JANUARY 1997

NUMBER 1

off to a
FLYING START

for **1930**

A.R.C. — THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS — PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, One River Road, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (508) 371-0512, 8:30 AM to 6:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$38.95 by Periodicals mail and \$55.95 by First Class mail.

Annual foreign rates. By air: Canada - \$59.00; Mexico - \$65.00; Other foreign countries - \$100.00. Surface mail: Canada - \$49.00; Other foreign countries - \$55.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Special issues are available free on request.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

STAFF:

Publisher and Editor: John V. Terrey
Production Manager: Scott J. Young
Office Manager: Lisa A. Friedrichs
Advertising Manager: Cindie P. Bryan
Managing Editor: Dorothy Schecter
Radio Events Editor: Chris Frederickson
Publishing & Editorial Staff: Ray Bintliff, Dave Crocker, Dick Desjarlais, Bobby Lyman, Jean Melendonian
Founding Publisher/Editor: Gary B. Schneider
Contributing Writers: Mike Adams, Richard L. Arnold, Ray Bintliff, Ron Boucher, Paul J. Bourhin, Norman S. Braithwaite, Dave Crocker, Alan S. Douglass, Richard C. Foster, Fred Geer, Jim Kreuzer, Ron Ramirez, Henry Rogers, Ian L. Sanders, Gary B. Schneider, Daniel Schoo, Dwane Stevens, Frank R. White, Ralph Williams

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, Federal, etc. items to street address: One River Road.

Telephone: (508) 371-0512; Fax: (508) 371-7129

E-mail: ARCMagazine@aol.com — Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. A.R.C. assumes that permission is given to edit and to publish all correspondence and articles received unless otherwise indicated.

DISPLAY AND BUSINESS CARD ADS — DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Since artwork is reduced to 63% in the printing process, originals must be the artwork size listed below. Do not send in artwork on art board or send negatives. Ads should be typeset or typed neatly with a carbon ribbon, black ink (not pencil) on white. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Photos should be at an 85-line screen; otherwise, add \$15.00 per photo for screening. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request. Unless prior arrangements are made, all submitted materials may be edited, become the property of Antique Radio Classified and will not be returned. Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Preparing the January issue gives the A.R.C. staff the inevitable sense of being caught between moments in time — the climax of the old year in holiday festivities and the excitement of the New Year reflected in the theme on our cover. A.R.C. is "Off to a Flying Start" for 1997, and we intend to do all that we can to ensure that the good times continue for the radio collecting community.

British collector Enrico Tedeschi has solved the problem of collecting American radios from across the Atlantic by focusing on the small ones — transistor radios. In this issue, he shares his thoughts about how to get started in collecting transistor radios and even proposes a list of sets for a "meaningful basic collection." No doubt his list will spark discussion, especially if your favorite is not on the list. We look forward to your contributions on the subject of this newest collecting interest.

We are all fortunate that Bennett Cane had the foresight to document with photos the restoration of his Zenith Trans-Oceanic 8G005Y. In his article, he details how to remove and recover the fabric on the case of an old Trans-Oceanic, showing how much fun and how satisfying it can be to bring a worn set back to life.

Two other articles related to Trans-Oceanic restoration are featured this month. Melvin George and Fred Gordon each were challenged with finding a replacement for the elusive and expensive 1L6 tube. Two different solutions are offered: George substitutes a 1R5 for the 1L6 (needed pin modifications are shown), and Gordon substitutes, with an adapter, a 1LA6 loktol tube for the miniature 1L6. Hopefully, these three articles will result in many more restored Trans-Oceanics out there.

Reports on the Vintage Radio & Phonograph Society's (VRPS) 1996 Convention and Auction and on the Estes Vintage Radio Auction are included this month. Nearly \$100,000 was bid at these two auctions on more than 1,000 items. Combined attendance was over 600.

The VRPS meet is one where you can sleep late — two days of auctions deal with the "good stuff" well before the scheduled brief Sunday morning flea market. Other activities fill out the event — seminars, a banquet and a contest. Interest in this meet is growing, as several fellow New Englanders traveled the distance to enjoy a great several days.

When items spark little interest, bargains can be found at auctions, much to the chagrin of sellers. At the other extreme, a buyer who cannot do without a particular radio is guaranteed ownership, if his pockets are deep enough. At an auction, everyone has an equal chance, and you

don't have to be at the flea market at dawn to come away happy.

Richard Estes continues to have success with his series of Vintage Radio Auctions. Although he may never again experience an auction like last year's \$590,693 Ford Museum Auction, sales for his November auction totaled over \$50,000. Catalin radios drew the top prices. Although Atwater Kent breadboard prices seemed soft, the prices reflected less-than-desired conditions.

Photo Review displays an interesting Telefunken 1-tube receiver which looks surprisingly like a Crosley Pup. Other sets range from a novel way to display your vacuum tube collection to a photo of Atwater Kent's gigantic factory in Philadelphia, Pennsylvania. *Radio Miscellanea* continues the discussion of old radio stations, the Russian Red Star radio, A.R.C. on the Internet, the Minerva radio, and the usefulness of books for collectors.

Coming Radio Events. The New Year brings three dozen offerings for the radio collector in January. Notable are the month-long exhibit of transistor radios in Newton, Massachusetts, and the 3-day Mega Auction in Houston, Texas. Two events coming soon for A.R.C. are Radio XXVIII on February 23 in Westford, Massachusetts (attendance last year was over 900!), and the 2nd annual ski/radio meet at Mt. Crested Butte, Colorado, from February 26 to March 1. To help in our planning, notify us ASAP if you are interested in the Colorado meet.

I hope that one of your New Year's resolutions is to add at least one meet to your plans for 1997. Attending a meet is one of the best ways to learn more about old radios and their values, and to meet those collector friends whom you know only by telephone and mail.

Happy collecting in the New Year!

John V. Terrey, Editor

ON THE COVER

Our cover art was taken from an impressive 4-page advertisement for Cunningham radio tubes in the January 1930 issue of *Radio*. Superlatives like "A New High for the New Year" and "We forecast that 1930 like 1929 will be the biggest year in Cunningham Radio Tube sales" made us guess that Cunningham might have been one of many companies starting to "whistle in the dark" of the Great Depression. Our surmise proved true. Research indicates that tube sales for the industry dropped by 25%, and the number of radio set manufacturers dropped from 260 to 70 (data from *Radio Retailing*, March and November of 1930).

WITH THE COLLECTORS

Transistor Radios A Collector's Guide

BY ENRICO TEDESCHI

Collecting transistor radios is obviously not just a U.S. phenomenon. In this article, Enrico Tedeschi, a longtime European collector, shares his experience and advice with A.R.C. readers. A.R.C. joins in his enthusiasm and provides a source of buying and selling transistor, as well as all other types of radios dear to the hearts of collectors. (Editor)

So you want to become a transistor radio collector? Good. The first thing that you should do is to get some information. If you are going to collect seriously, you will want to know *what* to collect, *which* model was made by *which* manufacturer, *when* it was made and so on.

