Largest Evening Newspaper in America

ANNOUNCES
the Ownership of
Station WPEN
Philadelphia

Through an understanding of the life, habits and interests of Philadelphians, The Evening Bulletin has grown from small beginnings to a daily circulation of well over 600,000—the largest evening circulation in America.

In taking over the ownership and operation of Station WPEN, it is our intention to follow the same principles of service.

We have full confidence that the response of Philadelphians to an understanding of their needs and desires will result in an ever increasing circle of WPEN listeners in the Philadelphia area.

IN THIS ISSUE: 1945 RADIO BUSINESS OUTLOOK
At the Peace Table!

While men of great genius explore the perplexities of achieving a just and lasting world peace, others gathered at peace tables everywhere bow their heads to petition the Divine Peace Maker that He hurry along home their missing "delegates."

If, through any service of ours during 1945, just one such "delegate" returns who might otherwise join the countless silent heroes who roam the Eternal Halls of Peace, ours will, indeed, be a Happy New Year!

May we wish for you the same opportunity for the same superb Happy New Year!

CLEAR THE SALES BARRIERS

IN THE NASHVILLE AREA

Among the WSIX thorough-breds there are two that are capturing the attention of numerous agencies and advertisers—"NO WASTE COVERAGE" and "LOW UNIT COST". They clear the sales barriers in the Nashville Market and have that lift necessary to make sales campaigns profitable. A varied schedule of popular local and choice network programs carefully selected from both The Blue Network and Mutual Broadcasting System are responsible for their popularity. For more information on "NO WASTE COVERAGE" and "LOW UNIT COST" wire or write

ANNOUNCING . . . .

- A GREAT NEW
- OPPORTUNITY IN
- WESTERN MICHIGAN

This month a brand new radio station goes on the air in Grand Rapids.

It’s WJEF—CBS, owned and operated by the Fetzer Broadcasting Co., and sold in combination with WKZO, Kalamazoo, at a bargain rate per thousand radio homes covered.

As you know, NO Chicago or Detroit station gives adequate coverage of Grand Rapids, Kalamazoo or Western Michigan. Furthermore, no Grand Rapids station gives even minimum coverage of Kalamazoo, Battle Creek or Southwestern Michigan. . . . Now the new combination—WKZO plus WJEF—for the first time offers complete coverage of all Western Michigan, with CBS audience-appeal, with skilled local programming for the separate markets involved, and with one low combination rate to pay! We would be happy to send you all the facts—or just call Free & Peters!

WKZO
CBS—FOR KALAMAZOO, BATTLE CREEK, AND WESTERN MICHIGAN

WJEF
CBS—FOR GRAND RAPIDS AND KENT COUNTY

Both owned and operated by Fetzer Broadcasting Company

Back in 1940, before Pearl Harbor, the Studebaker Corporation signed a 13-week contract for three newscasts weekly.

Everyone knows that it's no trick to sell automobiles today if a dealer is lucky enough to have any for sale.

Yet, every 13 weeks for almost four years, Studebaker has renewed.

For this wise, far-seeing policy, looking forward to the greater post-war Detroit — an orchid!
At Deadline ...

NEGOTIATIONS between the NBC and Blue networks and the National Ass'n of Broadcast Engineers & Technicians (NABET) are to be resumed this Wednesday in New York, with likelihood that the union will force the companies into signing or refusing to sign contract covering jurisdiction over platter turners.

LEAF GUM Co., Chicago, Jan. 20 begins sponsorship for 52 weeks of a series of musicals, Saturday, 4:45-5 p.m. CWT (repeat 5:30 p.m.) on 79 NBC stations covering Midwest to New York. Agency is Bosell & Jacobs. Show replaces Starring Curt Massey, dropped by Schutter Candy Co., Chicago, for spot campaign in 22 markets. Agency, Schwimmer & Scott, announced plans may include half-hour Hollywood network show.

NEW APPLICATIONS filed with the FCC: WFTC Kinston, N. C. for shift of assignment to 5,000 w on 590 kc from 250 w on 1230 kc. KFBI Wichita for power increase daytime from 5,000 w to 10,000 w (1070 kc). KGW San Francisco for new FM station on 44,500 kc with 15,800 sq. mi. coverage and estimated cost of $132,050.

Sellers of SALES

MURRAY CARPENTER literally learned the advertising business from the ground up. He started ten years ago, just out of school, as personal messenger to Richard Compton. With a decade of solid agency experience behind him, Murray's current job is that of media supervisor in charge of all time and space on the Procter & Gamble account, working under Guy Richards, vice-president in charge of media.

In a short time, after joining the agency in 1934, young alert, affable Carpenter was advanced to the media department where he did clerical work. Later he became assistant to Roy Shults, who then was spacebuyer on the Seagram account, and now a CBS account executive.

In 1936 some of the Compton accounts developed a wider interest in spot radio. P&G, already a large network user, expanded its placement of both spot announcements and transcribed quarter-hour shows for some of its products, including Crisco, Lava and P&G White Laundry Soap. Murray worked with Roy Shults on this spot placement. P&G pioneered spot radio in Canada—there were no Canadian networks and the company was placing its U.S. network shows on a transcribed basis throughout Canada. It was and still is one of the largest U.S. advertisers in Canada.

After indoctrination into the account end of the agency as assistant to Chauncey Landon, executive on the Crisco account, Murray took over, in the early part of 1942, the buying of newspaper and supplement space for Duz. The following year he was made supervisor for all media on that account, and in mid-1943 he became agency radio supervisor in charge of time placement. He was recently appointed media supervisor on Procter & Gamble.

No agency executive will talk in terms of billing—especially in the highly competitive soap field—and Murray, who is cordially but cautiously discrete, is no exception. However, a study of lineage, radio, and media reports shows that P&G accounts under the Compton wing—Crisco-Fluffo, Ivory Soap and Flakes, and Duz, spent about $10,000,000 in advertising in the U.S. and Canada during 1943, giving some idea of the scope of coordinating those media expenditures. About 60% of it went into radio, the remainder split between magazines and newspapers, but every dollar—wherever it was spent—was tabbed and results accurately checked.

Murray is an active family man. He was married in 1938 to Harriet Lang, a Compton alumna. They have three children, Carol, Nancy, and Robin. When he has time, he relaxes with easel and brush. He's pretty good at it, too.
Most radio advertisers who know Iowa also know that Iowa people prefer WHO to all other stations heard in the State, combined. But do you know the why of this preference?

We think Iowa people prefer WHO because WHO does more for Iowa people. Just one small instance: During the past Summer and Fall, farm labor was scarce as hens' teeth in Iowa. WHO's Farm Editor, Herb Plambeck, decided to do something about it—started a campaign of appeals for extra help in behalf of the hard-pressed farmer (directing his appeals to folks in towns and cities, where you would expect a small audience to farm programs).

A plan was developed in cooperation with the Iowa Agricultural Extension Service and the State Farm Labor Placement Service. Prizes were announced for those devoting the greatest number of hours to farm work. Entrants were nominated by someone else and were designated "Victory Farm Volunteers". A total of 3,921 workers took part, turning in an aggregate of 165,763 hours of good hard farm work—20,721 full, eight-hour "man days"!

Entries came from all sections of Iowa and "Iowa Plus"—Illinois, Wisconsin, South Carolina and even New Mexico! WHO awarded prizes throughout the season amounting to more than $1600 in cash and War Bonds.

What did WHO get out of it? Mainly the gratitude of over-burdened farmers for this unexpected assistance. Just one more reason why WHO has such a great influence with Iowa people. They know that whenever there is a public service need, WHO can be counted upon to deliver.

**WHO for Iowa PLUS**

Radio Ready to Make 25th Year Its Best

Increased Revenue, Improved Service Pave Way for New Achievements

By BILL BAILEY

IT'S HAPPY BIRTHDAY to radio— in the form of its greatest potential year in history— on the art's 25th anniversary.

Increased net revenue in 1944 came as radio's Christmas present. Gross billings last year were estimated at $380,000,000, as compared to about $4,800,000 in 1927, first year in which statistics were gathered and the first full year of network broadcasting. For a birthday present business leaders—advertisers, agencies, networks, station representatives, broadcasters—predict that 1945 will be the greatest of all years.

Another anniversary gift— the Broadcast Measurement Bureau— radio's attempt to outline to the advertisers its greatest potentialities, will be delivered this year. Through the BMB, established by the NAB, the American Assn. of Advertising Agencies and the Assn. of National Advertisers, a standard method of measuring broadcast coverage will be evolved. The BMB gets into full swing within a fortnight.

Little Time Available

Only one factor will prevent radio from skyrocketing beyond the ken of prophets—lack of available time. Advertisers are signing long-term contracts in both the major and secondary markets to assure themselves time on the air. Late-comers, squeezed out of newspapers because of the newspaper shortage, and manufacturers of new products find it increasingly difficult to buy time.

Surveys conducted in the past fortnight by Broadcasting staff members in the major markets point a rosy outlook for 1945, despite the war. As to the major networks, both CBS and NBC New York reported a sellout of time. Blue and Mutual anticipate bigger business on the 1945 horizon, what with recent changes in management.

CBS estimated its 1944 gross billings would exceed by 10% the figure of $57,951,144. Two additional discounts for advertisers were added in 1944. Fourteen new affiliates brought the total network to 143. NBC reported a net revenue increase of 12% in 1944 over 1943, with 111 commercial programs using the full network against 89 in 1943. Advertisers increased from 73 in 1943 to 80 last year. Seven more stations became affiliated with NBC, bringing the network to 149.

Spot sales reached an all-time high, 21% over 1943, although there was a drop in one-minute spots.

Gross network time sales of the Blue Network for 1944 totaled $41,300,000 compared to $24,870,000 in 1943, up 66%, Chester J. LaRoche, vice-chairman of the Blue announced Friday in a yearend review. Local and spot sales in 1944 were $2,500,000, up 33%. Network affiliates increased from 174 to 194.

Spot Billings Up

Because the networks can offer little to newcomers, spot billing increased 25% in 1944 and the continued upward trend is anticipated this year. The past year saw greater activity in program selling, with creation of local programs for local sponsors slated to become one of the year's major developments.

Many advertisers turned to radio last year for the first time and indications were that future budgets would include the medium. Among these were theatres, night spots, restaurants, industry seeking help. Used cars which furnished a lucrative income to radio in 1943, dropped to virtually nothing last year in the East but on the West Coast, where thousands of war workers buy and sell used cars, radio still held a major share.

Department stores which used radio prior to 1944, increased budget a last year, and many others, sold on the NAB retail promotion plan, gave broadcast advertising a try, with the result that 1945 should see more such retail outlets in the radio fold.

Eye Spot Reaction

There was a variety of opinion on spot announcements. Agencies and representatives alike were critical of the WWJ Detroit ironclad ban on transcribed commercials. They felt that stations could handle the situation better by using editorial judgment in accepting transcriptions, rather than casting them aside.

There was criticism, too, of the WJZ and WENR abolition of nighttime spots except time signals. By and large, however, advertisers and agencies were watching the profession, wondering if other stations might not follow the leads of WWJ WJZ WENR, now that radio is fully grown.

Some stations increased rates last year to help absorb some of the higher cost of operation and increased listening. Generally it is anticipated others will follow.

Foresee Global Advertising

While radio's anniversary slogan is Pledged to Victory and the profession looks with pride on its all-out assistance in the war last year, leaders are not unmindful of the future and the possibility of an end to the European war this year. In the East thoughts are turning to television, and FM stations to advertising outlets. On the West Coast, however, the postwar planning is still in the conversational stage.

Since the war with Japan is expected to continue some time after European hostilities cease, and because the West Coast is a strategic military and naval area, little thought is given to anything but winning the war. Television and FM are regarded as something for the future—not immediately. With virtually all stations in the major West Coast markets carrying out the SRO signs for the first quarter of the New Year, advertisers who have not signed up for air time are in a quandary.

Banner Year

Nonetheless manufacturers are thinking of West Coast radio on a global basis. They point out that scores of newcasts and entertainment programs in English are being beamed by international shortwave to our troops overseas. What's to prevent the Australians, New Zealanders and English-speaking peoples in New Guinea and the many islands of the Pacific from listening in and enjoying American radio? Then there is international broadcasting a fertile field, when distribution problems are worked out.

Canada enjoyed a banner year in 1944, with revenue up 10-15% and prospects even brighter for 1945. Last year saw more advertisers and the broadcast by Canadian stations of more commercials from U. S. networks. Radio in

A PLEDGE TO TOMORROW

By J. HAROLD RYAN

President, National Assn. of Broadcasters

IN THIS ISSUE of Broadcasting Magazine, you will find summarized the accomplishments of radio during 1944 and a compilation of predictions for 1945. This has been a good year for radio and 1945 will be a better one, judging by the prospects. One must consider balance sheets to measure the progress of radio, for balance sheets represent an index to the medium's effectiveness. But radio is not in the same sense as the corner store which may limit its service to moving merchandise off the shelves.

Radio has other responsibilities, interwoven with the welfare of the people of the world. These were discharged nobly in 1944. This is an appeal, as we start the 25th anniversary year of our great art, that these responsibilities be remembered in 1945.

Let us make it a radio year that historians will remember when they record the story of the march of the United Nations to victory and peace. Let us pledge ourselves to victory first, using our medium with all the originality that broadcasters can summon to strengthen the resolve of America to fight a good fight.

January 1, 1945 • Page 13
Advertising Played Important Part in Mobilizing War Effort

Viewed as Essential in Tackling Reconversion; No Media Used More Effectively Than Radio

By JESSE H. JONES
Secretary of Commerce

Advertising has had a large share of the credit for mobilizing our citizenry to all-out war effort, proving for all time its power as a persuasive force.

The cost of this continuous program of persuasion, paid for by American business, is well over a billion dollars. All media have been utilized, none more consistently or more effectively than that of radio.

As we enter the fourth and perhaps crucial year of our participation in World War II, advertising will be called on to continue its role of persuading the people to keep on the right road to victory.

Postwar Problems Vary

While the extent of postwar problems will vary widely in different types of endeavor, their solutions stem from the common need to maintain high employment and, thus, the fullest possible use of our productive capacity. An indication of our overall requirements is best seen in the light of wartime accomplishments.

It is estimated, for example, that in 1944 our gross national product—measure of total goods and services produced—will amount to approximately $197 billion dollars and that our national income will be about $157 billion dollars. At the same time, people have saved as never before; individual savings during the past year are expected to exceed $35 billion dollars, a third of which are in war bonds.

When peace comes, larger markets must be built up quickly, and a demand must be created for the higher flow of consumer products. Certainly, advertising which has so significantly contributed to our persuasion during wartime will be needed to stimulate a desire on the part of the public that will result in a wave of buying. Only through such mass consumption can our postwar goals of sustained high employment and production be achieved.

MR. JONES

New Business a Factor

Four basic reasons were advanced for the year's increase in radio billings. First, the major part of the industry's revenue comes from home-used housewife-bought merchandise, items consumed year in and out and advertising is the air with the same consistency. Secondly, the paper shortage and the resulting curtailment of publication space has forced many advertisers to try out radio, with rewarding results. It is estimated that most of these new advertisers will continue with radio even after unlimited space in printed media is again available.

Third, the present tax situation encourages the maintenance of advertising, even by companies with nothing to sell to civilians now, to keep their brands and names alive for the postwar period.

And finally, station rates widely increased during 1944. Some agency objections were registered to what they termed taking advantage of a wartime situation, whereas the station representatives upheld the increases as justified by increased audiences.

The end of the war in Europe, generally expected sometime in 1945, probably will permit a limited consumption of production of consumer goods, with a concurrent shift from wholesale to retail selling. A temporary slackening or stoppage of advertising may accompany the conversion period for any particular product, but differences in time and duration of the conversion of various products is expected to prevent any general advertising decline.

In the new postwar field, CBS and NBC probably will continue their present SRO condition, showing slight increases in revenue as station rates rise. With old-time advertisers consistently renewing their top-rating programs and few "war babies", much change in their position seems unlikely in 1945.

Spot Increase Expected

The Blue, with a new and aggressive program, improvement policy and a campaign to strengthen its station lineup off to a good start, looks to the new year as turning out even better than 1944, which was "away ahead of 1943". Mutual, whose 1944 billings were more than 50% higher in 1943, is expected to take an even more important place in the network picture in the year to come, when its new president and his staff begin putting their policies into effect.

National spot radio billings for 1944 will run better than 25% ahead of 1943 and maybe higher than that, between increased volume of business and increased station rates. Smaller stations are benefiting by the business their larger competitors are either unable or unwilling to accept. Outside of motion pictures, which became a major radio advertising classification in 1944, the increase in national spots was due largely to greater expenditures by old-time spot users, notably proprietaries.

An increase in program selling, as contrasted with announcements, was reported by the representatives of some larger stations, particularly CBS Radio Sales and NBC National Spot Sales Dept. They pointed out that by building programs salable to advertisers these stations were both increasing revenue by selling talent as well as time and increasing listening by replacing announcement periods, which seldom obtain very high ratings, with programs which may attract a sizable audience.

Not yet widespread enough to constitute a trend, the creation of locally dramatized spots possibly become a major development in 1945, especially if the drive to do something about announcements gains momentum. This cleanup campaign was considered a good idea by practically everyone interviewed, but there was little agreement as to the methods invoked by WWJ—completely eliminating transcribed announcements—is the proper one.

Some theory people declared that all spots should be removed from the air, calling them parasites on the commercial programs which build the audience by which the spots are paid. "Pioneers defended "good" announcements, with considerable diversity of definition of the term, and urged strong commercial editing of copy by station managers as the practical solution. Most felt it unfair to label all announcements as bad just because they are recorded.

Rep's Oppose WWJ Move

The WWJ edict was almost unanimously decried by the station reps, who were equally unanimous in expressing the opinion that any other stations would follow suit. Nor did they think many stations would copy WWJ in removing spot broadcasts from their programs in the peak evening hours. It was pointed out that as a network key station, WWJ could follow a policy quite different from that which would be practicable for an independently operated station.

The ban on middle commercials in newscasts effected earlier by WOR was cited as the most likely movement for any network that is applicable to most stations.

Some alarm was expressed over the lack of understanding some advertisers and agencies have of station economics, with one top sales executive pointing out that the elimination of between-program announcements alone would put most stations in the red. He stressed the need for an educational effort to explain to the buyers of time that without announcements the stations would have to greatly increase their from other programs and that any general fall-off in announcement volume would be followed by either a sharp rise in network rates or a large number of station bankruptcies.

Local Sales Up

Local business also flourished in 1944, with department stores the leading classification in increased use of radio, a fact so obviously resulting from the NAB retail presentations that many a skeptical station manager changed his mind about the value of industry promotions. Motion picture theatres in many cities backed up the national radio advertising of the picture players with local programs or spots.

Jewelers, furriers and other luxury product retailers were prominent in the local picture, as were service delivery items such as milk and bread. Many local radio station engineers plants to enroll personnel also was reported on the increase.

In New York, help-wanted ads (Continued on page 56)
FCC Ready, However, to Tackle New Developments at War's End

By PAUL A. PORTER
Chairman, Federal Communications Commission

As in 1944, the coming year will see the continuance of all-out efforts by the communications industry and the Government to win the war. Wartime activities will continue to be the paramount business of those in Government concerned with communications. As the new Chairman of the FCC, I have no other thought or objective except for a continued mobilization of all the resources of Government and industry in the most fruitful protection of the war effort.

