## NEW YORK AND LOS ANGELES

### NEW YORK

#### RATS IN SINGLE

**CONTROVERSY:** Although the Boomtown Rats' new single, "I Don't Like Mondays" shot straight to the top of the British charts upon release there recently, Columbia, their U.S. label, has thus far been blocked from putting it out here. The reason is the song's subject matter: it's the story of Brenda Spencer, the 16 year old San Diego student accused of murdering two and wounding eight children and one policeman after she brought a rifle into school with her last year. Michael D. McGlinn, Ms. Spencer's attorney, is trying to suppress the release of the record, claiming he will sue CBS if it is issued, because it might prove prejudicial in the trial's proceedings. McGlinn said: "It (the song) adds fire to a very volatile situation. It makes fun of a tragic case and is damaging to the case." Bob Geldof, the Rats' lead singer, who wrote the song, replied: "You cannot stop tragedy from being part of the human experience and you cannot stop people from writing about it. If you were to ban tragedy from art there would be no Shakespeares, no love stories, no blues. 'I Don't Like Mondays' does not exploit the tragic circumstances of the San Diego incident. It is an attempt to understand why it happened." The song is available as an import currently. Copies are being bought up as soon as stores get them.

**BUDGET LABEL BOOM?:** In the wake of the recent record industry slump, companies are working overtime to find a way to get "product" moving again. One refreshing idea is the initiation of budget lines to promote sales of new artists and/or reissues. So far, both Infinity and Capitol have announced such lines. Infinity's new "Rising Star" line will list for \$5.98 and is intended to boost sales on new talent by giving the consumer a price low enough to allow exploratory purchasing by those who might ordinarily stay away from new artists in favor of established names. The first "Rising Star" release will be Richard Stepp's HOLIDAY IN HOLLYWOOD, due out this month. Capitol's \$5.98 line will feature rereleases, plus the first American issue of material not previously available here, such as the Beach Boys' 69 LIVE IN LONDON and pre-Little River Band and Flash and the Pan recordings by those bands' principals.

**WHO'S IN NEW YORK:** By the time you receive this WALRUS!, the Who will have finished the series of New York shows which marks their first appearance here in three years. As of this

writing, they've done one show, at the Capitol Theater in Passaic, New Jersey, a warm-up for their five-night Madison Square Garden stint. That show revealed a few new twists, mainly, the presence of a horn section during one segment, and keyboard player "Rabbit" Bundrick on much of the material. The show also marked the return of material from QUADROPHENIA to the Who's set—the film version will be released here in November, and they opened the show with a five minute clip from the movie.

**BURG-ER-LARY:** City Boy's Mike Slammer was midway through a whopper at his local Burger King in West Nyack, New York, where the Birmingham (England) sextet recently relocated, when a masked gunman walked in and robbed the place. You might say City Boy's come a long way from DINNER AT THE RITZ.

**CARS PACK PARK (NO VACANCIES):** The Cars' recent show at Central Park's Wollman Rink attracted the largest audience in the history of the summer concert series, according to the show's associate producer. Though it rained often and hard the day of the show, approximately 25,000 people encircled the arena by showtime.

**BITS N' PIECES:** The Knack is back from its first Australasian junket and will tour the States in October, Peter Tosh will address the United Nations Committee on Apartheid here on September 21, and will also donate his talents to an upcoming MUSE (Musicians United to Save Energy) anti-nuke benefit. . . Gary Numan and Tubeway Army's entourage on its current British tour includes a computerized "Spectacolor" billboard and three radio-operated robots. . . Queen has purchased the Montreaux, Switzerland studio in which they recorded JAZZ and are laying down more tracks there now. . . Brand X's U.S. tour next month will feature the band's original members, including drummer Phil Collins, on sabbatical from Genesis for a spell. . . According to England's Record Mirror, AC/DC took out an ad in a Dutch newspaper which said: "Will all young ladies who were in contact with AC/DC please go to the nearest hospital." . . . A 9th grade class recently wrote a letter to Devo: "Dear Devo, we want our tails back!" . . . Congrats to Frank Zappa on a baby girl. They've named her Diva, "because she screamed louder than anyone else." . . . Ian Dury's songwriting partner/keyboard player/guitarist Chaz Jankel announced that he's splitting from Ian to do his own thing. . .

**IN THE STUDIO:** New Arista signing D.L. Byron with Jimmy Iovine at the Record Plant. . . UFO at George Martin's new studio in Montserrat. He's producing. . . Elvis Costello making his production debut in London with hot new Chrysalis act The Specials, a multi-racial reggae-oid outfit.

**WET INK:** coast band Tommy Two-Tone to Columbia. . . England's Secret Affair to Arista. . . Three new names on Chrysalis: Eric Troyer, Wild Life and ex-UFO guitar-whiz Michael Schenker, plus the aforementioned Specials.

**AND MORE NEW RELEASES:** MCA's got Elton John's THUNDER IN THE NIGHT, the EVITA SOUNDTRACK, and ROBBIE PATTON's debut on Backstreet on October 6 and Tanya Tucker and John Klemmer's MOSAIC later in the month. . . Chrysalis offers Jethro Tull's STORMWATCHER and Blondie's EAT TO THE BEAT imminently, their last scheduled releases until next year. . . Columbia's got Leonard Cohen's RECENT SONGS, produced by Henry Lewy; Steve Forbert, produced in Nashville with John Simon; The Beat, featuring ex-Nerves Paul Collins; the Boomtown Rats' second for the label and Aerosmith's seventh (and possibly last with Joe Perry, we hear). . . Epic's finally releasing the long awaited George Jones duet album, including George and Elvis Costello singing Elvis' "Stranger in the House" and a new wave sampler called PERMANENT WAVE, featuring a mystery band called the Spikes, which may or may not have a good connection in Epic's A&R Department. . . Polydor's got UK's NIGHT AFTER NIGHT, recorded live in Japan, Norwegian Roy Sundholm's debut and the Farraghers, produced by Vini Poncia coming in October, with Charisma offering Peter Hammill's PH7, as well. . . Atlantic ships Firefall's UNDERTOW, Herbie Mann's YELLOW FEVER, Ray Charles' AIN'T IT SO, Jean-Luc Ponty's A TASTE FOR PASSION, and the Addressi Brothers' GHOST DANCER, all in October.

. . . Arista's got two October releases. On the 3rd comes THE SPORTS, MELISSA MANCHESTER, the Outlaws' SIX OF ONE HALF A DOZEN OF THE OTHER, The Pop's GO and FM's SURVEILLANCE. Then, on the 24th come Dwight Twilley's BLUEPRINT and new ones from the Grateful Dead and Camel, Hiroshima, and a film soundtrack for the AMERICAN GAME.

