1963 BROADCASTING YEARBOOK • PAGE B-257

# **World Wide Distribution of Radio Receiver Sets**

The number of radio sets in the world (excluding the U.S., its possesisons and Canada) increased by 13 million in 1961 for a total of 201 million sets, according to the U.S. Information Agency report of Feb. 21, 1962. Wire speakers, for public listening, reached 43 million, an 8% increase of 3.3 million during the year. The following statistics are approximate and should be treated with caution, particularly when they refer to newly-developing countries. In several cases previously published figures have been reduced on the basis of data furnished by purportedly more reliable sources.

1963 BROADCASTING YEARBOOK • PAGE C-3

The Gates FM transmitter line - with a power range of from 10 watts to 20,000 watts - is represented here by the famed FM-5C five kilowatt model. Known throughout the industry for its "quiet as a church mouse" operation, the FM-5C transmits a tidal wave of true, rich high fidelity sound to the receiver. Responsible is the new Gates Cascade exciter — common in all Gates FM transmitters — providing from 30 to 15,000 cycle low distortion response. Write today for the complete Gates FM Fact File.

# MAJORITY OF U.S. AM & FM STATIONS **EQUIPPED WITH GATES PRODUCTS**

Broadcasting's "Most Preferred" Transmitters, Audio Systems, Recording Devices and Studio Accessories Bear the Gates Name.

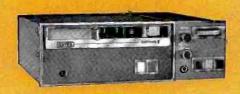

Professional Turntables . . . for truest high fidelity reproduction, play your recordings on Gates professional 12 and 16-inch tran-scription turntables. Complete information in the Gates Turntable Guide - No. 72.

New Dual Peak Limiting Amplifier . . .

brings stereo signal balance up full in both channels for the dynamic range, third dimension effect of stereo programming. Also ideal for any service where two limiting amplifiers are required. Switch to stereo or to completely separate dual operation. Write for Bulletin No. 108,

All New Cartritape II . . .

the ultimate in transistorized tape cartridge systems offering the quality and features formerly found only in profes-sional reel-to-reel tape machines. Separate record and play heads. Playback monitoring from tape while recording. Record amplifier plugs into any playback unit for professional recording. All amplifiers and relays are of plug-in modular construction for mono, stereo and 1, 2 or 3 tone operation. Many more exclusive features - write for Brochure No. 115.

Cycloid . . the new Gates FM antenna feati binary adjustment – a major teclogical advance in ring type radi elements. Binary adjustment exclusive tuning arrangement ent pending) whereby the induc of the ring is changed at the time the antenna is adjusted for pacitive tuning. The advanta uniform L/C for adjustment over FM frequency range. Write for chure No. 111.

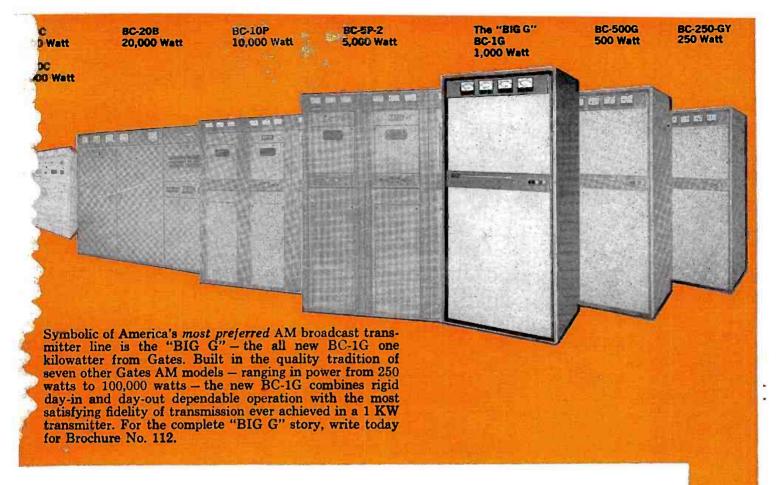

## **GATES RADIO COMPANY**

Subsidiary of Harris-Intertype Corporation

QUINCY, ILLINOIS

Offices in: HOUSTON, NEW YORK, LOS ANGELES, WASHINGTON, D.C.
In Canada: CANADIAN MARCONI COMPANY
Export Sales: ROCKE INTERNATIONAL CORP. • 13 EAST 40th St. • NEW YORK CI

# WHAT'S GATES' SUCCESS SECRET?

Continuous Research and Development of New and Better Broadcast Equipment. Company Noted for Most Complete Line in Broadcast Industry.

**Touch-Control Nerve Centers** 

Che President dual channel transistor console, with 24 illuminated touch-control keys for precise finger-tip command of multiple input circuits. The touch-control nerve center replaces switches and knobs spread across the control board. Write for Brochure No. 106.

The Ambassador single channel transistor console. The consolidated nerve center handles many combinations of turntables, tape machines and projectors with complete control coordination. It is as advanced as the dial phone over the old "Number please?".

Write for Brochure No. 105,

Exclusive 10-Channel Stereo

The Executive transistor console is designed for either full-10 channel stereo operation or monaural AM, FM and TV dual channel broadcasting with stereo inbuilt for your future needs. The Executive offers unparalleled versatility in compatible and simultaneous program originations.

Write for Brochure No. 107.

#### **Gates Transistor Consoles**

Here is a rare combination of exquisite styling by one of America's foremost industrial designers...direct natural placement of operating controls with large "feel-of-the-board" knobs on all mixing channels... and the ultimate in reliability with Gates exclusive Solid Statesman transistor amplifiers, gold program switching contacts and highly advanced electronic circuitry.

### NEMS-CLARKE® Tireless Wireless, cuts FM network costs!

FM networks can be set up with a handshake and a few hundred dollars with a Nems-Clarke FM Rebroadcast Receiver. Stereo/monaural FM networks need no longer depend upon marginal performance of Hi-Fi receivers, or expensive telephone lines.

This new crystal controlled Rebroadcast Receiver, FMR-101, meets the most exacting engineering requirements. It contains transistors and nuvistors in optimum combination and has a solid state power supply. It can be pre-tuned to any fixed point in the FM band and provides the highest quality audio reproduction available. The RF section has a noise figure of only 3 db, and sensitivity is one micro-volt for 30 db of quieting. The filter network is specially designed to provide an IF bandwidth of 200 kc with a shape factor of 2.7 to 1.

315 kw

In Excess of 2500 ft. Continuous Lengths

H8, HELIAX is available, both jacketed and unjacketed in standard and high average power designs. High power designs use high temperature polyethylene insulation.

H8, HELIAX features corrugated copper inner and outer conductor construction. The corrugations impart unusual strength and flexibility, while maintaining excellent electrical characteristics.

H8, HELIAX peak power rating is 315 kw. Average power ratings at 100 mc are:

| <b>н8</b> -50   | Unjacketed, 50 ohm               | 23 kw   |
|-----------------|----------------------------------|---------|
| <b>н」8</b> -50  | Jacketed, 50 ohm                 | 26.5 kw |
| <b>н8</b> -50А  | Unjacketed high power, 50 ohm    | 34.5 kw |
| <b>н」8</b> -50А | Jacketed high power, 50 ohm      | 40 kw   |
| Attenuati       | on is 0.14 db/100 feet at 100 mc |         |

H8, HELIAX is available in continuous specific lengths as limited only by receiving and handling facilities.

Who has a recorder to fill every broadcast need?

**AMPEX** 

Ampex offers the widest selection of professional broadcast recorders today. Each providing superior performance. Each providing maximum reliability. There's the Ampex 351, standard of the broadcast industry. The Ampex 352, reproducer for monophonic or stereo-phonic sound. The Ampex 354, recorder/ reproducer designed for stereophonic sound. The Ampex 601, professional quality portable recorder/reproducer. The Ampex PR-10, suitcase-size recorder/reproducer with capabilities of a studio console. And the Ampex 3200 duplicator, master/slave combination for high qual-

ity tape duplicating at low cost. Most Ampex recorders have stereophonic versions. The 350 and PR-10 Series offer 4-track playback. All are dependable, flexible, easy to operate. And all carry the Ampex "Four Star" one-year warranty. Ampex also makes 600 series professional tape noted for long life and constant performance. For more details write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter St., Redwood City, California. ### Components for profitable broadcasting

With rising costs in the industry, broadcasters must keep an alert eye on expenses. ATC equipment can be adapted to a station's needs in varying degrees of automation to reduce operating costs and provide additional revenues. ATC personnel are experienced broadcasters who will counsel with you on how to get most satisfactory results. Pictured above, left to right: Music programming, monaural or stereo, from Ampex Series 350 reel-to-reel tape playbacks; commercial and public service announcements from heavy-duty ATC 55; Systems Programmer, Program Time Control, Automatic Program Logging and associated audio equipment for controlling automation system; program and logging recording equipment plus standard ATC playback units for station ID's, news, weather, ETC.

### CAMART DUAL SOUND EDITOR

Model SB-111

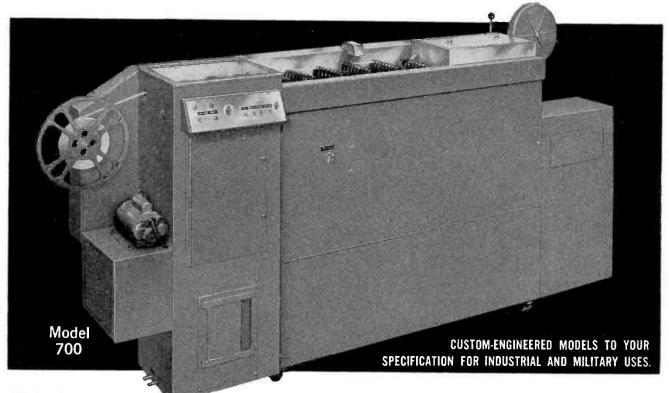

Complete with optical sound reproduction head (or choice of magnetic soundhead) base plate, amplifier-speaker. For single or double system sound. An unbeatable combination with Zeiss Moviscop 16mm precision viewer, sharp brilliant 21/4

The Camera Mart, Inc. 1845 Broadway, New York 23, N. Y. PLaza 7-6977

Zeiss Moviscop Viewer \$96.00 Camart Dual Reader \$195.00 Combination Price \$269.50

### WHY BUY HALF A PROCESSOR WHEN A WHOLE ONE COSTS YOU LESS?

ALLEN REVERSAL PROCESSORS
ARE COMPLETE, DOWN TO THE LAST ACCESSORY

### Features include:

- ELECTRONICALLY CONTROLLED INFINITELY VARIABLE SPEEDS UP TO 60 FEET PER MINUTE
- AUTOMATIC TEMPERATURE CONTROL
- DAYLIGHT LOADING
- COMPLETELY AUTOMATIC OPERATION
- HEAT AND REFRIGERATION
- CHEMICAL RECIRCULATION
- COMPLETE PLUMBING
- RUGGED CONSTRUCTION
- LOW MAINTENANCE

When you compare the prices of the completely self-contained ALLEN PROCESSORS against other makes (those with "hidden extras"), you will be amazed at the money you can save. For full information on the model "700" (pictured) or other models available, call or write.

For immediate delivery call collect.

### PRODUCT GUIDE:

WHAT product or service ... WHERE to find it ...

See page C-3

• Single unit processes, controls, and delivers antenna signal on any channel-including same channel

You can now offer CATV reception on all twelve VHF channels with no adjacent-channel interference! By adding a Jerrold Channel Commander to your head end for each adjacent channel desired, you achieve 12-channel opera-

tion with minimum equipment.

The Channel Commander is a complete, compact unit which processes, controls, and delivers clear, interference-free signals on any desired VHF channel, including direct operation on the received frequency in both the high and the low bands.

In conjunction with Jerrold microwave and all-band-system equipment, the Channel Commander gives you command of the entire VHF band, lets you offer CATV subscribers the widest choice of entertainment possible over their present TV sets.

Channel Commander's compact modular design and compatibility with your present headend equipment lets you "go 12 channels" immediately or in channel-at-a-time stages. Call your Jerrold factory representative or write

for complete technical data.

### **Eliminate Propagation Fades** From Your TV Signal

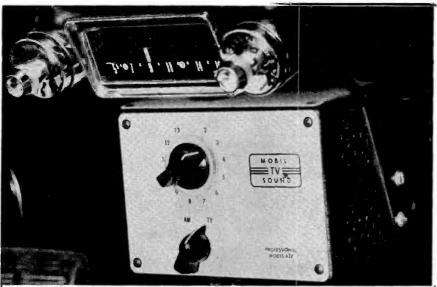

Now you can end fades and washed out fringe-area signals simply by inserting a Micromeg preamplifler between your relay receiving antenna and the mixer. Micromeg has the effect of boosting your transmitter power four to ten times or of Increasing the size of a six-foot-diameter antenna to one of 12 to 20 feet. In new installations, a Micromeg will allow you to space your repeater stations farther apart without deterioration of signal-tonoise ratio.

WHAT IS A MICROMEG? It is a low-noise, low-signal-level RF parametric amplifier. It is available in several indoor and outdoor models covering the UHF. 2000Mc, and 6000Mc range. Power requirement: 110V AC. A semiconductor varactor diode causes amplification by pumping power from a local RF source to the signal. APPLICATIONS include translators, remote pick-up broadcasting, inter-city microwave links, community antenna TV systems. Please write for the full story.

THE MOBILSOUND TV AUDIOMONITOR (Model 627) is being used by network and independent television stations in principal cities in USA and Canada. Receives TV-Audio (VHF) through AM car radio having 12 volt ignition system. Extreme sensitivity provides good reception up to 70 miles from transmitter. Transistorized tuner, Static-free reception even in New York City. No special antenna is required. Use of AM radio is not impaired. Easy to install. Compact (4x6x7 in.) Custom manufactured by leading West Coast electronics firm. FCC certificated.

Price: \$124.50, F.O.B. Factory (incl. F.E.T.) Quantity discounts offered. Only instrument of its kind on the market, and available exclusively from. . .

### One station told us...

# "The New Ozalid system saved us at least 1½ people!"

Sure, the station was enthusiastic! And why not? In just one year, 144 stations and 2 station reps (at last count) have adopted the lower cost Ozalid simplified data processing system for faster billing methods, short-cut traffic procedures, and more accurate, more current availabilities. Regardless of station size, the Ozalid system brings speed simplicity, accuracy to internal operations. This isn't our opinion . . . it's your own industry's opinion.

€.

WMAL, WMAL-FM, WMAL-TV, Washington, D. C. (Mr. Dick Stakes, Controller) "The system was originally installed to help eliminate paperwork involved in the preparation of our daily station logs. These logs formerly took two girls one full day to prepare. Now they're done in two hours . . . by one girl!"

WBYS, Canton, Illinois (Mr. Charles E. Wright, Gen. Mgr.) "... purchase of this machine was one of the wisest management decisions made in many years of broadcasting. When a small station such as WBYS can save what it does, I am sure any station in the country can do likewise."

WLBC-TV, WLBC-WMUN, Muncie, Indiana (Mr. W. F. Craig, V. P.) "The original investment was paid for in a

few months by the elimination of one full-time person and the lessening of overtime on other office personnel. The thing that surprised us, too, was the cost for paper supplies was less last year than it had been during the years we used ordinary paper!"

WISN, WISN-TV, Milwaukee, Wisconsin (Mr. John E. Hinkle, Chief Acc.) "... has saved this company at least 1½ people. It has eliminated all overtime! I personally recommend it for its time-saving ability, its economy, and, most important, its accuracy!"

WFLA, WFLA-TV, Tampa, Florida (Mr. George W. Harvey, V. P., Gen. Mgr.) "... we use it for producing our daily log for television which runs 22 pages, as well as a daily availability sheet ... Ozalid procedures have saved us time, personnel, and money!"

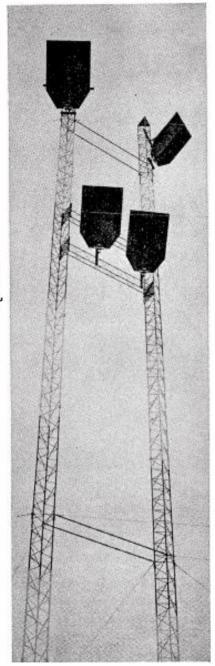

For full information about this system, write Ozalid, Dept. 495, Johnson City, New York.

### "Sylvania GB-5749 cuts costs 50%!"

Paul F. Rex, Chief Engineer, WISR, Butler, Penna., says—"Sylvania Gold Brand 5749 has solved our limiter amplifier problem. Proper operating curve adjustments are now routine—with unselected tubes—at less than one-half our former cost.

"Now we enjoy excellent fidelity—no thumps—with 15 to 17db of compression. This means good high level audio at the receiver. We recommend Sylvania Gold Brand Tubes for those tough problems." If, like WISR, you have a critical tube job—replace with Sylvania Gold Brand Tubes.

### With TELEMETone set fills all test needs

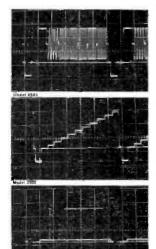

These new TELECHROME modularized test signal units can be removed from your equipment rack in less than 5 seconds. No cables to remove. No terminations to change. Now one set of equipment covers all requirements -remotes-transmitters-studios-on and off air test and alignment, Fully transistorized for reliable, service free operation.

### These Features Exclusive with TELECHROME:

- Each test signal unit complete with power supply and internal sync nothing else to buy.
- Operates from either internal or external sync at the flick of a switch.
- Requires only sync and blanking signals for "external" operation.
- Simultaneous recurrent and VIT signals (two separate 75-ohm outputs on recurrent signals).
- Individual high impedance VIT amplifiers for bridging program line.
- Designed to cover all broadcast requirements.

Model 3501 Multiburst Generator: New burst generating techniques provide less than 1% burst distortion. Plug-in oscillators facilitate change of burst frequencies. Plug-in circuit modules facilitate maintenance.

Model 3502 Stairstep Generator: 3-5 and 10 steps to cover all videotape, kine and general requirements. Both 3.58 and 1 MC subcarriers. Back porch color burst to IRE standards. 10-50-90% APL on all signals.

Model 3503 Sine Squared Pulse and Window Generator: T and 2T (.125 and .250 Usec) pulses for VIT and Recurrent. Separate T/2 (.065 Usec) signal for studio and lab tests. Window edges also sine-square. Position of pulse and window adjustable to meet any standard.

Model 3505 Test Signal Selector: Permits instantaneous selection of test signals. Illuminated push buttons available.

### How to Apply for a Broadcasting Station (AM/FM/TV)

(updated to November 1962)

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (am), frequency modulation (fm), or television (tv) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would be in the public interest.

qualified, and that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the Commission's Rules, "Practice and Procedure," while station operation is covered by Part 3, "Radio Broadcast Services." The latter includes technical standards for am, fm, and tv stations; fm frequency allocations by classes of stations, and tv channel assignments by states and communities. Copies of these rules are not supplied by the Commission but are available in Volumes I and III of the FCC rules and regulations sold by the Superintendent of Documents, Washington 25, D. C.

Most applicants employ engineering and legal services in preparing their applications. In many cases the applicant must have a search made for a frequency on which he could operate without causing or receiving interference from existing stations and stations proposed in pending applications. Also, he usually requires legal advice and assistance in filling out the application form. The workload of the Commission does not enable it to make frequency studies, etc., for prospective applicants. Nor does it recommend individual lawyers or engineers. Those who practice before the Commission have their own associations, the members of which are listed in various trade publications.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is am, fm, or tv.

### Selecting a Prequency

Am broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power and up to 1 kilowatts serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night. There is no separate classification for am operation by educational stations. There are two classes of commerical fm stations. Class A fm stations employ up to 1 kw in power for community service; and Class B stations use more power for metropolitan or rural coverage. Educational fm stations are in a separate category and may operate with power as low as 10 wafts. Operating fm stations may apply for a "Subsidiary Communications Authorization" to furnish background music and other supplemental program service. FM stations, if they so desire, may engage in stereophonic broadcasting, for which no special application is required. An applicant for a tv station must request a vhf (Very High Frequency) or a uhf (Ultra High Frequency) channel assigned to the community in which he proposes to operate, or a place within 15 miles of that community. Tv "translator" stations serve remote communities by picking up and rebroadcasting the programs of outside stations, with the latter's permission. They operate on vhf or the upper 14 uhf channels. Certain channels are reserved for educational tv operation.

### Applying for a Construction Permit

Once a prospective licensee has decided upon the type of station he desires, the place where it would be located and determines the programming needs of the audience he intends to serve, the next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers am, fm or tv broadcast, except educational fm applicants who use Form 340,

translators (Form 346) and uhf station boosters (Form 343). These forms require information about the citizenship and character of the applicant, as well as his financial, technical, and other qualifications, plus details about the transmitting apparatus to be used, antenna and studio locations, and the service proposed. A specific channel or frequency must be requested. Triplicate copies are required, one of which must be executed under oath or affirmation.

### Applicants Must Give Local Notice

Applicants for new broadcast stations, license renewals, station sales or major changes in existing stations must give local notice of such intent, also of any subsequent designation of their applications for hearing. This is done over the applicant's local station (if any) and by advertising in the local newspaper.

### Application Processing

All broadcast applications are twice reported by the Commission— when first tendered and, again, when accepted for filing. An application is not acted upon until at least 30 days after public notice is given of its acceptance. During that time it is subject to objecting petitions being filed.

being nied.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal, and financial aspects by the Broadcast Bureau, which makes recommendations to the Com-

mission.

If, upon examination of an application, the Commission determines that there are no engineering or other conflicts, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued. All such grants are announced publicly. Petitions for reconsideration must show good cause why the objections were not raised prior to the grant. grant.

### **Hearing Procedure**

Hearing Procedure

Where it appears that an application violates the Commission's rules and regulations; that serious interference would be caused; there is protest of merit; or if other serious questions of a technical, legal, or financial character are involved, a hearing is usually required. The Commission must accord a hearing to competing, timely filed applicants.

If unable to grant an application, the Commission is required to notify the applicant and other known parties in interest as to the reason. The applicant is usually given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

In designating an application for hearing, the Commission gives public notice of the issues for the information of the applicant and others concerned. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after being designated for hearing, an application to resolve engineering or other problems. (Commission approval is required for all mergers or "pay-offs" involving competing applicants.)

Hearing on competing applications are normally held at the Commission's Washington offices; however, hearings on license revocations and renewals often are held in the communities affected.

Hearings are customarily conducted by an examiner. The hearing examiner has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A prehearing conference is generally held to reach agreement on procedural matters.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the Commission has the privilege of filing proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing proposed findings of fact and conclusions to support their contentions are initial decision, the applicant or any other interested party has 30 days from the date on which the initial decision was announced to file excepti

hearing examiner's initial decision, the latter becomes effective 50 days after its issuance, unless otherwise ordered by the Commission. Court appeals can be taken within 30 days following announcement of the Commission decision.

### Construction Permit

When an application is granted, a construction permit is issued. The permittee may then suggest call letters which, if available and conforming to the rules, are issued. A maximum of 60 days from date of the construction permit is provided in which construction shall hegin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction the permittee conducts equipment (not program) tests.

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License"), or Form 341 (for non-commercial educational fm stations), Form 347 (for tv translators). Applicants must show compliance with all terms, conditions, and obligations set forth in the original application and the construction permit. Not until he applies for a license can the holder of a construction permit request authority to conduct program tests. The license application form provides a space for making program test request, or it can be made separately. A station license and program test authority are issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

### Renewal of License

Applicants for renewal of station licenses must show that they have operated according to the terms of their authorizations. Renewal applications are made on Form 303 ("Application for Renewal of Broadcast Station License"), except that noncommercial educational fm licensees use Form 342; uhf station boosters Form 345, and tv translators Form 348. Public notice of the filing of renewal application must be made by the licensee both over its station and in the local newspaper.

### Sales and Transfers

Sales and Transfers

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License"). Should the permittee or licensee wish to transfer corporate control, he applies on Form 316 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License"). Public notice of the assignment or transfer application must be made by the licensee both over its station and in the local newspaper.

Form \$16 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial change in interest. Sales of stations held less than three years are subject to automatic Changes

### Construction Changes

Applicants for authority to make construction changes in existing stations make application on the same form used in applying for a construction permit for the type of station involved.

### CONCERNING FCC RULES AND REGULATIONS

"How to Apply for a Broadcast Station License" is a concise report prepared by the FCC Office of Reports & Information as a lay language guide. Serious applicants will also wish to study the FCC Rules & Regulations. Excerpts of the rules begin on page C-38.

### FCC Rules Regulating Radio-Television

(Selected sections amended to Sept. 1, 1962. Compiled with the cooperation of Pike & Fischer Inc., publisher of Pike & Fischer Radio Regulation.)

### ALLOCATIONS AND DEFINITIONS In am rules . .

§3.1 Standard broadcast station.—The term "standard broadcast station" means a station licensed for the transmission of radio-telephone emissions primarily intended to be received by the general public and operated on a channel in the band 535-1605 kilocycles, inclusive.

\$3.2 Standard broadcast band.—The term "standard broadcast band" means the band of frequencies extending from 535-605 of freque kilocycles.

\$3.3 Standard broadcast channel.—The term "standard broadcast channel" means the band of frequencies occupied by the carrier and two side bands of a broadcast signal with the carrier frequency at the center. Channels shall be designated by their assigned carrier frequencies. The 107 carrier frequencies assigned to standard broadcast stations shall begin at 540 kilocycles and be in successive steps of 10 kilocycles.

§3.4 Dominant station.—The term "dominant station" means a class I station, as hereinafter defined, operating on a clear

§3.5 Secondary station.—The term "secondary station" means any station except a class I station operating on a clear

§3.6 Daytime.—The term "daytime" means that period of time between local sunrise and local sunset.

§3.7 Nighttime.—The term "nighttime" means that period of time between local sunset and 12 midnight local standard time.

§3.8 Sunrise and sunset.—The term "sunrise and sunset" means for each particular location and during any particular month, the time of sunrise and sunset as specified in the instrument of authorization.

§3.9 Broadcast day.—The term "broadcast" means that period of time between local sunrise and 12 midnight local stand-

S3.10 Experimental period.—The term "experimental period" means that time between 12 midnight and local sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any standard broadcast station on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period. No station licensed for "daytime" or "specified hours" of operation may broadcast any regular or scheduled program during this period.

§3.11 Service areas.—(a) The term "primary service area" of a broadcast station means the area in which the ground wave is not subject to objectionable interference or objectionable fading.

(b) The term "secondary service area" of a broadcast station means the area served by the sky wave and not subject to objectionable interference. The signal is subject to intermittent variations in intensity.

(c) The term "intermittent service area"

subject to meanity.

(c) The term "intermittent service area" of a broadcast station means the area receiving service from the ground wave but beyond the primary service area and subject to some interference and fading.

2212 Portable transmitter.—The term

gs.1.2 Fortable transmitter.—The term "portable transmitter" means a transmitter so constructed that it may be moved about conveniently from place to place, and is in fact so moved about from time to time, but not ordinarily used while in motion. In the standard broadcast band, such a transmitter is used in making field intensity measurements for locating a transmitter site for a standard broadcast station. A portable broadcast station will not be licensed in the standard broadcast band for regular transmission of programs intended to be received by the public.

§3.13 Auxiliary transmitter.—The term

\$3.13 Auxiliary transmitter.—The term "auxiliary transmitter" means a transmitter maintained only for transmitting the regular programs of a station in case of failure of the main transmitter.

Allocations—(am)

\$3.21 Classes of standard broadcast channels and stations.

\$3.21 Classes of standard broadcast channels and stations.

(a) Clear channel. A clear channel is one on which the dominant station or stations render service over wide areas, and which are cleared of objectionable interference within their primary service areas and over all or a substantial portion of their secondary service areas. Stations operating on these channels are classified as follows:

(1) Class I station. A Class I station is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels, and from stations on adjacent channels, and from stations on the same channel in accordance with the channel designation in §83.25 or 3.182. The operating power shall not be less than 10 kilowatts nor more than 50 kilowatts. (Also see §3.25[a] for further power limitation.)