In the brief time that I have had the opportunity to review with my colleagues the problems of the Commission, I am impressed by the high quality of work that is being done by the Commission and its staff. I have had the opportunity to become familiar with some of the preparations that are being made... (text continues)

FCC to Announce New Allocations

25-30,000 mc Report Jan. 15;
Recording Rule Deferred

PROPOSED allocations between 25-30,000 mc will be issued by the FCC "on or about Jan. 15", the Commission disclosed late Friday following a meeting. At the same time the FCC announced that consideration of Order 119 to require networks to record all programs was postponed indefinitely due to material and manpower shortages.

When the proposed allocations report is made public, it will provide approximately 30 days for the filing of briefs and oral argument before a final decision is announced. A similar report will be issued later covering frequencies below 25 mc.

Two other broadcast actions were taken by the Commission. Friday, Transfer of control of the Pacific Coast Broadcasting Co., licensee of KPAS Pasadena, to Wesley I. Dunn, Loyal K. King, Thomas L. Bailey, Clarence A. Nisson, John K. Evans, Emer D. Bates, Maurice Enderle and John A. Smith through purchase of 43.78% or 1.116% shares of outstanding common stock, from J. Frank Burke Sr., J. Frank Burke Jr. and W. M. Burke for $178,640 was approved. (Earlier duopoly story on page 62.) Petition of the Blue Network Co., on behalf of WJZ New York and KECA Los Angeles to enlarge the issues in hearing on applications of Albuquerque Broadcasting Co., licensee of KOB, for modification of construction permit, for license to cover construction permit, and authority to determine operating power by direct measurement, was denied. KOB is broadcasting under special service authorization of 770 kc. KECA seeks to change from 790 to 770 kc. WJZ is the dominant station on the 770 kc channel.

RADIO LUXEMBOURG BACK ON AIR

Powerful Allied Station Broadcasts Warning on German Efforts to Confuse Listeners

RADIO LUXEMBOURG, dramatically captured from the Germans last September through the ingenuity of Morrie Pierce, while on leave from WPAR Cleveland as chief engineer for OWI in Europe, was back on the air Friday after a temporary silence for security reasons.

For the safety of the station, which had not been heard for many days during the early part of the Nazi counter-offensive, was relieved on Saturday, Dec. 23 when operations were resumed to send out the leader, "The Situation." The broadcasts by a German-controlled station using a similar wavelength.

Warning to Listeners

The warning, relayed by BBC to OWI, stated: This is Radio Luxembourg, broadcasting under control of the United Nations. Here is an important warning to our listeners. The Germans are trying to confuse you and to mislead you into action which will help their desperate gamble and will hinder the war's progress. The Germans are broadcasting both news and instructions purporting to come from Allied military stations.

German-controlled broadcasts are already being transmitted on a wavelength near enough to the wavelength of Radio Luxembourg to lead listeners astray. Listeners must be careful to identify the station Radio Luxembourg, which broadcasts on 1,593 meters... and is clearly recognized as a station of the United Nations.

Listen for the voices you know and beware of German attempts to trick you.

During the farthest point of the German advances, Luxembourg was reported to have been within 10 miles of an enemy column. The transmitter, however, is located at Juneau, which is 18 kilometers (approximately 10 miles) from Luxembourg and apparently south of the German push.

An interesting revelation in connection with the capture of the station, bearing on the German offensive, was told recently by Philip H. Cohen, director of the OWI's station ABSEI in Europe, while on a visit to the U.S. [BROADCASTING, Dec. 23]. In view of the high power of the station (150 kw) and its importance as a propaganda station, it seemed incredible that the Nazis did not destroy it before the American Army was in a position to surround the station and prevent the enemy from doing anything but slight damage. Luxembourgers who had been present when the Germans evacuated Mr. Cohen said, reported the Germans as saying, "we will be back within three weeks."

Radio Luxembourg is now under the control of the Allied forces and is being used essentially as a tactical weapon. Among Americans assigned to directing its operations is Lt. Col. Sam Rosenbaum, former manager of WFLR Philadelphia.

Blue Sells Stock

A FEW executives of the Blue Network have been invited to purchase stock in the company which is authorized to issue 100,000 shares. Plans are being drawn for the transactions. Price and names of potential purchasers are not being disclosed.
Bannister Defends WWJ Ban; Agency Heads Suggest Editing

Frank Palmer Commends ‘Courageous’ Stand But Disagrees With Blanket Abolition

HARRY BANNISTER, general manager of WWJ Detroit, defended his station’s action in banning transcribed commercial announcements [BROADCASTING, Nov. 27] before an AAAA group in New York last week. Kenyon & Eckhardt, meanwhile, disclosed that its transcribed announcements would be placed on other Detroit stations after Feb. 1, when the new WWJ policy goes into effect.

The New York audience included about 20 members of the association’s Committee on Radio Broadcasting and a Subcommittee on Timebuying. Citing examples of “growing opposition” to commercial radio within Government and the profession itself, and referring to the “smoldering though as yet inarticulate resentment of large sections of the listening audience”, Mr. Bannister proposed that his station’s action was directed toward avoiding stricter Federal control of radio.

Palmer Suggests Plan

Agency representatives agreed with the motives impelling the WWJ decision but disagreed with the methods employed. They suggested, as had Chicago colleagues when Mr. Bannister appeared before the Chicago Radio Management Club [Radio, Nov. 11], that more careful editorial supervision of all announcements, live and transcribed, by the stations would accomplish the purpose the Detroit manager had in mind.

Meanwhile Frank Palmer, chief timebuyer for Kenyon & Eckhardt, released for publication a letter he had written to Mr. Bannister in which he suggested a plan counteracting that announced by WWJ. His statement proposed that the creation of a continuity editorship on all stations to consider commercial spots and programs in the light of station policy “would be a more logical step to take”. Radio station management must acknowledge, as you have done”, Mr. Palmer wrote to Mr. Bannister, “the presence of a most unhealthful situation. However, little will be gained unless station management accepts the responsibility of determining:

1. Basically is the commercial copy and its presentation in good taste?
2. Can it be adjusted to meet the station’s needs of material, time distribution and placement?
3. Is our schedule overcrowded and spot announcements made necessary?

Regarding to Mr. Bannister’s comment that listener reaction to the WWJ plan had been favorable, Mr. Palmer suggested that perhaps listeners did not realize that “your plan contemplates the replacement of transcribed announce-ments with live reports and news.” This type of copy, Mr. Palmer asserted, can be monotonous.

His letter closed: “As an agency, we do not wish to penalize WWJ for placing a ban upon transcribed announcements. But, since 90% of our spot radio copy is transcribed, for what we believe to be very good reasons you force us to place our business on other Detroit stations.”

“I think your action was very courageous, but I don’t think you have gone all the way toward solving the problem asked for.”

Mr. Palmer maintained that Mr. Bannister erred in condemning all transcribed announcements because a few of them were objectionable. This was in rebuttal to Mr. Ban-
nister’s assertion that proper selectivity could not be exercised over announcements on platters.

Use of 300 mc Transmitter For Video Awaits War’s End

IN MEETING the challenges of war, radio performed services in 1944 believed impossible in 1940, according to Brig. Gen. David Sar
noff, RCA president on leave, in his year-end statement reviewing radio’s progress during the past year.

Telling of developments in RCA laboratories, Gen. Sarnoff, a 300-mc television transmitter which he said was the first of its kind developed to use 5 kw for video broadcasting. Its development, according to Gen. Sarnoff, came about largely through the use of a special electronic tube and associated circuits. Full use of the new transmitter, Gen. Sar
noff explained, must wait until the end of the war.

Postwar Developments

As a result of radio-fascimile development, RCA research scien
tists were disclosed to have built a duplicator for making copies of letters, documents, drawings and pictures. The new apparatus, which may be used to supplement pho
netograph or blueprint machines, can be operated by non-skilled personnel, Gen. Sarnoff said.

It was revealed that during the year more than 1,000 RCA research scientists and engineers have been working on wartime research, development and production of radio-
electronic equipment to establish RCA as an “arsenal” of radio to supply the armed forces. Asserting that 1944 would be remembered in the annals of radio as one in which scientific research and engineer- ing was moved into the present”, Gen. Sarnoff added that it was the year in which science, per-
formed under the well-known name of the enemy, was turned against those who used it for ruthless aggression.

Pays Tribute

Gen. Sarnoff paid tribute to the many RCA engineers and officials called on specialized missions in science and communications by the armed forces, recalling that during the year RCA had passed its first 25 years of leadership and service to the public. “RCA enters its sec-ond quarter century,” Gen. Sarnoff said, “with virtually all systems of the company contributing to the winning of the war. The gigantic task is to continue unabated the drive to Vici-
ory.”

Nets Unaffected By Racetrack Ban

CBS Will Lose Revenue From Kentucky Derby Rights

LITTLE disturbance is being caused the networks by the ban on horse races, effective Jan. 3. Indeed, the top four arrangements were canceled in advance of the announcement which is being made in stride even by the few local stations broadcasting spon-
sored by CBS.

CBS, which has exclusive rights to the Kentucky Derby, sponsored for several years by the Gillette Safety Razor Co., probably will be the only network to lose revenue since other network cov-
erage is usually on a sustaining basis. CBS also had lined up broad-
casts from Hialeah Park last month but canceled them two weeks later.

Mutual’s schedule of seven events from the Florida track beginning Nov. 26 was canceled, according to a day before the announcement was made public.

KPAS, KKKW Affected

Among local stations sampled widely within regularity, KPAS and KKKW Pasadena will lose a sizable amount of revenue and afternoon audience, but man-
agement of both feel they will be better than programming will be compensated. In most cases part-
taking time already has been requested by local and regional adver-
tisers, which comprise a large percentage of the network audience and new programs are being slated toward them as well as to other stations.

KRDK Los Angeles is substituting a 15-minute racing resume with a recorded sponsored musical show.

In the New York area, WBYNJ Rockland, a continuation of its daily five-hour service sponsored by Armstrong Publications Inc., print-
ers of racing information sheets, with news from tracks in Havana and Mexico. WHN New York which broadcast a six-times weekly five-
minute racing resume, may also shift to coverage of Mexican and Cuban tracks this week. New Jer-
sery and Pennsylvania independent stations reportedly will feel the ban, however, from the audience-
building viewpoint.

In Washington, Tony Wakeman, WWDC sportscaster, was of the opinion that the ban will not affect him to any appreciable extent. However in Mexico, Cuba and Canada still will be carried with coverage supplied by UP and INS wires. Other sports, he said, provide a plethora of material and the problem is to edit it rather than worry about padding to make up for any decrease in racing time. Mr. Wakeman had no ideal as to the number of listeners at-
tentively following turf races.

WAIT Chicago, carrying the same sort of variety show as Tony Wakeman, six days a week from one to 5 p.m., simply will drop the results and continue the program.
Gets what he goes after

That's the Army's first fighting falcon. He can dive at speeds up to 300 miles an hour. He can spot a mouse a quarter of a mile away. He gets what he goes after.

That last phrase is the one we want to hang this ad on. "He gets what he goes after."

Down here in Baltimore, radio advertisers get what they go after IF they buy W-I-T-H, the independent station. Facts from outside sources prove that W-I-T-H produces more listeners per dollar spent than any other station in this 6th largest market.

If you have something to sell ... W-I-T-H can sell it better. W-I-T-H gives you what you go after! Sales at low cost.

KSWO Assignment, WKIP, KSKY Shifts, Acquisition of KFBC 'Control Granted

FOUR TRANSFERS of control were granted by the FCC last week exclusive of two dupley actions as reported on page 63. Stations involved are WKIP Poughkeepsie, N. Y.; KSWO Lawton, Okla.; KSKY Dallas and KFBC Cheyenne, Wyo.

In the Poughkeepsie action the Commission approved voluntary assignment of license of WKIP from Poughkeepsie Broadcasting Corp. to Poughkeepsie Newspapers Inc., sole owner of the licensee corporation. No monetary consideration is involved. Poughkeepsie Newspapers, a Merritt C. Speidel interest, acquired control of Poughkeepsie Broadcasting last March through purchase for $10,600 of the 60% interest in WKIP held by Richard E. Coon, affiliated with the Speidel group in Poughkeepsie.

KFBC Transfer

Acquisition of control of Frontier Broadcasting Co., licensee of KFBC, by the Cheyenne Newspapers Inc. was granted by the FCC. Cheyenne Newspapers, of which Mr. Speidel is chairman of the board and minor interest holder, purchases 175 shares (75%) common stock for $2,275 from W. A. Corson for $2,275 from W. A. Corson and its agency, Young & Rubicam, Bill Goodwin, Hollywood announcer, was released last week from the CBS Burns & Allen Show to join the new Frank Sinatra Show starting Jan. 5, also on CBS, under sponsorship of Max Factor Co. (cosmetics). Dispute was settled Dec. 27 after an AFRA arbitration hearing was being setup. Goodwin had asked relief from an exclusive clause in his five-year contract on the grounds that certain verbal promises allegedly made by Young & Rubicam had not been fulfilled. He received $1,000 per week on the Burns & Allen Show, now assigned to Tom Hanlon.

Luncheon Guests

NBC Commentators H. V. Kaltenborn, John Cooper, Stanley Richardson, Ralph Howard Peterson and Roy Porter were guests of honor at a luncheon given by the network last Thursday at the Waldorf-Astoria Hotel, New York.

McGuineas and Boggs Named in WGN-WGNB

IN A realignment of executive personnel, Mr. Harry Warner, WGN's FM adjunct, announced last week, through Frank P. Schreiber, manager, that William J. McGuineas, WGN sales manager since 1930, has been made to WGN-WGNB and the company's proposed television activities. Mr. McGuineas with WGN since 1934, Norman Boggs, chief of the WGN New York sales office since 1940, has been named sales manager of WGN, succeeding Mr. McGuineas. Replacing Mr. Boggs is George Harvey, WGN sales manager since 1938, except for one year he spent with Mutual 1937-38.

Four countries in the FM station personnel include appointment of Marion Claire (wife of Henry Weber, music director of WGN) as director of WGNB. Miss Claire has been with WGN as lead soprano on the Chicago Theatre of the Air since 1940.

News Editors Club

RADIO News Editors of San Francisco, a new organization, has been formed by editors of local stations with Alfred Fenger of KSFQ as president. The 21 members of the group, attended by Chuck Pendleton, KJBS; Chuck Cooney, KPCO-NBC; Grant Hoff of KABC, Los Angeles, Roger Ivers, KSAN; Bill Brown, KYA and Austin Fenger with Phil Wood-yatt, CBS; Darrel Donnel, KFBC and Frank Lasour, KGO unable to attend but backing the club.

The necessity of maintaining a news medium on the same basis as newspapers was discussed at the first meeting. Specific plans to improve radio news service contacts will be developed next.

WQXR Shifts News

WQXR New York on Jan. 1 abandon its schedule of AP news period. Five minutes before noon in favor of an-hour AP news-casts as a greater convenience to listeners. Several commentators whose programs begin on the hour will now lead into their analysis with a five-minute summary. Four women's programs which had begun on the hour will start five minutes later, and one thirteenth-quarter-hour program will shift to a five-minute ten-minute series.

Bob Hope Honored

ADVERTISING Club of New York will make its annual award in recognition of outstanding service to society this month to Bob Hope, NBC comedian sponsored by Pepsi-codent Co., for outstanding achievement in entertaining service groups throughout the world. Winners of previous grants have included Mayor La Guardia of New York, Commander Gene T. Revere of the Navy, and Townsend, Westbrook Pegler, Quentin Reynolds and Robert Moses.

RMA SEES POSTWAR JOBS FOR 145,266

POSTWAR employment for about 68.5% more men and women than were employed in the last postwar year will be provided by the radio manufacturing industry, a survey released last week by the Radio Manufacturers Assn. disclosed.

Representing 64.9% of the industry, the companies reported they will need 145,266 employees in the first postwar year, as compared with 86,173 in the last postwar year. A decline of 39.3% in present employment, geared to wartime production, is expected. It was pointed out that the radio manufacturing industry has expanded its dollar volume 1300% since 1940.

Conducted by the RMA Employment and Personnel Committee, the survey disclosed that 23.6% of the men now in war work and 27.9% of the women will not seek jobs in the radio manufacturing business after the war. More than a third of the industry's workers, 35.7%, have entered the armed services.

Army Unit to N. Y.

THE 2001st Army Air Forces base unit, radio production, which moves from New Haven to New York the first of the year [BROADCASTING, Dec. 18], at 11th Ave., with Capt. David Turnbull as commanding officer, Capt. Robert C. Jennings in charge of radio production, and Maj. Harry Blue-stone. Staff which heretofore spent part of the week in each city, puts on four regular shows from New York: Army Air Forces Mutual, First in the Air, CBS; 1 Sustain AP Symphony Flight, Blue. Unit also prepares recorded programs for V Discs, and the Psychological Warfare Bureau, OWI.

KFPW to MBS

KFPW Fort Smith, Ark., operated by Southwestern Co., on Dec. 21 became a Mutual affiliate. Station operates with 250 w on 1400 kc.

FOREIGN SERIES

WNEW 25th Anniversary to Show Radio Abroad

WNEW New York is contacting governments and broadcasters abroad and foreign embassies in this country for material for a 13-week series designed to show how radio operates in other nations. The project conceived in celebration of the 25th anniversary of the radio industry. From the BBC, the Australian Broadcasting Commission, the Latin American Radio official, Radio Diffusion in France and similar sources in other regions, WNEW is attempting to secure recorded material such as program excerpts, opening and closing announcements, public service signals, and general information on broadcasting operations, program releases last week. Through the "JOBS FOR POSTWAR" employment, which moves from New Haven to New York the first of the year [BROADCASTING, Dec. 18], at 11th Ave., with Capt. David Turnbull as commanding officer, Capt. Robert C. Jennings in charge of radio production, and Maj. Harry Blue-stone. Staff which heretofore spent part of the week in each city, puts on four regular shows from New York: Army Air Forces Mutual, First in the Air, CBS; I Sustain AP Symphony Flight, Blue. Unit also prepares recorded programs for V Discs, and the Psychological Warfare Bureau, OWI.

With the discovery of gold in 1858, mining became Colorado's first industry. Since then, 250 other useful minerals have been found of which 40 are being produced commercially with coal, molybdenum, vanadium, tungsten, manganese, zinc, lead and fluor spar leading in importance.

Even after 87 years, the potential mineral wealth of Colorado is practically unscratched. It has the nation's greatest bituminous coal reserves and billions of barrels of oil in its yet undeveloped oil shale deposits.

War needs have stimulated Colorado mining to record production but the coming of peace and the opening of the floodgates of civilian needs will keep Colorado miners digging busily for a long time to come.

The mining industry is one of Colorado's basic assets; as basic and permanent as its agriculture and livestock raising.

The Denver market is basic in any selling plans of a national or regional scope, both from the standpoint of size and productivity.

A basic selling medium in this area is KLZ, the station on which more advertisers, local and national, buy more time than on any other Denver station.

KLZ - Denver

What we know today as radio began as "wireless telegraphy"... the transmission of dot-and-dash code through the air from sending-sets to receiving-sets. Unlike the telephone, the telegraph, and the cable, wireless used no wires... as the adjective implied.

Still without wires today, how are you sure of the "connection"?

In radio, the program determines who will receive it on a voluntary basis, and how many. The type of material, therefore, which goes out from a radio station over the air becomes the all-important factor in making the connection between sender and receiver.

Through the stations of Westinghouse pours the NBC Parade of Stars, integrated with local programs of equal merit. These programs are the advertiser's assurance of voluntary reception, of a completed connection, just as surely as if they came by wire or cable.

