June 30, 1995

The challenge of properly classifying radio stations within formats is one of the most difficult To the Radio and Music Community: problems we face as a trade magazine. Although we have tried diligently to use a logical process of classification, inevitable questions arise whenever stations are moved from one format to another. In an attempt to finally bring some predictability and order to this tricky classification system, we at Monitor would like to offer proposed format definitions for use in our publications and for use in Billboard Magazine. Let me stress that this is only a **proposal**, offered for industry comment. We will not enforce these definitions until we have determined through your feedback that there is an industry consensus in their favor.

Top 40/Mainstream: a station which plays a wide variety of music. The most-played record on the station must be played at least 40 times a week. Among the station's 40 most-played records are rock songs and songs from at least one of the following musical genres: R&B (including

Top 40/Adult: a station which plays a variety of current music acceptable to an adult audience, rap), pop dance, uptempo pop, and pop ballads. drawn from the genres above, but excluding rap and hard rock. The most-played current record on the station must be played at least 21 times per week. Among the station's 30 most-played records are songs from at least two of the five musical genres listed in top 40/mainstream.

Rhythm-Crossover: a station which plays a variety of current music, but no rock. Among the station's 40 most-played records are songs from at least two of the following four musical genres: R&B (including rap and reggae), pop dance, uptempo pop, and pop ballads.

Mainstream Rock (currently known as album rock): a station which plays only rock music, by traditional or classic rock artists and by musically-compatible alternative rock artists.

Modern Rock: a station which plays rock music, of which at least 90% is identified by the sound and the artist's image as alternative or cutting edge. Among the station's 30 most-played records, 90% or more must be from alternative artists, with the remaining 10% or less being musically-compatible tracks by traditional or classic rock artists.

R&B/Mainstream: a station which plays a variety of current R&B music, including rap, reggae, R&B ballads, and R&B uptempo/dance music, but excluding rock music. Among the station's 40 most-played records are songs from three of the above R&B musical genres.

R&B/Adult: a station which plays current R&B music acceptable to an adult audience. Among the station's 30 most-played records are R&B ballads and R&B uptempo music, but no rap or

Since 1993 when we launched Airplay Monitor as a work in progress, we've always used our readers' input to help guide us in designing the publication. Please direct your feedback to me rock music. at 212-536-5039 or to any of our chart managers. We will make changes to these definitions as desired by the industry, and then publish the final definitions in a future issue. With your help, we hope to finally make the classification process as consistent as possible.

Sincerely yours,

Michael Ellis

•ROCK ROUNDUP•

by Mark Marone

AS THE MODERN ROCK format continues to grow at a furious pace, Rock Airplay Monitor remains committed to keeping in stride. When Rock Airplay Monitor started a year and a half ago, there were 30 modern rock stations monitored and a whole different climate for artists and stations. Today, modern rock is in the top 10 most-listened-to formats for the first time, and our reporting panel is now more than double its original size. This week, KFRR Fresno, Calif., WMRQ Hartford, Conn., former album reporter WSHE Miami, and former top 40/rhythm station KJYK Tucson, Ariz., are added to the modern rock panel, raising the number of stations reporting to 61. Effective this week, the qualification for Airpower certification for modern rock is raised to 700 detections. On the album rock side, KFRQ McAllen, Texas, is added to that panel, which holds at 107 stations.

HAD A CONVERSATION a couple of weeks ago with Black Sabbath's Tony Iommi, who, in my opinion, has had a lot more to do with the current wave of guitar bands at modern rock than he's credited with—in fact, Kurt Cobain described his own band as a marriage of the Beatles and Sabbath. We discussed the current state of rock music and wound up talking fondly about the relative diversity of the '70s rock scene. And I had to smile when the metal giant told me that the act most typifying that diversity for him was the Eagles!

Iommi's observation struck me when I came across recent Recording Industry Assn. of America certifications, which revealed that the Eagles' "Greatest Hits 1971-1975" sold an astounding 22 million albums, placing it second only to "Thriller" on the all-time list. Other rock sales-certification figures of potential use to radio research and marketing folks include those for Guns N' Roses' "Appetite For Destruction" (13 million), AC/DC's "Back In Black" (10 million), and the Beastie Boys' "Licensed To Ill" (5 million).

40)	NE	W	IMMORTALITY EPIC PEARL JAM	428	277

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 700 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
