RESTRICTIONS ON USE OF THIS REPORT

All Arbitron radio audience estimates are proprietary to Arbitron. They are provided to Arbitron clients pursuant to the terms of written license agreements between Arbitron and such clients. All Arbitron audience data and estimates are for the exclusive use of Arbitron clients and their authorized representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertising accounts and through advertising or promotional literature. For an Arbitron client to divulge any data or estimates to a nonsubscribing station, or to lend and/or give a copy and/or a reproduction of any part of any report to any nonsubscriber, including advertisers and/or their agencies, constitutes a breach of the license agreement between Arbitron and client. Quotations by clients of the estimates as allowed by the preceding sentence for purposes of advertising or promotion must identify Arbitron as the source and that Arbitron's data and estimates are copyrighted. It also should be mentioned that the audience estimates are subject to all qualifications and limitations stated in the Arbitron report. Arbitron recommends that the appropriate market, survey period and kind of audience estimate (e.g., Boston, Spring 1991, ADI Survey Area, Monday-Friday 3PM-7PM, Average Quarter-Hour Estimates, Men 18-24) be stated.

Neither this report nor any audience estimate may be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of this report are referred to the current policies of the Federal Trade Commission relating to the use of audience estimates.

General Description of Service

The annual Nationwide report of Network Audience Estimates provides audience listening estimates for radio networks (wired and unwired) based on Arbitron Radio's Spring survey. Network audience estimates are calculated for all U.S. Areas of Dominant Influence (ADIs). The service consists of two components: computer tapes for each ADI or Region and the printed Nationwide Network Audience Estimates Summary Report.

This report provides a summary of network listening and reference information. It also provides Average Quarter-Hour Persons estimates and ratings for 38 demographic groups in the Monday-Sunday 6AM-Midnight daypart for each network. The estimates are summarized for the top 25, 50, 75, and 100 markets and for the total U.S. Reference information includes the names of Radio Metros located within each TV ADI, a list of the network affiliates by ADI, and the ADI components of each Region.

The listening data provided on computer tape include ADI listening estimates (Average Quarter-Hour and Cume persons estimates and ratings and Average Quarter-Hour Shares) for 38 demographics and 21 dayparts. These listening data are additive because ADIs and regions do not overlap.

Network-affiliated stations which meet Minimum Reporting Standards (MRS) are reported separately, as are independent stations. Listening to any affiliated network stations which do not meet MRS is aggregated to a specially assigned designator, or X-code (e.g., XNET). The total audience for a given network is obtained by adding the audience estimates for the network's affiliate stations and the network's appropriate X-code.

MARKET DEFINITION/Radio Metro Survey Areas (Metro) and Radio Total Survey Areas (TSA) are not considered in this report or on Nationwide tapes since all markets noted in Nationwide are defined based only on the Area of Dominant Influence (ADI). The ADI is Arbitron Television's geographic market design which assigns every continental U.S. county to an exclusive market based on measurable television viewing patterns. All radio stations are identified as home to *only one* ADI using the station's FCC county of license.

The ADI market names shown in the listings are standard Arbitron Television market names as used in the 1990-1991 Arbitron Television Market Reports. The ADI market rankings are based on total television households within the ADI.

SAMPLE SIZE/In-tab diaries from all 261 Spring 1991 radio markets are used. In addition, extra sample is placed in those counties not measured in a defined radio market. The total number of in-tab diaries used to produce this report is 288,400.

POPULATION ESTIMATES/Population estimates are provided for 21 reported demographics on the ADI tape. In this report, population estimates are reported for 38 demographics by commonly accepted ADI market rank increments; viz., markets 1-25, 1-50, 1-75, 1-100 and total U.S.

GENERAL REPORTING CRITERIA

STATION REPORTING CRITERIA/To qualify for separate reporting on the Nationwide computer tapes, stations in the top 100 ADIs must meet all of the following MRS for the ADI among Persons 12+ for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart:

- a. The station must have received five or more minutes of listening in a quarter-hour in at least ten in-tab ADI diaries, **and**
- b. The station must have an ADI Cume rating of 0.495 or greater, **and**
- c. The station must have an ADI Average Quarter-Hour rating of 0.05 or greater.

