navigation equipment at Terrapin Corp. With high speed data delivery such as DAB might conjure, entire newspapers or the Yellow Pages could be sent; however, Kelley expects main opportunities to be with the mobile user. High speed channels are expected to be a revenue producer for FM stations, and Kelley said his "private hope is that the value of SCA channels will... skyrocket. Plus, the broadcaster will be able to choose to sell the entire spectrum to a single source, or to sell spots on his SCA channel. The broadcaster that wants to be more involved with that sales exchange, rather than just selling the whole thing wholesale, stands to make a substantially larger profit on his SCA channel."

Former Chicago Bear and WLUP 97.9 Chicago fill-in host Keith Van Horn has filed a \$5 million defamation suit against Mancow Muller, morning man at WLUP and WRXC 103.5. Muller, famed for his antics in CA (last month, pp. 2-3), is accused of fabricating a story about Van Horn stalking and "brutalizing" Muller and threatening his life. Muller had already been suspended for a day after talking about Van Horn on the air. The suit also names WRXC, parent Evergreen Media and Muller's side-kick Irma Blanco. Muller is "picking up great success" in the Chicago market by doing such things as burying himself in a casket for charity, a reader reports. Billboard magazine thinks the threat thing is a hoax.

Whither WKBZ-FM 95.3 and AM 850 in the

Muskegon market? The owners have decided to donate the licenses to Grand Valley State University. Stations would share ownership with WGVU \*88.5 and 1480 AM, but whether commercially or educationally operated is not known for now. School officials said they will study program options and talk to area residents to help decide stations' formats.

Moving van delivering new transmitter for KOAK 105.7 Bend OR clips guy wire to a Forest Service tower. On the way down the tower snags a guy wire to an adjoining TV tower, which housed about six FM antennas plus cellular gear. The tower held, despite being buckled, but power was off about two hours. No word on the condition of KOAK's new transmitter, but the forest service tower was "flat as a pancake."

Tele-Media Broadcasting, owner of WLEV 96.1 Easton PA, buys WFMZ 100.7 Allentown, while in Williamsport WHTO 103.9 Muncie is being paired with WZXR 99.3.

Gannett's Sky Radio, an in-flight audio news service, has been grounded due to poor ad sales, according to the M Street Journal, which comments: "Even though Gannett threw millions of dollars at a risky project, they still have trouble loosening the purse strings to program and promote their great AM facilities in several of the nation's largest markets."

Station totals from the FCC: FM 92-108 mhz 5104, FM 88-92 mhz 1723, for an FM total (on air and licensed stations) 6827, while AM has 4912. [Nov. 30, 1994 data.]

From the classifieds: Shively high power two-bay FM antenna tuned to 100.7, \$2,500, WGWD, Box 919, Quincy FL 32353.

For sale 700-watt KLUH \*90.5 PO Box 1313, Poplar Bluff MO 63902; (314) 686-1663. \$65,000 includes the station, 1 acre with seven room house.

## FM FORUM

### CONTRIBUTIONS FROM READERS

Glenn Hauser updates on his World of Radio schedule. I gave some out-of-the-box information, with daylight saving time complicating. New time on WHRI IN is 11:29 a.m. CST Saturday on 13760, 15105 kHz, instead of Sat. night. "Glad you were able to use so much of my BC observations."

"Since relocating from near Harrisburg PA almost two years ago (where my favorite station was WRVV 97.3) I am now no longer totally disappointed with commercial FM here," says Eric L. Nelson of Concord NC. "I have to say that the Charlotte market is one of the most stale I have ever heard, with all the commercial stations sticking to safe, mainstream formats and very little variety below 92 mhz. There are no student-run college stations like the one I spent three years on in Millersville PA (WIXQ \*91.7), and the only other noncommercial stations are classical-NPR, one jazz and a handful of poor-audio-quality religious stations (typical for the southeast)."

Steve Terry, WYPL \*89.3 Memphis, has a couple of articles in the HEARSAY publication of the Association of Radio Reading Services. He finds several threats to reading services using the SCS, especially at 67 kHz. The Denon-RBDS system poses a threat if the stations are not well-engineered, since RBDS is at 57 kHz.

Work is progressing on a new "FM Atlas," and you may receive FMedia! 12 months this year.

Happy New Year!

*Bruce F. Elving*

 NC Charlotte WYHC \*98.9 d-a from four pairs of  
 yagi antennas, five km north of downtown at  
 the corner of I-85 and I-77. "The station is  
 mono, and plans to have a news/information  
 format, playing a repeating message over the  
 weekend giving a legal ID and stating they  
 were 'Charlotte's new source for news and  
 information on the FM band'. However, this  
 new station suffers from a severe case of poor  
 channel allocation. Only about 112 km to the  
 SW is the 100 kw WSPA-FM Spartanburg on  
 98.9. This powerhouse radiates a strong  
 secondary signal into the Charlotte metro  
 area, and reduces WYHC's minuscule 81 watts  
 to only a 3 km interference-free coverage  
 area. . . Downtown, 98.9 becomes a mess,  
 with the two signals fighting each other—  
 another prime example of the FCC's ridicu-  
 lous policy of not protecting secondary  
 coverages. . . I must agree with what one of  
 your readers in ME said in the December  
 FMedia! that the FCC does not cater to those  
 of us who understand the capabilities of FM.  
 I hope the FCC will reallocate WYHC to a  
 much cleaner frequency so it has a chance to  
 cover at least all of downtown Charlotte. . .  
 One last technical note. I located the tower  
 for WRFX-FM 99.7 Kannapolis, on the far  
 NE side of Charlotte, about 21 km south of  
 Kannapolis," with studio downtown Char-  
 lotte.

BN Tijuana XETRA-FM 91.1 rt, adding Howard Stern, 3-11 a.m., part live, part taped  
 About program codes: "My only issue is the use of the same letter, p, to denote classic rock (as in 'op') and current/alternative rock (as in either 'p' or 'rp'). This, to me, is what upsets the appreciator when trying to classify the '70s format. If we assigned a new code for either classic rock or alternative, we could then call a station such as WXRK 92.3 NY or WYSP 94.1 PA which plays classic rock but also Howie Stern and Greaser a 'z' or 'zt'."

**On Air (Selected)**

GA Atlanta W264- \*100.7 has a reading service SCS, as well as WABE \*90.1 and its \*107.9 translator. "I have monitored Atlanta SCA/SCS activity since 1973, and can assure you that ALL your data is correct. . . Background music is not available here, although with a sophisticated setup and outside antenna it can be heard from other areas."  
 IL Sullivan WZNX 106.3, now at B1 facilities, having moved from 106.3, "drotl"  
 KS Liberal KZQD 105.1, "still not on the air"  
 MN Ortonville KCGN-FM 101.5, but at somewhat reduced power due to wind damage to the antenna. "To do repairs, winds must be at 24 km or less to climb the antenna, and at this elevation that occurs only a few hours per week. It takes great timing to have a tower crew available at the exact time it's possible to climb. . . Despite weather problems it's well worth it to be able to bring Christian radio to this large area."  
 MN Red Wing K297AF 107.3, but must be all v (Sept., p. 1, col. 1). "They are on and I don't get them with horizontal antenna; only vertical antenna. . . An unidentified gospel/church program on 107.3—hum in audio, no legal (or any) ID, or interruption given."  
 KNUJ-FM Sleepy Eye MN testing?  
 OH Geneva WKYK 104.7, having moved from 104.9  
 OK Guymon KKBS 92.7 with 11300 h.v; 148 m,

**92.7 FM  
 KKBS**

but claiming "25,000" watts  
 SD Aberdeen K253- 98.5 back on (having moved from 106.3); it experienced interference in its pickup of KCGN-FM Ortonville (see below, "Off Air," Aberdeen). "Ken Walberg, the head of the Aberdeen translator group, was recently diagnosed with cancer. Please pray for Ken and his family."  
 TX Wichita Falls cable brings in WRR Dallas on 89.9, "but in mono! . . . KERA-FM Dallas was on cable 101.5. Cable also had BBC on 97.15 with stereo pilot (which would have been more useful on WRR). . . You ought to edge into cable" in the FM Atlas and FMedial listings."

**Off Air—Or Not Yet On**

AR Fayetteville K209BE 101.7  
 K276CO 103.1. "All the others are on as well as the full-power FM outlets."  
 CA Garberville KBey 104.7; ends LMA with KXGO 93.1 Arcata  
 MN Ortonville KAHF 106.3. Rumor is they'll be on in two months with stereo "and some sort of jazz, but they were to have come on in the fall, so I don't take their plans too seriously."  
 MN Wabasha K257BB \*99.3, but "it's temporary. They have the equipment here in the shop and are making repairs. It should be back on soon."  
 NY Holbrook, Long Island "WEFX" 87.9, with gear stolen from WRCN 103.9 and WALK-FM 97.5. Its antenna was stolen, too, and could be visible 7 m above the roof of the

home of the mother of Joseph Caracciolo, 24, who was caught working in a TV repair shop. "WEFX" came on nightly at 9, "a notch below the 88.1 FM slot used by Brentwood high school's WXBA. But while both stations could be heard in Holbrook, the Brentwood station went off the air at 8 p.m. and there was no interference." Local cop Larry Boyle taped the station and submitted evidence to the court. The station was not making money. "He was strictly a radio buff," said Boyle. "He played all kinds of music, older music, rap, different varieties. He did a couple of skits, and an imitation of Dr. Ruth. . . The things he played were kind of juvenile."

PA Muncy W215AF \*90.9  
 SD Aberdeen K249CB 97.7. Main station KQAA has moved its 94.9 transmitter to a site 10 km east of town (remove KQAA transmitter location on FM Atlas map, which showed it half way to Watertown). This made the translator unnecessary, but KQAA wants to keep it on the air, either for a second spot on the dial for their programming, or for some other, unknown purpose. The translator was radiating out of band, interfering with police equipment and sent out a spur on 101.4, interfering with the pickup KCGN-FM 101.5 Ortonville MN on KCGN-FM's own Aberdeen translator.  
 WI Brookfield WLJU 106.9, bought by WFMR 98.3 Menomonsee Falls, with "plans to locate the antenna on the WFMR tower. No format has been announced."

 "I hope this information will reach you in time to update the next FM Atlas. I am really looking forward to receiving it!"  
 "Looking forward to the new FM Atlas."

**SAP/SCServices**

*Symbols are as in the "FM Atlas" and November, 1993 FMedial*

AR Fayetteville KEZA 107.9 no SCS (had tM,R)  
 CA Sacramento KGBY 92.5 tQ, Russian, near 67 kHz (no 1X, 67 any more). Station engineer would not confirm exact SCS frequency, saying it is "not exactly" 67.  
 FL Fort Pierce WQCS \*88.9 tT, 92. "They have only 22 radios after one year of operation and don't know where to get more in a hurry." Frank Karkota at Compol is only able to supply six a week.  
 IL Rockford WZOK 97.5 tP, 67 (t, X 92). "I know of a store that played tapes illegally recorded in a false ceiling near a speaker. The store where the tapes were made was a subscriber, but not the other location where the tapes were played. I believe it was Pridham Electronics of Madison which brought the suit and received a large settlement."  
 LA New Orleans WWNO \*89.9 tZ, 67  
 WQUE 93.3 tM, C, the 92 is its AM affiliate  
 MD Princess Anne WESM \*91.3's 67 reading uses In Touch from WKCR \*89.9 NY's SCS plus the Baltimore Radio Reading Service.  
 MI Houghton WGGL \*91.1 tT supposedly resumed. "We have, on occasion, had to send our demod out for repair or replacement, but other than that it is operational. Since it is funded by the State of Minnesota, receivers are only available to people living in Minnesota."  
 MI Ironwood WIMI 99.7 tS, 67, heard recently with a high school basketball game, with only crowd noises while WJMS (AM) had commercials. Main channel uses calls, "99-7 WIMI" (from "99-7 FM").  
 MI Zeeland WJQK 99.3 and Grand Rapids WCSG \*91.3 plus another unnamed station in western MI might become Spanish, g, on either 67 or 92 kHz, charging \$650 per month per subcarrier. Augmenting the service Leonard Ortiz wants to start will be special low power transmitters that would broadcast within a six-block area. He has been testing one of them on 88.3 FM. "Requests are already coming in from areas throughout the upper Midwest from people who want to receive the station," Ortiz said, but the funding is not in place. He estimates the first year costs at \$160,000 for five employees and other costs. "Interesting—and innovative!"

**Selected AM Happenings**

AL Albertville WXBK 1090 silent  
 CA Sacramento KFBK 1530 leads the Arbitrons at 13.9, while its two co-owned FMs are second and third in the market. KGBY, "Y-92," has a 7.3 and KHYL 101.1, "Cool 101.1," is 5.8. "You have to wonder about all the stations that are

getting rid of their on-air personalities and turning their stations into jukeboxes. We've got the top personalities and are very profitable," says g.m. Rick Eytesson of the three Chancellor Communications-owned stations.  
 CA San Francisco area—the CA Dept. of Transportation, Caltrans, thought they could go ahead with in-band T1 Stations on 1030 when KIOQ 1030 Sacramento was abandoned in 1991. "Now with that decision reversed, Caltrans may find itself high and dry unless a suitable alternative frequency can be identified." Caltrans operates one 1030 kHz station and planned to install two more on that frequency in the area. Both 530 and 1610 are in use there, "necessitating the use of the special in-the-band frequency." KIOQ's 50-kw would swamp the 10-watt Caltrans transmitters. [letters.  
 CO Gunnison KPKE 1490—FCC deletes call /  
 IA Des Moines WHO 1040 is No. 1 in Arbitron, helped by its 50000 watt signal and the addition of Story County, home of Ames, to the market. KJJY 92.5 Ankeny had been No. 1. "I think KJJY is part of the overall trend in American radio. Country is starting to slip a little bit," said Stephen Winzenburg, a Grand View College communications instructor. "An AM station is No. 1 as the FMs split listeners due to multiple stations running similar formats," said an FMedial correspondent.  
 MA Boston: The top two stations in Arbitron ratings are WBZ 1030 and WRKO 850, "the Hub's leading talk station." But WXKS-FM 107.9 was first in the 18-34 race, "though it lost some ground to WBCN 104.1." A new rating system in Boston is AccuRatings, which uses phone surveys and includes public stations. Response to the new method is said to be better for the 18-34 year olds, and shows WBUR \*90.9 at a 4.7, or above such commercial stations as WZLX 100.7, WBMX 98.5, WMJX 106.7 and WAAF 107.3. [ing sale.  
 MA Natick (Boston) WBIV 1060 silent pend-/ MN Minneapolis—for the second rating period in a row, WCCO 830 is placed in second, behind KQRS-FM 92.5 But is Rand Gottlieb, the g.m. who changed most of the programming to try to appeal to younger talk show fans to blame? Hosts were more confrontational; but the changes only alienated older people "to whom WCCO had been the only station in town. The baseball strike did not help WCCO, but the station was trending downward anyway." Here's how the ratings slide has affected the station:

NE Omaha KESY 1420 "has quit simulcasting 104.5 and now runs SMN's Urban Gold with new calls KBBX. Also on the topic of AM, KEZO's

**NonIDs, Not Just Slogans**

Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)

CA Stockton KQOD 100.1 uses calls, "All New Oldies KQOD" (not "Oldies 100")

AM on 1490 is part of the WTMJ deal, and is leaning heavily to all-sports, running ESPN's Fabulous Sports Babe along with some local contracts."

OR Milwaukee KXYQ 1010 goes all local talk. A daytime, with an LMA with KXYQ-FM 105.1 Salem, "and, yes, the station is for sale."  
 OR Portland KINK 620 quits simulcasting 101.9 FM and goes all talk, with syndicated national hosts. Previously 620 was all talk from 1988-1991 as KGW AM. "After several years with its mostly local hosts and meager ratings, KGW-AM pulled the plug in July, 1991. And the station that dominated Portland radio in the '70s and into the '80s was nothing more than a dark wing at the Jefferson Street Broadcast Center."

Besides KINK and KXYQ, other stations with much talk are KGON 92.3 (with "Mark and Brian") and KXL 750, which has Rush Limbaugh. "The key thing is to do something economically feasible. AM is not the dominant medium anymore [sic], so we have to be careful," Steve Keeney, KINK manager, said.

PA Philadelphia WDAS 1480 "appears to be using much less than their licensed power of 5 kw days and 1 kw nites. Their signal is weak and noisy within city limits and virtually nonreceivable everywhere else. Perhaps they are cutting back on power to see if anyone notices and bothers to complain."

TX Hemphill KAWS 1240 silent.

TX Houston KGLF 1510 silent.

TX San Angelo KCRN 1340 reported silent, while KRCN-FM 93.9 "was very much on."

TX Wichita Falls KWFT 620 off, said to be moving to Plano TX, near Dallas. Glenn Hauser speculated on his "World of Radio" that the move is possible because of the wide spacing of 620 allotments in the area; that he still expected to receive it up in Enid OK, but at a somewhat weaker level.

VA Chase City WMEK 980 silent.

VA Blennerhassett WRRD 940 deleted; station never built.

NS Halifax CJCH 920, owned by CHUM-FM 104.5 Toronto, goes all automation after 10 a.m., save for news, eliminating six on-air jobs.

NS Sydney CHER 950 in bankruptcy, was to have been sold to CJCB-CKPE 94.9, "prompting a complaint from a local group whose bid was turned down by the receiver. BAC Holdings said it would appeal to the CRTC," writes Jerry Fairbridge in "Broadcast Technology" magazine. BN San Felipe, a new station on 540 has been interfering with KJOT AM Costa Mesa CA, said to have exceeded its power authorization and its daytime only restriction. "No corrective action is yet apparent, and the U.S. station claims to be losing over one million dollars of revenue per year due to the interference. The FCC is taking its complaints to higher authorities in Mexico City."

"I hope that 'ailing printer' gets fixed before you try to use it for the new Atlas." It has been fixed twice, and the new book was mailed to the printer in MI Feb. 16. Said one repair place that charged about \$7 for the job: "Is he still using that piece of junk? We can't charge for labor, because then we'd have to give a warranty on the repair." Another concern is this Data General 64-k computer keyboard, which is wearing out. Some commands cannot be used because the sponge rubber under the keys is gone. I have a spare computer, but its keyboard is even worse.

**FM Rulemakings Proposed**

First date is for filing comments at the FCC; second date is deadline for replies. Stations affected, if any, are listed.

CA Cambria 103.5A, Mar. 16, 31

**Court Allows Pirate FM to Stay on Air**

Score a victory for Stephen Dunifer, 43, of Radio Free Berkeley, heard on 104.1 in parts of Alameda County Sunday nights. Dunifer faced the FCC in federal district court in Oakland Jan. 20, but the court refused the FCC demand that he stop broadcasting. Dunifer, 43, "is a movement hero. He's also been fined \$20,000 for broadcasting without a license," according to an article on Bay Area pirates in the Jan. 15 *San Francisco Examiner*. Other pirates listed are Radio Libre 103.3, heard in the Mission, Noe Valley and the area south of Market Street 5-10 most nights; San Francisco Liberation Radio 93.7 various nightly hours and heard in the Richmond district and Sunset; North Beach 88.1 heard from Columbus Avenue to Pier 39, schedule not given; Hunters Point 107.3 FM; South of Market expected on air soon; Sausalito 88.1 FM on air nightly. The article quoted George Zeller, a columnist on pirate broadcasting in *Monitoring Times*

magazine as saying that pirate broadcasting is spreading, and for various reasons, including politics. It's part of a national free-speech movement defying federal control over the airwaves—especially "megabuck" licensing fees and the Federal Communications Commission's refusal to grant air time to tiny neighborhood broadcasters. He doesn't look like Blackbeard, but here is Richard Edmondson in

the studio of his San Francisco Liberation Radio.

Judge Claudia Wilken, besides deciding against the FCC, is exploring the constitutionality of the FCC's authority to regulate such low power radio stations. FCC attorney David Wilberman stated to Judge Wilken that the decision "opens up a can of worms you don't realize." It's back to square one for the FCC, which must decide whether or not to pursue Dunifer in an effort to permanently take his station off the air and/or try to collect the \$20,000 fine. The scene may shift to one of trying to keep the station off the air until the fine is paid, with the FCC's not having to address the basic issue of Dunifer's legal right or lack of right to broadcast. Dunifer and his attorney Luke Hiken see him as a "liberator" of the airwaves. He has vowed to fight, if necessary, all the way to the U.S. Supreme Court, stating that the Commission "can kiss my Bill of Rights."

When told of the decision, Ernie Wilson of Panaxas Productions, Paradise CA said, "It's probably short-lived. The FCC will bring in more high powered attorneys. We should have two types of low power broadcasting. One, with 1 or 2 watts, would not need to be licensed, but permitted, with the FCC issuing permits. These would cover a few blocks or a small town. The other would be 10-watt, Class D stations, which might be translators with local origination. The latter would be licensed, and available to individuals, churches, small towns and the like. I dislike Dunifer's tactics. He's arrogant, a fist-waver. Besides, he's selling transmitting equipment from his catalog and from street corners. He even sells linears, which the FCC does not allow below 144 mhz. He competes with me, and I sell to hobbyists and others in a more responsible fashion." [Send \$1.00 for the catalog

from Panaxis, PO Box 130, Paradise CA 95967-0130; (916) 534-0417.]

**Small-Print Happenings and FM Industry News**

Save for occasional tests on some CBC-owned stations, there has been no RBDS at 57 kHz in Canada, but that might change as broadcasters acquire the equipment for such things as call letters displaying or music playing, as seen on special radios the public may own, like the Denon TU-650RD tuner. Canada has been eyeing Digital Audio Broadcasting, which would allow for its own system of ancillary communications channels, but in the meantime, by April, the CBC is expected to start RBDS in April "from all major cities coast to coast." Helping RBDS in the U.S.A. is \$500,000 from the Electronic Industries Association's consumer electronics group to promote the technology to the public, and probably to boost sales of RBDS-equipped home and car radios.

Public steps in and helps major noncommercial outlets in view of possible government funds elimination: WXPB \*88.5 Philly received \$213,000 in pledges in 4 1/2 days, KCRW \*89.9 Santa Monica raised a record \$1 million-plus in a week, and Minnesota Public Radio is fervently pitching for more dollars from listeners, saying "whether you agree that federal funding is needed for public radio or not, now is the time to ante up and help pay for this fine service. . ." The MN Broadcasters Association adopted a neutral stance, printing the names of the state senators and representatives and urged commercial broadcasters to say what they want regarding federal funding for public radio and TV. The MBA board of directors said that, "unfortunately, the focus of the discussion has been on the high profile programming networks, such as PBS, NPR and MPR. However, the Corporation for Public Broadcasting and the National Telecommunications and Information Administration also provides funding for independent and stand alone university stations who will be particularly hard hit by funding losses. The loss of these stations and their programming will be felt hard by their communities, much of which is not appropriate for the commercial system of broadcasting." Radio World magazine came out in support of public funding for public broadcasting, saying Newt Gingrich "has gone too far in his zeal to streamline this country's budget . . . Funding for the Corporation for Public Broadcasting is no pork barrel spending. It serves a large segment of the nation's population as well as the loftier goals of education and research. Look for your budget pennies elsewhere."

FCC allocates spectrum for digital audio broadcasting, or what the Commission calls Digital Audio Radio Services. It designated 2310-2360 mhz (2.3 ghz band), but sidestepped how the service would be planned and licensed. Bowing to NAB pressure, the FCC stated that it supports experiments to permit digital broadcasting within the bandwidth of terrestrial FM and AM stations, and it reiterated its "support for these developments that will help promote the future viability of local broadcasting." Commissioner Susan Ness: "Expanding the audio broadcast market to include programming delivered by satellite, as well as terrestrial broadcasting, has the potential to greatly enrich the programming choices available to the public. I look forward to both services competing with a variety of local and national digital quality programming."

Farmers! Ever wonder about about a better way to call in your herds? Thanks to electronics, the all-new cow pager is just what you need. Beep in the cattle from the comfort of your easy chair as you listen to your favorite public FM station cry for funds! Pagers attached to selected cows bring in the entire group, as the herd instinct alerts animals to the presence of grub. Do as Nelson Roberts of the Arlington [TX] Telephone Warehouse does, using three different tones, with some cattle responding to one tone and others to another tone. Cows are smarter than you might think! Training them to associate the tones to

feeding doesn't take long. Pagers are weatherized, with batteries that last about a month. Sure beats learning how to be a cowpoke the old fashioned way! [Reminds me of when I was a producer at KTVO (3) Ottumwa IA in the early '60s, and I wrote this in an ad for Herrick Rexall Drugs, Unionville MO: "Lice and ticks destroy! Kill those bloodsucking and biting pests with Franklin Toxaphene-Lindane, in spray, dip and backrub form."]

Hey, this is an FM newsletter, so back to basics and here's word that the FCC's turned back several applications. It denied Avid Communications' review of an application, saying its motion to file exceptions came after an FCC imposed deadline for Temecula CA 94.5. Susan Bechtel, after gaining notoriety in the FCC case bearing her name, had the Commission readdress the 97.9 spot which was awarded Anchor Broadcasting, Selbyville DE, now on the air in stereo as WBSL. She and Anchor petitioned the FCC to dismiss a third application—that of Galaxy Communications, Inc. However, because of the Supreme Court decision that threw out the FCC's integration credits, it was forced to retain Galaxy as a party in the proceeding. Who will ultimately control 97.9A Selbyville DE is open to question. The 102.9A channel in Raleigh NC has shown in several recent FM Atlases without call letters. That's because six contenders have carried on the fight, even after the FCC announced an initial decision. Three of the applicants were disqualified, and the Commission stated that it has reservations about the remaining three. Before the channel is finally awarded, the FCC may ask for a new series of applicants in an effort to find one that is better qualified.

The FCC claims its FM application forms have improved, which resulted in an increase in error-free applications from 40 to 80 percent, a reduction in the backlog from 800 to 16, and a 47 percent improvement in speed of processing applications. I found Form 301, while time-consuming, to be straightforward and not difficult to fill out in applying for Hermantown MN 92.1A. I've requested call letters KFMA and received help from a local broadcaster, who phoned in a terrain-fetch program which figured out the height above average terrain of the site I picked out within 24 hours and for less than \$30. I also have a computer disk which, among other things, calculates FM station coverages and distances from one point to another, knowing the geographical coordinates. The FCC has recommended eliminating the table of allotments for FM stations and to substitute a one-step application process. This could make finding out what technical parameters a station or applicant is going for difficult for a newsletter like FMedia as well as not tipping off other broadcasters about their competitors' plans.

FCC forms now: available by phone (800-418-FORM) or FAX (202) 418-0177. Good luck getting through on the 800 number, and allow two weeks for the forms to come. Not all forms are available by FAX.

WWTN 99.7 Manchester TN to end its career as a monophonic talk outlet? That's possible as WSM-FM 95.5 and AM Nashville buy the station for \$3.8 million. "WTN" had been managed by a bankruptcy trustee. WWRX-FM 103.7 Westerly RI bought for \$10 million by Radio Equity Partners, owner of WWBB, "B-101.5," Providence. WWRX-FM's AM siblings, WHIM Providence and WERI Westerly, not included in the sale. In Charlotte, WWMG 96.1 Shelby NC being paired with WRDQ 106.5 Salisbury in a \$3 million deal. KDWB 101.3 Richfield MN being picked up by Chancellor Communications of Dallas TX for \$22 million. Chancellor already owns KTCZ 97.1-Minneapolis. Marc Kalman, KDWB general manager, will join Chancellor. Jim Duncan estimates KTCZ and KDWB had combined 1994 revenues of \$11.8 million. This is the third commercial duopoly for Twin Cities FM. WBOB 100.3-KQQL 107.9 are owned by Colfax Communications and KEGE-FM 93.7 and KQRS-FM 92.5 are owned by Capital Cities/ABC. EZ Communications' WEZB 97.1 is buying

WRNO-FM 99.5 New Orleans for \$7.5 million. That group is also buying, for \$7.65 million, KBEQ-FM 104.3 Kansas City and its AM in Blue Springs MO. EZ has an option to buy KFKF 94.1 Kansas City KS from Scionix for \$28 million; Scionix is in an LMA with KKCJ 106.5 Liberty-Kansas City MO. Tulsa gets a new duopoly as KTFX 103.3 is purchased by NewCity, owner of KWEN 95.5 and KRMG AM.

But does the industry really need duopolies? Radio advertising grew at the rate of 11.3 percent in 1994, reaching a record \$10.652 billion, according to the Radio Advertising Bureau. The year 1994 marks radio's first \$10 billion year. National spot revenue grew 14.8 percent for the year, the biggest growth in more than 50 years for that category. Local ad sales were up 11.2 percent. Broadcasters that may need duopoly help the most are in small markets. Ergo, the NAB has again filed comments with the FCC urging duopoly options for such stations.

From the classifieds: These eight stations are for sale, after being in bankruptcy court in December. Make offer to Randy Jeffery of Media Ventures Partners at (407) 295-2672 for: WQGN 105.5 Groton CT-WSUB AM, WFPG-FM 96.9 Atlantic City NJ-AM, WFHN 107.1 Fairhaven MA-WBSM AM New Bedford MA, WXLC 102.3-AM Waukegan IL.

Want to buy FM tuner/receiver with MPX output, B. Campbell, KRIG Bartlesville OK; (918) 333-7943.

FM station with land, building and transmitter, Tarkio MO, \$50,000, (816) 542-0404. KMZU 100.7 Carrollton MO apparently wants to dump KTRX.

Orangeburg SC WORG 103.9 (Elloree), no LMA or leases considered, \$125,000 cash plus equipment lease. WORG, currently off the air, has C3 facilities and grossed \$30,000 in the last full year. C. Jones, (803) 492-7613.

Don't throw out your old equipment. FM educational station not shown in the latest Broadcasting Yearbook needs your older working equipment. Joe Giannini, WTBK \*89.7, 96 Valentine Rd., Pittsfield MA 01201.

Pirate radio buff wants to trade station photos, air checks and articles related to that hobby, AM, FM, even TV. Bill Coleman, Jr., S. Circle Ave., Rocky Mount NC 27804.

Station manager for KCCM \*91.1-KCCD \*90.3-KOMN \*91.5-KNTN \*102.7 MN Public Radio. Five years management experience, college degree, understanding of public radio. Resume, cover letter, salary needs to MN Communications Group (311M), 445 Minnesota St., Ste. 500, St. Paul MN 55101-2123. This is a station that Wayne Eddy, president of the MN Broadcasters Association, called a drone. Unlike commercial stations, MPR stations "do not broadcast any local public service announcements. Many, if not most, of MPR's 28 stations are unmanned drone operations that merely rebroadcast KNOW and KSJN" in the Twin Cities.

Bill Kelsey has retired from IRIS, the radio reading service in Des Moines, and they need a new director. For info: (515) 243-6833. A new reading service is starting "soon" in Tallahassee; it will be associated with Florida State University, and a new service is coming on board in Wilmington NC; all of these may need personnel and receivers.

FM Atlas-16th edition, 224 pages, many new maps, new editorial content, updated Portland FM station history, and more! \$16.50 plus \$1.50 shipping/handling. Mail orders only to: PO Box 336, Esko MN 55733-0336. Books are at the printers in MI and should be ready by mid March.

1975 WFTDA TV Station Guide with maps; the book has never been updated, \$9.95. FM Radio-Electronics magazine, Aug., 1943, \$15.00, very good condition, with cover story of Paxton's W43B and more. "FM For Education," a 1948 book on early public radio, \$7.00, 1964 Lafayette radio-electronics catalog \$24.95. Other historical materials available. Add \$1.50 shipping per order. VISA, MASTERCARD, (800) 605-2219.

**FM FORUM—COMMENT BY ELVING**

With my FM station application having reached the FCC Feb. 2 (along with \$2335 filing fee), and the FM Atlas at the printer, this month's issue is a bit late. Plenty of FM Forum items and news are held over for March.

Until then, *Bruce F. Elving*

 TX Galveston KQQK 106.5 S, k, still "Tejano  
 106," having been bought for \$11.5 million  
 cash by El Dorado Communications, owner  
 of KXTJ 107.9 Beaumont-Houston. Ross  
 Perot is one of the new owners. Thus one  
 company controls the Tejano radio advertising

market in Houston. "Tejano music, though  
 typically produced by Texas-born artists, is  
 frequently in Spanish. It's been described as a

fusion of many sounds, from country to salsa  
 to pop—with a dash of German polka music."  
 At KXTJ and KQQK on air personal ities "slip  
 effortlessly from English to Spanish and back  
 again." This linguistic shift is called "code-  
 switching," and the language has been called  
 Spanglish—a mix of Spanish and English.  
 "Tejano is a group that moves comfortably in  
 mainstream society and in the Hispanic  
 world," Lopez Negrete, an advertising execu-  
 tive, said. "Tejanos have a longer time of  
 residence than listeners to all-Spanish stations;  
 they frequently have a higher income level,  
 and they spend more. . . . Within the past  
 decade Tejano artists such as Selena and La  
 Mafia have helped pull in younger listeners,  
 Becky Munoz-Diaz, KXTJ general manager,  
 said. KXTJ has lost money until very  
 recently, while KQQK made about \$3.5  
 million in revenues in 1994, with \$1 million  
 profit. The two stations are expected to bring  
 in about \$6 million in revenue this year.  
 Pictured are John Herrada and Ms. Munoz-  
 Diaz, both of KXTJ.  
 TX Granbury KCYT 106.7 S, k, Tejano, parallel

MEXICO—Boquillas is in CL, Santa Elena is CL (or "Chi hua<sup>2</sup>"); dislike rather intensely your made-up Mexican state abbreviations, mostly unknown in Mexico. "None" of the TX maps, atlas I had with me thought it worth showing that the Coahuahila, Chi hua<sup>2</sup> border occurs somewhere across from the middle of Big Bend National Park."

**SAP/SCServices**

*Symbols are as in the "FM Atlas"*  
AL Tuscumbia WVNA-FM 100.3 1P, 67 kHz assumed  
CT Norwalk WEFX 95.9 t(), ID with Stamford  
GA Atlanta WAGA-TV 5 has NOAA weather on itSAP (KEC80). "In the early '70s, the only thing on SCS in Atlanta was tM. Atlanta had Muzak on WSB-FM 98.5, ADT on WLTA 99.7 and Seeburg on WBIE-FM 101.5. ADT went silent in 1974, and a few years later Muzak bought out Seeburg and moved to 101.5, where it remained for many years before falling victim to direct satellite delivery. I also witnessed the arrival and departure of ABC Radio Network news feeds, Physician's Radio Network, voice paging, and gospel music." The calls for the \*100.7 translator of WJSP-FM 88.1 Warm Springs GA (last month, p. 4, col. 1) are W264AE.  
IA Cedar Rapids KDAT 104.5 no SCS; had tX, but looking into the possibility of using it for relay of KTOF 1360 AM. The Christian format which was on 104.5 has taken over the former KHAK AM, which does not have very good coverage. "We want to get on a subcarrier with wider coverage so people out in the fringe areas won't be mad at us."  
NV Henderson KWNR 95.5 t(X), with a special 57 kHz RBDS-activated billboard mentioning the song being played, and will display a welcome to NAB delegates during the convention April 9-13.  
NM Farmington KPCL 95.7 still tU, 92, but thinking of adding Children's Sunshine Network. "Some radios could be small, but others would have to be large, as the people live in hogans. A large hogan would require a radio with enough volume to be heard by all the extended family."

**Selected AM Happenings**

AR Benton KGKO 850 silent  
 NJ Mount Holly WWJZ 640 back on after a year's hiatus, but no longer at the previous 50000 watt level; it "barely covers 16 interference-free kilometers at night. . . The format is still '20s to '50s big bands/standards."  
 OH Kent WJMP 1520 gives up all sports in favor of simulcasting low power TV WA!29.  
 OK Tulsa KQLL 1430 becomes sports and classical. All classical noon to 5 p.m. and 8 p.m. to midnight in AM stereo, except for play-by-plays. Frank Christel's KWGS \*89.5 also has classical 7-11 p.m. weekdays, Tulsans with cable can get WFMT at 103.7 and Classical Collections at 92.5. KOSU \*91.7 has classical and NPR, "but shaky reception in Tulsa." Dr. John Major, KCMA 92.1 Broken Arrow OK, has decided to retire, merging the station with KQLL, owned by Pathfinder Communications/Truth Publishing of Elkhart IN.  
 TX Wichita Falls KWFT 620 "still off the air."  
 VA Norfolk WZAM 1110, silent for over five years, returned briefly in March, 1994 "only to relapse into silence by late July. In spite of the fact that it was the second southern gospel music format station in the market, WZAM was apparently the victim not of fierce competition but of a lack of operating funds. Manager Tony Johnson had revived the station under a one-year lease, but was unable to secure financing to purchase the station outright, perhaps due to his management company having recently declared bankruptcy. Even worse, WZAM was already mired in a tug-of-war between several creditors," writes Tim Kridel, Popular Communications, March, 1995.  
 NS Sydney CHER 950 (see last month, p. 7, col. 1): "Celtic Broadcasting looks for a swift CRTC hearing into its application to buy bankrupt CHER Sydney and change its frequency to FM."  
 ON Welland CHOW 1470, "unprofitable for three years," was sold for \$550,000.  
 "Looking forward to the new FM Atlas."  
 Some information supplied by reporter Mike Foley of Houston TX was "according to the Per-Con FCC Frequency CD-ROM—nearest thing! If you don't have one, get one!"

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is deadline for replies. Stations affected, if any, are listed.*

KY Stamping Ground 96.1A for 99.1A, WKYI, Apr. 24, May 10  
 MI Iron Mountain 106.7A, Apr. 24, May 9

MS Yazoo City 93.7A—proposed deletion of this vacant channel, Apr. 17, May 2. This may clear the way for WHJT 93.5A Clinton MS to expand.

ND Harwood 100.7C3, Apr. 24, May 10  
 OR Waldport 105.5A, Apr. 14, May 1  
 TX Clarendon 99.3C2, Apr. 14, May 1  
 TX Driscoll (move from Robstown) 104.5C3 for 105.1A, KMIQ, with Gregory, May 1, 16  
 TX Gregory 104.5A, delete this vacant assignment  
 TX Madisonville 102.3A, Apr. 14, May 1

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

FL Apalachicola 93.5A assignment deleted  
 MI Menominee 103.7C3 for 103.9A, WHYB, with Oshkosh WI

 WI Oshkosh 103.7C3 for 103.9A, WVBO, with Menominee MI

**FM Share Only 55% In Canada**

After January's issue mentioning 80 percent FM listening in the U.S., according to the RADAR report, the Canadian magazine Broadcast Technology, mentions "the trend to FM is much slower in Canada." Brian Parish of the BBM [Bureau of Measurement] told BT that the national share for FM was at 47 percent in 1990, 50 percent in 1991, 52 percent in 1992 and 55 percent in 1993, the latest year for full data. There is considerable variability according to province or region of Canada. Percentage listening to FM was 66 in Quebec, 60 in Ontario, 50 in the Atlantic region, 46 in BC, 41 Alberta, 39 Manitoba and only 19 in Saskatchewan. Parish found the growth of FM greatly influenced by the number of stations licensed. "Other factors would include the wide coverage attained by AM stations on the Prairie provinces," the magazine reports.

Another Canadian trade paper—Broadcaster—has an item on the Canadian Association of Broadcasters wanting more regulatory flexibility. The CAB is asking to make Canadian talent commitments voluntary, drop the hit to non-hit policy in markets where all stations agree, and allow 14 more hours per week of FM-AM simulcasting from 6 p.m. to 6 a.m. A review of 216 markets shows 150 AMs could find immediate FM replacement channels. I don't think Canada has had the equivalent of the U.S. Docket 80-90,

which created hundreds of new allotments, along with new classes of stations, such as C3 (3100 to 25000 watts at up to 100 meters).

**Small Print Happenings and FM Industry News**

"A station fined for violating the main studio rule—KQQK 106.5 Galveston TX, \$7,500. [See related story above, under "Formats."] I mentioned this case to a local broadcaster—KLXK 101.7 Duluth—which has a studio in the city of license, but programs the station from Cloquet MN, telling them I have been by the studio five times during business hours and found nobody there. There should be a meaningful staff presence by at least two management-level employees, plus the ability of the public to consult the public records file. However, a station can petition for a waiver from the FCC to have its studio outside its 70 dBu contour.

John White denied review of his application for 106.3 La Crosse WI. White, former owner of KQYB 98.3 Spring Grove MN and a ham radio operator, lost out because he did not pay his \$6070 hearing fee by the deadline. Lately, however, because of the Bechtel decision, the FCC has not been collecting hearing fees. And the FCC threw out two applications for 103.3A Lenoir NC, those of Donnie Goodale and Maria M. Ochoa. Goodale had provided inconsistent geographic coordinates for its proposed site, with the application dismissed under the FCC's former "hard look" policy. Ochoa's bid was dismissed because the review board found her not qualified to be a Commission licensee, and that her arguments "were previously considered and rejected and the petition is an unauthorized pleading which will be dismissed as repetitious." The station is on the air in stereo as WKVS, "Kicks 103."

The National Association of Broadcasters at work: 1) Its radio board decided to support the elimination of all rules that limit the ownership of radio stations—this after the NAB couldn't decide about expanding TV ownerships. 2) Hundreds of new or modified FM station applications have been delayed because of FAA (Federal Aviation Administration) concern about FM interference to air navigation equipment. The NAB has filed for rule making at the FCC arguing that the FAA computer model for predicting interference is too restrictive on broadcasters because it was designed to protect "worst-case" performance characteristics of avionics receivers. NAB argued that the FCC, alone, should regulate potential interference to aviation frequencies so that broadcast applications won't have to be processed by two different agencies before action is taken. The FAA, on its own, has announced formation of the VHF Navigation and Communication Frequency Utilization Working Group, which is charged with recommending new methods of increasing the immunity of avionics receivers to intermodulation overload caused by powerful FM transmitters. The NAB will be participating in this group to "further promote the broadcast position," according to Dave Wilson of the NAB's Science and Technology Department.

Chicago's WXRT 93.1 and its AM sold for \$60 million to Group W, owner of WMAQ AM. Now Group W is looking for an FM for its Boston station, WBZ; it formerly owned 106.7, now WMJX, and up to about 1954 owned WBZ-FM 92.9 Boston and WBZA-FM 97.1 Springfield. Unfortunately, Westinghouse didn't take FM seriously until the early '90s when FM station prices had skyrocketed. US Radio, owned by black broadcaster Ragan Henry, buys KDDK 100.3 Jacksonville and KMJX 105.1 Conway. No word on what will happen to KMJX's LMA with oldies KOLL 94.9 Maumelle-Little Rock. In Toledo, WLQR 101.5 being bought by Noble Broadcasting, which already owns WVKS 92.5.

Poised to emerge from their silent status—WSCP-FM 101.7 Pulaski (near Syracuse) NY and

its AM, as Tri-County Broadcasting buys them for \$170,000. KUFJ 94.5 Gilroy being bought by KSJO 92.3 San Jose, while a duopoly in Austin TX combines KGSR 107.1 Bastrop with KOKE 101.5 Giddings in a \$3.1 million deal. WOLL 94.3 Riviera Beach to be combined with OmniAmerica's WEAT-FM 104.3 West Palm Beach. WHOM 94.9 Mount Washington NH gets an FM duopoly partner in WCSO 97.9 Portland as part of a \$1.9 million transaction.

Two FM stations calling themselves "The Peak" in the Denver area have caused confusing diary entries. Arbitron's books were recalled because KXPX 96.5 Evergreen CO did not get all the listening it should have, with "Peak" listening credited to KRDO-FM 95.1 Colorado Springs; this according to the "M Street Journal."

James Quello, 81, announces he'll retire from the FCC when his term ends June 30, 1996. He's the Democrat-broadcaster that the NAB has admired, and was appointed by President Nixon in 1974. He agreed to remain as an FCC Commissioner until a replacement is found. Quello is slated to deliver the keynote address to kick off the broadcast engineering conference, April 9, a part of the NAB convention in Las Vegas.

Besides Quello, all the other FCC Commissioners will attend NAB '95, April 9-13. They'll share, and of course, they'll absorb much of what the industry wants them to hear. Chairman Reed Hundt addresses broadcasters April 11 at a special breakfast, and a "regulatory dialogue" occurs that day with Commissioners Andrew Barrett, Susan Ness and Rachelle Chong, as well as NTIA head Larry Irving. There'll be more than 1000 exhibitors at the show. Tours will include KFMS 101.9, KEYV 93.1, KSNE 106.5, KWNR 95.5, KKLZ 96.3, but at a cost per person of \$30, on a space-available basis. Robert A. Orban, inventor of the Optimod FM exciter-stereo generator, to receive an NAB engineering award for radio, while Carl G. Eilers will get a TV engineering award; in the '50s and early '60s he developed and co-invented the FM stereo broadcast system used in the U.S. and most other countries.

FCC Chairman Reed Hundt proposes automatic license renewal. The proposal would eliminate comparative hearings unless the broadcaster had serious FCC violations, including not paying fees or fines.

The Commission denied David Popkin's petition for reconsideration of its order which stated that all FCC filings utilize 12-point type, double spaced and margins set so that printed material does not exceed 6 1/2 by 9 1/2 inches (here is an FCC inconsistency: everything else in its rules is metric). Popkin contended that the requirements would preclude use of a standard typewriter, and many computer word processing programs do not provide for the control of the size of typefaces used. The FCC found no merit in Popkin's contentions and nobody else had filed in support of his position. That order prompted me to buy two 12-point typefaces for this IBM EScomposer:

**Aldine Roman 12 point medium and Bodini 12-point bold. The Bodini typeface is found in the new "FM Atlas" for some of the headings.**

Infinity Broadcasting muscled into sports, as it wins broadcast rights to carry the Atlanta Falcons for three years on WZGC 92.9. It is said to be the first Infinity FM to carry NFL games, wresting the rights from WSB (AM). It plans to build a network to carry the games throughout the South. Infinity also has rights to the Cowboys, Eagles, Patriots, Jets and the Buccaneers, but some of those games may be on AM stations.

Rep. F. James Sensenbrenner (R-WI) introduced a bill addressing performance rights fees of stores that play broadcast music. HR 789 would also regulate per-program licences for radio and

impose licensing requirements for convention sponsors. The NAB-supported bill has been referred to the House Judiciary committee.

Many FM stations use so-called Home Pages on the internet as a way of being in touch with listeners and colleagues in various markets. First were public stations that already had Home Pages through their institutions, but commercial stations have begun to exploit the technology. KJHK \*90.7 Lawrence KS uses its Home Pages to link with Leland Stanford Junior University's separate and complete list of similar U.S. outlets, and KJHK has set up an e-mail request line. KDFC-FM 102.1 San Francisco's Home Pages includes a detailed coverage map, while its sister station, KKSJ 103.7, offers several phone numbers and e-mail addresses where on-line users can stay in touch with on-air and management staff, along with 10 additional click-on features offering text specifics on topics ranging from news and traffic reports to artist profiles and special musical offerings. Mormon-owned Bonneville International stations provide a mission statement and core values. KMPS-FM 94.1 Seattle asks listeners to fill out a brief application to give the station some idea of the demographics of those responding, and it offers a picture of a featured artist. WZLX 100.7 Boston's Home Pages features a menu of station promotions, a rock music trivia contest and a feedback section. The NAB has its own Home Pages, offering documents, a user's guide, and information on publications, seminars and legislative concerns. NAB can be contacted at <http://www.nab.org>.

Denon, Grundig, Blaupunkt and Onkyo displayed RBDS receivers at the recent Consumer Electronics Show, Las Vegas. But Delco's interested, and has a toll-free number, (800) 748-0422, for customers who want to retrofit an RBDS receiver into their GM cars, at \$450. Buyers of new cars can have the dealer place the order and install the system.

If federal funding leaves public radio, and some stations go off the air, who might be left? Why, religious broadcasting, of course! KGBI \*100.7 Omaha is one station not relying on federal funding, and it realized \$576,701 in sharon pledges, exceeding its \$575,000 goal. Among those helping out were Don Hawkins of "Back to the Bible" broadcast from nearby Lincoln NE.

Community stations and their fund-raising: KAOS \*89.3 Olympia WA \$18,000 during its fall membership drive, with the money to go for training services, music acquisition, overhead, program guide and signal enhancement plans. WYSO \*91.3 Yellow Springs OH \$57,000 by 919 new and renewing members. "The generous support made this WYSO's most successful fundraiser to date." KGNU \*88.5 Boulder CO received \$81,880 in its fall fundraiser. Doug Sweet, station manager, KMUN \*91.9 Astoria OR, asks in the NFCB's "Community Radio News": "Why are religious stations all owed free spectrum space to both continually fundraise and to plug candidates and issues of their choice (uniformly conservative) without being labeled as is public radio?" A manager of a Christian station told me that outfits like Family Radio flood the FCC with translator applications. They don't have to pay filing fees, like commercial broadcasters do, yet each translator application costs the FCC \$500 to process. Thus, it is the commercial broadcaster who is subsidizing public and religious station applications.

Many public stations with classical music avoid opera, and those that had it have often dumped it. WKCR \*89.9 New York has jettisoned the quirky and outrageous opera show that Stefan Zucker conducted for 12 years on Saturday nights. "So neither Mr. Zucker nor his audience took it well when the station's student-run board dismissed Mr. Zucker in November, saying that he violated a cardinal rule of college radio by failing to support and encourage students." He had gone so far as to disparage students by urging listeners to harass student

programmers doing stunts in his time slot, the board charged. Zucker's dismissal places in conflict two main mandates of college radio—to educate students in radio broadcasting and to give the public innovative and diverse programming. Complaints have even gone to the FCC, which is not expected to act.

FM totals as of Feb. 28: 5136 (92-108 mHz), 1740 (88-91.9); AM 4912, all licensed and on the air.

From the classifieds: WJCR-FM \*90.1 Upton KY, a southern gospel station with a shortwave adjunct, needs a 20 kw (and up) FM transmitter. Will give tax credit for such a donation. Gary Richardson, WJCR, Box 91, ZIP 42784.

FM radio card for PC, works with Windows and DOS software and antenna. "Run programs while listening to FM 88-108 on your speakers, headphones or soundboard." \$55 to Radio Associates, PO Box 168, Melvin Village NH 03850.

For sale: 4-bay FM 91.5 antenna, Rohm UNR 19 1/2 meter tower, \$1000, M. Taylor, KHFO, Rt. 1, Box 1821, Neosho MO 64850; (417) 451-5636.

NAB/Denon FM tuner with AMAX, FM stereo, sale price while quantities last, NAB member price \$379+ \$14 shipping/handling. Seems like the broadcasters want the newer tuner with RBDS, which is priced around \$300. Call NAB at (800) 368-5644 to order.

Syracuse NY FM-AM area combo for sale. Owner retiring, \$418,000, or \$618,000 with terms. Ron Hickman (908) 850-5188. I wonder if this is WY59.9-AM Cortland?

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

Continuing with comments on SCS engineering for reading services by Steve Terry, WYPL \*89.3 Memphis: One of the threats to 67 kHz operations is from the Denon-RBDS system, a high speed data service that wants 20% injection for their subcarriers, forcing any reading service on the same station to get out with a poorer signal. Seiko is leasing up to 12 FM stations in a market to get good coverage, and they're using 66.5 kHz, according to Terry. Another article, "Legal SCA Receiver?" summarizes my participation in June's reading services convention: "If you were not part of the party scene in Little Rock you probably missed one of the most interesting 30 minutes of the NARRS convention. A lively discussion occurred between several RRS managers and one manufacturer. This particular manufacturer even went so far as to label my station and one of the very first RRS as pornography outlets. The major emphasis of our discussion was whether or not it is legal for a manufacturer to distribute SCA receivers directly to our potential listeners, without our permission. . . . The manufacturer stated that he would continue to sell SCA receivers to anyone who wished to purchase one from him regardless of our concern and/or whether or not it was legal. He felt that all citizens had a right to listen in on any frequency, including SCA." Then is quoted in bold-face the July 13 article from "Radio World" newspaper mentioning my modification of the G-E Superadio with variable SCS tuning, 57 through 92 kHz.

The 21st annual National Association of Radio Reading Services convention is June 1-3 in Salt Lake City. "We'll be at the Olympus (Best Western) Hotel, just [10 km] from the airport and walking distance to Convention Center, Temple Square, Symphony Hall and two shopping malls." Contact Robert Wall, UT Radio Reading Service, 2150 S. 330 W., Ste. 16, Salt Lake City UT 84115. For vendor information call Steve Terry, (901) 725-8833.

Endorsing my radios was Joe Taylor, Glasgow KY, who sent this out on a

computer BBS: "I bought an SCA module and installed it in the G-E Superadio III with no problems. Now I have SCA on the FM dial as well. . . My unit has fantastic AM, great FM and a darn good FM SCA with a yellow L-E-D at the far left end of the dial to signal capture of an SCA signal. Bruce Elvin's [sic] SCA modules work great!"

Plugola department. The Los Angeles Radio Guide lists FM-AM stations by time of day and by format, concise with articles, but I'm not sure of price or how often it comes out. My contact there is John Reid, marketing director, 7720 E. Camino Real, PO Box 179, La Costa CA 92009; (619) 436-6080. One guide, however, bit the dust—"The Great Arizona Vacation Radio & Travel Guide," by Funn Productions, PO Box 57822, Phoenix AZ 85079-7822. Mike Femyer says, "I have folded the operation of the Travel Guide and no longer need" FMedia! His prototype issue had translator data from the "FM Atlas." Roudabout Publications, 2767 S. Parker Rd., Ste. 240, Aurora CO 80014-2701, is doing a "Road Trip USA" showing the most scenic roads in various parts of the country, with FM Atlas and other travel references mentioned. It's quite large and promises to come out in updated editions, \$18.95 plus \$3 shipping and handling.

Daija Enterprises, Box 24, Cambridge WI 53523-0024; (800) 824-4359, has a new FM station logbook at \$19.95 or the same price on IBM or Mac-type computer disc. I received a print edition, which is many pages drilled for a binder. Main station info is by frequency, but there are cross references by call letters and geography.

Henry Studebaker's Country Music Radio Atlas won't be out early in 1995, unlike most other years, as he's been too busy to produce one. It's still 3-4 months away. "When do you expect to get your next edition of FM Atlas out?" he asks. I hope in about 10 days.

Donald Fritz sent a clipping by Steve Hockman in the Los Angeles Times about KSCA 101.9 Glendale CA and its album alternative music, claiming the music sounds good at first but it is hard to take for any length of time. Culprits cited are lack of personality in the deejays, and not playing blues and soul songs in depth. "They'll play Eric Clapton but not the blues giants that inspired him. Similarly, the forays into reggae, country and even alternative rock are fairly timid, with nothing more adventurous than such worthy but predictable choices as Bob Marley, Nanci Griffith or Gin Blossoms, respectively, getting air time. And there's waaaay too much in the oldies department—even if they're oldies that we haven't heard in a while. One would hope that KSCA's ambition would be more than just to make KLSX's 'classic rock' obsolete."

Another duopoly item—WOOD-FM 105.7-AM Grand Rapids officially took over WBCT 93.7 there. The WOOD stations paid \$12.5 million from Radio Associates. "Quite a profit for Radio Associates, who paid \$4.5 million for what was then WJFM in May, 1992. No changes in (No.

1 rated) WBCT's country format are anticipated," reports Phil Boersma. Now WOOD-FM owns two of the nation's highest powered FMs: WOOD-FM has 265,000 watts effective radiated power and WBCT has 320,000; both used to be heard regularly in Duluth in the days when there weren't so many FM stations.

Christopher Miller, Good Thunder MN, was hearing both Worthington MN stations of MN Public Radio with classical, [tereo]. I think KNSW \*91.7 was having trouble picking up the network feed, and will have resumed its monophonic news/talk way of life by now.

The National Federation of the Blind, along with USA Today, inaugurates a talking digital newspaper, which users can dial up on computers with a modem. It is available in the Washington-Baltimore area toll free, but users in other areas will have to pay long distance charges until such time as toll-free lines may be installed. Similar non-SCS reading services are provided by the Washington Ear, the State of MI, based in Lansing, and MN Talking Book, St. Paul.

A NJ reader purchased a small FM transmitter for \$19.95 from Everything Electric, Crossroads Plaza Shopping Center, Rt. 38 at Cooper Landing Road, Cherry Hill NJ 08002. Add \$3.00 shipping/handling; NJ residents add 6% sales tax. "I have connected it through a VHF antenna amplifier to an unused roof TV antenna increasing its range to about half a mile. . . I use it to rebroadcast Digital Cable Radio, hard rock WAXQ and WXRK's Vin Scelsa show to my Walkman while doing yard work. Those NY City stations are 80 miles away with adjacent channel Philadelphia stations 15 miles away. New York is normally only receivable through a roof-mounted Stereo Probe 9 antenna hooked to my trusty Pioneer 750 receiver. Now with my own 'translator' I can listen regularly anywhere I have a radio. The transmitter distributes music to every room in the house for a fraction of the cost of those \$200-a-pair wireless speaker systems." He reports WTRI 1520 AM Brunswick NJ, which had stereo, is now mono, but has good audio as heard on a Superadio III in wide band mode.

Jim Cumbie sent a piece about KHKS 106.1 becoming first place in the Dallas-Fort Worth ratings, dethroning KSCS 96.3, the country powerhouse. KSCS tied for second with KYNG 105.3. Not bad for a Denton station, which was to have built a translator in Dallas on 106.3, but which has never operated.

A possible radio talk show host is Mario Cuomo, ousted by the voters as governor of NY. Ed McLaughlin, who helped rush Mr. Limbaugh into talk show prominence, and head of EFM Media, is courting Cuomo, possibly to appear on the same stations as Limbaugh. Cuomo is also lining up speeches, a sideline that has netted him more than \$1 million during his 12 years as governor. I know he was an occasional guest on WAMC \*90.3 Albany, but those were free appearances.

Doc Searls and the AM vs. FM controversy: "It's interesting to see you consider yourself to be running 'a civil rights group

for FM radio', and that you 'maintain the zeal of early FM proponents for an all FM world'. I didn't know your feelings were that strong on the subject. . . The engineers I know—and all of them work both FM and AM—have great faith in the digital systems that will bring much higher fidelity service to both bands. I'm not so sure myself. As one of the engineers put it, 'these are not technical issues; they're religious ones'. And those take forever. Translator listings—I would prefer to see them listed in the frequencies section. Second choice would be in the state section [of the FM Atlas]. The stand-alone section is not useful to me. The microtype is a good idea, because it does give a clear differentiation of status. I also like listing of watts for each station." [The new book does list translators in reduced type following each state—a formatting action that took quite a bit of time to set up, but well worth it, I believe. "CompuServe vs. Internet—First, I think you need to be on line. Yes, it will take some of your time, but it will be time well-spent. . . My recommendation is to try CompuServe first. Get involved in the Broadcast Professional Forum. Many of the people there already know your work, and you would be welcomed. The net gain would be good input for your publications, increased sales and productive participation in the broadcast community. I promote you often there." [Thanks, b.e.]

Clarke Ingram faxed an article that was in Radio World magazine about Moscow FM. My daughter, who is studying Russian in high school, was thrilled to see the words "Russian Radio" come across the FAX machine in real Russian! Stations are found both on the western FM band of 100-107 mhz, plus the original Russian UKW (ultra shortwave) band around 66-72 mhz. Radio 7 there broadcasts in English

on 104.7 and and 73.4. Here's their logo from the Fax machine; I gave the original article to Kim's Russian teacher.

A NJ rest stop named in honor of Howard Stern, who helped campaign for Gov. Christie Whitman. "I've always dreamed of a rest stop that I would drive by with my family and people would relieve themselves while they see my name," Stern told Whitman on his show. However, the NJ chapter of the National Organization for Women is opposing this. Gov. Whitman said that while she doesn't condone everything Stern does, the rest stop was a campaign promise and she will make good on it. But it's not just women's groups who object to the Stern rest stop. Radyo Pinoy (on a WBGO \*88.3 Newark SCS and soon to be on satellite) got an on-the-air phone call from a Filipino community leader who expressed outrage at Gov. Whitman's naming a "resting place" for the "dirty, ungroomed, rude, sarcastic and ill-mannered" Stern. Until April, B. Elmy

 CO Pagosa Springs K223AE 92.5  
 K248AF 97.5 (having moved from 103.9)  
 GA Thomaston WTGA-FM 101.1, having moved from 95.3  
 GA Woodstock W265AV \*100.9  
 IL Chicago WBBM-FM 96.3 "B-96.3" was forced to take down a billboard ruled to be obscene showing men's rear ends with caption, "A Couple Wise Cracks."  
 IN Muncie WWHI \*91.3, now plans to share time with cable station "WCRD" 107.5, operated by students at Ball State University. Muncie Southside High School would operate WWHI 8 a.m. to 2:30 p.m. weekdays, with the Ball State group running it from 2:30 p.m. to 8 a.m. and 24 hours on weekends.  
 MA Medford-Boston WXKS-FM 107.9's Matt Siegel's "Matty in the Morning" show syndicated to stations in Portland, Providence and Charlotte NC. "Sure, he'll make local references to Medford. Nothing can stop that, just like Howard Stern and Don Imus talk about

New York," said John Tarabedian, the show's syndicator. [h,v; 178 m  
 MD Salisbury WSCB \*89.5, now with 33000/  
 MI Cadillac WLXV 96.7 and Petoskey WLXT 96.3 programmed together, claimed on air as "125,000 watts," but the total of their radiated powers is only 107,200 watts. Their announcement is "confusing; they are not a grandfathered station."  
 MN Glencoe KARP 96.3, having moved from 96.1. This may cause WNCB 89.3 Duluth's new translator in Minneapolis, K242AI 96.3, to move to 97.7. WNCB can be heard in the metro area on 91.9 in Bloomington as well as the 96.3 translator, atop the IDS Center downtown. "I certainly welcome another station to the market, although I don't know how community-oriented a station licensed to a city 150 miles away will be, and I wish they wouldn't take up two frequencies (as KFAI is also doing). That doesn't make the best use of the available spectrum. Translators have a great potential for neighborhood or community radio. It's a shame to see them being used by existing stations to extend their reach for market-share purposes." K220EG \*91.9 Bloomington is in \$, but with a weak and somewhat erratic signal. Both that and K242AI suffer from low modulation. Primary WNCB now IDing as Duluth-Minneapolis-St. Paul.

MN Ortonville KCGN 101.5, but at about 50 percent power, since election day, 1994. Moisture accumulated inside the antenna atop Summit SD which caused burning. "The plan is to have a tower crew here in April when the weather is warmer. Please pray for calm winds (it's often too windy at our tower site) and their continued safety when they climb," says Al Gilbertson, chief engineer (pictured).  
 MN Waseca KRUE 92.1, but "low power"  
 MN Worthington KNSW \*91.7 back to mono, nt

 NJ Lincroft WBJB \*90.5, now with 22000 h, 19400 v; 34 m, d-a  
 NJ Long Branch W209AR \*89.7, announced on WWFM as "under test authority," and "sometimes it interferes (in Queens) with stereo reception of WSOU 89.5 South Orange NJ." WWFM now have two main transmitters

Chief Engineer Walt Gradzki at 8-watt translator atop Society Hill Towers in Philadelphia.

and seven translators, including one in downtown Philadelphia. "For now New Jersey's only all classical music station is thriving." W209AF may be NJPB's only hope of reaching populous NE NJ. "Finding an available frequency is nearly impossible," said George Schwartz, stations' general manager, of the situation in that part of the state.

NJ Newark WBGO \*88.3 with the same antenna height and power, "but it seems stronger than it used to be. When I first got the Superadio I could hardly pick up the SCAs, but now they're as strong as any on the dial."

NY Balmville W202AR \*88.3, but giving its location as Newburgh, where there is to be a co-owned station (albeit relaying WFGB \*89.7 Kingston instead of WFME \*94.7 Newark NJ), W213AM 90.5.

NC Chapel Hill WXYC \*89.3 began simulcasting 24 hours a day on the Internet in December. "this is done via phone lines so the sound is not so great." Address <http://sunsite.unc.edu/wxyc/>.

PA Allentown WDIY \*88.1 with \$, NPR and is "Lehigh Valley Public Radio"

WFMZ 100.7, not yet changing calls to WKKT PA Kane WPSB \*90.1 heard with test tones in stereo, with a "strong" signal. Expected on later this month.

SC Kingstree WWKT 99.3, still on 98.2

TX Jasper KWYX-FM 102.7, still on 102.3

TX Seymour KSEY-FM 93.9, still on 94.3

WI Superior KZIO 102.5, was around 10 watts for about 2 weeks (transmitter Duluth MN), and heard carrying on-air parodies about the lousy reception, "... transmitter stinkus."

ON London CJBX 92.7 "is the most-listened-to radio station in all southwestern Ontario," says "Broadcast Technology" magazine.

PQ Quebec CBV-FM \*95.3 and Rimouski CJBK-FM \*101.5—the CBC plans to reinstate local programming

FRENCH WEST INDIES St. Barthelemy Island Radio Transat 100.3 on air as of January, 1995. "Their studios and transmitter site are almost at sea level on this very mountainous island. They will be relocating their transmitter in the very near future to a higher location." The translation of "Radio Transat" is a radio station for people relaxing in a chair; its format a mix of local, French and some American music, "not necessarily of a relaxing nature." Owned by Christian LaPorte, at Galerie du Commerce, St. Jean, 97133 St. Barthelemy FWI. The island is 24 km E. St. Maarten. The other station there is "Radio St. Barths," frequency not given; it's been on for about 10 years.

NETHERLANDS ANTILLES PJR-1 FM 92.3 went on air in January, with antenna mounted on the side of a house, not far above sea level, but plans to install an antenna on top of "The Quill" which is the highest point on St. Eustatius (599 m; with an additional 40 meter tower with a power of 5000 watts, and a 12-bay antenna, giving an ERP of about 30000 watts h & v). An AM station on Sint Eustatius Island failed financially about 10 years ago, PJE-3 1120 kHz. "To top things off, the tower fell due to the salt corrosion/rust from nearby breaking waves of the Atlantic Ocean. The island has almost no retail economy, as it is home to only about 1800 people." When the power increase is implemented PJR-1 should be receivable on 15 other islands. It uses the Freedom Satellite Network, along with locally-produced blues, jazz and contemporary Christian music. Write them at PJR-1, Sint Eustatius, Netherlands Antilles.

WUSL 98.1 t(), plus M,R
WIOQ 102.1 t()

WMGK 102.9 t(). These five stations join eight
others in the market to have RBDS. These
Philly stations are among 500 in the 25 largest
markets which will receive RBDS equipment
through the Electronic Industries Association,
whose consumer electronics group is spending
up to \$1 million for the project. Each station
will provide \$5,000 in advertising credit to
the EIA to promote RBDS usage. Delco
Electronics, Denon and Pioneer (USA) are
participating in the EIA program. GM-Delco
offers an RBDS retrofit for all vehicles
produced after 1988, while Audi and Porsche
announced that all of their radios will be
RBDS-enabled. The NAB urges broadcasters
to embrace RBDS, saying that if a high speed
data channel is agreed upon for FM stations,
it would not be at the 57 kHz RBDS setting.
RBDS is normally at 2 percent injection, but
can be as high as 20 percent in the absence of
other subcarriers.

 TX Tyler-Longview KNUE 101.5 with Jacksonville  
 KKUS 104.1 with Longview  
 TX Whitehouse KISX 107.3 with Longview-Tyler-Jacksonville

**Selected AM Happenings**

ME Monticello WREM 710—the FCC reduced from \$10,000 to \$2,500 fine for transferring control without prior approval. In reducing the fine, the Commission noted that "WREM is a 5000-watt directional daytime-only radio station licensed to a community of 425 people... These factors suggest an inherently low station value," and the FCC recognized that the facility had an "apparently unprofitable history."  
 NY New York WZRC 1480, owned by Infinity Broadcasting and leased to Radio Korea NY, "no longer gives any station ID. Maybe one of your readers can explain?"  
 OH Marietta WYLI 910 silent, but plans to return next month  
 ON Toronto CKYC 590 "signed off Feb. 6, inviting listeners to tune in 820. PD Al Kingdon noted that CKYC signed off with Kenny Rogers' "Goin' Out in a Blaze of Glory", as did CFGM some four years earlier."  
 YT Whitehorse \*810—"The CBC will operate a weather station... for Environment Canada, 50 watts."  
 "I always look forward to receiving the very interesting FMedia! Keep up the good work."

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is deadline for replies. Stations affected, if any, are listed*

AK Fairbanks 96.9C3, May 22; June 6  
 CO Grand Junction 100.7C1 for \*88.1A, KAFM, June 5, 20 [94.5C, May 11, 26  
 FL Parker (move from Port St. Joe) WPBH/  
 MT Billings 104.5C and 107.5C, June 1, 16  
 NV Pahrump 95.1A, June 5, 20  
 NC Fair Bluff 105.3A—delete channel; or impose a site restriction on Fair Bluff to accommodate WDAF-FM 105.5 Darlington SC's proposed upgrade from C3  
 SD Rapid City 92.3C, May 22, June 6

**National Semiconductor Plans to Develop ICs for Digital Audio Broadcasting**

National Semiconductor Corp. has joined a group of broadcasters to help bring about an in-band terrestrial system of broadcasting. It has agreed to develop ICs (integrated circuits) for the Chicago-

based USA Digital Radios' FM and AM systems using the IBOC (in-band, on channel) mode, as announced at the National Association of Broadcasters convention. Keith Jackson, National v-p, predicted the ICs will be on the market "in the near future." It will take, however, a year before prototype devices are available. USA Digital said it will eventually license alternative sources of the digital radio silicon, but declined to elaborate.

**Tejano Artist Selena Gunned Down**

Last month, the burgeoning format known as Tejano was defined, with Selena mentioned (p. 3, cols. 2-3) as one of the leading artists in that genre. Poised to release her first album in English, and considered the Mexican-American artist to watch, Selena was shot to death at a budget motel after an argument with the former president of her fan club. Selena Quintanilla Perez was 23. I wanted to hear some of her music when visiting KUMD \*103.3 Duluth, but was told they had none of her recordings; she was too "mainstream" for the station.

**Selena**

Howard Stern, whose program originates at WXRK 92.3 New York, issued a rare apology to Latino groups after he played a gunshot sound effect over a Selena record as Robin Quivers read a news story about the singer's murder. Spanish radio stations around the country told listeners to call K-Rock and complain. Stern's apology, in Spanish, mentioned he's a satirist and his remarks were not meant to offend the fans or family of Selena, whose death he called tragic.

**Small-Print Happenings and FM Industry News**

Receiving fines were these unlucky 105.7 stations: WWCT Peoria IL \$10000 for EEO violation, WRSF Columbia NC \$12000 (reduced from \$20000) for violating the main studio rules. Also fined: WMYG 96.9 Braddock PA \$16000 and KSCA 101.9-AM Glendale CA \$20000, both for EEO violations. The NAB has proposed that the FCC reduce most of its fines, saying "the punishment often well exceeds the gravity of the crime."

A "quadropoly" allowed in IL, for up to one year supposedly, to the following stations under the Evergreen umbrella: WVAZ 102.7 Oak Park, WEJM-FM 106.3 Lansing to join WLIP 97.9 and WRCC 101.1. This violates the local numerical limits of the FCC ownership rules. Evergreen is to divest itself of two FMs in Chicago within the year, but I predict the NAB will get to the FCC first and remove all local ownership restrictions in radio, thus allowing Evergreen not only to own four FMs in the Chicago market, but even add more.

Two items from the FCC messenger service dated Apr. 1: "The FCC will buck the trend towards easy solutions and will forgo the switch to Daylight Saving Time. Instead, it will continue its tradition of falling back while others spring forward. A fall-back period of several years is

being considered!" And this absurdity: "A man claiming to be Jimmy Hoffa, I think, was found in the main reference room of the FCC. He said he had been waiting for his requested files for a 'long time', and appeared disheveled."

The FCC proposes modified criteria to select among applicants for noncommercial educational broadcast stations. The Commission received widely divergent comments from two groups, but seeks specific proposals on up to eight specific issues. In addition, the Commission has imposed a partial freeze on the processing of mutually exclusive NCE applications until it has adopted new or revised criteria.

A "day in the life of FCC agents" inspecting a Denver radio and television station has been prepared by the Denver SBE, Chapter 48, in association with the FCC Denver field office. The video is to assist station owners, managers, engineers and employees in complying with FCC regulations; contact the Denver FCC office at (303) 969-6497, Christopher Haskell, public affairs specialist, or Leo Cirbo, engineer-in-charge.

The National Federation of Community Broadcasters received an FCC reply to its petition concerning 19 religious translator stations proposed by Power du Pree Broadcasting Co., John La Tour, of Fayetteville AR. The NFCB contended that these stations, located throughout the country, would be used for a for-profit business and would constitute unequal competition. The FCC notes that Power du Pree could not receive compensation from the primary station, but can still go forward with the applications. La Tour had until Apr. 9 to inform the FCC of his intent to pursue the applications.

Sharon Rockefeller resigned as president of WETA \*90.9, etc. Washington DC. She had not been able to regain her health and energy from an auto accident two years ago. Three ribs were cracked, a lung punctured and her back wrenched when a large tree fell on her car during a thunderstorm. She was to have returned shortly "in a new role," according to information in "Current" newspaper for public broadcasting. Peter V. Lomardo joins that paper as business manager, succeeding Suzanne Rogers, who moves with her husband to San Antonio.

A Canada merger involves CJSD 94.3 and CJLB 105.3 (moving from 1230 AM) Thunder Bay in an LMA. "Local and news programming stays the responsibility of each separate company," says "Broadcast Technology magazine. In May the Angus Reid Group launches a monthly phone survey of the Toronto market, and it hopes to expand to Vancouver. The surveys are marketed as an "alternative view" to BBM. Scruff Connors, continues his notorious ways. On his morning show on CJKR 97.5 Winnipeg he advertised a free trip to Miami to watch the Super Bowl. From the 1200 entries, 30 winners were picked. "The problem was that the trip was to Miami. Many people, to watch the game on TV," he heard they were not amused," says Jerry Fairbridge in B-T.

Scoring a hit in its second annual sharonathon WAYF \*88.1 West Palm Beach FL with listeners pledging \$475,000, a 37 percent increase over the previous year in only three days. The more-established WMHT-FM \*89.1, etc. Schenectady NY concluded what was considered a successful fund-drive, raising \$72,846 "in just 12 days." Once great WRTR 1540 Albany is being sold by Albany Broadcasting, owner of WYJB 95.5 and WFLY 92.3, to an unidentified religious broadcaster. Price not announced.

Most student stations responding to a "College Broadcaster" poll said they'd continue operating during the summer at the same level of service as during the school year. However, WVV5 \*90.9 Valdosta GA said summers "have always been a hard quarter. We ask for DJ applications starting at mid-term spring quarter," and they offer a large, all day, free outdoor "I'll-a-pal ooza-ish/woodstock-ish" concert featuring local and regional bands at the end of every spring quarter.

FCC info now on the Internet: Public Notices, Orders, Speeches, the Daily Digest and FCC Forms supposedly can all be scanned in any of the following ways on the Internet.

FTP: ftp.fcc.gov, log in as anonymous and use your e-mail address as the password. Publications are in the /pub directory and succeeding subdirectories. Identify files of interest by downloading the index (found at the same level as /pub) and searching for key words.

Gopher: gopher.fcc.gov or use any gopher to get to "all the gophers in the world," then "U.S." then "DC" then "FCC."

World Wide Web: http://www.fcc.gov. If any readers are successful in getting FCC info, kindly let me know. I tried an Internet connection at an area high school, but their access was apparently blocked except to educational agencies.

The April NAB convention in Las Vegas brought 83,408 attendees, including 17,524 international delegates. Wataru Gotoh of Tokyo FM was awarded the first NAB International Broadcasting Excellence Award. "TFM leads the industry in providing state broadcast services over FM subcarriers."

NBC has agreed to forgive most of a \$10 million loan to Albmar Communications, a company owned by Commerce Secretary Ronald H. Brown and several partners. NBC made the loan in 1988 when it sold WKYS 99.9 to Albmar. The investment for Albmar has been a losing one. The station lost its top disc and dropped in the ratings. Albmar has agreed to sell WKYS to Radio One, a company headed by local radio talk show host Cathy Hughes, for \$34 million, or \$8.5 million less than it paid. If NBC, a division of General Electric, sued, Albmar would probably have been forced into bankruptcy. If that were to happen, NBC would most likely get nothing. When NBC sold the station to Albmar it saved \$15 million in federal income taxes because it sold to minority owners. The minority ownership rule, which was the subject of criticism for being abused by whites who used minority people as "fronts" on FCC applications has been killed by congress.

Is SCS considered broadcasting or is it exclusively point-to-point? That's the question the FCC's grappling with as a \$5 million lawsuit unfolds in NJ. Magdalena (Kathy) Enriquez-Ty, owner of Calubayan Trading Corp., a former advertiser on Radio Pinoy, on the 92 kHz of WBGO \*88.3 Newark, filed the defamation suit. Question is what role, if any the FCC has to investigate Ty's complaint that Radio Pinoy was guilty of "obscene, indecent and profane" language. Lino Cella, ("Lee-no SELL-yay") announcer and head of the Radio Mindanao Network USA (Radio Pinoy), flatly denied the allegations in the suit. Also named defendant is main channel station WBGO. Court records show that in September Ty signed a three-month ad contract for \$360/month, with ads to run "through December. After the contract expired, the defendants continued running the ad without authorization for another month. On Feb. 9 and 10, Radio Pinoy allegedly aired several notices that attacked Ty's reputation and business, using Tagalog words that could be translated to mean "swindler," "cheat," "mentally sick" and "sexual promiscuity." On "WRMN," they're announcing that subcarriers are "so far, anyway not under FCC jurisdiction." Cella, 43, wrote the FCC that "I am fully aware that the FCC has not issued any formal rules and regulations on all the sub-carrier radio stations in the United States". If you may, please comment at so on this issue." [Thanks to a subscriber for supplying this information from the "Filipino Reporter," May 31-Apr. 6, who says: "I thought about calling him [Cella] and telling him [about the FCC rules regarding subcarriers], but I knew he'd want to know my name and how come I can pick up his station, neither of which is any of his business! If you want to contact him, he's at WRMN, 554 Bloomfield Ave., Ste. L-1, Bloomfield NJ 07003; (201) 743-0200; FAX (201) 743-1795."]

Speaking of SCS, the address for the east Indian on the 92 kHz of WQXR 96.3 is RBC, 43 W. 24 St., New York NY 10010; (212) 691-RBC2. "The DJs speak English but all the songs they play are from Indian movies and you have to be an Indian to be able to stand that 'music'! Its 67 is still Russian. . . WNYE 91.5 is still f( ), but the sound is different so maybe they switched to RBDS. The only NYC 57 kHz SCS that still sounds the old way is WCBS-FM's (101.1). Your ad [for modified G-E Superadio II] was in Popular Communications in April."

Howard Stern, back in Chicago, this time on WCKG 105.9 Elmwood Park IL, predicts he will soon be No. 1 in the morning. Stern said to have offers to carry his show in Salt Lake City, but so far Infinity has not accepted any, fearing angry protests from the large Mormon population. "Meanwhile, the plaque with Stern's name on it was stolen but later anonymously returned to the NJ rest stop." The plaque came in the mail, having been returned by three fans who got nervous after hearing a news report that the police got their license plate number. Stern said, since the rest stop issue had caused Gov. Whiteman (last month, p. 8) so much trouble, he would just hang it in the WXRK bathroom. However, the NJ state police say the \$1000 plaque, which has a caricature of Stern peering out of an outhouse, is not Stern's to keep; it's stolen property and has to be returned to NJ.

Two more WMMS 100.7 Cleveland OH employees have been indicted for disrupting the June 10, '94 broadcast of Howard Stern. Ex engineer Bill Alofrd has pleaded guilty to cutting broadcast wires and knocking Stern off the air when he was in Cleveland, while Heidi Klosterman and Greg Smith were charged with "disrupting a public service." Omni-America, owner of WMMS and WMJI 105.7, issued a statement saying Klosterman and Smith are innocent. The local DA's office refuses to say if there will be further indictments. Howard said on the air: "They're trying to change the corporation around to say that this station [WMMS] has nothing to do with the rest of the Company. Omni-America. Watch these guys fall. Watch them tumble. 'Cause the FCC says if you cut somebody's wires and management is involved, we have to take away all your radio stations. Oh boy! That's about a billion dollars down the drain! I love it! I can't wait to see that whole company go down!"

The 104.9 channel in Lompoc CA is still without call letters. The FCC recently: 1) granted Lompoc Minority Broadcasters application for review; 2) dismissed the application of Lion's Share Broadcasting; 3) reopened the record and remanded the proceeding to the Review Board. The FCC's concern that LMB may have misrepresented in its application that a transmitter site was available when it was not, and if it made a material misrepresentation or lacked candor when it certified in its application that it had reasonable assurance of the availability of funds needed to construct and operate the station for three months; finally, if LMB is qualified to be a Commission licensee. It seems the FCC wants a speedy resolution of the matter, saying it "believes the public interest would be best served by remanding the proceeding to the Review Board for determination of LMB's qualifications."

My own application for 92.1A Hermantown MN remains on file, but J. Thomas Lijewski, sole owner of Harbor Broadcasting, has been here twice. On the last visit I signed a document agreeing to withdraw the application in exchange for up to \$3,000 to cover my application expenses plus a three-year program consultancy. Two other applicants for the channel did not reapply in the second filing window, leaving only the applications of me and Harbor Broadcasting. Lijewski did not press for a noncompete clause, but agreed "to pay for rulemaking costs and filing by Bruce F. Elving in the Duluth market for one FM station" should I decide to have another channel allocated. The document also binds any new owners, should Lijewski ["LEE-es-ki"] sell.

Lijewski, of Minneapolis, is visually handicapped. An FMEDIA reader and broadcaster faxed me his response to Lijewski's proposal:

"You have sent me a typical settlement proposal, designed to resolve the matter where there are multiple applications. The law now allows actual reimbursement of real expenses incurred by the party dropping out. As an incentive to settle, this party has added a consulting agreement. . . for what I assume would be legitimate work. . . Legally, no payments can be made to you until the FCC approves the settlement, grants their application and there are no petitions to deny. . . If Harbor is a legitimate competitor, you should 'walk the beach' to determine how determined you might be in taking them on, fighting for the channel, analyzing your business plan, etc. This is a deep-seated personal decision; it is easy to dream and speculate about owning a radio station but when the moment of truth arrives and it's time to build and operate, life becomes more serious. [This] might be incentive to settle unless there is a Messianic desire to operate a radio station, maybe getting killed financially while the Big Boys duke it out. Today's world is duopoly oriented and who knows what is beyond that?" I thank this broadcaster for his well-thought-out advice; wife Carol, too, thought it made a lot of sense. In the most recent mailing from the FCC, Lakeside Broadcasting was mentioned as withdrawing its petition to the FCC for reconsideration of the dismissal of its application for various cities (Hermantown MN, Isleboro ME, Athens OH, Balsam Lake WI and Taylorville IL) and received a refund of its \$2335 FCC filing fee for Hermantown.

The Commission denied Fayette Broadcasting Corporation review of its proposed substitution of Channel 285C2 for A and realignment of the channel to Rollingwood TX from La Grange TX; Fayette is licensee of KBUK 104.9A La Grange (see "Rulemakings," above), population just under 4000. The initial denial of Fayette's proposal was premised on the fact that the Commission would be removing the only full time radio service licensed to La Grange and realign the channel to a community within the Austin Urbanized Area. In its application for review, Fayette argued that FCC staff reached a wrong conclusion when it compared the available transmission and reception services for La Grange and Rollingwood, and minimized the significance of the continuing local service to La Grange by commonly owned 250-watt daytime only AM station KVLG. Fayette also argued the FCC staff "erroneously downplayed" the resulting net service gain by an improved C2 facility from KBUK. Fayette said the FCC staff also erred in not considering the financial straits of KBUK as a public interest consideration.

Denying review, the FCC stated that Fayette's proposal to remove a service from La Grange to a community close to Austin was not in the public interest. Although La Grange would continue to receive service from at least five stations and that the proposed realignment to Rollingwood would result in a net gain of 712,919 persons, the Commission noted that the Rollingwood area already receives service from about 20 stations and the population gain is attributable to the fact Rollingwood is a suburb of Austin. The move thus could not be justified as a preferential arrangement under "Community of License" or Sec. 307(b) of the Communications Act. Finally, with respect to financial hardship, the FCC believes that any new criteria, such as degree of hardship, would have to be established in the course of a further rulemaking proceeding. The Commission stated that the generally greater advertising revenues in more urbanized areas would, were it to adopt a policy of considering financial hardship, consistently provide a rationale for moving stations to such areas [and] service not be clustered in urban areas to the detriment of more rural areas.

The NAB has given its AMAX seal of approval to Sony Walkman SRF 42 stereo radios in 400 Service Merchandise stores around the nation.

Other AMAX-approved radios are the Denon TU-680 NAB tuner, various Delco car stereos and the G-E Superadio, model 7-2887.

A new FM technology was to have been demonstrated at NAB-95, the FMV service for "FM Video." FMV uses SCSubcarriers with channel compression. For consumers, a set-top video communications controller (VCC) box attached to a standard TV set would be necessary. The FMV processor would split the video into sub-frames and determine how many baseband "channels" will be needed to send out a picture. "Depending upon the complexity of the video signal, more than one FM station may be needed to carry the entire FMV signal." It seems that something like that may already have been invented. Is it, uh, television?

"The call letters for Atlanta radio stations could be W\$\$\$\$. Radio stations in the city in 1994 saw revenue grow a smoking 21 percent from 1993, making Atlanta the fastest-growing major market in the country. Nationwide, the average growth rate for all stations was 11 percent," writes Rodney Ho in the Atlanta Journal. Leading revenue grabbers in millions: WVCE 103.3 \$18.5, WGST-FM 105.7-640 AM \$15.3, WKHX 101.5 \$14.8, WSB AM 750 \$13.5, WSB-FM 98.5 \$12, WPCH 94.9 \$11.8, WKLS 96.1 \$11.5, WSTR 94.1 \$11.4, WFOX 97.1 \$8.9 and WZGC 92.9 \$8.3. Tom Connoily of WKLS, said with things going so well he doubts stations will make any radical format changes this year. "The one possibility: a station switching to an all-1970s playlist, an increasingly popular option."

From the classifieds: KVNE \*89.5 Tyler TX has a chief announcer opening. KVNE offers about 21 hours per day of stereo Christian music. This person would help launch the new "Barnabas Network" this year. Resume and taps to Gary Lesniewski, KVNE, PO Box 8525, ZIP 75711, EOE.

WLFJ \*89.3 now accepting applications for an on-air personality with ability to relate to 25-49 year-olds. Air check and resume to Alien Henderson, WLFJ, 2420 Wade Hampton Blvd., Greenville SC 29615, EOE.

 MN Ely WELY-FM 92.1 and 1450 AM. "Light-

ning hit the tower and blew out a component which caused the signal to leak into the headend of BSI Wireless Cable, which owns 24% of WELY-AM-FM. BSI has ordered the stations off the air, and wanted \$50,000 in payments to start from the majority owner, Jeanne Larson. Larson, now 66, and Brad Jones bought the AM in 1976, and built the FM in 1992. Investor Harry Reed II of Sacramento CA wanted a tower for his wireless cable transmitters and agreed to build a new tower for his TV system and to accommodate the FM antenna in exchange for part ownership and a \$48,000 investment in the tower. Larson would remain 51 percent owner, Jones would get 25 percent. "It was a relatively straightforward deal, but the transaction snarled almost immediately. Larson and Jones discovered WELY didn't have enough land to build and support the tower, so Reed wound up buying a parcel... Costs for installing the FM frequency were higher than expected. Advertising didn't pick up as expected." Reed claimed Larson and Jones failed to disclose key financial information about the station. Larson and Jones charged Reed was dealing in bad faith. "Temper flared, and Reed finally filed a civil suit against his partners to recover part of the \$105,000 he claimed he'd invested in WELY." The parties then settled out of court: WELY would pay Reed \$50,000. When the station missed the first payment on the debt, Reed had the sheriff's department seize some broadcasting equipment, throwing the stations off the air. Now the county claims more than \$20,000 is owed in taxes, including delinquent payroll taxes from as far back as 1989. The FCC has granted the stations an extended period of time to be silent. Al Quarnstrom who owns WKLK-FM 96.5 Cloquet and nine other stations, has talked to the WELY people, but is apparently reluctant to get in the middle of the fracas, since he has deals with Reed in other cities to use Quarnstrom's towers. Retired CBS roving reporter Charles Kuralt is also interested. He vacations in the Ely area and is represented by attorney Bill Conrad. The station, an FM-AM simulcast operation, played m-o-r music like Herb Alpert and Simon & Garfunkel. Terry Murphy is the co-owner of Mealy's Gift & Sauna Shop. She thought the music on WELY was "just horrible," but confessed to missing the lost and found notices and the local news. [Part of this credited to the Duluth News-Tribune, May 14 article entitled, "Lonely Ely Loses its Radio Voice."]

