**Radio Formats by State**

Radio Formats by State is compiled from the BROADCASTING/CABLECASTING YEARBOOK radio database. It includes the number of AM and FM stations in each state followed by a ranked tally of formats used in that state. A total for the United States as a whole appears on Page F-120.

A format is defined as programming broadcast over twenty hours weekly. Programming broadcast from one to twenty hours weekly is defined as Special Programming, and is not included in these charts. Many stations report more than one format, so the total of the formats in each state will generally be greater than the total of AM and FM stations.

Stations reporting four or more formats are defined as Variety or Diversified. The format "Other" represents stations in which programming did not fit into any of the sixty-five YEARBOOK format classifications.

Please see the chart on Page I-79 for a breakdown of radio programming by AM/FM and commercial/noncommercial for the U.S. and Canada.

the Station Representatives Association, the Television Bureau of Advertising and the television networks effective July 1, 1970.

In 1986, the ISCI System was expanded in two ways: 1. the TV commercial coding is offered for extension to cover advertisers worldwide under the one standard. 2. a portion of the ISCI System is used to cover all television programs... program material of all types, lengths and media which are intended for syndicated or other repeat usage.

The eight-character (four letters and four numbers) coding is to be used on commercials and on their schedules, leaders, boxes, etc. ... with all commercials of a single advertiser "parent" company (if there are subsidiaries, divisions or affiliates) identified by the advertiser's prefix which is assigned by the ISCI system. For programs, the ISCI System assigns a specific eight-character permanent code to each piece of programming.

### NAB Television and Radio Codes

Both codes of broadcast standards promulgated by the National Association of Broadcasters have been suspended. The NAB and U.S. Justice Department agreed to a consent decree abolishing commercial time standards in the television code, in settlement of an antitrust suit brought by Justice (see BROADCASTING Magazine, July 19, 1982). Programming standards in the television and radio codes were suspended in 1976 after a U.S. federal judge in Los Angeles ruled that family-viewing provisions of the television code violated the First Amendment. # FOLLOWING THE FOOTPRINTS

## Protecting Film and TV Rights in the World Satellite Marketplace

Charles M. Firestone & Daniel L. Brenner, Editors  
(1987, paper, 464 pp., \$50.00)

Delivery of entertainment programs across national borders by satellite is a daily reality. As new international networks emerge, complex legal and marketing problems arise.

Markets are becoming defined by satellite footprints rather than geographic boundaries. Governments are unable to control the programming reaching citizens. Copyright owners have difficulty maintaining fair compensation.

Programming executives, attorneys, financiers, syndicators, academics and government officials will find FOLLOWING THE FOOTPRINTS a valuable resource in understanding today's satellite marketplace: This UCLA Communications Law Program compilation will fill you in on the players, the regulations and the market trends in international TV and film.

### Topics covered include-

- broadcast privatization trends
- protection of satellite-delivered intellectual property
- marketing by footprint in Europe and the Pacific Basin
- a worldwide summary of video delivery trends

## Radio and Television Audiences

Radio and Television were in more U.S. homes than ever before as 1988 approached.

**Radio.** The Radio Advertising Bureau estimated that 87.1 million U.S. homes, 99.0%, were radio-equipped as of Jan 1, 1987.

**Radio Sets.** The number of working-order radio sets in the U.S. totaled 505 million in 1987, according to estimates by the Radio Advertising Bureau. RAB estimated that 366 million of these were home and personal radio sets and 139 million were out of home receivers.

# For over 40 years, we've been writing the book on high power RF systems

## Experience is the best teacher

Chapter by chapter, and year by year, we keep adding to the book of experience as our engineers improve existing systems and develop new products and technologies.

In the past 42 years, we've built transmitters in every frequency band, from ELF to SHF. Today, nobody designs and builds more transmitter types than Continental Electronics.

Everyday, listeners all over the world tune in to Continental Electronics equipment because so many AM, FM and shortwave radio stations use our transmitters.

In support of our nation's defense, Continental's transmitters are the United States Air Force's first choice for long range, over-the-horizon communication and surveillance radar systems.

Scientific research also comes to Continental for answers. We develop special modulators, pulsed power supplies and power amplifiers which are key components in particle accelerators and plasma and nuclear physics experiments.