However, if a station does not qualify in its ADI but qualified in the Radio Metro contained within the ADI as reported in the applicable Spring 1991 Radio Market Report, it will be reported separately.

In ADIs 101+ a station only must receive 10 diary mentions in the Monday-Sunday 6AM-Midnight daypart to qualify for separate reporting.

REGIONS/The Nationwide computer tapes provide listening estimates for all ADIs which have a minimum in-tab of 450 diaries. ADIs which do not individually meet this minimum are generally clustered into Regions within a time zone. Individual ADI and Region audience estimates are summed within market rank increments in the printed report. There are 12 Regions and 167 individually reported ADIs in this report. The ADI components of each Region are provided on page 196 of this report.

AUDIENCE ESTIMATES/Average Quarter-Hour and Cume audience estimates (Persons, ratings and Average Quarter-Hour Share) are provided for each station which qualifies separately and for the network X-code for 38 demographics and 21 dayparts on the computer tape. Since stations may be affiliated with more than one network, listening estimates for each network may include some duplication with other networks. Additionally, Arbitron does not adjust for the fact that listening estimates for networks are not necessarily reflective of listening to actual programs carried by a network since not all network affiliates air all network programs.

In this report, Average Quarter-Hour Persons and ratings estimates for Monday-Sunday 6AM-Midnight are reported. These estimates are aggregated to the ADI market rank increments of 1-25, 1-50, 1-75, 1-100, and total U.S. for each demographic. Persons estimates are reported in hundreds.

NETWORKS AND AFFILIATE ASSIGNMENTS/There are 17 networks reported in the printed report and on the computer tapes. An additional 5 networks and 7 long-form programs are reported on the tapes.

A list of stations affiliated with each network as of May 1, 1991, is provided to Arbitron by each network.

The audience estimates for each network in this report represent the sum of the audience estimates for the networks' affiliated stations together with X-codes within ADI and ADI market rank increments.

General Description of Service *(continued)*

The following networks and Persons Using Radio are reported by the abbreviations shown below:

AUDIENCE ESTIMATES FOR	ARE IDENTIFIED IN REPORT AS
Capital Cities/ABC Prime	ABC-PRM
Capital Cities/ABC Platinum	ABC-PLT
Capital Cities/ABC Galaxy	ABC-GAL
Capital Cities/ABC Genesis	ABC-GEN
Capital Cities/ABC Excel	ABC-EXL
CBS Radio Network	CBS
CBS Spectrum Radio Network	CBS SPECTRUM
Mutual Broadcasting System	MUTUAL
NBC Radio Network	NBC
The Source	THE SOURCE
National Black Network	NBN
Sheridan Broadcasting Network	SHERIDAN
Unistar Super Network	UNISTAR SUPER
Unistar Power Network	UNISTAR POWER
Unistar Ultimate Network	UNISTAR ULTIMATE
Westwood One	WESTWOOD ONE
National Association of State Radio Networks	NASRN
Persons Using Radio	PUR

National Association of State Radio Networks includes the following:

Alabama Radio Network
 Arkansas Radio Network
 Brownfield Network
 Florida's Radio Network
 Georgia Radio News Service
 Illinois News Network
 Kansas Information Network
 Kentucky Network
 Louisiana Network
 Metronews (West Virginia)
 Michigan News Network
 Midwest Information Systems - North & South Dakota Networks
 Minnesota News Network
 Mississippi Network
 Missouri Network
 Network Indiana
 Northwest News Network (Oregon)
 North Carolina News Network
 Oklahoma News Network
 Radio Pennsylvania
 Rapid Iowa News Network
 South Carolina Network
 Tennessee Radio Network
 Texas State Network
 Virginia News Network
 Wisconsin News Network

In addition to the networks in the printed report, the audience estimates for the following networks and long-form programs appear on the Nationwide tape:

ABC American Country Countdown
 ABC/American Top 40
 CBS/Crusin' America
 CBS On the Move
 Corporation for Public Broadcasting
 Corporation for Public Broadcasting - Expansion Potential
 Corporation for Public Broadcasting - Total System Potential
 National Public Radio
 WWI AOR Network
 WWI CHR Network
 WWI Country Network
 WWI News & Entertainment Network

CROSS-REFERENCE LIST – 1990-1991 TV ADIs and Corresponding Radio Metro Survey Areas/The Cross-Reference List that begins on page 182 shows all of the Radio Metros that are included, either totally or partially, in each of the 209 ADIs included in this report. A Radio Metro that is not totally contained within one ADI is listed for each ADI in which it is partially contained, and the Metro name is preceded by an asterisk (*).