A potential primary audience of 18,000,000 Americans is on the receiving-end of Westinghouse broadcasts, 19 hours out of every day. What have you to say to this vast group, with money in their pockets, and ideas of how to spend it in their minds... ideas put there by radio programs? Consult NBC Spot Sales for availabilities.
Radio Highlights and Headlines: 1944

(See issues of Broadcasting nearest each date given for full details.)

Jan. 1—Time Inc. and Chester J. LaRoche, former head of Young & Rubicam, each acquire 12.5% interest in Blue Net Radio. Edward J. Noble, principal owner. Each paid price of $500,000 cash, with Mr. LaRoche becoming chairman of executive committee and operating head.

Jan. 1—Blackett-Sample-Hummett Agency dissolved with Danner-Fitzgar- 

ald and Sample appointed to take over operations, including substantial radio business. Hill Blackett Agency also formed at same time.

Jan. 3—Largest number of radio homes in history—32,500,000—estimated for 1944 despite wartime freezes and tube and parts shortages.

Jan. 12—E. K. Jett, Chief Engineer of the FCC, nominated for President by Governor Henry G. Payne as member of FCC. Senate confirmed nomination Feb. 11.

Jan. 13—FCC dismisses newspaper government-renewal proceedings by unanimous vote, leaving open way for newspapers to participate in all licensed radio, with newspaper conditions to be considered on individual merits. It thus terminates uncertainty which had existed since March 1941 when newspaper order originally was issued.

Jan. 17—FCC, following consultation with its Stations and Advisory Committee, discloses it will make its programs, both commercial and sustaining, available to FM stations operated by present standard band affiliates with no additional sponsor cost until audience of both stations is equal to point where rate adjustments become desirable. Other networks subsequently followed suit.

Jan. 26—FM Broadcasters Inc. holds first annual meeting in New York with gross attendance of 750.

Jan. 26—Broadcast equipment freeze order eased by FCC and War Production Board in simultaneous announcements providing that conditional grants for new stations or change of facilities involving critical materials will be authorized where it is shown that they will "serve an outstanding public need or national interest."

Jan. 31—Nearly a fourth of radio's 250,000 regularly employed personnel listed as in the armed forces or in Government service, according to Broadcasting Yearbook poll.

Feb. 2—New York Times enters radio field through acquisition of WQXR and WQXQ New York from John V. L. Hugon and associates for $1,080,000.

Feb. 3—John Harold Ryan, Assistant Director of Censorship, and vice-president on leave of the Fort Industry Co., operating stations, is unanimously elected NAB president by the Association's board of directors to serve until Jan. 1, 1945. He succeeds Neville Milledge first paid president, who had served since 1938.

Feb. 3—House Select Committee to Investigate the FCC reveals that it will institute a sweeping investigation of the 1940 sale of WMCA New York by Donald Flamm to Edward J. Noble, now Chairman of the Board of the Blue Network Co. Inquiry held intermittently during the year, with many high figures in public life called.

Feb. 7—Broadcast advertising in 1943 reached a total of $235,900,000 net time sales, or 21.8% ahead of the 1942 high. Gross time sales totaled $307,191,000, as compared with $254,800,000.

Feb. 16—George P. Adair, Assistant Chief Engineer in charge of broadcasting, is elevated to Chief Engineer of FCC, succeeding Commissioner E. K. Jett.

Feb. 19—John E. Fetter, owner of WKZO Kalamazoo, named Assistant Director of Censorship in charge of radio by Byron Price, Director of Censorship.

Feb. 23—Eugene L. Garey, of New York, general counsel of House Select Committee to Investigate the FCC, resigns on ground that committee inquiry is a "sheer white-washing affair." Chairman E. E. Cox (D-Ga.) previously had re- signed the committee chairmanship. John S. Birnes, Washington attorney, subsequently named general counsel.

Feb. 25—Nation's 52 stations operating with 50,000 v on clear or duplicated clear channels average individual net time sales of approximately $1,000,000 during 1943, according to FCC analysis.

March 1—Retention of its policy of affiliate-network relationship in eventual establishment of nationwide television network to get under way with the war's end announced by NBC. Position enthusiastically received by affiliated stations following presentation at session in New York.

March 1—Time Inc. endows a two-year study in freedom of the press by an independent commission, headed by Robert K. Hutchins, President of the University of Chi- cago. Robert D. Leigh, former director of Foreign Broadcast Intelligence Service of FCC, named director.

March 6—C. E. Hooper, radio survey expert, touches off industry-wide controversy in urging that stations clean out "fanny money" programs.

March 10—National War Labor Board, by split 2-1 vote, orders James G. Cawley's American Federation of Musicians to terminate its recording strike to the end that conditions prevailing on July 5, 1942 be restored. Petrillo later refused to obey order.

March 11—Raymond Carlisle, Swing; informed by radio, spoke of House Committee, now WMZC Cincin nati, and WMAZ Macon, receive $1,000 from Fredu. du Pont radio awards for 1943.

March 13—AT&T divests plans for coaxial cable facilities adequate to provide television network service in the radio business. Ten-year plan entailing installation of some 7,000 miles of cable at an estimated cost of $100,000,000 was outlined.

April 17—Survey of advertising agencies reveals most of them are prepared to enter television under presidential Historian's decision of some 7,000 miles of cable at an estimated cost of $100,000,000 was outlined.

April 21—Army and Navy abolish requirement that disclaimers be used on commercial programs presenting armed forces personnel.

April 22—Record-breaking transaction for local outlet completed with sale of WWIN Washington by Lawrence J. Keller to Eugene Meyer, editor and publisher of the Washington Post. Concluded for $2,500,000.

April 25—Harold V. Hough, manager of WBAP-KGKO Fort Worth, is given newspaper-radio distinguished service award for directing and winning newspaper ownership fight before FCC.

April 25—Eugene Pulliam, owner of WIRE Indianapolis, acquires Indianapolis Star and Muncie Star for $2,500,000.

May 1—Five of eight major citations for 1943 George Foster Peabody awards for outstanding service are to go to CBS stations and programs, with NBC, Blue and KYA San Francisco also cited. Bob Hope receives special citation for military camp tours.

May 1—Commissioner E. K. Jett of FCC predicts two commercial systems of television—one to get under way when wartime freezes are lifted under existing conditions of modified standards, and the other a "vastly improved system" sometime in 1945. It touches off fight of proponents of "upstairs" high-definition television as opposed to "downstairs" pre-war system.

May 5—Commissioner Clifford J. Durr of the FCC tells Ohio Institute for Broadcasting panel radio "is steadily and rapidly be-
May 8—Networks pool facilities to cover impending European invasion. Facilities for most intensive news coverage in history devised by Col. (now Brig. Gen.) David Sarnoff, who later was awarded Legion of Merit for outstanding attainments.

May 8—Commissioner T. A. M. Craven indicates intention not to seek reappointment upon expiration of his term June 30. Later became executive vice-president of Colliers Broadcasting Co.

May 8—Petriillo discloses plan for AFM to install “pancake turners” in all stations to make jobs for 2,000 AFM scale. Precipitated a fight with NABET, which resulted later in National Labor Relations Board ruling favoring latter except in Chicago, where musicians had been used as record turners.

May 19—Half-dozen station transfers involving $1,750,000 completed in week, subject to FCC approval. Deals included sale of WPGN Philadelphia by Arde Bulova to Philadelphia Bulletin for $620,000; WNBC Hartford by Bulova to W. O’Neill, General Tire president and Yankee Network owner, for $220,000; WOBM Jersey City to Colliers Broadcasting Co. for $350,000, and KEX Portland by Portland Organization to Westinghouse for $400,000. All transactions subsequently approved.

May 23—Revised White-Wheeler bill to amend Communications Act, which would substitute a five-man commission for the present seven-man agency and drastically change radio’s method of programming and operation, is reported by Senate Interstate Commerce Committee. Measure, which would ban sponsorship of news and commentators and curtail clear channel operations, died with the ending of the session because of opposition from all sides.

May 26—Blue Network purchases KECA Los Angeles from Earl C. Anthony for $800,000 cash as a result of FCC’s duopoly order.

May 31—Acquisition of all of the outstanding capital stock of Broadcasting by Sol Taishoff and his wife, Betty Tash Taishoff, from Martin Codel and his wife was consummated. Mr. Taishoff became publisher as well as editor of Broadcasting.

OFFERING whole-hearted support of the NAB’s year-long observance of the 25th anniversary of broadcasting, the advertising committee of the Radio Mfrs. Assn. met in Chicago to outline its part in the 1945 program. In front are (l to r): Charles B. Brown, RCA Victor Division of RCA; John S. Garceau, Farnsworth, committee chairman; Fred Schreiber, Zenith; Victor Irvine, Galvin, host to the meeting; Stanley H. Manson, Stromberg-Carlson; S. D. Mahan, Crosley. Standing, James W. Douthat, publications director, RCA; John G. Porter, GE; Seymour Mintz, Admiral.

“The White House has its Fala,
The Movies’, Rin-Tin-Tin,
Asta has his Thin Man,
But here’s where I come in.

My name is Spot, and I’ve a lot
Of station information.
You’ll learn why we rate so high
A selling reputation.”

WIBC
MEAT AND MONEY

More than a half million head of cattle and some 400,000 swine are growing and fattening for the market today in this tri-state area of Arkansas-Louisiana-Texas. The raising of purebred beeves and porkers has received added stimulus by the nation's wartime call for more and better meat. In the post-war years, the mounting wealth of high-grade meat animals will multiply buying power in the already prosperous Ark-La-Tex, whose people listen to powerful 50,000 watt KWKH, the No. 1 medium of the area.

Chamberlain Expands
CHAMBERLAIN SALES Corp., Des Moines (hand lotion), effective Jan. 1, will expand its present spot-announcement campaign, which began Dec. 1 for four weeks, from 100 markets to 125 markets, 156 stations. Contract for 13 weeks was placed through BBDO, Chicago, labor unions how to get free radio time and urging them to get in on ground floor of FM.

Aug. 11—Post-war preliminary allocations plan of Interdepartment Radio Advisory Committee (IRAC) makes no provision for facilities for international shortwave broadcasting but proposes that programs be relayed to foreign countries for domestic distribution. IRAC plan also touches off controversy between FM and television for 50 megacycles area in spectrum.

Aug. 25—President Roosevelt and Gov. Dewey, as respective party candidates, hail radio's war service in letters to NAB Executives War Conference in Chicago Aug. 28-31.

and WOL Washington are exchanged without substantial monetary consideration, Cowles Broadcasting Co., acquired Washington outlet from Mrs. LeRoy Mark in exchange for the Iowa CBS outlet.

July 13—Ban on middle commercials in sponsored news broadcasts invoked by WJR Detroit, effective Sept. 1.

July 16—McKesson & Robbins votes largest appropriation in history—$2,500,000—with bulk to radio.

July 20—Panel gets from Treasury War Finance Division, lauds radio's job as "bigger than ever before" in Fifth War Loan drive.

July 31—FCC Chairman James Lawrence Fly plans to resign to enter private law practice in New York. He subsequently resigned Nov. 16 and was succeeded by Commissioner E. K. Jett as interim chairman.

July 22—William S. Paley, on leave as president of CBS, returns to United States for short stay after having been in European theatre since November 1943 as Chief of Radio, Psychological Warfare Division, SHAED.

July 25—Congress is notified by FCC that unless there are specific legislative instructions it feels it is its function to approve sales of broadcast stations, irrespective of whether the prices are "inordinately high".

July 26—D. F. (Plup) Kendrick, 46, owner of WINN Louisville and a veteran broadcaster, dies in Louisville following a long illness.

July 27—National War Labor Board orders James C. Petrillo to end strike of musicians at KSTP St. Paul—another ruling later ignored by the AFM head.

Aug. 4—Efforts of CIO to invade radio on all sides revealed in publication of Political Action Committee Radio Handbook, telling

Aug. 29—Standard plan of station measurement—later named Broadcast Measurement Bureau—supported by NAB Executives War Conference. Project later approved by American Advertising Agencies and Assn. of National Advertisers. Plan will entail one million postcard survey biennially, at estimated cost of $1 each, with FCC bill to be paid by broadcasting industry. Separate bureau and staff to be established.

Aug. 31—FM and television ads broadcasters at NAB Executives War Conference in Chicago, attended by 1,100.

Sept. 11—Republican nominee Thomas E. Dewey, in exclusive interview with Broadcasting, supports free radio and revised, more liberal law. Opposes Government entry into programming or business aspects.

Oct. 20—Blue Network realigns high command, with Chester J. LaRocque, former Young & Rubicam head, as vice-chairman in charge of operations. Edward J. Noble, principal owner, Mark Woods, president, and Edgar Kobak, executive vice-president, retain titles.

Sept. 25—Change in name of Blue Network to American Broadcasting Co. (American Network) predicted as company acquires rights to similar names from other holders and purchases name "American Network Inc." in dissolved FM project. FCC on Dec. 19 approved voluntary assignment of licenses of WIZ and TENR Chicago, KGO San Francisco, KECA Los Angeles from Blue Network Co. to American Broadcasting Co.

Sept. 28—Allocation hearings to shape future development of all broadcast services begin before FCC and continue for five weeks.

Oct. 12—Movement, fostered largely by broadcasters, to set up in radio noncommercial organization comparable to Academy of Motion Picture Arts and Sciences started in New York and Hollywood. Plan is to establish system of official awards of merit comparable to "Oscar" awards in motion picture field.

Oct. 13—President Roosevelt strikes back at Petrillo's refusal to comply with NWLB back-to-work directive in recording strike. Petrillo subsequently rejected plea.

Oct. 14—President Roosevelt makes personal appeal to Petrillo to comply with NWLB back-to-work directive in recording strike. Petrillo subsequently rejected plea.

Oct. 15—Muzak, headed by William B. Benton, chairman of Encyclopedia Britannica and vice-president of U. of Chicago, proposes "subscription radio" service on three FM channels in FCC allocation hearing. Service would be provided at about 5 cents per day with only subscribers, who would rent receivers, getting three-plex program service. Other receivers would pick up heterodyne or "pig squeal" on channels on which subscription radio would be broadcast.

Oct. 16—President Roosevelt reaffirms belief radio can be effective (Continued on Page 32)
Now as a new and, we hope, happier year begins, WOR would like
to look back, cogitate a bit, review, in brief,
some things important which have made WOR
that power-full station.

Come then and do a little
remembering with us, as we scan the pages of some
publications which dramatically mirror the progress
of a great station during one of the most colorful
decades in its history . . .

1935-1945
1935

"It's a Small World" tumbles off the press in thousand lots. It's a gay, insouciant piece, but not all sugar. Cleverly entwined with its humor is the story of WOR's scientifically directed and penetrating 50,000 watt coverage of 7 great states. It told the story of WOR's night and day coverage, too; of Crossley's illuminating analysis of 50,000 letters received from listeners in 213 counties and 13 states.

1936

"To Market, To Market" strikes a new and colorful note in radio promotion. In light verse and laugh-provoking prose, it presented 12 powerful examples of sales jobs done by WOR for grateful sponsors. Written today, the book would run Bible-size, for packed into WOR's files are more than 100 heart-lifting success stories; perhaps the most complete collection of success stories ever gathered by any station in the United States.
We look at our market and so does the continent. “Of These We Sing” breaks a new frontier in the compact and intelligent presentation of once dry as dust statistics. We count our homes with radios and find 3,961,884. Today, that total registers the more impressive number of 4,683,590. We discover that food sales in the WOR area equal 22% of the nation’s total; drug sales 17% of the nation’s sales. It was an impressive thing. The story is twice as compelling today.

H-mm-m, what’s this story behind the use or non-use of radio by department stores? Conjecture and isolated cases are rife and ready, but nobody’s really made a study of the thing. WOR immediately details a man from its staff to visit 14 great cities.

He returns months later with a voluminous and exacting report.

Writers boil it down and from the mass of material comes the entertaining, authoritative, enlightening booklet, “How Department Stores Use Radio to Sell.” It was a typical bit of WOR pioneering.
Of course we carried more food advertising than any major station on the Eastern Seaboard. Still do, as a matter of fact. But what did we know about the food market? Well, sir... Well, we found we didn’t know as much as we might. So WOR pioneered again. It had independent analysts visit grocery dealers, wholesalers, super-markets. It found the wholesalers advising their manufacturers, “Pick WOR first to sell your goods.” 60% picked radio above all other media; only 14% chose newspapers. It was a good story. It still is.

1940

How effective is the spot announcement? The 5-minute period? What makes the most successful small time periods tick? WOR studied commercial construction, visited agencies and sponsors and then sat down and tapped out two books that have long been informing, authoritative, economical guides for agencies and advertisers throughout the United States. They are—“Big Sales in Small Packages,” and “Speaking of Spots.”
Japan was still carting scrap out of Eastern ports. The America Firsters were talking very loud. But the rumble of industry in WOR's 16 great war-work cities was even louder. How did war workers listen? What were their favorite listening times and stations? WOR hired private investigators, had them visit cities like Dover, Bridgeport, Bethlehem and talk with workers, foremen, restaurant owners, grocers, cab-drivers. Out of this came "A Tale of 4 Cities," the story of WOR's great leadership as an all-night favorite. It's still the favorite.

Another great event in a year packed with them. The "WOR Continuing Study of Radio Listening" is launched. Planned by WOR and conducted from month to month by Crossley, Inc., it was the first local continuing personal interview study of radio listeners' likes and dislikes ever attempted by any station anywhere. It took most of the guesswork out of radio ratings, covered that 60% of the New York population never sampled by telephone interviewers, answered hitherto unanswered questions regarding listeners' sexes, sizes of families, earning power, nationalities. It still does.
1942

FM is young. Conjecture's wide regarding the kinds of listeners it attracts, the programs they like, the hours they listen. WOR looks vainly for an authoritative answer, finds none. So WOR called in Paul W. Stewart & Associates and had them begin the first personal interview study of FM listeners ever attempted by any station anywhere. It was done for the industry and for WOR's FM station W71NY, now WBAM. Frankly it showed WOR's FM station as the station listened to most by all kinds of people in all kinds of homes. Industrywise, it substituted fact for fancy, served as a nationwide blueprint for FM engineers, station managers, prospective sponsors.

1943

The OPA smacks down tight. Gas is as scarce as a used tire. Vacations are few, if any, and the trend is to the backyard for fun and relaxation. Summer has changed! But how much? WOR industriously pokes into numerous sources, checks buying, vacation and other trends, comes out with a book that was a time and money-saving guide for hundreds, of present and prospective WOR sponsors and their agencies.
Gosh, we’ve grown! But how much? From a staff of about 165 people in 1935, to more than 300 in 1944. And as we’ve grown, the folks find it a little harder to know what’s going on everywhere around WOR. So we plan a little station history and guidebook. It orients the new arrival, brings the veteran up-to-date; and, in the process, it sells WOR’s great story to hundreds of agencies and advertisers and stations throughout the United States.

Radio Highlights of 1944

(Continued from page 24)

in a democracy only “if it is free of all arbitrary restrictions, whether Governmental or private.”

Oct. 29—Morrie Pierce, vice-president of WJR Detroit, WAGA Cleveland, KMPF Hollywood, now as chief engineer for Psychological Wartime Radio, for American Broadcasters for American capture of Radio Luxembourg, marking his second conquest of the war. In September he ingeniously planned the radio operation which brought about surrender of the Italian fleet.

