TVFactbook

TELCO/IPTV • CABLE TV • TV STATIONS

*Subscription
pays for itself
in just a few
searches*

Now you can access the entire contents of the Television & Cable Factbook instantly on your desktop or any Internet connection.

Your subscription to the *Advanced TV Factbook* online will provide you with access to over 1 million detailed records. Best of all, the database is continuously updated to ensure you always have the most current industry intelligence.

*Save enormous
amounts of time,
effort & money*

The user-friendly query interface allows you to perform fully customized data searches—so you can retrieve data in a number of ways, tailored to your precise needs. The search options are extensive and flexible, and will save you hours and hours of cumbersome research time.

You'll recover your subscription cost after just a few searches and continue to save enormous amounts of time, money and effort with every search.

*See for yourself—
take a risk free
7-day trial*

Take a FREE 7-day trial —

See for yourself why the *Advanced TV Factbook* online is referred to as “an invaluable reference tool.”

Sign up at www.warren-news.com/factbookonline.htm

You have **nothing to lose** and lots of time and money to save.

Continuously Updated • Easy Internet Access • Fully Searchable

U.S. Television Stations by Call Letters

As of October 1, 2016

Operating stations only. Dagger (†) indicates Non-Commercial/Educational station.

Asterisk (*) indicates operating construction permit.

Please refer to the Advanced TV & Cable Factbook ONLINE (www.advancedtvfactbook.com) for the most current information.

ICARUS™

Integrated Cable Areas – U.S.

Television & Cable Factbook's Cable Systems Database

Integrated Cable Area (ICA) Definition

Warren Communications News defines as one cable system a community or group of communities which receive essentially the same service at the same price from the same company, regardless of the number of headends or hubs used to deliver this service. *Television & Cable Factbook* has designated each system as an Integrated Cable Area and assigned it a unique identifier, the ICA. The ICA also is the unique record number used to relate data in clients' computerized applications that use the ICARUS™ cable system database.

General Description

A cable television system is defined by the FCC (Sec. 76.5 of the Rules) as follows: "A facility consisting of a set of closed transmission paths and associated signal generation, reception, and control equipment that is designed to provide cable service which includes video programming and which is provided to multiple subscribers within a community, but such term does not include (1) a facility that serves only to retransmit the television signals of one or more television broadcast stations; (2) a facility that serves only subscribers in one or more multiple unit dwellings under common ownership, control or management, unless such facility or facilities uses any public right-of-way; (3) a facility of a common carrier which is subject, in whole or in part, to the provisions of Title II of the Communications Act of 1934, as amended, except that such facility shall be considered a cable system to the extent such facility is used in the transmission of video programming directly to subscribers; or (4) any facilities of any electric utility used solely for operating its electric utility systems."

*Indicates a franchise awarded but not yet operating.

†Indicates application for franchise is pending.

N.A. means information is not available.

All communities with cable service are listed in the index following the cable listings, with a reference to the appropriate cable system.

Information/Data

NOTE: All data is as reported by cable operators or individual cable systems. Not all cable systems report complete data.

Subscriber Counts

Subscriber count is as reported by cable operators or individual cable systems or Factbook editorial research. Basic Subscribers, Expanded Basic Subscribers, and Pay Unit totals at the beginning of each state include a total of analog and digital subscribers. Not all cable systems report complete data.

NOTE: Reports from systems are of varying dates. Total basic subscribers listed in this edition of the Factbook is 58,743,965. Including subscribers not reported to the *Factbook* or to the government, we estimated total basic subscribers as of January 1, 2017 at 48,750,000.

TV Market Ranking

Indicates whether a system lies within 35-mile radius of commercial TV market as defined by FCC Rules & Regulations Governing Cable. If a system lies within the 35-mile radius of more than one Top-100 TV Market, both market numbers are shown. These market rankings are as of September 2016.

Began

Date service started.

Signals

Call letters and affiliations are as of October 1, 2016.

A cable network program is any program furnished to the system by a cable network (national, regional or special) or by a series of interconnected cable systems. Delayed telecasts of programs originated by cable networks or by a series of interconnected cable systems are classified as a network.

Subscriber Fee

Charges for installation and monthly service are shown as well as converter charges when separately stated by the system operator.

Pay Service

A special program service, for which the subscriber pays an extra fee, is listed under "Pay Service" for each system providing such service. Data include number of units using the pay-cable service, programming, transmission method (via local tape, microwave or satellite) and charges to subscribers.

Pay-Per-View

The number of addressable homes; services offered; fee.

Interactive Services

Subscribers; services offered; fee.

Personnel

The five types listed are: Manager; chief technician; program director; marketing director; customer service manager.

Ownership

Officers, titles and percentages listed are as reported by system operators to *Television & Cable Factbook* or to the FCC.

All cable system owners are listed in Ownership of Cable Systems in U.S. following the cable system listings.

Interests in broadcasting, telephone, publishing, etc., are noted.

Cable Directory Description

Recent sales of systems are reported on individual systems as well as in ownership sections.

Information is obtained through system operators, the FCC, franchise holders, applicants, city officials and other sources. Though data may be incomplete, it is the best obtainable through diligent inquiry.

For statistical tables of cable industry development, largest systems, etc., consult the Index at beginning of this volume.
