Winning the Peace

WINNING an economic as well as a diplomatic peace will be the biggest job advertising and selling ever tackled. It will mean selling 50% more goods per year than were sold in 1940 to keep 20% more workers employed. Attaining this sales goal in the Denver region is a selling job for which KLZ has proved thoroughly capable. KLZ has the dynamic, sales-stimulating knack, and the Denver market has the spending power, which advertisers will need in the months and years ahead.

980 KILOCYCLES
EXPECT FCC to move speedily in transmitting to Congress recommendations on transfer procedure pursuant to its Crosley-Avo decision (see page 15). Possible action within fortnight.

BY OCT. 1 Col. Ed Kirby, chief of the Radio Branch, BPR, is expected to leave the Army. He will return to private business, probably as a public relations and advertising consultant. Former NAB public relations director, Col. Kirby has headed Army radio five years. Successor is almost certain to be Maj. Al Wharfield, formerly of C. E. Hooper Inc., who has been acting chief while Col. Kirby served as escorting officer for the U. S. Broadcast Mission in Europe.

MORE THAN a possibility, in view of the FCC denial last week of KOMA Oklahoma City application to shift from 1520 kc to 690 kc (see story page 17), that station will file for 50 kw on its present frequency.

INTERDEPARTMENT Radio Advisory Committee held first meeting since V-J Day last Thursday, discussed conversion of military and Government frequencies to civilian use. On agenda: aviation frequencies, conflicts in military intelligence bands and amateur channels. Weeks of work face IRAC before differences can be resolved.

DIXIE R. McKEEY, who put on the air WXY's 915-foot antenna in Oklahoma City, and Robert C. Shaw, high-frequency expert, will open an engineer consulting firm in Washington about mid-September.

IF PRESENT plans of the Radio Executives Club of New York materialize, first meeting of the new season on Oct. 4 will feature the complete party of the American Broadcast Mission to Europe as guest speakers, with the reception committee comprising Paul W. Kesten, CBS executive vice-president; Edgar Kobak, Mutual president; Chester J. La Roche, vice-chairman, American, and Niles Trammell, NBC president.

DON'T expect quick entry of full-blown television on nationwide basis. Wild talk about sudden setting up of video industry is discounted by many who will take leading roles in its development. Five or more years may be needed, they say, pointing to need of networking facilities, stations, programs and receiving sets before television can be said to have arrived. Industry may be developing nicely, though, within two years, though service likely will be only a few hours daily in larger cities.

REXALL ON COAST

SONTAG DIVISION of United Rexall Drug Co., Los Angeles (chain), has appointed Glasser-Galley & Co., Los Angeles, to handle advertising and will use radio along with other media in an extensive campaign. Grace Glasser is account executive.

Upcoming

Sept. 10-11; Mutual Board meeting, Hotel Ambassador, New York.

Bulletins

COL. WILLIAM S. PALEY, ICD, deputy director and chief of operations, on leave as CBS president, arrived by plane in New York Thursday night. It is understood he will be released from the Army shortly and return to CBS. Edward R. Murrow arrived in New York Friday afternoon. He is to return to London in two or three weeks.

STATE DEPT. received word Friday afternoon that Third Inter-American Radio Conference has begun sessions in Rio de Janeiro, with following representing the U.S.: Adolph A. Berle Jr., American Ambassador to Brazil (delegate); Loring B. Andrews, Office of Inter-American Affairs; Col. Theodore L. Bartlett, Army Air Forces; Robert R. Burton, Dept. of State; Dr. J. H. Dellingler, Bureau of Standards; Ralph L. Higga, U. S. Weather Bureau; Rosel L. Hyde, FCC; Commissioner Ray C. Wakefield, FCC; Marion Woodward, FCC; Arthur L. Lebel, Dept. of State; Constr. Paul D. Miles, Navy Dept.; Harvey B. Otteman, Dept. of State; Col. JWC. Simson, GAA; Commodore E. M. Webster, U. S. Coast Guard; Hubert M. Curry, American Embassy, Cuba (secretary).

NEGOTIATIONS between NABET, NBC and American over terms of a new contract were underway late Friday with wage and hour demands under discussion. Court decree requires net to recognize technicians as bargaining agents for platter-turners regardless of Petillo threats.

GRID FEATURE SPONSORS

CRITERION RADIO FEATURES, Chicago, has sold its quarter-hour Jimmy Evans Football Forecast effective Sept. 21 for 11 weeks to following sponsors: Black Eagle Oil; Milwaukee, on WEMP WIBU KFIZ WHBY WOSH WTAQ; Dixie distributors, Spartanburg, S. C.; Shlitz & Champion Velvet on WORD; Clark Tire & Rubber Co., Monroe, La., on KNOE; Dumas Gidden Co., North Carolina Pure Oil distributors WTAG; Fisk Tire & Rubber Co., Buffalo, on WEIR.

Monday Named WWJ Day
City of Detroit

EXECUTIVE OFFICE

August 13, 1945

As Mayor of Detroit, I am happy to designate Monday, August 20, as WWJ Day. On this date, Radio Station WWJ will complete 25 years of service, the first station in America to attain the quarter century mark.

Throughout its history, the operation of WWJ has been characterized by a devotion to the public good and by ideals so high as to have given every Detroit resident a feeling of pride and satisfaction in the record and achievements of the world's oldest commercial broadcasting station.

Radio exemplifies one of our most cherished liberties, the freedom of speech, and I am certain that all of our people, including the other splendid radio stations in Detroit, will join with me in paying this fitting tribute to Detroit's First Station.

Edward J. Jeffries
Mayor of Detroit

“25 years ago today, on August 20, 1920, Radio Station WWJ (then 8MK) of Detroit, broadcast its first program, and has been operating on a daily schedule since that time.”

Hour of Charm Program
over NBC Aug. 19, 1945

“The United Press is proud to have been associated with you.”

Mims Thomason
of the United Press

“Yesterday WWJ was given a nation's homage. My home station, from where I made my first broadcast in 1922, was celebrating its 25th Anniversary. Gosh how time does fly.”

Fred Waring
Director Waring's Pennsylvanians

“May I be among your well wishers on the occasion of the 25th anniversary of Radio Station WWJ.”

Easton Woolley
Director of Station Relations, NBC
"I feel I am part of WWJ for the past 25 years, having been on its original broadcast."

CAPT. EDDIE RICKENBACKER

"25 years of successful broadcasting and outstanding accomplishments serving the public interest ... an achievement of great value and a credit to the entire radio industry."

E. W. EVANS
President The Billboard

"WWJ is celebrating its 25th birthday today and I want to join with radio people all over the world in sending my congratulations. It would take me a half an hour to tell you all the firsts that that station has to its credit. WWJ pioneered the way back in the days when radio receivers were little cardboard boxes which brought in sound by virtue of a little tiny piece of crystal. Today it is one of the greatest stations in all the world. I wish I were in Detroit celebrating with them."

Broadcast by Robert St. John over NBC, Monday, Aug. 20, 1945
Feature of the Week

ONE OF the great and unexpected revelations of a single radio station's achievement to come out of this war is the story of how the Saipan station, KSAI—built by the OWI using a Western Electric 50 kw transmitter—saved 20 of the B-29 superfortresses cripple over Japan, the lives of more than 200 flyers, and property worth more than $15,000,000.

In September, 1944 it was decided to put up a station on the newly liberated Saipan, powerful enough to reach the Japanese people by medium wave.

James O. Weldon, chief of the OWI's Bureau of Communications Facilities, and five members of his staff went to Saipan in November, 1944 to construct the station. They started installation on November 20, and 31 days later after working day and night, assisted by Army engineers, and Signal Corps men, the station was ready.

It operated on 1010 kc and consisted of four directonal antennas which gave a 250 kw effective signal toward Japan, but there was a question as to whether such a signal could reach the Japanese population centers effectively. However, too occurrences almost immediately answered the question. Twenty minutes after the Saipan radio went on the air, the Japs tried to jam it. The next evening Tokyo radio advised listeners to turn off their radios, go to bed early and conserve their strength. Then OWI engineers received a request from the B-29 Bomber Command stationed on Saipan that the transmitter be left on 24 hours a day for four days so that the bombers could check the signal.

Sellers of Sales

A FOUR-POINT program is considered by Leonard Gossner, radio director of Fitzgerald Ad. Agency, New Orleans, in buying time for a successful radio campaign.

He reasons that a successful campaign requires more than just clever copy or a jingle or even a program. "You've got to broadcast when there are enough people listening to your station to make it worthwhile," he declares, "and you've got to broadcast often enough to really drive home your message.

On the basis of this he considers: 1. geographic coverage; 2. audience availability; 3. listening habits; 4. frequency of impact.

Leonard was born in New Orleans, March 1901. He went to Tulane U., graduating in 1921 with a BBA. He has been in advertising since 1923 and with Fitzgerald since 1929.

Married in June 1936 to Natalie Guthrie, Leonard has two children. Natalie, 16 and Len, 14. He is a member of the American Marketing Assn. and the Stratford Club of New Orleans.

So you think a one-year-old is a little young to smoke a big black seegar? Not WSAI! For, even though today is our first birthday, we're almost as old as radio itself.

Just one year ago today, we gained the right to place after our call letters four all-important words... four words that stand for significant community service... four words that give added meaning to that phrase in our license, "in the public interest".

Those four words are "A MARSHALL FIELD STATION".

So here's thanks to all those advertisers and agencies who have helped to make this, the first year under the Marshall Field banner, one of the most successful periods in our 23-year history!
As you know, WIND broadcasts the news 51 times daily—probably the heaviest newscast schedule in America. In order to produce this 24-hour news output, our news room receives all three news services.

"On the basis of our experience, we want you to know that we regard AP as a 'must' service. The name Associated Press means much to our listeners, and to us. We have found during the past three years that we can rely on AP to supply what we need when we need it. It makes no difference whether it is a story of world-shaking proportions or only news of local interest.

"They all are important to us, and to our listeners, and we get them all fast and straight on the AP news wire. The program material you send is a big help in the preparation of other special WIND shows. Service has been good."

Ralph L. Atlass
President
Radio Station WIND, Chicago, III.
The Key To Three Cities!

- Albany, Troy, Schenectady are one vital market which can be yours—delivered by WTRY.

These three cities, while separate entities, actually form one major market. They are geographically close, alike in their thinking and in their buying habits. Most important, they are covered by one radio station doing the job of three—doing it thoroughly and economically.

WTRY’s strong signal, plus its influence and prestige, assure you a wide listenership in all three cities. No other medium can deliver so much—and at so little cost. Yes, three cities—and the key to all three is WTRY.

Basic Blue Network • 980—Middle of the Dial—980 • Representative: Paul H. Raymer Company

WTRY, Albany-Troy-Schenectady • Associated with WSYR, WKNE, WELJ
"We've got to screen-out the women. Sit there and give me your reactions!"

- One of the wonderful things about spot broadcasting is that you can select your audience, and save the cost of dead-head listeners! Men, women, children, young people or old, rural or urban—whatever group buys your product, that's the group you can get!

Not only that, but there's the added possibility of directing your sales appeal exactly to the geographical sections where it's most needed for better business.

How about giving spot broadcasting your consideration? We'd like to talk with you about it.

FCC Urges Bids on Station Transfers

Price Also Factor, Declares Avco Decision

By JACK LEVY

MAINTAINING that its present transfer procedure is inefficient, the FCC last week, in making public its 4-3 decision approving the sale of the Crosley radio properties to Avco, proposed a 7-point plan whereby the Commission would have “some real voice” in future changes of station ownership.

A public hearing will be held at an early date, the Commission announced, to determine whether within the framework of the plan which, if adopted, would apply to all transfer applications filed after Sept. 20, a “completely satisfactory procedure”, which would include ceilings under which stations could be sold and determine the extent to which financial interests should be permitted to control stations, will be recommended to Congress.

The Commission also served notice that it will consider no further applications, such as the Crosley-Avco transfer, in which broadcasting facilities are lumped with other assets unless separate price is agreed upon for stations involved.

The plan offered by the Commission, included in the majority opinion concurred in by Chairman Porcelli and Commissioners Lord and Wills, would provide all interested parties an opportunity to apply for licenses of stations offered for sale. It would enable the Commission to grant the transfer to the applicant best qualified to operate the station in the public interest.

It provides that the Commission and the applicant publish the terms and conditions of the proposed sale of a station, the name of the prospective purchaser, and the conditions of the sale. Other persons would be invited to apply for the station on the same terms and the Commission would consider all applications on their merits, with selection of transferee determined on the basis of public interest.

A 60-day period would be given following the receipt of an application for other interested persons to compete if no other was filed the original application would be considered on its merits. If otherwise received, all would be considered on their merits.

The plan would not apply to transfer of less than a controlling interest in a station nor in cases where transfer involves no real change in control.

Carries Out Intent

Such a procedure, the opinion declared, “will more adequately enable the Commission to carry out the Congressional intent that the best qualified person be licensed for each available frequency. No harm will result to the transferee since he either sells his station to the person he selected under the terms and conditions specified in his contract, or he sells to another person on the same terms.

“However, if he is unwilling to sell on the same terms and under the same conditions to another person, whom the Commission believes is better qualified, then the transferor need not sell at all. The only change which this procedure will cause is giving the Commission, some real voice in the selection of a proper successor.”

Basic Infirmary

While approving the transfer of the Crosley properties, the majority opinion noted that “grave questions of public policy” were involved. “To deny this application,” it declared, “would reverse 17 years of precedent and establish new policies.” The majority was therefore persuaded to grant the application and consider the promulgation of a uniform rule for future transfer cases, buttressed by Congressional clarification of certain questions where our power is not specific.

The present case, the opinion asserted, highlights “a basic infirmary” of the Communications Act, in that it permits a man retiring from the radio business to select his successor. Under such power, it declared, the seller may influence the sale.

(Continued on page 81)

FM Applicants Must File Data by Oct. 7

(Text of FCC Announcement page 10)

THE FCC will begin the processing of approximately 500 applications for new FM stations in four weeks.

Announcing its policy for assignment of frequencies to existing FM licensees, to holders of outstanding construction permits, and to pending applicants, the Commission last Tuesday asked prospective owners of new stations to file all necessary data before Oct. 7.

Receipt of this information, it stated, will enable it to make as many grants after that date “as would be consistent with the availability of frequencies and other public interested factors”.

The Commission further stated it recognizes the difficulty which may be encountered in submitting complete engineering data by Oct. 7 and that it therefore “contemplates the granting of a substantial number of FM applications conditionally”, subject to later submittal of the desired information.

Soon Assign Frequencies

With regard to the 46 existing FM licensees, the Commission disclosed it would soon assign new frequencies to bring these stations into the 93-108 mc band and will require that regular programs on the new assignments begin no later than Jan. 1, 1946. Licensees will be given until Sept. 20 to file objections to the new assignments.

The Commission was making every effort to have the new assignments ready for present licensees by the end of last week, so that ample time would be afforded for filing objections. These assignments were to include seven holders of outstanding construction permits, making a total of 53.

Modified construction permits will be issued shortly to these seven holders together with the assigned frequency but, as in the case of existing licensees, the Commission will permit operation with less than the power specified in the assignment until materials and equipment are available. Feb. 1 was set as the deadline for commencement of regular broadcasting operations by this group of seven and Jan. 1 for initiation of equipment tests.

Simultaneously with its policy announcement, the Commission sent letters to applicants, licensees and CP holders requesting desired information. In these letters, the Commission recognized difficulties attendant upon the problem of obtaining equipment. It told existing FM stations they could continue to operate on their present assignments “until such time as it appears that receivers for the new band are generally available to the public and owners of existing receivers have had the opportunity to adapt or convert them to the new band.”

Terminate Dual Operation

It pointed out, however, that when receivers and converters are available for the new frequencies, “dual operation will be terminated”.

Referring to its notice of Aug. 7 [Broadcasting, Aug. 13] setting forth a 60-day period for filing and processing of new applications, the

(Continued on page 78)
FCC Dismisses Charge Against WDSU With Stern Reminder

WITH A STERN reminder that a radio station “is not an instrumentality to be used for his [the licensee’s] personal political advancement,” the FCC last week dismissed a complaint against WDSU New Orleans as a result of a complaint filed by Sen. John H. Overton (D-La.). The Commission served notice, however, that the record in the case is subject to further review when renewal time arrives.

Mr. Overton had charged the station with refusal to grant him “equal opportunities” for political broadcasts during his campaign for renomination at the primary in Louisiana a year ago to that given to one of his opponents, E. A. Stephens, majority owner of Stephens Broadcasting Co., licensee of WDSU: A hearing on the complaint was held last March before Norman S. Case, former commissioner [BROADCASTING, April 2].

Some—Overton Claims Upheld

In an Opinion and Order on the complaint (Docket No. 6740; B-212), the Commission upheld claims of Sen. Overton that he had not been offered the choice time granted to Mr. Stephens who had made his broadcasts at 7:45 p.m. on weekdays. The Senator had been offered time after 10:35 p.m. on these days, Saturday evenings and Sunday afternoons.

The Commission refused to accept the defense of WDSU that it had met the obligations imposed by Section 315 of the Communications Act of 1934 by offering the same amount of time to each candidate. Pointing out that this provision requires stations to afford “equal opportunities” to opposing candidates for public office, the Commission declared that “the meaning of this term is not to be arrived at by the application of narrow, legalistic notions.”

“The obligation imposed upon a licensee by this provision,” it held, “is not discharged merely by offering the same amount of time to each candidate. Quantity alone is not the sole criterion of fairness; for it is a matter of common knowledge that the size of a station’s potential audience, an important consideration in political broadcasts, is much larger during the early evening hours than in other portions of the broadcast day.”

The advantage of the early evening hours, the Commission continued, is borne out by WDSU rate schedules which, along with other stations, prescribe their highest rates for periods between 6 p.m. and 10 or 10:30 p.m. “Consequently . . . it cannot be said, and respondents do not seriously so contend, that their offer to make available to Sen. Overton time after 10:35 p.m. represents a satisfactory fulfillment” (Continued on page 77).

Porter Speaker

PAUL A. PORTER, chairman of FCC, will be principal speaker on the Associated Broadcast Company's network inaugural ceremonies, Sept. 17. The two hour program, scheduled for 2 to 4 p.m., will originate from the studios of WWDC Washington under the supervision of Ira Walsch, program director.

Associated Group In First Meeting

Program Structure, Sales and Promotion Are Discussed

ASSOCIATED BROADCASTING Corp. held its first station affiliate meeting in connection with its Grand Rapids, Mich., headquarters Sept. 7-9, with discussion centered on program structure as well as sales and promotional plans.

Official representatives of the seven stations expected to attend included: R. E. Embry, WLEE Richmond, Va., and WITH Baltimore; Howard Johnson, KNAR Salt Lake City; L. W. McDowell, KFOX Long Beach; Helen Mobberly and Ira Walsh, WWDC Washington; Edward Hoffman, WMIN Minneapolis; Roy Albertson, WBNY Buffalo; G. Meyer and F. W. Meyer, KMYR Denver; James Hopkins, WJJB Detroit; Myles Johns and Michael Henry, WTMV E. St. Louis; Ken Church, WIXY Lebanon; W. S. Pot, Fred Randy, Larry Flynn, WMEX Boston; and Jerry Akers, KSAN San Francisco.

Key personnel of Associated has been appointed by Leonard A. Versluis, president.

Assisting Mr. Versluis, who owns WLAV Grand Rapids, and was instrumental in forming the Wolverine network, will be Roy C. Kelley, vice-president and as executive vice-president. Mr. Kelley is also president of the Wolverine network and will coordinate sales activities of the new network's N. Y., Chicago and Hollywood offices.

Working as personal assistant to Mr. Versluis is Richard F. Concur, former director, who formerly was station relations director of Mutual. Mr. Concur will concentrate on network programming, with emphasis on public service features and morning news.

Clayton W. Kunning, vice-president and general manager, is new to radio but has had an extensive banking career in New York and the Midwest. The former president of Mutual, charge of station relations is William G. Henderson.

Eastern Division headquarters, located at 1721 Channing building, New York, is headed by John Whitmore, former news director of Mutual, who will have charge of the network's eastern activities. Sales manager for the New York branch is Ed Pancost, formerly of WINS New York sales staff.

Midwest division office, at 360 N. Michigan, is headed by John Hopkinson, as president.

West coast operations will be supervised by Van C. Newkirk, vice-president and western division manager, with offices at 3055 Wilshire boulevard, Los Angeles. Mr. Newkirk was formerly program director for Don Lee-Mutual. Western sales manager is Gene W. Lee, former co-owner and manager of KPXJ-Seattle, according to Don Lee.?.

Mary Ellen Ryan, formerly of Don Lee Broadcasting System, is traffic manager and will also handle publicity for the West Coast.

Porter Reaffirms Belief in U.S. Broadcasting and Lists Abuses

CONTINUING what seems to be a concerted drive to clean up the "plug-uglies" and other objectionable matter in radio fare, Paul A. Porter, FCC chairman, in an article in the October issue of America magazine reaffirms his belief in the oft-observed "American system of broadcasting" and its inherent qualities while urging the industry to revise its standards.

Opening his article with instances of bad reaction to commercials on the part of acquaintances and writers, Mr. Porter points out that listeners either develop a dead ear to objectionable commercials or, worse, not having this faculty, become insensitive. He insists on equality of press and radio but refutes "professional radio apologists" in their "misguided analogy" between the two. A reader can reject an advertisement, he declares, in a split-second glance, whereas the listener cannot easily turn off his set.

Constructively, Mr. Porter poses two questions. "First: What kind of limitations, if any, should be placed, and by whom, on radio commercials which seem to a large section of the listening public to be too long and repetitious, or offensive, silly, and in bad taste? Second: Is broadcasting to become an almost exclusive medium for advertising and entertainment, or will it, in addition, continue to perform public service functions in increasing measure?"

Mr. Porter avows that he doesn't know the answer and his hope is to stimulate public discussion.

Three other questions which naturally follow are posed by Mr. Porter with a subtlety of tenses. "The question of what to do," he writes, "really divides itself into three questions: What can the FCC do? What might Congress do? What should the radio industry itself do?"

Bouncing back the action of these groups is the public opinion which Mr. Porter is endeavoring to concert from nebulous grumblings to a moving force. On the first question, the Chairman holds the disputed power of the "public interest" clause in the Code as the answer. The temptation of stations, he writes, has been to ignore listener's tastes in favor of competition for commercials, but "Certainly I do not begrudge profits or sound balance sheets" except when "excessive" (Continued on page 74)
Military Delays Surrender Broadcast

Technical, Censorship Problems Cause Cancellation

OFFICIAL surrender of Japan was brought to the world the night of Sept. 1 when a delayed pool broadcast carried the story of the proceedings aboard the USS Missouri in Tokyo Bay.

Original plan for the broadcast called for live pickup from the Missouri, which has a 2 kw transmitter used many times for direct broadcast to San Francisco. Because of technical and censorship problems decision was made by the military to delay the broadcast an hour-and-a-half, with President Truman picked up live from Washington between signing of the peace document and speeches by Gen. MacArthur and Adm. Nimitz.

