## ROCK ROUNDUP

by Mark Marone

THE SPRING ARBITRON BOOK IS in and many stations are reaping the rewards of a reinvigorated rock climate. Rock radio has convincingly staked its claim in the top 25 markets, with some stations getting their best 12+ shares ever. Modern stations held or gained in 18 out of the 22 top markets, with KROQ, Q101, 99X, and CIMX achieving their highest shares ever. Other stations faring well this time out included 98 ROCK, Tampa, which scored a 7.5, its third straight 7 share, solidifying its No. 2 spot; WAAF, Worcester, with a 9.7, regaining the large share it had two years ago; and KXRR, Salt Lake City, which leaps from 11th to 5th in the market.

IT SEEMS THAT THE current appeal of crossover Modern records has benefited both Modern and Album stations in the same market. Both monitored rock stations in Boston, Atlanta and Seattle posted increased 12+ shares. In Seattle, KISW (Album) got back on track with a 4.7 share, and KNDD (Modern) grabbed its highest share ever, and broke into the top 10 for the first time with a 4.1 share.

THE BILLBOARD/AIRPLAY MONITOR Radio Seminar is just a month away, so be sure to make your arrangements to be in New York on Sept. 9 and 10 for the inaugural event. Confirmed to facilitate the "Album Rock—Winning With Currents" session, along with Anthony Colombo of Billboard/Monitor, is Greg Mull, PD of Tampa's 98 ROCK. Facilitating the "Modern Rock: On The Rise" session are Max Tolkoof of Mutant Promotions and myself. The Seminar is a unique opportunity for radio professionals to discuss the changing environment of radio, technology, and music through interactive sessions. To register, contact Melissa Subatch at (212) 536-5018.

# Monitor ROCK AIRPLAY

## DETECTIONS

JULY 25-31, 1994

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Rock Airplay Monitor. 108 album rock and 38 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 400 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
