There's plenty new that belongs to us.  
A new color camera that's top of technology.  
Another new camera that's a top-of-the-line economy model.  
A new Broadcast Automation Control System.  
A new Program Switching System that's the first switching breakthrough since solid-state.  
But don't take our word for it.  
Call our nearest sales office and plan a trip to the GE Telecenter in Syracuse.  
You'll see reason aplenty to station yourself with the leader.

# He phoned 800/325-3535 from Chicago and guess what they got in Aruba.

They got the use of a private beach. They got to play tennis and golf. And best of all, they got to use the new skin-diving outfits they gave each other for their fifth wedding anniversary.

By calling 800/325-3535, our anxious friend and his wife got to the Aruba Sheraton Hotel and Casino in the Netherlands Antilles for a week.

#### **Free call from any telephone**

You can call this number too—free, within the continental U.S., 24 hours a day, 7 days a week—and get a Sheraton reservation anywhere in the world.

There has always been a need for this unique service. And it will soon be needed even more because Sheraton has initiated a global five-year expansion program, costing hundreds of millions of dollars.

As changing times brought changing needs, Sheraton became better able to meet them by joining with us.

#### **New areas of opportunity**

Our financial resources and 50 years of international experience made it possible for Sheraton to move quickly into new areas of opportunity—in international gate-

way cities like Buenos Aires and Munich, in growing "convention" cities like San Diego, in locations near airports and heavily traveled highways.

Our central management group offers Sheraton (and all other operating units) thousands of man-years of experience in areas ranging from planning to public relations. This group has been called "the major contribution" brought to companies who join us.

#### **Some other examples**

Each of our 200 companies is in an industry with good growth potential.

Avis, for example, has almost quadrupled its number of cars and trucks since joining us in 1965. (At the same time, the industry has enjoyed an equally spectacular growth.)

Levitt has expanded its home-building activities to apartment construction. Levitt is also to develop a 20,000 acre tract on Florida's east coast. Eventually, as many as 100,000 acres may be developed, resulting in a city of 750,000 people.

#### **ITT and you**

Businesses like ours must keep growing, for only through growth can we continue to help people like you enjoy a better life. And get you headed for a beach in Aruba with a free telephone call.

International Telephone and Telegraph Corporation, 320 Park Avenue, New York, N.Y. 10022.

## Our policy.

Senators, congressmen, governors, state legislators, mayors, city councilmen, school superintendents, ministers, businessmen, labor officials, minority spokesmen and other civic leaders are entitled to *evening* prime time to say what must be said.

Discerning viewers, who welcome intelligent controversy, are equally deserving of convenient hours to view informative programs of their choice.

That's why Kaiser stations schedule public affairs programs every week in *evening* hours, and that's why Kaiser stations serving Boston, Cleveland, Detroit and Philadelphia have pioneered major nightly news programs on independent UHF's.

**CATV & Station Coverage ATLAS**  
with 35-Mile Zone Maps

In the olden days "all roads led to Rome." Rome had it all . . . a 1-Stop Service.

History may be repeating itself . . . at least as far as the Communications Industry is concerned.

Today, all roads lead to **Television Digest, Inc.** . . . the Industry's only 1-Stop Service.

Need facts? **Television Factbook** has it all . . . and it's wrapped-up in two big volumes.

Keeping current? Each week, **Television Digest** with **Consumer Electronics** keeps tabs on the entire industry.

CATV your bag? The **CATV and Station Coverage Atlas** is the only wheel in town.

Pin-pointing? Select all or any one of three weekly **Addenda Services** . . . TV, AM-FM, CATV.

Why shop around when it's all here?