Pool Narrators

As the ceremonies took place Merrill Mueller of NBC and Webley Edwards of CBS served as pool narrators. Mueller was chosen from correspondents attached to Gen. MacArthur's staff, Edwards from Adm. Nimitz' staff. Public relations officers made the selections, instead of using the lot-drawing procedure.

Execution of the broadcast setup was under direction of Gen. Diller and Lt. Col. Jack Harris, of MacArthur's staff, and Capt. Pittsugh Les and Lt. Monroe of Nimitz' staff. Proceedings took place on the veranda deck of the Missouri, with Mueller and Edwards speaking from an anti-aircraft gun mounting, behind and above the Allied signatories and facing the Japanese.

According to Mueller, Comdr. Don Thompson, radio officer for Adm. Nimitz, and Lt. Bruce Dennis, both at Guam, drew plans for transmission facilities. Lt. Munroe, stationed on the communications ship USS Ancon, executed the plan. Aiding also were Lt. George Zachary and Lt. Chick Morris, radio officers; Radioman Hank Cavell and Radioman Russell Anderson, of the Navy; Fred Haake, recorder, of Chicago; Radioman Walter Henc and Maj. Untermeyer of the Army.

Two sets of recordings were made, on acetate disc and Armour No. 50 magnetic wire recorders. The discs were sent by a destroyer to Lt. Col. Harris, who had taken over on board to Tokyo's transmitter. The wire recorders were sent via small boat to the Ancon, where the wire was rewound on the original recorders.

In all, 17 frequencies were set aside. Signals selected by RCA San

MBMW Meeting to Consider Net Plan, Coverage Terms Changes

TWO major proposals will come before the board of directors of Broadcast Measurement Bureau when it holds its regular fall meeting in New York on Friday. One is for the elimination of reporting primary, secondary and tertiary coverage of stations in the BMB reports and confining them to station circulation and percentage of circulation figures. The other is for a network participation plan which would permit networks to become BMB subscribers in order to receive data on network circulation. It is considered likely that both will be adopted by the board.

Suggestion that the primary, secondary and tertiary coverage terms be abandoned was first made last April by a group of Chicago Broadcasters. The arbitrary setting of 50% coverage or better as primary, 25% to 50% as secondary and 10% to 25% as tertiary has evolved much criticism which was ably set forth by D. H. Denenhof of the Katz Agency in an article in the Sept. 3 Issue of BROADCASTING.

Copies Sent Members

D. E. Robinson, vice-president in charge of research of Sherman K. Ellis & Co. and chairman of the BMB board committee on research, last week sent all BMB board members copies of the letter of the Chicago broadcasters and of Mr. Denenhof's article, together with copies of the resolution unanimously adopted by the BMB technical research committee at its meeting Aug. 29. Resolution points out the committee's conclusion that "the figures of radio families, percentage circulation and station circulation are of transcendent importance" and recommends that the BMB reports be confined to those data "without further stipulation of circulation levels" and that "BMB adopt an official position discouraging the practice of presenting BMB figures in circulation levels."

Technical research committee also endorsed the development of network coverage data by BMB which would enable advertisers and agencies to have the same sort of single-basis information available for network circulations that BMB is already set up to provide for individual stations. Details of the network circulation plan have not been divulged but it presumably entails methods for elimination of duplicate coverage arising from individual family votes for two or more stations affiliated with the same network and for providing the networks with data on affiliates which are not individual subscribers to BMB.

J. Harold Ryan, NAB president and chairman of the BMB board, will preside at the session on Friday, first meeting of the board since May 3. Board will also hear the reports of Mr. Ryan on the actions of the executive committee, of which he is also chairman; Hugh Feltis, BMB president, on organization.

ALL IN A DAY

Interference Problem Just
Routine Stuff for FCC

ONE OF THOSE problems which either gives you gray hair or makes life very fascinating—depending on how you look at things—faced the FCC last week. It was, to put it mildly, somewhat "complicated." Try and follow us:

KOMA Oklahoma City (1520 on the dial) wanted to move down to 690. The reason: 1520 kc belongs to TGW Guatemala City under informal agreement and it was raising hell with the State Dept. because of KOMA interference in its primary coverage area. Besides, KOMA's signal interferes with WKBW Buffalo which operates as a Class I-B station on 1520 kc with 50 kw power and a directional antenna to protect KOMA.

KGGF Has 690

Now, it so happens that KGGF Coffeyville, Kan., operates on 690 kc and has no desire to change its location. Moreover, it wants to increase its nighttime power to cover a larger area. BUT, the present nighttime operation of KGGF interferes with KFPEQ St. Joseph, Mo., which has the adjacent frequency of 680 kc, and the present nighttime activities of KGGF interferes with CBP Montreal in violation of an international agreement.

SO, here's what the Commission did: It directed that KOMA be issued a 6-months temporary authorization on its present frequency with only 500 w night, thus eliminating interference to the Guatemala station and reducing interference substantially to WKBW. But it left a way open for KOMA by making its denial in frequency "without prejudice," so that if KOMA has another application anytime within 12 months "looking toward the permanent solution of the interference problem."

It incidentally suggested that "the proper use of the frequency 1520 requires the use of a directional antenna which will protect station TWG Guatemala and station WKBW."

Solution Helps KFPEQ

As for KGGF, the Commission permitted it to stay on 690 kc and will authorize it to move its transmitter to a new site, to install a directional antenna and to operate with 5 kw both day and night (it now uses only 500 w at night). This will substantially reduce interference to KFPEQ, adding 50,000 population to its coverage area, and eliminate objectionable interference to CBP Montreal. It will also mean gain of 125,000 potential listeners for KGGF in the daytime and approximately 33,000 listeners at night.

Ho Hum. Solomon wasn't so terribly smart.

PONTIF SEES RADIO ROLE IN REUNITING WORLD FOR PEACE

(Special From Vatican City)

IN AN extraordinary half-hour audience granted the U. S. Broadcast Mission in Europe last Wednesday Pope Pius XII expressed gratitude to America and American radio for spreading the gospel of good and placed upon radio the great responsibility of reuniting the world into a community of peaceful nations. His Holiness, speaking in English, personally greeted each member of the mission, then read a prepared statement taking cognizance of radio's influence in molding world opinion and contributing toward restoration of peace. He observed that radio is a force for evil as well as good and expressed hope it never would be used again as an implement of warfare.

"Like every human invention," the Pope said, "the radio can be used as an instrument of evil as well as good. It has been used, it is used, to disseminate calumnies, to mislead simple, uninformed folk, to disrupt peace within nations and between nations.

"This is an abuse of a gift of God, and it is for the responsible directors, as far as possible, to check and eliminate it."

"Let the good accomplished by the radio always outrun the evil, until the evil becomes weary and falls by the wayside. Is that too much to hope for? Certainly it is a noble goal, worthy of men's best efforts, and it is our fervent prayer."

Afterward with the group seated around his desk, the Pontiff talked informally about America and radio. He recalled that in 1936 he visited the United States, traveling coast-to-coast by plane. He asked about the ETO trip and the degree of damage to German cities, recalling his long service in Munich and other German areas.

The Pope stressed the importance of Vatican-station operations. Previously the Rev. Father Filippo Soccorsi, director of the Vatican radio, had taken the group to 12,000-foot transmitter and shortwave station, used on an average of about six hours daily.

Mission Returns

These are dispatches filed by Broadcasting's publisher, Sol Taishoff, on the eve of the Broadcasting Mission's departure from Europe. The group was to depart from Paris, scheduled to arrive in the U. S. Saturday.

He said the Vatican needs bigger facilities. Present transmitter was contributed by Marconi 15 years ago. Following the audience the Pontiff presented each member with two roses and blessed them as well as their families, friends, and co-workers. He also blessed roses and medals brought by individuals. Finally, he thanked America again as the premier nation. He agreed to pose for a picture at his desk with the group, a rare event.

Justice Justin Miller, Mission spokesman, thanked the Pontiff for the audience. Afterward he expressed the gratitude of the group and all the United States for the Pontiff's spiritual guidance. Franklin C. Gowen, secretary to Myron Taylor, ambassador to the Holy See, served as escort. He observed afterward that it was the first audience he had ever witnessed and the Pontiff thanked him for arranging the interesting session with the group. "The guests from America never seldom last more than a few minutes. Mr. Gowen took the mission through the Vatican, St. Peter's and other points.

ITALY WANTS TO BOOST COMMERCIAL RADIO

Costs $10 a Minute To Run Station In Italy

(Special From Rome)

Italy continues to operate a commercial broadcasting system but the nation's economic plight, with nothing to sell, has resulted in a lame structure with only two hours weekly sold on national networks. American Expeditionary Forces stations boast large Italian audiences.

Inspection by the U. S. Mission of Radio Roma and interviews with heads of networks revealed anxiety to boost commercial operations and improve programming. With Italy's industry virtually at a standstill few companies can afford advertising. Radio and press are relatively free in Italy in contrast to other European nations.

Deficit of 600 Lira Minute

It costs 1,000 lira per minute ($10) to operate Italian radio. The system realizes only 400 lira resulting in a deficit of 600 lira per minute. This includes set license fees as well as sale of time. In 1943 there were 1,860,000 receivers in Italy, half in Rome. Now it is estimated 40% are nonoperational due to scarcity of parts.

Italy has two networks, one keyed from Rome to a dozen southern stations, the other from Milanelo. In Rome, in the north, it is now operated with different names. Schism exists and probably won't be healed until new elections and a Polish station appears.

Under Italian law stations cannot sell 10% of their time but not sponsor news. That practice developed under Mussolini and the notorious Virgilio Gavdy, the Duke's propaganda minister. Then time was sold only by Fascists. The law holds time open to all qualified companies. Present sponsors include companies which buy four-quarter programs and two half-hour programs on the southern network as well as local 30-second spots. Sponsors are mainly food companies and expensive restaurants. No information is available in Rome on commercial operations of the northern network.

Radio Roma has a staff of 750, most of whom are said to be holding down 150,000 lira. Personnel who escape have been turned over to Mussolini. In the North sweeping changes are said to have been made. Chairman of Italy's radio board, Armando Rossini, attorney, has been in the past three months. Director of programs is Maestro Razzi, who preceded Rossini as chairman before the war. The Italian system was known as EIAR but separated operations are now known as RAI which means Radio Audizioni Italiane for the South and RAI or Radio d'Italia for the North.

Industry at Standstill

Italian industry is at a standstill because Nazis stripped the country of almost all machinery. Stations and networks were practically dismantled but Italians smuggled new tubes and other parts to restore minimum service, with Allied help. Although radio is sold, actual operating companies are government controlled through a holding company. Board of 12 is responsible to corporation stockholders but control is held by the government. No competition exists since the government has one station per city. However American and British mainstays have radio stations in all important cities. It is claimed in Rome that the U. S. Army station has 75% of the civilian audience because the public likes our light music. It is admitted some Italian programs are
Feed line

It takes just one 50 calibre machine gun on a P-51 Mustang Fighter to eat up all those bullets during one flight. The plane has six guns, so figure out for yourself how many slugs are tossed at an enemy plane. It would take 36 Air Force Armorers to carry all the ammunition.

Firepower. That's the stuff that wins wars. And it takes the same kind of power to sell goods.

If you've got something to sell in Baltimore, Maryland ... W-I-T-H, the radio station, can and does deliver the "power" of more listeners for the lowest cost of any station in town.

Most time buyers know this ... so this is just a reminder that W-I-T-H, the successful independent, is your safe bet in Baltimore.

And remember ... Baltimore is the sixth largest city in the U. S. A.

How Many Stations Will Markets Support?

Retail Sales Are Proposed as Criterion

By DR. VICTOR J. ANDREW
Andrew Co., Chicago

THE NUMBER of broadcast stations operating now in any one city is fundamentally limited by two factors. In the larger cities, the average frequency is so low that no more than four or five stations can be supported. In small cities, the possible financial support usually determines whether there shall be a station. With the additional frequencies made available by FM, we may expect to see the economic factor becoming increasingly important.

(A list of the possible number of metropolitan FM stations for cities in Area 1 where AM stations now located may be found in the FCC preliminary report on rules and regulations governing FM (Broadcasting, Aug. 27).—Ed. note.)

Statistics in the accompanying table have been prepared for all major cities of the United States in an attempt to find from broad underlying principles how many stations each city may be expected to support. Important local variations between cities may be disregarded in order to have sufficiently simple data to permit broad comparisons between various cities. The one concern with a problem in an individual city ordinarily has available much more local information regarding the city than basic comparative information such as is presented here.

The first requirement is to find a yardstick to measure the ability of a city to support radio stations. The measure chosen is the retail sales of the city. The retail sales estimate for 1944, as published in the May 15 issue of Sales Management has been used.

The next step is to determine the amount of retail sales in dollars which is necessary to support one station. This has been done by analysis of the number of stations now existing. Thus the data presented has no absolute significance. It serves simply as a comparison between different cities.

The method of making the calculations is as follows. All cities containing one station were listed. This list of 464 cities was found to contain an equal number of cities with more and with less than 15 million dollars of retail sales per year. It is therefore assumed that the normal city supporting a station is a city with 15 million dollars of retail sales. Similarly, a normal of 65 million is found for supporting two stations, etc.

It is noticed that the retail sales increase much more rapidly than the number of stations. This may be ascribed in part to (1) greater difficulty in finding frequencies in larger cities. (2) A station is required to support an average large city station than an average small city station. (3) the small city station does have a poorer economic position than the large city station.

THE NUMBER of stations of all types it economically feasible to establish is determined by Dr. Andrew on the basis of the retail sales volume of each city. The ratio of the number of stations supported is determined by an analysis of the number of outlets now existing. No absolute significance is attributed to the results which are intended simply as a comparison between cities.

Examination of the accompanying data to determine which cities may support additional stations reveals that many of those which appear attractive are suburbs adjacent to large cities. If a frequency can be found which is available in the suburb, it usually can also be used in the large city. The greater economic attraction of the larger city dictates that the frequency should be used there. The data here presented may not indicate that the large city can support the station as well as the suburb. This is due to the fact that our standard for "support" varies with the size of the cities. The data here presented can be used only to compare cities of similar size. No statistics are needed to make comparisons between large and small cities. The economic advantage is always with the large city.

A closer examination of the statistics reveals that if a city has less than the normal number of stations, those stations are in the top 20% of all stations in similar cities. If a city has one more than the normal number of stations, these are in the bottom 20%.

BORN in 1902, Dr. Andrew was graduated from Wooster College, Ohio, with a BS degree in 1926, won his MS in 1928 and Ph.D. in 1931. He worked with Prof. Arthur H. Compton at the U of Chicago on the cosmic ray and X-ray groups accompanying him on an expedition to Pikes Peak in 1932. That same year he joined Westinghouse as radio transmitters. There he invented a type of filament construction in use now in high voltage rectifier tubes. In 1935 he joined Doolittle & Franklin Co., Chicago, as chief engineer, founding his own company, specializing in antenna engineering and manufacturing, the following year.
ALL NEWS IS GOOD NEWS ON WCOP

WCOP, as the Boston Cowles Station, puts special emphasis on good news. That means complete news and frequent news, smartly edited for radio alone.

WCOP news is complete in content. It's the only station in Boston with all three wire services — INS, UP and AP. WCOP gets all scoops, with a triple check on all questions, and a minimum of repetition.

WCOP news is complete in treatment. Five crack radio newsmen, headed by Ron Cochran, operate for WCOP one of the best equipped radio newsrooms in New England. Scripts are thoroughly edited radio-wise.

WCOP news is frequent. 12 newscasts every weekday and 5 on Sunday are making WCOP a news tradition in Boston.

WCOP local news is backed by top American news commentators and a tie-up with the world-famous CHRISTIAN SCIENCE MONITOR.

WCOP has a few choice news availabilities for sponsorship. Carefully presented news gets careful listenership — and so do adjoining commercials.

SPECIAL AVAILABILITY NOW: Daily 10-minute program direct from offices of CHRISTIAN SCIENCE MONITOR. Ten minutes of news and commentary by noted Monitor Staff member, followed by a WCOP local five-minute news period. May be sponsored complete, or each section is available separately.

FOR RATES AND FULL INFORMATION on this period and all other newscasts, see any Katz Office, or get in touch with Norbert O'Brien, Commercial Manager, Station WCOP, Boston.
European Nations Girding for Struggle Of Superpower Broadcasting Stations

(Special From Luxembourg, Delayed)

A BATTLE of radio goliaths already is taking shape in Europe, with superpower stations in the standard broadcast band either on the air or in the blueprint stage. Only lack of equipment has delayed the start of what may become an angry conflict among European nations to dominate the political and social thought of Europe. Britain and Russia at present have the loudest radio voices, but all nations, large and small, aspire to be heard and have or are prepared to order transmitters of 100,000 to 800,000 w (the U. S. maximum is 50,000 w).

When the war began six years ago broadcast allocations agreed to at the Lucerne Conference in 1933 were jettisoned. England, Germany and Russia preempted the frequencies of smaller sovereign nations and loaded them with power and beamed signals.

Radio Luxembourg, turned over to SHAEF by the Grand Duchy and since VE Day operated by the Army's Information Control Division, successor to Psychological Warfare Division, shifted frequency to 232 kc, a longwave clear channel otherwise assigned. It uses power of 135,000 to 160,000 w.

But while Radio Lux is a powerful station and is America's official voice, it is a midget in contrast to the outputs of British and Russian stations. Best information is that the BBC station at Drotch uses 800,000 w, while at Moscow a 750,000 w station is reported operating on 620 kc. That frequency is allocated to Radio Brussels, which is operating a 15,000-watt on it, but proposes to install a 100,000 w station on that channel and a second 100,000-watt for 932 kc as soon as it can get the equipment.

Stockholm is said to be about ready to begin operation of a 760,000 w station in the longwave band, while Radio France is known to be planning at least one 400,000-watt.

BBC, which more and more dominates the continental radio scene, already has urged prompt holding of a conference of European nations to settle allocations. While FM and television are being considered, the longwaves which can use superpower are the most coveted.

Whether the United States will remain in the European radio picture indefinitely is uncertain. OWI for weeks had been trying to enter an agreement with the Grand Duchy for continued operation of Radio Luxembourg, but under civil rather than military auspices. This was prior to transfer of OWI functions to the State Dept. The station, formerly operated by a commercial syndicate with signals beamed to Great Britain, much to BBC's chagrin, soon will be relinquished by the Army's ICD. Plans already are under way to move the operations close to the American headquarters at Frankfurt.

Nazi Portable Outfit

A 100,000 w Nazi transmitter installed in a series of railroad cars, complete with studios, has been captured and now is near Frankfurt. As soon as adequate housing facilities are provided, the station will begin operation as the successor to Radio Luxembourg, as far as the Army is concerned. Lt. Col. Samuel R. Rosenbaum, now commanding Radio Luxembourg, has already finished blueprinting the new operation.

Even if the United States does not take over Radio Luxembourg on a leasehold basis, there is the possibility that arrangements will be made with some other smaller sovereignty or republic for broadcasting rights. Longwaves to supplement the shortwave transmissions are regarded as highly desirable at this stage.

THE VICTORY LOAN

October 29-December 8

For radio's last great drive effort, the Victory Loan, the Treasury is now preparing a group of transcribed programs which will be the finest ever offered the broadcast industry: New Treasury Salutes • Hedda Hopper's Diary • New Music for Millions • Sing for Victory • Sports Personalities. ALSO: 9 Packets of live announcements. NEW SONGS • NEW STORIES • NEW MATERIAL FOR EVERYTHING FROM STATION BREAKS TO FULL PROGRAMS. And ALL available for local sponsorship!

Full details soon by mail from Radio Section, War Finance Division

This space donated to the U. S. Treasury by station WBIG, Greensboro, North Carolina.
A well placed pass, straight to the receiver, is like a well placed advertisement. Both bring results.

Advertising is Well Placed on WSPD—the 5,000 watt, NBC station which covers the rich Northwestern Ohio-Southern Michigan area—the home of one and one-half million prosperous prospects.
Columbus Women Tell WBNS When and Why They Tune In
By HELEN R. BITTERMAN
WBNS Columbus Sales Representative

IS THE American woman who listens to "soap opera" neurotic? No—if we may judge from a thousand women in Columbus, O.

Between October 1944, and May 1945, I talked to 1,023 women in groups of from 17 to 150. More important, they talked back. They were all women whose husbands earned more than $2,000. All had been at least to high school and many had been to college. Except for seventeen, they were all housewives. And over four-fifths of them listened to "soap operas"—and liked them.

The first group I talked to, a neighborhood group in the university district, started out by denying stoutly that they ever listened. But little by little, by asking questions about the plots of the 22 serials WBNS was carrying at the time, answers began to come. As soon as the women saw that their neighbors—perfectly respectable women—would stoop to listen to a "soap opera," they all broke down and "confessed".

I asked six questions of each group. And here are the results along with the questions:

"Do you listen to daytime serials?"
Out of 1,023 women, 939 did listen. The remaining 84 did not. Of the 84, 17 were professional women who were not at home during the day. The remaining 67 did not listen to serials at all. I asked these 67 what they did listen to during the day. Three didn't listen to the radio until their husbands came home in the evening. Sixty-four liked music. Thirty-four of the music lovers had small children in the home.

"Why do you listen to daytime serials?"
They listen to the radio for company. By 9 o'clock in the morning, the house is empty. Mother has had time for a second cup of coffee and a glance at the morning newspaper. And then it is time for "Valiant Lady," or its equivalent on another network.

Many women said they had portable radios which they carried about with them as they went.

"Stay Home to Listen?"
"Do you stay at home to listen to the radio instead of going about your social activities during the day?"

Only two women of the 1,023 said that they'd stay home, say, from the movies, or a shopping trip, to listen to an afternoon serial.

In other words, listening to radio is part of a regular pattern of daytime activity. The housework is over, say, by 1:30 p.m. And until 5 p.m., the Columbus housewife in the upper brackets is out marketing, shopping, or calling, or going to the movies. At 5 p.m. she returns to get dinner—and on goes the radio again.

This pattern of listening is not confined to the 1,023 housewives I talked to. The WBNS Hooper ratings confirm it. There is a level of listening audience sustained from 9 a.m. to 11 a.m. At that time and until 1:30 p.m.—in other words, during the lunch period—the peak of daytime is reached. The level of listening then sinks gradually. At 5 p.m. it again climbs upward to the evening listening levels. The pattern of radio listening depends a great deal on the general pattern of household activity.

Substitute for Company

This is a very different thing from using radio as an emotional escape from frustration. It is simply a substitution of one kind of human companionship for another.

"Would you prefer music to a daytime serial while doing your housework?"

Only 64 out of the 1,023 women (6%) said they would. Of these, 34 had small children.

"Why do you prefer a daytime serial to music?"
It was hard to get the women to explain this preference. If there is any one reason, it is that they like to listen to stories, which carry interest over from one day to day, rather than to music.

"What kind of a daytime program do you prefer?"

