CLASSIFIED AD
DEADLINE AUG. 10TH

COLLECTOR PROFILE

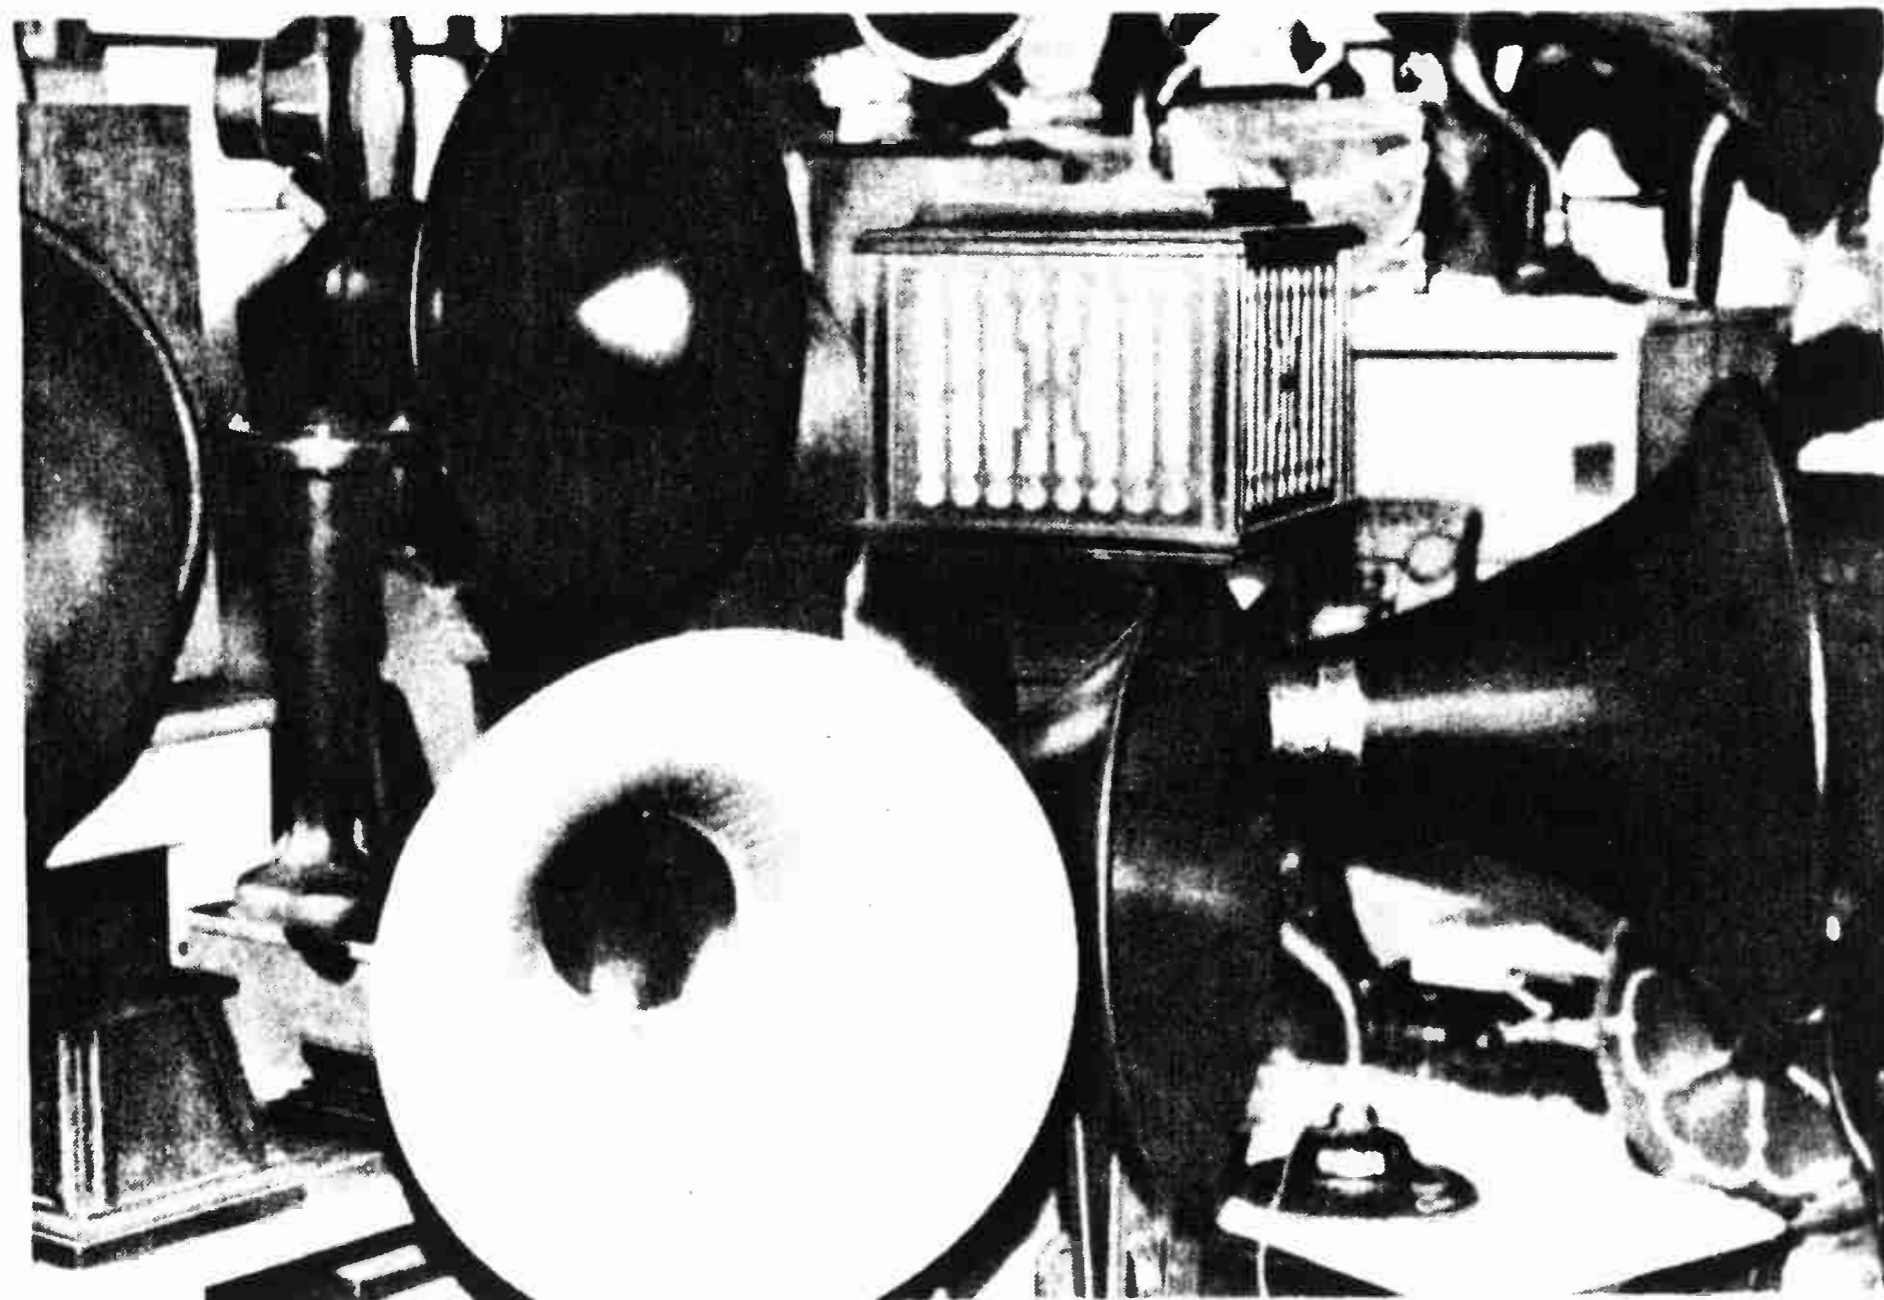

Floyd A. Paul, a collector who specializes in horn speakers, has sent A.R.C. a photo showing a partial view of many of the horn speakers in his collection. Up front, lower center, is a pair of Music Master 14" diameter wood bells (Spruce on the left and Mahogany on the right). To the right is a 21" diameter Music Master Mahogany horn. Upper left is a wood neck, metal bell Winkler Reichmann S-5 (early). Upper center is a Hartman Electric Mfg. Co. 46" high floor pedestal model.

These are some of the more than 125 different horns in his collection. The horns are his prime interest in collecting, although battery sets, A.C. sets, tubes and test equipment are a part of the collection. Like Alan Douglas, some years ago Floyd found interest and fun in collecting magazines. There are over 700 magazines in his collection, vintage 1921 to 1935, from which he can trace historical events, ads, companies and people.

Wood horn speakers (bells, necks & bases) seem to be what collectors treasure in todays collectables. The Horn Speaker booklet he started publishing 3 to 4 years ago has found

its way into some 145 collectors hands across the nation, including Japan, Canada, New Zealand and Australia.

Any collector who wants information about a horn speaker, for example... who made it, what year, how many were made, etc., can find a pen pal by writing to Floyd. However, you must include a SASE if you want a reply. There were over 300 manufacturers and over 600 models of horn speakers made between 1921 and 1927. Floyd has spent over five years looking into this specialized field and has enjoyed every day of it. Floyd's address is: **Floyd Paul, 1545 Raymond, Glendale, CA 91201 (818) 242-8961**

CLASSIFIED AD DETAILS: Each subscriber is entitled to one free 20 word ad each issue. Additional words over the free limit are 10 cents per word. Enclose correct payment with ad, as we do not bill for ads. Ads must be received before the 10th of the month to appear in the following months issue. Late ads will be held for the following issue. Limit of two multiple insertions of same ad. Ads may be sent in advance, however each ad must be submitted on a separate sheet of paper, preferably a 3 x 5" index card. Publisher reserves the right to edit ads and is not responsible for errors due to illegibly written ads. **OPTIONS:** Shaded ads are available at a cost of 10 cents per word additional, including free words. Photo ads are \$5.00 each for half-tone charge. Allow extra time for processing of photos. B&W line-art drawings also accepted at a rate of \$1.50 per vertical inch, maximum width is 3 1/2 inches. Custom ads made to order, send sketch of your ideas for quote.

EDITORS COMMENTS...