So, when you are in need of a reliable power source - broadcast, long range communication, radar, or CW RF power equipment - don't take a chance, contact Continental Electronics. The company that wrote the book on RF power systems.

## FOR BROADCASTING EXCELLENCE... SOLID, POWERFUL, TELEVISION AND RADIO EQUIPMENT

### High Power UHF TV Transmitters

TTC's Silverline UHF TV Transmitters provide the ultimate in picture quality, reliability and efficiency. These transmitters are designed that way, without compromise.

All new state-of-the-art design utilizes CMOS logic for control functions. Silverline multiple klystron transmitters maximize reliability by offering total redundancy. Each multiple klystron transmitter includes two or more amplifier cabinets, control circuits, high voltage contactors, beam supplies, cooling systems and excitors.

### Low Power TV Transmitters

TTC offers a full line of outstanding UHF translators and transmitters, with an ultra-stable design that assures high quality, trouble-free operation.

For 100 Watt UHF TV, TTC offers a durable solid state translator-transmitter designed for worry-free unattended operation in remote and hostile environments.

The TTC XL1000 has become the best selling 1000 Watt UHF transmitter in the world. Long-term reliability, performance, advanced capabilities, and versatility for use with UHF, VHF, satellite, or video inputs provide you with assurance of lasting quality.

### FM and AM Radio Transmitters

TTC has established a longstanding track record for producing highly reliable and durable FM and AM radio transmitters—combining unsurpassed value and performance.

A complete line of transmitters is manufactured including units with a power output of as low as 30 Watts and ranging upward to 40,000 Watts.

Featuring clean uncomplicated designs incorporating refinements developed from over twenty years of proven performance in radio stations worldwide, today's TTC radio transmitters provide unmatched price-performance value.

## MULTIPLE CAMERAS. ONE OPERATOR.

Impossible? Not if your cameras are mounted on EPO Servo-Controlled pan and tilt heads. These extraordinary, labor-saving devices, which first found favor in legislatures where remote-controlled, unobtrusive coverage was a key factor, are now the basis for complete remote-controlled news studios.

### Just look at these outstanding features:

- Up to 500 preprogrammed positions per camera, including control of iris and black levels
- Programmable fade modes that provide smooth transition from preprogrammed shots
- Ability to zoom and focus
- Unobtrusive
- Can be operated via telephone lines or microwave in a remote studio away from the main studio location
- Wide range of pan and tilt heads, for full studio cameras with teleprompters to ENG type cameras
- Wide range of control options, from panels with multiple-shot memories to simple joy stick remote controls.

It's flexible, affordable—and it's sold and serviced exclusively in the U.S.A. by A.F. Associates.

**WHEN LOOKING FOR THE LATEST TECHNOLOGY  
IN UHF AND VHF TRANSMITTERS...**

Comark's recent track record of technological innovations is unmatched by any other US manufacturer. This impressive history of recognized advancements demonstrates our commitment to the future. A commitment backed by continuing substantial investments in research and product development activities.

Incorporating new technology into today's products is your assurance that the Comark transmitter purchased now will still be current in the year 2000.

# DELTA BROADCAST PRODUCTS

## ASE-1/ASM-1

**AM Stereo without compromise.** The AM Stereo Exciter and Modulation Monitor provides a C-QUAM™ quadrature modulated stereo signal featuring low distortion and channel separation greater than 35 dB throughout the audio spectrum. The ASE-1 generates a signal to produce a phase modulated transmitter carrier. An L + R audio signal AM's this carrier to produce the C-QUAM signal, the only signal completely compatible with all C-QUAM, multimode and envelope detector receivers.

C-QUAM is a registered trademark of Motorola, Inc.

## RCS-1V

**This Remote Control System calls you when it needs help!** The RCS-1 combines microprocessor technology with easy operation. Features include direct interface boards for antenna monitors, patented remote modulation bargraphs, automatic logging, and synthesized speech telephone interface. Additional input and control boards to expand remote control capabilities can be added at any time.

## AAM-1

The Analog Antenna Monitor measures the parameters of directional antenna systems. Readings are: relative current; and current ratio and current phase to a reference antenna. The AAM-1 can monitor up to 8 antennas with ratio and phase measurements displayed on front panel meters.