(2) Class II station. A Class II station is a secondary station which operates on a clear channel (see §3.25) and is designed to render service over a primary service area which is limited by and subject to such interference as may be received from Class I stations. Whenever necessary a Class II stations hall use a directional antenna or other means to avoid interference with Class I stations and with other Class II stations in accordance with \$3.182 (and §3.22 in the case of Class II-A station is an unlimited time Class II station operating on one of the clear channels listed in §3.22 and assigned to a community within a state specified in the Table contained in that section. A Class II-A station is an unlimited time Class II station other than 10 kilowatts at any time.

(ii) Class II-B station. A Class II-B station is an unlimited time Class II station other than those included in Class II-M station other than those included in Class II-D station of the Class II station operating unlimited time on 750 kc at Anchorage, Alaska, shall b

(b) Regional channel. A regional chan-

### Special Services

There are three companies which provide special publishing services of FCC actions and other engineering and legal matters pertaining to broadcasting. They are: Broadcast Service Eureau Inc. P. O. Box 5974. Washington 14. D. C. Oliver 4-8531. Burr N. Edwards, pres & treas; John C. Keating, vp; James Christofer, sec. Supplies rules and standards to radio and tv stations.

Specializing in rapid reproduction, delivery FCC Rules & Regulations to Broadcasting Industry. Up-to-date amondments with particulars including any upcoming information from FCC, and important Proposed changes.

BROADCAST SERVICE BUREAU, Inc.

Pike & Fischer Inc. 1735 DeSales St., N.W., Washington 6, D. C. Sterling 3-3660. Henry G. Fischer, pres; John W. Willis, vp. Publishers of "Pike & Fischer Radio Regulation," comprehensive reports of FCC rules, amendments, decisions and related radio and tv documentary services. Rules Service Co. 1001 15th St., N.W., Room 70, Washington 5, D. C. Sterling 3-3917. M. B. Spaulding Jr., editor & pub-lisher. Loose leaf subscription service on FCC Part 9 as well as all FAA Regula-tions.

nel is one on which several stations may operate with powers not in excess of 5 kilowatts. The primary service area of a station operating on any such channel may be limited to a given field intensity contour as a consequence of interference.

(1) Class III station. A Class III station is a station which operates on a regional channel and is designed to render service primarily to a principal center of population and the rural area contiguous thereto. Class III stations are subdivided into two classes.

(i) Class III-A station. A Class III-A station is a Class III station which operates with power not less than 1 kilowatt nor more than 5 kilowatts and the service area of which is subject to interference in accordance with §3.182.

(ii) Class III-B station. A Class III-B station is a Class III station which operates with power not less than 0.5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt, nor more than 1 kilowatt night and 5 kilowatt subject to interference in accordance with §3.182.

(c) Local channel. A local channel is one on which several stations operate with

nor more than 1 kilowatt night and 5 kilowatts daytime, and the service area of which is subject to interference in accordance with \$3.182.

(c) Local channel. A local channel is one on which several stations operate with powers no greater than provided in this paragraph. The primary service area of a station operating on any such channel may be limited to a given field intensity contour as a consequence of interference. Such stations operate with power no greater than 250 watts nighttime, and power daytime no greater than 1 kilowatt (or no greater than 250 watts if the station is located 100 kilometers [62 miles] or closer to the Mexican border, or in the area of the state of Florida south of 28 degrees north latitude and between 80 and 82 degrees west longitude).

(1) Class IV station. A Class IV station is a station operating on a local channel and designed to render service primarily to a city or town and the suburban and rural areas continguous thereto. The power of a station of this class shall not be less than 0 it kilowatt, and not more than 0.25 kilowatt nighttime and I kilowatt daytime, and its service area is subject to interference in accordance with §3.182.

NOTE 1: Under NARBA, the power ceiling for Class IV stations is 250 watts daytime as well as nighttime. The U.S.-Mexican Agreement permits such stations to operate with up to 1 kilowatt power daytime if they are located further than 100 kilometers [62 miles] from the Mexican border. Pursuant to the U.S.-Mexican Agreement and informal coordination with the other NARBA signatories, the Commission will consider applications for Class IV stations on local channels with daytime powers more than 250 watts, up to 1 kilowatt, if such station is to be located outside of the areas specified in paragraph (c) of this section, and if no objectionable interference would be caused (under the standards set forth in the pertinent international agreement) to a duly notified station in Mexico, Haiti, or any foreign country signatory to NARBA.

NOTE 2: All authori

§3.22 Assignment of Class II-A stations.

(a) Table of assignments. One Class II-A station may be assigned on each channel listed in the following table within the designated state or states:

State(s)

| Chan-<br>nel<br>(kc)            | Ex                                | isting<br>I Station                                       | in which<br>Class II-A<br>Assignment<br>may be<br>Applied for        |

### Tektronix Waveform Monitors

For Rack or Console · Types RM527, 527

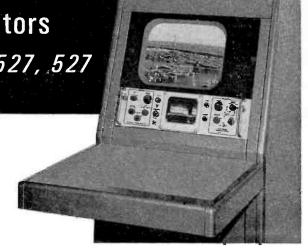

In a rack or console, this Tektronix Waveform Monitor adapts easily to control applications. For example, in addition to conventional two LINE and two FIELD displays, you can choose from three calibrated

time-base rates—at 0.125 H/CM, at 0.025 H/CM with 5X Magnifier, and at 0.005 H/CM with 25X Magnifier—which eliminates the need for time markers.

You can use the dual inputs differentially.

And you can observe bright displays accurately and dependably over a full 7-centimeter by 10-centimeter viewing area.

Adaptable and versatile, this Waveform Monitor features: amplitude linearity within 1% over full 7-cm of vertical deflection • sensitivity from 0.25 volt minimum to 1.6 volts maximum for 140 IRE units • response flat within 1% from 60 cps to 5 Mc or new IRE rolloff • internal calibrator for 1.0 and 1.4 volt peak-to-peak signals • backporch dc restoration, with no color-burst distortion.

### SPECIAL MODEL TYPE RM527 MOD132

This special model of the rack-mount waveform monitor has all capabilities of the Type RM527 plus two additional features—a Line Selector and a Video Distribution Amplifier.

The Line Selector permits detailed analyses of single television lines (particularly useful with 4½ inch cameras), and the Video-Distribution Amplifier permits slaving a picture monitor to the oscilloscope display.

Type RM527 . . . . \$1000 5¼" high, 16¾" wide, 16" deep

Type 527 . . . . . . . . \$925 93/4" high, 81/2" wide, 163/4" deep

### TYPE 526 COLOR-TELEVISION VECTORSCOPE

The Vectorscope enables quick and accurate relative phase and amplitude measurements (of chrominance information in the N.T.S.C. Color Signal). Dual inputs facilitate equipment matching. Also, in addition to vector display, the Vectorscope can present the chroma signal demodulated along any phase-angle axis with respect to time.

Other Overseas areas, please write or cable directly to Tektronix, Inc., International Marketing Department, P. O. Box 500, Beaverlon, Oregon, U.S.A. Cable: TEKTRONIX.

(b) Minimum service to "white" areas. No Class II-A station shall be assigned unless at least 25% of its nightlime interference-free service area or at least 25% of the population residing therein receives no o'hr in'erference-free nighttime primary service.

(c) Power. Class II-A stations shall operate with not less than 10 kw power nighttime.

(d) Protection. (1) Protection by Class II-A stations to other stations. The cochannel Class I-A station shall be protected by the Class II-A station to its 0.1 mv/m contour daytime and its 0.5 mv/m 50% skywave contour nighttime. All other stations of any class authorized on or before October 30, 1961, shall normally receive protection from objectionable interference from Class II-A stations as provided in \$3.182.

(2) Protection to Class II-A stations as provided in \$3.182.

(2) Protection to Class II-A stations account of the contour to which it is limited by the co-channel Class I-A station.

(e) Applications not complying with this section. Applications for Class II-A stations which do not meet the requirements of paragraphs (b) and (c) of this section will be returned without further consideration.

§3.23 Time of operation of the several

§3.23 Time of operation of the several classes of stations.—The several classes of standard broadcast stations may be licensed to operate in accordance with the following:

following:

(a) "Unlimited time" permits operation without a maximum limit as to time.

(b) "Limited time" is applicable to class II (secondary) stations operating on a clear channel with facilities authorized before Nov. 30, 1959. It permits operation of the secondary station during daytime, and until local sunset if located west of the dominant station on the channel, or if located east thereof, until sunset at the dominant station; and in addition during night hours, if any, not used by the dominant station or stations on the channel.

(c) Daytime permits operation during local description of the channel.

annt station or stations on the channel.

(c) Daytime permits operation during the hours between average monthly local sunrise and average monthly local sunset. Daytime stations operating on local channels with a power of 0.1 kw or 0.25 kw may, upon notification to the Commission and to the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

at hours beyond those specified in their license.

(d) "Sharing time" permits operation during hours which are so restricted by the station license as to require a division of time with one or more other stations using the same channel.

(e) Specified hours means that the exact operating hours are specified in the license. (The minimum hours that any station shall operate are specified in Section 3.71.) Specified hours stations operating on local channels with a power of 0.1 kw or 0.25 kw, except those sharing time with other stations may, upon notification to the Commission and the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

§3.24 Broadcast facilities; showing re-

\$3.24 Broadcast facilities; showing required.—An authorization for a new standard broadcast station or increase in facilities of an existing station will be issued only after a satifactory showing has been made in regard to the following, among others: others:

made in regard to the following, among others:

(a) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(b) That objectionable interference will not be caused to existing stations or that if interference will be caused, the need for the proposed service outweighs the need for the service which will be lost by reason of such interference. (For special provisions concerning interference from Classes II-A stations to stations of other classes authorized after October 30, 1961, see Note 2 to §3.21 and §3.22[d]). That the proposed station will not suffer intereference to such an etxent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference, see §§3.182 and 3.186.)

(c) That the applicant is financially qualified to construct and operate the proposed station.

(d) That the applicant is legally qualified.

(d) That the applicant is legally qualified. That the applicant (or the person or persons in control of an applicant corporation or other organization) is of good character and possesses other qualifications sufficient to provide a satisfactory public service. public service.

PAGE C-40 • 1963 BROADCASTING YEARBOOK

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations of this subpart and §3.188.)

(f) That the facilities sought are sub-

subpart and §3.188.)

(f) That the facilities sought are subject to assignment as requested under existing international agreements and the rules and regulations of the Commission.

(g) That the population within the 1 m/v contour does not exceed 1.0 per cent of the population within the 25 mv/m contour: Provided, however, that where the number of persons within the 1 m/v contour is 300 or less the provisions of this subparagraph are not applicable.

(h) That, in the case of an application for a class II station, the proposed station would radiate, during two hours following local sunset, in any direction toward the 0.1 mv/m ground-wave contour of a cochannel United States class I station, no more than the maximum radiation values permitted under the provisions of \$3.187.

(i) That, in the case of an application for a Class II-A station (see §3.22), 25% or more of the area or population within the nighttime interference-free primary service from another station.

(j) That the public interest, convenience and necessity will be served through the

no nighttime interference-Iree primary service from another station.

(j) That the public interest, convenience and necessity will be served through the operation under the proposed assignment. §3.25 Clear channels: Classes I and II stations.—The frequencies in the following tabulations are designated as clear channels and assigned for use by the classes of stations given:

nels and assigned for use by the classes of stations given:

(a) On each of the following channels, one Class I station will be assigned, operating with power of 50 kw, 640, 650, 660, 670, 780, 820, 830, 1020, 1030, 1040, 1100, 1120, 1160, 1180, 1200 and 1210 kc. In addition, on the channels listed in this paragraph, Class II stations may be assigned as follows:

(1) On 670, 720, 780, 880, 890, 1020, 1030, 1100, 1120, 1180 and 1210 kc, one Class II-A unlimited time station, assigned and located pursuant to the provisions of §3.22.

(2) On the channel 750 kc, an unlimited time Class II station located at Anchorage Alaska.

(3) On the channel 760 kc, an unlimited time Class II station located at San Diego, California.

(4) On any of the channels listed to the control of the channels of t

time Class II station located at San Diego, California.

(4) On any of the channels listed in this paragraph (to the extent consistent with the assignments provided in subparagraphs, I], [2], and [3] of this paragraph), unlimited time Class II stations located in Alaska, Hawaii, Virgin Islands, or Puerto Rico, which will not deliver more than 5 microvolts per meter groundwave day or night or microvolts per meter 10 percent time skywave at night at any point within the continental limits of the United States excluding Alaska.

(5) On any of the channels listed in this paragraph (to the extent consistent with the Class I, Class II-A, and Anchorage and San Diego Class II assignments provided in this paragraph, and, in the case of limited time stations, subject to the restrictions contained in \$3.38), limited time and daytime only stations, as follows:

(1) In Alaska, Hawaii, Puerto Rico and Virgin Islands,
(ii) Within the continental United

(i) In Alaska, Hawaii, Puerto Rico and Virgin Islands.

(ii) Within the continental United States excluding Alaska, where the station would operate with facilities authorized as of October 30, 1961.

NOTE 1: In view of special circumstances arising from the provision of presunrise broadcast service on 640 kc at Ames, Iowa, applications will be accepted for broadcast operations on 640 kc between 6:00 a.m. central standard time and local sunrise at Ames, Iowa, with not to exceed 1 kw power: Provided, that such applications will be acted upon only after and in light of the decision reached in Docket No. 11290.

NOTE 2: In view of special circumstances arising from the provision of a service during some nighttime hours by a Class II station operating on 830 kc at New York, N. Y., (i.e. from 6:00 a.m. to local sunrise and from sunset at Minneapolis to 10:00 p.m. E.S.T.), applications will be accepted for such operation: Provided, that they will be acted upon only after and in light of the decision reached in Docket No. 11227.

NOTE 3: On the frequency 770 kc, two Class I stations may be assigned.

NOTE 3: On the frequency 770 kc, two Class I stations may be assigned.

NOTE 4: See NARBA concerning priority for Canadian Class I-B and Cuban I-C assignments on 640 kc.

NOTE 5: See NARBA concerning Cuban Class II-E assignments on 6°0, 670, 760, 780, 330, 1020, 1030 and 1120 kc.

NOTE 6: See U.S.-Mexican Agreement concerning Mexican use of 660, 760 and 830 kc.

(b) To each of the following channels there may be assigned Class I and Class II stations: 680, 710, 810, 850, 940, 1000, 1060, 1070, 1080, 1090, 1110, 1130, 1140, 1170, 1190, 1500, 1510, 1520, 1530, 1540, 1550 and 1560 kilocycles.

NOTE 1: See NARBA and the U.S.-Mexican Argeement concerning a Cuban Class II-E assignment on, and Mexican use of, 1030 kc.

use of, 1030 kc.

NOTE 2: Class I and Class II stations on 1540 kc shall deliver not over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point of land in the Bahama Islands, and such stations operating nighttime (i.e., sunset to sunrise at the location of the Class II station) shall be located not less than 650 miles from the nearest point of land in the Bahama Islands.

lands.

(c) For Class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on the Canadian border, and provided that such station operating nighttime (1.e. sunset to sunrise at the iocation of the Class II station) are located not less than 650 miles from the nearest point on the Canadian border, 690, 740, 860, 990, 1010, and 1580 kilocycles.

NOTE: See NARBA concerning priority for Cuban Class I-B assignment on 1010 kcs, Class I-C assignments on 690 and 800 kcs, and Class I-D assignment on 740 kcs.

- (d) The frequencies 730, 800, 900, 1050, 1220 and 1570 kilocycles, for Class II stations whic hoperate daytime only, which will not deliver at any point on the Mexican border over 5 microvoits per meter groundwave, and which operate with no more than the following powers:
- (1) If not located within the areas specified in subparagraph (2) of this paragraph, 5 kilowatts.
- (2) If operating on any of the following frequencies within the following specified areas, no more than one kilowatt:
- (i) 800 kcs: less than 1319 kilometers (820 miles) from Ciudad Juarez, Chihua-

(ii) 1050 kcs: less than 998 kilometers (620 miles) from Monterrey, Nuevo Leon. (iii) 1570 kcs: less than 998 kilometers (620 miles) from Ciudad Acuna, Coahuila.

NOTE: See the US/Mexican Agreement concerning specific U.S. unlimited time Class II assignments on each of the following channels: 730, 800, 900, 1050 and

(e) The frequency 540 kilocycles, for Class II stations which will not deliver a signal of more than 5 microvolts per meter groundwave or 25 microvolts per meter 10% skywave at any point on the Canadian border, nor more than 10 microvolts per meter daytime or 50 microvolts per meter ighttime at any point on the Mexican border: Provided, that stations operating at night shall be located:

(1) Within the continental United States

(1) Within the continental United States including Alaska; and

(2) Not less than 650 miles from the nearest point on the Canadian border; and (3) North of the parallel 35° N. if west of the meridian 93° W., or north of the parallel 30° N. if east of said meridian. NOTE: See §2.104(a) of this chapter with respect to use of 540 kcs.

with respect to use of 540 kcs.

§3.26 Regional channels: Classes III.A
and III.B stations.—The following frequencies are designated as regional channels and are assigned for use by class
III.A and III.B stations: 550, 560, 570, 580,
590, 600, 610, 620, 630, 790, 910, 920, 930,
950, 960, 970, 980, 1150, 1250, 1260, 1270,
1280, 1290, 1300, 1310, 1320, 1330, 1350,
1360, 1370, 1380, 1390, 1410, 1420, 1430,
1440, 1460, 1470, 1480, 1590, and 1600 kilocycles.

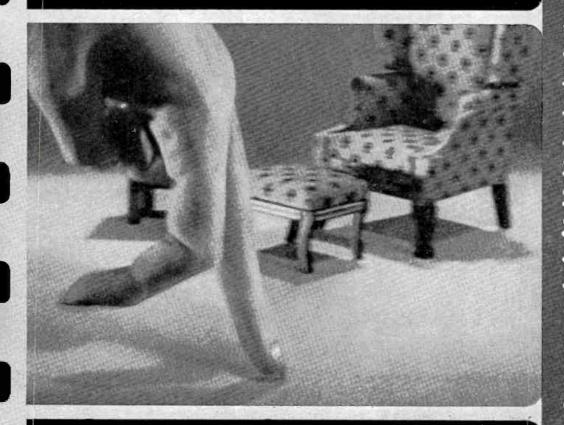

NOTE: See NARBA concerning Cuban Class I-C assignment on 550 kc, Class I-D assignments on 570, 590, 630, 920, 950 and 980 kcs, and Class III-E assignments on 790, 910 and 1150 kcs.

83.27 Local channels: Class IV stations.

—The following frequencies are designated as local channels and are assigned for use by class IV stations: 1230, 1240, 1400, 1450, and 1490 kilocycles.

NOTE: See NARBA concerning Cuban Class IV-E assignments on 1240 and 1340

### "Film does the unusual!"

"LET YOUR FINGERS DO YOUR WALKING," says the AT&T commercial for its Yellow Pages. Proposition is excitingly executed through meticulously selected fingers and live camera work involving miniatures on a moving platform. Done to perfection on Eastman high-speed film with prints on Eastman print stock to bring all the inherent brilliance of the negative to the TV screen. Two steps—negative, positive—each of vital importance to sponsor, network, local station and viewer! For further information, write

ADVERTISER; AT&T (Yellow Pages)
AGENCY: Cunningham & Walsh, Inc. PRODUCER: Farkas Films, Inc.

§3.28 Assignment of stations to chan-Le.s.—(a) The individual assignments of stations to channels which may cause in-terference to other United States stations only shall be made in accordance with the provisions of this Part for the respective classes of stations involved. (For deter-mining objectionable interference see §3.22, 3.182 and 3.186.)

mining objectionable interference see \$\frac{8}{5}\text{3.22}\$ and 3.186.\]

(b) Except as provided in \$\frac{3}{3}\text{21}(c) concerning Class IV stations, no assignment of a standard broadcast station will be made which would be inconsistent with the provisions of NARBA or the U.S./Mexican Agreement. Similarly, as long as protection for U.S. assignments from Haitian assignments continues, no U.S. assignment of a standard broadcast station will be made which would cause objectionable interference (under the standards set forth in NARBA) to a duly notified Haitian station. (The Haitian stations considered to be duly notified are those notified and accepted in accordance with past agreements, and those subsequently notified in accordance with the procedures and understandings which have pertained thus far.) In all cases where an individual assignment may cause interefrence with, or may involve a channel assigned for priority of use by, a station in another North American country, the classifications, allocation requirements, and engineering standards set forth in NARBA and the U.S./Mexican Agreement shall be observed.

NOTE: In general, an application for a standard broadcast station assignment, the grant of which would be consistent with the provisions of NARBA and the U.S./Meixcan Agreement and would not cause objectionable interference to a duly notified station in Haiti, will be considered and acted upon by the Commission in accordance with its rules and established procedure for action upon such applications. However, in particular cases such applications may also present considerations of an international nature which require that a different procedure be followed. In such cases the procedure to be followed will be determined by the Commission in the light of the special considerations involved.

With respect to applications for facili-

With respect to applications for facilities which would involve conflict with NARBA only as to a country which has signed but not completed formal ratification of that agreement, and facilities which would cause objectionable interference to a duly notified Haitian station, special provisions of a procedural nature are contained in §1.352 of this chapter.

(c) Engineering standards now in force

special provisions of a procedural nature are contained in §1.352 of this chapter.

(c) Engineering standards now in force domestically differ in some respects from those specified for international purposes. The engineering standards specified for international purposes (in NARBA and the U.S./Mexican Agreement) will be used to determine: (1) the extent to which interference might be caused by a proposed station in the United States to a station in another country of the North American Region; and (2) whether the United States should register an objection to any new or changed assignment notified by another country of the North American Region. The domestic standards in effect in the United States will be used to determine the extent to which interference exists or would exist from a foreign station where the value of such interference enters into a calculation of: (1) the service to be rendered by a proposed operation in the United States; or (2) the permissible interfering signal from one station in the United States to another United States station.

(d) Upon showing that a need exists, a

United States to another United States station.

(d) Upon showing that a need exists, a Class II, III, or IV station may be assigned to a channel available for such class, even though interference will be received within its normally protected contour; Provided: (1) no objectionable interference will be caused by the proposed station to existing stations or that if interference will be caused, the need for the proposed service outweighs the need for which interference; and (2) primary service will be provided to the community in which the proposed station is to be located; and (3) the interference received does not affect more than 10 percent of the population in the proposed station's normally protected primary service area; however, in the event that the nighttime interference received by a proposed Class III or III station would exceed this amount, then an assignment may be made if the proposed station would provide either a standard broadcast nighttime facility to a community not having such a facility or if 25 percent or more of the nighttime primary service area of the proposed station

is without primary nighttime service. Further, proviso (3) of this paragraph shall not apply to existing Class IV station on local channels applying for an increase in power above 250 watts, nor to new Class IV stations proposing power in excess of 250 watts with respect to population in the primary service area outside the equivalent 250 watt. 0.5 mv/m contour.

the equivalent 250 watt. 0.5 mv/m contour. §3.29 Class IV stations on regional channels.—No license will be granted for the operation of a class IV station on a regional channel, provided, however, that class IV stations presently authorized to operate on regional channels will not be required to change frequency or power but will not be protected against interference from class III stations.

§3.201. Numerical designation of fm broadcast channels.—For convenience, the frequencies available for fm broadcasting (including those assigned to non-commercial educational broadcasting) are given numerical designations which are shown in the table below:

numerical designations which are snown in the table below:
EDITOR'S NOTE: [The band is 88-108 mc. Non-commercial educational fm occupies 88-92 mc. Class A commercial channels are shown in §3.204), below. The rest are class B or C. This is subject to revision upon FCC's issuance of fm Table of Assignments.] Assignments.]

§3.202 International agreements and other restrictions on use of channels.

er restrictions on use of channels.

(a) Authorizations issued by the Commission for fim broadcast facilities will be subject to the provisions of any agreements entered into by the United States with Canada concerning fm assignments and authorizations. The Commission may decide after consultation with Canada that an application should not be granted; or if, pursuant to an agreement providing for timely objection after grant, Canada files such objection, the Commission may on its own motion set aside the grant pending consideration. The Commission will give notice of the filing of such objections.

(b) The frequency 89.1 mcs (ch. 206)

such objection, the Commission may on its own motion set aside the grant pending consideration. The Commission will give notice of the filing of such objections.

(b) The frequency 89.1 mcs (ch. 206) is reserved in the New York City metropolitan area for the use of the United Nations with the equivalent of an antenna height of 500 feet above average terrain and effective radiated power of 20 kilowatts, and the Commission will make no assignments which would cause objectionable interference with such use.

(c) In Alaska, the frequency band 88-100 mcs. is allocated exclusively to Government radio services and the non-Government fixed service. The frequencies 88.1 through 99.9 mcs (ch. 201 through 260) will not be assigned in Alaska for use by fm broadcast stations.

(d) In Hawaii, the frequency band 98-108 mcs is allocated for non-broadcast use. The frequencies 98.1 through 107.9 mcs (chs. 251 through 300) will not be assigned in Hawaii for use by fm broadcast stations.

\*\*S3.203 Zones.\*\*

For the purpose of allocation and assignment, the United States is divided into three zones as follows:

(a) Zone I consists of that portion of the United States albers Equal Area Projection Map (based on standard parallels 29½° and 45½°: North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point on the Virginia, West Virginia, Ohio, Indiana, and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri state boundary lines; thence easterly along the northern state boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin state boundary lines; thence enortherly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin state boundary lines; thence easterly along the morthern state boundary line of the State of California which is located in Zone I.

(b) Zone IA consists of Alaska, Hawaii, Puerto Rico, the

§3.204 Classes of commercial channels, and stations operating thereon.

(a) Class A channels and stations

(1) Except as provided in §3.202, the following frequencies are designated as Class A channels and are assigned for use, in all zones, by Class A stations only:

| Fre-   | Chan- | Fre-   | Chan- |
|--------|-------|--------|-------|
| quency | nel   | quency | nel   |
| (mc)   | No.   | (mc)   | No.   |
| 92.1   | 221   | 100.1  | 261   |
| 92.7   | 224   | 100.9  | 265   |
| 93.5   | 228   | 101.7  | 269   |
| 94.3   | 232   | 102.3  | 272   |
| 95.3   | 237   | 103.1  | 276   |
| 95.9   | 240   | 103.9  | 280   |
| 96.7   | 244   | 104.9  | 285   |
| 97.7   | 249   | 105.5  | 288   |
| 98.3   | 252   | 106.3  | 292   |
| 99.3   | 257   | 107.1  | 296   |
|        |       |        |       |

99.3 257

(2) A Class A station is a station which operates on a Class A channel, and is designed to render service to a relatively small community, city, or town, and the surrounding rural area.

(3) A Class A station will not be authorized to operate with effective radiated power greater than 3 kilowatts (4.8 dbk), and the coverage of a Class A station shall not exceed that obtained from 3 kilowatts effective radiated power and antenna height above average terrain of 300 feet. For provisions concerning minimum facilities, and concerning reduction in power where antenna height above average terrain exceeds 300 feet, see §3.209.

(b) Class B-C channels and Class B and Class C stations.

(b) Class B-C channels and Class B and Class C stations.

(1) Except for the channels specified in paragraph (a)(1) of this section, all of the channels listed in §3.201 from 222 through 300 (92.3 through 107.9 mcs) are classified as Class B-C channels, and (subject to the restrictions set forth in §3.202 are assigned for use in Zones I and I-A by Class B stations only, and for use in Zone II by Class C stations only (there are no Class C stations in Zones II).

(2) A Class B station is a station which

(2) A Class B station is a station which operates on a Class B-C channel in Zone I or Zone I-A, and is designed to render service to a sizable community, city, or town, or to the principal city or cities of an urbanized area, and to the surrounding

or Zone 1-A, and is designed to render service to a sizable community, city, or town, or to the principal city or cities of an urbanized area, and to the surrounding area.

(3) With respect to Class B stations authorized after September 10, 1962, no such station will be authorized with effective radiated power greater than 50 kilowatts (17 dbk), and the coverage of a Class B station authorized after that date shall not exceed that obtained from 50 kilowatts effective radiated power and 500 feet antenna height above average terrain. For provisions concerning minimum power, and concerning reduction in power where antenna height above average terrain exceeds 500 feet, see §3.209.