(Continued on page 78)
Perfect timing learned in war will be carried into sales work by many a returning veteran. And when it comes to radio time, time buyers from coast-to-coast know that Weed & Company men are ready with complete data on top-notch availabilities.

With time their full-time business, Weed men are ready but not waiting. They are on the alert for new budgets seeking placement, and they help time buyers place them properly. The better stations, nationally represented by Weed & Company, know that “time will sell.”
CHUM, IN TORONTO,
ON AIR IN OCTOBER

CHUM Toronto is expected to be on the air sometime in October, according to managing director Al Leary, formerly manager of CKCL Toronto. The station is one of the first in Canada to obtain its 1 kw equipment since lifting of the equipment freeze in the Dominion on Aug. 24. Northern Electric equipment is being used throughout. Transmitter is located on a 40-acre farm northeast of Toronto, and studios in the penthouse of the Hermant Bldg., Toronto.

Chief engineer is Aurel Boisvert, formerly of CKAC Montreal. A number of returned servicemen are on the staff including Sgt. Dick MacDougall, formerly of CKL and CFBR Toronto, and Dunc Chisholm, RCAF, formerly heard on the Canadian Marconi Sunday network show L for Lanky. The station will have a large local news department.

Touch of Home

STEALING a leaf from WIP Philadelphia in an attempt to induce nostalgia in our servicemen, Tokyo Rose, some returning GI's inform, used to play the musical number "Bluebird of Happiness" at the same time it is customarily heard on the WIP Down Patrol. The station, incidentally, some time ago thought the song had outlived its usefulness and tried to take it off the air. The clamor was so great it had to be returned and still is played three times each morning.

Because of Al Leary's popularity it is understood that member stations of the Western Assn. of Broadcasters are recording a feature program for use on the opening ceremonies of CHUM.

Praise for KTUC

EFFORTS of a 250 w station to promote traffic safety have been singled out for praise by CBS in its "Listen" advertisement appearing in the Atlantic Monthly. The station, KTUC Tucson, Ariz., conducted a safety campaign for Pima County's bike-riders, found out over four hours out of 143 in acceptable condition, and awarded War Stamps to proud owners. Earlier, KTUC set up a brake-testing station outside its studio, inspected 23,768 cars. Of these, 1,888 had faulty brakes, with 1,400 getting immediate attention. Pima County police and highway patrol officials cited the station's civic enterprise. CBS called it further proof that small stations have greater power than wattage in their listening area.

RAY INMAN, art director of Prairie Farmer and WLS Chicago, has resigned to become head of the art department for Burton Browne Adv., Chicago.
WAGE....
SCORES BIGGEST MAIL PULL IN
THE HISTORY OF SYRACUSE RADIO

Central New York listeners have given WAGE another "First," and further solid proof of WAGE's unequalled influence in the Syracuse market.

The souvenir pictured on this page was offered for four days only (August 15, 16, 17 and 18) and on local programs only. No network adjacencies were used. 25,060 pieces of mail arrived in the first seven days. This mail came from more than 20 upstate counties, attesting to WAGE's unsurpassed coverage in this market.

In 1944 and 1945, Crossley and Hooper studies ranked WAGE first in daytime listenership. Now the responsiveness of that audience is demonstrated in the greatest flood of mail ever poured into a Syracuse radio station.

*(All mail was tabulated by The Syracuse Letter Company. Details on request.)

The EDWARD PETRY CO.
Monte Carlo Building Station; U. S. Officials Show Interest

New 120,000 w Outlet May Be Used to Give U. S. Viewpoint to Countries on the Continent

(Special from Monte Carlo, Monaco)

THIS tiny principality on the Riviera just three miles square may become the new seat of European commercial radio, with the United States as possible lessee of time or of the station itself. New 120,000 w standard station is now under construction, to be ready in 18 months. It will be known as Radio Monte Carlo.

Construction is by a private company in which Monaco owns 6%. Controlling owners are French businessmen interested in commercial radio along the prewar lines of Radio Luxembourg and Normandie. To operate on 1066 kc, station will cover France, Italy, British Isles, Germany and North Africa, according to the owners. An antenna atop Agel Mountain, with sheer cliff rising 3,000 feet above the Mediterranean salt water, should provide phenomenal coverage.

Letter to the Editor

EDITOR, BROADCASTING:

I rather hesitate to give undue publicity to the "cancel-test" which, according to BROADCASTING of August 17 (page 85), is being adopted by one of the major networks to ascertain the popularity of certain of its shows; but I think this practice should be frowned upon by radio management before it develops to the stage where it will be frowned upon by the radio listener.

I agree that this is a positive test which involves a minimum expenditure of time and money, but certainly it is a negative procedure carried out at the expense of the listener.

Every station rightfully prides itself on its listener-loyalty which it has gained through hard work over a long period of time. Why should we not show the listeners the same loyalty that we expect of them?

Let's cancel the "cancel-test".

The show MUST go on!

ARTHUR L. MARTIN,
Program Director,
WIZE Springfield

CBS Preview

CBS WILL BROADCAST "Panorama Preview" of its fall and winter programs, 3-4:30 p.m., on Sept. 16 and 23, featuring the stars and personalities of the networks' outstanding shows. Norman Corwin will produce the first 90-minute program from New York; William Robson the second from Hollywood.
A SMALL TOWN OF FIVE MILLION

We at WSM have remembered for twenty years that we are addressing a small-town audience. But we remember also that there are five million folks in that small town. They listen . . . we know it because they respond. They listen because never for one moment in all those twenty years of broadcasting have we forgotten that our kind of people believe what we tell them. We regard that as the most solemn sort of obligation. But it is also a magnificent selling force.
American Radio for the GI's in Europe

Continent System Hurdled Many Barriers

By SOL TAISHOFF
(Special from Paris)

HOW 3,500,000 GI's in the European theatre have been fed radio fare a la American Plan was demonstrated here in Paris to the U. S. Broadcasting Mission by executives of American Forces Network—practically all broadcasters.

Operating strictly along American lines, AFN has as its sponsors the various services of the Army, as well as other Government agencies. A "commercial department" handles the copy. Top domestic programs transcribed or produced by Armed Forces Radio Service are "decommercialized", with Army sponsors substituted.

Improvised at First

The story was recounted to the mission of 15 plus a number of added starters by Lt. Col. John S. Hayes (ex-WOR production head), AFN chief and his top aides. It is a radio romance demonstrating the ingenuity of American radio men in putting together a nearly continent-wide network of radio under almost insurmountable difficulties. At the start practically all of the equipment was improvised. It was put together with "hairpins, chewing gum and sweat", said one of the technical men with AFN.

Col. Hayes told the mission his staff of 30 officers and 300 men had "eaten, lived and slept" American radio since AFN started July 4, 1943. The 3,500,000 men in arms are about to be turned back to American broadcasters, still conditioned for radio the American way.

AFN Will Continue

AFN will continue its operations in ETO as long as there's a GI left to listen, Col. Hayes said. The network once totaled 55 stations, including two 100,000-watters (Munich and Stuttgart). It broadcasts a 24-hour per day schedule. Of this 140-hour per week operation, 52 AFN hours are either shortwave or transcribed by AFRS.

As demobilization goes forward, AFN operations will be curtailed. When redeployment activities are completed, a basic network of seven stations to serve American occupation troops in Germany will be maintained, including the two 100,000 w stations. Headquarters will be shifted from Paris to Frankfort—Gen. Eisenhower's base.

Five of the seven stations in Germany will be tied together by landline—Frankfort, Munich, Stuttgart, Kassel and Bayreuth. Stations at Bremen and Berlin will pick up by shortwave for rebroadcast. In addition three stations are planned in Austria at Linz, Salzburg and Vienna. Of the original 51 stations, 28 are left.

How did AFN get longwave frequencies? It "borrowed" two channels without permission from Bulgaria, and took "a few" from Sweden, with "some" permission, said Col. Hayes.

Col. Hayes said BBC had been "terribly helpful" in clearing up frequencies for the initial operations in England and in expediting copyright clearance and other complications which arose in setting up this unique operation.

Extra Audience of 5,000,000

He said surveys showed that at the peak AFN had 5,000,000 people listening to its programs, aside from the armed forces. It was this development which presumably forced BBC to introduce a "light" home program.

Operations of AFN were outlined by Lt. Hendrik Booraem Jr., U. S. Naval Reserve, chief of operations and former radio production executive of Young & Rubicam. He explained AFN is a joint Army-Navy venture, but that the Navy was "late". Bremen operations are conducted by the Navy because of the preponderance of Navy personnel there.

Maj. Robert S. Light, program supervisor of AFN (former radio and screen freelance writer and producer), told how AFN surveyed its audience on program wants. The result was the current schedule of two hours of news a day in 24 broadcasts, plenty of music and a minimum of "talk". During actual combat, wire recorded reports were broadcast. Two men were killed in combat on such assignments. News is given straight, he said. Murders, strikes and rapes are kept off.

In the "sponsorship" end, Capt. Frank Danzig, chief of troop information section (formerly CBS promotion), related how the commercial department functions. For the Education & Information Branch of the Army, courses at the five specialist schools in ETO are "sold".

Sample spot announcements were performed. They were in the best commercial radio tradition. Other commodities sold are V-Mail, War Bonds, USO, Stars & Stripes, GI bill of rights, and—the most spectacular—the anti-veneral disease campaign. That is the now famed (Continued on page 72)
ELECTRONIC TELEVISION IS AN RCA DEVELOPMENT

This is the eighth in a series of advertisements showing that RCA engineers developed the basic essentials of the electronic television system — including tubes and circuits.

RCA built the first all-electronic television transmitters and receivers — the first commercial television station — established the first television relay system — presented the first electronic theatre television — was the first to televise a baseball game and a Broadway play; and was first to televise from an airplane.

RCA is, and will continue to be, the leader in practical, successful commercial television. You may expect the best of all kinds of television transmitting and receiving equipment from RCA.

8. THE RELAY TRANSMITTER

TELEVISION video signals (because of the wide band width they require) cannot be easily transmitted over ordinary telephone lines. They can, of course, be transmitted over coaxial lines or over short lengths of ordinary cable that have been specially equalized. Such lines are not usually available at remote pickup points, and therefore it is necessary to relay the signal back to the main transmitter by means of a radio link circuit. Such a system was first used by RCA engineers. The first transmitter ever used for television relaying was built by RCA engineers. The one shown here was developed and manufactured before the war. Greatly improved designs will be available when the emergency is over and manufacturing resumes.

The Fountainhead of Modern Tube Development is RCA

PLAQUES were awarded managers of Oklahoma City's four stations by Chamber of Commerce, Junior Division, for civic service. Receiving plaques were (1 to r) Ken Brown, KOMA; Matthew Bonebrake, KOBY; Gayle V. Grubb, WKY; Bob Enoch, KOTK.

Pressing Problem
A STORY of an electric iron, a pair of pants, and a remote band broadcast on AFN Frankfurt came from the ETO this week. T/S Lee Jaffe of Brooklyn, formerly an engineer with New York's municipal stations WNYC and WNYE, was preparing for a remote broadcast of a GI dance band when he discovered just before going on the air that the current in camp was 220 volts, when it should have been 110. Spying a soldier pressing his pants nearby with an electric iron, Jaffe grabbed the iron with a hurried explanation and used it to limit the voltage to the amplifier, cutting the power to 110 volts. While the GI stood around without his pants and gesturing an unrecorded voltage his/I m s e l f, Jaffe put on the broadcast. A number was especially dedicated to the soldier and his day that night, and it is believed that relations are again harmonious.*

Election Campaign
THE CITY-WIDE Independent Citizens Committee for the election of William O'Dwyer as mayor, Lazarus Joseph as controller, and Vincent Impellitteri as president of City Council, has appointed Blaine Thompson Co., New York, to direct all its campaign advertising. Starting Sept. 15 through Nov. 6 radio spot and quarter-hour talks for the candidates will be sponsored by the committee.

Memorabilia
RELEASES sent from the San Francisco Conference by Dorothy Lewis, NAB director of listener activities, to women broadcasters at 425 stations have been placed in the Roosevelt Library at Hyde Park, as part of memorabilia of the United Nations Conference.

WO\W Plea Denied
RIGHT to recover payments made to ASCAP after the passage in May 1937 of a Nebraska statute outlawing such organizations and forbidding them to do business in Nebraska, was denied by the Woodmen of the World Life Insurance Society, licensee of WOW Omaha, by a State Supreme Court decision last month. The court held the station voluntarily made the payments with full knowledge of the facts and the litigation concerning the statute.

Music Contracts
ASSOCIATED Music Publishers, New York, has made music licensing agreements with stations WBLC Muncie, KLO Ogden, KALL Salt Lake City, and WNAX Yanks- tion. Music licenses have been extended with the following stations: KFAC KGY KOY KSLM KVOD WBNJ WBSW WBRK WCAR WOLU WWSW WREX WHBQ Whec WJAG WLBJ WLLH WNMP WMNL WOOD WPAW WPDO WRNL WSNR WSRB WSYB WTAG WTHH.

WOW Thanked
APPEAL of the public service efforts of WOWO Fort Wayne was expressed recently in a letter from John V. Carton, manager of the Fort Wayne office of the War Manpower Commission, which read in part: "On many occasions, spot announcements by Station WOWO have aided us greatly in quickly obtaining key workers for vitally important war posts. It might interest you to know that some of the announcements carried by your station assisted in the recruitment of workers who were assigned to the making of the atomic bomb; and, therefore, you and your staff had a very definite part in forging the tremendous weapon which helped in bringing war to a sudden and dramatic end."
How much mail can your station pull?

FIND OUT in this sensational Tom Mix Contest for Mutual Affiliated Stations.

WIN a $500 War Bond or one of seven other War Bonds totaling $1000.

GET national recognition for the selling power of your station!

An Equal Chance for every station! Simple! Easy! No Elaborate Presentations

The winner will be that TOM MIX Mutual Station which, from the period of October 1, 1945 to April 1, 1946, pulls the largest number of premium returns in proportion to the population of its primary listening area.

CONTEST RULES
1. PREMIUM RETURNS shall be defined as bona fide requests for premiums to be offered on the TOM MIX RALSTON STRAIGHT SHOOTERS PROGRAM only, during the period from October 1, 1945 to April 1, 1946.
2. POPULATION OF THE PRIMARY LISTENING AREA will be determined by and supplied to the research organization tabulating the results, by the individual Mutual stations. In the event of any failure to supply this population figure, the estimate of the Mutual Broadcasting System for that individual station will be used.
3. ALL PREMIUM RETURNS WILL BEAR INDIVIDUAL STATION CALL LETTERS, although addressed to a central mailing point. Therefore, mail will be credited to individual stations according to the call letters designated by the listening audience, rather than by postmarks on envelopes or by arbitrary geographic boundaries.
4. TABULATING will be done by a qualified research organization and your final station standing will be made available to you and the Mutual Network only in a confidential report.
5. IN CASE OF TIES duplicate prizes will be awarded.

IMPORTANT! In order to qualify for one of the eight prizes, promotion managers of the individual Mutual stations must show evidence of continuous promotional activities designed to build or increase the listening audience for the TOM MIX RALSTON STRAIGHT SHOOTERS program during the six months' period from October 1, 1945 to April 1, 1946. Any promotion manager, publicity director, or other individual employed by a Mutual network affiliated station, who has been entrusted by that station with the work of general program or merchandising promotion, is eligible to enter.

Midwest Farmer Day Staged by WNAX
For Five States Draws 70,000 Crowd

THIRD annual Midwest Farmer Day of WNAX Yankton, held Labor Day, drew some 70,000 farmers and their families from Iowa, Minnesota, Nebraska and the Dakotas. Selected "Typical Midwest Farmer" was John Oeser, of Westside, Ia. He and Mrs. Oeser will be given the annual WNAX trip to Washington to be guest of the President and other dignitaries. He was also given a tractor and Victory Bonds, with wrist watch for his wife.

The four runners-up were given trailers, with bonds and watches.

8 STATIONS BRING BMB TOTAL TO 540
ADDITION of eight more station subscribers to BMB in the last 20 days of August brought the total to 540 stations (including four FM and one Canadian station) with two-year commitments aggregating $225,810, as of Aug. 30, just a year after the broadcasters at the 1944 NAB convention had unanimously endorsed the BMB plan of station circulation measurement. New stations are: WNAX Yankton, S. D.; WWINX Washington, D. C.; WCAG Carthage, Ill.; WJXN Jackson, Miss.; WHDF Houghton, Mich.; WDEV Waterbury, Vt.; WWSR St. Albans, Vt.; WKF Key West, Fla.

Breakdown shows that the 535 AM United States stations that are BMB subscribers amount to 55% of the stations with night power of 10 kw or over, 67% of the stations with night power between 500 kw and 10 kw, and 56% of stations with night power of 250 kw or less. Broken down by network affiliation, BMB has 67% of American affiliates, 75% of CBS stations, 61% of Mutual and 64% of NBC outlets, as well as 41% of nonnetwork stations. These BMB stations are 61% of all operating commercial stations in the country.

New American Affiliate
WMMSA Massena, N. Y., will become an affiliate of American when it begins operations with 250 kw on 1340 kc about Oct. 1. New station is owned and operated by Waterfront (N.Y.) Times, which also owns and operates WNYN Watertown. Thomas R. McHough and James H. Higgins of the WNYN staff will be manager and assistant manager respectively at WMMSA.

C.O.D.
$150,000,000!

Cash on Delivery—$150,000,000 of it—is what farmers in the KATE primary coverage area were paid for livestock they fattened for market last year. Home of the Hormel, Decker and Wilson plants, this is one of the nation's big packing centers. Here, too, you'll find dairying and poultry raising at their prosperous best...for this is the heart of the country's richest farm territory. It has never known a crop failure! Also in the KATE primary coverage area is the town of Albert Lea, nationally known for the famous "Albert Lea Postwar Plan." There's only one sure way to sell this market...it's the KATE-way. Before you make up your next radio schedule, give us or our national representatives the opportunity to tell you how KATE can deliver this diversified market to you.

Radio Teaches Teachers
IN COOPERATION with NBC stations, WBZ - WBZA Boston-Springfield, Massachusetts, starting Oct. 13 is experimenting with a plan for presenting courses for teachers. Teachers unable to take improvement courses due to travel limitations will listen to Our Foreign Policy and supplemented programs, take examinations and be credited toward an undergraduate degree. "The Massachusetts Plan," has been adopted by notable educators and represents beginning of great cooperation between commercial broadcasters and educators for public benefit, according to Julius E. Warren, Mass. Commissioner of Education.

Admiral Offices
ADMIRAL Corp., Chicago, has consolidated its main offices in its principal plant at 5800 W. Corland St. Space previously occupied at 444 Lake Shore Drive will be taken over by Appliance Distributors, company-owned distributor of its products in the area.

Balloon Station
U. OF CHICAGO was authorized by the FCC last week to install a new experimental portable radio station aboard a free balloon within a 360 mile radius of Chicago. The balloon, to be known as the Cosmic Ray Laboratory, will be sent aloft to obtain scientific data regarding the nature of penetrating radiations in the stratosphere. Ant: small, light-weight transmitter to be frequency-modulated will be used.
LONE STAR CHAIN

"KICKS UP" SALES

FOR TEXAS BOOT MANUFACTURER!

Another of Many LONE STAR CHAIN Success Stories

Making city folks, as well as country folks, Justin Boot conscious, is the job assigned to Boyce House, and the Lone Star Chain is the medium picked to do it. Mr. H. N. Fisch, Sales Manager of the Company, says, "For several years the Lone Star Chain has been an effective and economical medium for reaching a huge audience of customers and potential customers of Justin Cowboy Boots and Justin Easy-Walker Dress Shoes. The sales power and influence of the Lone Star Chain has a definite and measured value to H. J. Justin & Sons. In fact, the Justin Boys consider this medium one of outstanding merit."

This is just another of the big success stories back of the LONE STAR CHAIN. Yes, for amazing results in one of the richest and biggest markets in the Southwest, it's the Lone Star Chain!

Durr Speaks Sept. 26
CLIFFORD J. DURR, FCC, will speak Sept. 26 on "Radio's Problem and Promise" at a two-day forum featuring "Tomorrow's Challenge," to be held at Christ Church, New York, Sept. 26 and 27.

BOVINE STATIC
Noise Mors Demonstration
OF FM Fidelity
WHAT happened to Walter Damm, FMBI president, and general manager of WMFM, Milwaukee's pioneer FM station, shouldn't happen to a calf.

During the recent FMBI board meeting at Milwaukee, Mr. Damm rose to show his colleagues a working example of fine FM broadcasting as exemplified by WMFM.

But the program was of a quality seldom heard on AM much less FM and Walter's face turned purple. Phoning the control room, he was told everything was fine.

The telephone company put a squad of eight trouble shooters on the job. They worked into the night and at 4 a.m. located the trouble - a soft spot where WMFM's cable goes underground. Digging, they found, resting snugly against the cable, the carcass of a very dead calf. A farmer, in burying the animal, had broken the cable covering with his shovel.

Gaskill on WNTB
HELP YOURSELF TO A PIECE OF BIRTHDAY CAKE... because it was you who made the first year of KSO under the new management such an outstanding success.

Just one year ago Kingsley H. Murphy became owner and George J. Higgins manager of KSO.

Since that time many interesting and outstanding changes have taken place at KSO—the biggest of which appeared on June 15th when KSO became the CBS outlet in Des Moines and brought to its listeners "The Biggest Show in Town".

Yes, we have completed a banner year with your co-operation. Many, many thanks from all of us here at KSO for your help in making our first year such an outstanding one.

KINGSLY H. MURPHY, Owner  •  GEORGE J. HIGGINS, General Manager

Represented by Headley-Reed Co.
Compton Samples Serial Listeners

TO DETERMINE what listeners think of the serial dramas sponsored by its clients, Compton Adv. Inc., New York, is sending program evaluation reports to sample groups of listeners to each of its programs, starting with the Procter & Gamble serial, Young Dr. Malone, on CBS.

Divided into two sections: General opinion and detailed criticism, report under the first heading asks respondent to check on program's entertainment value, on program as compared with last year's program, on its moral and social values, on the listeners state of mind after listening and whether the advertising message is too long, sincere and in good taste.

Questions, which listener is asked to check yes or no, are: "Is story far-fetched and unbelievable?", "Does the story remind you of happenings in your own life or in the lives of your friends?", "Do characters solve their problems in such a way as to be helpful to the listener who may have similar problems?", "Do the characters appeal to you as real people?", "Do you talk the program over with your family and friends?", "Has your husband or any other male member of your family ever heard this program?", "Do you think the radio story compares favorably with magazine fiction and current popular novels?", "Do you feel that listening to this program is beneficial to you in your relations with your friends and family?", "In what way?", "What other daytime radio programs do you listen to regularly?", "Have you any suggestions for improvement?"