GET SOME INFORMATION

Your first move should be to go out and get some books, illustrated in Figure 1. If I could have only one book I would choose *The Collector's Guide to Transistor Radios* by Marty and Sue Bunis. The first edition of this book has some shortcomings, as it is very limited in listing and descriptions. In addition, the prices have all been superseded, and there are many mistakes. However, the second edition of this book came out in February 1996, and the photographs in this one are different from those in the previous book. So you will need both editions. [The second edition has been expanded to include additional radios and photographs. Values have been updated. Editor]

The next book to consider is *Transistor Radios, A Collector's Encyclopedia and Price Guide* by David and Robert Lane. Unlike the Bunis book in which all the photographs are in color, all the pictures in this book are in black and white. An exception is the four center pages in color, which round up all the best sets in the authors' collection. In this book the prices are approximate. I personally wish that the authors of this kind of book would stop quoting prices as they soon become obsolete.

A third book is *Poster's Radio and Television Price Guide, 1920-1990* by Harry Poster, which is more limited in transistor radios than the other two as

it also includes valve radios and television sets.

Made in Japan — by Handy, Erbe, Blackman and Antonier — is a beautiful book. It is a coffee table book with many astonishing color photographs (the best I have seen anywhere). Unfortunately, it does not contain any practical information on dates and models.

A very useful support in building your knowledge of historical transistor radios is the *Photo-fact Folders*, published in the late '50s and '60s by Howard W. Sams & Co. Inc. These Folders are part of the trade information sheets which include schematic diagrams and servicing information. What is good about them is that each radio is illustrated with a photograph, and for some sets, this is the only photo available in public print.

Finally, *The Portable Radio in American Life* by Michael Brian Schiffer is a very well written book with plenty of illustrations and sources of information.

Then there are the handy booklets by Eric Wrobbel, one of the most serious transistor radio collectors in the U.S.A. The first one is titled *The Regency Family* and is, of course, dedicated to the first transistor radio ever produced. The second one is *Sony Transistor Radios*, a sort of photographic catalogue of nearly all the collect-

Figure 1. Transistor radio reference books surrounding a Regency TR-1 transistor radio.

ible models, while the third one is *Collectible Transistor Radios from Toshiba and Trancel*. Wrobbel's latest booklets — *Collectible Transistor Radios from Reatone and SounDesign*, *Collectible Transistor Radios from Standard*, and *Collectible Transistor Radios from Global* are just

what their names imply. These booklets are produced cheaply (photocopied) and contain only very basic photos. Still, they are the only booklets that go into more detail than the more formal books.

JOIN A CLUB

Another way to get information is to join a club. Unfortunately, the only club in existence today is Transistor Network, which produces a monthly newsletter with the same name. Not surprisingly, this newsletter is published in the United States, since the transistor is an American invention, and more than half of the Japanese transistor radio production ended up in the U. S.

This newsletter is full of advertisements, and if you are looking for something in particular, it is bound to turn up sometime. Or you could put your "wanted" advertisement, which is free, in the magazine. The newsletter also deals with novelty radios.

TRANSISTOR RADIO MINI-HISTORY

Contrary to popular belief, transistor radio history begins in the U. S. The Japanese transistor radio sets, which all of us over age fifty have loved and bought, appeared only after the first American transistor radio — the Regency TR-1 — was put on the market just in time for the Christmas season of 1954. This was the result of a six months' crash project of a then relatively unknown firm called Texas Instruments. The TR-1 was manufactured in Indianapolis by a TV booster firm called I.D.E.A. Some representative American-made transistor radios are shown in Figure 2.

The TR-1 was the first portable pocket transistor radio ever made. It was available at first in a black, ivory, red or gray plastic cabinet at \$49.95, excluding the carrying case and the earphone. If you are serious about collecting transistor radios, you must have one.

The TR-1 was the first on the market, but not for long. The second transistor radio ever made was the Raytheon 8 TP-1, and it was put on the market in February 1955. This was a much larger, wooden-cased set,

(Continued on following page)

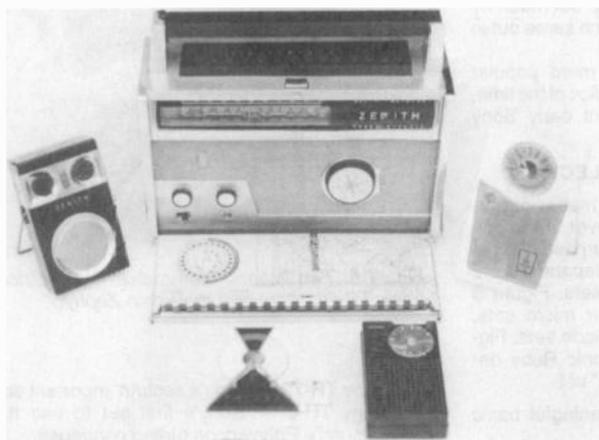

Figure 2. Representative American-made transistor radios shown clockwise from the top center: Zenith Royal 1000 Trans-Oceanic, Emerson 888, Regency TR-1, Philco T-7-126 and Zenith Royal 500.

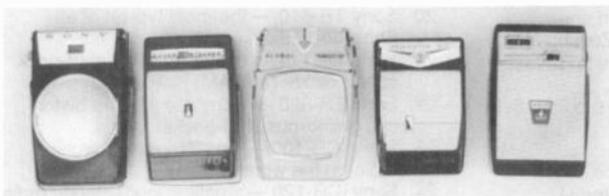

Figure 3. Popular Japanese shirt-pocket transistor radios shown left to right: Sony TR-610, Sanyo 6C-022, Global GR-711, Vista (Fleetwood) NTR-150, and Wilco 360.

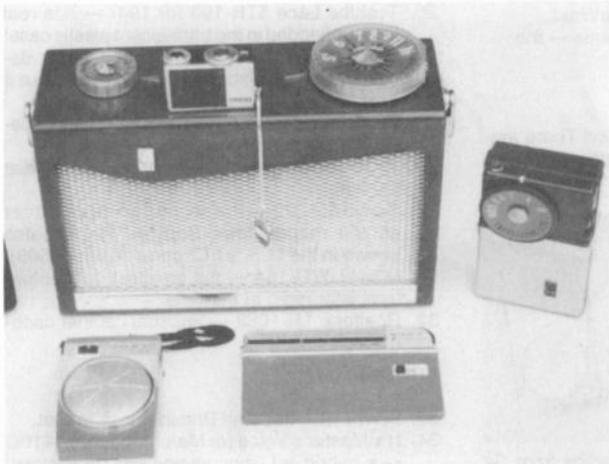

Figure 4. Early Sony transistor radios shown clockwise from the top: ICR-120 sitting on a TR-72, TR-63, TR-714 and TR-620.

(Transistor Radios, continued)

which cost a lot more but sounded a lot better.

In August 1955, the first Japanese transistor radio — the Sony TR-55 — was produced. (At the time, Sony was called Tokyo Tsushin Kogyo, Ltd.) This is a very difficult set to find as very few were made; also, it was sold only on the internal market. The first really "pocketable" set made by Sony in Japan was the TR-63, which came out in March 1957.

Figure 3 shows some of the more popular Japanese shirt-pocket transistor radios of the time, while Figure 4 displays significant early Sony models.

HOW TO BUILD YOUR COLLECTION

What to collect is, of course, a matter of personal taste and preference. However, if the collection has to have an historical purpose, it must consist of some American, many Japanese, and a few British, German, or other sets. Figure 5 gives examples of British Sinclair micro sets, while Figure 6 shows two Italian-made sets. Figure 7 shows some unusual Micronic Ruby designs and a delicate Toshiba "lace" set.