(4) A Class C station is a station which oprates on a Class B-C channel in Zone II, and is designed to render service to a community, city, or town, and large surrounding area.

(5) With respect to Class C stations authorized after September 10, 1962, no such station will be authorized with effective radiated power greater than 100 kilowatts (20 dbk), and the coverage of a Class C station authorized after that date shall not exceed that obtained from 100 kilowatts effective radiated power and antenna height above average terrain of 2,000 feet. For provisions concerning minimum power, and reduction in power where antenna height above average terrain exceeds 2,000 feet, see §3.209.

§3.205 Minimum mileage separations between co-channel and adjacent-channel stations on commercial channels.

(a) No application for a new station, or (except as provided in paragraph [b] of this section) increase in antenna height or effective radiated power, or change in location of an existing station, will be granted unless the proposed facilities will be located at least as far from the transmitter sites of other co-channel stations of the respective classes shown in the left-hand column of the following table shall be located no less than the distances shown from co-channel stations (200 kc removed) and second and third adjacent-channel stations of differe

## New General Electric Switching Systems

### FOR LARGE OR SMALL STUDIO AND MASTER CONTROL REQUIREMENTS

Now General Electric offers a new line of switching systems that are designed to provide optimum picture quality. Reflecting General Electric's advanced design engineering, each system can be integrated with existing station equipment or incorporated into new studio installations.

T5-2-B Vertical Interval Switcher provides fast, transientless switching during the vertical blanking interval. Designed for use in medium or large TV studios, the system permits studio video switching or master video switching of both monochrome and color TV signals.

TS-1-A Relay Switcher system is particularly well suited for small to medium-size TV studios, the system permits studio switching of both monochrome and color television signals.

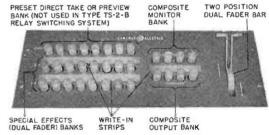

TC-59-A Direct Switcher provides the maximum switching facilities in a minimum size low cost unit. The versatility of the system also makes it especially practical for educational and industrial TV applications.

In addition to the systems described, General Electric will design and build custom engineered switching equipments to fit your particular requirements.

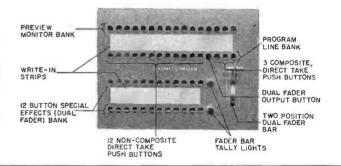

For complete information, contact your nearest G-E Broadcast Equipment representative, or write to Technical Products Operation, Broadcast Equipment Section, Electronics Park, 212 W. Division St., Syracuse, N. Y.

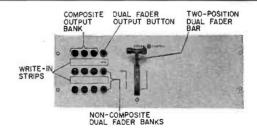

TS-1-A SYSTEM provides complete dissolve, fade, previewing, direct switching and sync mixing facilities for eight non-composite video inputs and two composite inputs. Provisions are also available for special effects.

TS-2B SYSTEM provides complete dissolve, fade, direct switching with preview monitoring and sync mixing facilities for twelve noncomposite video inputs and three composite inputs. Provisions are also available for special effects.

TC-59-A SYSTEM—This compact single unit construction with low power consumption provides complete dissolve, fade, direct switching and sync mixing facilities for four non-composite video inputs and three composite inputs.

| Class of Sta.                               | Co-ch. | 200  | 400 | 600 | Co-ch. | 200       | 400      | 600      | Co-ch.     | 200               | 400            | 600            | Co-ch. | 200     | 400            | 600            |
| Class A Class B Class C 10-watt educational | 65     | 40   | 15  | 15  | 150    | 65<br>105 | 40<br>40 | 40<br>40 | 170<br>180 | 105<br>135<br>150 | 65<br>65<br>65 | 65<br>65<br>65 | = -    | 30<br>— | 15<br>40<br>65 | 15<br>40<br>65 |

NOTE: Intermediate frequency amplifiers of most fm broadcast receivers are designed to operate on 10.7 megacycles. For this reason the assignment of two stations in the same area, one with a frequency of 10.6 or 10.8 megacycles removed from that of the other, will be avoided if possible.

existing Class C station are also the distances between a new Class C and an existing Class A station). The distances between Class B and Class C stations apply only across zone lines. The adjacent-channel spacings listed also apply: (1) to applications for noncommercial educational facilities on Channels 218, 219, or 220, with respect to other stations on Channels 221. 222, or 223; (2) to applications for facilities on Channels 221, 222, or 223 with respect to noncommercial educational stations on Channels 218, 219, or 220.

(b) Where an existing station is located less than the minimum distances specified in paragraph (a) of this section with respect to co-channel or adjacent-channel stations:

in paragraph (a) of this section with respect to co-channel or adjacent-channel stations:

(1) It may apply for increases in antenna height, or in effective radiated power up to the maximum specified in §3.204 for its class, if the application for increase is accompanied by a request to decrease power or antenna height so that the station's 1 mv/m contour (located pursuant to Figure 1 of §3.333) will be no further from the station's transmitter than with its present facilities.

(2) It may apply for permission to move transmitter site, but this will not be granted if it would increase the amount by which the station is located at substandard separation.

(c) The zone in which the transmitter of an fm station is located or proposed to be located determines the applicable rules with respect to minimum required spacings.

83.207 Protection from interference.

ings.
§3.207 Protection from interference.
(a) Permittees and licensees of fm broadcast stations are not protected from any interference which may be caused by the grant of a new station, or of authority to modify the facilities of an existing station, in accordance with the provisions of this subpart.
(b) The nature and extent of the protection.

tion, in accordance with the provisions of this subpart.

(b) The nature and extent of the protec-tion from interference accorded to fm broadcast stations is limited solely to the protection which results from the mini-mum assignment and station separation requirements and the rules with respect to maximum powers and antenna heights set forth in this subpart. §3.209 Power and antenna height re-quirements.

(a) Minimum requirements.
(1) Except as provided in paragraph
(b) (2) of this section, the minimum effective radiated power shall be for stations of the respective classes, as follows:

Class A Class B Class C 100 watts (—10 dbk) 5 kw (7 dbk) 10 kw (10 dbk)

- (2) No minimum antenna height above average terrain is specified.
  - (b) Maximum power and antenna height.
- (1) The maximum effective radiated power in any direction, and maximum antenna height for equivalence purposes, shall be as follows for the various classes of stations:

|                    | Maximum<br>power                   | Maximum<br>antenna height<br>(feet above<br>average terrain) |
|--------------------|------------------------------------|--------------------------------------------------------------|
| Class A<br>Class B | 3 kw (4.8 dbk)<br>50 kw (17.0 dbk) |                                                              |
| Class C            | 100 kw (20.0 dbk)                  | 2.000                                                        |

(2) Antenna heights may be used exceeding those specified in this paragraph for equivalence purposes, provided effective radiated power is reduced in the amount determined by use of the appropriate curves in Figure 3 of §3.333. Where, under Figure 3 of §3.333, effective radiated power must be reduced to an amount less than the normal minimum specified in paragraph (a)(1) of this section for the class of station involved, the effective

PAGE C-44 • 1963 BROADCASTING YEARBOOK

radiated power determined by Figure 3 of  $\S 3.333$  shall be the minimum for the station involved.

(c) Determination of applicable rules. The zone in which the transmitter of an fm station is located or proposed to be located determines the applicable rules with respect to the class of station, and thus the minimum and maximum requirements as to facilities.

ments as to facilities.

(d) Existing stations. Pending resolution of the issues in Docket No. 14185, stations authorized as of September 10, 1962, which do not conform to the requirements of this section, may continue to operate as authorized; but any application to change facilities will be subject to the provisions of this section, except that the minimum power specified in paragraph (a) of this section shall not apply to an application to increase facilities.

|                      |                    |          |                    |

(b) In Alaska and Hawaii the frequency bands 76-82 mc and 82-88 mc are allocated for nonbroadcast use. These frequency bands (Channels 5 and 6) will not be as-signed in Alaska and Hawaii for use by television broadcast stations.

\$3.606. Table of Assignments. (a) The following Table of Assignments contains the channels assigned to the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk are asigned for use by non-commercial educational broadcast stations only. A station on a channel identified by a plus or minus mark is required to operate with its carrier frequencies offset 10 kc above or below, respectively, the normal carrier frequencies.

[EDITOR'S NOTE: Channel assignments by cities are reprinted in the tv station directory and are not repeated here.]

§3.607. Availability of channels.— (a) Subject to the provisions of paragraph (b) of this section, applications may be filed to construct television broadcast stations only on the channels assigned in the Table of Assignments and only in the communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing provided, however, that applications specifying channels which accord with publicly announced Commission orders changing the Table of Assignments will be accepted for filing even though such applications are tendered before the effective dates of such channel changes.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 15 miles of the listed community. In addition, a channel assigned to a community listed in the Table of Assignments and not designated for use by noncommercial educational stations only, is available upon application in any other community within 15 miles thereof which, although listed in the table, is assigned only a channel designed for use only by noncommercial educational stations only, is available upon application in any other community within 15 miles thereof as set forth in the publication of the shall apply separately to each community so listed. The distance between communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Retween Cities in the United States." (This publication may be purchased from the Government Printing Office, Washington, D. C.) If said publication does not contain the coordinates of either or both communities, the coordinates of the main post office in either or both of such communities shall be used. The measurements is set forth in Section 3.611 (d).

§3.609. Zones. (a) For the purpose of allocation and assignment,

allocation and assignment, the United States is divided into three zones as follows:

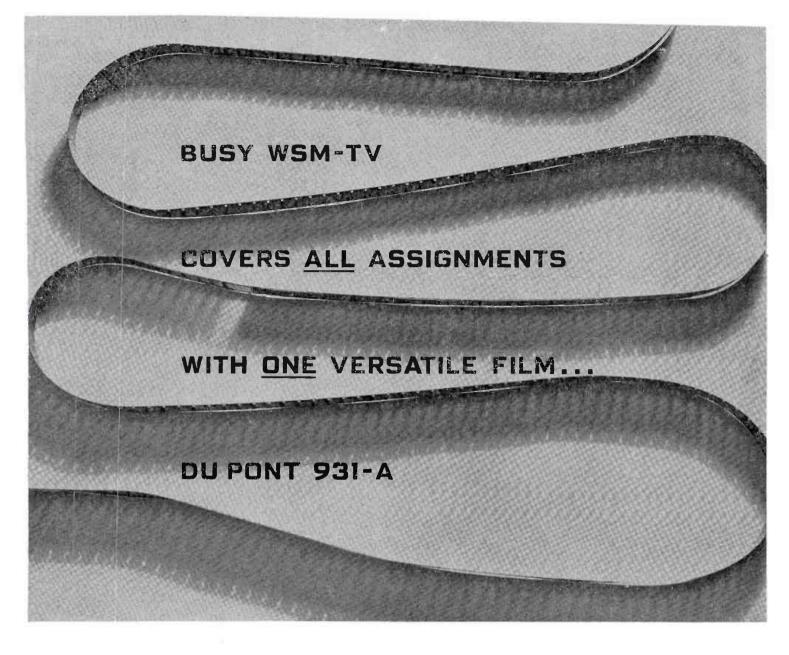

(1) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point of the Virginia, West Virginia boundary line located at North Latitude 37° 49° and West Longitude 80° 12° 30°; thence westerly along the southern boundary lines of the states of West Virginia, Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri State boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin state boundary lines; thence easterly along the northern state boundary line of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along the Tist meridian; thence in a straight line to the 71st meridian; thence in a straight line to the 11st meridian; thence in a straight line to the 11st meridian; thence in a straight line to the 11st meridian; thence in a straight line to the 11st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 31st meridian; thence in a straight line to the 21st meridian; thence in a straight line to the 31st meridian; thence in a straight line to the 31st meridian; thence in a straight line to the 31st meridian; thence in a straight line to the 31st meridian and the 45th parallel to the 31st meridian and the 45th parallel to the 3

Islands.

(3) Zone III consists of that portion of the United States located south of a line, drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexican border, consisting of arcs drawn with a 150 mile radius to the north from the following specified points:

| North Latitude               | West Longitude |
|------------------------------|----------------|
| a) 29°40'00"                 | 83°24'00"      |
| b) 30°07′00″                 | 84°12'00"      |
| c) 30°31′00″                 | 86°30′00″      |
| d) 30°48′00″                 | 87°58'30"      |
| e) 30°00'00"                 | 90°38/30″      |
| f) 30°04′30″                 | 93°19′00″      |
| g) 29°46′00″<br>h) 28°43′00″ | 95°05′00″      |
|                              | 96°30'30"      |
| i) 27°52′30″                 | 97°32′00″      |
|                              |                |

When any of the above arcs pass through a city, the city shall be considered to be located in Zone II. (See Figure 2 of §3.699.)

"At midnight or noon, in rain or glare, indoors or out, Du Pont 931-A rapid reversal motion picture film gives us news footage of consistently excellent quality. It has helped us to gain a reputation for timely, accurate, in-depth reporting," says James Drake, award-winning news director of WSM-TV, NBC's Nashville Tennessee at

NBC's Nashville, Tennessee, affiliate.

"We have a big responsibility to our viewers and a large investment in manpower and equipment. We use five full-time news cameramen and five radio-equipped mobile news wagons. We shoot 4,200 feet of news film a week against tight deadlines. We cover 21,600 square miles of territory over a tri-state area. We face strong and active competition.

"It is extremely important that we use a single film that can meet the tremendous scope of all our requirements, yet come up with vivid, perfectly recorded images every time.

"That's why we choose Du Pont 931-A. This wide latitude film gives us optimum results with no exposure or developing

problems. It has an almost perfect definition, tonal separation and contrast for television projection—so much so that we use 931-A for our studio commercials and special events as well as for news coverage!"

If you would like to know more about Du Pont motion picture films and receive technical information on them, contact any of the Du Pont Photo Products sales offices shown here.

§3.610. Separations. (a) The provisions of this section relate to assignment separations and station separations. Petitions to amend the Table of Assignments (§3.606(b)) (other than those also expressly requesting amendment of this section or §3.609) will be dismissed and all applications for new television broadcast stations or for changes in the transmitter sites of existing stations will not be accepted for filing if they fail to comply with the requirements specified in paragraphs (b), (c) and (d) of this section.

NOTE: Licensees and permittees of television broadcast stations which were operating on April 14, 1952 pursuant to one or more separations below those set forthing \$3.610 may continue to so operate, but in no event may they further reduce the separations below the minimum. As the existing separations of such stations are increased, the new separations will become the required minimum separations until separations are reached which comply with the equirements of \$3.610. Thereafter, the provisions of said section shall be applicable.

(b) Minimum co-channel assignment and station separations: NOTE: Licensees and permittees of tele-

| (1)  | Channels  | Channels  |
|------|-----------|-----------|
| Zone | 2-13      | 14-83     |
| I    | 170 miles | 155 miles |
| II   | 190 miles | 175 miles |
| III  | 220 miles | 205 miles |

- (2) The minimum co-channel mileage separation between a station in one zone and a station in another zone shall be that of the zone requiring the lower separation.
- (c) Minimum assignment and station adjacent channel separations applicable to all zones:

### (1) Channels 2-13 60 miles Channels 14-83 55 miles

(2) Due to the frequency spacing which exists between Channels 4 and 5, between Channels 6 and 7, and between Channels 13 and 14, the minimum adjacent channel separations specified above shall not be applicable to these pairs of channels (see §3.603).

pairs of channels (see §3.693).

(d) In addition to the requirements of paragraphs (a). (b) and (c) of this section, the minimum assignment and station separations between stations on Channels 14-83, inclusive, as set forth in Table IV of §3.698 must be met in either rule making proceedings looking towards the amendment of the Table of Assignments (§3.606 (b) or in licensing proceedings. No channel listed in column (1) of Table IV of §3.698 will be assigned to any city, and no application for an authorization to operate on such a channel will be granted unless the mileage separations indicated at the top of columns (2)-(7), inclusive, are met with respect to each of the channels listed in those columns and parallel with the channel in column (1).

(e) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to co-channel mileage separations where the transmitter is located in a different zone from that in which the channel to be employed is located.

§3.614. Power and antenna height requirements.—(a) Minimum requirements, Applications will not be accepted for filing if they specify less than—10 dbk (100 watts) visual effective radiated power in any horizontal direction. No minimum antenna height above average terrain is specified.

rain is specified.

(b) Maximum power. Applications will not be accepted for filing if they specify a power in excess of that provided in this paragraph. Except as provided in subparagraph (1) below, the maximum effective radiated powers of television broadcast stations operating on the channels set forth below with antenna heights not in excess of 2000 feet above average terrain shall be as follows:

Maximum visual effective radiated power in db above one kilowatt (dbk) Channel Nos.

20 dbk ( 100 kw) 25 dbk ( 316 kw) 37 dbk (5000 kw)

(1) In Zone I, on Channels 2-13 inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1000 feet above average terrain. Where antenna heights exceeding 1000 feet above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 feet above

PAGE C-46 • 1963 BROADCASTING YEARBOOK

average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Figure 3 of \$3.699.

NOTE: This limitation shall not apply to any licensee or permittee in Zone I who received an authorization after March 22, 1951, to relocate its transmitter site and construct a new tower and antenna to a height in excess of 1000 feet above average terrain and who constructed or who had substantially completed construction of said tower and antenna prior to April 14, 1952. In such case, maximum power may be utilized at the height above average terrain specified in the authorization. The limitation shall apply, however, where the tower or other principal supporting structure had been constructed prior to the date of such authorization.

constucted prior to the date of such authorization.

(2) In Zones II and III, the maximum powers which may be used by television broadcast stations operating on the respective channels set forth in the above able with antenna heights exceeding 2000 feet above average terrain shall be based on the chart designated as Appendix III, Figure 2b.

(3) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by this section and Appendix III, Figures 2(a) and 2(b).

(4) The maximum effective radiated power in any direction above the horizontal plane shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane. (c) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to maximum antenna heights and powers for vhf stations when the transmitter is located in Zone II, or the transmitter is located in Zone II, or the transmitter is located in Zone II and the channel to be employed in located on Zone I. [Note: The maximum visual effective radiated power of television broadcast stations operating on channels 14-83 within 250 miles of the Canadian-U. S. border may not be in excess of 30 dbk (1,000 kw).]

TARLE IV.

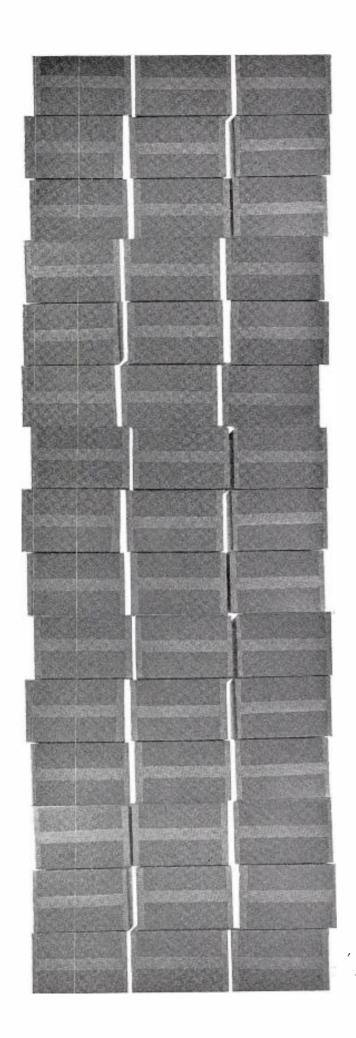

### MULTIPLE OWNERSHIP

In am rules . . .

§3.35 Multiple ownership—No license for a standard broadcast station shall be granted to any party (including all parties under common control) if:

(1) such party directly or indirectly owns, operates or controls another standard broadcast station, a substantial por-

# WANT TO BUY 1000 UNMARKED CARTONS...CHEAP?

It might be quite an adventure to spend next year's family budget for a thousand unmarked cartons!

But would you want to have to feed, clothe, amuse and maintain your family on the contents?

Too much of a gamble—isn't it?

Especially when you know that you can confidently spend your money for quality goods you know and trust—goods proudly trademarked with manufacturers' brand names.

And advertised brand names mean even more to you than your biggest money's worth and peace of mind. These products are the heart of America's economy. Their tremendous planned production means economic stability and steady employment.

You know them well. They're the kind of products advertised in this magazine. Depend on them.

LEADERSHIP BRANDS ARE YOUR BEST BUY

Brand Names Foundation, Inc. 292 Madison Avenue, New York 17, N.Y. tion of whose primary service area would receive primary service from the station in question, except upon a showing that public interest, convenience and necessity will be served through such multiple ownership situation; or

duestion, except upon a snowing that public interest, convenience and necessity will be served through such multiple ownership situation: or

(2 such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other standard broadcast station if the grant of such license would result in a concentration of control of standard broadcasting in a manned inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of area served, the number of people served, classes of stations involved and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors of, more than seven standard broadcast stations.

NOTE: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

### In tv rules . . .

\$3.636. Multiple ownership.--(a) No 11cense for a television broadcast station shall be granted to any party (including all parties under common control) if:

(1) such party directly or indirectly owns, operates, or controls another television broadcast station which serves substantially the same area; or

stantially the same area; or

(2) such party, or any stockholder, officer or, director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other television broadcast station if the grant of such license would result in a concentration of control of television broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people

PAGE C-48 . 1963 BROADCASTING YEARBOOK

served, and the extent of other competitive service in the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven television broadcast stations, no more than five of which may be in the whf band.

(h) Paragraph (a) of this section is

(b) Paragraph (a) of this section is not applicable to non-commercial educa-tional stations.

NOTE 1: The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

NOTE 2: In applying the provisions of paragraph (a) of this section to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

### STUDIO LOCATION ORIGINATIONS

### In am rules . . .

studios are located.

(c) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the borough or city in which the main studio is located in accordance with the Standards of Good Engineering Practice, prescribed by the Commission.

§3.31 Authority to move main studio. §3.31 Authority to move main studio.— The licensee of a station shall not move its main studio outside the borders of the borough or city, state, district, territory, or possession in which it is located, un-less such move is to the location of the station's tansmitter, without first secur-ing a modification of construction permit or license. The licensee shall promptly notify the Commission of any other change in location of the main studio.

§3.205—[EDITOR'S NOTE: In substance the same as §3.30, above, except that subsection (c) reads as follows:

"The transmitter of each im broadcast station shall be so located that satisfactory service is delivered to the city where the main studio is located in accordance with the technical standards of this subpart; provided, however, upon special showing of need, authorization may be granted to locate the transmitter so that

adequate service is not rendered to this city, but in no event shall this city be beyond the 50 mv/m contour."]

\$3.613 Main studio location.—(a) The main studio of a television broadcast station shall be located in the principal community to be served. Where the principal community to be served is a city, town, village or other political subdivision, the main studio shall be located within the corporate boundaries of such city, town, village or other political subdivision. Where the principal community to be served does not have specifically defined political boundaries, applications will be considered on a case-to-case basis in the light of the particular facts involved to determine whether the main studio is located within the principal community to be served.

(b) In cases where an adequate show-

studio is located within the principal community to be served.

(b) In cases where an adequate showing is made that there is good cause for locating a main studio outside the principal community to be served and that to do so would not be inconsistent with the operation of the station in the public Interest, the Commission will permit the use of a main studio location other than that specified in paragraph (a) of this section. The licensee or permittee of a television broadcast station shall not move his main studio outside the principal community in which it is located without first securing a modification of construction permit or license. Such a licensee or permittee shall notify the Commission promptly of any change of the location of the main studio within the community. In any case where the main studio is located outside the principle community to be served, the ilcensee or permittee of a television broadcast station shall not move his main studio without first securing a modification of construction permit or license.

### OPERATING SCHEDULES

For am stations . . .

\$3.71 Minimum operation schedule.—
(a) All standard broadcast stations are required to maintain an operating schedule of not less than two-thirds of the total hours they are authorized to operate between 6 a.m. and 6 p.m., local standard time, and two-thirds of the total hours they are authorized to operate between 6 p.m. and midnight, local standard time, on each day of the week except Sunday: Provided, however, that stations authorized for daytime operation only need comply only with the minimum requirement for operation between 6 a.m. and 6 p.m.

requirement for operation between 6 a.m. and 6 p.m.

(b) In the event that causes beyond the licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§3.72 Operation during experimental period.—The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference.

§3.73 Specified hours.—If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in Sections 3.71 and 3.72.

3.71 and 3.72.

§3.79 License to specify sunrise and sunset hours.—If the licensee of a broadcast station is required to commence or cease operation, or to change the mode of operation of the station at the times of sunrise and sunset at any particular location, the controlling times of each month of the year are set forth in the station's instrument of authorization. Uniform sunrise and sunset times are specified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of that month adjusted to the nearest quarter hour. In accordance with a standardized procedure described therein, actual sunrise and sunset time are derived by Interpolation in the tables of the 1946 American Nautical Almanac, issued by the Nautical Almanac Office of the United States Naval Observatory.

§3.80 Secondary station; filing of operating schedule.—The license of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominate station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return one copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be pemitted only in accordance with the procedure set forth in section 3.77.

§3.81 Secondary station; failure to reach

in section 3.77.

§3.81 Secondary station; failure to reach agreement.—If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

§3.82 Departure from schedule: material

§3.82 Departure from schedule; material violation.—In all cases where a station leensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the li-

§3.83 Local standard time.—All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.

Commerce Commission.

§3.84 Daylight saving time.—If local time is changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight saving time, and not standard time, as long as daylight saving time is observed at such location. This provision shall govern when the time is changed by provision of law or general observance of daylight saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensees; provided, however, that when the license specifies average time of sunrise and sunset, local standard time shall be observed. In no event shall a station lisunset, local standard time shall be observed. In no event shall a station licensed for daytime only operate on regular schedule prior to local sunrise, or shall a station licensed for greater daytime power than nighttime power or for a different radiation pattern for daytime operation than for nighttime operation operate with the daytime power or radiation pattern prior to local sunrise.

\$3.85 Changes in time; agreement between licensees.—Where the local time is not changed from standard to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight saving time is observed at the location of some of these stations.

§3.86 Local standard time; license provisions.—The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.

§3.87 Program transmission prior to local sunrise.—(a) The provisions of Sections 3.6, 3.8, 3.9, 3.10, 3.23, 3.79 and 3.84 shall not prevent the transmission of programs between four o'clock a.m., local standard time, and local sunrise of standard broadcast stations with their authorized daytime facilities, provided, that the provisions of this rule shall not extend to:

(1) Stations regularly sharing time during daylight hours either under licenses pursuant to which time-sharing agreements have been entered into or licenses specifying hours of operation, unless

time-sharing agreements have been reached covering such operation prior to tocal sunrise. Sections 3.74, 3.77, and 3.78 of these rules shall be applicable to such agreements.

agreements.

(2) Any Class II station which by use of its daytime facilities causes objectionable interference, as determined by the standard broadcast Technical Standards of his subpart or by the engineering standards of NARBA or the U.S./Mexican Agreement (whichever is controlling) within the 0.5 mv/m 50 percent time skywave contour of any Class I station of the United States. Mexico or any country party to NARBA, except (i) where the Class I station, in which case operation may begin at local sunrise at the Class I station; (ii) where an agreement has been reached with the United States Class I station affected to begin operation prior to local sunrise.

(3) Operation by use of its daytime fa-

(3) Operation by use of its daytime facities of any Class II station on any Class I-A channel not assigned to the United States under the North American Regional Broadcasting Agreement or under the U.S./Mexican Agreement.

(4) Class IV stations authorized for op eration with daytime power in excess of

(4) Class IV stations authorized for operation with daytime power in excess of 250 watts.

(b) Any station operating during such hours receiving notice from the Commission that undue interference is caused shall refrain from such operation during such hours pending further notice from the Commission.

(c) Nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation except as herein provided.

(d) The period 4 a.m. to 6 a.m., local standard time, shall not be included in determining compliance with section 3.71.

(e) Restrictions imposed by section 3.187 on daytime operations shall apply to pre-sunrise operation under this section.

to pre-sunrise operation under this section.