### LOS ANGELES

**CAPRICORN ALIVE (BARELY) AND KICKIN':** Phil Walden and his close circle of Capricorn confederates are denying the many reports (including one in ON THE WIRE's last column) of the Georgia-based company's demise, insisting that "we are still in business and still selling records." However, all is not well—a legal crossfire between Capricorn, its distributor Polygram Inc., and Polydor Records is taking its toll on the small label. At the crux of all the legalese is Billy Thorpe and his CHILDREN OF THE SUN LP. Polydor Records announced several weeks ago that they had signed Thorpe and re-released his album. Capricorn filed suit against Polydor, claiming Thorpe was still on Capricorn and then Polygram (Polydor's parent company) took Capricorn to court ostensibly to collect secured collateral and money due. Got all that? While the lawyers are fighting it out, a fledgling, stripped-to-the-bone Capricorn (no longer with any West Coast staff) has two LPs slated for release: the Marshall Tucker Band's STOMPIN' ROOM ONLY, a live set recorded in Europe; and the Allman Brothers Band's DECADE, a greatest hits package. Polygram, theoretically, will distribute the two disks.

**ROBIN LANE & THE CHARTBUSTERS TO WARNER BROS. GO:** Boston-based band Robin Lane & The Chartbusters, whose "When Things Go Wrong" single has been moving hot 'n heavy, have signed the papers for a deal with Warner Bros. They are in the process of selecting a producer for the project, which the band would like to have out by January. Youthful songstress Lane and her Chartbusters were on the verge of inking with Richard Perry's Planet label before Warners jumped in with their last minute offer.

**OTHER SIGNINGS:** Beserkley Records have announced their "major coup of the year," signing Count Pulaski and his Five Minute Men (the Count was formerly Beserkley artist Son of Pete). MEET THE COUNT, Pulaski's debut LP, is apparently imminent while the single, "Night Baseball" is (according to Beserkley) already charting. . . Off Broadway to Atlantic Records. . . Jim Carroll, one time poet, has been signed to Rolling Stones Records. He's currently recording with his band, Amsterdam, at Wally Heiders in San Francisco. . . And Rocket Records, home of Judy Tzuke and Colin Blunstone, have pacted with MCA for marketing and (Continued on page 30)

# THE SYNDICATORS

## CAGEY ENTREPRENEURS RE-INVENT BLOCK PROGRAMMING

### BY STAN SOOCHER

#### HOW & WHY

"We're a network!" Bob Meyrowitz, president and founder of DIR, proudly claims of his burgeoning syndication company which offers such nationally successful shows as **The King Biscuit Flower Hour** concerts, **Direct News**, and **The Robert Klein Hour** to an estimated seven million listeners each week. Then just as quickly, seated in his Manhattan office beneath a painting of a horse holding a flower in its mouth, Meyrowitz admits there are indeed major differences between syndicated and network radio.

"A network affiliate is required to carry network programs, whether they like them or not. We give a station a program that it wants, but is too expensive for that station to produce alone. As the AOR marketplace becomes more competitive, stations need programming that differentiates one guy from the next. Everybody gets the same records. But WNEW-FM is the only station in New York, for example, that can say they have **The King Biscuit Flower Hour.**"

While **King Biscuit** reaches over 250 FM stations, Watermark's **American Top 40** is heard on over 500 mostly AM stations. Watermark president Tom Rounds says, "We provide programming from a central source, just like the networks. But we'll develop a program

along specific demographic lines, like the 18-34 audience, while the networks have the more difficult task of coming up with programming that appeals to the mass, something that's going to cross all format barriers."

DIR and Watermark are part of a flourishing syndication industry that currently grosses \$25 million a year, a figure that is expected to double in the first half of the '80s. Aside from the radio dramas of **CBS Mystery Theater**, network programming consists of information, sports, and news supplementing records. Syndicators, however, tackle everything from concerts, in-depth interviews, and chart countdowns to awards shows as well as dramas and news specials. And there's automated services like Drake-Chenault that produce entire music formats.

Although modern syndication began in 1969 with **The History of Rock and Roll**, produced by KHJ in Los Angeles, the '50s fostered music shows featuring personalities like Jimmy Fiddler and interviews that were sent from station to station with scripts to make the local disc jockey sound like he was doing the interviewing. Then jingle companies began producing shows that were circulated by their "carpetbag salesmen" who bartered their wares for air time and in turn sold the air time to sponsors. (The practice of bartering is today as accepted as cash business.) **The History of** (Continued on page 28)

gets a job working inside a jukebox. The jukebox is KLAN. Then it's thirty-six call letters later. KUPD, KCBQ, B-100, TEN-Q, KENO, KRIZ, and more. Fox has a line here. "It was 13-and-a-half never-a-dull-moment glorious years." It was also 13-and-a-half years that never saw the light of day. The closest Dracula ever gets to daybreak is afternoon drive.

Now hold on! The pace of this flick is picking up. Don't worry!

Fox is jock and peedee and then The Vacation. He wrote, researched but invested most of his time getting a suntan on the bottom of his feet.

There's that Time Machine again! Wow!

**W**hen they meet me they know I'm a character right out of Looney Toones."

That's not Porky talking. It's Jimi Fox. Hold up a minute Jimi Fox .

This ain't no cartoon. Not exactly. It's sort of a science fiction movie. Maybe a science fiction cartoon.

Waitaminute! Don't turn the page! So what if intergalactic porked pig rattles your cage? It's all very kosher. We've got a helluva character playing lead. Even a plot. But the best part is this IDEA that changes the way we think of space and time. And maybe radio. But we can't get too far ahead of the exposition.

Get to your seat quick. The lights are out and the credits are starting to roll across the screen.

Look at that! Some kinda Time Machine. But Fox ain't no Rod Taylor looking for the future Eloi. He's going backwards into time. Tock-tic, tock-tic. Hey, there's this weird landscape. No wonder it looks strange. It's California in the 20th Century.

Enter Jimi Fox . He's in charge of the jukebox at high school. After he matriculates into real life, Fox naturally

It's a planet where the dominant form of life has evolved into automobiles! Nuts! It's just California again.

But at least we know where we are. Somewhere in the present. Fox is talking about promotion, trade liason, and A&R. "I heard all the horror stories about how artists are maniacs," he is saying, "but I haven't had that problem at all."

Very few problems. Fox is explaining that everybody who should break is breaking. The broken are Frank Zappa, Southside Johnny, and the Osmonds.