## AMC-1/FMC-1

The only modulation control systems which provide a completely closed loop around the transmitter. The Amplitude and Digital Modulation Controllers sample actual modulation levels after the PA output network assures precise adjustment for optimum modulation levels. Both the AMC-1 and FMC-1 keep count of over-modulation bursts for signal control through a linear attenuator.

## RG-4

**High output Receiver/Generator.** The Receiver/Generator combines a two-watt RF output and a correlation detector circuit that virtually eliminates interference problems. The RG-4 operates in the 100 kHz to 30 MHz range. It is designed as the ideal companion instrument for Delta's OIB-1, OIB-2, and OIB-3 impedance bridges.

## APC-1

Your insurance against over- and under-power operation. The Automatic Power Controller continuously monitors the transmitter output power, making automatic power adjustments via the transmitter loading control. The APC assures proper power levels at all times.

## OIB-1/OIB-3/CPB-1

Full power impedance measuring. The Operating Impedance Bridges measure the impedance of radiators, networks and the like while operating under normal power. The OIB-1 measures VSWR and impedance up to  $400 \pm j300$  ohms. The OIB-3 extends the range to  $1000 \pm j900$  ohms, and has an RF amplifier for improved nulling. The Common Point Impedance Bridge is permanently installed for continuous monitoring of the common point during network adjustment. An optional TCA ammeter can be installed in its front panel.

## 6730E/6740B

Fast, efficient coaxial transfer switches. The coaxial transfer switches are designed to switch transmitters, transmission lines, antennas, dummy loads and auxiliary equipment quickly and easily. Either manually or remotely controlled, the switches are fully interlocked to prevent switching with RF power applied. The 6730E switch uses 1-5/8 inch connectors, the 6740B switch uses 3-1/8 inch connectors.

## TCA/TCT

Simplifies antenna current and phase sampling. TCA Ammeter Systems provide accurate, modulation-free current readings on a variety of meter types. Toroidal Current Transformers provide current and phase samples, and are available with three output voltage ranges, as well as high voltage models.

## The Complete RF Exposure Measurement System from Holiday Industries

### Measure Both E and H fields

ANSI RF exposure standard requires measurement of both the electric and magnetic field.

### Automatic Self-zero

Completely automatic self-zeroing eliminates drift, improves accuracy of readings.

### Recognized by Federal Agencies

Evaluated and used by NIOSH, OSHA, EPA and CDCR, as well as state, local health departments and consulting engineers.

**MII.**  
**ONE SIZE FITS ALL**

At JVC, we know what it's like to be in your shoes. Every day you have to tap dance between a barrage of equipment and format changes.

Fortunately, MII can make your job a whole lot easier. It's the first truly universal format that answers the needs of people in the field, in the studio and in production — while delivering broadcast quality results. And MII delivers these results in half the space and with less than half the weight of 1" C systems.

As you might expect, our new MII component video recording systems more than live up to the JVC reputation for value. In fact, to pack any more value or features into our economical MII units would probably take a shoehorn.

For example, you'll find features to choose from like four audio tracks, a time base corrector, an integral longitudinal and vertical time code, time/date generator with presettable user bits, automatic backspace editing and Dolby-C noise reduction...to name just a few.

## FINALLY! THE UNIVERSAL FORMAT THAT TAKES YOU FROM ACTION, TO EDITING, TO OVER-THE-AIR WITHOUT MISSING A STEP.

Plus, by combining the CTCM (Chrome Time-Compressed Multiplex) recording system with high-density metal particle tape, JVC's MII format can deliver up to 90 minutes of broadcast quality recording/playback time in VHS-sized 1/2" cassettes. All without worrying about format switches or losing quality during editing — even several generations down the line.

Most importantly, *only* JVC gives you a choice. This means you can select a less sophisticated MII system, say for ENG/EFP, and a more advanced MII system for studio work. Also, since each unit is completely compatible with each other, you can virtually build your own system, feature for feature. And upgrade at any time.

JVC's MII. The affordable, universal format you've been waiting for.

# Larcan Goes To Hollywood!

Frank Grill  
Station Transmitter Supervisor

Two years ago, KHJ-TV management decided they had to upgrade their facilities in Los Angeles.

Buck Evans, Director of Engineering, and Frank Grill, Station Transmitter Supervisor, reviewed the latest transmitter specifications available from the leading manufacturers. They then established their own criteria for the system they wanted and called for bids.