EDITOR'S NOTE: Proposal for rule-making adopted Dec. 6, 1961, but postponed indefinitely April 25, 1962, would amend \$3.87 to provide (1) that stations operating with daytime-only facilities before sunrise so notify the commission: (2) that new daytime stations be precluded from presunrise operation; (3) that any unlimited time station operating on any regional channel that receives objectionable interefrence within its nighttime normally protected service area or present RSS limited contour, whichever is higher, from any station operating on the same channel with its daytime facilities prior to local sunrise, may submit a showing of interference and request the commission to issue a notice to the offending station to refrain from pre-sunrise operation with its daytime facilities: (4) that skywave interference calculations made under the skywave propagation curves in commission rules and other applicable technical standards in Part 3 shall be considered as conclusive.

§3.88 Blanketing interference,—The licensee of each broadcast station is required to satisfy all reasonable complaints of blanketing interference with the 1 mv/m contour.

\$3.261 Time of operation.—(a) All fm broadcast stations will be licensed for unlimited time operation. A minimum of 36 hours per week during the hours of 6 a.m. to midnight, consisting of not less than 5 hours in any one day, except Sunday, must be devoted to the fm broadcast operation; time devoted to operations conducted pursuant to a Subsidiary Communications Authorization (see §§3.293-3.295) shall not be included in meeting this 36-hour broadcast requirement.

(b) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.—The period between 1:00 a.m., and 6:00 a.m..

\$3.262 Experimental operation.—The period between 1:00 a.m. and 6:00 a.m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any fm broadcast station on its assigned frequency and not in excess of its author-

ed power, without specific authorization y the Commission.

For ty stations . . .

\$3.651 Time of operation.—(a) (1) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than 2 hours daily in any five broadcast days per week and not less than a total of 12 hours per week during the first 18 months of the station's operation; not less than 2 hours daily in any 5 broadcast days per week and not less than a total of 16 hours. 20 hours and 24 hours per week for each successive 6-month period of operation, respectively; and not less than a total of 28 hours per week thereafter.

a total of 16 hours, 20 hours and 24 hours per week for each successive 6-month period of operation, respectively; and not less than a total of 28 hours per week thereafter.

(2) "Operation" includes the period during which a station is operated pursuant to temporary authorization or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentations, shall not be considered in computing periods of program service.

(3) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) (1) of this section or to continue operating, the station may limit or discontinue operating, the station may limit or discontinue operating, the station may limit or discontinue operating, the station in the commission and the engineer in charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation during a license period shall be taken into account when considering the renewal of noncommercial educational television station shall not be operated separately from the visual transmitter except for the following purposes:

(c) (1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the audience of difficulties and to transmit for a short period program saterial of such paragraph.

(2) During periods of transmi

paragraph.

(2) Duplication of am or fm programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (c) (2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture, and a newscast in which the words of the newscaster

cast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are

1963 BROADCASTING YEARBOOK . PAGE C-49

examples of programs in which the aural and visual transmission are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (c) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving test consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

graph.

### OPERATOR REQUIREMENTS

Sign Operator requirements.—(a) One or more radio opeators holding a valid radio-telephone first-class operator license except as provided in paragraph (b) of this section, shall be in actual charge of this section, shall be in actual charge of the transmitting apparatus and shall be on duty either at the transmitter location or remote control point.

(b) A station which is authorized for non-directional operation with power of 10 kilowatts or less may be operated by persons holding commercial radio operator license of any class when the equipment is so designed that the stability of the frequency is maintained by the transmitter itself within the limits of tolerance specified, and none of the operations, except those specified in subparagraphs (1) through (4) of this paragraph, necessary to be performed during the course of normal operation may cause off-frequency operation or result in any unauthorized radiation. (A person holding any class of radio operator license or permit who is authorized thereunder to perform limited operation of a standard broadcast station may, when a CONELRAD Radio Alert is called, or for the purpose of participation in a drill or test of the Emergency Broadcast System, make adjustments necessary to effect operation in accordance with a National Defense Emergency Authorization: provided, that the station's full-time radiotelephone first-class operator shall have previously instructed such person in the Emergency Broadcast System.) Adjustments of transmitting equipment by such operators, except when under the immediate supervision of a radiotelephone first-class operator, shall be limited to the following:

(1) Those necessary to commence or terminate transmitter emissions as a routine matter.

(2) Those external adjustments that may be required as a result of variations

(2) Those external adjustments that may be required as a result of variations of primary power supply.

(3) Those external adjustments which may be necessary to insure modulation within the limits required.

within the limits required.

(4) Those adjustments necessary to effect any change in operating power which may be required by the station's instrument of authorization.

Should the transmitting apparatus be observed to be operating in a manner inconsistent with the station's instrument of authorization and none of the above adjustments are effective in bringing it into proper operation, a person holding other than a radiotelephone first-class operator shall be required to terminate the station's emissions.

(c) The licensee of a station which is

erator shall be required to terminate the station's emissions.

(c) The licensee of a station which is operated by one or more operators holding other than a radiotelephone first-class operator license shall have one or more operators holding a radiotelephone first-class operator license in regular full-time employment at the station whose primary duties shall be to effect and insure the proper functioning of the transmitting equipment. In the event that the licensee also operates an fm broadcast station in the same community, a regular fulltime radiotelephone first-class operator or operators employed in connection with the standard broadcast station may concurrently be employed to satisfy the requirements of §§ 3.265 (c) or 3.565 (c): Provided, that the duties of such operator or operators concerning the fm broadcast transmitting equipment shall in nowise interfere with the proper performance of his duties with respect to the standard broadcast transmitter.

PAGE C-50 • 1963 BROADCASTING YEARBOOK

d) The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and the rules and regulations governing such other stations: Provided, however, that such duties shall in nowise interfere with the proper operation of the standard broadcast transmitter.

In fm rules . . .

§3.265 Operator requirements.
[EDITOR'S NOTE: Substantially the same as §3.93.]

In tv rules . . . §3.661. Operator requirements. One or more licensed radiotelephone first-class operators shall be on duty at the place where the transmitting apparatus of each station is located and in actual charge thereof whenever it is being operated. The original license (or FCC Form No. 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such stations. However, such duties shall in nowise interfere with the operation of the broadcast transmitter.

### FACSIMILE

§3.266 Facsimile broadcasting and multiplex transmission.—(a) Fm broadcast stations may transmit simplex facsimile in accordance with transmission standards set forth in §3.318 during periods not devoted to fm aural broadcasting. Such transmissions may not exceed one hour during the period between 7 a.m. and midnight (no limit for the hours between midnight and 7 a.m.) and may not be counted toward the minimum operation required by section 3.261. The Commission shall be notified by the licensee of the fm broadcast station of its intent to transmit such facsimile.

(b) Fm broadcast stations may, upon securing authorization from the Commission, transmit multiplex facsimile in accordance with transmission standards set forth in §3.318; provided that the transmission of such facsimile does not reduce the quality of aural programs simultaneously transmitted by the licensee below that required by the etchnical standards of this subpart and that no degradation of such aural programs will result from such facsimile transmissions when received on fm receivers not equipped with filter or other additional equipment.

### NETWORK APPILIATION

In am rules . .

§3.131 Exclusive affiliation of station.— No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express proadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See Chapter VII. J of Report on Chain Broadcasting.)

§3.132 Territorial exclusivity.—No license shall be granted to a standard broadcast station having any contract arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This section shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary organization.—No license §3.132 Territorial exclusivity.-No

first call in its primary organization.
§3.133 Term of affiliation.—No license shall be granted to a standard broadcast station having any contract, arangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years; provided, that a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

\$3.134 Option time.—No license shall be granted to a standard broadcast station which options for network programs any ime subject to call on less than 56 days notice, or more time than a total of three hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m. to 11:00 p.m. to 11:00 p.m. to 11:00 p.m. to 3:00 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.) Such option may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE: As used in this section, an option is any contract arrangement or un-

option, or other time, to other network organizations.

NOTE: As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE: All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

zation.

agreed by the station and network organization.

§3.135 Right to reject programs.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§3.136 Network ownership of stations.—

ing a program of outstanding local or national importance.

§3.136 Network ownership of stations.—
No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability in (terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: Effective date of this section with respect to any station may be extended from time to time in order to permit the orderly disposition of properties; and it shall be suspended indefinitely with respect to regional network organizations.

§3.137 Dual network operation.—No license shell he issued to a standard broad.

respect to regional network organizations. §3.137 Dual network operation.—No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network; provided, that this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

such network.
§3.138 Control by networks of station rates.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

In fm rules . . .

### §3.231-3.238, inclusive-

[EDITOR'S NOTE: Same as §§3.131-3.138. above, with the following exceptions: (1) references are to fm rather than standard stations and networks; and (2) the section on 'Network Ownership of Stations" is changed to read as follows:

§3.236 Network Ownership of stations.

—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common controls of a network organization, for an fm broadcast station in any locality where the existing fm broadcast stations are so few or of such unequal desirability in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the avaiability of the station to other networks.]

### In tv rules . .

\$3.658. Affiliation agreements.—(a) Exclusive affiliation of station. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for. broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See ch. VII, J. of Report on Chain Broadcasting.)

(b) Territorial exclusivity. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station in the same community from broadcasting the network's programs not taken by the former stations, or which prevents or hinders another broadcast station located in a different community from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization. As employed in this paragraph the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

(c) Term of Affiliation. No license shall be granted to a television broadcast station not having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years: Provided that a contract, arrangement, or understanding for a period of up to two years may be entered into within 6 months prior to take commencement of such period.

(d) Option time. (1) No license shall be granted to a television broadcast station which options for network program series is being broadcast, the time so contracted shall not be callable under an option, for a

dates.
(2) No licensee shall be granted to a television broadcast station which options for network programs more than a total of 2½ hours within each of four segments of the broadcast day, as herein described. In determining the number of hours of option time, any network program which begins during the hours agreed upon by the network and station as option time and extends into non-option time, or which begins during non-option time and extends into the hours agreed upon as option, shall be considered as falling en-

tirely outside option time. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 5 p.m. to 11 p.m.; 11 p.m. to 8 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throuhgout the year regardless of shifts from standard to daylight saving time or vice versa.) Time options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

EDITOR'S NOTE: FCC currently is re-

EDITOR'S NOTE: FCC currently is reconsidering option time rule relating to amount of time that may be optioned by affiliate.

(3) As used in this section, an option is any contract, arrangement or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling prams before the network agrees to utilize the time during which such programs are scheduled, or which requies that ton to clear time already scheduled when the network organization seeks to utilize the time. All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not standard time or vice versa may or may not standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

(e) Right hours expected by the station and network organization programs. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied. With a network organization which, with respect to programs offered or already contracted for pursuant to an affiliation contract, prevents or hinders the station from (1) rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable or contracty to the public interest, or (2) substituting a program which in the station's opinion, is of greater local or national importance the public interest, or can be applied to the station of the analysis of stations. No license shall be granted to a network organization or to any person directly or indirectly controled by or under common control of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few organization for a television broadcast station in any locality where the existing television broadcast station in any locality where the existing television broadcast station in the section is not

### COMMON ANTENNA SITE

\$3.635. Use of common antenna site. No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable

for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

### REPORTS TO BE FILED

### All broadcast stations . . .

\$1.341 Financial report.—Each licensee or permittee of a commercially operated standard, fm, television, or international broadcast station (as defined in Part 3 of this chapter) shall file with the Commission on or before April 1 of each year, on FCC Form 324, broadcast revenue and expense statements for the preceding calendar year together with a statement as to investment in tangible broadcast property as of Dec. 31 of such calendar year.

investment in tangible broadcast property as of Dec. 31 of such calendar year.

§1.342 Filing of contracts.—Each licensee or permittee of a standard, fm, television, or international broadcast station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-comercial basis, shall file with the Commission copies of the following contracts, instruments. and documents together with amendments, supplements, and cancellations, within 30 days of execution thereof. The substance of oral contracts shall be reported in writing.

(a) Contracts relating to network service. All network affliation contracts, agreements, or understandings between a station and a national, regional, or other network shall be filed. Transcription agreements or contracts for the supplying of film for the television stations which specify option time must be filed. This section does not require the filing of transcription agreements or contracts for the supplying of film for television stations which do not specify option time, nor contracts granting the right to broadcast music such as ASCAP, BMI, or SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or docu-

SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or documents relating to the present or future ownership or control of the licensee or permittee or of the licensees or permittee's stock, rights, or interests therein, or relating to changes in such ownership or control. This paragraph shall include but is not limited to the following:

(1) Articles of partnership, association, and incorporation, and changes in such instruments:

(2) Bylaws, and any instruments effect-

instruments;

(2) Bylaws, and any instruments effecting changes in such bylaws;

(3) Any agreement, document, or instrument (1) providing for the assignment of a license or permit or (ii) affecting, directly or indirectly, the ownership or voting rights of the licensee's or permittee's stock (common or preferred, voting ronon-voting), such as: (a) Agreements for transfer of stock: (b) Instruments for the issuance of new stock; or (c) Agreements for the acquisition of licensee's or permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required

permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required to be filed.

(4) Proxies with respect to the licensee's or permittee's stock running for a period in excess of one year; and all proxies, whether or not running for a period of one year, given without full and detailed instructions binding the nominee to act in a specified manner. With respect to proxies given without full and detailed instructions, a statement showing the number of such proxies, by whom given and received, and the percentage of outstanding stock represented by each proxy shall be submitted by the licensee or permittee within 30 days after the stockholders' meeting in which the stock covered by such proxies has been voted: Provided, however, that when the licensee or permittee is a corporation having more than 50 stockholders, such complete information need be filed only with respect to proxies given by stockholders income of the corporation's voting stock; in cases where the licensee or permittee is a corporation's voting stock; in cases where the licensee or permittee is a corporation's voting stock; in cases where the stockholders giving the proxies are neither officers or directors nor hold 1% or more of the corporation's stock, the only information required to be filed is the name of any person voting 1% or more of the stock by proxy, the number of shares voted by proxy by such person, and the total number of shares voted at the particular stockholders' meeting in which the shares were voted by proxy:

1963 BROADCASTING YEARBOOK . PAGE C-51

(5) Mortgage or loan agreements containing provisions restricting the licensee's or permittee's freedom of operation, such as those affecting voting rights, specifying or limiting the amount of dividends payable, the purchase of new equipment, the maintenance of current assets, etc.; or

etc.; or

(6) Any agreement reflecting a change in the officers, directors, or stockholders of a corporation, other than the licensee or permittee, having an interest, direct or indirect, in the licensee or permittee as specified by §1.343.

(c) Contracts relating to the sale of broadcast time to "time brokers" for re-

(d) Contracts relating to Subsidiary Communications Authorization Operation, except contracts granting licensees or permittees engaged in SCA the right to broadcast copyright music.

cast copyright music.

(e) Time sales contracts. Time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station.

(f) Contracts relating to personnel.

(f) Contracts relating to personnel.

(1) The following contracts, agreements, or understandings shall be filed: management consultant agreements with independent contractors; contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employee of the licensee or permittee station; management contracts with any persons, whether or not officers, directors, or regular employees which provide for both a percentage or profits and a sharing in losses, of any similar agreements.

ments.

(2) The following contracts, agreements, or understandings need not be filed: agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with chief engineers or other engineering personnel; contracts with attorneys, accountants, or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements. or any similar agreements.

\$1.343 Ownership reports.—(a) Each licensee of a standard, fm. or television station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file an Ownership Report (FCC Form 323) at the time the application for renewal of station license is required to be filed: Provided, however, that licensees owning more than one standard, fm, or television broadcast station need file only one Ownership Report at three-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(1) In the case of an individual, the

(1) In the case of an individual, the name of such individual;
(2) In the case of a partnership, the names of the partners and the interest of each partner;

each partner;
NOTE: Any change in partners or in their rights will require prior consent of the Commission upon an application for consent to assignment of license or permit. If such change involves less than a controlling interest, the application for Commission consent to such change may be made upon FCC Form 316 (Short Form).

(3) In the case of a corporation, association, trust, estate, or receivership, the data applicable to each:

(i) The name, residence, citizenship, and stock-holdings of officers, directors, stock-holders, trustees, executors, administrators, receivers, and members of any association;

ciation:

tors, receivers, and members of any association;

(ii) Full information as to family relationship or business association between two or more officials, and/or stockholders, trustees, executors, administrators, receivers, and members of any association (iii) Capitalization with a description of the classes and voting power of stock authorized by the corporate charter or other appropriate legal instrument and the number of shares of each class issued and (iv) Full information on FCC Form 323 with respect to the interest, and identity of any person having any direct, indirect, fluciary, or beneficiary interest in the licensee or any of its stock;

For example:

(a) Where A is the beneficial owner or votes stock held by B, the same information should be furnished for A as is required for B.

(b) Where X corporation controls the licensee or helds 25% for more of the

(b) Where X corporation controls the licenses, or holds 25% or more of the PAGE C-52 . 1963 BROADCASTING YEARBOOK

number of issued and outstanding shares of either voting or non-voting stock of the licensee, the same information should be furnished with respect to X corporation (lits capitalization, officers, directors, and stockholders and the amount of stock [by class] in X held by each) as is required in the case of the licensee, together with full information as to the identity and citizenship of the person authorized to vote licensee's stock, in case of voting stock. (c) The same information should be furnished as to Y corporation if it controls X corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of X, and as to Z corporation if it controls Y corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of Y and so on back to natural persons.

(4) In the case of all licensees:

(i) A list of all contracts still in effect required to be filed with the Commission by \$1.342 showing the date of execution and expiration of each contract: and

(ii) Any interest which the licensee may have in any other broadcast station.

(b) A permittee shall file an Ownership Report (FCC Form 323) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each li-

mittee shall give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each licensec or permittee within 30 days after any change occurs in the information required by the Ownership Report from that previously reported. Such report shall include without limitation:

(1) Any change in capitalization or organization;

(2) Any change in officers and directors;

(3) Any transaction affecting the ownership, direct or indirect, or voting rights of licensee's or permittee's stock, such as:

(i) A transfer of stock;

(ii) Issuance of new stock or disposition of treasury stock; or

(iii) Acquisition of licensee's or permittee's stock by the issuing corporation: or

(4) Any change in the officers, directors, or stockholders of a corporation other than the licensee or permittee such as X, Y, or Z corporation described in the example in paragraph (a) (3) of this section.

NOTE: Before any change is made in the organization, capitalization, officers, directors, or stockholders of a corporation other than licensee or permittee, which results in a change in the control of the licensee or permittee, prior Commission consent must be received under Section 310(b) of the Communications Act and 31.329. A transfer of control takes place when an individual, or group in privity, gains or loses affirmation or negative (50%) control. See instruction on FCC Form 323 "Ownership Report."

(d) Exceptions: Where information is required under paragraphs (a), (b), or (c) of this section with respect to a corporation or association having more than 50 stockholders or members who are officers or directors of the corporation or association, or to other stockholders or members who have 1% or more of either the voting or non-voting stock of the corporation or voting rights in the association.

### LICENSE RENEWALS

General . . .

§1.328 Application for renewal of license.

—(a) Unless otherwise directed by the Commission, an application for renewal of license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed except that applications for renewal of license of an experimental or developmental broadcast station shall be filed at least 60 days prior to the expiration date of the license sought to be renewed.

tion date of the license sought to be renewed.

(b) No application for renewal of license of any broadcast station will be considered unless there is on file with the Commission, the information if any, currently required by §§1.341 to 1.343, inclusive, for the particular class of station. The renewal application shall include a reference by date and file number to such information on file.

(c) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal applica-

(18) For stations located in New Jersey and New York, June 1, 1957.

### STATION IDENTIFICATION

In am rules . . .

\$3.117 Station identification.—(a) A licensee of a standard broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour preceding the next hour: Provided,

(b) Such identification announcement need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, operatic production or forum of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity, and at the conclusion of the program.

(c) Such identification announcement need not be made on the half hour or quarter hours when to make such an announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of the program; provided, that an announcement within 5 minutes of the time specified in paragraph (a) (2) of this section will satisfy the requirements of identification announcements.

(d) In the case of variety show pro-

requirements of identification announcements.

(d) In the case of variety show programs of longer duration than 30 minutes, the identification announcement shall be made within 5 minutes of the hour and of the times specified in paragraph (a) (2) of this section.

(e) In the case of all other programs the identification announcement shall be made within 2 minutes of the hour and of the times specified in paragraph (a) (2) of this section

the times specined in paragraph (a)(2) of this section.

(f) In making the identification an-nouncement the call letters shall be given only on the channel of the station identi-fied thereby, except as otherwise provided in §3.287 of the Commission's Rules Gov-erning Fm Broadcast Stations.

§3.287 Station Identification.—(a) A licensee of an fm broadcast station shall make separate station identification announcement (call letters and location) for such station; provided, however, that if the same licensee operates an fm radio broadcasting station and a standard broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the fm station do not clearly reveal that it is an fm station, the joint announcement shall state that one of the stations is an fm station. Station identification announcements shall be made at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour; Provided:

### In tv rules . . .

§3.652, Station identification.—(a) A licensee of a television broadcast station shall make station identification announcements (call letters and location) at the beginning and ending of each time of operation and during the operation on the hour. The announcement at the beginning and ending of each time of operation shall be by both aural and visual means. Other announcements may be by either aural or visual means.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

### SPONSORED PROGRAMS (Announcement of)

### In am rules . . .

is am rules...

§3.119 Sponsored programs, announcements of.—(a) In the case of each program for the broadcasting of which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, any radic broadcast station, the station broadcasting such program shall make, or cause to be made. an appropriate announcement that the program is sponsored, paid for, or furnished, either in whole or in part.

(b) In the case of any political program any program involving the discussion of public controversial issues for which any records, transcriptions, talent,

scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program, provided, however, that only one such anouncement need be made in the case of any such program of five minutes' duration or less, which announcement may be made either at the beginning or the conclusion of the program.

(c) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services refered to in subsection (b) hereof are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent.

(d) In the case of any program, other the contracts of our program is acting instead of the name of such agent.

agent is acting instead of the name of such agent.

(d) In the case of any program, other than a program advertising commercial furnished, by a corporation, committee, association or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or member of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at one of the radio stations carrying the program.

tion at one of the radio stations carrying the program.

(e) In the case of programs advertising commercial products or services, an anouncement stating the sponsor's corporate or trade name or the name of the sponsor's product, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

[EDITOR'S NOTE: Rulemaking currently is under way to amend this section to prohibit payola to licensees and employes and unidentified announcements of products in which licenses or their employes have financial interests.]

### In tv rules . . .

### RECORDINGS and TRANSCRIPTIONS (Identification of)

### In am rules . . .

§3.118 Mechanical reproductions.—(a)
No mechanically reproduced program consisting of a speech, news event, news commentator, forum, panel discussion, or special event in which the element of time is of special significance, or any other program in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used that it is a mechanical reproduction or a mechanically reproduced program: Provided, however, that each such program of one minute or less need not be announced as such.

(b) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms com-

monly used and understood. Any other program mechanically reproduced or series of mechanical reproductions, including a mechanical reproduction used for background music, sound effects, station identification, program identification of short duration) or identification of sponsorship of the program proper, need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

sion that any program being broadcast by mechanical reproduction consists of live talent.

(c) The requirements of subsection (a) are waived with respect to network programs, transcribed and rebroadcast at a later hour because of the time zone differentials between the place where the program originates and where it is rebroadcast, this waiver being applicable whether the off-the-line recording is made by the network itself at one of its key stations or by an individual station, but only when the on-the-line recording is for broadcast at an hour not exceeding the time zone differential between the place where the program originates and where it is rebroadcast. Each station which broadcasts network programs at a later hour in accordance with this waiver shall make an appropriate announcement at least once each day between the hours of 10:00 a.m. and 10 p.m., stating that some or all of the network programs which are broadcast by that station are delayed broadcast by the station are delayed broadcast by means of transcription. This waiver provision also applies during the annual period in which daylight saving time will be effective with respect to network programs transcribed and rebroadcast one hour later because of the time differential resulting from the adoption of daylight saving time in some areas.

§3.653--[EDITOR'S NOTE: Identical with §3.118 above.]

### POLITICAL BROADCASTS

### For am, fm and tv . . .

\$3.120 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

(1) has qualified for a place on the bal-

lot or

(2) is eligible under the applicable law
to be voted by sticker, by writing in his
name on the ballot, or other method, and
(1) has been duly nominated by a political
party which is commonly known and regarded as such, or (2) make a substantial
showing that he is a bona fide candidate
for nomination or office, as the case may
be.

for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such facilities; provided, that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and practices.—(1) The rates, fany, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed by the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall

(2) In making time available to candidates for public office no licensee shall make any discrimination between candimake any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or

1963 BROADCASTING YEARBOOK . PAGE C-53

disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: inspections—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such request, and the charges made, if any, if request is granted. Such records shall be retained for a period of two years.

years.

(e) A request for equal opportunities must be submitted to the licensee within one week of the day on which the prior use occurred.

(f) A candidate requesting such equal opportunities of the licensee, or complaining of non-compliance to the Commission, shall have the burden of proving that he and his opponent are legally qualified candidates for the same public office.

[EDITOR'S NOTE: In fm this is §3.290; in tv, §3.657.]

### REBROADCASTS

In am rules . . .

§3.121 Rebroadcast.—(a) The term "re-broadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmis-sion of such program by a broadcast

NOTE: As used in this section, program includes any complete program or part thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard or high frequency broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

authority has been received from the licensee of the station originating the program.

NOTE: The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period (c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification originating the program.

NOTE: The broadcasting of a program relayed by a remote pickup broadcast station (section 4.401) is not considered a re-

tion originating the program.

NOTE: The broadcasting of a program relayed by a remote pickup broadcast station (section 4.401) is not considered a rebroadcast. Informal application may be employed. By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, section 3.121 (d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U.S. Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain rebroadcast, the person

PAGE C-54 • 1963 BROADCASTING YEARBOOK

legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of the station originating the program.

Attention is directed to section 325(b) of the Communications Act of 1934, which reads as follows:

reads as follows:

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apnaratus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission, upon proper application therefor. [See §1.327.]

\$3.29—[EDITOR'S NOTE: Identical in terms with \$3.121, above, with two exceptions: Paragraph (e) of \$3.121 is deleted in \$3.291, and Paragraph (b) relates to rebroadcast of programs of U.S.: "standard, fm or noncommercial educational" stations.]

\$3.655. Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station is not considered a rebroadcast. (As used in this section, program includes any complete program or part thereof.)

in this section, program includes any complete program or part thereof.)

(b) The licensee of a television broadcast station may, without further authority of the Commission, rebroadcast the program of a United States television broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE 1: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for such rebroadcast practice if begun during a license period with the application for such rebroadcast practice if begun during a license period.

NOTE 2: By Order No. 82, dated and

ing a license period.

NOTE 2: By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, Section 3.655(c) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U. S. Government radio stations.

C. S. Government radio stations.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program,

## REVOCATIONS, MODIFICATIONS, SUSPENSIONS

### (All Classes of Station Licenses)

\$1.63 Modification of licenses or construction permits on motion of the Commission.—(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause income in

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request, within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than

30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he requests a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause and the permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filling the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement

order to show cause and a mail decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the construction permit or license as proposed in the order to show cause will advise the person against whom it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued augment to this section shall include a

it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor, shall specify the effective date of the order and shall be served on the licensee or permittee.

§1.76 Notice of violations—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgement made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. In every

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. In every instance the answer shall contain a statement of action taken to correct the condition or omission complained of and to preclude its recurrence. In addition:

(1) If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus and any new apparatus is to be installed, the answer shall state the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application.

(2) If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

\$1.77 Revocation and/or cease and desist proceedings: hearings.— (a) If it appears that a station license or construction permit should be revoked and/or that a cease and desist order should be issued, the Commission will issue an order directing the person to show cause why an order of revocation and/or a cease and desist order, as the facts may warrant, should not be issued.

as the lacts may warrant, should not be issued.