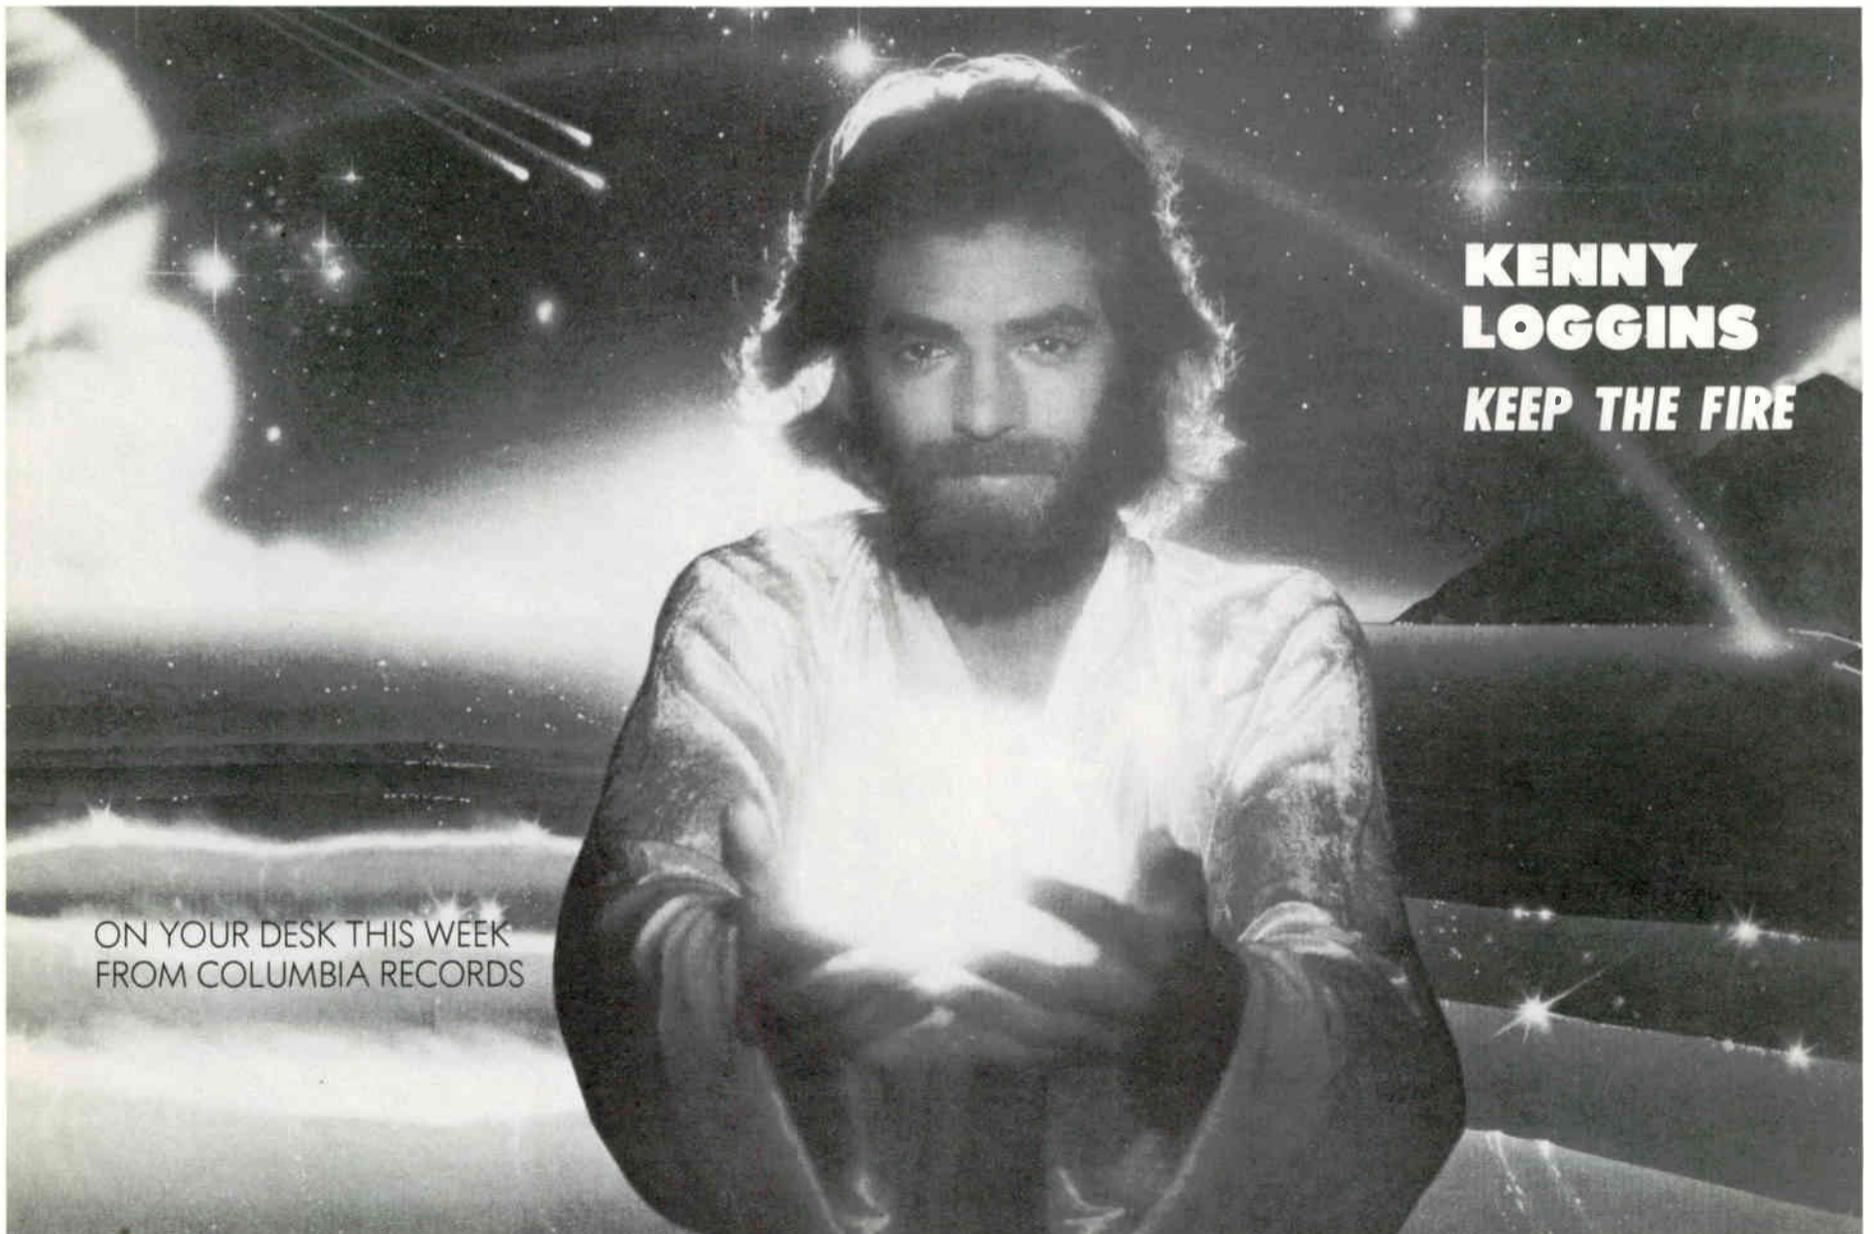

Even Donny and Marie. Fox is arguing this testifies to a virtue of balance which has guided Phonogram/Mercury to integrate rock n' roll and pop and C&W and R&B under one corporate umbrella. But if Zappa and the Osmonds is still a little like the difference between Hemingway and Bazooka Comics, Fox is nonplussed because he is saying "I like the contrast."

