## ROCK ROUNDUP

This week brings an exciting new feature to Rock Airplay Monitor: Song Activity Reports, on pages 6-8. Song Activity Reports give you a detailed, definitive profile of where and how many times each active song is being played. The reports list the exact number of plays for every station on the monitored panel. There are separate sections devoted to album rock (pgs. 6 & 7) and modern rock (pg. 8). The songs selected to be profiled in the Song Activity Reports are the records with the most airplay which are active—i.e., gaining airplay in the last two weeks.

The detailed profile of each song includes first, a summary (artist, title, label, total plays for the week in the format, the gain in plays, total stations playing, and position on the chart), reprinted from the Impact page. Then comes a complete list of all stations on the panel, listed by market in order of population, followed by the exact number of plays the record registered this week, last week, and two weeks ago. Also listed are the number of plays detected on MTV.

That's it—a complete picture of each record's airplay in one logical, simple package. We're really excited to be bringing you this new information, unavailable in any other publication. It's an important step in our efforts to improve Rock Airplay Monitor so that it becomes even more useful to programmers making decisions on music airplay. Please contact Kevin McCabe at 212-536-5056 or Michael Ellis at 212-536-5039 to give us any suggestions or comments you may have about Song Activity Reports or our other new features.

## MTV PLAYLIST

### Most-Played Rock Tracks

	TW	LW		TW	LW		
1	Aerosmith, Crazy	34	31	21	Rollins Band, Liar	9	13
2	Collective Soul, Shine	28	26	22	Whale, Hobo Humpin Sloba Babe	8	6

# Monitor ROCK AIRPLAY

## DETECTIONS

MAY 23-29, 1994

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Rock Airplay Monitor. 108 album rock and 32 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 750 detections (album) or 300 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
