## • ROCK ROUNDUP •

by Mark Marone

All radio and music industry professionals will be pleased to know that the Billboard/Monitor staff has put together the first Billboard/Airplay Monitor Radio Seminar on Sept. 9-10. It's a radio-intensive seminar catering directly to programmers and other radio professionals by using facilitators instead of traditional panel setups. The sessions are designed to educate and enlighten, with programmers in Modern and Album rock having the opportunity to discuss together each other's perspectives in programming and operating rock stations in their respective markets.

In addition to special format rooms (the Modern Rock session is scheduled for Friday and the Album Rock session is set for Saturday), Broadcast Data Systems is conducting a presentation and a hands-on workshop which will explore any suggestions and questions about BDS, the leading monitoring company in the industry. This will be the first time that BDS is conducting a comprehensive learning session exclusively for radio. BDS will provide experts and computer consoles so that every attendee is able to get a firsthand opportunity to understand monitoring. There will be two sessions on both the 9th and 10th: "BDS From A-Z" goes from 11a.m. to 12:15p.m.; and "BDS Teach In—Workshop" from 12:30 to 4:30p.m.. The BDS staff intends to have everyone come away from the convention an expert on the BDS system.

The seminar, being held at the New York Hilton & Towers, starts with a registration day on Thursday, Sept. 8 from 2p.m. to 5p.m. and will culminate with the annual Billboard/Airplay Monitor Radio Awards on Saturday at 7p.m. For seminar information, call Melissa Subatch at (212) 536-5018. For registration information, call Maureen Ryan at (212) 536-5002.

# Monitor ROCK AIRPLAY

## DETECTIONS

AUGUST 1-7, 1994

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Rock Airplay Monitor. 108 album rock and 38 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1994, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 400 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.

# SOULHAT