A list of what could be a meaningful basic collection follows:

AMERICAN

1. Regency TR-1 — the first one.
2. Raytheon 8TP-1 — the second one.
3. Zenith Royal 500 — the first Zenith.
4. Westinghouse H 602 P7 — the first Westinghouse.
5. Sylvania Thunderbird 3102 — the first Sylvania.
6. RCA K-701-A — the first RCA.
7. Philco T7-124 — the first Philco.
8. Motorola 56 T1 — the first Motorola.
9. General Electric 675 — the first GE.
10. Emerson 842 — the first Emerson.
11. Emerson 888 — the most popular Emerson.
12. Admiral 7L 12 — the first Admiral.
13. DeWald 7 BT 10 — the first DeWald.
14. Zenith Royal 1000 Trans-Oceanic — the first transistorized model.

JAPANESE

15. Sony TR-55 — You will be lucky! There are only a handful of known examples in collectors' hands today — Sony's first important

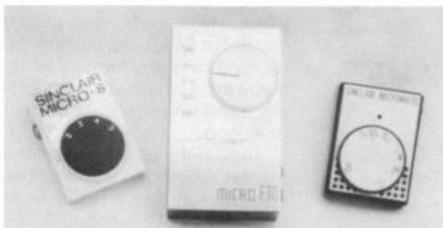

Figure 5. British transistor micro-radios from Sir Clive Sinclair, shown left to right: Micro-6, Micro-FM and Micromatic.

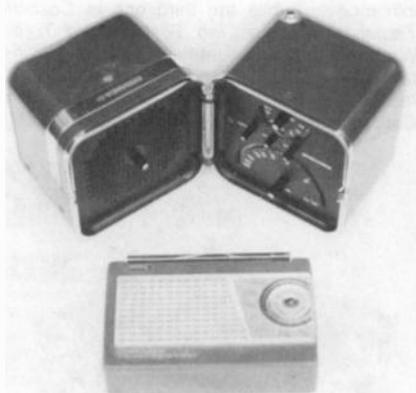

Figure 6. Two Italian-made radios — the Brion-Vega TS-502 (top) and the Voxon Zephyr.

- set.
16. Sony TR-72 — Sony's second important set.
17. Sony TR-6 — Sony's first set to use the Mitsumi's Polyvaricon tuning condenser.
18. Sony TR-63 — Sony's first shirt-pocket model.
19. Sony TFM-151 — the world's first transistor FM radio.
20. Sony TR-610 — the most typical of all transistor radios.
21. Sony TR-714 — the world's first shirt-pocket shortwave (and AM) radio.
22. Sony TR-620 — Sony's last of the historical, glamorous shirt-pocket radios.
23. Sony ICR-100 — first integrated circuit radio on the world market.
24. Sony ICR-120 — smallest loudspeaker radio ever built (still unchallenged).
25. Several standard Micronic Ruby sets — the cutest and most diminutive transistor set ever made.
26. Toshiba Lace 5TR-193 (or 194) — has real lace embedded in the translucent plastic case!
27. Global GR-711 — the most beautifully designed of all the shirt-pocket radios. (I like it anyway).
28. Fleetwood NTR-150 — another striking design of the period.
29. Wilco 360 — one of the most popular sets at the time.
30. Sanyo 6C-022 — the second shirt-pocket set on the market after Sony's TR-610 (also known in the U. S. as Channel Master 6509).
31. Marvel 6YR-15A — the smallest, full-feature transistor radio at the time.
32. Realtone TR-1088 — unusual cabinet decoration.

BRITISH

33. Pam 710 — the first British transistor set.
34. His Master's Voice (or Marconiphone) 1410G — a hybrid set using valves and transistors.
35. Sinclair Micro 6 (and Micromatic) — for the miniature size and for the fame of its inventor.

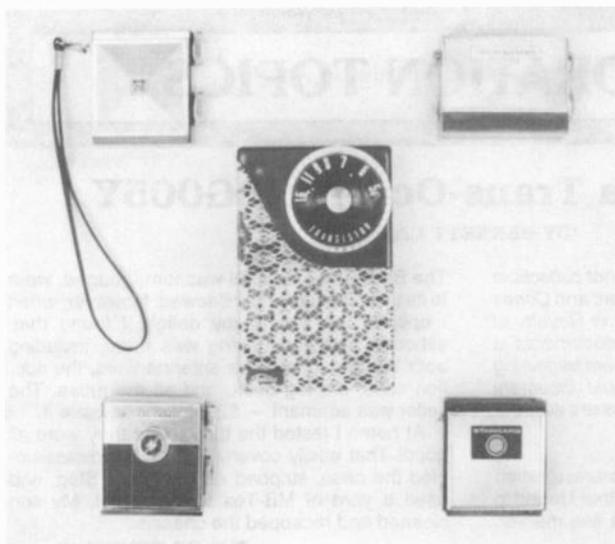

Figure 7. A Toshiba "lace" model surrounded by Standard Micronic Ruby models.

GERMAN

36. Braun T3 — for the beautiful, clean cabinet design.
37. Telefunken TR-1 — the first German transistor radio.

ITALIAN

38. Voxon Zephyr — the first Italian transistor radio.
39. Brion-Vega TS 502 (cube radio) — for the award-winning cabinet design.

There are, of course, many more sets which are important or simply beautiful, but I have to draw a line somewhere, and I am drawing it here.

Then there are all sorts of choices and preferences. Perhaps you might just like to acquire whatever comes along, but I am afraid that this way is not going to prove very productive in the end. In my view, it is better to have a few worthwhile sets rather than many radios which do not follow an historical pattern.

DATING AND IDENTIFYING

The first thing you must look for in a transistor radio for dating purposes is whether the dial has any so-called CD (Civil Defense) marks. These were in the shape of little triangular marks which should appear on all the transistor radio dials up to 1963, no matter where the radios came from.

In the U. S., these marks were meant to show the frequencies for emergency tuning of the radios in case of nuclear attack from the U.S.S.R. This was about the time of the cold war, and the American authorities were much concerned by the fact that known frequencies could be used to guide intercontinental missiles to their destinations.

Next, you should look to see if you can determine whether the set was made in the U. S., Japan, or elsewhere. Generally speaking, historical sets were made in the U. S. from 1954 to 1961, and Japanese sets from 1956 to 1966. Then came Hong Kong, which roughly covers the period from 1964 to the 1970s.

Subsequently, you should look inside and see if you can recognize the style of design and construction. In general, the early sets had a case made with thicker plastic than the later ones. The Japanese sets used the incredibly small encapsulated tuning condensers called Polyvaricons made by Mitsumi, while the American sets were still using the open-air style variable condensers.

The early transistors themselves can be recognized by their funny shapes — oval, oblong, with a lower flange or with a top nipple. All in all, as the technology

improved, the printed circuits were machine soldered as opposed to the early manufacturing processes which called for hand wiring. Early U.S.-made transistors are marked with a type number beginning with "2N" followed by a numbered suffix (e.g., 2N5320), and the lower the number in the suffix, the older the transistor design.

Early Japanese transistors bear the 2S number series and later ones 2SA and 2SB.

Some transistor manufacturers used their own numbering systems, the most typical being the CK series by Raytheon and the OC by Philips and Mullard.

If you are lucky enough to find the carrying case as well, this could give you a clue for dating the set, since early production sets were enclosed in real leather, while later ones used simulated leather or vinyl.