# Color, Multi-Set and UHF Penetration by U.S. Markets

Based on ARB Nationwide Sampling Sweep

February/March 1969

Following are American Research Bureau estimates of the number of TV Households with Color Television Sets and Multi-Set Households for all markets surveyed during ARB's February/March 1970 Nationwide Sampling Sweep. UHF Households estimates are also shown for this same survey period for markets where UHF penetration is reported by ARB. Estimates appearing in this report were derived from telephone placement calls to families selected for participation in ARB diary surveys of basic viewing information.<sup>1</sup>

Color TV and Multi-Set Households estimates are based on each market's Area of Dominant Influence.<sup>2</sup> The Area of Dominant Influence (ADI) is a geographic market design which defines each market exclusive of another based on measurable viewing patterns. Each market's ADI consists of all counties in which home market stations receive a preponderance of viewing. Using ARB's Television Coverage/65, a nationwide all-county study of television viewing in the United States, each county in the U.S. (excluding Alaska) was assigned to that one market in which the combined stations accounted for a greater "Share of Viewing Hours" than the combined stations in any other market. These areas have been revised annually from later estimates obtained during subsequent ARB Nationwide Sampling Surveys. (A complete listing of the counties which comprise these exclusive market areas appears in each respective ARB market report and an ARB publication "Exclusive Television Market Areas of Dominant Influence in the United States." Copies of the latter publication are available on request.) Since each area is geographically exclusive of another, the total of all ADI Color and Multi-Set Households represents the total estimate for the United States.<sup>3</sup>

When reported, UHF Households estimates are shown for both ADI and Metro Rating Areas, as defined in each ARB Local Market

Report. The Metro Rating Area generally corresponds to Standard Metropolitan Statistical Areas as defined by the Bureau of the Budget, subject to exceptions dictated by historical industry usage and other marketing considerations such as channel allocations.

In addition to estimated total Color TV Households, Multi-Set Households and UHF Households, the percentage which each of these estimates represents of total TV Households within each of the defined areas is also shown. Total TV Households in each market's ADI are reported for ease in evaluating penetration estimates. Further information on ARB sampling methodology and area definitions is available in the market report from which this information was extracted or from the American Research Bureau.

<sup>1</sup> In those markets where UHF controls are exercised, the reported UHF estimates are based on diary placement calls. In markets where UHF is reported but no controls are exercised, the reported estimates are based on in-tab sample. UHF estimates based on in-tab sample are indicated with an asterisk (\*).

<sup>2</sup> Users of this report should note that ARB updates Total Survey Areas and ADI's at the beginning of each broadcast year; also, Metro Rating Areas are subject to annual revision. The user should be aware of potential re-definitions when making comparisons with estimates from previous surveys. Please refer to the appropriate ARB Market Report for information regarding survey areas, sample sizes, methodology, etc.

<sup>3</sup> Color TV and Multi-Set Households estimates are also shown for a number of markets which, according to ARB surveys, have no Area of Dominant Influence of county size or greater. These estimates are based upon the Total Survey Area of the market (an area including approximately 98% of the net weekly circulation of home market stations) and, therefore, are not directly comparable to the ADI estimates listed for other markets. Because these are not additive with other market listings arriving at total U.S. estimates, information for these markets is listed separately.

\* Indicates UHF estimates based on in-tab sample. Refer to footnote one on first page.

The following estimates are provided for those television markets which, according to ARB findings, have no geographic Area of Dominant Influence of county size or greater. They are based upon the Total Survey Area of the Market (which includes approximately 98% of the Net Weekly Circulation of home market stations) and, therefore, are not directly comparable to the ADI estimates listed previously. Because the Survey Areas of the Markets reported below are composed of counties which are part of other markets' ADI's these estimates are not additive. (It should also be noted that other television market areas exist within the previously listed Areas of Dominant Influence for which no separate estimates are developed.)

The Innovators Introduce:

# “Son of PC-70”

The Norelco PC-70S-2

Now Philips Broadcast re-invents  
the PC-70 color camera to set a  
new broadcast standard  
for color control and  
color fidelity

Over 1,000 3-Plumbicon\* cameras have been delivered throughout the world, with more than 600 serving broadcasters and production companies in the United States. It is the standard other cameras try to match.

That was tough before. Now it's tougher. Because today the Innovators are introducing the PC-70S-2, with an important list of new features. (And to prove you are always state-of-the-art with Norelco, they're available as field update kits for older PC-70 models.)

