• ROCK ROUNDUP •

On April 17, KISW Seattle and KLOS Los Angeles both sent open letters to the industry declaring that, effective this week, they wished to be reclassified as modern rock stations and would deal only with the modern rock departments of record labels. The similarly worded letters cited the modern rock acts that those stations had supported, and attacked the treatment that album rock stations feel they get in relation to their modern rock brethren. In particular, KLOS PD Carey Curelop declared, "The record labels have so de-emphasized the viability of their rock promotion representatives, it is no longer in our best interest to deal with them exclusively."

These letters came on the heels of Airplay Monitor's latest panel revisions, in which nine stations were added to the modern rock chart, including KXPX Denver, WROX Norfolk, Va., CKEY Buffalo, N.Y., and CFNY Toronto, as well as recently reclassified top 40 outlets KISF Kansas City, Mo., and WGRD Grand Rapids, Mich., and reclassified rock outlets WBCN Boston, KMYZ Tulsa, Okla., and KRRK Omaha, Neb. These stations will join the modern rock chart next week—giving it 53 reporters—as WCKW New Orleans, WZTA Miami, and WRXC Charlotte, N.C., join the album rock chart.

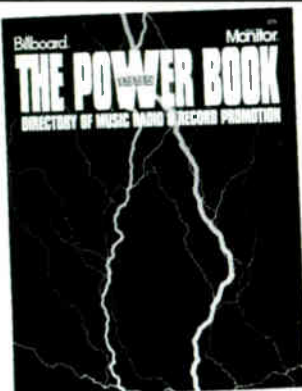

These changes stemmed from months of internal discussion about the dividing lines between album rock, modern rock, and top 40. We're continuing to work to differentiate between stations where modern rock is a predominant flavor in an outlet's current music—as it is for most current-based rock stations—and stations where it is the only identifiable flavor. We realize this issue often hangs on a handful of titles, and there are stations that we'll watch as they evolve, including KLOS and KISW.

Our goal is to create a consistency in the Airplay Monitor charts that transcends politics. There are some format boundary discussions—namely, those involving the line between top 40 and R&B—that are mired in years of advertiser prejudice and won't be easily solved. This one is relatively easy. It's unfair to all the mainstream rock reps of good faith to assume outright that all mainstream rockers are indeed given short shrift by the industry, but if all that is needed to end this particular discussion is for labels to value stations for their ability to sell records in the market and not for their chart classifications, then let them do it, so everybody can go back to the real job of serving the audience. —Sean Ross

Monitor ROCK AIRPLAY

DETECTIONS

APRIL 10-16, 1995

Compiled from a national sample of airplay supplied by Broadcast Data Systems' Radio Track service to Rock Airplay Monitor. 109 album rock and 44 modern rock stations are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections. ©1995, Billboard/BPI Communications.

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 500 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