More character development. The contrast is black and white when Fox is considering the rest of the record business. "The market is extremely soft. The public is not buying as much record product. The industry will be lucky to do the same business it did last year."

This may be a movie but it is also reel to real. There will be more cutbacks. Get the wagons in a circle.

INTERMISSION.

Popcorn. No, none of that dripping yellow vinyl glop that ain't butter. Whatyamean YOU were sitting here! Ssssh! It's starting up again. (Continued on page 27)

##### COMMENTS:

On Sunday, September 2nd, Q95 pre-  
sented its first annual "Rock 'n'  
Picnic Jam" at American Heritage  
Park just outside Indianapolis.  
17,490 rock & rollers showed to  
hear Roadmaster, The Pat Travers  
Band and Heirborne. The station  
provided helicopter traffic re-  
ports from our newsman Kevin  
Houston and later the site was  
visited by skydivers. The event  
was a huge success and we at Q95  
would like to thank all the great  
people who made it so.

### COMMENTS:

Dick Merkle is setting up to do independent album promotion in Denver. As of late a number of labels have been pulling out of this market and service from those labels has been wavering. Here's hoping that those labels will get behind Dick and get their products out and moving again.

Scott Jameson, former M.D. at WIOT, has recently joined KTCL's staff.

#### COMMENTS:

We are finding out that GOOD GIRLS DO, as long as they DO THE ROCK, and are on the RISE. We are waiting for our new SHOES, because we don't stop til we GET ENOUGH. We are still SAILING ON our new YACHTS. Hey, did HEAVEN SEND YOU? It might be REMOTE CONTROL, but Ig is only 5 ft. one. We are ELECTRIC, and are full of PROPAGANDA.

#### COMMENTS:

With deep regret we mourn the passing of WQSR. On the West Coast of Florida it was the only progressive alternative radio station. The new owners have presented us a format on WSRZ that really sucks dead air - 60% mellow rock and 40% disco. It is a sad turn of events that leaves us with only one rock station in the area, that being an Abrams rock format station. May I say this also sucks. Nowhere is there a chance to expose listeners to the less commercial, yet viable sounds of new wave, jazz, or any progressive material that does not fit into the Atlanta regulated playlist. Not only is this bad for listeners, but for record stores, record companies, the bands and individual performers themselves. We need a Radio Revolution in Tampa.

#### COMMENTS:

I'm confused. I thought we were in business to sell records and promote new artists and music. New policies and service by some labels indicate otherwise. WEA in Dallas has informed us not to expect promos on their new releases, because of cutbacks throughout the company. They suggested opening stock copies for in-store play and returning them later. Fine, except that their return limitation does not allow for it; and on an average 25 title release, they are taking a substantial financial outlay, every month. Columbia has just tightened its return policy. They have also left retailers holding the bag on product which was purchased at \$7.98 list but has been reduced to \$5.98 list. MCA in Dallas is still, after two months, two to three weeks behind on shipping orders. Poor fills on hot product continues to be a problem with all of the labels. These are counter-productive policies and service which do not expose new artists and certainly do not sell records.

Holy Kolbasi! A fond farewell to Kencovnich Likavinski (you gotta be tough,) and a hearty welcome to Jay Fleck. Don't overlook all the good new material that might get lost in the shuffle from the biggies everyone is saving for. Let's see some more midline! It was good to see our pals in Point Blank along with MCA's Steve Jones who dropped by for a very casual appearance. Thanks a lot fellas! The Devil went down the street. John Cougar could really go for it. Don't forget, this is country music month!

COMMENTS:  
This is the week of the 2nd Annual Eclipse Jazz Festival, featuring Dexter Gordon, Sun Ra, Mingus Dynasty, Gato Barbieri, Joseph Jarman & Don Moye, McCoy Tyner & Oscar Peterson. Workshops, lectures, and showing of the documentary film "Mingus" will tribute one of America's great composers. Also local radio WCBN-FM will dedicate 46 straight hours of programming to celebrate the birthday, as well as the music of the immortal John Coltrane.

#### COMMENTS:

Mercury poisoning or artistic arsenic? Everyone is knocking Mercury for their treatment of Graham Parker and City Boy. Both so critically acclaimed but nobody bought them. We pushed both artists consistently while they were on Phonogram and could not garnish sell-through. I just wonder why Scorpions and Southside are selling and Graham Parker and City Boy aren't?

## MISCELLANEOUS

WSCB's Music Director, Charles F. Rosenay, is presenting The Second Annual New England Beatles Convention on the campus of Southern CT. State College in New Haven on the weekend of Oct. 26-28th. He's looking for any films, videotapes, etc. to show and would appreciate any promotional ideas or Beatles items for a mini-museum there. Write to Charles c/o WSCB, 501 Crescent Street, New Haven, CT. 06515 or call (203) 865-8131.

Audio Independents, Inc., is a new national organization designed as a distribution and development agency for independent radio production. The primary objective is to seek out, catalogue and represent the work of independent producers, material not readily classifiable in the traditional sense, and to develop channels of distribution (both commercial and noncommercial) for more varied and diverse programming. AI will be headquartered in New York City. For further information contact P.J. Anderson, RD #1, Fort Edward, New York 12828 or call (518) 695-6406 or 695-3960.

## SPECIAL MENTION ALBUMS

High Artistic Achievement

(NONE)

## STRONGLY MERITORIOUS

Consistently Striking at Excellence

### SHOES

PRESENT TENSE/Elektra 6E-244

Yet another pop new wave monosyllabic band. But this one has more than a knack for rock splendor. They're an 8 1/2 C with high arches and super durable soul. A perfect fit. (If you can't hear it - turn it up.) (D.S.)

R.T.'s Now and Then  
In My Arms  
I Don't Miss You  
Toc Late  
Tomorrow Night  
(More)

### THE POP

GO!/Arista AB 4243

In case it's not apparent to you yet, I love where music's going these days. And this band is high grade fuel for the trip. But it's their razor edge defiance and affection for the bent-er things in life which turn the journey into a race. Ready, Get Set... (D.S.)

R.T.'s She Really Means That Much..  
Beat Temptation  
Maria  
Under the Microscope  
Shake Away  
Go

### FOREIGNER

HEADGAMES/Atlantic SD 29999

This is the most natural, contemporary album of the three. They are survivors of a middle period genre who are accelerating into the 80's via Roy Thomas Baker's masterstroke production and their own human ability to communicate. 'Foreigner' was getting to be a dirty word among the 'in-crowd.' This album turns that around. I don't feel guilty anymore about liking them. (D.S.)