Today is still a good time to start collecting as the more seasoned wireless collector still regards the transistor radio as a sort of novelty set without realizing the enormous importance that transistor sets had in changing the social behavior and the history of communications.

© 1996 by Enrico Tedeschi. All rights reserved.

(Enrico Tedeschi, Portslade, Brighton BN41, 2FD, United Kingdom)

Enrico Tedeschi bought his first transistor radio — a yellow Sony TR-63 — at age 14 in his native Italy where he lived for 54 years. In 1993, he settled in the south of England with his wife, a British subject, and hopes to open a radio museum there. His collecting interests include early Marconi and Sinclair sets, as well as LED pocket calculators and historic home computers. He has written two books on radio collecting, published in Italian.

RESTORATION TOPICS

Restoring a Trans-Oceanic 8G005Y

BY BENNETT CANE

Trans-Oceanics have become a hot collectible item since the publication of the Bryant and Cones book "The Zenith Trans-Oceanic: the Royalty of Radios." Bennett Cane's article documents a Trans-Oceanic restoration project from beginning to end. We wish more collectors would document and share such step-by-step processes with our readers. (Editor)

Shown in Figures 1 and 2 in its preresoration state is the Trans-Oceanic 8G005Y that I found in an extremely shabby condition at a flea market.

The Black Stag material was torn, gouged, worn to its thread base, and mildewed. However, when I opened the set, to my delight I found that, although filthy, everything was there, including both Wavemagnets, the antenna lines, the suction cups, the log book, and all the tubes. The seller was adamant — \$20, take it or leave it.

At home I tested the tubes, and they were all good! That easily covered the \$20. I disassembled the case, stripped off the Black Stag, and used a yard of MB-Tex to recover it. My son cleaned and recapped the chassis.

THE RE-COVERING PROCESS

I have restored a couple of Trans-Oceanics without having to re-cover them. However, in this case, the Black Stag material was so worn it was impossible to make the set look like anything other than a parts radio without re-covering it. Figure 3 reveals a rear view of the badly worn case.

Stripping off the old material was no easy task because the glue that was used by the Zenith craftsmen was heavy duty stuff. Some sections of the material just wouldn't budge. It was as if the material had become part of the wood, particularly on the back cover.

For these spots, I used a glazing and spot putty to fill in the areas between the old material and the bare wood surfaces so as to obtain an overall even base for the new material. Figure 4 shows the back cover after the

Figure 1. The Trans-Oceanic in its preresoration state.

Figure 2. A view of the Trans-Oceanic with its front cover closed. Note the extensive wear and damage.

Figure 3. A rear view of the radio's case showing the badly worn covering.

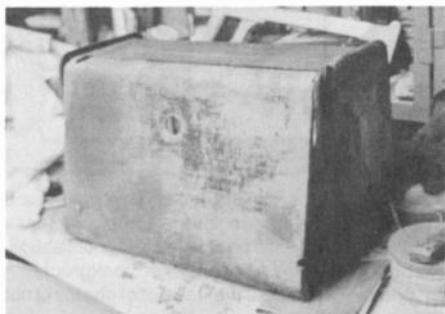

Figure 4. The use of glazing and spot putty levels the surface after the old covering is removed.

Figure 5. The restored Trans-Oceanic with its new covering and polished trim.

old covering had been removed and after the putty was applied to even the cover's surface. On the areas that did strip completely, I sanded the surfaces with 8-grit sandpaper just to get them even. That old glue had left sections that had to be dealt with!

The new vinyls are thicker than the Black Stag, which I have not been able to duplicate. MB-Tex is the excellent vinyl upholstery material that is used in Mercedes Benz cars. It has a nice grain and is very strong. I bought a couple of yards of it at my auto upholstery shop for \$15. It is 45 inches wide, which is sufficient for a Trans-Oceanic. At the suggestion of the upholsterer, I used a 3-M upholstery spray adhesive that sets up slowly

— about 15 minutes — so that corners and curved surfaces could be dealt with without rushing.

The Model 8G005Y requires 11 separate pieces of material to finish it totally. I measured each section twice and added a little extra for curves, corners, and overlaps. I then laid out the final measurements on the back of the new material and carefully cut out all the sections.

I worked with one piece at a time on a large clean surface. It is necessary to keep the material straight, follow the directions on the adhesive container, and be patient. I used the corner cuts on the old upholstery as a guide for new cuts using small scissors. It is all right to use a staple gun to hold areas around corners while the glue dries. However, the staples must be removed when the sections are dry.

The cleaning on the brass, plastic, and steel parts should be done with only very light abrasives, polish and elbow grease. No power!

For about 15 hours of "fun" and \$40 for the radio and restoration materials, I have a "brand new" 50-year-old Trans-Oceanic that sounds as good as it looks. The finished product is shown in Figures 5 and 6.

(Bennett Cane, 4851 Texhoma Ave., Encino, CA 91316)

Bennett Cane, a banker, and his son David, an attorney, make a great radio repair team. Bennett looks for radios of interesting design from the 1940s or later and does the cosmetic restoration, while David takes care of the electronic repairs. Together, they work to keep the appearance of the sets as authentic as possible. Perhaps a nice restoration shop is in their future.

Figure 6. A rear view of the recovered case.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

TRANSISTOR RADIO DISPLAY RACK – This spice rack transistor radio has been converted into a display rack for vacuum tubes. (*Jimmy R. Messex – Union, MO*)

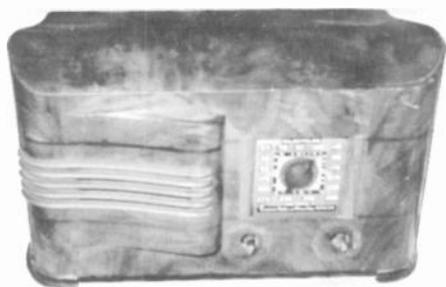

ESPEY MODEL 581 – This 7-tube, .54 to 19 Mc receiver in a metal cabinet is similar in style to the Hallicrafters Model RE-1 Sky Courier, and also to the Minerva, which was on the August 1995 A.R.C. cover and in the April 1995 *Photo Review*. The cover holes are from previous modifications, for which the reasons are unknown. (*Harry and Toni Blesy – Hinsdale, IL*)

TELEFUNKEN TYPE D.R.R. E266R – This 1-tube universal receiver has its own separate case for 11 plug-in coils, covering long, medium and shortwave bands. It is a rare set which was very popular in Germany in the 1920-1925 era. At one time jokingly called the German "Crosley Pup," this set is far ahead of the Crosley Pup in design and performance. (*Phil Weingarten – Rego Park, NY*)

PHOTO REVIEW

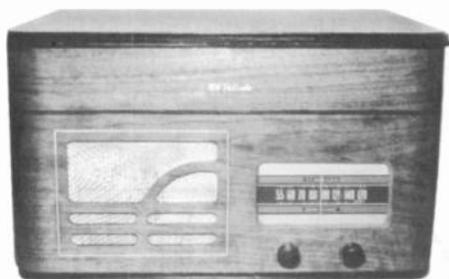

EMERSON MODEL UNKNOWN – This mid-1930s Art Deco table model is shaped somewhat like a violin. Note that the knobs are missing. If you can identify this set, please write to A.R.C. (*Steve Blank – Linwood, NJ*)