---

35,500,000 Hear Truman

President Truman's broadcast of Sept. 1, proclaiming Sept. 2 as V-J Day, was heard by more than 35,500,000 adult listeners, according to a survey made for CBS by C. E. Hooper Inc., which rated the talk at 46.8. The President's talk on the V-J Day broadcast to the Armed Forces rated 31.3, with an adult audience of 23,000,000. Neither has approached the audience of the President's V-E Day broadcast on May 8, when he set a new daytime audience rating record of 64.1.

---

August daytime program popularity was led by the Canadian program Soldier's Wife with a rating of 14.4, according to Sept. 1 Elliott-Haynes ratings. Big Sister with a rating of 13.1 was second, followed by Ma Perkins, Bread of Life, Lucy Linton (Canadian origin), Pepper Young's Family and Woman of America. Most popular French daytime program was Jeunesse Dorée with a rating of 18.3, followed by Vie de Famille, Quelles Nouvelles, La Rue Principe and Grande Soeur.

---

BOND TO BE KIRO FARM DIRECTOR

CHARLES A. BOND, acting chief of the Radio Service, Dep't of Agriculture, resigned last week to become farm director of KIRO Seattle. He will assume his new position shortly after Sept. 15, succeeding Kenneth Yeend who was recently promoted to program director.

Mr. Bond was at one time with KQK Wenatchee, Wash., and was taken on Washington State College from 1935 to 1940. He has since been with the Dept. of Agriculture, the last two years with the Radio Service. He is the second official of the Department Service to enter the commercial radio field in the last four months, Wallace Kadderly, formerly chief of the Service, having resigned in May [Broadcasting, May 28] to become farm director of KGW Portland, Ore.

---

Sees TV Grocery Ads

FOLLOWING an investigation of TV at DuMont television station WABD New York, Paul Sayres, New York food broker, predicted that television will play a substantial part in the merchandising of grocery products. Mr. Sayres stressed the flexibility of television with its combination of sound, sight, and movement, and pointed out that it gives the advertiser a chance to demonstrate his product in use by an advertising means that will reach hundreds of thousands within a few years. Consumer recognition is automatically created over a three sense range, he said.

---

Beauty Contest

AMERICAN network filmed the Atlantic City Miss America contest of 1945 last week for televising, with broadcasts scheduled for Sept. 11, Sept. 14, Sept. 17, each of a half-hour's duration and emanating from WABD New York, WRGB Schenectady, and WPTZ Philadelphia, respectively.
Dick Bates, WGAN program director, broadcasts air view of "Surrender Night" in Portland, Maine.

• Rode WGAN's fast Grumman amphibian, Harold Hersey, pilot, used station's portable shortwave equipment which was picked up and rebroadcast to thousands of listeners.

• Program 8:50 to 9 P.M., evening of August 14th, caught nearly 100,000 people celebrating in Portland streets or in automobiles converging from all eastern Maine.

• Plane circled South Portland over shipyards where glow from welders' torches showed workmen "still at it"...thence over fleet in harbor to northeast, back inland over roads bright with crawling car headlights.

• Roared above Congress (main) Street, watching thousands of milling people, cars swinging around bonfires, Monument Square jammed with "ants".

• Plane took off from and landed at Portland's big busy airport, 10 minutes from downtown city.

• Program pleased and informed thousands upon thousands of stay-at-homers in 14 counties in Maine and one in New Hampshire as well as in thousands of traveling automobiles.

• Another in a long line of characteristic WGAN public service broadcasts...planned in advance.

"Dick" Bates, WGAN program director and Harold Hersey, air pilot, plan route to be covered for WGAN "Surrender Night" broadcast from the air.

Dick Bates describing all he sees for his thousands of listeners.

Dick Bates really goes to town, broadcasting with head and shoulders in the plane's prop wash.

The WGAN Grumman amphibian interior looking toward pilot Hersey and commentator Bates over the shoulder of Warren Hamilton, WGAN technician.
Text of FM Policy Announcement

POLICY FOR PROCESSING FM APPLICATIONS:
Mailing toward an expeditious processing of the large number of applications on file for new FM broadcast stations throughout the United States, and to effect procedures for shifting of existing FM stations to the new band of frequencies (90-108 mc) assigned to this service, the FCC today announced that it was sending letters to present holders of licenses and of construction permits and to pending applicants for new FM stations. The Commission announced that procedures relating to television, and developmental and non-commercial educational FM stations would be announced at an early date.

Three types of letters are being sent to FM licensees, permittees and applicants as follows:
1. Existing licensees, 46 in number, are being placed on notice that the Commission proposes to shortly issue to each an authorization for a specific operating assignment in the new band, and that equipment tests shall commence no later than Dec. 1, 1945, and regular program service by Jan. 1, 1946. The Commission recognizes that equipment may not be presently available for operation with the radiated power specified. Accordingly, licensees will be permitted to operate with less power until such time as materials and equipment are obtainable.

Moreover, until such time as it appears that receivers for the new band are generally available to the public and owners of existing receivers have had the opportunity to adapt or convert them to the new band, licensees will also be permitted to continue operation on their existing assignment in the old band. However, when receivers and converters are available for the upper frequencies, dual operation will be terminated.

2. Present holders of outstanding construction permits, seven in number, are being asked to file current financial and ownership data. After the receipt of such information, the Commission will issue to each permittee a modification of his construction permit for a specific operating assignment in the new band which will require that equipment tests commence no later than Jan. 1, 1946, and regular program service by Feb. 1, 1946.

The Commission recognizes that equipment may not be presently available for operation with the radiated power specified in these modified construction permits. Accordingly, operation will be permitted with less power until such time as materials and equipment are available.

3. Other applicants. — Pending applicants for new FM stations—approximately 500 in number—and persons who intend to file applications are asked to file their applications or bring them up-to-date as soon as possible before Oct. 7, 1945. This will enable the Commission, after Oct. 7, 1945, to make as many grants as would be consistent with the availability of frequencies and other public interest factors. Recognizing the difficulty that applicants may have in submitting complete engineering information by such date, the Commission's procedures contemplate the granting of a substantial number of FM applications conditionally subject to the filing of such data at a later time.

Letter to New Applicants

Letter to pending applicants for new FM broadcast stations follows:

"In order to expedite the consideration of your pending application for a new FM broadcast station, it is requested that you submit, under oath, the following:

1. A current balance sheet of the applicant.

2. A statement with respect to any changes affecting the ownership (officers, directors and stockholders) of the applicant since the filing of your application.

3. A statement as to the proposed transmitter site, specification of transmitter equipment, effective radiated power and antenna height. (See FCC Form 319, questions 18(i), 22, and 24.)

4. A statement as to program plans. (Questions 33, 34, 35, and 36, FCC Form 319.)

5. A statement as to the number of hours of operation proposed.

6. A statement as to whether the application is for a community, metropolitan or rural station.

"If you have filed since Jan. 1, 1945, a financial statement, or if the other information requested is now on file, such data need not be furnished. However, reference should be made to the application or other document with which such data were filed.

"Upon receipt of this information, the Commission will consider your application as soon as practicable after Oct. 7, 1945, as stated in its Public Notice of Aug. 7, 1945. If, upon examination of your application as thus supplemented, the Commission is satisfied that a grant thereof would serve the public interest, convenience and necessity, the Commission may make a conditional grant of your application subject to the condition that complete engineering information will be filed within 90 days after date of conditional grant. In such cases the construction permit itself will be issued only after the Commission is satisfied, upon examination of the complete engineering data, that you are technically qualified.

(Continued on page 49)
KTUL is the only station in Oklahoma with permanent SPEC-TACULARS!

Billboards in the progressive Magic Empire "area" localize KTUL for its listeners.

Bus cards "EXCLUSIVE" in Tulsa AND in Oklahoma's 3rd city of Muskogee, as well!

Regular insertion in "area" newspapers for the benefit of KTUL's clients.

We are firm believers in the policy of giving that "EXTRA" bit of push in promoting the interests of our advertisers.

John Evans
General Manager
FM Policy
(Continued from page 40)

fied and at that time you will be assigned a frequency.

"However, if it appears upon examination of your application that it contains the complete engineering data applicable under the Commission's report of Aug. 24, 1945, a copy of which is enclosed for your information, the Commission may issue a construction permit including the assignment of a frequency rather than a conditional grant."

Letter to FM Licensees

Letter to existing FM broadcast licensees follows:

"Pursuant to the Commission's recently announced allocation of frequencies for FM broadcasting in the band between 92 and 108 mc, and its report governing rules and standards for FM broadcasting, the Commission proposes to issue shortly to your FM station an authorization to operate on the frequency of ___ mc with the equivalent of ___ kw radiated power and an antenna height of ___ ft. above the average terrain. Such authorization will provide that equipment tests on your new frequency shall commence no later than Dec. 1, 1945, and that regular programs shall commence no later than Jan. 1, 1946.

"In making this assignment, the Commission recognizes that equipment may not be presently available for operation with the radiated power specified. Accordingly, you will be permitted to operate with less power until such time as materials and equipment are obtainable.

"Until such time as it appears that receivers for the new band are generally available to the public and owners of existing receivers have had the opportunity to adapt or convert them to the new band, you will also be permitted to continue operation on your existing assignment. However, when receivers and converters are available for the upper frequencies, dual operation will be terminated.

"A copy of the Commission's report setting forth the substance of certain rules governing FM allocation and operation is enclosed for your information.

"In the event you have any objection to your proposed new operating assignment, such objection should be submitted to the Commission on or before Sept. 20, 1945."

Letter to CP Holders

Letter to holders of outstanding construction permits for FM broadcast stations follows:

"Pursuant to the Commission's recently announced allocation of frequencies for FM broadcasting in the band between 92 and 108 mc, and its report governing rules and standards for FM broadcasting, the Commission proposes to issue shortly to you a modified construction permit for the frequency of ___ mc with the equivalent of ___ kw radiated power and an antenna height of ___ ft. above the average terrain.

"In order to expedite the issuance of such modified permit, you are requested to file on or before Sept. 20, 1945, the following:

1. A verified current balance sheet of the applicant.
2. A verified statement of any changes affecting the ownership (officers, directors, and stockholders) since the granting of your original permit.
3. A verified statement as to the proposed transmitter site, specification of transmitting equipment, effective radiated power and antenna height.

"If you have filed a financial statement since Jan. 1, 1945, or if the other information requested is now on file, no additional data need be furnished. Reference should be made to the application or other document with which such data were filed.

Equipment May Be Unavailable

The Commission recognizes that equipment may not be presently available for operation with the radiated power specified in your proposed modified construction permit. Accordingly, you will be permitted to operate with less power until such time as materials and equipment are available. In your reply please inform the Commission as to the status of present construction, the approximate date at which you can commence further construction, and the approximate date upon which you will be ready to commence equipment tests, and the power with which you can commence operation.

"A copy of the Commission's report setting forth the substance of certain rules governing FM allocation and operation is enclosed for your information.

"In the event you have any objection to your proposed new operating assignment, such objection should be submitted to the Commission on or before Sept. 20, 1945."

Honesty Pays Off

DIogenes, here's your man. He's Honest Einar Swenson, member of the KDYL Salt Lake City orchestra, and formerly of the U. S. Army Air Forces. On his way to the studio, he picked up a billfold lying in the street. It contained $570 in cash, a $12,000 cashier's check, and 39 C gasoline coupons. Only identification was the name Herbert G. Young on the back of a photo of a Marine captain, his wife and child. After prolonged checking with civic and military police and shore patrol, owner was identified and his father-in-law located. Mr. Swenson was given a $50 reward.

1. Ask for Rate Card
"SPOT" spelled backwards is "TOPS"—and, seriously, that’s the service "Spot" is rendering to many time buyers with spot problems. Maybe he can’t always flush the exact time you have in mind. But the truth of the matter is that many a well-known advertiser has found that "Spot" is super at turning up something that fills the bill.

For NBC Spot Sales specialists have at their fingertips all the vital facts about spots...facts that may open your eyes to some great opportunities.

Call on "Spot" today for good hunting on one or some, or all of NBC’s eleven essential stations...stations which will deliver your sales messages to 55% of the radio families in the United States...families whose buying power is 34.2% greater than the average for the whole country...families who buy all kinds of products—fast and often.
Horne Seeks to Determine Australian Programs Needed

TO FIND OUT what kind of programs American broadcasters would like to get from Australia in order to assist his country in determining the best postwar use of its shortwave facilities, Robert Horne, news editor of the international radio service of the Australian Dept. of Information during the war, is spending several weeks in America on his way to assume his new post as press attaché to the Australian minister in Paris.

Interviewed in New York last week, Mr. Horne told Broadcasting that during the war Australia's three international stations—one 50 kw transmitter built by RCA in the United States and two 100 kw transmitters constructed in Australia—supplied a three-fold service. One phase was the broadcasting of news and news commentary to friendly and enemy ears in the Far East on a schedule that included four daily broadcasts in English, two in Japanese and one each in French, Dutch, Malay, Chinese and Tai (Siamese), with a daily broadcast in Straits Malay recently added.

Second part of the wartime service was the transmission of news and entertainment to Australian troops abroad, Mr. Horne said. News and news analysis were emphasized with the entertainment broadcasts largely request programs of phonograph records, with an occasional broadcast description of a sporting event.

Third variety of overseas service was information and news broadcast to the United States and England to keep them abreast of Australia's participation in the war and, for a considerable period, of the news of American and British troops stationed there. From early in 1942 until late in 1943 Mutual received a daily quarter-hour divided about half and half between an Australian news summary and interviews with American soldiers, Mr. Horne said, adding that a number of local stations in America received similar or special programs on a more or less regular basis.

Include Australia News

American includes five minutes of Australian news in its Saturday morning United Nations Review. WNEW New York has included two spots from Australia in its Pacific Newsreel programs. WLW Cincinnati has regularly used Australian spots in its world news roundups and is continuing them since the end of hostilities with emphasis shifted to political and economic news. WLW has also expressed interest in a feature on Australian farming for its midwestern farm listeners, Mr. Horne reported, adding that he has received a similar request from WLS Chicago.

Follow the Beam

PROSPECTORS STILL get lost in the northern Canadian bush. Recently one prospector north of Kirkland Lake, Ont., was located and able to be rescued by following direction broadcasts by CJKL Kirkland Lake. The aerial rescue team was able to find him because he had carried a radio receiver.

Western Farm Listeners." Mr. Horne reported, adding that he has received a similar request from WLS Chicago.

KROW Used Spot

KROW Oakland during the war has used a daily Australian news spot and also has made regular use of Pacific Listening Post, an analysis of Japanese propaganda broadcasts. The service from down under also supplied material to WTAG Worcester for a week of its Worchester and the World series and for a special program broadcast by Louisville's four stations in combination. The broadcast to Louisville included a message from a man-in-the-street in Brisbane to his counterpart in Louisville, a second message from the sports editor of a Melbourne paper to the sports editor of the Courier-Journal, and a third from the president of an Australian university to the president of the U of Louisville.

Describing his visit as "purely exploratory," Mr. Horne said he had talked to a number of American broadcasters during his trip across the country and that he would be glad to hear from others, so that his report back to the Dept. of Information can be as full and specific as possible on what kind of service is wanted from his country. He can be reached at the office of the Australian News and Information Bureau, 610 Fifth Ave., New York, for the remainder of this week. Mr. Horne will make a similar exploration of England before proceeding to his Paris post he said.

Tea Hostess

DOROTHY LEWIS, NAB coordinator of listener activities, will hostess at a tea for women broadcasters on Sept. 14 at Girl Scout Headquarters in New York to solicit their aid in promoting Share-the-Food day, Sept. 18. That day citizens are asked to eat the kind of meals on which millions of people abroad are subsisting and to contribute the difference in cost between this and their regular diets to the foreign funds of one of the organizations co-sponsoring the campaign.

IRWIN JOHNSON, known as the Early-worm on WINS Columbus, O., has solicited double the $250 needed by patients of Franklin County Tuberculosis Hospital to repair their private radio-address system. Appeals for "an old dirty dollar bill" were made for only a week on morning program.

Reunion

...in Philadelphia

WDAS brings G.I. Joe and his sweetheart together in musical memories.

From overseas Joe writes, "Please play our favorite recording of Together. If it's not too much trouble, call Madison 8312 and ask my Suzanne to listen in."

Similar V-Mail requests reach WDAS almost every day... all because Joe remembers this station's popular record show. And he knows that nothing is too much trouble at WDAS

That's why WDAS audiences have been Loyal for more than twenty years.

Page 44 - September 10, 1945

Broadcasting - Broadcast Advertising
The new management of WIBC, under the direction of George C. Biggar, has set out to do an outstanding job of audience building.

Getting out in front with the news of important events is one way to catch and hold listeners. People in the Indianapolis area are learning fast that WIBC is always willing to devote valuable station time to the public interest—that we are usually first on the air with happenings of this fast moving world.

Within seconds after the use of the A-Bomb, Russia's declaration of war, and the Japanese surrender, our announcers were giving the facts to the public. Within minutes other WIBC reporters, with portable microphones were broadcasting the reactions of the man on the street. All through that hectic, history making week, the news held precedence over scheduled programs.

Costly to the station, yes—but this policy is rapidly building better investments for WIBC advertisers. Write direct, or ask any Blair man for further facts about the livest, most aggressive station in Indianapolis.

JOHN BLAIR & CO.—National Representatives
HARD TO PUT YOUR FINGER ON

It is not always easy to determine just exactly what makes some radio stations fairly beam with leadership. We mean the brand of leadership that cannot be wholly measured by: "Are you listening to your radio?" or other accepted listener yardsticks.

Not always can you put your finger on just what sends some non-network stations out in front or what gives some network stations ratings far above national averages. EXCEPT —

that alert and skilled management springs from a quality of thinking that builds great successes. And this by properly assembling every tangible and intangible detail into a purring thing of intelligent motion. There is the "team", too, with its individual initiative and pride of performance that pulls so far away from the commonplace.

Eighteen years of pooled management experience and loyal "team" play, have given Fort Industry Company radio stations such a brand of leadership—and of course, the signs of leadership that you can put your finger on, are there, too!

THE FORT INDUSTRY COMPANY

WSPD 5,000 Watts and NBC TOLEDO, OHIO
WAGA 5,000 Watts and American ATLANTA, GA.
WMMN 5,000 Watts and Columbia FAIRMONT, WEST VA.
WLOK 250 Watts and NBC LIMA, OHIO
WHIZ 250 Watts and NBC ZANESVILLE, OHIO
WGBS 10,000 Watts and American MIAMI, FLA.

If it's a Fort Industry Station, you can Bank on it!
The Issue: Face It

THE ISSUE on Government interest in station programming now is clear. It was clarified Sept. 2 by Chairman Paul A. Porter of the FCC in an address over CBS. There is additional enlightenment in Mr. Porter’s bylined article, “Radio Must Grow Up”, in the current edition of American magazine.

This issue was made clear in the dissenting opinion of Commissioner Clifford J. Durr “Re Amendments to Rules of Practice and Procedures Governing Public Inspection of Records” (Aug. 3).

The issue: Are American radio programs satisfactory to the American public? Both Chairman Porter and Commissioner Durr conclude that they are not. Both admit, however, that the decisions of the FCC on the matter should not govern station program department. Chairman Porter does this directly. Commissioner Durr admits it tacitly.

In his Sunday broadcast and in his magazine article, Chairman Porter pleads for accelerated public criticism of programs. The latter article provides such reassuring quotes as these: 

“I believe in the American system of broadcasting.”

“There is scarcely a whisper of support in America for a Government-owned system (of broadcasting).”

In his dissenting opinion of Aug. 3, Commissioner Durr pleads that all Commission records—including financial statements—should be open to public inspection. “It seems to me,” the Commission’s action in these proceedings must necessarily turn upon the answer to a question concerning the fundamental nature of radio broadcasting. Is it essentially private business which the public interest makes as may flow as an incidental by-product of profit-making operations, or is it essentially public business? If it is the former, the information required pursuant to Secs. 1.301 and 1.302 is private information and it does not seem to me that the Commission itself has any right to demand it. If it is the latter, “the Commission is entitled to full information and I can see no reason why information available to the Commission should be shielded from public scrutiny except as required by clear considerations of national security.”

Commissioner Durr, whose keen interest in American broadcasting is well known, further states: “Broadcasters are strongly insistent upon a maximum of regulation by the public and a minimum of regulation by the Government. They should not at the same time seek to conceal from the public information essential to intelligent public regulation.”

This, then, as noted directly by Chairman Porter and indirectly by Commissioner Durr, is a matter between American broadcasters and their listeners. So let it rest on that basis. Let American listeners bespeak their dissatisfaction, if such they have, with American radio—not to Congressmen and the FCC but, as Chairman Porter advises, to “the stations, networks and sponsors.” Let there be an end; now and forever, to carefully phrased critiques by the Commission; to back-street audience reaction surveys; to secrecy-cloaked internal investigations at the FCC.

If the public wants to examine station records in order to satisfy itself that broadcast programs are satisfying to the ear, let’s hear sufficient public clamor to impel such a policy. Will the public also want to examine newspaper balance sheets in order to evaluate its preferences among the various daily journals? Now that the battle is more clearly marked, it becomes the duty of every broadcaster to review his program structure, removing from it any fare that might embitter the listening public. He should redouble his efforts to improve his overall schedule, attaining a wise balance of entertaining and informative productions.

Here is the defense against unfair Government regulation—for the public, not the FCC, is now the acknowledged arbiter.

This is as it should be. It is a pleasure to join with the Commissioners in urging listeners to express their opinions.

Future in Frequencies

YOUR attention is called to a special article in this issue (page 20) by Dr. Victor J. Andrew. Dr. Andrew looks at the map and devises a formula, based on retail sales, for determining the station potential in numerous American markets. He admits that there are loopholes in his formula. But the study, nevertheless, makes interesting reading in these times, when all of us are wondering where we go from here.

Time—the Essence

NO MORE dramatic history was ever made than the proceedings on the veranda deck of the USS Missouri on the night of Sept. 1, when Japan formally surrendered to the United States.

Through the medium of broadcasting, the world was given an eyewitness account of the proceedings. The air medium served as the personal representative at the peace table of every man, woman and child within range of a radio set.

The original draft of the broadcast setup for the proceedings provided for a live pickup from the Missouri, with a speech by President Truman interpolated between the signing and the talks by Gen. MacArthur and Adm. Nimitz. Because the Missouri had only one suitable transmitter, a pooled broadcast was inevitable.

Somewhere along the line—somewhere in the Pacific—the plan went awry. Instead of a live broadcast, a recorded version was fed to the world an hour-and-a-half after the actual proceedings. Technical problems and need of censorship were the reasons assigned officially.

Radio’s primary impact as a news medium is based on the fact that it reports instantaneously—tells an eyewitness account of history as it is made. Surrender of Japan ranks among the top events in history.

But other important events will happen. Radio will be at the scene to tell the story. It should tell that story as it happens and not submit to delays.

It would be interesting to know just what caused the change in plans—technical difficulties, security, or perhaps outside pressure.