EDITORS COMMENTS - Its been only 10 days since the July issue was mailed out and already I have received a substantial number of renewals. As this issue (August) goes to the printers in just a few more days, I would like to bring up some important points. The surveys have indicated a profound acceptance of Antique Radio Classified. The surveys have also shown a desire of more articles and photos as have been appearing in the first year of publication. All of our regular columns are widely liked and appreciated by all. The question that I pose is - where are all these new articles and photos going to come from for the upcoming year? From trends seen in the surveys, it appears that everyone loves the articles and photos, but no one is willing to contribute. You must remember my position as the publisher and editor is to present to you each month the information I have on hand, and at the same time trying to present articles that are of interest to the majority of readers - no easy task! If I don't have contributions in the way of ads, articles and photos, then A.R.C. can not live up to its image of a quality publication, and will deteriorate over a period of time. I have put countless hours and thousands of dollars of my own money in getting A.R.C. off the ground. I am determined to make A.R.C. the largest and best publication in the hobby, however it is now your turn to support it! Depending upon the the other person to due the supporting of A.R.C. won't work - its because that other person is **YOU**. Don't let the quality of A.R.C. suffer, with your support A.R.C. can grow into something we all can look forward to each month. The "Photo Review" column is liked by many, but I have exhausted my file of photos. We all have radios and other related items in our collections and I would assume we all have cameras, so there is no reason why we couldn't make this a monthly column. The next year of publishing of A.R.C. is dependent upon all subscribers to support it in one way or another, even in the aspects of classified ads. Above all, in order to make A.R.C. the biggest and best publication on a "national basis", I am personally asking each subscriber to get one of your collector friends to subscribe. Will A.R.C. continue to be a innovative and informative publication for all those in the hobby on a "national basis"? The answer is up to you! (Gary B. Schneider)

RECEIVING COMPLAINTS about those advertisers who are running WANTED ads and fail to answer letters they may receive concerning their ad. It is common courtesy that if you request information or items, that you at least acknowledge receipt of the letter even if you have found what you were requesting. I **strongly uphold** this view, and will terminate your subscription if too many complaints are received.

COMING EVENTS...

PUGET SOUND ANTIQUE RADIO ASSOCIATION - Third annual invitational swap meet and contest, Sunday, August 18th. Held at the Ronald Schoolhouse, 175th and Aurora, Seattle, Washington. A parking lot swap session will begin in the morning followed by a contest in the afternoon. ANTIQUE RADIO CLASSIFIED

Publishing Details

Antique Radio Classified (USPS 735-090) is published monthly, 12 times yearly, at a subscription rate of \$15.00 per year by G.B.S. Enterprises, 9511 Sunrise Blvd., #J-23, Cleveland, Ohio 44133, (216) 582-3094.

Second-class postage paid at Cleveland, OH.

Publisher and Editor - Gary B. Schneider.

POSTMASTER: Send address changes to address above. Antique Radio Classified - Copyright 1985.

Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format.

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

Subscription Rate

Subscriptions are available on a yearly basis. \$15.00 per year. Sample issues: \$1.50.

Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

TELL YOUR FRIENDS TO PLUG INTO AN A.R.C. SUBSCRIPTION

CORRESPONDENCE

This issue marks the end of our first full year of publishing Antique Radio Classified. From over a year ago with zero subscribers to the now largest independent publication of its type, A.R.C. has grown rapidly. Although the number of subscribers is favorable, this is but a small percentage of those who have some type of interest in the old radio hobby. The whole concept of a "national" publication for the hobby has much work to be done if this goal is to be realized. I know of many, many collectors who are active in the hobby, but for some reason have no interest in participating in any of the many clubs or publications available for them. However, as word is spreading that A.R.C. is a viable and useful publication, these "die-hards" are finally starting to take a more active interest in the hobby. It is our hope to increase our subscriptions substantially during the next year, but this can not happen unless our present subscribers spread the word about A.R.C. The increase in subscribers will benefit all with increased response to your classified ads, and more contributions in the way of articles and photos. A basic fact to remember is that the response to any ad you place is proportional to the number of people reading it! For example... if you are looking for a certain part for a radio, there is more of a chance you will get a response if 2000 people see your ad, instead of 100 or 1000. With these benefits in mind, it will behoove all of us to keep letting other collectors know of the existence of A.R.C., and the goals of a united publication "for buyers and sellers" in the radio hobby. With your help this can become a reality!

Perhaps one of the biggest complaints we receive, actually the only one, is the problem of mail delivery. It is understandable why everyone would like to have their copy of A.R.C. as soon as the others get theirs. With a limited amount of items available to buy, it is sure a disappointment to hear the words "sold" when you call or write for an item. Hopefully by now most of you should have seen some improvement in receiving your monthly issue. It has taken us time to get "a feel" of how long it takes for A.R.C. to reach the subscribers all over the country. Many people on the west coast feel they are the last to receive their issues. This is not true! When problems do occur, they are not regional and can effect any part of the country. It is not feasible for everyone to receive their copy on the same day or two. **No matter** what method is used to mail a publication, there is always going to be someone who gets theirs first. To be fair to everyone, A.R.C. will not offer First Class mail as an option at present. There are many reasons why not, many not apparent to the casual observer and many that would not be understood unless you were in my position. Perhaps when A.R.C. can be financially stable, we could offer first class mail as an option. I am open to suggestions and comments you may have concerning mail delivery problems, or any other topic.

We are pleased to announce that coming in the Fall we will be doing a "Photo Review" on the Atwater Kent breadboard line of radios. There is much interest in this area and one that needs more documentation about it. This will help assist the collector to identify the countless variations of the models 9, 10 and 12 breadboard radios. This column will be written by the well known expert on Atwater Kent, Mr. Ralph Williams. Collectors will find Ralph's expertise on this subject most valuable and informative. We should all be thankful that Ralph has agreed to tackle this tough job. Look for the first installment October or November.

TIDBITS: Just returned from the A.R.C.A. meet in Buffalo, New York. The meet was in a beautiful location with the weather perfect for the entire three days. The turnout was below normal, however for those in attendance it was a nice time to meet fellow collectors and perhaps pick up a few items in the flea market. It has been announced that the next A.R.C.A. convention will be in Louisville, Kentucky in June of 1986. . . Don't forget about the big A.R.C.I. "Radiofest '85" coming up this August in Rockford, Illinois. See details in this issue. Still working on the soon-to-be published list of all the antique radio clubs in the U.S. Unfortunately some of the clubs have not responded to my request for latest information about their club. I guess they have no interest in being listed! It is hoped they will take advantage of this free exposure. . . If you haven't seen *Popular Communications* magazine lately, you may want to check it out. They have been having some interesting articles related to the old days of radio in each issue. . . In the September issue of A.R.C. we will be featuring an article by Mel Rosenthal describing his collection of "suit case" radios. Most interesting and complete with photos of many of his sets - don't miss it. Good collecting - GBS.

OLDE TYME RADIO CO.

Need hard to find Olde Tyme Radio parts such as:

- Vintage Tubes
- AK Style Battery Cable
- Olde Tyme Hookup Wire
- Brown Silk Type Power Cord
- Audio Transformers
- Power Transformers
- Headphones
- Headphones & Speaker Cords
- ANT. RF. OSC. IF Coils
- Speaker Grill Cloth
- Pilot Lamps
- XTAL Set Parts

Also can provide reprints of the following Olde Tyme Radio publications:

- Atwater Kent Instructors Manual
- Atwater Kent Equipment Catalog
- Radiola IIIA Manual

And much, much more. also as a convenience to you, we can even provide copies of those ever popular books "Vintage Radio & Flick of the Switch" in soft covers. Schematics of many radios and TV sets are also available. For free flyer send SASE to Olde Tyme Radio Company, 2445 Lyttonville Road, Silver Spring, MD 20910.

Wish to reach us by phone? The number is 301-585-8776. Please call between 7:00 and 11:30 p.m. local time.

This issue marks the end of our first full year of publishing *Antique Radio Classified*. From over a year ago with zero subscribers to the now largest independent publication of its type, A.R.C. has grown rapidly. Although the number of subscribers is favorable, this is but a small percentage of those who have some type of interest in the old radio hobby. The whole concept of a "national" publication for the hobby has much work to be done if this goal is to be realized. I know of many, many collectors who are active in the hobby, but for some reason have no interest in participating in any of the many clubs or publications available for them. However, as word is spreading that A.R.C. is a viable and useful publication, these "die-hards" are finally starting to take a more active interest in the hobby. It is our hope to increase our subscriptions substantially during the next year, but this can not happen unless our present subscribers spread the word about A.R.C. The increase in subscribers will benefit all with increased response to your classified ads, and more contributions in the way of articles and photos. A basic fact to remember is that the response to any ad you place is proportional to the number of people reading it! For example... if you are looking for a certain part for a radio, there is more of a chance you will get a response if 2000 people see your ad, instead of 100 or 1000. With these benefits in mind, it will behoove all of us to keep letting other collectors know of the existence of A.R.C., and the goals of a united publication "for buyers and sellers" in the radio hobby. With your help this can become a reality!

Perhaps one of the biggest complaints we receive, actually the only one, is the problem of mail delivery. It is understandable why everyone would like to have their copy of A.R.C. as soon as the others get theirs. With a limited amount of items available to buy, it is sure a disappointment to hear the words "sold" when you call or write for an item. Hopefully by now most of you should have seen some improvement in receiving your monthly issue. It has taken us time to get "a feel" of how long it takes for A.R.C. to reach the subscribers all over the country. Many people on the west coast feel they are the last to receive their issues. This is not true! When problems do occur, they are not regional and can effect any part of the country. It is not feasible for everyone to receive their copy on the same day or two. **No matter** what method is used to mail a publication, there is always going to be someone who gets theirs first. To be fair to everyone, A.R.C. will not offer First Class mail as an option at present. There are many reasons why not, many not apparent to the casual observer and many that would not be understood unless you were in my position. Perhaps when A.R.C. can be financially stable, we could offer first class mail as an option. I am open to suggestions and comments you may have concerning mail delivery problems, or any other topic.