After a thorough evaluation of the competing proposals, Larcan was selected to supply two parallel 30 KW transmitters along with a state-of-the-art Larcan contactless RF output switcher.

The system has now been operating flawlessly for over 18 months. Buck and Frank are delighted with the whole Larcan system. "Several cable operators and TV Service Associations use our signal as the standard for measuring picture and stereo quality!" says Buck. "We can provide cable coverage over 100 miles completely noise-free."

For more information on Larcan's outstanding line of quality VHF and FM television transmitters, contact LDL Communications, Inc.

LDL is dedicated to serving the broadcast industry's transmitter site requirements with state-of-the-art transmitters, contactless switchers, antennas, combiners and towers, plus complete installation services.

# The Moseley name has stood for trust and dependability in communications since 1959. And while our philosophy of reliability hasn't changed, our capabilities have.

We serve the broadcaster's total control and communications needs, from small projects to multi-million dollar systems. Our systems are based on relevant, proven technology that is both cost-effective and custom designed to your needs. Our products are backed by a philosophy of total support, from system engineering to long-term service contracts.

## **Aural Studio-Transmitter Links**

The Moseley line of STL products represents small, independent broadcasters as well as larger, multi-facility stations both nationally and internationally. The transparent PCL-606 transmits your RF signal in crowded environments with virtually flat frequency response. A rugged design, using the latest techniques and components, gives the user ultra-low noise and distortion, excellent selectivity, and outstanding frequency stability. The PCL-600, our moderately-priced STL, ensures high-end specifications and outstanding audio characteristics that are good enough to back up a PCL-606 or stand alone as a vital STL system. The PCL-505, available in low frequency bands, has superior program handling capabilities at a cost-effective price.

Composite Moseley STLs transmit composite stereo on a single RF carrier. Two monaural STLs provide split channel stereo transmission.

## **Communication Links**

The CL-100 Control/Telemetry Link allows you to transmit telemetry or control data as an alternative to expensive leased phone lines or program subcarriers. The one-watt or ten-watt transmitter and companion receiver are FCC type-approved for use under parts 21,74, and 90 in the 450-470 MHz band. For European applications, a CEPT version is also available.

## **Audio Routing Switchers**

The Moseley Smart Switcher is an electronically-programmable audio routing/mixing system designed for broadcast and post production applications. The expandable system provides outstanding audio performance and multiple source summing capabilities in addition to system memories that store complete matrix configurations.

## **Remote Control Systems**

Our microprocessor remote control systems offer flexibility, dependability and sophistication from economical packages to more elaborate, expandable systems that cover all your remote control applications. Our largest system, the MRC-2, is a true building block. Up to 256 command lines, 256 status channels and 256 telemetry channels can be specified for up to 99 sites. The MRC-1600 provides sophisticated, yet simple, remote control operation suitable for such applications as AM, FM, TV, LPTV and facility control with 16 digital metering channels, 16 status channels, and 16 raise/lower control channels.

## **Options and Accessories**

Options and accessories for each line of products are designed to provide the end-user with flexibility and system expansion. From logging meter readings to adding PCs and automatic transfer and control units, we provide you with the capabilities and features you need to make your system work best for you.

## AUDIO MIXING, TELEVISION STYLE

Designed specifically for television and video post, the split-concept serial architecture found in the Orion AMU series audio mixing system enables interface to virtually any SMPTE controllable device including production, routing, and master control switchers and video editors.

Standard software features include ReMem™, the disc based Recall Memory System that allows on-demand storage, recall, and reset of full panel set-ups (including EQ), providing an invaluable tool for any repetitive program or complex edit session.

With full input-to-output stereo processing — and up to 32 stereo inputs plus a traditional panel layout, the AMU has the capacity, audio features, and ease of operation necessary for efficient audio production in both broadcast and video post.

\*Prior to 1971, data reflects factory sales by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. All import statistics are based on average value as published by the U.S. Department of Commerce, which is F.O.B. and therefore excludes U.S. import duties, freight charged from the foreign country to the U.S. and insurance.

# Buyers Guide

Radio, television and CATV equipment manufacturers, production services and professional services are listed here at the special request of each company in an easy-to-use alphabetical directory. Products or services are listed with the companies supplying them following in alphabetical order.