Our Respects To—

DONALD MANSON

WHEN the Canadian government attends any international radio conferences, one of its delegates is certain to be quiet-spoken, unassuming Donald Manson. He has been attending international conferences as a technical expert for nearly two decades, and knows most of the world’s important radio men. Since his appointment in September 1944 as assistant general manager of the Canadian Broadcasting Corp. frequency trips have kept him in close touch with broadcasting officials, both government and private, throughout the Americas. Years ago he learned Spanish so he could converse with Latin-Americans in their own language, a factor which he stresses as important in fostering closer broadcasting relations with the industry in Central and South America. He is now attending the Third Inter-American Radio Conference at Rio de Janeiro.

Born in Wick, Scotland, in 1888, Donald started in radio in 1906 and took part in the first trans-Atlantic transmissions, working with Marconi at Glace Bay, Nova Scotia, after his arrival in Canada in 1907. For the next eight years he was with the Canadian Marconi Co. on trans-Atlantic and ship communication work, and in 1915 the Canadian government asked him to become inspector of radio. From 1916 to the end of the First World War, Manson was radio communications officer with the Royal Canadian Navy, and in 1919 came back to Ottawa to become chief inspector of radio for Canada.

During the next ten years Manson drafted most of the radio regulations for the Dominion and began to attend international conferences as a Canadian technical delegate at London, Madrid, Washington, Mexico City, Santiago de Chile and Havana. In 1929 a Royal Commission was appointed to study broadcasting in Canada. Manson was made secretary of this three-man commission, of which the present general manager of the CBC, Dr. Augustin Frigon, was a member. The Commission held hearings throughout Canada, toured the United States and most of western Europe and Great Britain. The result of its study was a report on the nationalization of broadcasting on somewhat the basis on which broadcasting is nationalized in Canada.

After his work on the Royal Commission Donald returned to Ottawa to become assistant controller of radio in the Department of Marine. When the CBC was formed in 1936 Manson was offered the post of chief executive assistant to General Manager Gladstone Murray, who was brought to Canada from the British Broadcasting Corp. Dr. Frigon became assistant general manager. As CBC execu-

(Continued on page 50)
Another “Why” for Dials Staying KOIN-Conscious

CHESTER R. DUNCAN is the founder-director of KOIN’s Duncan Singers. His background is knee-deep in music. Formerly supervisor of music for Portland public schools, he studied in Europe and took his degrees in music at the University of Washington. Known as an exacting drill-master, he rehearses his 20 singers for hours at a time. He has developed them into the Northwest’s first distinctive chorus particularly adapted to radio performance. He often serves at public functions in a dual role— as toastmaster, or speaker; as director of The Duncan Singers or leader for community singing.

Applause is not enough for THE DUNCAN SINGERS of KOIN. They’re used to having crowds jump up and cheer ’em loud and long whenever they make a p.a. It’s in the record that this distinctive group has brought enthusiastic audiences to their feet at War Bond rallies, a Chamber of Commerce “KOIN Day”, an NAB district banquet and other events. Also to be taken into account is the prestige the singers have won as a broadcast feature. They have “clicked” with listeners ever since their debut with SONG OF THE COLUMBIA...the KOIN series that drew a George Foster Peabody Citation. You may have heard THE DUNCAN SINGERS on their CBS network appearances (two to date). If not, we hope you will real soon... for one of their songs will tell you more than pages of copy.

...“For the Community!”

Mr. Geehan  Mr. Clarke

JERRY GEEHAN, sales manager of KMO Tacoma, has been appointed station manager. JOHN K. CLARKE, KMO traffic manager, has been named manager of KMO's sister station, KIT Yakima. JAMES A. MURPHY, who has been manager of both KMO and KIT, is now assistant to CARL E. HAYMOND, owner of the station, and general director of allHaymon operations.

HARRY C. ROFF, v-p and general manager of NBC's central division, Chicago, and Helen Hogue, former account executive for Russell M. Reeds Agency, Chicago, were married in Chicago.

HARRY HAYS, assistant to NBC New York v-p and business manager of Radio-Recording Division, is in San Francisco for a conference with Sidney N. Broots, network western division v-p.

SAMUEL PALEY, father of William Paley, president of CBS and a director of NBC, returned from network visits in Temple University Hospital, Philadelphia, where he underwent an operation.

U. S. Chief User Of Radio in S. A.

Democratic Influence Outsm Fascists, Josephs Writes

LATIN AMERICAN radio was European in taste 10 years ago, and influenced by Nazis, but today, upon its 25th anniversary, radio in Latin America is definitely of the New World, and shows the influence of the democracies. Today the United States is the chief time user and revenue producer, according to Ray Josephs, newspaper correspondent in Latin America, who recently returned to this country.

In an article in the September issue of Inter-American Magazine, Mr. Josephs says that the Nazi-Fascist' use of radio in Latin America to sell intolerance, prejudice, and hatred to the countries south of the border has been outweighed by the U. S., and today, hemisphere cooperation has been established between the U. S. and Latin American countries, largely through radio means.

A wide variety of programs are tuned in by the 4,500,000 radio stations in Latin America. Radio is a commercial enterprise there as it is in the U. S., with commercials paying the bill. Favorite programs of Latin Americans are news broadcasts, mostly based on U. S. or British reports, music, local music, local humor, and sports. Mr. Josephs reports. Most programs on small stations are musical recordings, with some of the larger stations developing live shows.

Leading stations are in the countries' capitals, and the best stations in Latin America equal our best independent stations, he says. Latin American radio generally is in the stage that the U. S. was in 15 years ago, but with more radio sets expected to be purchased in Latin countries within the next few years, programs are expected to improve. Government control of radio varies in each country, with strongest control exercised by Argentina and Brazil at the present time, according to Mr. Josephs.

Mesereau Interview

MAJ. THOMAS A. MESEREAU, commander of the 3rd Battalion, 188th Airborne, the 11th Airborne Division, which formed a guard of honor for Gen. MacArthur's arrival in Japan, was interviewed Tuesday evening on Headline Editions, NBC network, America's first returning eyewitnesses of the Japanese surrender broadcast.

COMMERCIAL

FRANK McCARTHY, account executive, has been named sales manager of KSL Salt Lake City, succeeding ED. J. BROOKMAN, who resigned as UNSER Broadcasting Co., Hollywood, as v-p and general manager.

C. E. STEVENS will continue in his present capacity of assistant sales manager.

John Henry Schacht, former sales manager of KFJK Sacramento, has been appointed sales manager of KSF San Francisco.

Gladys Ferguson, former traffic manager for American's Chicago office, has transferred to KGO San Francisco to become secretary to Kirk Torney and Frank McHugh, American sales representatives.

Oneil Inman, with discharge from the Navy, has been appointed American's Western division traffic supervisor, replacing Joe Glider who resigned to freelance as writer-producer.

Ed Barker, NBC Western division account executive, has resigned. He and associates are applying to the FCC for frequency assignments and construction permit to erect a new station in San Jose, Calif.

Burton Howard, eastern Ontario dance orchestra leader, has joined CBS in Cornwall, Ontario, as salesman.

School Video

FIRST experiment in adaptation of television to classroom education will start in New York schools with the reopening of school this fall when school officials and television experts will produce a weekly program over NBC's television station WNBTV New York. Program is designed to determine types of television programs suitable for educational purposes, and will be evaluated by pupils and teachers at receiving studios.

Respects

WHO does a superb news job in Iowa

Mr. Barry Faris,
International News Service,
235 E. 45th St.,
New York, N. Y.

Dear Sir:

Just a word from WHO congratulating you on a very thorough, accurate and ahead-of-the-field service covering the whole surrender period. The WHO News Bureau has long valued the coverage and service from your Des Moines INS Bureau and your general service. However, in those intense and long hours before the final surrender break came, we wore a path to the INS printers to see what William Hutchinson was carrying, to catch the latest note to editors enabling us to schedule more tightly, or to pick up an illuminating background angle. We valued INS extremely for holding the gun until authenticity justified a break, and also for breaking stuff earliest.

Yours very truly,

WHO - DES MOINES

North Central Buys Joe Palooka Rights EXCLUSIVE radio rights to "Joe Palooka", popular Ham Fisher comic strip character, were purchased this week by John Boler, president of North Central Broad- casting, St. Louis, and Mississippi Valley Network, from Graphic Radio Productions, Omaha.

The series will be offered on transcription five times weekly with Carl Swenson as "Joe" and Lee Dixon, star of Oklahoman, as "Leemy". The program will not be released until writers can get "Joe" cut of uniform and back into civilian life, which should be not later than Oct. 1, according to Bill Ware, NCBS sales manager.

Officials of NCBS and Mississippi network held a two-day conference, Sept. 6-7, in Chicago to decide on program policy and scheduling. promotions preparatory to inaugura- tion of Mississippi Sept. 26. Attending were Mr. Boer; Arthur Simon, national sales manager; Donald Poland, vice-president in charge of NCBS Minneapolis-St. Paul office, and Mr. Ware.

final arrangements for transcribing Missis- sippi Valley Farm Hour, rural one-hour show produced by NCBS at Jackson and aired in the Carolinas, will be made, and the show will open the new network's inaugural broadcast.

VIGIL REWARDED WSC Scriptwriter Signals Returning Operator Husband

FROM her office window overlooking Charleston harbor, Sandy Gookin, WSC scriptwriter, has seen incoming ships with binoculars for the past year-and-a-half, hoping to see the white hull of the hospital ship Seminole nose into the harbor port. Sandy's husband, CBS West Coast radio singer Warren Gale, is a radio operator aboard the ship.

At 5 a.m. in the latter part of last week, a couple of friends awakened Sandy to inform her the Seminole was coming in. The trio raced down to Charleston's Battery in time to see the ship pierce the darkness and head up-river for the Port of Embarkation and Stark General Hospital.

With an ordinary-sized flashlight Sandy was hailed from shore: "Seminole—Seminole—"

Army Signal Corps Radionan Gookin (professionally Warren Gale) picked up the signal instantly and bellowed back: "Seminole—who is this?"

"This is Sandy," the return flash read.

In strictly unorthodox Signal Corps code came the reply: "My God... this is wonderful. That's a surprise... Sandy, I'm home."

Sandy still has one more vigil to keep from the WSC windows. Her husband has one more trip to make on the mercy ship and then they hope he will be home for good.

Promotion

All the Tricks

NBC has reprinted in booklet form the statements and questions, all NBC repre- sentatives, before the FCC hearing on FM, explaining the network's attitude on the subject, and is distributing it under the title, "Commercial Rules and Regu- lations for FM Broadcasting."

Latest on WLAP

NEW FIELD Intensity Coverage map and market data for WLAP Lexington has been a further put out by the station. Folder shows map and popu- lation and secondary coverage, plus WLAP facilities. Back cover contains data on retail sales and effective buying income in WLAP primary counties.

FAN MAIL sent by servicemen and others to WBMB Nashville is used to trim this window for Strobel's music shop in Nashville. Requests from our booklets of Guppy's headliners are on sale in the shop. Display honors WSM's 20th anniversary.

Last Salvo

"LAST SALVO", a Victory Night broad- cast on WADC Akron, heard at 10:15 p.m. Tuesday, Aug. 14, written and an- nounced by Ted Hanna, has been issued in a booklet by the station. Allan T. Simmon, owner and manager of the station, wrote a foreword. Ted Hanna supplied "recollections" in the back of the book. Script was gotten together, the last minute, according to Hanna, and innumerable requests have prompt- ed the booklet version.

Keeping Up

WALLACE THORSEN organization, New York, has sent to stations in major markets a sheet advertising the quar- ter-hour transcribed dramatic serial, "Keeping Up With Wigglesworth". Produc- tion is under supervision of school for Learning, New York, who offer it to stations as a public service in enter- tainment and educational series. Series may be locally sponsored.

PERSONNEL

STANLEY G. MOORE, released from the Air Forces after 265 missions in O-B-1, has been appointed publicity director of WIBC Dayton. He was a awarded the Distingui- shed Flying Cross four times and Air Medal five times.

LEE HOGAN, formerly in temporary posts with NBC Hollywood publicity branch, now becomes permanent member of the staff of MARtha CURRY, who has been assigned to become Press representative for NBC "Truth of Consequences."

BOB MANN has been named to rep- resent WBTB Brooklyn to trade publica- tions in this New York press.

RICHARD L. ARMFIELD, former chief of news department radio division, in- nopolis, has joined the radio division of Agricultural Advertising & Research, Ithaca, and public relations agencies.

Very Solid Construction

READERS are "sidewalk superintend- ents" of the big construction job pic- tured on Mutual's folder, "Program Structure Going Up". Fully illustrated by large, New Yorker type cartoon, front cover invites sidewalk superintend- ents to step inside. There is shown the structure rising, with steel girders named for outstanding programs on the network. Schedule of operation is on a sign on fence. Workers dump "old and "newly used programs" from a truck. Around center picture is legend tell- ing of using an architect (Philippe Carlin), surveying the grounds, assem-bling materials, and constructing con- struction. Large sign on back cover—on the fence of construction—encourages print reviews of the top programs.

Home Forum! Folder

NEWEST promotion piece on the WOWO Port Wayne "Modern Home Forum" has been sent out to agencies, advertisers and prospects. Piece folds out to feature Jane Weston, director of the "Home Forum"; telling of her activities with the program and its listeners, large center spread of folder has pictures of participants, quotes from clients, and further news of the show. Back cover shows mail response.

A 4-PAGE booklet, "Young Canada Listens" has been issued by the Canadian Broadcasting Corp., outlining the school programs on its networks for the school term. The booklet described the weekly series on "Our Canadian Cities"; "Canada's Part in World Democracy"; and "Canada's Share in Inter-City Democracy at Home", a series on Canadian painters, as well as outline of the CBC program "American School of the Air" which the CBC carries as sponsored programs car- ried by arrangement with the provin- cial departments of education.

BOOKEET titled "It's Unanimous" has been issued by WBMB Chicago which polls local people to see what they think is "the best." C. E. Cooper and the CBS Listener Diary agrees in rating WBMB first in daytime audience in Chicago.

Station Managers and Program Directors
LISTEN TO THIS!

“NEW WORLD A-COMING”
America’s most widely discussed public service program
IS NOW AVAILABLE BY TRANSCRIPTION
to all stations.

“NEW WORLD A-COMING” has won eight national awards, including the coveted $1,000 Bernays Prize within the past year.
This program has brought uniformly favorable comment both in the daily and the trade press. It has been acclaimed by an avalanche of listener mail.
“NEW WORLD A-COMING” offers you the opportunity to promote understanding and tolerance in your community, to make scores of new friends, to build ever growing audiences. It offers local or independent stations a series which ranks in technique and production with the best in national radio.
WMCA offers “NEW WORLD A-COMING” as a non-profit venture on a share-the-cost basis. The 1945-46 series of at least 26 half-hour programs starts early in October.
The complete story of this unusual offer will be on your desk shortly. Look for it. Better still, if this ad arouses your curiosity, write, wire or phone Charles Stark, WMCA, 1657 Broadway, New York City, Circle 6-2200.

WMCA
NEW YORK
America’s Leading Independent Station
GUNNISONS TO TRY NEW TYPE PROGRAM
FIRST ATTEMPT since the end of the war at a departure from the
conventional news presentation is Mr. & Mrs. Reporter featuring the husband and wife news team of Marjorie and Royal Arch Gunni-
son, starting Sept. 17 Mondays through Fridays, 1-11:15 p.m. on Mutual. Format will have Mr. and Mrs. Gunnison in a living room break the informal, ad-lib discus-
sions of international and national
news.

Mr. and Mrs. Gunnison have been reporting major news events for the last ten years for the Christian Science Monitor, North American Newspaper Alliance, Colliers Weekly and MBS. In 1942 their search for news landed them in the Dap
prison camp at Santo Tomas. Royal Arch Gunnison is also the author of the book, So Sorry No Peace.

Program was sold to Mutual by Christopher Brands, public relations director of BBC, who created the series.

ACTIVITY OF RADIO COUNCIL INCREASE
MARKED INCREASE in radio council activity has been noted since the end of the war, accord-
ing to Dorothy Lewis, NAB coordinator of listener activity and liaison between NAB and the vari-
ous radio councils. Southern California Radio Council approved the formation of a radio council and appointed a committee to work out details with William B. Ryan, general manager, KFI Los Angeles, as chairman.

In Rockford, Ill., the radio coun-
cil has conducted a weekly series of broadcasts on WROK in which various civic groups have partici-
pated. The series has been spon-
sored by the Rockford Life Insur-
ance Co. Dr. Forrest W. Van, Wichita University, radio research man and director of the Wichita council, ad-
vises that a well-rounded program of activity be lined up for 1945-46 at Wichita. A statewide survey of equipment and of utilization of radio in all Nebraska schools has been undertaken by the Omaha council.

In Cleveland, new president of the council is Mrs. George V. Goodbold, and new president of the Kalamazoo council Dr. Raymond Hightower of Kalamazoo College. Dr. W. F. Edington, program manager at WKZO Kalamazoo, has been named as organizing chairman in that city.

Nelson Shifted
LT. JOHN NELSON, former radio
director of Raymond R. Morgan
Co., Hollywood, and for more than
three years in the Navy, has been
transferred to American Forces
Radio Service, Los Angeles. For
past 18 months he has been in the
European theater of war, attached to air force of Atlantic Fleet.

THE WANDER Co., Chicago (ovatine), returns "Captain Midnight" to the air Sept. 24 on WGN Chicago and on Mutual stations, Monday-Friday, 5-5:45 p.m. (EST). Remainder of network will carry the program on a cooperative basis. Series was on American before summarizing reaction in Black World, Chicago, is agency.

THANKS GIVEN BBC FOR SERVICE SHOWS

IN A SPECIAL two-way broadcast concluding BBC’s American Eagle in Britain series, Phillips Carlin, Mutual vice-president in charge of programs, and Herbert Petey, director of WHN New York, last week expressed their appreciation for the program, which since November 1940 has brought the voices of American troops in England back to their families and friends at home.

Approximately 25,000 American servicemen have been heard on the BBC program which originated in the Rainbow Corner Club just off Regent Park in London, and broadcast on Mutual at 5:30-6 p.m. each Saturday and on WHN at 10:30-11 a.m. each Sunday. Thousands of American homes have recordings of their sons’ and daughters’ voices, and BBC has frequently been asked by friends and relatives, "we’ve played the one you sent so much that it’s worn out."

Programs

Fair Coverage

WWNY Watertown, N.Y., has broadcast its fourth year of pick-ups from county fairs in the area, telling their listeners of all the colorful harness races, bands, spectators and exhibits. Over a period of three weeks, Program Manager Jim Kapaku and Sportscaster Jack Case of WWNY, has completed a total of 164, house-to-house, program covering direct from the fairs of northern New York.

for the Boys

BOB JONES, m.c. on early morning "Groans by Jones" show on WHS Greenbush has developed a portion of his program each morning to GIs stationed at the Overseas Replacement Depot at Greenland. First campaign was "Bake a Cake for a Convalescent GI". He collected 2,000 cakes after four weeks, and delivered them to the GIs. He has started plans to distribute 1,000 GIs, and latest venture is taking "orders" for returns of families of the GI’s, visiting them.

KQV Pittsburgh for past three weeks has used as a testing ground on audience reaction to "Ralph Blazier, Hypnotist" show by Phillips Carlin, v.p. in charge of programs for Mutual. Show is scheduled to start on the network next week. Stunts may be used hereafter for premier "unusual test shows", according to M. Carlin.

CIVILIAN’S pilot training course is the grand prize for answering a question in CBC Toronto morning program, "It’s About Time". M. Wib Perry asks each question every morning, and the winner of the correct answer for the week gets the grand price. There are also four prizes of $25 war saving certificates for prizes on each half-hour and the two-hour shows.

"Schoolcasts" Shifts

Dwight Newton’s "Schoolcasts", sponsored by the San Francisco Examiner, has shifted to KPO-NBC and started its fifth year on the air Sept. 5. Forty-five hundred school teachers were informed of the change and both The Examiner and KPO will follow during promotional pieces and suggestions for utilizing the programs in classes ranging from third year through high school. Programs are heard three times-week and in school courses such as geography, history, current events, social sciences.

Grid Coverage

TEN AE aged of Chandler’s Department store of Boston has started a "Teen-Age House Party" on WNAC Boston. Staying Bay Carey, bart, and Margaret Ford, "good sport editor" of the Boston Herald, as teen consultant. A death and especially devoted of the sponsors, is heard Saturday, 10:30-11 a.m.

Third Format

THE FRANK SINATRA Show will return to CBS, Sept. 12, 8-9 p.m. with a flexible production format which appears each week in a loose material, or talent demand, Marn Holtz, director of the show, announced. Program will not be limited by any set pattern, and each edition will be planned and written as a special production. Show is sponsored by Lorillard Co., New York, for Old Gold Cigarettes. Lennan & Mitchell, New York, is agency.

News Dramatized

OUTSTANDING news event is drama tized each week on WITF Raleigh, N. C., produced on NBC in each event. They have dramatized the liberation of some surrender, anniversary of the landing of the Marines on Guadalcanal, 25th Anniversary of radio and the Junior Chamber of Commerce, celebrated jointly, among other programs Paris liberation was presented by Fourth Division, which liberated the city.

Mayor of CANADA’s 10 largest cities will make a direct report to the nation in a discussion of labor and employment trends in their areas, plant relocation by helping with programs, education, and new programs on Mutual’s "American Forum," Sept. 11, 9-10:15 p.m.

POW Messages

CANADA’s shortwave programs are now being regularly sent to Latin America in Spanish and Portuguese every Sunday with 6 hour program in Portugal, half-hour in Spain and an hour in English, programs being mainly of Canadian-Latin American news interest, on CHEL 117.2 me and CHFTA 15.75 me. It can now be revealed that the CBC shortwave service to Germany has been using for some time programs from German prisoners of war in Canada. Programs are recorded in the prison camps, sent to Montreal for transmission. They include such topics as, "The Resistance Against the German People", "The Quilt of the Nato", "The Reconstruction of Germany under Allied Occupation", Canadian themes, religious services and musical programs from the prison camps.

13th Year

OLDEST commercial studio program on WREJ Fort Worth-Dallas, "Mr. Tucker’s Smile Program", entered its 13th year on the station Aug. 29. Interstate Oct on Bellingham, Wash., is sponsor.

Close Harmony

Barbershop Quartet Contest, in which male quartets of South Florida appeared for six weeks on Saturday nights on WIOD Miami, has ended with duplication prizes going to members of four sets. First place of $50 Victory Bonds were given each man of a service group of the Home Front, including the Fia. Airy Base, and to a civilian group from the Miami area. GY Nine ties series was produced by WIOD staff.

Jobs for Vets

NEW WWDW Washington program, "Jobs for Vets", Saturday 7:30-7:45 p.m., is designed as an employment bureau for both vets and employers. A special effort has been made in coopera tion with the Civil Service Commission.
She is one of the many housewives in the southeastern corner of North Dakota. Families like hers may enjoy fattigmand (fried pastry) – lutefisk (cod) – lefse (unleavened bread) – or Russian peanuts (sunflower seeds) depending upon whether they were descended from Scandinavian or Russo-Germanic stock.