**FMistakes, FM Atlas-16, FMedia!**

The frequency numbers 95.3 to 96.3 appear 'too close together.' Page 6 refers to "mz."  
 "Never saw it before in lower case. Correct is mHz; I have not noticed any official change." FMedia! has always used "mz" rather than the more official "mHz," but inconsistently uses "kHz" not "kz" or "kc."  
 "Like the new way of translator listing. The Mexico map is very difficult to figure out. All in all, looks like a good edition of the Atlas."

 MN Grand Marais—University of MN's applica-  
 tion for \*90.7C3 is coming under attack from  
 local residents afraid reception will be  
 blocked from WGGL \*91.1 Houghton MI,  
 which is owned by MN Public Radio. "Our  
 consultants found us the channel; it was not  
 an attempt to block MPR reception," said a  
 KUMD spokesperson, who added that MPR  
 could stand for "Michigan Public Radio."  
 The move could be beneficial to MI residents,  
 perhaps forcing the station to program more,  
 on both its main and dormant SCS subcarrier,  
 to Upper Michigan residents. Its SCS is  
 supposed to have MN State Services for the  
 Blind talking books at 67, but has been  
 inactive. The main channel usually gives the  
 time in Central rather than Eastern, despite  
 the station being located in the Eastern Time  
 Zone. One of the persons trying to force the  
 issue is J. Thomas Lijewski, Harbor Broad-

casting, Inc., who is headed to Grand Marais  
 as this is being typed. "KUMD could and  
 should find an alternative channel if in fact  
 they are likely to interfere with reception of  
 WGGL," Lijewski said.  
 MN Hermantown 92.1A—J. Thomas Lijewski  
 and I have signed a settlement agreement and  
 a consultancy agreement, which are being  
 forwarded to the FCC. If the FCC agrees, my  
 application will be dropped in exchange for  
 paying almost \$3000 in my application  
 expenses. The station could receive its CP by  
 December and on the air in early 1995.  
 "Duluth does not have too many radio  
 stations. I hear Al Quarnstrom might be  
 selling KLXK 101.7 to WEBC-WAVC 105.1,"  
 Lijewski said. [tal Assets, Inc.

"Regarding your now-waning desire to own and operate an FM station, I would think that with your publications, your SCS modification on business and your translator, you are already spread out thinly enough. At its best, it would be an expensive toy, but if the slightest thing were to go wrong it could well be the catalyst for financial disaster."

 NY Essex WCPV 101.3 Champ 101, serving Burlington VT, along with 20 other FM stations. People from existing stations think the market has too much radio. "The average retailer sees 24 sales people just selling radio," one executive said. Ken Barlow, general manager of Champ 101, thinks otherwise: "Burlington has a very healthy radio market with revenues double what you'd expect to find in markets with similar population bases." The fact, however, is that Burlington has more stations per capita than Boston, and the \$8 million advertising pie remains static while the number of stations grows. WJZN 106.7 is No. 1 at 16.1, Arbitron, while WOKO 98.9 has 13.7 and WXXX 95.5 (moving from 95.3) is 11.3 and WEZF 92.9 is at 10.5.

- PA Salladasburg WFRY 95.5 no ID/
- SC Spartanburg WSPA 98.9 with Greenville-Anderson-Asheville (NC), "last two cities don't vary," but there's not enough room to put entire list in FM Atlas. [7.]
- "Thanks for crediting me in the new FM Atlas, p. 17. It's an awful bother not having any Mexico information in FM Atlas by frequency. When hearing a station on any frequency in a DX opening, one has to search through the entire map or geographical list."

**Selected AM Happenings**

- AK Soldotna-Kenai KSLD 1140 went off air Mar. 1, but "their sister KKIS-FM 96.5 is still on."
- AR Little Rock KSYG 1010: Westinghouse Broadcasting has an option to buy the station and remove it from the air to reduce interference to Group W's 1010 kHz NYC station WINS.
- CO Boulder KBKS 1490 silent
- MA Natick (Boston) WBIV bought by WBMA Welleley and moved to 890, taking over the former WBMA, while the 1060 kHz frequency is vacant. "It will probably be back on the air in a few months, but with low power. And the programming is as yet unknown."
- MN Minneapolis WCCO 830 eked out the slimmest of victories in Arbitron's winter survey, "regaining first place among listeners 12 and over for the first time since last spring" when KQRS-FM 92.5-AM took the lead.
- NJ Jersey City—an unlicensed station on 1510 that was only to radiate in the Holland Tunnel could be heard over 3 km. "The complaint was confirmed by an FCC agent who found a low power broadcast station operating from a service

station at the tunnel entrance... It was created by the promotion department of Atlantic Records to repeatedly broadcast a five-minute audio loop of an announcer introducing a new popular recording artist, "and playing a brief segment of the music. FCC inspectors contacted the recording company and obtained a promise to adjust the transmitter power down to a level that will comply with Part 15 of the Rules." NY Albany WPTR 1540 drops right-wing talk host Bo Gritz—one of the targets of President Clinton's attack on shows with ties to paramilitary organizations, which might have contributed to the Oklahoma City bombing. Gritz preaches survivalism, how to ration food for three years, and how to use knives and guns for protection. His show also had "abysmal" ratings in its 10-11 a.m. time slot, earning only a .3 share. Also dumped—the more liberal Judy Jarvis Show, which aired 2-3 p.m., and had only a .1 share. Gritz's show still runs in 50 markets, including Boston, New Orleans and Dover DE. NY New York WEVD 1050 received a \$500,000 property tax refund, due to NJ's assessing antennas and towers differently. An AM tower like WEVD's is "hot," meaning the entire thing radiates, while for FM the tower is only a supporting structure with an antenna mounted near the top. WEVD's 22.58 acre site in the NJ Meadowlands, near the Brendan Byrne Arena, has been assessed at \$6 million. The Borough of East Rutherford is considering offering \$6 million for the site for redevelopment, but suppose WEVD turns down the offer and says it's worth \$15 million? "We would immediately up the assessment to \$15 million," Alfred A. Porro, Jr., borough attorney, speculated. Then "they'd have to go back to tax court with egg on their face." Mayor James Plosia said, "I like it" of Porro's strategy. OR Portland KWJJ 1080 no longer simulcasting KWJJ-FM 99.5, "Better Country." Now KWJJ is "old and classic country, and uses 'Real Country AM 1080 KWJJ'." VA Lynchburg WLLL 930 "silent pending sale" VA Waynesboro WAYB 1490 silent "I look forward to your next FMedia! Keep up the good work," L.J.S., Fairview NJ.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is deadline for replies. Stations affected, if any, are listed.*

- AZ Willcox 104.9C3 from 98.3A, KWCX, June 22, July 7

**Duopoly Thwarted in PA**

Credit-or blame—Congress' repeal of an amendment to the Communications Act that allowed broadcasters to defer taxes on profits when selling to a minority for the aborted sale of WFMZ 100.7 Allentown PA. Maranatha Broadcasting announced it has abandoned the \$9.5 million sale of WFMZ to Tele-Media Broadcasting Co. Tele-Media owns WLEV 96.1 Easton PA. The 100.7 facility was going to change its call to WKKT [March, p. 2, col. 1], but told me it will remain WFMZ and easy listening.

Richard Dean, Maranatha president, said in an interview with the Allentown Morning Call, his company expected to reinvest the profit from the WFMZ sale to its other operations, notably WFMZ-TV, Channel 69. The change in legislation meant the company would lose "close to \$3 million" in capital gains taxes. "Our deal was contingent upon a viable tax [deferment] certificate," Dean said. WFMZ (FM), owned by Maranatha for 30 years, employs about 15 people. The move would have consolidated local broadcast holdings for Tele-Media, which also owns WEST AM in Easton. Dean said the station's owners often get inquiries from prospective buyers, but there are no plans to sell the station.

Revenue from the bill enabled self-employed persons to deduct 25 percent of their health insurance from federal income taxes. This came about only days before the April 17 tax filing deadline, and was of benefit to those, like me, who delayed their filing until the last minute. [Thanks to John W. Beitel of Easton for sending the original article.]

Although stymied in Allentown, Tele-Media announced plans to get a duopoly partner for its WRKZ 106.7 Hershey PA

by buying WQXA-FM 105.7-AM York PA.

**Small-Print Happenings and FM Industry News**

The FCC, showing some rare teeth in its interpretation of the rules, stunned Cox Broadcasting by refusing to allow its purchase of WJZF 104.1 LaGrange-Atlanta. WJZF has been operated under an LMA with Cox. Cox had asked the FCC to modify the WJZF signal so it did not overlap with WSB-FM. Then, if the signal overlap was denied, Cox asked for a waiver of the cross-ownership rules. The FCC ruled against both requests, noting that Cox is licensee of two stations in the market, has LMA and time sales arrangements with three other stations, as well as owning WSB-TV, a cable system and both of the city's major newspapers.

In a related move, Atlanta stations, under the WSB umbrella, announced an alliance to pool their resources in an area-wide FM triopoly. WALR 104.7 Athens-Atlanta, and WJZF 104.1 LaGrange-Atlanta will sell advertising time in a joint venture called Atlanta Urban Radio. Ring Radio will continue to own WALR, while WJZF's LMA continues with WSB-FM 98.5-AM. The WSB stations were also to assume the marketing, programming and sales responsibilities of Ring's WCNN 680 North Atlanta. In a little-noticed development, WALR took over WIGO 1340 Atlanta in a five-year lease and turned it into a simulcast of the FM. Ron Sailor, a former Atlanta TV personality, operated WIGO as a news/talk station for about 20 months, but had fallen behind in his payments. Sailor had protested the takeover, claiming that the joint advertising venture between WALR and WJZF/WSB violates FCC and anti-trust rules. "What they're doing here is nothing more than silencing me and silencing my radio station," Sailor said.

Marc Morgan, vice president and general manager of WSB-FM, said "This partnership will help to preserve a greater number of voices in the North Georgia radio marketplace." It is hard to see where the threat to ownership or program diversity would have come from, knowing that "Atlanta FMs Roll in the Dough" [last month headline, p. 1, story, p. 8, col. 3]. WJZF, interestingly, got hit with an Arbitron admonishment for a top-of-the-hour announcement asking listeners to make a mental note of their "time spent listening to 104.1 FM."

Successful petitioner against the WJZF sale to Cox was Jacor Communications, owner of WPCH 94.9. Jacor itself acquires a duopoly in Jacksonville, buying WHJX 101.5 Brunswick GA for \$4.5 million. Jacor, owner of WQIK 99.1, bought bankrupt WHJX from the receiver for Eagle Broadcasting.

A waiver of its one-to-a-market rule was granted by the FCC to Great American Television and Radio Company, Inc. to acquire WWNK 94.1 from Secret Communications, Ltd. Great American is licensee of WKRQ 101.9 and WKRC-TV. Since Cincinnati is not a top 25 market and neither of the stations was a "failed" station, the FCC analyzed it under a case-by-case standard. Great American demonstrated that the proposed combination will enhance WWNK's programming and result in public service benefits. "The addition of this second FM station to Great American's existing operations would not appear to unduly affect competition and diversity," the FCC said.

Two new duopolies in Salt Lake City—KRSP 103.5 and KSFI 100.3-AM under the Simmons Family umbrella. The FCC approval came only after each set of stations was fined \$8000 for EEO violations. Trumper Communications paid \$1.85 million for KUMT 105.7 Centerville UT from Ragan Henry's U.S. Radio; Trumper recently bought KISN-FM 97.1-AM.

Henry Broadcasting picks up KYMX 96.1-AM Sacramento in a trade from Tribune Broadcasting, which acquires KVOD 99.5 Denver. The deal will need an FCC cross-ownership waiver, since Tribune owns KWGN 2 Denver and KOSI 101.1-AM.

CA's Crescent Communications announced plans to buy Howard Stern-carrying KFBI 107.5 Pahrump NV for \$6 million to combo with its KMZQ 100.5 Henderson NV. In Baton Rouge, WYNK-FM 101.5-AM and WFMF 102.5 merge under Gulfstar ownership.

The NAB has started a Summer Fellowship Program to bring a college student interested in broadcasting to the Washington DC area for practical work experience. The program will offer up to \$3000 to work in the area with NAB staff and local FM-TV-AM stations. For more information call (202) 429-5389. The group applauded the new communications bill, H.R. 1555, as it made its way before the House telecom subcommittee. The bill's spectrum flexibility and license renewal reform are admired, but the NAB still wants complete deregulation of radio ownership.

National Public Radio and Public Radio International are among groups asking for the creation of a trust fund to help pay for public broadcasting should federal funding be discontinued. Funds would come from spectrum fees, auctions and contributions by commercial broadcasters. The NAB's not too enthusiastic, saying, "The public broadcasters' idea of a road to self-sufficiency seems to be 'let's take it from somewhere else'." Public broadcasters, meanwhile, seem to be doing quite well. WXPB 88.5 Philly took in \$213,000 in 4 1/2 days, a station record, and 42 percent more than its estimate. KCRW 89.9 Santa Monica raised \$1 million in a week, WABE 90.1 Atlanta took in \$328,020 in the most successful drive in its [wow!] 47 year history. Station manager Earl Johnson credited the response to the threat of federal funding cutbacks and improved programming. "Our listeners are acutely aware of the challenges that lie ahead for WABE," he said. Note that this was accomplished without the benefit of WABE's former translator (see "Off the Air" above).

Also scoring big in fund-raising—WAMC 90.3 Albany NY—\$303,225 from 4613 callers in four days. Basking in the adulation after the most successful fund drive in the station's history was Alan S. Chartock, who grudgingly conceded a point to public radio arch-enemy Newt Gingrich. "Newt contributed mightily, but I'm not giving him any credit for his attempt to undo us," Chartock fumed. His personality helped fuel the success of the fund drive, combining cajoles, threats, appeals to the conscience and humor to help folks part with their bucks. He's one to make fund drives entertaining. Minnesota Public Radio signed up 6131 new members, its most successful one-week drive ever, but federal support remains at 15 percent of MPR's \$2.6 million budget. It would need 30,000 more pledgers if all public monies were taken away.

One of the smaller stations that would suffer if CPB money were taken away is WUMB 91.9 Boston. The CPB provides 30 percent, or \$150,000, of its \$500,000 budget. Smaller in wattage that is, for it has only 660 watts in a sea of 35000 to 50000 watt stations. WUMB sent letters to each of its 4000 members who contribute \$40 annually, urging them to contact Congress, and has joined a consortium of New England public radio stations to fight the cuts. Even with ideas from colleagues in public broadcasting, Patricia Monteith, a student founder of the station in 1968 and now its general manager, said with a sigh, "I think it's improbable that \$150,000 would actually come out of it."

Listeners to WOW-FM 94.1-AM Omaha donated \$13,202 to aid Oklahoma City bombing victims. WOW employees paid for an Oklahoma City bill board which said, "WOW radio listeners in Omaha care."

I was saddened to learn that long-time subscriber and broadcast engineer Bill Coleman, Jr. of Rocky Mount NC died. Coleman had worked at KSTN-FM 107.3 Stockton CA, owned what is now WFGZ 94.5 Lobelville TN, and more recently was a volunteer programmer at WPEX 90.9 Kenbridge VA. He was mentioned in

"From the Classifieds," Feb., p. 8, col. 3. He was a member of the Worldwide TV-FM DX Association and an FM Atlas reader since the early '70s, and I enjoyed many phone visits with him.

The FCC fined WGRF 96.9 Buffalo NY \$4000 for broadcasting allegedly indecent material during the "Norton and Stout Show." And it has announced plans to close 10 of its 13 monitoring stations, such as those at Canandaigua NY, Allegan MI and Grand Island NE. The Canandaigua station nailed WAER \*88.3 Syracuse for not giving a legal ID within 15 minutes of the top of the hour, while I was there. We had to notify that office of procedures to see that that did not happen again. The Grand Island office is considered a local historic building. Monitoring from such offices will still be done, but by remote-control means from headquarters in Laurel MD.

In New Orleans, John Walton who was half of the Walton and Johnson morning show team on WEZB 97.1, was dumped in favor of Howard Stern. Walton is so desperate for a job that he is offering his \$25,000 convertible to any station that will hire him. "I've banged on every door in town. I've been trying to find some way not to have to sell my house, uproot my kids and leave town," he said. So far, no takers, and he's about resigned himself to moving if he wants to stay in broadcasting. "That's radio, the business that eats its young," he said.

A person spending time on death row is convicted cop-killer Mumia Abu-Jamal. He's a former public radio journalist who still gets attention from the outside. The State Correctional Institution in Greene County PA has denied reporters access to Jamal (pictured), but his voice is heard on tapes on stations willing to broadcast them. Several Pacifica stations have carried his works regularly, as well as 25 NPR affiliates which aired his essays even after NPR decided not to air his program. Other tapes are in NPR's archives. "Whether it was naive or not, we tried to stay out of the

politics of this case, which was hard to avoid," NPR producer Ellen Weiss said. "I think the potential for them being misused is too great [to release them]. I don't want them to become The Tapes NPR Didn't Air." Reporters and celebrities varying from Connie Chung to Ed Asner have taken an interest in the case.

Seiko is still interested in the FM-SCS market for its Dick Tracy-type wristwatch pagers. The small wristwatch sports an FM receiver and message display. Seiko is talking with Delco and IBM about embedded FM subcarrier support for vehicle messages. The project would embed receivers in cars and IBM portable computers. These would be integrated with the global positioning satellite system. Messages would be at 66.5 kHz SCSetting, with a second subcarrier at 85.5 kHz. Transmissions would be amplitude modulation at 19 kilobits per second per subcarrier. Seiko claims RBDS at 57 kHz is not robust enough, and needs more channel capacity for its system to work. Seiko's system would be broadcast, rather than point-to-point, and might mean increased revenue for stations. "The vast bulk of information flows one way to the consumer. But the number of ways this system can be used will sell itself well outside the Message Watch application base," said Mike Park, vice president business development at Seiko.

USA Digital Radio's demo of in-band DAB, both AM and FM, won praise from those who took the ride in Las Vegas. Yet the absence of streets where multipath was a problem for normal FM made the demo less than viable. The AM digital signal produced much better quality audio than normal AM, but both the AM digital and regular AM suffered about the same losses

along power lines and under overpasses. If the tests prove the IBOC system is viable, the next step will be for the NRSC (National Radio Systems Committee) to vote on a standard, after which a full okay will be sought from the FCC. Larry Eads of the audio services department of the Commission said it will then have to ask such questions as: "Who's eligible? How will it be used? What kind of service requirements will we have in place?" Glynn Walden, head of engineering for Group W, and a person I met at Winnipeg in November, is concerned about digital AM dropping off around power lines and in short tunnels, and why it seems to sound better at night.

National Semiconductor announces the last runs for some common integrated circuits used in FM/SCS designs: The LM3189 (frequency modulation system) and the LM565 (phase locked loop). The older LM3089 was dropped earlier, and I bought Jameco Electronics' remaining stock last year. Distributors are expected to have stocks of these once-popular ICs for some time to come.

The FCC proposes to allow ancillary digital data service in the video portion of the TV signal, and seeks comment on whether specifying a particular method or methods of embedding such data would better serve the public. The FCC, however, is aware of the potential to degrade the TV picture, and proposes that broadcasters remain responsible for their stations' signals regardless of the source of auxiliary signals. Third parties would be able to lease space on the TV baseband for such signals.

Here comes a new form from the FCC: Form 303-S ("Application for Renewal of License for AM, FM, TV, Translator or LPTV Station") for all broadcast renewals, commercial and noncommercial. One form can be used to seek the joint renewals of translator stations and their primary. Older renewal forms were no longer acceptable as of April 3. There is also a new renewal booklet which FMedia readers might want to have. Both the booklet and form are available from the Forms Distribution Center, FCC, 2803 52 Ave., Hyattsville MD 20781; or by calling (800) 418-3676, with a limited number of copies for in-person picking up at FCC HQ, 1919 M St., NW., Room L-17, Washington DC.

Final decision by NY Major Rudy Giuliani is for WNYC-FM \*93.9-AM to be sold to the nonprofit WNYC Foundation, while WNYC-TV, channel 31, will be sold off. The WNYC Foundation will pay \$20 million for the stations, a fraction of their stick value, and may stay rent-free in the offices in the Municipal Building.

KJAZ-FM 92.7 Alameda CA has new calls, KZSF, reflecting its switch from jazz to Spanish. Its former jazz format now being syndicated by WFMT 98.7 Chicago, known to many as the originating station of the Beethoven Satellite Network (al though never announced on the air as such). The "KJAZ Satellite Network" is a 24-hour per day service via satellite from brand-new studios in Chicago. Both commercial and public stations are being pitched to carry the service.

Station totals from the FCC as of Apr. 30: FM 92-108 on air and licensed 5173; FM 88-91.9 1754; AM 4913, with another 2300 FM translators and boosters.

From the classifieds: Nonprofit community station needs cart players. Could also use cassette deck, carts, console. Tax-deductible, although we are not Christian, NPR or college. Then what is it? Anyway, donate to KABF \*88.3, % Valerie Caffen, 1501 Arch St., Little Rock AR 72202.

Station manager KGNU \*88.5 Boulder CO. Marty Durlin, current manager, leaves at the end of June. Ms. Ilana Kotin, KGNU, PO Box 885, Boulder CO 80306.

I collect radio station bumper stickers. Send one of yours to Mark Pitney, KVRH-FM 92.3 Salida CO 81201; 719-539-2575.

FM Atlas 16th edition, new and improved book, \$18 ppd. Also one copy 9th ed. 1984, \$9.95 postpaid, 12th ed. 1989 \$12 postpaid. Orders only to 1-800-605-2219, VISA, MASTERCARD.

Broadcast advisor KZSC \*88.1, \$2433/mo. Call (408) 459-2011 for more info. Resume and salary history by May 31 to Staff Human Resources Dept., 102 Communications Bldg., Santa Cruz CA 95064.

FM FORUM

CONTRIBUTIONS FROM READERS

Before the NJ plaque was stolen (see last month, p. 8, col. 3) Howard Stern offered to give up having his name on the rest stop since it resulted in a lot of Whitman-bashing, but Governor Whitman's response to her critics: "It's just a joke. Lighten up!"

"Howard has reached an out-of-court settlement for an undisclosed amount with Norwood NJ business lady Lori Gedon. During a 1991 Ch. 9 TV show in a sketch on Dr. Jack Kevorkian, Stern had the number 1-800-MD-DEATH flashed on the screen and it turned out to have the same digits as Gedon's business number. She claimed she got 1300 calls, many profane, and it cost her \$60,000 in phone bills and lost business," writes a local reporter.

It's been going on since the '50s—that's Orgy month on Harvard's FM station, WHRB 95.3. Student d-js program blocks of the same types of music while they study for exams. Such happened in January, when programming ranged from seven hours of Janet Baker to nine hours of the Beaux Arts Ensemble to three days of music by Paul Hindemith. This year's orgy included pitches for money, something WHRB hasn't done for 16 years. "But we need to buy a new transmitter and antenna," said David Elliott of WHRB. "The project will cost \$250,000 but we're hoping to raise \$50,000."

Former WRKS 98.7 NY newsman Joe Bragg, 57, is charging the station's new owner, Emmis Broadcasting, with "discrimination, failure to promote and illegal dismissal." Bragg, a 27-year veteran of NY radio, said he was "shocked" to learn that WRKS, his employer for the past eight years, would not renew his contract. "Kiss was recently acquired by an all-white new owner," said attorney C. Vernon Mason, "and the station's response was to summarily fire Mr. Bragg." WRKS claims that Bragg's dismissal was merely the result of station "downsizing" its news department. "He's a street reporter and that position is being eliminated," said station manager Vinnie Brown. Bragg said he's going to write a couple of books, including one on the media.

Rich Toebe sent the "IRCA AM-FM Almanac" slogans list, mentioning the FM Atlas as a source of FM station slogans. Copies of the 44-page updater \$3 in the U.S. from Phil Bytheway, IRCA Bookstore, 9705 Mary N.W., Seattle WA 98117-2334.

KRRQ 95.5 Lafayette LA's on the air, a service of Lafayette Joint Venture. Losing out was Chuck Crisler, who filed a petition to upgrade the channel within one month of filing his application. Crisler did not pay the \$6070 hearing fee, saying if the channel were upgraded new applications would have to be filed, forcing the Commission not to charge a hearing fee. A settlement was approved among the remaining applicants. The Commission said Crisler forfeited his right to participate since his application had been dismissed.

Until June, *Bruce F. Elving*

- WY Gillette K252CJ (KLG 92.9 (moving from 92.7) Buffalo WY) [Vegas NV], v
- WY Lyman K203BX \*88.5 (KILA 90.5 Las/Pinedale K257DP \*99.3 (KCSP 90.3 Casper), 140 watts v [ertical only]
- BC Kelowna CKBL 99.9 11000 h,v; k format, already listed in the local phone directory as The Bulletin 99.9 FM, (604) 860-CKBL [2525], Four Seasons Radio/CKIQ AM. Dismissed was Sil k-FM's opposition on the grounds that a fifth station [in the market] would cause serious financial difficulty.
- ON Tyendinaga CKWE 105.9, "Tyendinaga Radio," a Mohawk community station, ethnic format, assumed to be 10 watts h,v
- CY Colima XHCC 89.3, "Volcan FM," parameters not known

- SC Port Royal 99.7 WFBZ (WNCK), was silent in May, but expected back by now with rf, simulcasting WWBZ 98.9 McCallanville SC, with its "beach, boogie, and blues"
- TN Crossville \*89.3 WMKW (WAJX)
- TN Jackson \*88.1 WAMP
- TN Lexington \*88.7 WIGH
- TN Millington 98.1 WSRF-FM (WYKL); AM is in Washington NJ, "Star 98 FM."
- TN Monterey 104.7 WANF
- TX Alice 102.9 KNDA (KBIC), g
- TX El Campo 96.9 KIOX"-FM" (KIOX-FM; AM in Bay City gets new calls)
- TX Giddings 101.5 KROX-FM (KOKE; AM is in Crookston MN), p, new rock, "K-Rocks," seeks 60000 h,v; 335 m, silent pending upgrade and move from 101.7. It will return as a duopoly partner with KGSR 107.1 Bastrop-Austin.
- TX Raymondville 102.1 KBIC (KARU)
- TX Sterling City 96.5 KAKR
- UT Salt Lake City 98.7 KBEE-FM (KVRI; AM is in Modesto CA) [FM; AM has new calls]
- VA Appomattox 107.1 WTTX"-FM" (WTTX-/VA Blacksburg 105.3 WVMJ (WVVV), r, hot AC
- WA Hoquiam 95.3 KJET-FM (KGHO-FM)
- WV Rainelle 95.3 WRLB (WRRL-FM)
- WY Casper 106.9 KASS (KPGM), op, "Kick..."
- NS Cheticamp 106.1 CKJM, French, 9 a.m.-4 p.m., mainly tethered to CFIM 92.7 Cap-aux-Melues PQ. Other programming is as shown in April, p. 1, col. 2. To have two full time employees—an announcer and a technician. "All other work will be handled by volunteers," says a writer in Canada's "Broadcast Technology" magazine.
- SK Caronport 92.7 CJOS, only the third religious FM station application approved by the CRTC. Caronport is home to Briercrest Bible College and Seminary, "the largest in the country," with plans to develop communications and broadcasting courses.

### Call Letters Assigned

- AL Carrollton \*89.3 WALN
- AZ Juneau 102.7 KAKZ
- AZ Flagstaff \*91.7 KNAQ (from KAHK)
- CA Big Bear Lake 101.7 KXSB (KTOT)
- CA Lompoc 106.7 KAKV, Stuart McRae, which is a separate CP from the new call-letters-less 104.9 station there
- CA Mendocino \*89.3 KAKX; correct spelling of town; last month, p. 1, col. 1
- CO Aspen 97.7 KSPN"-FM" (KSPN-FM)
- CO Steamboat Springs 96.7 KBCR (KSBT), "Big Country Radio" [in Athens]
- GA Athens 104.7 WALR-FM (WALR; AM is/
- GA Dalton 104.5 WYUU (WAKP)
- GA Sasser 107.7 WEGC
- IL Springfield \*91.9 WUIS (WSSU)
- IN Santa Claus 103.3 WAZU (WAIX)
- IA Eldon 104.3 KRKN (KACG), seeks 104 m
- KY Hardinsburg 94.3 WULF (WHIC-FM)
- MI Lansing 101.7 WHZZ (WILS-FM), "Z-101.7"
- MN Slayton 106.1 (from 103.1) KJOE (KLOH-FM); 50000 h,v; 148 m, C2
- MO California 94.3 KATI (KZMO)
- MO Ozark 92.9 KTTG (KZPF)
- MO Springfield \*90.1 KAKU
- MT Bozeman 95.1 KMMS-FM (KMMS), k, "The Moose" (not strict)
- NH Hampton 102.1 WSTG (WZEA)
- NY Catskill \*105.3 W287-- (not W287-AB, which is in Albany), relays WFRH \*91.7 Kingston (ex-WFME 94.7 Newark NJ)
- NY Plattsburgh 105.1 WKOL (WEXP)
- OH Coshocton \*91.1 WABP
- OH Swanton 107.3 WJUC
- PA Philadelphia 101.1 WBEB (WBEB"-FM")
- PA Tobyhanna 107.9 WKRF (WPMR-FM)
- SC Johnsonville 105.1 WPDT (WRHA), nt, mono, remove \$

### Facilities Changes Granted

- AL Butler WQGL 93.5 25000 h,v; 211 m, C2
- AL Notasulga W212AP \*90.3 has KEAR 106.9 San Francisco CA (from WFRS 90.5 Columbus GA)
- AL Russellville WSHK 97.7 1650 h,v; 190 m
- AZ Claypool KIKO-FM 106.1 (from 105.5), 1D with Miami-Globe, mr, "Mix 106," facilities to 6000 h,v; 91 m
- AZ Pinetop-Lakeside (town name change from Pinetop; they merged in 1984—like Winston-Salem NC), affects WKGL 106.7 [still not on] and K219-- \*91.7
- AZ Prescott KAHM 102.1 54000 h,v (778 m)

 CO Lovel and KTRR 102.5 p, Z-Rock  
 FL Fort Lauderdale WSHE 103.5 p, new rock  
 GA Atlanta WPCH 94.9 rm, replacing '70s oldies at night with "love songs," for "a better match with their overall light rock format. The change pits them against WSB-FM 98.5 during that time period, but without the latter's female DJ babbling away and cooing." Meanwhile, WSB-FM's parent, Cox Broadcasting, plans to appeal the FCC's denial of its agreement to buy WJZF 104.1 for \$8 million (last month, p. 7, col. 2). "Can you remember Cox ever losing an Atlanta case at the FCC?" asked a writer in Radio Business Report. "We can't."  
 GA Carrollton WWGC \*90.7 cf, including BBC programs; uses calls (not "Album-91"), station illegally doubles its 500 watt power to claim 1250 watts  
 GA Fayetteville WQUL 97.5 (to change call letters as it moves into the Atlanta market from Griffin, where it had been on 97.7) s, with plenty of rap to appeal to younger blacks and to directly compete for audience with WVEE 103.3. Heard testing with the new format, playing the unedited version of Notorious B.I.G.'s "Big Poppa." "That was the first time I've heard the 'f' word on the radio," Rick Mack, V-103's general manager said. "Is this the kind of station Atlanta radio needs?" Station plans to build a 496 meter tower and become 100 kw, but "for now it will be 11480 watts" at 186 m. WVEE has won a restraining order in court to prevent former executive Mary Catherine Sneed, new manager of Hot-97.5, from "using or disclosing" trade information to compete with V-103. Sneed is also prevented from attempting to hire employees who have contracts with V-103. It has been learned that Ryan

Cameron, former V-103 evening drive time DJ, has taken a morning drive post at WKYS 93.9 Washington DC, a station owned by Radio One, Inc., parent company of Hot 97.5. WVEE is the highest rated single broadcast facility in the market with 1994 revenues of \$18.5 million. Hot 97.5's signal to be strong in the south part of Atlanta, where most of the "high crime, all-black neighborhoods" are.

GA Hogansville WZLG 98.1 m, "Bright 98.1" (from "Easy 98.1"). "There was nothing 'easy' about their former sound!"

**On Air—Real Stations and Not-So-Real Ones**

CA San Diego KSDS \*88.3 now 830 h, wants 19000 watts (up from the 3000 h they originally applied for), but on the last day to file objections, XETV-6 Tijuana BC, the Fox outlet, claimed that the increased power would blanket a station not yet on the air in Tecate, about 65 km from the border. "There is some irony in this conflict in that Channel 6 was originally set aside for VHF educational use on the U.S. side of the border. . . The Mexican Fox affiliate lodging a protest was for many years a bootleg operation televising bad movies across the border. It later became an unofficial ABC outlet and later the local Fox station."  
 MI Flint WCRZ 107.9 and MI Tuscola WWBN 101.7—their tower guy wires cut by a

**Wires cut**

17-year-old boy and police were expected to arrest a second person. Both stations were off the air, WWBN broadcasting later that day, while WCRZ was expected on five to six days later. Tower reinstallation expected to cost \$150,000.

MN Mankato KMSU \*89.7—but that could all change by July 1, in wake of rumored sale of the station to Minnesota Public Radio. Plan is for KMSU to become monophonic news, talk KNGA, with the KMSU staff to be laid off. KNGA \*91.5 St. Peter MN would delete. In view of expected reduction of federal and state support, Mankato State University apparently has decided not to continue operating KMSU. An MPR spokeswoman said the plan is "very preliminary; KMSU approached us."

MN Ortonville KCGN-FM 101.5, back on air with full 100000 h.v; it had been 50 percent

**KCGN FM 101.5  
 Translator Network  
 KCGN AM 1520**

or less power since November because moisture had gotten inside the antenna. Cold and wind prevented repairs until the first week of

May, "allowing us to return to 100 percent power. . . Praise God!"

NM Corrales KSKA \*95.1, "but very strangely has joint programming and IDs with KSOH \*89.5 Wapato WA. Gives local weather for Yakima and Albuquerque only. Apparently Seventh-day Adventist."  
 NM Wagon Mound K221DM \*92.1 gets out well, "but ironically in Wagon Mound itself is poor. Site must not be on Wagon Mound Mountain or another nearby peak."  
 OK Woodward KWFY 93.5, not yet on 100.1  
 PA Ephrata WRTL \*90.7  
 WA "Kozy Kamp," at intersection of I-5 and NW 179th, 13 km north of Vancouver WA—three low power FMs. To hear them, it's best to pull over near the 179th St. overpass. The mono, 24-hour transmitters are on the Clark County fairgrounds: 91.1 is local lodging information; 92.9 is restaurants, "and seems to be strongest," while 95.1 is fast food. They're operated by the Greater Vancouver Chamber of Commerce in association with the Washington State Department of Transportation, the Clark County Fair Association and FM Marketing.  
 WY Afton KRSV-FM 98.3, not yet having moved to 98.3, "Star Country Radio 98.3"

**Off Air—Or Not Yet On**

AZ Globe KRXS 97.3  
 AZ Paradise Valley KXLL 105.9  
 AZ San Carlos KCDX 103.7  
 CA Atherton KCEA \*89.1—taken off the air because of a fraud probe. "Tiny KCEA, the Atherton radio station known for its soothing nighttime sounds and its daytime Big Band play list, is off the air as the San Mateo County District Attorney's office investigates allegations that the station's volunteer manager has misappropriated at least \$39,000 in public money," writes Edwin Garcia, San Jose Mercury News. Frank Spinetta, 54, the school's audio-visual clerk and KCEA volunteer manager, is on unpaid leave. Donations to the station were allegedly siphoned into a small video production company he owns, "KCEA Productions." Spinetta was not available for comment, but earlier had said the school district has never contributed funds to the station and that the uncertainty of the station's financing has contributed "to some things that are not going to follow normal procedures." KCEA had been known to insomniacs as a mecca for all-night hearing of recorded sounds of crashing waves and foghorns. Duluth MN, incidentally, is home of the only fully-restored diaphone fog horn on the Great Lakes. The old fog horn was replaced by a whistle in 1968, but local preservationists restored the old horn and made it fully functional early this year. With KCEA, you could turn the harbor noises on or off, but with a foghorn blasting every 60 seconds, it's a thing some people enjoy while others find it an intrusion, and are urging the mayor to silence it. How about an FM station running frog concerts all night? We could hook up a microphone out the window many nights of the year and treat an audience to such! [Credits to Craig Pattillo and Richard Toebe for sending articles on KCEA, which the school district plans to return to the air after the funds-probe is complete.]

IL Chicago WCRX, WSSD \*88.1  
 WHPK \*88.5, WLUW \*88.7, WCYC \*90.5  
 WBHI \*90.7  
 LA De Ridder KEAZ 101.7, along with KDLA 1010 AM [the summer  
 ME Brunswick WBOR \*91.1, possibly for/  
 ME Caribou WCXU 97.7, possibly for upgrade  
 ME Dennysville WVZD 102.9  
 ME Harpswell WMSJ \*91.9; it was managed by Mike Hardy, who said in November that WMSJ is the only station in New England with its main format contemporary Christian. It may be off for facilities improvement.  
 ME Houlton WHOU 100.1. "The AM has been

off for 2+ years." Last November the station changed to country music, and the move was greeted with opposition by listeners and advertisers, especially after being linked with WOZI 101.7 Presque Isle, as "Kicks FM." The "Bangor Daily News" reported on Nov. 2 that several advertisers had pulled their ads from the station, including the County Yankee Grocer in Houlton and Houlton Mattress and Furniture. Even Paul Cleary, a salesman for WHOU, admitted being stopped in stores and on the street by people complaining about the change in format and the loss of local identity of the station.

ME Machias WALZ-FM 95.3, with AM also silent for 2+ years.

ME Old Town WBZN 107.3

MN Ely WELY-FM 92.1 and 1450 AM—but may return later this month.

Retired CBS newsmen Charles Kuralt (pictured) buys the stations for \$37,000. He'll have to pour in another \$100,000 to \$200,000 to replace many technical items removed by former part owner Harry Reed II (see last month, p. 3, col. 2) and to pay back payroll taxes and other expenses. Former "off-and-on" employee Mike Hillman, 42, is being brought back as manager. Ronald Hanson, an announcer at WWJC (AM) Duluth, told me. Hanson worked at WELY about two years until this spring. Jeanne Larson, former majority owner, is now with the Ely Development Corporation, a private group seeking business development, "and earning more than she did with the radio station. The only thing is she'll probably have to move," as her apartment was upstairs of the radio station. I contacted attorney Sam Aluni about bidding on the station and its equipment, but the Kuralt deal was announced before the June 8 bidding was to have taken place. Kuralt's corporation is known as Boundary Waters Broadcasters, Inc. The station will continue to offer a basic middle of the road music service with some country, New Age, classical, blues and popular music, as well as featuring emergency announcements to vacationers in the area. In a prepared statement, Kuralt said, "It's going to provide another good reason for returning to Ely as often as I can."

NM Eagles Nest K216CT. "Santa Fe FMs are received OK. Albuquerque FMs audible but weak with multipath. Best public radio is KRZA \*88.7 Alamosa CO, also multipathed."

NM Espanola KPZA 92.9. "Espanola sucks. Santa Fe prices with none of the atmosphere. Audible on 107.1 there is not a KBOM translator, K296DZ, but KNKT out of Albuquerque."

NM Las Vegas KEDP \*91.1 for the summer; it's in the Music Building of New Mexico Highlands University. It was on last summer, but not this summer as it is awaiting a new manager. Has 2-bay circular elements on short tower at back of building. Calls stand for initials of station founder, Ed D. Prechniak. KBAC 98.1, but the facility may have sold, "so may be back on soon with new owners, presumably avoiding the mistakes of the previous ones."

NM relayers of KUNM \*89.9 Albuquerque: Site "leases signed for our new translators in Socorro, Cuba, Dzil th-Na-O-Dith-Hle, and the communities near Angel Fire and Cimarron. We should be serving these communities in 90 days or so."

OK Goodwell KPSU \*91.7, "as usual," for the summer

PA Philadelphia W297AD \*107.3. "I can't imagine anyone in Philly caring, as 'RDV is truly a local operation. Hope the Atlantic City 107.3 comes on first."

SC Ridgeland and WSHG 104.9, silent pending sale. TX Cleveland and KRTK 97.1

TX Seabrook KRTS 92.1. These "went dark unexpectedly June 2. Another parallel to Tulsa?"

WI Wausau WLBL-FM \*91.9—still waiting for a timetable and a final cost estimate. "They will try to set another fire under the community group raising money for the project. This group has already put together more than two-thirds of the money!" Underwriting income on WI Public Radio is 14% ahead of last year, so the \$450,000 fiscal year goal should be met. I hear WLBL-FM will have the channel from 6 a.m. to 6 p.m. and sharetime WXPW will use it 6 p.m. to midnight and all day Sunday.

ON St. Catharines "No Fixed Address" 100.3, using a \$120 transmitter from Radio Free Berkeley, without the benefit of CRTC blessing. The operator, a white male born in the '60s and fed up with the way business has taken precedence over art in radio, chose 100.3 because "I really don't want to step on anyone's feet as far as frequencies go." He has run the station erratically but "currently off the air to avoid detection by authorities," following a story in the St. Catharines Standard.

Caracas VENEZUELA—19 stations are found between 88.1 and 107.3. All broadcast in stereo, "with sound quality indistinguishable from North American stations." Most stations use nonDs, with the only call letters heard were for YVWZ-FM \*91.1, "Radio Sinfonia," with c. All but two of the stations are commercial. "No lame rock or boring m-o-r here! Overall, an exciting, cosmopolitan radio scene."

Deletions

IA Iowa City K207BC \*89.3, replaced by K295AC \*106.9. The "89.3 was operational for two weeks a couple of years ago, but suffered tremendous interference from WDLM-FM East Moline IL, and is no more. The CP has been turned in to the FCC. In fact, the transmitter that was used on 89.3 was returned and is the one currently in use on 106.9. All of this per station personnel."

KY Campbellsville W219BF \*91.7, see "New," above

TN Lawrenceburg W210AU \*89.9

TX Electra KWTA 94.9

VA Front Royal W202AD \*88.3 (see "New," above)

"As usual, a very good job. The improvement in map readability is really appreciated. . . Looking to many more goodies," W.B., Durham NC.

PQ Cap-aux-Meules \*93.5 calls are CBGA-8, not "CBGA-5," p. 2, col. 2 [as always!]

"Thanks for your time! Keep up the good work, / "You sure have a lot of FM mistakes in new Atlas. Maybe you should hold it up for a month and proofread/correct it before publishing it"

"I'll pay a finder's fee to anybody knowing about an AM or FM station for sale in San Francisco, which results in my buying the station."

**SCServices, 57, 67, 78.67 (SAP), 92 kHz**

Symbols are as in the "FM Atlas"

CA Los Angeles KCET \*28 has DVS, but "less descriptive video than last fall. With government cutbacks, there is now no DVS on Masterpiece Theatre," for example.

DC Washington: "We've talked to two stations and are considering two more for a French service for people coming here from France. Most stations aren't interested, holding out for high speed data delivery on their SCAs."

FL Bradenton WJIS \*88.1 (t), now "The Joy FM" (from "Joy 88")

FL Dunnellon WTRS 102.3 (t), not tU (67)

FL Winter Haven WPCV 97.5 tU, S, not tX, 67

GA Atlanta WPCH's Radio Korea's (last month, p. 5, col. 1) address is at Suite 135, 3781 Presidential Parkway, Atlanta GA 30340; (404) 455-1044; "area code may change to 770 in December." Getting "the address you wanted for Radio Korea turned out to be quite a challenge. The person who answered the phone, while very polite, had such broken English I could barely understand her. She kept pronouncing 'Presidential' as 'breeze dental'."

GA Canton WGST-FM 105.7 no SCS ("tX not used since the old WCHK-FM days")

GA Columbus WCGQ 107.3 still tC, 67, with WRGC 1420 AM. Looking for a source of SCS receivers for people out in the fringe areas who cannot hear the AM, especially at night.

GA Griffin WMVV \*90.7 no SCS; "signal seems weak for 10000 watts. At my location 67 km north of Griffin, WMVV is no stronger than 500-watt WWGC \*90.7 Carrollton, which is 77 km west of here."

ID Jerome KMXV 102.9 tU, 67; not "KMXV," as shown, p. 84 FM Atlas-16

LA New Orleans WRBH \*88.3 no tZ, 67

MA Wal tham WCRB 102.5's SCS with light rock "sounds great. I hear it with a Radio Shack amplified speaker. Why can't classic rock be on SCS? Then I wouldn't have to listen to commercials to hear my favorite music!"

MT Forsyth KIKC-FM 101.3 tU, 67

NJ Trenton WPST 97.5 (t), still tC67; no tX, 92

SC Anderson WJMZ 107.3 (t), from tC

TN Oak Ridge WOKI 100.3 (t)U (from tX)

UT Salt Lake City KUER \*90.1 tU, 67 (not tC)

VT Rutland WZRT 97.1 tC, S. Has WSYB AM on its 67; and sports and special events 92, sharing time with telemetry. "We use the 92 for audio about two hours a week only." Interested in selling SCS radios to people who cannot get the sports on 1380 AM.

WI Milwaukee WMSE \*91.7 (t), used to broadcast radiotext messages about WMSE and the Milwaukee School of Engineering. Station now upgraded with a new transmitter giving 32000 h,v; but at only 39 meters above average terrain.

WI Superior KUWS \*91.3 has generators for 67 and 92 kHz, and may soon put them to use. Was generating a test signal that the engineer and I determined to be about 50 kHz, instead of 92 kHz. "We are considering different options, including turning off the stereo generator except when broadcasting true stereo programming. How much do you say your adapters are?"

TM Matamoros—"I said or meant to say that XHMLS 101.5 is not on" (p. 3, col. 1). The Reynosa 95.3 and 103.3 were also not heard and believed not on, though I was not in Reynosa itself."

A "cease and desist" letter went out by Frank Karkota, Compol, Inc. [(800) 972-0881] to at least two SCS manufacturers. He's claiming patent infringement, and one of the companies, who does not want to be identified, told me it will cost at least \$2000 to conduct a patent search, plus attorney fees. In the meantime, it appears he has ceased and desisted. He wonders how old circuits, such as Frank uses, with the TDA7361 or Samsung KA3361 ICs, can be patented?

ENGLAND—Differential Corrections, Inc. of CA has been licensed to provide real-time traffic services via 21 subcarrier transmission sites, using the "Classic FM Radio Network."

The abbreviation "mHz" is "not correct—that would be 'millihertz' . . . Doesn't anybody today know basic physical or electronic nomenclature? To distinguish between milli- and mega-, the latter must have a capital M in abbreviations."

**Selected AM Happenings**

CA Redding KLXR 1230 reported silent, one of Sonny Bloch's owned and operated stations. Bloch, who gave financial advice over several AM stations, fled to the Dominican Republic and was later arrested with the help of Interpol. He was deported to Puerto Rico, then to federal court in Newark NJ. He has been under scrutiny from federal investigators for investment schemes advertised on his show, and is the target of a class action lawsuit from listeners. His New York affiliate, WOR 710, has dropped the show, but it continues nationally with other hosts. He's filed to transfer control of his FL stations, WGGG 1230 Gainesville and WBDN 760 Brandon (Tampa), to Paul R. Bloch. The SEC alleges Bloch bilked \$21 million from listeners who invested in wireless cable scams among other things. Bloch is accused of mail and wire fraud, as well as interstate transportation of investor money obtained by fraud.  
 GA Thomasville WSTT 730 silent, and reportedly ready to come back with a contemporary Christian format.  
 ME Lincoln WTOX 1450 silent.  
 NV Carson City KKNK 750—FCC deletes call letters. [call letters  
 NV Sun Valley KKNC 730—FCC deletes/  
 NY Cobleskill WDCS 1190: This little station had been silent as WSCM, and was the unwanted part of the three station sale involving WQBJ 103.5 and WTRY-FM 98.3 Rotterdam NY. "The FDIC took it over to foreclose on a loan. I am buying it, but am changing its call letters. Who wants a station with a sordid past?"  
 TN Brentwood WYOR 560 silent.  
 UT West Valley City KRGQ 1550 silent; FM is KRGO 107.9 Roy.  
 WI Lake Geneva WMIR 1550 silent.  
 CANADA—"A lot of Canadian area AM stations have ceased operations, moving to FM and a few more are due to make the same move. This leaves vacant frequencies on AM while the FM dial is now so full that further new stations in this area are technically impossible. 630 CFBK to 105.5 CFBK. 710 CHYR to 96.7 CHYR. 1230 CKMP to 104.1 CICZ. 1340 CFBQ to 103.3 CKLP. 1390 CHOO to 95.9 CJKX. 1480 CKDX to 88.5 CKDX. 1570 CFOR to 105.9 CICX. 1570 CHLO to 103.1 CFHK. I note that 1470 CHOW is applying for 104.9 and 1600 CJNR is also planning to move to FM, possibly 107.5. "AM developments have 590 and 1430 in Toronto switching facilities. 590 is now CJCL and 1430 is CKYC. However, 530 CIAO is still on that frequency and may stay on 530 instead of taking over 1430 facilities."

**DX Doings—An Occasional Feature**

Early June has seen the onset of FM skip in much of the country. The new XHCC 89.3, Volcan FM, Colima CY was heard near Albuquerque NM on a car radio, along with Guadalajara and Manzanillo. While June has been the best month for FM DX, a few occurrences were in May, when the band in Atlanta opened to MN, a western BC reporter logged CA with KADV \*90.5 Modesto and KXOA, Arrow 108, Sacramento "amongst the stations heard." A NY city area resident heard "at least 20 stations from all over FL, most full strength and in \$, and also six GA stations and one each in NC and SC." Farthest were WKIS 99.9 Boca Raton in \$, and a GA station on \*90.1 with Peach State Public Radio and a reading service SCS at 67 kHz, most likely WXVS Waycross.

Two of us in N.E. MN, about 50 km apart, experienced intense sporadic-E skip from about 5 p.m. to 9 p.m. CDT June 7. Reception was in an arc from Flagstaff AZ through Pocatello ID to MT. KVNA-FM 97.5 Flagstaff AZ called me; they could hardly believe their FM signal had been clearly received in stereo at 2080 km. FM skip reception should continue at various times to about mid-July. I learned that WHSM-FM Hayward WI would move to 101.1 from 101.7 on June 14, so on June 13, I managed to log KHME 101.1 Winona MN before the channel became blocked to such long-distance reception.

**MN Public Radio Fires 38 Employees—13% of its Staff**

The largest public radio web in the nation—Minnesota Public Radio—announced at a meeting of its staff of more than 200 people that 36 employees would be without a job. This is about 13 percent of the station's workforce. MPR President Bill Kling said anticipated cuts in CPB funds and an increase in the cost of paper and postage at Greenspring Co., the stations' for-profit mail-order subsidiary, meant the largest employment cut in the stations' history had to be made. The cuts went through every department of the network, including local stations. About two weeks later, two more firings were announced—those of Vic Bremer, vice president for broadcast, and Ginger Sisco, who had been vice president for marketing and community relations. Let go in the first series of cuts was Jim Wishner, afternoon news person, who had

moved to St. Paul from Ames IA about two years earlier. Jim was heard on both the classical music network and the monophonic news and information service. He sent me a story from the St. Paul Pioneer Press, with the note, "Radio makes news!"

The story said the firings came on the same day the Minnesota legislature passed a law requiring disclosure of the full compensation of officers of public stations, including what they earn from for-profit subsidiaries. Kling's salary as head of MPR is \$67,000, but his compensation from Greenspring has not been publicized. It has been estimated to be between \$500,000 and \$1 million. This year Greenspring is only expected to bring \$3

**"Everybody was hoping as they walked out of the room that a manager didn't tap them on the shoulder or look at them funny or say, 'I want to talk to you.' . . . It was horrible. It was just horrible."**

—MPR news producer

**William Kling**

million to the network; last year it turned in a surplus of \$5.1 million. Individual station managers were reluctant to mention who on their staffs were let go, but a good guess would be an average of two at each of the stations having staffs lost their jobs. Greenspring publishes the Wireless catalog for public stations and their audiences, as well as "Minnesota Monthly" magazine.

An early defection from MPR is John Gaddo, longtime manager of KGAC \*90.5 St. Peter MN and its newer monophonic affiliate, KNGA \*91.5. A musician, he'll be coordinating and producing regional concert broadcasts for WCAL \*89.3 Northfield MN.

Before the firings, Kling wrote to several area newspapers saying, "Don't cripple private success." With funds from Greenspring, "MPR has been able to grow and build the nation's best public radio system. In fact, the MPR-Greenspring relationship has been such a success that it is being examined by nonprofits throughout the country as a model to address budget problems. . . MPR and Greenspring have some staff who split their time between the two organizations. As a result, MPR has the advantage of paying less than half 'market' cost for its share of some of public radio's top executives." As the law stands, salaries won't have to be disclosed until 1997, causing MPR lobbyist Ted Grindal to quip, "Clever people will do clever things to avoid complying with the law. Who won? You won't know that until two years from now."

**Small-Print Happenings and FM Industry News**

Kling and others may be prematurely concerned about public broadcast cutbacks. A House-Senate conference committee voted to fund the Corporation for Public Broadcasting \$275 million for fiscal year 1996 and \$260 million for FY '97. Far from phasing out federal subsidies for public broadcasting, Congress is considering long-range funding plans.

Industry rumors are that Pyramid Broadcasting, and its Boston stations WXKS-FM 107.9 and WJMN 94.5, are for sale. The deal could go as high as \$300 million, if Pyramid's Chicago, Buffalo, Philadelphia and Charlotte stations are included. Serious buyers have been scrutinizing the Pyramid properties, and a sale announcement could come by the end of this month.

Christian WBGL \*91.7 Champaign IL raked in a record \$406,140 in "faith promises" from 2742 participants. KDNW \*97.3-KDNI \*90.5 Duluth also had a three-day share-a-thon—and enticed \$156,000 out of 1011 pledgers. Their goal was \$200,000, and pledges were "10% lower than last year." KDNW's parent group runs the Skylight Satellite Network, which is having its sixth annual affiliate conference in St. Paul MN July 17-19. Details from Ruth Litynski at (800) 950-2234.

A group of investors has filed suit to try to force New York city to sell its license for WNYC-FM \*93.9 on the open market (last month, p. 8, col. 2). Creole Enterprises wants to see the city sell the stations (including WNYC AM) at market value rather than to the nonprofit WNYC Foundation for \$20 million. Stick value of the FM is estimated at \$35-\$40 million. Creole Enterprises is apparently unrelated to the two Haitian SCS broadcasters—Radio Soleil on WSKQ-FM (97.9)'s 67 and Radio Tropical on WFME (\*94.7)'s 92.

The NAB's been hyping high speed data subcarriers, with many broadcasters wanting a standard that would protect the existing 67 kHz band from such encroachment. In contrast to the broadcasters' position, several existing subcarrier providers have argued that no high-speed standard should be erected or enacted. They want it like it is—on a generally proprietary system basis. Broadcasters who would like to participate in the NRSC's high-speed SCS effort may contact Dave Wilson, NAB Science and Technology, (202) 429-5345.

The House Commerce Committee approved H.R. 1555, the telecommunications reform legislation by a 38-5 vote. For radio, the major provisions are: ♦ Removal of all local and national ownership rules; ♦ Removal of most cross-ownership provisions, while allowing the FCC to prevent undue media concentration of broadcast and nonbroadcast properties in a given market; ♦ Two-step renewal process. The bill now heads to the House floor, where it will likely be considered by July. "Meanwhile, radio broadcasters should. . . lobby their senators to include radio ownership deregulation in S.652, the Senate telcom bill," the NAB urged. Another provision is for any station off the year for one year to have its authorization automatically cancelled. The FCC has urged Congress to authorize the use of nongovernment, independent testing labs (like UL) to test and/or certify radio and computer equipment, and eliminate the duplicative filings currently required for both a construction permit and an operating license before a station can go on the air.

The FCC also supports legalizing the broadcast of casino and lottery advertising, where allowed by local law. The license renewal process would be simplified by a two-tier policy. First, the licensee's performance during the preceding term would be compared only against statutory standards and not against competing applications. Second, the renewal would be automatically granted if legal standards were met or exceeded. "This would streamline license renewal procedures, eliminating the costly process for both agency and licensee of considering competing applications," said the Commission.

The FCC's taken steps to improve its services on the Internet. Its home page is <http://www.fcc.gov>, which "offers an easy to use entry point to the FCC's online resources." I had a chance recently to explore the Internet. It was exciting to access the Library of Congress card catalog, but the FCC was a bit of a disappointment. Daily Digests, Notices of Proposed Rulemaking, Orders and speeches were there—some fairly old. Ordinary Public Notices are supposed to be there, but I could not get the system to open up on documents mentioned in the Digest. My daughter, "Wilamina," enjoyed conversing with several new friends in "Mars." The FCC goes on to mention that a general e-mail address for inquiries or how to use the FCC Internet is: [fccinfo@fcc.gov](mailto:fccinfo@fcc.gov). Freedom of Information requests to [cfcoia@fcc.gov](mailto:cfcoia@fcc.gov). "The FCC Internet staff will continue to develop and expand its Internet services. Public comments and suggestions are invited."

From the classifieds: New Christian FM station starting shortly, in need of any surplus equipment as a donation. Marion Vink, KCWN (99.9 New Sharon), Box 999, Pella IA 50256; (515) 628-9999. Wendell Baxter, longtime head of WRVM, is retiring. The station needs a general manager. It is commercial, but nonprofit, an affiliate of the Moody Broadcasting Network, with a format of 50 percent music, 50 percent teaching/preaching/information. Resume and audition tape to Mr. Baxter, WRVM, PO Box 212, Suring WI 54174-0121. The person should have a bachelor's degree, be a self-starter, a leader and compassionate, with experience in radio and public speaking. Experience in ministry a plus. EOE.

**FM FORUM**

**CONTRIBUTIONS FROM READERS**

Ernie Wilson of Panaxis Productions says, "I wish you had worded the last sentence (about Stephen Dunifer and his Radio Free Berkeley [Feb., p. 7, col. 2]) differently. 'He competes with me. . . ' makes it sound like everything I said previously about Dunifer is because he's a competitor. Actually, we don't really have the same type of customer. What I object to is that he is selling products contrary to FCC regulations. He is in flagrant violation when you compare his catalog to Part 2.801 and 2.815. I, and several others, sell products within the law. Should he not also do so? His on-air activities may not be stopped at present and we certainly need someone to champion the cause of low-power radio. But, aiding and abetting micropower broadcasters by selling them FCC unapproved equipment I believe is detrimental to the cause."

Coincidentally, Larry Miller reviewed Free Radio Berkeley's FM transmitters in the June "Monitoring Times" magazine, saying the units are very crude. His technical consultant, who assembled the kits, asked, "You're not actually going to put this on the air, are you? Don't," he begged. "This thing is a menace." There were problems with frequency stability, spurious signals, and more. The instructions were poor and, in parts, nonexistent. A somewhat better kit is the Ramsey 10-A, said to be legal, but prone to drift. Wilson's transmitting devices were not analyzed.

Until July,

*Bruce F. Elving*

**Stereo—Or to Be \$[tereo]**

FL Fort Pierce WJFP \*91.1

FL Lecanto WLMS \*88.3 g, parallel to WBVM 90.5 Tampa

LA Lafayette KSJY \*90.9

MI Pentwater WEWM 94.1, with b, but with some light pop and jazz. About 70 percent of the music is instrumental; same format as on WQFN 100.5 Walker—affiliates of the Jones Satellite Network. Call letters stand for We Entertain West Michigan. It's easiest to hear in Oceana County, but plans somehow to expand and be received with clear stereo in Muskegon.

MS Pearl WVIV 93.9, "V-93"

MT Butte KAAR 92.5, "92.5 Car FM"

NM Corrales KSAV \*95.1, in the new LifeTalk Network, based at KSOH Wapato WA

SC Clemson WCCP-FM 104.9

SC Sumter WICI 94.7, sr, "All New 94.7 Choice FM" [Public Radio]

TX Victoria KVRT \*90.7, "South Texas/Woodville KVLL-FM 94.7, "Lake Country 94.7" (from "V-94.7")

VA Chesapeake WFOS \*88.7, cm, mostly classical with some big bands and classic country. Has a d-a (directional antenna) to protect WODC \*88.5 Virginia Beach. See below, "FM As it Was," for historic information on this station.

WA Seattle KUOW \*94.9 "has just started turning off its stereo generator when talk programming is on... Regrettably, now has very little music programming." KING 98.1 is still classical in stereo and an "alternative to all the brain-dead classic rock, oldies and adult contemporary formats." AM 1090 now KINF, "Info 1090."

WA Wapato-Yakima KSOH \*89.5 is the originating station of the LifeTalk Radio Network, with music and some talk programming with a religious orientation. While the network is noncommercial, funded by listener support, it will permit commercial stations to affiliate and sell time during network breaks. Paul Moore, a former Seventh-day Adventist pastor, is president, and may be reached at (509) 248-8255. "You're the third person who called today after the story was in the M Street Journal. Let me send you a packet of materials."

Monophonic

FL Sarasota WAYG \*89.1, but believed to be temporary mono.

IL Augusta WAHI \*98.5, ID with Plymouth-Bowen. "with soft Christian music, testing apparently, in late afternoon... Mono, at least for now."

**Format Changes**

Formats are the same as in the "FM Atlas"

AK Glennallen KXGA \*90.5 tr, with typical NPR fare plus a variety of diversified/eclectic musics afternoons and evenings. It is a relay of KCHU 770 AM, which is "testing" this repeater and KXKM \*89.7 McCarthy.

"KXGA puts out a real powerhouse signal... They are strictly mono although the FM audio quality was quite clear, and sounded good. They are easily heard along about a 160 km stretch of the Glenn Highway, the main highway from Anchorage to the Canadian border and south to the lower 48." It transmits from Tolsona Ridge, about 32 km west of Glennallen, alongside the Glenn Highway. "That signal feeds KXKM McCarthy (also tr format), located down on the Kennecott River. McCarthy is an old copper-mining town whose heyday was during the '20s and '30s, and is now a National Historic Site. Only about 75 folks live there now. The transmitter there is diesel-powered in the winter and uses solar cells during the summer. There are over 18 hours of daylight there at this time of year!" Since the originating station is mono, there are no plans to convert either of the two repeater stations to stereo.

AR De Witt KDEW-FM 97.3 k [country]

CA Big Bear Lake KXSB 101.1 to be Spanish, I, but briefly off the air

CA Columbia KTOD 98.9 S, r, no longer relaying KADV \*90.5 Modesto

CA Santa Ana KYMS 106.3 e, "brokered Asian, having been bought by Arthur Liu for \$9.1 million. Co-owned with WNWK 105.9 Newark NJ. Liu also owns Spanish KALI (AM) San Gabriel, and was a pioneer ethnic SCS broadcaster.

**On Air and DX Ready (Selected)**

IA Albia KLBA-FM 96.7 returned June 18, despite KMEM-FM Memphis MO complaining about interference on that frequency when it (KLBA-FM) was on in February. "I haven't heard anything from Memphis on 100.5," the frequency KMEM-FM is to go to. KMEM-FM apparently was paid by KLBA-FM to make the move, but has not yet done so.  
 MA Provincetown WOMR \*91.9, not having

Outer Most Community Radio on Cape Cod

moved to 92.1.  
 MI Grand Rapids WCUZ-FM 101.3, suffering from the country music dominance of B-93, dumps three veteran morning announcers. And manager Ron Dykstra moves up at Federated Media's Elkhart IN offices; he's replaced by David Hicks. Station is seeking a country format appealing to younger demographics.  
 MN Duluth W203AL \*88.5. "I just noticed it. It sounds pretty good." This Family Stations' translator uses stereo with its own generator, and breaks away with an ID at the top of most daylight hours.  
 MN Ely WELY-FM 92.1 and AM—signed on July 1 with the National Anthem and O Canada! At the top of the hour is a recorded announcement by new owner Charles Kuralt, mentioning serving all the wolves, loons, moose, a few Canadian people and residents of Ely, Tower, Soudan and Babbitt MN, plus "some guy in Two Rivers with a giant antenna who picks us up." I think he means Two Harbors MN, not Two Rivers WI. A local announcer completes the station ID, mentioning FM and AM frequencies and, "our apologies to customers of BSI Wireless Cable. We have ordered some very expensive filters to keep our signal out of the cable. . . ." All live "to keep the local flavor," and still signing off around 10 p.m.  
 MN Mankato KMSU \*89.7, not taken over by MN Public Radio—this after Jim Wychor of the MN Broadcasters Association and Jo Bailey of KYSM-FM 103.5-KXLP 93.1 persuaded the Mankato State University administration to not give the license to MN Public Radio. "Even if the station were taken off the air for six months or a year, it would be better than keeping it on and forcing a hasty decision about giving it to Minnesota Public Radio," Wychor, MN Broadcasters Association executive director, told me. Wychor stated the gift would have been with strings—Mankato State would have to give MPR \$30,000 a year to help run the station. MN Public Radio had already announced at a staff meeting that it would be taking over KMSU and turning it into monophonic KNGA (with \*91.5 St. Peter MN to leave the air). I called KMSU and learned that the financial picture was bleak—about \$100,000 needed to be replaced that was the college's contribution. "The two subcarriers earn us only \$3600 a year, plus there's a little tower rent we get, but that's it," I was told. An early news story

**'The most positive element of it all is that it leads toward what the Corporation for Public Broadcasting is encouraging across the nation, and that's consolidation and merger.'**

Ginger Sisco, MPR vice president

in the Mankato Free Press had a quote from Ginger Sisco of MPR saying the effect would have been to lure the network's news and information service from Gustavus Adolphus College in St. Peter MN to Mankato State University; however, five full time employees would lose their jobs. Those employees have lost their jobs anyway, with KMSU maintaining only two full time jobs and running mainly taped stereo music and talk programs, automated from NPR. Included among those let go was the engineer. "Now they'll have to contract for everything." As you read last month, p. 7, col. 3, Sisco herself was let go from MPR. In the Duluth office of MPR, two persons were let go—the office coordinator and operations director, who happened to be female and black. Bailey's group is working to form a local foundation to operate KMSU and keep it in the black. "We want the college to understand that there are other alternatives to just giving that signal away," she said. But even if those efforts ultimately fail, "MPR will always be an option for us," Ron Korves, Mankato State University vice president for university advancement, said. I tried to interest WCAL \*89.3 Northfield to approach KMSU in hopes that it [WCAL] could expand. [KUPL-FM 98.5 Portland and

OR Beaverton K251AD 98.1—relaying/  
 PA Clearfield W279AB 103.7  
 PA Levittown W300AA \*107.9, a WRDV relay, but announces the town as "Bensalem"  
 VT West Rutland "WRUT" 107.5, which claims to be a legal station, but which the FCC lists as deleted, having an expired FCC construction permit. Is on with a Christian format, "Love Radio," despite not going through the formality of obtaining a license.  
 TAIWAN Taipei 97.0 Radio Greenpeace 8 kw from a four-bay Shively antenna for about 16000 watts h.v. "Some of their stuff is tape-delay material from Radio for Peace International, Costa Rica. Unsure if Stereo."

**Off Air—Or Not Yet On**

AZ Prescott Valley KDTK 98.3. "Was old KNOT before they moved to 99.1 Hope it is not the same owner, because they are real bush league!"  
 IA Eldon KRKN 104.3; will be an LMA partner with KKSJ 101.5 Eddyville, but "it'll be a while since they haven't built any studios."  
 IA New Sharon KCWN 99.9 to be on by end of summer, with r, g, or gr (see last month, p. 3, col. 1; p. 8, col. 3). Studios to be in Pella, transmitter in Oskaloosa.  
 MN Owatonna K292EW \*106.3, not yet built. It would have been deleted if KMSU \*89.7 Mankato were to be taken over by KNGA \*91.5 St. Peter MN (see above, "On Air"). K280EC \*103.9 would have moved to 89.7. Other changes that would have happened: K280EB \*103.9 Albert Lea MN would have switched to \*89.7 with KNGA. K220AR \*91.9 there would have gone off the air because of interference to Crew-92 in Waseca MN, and K220AQ \*91.9 Fairmont would have gone to 89.7.

 (see "Formats" above)  
 SC Bishop WKHT 93.7 with Sumter

**Selected AM Happenings**

AK Seward KSWD 950 off the air. "It is one of  
 Alaska's oldest AM stations, having gone on air in  
 1948. The town of 3000 is now without any local  
 radio service. Only three FM translators serve the  
 town. Puffin Public Radio, which is basically a  
 KSKA \*91.1 Anchorage translator at \*88.1, has  
 no local facilities or studio. Two other out-of-  
 town translators are from KPEN Soldotna (161  
 km away by road) and from KWVV Homer (280  
 km). Most Anchorage AM stations are quite  
 weak, after bouncing thru the Chugack moun-  
 tains. No FM from Anchorage is able to penetrate  
 the 2130m mountains. Seward was nearly wiped  
 out during the Great Alaska Earthquake of 1964.  
 The same quake did major damage here in  
 Kodiak, mainly due to Tsunamis. Seward lost  
 nearly 50 people from the same tidal waves.  
 Hopefully, no major disaster will hit the area.  
 Without any local source of radio, I can only  
 imagine the confusion. There is no local TV there  
 either, just cable. It shows you how much more  
 dependent on local radio many of us are up here  
 in Alaska, compared with the lower-48," muses  
 Coastguardsman Rod O'Connor. "I tried to call  
 KSWD to find out their plans, but their phone  
 was disconnected. They went off the air about  
 June 1. I see where there is an application for a  
 new FM. I wish them well. That's your Alaskan  
 update for now. Have a good summer."  
 AZ Phoenix—ratings give Nos. 1, 3 and 5 to AM  
 stations! KTAR 620, No. 1, is news talk, KFYL  
 910, all talk, is No. 3, and KOY 650 (format  
 mentioned later) is No.  
 5. KMLE 107.9 Chandler  
 is No. 2, nudging KNIX  
 102.5 from the top coun-  
 try spot. "KNIX has  
 been No. 1 for years  
 except during the Gulf  
 War." KTAR posted al-  
 most a full four-point  
 ratings gain, "which is  
 almost unheard-of in  
 this business. Part of  
 that performance is due  
 to KTAR's coverage of  
 the O. J. Simpson trial,"  
 writes Julie Newberg, a  
 leading newspaper radio-  
 TV columnist. She says

of KOY: "An AM nostalgic music station, of all  
 things, has risen to the No. 3 spot, proving that  
 music formats that appeal primarily to older  
 listeners shouldn't be ignored."  
 CA South Lake Tahoe KRJC 1090, station never  
 built; FCCcancel's call letters  
 FL Bardon WBDN 760, owned by Sonny Bloch,  
 is without his network after the Feds froze all  
 Bloch's assets, including those of the Indepen-  
 dent Broadcasters Network. Some 20-25 AM  
 stations are affected; some like WBDN, took  
 SUN talk, or added their own programming. The  
 IBN was forced to suspend after the Securities  
 and Exchange Commission action which caused  
 the web's inability to pay for satellite time. [See  
 last month, p. 7, top of col. 2.]  
 FL Kissimmee WOTS 1220 adds Don Imus  
 mornings; retains travel information the rest of  
 the day.  
 ME Gorham WASY 1590—FCC dismisses appli-  
 cation, deletes call letters.  
 OK Tulsa KQLL 1430 had been sports, classical;  
 drops classical, adds Imus mornings. "Obviously,  
 they wanted to kill classical by putting it on weak  
 AM (mono?) and were maybe just running out  
 existing contracts. As a result KWGS \*89.5,  
 mostly t, resumed some c with Bob & Bill  
 syndicated show weeknights, and of course  
 \$[tereo] turned back on for it. . . Phoned KWGS  
 and they confirmed more c was a result of  
 KCMA/KQLL debacle, and furthermore KWGS  
 plans to put a second station on by year end  
 devoted to cl Frequency unknown, but some-  
 where 'to the left' of 89.5. Seems to me 88.5  
 would be best bet. . . Shades of San Antonio  
 KSTX/KPAC, insofar as adding second station  
 for c."  
 OR Keizer KYKN 1430 shuts down sister KSLM  
 1390, "5000 watts Salem OR," June 1.  
 TX Wichita Falls KWFT 620 "still off," and not  
 yet emerging as KAAM from a Dallas suburb.  
 "Enjoy FMedia! . . . Keep up the good work,"  
 R.P.B., Prescott Valley AZ  
 "I notice you have not published my suggestion  
 that you resumelisting limited network info, i.e.  
 public, and network or program affiliate lists.  
 Afraid it would get too much positive response?"  
 "Looking forward to the next FMedia! as  
 always!" J.G., Toms River NJ

**DX Doings—An Occasional Feature**

Reports of FM skip activity continue to come in. One of the best days in the memory of an Atlanta reader was July 1. He called and

played KODM 97.9 Odessa TX over the phone as it gave its call letters that afternoon. He also heard a NM Class A, and, even more unusual, short skip to AR. From Macomb IL, a DX listener added 30 to 40 new stations that day—ranging from Matamoros (call letters still unknown) 105.9, XHAHU 103.3 Anahuac NL, through "CMQ" Key West 107.9. "Why is it that I keep 'discovering' stuff from Chihuahua CI? Must be their isolation, good choice of frequencies and a very workable [skip] distance."

In northern MN, only sporadic reception of a few FL stations was noted July 1 in the morning—nothing when the more intense activity was enjoyed to the south. A north-central PA reader mentioned on 6-19 hearing "one of your locals, WKLK-FM 96.5 [Cloquet MN], and others from ND, SD, MN, IA and WI. Curiously, during skip the next day, I heard the other two MN stations on 96.5." On June 20 I heard WJAB \*90.9 Huntsville AL, WFOS \*88.7 Chesapeake VA, WJHU \*88.1 Baltimore and WBJC \*91.5 there with its two SCSes.

Some early evening skip July 5 brought in WAMU \*88.5 Washington DC, WERQ 92.3 Baltimore and WDYL 92.1 Chester VA, saying to tune in 5:15 p.m. Friday (July 7) "for a major announcement here at WDYL." Maybe that pertains to their moving to 105.7; they never made the move to 93.1. NC figured prominently in the reception of another person using a modest antenna here in northern MN.

**FM AS IT WAS—OR MIGHT HAVE BEEN**

The current program guide of WFOS \*88.7 Chesapeake VA speaks of its 40 years' existence. It started on \*90.5 as a 10-watt station in South Norfolk VA. Aurelia I. Leigh, principal of Oscar Smith High School, saw the station as a way to serve the community and teach students about radio technology. The station's 10 watts had some reach in those days. It could be heard in Portsmouth and Norfolk, besides in South Norfolk. "The FM spectrum was not crowded so there was little competition—especially at the noncommercial end of the FM dial," writes Dennis L. McCurdy, general manager.

WFOS operated 3:25 p.m. to 8 p.m. In 1956 it had a visit by Elvis Presley, appearing on the station's "Country Hoedown" show. By 1975, however WFOS

was off the air, but in 1977 after the city apparently had been renamed Chesapeake, it was decided to put the station back on with several area schools cooperating. The old equipment was so deteriorated that all new equipment was needed—even new records. The FCC allowed WFOS to increase power to 1500 watts, since a new transmitter had been donated, along with a stereo generator. The Mutual Broadcasting System was added in 1987—the only public school station nationally to be affiliated with that network. In about 1983 it moved to 90.3.

In 1990 WFOS gave up its 90.3 frequency to WHRO-FM/WHRV, which now runs WHRO-FM there, so "Hampton Road Broadcasting could build a second radio station." [WHRV Norfolk is now on 89.5.] "In return for moving its frequency to 88.7, WFOS was given a more powerful transmitter and used equipment by the public radio station. The station now has a power of 15,500 watts. . . WFOS broadcasts 18 hours a day, 365 days a year from four portable classrooms on Cedar Road at the Center for Science and Technology. Its operation is a remarkable achievement. On the other hand, WFOS still does what the original station attempted to do in 1955. . . to serve the community and train students in the art and responsibilities of broadcasting." Congratulation letters are printed from Pres. Bill Clinton, who called WFOS, "a wonderful example of the great American tradition of student-run radio." Schools superintendent C. Fred Bateman, apparently a younger man, said "Congratulations to everyone who has been involved. I look forward to listening another 40 years."

The Portland OR FM dial chart and history has been completely revised, but space probably won't permit printing it here. Patrick Roberson notes the following: KQIV 106.7 Lake Oswego OR was "Rockin' in Quad," "KQ4," 1973-77, with a progressive format 'before going broke. The station was then leased from the owner to operate it as a 'soul' station, 'Soul 107'. Something in the neighborhood of \$265,000 was owed the owner from when the format was 'progressive'. The owner demanded that the current lessee pay the money owed. When they could not do so, the owner pulled the plug, and the station was silent until a new owner put it back on as KMJK with a 'top 40' format. . . In 1991, I taped a 65th anniversary special on KXL AM. There were several Portland pioneer radio personalities on the program. During an interview, it was mentioned that the owners of then KEX-FM 92.3 gave away the FM license in 1951, stating that FM would not amount to anything."

Later, 92.3 became KLIQ-FM as a telephone-talk station (1967-72), but for about a year and a half following that it was a monophonic country-western station.

Elvis Presley visits WFOS in 1956

The format changed after bomb threats were received to the talk show hosts and the station. "As far as I know, KLIQ was the first talk station in Portland and the first FM talk station anywhere, as well as the first FM station in Portland to have a country/western format."

John Ebeling, formerly of Duluth MN, and an active FM listener before I discovered the 88-108 mhz band, sent this photo to the Pavak Museum of Broadcasting, St. Louis Park MN, which ran it in their May-June 1995 newsletter. It shows the tower of former station WEBC-FM 92.3 Duluth MN. "After WEBC-FM went dark May 15, 1950, the tower stood

WEBC FM Tower

unused until WFTV (channel 38) began using it in 1953." WFTV lasted until the end of February, 1954, when Duluth got VHF television. The tower still stands, somewhat shortened, with State of MN microwave dishes on its side and near the top. Ebeling and I co-authored a three-part series of articles on WEBC-FM and its predecessor stations for Radio World newspaper. I might add that he's the person who got me interested in SCS tunings-in, and is a very active FM DX listener from his home in Bloomington MN and lake cabin in N.E. MN.

The Pavak museum has many old radios on display, a few of which are FM, and is open Tuesday-Friday 10-6 and Saturday 9-5, at 3515 Raleigh Ave., St. Louis Park MN 55416, next door to the MN Broadcasters Association headquarters. The museum also features historic TV sets and an excellent collection of broadcast microphones and other studio gear. The museum looks for sponsorships from individuals and donations of historic material.

A MO FM-AM broadcaster, Al Germond, is watching both the in-band and non-compatible Eureka 137 system as used in Canada for digital audio radio (DAR), and says, "We believe in the future of both AM and FM, however they may be distributed in the future. Radio's future is in branding plus localism. FM has a lot of flaws, particularly in a mobile

sense which we pretend would just go away. Have you ever driven around Los Angeles for instance and seen how bad things can get? Even from the Mt. Wilson site, reception is marred in many areas, some of them quite extensive (Malibu, for example), so tests of an inband system in that market would show us, if successful, how much we have to gain by embracing digital.

"We are AM/FM broadcasters: our 70-year-old AM station suffers more from coverage problems than anything else. We strongly market and program the station with a separate sales force and separate letterhead [this is from 1947 and of course is not currently in use]. The AM

In The "Heart" of Missouri

station even has more studio space and makes money besides. But we are highly critical of stupid FCC lapses over the years which have allocationally trashed the AM spectrum. The government needs to weed out the AM spectrum, revisit the area allowing former daytime stations to operate at night with ridiculous flea-power coverage. Maybe they should do what the old FRC did in 1927-8 and have every AM broadcaster relicensed. When the FRC came into power they made all operators (then of course AM only) reapply for their stations and in the process they weeded out several hundred 'operators' who really weren't very serious about being on the air. How do you think that would fly in this day and age?"

#### Commission Issues Rate Card

The FCC has adopted a schedule of regulatory fees for fiscal year 1995, designed to help recover costs of its operations. Annual fees for FM stations for Class C, C1, C2 and B are \$1120, while for Class A, B1 and C3 they are \$745. Construction permits have an annual fee of \$620. New this year is a \$170 annual fee for low power TV, and TV or FM boosters and translators. Fees for AM stations range from \$1120 to \$620 a year. The new fee schedule becomes effective Sept. 18. The fees apply for commercial stations. Noncommercial stations and translator, like KAWZ in ID and WAFR in MS, can file for stations across the country and not pay fees. I am considering switching my licensed translator, W280CT 103.9 Hermantown MN, to noncommercial operation to avoid the fee.

The Commission announced it would grant waivers of fees where the licensee has documented that "it lacks sufficient funds to pay the regulatory fees and to maintain its service to the public." Waiver of the fees will also be granted when a station is in bankruptcy, in reorganization, or not operating (dark). The National Association of Broadcasters announces it "will continue to oppose regulatory fees for broadcasters."

#### Small-Print Happenings and FM Industry News

Another sign that the FCC's at work—its mass media bureau has initiated a plan to eliminate the backlog of applications. This mostly affects applications for transfer of ownership of FM stations. The FCC hopes to dispose of all non-routine applications in 180 days; however, it expects 120 days to be a more typical delay. "F frivolous petitions to deny will be acted on within 30 days." This causes me to wonder as to the criteria the FCC will use in judging a petition as "frivolous." To achieve its backlog reduction plan, the FCC plans to reassign several attorneys from other areas of the Commission to "focus on the more difficult legal issues raised in sales applications and to reduce the levels of internal review."

The FCC announced the next step in its plan to make a nationwide system of Digital Audio Radio service (DAR) via satellite. It is seeking comments on such issues as how many nationwide licenses should be awarded; how much spectrum each licensee should have; how to select licensees when mutually exclusive applications are filed; and if licensees should be allowed to use part of their spectrum for non-DAR services, such as data transmission. Four companies have had their applications before the FCC for as long as four years. They are:

- CD Radio, which is publicly traded over-the-counter.
- American Mobile Radio, largely owned by Hughes Communications and AT&T.
- Digital Satellite Broadcasting Corp. (DSBC), a closely-held company partially owned by long-distance reseller ClearTel.
- Primosphere, backed by two music promoters.

Each of these companies would be given 12.5 mhz to offer a subscription based service at the lower end of the S-band spectrum. For car reception, a small satellite dish, somewhat larger than a silver dollar, would be embedded in the roof. Terrestrial "gap fillers" would be needed among tall buildings, under bridges and in tunnels. Not just cars would be served, but a large market exists in the three million recreational vehicles plying the open road each year.

FCC Commissioner James H. Quello voted in favor of the plan, but issued a separate statement, saying, "It is impossible for me not to look back at what did happen several years ago with Docket 80-90. For like the promise of satellite DARS today, in 1983 Docket 80-90 promised to bring radio program diversity to underserved areas and enhance radio program diversity in larger markets. Was it successful in doing this?" he asks. "Some would say yes; others, particularly radio licensees in smaller markets, would say that the addition of FM drop-in stations weakened existing stations in some markets, lessened the amount of locally-produced and oriented programming, and led to a chase for audience that, in some ways, transformed the nature of the radio service many of us receive today. While I do not intend to dissect the good and the not-so-good effects of Docket 80-90 here, I feel compelled to note that, for good or ill, satellite DAR has the potential to become a super high-tech 80-90. The prospect counsels that this Commission be acutely concerned with how satellite DAR may impact terrestrial broadcasters' abilities to serve the needs of their local communities."

Susan Ness of the FCC issued a separate statement in support of the action, saying that it will offer niche programming to the rural population, often underserved by terrestrial broadcasters. "As a national service, DAR will have the capability of beaming 100 or more CD quality radio signals into each and every U.S. radio market. The 50 megahertz of spectrum allocated is approximately 2 1/2 times the amount of spectrum available on the AM and FM dials combined. . . I favor parameters for the service that will maximize the unique benefits of DAR and at the same time minimize its adverse impact on local terrestrial broadcasters." She also is "enthusiastic about the potential for in-band, on-channel digital AM and FM systems to better enable terrestrial broadcasters to compete in a digital world. I will do what I can to move it along as rapidly as possible."

WRPI '91.5 Troy NY has a new service called I-Phone for long distance connections to people around the world. It's an Internet connection offering simplex connections (only one voice can be heard on the line at a time) to a 486-type computer. WRPI's system is modeled after an unidentified Christian station with similar capabilities. Across town, WMHT-FM '89.1 will have to get along with \$273,000 less than it did last year from the state. Another \$1 million of the stations' (including TV) \$5 million budget comes from federal funds, which is expected to be down five percent in 1996 and 1997. The biggest part of the budget comes from membership—\$2.6 million. If you're into the Internet and want to know what's going on in TX radio, you can contact reporter Chip Kelley at <http://www.metronet.com/~chipk/radio.html>.

Attorneys for O.J. Simpson aren't amused by bill boards around Denver for KRFX 103.5. One of the bill boards pairs Simpson with mass murderer Charles Manson, and the words "bad company." The lawyers sent 103-5 The Fox a cease-and-desist letter and have threatened a lawsuit if the ads—which make Simpson appear guilty—are not removed. Jack Evans, KRFX operations manager, said it might remove the ads if it receives a deposition from Simpson stating "how he's been wronged." Another of the station's bill boards has President Clinton in hippie garb exhaling smoke rings with the heading "Doobie Brother." A third ad, titled "Grateful Dead," has a likeness of serial killer Jeffrey Dahmer of Milwaukee, who was killed in prison.

Classic rocker WZLX 100.7 Boston gives morning man Ken Shelton the boot. After two years, Shelton was told his contract would not be renewed. Shelton admits things went wrong when he went into contract talks with his employer trying to get his six-figure salary upped another 75-80 percent; WZLX countered with a 3-4 percent rise. "I hate for people to be left with the idea I was being too greedy," Shelton said. "If it was just money, I would have come down a lot more after they gave me a slightly better offer (than their first one). . . But I never felt at home with the management or their attitude toward music and radio. I never got comfortable with it." He's been talking to several other local stations. No announcement of a replacement for Shelton has been made by 'ZLX.

KEN SHELTON

Miriam Q. Murphy of Statistical Research, Inc. came through with her semi-annual report of radio listening. The spring 1995 RADARreport shows over 95 percent of persons 12 and older using radio in a week as listeners. Projected to the population, this is almost 203 million persons. FM radio maintains its 80 percent share of the total radio audience. The current study is based on 12000 respondents during May 1994 through April 1995, and was sponsored by the ABC, American Urban, CBS and Westwood One radio networks, major advertisers and agencies.

In Flagstaff, the Park Lane Group, owner of KZGL 95.9 Cottonwood, is buying KVNA-FM 97.5-AM. Class As in Louisville are teaming up.