We are pleased to announce that coming in the Fall we will be doing a "Photo Review" on the Atwater Kent breadboard line of radios. There is much interest in this area and one that needs more documentation about it. This will help assist the collector to identify the countless variations of the models 9, 10 and 12 breadboard radios. This column will be written by the well known expert on Atwater Kent, Mr. Ralph Williams. Collectors will find Ralph's expertise on this subject most valuable and informative. We should all be thankful that Ralph has agreed to tackle this tough job. Look for the first installment October or November.

TIDBITS: Just returned from the A.R.C.A. meet in Buffalo, New York. The meet was in a beautiful location with the weather perfect for the entire three days. The turnout was below normal, however for those in attendance it was a nice time to meet fellow collectors and perhaps pick up a few items in the flea market. It has been announced that the next A.R.C.A. convention will be in Louisville, Kentucky in June of 1986. . . Don't forget about the big A.R.C.I. "Radiofest '85" coming up this August in Rockford, Illinois. See details in this issue. Still working on the soon-to-be published list of all the antique radio clubs in the U.S. Unfortunately some of the clubs have not responded to my request for latest information about their club. I guess they have no interest in being listed! It is hoped they will take advantage of this free exposure. . . If you haven't seen *Popular Communications* magazine lately, you may want to check it out. They have been having some interesting articles related to the old days of radio in each issue. . . In the September issue of A.R.C. we will be featuring an article by Mel Rosenthal describing his collection of "suit case" radios. Most interesting and complete with photos of many of his sets - don't miss it. Good collecting - GBS.

COLLECTORS CORNER

CONTRIBUTED BY: FRANK HEATHCOTE, 1235 N. 3RD ST., LOGANSPOET, IN

The Transformer Corporation of America came on like gangbusters when they entered the radio manufacturing field in 1930 with their line of Clarion radios. Prior to that, they were well known in the radio industry as a manufacturer of iron core transformers and chokes, speakers, and power packs. TCA claimed, in a four page ad, in the June 1930 Radio Retailing Magazine, to have "perhaps the most modern radio plant in the world, where every part that goes into Clarion radios were fabricated from the raw material, finished, and assembled." It was located at Ogden and Keller Avenues in Chicago, Illinois.

TCA's president, Ross Siragusa saw to it that Clarion kept a high profile in the various retail magazines. Nearly every issue had photos of various personalities visiting the plant, Clarions's spiffy delivery trucks, or a Clarion display at some overseas trade show. Clarions were good sellers throughout Latin America and in the smaller countries of Europe.

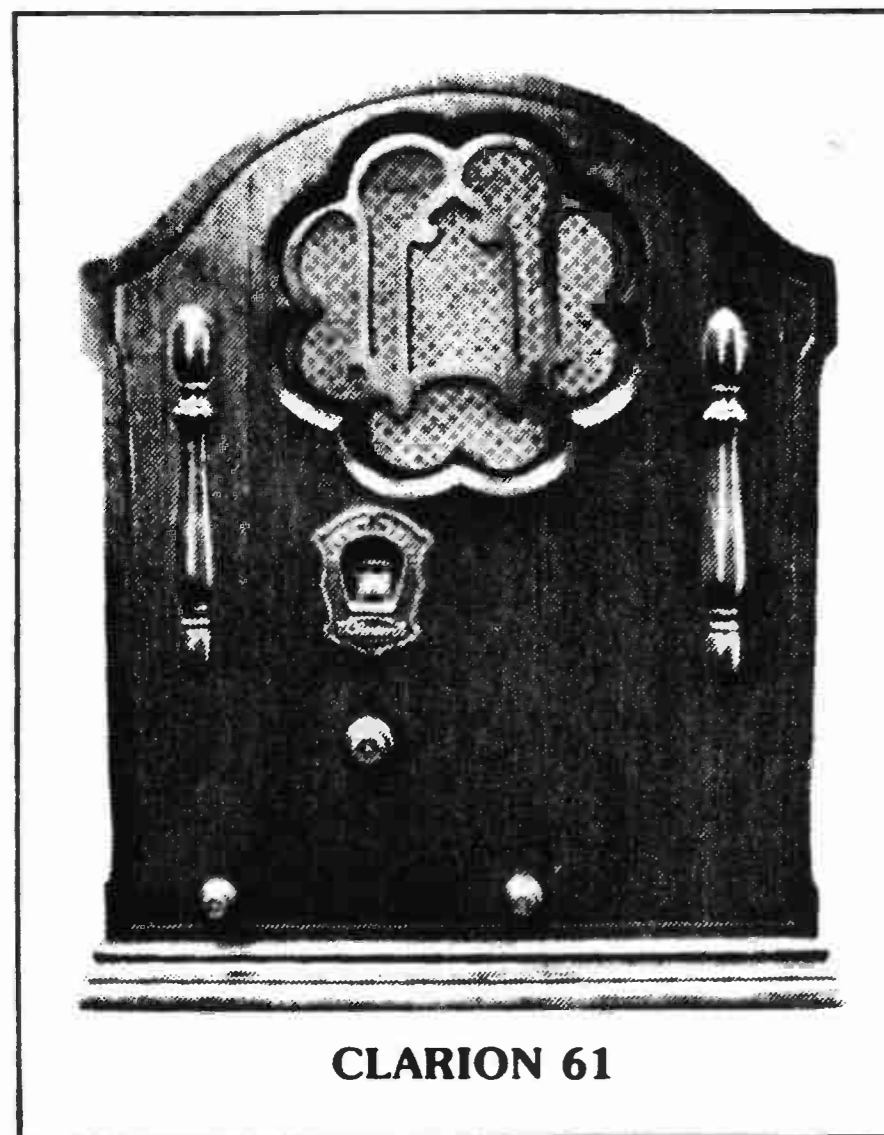

Our featured set is the Model AC61, a six tube set introduced in January of 1931 selling for \$67.50, tubes included. It stands 19¾ inches tall, 15 inches wide, and 17 inches deep, weighing 35 pounds. A TRF circuit is used with type 24 tubes used in the two RF stages. Another 24 functions as detector being transformer coupled to push-pull 45's in the output stage. An 80 rectifier provides DC well filtered by two chokes employed as voltage dividers. The speaker field coil is used to provide bias voltage to the AF tubes. Volume is controlled by increasing bias on the RF and detector tubes and by shorting out the input signal at the antenna.

The early Clarion mantel sets are easily recognized by the asymmetrical placement of the controls and tuning dials. The cabinet designs are also quite distinctive. The chassis is very well built, Clarion called it "battleship construction". All tubes are shielded as are the antenna and RF coils. A bulkhead underneath the chassis separates the RF and AF circuitry while providing additional shielding and strength to the chassis.

The Clarion AC61 is a good performer, very sensitive, and the tuned filters help to provide excellent fidelity. However, the interstage transformer is specially designed for this set since the push/pull output stage is coupled to a 24 rather than a 27 detector which was the common practice. Use of another mars reproduction to a great extent. Another problem is the use of a potted filter unit. The two chokes and seven capacitors are in a single container and replacement is rather difficult.