"RADIO-OWL" TIMER – This 5 1/2"-tall radio is operated by pushing down on the top of the owl, which turns the set on for two hours. The owl rises slowly and turns the radio off. (*Steve Lange – Milwaukee, WI*)

ATWATER KENT MFG. COMPANY – Located at 4700 Wissahickan Ave., Philadelphia, Penn., this was the largest factory in the world devoted exclusively to the manufacture of radios. An airplane photograph, taken from an altitude of 900 feet, shows the vast area of the skylighted roof. The floor area covers 15 1/2 acres. The photo is 18" x 26". (*Hal Kravig – Bartlett, TN*)

RCA VICTROLA MODEL U9 – This 1941 unit features a Standard Broadcast AM radio in combination with a single-play phonograph operating at 78 rpm. The tubes used are the common Types 12SA7, 12SK7, 12SQ7, 35Z5GT, and 50L6GT. The cabinet is finished in light maple, and the speaker grille has a design inspired by Art Deco. (*Douglas Fox – St. Charles, IL*)

be inserted into the 1L6 socket, and the radio will play satisfactorily. Caution: When using the modified 1R5, be certain that pins 1 and 7 of the tube are inserted into contacts 1 and 7 of the 1L6 socket. A marker pen can be used to make a reference mark on the 1R5 between pins 1 and 7 to assure proper alignment and installation.

SUBSTITUTION METHOD #2

The second method of utilizing a 1R5 for a 1L6 involves a modification to the radio's circuit. This method is accomplished by disconnecting R1 and C2 from the pin 5 socket connection for the 1L6 tube, as shown in Figure 2. These two loose ends should be insulated from the chassis and other components to prevent the chance of a short circuit.

Alternatively, R1 and C2 can be snipped off with a pair of diagonals and removed from the chassis, thus eliminating any possibility of a short circuit. With R1 and C2 disconnected or removed, the 1L6 converter circuit, shown in Figure 2, is now virtually identical to the 1R5 converter circuit, as shown in Figure 1, except for the value of the R2 grid resistor. Therefore, an unmodified 1R5 can now be used as a substitute for the 1L6 without any further changes.

CONCLUSION

Summarizing these procedures: Method #1 utilizes a modified 1R5 by removing its pin 5. Method #2

alters the circuit by disconnecting or removing R1 and C2 from the 1L6 pin 5 socket connection and uses an unmodified 1R5.

Note: Since the electrical characteristics of the 1L6 and 1R5 are slightly different, a slight adjustment to the oscillator section of the variable tuning condenser may be required.

Nevertheless, as a practical matter, I did not find it necessary to make any alignment adjustments on my Zenith 5G41 portable that plays very well using either modification.

(Melvin R. George, P.O. Box 24934, San Jose, CA 95154)

Melvin George, a retired attorney, built his first crystal set at age 10. As a teenager in 1943, he worked part-time for MRL, a mail order company, and often accepted radio parts in lieu of his 35¢ an hour salary. He continues to collect and repair old radios from the 1920s and 1930s.

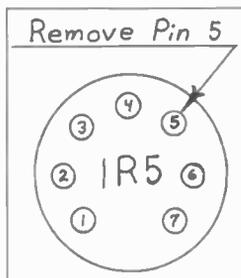

Figure 3. A bottom view of the Type 1R5 tube showing pin numbers.

A "Replacement" for the 1L6 Pentagrid Converter

BY FRED GORDON

A friend asked me to repair his Zenith Trans-Oceanic radio. Inspection of the radio revealed, among other problems, a shorted 1L6 converter tube. After trying to locate a replacement, I found that my major suppliers were having difficulty obtaining this costly item. I was told that a 1R5 would work, but the radio would tune up only to around 3 to 5 MHz. This limitation has not been confirmed.

My friend wanted to listen to all the shortwave bands, plus the AM broadcast bands. Since he was "financially challenged" (i.e., broke), I decided to modify his set using a tube that was not only available, but inexpensive (i.e., cheap). However, this modification must in no way alter his set's original wiring or be permanent.

After I had reviewed my RCA tube manual, I found that the tube replacement was a 1LA6. This tube is classified as a "pentagrid converter," and it

has electrical specifications similar to the original 1L6. The 1L6 is a 7-pin miniature tube, while the 1LA6 is an 8-pin loktal. [Antique Electronic Supply has reported that the 1LA6 is available at \$4.90.]

As an experiment, I wired the replacement 1LA6 loktal tube base to a 7-pin male plug that will now insert into the original 1L6 tube base located

on the Zenith chassis. The wiring between the 8-pin loktal socket and the 2-pin male plug, except for one wiring change, is pin-for-pin. The interconnections between the male plug and the loktal socket are shown in Table I.

The 1LA6 and its adapter on the left and a 1L6 on the right.

After completing and double-checking my wiring, I inserted the replacement and found that all the bands worked from 540 kHz to 18 MHz with normal sensitivity. The downside to this modification was that on this radio, the dial frequency settings became a little bit off. I suspect that this problem is due to extra wire length used in the modification, which upsets the original local oscillator portion of this circuit.

To compensate for this condition, I touched up the oscillator coils for the bands affected. At present, this seems to be the only problem for the "replacement" until my friend can afford a 1L6 original, if he still wants to do so.

(Fred Gordon, Fred's Old Radio Emporium, 1612 West 7th Ave., Corsicana, TX 75110)

MEET & AUCTION REPORT

VRPS/AWA 1996 Convention and Auction Irving, Texas — October 25-27, 1996

COMPILED BY GEORGE AND MICHAEL POTTER

The 21st annual convention of the Vintage Radio & Phonograph Society (VRPS) and the Antique Wireless Association (AWA) was held October 25-27, 1996, at the DFW Airport Holiday Inn South in Irving, Texas. Over 400 attended the 3-day event.

Friday's events included the Old Equipment Contest, a silent auction and a main auction. Two separate technical sessions included presentations by Bill Harris of Roanoke, Texas, on "Radio Receiver Alignment from a Front Row Seat" and John Bryant of Stillwater, Oklahoma, on "Early Radio Manufacturing at Zenith." Both programs were well attended.

Saturday's events featured a silent auction, a main auction, the annual meeting, and the annual awards banquet. Radio station KAAM's president/general manager Hue Beavers was this year's guest speaker.

Again this year, Michael Sherman was auctioneer. Auction proceeds brought a whopping \$49,148 for the 949 items sold.

Some high-dollar items in the auctions included the following: a 1926 Neutrowound at \$230; an Amberola 30 cylinder phono at \$290; a Volksempfänger VE301 at \$300; an Edison cylinder machine with horn and 8 cylinders ("K" reproducer) at \$475; a U.S. Apex 8A at \$200; a Grebe MU-1 with battery box at \$320; a Fada 652 Catalin at \$400; a Philco 90 cathedral (restored) at \$315; an RCA 19K console at \$260; a Crosley 125 cathedral at \$210; an Atwater Kent Kiel table at \$280; a National NC-183D at \$280; and a Columbia A-2 Grafonola at \$140.

A warning: Auction prices are not current values. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

A group of beautiful phonographs in the contest — a Standard, a Victor, and a Talkophone.

A large collection of Philco cathedrals sold in the auction from \$180 to \$315 each. Bakelite and plastics were plentiful but commanded only average prices. Again this year the 1930s wood sets were very good sellers as were phonographs.