WRKA 103.1 St. Matthews KY is buying the CP held by across-the-river WAJE 94.7 New Albany IN. In Tampa, Jacor, owner of WFLZ 93.3-AM, applies to buy WDUV 103.3-AM Bradenton. WDUV has an application for a full towered Class C. [See above, "Rulemakings," for how WDUV triumphed in a challenge filed by ECI License Co.]

A new duopoly is a-formin' in El Paso. New Wave Broadcasting is buying Stern-carrying KAMZ 93.1 for \$2 million. It owns KLAQ 95.5-AM there. In Santa Barbara, KSBL 101.7 Carpinteria is being bought by Criterio Media Group to be paired with its KYDQ 99.9-AM. In Spokane, a duopoly is formed when Elizabeth Burns' Queen Bee Radio, owner of KXLY-FM 99.9-AM, buys KZZU 92.9-AM for \$1.75 million. ABS Communications, owner of WROQ 101.1 Anderson SC, buys WJMZ 107.3 there for \$5.3 million. WJMZ was to be sold to its present LMA partner, WXWZ 103.9 Easley and WXWZ 103.3 Greer, "but that deal fell through."

Ragan Henry, owner of WZXL 100.7 Wilwood-Atlantic City NJ is buying WAYV 95.1 there for \$2.7 million. There's no word on what might happen regarding Henry's LMA with WFNN 98.7 Villas NJ.

A new media group with a \$250 million war chest has been launched by Mark Hubbard under the name Flagship Broadcasting. The Cincinnati-based venture is said to be considering markets 20-100.

A grassroots group of 18 media companies has formed the Coalition for Broadcast Diversity. While it sees the raising of national ownership limits in radio as a good thing, it wants restraints placed on what radio's largest groups can do. The CBD proposes setting the national radio ownership limits at 50 AMs and 50 FMs and retaining the present limitations on local ownership. The group notes that representatives of both major political parties want diversity in media ownership and "responsible media every time they address media issues."

The Commission reaffirmed the dismissal of Red Rock Broadcasting's application for 99.7 St. George UT, with KSGI-FM having won the construction permit. Red Rock's site was short spaced to KGMN 99.9 Kingman AZ, and it did not seek a waiver from KGMN to have that site accepted. The FCC noted that, "although retention of Red Rock's application would provide the Commission with a choice of applicants, this is not one of the public interest factors that the FCC will consider in evaluating waiver requests."

Rumors have been surfacing about the possible elimination of the FCC. Latest is from a conservative think tank, the Progress and Freedom Foundation, which wants to replace the FCC with a smaller Office of Communications. That group thinks the Commission has repressed competition and innovation. The plan involves the repeal of rules that stifle competition and the creation of jobs. Under the plan, the FCC's duties would become the responsibilities of the federal courts and state regulators. Current FCC license holders would receive permanent "property rights" over their frequency allotments, free of charge, and remaining rights would be auctioned.

Marconi Awards winners from the recent NAB show included public stations KSDS '88.3 San Diego and WBBJ '90.5 Lincroft NJ for their broadcasts of jazz.

When is an employee to be paid hourly wages or when is an employee considered a professional and working on a salary? Issue arose at a Dallas TV station, KDFW-4, but has relevance to radio, as Greg Skel, MN Broadcasters Communications Counsel, based in Washington DC, noted. He said it is best to craft job descriptions in such a way that a station would not have to pay overtime to people like general assignment reporters in the news department. "Job descriptions for newscasters, reporters, producers and directors should be written with an eye toward the standard of exempt status so that the critical elements of that status are contained in the job description and

are regularly required of the employee. Although many general managers may believe that their news employees are professionals and treat them so, they should assure that their status at the station meets the standards required by the courts, or be prepared to pay overtime to these employees."

Hero of the cause of daytime broadcasters on AM, and also a long-time FM licensee, Ray Livesay, 78, dies. He owned WLBH-FM 96.9 and its daytime AM Mattoon IL, WHOW-FM 95.9-AM Clinton IL, which are both easy listening stations. "Ray was the leader of a group of broadcasters who owned sunrise to sunset daytime only AM stations who founded the Daytime Broadcasters Association in 1955," writes Jim Wychor, in the MN "Broadcaster." Livesay wrote to me Aug. 13, 1954, noting my reception of his FM station, which was 23000 watts and on the air 5:45 a.m. to 9:30 a.m. and 3 p.m. to 10:40 p.m., M-Sat. Sundays it was on noon to 10:40 p.m. "We are very much pleased with such distance reports and are happy to know that our equipment is operating properly. . . Duluth, Minnesota, is the farthest WLBH-FM has been heard."

Sincerely,

*J.R. Livesay*  
J.R. Livesay, President  
MATTOON BROADCASTING CO.

The afternoon show on WGCI-FM 107.5 Chicago, hosted by Doug Banks, goes national next January, with the ABC networks syndicating. Banks is part of the team that includes Tom Joyner, morning person on WGCI-FM, and a network host in his own right.

FM FORUM

CONTRIBUTIONS FROM READERS

Glenn Hauser, host of World of Radio, mentions when this interesting program about broadcasting and reception can now be heard. It's 4:15 p.m. CDT Friday on WWCW 15685 (also on 9475 starting next month); 5:29 p.m. CDT WHRI 13760 kHz. Saturday 12:01 a.m. WHRI 5745; 11:30 a.m. WHRI 15105; Sunday 4:30 a.m. WWCW 5065, Sunday 10:30 p.m. KWHR 1510 and WWCW 7435. Tuesday 7:30 a.m. WWCW 15685. I often hear it 10:30 Saturday on WSUI '910 Iowa City, which seems to beam north at night. He writes: "I am offering for a limited time C-60 studio dubs of two recent World of Radio programs featuring airchecks of Chihuahua, Tamaulipas and some Texas stations (No. 799 and Extra-11) for \$12 postpaid worldwide, US funds from: Glenn Hauser, PO Box 1684, Enid OK 7302." His program recently mentioned that WETA '90.9 Washington DC is offering an overnight classical service on satellite, which must be similar to the Beethoven Satellite Network, originating at WFMT 98.7 Chicago. WI Public Radio carries the Beethoven network 10 p.m. to midnight, while WCAL '89.3 Northfield MN has it overnight. Hauser was also contributor of much of the station news last month and some of the FM mistakes this month.

Both The Braille Forum, sponsored by the American Council of the Blind, and the Guild for the Blind, Chicago, mentioned my special SCS-modified radios that will pick up radio reading services.

  - KEZX-FM 98.9 j, "Smooth Jazz 98.9" (from "Smooth 99 FM"), sounding similar to KKJZ, "Smooth Jazz 106.7," Lake Oswego-Portland. KXL-FM 95.5 Portland and KJR-FM 95.7 Seattle both call their stations "the greatest hits of the '70s."
  - WV Montgomery WZKM 93.3 mr
  - WV New Martinsville WNMR 103.9 r, hot AC, ending its LMA with WRRR-FM 93.9 St. Marys WV
  - WY Rock Springs KSIT 104.5 p, "adult progressive," the station which had an essay contest and a chance to win it for something like \$25. I never heard how the contest did.
  - NB Shediac CJSE 89.5 m; "Heard in mono, but perhaps only temporary."
- Christian radio is the nation's third-largest radio format, with one of seven U.S. (AM and FM) stations so programmed. Main religious formats are teaching/preaching 31%, contemporary Christian 23%, southern gospel 17%, sacred music 9%, news/talk 8%, black gospel 6%, inspirational 3%, Hispanic 2%, Christian country 1%. "Focus on the Family" with James Dobson is the top daily program, while "The Lutheran Hour" is the top weekly religious program. Source: Directory of Religious Media, with information supplied by Alex Nardecci.

**On Air (Selected)**

- GA Fayetteville WQUL 97.5 signed on July 4 with "Hot-97-5" (not "Hot 97.5"), and "virtually all rap (news-paper reports notwithstanding)." Alfred Liggins, 30, president of Radio One, based in Washington DC, right, laughs when asked about Bob Dole's controversy regarding lyrics: "I think the lyrics in rap music—while some are not necessarily something you want your seven-year-old running around and repeating—are not corrupting their minds. They're nothing worse than they hear in school or, unfortunately, in the home." When testing the signal, "we ran to the store, and we had a kid play a few cuts from the Notorious B.I.G. CD. And one of the cuts he played was an unedited version of 'Big Poppa'. It was a mistake. On any Radio One station we don't condone playing unedited versions of explicit rap."
  - IL Chicago WCRX \*88.1, WHPK \*88.5, WLWU \*88.7, WCYC \*90.5—are "all on the air. I don't know who supplied all that wrong information printed in June, but they are all operating this summer. Only WBHI \*90.7 is off."
  - ME Brunswick WROR \*91.1, about to move into new studios, replacing the building they were in since 1957 when they were a 10-watt station. They will be able to run 24 hours a day. "The old building closed down at 12 midnight and did not open until 6 in the morning." [on, actually heard!]
  - NJ Branchville W297AC \*107.3. "This is/ NJ Fort Lee W276AQ 103.1 must be getting the WJUX 99.7 Monticello NY signal via phone line, which would be illegal, unless it has an FCC waiver. "The translator was off for about eight hours one day... at the same time as a major disruption in phone service was occurring upstate. The 103.1 frequency had white noise during this time. When they came back on no mention was made of having been off the air."
  - NY Elmira W275AB 102.9
  - PA Harrisburg WRVW 97.3—during the transition when 99.3 and 94.9 were exchanging call letters and formats, WRVW had WWKL 94.9's oldies.
  - PA Philadelphia W300AD \*107.9, normally a WWFM 89.1 Trenton NJ relay—has been relaying other 89.1 stations. All WWFM translators and W/WNJ \*91.1 Dover Township have receivers tuned to 89.1. "They changed the main transmitting antenna for 89.1 on 6-28 and the signal on 89.1 at the Philadelphia translator site is now weaker, and therefore more susceptible to atmospheric conditions." Heard over W300AD have been WXHL Christiana DE, WYBF-WXVU Radnor Township-Villanova, WNYU New York city, all 89.1, and over WWFM \*91.1 has been WXHL.
  - SC Ridgeland WSHG 104.9 k, returns to air, parallel to WHVL 104.7 Hinesville GA
  - WI Mishicot WGBM 94.7 "definitely on."
  - BC Nanaimo CKWV, "The Wave," 102.3, \$, "can be hard to hear in Victoria, because of cross-modulation—the difference between CKQQ 100.3 and CFMS 98.5 is 1.8 mhz: 100.3 + 1.8 = 102.1, which can be broad enough to interfere with 102.3 or local 101.9 (CFUV)."
- Off Air—Or Not Yet On**
- FL Baldwin WXQL 105.7
  - ME Lewiston W246AB 97.1
  - MN St. Joseph KKJM 92.9
  - MN Willmar KBHZ \*91.9

- MN Paynesville KZPK 98.9
- MN Slayton KJOE 106.1
- WI Mayville WMVM 98.7, "I doubt that this will ever be built."

 MI Grand Rapids—“Who is KAWZ \*89.9 Twin  
 Falls ID, and why do they want a satellite in  
 Grand Rapids? Oh, I know,  
 God told them to bring the gospel to the  
 benighted heathens in western Michigan. Never  
 mind that the heathens already can listen to  
 fulltime, full powered Christian radio on WCSG  
 \*91.3, WFJR-FM 102.9, WJQK 99.3, or WGNB  
 \*89.3 (run by that outrageous bunch of heathens  
 at Moody Bible Institute). No, no, no! God wants  
 West Michigan to hear the TRUE GOSPEL, as  
 only those blessed folks at KAWZ can bring it.  
 “We also have two full-powered, fulltime  
 Christian television stations, plus television  
 satellite from LeSea Broadcasting of IN and  
 Three Angels Broadcasting. . . I am beginning to  
 believe that ‘Christian Broadcasting’, especially  
 as applied by these massive ‘noncommercial/  
 nonprofit’ national groups doesn’t have a thing  
 to do with the gospel, or reaching souls for Jesus.  
 Nope. . . It’s all about huge fat egos and power  
 trips. . . I can understand building a station if it  
 offers a unique perspective (i.e., at least Three  
 Angels satellite on Channel 61 is SDA, which is  
 an unique voice among the rest of right-wing,  
 fundamentalist. . . charismatic protestant ‘gospel’  
 voices). A Catholic station here, or one which  
 serves non-Christian religious audiences would be  
 welcome, but I’ll bet KAWZ is just another  
 fundle, pulpit-banging. . . our airwaves. It stinks,”  
 writes a former employee at a Christian station.

Calls changed from WCNB last summer,

**WCNB** (old logo)  
FM 100.3

**WIFE**  
AM 1580

WCNB STUDIOS  
406 CENTRAL AVENUE  
P.O. BOX 619  
CONNERSVILLE, INDIANA 47331

simulcasting WCNB AM overnight. "Our station went on the air in 1948, and in fact we were one of the first five to get a permit to go on with the then new technology of 'FM'. This is the 75th anniversary of the radio industry and we have been a part of it for many of those years... We broadcast 24 hours a day and the ERP is 28000 watts," writes Mike Peacock, a 28-year employee, who is chief engineer and production manager.

- LA Lake Charles KBIU 103.7 with rotating second and third cities, still "Bayou 104"
- MN Atwater KYRS 94.1 with Willmar (not Litchfield)
- MN Cold Spring-St. Cloud KMXX 94.9, no longer with Little Falls
- MN Coleraine KGPZ 96.1 with Grand Rapids, where its studios are
- MN Collegeville KSJR 90.1 with St. Cloud, not with St. Joseph
- MO Carthage KMXL 95.1 with Neosho-Baxter Springs (KS)-Joplin
- PA Avis WQBR 99.9 with Lock Haven-Williamsport
- PA Benton-Bloomsburg WKXP 95.9 with Williamsport-Hazleton (removing Berwick)
- SC McClellanville WWBZ 98.9 with Charleston-Myrtil Beach
- SC Port Royal WNCK 99.7 with Beaufort-Hilton Head-Savannah

**Selected AM Happenings**

- CA Citrus Heights KPTO-FCC dismisses app. to change city of license to Sloughhouse CA, deletes call letters
- CA Rosamond KAVR 890-FCC cancels construction permit, deletes call letters
- FL Gainesville WGGG 1230 silent, one of Sonny Bloch's stations
- HI Honolulu KIKI 990 silent, having lost its tower lease; KIKI-FM 93.9 stays on
- LA Tioga KXKW 680-CP cancelled and call sign deleted
- ME Brunswick WCLZ 900 "which used to simulcast the FM except for a church service on Sunday, is now a 'home grown' shoppers station with continuous deals in the area, like 30% off of a whale watching trip, car repairs, etc. Perhaps it will be better than before."
- MN Minneapolis-Golden Valley-Richfield KTCR 690, KQRS 1440, KRXX 980, each parallel to an FM. "Lots of music on the AM band in the Twin Cities."
- MS Canton WONG 1150 silent
- MO Springfield KTOZ 1060 only "makes enough money to keep the lights on"; otherwise uses volunteer labor, including listeners who worked to bring the station back on the air with its m-o-r format. Guess who's upset? according to the "M Street Journal." "It's the good old Department of Labor, which claims using volunteer labor in a for-profit business is against the law. Even manager Ron Johnson is unpaid. If the station is found to have violated the law, it could be forced to pay back wages and unpaid FICA taxes.

"Since this debacle began, the station has received thousands of calls, letters and FAXes offering assistance... The station's lead attorney is the mayor of Springfield and is working free of charge. Congressmen are trying to help the station. Listeners who volunteer their time with government organizations like the U.S. Park Service find it hard to distinguish the difference between the government's ability to hire volunteers and the station's right to stay in business. Johnson has promised to fight this to the U.S. Supreme Court. If the DOL wins, it could have huge ramifications on all small businesses who have family members or other volunteers help out in time of need." KTOZ-FM 104.7 Marshfield MO, is apparently unrelated to the present KTOZ(AM) operation or its ownership.

NJ Atlantic City WUSS 1490 silent  
TN White Bluff (Dickson) WQSE 1030. This station had been off the air, but is back on with a "new owner." Problem is that "there is fraud. I wanted to buy it, but learned the owner collects payment from a buyer without notifying the FCC. Then, if one payment is late, he forecloses and keeps the money. There have been several 'owners'." In buying a station, let the buyer beware!

TX Longview KARW 1280 silent  
UT Salt Lake City-KSL 1160, used to be stereo, "but is mostly talk. I notice its country and western program overnight is mono." KBOI 670 Boise and KFRE 940 Fresno are still stereo, as is CFRN 1260 Edmonton. "I still have a Sony SRF-41 and like to check the band at night," with the above DX stations heard in Victoria BC.

**FM Rulemakings Proposed**

*First date is for filing comment at the FCC; second date is deadline for replies. Stations affected, if any, are listed.*

- AZ Gilbert 103.9C2 (move from Coolidge 103.9A), KBZR, Sept. 7, 22
- CA Johannesburg 100.9A, Sept. 1, 18
- CO Clark 92.9C2, Sept. 5, 20
- FL Perry WNFK 92.1A from 105.5A, Aug. 10, 25 [eny, KJJY, Sept. 5, 20]
- IA West Des Moines 92.5C2 (move from Ank-/MI Dafter (Sault Ste. Marie) 106.5A, Sept. 11, 26

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AZ Oracle 103.7A for 103.1A, KLQB
- AZ San Carlos 103.1C2 for 103.7A, KCDX

**DX Doings—A Fairly Regular Summer Feature**

Several reporters have sent program format and SCStation news as the result of long-distance (DX) receptions on FM. The only skip heard in late July was the 19th, early evening, when some TX stations, as well as WPRL 91.7 Lorman MS, were heard. A surprise was hearing XHAAA 93.1 Reynosa TM, with stereo and a clear ID at 1902 CDT. XH "triple ah" was the strongest and longest-lasting of the far-away stations that came in that evening. It sent me to the Atlas to see how far into Mexico Reynosa is, but alas, it's right on the TX border. My daughter, who studied Spanish in school, listened to the tape and said, "I don't like that station. It has too many commercials!"

Long-distance tropo reception was aided by stagnant weather patterns that brought above-average temperatures to northern MN. July 12 evening and the morning of the 13th produced reception of several IL stations, and as far as Greenville OH (WDPG 89.9 after the midnight sign off of local WHSA 89.9 Brule WI). The Sunday morning of July 30 produced excellent reception of KPNO 90.9 Norfolk NE, several NE Public Radio network stations, and KBKB-FM 101.7 Fort Madison IA. The latter was received using a directional antenna, aimed away from local KLXK 101.7 Duluth MN, still a Class A, but having a C3 construction permit.

**Court Hands FCC Victory: Upholds "Safe Harbor" for Indecency**

The U.S. Court of Appeals handed the Federal Communications Commission a major victory in upholding the 10 p.m. to 6 a.m. period as a "safe harbor" for airing indecent material. Those are the hours when children are less likely to be tuned in. FCC chairman Reed Hundt said, "Parents and the public are the winners" as result of the court's ruling. The FCC has vowed to collect the backlog of \$2 million in indecency fines it has levied. Most of the dollar value of the fines hearken to Howard Stern, based at Infinity-owned WXRK 92.3 New York. Stern's show is heard in most markets in the morning hours, after the so-called "safe harbor" has ended.

Infinity says it won't pay a dime and challenged the FCC to take it to court. The FCC's apparently more than eager to take the matter to court, with the recent decision by the Court of Appeals strengthening its position. Of interest to Infinity is the ruling that anyone under 18 is a child and entitled to protection from obscenity. Stern has claimed nobody under 12 is in his audience, but the matter may turn on the availability of his show to those 13 to 17.

The court ruled, too, that airing warnings about a show's content gives a

station no immunity, "since the broadcast audience is constantly tuning in and out, prior warnings cannot protect the listener or viewer from unexpected program content." Infinity's intransigence, along with the FCC's expected pursuit of the matter, is almost certain to bring the case before the U.S. Supreme Court.

Fines charged for indecency include \$6000 against Infinity/WXRK that made it all the way through the FCCourt system, as well as notices of \$600,000, \$500,000, \$400,000 and \$200,000 against WXRK, \$105,000 against KLSX 97.1 Los Angeles and \$73,750 against KFBI 107.5 Pahrump NV. Another indecency fine is against a non-Stern-carrying educational broadcaster—WSUC \*90.5 Cortland NY—for \$23,730.

**Simon Geller, 75, Dies, Founded WVCA 104.9 Gloucester MA**

Simon Geller, the crusty, "Voice of Cape Ann," who operated his one-man FM station from his apartment for 21 years, has died. He singlehandedly ran WVCA from 1967 to 1988, receiving donations from listeners to "help pay the light bill," and had only three regular advertisers, a candy store and two banks. According to records filed with the FCC, from 1972 to 1975 his weekly income was \$21. WVCA was, for most of its existence, a monophonic classical music operation. It would sign off if Geller had to visit the barber. WVCA was on 14 hours a day, playing classical "old chestnuts," which were no longer copyrighted to avoid paying royalties to music licensing companies. During the 1980s he fought an 11-year battle to retain his broadcast license, which was sought by a group of wealthy investors. Geller represented himself at the hearings at the FCC, and prevailed. Following his victory at the FCC, he sold WVCA to Douglas H. Tanger for \$1 million. The station, now WBOQ, is still classical, but now stereo. Tanger said of Geller, "He really cared about WVCA and classical music. Simon persevered throughout a difficult situation where many would have taken the easy way out; he was a man of principle. I will miss him greatly." Here's a picture of Geller, 68, from the May, 1988, FMedial (p. 5, cols. 2-3). An unidentified brother

was quoted: "My brother is a diabetic and has been told to avoid stress. The Lord knows Simon has been heavily stressed for years and it is a wonder he has survived so long." He was to have moved to New York and pop the question to his sweetheart of 32 years; however, he died in Maryland and there was no mention about his having married.

**Small-Print Happenings and FM Industry News**

The House Appropriations committee approved legislation that would trim the Corporation for Public Broadcasting's allocation by only eight percent, to \$240 million in fiscal 1998. This goes along with a story printed in June, p. 8, col. 2, mentioning that public radio and TV aren't expected to do too badly, despite early efforts by Newt Gingrich to eliminate the subsidy. That "eight percent cut is a mere surface wound in the context of ongoing budget battles that have gone for the jugular of federal support for cultural institutions such as the CPB," a press service report said. The bill is expected to soon go before the full house, where another attempt may be made to strip CPB funds from the appropriations bill. Gingrich himself has come around, saying, "I think the federal government should keep national assets."

New 24-hour classical music networks are on the air or being organized by WGBH \*89.7 Boston, WETA \*90.9 Washington DC, Minnesota Public Radio, and the Beethoven Satellite Network at WFMT 98.7 Chicago.

National Religious Broadcasters has gone on record as opposing proposed changes in FCC criteria for selecting among competing applicants for new noncommercial stations. Two elements of the proposal, drafted by National Public Radio and a group of public TV stations, concern NRB. The first is a guideline under which the Commission would consider whether an applicant's "objectives" are "directed outwardly to the community of license, not exclusively to the licensee itself." The second calls for favoring an applicant with a governing board "broadly representative of the community to be served." The NRB feels the use of those criteria would result in unequal treatment of religious broadcasters. They feel they might be denied a full "educational credit," because the religious broadcaster's programming may be deemed insufficiently "educational." The NRB made it clear it is not seeking special treatment for educational broadcasters. "Rather, NRB wants only to maintain its members' ability to broadcast diverse educational messages and to serve an audience that would otherwise be underserved."

WMHT-FM \*59.1 Schenectady NY is hoping to acquire new relay transmitters in such areas as the Berkshires, where rival WAMC Albany runs WAMQ \*105.1 Great Barrington MA. And public radio listeners in that area don't want traffic reports. "The recent addition of three or four traffic reports per hour in the morning and afternoon commuting periods has triggered fewer than 10 phone call from listeners, all of them negative," writes Clarence Fanto in "The Berkshire Eagle."

Folks who object to FM petitions for rulemakings or construction permits have, up to now, been granted an automatic stay on the petitions. This means no action can be taken, either in granting the petition or allowing the station to build its facilities in compliance with a previously-granted construction permit (CP). Enter the FCC, which wants to streamline procedures so as to improve the speed of service to the public. It proposes to eliminate the automatic stay, both for future cases and to petitions for reconsideration or applications for review pending as of the effective date of the proceeding. Also, the FCC has committed to eliminate the backlog of appeals of staff actions

relating to station applications to not more than 180 days. Latter may well have proven successful, for appeal cases have been reduced from 56 to 12.

WLRR Milldegeville GA is a Class A on 100.7, but destined for C3 status. Comes Radio Perry, WPGA-FM 100.9 Perry GA, which wanted to downgrade WLRR to a Class A. The FCC rejected Radio Perry's petition.

Wolfman Jack, 57, dies. He was best known as the meek, mild-mannered disc jockey on XERF 1570 Ciudad Acuna, Mexico, which may have had as much as 250 kw; however, I remember tuning it in in the '50s when it was 150 kw. His real name was Robert W. Smith and, uh, he wasn't really mild-mannered on the air. He's been on TV and lately was on the Liberty Radio Network, hosting a weekly oldies show. I think that's about his only exposure to FM, having been heard recently on a MD station, among others. XERF, I'm told, is only a 1000 watt local station now, serving its city of license, plus Del Rio TX.

WTBT 105.5 New Port Richey FL has been granted waiver of the FCC one-to-a-market rule, to allow it to be owned by WTSP-TV, channel 10, St. Petersburg FL-WXTB 97.9 Clearwater FL. Citicasters pointed out that joint operation of WTBT would save it \$607,000 annually, with "significant public service benefits."

Not scoring with the FCC—the NAACP, which opposed the license renewals of WCUZ-FM 101.3-AM Grand Rapids MI. The FCC granted the license renewals, but admonished Pathfinder Communications to keep complete recruiting records. The NAACP tried to get the FCC to reconsider by saying that a hearing or forfeiture was in order because of the licensee's poor hiring record of African-Americans.

The NAB wants the FCC to give stations another year, to July 1, 1997, to install new

Emergency Alert System equipment. The NAB also asked the FCC not to implement specific RBDS technical standards in the new rules. NAB maintains such an action would complicate and impede possible future modifications to the RBDS standard. Recognizing that implementation of EAS could be a financial burden on some stations, NAB also asked the FCC to adopt an EAS plan that will "give broadcasters broad waiver/exemption opportunities." The NAB urged the Senate finance committee to keep minority tax certificates when stations are sold, but was unsuccessful.

A working group has been formed to develop specifications for providing EAS messages via RBDS. This will make it easier for manufacturers to produce RBDS EAS alerting systems in their new equipment. This group wants to complete its task before the new wave of orders for EAS equipment by broadcasters that is anticipated prior to the FCC's July 1, 1996 (or 1997 if the NAB gets its way), deadline for replacing their old gear with the new. Use of RBDS is optional with the broadcaster, but is considered a good way to go, what with the multiple uses of RBDS available to the broadcaster, both for self promotion and as a way of providing emergency data to listeners. The NAB provides this technical primer on RBDS: It is a continual flow of 104-bit groups. Currently, there are 13 group types at 1,187.5 bits per second, 11.4 groups can be transmitted each second. The 13 group types include, among others, basic tuning and switching information, radio paging, radiotext and emergency warning system information. The types of groups transmitted vary from station to station. Radio paging, such as Cue, is in group 7, while emergency warning messages (EAS) will be in group 9. The new EAS working group will be

defining exactly what sort of information will be transmitted in group 9 and what sort of effects it will have. For example, it will determine how the group 9 code can be utilized to "wake up" a "sleeping" receiver when an emergency alert message is transmitted. This feature will allow EAS messages to reach people who are not listening to radio when there's an alert. NAB notes that RBDS gear which incorporates alerting capability is already being marketed by Gerry LaBow's Sage Alerting Systems of Stamford CT. "The specifications being developed by the EAS working group will be compatible with Sage's equipment," the NAB said.

Shades of the old WCLM 101.9 Chicago—I still remember when it had a nightly Hawaiian music program, 7 to 7:30, billed as the only regularly scheduled Hawaiian music program in the United States (that was actually before Hawaii became a state, and before the FCC deleted WCLM for broadcasting information to bookies on its SCA—the only known case where a main station lost its license because of naughtiness on its SCS). Now comes Hawaiian Music Radio on Honolulu, along with KONG-FM 93.5 Lihue, offering a weekly hour of "Hawaiian Music Radio," and targeted to the 25-54 age group. Stations are recommended to carry it Saturday and Sunday. Formats considered the best candidates for carrying the show are easy listening, nostalgia, and soft AC. For info contact Teri McCready, (808) 545-7473.

The Howard Stern-Selena controversy continues (see April, p. 7, col. 1). One day about 500 Selena fans showed up outside WXRK 92.3 NY's studios. Some held signs reading, "Dump Howard Stern," and "Boycott Racist Radio." Protest organizer Juan Carlos Molina, who hosts a show on WNWK 105.9 Newark NJ, said Stern "didn't really apologize to the [Latino] community for what he said." Among things Stern said are that Spanish people have the "worst taste in music," and that cartoon characters Alvin and the Chipmunks have more soul than Selena. Meanwhile, co-host Robin's autobiography, *Quivers: A Life*, reached No. 3 on the NY Times' best seller list.

There's a report that apparently the CBC English [monophonic] network in Canada plans to broadcast 24 hours a day. I've noticed those stations signing off, usually without legal call letters, at 1:07 a.m. Central Time. Best known are the 50 kw AM stations like CBM 940 Montreal, CBL 740 Toronto, CBW 990 Winnipeg and CBU 690 Vancouver, but also included are a couple hundred FM stations, some quite near the border, such as CBQQ "90.5 Fort Frances ON.

Canada may ease radio regulations—the CRTC is expected to make these changes: 1) easier changing of formats; pop/rock/dance will no longer be separate format categories; 2) FM stations will be able to change format as easily as AMs have been; 3) FM-AM simulcasting up to 84 hours a week; 4) stations would no longer be required to submit detailed paperwork on their use and support of Canadian music and artists; instead, it is proposed stations pay into a fund of at least \$1.8 million. The CAB (Canadian Association of Broadcasters) has asked for ideas how this fund can be administered.

A program on WOWI 102.9 Norfolk VA, "103 Jamz," is the 10 p.m. *Quiet Storm*. It received coverage in the *Virginian-Pilot* newspaper, which called it a "lush, sensual R&B mix," appealing to young people to listen to on dates, often attracting people who don't otherwise listen to the station. WALR-FM 104.7 in the Atlanta area features returning announcer Youngblood and his R&B format 8 a.m. to noon Saturdays. He supposedly had a strong Atlanta following, with people telling the station that the one thing WALR-FM could do to improve is to bring Youngblood back. A year ago he was let go because he "didn't fit the mix," but since then the station has changed program directors and manager. Youngblood wouldn't give his real name.

A giant \$306.5 million broadcast merger makes Evergreen Media the owner of Pyramid Communications' stations. With Pyramid's 12 (nine FM) stations, Evergreen will own 34 major-market stations. Those numbers push Evergreen over the FCC's local ownership limits of two FMs per market in Chicago and Charlotte, and it exceeds the national ownership cap of 20 FM, with its new total 23. Evergreen is hoping the radio ownership/duopoly limits will change, allowing it to keep all its acquisitions. In Charlotte, it will own WPEG 97.9, WBAV-FM 101.9 and WEDJ 95.1. In Chicago, it will own WLUP 97.9, WRCX 103.5, WVVAZ 102.7 and WEJM-FM 106.3.

One of the largest broadcast groups is Family Stations, Inc. Many of its noncommercial stations, such as WFME "94.7 Newark NJ, operate on commercial frequencies. Well, one of those stations is being sold. KECR-FM "93.3 El Cajon-San Diego is going for \$12.5 million to John Douglas. KECR 910 AM will continue under Family ownership. Jacor Broadcasting expands in Jacksonville, gobbling WJBT 92.7 Green Cove Springs for \$3.75 million. The deal's legal because the 70 dBu signal of WJBT does not intersect that of WHJX 101.5 Brunswick GA. Jacor owns WQIK 99.1 and two AMs in Jacksonville.

Criterion Media Group, owner of KTYD 98.9 Santa Barbara, is buying KSBL 101.7 Carpinteria CA for \$1.325 million. Benchmark Communications is doubling or perhaps tripling in the Roanoke-Lynchburg market, buying WROV-FM 96.3-AM Martinsburg for \$5.8 million. It already owns WYYD 107.9 Amherst VA, and it has an LMA-to-buy with unbuilt WLNI 105.9 Lynchburg.

Little Glendive MT, population 4800, is home to an FM, an AM and a TV station (as well as another AM, a Christian broadcaster). I read a story how KXGN-TV Ch. 5 was run by one man from the transmitter site in the late '50s. Now the FCC's granted a transfer of control of KDZN 96.5 to the owners of KXGN-AM-TV. This violates the FCC radio-TV cross-ownership rule, especially since Glendive is not exactly in the top 25 markets, or a market having 30 broadcast stations available to the public, and the merger does not meet the "failed station" standard. However, the FCC concluded the merger will serve the public interest, using a case-by-case criterion. The waiver will yield huge cost savings by locating the KDZN facilities and sharing personnel with the KXGN stations, "which are critical to the continued operation of KDZN." KDZN was shown to be in financial distress, and only GBC, licensee of KXGN-TV-AM, offered to buy it in the two-year period since the station was offered for sale. The FCC looked at cable and newspaper penetration in the area and concluded that the preservation of the KDZN service and potential enhancement in programming services outweighed the reduction of diversity and competition that would result from the granting of the waiver request.

Many NPR stations have been offered financial news coverage from Bloomberg editors in NY, with Bloomberg feeding selected pieces from "Morning Edition" to digital audio-on-demand users of Bloomberg's computer terminals. Public radio budget cuts, thanks to the new Congress, for fiscal year 1996, \$47 million of the \$312 million that was appropriated. Of that \$47 million, public radio loses \$10 million. In the next fiscal year, CPB loses \$94 million of \$315 million appropriated, while radio's loss is \$21 million, reducing its funding to \$50 million.

The FCC approved the sale of the Park Communications empire to Park Acquisitions, Inc. for \$700 million plus. But Park must sell some of its radio stations before the deal is finalized, because of TV-radio overlap. Those to be sold are WTVR-FM 98.1-AM Richmond, WNCT-FM 107.9-AM Greenville NC and WDEF-FM 92.3-AM Chattanooga.

ASCAP is fighting back against what it terms the "deceptively named" Fairness in Music Licensing Act of 1995, which would allow stores, restaurants and bars to air music without paying the licensing fees. The NAB supports a "solid broadcaster exemption" on performance rights legislation, because of the "hundreds of dollars in free promotion for artists and record companies."

The M Street Journal reports that the Southern California Gas Company has pulled its advertising from the Evening Concert Series on KKGO-FM 106.1 Los Angeles, after 55 years on that station and the former KFAC-FM 92.3. "In the really-stupid-reasons-not-to-advertise department, the Los Angeles Sun Daily News quotes a gas company press release, 'We are no longer in a monopoly and are responding to new competition in most of our business segments.'" The program will continue weekdays with new advertisers.

The FCC's fined WAXQ 104.3 New York \$30,000 for EEO violations, charging GAF Broadcasting failed to keep adequate records, but did not find any actual discrimination against minorities in its employment practices.

The CPB is starting an \$11 million "Future Fund" to provide assistance to public stations by increasing the system's efficiency and reducing the need for tax dollars. Seed money of \$7.25 million will come from the \$176 million in the Community Service Grant pool.

FM station totals as of June 30: FM 92-108 mhz 5233, 88-92 mhz 1779 (AM 540-1600 4907). The FCC also notes construction permits. FM, 92-108, has 695 for a total (695+5233) of 5928. FM educational has 265 CPs for a total (265+1779) of 2044.

From the classifieds: New community public radio station needs studio equipment, test equipment, will provide tax letter. M. Cohen, KGLP "91.7, 200 College Road, Gallup NM 87301.

KSTP-FM 94.5 seeking fulltime and parttime disc jockeys. Three years major radio experience required. Resume to Amy J. Steedman, EEO 48-95, KSTP-FM, 3415 University Ave., St. Paul MN 55114.

For rent subcarrier on 100 kw FM in Dallas-Fort Worth; call (214) 716-7829. I suspect this is KSNN 94.9 for either its 67 or 92; or KYNG 105.3, which might have lost one of its musics.

## FM FORUM

### CONTRIBUTIONS FROM READERS

The MI Broadcaster newsletter mentions a central MI 6 kw FM station considering a possible sale. Owner retiring. Contact MAB at 1-800-YOUR-MAB for further information. I wonder if it isn't WSAQ 107.1 Port Huron, although more east than central in MI? The MI Broadcasters Association meeting this year is at the Grand Hotel on Mackinac Island, Aug. 27-29. They've lowered the price to \$75/couple with children registered for free. One of the speakers scheduled is Delano E. Lewis, president of National Public Radio. Call the MAB number for more information.

Bill Cheek has come out with a third edition of "The Ultimate Scanner" book. Like the other two, it concentrates on Radio Shack's Pro-2006 and prior models, and how these can be interestingly modified. Price is \$29.95 from Index Publishing Group, 3368 Governor Dr., Ste. 273F, San Diego CA 92122. I just had a Pro-2006 imported from Canada, and am awaiting a second unit. The model was on sale briefly in Canadian Radio Shack stores, but will soon be discontinued there, as it was in the U.S. a year or so ago.

Until September when clearer type returns, *Bruce F. Elving*

 AZ Flagstaff KVNA-FM 97.5 rm  
 AZ Seligman KZKE 103.3 o  
 AR Huntsville KREB 99.5 o  
 AR Texarkana KTOY 104.7 s, not sr  
 CA Los Angeles KLSX 97.1 tp, "Real Radio" (very strict—call letters not heard on or near top of hour). All talk weekdays, but has weekend stereo music. After Stern's show comes Kato Kaelin from the O.J. Simpson trial and Susan Olsen of the Brady Bunch. "Howard thinks they should call the station 'Radio Hindenburg' because the new format is sure to be a disaster." Weekend music is mostly '80s and modern rock.  
 CA Los Altos KHQT 97.7 rp, now parallel to KFOG 104.5 San Francisco, which bought it for \$8.2 million. Fans of the former Hot 97.7 lined up outside its studios, with radios blaring like out of the movie "FM" or "Pump Up the Volume." The plug, nevertheless, was pulled at midnight, followed by seven hours of "cume cleansing," defined as "terrible sounds expected to drive away former KHQT listeners." The sounds included a foghorn blaring "Do You Know The Way to San Jose?" KHQT became a KFOG "translator" at 7 a.m. the next day. A reader pointed out that KFOG uses a single bay from within the steel superstructure of the Mount Sutro tower in San Francisco, while KKSF 103.7 has two bays from a higher spot on the tower, both giving equivalent theoretical coverage. KFOG's single bay antenna's signal "probably splashes off a lot more nearby metal from nearby reflecting objects. Looking at the signals with the scope on my Marantz tuner, both signals look smooth, but who knows what lurks? For what it's worth, KKSF's is slightly better. . . To be fair, the 97.7 signal in the South Bay is great and adds a lot for KFOG. But it's not like KFOG is inaudible in the market; it's not. And is \$8.2 million too much to pay for a translator? Did they need to spend it at all? I think the answer to both is: yes."  
 CA Ludlow KDUQ 105.7 rs, "K-Duck," parallel to KDCU 94.3 Barstow  
 CO Fort Collins KCSU \*89.7 (moving from 90.5) pf. See related story below, "Other Small Print Happenings."

**On Air—Real Stations and Pirates**

CA Berkeley—Stephen Dunifer's Free Radio Berkeley 104.1 with 40-50 mono watts, est. HAAT 50 m, on 24 hours a day. Radio Free Santa Cruz uses a Dunifer transmitter. "I think they're on 89.3," mono. Radio Free Redwood City is on 87.9 and stereo, "but I rarely hear it these days. And there's one in San Francisco's Mission District on 93.7 that's on every night."  
 CA San Jose KSJS \*90.5 having moved from 90.7, where it was interfered with by KALX Berkeley. Although K212AR \*90.3 Madrone CA claims to serve San Jose, "the relative difference in strength essentially blasts away the translator."  
 MA Tisbury WMVY 92.7 still p, reaching Cape Cod and Nantucket. On-air guests have included three Bills through the years—Joel, Weld and Clinton. No billboards are allowed in the area, so the station innovatively promotes with call letters and frequency emblazoned on sails of sail boats. WMVY was launched in 1981 with rhythm and blues, but for the past 12 years it's been progressive/album.  
 MI Ironwood W208AL \*89.5, relaying KDNW 97.3 Duluth MN with "22 watts"  
 MO Waynesville KFBD 97.9, having moved from 97.7  
 NM Corrales KSWA \*95.1, with its own IDs on the hour, concealing its affiliation with LifeTalk network. "Appears now to be automated rather ineptly, always joining the talk show after top-of-hour news, late in programs, after an hourly plug for some local cabinetmaker who helped build the station. I called (505) 890-0800, but no answer. The announcer identified himself as Joe Lagrange, g.m. . . He also begs for PSA copy."  
 NY Brooklyn an unlicensed 10-watt "relayer" of WFGG \*88.1 Asbury Park NJ is the real reason WFGG is heard so well in this NYC borough. The studios are in Brooklyn, sending a direct studio feed to the pirate station with tower at the studio. The pirate

station isn't a relayer after all. The program goes to licensed WFGG via a phone line, which is mono, with a stereo pilot to give the illusion of stereophony. "I installed the Panaxis unit there. Don't mention this in your newsletter!"  
 NC Wilmington W212AL \*90.3, but expected to delete when WWIL-FM \*90.5 comes on the air next month.  
 OK Still water K294-- \*106.7, 100 watts, but the lower power K276CM 103.1 station remains on the air. The yagis for the 103.1 output have changed direction, so it is possible K276CM might stay on the air in altered form—at least for a while.  
 SC Chesterfield WV5Z 107.3, expected back after 10 days' silence before converting to k[outer]y. "Apparently WV5Z was fined by the FCC, and was never 'officially' on the air."  
 TX Amarillo cable included KLOM \*91.1, WFMT 96.5, and HBO 99.1.  
 TX Bandera KEEP 98.3, back on air.  
 TX Canadian K2018M \*88.1  
 TX Carrizo Springs KCZD 92.1 returns to air  
 TX Crystal City KHER 94.3 signs off 7 p.m.; still mono  
 TX Devine KTXK 92.1, but signs off 7 p.m.  
 TX Llano KBAE 104.7; wants to increase coverage with a higher tower  
 TX Pampa K215BU \*90.9  
 TX Pearsall KVWG-FM 95.3, but signs off 7 p.m.

**Off Air—Or Not Yet On**

AZ Window Rock KWRK 96.1, KWIM 102.7, but a "bill board west of Gallup said: 'Coming soon, KWIM-FM, music with a message!'"  
 IL Tuscola WKTW 93.5, along with WBAN 1460 Rantoul, "silent pending sale."  
 ME Eastport WSHD \*91.7 for the summer—may be back on by now, operating mainly in the evenings by high school students.  
 MA Bernardston W240AL 95.9; the 105.5 there was in pseudo-stereo.  
 MA Williamstown WCFM \*91.9  
 MI Marlette WBGV 92.5  
 MI Pickford WADW 105.5—owner of CP died. Widow not sure what to do.

"Newline, the telephone reading service for the print-impaired, is expanding to many areas of the country, including St. Paul MN. Also, EIES of NJ has it, and Albuquerque and Sacramento, among others. I don't think it's a big threat to SCAs though, if Kansas is any indication. Their Newline service (run by the Kansas Audio Reader) gets 800 calls a month, compared with 6000 SCA listeners to their reading services... Janet Campbell, of KARN, said 'I don't worry about taking listeners away. My concern is meeting people's needs. We've found that a few people exclusively use the Newline service, while the majority use a combination of both'. Callers hear only the articles they choose, and can speed up the reader's voice—from an article by Steve Bauer in Dialogue (print version), who also mentioned that the first radio reading service came on the air from MN in 1969."

"Interesting to see all the RBDS info in the July issue. Another useless toy!"

"Denon tuner, the TU-380RD [with RBDS display] is great! But I sure do miss signal meters. These new tuners, as you know, don't have them. To the big companies I say bring them back!"

 ON Smiths Falls CFMO 101.1 applies to CRTC to move its transmitter to the Camp Fortune

antenna farm "to correct interference that has been experienced lately. We promise our beautiful music format will continue, but want you to send any letters of support to the CRTC with copies to us. Thank you." One wagsaid, "You can bet after a year or two at the new site they will change formats."

**NonIDs, Not Just Slogans**  
*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

CA Pacific Grove KOCN 105.1 (having moved from 104.9) Oldies 105. "We had a contest Aug. 1 at 10 a.m. when we switched to 105.1. Caller 105 won a trip to Hawaii, then the first caller to name the first song we played on 105.1 won a trip to Cancun, Mexico, and random callers between 106 and 205 won other prizes. . . Phone company said we got 18,000 calls or attempts to call our numbers from 10 to 11:30 or so! We even got angry calls on our business line from offices, etc. saying people were misdialing and ringing their numbers instead! The signal on 105.1 is much clearer in places like Gilroy." Despite change of frequency, the San Jose "Mercury News still doesn't list this station in the Friday radio column."  
 CA Sacramento KWOD 106.5 Quad 106.5, still. Although not strict, this nonID has been heard regularly.  
 CO Wray KATR 98.3 Cat Country 98.3  
 DE Seaford WSUX 98.3 Y-98.3, parallel to WSBY-FM 98.9 Salisbury MD, Y-98.9  
 FL Orlando WHTQ 96.5 uses calls, "The Classic 96.5 WHTQ" (not "Q-96")  
 GA Moultrie WMTM-FM 93.9 not using "FM 94." "Imagine that, using its legal calls!"  
 GA Savannah WZAT 102.1 Z-102 (from "Rock'n'Roll Radio 102 FM")  
 IL Oglesby WALS 102.1 Walls 102, ID with Ottawa-La Salle-Peru [104.7"

"Sound of Joy")  
 ME Sanford WCDQ 92.1 92-CDQ (from "CDQ")  
 MD Towson WTMD \*89.7 The Breeze  
 MA Chatham WFCC 107.5 uses calls, not "Fine Arts Radio." "Clearly received on a car radio at the Campobello Island NB welcome center—the only MA station heard there, although other frequencies were checked.  
 MA Worcester WAAF 107.3 uses calls, not "Boston's Untamed Radio"  
 MI Cadillac WKJF-FM 92.9 TCM (strict), but "does not simulcast WTCM-FM 103.5 Traverse City. Both 92.9 and 103.5 are country. . . but they are not simulcast; 103.5 appears automated, while 92.9 is live. Go figure." Promotional material lists their joint address as 1111 S. Mitchell, Cadillac MI 49601; (616) 775-0143, with net spot rates at

\$10 for 60" and \$8 for 30". [97-9 (strict)  
 MI Grand Rapids WGRD-FM 97.9 NewRock/  
 WFG 98.7 Classic FM, now with a satellite fed service, dumping an automated service which was supplied by KDFC 102.1 San Francisco, and which KDFC is no longer syndicating. WFG has been plagued by technical foul-ups, including up to an hour at a time of dead air, yet its ratings are relatively good.

AccuRatings, based in Chicago, lumps non-commercial with commercial stations, and shows WFGR at a 1.8, well behind religious WCSG \*91.3's 4.7, but ahead of WVGR \*104.1's 1.0 and WBLV \*90.3's .9. Market leader is WKLQ 94.5 at 10 even. WCSG's 4.7 was better than WCUZ-FM 101.3's 4.6, WODJ 107.3's 4.3 and WLTH 95.7's 3.9. WCSG has "pretty much destroyed WFUR-FM 102.9. It's a mystery to me why WFUR-FM's owner doesn't just sell his facility" for perhaps \$10 million, since it's a full Class B. "Fifteen years before WCSG was a factor in the market, WFUR-FM regularly got shares in the 5.0 to 6.0 range (it now gets below a 2). Even little Class A WJQK 99.3 Zealand, whose signal is weak in Grand Rapids proper, bests WFUR-FM nowadays. WFUR-FM's owner, Bill Kuiper, is in his mid-60s and his son, Bill, Jr., owns WQFN 100.5 (which is slowly building an audience with its easy listening format). . . Given all these factors, why Kuiper continues to hold onto WFUR-FM just baffles me." Other stations using the "Classic FM" format are WSYW 107.1 Danville-Indy and WFMR 98.3 near Milwaukee. "Classic FM" only plays "fragments" of symphonies, concerti, etc. "They don't play anything more than a few minutes in length." Programming originates from the Sony Corporation headquarters in New York city. Format said to be adapted from the "successful London-based Classic FM station, a slick commercial classical station that has successfully bucked the more staid and stodgy BBC." G. M. Tom Beauvais expects the format to attract new listeners in the affluent 25-54 year old demographic.

**Selected AM Happenings**

AZ Window Rock KTNN 660, owned by The Navajo Nation, is 50,000 watts day and night (directional at night to 16 western states and parts of Mexico and Canada), with such oddities as Navajo narration of the Phoenix Suns and Arizona Cardinals games, country, and powwow music. "Broadcasting Yearbook" lists it as commercial.

CA Sacramento KFBK 1530's ratings slide, but it's still No. 1, Arbitron, at 9.7, compared to KSFM 102.5's 7.2. KWOD 106.5 and KHYL 101.1 continue to gain; KWOD at No. 6 and KHYL at No. 4.

FL Cantonment (Pensacola) WNVY 1090 re-/ GA Buckhead WQXI 790, once a top station in the Atlanta market, settles for brokered programs, hosted and sold by whoever will pay up to \$600 an hour for the airtime. It offers a "grab bag of programming," mostly talk to a potential audience of 500,000 listeners, but whose ratings have been an abysmal .5 share.

MI Grand Rapids WCUZ 1230 drops satellite country for satellite talk, including "Imus in the Morning." With WOOD 1300 the only AM in the top 10 in the ratings, "WCUZ felt apparently like talk on AM was the only chance it had for decent ratings. WCUZ-FM 101.3 remains country, albeit a low-budget version of such. . . Andy Rent, who was fired as WCUZ-FM morning man in July, is the station manager for the new WCUZ AM." MN Minneapolis KNOW \*1330 wants to move its site to Savage MN, south of Minneapolis-Bloomington for better coverage. It is now at the west side of St. Paul. In a move described as "arbitrary," the Savage City Council required Minnesota Public Radio to do an environmental impact study—to gauge the impact on migrating birds and on the effect on nursing home residents at the nearby Masonic Home. MPR has responded by suing the Savage city. "There is no evidence of a problem. There is just generalized concern," said John Herman, a Minneapolis attorney representing MPR.

MO Lexington KLEX 1570 silent.

MO Springfield KTOZ 1060 made CBS news one night. I taped the report, which portrayed KTOZ as having won the battle to retain volunteer labor. Bud Johnson, manager of KTOZ AM (a separate company from KTOZ-FM 104.9 Marshfield MO, which was sold apart from the then-silent AM), spoke with an FMedia! subscriber in Springfield and said there are other AMs which use free labor. There is one in FL and "some in PA," but he did not identify the stations. It "shouldn't be the government's business if people want to donate their time. . . We beat the government," he said. The video showed the station having antiquated tubes. Those, it was mentioned to the local person, need new sockets. The only kind available are custom made in China and cost \$80. "The Missouri Labor Department refused to talk with CBS News about the investigation, but when CBS told higher-ups in Washington it was working on the story, the investigation was abruptly closed." Johnson remains skeptical, thinking the Labor Department said the investigation was closed just

to avoid publicity. He said KTOZ will keep fighting until the U.S. government realizes that volunteers can be a good thing.

NH Madbury WWNH 1340, owned by Brian Dodge, formerly with a g format, off the air. WWNH was to have been the flagship station for a network including WTJJ 1490 Keene and WRUT 107.5 West Rutland VT. WRUT is said to be on the air, but without benefit of an FCC Construction Permit or license.

NJ Paterson WPAT 930, simulcast with 93.1 FM, but a new format such as sports talk might replace the schmaltz. "During simulcastig, the stations identify as 'Today's 93.1' with no mention of AM."

NY Cobleskill WDCC (formerly WSCM) 1190: Kevin Smith buys the license and equipment for \$18,000; plans to have returned it to the air by Sept. 5—if equipment can be wired together in time. It's probably for sale to the first person forking over \$75,000. He and engineer Harrison Reed have been rewiring the studio and recarting the music.

PA Doylestown WBUX 1570 silent. Had technical problems; needed a taller tower, but sales fell off before a new tower could be built. With its '70s format it was at a disadvantage when WMGK 102.9 Philadelphia changed to that format.

TN Harrogate WRWB 740 reported silent.

TX Plano KAAM 620 (formerly KWFT Wichita Falls) wants those calls, but "wrangling with the FCC over permission to keep the KAAM calls, and construction of the new studio and tower in Plano have delayed return, previously planned for July." The KAAM calls were given up by KCTX, "The Ticket," 1310 Dallas, a sports talk station. And, of course, the KAAM calls exist in Huntsville MO 103.5 as KAAM-FM.

ON "North Shore Radio" consists of these jointly-programmed stations: CJNR 730 Blind River, CKNS 930 Espanola and CKNR 1340 Elliot Lake.

ON CHVR 1400 Renfrew, CHVR-1 1350 Pembroke and CHVR-2 1490 Arnprior all on the air and programming in tandem.

**FM Rulemaking Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AL Liman 107.1A counterproposal by Lisman Community Broadcasting Co.
- AZ Oro Valley 103.3A, Sept. 25, Oct. 10
- IL Athens 96.1A, Sept. 18, Oct. 3
- IL Carthage 93.9A, Sept. 25, Oct. 10
- IL Colchester 104.1A, Sept. 25, Oct. 10
- IL Taylorville 97.3A, Sept. 25, Oct. 10
- IA Atlantic 95.7A, Sept. 18, Oct. 3
- KS Dearing 98.1A, Sept. 15, Oct. 2
- MN St. Joseph 99.9A, Sept. 25, Oct. 10
- NM Lordsburg 103.7C3, Sept. 18, Oct. 3
- NM Raton 94.7A for 93.7C2, KRTN-FM, Sept. 18, Oct. 3
- NC Aurora 104.5A, Aurora Broadcasting counterproposal [counterproposal]
- NC Ocracoke 104.7C3, JEE Broadcasting/ NC Sanford 103.1A, Oct. 12, 27
- OK Colgate 92.7C2, Colgate Broadcasters' counterproposal [with Denison TX]
- OK Madill 102.5A for 102.3A, KMAD-FM, / TN Lexington 96.5A, Sept. 18, Oct. 3
- TX Denison 101.7C1 for C3, KDVE
- TX Jacksboro 98.3A for 101.7A, KAIH at a new site (not to build on 93.7), with Denison
- TX Paris 104.3C2 for 101.9C2, KBUS, with Denison [Sept. 18, Oct. 3]
- TX Premon 100.7C3 for 104.9A, KMFM, / TX Winona 102.7A, Sept. 15, Oct. 2
- WV Salem 99.5A, Sept. 18, Oct. 3

**FM Rulemakings Finalized**

 VI Frederiksted dismissed 107.5A bid  
 USA—various locations. The FCC amended the table without specifying where.

### DX Doings—Long Distance Tropo Widely Heard

A "tremendous tropo opening" was Aug. 20 in IL and IN, with Roger Winsor of Valparaiso IN hearing all "K" stations except for WIBW-FM 97.3 Topeka KS. His list included KTGL 92.9, Eagle 93, Beatrice-Lincoln, KRZZ 96.3 Derby-Wichita, KBEZ 92.9 Tulsa OK. A'so received was skip Aug. 3—KBHT 93.5 Crockett and KUTZ 98.9 Lampasas, for example. "I am sitting at 1172 [stations received] now, but the KS, NE and OK loggings will never be repeated. . . All were heard on the Fisher with a hand-held dipole. . . Keep the FMedial going; it's irreplaceable."

"Last night (Aug. 15) stations from ME to VA were coming in here in MA, maybe because of Hurricane Felix," writes another person. A listener at the home of Eastern Illinois University, Charleston, heard tropo (not skip) as far as North Platte NE July 29-30, 94.9 and 103.5. "I guess 97.1 must not be all night." And he received several Class As from the TX panhandle, including "everything from Amarillo from 3 a.m. to 1 p.m."

Aug. 23 I managed to pick up KNBj \*91.3 Bemidji MN, with its mono news and information in the clear, despite local KUWS Superior WI on the same frequency. I heard it by means of using two antennas and a special phasing device

to null out the closer station. Carol and I took an 11-day drive to as far as NB, as well as northern New England, ON and PQ. Some of the station and SCS news is from what I heard (or didn't hear) along the way. Last month's FMedial was at the printer while we were gone. This issue, therefore, has about 6 weeks' of FM news in it—all that fits.

### WSMC \*90.5 Kicked Out of NPR; Brings to Light Issues of Public Stations Carrying Religion

After 24 years as a member of National Public Radio, WSMC \*90.5 Collegedale, serving Chattanooga, quit the network. This happened after WSMC received notice that the web was instituting membership termination proceedings. Why the fuss? It's because WSMC "violated the network's membership agreement by airing too much religious programming." WSMC is run by Southern College, an arm of the Seventh-day Adventist church. The station has preempted NPR programming for the Sabbath from sundown Friday to sundown Saturday, "sometimes in the middle of AllThings Considered."

Since last November, when disgruntled listeners began to write letters to the *Chattanooga Times* and then to the CPB and NPR expressing dissatisfaction with the preemptions and mix of secular and religious programs, the station has been engulfed in controversy. A group called Chattanoogaans for Better Public Radio was formed to press the college to air NPR programs in their entirety, letting WUTC \*88.1 Chattanooga air them, or give up the license.

NPR was responding to listener complaints when it started its action against WSMC. "It is the listeners or the FCC that bring violations to our attention," said Susan Davis, NPR's director of station and program services. "The only reason I am upset is because I believe NPR acted prematurely," said Dan Landrum, general manager of WSMC. He had been talking with WUTC about carrying some of the programs WSMC was preempting. "The idea was to do what was best for the community," said Landrum. "I explained this to NPR, but they didn't listen."

Landrum expects WSMC to focus more on public affairs and business in the Chattanooga area, buy some programming from Public Radio International, while continuing to carry such NPR features as Performance Today. Landrum commented on the further risk that the Corporation for Public Broadcasting might withdraw support for his station: "I hope that won't happen, as it's a valuable resource. Still, not having to pay for NPR will decrease our expenses. There is life after CPB, too."

I called WAUS \*90.7, Andrews University, Berrien Springs MI, which serves South Bend IN with public radio. Andrews is another Seventh-day Adventist institution, and I learned WAUS had quit NPR

about eight years ago, but not in a dispute about religious programming. "It was more of a budget thing, although I wasn't here then," said announcer Jeff Smith. The former manager, Mike Wiist, is at Keene TX, teaching at Southwestern Adventist College and helping produce programs along with Bob Mendenhall of KJCR \*88.3. Smith heard that WSMC "edited programs for content, something that I understand WAUS never did."

Other stations have been the subject of CPB scrutiny, principally WFUV \*90.7, Fordham University, New York, which carries a mass for shutins on Sunday mornings. The National Telecommunications and Information Administration has spent "years fighting the Fordham station in court over grant eligibility [and] is seeking public comments to reconsider its position against equipment grants to stations that carry religious programs," writes Jabeen Bhatti in the public broadcasting newspaper, Current. The other Sunday morning I wanted to hear music over the station voted the best classical music station in Minneapolis-St. Paul, WCAL \*89.3 Northfield MN, only to hear a Lutheran church service complete with an infant baptism. Hearing religion on a public station near you—that is, a public station that is CPB-funded and carrying NPR programs, like "Morning Edition" or "All Things Considered"? Write in, and I'll mention the stations and situations in FMedia!

### Small-Print Happenings and FM Industry News

Sept. 18-20 looms as the deadline for paying regulatory fees to the Federal Communications Commission; however, the FCC and NAB remind that noncommercial—or even nonprofit—stations don't have to pay the fees. If they filed proof of their nonprofit status in 1994, they don't have to do that again. For other broadcasters, fees not paid by the deadline are subject to a 25 percent penalty, but the FCC'll consider applications for waiver of the penalty where the payors have made a bona fide effort to comply with the filing period. Those who pay early aren't penalized, the FCC hastily mentions. Questions? Call the Fees Hot Line, (202) 418-0220.

Regarding commercial FM (and TV) translators the FCC says, "We will automatically waive the regulatory fee for the licensee of any translator that: 1) is not licensed to, in whole or in part, and does not have common ownership with the licensee of a commercial broadcast station; 2) does not derive income from advertising; and 3) is dependent on subscriptions or contributions from the members of the community served for support." It looks like my licensed translator, W280CT 103.9 Hermantown, would be thus exempt from paying fees.

From the classifieds: Program director WQMX 94.9, Akron's Hot Country FM, 3-5 years' experience, computer literate, good air talent. Tape and resume to Nick Anthony & Assoc., 104½ High St., Ste. 201, Wadsworth OH 44281. EOE.

Ninety-minute cassette tape, "The Best of WODD," a pirate station from Toms River NJ, 1989-1992. Includes info sheet and logo, \$5 check or money order to Jim George, 1160 Bay Ave., Toms River NJ 08753-7882; (908) 288-9351.

On my trip to the East I picked up about 300 radio bumper stickers. Buy them at 20 cents, minimum order 10, all unduplicated. With larger orders there may be some duplication. Add \$1.50 postage for each group of 10 bumper stickers. Until next month when "FM Forum" returns,

Buc F-Elving

**On Air (Selected)**

MI North Muskegon WLCS 98.3 and Whitehall  
 WEFM-FM 97.5, retaining their present for-  
 mats. WLCS now LMAed with WEFM-FM,  
 "but WLCS may end up being satellite-fed, as  
 is WEFM-FM." [from 96.7  
 MO Memphis KMEM-FM 100.5, having moved/  
 NH Berlin WZPK 103.7, rumored to be going  
 country. Its directional antenna may be  
 reengineered, as an area engineer told him  
 there's too much interference to and from  
 WKNE-FM 103.7 Keene.  
 NY Lake Ronkonkoma WSHR \*91.9: "I tried  
 four times this summer while going through  
 CT to see if WSHR is still mono, but couldn't  
 pick it up. No wonder they want a power  
 increase!"  
 NY Ossining WDFH \*90.3, "an aural delight in  
 lightly-processed stereo. With WBAU off the  
 air during his regular broadcast hours (see  
 below), his coverage has more than doubled!"  
 On from "late afternoon to 6 to 7 a.m. We  
 would like to increase power by going  
 directional."  
 OR Medford 107.7, a pirate (or cable radiation?)  
 rebroadcasting the Dance Channel from DMX  
 Cable. "They never get caught. They're on all  
 the time, for over a year."  
 TN Chattanooga WUTC \*88.1 still "Jazz 88"  
 (except when carrying c late night when  
 simulcasting WUOT 91.9 Knoxville). NPR  
 programs were to have begun Oct. 1. "Regard-  
 ing 'Morning Edition' and 'All Things Con-  
 sidered', I think both programs are way, way  
 too long. Their producers need to become less  
 enamored with their own self-importance,  
 present a more balanced view of things, and  
 learn how to summarize!"  
 TX College Station-Bryan KTSR 92.1 still rp,  
 carrying Z-Rock beginning every night at 10.  
 See "Off," below, TX Franklin.  
 TX Seabrook KRTS 92.1, back on with c  
 VT/MA state line area-89.9 a mono travel  
 information station. "Low power."  
 VT South Burlington WXXX 95.3, not having  
 moved to 95.5, still "93 Triple X"  
 WI Shawano WOWN 99.3 is doing well, based in  
 a town of 8000. In 1994 it billed, along with  
 its AM, \$1.2 million. "I was offered \$3  
 million for it by Nathan Goetz, now living in  
 FL, but turned him down. We bought WJMQ  
 92.3 Clintonville, which was our only radio  
 competition. This is legal because there are  
 over 15 radio signals coming into the market.  
 Our other competition comes from two  
 weekly shoppers and cable TV, selling spots a  
 \$1 each! Happy 25th," from the best man at  
 our wedding and a former student of mine at  
 Mankato State University (MN), Bruce Grass-  
 man. He owns a fast-food restaurant and  
 motel in Shawano as well.

**Off Air—or Not Yet On**

ME Lincoln WHMX 105.7. "The troubled radio  
 operation in Lincoln went dark on Aug. 11. . .  
 The stations (including WLKN AM) went into  
 bankruptcy last year when owner Roger Parent  
 was unable to keep creditors at bay. . . The bank  
 continued to subsidize the operation to the tune  
 of \$3,000 to \$4,000 a month or more. That's  
 about what the power bill on the FM runs every  
 month." The station supposedly billed as much  
 as \$22,000 a month recently, "and was showing  
 a profit before accumulated debts forced the  
 bankruptcy. No word on when it might get back  
 on the air, or who might run it," writes Robin  
 Crabtree in the Greater Bangor Business Monthly.

MO Tarkio KTRX 93.5, "silent pending sale." Expected to return with a religious format.  
 NY Garden City WBAU \*90.3, licensed to Adelphi University, "a small and very conservative right-wing college on Long Island. Their radio station has been on the air for at least two decades, but in the past few years it has been endeared by the black students at the school. Their participation in the station gave it new life and some unique alternative programming. WBAU became the source for cutting edge rap, hip-hop and other street music, and the only place you could hear African music knowledgeably played. Two of their disk jockies went on to become stars on MTV!"

"As you know the frequency is shared with Nassau Community College's WHPC," with separate transmitters. "The frequency was awarded to both schools as a compromise when Sewanaka High School in Elmont gave up their claim to the frequency after leaving it dormant for years." [The station was licensed as WSHS Floral Park NY.]

"One recent weekend when WBAU was off the air, the university security police had all the locks changed to the studios and transmitter without notifying anyone. The 'WBAU' sign was pulled off the wall and painted over. Adelphi had had enough of alternative rap music. . . At least one black student group has retained a lawyer to force the university to reopen the station. Without any knowledge to the student broadcasters and other volunteer staff members, a tentative deal was cut between Nassau Community College and Adelphi. For the measly sum of \$30,000, WBAU will hand the frequency to WHPC for full-time use. It will be interesting to see how the Commission handles this one. If Adelphi hands in their license, no money can be collected from WHPC. Will they approve an LMA if WBAU dismantles its transmitter site? Officials at WHPC have said they will not occupy the frequency full time until at least next spring, regardless of what occurs."

"Comments about this debacle can be mailed to Pres. Peter Diamandopoulos, Adelphi University, 200th Avenue, Garden City NY 11530; and Pres. Sean Faneli, Nassau Community College, Garden City NY 11530." With WBAU off, it's easier to pick up WDFH \*90.3 Ossining NY, Marc Sophos' new stereo voice, which also airs NOAA weather before and after its broadcast day; and WHCR Harlem Community Radio's monophonic voice. "Also WAMC Albany NY with transmitter facilities (see related story elsewhere) atop Mount Greylock in MA, can now be heard regularly in Westchester County. This is the kind of station Armstrong dreamed of! I have heard WAMC on a \$10 Walman-type radio between buildings in Manhattan!" [Thanks to Karl Zuk for this report on WBAU.]

OH Bellevue WNRK 92.1, silent after a fire hit; expected off for another month.  
 TX Franklin-Bryan-College Station KLTR 101.9; had Z-Rock.

- TX Longview 105.7 is KYKX, not "KYRX," p. 2, col. 3. KYRX is on 104.7 in Chaffee MO. KYRX has \$[tereo].
- WY Sheridan K210AM is on 89.9, not 88.9, p. 81

"The type in the Sept. issue is easy to read; it only has slightly lower contrast than Aug. (which I still like better)." Actually, it is not different type, but different ribbons. I now have a supply of IBM Composer ribbons, so am not having to use generic IBM Selectric II-type ribbons, except for correspondence.

**Selected AM Happenings**

- CA Coalinga KKFO 1470 silent, "lost out to a new sewer farm"
- CA—a new 24-hour news station consisting of KNNZ 540 (formerly KJQY) Victorville CA, KNNS 1260 (formerly KJOI and before that KGL) San Fernando and XETIN 540 Tijuana, all known as "K-News," billed as an alternative to L.A. KNX 1070 and KFWB 980. Owned by KKGQ-FM 105.1 L.A. and boasts a combined frequency "from Santa Barbara to Los Angeles to Orange County to San Bernardino-Riverside to San Diego to the NV border." Former sports reporter at KNX Pete Arbogast hosts morning drive. [letes CP and call letters
- CA South Lake Tahoe KJRC 1090—FCC de-/ FL Lantana WPBR 1340, a multi-ethnic station, "which when unable to sell overnight time to local groups, plays alternative music."
- FL Royal Palm Beach WLWJ 640, owned by Carl J. Auel, former manager of KEBR \*100.5 Sacramento CA, "has been broadcasting sporadically. . . . The religious format station is now often at varying powers, low audio, or off the air entirely."
- FL Sebring WJCM 960 silent.
- FL West Palm Beach WEAT 850 now has AP

Network News 24 hours a day "after having gone through a half-dozen format changes in as many years."

GA Atlanta—WGST 640 and WSB 750 both offer talk, but there's no appeal if you're a Democrat or outside of the 25-54 demographic. That's the charge made by Mike Malloy (left), who was the lone liberal on local talk radio before being fired by WSB 750. He briefly hosted a show on WQXI 790 Atlanta, which in 1949 was licensed to the upscale Atlanta neighborhood of Buckhead. Malloy, in an Atlanta Journal-Constitution article charged that the audience for talk radio is

"inexorably shrinking—an unintended consequence of an unconscious conspiracy among station programmers, advertisers and the grievously inept Arbitron ratings system."

IL Rockford WRRR 1150 silent. WNTA took over the former WRRR frequency of 1330 with talk and m-o-r.

MI Rockland WISZ 810 (formerly WBYY), now "Radio Aahs"

MI Zeeland WBYY (formerly WISZ) 640 sports. "Co-owned stations swapped channels: 810 is 500 watts days only; 640 is 2500 watts days, 250 watts nights."

MS Hattiesburg WHLV 1310 silent.

NJ Toms River WJZR 1550—FCC deletes CP and call letters

NY—NYC has only 3 AM stereo stations; used to have 5. WOEW 1560 no longer AM stereo and WINS 1010 used to be stereo. They say it's "on hiatus now."

NC Greenville—Voice of America, wanting to continue targetting Europe, faces having to beg for money from the public. The House voted to cut \$54 million out of a proposed \$395 million budget. "The purpose of continuing the Europe program has been questioned since the end of the cold war. Voice of America's Europe Radio Network is only one portion of the service's programming," according to the New York Times. The VOA is seeking a commercial company to finance the cost of producing its programs and to have commercial advertising.

OR Eugene KDBS 840 silent

SC Cheraw WCRE 1420 still "Classy 1420" with news, then expected to go silent and reemerge as country with new ownership.

SC Seneca WSNW 1150 silent, not owned by the Alps of WPEK 98.1 fame.

TN Kingsport WKCV \*1090 changes to noncommercial, educational.

TX Plano KAAM 620 now testing; the dead air is interrupted each hour for a "KAAM Plano" ID. Expected on shortly, having moved from Wichita Falls.

Nationwide—FCC reconsiders the expanded band plan (1610-1700 kHz). It agreed that certain errors were made in the engineering data base to select "winners," all of which have been notified. "When the allotment plan becomes final, the Commission will individually notify each licensee that was allotted a frequency and call for construction permit applications to be filed," read an FCC release. However, WJDM Elizabeth NJ was given permission to migrate to 1660, since Elizabeth is the largest U.S. city with no nighttime radio. It is not clear if WJDM will simulcast or close down its 1530 frequency.

Watch for it to appear on 1660 this month. Never was I made more aware of the paucity of good programming and quality engineering on AM than when I tried a Denon NAB TU-680 FM stereo-AM stereo tuner. The few AM stations received were all talk with the exception of WSM 650 Nashville, which provided a few hours of in-and-out stereo reception at night, especially on the "Opry." However, the all night truckers' show lacked stereo, even though the stereo light was on. WLS 890, WBBM 780 and WMAQ 670 Chicago all lit the stereo, but it was invariably "pseudo stereo," with the stations' news and talk formats. The tuner's FM selectivity was not as good as my modified Magnum-Dynalab FT-

101A's, but its AM wide appeared to be working—at least on weak, out of town stations it was noisy. There was virtually no music on local AM to test its audio efficacy.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- IL Meredosia 93.5A, Nov. 13, 28
- KY Flemingsburg 95.1A for 106.3A, WFLE-FM, with Milton WV, show cause/why not?
- KY Nicholasville 95.9A counterproposal by Mortenson Bcstg. Co. of KY
- MI Honor (Beulah) 100.7A, Oct. 19, Nov. 3
- MT Big Sky 104.5A, Nov. 13, 28
- TX Rio Grande City 107.5C2 counterproposal filed by Sound Investment Unlimited, Inc.; or also 98.7A at Benavides TX and 107.7C3 at Bruni TX.
- TX San Angelo 105.7C3, Nov. 13, 28
- TX Snyder 97.1A, Nov. 13, 28
- TX Zapata 93.5A, Oct. 23, Nov. 7
- WV Milton 106.3B1 for A, WZZW-FM, Oct. 19, Nov. 3
- WV New Martinsville 99.5A, along with 103.3A for 99.5A at Salem WV, Seven Ranges Radio counterproposal
- WY Casper 102.5A and 104.7A, Oct. 19, Nov. 3

**FM Rulemakings Finalized**

- Dates are when FCC filing windows are open*
- AL Headland (Dothan) 105.3C3 for A, move from Chattahoochee FL, WBCD
- AL Pike Road and Ramer—denied petitions to add 97.5A [94.3B1 for A, KNCO-FM CA Farmington (move from Grass Valley)/ CA Jackson 99.7A for 94.3A, KNGT
- GA Donaldsonville 107.5A, Nov. 3-Dec. 4
- LA Blanchard 102.1C3—denied application for review filed by Arkansas Wireless Co.
- MA Mashpee (move from Falmouth) 101.1A, WFAL
- MI Frankenthum 93.7A, Oct. 23-Nov. 24
- MO Fayette (move from Boonville) 93.9C3 for A, KTLH
- MO Miner 107.1A, Oct. 27-Nov. 27
- MO Scott City 93.9A, Oct. 27-Nov. 27
- OR Depoe Bay 105.5A, Oct. 23-Nov. 24. Dismissed petition to add the channel to Waldport. [bid to add 100.9A
- OR Eugene—denied Conway Broadcasting's/ TN Bulls Gap 100.7A, Nov. 6-Dec. 7
- WA Dayton 102.3A, Oct. 16-Nov. 16
- WI Wyeville—dismissed Josephine Miracle's 101.3A bid

**FCC Waives Limits on Payments to Applicants In Settlement Cases**

Catching the broadcast community by surprise was the FCC which announced it will waive its rules for a 90 day period that limit the amount applicants can pay each other to withdraw their applications and arrive at a settlement. This action is designed to facilitate the amicable resolution of various proceedings that would have been headed to hearing. In the past, an applicant could only be compensated for actual expenses.

The FCC cannot collect hearing fees or even conduct hearings until new rules are in place because of the court's decision

known as *Bechtel v. FCC*, 10 F.3d 875 (D.C. Cir. 1993).

Also cited was another case, "Adrand Constructors, Inc. v. Pena," where the court said race, such as the minority ownership credit the FCC had been using in comparative cases, should be subject to strict scrutiny and would be upheld only if serving a compelling government interest.

The rules that limited payments to settle mutually exclusive broadcasting proposals were in place to discourage applicants from extorting money from other applicants, rather than filing with the intention of building stations. However, "The Commission underscores its continuing strong support for the rules limiting payments in application settlement case," said an anonymous FCC release.

Dissenting was Commissioner Andrew C. Barrett, who said, "I am convinced that the Commission's well-intentioned 'quick fix' approach to reduce the backlog of comparative hearing matters will result in some very unsettling circumstances," and that the best way to settle the problem is to address the court's concerns through a rulemaking, "rather than for the Commission to resort to a bandage approach. . . I fear that our action today will simply serve the interests of a few individuals."

One of the individuals who may be served by this action is me. The FCC announcement came out Sept. 15, much to the surprise of much of the rest of the Commission and to Washington attorneys. On Sept. 6, Larry D. Eads, chief, audio services division, Mass Media Bureau, denied the settlement and consulting agreements filed with the Commission by Harbor Broadcasting Co. and myself for Hermantown MN 92.1A. Eads claimed I failed to provide any real documentation for "legal and prudent expenses" in prosecuting my application, for which I claimed almost \$3,000. The consulting agreement, which would have paid "Elving \$54,750 over a three-year period for advice relating to programming and station operations" . . . violates the limitation on settlement payments set forth in Sec. 73.3525 of the Commission's Rules." Eads, however, retired Sept. 30 after 27 years at the FCC. A new agreement was expected to be ready shortly after that date. Tim Welch, of the Washington law firm of Hill & Welch, Harbor Broadcasting's attorney, had been in contact with the FCC after the Sept. 6 letter in an attempt to resolve the concerns raised. "Indeed, I have confirmed with the FCC's staff that we merely need to reaffirm the Settlement Agreement and to resubmit it to the FCC. I was advised by the staff that prompt action would be taken," he writes. Sloppy reading of the agreements by an understudy of Eads was blamed for their rejection.

### FCC Settles With Infinity to Tune of \$1,715,000 Over Stern Indecency Utterances

The FCC and Infinity Broadcasting Corp., Howard Stern's boss, announced approval of a \$1,715,000 settlement agreement. The agreement resolves several pending indecency cases against Infinity (WXRK 92.3 New York and other stations). Infinity has agreed to make a voluntary contribution of \$1,715,000 to the U.S. Treasury, which is larger, with interest, than the \$1,706,000 claimed by the FCC. Neither side admits liability or guilt. Actions against Infinity were from the years 1989 through 1994. Dozens of pages of transcripts from Stern's daily show documented the "graphic" and "patently offensive" material used by the FCC in its actions against Infinity.

As part of the agreement, Infinity will issue a policy statement to all on-air personnel directing them to be cognizant of the prohibition against using indecent speech. Did Stern learn? Has *QueHo* mellowed? Stations outside NYC are using tape-delay to sleep out Stern's rougher utterances, while on WXRK he's said to be as foul-mouthed as ever. Stern did say the payment of the fines ended "seven years of government-sanctioned extortion and harrassment," mentioning that the FCC has tried to stop Infinity from buying stations because of actions pending against the company; and the FCC took seriously the complaints of every "wacko fringe group that came along" [see FMedia! June '94, p. 6, cols. 2-3]. Stern thanked Infinity for standing by him, saying any other company would have fired him. "He still says he's sick of radio and will quit when his contract is up, but I don't believe him," writes a reporter and frequent Stern listener.

And *QueHo*—he's mellowed. James H. Quello is the FCC commissioner who has been most against Stern and Infinity as licensee. Quello said, "On a personal level as a long-time champion of indecency rules to guide responsible broadcasters, I am pleased that the settlement is premised upon the validity of the FCC's rules against the dissemination of indecent materials by our licensees. I predicted long ago that the FCC's indecency standards and procedures would eventually be upheld, as they were recently, by the U.S. Court of Appeals for the District of Columbia. I am further encouraged that the ownership of Infinity itself has taken positive and concrete steps to more carefully train, supervise and monitor its on-air personnel."

Now Infinity has agreed to pay \$275 million for seven stations owned by Alliance Broadcasting, Inc. Infinity will enter San Francisco with KFRC-FM 99.7-AM and KYCY 93.3. The deal would give Infinity four Dallas FM stations, which depends on expected changes in the

FCC's duopoly rules. KYNG 105.3 and KSNN 94.9 would be added to Infinity's KVIL 103.7-AM and KLUV 98.7. It would get a duopoly in Detroit with WOMC 104.3 and WYCD 99.5. Seattle would be entered, through purchase of unprofitable KYCW 96.5. The merger would create a combined company of 34 stations with estimated revenue of \$375 million a year.

### Small-Print Happenings and FM Industry News

Allison Steele, 58, dies of cancer. I remember her as being on the original crew of WNEW-FM 102.7 New York when it started programming separately from AM. She was the best known of WNEW-FM's female announcers from around 1967. Most recently, she was a host on WXRK 92.3.

A less well known announcer, Willie Clark, has been disciplined by WJAN 95.1 Sunderland VT for remarks he made about Bennington businesses. Clark supposedly made "generic negative" comments about retail business in Bennington VT, as well as an "outright slam" at that town. Robert Green, chairman of the Bennington Area Chamber of Commerce, heard Clark while driving to work. "He was saying that it was good to have Wal-Mart here because it would improve other businesses, implying they were not up to snuff." The station later aired an apology from Clark, and promised the station would be more involved in the Bennington community. Clark was expected to be back on the air shortly.

Near VT is picturesque Mount Greylock, the highest point in MA. Perched atop that mountain is a tower that's home to WAMC \*90.3 Albany NY, UHF station WCDC ch. 19 Adams MA (owned by WTEN-10 Albany, whose signal is "minimal" to the east), and a Channel 51 translator for WNYT-13 Albany NY. Enter the commonwealth of Massachusetts, which wants to eliminate or lower the 76-meter tower, alleging that the "present tower mars the scenic beauty of Mount Greylock." If the tower goes, "most of Berkshire County (and adjoining counties in MA, CT and VT) would lose their only local over-the-air TV and NPR stations. Many towns in this hilly area have no cable TV," writes contributor Alex Nardacci. The tower was built in 1953 for UHF television, with WAMC on it since its founding in 1958. Alan Chartock of WAMC wrote to the "Berkshire Eagle": "WAMC remains indebted to the tower owners, WTEN/WCDE, for over three decades of rent-free cooperation that has made our signal available to listeners across the region. . . WTEN/WCDE has worked with the commonwealth of Massachusetts to be a good tenant and taxpayer, a fact recognized by continued renewal of the site lease until now. . . The debate over a broadcasting site that has benignly served hundreds of thousands of people well over 40 years with television, radio and public service communications pales when compared to true environmental threats to the public. Let's move on to more important things." Chartock addressed the environmental issue, saying, "When you drive through Adams, which do you think is a worse eyesore—the sort of interesting 'Eiffel Tower structure' on top of the mountain, which most people don't see, or the awful eyesores in the form of landfills and some rather grubby landscape and fast food chains?"

Creole Enterprises [June, p. 8, col. 2] has lost its battle to get N.Y.C. to sell WNYC-FM \*93.9-AM on the open market instead of to the WNYC Foundation. A judge ruled that the city can sell the stations to anyone it wants to.

The NAB has asked the FCC to waive all 1995 regulatory fees for stations licensed to the Virgin Islands, following the destruction of Hurricanes Luis and Marilyn. It also asked that license renewal applications be delayed two months, until Dec. 1, 1995. Most of the stations there sustained damage, with WIV1 96.1 and WGD0-

FM 97.9 Charlotte Amalie on with reduced power; the former on with a generator and antenna on a makeshift pole. WYIC 104.3 and WVGN 105.3 are off the air. At least five stations lost their towers.

Death-row inmate and former public radio journalist Mumia Abu-Jamal, who was found guilty of the 1981 murder of a Philadelphia police officer, was denied a new trial. He claimed he was framed and that his defense was inadequate. [See June, 1994, p. 7, cols. 2-3; May, 1995, p. 8, col. 1.]

The NAB is trying to urge FCC Chairman Reed Hundt towards making a decision on an EEO (equal employment opportunity) inquiry that has been before the Commission for 16 months. Current rules exempt broadcasters from EEO reporting requirements who have five or fewer employees. The NAB wants the limit raised to 20 employees.

Trying to remove all EEO-type criteria is the law firm of Haley, Bader & Potts. Based on June's Supreme Court decision on government affirmative action policies, attorney John Crigler said it's time to find out whether or not the FCC's EEO policies meet the new tests. Law firm's petition suggests the Supreme Court opinion overrules *Metro Broadcasting v. FCC*—the case that upheld a comparative preference for minority applicants. The FCC dismissed a petition to reconsider the license renewal of WLQR 101.5-AM Toledo filed by the Ohio branch of the NAACP. The FCC concluded initially that the NAACP had failed to prove it is a "party in interest," and on reconsideration, the FCC said the NAACP had failed to prove it has standing as a party to the case, and scolded the NAACP for not taking part in the earlier stages of the proceeding.

FCC denies Hispanic objections to the renewals of KFMB-FM 100.7 and KIFM 98.1 San Diego, as well as public KCRW \*89.9 Santa Monica. FCC granted the renewal s, with conditions. The NHMC is also trying to get Greater Media to dump Howard Stern from KSLX 97.1, "Radio Hindenburg," because of his remarks about slain Tejano singer Selena.

A ratings coup in Minneapolis—again. KQRS-FM 92.5-AM nudges WCCO AM from top spot, after a hiatus in which WCCO was tops. The KQRS stations show an 11.8 Arbitron 12+ compared to WCCO's 11.4.

Reed Hundt, chairman, FCC, announced a plan to cut about 10 percent of the agency's workforce. Under the plan, supported by another Democrat FCC Commissioner, James Quello, the workforce would be reduced to 2050 positions next year, down from an authorized 2271. The FCC will do this by buying out or firing about 180 current employees and by not hiring people to fill about 40 slots now open.

WQBK-FM 103.9-WQBJ 103.5 in the Albany area hotly deny they're for sale. There have been published reports of an imminent sale to a buyer like Dame Media, which owns WRVE 99.5-WGY 810 AM. Joe Weiss, owner of Maximum Media, Inc. of PA, was in town to help dispell those rumors. The only way he'll sell is if an owner is willing to pay more than the stations are worth. "I've had plenty of brokers ask me if I was interested in a station that they weren't signed on with," Weiss said. "Brokers try to put deals together." Weiss said he has unsuccessfully negotiated to buy two other local stations in the past year.

Early in August the House passed by 305 to 117 major telecommunications reform legislation that completely deregulates radio ownership and audio media concentration. The legislation goes to a conference committee where it will be reconciled with a Senate-passed version. Whether President Clinton vetoes it is not known, but it is possible even if he does, the veto would be overridden. Politically, he may not want to risk the embarrassment of such a veto override.

The radio industry, always clambering for more concentration of control, duopolies and perhaps monopolies in the markets they serve, is increasingly profitable. RAB figures show radio

revenue up six percent, compared to a year ago. Local revenues gained seven percent while national spot rose one percent.

Receiving fines were KRSB 103.1 Roseburg OR and KKMx 104.3 Tri City OR, each \$10,000 for participating in an unauthorized transfer of control. WUMX 103.1 Tallahassee FL fined \$18000 for violating the FCC's EEO rules. W WAXQ 104.3 New York city fined \$30,000 for EEO violations, but the FCC renewed its license. WQPW 95.7 Valdosta GA was fined \$15,000 for repeated violations of the Commission's EEO rule. WQPW argued that a fine was inappropriate because the FCC failed to show any evidence of discrimination, but the FCC rejected those arguments. The FCC stated that the forfeiture was based on the station's repeated failure to comply with the Commission's rules, and it disagreed that the station is unable to pay the fine, after examining the station's financial documents. WAVF 96.1 Hanahan-Charleston SC received a short term license renewal, despite protests from the NAACP. Station, however, was assessed a \$13,000 fine and the need to notify the FCC via "reporting conditions." The FCC doesn't reveal exactly why the station was fined and subject to a short term renewal, except to say that "the Commission ruled that this case does not warrant designation for hearing because there is no evidence in the record of discrimination, a sudden departure of minority employees, or any misrepresentation to the Commission regarding the station's employment practices." Also fined was WCXU 97.7 Caribou ME, \$1,000 "for willful and repeated violation of the rules regarding unauthorized transfer of control."

Hit almost to the maximum—to the tune of \$50,000—was KFUFM 99.1-AM Clayton MO for EEO reporting conditions. The FCC did, however, grant renewal of their licenses. For more information about the KFUFM stations, see the "FM Atlas," 16th edition, p. 5.

