

# Group Ownership

Listed here are individuals and companies with multiple station holdings. Included are all those controlling three or more radio stations and/or two or more television stations. FCC rules limit the number of stations a company can own in a particular market, depending on the size of the market. In markets with 45 or more commercial radio stations, a broadcaster may own eight stations, but no more than five of a kind (AM or FM). In markets with 30-44 stations, seven total, four of a kind. With 15-29 stations, six total, four of a kind. With 14 or fewer stations, five total, three of a kind (but no more than half the stations in the market). Ownership of cable TV systems, as reported by these stations, is also listed. Unless otherwise noted, the first station listed is the group headquarters.