R.T.'s The Modern Day  
Headgames  
Women  
Love On the Telephone  
Dirty White Boy  
I'll Get Even With You  
(More)

## MERIT PLUS ALBUMS

Competent Lps with Some Special Element

### RUSS BARENBERG

COWBOY CALYPSO/Rounder 0111

Strictly for folkies. Cowboy Calypso is special. It is vibrant and clean and displays the commanding guitar talent of Russ Barenberg. Aces. (G.B.M.)

R.T.'s Cowboy Calypso  
Gimmicks Ahoy  
Flabston..

### THE BEAT

Columbia JC 36195

When it says "PLAY IT LOUD" on the back of an album, it always makes me suspicious. (What other volume is there?) No reason for suspect, this band plays honest rock & roll with an American punk derivation of fever. All the songs talk the same language, but some have more to say. (D.S.)

R.T.'s Don't Wait Up For Me  
Look But Don't Touch  
You Won't Be Happy  
Work-A-Day World

### BRAND X

PRODUCT/Passport PB 9840

Jazz-rock complexity remains their trademark but when Phil Collins sings, it may as well be a Genesis album. They can be just as subtle as they can be overpowering. The versatile mystery line-up does it again. (D.S.)

R.T.'s Don't Make Waves  
Scho  
And So To F...  
Algon

### CARLENE CARPER

TWO SIDES TO EVERY WOMAN/Warner Bros. BSK-3375

A perfect blend of Linda and Emmylou but with moxy. I'll bet Carlene didn't know she was so powerful. But the songs are the real success. Each and every tune is poetry in motion - and there's a lot of motion. (D.S.)

R.T.'s Two Sides To Every Woman  
Swap-Meat Rag  
Lies  
Do It In a Heartbeat  
Radio Sweetheart

### CHEAP TRICK

DREAM POLICE/Epic FE 35773

You have to deal with this band on their own level - stoned. Still, a few of the songs just don't make it as complete thoughts. When they are lacking in melody, they make up for it in raw-cous energy. Even the ballad, "Voices" rocks harder than most other bands at full tilt. Dream Police isn't perfect but Cheap Trick's intentions are still honorable. (D.S.)

R.T.'s Dream Police  
Way Of the World  
I'll Be With You Tonight  
Voices  
Writing On the Wall  
Need Your Love

### DESMOND CHILD & ROUGE

RUNNERS IN THE NIGHT/Capitol ST-11999

Everyone knew that this band was good but their first Lp was just a bit off center - too danceable and too cute (West Side Pow Wow!) This time they have adjusted admirably and have assembled a group of tunes, most of which they can be proud of. An occasional lyric doesn't sit well ("Rosa"), but other than that, their hot pop sounds fine. (D.S.)

R.T.'s Tumble In the Night  
The Truth Comes Out  
Goodbye Baby  
Imitation Of Love

### JETHRO TULL

STORMWATCH/Chrysalis CHR 1238

There's only one Jethro Tull. Who else could play with the pomposity of a marching band in full regalia. Who else would? There's not much in the way of hit singles, but there are a few upbeat wailers. The melodies aren't all that special, but the feeling still is. Tull works off of memories - good memories. (D.S.)

R.T.'s Something's On the Move  
Orion  
Old Ghosts  
Dark Ages

### MOLLY HATCHET

FLIRTIN' WITH DISASTER/Epic JE 36110

Since this band did not originate the style of Southern rock-boogie, one man's Lynyrd Skynyrd may be another man's Molly Hatchet. They punch hard with decent hooks but they haven't written any anthems here. Their playing ability picks up the slack. Molly Hatchet's value is their vengeful attack. (D.S.)

R.T.'s Boogie No More  
Whiskey Man

### PEZBAND

COVER TO COVER/Passport PB 9837

Pezband is probably the most consistently overlooked group in existence. This Lp, like its predecessors, is a mighty display of their enduring fortitude. They never wanted for melodies, power or playing ability - just acceptance. Pezband is the essence of rock 'n' roll. (D.S.)

### THE POINTER SISTERS

PRIORITY/Planet P 9003

The Cover Sisters perform Perry's picks to click. They are like platinum putty in his hands, besides the fact that retreats don't carry the impact of originals. A solution may be recording more obscure songs like "Blind Faith," which would add more staying power. K-Tel's got nothing on Richard Perry. (D.S.)

### SUZI QUATRO

SUZI AND OTHER FOUR LETTER WORDS/RSO RSO-1-3064

Suzi has her fists clenched, and for good reason. This is her best album to date. Chapman has taken her through stages, but the added new wave edge (with a hint of Blondie) is the most welcome change. Even Suzi's own songs have greatly improved. The hooks are everywhere. (D.S.)

### WHITESNAKE

LOVE HUNTER/United Artists LT-981

Deep Purple is alive and well and living in the heart of Whitesnake. But this band is palatable more often. There's a good sense for melody and a soft spot in their metal for blue collar emotion. Brimstone is also in their repertoire. (D.S.)

Dear Richie, it's been over two years since we last spoke. Not much has changed since then, for you. But the world of music around you certainly has. Tim, Paul and Rusty know it. But you think that if you play loud, hard rockers (which you excel at) that you'd be selling out. No Richie, you'd just be selling. But we've been through this before. I don't think you 'believe me.' **BONNIE RAITT**

THE GLOW/Warner Bros. HS 3369  
In an age when everyone is asking for something new, Bonnie gives us that same old (but classy) song and dance. Asher has made her sound a bit more forceful, but the only real change is the trashy snare sound. All but one of the covers are poorly chosen. Bonnie is entitled (and encouraged) to be herself but it seems she is continually restraining her own evolution. (D.S.)

Look the Time Machine! There's Fox too. He's gonna take us on a grand tour of the Planet of Radio History. "To understand Radio of the Future," Fox is saying, "you have to know where it's been."

There's a sudden SPECIAL EFFECTS EXTRAVAGANZA backward into the PRIMEVAL DAWN of Marconi.

Here we are back in the early days of mom and pop radio. There are no big chains. Mom and pop are making good bucks. Lotsa bucks. Some have gone overboard. Mom and pop are whoring radio! Crisis! They've sold themselves into a corner. Sold the station to corporations and supercompanies! They've sold out altogether!

It's real spooky. Something is going to go bump in the night of this movie. Look out! We're going to The World Did Not Understand.

Actually without all the eerie lights and the fog making machine this would be a world, just like ours, that pits the straightjacket of the corporation against the creative freedom of the individual. Inevitably the corporation wins. Thousands of radio schools mass producing armies of jocks and programmers displacing the more expensive, more temperamental radio artist. The bottom line is the profit line is the only line.

Something is creeping around. Watchit! It's the pocket computer programmers. Oh No! There's no defense! They've set their Texas Instruments Fasers on Kill! A holocaust of facts and figures!