Nov. 2—FCC concludes five week battle for Petrillos on “dollar hungry” in 10 point indictment published in The Progressive—La Follette weekly.

Nov. 7—Greatest audience in history hears presidential election returns which swept Franklin D. Roosevelt into his fourth term. C. B. Superbowl draws 45.0% on NBC and 50.3% for the hours from 7:10 to 7:30 p.m. compared with previous hour. NBC total of 252 in city, NBC on D-Day 1859 vs 45.0% on Pearl Harbor Day, Dec. 7, 1941.

Nov. 11—RCA and Columbia Records capitolate to Petrillos demands to terminate recording strike and accept under virtual duress provisions for payment of royalties and a new agreement of $4,000,000. Petrillos will conduct strike from time to time and announce new dates.

Nov. 16—CBS Washington counsel, Government official and public director of the Democratic National Committee, nominates by President Roosevelt to succeed Petrillo as FCC chairman. When Congress adjourns Dec. 19 without considering nomination, President Roosevelt gave Porter recess appointment as chairman and he took office Dec. 21.

Nov. 29—Robert E. Frer, Federal Trade Commission chairman, praises radio advertising in New York address but stresses necessity for truth in advertising and for full disclosures on air.

Nov. 24—WWJ Detroit bans all transmitted announcements effective Feb. 1 and stops up industry-wide controversy. Other stations follow.

Nov. 24—National Labor Relations Board smashes Petrillo plans to force hiring of platter-turners at stations giving NABET jurisdiction in all areas save Chicago; strike threat immediately looms as Petrillo again defies Board.

Nov. 28—House probe of FCC closed to public. John J. Sirica, general counsel of the Committee, denouncing the Committee's action, resigns in open session.

Dec. 1—Robert D. Swezey, general counsel of the Blue, named vice-president and assistant general manager of Mutual by its new president, Edgar Kobak. Phillips Carlin, former program vice-president of the Blue, moves to Mutual in similar position.

Dec. 4—WJZ New York follows WWJ move against transcriptions, bans chainbreak from 8 to 10 p.m., permitting only time signals.

Dec. 4—Senate Interstate Commerce Committee unanimously reports out bill (S-1567) by Sen. Vandenburg (Rep. Mich.) prohibiting AFM's Petrillo from interfering with the broadcasting of non-commercial cultural programs by educational institutions.

Dec. 11—James C. Petrillo reported threatening to defy NLRB decision of Nov. 24 awarding jurisdiction over platter turning at all but Chicago stations to the National Asso. of Broadcast Engineers and Technicians. Blue—NBC, as result, face double strike threat—by Petrillo's union on one side if its demands are not satisfied, by NABET on the other side if NLRB decision is not accepted.

Dec. 11—Lt. Noren E. Kersta, USMC, former manager of the NBC television department, calls upon video inputs to get together on compromise plan which will speed development of art. Plan he proposes in exclusive BROADCASTING story draws attention of NBC—CBS video policy makers.

Dec. 11—J. Harold Ryan, NAB president, calls upon radio to employ its ingenuity in getting over the war's 25th anniversary beginning on Jan. 1, 1945; issues special musical theme, projecting motif of "V for Victory" and symbolic banner to be employed by stations in promoting observance.

Dec. 12—FCC adopts sponsor identity rule, interpreting provision of Sec. 317 of the Communications Act of 1934, with amendments.

Dec. 15—Six major stations join Blue Nacional and American�om of them switching affiliation from CBS and MBS, Six are KNRT Des Moines, WNAX Yankton, WCPX Boston, all properties of Cowles Broadcasting Co.; WPTL Miami of the Fort Industry Co.; Wordial Jacksonville and WLAW Lawrence. Switch seen as presaging network scramble for new affiliates. Contracts signed Dec. 15, first date permitting such negotiations under FCC rules put into effect June 15, 1943.

Dec. 15—Broadcast Measurement Bureau meets to approve charter. Dec. 18—Roosevelt into his 5th term.

Dec. 21—Paul A. Porter, sworn in as chairman of FCC after recess appointment by President Roosevelt; renomination to fill the vacancy created by resignation of James Lawrence Flye to come when new Congress convenes Jan. 3.

Dec. 25—FCC denies request of NBC and Cowles Broadcasting Co. seeking relief from amendments to the network regulations, upheld the NABET decision in the prior action May 10, 1943.

Dec. 26—J. Leonard Reinsch, man-

TIDE WATERS SIGNS BASKETBALL SPOTS

ANOTHER season of basketball sportscasts on the Pacific Coast will be sponsored by the Tide Water Oil Co. according to an announcement by Harold R. Deal, the company's advertising and public relations manager, after the decision to sponsor approximately 60 contests already have been scheduled.

In the Pacific Northwest the team covered by the Tide Water Oil Co. at U. of Washington, Washington State College, U. of Idaho, U. of Oregon, and Oregon State College. A special program in Portland has been arranged by Tide Water Oil Co. with the Oregonian—Portland Tribune as regional sponsors.

Sportscaster for the season will be Don Wike, Ted Bell, Hal Bever, Art Allen, and Jack MacDonald and Frank Bure.

In an expansion of its original plans to sponsor collegiate basketball games, [BROADCASTING, Dec. 4] the company is now sponsoring the contests on WNBC and WTOP simulaneously.

Dec. 27 to 29, including the college tournaments during the final two weeks. Don Dunphy handles the coverage.

Move to Sunbury

HEADQUARTERS of the Westinghouse Electric & Mfg. Co. radio receiver division, located in Baltimore since its establishment six months ago, will move to Sunbury late this month to permanent quarters at Sunbury, Pa. Postwar production of home receivers will be centered at the Sunbury plant and plans had been made to move the administrative offices there as soon as possible to avoid interference with war production. Plans are also ready for reconversion to civilian production to be held until after the war.
Clear and Strong

A radio station's effectiveness starts with the power to be heard — in the right places. WAGA's 5,000 watts on 590 kilocycles assures dependable coverage of a market which, according to our latest figures, accounts for 41% of Georgia's population — 49% of its radio homes and 49.5% of its retail sales.

Add to the power to be heard the appeal of something worth hearing and a tested plan for stimulating the desire to listen and you have the formula through which WAGA has become one of the South's most successful stations.

Refusal to Bargain With IBEW Union
Explained by W. H. Goan, WAYS Head

EDITORS BROADCASTING:
We note in the Dec. 11 issue of your magazine an article relating to a case now pending before the National Labor Relations Board involving our company and International Brotherhood of Electrical Workers. This article is so written as to do our company an injustice.

Your headline over the article is as follows: "Employee Shifting Is Adjudged Unfair". Now the truth is that there has been no finding whatever in the case to such effect.

Some months ago, the IBEW was certified by the NLRB as representative of our employees at our transmitter. Thereafter, for perfectly legitimate business reasons, which we explained at the Board hearing to which your article refers, we did make certain changes in the personnel at our transmitter. But the Union has not at any time claimed, nor has the NLRB or any of its representatives at any time made any finding, that these changes constituted unfair labor practices on our part.

The only claim against our company and the only finding against our company is that we have declined to engage in collective bargaining with the IBEW as representative of the employees at our transmitter. This we admit. Our explanation for refusing to bargain with this Union as representative of the employees is that our transmitter employees, by themselves, do not constitute, under the National Labor Relations Act, an appropriate bargaining unit. We take the position that we should not bargain with the IBEW unless and until it establishes that it represents the employees both at our transmitter and at our studio.

We do make the further contention that we should not even be required to bargain with this union as representative of our transmitter employees—a majority of our transmitter employees having testified under oath at the board hearing that they are not now members of the union and do not desire to be represented by the union in any way and that this present position on their part has not been caused or influenced by any act or omission whatever on our part.

Under these facts, we believe you will agree that the article appearing in your magazine does not present an accurate or fair picture of this matter, and we will appreciate your doing whatever you can to rectify this situation.

W. H. GOAN
General Manager, WAYS

Editor's note: The story referred to in the above letter from W. H. Goan, manager of WAYS Charlotte, N.C., was based on the report of an NLRB examiner and was so stated in Broadcasting. A request for oral arguments before the full Board in Washington has since been filed by the station but has not yet been acted upon by the Board.

Bendix Appointments
DISTRIBUTORS who will handle the forthcoming line of AM and FM radios and radio-phonograph combinations of Bendix Aviation Corp's Radio Division were announced last week by Leonard C. Truesdell, general sales manager for home radio of the Bendix Radio Division. Sampson Electric Co., 3201 S. Michigan Ave., Chicago, was appointed distributor for territory including Chicago, surrounding counties in Illinois and Indiana, and Illinois cities of Peoria, Aurora, Elgin, Rockford and Kankakee. Miller-Jackson Co., 111-13 E. California St., Oklahoma City was named Bendix distributor for Oklahoma and the Texas Panhandle area. Youngstown Equipment Co., 1111 Bank Street, Boston, has been named distributor for eastern Massachusetts, New Hampshire and Maine. E. B. Latham Co., 1010 Broad St., Newark, will handle Bendix Radio division products in northern New Jersey, while Gray Bar Electric Co. will handle southern California distribution from its Los Angeles office.

Leyte Station Operates
FIRST DIRECT voice transmission from Press Wireless' newly established 400-watt station at Leyte to the United States for network use, occurred Dec. 28, at 8 a.m. when CBS brought in William J. Dunn from Gen. MacArthur's headquarters via Leyte into operation first Nov. 14 with direct radio-telegraph transmission. Head engineer is George Luckey. Procedure is to transmit the material to Press Wireless terminals in Los Angeles for rebroadcast by the networks across the country.
Charles Barbe, KGW news analyst, was foreign correspondent in Berlin, Rome, Bern and London. He took the picture of General Goering at the Arc de Triomphe, the day the Germans took over Paris... Below, James Abbe, KGW and NBC network commentator, renowned world-traveler and ex-press-photographer. At Moscow University in 1932, he posed briefly with the Anthropological Museum's world-famous collection of skulls.

**GEORGE BERNARD NOBLE CHAIRMAN...12th REGIONAL WAR LABOR BOARD SAYS...** "A well-informed public opinion was never more vital than now. Analysis and comment by men who have seen the trouble-spots of the world with their own eyes—who have talked as well to the "little people" of Europe—is exceedingly valuable because such men can make us understand what is ahead of us. For the future peace of the world we need plenty of understanding. Airing intelligent commentary is one of the biggest public services a radio station can give."

* C. E. HOOPER REPORT, CINCINNATI
MAY THROUGH SEPTEMBER, 1944
Toward Victory

FOR WELL over a decade it has been Broadcasting's custom to issue a New Year forecast, looking into the approaching 12 months and reviewing the period just ended. Every year the roundup has shown an upward trend both in business volume and quality of service.

The most stubborn barrier to a broadcasting boom has been the basic fact that no day can have more than 24 hours. Yet even with radio hovering near the sellout point for several years the total income has continued steadily upward. The year just ended has been no exception.

With the increased income has come increased outgo due to higher operating costs. Even so, the number of stations in financial distress has dropped every year.

Natural result of this satisfactory business trend has been improved broadcasting service. The closing weeks of 1942 brought the matter of public service dominating the thinking of executives and staff personnel. Such a trend is healthy, though the means of achieving the goal may involve debate and disagreement.

What could be healthier than a controversy over the method to be used in ridding the air of offensive and overly bizarre spot announcements, or the inter-industry discussions that preceded establishment of the Broadcast Measurement Bureau.

While the industry has been striving to improve its service to the public it has continued to develop the all-important technique of furthering the war effort. A check of the Federal agencies involved shows how radio has moved ever forward in its contribution to the cause of freedom.

The business survey starting on page 13 portends a healthy business year. But each entity in the broadcasting field must take full advantage of this trend to devote all possible energy to public service. For only by this means can broadcasting command the respect that makes possible its forward movement.

Ten to One

IN THE LAST issue of Broadcasting (page 18) we reported that the NAM plans to place commercial announcements on radio stations, coordinating the broadcast program with the newspaper campaign, had hit a snag—the NAB Code's "controversial issue" clause.

Broadcasting quoted an announcement alleged to have been submitted to NAB for its consideration in the light of the Code's provisions. We reported, as the facts were presented to us, that this commercial was looked upon with disfavor at NAB and that, although officials there had made no formal suggestions regarding the copy, they weren't likely to give it their blessing.

All of this was quite in order, except that the commercial presented to Broadcasting and the one submitted to NAB for review were not one and the same. It develops that the one reprinted in Broadcasting was not objectionable, but the one originally proposed certainly was.

Well, probably all of this sounds like a Robin Hood's barn excursion, but it does bring one to the ultimate conclusion that what NAM intends to say over radio is not half so controversial, from the broadcaster's viewpoint, as the schedule established for saying it.

NAB proposes to spend $1,000,000 in newspapers forwarding the Association's aims for America. It has earmarked $100,000 for radio. The ratio is 10 for the press to 1 for radio. In 1945—we won't even guess at 1944 figures—radio's total income was about one-half the income of newspapers. However, in national advertising radio bettered newspapers by about $30,000,000.

If NAM is handing out $100,000 to radio as patronage money, there's no better way to demonstrate it than by the lopsided favoritism shown the press. If NAM wants to use radio effectively, it might tear a sheet from the books of those national advertisers who find it profitable to invest over $200,000,000 annually in the medium.

Perhaps the National Assn. of Manufacturers should restudy its advertising budget.

FREE & PETERS, National Representatives
Vinsonhaler to KGHI; Judge to Direct KLRA

AFTER 17 years as manager of KLRA Little Rock, Sheldon C. Vinsonhaler has resigned as of Jan. 1 to become manager and partner in KGHI in the same city. He joins his former associate, A. L. Chilton, in the KGHI ownership, and with Mrs. Chilton will constitute the three-man partnership.

Simultaneously, the Arkansas Gazette announced the appointment of Roy Judge, associated with a Little Rock accounting firm, as KLRA manager. KLRA was sold to the Gazette by Mr. Chilton last June for approximately $275,000. The sale grew out of the FCC's duopoly regulation by virtue of Mr. Chilton's control of the two stations.

Our Respects to

(Continued from page 38)

president) put its new station WITH on the air with 250 w power on 1200 kc. The frequency since has been changed to 1230 kc.

Tom Tinsley did the new station what few have accomplished. He had money the first month of operation and WITH has been in the black ever since. In September 1941 he returned to Philadelphia to marry Miss McCord.

Tom Tinsley credits the success of his station to the fact that WITH carries what he calls "well-balanced" programs. He knows the younger generation goes for jive and they get it. Long ago he recognized that middle-aged dwell in pleasant memories around such ballads as "The World Is Waiting for the Sunrise," that another group likes symphony.

News for All

His station features straight news for those who want bare facts; commentaries by Ian Ross MacFarlane for listeners who like interpretative news; sports of all sorts by Bill Dyer, and so on. To quote President Tinsley: "We cater to every age group." And that 24-hour operation is profitable, too.

Tom's pet hobby is winners. His latest is a miniature Schnauzer, Genghis Khan of Maryland, called Skippy for short. Ten days after Tom presented the dog to his wife, Skippy walked away with six ribbons in a Washington show.

Broadcasters and agency folk alike are talking about another of Tom Tinsley's smart moves—his acquisition by 10-year lease of WBL Richmond, Va., from Grace Covenant Presbyterian Church, granted Dec. 19 by the FCC. He plans to use facilities relinquished by WFID Petersburg, Va. [Broadcasting, Dec. 12]. He has undertaken in conjunction with Jansky & Bailey, Washington engineers, with FCC approval, to ascertain the

Vagaries in the FM band [Broadcasting, Nov. 13].

If, by chance, you're a cross-word puzzle addict, perhaps Tom Tinsley can give you a hand. He spent weekends poring over a cross-word puzzle dictionary, looking for a four-letter word beginning with W. The only one he could find seemed already, "with." That word became the call letters of his Baltimore station.
QUESTION:
What Wisconsin Radio Audience Has Proved Itself Discriminating, Receptive and Eager to Try Better Things?

ANSWER:
The WMFM Radio Audience!

EXPLANATION:
The loyal family of WMFM listeners turns to FM and WMFM because they prefer its schedule of distinctive, quality programs keyed to the wants and needs of its audience.

Wisconsin listeners stay tuned to WMFM because they are anxious to avail themselves of better things. They do not represent any group or class. They are a cross-section of the state, but they are discriminating.

If such people would be attracted to your products (and if it is a good product they will be) then you belong on WMFM.

We repeat. If your product appeals to discriminating people, you belong on WMFM.
JOHNNY COX, released from the Army, has been named to handle promotion and publicity for KFOR Lincoln, Neb. by W. RICHARD TUCK, chief announcer at KFOR, who resigned.

NADINE AMOS, manager of Blue Hollywood general service department, last saw NADINE AMOS, manager of Blue Network, who resigned from his job. She has been transferred to the Blue Network in Hollywood.

Over at KFPA Helena, Ark., joining the station as program director Oct. 1st is JIM MARLATT, who has been on the air for two years at WSBD Tulsa, has returned to the staff for the holiday season.

NADINE AMOS, manager of Blue Hollywood general service department, and prior to that secretary to DON GILMAN, former network vice-president, has resigned. Miss Amos had been associated with NBC and Blue Networks for 10 years.

JOHNNY COX, released from the Army, has been named to handle promotion and publicity for KFOR Lincoln, Neb. by W. RICHARD TUCK, chief announcer at KFOR, who resigned.

ROBERT ALLAN, former announcer and the creator of WYF Oklahoma City, has joined the Blue Network central division as newsreader, replacing JANET FOMEY, who resigned.

JIM TRAUTWEIN, an undergraduate at the UI of Michigan who has been a substitute announcer for two years at WGBP Toledo, has returned to the staff for the holiday season.

MARTHA HENRIQUEZ, has been named promotion manager of WIOD Miami, replacing FRANK MALLANDIS, who resigned because of poor health.

MARLENE ALPER, daughter of MIKE ALPER, who is the manager of Blue Hollywood general service department, has been promoted to the position of assistant program director at KFPA Helena, Ark., where she will be in charge of the station's programming.

ROBERT C. KAPPAS, former writer, actor and producer with WLW Cincinnati, is now producing shows and editing the camp newspaper for the Army somewhere in Italy.

DICK ALLEN and JOHN BOYER have joined KTRH Modesto, Calif. as announcers.

ELIO JEFFORDS, of the sales promotion staff of KWW Philadelphia, has resigned to join the American Red Cross for foreign duty. She is replaced by MARY WHITAKER.

HAL HALLER, writer and commentator of KMTR Hollywood, is the father of a girl.

Hicks, Cassidy Escape Death in German Attack

GEORGE HICKS, Blue Network correspondent in the European Theatre, in a broadcast Dec. 24, told how he and other newsmen, including James Cassidy, NBC, narrowly escaped death when the front wall of a house was blown in on a highway leading to the front. Four men, whose identity he did not give, were killed in the disaster, the result of strafing by German fighter bombers.

Mr. Hicks said, "I received only the tiniest cut on the left cheek and a scratch on the back of the left hand." Occupants of the house were knocked down. A piece of debris fell across the back of Mr. Cassidy. NBC said last week that Mr. Cassidy apparently had not been seriously injured and had not missed a broadcast.

DIRECTORS GUILD A S K S TO B A R G A I N

RADIO Directors Guild, New York, which last May announced its decision to change from the status of a society to a labor union, has notified CBS, NBC, Blue and Mutual that it is now the collective bargaining agent for the majority of executives of Blue Network, and has asked that a time and place be set for the start of negotiations. Declaration was contained in a letter to the networks. Conferences are expected to begin after the first of the year.