The list of auction equipment sold below is a combination of all auctions. Accuracy of equipment identification and condition is not guaranteed.

The * at the end of an item's description indicates that a set is guaranteed by its owner to work perfectly, and it has been restored; the set can be returned if not satisfied (owner guaranteed).

George (left) and Michael Potter dutifully recording the auction results.

Authors John Bryant and Marty Bunis are obviously "happy campers."

This extra nice Amrad 3500-3 with manual and batteries, owned by Jim Sargent, won 1st place in the contest.

Estes Vintage Radio Auction November 16, 1996 — Medina, Ohio

REPORTED BY RICHARD ESTES

Estes Vintage Radio Auction on November 16, 1996, was the largest to date with total sales of \$50,091 and attendance at 216, representing 12 states. The radio collector travelling the farthest came from El Paso, Texas, with South Carolina and Massachusetts next. Inquiry calls came from Japan, Europe and Canada. Clear 50° weather prevailed. However, due to the record snowfall that week in the Cleveland area, phones were out of order most of the time.

At first, two auction rings dispersed many box lots of parts in the \$1 to \$20 range and loads of test equipment at \$5 to \$50; military and amateur radios items were sold separately.

Many early radio books sold in the \$25-\$40 range. Early wireless magazines went at \$17.50 to \$25 each. Flats of tubes sold at \$10 to \$100. Many tabletop AC and battery sets went in the \$25 to \$150 range.

An Emerson Aristocrat in a green Catalin cabinet topped the auction's bids at \$825. Additional

auction highlights included some novelty radios — a Majestic Charlie McCarthy sold for \$675, a Coca Cola for \$475, and a Hopalong Cassidy for \$325. One Atwater Kent Model 10 breadboard sold for \$595, while another went for \$400.

Estes will hold its next Vintage Radio Auction in February 1997. Call to consign your collection.

Selected items from the November auction are listed below.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk, NT=no tubes, WT=with tubes, BB=brass-based, TT=tipped, wk=working, nwk=not working

RADIO MISCELLANEA

"Antique Radio Classified" invites its readers to contribute letters and information for inclusion in "Radio Miscellanea" and elsewhere in the magazine. "In The Marketplace" is based on information submitted by the businesses themselves. All topics should be of general interest and sent to A.R.C., P.O. Box 2, Carlisle, MA 01741. All material submitted should be verified for accuracy and may be edited for publication, which is not guaranteed. See the masthead for more details.

Russian Red Star Radio

Dear Editor:

Regarding the article on the Russian Red Star 54 radio (December 1996, p. 10), here is a correction concerning rimlok tubes: Rimlok tubes have a dimple on the side that corresponds to a groove in a metal ring on the socket, but don't have a metal base as stated.

Richard Foster, Cochuatate, MA.

WBZ — 75th Anniversary

Dear Editor:

Your readers may be interested to know that WBZ radio, Boston, Mass., recently celebrated its 75th anniversary of broadcasting. WBZ was licensed on September 5, 1921, and went on the air September 19, 1921. At that time, it was located in Springfield, Mass.

WBZ is listed in my 1926 call book as being on a wavelength of 333 meters with power of 2,000 watts. At present, it is on 1030 kHz with a power of 50,000 watts and a terrific signal. For 75 years, the station has been owned and operated by Westinghouse — a truly pioneer radio broadcaster.

Harry Cap, Bridgewater, MA

Even More Minerva Info Wanted

Dear Editor:

Many thanks for forwarding the e-mail note from South Dakota on the Minerva radio. Yes, the Minerva (November 1996, p. 24) was real; Leo Gibbs tells me he serviced them in 1932 in a DC district of Chicago. Langley's Guide (Vintage Radio, 1973) even lists four models in 1932.

Does anyone know anything more about Minerva? Any service of sales literature? Who was the owner or designer, and what happened? Any connection to the later New York City company?

Alan Douglas, Box 225, Pocasset, MA 02559

A Successful Sales Story

Dear Editor:

I would like to report on the results of my recent ad in A.R.C. I sold the Radiola III, the Crosley, dozens of tubes, the Chanalyst, the scope, several years of magazines, and the Majestic sign. I also received 12 letters for my listings. I even sold items that were not listed because buyers came to get the items and bought more.

Needless to say, I am well satisfied and wish that I had "put my shoulder to the wheel" and advertised months — yes, years ago!

Edward Scribner, Schoharie, NY

A.R.C. Archived For The Future

Dear Editor:

My thanks to you for ten years of radio, and a magazine I archive for future reading — and for future generations.

John Frigo, Homewood, IL

A.R.C. — A Neat Web Site!

Dear Editor:

A.R.C. is really a neat site! The internet and access to it is a lot easier than building a superhet receiver back in the '30s. It is ironic that we have such a "low tech" item (antique radios) on such a high tech delivery system, but I'm extremely glad you do.

Marc Ellis gave your site a good review in the last issue of *Popular Electronics*. He was really excited about the job you have done.

My main weakness is collecting old tape recorders. I have many. If anyone out there knows of a site that zeros in on old magnetic tape equipment, let me know. Keep up the good work.

Tom Hoehler, tomh@aye.net

Pleased Book Buyers

Dear Editor:

I recently purchased four books through your magazine (thanks to your interesting book reviews) — *Radios by Hallicrafters, Heathkit, A Guide to Amateur Radio Products, The Zenith Trans-Oceanic: The Royalty of Radios, and The Pocket Guide to Collins Amateur Radio Equipment, 1946-1980*. The quality of the books is excellent!

I was concerned that I would be paying a high price (not to say your books are expensive, but I haven't purchased many books recently) for a standard book that I would be disappointed in. I have already gone cover-to-cover in all but the Trans-Oceanic book (a Christmas gift) because I found each one impossible to put down. I agree entirely with your reviewers' comments about the books. I felt almost as if I had known Art Collins personally.

Thank you very much for making such books easy to acquire (shipping was fast also), and for insuring that only quality books make it to your list. I'm sure the owner of the Zenith radio (the gift recipient) will agree with me.

Randy Jones, Colville, CA

Dear Editor:

Gotta thank one of your advertisers (October 1996, p. 28) for the best book of tube information I've ever seen! Ludwell Sibley's *Tube Lore — A Reference for Users and Collectors* has proved of immense value here in the six short weeks I've had it.

As you seem not to stock it, I fear many will not see this essential one-volume classic. That would be a shame, as this is the text needed next to the *RCA Receiving Tube Manual* and Sams' *Tube Substitution Guide*.

Best twenty bucks I've ever spent on a radio-related book!

"Doc" Waterman, Oakland, CA

A.R.C. does now offer this valuable book at \$19.95. Be sure to call for shipping information. (Editor)

WANTED: World Radio Handbook, Broadcasting Yearbook, other radio station lists (including photocopies), before 1980. Ralph Marson, 8070 Busch, Centerline, MI 48015. (810) 754-3808

YARD SALE!

(GRILLE CLOTH)

I'm continuing my yard sale on 13 of my 35 patterns. I've lowered the price because I will be receiving some very high quality new patterns made of cotton and silk in February or March and need to raise money to pay for them. Remember that a 51" x 36" piece can do up to 15 table-top sets or two to four consoles for only \$20, postage included!