LIMITATIONS OF THE REPORT/All audience estimates are approximations subject to statistical variations related to sample size and other limitations. The reliability of audience estimates cannot be determined to any precise mathematical value or definition.

A glossary of terms and a description of methodology of this report are included in the back of this report. (Refer to Page i.)

Notations

--	--	--	--

Glossary of Selected Arbitron Terms Used in this Report

1. AREA OF DOMINANT INFLUENCE (ADI)/ Arbitron Television's geographic market design which defines each television market exclusive of others based on measurable viewing patterns. Every county or sampling unit in the contiguous United States is assigned exclusively to one ADI.

2. ADI TOTALS (Total Listening in the ADI)/ The ADI Total estimates include estimates of listening to reported stations (commercial and noncommercial) as well as to stations that did not meet the Minimum Reporting Standards plus unidentified stations.

3. AVERAGE QUARTER-HOUR PERSONS/ The estimated number of persons who listened to a station for a minimum of five minutes within a quarter-hour. The estimate is the average of the reported listening in the total number of quarter-hours the station was on the air during a reported daypart. AQH Persons estimates are expressed in hundreds (00) in this report.

4. AVERAGE QUARTER-HOUR RATING (Rating Point)/ The Average Quarter-Hour Persons estimate expressed as a percentage of the appropriate estimated ADI population.

5. AVERAGE QUARTER-HOUR SHARE/ The Average Quarter-Hour Persons estimate for a given station expressed as a percentage of the total ADI Average Quarter-Hour Persons estimate to all radio within a reported daypart.

6. CUME PERSONS/ The estimated number of different persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. (Cume estimates may also be referred to as *cumulative*, or *unduplicated*, estimates.) Cume persons estimates are expressed in hundreds (00) in this report.

7. CUME RATING/ The estimated number of Cume Persons expressed as a percentage of the appropriate estimated ADI population.

8. DAYPART/ A time period for which audience estimates are reported (e.g., Monday-Friday 6AM-10AM; Saturday 10AM-3PM).

9. DESIGNATED SAMPLE/ Telephone numbers selected from the sample frame for this survey determined by Arbitron to be usable.

10. DIARY MENTION/ The number of in-tab diaries in which listening to a station has been recorded for at least five minutes in a quarter-hour within a given daypart.

11. DIARYKEEPER/ Any individual found eligible to receive and send survey materials.

12. EXCLUSIVE CUME AUDIENCE/ The estimated number of Cume Persons in the ADI who listened to only one station within a reported daypart.

13. GROUP QUARTERS/ Group quarters are residencies such as college dormitories, homes for the aged, military barracks, rooming houses, institutions and residences of nine or more unrelated individuals.

14. IN-TAB SAMPLE/ The number of usable diaries tabulated in producing the report.

15. LONG-FORM PROGRAMMING/ Special radio programs which run one hour or more. These programs can be daily, weekly, annual or one-time-only.

16. METRO SURVEY AREA (Metro)/ Metro Survey Area definitions generally correspond to the federal government's Office of Management and Budget's Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas or Consolidated Metropolitan Statistical Areas subject to exceptions dictated by historical industry usage or other marketing considerations as determined by Arbitron.

17. MINIMUM REPORTING STANDARDS (MRS)/ Criteria used to determine the stations listed in this report. (See Pars. 33-34.)

18. PERSONS USING RADIO (PUR)/ The PUR estimates include estimates of listening to reported stations as well as to stations that did not meet the MRS plus unidentified stations.

19. RATING/ (See *Average Quarter-Hour Rating and Cume Rating*.)

20. REGION/ Consists of clustered ADIs which do not have a minimum of 450 in-tab diaries individually. ADIs within a region are generally clustered by time zone.

