Here for the first time is a complete—never before compiled—list of all-time pop LP hits which have sold over 500,000, based on information supplied to The Billboard by manufacturers. The listings—covering all sales thru January 1, 1960—are arranged alphabetically by artists, with a special category for original cast and sound-track packages. Deejays and program directors are bound to find this new feature as rich and valuable a programming source as The Billboard’s All-Time Million Sellers singles list. HOW TO USE THIS FEATURE

JUKE BOX OPERATORS, in view of the increasing number of stereo juke boxes, will be especially interested in listings of available stereo singles and EP's in the record data column. Also, operators may profit handsomely when an artist is particularly hot by programming, not only his current big record, but also the same artist's earlier hit or standards. This info, too, is in the record data column.

DISK JOCKEYS will find that the information in this complete easy-to-use directory can be integrated with nearly every spin. The wealth of chatter in the brief biographical summaries is presented here alphabetically by artist for easy reference. And many fine programming ideas can be developed from the record info data.

BUYERS AND BOOKERS OF TALENT will need no diagrams to tell them how valuable this compilation is, or how to use it. They have continuously requested biographical data as well as for the personal managers and booking offices or leading talent. This feature should answer these requests.
A practical programming guide for disk jockeys and juke box operators, featuring biogs and basic record data on all recording artists whose records appeared on The Hot 100 or Top LP Charts from June, 1960, thru August, 1960, plus any million-seller artist who had a singles release during the same period.