(b) An order to show cause why an order to show cause why an order of revocation and/or a cease and desist order should not be issued will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the person to whom it is directed (the respondent) to appear before the Commission at a hearing, at a time and place stated in the order, but not less than thirty days after the receipt of such order, and give evidence upon the matters specified in the order to show cause. However, if safety of life or property is involved, the order to show cause may specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such oppor-

specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such order.

(c) To avail himself of such opportunity for hearing, the respondent, personally or by his attorney, shall file with the Commission, within thirty days of the service of the order or such shorter period as may be specified therein, a written appearance stating that he will appear at the hearing and present evidence on the matters specified in the order. The Commission in its discretion may accept a late appearance. However, an appearance tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petition for acceptance of late appearance will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(d) Hearings on the inatters specified in such orders to the second or th

therein constitute good cause for failure to file on time.

(d) Hearings on the matters specified in such orders to show cause shall accord with the practice and procedure prescribed in this subpart and Subpart B of this part, with the following exceptions:
(1) In all such revocation and/or cease and desist hearings, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission; and (2) the Commission may specify in a show cause order, when the circumstances of the proceeding require expedition, a time less than that prescribed in \$\$1.153 and 1.154 within which the initial decision in the proceeding shall become effective, exceptions to such initial decision must be filed, parties must file requests for oral argument, and parties must file notice of intention to participate in oral argument.

(e) Correction or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order.

(f) Any order of revocation and/or cease and defermined.

should be issued.

(f) Any order of revocation and/or cease and desist order issued after hearing pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the person to whom such order is directed.

\$1.78 Revocation and/or cease and desist proceedings: after waiver of hearing.—
(a) After the issuance of an order to show cause, pursuant to \$1.77, calling upon a person to appear at a hearing before the Commission, the occurrence of any one of the following events or circumstances will constitute a waiver of such hearing and the proceeding thereafter will be conducted in accordance with the provisions of this section.

(1) The respondent fails to file a timely written appearance as prescribed in \$1.77(c) indicating that he will appear at a hearing and present evidence on the matters specified in the order.

(2) The respondent having filed a timely written appearance as prescribed in \$1.77(c), fails in fact to appear in person or by his attorney at the time and place of the duly scheduled hearins.

(3) The respondent files with the Commission, within the time specified for a written appearance in \$1.77(c), a written to a hearing.

(b) When a hearing is waived under

a nearing.

(b) When a hearing is waived under the provisions of paragraph (a) (1) or (3) of this section, a written statement signed by the respondent denying or seeking to mitigate or justify the circumstances or conduct complained of in the order to

show cause may be submitted within the time specified in \$177(c). The Commission in its discretion may accept a late statement. However, a statement tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petitions for acceptance of a late statement will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

cause for failure to file on time.

(c) Whenever a hearing is waived by the occurrence of any of the events or circumstances listed in paragraph (a) of this section, the Review Board at the earliest practicable date shall issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. Such order shall be served upon the respondent.

case to the Commission.

(d) After a hearing proceeding has been terminated pursuant to paragraph (c) of this section, the Commission will act upon the matters specified in the order to show cause in the regular course of business. The Commission will determine on the basis of all the information available to it from any source, including such further proceedings as may be warranted, if a revocation order and/or a cease and desist order should issue, and if so, will issue such order. Otherwise, the Commission will issue an order dismissing the proceeding. All orders specified in this paragraph will include a statement of the findings of the Commission and the grounds and reasons therefor, will specify the effective date thereof, and will be served upon the respondent. upon the respondent.

(e) Corrections or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

should be issued.

§1.79 Availability of station logs and records for Commission inspection.—(a) Station records and logs shall be made available for inspection or duplication at the request of the Commission or its representative. Such logs or records may be removed from the licensee's possession by a Commission representative or, upon request, shall be mailed by the licensee to the Commission by either registered mail, return receipt requested. The return receipt requested, or certified mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by a Commission representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the Commission has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this chapter.

(b) Where records or logs are maintained as the official records of a recognition of the official records of a

visions of this chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the Chief of the law enforcement agency shall promptly certify in writing to the Federal Communications Commission that the removal of the logs or records will hinder law enforcement activities of the agency, and stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records may be released to the Federal Communications Commission.

### (Of Operator Licenses)

\$1.72 Suspension of operator licenses.—
Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operators' license shall take effect until 15 days' notice in writing of the cause for

the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering and Monitoring Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D. C. on or before the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

### LOTTERIES.

For all stations . . .

\$3.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. \$1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money, or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

\$1304 (of U. S. Criminal Code) Broadcasting Lottery information — Whoever

\$1304 (of U. S. Criminal Code) Broadcasting Lottery information. — Whoever broadcasts by means of any radio station for which a license is required by any law of the U. S. or whoever, operating any such station, knowingly permits the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise or scheme, whether said list contains any part or all of such prizes, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

Each day's broadcasting shall constitute a separate offense.

### CENSORSHIP

For all stations . . .

§326 (of Communications Act.)-Nothing 8326 (of Communications Act.)—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

### INDECENT LANGUAGE

\$1464 (of U. S. Criminal Code) Broad-casting obscene language.—Whoever ut-ters any obscene, indecent, or profane language by means of radio communica-tion shall be fined not more than \$10,000 or imprisoned not more than two years,

1963 BROADCASTING YEARBOOK . PAGE C-55

### TRANSFERS and ASSIGNMENTS

Voluntary . . .

\$1,329 Applications for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer of control or a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License). FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the Commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

- (b) The following assignment or transfer applications may be filed on FCC Form 316.
  - Assignment from an individual or individuals (including partnerships) to a corporation owned and con-trolled by such individuals or part-nerships without any substantial change in their relative interests;
  - Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests:
- (3) Assignment or transfer by which certain stockholders retire and the interest transferred is not a con-trolling one;
- (4) Corporate reorganization which involves no substantial change in the beneficial ownership of the corpora-
- (5) Assignment or transfer from a corporation to a wholly owned subsidiary thereof or vice versa, or where there is an assignment owned or controlled by the assignor stockholders without substantial change in their interests; or
- (6) Assignment of less than a controlling interest in a partnership.

[EDITOR'S NOTE: In a statement issued by the FCC in 1948, licensees were warned that no transfers of station control are permitted until after Commission approved. The FCC also asked that licensees who are in doubt whether a transfer application is necessary bring ownership changes to the attention of the Commission to determine whether they are changes in control before consummating the transfer action.]

### Involuntary transfers and assignments

§1.330 Application for involuntary assignment license.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

The Most Trusted Name in Broadcasting

# Boost SPOT income with RCA TV Tape—Get peak quality...production savings

Advertisers are prone to "buy on sight" and stay sold once they view the excellence of spots made on RCA equipment. Picture quality is virtually "built in." RCA's multiple monitoring checks assure the highest quality production. You can check through the entire system . . . and be confident you are getting the best results at all times. Moreover, you can obtain a perfectly aligned picture in seconds thanks to RCA electronic quadrature adjustment for both record and playback.

RCA's "convenience features" save time and money in production. A central control panel puts the entire operation at the user's fingertips. A continuously variable speed control enables you instantly to cue-up any spot on tape. Speed can be slowed until audio becomes intelligible for cueing. And precision headwheel inter-

changeability—for color, too—means you can playback any tape on any machine, regardless of where made.

Special RCA safeguards protect your production against loss. Simultaneous control track monitoring assures you of a control track as you record. (A tape without a control track is worthless.) And you get simultaneous audio playback as well. You save lost production time, re-dos, talent costs. Only RCA provides these multiple means of protection.

Advertisers will appreciate the difference an RCA TV Tape Recorder will make in your spot production. You'll find a satisfaction in operation without parallel. And service after the sale is the type that only RCA with its broad background in television can perform.

Find out how the RCA TV Tape Recorder can help you produce the most saleable commercials and programs. See your RCA representative. Or write to RCA, Dept. YB-22, Building 15-5, Camden, N.J.

### NAB Television Code

### Preamble

Preamble

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting, and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of the station. He, however, is obliged to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminided that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television. In order that television programming may b

### I. Advancement of Education and Culture

I. Advancement of Education and Culture

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly

instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest pos-

produced so as to attract the largest possible audience.

4. The television broadcaster should be thoroughly conversant with the educational and cultural needs and desires of the community served.

5. He should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

6. He should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

7. It is in the interest of television as vital medium to encourage cation.

7. It is in the interest of television as a vital medium to encourage and promote the broadcast of programs presenting genuine artistic or literary material, valid moral and social issues, significant controversial and challenging concepts and other subject matter involving adult themes. Accordingly, none of the provisions of this code, including those relating to the responsibility toward children, should be construed to prevent or impede their broadcast. All such programs, however, should be broadcast with due regard to the composition of the audience. The highest degree of care should be exercised to preserve the integrity of such programs and to ensure that the selection of themes, their treatment and presentation are made in good faith upon the basis of true instructional and entertainment values, and not for the purposes of sensationalism, to shock or exploit the audience or to appeal to prurient interests or morbid curiosity.

### II. Responsibility Toward Children

11. The education of children involves giving them a sense of the world at large. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. In addition, those programs which might be reasonably expected to hold the attention of children and which are broadcast during times of the day when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

2. Such subjects as violence and sex shall be presented without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.

clear.
3. The broadcaster should afford opportunities for cultural growth as well as for wholesome entertainment.

wholesome entertainment.

4. He should develop programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

5. Programs should reflect respect for parents, for honorable behavior, and for the constituted authorities of the American community.

can community.

6. Exceptional care should be exercised with reference to kidnapping or threats of kidnapping of children in order to avoid terrorizing them.

7. Material which is excessively violent or would create morbid suspense, or other undesirable reactions in children, should be avoided.

8. Particular restraint and care in crime or mystery episodes involving children or minors, should be exercised.

### III. Community Reponsibility

1. Community Repositionity

1. A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

:

### IV. General Program Standards

IV. General Program Standards

1. Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. The intimacy and confidence placed in Television demand of the broadcaster, the network and other program sources that they be vigilant in protecting the audience from deceptive program practices.

2. Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

3. Words (especially slang) derisive of any race, celor, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

4. Racial or nationality types should not be shown on television in such a manner as to ridicule the race or nationality.

5. Attacks on religion and religious faiths are not allowed. Reverence is to mark any mention of the name of God, His attributes and powers. When religious programs the rites shall be accurately presented. The office of fminister, priest or rabbi shall not be presented in such a manner as to ridicule or impair its dignity.

6. Respect is maintained for the sanctity of marriage and the value of the home.

manner as to ridicule or impair as and nity.

6. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

7. In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar allments and offending them or members of their families.

8. Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

tions shall not be presented as praise-worthy. The presentation of cruelty, greed and selfishness as worthy motivations is to be

selfishness as worthy motivations is to be avoided.

9. Law enforcement shall be upheld and, except where essential to the program plot, officers of the law portrayed with respect and dignity.

10. Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

11. The use of animals both in the pro-

11. The use of animals both in the production of television programs and as part of television program content, shall at all times, be in conformity with accepted

1963 BROADCASTING YEARBOOK . PAGE D-3

standards of humane treatment.

12. Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treament of the commission of crime is a frivolous, cynical or callous manner is unacceptable.

The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

- 13. The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.
- 14. Suicide as an acceptable solution for human problems is prohibited.
- Illicit sex relations are not treated commendable.

as commendable.

Sex crimes and abnormalities are generally unacceptable as program material.

The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

16. Drunkenness should never be presented as desirable or prevalent.

The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

17. Narcotic addiction shall not be presented except as a vicious habit. The administration of illegal drugs will not be displayed,

18. The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature.

19. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with Federal, state and local laws, and should concentrate on the subject as a public sporting event.

20. Exhibitions of fortune-telling, ocultism, astrology, phrenology, palm-reading and numerology are acceptable only when required by plot or the theme of a program, and then the presentation should be developed in a manner designed not to foster superstition or excite interest or belief in these subjects.

21. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must, in fact, be genuine contests and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

favor one contestant against any other.

22. No program shall be presented in a manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical filusion.

23. The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

event.

24. The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

25. Contests may not constitute a lottery.

25. Contests may not constitute a lottery.

26. Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward rather than for the quality of the program, should be avoided.

27. The costuming of all performers shall be within the bounds of propriety and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

28. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers

29. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

30. The use of the television medium to transmit information of any kind by the use of the process called "subliminal perception," or by the use of any similar technique whereby an attempt is made to convey information to the viewer by transmitting messages below the threshold of normal awareness, is not permitted.

31. The broadcaster shall be constantly alert to prevent activities that may lead to such practices as the use of scenic properties, the choice and identification of

prizes, the selection of music and other creative program elements and inclusion of any identification of commercial products or services, their trade names or advertising slogans, within a program dictated by factors other than the requirements of the program itself. The acceptance of cash payments or other considerations in return for including any of the above within the program is prohibited except in accordance with Sections 317 and 508 of the Communications Act.

32. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially such as "flash" or "bulletin" and statements such as 'we interrupt this program to bring you ..." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a new release.

### V. Treatment of News and Public Events

V. Treatment of News and Public Events

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

4. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

5. Good taste should prevail in the selection and handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

6. Commentary and analysis should be clearly identified as such.

7. Pictorial material should be chosen with care and not presented in a misleading manner.

8. All news interview programs should

ing manner.

with care and not presented in a misleading manner.

8. All news interview programs should be governed by accepted standards of ethical journalism, under which the interviewer selects the questions to be asked. Where there is advance agreement materially retricting an important or newsworthy area of questioning, the interviewer will state on the program that such limitation has been agreed upon. Such disclosure should be made if the person being interviewed requires that questions be submitted in advance or if he participates in editing a recording of the interview prior to its use on the air.

9. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station, and in his selection of newscasters, commentators, and analysts.

analysts.

### Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. The treatment of such events by a television broadcaster should provide adequate and informed coverage.

### VI. Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to his fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

welfare of a substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would mis-

lead listeners or viewers to believe that the program is purely of an entertainment, news, or other character.

### VII. Political Telecasts

1. Political Telecasts

1. Political telecasts should be clearly identified as such. They should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

(Ref.: Communications Act of 1934, as amended, Secs. 315 and 317, and FCC Rules and Regulations, Secs. 3.654, 3.657, 3.663, as discussed in NAB's "A Political Catechism.")

### VIII. Religious Programs

VIII. Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community appropriate opportunity for religious presentations.

2. Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

3. Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

4. Religious programs should be presented by responsible individuals, groups and organizations.

5. Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

6. In the allocation of time for telecasts of religious programs the television station should use its best efforts to apportion such time fairly among the representative faith groups of its community.

IX. General Advertising Standards

### IX. General Advertising Standards

sentative faith groups of its community.

IX. General Advertising Standards

1. This Code establishes basic standards for all television broadcasting. The principles of acceptability and good taste within the Program Standards section govern the presentation of advertising where applicable. In addition, the Code establishes in this section special standards which apply totelevision advertising.

2. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

3. Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

4. In consideration of the customs and attitudes of the communities served, each television broadctster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

5. The advertising of hard liquor (distuited spirits) is not acceptable.

6. The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable only when presented in the best of good taste and discretion, and is acceptable only when presented in the best of good

local laws.

ocal laws.

7. Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

8. The advertising of firearms is acceptable only subject to Federal and local laws.

laws.

9. The advertising of fortune-telling, occultism, astrology, phrenology, character reading or subjects of a like nature is not permitted.

10 Recause all products of a personal

permitted.

10. Because all products of a personal nature create special problems, such products, when accepted, should be treated with especial emphasis on ethics and the canons of good taste. Such advertising of personal products as is accepted must be presented in a restrained and obviously inoffensive manner.

The advertising of particularly intimate products which ordinarily are not freely mentioned or discussed is not acceptable.

PAGE D-4 • 1963 BROADCASTING YEARBOOK

(See Television Code Interpretation No. 4)
11. The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

unacceptable.

12. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

13. "Bait-switch" advertising whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

### X. Presentation of Advertising

E. Presentation of Advertising

1. Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony in the content and general tone of the ogram in which it appears.

2. The role and capability of television market sponsors' products are well recnized. In turn, this fact dictates that reat care be exercised by the broadcaster prevent the presentation of false, miseading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics, performance or appearance of the product.

3. The broadcaster and the advertiser should exercise special caution with the content and presentation of television commercials placed in or near programs designed for children. Exploitation of children should be avoided.

Commercials directed to children should in no way mislead as to the product's performance and usefulness.

Appeals involving matters of health which should be determined by physicians should not be directed primarily to children.

4. Appeals to help fictitious characters in television programs by purchasing the

Appeals to help fictitious characters

should not be directed primarily to children.

4. Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes.

5. Dramatized advertising involving statements or purported statements by physicians, dentists, or nurses must be presented by accredited members of such professions. (Ses Television Code Interpretation No. 5.)

6. Advertising copy should contain notaims dealing unfairly with competitors, competing products, or other industries, professions or institutions.

7. A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called trailer or "hitch-hike" announcements). To this end, the program itself should be announced and clearily identified, both audio and video, effort the sponsor's advertising material is first used, and should be signed off, both audio and video, after the sponsor's advertising material is last used.

8. Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fullled.

9. A charge for television time to churches and religious bodies is not recommended.

XI. Advertising of Medical Products

### XI. Advertising of Medical Products

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer because of the direct bearing on his

because of the direct bearing on his health.

2. Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe," "without risk," "harmless," or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

3. A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

### XII. Contests

1. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations. Care should be taken to avoid the concurrent use of the three elements which together constitute a lottery—prize, chance and consideration.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown, or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable unless the award is based upon skill and not upon chance.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (See Time Standards for Advertising Copy.)

### XIII. Premiums and Offers

Full details of proposed offers should be required by the television broadcaster for investigation and approved before the first announcement of the offer is made to

first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary con-

plaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of viewers

eniarge their value of ers.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

### XIV. Time Standards for Advertising

In accordance with good telecast adver-tising practice, the time standards for commercial material are as follows:

### 1. Prime Time

1. Prime Time
Definition: A continuous period of not less than three hours of each broadcast day within the station's highest rate time periods.
Commercial material for both individually sponsored and participation programs within any 30-minute period of prime time may not exceed 4 minutes plus total station break time in the aggregate of 70 seconds.
Commercial material in prime time includes billboards, public service announcements, promotional announcements for other programs as well as commercial copy.

### 2. Non-Prime Time

2. Won-Prime Time

Definition: All time other than prime time. Commercial material for both individually sponsored and participation programs within any 30-mniute time period in non-prime time may not exceed 6 minutes plus station break time. Commercial material for all other periods of time shall not exceed this ratio, except that individual programs of 5-minutes duration may include commercial material not in excess of 1 minute 15 seconds and individual programs of 10-minutes duration may include commercial material not in excess of 2 minutes 10 seconds.

Not more than three announcements shall be scheduled consecutively.

Commercial material in non-prime time does not include public service announcements, promotional announcements for other programs, and opening and closing "billboards" which give program or sponsor identification.

sor identification.

### 3. Station Breaks

In prime time, a station break shall consist of not more than two announcements plus non-commercial copy such as station identification or public service announcements. Total station break time in any 30-minute period may not exceed one

minute and ten seconds.

In other prime time station breaks shall consist of not more than two announcements plus the conventional spnsored 10-second ID.

Station break announcements shall not adversely affect a preceding or following program

### 4. Prize Identification

4. Prize Identification
Reasonable and limited identification of prize and statement of the donor's name within formats wherein the presentation of contest awards or prizes is a necessary and integral part of program content shail not be included as commercial time within the meaning of paragraphs 1 and 2, above; however, any aural or visual presentation concerning the product or its donor, over or beyond such identification and statement, shall be included as commercial time within the meaning of paragraph 1, above (See Television Code Interpretation No. 6.)

time within the meaning of paragraph 1, above (See Television Code Interpretation No. 6.)

5. Care should be exercised in the selection, placement and integration of nonprogram material in order to avoid adversely affecting the program or diminishing audience interest.

6. Programs presenting women's services, features, shopping guides, market information, and similar materials, provide a special service to the listening and viewing public in which advertising material is an informative and integral part of the program content. Because of these special characteristics the time standards set forth above may be waived to a reasonable extent.

7. Any casual reference by talent in a program to another's product or service under any trade name or language sufficienty descriptive to identify it should, except for normal guest identifications, be condemned and discouraged.

8. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade-mark or slogan may be used only incidentally. They should not obtrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

9. Each opening and closing "billboard" regardless of the number of sponsors shall not exceed 20 seconds in programs longer than one half-hour or 10 seconds in programs of one half-hour or less.

Interpretations of the Television Code by

# Interpretations of the Television Code by the Code Review Board

No. 1, June 7, 1956, Revised March 3, 1960, March 15, 1962

Integrated and Piggy-Back Announcements

Integrated and Piggy-Back
Announcements
There art two types of announcements
advertising multiple products or services:
1) The Intergrated Announcement and
2) The Piggy-Back Announcement.
The basic difference between the two is
the audio and video treatment.
1) The integrated Announcement is one
advertising two or more products or servloes. WHICH IS SO EXECUTED IN
AUDIO AND VIDEO PRESENTATION
THAT IT ACTUALLY IS A SINGLE
ANNOUNCEMENT. Such an announcement under the commercial limitations of
the Code, provided that:
a) the products or services are related
in character or purpose, or
b) if the products or services aftered
are those of the same sponsor.
2) The Piggy-Back Announcement is one
advertising two or more products or servloes, WHICH IS SO EXECUTED IN
AUDIO AND VIDEO PRESENTATION
THAT IT ACTUALLY IS TWO OR MORE
SEPARATE ANNOUNCEMENTS. Such a
piggy-back announcement will be counted
as two or more announcements under the
commercial limitations of the Code.

No. 2, June 7, 1956, revised June 9, 1958

### No. 2, June 7, 1956, revised June 9, 1958 "Pitch" Programs

"Pitch" Programs

The "pitchman" technique of advertising on television is inconsistent with good broadcast practice and generally damages the reputation of the industry and the advertising profession.

Sponsored program-length segments consisting substantially of continuous demonstration or sales presentation, violate not only the time standards established in the Code, but the broad philosophy of improvement implicit in the voluntary Code operation and are not acceptable.

1963 BROADCASTING YEARBOOK . PAGE D-5

### NAB Radio Code of Good Practices

The Radio Broadcaster's Creed We Believe:

The Radio Broadcaster's Creed

We Believe:

That radio broadcasting in the United States of America is a living symbol of democracy; a significant and necessary instrument for maintaining freedom of expression, as established by the First Amendment to the Constitution of the United Staes;

That its influence in the arts, in science, in education, in commerce, and upon the public welfare is of such magnitude that the only proper measure of its resonsibility is the common good of the whole people;

That it is our obligation to serve the people in such manner as to reflect credit upon our profession and to encourage aspiration toward a better estate for all mankind; by making available to every person in America such programs as will perpetuate the traditional leadership of the United States in all phases of the broadcasting art;

That we should make full and ingenious use of man's store of knowledge, his talents, and his skills and exercise critical and discerning judgement concerning all broadcasting operations to the end that we may, intelligently and sympathetically:

Observe the proprieties and customs of civilized society;

Respect the rights and sensitivities of all people;

Honor the sanctity of marriage and the home:

Protect and uphold the dignity and brotherhood of all mankind;

Honor the sanctity of marriage and the home:
Protect and uphold the dignity and brotherhood of all mankind;
Enrich the daily life of the people through the factual reporting and analysis of news, and through programs of education, entertainment, and information;
Provide for the fair discussion of maters of general public concern; engage in works directed toward the common good; and volunteer our aid and comfort in times of stress and emergency;
Contribute to the economic welfare of all by expanding the channels of trade, by encouraging the development and conservation of natural resources, and by bringing together the buyer and seller through the broadcasting of information pertaining to goods and services.

Toward the achievement of these purposes we agree to observe the following:

### 1. PROGRAM STANDARDS

Radio is unique in its capacity to reach the largest number of people first with reports on current events. This competitive advantage bespeaks caution—being first is not as important as being right. The following standards are predicated upon that viewpoint.

NEWS SOURCES. Those responsible for news on radio should exercise constant professional care in the selection of sources—for the integrity of the news and the consequent good reputation of radio as a dominant news medium depend largely upon the reliability of such sources.

NEWSCASTING. News reporting shall

ources. NEWSCASTING. News reporting shall a factual and objective. Good taste

shall prevail in the selection and handling of news. Morbid, sensational, or alarming details not essential to factual reporting should be avoided. News should be broadcast in such a manner as to avoid creation of panic and unnecessary alarm. Broadcasters shall be diligent in their supervision of content, format, and presentation of news broadcasts. Equal diligence should be exercised in selection of editors and reporters who direct news gathering and dissemination, since the station's performance in this vital informational field depends largely upon them.

COMMENTARIES AND ANALYSES. Special obligations devolve upon those who analyze and/or comment upon news developments, and management should be satisfied completely that the task is to be performed in the best interest of the listening public. Programs of news analysis and commentary shall be clearly identified as such, distinguishing them from straight news reporting.

EDITORIALIZING. Some stations exercise their rights to express conjucces.

tified as such, distinguishing them from straight news reporting.

EDITORIALIZING. Some stations exercise their rights to express opinions about matters of general public interest. Implicit in these efforts to provide leadership in matters of public consequence and to lend proper authority to the station's standing in the community it serves, is an equal obligation to provide opportunity for qualified divergent viewpoints. The reputation of a station for honesty and accuracy in editorializing depends upon willingness to expose its convictions to fair rebuttal.

Station editorial comment shall be clearly identified as such.

TREATMENT OF NEWS AND PUBLIC EVENTS. All news interview programs shall be governed by accepted standards of ethical journalism, under which the interviewer selects the questions to be asked. Where there is advance agreement materially restricting an important or noteworthy area of questioning, the interviewer shall state on the program that such limitation has been agreed upon. Such disclosure shall be made if the person being interviewed requires that questions be submitted in advance or if he participates in editing a recording of the interview prior to its use on the air.

B. Public Issues

B. Public Issues

A broadcaster, in allotting time for the presentation of public issues, shall exert every effort to insure equality of opportunity.

Time should be allotted with due regard to all elements of balanced program schedules, and to the degree of interest on the part of the public in the questions to be presented or discussed. (To discuss is "to sift or examine by presenting considerations pro and con.") The broadcaster should limit participation in the presentation of public issues to those qualified, recognized, and properly identified groups or individuals whose opinions will assist the general public in reaching conclusions. clusions.

Presentation of public issues shall be clearly identified.

### C. Political Broadcasts

Political broadcasts, or the dramatiza-tion of political issues designed to in-fluence an election, shall be properly identified as such.

D. Advancement of Education and Culture

Because radio is an integral part of American life, there is inherent in radio broadcasting a continuing opportunity to enrich the experience of living through the advancement of education and culture.

The radio broadcaster in augmenting the advantement of the experience of living through the education and culture.

the advancement of education and culture.

The radio broadcaster in augmenting the educational and cultural influences of the home, the Church, schools, institutions of higher learning, and other entities devoted to education and culture: Should be thoroughly conversant with the educational and cultural needs and aspirations of the community served: Should cooperate with the responsible and accountable educational and cultural entities of the community to provide enlightenment of listeners; Should engage in experimental efforts designed to advance the community's cultural and educational interests.

### E. Religion and Religious Programs

Religious programs shall be presented respectfully and without prejudice or

respectfully and without prejudice or ridicule.
Radio broadcasting, which reaches men of all creeds simultaneously, shall avoid attacks upon religion.
Religious programs shall be presented by responsible individuals, groups, or organizations.
Religious programs shall place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

### P. Dramatic Programs

F. Dramatic Programs

In determining the acceptability of any dramatic program containing any element of crime, mystery, or horror, proper consideration should be given to the possible effect on all members of the family.

Radio should reflect realistically the experience of living, in both its pleasant and tragic aspects, if it is to serve the listener honestly. Nevertheless, it holds a concurrent obligation to provide programs which will encourage better adjustments to life.