The only survivors are the general managers. If the good die young, these guys are immortal. The forces loyal to radio are in retreat. The enemy has carried the day.

But what have they carried? They have won stagnation, fragmented markets, gutless and uncreative radio. There's a constant staff turnover. Programming

wars with sales in a never-ending civil war. Nobody can lock into the audience because nobody knows how. And there's nobody left to show them the way.

It is The Night of the Dichotomy Monsters from Outer Space.

But wait! Not everything is lost. Maybe it ain't Ben Kenobi but it looks like, yes, it's Our Hero!

While the Dichotomy Monsters and Our Hero are waging a titanic battle that calls up the very best from the very worst of 25 years of Japanese Godzilla movies, the voice of The Narrator, played by Fox, explains what is happening.

"Radio needs a major overhaul and it has to begin with the owners. The owners want a profit. For them radio is a property and it is perfectly realistic for them to expect a return on their investment.

"What has to be done is to bring together the creative and sales elements under one umbrella following the FCC proviso of serving the community.

"The general manager is supposed to be that umbrella but usually he is recruited from sales. The gm that understands and broadens the marriage of creative and sales is rare. Most of them are money-hungry. They do not even know how to make a station work right. They are shaving the owners profit and bringing in inferior research to use as a scapegoat.

"What radio needs to do is improve ratings, hold talent longer, serve the community, make more money, increase their share, defragmentize the market, and make great radio."

On screen, the Dichotomy Monsters and Our Hero are dueling with light sabres made from the fossilized remains of 8x10 color glossies from the Charlie Ferris Fan Club. Watch out! Here comes The Idea!

"Unless you've got a great gm, fire him. You don't need him.

"What you do need is a strong salesman who increases sales; a strong program director who is creative and increases

ratings; an operations manager to hob nob with the Kiwanis Club and keep an eye on public affairs and ascertainment; and an accountant to watch cash flow.

"These four report directly to the owner. Cut out the gm and cut out the middleman.

"The idea is to get the peedee and the sales manager to work closer together. Sales is concerned with revenue; the peedee with ratings. What we do is reorganize the way a radio station operates. The sales manager gets a base pay plus a bonus for average increase and maintenance of ratings. The program director gets a base pay and bonus for average increase and maintenance of revenue.

"This will put an end to the problem of turnover. Programming and sales will better understand a market. The audience now has no security. Radio is a form of entertainment and information. It is also escapism and fantasy. For fantasy to work, it has to be comfortable, stable, and familiar."

That makes radio out to be the comfy sofa of the ears. Fox calls his proposition "The Reconstruction of Radio for Tomorrow." It has never been tried which makes it that much more of a challenge. But a challenge that's at the heart and brain and guts of our business. Like most good ideas it is basic and simple. Render unto Caesar cross pollination. If it works, it resolves the built-in dichotomy that pits sales against programming, the same conflict that turns programmers into Eloi and meat for the Morlocks of sales. And it just might signal an original contribution to broadcasting and the community it presumes to serve.

What about the movie? The good guys won.

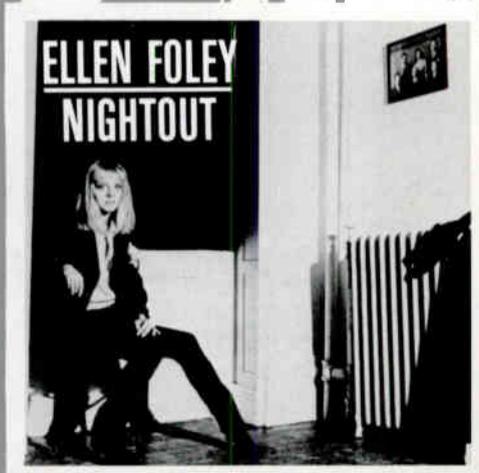

Bedededet-t-t-th-th-th-tha-that's all folks.

## HOW & WHY

(Continued from page 4)

Rock and Roll originated as a way to give disc jockeys the New Year's weekend off and soon became a colossal project interesting other stations, who bought it from KHJ.

In 1973, DIR became the first company to break into regular FM syndication. Bob Meyrowitz had previously been head of research for ABC radio and an advertising salesman for NBC radio. "There were no national programs on FM because advertisers couldn't conceive of it," he says. "They thought it was for drug addicts. Head shops and record companies were the only ones advertising. Pioneer Electronics, our original sponsor, had never been on FM before. But bringing in a concert was a great promo for the advertiser and the artist. At first, it was a juggling act. We'd have the act, but not the stations. Then we'd have the stations and the act, but not the sponsors."

"There is a symbiotic relationship between the station, the act, and the sponsor," adds Peter Kauff, DIR's executive vice-president. "They each have a different axe to grind, but they all want listeners. We didn't create the market. We just discovered it was there."

DIR's first concert presentation was Blood, Sweat, and Tears and Bruce Springsteen. Shows were monthly then and advertisers unfamiliar with rock music were asking for groups like "Sly and the Rolling Stones." Since then, DIR concerts have contributed to live albums by the Bee Gees, Rod Stewart, the Rolling Stones, and Emerson, Lake, and Palmer. Now, a station's ratings double when King Biscuit shows are broadcast. DIR's **Conversations With**, two-hour interviews four times with the likes of Woody Allen, the Blues Brothers, and George Harrison, have done well, but **The Robert Klein Hour**, a talk show with a brief album countdown based on **Record World** charts, has been grabbing the spotlight lately.

"The all-music stations said, 'Play music, don't do comedy,'" says Kauff. "But with Klein we have someone who knows music, is hip and bright, and identifies with the audience — a stand-up comic who's done colleges for years. The show is a clever, witty happening. It's an innovation meant to open radio's mind to new possibilities."

Watermark's **Alien Worlds**, a dramatic science fiction series which debuted on over 150 stations in January, is another indication of the expanding parameters of creative syndicated radio programming. "We come up with program concepts which are developed to the pilot stage, and then share them with advertisers to see the interest," explains Tom Rounds, who prefers the term "special programming" over syndication. Watermark's other shows include **American Country Countdown** and **The Robert W. Morgan Special of the Week**, but **American Top 40** is its biggest success story.

"When Casey Cassan came to us with the idea, it seemed like a great way to make some money fast," Rounds recalls. "Our original idea was for barter syndication, but we only started on seven markets and didn't get New York or Los Angeles for six to nine months. And we still didn't have any national advertisers. We were already \$300,000 in the hole, so we switched to a cash deal with the stations. It took four years to turn it around. **American Top 40** will be on ten years in July."

With the large number of syndicated shows today, does Rounds foresee a saturation point? "We're spending a lot of money right now trying to find out the attitude of the average listeners in the top 150 markets. We're not yet sure how many more hours stations are going to be able to devote to outside programming sources."