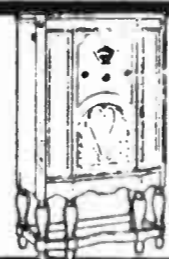

Clarion continued making radios until at least 1946 although the company was sold and moved to New York City in 1933. The Clarion name can still be found on radios but unfortunately, as with so much else, the Company is Japanese.

Next month a high quality mantel radio from England, the Marconiphone 42, Moving Coil Transportable III of 1931, will be featured.

CLARION 61

The Collectors Corner will appear as a regular feature of Antique Radio Classified. It is an attempt to build knowledge and interest of radio collectors primarily in AC home receivers of the late 1920's to the 1940's, with emphasis on the lesser known and more unusual styles and brands. Helpful restoration hints will be given where possible. Any questions, comments, or suggestions on this column, the radios featured, or on any other radios may be sent to Frank Heathcote, 1235 N. 3rd St., Logansport, Indiana 46947. Please include a self-addressed stamped envelope for reply.

WITH THE COLLECTORS

CONSOLE RADIOS - AN INEXPENSIVE COLLECTABLE

Collecting and restoring old radios is one of the finest hobbies that I have known and one that has attracted many new people in the recent years. It can be expensive or it can be reasonable whichever one wishes to make it. The satisfaction of finding a restorable set and the challenge to make it presentable again in appearance and to repair it to playing condition is fascinating.

We are always looking for something old and rare in radios and in this search there are still interesting sets to be found, even though they are getting scarce. The search, however, does not have to end with them. There are many fine old consoles to be found that can make good restoration projects, their disadvantage of course is in the storage space that they require.

I have had gratifying results in restoring two RCA's, one Zenith, one Trutone, one Philco, and one Atwater Kent, models ranging from 1929 through 1938, all consoles. They all turned out to be very fine playing sets as well as having nice looking cabinets.

The one that I especially like to show off is the Atwater Kent Model 60, 1929 Vintage. I found it in a flea market in a very bad state of repair. I knew that with enough patience, it could be restored because everything was there in it's original state.

I started on the chassis first, after a thorough cleaning, I got down to making it play. A contact arm was missing in the antenna selector switch, which wasn't too much trouble to make and install. The tuning drive required some work, a grid cap was missing on one of the old 24 RF tubes and had to be replaced, resoldering a connection under the chassis and some repair to the speaker cone completed the chassis restoration. I used a variac and gradually brought the voltage up to where the stations started coming in and was amazed at its sensitivity and selectivity, even though it is a TRF set.

The cabinet had to be clamped and reglued in several places. The walnut veneer had to be replaced on top and a busted grill replaced in front of the speaker. I stripped the old finish and used a light stain to blend the old and new veneer, then hand rubbed seven coats of brown Kiwi shoe polish into the finish. After replacing the grill cloth, I installed the chassis and speaker and am very pleased with the whole thing, especially the tonal quality.

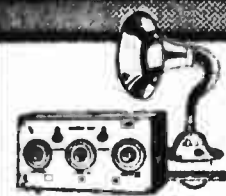

If you don't have the space to store or display these old consoles, there is just as much kick in fixing up an old cathedral or tombstone or even an AC-DC table model, if it strikes your fancy.

There are many things to take into consideration in restoring old sets. We should never alter the circuitry to improve it's design, after all it probably reflected the latest in the state of the art in it's day making it a fine receiver and even one not to be scoffed at by today's standards, if we get it working properly.

So when we find the set and dig the parts out of the old junk box or wherever and finally get it to playing and looking good, if its not antique, its collectable by our standards at least. Today's collectables are tomorrow's antiques. *So why not be proud of it!...* M.B. Gaskins, P.O. Box 66, Campbellsville, KY 42718

ATWATER KENT 60

COLLECTORS VALUE GUIDE

CONTRIBUTED BY: JAMES KREUZER, 257 HASTINGS, BUFFALO, NY 14215

This "Value Guide" is an attempt to establish a relative value of many of the more common radios of the 1920's. The values expressed are the result of past market trends as indicated in recent auctions, flea market sales, sales by individual collectors, as well as information provided by other established collectors in the hobby. The factors affecting a value of a radio are many. One must consider the more obvious factors, such as condition of the radio, whether it is complete with tubes, in working condition, originality, age, rarity and etc. Other factors contributing to value include collector demand, collecting specialties (such as collecting wireless items, crystal sets, etc.), and geographic area. Thus when using this guide, you must consider these multitude of factors when valuating your radio. Of course the final value in the end, is the price another person is willing to pay for an item. Any questions in regards to this column, information about other radios not listed, comments, or suggestions should be sent to James Kreuzer with a SASE for reply.

Questions from Readers: I have enjoyed your column, "Collectors Value Guide", in Antique Radio Classified. Having been a collector for about twenty years, I can see the need for this type of information. Keep up the good work.

Could you please advise me or recommend someone that would appraise a 1936 Scott Full Range High Fidelity 23 tube floor model radio. I think this model is called "Napier". The chassis is chrome plated and contains no cover. The chassis sits on top of a wooden base which contains the audio section, power supply and speaker. It is in excellent condition and played beautifully the last time it was on - Don.

Answer: The radio you described is a very beautiful model in the Art-Deco style. Because of this, there is much demand for this receiver, in perfect condition, price this gem at \$800 - Jim.

CRYSTAL SET REVIEW

CONTRIBUTED BY: MIKE FEHER, 9100 TRAVELLER ST. MANASSAS, VA 22110

One of the more interesting collectables in the radio collecting hobby is the crystal set. Many manufacturers made these sets in countless shapes, styles and variations. It is the intent of this column to present in pictorial form many of these crystal sets and to add further documentation to the little that is currently available. Collectors are encouraged to submit B&W photos and descriptions of crystal sets in their collection. (GBS)

PANDORA CRYSTAL SET: Both sets pictured are supposedly Pandoras. The set pictured in Fig. 1 is like the one in *Vintage Radio* for which a 1922 date is given. The advertisement shown in Fig. 3 came from a 1932 catalog of the American Sales company located in New York city. I really wonder if a set such as the Pandora had a longevity lasting over 10 years. Although with variations the Philmores lasted even longer. The Pandora in Fig. 1 is red in color and has a base diameter of 4.83 inches. The coil form is 2.83 inches tall and as can be seen in the photo, tuning is accomplished by a slider. Like most simpler sets of that era, resonance is a function of the slider position for the inductance and the distributed capacitance of the coil. I assume that the set shown in Fig. 2 is also a Pandora, however I have no documentation to back that up. It is very similar to the other set and everyone that has seen it has commented to the effect that it is a Pandora (comments through the mail are always welcomed). This set has a smaller base as it is only 3.75 inches in diameter. The coil form is 3 inches and the form diameter is 2.5 inches like on the other set. Another interesting difference is the fact that on the one in Fig. 2, the coil form is not mounted directly to the base, but it is raised about 1 inch. This set is gold in color. Like the advertising states, these sets came in various colors. All in all, the Pandora is a fairly scarce set as I do not recall ever seeing one for sale at any of the radio meets I have attended over the years. (Mike Feher, Manassas, VA)