But there is one thing of which this farmer's wife and her neighbors are sure—their families enjoy food. And rightly so. People who make their living from farming (as do some 333,023 folks in the 29 counties surrounding Jamestown) find that a rousing appetite is the direct outcome of a profitable day's labor.

These same people spent $16,498,000 last year for food alone. People with that much money to spend on food, have money to spend on other things. And radio remains one of the most effective ways to sell food and "the other things"—in Jamestown, as everywhere else.

To be specific, the regular-listening area of KSJB Jamestown, is made up of 29 counties. Of the 79,168 families who live within this 29-county coverage, 71,092 have radios.*

*1940 U.S. Census, projected by NAB Research Bureau

Represented by North Central Broadcasting System, Inc.
HAL ENGEL, released from the Army and now a partner in the public-ity firm of Howard & Engel, New York, joined the NBC script department as a writer. Engel received his discharge through NBC's "Welcome Home Auditions," an employment service created by the network to assist veterans to obtain jobs in radio.

BOB LATTING has been assigned Hollywood to daily "Walkie-Talkie" on American Pacific stations. He succeeds DON NORMAN who has taken a similar position with the Los Angeles street assignment.

Sgt. CHARLES ROSS, 31, one-time producer-announcer of KMPF Hollywood, died of typhus fever in Walter Reed Hospital, Washington, in late August. Surviving are widow and a daughter.

DON PRINDE, former co-star of American "Non-Stop Poll"er, will resume duties as writer on NBC "Abbot & Costello" show, starting Oct. 4.

Radio Doing Big Job in Japan—Bell

DON BELL, Mutual correspondent in Japan, said in a broadcast to the U. S. Sept. 4 that radio is doing a big job at the present time in Japan. Starting Sept. 5, regular radio programs planned entirely for the 35,000 Allied prisoners of war are being broadcast from Radio Tokyo, now under American control.

“Americans who have not been able to hear real American voices for three years will now hear Army announcers, and prisoners will be brought up on the news of the world and given instructions to remain where they are until plans are completed for their transfer. American boogie-woogie and jazz, as well as classical programs, are being brought to the prisoners through radio,” Bell said.

At the Yokohama branch of the studios of Radio Tokyo, Bell met chief announcer of the Japanese-controlled radio, Gumheratara, who said he wasn’t sure how much good Japanese radio was going to do unless certain changes were made. Gumheratara, Bell reported, believes that if freedom of fact is to come to the Japanese people, then freedom of speech and freedom to listen must be assured. During the war years, shortwave listening was a serious crime in Japan. The Japanese people could listen only to radio stations controlled by the government, and since the government was in the hands of the military, the people never knew two sides of a question.

Decca Dividend

DIRECTORS of Decca records have declared a regular quarterly dividend of 30 cents per share on Decca’s capital stock payable Sept. 29 to stockholders of record Sept. 15.

Ed King in UK

CPL. ED KING, former producer for NBC in New York and Chicago, has been appointed chief producer for the armed forces network in the United Kingdom.

Dixon IT&T V-P

COL. GEORGE P. DIXON, formerly chief of air communications for all the U. S. air forces in ETO, has been elected vice-president of the International Telephone & Telegraph Co. in New York. Prior to his army career, Col. Dixon was associated with the National City Bank of New York as communications engineer and before that with the New York Telephone Co. as district manager of the Manhattan area.

What was probably the first broadcast of the new unbreakable plastic record industry, sponsored by the Division of RCA (BROADCASTING, Sept. 3), was made by WABF, New York, Metropolitan Television’s FM station, on Aug. 29, 29 days after the new disc had been previewed to the general public. A second broadcast on WABF demonstrated the difference between this record and the usual shellac discs.

Network Accounts

New Business

GUITTARD CHOCOLATE Co., San Francisco, on Oct. 3 starts “Don’t Shrink,” sponsored by Gumheratara, on the West Coast stations.

“Don’t Shrink” has been previewed to the West Coast stations of Associated Network with a quick success. The show, being aired on 10 CBS Pacific stations, Sat., 3-3:55 p.m. (PWT). Agency: Gardall & Guild Adv., San Francisco.

Renewals

BORDEN Co., Toronto (milk products), Sept. 17 renewed “ Dairy News” on 26 CBC Trans-Canada stations, Mon. 8-9 p.m. Agency: Young & Rubicam, Toronto.

CANADIAN IRON & STEEL Co., Windsor, Ont. (steel), on Oct. 2 renewed “Steel on Steel” on 24 CDO Dominion network stations, Tues., 5-6 p.m. Agency: Fehlman & Ryan, New York.

GENERAL FOODS Corp., New York, (Grapenut Flakes), on Sept. 6 renewed “Grapenuts House” on NBC station, Thurs., 8:30-9:30 p.m. Agency: Fehlman & Ryan, New York.

“Baby Snookis” for Sanka on 144 CBS stations, Sun., 9:30-9:30 p.m. Agency: Young & Rubicam, N. Y., for Sanka.

PROCTOR & GAMBLE of Canada, Toronto (Drene shampoo), on Nov. 1 renewed till June 27, 1946, “Red Valley Show” on 22 CBC Dominion network stations, Thurs., 10-11 p.m. Agency: Kasior & Son, New York.

LEWIS-HOWE Co., St. Louis (Tums), Sept. 23 renewed “Basilia” on 54 CBS stations, Sun., 8-8:30 p.m., Agency: Koche, Williams & Cleary, Chicago.

Changes

PROCTOR & GAMBLE Co., Cincinnati (Camay, Spice & Seagrams), Sept. 17 shifts Perry Mason show on 74 CBS stations from Mon.-Fri., 2:30-2:45 p.m. to Mon.-Fri., 2:15-2:30 p.m., and Rosemary (Ivy Show) on CBS stations from Mon.-Fri., 2:15-2:30 p.m. to 2:30-2:45 p.m. Agency: Pedlar & Ryan, New York, for Perry Mason and Compton Adv., New York, for Rosemary.

As co-sponsors in Southern California area with Ziff-Davis Publishing Co., New York, for National Peace Treaty Contest, KFTR Hollywood presented $750 in War Bonds on Sept. 6 broadcast. Inspired by the problem: “Talk About Peace,” written by Fred Ziff, which was also presented as a regular radio program, this contest was based on listeners’ views of how a lasting peace could be achieved. Seven Southern California winners were also national winners.

On a gusty March day in 1931 . . . when man's voice was beamed across the English Channel from an antenna less than an inch long and powered by a mere half-watt . . . Microwave was born.

This was the inauguration of a new technique in the art of communication . . . blazing the trail for modern, high fidelity television, FM transmission, pulse time modulation, plurality of currents on a common carrier, and certain other commercial applications for this technique.

Many of the scientists now at work in Federal laboratories participated in that triumph and helped in its development through the years. Now they are engaged in extending its application, opening vast and striking possibilities for the future of communications.

Pioneer in the field of microwave . . . a contributor to radio progress for more than 35 years . . . Federal stands for leadership in research, development and manufacture of equipment and components for every segment of the communications industry.
Daniel Webster had a most unusual habit on the speaker's platform of trying a succession of words or phrases, while searching for one that suited him—"Why is it, Mr. Chairman, that there has gathered, come together here, congregated, this great number of inhabitants, dwellers; that the roads, avenues, routes of travel, converge, meet, come together...?"

Webster's habit doesn't lend itself to easy explanation. But Baltimoreans have a habit that does. They know that the best in radio is found at "1400 Kc."

Consequently, listening to WCBM has become a habit in Baltimore!

Great Audiences from Little Habits Grow!

Baltimore's Listening Habit

WCBM

MUTUAL BROADCASTING SYSTEM
Conscientiously built programs based on the preferences of people in this area have made WJW a best seller! Based on actual audience figures in Cleveland, WJW delivers more daytime listeners per dollar, 23 to 37% more...than any other station.

Immediate Delivery!

Unit 540 is the latest model Fairchild Amplifier-Equalizer. Its design permits the unusual operational advantage of unlimited frequency selection over two critical ranges: 20 to 100 cycles; 4,000 to 10,000 cycles with an available boost of 0 to 20 db.

Unlimited frequency selection compensates for brilliance-loss at the slower 33.3 speed and for response-deficiencies of cutterhead, disc material, pickup or speaker by electronically boosting the higher frequencies from 4,000 on up to 10,000 cycles — with a negligible effect on volume and without loss in the bass.

Unit 540 can be used with two recorders to record or play back continuously by switching from table to table; to make two identical records at the same time; or to 'dub' from one table to the other as in copying a recording played on one table and recorded on the other.

Unit 540 is compactly designed to fit into a light-gauge metal trunk measuring 17" x 18" x 11". It can also be rack mounted. And provision has been made in the inputs and outputs to permit operation under many varying conditions — to meet the exacting professional requirements of the radio and communications fields.

Descriptive and priority data are available. Address New York Office: 475 - 10th Avenue, New York 18; Plant: 88-06 Van Wyck Blvd., Jamaica 1, New York.
Is YOUR sales message reaching this fertile market?

For 25 years, farmers and working people in this rich industrial and agricultural area have depended on WDZ for market reports, crop and livestock bulletins, complete news coverage and homey live-talent entertainment.

Directing the entire day’s broadcast to these listeners, WDZ has built a solid, loyal audience who listen and buy WDZ advertised products. Let WDZ’s “directional programming” carry your sales messages to the market.

**NEW MAGNETELEPHON HAS HIGH QUALITY**

(Special from Monte Carlo, Monaco)

DISCLOSURE has been made here that Germany manufactured a portable Magnetophon [BROADCAST, Sept. 2], weighing 68 pounds over-all. Tape recording and playback unit was demonstrated at Radio Monte Carlo to the U.S. Broadcast Mission. Portable equipment was left by Germans when they abandoned it a year ago.

French and Monacaan engineers smuggled parts from the station while under German operation sufficient to rebuild two portable recorders now in regular use.

Permanent equipment weighing several hundred pounds had been seen previously at Luxembourg, Hamburg and Berlin but not in England and France. Fine quality of reproduction and playback impressed the mission. Steps have been taken to get U.S. patents. Equipment is manufactured by A. E. G. Magnetophon, Berlin, with plastic-base tape, iron oxide impregnated, made by L. G. Farben’s Frederikshafen factory. Signal Corps officers are investigating the equipment and patents.

Portable units were used to record the Army Band when the U.S. group visited Monte Carlo Sept. 2. Playback was perfect. Florenz Fels, program director, said quality of the portable was as good as the heavy machine with perfect reproduction 50 to 8,000 cycles flat, but tapering off sharply thereafter. Portable weighs 55 pounds, amplifier 10 pounds.

Speaks on Developments

JOHN ESAU, general manager of KTUL Tulsa, during the past month has made speeches before practically every civic organization in Tulsa and neighboring communities, making a stock address illustrating radio’s latest developments. Mr. Esau takes with him several pieces of standard equipment for demonstration.

---

**Scharfeld Leads Probers for AMG**

**INNERMOST secrets of Nazi Germany’s long preparation for war and the brutal “nacht and nebeld” system are being uncovered by investigators of the Allied Military Government, working under Capt. Arthur W. Scharfeld, member of the law firm of Loucks & Scharfeld.**

**Story of Capt. Scharfeld’s discoveries is told in dispatch to The Star by Thomas R. Henry, Star correspondent. Writing from Munich, the correspondent tells how “nacht and nebeld” or “night and fog” records have been found in clear language though they were supposed to have been kept only in indecipherable code.**

The records reveal the disappearance of persons who expressed anti-Nazi views. These persons were put to work in German factories, but as the war went on they showed a high incidence of fatal heart disease “induced by bullets.”

Whereabouts of men alive are revealed by the records Capt. Scharfeld is probing, though few of those on the lists escaped the “heart disease.”

**Story of a hitherto unknown corporation, similar to the U.S. Defense Plant Corp., is unfolded in records Capt. Scharfeld is studying. They trace formation in 1934 of a Montan Industries, which bought up great tracts of land, mostly forests. Vast industries created for armament purposes were scattered and hidden from visitors and even Germans did not suspect the extent of the giant operations. In 1938 the plants were opened to German corporations, though financed by the Nazi regime for the armament program.**

Capt. Scharfeld took the original AMGOT training courses at Camp Custer and Stanford U., going to England before the invasion. He went to France after the entry into Normandy and later was given an AMG assignment in Germany.

---

**Fire Prevention**

JAMES D. SHOUSE, vice-president of Crosley Corp., was presented with a plaque on behalf of WLW Cincinnati for “outstanding public service in fire prevention” by Frederick Rauh, president of the Cincinnati Fire Underwriters Assn. The citation commended WLW for “special distinction among America’s radio stations” in its cooperation with local and regional fire fighting organizations and for spreading information about fire hazards.

Radio for GI's
(Continued from page 30)

VDMT teaser spot announcement effort. This followed the Lucky Strike L3 MFT theme. "V. D. Means Trouble" was the message ten times daily on the air for a week. Then came the story. GI's were told to look for the green light for safety. "For a moment of play you might have to pay," ran the copy. "Look for the green light."

No Shouting, Preaching
Capt. Sanford Cummings, operations officer for Germany (formerly radio department Benton & Bowles), told the mission about problems ahead on programming for the GI. He said the shouting, exhorting type of news commentary won't satisfy the boys. They get irritated when people shout at them. They don't want their news dramatized. When mention was made of Winchell, Heather and Pearson, he said GI's are shouted at 20 hours a day, and they don't like shouted or evangelistic stuff. Col. Hayes concurred, saying they resent being preached at by a commentator.

AIDS Veterans
ONE of a series of discussions on veterans' affairs over WIOD Miami recently proved its worth immediately. A local representative of the Veterans Administration mentioned in an interview that it is illegal for attorneys to accept payment for filing claims under the G. I. Bill of Rights. Within a short while, three veterans phoned the station and reported paying such fees. An investigation was begun immediately to correct the situation.

Daily Serials
(Continued from page 24)

gram would you prefer to a "soap opera"?
Again, it is hard to get clear-cut replies to this question. Nineteen per cent (201) said they greatly preferred a good variety show with a clever master of ceremonies. Breakfast Club and Breakfast in Hollywood were mentioned specifically as the sort of a program these women preferred.
Eight per cent (82) said they liked Aunt Jenny, whose stories were not long drawn out, far better than soap operas. Ninety-two per cent (948) said they enjoyed such a program much better than a "soap opera" which was not interesting to them. But it was not clear what "not interesting" meant.
The criticism which came up occasionally was that a particular serial was not "true to life". But many other women seized on just that point as the reasoning they liked to listen. It made them feel that they were able to meet their own problems, when they listened to other women struggling.

Conclusion
To sum up:
If this sample of Columbus women can be taken as an accurate cross section for women in the upper brackets, with high school educations, who live in small cities, we can list the following conclusions:
1. Listening to daytime serials is not a neurotic symptom of American women. It is simply a substitution for human companionship during the day when the rest of the family is out of the house.
2. Forty-two per cent of the housewives with children of school age listen to "soap operas".
3. Listening to daytime serials is part of a larger pattern of household activity and revolves around the household tasks.
4. Small children in the home influence a woman's listening habits. Mothers of small children tend to prefer music while they do their housework, whereas mothers of children of school age prefer the continued story.
5. Where another type of program is preferred to the soap opera, it is a program where the interest is held by a distinct personality, as in the case of a master of ceremonies or a story teller who lends continuity to the program.

Wage Increase

SALARIES of members of the Radio Writers Guild with CBS in Chicago were boosted from $220 to $260 per month as a result of automatic 10% annual increases granted in a three year pact signed by WBBM Chicago, and Herb Putran, Guild president. New employees are to start at $225 per month and apprentices at $185.

**TELEFAX—** Printed, Illustrated News by RADIO via FINCH FACSIMILE

**THE AIRPRESS**

For Suburban and Rural Homes  For Ships at Sea  For Planes in the Air  For Vehicles on Land

TELEFAX is the name of radio-in-writing equipment pioneered years ago by Finch Telecommunications—interrupted by the war—and now being readied for widespread use.

TELEFAX will offer—to urban and rural homes, to ships at sea, planes in the air and cars on land—a means of getting the very latest information and detailed printed news, and other educational and entertainment matter transmitted by the most modern type of facsimile equipment.

TELEFAX offers to broadcasters an opportunity to expand their power, influence, profits and public service.

Inquiries are invited. Finch Telecommunications, Inc., Passaic, N. J.

New York Office, 10 East 40th Street.
Porter

*(Continued from page 16)*

commercialization" prevents "many stations from discharging their public responsibilities."

Many Factors

"Obviously," he declares, "there are many offsetting factors on the other side of the ledger. Certainly a blanket condemnation of broadcasting stations and networks would be unfair. Leading networks and trade associations have undertaken to lay down standards which, if generally followed, would go far toward mending matters. But competition among stations and networks is so intense that usually the commercial sponsor or his agent has the last word."

In surveying records for license renewals, Mr. Porter says "we have no thought of making the original license application a rigid blueprint for the future. But here we do expect to remind the broadcaster of his public responsibilities, and to narrow the gap between promise and performance." The next paragraph states that the FCC has no power to interfere with any specific program, nor is it a power which the Commission's chairman desires. Although not mentioned, the apparent incongruity between the FCC's renewal action and permitted power would seem to be cleared up by the word "specific."

Mr. Porter suggests, "Maybe the time has come for Congress to clarify public policy in this field. It is certain if Congress did undertake a revision of the old Radio Act of 1927, it would not confine its considerations to the lengthy commercial announcement. Congress would doubtless take up questions of whether news should be sponsored at all, and consider proposals that certain hours of good listening time be withheld from sale entirely, in order that stations would have no alternative but to broadcast sustaining public-service programs during that period."

"They might consider the question of how radio can best be used to develop local talent in its own communities. And it would appear certain that provisions in the present act which require the Commission to encourage and foster competition would be strengthened and not weakened. These and many more problems would run the gamut of legislative debate if Congress decided to act."

If the radio industry is "to avoid legislative intervention in certain phases of its operation," the Chairman concludes, "it should undertake to discontinue practices which are alienating the public angrily."

"There is a saying about putting your own house in order, before the law does it for you with a rough hand. It is an old, trite saying, but still true," he warns, "as many a proud industry, from the railroads to the stock exchanges, knows to its sorrow."

Einstein Repeat

FOR the first time since it went on the air, WGN-Mutual's Human Adventures, 2-3:30 p.m. C.T., Wed., will originate in Mutual's New York Playhouse, Sept. 12th. Program will also inaugurate a guest-star policy with Clifton Fadiman and Colonel Lemuel Q. Stephingle starron on a repeat performance of "The Einstein Theory", first presented March 9, 1944. It drew 12,000 requests for a repeat broadcast. Sherman Dryer, director-producer, in cooperation with the University of Chicago, will show how Einstein's theory was a basic part of research on the atomic bomb.

NYC Uses Show

NEW YORK City Park Department has received permission to use Happy the Humbug, syndicated children's show of NBC's radio recording department, as a marionette show for performance in the city parks. Plans are to take the marionette show this fall to public schools and hospitals.

NAB INAUGURAL DINNER ON OCT. 2

INVITATIONS will be sent early this week for the NAB Inaugural dinner in Washington Oct. 2 at which Justice Justin Miller will formally assume office as trade association head.

All members of Senate and House, the Cabinet and leaders in official and military life in the Capital will be invited guests, the list of invitees to exceed 1,000. As a result, there will be limited space for broadcasters outside the Capital.

NAB board members, who meet Oct. 1-2 in Washington, will attend, along with three representatives to be designated from each district (one each from large, medium and small stations). Networks also will be limited and Washington stations will be allowed three each. Trade press, newspaper and press association invitations will be limited.

Program plans call for an address by Chairman Paul Porter of the FCC; farewell address by Interim President J. Harold Ryan, and an inaugural address by the new president. Toastmaster had not been designated. Event will be held in the Presidential Dining Room of the Statler.

NBC Revisions

REVISIONS of prices of NBC recorded syndicated programs, amounting in some cases to as much as 40 per cent, went into effect Sept. 1, according to individualized folders sent last week to stations throughout the country by NBC radio recording division, which this coming week will send similar notices to advertisers and agencies. Folder and an accompanying letter from Willis P. Barnes, assistant sales manager, point out that the "ever-increasing use" of these programs by stations and advertisers enables NBC to make the reductions, "despite rising production costs and larger budgets for radio shows". New prices should help stations in smaller markets in selling both time and programs, NBC believes.
September 10, 1945.

TO THE BROADCASTING INDUSTRY:

Your 1946 YEARBOOK questionnaire is now in the mails. Kindly fill in the required information promptly, sending changes in later, as they occur. Your cooperation will insure accurate listing in the various directories. Please send all Yearbook data to the Washington offices.

Thank you.

the Editors—

1946 YEARBOOK*  

*Twelfth in a distinguished series.
FM Applicants (Continued from page 18)

Commission advised pending applicants it will consider their applications “as soon as practicable after Oct. 7, 1945”. If examination of the application and the supplementary information received is satisfactory, it stated, “the Commission may make a conditional grant of your application subject to the condition that complete engineering information will be filed within 90 days after date of conditional grant.”

However, the Commission “may issue a construction permit including the assignment of a frequency rather than a conditional grant” if the application contains the engineering data called for in the FCC report of Aug. 24 on FM Rules and Regulations [Broadcasting, Aug. 27].

The Aug. 24 report was issued to enable manufacturers, licensees and applicants to prepare immediately for FM broadcasting service. The final draft is expected to be issued within the next two weeks.

The Commission policy for processing applications reaffirms its previous statement that FM commercial broadcasting would be assigned the 92-108 mc band, with noncommercial educational stations to be given the 88-92 mc band. The Aug. 24 report stated that the Commission intends to utilize the frequencies in the 106-108 mc band for FM stations only in the northeastern part of the country and that in the remainder of the country this region of the spectrum can be used for facsimile.

Procedures for processing television and developmental and non-commercial FM stations will be issued shortly.

V. P. Thorp

VAUGHN F. THORP, 51, an engineer at Bell Telephone Labs, New York, died Sept. 5 of a heart attack on the downtown street of Ridgewood, N. J. He had been an instructor in radar course in Bell Labs. school for war training and was the author of several handbooks for the armed forces on maintenance and operation of war equipment developed by the laboratories. He lived in ho-ho-kus. N. J. Surviving are his wife, Hazel Z. Thorp, and a brother, Lt. Col. Kermit O. Thorp, stationed with the Army Air Forces in Chicago.

Deny Noble Motion

MOTION filed July 21 in state supreme court of New York by Edward J. Noble, chairman of the board of American, in which he seeks to examine Donald Flamm, former owner of WMCA New York, in connection with the litigation concerning Mr. Flamm’s charges that he was coerced in selling the station in 1941 to Mr. Noble for $850,000 was denied by the court last Thursday.

BUD THORPE, WOA1 Special Events Director, and Texas Ranger Walter Naylor, who aided in evacuation during the Texas Gulf Coast hurricane.