This obligation is apparent in the area of dramatic programs particularly. Without sacrificing integrity of presentation, dramatic programs on radio shall avoid:
Techniques and methods of crime presented in such manner as to encourage imitation, or to make the commission of crime attractive, or to suggest that criminals can escape punishment:
Detailed presentation of brutal killings, torture, or physical agony, horror, the use of supernatural or climatic incidents likely to terrify or excite unduly; Episodes involving the kidnapping of children;
Sound effects calculated to mislead, shock, or unduly alarm the listener; Disrespectful portrayal of law enforcement;

ment; The portrayal of suicide as a satisfac-tory solution to any problem.

### G. Children's Programs

Programs specifically designed for listening by children shall be based upon sound social concepts and shall reflect respect for parents, law and order clean living, high morals, fair play, and honorable behavior.

### TV Code CONTINUED

excerpts from current theatrical releases in some instances may constitute "advertising copy" under "Time Standards for Advertising." Specifically, for example, when such presentation directly or by inference, urges viewers to attend, it shall be counted against the advertising copy time allowance for the program of which it is a part.

### No. 4, June 7, 1956

# Non-Acceptability of "Intimately Personal Products"

Paragraph 10 of the "Advertising Standards" reads in part, "The advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups is not acceptable."

Products for the track-most of himself.

acceptable. Products for the treatment of hemor-rhoids and for use in connection with fem-inine hygiene are not acceptable under the above stated language.

No. 5, July 17, 1958, Oct. 2, 1958

Dramatized Advertising (Presentation of Advertising, Par. 5)

1. The term "statement" shall include the portrayal in any manner, of a physi-cian, dentist or nurse. Thus, the simu-lation of such professional people may not be undertaken even by visual means

lation of such professional people may not be undertaken even by visual means only.

2. There are instances presently on the air of advertising depicting persons obviously of some professional standing. By the nature of the props and setting, such portrayals could be that of medical, dental or nursing profession members even though direct reference so indicating is not made. Such presentations, unless made by accredited members of these professions, are not acceptable.

3. This restriction does not preclude reference to comprehensive scientific research, studies or surveys, providing, however, that such claims can be fully supported.

4. The term "accredited" defined. In this context the use of the word "accredited" is synonymous with "having legal sanction." Thus, an "accredited" member of the medical profession is one

who has completed the required educa-tion in a recognized institution of learning, who has passed all necessary state ex-aminations, and who has been granted leave by his resident state to practice a particular branch of medicine.

### No. 6, Jan. 23, 1959 Prize Identification

Aural and/or visual prize identification of up to 10 seconds described Aural and/or visual prize identification of up to 10 seconds duration may he deemed "reasonable and limited" under the language of Paragraph 4 of the Time Standards for Advertising. Where such identification is longer than 10 seconds, the entire announcement or visual presentation will be charged against the total commercial time for the program period.

### No. 7, Oct. 4, 1960

No. 7, Oct. 2, 1960

Non-acceptability of "Hard" Liquor
(General Advertising Standards, Par. 5)

This restraint applies to the advertising of products and/or services in themselves not hard liquors, but which in their presentation, induce the use of hard liquor.

They shall convey the commonly accepted moral, social, and ethical ideals characteristic of American life.

They should contribute to the healthy development of personality and character. They should afford opportunities for cultural growth as well as for wholesome entertainment.

They should be consistent with integrity of realistic production, but they should avoid material of an extreme nature which might create undesirable emotional reaction in children.

They shall avoid appeals urging children to purchase the product specifically for the purpose of keeping the program on the air or which, for any reason, encourage children to enter inappropriate places.

on the air or which, for any reason, encourage children to enter inappropriate places.

H. General

The intimacy and confidence placed in Radio demand of the broadcaster, the networks and other program sources that they be vigilant in protecting the audience from deceptive program practices.

Sound effects and expressions characteristically associated with news broadcasts (such as "bulletin," "flash," etc.) should be reserved for announcement of news. and the use of any deceptive techniques in connection with fictional events and non-news programs shall not be employed. The broadcaster shall be constantly alert to prevent activities that may lead to such practices as the choice and identification of of prizes, the selection of music and other creative program elements and inclusion of any identification of commercial products or services, their trade names or advertising slogans, within a program dictated by factors other than the requirements of the program itself. This expressly forbids that acceptance by producer, talent, or any other personnel of cash payments or other considerations in return for including any of the above within the program.

When plot development requires the use of material which depends upon physical or mental handicaps, care shall be taken to spare the sensibilities of sufferers from similar defects.

Stations shall avoid broadcasting program material which would tend to encourage illegal gambling or other violations of Federal, State and local laws, ordinances, and regulations.

Simulation of court atmosphere or use of the term "court" in a program title should be done only in such manner as to eliminate the possibility of creating the false impression that the proceedings broadcast are vested with judicial or official authority.

When darmatized advertising material involves statements by doctors, dentists, nurses, or other professions people, the material shall be presented by members of such profession reciting actual experience, or it shall be made apparent from the presentation

### II. ADVERTISING STANDARDS

Advertising is the principal source of revenue of the free, competitive American system of radio broadcasting. It makes possible the presentation to all American people of the finest programs of entertainment, education, and information.

Since the great strength of American radio broadcasting derives from the public respect for and approval of its programs, it must be the purpose of each broadcaster to establish and maintain high standards of performance, not only in the selection and production of all programs, but also in the presentation of advertising.

### A. Time Standards for Advertising Copy

The time standards for advertising copy are as follows:

1. Programs under single sponsorship. The maximum time to be used for advertising, allowable to any single sponsor, regardless of type of program, shall

| 5        | minute | programs | 1:30         |
|----------|--------|----------|--------------|
| 10<br>15 | **     | 19       | 3:00         |
| 25<br>30 | **     | D        | 4:00<br>4:15 |
| 45<br>60 | **     | **       | 5:45<br>7:00 |

The time standards allowable to a single advertiser do not affect the established practice of allowance for station breaks between programs.

Any reference in a sponsored program to another's products or services under any trade name, or language sufficiently descriptive to identify it, shall, except for normal guest identifications, be considered as advertising copy.

While any number of products may be advertised by a single sponsor within the specified time standards, advertising copy for these products shall be presented within the framework of the program structure. Accordingly, the use on such programs of simulated spot announcements which are divorced from the program by preceding the introduction of the program itself, or by following its apparent sign-off shall be avoided. To this end, the program itself shall be announced and clearly identified before the use of what have been known as "cow-catcher" announcements, and the programs shall be signed off after the use of what have been known as "hitchhike" announcements.

2. Announcement type programs, multille sponsorship programs, and any com-

hike" announcements.

2. Announcement type programs, multiple sponsorship programs, and any combination of programs and announcements.

The maximum time to be used for advertising in announcement and/or multiple sponsorship programs shall not exceed an average of 14 minutes an hour computed on a weekly basis; provided, however, that in no event shall the maximum exceed 18 minutes in any single hour or five minutes in any 15-minute segment. For the purpose of determining advertising limitations, such programs types as "classified." "swap shop" "shopping guides" and "farm auction" programs, etc., shall be regarded as containing one and one-half minutes of advertising for each five-minute segment.

### B. Presentation of Advertising

The advancing techniques of the broadcast art have shown that the quality and proper integration of advertising copy are just as important as measurement in time. The measure of a station's service to its audience is determined by its overall performance, rather than by any individual segment of its broadcast day.

The final measurement of any commercial broadcast service is quality. To this, every broadcaster shall dedicate his best efforts.

### Acceptability of Advertisers and Prod-

c. Acceptability of Advertisers and Products.

1. A commercial radio broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, he shall, in recognition of his responsibility to the public refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served. each radio broadcaster shall refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility, taking into consideration the characteristics of the medium and the form of the particular presentation. In general, because radio broadcasting is designed for the home and the entire family, the following principles should govern the business classifications listed below:

a) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to existing laws.

c) The advertising of fortune-telling,

occultism, astrology, phrenology, palmreading, numerology, mind-reading or
character-reading is not acceptable.

d) The advertising of certain intimate
personal products which might offend or
embarrass the listening audience is unacceptable. Among these are products for
the treatment of hemorrhoids and for use
in feminine hygiene.

e) All advertising of products of a personal nature, when accepted, shall be
treated with special concern for the sensitivities of the listeners.
f) The advertising of tip sheets, publications, or organizations seeking to advertise for the purpose of giving odds or
promoting betting or lotteries is unacceptable.
2. An advertiser who markets more than
one product shall not be permitted to
use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.
3. Care shall be taken to avoid presentation of "bait-switch" advertising whereby goods or services which the advertiser
has no intention of selling are offered
merely to lure the customer into purchasing higher-priced substitutes.

D. Contests

Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent federal, state, and local laws and regulations.

All contest details, including rules, eligibility requirements, opening and termination dates, shall be clearly and completely announced or easily accessible to the listening public; and the winners ames shall be released as soon as possible after the close of the contest.

When contestants are required to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof shall be made acceptable.

All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection shall be considered a part of and included in the total time limitations heretofore provided.

### E. Premiums and Offers

The broadcaster shall require that full details of proposed offers be submitted for investigation and approval before the first announcement of the offer is made to the

announcement of the offer is made to the public.

A final date for the termination of an offer shall be announced as far in advance as possible.

If a consideration is required, the advertiser shall agree to honor complaints indicating dissatisfaction with the premium by returning the consideration.

There shall be no misleading descriptions or comparisons of any premiums or gifts which will distort or enlarge their value in the minds of the listeners.

## "WEALTH OF DATA AND INFORMATION"

"The BROADCASTING Yearbook contains a wealth of data and information that is invaluable in conducting TV and radio business both on the network and local levels."

Now on 190 TV STATIONS

# after 12 years more popular than ever!

Faith for Today-America's oldest church sponsored telecast is still growing. This public service one-half hour program is currently being televised on 190 stations in United States, Canada, Australia, Nigeria, Pilippine Islands, etc.

FOR ALL FAITHS-practical religion is emphasized rather than theology.

VARIED FORMAT — Dramas, interviews and all music programs.

POPULAR - Up to 9000 letters are received each week in the New York

This family telecast is available on a weekly basis without charge. For fur-ther information write to: Director of Station Relations

### CREATE THE RIGHT MOOD EVERY TIME

with the

### MUSIC LIBRARY MOOD MAJOR

Major offers you a full thirty-five hours of mood music for titles, bridges, background-for scoring, editing, recording and dubbing music for your Video Recordings, documentaries, TV films, slide films, animation, sales presentations, industrial films and commercials.

Major specializes in sound—you get exceptional technical know-how and beautifully-recorded original music.

IMPORTANT: Major owns its own copyrights on all mood music in its library; the record library is sold outright and is not leased; world rights available to you on a completely sound legal basis.

Music available on a "per selection" or "unlimited use" arrangement.

## you'll find BMI at the top in all \* categories

The BMI repertory
is complete in every musical
dimension—from the Pulitzer
Prize-winning opera of Robert Ward
to the pop hits of the day.

The BMI catalog is kept constantly up-to-date...and at the top in every category. Among the honors and achievements in music during 1962 are these from BMI...

### **OPERA**

ROBERT WARD-1962 Pulitzer Prize "The Crucible," an opera after the play by Arthur Miller.

### POP

"I Can't Stop Loving You" by Don Gibson. Number 1 "Favorite Single" in the Billboard's 15th Annual Record Artist Popularity Poll.

### **COUNTRY & WESTERN**

"Big Bad John"—Written and recorded by JIMMY DEAN. Voted most popular record of the year by the Music Operators of America.

### MUSICAL COMEDY

"Stop The World-I Want To Get Off"-Music, lyrics and book by Leslie Bricusse and Anthony Newley. Current Broadway success.

### BALLET

ROBERT PRINCE—"New York Export: Opus Jazz." First performance of Ballet at the White House.

### SYMPHONIC

HENRY COWELL – 1962 Henry Hadley Medal. Awarded by the National Association of American Composers and Conductors for outstanding service to American music.

### **CHAMBER**

ARTHUR BERGER — "String Quartet." New York Music Critics Circle Award 1962.

### **JAZZ**

GIL EVANS, THELONIOUS MONK, GEORGE RUSSELL, JOHN LEWIS, CHARLES MINGUS. Winners in Downbeat's 10th Annual International Jazz Critics Poll.

### **MOTION PICTURES**

PAUL ANKA—Featured in Darryl Zanuck's "The Longest Day," and composer of the title song.

 In other categories, too, such as Latin American, sacred and gospel, rhythm and blues, including rock and roll, and popular ballads, both American and European, BMI-affiliated composers, writers and publishers are prominently represented.

### THE RADIO AND TELEVISION AUDIENCES

More U. S. homes than ever before had television and radio as 1962 drew to an end.

- Television.—A total of 49 million homes, or 90 percent of all U. S. homes, were tv-equipped, according to the A. C. Nielsen Co. and the American Research Bureau. Their estimates, based on U. S. Census Bureau figures, were for January 1962 and did not reflect gains made after that time.
- Radio.—The number of radio homes was placed by Nielsen at 51.1 million, or 94% of all U. S. homes. These figures, reflecting a gain of 2.1 million radio homes since the last estimates were made in 1959, also were based on

Census Bureau data as of January 1962.

- Radio sets.—The number of working-order radio sets in the U.S. was estimated by the Radio Advertising Bureau as 183.8 million as of January 1962, a gain of 15.5 million sets in 12 months. RAB said the sets were distributed as follows: 126.9 million in homes, 46.9 million in automobiles, 10 million in public places.
- Viewing and listening.—The extent to which radio and television sets were used is indicated in numerous ways in the charts and tables on this and succeeding pages. All data used in preparing this material was furnished by the Nielsen company and its Nielsen Television Index (NTI) or Nielsen Radio Index (NRI).

### THE WEEKLY RADIO AND TV AUDIENCE

|                              | RA            | DIO                    | TELEVISION |                        |  |
|------------------------------|---------------|------------------------|------------|------------------------|--|

| All nights, 6 p.mmidnight    | 50.1          | 25,601                 | 94.9       | 46,501                 |  |
| Seven days, 24 hours a day   | 79.6          | 40,676                 | 95.4       | 46,746                 |  |

HOW MANY LOOK AND LISTEN? The respective sizes of the radio and television audiences in the course of an average week are shown above, by day part and by full-week total. In each case, the count is limited to different

homes listening or viewing—duplication has been eliminated. Figures are from the 1962-Nielsen March Week I study.

### HOMES USING RADIO BY COUNTY SIZE (During the Average Minute)

NRI March-April 1962

|                              | Using Radio | A    | В    | C    | D    |

| Monday-Friday-12 noon-6 p.m. | 25.6                | 24.2 | 30.6  | 24.3   | 23.1 | 26.0 | 29.7 | 23.6      | 25.2 | 23.6 |
| All nights-6 p.m11 p.m.      | <b>56.</b> 5        | 56.2 | 59.0  | 55.0   | 54.8 | 56.4 | 57.6 | 54.9      | 56.4 | 57.4 |

SIZE OF THE BROADCAST AUDIENCE is spelled out in further detail in the three foregoing tables. Here the measurement is in terms of U. S. homes tuning during an average minute. The county-size classifications are as follows: Class A, all counties belonging to the 25 largest metropolitan areas; Class B, all counties with over 120,000

population that are not in Class A that are part of the metropolitan area of cities in such B counties; Class C, all other counties not included in A or B having a population over 32,000 plus counties that are part of the metropolitan areas of cities in such C counties; Class D, all remaining counties. Sources: NRI, NTI.

### LISTENING IN RADIO-ONLY VS. LISTENING IN TV HOMES

|                              | MonFri., 8 | a.m12 noon | MonFri., 1 | 2 noon-6 p.m. | All night | s, 6-11 p.m. |
|------------------------------|------------|------------|------------|---------------|-----------|--------------|

| Radio-Only Homes Using Radio | 18.8       | 395        | 14.0       | 294           | 13.0      | 273          |
| Tv Homes Using Radio         | 13.3       | 6,517      | 8.3        | 4,067         | 5.1       | 2,499        |

HOW RADIO LISTENING DIFFERS IN TV HOMES. This table, based on Nielsen measurements in March-April 1962, gives the answer. It also shows the extent of radio

listening in all radio homes, those with as well as those without tv, thus providing a norm with which to compare the extent of listening in the sub-categories.

### RADIO LISTENING PER HOME PER DAY

|                       | 6 a.m12 noon | 12 noon-6 p.m. | 6 p.m6 a.m. | ·Total<br>Hr. Min. |
|-----------------------|--------------|----------------|-------------|--------------------|
| All days average      | 41 mins.     | 32 mins.       | 25 mins.    | 1:38               |
| Monday-Friday average | 45 mins.     | 31 mins.       | 26 mins.    | 1:42               |
| Saturday              | 36 mins.     | 39 mins.       | 25 mins.    | 1:40               |
| Sunday                | 27 mins.     | 33 mins.       | 19 mins.    | 1:19               |

EXTENT OF IN-HOME RADIO J.ISTENING, by day parts as well as by average day, is pointed up in this table (above), based on NRI measurements in March-April 1962.

Not included in this table: Listening to auto radios and other out-of-home sets.

### NUMBER OF HOMES TUNED TO RADIO, TV

IN-HOME AUDIENCES are shown in another way in the tables at right depicting number of homes tuned in per average minute of each daytime hour from 6 a.m. to midnight, Sunday through Saturday. Source: NTI March-April 1962.

### ABC-TV NETWORK RATES

ABC-TV NETWORK RATES

Below are gross rates for Class A hour. Class A time is 6-i1 p.m.. Sunday through Saturday. Class B rate (75% of Class A rate) applies to stations not primarily affiliated with ABC-TV. Class C time (50% of Class A rate) is 11 p.m. to sign-off Sunday through Saturday, 9 a.m. to 6 p.m. Saturday and Sunday, 9 a.m. to 6 p.m. Saturday and Sunday, 10 time (33.3% of Class A rate) is daytime hours up to 5 p.m. Monday through Friday. Class D time (33.3% of Class A rate) is daytime hours up to 5 p.m. Monday through Friday, except for special programs on national holidays, which are charged as Class C. Rates for each period of time of less than one hour are figured at the following percentages of the hour rate half hour—60%; quarter hour—40%; one-third of an hour—40%; two-thirds of half-hour—20%.

ABC has no must-buy list of basic stations. Its rate card states: 'Advertisers are required to purchase for each program a minimum cleared gross for station time equivalent to \$80,000.00 for each Class A hour telecast."

TELEVISION MAGAZINE is edited for an audience that comprises all people who contribute work or money to television and who are serious enough about it to spend an hour or two a month enlarging their knowledge of television. It is distinguished by thoughtful writing and fine illustration set in a handsome format.

444 MADISON AVE. NEW YORK 22, N. Y.

- □ Please send me a year of TELEVISION at special introductory rate of \$3.00. \$3 for 12 issues OR, I'll take advantage of the TWO YEAR money-saving rate of \$5.00.
  - ☐ I enclose \$\_\_\_\_
- ☐ Bill me later.

PLEASE SEND TO HOME ADDRESS:\_

special:

of Television... the magazine that probes beneath the surface of topical news

\*This introductory offer expires November 30, 1963

### Voice of America Pact Sheet

Voice of America Fact Sheet

The work of the Voice of America, a part of the U. S. Information Agency, is to submit evidence to the peoples of other nations that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress and peace. Equally the Voice attempts to expose Soviet imperialism and the fraud of international communism, while combatting their anti-American propaganda.

Radio is the fastest, most effective day by-day medium for achieving these objectives; it speaks directly to people abroad, instantaneously surmounting barriers of distance, censorship, illiteracy, foreign exchange, paper shortages and tariffs.

The Voice has a network of 87 transmitters, of which 32 are in the United States. These latter are shortwave stations rang-

ing in power from 25 thousand to 200 thousand watts, and operated under contract to VOA by private broadcasting companies. Government-owned or controlled relay stations are located at Munich. Salonika, Tangler, Ceylon, the Philippines and Okinawa. These installations comprising short, medium and longwave stations, include million-watt transmitters—the world's most powerful known broadcasting facilities—in the Philippines, Okinawa and Munich.

Relay facilities are also leased from BBC in England. Other relays or rebroadcasts are made through arrangements with local broadcasters of Western Europe, the Near East, Africa, Southeast Asia, the Far East and Latin America.

The Voice has a floating broadcasting station, the U. S. Coast Guard Cutter Courier which uses high powered medium wave and shortwave transmitters. The Courier provides VOA with a mobile and flexible relay station to meet the demands of the changing world situation and to combat Soviet Jamming.

Voice broadcasts consist of news, news analyses and features, which include political commentaries, press reviews, round-table discussions, documentaries and special events. Although the breakdown varies from area to area, the program content in general is balanced as follows: news, 50%; analyses and features, 50%.

Approximately 60% of VOA's total program effort is directed to the Iron Curtain countries and Communist China. In addition to direct shortwave programming, the Voice regularly broadcasts transcribed programs air-shipped to its relay stations. Other transcribed programs, music recordings, script material, television kinescopes and films are also furnished to U. S. Information Service offices throughout the free world for local distribution and broadcast. broadcast.

#### Audience Information

Programs are beamed to areas having a potential audience of over 400,000,000. Scientific surveys, letters from listeners, interviews with Iron Curtain defectors, efforts by the Communist press and radio to discredit the broadcasts, reports from

United States missions, correspondents and travelers provide convincing evidence of a regular listening audience of many millions.

#### Operations Information

The Broadcasting Service is responsible for the planning, execution and content of programs, which are produced and broad-cast from studios in Washington, D. C.

#### Voice of America Daily Language Broadcasts (May 31, 1962)

More than 100 separate programs are broadcast via shortwave daily in 38 languages as follows:

| Total<br>Hrs<br>mins.             | Total<br>Hrs<br>mins,      |

### "KEEP AT HAND THROUGHOUT YEAR"

"We at BBDO find the BROADCASTING Yearbook an invaluable reference which we keep at hand throughout the year. By listing the facilities and other pertinent data for every radio and television station in every market, it is helpful in our day-to-day buying activities."

When You Can Have The Best,

Why Be Satisfied With Less?

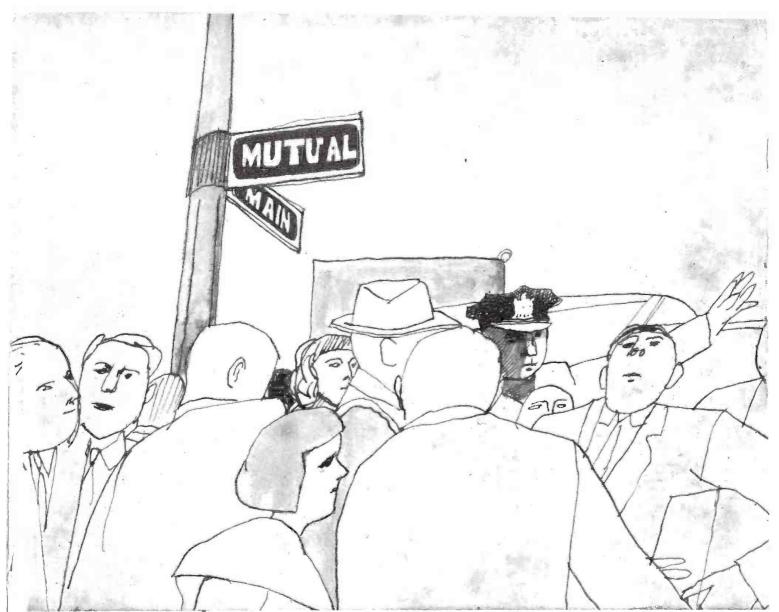

ALWAYS

NOTHING OUTSHOUTS
QUALITY AND INTEGRITY

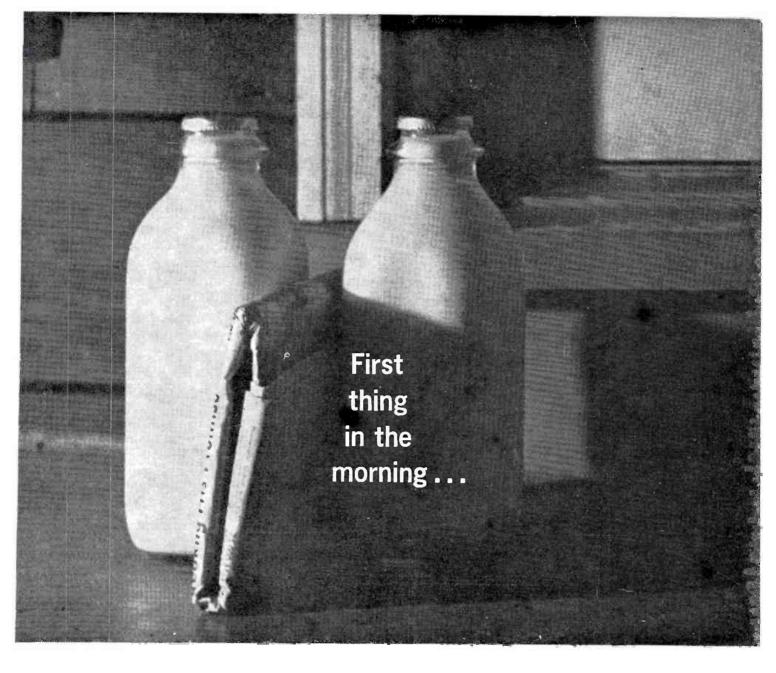

The road to market has to pass Main Street. **To reach Main Street U.S.A.**, **turn at Mutual.** Main Street, U.S.A. is the big "buy-way"—the street that sells through local radio. Mutual owns Main Street, U.S.A. lock, stock and big town—with 453 listenable affiliates everywhere. If you want to sell where the buying is biggest, check the signpost and turn at Mutual. *LANDMARK: Mutual delivers* 97 of the top 100 Main Streets in America. **Mutual Radio 3** A Service to Independent Stations.

www.americanradiohistorv.com

...that's how quickly ARB Overnight Surveys deliver needed audience data. It's also an important reason more and more stations, agencies and advertisers depend upon ARB during crucial periods of change in television scheduling.

Whether it's a change in competitive strength, in audience reaction to a new program or the need for additional decision-making data, practical telephone coincidentals can deliver overnight results for virtually any market. Yet, they are flexible enough that, at low cost, surveys can be tailored to deliver additional information on program-type

preference, personality identification or commercial preference at the same time.

ARB Coincidentals make television planning complete. You have the information you need, when you need it — overnight!

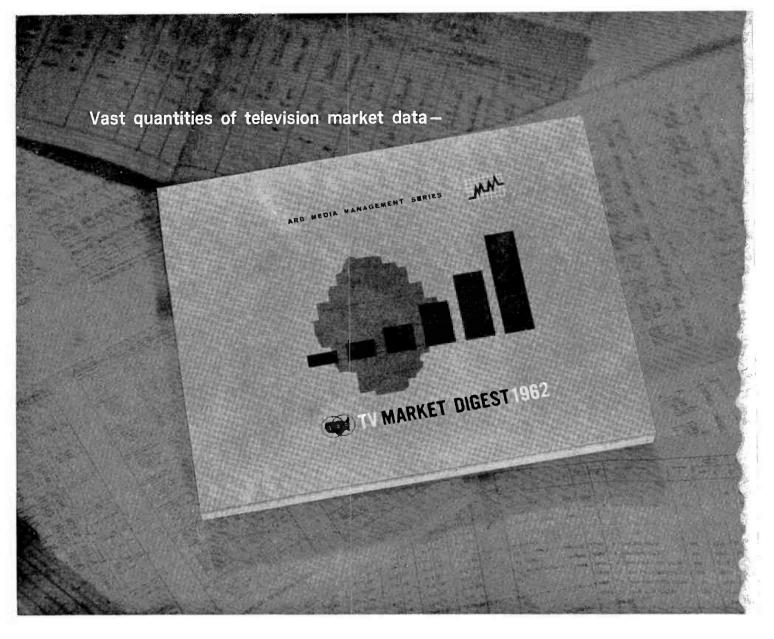

AMERICAN RESEARCH BUREAU

DIVISION OF C-E-I-R INC

Discover the full advantages available in this fast, reliable ARB Service. Ask your representative for a copy of ARB Overnight Surveys.