Students win control over KCSU \*89.7 Fort Collins CO. Gone, or going, is g.m. William Hurt, a public radio veteran who has been with the station since 1990, and five other employees. The 30-year-old station has been CPB-qualified since 1977, joining a group of student stations that were formerly "public," after students agreed, ironically, to pull their KCSU funding. Colorado State University students gave it \$170,000 annually, or about \$8 per student. That arrangement meant almost yearly battles for control of the station. In 1992 it agreed to drop classical programming to become an adult/acoustic/alternative station (last month, p. 3, col. 2). KCSU still operates with 10,000 watts at a height below average terrain, not yet implementing its construction permit to increase to 40000 v; 4000 h at 166 m. In fact, the "FM Street Radio Directory" shows it as still being on \*90.5 with the minus altitude.

I talked with a SC public radio user who says WSCI \*89.3 Charleston is reduced to being a relay of the Columbia station, WLTR \*91.3; and the state budget committee is considering taking the Sumter station [WRJA-FM \*88.1] completely off the air. These actions taken in response to a state funding drop of \$400,000 or about two percent of the FM-TV budget. In Charleston, all five WSCI employees were laid off, and eight of 12 staffers in Columbia were let go. At 1:30 p.m. employees at Charleston received a delegation from Columbia. They said "We're here to close the station." At "2 it was closed down."

The NAB advises that stations have to provide "reasonable access" only to federal candidates, with stations legally able to refuse ads from state and local candidates. If you sell to such candidates, that time can only be at your lowest unit charge during the preceding 45 or 60 days prior to primary and general elections.

The "Globe and Mail" had quite a report on radio's move toward a digital world in Canada, Aug. 26 issue. It says the CRTC plans a two-pronged approach to introduce digital radio, initially granting "experimental" digital licenses to existing FM and AM stations, using the Eureka

147 system in the 1452-1492 mhz L-band. Current plans call for all Canadian stations to simulcast in DAB their original signals, whether FM or AM, for a good 10 to 15 years. The CBC, with its public mandate, is expected to hold on longer than anyone else to simulcasting, "until everybody's great aunt has a digital radio."

Gary Slight, CFRB AM/CFRX 6070 shortwave, thinks the digital hype is overblown. It won't be a major presence for years. And digital radio is really just a distribution change, not a programming change. "Digital will happen," he said. "But it's being promoted as the saviour of radio, although it won't bring more advertisers to it and it will cost us all a lot of money." However, it is looked upon as radio's getting on the information highway, and up to speed. "If radio doesn't respond, it will be left behind," said Bill Coombes, president of Fraser Valley Radio in Chilliwack BC. The paper even admitted it was a bit premature when it wrote in 1990, "It will be at least 1995 before the general public has access to digital radio in regular programming. At least 'were the key words there, since 1995 is more than half over and the general public's access to digital radio can be summed up as nil. Plenty of other things have gone digital, but not radio broadcasts."

Station totals from the FCC as of Aug. 31—FM (92-108 mhz) 5260; FM (88-92) 1799; AM 4906, for a radio total of 11965.

From the classifieds: I picked up two Realistic Pro-2006 scanners on my trip. The model is long discontinued in the U.S., but was available for a while in Canada. This model was discontinued here because it's too easily modified for cellular reception. That model also tunes in FM, 88-108, and is modifiable for SCS. I also picked up, at an antique shop, a rare Zenith R7000 Transoceanic portable radio with transistors, FM, VHF weather and shortwave. Pro-2006 fully modified \$465 plus \$7 shipping. Zenith (whose AM is slightly impaired and must be played through the "manual RF gain knob") \$295 plus \$12. Call 1-800-605-2219 for more information or to order.

Wants to buy—Moseley PBR-30 67 kHz demand card; 67 kHz filter board. B Cai thamer, WMBI-FM, 820 LaSalle Dr., Chicago IL 60610. I've noticed lately that WMBI-FM's SCS has been inactive.

Radio 75th anniversary celebration—hall of fame gala, Hyatt Regency, Chicago, Sunday, Oct. 29, 1995. Celebrate with the stars, including Paul Harvey, Tom Snyder, Don Pardo, Gary Owens, Rush Limbaugh, Susan Starnberg, Larry King, Tom Joyner, Casey Kasem. Sponsored by the Museum of Broadcast Communications; (800) 860-9559 for price and other information. Take your SCS-equipped radio along and see if WMBI-FM's 67 might be active by then!

Tape from the N.O. Radio Show—AM/FM station improvements under FCC rules: A manager's guide to competitive success. Barry Umansky, Charles Kelley, Ashtoa Hardy, James Kirkland, M. Anne Swanson, Howard Wels, \$11; other tapes available, % AVW/Sound Images, 7388 S. Revere Pkwy., No. 806, Englewood CO 80112; (303) 649-1811.

Station manager for KWBI \*91.1 Denver and for its group of translators, one of which is being opposed in Colorado Springs (last month, p. 5, col. 3). Must be capable of leading ministry team. KWBI, 16075 W. Belleview Ave., Morrison CO 80915.

FM FORUM

CONTRIBUTIONS FROM READERS  
Greg Hardison: "Love the new Atlas! And your continuing Stern/Selena coverage. Selena had told her murderer to keep the embezzled funds, just leave! Also, the Corpus Christi townsfolk are apparently upset that the CCPD didn't allow the gun-wielder to blow her own brains out." With WBSS 97.3 Millville NJ taken over by WKXW 101.5 Trenton, there's speculation WBSS will convert to talk, similar to WKXW. However, I show WKXW as having vestiges of stereo, including oldies.

Dean Johnson in the Boston Herald on radio duopolies: "The one certainty [is that] once deregulation is law, that's it. You can never go back." Until November,

 MA Boston WUMB \*91.9 f]

MA Falmouth WFPB \*91.9, parallel to WUMB with "acoustic music by day, jazz by night." The first public station easily heard on the Vineyard.

MI Bridgman WCSE 97.5 k, "Y 97.5 Continuous Country." Sister station WCSY-FM 98.3 South Haven remains rm, "Cosy 98." Both being purchased by WIRX 107.1-AM St. Joseph. The WCSE studio on Red Arrow Highway in Stevensville to be closed—consolidated with the WIRX studio in Fairplain MI.

MI Gaylord WMJZ 95.3 r, hot AC  
 MI Holland WAKX 96.1 still r, hot AC, adding Bob and Tom from WFBQ 94.7 Indy to its morning lineup. "Kinda raw for an AC?"

MI Portage WFAT 96.5 still o, but now classic hits [adult alternative]

MO Pleasant Hope KZBE 95.5 p,  
 MT Red Lodge KMXE 99.3 r, "The Mountain"  
 NE Blair KISP 101.5 sr, not yet having moved to that frequency from 106.3, even though nearby KAYL-FM Storm Lake IA has moved to 101.7. KISP is supposed to have Tom Joyner and SMN's "Urban AC" format off satellite.

NH Berlin WZPK 103.7 still r, rumored to be going country. "They have a huge signal and try to be a Portland ME station, but focuses advertising in the north NH area where their studios are located."

NJ Bridgeton WSNJ-FM 107.7 still m, "except for Sundays when they're all day. They have at least three church services from different Baptist churches in southern NJ, and a few syndicated religious programs (not all Baptist)." Also has weekday call-in talk shows mornings and afternoons, "including Country Store, a swap-shop program. They're simulcast with the AM."

OH Dayton WDPS \*89.5 jr, with the rock either "alternative" or "loud rock." Also talk

features; on air 9:15 a.m. to 4:30 p.m. Monday through Friday, sharing time with WDPR \*89.5. Co-owned WDPG \*89.9 Greenville OH carries classical music during the time WDPR is off the air.

PA Lewisburg WUNS 96.3-AM rp, parallel to WZXR 99.3 South Williamsport  
 PA Mercersburg WSRT 92.1 o, classic hits  
 SC Seneca WPEK 98.1 r, not exactly "classic hits," still "The Peak." The station sounds "very clean, with an especially natural-sounding high end."

TN Jellico WEKX 102.7 rm  
 TN Smyrna WRLG 94.1 still p, but carrying Nashville Knights ECHL minor-league ice hockey. "WYYB93.7 Dickson, which normally relays WRLG, continues to air music during the hockey games. Both stations' music format is modern rock, 'p'. Surprisingly, this does not qualify as an 'AM Happening Caused by FM'—the games had previously been on news/talk WWTN [monophonic] 99.7. By the way, WWTN's audio quality has improved immensely since they were bought by WSM 650/95.5 and moved into the WSM studios." [S listing], "Radio Christiana"

TX Alamo KJAV 104.9 Spanish g, mono (remove/  
 UT Brian Head KREC 98.1 rm, "Classy 98"  
 VT Danville WSHX 95.7 p, to simulcast WNCS 104.7 Montpelier

IA's KAYL-FM Finally Moves to 101.7

VT Lyndonville WWLR \*91.7 pr, "92 Rock FM" (from "All Hit 92") [ard Stern  
 VA Chesapeake WKOC 93.7 pt, adding How-/  
 VA Lynchburg WLNI 105.9 t, "apparently all sports," now "105.9 The Line" in pseudo-stereo [Howard Stern  
 VA Richmond WVGO 106.5 rt, adding/  
 WA Dishman KWQL 106.5 m, adult standards, in an LMA-to-buy with KSPQ 96.9 Spokane  
 WV Buckhannon WBTQ 93.5 g  
 WV Weston WSSN 102.3 o, ID with Clarksburg-Buckhannon  
 ON Parry Sound CBLR \*89.9 t, a relay of XMJ-316 162.475 mz weather from Collingwood ON  
 VC Tihuati an XHTU 92.3 rl

On Air—Real Stations and Pirate(s)

CT Brookfield WRKI 95.1 now 29500 h,v; 194 m, acquiring WMJV 105.5 Patterson and simulcast WMJU 106.3 Mount Kisco NY. "Watch for format modifications on both stations. . . 'New York's SuperStation' has been replaced by 'B 105 and B 106,' and seemingly candidates for new call letters. "When WMJU was WVIP-FM it billed \$1.1 million before being sold to WMJV. In 1994, WMJU billed \$0! 'SuperStation' never lived up to its expectations." [from 101.7  
 IA Perry KDLS-FM 105.5, having moved/  
 IA Storm Lake KAYL-FM 101.7, having moved from 101.5 Sept. 1.

"I haven't been to Sioux City, so I don't know the status of the KGBI translator on 101.7 since we moved."

MN—all listed translators for KJLY \*104.5 Blue Earth are on, including the new 97.9 in St. Peter, which can be heard 16 km away. KMSU \*89.7 Mankato, which survived being swallowed by MN Public Radio, again has some NPR shows.

NH Concord WEVO \*89.1 with c, but expected to dump that in favor of monophonic news/talk. A second station would be applied for which would offer classical music. This is seen as a way of keeping contributors happy—offering news without dumping music.

NJ Fort Lee W276AQ 103.1 "gets its air signal via a circuitous route. The signal originates from studios in Tenafly NJ. The signal goes via phone line to WXTM 99.7 in Monticello NY. W232AL 94.3 in Pomona NY picks up WXTM's signal off the air. The Fort Lee NJ translator in turn receives W232AL's signal off air. WVNJ AM (1160) is screaming bloody murder as they try to survive with their mixture of '50s-'60s oldies and local news, traffic and sports."

NY Rochester 90.9—"industrial/heavy metal music. . . No announcements. . . A sharp signal peak near Kodak Park, a flea-powered pirate of some kind. Noted several times."

VA—all translators along I-81 from Winchester to Bristol, except for W220BD \*91.9 Roanoke and W247AD 97.3 Vinton.

WY Buffalo KLGT 92.9, having moved from 92.7. Applies for a 360 watt in-town booster.

ON Barrie—a T1 station on 94.7, near the Hwy. 400 exit, for Huronia Tourism, includes an official-looking sign on the road announcing the station. May or may not be a legal station.

**Selected AM Happenings**

MA Framingham WKOX 1200 drops music, becomes all news, talk. Sister FM, WKLB-FM 105.7, sold separately to Evergreen Media for \$34 million cash. Evergreen is relying on passage of new legislation to allow an FM triopoly, with it already owning WXKS-FM 107.9-AM Medford-Everett MA and WJMN 94.5 Boston.  
 NJ Washington Township (Philadelphia PA) WNJC 1360 sold to area broadcaster Mike Venditti and his wife—he was somewhat famous for reviving the aged 250 kw transmitter at XERF 1570 Ciudad Acuna for a few years in the '80s. WNJC now brokered Spanish and oldies.  
 NY Albany WPTR 1540—"one of the original rock stations in the United States and which is now a talk station," purchased for \$700,000 by Crawford Broadcasting Co., and will convert to Christian. Crawford's best known station is WDCX 99.5 Buffalo. Many of WPTR's former talk shows will find slots on co-owned WROW 590 AM. Crawford has been growing, acquiring 12 of its 18 stations in the last four years, typically paying \$200,000 to \$300,000. WPTR's calls were to become WDCD after a two week hiatus.  
 PA Philadelphia WPGR 1540 once an oldies powerhouse, now brokered, which "seems to be the easy way out for AM (and FM) properties finding it difficult to sell advertising. The owner sells blocks of air time, leaving it to the program suppliers to attract advertising. . . but the resultant programming often leaves much to be desired."

**FM Rulemakings Proposed**

 USA—various locations. The FCC amended the FM Table without saying where.

**Stern Bumped from WCKG; Moves to Infinity's WJJD AM Chicago**

Howard Stern, who recently was on WCKG 105.9 Elmwood Park-Chicago, has been dumped by that station. "They wanted him to tone down the show and not talk about competing stations and deejays, but he decided to take his show off rather than change it." He is now on Infinity's WJJD 1160 AM. "This is his third station and second time on AM in Chicago in two years!" I would think WCKG—or any other non-Infinity-owned

station—would have avoided him in the first place, since he threatened a lawsuit against WLUP when that station took his program off. Reader Mike DiSandro, however, said, "Good news! Howard Stern is back in the Chicago market! Glad to hear him!" While on WCKG, Stern promptly began "waging war against Evergreen Media, its personalities and management. His first target while on WCKG was Larry Wert, the guy who fired him at WLUP (AM), now WMVP. Next, Howard went after Mancow Muller, WRCX 103.5 morning man. This guy has completely ripped off Howard's act, and thinks he's hot. . . Howard has really done his homework on those guys, and I have it on tape [and] clarified all of the situations involving a Larry Wert attempt at steering the Chicago advertising community from advertising on WCKG. Yes, a boycott. This is funny to me. Here's a guy who fires Howard, thinks that he has wrecked Howard for good in Chicago, Howard comes back on a rival station and tries to throw in a big monkey wrench," although the war has, for now, fizzled.

After three years on KEGL 97.1 Fort Worth, Howard is No. 1 in the Dallas morning ratings. Also, he's said to be No. 1 on KLSX 97.1 Los Angeles and WXRK 92.3 New York, and the ratings while he was on WCKG were up.

#### Small-Print Happenings and FM Industry News

Another person writes about IL radio: "Dan Sommers, part of the Odd Squad morning team on WQRL 106.3 Benton IL, and station janitor, used his key and walked into the station around 11:30 one night recently, took the microphone and delivered an hour-long monologue." Sommers, 23, and some friends had been drinking beer, "and Dan decided to show off to his pals by taking them to the station. Dan switched off the satellite and began playing his own alternative rock CDs, while saying things like 'I know I'm gonna get fired for this,' swearing and getting more drunk. The station owner fired not only Sommers but also Odd Squad organizer Jeff Batz, who had hired Sommers. Batz said he's more upset about the end of the Odd Squad than the firings. Those who knew Sommers from his parttime job at a catering service said he was always polite and friendly to everyone. Batz, a stand-up comic, used to do the morning show alone, and soon his friend Sommers was interning at the station. After nine months management agreed to let him join the show at \$150 a week if he would also act as the station's janitor. Dan claimed he was disgruntled because it was a real let-down to have to take out the garbage and clean the bathroom after getting off the air, while not making as much money as Jeff. Dan said he wouldn't have done what he did if he knew Jeff would get fired. No word on what action, if any, the FCC will take.

Here's something from a newspaper article FAXed to Robin Quivers of the Howard Stern show: In early 1994, Robert Wright, known as Bob Kelly on the air, was a parttime DJ at KSON-FM 97.3-AM San Diego CA. A 15-year-old girl called the request line to have a song played, and after they spoke a while the 46-year-old Wright suggested they meet. What followed was a year-long relationship during which he took her out to dinner, gave her money and supplied her with crystal meth. While she was under the influence of the drug he persuaded her to pose for pornographic pictures and videos. All this ended when her mother found the pictures. Wright was sentenced to a minimum of one year in jail. He commented that this incident ruined his life as a parttime DJ and car salesman.

While attention has turned in the San Francisco area to KFOG picking up KHOT 97.7 Los Altos-San Jose, there's another important sale that wasn't so noticed. KPIG "107 oink 5" Freedom CA was sold for \$1 million to Elettra Broadcasting of Larkspur CA. Program Director Laura Hopper says the format will stay the same, but she adds the owners are trying to get the signal into the Santa Clara valley. The owners apparently appreciate the heritage of KPIG, calling it "the future of radio." It was once KFAT. Doc Searl says that KPIG is one of the stations using the World Wide Web for home pages and a sampling of how the station sounds (although limited by phone quality audio) on the Internet. KPIG, he writes, is "easily the best commercial radio station on Earth."

Pirate broadcaster Stephen P. Dunifer (see "On," Sept. p. 4, col. 1) received a \$10,000 fine for operating an FM station without a license. Dunifer had argued that the FCC's rules ban low power broadcasting and, therefore, violate the First Amendment right to free speech, the Commerce Clause of the United States Constitution, and international treaties. The FCC, however, noted that Sections 301 and 303 of the Communications Act specifically authorize it to regulate intrastate as well as interstate broadcasting. The FCC said Dunifer could have been fined \$10,000 per day for each violation, but that he was only charged for one day's illegal broadcasting. But "in light of the intentional nature of the violation, as well as his patent disregard for the Rules," Dunifer was assessed the maximum fine. I wonder if the FCC will be any more successful in collecting its fine from Dunifer than it has in taming the court which sided with him in his ongoing battle with the Commission? And will Dunifer close down his station(s) and repent? Stay tuned.

A licensed station, KUAD 99.1 Windsor CO, was fined \$5000 for carrying commercials that did not inform listeners as to the sponsor's identity.

KRNV 101.7 Reno NV granted a waiver to be acquired by KRNV-TV, channel 4 there; it had been in a programming and sales LMA. Owner Sierra Radio Company pointed out that common ownership of the FM and TV station would result in significant cost savings, and the potential for enhanced programming and service benefit. "It also has been established that KRNV (FM) had been experiencing serious financial difficulties. Furthermore, the proposed FM-TV combination will not create any undue concentration of ownership or control of broadcast media in the Reno market," the FCC concluded. Similarly, the FCC granted WQEN 103.7-AM Gadsden AL, transfer to the owner of WJSU (TV 40) Anniston AL; this over the objection of WNAL (TV 44) Gadsden. The FCC found that WNAL's argument that the market is served by few broadcast stations is incorrect. "Furthermore, although the radio stations at issue here do not appear to be likely to go off the air and are not in financial distress under their present ownership, such a showing is not a precondition to grant of a waiver under the case-by-case analysis," the Commission said. American Radio Systems buys an Austin duopoly by paying \$28.5 to Amarturo Group for KKMJ 95.5-KPTY 94.7 and an AM. An LMA began Sept. 1.

The FCC issued a revised script to use for shortened EBS broadcast tests. The new tests can be done in 30 seconds, consisting of these steps: 1) discontinue normal programming; 2) announce "The following is a test of the Emergency Broadcast System"; 3) transmit the attention signal for eight seconds as specified in Sec. 11.32 of the new EAS rules; 4) broadcast this announcement:

"This station is testing its Emergency Broadcast System equipment. The EBS will soon be replaced by the Emergency Alert System. The EAS will provide timely emergency warning. This station serves the [insert EBS/EAS Local Area name] area. This concludes this Emergency Broadcast System test."

#### 5) Resume regular programming.

Ron Della Chiesa gets around in New England FM. While his weekday afternoon program, "MusicAmerica" is being scrapped at WGBH \*89.7, he'll be doing a morning classical show. He's the same guy who did classics at WBCN 104.1 before its rock 'n' roll days. Della Chiesa, 57, sees this as a "sort of a new challenge," but admits he has mixed feelings, not knowing if the new show will be as well received as was his afternoon jazz. About 100 WGBH member-supporters have said they will want to get their money back if "MusicAmerica" isn't restored. They've printed a bumper sticker, "Ron Della Chiesa's MusicAmerica; Bring it Back! Call the Hotline: 662-0853."

Paul Damberger, development director of KUMD 103.3 Duluth, gave me a sheet showing Arbitrons for area public radio. KUMD is highest in both the metro (10200 listeners) and the total service (21700) areas, which is surprising, since KUMD gave up its National Public Radio affiliation a while back. Second highest is classical WSCD \*92.9 at 8900 metro; 18400 total service area. Next came WSCN \*100.5 with monophonic news and talk, WHSA \*89.9 WI Public Radio with a and NPR, and last was KUWS \*91.3 which is mostly talk in pseudo stereo.

WPLN \*90.3 Nashville TN is working to be untethered to the public library, with a new nonprofit community board to take over. Once this happens—in about a year—look for WPLN to air more news and other non-classical programming.

Sad news from "Billboard"—Spencer Johnson, assistant promotion director at WBGG-FM 105.9 Fort Lauderdale, was electrocuted Aug. 4 when the mast from the station's remote van hit a power line. Another obituary is that of Bob Epstein, 56, the Sunday morning host of "Jazz Classics" on KLON \*88.1 Long Beach, of a heart attack. He's a 16-year veteran of KLON and taught radio and TV at Loyola Marymount University and survived by two children.

With Muzak leaving the SCS airwaves in droves, perhaps it's time they have competition. Enter Quango, a multimedia company formed by KCRW \*89.9 hosts Bruno Guez, Jason Bentley and Tom Schnabel. It is planned to offer an alternative to Muzak for restaurants, films and "maybe elevators." I suppose you can contact KCRW Santa Monica if interested, (310) 450-5183.

An electronics magazine, "EDN Products," outlined the differences between analog and digital receivers. The chips are already available, and will have relevance to DARServices, either terrestrial or satellite. This would be true digital signal processing, not just the buttons and digital readouts you find on analog receivers. Similarities with analog receivers include an antenna, RF amplifier and speaker. In between is an A/D converter plus a digital mixer to convert the ones and zeros and apply them to a digital mixer. Then it is on to a digital local oscillator, similar to the intermediate frequency amplifier in a superheterodyne radio, a control interface, and then to output devices, which may take a variety of forms, including the use of a low pass filter, a detector/processor and digital-analog converter preceding the speaker. Other configurations would allow for ancillary functions, such as data and Muzak.

The FCC must still approve the \$30,000 deal allowing Nassau Community College to take over WBAU and make WHPC Garden City full time on \*90.3 (see Oct., p. 4, col. 1). Adelphi College was considering selling to Hofstra University, which already owns WRHU \*88.7 Hempstead NY, but that "fell through." Although some former WBAU staffers say they haven't given up hope, the principals involved say the deal is done.

Alison Steele (correct spelling of her first name as shown Oct., p. 7) was known as the Nightbird on WNEW-FM-AM NY. In 1966, WNEW-FM 102.7 was briefly known as WSHE, and Alison was part of an all-female announcing staff. Less than a year later the station switched

to rock and fired the whole staff, except for Alison. Later she worked at WPIX 101.9 (now WQCD) and finally at WXRK 92.3 where she did the 2-6 a.m. shift until June of this year, writes a correspondent.

Pres. Clinton has left little doubt he does not like the telecommunications reform bill passed by Congress. He wants, for example, a change in provisions which allow the acquisition of an unlimited number of radio stations in every community and across the nation; and to throw out the bill's repeal of the newspaper/broadcasting and broadcasting/cable cross-ownership bans that currently exist.

Selena fans cheered the murder conviction of Yolanda Saldivar, 35, who then was sentenced to life in prison. Selena was the superstar of many a Tejano FM station, and a posthumous release of her first English album is said to be at or near the top of the Billboard charts. (Oct., p. 8, col. 3; Aug., p. 8, col. 1; April, p. 7, col. 1).

Vandals were responsible for bringing down the tower of KYMX 96.1 Sacramento, CA, causing \$300,000 in damage. It has since returned to the air at lower power.

Al Quarnstrom, owner of the CP for Moose Lake MN 107.1, is trying to get along with neighbors of a new tower he wants to build west of Barnum MN. A petition went before the Carlton County Planning Commission opposing the tower; however, Quarnstrom said he'd be willing to withdraw the item and look for another site if necessary. Present plans call for the antenna to be 55 meters above average terrain from a tower 199 feet above ground, just under the 200' limit where tower lighting would be required. The board is concerned the tower might later become higher for better coverage. "I'm hoping I don't have to go up any higher," said Quarnstrom. "However, until you turn it (the transmitter) on you just don't know."

The FCC waived its rules to permit fully unattended operation of broadcast stations. And what operators a station does have no longer need to have a restricted radiotelephone operator permit (commonly called "license"). However, stations must still be able to activate the older EBS or newer EAS alerting system in case of emergencies. "These changes are good news for all radio station owners and managers," commented the MN Broadcasters Association Newsletter.

That paper also reported that Wal-Mart is getting into local radio, particularly where station personnel educate the store's manager about how radio can move more merchandise. An unnamed MN station sold about \$2500 in advertising to the local Wal-Mart store in a nine-month period.

National Public Radio announced 40 positions are being eliminated, affecting 32-34 staffers, for a savings of \$1.5 million; six to eight of the positions are vacant. Not all those employees will be fired, because NPR has created 20 new positions, and is encouraging those laid off to apply for the new spots. NPR has had to reduce expenses in face of a \$2 million fiscal 1996 budget shortfall. Some of the job cutbacks also resulted from a company reengineering mandated by Pres. Delano Lewis. The changes are intended to make NPR more cost-efficient and help the company to bring in more dollars from the private sector. The restructuring includes centralizing administrative functions in News, a revamp of Member Services, and allocation of some staff resources to public relations efforts.

Public radio rivals in the Seattle area are cooperating in a new partnership. KPLU \*88.5 and KUOW \*94.9 aren't merging, just holding joint events to boost fundraising, such as joint appearances by NPR newsmen Tom Gjelten (Shelton?) and Linda Wertheimer. For October, they planned a joint book festival, Bibliomania.

Soon to move into new digs is KNPR \*89.5 Las Vegas, thanks to a 99-year lease for use of the West Charleston campus of Community College of Southern Nevada. In exchange, the station will give faculty and students access to KNPR

production facilities for instruction, and will broadcast college programming and announcements.

Breaking all previous records—WAMC \*90.3 Albany, getting \$300,000 in pledges in six days during July. I drove in the area and saw the tower for WAMC atop forested Mount Greylock in MA—the same tower MA authorities may want to take down. The WAMC antenna is perched quite low, so if the tower were shortened, chances are the FM station would be unaffected. Shortly after driving by the mountain, I had to stop the car to let a flock of about 20 wild turkeys—adults and young ones—rendezvous on the road.

The CBS-Group W merger puts two huge "gorillas" in one house in Boston radio—WBZ AM and WODS 103.3. It is predicted to be a hugely successful ratings and sales winner. Driving up dreary ME Hwy. 1 at night, I tried the AM and did not pay attention to WBZ; only WQEW 1560 NY. Carol even answered a trivia question on WQEW that elicited the answer "The Rifleman." I digress.

The NAB has both laboratory test results on Digital Audio Broadcasting, as well as actual experience from the recent Radio Show. Lab tests were done by the EIA DAR subcommittee and the National Radio Systems Committee (NRSC) on comparative audio quality, including subjective analyses. Then performance with impairments was considered. Impairments included how the quality of the received signal was affected by noise, co-channel interference and multipath fading. Compatibility testing involved the effect on the normal station for in-band/on channel (IBOC) DAB signals. Test results come with a hefty price tag, \$90, including shipping, from Maxine Stone at EIA (703) 907-7660. Ask for a copy of the DAR Laboratory Test Report.

At the Radio Show in September, in-band digital audio broadcasting was demonstrated, using a specially-equipped van, tuned to 96.5 mhz, with special programming of a variety of music; however, there was no analog equivalent, so riders could not make an "A-B" comparison, as I was able to do in Winnipeg last November. The transmitter site was at Canal Place, a tall downtown building in New Orleans. Listener response said to be positive, although a few reception dropouts were experienced. There was no interference to monophonic third-adjacent WEZB 97.1.

NAB's opposition to satellite-delivered radio mellowing? It looks that way, for the NAB has asked that the FCC, if it approves DARS (digital audio radio service via satellite), to adopt policies to minimize "this severe impact on local terrestrial radio." These policies should include: confining DARS to a subscription-only service, with diverse and narrowly-defined formats, opening DARS spectrum to new applicants; and denying the use of terrestrial "gap fillers." The NAB has received copies of over 300 broadcaster letters sent to the Commission opposing DARS. NAB urged the Commission to weigh the cost of lost local radio services if DARS is authorized, against any benefits gained by DARS. NAB called localism the "bedrock" of U.S. radio broadcasting, "the touchstone and goal of public policymaking for over 50 years." What the NAB doesn't say is that much of today's radio is satellite-delivered, and probably indistinguishable to the listener from much that will be on DARS, save for local commercials and station breaks.

The NAB's not mellowing when it comes to taxing public radio-TV from commercial broadcasters. It opposes a \$4 million trust fund from auctioning commercial broadcasters' advanced TV spectrum and a two percent tax on transfer of commercial broadcast licenses. President Eddie Fritts said at the Radio Show, "Historically, commercial and public broadcasters have enjoyed an excellent working relationship at the local level. Unfortunately, this proposal will do great damage to that relationship. I am pleased to note, however, that CPB is not a signatory to this plan. Other groups' desperate approach calls into question the entire public policy rationale for a

public broadcasting system. . . If public broadcasters want to build their future almost entirely at the expense of commercial broadcasters, then perhaps we should just let them compete with us in a totally open market without benefit of subsidies."

FCC Chairman Reed Hundt voiced his opposition, at the NAB Radio Show, to complete removal of national and local radio ownership limits at a breakfast meeting attended by more than 700 broadcasters. FCC Commissioner Susan Ness voiced support for development of satellite radio, "while ensuring broadcasters that possible adverse effects on terrestrial services will not be ignored." Ben Cohen and Jerry Greenfield of Ben & Jerry's Ice Cream brought their unique blend of capitalism and humor to the Radio luncheon. Carol and I enjoyed Ben & Jerry's ice cream for the first time at a store in Freeport ME recently. One old guy said, "it's not made with as much real cream like ice cream used to be." Ben & Jerry's is one of the few U.S. food franchises in Petrozovadsk, Russia, where daughter Kimberly, 16, spent seven weeks lately.

WKZS 99.9, "Kiss 100," ran an ad I think is a hoax. Entitled, "An Apology from Kiss FM," it said morning announcer Donna Steele has taken it upon herself to pull the "Mattie in the Morning" show off the air and locked herself in the control room, vowing to stay there until management agrees to pull the program forever. "Donna believes this show is offensive. Right now, she is the only person being heard on 99.9 KISS-FM. Is she right? You can call her direct with your opinion at 1-800-604-KISS; or listen. We do not condone this renegade behavior and are using every legal means to resume normal programming."

The FCC has reorganized its audio services division in the mass media bureau to better match its staff with the workload, reduce levels of review and streamline procedures. The Legal Processing Group and the Petitions and Appeals Group will handle all routine and non-routine AM, FM and FM translator assignment and transfer applications, renewals, and other non-technical matters. The Technical Processing Group is responsible for taking care of new station applications, modifications to existing stations, license applications and requests for technical special temporary authority. Eliminated are the AM, FM and Auxiliary Services Branches. Larry Eads organized this prior to his retirement. I tried calling the number for information on licensing of stations at (202) 418-2782 and, a day later, nobody's answered the voice mail. Information is supposedly available at Fax-On-Demand at (202) 418-2830, which usually yields only the "Daily Digest." Internet users can try ftp.fcc.gov, log in as anonymous and use your e-mail address as password. Publications are in the /pub directory and succeeding subdirectories and searching for key words. Or gopher.fcc.gov or use any gopher to get to "all the gophers in the world" then "U.S." then "D.C." then "FCC." World Wide Web: <http://www.fcc.gov>.

WLYU is a licensed FM station on 100.9 in Lyons GA. Unfortunately for the U.S. Marshall's office, they don't have the "FM Atlas" or "M Street Radio Directory," so they set up a sting operation in Warner Robins GA using what they thought were the fake call letters WLYU, "We Lock You Up." The Marshall's office sent out 800 letters on official-looking station letterhead to residents of middle Georgia who had outstanding warrants, promising a check of \$150 if they stopped by the station to fill out a survey. Of course, once the person stopped by, he or she was arrested. I suppose some folks stopped by the real WLYU to collect. Anyway, the GA Association of Broadcasters has written the Macon office of the U.S. Marshall alleging criminal violation of federal mail fraud statutes, deceptive trade practices and substantial harm to its member station, WLYU, and radio broadcasters in general. Sen. Sam Nunn of GA has promised to do an investigation.

The story in August (p. 7, col. 2) about WETA \*90.9 Washington DC starting a 24-hour

classical network has changed. The WETA plans fell through. The CPB awarded a development grant to WETA, but before the paperwork was finished, Minnesota Public Radio had submitted a similar bid. Rather than fight it out, WETA agreed to drop out, allowing MPR to continue with its development plans.

The Fall RADA Report showed 64 percent of persons 12+ heard network radio in the U.S. in a week. The demo group of men 25-54 is the highest, with a reach of 69 percent. The estimates covers radio listening for one year ending April 30, 1995 on 5,200 network-affiliated stations, FM and AM.

It looks like an even higher percentage listens—or is available—to public radio. The National Federation of Community Broadcasters announced that public radio reaches 91 percent of the population. This is an increase from 86 percent in the last six years. If you look closely at the figure, however, 91 percent is the population that can potentially tune in, not the actual audience size. More than 21 percent of the rural population cannot receive a public radio signal. The Commerce Department's Public Telecommunications Facilities Program has spent "millions on system expansion in that time, and CPB has also invested \$1.2 million to help 84 stations extend their signals in the last three years. CPB has also added 61 public radio stations to the grant roll since 1992," says the NFCB's "Community Radio News."

Berkeley's KPFA \*94.1, Pacifica's flagship station, is still coded in my listings as "ej," but it has streamlined its schedule to become more listener-friendly. In the process, it has discontinued Phil Elwood's show, which had been on 41 years; and Mama O'Shea, who held her slot 22 years. Some listeners are enraged, and have organized around the Internet to get others to withhold pledges. Stephen Dunifer, operator of an unlicensed station there, is one of the media activists trying to force KPFA back to its roots. The station has been plagued by low ratings, due to a hodge-podge of shows. Many shows aired monthly; one aired every 14 weeks. "Not only did the audience not keep up with that, the programmers couldn't," said station manager Marci Lockwood. Only about 30 of the station's 22,000 subscribers have cancelled so far. She sighted this analogy: Imagine discovering on Tuesday a fantastic restaurant that serves Hawaiian food, bringing friends to it for dinner on Saturday, only to discover it is now serving a Guatemalan menu and won't return to Hawaiian for another month. Lockwood says the changes are a way to get new voices on the air. Previously, the volunteer programmers "had a program slot and they had it forever—they felt as if they owned that time."

FM station totals from the FCC: 5274 (92-108 mhz), 1805 (88-92 mhz), with 2451 transmitters, boosters—all as of Sept. 30, 1995.

From the classifieds: Andrew HJ7-50A 4, 1275 cm line, 30 m, new, w/ accessories, \$1300, S. Hill, 503-857-1063.

Wants to buy FM station, dark or CP, joint venture, purchase or lease, J. Powley, 910-342-1843.

FM FORUM

CONTRIBUTIONS FROM READERS

A rural NM teacher, Don Voegelé, sent an article from the Albuquerque Business Times mentioning three FM-FM duopolies in that market. This makes Albuquerque the No. 8 market nationally with the highest level of radio revenue controlled by duopolies, and the No. 11 market with the highest levels of audience shares controlled by duopolies, according to Jim

Duncan's newsletter, "Duncan's Radio Comments." Newest duopoly is Kkob-FM 93.3 and KMGa 99.5 along with their AMs. Another duopoly is KRST 92.3-KOLT-FM 105.9, while KZRR 94.1 is teamed with KLSK 104.1. In 1986 there were only 18 FM-AM stations competing for \$15 million in ad revenue. Now 35 stations compete for only \$24 million.

Chuck Gysi, Burlington IA, is the new editor of Popular Communications magazine, based in Hicksville NY. He's taking over from Tom Kneitel, who started the magazine in his living room in 1982. Gysi has edited a scanning column in the magazine, and was a news editor for the Burlington newspaper. Gysi mentions an excellent segment on radio on the Internet's World Wide Web at <http://american-recordings.com/wwofmusic/radio.html>. It provides links to various radio pages on the web, such as those of WXYC \*99.3 Chapel Hill NC. I am working on getting an Internet connection, and appointed my daughter to consider the Compuserve brochures received here. Ad-Week April 17 had an article on the rise of radio in the Asian-American market. It mentions show the earliest were on FM subcarriers in various cities, notably New York, Chicago and Houston.

Both FM and TV take place from China's tallest tower, the 460-meter "Oriental Pearl," Shanghai. It is billed as the third tallest tower in the world, after Canada's CN Tower and Moscow's Ostankino Tower. Two balls on the tower serve as hubs, the upper for broadcast and microwave equipment and the lower for recreation. Between the balls are 25 hotel suites.

The October "Popular Communications," p. 53, mentions my radios as a source of SC Services for the blind. A reader may write the editor of the "Handi-Chat" column in that magazine, Ted Lisle, "and tell him how good the Superadio with the Elf-III adapters sounds on the SCS bands." She goes on: "I don't think Mel Karmazin should have wimped out and paid the FCC fines. There's nothing indecent or obscene about Howard's radio show. He says outrageous things, but that's what makes him funny. Why don't they go after that nauseating "Love Phones" program (10-12 p.m. WHTZ 100.3) instead? I can't even listen to that for more than five minutes. Last time I tried it, a 14-year-old caller was describing her sex life with her 15-year-old boyfriend in graphic detail. Ugh!"

On Aug. 1 Heidi Klosterman and Craig Smith were each fined \$1500 and given six month suspended sentences for

their part in the wire-cutting incident that interrupted Howard Stern's June 10, 1994 broadcast from Cleveland.

Earlier, WMMS 100.7 Cleveland engineer Bill Alford was fined \$1000 for cutting the wires that interrupted Stern's live broadcast, as well as spending 10 days in jail. However, the judge took the liberty of criticizing Stern when imposing sentence. The judge told Alford, "You created a very dangerous situation that day when a large crowd had gathered to listen to a crude and obscene rabble-rouser on the radio and his scantily-clad associates. . ." Howard played a tape of this on his program, and his father, Ben Stern, called him on the air and said angrily that the judge was just playing to the media, that the Stern-bashing remarks had no place in the courtroom and that it shouldn't make any difference whether the interrupted program was Howard Stern or a chamber-music concert.

NY Governor Pataki signed the 'Stern Law' into effect. When Howard ran for governor he promised to get highway repairs done at night to prevent traffic tie-ups and Pataki thought it was a good idea. The signing took place outdoors on the Grand Central Parkway in Queens, with Howard on hand, but "this caused traffic delays in both directions."

A former radio station manager, now a recruiter for the National Guard in Michigan, Paul E. Petosky, writes. "Just a few short lines to let you know that in my travels at radio and TV stations along the line, I have mentioned to them about your FM Atlas [and] picking up some coverage maps. How about using our logo some *Americans At Their Best*. time—giving the Guard a plug, when you put out your supplement issue to the FM Atlas?"

MICHIGAN

Clarke Ingram, p.d., WPXY 97.9 Rochester NY, sent an interesting tape of FM (and some AM) IDs from Australia, New Zealand, Tahiti, Edmonton, Calgary, Bermuda, Ireland, England, Wales, Scotland. Australia now seems to have the entire worldwide FM band (previously a TV channel occupied much of the band up to 95 mhz). A tourist radio station was at 87.6, with other IDs up to 107.1. Canberra tourist info was at 98.9. Most stations gave IDs and slogans, but city of license information was largely missing, except for regions served.

Louis J. Sicilia sent information on KTOZ Springfield MO ("AM Happenings," Sept., p. 7, cols. 2-3) saying, "It confirms my belief that the government which governs least governs best."

Unti December, as the backlog of unprinted news and FM Forum opinion begins to clear.

The webs needed coverage in the area, with the station retaining its commercial format with ads at other times of the day.

WI Menomonie WMEQ-FM 92.1 still r and "Arrow 92.1," but dropping the '70s emphasis

WI Platteville WPVL-FM 107.1 o

BC Abbotsford CFSR 104.9 rm, with some b, "Star FM." It has applied to the CRTC to reduce further the amount of instrumental music played. "The greater Vancouver area does not need another rm station. Although I

don't personally like b formatted stations, I am dismayed at the reduction in format choices in SW BC," writes broadcast consultant Mike Cherry.

BC Kelowna CKBL 99.9 r, still "The Bullet"

BC Victoria CFMS 98.5 rm, having been bought by Rogers Broadcasting and paired with CJVI 900 AM, from Capital Broadcasting (whose CKDA 1200 AM goes to CKKS "100.3 the Q"). "They have applied to the CRTC to eliminate all b instrumental music and go for an uptempo soft-rock sound."

**On Air-Real Stations and Pirates**

AL Trinity W234AD 94.7  
 CA—Pearl Jam, the rock group which took on Ticketmaster in order to give fans a better deal on prices, has another first—pirate radio.

When they do a tour they set up a transmitter at 88.1 or 89.1 and broadcast to a 32 km radius (probably with 1 kw ERP). Programming consists of a live concert broadcast, playing CDs and live interviews with the performers after the concerts. The live shows also promote other pirate stations, such as Steve Dunifer's Radio Free Berkeley (104.1).

"I prefer to call it free radio or rebel radio," said Dunifer. "The FCC uses 'pirate' in a pejorative sense. 'Pirate' implies stealing something that belongs to someone else. We feel the airwaves belong to the people of this country."

Dunifer said if the FCC decided to take on the band it would bring a huge amount of publicity to the plight of free stations. San Jose native David Meinert, 29, is one of the powers behind what the band calls "Monkey Wrench Radio," agreeing with Dunifer that "There are so many performers who will never be heard on commercial stations."

Some d-js at licensed stations object to the band's way of going direct to the people. An unnamed d-j called the band "Pearl Scam."

IN Knightstown WKPW \*90.7—all v: "I climbed the tower and installed the lightweight antenna. It gets out well in a car radio—50 miles or so."

ME Norway WOXO 92.7, after the top half of its 45 meter tower was knocked off in a storm. It was discovered off by the Sunday 5 a.m. sign on person Nov. 12 and remained off through Nov. 15. It is at probable half power for a few weeks. "I'm really grateful with how wonderful our advertisers and listeners have been," Pres. Richard Gleason said. Other Gleason stations are WTBM 100.7 Mexico ME and two AMs.

MA Provincetown WOMR \*92.1 with 6 kw, having moved from 91.9. Also on is WFPB

WOMR 91.9 fm

\*91.9 Falmouth MA. "I would have thought they'd have the courtesy to wait until we switched to 92.1 before turning on their Falmouth relay station." WBPR Worcester and primary WUMB Boston, all three on 91.9, carry the same programming. "And WUMB was pleading poverty a few months ago!"

MN Glencoe KARP 96.1, not yet on 96.3

NH Berlin WZPK 103.7 probably won't switch to country (Nov. p. 3, col. 1). "People at the station won't admit anything, but with WXLQ 107.1 Gorham NH and WBNC-FM 104.5 on with country, it doesn't make much sense."

NY city area—"WJQR" ("Nasty Radios") is much stronger now, covering Queens, Brooklyn, midtown Manhattan and part of NJ. On Thursday through Sunday 8 p.m. to midnight with \$[tereo] on 91.9. Format is mostly dance music, taking requests on air at (718) 437-5433. "A guy called and asked where the station is and how much power it has, but owner/DJ, 'Dr. X', wouldn't tell him. 'Dr. X' thinks his station wouldn't be of interest to

 MN Atwater KYRS 94.1 reported to be g, with an "improved signal"

the FCC because it's not on a commercial frequency."

OK Enid K202BY \*88.3. "Didn't notice at first because of repulsive programming, assumed still to be \*88.3 Wichita, same network; translator signal weakish, \$."

PA Allentown W224AU \*92.7 with 8 watts  
PA Philadelphia W297-- \*107.3, with WRDV, in \$[tereol], "and has a bit less coverage than the 107.9 WWFM translator... It appears that the combination of the signal WRDV \*89.3 lost when they went stereo, and upgrades at WPFW \*89.3 Washington DC eroded their coverage [and] felt they needed to [add a translator]."

SD Carpenter K261CH 100.1—installed a phase box like the one mentioned in my radios and electronics catalog for receiving primary KCGN-FM 101.5 Ortonville MN. "Praise the Lord, filters and a phase box have helped make this one of the best-sounding translators on the air. Now back at full power and a coverage of 48 km! K294-- 106.7 Marshall MN used a filter also to tune out interference caused by a mixing of the translator's 106.7 with local KBJJ 107.5. This mixing occurred at 105.9.

TN Columbia W264AD 100.7  
TN Fayetteville W239AA \*95.7  
TN Lewisburg W263AE 100.5  
TN Pulaski W294AD \*106.7

USA—Travelers Radio Network of low power stations, estimated power 1 watt each—at airports, with a 20-minute tape loop narrated by George Plimpton, suggesting places for tourists to stay—with paid ads. Hear them at 93.5 Arlington VA, 88.5 Boston, 101.5 Chicago, 94.5 Atlanta, 105.7 Newark (with a local there on 105.91). "Twenty more are planned. Info from 1-800-941-AVIS."

**Off Air—Or Not Yet On**

CA Merced KFIE 106.3

IA Ames KUSR \*91.5—because of confusion between license and construction permit. License calls for 91.9 with 17 watts, but it has been operating on \*91.5 with 200 watts—its construction permit facility. All it needs to do is send an application for license to the FCC, a perfunctory matter. "So far, the station is not in trouble for broadcasting beyond its license, though the matter is still not resolved."

ME Houlton WHOU 100.1, "because of financial difficulties." It will be replaced by WOZI 101.7 Presque Isle, which claims soon to be moving to 101.9 and upgrading. WHOU's silence may be long-term. "It would have cost us more to continue the lease arrangement (between WOZI and WHOU) and pay the fees than the income we were generating from that market," said Steve Chizmas, former g.m., WHOU.

MI Grand Rapids WBYW \*89.9, with work on the water tower their antenna is mounted on. Plans to return early this month with a new power: 4500 h.v., "which should really drown WTHS \*89.9 only 55 km away... I can't believe the FCC approved this! Talk about the 'Amization' of FMI!"

OR Bend K209BJ \*89.7

OR Sisters KPXA 104.1: "This has been listed since your 14th Edition."

VT West Rutland WRUT 107.5—finally off the air, as ordered by the FCC [July, p.3, col. 2]. Richard L. Antos sent an article which quoted the FCC: "Staff review of the license application has revealed the existence of several discrepancies between the antenna height and overall tower heights listed in the license application and those authorized in construction permit BPH-891229ID." The letter ordered Brian Dodge to "cease operations immediately" of the station which had been on the air since April 1. The station was one of a number of Christian stations that Dodge has allegedly helped put on the air around the country since the late '70s, although the Rutland Daily Herald did not identify those stations. "Broadcasting Year-

book" does not list any Brian Dodge owned stations under "group ownership."

MB Winnipeg CKVN 101.1 36 watts, 140 m, Aug. '94 and Aug. '95; it commemorated the end of World War II with 1940s-style announcing from CBW-FM \*98.3-CKY AM Winnipeg.

KLSX 97.1 t()  
CA San Francisco KFRC-FM 99.7 t()  
KCNS Ch. 38 has KKHI 100.7 San Rafael on iSAP, for increased coverage of the Bay area. The station's new coverage map boasts a "coverage of 5 million watts."  
CA San Joe KSJO 92.3 t()  
CO Denver KHH 95.7 t()  
DC Washington WHUR 96.3 t(), WASH 97.1 t()  
FL Tallahassee WFSU \*88.9 tT, 67  
WAMF \*90.5 tU, 67  
WFSQ \*91.5 tT, not tM. The two reading services are identical, but not the station coverages, with WFSU more to the north.  
IL Alton KNJZ 100.3 t()  
IL Chicago—this is one of the markets Radio Sedaye Iran, based in Los Angeles, would like to expand to. It would also like to be heard in Atlanta, Miami and Vancouver BC, provided reasonable SCS rental fees can be arranged; otherwise, it might have to go to direct satellite reception for some of the 2 million Iranians in the U.S. without service. A concern of its president, Dr. Kamel Helmi of L.A., is that a high speed data standard might make it too expensive to stay on SCS.

JAPAN—Visual Radio, an FM character multiplexing system, transmits 15 characters per line for two lines every 10 to 30 seconds on the Japan FM Network. Thirty-four FM stations and 25 electronics manufacturers are involved. Similar to RBDS, "stations can now combine a sound program with a character information service that might transmit, for example, the song title and name of the artist, a number for requesting a favorite tune, or sports scores. Manufacturers are developing car stereos, portables and GPS navigation systems with the visual function. The first visual radio product is the Casio MR-1, a 117 mm by 80 mm and 26 mm portable weighing

only 180 grams, including dry cell batteries. It retails for \$250. For details, contact Casio in Japan at 81-3-3347-4811 or FAX 81-3-3347-4009."

INFORMATION RADIO

KNNZ 540 and BN Tijuana XETIN 540—here's a logo to go with the "K-News" story from Oct. (p. 6, col. 1).

CA Taft KMYX 1310 was silent, returns with a 50-watt long wire antenna system, duplicating FM, pending a new transmitting site.  
 GA Atlanta WSB 750—talk show host David Paul, who was with the station 1991-1992—wanted for aggravated stalking of his wife, Janet Staves. His right name is David Paul Staves; his air slot now held by Neal Boortz.

ME Brewer WNSW 1200 silent, after only four months under the ownership of Stephen and Tabitha King. The Kings also own WZON 620 and WKIT 100.3. WNSW was shut down because it was expensive to run at 10,000 watts, and current and future revenues weren't there. News and talk shows like the "G. Gordon Liddy Show" won't be picked up by the other King-owned stations. It came on the air in 1948 as WGUY-AM, then around 1979 its call letters were changed to WMLI. In 1967 it became WKIT-AM and in 1992 WNSW. "It was a difficult decision to make," said Chris Spruce, g.m. "We grew up listening to 1200."

ME Monticello WREM 710 is a struggling local station that wants to stay on the air with volunteers, similar to KTOZ (AM) Springfield MO. Three of the volunteers are Canadian citizens, and therein lies WREM's problem. The U.S. Immigration and Naturalization Service says foreign workers cannot come into this country and take away jobs from U.S. citizens, even if the "jobs" are voluntary. Ralph Dhuy, g.m. of WREM and a denture maker by trade, said he can't find enough U.S. citizens to volunteer. Marc Russell, INS area port director at Houlton ME, said every effort must be made to fill the positions with Americans, and whether or not they are paid is not the issue. Only if employment searches by the Dept. of Labor and the IN showed there were not enough Americans to fill the slots will Canadian volunteers be allowed. The concern, according to Dhuy, is time. "If the Canadians are not allowed to come over, there might not be an American radio station," he said. WREM has a rock format, with part of its audience in Canada.

ME Presque Isle WEGP 1390 silent, ending it LMA with WOZI 101.7 Presque Isle.  
 MI Howell WHMI 1350 silent; FM remains on MI Westland WNZK 690 days and MI Dearborn Heights WNZE 680 nights (2500 watts on each frequency), are unique in the U.S., according to the NRC AM log, 16th edition. . . "To my knowledge, no previous U.S. station has used two different frequencies, though two in Canada did so until the early 1990s," said Doug Smith, "Monitoring Times," magazine, Nov., 1995. The station(s) broadcast in 13 languages, including Albanian, Serbian and Arabic.

 WI Dickeyville 101.1—one of the applicants (Sept. p. 6, col. 2) is Leon Metz, honey bee farmer, along with Thomas Spaight, Geneseo IL. Metz read a story about an East Coast man starting his own radio station and he wanted to do the same. He wants to program easy listening music, because "I don't like too much of the music they put out," referring to what is programmed on the local Dubuque stations. It was Paul Hemmer, KGRR 97.3 in the Dubuque market, who put Metz in touch with radio veteran Spaight. With Spaight's background, Metz said, "I think I've got the gusto to make this happen. If I can make this honey business happen, I ought to have the gusto to do that. . . A lot of people laughed at me when I started doing

this, but they ain't laughing any more." Metz started his honey business in 1977 when he was laid off at John Deere in Dubuque. He employs his wife; together they sell about 45000 kg of honey. The business has "grewed" to the point where they're about to hire another full time person, which would give Metz more time to concentrate on the radio station. Ganske and Munson are competing for the channel [see Sageville IA, above], and Metz hopes to buy them out. Metz thinks he has the promotional savvy to make the operation go. "There's a lot of competition out there, but there's nobody out there doing what I'm doing," he said. Since making the announcement about wanting to play beautiful music, Metz says he's received lots of positive comments.

Metz

KMJZ 104.1 to adopt a rhythm-and-blues format, featuring Tom Joyner 5-10 a.m. M-F. It will get new call letters. KQRS-FM 92.5 widens its lead over WCCO 830 AM, with KSTP-FM 94.5 a distant third, although centimetering upward. KCFE 105.7 Eden Prairie's acquisition of Don Imus in the morning "doesn't appear to have helped the station. It had 0.4 percent of the morning audience, same as in the spring." NV Reno KRCV 630 "silent pending sale" NY New York WLIB 1190 received FCC OK for 30000 watts nighttime, while WOWO 1190 Fort Wayne IN will reduce its nighttime signal to about 9800 watts. Inner City Broadcasting bought WOWO last year "for the express purpose of modifying its nighttime signal, and has since sold it to Pathfinder Communications." OR Portland and KOTK 620, a talk station, "is finding the going tough." It had jumped .3 share to 1.1, "but stayed flat during Imus' show."

KUPL 1330 was silent for two weeks after being sold. Has returned as KKPZ, "K-Praise." The FM, KUPL "-FM" 98.5 remains country and now calls itself "Today's Best Country."

PA Mount Pocono WPMR 960 returns to the air with news, talk, parallel to WILK AM Wilkes-Barre; also in an LMA with WGGY 101.3 Scranton and WKRR 98.5 Wilkes-Barre. SC Burnetown WKRU 1510 silent.

TX Beaumont KJUS 1380 fined \$1000 for unauthorized transfer of control. "The fine for this violation was lower because the station was voluntarily taken off the air as soon as the licensee realized it was in violation of the rules." TX Denison KDSX 950 all sports via satellite from Prime Sports Radio.

TX Plano KAAM 620 on air as of Nov. 1, with big band/"Music of Your Life"/Hit Parade, "same as it was on the old KAAM 1310 in Dallas before 1310 became KTCK with all sports. Dallas-Fort Worth now has three big band/hit parade stations with KAAM, KDMM 1150 High and Park and rimshotter KPYK 1570 in Terrell." KAAM is weaker to the north, "as expected" (compared to when it used to be in Wichita Falls as KWFT). TX Port Arthur KOLE 1340 "silent pending sale." Expected to return with religion.

UT Centerville KCPX 1600 off air, with former FM sisters KMXB 105.1 Orem and KUMT 105.7 on and sold separately.

CL Ciudad Acuna XERF 1570—the station most noted for Wolfman Jack bawling out on. His family is planning a park and museum in his honor in Belvidere NC. "This is going to tell the story of all these types of music through his eyes," his widow, Lou Smith, said. Wolfman Jack, whose real name was Robert Weston Smith, died July 1 at age 57. The \$300,000 park will contain an amphitheater that would seat up to 7500.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed*

AZ San Carlos Option I: 103.1C1 for C2 and move to Florence AZ, 101.9A or 103.3A for 103.3A Oro Valley and 106.3A for 103.7A Oracle AZ, affecting KLOB [moving from 103.1A], deleting \*103.1A Comobabi AZ, or substitute \*102.9A there. Option II: Allot 102.9A to Avra Valley AZ, 101.9A in lieu of 103.3 Oro Valley, 103.3C3 for 103.7A Oracle, KLOB, and change coordinates for San Carlos 103.1C2, reserved for KCDX (having a CP for 103.7A). Desert West Air Ranchers Corp. counterproposal.

GA Elberton 105.1A, Dec. 26, Jan. 10  
IL Kewanee 93.9A for 92.1A, WJRE, Dec. 19, Jan. 5

KY Campton 103.7A, Jan. 5, 22  
ME Machias 101.1B, Jan. 8, Jan. 23  
MI Calhoun City—proposed to delete 102.3A  
NM Chama 98.9A, Dec. 26, Jan. 10  
NM Las Vegas 96.7A, Dec. 21, Jan. 5  
NY Wellsville 103.5A for 93.5A, WJQZ, Dec. 21, Jan. 5  
NC Robbins (move from Sanford) 103.1A for 105.5A, WFJA counterproposal

OK Chelsea (move from Claremore) 100.7A, KTFR, Dec. 26, Jan. 10  
OR Pendleton 103.7C1 for 103.5C1, KWHT, with Wilson Creek WA  
WA Wilson Creek 103.5C1 for 103.3C3, KVVY, Dec. 22, Jan. 8  
WI Cornell 99.9C3, Dec. 22, Jan. 8  
WY Jackson 103.3C, Jan. 16, 31  
WY Laramie 96.7A, Dec. 21, Jan. 5

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*  
AL Daphne (move from Bay Minette) 106.5C2, WAVH

CA Dunnigan (move from Willows 105.5A to Woodland-Sacramento area) 105.5B1, KQSC.  
IL Carthage 93.9A, Dec. 15-Jan. 16  
IL Colchester 104.1A, Dec. 18-Jan. 18  
IL Taylorville 97.3A, Dec. 15-Jan. 16  
IA Mount Pleasant—denied petitions by Bruce F. Elving and Susan I. Coloff for reconsideration of the action upgrading KI L-J-FM 105.5 to a C3.

MD Berlin—dismissed John P. Gillen's 94.9A bid  
MN St. Joseph 99.9A, Dec. 15-Jan. 16  
MO Ava 92.1A for 92.3A, KKOZ-FM  
MO Branson 106.3C2 for C3, KRZK  
MO Brookline 102.1A, Jan. 12-Feb. 12  
MO Columbia 96.7C1 for C3, KCMQ  
MO Cuba 107.3C3, Jan. 9-Feb. 9  
MO Dixon 92.1A, Jan. 9-Feb. 9  
MO Mountain Grove 92.5A for 106.5A, KCMG-FM

NM Raton 96.5A, Dec. 26-Jan. 26  
NY Rosendale 102.5A, until Jan. 4. An expected applicant is WFNP \*88.7, which hopes to go commercial and full time, ending its time-share with WRHV \*88.7 Poughkeepsie. [Last month, p. 5, col. 3.]

OK Bixby 105.3C2 from C3, KJMM  
OK Nowata 104.9A from 94.3A, KRIG-FM  
OK Okmulgee 94.1C1 for C2, KTHK  
PA Tioga 94.7B1 for A, WPHD  
VA Jonesville 99.1A, Dec. 26-Jan. 26. FCC denied proposals for Jefferson City, Cumberland Gap and Elizabethton TN.

**FCC Rescinds License of WZLS 96.5 Biltmore Forest-Asheville NC**

NC's WZLS 96.5 is on the air, but with a limited life expectancy. The stereo station serving Asheville known as Z-96.5 had been built, and on the air for a year, even though it knew challenges to its construction permit had been filed. Orion Communications, the FCC found, had commenced operations months after the grant of its CP had been reversed and remanded. This caused rivals Biltmore Forest Broadcasting FM, Inc.; Liberty Productions; Skyland Broadcasting Co. and Willsyr Communications to intensify their efforts to have their applications reconsidered.

The FCC is also considering an application for joint interim operating authority filed by Biltmore Forest Radio, Inc., a nonprofit corporation comprised of the petitioners, with no more competing applications to be considered. In the meanwhile, WZLS can continue on the air under Orion ownership for 180 days or until the application for joint interim operation is granted.

**Small-Print Happenings and FM Industry News**

The FCC granted the merger between Group W/Westinghouse Broadcasting and CBS. Group W has 8 FM stations and CBS 13, besides several AM-TVs. In approving the transfer, the FCC denied several petitions to deny. It also approved some common FM-TV ownerships for 12 months. Also temporarily waived is ownership of

21 FM stations, one over the 20 station national limit, although Westinghouse had asked for an 18 months' waiver. Gone is the Group W logo; now only the CBS eye will identify the stations. With Congress and Clinton feuding about the budget bill, there's no progress on telecommunications legislation. "Radio World" mentions that half the stations in the U.S. are in small markets and those stations have an interest in the status quo. Broadcasters are hoping for waivers like CBS-Westinghouse have, or to enter into more duopolies absent a new law permitting FM-FM-FM triopolies or more in a market, or ownership of hundreds of stations by one entity.

Also receiving a waiver—Chancellor Broadcasting Co., for 12 months to allow it to exceed the local FM (and AM) station ownership rule in the Minneapolis-St. Paul market.

Fined to the tune of \$15000 was Eddie Bond at WOHT 95.3 Drew MS for engaging in unauthorized transfer of control, plus another \$7500 to Delta Radio, Inc. for the same transaction. Rating a reduced fine of \$9,500—WAZX-FM 101.9 Cleveland and GA. As part of its agreement with the Commission, Infinity Broadcasting paid \$1 million to the U.S. Treasury, with the remaining \$715,000 to be forked over by March 31—all because of on-air utterances by "Miss America's" author, Howard Stern. KBER 101.1 Ogden UT fined \$2000 for broadcast of telephone conversations without the called party knowing it.

Use your Internet connection to access the mass media bureau's engineering data bases. The FM engineering data base, for example, includes goodies like geographical coordinates, vacant channels (if any still exist!), licenses, construction permits, applications, main stations and translators. The layout description for the files is contained in: fmidx.txt, "which is an unzipped ascii text file." The zipped data file names are: fmfxeng.dat.gz for primary data; fmfxda.dat.gz is for directional antenna tabulations. Questions about FM data contact Gary Kalagian, (202) 418-2789; e-mail at gkalagia@fcc.gov.

Probably missing from the database of licensed stations, or those holding CPs, is WPJV 96.9 Willard OH. The FCC denied a request for review of Mansfield Christian School's construction permit. The FCC determined that the school failed to make substantial progress in building the station during the allotted time and that there were no circumstances beyond its control that prevented construction.

Broadcast tower owners, not individual stations using a tower, are now responsible for tower maintenance, so ruled the FCC. This might save stations thousands of dollars a year, but the FCC warned that licensees could still be liable if the owner of the tower fails to maintain it. Effective July 1, 1996 the FCC is establishing a phased two-year window for registration of all existing towers that require FAA notification.

Watch WPAT-FM 93.1 Paterson go Spanish! It is part of the dissolving Park Communications group based in Ithaca NY, and was sold to Raul Alarcon Jr.'s Spanish Broadcasting System, which already owns WSKQ 97.9 New York. Sale price, a near record for an FM, \$83.5 million. FCC approval is expected within 60 days. I can remember 92.3 (now WXRK) when it was WHOM-FM in the mid-'60s, and it was Spanish.

A waiver that looks to be permanent—Tribune Broadcasting has been given permission to buy KVOD 99.5 Denver, in a market where it owns KOSI 101.1-AM and KWGN (TV). The FCC reasoned that "the addition of this second FM station to Tribune's existing operations would not appear, on balance, to adversely affect competition and diversity in the Denver market."

Survey finds radio "more important" than TV. The market research firm of Mark Kassof & Co. did a survey of 500 people 12-64. It found more people consider radio, as opposed to television, "absolutely essential" to their lives; 21% rated radio that way, compared to 14% who described television in that manner.

The NAB reminds that all stations must have

someone designated as a chief operator. This person does not have to be an engineer, or even a license holder (such as an SBE certified person). In situations when a chief operator is not available, such as vacation or sickness, another person must be designated as the acting chief operator.

The Nov. shutdown of the FCC lasted four working days, and [non-essential] staff more than made up for their absence by processing scores of applications and grants after the FCC reopened. In the event of a further shutdown you might expect typically one staff member at each of the FCC bureaus, the ability to pay fees for applications at Mellon Bank, but no further work will take place. Any filing windows coming due during the shut down period will be extended to the next business day the Commission is open.

The DAB system favored in Canada is the Eureka 147, which a panel found to be superior to any of the in-band on-channel systems advocated in the United States. An independent body did the testing—the digital audio radio subcommittee of the Electronic Industries Association.

Michael Rice is a convicted felon with 12 counts of sodomy, sexual abuse, and sexual assault of children from 1985 to the time of his arrest in 1990. He's also a broadcaster, owning Contemporary Media, Inc. stations WZZQ 107.5 Terre Haute IN; KFMZ 98.3 Columbia, KAAM 103.5 Huntsville, KBMX 101.9 El Dorado and KFCE 102.1 Cuba all MO. The FCC has issued a show cause why the licenses and/or construction permits should not be revoked, as well as why Rice's application for an FM at Bourbon MO, under the Lake Broadcasting, Inc. name, should not be denied. The revocation proceedings will look at any effect of Rice's convictions have had on the stations, if he misrepresented himself to the FCC after his arrest, to determine if he has engaged in an unauthorized transfer of control, and if the licenses are not to be revoked if he should be fined. A forfeiture up to \$250,000 could be issued.

The University of Maine—Orono has decided to drop broadcasting classes. "We're fast becoming obsolete," said Stuart Bullion, chair of the communication and journalism department. He said faculty members are teaching with outdated equipment that is prone to malfunction. He had tried to get \$50,000 to \$100,000 to update, but the administration did not come forth. "This is not a Syracuse or Missouri," Bullion said, referring to two of the nation's better-known journalism schools.

A twice-weekly state news program returned to the air on KQED-FM \*88.5 San Francisco. "The California Report" is funded with a three-year \$1 million grant from the Irvine Foundation, with some 25 stations, including relayers, planning to carry one or both editions—either the nine-minute Monday edition, or the half-hour Friday edition. It replaces "Calnet," a statewide news program KRON \*88.1 Long Beach produced from 1988-91.

In Tampa, WUSF's long-running local news program, "The Florida Report," which aired at 4:30 p.m., has bit the dust. It is replaced by the longer "All Things Considered." Former station manager John Young and then news director Pat Kemp made charges against each other in the media about the show's future. Young's wife, Betty, is still with the station, but not in charge of the reading service. John was helping to provide automation for that service in the wake of Betty's leaving and the service's expected downsizing. Still no word on Ben Jones, one time classical host on \*89.7, who murdered his wife. [Sept., 1994, p. 8, cols. 1-2.]

Pacifica Radio and a group that calls itself "Take Back KPFA!" are at odds about program changes. The group charges that CPB regulations were violated requiring business matters to be discussed in open session. Disruptions have occurred at the Berkeley headquarters and in Houston, all because of streamlining of formats at the Pacifica stations. [See last month, p. 8, col. 1.]

Public stations are slow in getting demos that will enable them to receive the digital audio being transmitted to them on satellite. Some 3000 have been available, but only 800 of them have been authorized. Owners of the others will have to contact Technical Support at NPR, 1-800-971-7677, to have them initialized so the station can begin receiving the digital audio as NPR converts from analog delivery; it's supposed to be a simple procedure.

FM totals as of Oct. 31 from the FCC: 5285 (92-108 mhz); 1810 (88-91.9), compared to AM's 4906.

From the classifieds: "DX Listening Digest" by Industry expert Glenn Hauser, and companion publication, "Review of International Broadcasting," samples \$2.50 each; \$3 overseas. Glenn Hauser, Box 1684-FM, Enid OK 73702. Hear his "Review of International Broadcasting" Fri. 4:15 p.m. CST 9475 on WWCR Nashville TN, or Sat. 5:30 a.m. on 5065, Sat. 8 a.m. on 15685, Sunday 2 a.m. on 7435 (or 3315) and Tue. 7:30 a.m. on 16685. Catch it also on RFPI Costa Rica daytime on 15050 and night on 7385, or on 9400 upper side band: Friday 2 and 10 p.m.; Sat. 5 a.m., 12 and 8 p.m., Sun. 3 a.m., 5 p.m., Mon. 1 a.m., Tue. 1 and 9 p.m., Wed. 4 a.m.

For sale: Bogen TP 160A solid state FM-AM tuner, \$10 plus shipping. E. Lightman, WEDL, 550 Merchant St., Ambridge PA 15003; (412) 266-2802.

WMSJ \*91.9 is looking for an experienced station manager, with track record managing Christian stations, fund raising, public relations, FCC regulations. Resume to PO Box 432, Freeport ME 04032.

Free on tape to an FM station near you: "Radio Nation," a weekly show produced by Marc Cooper, with live public affairs interviews and commentaries. Until Dec. 31 it will be available on tape; after Jan. 5 the half-hour show will only be on satellite to public radio stations. For info, call (212) 242-8400, ext. 213.

"M Street Radio Directory," 1996 edition, ready around Dec. 29, expected to contain 880 pages listing AM-FM: facilities, ownership, formats, phone and FAX numbers, addresses, LMAs and duopolies, ratings, industry news and essays, personnel at stations, and more. Pre-publication price \$39.00 plus \$5 shipping from "FM Atlas Publishing," P.O. Box 336, Esko MN 55733-0336; 1-800-605-2219.

## FM FORUM

### CONTRIBUTIONS FROM READERS

Doc Searls in CA writes about Family Radio and their translators: "FR is a strange beast. They hold prime spectrum real estate in many of the biggest markets: New York, San Francisco, Salt Lake City, Milwaukee. . . Their NY and SF holdings alone must be worth \$50 million or perhaps much more. They just sold their San Diego station for something like \$12 million. Pretty remarkable for an organization that has predicted the end of the world (Harold Camping appeared on NBC's TV Nation last summer and scheduled the apocalypse for Sept. 6, as I recall). And, as you know, they have the most extensive network of translators in the known universe. They also have abominable engineering. . . On the way up here from Los Angeles I listened to a pair of identical Family Radio stations, KFNO \*90.3 Fresno and KEFR \*89.9 LeGrand. KFNO sounded much better than KEFR, though neither sounded like a serious station. They played ancient droning background music followed by a series of dead-air glitches and no IDs on (or near) the hour. . . When the power goes out at KEAR's Mt. Beacon transmitter, the station simply goes off the air, because they lack the generator back-up that supports the other three stations there. In any case, from what I understand, KEAR's listenership is immeasurably small. Even among the unpublished numbers available to the

public radio stations, they tend not to appear. Given this problem, their absent coverage of local gay issues in SF is not surprising. . . It is safe to say there are large parts of California served by highly redundant Family Radio translators. I would be willing to bet that nobody listens to many of them. They're a kind of debris on the FM band."

One of the most common problems for radio stations is moving high quality audio between sites. Solutions have ranged from satellite uplinks to delivery of audio material on tape. Recently, broadcasters have embraced a new technology known to phone and computer modem users as ISDN. With ISDN hard-wired to the studio, a station can dial up digital telephone networks, with audio links generated at will and at very low cost. Because ISDN does not have all the audio bandwidth needed for main channel FM, some compression must take place, with conversion to digital along the way, and then back to analog. Sports broadcasting is an early use for ISDN. The National Basketball Association undertook a project two years ago to build a league-wide system for broadcasting games to an uplink via ISDN. The investment in equipment and installation was recovered by cost savings in the first year. ISDN allowed WLVE 93.9 Miami Beach to take its morning show to Paris and broadcast live. As ISDN availability improves and costs go down, the list of applications in this area should grow dramatically, writes Tom Hartnett in "Communications News."

Local laws that forbid citizens to erect antennas under two meters in diameter could be preempted unless it is demonstrated that the regulation is reasonable in relation to health, safety or aesthetic objectives, under an FCC proposal. Any person aggrieved by one of these laws would be required to exhaust all non-federal remedies before involving the FCC, however. This would include showing a permit has been denied and administrative appeals exhausted, or the person applying for the permit would have to pay more for the permit than the purchase and installation costs of the antenna.

Glenn Hauser writes that I was a guest on the program "Spectrum," heard on WWCR-3 5065 Nashville TN Sat. 9-10 p.m. CDT/CST when I was staying at Lake Placid NY in August. "Usually they have one main topic each week and guest, starting out with a quick report by Scott Fybush, WBZ, on the week's U.S. broadcasting developments, business-oriented. In his "Review of International Broadcasting," issue 145, Hauser quotes from Tim Hendel on the DXC-100 radio, sold by the "For the People Network," White Springs FL, and actually made in the US! It is made by the American Electrola Co., 8033 Bennett St., Pittsburgh PA 15221; (412) 242-6569. It came by mail about two months after ordering. It is housed in a wooden cabinet "1950 style," cost about \$200. It covers AM, FM and shortwave. with a tuning knob having detents.

"Smart people organize themselves around bad laws every time"—Bill Steding, Star Media Group, commenting about the new communications bill.

Merry Christmas. See you in '96.

*Bruce F. Elving*

**SAP/SCServices**

*Symbols are as in the "FM Atlas"*

CA Sacramento KVII \*6 has its SAP back on with In Touch from NY 24 hours a day. Sierra Services for the Blind has radios for loan at (916) 265-2121. Now the Nostalgia Network on Satellite Galaxy 1, Channel 22, has increased its programming with DVS, Descriptive Video Services for the blind. "DVS refers to the process of adding spoken description to TV programs and movies so that the blind and visually impaired can follow the action when the dialogue doesn't make it obvious. So, those of you with satellite dishes, check it out." DVS is an SAP creature.

MD Baltimore WERQ 92.3 (t). "As part of the EIA promotion of RBDS we broadcast an RDS data subcarrier at 57 kHz. We are currently keeping RDS injection at about two percent." Format is sr: "WERQ is a 24-hour

100 St. Paul Street - Fourth Floor  
 Baltimore, MD 21202

rhythmic top 40 station. . . Thank you again for the opportunity to confirm one of the longest distance FM reception reports I have ever come across," writes Wendell S. Hall, Jr., assistant chief engineer, of my July 5 reception of WERQ in N.E. MN.

 KY Louisville WVKY 1270 silent  
 NE Lincoln KHAT 1530 continues off the air "for the past few years. Rock Steady, Inc. has consistently reapplied with the FCC to keep the KHAT license alive, but one has to wonder why. The company bought the station for next to nothing from the previous owner, who discovered he could make more money selling the land his transmitter sat on than he could by broadcasting. Rock Steady did nothing to revive KHAT in two years, and may not have wanted to. It may have been simply a matter of thinning competition in the market. Many people don't realize that Lincoln, with a market half the size of Omaha's, has almost exactly the same number of radio stations. All that crowding makes it harder to make a buck." Co-owned FM stations are KIBZ 106.3 and KKNB 104.1 Crete NE. [Information from an article, "Airwaves," by Tom Johnson in the Lincoln Journal.]  
 NJ Elizabeth WJDM 1530 has started on 1660, but only "from sometime in the afternoon to 10 p.m. Plans are to begin a new format (still a secret) on 1660 and abandon 1530." On 1660 there is continuous music, light contemporary and oldies, while 1530 has brokered Christian programs in Spanish, at least part of the time.

 "I look forward to another year of FMedia! Keep up the good work!"  
 "Happy New Year, Dr. Bruce!"

"Bruce, for twenty (20) or more years I have had to put up with your illegal operations of accessing private SCA services. Additionally, you have frequently insulted our services and purposes by referring to the Minnesota Radio Talking Book Network as being the profane hidden service we don't want people to know about... In addition to your operations being often in violation of the law, your product line is generally of standard technical quality in sensitivity, stability, crosstalk, audio bandwidth and distortion. I have been actively involved with Minnesota State Services for the Blind since 1954 providing excellent, high quality technical services to the consumers of this agency. I take exception to anyone who attempts to brow beat me into abandoning my beliefs and standards to accommodate their self interests," Bob Watson, engineering administrator, MN Talking Book for the Blind (on the SCSES of many MN Public Radio stations).

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- MS Calhoun City—delete 102.3A (not "MI" as shown last month, p. 7, col. 1)
- MO Kimberling City (move from Cassville) 100.1C2 for A, KRLK, Feb. 5, 20
- OK Newcastle 93.3C1—move from Ada, KTLS, Jan. 29, Feb. 13 [with Newcastle
- OK Watonga 93.9A for 93.5A, KIMY, /

- WV Salem 103.3A, Jan. 29-Feb. 29
- VI Frederiksted—dismissed Jose Arzuaga's 107.5B1 bid

**DX Doings—Winter Skip Appears**

"My New Year's resolution is to add 101 stations to my FM DX list in '96," writes a Queens correspondent. "I'm only at 299 after nearly four years. A major obstacle is that most of the NYC area stations never sign off (only WQXR 96.3 does so regularly, from 12:45 a.m. to 5:30 a.m. Mondays). Because of this, there are still 20 frequencies on which I've received only one station."

Tuesday Dec. 26 I was pleasantly surprised to find skip in very strong from about 5 p.m. to midnight. Received early in the evening were WXVS \*90.1 Waycross GA, mentioned in the Peach State Radio ID on the hour, WAGP \*88.7, promoting the Bread of Life Bookstore in Beaufort SC; WUNC \*91.5 Chapel Hill NC. On the hour WUNC gave call letters but not the city of license, then WFHC \*91.5 Henderson TN was received with part of a sign off heard at 10:05 p.m. CDT. KVRT \*90.7 Victoria TX was

heard with programming parallel to KEDT-FM \*90.3 Corpus Christi, both in stereo, and finally, at 12:07 a.m. it was KPAC \*88.3 San Antonio. Co-owned KSTX \*89.1 San Antonio was also heard. Although little reception occurred above 92 mhz, the commercial band, this was one of the longest-lasting FM skip sessions of any winter.

Summer skip is mostly in the daytime, while winter skip is often at night. Dec. 23, 1969 it was in from 5:30 to 6:30 a.m., when FL and GA were heard in Duluth MN, including WYNR-FM 101.5 Brunswick GA (now WSOL-FM). Early risers in Milwaukee WI also got in on the skip action that day. And back on December 21, 1950, when I came home from school, I received WHPE-FM High Point NC (when it was

**'WHPE WHPE-FM**

Owned and Operated by  
 THE HIGH POINT ENTERPRISE, INC.  
 HIGH POINT, N. C.

a commercial station with "37000 watts—95.5 MEG"), WSAV-FM 100.3 Savannah GA, and WGWR-FM (now WKRR) 92.3 Asheville NC.

**FCC Grants Transfer of Control of 12 Radio Licenses; Grants Temporary Waivers of the National and Local Ownership Rules**

The Commission granted applications for transfer of control of 12 radio licenses held by subsidiaries of Pyramid Communications, Inc. to Evergreen Media Corp. Pyramid and Evergreen entered into a merger agreement whereby a new wholly owned subsidiary to be known as Evergreen Media/Pyramid Corporation will be formed.

The \$306.5 million deal required temporary waivers of both the national and local ownership rules. The new licensee was given a 12 month waiver to exceed the national ownership rule of 20 FM stations—it currently own 24—and 12 month waivers of the local rules with regard to its acquisition of Pyramid stations in Charlotte NC (WRFX 99.7 Kannapolis NC and WEDJ 95.1), where it already owns two others (WBAV-FM 101.9 Gastonia and WPEG 97.9 Concord). The FCC turned Evergreen down for a 12 month waiver to acquire WNUA 95.5 Chicago; instead getting a six month waiver. Two of the Chicago FMs must be sold by March 29 (one year after the Commission approved Evergreen's purchase of the former Broadcasting Partners stations). Then six months after that deal is closed, another Chicago FM must be sold.

Concurring was FCC Commissioner Andrew C. Barrett who said, "Evergreen is currently the licensee of six stations (four FM and two AM) in the Chicago area. [The FM stations are identified as WLUP 97.9, WRCX 103.5, WEJM-FM 106.3 Lansing IL and WVZ 102.7 Oak Park IL]. Today, we grant Evergreen yet another waiver on top of this existing waiver to allow it to hold another station in the same market. The result is unprecedented. Never before has the Commission allowed ownership of five FM stations in a single market. . . I believe we are establishing dangerous precedent by allowing an entity to own double the number of stations permitted under our current ownership rules, even if on a temporary basis. . . I believe six months will be sufficient time for Evergreen to dispose of any excess stations [and] I will look with disfavor upon any attempts to extend either the 12 month waiver granted to Evergreen earlier this year [1995] or the six month waiver granted in this case."

Commissioner Susan Ness said, "Evergreen has not sought expeditiously to divest the two FM stations it now temporarily owns. It has not argued that market conditions have prevented it from selling the stations during the past six months. . . The appropriate way to address changes in ownership is by legislation or by rulemaking, not by waivers." FCC Chairman Reed Hundt, whose former law firm represents Evergreen, did not vote.

Speaking to a telecommunications policy group in Washington DC was FCC Commissioner Rachelle B. Chong, who suggested that government remove existing barriers to entry of stations and eliminate the "inherent advantages for incumbents." Government would monitor how the policies advance competition, and then steps back and lets the marketplace work. She challenged regulators to "avoid traditional notions of regulation" and to "think boldly and creatively" to address issues in a more competitive environment.

**Small-Print Happenings and FM Industry News**

Triathlon Broadcasting is teaming up in 'Husker Country, where it owns KZKX 96.9 Seward-Lincoln and KTGL 92.9 Beatrice-Lincoln, and hoping for FCC-sanctioned waivers to buy KIBZ 106.3 Lincoln and KKNB 104.1 Crete NE. It is invading nearby Omaha by announcing the purchase of KXKT 103.7 Glenwood IA-Omaha for \$8.125 million and KRRK 93.3 Bennington-Omaha NE for \$2.7 million.

In Phoenix, KEDJ 106.3 Sun City and KHOT-FM 100.3 Globe have agreed to merge. The new company, "New Century Arizona," is involved in the ownership of Seattle's KJR-FM 95.7 and KUBE 93.3. Carla Foxx, a weekend air personality at KHTC 96.9 Phoenix, is on leave from the station while police investigate her involvement in a hit-and-run death of a 78-year-old attorney. Witnesses say they saw her car leave the scene of the accident; she had previously worked at KESZ 99.9 Phoenix and KHOT-FM.

The Miss America pageant people have not sued Howard Stern over the title of his new book, apparently realizing that the public is not going

to mistake him for the real Miss America. Stock in companies like Barnes and Noble fell off, despite early strong sales of Stern's book and that of Col in Powell, because of pre-Christmas storms that kept shoppers at home. The Books on Tape version of Howard's is read by James Earl Jones. This from a new Internet book catalog which includes shortwave and FM: www http://itrc.ncsu.edu/radio.

WRNN 94.5 Murrells Inlet is being bought for \$550,000 by Pinnacle Broadcasting to team with WYAV 104.1 Conway SC. WGER 106.3 Saginaw MI to be sold from F-B Communications to Fritz Broadcasting for \$4.2 million. Fritz owns WIOG 102.5-AM there, and has been running WGER in a sales marketing agreement since 1992.

WGNA-FM 107.7-AM and WPYX 106.5 Albany along with WTRY AM would all be sold for \$223.25 million to Robert F. X. Sillerman's SFX Broadcasting. "We are extremely excited about this acquisition, which will greatly enhance our presence in major markets," Sillerman said.

Classical stations WQRS 105.1 Detroit and WFLN 95.7 Philadelphia aren't being sold to American Radio Systems, Inc. by Marlin Broadcasting. Both parties declined comment on why the \$70 million deal isn't going forward. Howard "Woody" Tanger, who also owns WTMI 93.1 Miami, says he has no plans to find another buyer for the stations. Instead, he'll concentrate on boosting the revenues of the Detroit and Philadelphia stations, which "fell slightly after the deal was announced in October."

A group of area businessmen has made an offer to buy the defunct WHOU 100.1 Houlton ME. Two Tall Entertainment, comprising Paul Cleary, a former WHOU employee; Richard Cleary, an attorney; Robert Anderson; and David Moore made an offer to buy the station for \$12500. "We want to bring a local radio station back to Houlton," Paul Cleary said. The station has a market value of \$11000 according to court documents. It is now in the hands of Gary M. Growe, a Bangor attorney who is serving as trustee for the U.S. Bankruptcy court. Previous owner Peak Communications is in the hole for almost \$207,000 to 14 creditors, with assets of \$17,310. The creditors include the Internal Revenue Service, the State of Maine and the town of Houlton, all for back taxes; NYNEX, The Associated Press and Broadcast Music, Inc. Cleary and Two Tall would not be obligated to pay creditors. Ralph Dhuy, dentist and owner of WREM (AM) 710 Monticello ME, the station that uses volunteers from Canada (last month, p. 6, col. 3), has discussed the possibility of merging with the Clearys. "I think there's enough room for everybody," Cleary said. "We're not here to take anything away from anybody. We're doing this for the local people and the local economy. We're taking a chance and hopefully the chance will work out." [For more on WHOU, see Dec. p. 4, col. 1.]

And WOZI 101.7 Presque Isle won't be moving to 101.9 any time soon, in spite of what was reported last month in the WHOU story. On Nov. 8 Four Seasons Communications, a subsidiary of Martz Communications of Chagrin Falls OH, and owner of WBPW 96.9, filed a formal petition to deny the plan. Martz objected to WOZI moving its tower to Mars Hill, with an expected decrease in power because of its proximity to Canada. WOZI would thus no longer be able to serve 80 percent of its city of license, as required by FCC rules. Tim Martz denied the opposition it was merely an effort to make sure that WOZI followed the same rules his stations observe. "Their filing was not accurate how it depicted the covered city [Presque Isle]," Martz contended.

Tal ker WSNV 103.9 Howland-Bangor ME was Limbaugh-less in late November and early December. Workers were trying to replace a tower that had been downed in January, 1995. A small ice storm prevented their making a changeover to the new tower from a temporary one that had already been taken out of service.

Also off the air was WRBC \*91.5 Lewiston ME, the Bates College station. It was off for several weeks from Oct. 6 through early December to allow new equipment to be installed in its studio, and for a new antenna to be erected on the roof of Merrill Gymnasium. A much stronger and consistent signal was expected of the 120-watt station.

WCRB 102.5 Wal tham-Boston is apparently aiming for a younger sound, releasing evening announcer Dave MacNeill, 64, from his stint. He has been at WCRB since 1950. MacNeill will continue to write and produce periodic specials for the station as well as being the host of its Boston Symphony Orchestra broadcasts.

Gov. William F. Weld of MA told people in the vicinity of the WAMC \*90.3 Albany tower, which sits atop Mount Greylock in MA, that if the 76-m tower stays they should paint it green "to make all the environmentalists happy and maybe hang a few sprigs of holly on it so it will be pretty." He said he hadn't made a final decision on the tower, but felt Channel 10 should pay more rent. WAMC, meanwhile, raised \$302,120 from 4369 callers in just over five days in November.

MI Public Radio (WUOM/WVGR/WFUM) reached its fall on-air goal of \$200,000 in 10 days. Actually, it was \$202,400, with an additional \$18,300 to be provided by corporations matching employee contributions, with another \$8300 generated by local businesses taking part in the Challenge Grant program. Overall, the campaign generated \$229,000 with 1155 new members pledging support. WKAR-FM \*90.5-AM East Lansing realized \$165,945 in its 10 day drive, with 766 new members.

Commercial station WKBZ-FM 95.3-AM Whitehall-Muskegon MI is generating income to help Western Michigan Public Broadcasting (WMPB). WMPB, which received the commercial stations as a donation, has implemented a 36-month business plan to increase revenue at WKBZ-FM-AM. If this plan succeeds, G.M. Mike Walenta said WMPB will be "the first in the country to have figured out how to fund public radio through commercial."

A contract engineer at KXLP 93.1 New Ulm, working on the transmitter, received a 110-v shock that knocked him to the floor. "It was very minor; they are trying to clean up their equipment," said Jim Wychor of the MN Broadcasters Association.