A good example of a workable saturation point is New York's WXLO. Besides running **Alien Worlds** on Saturday nights, the majority of this FM station's Sunday programming is taken up by Westwood One's **Great American Radio Show**, Watermark's **Special of the Week**, and **American Top 40** twice. Rob Sisco, WXLO's assistant program director, explains, "You have to establish yourself as a real, live personality radio station. You couldn't carry four hours of syndication every day. We're very careful on Sundays to have four hours of a live disc jockey between the morning and evening syndicated shows. But the syndicated shows also give us a chance to bill Sundays as special. They give us our highest ratings of the week."

The biggest challenge for syndicated disc jockeys would seem to be crossing over from one region of the country to another. But Barry Hansen, whose **Dr. Demento** is a wacky two-hour weekly show of musical odds and ends (offered by Westwood One, also distributors of **Star Trak** and **Spaces and Places**, an environmental news show), points out, "There are changes in the way people think from region to region, but playing records that have national appeal presents no problem and crosses those lines. There isn't that much difference between a Top 40 station in Massachusetts and one in Arizona. It would be nice, though, to have the network facilities and be able to do my show live across the country."

If Hansen suggests that networks and syndicators can coexist to each other's advantage, Dave Prince of the **PH Factor** (producers of **Rama-Lama** and **Words and Music**) is convinced that a state of war currently exists between the two.

"The syndicators have become a threat to the networks. We're taking over," Prince claims. "We can go to any station in a market that we want to and ask them to carry our shows. The stations we're already working with have the right of first refusal, but if they don't accept, we can bring the shows elsewhere. Networks have one

affiliate per market. So they're going to try to lock the syndicator out. Some network official says, 'We've become staunch, stale, and staid. Our programming leaves something to be desired. What are the syndicators doing that we're not? They're appealing to the broadcasters. How far is it going to go before we lock horns with them head on?' The networks will buy the syndicated shows to have control. But I've made no deals with the networks."

Creators of **Star Trak**, **Innerview**, and **Record Report** before they formed the PH Factor, Prince and his partner Jim Hampton have consistently been at the forefront of the syndicated movement. But J. Robert Cole, vice-president of the seven CBS-owned FM stations, refutes Prince's charges.

"I have an autonomous operation. Each general manager of the seven stations has his own programming department. I make no blanket overall decisions as to what they should play. It's up to them. I don't have a national program director."

Nevertheless, NBC has just started its own AOR network, consulted by Burkhart/Abrams. Ruth Meyer is Director of Program Development for the new NBC AOR network as well as their established MOR network. She says, "We're arranging affiliates in specific test markets, none of them present affiliates. We're going to develop our own special programming and hope to have 150 stations by the end of the year. NBC hired me to devise network programming that does fit the sound of a local station. We'll have concerts, features, a news service, artist interviews. If a local station develops a program our other affiliates would be interested in, we'll be able to distribute it."

Meyer doesn't mention any instance of a network trying to buy out a syndicator, but she does admit, "Syndicators have come to us to ask if we would distribute their shows. I'm not closing the door on that. A couple of them have done some programs on the MOR network to see if we're creatively compatible. But we haven't developed a continuing relationship with any syndicators."

Is NBC attempting to outdo the syndicators by forming a new network based on special programming? "All of us thought of it at once. It's coincidental," Meyer concludes. "It's the nature of the needs of radio in general."

# THE RECORDS RESUMÉ

Will Birch — drums, John Wicks — guitar and most lead vocals, Huw Gower — lead guitar and vocals, Phil Brown — bass and vocals. These are the four British components who make up The Records.

If you're an import record freak, you may know that Will Birch was the drummer for a band called the Kursaal Flyers which released four LPs in England including one hit single (1975-1977). Will contributed a good number of the songs (mostly lyrics) for that band as well as The Records. John Wicks joined Kursaal three months before its demise. When the band fell apart, John and Will decided to form a songwriting partnership.

"We spent two or three months writing songs," says Will Birch. "We then held auditions and the first guy we found was Phil Brown, our bass player. He came along quite quickly. Then we rehearsed as a three piece for about a month. We had a real problem finding a lead guitarist. To find a guy who was content to put his stuff into a three or four minute song context, and a guy who also fit in and looked like one of the group wasn't easy. We auditioned about 200 guys in about six weeks. We eliminated quite a few the minute they walked in the door because they just didn't look like one of the band. Some of them looked great but couldn't play. We were overjoyed when we found Huw Gower because not only could he play but he looked good and his attitude about work and music was right."

"This all happened about March of last year. We spent most of our time playing in clubs and pubs, a few support dates. We knew Rachel Sweet and she had recorded a song of ours on her album. So, to make it short, Stiff Records called up and asked us to be her backing group on the Stiff tour. We said we'd do it if we could play our own

set as well. And they foolishly agreed. So, we did six weeks in England and then the Bottom Line in New York. And then we signed with Virgin and here we are."

If John and Will had been strongly influenced by Roxy Music or The Doors, their sound today would be anything but what it is. They recall their favorite early bands, namely Big Star ("We were going to record 'September Girls' on the LP," says Will.), Badfinger ("Pete Ham was completely underrated. 'Baby Blue' is the definitive pop song," says John.) and the Raspberries (especially around the 'Overnight Sensation' period. We weren't into the matching suits that much.") So if their songs tend to fall into the pop-hit song category, it's easy to see why. But what John, Will, Huw and Phil try to do is write hooks — even in between the hooks they try to write hooks.

John says it this way, "Every line in a song should make you say, 'Christ, listen to this tune.'" And Will says it like this, "In the end it comes down to the song, a tune where the melody twists and turns. The first time you hear a song like that, it doesn't hit you. After you hear it ten times you're waitin' for every twist and every turn. That's what we're trying to do."

But how and where do the songs come from?

"We have different systems," says Will. "We work from inspiration. We don't hack stuff out. If two months go by and we haven't written a song, we don't get too worried about it. But if I can't sleep one night I might write a song about insomnia. That is exactly the process. Our roles are pretty well defined. I usually write the lyrics and John writes the music. Sometimes we'll do that in reverse and sometimes, like with 'Teenarama' we'll sit down together and write it from scratch.

It's completely spontaneous."

"I never know when I'll tune up the guitar and go into the bedroom," says John. "It's just that one day I'll go in there and pick it out. It's never planned because when you plan it you feel like you must do it. Then I'd rebel against it and sit there for hours getting nowhere."

The consistency of sound throughout the Records' first LP might not seem such an accomplishment until you realize that a number of tracks were produced by Robert John (Mutt) Lange, some by Tim Friese-Green (who also mixed the LP), and a couple by the band itself (more or less). Combine all of this with the fact that John Wicks sings lead on seven songs, Huw sings 'The Phone' and Phil sings 'Girls That Don't Exist' and 'Teenarama'. With all of this interworking they never drop their image for a second.

"When the Beatles first started and they used to share the leads, I couldn't tell which was which. Even now I find myself saying, 'I didn't know George did the lead on that one or Paul sang on that song.' For years I thought John sang 'She's Leaving Home,'" says Will.

