# National Satellite Report

---

Fall 2007

Diary Only – excludes PPM Currency Markets

**Description of Methodology**

**The Purpose of This Report**

The purpose of this report is to provide audience estimates for Digital Audio Radio Service (i.e., satellite radio) channels and service providers. This report contains national-level AQH, AQH Rating, Cume, and Cume Rating estimates for individual satellite radio channels, and estimates for the combo of all channels offered by a satellite service plus the service’s service-identified listening. Estimates are available only for the channels, service providers, demos and dayparts provided.

**Channel and Service Provider**

Throughout this report, the term “Channel” refers to a unique channel of satellite radio programming. The term “Service Provider” refers to one of the two DARS licensees, either Sirius Satellite Radio® Inc. or XM Satellite Radio Inc. As these are subscription services, for reporting purposes, Arbitron considers all channels and both service providers as commercial entities.

**SOURCE DATA FOR THIS REPORT**

THE SOURCE DATA FOR THIS REPORT IS ALL SATELLITE RADIO LISTENING RECORDED IN IN-TAB DIARIES RETURNED DURING THE SURVEY INDICATED WHICH WERE USED TO PREPARE A REPORT RELEASED AS A PART OF A SYNDICATED SERVICE. THIS REPORT DOES NOT CONTAIN INFORMATION COLLECTED IN USABLE DIARIES WHICH WERE NOT INCLUDED IN ANY SYNDICATED REPORT, OR INFORMATION COLLECTED IN ANY ARBITRON PPM-BASED REPORTS, DEMONSTRATIONS OR TESTS, NOR DOES IT INCLUDE INFORMATION COLLECTED IN ANY CUSTOM RESEARCH PROJECT.

**Survey Area and Population**

The survey area for this report consists of all Metro, DMA® and TSA sampling units which are measured as a part of Arbitron’s Diary service. Unweighted data were projected to the total P12+ population for this group of sampling units. Survey areas measured as a part of Arbitron’s currency PPM service are excluded from the survey area of this report.

**Minimum Reporting Standard**

Estimates are reported for all satellite radio channels that were credited for at least one quarter-hour of unweighted listening in at least one in-tab diary in the specified demo and daypart.

**Broadcast Hours Adjustment**

Report users should be mindful that specific channels may not have been on the air for all possible broadcast hours within a daypart; audience estimates are not adjusted for periods when a channel was not on the air.

**Diary Instructions and Instrument Design**

The instructions printed in all diaries instruct diarykeepers to record their satellite radio listening; at this time, AM and FM are the two choices available to check in the diary’s “Band” column.

**Unique Aspects of Satellite Radio Diary Credit Methodology**

The policies and procedures used to credit satellite radio diary entries and prepare this report generally mirror those described in *Arbitron Radio Description of Diary Methodology*. However, there are policies and procedures that are unique to satellite radio, including those related to but not limited to the following circumstances:

- i. In instances where it is not clear if a diarykeeper was attempting to record listening to a terrestrial station or to a satellite radio channel, Arbitron’s diary edit procedures presume that the diarykeeper was attempting to record listening to an AM or FM radio station.
- ii. Satellite radio channels are credited for clearly reported occasions of satellite radio listening.
- iii. Diarykeepers included in this report may have reported listening to a satellite radio service provider without specifying a particular channel; this listening is reported in the Service Provider estimates.
- iv. This report includes 100% simulcast satellite radio programming transmitted via distribution platforms which do not require a satellite radio receiver.
- v. Satellite radio listening reported in survey areas not serviced by over-the-air satellite radio service is included in this report.
- vi. Reference data contained in this report—including the service name, channel number, channel name, format and streaming simulcast status—reflect the data on file as of the last day of the survey period. These data may be based on data supplied by satellite service providers, industry publications and information collected via other resources. The data may not be accurate or timely. Some of the data may affect the way certain audience estimates are reported.

**IMPORTANT REMINDER  
FOR USERS OF THIS  
REPORT**

ESTIMATES PUBLISHED IN THIS REPORT ARE BASED UPON DATA RETURNED FROM ALL ARBITRON DIARY SERVICE SURVEY AREAS. USERS OF THIS REPORT SHOULD NOT PRESUME THAT THESE ESTIMATES ARE PROPORTIONAL TO METRO-LEVEL SATELLITE RADIO ESTIMATES (WERE METRO-LEVEL SATELLITE RADIO ESTIMATES PUBLISHED). ADDITIONALLY, USERS OF THIS REPORT SHOULD NOT ASSUME THAT ALL DIARYKEEPERS INCLUDED IN THIS REPORT WHO HAVE REPORTED SATELLITE RADIO LISTENING ARE SATELLITE RADIO SUBSCRIBERS OR RESIDE IN THE HOUSEHOLD OF A SATELLITE RADIO SUBSCRIBER.

**Limitations of This Report**

This report is subject to all relevant limitations described in *Arbitron Radio Description of Diary Methodology*, Chapter 11, "Restrictions on Use of Reports and Limitations." Users of this report are urged to review and understand these limitations. Additionally, the estimates presented in this report and the unweighted data that comprise them are subject to the limitations of Arbitron's internal data processing systems.

**Accreditation of this Report**

This report is not accredited by the Media Rating Council® (MRC). This report is not part of a regular syndicated rating service accredited by the MRC. Arbitron has not requested MRC accreditation for this report.