Contract to be submitted to the networks is based on a year's expiration of the entire director field, with individual members contributing data on current abuses and suggestions for improvement. Withholding details of the contract for the present, Jerry Devine, RDG president, said that it included demands noted minimum wage scale, a specified work week and general elevation of work standards.

For the present, negotiations will concern the New York group only, exclusive of the Hollywood branch. The eastern branch has attained a majority representation of nearly 96% at NBC, Blue and CBS, with a lesser proportion at Mutual, and prefers not to dissipate the majority required by the War Labor Board by spreading over a wider field now, Mr. Devine said. With the addition of six new members the preceding week, the New York group has about 125 members, and the Hollywood unit 34 members, he said.

NBC Recording Division Innovates Musical Series

NBC Radio Recording Division has announced Music of Manhattan, produced within the division, as the first of a series of innovations planned for the Thesaurus Library Program Service. Series, to be started as two quarter-hours a week, was built in accordance with requests from stations for a good popular musical series of material not available on phonograph records or otherwise, according to C. Lloyd Egner, NBC vice-president in charge of recording.

Mr. Egner said last week that the division's recording facilities will be greatly expanded in the near future and that a processing plant for making plates will be set up at NBC so that this work will not have to be sent to Camden as it is at present.

Paul Allison

PAUL ALLISON, 41, announcer of KMPC Hollywood, died Dec. 21 following a brief illness. Surviving besides his widow is a son in Army Air Corps.

MISREPRESENTATION in radio and other advertising of a book Per- fect Sight Without Glasses is charged in a complaint issued last week against Emil A. Bates, New York, by the Federal Trade Commission. According to complaint, it is not possible to obtain perfect sight or improve sight by following the courses in the book.

HAS A LOT TO

LISTEN: to the lullaby of Sardi's

Those six hundred radio editors who registered their opinions with the Motion Picture Daily: credit them with reminding us to bring up this Sardi story again.

As you probably know by now, they picked Sardi's as the best of all daytime programs.* Better than soap operas, commentators, variety shows, or anything else that comes to housewives while their hubbies work away at the office.

Not only radio editors, but people out in Iowa, where the tall corn grows, Dr. F. L. Whan asks the natives what programs they like well enough to try to hear regularly. Sardi's pulled more women's votes than any other variety show—day or night.

Hooper as you know says Sardi's is Number 1 among the first ten daytime programs. CAB ranks the Kellogg portion at the top of the first ten daytime programs in those sixty-eight cities that Mr. CAB keeps an eye on, and where a substantial portion of U. S. income-earners spend their money.

There isn't room here to go into all the mounting evidences of Sardi's leadership: the Crosley, the Cleveland Plain Dealer poll, and a few others.

But the important thing is that Sardi's is no sudden flash in the pan. It has long been a cornerstone upon which the Blue has built itself into the outstanding morning network from Coast to Coast. The Blue leads more quarter hours, 9 to noon, than all other networks combined. There's not a wiser buy in all of radio. There is no better proof needed that THE BLUE CAN DO IT.

*They picked The Breakfast Club at No. 2. That gives Blue two out of the first three.

LISTEN: to what 600 wonderful radio editors have to say

That Motion Picture Daily radio poll again: We think it is important because it shows up the Blue as the only network that's moving forward in the who's-and-what's-good-to-listen-to department.

As you know, they only made 26 awards this year. Last year they made 33.

This year we find ourselves with six firsts.

Not a tremendous figure but the Blue is the only network in the whole kit and caboodle that made any gains at all! Another thing: we think we have a right to be proud of the people that were picked.

Take George Hicks, for example. For a long time he was on the staff handling varied assignments, getting better all the time, awaiting the big opportunity. Along comes the war, so out he goes and the first crack out of the box, he makes the most sensational strike in the business.

And Tom Breneman, another winner, out on the Coast, running "Breakfast at Sardi's." We put our chips on him a long time ago. Paid, too.

Milton Cross has been a part of the Blue so long that he is practically Blue's own voice on the air.

And Alan Young: in him we think we have radio's next Number 1 comic. He's new, fresh—and good.

And we are proud, too, of Swing (who has a lot of other awards tucked away in his cedar chest) and Lombardo. They're both stalwarts on the Blue.

Yes, we're glad to get those awards. We ought to be. But what makes us happiest about it is the fact that here is further evidence that the Blue is going places.

The youngest, most virile of all the networks is off to the races.

Sponsors with franchises on the Blue can well afford to have a very Merry Christmas.

...The BLUE is doing it...proving that only a switch of the dial
TALK ABOUT

LISTEN: to what is happening to the BLUE on Sunday night

We pointed out a few weeks ago that while Kate Smith and Jack Benny were floating through the ether on a raft of promotional dollars, each determined to corner the 7 P. M. Sunday night audience, our man Drew Pearson (without promotion) was doing very well in the slot opposite both of them.

Well, for your information, our man Pearson is still doing well. He and Benny now share an overwhelming chunk of the 7-7:15 Sunday night audience.

Now comes another demonstration of the Blue's capacity to deliver: The Hall of Fame (in the hour preceding Kate Smith) in Hooper's last published report has the same rating that Kate has.

Blue's 6-7 P. M. slot comes up with 7.5.

Kate Smith, in the CBS slot from 7-8, also comes out with 7.5.

A lot of other interesting things are happening on Sunday night for example, keep an eye on Bill Bendix. He came on a few months ago in a comedy strip called "The Life of Riley." Came on opposite a couple of long-established audience getters. But little by little "Riley" is climbing.

Then take Joe E. Brown "Stop or Go." That, too, is making headway fast, in spite of powerful opposition.

All this proves once again how little real difference there is between the three major networks.

Yet one of the most important differences, of course, is the cost. The price tag on the Blue, for a nighttime half-hour, amounts to $3,474.00 less than the cost of the same time on CBS. That comes to a lot over a 52-week period. Figure it out. Then figure all the things you could do with the difference to help sell more goods when the keen competitive era comes.

That is something else for the Blue to talk about.

LISTEN: to what's happened to the major networks in the daytime*

Just to get a line on trends, we went back and picked up Mr. Hooper's reports covering the last ten months. We compared them with reports covering the same periods in 1943.

What this quick little test shows, you will be interested to know, is that the Blue is the only one of the three major networks whose daytime ratings are on the up-grade.

Looking at all programs, sustaining and commercial, from 9 A. M. to 6 P. M.

Blue's ratings are up 16%

NBC's ratings are down 4%

CBS's ratings are down 7%.

Now: that morning lead that the Blue has had all this time; it isn't shrinking, it is lengthening.

The Blue is getting stronger in the morning—and it's the only one of the three that can make this statement.

Blue's morning ratings are up 30%

NBC's morning ratings are down 14%

CBS's morning ratings are down 8%.

These figures indicate a trend—they are a potent hint to the wise timebuyer, a gentle nudge to the thoughtful advertiser.

Now about the nighttime situation: Frankly our competitors could say we were not able to tell a glowing story—and that's true but, little by little, we are getting our foot in the door after the sun goes down. We've got some pretty good ratings—and a lot that are improving. Yes, there's a lot of work yet to do. That's why we are working overtime with our advertisers and their agencies to get their help in improving programs, in bringing new ideas to nighttime on the Blue.

We have a lot of hope for our future, and figures like those above prove that the job can be done. After all, not so very long ago we were faced with the same daytime problem as we now have at night. We licked it by working on it. We licked it by getting the cooperation of everyone concerned. They all pitched in—and now look! So keep an eye on the Blue at night.

*With a thought to the night.

again and again separates the 3 great Networks...
ASK THE NEIGHBORS WHY- KENF
“The Friendly Farmer Station”
SHENANDOAH - IOWA

Was Selected by 189 Local & Regional ADVERTISERS

To carry a message, during November 1944, to the great FARM MARKET AROUND SHENANDOAH

A demonstration of dominance—within KENF’s own primary—which clearly points the way for all sponsors who desire to reach this tremendously rich rural and semi- rural area.

KENF anticipates trends—accords each account the courtesy of personal attention—builds each program to serve specific needs. We believe this explains why, for the farm market around Shenandoah . . .

INFORMED SPONSORS ARE BUYING KENF

1000 Watts “The Friendly Farmer Station” 920 KC.

For availabilities write or wire direct to Frank Stubbs, Mgr., KENF Inc., Shenandoah, Iowa.

Esso Promotes Miller

J. A. MILLER, formerly advertising-sales promotion manager of Esso Markets of New Jersey, has been ap- pointed coordinator of all advertising and sales promotion activities of Standard Oil Co. of N. J., the holding company, and its affiliates, a new post. Mr. Miller is succeed- ed at Esso Markets by R. M. Gray, assistant advertising-sales promotion manager, since 1942, who joined Esso in 1934 and was placed in charge of media in 1936.

Mr. Miller

AD SURVEY SHOWS CONSUMER CHOICES

MOST popular advertising copy is that which tells the consumer how to conserve and get the most use out of one’s equipment, clothes, etc., according to a survey just completed by the Committee on Consumer Relations in Advertising Inc., New York. Of the first 817 questionnaires returned, 95% favored the conservation theme in advertising.

Copy which explains rationing or other Government regulations was next in popularity, receiving 90% approval, with advertising showing that nutritious meals and stretch scarce foods running a close third with 89% signify- ing approval. Advertising for products that (1) prevents the war effort by encouraging bond purchases, salvages of scarce materials, etc.; (2) promises wider distribution of products at lower cost; (3) features peace, freedom and security in the post- war world; and (4) that informed the consumer of availability of booklets giving product or other information which could be obtained by writing the advertiser received respectively 88%, 77%, 74% and 71% approval.

The advertising theme which received the greatest disapproval was that urging immediate post- war relaxation of Government controls over materials and prices, with 98% of the replies indicating dislike for this type of advertising copy. Advertising featuring products which produced changes so dif- ferent from prewar models that they probably will not be produced for several years after the war received more negative than pos- itive votes as did advertising promising prosperity and jobs in the postwar period.

GE Buys Ken-Rad Tube Plants; Acquires Others PURCHASE by General Electric Co. of the radio tube manufacturing and plant facilities of the Ken- Rad Tube & Lamp Corp., at Owens- boro, Ky., Huntington and Rock Port, Ind., and the operation of Government-owned plants at Tell City, Ind., and Bowling Green Ky., whereas it has been making tubes for the Government, was an- nounced last week by Dr. W. R. G. Baker, GE vice-president in charge of electronics depart- ment. GE takes over on Jan. 2

George W. Nevin, manager of the GE tube division, disclosed that Carl J. Hollatz, executive vice- president of Ken-Rad, will manage the new GE operation, to be known as the Ken-Rad division, electronics department of GE. Mr. Hollatz has been with Ken-Rad since 1918. With acquisition of the receiving tube manufacturing plants, GE will be prepared to enter all phases of radio in the postwar era. Ken-Rad retains its electric lamp manufactur- ing business.
In meeting the challenge of the future, Western Electric equipment leads the way

War's end will bring a challenge to everyone. To those identified with communications and transportation, faster, better interchange of ideas and goods will be the order of the day.

We at Western Electric—with our 75-years heritage of leadership in communications equipment—believe we are peculiarly qualified to accept this challenge.

In world-wide telephony, broadcasting, aviation, marine and mobile radio—in every field where sound-transmission apparatus plays a part—Western Electric has led and will continue to lead the way. In these fields as well as in television, Western Electric will play a dominant part in the future.

To speed Victory, buy more War Bonds—and keep them!

Western Electric
ARSENAL OF COMMUNICATIONS EQUIPMENT
ALFRED G. KEEHAN, formerly a vice-president, general sales manager and advertising manager of the newly created H. Lee Co., Danbury, Conn. (hat firm), has joined Bermingham, Cattelman & Pierce, New York, as vice-president in charge of new business, a new position. For the past two years Mr. Keehan has been with the Quadra-Matic General Office in Washington.

MIRIAM ORR, former assistant traffic director of WJW Cleveland, joined the research department of Rothfus & Ryan, Chicago, Dec. 28.

STU DAWSON, radio director of Young & Rubicam, Chicago, is leaving for the West Coast effective the 1st week in January to take over the General Electric program.

JERRY LAW, former radio director of Hinrichs-Garfield, New York, has joined J. R. Kuplick Adv. Agency, New York, as radio director, a new position. Dorothy Kent, formerly on the advertising staff of Beacon Dept. Stores, New York, has also joined the firm as copy chief, another new position.

JOHN SURREY Ltd., New York, pipe and tobacco manufacturers, has appointed Stuart Bart, New York, to handle advertising. Radio will be used.

JOSEPH A. KLOSTER has been elected chairman of the executive board of the newly formed Advertising Agency Producers' Club of Philadelphia. Other officers include: William B. Turner, general manager; Thomas E. Roberts, treasurer, and Nicholas Caridi, secretary.

EUGENE I. HARRINGTON, vice-president in charge of client relations division of Coney & Belding, New York, has been appointed manager of the San Francisco office of the agency, replacing Robert K. Kerns, who will continue as vice-president, servicing the Southern Pacific account.

BEN ROE, chief timebuyer of MacFarland, Avery & Co., New York, is recovering from an appendectomy he underwent Christmas Eve.

RUSSELL MITCHELLE, formerly with Lord & Thomas and on the copy staff of Maxon Inc., New York, has joined the copy and creative staff of Lawrence Fertig & Co., New York.

DON SEARS Adv. Agency announces the opening of office in San Francisco to operate in conjunction with offices maintaining the past three years in the hotel Claremont, Berkeley, Cal. Alfred L. Jensen has joined the agency in charge of the San Francisco office, to direct management in this area for General Amusement Corp.

IN THE FOOTSTEPS of his father, Arthur Pryor Jr., vice-president and radio director, BBDO, and son of the well-known band leader, took over the baton of Arthur Fielder to conduct a rehearsal of Sunday at 4:30, so Mr. Fielder could listen to the 45-piece orchestra from a remote section of the Boston Opera House. The symphony program is heard on WBZ-WJZA Boston-Springfield.

DARLE EBI, Hollywood producer of J. Walter Thompson Co., assigned to NBC Chase & Sanborn Show, has resigned to join Sherman & Marquette. He will be assigned to Judy Canova Show which starts on NBC Jan. 4 under sponsorship of Colgate-Palmolive-Feet Co.

WALTER MORGAN, with Rickard & Co., New York, 20 years as account executive and copywriter, has joined the creative staff of Fuller & Smith & Ross, New York. Ted Browne, formerly with W. W. Aver & Son as account executive, has joined the creative staff to develop special products promotion campaigns and presentation material.

MAJ. EDWARD BYRON, former head of the radio department of William Ely & Son, New York, and now chief of the Radio Branch, Army Service Forces Group, War Dept. Bureau of Public Relations, is the father of a boy.

STRAUCHEN & MCKIM Adv., has moved to 6 E. 4th St., Cincinnati 2, Ohio.

DUANE JONES NAMES R. T. SMITH MANAGER

RALPH T. SMITH, copy chief of Duane Jones Co., New York, has been elected general manager, a new post entailing chairmanship of the agency's newly created strategy board, supervision of all copy and coordination of the work of all account executives. Mr. Smith was elected unanimously by executives and department heads, who were asked to choose their own manager on the basis of their part in the expansion of the agency from 4 to 26 accounts in two and a half years.

Mr. Smith has been copy chief since the agency's inception, and has been associated with Duane Jones, agency head, for ten years at various agencies. With Blackett-Semple-Hummert from 1937 to 1940, Mr. Smith wrote copy for campaigns for Rabbitt Inc., American Home Products and Sterling Products Inc., subsequently joining Maxon Inc. as copy chief. In 1941 he joined forces with Mr. Jones as copy chief of the new agency.

The strategy board is composed of the agency's heads of departments and is based on Mr. Jones' plan to conduct agency operations on a teamwork basis. Board meets to consider treatment of specific problems that arise in advertising activities, particularly in those concerning special campaigns.

Francis Eugene Nixon

FRANCIS EUGENE NIXON, 62, former vice-president of the Federal Adv. Agency, New York, died of a heart attack in New York Dec. 21. Mr. Nixon, who retired from the agency in 1939, joined Federal when it was organized in 1908. Surviving are his widow, a son and a daughter.
You Can Buy This Amplifier TODAY

Under a recent ruling of the War Production Board radio station owners may buy up to $500.00 worth of new capital equipment, using their AA-1 MRO CMP-5 priority.

Here is a piece of equipment that will make a vast improvement in the quality of your instantaneous records. And it can be delivered to you promptly.

It is the Presto 88-A amplifier, designed especially for use with Presto 1-C and similar high fidelity cutting heads.

Maximum power output is 50 watts with 4% distortion, measured by the inter-modulation method. Feedback circuits maintain the output impedance essentially constant when driving a cutting head, thus reducing overall distortion. Three frequency response curves are available on a selector switch. (1) Flat response, 30 to 15,000 c.p.s. ± 1 db. (2) "NBC ORTHACOUSTIC" recording response. (3) World-AMP lateral recording response.

Designed for relay rack mounting; panel height 14”; input, 500 ohms; output, optional, 15 ohms or 500 ohms; gain, maximum, 85 db. Shipment 4 to 5 weeks after receipt of order placed with your electronic distributor.

Buy Bonds. Keep on Buying.
Keep 'Em Flying.

NBC Reports All-Time High
In Spot Sales; Net Up 12%

More Sponsored Newscasts, Women’s Programs;
Fewer Announcements; Seven New Affiliates

NET REVENUE of NBC increased approximately 12% during 1944 over the preceding year, Roy C. Witmer, vice-president in charge of
sales, disclosed in the network’s year-end report.

With a substantial increase in the number of commercial program periods using the full network, from 89 in 1943 to 111 in 1944, Mr.
Witmer reported, the average number
of stations per program rose from 78 to 90 for daytime shows, and from 102 to 112 for nighttime broadcasts.

All-Time High for Spots

More advertisers used the network’s facilities last year than in 1943, with a total of 80 different
sponsors on the air in 1944 as against 73 in the preceding 12 months. NBC concluded the old
year with an expanded network of 149 affiliates, seven more than last year.

The network’s spot sales department
reached an all-time high in sales volume, ending 1944 with 212 more revenue than in 1943,
according to James V. McConnell, manager. While all types of spot
business showed substantial increases, program sales were particularly strong, accounting for
nearly 50% of the total revenue increase. “The trend towards more
established program purchases will continue as companies lay their
plans for postwar activity,” he predicted. Only 24% of spot sales rev-
venue came from one-minute announce-
ments, compared to 28% in 1943.

Sponsored newscasts have gained
and revenue from women’s cooper-
ative programs increased from 4% in 1943 to 5%, “an indication that
this type of program is doing an
outstanding selling job for manufac-
turers of products appealing to
women.” In line with the general
trend, movie and theatre advertising
rose considerably in volume, and will continue to rise in 1945,
according to Mr. McConnell.

Cancellation of all commercial broadcasts on D-Day and, as the
result of favorable reaction to this
measure, similar action on election
night are singled out as 1944 high-
lights in management policy in the
report, which emphasizes through-
out ways in which NBC has served
the public interest, particularly in
bringing the war and its attendant
problems before the people.

In the TV field, 1944 witnessed
the major developments at NBC.
Network programs were made avail-
able to FM stations operated by
NBC affiliates, and in August
NBC’s FM station in New York
shifted from experimental to com-
mercial broadcasting under the call
letters WFAF-FM.