Being from England, you'd think they'd know. Also, since they hail from the homeland of New Wave, how is it that some element of the New Wave attitude hasn't crept into their clean pop rock n' roll? Especially since they sight some of their fave new bands, such as The Clash, The Buzzcocks, The Jam, Cheap Trick, Rockpile and Bowie (not that Bowie is new but what he's into lately).

"New Wave affects us subconsciously but it's not really evident in the music for an odd bar here and there," says Will. "If some of these bands forget about convention, I guess it's because that's what is really inside them. They do it because they believe it. I like a lot of New Wave, but for me it comes down to the song itself. Very often when people hear groups playing material like ours and the way we play it, they sometimes dismiss it as being a bit light. But if you really get into the subjects and you really listen to the lyrics there's a deeper intent which is not there in a lot of the bands who pose as New Wave. Their music is very empty. They use imagery. You can see it from the titles of the songs on some of their albums. I have a list of words which right now are clichés and I'm avoiding using them in any lyric I ever write again. The list is headed by 'modern'. Then you find — world, television, video and radio. No offense."

distribution. MCA originally handled Rocket, until last year, when the Elton John-owned label signed on with RCA.

**CHAPMAN'S DREAMLAND DISKERY:** Producer Mike Chapman, who apparently can do no wrong, what with Blondie, The Knack, Suzi Quatro, Exile, etcetera and etcetera, is talking to several companies about distributing his own soon-to-be label, Dreamland Records. No word on what artists, if any, have been signed.

**ODDS 'N ENDS:** British pop great Ian Gomm and his band the New Melo-Notes will be opening on Dire Straits' upcoming Fall tour . . . Ex-Fairport Convention bassist Dave Pegg has officially joined Jethro Tull, taking the place of John Glasscock who had to leave on account of bad health . . .

Alan Powell, former member of Vinegar Joe along with Robert Palmer, has a song, "Jealous" on Palmer's SECRETS. Powell has now joined a San Francisco band, The Shapes, playing under the name Joe Allen . . . Rose Ann Cash, daughter of Johnny and sister of Carlene Carter, recently tied the matrimonial knot with country crooner Rodney Crowell . . . Local boys Gary Myrick & The Figures recently headlined at the Whiskey. Still unsigned, there's a real buzz on the streets about 'em . . . The Knack's drummer, Bruce Gary, plays on British guitarist Albert Lee's forthcoming LP . . . Famed R&B producer Willie Mitchell has signed a producer/artist deal with Bearsville.

**IN THE STUDIO:** Bruce Johnston is producing the new Beach Boys LP at Caribou Ranch . . . At Trod Nossel Studios in

Connecticut The Bleachers are recording with producer Kent Bracey . . . Cream Records' Snail are in the Music Annex with Roy Segal producing . . . Three Beserkley acts, Earthquake, Greg Kihn and Britisher Sean Tyla, are busy up in Bay Area studios . . . Little Feat are putting the finishing touches on DOWN ON THE FARM which will probably be the group's last ever record.

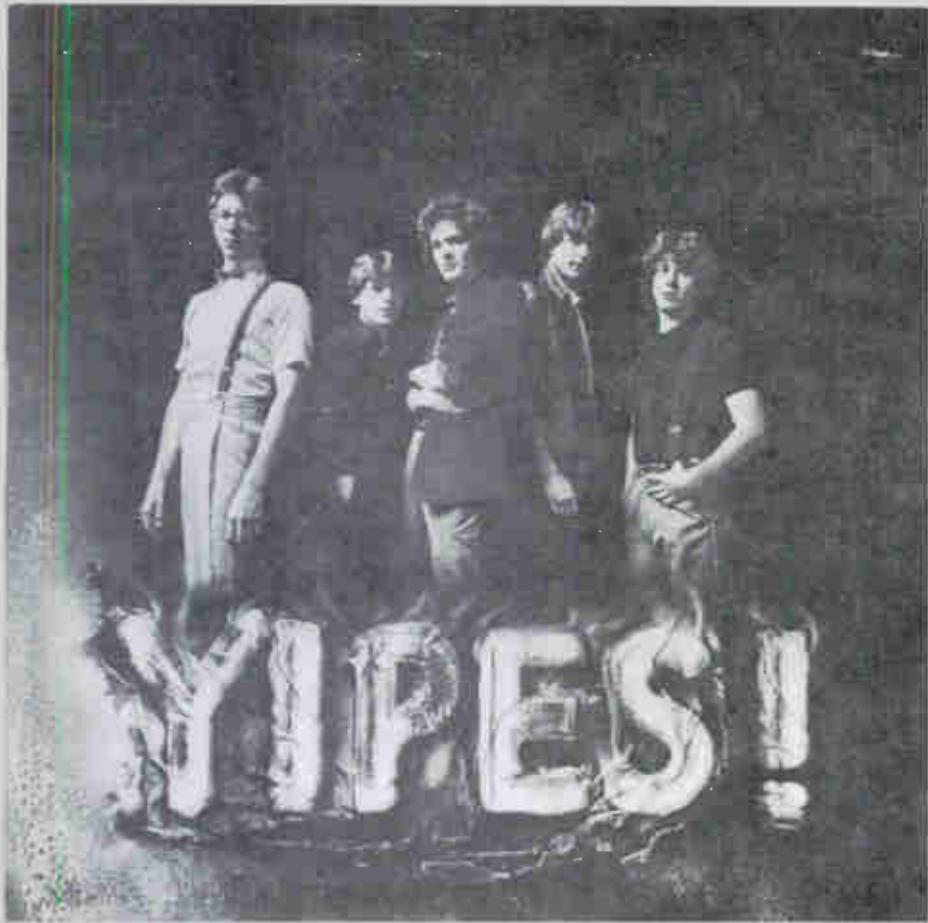

**UPCOMING PLATTERS:** MCA's October-due Steve Cropper solo disc features guest spots from Keith Richards, Rod Stewart and the Blues Brothers . . . Rob Grill, former lead singer for the Grassroots, has an album coming in October on Mercury. The LP features sundry members of Fleetwood Mac and Walter Egan's band.

**MISSOURI SECEDES FROM POLYDOR:** Rock act Missouri, who've been exhibiting some

solid sales and strong radio play, have been dropped by Polydor. While Polydor is in the process of trimming its roster, Missouri's management cite internal company politics for the Missouri anking, since the act has logged sales in the respectable 100,000 vicinity. Epic, RSO, A&M and Capitol are apparently all talking to Missouri, though Epic has been given the insider's edge due to their "We'll sign any band named after a state" A&R policy (just kidding folks).

**EGAN STILL WITH COLUMBIA:** An item last issue stating that Walter Egan had been dropped by his label, Columbia, is incorrect. Greg Lewerke, head of Egan's management firm, reports, "It's true we're having trouble with CBS, but no, we haven't been dropped by Columbia."