\$20 per yard (51" x 36") for any quantity of yards of these patterns: #15, 16, 16A, 17, 19A, 20, 21, 22, 23, 24, 25, 26, 27

\$15 per yard for #6 and #11 - until sold out.

**Send 55¢ LSASE (4" x 10")
for full set of samples.**

Radio Restoration Parts

Vacuum Tube Repair Wafers

These tube repair wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact, but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage may usually be reduced without sacrificing volume or sensitivity. Performance will vary between radio models.

\$10.00/each (\$7.50/ea. 3 or more)

THE FLORIDA ANTIQUE WIRELESS GROUP

Will Proudly Sponsor an — Estate Auction —

From the extensive 40-year collection of longtime FAWG member and "Silent Key," Mr. David T. McKenzie, KØSVJ. Come join in the fun in The Sunshine State! Lots and lots of old radio and related items of interest to beginning collectors as well as seasoned aficionados. Many fine battery, AC, and crystal radios, (Atwater Kent to Radak to Zenith), many boxes full of tubes, parts, and lots of rare and unusual early literature will be auctioned off. Something for everyone. We'll have informal tailgating at sunrise in the parking lot prior to the sale. Preview at 9:00, sale starts at 10:00 a.m. **Saturday, February 1, 1997** at the VFW Hall, 4444 Edgewater Dr., Orlando, FL. Cash, cashiers checks, and travelers checks gladly accepted, NO personal checks! There are numerous ATM machines available within five miles of the VFW Hall. Coffee and donuts will be provided in the a.m., a catered lunch will be served during a noon hour intermission. Come and enjoy the best of Florida in the winter.

Contact FAWG @ P.O. Box 738, Chuluota, FL 32766-0738 — SASE for list

Phone Dennis at 407-895-0146 days or Paul at 407-365-9305 eves. till 9:30 p.m.

Place:

**Holiday Inn at Elgin, IL
(Exit I-90 at ILL 31 South)**

Reservations:

**To be made through the Hotel.
MINIMUM -3 DAYS REQUIRED
\$68.00 PLUS TAXES PER DAY.**

Parking:

Parking is to be assigned by ARCI

NOTICE! NOTICE! NOTICE!

The CITY of ELGIN has informed us that we can no longer use the adjacent field. Based on this information, we can only accommodate a very limited number of large trucks and vans.
NO huge trucks, mobile homes, or busses will be allowed.

We will have to limit the number of parking spaces to two per person! If you want to "GROUP UP," you can pair up and two people can have 4 spaces, three people can have six spaces, and so on.

WE MUST BE INFORMED OF THIS BY APRIL 1, 1997. FIRST COME - FIRST SERVED. PEOPLE REGISTERED IN THE HOLIDAY INN WILL GET PRIORITY ASSIGNMENT!

ALL SELLERS MUST BE REGISTERED MEMBERS OF ARCI, IN ORDER TO SELL.
A PRE-REGISTRATION FORM FOR THIS AND PARKING WILL BE PUBLISHED IN THE NEXT ANTIQUE RADIO CLASSIFIED AND THE ARCI NEWS.

NEXT MONTH - PRE-REGISTRATION FORMS WILL APPEAR FOR RADIOFEST XVI.
YOU MUST FILL OUT TO BE ASSIGNED PARKING!

RADIO XXVIII

★ SAME-GIANT ★
LOCATION

★ OUR 28th ★
GET-TOGETHER

An Indoor Old Radio Flea Market

6500 square feet — 90+ Tables Available

Last year attendance was over 900!

Sunday, February 23, 1997 — 8:00 A.M. till 1:00 P.M.

Registration begins for all at 7:30 A.M.

\$5.00 admission (spouse & children free) — Exhibitors see below.

Westford Regency Inn — Regency Room — Westford, Mass.

(I-495 at Exit 32 — directions below)

Coffee, Donuts, Sandwiches, Soup, etc., will be available.

The Westford Regency Inn and Conference Center is a 193-room hotel with 3 restaurants and over 500 parking spaces.

New: Informal Dinner — Sat., Feb. 22nd, 7 P.M. to 9 P.M.

No reservations needed — Dutch

Yangtze River Chinese Restaurant — 2.2 mi. West of Westford Regency on Rt. 110.

Also: Visit John Terrey's Collection of Early Radio & Wireless

Sunday 1:00 P.M. - 3:00 P.M. 5 mi. from meet. Info at meet. Over 600 items on display!

Pre-registration & Info.: Lisa Friedrichs at: A.R.C., P.O. Box 2, Carlisle, MA 01741 — (508) 371-0512.

Exhibitors: \$5.00 per person for admission plus \$16 per 8' table (for either 30" or 36" wide). Table sizes and location assigned on a first come-first serve basis. Early registration is recommended in order to obtain space in the main hall. Last year's exhibitors may reserve the same location as last year if we receive their paid registration by 2/1/97. Adjacent rooms will be used for overflow. Four table limit per exhibitor. Exhibitors may register at the door or may pre-register by mailing payment to: Radio XXVIII, c/o A.R.C., P.O. Box 2, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa or MasterCard OK, too.) If paying by credit card, exhibitors may pre-register by calling (508) 371-0512 or faxing (508) 371-7129. **Note:** After picking up registration materials at the registration desk, exhibitors may enter the hall only to deliver goods to their table (e.g. not set up) and then must return to the foyer until the doors open for everyone at 8 A.M. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 A.M., a table may be cancelled and resold.

Overnight stay: Westford Regency Inn at 1-800-543-7801. Mention Radio XXVIII for special rates. Room reservations should be made by February 2, 1997 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc. Night skiing at Nashoba Valley Ski Area, only 2 miles away!

Directions: From I-495, take Exit 32. Follow sign to Rt. 110. At stop light, turn right onto Rt. 110-West for .4 miles. The Westford Regency is on the right. Use doors on right (north) side of Inn. Ramps at both show entrances!

WANTED: For the world's first "Big Band Hall of Fame" soon to open in our restored, historic, Palm Beach Community College building at Kravis Area Arts Center in West Palm Beach, FL. Wanted VM (Voice of Music) 900/970 Series record changers, early 50's with or without built in amp. Also Zenith Cobramatic record changers with or without amp/radio, early 50s. Also wanted, any make wire recorders, Ampex 200 Series tape recorder, other very early tape recorders for display. Wanted early 10- or 12-inch (50-51) console or combination TV. Not working items are OK. Wanted Big Band 16" radio transcriptions (huge 16-inch records). Please state condition and price. Photos are helpful. Also seeking donation of Big Band record collections and memorabilia (photos/articles/magazines/artifacts). Consider planning on their donation now, or at a later time, for permanent preservation in the Big Band Hall of Fame Museum instead of having them destroyed or thrown out by a thrift shop (we see 78s and other items regularly thrown into a dirty, far corner, even walked on or thrown out by the young personnel at these places). Leave your collection where it will be appreciated by visitors from all over the world. Please call or write: Robert DeMars/Tim Pierce, 222 Lakeview Ave., Suite 160-256, West Palm Beach, FL 33401. (561) 832-4607

WANTED

FOR MY BROADCASTING MUSEUM

Microphones, stands, call letter plates. Tube amplifiers, mixers, compressors, Hi-Fi equipment. Speakers, on-air lights, equalizers. Disk, wire & tape recorders. Blank recording disks. Catalogs, magazines, manuals. 16" transcriptions, turntables, arms, pickups. Early TV cameras & receivers. Elaborate console, deco, plastic, mirror, novelty & wireless radios. Jukeboxes & parts. Acoustic phonographs.