The Electronics Industries Association is starting the second phase of its national RBDS program, at 57 kHz SCS. Stations in markets 11 to 25 will soon receive RBDS sign-up kits from the EIA, which includes RBDS encoders, radios and software at no cost to such broadcasters. Over 100 stations in markets one to 10 have signed up in Phase I.

Deregulation of radio is the last issue holding up the telecommunications bill. House members are proposing no limits on radio ownership, except for those in the top 25 markets there must be 10 independently-owned voices. Markets 26 to 100 must have six voices, while those in markets over 100 must have three. The Senate has yet to make its own offer before any such bill emerges from conference committee and ultimately to the president's desk.

News and talk programs in stereo—a godsend? NPR stations can now have all the web's news and cultural programs delivered to them in "stereo," effective Jan. 3, 1996. The programs had been produced in stereo but delivered in mono. "There's no truth to the rumor that they'll be favoring the left channel," muses the "M Street Journal."

James "Moby" Carney, whose program is widely syndicated, originates at WKHX-FM 101.5 Marietta-Atlanta GA. On Dec. 1 he made the mistake of calling for machine-gun-armed guards to "take out a few" illegal immigrants along the border with Mexico. The local Spanish newspaper Mundo Hispanico gave heavy coverage to the broadcast, with a summary printed on the front page in bold type. The Mexican consul

FM FORUM

CONTRIBUTIONS FROM READERS

Returning to Glenn Hauser's report of last month: Tim Hendel mentioned to Glenn a store in Orlando FL, Radio Relics, which sells, repairs and restores antique radios, phonographs, etc. Dennis Williams operates the store at 321 E. Evans St., Orlando FL 32804; (407) 895-0146.

A reader sent a copy of an article from the August "Popular Communications" showing how to receive SCSignals with the help of an FM radio and a shortwave radio tuning in longwave below 100 kHz. "They also mention SCS-modified radios, but not yours! The same issue had a classified ad with a BC area code: 'FM broadcasting: transmit many kilometres, excellent sound, 80-108 mz. Not a bug. Kit or assembled, R. Scott Communications, (604) 642-2859' . . . I saw a new book on public radio at the library, 'The Sound and the Story: NPR and the Art of Public Radio,' by Thomas Looker, \$24.95 from Houghton Mifflin. It's 421 pages with no pictures." The July PopComm had an editorial by Tom Kneitel, "Free Speech and Free Radio vs. the FCC." It was about low-power FM.

Hanalei Publishing mentions there was no '95 edition of the "Country Music Radio Atlas," but is working on a '96 edition, most likely by spring.

Malcolm Kaufman sent a brief article about radio and religion. Radio and TV stations apparently can't be denied government grants just because they carry some religious programs, the Commerce Department declared. This means WFUV \*90.7 New York will get \$262,858 for a new transmitting tower and studio equipment, plus \$97,350 for legal costs. WFUV broadcasts a one-hour Mass each Sunday. Fordham University, WFUV's licensee, sued after the grant was denied in 1994. [See Sept., p. 8, cols. 2 and 3.]

Kaufman also sent a NY Times article on FM stations carrying more AM-type fare, including sports and talk. WFAN AM had to turn to WEVD AM for some games, but the need to offer other games forced it to turn to FM, WXRK 92.3. The article mentions these major FM talkers: WLUP 97.9 Chicago, KPIX-FM 95.7 San Francisco, and KSYG 103.7 Little Rock AR.

As followup to the story about public radio rivals getting together (Nov., p. 7, col. 1), KPLU \*88.5 and KUOW \*94.9 Seattle still enjoy vigorous competition in local news. "Current" newspaper says, "Between KUOW and KPLU public radio fans in the Seattle market have it good. But there is heightened concern in the system these days about redundancy in programming, and some question the wisdom of having two stations airing *Morning Edition* and *All Things Considered* at drive time in one market. The two stations are 'engaged in talks' about future collaboration," with the result one station will concentrate on music and the other on monophonic news and information.

general in Atlanta, Teodoro Maus, called for and received an apology from the station, in which Neil McGinley, WKHX-FM's operations manager, said, "We don't advocate violence as a way of remedying problems."

Quitting WHTA 97.5 Fayetteville-Atlanta is James Breedlove, who was with WHTA since it hit the air in July. But an awakening of sorts occurred after the late night announcer totaled his car recently on his way to work. "I've always tried to live a Christian life and a positive life," said Breedlove, known as "Boogie Black" on his 11 p.m. to 2 a.m. airshift. "I just realized after my accident—maybe it was a sign from God—that my job wasn't positive. That by playing this music, indirectly I'm promoting drug use, the disrespect of women and cursing," Breedlove, 22, said. He'd still like to work for an urban station, "but on a level where I can choose my own music."

The program "Fresh Air," removed from the WABE \*90.1 Atlanta airwaves, appears permanently gone, but the staff in Philly is brainstorming a way for it to be heard by Atlantans (Atlantes?), including a yearly cassette subscription or even a book club featuring the works of authors interviewed by host Terry Gross.

Cuts at the Canadian Broadcasting Corporation have left the shortwave service known as Radio Canada International high and dry. The CBC plans to scrap the 50-year-old service Mar. 31 to save money, while putting 125 employees out of work. RCI broadcasts in eight languages to much of the world, including a satellite delivered service to Canadian troops overseas.

RADAR, Radio All Dimensions Research, fall report, found 96 percent of people 12 and older were in the total radio audience during the course of a week. On a projected basis, that translates to over 208 million persons, with over 151 million, or 70 percent of the population, reached by stations associated with networks that are measured by the RADAR service. In an average quarter-hour, almost 24 million persons are listening to radio. The newly released report shows the FM radio audience share at 79 percent. This is down one percentage point from the last study (see "FM Atlas," 16 p. 3).

Although FM accounts for almost 80 percent of radio listening, up to 45 percent of the population tunes in AM in an average week. A study by Eastman Radio used data produced by Arbitron and Scarborough. AM listening varied greatly by market. Pittsburgh had 32.3 percent while Norfolk VA was only 11.6 percent. Scarborough data showed AM reaching 41 percent of households with incomes \$50,000 or more and 46 percent of adults with household incomes of \$100,000 or more. Eastman Radio concluded that "few advertising media are as effective as AM radio at reaching upscale adults." Funny, that's exactly the argument we used in the 1960s to sell FM vs. AM.

Lino Cella, the "controversial acid-tongued host and self-styled CEO" of Radyo Pinoy, on the 92 kHz of WBGO \*88.3 Newark NJ, will go to trial over a \$5 million slander and defamation suit filed by Bronx businesswoman Kathy Ty (see April '95, p. 7, col. 3), says the Filipino Reporter. At a Dec. 4 hearing in a federal court in NY, Judge Michael Mukasey (who presided over the World Trade Center Bombing trial) rejected a motion by Cella's lawyer to dismiss the case. While Cella, 44 (pictured), did not mention Ty by name during his two-hour tirade on Feb. 10, he allegedly used innuendos and double entendre to make "smear statements" against Ty and her sausage company following a dispute

over an ad contract. The judge gave both sides until May to come up with one agreed-upon English translation of the Tagalog broadcast. That will not be easy. Cella will probably want a literal translation of his words while Ty will want

his many complicated nuances explained in such a way that the court can understand them. If the two sides cannot agree on one version, they will be forced to use a court-appointed version." The FCC did not take a side, because the events took place during the 8 p.m. to 10 p.m. period which is outside the 6 a.m. to 8 p.m. period when the FCC can enforce for indecency. Also, the FCC has not reached a decision on whether SCS broadcasting is subject to FCC enforcement action. Also named a defendant is WBGO, which is represented by attorney Gregory Herbert.

The 1996 Midwest Broadcasters and Telecommunications Expo is Jan. 29-30 in the Radisson Hotel South, Bloomington MN, and sponsored by the MN Broadcasters Association. Rates are for Monday only, Tuesday only or both days. I hope to take in a one-on-one meeting with Ray Stewart of the FCC Tuesday. Call Jim or Tascha at (612) 926-8123. The MI Broadcasters are sponsoring a Great Lakes Broadcasting Conference and Expo Feb. 26-28 in the Lansing Center, Lansing. It will feature sessions on mergers and use of the Internet. Information call 1-800-YOUR MAB.

The former owner of WAIR 92.5 Atlanta MI, W-Air, Inc., had its fine reduced from \$10000 to \$7500 for failing to have its main studio in the principal city contour. The station claimed it was in Gaylord, but the FCC said it really was about 40 km north in Petoskey. The FCC also found a full time staff presence was lacking at the Gaylord site.

Jeff Carlson, longtime host of the "Rise and Shine" show and operations manager WBCL \*90.3 Fort Wayne, died last month in a two-vehicle accident in northwest Ohio. Carlson, 46, was driving on U.S. 24 when his car went out of control and hit the rear of a tractor-trailer rig, the OH Highway Patrol at Van Wert reported. Although wearing a seat belt, Carlson died at the scene. Friends and family members at the funeral at the Blackhawk Baptist Church in Fort Wayne heard excerpts from his morning show, including a snippet from "Ask Edna," a character he created to answer all sorts of questions. "It caused people to tune to WBCL who otherwise wouldn't have given a hoot about Christian radio," said Char Binkley, station general manager. She said management meetings at the station took twice as long as needed because Carlson got everyone laughing. Carlson started his radio career at DZAS in Manila, Philippines. Born in Bay City MI, he came to Indiana to study at the Institute of Broadcast Arts in Indianapolis. In 1968 he went to work at WCXM 101.7-AM Fort Wayne in 1968, and hosted the morning show at WBFL since March, 1978. He was also heard on sister station WBCY \*89.5 Archbold OH. At the time of the fatal accident, he was returning from checking the transmitting equipment in Archbold. "Jeff was known and loved by many!" Terry J. Foss, director of public relations, WBCL, wrote me.

Carlson

Station totals from the FCC: FM (92.1-107.9) 5292, FM (88.1-91.9) 1812; AM 4908, as of Nov. 30. From the classifieds: High power 8-12 bay antenna at or near 105.9 FM. R. Kelly, KXJG, POB 2537, Bay City TX 77414. KUKA 105.9 San Diego TX to be a relay? WCUW \*91.3, 910 Main St., Worcester MA 01610, seeks donation of stereo control board in good condition with all manuals. J. Cutroni, (508) 753-1012. Collins 250 w FM transmitter 1963 tuned to 96.9, super clean. \$2000, you haul. Rick or Jim, (217) 234-6464. The number is for WLBH-FM 96.9.

ARTI, American Radio Trading, Inc., sent a blurb about their specialized SCS receivers. One looks like the G-E 3-5264A, which I also sell. For more info, they're at 124 W 30 St., Room 317, New York NY 10001; (212) 564-7770. Frank Karkota, Compol, Inc., in NH, told me he thinks ARTI's stuff is "junk."

Ernie Wilson, seller of low power FM devices, sent a copy of an article featuring him in the June 5, 1995, *Forbes*. He sells only kits, not assembled transmitters, to comply with U.S. government requirements. [See June, p. 8, col. 3, for more about Wilson.] "Since 1978 it has been impossible to get a license for a radio station with less than 100 watts power," said Wilson. "High school kids, ministers, determined guys with their own ideas have all been shut down by the agency. Many had their broadcasting rigs seized." For \$1 you can get Wilson's catalog from PO Box 130, Paradise CA 95967-0130.

My now-dismissed FM application, after being mentioned in "Broadcasting" magazine, attracted a few solicitations. One was Far West Communications, La Crescenta CA, which wants me to know about their five different formats—hot AC, oldies, hot country, traditional country, MOR—delivered on compact disc, DAT cassette, or analog tape for full automation, live-assist or a combination of both. Their clients include WVAZ 102.7 Oak Park-Chicago IL, WWWW 106.7 Detroit MI and KMLE 107.9 Chandler AZ. The Westwood One Radio Network wanted me to seriously consider a 24-hour satellite format featuring music or CNN Radio News. "As the foremost provider of satellite formats, Westwood One can work with you to analyze your market, select the right format strategy and even select an automation supplier."

I ordered a copy of Bob Doll's new book, "Sparks Out of the Plowed Ground," based on radio's 75-year history and Doll's experience in producing the "Small Market Radio Newsletter." That was back in April, and I have yet to see the book. I think he's waiting to see how sales go before committing to print a certain number. I paid \$29.95 plus \$3.95 shipping to him at 1746 Rosewood St., Seguin TX 78155. I'm sure it will be interesting when it comes out.

Dietmar Kopitz, co-chairman, European Broadcasting Union, Geneva, sent the RDS Forum Newsletter, which has pictures of different models of radios having RDS, most of them unavailable in the U.S. Included is a Nokia pager from Finland with visual display of messages, the Sony ICF-M 50 RDS FM/AM portable radio, the Grundig EC7500, Becker Automotive Systems radio for BMWs, the C24 DIN Professional, and the Philips DC502. About the latter, it is said that it has "Advanced RDS features including EON and the ability to recognise PTY News, to give a similar performance to Traffic Announce-

ment intervention, but with News reports. Best Quality Reception tuner technology, which has previously been used in high-end products, is now available in this model at below DEM 400. As with many car radios these days the front panel is removable for security."

In London, Melody Radio, 104.9, a 24 hour music station, advertised via billboard a very large RDS tuner alongside the busy A4 main road. Throughout last September and October passersby could see Radio-Text as broadcast, giving information about the title and artists of the music being played. "The eight metre wide replica of a Sony ST311 tuner provided an ideal means of promoting the radio station, its music format and has certainly raised the awareness of RDS."

And a subscriber in England sent a piece on DAB: Digital Audio Broadcasting from the Feb. "Communication." The BBC plans to send out its five existing networks, including one monophonic network, on DAB. Experimental transmissions have occurred from Alexandra Palace, Crystal Palace, Reigate Hill and Wrotham. Wrotham is the site of major BBC-FM transmitters serving London.

Walter Breville ordered the FM Atlas, saying "I'm looking forward to the FMusings section with a suggestion to not compress it so much—leaving out words such as THE, AN, etc. to the point where in some places FMusings is almost gibberish!" If AM is done away with, he'd like to have a portion of it for licence-free experimental broadcasting. "Otherwise, look for pirates to fire up bootleg transmitters!"

"Bruce—Rush my book—here are a few of my latest," writes Art Vuolo, Jr., "Radio's Best Friend." He sent his MI Radioguide and a Talkradio guide. For sample radioguides, write Vuolo at PO Box 218, Ypsilanti MI 48197; or call (313) 355-0022. I know his Talkradio guide could be improved by showing major public stations and networks with talk, including MN Public Radio's monophonic News & Information service and WI Public Radio stations which are mainly talk. He also sent a Twin Cities' Radioguide

Nick Lombardi had some comments on the 16th ed. FM Atlas. It was mailed out 3½ weeks later than originally promised, and for once the layout was well planned and executed, with translators listed after each state an improvement. The new maps are good, but "many of the older ones remain plagued by complex, odd-shaped inserts and severe overcrowding. . . I would also like to see better alignment of the 'S', 'F', and 'E' language codes and a halt to your confusing practice of splitting up station nonIDs onto two lines for no reason. . . All in all, an excellent job, and I'm already looking forward to FM Atlas-17 (fall of '96?)."

"Radio Ink" had a special issue on Radio's 75th anniversary. That publication always capitalizes Radio. Included were

pictures of 75 people in radio's history "who made a difference." FM fans and broadcasters will recognize the names of Edwin H. Armstrong, the inventor of FM and the superheterodyne circuit; Jim Gabbert, who founded KIOI 101.3 San Francisco and was active in the National Association of FM Broadcasters, predecessor of the NRBA, which later merged with the NAB. Howard Stern's boss, Mel Karmazin of Infinity Broadcasting, is named, as is Stern himself. Presidents Franklin D. Roosevelt and Ronald Reagan are on the list, as is Jim Schulke, called the inventor of the beautiful music format on FM.

A large potential audience exists for CJRT \*91.1 Toronto among Ontario's 11 million people, many of whom subscribe to cable. This could exceed CJRT's average 250,000 listeners in and near its home city, muses K. W. Walter. Northern U.S. listeners should be able to get it from Anik E1, Ku band, transponder 26, audio 5.76-5.94 mhz. He noticed, when in Madison WI, the cable system brought in WFMT 98.7 Chicago, which is available there either on satellite or direct. I often tune in WFMT here in the Duluth area, thanks to its clear frequency and greater-than-normal coverage for a Class B station. Walter says, "Keep noticing a few corrections, p. 169 CJBC-FM \*90.3 Toronto is listed as 431, but all other stations on the CN tower are 421. Is this a typo?" [Probably not, CJBC-FM's antenna may be positioned higher than the other stations'.] He mentions some Canada stations having heights mentioned while others don't, and he wonders where Caronport SK is, home of religious CJOS 92.7. It's between Regina and Swift Current, close to Moose Jaw.

Peter Russell faxed a question about whatever happened to any of the 10-watt stations that could go to 87.9 in places where there are no Channel 6 TV stations? Also, he wants an 11th edition from anyone having a copy to sell; FAX him at (207) 725-3348. I am not sure why no FM stations have migrated to 87.9; a few stations had applied, but the applications were returned by the FCC. In the Sixth Edition, FM Atlas, 1980, I wrote (pp. 4-5): "A long-standing FCC inquiry concerning a variety of changes in how noncommercial broadcasting should function came to a head in 1979 when the Commission announced: all 10-watt educational stations must either file application for a minimum of 100 watts by January 1, 1980 in order to retain their present frequency in the educational band—or face having to move to a commercial channel; move to a newly-created channel, 87.9 MHz (which cannot be used in areas near channel 6 stations or close to the Canadian or Mexican borders); or accept secondary status in the 88-92 MHz part of the FM dial." Moving into the commercial part of the band could "further antagonize relations between commercial and educational

broadcaster. It is my prediction that 87.9 will be an allocation failure; this frequency with its power limitation at ten watts and the fact that it is in the channel 6 audio band will make operation on that frequency undesirable."

Phil Boersma sent an article about Red Noize, 40, left, dying of cancer. For

background see FMedia! Sept. 1991, p. 3, col. 1, which mentioned his firing from WLAV-FM 96.9. Since 1991, he had worked middays at WZGC 92.9 Atlanta. The obituary in the Atlanta-Journal Constitution mentioned that Noize requested only that his

radio name be printed. But his father's name is Albert Perry of Colorado Springs, and his wife is known as Rene Noize.

Another death item—that of George H. Duncan, who helped develop a new type of rock'n'roll radio in the late 1960s. Duncan took chances at WNEW-FM 102.7 New York, where he was general manager from 1968 to 1971; at WOR-FM 98.7 there in 1966-67; at KMPX 106.9 San Francisco during the reign of the late Tom Donahue. He helped develop FM radio with the use of long songs, such as the 18-minute-long version of Arlo Guthrie's "Alice's Restaurant," and freedom of program hosts to decide what music they wanted to play. He's the person who hired Alison Steele at WNEW-FM, who herself just died at age 58. "History proved him a visionary. The format was so popular it became a favorite of advertisers. Today, where are the visionaries? Industry executives and consultants will tell you creativity exists, but in the hands of one program director. Yet in this potentially most diverse of media there is little room on commercial radio for program hosts to express individuality. They are jockeys, riding hardware and preselected formulas, hanging on for dear life," Joshua Mills, New York Times News Service.

The letter from Bob Watson (above, p. 4, col. 2) was written to me after I complained about his refusal to supply 12 crystals for the Duluth frequency (92.9 mhz at 67 kHz) so that a blind agency in northern WI could access the station. Watson, at State Services for the Blind in MN, took 1½ years to modify WI radios, and they prefer the faster service that I can provide. "When you called me you asked that I supply you with crystals to service radios to receive our service out of Duluth. I told you that I was not interested in supporting your business operations," Watson wrote. "Your response was then to insult both me and my dear friend C. Stanley Potter by telling me since he was dead and gone that it was no longer

necessary for me to follow his policies and beliefs. I told you that I was only interested in following the law, and since you were in continuous violation of the FCC regulations relating to SCA I did not want to participate in your activities. . . As usual, you stated your customary diatribe regarding the people's moral right to access SCA services, upon which I told you I was not going to spend the remainder of my career continuing this argument with you. It was at this point where I finally stated 'that's enough' and hung up the telephone."

Dan Kelley in CO writes: "I think there was some confusion by your reporter who had the comments regarding KWXA Durango on p. 2 of December's FMedia! Yes KWXA was put together by Dan Lacy, who originally founded KIQX Durango and had since sold that station to a group headed by Harold Green. The KVXA allocation had nothing to do with the KVTY Basalt allocation, other than Mr. Lacy found both frequencies and his wife, Caren Lacy, became the permit holder for each. The Durango 99.7 frequency was found after Lacy originally proposed 102.9, but that frequency proposal was challenged by now KKFG/KDAG Bloomfield-Farmington NM owner Jeff Thomas with the result being 102.9 was allocated to Kirtland NM.

"Prior to putting KWXA on the air, Caren Lacy sold 49% of the permit to Kenny Kendrick, who owns KDGO AM Durango as well as KENN-AM/KRVN FM Farmington NM. After KWXA debuted, Mr. Kendrick acquired the other 51% of KWXA. Merger talks between KIQX and KIUP/KRSJ Durango are just rumors, with KIUP/KRSJ denying any knowledge of a possible transaction. Wal-Mart has yet to purchase the current KIUP studio-transmitter site, but apparently will do so. KIUP already has another site in the works for its AM array—or could go nondirectional at a new site with reduced power. [The information presented in] the Four Corners Business Journal [that your reporter used] was not accurate."

Mike Femyer sent an article from the Arizona Republic, "Small Radio Station Defies FCC." It speaks of Bill Dougan's "KAZR" 92.7, which covers part of north Phoenix. Dougan claims the station he runs from a shed in his back yard offers a public forum for "the common man to say anything, talk about anything and produce his own shows.

"There are no controls by sponsors and there are no controls by station management, other than to run an above-board show," Dougan, 41, said. He works days as a printer and has been fighting the FCC since he took to the air in 1991 with half a watt of power. In May he boosted the power to 10 watts. Dougan claims not to need a license because of his low power and not being commercial. Stephen Tsuya, an engineer at the FCC office in Douglas AZ, disagrees, saying Dougan's days on air are

numbered, and his \$17,500 fine must be paid. Dougan's lawyer, Victor Aronow of Phoenix, pointed out the Berkeley CA case which might determine precedent in Dougan's case. But Dougan isn't worried as he celebrates the first anniversary of "Arizona Free Radio," which is on 6 to 10 p.m. Monday through Friday. In 1996 Dougan hopes to increase his hours. His shows include *Women's Words*, *This Way Out*, *American Atheist Radio Forum*, and *Media Monitor*, which Dougan calls "our token right-wing loony show."

In a metropolitan area saturated with more than 40 radio stations, Dougan is strictly small potatoes, reads the newspaper article. But he vows to stay on the air for two reasons: To challenge the FCC's licensing policies and to offer "an alternative forum for people who don't have any other broadcast forum." Besides, it's a hobby for him. "I could sit at home every night and surf the Internet, and what would I get out of that?" he asked.

Doug Vernier's company that produces FM channel searches is now known as V-Soft Communications, and the various programs work on Windows '95 and other Microsoft Windows products. It can be reached at 1-800-743-DOUG.

NPR Training sent me their catalog of tapes. Audio tapes range from aligning recorders @ \$8.50, Digital Audio Crash Course @ \$16, and the ABC's of SCA @ \$8.50. Latter has Dick Kohles of CUE Networks and Nate Shaw, formerly of the Development Exchange, on how to market your SCS. Add \$5.50 shipping and handling to NPR Training, 635 Massachusetts Ave., N.W., Washington DC 20001.

John Patton has been named executive vice president at Modulation Sciences, Somerset NJ. Patton had worked for Meredith KCEZ 94.9 Kansas City and Bonneville Broadcasting. Both Patton and Eric Small, founder of Modulation Sciences, knew each other at Bonneville. "John and I have known each other since the early '70s and we have a long successful working relationship," Small said.

Clarke Ingram, now p.d. at WPXY 97.9 Rochester NY, went to the historic Edwin H. Armstrong FM site in Alpine NJ. "We couldn't get in because the gate was locked and no one was allowed to let us in, but we stood at the gate and looked up at the tower for a little while. It was exciting to be able to stand on such an historic spot and think 'This is where it all began' . . . Glad you enjoyed the tape of various station IDs."

Atlanta's James "Moby" Carney, mentioned above for urging the gunning down of illegal Mexican immigrants, is at it again. He speaks of his employer, WKHX-FM 101.5 Marietta GA and how they get listeners. They do it "the old fashioned way—by buying them." Kicks 101.5 did that for a while during the recent ratings period—giving away \$10,000 a week.

Until February,

Burt F. Elving

 MO Willow Springs KUKU-FM 100.3 o  
 NV Reno KOZZ-FM 105.7 r  
 NH Manchester WRND \*91.7 t—at least part of the time—a reading service to the blind run by Joe Hartz on the main carrier  
 NJ Atlantic City WAYV 95.1 r, CHR  
 NJ Paterson WPAT-FM 93.1 S, I, "very similar to their old format, except that most of the songs are Spanish... WPAT 930 AM, remains adult contemporary." NonID is "Suave effay emmay." Alfredo Anonso of Spanish Broadcast Systems bought WPAT-FM for \$83.5 million, and is reportedly seeking English listeners who like some Gloria Estefan and Selena next to their Mariah Carey, according to the "New York News." "The Spanish stuff they play is all slow, not like the hard-thumping fast tempo stuff played by co-owned WSKQ 97.9. WLTW 106.7 NYC is taking out ads urging ex-WPAT-FM listeners to check out Lite FM (that's what WPAT-FM's format really was like, not really like WADB 95.9 Port Pleasant NJ, which is a combination of easy listening and elevator music, despite what your NJ reader said in the Jan. FMedia!)."   
 NM Santa Fe-Albuquerque KZRQ 105.1 r, SMN's Hot AC (from "Z-Rock"), now "Star"  
 NY Glens Falls WYLR 95.9 k[ountry]  
 NY New York WXRK 92.3 pt, modern rock and Howard Stern. Drops Greaseman, "now the morning man on WZGC 92.9 Atlanta GA, doing the show live from Los Angeles. He's heard in the afternoon via tape delay in Baltimore, Philly and Washington DC." Also let go: K-Rock veterans Dave Herman, Pete Fornatale and Vin Scela. Production staffers from KOMA 98.5 San Jose Ca were in NY to help set things up. Except for some classic rock on WNEW 102.7, the market is now without the format. "No word yet on whether WDRE 92.7 Garden City NY will complain about having another modern rocker right next door on the dial!" Now "New 92.3 K-Rock." Speculation is that WNEW 102.7 might find room for Herman, Fornatale and Scelsa—all of whom worked at 'NEW before. WNEW p.d. Ted Edwards, speaking to speculation that station may move back to classic rock, said "It's somewhat obvious that format isn't the most attractive place to be, since two stations have

already abandoned it. Even though we adjusted our format, we never walked away from heritage- or classic-rock acts. Artists like Neil Young, Tom Petty, Pink Floyd and David Bowie have continued to be a part of WNEW."  
 NY Oswego WGES 105.5 op, "TK-105" (from "Star 105"); calls' change coming?  
 NY Phoenix (Syracuse) WRDS 102.1 sr  
 NY Remsen WUUU 93.5 mr, with Broadcast Programming's new "AC45+" format. A typical hour, according to the "M Street Journal," is about 90% gold; the rest is currents and re-currents; and the format provides for Christmas music.  
 NY Wellsville WJQZ 93.5 r, hot AC  
 NC Hickory WXRC 95.7 p, adult alternative  
 OR Phoenix KROG 105.1 k  
 PA Allentown WJCS \*89.3 g  
 PA Philadelphia WYSP 94.1 pt, like WXRK, now "The Rock Station" [talk overnight]

 TX Decatur KRNH 105.7 s (R&B oldies), serving Dallas-Fort Worth  
 TX Galveston KRTX 104.9 S, I, LMA-to-buy with KLTN 93.3 Port Arthur  
 TX Goliad KHMC 95.9 S, k, Tejano  
 TX Victoria KTXN 98.7 o, back on air; had been b[eautiful music]  
 UT Midvale KQMB 102.7 rm  
 VA Crozet WCYK-FM 102.3 o  
 VA Monterey WVLS \*89.7 k  
 VA Richmond WMBX 103.7 rm  
 VA Rural Retreat WXBX 95.3 rm, LMA with WYVE 1280 Wytheville [with WCYK-FM  
 VA Staunton WVAO-FM 99.7 k, duopoly/  
 VA Warrenton WQRA 94.3 o, "WINX" (from "Sunny 94"); LMAa-to-buy with Rockville MD AM. [Calls expected to change to WINX-FM when the ownership transfer is approved by the FCC.] It was sixth in audience among 34 stations receivable in Fauquier County. Gives up adult contemporary plus a big bands' show with Daryl Terrill on Sunday nights for the past seven years. Station said there was only one other oldies station in the market—WBIG-FM 100.3 Washington DC. But other such stations exist. "If you include the oxymoronically-named 'classic rock', there are six FMs and 1 AM oldies, all within WQRA's primary contour: WGRQ 95.9 Colonial Beach-Fredericksburg, WARW 94.7 Bethesda MD-Washington DC, 103.9/104.1 WVXR Braddock Heights MD/WXTR Waldorf MD-Washington DC, WBIG-FM, WARX 106.9 Hagerstown-Frederick MD, plus a WTRI 1520 AM. . . It also helps to remember that the station that is now 'Thunder 107 Washington's Rockin' Contry' WRCY 107.7 failed at oldies with every promotional approach they tried four years ago. Also, our local cable system had been using WQRA as the audio track of the supposed 'local access' channel—in reality

just a billboard channel that does not have any real programming. This channel now has an open carrier. . . Maybe WQRA needed a new format, but this area needed another oldies station the way a bull moose needs a football helmet."

- WV Charles Town WXVA-FM 98.3 k, "98-3 X" (and "X Country")
- WV Webster Springs WAFD 100.3 g, Reach Satellite Network's "Solid Gold"
- WI Sauk City WMXF 96.3 m
- ON Toronto CJEZ 97.3 still on, but aiming toward females 25-54 with "easy rock"
- NL Anahuac XHAHU 103.3 t, in pseudo stereo

**On Air—Real Stations and Clandestines**

- CA Sacramento KYMX 96.1 was knocked off the air for a while when vandals cut away four guy wires for a KCTC 1320 AM tower. The falling tower collapsed into the nearby KYMX tower. The suspects, trying to sell wire, had been arrested for hauling copper away from another site, using similar tools.
- CA San Francisco KSAN 94.9, after being off the air less than a day after winds blew its Mount San Bruno tower down, and a separate tower for eight S.F. boosters fell. All were restored, after a temporary wooden trestle was installed to hold the antennas.
- GA Atlanta KF2XBF 94.5 an FM TISation at the airport with both national and local commercials, handled by Capital Broadcasting Systems, 515 Madison Ave., Ste. 1111, NY NY 10022, or Avis Conciergo Service, 1-800-941-AVIS. It's a "20 minute tape loop narrated by George Plimpton, carrying sports trivia, updates on today's hottest money matters, the latest book reviews and more. . . Tape presentation very well done!" Call letters may or may not be legal, raising the question of how legal this kind of station is with the FCC? [See also Dec. p. 4, col. 1.]
- IL Effingham W217AM \*91.3, which "gets out"
- IN Terre Haute W220BB \*91.9
- KY Providence W266AB \*101.1
- MA Lowell W0AZ 99.5—format change to jazz has alienated the over-50 set, who according to a recent Boston Herald article, have nowhere to go on radio, except for a few shows on WGBH \*89.7 or WBUR \*90.9, as well as some small AM stations. Countering that is WRGW 98.7 Somersworth NH, which

advertises to listeners to the former WSSH, "Your search is over," with its 24 hours a day schedule of soft rock favorites delivered in digital stereo.

- MN Glencoe KARP 96.1, not yet on 96.3. "They're having trouble finding a site."
- MN Rochester KNXR 97.5 sent a letter to its Minneapolis area mailing list asking if people are having interference from K249DF\*97.7 Minneapolis. "If you are receiving interference in your home or in your car, would you favor us with a short note reporting and

**KNXR**

describing your experience? Once we assess the extent of the interference, we will formally request, through the FCC, that WNCB [Duluth] find another frequency on which to operate its translator station." WNCB told me this is illegal solicitation of people to complain of interference, and that the FCC does not provide for protection from interference experienced in a car. I was in Minneapolis and found almost no interference to KNXR from K249DF, but plenty of interference from other sources, such as local station intermod in the vicinity of the IDS Tower downtown.

- MN Redwood Falls K295AD 106.9, picking up KCGN-FM 101.5 Ortonville MN well, "until KXAX of St. James MN moved to 101.5 from 104.9 last December. This causes great interference. A phase box and another antenna hopefully will eliminate the interference. Please pray for success."
- MN Renville K291AB 106.1—working OK, but "if interference becomes a big problem from KJOE 106.1 Slayton, a channel change may be needed (maybe to 105.9)."
- NY Mattydale (Syracuse) 90.7 pirate with "distorted audio and weird music, Dr. X."
- NY New York WFUV \*90.7's latest in its efforts to build a 146 m tower near the Botanical Gardens is that the NYC Board of Standards and appeals has suggested a compromise that it construct to a maximum of 116 m or move the tower 8 m away from the Gardens. Neither side is pleased. The Gardens say that is not far enough, and the station says the tower is half built and moving it would cost another \$200,000 to \$300,000. "Negotiations are ongoing."
- NY Syracuse—Carousal Mall "WCRL" 94.1, with mall information—weak as heard near I-90/181.
- TN Dickson W203AM \*89.5, along with Providence KY (see above)—"signed on a few days before Christmas."
- WI Milwaukee "WTSP," The Pirate Station, operated by Billy Stevens on 107.3, according to "Monitoring Times," which says "it pays to tune around your local FM dial occasionally."
- ON Orangeville CIDC 103.5, moved studio in with CIAO AM Brampton, increasing its listener base from 85000 to 350,000.
- ON Toronto CILQ 107.1 takes radio rights to Maple Leafs Hockey away from "Fan 590" AM. Games will be produced in stereo; the games cost Q-107 "a lot of money to win [the contract] from Telemedia and CJCL. . . The Fan is not letting the loss affect its all-sports format."
- MEXICO—90.1 is the frequency of five clandestine stations related to the Chiapas matter and apparently are used for seeking support for the uprising. They are Radio Rebelde and Radio Liberacion in Chiapas, Radio Ciudadanos al Afre in Cuernavaca, Radio Pirate, Mexico City, an unnamed station in Ensenada BN, and a sixth station, Radio Interferencia, is on 89.3 in San Andres Tuxtla VC.
- PU Puebla XHRC 91.7: "As in the Atlas, this station is indeed pr, \$, U.S. heavy-metal rock was heard with Spanish-language announcers and local news. When's the last time you heard local news on a U.S. rock station like KQDS-FM 94.9?"

JAMAICA—two reporters sent information on FM there. Norval Pagenhardt in eastern MD received KLAS 89.7 Mandeville, and sent a tape of his over two-hour rock-steady reception. The station has stereo and mostly easy listening music in the evening; religion on weekends and talk in the afternoon. Mike Cherry visited Jamaica and heard KLAS on 89.3 and 89.9 (same call letters as a U.S. station), RJR-FM with block programming: reggae, soca, southern gospel in stereo; simulcast with AM. Also has relays on 91.1, 92.9, and other frequencies. JBC-FM 91.1 in stereo with reggae, rock, oldies and gospel plus three relays. JBC-1 93.3 is a full time relay of an AM with block programming of reggae, ska and oldies in pseudo stereo with broadcasters. Fame FM 1 is on 91.5 with reggae, urban or gospel and stereo jazz Sunday mornings; it has four relays. Love FM 101.1 and 101.7 is contemporary Christian music with some religious talk. Radio Waves is another block programmed stereo station, 102.3-102.9 (three stations), while Irie FM, "eye-ree FM," 105.1-107.7 (four stations) is Jamaica's only 24 hour all-reggae station, and said to be the most listened-to station on the island. [Pagenhardt also sent word of hearing WCIB 101.9 Fal mouth MA,

"Cape Cod area all night long. Their signal was a phenomenal field strength of 90 to 95 dB!" last June 29.] BOSNIA, Tuzla AFN Bosnia is on 100.1 with translators on neighboring towns. It is hard

to cover where the troops are due to the mountainous terrain. Formats vary by day-part for the 1000 w station; also on 1143 AM and cable TV.

**Off Air—Or Not Yet On**

- FL Century WKGT 105.1, "pending sale"
- MI Grand Rapids WBYW \*89.9 still off, but expected on later this month. The tower they were trying to install the antenna on wasn't strong enough, so work was going ahead installing new footings for a stronger tower. "This ain't no picnic," said "Uncle" John Lubinskis, station manager. FMEdials local reporter mused, "Competence might help. . . Thanks for the info re: the KAWZ translator application in Grand Rapids being dropped. Good to see WCSG \*91.3 is alert in fending off potential interference, unlike WTHS \*89.9."
- MN Northfield KRLX \*88.1, not heard in over a year [on the air since it left 106.7.
- MN St. Louis Park KDXL \*106.5; has not been/
- NE Blair KISP 101.5, set to sign on "in 1996. Signal doesn't appear likely to cover metro, however." Co-owned with Sunrise Broadcasting, KOSJ 97.7 Nebraska City-Omaha-

Lincoln. KOSJ was set to be sold to Henry Broadcasting, KGOR 99.9-AM Omaha, but it's said Henry couldn't come up with the cash.

NJ Brick Town WBGD \*91.9—since June. "Between April and June of last year their signal dropped considerably. . . Even though the high school classes start in September, it usually takes until October for the station to come back on the air. . . I've tried calling them (at 908-458-3351), but no one answers. I also wrote them a letter, but I have yet to receive a response."

**Deletions**

- CO Durango K228CM 93.5—because of deletion of primary station (last month, p. 2, col. 3)
- KS Hutchinson KIMS \*91.7
- WI New Holstein KFKQ 92.9
- "FM Atlas is great! M. DeL, Auburndale MA
- FMistakes, FMedia!
- AZ Window Rock (not "Winslow") KWIM 102.7, Dec., p. 3, col. 1
- GA Atlanta WZGC 92.9 still op, not "rm," Jan.

p. 2, col. 1. Heard there is the Greaseman, Doug Tracht, saying his act isn't as abrasive as

It once was. [See also under "Formats," above, NY WXRK.]  
 GA Dalton WYU 104.5 U-104.5, not "U-104," Jan. p. 2, col. 1  
 MI Detroit—the Penobscot Building's name misspelled, Jan. p. 1, col. 3 under WDET Detroit. I should have known how to spell it.

**DIRECTORIES IN PRINT**

**835 Penobscot Bldg. • Detroit, MI**

having been in the building to visit WJLB 97.9 in 1994.  
 PA New Castle \*90.1 calls are WVMN, not "WYMN," Sept., p. 2, col. 1.  
 WA Clarkston KNWV is on \*90.5, not 90.7, Dec., p. 3, col. 2.  
 WA Winlock 95.1 calls are KITI-FM (not "KITI"), Dec., p. 2, col. 3. KITI AM is in Chehalis WA.  
 BC Victoria \*100.3 The Q is CKKQ, not CKKS, Dec., p. 3, col. 3. "CKKS is in Vancouver." Several people noticed this error.  
 WA Dishman 106.5—"I think should be KWOM, not KWQL... at least that's what they always announce." FCC, however, lists it as KWQL.  
 PE Charlottetown CIMN \*90.3 add \* Oct., p. 1, col. 2.

CANADA—the CBC has cut \$227 million, with an expected job loss of 2000 in the next two years (20 laid off immediately), in both radio and TV. Three of the jobs cut are in the SRC (French), and five were to have been laid off in Charlottetown. Of the \$227 million cut, \$93 million was to be at CBC's Ottawa headquarters, affecting 260 out of 470 total jobs. The brass are feeling it, too. Five of 14 CBC vice-presidents are to be axed. The CBC head office at 1500 Bronson is to be put up for sale; remaining home office staff to be moved to other locations. Engineering was also hit, losing 35 positions to bring its workforce to 210, and it faces having to lose another 70 positions. The department hopes to "outsource" the building of capital projects, thus allowing it to maintain staff levels in planning and day-to-day operations, according to James Careless, writing in "Broadcast Technology" magazine.

Ted Rogers, Rogers Broadcasting, spoke in Toronto and said Canada has too many radio stations. He called for relaxed rules to allow one owner up to two FMs and two AMs in a single market. [This already happens in Windsor, but that is an exception; Windsor stations have been hurt by so much competition coming in from Detroit.] Rogers helped make a recent rules change to allow foreign ownership at one-third, rather than 20 percent, for broadcast stations in Canada. Canadians, however, must retain control of the stations.

**NonIDs, Not Just Slogans**

*Mentioned usually without call letters; "strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*

AL Alexander City WSTH 106.1 Kix 106 (from "South 106")  
 GA Columbus WCGQ 107.3 uses calls, turning off "Lite 107.3"  
 KS Horton KERE-FM 93.7 Care Radio

 MN St. James KXAC 100.5 with Mankato-Jackson-Fairmont

**Selected AM Happenings**

AL Huntsville 1000 now WDJL, but formerly WTAK: "I miss WTAK 1000's unique sign off announcement, 'We now say goodbye, and yield our frequency to the Yankees (as 'Dixie' plays) and our friends? [long pause] Hey, Gringo' to the south. . . 'now superseded by their move to 106.1 FM'" [Hartsell AL].  
 AZ Bullhead City KBAS 1490 fined \$4000 for violating FCC anti-lottery rules in carrying ads for a slot machine tournament. The FCC disagreed that playing slot machines was a game of skill or a sport. The law firm of Haley, Bader & Potts advised stations that FCC rules generally forbid the broadcast of any material promoting lotteries.  
 CT Torrington WSWG 610 "silent pending sale" to WZBG 97.3 Litchfield.  
 GA Savannah WSGA 1400, WIZA 1450 silent. WSGA suffered flood damage and was taken off the air.  
 GA Waycross WACL 570 silent. Land on which its towers sit was sold.  
 IN Muncie WERK 990 to return to air next month with news-talk  
 KY Hardinsburg WHIC 1520 silent  
 LA Bayou Vista KDLP 1170 reported silent;  
 KQKI 95.3 still on, which the AM simulcasted.  
 MA Boston WBZ 1030's general manager Ed Goldman received a big promotion—to vice president of CBS AM stations, "meaning he will head all 18 of the AM signals nationwide and also oversee any [monophonic] FM operations with a talk-news-sports format."  
 MI Grand Rapids: "I did some dial-scanning on AM recently and noted how the once-clear channels have been completely obliterated. For example: WABC 770 is no longer listenable here much of the time at night. They are torn to shreds most nights by WYNN in Alabama. Likewise, WSB on 750, is killed by a Canadian station. Every morning WGN 720 and WBBM 780 are unlistenable due to interference from other stations prior to sunrise. I am within the supposedly 'protected' 0.5 mv/m contour of those stations. The FCC has now insured that no AM station, even the 50-kilowatt ones, can cover more than a sliver of area. Having destroyed AM totally, the Wise Ones at the Commission have

now decided it's FM's turn." [See comments by Phil Boersma in FMusings about WBCT 93.7 Grand Rapids.]  
 MN Minneapolis WMNN 1330—the commercial station owned by MN Public Radio—received the go-ahead from the Savage MN city council to build three 120-m towers in a valley, across from the Minnesota Masonic Home in Bloomington. The settlement requires MPR to pay for a long-term study on the effect on birds by the towers, and stunned officials at the Masonic Home, who accused MPR of a "back-door arrangement. . . We could file a countersuit, but that would be time-consuming and costly, and we're in the business of taking care of senior citizens," said Ed Martini, the home's president. The new towers would replace three existing ones on St. Paul's west side and improve WMNN's signal in the south metro.  
 NC Mebane WGSB 1060 silent  
 PA New Kensington WGBN 1150 silent; fire destroyed its studios, but supposed to be moving to new studios soon.  
 SC Belton WHPB 1390 silent; had been gospel VA Rocky Mount WFYN 1290 silent; tower has been sold and "it will not be back."  
 WA Oak Harbor KJTT 1110 silent  
 WA Olympia KCPL 920 silent  
 AB Edmonton CFRN 1260 and Calgary CKMX, "Mix 100," are simulcasting CFRN's adult standards/nostalgia programming, except for mornings when Howard Langdale is heard in Calgary and Bob Arnold in Edmonton.  
 BC Trail CJAT 610 continues on the air; it was to have been replaced by the FM (95.7) about a year ago. "The AM is never identified."  
 BC Vancouver CKWX 1130, a 50 kw powerhouse, is dropping its long-running traditional country for all-news this month. "WX has had its listener base steadily erode since CJJR 'JR Country 93.7' signed on. I'm sure it also couldn't help that country KMPS-FM 94.1 and KYCW 'Young Country' 96.5 Seattle are both carried on Southwest BC Cable Services."  
 NS Sydney CHER 950 laid off all 15 employees, but they'll be allowed to apply for temporary jobs under new ownership. The CRTC refused the bankrupt station to be sold to CKPE 94.9-AM, but then agreed to let locally-owned BAC Holdings run it. BAC plans to hire staff on an interim basis, pending CRTC approval, then go for an FM frequency. . . "tightening up with less [sic] workers. We're going for a whole new sound and approach." Competitor Don Brown of CKPE, "a true gentleman in the broadcast industry, appeared in a CBC-TV documentary in December passionately arguing the case for live voices and community spirit in radio."  
 EUROPE—the Voice of America canceled English shortwave broadcasts to Europe. "Budget cuts and the availability of medium wave and FM made Europe most expendable." Shortwave station WVHA in Maine, which beams Prophecy Countdown from an offshoot group known as "Historic Seventh-day Adventists," by John Osborne, of the Rolling Hills FL "SDA church" in the Orlando area, is behind in payments to purchase the station, formerly known as WCSN. It has appealed repeatedly on air for funds, reduced power to one half, cut back hours, and may have to be put on the market if the loan can't be paid off. It did, however, receive a federal tax exemption, but is fighting with township officials over a local tax exemption, according to "Monitoring Times" magazine. I heard Glenn Hauser say on his shortwave program, "World of Radio": "I have no opinion as to whether or not Adventists should be historic." The distinction between the mainstream church and Osborne's is that he relies more on the writings of early church leader and writer Ellena G. White, he receives money directly and keeps it rather than it going to the local "conference," from which pastor's salaries, are paid, and his credentials as a pastor in the denomination have been questioned.

**Three Cheers for the FCC and the Courts For Limiting Indecency on FM**

The Federal Communications Commission has to be commended in the face of almost universal criticism by the media for its tenacity in fighting broadcast indecency and pornography. Lest the Howard Sterns and their ilk think they can impose their brands of indecent speech on Americans who deserve better—even though we don't always know what is "good" for us—the FCC has come to the rescue in a way found recently to be 100 percent all-American Supreme Court-sanctioned. If you have not read the news, the Supreme Court left intact a federal appeals court ruling that upheld government limits on indecent speech during the hours of 6 a.m. to 10 p.m. Those are the times, for example, when Howard Stern's show is heard in most markets.

FMedial in this instance, supports government intervention into the private lives of broadcasters, who are licensed to serve the public interest, convenience and necessity. Broadcasters often forget who they are licensed to serve, encouraging foul-mouthed DJs—principally because such announcers often command impressive ratings, which provides an environment for results-getting advertising.

It is not just children who are being protected by a paternalistic FCC, but all caring adults. Perhaps the James Quellos of the FCC can recall the days when FM stations programmed "good" music, informative talk, and championed the highest quality audio to match the best home music systems. We cannot go back to those days, of course, but despite the deregulation fever that has swept the broadcast industry, the Supreme Court may have handed the public a victory—albeit limited to the area of broadcast (or cable, or Internet) indecency. Broadcasters, evermore bent on acquiring duopolies and to focus on the bottom line, will have to pay more attention to their responsibilities as servers of the public. This includes their having to be cognizant of the standards of the marketplace when it comes to what the air talent can say or not say. If management refuses to define the parameters of what is decent or indecent speech on a station, then it is inviting government to come in and run its business for them. It's an ironic scenario, but one that a small number of broadcasters have brought upon themselves, much to the discredit of the majority of stations, commercial and public, which are truly responsible.

**Company Proposes Nationwide Allocation of 87.9 mhz for Emergency Warnings**

Federal Signal Corporation of University Park IL will soon request the FCC to allocate the unused 87.9 mhz frequency nationwide for use by low power emergen-

cy warning transmitters. Federal Signal specializes in the development and manufacture of warning equipment and systems. The company hopes to expand its product line to include radio transmitters to be mounted on emergency vehicles, at construction sites and in school buses—in residential neighborhoods and elsewhere.

Their plan requires low power transmitters to broadcast audio messages, plus an RBDS data stream to control nearby radios to tune in the 87.9 channel. According to Federal Signal, the low power and very localized nature of the transmitters would cause only minimal interference to other stations. The NAB, however, points out that there are numerous emergency vehicles, construction sites and school buses throughout metropolitan areas that could cause constant interruptions to radio listeners. "If these interruptions were to occur in the middle of favorite songs, exciting parts of sporting events, or other particularly interesting programs they could have a significantly cumulative negative impact on radio listenership," the NAB asserts. Also, television broadcasters would be affected since 87.9 is only 150 kHz above the aural center frequency of TV channel 6. Interference to TV sets would be unlikely in road-based applications, such as when broadcasting from an ambulance, but Federal Signal has proposed a wider-coverage version of the 87.9 signal for covering entire communities, if necessary. The California Highway Patrol (CHP) has expressed an interest in passing a state law requiring all radio receivers to work with a system such as Federal Signal's. Broadcasters concerned about this proposal can call Dave Wilson, NAB Science and Technology, (202) 429-5345 or FAX (202) 775-4981.

**Small-Print Happenings and FM Industry News**

The telecommunications bill is expected to pass by the time you read this. What controls, if any, it has on radio station ownerships, both local and national, will be known later. NAB Chairman Eddie Fritts had urged broadcasters to reaffirm their commitment to the bill.

Secret Communications begins an LMA with KTBZ 107.5 Lake Jackson TX, and will pay \$27 million for the station, but only if Chancellor's purchase of Shamrock Broadcasting closes. Infinity, in a \$275 million deal, gets Alliance Broadcasting properties including KFRC-FM 99.7-AM and KYCY 93.3 San Francisco, KYNG 105.3 Dallas, KSNN 94.9 Arlington TX, WYCD 99.5 Detroit and KYCW 96.5 Seattle.

Forever Broadcasting, owned by Kristen Cantrell, is buying WCIZ 97.5-AM Watertown NY for \$2.8 million. Also included is an interest in WGGG 102.7 Cape Vincent NY. Forever is also buying WLZW 98.7 Utica NY. Bendat Communications of Albany has merged the programming of WKLI 100.9 Albany with WKBE 100.3 Warrensburg. Bendat already owns WEMX 94.5 Ravenna-Albany and WOUR 96.9-AM Utica.

NY's Governor George Pataki is attacking WAMC \*90.3 Albany. First, he refused to be a guest on former Gov. Mario Cuomo's talk program. Then he carefully crafted a budget bill that would deny state funding to only two public stations—WAMC and WNYC-FM \*93.9-AM New York. Those happen to be the only two metro

areas in the state that voted for Cuomo. Alan Chartock of WAMC said a cut in state funding would clip \$54,000 from the station's \$2.7 million budget. Listeners would probably more than make up the difference. The "Berkshire Eagle" editorialized in favor of WAMC: "Governor Pataki, like many Republicans, has a problem with public radio and television because of its 'elitism'—read perceived 'liberal bias'. In truth, public broadcasting provides the kind of objective, issue-oriented hard news that commercial broadcasting, which has generally gone soft and inoffensive to attract and appease advertisers, rarely offends anyone. . . The larger issue is Mr. Pataki's small-minded politics of vindictiveness. True conservatives, who by definition deplore government intrusiveness, should object to Mr. Pataki's effort to use the power of his office to settle a score, at the expense of WAMC's listeners."

WZPK 103.7 Berlin NH, which gets into Portland ME, is being bought by Fuller-Jeffrey to go along with WBLM 102.9 Portland and WBYY 94.3 Biddeford, as well as WCYI 93.9 Lewiston ME.

KSON-FM 97.3-AM San Diego being paired with KIFM 98.1 there in a \$29 million deal under the Jefferson-Pilot umbrella.

The NAB and the Broadcast Education Association will conduct a joint "Broadcast Career Fair" at the upcoming NAB and BEA in Las Vegas, Apr. 14 from 9 a.m. to 5 p.m. Stations seeking employees, as well as job seekers, can call (202) 429-5498 for more information.

Although many broadcasters had hoped the FCC's indecency rules would be thrown out by the Supreme Court, the court ruled otherwise. FCC Chairman Reed Hundt says the court's ruling was "A big win for the FCC."

Mike Knitter's "The FM Journal," a comprehensive log of FM stations and translators, is out in its 1996 edition. It provides geographical coordinates and station addresses. It runs just over 400 pages, and includes a reference to my "FM Atlas." For information on getting Knitter's "FM Journal," which has three holes in each page drilled to fit a binder, write PO Box 24, Cambridge WI 53523-0024. Another reference, to TV, translators and LPTVs is also on full size sheets for fitting in a binder—the "USA TV Database" 1995 edition. That's where I look up call letters for translators, and the stations are all given by channel. Includes most of the stations of Canada and Mexico; \$16.95 check or money order to TV Database, % Doug Smith, 1385 Old Clarksville Pike, Pleasant View TN 37146-8098. Canadians send \$26.90 postpaid. The M Street Radio Directories have been delayed until later this month, rather than being ready by late December. Therefore, the same discount price of \$39 plus \$5 shipping holds [see Dec., p. 8, col. 2.]

In March, the FCC requested comments in a rulemaking to determine what, if any, modifications should be made to the comparative criteria for new noncommercial stations. Both the National Federation of Community Broadcasters and National Religious Broadcasters filed comments. Almost a year later, the FCC has yet to decide on the matter. The delay has left several noncommercial, educational FM frequencies undecided. The situation could get worse—for both noncommercial and commercial—applicants if a proposal by Sen. John McCain (R-AZ) is acted on. That proposal would require auctioning all broadcast spectrum not currently assigned. The problem is that the Commission has other matters before it, and criteria for selecting among competing noncommercial applicants is not a high priority.

A new program produced at public station WGBH \*89.7 Boston along with the BBC is "The World," aired in Boston 4-5 p.m. weekdays. It is more international in scope than "All Things Considered," and so far has been pedaled to KUSC \*91.5 Los Angeles, KCRW \*89.9 Santa Monica, KERA-FM \*90.1 Dallas, WCPN \*90.3 Cleveland, KUOW \*94.9 Seattle, WNEF-FM

\*94.5 Buffalo and WICN \*90.5 Worcester, as well as WNYC (FM or AM—it doesn't say) NYC. To entice stations to pick up the show, the producers are offering it free of charge for the first 12 months.

Larry Weil sent a Boston Globe article about the changing face of public radio there. Instead of WGBH, it's now WBUR \*90.9 that's the leader. WBUR has an audience of 415,000 compared to WGBH's 337,000. WBUR has a budget of \$6.6 million, while WGBH's is \$7.2 million. Back in 1979 WBUR was a poor station with a budget of only \$200,000 and a mere 20 employees. Under manager Jane Christo, WBUR has grown to 103 employees, 62 in news. During some dayparts, notably afternoon drive, WBUR has a larger audience than any Boston commercial station, FM or AM. It ranks second only to WNYC-FM \*93.9 New York in ratings among the nation's 580 public radio stations. "After soliciting funding from listeners on the basis that they are 'voting' for their favorite programs, they say in the article the only thing that really matters is the corporate contributions," said Weil. And, immediately after the announcement of Israel's Prime Minister Rabin's death, WBUR went into a pledge break, saying that only if they completed that part of the pledge drive would they continue "All Things Considered." "Such insensitivity is unbelievable!"

Hawaiian music's now being syndicated to the mainland via Hal Hodgson's "Ports of Paradise." There are six minutes of spots in each one hour weekly program. Information from (800) 223-2564.

Launch of the BBC's digital audio broadcasting service in the L-band is drawing skepticism, despite its clear sound without multipath interference. Problem, according to "The Financial Times," is that there are only 30 digital receivers in all of England. That newspaper speculates that that situation is not likely to change in the near future. "Manufacturers are skeptical about the potential of digital radio," claiming the quality of existing FM broadcasts are so high that consumers may not want to spend the money to upgrade their radios.

FCC updates its FAX services of notices? Call (202) 418-2830 from the phone on your FAX machine, and listen to the announcements. The documents, according to Doug Smith, TV Database publisher, are numbered 4103-4112. "Public notices will be automatically faxed to you," he says.

Dr. John Major reports that the University of Tulsa may apply for a second station—al classical. Frequency would be 88.7, to go with its KWGS \*89.5.

The Milwaukee SBE newsletter says \*WMVS/WMMV (TV) is commissioning TowerCom Ltd. of Fort Lauderdale FL to "design, finance, build and operate a new tower and technical center here in Milwaukee. The site will be the antenna farm north of Capitol Drive and Humboldt Ave. WMVS/WMMV hopes to attract other broadcast stations to help pay the cost of the project, which is hoped to be up and running within a year of the signing of the final contract."

That newsletter says the Federal Emergency Management Agency has discontinued the EANS, Emergency Action Notification System, which had notified stations of EBS alerts by teletype. According to Gary Timm of WKTI 94.5 Milwaukee this means that the national EBS will be activated only via the PEP, "Primary Entry Point" AM stations. Broadcasters in WI will have to DX to find those stations, since the nearest are WLS 890 Chicago and WCCO 830 Minneapolis. How moribund! The NAB, however, successfully urged the FCC to extend the deadline for broadcasters to purchase new EAS equipment to

Jan. 1, 1997. It also convinced the FCC to allow

them to use a shorter script. New EAS equipment, to replace the current EBS, is expected to cost each station \$1500 to \$2500.

The FCC didn't want to move to smaller quarters, but with government downsizing all over Washington, that might be just what'll happen. After seven years of wrangling, the FCC has agreed to move to the Portal's Project in S.W. Washington. The Commission resisted moving, saying there is not room for its 1800 employees. Construction at the new site is scheduled to start next month; the FCC is expected to pay about \$17 million per year rent.

Budget shortfalls might cause the FCC to stop granting some types of licenses. Chairman Hundt says the \$166 million Congress has allocated "won't work."

"Radio World," Feb. 7 issue had an item about how Gerry Turro's "Jukebox Radio," uses WJUX 99.7, a monophonic big-bands' Class A in Monticello NY, to feed programming to W276-AQ 103.1 Fort Lee NJ via W232AL 94.3 Pomona NY. "Critics of Turro's operation say that translator is the real reason for the existence of Jukebox Radio," with the service in Monticello, 95 km north, irrelevant. The article says FCC rules dictate that radio stations operate in the public interest. In the case of Jukebox Radio, the FCC may have to decide if its own rules are in the public interest or are merely serving to protect the interests of broadcasters. [See also last month, p. 2, col. 3.]

Bob Doll wrote back, saying his new book about radio, "Sparks Out of the Plowed Ground," can be purchased at \$29.95 plus \$3.95 shipping, not from him, but from Streamline Press, 224 Datura St., Ste. 718, West Palm Beach FL 33401-9601; (800) 226-7857. [Ref. last month, p. 7, col. 1.]

A new indoor antenna, The MegaWave, was reviewed in "Broadcast Engineering" magazine; it's in both FM radio and TV versions, an outgrowth of the NAB, which wanted an antenna

that worked better and looked nicer than "rabbit ears." For more information, it is on the World Wide Web at <http://www.megawave.com>.

In the CRTC's rules

for digital audio broadcasting, stations won't be allowed coverage that exceeds the .5 mv/m contour for either FM or AM. If a station is early on the DABands there's no assurance it can stay. The CRTC says stations will have to apply for a regular licence once a digital radio policy is in effect.

Canadian obituaries from the pages of "Broadcast Technology": J. Arthur Manning, founder of CKTO 100.9-AM Truro NS, at 78. He was the first in Canada to install an automated traffic system and the first to install a computer at a station. J. P. McCarthy of WJR Detroit, 62, of a rare blood disorder. His voice was widely heard; 29 Detroit and Windsor stations observed a minute of silence for him Aug. 18. Mike Goetze, "an old-style, irascible but much-liked news director [who] supervised the building of CKRA [96.3 Edmonton]" of a heart attack.

Rock 95 Barrie, CFJB 95.7, has a presence in Russia through a subsidiary known as International Broadcasting and Communications, Inc. The first project is upgrading the existing 200-watt transmitter of "POK/105" (or "Rock 105") in St. Petersburg to 5 kw. It had been broadcasting the Voice of America, but will have its own adult contemporary format in Russian. St. Petersburg only has about six radio stations, most with English spoken word and adult contemporary. CFJB's Doug Bingley believes many Russians want to see that change, saying, "We see enormous opportunities in the Russian market for future growth that simply does not exist anywhere else in the world."

Mono WYPL \*89.3 Memphis, which serves the print handicapped with its main carrier programming, has a new show for radio enthusiasts. The show encompasses both amateur radio and radio listening in general. *Airwaves* uses a

program formerly carried by an amateur radio web in California, modified to appeal to the general audience in Memphis. "We designed the show to have a Memphis flair as well as a national flair. When we started talking to people at conventions about what they wanted in a radio show, the excitement grew so much that we had stations lining up to take the show before we even started production. . . . So we knew that we would have a national audience before we even put the show into production," says WYPL's Steve Terry. The first half of the program is for ham radio operators—5000 in Memphis alone and 800,000 nationally—and the last half is about broadcast radio. Latter includes events in the broadcast industry, a contemporary radio article and a nostalgic radio article. "We have broadcast people read the broadcast stories and ham radio operators reading the stories about amateur radio," said Terry. For more information about *Airwaves*, contact Mike Porter, (901) 725-8833; or write WYPL at 1850 Peabody Ave., Memphis TN 38104.

WBCL \*90.3 Fort Wayne celebrates 20 years on the air, with a two-day Shroton expected to raise \$750,000 for the 1996 budget. Fall 1993 Arbitrons gave WBCL first in the nation among noncommercial Christian stations for the highest percentage of listening in a radio market. A recent promotion for Angel Tree, a prison fellowship, resulted in the public sending in 6000 gifts. The purpose of the project was to provide Christmas gifts for children of prisoners. Gifts went to families as far away as Chicago.

Portland's KINK 101.9-AM, owned by Embarcadero Media of Los Angeles, are for sale. Reports are that Seattle-based Fisher Broadcasting, owner of KATU-2 there, is about to buy KWJJ 99.5 for \$35 million. And rumors are that KUFO 101.1-AM are about to be sold to an unannounced party by Henry Broadcasting for \$41 million, writes Pete Schulberg in the "Oregonian."

I attended part of the Midwestern Broadcasters Conference in Bloomington MN last month. It was disappointing that Roy Stewart of the FCC's Mass Media Bureau was not there as scheduled. The recent government shutdown had left him with a backlog of work, and he was not able to travel. Beverly Baker, with the field operations bureau of the FCC, talked about FCC mock inspections, now being done with the cooperation of broadcast associations in eight states. In such an inspection, life and safety matters come first. I attended sessions on radio station home pages on the Internet and how to utilize the FCC's new rules permitting unattended operation. From the latter, however, I came away with the impression that stations, such as KISD 98.7 Pipestone, like to lock up at 5 p.m. and let automation take over. It's legal, since an emergency receiver is at the owner's and engineer's home and tornado information can be broadcast live, using something as crude as placing a telephone in front of the emergency radio's speaker. A heartless piece of literature passed out showed how a station can load up its cart machine or digital player, lock the door and walk away, making lots of money, and fire staff.

KKLA 99.5 Los Angeles in early December became the first Christian radio station on the Internet with its own home page, with programs heard live. It can be found at <http://kkla.com>.

From the classifieds: Pro 2006 scanners—seven brand new units found in Radio Shack international warehouse, the last of the classic scanners, \$475 each, (810) 807-9016. I offer two of them fully modified at \$470 plus \$11 shipping, imported from Canada, 1-800-605-2219; also a new, free print catalog.

Wanted G-E Superadio II, model 7-2885. Willing to trade a SR III, 7-2887. Victor A. Leavery, 536 Webb St., Clayton NY 13624-1229; (315) 686-4930.

Looking for small FM N.E. or S.E. for under \$60,000. M. Celenza, 64 Belmont Ave., Plainville NY 11803. Wants to buy small FM, no combos, dark OK, preferably in S.W., R. Mickie, CMS, 131 Fairview Ave., Ponca City OK 74601.

KOPN \*89.5 Columbia MO seeks a g.m. to replace Brian Mann, who becomes a househus-

band. New person should help the station grow. Contact Mann at (314) 874-5676 by Feb. 15.

Morning announcer plus an operations manager for stations with expansion plans. These people will probably replace Jeff Carlson (last month, p. 6, col. 2). Ministry minded people with experience, Dir. of Personnel, WBCL, Taylor University, 1025 W. Rudisill Blvd., Fort Wayne IN 46807.

FM FORUM

CONTRIBUTIONS FROM READERS

Windsor stations CIMX 88.7 and CIDR 93.9, normally unable to afford Detroit TV advertising, have taken advantage of their duopoly to advertise together, says James J. Nahirniak. "Each uses 15 seconds of a 30" spot. Sometimes the two ads are back-to-back; sometimes they are split up by another ad."

Country leader WBCT 93.7 Grand Rapids did a fund raiser to help stop child abuse, engineered by on-air personality Neal Dionne. He stayed on the roof of Rogers Plaza for six days and five nights last fall as part of the "B-93 Roofsit." Listeners came through and pledged over half a million dollars for the Michigan Children's Trust Fund.

MI's Phil Boersma found the Jan. FMedial "very interesting. One thing that really made my jaw drop was the allocation and application for 93.7A allocated to Frankenmuth MI. If and when this station is built, its city of license will be within the 50 microvolts/meter contour of WBCT. The idiocy of this is caused by WBCT's 'grandfathered' superpower, whereby the FCC considers it a Class B even though it is operating at 320,000 watts. Never mind that if WBCT actually were limited to a Class B ERP—about 50 kw—it would not cover its city of license with a 'city contour' (3.16 mv/m) from its transmitter site at Gun Lake MI. Some moron at the FCC apparently looked at WBCT as a Class B, with transmitter 40 km south of G.R. and thought, 'Yeah, Frankenmuth is far enough away for a Class A on 93.7'. If WBCT were a Class B, its transmitter would be closer to G.R. and Frankenmuth would then be too short-spaced for 93.7A to work anyway! WBCT probably won't suffer much from the new Class A, but the Frankenmuth station will likely be inaudible even in parts of its 'primary grade' (1.0 mv/m) contour. The FCC's moronic, reflexive habit of cramming in stations even where they don't fit continues. Imagine how Frankenmuth will get buried when 'tropo' is up."

"Congratulations on settling the 92.1 situation!" writes Doug Smith of the agreement that saw me back out of contention for Hermantown MN, and the grant to Harbor Broadcasting. "I suppose there's a certain disappointment in not being able to put the station on yourself after successfully landing the allocation, but it must also be a good feeling to realize you had so much to do with getting the new facility started. A co-worker at my previous job in Wisconsin was responsible for the allocation of 105.5A to Verona WI,

intending to run a contemporary Christian format. He landed in the same situation you did, having to settle with other applicants with more resources. The station is now WMMM-FM." I am not sure Harbor Broadcastig has more resources than I; neither of us wanted an expensive and time-consuming legal battle with nobody using the frequency in the meantime.

Smith writes and says the skip reception Dec. 25-28 was outstanding, 10+ hours of TV skip into the Nashville area each day, and at least a bit of FM skip each day. He received KTHQ 92.5 Eagar AZ in \$[tereo] and KVWM-FM 93.5 Show Low AZ. "Unfortunately, KVWM-FM was in for too short a period to determine whether they may have embraced stereo," and on the 28th he heard XHRC 91.7 Puebla PU.

The government's recent shutdown caused a lack of FCC news, including no rulemaking activity. Before the shutdown occurred, the FCC made plans for marketplace forces to reduce interference caused to consumer electronics devices. The Milwaukee SBE newsletter says the plan calls for private repair shops to fix problems in the field. Either the shop would repair the equipment causing interference or, in case of violation of FCC rules, refer the case to the FCC for action. Parties contacting the FCC about interference are asked to work together for a solution.

The story above (p. 7, col. 1) about CFJB Barrie forging a relationship with a Russian company in St. Petersburg should mention that CFJB Pres. Doug Bingley is being helped by the Canadian government for some of his travel expenses through its Renaissance Eastern Europe Program. "When you look at doing business in Russia these days, it's kind of like the Wild West. There are some negative connotations to that, but there are also some very positive ones. The saying in business is to buy low and sell high, and you can't get much lower than Russia right now. I can't think of anywhere with more up-side potential," Bingley said.

DJ/prankster Pierre Brassard of CKOI 96.9 Verdun PQ (changing to QC, they tell me) called Queen Elizabeth at Buckingham Palace, convincing her he was Canadian Prime Minister Pierre Chretien. The call was later broadcast on CKOI. He said he needed her help to make sure Quebec wouldn't vote in favor of secession. The Queen said she'd be glad to help in any way she could. Others fooled by Brassard included Pope John Paul II, former actress Brigitte Bardot, and Haitian Pres. Jean Bertrand-Aristide.

Mike in Batavia IL's been listening to three area classical stations, WNIU \*89.5, WNIB 97.1 and WFMT 98.7, and NPR-WBEZ. "And my AM interest has been WJJD. Also, I found a very interesting book, "Playing in the FM Band," which is

a personal account of free radio in the late 1960s-early '70s at WBAI \*99.5 New York. It was written by Steve Post, who worked there 1964-71. He spoke of the station's forum on free speech, the constant financial problems and the transmitter on the Empire State Building being vandalized, supposedly by a young engineer. Excellent reading for all radio interests."

E. Patrick Roberson of Portland OR took a trip to Reno and had a good chance to tune in FM and AM. "I noticed that several Portland FM stations have good signals to the south. Along the Oregon coast at Coos Bay-North Bend we were able to listen to KGON, KUPL, KKRZ, KINK and especially strong was KKRH. KINK would fade out in the evening and morning hours being replaced by KCMX-FM 101.9 Ashland. KCMX-FM really raises havoc with KINK in southern Oregon and just reading in FMedial that KCMX-FM is moving their antenna to 1314 m should really cause KINK some problems to the south. From Coos Bay we went to Roseburg. On the way, we were able to receive KRED 92.3 Eureka CA strongly over KGON. Near Roseburg KGON took control. . . We were still able to receive KGON, KKRZ, KUFO and KKRH until we got into the mountains north of Grants Pass. The mountains are the main dividing line as KKRZ was replaced by KRWQ and KKRH was replaced by KROG, and KGON and KUFO just faded out. The station that surprised me was KKCW 103.3. Couldn't receive KKCW anywhere south of Eugene. Since KKCW doesn't share the frequency with any station in southern Oregon, they should have had one of the strongest signals to the south. . . Most of the stations in smaller towns use satellite services rather than local programming."

An LMA-type agreement would place NPR programming on KQAL \*89.5 Winona MN in return for KQAL's carrying WLSU \*88.9 La Crosse WI's fund raising drives. For doing that, KQAL would receive 25 percent of the money raised in the Winona area.

Rod O'Connor sent a wire story on KSUA 103.9 Fairbanks AK possibly moving to the educational band so a second commercial FM station owned by KWLF 98.1/Borealis Broadcasting could come in, while Northern Television/KXLR 95.9 also wants to add a second FM station. The market of 80,000 already has 10 stations. Terry Walley, president of Borealis Broadcasting, says the competition makes it essential to own multiple station to generate enough revenue. They would thus be better able to compete with Comco's KAKQ-FM 101.1 and KIAK-FM 102.5.

In Atlanta, the syndicated Tom Joyner Show joins WALR-FM 104.7, in a move to better compete with WVEE 103.3. WVEE continues as the market's No. 1 station, with considerably more listeners than WHTA 97.5 and WALR-FM. Joyner's

show, from 6 to 10 a.m., competes with Mike Roberts and Carol Blackmon. WHTA claims not to have taken so much audience away from WVEE as to have caused a rise in the percentage of African-Americans listening to radio.

John Burton sent an article from the NY Times mentioning how "enhanced underwriting" on public broadcasting is taking on a more commercial flair. Increasingly, public radio announcements are being dressed up with corporate jingles and toll-free numbers. "We go ahead and push the envelope a little," said Doug Myrland, g.m., KPBS \*89.5 San Diego. With longer credits and corporate theme music, Myrland's station has more than doubled its underwriting earnings in a year. Some, like Sen. Hank Brown (R-CO), would like to change the law to allow public stations to accept commercials, and some public stations say they're willing to give it a try. KERA-FM \*90.1 Dallas is "experimenting," carrying on-air promotions for the Public Radio Music Source, with a percentage of CD sales going to the stations. Accepting commercials, NPR insists, would radically alter public radio's mission and undermine listener and foundation support. A CPB study found that accepting commercials would be a "net money loser" for public stations because of added production costs, taxes and the loss of listener support.

Another NY Times article, sent by Malcolm Kaufman, gives publicity to Stephen Dunifer of Radio Free Berkeley, and how he's been supplying transmitters to rebels in Mexico and Central America. The FCC is concerned that publicity about Dunifer is causing a proliferation of pirate stations in the U.S. Dunifer, however, says that, "We're demonstrating that every community in this country can have a voice for a thousand dollars, maybe two thousand dollars tops," he said. "And the only thing standing in the way of this is the FCC itself. I don't think trying to shut me up with an injunction is going to stop this movement."

Dave Jackway of SCS Radio Technology in MO (1-800-944-0630) mentioned that Radio Shack is in the SCS business, selling Ramsey kits, including an SCS adapter using the ancient 565 IChip, which requires 9-12 volts DC for power.

Christopher Kellogg in the Chicago area, owner of several high-end FM tuners, told me of the Pioneer "Elite" series F-93 tuner at about \$750. It features 40 db adjacent channel selectivity, does not overload in the presence of strong signals like some other high-end tuners, and fine tuning can be done in .001 mhz steps, such as from 92.000 to 92.011-92.012. I forget how many presets it has, but it gets AM as well, and has long L-E-D lights for signal strength that permit easy rotating of an antenna. Audio Consultants, Evanston IL, is one of the dealers. Ask for Simon the owner. Ur. til March, *Bruce Elverson*

NY Lake Success 103.5 WKTU (WYNY), "KTU"  
(from "Y-103.5"), sr format, "dance/CHR."

On WYNY's last day of  
country, Feb. 4, the  
deejays chatted infor-  
mally about their experi-  
ences at the station.  
The group included  
NYC radio veteran Dan-  
dy Dan Daniel, who was  
heard crying. Also on the program was the  
mayor's wife Donna Hanover Giuliani, a  
former WYNY personality.  
Before switching to dance Feb. 10, it  
simulcasted other Evergreen-owned stations,  
including WRCX 103.5 Chicago with Mancow  
Muller, KKBT 92.3 Los Angeles, WLUP 97.9  
Chicago, KIOI 101.3 San Francisco and WXKS-

FM 107.9 Medford MA. During that period  
they'd say, "We interrupt this program to say  
you're listening to WYNY Lake Success-New  
York undergoing a transformation. Don't adjust  
your dial—it won't help!" From late Feb. 8 to the  
morning of Feb. 10 "all 103.5 had on was  
continuous beeps, similar to a heart beat monitor  
at a hospital. Very annoying!" The change is to  
hearken back to NY's original disco station,  
WKTU 92.3 of the late '70s. The simulcasts of  
out-of-town stations helped spotlight to New  
York ad agencies how various Evergreen stations  
from around the country sound. About Mancow's  
one-day NY stint, NY Post radio-TV editor  
Adam Buckman wrote: "Evergreen, your faces  
should be ever-red, because you blew it. You  
made a mistake thinking this is the kind of city  
that would welcome a cockroach like Mancow. .  
. New Yorkers can spot an imposter a kilometer  
away. Love him or loathe him, Howard Stern is  
the genuine article whom punks like Muller  
blatantly rip off, then taunt." Another observer:  
"I agree. Only a moron would choose Mancow's  
show over Howard's."

Radio World newspaper said WLUP's Jon-  
athan Brandmeier talked about suing Evergreen  
for \$8 billion because of not getting more money  
for being heard in NY. Morning man Matt Seigel  
on WXKS-FM went farther, mentioning money,  
and then said, "never mind the extra pay. Why  
don't you just restore the benefits you cut when  
you bought the station?" Latter was in reference  
to Evergreen's recent purchase of the Boston-area  
station. The NY market loses country as an FM  
format. "Though WYNY was the most popular  
country station in the country, its ratings in the  
competitive Manhattan market were relatively  
low, with 20 other stations attracting a greater  
percentage of listeners," according to Arbitron,  
as reported in the NY Times.

**Stereo—or to Be Stereo**

AL Rogersville WFIX 93.9, gr  
 IA Fairfield KHOE \*90.5, e, with "non-stop east  
 Indian chanting music. I haven't heard an ID,  
 but haven't paid that much attention. I'll  
 have to pay more attention to it when I drive  
 through Fairfield. The local people did not  
 like the east Indians taking over what used to  
 be Parsons College, but there sure isn't much  
 crime in that town now!"  
 MN Willmar KBHZ \*91.9, IDing with KBHL  
 103.9 Osakis  
 TN Soddy-Daisy WFXS 102.3 tr, stereo resumed  
 WA Eatonville KJUN-FM 104.9, k, with an  
 "upgraded signal." KWYZ 1230 Everett  
 comes back on the air, simulcasting KJUN-  
 FM, which is weak in the Everett area.  
 "There's a divorce between the owner and his  
 wife, with a messy situation causing one of  
 the stations to go dark."  
 WI Marathon WKQH 104.9, o, "Classic Hits"  
 Q-104.9," ID with Stevens Point. Not yet  
 implementing its 25 kw CP, so the ID for now

is "Stevens Point-Marathon." It no longer  
 rebroadcasts WSPD 1010.

**Monophonic**

MN Austin KMSK \*91.3—has "fake stereo. Too  
 much static in the reception of KMSU 89.7  
 Mankato, so they receive it off air in mono,  
 and then use a stereo generator to give the  
 illusion of stereo."

**Format Changes**

*Formats are the same as in the "FM Atlas"*

AL Ozark WQLS-FM 103.9 o, in a duopoly with  
 WTVY-FM 95.5 Dothan

ME Pittsfield WPBC 99.5 g, relaying KAWZ 89.9 Twin Falls ID  
 MI Charlotte WMMQ 92.7 op  
 MN Proctor KUSZ 107.7 still k, but now mostly separate programming from WUSZ 99.9 Virginia MN  
 MS Grenada WQXB 100.1 k  
 MS Ocean Springs WXOR 92.5 k  
 MS Pickens WYJS 105.9 gr  
 MS Starkville WMSU 92.1 s, with Tom Joyner and Doug Banks from ABC  
 MO Maryville KNIM-FM 97.1 r, adult contemporary days; oldies nights  
 MT West Yellowstone KWWF 96.5 kr, k 6 a.m.-3 p.m.; r at other times  
 NY Monticello WJUX 99.7 still m, with Sid Mark's Frank Sinatra show moving from WPAT-FM to WJUX and W276AQ 103.1 (not "W276AM," Jan., p. 2, col. 3), Saturdays 7-9 p.m.  
 NY New York WXRK 92.3 "still deejay-less a month after starting their new format." The Greaseman's show, which left WXRK, is on WYSP 94.1 Philadelphia, and "apparently not a rebroadcast of his Atlanta (WZGC 92.9) morning show, judging by the local info and frequent station IDs, so that means he's doing at least two four-hour shows a day" (although good automation systems can make it sound like a live custom-for-that-station program).  
 NC Chapel Hill WUNC \*91.5 cn, with less jazz middays. Public stations with jazz formats are the most vulnerable to more news/talk.  
 That's not only because their audiences are smaller than that of classical stations, but there's new competition in "smooth jazz" from commercial stations. Smooth jazz can be programmed by one person and the rest automated, and it's seen as a growing format for commercial operators in duopoly situations.  
 NC New Bern WIKS 101.9 sr  
 ND Fargo WDAY-FM 93.7 r, LMA with KPFX 107.9 and KLTa 105.1 Breckenridge MN

 SC Eastey WXWX 103.9 o  
 SC Greer WXWZ 103.3 o, sales marketing agreement with WFBC-FM 93.7 Greenville  
 SD Canton KIXK 102.7 o, LMA with KMXC 97.3 Sioux Falls  
 TN Henderson WFHC \*91.5 jr, with some

up your Atlas with those things."  
 IA Decorah K268AF \*101.5  
 MA Provincetown WOMR \*92.1, having moved from 91.9 and getting some audience away from the Cape—into the south shore of Boston. Some long-time WOMR volunteers worry that the station might reject its local roots. One volunteer host who riled the station executives was Eric Williams. On Memorial Day 1994, as vacationers began to crowd the Cape, Williams went on the air with a tirade against tourists, who shop at the stores owned by the station's underwriters. He was taken off the air for two weeks. But Williams isn't going to be muzzled. "Hey, I still hate Bermuda-shorts-wearing tourists and I'm still going to say so."  
 MA Waltham-Boston WCRB 102.5—after 45 years as an announcer there, Dave Tucker retires. "Those are outstanding kilometer-stones in an industry based in large part these days on disposable employees."  
 MN Good Thunder "KDFM" 94.9—the town's second pirate  
 MN Redwood Falls K295AD 106.9—"a new phase box was installed to cut interference from KXAX 101.5 St. James. It was reported that this translator is now working much better" [Feb., p. 3, col. 2].  
 MN Sleepy Eye KNUJ-FM 107.3 with "3000 watts"; keeps its carrier on illegally with no programming and no IDs midnight to 6 a.m.  
 NJ Brick Town WBGD \*91.9 should be on by now. "I called the school the station broadcasts from [and] learned that because the students have to take an electronics course in the first half of the school year the station is going to be operated in the second half of the school year."  
 NY New York WFUV \*90.7 honored by "The Gavin Report" as the 1996 Americana Station of the Year for its mostly folk and country mix played from 6:30 a.m. to 11 p.m. weekdays. P.D. Chuck Singleton says WFUV draws about 180,000 listeners a week, up from 120,000 in the late '80s.  
 NY Syracuse WAER \*88.3 now 50000 h,v; 84 m, d-a. "I have complained to the FCC about this station's interfering with other public stations. Now WTVH-5 is complaining to the FCC about interference caused to cable reception of WTVH on channel 6 locally. It turns out that Syracuse University didn't even have a city building permit for the new antenna on Day Hall. My complaint at the FCC has been sitting there for a year. They can't continue to ignore that complaint, and sooner or later WAER will have to correct the problem."

**Off Air-or Not Yet On**

MI Grand Rapids WBYW \*88.9 still off. "I see yet another religious FM has applied for a translator in Grand Rapids [but] now does WPCS determine the frequency to be applied for? By shooting darts at a board? With a ouija board? They've applied for 90.1 in G.R.—really brilliant, what with WBYW on 89.9 and WBLV on 90.3. . . My comments a few months back re the [now-dismissed] KAWZ application apply to WPCS, only more so. At least KAWZ didn't pick a frequency adjacent to another station in the same city. I could see a situation where the FCC, in its infinite tunnel-vision and stupidity, actually GRANTS the WPCS application; if WBYW is too preoccupied with putting up its new tower, and since WBLV's 1.0 mv/m contour does not technically reach G.R., the station, in the FCC's eyes, would not be 'interfered' with. Since the FCC apparently has a policy of granting any noncommercial band application that does not have a petition to deny filed against it—even patently ludicrous ones—it's possible that if WBYW doesn't file, the WPCS application could be granted."  
 MN Hermantown W280CT 103.9  
 MN Rochester KRPR \*89.9 has been off all last year, coming back next month, but evenings

only. It will use community college students, from a new off-campus address.  
 NY Bridgehampton WLIE 102.5, but expected on this spring; owned by Peconic Bay Broadcasting, some of whose principals own WBAZ 101.7 Southold. The reason for WLIE's existence is "to prevent someone else from coming in and establishing a station that would compete with WBAZ [and] that if he (Joseph Sullivan, a principal in Peconic Bay Broadcasting) did not pursue the license, someone else would have done so."  
 OK Comanche KDDQ 96.7  
 PA Lincoln University WLIU \*88.7, technical trouble, expects to return in September  
 SD Aberdeen K249CB 97.7—has been "shut off and will not return to the air until the interference problem (to KCGN-FM 101.5 Ortonville MN's translator) is solved."  
 WA Othello KZLN 97.5, having ended an LMA and "should be back soon with a new format."  
 WI Ripon WRPN \*90.1  
 WI Wautoma WAEL 102.3; must wait for WISS-FM Berlin to move from 102.3 to 104.7. "Wouldn't you think it would make sense for WVRQ-FM 102.3 Viroqua to move to 102.1, especially if WAEL appears? I've also thought that WRJC-FM 92.1 Mauston should be moved to 102.9 because of Sun Prairie WMAD-FM 92.1 to the south. It would help both of those stations cover the Wisconsin Dells Vacationland since that's the area they cover each other."

**Deletions**

AR Bentonville K201CT \*88.1 (see "New," above) [new station]  
 OR Grants Pass K217BZ \*91.3, because of **FMistakes—FM Atlas-16, FMedia!**

**On Air—Real Stations and Pirates (Selected)**

GA Atlanta "KF2XBF" 94.5—the "modulation level of this airport T1Station (Feb., p. 3, col. 1) is rather low, perhaps in deference to local WSTR 94.1 and WPCH 94.9. The signal gets 'choppy' and starts to fade 2.7 km north of the terminal. I hope you don't plan to clutter

Greenbush (Scott's Corners) refuses to grant the station a tax exemption. The town appraised WVHA's 75 acres plus its 500 kw transmitting equipment at \$7.7 million, or about 20 percent of the town's tax base. It's a town of 1300 "with little in the way of business or industry to help pick up the slack." When the station was WCSN it paid the town \$115,000 to \$120,000 from 1987-1994. The station, which has filed suit to ask for the overturn of the town's decision, has a "church" in its lobby for weekly worship; however, town officials claim the main purpose is to operate a radio station, and not a house of worship.

QU (not "QR") Puerto Morelas, Jan., p. 1, col. 1. "I get about two dozen other newsletters in addition to FMedia! (though none so jam-packed with news), so it sometimes takes me a while to get caught up. You'll find a renewal check enclosed," B.T., Buffalo NY.

**SAP/SCS services**

*Symbols are as in the "FM Atlas"*

CA Northridge KCSN \*88.5 tT, 67 (not 92); the Los Angeles Radio Reading Service at (818) 345-2874 [mat main carrier]

GA Brunswick WWIO \*89.1 tT, 67; cn for- GA Fort Gaines WJWV \*90.9 tT, 67; cn main GA Rome WQUT 102.3 tC, 67 (from tM), relay of WRGA 1470 AM Rome

GA Public Television offers Peach State Public Radio on iSAP, various transmitters. Reception in Atlanta, however, remains iffy, with WJSP-FM \*88.1 Warm Springs heard in the south metro, W264AE \*100.7 in the city itself, and now SAP. Peach State Public Radio is on the SAP only when GPTV isn't broadcasting special descriptive video programs to the blind. "The 11 station Peach State Public Radio Network shuts down at midnight, but three stations—WUGA \*91.7 Athens, WWIO \*89.1 Brunswick and WSVH \*91.1 Savannah—remain on overnight with PRI's "Music Through the Night". And on more than one occasion I have noted Atlanta translator W264AE still broadcasting several hours after its primary, WJSP-FM \*88.1, had left the air."

