• ROCK ROUNDUP •

by Michael Ellis, Publisher

We are excited to announce a major technological upgrade in the BDS monitoring system. A multimillion-dollar investment will strengthen the system's already high level of accuracy on current and recurrent records and enable the system to detect airplay of oldies.

Under the improved system, slated to be deployed in select markets this fall and all 125 BDS-monitored markets by February 1995, the actual broadcasts received by each local monitor will be stored in digital form by a companion recording unit, known as an audio digitizer. Any broadcast segments not recognized by the local monitors will be transmitted to BDS operational headquarters in Kansas City, where they can be run through a greatly expanded central library. If they are still not recognized, an expanded BDS staff will be able to retrieve and listen to the actual broadcast as stored by the digitizer. The lag time between the broadcast and airplay recognition will be a few hours, at most.

BDS staffers are at work on the huge task of creating a central library consisting of the entire universe of records played on the radio. The library, which will have unlimited storage capacity, is expected to contain several million patterns.

BDS also has announced that three new markets will be monitored within the next several months: Allentown, Pa., Santa Barbara/Oxnard, Calif., and Champaign/Urbana, Ill. In addition, the new system will allow BDS to expand into new markets with less expense than was previously possible, since new markets will require only an audio digitizer on site rather than a full computer system.

P.S. Please fill out the enclosed ballot for the 1994 Billboard/Monitor Radio Awards.

Monitor ROCK AIRPLAY

JUNE 20—26, 1994

DETECTIONS

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Rock Airplay Monitor. 109 album rock and 37 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 400 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