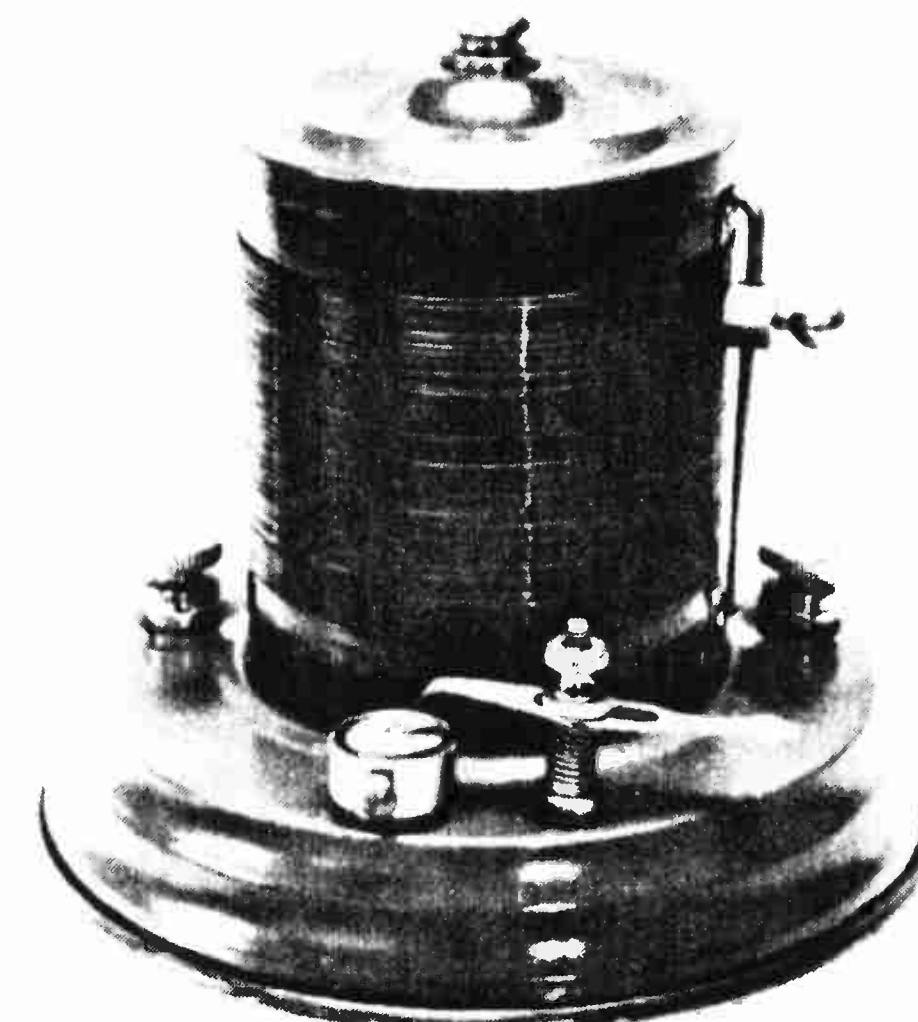

FIG.1 PANDORA CRYSTAL SET

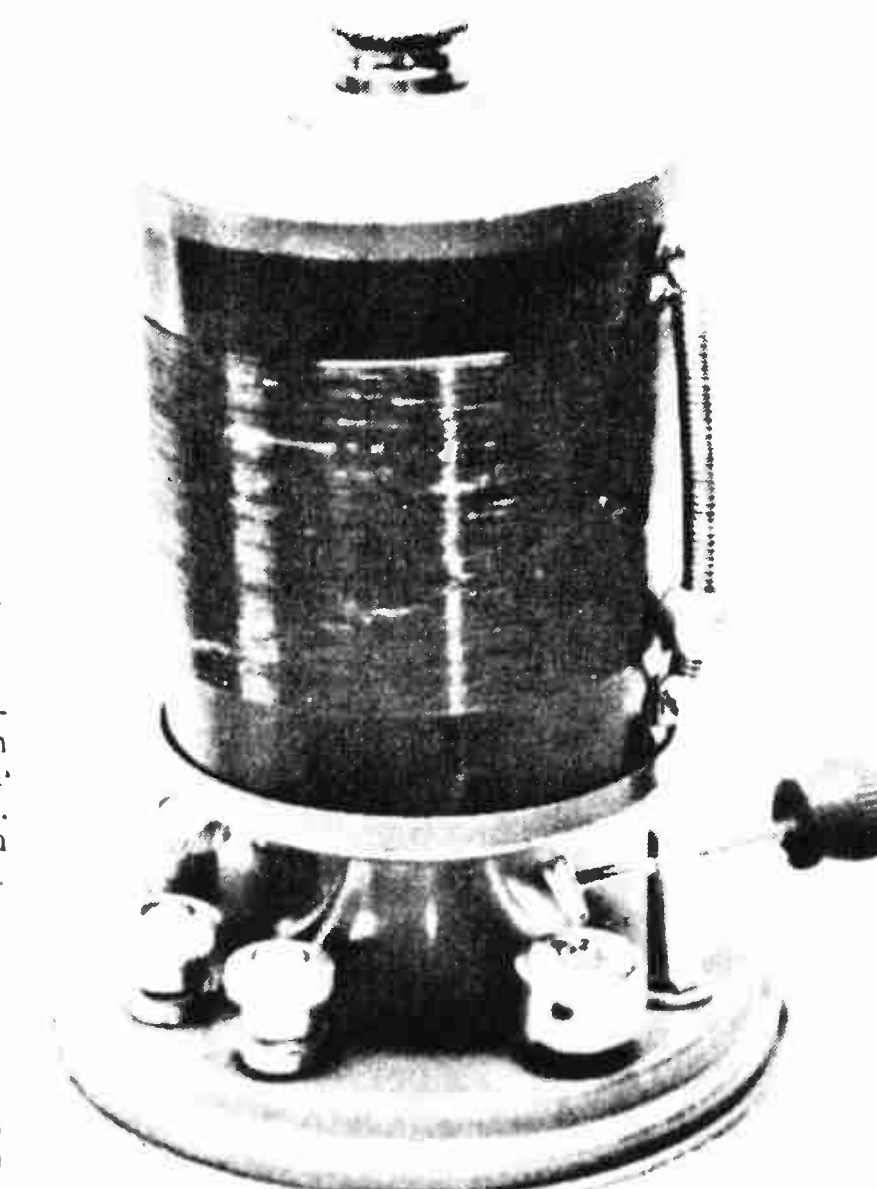

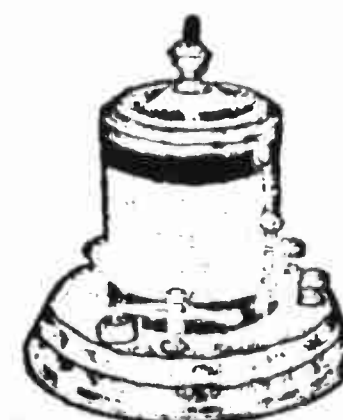

FIG. 2

Pandora Crystal Set

Selective. Very efficient. Receives loud and clear when operated within twenty-five miles of broadcasting stations. Metal beautifully enameled in various colors. With crystal.