IL Chicago WNI 89.7 1 no SCS, RBDSless MA Waltham WCRB 102.5 still has two music SCSes, 67 and 92 kHz, as well as RBDS. Now it is developing an on-carrier system with a "200 kbps" subcarrier to transmit digital audio with a subcarrier centered at 76 kHz, 40 kHz wide, plus or minus 20 kHz. If continued, this would be incompatible with WCRB's other SCSes. The NAB says if the digital became widely accepted, stations would be able to phase out the analog signal, allowing for additional digital services and/or programs to be transmitted. David Maxson, WCRB vice president, and Dr. David Murotake at Sanders, a Lockheed Martin Co. based in NH, are to present a paper at NAB '96 in which they'll share the results of the lab and field tests. See comments below by Bob Brummond regarding his fears of having reading services to be blind displaced.

NJ Point Pleasant WADB 95.9 now RBDSless NJ Trenton WKXW 101.7 RBDSless NJ Wayne WPSC-FM \*88.7 scrolls "WPSC-FM WAYNE NEW JERSEY HITRADIO 88.7 TO MAKE A REQUEST CALL THE HITLINES AT (201) 595-2738." "As with WDRE 92.7 Garden City, the message takes a long time to get going."

NY New York WKCR \*89.9's 67 is, of course, In-Touch. "Steve Post, the former WBAI announcer whose book is mentioned on p. 8, Feb. FMedia! was a reader on In-Touch's "Our World" program until about a year ago. Another In-Touch staffer formerly found on

the main FM band is Les Marshak, who reads the program schedule every morning at 7. He used to be a DJ on WCBS-FM 101.1." WQXR 96.3: It "di dn't take long to fix its RBDS display, which had been missing the calls. On the other hand, WNEW 102.7 still hasn't realized it's been scrolling an invisible (blank) message for months!"

WA Seattle KCTS \*9 has Evergreen Radio Reading Service on iSAP, plus "Radio Entertainment Network" collection of old radio shows. The shows include "Suspense," "Fibber, McGee & Molly," "Lum & Abner," "Our Miss Brooks," "Dragnet," "Bob & Ray," "Burns and Allen," "Inner Sanctum," and Jack Benney's shows from 1937. Dates of the other shows are from 1944 to 1959. It's free to SAP/SCS reading services. Contact James T. Dolan at PO Box 51151, Seattle WA 98115; (206) 689-1708. "If any of your customers would like to listen to REN programming on their local radio reading service, they can ask the RRS operators to call Kevin Clark at (206) 689-1708 or write us at PO Box 51161, Seattle WA 98115 and we will send them a demo tape... I distributed 60 copies of your catalog to the members of the Radio Enthusiasts of Puget Sound (an old time radio club)." The service is satellite-delivered as well as available on tape. Markets receiving REN are Seattle, Portsmouth OH, Port and OR, Grand Rapids MI, Dallas, Harrisburg PA, Yucaipa CA, Chicago, Champaign IL, Dalton MA, anywhere from two to 10 hours weekly. It's also on Yesterday USA Superstation (C band, subcarrier WGN and Outdoor Channel Sun. 9 a.m. EST to 7 p.m. EST, a total of 10 hours).

USA—Bob Brummond, writing in "HearSSay" newsletter a piece entitled, "More People Are After Our Subcarrier Space," including proponents of in-band, on-channel digital audio broadcasting, as well as folks wanting a high speed data subcarrier standard. "As radio reading services we have FCC Regulation 82-1 and a large public relations factor on our side to protect our subcarrier transmission capability. However, we may be placed in the position of fighting against new and promising digital technology which we can benefit from and denying public radio stations greatly needed financial resources from rental of their subcarriers. . . Although we do have some time in our favor as things are moving much more slowly than forecast, we still have to plan for the changes which must surely come to our subcarrier distribution system. When you are making plans for your future RRS be sure to include the development of alternative methods of distributing your program. If you plan to rely only on FM subcarrier distribution you may find yourself in a precarious position in five years or so."

AB Edmonton CKUA-FM \*94.9 testing the Emergency Public Warning System (EPWS). The EPWS "may well become the national standard for alerting Canadians to emergencies such as storms, floods, landslides and spills of toxic materials." The system is manufactured by Videoquip Research Ltd. of Scarborough ON. It is activated on the 57 kHz RBDS of CKUA-FM and its relayers. Using a touch-tone telephone, authorized persons can enter an access code and identify the affected area. The computer then records the message and activates special receivers located in the studio or transmitter room of FM, TV and cable systems, "providing instant transmission of the message to the public. Each receiver selects only those alarms relevant to the receiver's location," according to "Broadcast Technology" magazine.

ON Toronto CFMX-1 96.3 tT, Tamil language PQ Montreal CFQR 92.5 still tZ, 67; it is at 9600 baud. "I am getting some financial information that I subscribe to, but would like to receive more from their signal that is concealed." [92 kHz AUSTRALIA Brisbane 5EBI 92.9 BBC audio, /

Canberra 2SSS 103.9 BBC audio, 92 Melbourne 3ZZZ-FM 92.3 BBC audio, 92 kHz, a 10-kw station.

3RRR-FM, frequency unavailable, no SCS (used to have BBC). There was too much multipathing on this 50 kw station for in-city reception.

Sydney 2SER 107.3, BBC audio, 92. "These four cities cover well over 50% of the population of Australia."

"It is always a pleasure to do business with you," G.C., Mount Pleasant IA.

**FMakings—applications for new stations and facilities' changes (primary stations of translators are shown in parentheses)**

The FCC has drastically cut down on the quality of information it releases about applications, omitting technical details, such as powers, heights and geographical coordinates. I have talked to the news media information people, urging them to supply more complete data. They were to have contacted the mass media bureau to see if better information may be forthcoming. Since data are so scant, only selected information is presented here.

†Only surviving applicants for the channels  
 indicated, all of whom have arranged settle-  
 ment agreements, per the FCC's one-time  
 allowance of settlements in excess of actual  
 expenses, which ended Dec. 15. If the  
 stations are actually granted, look for call  
 letters to be shown in a future FMedia! Their  
 technical facilities won't be listed again, so  
 save this list. [a second station  
 BC Abbotsford 92.5 890 h,v, CKSR/CFSR for/  
 CFSR 104.9 to move its transmitter to Mt.  
 Seymour to improve reception in Vancouver  
 and the western Fraser Valley  
 BC Vancouver 94.5 CKST AM 1040—in an  
 application heard by the CRTC Feb. 20, with  
 the station to give up its AM. Others applying  
 for 94.5—each with approximately 38000  
 h,v—are Mainstream Broadcasting Corp.,  
 which seeks an ethnic format in at least eight  
 languages; and Telemedia, with alternative/  
 modern rock. Thomas Fung and Roger  
 Charast applied for 96.1 with an ethnic  
 format in at least 15 languages. The 96.1  
 would have 40,000 h,v. FMedia's local  
 reporter says Telemedia "is the shoe in"  
 favourite.  
 CKZZ 95.3 seeks on SCMO with Persian, with  
 Standard Radio applying to buy the station.  
 BC Victoria 107.3 CFAX 1070 AM is the "odds  
 on favourite to get the channel," with the FM  
 to be m or mr, while the AM has news.  
 ON Dryden—CRTC denied a 10-watt station to  
 carry 20 hours/week of local programming  
 and 106 hours a week from the Moody  
 Network of Chicago; no frequency an-  
 nounced.

**Selected AM Happenings**

CA Los Angeles area—"K News AM" 540 and  
 1260 now has Doug Llewellyn as the 2-5 p.m.  
 anchor Sundays; he's best known as the reporter  
 on TV's "The People's Court."  
 IL Rockford WNTA 1150 leaves the air after 31  
 years. Its call letters move to 1330, with the  
 WRRR call letters retired (see "Call Letters,"  
 above, WV St. Marys). Left the air because the  
 land the towers were on was more valuable than  
 as a radio station. "It used a four-tower array  
 because it was a tight fit with WJJD on 1160  
 about 96 km away. As the Rockford market  
 started moving eastward, more and more of the  
 radio audience wound up 'behind the pattern'."  
 Also a factor was the merger of WXRK 104.9  
 Belvidere-WRRR 1330 and WKMQ 95.3 Winne-  
 bago-WNTA 1150 in 1994. "With the merged  
 ownership now controlling four stations, it was a  
 lot easier to let one of them go. When the stations  
 merged, the studios consolidated at WXRK-  
 WRRR's site. The studio building at the WNTA  
 1150 site eventually was only needed for the  
 transmitter for WNTA. So that building became  
 expendable. . . I am not aware of anyone buying  
 the 1150 kHz frequency. Considering that the  
 station would require multiple towers, it seems  
 like an expensive proposition, particularly as a  
 go-it-alone AM operation. As a benefit to me, I  
 can now pick up WJJD and have fewer problems  
 getting WISN 1130 kHz Milwaukee."  
 MD Fort Meade 1670 AM heard testing with  
 differential calls, "KRNK," "K-Truck," and got out  
 very well, even strong at night in San Diego. It  
 tested up to Feb. 8, as an AFN station;  
 equipment later said to have been shipped to  
 Bosnia.  
 MA Dedham [Boston] WBPS 890 left the air a  
 day after Prime Sports Radio announced it was  
 closing. WBPS had 15 employees (five in sales)  
 and four part-timers. "Thought it was making  
 headway in the market after showing a \$20,000  
 profit for January," writes one observer. Just  
 prior to the close-down the Boston Herald's Joe  
 Giullotti had been hired to do a once-a-week Red  
 Sox report in the 6-9 a.m. "Home Team" slot,  
 and plans were to have a 4 to 7 p.m. local  
 broadcast beginning this month. Prime Sports  
 Network had leased the WBPSignal, which was  
 "weak," although Prime Sports "invested some  
 money to improve it" two months before, but  
 ratings were abysmally low, at less than one-  
 tenth of one rating point. Earlier rumors were  
 that the station would come back as ethnic;  
 however, it has since returned with soul music  
 and sports. Sports broadcaster Jimmy Myers is  
 buying WBPS, and he'll host four hours each  
 morning starting later this month. "But it won't  
 be easy for Myers, Pallone (see below) or anyone  
 else to make it long-range—selling enough com-  
 mercials to offset cost of salaries, productions  
 and air time. . . Because of the dominance of FM  
 radio, the leasing of time on AM stations with  
 weak signals is increasingly common," Jack  
 Carig, sports writer, Boston Globe, who notes  
 this is the first time a local station has tried  
 leasing time for sports; others in the market are  
 doing it for ethnic. Boston attorney Mark  
 Milliotis is paying \$4000 weekly for airtime to sell  
 advertising in a brokerage agreement. The WBPS  
 phone was disconnected as this was written, but  
 that is expected to change as a noon to 3 p.m.

talk show with ex-umpire and homosexual Dave Pallone is about to take over. NJ Elizabeth WJDM 1660 now has Radio Aahs, and on all night. "I think it's pretty dumb that Radio Aahs is on all night when kids are supposed to be asleep. . . I was thinking the only kids who are going to listen to this for more than a few minutes are blind ones who can't watch TV. Then I heard an ad for Braille Forum magazine, so Aahs must have been thinking the same thing!"

NY Schenectady WVKZ 1240 may have found a niche for a small AM. Controlled by Capitol District Off-Track Betting in a \$35,000 a year lease, it provides live broadcasts from its race track and other race tracks around the country. When there aren't races, it carries the One-on-One Sports Network out of Chicago, and a daily Catholic rosary. As a small AM, "survival options remain limited for the WVKZ's of the world," muses Radio World newspaper, which says: "With hundreds of AM stations having pulled the big plug over the past five years, unorthodox approaches like WVKZ's could save some stations from oblivion while providing AM radio a place in today's information-on-demand environment."

ND Minot KTYN 1430 silent  
WA Lacey KBRD, or as they spell it KBRD, 680 250-w day. "We have no commercials; it's just

Skip Marrow and B.J. play the Oldies.

me, "Skip" [Marrow] and "DJ" the parrot running the station for our own amusement. I grossed \$1790 all of last year with one advertiser, but I enjoy the music which entertains me. I have \$48,000 worth of automation equipment, and a good daytime signal. We have no news, but music licensing is expensive." Marrow runs the station by himself with the computer and parrot, which usually perches on his shoulder, even refusing volunteer help.

WA Seattle KMPS 1300 reported silent, while KMPS-FM 94.1 is "loud and clear."

ON Toronto talker CFRB 1010—its licence renewed for only nine months "so that the CRTC can assess its guidelines to ensure high standards and appropriate response to complaints."

BELIZE—Radio Belize is off the air, and the FM is restricted in its operating hours, due to a poor economy and inability to pay the electric bill—gist of a story partially heard on Glenn Hauser's "World of Radio."

### FM Rulemakings Proposed

First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.

- AR Cherokee Village 98.3A from 100.9A, KFCM, Mar. 21, Apr. 8
- AR Imboden 105.7A, Mar. 21, Apr. 8
- AR Salem 100.9A from 95.9A, Mar. 21, Apr. 8

### FM Rulemakings Finalized

- CO Grand Junction—frequency not available—filing window changed until Apr. 4
- FL Parker (move from Port St. Joe) WPBH 94.5C

- FL Wright (move from Andalusia AL) 98.1C1—FCC dismissed petition for reconsideration and reinstatement of petition filed by WWSF.
- IL Meredosia—dismissed 93.5A bid
- KS Copeland—frequency not available—filing window changed until Apr. 4
- MS De Kalb 105.7C2, Mar. 15-Apr. 15
- MT Big Sky 104.5A, Mar. 25-Apr. 25
- SC Ridgeville (move from Waltherboro) WPAL-FM 100.9C3
- TX Snyder 97.1A Mar. 11-Apr. 11
- TX South Padre Island—affirmed the dismissal of a counterproposal seeking the upgrading of KESO 92.7A

WY Casper 102.5A closed—reserved for previously-filed application  
104.7A closed—reserved for previously-filed application  
WY Cheyenne 99.9A closed—reserved for previously-filed application.

In a major change in how the FCC treats applications and allocations, it has created new channels in Casper and Cheyenne WY (see above) to avoid a hearing among mutual applicants. Three applicants for Casper 97.3 filed applications to amend the table to add two new channels, 102.5A and 104.7A, and keep their cut-off protection, essentially keeping the filing windows closed. The result being, according to the "M Street Journal," Bruce L. Erickson becomes the sole applicant for 97.3, Hart Mountain for 102.5, and Rule Communications for 104.7. Hart Mountain already owns KTRS 95.5 there. Mount Rushmore Broadcasting, owner of KQLT 103.7 and KASS 106.9 there, objected, filing a petition that alleged economic hardship. The Commission denied the petition, stating it has already determined that the consideration of "economic feasibility issues is not relevant," despite the NAB's pending request to review the FCC allocation policies so that economic, not just technical factors, would be reviewed in granting a new channel.

In Cheyenne, KRAE keeps its application for 104.9, while competing applicant Rule Communications will get the new 99.9A. The FCC deleted 99.9C at Saratoga WY in order to accommodate the Cheyenne action. Cheyenne is a market of about 60,000. Before the new allotments, the market had six commercial FMs, two of which are said to be silent. Nobody filed a petition against the new Cheyenne allotment.

### FM As It Was—OR MIGHT HAVE BEEN

WBNI \*89.1 Fort Wayne sent information on its history. The station features a variety of programming—classical, jazz, news and information. It started in 1978 as WIPU with 4000 watts on the campus of Indiana University—Purdue University. When the station's life was threatened due to university budget cuts, a group known as Public Broadcasting of Northeast Indiana formed to ensure the station's continuance.

The station received a 10-year lease in 1982 to move to the YMCA. The lease was not renewed, but a donation of land by the Fort Wayne Community Foundation made the goal of having a tower site and studio in the same place a reality. One of the founding board members of WBNI is Leah Tourkow, 73, a former French horn and piano player and jazz collector. Her money helped buy the WBNI license in 1982, saving it from extinction. The family fortune was built on a furniture store that stood where Lincoln National Life is. She has been heard on air introducing jazz music noon to 1 p.m. Wednesdays and 10 p.m. Thursdays to 2 a.m. Fridays.

W B N I 8 9 . 1

One of America's great easy listening stations is WVNJ-FM 100.3 Newark NJ. The July, 1962 program guide featured a picture of Pres. John Kennedy on the front cover, and the words, "WVNJ AM 620 K.C. FM 100.3 MCS Great Albums of Music." Don Cope, WVNJ music director (pictured), had a column in the guide. He mentions that once it was desirable to

have a blending of musical instruments creating harmony. Now much of the "new listen" is to separate the sounds before they are wedded, often even before they meet. The new motto seems to be "never let the right ear know what the left ear is hearing."

Stereophonic sound, played at high volume, allows for both ears to absorb the sounds and thus get an impression of the whole plus the feeling of movement in music. It is unclear from the literature whether or not WVNJ-FM broadcasts in FM stereo—a technology that was getting underway as of late 1961.

John Ebeling sent a little history from 1950 about the Wisconsin State Radio Council and its network of six FM stations. Brule \*89.9 and Highland \*91.3 were to be added later. The brochure says FM is better because "it overcomes most of the undesirable characteristics of the old system. Within its service range, FM is free from static, inter-channel interference, and fading. FM gives more lifelike sound reproduction. This means better listening." Wisconsin uses FM because it can broadcast at night (the AM stations, WHA Madison and WLBL Stevens Point) are limited to daylight hours; and FM can reach listeners in all parts of the state. A map showed the coverages of the stations. "If you live in the area with stations already in operation, and have an FM receiver, you should get excellent reception. Good FM receivers are now on the market at reasonable prices. An FM aerial will help to give better reception. The network plan is so engineered to provide

good reception to all parts of Wisconsin." Programming was to appeal to special segments of the listening public, rather

than to attract all of the people all of the time. Programming included in-school programs for children, adult courses from University classrooms, many of which I heard living in neighboring Minnesota, and whose absence in favor of telephone-talk I miss; features for women and farmers, symphony and salon music (6-7 p.m. used to be the "Evening Musicale"), discussions of politics and government, weather information for flyers and travelers, good literature, and many more!

Stations are on 7:30 a.m. to 11 p.m. daily; from about 1956-60, they were off the air Saturdays, and signed off other days at 10 p.m. They don't compete with private stations for advertising revenue—not even underwriting, which wasn't thought of at the time. They use special reserved frequencies and offer different types of programs so as not to compete with commercial stations. They don't necessarily compete for audience; in fact, any station can rebroadcast without charge any State-Station features they wish; I recall KCUE-FM 105.5 Red Wing MN carried some news programs from a nearby State Station, most likely WHWC.

Are there other FM stations in Wisconsin? the brochure asked. "Yes, indeed! The Federal Communications Commission reports more than 25 FM stations in Wisconsin already in operation. More are expected as the conversion to FM receivers continues. Several out-of-state FM stations are also heard in Wisconsin."

The "cost of the state's radio service is startlingly low. When compared with other services our people buy, it is an apparent bargain. The per-capita cost of programming and operating the statewide network for a full year is estimated at about ten cents—one dime for more than 5,000 hours of good quality radio service. The same dime is less than the tax on two gallons of gasoline! The cost of a complete transmitting station in the network is less than we spend to build a single mile of modern highway or construct a bridge over a stream. Where can we buy education at a lower cost?" [If those economies could be maintained today, this would still be a potent argument in favor of tax-supported public broadcasting, with underwriting and pledge drives not necessary.]

The key station of the network was WHA-FM \*88.7 megacycles with 9,350 watts effective radiated power from a height of 297 feet. WHWC \*88.3 Colfax was a new station with 50,500 watts radiated power from a tower of 504 feet with antenna—all owned by the State Radio Council, Radio Hall, Madison, Wisconsin. This network is still on the air, applying a cost-effective means of station interconnection previously found only in New York state with the Rural Radio Network. It was called the country's best example of off-the-air linking of stations to cover a geographical area. WHA-FM came on the air in 1947, WHAD followed in 1948, WHKW and WHRM [as WHSF] in 1949, WHWC and WHLA in 1950, WHHI and WHSA in 1952, and WHMD in 1965. WHMD \*91.5 Marinette (later Suring WI) was taken off the air when WHKW (now WPNE-FM) moved from Chilton to Green Bay WI. WHSA from Sept. 14,

1952 to 1959 was the only station locally available in the Duluth-Superior area. I experimented with mobile reception of WHSA in northeastern Minnesota in those days, as a rider and as a newly-licensed driver, using a Terado six-volt inverter to give a-c power to a Zenith FM-AM table radio from the car's cigar lighter in the family's 1946 Chevrolet, along with an antenna purchased from the bus company. The antenna was available following the demise of WEBC-FM 92.3 Duluth and its 1947-49 transistancing. A few weeks before WHSA began broadcasting, I had KYSM-FM 103.5 Mankato reception on a high spot of land in Duluth for some mobile FM DX.

Except for the daily weather roundups from the various transmitters, all State-Station programs originate in Madison. This map is from 1968. Individual station IDs were live, later given on reel-to-reel tape, following the network cue, "This is the Wisconsin State Broadcasting Service," and three discordant-sounding chimes.

#### Radio Provisions of Telecom Act Outlined

The new law removes all national ownership limits; one person can own an unlimited number of stations, with no audience reach caps. Local ownership rules are very nominal. They provide for:

☐ Ownership of five FM or five AM (eight total) when there are 45 or more commercial radio signals.

☐ Ownership of four FM or four AM (seven total) when there are 30 to 44 stations.

☐ Ownership of three FM or three AM (total of six) in markets having 15 to 29 stations.

☐ Ownership of no more than three AM or FM (for a total of five stations) in markets of 14 or fewer stations. No individual may have an interest in more than 50 percent of the stations in the market.

The law allows the FCC to extend its existing policy permitting waivers of the one-to-a-market rule to the top 50 markets. It increases radio and TV license renewals to eight years. It streamlines the license renewal process. Barring a "serious" violation or "pattern of abuse" of FCC rules, broadcasters may assume their licenses will be renewed. The FCC may not even consider a competing application unless it decides against a station's renewal. The bill requires broadcasters to serve "the public interest, convenience and necessity," as did the 1934 act.

However, if your station stays silent for an entire year, its license will expire at the end of that one year period. That's the Commission's way of clearing out some of the deadwood. And many minor changes to radio stations may not need a permit soon. Watch for a rulemaking on this between April and June.

The NAB held a broadcast group Fly-In to discuss implementation of the new law. FCC mass media bureau chief

Roy Stewart told the gathering in Washington DC "to the extent we can implement it by order, rather than rule-making, I would rather do that because it is faster." Stewart told the group about satellite radio, "I don't think you can stop it." He added: "What makes you unique is localism, and to the extent that you stop doing it [localism] there's no reason we should make efforts to be sure you (as an industry) stay alive." More than 50 executives took part in the Feb. 5-6 Fly-In. Also discussed were radio music licensing and the future of radio under deregulation. Chairman of the Fly-In was Herb McCord, president of Granum Communications, Inc.

#### Small-Print Happenings and FM Industry News

A study released by the National Association of Broadcasters called, "Digital Radio Broadcasting Technology Applications: A Delphi Forecast Study," gave the impression that with computer application and satellites disc jockeys will no longer be needed. The study noted that hard-disc drives and storage are becoming major factors in having programming created off-site. By 1999, computer automation is expected to be used in some form by virtually all radio stations. When that happens, the panel believes radio will maintain its ties to the community if only by airing local commercials (1) FCC Commissioner Andrew C. Barrett said the FCC wants stations to use part of their spectrum for digital technology applications. "Radios will no longer be just boxes with speakers but will be integrated into computers and other appliances that can use data streams from radio stations." The Delphi study is available from the NAB at \$65 for members and \$85 for nonmembers at (800) 368-5644.

The Lincoln Group, owner of WPXY 97.9-AM, WVOR 100.5-AM, has agreed to sell its Rochester properties for \$30 million to American Radio Systems, owners of WCMF-FM 96.5 and WRMM-FM 101.3 plus AMs. American Radio

Systems is a Boston-based publicly-traded radio group headed by Steve Dodge. The Lincoln Group retains WQXK 105.1-AM Salem OH, and is owned by Al "Bud" Wertheimer and Jack Palvino. "This sale marks the end of an era in Rochester radio," said Wertheimer. "Our family, my late father and I, put WVOR on the air in 1962 and Jack Palvino and I got together in 1978. Jack completes 35 years in Rochester radio broadcasting this year. We are pleased to entrust our dominant Rochester radio operation to such an outstanding person and company as Steve Dodge and American Radio Systems."

In nearby Buffalo, nearly all the radio signals are controlled by duopolies. Keymarket Radio owns WKSE 98.5 Niagara Falls and WMJQ 102.5. Evergreen Media has WHTT-FM 104.1 and WSJZ 92.9. Mercury Broadcasting owns WEDG 103.3 and WGRF 96.9. John Casciani of WNUC 107.7 Wethersfield-Buffalo is the exception. FM now attracts 75 percent of local listeners, and Casciani relishes being the "last FM dinosaur." He likes that role because he's been a loner all his life. WNUC has virtually no local ratings, but is stronger in audience in the rural areas between Buffalo and Rochester. He lacks the resources of the bigger broadcasters, but stretches the resources of his 12-person staff, including his wife, to the limit. "I answer to everything. My name is on the door. I have a real commitment to this community because I live in this community," he said. [From the Buffalo News, "Changing Signals," by Anthony Violanti, and sent by Bill Thompson.]

Bruce Holberg and partners are making a "tidy profit" on the sale of WOOD-FM 105.7 and WBCT 93.7 Grand Rapids. "They paid about \$8 million for WOOD-FM-AM in the late 1980s and about \$10 million for WBCT a year ago," comments Phil Boersma. Now Clear Channel Communications of San Antonio TX is paying \$42 million for those properties. It has entered a local marketing agreement so as to take control immediately.

Tim Pavlich who goes by the air name of Tim Michaels is suing WAVC 105.1 Duluth MN for \$1 million for age discrimination. A seven-year employee, he is 49, and has been replaced by a "significantly younger DJ." Pavlich was told when dismissed from his \$22,900-a-year-job in January that WAVC was "heading in a new direction [and that] you've been around so long that people must think you're 90 years old." Pavlich worked 18 years at WDSM 710 AM before going to WAVC. He's pictured at his new

job, doing afternoon drive at KUSZ 107.7 Proctor-Duluth MN, another country outlet. Attorneys think as the baby boomers grow older there will be more age discrimination lawsuits. WAVC's owners, Brill Media of Evansville IN, recently paid \$700,000 for a duopoly partner, KLXK 101.7 Duluth. Calls to the station resulted only in referrals to their attorney, Joe Ferguson, who was not immediately available. Tim's attorney, Clayton Halunen, mentioned that the duopoly status of WAVC-KLXK "gives them more ability to manipulate and affect their employees," and they feel more free to "discharge at will."

Kato Kaelin quits at KLSX 97.1 Los Angeles. He's the guy who testified at O. J. Simpson's trial. After that publicity he received a two-year contract to host at KLSX. He left to "pursue other opportunities." Doing a five-day-a-week show was said to be hard because of other commitments. Former KROQ-FM 106.7 L.A. host Riki Rachtman has been hired to fill Kato's middy shift.

KUCB \*89.3 Des Moines has lost its license renewal bid, in favor of rival Acorn Broadcasting. KUCB's president was convicted in federal court for conspiracy, racketeering and embezzlement.

Radio Canada International fans may not have to worry after all about losing the shortwave service. A story in the Wall Street Journal said a campaign to save the service will keep it on the air, possibly by tapping into the programming talents of commercial and public stations of Canada, including the CBC.

The Oklahoma City market is "treated" to a triopoly in the form of Caribou Communications buying KTNT 97.9 Edmond OK for \$2.65 million. It already owns KATT 100.5 and KYIS 98.9 there. A Charleston WV triopoly is created when Bristol Broadcasting, owner of WQBE-FM 97.5, buys WVSR-FM 102.7 and WBES-FM 94.5 Dunbar WV for \$2.8 million. And Triathlon is poised to control Spokane's radio stations. It will buy KISC 98.1, KNFR 96.1, KEYF-FM 101.1 and KKZZ 98.9, with sales agreements covering KNJY 103.9 and KDRK-FM 93.7.

Randy Michael's Jacor Broadcasting, based in Indianapolis, is buying the entire Noble Broadcast Group for \$152 million, giving Jacor 36 stations, including four FM in Denver. The Denver FMs are KBCO-FM 97.3, KHIH 95.7,

KRFX 103.5, KBPI 106.7 and a sales agreement with KTCL 93.3 Fort Collins. Jacor will control Mexican-licensed XETRA-FM 91.1 and KHTS 93.3 El Cajon-San Diego. It also gets a Toledo duopoly in WRVF 101.5 and WVKS 92.5.

The FCC's getting tough on stations filing for short-spacing waivers. It told KNRK 94.7 Camas WA that its request for short-spacing in connection with a C3 upgrade was unacceptable. KNRK wanted to upgrade from its existing transmitter site, but the FCC wrote, "In these times of shrinking government resources, it is not an efficient use of the Commission's limited staff to allow new filings based on an inherently inefficient spacing waiver process. With the audio services division currently processing in excess of 1000 FM construction permit applications per year, and with these applications steadily increasing in difficulty as the FM band fills up, we see no justification in needlessly complicating and slowing the application process for sub-standard operations."

Responding to budget cuts, the FCC decide to eliminate its review board as of Mar. 29. Any left over business of that board will be turned over to the full Commission.

A limited-hours TV station, KNLD-21, is buying KQDS-FM 94.9-AM Duluth for \$975,000. This will enable the station to expand and to own the tower it also uses cannot safely support the addition of KEZH's antenna. However, the FCC affirmed its decision to grant the CP.

KQKY 105.9 Kearney NE had objected to a CP for KEZH 101.5 Hastings to increase its facilities to a full C. KQKY objected, saying that the tower it also uses cannot safely support the addition of KEZH's antenna. However, the FCC affirmed its decision to grant the CP.

Wendell Baxter is retiring as manager of WRVM 102.7 Surin WI, but before he goes, he wrote in the station's program guide about decreased donations to the commercial but nonprofit religious station: Former supporters have moved out of the area or died. "We have a record of 26 faithful listeners who passed away in 1994" and 41 who died in 1995, awaiting the resurrection when the Lord returns. "Our records show that 33 fewer people gave monthly to WRVM in 1995 than gave monthly two years earlier in 1993. So you can see we need several folks to step in and fill the gap by sending something monthly."

A person who heard WAFR \*88.3 Tupelo MS, Danny Buntin, mentions that it turned on its 100th station in its translator network (many of which seem to be changing to real stations), in just 2½ years. WAFR chief Don Wildmon hopes 200 more translators will come on during the next 2½ years, with the eventual goal of 500 spread through all 50 states. The station has a studio in Washington DC, to which it tries to lure congresspersons for interviews and get Wildmon's conservative political agenda across. So far, WAFR has concentrated mainly on setting up translators in small towns. His competition for small town translator frequencies, as of late, has been KAWZ \*89.9 Twin Falls ID and WPCS \*89.5 Pensacola FL.

The parsimonious Conservative government of Ontario is having CJRT \*91.1 Toronto fend for itself. With a staff of 33 and a \$3 million budget, the station will lose its \$1.3 million provincial allotment—and that on only four months' notice.

From the classifieds: Steve Sly is interested in trading tapes of regional FM station bandcasts; (416) 440-0185, or write him at 133 Broadway Ave., Toronto ON M4P 1V7 CANADA.

Wanted FM antenna: Noncommercial station, tuned or tunable to \*89.7. Must be able to handle up to 3000 watts. Bob Smith, (218) 755-2912. KBSB Bemidji to upgrade?

My new radios and electronics catalog now available. The Grundig shown on p. 7 is sold, and a buyer is snapping up the two Radio Shack Pro-2006 scanners I imported from Canada, but there's plenty of other good stuff available. Write or call our toll-free number, (800) 605-2219.

FM stereo generators, \$1550 to about \$1850,

Inovonics or Circuit Research Labs, 1-800-622-0022.

FM FORUM

CONTRIBUTIONS FROM READERS

WMXV 105.1 | New York took Howard the Cabdriver off the air for a week, after he told a girl, "I hope you like me well enough to put my name in your diary." The NY News says this may be a problem because Arbitron might interpret it as an attempt to influence listeners filling out ratings diaries. "Arbitron strictly forbids the on-air mention of anything that might even hint at such urgings. A station violating this rule can have all its ratings for that period thrown out. WMXV Program Director Steve Weed says he cannot either confirm nor deny the incident, since it's a personnel matter."

Bob Gilbert sent an envelope stuffed with news about New England FM. Among the items—it was orgy time at WHRB 95.3 Cambridge MA. During study breaks in January and May the station sets aside all regular programming and offers extended shows, sometimes lasting hours or days, devoted to a single subject. A Beethoven orgy recently aired, with his works put on chronologically.

It's nothing personal, just the business of radio. People, like Joe Martelle, who had been on WBMX 98.5 Boston since 1979, was axed when the station wanted to take the show in a "new direction." Martin mused of his career: "It's a tough business, and it can really impact your personal life because you never stop working on the show. Every time you talk on the phone or meet someone on the street you're thinking, 'a new bit for the show'. That's a lot of stress. . . You're really paid to work 24 hours a day, because in a sense you're always performing. [But] I'm not ready to throw in the towel yet. I'm a very competitive guy who really wants to come back."

After a period of turmoil at WERU \*89.9 Blue Hill ME, during which three new staffers who couldn't fit in with the volunteer workforce were let go, the station is planning to expand so as to be better heard in Bangor. Cathy Mello, former production manager, viewed the outcome as a coup, as if the station had lost its way and found it again. "It's an amazing place to work, and I don't think I'd be at home at a commercial station," she said. The station has a \$300,000 budget.

Iowa's Joel Hermann doesn't listen to FM much any more, "except in the car. There's just not much interesting around here on FM and I suspect that's the case just about everywhere. A year ago, I drove through Missouri, Arkansas, Louisiana, and Mississippi, and about the only difference between FM stations in larger cities was whether they played 10 songs in a row every hour, or had 40-minute music marathons every hour. Most of the small market stations were country off satellite, with their AMs simulcasting, with very little news. . . I was surprised to hear two or three easy listening stations in Wisconsin, including 92.1 in Racine The only one left in Iowa is KMXD 106.3 in Ankeny."

Until April,

*Steve F. Elving*

 WI Milwaukee WQFM 93.3 j, smooth jazz  
 ON St. Thomas CFHK 103.1 r. "Today's best rock"; still "The Hawk."

**On Air—Real Stations and Pirates (Selected)**

AL Madison W278AA 103.5. Interfering in Huntsville with WQEN Gadsden reception. Listeners upset. Can't hear "The Rick and Bubba Morning Show." Problem is adjacent channel interference. "Back at Q-104, Rick and Bubba are requesting FAXes from anyone experiencing reception problems 'to help make our case and kill The Possum'. Many people in the rural South still drive around in pickup trucks sporting gun racks and Confederate battle emblems, so I hope things don't get out of hand."  
 AR England KLRA-FM 96.5, back on  
 CA Vandenberg AFB 101.7: "I play 'Praise and Worship' CDs from Hosanna Network, using a Ramsey kit with their amplifier. It gets out with about half a watt," serving about 1 1/2 km in the direction of the beam. "A new station is supposed to come on 101.7, so I'll have to be finding a new frequency soon."

HI Honolulu KHNR 99.5: Internet article said it will become KORL, co-owned by KDEO-FM. "Will be brokered to 'World-FM' as a Japanese tourist station, U.S. CHR, Japan CHR, tourist advertising," and possibly embracing stereo.  
 IL Decatur WYDS 93.1, noticeably stronger with its new 6 kw. [from 97.7  
 IL Effingham WXEF 97.9, having moved/  
 IN Vincennes W210-- \*89.9: "It doesn't get out and the phaser annihilates it" for a user in Lawrenceville IL.  
 MA Acton WHAB \*89.1—back on air after a six-year hiatus.  
 MO Lutesville KMHM 104.1 g, mono.  
 VA Norfolk W291-- 106.1. It relays WROX-FM 96.1 Cape Charles. Has 250 watts. Its dipole antenna is 102 m above its studios. Studios are in downtown Norfolk.

BAHAMAS Nassau—"Love 97 FM" 97.5. Has 5000 h.v. Recently heard in the Miami area. This despite a local on 97.3. "I called them and confirmed 5 kw, but couldn't tell if they were stereo or not."

**Off Air—Or Not Yet On**

AR White Hall KWDA 104.5  
 AR Wilson KAFW 103.7  
 CO Yuma KJCO 100.9—FCC issues "show cause" why its license shouldn't be revoked.  
 HI Kaneohe KBLZ 104.3, due on this summer. Call rumored to be changed to KPBL. "Jerry Clifton is involved, so you speculate on the format."  
 IL Anna WRAJ-FM 96.5, a talk station, "but has no working phone." It was to have upgraded to a C2.  
 IL Fisher WGNN \*102.5  
 IL Mattoon WLBH-FM 96.9. New owners taking over. They're preparing to change it to rm.  
 IL Mount Vernon WAJT 102.1  
 IN Hagerstown WAEE \*91.1. One of three WBST \*92.1 Muncie relayers. Others: \*90.9 Marion and \*91.7 Portland.  
 IA Cedar Rapids KOJC \*89.7—FCC ordered "show cause" why its license shouldn't be deleted.

ME Howland WSNV 103.9—on-again, off-again. Due to tower falling. Still plagued by bad transmission line. Line being replaced. Bad weather caused a week's hiatus in January. It "may be the talk of the town lately, but not because of what's said on the air."  
 MI Grand Rapids WBYW \*89.9. "Their tower is now finished; maybe they'll be back on soon."  
 NJ Brick Town WBGD \*91.9: "I try to tune in every day, but I hear nothing. . . They were definitely on the air this time last year. When I called them last month they told me they were going to operate only in the second half of the school year, but that doesn't make sense. Can the FCC allow a station to operate for only four months out of the whole year? Here it is April already, and the high school classes end in June, so even if they come back on now, the station would only be on for about 2 1/2 months!" [School stations have to operate a minimum of 40 hours a week whenever school is in session; those not on 12 hours a day open their frequency to time-sharing with another station—b.e.]

NY City area—"WJQR" 91.9, mentioned "in FMedia! various times since 1992": Enter Judah Mansbach of the NYC FCC. He tracked the professional-sounding pirate in Queens. "Nasty Radio" had about 100 watts. Mansbach issued a "cease and desist" order. WJQR promptly left the air. No fine mentioned.  
 OH Troy WTRJ 96.9. In a duopoly with WROU 92.1 West Carrollton. It "should be back on soon."  
 OK Woodward KWFX 101.1 (moving from 93.5) and KSIW 1450 reported silent  
 SC Ridgeland WSHG 104.9. It is "silent pending sale."  
 ON Thunder Bay CJLB 105.3. Seeks transmitter move to Mt. Baldy.

**Deletions**

IL La Salle W216AS \*91.1 (see "New," above)

- NJ Newark WBGO \*88.3 is "no longer a defendant in the \$5 million civil suit against its 92 kHz subcarrier, Radyo Pinoy" (see Jan., p. 6, col. 1). According to the Filipino Reporter, "an out of court settlement was reached between WBGO and plaintiff Kathy Ty's counsel, with WBGO paying \$2000 to be dropped from the suit. However, Lino Calle denies this, saying that both sides agreed to drop WBGO from the case since it had no responsibility for Calle's allegedly libelous broadcast. WBGO general manager Cephas

Bowles won't comment, saying, 'I'm not at liberty to discuss that'. But in a previous interview Bowles told the Reporter 'We're going to do what we can to have ourselves removed from the case. We're not a necessary party in this legal action'."

NY New York WHCR \*90.3 RBDSless  
WFUV \*90.7 tZ, 67 (displacing the Mandarin tO). The Z data spills over to the as-yet unactivated t(), 57.

"A reader in Queens NY, who wishes anonymity, responded to my mention of the Esko, Minnesota-based supplier FM Atlas in the October edition [of Popular Communications]," begins a paragraph in Ted Lisle's "Handi-Chat" column of the April issue. The author of the letter "didn't include my first name so he thinks I'm a 'he'." The article continues: "He is the proud owner of a modified GE Superadio II, which he extols for both its fidelity and sensitivity. He thoughtfully includes a short sampler of some of the musical, political, ethnic and religious subcarrier-based programming available to residents of metropolitan New York, long known as one of the nation's most diverse broadcast markets. Playback through a high-fidelity audio system reveals strong, clean signals and full-bodied audio." The radio in question has separate Elf-III 67 and 92 kHz adapters, "even though I told him that. The 'political' SCSample was just an article being read on 'In-Touch'."

In Canada "some print-impaired people are getting their news electronically. Daily newspapers are transmitted via satellite to TV stations, where they are broadcast in the form of computer text, using part of the TV signal called the vertical blanking interval. The signal is received by a decoder located between the subscriber's cable TV connection and computer. The text can be read by voice synthesizer, Braille output device, or in large print on the computer, says Rosemary Kavanaugh of the Canadian National Institute for the Blind.

"Thatsounds complicated and expensive! For some reason, radio reading SCServices don't seem to have caught on in Canada; Atlas-16 lists only 2 or 3 in the whole country."

Some European FM stations are fudging on their use of RDS. "Radio FFH" in Frankfurt and "Landeswelle Thüringen," a regional commercial broadcaster in Erfurt, "have been using the PS feature to convey additional information, such as traffic warnings, advertising and telephone numbers." And a public radio station in Austria,

ORF, "Radio Wien," has "been reported to be using the PS feature in a similar manner, contravening the EN 50067:1992 standard." From Italy has come reports that "nonstandard RDS transmissions from some commercial stations have been observed, not only in the case of the PS feature, but also, for example, activating the Traffic Announcement flag during advertising slots." The RDS Forum newsletter from Europe adds:

"While dynamic text is being transmitted, the station cannot be identified, and the PS name display information cannot be stored in the receiver's display memory. If text is stored during this time, then when it is called up later, the first display seen includes parts of the coincidentally stored text, which, naturally, does not correlate with anything useful for tuning the receiver. Only some time afterwards does the display show the PS name again."

In the U.S., Delco-General Motors agreed to equip the 1998 range of GM models with RBDS radios. Production in Kokomo starts in 1997.

ARI was the predecessor to RBDS. ARI-only signals to be ended by 2005. This will permit old receivers to work. Blaupunkt, Philips and Grundig were making ARIs. They agreed to quit offering ARI radios.

In Russia, FM paging is emerging. It'll be an SCSservice at 57 kHz. In China, a seminar was held. It "proved that genuine interest for RDS applications exists among the Chinese broadcasters." The delegates pointed out other possible RDServices.

"I really enjoy your radios. They're very good," S.H., Beverly MA.

 The Superior Radio Network, which included KUMD \*103.3 Duluth (which IDs on the hour with such obscure towns as Boylston WI and Forbes MN), WOJB \*88.9 Hayward, KAXE \*91.7 Grand Rapids, WXPR \*91.7 Rhinelander and KFAL \*90.3 Minneapolis, folded. Some of the functions have been assumed by The Great Lakes Radio Consortium based in Ann Arbor MI. It is mainly concerned with environmental issues. The other stations still informally share programs. The Ann Arbor group has one full time employee, who gets out about three stories a week, with the help of stringers. KUMD airs the five minute features 7:45 a.m. M-W-F. The Superior Radio Network had a two-year grant which was not renewed. That surprised the people at the public stations, according to KUMD's Stephanie Hemphill.

**Selected AM Happenings**

AR Little Rock KSYG 1010 deleted, bought by CBS to "make a better signal for WINS 1010 New York." FM 103.7 unaffected.  
 CA Oceanside KKLQ 1320 to be donated to Palomar College. This after KCBQ-FM 105.3-AM, KIOZ 102.1 Oceanside sold for \$68 million to the owners of KKLQ-FM 106.5-AM San Diego.  
 CA Vallejo KXBT 1640 is the second expanded band station; it has ABC's "urban gold," simulcast with KXBT 1190.  
 FL New Smyrna Beach WWBH 1550—station deleted  
 HI—via the Internet: KIKI 990 off the air. "Was oldies, lost antenna site."  
 KLEI 1130 off the air. "Was big band. Dark for over 10 years. Lost antenna site."  
 KORO 1170 off, was Japanese. "Lost antenna site. Expected to return in five months as Radio Aahs, on the tower shared by KHNR 650 and KJPN 940."  
 KISA 1540 off air. "Was Filipino, sold in February for \$200,000 and taken off the air."  
 KUAU 1570 Maui. "Still dark. Wasn't on for very long."  
 MN Minneapolis KTCJ 690 off the air. "Transmitter problems, per KTCZ 97.1 jock. Says it has parts on order."  
 NJ Bridgewater WBRW 1170 off air. Trying to get back on air. Dan Lohse is new owner. He's hoping to find a new site. Previous owner, Somerset Valley Broadcasting, bankrupt. It wouldn't let Lohse use its site. "Programming for the 500-watt daytime-only station would include news, talk and music."

on weekdays and Polish, Irish, German and Haitian programming on weekends. The FCC allows for operation on both frequencies for a period of five years. I didn't know, however, that separate programming was permitted. So, there are now

NY Riverhead WRHD 1570 silent.  
 NY Syracuse WOLF 1490 silent. It was an after-midnight regular for DXing. Heard often years ago in Duluth MN.  
 NC Icard Township WUIV 1580—deleted by FCC  
 TN Knoxville WUTK 850. It's a commercial daytimer owned by the University of TN. Being bought for \$200,000 by Dick Broadcasting. "It's interesting to note that this is the same station Dick Broadcasting donated to the university in 1988 when it bought the present WIVK"  
 107.7-AM. Dick also buying WXVO 98.7 Oliver Springs.

TX Edna KTMR 1130 silent.  
 UT Tremonton KNFL 1470 silent.  
 VA Suffolk WLPM 1450—deleted license and call letters. "The Commission is making good on their promise to revoke licenses of stations that have been continuously silent for at least a year."

### FM Rulemakings Proposed

*First date is for filing comments at FCC; second date is for replies. Stations affected, if any, are listed.*

AK Nikiski 93.3C2, May 13, 28  
 CO Delta 103.3C2, May 2, 17  
 CO Wellington 94.3C3, May 13, 28  
 HI Princeville 99.9C1, May 13, 28  
 IL Canton—delete 100.9A, with Canton MO  
 KY Booneville 105.3A, Apr. 25, May 10  
 LA Franklin 106.9C1, May 2, 17  
 MO Canton 100.9C2 for C3, KRRY, Apr. 29, May 14  
 NM Ruidoso 101.5A, May 13, 28  
 NY Sylvan Beach 100.3A, May 2, 17  
 SC Forest Acres 94.3A, Apr. 25, May 10  
 VA Chester 101.1A from 105.7A, WDYL, with Richmond [29, May 14  
 VA Richmond 105.7A from 101.1A, Apr./  
 WA Pullman 97.7A, Apr. 25, May 10  
 WI Barron 99.1A, Apr. 22, May 2

### FM Rulemakings Finalized

*Dates are when FCC filing windows are open*  
 CA Kerman 95.3A, Apr. 18-May 20  
 FL Avon Park 99.1C3 for 106.3A, WWOJ  
 FL Murdock 98.9A, Apr. 18-May 20  
 IL Atlanta 96.3A, May 2-June 3  
 IL Kewanee 93.9A for 92.1A, WJRE  
 PA Barnesboro 93.5A, Apr. 18-May 20  
 PA Brookville 105.5B1 for 95.9A, WMKX  
 PA Indiana 92.5A for 103.1A, WQMU  
 PA Punxsutawney 104.1A for 105.5A, WPXZ-FM  
 WY Jackson 93.3C, Apr. 22-May 23  
 WY Laramie 96.7A, Apr. 18-May 20

### WDTR \*90.9 Detroit a Renegade School Board Station

It's not the first time. And maybe not the last time. WDTR was used by an overzealous superintendent. Supt. David Snead violated state law, they say. He promoted a new Tigers stadium. "Public funds cannot be used to promote ballot proposals or candidates," explained Bradley Whitman, information director for the state's election bureau.

WDTR is licensed to the school board. School officials didn't know about laws forbidding such promotions. The spot aired several times on 90.9. It was an "outgrowth" of a board resolution. But at least one listener took offense.

"Apparently it takes an entire village to educate a superintendent," said Christopher Trey. He wrote Snead after hearing

the illegal message.

WDTR, according to a "Detroit News" article sent by Phil Boersma, "landed in similar soup in 1990 when then-Supt. John W. Porter used the radio station to promote passage of a tax renewal that benefited the district." And the FCC "reprimanded the station in 1992 for similar violations."

### Small-Print Happenings and FM Industry News

The FCC dismissed NAACP petitions. NAACP wanted reconsideration of two license renewals. KFSD 94.1 San Diego got renewed. However, it was fined \$15,000. WHMS 97.5-AM Champaign IL also targeted. Claimed poor EEO record. FCC, however, said no new facts uncovered.

WHFS 99.1 Annapolis MD fined \$38,000. Violations included airing phone calls without notification. Also political lowest unit rate rules. And employees won prizes meant for public. Abuses might delay sale of station to SFX.

The NAB wants to reduce FCC paperwork. However, it should move slowly to avert interference. NAB wants self-certification for certain applications. Exceptions would be where interference might arise. NAB also wants fees' reform. It also seeks leniencies in carrying lottery ads. It would like calls' automation. Favors electronic filing of applications.

NAB generally favors marketplace forces. But not when it comes to spectrum decisions. It wants FCC to ensure no interference happens. No "flexibility" in new type allocations. But "flexibility" is OK with in established allocations.

FCC rulemaking machinery is at work. It wants stations to make changes easier. Without first applying their code:

◆ Increase their ERPs to the maximum allowed for that class.

◆ Replace one directional antenna with another.

◆ FMs could delete contour protection status. This is under Sec. 73.215 of the rules. It applies when protecting fully-spaced stations.

◆ FMs could change vertical effective radiated power.

◆ Could make slight changes in antenna radiation heights.

◆ Waiver of main studio location rule made easier. It could be done by letter. Commercial stations wanting noncommercial status could do so easily. One-step rather than two-steps as now.

◆ Directional FMs to more easily do program tests. They could do it at reduced power. This after construction permit completed.

Regarding call letters' assigning here's something. I received Dataworld's list of available "W" calls. Open calls include WOOL (which used to be for ships' notifying). WAAB through WZZG, 9860 out of 17576 possible. A few are listed as maritime calls. Those are often available. A ship might have sunk. Or the calls could be purchased.

FCC Commissioner Andrew Barrett, 53, to step down. He'll most likely jump into public relations. Then only Rachelle Chong stays as a Republican appointee.

In 1986, Julian Hirsch discussed FMX. That was in "Stereo Review." FMX "was a system to reduce the noise level and increase the range of FM transmissions." Hirsch predicted FMX "may be the most important advance in FM broadcasting since the introduction of stereo." FMedia! came into being in 1987. Shortly after that, it covered FMX's demise. I believe the last station with FMX was WUOM \*91.7 Ann Arbor. The March, 1996, Stereo Review mentions FMX.

Richard E. Wiley writes in "Religious Broadcasting" about the new telecommunications act. Besides what was printed earlier he mentions: "Additional rule changes to promote an increase in the number of radio stations" must be drafted by the FCC in the third quarter of this year. I thought the new law supported duopolies. I didn't think it was for creating more stations.

There's also an FCC review provision. All broadcast ownership rules to be reviewed. Reviews to be done every two years. Those reviews start in 1998.

WXDJ95.7, WRMA 106.7 go to Paxson. Not satisfied, he's going for five FMs. Also buying WSHE 103.5. Paxson already owns WLVE 93.9 and WZTA 94.9. It's buying the Miami-area stations for \$172 million.

KRYS-FM 99.1-AM and KMXR 93.9 Corpus Christi sold. Going to Gulfstar for \$6 million. Gulfstar to merge with Sonance Communications. Group will own or control 31 stations. Twenty-seven of them to be in Texas.

Clear Channel buys Ragan Henry's U.S. Radio. Group will have 61 radio stations. Sage Communications to buy WPOR-FM 101.9-AM. Portland ME stations fetch \$10 million. It owns WMGX 93.1-WYNZ 100.9 there.

Previous aborted merger with Marl in Broadcasting advances. WFLN-FM 95.7 Philly and WQRS 105.1 Detroit go to ABS. Woody Tanger buys back WTMJ 93.1 Miami for \$18 million. He plans more acquisitions.

Infinity buys WZGC 92.9 and WVEE 103.3 Atlanta. Paying \$30 million. "The big keep getting better." That according to Tom Taylor of "Inside Radio." Jacor had just bought WPCB 94.9 and WGST-FM 105.7. Jacor paid \$26.5 million. Consolidation can hurt advertisers. Especially those wanting deals. But Sally Beamer, g.m. of WFOX 97.1, said: "Some advertisers might like the cross-promotional possibilities of multiple-station ownership."

Radio very profitable in Atlanta. Industry collected \$172 million in 1995. This is 40 percent better than 1994. Market now in top 10 for radio.

A complicated deal affects WAXQ 104.3 NYC. It'll be sold to Entercom for \$90 million. Then it will be swapped for two Seattle FMs. KBSG-FM 97.3 Tacoma, KNDD 107.7 from Viacom. Latter thus has two New York FMs. It also owns WLTW 106.7.

Bott Broadcasting sells CP in Lincoln market. KUHG 98.1 Milford goes for \$1.3 million. Warner Enterprises already owns two FMs there. They are KEZG 107.3-AM, KFGE 105.3.

Longtime Chicago AM personality Steve Dahl quits. He's through on WMVP 1000. In a dispute with Evergreen Media. Dahl's been a Chicago fixture since 1978. Smooth FM snares Danny Toy as host. Listen for him 7 p.m. to midnight.

ABC's Bill Greenwood joins its Washington bureau. He was one of first announcers on NPR. In early '70s he was on "All Things Considered." He's been with ABC since 1979.

NPR denies charges of censorship. Mumia Abu Jamal is on death row. See picture story, May, 1995, p. 8. NPR believes charges without merit. NPR chopped off his commentaries in 1994. NPR was afraid of politics of the case.

NAB's a-comin' to Las Vegas. It's added a digital data seminar. Dates Apr. 15-18. Watch your AM radio become a datastream! Maybe FM, too, will forsake music, talk.

M Street claims WYHC Charlotte uses five towers! Main 98.9 near downtown must have relayers. All are within 20 km of each other. It's filed to move the sites closer to each other.

FCC mass media bureau's on WWW. Look up status reports on applications. Also construction permits. Check <http://www.fcc.gov>. Updated first and fifteenth of the month.

National Federation of Community Broadcasters advises on starting stations. It discusses "leaky cable" and CAFM (cable). I continue to advise the Esko schools. Now they're looking into a Part 15 device. Students travel to Silver Bay MN. Observe low-power station covering building, parking lot. My W280CT may relocate to downtown Duluth. May fill in for WRSR 104.3. Later has dead spots in area. Those developed after tower move. Also advising WWJC (AM) on starting non-comm station. Would use channel in 92-108 part of band.

MN Public Radio chieftain paid big bucks. New law forced MPR to reveal Bill Kling's salary.

He earns \$291,752 a year for heading firm. For-profit Greenspring Co. is in mail-order. Kling also gets \$67,000 as MPR president. Statute was to close a loophole. Formerly, charities could secrete money to executives. Now they must disclose. Attorney Tom Kigin made \$160,742 from Greenspring. He's also an MPR vice president. Greenspring had \$153.3 million in 1995 sales. It paid \$5.5 million in royalties. Those royalties went to MPR in 1995. See picture story on Kling, June, pp. 7-8.

WinStimson pulls an incredible air shift. He's on 6 a.m. to 10 p.m. His WDUK 99.3 Havana IL isn't automated. It isn't stereo. But he likes the long hours. It isn't for sale. He likes this kind of radio. About the hours, he says, "I really don't mind. I like listening to the music we play, and the information we broadcast. I don't even mind the paperwork. Before I got into the business I used to listen to the radio, and that's what I do now," as quoted in "Radio World" newspaper.

WBAI \*99.5 NYC raised a record. Pledges came to \$1 million. Some 8000 listeners responded. WAMC \*90.3 Albany got \$300,000 in three days. This was a record, according to Alex Nardacci. Station was plagued by blocked phone lines. Police trying to find culprit. Still enough people got through. Use of 30 lines helped assure drive's success.

A new network is forming. Howard Stern and boss Mel Karmazin are behind it. The Howard Stern Radio Network to debut this year. Will offer 24-hour programming endorsed by Howie. He wants his show to expand. Now on 23 stations, he wants 200. With Infinity expanding, possibilities for Stern increase.

KEGE93.7 Minneapolis nominated for NAB's Crystal award. Winners to be announced Apr. 16 in Las Vegas. I find this a very vile station. I monitored it Fri. Mar. 22 8-8:30 a.m. Announcer tried to get women to stick finger in his belly button. Conversation about elimination followed. Spoke of guy who urinated sitting down. Other announcer came on, apologized for delay. "I was in the bathroom sitting down." Called a restaurant and complained about bad waffles. Manager was calm and collected. Yet gave impression of airing phone conversation without permission. A reporter taped 2 to 4 a.m. Sunday, outside of FCC safe harbor. "I heard all the bad words in the songs they played," he said. I am not sure of criteria for Crystal Awards. But "The Edge" seems an unlikely recipient.

Dave Frogner completes 30 years at station. He helped put KNXR 97.5 Rochester MN on air. His "Music in the Night" runs 10:05 p.m. to 1 a.m. Mon.-Sat. I am advising a local party in reception. He'd like to hear this easy-listening station in Esko.

WNCB \*89.3 Duluth responds to KNXR interference claims. Manager Jeff Stromquist wrote 66 Minneapolis people. Those were the ones claiming interference from K249DF \*97.7. Twenty people have been visited. Radio Shack yagi's have been purchased for many. All aimed at Rochester. "Your response and any information gathered at your reception location may be included in our report to the Federal Communications Commission regarding this matter," Stromquist wrote.

NPR announces "Diversity Initiative." It's like a scholarship for producers. To "diversify the voices, stories and reporters heard on public and community radio stations through local, regional and national news programs." Deadline May 10. Forms and info from Catherine Stifter, NPR, PO Box 426, N. San Juan CA 95960; (202) 414-2744.

The Museum of Television & Radio opened Mar. 18. In it you'll find over 75000 programs. It covers 70 years of broadcast history. It's in Beverly Hills CA. Privately funded, it's a sister to another museum. The Museum of Television and Radio is in NY city. The new museum "uses a computer software system that patrons can use to browse the catalogs to select particular TV or radio programs, which have been digitally recorded." The two-story museum has an art

theatre. The theatre has robotic cameras. Also featured are satellite hookups.

WBCL \*90.3 Fort Wayne's Easter project was on. Provided food for 355 needy families. They're demonstrating faith through service. Tim Yazel named assistant manager, operations. He has 19 years' broadcast experience. He replaces Jeff Carlson. Carlson was killed in an auto accident in December (Jan. p. 6, col. 2).

From the classifieds: Tower space available. Oklahoma City area. Construction begins this month. Call Brad Ferguson at KCSC \*90.1, (405) 460-5272.

SCS generator. Marti SCG-10 with receiver. WAIG \*90.3, PO Box 540, Grantsville MD 21536.

SCS receivers. Johnson, McMartin set for 67 kHz, 100.3 mhz. Dave Braun, Music of Rapid City, 322 2nd St., ZIP 57701; (605) 343-1181. Must have been used at KFXS 100.3.

Production room equipment needed for donation. WPSA \*98.3 Paul Smiths NY will pay shipping. Sean O'Donnell, WPSA, Rte 86 and 30, Paul Smiths College, ZIP 12970.

## FM FORUM

### CONTRIBUTIONS FROM READERS

Returning to comments by Joel Hermann, a long-time employee of KAYL-FM 101.5 Storm Lake IA: "I wonder if the FCC's new ruling regarding unattended operation will make much difference? There are already many stations doing that. All of our stations are on 24 hours, but the only one attended after midnight is KUOO 103.9, taking meter readings for the others, which are automated except KAYL-FM, which simulcasts KUOO. The only station in Fort Dodge with a live DJ after 7 p.m. is KKEZ 94.5, which is live 24 hours. The others in the market are unmanned evenings, overnights, most of the weekend. I expect that's true in other markets of that size."

Jim George noticed in the September issue an application for a 102.5 translator in Manahawkin NJ to rebroadcast WAWZ \*99.1 Zarephath, which might compete with WYRS \*90.7 in Manahawkin. "When I talked to the manager of WYRS, he told me not too many people know about the station. I really hope they succeed, because they have a good mix of local programs, music and some syndicated gospel programs. . . And in the October issue in 'FMakings' I saw listings for a 107.9 translator in Manahawkin to rebroadcast WJRZ 100.1 there and a 100.7 translator for Toms River NJ, also to rebroadcast WJRZ." Because WJRZ is strong in both cities, there is no apparent need for the translators. "OK, maybe in Manahawkin, because WJRZ is a little spotty there. . . I also noticed in the 'AM Happenings' section that WJRZ 1550 AM Toms River has been deleted. That comes as no surprise, because like I told you in 1994, the owners of WJRZ-FM took down the signs from the building it was going to use for the AM studio. I wonder if the frequency is for grabs?"

Stereo Review, Jan., p. 10, ran a mention of the "FM Atlas," calling the book "all about FM radio." A former student when I taught at Mankato State University, Ron Brey, Rockford IL, saw

the blurb, saying, "I'm no longer in broadcasting but I'm still interested. . . I regularly listen to Chicago FM stations 120 km away. I'm afraid they may be interfered with by new FM translators. During the summer I listen for FM stations from Minnesota when their signals are enanced by inversion layer ducting. I like to hear hometown news from Mankato on KEEZ 99.1, KYSM-FM 103.5 and KXLP 93.1. . . Radio has come a long way since the KMSU days of the mid-60s. I remember you were pretty proud that you were able to tune in at least one FM station every mile of the way on a trip to the east. Now you'd be hard pressed to find any open spectrum!"

Howard Stern signed a new five-year contract. His boss, Infinity, buying 12 more stations. He says, "That must be why they fired all the K-Rock deejays. There's no money left to pay 'em with!" WXRK 92.3 NYC has been deejay less. It finally hired a DJ. He's John "Whipping Boy" Wilbur. He'll have a weekday evening slot. They received over 700 audition tapes. One came from Emily and Debra Stern. They're Howard's 13- and 10-year old daughters.

WKTU 103.5 signed ex-WHTZ dj JoJO Morales. Also hired: Freddie Colon. Colon was with the old 'KTU 92.3. More recently he was with WQHT 97.1. That according to the "Daily News." It also reports:

"New Federal rules that require public radio stations to reach minimum levels of listenership or nongovernment funding deal a sharp blow to at least one local station. WFUV \*90.7 FM, which has a 'triple A' format weekdays and specialty programming weekends may lose CPB money—18 percent of its budget—when the new regulations take effect for fiscal 1998.

"By then a station must have 12 percent of the listenership in its coverage area or else raise at least 18 percent of its funding from nongovernment sources. WBGO [\*88.3 Newark NJ] and WNYC-FM \*93.9-AM should meet one of the two new standards, but WFUV falls far short of both standards, according to its general manager Dr. Ralph Jennings. . .

"WFUV's weekend programming includes German, Irish, polkas, r&b, and a Sunday Mass for shut-ins. These shows are very popular with their target audiences but their listenership—between 10,000 to 15,000 for most—doesn't meet CPB standards, 'so we're between a rock and a hard place. We either program more like commercial radio stations or lose our public radio money. In effect,' says Jennings, 'the new CPB requirements become a subtle way to dictate programming, and I resent that. I just think it's wrong'.

"CPB says no station will go off the air because of the new standards, but Jennings argues that instead of looking for ways to

cut smaller stations out of the shrinking federal pie, CPB should be looking for ways all stations could find new revenue. WBGO g.m. Cephas Boules favors 'enhanced underwriting', where a corporate sponsor could cite a product or service. But neither he nor Jennings wants public radio to have commercial radio-style ads."

On the recently passed Telecomm bill: Danny Buntin from Stillwater OK writes: "There are virtually no 'public airwaves' and the new bill will seek to eliminate by money, power and control, local programming and allow the vertical and horizontal joint ventures and conglomerates to rule all airwaves, programming, production and distribution of information," quoting from Chris Lunn, "Victory Review," Oct., 1995. Buntin adds: "This brings to mind more operations becoming set up like WAFR's [88.3 Tupelo MS] growing national translator network until the station got one of its U.S. senators to step in for it. . . [Commercial] FM operators will be more often competing with themselves rather than with each other. Such a situation appears to abolish the part of the Communications Act mandating that stations always be operated in the public interest. . . 'Big corporate interest' has replaced the public interest."

WNYC-TV \*31 may not be sold after all. Or there could be more FCC delay. Now local officials are questioning the sale. Station might remain yoked to WNYC-FM \*93.9.

Mean-spirited KBPI 105.9 Denver DJs invade mosque. Joey Teehan, Dean Myers and Roger Beaty entered Aurora CO mosque. They did so after morning prayers ended. They remained until the sheriff was called. One wore a mock turban. All wore shoes, forbidden in mosques. As "shock jocks" they were in a "Tortue Tuesday" gig. They had barged in playing music. "The Star Spangled Banner" was played. Instruments were a trumpet and bugle. The DJs not available for comment. Sheriff considering filing charges. The mosque filed an FCC complaint. Nihad Awad, exec. director of the Council on American-Islamic relations, said: "As we saw following the tragic bombing in Oklahoma City, American Muslims are routinely targeted by those who hold stereotypical views of the Muslims and Muslims." It went on to say, "The actions of KBPI and its employees were designed to motivate racial, ethnic and religious prejudice in the minds of their listeners, and is an example of one of the numerous forms of hate crimes." [From a NY Times article sent by Alex Nardacci.]

#### Spotlight on a NYC Pirate

Pirate radio figured big in a February article in the New York Times. Article titled, "Pirate Radio in Touch With the Village, Not the FCC," by Neil Strauss. Described was a pirate station on the Lower East Side.

Run by a mix of squatters, community

activists and electronics hobbyists, Steal This Radio goes on the air about 8 p.m. on Fridays for six hours. Between 9 and 10 p.m. on a recent Friday a cab driver stopped by to share stories of fares, a guitarist played a song about a friend who worked in a peep show, a social worker talked about vaccinating the homeless, a musician performed finger-style jazz guitar, a disk jockey played records by local bands performing that night and an American Indian recited a family prayer while playing percussion. There was a weather report.

Though anyone with resources can publish a newspaper, start a public-access television show or develop a Web site on the Internet, setting up a radio station is illegal without a license from the Federal Communications Commission. But getting a license from the FCC is nearly impossible in Manhattan and almost anywhere else in the country.

Steal This Radio's equipment at 12 watts cost its operators \$500. The station has also chosen a spot on the FM band at 88.7 mhz where, station operators say, it doesn't interfere with any other local signal.

"The risk this radio station runs is the risk of a criminal proceeding and the impounding of all its equipment," said John Crigler, a partner in the communications law firm of Haley, Bader & Potts. "Because of cutbacks in the budget, the field offices the FCC maintains have been reduced in staff, but shutting down pirate operations is still a core duty. There's a general rule, however, that the FCC doesn't get involved unless it receives complaints of interference or unauthorized operation from licensed radio stations or listeners.

"The FCC can impose only monetary sanctions. It has broad discretion in setting the fines, which range from mere sanctions to very stiff penalties. The real factor is how long the station has been a source of irritation," Crigler said.

People who run Steal This Radio call its broadcasts worth the risk. "We expect the FCC to come some time," said a deejay calling itself Fast Forward. "And we're prepared to respond on all levels, through the courts and through community organizing. They can take our transmitter but they can't take away our desire to keep this station running and our knowledge of how to do it cheaply."

One of the people, a male known as Queequeg, visited Berkeley. He saw how Stephen Dunifer was running Radio Free Berkeley. "I wanted to work with radio because not everyone in the community can read a newspaper or a computer. But everyone can get their hands on a radio."

With parts from Radio Shack and from Ernie Wilson's Panaxis in CA and how-to literature, they went ahead, saying, "Anyone with a little technical know-how can

set up a radio transmitter for as little as \$50."

Every Friday the radio collective loads its equipment into a van and drives to a new location to set up its transmitter. They hoist a tower on a rooftop, attach cable to the apparatus and away they go. Anyone with a cassette or a poem can put it on the air, and the pace often gets so hectic that the disc jockeys don't even know the names of the people they're interviewing.

Older community residents stop to sing hobo and World War I songs, and the Steal the Radio Players perform their own radio plays. In January the station broadcast a benefit concert for itself with live bands and poets. The station's only rules are no hate speech and "no gratuitous obscenity." [Article did not say how much money was raised in the benefit concert broadcast.]

Eventually Steal This Radio hopes to find a permanent location in the East Village and to broadcast seven days a week. "I'm moved at how radio creates this mood in people to speak out, Queequeg said. "But it has its limits without a permanent space. There's a woman who wants to do a show about raising children while on welfare, and she wouldn't be comfortable in that party atmosphere."

As Queequeg spoke, Steal This Radio played a cheaply recorded cassette by a squatter band followed by an interview with the members. It seems as if everyone ends up on the radio. "You can't even burp around here without going on the air," he said. "I'll be really happy when these bedroom broadcasts are over."

"Stereophile" in March had a feature on "antennae." Ed Hanlon's Antenna Performance Specialties, PO Box 9597, Bolton CT 06043; (860) 643-2733, has come up with the "Sniper." This 838 cm long antenna has 12 dB forward gain at any FM frequency, with little signal pickup from the sides. "While the 'Sniper' is a huge custom-order antenna and has limited application because of space restrictions, it does set a standard to measure any other antenna's performance. Said an observer: "Need a new 27½ foot antenna?"

The company has developed the QFM-12, with a more manageable 508 cm boom, which sells for \$175 and offers 10 dB gain and only slightly less directivity. Dan Scott, writing the review, feels a big antenna is necessary for FM because "most commercial and some NPR stations aren't worth listening to because they've succumbed to the loudness race. . . For the most part, therefore, it's the low-powered college or rare distant or weak commercial station that still offers magical sound. It's these stations that add to the high-end audio experience."

Until May,

Bene F. Elving

### New FM Station, Translator Grants

Translators have less than 100 watts unless shown otherwise

- OH Wauseon \*88.5 WYSA
- OK Okmulgee 94.1 KCFM (KTHK), c[lassical]. Now "Tulsa's Classic FM." It'll be the first

## KCFM 94.1 Tulsa's Classic fm

time the market has had a fulltime classical station since 1994. KWGS \*89.5 and KRSC-FM \*91.3 have some. Music is syndicated from SW (Sony Worldwide) Networks, NY City. Frank Christel, g. m., KWGS, says the University is still planning to go ahead and add a second station, which would be

classical. "We believe there is more than enough room in Tulsa for two stations devoted to the arts," he said. KCFM is owned by Shamrock Communications. It also also owns KMYZ-FM 104.5 Pryor-Tulsa, with a modern rock format. G.M. Rick Cohn mentioned people coming to him saying, "I feel like Tulsa's a major city now, because we have this music on the radio." Cohn laughed and said, "There's been a great deal of interest from the public and from the market about this new station. Of course, there are going to be people who are really going to miss the classic rock on 'The Hawk'. That's the problem—there's no way to make everybody happy."

"Address is 5810 E. Skelly Dr., Ste. 801, Tulsa OK 74135. Phone (918) 660-0301. They told me ratings are up over whatever format they had on 94.1 before. Plans to go to 100 kw once they pay some other station to move. My guess: KRIG-FM 94.3 Nowata. No operas, no symphony concerts, just this SW format out of NY. Mostly movements rather than complete works, something I don't care for. Lots of repetitiveness in nonclassical jingles, PSAs, commercials... Maybe 100 kw by June or July. Needs it, as some breakup on signal in car in central Tulsa, and no doubt worse to the north. Claims it's 'Oklahoma's choice for the classics'. This ignores fulltime classical KCSC \*90.1 Edmond. Any Okmulgee news or programming? Hal" [Thanks, G. Hauser, for this information. My guess is they are guessing on "ratings." It would be hard for a station, so new in its format, to have meaningful ratings. Glenn reports that Tulsa TCI Cable still has BBC World Service fulltime from C-Span on 93.3.]

**SCS Services, 57, 67, 92 kHz**  
*Symbols are as in the "FM Atlas"*

CT Bridgeport WPKN \*89.5 still  $\uparrow$ T, 67 kHz, CRIS, CT Radio Information Service. "I have glaucoma and enjoy the reading service coming in from WPKN."  
 FL Orlando WMMO 98.9, "the 200th station to join the year-long national onwider BDBS campaign sponsored by the Electronic Industries Association." KY Louisville  
 GA Albany WGPC-FM 104.5  $\uparrow$ (\ WFPL \*89.3  $\uparrow$ T, 67  
 IL Chicago WXRT 93.1 RBDS is only "93 XRT."  
 It wants to display artists' names and song titles, but has held off because the audience for the service "simply isn't there." An unnamed engineer said, "You need a critical mass of receivers for this to take off. So far that critical mass is missing."  
 MN Brainerd KLIZ-FM 107.5  $\uparrow$ , C, relay of KLIZ 1380 AM with "all sports radio"; a return of this service. [titan programming  
 MA Boston WODS 103.3  $\uparrow$ , Q, Italian Chris-/  
 MA Worcester WSR9 96.1  $\uparrow$ X, C, back to a 92 kHz relay of its AM station  
 NY New York WKCR \*89.9 has In-Touch for the blind. The service started in 1974 by NY stockbroker James Jones, who had lost his sight and was frustrated at not being able to keep up with the latest financial news. At first it had about 500 listeners, but by 1993 a deal with cable company TCI made the service available to 5 million listeners nationwide. Today it's 8 million, but so far In-Touch is not on NYCable due to a lack of open frequencies.  
 "The latest innovation that might pose a threat to SCS readings services is a dial-in newswire that uses synthesized speech, instead of human readers. Run by the National Federation of the Blind, the service currently offers USA Today. The NFB folks buy a copy of the paper at around 5 a.m., and using the latest computer technology, it only takes about an hour to set up a menu of 30 or so articles available by touch-tone phone. The speech sounds pretty good, although it has trouble pronouncing some names. By pressing a certain number, the caller can control whether the electronic voice sounds more like a male or female reader. Users range from a 14-year-old student to a 102-year-old lady who enjoys the entertainment page."  
 NY Ossining WDFH \*90.3  $\uparrow$ (\ reads "THE COMMERCIAL FREE ALTERNATIVE."  
 Being evicted from its location because of interfering with electrical equipment one floor below. "The coverage from that site wasn't good anyway."  
 NY Peekskill WHUD 100.7 displays "HUD-RADIO," and the scrolling is "extensive; 20 to 50 messages, taking about 20 minutes to read them all!"  
 OH Cincinnati WOFX 92.5  $\uparrow$ M, 67. All music, except once an hour it announces, "WSAI, the subcarrier."

OK Sapulpa KXOJ-FM 100.9 +G, Moody.  
 "We're renting at \$1250/month, the cheapest we could find in the market... I don't know of anyone who has a better price on modified radios than you do."  
 OK Tulsa KJSR 103.3 no  $\uparrow$ T. No SCS and "was surprised to hear of the [former] reading channel. A manager at KTFX 102.3 [Sand Springs] said they have no reading channel; so the SCA equipment was not moved to this transmitter. I also checked with the OK Library of the Blind in Oklahoma City and they said OK has no reading channels. Bruce, this is an invaluable service for the blind. I am sure you are on the right track, but not in this area. It's surprising no educational stations in this area have SCA reading service for the public. These stations are in a real financial squeeze."  
 TX Wichita Falls KTEO \*90.5  $\uparrow$ , X, 92 kHz. "It's a frequency shift data service supplied by NOAA. They encourage distribution of their data service. The local NOAA office closed here, and this is a city of 100,000 people. We will broadcast the digital data free of charge to the listeners. The listener will have to interface the SCA with a simple modem device, sold by a firm in MD, for their computer." Main channel of KTEO is mainly classical. "We are listener supported and accept no government funds; no CPB affiliation."  
 "I get the radio reading services from Cincinnati, Louisville and Lexington, along with their program guides. Cincinnati was surprised that it comes in here in Frankfort KY on a modified G-E Superadio."  
 "I am real happy with the FM Atlas, and enjoy once again receiving FMedia! [but] am real disappointed with the National Radio Club's AM radiolog. This has numerous errors just in these local stations," W.F., Bradenton FL.  
 "My new kit, Elf-2, works very well in my Allied Astronaut multi-band portable," W.G., West Sayville NY.  
 "I am not a fan of your new writing style... Short, choppy half-sentences [listeners upset. "Can't hear the Rick and Bubba Morning Show." "Problem is adjacent-channel interference."] are fine for headlines, but they tend to call attention to themselves and become distracting when used in text. They remind me of a word processor with a defective disk drive that's about to crash."  
 "During FM skip season I'm gonna leave my Onkyo RDS tuner on an empty frequency 91.9 whenever I go out, in case an RBDS station comes in. If it does, the station ID will remain in the display window and I can add the station to my DX list without ever hearing it!... Just a couple of days after writing you that I wanted a portable with scrolling RDS, I got the June Popular Communications which had an ad for the new Sangean ATS-909 with full RDS reception. I guess that means it scrolls! I wanted to order it... but all four dealers I called said the radio won't be available 'til at least mid-June. Size is 21 by 13 by 4 cm; list price is \$349. I wonder if Radio Shack will offer a clone of it?"  
 The June PopComm offers views by columnist Tim Kridel on why RBDS hasn't really caught on in the U.S. A separate article in the same magazine reports how KTBB 107.5 Lake Jackson-Houston uses its RBDS to activate an electronic billboard that people apparently "love... They expect us to provide them technology like RDS. We jumped right on it, and I'm glad we did. We're now satisfied RDS users."

 TX Arlington KEWS 94.9 News 95  
 WA Tacoma KCIN 106.1 Kiss 106 (strict; see last month, p. 3, col. 1). Air staff ousted, followed by 39 hours of "oddball" broadcasting of bird calls, ships creaking, wind blowing—all designed to indicate a change in the offering. "Hey, how about a frog concert? We could broadcast one every night from here this time of year!"

One of the announcers fired was Ichabod Caine, who was "the top air personality in the city when he jumped from KPMS-FM 94.1 to KRPM (106.1) in 1994. He's left, for the moment, to work his two weekly syndicated shows, "Honky Tonk Sundays" and "The Country Club." Cat Sandquist, his producer, said each is heard on dozens of stations around the nation and "Honky Tonk" is on Armed Forces Radio in 140 countries. "They didn't know until after their morning show on [March] 18th that it was their last." Those who were suddenly fired, including Caine and Dewey Boynton, got two weeks' severance pay.

**Multi-City IDs In Use**

GA Greenville WKZJ 95.7 with LaGrange-Columbus (ID list no longer varies), now "K-95.7"  
 GA Helen WHEL 105.1, with Gainesville, "shortened to two cities and no longer varies"; now "Goldies 105.1"  
 PA Covington WDKC 101.5 with Wellsboro-Mansfield-Blossburg

**Selected AM Happenings**

AR Dermott KGPL 1110 off over a year. FCC issues "show cause." License revocation to begin.  
 AR Kensett KMOA 1190 off. Receives FCC letter.  
 AR Paris KCCL 1480 off. Also gets FCC epistle.  
 CA McFarland KJAZ 1590. FCC cancels CP. Call letters deleted.  
 CA Redding KROG 1330 recently on with contemporary Christian. Finds itself in jeopardy with the FCC for being off. FCC claims attempts to reach station have been ignored.  
 GA Camilla WCLB 1400—license deleted.  
 HI Honolulu KISA 1540 was Filipino. Now silent.  
 IL Chicago WJJD 1160. A big surprise is "how little impact Howard Stern is making for his latest Chicago affiliate, WJJD AM. The shock jock was ousted from rival WCKG in September 1995 and was picked up by WJJD, but, at last check, had done little to raise the station from its morning rating of 21st."  
 KY Bowling Green WLBK 1410 deleted.  
 KY Louisa WVKY 1270 deleted.  
 LA Columbia KCTO 1540 deleted.  
 LA Marksville KAPB 1370 deleted.  
 LA Winnboro KMAR 1570 deleted.  
 MD Indian Head (near Washington DC) WNTL 1030 silent.  
 MN Minneapolis KTCJ 690 back on air.  
 WCCO 830 back on top, fall Arbitron. Poor performance by MN Twins hurt earlier ratings. A new manager helped. Jim Gustafson got rid of some sleaze. KQRS-FM 92.5-AM nudged to second place. WCCO AM 13.1, KQRS-FM-AM 10.7.  
 NY New York WABC 770: Conservative talk show host Bob Grant fired. Happened a day before a planned protest. Jesse Jackson and others were offended. Protest would have been outside the studios. Grant said of dead commerce secretary "My hunch is that he [Ron Brown] is the one survivor. I just have that hunch. Maybe it's because I'm a pessimist." Protest would have been aimed at advertisers. Grant's firing "comes a month after WABC cut lawyer Alan Dershowitz's call-in show from the lineup because Dershowitz had called Grant a racist." Chris Oler of the Associated Press wrote. "Eventually his racism caught up with him," Dershowitz said. Grant had worked at WABC 10 years. His was on 3-7 p.m. He was a talk show pioneer. He had been on area stations 30 years.  
 NY Schenectady WGY 810 had a hoax. On April 1 it introduced the "P-chip." It supposedly censored offensive radio material. Bee Gees music played over offensive language. "Slightly more than 50 percent of the people got it," said operations manager Tom Parker. "We didn't carry it as a news story." The stunt created "a lot of buzz for the station during an Arbitron ratings period." Why the offensive language in the first place? ask.  
 NC Kannapolis WGTL 670 deleted.  
 OK Henryetta KDLB 1590 off over a year. Gets FCC "show cause" epistle.  
 PA New Kensington WGBN 1150 was silent. A fire put it off the air. Now back on with black gospel. [had Christian country.  
 PA Shippensburg WSHP 1480 silent. It/  
 TX Port Neches KUHD 1150 gets FCC epistle. Has been off over a year.  
 ON North Bay CFCH 600 now all talk. Prompted by competitor moving to FM. CHUR 840 now on 100.5. Talk seen as "a clear and unique alternative."  
 "Electronic technology is forcing us to reconsider and reveal practicality every thought, every action and every institution formerly taken for granted. Everything is changing—dramatically," H. Marshall McLuhan from around 25 years ago. "It is still a very relevant quote to dwell upon today," Danny Buntin, Stillwater OK.  
 "It's strange that the new M Street Radio Directories are so late this year, and that the company has moved from DC to NY to (gasp!) TN. Hopefully, they're still solvent!" N.L., Atlanta GA.

**FM Rulemakings Proposed**

*First date is for filing comments at FCC; second date is for replies. Stations affected, if any, are listed.*

- AL Ethelville 92.3 (move from Starkville MS 92.1A), WMSU, May 23, June 7
- CO Lafayette 94.7C (move from Boulder), May 21, June 5
- KS Kiowa 98.3C1, May 21, June 5
- SD Brandon 100.1C3 (move from Sibley IA 100.1A), May 21, June 5
- WY Green River 101.5C, May 23, June 7

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AL Selma 105.3C2 ended May 7
- AZ Gilbert 103.9C2 (move from Coolidge 103.9C3), KBZR
- CA Lenwood 104.5A ended May 7
- CO Silverton 103.7C2 ended May 7
- MI Baraga 104.3C ended May 7

- UT Brigham City 100.7C ended May 7
- WI Cornell 99.9C3, May 13-June 13
- WI New Holstein 92.9A ended May 7

**New Radio Regulations for Canada Proposed**

The Canadian Radio-Television-Telecommunications Commission has proposed several rules' changes. Number of hours of simulcasting would increase. Now 42 hours' FM-AM simulcasting allowed. But that must all be midnight-6 a.m. Another 42 hours' simulcasting would be allowed. Those could be at any time.

Allowing a second FM would become easier. But prior approval would still be needed. FM-FM and AM-AM duopolies possible. Windsor is an exception. A duopoly has existed there on FM. That's because of intense Detroit competition. "An exception would be the acquisition of public-traded shares in a corporataion that owns stations in the same market," notes "Broadcast Technology" magazine.

Cancon: Stations could change the percentage of instrumentals without CRTC approval. That is provided the Cancon level is met. Only 15% of music has to be Canadian content. That is, for a format of 50% instrumentals.

**Public Broadcasting to Become Commercial?**

The Public Broadcasting Self-Sufficiency Act of 1996 exposed at a hearing. It's Rep. Jack Fields' baby. "Although the Fields Draft Bill proposes the establishment of a trust fund to secure the future of public broadcasting, it also presents radical amendments to public broadcasting's historical noncommercial mission," says "College Broadcaster" magazine.

Sec. 102, Expanded Underwriting Opportunities, proposes allowing public broadcast stations to accept remuneration for carrying; A) well-established corporate logos or slogans, even if such slogans

include a call to action; and B) strictly quantifiable comparative description of products, services or providers of services.

Sec. 103, Public Commercial Partnerships, further allows for the broadcast of programs "produced by, or at the expense of, persons other than the licensee, and may receive compensation (in addition to costs incidental to production and broadcasting) for broadcasting such programs."

The Fields bill encourages public stations to pursue a more commercial approach, "and would bring considerable commercial pressures to public broadcasting. Additionally, the Fields Draft Bill would shift decision-making power away from local radio and television stations and concentrate it at the national level," cautions the NACB (National Association of College Broadcasters).

Paul Peterson, manager of WCAL \*89.3 Northfield, wrote in his station's program guide: "This [act] is a vital step in securing the future of public broadcasting. Aside from this act, there is no provision for federal funding--or a replacement for it--after Fiscal Year 1998. [But] the bill in its current form would imperil the commercial-free and local character of public radio and television." It would put "significant commercial pressure on public broadcasting. At 89.3 we believe that noncommercial stations should not be allowed to make money by broadcasting commercial programming... Commercialization of public stations would reduce the number of voices heard on the airwaves. . . My view, from within the public radio system. . . is that public broadcasting will survive and thrive without federal support only if replacement funding is provided from a new source and only if the noncommercial character and localism of public radio and TV are preserved. I hope you might agree and let your representative and your senators know your views. . . The bill in question is HR 2979." He goes on to mention WCAL's membership is at 10,000. "We welcome 531 listeners who joined the WCAL membership in our March pledge drive." WCAL serves Minneapolis-St. Paul. It bills itself as *the music station that keeps you informed.*

Vince Curren, WXPB \*88.5 Philadelphia, is saving money by cooperating with two other public stations there. WXPB has a \$2.2 million budget. Tom Thomas, former head of the NFCB, and a consultant for the Station Resource Group, said "Public radio is very much a growth enterprise. [It's] doing better this year than last year and has been on a long-term sustained period of growth." Curren, however, sees no federal funding for public radio in a few years.

**Small-Print Happenings and FM Industry News**

EZ Communications buys up St. Louis. This makes for three FMs there. Those plus two AMs in the market. KEZK 102.5-AM being added. EZ already has KSD-FM 93.7-KYKY 98.1.

Media hog comes to Grand Rapids. Clear

Channel buys WCUZ-FM 101.3-AM. It already owns powerhouse WOOD-FM 105.7-WBCT 93.7. It's also buying up New Zealand. It gobbles all stock in Radio New Zealand Commercial. Letter owns 41 stations. Buying from the government of New Zealand. Pays NZ \$89 million.

American Radio Systems buys KDBX 107.5 Banks. Pays \$14 million to Salem Communications. Salem holds KPQD-FM 93.7-AM Portland OR. ARS also buying KUFO 101.1-AM.

WKSS 95.7 goes to WHCN 105.9 Hartford. Price to Multi-Market \$18 million. Plus it owns WMRQ 104.1 Waterbury-Hartford.

Two Madison radio companies merge. WIBA-FM 101.5-AM and WZEE 104.1 involved. Includes WMAD-FM 92.1Sun Prairie. Fate of WMAD AM unknown. WIFC 95.5-WDEZ 101.9 Wausau merge. Midwest Communications is the buyer. Seller is the Journal Broadcast Group.