21. SAMPLE TARGET/ The number of diaries that is the objective for the in-tab sample size.

22. SAMPLING UNIT/ A geographic area consisting of a county or a split county. (See Par. 27.)

23. SHARE/ (See *Average Quarter-Hour Share*.)

24. SPLIT COUNTY/ A portion of a county composed of one or more zip codes which has been separately identified for purposes of ordering and controlling sample.

25. WIRED NETWORKS/ All stations affiliated with a network which receive programming directly via telephone or satellite.

26. X-CODE/ A designator used to report listening to any affiliated network stations which do not meet MRS.

For additional information, the reader is directed to *Standard Definitions of Broadcast Research Terms*, published by the National Association of Broadcasters, 1771 N Street, NW, Washington, DC 20036.

Description of Methodology

SAMPLING AND MEASUREMENT TECHNIQUES

27. SAMPLING METHODOLOGY/Surveys for Arbitron Radio Market Reports are conducted by using geographic units called sampling units. A sampling unit consists of one county or a split county. The latter are defined by zip code information based on 1980 Census data, as updated annually by Market Statistics.

Sample targets are established for the Metro, the non-Metro, the TSA and, if applicable, the ADI. Targets are then established for each sampling unit proportional to its Persons 12+ population in the respective survey area subject to minimum sample requirements for Radio County Coverage. The amount of sample ordered is determined by dividing the sampling unit target by the expected rate of response based on previous survey(s) sample performance and other factors.

For each 12-week survey period, a complete new sample of telephone numbers is computer-selected for each sampling unit through the use of a systematic interval random selection technique. These telephone numbers are drawn from a sample frame provided by Metromail Corporation containing all listed, residential telephone numbers and all possible unlisted telephone numbers from 100-blocks with at least 10 listed, residential telephone numbers. The sample frame is updated by Metromail using current available telephone directories. Known business and group quarters telephone numbers are excluded from the sample frame. The total sample is then randomly divided into approximately equal weekly groups for placement.

If a need for additional sample arises after the original samples have been selected by the computer, then such additional sample is generally selected in the same manner from the original sample frame.

28. ARBITRON RADIO LISTENING DIARY/ Arbitron uses one-week individual diaries to gather listening information from persons 12 years of age and older. Bilingual (Spanish-English) diaries are provided to all survey participants in the Metro of a Hispanic-controlled market who have identified themselves as Hispanic in response to an ethnicity question or from whom ethnic information was not obtained,

and to any others indicating a preference for a bilingual diary. Premiums of varying monetary amounts are provided to encourage respondent cooperation. Arbitron sends a diary for each person 12+ reported in the sample household up to a maximum of nine.

29. SAMPLE PLACEMENT AND DATA RETRIEVAL/Initial contact with listed sample households is by a letter informing them of their selection by the computer and stating that an interviewer will be calling to request their cooperation in the survey. Initial contact with unlisted sample households is made by the interviewer at the time cooperation is requested.

Arbitron interviewers call all selected telephone numbers to ascertain the possibility of a media affiliation, to gain consent for participation in the survey, to determine the number of persons 12+ living in the household at the time of the placement call; and, where applicable, to determine the race/ethnicity and demographics of the household. Households with more than nine persons 12 years of age and older are ineligible for survey participation.

Interviewers are instructed to make a number of attempts to reach every telephone number in the sample. These attempts are made at different hours of the day and evening. Diaries are then mailed directly to the consenting sample households from Arbitron.

After the initial contact, the interviewer is directed to make additional contacts with the sample households to make sure the diaries have been received; to assist members of the household in understanding the diaries' purpose; to answer any questions; to remind the diarykeepers to return their diaries after the survey week; and to thank them for their participation in the survey.

Explicit instructions are provided to each interviewer and independent checks are regularly conducted by Arbitron Interviewing Center staff.

PROCESSING TECHNIQUES

30. PROCESSING OF DIARIES/Arbitron makes reasonable efforts to utilize all returned diaries. However, some diaries returned to Arbitron are unusable. Among those which are unusable are diaries which are obviously incomplete; are postmarked and/or arrive on or before the last

day of the survey week or after the production cutoff date; or which otherwise lack essential information. Only those with seven usable days are processed. The total number of in-tab diaries may be greater or less than the sample target.