Washington WE 5-2600 . New York JU 6-7733 . Chicago 467-5750 . Los Angeles RA 3-8536

## **Digested**

The new ARB TV Market Digest is another major step in providing media planners with the most comprehensive television market and marketing information available. This one volume puts an end to costly searching time — no more checking through several sources of set counts, station circulation, market rankings and all the 'must-know' data necessary to effectively plan television campaigns. It's all here in the Market Digest, ready to become a valuable part of any research library. And what's more, it is all comparable data based on the same survey period, using the same research techniques.

Whether it is the county-by-county set count estimates by states, serviceable market and station rankings by varied criteria, or thorough individual market data for more

than 220 television markets, the Digest proves itself a unique planning tool with extra dividends of convenience every time it is used. This new report, another in the Media Management Series, is available now from your ARB representative.

# A FINANCIAL PICTURE OF THE ADVERTISING AGENCY, 1952-61

A 10-year report that indicates agencies in this country are in a high cost-low profit squeeze has been prepared by the American Assn. of Advertising Agencies. The table shown here represents in percentages the cost and profit picture of agencies over a decade. The reporting agencies handle almost two-thirds of all bill-

ings in the U.S. (Percent of gross income unless otherwise stated.) The figures—expressing the percentage gross income—show expenses moving steadily upward and profits declining (exception was a decided improvement in the expense and profit picture in 1959 after a sharp profit dip in 1958—see table).

(This list includes only those schools which specialize in professional or technical courses in broadcasting. Many coleges and universities also offer courses in radio and television. Current information on college and university radio-tv courses is maintained by the Office of Education, United States Dept. of Health, Education & Welfare, Washington 25, D. C., and National Assn. of Broadcasters, 1771 N. St. N.W., Washington 6, D. C.

Schools Specializing in Radio-Tv

1771 N. St. N.W., Washington 6, D. C.

American Broadcasting School, Military
Highway & Curlew Drive, Norfolk 2, Virginia. Phone 853-2797. Warren M. Miller,
natl dir; Robert E. Cobbins, sta relations;
Helen Lyons, student relations.
Courses offered: Progressive course
starting with basic commercial broadcasting through all areas of announcing,
news, sports, music library, copy, studio
production equipment, log, broadcast
laws and regulations, sales, promotions,
public relations and merchandising.
Course offered all or in part. All training
within commercial broadcast stations although portions may be taken through
personal correspondence with final training within station. Placement service for
graduates. graduates.

Announcer Training Studios. 25 West 43rd St., New York, N. Y. Oxford 5-9245.
Courses offered: Spanish announcing course, commercial spokesman course, radio announcing course: FCC 1st class ticket preparation course.

Broadcasting-Video Arts School. 2016 Walnut St., Philadelphia 3, Pa. Locust

Value St., Finadelphia 5, Fa. Locust 3-0826.
Courses offered: Basic courses covering radio-tv performance.

Brown Institute of Broadcasting and Electronics. 3123 E. Lake St. Minneapolis 6, Minn. Parkway 1-1639.
Courses offered: Broadcasting techniques (including tv production fundamentals); FCC license preparation.

California Institute of Radio & Televisiou. 901 S. Main St., Burbank, Calif. Victoria 9-6762. Henry C. Kurn, owner. Courses offered: Radio-tv production; FCC electronics. In-residence and cor-

respondence.

Cambridge School of Broadcasting. 687 Boylston St., Boston 16, Mass. Copley

7-4380. Courses offered: Radio and tv production, announcing, sales, continuity writing, sportscasting, newscasting, operation of equipment; FCC license preparation.

Capitol Radio Engineering Institute. 3224 16th St. N.W. Washington 10, D. C. Hobart 2-1520.

2-1520. Courses offered: Career development programs in electronic engineering technology: residence and extension: communications, aeronautical and navigational, television engineering technology, servo-mechanisms and computer, automation and industrial electronics engineering technology; engineering math; management and automation automatical electronic engineering technology; engineering math; management and automatical electronic expensions. and industrial electronics engineering technology; engineering math; manage-ment and nuclear engineering technology.

Cleveland Institute of Electronics. 1776 E.
17th St., Cleveland 14. Superior 1-9400.
Courses offered: Intermediate electronics; master course in broadcast engineering (leading to 1st class license); advanced communication engineering.

Columbia College, 2328 W. Seventh St., Los Angeles 57, Calif. Dunkirk 8-0551.

Courses offered: Tv studio techniques, camera operation, audio-video controls, switching, video tape, lighting: tv production, writing, directing, staging, announcing, acting: radio, board operation, record cueing, personality projection; broadcasting, lab and theory prenaration for FCC license. All work credited toward Bachelor of Arts degree. Graduate work also offered.

DeVry Technical Institute. 4141 Belmont Ave., Chicago 41, Ill. Kildare 5-2700. T. J. Lefeber, pres: O. I. Thompson, exec vp & dir of education: M. E. Houghton, dir of home training; J. J. Gershon, dean; J. T. Anagnost, dean of men; G. C. Fritzsche,

Anagnost, dean of high registrar.
Courses offered: Laboratory training in radio, tv, communications, electronic controls for automation, electronic technology. Home training in radio, tv, communications, electronic instrumentation and

PAGE F-16 • 1963 BROADCASTING YEARBOOK

Elkins Institute of Radio & Electronics. 2603 Inwood Rd. Dallas 35, Tex. Fleetwood 2-9565.
Atlanta 9, Ga.: 1139 Spring St., N.W. Trinity 2-0375.

Trinity 2-0375. Chicago 4. Ill.: 14 E. Jackson Blvd. Wabash 2-5430. Courses offered: 6-week theory & laboratory training in radio, tv. electronics, terminated by acquisition of a 1st class radio-telephone FCC license.

Elkins School of Broadcasting. 2603 Inwood Road, Dallas 35, Tex. Fleetwood 2-9565.

Courses offered: 12-week course in fun-damental broadcasting encompassing an-nouncing, scriptwriting, sportscasting, newscasting, control operation, recording, programming, production, etc.

Emerson College, 303 Berkeley St., Boston 16. Mass. Kenmore 6-3340.

# EMERSON COLLEGE

Fully accredited liberal arts college. Specialization in radio, TV, theatre arts, speech, speech and hearing therapy. B.A., B.S., M.A., M.S. degrees. Day, evening, summer sessions. Broad-M.S. degrees. Day, evening, summer sessions. Broadcasting, announcing, writing, radio and TV production. Electronic production studio, theatre, FM radio station, speech and hearing clinic. Outstanding opportunities for achieving professional competence in acting, directing, and seript writing for radio and TV. Coed. 81st year. For catalog write: Director of Admissions. Admissions.

EMERSON COLLEGE 303 Berkeley St., Boston 16

RADIO TV SPEECH THEATRE

Pamous Announcers School. 1836 Euclid Ave., Cleveland 15, Ohio. PR 1-3663. Leonard J. Kahn, registrar.

Courses offered: Announcing, newscasting, sportscasting and commercials. Correspondence courses.

Grantham School of Electronics. Hollywood Division: 1505 N. Western Ave., Hollywood 27, Calif. Hollywood 7-7727. Washington Division: 821 19th St., N.W., Washington 6, D. C. Sterling 3-3614. Seattle Division: 408 Marion St., Seattle 4, WashMain 2-7227. Kansas City Division: 3123 Gillham Rd., Kansas City 9, Mo. Jefferson 1-5220

1-6320. Courses offered: Preparation for FCC operator license examinations and engineering mathematics, by correspondence or in resident classes.

Keegan Technical Institute. 207 Madison Ave., Memphis 1, Tenn. Jackson 5-8896. Frank J. Keegan, dir.

Lincoln School of Badio & Television. 1851 Broadway, New York 28, N. Y. Circle 6-5300.

Courses offered: radio, fm and television technicians, electronic (radar) technician, electrical inspector.

Don Martin School of Radio & Television Arts & Sciences. 1653 North Cherokee, Los Angeles 28, Calif. Hollywood 2-3281.

Courses offered: Complete tv production and engineering; radio production, announcing, electronics and preparation for ECC licenses. FCC license.

Mid-South Electronics Institute Inc. 207 23rd Ave., North, Nashville 5, Tenn. Cy-press 1-7998. Courses offered: Radio-tv servicing, en-

gineering and announcing.

Midwestern Broadcasting School, 228 S. Wabash Ave., Chicago 4, Ill. Wabash 2-0712. Fred Robbins, pres-dir; Alice Lane, registran.

Courses offered: Announcing, timesell-

Mational Academy of Broadcasting Inc. 3338 16th St., N.W., Washington 10, D. C. Decatur 2-5580.

New York University. (Div. of General Education) 1 Washington Square, New York 3, N. Y. Spring 7-2000.

Courses offered: Introduction to television, television studio operation, tv workshop, advanced television direction, tv script writing, announcing for radio & tv, television personality, tv film production, writing commercials for radio & tv, planning & coordinating radio-tv advertising campaigns, workshop in tape recording & editing, technical television studio practice, television acting laboratory.

Morthwest Schools, 1221 N.W., 21st Ave., Portland 9, Ore. Capitol 6-4811. 737 N. Michigan Ave., Chicago; 6362 Hollywood Blvd., Hollywood, Calif.

Courses offered: Tv studio (camera, film, directing, etc.), radio announcing, electronic technician.

William B. Ogden Radio Operational Engineering School. 1150 West Olive Ave., Burbank, Calif. Thornwall 2-8291. Reservations required.
Courses offered: Concentrated preparation for first class radiotelephone operator

Portland Electronics College. 1017 S.W. Washington St., Portland 5, Ore. Capital 8-7777.

Courses offered: Electronics engineering, radio and tv repair and service, broadcasting engineering.

Leland Powers School Inc. 31 Evans Way, Boston 15, Mass. Aspinwall 7-2900. Courses offered: Radio-Tv announcing, acting, writing.

Radio-Television Training of America. 52 E. 19th St., New York 3, N. Y. Oregon 7-7390. Courses offered: Am-fm-tv; studio tech-nician, transistors, color tv.

RCA Institutes. 350 W. 4th St., New York 14, N. Y. Yukon 9-2000.
610 S. Main St., Los Angeles 14. Madison 8-1281.
Courses offered: Electronics technology; industrial and communications electronics; electronics and tv receivers; technical writing; digital computer electronics; automation electronics; electronic drafting; operation & production.

SET: The Academy of Broadcasting Arts Inc. 316 W. 57th St., New York 19. Union 5-2277. Courses offered: Tv programming-pro-duction; Radio-tv announcing: tv acting; tv writing; first class radiotelephone oper-ator's license; motion picture photography for tv; radio-tv sales and merchandising.

Washington Academy of Radio & Television Broadcasting. 1324 18th St., N. W., Washington 6, D. C. Adams 4-6916.
Robert S. Rush, administrative dir. Courses offered: Announcing, sportscasting, news reporting, music production, DJ operation, traffic, management & sales, public relations, control operation. Approved for veterans.

#### THE WASHINGTON ACADEMY OF RADIO AND TELEVISION BROADCASTING

1324 - 18th St., N.W., Washington 6, D. C. Day and Evening classes-Fully approved for veterans—Air Conditioned classrooms & studios—In the heart of downtown Washington.

#### GENERAL

Add esses at the 40th Annual Convention of the National Association of Broadcasters. April 1-4, 1962. NAB. 1771 N St., N.W., Washington 6, D. C. 43 p. Apply. Presents speeches by Edward R. Murrow, Newton N. Minow, LeRoy Collins, James E. Webb.

Better Communications for Better Health. Edited by Helen Neal. National Health Council, New York. Distributed by Columbia University Press. 29 0 Broadway, New York 27, 1962. 240 p. \$5.00.

Selections from a 1960 forum sponsored by the National Health Council concerning communications among scientists, among health teams and patients, among voluntary health agencies, and by means of television, radio, films and publications. Bibliography of Doctoral Dissertations in Television and Radio. Compiled by Kenneth R. Sparks. School of Journalism. Syracuse University, Syracuse 10, N. Y. 1962. 32 p. \$1.50.

Lists more than 350 theses completed at American universities through 1961. Communications. Satellites: Technical, Economic, and International Developments. Staff report prepared for the use of the Committee on Aeronautical and Space Sciences, United States Senate. U. S. Government Printing Office, Washington 25, D. C. 1962. 237 p. \$1.00.

Report catalogs and describes some of the recent developments.

Communications in Space. By Orrin E. Dunlap, Jr. Harper & Row, 49 E. 33 St., New York 16. 175 p. \$4.95.

Subtitled from wireless to satellite relay, this history begins with the discovery of electromagnetic waves, continues through radio broadcasting, television, radar, and present developments in satellites and space vehicles.

Communications Media in Tropical Africa. Renort by Arno Huth. International Cooperation Administration, Department of State, Washington 25, D. C. 1961. 171 p. Anply.

Detailed information on radio, films, publications in fourteen countries pre-

Annly.

material on copy preparation.

How to Use Radio to Sell Items. Radio Advertising Bureau, 116 E. 55 St., New York 22. 1962. 116 p. Apply.

Traces a radio campaign from the initial planning stages through advice on research, copy writing, selection of items to be advertised, setting up budgets, other areas.

People in Broadcasting. A research study by the Association for Professional Broadcasting Education and the National Association of Broadcasters. NAB, 1771 N St., N.W., Wasington 6, D. C. 1962. 94 p. Apply.

Survey to provide basic information on the background of those who work in broadcasting.

Performance. By Robert S. Stanton. University of Miami Press, Coral Gables 46, Fla. 1961. 56 p. \$1.00.

Subtitled: a study of microphone techniques for radio, television, and film. Radio and Television Continuity Writing. By L. C. Allen, A. B. Lipscomb & J. C. Prigmore. Pitman, 2 W. 45 St., New York 36. 1962. \$5.00.

Designed for beginners.

Scene Design for Stage and Screen. Edited by Orville K. Larson. Michigan State University Press. Box 550, East Lansing, Mich. 1961. 334 p. \$5.00.

Essays published originally between 1914 and the present, selected for students of design, amateur theatrical and drama enthusiasts and the professional.

So You're Gonna Shoot Newsfilm. By Leo Willette. Radio-Television News Directors Association. Order from Rob Downey, Exec. Sec., WMSB-TV, East Lansing, Mich. 1962. 55 p. \$1.25.

How-to-do-it book, factual presentation and filled with useful hints.

Technique of Television Production. By Gerald Millerson. Hastings House, 151 E. 50 St., New York 22. 1961. 416 p. \$10.00.

BBC-trained author presents the reader with a base from which to confront the problems of tv production. By Rudolf C. Bretz. 2d ed. McGraw-Hill. 330 W. 42 St., New York 36. 1962. 517 p. \$10.75.

Updated with a new chapter on intercommunication and cluing of value to pre-

Techniques of Television Froduction. By Rudolf C. Bretz. 2d ed. McGraw-Hill. 330 W. 42 St., New York 36. 1962. 517 p. \$10.75.

Updated with a new chapter on intercommunication and cuing, of value to producer, director, cameraman.

Television Froduction Handbook. By Herbert Zettl. Wadsworth Publishing Co., Belmont, Calif. 1961. 450 p. \$9.00.

Illustrated with sketches and photographs. Book is planned for medium and small station operation..

Television Program: Its Direction and Production. By Edward Stasheff and Rudy Bretz. Hill & Wang, 141 Fifth Ave., New York 10, 1962. \$6.95.

Third revised edition includes scripts.

The Television Writer. By Erlk Barnouw. Hill & Wang, 141 Fifth Ave., New York 10, 1962. 180 p. \$3.95.

Describes techniques of television writing, using excerpts from actual scripts as illustrations.

World Film Directory. No. 36 in the series Reports and Papers on Mass Communications. UNESCO Publications Center. 801 Third Ave., New York 22. 1962. 66 p. \$1.00.

Unesco's international directory listing agencies and organizations concerned with educational, scientific and cultural films throughout the world.

Writing for Television and Radio. By Robert L. Hilliard. Communication Arts Books, Hastings House, Pub., 151 E. 50th St., New York 22. 1962. 320 p. \$6.95.

Textbook is devoted principally to the non-dramatic forms of radio and television. Special emphasis is given to writing announcements, commercials, news and sports, special events. Sample scripts are provided throughout the book.

#### EDUCATION

Channels of Learning. By John W. Powell. Public Affairs Press, 419 New Jersey Ave., S.E., Washington 3, D. C. 1962. 168 p. \$4.50.
Subtitled: The story of educational television, this book is a carefully researched history.
Classroom Teacher's Guide to Audio-Visual Material. By Florence B. Freedman and Esther L. Berg. Chilton Co., 100 E. 42 St., New York 17, 1961. 240 p. \$5.00. Book is planned for teacher or future teacher who wants to learn about and develop use of new methods and materials; coverage includes radio, television and recordings.

develop use of new methods and materials; coverage includes radio, television and recordings.
Current Developments in Educational Television. National Educational Television and Radio Center, 1619 Massachusetts Ave., N.W., Washington 6, D. C. Fall 1961.
26 p. Apply.
Directory of College Courses in Eadio and Television, School Year 1961-1962. Prepared by Patricia Beall Hamill. Office of Education, U. S. Dept. of Health, Education and Welfare, Washington 25, D. C. 1962. 65 p. Apply.

This revision, prepared under the direction of Gertrude G. Broderick, includes summer workshop training courses.
Educational Am and Fm Radio, and Educational Television Stations. Prepared by Gertrude G. Broderick. Office of Education, U. S. Dept. of Health, Education and Welfare, Washington 25, D. C. Apply.

Arranged by state and city; includes gram director.

gram director.

# MAJOR TRENDS, EVENTS — 1961-62

Here are brief references grouped by subject, to some of the major news stories appearing in BROADCASTING—The Businessweekly of Television and Radio, during the period July 1961 through August 1962. Dates refer to issues of BROADCASTING in which the stories appeared.

Advertiser-Agency Relations
Account switches in 1961 amount to \$230 million—1/1/62; fewer changes in first half of 1962—7/9/62

Advertiser-Broadcaster Relations
Product protection became a major issue between buyers and sellers of broadcast media as multi-product advertisers and network spot advertising makes traditional 15-minute protection almost impossible for stations—5/14/62; Ted Bates demands 15-minute protection as ANA studies situation; Westinghouse stations refuse to guarantee so long an interval—5/21/62, with varied reaction—5/28/62; some stations accept Bates' terms—6/4/62; others do not—6/11/62, 6/18/62; Bates and WBC reach compromise, but AAAA committee urges insistence on 15-minute guarantee—7/9/62; slowdown in network spots eases product protection problem—7/16/62
As always, rising costs of tv concerned advertisers. Subject is explored at ANA meetings—11/6/61, 5/28/62,6/25/62
Extension of tv network station breaks to 40 seconds poses problems for advertisers—7/3/61, 7/10/61; most executives oppose extension—8/7/61; ID's become full 10-second spots—8/14/61; TAB favors 30-10 split—9/4/61; 20-second spots remain the favorites—9/18/61;

few viewers aware of change—1/8/62; few advertisers buy 30- or 40-second spots—3/19/62
Easier spot buying asked by General Motors ad head—10/2/61
New look at market data, based on specific characteristics advertiser wants, taken by Weed—4/2/62
Small advertisers shift billings to radiotv—8/21/61
Auto makers plan fall campaigns—8/21/

tv-8/21/61 Auto makers plan fall campaigns-8/21/ 61; 8/13/62 Food stores say daytime tv is best ad ood stores say daytime tv is best ad medium—10/9/61; housewives who buy most groceries do most viewing—12/ 25/61

25/61
AT&T finds tv good medium as well as good customer—12/25/61
Tv cartoon commercials found best for beer—7/9/62
Toy makers to increase tv time buys—6/25/62
Battle of soups means more money for tv, their major medium—6/25/62
Tv's top advertisers, first quarter, 1962—7/2/62
ANA finds tv better

7/2/62

ANA finds tv better than newspapers for product introduction—12/4/61

Advertising effectiveness can be measured—10/9/61; ANA book tells how—11/6/61: broadcasters can supply valuable data—10/2/61

Local advertisers show interest in tv documentaries—12/25/61; ANA sees trend that way—3/5/62; gas and oil companies like them—5/14/62

Advertiser-financed programs on increase—1/29/62

ANA proposes way to cut down on follower.

ANA proposes way to cut down on "clut-

ter" of credits, promos, etc.—3/5/62
Pre-emptible spots abolished by KABC-TV—4/2/62
Effectiveness of various program types in reaching 20 consumer targets is shown in RKO General study—5/14/62
Late night is fastest growing tv time segment—7/30/62
Late night is fastest growing tv time segment—7/30/62
Advertiser-Government Relations
FTC says advertisers must prove all statements in all media—11/6/61
Rapid Shave commercials, using sand on plexiglas to represent sandpaper, called misleading by FTC—10/16/61, which issues rules on camera tricks, props and mockups—1/8/62, that advertisers take in stride—1/15/62; FTC hits tv tricks—2/19/62; C-P asks court review of FTC decision—5/14/62; agencies feel FTC too tough—5/28/62; FTC chairman insits demonstrations must be factual as well as credible—6/4/62; Rise commercials also hit—10/2/61, 5/7/62; also those of Ltby-Owens-Ford and General Motors—8/6/52, and Hadacol—8/13/62; toy makers agree to stop ads criticized by FTC—8/6/62
HEW Secretary Ribicoff advocates law to stiffen drug advertising rules—9/18/61; FTC questions Rybutol claims—2/19/62, starts cold remedy advertising inquiry—3/5/62; investigates all pain-killing drugs—7/2/62
Government ponders cigarette advertising —6/4/62; AMA asks legal ban—7/2/62

drugs—7/2/62
Government ponders cigarette advertising
—6/4/62; AMA asks legal ban—7/2/62
Advertising's Image
Best way to improve public's picture of advertising's place in American life continued as goal of advertisers, agency men, broadcasters and others. One group felt answer to be certification of ad men—10/16/61; others plumped for li-

### Books & Reference Works CONTINUED

Educational Television, The Next Ten Years. Institute for Communication Research, Stanford University, Stanford, Calif. 1962. 375 p. \$1.00.

Calif. 1962. 375 p. \$1.00.

A report and summary of major studies on the problems and potential of educational television, conducted under the auspices of the U. S. Office of Education. Film Guide for Music Educators. By Donald J. Shetler. Music Educators National Conference, 1601 Sixteenth St., N.W., Washington, D. C. 1962. 119 p. \$2.50.

Presents listing of audio-visual aids for music, including many films and kinescopes originally prepared for television broadcast, now available for classroom use.

use.

Guides to Newer Educational Media. By
Margaret I. Rufsvold & Caroline Guss.
American Library Association, 50 E. Huron St., Chicago 11, Ill. 1961. 74 p. \$1.50.

films, filmstrips. slides, radio, television,

etc. Instructional Television Review 1959-1961. By Leon C. Fletcher. Pacific Coast Pub-lishers, Menlo Park, Calif. 1961. 73 p.

by Leon C. Fletcher. Facine Coast Publishers, Menlo Park, Calif. 1961. 73 p. \$2.00.

Report on the increasing use of educational television in the United States, prepared for the Educational Television Research Association.

National Policy for Educational Television. U. S. Office of Education, Dept. of Health, Education and Welfare, Washington 25, D. C. 1961. 13 p. Apply.

Report and recommendations submitted to the U. S. Commissioner of Education by the Educational Media Study Panel.

Needs of Education for Television Channel Allocations. Office of Education. U. S. Department of Health, Education & Welfare. U. S. Government Printing Office, Washington 25, D. C. 1962. 181 pp. \$9.25.

Survey by the National Association of Educational Broadcasters prepared under contract with the Office of Education. Study indicates a total of 1,197 channels needed in next decade for education's use. Accompanied by maps.

Televised Instruction. By Lee S. Dreyfus and Wallace M. Bradley. Mass Communications Center, Wayne State University, Detroit, Mich. 1962. 173 pp. \$3.00.

Collection of 16 speeches and lectures delivered at the Wayne-RCA Invitational Conference on Tv Instruction in June 1961.

1961.
Television and the Teaching of English. By Neil Postman and the Committee on the Study of Television of the National Council of Teachers of English. Appleton-Century-Crofts, 35 W. 32 St., New York 1. 1961. 138 p. \$1.00.
Book describes how teachers may use television in classroom studies of English, literature and language arts.

#### DIRECTORIES

Broadcasting Yearbook-The one-book li-

Broadcasting Yearbook—The one-book library of television and radio information, published every December by Broadcasting Publications Inc., 1735 De Sales St., N.W., Washington 6, D. C. 600 p. \$5.00.

Contains 50 separate directories covering the business side of television and radio: Stations, Networks, Representatives, Suppliers and Services, Manufacturers, Trade Associations and Professional Societies, Advertising Agencies, Broadcasting Regulations, Imposed and voluntary.

Broadcasting Regulations, Imposed and voluntary.

The Stecheson Classified Song Directory. Compiled by Anthony and Anne Stecheson. Music Industry Press, Box 328, Hollywood 28, Calif. 1961. 503 pp. \$25.00.

Classified directory of over 100,000 song titles; almost 400 different categories. Supplements planned to keep publication

#### TECHNICAL

All About Sound and Ultrasonics. By Ira M. Freeman. Random House, 457 Madison Ave., New York 22. 1961. 141 p. \$1.95
Illustrated with drawings and diagrams by Irving Geis. One of all-about books planned for young people.
Antenna Engineering Handbook. Edited by Henry Jasik. McGraw-Hill, 330 W. 42
St., New York 36. 1961. \$22.00.
Handbook discusses antenna design data, principles and methods.
Applied Mathematics for Radio and Communication Engineers. By Carl E. Smith. Dover Publications, 136 Varick St., New York 14. 1961. 336 p. \$1.75.
Basic Radio. By Marvin Tepper. John F. Rider, 116 W. 14 St., New York 11. In 6 Vol. 1961. \$14.85 for the set.
Contents: v.1-DC electricity; v.2-AC electricity; v.3-Electron tube circuits: v.4-AM and FM receivers; v.5-Transistors; v.6-Transmitters. Volumes may be purchased separately.

Communications Dictionary. By James F. Holmes. John F. Rider. 116 W. 14 St., New York 11. 1962. 88 p. \$1.50.

A compilation of terms used in electronic communications and data processing.

ing. Manual for Transistor Circuits. Design Manual for Transistor Circuits. Edited by John M. Carroll. McGraw-Hill, 330 W. 42 St.. New York 36, 1961. \$9.50. Compiled from articles nublished in Electronics magazine during 1958, 1959 and

Dictionary of Electronics Abbreviations, Signs, Symbols & Tables. By M. B. Witty, D. D. Polon and SETI staff. SETI Publishers, 176 E. 75 St., New York 21. 1962. 352 p. \$27.50.

"Reference dictionary for use by writers and editors in the electronics industry in the preparation and editing of technical reports, manuals, specifications, books." Annual supplements planned.

Electronic, Radio, and Microwave Physics. By D. E. Clark, H. J. Mead, Macmillan, 60 Fifth Ave., New York 11. 1961. 521 p. \$25.00.

By D. E. Clark, H. J. Mead, Macmillan, 60 Fifth Ave., New York 11. 1961. 521 p. \$25.00.

Textbook for college students in physics and electronic engineering.
Extraction of Signals from Noise. By L. A. Vainshtein and V. D. Zubakov. Translated from Russian by Richard A. Silverman. Prentice-Hall, Englewood Cliffs, N. J. 1962. 382 p. \$14.00.

Discusses radio interference problems.
First-Class Eadiotelephone License Handbook. By Edward M. Noll. Howard W. Sams, 2201 E. 46 St., Indianapolis 6, Ind. 1961. 304 p. \$4.95.

Information on how to acquire a license and how to maintain and operate broadcast equipment.

FM Multiplexing for Stereo. By Leonard Feldman. Howard W. Sams, 2201 E. 46 St., Indianapolis 6, Ind. 1962. 160 p. \$2.50.

Reference book for technicians.
Fm Stereo Multiplexing. By Norman H. Crowhurst. John F. Rider, 116 W. 14 St., New York 11. 1961. 65 p. \$1.25.

Detailed explanation with illustrations on installation, aligning and servicing of stereo multiplex.