**Sharpest picture yet.** Our key innovation is the sharpest picture detail you have seen from a broadcast camera. A new technique introduces the most basic attack yet on picture-degrading "noise" . . . level-dependent comb-filtered contour enhancement.

**Sharp in wider light range.** In low-light situations, too, the PC-70S-2 gives you a quieter picture. We've added 48-db signal-to-noise FET preamps. And at all light levels, separate-mesh Plumbicon\* tubes increase picture resolution and dynamic range. It all adds up to a snappier picture in every area from light to dark.

**More color control, convenience.** Now the PC-70S-2 is also available with non-linear matrixing to achieve an infinite range of tints and hues. You can color-match to any camera you own. Even those problem colors in packages and costumes snap into true-to-life color. But superb picture quality isn't the whole story. There are many convenience features to make your cameraman more expert, more productive.

For instance, a built-in test signal generator that takes the guesswork out of set-up. An external filter wheel control at the cameraman's fingertips. The PC-70S-2 ranges far and free from the camera control unit . . . up to 3,000 feet with standard cable, or 1,000 feet with mini-cable.

**And with over 1,000 cameras delivered,** you are assured of broadcaster-proved dependability. You know a Norelco camera will deliver performance, not headaches. You know Norelco delivers service . . . and updates to keep you abreast of innovations.

Ask us about details and prices now.

# The station break

# The automatic station break

**A bunch of VTR's.  
Film chain. People.  
Flying fingers. A late  
cue. A noisy picture.  
A cut-off ending. Pic  
but no sound. Panic.  
Go to black. The  
Station Break, complete with make-good.**

**Or. RCA's Television Cartridge Recorder. One man. One button. And one perfect Automatic Station Break after another.**

**So the people and equipment you've been tying up are free—for more rehearsal time, for new production time, for wherever you need them.**

**And you get consistently good pictures.**

**RCA's TCR handles 22, 3-minute cartridges. You can set its programmer**

**to run nine sequences of eight events each. Could be nine station breaks. Could be the night shift.**

**The TCR works off the electronics of our**

**TR-60 or TR-70 reel to reel recorders. The TR-70 and TCR can cue each other, or devices like your film chains. And later, you can add modular electronics that let the TCR stand alone.**

**You can automate your station breaks. Now. You can get the nucleus of a full automatic programming system. Now. Your job has its problems. Our job is finding solutions. Automatically.**

# NAIL THE FACTS

Facts. That's our only business. Facts make **Television Factbook** the most comprehensive reference work in the industry. Facts make the **CATV & Station Coverage Atlas** graphically exact. Updated facts keep our three **Addenda Services** current. As for our **Weekly Television Digest** with **Consumer Electronics**, nailing elusive facts is the name of the game. Buy them all and keep up with the facts.

### CBS TELEVISION NETWORK RATES

(Consult Network for Discounts, Specifications, etc.)

The CBS Television Network, as a national advertising medium, solicits those orders which will provide the largest nationwide circulation, the best program quality most suitable for a given time period, and which will leave no substantial portion of the nation without network service. While no minimum line-up of stations is required, the CBS Television Network in determining whether to accept a particular order, will consider the foregoing objectives. In the case of a program involving more than one advertiser, such consideration will include the stations otherwise ordered for and carrying the program.

Effective June 1, 1970

(Consult Network for Discounts, Specifications, etc.)