John F. Royal, vice-president in
charge of television, pointed to the
introduction of live studio features,
and regular arena sports events on
WNBT, NBC’s New York video
outlet, augmenting the film tele-
casts which predominated in 1943;
and to the fact that the station en-
ters the New Year with five spon-
sors, the number limited only by
restricted studio facilities. Video
highlights listed for the year were participation in FCC allocation
hearings Sept. 28-Nov. 2 by Presi-
dent Niles Trammell; regional net-
work operations with WRGB
WPTZ; and in election and convention
coverage.

Prevented by the AFM ban from
supplying instrumental music to
station and commercial clients
during the first 10 months of the year, Thesaurus division of NBC’s Ra-
dio-Recording Division nonetheless came out at the end of ’44 with
more subscribers than ever before
—238 as against 227 for 1943. Peace
time production of record
manufacturing alone in cooperation
with the RCA factories, more than
doubled in 1944 to meet the needs
of the armed services, according to
C. Lloyd Egner, vice-president in
charge of Radio-Recording.

Hitch-Hikes Abolished

Multiple product advertising by
hitch-hike and cow-catcher an-
nouncements was abolished during
1944, through cooperation between
NBC and its station’s planning and
advisory committee.

As a result of special stress on
individual station responsibility to-
wards public service broadcasting,
NBC programs of this type had
larger networks in 1944 than ever
before, according to a report on sta-
tion relations activities.
Hooper Rates 'Girl Marries' First For December Daytime Week-day Shows

TOP rating in the list of ten week-day programs in the C. E. Hooper Inc. report on national daytime programs for December was resumed by *When a Girl Marries*. Aunt Jenny made a spectacular rise to second place from obscurity of two previous lists in which the program failed to appear.

Day Audience Down

Life Can Be Beautiful, which moved back into the top ten list in November in last place, moved up to third in line in the current report. Fourth was *Ma Perkins*. Kate Smith ranked sixth, followed by Big Sister, Portia Faces Life, Stella Dallas, and Young Widder Brown. Theatre of Today ranked first and Stars Over Hollywood second of the Saturday shows.

Hooper ratings are down from between 0.3 to 0.8 from last year's reports for average daytime audience rating, average sets-in-use and average available audience. The audience rating of 4.7 however is up from the last report, and the available audience of 71.3 up 0.8 from the last report. Sets-in-use figure is 15.4, down 0.1 from the last report.

*Ma Perkins* has the highest sponsor identification index, 74.8, with 71.6 giving the correct product; 3.2 giving another product; 6.4, representing misidentification and 18.8 those who couldn't name a sponsor.

Breakfast Club (Swift) had the largest number of children listeners, Bungalow Talking the most men, and Terry and the Pirates the most children listeners.

The five top ranking programs listed in terms of the number of listeners per listening set are as follows:

<table>
<thead>
<tr>

Wearing Quality of Long Shows Found Variable

REPORTING on a survey to determine the "wearing quality" of programs of unusual length, The Pulse Inc., New York, concludes that there is no general law governing the holding power of such programs, but finds certain factors contributing to gains or losses of a long period show while on the air.

Nighttime variety and drama shows, The Pulse relates, in the Radio Monthly News Letter, Dec. 15, tend to lose listeners with each new quarter-hour. In all the surveyed programs in this category, the second quarter-hour loses less listeners than the third. Sunday morning and afternoon shows, it was found, gain more listeners than they lose.

KVOE Santa Ana, Cal., has appointed W. S. Grant Co. as national advertising representative, effective Jan. 1.

Stan. Brands Expands

STANDARD BRANDS, New York, stepping up its use of network programs (starting Feb. 4), will begin sponsorship of a weekly half-hour comedy variety program on behalf of Fleischmann's Yeast and Blue Bonnet Margarine on NBC, 9:30-10 p.m., replacing *One Man's Family* which will be moved into another period, yet undetermined. New Eddie Bracken show will feature the stage and screen comedian with an unnamed orchestra. Mann Holliner will direct the program with musical director and writers to be announced. For its various products, Standard Brands currently has two programs on NBC and one on CBS. Agency for products to be promoted on new show is Kenyon & Eckhardt, New York.

Tangiers Interest

ATLAS Corp. has acquired an interest in the Societe de Gerance de Radio Imperial, operator of the radio station in the International Zone of Tangiers, Floyd B. Odlum, president of the corporation announced. Plans, in addition to the modernization and enlargement of the Tangiers station, are to install and operate stations in Martinique, French Guiana, Guadeloupe, French territories in India, Madagascar, La Reunion, New Caledonia, Oceanic Settlements, Clipperon Island and St. Pierre et Miquelon. The operation will cover broadcasting, television, wireless communications and facsimile transmission.

14th Anniversary

NBC broadcast of *Carnation Contests Hour*, Monday 9-9:30 (CWT), celebrates its 14th year on the air. Jan. 4. Show is sponsored by the Carnation Co., Milwaukee, through Erwin, Way & Co., Chicago.

Television as Leading Postwar Industry Visioned by Kesten

Pledges CBS Aid to Hastening Its Development; Yearend Review Stresses Wartime Service

TELEVISION can become one of America's leading postwar industries and CBS intends to do everything possible to hasten its potential development.

That's the pledge made in a year-end statement by Paul W. Kesten, CBS executive vice-president, who declared that his network is "fully conscious of its special obligations in war" but that it had given "serious consideration to wartime operations".

Review Stresses War Service

While Mr. Kesten's statement dealt primarily with things to come, the annual yearend CBS review pointed out that radio's 1944 accomplishments will be remembered in terms of participation in the war itself, rather than in postwar planning.

Nearly 35% of the year's total operating time was devoted to programs directly related to some phases of the war. That represents 3,169 hours, or an average of nearly nine hours daily, including war news. Out of a total of 17,116 separate broadcasts, close to last year's total, 10,404 were heard on commercial time.

CBS listening station, which has recorded some 50 million words in from 10 to 15 languages during 1944, calls the plays on the shortwave front, reporting what is in effect a success story for Allied radio.

Sources of Axis broadcasts from Europe dwindled to one—Berlin, with five former points of Axis broadcasts changing their tunes—Brussels, Bucharest, Helsinki, Luxembourg, and Paris, while Budapest fell silent before the Russian Army.

On the domestic front CBS sees a vindication of its pioneer use in 1940 of the controlled mail ballot technique of measuring station coverage, in the establishment of the Broadcast Measurement Bureau.

A new degree of flexibility in the advertisers' use of network facilities has been achieved with the addition of two new discounts, both slight variations of the first 15% full network discount plan, according to the review. Of 102 CBS commercial programs, 64 are earning one of the three discounts. CBS signed affiliation contracts with 14 stations, ending up with a total of 143 outlets.

CBS' New York television station WNBC resumed live programs last year, increased its staff to 28 and became the first video member of the NAB, having resigned from the TBA.

Sees Good Prospects

Mr. Kesten's statement cited three proposals concerning postwar television, international shortwave and FM, as suggested during the FCC allocation hearings Sept. 28-Nov. 2 and asserted: "There are good prospects that 1945 will see successful demonstration in the United States of the kind of television we can endorse. Much factual evidence uncovered in 1944 supports these hopes." He pointed out that high-definition, 1,000-line television already has been demonstrated in France (Two conflicting reports on the quality of French television, however, appeared in the Dec. 18 BROADCASTING).

"High frequency, wide-band television, as a world standard, is inevitable, at whatever sacrifice it may mean of present-day equipment," Mr. Kesten said, adding that CBS believed such sacrifices would be smaller now than later.

Asks Better Television

In asking for better television, CBS has matched words with action, Mr. Kesten's statement continued, having applied for high-frequency video stations, ordered necessary equipment, negotiated for new-type receivers and having appropriated a larger television budget than any other non-manufacturing broadcaster.

"Until the public gets the kind of television it expects, an audience that interests advertisers cannot be built, and broadcasters will—and should—carry the cost of programs," said the Kesten statement. "But private resources are limited, and a television audience that ceases to grow will ultimately, of economic necessity, be allowed to die on the vine.

Do Ohio Valley folks listen to WSTV in Steubenville? That's a logical question, considering the fact that we are SURROUNDED but NOT INVADED — by some mighty powerful network competition, including two 50,000 watt stations! Here's the answer in our latest Hooper.

WSTV STEUBENVILLE, OH. JOHN LAUX, GEN. MGR. MUTUAL

WSTV WFPG WJPA WKNY STEUBENVILLE, OH. ATLANTIC CITY, N. J. WASHINGTON, D. C. KINGSTON, N. Y.
The entire Detrola Radio plant is a new idea in radio manufacturing technique. All of its departments—administrative, engineering, design, production—are spacious, orderly and modern... and modernly equipped. This not only promotes employee efficiency, but stimulates workers to conceive ideas for ever-greater improvement of both our products and manufacturing methods. Such conditions have enabled us to achieve high quality, high volume war production. They will likewise enable us to build highest quality radio receivers, automatic record changers, record players, radio television receivers and other electronic devices when our efforts are again happily directed toward those peacetime pursuits.
Fulton Lewis, Jr.

America's Most Listened to News Reporter,

Says . . . .

Thanks to my more than 130 Sponsors for their confidence and good will extended to me in 1944—and it is my sincere wish for 1945 that it will bring Victory to our great country and Health and Happiness to everyone.

FULTON LEWIS, jr.,

heard on 240 stations with over 130 sponsors, is available for sponsorship in your city. Call, wire or write

WM. B. DOLPH, BARR BLDG., WASHINGTON, D. C.

TO ENCOURAGE participation in postwar community planning, series of six quarter-hour broadcasts under title Destination-Tomorrow were started on KNX Hollywood on Dec. 18. Dramatizing existing conditions in Los Angeles area, the broadcasts are wide reaching, and the sponsors are the Department of Education and the Chamber of Commerce. Each broadcast is presented by Pauline Pearson, station educational director.

High School Quiz

HIGH SCHOOL quiz program Young America Answers has returned to the air on WBBM Chicago, heard Saturday, Show features two Chicago high schools competing each week with three contestants, chosen from social study classes who are quizzed on a broad range of subjects. Three teachers from schools not competing on the broadcast act as judges. War stamps are awarded winning teams. Show is presented in cooperation with the Radio Council of the Chicago Board of Education.

Canada Hit Parade

CANADIAN Hit Parade, based on listeners' preferences, has been started by CKY Toronto as a daily half-hour program Pick the Hits. A tall tale is made of all letters received and one of the letters mid-weekly is drawn daily for a $5 prize if the letter contains the correct order of popularity of three tunes announced the previous day. If no winner, the money is added to the next day's prize.

Civic Problems

WIP Philadelphia, on Jan. 8, will begin a new series of programs in cooperation with the Committee for Economic Development in Philadelphia. Series will be a forum discussion of current as well as postwar civic and economic problems. Moderator will be a businessman, and participants will be drawn from the ranks of the city's civic leaders.

Minn. State Series

TITLED The March of Minnesota, a series of programs is being produced by Harmon which is one of the organizers of the American School of the Air, with scripts written by Phil Gelh, former CBS Hollywood staff writer. The series will be broadcast over a dozen Minnesota stations starting in mid-February. Series will deal with postwar problems faced by the citizens of Minnesota.

Stagecast

SATURDAY evening half-hour program now broadcast by WADD Akron in the form of a dramatic presentation, with world map projected on screen for reference; professional guest talent: audience quiz and an introduction of amateur talent. Series is being produced by Gwendolyn Pearson, station educational director.

Talent Series

LOCAL TALENT has opportunity to enter radio through The KLZ Workshop Players, new experimental series started by the Denver station. Program will serve as testing lab for writers and directors in addition to actors.
EVER since our recent announcement that George A. Starbird Microphone Booms again were available to qualified buyers, we've been swamped with orders. And for quite a while ... until the orders started coming too hot and too heavy ... we were satisfied that we would meet our commitments to all those fine Graybar customers without too long delay.

But then, on top of our already crowded schedule of Government war contracts, we were handed the job of designing and manufacturing an extremely critical item for the B-29 "Superfortress" ... which of course must come first. The result is that our face is slightly crimson, but the manufacture of microphone booms in our plant is being adjusted to this war-time condition, and we expect to resume our shipments of microphone booms within the next thirty days.

See your Graybar representative for descriptive folder and details on priority requirements.

Radio Ready to Make 25th Year Success

Increased Revenue, Better Service Foreseen
(Continued from page 14)

Versting had not developed into the major source of station income which some broadcasters had anticipated when it first entered radio in 1943. WINS reported Todd Shipyard and Wright Aeronautical Corp. as regular users of time for recruiting workers and Edo Aircraft Corp. as a newcomer. Of other stations mentioning this type of business, WMCA has two help-wanted programs daily and WQXR reported a few campaigns by stores seeking workers, adding that it has not solicited this advertising. WLIR, recently acquired by the New York Post, stated that it considers this "a black-and-white function" and is not accepting any more accounts in that field. WLIR also expressed the feeling that other advertisers, particularly in the retail field, will revert to newspapers when the war is over, a view that was shared by other stations, which agreed that although much of this advertising came to radio because of a shortage of space, the results obtained would not necessarily be a part of the retail budget in postwar years. WMCA reported that its current clients include 21 major retail accounts, including two department stores.

WARTIME BUYING POWER will drop only 2 1/2% in Postwar Peoriarea

WARTIME INDUSTRIAL EMPLOYMENT 39,000
ESTIMATED PEACETIME REDUCTION 1,000
TOTAL PEACETIME INDUSTRIAL EMPLOYMENT 38,000

Because Peoriarea industries are now manufacturing their regular peacetime products for war purposes, there will be no re-conversion problem here. As proof of this, a Peoria survey by the Committee for Economic Development shows that "...only 1,000 industrial workers will be dropped from a wartime high of 39,000—thus continuing the prosperity of the district...."

This means, first, that in the Peoriarea you have a potent buying population of over 600,000, the same market that is today proving so profitable to hundreds of national advertisers. Secondly, it means there will be no lag between war production and peacetime production. The same machinery, facilities and men will be used to turn out the products to meet the built-up consumer needs.

A Good Market now... a better market when the war is won!

WAR-TIME BUYING POWER

CHICAGO

By FLORENCE SMALL
FORECAST for the 1945 radio picture is a glowing one, according to opinions gathered from agency, sponsor, network, representative and station leaders in Chicago. It is a picture which has maintained its glitter throughout 1944 as far as advertising business is concerned. General consensus among industry members is that business will maintain its present level, that of full capacity throughout the year.

It was pointed out by one station representative that due to difficulty of time clearance on major stations, in many markets a volume of "overflow business" has been gained by secondary stations and markets. More than one rep expressed the view that smaller stations would get a bigger play than ever in the coming year.

On the other hand, Frank P. Schreiber, WGN general manager, predicted that more stations would participate in cooperative shows on the networks. Mr. Schreiber maintained that "1945 will be a bigger radio year" and that FM will start to spread its wings.

H. Leslie Atlass, CBS central division vice-president, indicated that radio's total revenue will increase and that radio will go all out to "get the war over".

Networks are aiming for better listening through better programming, according to E. R. Borgen, vice-president in the Blue central division. He disclosed that network business has reached a saturation point, therefore it is a good time

Sees Export Boom
EXPORT advertisers will spend about $65,000,000 annually in press and radio after the war out of an estimate during wartime outlay of $100,000,000, according to a survey by Joshua B. Powers which accompanies the November monthly bulletin of the Export Advertising Assn., the trade group. Mr. Powers is president of the foreign publishers representatives firm bearing his name.

Italian-American population in the metropolitan area. Foods and wines were the heaviest advertisers in the foreign language field last year.

Postwar planning, scarcely mentioned a year ago, is now in full swing at most advertising agencies which reported that radio is playing at least as large a part in those plans as in present appropriations. Some of the plans may be put into action this year; others probably not until the end of the Japanese War.

This round-up of New York facts and opinions would not be complete without mention of used car advertising which was responsible for a lot of time sales in 1943 but which disappeared almost completely following the establishment of Government price ceilings early in 1944.
to aim for better programming and greater listening value. Recent elimination of chain breaks on WENR Chicago from 7-9 p.m. (CWT) was a step in that direction. Radio advertising will sustain its present level for 1945 and "I look for no recession," Mr. Borroff asserted. As for FM, he said, "it appears to be a fine technique and we're all for it."

Sponsors who are spending money that would otherwise go into the excess profits tax may be replaced by manufacturers of new products who are anxious to use the medium just as soon as they receive Government go-ahead signals, some agency men said.

Television Not Ready?
Many clients are ready to spend more money radio-wise, R. A. Sorensen, owner of Sorensen & Co., declared, but are holding back because of labor and basic materials shortage. When asked about the television prospects for the new year, Mr. Sorensen related that after looking into television pretty deeply—he believes that it is commercially unfeasible in the near future and that "audiences are just not ready for it".

Other agency executives opined that the commercial future of television next year would be stymied because of the lack of large audiences due to the limited number of sets. Executives feel that since such sets will not be available until postwar days, the audience remains status quo. However, one agency official disagreed with this point of view and declared that this was the time to get in on the ground floor and that both sponsors and agencies would benefit from the experience.

Harry C. Kopf, vice-president and general manager of NBC central division, said "the astute planning and clear thinking on the part of advertisers, their advertising agencies and the broadcasting industry in the preparations for the job that must be done in 1945 and the postwar years is a real challenge to all of us. The job we do—no matter how well done—will be relatively unimportant compared to the splendid courage and sacrifice of American fighting men all over the world and the help we must give them to finish the task and get back home safely."

Foundation for Future
"We have at this time a very definite obligation to our men in service," he continued. "We must provide now a foundation of clear thinking and planning that will make for a strong structure in 1945 and the following postwar years, to give our men the kind of social and economic life they will expect upon returning home. It is with this thought in mind that we are looking toward the new year."

Asserting that the "broadcast advertising outlook in 1945 is most encouraging," Mr. Kopf, emphasized that NBC clients are "manufacturers of merchandise for sale at retail, and although many of them have been restricted in production, not a single one reduced its advertising expenditures in 1944 nor its proposed budget for 1945."

NBC had more prospective network advertisers as of Jan. 1, 1945, than in any previous year, according to Mr. Kopf. That is not due primarily to the shortages in other media, but rather to the confidence with which advertisers and their agencies regard network radio, he declared.

"Available time periods are scarce," said Mr. Kopf. "During the first quarter of 1945, we expect to announce at least three new network programs in periods which are now open. Both late-evening and early-morning periods, the value of which heretofore has been regarded by some advertisers as doubtful, have recently proved themselves to be sleepers and are now being given consideration. We enter 1945 with a feeling of confidence that the spot and local business for the year will exceed that of our record-breaking figures of 1944."

As for FM, it is not a new service, according to Mr. Kopf, but an improvement over sound broadcasting of today. It permits a better quality of sound to be transmitted, free from static. It will be a

### OWI PACKET, WEEK JAN. 22

Check the list below to find the war message announcements you will broadcast during the week beginning Jan. 22. OWI transcriptions contain six 30-second announcements suitable for sponsorship and three 20-second chain breaks on each side of discs. Tell your clients about them. Plan schedules for best timing of these important war messages.

1944 PROVES BOOM YEAR AT WOR
New Business Sales Greater Than in Any Year

Top 1943 All-Time High of 313 by 62

FACTS and figures submitted to
Broadcasting by WOR New York
in advance of complete year-end
tallies, indicate, as expected, a
boom year.