We are looking for all makes of equipment, and especially Western Electric, Telefunken, Neumann and RCA. The museum contains various duplicates and items surplus to our needs, and many of these articles are available for sale or trade. The collection is located in my Victorian seaside inn, The Caffrey House, situated on a bay next to the ocean, in the Southampton resort area of Long Island. A trade of equipment for a stay at the hotel is always encouraged.

ANNOUNCING

Tube Lore

A REFERENCE FOR USERS AND COLLECTORS

By Ludwell Sibley

For serious tube users, collectors, and admirers, a new look into tubes from 1920 to the present: history of design trends, tech data, equivalencies, stocking-up hints, even prices. Here's what it contains:

- **Trends in Tube Design** - major styles that shaped the industry - acorns, metals, loktals, miniatures and subminiatures, lighthouse, nivistors, compactrons. Includes odd design variants and special "reliable" types.
- **Receiving and Audio Tubes:** "prehistoric" types from 25 tiny manufacturers as well as the big guys. Information on a lot of collectible tubes in one place. Basic data on lots of later types not found in ordinary tube handbooks, and early CRTs.
- **Special-Purpose and Transmitting Types** - covers the familiar ones and lots of unknown types. "Regular" tubes, plus magnetrons, klystrons, thyratrons, ignitrons, camera tubes, etc. Capsulized characteristics on 2300 "specials" from 5512 to 9019. Helps identify that just-found "whatzit." (Everybody knows a 6922 is a premium 6DJ8, but what about the 7308?)
- **Military Types:** a researched and insightful list of Signal Corps "VT" tubes; the biggest list yet seen of Navy type numbers; coverage of Canadian "REL" tubes.
- **Unique Types of major makers:** De Forest, Eimac, GE, Raytheon, RCA, Sylvania, Western Electric, Westinghouse.
- **User's Guide:** ideas on testing, adapting, repairing, reactivating, reading date codes, detecting the real maker of private-brand tubes, turning random lots into usable repair stock.
- **TV Sweep Tubes:** what tubes are used in eight audio amps and 78 amateur transmitters/linears; hints on substituting as the originals get scarcer and more expensive.
- **Auction Prices:** for collectible and audio tubes, from six major sales.

Contains 186 pages, 8-1/2" x 11" softbound. Price, postpaid: \$19.95 in North America; \$24.95 elsewhere. Orderable from:

Ludwell Sibley
44 E. Main St.
Flemington, NJ 08822

Discounts available to clubs on group orders.

SWAPMEET - AUCTION

HAVERTOWN, PA

SATURDAY, FEB. 15, 8 AM - 2 PM

DVHRC presents an indoors swapmeet/auction at Grimes Center, Havertown. Just west of Philadelphia, site has easy access from PA Turnpike, I-476, or I-95. Auction is planned for multi-estate material and bring-ins.

Big meeting hall with easy ground-floor unloading (six doors!) from generous parking lot. Food on premises. Rates: \$2 to buyers. For sellers: \$15 per table in advance, \$20 on the day of the event; extra tables \$3 less. Reservations are advised - just send a check, payable to DVHRC, to 1649 Yellow Spring Rd., Chester Springs, PA 19425 by Feb. 10.

Contact: Dave Abramson, (610) 827-9757.

Map and more details next month.

FOR SALE: 1939 TV-Westinghouse WRT

Join the "big league" of pre-war TV owners—only 2 or 3 of these exist! RCA built modified TRK-12's for Westinghouse, but their order was cancelled and never delivered. WRT's have a special lid, radio, grille, side grille, etc. Clean and complete—except for a water stain on the top lid. Rare, rare, rare...\$7,645.

**REWARD: \$200
Panasonic TR-005**

We want this 1970's TV, and will pay to get it! Grey plastic on a tripod base, space-age look.

Need not work—mint, unbroken paying \$200

FOR SALE: CBS Flying Spot CRT. 16" long military reconnaissance tube which has a spinning mechanical anode built into the vacuum! Very unusual, with the original release plus a press photo from CBS. Circa 1950 ...\$138

FOR SALE: Marantz 2238B. This stereo receiver is in mint condition, and still works. Has "gyro-touch" venier tuning for AM and FM; signal strength and FM tuning meters; provision to add Dolby. Good stereo receiver at a great price \$95

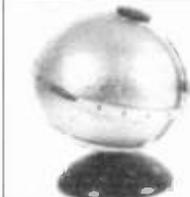

FOR SALE: Sunglass Transistor Novelty.

This novelty transistor radio is built into a pair of heavy black sunglasses! They're in nice condition with minimum warpage of the arms. Only \$67

FOR SALE: IRC Resistor Display. 6" high by 11" wide silver metal box with about 250 new resistors. Box has famous "IRC/Ω" logo screened in blue and yellow on top. Nice 1950s cabinet...\$49

FOR SALE: from a TV engineer's library: 1952 IRE: Over 2,000 pages-15 lbs. of articles, engineers, companies listed. Includes 300+ pages of early computer reports from Iliac, on! \$44
1953 IRE: 2000+ pg volume with Binac computer article, plus 300 pages of transistor research and photos of many early transistors! \$55

FOR SALE: Transistor Six Fleetwood. This is a globe shaped radio with a tuning knob on top. The globe is gold and silver, and in nice condition except there is a 2" crack near the screw hole, and the bottom name plate is missing. Cheap at...\$47

Principles of TV engineering, Fink, 1940; Theory and Design of TV receivers, Deutsch, 1951; and TV Engineering, Wilson, 1937. All three—\$30

Static and Dynamic Electricity, Smythe, 1939; Elements Electromagnetic Theory, Duff, 1940; Electricity & Magnetism, Gilbert, 1932—3/ \$20

Principles of Radio Communication, Morecroft, 1933; Radio Operating Q and A's, Nilson, 1940; Communication Electronics, Everitt, 1932; and Engineering Electronics, Fink, 1938-4 for \$20

FOR SALE: Kent radio. This black bakelite coat pocket set was made in Japan, and has 4 tubes: 1R5, 1T4, 1U5, and 3S4. Excellent and complete. Gold and black Kent-\$48

FOR SALE: 1948 Sentinel 400TV.

We got another of these 7" portables with the strange trapezoid shape. Brown knobs and cloth covering, with gold tone front. The shape makes it look like a vintage oscilloscope! As found electrically, but it's in clean cosmetic condition....

Sentinel 400TV...\$170

CLASSIFIED ADVERTISING POLICY

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 27¢ each. See details below. Classified ads sent by mail, fax or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on page 2 for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on the inside front cover.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the sma.l l.). Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. See inside front cover for additional information.

CLASSIFIED AD DETAILS

Deadline: NOON ET- 10th of the month!

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

To encourage varied content of the ads, the same classified ad may be run only once per issue and for only two consecutive months. (To run an ad longer, use a boxed classified or display ad.)

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***
27¢ per word for extra words over 20 plus
10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

45¢ per word **plus**
10¢ per word for shaded ad.

Please do not forget to send in the extra 27¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

38¢ per word for all words,* none free, **plus**
10¢ per word for each bold word **plus**
10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

48¢ per word for all words* **plus**
10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$22.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. **Name, address** and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.