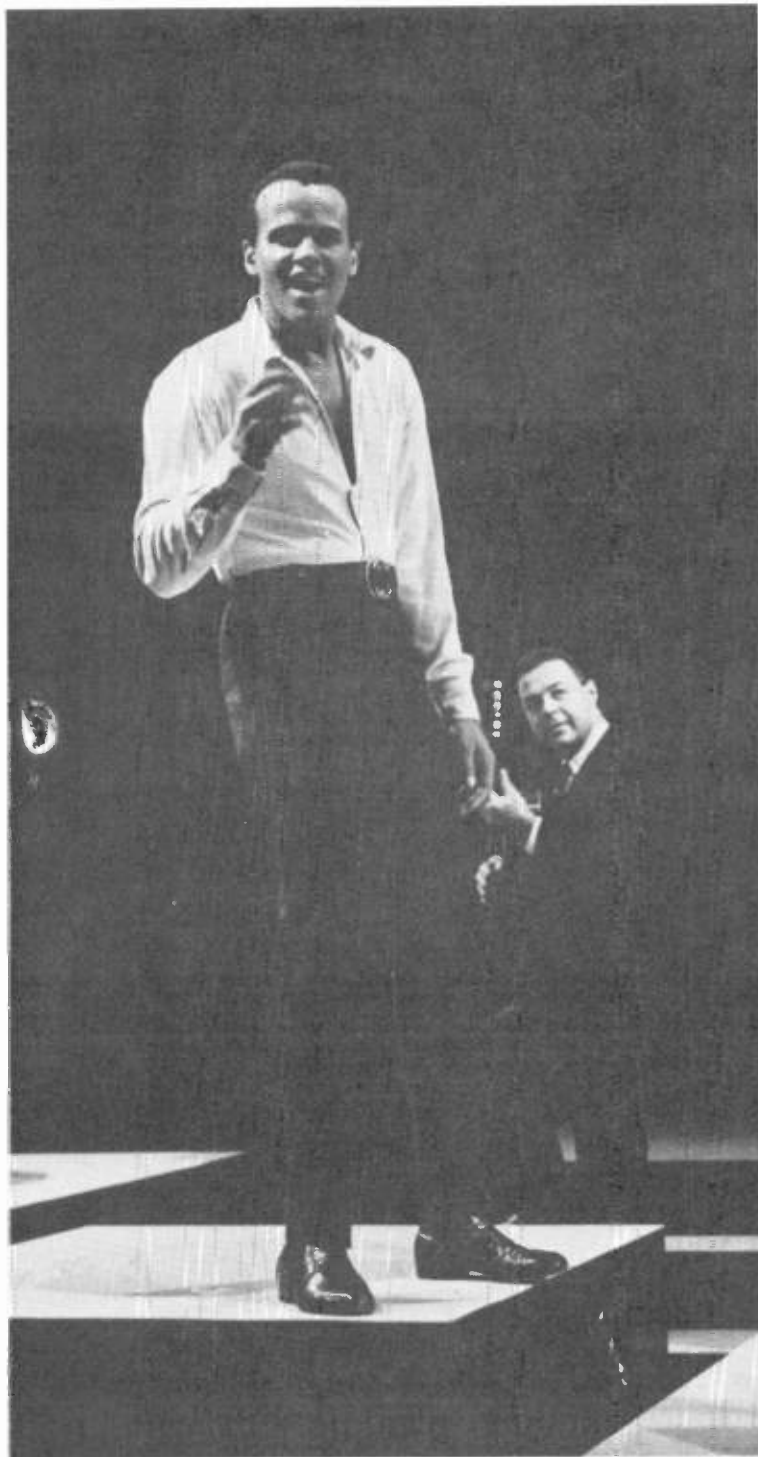

In order to serve the public interest in having NBC television programs available on a national basis and to maintain the network function as an effective national advertising medium, orders for NBC-TV Network facilities are subject to acceptability of the station line-up ordered.

In connection with administering orders for participating or multi-sponsored programs, NBC may designate for each such program individually the basis of station order acceptability.

**YOU CAN JUST  
CALL IT A "SPECIAL"  
OR YOU CAN REALLY  
MAKE IT SPECIAL.**

Which is what NBC did in '69-'70—and will do again in '70-'71.

'69-'70's "star specials" showcased very special stars, indeed. Herb Alpert, Julie Andrews, Harry Belafonte, Jack Benny, Carol Burnett, Johnny Carson, Perry Como, Bill Cosby, Bing Crosby, Bob Hope, Lena Horne, Gene Kelly, Debbie Reynolds, Rowan and Martin and the Smothers Brothers. To drop a few names.