To locate the headquarters, or nearest sales office, of any listed manufacturer or service, simply turn to the company's alphabetical listing. For the first section, equipment manufacturers, turn to that directory in Section H. Production services appear in Section F, and professional services generally appear in Section I.

Names of firms appearing in bold face are advertisers in the 1988 BROADCASTING/ CABLECASTING YEARBOOK.

# Shively FM Antennas

A good antenna is crucial to quality broadcasting. An antenna that is merely adequate will compromise the performance of even the best studio equipment and transmitter.

Shively regularly includes standard features that other companies either provide only as options or simply do not offer.

At Shively, we design and build antennas of uncompromising technical quality and performance. And, we build them to last.

Note: The dollar volume figures represent total considerations reported for all transactions with the exception of minority interest transfers in which control of the stations did not change hands and stations sold as part of larger company transactions, such as the Capcities buy of ABC. All sales have been approved by the FCC. Also, prior to 1978, a combined AM-FM facility (replaced last year by Groups, see below) was counted as one station in computing the total number of stations traded. Now, AM-FM combinations as well as groups, are counted by their individual stations.

\*Prior to 1971, figures represent total number of deals involving both radio and television stations. Beginning in 1971, when the FCC's one-to-a-customer rule, prohibiting the sale of co-located TV and radio stations, became effective, figures represent the total number of separately located TV and radio stations that were sold in packages. In 1985, the mergers of large groups with interests other than broadcast stations could not be evaluated, since individual station values were not broken out of the larger sales. Group sales totals are now limited to compilations of "pure" stations sale—those only concerning TV and radio stations.

# The inside story on *Flexwell* is performance

Flexwell Transmission lines offer low RF loss, smooth impedance coefficient, and conservatively rated power handling capability.

Flexwell utilizes a copper corrugated outer conductor, solid or corrugated inner conductor (depending on size), and a tough, durable, corrosion resistant polyethylene jacket suitable for burial and prolonged life. A low loss foam version called Cellflex is also available in  $\frac{1}{2}$ ",  $\frac{7}{8}$ ",  $1\frac{1}{4}$ " and  $1\frac{5}{8}$ " sizes.

Air dielectric Flexwell in smaller diameters ( $\frac{1}{2}$ " and  $\frac{7}{8}$ ") offer a field proven, fixed helix design called Spirafil II, a single, continuous extrusion which locks the center conductor coaxially within the outer conductor, resulting in a linear impedance coefficient throughout the entire length of line.

Larger diameter air dielectric Flexwell Cables ( $1\frac{5}{8}$ ", 3",  $3\frac{1}{2}$ " and  $4\frac{1}{2}$ ") feature a unique vertebra helix design to achieve optimum crush and tensile strength. Its "pillar effect", using less volume of

dielectric, provides lower loss and higher average power handling capability due to the more rapid dissipation of heat from the center conductor.

Flexwell has it all: low loss, low VSWR, high power handling, smooth impedance coefficient, and rugged, long dependable life. Cablewave System's Flexwell is type accepted for sampling systems in accordance with FCC Part 73.68.

# A smart media investment takes more than a broker or a banker.

It takes both.

A media broker who knows broadcasting, from acquisitions and divestitures to station operations.

An investment banker who knows finance, from capital markets to law and taxation.

The smartest media investment takes the expertise, professionalism and integrity of Gammon & Ninowski and our associates.

You'll profit from our experience in producing efficient, analytical solutions to complex problems. Our knowledge of current market values and trends and our comprehensive approach to marketing (including preparation of a detailed Memorandum of Information) assure success.

Why choose between a broker or a banker when you can put the best of both to work on your next transaction?

For a confidential discussion, call our principal office in Washington, DC or one of our growing number of regional offices.

## What are Radio Station Buyers and Sellers saying about Americom?

"They get some of the highest prices in the industry and yet the prices can be financed. When I speak with anyone in their firm, I know that I can depend upon accurate and timely information. This professionalism and the high degree of confidentiality with which they work has made Americom so well respected."

Ed Christian  
 President, Saga Communications, Inc.

"They work very hard for their sellers, and I like that. Americom has a way of uncovering and displaying a station's potential value when it is not always apparent on the surface. I seriously question if others could get the same prices for some of the properties Americom has brokered."