\$1.15

Cat. No. E-6?

Complete with Head Phones and Antenna equipment, ready to operate. Cat. No. E-62C

\$2.65

FIG. 3

RADIO MEET REPORT

Report of the A.R.C.A./N.F.W.A. meet, June 5th thru 8th, at Buffalo, New York. Reported by Felicia Kreuzer, Secretary of the N.F.W.A.

If we had ordered the weather for the A.R.C.A. - N.F.W.A. meet this past June, it couldn't have been better. The Flea Market on Wednesday started off about 9:00 AM with the usual early birds showing up early to see what was available. Some of the items that turned up included a number of British crystal sets, along with some Canadian Marconi sets and other unusual radios. Many collectors picked up some nice items including Paul Giganti, who flew in from California. The gathering was varied with collectors from nearby Buffalo and as far away as Hawaii and Japan.

Among activities was the Power Project tour conducted by Art Albion. This tour showed the large power generating system near Niagara Falls, and was enjoyed by many. The ladies were also very well entertained with shopping sprees and sightseeing at the "falls" and nearby areas. The wine and chesse party hosted by the Empire of America bank was great. At the bank was a large display of early radios and wireless gear. Besides being able to view this great display, many took advantage of the banks hospitality and munched and sipped to their hearts content.

The contest was filled with a number of excellent of excellent entries, with the Best of Show going to Ralph Muchow for his Atwater Kent advertising display. Saturday was dominated by the auction, which sold some very interesting sets including a British crystal set, Crosley Pup and others. Larry Babcock gave a wonderful talk on early radios developed in the Niagara Frontier area. It was a superb presentation and enjoyed by all - Great work Larry!

And last but not least, was the banquet. It gave Jim Troe, President of A.R.C.A., the opportunity to speak and Ralph Williams to give a few "pats on the back". The guest speaker, Mr. John Larkin III, gave a fine talk on his early radio experiences and how it "grew on him".

Now that we have relaxed somewhat, and can say "whew", I am glad it is over, we can also say it was a very nice meet with the weather just perfect. About the only problem we had was the error in delivering the potato chips for the hospitality room. Instead of 5 cases we got 50

cases, just a little over 1000 bags. It was quite a scene to see all those chips stacked along the walls of the room. Perhaps we should have put knobs and dials on the boxes and made them look like radios! Oh well, we all got a big laugh out of it. The only regrets were the lack of attendance at the meet by the many collectors in the surrounding areas. Please give your support to the radio meets so we can continue the interest in our unique hobby. It is the enthusiasm of everyone that keeps the radio hobby and its preservation together. (Felicia Kreuzer)

Looks like a new car has pulled into the flea market! I guess it pays "to be up front" where the action is.

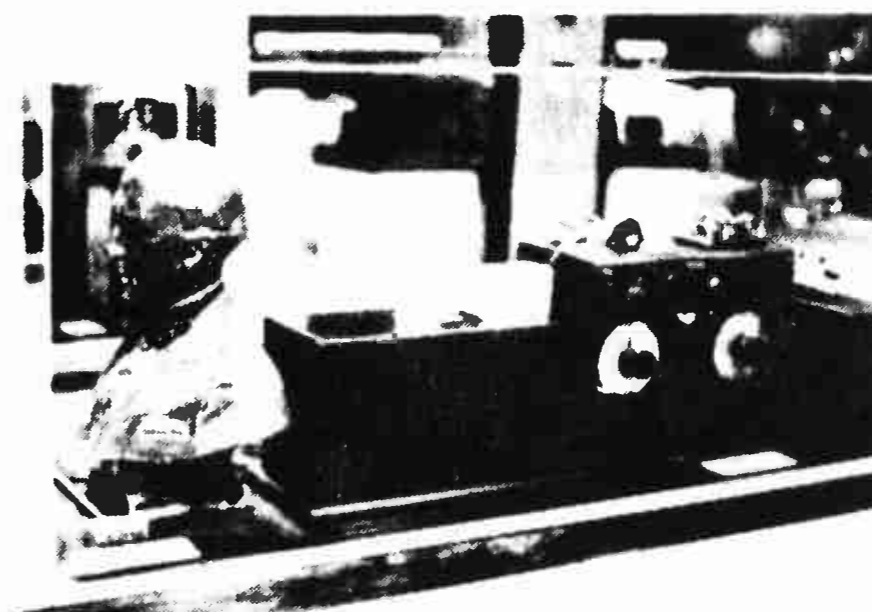

Contest view of Atwater Kent advertising items owned by Ralph Muchow of Elgin, Illinois.

