The million selling singles listed below covering sales made thru August, 1961, were reported to Billboard Music Week by the manufacturers. They are not certified by Billboard Music Week. We believe, however, that most are accurate, but it is possible that a few manufacturers were carried away by their own enthusiasm in reporting certain listings to us. In the interest of programming, it is felt that the inaccuracies contained in this list do not outweigh the value of reporting these in this issue. Listings are arranged in alphabetical order by artists. Flip sides are listed when it is felt they contributed heavily to the eligibility of being listed as a million seller.

Records appearing on the list for the first time this year are indicated by an asterisk.

HOW TO USE THIS FEATURE

JUKE BOX OPERATORS, in view of the increasing number of stereo juke boxes, will be especially interested in listings of available stereo singles and EP's in the record data column. Also, operators may profit handsomely when an artist is particularly hot by programming, not only his current big record, but also the same artist's earlier hit or

standards. This info, too, is in the record data column.

DISK JOCKEYS will find that the information in this complete easy-to-use directory can be integrated with nearly every spin. The wealth of chatter in the brief biographical summaries is presented here alphabetically by artist for easy reference. And many fine program-

ming ideas can be developed from the record info data.

BUYERS AND BOOKERS OF TALENT will need no diagrams to tell them how valuable this compilation is, or how to use it. They have continuously requested biographical data as well as for the personal managers and booking offices or leading talent. This feature should answer these requests.

A practical programming guide for disk jockeys and juke box operators spotlighting biographical and record programming information about all the artists whose records appeared in the first 50 of BMW's Hot 100 or Top Monophonic LP charts from March through August, 1961.

(NOTE: Biographical and disk data was secured from the record companies for which these artists record. Omissions or lack of data is the result of inability by the record company to provide information to Billboard Music Week. In the case of artists with lengthy credits, a representative selection is used to provide a basis for programming.)