Handbook for Production of Filmstrips and Records. Audio-Visual Division of DuKane Corp., 100 N. 11th Ave., St. Charles, Ill. 1962. 60 pp. \$2.50.

Handbook providing picture and sound specifications and other technical data for the production of film strips.

Miorowave Tubes. Academic Press. 111 Fifth Ave., New York 3. 1961. 608 p. \$50.00.

Proceedings of the Third International Congress on microwave tubes held in Monthly in the Published in English

Fifth Ave., New York 3. 1961. 608 p. \$50.00.
Proceedings of the Third International Congress on microwave tubes held in Munich in 1960. Published in English, French, German.
Radio-Electronic Transmission Fundamentals. By Benjamin W. Griffith, Jr. McGraw-Hill, 330 W. 42 St., New York 36. 1962. 612 p. \$7.75.

Textbook on electrical networks, transmission lines, radio antennas, and radio transmitters for radio operator, electronic technician, engineer.
Single-Sideband Communications Handbook. By Harry D. Hooton. Howard W. Sams, 2201 E. 46 St., Indianapolis 6, Ind. 1962. 285 n. \$6.95.

Well illustrated reference book, emphasis on basic principles and circuitry. Stereophonic Sound. By Norman H. Crowhurst. John F. Rider, 116 W. 14 St., New York 11. 136 n. \$2.90.
Second edition.
Transistor Circuit Manual. By Allan H. Lytel Howard W. Sams, 2201 E. 46 St.

Second edition.

Transistor Circuit Manual. By Allan H.
Lytel. Howard W. Sams, 2201 E. 46 St.,
Indianapolis 6, Ind. 1961. 255 p. \$4.95.

Diagrams and descriptive text.

Transistor Circuits. By Thomas M.
Adams, Howard W. Sams, 2201 E. 46 St.,
Indianapolis 6, Ind. 1962. 136 p. \$3.95.

One of a basic electronics series for use as textbook or as reference.

Transistor Engineering. By A. B. Phillips. Semiconductor Products Div., Motorola, Chicago, Ill. 1962. 370 p. \$12.50. censing—12/11/61, 1/8/62, 2/5/62, with vigorous objection—4/16/62; improvement of advertising content is approach of ANA-AAAA—8/7/61; WSAAA survey points up need—8/21/61; radio helps—9/25/61; AAAA finds much criticism stems from diculty in getting facts—10/18/61; improvement of public image is discussed by AAAA—10/23/61; AFA sees education as answer—10/23/61; AFA asees education as answer—10/23/61; AFA asees must help, WSAAA told—2/12/62; business must help, WSAAA told—2/12/62; some improvement has come—4/23/62, 4/30/62, 5/14/62; continuing research urged—4/30/62; AAAA adopts new creative code—4/30/62; Joint ANA-AAAA committee to inform public of advertising's role in economy—8/20/62
Agency-Broadcaster Relations
J. Walter Thompson Co. is top tv-radio agency for fourth successive year, BROADCASTING annual survey reveals—11/20/61
Traditional 15% commission called "kickback" by agency head, Howard Gossage—2/12/62; "inadequate" by RAB president, Kevin Sweeney—3/12/62
New guide for spot tv commercials prepared by AAAA and SRA—3/19/62
Automated time-buying calls for qualitative research—10/2/61, 11/20/61, will specially affect spot buying—11/6/61; BBDO inaugurates system after two years research—11/13/61
Automation comes to time-buying—10/2/61, 11/6/61; 11/13/61, 11/20/61; to campaign planning—4/23/62; and to media forecasting—5/28/62; could be boon for radio—6/25/62
Ad campaigns are pre-tested by eye movement studies—1/29/62, and in field—4/22/62

Ad campaigns are pre-tested by eye move-ment studies—1/29/62, and in field— 4/2/62

Radio, chided for over-commercialization and rate-cutting—7/10/61. and for lacking in glamour—7/10/61. feels time-buyers cold-shoulder radio salesmen—10/30/61, which some reps deny—11/6/61, but agencies find medium difficult to buy—11/13/61; RAB blueprint for simplified timebuying—2/28/62; over-population also concerns buyers—4/16/62
Tv is "almost mandatory medium" in some areas, Foote, Cone & Belding's Fairfax M. Cone tells magazine men—12/18/61
Interpublic Inc, predicts rate increases for

12/18/61
Interpublic Inc. predicts rate increases for both spot and network tv, but drop in c-p-m-3/5/62
NAB's Collins urges agencies to give business to code subscribers—4/16/62
Is program mood important to advertiser?, No, says Young & Rubicam—3/5/62; yes, retorts Schwerin Resaerch Corp.—3/12/62
Magazine concept of tv program com-

yes, retorts Schwerin Resaerch Corp.—3/12/62
Magazine concept of tv program commercials, urged by Mr. Cone, is endorsed by Rod Erickson, Filmways head 10/23/61, denounced by Paul Harner of Needham, Louis & Brorbv—2/19/62
Media buyers still specialists at most agencies, BROADCASTING survey reveals—8/13/62
Allocations
Presidential committee to determine overall allocations and circumvent military secrecy over frequencies withdrawn from other users asked by Sen. John O. Pastore (D-R.I.)—8/28/61
Changes in allocations for radio astronomy proposed by FCC—1/8/62
Television:
As it had been in previous years, the

my proposed by FCC--1/8/62

Television:

As it had been in previous years, the problem of releasing tv from the limitations of 12 vhf channels by getting greater use from the 72 uhf channels was a major headache for the FCC, the broadcasters and the set manufacturers, not to mention Congress and the viewing public. FCC tackles problem by proposing to eliminate vhf stations from eight intermixed markets and drop in new vhf stations in eight other markets -7/17/61, plus abolishing the uhf allocations table, authorizing dual vhf-uhf operation by same licensee in same city and eliminating comparative hearings for uhf channels-7/31/61

Move to stop vhf-uhf competition by making eight markets all-u-8/7/61, causes immediate outcry from stations to be be deleted and their congressmen-8/14/61, 8/21/61, 9/4/61, 9/11/61, 9/18/61, 9/25/61, 10/2/61, 10/16/61, and others -10/23/61, 11/13/61, 11/27/61, 12/11/61, 2/12/62

Assn. of Maximum Service Telecasters

 $\frac{-10/23}{2/12/62}$ 

Assn. of Maximum Service Telecasters asks FCC to extend deadline for comssn. of Maximum Service Telecasters asks FCC to extend deadline for comments on deintermixture—8/14/61; uhf station operators meeting—8/28/61, urges reconsideration—9/11/61; FCC extends deadline for comments for two months—9/4/61, giving breathing spell to all parties—9/11/61; comments pour in—9/25/61, 10/2/61; proposal for delay until New York test is complete—10/2/61, is called pointless by FCC Commr. Robert E. Lee—10/9/61; more time for comment allowed—11/6/61; Commr. Lee proposes unused uhf channels be reserved for non-broadcast use—11/13/61; bid for Northern California vhf drop-ins is denied—11/20/61; FCC explains deintermixture thinking—1/22/62; Committee for Competitive Tv and Triangle stations submit suggestions—2/12/62; argument goes on—2/19/62, 2/26/62; hearing held on bills to bar substitution of uhf for vhf channels—3/12/62; ABC asks for more drop-ins—5/21/62; FCC denies more time for reply comments—7/16/62; ABC-TV defends dropins, AMST opposes them—7/30/62
All-channel set legislation, seen an answer to vhf-uhf dilemma—is introduced—7/17/61, appears doomed—8/7/61, is opposed by set makers—12/4/61, 1/5/62; supported by networks—2/5/62; goes to hearing—2/12/62; legislative battle begins—2/19/62, 2/26/62, 3/5/62; suggestion that FCC drop deintermixture plans in exchange for all-channel set legislation—3/12/62; moratorium on deintermixture set as price of law—3/19/62; President supports bill as set makers continue opposition—3/19/62; Congressional battle goes on—4/16/62, 4/23/62; House passes bill—5/7/62, and. after committee hearings—5/14/62, 5/21/62, so does Senate—6/18/62; differences resolved—7/2/62, it is signed by President—7/16/62

dent—7/15/62
'ull effect on sets at least a year off,

Federal Communications Commission
Congress grants FCC operating budget of
\$12,525,000 for fiscal 1962—8/14/61: FCC
asks for \$13.1 million for fiscal 1963—
electronic brain to speed application
1/22/62; seeks extra \$1.5 million for
processing—5/14/62: House votes \$14.4
million for FCC—8/6/62; Senate may restore \$262,000 cut out by House—8/27/
62
Legislation \*\*\*

million for FCC—6/6/62; senate may restore \$262,000 cut out by House—8/27/62
Legislation to reorganize FCC for more efficient operation, with individual commissioners or employes assuming adjudicatory functions, leaving commissioners more time for policy matters, is introduced—7/3/61, discussed—7/24/61, passes Senate—7/31/61, and House—8/7/61; differences reconciled—8/21/61, measure goes to President—8/28/61
FCC considers how to carry out Congressional authorization—9/25/61, orders management study made—10/30/61; Booz, Allen & Hamilton recommendations—1/1/62, are questioned—1/15/62, discussed—2/5/62, criticized—2/26/62, explained—3/12/62, challenged—4/30/62, and turned over to FCC staff for evaluation—5/7/62, 5/14/62
FCC Review Board created, Donald J. Berkemeyer named chairman—5/28/62; operation rules adopted—6/11/62; takes first actions—8/6/62; Congressional pressures foreseen—8/20/62
FCC ennunciates policy of matching promises made in application for licenses with performance following grants in pilot case in which a one-year renewal is granted to KORD Pasco, Wash.—7/17/61; closer look at renewal applications leads to more short-term licenses—12/4/61, 6/25/62; listeners wishing to protest renewals must do so within 30 days after application made or hearing set—8/21/61
Are the economics of broadcasting any of the FCC's business? Question arises

days after application made or hearing set—8/21/61
Are the economics of broadcasting any of the FCC's business? Question arises anew over application for two new am stations in Riverton, Wyo.—5/14/62; FCC sets hearing on economic issue raised by present station, KVOW, then reconsiders, but first decision gets printed by mistake—5/21/62, 5/28/62; hearing will be called on financial qualifications of new applicants—7/2/62, 7/23/62, as applicant charges FCC overstepped itself—8/27/62
Economics also affects tv. WTTV (TV)
Bloomington, Ind., asks to be moved to Indianapolis because Bloomington area is economically unable to support a tv station—10/28/61; FCC approves move, but calls for comments—12/11/61, getting protests from WLWI (TV) and WFBM-TV Indianapolis—1/22/62, support for move from ABC-TV—2/19-62, and rebuttal of objections from WTTV—3/12/62
Full FCC hears six applicants competing for Tampe ch 10, 2/17/61

-3/12/62
Full FCC hears six applicants competing for Tampa ch 10—7/17/61, makes grant to WTSP-TV Inc.—1/22/62; losers ask reconsideration—2/26/62, with backing of FCC Broadcast Bureau—3/19/62; record to be reopened—7/23/62
Constitutional right of FCC to consider programming in making a grant is challenged by Suburban Broadcasters, unsuccessful applicant for fm station in Elizabeth, N. J.—8/14/61; appeals court hears argument—1/22/62; backs FCC—4/2/62 1/2/62

4/2/62
Other tv grants were questioned:
Indianapolis ch 13, awarded to Crosley
Broadcasting Co. in 1957 (WLWI (TV)),
will be given to WIBC Indianapolis by
new FCC decision—11/6/61; Crosley
fights—11/13/61, 11/27/61, 1/22/62, 6/4/
62, proposes sale of WLWA (TV) At-

lanta instead—6/18/62; Broadcast Bureau objects to this—7/2/62, 7/9/62, 7/16/62, 7/23/62; sale price of \$3.36 million is fair, FCC told—7/30/62; deal gets tentative approval—9/10/62

Moline, Ill., ch 8—Losing applicants ask for re-argument—7/24/61; Moline Tv Corp., to whom station was granted, opposes request—8/7/61

Perrine-S. Miami ch 6: Broadcast Bureau asks for case to be reopened—10/16/61; South Florida Amusement Co., grantee, objects—10/30/61; FCC orders new hearing—1/8/62; president must answer charges of attempting to mislead FCC—7/23/62

Should antitrust violation convictions of

charges of attempting to mislead FCC—7/23/62
Should antitrust violation convictions of parent companies of their officials deprive broadcasting subsidiaries of their licenses, despite history of good operations? FCC is faced with this question in connection with stations owned by General Electric and Westinghouse—9/25/61, 10/23/61, finds decision difficul—10/30/61; licensees given chance to explain—11/6/61, they do so—12/18/61, 2/12/62; Westinghouse licenses are renewed—3/5/62
In unprecedented crusade, FCC revokes several licenses, for failure to live up to rules, Cases include:
KRLA Pasadena, Calif.: Recommendation of hearing examiner for one-year renewal (See 1961-62 Yearbook for earlier references) is opposed by FCC Broadcast Bureau—7/30/61; FCC hears argument—1/22/62; station asks for examination of its recent activities—3/12/62; FCC revokes license—3/19/62; KLRA asks for stay—3/26/62; gets stay—4/23/62; Broadcast Bureau urges it stand—514/62; FCC reaffirms death penalty—7/23/62; KRLA asks for stay—8/6/62, gets it—8/13/62, asks court of appeals to reverse FCC decision—8/27/62

WIOS Tawas City, Mich.: License is re-

appeals to reverse FCC decision—8/27/
8/20 Tawas City, Mich.: License is revoked—12/25/61
KLFT Golden Meadow, La.: Owner is charged with misrepresenting facts and ignoring rules—7/24/61; examiner recommends revocation—8/21/61; request for new chance—2/12/62, is denied—3/19/62; others apply for frequency—4/23/62, 6/18/62, 8/6/62
Hearings were also held on license renewal applications of a number of other stations, including:
WGMA Hollywood, Fla.: Daniel Enright, co-owner of WGMA, is queried about his part in quiz scandals of two years ago—11/20/61; "reliability and candor" of licensee is emphasized—1/22/62; quiz fixes reviewed at hearing—7/23/62, 7/30/61, 8/6/62
WMOZ Mobile, Ala.: Is charged with faisifying logs, hiding income—12/11/61
KBOM Bismarck-Manden, S.D.: Reluctant witnesses impede hearing progress—7/24/61; KBOM asks for reprimand, not not loss of license—11/13/61, but examiner, charging deliberate efforts to deceive FCC, recommends revocation—4/9/62; licensee offers to accept loss of license if FCC grants new one to new company formed by former employes of KBOM—6/18/62
Gila Broadcasting Co.: Hearing examiner recommends revocation of GBC's five stations, all in Arizona, for major technical violations—2/26/62; new applicant asks for rapid approval of bid to take over all Gila properties—8/20/62
WITT Lewisburg, Pa.: Hearing is moved from Washington, D.C., to Lewisburg—7/24/61, but not postponed—7/31/61; citizens show apathy—8/7/61; FCC Broadcast Bureau says licensee unqualified for station operation—10/16/61; examiner recommends one-year renewal—11/162
KWK St. Louis, Mo.: (see 1961-62 Year-book for earlier references) Hearing set

kWK St. Louis, Mo.: (see 1961-62 Yearbook for earlier references) Hearing set for St. Louis—7/17/61, gets under way, with fraudulent contests charged—9/11/61: sales manager admits earlier lies—9/25/61; station asks for directed verdict of not guilty—11/13/61; Broadcast Bureau objects—11/27/61; KWK presents character witnesses in its defense—1/22/62, fails to get asked-for dismissal—1/29/62, argues with Broadcast Bureau over proper punishment—4/2/62, 4/16/62
WDKD Kingstree, S.C.; (See 1961-62 Yearbook for earlier references) Broadcast Bureau charges licensee with lying in June hearings—8/14/61; examiner reluctantly recommends that license be forfeited—12/18/61; Broadcast Bureau objects to examiner's reluctance—1/8/62, says he was too soft—3/12/62; station's KWK St. Louis, Mo.: (see 1961-62 Year-

says he was too soft-3/12/62; station's

excellent over-all performance should be balanced against off-color disc jockey, FCC is told—6/11/62, as public urges renewal for station—6/18/62; renewal denied—7/30/62; action protested—7/30/61 (action protested—7/30/62) action protested—7/30/62 (action protested—7/30/61) million called off because of alleged payout proteices—7/4/61, which station denies—8/14/61; gets renewal week after sale to Storer Broadcasting Co. for \$10 million—10/23/61. Westinghouse buys WINS for \$10 million—5/7/62; FCC approves—7/16/62
WLM(FM) Chicago asked to explain why license should not be revoked—7/30/62 Other stations draw fines, under new authority granted by Congress for the station lowses; in lieu of revoking Lieu lowses; in lieu of revoking Lieu lowses; in lieu lows

with reprimand—7/23/62 FCC proposes to set strict limits on over-lap between stations licensed to same owner—7/16/62, 7/23/62; more time for comments asked—7/30/62, is granted—

8/6/62 Stations are warned about broadcasting foreign propaganda without identifying source—8/6/62

Stations are warned about broadcasting foreign propaganda without identifying source—8/6/62

Frequency Modulation

FM, with ever-increasing number of stations, went heavily into stereophonic broadcasting, sought to attract more attention from advertisers, got more from FCC in last year. Complete overhaul of fm band proposed by FCC—7/3/61; NAB names committee to study engineering problems—8/14/61; Canada helps by updating its fm allocations table—8/14/61; time asked—8/21/61; FCC plan could end fm's growth, WHFS (FM) Bethesda, Md., warns—9/11/61, but FCC Comr. Lee predicts bright future—10/23/61; comments reveal mixed reaction to FCC plan—11/13/61, 11/20/61; FCC imposes partial freeze on fm grants—12/11/61; modifies policy—2/9/62; rep firm suggests two classes of fm stations, serving metropolitan and smallcity areas—7/9/62

FCC revises fm rules—7/30/62, hopes to finalize new table this fall—8/6/62; NAB asks more time for comments—8/13/62; more time granted—8/20/62

Stereophonic broadcasting, seen as a new way of catching public interest and increasing audience for fm, is planned by nearly half of nation's fm broadcasters, an NAB survey reveals—7/24/61; stereo manufacturers must support stereo stations—9/18/61, but they aren't doing enough, broadcasters feel—9/18/61; stereo manufacturers must support stereo stations—9/18/61, but they aren't doing enough, broadcasters feel—9/18/61; FCC denies petitions for am stereo—10/2/61; NAB to verify recording standards—11/20/61; refuses to soften rules for stereo—2/12/62; fm broadcasters disagree whether stereo will bring the long awaited breakthrough—4/9/62; 300 stereo stations by performance" scrutiny—8/6/62

Needham, Louis & Brorby survey shows research needed to get more advertiser interest for fm—12/25/61; Young & Rubicam report more than 10 million homes listen at least once a week—4/30/62; Pulse and Media Programmers both provide new statistics—6/4/62; Pulse study shows two-thirds of fm homes listen to fm during average week—6/11/62. Signed by President—10/16/61; FCC a

Geneva International Telecommunications convention of 1959 is ratified by Senate —10/2/61, signed by President—10/16/61; FCC amends rules accordingly—10/30/61

Eadio Overpopulation

Are there too many radio stations and if so, what should be done about it are questions that plague FCC and NAB. Congressional study is proposed by Commr. Frederick Ford—1/23/61; FCC seeks more information on both engineering and economic aspects—11/20/61, questions license transfers of moneylosing stations—11/27/61, notes that there are 3,700 am and nearly 1,000 fm stations on air and applications for more pour in—2/19/62, considers economic inquiry—3/19/62, invites NAB to join in study—4/9/62, imposes partial freeze on am applications—5/14/62, with prompt reactions—5/21/62, and protests—5/28/62; committees of FCC and NAB meet—6/11/62; court refuses to order FCC to accept application for an am litense—6/18/62; NAB to safeguard broadcasters' rights—7/2/62

Space Communications

Development of communications satellites for intercontinental exchange of tv programs, among other services, was a major project of the past year. President Kennedy orders top-level study—7/3/61; National Aeronautics & Space Administration, with \$94.6 million to spend on project—7/24/61; expresses faith in balloons as passive reflectors—7/10/61, but authorizes AT&T active satellite experiment—7/31/61, after two more sky-scanning satellites had been put into orbit—7/17/61; transoceanic shortwave tv transmission is demonstrated, but feasibility doubted—8/14/61; General Electric withdraws application to have its Communication Satellite Inc. classified as common carrier—10/2/61; program relay from tv satellite directly to home receivers called technically feasible—11/13/61, but problems noted—5/14/62, while FCC Commr. T. A. M. Craven looks for much of global tv broadcasting to be taped and jetted to each nation's stations for use at most appropriate time—12/4/61; AT&T reports Telstar (active communications satellite) will be ready for test in spring—1/8/62; operation described—1/29/62, 2/12/62, 4/9/62, 5/7/62; launching date announced—6/25/62; AT&T to sponsor new

announced—6/25/62; AT&T to sponsor newscasts of Telstar debut—7/2/62, which is successfully achieved—7/16/62, 7/23/62
While engineers were preparing to put active space satellites into operation (see above). Congress wrangled over jurisdiction—7/17/61, 7/24/61, criticizes FCC proposal for ad hoc committee of international common carriers—7/31/61, and dislikes President's proposal for private ownership of space communications facilities—7/31/61, 8/7/61; Sen. Vance Hartke (D-Ind.) proposes special commission to study problem—8/14/61; Senate communications subcommittee sets hearings—8/21/61; proposal that decision be deferred until system proved workable is made to President—8/28/61, and rejected—9/11/61; Sen. Warren G. Magnuson (D-Wash.) urges super agency—10/16/61; Rep. Emanuel Cellar (D-N.Y.) fears FCC plan would let AT&T dominate space communications—10/23/61; Sen. Russell B. Long (D-La.) suggests broadcaster participation—11/13/61; bill for private ownership of system drafted by Sen. Robert S. Kerr (D-Okla.)—12/4/61, but Rep. William L. Springer (R-Ill.) promises opposition—12/11/61; President tells Congress he will propose legislation—1/15/62; N.Y. congressmen split on private vs. public ownership—1/29/62; President proposes public corporation—2/12/62; FCC opposes President's plan—2/26/62, 3/5/62; Dept. of Justice is concerned—2/26/62; more opposition voiced—3/12/62; TCC opposes President's plan—2/26/62; RCC defect more opposition voiced—3/12/62; Branstatesy to force government ownership and Dept. of Justice warns against AT&T domination—4/9/62; RCA Chairman David Sarnoff advocates letting overseas carriers compete with AT&T—4/16/62, huse passes measure—5/762; approves administration proposal—6/28/62, 8/16/25; liberals fight back—7/30/62, 8/6-6/25/62; liberals fight back—7/30/62, 8/6-6/25/62; liberals fight back—6/26/62, 8/15/62, billerals fight back—6/26/62, 8/15/62, liberals fight back—6/26/62, 8/15/62, liberals fight back—6/26/62, 8/15/62, liberals fight back—6/26/62, 8/15/62, liberals fight back—6/26/62,

essential to satellite success, Vice President Johnson states—3/19/62
U.S. Information Agency fears it can't afford to use satellite—4/30/62
Satellite could be used inside U.S. as well as across oceans, FCC Chairman Minow notes-5/28/62

Broadcast rights add \$12 million to football revenue—8/28/61, of which National Football League teams get \$2.8 million—9/4/61, and \$20 million to baseball income—3/5/62, as advertisers spend over \$100 million to sponsor games on radio

polit revenue—8/28/61, of which National
—9/4/61, and \$20 million to baseball income—3/5/62, as advertisers spend over
\$100 million to sponsor games on radio
and tv.
But sports can bring problems as well as
profits, as CBS-TV finds out when its
package plan contract with NFL is held
illegal—7/24/61, and Dept. of Justice
starts probe—7/31/61; other networks
ponder situation, as bills to exempt professional football from antitrust laws
are introduced—8/14/61, 8/21/61, and
approved by Senate antitrust subcommittee—8/28/61, but opposed by Dept. of
Justice—9/4/61; House antitrust subcommittee approves measure—9/11/61,
as does House judiciary committee
9/18/61; Cellar bill permitting professional football, baseball, basketball and
hockey leagues to make package broadcast deals passes House and Senate—
9/25/61, opening way for new CBS-TV
deal with NFL in 1982—10/9/61, which
is negotiated—1/15/62; meanwhile, court
sets aside original order (after new bill
signed into law by President)—11/6/61;
CBS-TV also gets NCAA collegiate football games rights for 1962—2/19/62
Senate rackets investigators charge FCC
with laxity in horse-race broadcast
policy—9/11/61

# THE BUSY RED PHONE AT TTC!

All TTC stations base their operations on deep, penetrating news coverage . . . especially on the local level. Now 54 men and women in the 7 TTC newsrooms are united into a team by this new TTC red-phone hookup. With stations on each coast and in Mid-America, TTC newsrooms will get first hand reports -- first -- from any area.

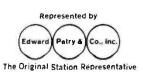

• The point of all this is not just to trumpet about what

big operators we are in news. The point is that a large part of the selling force of TTC stations is generated by this news policy... and we can prove it. • TTC stations will continue to concentrate on substance in programming, because we believe real substance is the only quality that will continue to support broadcast sales long after the fads have faded out.

MORE than the dominant television station in the Minneapolis-Saint Paul Market: Actually the medium to buy FIRST OF ALL! For complete proof write WCCO-Television or national representatives. Peters. Griffin, Woodward, Inc.

The nation's fourteenth market, Minneapolis-St. Paul, is the home of four good commercial television stations, but one is a blue chip above the rest. Nielsen proves it! For a comparative analysis of the 1961 Nielsen Coverage Study, write Research Department, WCCO TELEVISION, or Peters, Griffin, Woodward,Inc.

THE DIFFERENCE BETWEEN GOOD AND GREAT IN MINNEAPOLIS • ST. PAUL

# WGR-TV

# reaches more homes than the 7th U.S. Market

WGR-TV's Power reaches a combined total of 1,603,500 TV Homes.

WGR-TV's Powerful Signal reaches 747,500\* television homes in a U.S. market where the buying income is over five and a half billion dollars.

WGR-TV's Powerful Signal reaches 856,000† television homes in a Canadian market where the buying income is nearly six billion dollars.

The combined population and purchasing power is more than the seventh largest market in the U.S. You cannot afford to overlook these two great markets and the one station that reaches them both best. WGR-TV.

# The Mark of COLOR Leadership

of all critical control circuits. These features assure precise registration of colors and unmarched resolving power. The result is living color performance.

The Most Trusted Name in Television

# Get set for '63 THE BIG YEAR FOR COLOR Specify RCA IMAGE ORTHICONS for your cameras.

Be ready for the heavy color telecasting schedules coming up by installing RCA-4415's and RCA-4416's now. These RCA Image Orthicons in matched sets of three—two RCA-4415's for red and green channels and one RCA-4416 for the blue—are highly recommended for color cameras utilizing simultaneous pickup. At ordinary black and white lighting levels, these tubes produce excellent pictures in color receivers as well as high-resolution pictures with normal tone rendition in black and white receivers. Precision construction, field-mesh, plus closely matched characteristics assure uniform color in both highlights and in the background over the entire scanned area.

Because they operate under normal black-and-white studio lighting conditions, you will not have the problems of high scene-lighting temperatures, the need for extra air conditioning and many of the other lighting costs formerly associated with indoor color pickup.

RCA-4415 and RCA-4416 are but two of RCA's broad family of Image Orthicons. For fast delivery on these and others in the line, see your authorized RCA Distributor of Broadcast Tubes.

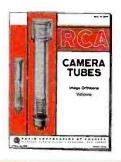

#### RCA's Family of Color Image Orthicons Includes:

RCA-4401: Supplied in sets of three tubes having matched characteristics and providing very high sensitivity in low light-level studio and outdoor pickup.

RCA-7513: For highest-quality color TV where conventional color lighting is available and can be controlled. This type is also available in matched sets as RCA-7513V1.

This attractive brochure, containing pertinent information on the RCA line of Camera Tubes, is available through your local distributor. Ask for: RCA Camera Tubes—(1CE-262).