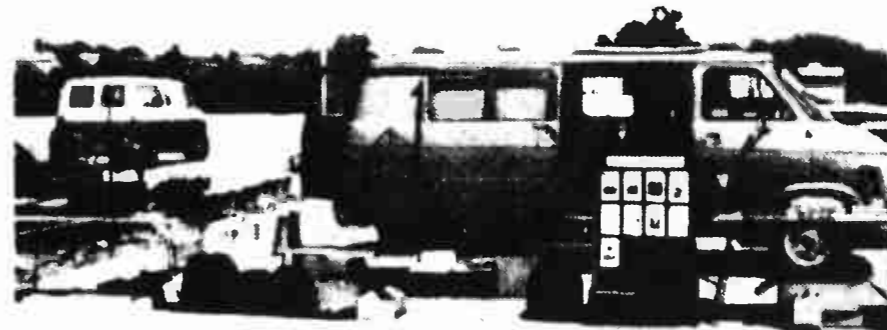

RADIO MEET REPORT

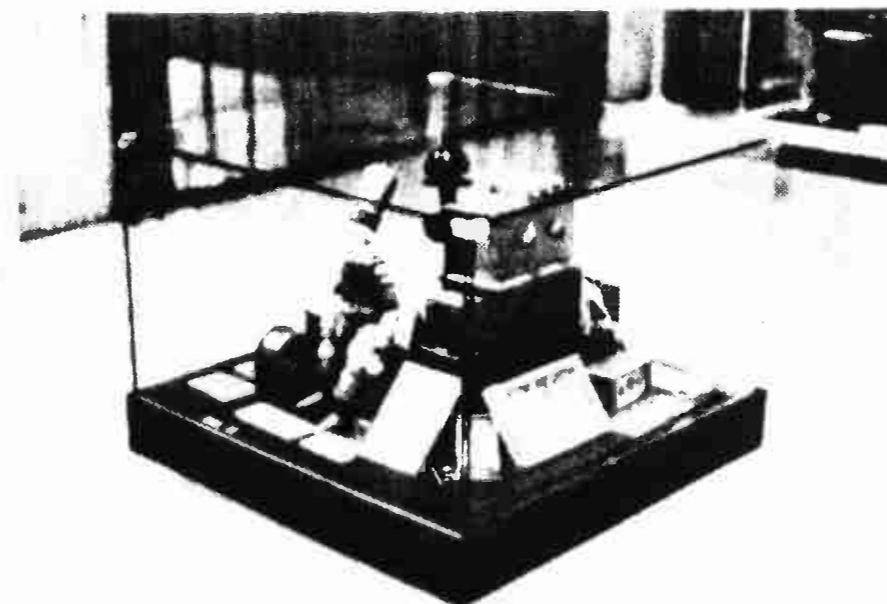

A new collector from Florida made a trip up north to buy a AK breadboard. He got a nice model 10 (green cans) for only \$325.

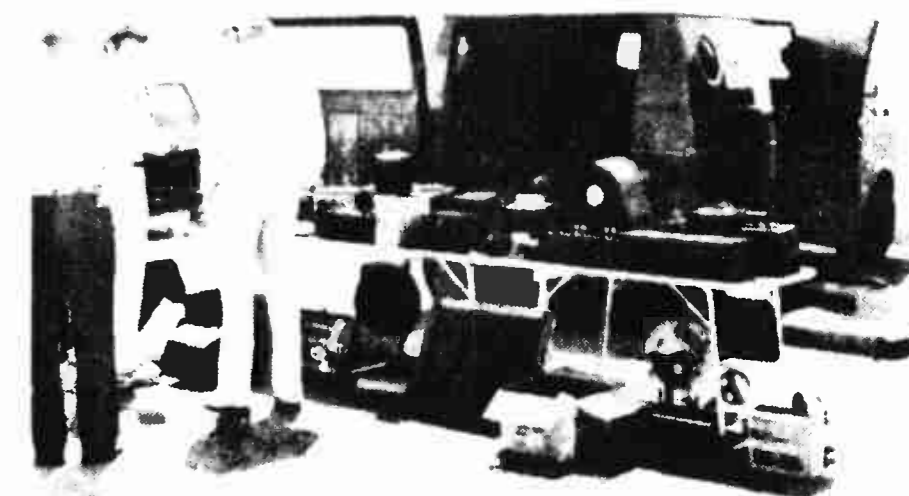

Display of Marconi equipment at the bank display including a unique bust of Marconi himself.

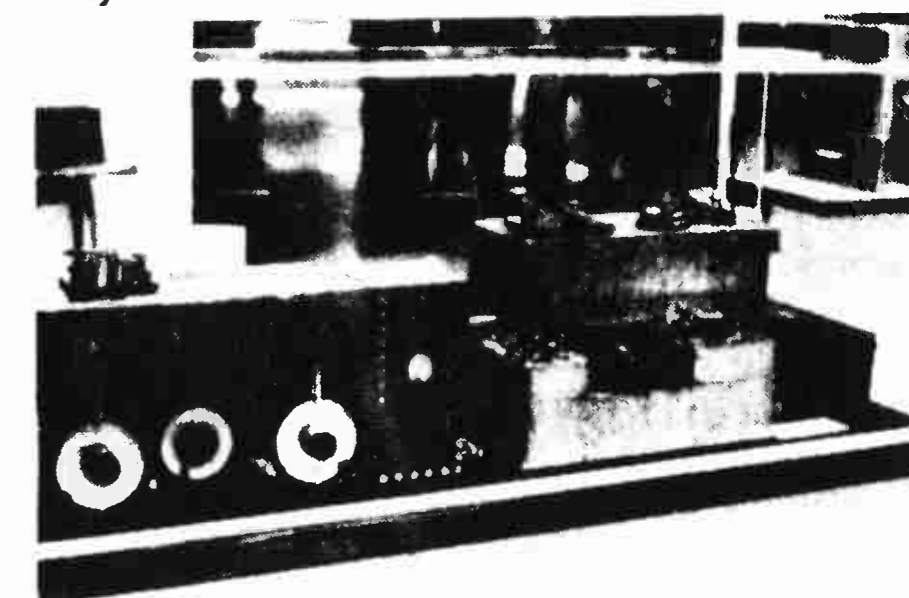

View of an assortment of radios and parts by Gary Schneider of A.R.C.

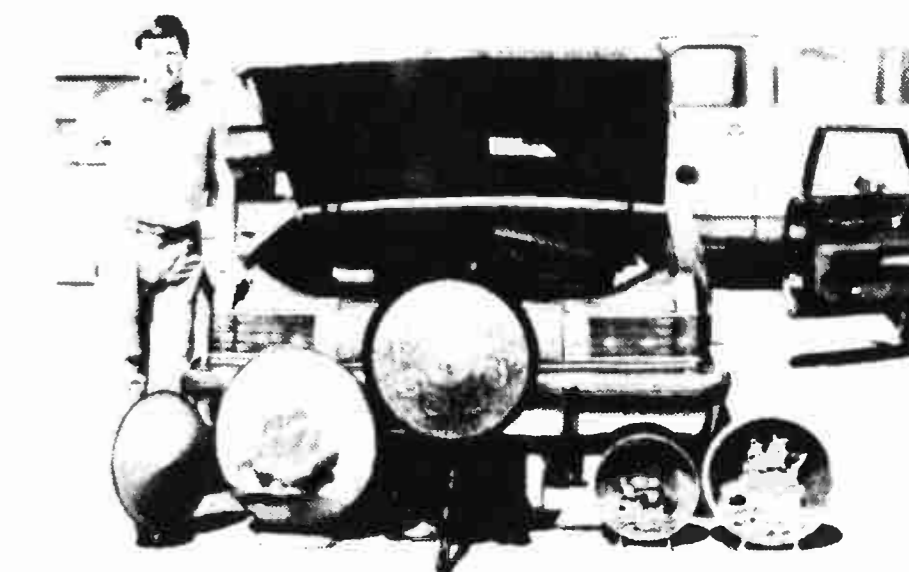

Another view of bank display showing some radio related novelties such as toys, games, puzzles and a RCA Radiotron advertising doll. 9

Flea market scene showing radios for sale as bought by Bruce Mager of "Waves" in New York city.

More Marconi equipment in the Empire of America bank display. Looks like an IP-76 in there on the right side.

Randal Renne of Illinois displaying some of his beautiful cone speakers.

Eager buyers in the flea market! No, it is actually a partial view of the huge Dayton Hamfest this past April.