The drama specials ranged from the contemporary to the classic. These were brought alive by players like Judith Anderson, Lee J. Cobb, Robert Culp, Melvyn Douglas, Van Heflin, Laurence Olivier, Cyril Ritchard, George C. Scott, Maureen Stapleton and Peter Ustinov.

And the spectacles have been truly spectacular: The Miss America Pageant, the Tournament of Roses, the Orange Bowl Parade,

Macy's Thanksgiving Day Parade, the Ice Capades, the Ice Follies with skating star Peggy Fleming, and the Ringling Bros. and Barnum & Bailey Circus.

In short, there are Specials and then there are *Specials*. What we'd like you to bear in mind is this: If it's *really* special, you'll find that it's on NBC, The Full Color Network.

**Corporate structure:** The Canadian Broadcasting Corp. is a publicly-owned corporation chartered by Parliament with carrying on a national broadcasting service in Canada. It is directly responsible to Parliament and is financed by an annual Parliamentary appropriation, supplemented by revenue from advertising.

The CBC operates six main domestic services: an English television network, a French television network, an English AM radio network, a French AM radio network, an FM radio service in some major cities, and a special radio service to northern communities, through standard band stations and shortwave. The CBC International Service operates a multilingual shortwave and transcription service to foreign countries.

Radio and television outlets for CBC service total 649. Of these, 295 are TV stations (VHF) and their satellites, including 189 which are privately-owned and 106 owned and operated by the CBC. Radio transmitters total 354, including 44 stations and 214 low power relay transmitters of the CBC, plus 96 privately-owned stations. This is a unique feature of the Canadian system, that many privately-owned radio and television stations are affiliated with the publicly-owned body and assist in distributing the national program service.

CBC English and French television networks together cover 96.9 percent of the total Canadian population. CBC English and French radio networks together cover 98.7 percent of the population.

# **When audience estimates will help TOMORROW, Call for ARB Overnights TODAY!**

Need fast estimates on late night or early morning programs?

## **ARB Recall Surveys**

Late night talk shows or new movies entering the competitive picture need immediate estimates on which to weigh the program power.

A coincidental survey at midnight is impractical, but a recall survey the next morning can provide needed information on a first night's program. Valuable trend indications can be obtained, too, by a series of recall surveys over a period of days or weeks.

ARB Recall Surveys are fast. Ratings and share estimates will be called to you the next working day after the survey.

For immediate insight in planning your late night and early morning time periods, ask for an ARB Recall Survey.

**ALL  
MUSIC  
SHOULD  
BE  
FREE**

# If it can't be free of charge it might at least be free of discord.

Once, the people who created music could barter it for things they needed, but couldn't produce. But gone are the days when they had to sing for their supper. Music is here in the market place like the rest of us. And, like the rest of us, it has to survive.

Most music people care about music first and money second. Not so long ago, many of them were either exploited or ignored. Then BMI came along to do the business thinking for people who'd rather use their heads for their art. BMI is a non-profit service. Pure and simple. For the people who make music, and the people who use it.

BMI wants to see that no music writers or publishers are denied what is rightfully theirs and to make sure they get paid a fair price for their work. Free from any kind of discord. That's free music.

Broadcast Information Bureau's job is to make station buying of film foolproof, with "\$"-ratings (of motion picture film) and APQ-ratings of made-for-TV film. Three source books do the job:-

"TV FEATURE FILM SOURCE BOOK"

"Series, Serials and Packages"

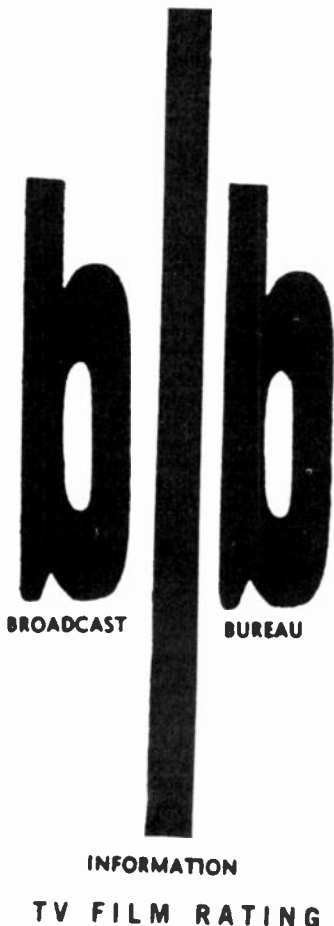

THE MADE-FOR-TV FILM SOURCE BOOK

"FREE FILM" SOURCE BOOK

The public relations - public service film Source Book.