In six categories, topped by
amusements, new business sales
more than doubled the number of
accounts in each classification in
1943. Amusements accounted for
102 new business sales; clothing
23; publications 22; household
equipment and supplies 18; depart-
ment stores 8; and a new classifi-
cation—public and labor relations
(including help-wanted advertising),
17 new sales.

Number of new business sales
was greater than for any other
year in WOR's history. For the
1944 period ending Dec. 15, the
station made 375 new sales, com-
pared to last year's all-time high
of 313 sales.

Retail records in 1944 also set
a new high; four out of every five
dollars of sales came from new-
whales, a jump from 60% to 80% of
total sales revenue from eight
years ago when the proportion was
three out of every five dollars.

A number of accounts that had
been "war casualties"—schools,
radio set manufacturers, office
equipment manufacturers—were
back in the picture in 1944. Food
was again the heaviest advertiser,
and accounted for 71 new sales.

have no immediate material effect
on the western states. With major
sea coast cities as points of em-
barkation for the Japanese war
theater, the Pacific strip will con-
tinue to maintain its importance as
a military and naval center. As
the conflict, output of western states' de-
fense industry will be accelerated.

Population shifts which took
place in the first two years of war
have saturated western markets
with war workers. Survey revealed
the existence of a population of 11
million people in the three Pacific
states in late 1943. This figure has
substantially grown during the
past year, and this includes a
military camp and naval base popu-
lation. Approximately 75% of this
new civilian population attracted
to coastwise states by war industry
jobs will remain, it is authorita-
tively estimated.

Many advertising agencies head-
quartered in New York and Chi-
cago have established San Fran-
cisco or Los Angeles branch offices
the past couple of years. Latest to
join the ranks is Abbott Kimball
Advertising in New York, which-
ecessarily opened Los Angeles offices
to service Colonial Dames Corp. (co-
metics) and other West Coast origi-
Sack Sponsor

A SACK SPONSOR has appeared on the Armed Forces Network in the European Theatre. The firm is the "Oh My Aching Back Sack Co.", program is "Listen Characters," "fathered" by Lt. Col. John S. Hayes, former assistant director of program operations for WOR - Mutual. Writer is Alan Surgal, who was a radio writer in Chicago and New York. Producer is Vic Knight, formerly producer of the Eddie Cantor, Bob Crosby and Kate Smith programs. A sack in Army vernacular is a bed, and listener response is terrific.

Advertisers and Account Executives

Many Turn to Radio

In many cases advertisers have no products to sell, but they are keeping trade and firm names before the public. Other well-established West Coast firms have new commodities to offer the consumer and although strictly publication advertisers in the past, they will turn to radio for the first time in 1945.

Some placement will be on short term basis, not surprising in view of the feverish state of the general business mind. General inclination at the moment tends to a shorter view into the future. War reversals are being taken in considerations by sponsors and agency executives. In many cases, ads were run in major newspapers, and were reclassified appropriations to fit the situation.

Continued paper shortage will force more and more black and white advertisers into radio to keep their names alive. On the other hand, agency executives warned, many an old-time radio account, preempted by war-born advertisers, objecting to the "shoving around," will eventually go back to black and white and are now examining other media.

Postwar planning on the West Coast will have to be geared to postwar marketing conditions, according to agency executives on major accounts. Postwar new products, in the opinion of many, will follow the prewar radio advertising pattern with certain refinements and modifications to meet the needs of the day. General consensus is that the West Coast will follow lead of the eastern seaboard in postwar plans.

National Accounts Up

It was pointed out that California will see a tremendous influx of new type products with reconversion of war plants to peacetime production. Where there were a few national accounts in the Pacific Coast area, there will be many, many fewer, manufacturers agree. Thus the potential backlog in household furnishings and equipment, due to production of war plants as well as raw materials, is as big as predicted. With low freight rates inaugurated, radio advertising of these products will be on a sounder basis. It was further emphasized that with packaging and channels of distribution reopened, old line accounts, now off the air, will resume in radio to explore and discover secondary markets.

New accounts will explore the entire field. They will go in for heavy spot announcement campaigns. Others will use regional and national networks. It was estimated that about 70% of those new accounts which have come into radio since the war's start and because of black and white publicizing tightening, will continue to include broadcast advertising in budgets during peacetime.

Food products on the West Coast have come in for a heavier use of radio both at the wholesale and distributor end. Packing and canning companies, while not new, have materially increased West Coast schedules. Former obscure advertisers who have consumer acceptance are going all-out in radio promotion. Hunt Bros. Packing Co., for example, utilizing a heavy schedule of Pacific Coast network time, has plans under way to go national, with the Biow Co. servicing that account.

Cleansers Active

Industrial cleansers, too, have pushed to the fore with all soap products remaining well out ahead in a calculation of overall radio. On the whole, they have held their West Coast spots and expanded coverage via regional networks. Banking heavily on prestige building programs, finance, insurance and loan accounts as well as investment brokers have plumped for solid institutional type local and regional network programs.

Chain clothes have taken with increased emphasis to daily newscasts, using 15-15 minute broadcasts on major stations in metropolitan areas. Department stores also are going in for regular program schedules.

Formerly concentrating on class publications, cosmetic concerns, which include oils and other hair preparations among products, are West Coast advertisers whose potentials remain to be explored. A few have gone in for sketchy spot campaigns. Others are now investigating radio. With solving packaging and distribution problems they will be ready for concerted advertising. Lenz, a ready-holdout, Max Factor & Co., Hollywood (cosmetics), on Jan. 3 started sponsoring the Frank Fatigues Show on CBS stations, Wednesday, 9-9:30 p.m. (EWT) [BROADCASTING, Dec. 25].

Petroleum companies continue to be heavy users of West Coast regional radio despite gasoline shortage and threat of more stringent cuts to come. Schedules include spot announcements as well as newscasts and other type quarter-hour broadcasts. Hollywood film studios, too, have become consistent radio timebuyers. They are successfully
using quarter-hour local programs, participations and spot announcements nationally to plug current motion pictures.

Used car dealers remain important users of radio time in the western area, directing sales copy to both buyer and seller. Going down the list we find flour, cereals and beverages have maintained a consistently healthy schedule this past year. From contracts on hand this will continue through 1945.

Long-Term Schedules

With manpower shortage continuing, hundreds of Pacific Coast war plants and other firms as well, remain consistent spot users to put across their "help wanted" appeals.

There is a predominance of long-term regional spot and network contracts, with advertisers seeking to insure their positions in a medium whose availability has almost diminished. With network time at premium, more and more spot radio will be used. Announcements are being fitted into the schedule where they may.

Irritated Los Angeles agency timebuyers and station representatives strongly opined that common sense will dictate use of transcribed spots, bizarre or not.

Sponsors as a whole, cooperating in the better radio movement, will be more careful as to type of station breaks and announcements offered, but that those which are good and fit products advertised will continue to be used, was the unanimous thought. Generally speaking station managers are not using transcribed spots out of harmony with adjacent programs, the reps declared.

Advertisers are seeking broader and broader coverage. Network coverage in many instances has been enlarged to meet advertising demands. Although a majority of national advertisers make their plans and decisions in New York or Chicago, agency executives concede that Hollywood continues to dominate as the originating point of network commercials. They all want "name" shows and by all odds these major buyers of talent and network time will continue to find Hollywood's highly exploited entertainment resources a rich advertising asset despite costs.

Talent prices have skyrocketed during the past couple of years, but Hollywood advertising agency executives are reluctantly reconciled to the fact that a good name variety show comes high today. A good example is the new Andrews Sisters Show which started Dec. 31 on Blue stations. Talent alone for this weekly program is reputed to cost Nash-Kelinervator Corp. around $16,000.

Quite a number of the big-rating shows on the air over a period of years have increased their talent budgets. Shows that once sold for $10,000 per week have been boosted to $15,000. Jack Benny Show is said to cost American Tobacco Co. a cool $25,000 per week.

West Coasters see no immediate change in the sponsor-waiting-in-line-at-the-station-door situation under threat of FM or television outlets, since to constitute a threat, manufacturers of receivers would have to be a reality. That to most is pegged off somewhere in the future, at least beyond bounds of the coming year. Transmitters as well as receivers must precede any reception, and although agency executives and sponsors are thinking along lines of FM and television, they are pigeon-hole ideas for the immediate future.

SAN FRANCISCO

By EDWARD MURPHY

STATION owners and executives here are not idle about postwar plans should peace come this year, the next, or the next, and a large percentage of them already know exactly in what direction they will strike out when the war ends. While picking their spots for the future, they are not heedless of the present. Biggest headache, they say, is keeping equipment in repair, and replacements are hard to get.

While it is true that manufacturers have not been able to supply much equipment, operators generally are not concerned with a break-down as they say there is enough on hand in warehouses to go around. Nevertheless, some say the pinch of parts and supplies is growing tighter, as equipment in service grows older.

But aside from the various headaches, those who run the net outlets and independents are given...
to looking back on 1944 as the year of happy dollars with a strong possibility that the bell at the top of the cash register will ring loud and long again in 1945.

San Francisco, which is now the news hub on the West Coast, is facing a situation that may affect the advertising industry. Reports from the Far East show a decline in sales, which is expected to continue. The demand for American products among English speaking people in the Pacific area is being met through OWI shortwave broadcasts. These shows are aimed at U.S. soldiers and sailors but you can't stop anyone from listening to a good thing on the air. This means American advertising on a global scale.

The Western market looks good. There is every indication here that this year will see a demand for certain consumer products. The demand for these products will be met by local and national advertising. It means, also, that the four big networks, as well as the bigger and smaller independents, will have to find new outlets for their products. The advertisers will have to find new ways to keep the public interested in their products.

Home Building

During the past year there has been a notable falling off in new construction — a situation created mainly by the lack of building materials and currency power. In the past 12 months, the local new construction and the number of new buildings has dropped. The bigger stations have realized the importance of new construction and have been building new stations to keep up with the demand. The smaller stations have just been able to keep up with the demand and have been building new stations to keep up with the demand.

Philip Morris Replaces

PHILIP MORRIS & Co., New York, will replace "It Pays To Be Ignorant" on 12 CBS stations, Friday 5:30-6 p.m., following the Jan. 29 broadcast, with a new program, still to be selected. Radio company officials have been discussing the program for some time. The program will be the first of its kind to be aired on the air. It is expected to be a big hit with the public.

and others who have merchandise to sell.

All of this outlook, however, depends on the end of the war. When the war is over, other sections of the country will be definitely convinced that the radio industry here has been the best. In fact, many of its leaders have lost sleep in planning for the postwar era.

CANADA

By JAMES MONTAGNES

Canadian stations have enjoyed their best year in the fifth of Canada's war, and prospects are that 1945 will bring still more advertising revenue. Opinion of station managers and executives in Toronto (where most national advertising is placed) points to more advertisers using more networks with better quality shows in the coming year. Advertisers who have been off the air for some years due to the war are starting to come back, and others who have not been on the air in Canada to any extent in the past are now talking national network programs.

New Developments

Various developments of 1944 favor more network use in the Dominion. First is the fact that the Dominion now has two national networks extending from the Atlantic to the Pacific, and that the French network, primarily in Quebec province, may be split into two chains to give alternative advertising advantages. All networks are under control of the Government-owned Canadian Broadcasting Corp., and all programs must meet standards set up by the CBC. Incidentally, Canada is not affected by the recent decision of individual stations to limit certain types of announcements and station breaks, for under CBC regulations such material may not go on the air, and the Canadian Assn. of Broadcasters has a committee committed on station men and advertisers making recommendations continually to all stations on "good taste" on the air.

A second reason for increased network use in Canada is the recent ruling of the Canadian Dept. of National Revenue, that practically all transcriptions are subject to an 8% sales tax on the cost of production, which includes also the artists, directors, producers, as well as the technical cost of production. Such transcribed programs now being produced in Canada are being done with the least number of artists, to keep costs down. In addition there is the new tax of the American Federation of Musicians. Users of transcriptions are now paying to networks and the larger advertising agencies point out that the bulk of their business is now in network programs. Many of these agencies make their own productions, whether live or recorded, and are subject to the 8% sales tax on transcriptions as any transcription company.

More American network programs are being piped into Canada to join Canadian networks or individual stations. A number of big name programs including the CBS Kate Smith Hour, and NBC Contended Hour are starting in Canada early in January, and others are under tentative option to begin during the first quarter of the year. More U.S. and Canadian advertisers have plans to start network shows during the first quarter of the year.

That some advertisers, who have
It is estimated that commercial revenue of radio stations was 10-15% in 1944 over 1943. It is expected that 1945 will see about the same rise, although one international agency reports that its 1944 radio placements approximating $4,000,000 will increase to $7,000,000 in 1945. (Canadian firms are subject to 100% excess profit tax—20% refundable after the war—on 1936-1939 average profits)

New product advertising is not expected to start until late 1945. Prolongation of the war is expected to have some effect on Canadian stations obtaining new equipment to increase power to 5 kw, for which permits have been given to almost half the Canadian stations, previously limited to 1 kw.

There is no FM or television broadcasting as yet in Canada, only experimental FM licenses having been given to CFRB Toronto and the CBC at Montreal and Toronto. Since there are no television stations or sets yet in Canada, commercial FM or television does not figure in 1945 advertising appropriations. It is not thought likely that either new broadcasting form will be in use in Canada before late 1946. Canadian stations have applied for FM licenses, but CBC policy has not yet been decided as to throwing FM open to private broadcasters, though it likely will be. Television is expected to remain a CBC operation entirely.

Better Programming
Canadian radio is still expanding. Many new stations were authorized during 1944 and other applications are pending. Large as well as small centers have new stations. This strengthens the belief held by most Canadian broadcasters that they need not fear being taken over by the Government, and that private broadcasting will be allowed to grow alongside government-owned stations, with the Government-owned body regulating all broadcasting and controlling network broadcasting.

Higher quality programs are developing in Canada with better-trained producers on the job and advertisers being taught that high quality programs pay. There has even been a suggestion by CBC staff men that there should be an interchange of production men between CBC and private stations and networks outside Canada, to improve techniques. A programming development in Toronto at CKIO on blocked programs, with advertisers using only availabilities, or periods of the blocked programs produced by the station, is expected to have some effect on Canadian broadcasting in the larger centers. The idea has gone over in a big way with advertisers and listener ratings have jumped since the plan went into operation. Other stations are looking into the plan.

Local business in Canada has remained good, with stations reporting increasing demand for spot announcements by local merchants. Live and recorded programs also are being sponsored in increasing volume by local advertisers. This development is forecast to continue through the new year.

While few Canadian radio men will prognosticate past early summer, most are of the opinion that business will be much better during the early part of 1945, and that there will be a scramble for radio time after V-E Day. Networks especially will be sold out completely by that time, it is expected.
Hillman Change

HILLMAN PERIODICALS Inc., New York, has shifted its account to Blue Co., New York, and will be making the change over with the advertising for the February issue of Pageant. The new December issue will place the magazine's new radio series, details of which are now being worked out. Original plans were to advertise two or more stations in each issue in 25 major markets for two weeks of each month, possibly expanding to 75 stations. [BROADCASTING, Nov. 15.]

LaRoche Yule Message Upholds Blue Policies

INTERPRETED as a reply to Columnist Westbrook Pegler's attack on William Galimore, commentator on WJZ New York, Blue key outlet, and Samuel Novik, president of Electronics Corp. of America and director of the People's Radio Foundation, Chester J. LaRoche, Blue vice-chairman, in a special Christmas message to the network, defended the Blue's determination to present "the extreme liberal or the extreme conservative viewpoints as long as both are heard."

Following an appeal for greater production effort for the armed forces, Mr. LaRoche said: "The Blue Network will cooperate with our war leaders in making clear what we are up against ... We will present fearlessly all sides of a problem. Our commentators are allowed to express their own opinions—they need not conform to ours. To help make democracy grow and assume its rightful place in world leadership, we plead for the use of full power of radio—liberally and progressively and unafraid."

Alta Expanding

ALTA VINEYARD Co., Fresno, Cal., which has acquired additional wineries and is expanding distribution to a national basis, has appointed L. H. Hartman Co., New York, as agency. Spot radio campaign started in mid-December in WCAE Pittsburgh and WCAU Philadelphia will be expanded early in February to the East and to other markets as distribution will be increased in about 20 markets. Products are Alta, Mattel & St. Charles Wines.

Palmer to Agency

FRED A. PALMER, former manager of WCKY Cincinnati, has joined the newly-organized advertising and public relations firm, Stokes, Palmer & Dinerman Inc., Cincinnati. The move was announced last week. Mr. Palmer has entered radio 17 years ago in Columbus and became the first president of the Ohio Assn. of Broadcasters. Before coming to WCKY Mr. Palmer was vice-president and general manager of KOY Phoenix.

CKAC Representation

CKAC Montreal has made arrangements regarding their U.S. representation with Joseph Hershey McGillvra Inc. The New York, Chicago and West Coast offices of the McGillvra organization will continue to represent CKAC, starting Feb. 17, 1946, with the station's option to continue thereafter.
"Now, if we were only staying at the ROOSEVELT!"

When you stop at The Roosevelt you don't risk getting marooned like this. For you'll be within walking range of Manhattan's Midtown activities. Direct passage-way from Grand Central Terminal to hotel lobby. A reservation at The Roosevelt liquidates a lot of bother.

Rooms with bath from $4.50.

No New Civilian Sets Possible
In Near Future, Ellis Asserts

THE RADIO manufacturing industry was warned last week by Ray C. Ellis, acting director of the WPR Radio & Radar Division, that "there is no possibility in the near future of making any new civilian sets, in view of military demands, and only enough replacement parts and tubes to keep an average of one set in operation in each radio equipped home."

Mr. Ellis called upon the industry to keep "the closest possible contact" with the various Government purchasing agencies. Not only must the industry extend itself to maintain its purchasing to the fullest extent, he said, "but it must utilize its services fully available to the Government."

Lost in Europe

The current German offensive, he declared, is destroying "a great deal of radio equipment which will have to be replaced." Orders for new requirements will be ready soon, he added, necessitating close touch with procurement agencies.

He explained that the agencies formerly placed orders for radio and radar on an almost regular schedule, "but today, with constant changes in requirements, the Government never knows exactly what will be the demands for tomorrow."

He advised the industry to "seek new or additional Government orders when plant capacities and facilities permit the manufacture of current and new types of required equipment."

"There are two means of increasing new business," he said: "seeking subcontracts from other prime manufacturers or subcontracting out to other manufacturers parts which cannot be manufactured in the contractor's own plant."

Mr. Ellis' statement, it was learned, was issued to discourage requests on the part of manufacturers applying for permits to produce civilian equipment.

BMB Incorporated

ARTICLES of incorporation for the Broadcast Measurement Bureau were filed last week with the Delaware Secretary of State, with J. Harold Ryan, NAB president; Fred Gamble, A.A.A.A. president, and Paul West, ANA president, incorporators. At the same time it was disclosed that the board of directors, heretofore comprised of five members from each of the participating organizations, would be made up of six, making a board of 18.

A meeting of the full board, to choose a director, tentatively is slated for the next fortnight.

More Radio Homes
Despite War—NAB

FORMED THROUGH 'Extra Sets'
Given New Families

BEST estimates indicate that there are 33,100,000 radio families in the U.S., as of Jan. 1, 1944, according to the NAB research committee, which based its estimate on the Office of Civilian Requirements' survey conducted by the Census Dept. last spring (Broadcasting, June 5, 1944). Survey showed that 90% of families in the U.S. own at least one radio. The NAB research committee considered that there has not been a material change in the percentage of radio ownership since the date of the OCR survey.