Bahakel Communications ups to 11 stations. Gets Park's WDEF-FM 92.3-AM Chattanooga. It already owns WDOF-FM 96.5-AM. Also buying KFMW 107.9 Waterloo. It owns KOKZ 105.7-AM there.

Commodore Media buys up Huntington. Among new holdings are WKEE-FM 100.5. Plus WFXN 106.3 Milton WV. Also getting WBVB 97.1 Coal Grove OH. And adding WMLV 107.1 Ironton OH. It already owns WTCR 103.3 Huntington. It will own 10 in the market. That includes AMs.

Mergers on Long Island include Barnstable Broadcasting. It owns WKJY 98.3-AM Hempstead. Now adding WRCN 103.9 Riverhead. Plus it's getting WMJC 94.3 Smithtown. "There's no mention of Starr's (one of the sellers) silent AM, WRHD Riverhead."

Upstate, Evergreen sells WHTT-FM 104.1-AM. Buffalo stations being bought by Mercury Radio. Paying \$19.5 million. Mercury already has WGRF 96.9-WEGE 103.3. Evergreen also sells WSJZ 92.9. Goes to American Radio Systems for \$12.5 million. ARS owns WYRK 106.5, WJYE 96.1. ARS has purchase option for WBLK 93.7.

Max Media will own three FMs in Greensboro-High Point. It's buying WQMG-FM 97.1-AM. It has WJMH 101.9 Reidsville-WMOX 93.1 Winston-Salem.

WCOD 106.1 Hyannis merges. It's to go with WUNX 93.5 Harwich Port-WUNZ 101.1 Falmouth MA. They'll combo with WXTK 94.9-AM West Yarmouth.

Nationwide Communications and Omni America swap stations. Avoid taxes on transfers. Except for cash part. It'll be swap plus \$43.5 million cash. Nationwide to pay. Cleveland and Orlando mainly involved.

In Albuquerque, KRST 92.3-AM go to Citadel Communications. Also buying KRZY-FM 105.9 Santa Fe. Paying \$23 million. Also owns KKOZ-FM 94.5-KMGA 99.5.

Paxson Communications buy hits snag. It was to have acquired two stations. Miami area stations were involved. WXDJ 95.7 Homestead, WRMA 106.7 Fort Lauderdale identified.

Trouble on the DAB front. Field tests planned for May are off. A shortfall of \$500,000 is cited. Three groups were to have participated. They are Eureka, VOA/JLB and USA Digital. Must report to Electronics Industries Association. That is, if they want to keep the proposal alive. "BE Radio" speculates that in-band on-channel DAB may be doomed. That is, if planned tests don't come out right. "Probably the most disappointing outcome of the DAB lab tests was the interference performance of in-band systems. All FM in-band systems showed poorly in terms of first- and second-adjacent channel interference, in the analog-to-digital and digital-to-analog directions. Even though the formats conform to the FM channel's RF-mask, these interference problems apparently result from the wide bandwidth requirements of in-band digital signals. In particular, the so-called 'saddlebag' approach of in-band on-channel (IBOC) systems loads significant energy into the outermost edges of the FM channel."

"These results indicate that with current technology, an FM station's in-band digital coverage would be hard pressed to match its analog coverage, and more important, that

in-band digital signals may cause new interference to existing analog stations." It may not work as well in densely populated areas. The call letters KEIA have been assigned. They will be used for experimental terrestrial DAB stations. A 5 kw on 96.9 in San Francisco to be tested. It will have gap fillers. Those to be fed by microwave.

Cable network TCM (Turner Classic Movies) will offer DVS on its SAP once a week for 12 weeks. The movies will air Sunday nights. They include Casablanca and the Adventures of Robin Hood. "Those interested are advised to remind their local cable companies to activate the SAP."

The FCC makes license renewals easier. Comparative hearings for those out. It plans a "two-step" renewal process. This is in line with new Telecomm Act.

FCC rate card announced. Radio fees up slightly from last year. These include: FM Class C, C1, C2, B \$1125. FM Class A, B1, C3 \$755. FM CPs \$625. FM translators/boosters \$170.

Obituaries: Fred Metcal f, 74. He was a co-founder of CIMJ 106.1-AM Guelph ON. He had a long battle with cancer. He was president of Maclean Hunter 1977-1984. Also was a founder of a cable group. That was the Canadian Cable Television Association.

Will Studer, 84 (pictured). He founded Studer Revox of Switzerland. For his reel-to-reel inventions he chose Revox. Big studio recorders were named Studer 27. He started the corporation in 1960. It was sold in 1990. Studer Professional now owned by Harman International Industries of the U.S.

Fined by the FCC for EEO violations: KKIQ 101.7 Livermore CA \$10,000. Also KFSD 94.1 San Diego, \$15000. This is a redudement from \$18750. The Commission agreed it made efforts to recruit minorities; those efforts just weren't good enough for KFSD to get by fine-free. RI Middletown WOTB 100.3+AM \$16500.

Is there an FM TIService? I was told there was. Then told there wasn't. You decide. TIS: Travelers Information Services. All had been on AM, 1610, 530. Now allowed elsewhere on the band. I talked to three at the FCC. Brad Deutsch, audio services division, mass media bureau. He referred me to Jim Burtle, TIS chieftain. He's assistant chief audio services division. He knew nothing about an FM TIService. I was referred to Jeffrey Kam, an engineer for spectrum utilization and economic research. He is liaison with other agencies, including the NTIA. I mentioned the airport stations in Atlanta and Newark NJ. GA's KF2XBF he said are experimental calls. Then I mentioned Avis and their plans to go into 30 airports on FM. He alluded to legal action against Avis and Capital Broadcasting Systems (Feb. p. 3, col. 1). Would not elaborate. Said more info would have to come from the FCC general counsel's office. Or from the FM branch.

I mentioned apparent TISations on FM. These are WYHC 98.9-98.7 Charlotte NC and WAEM 102.3 Miami. He checked the database and, sure enough, they are there and licensed. I mentioned military stations like WFGG \*89.9 Fort Gordon GA and KTRK \*89.9 Fort A.P. Hill VA, near Washington DC. He agreed they are there, but not licensed by the FCC. I asked on behalf of a local high school that wants FM, possibly as a TISation, broadcasting to the nearby freeway. He agreed a school could hold such a license. Format would probably include students announcing to the travelers, but probably no dee-jaying or play-by-play sports. He suggested the school try to get in under the wireless microphone rules. I pointed out the school wants more coverage, such as what my translator (now off the air) could provide.

Translator could be preceded by a modulator to broadcast anything. Or he thought an educational channel could be applied for in the 92.1-107.9 commercial part of the band. He said "wireless microphones are a problem. They are used for pirating, and the FCC doesn't have the resources

to go after all of them. We act on complaints." He agreed a translator could probably get by relaying a Part 15 (unlicensed) station, but would have to check the definition of a translator first. Students, when I reported on this conversation, said they were not interested in an AM TISation, but only FM. I agreed to help get them on the air, possibly even before this school year is over.

My translator was briefly tested in downtown Duluth relaying KDAL-FM 95.7 using an indoor antenna. Reception was good only in front of the building. Two other firms, including one noncommercial, are interested in using that equipment.

Country radio is the most popular format. An AP article said of the country audience: 85% are white, 5% black, 4% Latino, 1% Asian. 32 percent call themselves Republicans or conservatives, 27% Democrats or liberals, and 19% are independent.

Thirty percent had some college; 23% graduated. Three percent "done" graduate work.

"Radio industry insiders said they were surprised that country music fans would most likely listen to a station that mixed hot, new records with oldies, as long as they weren't too twangy. That debunks the current trend of sticking with the newest, hottest singles. Thirty-one percent of country music fans also said they listened to rock music and rock'n'roll stations," wrote Jim Patterson.

Denver disc jockeys apologize. They're the ones who invaded the mosque. See last month, p. 8, col. 1. Roger D. Beaty, 39, and William H. Jones, 33, morning stars of KBPI 106.7 (not 105.9 as shown last month), agreed to broadcast daily apologies for a week. Station also buying billboards, newspaper and TV ads to apologize for its employees' conduct. Plus they were suspended without pay for 10 days.

Talk shows are mostly on AM, but an article in the Dallas Morning News outlined the infighting that goes on in that field. With no Fairness Doctrine there's not the incentive to hire liberal hosts. The scenario is "fairly bleak," said Jim Hightower, whose syndicated show was cancelled in October, 1995. He said his show was cancelled because he criticized the purchase of ABC by the Walt Disney Co. The real danger is the increasing conglomeration of radio ownership made possible by the recent telecommunications act.

"You'll have Rush Limbaugh berating government, but you don't hear any of these conservatives taking on this power. The telecommunications act is going to lead to a narrowing of viewpoints on the radio airwaves." National Public Radio—a monophonic FM source—has been criticized for a liberal bias, although with less audience than the conservative shows enjoy.

Howard Stern adds several stations. Those include WKLQ 94.5 Holl and MI. He replaces Mark McCollum and Michelle McKormick, "who were recently taken off the air because of low ratings." 94.5-KLQ did its research, calling stations in other markets having Stern. "From a morning show standpoint, he's virtually No. 1 in most of the markets. We only heard from two stations where maybe it wasn't working for them saleswise: one was a pop-adult contemporary station looking for 35-plus adults, and the other had changed to country. . . Virtually every other radio station said that they made more money than they ever imagined they were going to make," said WKLQ's Bart Brandmiller.

WBCN 104.1 Boston has Stern now in the morning. He was heard evenings via tape delay. Charles Laquidara is the guy Stern ousted in the mornings. Laquidara now doing mornings at WZLX 100.7. The Howard Stern Radio Network, set to debut later this year, will offer 24-hour talk and music programming he endorses. "Probably mostly alternative rock, since that's what he likes. A lot of Howard's movie Private Parts will be about his early radio days, so the scenery crew will recreate the studios he worked at in the 1970s. These include WCCC-FM 106.9 Hartford CT, 'W-4' (WWWW) 106.7 Detroit, WRNW 107.1 Briarcliff Manor NY (which broadcast from two bedrooms of an old house). . . They're going to dig up some old station bumper stickers and T-shirts."

FM station totals from the FCC: 92-108 mhz 5332, 88-91.9 1829, FM translators 2500.

From the classifieds: Looking for innovative program director. Resume and references to Oldies 99/WAYS, PO Box 5008, Macon GA 31213. EOE.

FM Atlas catalog on cassette. New 1996 edition for the blind. \$2 me.

Retired couple with cash seeks FM-AM combo. Dark OK. (718) 893-42328.

Station manager to work with volunteers and small, paid staff. Wants a person with fund raising and computer skills, and committed to continuing our format of easy listening music (75%) combined with a Christian emphasis (25%). Resume and references by May 30 to KCMR \*97.9 Manager Search, PO Box 979, Mason City IA 50402. EOE.

Wants to swap a Sherwood 3300 and/or National NC 1000 FM-AM for a Grundig Yacht Boy 400, or for cash. NC 1000 lacks a cover, "although I would supply a set of functional tubes." Michael Harla, 1337 Norris Dr., Vineland NJ 08360.

JT Communications, Jim Trapani, has replacement exciter at \$1595 and other RF equipment, including a remote controlled tuner at \$595. Contact their broadcast products division at 579 NE 44th Ave., Ocala FL 34470; (904) 236-0744. The PLFM-100A, 100 mw output, will retrofit into obsolete FM exciters, eliminating the problem areas of the old exciters. It fits on a 3" by 5" PC board, and is \$249.95. Plays on 12 volts DC.

FM FORUM

CONTRIBUTIONS FROM READEERS

Jeff Jacobsen, station manager WNFA \*88.3 Port Huron MI, sent a cheerful note. His station's now 10 years old, relaying on 90.7 WNFR Sandusky MI. "Just a note of appreciation for your continued good work with the 'FM Atlas'. . . I find it a source of information for some of our listeners who call and want station information on similar formats. . . With a truly 'international' audience, WNFA continues to provide area listeners with the best in music and programs without commercials."

Former Fort Wayne broadcasting personality Phil Reaser, known to listeners as Phil Gardner, takes over as drive-time host on WBCL \*90.3. He fills the vacancy left by the death of Jeff Carlson. His experience includes working at WZRQ [now WDJB] 106.3 Columbia City and WLYV Fort Wayne. Char Binkley, g.m., said, "Phil comes to WBCL with a different name—he'll be using his real name of Reaser—and he comes with a different life! A life transformed by Jesus Christ. Phil will be sharing his changed life and his faith via Christian radio."

Media pundit Glenn Hauser has his "World of Radio" on shortwave WWCR Nashville. Times CDT are Thur. 3:30 p.m., Fri. 4:15 p.m. 15685; Fri. 5:15 p.m. 9475. Sat. 5:28 a.m. 5065, 10 p.m. 2390, Sunday 3 a.m. 3315, 1 p.m. 12160, 4:30 p.m. 9475, Monday 6:30 a.m. and 3:30 p.m. 15685, Tue. 7:30 a.m. 15685.

Alex Nardacci sent a story about hearing radio on the Internet. Many stations are available, but it won't replace hearing FM directly. "This is listening in the rough. We're in the early stages of Internet radio, and a big part of the reason to tune in these stations is just because they're there. You can't always count on connecting, and my ears could take only so much of the often muddy sound," writes Leonard Wiener in the April 1 "U.S. News and World Report." He reports on a listener in Indonesia sending KOYN 93.9 Paris TX a report. Some listeners like to phone talk shows hundreds of kilometers away. Others who have moved away like to listen to radio from where they lived.

Until June. Bruce F. Ehling

**On Air—Real Stations and Pirates (Selected)**

CT Hartford WCCC-FM 106.9 returns Howard Stern. In late '70s he worked there as a deejay for \$250/week. "Howard is 100% certain he'll win a Best Actor Oscar for his movie *Private Parts*, now filming at the Silvercup Studios in Queens."  
 FL—several pirates, the strongest of which seems to be 91.5 in the Palm Beach area, with "headbanger music," and ID on the top of the hour: "This is WASP in Palm Beach Gardens." Another pirate is in Lutz FL (north of Tampa), recently busted by the FCC. It ran about 50 watts on 96.7; had been on for a

year, ranting about a "secret plot to take over our government."  
 MD Rockville "WMCR" 87.9, a Part 15 station. It was on every day of the school year, usually 9 a.m. to 6 p.m. and, "Yes, they are a commercial station with ads for many local stores and restaurants." Mono. Uses the same calls as an AM in Oneida NY.  
 MA Springfield WSCB \*89.9 back on in stereo after being off a year. "I built new studios and put in a new exciter; the station should be back on running 20 hours a day. It was not stereo for a while when the tube exciter was failing."  
 MI Holland WTHS \*89.9. Was off for a while after the school year ended, since Hope College has no summer sessions. It's back for the summer with limited—6 hours/day—schedule of Spanish gospel programming, run by the Radio Bible Class from Grand Rapids MI. "They've done this every summer since about 1990. It will resume student-run rock this fall."  
 MN Esko "WEHS" (WEHS-TV is in Aurora IL) 103.9. Used a translator preceded by a modulator at end of school year into a small directional antenna to broadcast mono rock. "Thanks to the help of the Northland Foundation, the Esko School Board and Bruce Elving, we have almost all of the equipment we need. [Elving] is letting us borrow some of his equipment, and is helping with a lot of the technical side of things," writes Melissa Davey in a school and community paper known as "Esko's Corner."  
 MN Northfield KRLX \*88.1—at least it was on at the very end of the school year. Returned after a year absence, "Stereo."  
 MN St. Louis Park KDXL \*106.5, also operated at the tail-end of the school year. "Phone book listings are a poor source for determining who's on the air! . . . The Minneapolis phone book contains no listing for KJJO-FM (now KMJZ) and no listing for the new calls, either, only "KJJO AM 950", which of course is now KSGS. KEEY is listed only as K-102. . . Listings for KYCR and KQQL are alphabetized deep into the Ks, instead of at the beginning of the Ks, as most broadcast outlets are. Who is going to see them there? Using the phone book listing rationale, it would appear KEEY, KQQL, KMJZ, KSGS and KYCR are all off the air!" KDXL "is now back on in stereo on 106.51 Phone (612) 938-6295 (voice mail). Odd time to be back on when school is about over. Get on or lose license? Same with KRLX?" [KDXL] playing not as hard a rock now. . . .  
 NY Fort Kent (Lake Champlain area): "Ferry Authority operates some kind of TIS station on 89.7."  
 NC Spindale WNCW \*88.7 with bluegrass, part of a growing trend in broadcasting. This trend includes AM stations WLOD Loudin TN, WJJC Commerce TN and WDSL Mocksville NC. Fifty-five percent of the stations with bluegrass are commercial; 60 percent are said to be FM, despite the examples given here.  
 SD Carpenter K252--\*98.3 with KNWC-FM 96.5 Sioux Falls. Also on there is K261CH 100.1 with KCGN 101.5 Ortonville MN. However, the two will not operate simultaneously "because of interference. Contact Owen Gross of rural Carpenter for information."  
 PA Philadelphia 95.3—northeast part of town, \$, r, with an estimated 100 watts. "It stopped my car radio's scanning. I forget the call letters they use."  
 97.7 West Philly, urban, mono, "getting chopped up by WPST 97.5 Trenton NJ."  
 VA Warrenton WQRA 94.3, still using those calls, and not changing to WINX-FM, even though simulcasting WINX AM.  
 PQ Baie-Comeau CHLC 97.1 "unprofitable for the past three years" has been sold along with CFEI 106.5 Ste. Hyacinthe. Buyer not identified.  
 BAHAMAS 96.1—"Strong with ads for vendors in Port Lucaya and Freeport."  
 100.3 100 Jam, ads for Team Bahama. "ZNS or private station?" Frequencies approximate as

**radio 96.7**  
 seacoast's rock alternative

received on a DX 400.  
**NZ Wanganui Star FM** (frequency not available): A man claiming to be carrying a bomb dropped in and held the manager hostage and demanded the station broadcast the Muppets Song, "The Rainbow Connection," which it did for 12 hours. "I think I'd rather be the hostage than a listener."

**Off Air—Or Not Yet On**

- IL Crete WEMG-FM 102.3**; had been mono. "Their transmitter site appears to be abandoned. The area around Beecher is too sparsely populated to support a radio station." Seeks involuntary transfer to Word of Faith Fellowship, E. Crane, trustee.
- MI Grand Rapids WBYW \*89.9**: "Still off with no indication recently as to when they might return. Your guess is as good as mine!"
- MI Olivet WOCR \*89.7**: "I'm not sure it's ever operated," although listed as being on the air in stereo.
- NJ Franklin Lakes WNJW \*88.7** is "dark"
- NC Bayboro WKZF 97.9**—off over a year—receives FCC epistle designating its license for hearing
- OH Galion WQLX 102.3** off the air
- TX Brownfield KLZK 103.9** silent for seven years. FCC designates for hearing. Remove \$, format information for them.
- TX Canadian KYEG 103.1**—FCC sent letter, "show cause why its license should not be revoked?" Sent to station under old call letters, KRBG. Watch for it to return to the air, but not under its higher power formerly authorized frequency of 94.9.
- WI Eau Claire WUEC \*89.7**—until September. On May 15, it invited listeners to tune in [other] WI Public Radio stations. "Playing jazz in stereo 5-15-96 when I tuned 'em in after reading the new FMedia!"

**Deletions**

- GA Bolingbroke WBDS 102.1**. Has been ordered off the air by the FCC. "Even though the station has been on the air since late last year serving the Macon GA market, the Commission could not let go of the fact that [Joseph I.] Kendrick let his CP expire in September, 1994 without giving the FCC a good reason why. . . The FCC reasoned that even though the station will be taken out of service, the market is still served by 20 broadcast signals and that rewarding Kendrick's failure to timely construct the station would be more damaging to the public interest," so noted the "M Street Journal."
- GA Brunswick W213AA \*90.5**. See "New," above.
- IL Mount Vernon W212AK \*90.3**. See "New."
- MD Baltimore WBYQ \*96.7** (not to move to 94.3).  
 WHPS \*96.7—former sharetimers
- MO Portageville \*91.5**. FCC rescinds grant to World of Victory Outreach Center, returning its application to pending status.
- NM Clovis K216CN \*91.1** (see "New," above)
- NC New Bern W203AG \*88.5**
- UT Beaver K204BV \*88.7**

**FMistakes—FM Atlas 16, FMedia!**

**SCServices, 57, 67, 92 kHz**

*Symbols are as in the "FM Atlas"*

- FL Winter Park WLOQ 103.1** tL, 67 assumed. "We are carrying a Panama City FM stereo station from the satellite and rebroadcasting it on 103.1 in central FL. I am not sure if it will be 67 or 92 kHz. My expertise is video, and we are into descrambling the video."
- GA Atlanta WRFG \*89.3** t() ,l. "The 92 kHz is an Iranian service in Farsi."
- GA Smyrna WSTR 94.1** no SCS: tZ, 67, "discontinued after 20 years; remains RBDsless."
- KY Louisville WFPL \*89.3** no SCS. "The reading service has not been on for a long time. They are considering another type of SCS service."
- WFPK \*91.9** tZ, 67; and **WUOL \*90.5** "still has its music."
- MI Twin Lake WBLV \*90.3** tT, to have Sight Seer reading service from Grand Rapids. "Our mail box brings requests from as far away as Traverse City and Kalamazoo, hoping the reading service will soon be available for them."
- MN St. Cloud WWJO 98.1** no SCS (had tU)
- MN Waite Park KLZZ 103.7** no t, R (still tM)
- MS Ackerman WFCA 107.9** no tM, 67. No SCS.
- NJ Teaneck WFDU \*89.1** t, K (92). Name sounds like "Radio Kon-Jah-Deh," and "so far, it's not carried on the 67 of WNYU \*89.1 New York city which shares the frequency." Probably from Radio Seoul, 375 Sylvan Ave., Englewood Cliffs NJ 07632; (201) 541-0882. WFDU is off the air weekdays from 3:45 p.m. to 1:15 a.m. when WNYU overtakes. On weekday evenings it has two hours of "SAT practice questions followed by an hour of lessons in practical English."
- NY New York WSKQ-FM 97.9** no tH, 67. "Radio Soleil closed." It will become tL, a Panamanian service. "We will be charging \$2 per month for the receivers, and hope to come up with some way of encrypting the signal so pirates can't tune in." To be run by Mr. Aquilino Paris, a Panamanian living in Perth Amboy N.J. "I set up the satellite feed for Dr. Joel Borgella, who had to return to Haiti because he was in some sort of trouble with the government there."
- WAXQ 104.3** has 1, C, Mandarin, replacing Radio Sedaye Iran, "which so far hasn't turned up elsewhere" on SCS. "WAXQ's 67 still Korean Christian Broadcasting."
- TN Chattanooga WSKZ 106.5** t()
- PQ Montreal CBF-FM \*100.7** turned down in its bid for SCMO to provide Haitian programming from Radio Tropical e. Opposing were **CIBL 101.5**, **CINQ 102.3**, **CFMB AM** and **CHAA 103.1** Longueuil. **CKTB (AM)** St. Catharines also sought more ethnic—up to 75% of its revenues—but was opposed by Toronto ethnic broadcasters. "I always look forward to FMedia! each month," L.J.S., Fairview NJ. "I can't wait to get my new radio with SCS!" D.A.H., Trinity NC.

**Multi-City ID in Use**

GA Martinez WKBG (but pronounced on the air as "WKBG-FM") 107.7 with Augusta, dropping Aiken SC. Now "Sunny Country 107.7" (from "Big Country 107.7").

**Selected AM Happenings**

CA Lompoc KCLL 960 silent  
 CA Montecito to KNZS 880—FCC cancels CP, deletes call letters [from KPPC  
 CA Pasadena KXPA 1240 silent; changed call s/  
 CA Vallejo KXBT 1040 has classic soul. Will soon move to 1630.  
 GA Atlanta WSB 750 and many other stations

feature "Dr. Laura." She's attracted more listeners locally than the Rush, heard on monophonic WGST-FM 105.7 Canton GA. Laura Schlessinger attracts more men than the therapy genre normally gets. And she is only slightly behind Limbaugh among males. Her show is taped in L.A. Watch for it to make its way onto FM.  
 GA Bainbridge WYSE 1360 deleted.  
 GA Garden City WNMT 1520 deleted.  
 ID Twin Falls KEJZ 1450 silent; gets FCC "show cause" epistle.  
 IL Anna WRAJ 1440 silent.  
 KS Hutchinson KWHK 1260 gets FCC show cause letter why its license shouldn't be revoked. "The station's assets were liquidated under Chapter 7 bankruptcy proceedings in 1993."  
 KS Lawrence KFKU \*1250, off the air since 1987, gets FCC letter about designating its license for hearing.  
 ME Monticello WREM 710 off the air again. "The support from the advertising community just wasn't there," said Tom Barner, station's engineer. Bills from previous owner, Daylight Broadcasting, could not be paid by current owner. Ralph Dhuy, Houlton dentist (one who makes false teeth; not a dentist), took over the operation, but found it too time-consuming and his denture-making business slid. Perhaps he bit off more than his teeth could chew.  
 MD Funktown WPGV 1160 faces FCC hearing for being off since 1994. [93.5 is on.  
 MI Howell WHMI 1350 off, but W HMI-FM/  
 MI Lansing WITL 1010 silent

**NonIDs, Not Just Slogans**  
*Mentioned usually without call letters;*  
*"strict" if a station only uses call letters once per hour as required by the FCC and Industry Canada (at or near top of hour)*  
 IL Columbia WCBW 104.9 The Bridge. "The station has also expanded its contemporary Christian music format."  
 MN Brainerd KFGI 103.5 Froggy 103.5, still k  
 MN Detroit Lakes KFGX 95.1 95-X  
 MS Biloxi WMJY 93.7 Mix 93.7 (from "Magic 94"), heard by skip May 21 at 11:35 a.m. EDT in Queens. "A few minutes later I got WBHY-FM \*88.5 Mobile AL. The same day at 8:30 p.m. I heard WLRN-FM \*91.3 Miami FL, and the calls appeared in the RBDS window. That's cool! No more waiting for the top of the hour to hear the ID. . . Also received WGYL 93.7 Vero Beach FL."  
 NJ Dover Township WWNJ \*91.3 The Classical Network  
 NJ Trenton WWMF \*89.1 The Classical Network. "This is much better than what they did before, which was to run down the list of all the stations and translators that simulcast WWMF an/or WWNJ every hour, which sometimes took a couple of minutes to do!"

NY New York WOR 710 hires Bud Grant who was fired by WABC 770 (May, p. 6, col. 3). He's on the same 3 p.m. to 7 p.m. airshift.  
 PA Windber WBEM 1350—off since 1989—gets FCC epistle.  
 SC Easley WRAH 1360, off since Dec., 1993, comes back before an FCC hearing would have been called. It has embraced a children's format.  
 SC Ellore WMNY 1370, silent for two years, has license designated for FCC hearing.  
 TN Nashville WWCR shortwave heard in the Atlanta area "with severe phase and intermodulation distortion on 100.3." Could have been a strong transmitter spur or a pirate trying to rebroadcast it on FM.  
 VA Waynesboro WAYB 1490 left the air March, 1995. Now faces an FCC hearing.  
 NB Fredericton (and a couple other Canadians): "How or why... would these boneheads give up 50,000 watts on 550? I knew about it several months ago, but I still can't help but to be totally dumbstruck by it. I'd think CIHI 1260 and CFRW 1290 would at least think about taking these much-better facilities in Fredericton and Winnipeg, respectively." CFNB expected to move to FM 106.9 this month.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

**DX Doings—An Occasional Feature**

Early season skip reception has been generally in a northeasterly direction. A N.W. Indiana listener, Roger Winsor, received a clear ID from CJMO 103.1 Moncton NB at 3:30 p.m. CDT May 22 on his truck radio. He also heard CK9W-1 94.5 Liverpool NS.

The night of May 28 from 6 to 9 CDT I heard WBKR 92.5 Owensville KY, and mention of an 812 area code on 93.5, which must have been WJPS-FM Chandler-Evansville IN. This coincided with a tornado in the Louisville area. And, on the car radio, I received "KZ-106," which must have been WSKZ 106.5 Chattanooga.

May 29, after getting a tip from subscriber John Ebeling at his lake cabin near Alborn MN, I tuned in the monophonic sounds of WLNG-FM 92.1 Sag Harbor NY at 11:45 a.m. Then it was WFDU \*89.1 Teaneck NJ, WPKN \*89.5 Bridgeport CT and WMVY 92.7 Tisbury MA.

Another person, in MA, ordered an FM Atlas, saying he needs a more up-to-date reference, since he was hearing MN stations.

**FM AS IT WAS—OR MIGHT HAVE BEEN**

An interesting brochure, probably from 1947, was given me. It concerns WTCN-FM Channel 264 (97.1 Megacycles) Minneapolis MN. It was printed during the time

DIMITRI MITROPOULOS, eminent conductor of the famed Minneapolis Symphony Orchestra, enthusiastically praised FM reception on hearing his musicians broadcast. "Remarkable"; "Astounding"; "A tremendous advancement" were among the maestro's praises for this modern method of radio transmission.

Dimitri Mitropoulos was assistant conductor of the Minneapolis Symphony.

What is frequency modulation? it asks. It is the result of pre-war research by Maj. Edwin Armstrong (of super-heterodyne fame) and improved by wartime development. Reception will be improved over the present AM system "by the total elimination of static, and steady natural high fidelity reproduction never before possible."

Problems of static and interference on AM are mentioned, both of which are "eliminated by the FM system to permit the radio listener to enjoy the performance of the artists over the radio EXACTLY as if

the listener were in the studio or the concert bowl."

WTCN-FM broadcasts are heard daily 3 to 9 p.m. "Program schedules of live talent, local orchestras and transcriptions include full concerts of classical, semi-classical and popular music plus local and network features such as 'Town Meeting', Winchell, Jimmy Fidler, Drew Pearson, Louella Parsons, Harry Wismer, Dick Siebert, Whoopee John, Dick Long, many others. WTCN-FM offers a carefully selected variety of the finest music, performed by world-renowned artists on new modern vinylite transcriptions. FM is here for you to enjoy NOW."

Most Twin City dealers are offering FM receivers for "early delivery. Ask for a demonstration at their display rooms. See and compare this remarkable improvement in radio!"

An external antenna is recommended. It is "neither complicated nor expensive. . . . It can be assembled by anyone. It need NOT be mounted outside. Placed on the highest available point, an external antenna will enable your receiver to bring in stations otherwise beyond range. Technical name is 'Horizontal half-wave FM antenna.'" Here's a map where WTCN-FM "is being regularly heard."

Consistent reports from listeners throughout the area above indicate that WTCN-FM's transmission quality and carrier wave exceed even the most optimistic predictions.

**ENJOY RADIO AT ITS FINEST  
WTCN-FM**

FM Channel NO. 246 (97.1 Megacycles)

I recall hearing WTCN-FM, but never with classical music or any of the network shows listed above. It was an FM-AM simulcast, which went off the air around 1954. Later, around 1961, it had a CP for 93.7, but that station was never activated. I believe the WTCN-FM transmitter went to KWFM 97.1, which started as a mono classical station in late 1956, and which probably converted that transmitter to stereo in 1962. WTCN-FM's antenna was atop the Foshay Tower, then the tallest building in downtown Minneapolis.

**SIMPLE FACTS ABOUT**

## FCC Deals Blow To NJ Translator

It's a totally unique situation in the annals of the FCC. A translator rebroadcasts an out-of-the-area station, with programming on the station dictated more by the interests of the audience in the translator service area than in the main station's area.

That's the scenario at W276AQ 103.1 Fort Lee NJ, which actually programs primary WJUX 99.7 Monticello NY with big bands music in glorious mono. The WJUX signal is picked up by W232AL 94.3 Pomona NY and relayed on W276AQ, across the river from Manhattan. Phone lines connect the NJ studio to WJUX. WVNJ 1160 Oakland NJ has cried foul and wants the arrangement stopped. It noted that when WJUX was off the air for technical reasons, WJUX programming continued on 103.1.

Roy Stewart, FCC mass media bureau chief, fired off a letter to owner Gerry Turro of W276AQ, saying his operation was in violation of the rules. Stewart gave Turro 60 days to choose between providing WJUX programming or to cease relaying the WJUX signal on his two translators.

Turro lashed back, saying "it's unbelievable that the Commission would give you a letter of opinion saying you could do such and you do it, make it successful, serve the public need and convenience, employ people, pay taxes, abide by the rules and then because of one complaint, they renege and change their minds and rescind the authorization. . . It shows that you can't trust the government."

Turro's listeners have been "flooding the FCC's phone lines with complaints," but the FCC has told the listeners nothing will happen to their station.

WVNJ's letter demands the revocation of the licenses for WJUX and the translators. "In the case of Jukebox Radio, the FCC may have to decide if its own rules are in the public interest or are merely serving to protect the interests of broadcasters," commented "Radio World."

I talked to Ron Lustberg, g.m., WVNJ, who said, "There are certain regulations and they [WJUX] aren't following them." He has two concerns:

\* Overall ownership issue of translators. Abuse by primary stations and third parties.

\* Translators are not intended to be programmed. They were designed to reach underserved areas. Clearly Turro's translators are being programmed.

Lustberg said WJUX is programmed with a minimal amount of Monticello NY service. At the end of each newscast is a weather report for Sullivan County and a few ads for that area. It continues to be monophonic. "Larger issues are at stake. . . Right now, the translator rules are clearly being broken. WVNJ has always played by the rules." It is 20000 watts

day, and running 2500 watts night, aimed east toward New York city. WVNJ does not take after the former WVNJ 620 Newark, but in the heritage of WNEW (AM). They claim to be broadcasting in that heritage more so than WQEW 1160.

Lustberg sees no way of enabling both parties to serve their audiences, so long as Turro's translators are not following the rules. As to changing the rules, Lustberg does not see that as an issue. "The rules are there and must be followed," he said. He would not comment on whether or not Turro's translators were affecting his company's revenues.

Turro was not in and did not call back.

## Small-Print Happenings and FM Industry News

The NAB filed a so-called white paper with the antitrust division of the Justice Department concerning radio industry mergers. The paper applies to the industry generally, not to any specific markets.

It argues that it is relevant to consider all the media, not just a concentration of radio signals in various markets. Market forces in the radio industry prevent abuse of market power (such as pricing of ads) by merged stations, "because ratings and market penetration are easily affected by plentiful and intense competition and the ease of format changes."

Some mergers making the news: Fisher Broadcasting given a waiver to acquire KWJJ-FM 99.5-AM Portland OR. It already owns KATU (TV-12) there.

Ed Christian's Saga Communications is buying WWTE 93.7-AM Lincoln IL and WDBR 103.7-AM Springfield for \$6 million.

Entercom is buying KISW 99.9 Seattle, while trading WNRQ 104.7 Pittsburgh to Secret Communications. KTBZ 107.5 Lake Jackson-Houston then goes to Nationwide. Entercom will own five stations in Seattle: KBSG-FM 97.3-AM, KMTT 103.7 Tacoma, KNDD 107.7 and KISW.

Paxson, already strong in FL, is getting stronger. It is buying several stations in Tallahassee (WSNI 107.1 Thomsville GA, WTNT 94.9, WTPS 100.7 Midway, WXSX 101.5 Quincy). In Pensacola it is getting WOWW 107.3 and WTKX 101.5. In Panama City it will hold WPAP 92.5 and WPBH 94.5 Parker.

In Macon GA, Magic Broadcasting will be the owner of WPEZ 107.9, WDEB-FM 105.3 and WMGB 93.7 Jeffersonville.

Infinity will have four FMs in and near Chicago. It will wind up with WCKG 105.9, WYSY 107.9, WUSN 99.5 and WJMK 104.3. This after a swap with Cox in Orlando. Cox trades WCKG and WYSY for Infinity's WMMO 98.9-WHTQ 96.5-AM Orlando.

Howard Stern will reappear on WCKG. "In '95 Howard took WCKG from 20th in mornings to eighth! . . . This will probably reignite the Howard Stern-Mancow Muller war again," says Mike DiSandro. "Like what was said on p. 6, col. 3, May, he was in the basement [on WJJD AM], going from a 1.2 to 1.7 in the last book. He needs FM to do anything here." Steve Dahl, a "bitter rival" of Stern, will do afternoon drive on WCKG.

WCKR 102.5 Waltham-Boston buying WFCC 107.5 Chatham MA. WCRB is Boston's last stand-alone FM. WFCC to expand to 24 hours a day; currently it signs off at midnight. No terms discussed, and no indication if WFCC might turn into a WCRB relay.

Jacor is buying WIOT 104.7-AM Toledo. It already owns WVKS 92.5 and WRVF 101.5.

Baton Rouge's WGGZ 98.1 to be mated with WTGE 100.7 and WHMD 107.1 Hammond under the Guaranty Broadcasting umbrella.

Trumper Communications is upping its holdings in Albuquerque, acquiring KZRR 94.1-AM and KLSK 104.1 Santa Fe. Trumper already

owns KHTZ 100.3 and two AMs.

Deregulation on fever has swept "across the pond," says the M Street Journal. British officials will relax regulatory restrictions on radio-newspaper crossownership. Newspapers will be allowed 50 percent ownership of a radio station, up from 20 percent.

Jefferson-Pilot is spending \$30 million for KBZT 94.9 San Diego. It already owns KSON-FM 97.3-AM and is buying KIFM 98.1. Up in San Francisco, Evergreen Media will hold three FMs there after a \$44 million acquisition is completed. It owns KIOI 101.3 and KMEL 106.1, and is buying KYLD 107.7. Gold Coast Media is buying up Oxnard-Ventura, with KCAQ 104.7-AM going for \$3.65 million. Its local holdings include KOCF 95.9 Camarillo.

KSSJ 101.9 Shingler Springs is helping ARS achieve media dominance in Sacramento, buying it for \$14 million. It announced it is also buying KYMX 96.1 and KSFM 102.5 Woodland, plus AMs.

Ragan Henry's U.S. Radio owns WHRK 97.1 Memphis. Now it is buying KJMS 101.1-AM for \$12.5 million. In Fort Wayne, Pathfinder Communications is buying WBYR 98.9 Van Wert OH. It already has WQHK 105.1 Decatur IN, WMEE 97.3-AM Fort Wayne.

Soon to control 45 percent of the radio audience in Duluth-Superior is Shockley Communications Corp., owner of KDAL-FM 95.7-AM. It is paying \$3.8 million for the four stations owned by Pat McNulty and Ken Buehler. Those include KZIO 102.5-AM, KTCC 98.9-AM, Buehler and McNulty, local residents, bought WAKX (now KTCC)-AM for \$800,000 from Lew Latto. The pair owns WCMP-FM 92.1-AM Pine City MN. "If all these stations are to survive this consolidation just has to happen," said Al Quarnstrom, owner of WKLK-FM 96.5-AM Cloquet MN. "Eventually, it all comes down to the bottom line." Those sales put all the major media outlets in the hands of corporations with deep pockets. Latto said it's a nationwide trend. "We're at the end of the mom-and-pop radio station, unless you're in a really dinky town someplace. . . It's indicative of the direction all business is going."

The NAB has filed comments with the FCC supporting eight-year license terms for stations, and wants license terms for translators and boosters to fall due when the primary stations are to be renewed.

Silent stations wanting to come back on the air, or to change their facilities, can more easily do so thanks to an FCC order expediting their applications. This could help them in case the one-year deadline for forfeiting their licenses comes up. In order to use expedited processing, a licensee should submit a letter labeled, "Request to Expedite Application of Silent Station." Facts must be presented, such as a brief explanation of why action on the application is necessary to return to the air and date the license will expire if the station remains off the air. FM stations would have to send a copy of that letter to Glenn Greisman, audio services division, Mail Stop 1800B3, Room 332, FCC, 1919 M St., NW, Washington DC 20554; FAX (202) 418-1410. Another copy to James Crutchfield at the same address. Once the station is back on the air it must notify the FCC immediately.

Want to get into the direct response (PI) business? Power Station Networks are starting Info Channel One as of July 1. It will air live, via satellite, nightly (midnight to 6 a.m.) radio informationals. Stations to receive a profit from sales made in ZIP Codes they serve. For more information call (501) 521-5128.

National Public Radio begins to offer an all day news/talk service so stations can stay monophonic. Programming to include the Diane Rehm Show, the Derek McGinty Show, along with "Fresh Air" with Terry Gross and Talk of the Nation.

KVSC \*88.1 St. Cloud MN celebrates 29 years of service. It came on the air with 10 watts May 10, 1967 from the campus of St. Cloud State College (now university). It's now a

vertical-only station with 16500 watts, serving car radios within a 110-km radius.

Cynthia Willis, 39, development director of KXPR/KXJZ Sacramento, suffered a severe stroke in March. She cannot speak or even open her eyes. Doctors fear rehabilitation could take years. A fund has been set up to help the family with costs for her care and for her children. Contributions to the Cynthia Willis Fund, % California Journal, 2101 K St., Sacramento CA 95816.

Media activism run amok. An anonymous letter sent to the FBI had a bomb threat to "any radio or TV station broadcasting commercials for alcoholic beverages." The letter says, "Hundreds of children die each year because of accidents involving alcohol. The broadcast industry is mostly to blame for this."

Michael Taylor, a reporter for KPFK \*90.7 Los Angeles, found murdered. He's a former homeless man who had struggled with drugs and alcohol addiction. He was a proponent of micro-powered radio, and had traveled to Philadelphia to cover the case of Mumia Abu-Jamal (May, p. 8, col. 1). There is speculation he was killed because of his reporting or his activism. Others claim he had inadvertently become involved with suspicious and dangerous people in an attempt to start a micro-power radio station, "perhaps L.A.'s first," said Bob Marston, an occasional KPFK volunteer. And I thought pirates had only the FCC to fear!

Pioneer to market its RBDS car radios through Best Buy retail stores. Best Buy personnel to be educated about RBDS. The NAB prepared a list of companies with RBDS radios for sale. Car radios: Audiovox/Becker (for Porsche), Blaupunkt (for Audi), Delco, Denon, Pioneer. Portable radios: Grundig, Home stereo: Bang & Olufsen, Denon, Onkyo.

Crystal awards were announced from the NAB. Ten winners came from 45 nominees. The list included FM stations WBEE-FM 92.5 Rochester NY, WQCB 106.5 Brewer ME, KSZR-FM 92.9 Watertown SD, WOKO 98.9 Burlington VT, WRAL 101.5 Raleigh NC, WUSL 98.9 Philadelphia. Not winning was "The Edge," KEGE 93.7 Minneapolis. Perhaps my notifying Eddie Fritts of the NAB of that station's vulgar language might have had something to do with that.

The National Federation of Community Broadcasters newsletter had a story on how hiring underwriting reps can increase revenue at "noncommercial" stations. The quote marks are mine. You judge if the stations are properly noncommercial. WTEB \*89.3 New Bern NC surveyed commercial stations in the area. Then they set their rates at 20 percent lower than the commercial stations. KUHF \*88.7 Houston does it by inventory. Knowing they have availabilities to raise \$1.2 million dollars a year, they set underwriting goals. "Knowing that number, you can set a goal to increase your underwriting by selling an additional percentage of your inventory," the NFCB publication states. "Stories abound of stations who hired a full time underwriting representative and saw their corporate support programs grow by 25, 50 and even 100 percent each year for several years. Stations can invest in few areas where returns are as quick and as promising as in underwriting."

Atlanta radio revenues in April were up 16 percent from April 1995 as the city's economy heats up for the Olympics. Radio revenues expected to be near \$200 million by year's end, double what it was five years ago. However, John Hogan, general manager of WPCB 94.9, said advance sales of airtime for July, when the Olympics begin, are surprisingly weak.

EEO violations have cost several stations. WOW-FM 94.1-AM Omaha \$12,000 (down from \$35,000) for "willful and repeated violations." KSAM-FM 101.7-AM Huntsville TX \$15,000 (down from \$31,500). Poor recruitment efforts were cited. Monophonic WGMD 92.7 Rehoboth Beach DE \$15,000 because of poor recruitment and self-assessment.

More on MN Public Radio and its entanglements with the direct mail firm Rivertown Trading Co. and its holding company, Greenspring. "Catalog Age" magazine says that Greenspring is withholding its annual royalty payments to MPR for the next two years to mend Rivertown's cash-flow problems. "The radio station created Greenspring as a source of revenue; last year's royalties accounted for some \$5 million in MPR income."

Al Quarnstrom, trying to build a tower for his Moose Lake MN 107.1 CP, now frustrated by the Carlton County Board. Board rejected a conditional use permit for some farmland to be used for the 61-m tower. Problems of safety, quality of life issues and impact on property values were alluded to. I heard that one person complained that birds would be killed. The dying birds would attract children who would pick them up, and the kids' eyes would be scratched out by the not-yet-dead birds. Personally, I find birds like towers. They perch on the top of mine, deposit interesting white stuff, and even get rides. That happens when I rotate the antenna; the birds usually stay on!

Quarnstrom, owner of WKLK-FM 96.5-AM Cloquet (klo-kay) MN, refuted the charges in a letter to the Cloquet Minnesota Journal. He wrote, in part: "Imagine if you took down all the towers in northern Minnesota. Your TV and radio reception would go with them, along with long distance, cellular telephone, paging and, oddly enough, Carlton County's own sheriff's department communications on one of the 'ugly' towers in Barnum that must have been approved by the county board just a short time ago. . . Our company provides nine full time jobs in Carlton County plus a host of parttime jobs. Our plans call for an additional three full time and a like number of parttime jobs once the Moose Lake station is on the air." He is said to be filing suit against the county board.

A letter to the editor was published in a rival newspaper, the Cloquet Pine-Knot, from Cathy Bergh, who challenged Quarnstrom's public notice ad. The ad reads as follows: (NAD 27) 46 30'30" North Latitude; 92 46'46" West Longitude. (NAD 83) 46 30'30" North Latitude; 92 46'49" West Longitude. Who among us could have figured out that the above listed had anything to do with a project that would be constructed out our front door? The Notice of Publication goes on to describe the tower height in meters. Why not in terms we're familiar with? . . . Mr. Quarnstrom would have us believe he has been victimized. This is not a public project! This is a calculated profit venture for QB Broadcasting and it's QB and only QB that stands to benefit from this project, while those of us adversely affected by it are being asked to eat their cost!"

Malcolm Kaufman sent another in a series of NY Times articles on radio formats. The latest was on classical music radio. The number of commercial classical stations has held steady at about 39 for the past five years. Big companies, like American Radio Systems, are in the format. American Radio has 61 stations, most with formats other than classical. Included in the list are WQRS 105.1 Detroit and WFLN 95.7 Philadelphia. KING 98.1 Seattle is one of the most profitable classical stations. It averages a 4.0 share. WGMS 103.5 Washington DC has estimated pretax earnings of \$3 million on revenues of \$7.5 million. Marlin Broadcasting, owned by Woody Tanager and his father Alexander, has stations in Miami (WTMI 93.1); MA (WBQQ 104.9) and ME (WBQQ 99.3). It hopes to offer a syndicated worldwide classical music service. And Sony Worldwide has signed six affiliates since August.

National Religious Broadcasters urge the FCC to revisit the Kings Garden case. That case (from KCMS 105.3 Edmonds WA) permits religious broadcasters to take religion into account only when hiring employees connected to the "espousal" of the broadcaster's religious views. Those include announcers and producers of actual religious programs or segments. The NRB believes that the policy places burdens on

religious licensees. For example, separating "religious" from "secular" jobs can be difficult. This is especially true at small stations where individuals may be required to perform several job functions. The NRB wants religious broadcasters to consider religious belief or affiliation in hiring or promoting all employees. Atheists need not apply.

WBGL \*91.7 Champaign IL did a sharathon that raised \$417,591 in faith promises from 2440 individuals and families. It relies on listener support for over 75 percent of its budgetary needs, according to "Religious Broadcasting" magazine.

Clarke Ingram at WPXY 97.9 Rochester NY reports on a book from the Internet. "I've never heard of this book before, but thought you might like to know it existed and/or find a copy." The book is "The Legacies of Edwin Howard Armstrong," published Nov., 1990 by the Radio Club of America. Library of Congress Catalog Card No. 90-63056. It has essays on Armstrong by various writers, and then separate parts: "The Regenerative Circuit," "The Superheterodyne Circuit," "The Superregenerative Circuit," "Frequency Modulation." Included are biographies and appendices. Latter has "Wrong Roads and Missed Chances—Some Ancient Radio History" by Armstrong himself, "The End of KE2XCC" by John Crosby, and "How Did Armstrong Die?" by Francis H. Shepard, Jr. No price information is available on the book.

From the classifieds: Toccoa Falls College has a faculty opening in its school of communication. Ph. D. preferred, with specialty in radio/audio production, plus public speaking teaching. Oversee a small campus radio station ('89-7). Dr. Randall Pruitt, director, T. F. College, Box 800846, Toccoa Falls GA 30598. Begins Aug. 1. Station manager for WMNF \*88.5 with a \$750,000 budget and a format including folk, blues, reggae, jazz, rock, news and public affairs. Req. experience in fundraising, station operations, event management and volunteer supervision. Good salary and benefits. WMNF, 1210 E. MLK Jr. Blvd., Tampa FL 33603.

Good news! The "M Street Radio Directories" are finally printed. We received our supply and have already sent out most of them. If you ordered one of these from us and have not yet received it, please let us know. Call 1-800-605-2219.

FM stereo transmitter. Digital ICs and dip switches for ultimate stability and frequency selecting. L-E-D and frequency lock switch. It is a modified Ramsey kit in a case with improved range. "Very professional." Ready to plug in with its a-c power supply. Built in antenna gets it out about ¾ km. Has outside antenna provision. Dave, 1-800-944-0630.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

The NY Times had an article Feb. 4, "The Sorry State of New York Radio." Similarity of offices and studios and lack of program variety are cited. No station in NY takes chances any more. Robert Unmacth of M Street fame was quoted: "New York suddenly found itself with a glut of rock stations. It has got five nonadventurous rock stations. It's the equivalent of a backyard barbecue where everybody brings potato salad. It was really a mistake. Nobody was looking where they were going and they all bumped into each other." The only hope is in the sheer number of stations—60 or so receivable by at least some NY Citizens (Citians?). "The more signals there are, the more likely someone will try to create something with an edge to stand out," said Guy Z apoleon, a radio consultant.

- ME North Windham 106.7 WLAM-FM (WVYH, but still using the old call letters as of early July); AM is in Gorham. Station was to have been bought two years ago by Ron Frizzell, Down East Radio Group, but stalled when the group bought WTHT 107.5 Lewiston. Easing of the duopoly rules allowed Frizzell to acquire both stations. "I'm amazed at the number of Lewiston people listening to it [106.7]," Frizzell said. "We're quite surprised because we've just been tiptoeing though it with tests and we really haven't formally announced anything. Ironically, the FCC construction permit for WLAM-FM was issued in 1968. The original station was to be at 107.5 FM. However, the former owners of

WLAM, Frank and Parker Hoy of Lewiston-Auburn Broadcasting, decided not to construct the facility."

Imus, \$, ID with Duluth-Superior (WI), "92 X, the New Wax" (a reference to the old WAKX 98.9 Duluth [now KTCO]; strict). I was interviewed within the first few minutes of broadcasting June 17 about having found the frequency and becoming a consultant to the station. After an impromptu staff party, the station went into about 30 hours of current and vintage commercials prior to carrying Imus at 5 a.m. June 19. Commercials were played because "music is over-rated," according to owner Tom Lijewski. The commercials included a 1941 ad for Ovaltine. The Minneapolis Tribune and other outstate papers had stories on the radio station with all commercials. A local paper, the Budgeteer Press, mentioned the new station uses a channel "which was originally applied for by Bruce F. Elving, Ph.D., Esko. Lijewski's firm was the only other applicant." An FCC-approved settlement agreement "states that Elving is to be paid consultant. Elving is happy that another FM station is thus created, even though he is not the winner of the channel."

ON Windsor CIMX 88.7 f(I), Iranian CANADA-TV VBI (vertical blanking interval) can deliver written messages on people's TV sets or through computers via the Internet. Stations need a headend encoder and a PCard for each subscriber. "The pages are stored and automatically updated on any number of PC hard drives, and can be browsed instantly without tying up phone lines. The system largely eliminates the long waits caused by busy servers. Subscribers receive Web pages, graphics, sound and video clips in background while using their computer for other purposes, and they can access the Internet if they want to delve further.

"Service providers could deliver, for example, a daily electronic newspaper enhanced with video, stock quotes, corporate E-mail, software, government information services, a weather radar service, distance learning, real-time road conditions, remote facilities control and airport flight information to anyone within the TV-viewing area," writes Jerry Fairbridge in "Broadcast Technology." Norpak unveiled the system at the Las Vegas NAB show. It has already received an order from Europe, and a U.S. broadcaster has estimated being able to sign on 10,000 subscribers.

USA—National Radio Systems Committee (NRSC) and Europeans are working to resolve their differences for 57 kHz. Even though the Blaupunkt ARI system is being phased out, enough European stations have it that accommodation must be made. Thus, a null as pictured is designed into the system at the 57 kHz spot. This is known as a bi-phase encoded phase-shift

keying (PSK) system. It is a relatively simple technique to implement, says the NAB. Data throughput is a relatively slow 700 bps, slow by today's standards, but it doesn't use much spectrum, is compatible with other SCSes on a station, and allows room for RBDS features, including searching for formats and call letter identifiers.

NetRadio Network of Minneapolis claims to be the first live 24-hour radio network on the Internet, providing background music while users browse other sites. It offers four formats—vintage rock, classical, emerging artists and new country. It averages 10 million "hits" per month. "Thanks for the great publication. Keep up the good work!" S.B., Col fax WI.

"I'm amazed the little radio (G-E 7-2662 with 67 kHz SCS) picks up the reading service in Lexington. Sometimes it even gets Cincinnati," R.M., Frankfort KY.

"Still use to great advantage—and show off—my tunable subcarrier Superadio III," D.J., Wilton CT.

"KFKF Kansas City was a neat surprise on the Grundig Satellit 700 portable last week when it showed up strongly over the usual Bowling Green MO and Mount Vernon IL stations on this channel. . . . Likewise, with Galesburg IL on 94.9 which is 155 miles—oops, 240 km, north of me, thrilling reception with just this portable and its little whip antenna. Kansas City is 300 km from me. This RBDS is the most promising thing for helping FM DXers in ages! Lately I note more stations have started using it," W.B., Wright City MO.

AR Dermott KGPL 1110, silent since 1993, deletes.

CA Redding 1330 deletes; had been off since '94. FL Sebring WJCM 960 silent

GA Cumming WMLB 1170 is a small town station pioneering a new radio format—"Americana." It is a musical strain of left-wing country, folk, bluegrass and rural rock. They'd love a stronger signal where they could serve Atlanta, and FM. Morning DJ Chris Marino says, "This is the real thing. Fans of Garrison Keillor need to tune in to 'Party Line' and 'Swap Shop'. We don't make it up. We get calls like, 'If anybody sees a bull walking down Route 369, it's mine', or 'If you can catch these chickens I've got down here, you can have 'em'. Now that's real radio, baby."

ME Monticello WREM 710 and Presque Isle WEGP 1390, both silent, return to air, simulcasting country and talk. [Last month, p. 5, col. 3.] MN Duluth KQDS 1490 off air. "We have some parts on order and they're working on it. Take care man!"

MO St. Louis now has six AM stereo stations: KSD 550 (stereo since 1984), KFNS 590 (since 1991 as KEZK), KISL 630 (since 1994), KSTL 690 (1995), KMOX 1220 (1988) and WESL 1490 (1984).

"This is probably the first nonID they've used

NY New York WBBR 1130 should have stuck with music, like WVNJ and WQEW have. Its business news "has never done well in the ratings, and recently [it] began cutting back on its stock market reports, increasing traffic and weather coverage. In the most recent Arbitron report, WBBR ranked 35th, with 342,000 listeners a week, compared with 2.4 million at WINS and 2 million at WCBS AM," writes Robin D. Schatz in the NY Times on a feature on all news radio. WCBS 880 thrives on short-term listening. "We do the same thing every 20 minutes, 24 hours a day, seven days a week."  
 PA McConnell sburg WVFC 1530 off the air. "This is an extremely poor area and that's the reason our FM tests were authorized in conjunction with the area schools." [See "Off Air," above.]  
 SC Ell ore WMNY 1370—license renewal denied, call letters deleted. Had been silent more than two years. See last month, p. 6, col. 1.  
 VA Lynchburg WWOD 1390 deletes. It was silent since 1991. A Bahakal station, it was founded May, 1947.  
 NB Fredericton CFNB 550 with 50000 watts was to have gone off June 24. It was considered Canada's second oldest radio station, following XWA (now CFCF) Montreal in 1919. It was heard over a wide area of NB and ME. Its staff and programming have moved to 106.9 (CIBX). See "Call Letters" above. FM programming was heard on the AM to June 24 "as a promotion to inform listeners of the new station." However, an application is expected to be made to the CRCO for a commercial Christian music station at 550 AM. That application is expected to be heard later this year.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AR El Dorado 101.5A, Aug. 5, 20
- AR Mena 105.3C3, Aug. 12, 27
- CA Riverdale 98.3A, July 29, Aug. 13
- CA Tehachapi 100.1A, Aug. 5, 20
- CA Willits (from Fort Bragg) KLLK-FM 96.7B, July 29, Aug. 13
- HI Kula 96.7A, July 29, Aug. 13
- MI Negaunee 101.9A, Aug. 12, 27
- MS Granada 101.3A, Aug. 5, 20
- MO Shell Knob 97.7A, Aug. 12, 27
- NY Hilton 95.5A, July 29, Aug. 13
- OR Banks 107.5C1 for C2 KDBX counterproposal
- OR Redmond 101.7C2 for 107.5C2 KLRR counterproposal
- SC Cross Hill 94.1A, July 29, Aug. 13
- SD Washington Springs (move from Winner) 98.5C1, KGGK, July 29, Aug. 13
- WI Forestville 104.1A, July 29, Aug. 13
- WI Luck 100.9A counterproposal to WWAX 92.1 Hermantown C3 upgrade (last month, p. 6, col. 1), which would move WCMP-FM 92.1 Pine City MN to 100.9A. WMEQ-FM 92.1 Menomonie WI filed supporting comments, because WMEQ-FM could become a C2 after Pine City moves. A study is going on to see if Pine City could move to another channel which I have suggested. Steve Moravec, filer.

**FM Rulemakings Finalized**

- Dates are when FCC filing windows are open*
- CO Clark dismissed 92.9C2 bid
  - KS Dearing 98.1A, Aug. 3-Sept. 3
  - KY Flemingsburg 95.1A for 106.3A, WFLE-FM
  - NM Las Vegas 96.7A, July 29-Aug. 29
  - SC Columbia (move from Sumter) 101.3—dismissed WWDW's bid
  - SC Columbia (move from Orangeburg) 106.7C1—dismissed WTCB's bid
  - SC Myrtle Beach (move from Conway) 104.1 C1, WYAV
  - WV Milton 106.3B1 or A, WFXN

**DX Doings—A Summertime Thing**

"As the E-skip season draws to a close, it's turning out to be a total washout," writes an observer in Atlanta. However, sporadic-E skip enabled Hank Holbrook of eastern MD to get WMCU \*89.7 Miami and WVAS \*90.7 Montgomery June 11 after 8 p.m. June 17, after 10 a.m., is when he heard Bahamas on 94.9 (see "NonIDs," above). Now that I think of it, one of the 94.9 stations might have been Bermuda, not Bahamas. Skip to south FL and AL returned June 22. Earlier, on May 29 around noon, it came from the Gaspe peninsula and New Brunswick. On May 31 he received KABF \*88.3 Little Rock AR, KTPB \*88.7 Killgore TX, KVTX \*91.7 Dallas and KKEG 92.1 Fayetteville AR. Via tropo, he heard WNYE \*91.5 New York for one of the few times since 1960. WNYE was heard 3 to 4 a.m. June 7 relaying the BBC World Service. It came through WBJC \*91.5 Baltimore, which usually dominates the frequency. He "did not realize you could ride a foreign broadcast service—news yes, but not whole programming! WNYE IDed at 0400 EDT and went right back to BBC World Service" in mono. He's been an FM DX listener for almost 40 years and a TV DXer for over 40. He finds FMedia! "just great. I really enjoy [the issues] and find them very helpful. Happy 25th!" A new radio in his collection is a vintage Zenith Trans-Oceanic, Royal 7000, from about 1968. The FM is generally quite good, but AM sensitivity in the daytime not the best, with shortwave mainly covering the broadcast bands, not the ham and utilities frequencies. "It's not a great DX radio (have to chuckle—I'm trying to get \$300 total for three receivers that outpull this one), but I wanted FM and nice tone. Yes, overpriced but..."  
 Enclosed was a copy of a letter from KIOS \*91.5 Omaha, which he received in 1995. It uses a McMartin transmitter. "The original factory was located here in Omaha. In fact, our chief engineer used to work for them, which makes it nice for access to parts that have been stockpiled by him. . . The company went belly up due to poor management practices, but their transmitters continue to be bullet proof," wrote Wilson W. Perry, KBDAR, station manager. Another reporter heard the June 11 skip. She's in Queens and wishes to be anonymous. Received were WZTA Miami Beach, WWRM Tampa and WTNT Tallahassee, all 94.9. "After an hour of FL (starting at 8:40 p.m.) I got stations from AL, MS and LA plus KCMO-FM 94.9 Kansas City MO and KANS-FM 92.9 Osage City KS. The strongest station was KASU \*91.9 Jonesboro AR with a local election report 'live from the Craighead County Courthouse' followed by a radio reading program" with Dick Estelle, whose program originates at WKAR-FM \*90.5 East Lansing MI. "After three hours the DX started fading, but not before I logged KBEZ 92.9 Tulsa OK at 11:45 p.m. NY time." Glenn Hauser says "if you want to call me a pundit, it's spelt pundit!" [May p. 8, col. 3.] "Lots of Eslately, such as June 11 [monophonic] WAMU \*88.5 [Washington DC] for a while. But I bummed myself out on Es years ago, as

there is so much noise from adjacent channel interference, locals and semi-locals everywhere, and rare is the 92+ mz station I would spend any time listening to for programming, DX or local!"  
 I received interesting reception verifications from WFDU \*89.1 Teaneck NJ, which is to be summarized in "FM As It Was," and from WPKN \*89.5 Bridgeport CT. Harry Minot, g.m., said, "Thank God for the skip! Yes, that was clearly us that you received, and in stereo, yet!" They are on 24 hours a day, except for the period 8:45 a.m. to 10 a.m. Saturdays when the engineer works on the transmitter. It began

in 1963 as the University of Bridgeport station, but is now a community station. The university then went under the control of Rev. Moon and the Unification Church. "Since that time the university has continued to deteriorate. Its law school has been acquired by Quinnipiac College." The church has sunk about \$100 million into the school, and gave an honorary degree to Rev. Moon—"a fabulously self-destructive move. . . Because enrollment continues to be slack, the new U.B. administration plans to close about half of the buildings on campus." WPKN, meanwhile, continues to use a building on campus, which it could do until 2002, but "because we are outgrowing our space and seek an extra measure of security (and it's pretty clear that the Moonies have a rabidly conservative agenda which is sharply at odds with our own, and yes, they still recruit through brainwashing techniques), we have already begun raising funds for an eventual move to a new location. It is, however, our solid intention to remain in the city of Bridgeport."  
 "Despite the pressures we face, we've been successful in preserving our integrity. Our format is still no format. We program a little bit of everything, but in no particular order, so the programmer is free to combine styles and genres within a program, and can even open up the mike to read a short story or ramble extemporaneously. Our notion is to serve folks who aren't served by the predictable, rigidly-formatted commercial stations or the increasingly stuffy 'public' stations. There's probably a lot of programming on WPKN that you wouldn't enjoy, but this is a very different kind of noncommercial radio station, and we think these ideals are important."  
 "We've preserved our freedoms by avoiding the funding sources which tend to call the shots at other stations. We are 100% listener-supported, we don't carry underwriting announcements, we don't accept donations which are targeted toward an individual program rather than the entire station, and we don't predicate our programming on how much money comes in during on-the-air fundraising on a particular shift. . . I'm the only employee here; all the others, more than 140 people, are volunteers."

Skip was in July 7 around 7 p.m. CDT when I received WGBH \*89.7 Boston, going into Jazz from Studio 4 with Steve Schwartz. NH Public Radio WEVO \*89.1 Concord-Manchester heard and taped with a multi-station ID and then the Folk Show in perfect stereo at its beginning.

**Biggest Sounds In FM To Merge**

Deregulation fever has hit big, with CBS owner Group W (Westinghouse) agreeing to buy Infinity Broadcasting for \$3.9 billion. This would create a radio group of 83 stations, the largest in the industry.

The acquisition means that shock jocks Don Imus and Howard Stern are coming

Imus

Stern

to the network of Dan Rather. "You're creating a General Motors of radio station operations," said John Reidy, a media analyst at Smith Barney, Inc.

The deal is subject to FCC approval, and is already opposed by two consumer groups. They are Consumers Union and the Media Access Project. They are taking their complaints to federal antitrust authorities. Either the Federal Trade Commission or the Justice Department will review the merger to see if it would hurt competition, raise rates, or otherwise harm the economy. Bad boy Howard Stern, who cost Infinity \$1.7 million to settle five indecency charges at the FCC, is supposedly mellowing. "As long as Howard follows the rules, and he's been following the rules, that's fine," said Michael Jordan, Group W chairman. "There are 10,000 radio stations, so Westinghouse will still be a small slice, but when Congress passed the laws they never thought the market would consolidate so quickly toward five to 10 mega groups," said an investment banker.

Several Infinity stockholders have filed suit in a Delaware court seeking to block the merger. Three lawsuits filed thus far allege Infinity's board didn't maximize the per-share value of its stock and breached their responsibility to the shareholders in voting for the merger.

CBS/Infinity will be over the local station limits in Dallas and Chicago and will have to divest. Dallas will have three FMs over the limit, while Chicago will have one FM over the limit. Mel Karmazin will run the combined radio group.

There's word that Quello has mellowed. James Quello of the FCC, who had been the most outspoken against Stern, apparently realizes that Stern has learned.

Stern has tamed his act, and Quello won't oppose the merger. "My war with him is over. He's cleaned up his act. He's a very engaging talent"

Paul Colford, former radio-TV editor of Newsday, has written "Howard Stern: King of All Media." Colford gives a more outsider view of Stern and his background than would be found in Stern's book, "Private Parts." Colford's is in bookstores.

Dick Kernan, Specs Howard School of Broadcasting, Detroit: "Look at Microsoft and some of the cable companies that started off as small businesses. There's always room in this kind of economy for smart, aggressive, dedicated people to make a difference."

**Small-Print Happenings and FM Industry News**

As I reported in May (p. 8, cols. 1-2), there is apparently no FM/TIService. KF2XBF 94.5 Atlanta and others have been ordered shuttered. Avis had planned to be in 25 markets, mostly around airports with 10 watts at each FM site. Avis, in an early news release, said "From Avis and Capital Broadcasting Systems, come two new free services that aim to take the stress out of business travel. FM radio programming that combines humor with travel tips and a 24-hour toll-free concierge service." The FCC was not humored by the news release and sent a letter to Capital Broadcasting Systems to stop the operations immediately.

Capital Broadcasting Systems doesn't feel it did anything wrong. Stations were licensed to the Experimental Licensing Branch of the FCC, with authority to operate with 10 watts on 88-108 mhz anywhere in the country. The FCC is said to be getting many requests for event broadcasting, for events ranging from Boy Scout Jamborees to ski slope broadcasts. And it has yet to figure out a way to license such broadcasts and prevent interference.

Capital was not especially friendly to Hank Holbrook who heard the Atlanta station on a trip. It did not answer his reception report in two attempts so far, "Guess I know why I try to QSL (verify) stations on trips. Don't count them in totals heard, but have two notebooks with QSLs. Some [TIS] never received a report before, and nice letters back."

This is what Hank heard: "This is the Avis Travelers Network, handled by Capital Broadcasting Systems, Inc., 515 Madison Ave., NY NY 10022, Ste. 1111." Twenty minute tape loop narrated by George Plimpton—carries 'sports trivia, updates on today's hottest money matters, the latest book reviews and more.' Also carries commercials! ATT/Hilton-Avis/Planet Hollywood Restaurants plus local commercials. "Tape presentation very well done! Avis Concierge Service, 1-800-941-AVIS."

The FCC has a toll-free number, answered in Gettysburg PA: 1-888-322-8255. It is staffed 8 a.m. to 4 p.m. weekdays, automated the rest of the time. Cynthia Ward Jeffries has been named director of that center. It will handle complaints or questions about phone charges, long distance carriers, obtaining licenses or forms, and radio-TV programming concerns. For more complex issues, calls will be transferred to the FCC in Washington DC.

The new Telecommunications Act is the "most heinous rape of the public trust in this century" said pirate Bill Dougan, "KAZR" Phoenix AZ, in a letter to "Radio World" newspaper.

Wanna know more about the Act which Dougan scorns? An updated version of the Communications Act of 1934 as amended by the Telecommunications Act of 1996 can be yours for \$13. Order from the Government Printing Office at (202) 512-1800, stock number 0-16-052372-9.

WSEN 92.1-AM Baldwinsville-Syracuse NY had its fine reduced from \$25000 to \$7000 for EEO reporting problems. The NAACP had objected to the lowered fine, but that move was rejected by the FCC. KQUE 102.9 Houston fined \$18500 for EEO problems, which include poor recruitment efforts and record keeping. KQUE and its AM have a sale pending to SFX Broadcasting. Also fined: WYXL 97.3-AM Ithaca NY \$6250, plus reporting conditions. The NAACP was denied in its request to force a license renewal hearing on the stations.

The FCC is considering streamlining procedures to modify grandfathered FM stations which are short-spaced. Those are stations on the air before November 16, 1994 and which do not meet the current distance separation rules. It proposes having stations use a predicted interference area analysis based on field strengths of the stations involved rather than the current limitations on where their 60 dBu service contours go. Also, the second- and third- adjacent channel protection criteria would be eliminated.

This proposal would give stations greater flexibility in changing transmitter sites, and to raise powers to the maximum permitted for their class.

In Boston, Greater Media acquires WKLB-FM 105.7 Framingham to pair with its county WBCS 96.9 and WMJX 106.7. Almost immediately, WKLB-FM fired four staffers: Karen Blake, afternoon announcer; Deric Chaney, evening announcer; Dave Buckley, salesman; and Tim Reever, general sales manager. "We're doing some consolidating," said g.m. Peter Smyth. He said he hopes there would be no more staff changes: "I'm putting the best of both stations together."

A swap gives Evergreen Media more dominance in Washington DC. Evergreen gets WGAY 99.5 to go with its WASH 97.1-AM. Evergreen had bought WKLB-FM only May 1. It retains WKXS-FM 107.9 and WJMN 94.5 Boston. Cox is buying WXNU 105.9 Valley Station KY for \$2.5 million, but Otting Broadcasting is keeping WQMF 95.7 Jeffersonville IN-Louisville. Cox already has WRKA 103.1 St. Matthews KY and WRVI 94.7 New Albany IN.

Dame Media is expanding west from Albany, where it owns several stations. A \$3 million package will enable it to own WOUR 96.9 Utica, WUUU 93.5 Remsen NY and WSKS 102.5 Rome, as well as AMs.

Businessman Robert Goodrich announced plans to buy WMHG 107.9-AM Muskegon MI for \$825,000 from Richard Culpepper of Battle Creek. Culpepper, who is black, put WMHG on the air in 1990, with a format designed to appeal to area blacks. Goodrich, who is white, owns WSNX 104.5-WMRR 101.7 Muskegon and WODJ 107.3 Greenville. "Whether Goodrich will keep... WMHG oriented toward the African-American community remains to be seen," notes Phil Boersma. "As a side note, Culpepper's attempt to LMA WMHG to WKBZ in Muskegon in 1994 led to such an outcry from the black community over loss of minority control of the station that the deal was called off. Whether such an outcry develops again, we shall see. I, personally, hope it does. Muskegon radio—including Goodrich's WSNX—was totally 'white' before WMHG came along. In fact, WSNX had to alter its Top 40 format in the early '90s to [finally] include some black artists as a direct result of competition from WMHG (which also has a healthy following among area whites). Will Goodrich 'bleach' WMHG? We'll see." He says of our 25th anniversary in publishing: "As the old commercial used to say, 'You've come a long way!'"

Z-Spanish to add another Chicago area affiliate. It is buying WBUS 99.9 Kankakee IL for \$3.6 million to add to its WZCH 103.9 Dundee IL and WZCO 103.9 Crown Point IN.

John Crawley, sports director for CHAY 93.1 Barrie ON, until a traffic accident left him a quadriplegic in Aug., 1994, has been back on the air with a 90-second commentary on weekdays

following the sports package at 6 p.m. CHAY installed a line to his home where he works with a voice-activated computer.

Some Canada FM stations have been asked by the CRTC to explain problems: CHOC 92.5 Jonquiere PQ about French vocals or their lack; CHOI 98.1 and why it has not yet been sold by Telemedia. CKRL \*89.1 Quebec, CIHO 96.3 St-Hilarion PQ and CFAL 101.1 Edmondston NB—all for failure to comply with conditions of their licences.

Some 40 percent of radio stations had their renewals held up for various reasons by the FCC. Now the NAB announces a seminar to prevent that sort of thing. The next is scheduled for Monterey CA July 23 and Orange County CA July 25. For more info call (202) 775-3511.

KNXR 97.5 Rochester MN sent a letter to its Minneapolis area listeners telling them why the WNCB \*89.3 Duluth MN translator had to move off 97.7 (it is now back on 96.3). "The FCC gave WNCB 30 days in which to eliminate all of the interference or go off the air. We received more than 100 listener complaints. Of those complaints, WNCB was able to eliminate interference at eight listeners' homes. Eleven persons refused to allow WNCB to attempt a cure while more than 80 others were left with the interference unresolved," said Pres. Tom Jones. The FCC letter to WNCB closed with: "North-Central Christian Broadcasting is HEREBY ORDERED TO CEASE OPERATION OF FM translator K249DF IMMEDIATELY. These actions are taken pursuant to 47 C.F.R. §§ 0.283 and 74.1203(e). Sincerely, Robert D. Greenberg, Supervisory Engineer, Audio Services Division, Mass Media Bureau," FCC. WNCB is fearful 96.3 might not last for them and they won't have a Minneapolis translator. It is organizing a "Boot Camp for Jesus" to support the translator, and hoping for 100 Twin Cities marchers.

Porno coming to the weather band? The National Association of Radio Reading Services filed a position paper opposing in-band digital audio radio. The 92 kHz SCS is eliminated by the so-called IBOC system, and the 67 kHz SCS would be "seriously downgraded. This would force about a third of the operating radio reading services off the air immediately." As well, the services on 67 kHz would have to replace all radios with ones having improved filtering. "Second, the public radio stations, on whom we depend, are under increasing pressure to find additional private funding to stay on the air. There are several commercial entities interested in paying substantial monthly rentals for subcarrier space.

"This places NARRS and radio reading services in the position of having to oppose the threats to our distribution capability by opposing promising new technology or impeding financial solvency for public radio stations. [Thus] radio reading services need a safe haven. . . . It is our suggestion that a small number of VHF frequencies be set aside for radio reading and other public service entities. This would allow use of inexpensive weather radio type receivers and relatively low cost transmission equipment. . . . An alternative might be to create something similar to the 'must carry' rule for all FM broadcast, common carrier and satellite distribution systems. This would certainly address the spirit of the ADA, but might be more problematic to administer.

"We are not opposed to the continued use of FM subcarriers, but it appears to us that the future of FM broadcasting is unsettled at best. Radio reading services do not have the resources necessary to continually defend information for disabled people. Some form of clear cut protection is needed if information access for all is to be a reality."

An FCC proposal to reassign the 2-meter (144 mhz) amateur radio spectrum could jeopardize that most popular band. It would go to low orbit satellites, which serve pager companies. About 650,000 hams nationwide would be affected. A 1997 World Radio Conference under United

Nations auspices meets in Geneva to decide what frequency ranges might be used for what purposes. Also affected would be the newer 70 centimeter band. Jim Talens, an FCC attorney, said, however, "There are no amateur bands that have been proposed for reallocation, and it is premature to consider this a serious risk."

The latest RADAR report shows 96 percent of persons 12 and over listen to radio in the course of a week, with 151 million, or 69 percent of the population, reached by network radio.

From the classifieds: For sale Tecpo J-316-M FM translator with manual in excellent condition. 107.7 mhz input, 101.7 mhz output, \$1250, Bob Vinikoor, 297 Beaver Meadow Rd., Norwich VT 05055; (802) 649-3510.

Modulation Sciences SCA 186, 67 kHz SCS generator. Best offer. Kimo Akane, 560 N. Nimitz, Honolulu HI 96817; (808) 536-0010. FM allocation study \$149. Complete FM application \$1200. Maps (full color coverage) \$69. Scientific Broadcast Systems, 1680 Hwy. 62 NE, Corydon IN 47112; (812) 738-3482.

Methodist college seeks broadcast equipment to resurrect campus radio station. AM carrier current moving to FM. Needs cart machines, studio furniture, etc. Tony Stewart, WVAW, VA Wesleyan College, 1584 Wesleyan Dr., Norfolk VA 23502.

ITA 250-w FM transmitter. Working fine, no PCBs, with many spare tubes and mono pickup on 91.5, \$850 or best offer. Buyer must pick up. Bill Weisinger, WSTB 1900 Annalane Dr., Streetsboro OH 44241; (330) 626-4906.

FM FORUM

CONTRIBUTIONS FROM READERS

The problems of NY radio [last month, p. 8, col. 3] are alluded to by Glen A Kiltz, of Remington VA: "I wish I could report any improvement in the quality of radio in [this] area, but it is not to be. If anything, we are in worse shape than we were a year ago. Enclosed is an article from our local weekly paper about the demise of the only station that really covered local news for most of the area in Virginia west of the DC suburbs. WQRA [94.3 Warrenton; now going by "WINX"] was a very listenable station even to those who liked other types of music than adult contemporary. Based on my monitoring, nothing else quite fills the local news void they left. . . .

"WHFS 99.1 continues to deteriorate, now spending almost as much time on supposedly humorous B-movie sound clips or DJs making rude noises as they do on music. Their playlist can't be more than 15 songs. . . . They waste the 10 p.m. hour on a sex-oriented talk show, and they play no current material during the noon hour—the only time they actually play any requests. . . . Long-time rock leader DC101, WWDC-FM now spends a lot of time apeing 'HFS. The only acts they play that 'HFS doesn't are Aerosmith and Jimmy Page, no doubt a throw-back to their roots as an album-rocker. . . . I live in an area that does not really have a local station now.

"Only one good thing has come about on the FM band in the last year. WJFK 106.7 now carries Washington Redskins football as the flagship station. Although most people in the WJFK area have other FM stations carrying the games, this station promotes the games aggressively and provides the coverage in stereo. It is also a vast improvement over the AM station that had the games for three years. WTEM 570 has one of those signals that are part of the AM problem. Even at the 5 kw daytime power WTEM barely gets across the street. The biggest negative on WJFK is Howard Stern. He brings an air of vulgarity to any subject he touches."

Russ Edmunds comments about WBVA in ME losing its local identity (June, p. 3,

col. 1): "A lot of people. . . fail to appreciate the fact that maintaining a local radio presence requires the support of local advertisers, who require the support of listeners. . . . They seem to think that they're somehow entitled to local radio service even when such is economically nonviable. [That station] was largely rebroadcasting WHQO-107.9 with occasional local news and announcements. Now it's rebroadcasting WAVX 106.9. True, there is no longer even a pretense at local service, but otherwise this is nothing more than a format change. I wish the locals luck, but stations are dying right and left. . . . and in Maine. . . . the local economy simply can't support the number of stations currently allocated, and it's not likely to improve much any time soon!"

Fred Vobbe, Lima OH: "Just wanted to let you know that I profiled FM Atlas in the March 1996 edition [of the DX Audio Service to the blind], along with the piece you sent me on tape regarding your publications and SCA devices. I figured that it would be appropriate now, since the FM DX season is approaching.

Monitoring Times, May, was gave my work a boost under the heading, "SCA Primer." It mentions my FM/SCS demo tape. "The cost of this little gem is \$4.00, also postpaid. Dr. Elving knows that once you hear a sample of the programming on SCA, you're going to want to listen for yourself (and presumably purchase one of his gizmos)."

David A. Hunt, Trinity NC, finds a contradiction in the FMusings section at the front of the current "FM Atlas": "First, you tell of how duopolies have reduced the diversity among FM stations, and then you go on to say that the trend for some stations to go to all talk formats is 'disturbing'. Adding all-talk formats makes FM more diverse! I guess you simply do not like talk radio." [I mentioned that I dislike talk radio when it displaces FM stereo, or is transmitted in pseudo-stereo. KNOW \*91.1 St. Paul MN used to be stereo, as was classical WLOL on 99.5. Now KSJN \*99.5 is stereo, but KNOW \*91.1 discontinued use of its stereo generator for monophonic talk, even though some programs do originate in stereo. These include Garrison Keillor and a classical program, "Schickele Mix."]

"Diversity is certainly lacking among the FM stations in the North Carolina Piedmont. Our market has 16 stations which cover the Triad (Greensboro, Winston-Salem and High Point). Of these stations, four are country, three are religious, two are urban/rap, two are classic rock, two are adult contemporary, one is an oldies station, one is an alternative rock station and one is a classical station. All four of the country stations play the same songs. I do not see how the local market can support so many stations that are mirror images of one another. Also, two Charlotte-area country stations (WFMX and WSOC) can be picked up in most of the Triad. We have no news/talk FM stations and no pop music stations.

"The lack of choices on the FM dial has caused me to switch to AM more and more. . . ."

Until August, *B. Bruce F. Elving*

- MO Mountain grove 106.5 KCMG "FM" /

- MO Pleasant Hope 95.5 KTOZ-FM (KZBE); AM is in Springfield
- MO Sikeston 97.9 KBXB (KSTG), k, "B-98," seeks 50000 h,v— one-stap C2.
- MT Hamilton \*91.9 KUFN
- NE Kearney \*91.3 KLPR (KSCV)
- NE Lincoln \*88.5 KLCV (KFBN), g, \$, on air with talk shows and praise music
- 105.3 KKUL (KFGE), o, "Kool 105.3." It

temporarily simulcasted as "Froggy 98." NE Milford 98.1 KFGE (KUHG), \$, k, "Froggy

98," jumping from 105.3. ID with Lincoln. NV Henderson 94.1 KMXB (KJMZ), "Mix 94.1" NH Bedford 96.5 WOXF (WAEF), "Fox 96.5 FM" NY Garden City 92.7 WLIR-FM (WDRE). There was a dispute over the fact that the station was referring to itself as "The new 'LIR'" and sometimes just "WLIR," along with simulcast station WLIR-FM 98.5 Westhampton NY. Former owner Gene Gugig didn't believe the call letters were legally transferred to WDRE. "If [Zev] Brenner [of WLIR 1300 Spring Valley NY] sold them to WDRE for money, that's illegal" said Gugig. John Carraciolo, general manager, WLIR-FM, said: "We have full legal permission." "WLIR-FM" has a blank space in its RBDS display where the call letters used to be." [See Aug., '92, p. 7, col. 3, for more on 'DRE and Carraciolo.] This logo

is from a 1968 NY FM Guide.

NY Hudson Falls 107.1 WHTR (WMJR), still "Hot 107.1"  
 NY Plattsburgh \*91.9 WCEL (WCFE-FM). Note its frequency is not "89.7," as shown last month, p. 3, col. 1.  
 NY Syracuse 107.9 WWHT (WHEN-FM), still "Hot 107.9"  
 NY Westhampton 98.5 WLRI (WLIR-FM)  
 NC Beech Mountain 102.3 WECR-FM (WECR); AM is in Newland NC  
 PA Galeton \*100.7 WXVE (WAIU), noncommercial, \$, g, part of the Family Life Network, parallel to WCIH \*90.3 Elmira NY.

 MD Waldorf WXTR 104.1 r, "Z-104" (from "Xtra 104")  
 MI Ann Arbor WUOM \*91.7 tc, dropping

daytime classical, but keeping it 8 p.m. to 6 a.m., in true stereo. From 6 a.m. to 8 p.m. has various NPR/PRI talk/news features mostly in "stereo-phony." Has jazz Saturday nights. MI Flint WFUM \*91.1 tc, parallel to WUOM. MI Grand Rapids WVGR \*104.1 tc, parallel to WUOM. "WVGR no longer offers anything unique to the western Michigan market." with most of its programming available on WBLV \*90.3/WBLU \*88.9, as well as WGVU-FM \*88.5. "U of M radio for decades was notable for its wonderful classical music programming, offering a wider variety and more intelligence than could be found anywhere else on the radio dial. People like Peter Greenquist, Gerald Brennan and Alan Young were masters at presenting music from baroque to the 20th Century, and WUOM/WVGR/WFUM's library of recorded music was huge. . . Now the U of M stations become just the third or fourth station in their respective markets to offer such infojunk as 'Talk of the Nation' and 'Fresh Air'. If the university needs more money, why doesn't it just sell WVGR 104.1 to a commercial broadcaster? It offers nothing unique to Grand Rapids, and at today's market prices (and with WVGR's grandfathered 110-kw signal), the university could probably get upwards of \$25 million for the station."

Donovan Reynolds was brought in Jan. 2 with instructions to revitalize the "University of Michigan's chronically under-performing public radio stations, [and] is gambling that intelligent talk will do better than classical music in increasing both the number of people who tune in each week and the length of time they listen," writes Stephen Cain in the "Grand Rapids Press." Fired were Greenquist, Brennan and broadcast director Mary Eilyn Cain. Hired is former WEMU \*89.1 Ypsilanti personality John Silvi, who is the local host of "All Things Considered."

Reynolds might well consider a University of Michigan study that found the audience for talk radio has not grown in the past few years. This audience remained steady from 1993 to 1996. In May, 1993, 17 percent of respondents said they listened to talk radio, compared to 18 percent in March, 1996. The research was conducted by Michael Traugott, of the U. of MI's communications studies department.

MN Duluth KUMD \*103.3 pr, dropping jazz. Celebrated its 40th anniversary, with my being interviewed about its first years as a pirate. MO Kirksville KLTE 107.9 g, no longer gr NE Bennington KRRK 93.3 pr, "modern AC" NE Crete KKNB 104.1 pr, "modern AC," a format that appears to be unique to these two stations—a combination of "modern rock" and "r" or "ac."

### On Air—Real Stations and Pirates (Selected)

GA Unadilla WAFI \*90.9, g, \$. "By the way, the locals pronounced this with a long U."  
 MA Boston Charles Laquidara was released from WBCN 104.1 to make room for Howard Stern. He went to WZLX 100.7 as morning man. He's now No. 1, higher than he's ever been in the market ratings. "It's like while everyone was talking about Stern and Imus parting the Red Sea, Charles ran right through it. Back then everyone was saying that his move from 'BCN was the beginning of the end for Charles. Guess not," said one unidentified "radio wag."

LAQUIDARA

MN Minneapolis "Beat Radio" 97.7 with urban music from a 10-watt transmitter from an apartment in a high rise near 14th and Hennepin. "Very clear and solid downtown." Only announcing initially was a computer-generated "97.7." Its location was pinpointed by KNXR 97.5 Rochester MN, which rented special direction-finding equipment. The FCC sent a letter to the white person who enjoys urban music. Lacking a local presence in the area, it is unclear whether or not the "microbroadcaster" can be taken off. KNXR is "madder than . . ." Earlier, it had succeeded in ousting a WNCB \*89.3 Duluth translator from 97.7 in downtown Minneapolis.  
 MN Rochester KRPR \*89.9, but "is sporadic. I heard them once at night, but not since. I sort of like KRPR."  
 NH Hanover W280CW 103.9, serving Lebanon  
 NY Brooklyn WYGG \*88.1 Asbury Park NJ's relay in Brooklyn on 88.1 is shut off during the day on weekdays, when the FCC direction-finding van is most likely to be on the prowl. "On weekends they're full strength all the time."  
 OK Bartlesville K280EE \*103.9 (see last month, p. 3, col. 3), but to put on vanishing cream when KTGP 103.9 Pawhuska comes on. "It was premature of you to delete it."  
 RI Newport W243AI 96.5, with antenna atop Newport Hospital. "The operation was strictly a grassroots effort. A Newport-area resident was miffed by the lack of classical programming. That started the ball rolling, and enough folks got involved to get the FCC to grant WCRB permission to rebroadcast over the new frequency."