There's a reason why they're on the desks of 80% of the world's TV film buyers.

You may not be able to save millions as networks have, but you will save thousands.

# Television Translator Stations

As of March 5, 1970

## Vhf and Uhf Channels

Dagger (†) preceding a listing indicates station(s) are licensed. Asterisk (\*) preceding a listing indicates construction permit(s). Absence of symbols indicates application only. When a community has a translator licensed and another with a construction permit only, these symbols precede call letters.

Transmitter power output (TPO) is given at end of each listing; all vhf's are one watt (1-w), unless otherwise indicated.

Channel numbers are contained in call letters: For example, Ch. 3 is indicated for Clear, Alaska, by K03BE; symbols ## indicate call letters not yet assigned. Call letters and location of station repeated are in parentheses.

This listing includes all existing & proposed translator stations, including those which are owned & operated by television stations. Translators owned & operated by television stations also are listed separately, immediately following this section.

**It's amazing what  
two bits won't buy  
these days.  
And even more amazing  
what it will!**

A pack of cigarettes, a gallon of gas, and a subway ride. These are among the everyday items for which 25 cents is now only part payment.

But the state-of-the-art ceramic tetrode tube at the heart of the new Emcee 1 KW UHF TV Translator Amplifier is another matter entirely.

Because that very same quarter will buy you a full hour's operation on a use-amortization basis. Add a nickel for the driver, plus whatever the power costs, and you've got the full operating cost for a complete television translator system for Channels 14 through 83.

(For those who like to make meaningful comparisons, the closest the other type of tube can come is \$1.50 per hour, plus driver and power.)

If economy is part of your consid-

EMCEE TOA-1000A  
1000 Watt UHF TV  
Translator Amplifier  
(Channels 14-83)

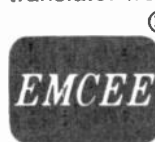

erations, you just have to go with the new Emcee 1,000-watt UHF unit. The initial cost is lower, the hourly cost is lower, and the tube replacement cost is lower.

The only thing that isn't lower is the quality. Believe it or not, that's higher. The ceramic tetrode's 7 KW plate dissipation allows for inherently low third order intermodulation products — less than 50 dB. So you avoid visual picture degradation even when color is saturated — during commercials, for example.

You can also add in such features as automatic recycle, automatic turn-on, protective circuitry, full metering, and unattended operation.

When we said state-of-the-art, we meant it! All in the new Emcee 1,000 watt TV Translator Amplifier. Use it with your present driver or get the complete 1 KW TV translator from Emcee.

# BROADCASTING ANTENNAS FROM ALFORD®

Whether your requirements are for an antenna to mount around a tower and still provide omnidirectional coverage or for a more conventional top-mounted antenna with omnidirectional or directional coverage, Alford Antennas can meet your needs from low-band VHF through UHF and ITFS frequencies.

Broad band, low input SWR is a feature of the Alford tower mounted Delta Dipole Antennas. For example, the measured input SWR of a recent Channel 3 array including the main transmission line was less than 1.02 at visual carrier and less than 1.05 from 1.0 MHz below the visual carrier to 3.5 MHz above.

Alford also designs and manufactures antenna arrays to meet particular requirements for TV and FM applications including a new circularly-polarized Master FM Antenna to be mounted atop the John Hancock Center in Chicago.

to each his own

Every time one of your staffers finds the house copy of Television Factbook in use or missing, he has wasted his time and your money. Perhaps another approach is in order.

Buy enough copies of Television Factbook to go around. It will save time . . . tempers . . . money, too.