Usable diaries are prepared for computer processing in accordance with procedures listed in the *Arbitron Radio Edit Procedures Manual*. The listening information in the diaries is then computer-entered so that certain computer verifications and edits can be made. These include ascription procedures, the allocation of credit for aberrated call letters and other logical analyses and pretabulation preparations.

CALCULATING TECHNIQUES

31. CALCULATION OF ESTIMATES/

a. Sample Balancing. The weighting system used by Arbitron, sample balancing, is an iterative marginal weighting technique designed to compensate for disproportionate in-tab from specified marginal classes. Marginal weighting means that in-tab is weighted to represent the population for each specified marginal class. The number of geographic marginal classes (i.e., counties, split counties or county clusters) will vary. The number of age/sex marginal classes is generally 16. In addition, markets that are race and/or ethnically controlled are sample balanced so that in-tab from the race/ethnic group is weighted to represent the population of that race/ethnic group. As a result of this cumulative weighting, a Persons-Per-Diary Value (PPDV) is computed for each diary. The PPDV is the number of persons that diary is estimated to represent.

b. Computing Cume Persons Estimates. Station Cume Persons estimates are computed by summing the PPDVs for each diary in which a station received listening credit within a daypart. PPDVs are summed for all diaries within each discrete demographic group, then rounded to hundreds. Station Cume Persons estimates for broader demographic groups are computed by adding the rounded Cume Persons estimates for the component discrete demographic groups within the same daypart.

c. Computing Average Quarter-Hour (AQH) Persons Estimates. Station AQH Persons estimates are computed by multiplying the number of quarter-hours of listening to a station within a daypart in each diary by the diary's

respective PPDV. The result of this multiplication is summed for all diaries within each discrete demographic group, then divided by the number of quarter-hours the station is on the air during the applicable daypart and rounded to hundreds. Station AQH Persons estimates for broader demographic groups are computed by adding the rounded AQH Persons estimates for the component discrete demographic groups within the same daypart.

d. Rounding of Calculations. Rounding occurs at various stages in the calculation of audience estimates at discrete demographic and daypart summation levels.

e. Broadcast Hours. (i) Local time differences within a market that overlaps time zones and time differences caused by seasonal time changes are accounted for in the results by adjusting diary entries to the time observed by the majority of counties in the Metro of the market being measured. (ii) Only one set of sign-on/sign-off times for a station is used in calculating audience estimates for the market report. Arbitron uses the sign-on/sign-off times, reported for the month closest to December and the shortest broadcast day within that month as provided by the affected radio station. (iii) Audience estimates are adjusted for the station's actual broadcast schedule. However, when a station changes sign-on/ sign-off times during an Arbitron survey period, the times used in calculating audience estimates are taken from those days of operation comprising the majority of consecutive days of the survey period. (iv) Stations broadcasting for less than an entire reported daypart are indicated by a footnote symbol next to the station's call letters or audience estimates. (v) Stations must notify Arbitron in writing of any changes in the station's sign-on/sign-off time as soon as they occur but no later than the day after the last day of the survey.

f. Technical Difficulties. No adjustments are made to either diary entries or reported audience estimates for periods of brief technical difficulty. The notation of technical difficulties on Page 5B of the applicable Radio Market Report is only to assist the users in making their own evaluation of the reported audience estimates. Arbitron will accept information on technical difficulties only up to the day after the last day of the survey.

Description of Methodology (continued)

CRITERIA FOR REPORTING STATIONS

32. CRITERIA FOR REPORTING STATIONS

To be listed in an Arbitron report, a commercial radio station must engage in systematic regular commercial broadcasting pursuant to the authority of and the Rules and Regulations of the Federal Communications Commission (FCC) or other appropriate governmental authority. Call letter designations exceeding four characters are shortened to four characters. Reported call letters are those in use on the last day of the survey as reported to Arbitron. In the event a station has changed call letters during the survey period, the first call letters listed in the report are those in use on the last day of the survey, with the station's previous call letters noted immediately below them. Arbitron maintains a call letter history based on information provided by radio stations and the FCC. In the event of exchanges of frequencies between stations in a market, the call letters under which audience estimates are published in this report are based on Arbitron's verification and interpretation of information from various relevant sources, which include the FCC and the affected stations. Specifics regarding the above are listed on Page 5B of the applicable Radio Market Report.