TEXAS HURRICANE COVERED BY RADIO

FOLLOWING the hurricane on the Texas Gulf Coast, the Texas Highway Patrol teletype carried a message from Col. Homer Garrison, director of the Dept. of Public Safety, giving “Heartiest congratulations to Bud Thorpe and Hoxie Mundine of WOAI (San Antonio), for a job well-done.”

The hurricane had been followed along the coast by Special Events Director Thorpe and Engineer Mundine, who spent four days with little sleep to food to accomplish what is considered one of the finest public service undertakings of WOAI.

The WOAI crew carried remote equipment and a wire recorder and were provided use of Ranger Walter Naylor’s two-way shortwave radio. By telephone and shortwave the station received reports on the storm’s progress and estimated time of arrival at various points along the coast were broadcast.

An invaluable service in evacuation was rendered since many telephone lines were down.

At the height of the storm, Thorpe and Mundine originated a broadcast from Corpus Christi, bringing in Naylor by shortwave from Aransas Pass, 30 miles away. Highway patrolmen and Red Cross representatives were interviewed.

KTBC Austin made hurried plans to report the hurricane through Manager Pat Adelman who was vacationing in Galveston at the time. A special line was arranged for and it appeared as though the station manager would spend his vacation reporting the story but the storm died down before reaching Galveston.
The Commission also denied that the offer of WDSU to clear time between 8 p.m. and 10 p.m. on Saturdays for Sen. Overton was "equal" to the time used by Mr. Stephens on Thursday evenings and pointed out that the latter made only one Saturday night broadcast during the campaign, and that on the date before the election. As to the comparative value of Saturday and weekday time, the Commission observed: "One has to compare the number of listeners on the streets and in various public places such as theaters, restaurants and night clubs on Saturday nights with the number of similar listeners on weekday nights."

Contrary to Policy

Referring to testimony before it by Fred Weber, manager and part-owner of WDSU, that the station could not offer time on weekdays to Sen. Overton because of an established policy not to change its schedule, the Commission observed: "This statement of policy reflects a complete failure on the part of respondents to appreciate their obligations as station licensees (to operate in the public interest) as to require severe censure of such policy.

"Under the Communications Act of 1934 and the Commission's Rules and Regulations, a station licensee has both the right and the duty to cancel such previously scheduled programs as may be necessary in order to clear time for broadcasts of programs in the public interest. And the mandatory requirements of Section 315 are both positive and explicit: 'He shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station. . . . It is impossible to reconcile respondent's policy with this statutory requirement.'"

As both majority owner of the station and candidate for public office, Mr. Stephens, the Commission held, "was under a peculiar obligation to make certain that the operations of this station did not afford the opportunity for his opponents to complain that the public facility over which he had control was being used for personal political advantage. A station operator more sensitive to the requirements of the statute and the traditions and practices in the broadcasting industry would have been more scrupulous in this respect . . . ."

Record Not Clear

"Had the record been clear that Stephens as a licensee of this Commission wilfully and deliberately used this privileged position to disfavor his political opponents such an offense would warrant revocation proceedings. It appears, however, that Stephens, who was not the active manager of the facility, was perhaps more guilty of a lack of understanding of his obligations and responsibilities as a licensee than any wilful intent to utilize his broadcasting facilities unreasonably."

Testimony at the hearing on the complaint brought out that management and control of daily operation of WDSU were under Mr. Weber and that neither Mr. Stephens nor H. G. Wall, remaining minority owner, participated actively in station operations. Reviewing its findings, the Commission saw no justification for drastic action "because of a single episode in which the licensee exercised questionable judgment in the operations of his station." It pointed out that "the only sanction [it] could apply would be to appropriate further proceedings to revoke the station's license and thus destroy a service which the Commission has heretofore found meets the standards of public interest."

Considering the attendant circumstances, the Commission therefore decided that proceedings be closed, with notice that the record is subject to further review in considering the station's overall operations when application is made for renewal of license. Addressing broadcasters it concluded: "This proceeding should serve, however, to remind the licensee that the facility in which he has an interest is not an instrumentality to be used for his personal political advancement. Broadcasters have a particular obligation to avoid discrimination in political contests and broadcasters generally are conscious of this responsibility."

The proceeding was the first of its kind under Section 315 of the Act. Attorneys William Klopovitz and Richard C. O'Hare represented the station and P. W. Seward and Philip Bergson handled for FCC.

Shaffer Is In Charge Of WSPA

ROGER SHAFFER Spartanburg

Roger Shaffer has been named assistant general manager of WSPA Spartanburg, and Guy Vaughan Jr., commercial manager.

Mr. Shaffer has been connected with the Spartanburg Advertising Co., station owners since Nov., 1940. He will have charge of the operation of the station during the absence of Walter Brown, vice-president and general manager, who is now special assistant to the Secretary of State, James F. Byrnes.

Mr. Shaffer succeeds John W. Kirkpatrick, who has resigned [Broadcasting, Sept. 3].

Mr. Vaughan returns to WSPA after an absence of ten years, during which he has been with the Spartanburg Herald-Journal Co., handling national and local advertising. Prior to going with the newspaper he served as announcer and salesman for WSPA.

Beck, Glass Join

MYER P. BECK, formerly director of publicity for United Artists, and George Glass & Assoc. of Hollywood, have joined to form a publicity partnership, Myer P. Beck & George Glass & Assoc., with New York office at 729 Seventh Ave., under Mr. Beck, and Hollywood offices at 719 Sunset Blvd., under Mr. Glass.

Transcription Turntables

We are now in full production on turntables and are able to make excellent deliveries on chassis only, chassis with cabinets, or complete with lateral pickups and filters.

All equipments are latest design, inside rim drive dual speed with aluminum platter.

The next time you buy turntables, buy the latest—the GATES CB 7.

GATES RADIO COMPANY

Quincy, Illinois
Italy
(Continued from page 18)
rated high but U. S. transcribed programs are top.
Current set fee is 160 lira per year, double that six months ago.
It is expected to be doubled again in near future.
Italy is starting ofter timer surveys by interviewing people in factories and homes on their program choices. Delayed recall method is used. Ronla operates 12 hours daily on a split schedule, 7-9 a.m., 12-2:50 p.m. & midnight.
No regular advertising agencies operate in Italy.
Station or networks sell whole program including talent. Network programs are based in Rome. Gussi-operates, about 1,200 lira ($12).
No distinction is made between day and evening time but plenty of the latter is available. Under the new order six major political parties are given 10 minutes a day alternately after the 1 p.m. news. Four minor parties get time Sundays, once per month.
Radio has own Agency.
The Italian company has its own talent agency, SIPRA, which sells programs commercially. Advertisers could influence program type but usually buy one with an established audience.
U. S. Broadcasting Mission was briefed on the AEF station in Rome by Capt. James Rawley, the director and a former Hollywood radio actor, who had unvarnished observations on the importance of American-type radio.
Overseas from the start, he told how stations using the best recorded network programs plus AFRS had kept the Army informed and entertained and still served the native populace. Entirely divorced from AFN, the Rome station has a staff of a dozen.
Because the Italian people love music, the Army radio has helped break down barriers, Capt. Rawley said. Even Germans admired, he said. Italian newswriters held the AEF station had 75% of the Rome audience and fan mail surmising the claim. Station receives an average of 4,000 letters weekly. Dina Shore is most popular artist, with Roy Acuff, hillbillily, ahead of Frank Sinatra. Surveys show GI's once liked jive but now want sentimental music. Radio in the Mediterranean Theater is as good as any in the world because it has pick of the best talent via recordings, the original production cost of which would run $1,500,000 weekly.
Programs are de-commercialized but Army commercials are submitted. Reaction proves that commercial radio is still tops because the people take heed of what they hear. Gen. Clark is absolutely radiominded and encouraged development of stations throughout the Italian campaign.
Capt. Rawley cited reports from Army doctors that patients convalesced faster with programs available. This was especially true among amputees and cast cases. Doctors called radio a Godsend. Referring to British radio competition with ours in Rome, Capt. Rawley said the British haven't got a chance because they play British recordings far inferior to ours. British soldiers prefer our stations. Many listeners believe the most important secret weapon for peace is a commercial radio system. Capt. Rawley said, urging a fully commercial competitive system for Italy, which appreciates our ways.

VIPS
(Continued from page 18)
American make transcriptions of outstanding ceremonial events for U. S. stations was favorably received by the Rev. Filippo Soccosci, Vatican radio director.

- -

Second portable Magnetophon tape recording playback machine was located at the Vatican station. It was bought from Germany five years ago.

- -

Committee from the Mission held a brief conference with Italian Premier Indiana Parri and his aides on Wednesday. The Chief of State thanked America for its leadership in world affairs and its aid to Italian recovery. He delayed a Cabinet meeting for an interview with Morris Norvik, manager of WNYC New York and Mayor LaGuardia's radio advisor. Committee included Col. Kirby and Messers. Miller, Woods, Keinisch, Hedges, Swesy, Campbell and Taishoff. Riccardo Aragno, commentator of Radio Roma, was interpreter.

Domestic scene 7,000 feet up, flying from Rome to Paris—Mark Woods, American president, sewing a torn coat lining.

Mission members were guests Tuesday night of U. S. Ambassador Alexander C. Kirk at the famed Palazzo Barberini. Afterward they were guests of Anthony Ravel, director of Voice of America, former OWI enterprise and now presumably under the State Dept. Heads of Italian radio attended.

When transatlantic travel becomes commonplace, the famed Riviera will have plenty of customers among vacationers. The Mission shacked up at Hotel du Cap between Cannes and Nice Aug. 31, Sept. 1, 2 before leaving for Rome. Like other billets it was an Army recreation center. Brig. Gen. Riley Ennis, ex-desert fighter, commands the center and acted as host.

Ten missionaries went to Monte Carlo in nearby Monaco Sept. 1 but couldn't try their luck because Gen. Eisenhower had ordered the Casino off limits for the missionaries. MPs escorted a Casino tour at which broadcasters picked up souvenir chips but didn't have a chance to play. The Monte Carlo radio station was visited.

T V Quiz Show
WBBK Chicago, television station, will present Telequizicals, video quiz program, as a weekly feature, starting Friday a.m. as a result of program's favorable listener reaction. Show is sponsored by Commonwealth Edison.

Ackerman Trip
HARRY ACKERMAN, vice-president in charge of programming of Young & Rubicam, New York, leaves on a business trip to the West Coast Sept. 14.

RAY BAKER NAMED KOMO COMM. MGR.
RAY BAKER, network sales representative of NBC in the San Francisco area, has been appointed commercial manager of KOMO, NBC San Francisco outlet, according to an announcement made last week by O. W. Fisher, president of "Fishers Broadcast Station", KOMO.
Born in Washington State, Mr. Baker was graduated from Stanford U. He was Oakland manager for Pacific Railroads Advertising Co. in 1936, and with KFRC San Francisco for six years. He has been with NBC since 1942.

Mr. Baker

HOW DO YOU LIKE TO SELL AN $800,000,000 MARKET?

Omaha's MUTUAL station offers you $800,000,000...the buoyant income stream of Nebraska in the heart of the rich central Mis- souri Valley.

$800,000,000 equal to two-thirds of the buying power of the entire state of Nebraska. In an area equal to only half the popula- tion. Only $80,000,000 market available to you on KEBN...the station you'll want to know about.

General Manager, Paul B. Fry, National Dept., SPEY SALES, INC.

MUTUAL BROADCASTING SYSTEM

"The Midwest's Greatest Market"
Surrender
(Continued from page 17)
Francisco and fed to networks was transmitted on 17225 kc from the Ancon and relayed by the Navy’s Guam station using 3 kw on 15690 kc. Additional signals were relayed from the Jowa direct to San Francisco and from the Navy radio station at Okinawa, in addition to the Radio Tokyo transmission. Other transmitters were available on the New Jersey and the Catoctin.
Navy’s transmitters and the Army’s Radio Tokyo setup took a cue from RCA San Francisco, relayed via Guam, and started their recordings at the same moment. The signals on the Ancon were fed out of the recorders without dubbing. One spool carried the first 22 minutes of the ceremony and a slight delay occurred in shifting to the second spool, which held the last 4 minutes 10 seconds of the ceremony.

Reason for Delay
Edward’s version of the reason for delayed broadcast follows:

“To quote a Navy officer, ‘in order to control the situation with more than 300 war correspondents representing the press and radio of the world from several transmission points in the vicinity, the War and Navy Deps. in Washington had decided with the concurrence of Gen. MacArthur that a delayed release of one hour-and-a-half be made.’

That was so that many details of the radio programming, the filing of press copy, the handling of sound, closely coordinated with the prearranged tieup with the White House, could be done with the certainty that it would function properly. This Navy officer said that if such a system had not been used it would have been impossible to perfect arrangements in the short time possible.

“Go the news association and the radio men all were on an even start from the Missouri. Radio, instead of having a direct shortwave circuit from the Missouri, recorded the broadcast.”

Following the pooled broadcasts of the surrender signing and by President Truman, NBC at 10:05 p.m. Saturday broadcast the victory talks from Gen. MacArthur and Admiral Nimitz which NBC had recorded for the occasion. At 10:17, NBC presented its symphony orchestra, under the baton of Arturo Toscanini, in Victory Act 3, conceived symbolizing the end of war in the Pacific as Acts 1 and 2 had celebrated allied victories in Italy and in Germany. From 11:08 to midnight NBC broadcast commentaries and analyses of the surrender by Kenneth Banghart and John W. Vandercook in New York and Clifton Utley in Chicago with Merrill Mueller and Joe Hainline giving color stories on the surrender ceremonies from Japan.

NBC Special
NBC’s only special broadcast on Sunday was the special Armed Forces show, pooled to all nets, 9-9:30 p.m. Blue had nothing special outside the pooled broadcasts.

CBS put on Robert Trout and Quincy Howe from New York, Walter Winchell from Hollywood, Red Barber and Gene Rider from the World with Dr. B. B. Warfield, starting & finishing at 11 p.m. A midnight round-up brought Bill Downs, recorded from Yokohama reporting on MacArthur’s orders to the Japs, Don Mosely from San Francisco, Harry Flannery and Chet Huntley from Hollywood, and Bernard Bennett from New York. Sunday included religious programs dedicated to V-J Day, Secretary of the Navy Forrestal at 2:55 p.m. and the AFTRS show Sunday night, 9-9:30. At 11:15 CBS presented a documentary Pearl Harbor to Tokyo written by Margaret Miller (Mrs. Paul White).

Appropriate feature broadcasts were carried by American Mutual. Among Mutual’s programs was a commentary by Jack Mahon from Japan, and the Sunday pooled description of the Luzon surrender. Mutual had Bob Brumby with first eyewitness account of atomic bomb damage at Hiroshima.

Beer Buys Local
SCHOFENFEN EDELWEISS Co., Chicago (Edelweiss beer), will be one of the heaviest buyers of local radio time if present plans are completed to sponsor its satisfaction. Olion Adv., Chicago, has arranged with WMAQ Chicago, for 11:15-12 midnight period, Mon. through Fri.; also WENR Chicago for 10-11:00 p.m. Sunday, 25-minute week-day period, and half hour Saturday slot over WBWM Chicago. If times are made available, agency will sign 52-week contracts for this fall.

Bialic With B&B
ROSE BIALIC, formerly with the press department of CBS, has joined the publicity staff of Benton & Bowles, New York.
Sure, You Can Live Without a Gulllet (Ky.)!

Just let old Doctor WAVE fix you up! It's maybe a hard fact to swallow, but most backwoods communities in this State (such as Gulllet) just aren't worth the higher expenditure necessary to reach them. What else will slip down the old esophagus, however, is WAVE's nourishing Louisville Trading Area, home of more than industry and of more people with money than the rest of Kentucky combined. Try it!

Tobacco Net Plans

BOARD of Directors of the Tobacco Network, regional Eastern-Northern Carolina web, meeting in Goldsboro, Sept. 1, voted to extend all affiliation contracts to two years. Formerly plans called for one year. Board also planned for an extensive promotion campaign. Attending were: Louis N. Howard, WHIT New Bern, president of the network; Billy Hodges Jr., WSGC Greenville; Bright, WGBR Goldsboro, secretary; Allen Wannamaker, WGTI Wilson, treasurer; Fred Fletcher, WRAL Raleigh; Paul Moyle, WPNC Fayetteville.

WLW Meeting

SEMI-ANNUAL meeting of the WLW Cincinnati merchandising department Sept. 9 was to discuss various aspects of postwar merchandising. Approximately 50 members of the staff were to attend. Marshall N. Terry, director of promotional activities, presiding, speakers scheduled included James D. Shouse, Crosley Corp. vice-president in charge of broadcasting; Robert E. Dunville, WLW general manager; Harry Mason Smith, general sales manager; J. M. Zinsmeier, director of drug merchandising; R. M. Fanning, director of grocery merchandising.

BMB (Continued from page 17)

Jack Stone, WYRA Richmond

war correspondent who witnessed the signing of the Japanese surrender from a second turret gun aboard the Missouri, cabled the following description of the occupation:

"We came down at Atsugi Airfield at 7:45 a.m., Aug. 30. Japanese military liaison at Atsugi were impulsive, but helpful with Army trucks when ordered. Japanese sentries at every hamlet and crossroad on the way to Yokohama turned their backs to our convey of more than 100 correspondents. We were the first in Yokohama with the Eleventh Airborne establishing perimeter. There were no children. Adults turned their faces. Had lunch at the hotel that is now MacArthur's headquarters. It was a poor meal served by Japanese waitresses."

"Drove the Japanese army truck back to Atsugi with correspondents. We are temporarily quartered at Hotel Yokohama. Drove truck loaded with correspondents to Tokyo outside perimeter around Imperial Hotel. We were the first group of correspondents in Tokyo. Had lunch at the Imperial Hotel - three-course meal - thirty-two cents - not bad! Drove along Imperial Palace Moat, no Japanese gathering, no hari kari incidents noted. Stopped and bought souvenirs; prices so far are reasonable."

"We are first Americans most Tokyokans have seen. Rode past regiment of Japanese soldiers on review. Japanese general and staff stopped to watch us. On the way back to Yokohama we ran out of gas. A truck and brought to our aid, with driver bowing and grinning. Back in Yokohama saw Japs leaving offices and factories for day and passed packed streetcars and buses."

MacInnes in N. Y.

CHARLES MacINNES, Young & Rubicam's representative in Brazil, is in New York for the next four to six weeks.

New Improved Sets
Forecast in Month

Philo Head Sees 324 Million Radios Possible This Year

JOHN BALLANTYNE, president of Philco Corp., Philadelphia, said in a broadcast on Mutual's Reconversion and Jobs program Thursday night that at least 25,000,000 radio sets are needed to meet the present demand in the United States alone, and the first of these sets, greatly improved in tone, power, selectivity and appearance should be available within the next month or two.

It is possible, Mr. Ballantyne said, that 5,000,000 receiving sets will be manufactured before the end of this year, and improvements gained from wartime research.

Mr. Ballantyne pointed out that the export market for American radio sets and phonographs has never been more promising, which means that employment opportunities in the radio industry are high.

"A recent survey by the Radio Manufacturers Assn. revealed that 145,000 people would be employed by the radio industry when reversion was over. This represents an increase of 68% over the pre-war level. When television reaches a nation-wide scale, employment in the radio industry will be far above even these immediate post-war levels," he said.

Thomas H. Beck, president, Crowell-Collier Publishing Co., who also spoke on the broadcast, predicted at least four years of great, prosperity following reversion, with corresponding increases in advertising for radio, magazines and newspapers.

Amoco Redskin Hookup

THREE stations will carry sponsored broadcasts of the Washington Redskins football schedule, WMAL Washington, WITH Baltimore and WLEE Richmond. American Oil Co., Baltimore (Amoco) is sponsor, along with Lord Baltimore filling stations, placing end of Joseph Katz Co., Baltimore. WLEE joins the hookup Oct. 7, since it will not take the air until Oct. 1.
Harmon Returns

TOM HARMON, Michigan All-American ’39 and ’40, recently discharged from the AAF, has signed with WJR in Detroit to broadcast the U. of Michigan football games this season. First broadcast is Sept. 15, with Great Lakes-Michigan game. Before joining the service, Capt. Harmon was WJR sports director.

by Congress. Until this phase of the problem is dealt with through legislation, it is declared, it must continue to limit its considerations to three questions:

1. Does the price paid indicate trafficking in licenses?
2. Does it adversely affect the licensee’s financial qualifications?
3. Would the price paid result in overcommercialization of the station at the expense of rendering a public service?

The majority could find no basis for substantiating any such possibilities.

Two Dissenting Opinions

Dissenting, Commissioners Walker and Durr pointed to Aviation Corp. as a large holding company of a type that controls important segments of the economy without corresponding responsibility. The applicant failed to give the FCC a valuation on its broadcast properties; they argued, not having shown familiarity with duties and responsibilities of a licensee.

Answering the majority argument that denial of license to an applicant whose business interest lies outside broadcasting would throw the industry into chaos, the minority said it would have been more appropriate to await Congressional action on weakness in the legal provisions involving transfers before approving a transfer of domestic and international facilities of the importance involved in the Crosley case.

The Walker-Durr dissent said competition for frequencies should not be in terms of ability to pay the highest price but in terms of public service to be rendered. They contend that the Commission’s past mistakes or omissions in the field of station transfers do not vest an interest in any licensee or prospective licensee, and the Commission’s statutory responsibility is not diminished by any such failures or omissions.

Failure to disclose price at which Crosley broadcast facilities are transferred is cited in the dissent, along with possible pressure of the holding company on the station management to earn a return and the consequent danger of wiping out the limited amount of sustaining time now available.

The two Commissioners agreed that denial is required on grounds stated in a separate dissent by Commissioner Wakefield.

Package of Equities

He argued that Avco is less qualified than Crosley and that the successor should have qualifications assuring at least a comparable standard of service. Avco was not originally interested in buying radio stations, Commissioner Wakefield said, considering the radio properties a package of equities. Adequate time existed to find a fully qualified buyer, he added. He also pointed to the lack of information as to the price paid for radio

(Continued on page 82)
Ford Resumes
FORD SUNDAY symphonic hour, discontinued since 1942, returns to the air over American network, 7-8 p.m. CPT, Sept. 19th. William J. Redick will resume his duties as program producer, with guest conductors and soloists including such famous artists as Eugene Ormandy, Fritz Reiner, Budapest, Mitropoulos, Fritz Reiber, Reginald Stewart, Jascha Heifitz, Dorothy Maynor, Reis Stevens and Eleanor Stein. The program will coincide with first major release of Ford automobiles to dealers. Contract for 32 weeks was signed by Kenyon & Eckhardt, Chicago.

Part Way Only
This proposed procedure will, however, only go part of the way toward correcting the deficiencies in the transfer procedure. There will still be no ceiling on the prices which can be paid for broadcast stations and this will tend sharply to restrict the field of potential transferees. In most cases personal financial resources are a considera- tion in the sale of a broadcast station but there will be many more qualified persons who will not be in a position to compete. Accordingly, a completely effective transfer procedure must not only permit the Commission to select the transferee but also provide a procedure such that the field of its choice is not unreasonably restricted by permitting only qualified persons to apply for their licenses.