Barry Dickstein, Partner  
 Hartstone & Dickstein Investment Bankers

"We personally interviewed seven brokers when we decided to sell WCJQ(FM) in Chicago. We wanted top dollar and wanted to make sure the deal closed smoothly. We chose Americom and we're glad we did - they got us \$14,000,000 cash for a station many people felt was worth only \$11 or \$12,000,000."

Jim & Jane Hall  
 Owners

"It wasn't just the more than fair price they brought us, but Americom's explanation of our stations' values was very impressive to our Board of Directors and was a very important factor in our decision to sell the properties. From our experience, they are the best in the business."

Morton I. Hamburg  
 President and COO, JAG Communications, Inc.

# Decisions. Deals. Money.

What more can you ask of a financial source?

**Speed.** In finance, speed is the value-added. No one knows this better than our Media Finance Group.

Fast decisions and the tenacity to work around the clock on loans and leases for equipment, acquisitions, working capital, debt restructuring, or real estate, turn opportunities into triumphs.

For business as usual or business that's far from usual, if time and creativity are critical, call Steve Turpin, Vice President, (404) 393-2310.

## We have a lot of clients you have a lot in common with.

You may recognize more than a few of these names. We're pleased to say they represent some of our clients. We thank these news directors and broadcast groups for turning to DFA to help find their own special broadcast talent.

DFA places talent. Period. That's why more and more news directors look to DFA, and our unique method to find the perfect talent match.

We invite you to call us. Don Fitzpatrick, Cathy Rose, and Enid Berman. The people who specialize in talent. Nothing else.

# The First 50 Years of Broadcasting

## The Running Story of the Fifth Estate

This year-by-year informal history of the times, the people, and the events that shaped the broadcasting industry was compiled from reports in BROADCASTING magazine. The work of several hundred writers, editors, and photographers, past and present, is condensed into some 300 pages of text and pictures.

*First 50* traces the development of the fifth estate for a half-century beginning in 1931, the year of the magazine's first issue. Broadcasters will read the book as contemporary history, refer to it to answer questions about important figures and events, and enjoy the memories it evokes.

Indexed for easy reference, this handsome hardcover volume is a unique compendium of information about a fascinating part of American society. *First 50* is packed with facts and photos, and is written in a concise, easy-to-read style suitable for pleasure reading or research.

No professional or student in broadcasting should be without *THE FIRST 50 YEARS OF BROADCASTING*. Order your copy today, using the order form provided, or call toll-free 800-638-7827 to charge your order to VISA, MasterCard, or CHOICE.

## Education

## Broadcasting Education

The following guides, all of which are regularly updated, can provide detailed information on educational opportunities in most areas of communications broadcasting.

**Aspen Handbook on the Media: 1979 Edition.** New York: Praeger Special Studies, 1977. (3rd edition). 440 pp. \$22.00/s/6.95. This unique guide to media includes much information on schools (research ongoing, a detailed list of guides to all of communication education, schools with communications law education, etc.) It is getting dated, so we use it in conjunction with references below.

Bohenkamp, Dennis R., and Sam L. Grogg Jr., eds. **The American Film Institute Guide to College Courses in Film and Television.** Princeton, N.J.: Peterson's Guides, 1980 (7th ed.). 430 pp. \$12.95, paper. The guide to have if you are having only one. This provides the most current and detailed information on schools, their faculty and facilities, listings of actual courses offered, and other information not found in the other guides listed below. More than 1,000 institutions are covered, arranged by state, and then alphabetically within each state. The curricular informa-

tion provided here is unavailable elsewhere except in the individual college catalogs.

**Communication Media in Higher Education: A Directory of Academic Programs and Faculty in Radio-Television-Film and Related Media** by Garland Elmore. Association for Communication Administration, 5105 Backlick Rd. Bldg E, Annandale, VA 22003. 530 pp. \$25.00. Listed by state, and then by school name, this is the most current guide to the content of undergrad and graduate programs.

## Books on Broadcasting and Electronic Media

Compiled by Christopher H. Sterling, Director, Telecommunications Policy Program, George Washington University

This bibliography supplements the listings in previous Yearbooks, which are still useful for older titles. (These lists appeared separately in the 1986 Yearbook but are combined here for ease of reference.) It's designed to briefly organize and annotate a fairly large selection of the most useful recent (generally meaning published in the past four years) books on the electronic media dealing with: (A) American Electronic Media, and (B) Foreign and International Electronic Media. Citations are current as of December 1987.