Audience estimates for a station which does not meet Minimum Reporting Standards (MRS) for the Metro or ADI cannot be obtained in any way from the audience estimates in this report. All radio stations, commercial and noncommercial alike, are measured using the same methodology and are included in ADI Totals. Noncommercial stations are not eligible to be listed in this report and are not considered in MRS evaluations. For report qualification purposes, stations are considered commercial/noncommercial based on their status as of the last day of the survey as reported to Arbitron.

33. MINIMUM REPORTING STANDARDS (MRS) FOR NONSIMULCAST STATIONS/A

commercial station which does not simulcast with another is included in this report if it has met all of the following Minimum Reporting Standards for the ADI among persons 12+ for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart during the current survey of the market:

- a. The station must have received five or more minutes of listening in a quarter-hour in at least ten in-tab ADI diaries, **and**
- b. The station must have an ADI Cume Rating of 0.495 or greater, **and**
- c. The station must have an Average Quarter-Hour ADI rating of at least 0.05.

34. MINIMUM REPORTING STANDARDS (MRS) FOR SIMULCAST STATIONS/MRS

for simulcast stations are based on the percent of quarter-hours in the Monday-Sunday, 6AM-Midnight daypart (when both stations are on the air simultaneously) that the two stations simulcast for every week of the survey:

- a. 9.49 percent or less - The two stations are considered to be **nonsimulcast** stations and each must independently meet the criteria used for nonsimulcast stations. (See Par. 33.)
- b. 9.5 percent to 90.49 percent - The two stations are considered to be **partially simulcast** stations. Provided that *one* of the two stations meets **all** MRS criteria described in Paragraph 33 above, the second station is included in the report if it (i) meets the criteria of Paragraph 33(a) and (b) and (ii) achieves the Average Quarter-Hour Rating described in Paragraph 33(c) for any one of the four basic Monday-Friday dayparts, viz., (6AM-10AM, 10AM-3PM, 3PM-7PM, 7PM-Midnight).
- c. 90.5 percent or greater - The two stations are regarded as **totally simulcast** stations for MRS purposes and therefore will be treated as a single station in **all** phases of the MRS criteria described in Paragraph 33. If the combined audience of the two stations is sufficient to meet **all** criteria of Paragraph 33, then both stations will be listed in the report even though one (or both) stations might not meet the MRS criteria if considered individually, so long as each station is mentioned in at least one Metro (or ADI) in-tab diary.

LIMITATIONS

35. LIMITATIONS/In addition to the sources of possible error which are described elsewhere in this report, the user should be aware of the limitations described below:

- a. The sample is drawn from telephone households only. Persons in nontelephone households are thereby excluded from the sample frame. Commercial establishments listed in directories are specifically excluded

from the sample. Steps are taken to exclude residents of group quarters from Arbitron's sample frame. Further, all possible telephone directories and all possible unlisted telephone numbers may not be available in the lists prepared by Metromail Corporation and used as Arbitron's sample frame.

- b. Effort is made to exclude households with a media affiliation. The inclusion or exclusion of such households from the sample is dependent upon information revealed in response to Arbitron's media affiliation question.

- c. The interviewer may not always be under the direct control of Arbitron. In certain instances, independent telephone survey organizations are utilized by Arbitron. As a result, there may be instances where Arbitron instructions are not followed.

- d. Nonresponding persons may have listening habits which differ from those of respondents. Persons residing in nontelephone households may have listening habits which differ from those of persons residing in households with telephones.

- e. Nonresponding persons in the original designated sample prevent the in-tab sample from being a perfect probability sample.

- f. The sample design and/or response patterns may preclude proportional representation of certain groups within the population such as ethnic groups, racial groups, persons in certain income or education groups, or persons whose primary language is other than English. Such persons may have listening habits which differ from other persons.