The 33,100,000 figure indicates that radio has not only maintained but increased its effectiveness as an advertising medium despite the wartime shortages. Total sets were estimated at 89,000,000. Extra sets in homes, places of business and institutions were numbered at 17,150,000, while auto sets accounted for 8,750,000, making the 59,000,000 total when added to the 33,100,000. U.S. research committee figures that 1,000,000 sets have been retired from use since Jan. 1, 1944. A 250,000 decline in the number of car radios is explained by the decrease in the number of passenger vehicles.

The number of extra sets in homes has been affected by a redistribution to new families, for according to the NAB new radio families are formed by individuals breaking away from the family unit, couples marrying, and the older folks presenting the newlyweds with one of the extra sets from the old homestead.

LAST MEETING

House FCC Probers to Adopt
Report Tuesday

FINAL MEETING of the House Select Committee to Investigate the FCC has been called by Chairman Lea (D-Cal.) for Tuesday morning (Jan. 2) to adopt a report which must be submitted by midnight Tuesday when the 78th Congress expires.

The Committee favors new legislation but its members disagree as to the type. Robert B. Barker, general counsel, said the almost two years of hearings included 4,992 printed pages of testimony, 202 exhibits and cost $105,242. An allowance of $4,787.99 was returned to the House contingent fund.

Last week the Committee returned to the FCC 110 station files, 4,264 separate files on stations and 5,500 folders of Commission meeting minutes. Only one file is missing, said the general counsel—the financial file on KXOK St. Louis. A total of 156 witnesses were brought in at 100 public sessions, 36 in 17 executive meetings, 174 witnesses gave statements privately and 38 others were interviewed.

Three New Network Programs To Be Started by CIO-AFL

Informative and Persuasive Material of Public Service Nature to Dominate Broadcasts

THE CIO and AFL will start their year-round network programs this week with a total of three new network series on the air, leaving heavily for content on informative and persuasive material associated with the public service program, in making technique, professional talent and writing and production personnel.

To Share Blue

The Blue Network, in announcing that the Sunday 6:45-7 p.m. period would be turned over to the CIO for the first six months of the year, and to the AFL for the last half, released expressions of general satisfaction with the plan from network and labor officials Chester J. LaRoche, Blue vice-chairman, and William Green, AFL president, expressing thanks to members William Green, AFL president, expressing thanks to the leadership, expressing thanks to the writing of CIO spokesmen, and concluding with an interview with a prominent labor figure by Martin Gable, CIO, and a narrator. Blue producer and director will be Don Martin.

Churches to Apply For FM Licenses

IMMEDIATE application for FM stations and the general improvement of existing religious broadcasts are among the aims of a joint interdenominational committee set up in New York by the Congregational Christian, Methodist Episcopal and Presbyterian churches. Pending new allocation of FM frequencies, the committee will conduct surveys to determine desirable locations for FM stations and equipment.

Committee also plans to produce programs, using professional talent, and to supervise instruction for ministers and religious educators in the effective use of radio. Named as radio director is Rev. Everett C. Parker, formerly of the NBC public service department and radio director of the original Congregational Radio Committee, fore-runner of the new group.

NAB Applications Are Filed by Damm

ANY IDEAS that FM Broadcasters Inc. contemplates a merger with the NAB in the near future were scotched last week by Wm. D. Damm, president of FMBI and vice-president and general manager of WTMJ-WMFM Milwaukee, owned by the Journal Co., in applications for membership of the two stations in the NAB.

Mr. Damm In a statement filed with the applications, Mr. Damm pointed out that FMBI and the Television Broadcasters Assn. each has a definite job to do in the formative stages of the arts—a job that cannot be done by the NAB "as the overall trade association." There is no attempt, he emphasized, to make FMBI the overall trade association. His statement follows:

I think submission of our applications at this time speaks for itself. It should settle among many people the perennial argument that this organization (or myself personally) is attempting to make FMBI the overall trade association. Our position in that has been made clear several times and I do not believe it will do any harm to reiterate it.

FMBI has a job to do during the formative stage of this new service, just as the TBA has a job to do. Neither of these jobs can be done by the NAB as the overall trade association. The NAB has a big task before it and can be of no help to all engaged in the radio industry. We sincerely hope that in doing that job it will prosper.

Wheeler's Views

DECLARNG legislation must be based on the principle that radio is a public service supported by advertising and not primarily an advertising medium, Godfrey Wheeler (D-Mont.) of the Senate Interstate Commerce Committee late Friday called "unjustified" claims that clear-channel stations are necessary to serve rural areas. He reiterated his opposition to such stations and said a radio license should include such matters as "sale of broadcasting licenses" and assurances that both sides will give equal opportunity to air their respective views.

Coca Cola Plans

COCA COLA Co., Atlanta, with expiration of contract for Scotty From Morton Downey on the Blue Monday through Friday 3-3:15 p.m., in February shifts the program to Mutual. Company will continue Spotlight Band on the Blue, it was stated by a Coca Cola executive in Atlanta.

Noble Asks Plank

EDWARD J. NOBLE, chairman of the board of the Blue Network, is to advocate a plank in the next peace treaty allowing freedom of listening and freedom of broadcasting internationally, in a speech scheduled for delivery Jan. 1 on a special Blue New Year's program 1-2 p.m.
Foreign Firms Are Anxious to Resume Commercial Television Programming

WILL THE New World, cradle of radio, or the Old World, first offer television as radio's ultimate service.

That question appears to be uppermost in radio men on both sides of the Atlantic. While commercial television got its start in this country, it became encumbered by regulatory difficulties (FCC) in 1939, whereas in England the same video process went ahead unhamp-ered. The war, however, interrupt- ed British continental television.

Anxious to Start

British manufacturers, according to trade reports from London, are chafing to get under way with 525-line television as soon as European peace is effected. In the United States, basic allocations first must be determined. Proponents of prompt introduction of television (similar to that planned by the British) want to retain lower band allocations as agreements in high-fidelity, high definition video in the upper bands supported largely by the non-manufacturing groups.

A report to Broadcasting from London states British manufacturers interested in both British and Dominion markets are implo-ring the Board of Trade to decide the status of postwar television. They are demanding a specific or approximate date for the switch-over to commercial production of television transmitters and receivers.

"The fear which persists here," the London correspondent reports, "is that the British radio industry may find itself left behind when the market opens and see going to other producers—notably in the U.S. It is agreed that there will not be any actual television transmission for some considerable time after postwar. In Great Britain, but the manufacturers here definitely are readying for the opening when it does break and have no intention of being left at the post."

The trade opinion is that British manufacturers will suffer if there is inordinate delay. This complaint is not unique to radio, it is reported, but is being voiced by almost every industry and every business

Leading British manufacturers anticipate a "tremendous demand" for television sets as soon as BBC is allowed to resume television broadcast. The question the manu-facturers ask, it is reported, is: "Shall we have to wait until the Americans get started to selling them, before we can go into produc-tion ourselves?" One spokesman said that "it looks almost certain that America will be able to get in first unless we are given a chance to plan for the switchover.

In the United States, manufacturers are fearful lest the Brit-ish get under way first, unimpeached by Governmental restraints, but using basic American methods, pat-ents and circuits. They contend it would be tragic if television, born, nurtured and developed in the United States, should first provide national service in another country.

Baird Process

John Baird, British radio in- ventor, recently demonstrated his new "Televisor" process in which stereoscopic and colored pictures are shown directly on the cathode ray tube. He said that such a set, producing colored television, would cost about 30 per cent more than pre-war black-and-white television sets.

"Every cinema will be a reality in television long before it is a reality on the screen."

From Paris has come word that France has made considerable progress in high definition television, using 1050-line transmission, and that tentative schedules call for inaugura-tion of programs starting in Jan-uary or February. Afternoon and evening programs, including motion pictures, revival of film and music hall classics, newscasts, and direct pickups of important events in the Paris area, are contemplated. [See Broadcasting, Dec. 18.]

March of Dimes

NATIONAL Foundation for Infantile Paralysis, New York, will present Jan. 30 on the four networks a program featuring Jack Benny on behalf of the annual March of Dimes campaign. Mr. Benny will also plug the drive in three non-broadcast shows from New York, Philadelphia and Boston starting Jan. 20. Eleanor Roosevelt will be on an exclusive broadcast on the Blue Jan. 18. Other network pro-grams are being planned and the organization will offer all stations a series of transmissions, five-minute, five-minute and quarter-hour pro-grams, to start Jan. 14, featuring well-known stars and sportscasters.

Snow in September...

down South...

Help Wanted

Continuity-writer—Good paying, permanent position for capable continuity-writer. With 1000 watt medium wave network station. Box 992, BROADCASTING.

Operator-announcer. First class radio-telephone license. Must be capable of news and commercial announcements. For NBC station in western city of $5,000. Good post-war future. Box 582, BROADCASTING.

Progressive dartsman southern station needs chief engineer and announcer. The chief must be technically on his toes. The announcer must be dependable and capable. Good earnings. Write Box 867, BROADCASTING.

Wanted—A good, dependable and capable continuity-writer with at least two years experience in announcer-control operation. News, commercial and special programs. If you are interested, please submit full particulars in first letter. Write Box 992, BROADCASTING.

Wanted—Licensed engineers for new Midwest station going on air soon. Please submit full particulars in first letter. Write Box 991, BROADCASTING.

Radio station in midwest is opening for radio engineers. Must have either first, second or third class license. Write for full qualifications and information, please. Box 27, BROADCASTING.

Radio station in midwest is opening for sales manager. Person must be active in radio station sales. Department but is looking for opportunity to expand. Must be capable of completely superintend and sell local and national spots and network advertising. Full cooperation expected and expenses paid. Please write full particulars and give as much detail as possible. Box 28, BROADCASTING.

Sales promotion man—Urgently needed by well-known station to replace present man. Location is a large city. Box 47, BROADCASTING.

Radio repair man. Experienced with or in the process of getting operators license. Ground floor job; good job for a man with a tin new station in easy-to-live-in community in California. Box 47, BROADCASTING.

Wanted—Announcer. Good character, dependability and ability to do work in radio more important than experience. We prefer to train you, anyway, and you'll really get a chance to learn all phases of small station operation. Fair starting salary with more in view if you qualify. Write Manager, WCXY, Charlottesville, Va.

To Buy

Wanted to buy—Modulation and frequency monitors, turntables, speech input console. Prefer RCA equipment for 250 watt station. Box 994, BROADCASTING.

Wanted to buy—Transmitter equipment. Advise what you have and lowest cash prices. Box 56, BROADCASTING.

5 kw transmitter or component parts. Box 40, BROADCASTING.

For Sale

For sale—250 watt transmitter, FCC filing date. Also, 4 kw, 250 watt, 4F. Box 58, BROADCASTING.

Three Presto recorders for sale. Like new. Please write. Address P. O. Box 185, Laredo, Texas.

Miscellaneous

Will furnish equipment for radio station for interest. Box 26, BROADCASTING.

PROMOTION JOB SEeks MAN

A 50,000 watt, network-owned station in a major eastern market will enjoy hearing from a thoroughly experienced sales promotion man. He should have full rein, unlimited opportunity for advancement, alert management, and a fat budget to spend. Write fully in strictest confidence.

Box 58, Broadcasting

WANT A HOOPER BOOSTER?

As your program manager I can hypo anemic ratings. I am now employed as idea man—writer-director for key network station. Former program manager 50 kw affiliate. Want permanent position in a progressive station where results are required.

Box 51, Broadcasting

Classified Advertisements

PAYABLE IN ADVANCE—Minimum $1.00. Situation Wanted 10c per word.

All others, 15c advance. Bold face caps 30c per word. Ad must be all light face or all bold face caps. Count 3 words for blind box number. Deadline Monday preceding issue date. Send replies to BROADCASTING Magazine, 870 National Press Bldg., Washington 4, D. C.

Continuity-writer—Minimum $1.00. Situation Wanted 10c per word.

All others, 15c advance. Bold face caps 30c per word. Ad must be all light face or all bold face caps. Count 3 words for blind box number. Deadline Monday preceding issue date. Send replies to BROADCASTING Magazine, 870 National Press Bldg., Washington 4, D.C.

Help Wanted

Southern California station wants an experienced announcer-writer for all news and record shows. Must be an air personality, not just a disc-jockey. Must have full night or early morning experience in former jobs. Box 58, BROADCASTING.

Wanted—First or second class operator—1 kw Blue station. Excellent opportunity. Pleasant working conditions. State salary. WJRR, Jackson, Tennessee.

Wanted—Two 1st class engineers. 3 announcers for North Carolina's newest station located Henderson, N. C., Henderson Radio Corp., Box 144, Henderson, NC.

Announced, experienced only 250 watt local with Mutual outlet. Capable of running commercial, writing own continuity, and making records. Good position for the right man who can handle heart position. KDLB, Devils Lake, N. Dak.

Immediate position available for combination first class license telephone. Telephone collection station XJXJ, Klamath Fall, Oregon.

Wanted at KPFA, Helena, Montana, 250 watt, NBC affiliate; one announcer who can handle commercial copy. All shows and commercials. Also, one straight newsman familiar with state experiences, references. Restricted permits not necessary, but bring additional salary.

WANTED—Combination announcer-program director with opportunity for unlimited future. Two years experience, preferably Los Angeles area, Topnotch news and commercial work. Excellent references. Also, experienced announcer and program director, 4F, desires permanent position with progressive station, located Southern California. Box 38, BROADCASTING.

Combination announcer-program director with experience in all phases of radio, prefers Los Angeles area, Topnotch news and commercial work. Good opportunity. For regional station. Box 45, BROADCASTING.

Situations Wanted

Program director with opportunity for writing shows. Excellent references. Box 49, BROADCASTING.

Program director with opportunity for writing shows. Excellent references. Box 45, BROADCASTING.

Situations Wanted

Combination announcer-program director with experience in all phases of radio, prefers Los Angeles area, Topnotch news and commercial work. Good opportunity. For regional station. Box 45, BROADCASTING.

Wanted—Low priced transmitter. Box 58, BROADCASTING.

Wanted to purchase receiver. Advise what you have for lowest cash prices. Box 56, BROADCASTING, or WJRR, Jackson, Tenn.

Recently discharged from service and desires opening for capable continuity-writer-director for key network station. Box 49, BROADCASTING.

Discharged veteran seeks opening for capable continuity-writer-director for key network station. Box 49, BROADCASTING.

Radio engineer, ex-military, seeks opening for capable continuity-writer-director for key network station. Box 49, BROADCASTING.

"BUY WAR BONDS"

January 1, 1945  Page 69
Trammell Praises Radio's War Role
Broadcasters' Wish in '45 Is To Air News of Victory
NILES TRAMMELL, NBC president, reviewed 1944 in his annual address to the industry's record in broadcasting election and invasion news, entertainment and educational material, and furthering the war effort, and concluded that NBC will meet the test. NBC vice president and general manager presented the outlook for radio in 1945 in two statements last week.

Rosen Says 1,000-Line Video Feasible; Barthelemy Experiments Unhampered

EDITOR BROADCASTING:

The controversy between NBC and CBS over the possibilities of French television is of particular interest to me in view of my lengthy experience in Paris in the French radio field. It would be impossible to say that either the NBC or the CBS opinions are right—or wrong. Considering their diversified sources of information, they cannot help but arrive at completely opposite conclusions.

In the case of the NBC representative in Paris, John MacVane, his consultant was Jean Guignebert, director general of French radio. Mr. Guignebert, who is dealing in commercial realities, bases his statement that French television is moving at a "dog-trot" pace, on the official French standard of 450-line television transmission. While we may be sure that Mr. Guignebert makes his statement in good faith, it must be considered that he has been preoccupied, for the past few years, with the French underground movement and has undoubtedly given the major part of his attention to political, rather than scientific, matters. Consequently, and please do not think that I am understimating Mr. Guignebert's abilities as the new director of French radio, the belief expressed by that worthy gentleman can, so to speak, be taken with a grain of salt.

Murrow's Report

On the other hand, the report of Edward R. Murrow, CBS representative, was formulated as a result of consultation with Rene Barthelemy, chief engineer of Compagnie Francaise de Television in Paris. Mr. Barthelemy, who has unlimited opportunity for both research and experimentation during the years of German occupation, due to his exemption from military duty because of advanced age, is perhaps better able to judge the strides made in French video development on the basis of his great scientific knowledge.

In addition, Mr. Barthelemy was unhampered by German interference with his experiments for two reasons. First, the experiments were conducted in a private laboratory and had no connection with the official French broadcasting set-up. Second, the Germans were only too willing to await the results of private television research in the belief that once new methods were conclusively established, they would simply assume possession of all existing facilities and exploit them for the benefit of the "new order". My personal opinion leans toward Mr. Barthelemy's statement that "1,000-line television...is perfectly feasible" and that "there is no longer any insurmountable technical obstacle to putting it into general use". When I spoke with Mr. Barthelemy in 1939, he was convinced that 1050-line image projection was possible. He was working on the idea at that time and I am sure that in the intervening five years he has accomplished his objective, although I am inclined to think it will be some time before it can be put to real practical use.

Herbert Rosen

The Blue Stations Committee

To Meet on 1945 Plans

THE BLUE Network Stations Planning & Advisory Committee will meet in New York Jan. 16 and will hold a joint conference with network officials the following day at Blue headquarters, to discuss 1945 plans.

H. Allen Campbell, WXYZ Detroit, Dist. 2, chairman; Henry P. Johnston, WSNF Birmingham, Dist. 3; Paul Good, WAGA Atlanta, Dist. 4; Hough, KGKO Fort Worth, Dist. 6, have been reelected representatives of their respective districts and will be asked to attend along with William A. Riple, WTRY Troy, N. Y., Dist. 1; C. T. Hagman, WTCN Minneapolis, Dist. 8; Duncan Pyle, KVOO Denver, Dist. 5, and W. B. Stuht, KJFR Seattle, Dist. 7. Elections were completed last week to select an eighth member from the newly created Dist. 5, formed from Dist. 4 and covering the Southeastern and Florida group [Broadcasting, Dec. 11].
F. M. relay operation...offered by others as a postwar possibility...is already an REL accomplishment of proven reliability.

For five years, the first studio-to-transmitter F. M. relay ever to be installed has been in continuous practical operation by the Yankee Network without wire connections between studio and transmitter. Programs originating in Station WEOD, located atop the Buckminster Hotel, Boston, are relayed to Station WGTR 50 kw, also on REL installation in Paxton 43 miles distant, over two hill-ranges and beyond line of sight.

Yes, REL has in back of its organization five years of practical operation—in F. M. relaying, a field generally regarded as one for future development. REL has again established a scientific precedent...and continues to energetically and successfully lead the field in radio pioneering!

REL equipment in this installation consists of 250 w., S-T link transmitter operating on 156.75 mc.

PIONEER MANUFACTURERS OF FM TRANSMITTERS EMPLOYING ARMSTRONG PHASE-SHIFT MODULATION

RADIO ENGINEERING LABS., INC.
Long Island City, N. Y.
Folks out here have money to spend for your product. And they’re above-average radio listeners too. In Black Hawk County (Waterloo) 97.6% of the families own radios. In Linn County (Cedar Rapids) 96.2% of the families own radios. Iowa’s average is only 93.9% ... the U. S. average is only 88.9%.

Folks in this neck of the woods just can’t help hearing WMT at 600 kc... it’s the best frequency in Iowa. WMT’s primary area of 320 miles in diameter is the largest in the state of Iowa. Consider that billion and a half bucks when you start figuring a profitable schedule ... and use WMT as the "Buy" in Iowa.