### GENERAL AND REFERENCE

**Broadcasting Bibliography: A Guide to the Literature of Radio & Television**. Washington, D.C.: National Association of Broadcasters, 1984 (2nd ed.). 66 pp. \$6.00. Subject-divided listing of 360 books and several hundred periodicals, along with publisher addresses and a good index. This is the best concise current guide, regularly updated. (NOTE: the annual book exhibit at the NAB convention is accompanied by a detailed bibliography of everything displayed, with publisher addresses. While not annotated, it is an excellent reference, assembled by the library staff of NAB. Extra copies are sometimes available from the library after the convention.)

Cassata, Mary, and Thomas Skill. **Television: A Guide to the Literature**. Phoenix, Ariz.: Oryx Press, 1985. 144 pp. \$32.50. Interesting discussion of most available books about television, keyed to a detailed bibliography.

Connors, Tracy Daniel. **Longman Dictionary of Mass Media and Communication**. New York: Longman, 1982. 255 pp. \$24.95/12.95. Some 7,000 terms are clearly identified.

**Electronic Market Data Book**. Washington, D.C.: Electronic Industries Association, annual. 120 pp. \$55.00. Invaluable standard collection of historical statistics over the past two decades on all types of consumer and general communication electronics along with world trade data (note: a booklet on consumer electronics is published annually by EIA for free distribution).

Head, Sydney W., and Christopher H. Sterling. **Broadcasting in America: A Survey of Electronic Media**. Boston: Houghton Mifflin, 1987 (5th ed.). 610 pp. Standard one-volume text covering history, technology, economics, programing, audience, regulation of broadcasting, cable and newer services (with an extensive annotated reading list).

Sterling, Christopher H. **Electronic Media: A Guide to Trends in Broadcasting and Newer Technologies, 1920-1983**. New York: Praeger, 1983. 335 pp. \$34.95/17.95. Some 150 historical trend tables on media growth, ownership, economics, employment, content, audience, international aspects, and regulation.

### HISTORY

(see also: Entertainment, for specific format histories).

Abramson, Albert. **The History of Television, 1880 to 1941**. Jefferson, N.C.: McFarland & Co, 1987. 354 pp. \$29.95. The first detailed history of pre-war television technical and business development here and abroad.

Aitken, Hugh G.H. **The Continuous Wave: Technology and American Radio 1900-1932**. Princeton, N.J.: Princeton University Press, 1985. 588 pp. \$67.50/19.95. Definitive and well-written history of the early

radio broadcast transmission, key inventors, and their context and impact.

Bilby, Kenneth. **The General: David Sarnoff and the Rise of the Communications Industry**. New York: Harper & Row, 1986. Biography of the key figure during RCA's history, with much of the industry's 20th century history related through his life.

Brooks, Tim, and Earle Marsh. **The Complete Directory to Prime Time Network TV Shows 1946-Present**. New York: Ballantine, 1985 (3rd ed.). 1,125 pp. \$14.95. Most inclusive and descriptive of several available historical guides. Includes annual network schedules. (See also Gianakos, below).

**First 50 Years of Broadcasting, The**. Washington: Broadcasting Publications, 1982. 320 pp. \$29.95. An absorbing year-by year replay of BROADCASTING's reporting of the development of the electronic media in text and photos.

Gianakos, Larry J. **Television Drama Series programing**. Metuchen, N.J.: Scarecrow Press, 1978-83, 4 vols. 2,544 pp. \$137.00 set. Definitive and detailed guide to each individual episode of all network drama series, from 1947 to 1982. (See also: Brooks and Marsh, above).

Lardner, James. **Fast Forward: Hollywood, the Japanese, and the VCR Wars**. New York: Norton, 1987. 344 pp. \$18.95. Well-written assessment of how the VCR developed, the major individual and corporate players here and abroad, and the legal issues involved (specifically, the "Betamax" case).

Notes: Figures compiled from BROADCASTING'S Yearbook database. Radio formats are defined as programming broadcast in excess of 20 hours per week; formats broadcast fewer than 20 hours are defined as special programming. Radio stations may report up to three separate programming formats, and any number of special programming formats. Stations reporting more than three formats are classified as Variety or Diversified.