- g. The population estimates from Market Statistics used in designing the sample are based upon the Decennial U.S. Census and are subject to all the limitations inherent therein. In addition, population estimates are subject to limitations such as sampling errors, errors in locating undocumented populations, and processing and recording errors. Furthermore, the sources used by Market Statistics to update populations between decennial Census dates may not include adjustments for known or unknown over- or undercounts of various segments of the population, including undocumented population groups. In addition, annual population updates may be based on the results of sample surveys and are subject to their respective limitations. These defects and limitations in data from Market Statistics are inherent in the Arbitron estimates based thereon.

- h. Diaries, or portions thereof, may be completed improperly if the diary instructions are not understood or are not followed. Such diaries may therefore be unusable and excluded from the survey. Some diary entries may have been made on the basis of hearsay, recall, diarykeeper approximations or could have been influenced by comments made by the interviewer or others to survey participants.

- i. Human and computer processing errors may occur before or after the diaries are received by Arbitron. Consequently, the degree of variance in the data may be greater than that expected from sampling variance alone.

- j. The data upon which Arbitron has based its in-tab sample weighting, including racial or ethnic identification, may not be precise. Additionally, zip code information used in this report is subject to defects and limitations. Therefore, defects and limitations found in data supplied by others are inherent in Arbitron estimates based thereon.

- k. Logical analysis, preprocessing preparation or ascription of the data may affect some of the diary listening entries before the data are projected. Some diaries, or portions thereof, may also be checked by post-survey week telephone validation calls to diarykeepers. Diaries, or portions thereof, may thereby be modified or excluded from the survey. These procedures may affect a station's ability to meet MRS.

- l. Arbitron conducts research involving new methods of improving cooperation of diarykeepers and/or securing additional information from such persons. Occasionally, a portion of this research may be integrated with actual surveys and, if and when so done, may cause the degree of variance in the data to be greater than that expected from sampling variance alone.

- m. Certain data, such as when the station was on and off the air, facilities, call letters used, slogans claimed, format, programming, National Representative, network and time periods when two stations were simulcast or separately programmed, are based on data supplied by the stations and/or recent industry publications or notices. These data may not be accurate or timely and may affect the way certain audience estimates are reported.

Description of Methodology *(continued)*

n. Situations in which stations have or have had the same call letters or frequency or have changed call letters or frequency may result in diarykeeper confusion in correctly identifying the station to which the listening occurred.

o. Due to rounding, mathematical manipulation by the user of estimates for narrow dayparts in this report may produce a result which may be incongruent with estimates for broader dayparts also contained in this report.

p. Arbitron does not adjust for the fact that listening estimates for networks are not necessarily reflective of listening to actual programs carried by a network since not all network affiliates air all network programs.

RETENTION OF RAW MATERIALS

36. RETENTION SCHEDULE/In-tab Arbitron listening diaries used for the compilation of the most current audience estimates published in this report, along with all unusable diaries and other survey materials, will be stored for one year from the date on which this report was first mailed to subscribers by Arbitron; after such time, all diaries and other survey materials are destroyed. Subscribers to this report are advised that if special cross-tabulations of the reported estimates are desired, they should be ordered before the retention period has expired. Upon proper appointment, subscribers to this report may examine, but not copy, the in-tab Arbitron listening diaries used in this report at Arbitron's Laurel, MD, office.

SOURCE DOCUMENTATION

37. GENERAL/The source of the data contained in this report are diaries used in the compilation of audience estimates from each Standard and Condensed Radio Market Report for the Spring survey period. The user is referred to such reports for more complete information regarding Market Characteristics, Special Notices, Limitations, Qualifications and the Statistical Reliability of all audience estimates contained in this report.

RESERVATIONS OF RIGHTS

38. Arbitron reserves the right to exercise its professional research judgment in modifying, waiving or suspending any policy, procedure or element of methodology that would appear to Arbitron to be unreasonable, illogical or impractical in light of known conditions.

DISCLAIMER OF WARRANTIES

39. DISCLAIMER OF WARRANTIES/Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing Arbitron ratings; or the Arbitron data, estimates or ratings contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at subscriber's own risk.

**SPRING 1991