SC Myrtle Beach WYAV 104.1, having moved from Conway, "even though the old studio building has the WYAV calls on it with WLAT 1330 (now WPJS)." Co-owned with WRNN 94.5 Murrells Inlet.  
 TN Dickson W203AM \*88.5  
 TX McAllen KQXX 98.5—still Spanish speaking but with changed music, relaying KGBT 1530 Harlingen, "Radio Panamericana." [June, p. 3, col. 2.]  
 VT Orleans W243AE \*96.5: "A little too 'preachy' for WGLY"; it relays the new WCMK \*91.7 Bolton VT.  
 WI Lake Geneva WLKG 96.1 "was heard in mid-July carrying news of the broken tether on the space shuttle's tethered-balloon experiment. That happened several months earlier—indeed, the entire newscast was several months old!"  
 BC Kelowna CKBL 99.9, "The Bullet," introduces automation and "laid off eight people."  
 ON Toronto CHFI 98.1 reports the largest weekly come in Canada from the Spring BBM with 1,062,400 listeners, and audience share (12+) of 13.6.

### Off Air—Or Not Yet On

GA Atlanta KF2XBF 94.5 at Hatsfield Airport: "Was not heard either 7-7 or 7-12 from the airport itself."  
 GA Macon W205AW \*88.9  
 GA Milledgeville WXGC \*88.9  
 IL Chicago WOU1 \*88.9, WBH1 \*90.7

 PA Bellwood W240AC 95.9  
 SC Conway W204AM \*88.7  
 SC Kingstree W204AL \*88.7  
 SC Myrtle Beach W209A1 \*89.7—none "noted during the four weeks I was in SC this winter."  
 ON Midland CFRH-1 88.1. Only a dead carrier.  
 ON Parry Sound CBLR \*89.9

### Deletions

AR Bentonville KAPG \*88.1. Its translator, K201CT \*88.1, continues while the FCC decides if American Family Association (KAPG) or a competing application gets the channel. Grant was inadvertently made after the competing application was lost on the desk of an FCC staffer earlier this year after a blizzard shut the agency down.  
 CO Yuma KJCO 100.9, off air since 1993.  
 DE Newark W207AA \*89.3. "It was operated at the University of Delaware when WXDR \*91.3 (now WVUD) signed on so that WUHY \*90.9 Philadelphia (now WHYY) could still be heard in the area of the WXDR transmitter by a couple of professors. They have since left. There is also a W207AA listed for Williamsport PA."  
 IA Cedar Rapids KOJC \*89.7, having been silent over a year. However, KWOF 850 AM Waterloo IA offered to buy KOJC for \$15,000.  
 KY Westwood WLUA 99.7  
 NV Wendover KYOU 102.3  
 NV Winnemucca K201CS \*88.1

 Access Global Systems of Louisiana offers a paging system using its "FM Cubed" satellite technology. Signals are uplinked. Then, by using RBDS, Access hopes to allow customers to use their pagers anywhere in the world. FM

frequencies are virtually the same around the world, and an FM station with a tall tower and good signal can eliminate the need for a "multitude" of low power terrestrial transmitters. The Access service will also deliver news, weather, sports and stock reports. It plans to cover major U.S. cities within 12 to 18 months.

 AB Lethbridge CKRX 1090 seeks move to FM  
 95.5  
 ON Toronto to 99.1: "Several existing stations  
 wanted to upgrade by moving to 99.1, but the  
 CRTC denied these moves." A dance music  
 format is considered likely, especially in view  
 of 92.5's going to CISS with a country  
 format, rather than the dance format eyed by  
 other applicants. CISS is now "Canada's  
 biggest New Country station," says "Broad-  
 cast Technology." Other possible formats for  
 99.1: AAA (adult-album-alternative), or  
 smooth jazz, such as found on WSJZ 92.9  
 Buffalo NY. Another, unannounced FM  
 application has been filed for Montreal.  
 PQ Cabano CJAF 1240 wants to move to 98.3  
 FM, 3000 h,v  
 PQ Drummondville CHRD 1480 to be sold, and  
 applies to move to 105.3 FM, 3000 h,v  
 "I look forward to the next FMedia! and the  
 17th FM Atlas!" D. M., Barton VT.  
 "I do hope you will remain ever vigilant in  
 maintaining the integrity and consistency of  
 your format codes. . . I much prefer the  
 former 'color' in FMedia's masthead. It  
 projected an aura of professionalism and gave  
 the newsletter a more inviting, less sterile  
 look," N. L., Atlanta GA.

 MS Yazoo City WAZF 1230 repoted silent.  
 MO St. Louis KMOX 1120's audience declined  
 from 26 percent in 1976 to about 13.9 percent in  
 1995. New manager Rod Zimmerman cut 10  
 jobs—including many announcers and sports  
 reporter Randy Karraker. "We've been decim-  
 ated," said one unnamed staffer. "The place  
 feels like a funeral home," said another. Now  
 WIBV 1260 Belleville IL is challenging KMOX's  
 talk format. It is a 5 kw station. WIBV has hired  
 three KMOX staffers. WIBV was bought by  
 former KMOX executive Tim Dorsey, who said,  
 "We can do the same kind of radio as KMOX and  
 do it better." Dorsey and some financial backers  
 paid \$1.4 million for WIBV in March. Also  
 competing for the local talk format audience—  
 KWMU \*90.7 St. Louis, which still has some stereo jazz.  
 NY Cobleskill WDSC 1190. Ad sales for this adult-  
 standards station going poorly. "Kevin had money to

put it on, but not to promote it. It's being sold to a  
 listener who has money and likes the music." WDSC  
 is a daytimer.  
 NY Spring Valley WLIR 1300 was off the air six  
 days "due to an ownership dispute. Gene Gugig,  
 who had sold the station to Zev Brenner's  
 Talkline Communications in 1993, got a court  
 order to evict Brenner, who Gugig says failed to  
 make payments and violated ownership regula-  
 tions. Gugig claims to have WLIR's license back,  
 but Brenner says the FCC has yet to rule on  
 ownership of the station, which plays music from  
 the '40s to the '70s and is known as "1300  
 Memory Lane." [See also "Call Letters," above,  
 NY Garden City.]  
 TX Abilene KNTS 1470 silent.  
 TX Denison KDSX 950 silent.

**FM As It Was—OR MIGHT HAVE  
 BEEN**

"FM radio never ceases to amaze me,  
 not only in its inherent quality of reception,  
 but in its ability to behave like AM radio  
 and skip to far off places," wrote Barry  
 Sheffield, p.d., WFDU \*89.1 Teaneck NJ.  
 He mentions that WFDU is the only  
 broadcast station to transmit from the  
 Edwin H. Armstrong Tower and Field  
 Laboratories in Alpine NJ. This station  
 shares time with WNYU at New York  
 University. "I have framed your letter and  
 it now hangs with the before-mentioned  
 QSL letters of yore" (including four  
 received during the early 1970s from as far  
 away as Clearwater FL, Uniontown OH  
 and Omaha NE). Enclosed was a cassette of  
 an early FM test broadcast of the Yankee  
 Network, "the brainchild of Edwin H.  
 Armstrong, the inventor of FM radio and  
 other radio circuits and builder of the  
 tower we occupy. There is a full narrative  
 at the beginning of the tape describing the  
 historic 1941 broadcast. . . It is nice to  
 know there are still people around who  
 listen so carefully to radio broadcasting."

The tape of the Feb. 14, 1941 broadcast  
 is a round-robin of engineers' voices (not

professional radio announcers), including Edwin H. Armstrong, whose voice came to the other stations by means of phone line, Paul DeMars, chief engineer, Yankee Network, and an engineer atop wind-swept Mount Washington NH. The other stations were connected by off-air pickup, including a special radio relay circuit from the Boston studios to the 50 kw station at Paxton MA, near Springfield. The Mount Washington station had lower power but enjoyed excellent coverage because of the tremendous height. Franklin M. Doolittle ran WDRC Hartford, whose experimental FM was atop Meriden Mountain, Meriden CT. It had about 6 kw ERP, but also had very good coverage. Armstrong's station in Alpine NJ used a 50 kw transmitter from the same tower now used by WFDU. The tape was a copy from a disc. It was my first chance to hear Armstrong's voice, and he seemed to do most of the talking on the program. Comments were generally about the weather atop Mount Washington, and included amazement at being able to hear each other over such distances. All the stations operated in the 40 mc band.

Last on the tape is a sign off of W1XOJ Boston, with transmitting facilities at Paxton. It will return to the air 8 a.m. tomorrow.

Missouri broadcaster Al Germond sent some material that dates from when WTCN-FM Minneapolis was active [see June, p. 6].

"Your latest historical piece about the old WTCN-FM sent me to the 1949 Broadcasting Yearbook which revealed this station at 97.1 had a listed ERP of 400 kw with transmission from the then tallest Foshay Tower (later a TV site)." However, neither I nor John Ebeling, who was an FM listener longer than I was, believe WTCN-FM ever used such massive power. "FM was in its infancy, and almost none of the stations [in Al's letter] had the powers shown," he said. WTCN-FM's maximum power was believed never to have been more than about 4 kw. Stations got out because of lack of interfering signals. KSTP-FM 102.1 was listed at 57 kw and WMIN-FM 99.5 with 100 kw, but the real powers were more like 5.7 kw for KSTP-FM and 40 kw for WMIN-FM. "This ad, c. 1949, illustrating the Federal Telephone and Radio Corp. square-loop antenna, shows the WMIN-FM installation and coverage map," with over-optimistic coverage from Green Bay WI to central South Dakota. Superpowered stations were:

- KFMX Council Bluffs IA 480 kw
- KWK-FM St. Louis 480 kw
- KOAD Omaha 380 kw
- KFI-FM L.A. 265 kw
- KNX-FM L.A. 297 kw
- KFAC-FM L.A. 270 kw
- WMIT Mount Mitchell NC 200 kw
- KSBR San Bruno CA 250 kw. "A full-page ad in the 1949 Broadcasting

Yearbook touts this power."  
 WMCF Memphis 300 kw  
 WILL-FM Urbana IL 300 kw. WILL-FM had the old WTMJ-FM 93.3 Milwaukee transmitter.

I believe only the following ever operated close to the listed powers: WMIT (which actually had about 325 kw), KSBR, WTMJ-FM 93.3, WMCF, and WILL-FM. Later WJFM 93.7 with 500 kw and WOOD-FM 105.7 with about 265 kw would join the list from Grand Rapids MI.

"The greatest coverage station was probably WMIT, an outgrowth of a pre-war band facility with current (and then) HAAT of 3090 feet; KSBR with 250 kw atop Mt. San Bruno surely had a killer signal and was an early user of EIMAC (Eitel-McCullough) VHF power tubes. Today, WMIT, licensed to Black Mountain NC, is a full maximum-coverage 'C' but under today's rules with power backed off to 36 kw. Computing the 1 mv/m today gives a radius of 57 miles. Going to the FCC charts at 200 kw pushes the 1 mv contour out to 70 miles." John Ebeling, who lives in the Minneapolis area, looked at the Federal ad and said that is not the type of tower WMIN-FM used in the Midway district of St. Paul. He thought the picture of the antenna looked like a drawing, whereas that of another station, WJLS-FM Beckley WV, looked more authentic. Also shown were antennae for WHIS-FM Bluefield WV and WSAP-FM Portsmouth VA. WSAP-FM's coverage supposedly ran from New York city to the SC border!

Federal Square Loop antennas come in 2, 4, 6, 8 or 12 elements, "to meet the requirements of every FM broadcaster [and] Federal's 'Frequematic' FM Transmitter is available in outputs of 1, 3 and 10 kilowatts." If any reader knows of an FM station still using a Federal Square Loop antenna write in. It would probably be an older station shown in my FM Atlas as having "h" after the power figures on pp. 163-220. Here's part of Federal's ad.

**Skywriters Clutter Manhattan Skies With News of WKTU's No. 1 Rating**

In the April-June NYC Arbitrons, the dance format of WKTU 103.5 Lake Success NY is No. 1 both overall and for the afternoon drive period. When the ratings came out, WKTU "promptly hired skywriters to emblazon its No. 1 stature in the sky

over Manhattan," according to Daily News columnist David Hinckley.

"The new WKTU switched to its format in mid-February, meaning that in about 1# survey books, it rose from a 1.9 when it was country WYNY to its current 6.7 [overall]."

"Hot 97" (WQHT 97.1) was No. 2. Howard Stern on WXRK 92.3 still rules the morning with a 7.5 share, but the station is only 12th overall, with a 3.0, six months after switching to modern rock. "Without Howard it would probably not even be in the top 20," comments a local observer. WXRK hired "Stuttering" John Melendez of the Stern show as a DJ for the time slot following Howard, hoping more people would stay tuned, "but I for one always switch to 'KTU as soon as Howard goes off. WOR 710 AM went from 1.8 to 5.5 afternoons since hiring Bud Grant."

**Small-Print Happenings and FM Industry News**

Muzak announced it will provide music to homes by means of EchoStar's Dish CD service. Features 28 digital audio channels. Dish CD is available a la carte at \$4.99 a month, or free to EchoStar subscribers with packages costing \$24.99 or more monthly. [For a related story see last month, p. 4, col. 1, under TN Nashville.]

As automation sweeps the FCC, monitoring stations at Grand Island NE and Allegan MI are among those closing. The Grand Island station is on a list of historical sites. Allegan was used for tracking the locations of enemy ships in World War II. When Cuba set up a high powered station a few years ago, they had a Chicago station (most likely WGN 720) go off the air for a few minutes so they could take measurements. The Canandaigua NY monitoring station nailed WAER \*88.3 Syracuse for not giving a proper ID during a period from 6:45 p.m. to 7:15 p.m. one day. We had to write a detailed explanation as to the steps to prevent that from happening again.

FCC announces new fees for stations and translators. They're up somewhat. FM classes C, C1, C2 and B pay an annual \$1250 fee. Classes A, B1, C3 \$830. FM construction permits \$690—commercial stations only. FM translators and boosters would pay \$190.

The NAB seeks less FCC emphasis on EEO recruiting by stations. It strongly supported most of the FCC's proposed EEO reforms. But the NAB let the FCC know that the proposal to assess fines is too much focused on the process of recruitment. Little emphasis is given actual hires of women and minorities, the NAB believes.

WAMC \*90.3 Albany NY continues to scoop in the funds from pledge drives. The most recent took in \$300,363 from 4120 listeners in four plus days. "Our listeners continue to astound us," said Alan S. Chartock, chieftain. The WAMC stations include WAMQ \*105.1 Great Barrington MA, where Chartock resides.

WNYC-FM \*93.9-AM New York are now flying solo, stripped of municipal ownership. Things got off to a "flying start" during the first week of solo operation, according to people at the station, who feel relieved to be free of the municipal yoke. At the same time, WNYC-TV \*31 was sold for \$207 million to ITT/Dow Jones Corp. The WNYC Foundation, new owners of the radio stations, must come up with the \$20 million to pay the city for the stations. This comes to \$3.3 million in each of the next six years. And gone is the city's \$1 million subsidy in a total radio budget of \$3 million.

Public broadcasting appropriations remain at \$250 million for 1999. This is the same as the 1998 level. But it is a \$35 million reduction from 1995 and \$100 million below the amount said to be needed to cover inflation and expenses. WCAL \*89.3 Northfield MN manager Paul Peterson: "While reductions in CPB grants are significant, next year's funding is sufficient for most stations to remain in operation. WCAL's CPB grants will decline from \$225,000 in FY 96 to approximately \$193,000 in FY 97. The House [and Senate] will very likely have passed the appropriations bill [by now]... You can... help

by letting your Representative and Senator know if you endorse the concept of a trust fund to replace federal appropriations in the future."

SFX Broadcasting has acquired six NC stations for \$42.8 million cash from HMW Communications. SFX will wind up with WTRG 100.7 Rocky Mount and WRDU 106.1 Wilson NC, as well as WMAG 99.5 and WHSL 100.3 both High Point-Greensboro.

American Radio Systems owns KSKS 93.7 and KKDJ 105.9 Fresno. Now it's buying KNAX 97.9-AM for \$11 million. In San Diego, Nationwide Communications already owns KFSD 94.1. It is buying KGB 101.5-AM. Until the FCC approves, an LMA.

A Justice Department investigation of the sales of several Denver area stations to Jacor apparently went through without a problem. It had been concerned because Jacor's combined audience share was 31.3 in the market.

Phillips Broadcasting is buying into its home town, Eau Claire WI. It is buying WBIZ-FM 100.7-AM to add to its WORB 95.1 Bloomer, WMEQ-FM 92.1-AM and CP for WVXD 106.7 Chetek WI. WVXD expected on later this year.

Evergreen Media tries to max out in Chittown. It buys WPNT 100.3 from Century Broadcasting Corp. for \$68 million. Since it already owns the legal limit of stations there, it is opting to get rid of Class A WEJM-FM 106.3 Lansing IL.

WZNF 95.3 Rantoul IL is joined by WHZT 105.9 Mahomet IL in the Urbana market. Liberty Broadcasting is spending \$200,000.

Almost any local station you tune to in Wheeling WV will be part of Osborn Communications ownership. For \$800,000 it's buying WEGW 107.5 to add to its WOVK 98.7-AM and WKWK 97.3-AM, along with WRIR 105.5 Bethlehem WV.

In Savannah, Patterson Broadcasting picks up WAEV 97.3 and WLTV 101.1 Hardeeville. It already owns WCHY-FM 94.1-AM and WYKZ 98.7 Beaufort SC. Patterson Broadcasting acquires its second FM in Pensacola—WWFS 98.1 Andalusia AL. It already owns WXBW 102.7 Milton FL.

WKLS 96.1 Atlanta was playing along with the Olympics. Ninety-six Rock at times turned into "1996-Rock." It had a contest about getting out of Atlanta. It also had "Fun Things to Say to Foreigners During the Games." For instance, in a foreign language it would tell you how to say "Why are you using so much toilet paper?"

WGST-FM 105.7-AM managed to be called the "Official Olympic Information Radio Station of the Games." It delivered weather reports in foreign languages.

Field tests of proposed DAB formats will take place without the participation of USA Digital Radio's (USADR) in-band on channel formats. "BE Radio" says USADR withdrew its systems after negotiations between it and the testing groups broke down.

One apparent "sticking point" was USADR's unwillingness to subject the technical details of its systems to Electronic Industries Association (EIA) scrutiny. USADR also found fault with EIA's plan to compare the results of IBOC formats with non-IBOC formats (such as the Eureka found in Canada and Great Britain). Those comparisons would have been sent to the FCC as a final recommendation.

The NAB urges the FCC to preempt zoning of outside antenna, including satellite dishes. According to Sec. 207 of the Telecom Act, all private restrictions that impair outdoor TV antenna installation and use must fall. Homeowners associations' restrictive covenants may no longer be allowed to prohibit or otherwise impair outdoor TV antenna use. FM, ham and CB antennas are apparently not addressed either by the NAB or the new law.

The FCC grants the first experimental HDTV license to WRAL-TV, Channel 5, Raleigh. It would move to Channel 32, and be known as WRAL-HD. Owner Capitol Broadcasting is building the station "because HDTV is critical to the

future of free television." CBS-TV engineering and technical staffs are actively consulting. A special Andrew TV antenna will provide 100 kw at the 534 meter height on the tower. Among other applications for HDTV are two in Washington DC.

Fined: WNOR-FM 98.7-AM Norfolk and WAFX 106.9 Suffolk \$15,000 for EEO.

An AM three-way sharing situation for a single frequency is about to end, according to the "M Street Journal." WCRW Chicago is being bought for \$762,500 by sharer WSBC. The other station is WEDC, which is on midnight to 6 a.m., 8:30 to 10 a.m., 3:30 to 5 p.m., 7-8 p.m. and 10-11 p.m. WSBC now uses 1240 kHz at all other times. Both stations are ethnic. When I visited WSBC in the mid-60s, it had studios on Western Avenue, not far from where Allied Radio and Olson Radio used to be. Its antenna was atop the roof.

An FM application has been filed in London for a station that would bring the children's format, Radio Aahs, to England. Parameters not announced.

FCC totals as of June 30: FM 5352 stations on the air (92.1-107.9) and licensed. FM (88.1-91.9) 1838, plus 2600 FM translators. This compares to 4884 AM stations licensed.

From the classifieds: Saga Communications' great opening for a manager/sales manager at Oldies 104 in Sioux City IA (WNAX-FM). FAX letter and resume to Ed Christian, Pres./CEO, (313) 888-7150.

Universal Radio announces the BayGen Freeplay FM-AM radio. "You have never owned a radio like this before. The power source for this radio is you! The battery-free Freeplay radio is the world's first radio to incorporate the ingenious Bayli's generator which combines the latest in radio technology with the centuries of clockwork spring. Winding the crank for only 20 seconds provides 30 minutes of listening." From South Africa. May also be operated from a 3 to 9 v DC source. \$99.95+\$5 shipping, 1-800-431-3939. If you buy this radio, write in and let me know what you think of it.

FANFARE FM TUNER on the Internet. We invite you to visit our new website at <http://www.fanfare.com>. Get the latest news on FM and digital radio, plus tips on improving reception. Download our latest product info. You can also call us at (800) 268-8637 or (905) 793-7953, fax (905) 793-5984. WLFJ \*89.3 seeks air personality. Air check and resume to 2420 Wade Hampton Blvd., Greenville SC 29615. EOE.

"If you ever get inquiries for work on the East Coast regarding engineering (transmitter work, studio building, etc.), we're happy to do it. Any 'pass ons' would be appreciated and we can do the same for you for your line of work, if desired." From Mid-Atlantic Radio Service, David W. Schmidt, PO Box 11502, Wilmington DE 19850; (302) 323-0338.

#### FM FORUM

##### CONTRIBUTIONS FROM READERS

NC's David A. Hunt describes WETR 830 Eden NC. It's a new station that calls its format "entertainment radio" with beach programming, local sports, some national programming on weekends and an outstanding morning show. "Their music ranges from the Platters to Elton John to Garth Brooks; they seem to play whatever the morning show hosts feel like playing! I fear such a show will never make its way onto the FM dial."

The leading FM morning show is "Murphy in the Morning" on WKZL 107.5. "The owners of WKZL have found another way to limit FM diversity: they are putting Jack Murphy's morning show on three other FM stations that they own in other markets. The local flavor of 'Murphy in the Morning' has been lost as Mr. Murphy tries to adapt his show to accommodate listeners in Alabama. Ironically,

Mr. Murphy has become the top local radio personality by making his show essentially a talk radio show. He only plays three or four songs per hour! Is this another example of the 'Tyranny of Talk Radio?'"

Malcolm Kaufman sent a piece, "Mario Mazza," on the first year of Mazza's being program director of WCRB 102.5 Waltham MA. WCRB is Boston's last stand-alone FM and worth about \$40 million. There is a trust signed by the original owner, Rev. Ted Jones, making WCRB classical for the next 100 years. Jones "put a format on the air he believed in, then built it up. Toward the end of his life, he saw classical owners cashing out, selling to operators who then changed it into another rock station or whatever. He felt that his relationship with the market was such that he did not want to give that heritage up. He legislated that the station was to maintain a classical format for the next 100 years, assuming—and this is key—economic viability. That is our challenge." Mazza, 47, had been at WNCN, now WAXQ, 104.3 New York. He said WNCN changed format because "they could make a lot more money doing rock, and, from a business perspective, they did the absolute right thing. If you want to make a lot of money—I mean, lots—you're probably not going to do classical."

Donald Fritz sent a L.A. Times story on Jacor buying out the radio group owner Citicasters. It's a \$770-million transaction. Jacor would own 54 stations, but many of them are in mid-size markets. It will rank third behind Westinghouse/CBS, Inc. and Infinity. Jacor is controlled by Sam Zell, a Chicago real estate magnate who runs the Zell/Chilmark Fund. That fund is 70 percent owner of Jacor. "Zell has been known as a bottom-fisher, someone who pays discounted prices for distressed properties, but he paid full value for both radio companies." Jacor is also picking up stations owned by Noble Broadcast Group. The "Wall Street Journal" mentioned WAXQ 104.3 NY (see above paragraph) is being sold by GAF to Entertainment Communications, Inc. for \$90 million. ECI, in turn, is swapping it to Viacom, Inc. for three Seattle stations. The WSJ quotes industry people as saying consolidation may lead to more program diversity, not less. "If a company owns five FMs in the same market it can better afford to experiment with one of them," said Gary Stevens, a NY radio broker and former WMCA (570) "good guy."

"Radio has been a relatively minor player in the media firmament, accounting for just \$11.3 billion, or 7.1 percent of all U.S. advertising expenditures. Moreover, there are over 10,000 licensed radio stations in the country. As a result, the business is brutally competitive."

Charges have been filed against WSTR 94.1-AM Smyrna-Atlanta GA about racial discrimination. Mark Kanov, vp and gm, said the complaints are "groundless." Two former salespersons, Henry Bruen and Arlecia Duke, allege discriminatory practice against blacks in hiring, promotion, compensation and recruitment. Brown was fired in 1991 for poor performance and had failed in court to win action against the company, while Duke resigned to take another job, Kanov said. Roy Boyce, an

attorney in the FCC's EEO opportunity branch, said a fine is a possibility. More likely, is for the stations to come up with a plan to improve hiring and operating practices for minorities.

Kanov, as the result of an April Fool's joke, suspended morning show hosts Steve McCoy and Vicki Locke for a bogus story that had Britain, France and Israel announcing a joint boycott of the Olympic games due to continued concerns about safety. Kanov wasn't amused. Length of suspension not revealed.

The MI Broadcasters Assn. reports that WUCX \*90.1 University Center [Bay City] received \$1764 from the Saginaw Community Foundation to produce one-minute radio spots promoting racial harmony and public awareness of cultural diversity. They will be distributed to area commercial stations.

John Alan sent a press release about his resignation from WKHR \*88.3 Bainbridge OH. He'd been there six years. Alan says the station's recent change in philosophy was a major factor in his departure. It had changed to big bands/adult standards a year ago. Alan agrees the change was long overdue, but was "handled in a very disorganized manner." No successor has been named. Also resigning is C. J. Kelly, a six-year board member and music director. "Citing irreconcilable differences with the station's general manager Scott C. McVay, Kelly tendered her resignation effective Apr. 8."

A reader advised on a video advertised in "Popular Communications." It shows how to assemble and operate a micropower (pirate) radio station from a kit. Taught and designed by Steve Dunifer, the kit-video costs \$25.95 plus \$5 shipping from Gary Norris, Box 315, 1442A Walnut St., Berkeley CA 94709; (510) 895-3528. I would guess the video would be a pitch to buy Dunifer's electronics hardware.

Nick Lemonakis: "I'm angry over the communications act. I think it's a bad bill and will destroy radio. I recall Trent Lott (R-TN) saying on 'This Week with David Brinkley', 'This bill will provide greater choice and bring about more diversity'. Nothing could be further from the truth! When duopolies were allowed I told my friends in broadcasting in Baltimore and Washington that this action limits choices in the marketplace and eventually all the commercial radio station in the U.S. would be owned more or less by two or three companies. Just look at what happened in New York city with WYNY 103.5. Now there isn't any country music on the radio in the Big Apple. To be fair, WYNY's format change wasn't a result of the communications act. But if Evergreen buys another station in NYC, thus preventing country from going somewhere else on the dial, it will be."

"Stereo Review" had a report on an amplified FM/TV antenna by Recoton, the BullsEye at about \$120. It resembles a small flying saucer. Its cost is more than most roof antennas and whether or not its performance is up to par remains to be seen. More info call (800) 732-6866.

The March 14 "Buffalo News" had a section devoted to a rock radio hall of

fame. Seems an idea the newspaper is promoting to try to build such a facility. It included nostalgia items on how the rock leader in the '50s to about the mid '60s was WKBW 1520 AM. Then WGR-FM/WGRF 96.9 took over, WPHD 103.3, and others.

Frank Merrill: "Oh, all this stuff I hear where people complain about some 'liberal programming' on PBS and NPR. Isn't it supposed to be that way? I thought the CPB charter encouraged the airing of varied viewpoints, which of course would include liberal, no?"

Jim George writes about Nassau Broadcasting Partners, owner of WPST 97.5-AM Trenton, buying WJLK-FM 94.3-AM Asbury Park NJ for \$16.75 million. "They also bought WQNJ 98.3 Ocean Acres, which simulcasts WJLK-FM. All the stations plan to retain their DJs and their respective formats."

Marc Sophos, who runs public station WDFH \*91.1 north of NY City, says WDFH's antenna is about 10 meters below average terrain. "We are working on an upgrade for WDFH which will increase the antenna height significantly. . . This will make it possible for me to receive the station more clearly at home, and will make it possible for actual listeners to do the same." He sent a copy of the "Pace Law Review," Summer, 1990, with an article he wrote, "The Public Interest, Convenience, or Necessity—A Dead Standard in the Era of Broadcast Deregulation?" His 1990 conclusion is more apt today than when the article was written. Here it is:

The Federal Communications Commission has a congressional mandate to regulate broadcasting under the public interest standard. During the first 45 years of its existence, the Commission established a number of rules and procedures intended to ensure that each broadcast station serve the public interest, convenience and necessity. However, during the 1980s, it has eliminated or relaxed many of those provisions, preferring to leave regulation in those areas to "market forces."

The "market" to which the Commission has repeatedly referred is not the marketplace of ideas, the first amendment concept so central to a functioning democracy. Rather, the Commission has based many of its deregulatory actions on the economic marketplace. The benefit to the broadcast industry is clear: stations are more profitable than ever; they are being bought and sold for skyrocketing prices; and they are unfettered by restrictive regulations.

However, the Commission's first responsibility is to the public interest, not to the private interest of the industry it is supposed to be regulating. It must reconsider the impact of deregulation on the public interest. It has the power to require stations to air programming that contributes to the marketplace of ideas. It also has the power to establish rules designed to maximize the diversification of station ownership. Under deregulation, the public is being cheated out of the beneficial use of its airwaves because of greedy, and increasingly unregulated, exploitation by private entities.

Deregulation has had a devastating effect on the public interest standard and on the public interest itself. If the Commission is unwilling to regulate the broadcast industry, Congress must act to see that it does.

That article received the favorable attention of then governor of NY Mario M. Cuomo. He wrote: "You point out well the great lengths to which Reagan administration regulators have often gone to carry out their laissez-faire ideology, and the analytic contortions they have performed to get there. . . Your work is a useful part of the antidote we need to the deregulatory excesses of the 1980s." Cuomo, incidentally, has just left his talk program to work on Bill Clinton's reelection campaign. SW Networks will continue feeding his show with "best ofs" and guest hosts through September.

FCC Commissioner Ervin S. Duggan wrote Sophos: "Unfortunately so much has happened to erode the public interest standard that its future is uncertain. I intend, however, to do what I can to rehabilitate that standard in a form that makes sense in an environment of 'light-handed' regulation."

Answering a question about when WSNJ-FM Bridgeton NJ moved from 98.9 to 107.7, Bob Weiss called. He said it was in 1961. This made way for the creation of WPBS, the Philadelphia Bulletin station, on 98.9. WPBS was sold to Lin Broadcasting in 1977, and became WUSL, "US1," and finally "Power 99." A concern in 1961 was its spacing to WAWZ-FM \*99.1 Zarephath NJ, now WAWZ. However, there is no short spacing, and neither station uses a directional antenna.

Sept. 4-7, Rochester NY: The Antique Wireless Association's 35th annual historical radio conference. "Still the biggest antique radio event in the world." Call (607) 739-5443 for info.

KUMD \*103.3 Duluth MN has had a streak of bad luck. That included lightning hitting its antenna, causing \$4900 damage. The station's insurance deductible is \$5000. CPB funding cuts came to \$10,000. New digital satellite equipment will cost \$5100. And the university cut \$32,000 from KUMD's \$405,000 budget. A telemarketing campaign to cover all or some of the losses is going on. One parttime person has been let go with the hope no more firings will be needed. "It's a dangerous situation, and I'm a bit nervous about it," manager Paul Schmitz said. "But I think we can get through it." KUMD's frequency was once WDTN, a commercial station. There is a tentative plan to move KUMD to the educational band and again make 103.3 a commercial channel.

"I have a comment on the WJUX translator case" (June, p. 7), writes Louis J. Sicilia. "It really doesn't matter if the translator programs the primary station, but it really matters that the FCC translator rules violate the first amendment. The prime function of the FCC is to be a 'traffic cop' so that stations don't interfere with each other. If the FCC authorizes a translator at a particular frequency and location, it's up to the licensee to decide the content of such translator. There is low power TV, why not low power FM? Mr. Turro should take the case all the way to the Supreme Court. . ."

Until September,

 WZLX 100.7 op [vocals, "Coast"  
 MA Harwich Port WJCO 93.5 m, adult standards/  
 MA Mashpee WWKJ 101.1 op, "KJ-101." Both of these in a combo with WCOD 106.1 Hyannis-WXTK 94.9 West Yarmouth. A cable to the satellite dish for WJCO and WWKJ was cut by a 15-year old boy, angry that the stations dumped Pearl Jam and Smashing Pumpkins for Frank Sinatra and Eric Clapton. "It was like a \$4 wire. But it sent some kind of surge that went down and blew out a \$5000 amplifier," said a local cop. The boy was located after the stations announced a \$10,000 fine to find the culprit, but "no decision about paying out [the reward] would be made until the police investigation was done." The "\$10,000 reward certainly got the phones ringing." The FBI had been notified of what was originally termed an act of sabotage. WWKJ came back later that same day, while WJCO was off over two days. My comment: It's sad that stations have to be so tethered to a satellite that they cannot or will not program on their own.

**On Air—Real Stations and Pirates (Selected)**

AL Huntsville W241-- 96.1 a WEUP-FM 92.1 Minor Hill TN transator; as well as W263AF \*100.5 Mooresville and W238AD 95.5 Trinity AL. Arbitron tells me that many diary reports are coming in from the Decatur area reporting WEUP-FM reception on 95.5. Makes me wonder if W239AB \*95.7 Decatur is on the air. [sold for \$90000  
 AR Lake Village KDTL 103.5, still oldies./ CA Garberville KHUM 104.7--employs Dan Lawrence, known on air as "Digital Dan." He may be the only radio announcer using a voice synthesizer. He composes his words while records are playing. Lawrence had acted before losing his vocal chords to cancer. The "Digital" part of his namesake is from using fingers on the computer to form the words. The system he uses is similar to that of physicist Steven Hocking ["Radio World" newspaper, 9-4].  
 CT Pawcatuck WKCD 107.7--the only station between New York and Boston with a "smooth FM" format from SW Networks. It serves New London CT and Washington County RI. It is located in a 100-year-old former soap factory. It wrote Hank Halbrook in MD saying his DX report is the most distant to date, and claims an ERP of 3 kw, al though other published data indicate it as 1.85 kw.  
 FL Sebring WYMR 105.5, moving to 105.7 in about "a month." It will become a C3, al though not yet having a CP for such. "This is a part of a daisy-chain of frequency swappings caused by WTBT 105.5 New Port Richey wanting 100 kw, which you've mentioned in FMedia!" Other cities affected: Avon Park, with WWOJ to go to 99.1C3; Holiday (WLVU-FM moving from 106.3 to 97.1C3); Sarasota moving to 104.3 (see "Facilities," above).  
 IL Fisher WGNN \*102.5, \$, g {from 107.1  
 KY Owingsville WKCA 107.7, having moved/  
 MN Minneapolis "The Beat" 97.7 mono "to give us any possible advantage. We use two antennas, one aimed NNE and the other SSE, for a D-shaped coverage pattern. I wish you hadn't asked if we transmit from the roof!" On just short of 90 hours a week, signing on weekdays 4 p.m. and 11 a.m. weekends. On air to 3 a.m. the next day, Sun.-Thur., to 4 Saturday and Sunday mornings. It was featured in a "Minneapolis [Star-] Tribune" article Aug. 16 revealing the identity of the operator as mid-30s-ish Alan Freed at (612) 391-BEAT or www.beatworld.com; or PO Box 3333, Minneapolis MN 55403. David Fisk, an FCC spokesman, was mildly encouraging to "micro-broadcasters": "Would-be

broadcasters who apply for special consideration are sometimes granted waivers." Freed claims everyone involved in The Beat has a background in broadcasting. "We're not interested in being stupid or irresponsible," he said. It's not strictly urban, but more like the format of WKTU 103.5 Lake Success-New York [see below, "DX Doings"].  
 NY Syracuse "JAM-FM" 90.7. "Scores of stations like these are active in cities across the United States. It pays to check the low end of the FM broadcasting band in your area to see if you have any local pirate activity. They come and go, so a regular bandscan of the local FM band is necessary to find them," writes George Zeller in "Monitoring Times."  
 PA St. Clair W220-- \*91.9 (having moved from 91.3). "Heard the translator this AM fighting for dominance. One of the stronger translators here at that distance."  
 BAHAMAS Freeport, Grand Bahama, Cool 96.1 FM, 6500 ft; v; 61 m tower, with "continuous

COOL 96

"Grand Bahama's very own radio station!" hits." Says a listener: "This could be a college station since they read a lot of local news from St. Pauls University. Musicwise, I've only heard them play the smooth jazz format. They don't seem to have any calls or IDs."  
 Nassau Love 97.5 FM, with about 6000 watts  
 MOR 94.9 FM, with about 1500 h,v  
 100.3 Jamz FM, receiving a signal by satellite from Fort Lauderdale. "I am not certain what strength they operate at."  
 ZNS-FM 104.5, "but I do not know what signal strength they have. For about 50 years (until FM came in) there has only been one radio station in the Bahamas and that is Radio Bahamas (ZNS), which is an AM station on two different frequencies, namely, 1540 AM and 810 AM."  
 FRANCE Paris mono news stations include France Inter 87.8, Europe 1 104.7 and France Infos 105.5. "Radio Classique is a noncommercial classical station on 101.1. The Voice of America is on 90.5, 98.8 and 102.4."

**Off Air—Or Not Yet On**

MI Grand Rapids WBYW \*89.9 still off  
 MI Holland WTHS \*89.9 "temporarily off until the kids return to Hope College [later] in September, at which time WTHS will resume its student-run, p, format."  
 MN St. Louis Park KDXL \*106.5, "with listings as having a 57 kHz SCS not meaningful until the station returns, probably this fall."  
 PA Beaver Springs WWBV 106.1, but expected to return with a new format later this month.

 "Sure enjoy FMedia! which my wife, in spite of a very hectic schedule, is finding time to read to me (I am totally blind). Keep up the good work," I. R., Hagerstown, MD.

SCS Services, 57, 67, 92 kHz  
 Symbols are as in the "FM Atlas"

AL Dothan WOOB-FM 99.7 no SCS (had FM)

Radio Reading Service of the Rockies, Inc.

CO Colorado Springs KRCC \*91.5 11, 87  
 GA Athens WNGC 95.5 f(i).c. "Add 92 kHz relay of main channel, which would appear to serve no purpose."  
 KY Owensboro WBKR 92.5 11, FM, and listenable in areas north of Louisville. It has different music from that of WKA 92.9 Nashville.

MI Gaylord WPHN \*90.5 still 1G.G. The 67 is Children's Sonshine Network, while the 92 is

the newer Sacred Favorites Radio. Latter is targeted to the over-50 set with hymns and timeless melodies. This is the only station known to have both services, although an article in "Religious Broadcasting" says that even AM stations can become Companion Radio affiliates (the group offering both the children's and the seniors programming). AM stations can lease subscribers on an FM station in their area. "For the first time, stations can readily use their subscribers for ministry instead of for paging services and background music services." Contact Companion Radio at PO Box 25, Port Gamble WA 98364; 1-800-249-3417.

MI Grand Rapids KMFY 96.9 (1)  
 NJ Long Branch WZVU 107.1 (1), scrolling "GOOD TIMES--GREAT OLDIES FOR MONMOUTH/ORLEANS COUNTIES"  
 WFME \*94.7's 92 is still Radio Tropicale, whose real address is 518 Front St., Second Floor, Hempstead NY 11550, no thanks to WFME, where moros abound! This ad is from the

newspaper Haiti Progres. A different company is at 307 Front St., even though the Radio Tropicale sign is still there. Radio Soleil also advertises; it is on the 67 kHz of WSKQ 97.9

**Radio Soleil d'Haiti**

New York. [no cross talk]  
 WHTZ 100.3 TX, 67, very strong with/  
 NJ Teaneck WFDU \*89.1 no SCS. "Due to financial problems, the Korean programming is no longer carried on our sub. As of now, there are no potential subscribers on the horizon. However, I am hopeful that you will be able to secure carriers for the service shortly."  
 NY Garden City WLIR-FM 92.7 with RBDShowing calls as "WLIR." Scrolling message "is choppy—but eventually says "WLIR THE ISLAND 92.7 AND 98.5 LIR THE NEW WLIR."  
 TN Nashville WJXA 92.9 FM, R, as before. "Excellent signal, blankets the market."  
 WSM-FM 95.5 no SCS; had TS, 67  
 TN Waverly WVRV 105.1 FM, 67. "Nobody would want to listen to it, but if they did this would probably be rather weak in Wilson County and areas east of Nashville."  
 VA Charlottesville WQMZ 97.5 TS, sports and special events, 67 (from FM)  
 VA Yorktown WYCS \*91.5 still with TT for the blind, but that and the main carrier are threatened because the school board bought 10 new buses on credit. Administrators are looking at WYCS's \$100,000 budget as a way of paying for the buses. A Save Our Station (SOS) committee has formed. Enrollment in the radio curriculum has been declining, but 28 students have pre-enrolled for the activity this year. Some underwriting has also been done.

WA Seattle—SCS test for Seiko going on, involving several FM stations, not identified, 57 kHz. It is a datstream called SWIFT, "Seattle Wide-area Information for Travelers." The test is scheduled to run through July, 1997.

"Just curious: Is there a 17th edition of the Atlas in the plans for anytime in the near future?" P.B., Spring Lake MI. [Yes, I have cleared most of the inventory of the 16th ed., and will start work right after doing this FMedia! A new edition could be ready by November. It is too early, however, for you to advance order.]

"The print quality of the August FMedia! wasn't up to your usual standards, a perception perhaps increased by the very poor reproduction of the masthead."

**Selected AM Happenings**

AZ Casa Grande KFAS 1260: "They've been off the air since 1994. It seems the guy that owned the land that the transmitter was on chopped down the antenna. I never found out if there was any action taken [on the station's license]." Local KONZ 106.3 Arizona City, which was long dark, has been deleted by the FCC.

AZ Phoenix KVVA 860 sold at auction in bankruptcy court to Pulitzer Broadcasting, owner of KKLTV 98.7-AM, for \$4,925 million. Z-Spanish picked up KVVA-FM Apache Junction Phoenix for \$8.5 million.

CO Fort Collins WWVB (long wave), a standard time and frequency signals station, might have its emanations in clocks, VCRs, TVs and watches. "Then, re-setting clocks after a power outage would be a chore of the past. It is estimated that such a clock would cost only \$10 per device. What a deal."

FL Sebring WITS 1340 now using CD automation, rpm plus Top 40, "ABC Stardust."

GA Atlanta WSB 750 with its news-talk format

now No. 1, Arbitron, spring. It's "back on top!" ME WVHA Shortwave "sometimes closes earlier than scheduled. Pastor [John] Osborne announced problems with its 6-11 mhz antenna, and at half power, 250 kw, monthly electricity costs \$7.4-10 K. Still difficult to make payments on loan to purchase WVHA and it may have to be sold." [From Glenn Hauser's column in "Monitoring Times," July.]

MA Waltham WRCA 1330 lost its Saturday afternoon DJ William Marlowe, 71, to cancer. Marlowe forsook rock and roll in the '50s. For 50 years he played tunes by the likes of Sinatra. Most recently he was on WRCA four hours each Saturday. He had also been on WORL and WRKO, both AM. His refusal to play rock cost him many job opportunities. "He made the good music meaningful to people. There will be nobody to fill his shoes," said his personal manager Paul Schlosberg. Two-hundred people came to pay respects at the J. S. Waterman & Sons-Eastman-Waring Funeral Home in Boston. At the service radio d-j Ron Della Chiesa ["himself a legend"] said: "When he went personal with me, he would always end with 'I love, you, Ronnie'."

MO Rolla KMOZ 1590 silent

NY New York WABC 770 takes Paul Harvey from WOR 710. He had been on WOR 17 years. WABC said to be revamping much of its lineup after Bob Grant went to WOR. Harvey's move takes place this fall.

WLIB 1190 granted a temporary waiver for one hour to 11 p.m. nightly to allow it to carry live coverage from Republican and Democratic conventions.

NY Plattsburgh WEAV 960 silent

NY Sandy Creek WSCP 1070 returns to air with country, simulcasting WSCP-FM 101.7 Pulaski ("pul-ask-1").

NY Spring Valley WLIR 1300 m, from Jewish, now being operated by its previous owner (see last month, p. 5, col. 3). Its move from Jewish occurred before last month's report was published.

[ent, returns with talk

NY Syracuse WOFL 1490 had been si-/SC Chester WGCD 1490—license designated for hearing; it has been silent since July, 1991.

"Several attempts have been made to sell the station, and its last authority to remain silent expired on March 11, 1996," according to the "M Street Journal."

TX Houston KMPQ 980 drops Spanish for Kidstar satellite service, targeting children 8 to 11. "It's a music format, mostly Top 40, and very listenable. High energy, personality, presentation."

VA Arlington WZHF 1390 health format. GM Charlie Ochs: "I've always been of the opinion that simulcasting an AM radio station is a waste.

The problem is finding something to put on that AM radio station that's going to make some money." In 1995 he converted WBZS 730 Alexandria VA to business, having been WCPT, simulcasting WJZW 105.9 Woodbridge VA. Ochs said this kind of experimenting isn't done on FM. "On the FM band, they're operating on their own. They're doing quite well. They're making more money than you can ever make doing the business format or this health and fitness format." Owned by Viacom, also owner of WMZQ 98.7 Washington DC.

WA Enumclaw KENU 1330, off air, but being sold to Green River Community College for \$40,000. The college is buying the bankrupt daytimer to give it a voice for its new campus in Enumclaw. The school also operates KGRG "89.9 Auburn, on its main campus.

**FM Rulemakings Proposed**

*First date is for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.*

- AZ Kingman 101.1C2 for 99.9C2, KGMM, Oct. 7, 22
- AR Stamps 104.3A, first come/first served
- CA Huron 98.3A counterproposal
- CO Limon 93.7A, Sept. 16, Oct. 1
- CA Mountain Pass 99.7B for 99.5B, KHYZ, Oct. 7, 22
- HI Keaau 105.1C2, Sept. 16, Oct. 1
- KS Larned 106.9C1, first come/first served
- LA Franklin 106.9C3, Oct. 7, 22
- MS Prentiss 104.9A, replies Sept. 18
- NV Indian Springs 99.3C from A, KPXC, Oct. 7, 22
- OK Wynnewood 106.1A, Sept. 16, Oct. 1
- PA Bear Creek 105.9A, replies 24
- UT St. George 97.9C from 97.5C, Oct. 7, 22

**FM Rulemakings Finalized**

*Dates are when FCC filing windows are open*

- AR Hatfield 104.1C2, Sept. 30-Oct. 31
- CA Shingletown 96.1A, Sept. 9-Oct. 10
- CO Burlington 99.3C1, Sept. 9-Oct. 10
- KS Castana (location unknown) 107.5A, Sept. 30-Oct. 31
- KS Kiowa 98.3C1, Sept. 30-Oct. 31
- LA Franklin—dismissed 106.9C3 bid
- NV Sun Valley 94.5A, ended Aug. 29

**DX Doings—An Occasional Feature**

Tom Rothrock, who lives in Hagerstown, has had a summer full of FM skip reception. The most recent was Aug. 17 when he heard KTCU "88.7 Fort Worth on a car radio. "I found very interesting—your comments about the station in McConnellsburg PA on that frequency. I have heard none of their tests since December of last year. Now I know why." The early afternoon of Saturday Aug. 17 I had skip from NC on the car radio—WXDU 88.7 Durham kept interfering with a small transmitter I was testing. Also heard was WCPE "89.7 Raleigh. This is rather late in the summer for FM skip to be received.

I don't know if it was atmospheric or what, but the microwave was not functioning to northern stations of WI Public Radio from about 7 to 9 a.m. Aug. 28. WHWC "88.3 Menomonie was playing some enjoyable background music in mono and announcing the network feed was down. Later, when they rejoined the talk network, they went to pseudo stereo. KUWS "91.3 Superior and WHSA "89.9 Brule simulcasted with stereo jazz, announcing that they couldn't get the network. WHBM "90.3 Park Falls carried all mush, while WHRM "90.9 Wausau was not listenable most of the time. Neither station apparently had local people come on live to insert their own programming. WHLA "90.3 La Crosse sounded normal most of the time, except for dead air

that took over about 8:35 a.m. for quite a while. WUEC "89.7 Eau Claire sounded like mush, but that might have been because of poor reception here. The only station that sounded normal was WERN "88.7 Madison. WRFW "88.7 River Falls WI, which usually carries WI Public Radio, was off the air, and must have been off for the summer.

Hank Holbrook in MD had Al Germoad, a MO broadcaster, over recently. They evaluated radios. "We decided the only good DX models of the Zenith Trans-Oceanic were the tube sets from the '40s and '50s. The one I had in the early '50s with its Wave Magnet antenna was a hot DX set. Apparently when Zenith went to transistors the DX potential was lost!"

One of the stations Holbrook received earlier in the year was WKTU 103.5. Its chief engineer John Hadden wrote back, saying WKTU is a full Class B from atop The World Trade Center, Tower 1. "I have two alternate/main transmitters located on the 110th floor of Trade... The master FM antenna was originally built to serve all the NYC radio stations, so you might imagine there is a rather large multiplexor room. Currently, however, only three stations in town use the antenna on a full-time basis, with one additional station using it as an emergency site. That is because coverage from WTC is not ideal in the midtown Manhattan area, so the Empire State Building is the broadcasting site of choice. Tower 1, where our transmitter is, is the one that was bombed several years back, and we still have some electrical problems as a result of soot in switch gear.

"As for being in Lake Success, that was the original location of WJFM, which was then turned into a hot AC format and changed calls to WYNY. Westwood One purchased the station, moved it to midtown, and through some interesting legal work, got the transmitter relocated to Tower 11 (south) of the WTC. Then, in 1990, in the interest of public safety, the transmitter and antenna were moved to their current location—there being an outdoor observatory directly beneath the antenna on the south tower. On Feb. 10, 1996, WYNY, New York's country music station, changed format and call letters to pop/disco/dance WKTU, 'The Beat of New York', and in your short few months recently were rated by Arbitron as the No. 1 radio station in America.

I now have the new Sangean ATS-909. I have not evaluated all its features, but it seems to perform very well on all bands it is designed to receive—AM, FM and shortwave. On FM it gets RBDS displays, but unfortunately does not scroll. The local station only reads "KDNW-FM." It does not scroll to the rest of their message, "RELIGIOUS MUSIC."

I also have a BayGen radio, also from Universal Radio in OH, whose power is me. It lacks batteries. The power is by winding a spring inside the radio. About 20 seconds of winding gives you 20 minutes of radio playing (not 30' as advertised). See last month, p. 7, col. 2. It is quite a novelty radio. A blind friend wanted to buy it on the spot, paying \$20 per month for five months. I said I want to show it around a bit more. I met the mayor of Duluth,

Gary Doty, at an event, and had him wind it. The radio volume stays constant, up to when the wind stops. It does not gradually get weaker, as I expected. The radio performs quite well on FM, is abysmally poor on AM and quite poor on shortwave. The dial calibration is terrible on shortwave. MN DXer, John Ebeling looked at it and noticed it has no markings saying it is certified under FCC Part 15 of the rules. Neither does the G-E 7-2887 "Superadio," for that matter. The G-E is being sold, I understand, under an exception to those rules. It radiates 300 fcs. The BayGen does not say where it is manufactured. Supposedly it is made in South Africa. Products sold here should say where they are made. I have not dared to look inside the radio. A warning on the back mentions the powerful spring and not to open the set. An optional 3 to 9 v DC adapter can be used for mains powering. The Journal of Commerce had a report on the BayGen: "Part of its attraction in the First World is its ability to keep on tickin' should all else fail. There is a large fraternity interested in radios. There are the environmentalists, and then there are the whole survivalist groups who want to be the last living person on the face of the earth."

Another new radio is RadioShack's Optimus series model 12-604 at \$79.99. It is a five band model with UHF-VHF TV audio, 2 to 69. Like the G-E Superadio, it has outside antenna terminals and a separate tweeter speaker. I have not tried that radio, and was told it is only at a few of the RadioShack stores.

#### **CBL (AM) Toronto May Migrate to FM, Take Over 99.1 Spot, Much to Chagrin of Commercial Station Applicants**

In a strange twist, the Canadian Broadcasting Corporation may wind up the winner of the coveted 99.1 spot in Canada's largest city. Groups such as the Mandate Review Committee of the CBC, the National Film Board of Canada, Telefilm Canada and the Department of Canadian Heritage have all come out in favor of the CBC getting the FM licence and shutting down 740 AM. Also included is an unnamed FM frequency in Montreal.

Industry Canada advised potential applicants that the former deadlines of Aug. 6 and Sept. 26 no longer apply. The applicants had filed letters of intent and have already spent hundreds of thousands of dollars on their applications, according to a story by Harvey Enchin of the "Globe and Mail." Denham Jolly of Milestone Communications Ltd. had hoped to launch a Toronto station devoted to urban contemporary music. He pointed out that the CBC already has seven media outlets in Toronto. "If they can't reach their audience with that, then they better look at other means of sending their message," he said.

The decision to give the frequency to the CBC must be made by the cabinet. With its transmitter west of town in Mississauga, CBL AM has had severe coverage problems in downtown Toronto.

That city already has the lowest level of AM listening of any major Canada city, and the CBC's audience share has dropped precipitously over the past few years. The government may also order Industry Canada to reserve additional FM channels for the CBC in Fredericton, Quebec City, Chicoutimi, Crystal Beach, Paris, Regina and Victoria.

Terrence Corcoran, in a column in that newspaper, noted that private broadcasters have been trying to latch onto 99.1 FM for the past eight years. "Its technical position on the dial is considered the best in the area, and its potential audience reach is great. . . . But now in a mad power grab at the last minute, Sheila Copps and the Canadian Broadcasting Corp. have pushed through a plan to nationalize the frequency for the CBC."

Even though the national public broadcaster is in the midst of a budget crunch, and its mandate is under review, Ms. Copps is preparing to hand it a costly expansion opportunity. . . . At least a dozen private broadcasters have filed applications to Industry Canada for permission to use the Toronto channel. The most promising applications were for music stations aimed at Toronto's exploding multicultural communities. "Rather than blaming a poor signal, the real reason for [the CBC's] failure to attract listeners is unpopular programming. Toronto audiences want something other than hours of tiresome whining about social issues and the personal lives of on-air personalities." In the classical sphere CFMX 96.1-103.1 within 10 years has passed the audience of CBL-FM 94.1, which is "decades old." CBL AM "has been going down the tubes for years. Faced with dwindling shares of the radio audience because of inept programming, the CBC must rely on Ms. Copps to perform an act of piracy at the taxpayer and private sector expense."

Three others wrote letters defending the CBC. Eileen Swinton, Toronto, says that Corcoran's view of the world is unidimensional, "that he would leave no place in it for those of us who want to live our lives as something other than mere consumers. . . . Almost all of the thousands and thousands of people living in apartment buildings in Toronto have trouble with AM reception. There are now a couple of generations of city dwellers who were not brought up with the richness of the CBC—so obviously the listenership is declining. . . . The CBC needs 99.1 FM."

Harold Redekopp, v-p, CBC English Radio Toronto, said the CBC has never been "coy" about the need to move to FM in areas where AM listening is low and AM reception is particularly bad. Toronto meets both tests, he says. "Corcoran did not speak with anyone at the CBC before writing his column." The application

was not a "last minute power grab" it was, in fact, filed in June, and is "not a costly expansion opportunity." FM "costs less to build and operate than AM. Since we would relinquish the AM frequency, no expansion is involved."

Another writer, Eron Main, Toronto: "I have had better luck picking up the CBC on the highway from Flin Flon to Prince Albert than I do in the heart of Canada's largest city. I have on occasion been unable to listen to the CBC evening news while parked in my car on Front Street across the road from the CBC studios. . . . My wife and I can only pick up the CBC in one room, and there only by using the fine-tuning dials of a world-band shortwave radio."

"For possibly the first time in her political career, Heritage Minister Sheila Copps has done something I wholeheartedly agree with. Put CBC Radio in Toronto on the FM and, I believe you will be surprised at how many people will start to listen." [Thanks to Dr. K. W. Walter of Toronto for sending this information.]

#### **Small-Print Happenings and FM Industry News**

The FCC does little on its own. It is only when there is a complaint does it really hammer hard its licensees. That happened just recently with Gerry Turro's W276AQ 103.1 Fort Lee NJ. The complaining broadcaster was WVNJ (AM) Oakland NJ. [See June, p. 7, "FCC Deals Blow to NJ Translator."]

WVNJ appears to have won the latest round in its effort to get W276AQ to follow the rules and not be programmed by a station well out of its primary service area. The translator relays monophonic WJUX 99.7 Monticello. Is the FCC upset that WJUX and Turro's translator are mono? Nah, it's upset at a supposedly illegal network affiliation agreement, which featured Turro paying WJUX for programming that originates at a Fort Lee-area studio, instead of in WJUX-land. Turro also has an ownership interest in WJUX, which the FCC found to be in violation of its rules.

WVNJ, in its petition to deny, alleged Turro is not qualified to remain an FCC licensee because of his alleged violation of the rules. The FCC is investigating.

Will W276AQ leave the air? Will it switch primaries? Or will Turro fight rather than switch? Stay tuned.

Fines reduced or eliminated: KSLY 96.1-AM San Luis Obispo had its reduced from \$25000 to \$12000. The stations successfully argued that the fine would have been a severe financial burden, since they have less than five fulltime employees.

WAIR 92.5 Atlanta MI fought off a \$7500 fine for alleged violation of the main-studio rule. The FCC claimed W-Air lacked management presence at its main studio in Gaylord. However, WAIR showed the studio had a fulltime regional sales manager who was there three days a week, and the general manager was there once a week.

No fine—but subject to reporting conditions for poor EEO record keeping—WBNQ 101.5-AM Bloomington IL. Sailing through a National Rainbow Coalition charge of "extremely low minority employment" was WGYL 93.7-AM Vero Beach FL. The FCC found no case against the WGYL stations, renewing them without conditions or penalties.

KEGE 980 Richfield MN simulcasts "93.7 The Edge." KEGE AM to be sold to Salem Communications. Watch it go to religion. Salem's news arm, Standard News, renamed SRN News. It is the syndicator of Oliver North and Alan Keyes.

A new duopoly in Waterloo. Connoisseur buys KOEL-FM 92.3-AM Oelwein and KKCV 98.5 Cedar Falls. Spending almost \$10 million. Sage Communications adds to its Des Moines holdings, adding KFMG 103.3 Pella. It owns KSTZ 102.5-KIOA-FM 94.9-AMs.

WXCY 103.7 Havre de Grace is sold to Delmarva Broadcasting, owner of WSTW 93.7-AM Wilmington. In the Norfolk market, Max Media Properties mixing out by buying WFOG-FM 92.9-AM Suffolk and WPTE 94.9 Virginia Beach. It owns WWDE 101.3 Hampton and WNVZ 104.5 Norfolk.

Zimmer Broadcasting is buying KCGQ 99.3-AM Gordonville MO; it owns KEZS 102.9-AM there.

In Savannah, Point Communications is buying WSGF 103.9 Springfield GA. It has been managing WIXV 95.5, and has immediately started managing WSGF.

BIA Publications released a study, "The Incredible Shrinking Ownership Structure." In 1995, 10246 radio stations in the U.S. had 5222 different owners. In 1996—a year full of consolidation—5095 owners operate 10333 stations. The top 50 owners operate 1187 stations that garner over \$5 billion in ad revenue.

Steve and D.C. morning team from WKBO-FM 104.1 Jerseyville IL-St. Louis MO is available for national syndication. "The show is not music intensive and suitable for any format," says the "M Street Journal." For info: (508) 628-2000.

The FCC announced that stations required to pay their 1996 regulatory fees must do so between Sept. 12 and 20. It has mailed stations and translators info about the lockbox in Pittsburgh where the dough goes.

Brett Gibson of WNCB \*89.3 Duluth was here. I gave him a copy of a KNXR [97.5 Rochester MN] letter claiming victory in having the WNCB Minneapolis translator move off 97.7 (and now back on 96.3). WNCB wrote its listeners that the fight for a permanent Minneapolis frequency is intensifying. "The original objection was centered on interference we were allegedly causing them [KNXR] but with their latest objections, I'm becoming more convinced that 'interference' was not the issue at all," writes Jeffrey M. Stromquist, WNCB g.m.

The "100 man army" they wanted in the Twin Cities has grown to a 150 person army. They have rather nebulous plans to acquire a full-powered FM station in the Minneapolis-St. Paul area. "We are definitely going forward, planning and installing new equipment, achieving even higher standards for excellence, and with a stronger than ever desire to turn Generation X to a generation of the Cross." Gibson became a bit weird here, claiming the Lord could strike dead people like Tom Jones, KNXR president, for standing in His way.

Howard Stern was dropped by WVGO 106.5 Richmond VA because his ratings went from a 15 to an 11 share, and besides they're changing formats. Stern, however, charges that an ad-hoc group, Citizens for Better Broadcasting, put pressure on the station and advertisers to drop the show. Howard said, "It's a case of maybe 25 people got my show off the air while the rest of the sheep just sat there and took it. After 30 days I'm available to go on another station in Richmond. I want to be back on the air in Richmond. I'd hate to be defeated by the religious right." Stern also says WVGO will have to pay him until his contract expires in October '97, "unlike Imus, who gets zero money" after a station terminates him. "So I am not the loser here. It's the people of Richmond who are the losers, who are not allowed to get a radio program that they enjoy." Stern fans are said to be buying FM amplifiers, such as the RadioShack 15-1113 at \$24.99. They're hoping to tune in WJFK-FM 106.7 Manassas or WKOC 93.7, "K-94," Chesapeake.

American Radio Systems has bought WAAF 107.3-AM Worcester-Boston for \$24.8 million. It already owns WEGQ 93.7-WBXM 98.5-AMs. "The deal brings some young male listeners to

our portfolio and nicely complements our other stations as we build a complete marketing spectrum in Boston," said ARS official David Pearlman. Longtime manager Bruce Mittman to remain with WAAF. Nationally, ARS is buying rival EZ Communications for \$655 million. EZ has 20 stations. ARS will wind up with 96 stations in 20 markets. Analysts say ARS is paying dearly for a company about half its size. News of the buyout sent ARS stock down \$3 a share in one day.

Booth Broadcasting exits Detroit after 57 years. And it could end the classical format at WQRS 105.1. Evergreen Media of Irving TX is buying WJLB 97.9-WMXD 92.3 from Secret Communications for \$168 million. Evergreen already owns WKQI 95.5-WNIC 100.3-WWWW 106.7-AMs. Evergreen bought WQRS from Secret for \$32 million, but plans to swap it for a Washington DC station owned by Greater Media plus \$9.5 million. Rumors were that Secret would keep WQRS and swap its format and facilities with WDRZ 102.7 Mount Clemens, which has a poor signal in Detroit. However, there is still the fear that the classical format at WQRS is "doomed."

One of the Evergreen stations is WWWV 106.7. One of its djs is Carl Lee, who is also its music director. Lee is accused of stealing some items from the home of country singer Suzy Bogguss at a party. He then gave away the items to listeners as mementos of his visit. The station is trying to get the items back to Bogguss, whose recordings include "You Wouldn't Say That to a Stranger" and "No Way Out." The station sent Bogguss flowers, wrote an apology and said that Lee faces some kind of disciplinary action.

The winner of the "Ugliest Bride Contest" on WPYX 106.5 Albany NY has sued the station for \$300,000. Personalities Ray Moon (known as Bob Mason) and Bill Sheehan "intentionally inflicted emotional distress on her through the contest." They had scanned local wedding pictures in the newspaper and thus chose the "winner." They "wrote her a letter of apology, and in it they said that the spot had been cancelled," said Nora M. Murphy, Esposito-Hilder's attorney. Murphy said the lawsuit is to show how serious the matter is. "In terms of damages, what's it worth when somebody can't look at their wedding pictures without crying?" Perhaps the photographer should be sued.

NJ Newark WBGO \*88.3's 92 is Radyo Pinoy. A federal judge turned down Magdalena "Kathy" Ty in seeking a court injunction against the SCS company, variously known as RMN (Radyo Mindanao) or RMN Philippines. Judge Michael B. Mukasey seemed confused about the exact name of Lino Celle's SCS company. The judge said that Radyo Pinoy does not appear to possess a legal personality, since it apparently cannot be separated from RMN or RMN Philippines. "There is no evidence that any entity named Radyo Pinoy exists," and no judgment can

be entered against Celle (pictured). It was a \$5 million lawsuit. Ty had replaced her Greek attorney with a Tagalog-speaking one, who promptly put an ad in a NY Filipino tabloid saying he wanted to hear from anyone who heard Celle's Feb. 10, 1995 broadcast. Celle supposedly claims his remarks were aimed at a woman in the satellite dish business and not at Ty's Calubayan Trading sausage company. However, people who heard the program had little doubt he was talking about Ty. "For one thing, he referred to a 'Kalamayan [funeral] Trading Co."

Some are surprised he won't admit that. "Meanwhile, Celle is working on a possible deal with RadioShack to distribute Radyo Pinoy's SCSets." [See Jan., p. 6, cols. 1-2.]

Talk radio may not be that bad, or that stereotypical. A study by the University of Pennsylvania's Annenberg School of Communications by Joseph Turow noted that the whole attitude toward talk radio is extremely negative in the media.

The print media's attention to talk radio mounted after Rush Limbaugh came on the scene in 1989. And the press seized upon the most extreme utterances by the likes of Limbaugh, Bob Grant and G. Gordon Liddy. Listeners are portrayed as crazies. "However, the typical listener is more likely than non-listeners to consume all news media other than TV news, to be more knowledgeable and to be involved in political activities," the survey found. Local hosts got all most go coverage from their hometown newspapers. Turow's advice to journalists is to ease up on their criticism and give a balanced portrayal of talk radio. It "is a form of public conversation."

It is well known that the classical audience is well-heeled and educated. Helping to shed some light is a research profile of that audience issued by the Interep Radio Store, a sales and marketing company. Some 32 percent of classical listeners live in homes where the annual income is \$75,000 or more, and are 132 percent more likely to live in households of \$100,000 or more. I wonder if Newt Gingrich is a classical music listener?

WEVS 92.7 Saugatuck-Holland MI gets its DJs by running a "DJ School." Instead of the station paying them, they pay the station \$395 for a 12-week program. That course trains them to be a radio disc jockey, a night club dance DJ, or a public events announcer. Dale Schumaker at WEVS hopes to have students add live dj-ing on the internet, which could develop into an audition channel for prospective radio pros to listen to in order to select future hires.

Norm Schruett, g.m. WKHX 101.5 Marietta, GA, drives a taupe, metallic Rolls-Royce. Poor thing, he had a problem. Every time he pulled up to a stop sign some person inevitably would pull his window down and ask, "Pardon me, would you have some Grey Poupon?" So Schruett got creative. Next time a person sees his Rolls (the only one in town with a KICKS 101.5 license plate) and pops the question, all they have to do is put a hand out. He has a case full of miniature Grey Poupon mustard jars. The mustard is believed to have been obtained on a trade-out, possibly the Rolls, too.

An article in the Atlanta newspaper was about commercial radio, entitled "Radio's Mindless Morning Drive." It did not mention any FM stations per se, but two readers wrote in. Thomas Q. Gehl, Atlanta, suggested trying frequencies below 92 mhz for creative listening in the morning. Stations cited as good were WRAS \*88.5, WRFG \*89.3, WABE \*90.1, WREK \*91.1 and WCLK \*91.9. Kevin Crawford, Acworth GA, thinks tapes are the answer if you want music. But "those of us who appreciate the efforts of DJs will continue to tune in daily, and the advertising dollars will continue to come in. In the end, maybe we'll come out with a smile on our faces—always aplaus after the morning commute."

Canada has officially allocated frequencies for digital audio broadcasting. It is in the 1452 to 1492 mhz L-band. Twenty-three 1.6 mhz channels were thus created. A "guard band" of 208 kHz exists between channels to prevent interference. A DAB nesting place will be found for each of Canada's AM and FM stations. Some stations will gain coverage. This includes five-watt CJO5 92.7 Carnonport SK. Others will lose coverage. These include today's 50 kw AM stations. Coverage is said to approximate U.S. Class B FM stations. Eventually, AM and FM radio to be given up, and new DAB applicants wooed to the L-band.

The National Association of Broadcasters urges the U.S. Department of Justice to look at the entire media advertising market, rather than

solely at the radio ad market, which considering radio station acquisitions... We firmly believe the radio advertising market cannot be viewed in isolation from the rest of the media buying market. Those with even rudimentary knowledge of the business understand that ad dollars flow freely between various forms of media... Radio is hardly a dominant media ad buy, given that independent research demonstrates that radio pulls down only 7% of all ad-revenue. Congress envisioned the very consolidation that is currently under way when it passed the Telecommunications Act. Consolidation will help radio become a more accessible and attractive vehicle to advertisers, including those not currently using the medium. It is our hope that radio industry consolidation will increase competition among media buyers."

The FCC has adopted new RF exposure standards. For FM and TV stations, the new standards are somewhat more restrictive and may require that some fences be moved farther from towers. Standards are based on the 1992 guidelines of the American National Standards Institute and the 1986 guidelines of the National Council on Radiation Protection and Measurements.

From the classifieds: General Electric 7-2885 Superadio II, modified with 57-92 kHz E1-2A adapter with L-E-D for SCS. Radio obviously used but in excellent working condition. \$120 plus \$5.50 shipping for this historic model. Most powerful Chicago FM SCS available for lease. Grandfathered FM atop John Hancock Bldg. with 15.5 kw at 357 m. Dan Schmidt, (312) 279-2000. Must be WFMT 98.7.

Looking for 2-4 bay FM antenna, tunable; between 88-99 mhz for low power, nonprofit station on Indian reservation. Donation or low price a must. Greg Ihnen, 10 W. Lake Rd., Tuxedo NY 10987. Must be a pirate.

Music director and/or full time announcer. Resume, tape, cover letter to Stephen Young, WBGL, 2108 Springfield Ave., Champaign IL 61821. EOE.

"Essential Radio, The Traveler's Guide to AM and FM Stations in the United States," listing FM and AM stations by state, city, format and frequency, \$9.95 at bookstores or from Peregrine Press, (800) 299-AM/FM.

FM CP C3, county of 100,000. Clean city in W. TX, \$65 K; (817) 414-6570. Might it be KNNK 100.5 Dimmitt?

**FM FORUM - CONTRIBUTIONS FROM READERS**

[Comments by Louis J. Sicilia continue he supports WJUX having a translator serving parts of NJ and New York city.] "The FCC does not have the right to dictate program content. As far as WVNJ goes, their signal is a joke. I'm only 18 miles east of their transmitter in Oakland, and I can barely pick them up. It's even worse when they cut their power at night to 2.5 kw."

Doc Searls in CA still likes KPIG, one of the stations receivable with audio on the Internet. That station, at "107 oink 5 of Freedom CA, is simply the best commercial station on earth, bar none... Even over a 14.4 modem, the sound is good enough to at least sample the station's goods. So when are you going to have your Web site up?" [I am mentioned on the site of Fanfare FM in Buffalo and expect soon to have a separate web address in MN.]

"Enclosed is my check for renewing FMedia! I came very close to not renewing it, for the May issue I found difficult to read in places: spacing of letters with words was off. The June issue is much better... I can never quite get used to your shortening of words like this: FMedia!

FM mistakes, and especially the new ones like FM T1 Service really threw me off... I found your piece interesting about the bird dropping your tower and leaving 'interesting white deposits'. Beware! I read someplace that bird droppings have caused blindness in humans!... I do appreciate your work in putting out 'FMedia!' and the FM Atlas. It must be a whale of a job! I have been making my own special FM and AMaps at times in recent years for use on trips. Looking forward to the new FM Atlas!" writes Walt Breville.

Phil Boersma: "Oh, swell. The KAWZ reapplication for 91.9 in Grand Rapids and the WPCS application for 90.9 Muskegon (in spite of the existence of WBLV locally on 90.3). I have absolutely no doubt these 'big fat egos for God' will eventually get their wishes granted by the FCC, which seems to have eliminated the word 'no' from their vocabulary."

The FM band by the year 2000 may be more congested than the AM band ever has been, and not even the 'capture ratio' effect of FM receivers will be able to save it from all the co- and adjacent-channel problems. Educational band FMs are rapidly seeing their service areas limited to their 3.16 mv/m contours, and commercial FMs will shortly go that route. And now the FCC perceives a mandate from the new telecom bill (perhaps the worst piece of legislation passed by Congress in this decade) to further clog the airwaves? Truly, the inmates are running the asylum!"

An article was sent on Chicago's B-96 adopting a morning drive sex-talk show at teens. "I hope this is not the newest morning-drive FM radio trend," said Boersma. "It would make Howard Stern seem downright Christian." The show, "Private Lives," runs 8 to 10 a.m. weekdays, but will continue to play four or five songs per hour. Karen Hand and psychiatrist Dr. Kelly Johnson do the show, as they have

Kelly Johnson

Karen Hand

'Private Lives' on morning radio

with a Sunday program (9-11 p.m.). That show is to be syndicated via New York-based SJS Entertainment.

"Detroit remains the largest market without Howard Stern," says Jim Nahirniak. "I don't know if the merger between Westinghouse/CBS and Infinity will change that, but Infinity's Don Imus started on CBS' WYST 97.1 July 8." The CBS/Infinity outlets in Detroit are WYST, WVMV 98.7 ("smooth jazz, decent ratings, Howard wouldn't fit"), WYCD 99.5 (Young Country, "good ratings, Howard wouldn't fit"), WOMC 104.3, oldies, "good ratings, just hired Dick Purtan, long time highly rated morning host (worried of local advertisers)." Those plus WWJ 950 and WXYT 1270 AM,

neither of which are candidates for Stern. I look forward to FMedia! every month. Keep up the good work."

"Enclosed is a sticker of Berlin's top-rated radiostation, 'RTL 104.6 FM' for

your collection. I hope you like it," from long-time FM Atlas user in southern Bavaria Herbert Sturm.

WVEY 96.9 in Crystal MD wrote to Hank Holbrook mentioning it is short spaced to WCEI-FM 96.7 Easton MD. It has a c-p to 50 to 4800 h.v; 62 m; but might instead choose to go directional and run a full 6000 watts, but "the directional signal would require us to reduce the signal coverage towards WCEI-FM more than we are presently grandfathered to operate at."

Nick Lombard compares books:

The M Street Radio Directory (1996) arrived and I must say I'm impressed! The comprehensive information on each station and the accuracy, attention to detail, and user-friendly layout combine to produce a first-class product. I especially like the Radio Markets section. The format classifications are particularly well thought out, and in some ways seem more relevant to real-world conditions than yours do. The M Street Directory will never replace your FM Atlas, but some of the things it lacks—maps, translator listings, nonIDs/slogans, SCS data, station coverage radii, multi-city ID and stereo data—may not be all that important to the itinerant broadcaster whose only goal in life is to move up to the next larger market. For DXers it's a different story, because many of the above items (especially nonIDs/slogans!) are absolutely crucial in helping to identify a station. Bottom line: Anyone really serious about FM should have current copies of both books. The M Street Radio Directory (\$43.95 for 912 pages) actually costs less per page than the FM Atlas (\$16.50 for 224 pages)!"

Some 330 radio reading service radios are in ZIP Codes where the Duluth station of MN Public Radio can be heard (92.9, 67 kHz). Volunteer reader Walf Harnish supplied the data. "Thanks for the catalog, which has been given to our coordinator." I recently won a bid from a neighboring state to supply a number of small (\$39 with shipping) G-E radios with SCS capability.

Peter Hughes of Silvertown Communications, Niagara Falls ON, is leery of digital FM. "My image of this medium is people driving around with little quarter-sized antennas on their cars. The music will be fed to their radio digitally. In order to receive such, the radio will have a decoder that will read the broadcasting. That's the catch. This will not be free. Just as in much of satellite-dish reception, in order to view scrambled stations, you will be 'nickel and dimed' on a monthly basis for the rental of a decoder. For many years, we have done very well with advertising as the way to make money in broadcasting..."

Until October

- MN Roseau 103.5 KRWB-FM
- MO Kansas City 104.3 KBEQ-FM" (KBEQ-FM); AM in Blue Springs MO gets new calls, KKOW, "The Cow." KKOW-FM 96.9 Pittsburg KS is unaffected. [Hawk"]
- MT Hardin 95.5 KMHK (KBMJ), op, "95.5 The/ NJ Manahawkin \*89.9 WJNM
- NJ Point Pleasant 95.9 WRAT (WADB), pr,

### The RAT ROCKS!

"95.9 The Rat." It's a mixture of classic rock and progressive. As a count down to the format change, it played the reggae song "Rat in the Kitchen" for an entire weekend. "This resulted in people calling the local police thinking that one of the DJs died on the air!" RBDS discontinued. "Yuck" said one person of the new nonD.

NM Albuquerque 106.3 KPEK (KHTZ), r, "The Peak" ["Sunny 93.9" (strict)

NC Burlington 93.9 WRSN (WZZU), m./ NC Fuquay-Varina 103.9 WZZU (WTCD), o, classic hits, in a combo with WQOK 97.5 South Boston VA-Raleigh NC. It was tempor-

arily all Beatles.  
 NC Statesville 96.9 WTDR (not changing to WXNR), k. "The expected switch to... 'pr' (FMEDIA! May p. 1, col. 3) has not occurred, and with the 'k' format's popularity here, I doubt it ever will."  
 OH Englewood 94.5 WBTT (WDOL), "The Beat" ["Hot 99.7 FM"]  
 OH Paulding 99.7 WKSD (WERT-FM), /  
 OK Nowata 104.9 KRIG"-FM" (KRIG-FM); AM in Pawhuska gets new calls.  
 OK Oklahoma City 94.7 KNRX (KEBC), still "95-X"  
 OK Sallisaw 95.9 KMXJ (KKUZ)  
 OR Brownsville 102.3 KEHK (KLR), o, "102.3 the Hawk"  
 PA Pittsburgh \*92.1 WPTS-FM (WPTS); AM is a commercial station in Philadelphia (1210, formerly WGMP).  
 PA Salladasburg 95.5 WMYL (WRAK-FM), m, \$, "MYL-FM," ID with Williamsport.  
 PA Starview 92.7 WEGK (WHTF), still op, "Eagle 92.7"  
 SC Marion 100.5 WBZP (WKS), pr, "Buzz." LMA-to-buy with WWFN 100.1-AM Lake City.  
 TN Dickson 102.5 WOZQ (WOZQ-FM), sr, "The Party." Bob and Tom move to sister WMMU 102.9 Shelbyville TN.  
 TX Alice 92.1 KOPY-FM (KOPY) [Joyner  
 TX Beaumont 102.5 KTCX (KAPW), sr, with/  
 VA Vinton 106.1 WJJS-FM (WJJS); AM is in Lynchburg (-FM); AM gets new calls  
 WA Colfax 102.5 KRAO"-FM" (KRAO/  
 WA Wenatchee \*89.9 KPLW (KAIR)  
 WV Berkeley Springs 93.5 WDHC (WCST-FM)  
 WI Sturgeon Bay 99.7 WLTM (WGEE-FM), "Lite 99.7"  
 CL Torreón 103.5 XHLT (XHLZ). This change is assumed. There is an XHLZ in Lazaro Cardenas MH.  
 DF Mexico 88.1 XEOY-FM (XHVIP), "Radio Red." It "might relay XERED AM 1110." [XEOY-FM was listed as 88.9 on the Internet, with nothing on 89.7. I tend to discount this, for it leaves no room for XHM 88.9.]  
 98.5 XEDA-FM (XHB), "Radioactive"  
 100.9 XHROK (XHSRO), "Rock 101"

 UT Bountiful KUTQ 99.5 op, still "Q 99.5." It has an LMA-to-buy with KODJ 94.1 Salt Lake City-KKAT 101.9 Ogden-KZHT 94.9 Provo-AMs.  
 VA Chesapeake WKOC 93.7 pr, "The Coast" (back to, from "K-94").  
 WI River Falls WRFW \*88.7 pr, back on air  
 WI Wauwatosa WAMG 103.7 sr, still "Magic 103.7"  
 ON Collingwood KCBC 95.1 r, \$  
 ON North Bay CKAT 101.9 pr, w/with country shifting to AM

On Air—and DX Ready (Selected)

CA Paso Robles KNCR 103.1. FCC had deleted its call letters and then reconsidered. The station is on the air, but did not promptly file for a license after receiving program test authority.  
 FL Bonifay WTBB 97.7 adds Howard Stern.  
 HI Waiānāe "C 101.1 FM," with "no parameters or \$ status given... are on 7:30 a.m. to 4 p.m. school days with news, on campus sports and live assemblies. Students are being trained as announcers."  
 PA New Berlin WBGM \*88.1  
 VT Lyndon WGMT 98.3, planning to move to 97.9 and up power "in a couple of months, but some recent alleged happenings involving a survey given to prospective clients may cause some problems..."  
 ON Owen Sound-Wiarton CBCB \*98.7, but was temporarily off because of transmitter problems. "As a result, CBCM \*107.5 Penetanguishene was relaying 98.5 WKSE Niagara Falls NY and CBLU \*94.3 Huntsville was relaying WVMV, 'Smooth Jazz 98.7' Detroit MI. Most interesting was a (mysterious) CBC signal on 97.9. It was on only while 98.7 was off. Yet the CBC denies even knowing about it and says they would never run a temporary signal on 97.9 there. Hmmm. Nevertheless, I can only believe it was in Wiarton."  
 INDONESIA Jakarta—Radio Trijaya, a.k.a. "Real Radio 104.75 FM," has a "popular morning show, Jakarta First Channel. Aimed at yuppies negotiating the traffic from their suburban enclaves, the show features commentary and debates on local politics, a topic other stations shy away from. Advertisers have to book five to six months in advance. Three other stations now have nearly identical morning talk shows," says the "Far Eastern Economic Review."

Off Air—Or Not Yet On

ID Caldwell KCID-FM 107.1—installing 49000 h,v; 809 m facility. Expected to return later this month.  
 KS Liberal KZQD 105.1—the permit may not last much longer. Mario Loreda is not a citizen of the U.S. In May, 1995, he indicated he is not a U.S. citizen, but feels the alien ownership rules do not apply to construction permit holders. He thought he'd get his citizenship by the time the station was built. The FCC is considering misrepresentation charges against Loreda. It could pull the permit and fine him up to \$250,000.  
 NC Charlotte WYHC \*98.9/98.7. "Off the air for over a year. If they have been on, it has not been during weekdays."  
 VT St. Johnsbury W257-- 99.3 "is beginning to catch on. It's seven watts in a nice location, next to WNKV's [105.5] transmitter. So, for 7 watts, its radius, depending on terrain, is a good solid" 32-40 km.

Deletions

AL Ozark W2198D \*91.7 (see "New," above)  
 AZ Prescott K207BH \*89.3 (see "New")  
 GA Butler W280AI 103.9  
 GA Columbus W244AJ 96.7  
 GA LaGrange W288AV 105.5. The station they used to relay, WPCH 94.9 Atlanta, now mr.

An engineer there says the translators have not operated since the '80s.  
 MS Hattiesburg W207AU \*89.3, a public broadcasting translator displaced by a religious station (see "New").  
 NC Havelock \*91.9—this is the same station as WAEE \*91.9 New Bern.  
 TN Murfreesboro W265AK 100.9  
 TX Bryan KXBK \*89.9  
 TX Junction KAHQ 93.5

FMistakes, FM Atlas-16, FMedia! September

AR De Queen 93.1 calls are KDQN-FM, not "KDOQ-FM," p. 2, col. 1  
 CA Newhall K261AB 100.1 relayed KXEZ (not KQLZ), now KIBB. Out of sequence, p. 121.  
 CO Dolores K296EO 107.1 translates KIQX (not "KQIX") 101.3 Durango, p. 1, col. 1.  
 MN Minneapolis "The Beat" 97.7 is aimed NNN and SW, not "NNE" and "SSE," p. 3, col. 1.  
 MN Broadcasters' Association Director Jim Wychor called and asked about commercial opportunities. "I said we don't sell ads, but are interested in joining the MBA. He said only licensed stations can join. I asked where in the bylaws it says only licensed stations can join, and he was to have mailed me that part of the bylaws," said Alan Freed. He is not the same Alan Freed from out East, who was honored in Cleveland's one-year-old Rock Hall of Fame. That Freed was an early rock DJ who was indicted on payola charges, but died before his case would have gone to trial. The MBA newsletter said: "A phone call to

PO BOX 3333  
 MINNEAPOLIS MN  
 55403  
 WWW.BEATWORLD.COM

Freed, the operator, elicited a nonchalant response when asked if he was concerned about operating a station not licensed by the FCC. Freed's response was, 'Haven't you

FCC. Freed's response was, 'Haven't you heard of Dunifer in California? If they can't shut him down, they won't shut me down'. Executives from at least three Twin Cities FM stations, as well as the MBA, have filed complaints with the FCC. To file a formal complaint, write to Dan Emrick, Chief Investigative Branch, Enforcement Division, Complaints and Information Bureau, FCC, 1919 M Street NW, Washington DC 20054. As of Sept. 6, Emrick had not responded to the MBA complaint.

I later talked to Jeff Stromquist, WNCB \*89.3 Duluth. His Minneapolis translator was booted off 97.7 because of complaints of interference to KNXR 97.5 Rochester reception. [It is now on 96.3.] Stromquist gave this statement for publication: "We lost our 97.7 translator and a pirate takes over. A pirate has more authority with the FCC than a translator station!" [Stromquist said people in the St. Croix Valley, NE of St. Paul, have complained to WNCB about the 96.3 translator interfering with reception of WJMC-FM 96.3 Rice Lake WI; they want to hear the Milwaukee Brewers games.] NJ Long Branch WZVU 107.1's RBDS display mentions Ocean County, not "Orleans," p. 4, col. 1.

NC Harkers Island WLGP is on 100.3, not 103.3, p. 2, col. 1. Not "WEGP," April, p. 1, col. 3. PA Hazleton 97.9 calls are WZMT, not "WZNT," p. 2, col. 2. [2, col. 2.] TN Columbia \*88.7 is WAYM, not "WATB," p./ VA Charlottesville WQMZ is on 95.1, not 97.5, p. 4, col. 1. Several of you told me about this one!

PR Levittown WKVN-FM \*88.5, not 88.3, format is g, p. 2, col. 2.  
 NS Barrington CJLS-FM frequency is 96.3, not "96a.3," p. 2, col. 2.  
 USA—The physicist who uses the digital voice synthesizer is Stephen Hawking (not "Steven Hocking"), p. 3, col. 1.  
 "I'd grade your newsletter a B+ or an A-. Without the typos, I'd give it an A." R.S., Thunder Bay ON. [friends! "T.J., Phoenix AZ.  
 "I always share your catalogs with my/  
 "I sure enjoy reading FMedia! Keep up the good work," T.R., Hagerstown MD.