Carry Out Intent
It is believed that such a procedure will more adequately enable the Commission to carry out the congressional intent that the best qualified person be licensed for each station. However, the procedure must not make the price of a station too high for the average buyer. The Commission will determine the price, if the price is artificially high and exceeds the value of the physical properties and good will there will be many more qualified persons who will not be in a position to compete.

* In proposing this new procedure we are not unmindful of the argument that it will defeat the purpose of the Act in the sale of the Crosley broadcasting facilities but in addition to the transfer of the manufacturing plant which The Crosley Corporation owns it would obviously not be feasible to expect a competing applicant in a similar situation to purchase the radio stations in order to operate its broadcasting properties. Accordingly, in order to prevent a recurrence of this situation in all future transfers where broadcast-
Not Unusual for Big Business To Hold Broadcast Licenses

JUSTIFYING its approval of the Crosley-Aveo transfer, the majority opinion of the FCC pointed out that it is nothing unusual for big business concerns to hold broadcast licenses. "Large companies were among the pioneers of radio broadcasting," the opinion observed, "and contributed much to the development of the art." Some of the early licensees cited were: Alabama Power Company (a public utility), Ford Motor Company (automobile manufacturer), Gimbel Brothers (department store), Warner Brothers (movie company), Westinghouse Electric and Manufacturing Company (a manufacturer of electrical products), General Electric Company (manufacturer of electrical products), Midland Refining Company (oil company), Earl C. Anthony (distributor of automobiles and accessories), Union Trust Company (bank), Woodmen of the World (life insurance).

In addition, the decision declared, there were a large number of newspapers and various industrial and manufacturing firms. If the Commission were to deny the transfer to Aveo on the ground that such a company, because of its other interests, is not qualified to hold a license, said the majority, then such a policy would have to be applied to present holders when they seek license renewals. The result would be, it asserted, that doubt would be cast upon the status of licenses held by such companies as:

Westinghouse Electric and Manufacturing Company (manufacturing)
Earl C. Anthony, Inc. (automobile distributors)
Southwestern Sales Corporation (manufacturing)
General Electric Company (manufacturing)
Stromberg Carlson Company (manufacturing)
L. B. Wilson, Inc. (theaters)
Loews Incorporated (theaters)
Durham Life Insurance Company (insurance)
L. Bamberg and Company (department store)
National Life and Accident Insurance Company (insurance)
Travelers Indemnity Company (insurance)
Sidles Company (automotive equipment)
Farmers and Bankers Life Insurance Company (insurance)
Columbia Broadcasting System (recordings and transcriptions)
American Broadcasting Company — Edward J. Noble (candy business)
Radio Corporation of America — (radio manufacturing and common carrier)

Quick Action Seen On Daylight Time

SIXTEEN measures for return to standard time were introduced in Congress last week, 19 of them. The House and one in the Senate, with indication that action may yet under way in time to provide for abrogation of war time by Oct. 1. Most of the bills have been to do away with daylight time, but a measure introduced by Rep. Ridley (R-Okla.) would establish standard time for the continental United States. All House bills were referred to the Interstate & Foreign Commerce Committee, of which Rep. Lea (D-Cal.) is chairman. A bill introduced by Sen. Byrd (D-Va.) was referred to the Senate Interstate Commerce Committee, of which Sen. Wheeler (D-Mont.) is chairman.

Rep. Cannon (D-Mo.), in a speech Thursday, said he has yet to find a member of the House who opposes cancellation of war time. He observed that President Tru- man's message to Congress the same day had approved repeal of wartime restrictions which Congress might wish to terminate. He added that WPB has withdrawn opposition to cancellation.

Effective in early 1945, nationwide time eliminated the semi-weekly juggling of broadcast schedules to adapt schedules to the daylight saving time operative in some of the large cities.

Ralston Tom Mix, Ole Opry Shows Get High Hooper; Station Contest Starts

SEIZING the opportunity offered by the high Hooper rating of the Tom Mix show, Ralston Purina Co., St. Louis, is running an ad in trade magazines suggesting the program as a means for finding out the mail pull of the station carrying it. Competitors have planned a contest, with eight prizes, the first of which is a $500 War Bond. Tom Mix is heard on 215 Mutual stations, 5:45 p.m. weekdays.

According to Hal Chase, advertising manager of Ralston Purina's cereal department, the series has attained since it has been on the air the highest Hooper for a day-time audience children's show, the largest male adult audience, and the children's audience for that type show. Charles Claggett, vice-president of the Gardner Advertising Agency, St. Louis, won the 1945 Irma Proetz Award for his commercials on the Tom Mix program.

Double Take

Second Shredded Ralston show for the Ralston Co., is Grand Ole Opry House Matinee. The half-hour show, a portion of the Grand Ole Opry, is transmitted each Saturday night at WSM Nashville, then fed to the western part of the NBO hook-up the following Saturday noon.

Ratings for stations carrying the show—KVOO Tulsa, WXY Oklahoma City, WFAA Dallas, KPAC Houston, WOAI San Antonio—jumped almost 50% for the time slot Opry Matinee filled. Contract is for 65 weeks and it may go national later.

Ralston commercials in the latter show are incorporated in the program. Frequently, the audience, entertainers and announcers, is a rousing chorus of "Shredded Ralston, it's the thing to eatin' Shredded Ralston when she comes", or some similar plug.

Grand Ole Opry itself, live talent show, is a five-hour program originating in the studios of WSM, running from 6 p.m. to 11 p.m. Saturday night. It is part sustaining, with several sponsors participating in other parts.

In addition to the Shredded Ralston transcription, the company uses two other half-hours of the show to promote Purina Chows (livestock and poultry feeds), Ernest Tubbs and his Texas Troubadours tour towns in the Nashville area, dressed in hillbilly costumes, repeating the famous red and white checkerboard of Ralston Purina packages, promoting the company's products.

Ralston Purina sections of the Grand Ole Opry are supervised by Charles Brown, Gardner Ad. executive, in cooperation with Hal Chase.

BROADCASTING • Broadcast Advertising
ON THE SERVICE FRONT
Biarritz University Offers ETO Troops Radio Workshop

BIARRITZ American University, part of the Information & Education Division’s program of education in Europe, contains a complete broadcasting station available to troops who wish to study radio. AFN Biarritz, 54th outlet of the American Forces Network, is being used, in conjunction with courses in speech and dramatic art at the university.

Workshop station schedules news, musical, variety, and dramatic programs, sports, and special events and the usual round of programs broadcast to troops. Students can learn fundamentals of radio, electrical engineering and radio broadcasting, then put studies to practical use in the station.

The Polytechnic School, London, will have a three-month course in radio engineering, starting Sept. 15. Other British universities will offer electrical engineering courses scheduled to begin in September.

Warton American Technical School at Wharton, England, teaching technical radio, will include a special section devoted to radio repair. Courses in radio division include radio receiver servicing, special radio receivers, and radio shop operation.

AFN-Berlin
AMERICAN FORCES Network’s newest link, Berlin, got off to an auspicious start when it was formally dedicated for the use of occupational troops in the Reich capital area.

Sgt. Mel Galliaro, former announcer and production man with KFVD Fort Dodge, Iowa, and WLS Chicago, emceed the dedication program and gave the first announcement “AFN-Berlin is on the air.”

First program featured American music, Bing Crosby, Frank Sinatra at Bob Hope, Calypso of America and Hour of Charm, following which AFN-Berlin swung into its regularly scheduled 20-hour daily broadcasting sessions. * * *

AAF Radio Changes
COMPLETE reorganization of the AAF Office of Radio Production will result in the continuation of four of the most outstanding of the AAF’s ten network programs, according to Lt. Col. Frederick Brison, chief of the AAFORP, promoted to that rank last week.

After conferences with network officials in New York, Col. Brison said that Your AAF (previously Fighting AAF), will continue under that title on American, at 10:30 p.m. Thursday.

Return to Duty, true story of a flyer’s rehabilitation and reassignment, remains on Mutual, 5:15 p.m. Saturday. Roosty of the AAF is on Mutual, Sunday 9 p.m., with I Susp

Double Surrender
WAR CORRESPONDENTS Bob Brumby of Mutual and Clark Lee of INS ran up a double surrender score in two days last week. On Wednesday the remains of the Jap fleet, about 40 ships including subs, “surrendered” to them at the Kure naval base, and the following day they accepted the surrender of Joseph Alfred Meislinger, Nazi war criminal in charge of the destruction of the Warsaw ghetto, whom they found in a Japanese hotel where they were dining.
Why one husband kissed his wife four times!

"Here's a kiss" for the money you're saving... while it's coming in faster through the war years. I know in my bones jobs like mine may not last forever. Who can tell what's going to happen day-after-tomorrow? Thank God you've got sense enough to see that today's the time to get a little money tucked away.

"Here's a kiss" for the war bonds you're making me hold on to! I'd never do it without you, honey, it's too easy to find reasons for cashing 'em in—but when it comes time to put the children through school or pay for an emergency operation, we'll be thankful.

"Here's a kiss" for the insurance you talked me into buying. I've felt a lot easier ever since I've known our future is protected—you and the kids would be safe if anything happened to me—you and I won't have to spend our old age living on someone's charity. And every cent we put in insurance or War Bonds or other savings helps keep prices down.

"Here's a kiss" for being you—a woman with brains enough in your pretty head to make sure we don't buy a single thing we don't need in times like these—because you know a crazy way of spending in wartime would march America straight into inflation. Baby, I sure knew how to pick it the day I married you!

"Here's a kiss" for being you—a woman with brains enough in your pretty head to make sure we don't buy a single thing we don't need in times like these—because you know a crazy way of spending in wartime would march America straight into inflation. Baby, I sure knew how to pick it the day I married you!

ONE PERSON CAN START IT!
You give inflation a boost
— when you buy anything you can do without.
— when you buy above ceiling or without giving up stamps (Black Market!)
— when you ask more money for your service or the goods you sell.

SAVE YOUR MONEY. Buy and hold all the War Bonds you can afford—to pay for the war and protect your own future. Keep up your insurance.

World Radio Society Can Aid Peace

Formation of Academy Urged, With U. S. Taking Lead

By PFC. CECIL K. CARMICHAEL

BROADCASTING and its concomitant services will be a dynamic force offering great hope in the new era born amidst the shambles of the old. This fact imposes upon its leaders a heavy duty and the solemn responsibility of using the medium as an instrument of service in creating an appreciation and a sensible sympathy among the nations for the problems and aspirations of each other.

Happily, present relations between the United Nations are conducive to coordinated effort toward the formation of a world society to function as an agent of recognition and clearance for ideas and methods vital to the new age. As such, it imposes upon radio leaders the duty of making the medium a true weapon of peace. And without the arts, neither management nor science would present its cleanest face to the public.

RATIFICATION by the U. S. of the United Nations Charter underscores the need of a world broadcasting society to serve as a dynamic force for peace and progress in the radio art. “Ceece’” Carmichael, former NBC program promotion specialist, believes the time is ripe for American broadcasters to take the lead in forming an Academy of Radio and Television Management, Arts and Sciences, for it is the only broadcasting as a social and cultural influence.

Need for Self-Appraisal

Preparatory to a world organization, broadcasting in the United States has made a study of itself. This study has taken the form of self-appraisal, a university, or any promotional-minded institution, and their annual surveys have had a salutory effect; they have done much to raise the level of broadcasting and provide it lighted paths to travel in the formative days. But, because of the countless number of publications, universities and institutions, none of the surveys has commanded the unchallenged attention and enthusiasm of the field.

In other words, broadcasting now that it is of age, might turn its attention more closely to adult service and formulate careful internal notions of what it has found is good both for the industry and the common welfare. It is well to compete for, but unwise to concentrate exclusively on the many so-called Pulitzer Prizes of Radio, the terming of which in itself seems rather an indirect rebuke to broadcasting, for it implies that radio is dependent on another medium for a standard high enough to shoot at. Broadcasting does not have to go beyond its own family circle to find a synonym for excellence; any of a dozen or more major stations or the networks would provide one.

In an organization devoted to the cultural and social significance of broadcasting, the key words would be Management, Arts and Sciences; these three factors are the basic pillars of the American system. Without intelligent and progressive management, the arts would not shine with their full brilliance, nor would the sciences explore and develop to their greatest potential. Without the arts, neither management nor science would present its cleanest face to the public, and receive the same attention as the writing, production and performance of a program masterpiece. The kudos would be distributed with primary emphasis on individuals, for it is the life which individuals breathe into ideas that make the results either leap to heights of splendor or plod with the heavy feet of mediocrity; and the awards would be a sign that the recipients had entered a select circle. What facts members were entitled to honor and respect for their attainments.

Radio's New Frontiers

United, as envisioned in ARTMAS, and agreed upon the standards it would pursue and reward at home, American broadcasting would be prepared to undertake, through ARTMAS, the aims already suggested for the field of international relationships, and by encouraging a fusion of sympathetic ideals and culture make a significant contribution to the durable Peace everybody talks about and hopes for.

It is up to broadcasting in this country to take the lead, as leadership inevitably devolves upon the strong; and in a matter so vital as the continual building of a complex, workable society private citizens and private business can no more afford to think in narcissistic, chauvinistic channels than can governments, for public pressure is the guiding stimulant of political action and the type of action will be determined by peoples' understanding and opinion of each other. Whether Peace is ephemeral or permanent well may rest outside the framework of government structures and in the hands of men and women of goodwill laboring in their own jobs toward the great goal.

This is, indeed, One World, and broadcasting, having done much to knock down the barriers of the old, can do infinitely more in helping expand the frontiers of the new. It is destined to play this role.

Radio's New Frontiers

United, as envisioned in ARTMAS, and agreed upon the standards it would pursue and reward at home, American broadcasting would be prepared to undertake, through ARTMAS, the aims already suggested for the field of international relationships, and by encouraging a fusion of sympathetic ideals and culture make a significant contribution to the durable Peace everybody talks about and hopes for.

It is up to broadcasting in this country to take the lead, as leadership inevitably devolves upon the strong; and in a matter so vital as the continual building of a complex, workable society private citizens and private business can no more afford to think in narcissistic, chauvinistic channels than can governments, for public pressure is the guiding stimulant of political action and the type of action will be determined by peoples' understanding and opinion of each other. Whether Peace is ephemeral or permanent well may rest outside the framework of government structures and in the hands of men and women of goodwill laboring in their own jobs toward the great goal.

This is, indeed, One World, and broadcasting, having done much to knock down the barriers of the old, can do infinitely more in helping expand the frontiers of the new. It is destined to play this role.
Reconversion News
TIMELY station promotion deal was WGN's move to send News Director Robert F. Hurleigh on a swing around the Nation's automotive centers for on-the-scenes accounts of the industry's re-conversion progress. Hurleigh will do news and broadcast programs on both his sponsored news programs, 8 a.m. and 5 p.m., Mon. through Sat., speaking directly from assembly lines of Nash, Hudson and Ford in Detroit, Oldsmobile in Lansing, Mich., and Willys in Toledo, O., where he will describe the production of the new civilian "jeepl". Jay Feree, WGN engineer, will accompany him on the tour.

FARM, HOME HOUR GOES BACK TO NBC
ONE of radio's pioneer programs, the National Farmers' Hour, returns to NBC, Chicago, Sept. 15, with few changes in the original format.

Program will be heard each Saturday, 12:12-30 p.m. CDST over approximately 40 stations, sponsored by Allis-Chalmers (tractors), Milwaukee, with contract signed by Bert S. Gitting, Home Hour, Milwaukee.

Program started on NBC's Blue network in 1928, and stayed with Blue when NBC broke away, remaining until June, 1944, when U. S. Department of Agriculture, which owns title, withdrew broadcast rights over differences in policy. Present set-up calls for Everett Mitchell, who has been featured on Farm Hour since 1930 as host. Homesteaders' Orchestra, and Farm and Home Quartet. Guest stars and phone-in cut-ins from Washington will also be highlighted, with Clinton P. Anderson set to welcome show's return to the air.

Snow in September...

down South...

Cotton is the 16-county WSPA-Piedmont's largest money crop. Over 27,500,000 baled-pounds each year are produced in Spartanburg County alone.

NEW BBC DIRECTOR ARRIVES IN STATES
CHARLES BREWER, veteran of almost 20 years service with the British Broadcasting Corp., arrived in New York last week to assume the post of BBC North American Director. He succeeds John Salt, recently transferred back to England.

Gaining practical experience in broadcasting in Cardiff and Birmingham, where he first specialized in the production of variety and light entertainment programs, Mr. Brewer went to London as variety producer in 1933 and two years later was named assistant director for variety. Two of the most popular prewar BBC programs, BBC Scrapbook and Flying High were his.

A veteran of the Royal Flying Corps in World War I, Mr. Brewer joined the R.A.F. as a member of the staff of the bomber command at the outbreak of World War II. In 1941 he transferred to the Fleet Air Arm, first in communications work and later in command of training squadrons. In 1944 he spent some time in Paris as special liaison officer between SHAEF and BBC.

Urging the continuation and expansion of the wartime collaboration between BBC and American stations and networks "to our mutual advantage", Mr. Brewer described this collaboration as "an important factor in the total war effort".

"Now that the war is ended," he goes on, "there are equally important benefits to be derived from a continuation of this spirit of cooperation. Unfettered by problems of security and wise because of our wartime experiences, the free radio organizations of the United States, Great Britain and the rest of the world can now embark on a program to make radio an instrument to help bring about a better understanding between the peoples of the world."

Mr. Brewer, who last visited the United States in 1938, will meet the press at a luncheon to be given in New York on Thursday.

Biow Changes
RESIGNATIONS of Sam Gill, director of research, and Frank Barton, business manager of the radio department, from Blow Co., N. Y., took effect Oct. 1, seemingly point to a reorganization of the agency, although Mr. Gill stated that his resignation had no connection with that of Mr. Barton. Milton Blow, agency president, was not available for comment. No replacements have been named, nor has either Mr. Gill or Mr. Barton announced future plans.

Kuch Service
PAUL L. KUCH, former advertising and sales promotion director of Aerovox Corp., New Bedford, Mass., has established an advertising and sales promotion service for industrial advertisers at 410 Olympia Bldg., New Bedford.

A Guide to Recorded BMI Music
Disc Data for Disc Users

- They call it the "Disc Jockey's Bible"... for BMI's DISC DATA is truly one of the most valuable aids to users of phonograph records in radio.
- DISC DATA gives the Disc Jockey everything he needs for his programs.... all in one compact, loose-leaf folder. The names of outstanding recording artists, alphabetically listed, biographical highlights, photos, and up-to-date listings of BMI-licensed song titles, giving labels and numbers.
- At the moment, DISC DATA includes material on 57 noted band leaders and vocalists.... with new names and new record releases constantly being added.
- DISC DATA is but one of the many services to radio provided by BMI...

At Deadline...

OPA PRICE RULING ON RECEIVING SETS SOON

ACTION by the OPA on prices for radio receiving sets is expected this week, following decision reached over the previous weekend to remove the bottleneck on tubes and parts that arose from delay in securing OPA price formulas.

Seit manufacturers are going ahead with production plans, completing details of production lines and arranging to acquire tubes and components. Already some manufacturers are turning out sets but the quantity is not large. Within a few weeks output will reach a high figure.

Parts manufacturers complain the new prices on tubes and parts do not take care of many hidden increases in production costs. The increase factors for original equipment, radio tubes and parts range from 5% for resistors and miscellaneous items to 11% for coils, and transformers and chokes, based on the prices that prevailed in 1941.

AMERICAN PROMOTION AWARDS ANNOUNCED

SECOND annual awards for outstanding audience promotion of American Broadcasting Co. programs, based on a survey of agencies, has resulted in issuance of certificates by the network to the following stations: Cities over 600,000, KXOK St. Louis, WFIL Philadelphia, WJW Cleveland, WTCN Minneapolis; cities 100,000 to 600,000, WOWO Ft. Wayne, WAGA Atlanta, KXYZ Houston; cities under 100,000, WCBS Springfield, Ill.; WOR Rockford, Ill., WJBO Baton Rouge; cities under 50,000, KADA Ada, Okla., WTJS Jackson, Tenn., KGFG Coffeyville, Kan.

SKELLY RENEWS DREIER

CRIME PAYS

LEWIS J. VALENTINE has announced his resignation as police commissioner of New York on Sept. 14 after 42 years on the force, to become chief investigator-commentator of the new Genghis series starting on American Sept. 15 as a Saturday, 9-9:30 p.m. program. Series is sponsored by L. E. Waterman Co., New York, for Waterman fountain pens. Mr. Valentine will receive a $50,900 a year for his radio ties. His salary as commissioner has been $12,500 a year.

TRANSCONTINENTAL TELEVISION TWO YEARS OFF, SAYS MINER

TELECASTS of local sporting events and political doings in addition to visual adaptations of radio's variety, comedy, dramatic and other entertainment and educational programs should be available to the television set owner in the near future, Worthington Miner, CBS manager of television, said at address prepared for Broadcasting Sept. 9 as intermission feature of the CBS Symphony Orchestra Concert.

Mr. Miner warned listeners "it will be two years, probably more, before television will be ready to span the Continent" and that "television in its formative years will be limited to certain specific hours of the day. Television," he said, "should be considered not as a substitute for but as a supplement to your radio service." Color pictures and other technical developments are on the way, he said, stating that CBS hopes to demonstrate full color in New York before the end of the year. He warned, however, that "it would be false to anticipate television's full flowering tomorrow or the day after tomorrow."

CBS WORKERS PETITION

CBS white collar workers (secretaries, researchers, writers and directors in television) have authorized United Office of Professional Workers of America to file a petition with the National Labor Relations Board for the right to hold an election to determine: 1, whether the white collar workers want a union and 2, whether the union be the UOPWA, International Alliance of Theatrical & Stage Employees, or International Brotherhood of Electrical Workers. UOPWA is affiliated with CIO. Other two unions are AFL.

BARSBY ELECTED V-P

WILLIAM H. BARSBY, formerly traffic manager of RCA Communications Inc., was elected vice-president Tuesday. Captain纸上 who has been released from active military duty after two years as officer in charge of the War Dept. Signal Center in Washington, succeeds Mr. Barsby as traffic manager.

STEVE ELLIS and Don Dunphy will describe the Monday night boxing bouts from Madison Square Garden and St. Nicholas Arena, New York, on WIXI, sponsored by Gillette Safety Razor Co., Boston. Starting Sept. 10.
ADVERTISING MUST PACE PROGRESS

Advertising Brought NATIONAL MARKETS to Local Stores!

In 1909—an idea; in 1945—a multi-million dollar business! Such is the history of the Florists' Telegraph Delivery Association, the trade cooperative which widens a local florist's market from his own community to a whole nation. Thirty-six years ago, florists determined to make "Flowers-by-wire" a reality. Their success is attested by current annual volume of more than 5,000,000 orders—more than 7000 members—more than $36,000,000 worth of business!

In the DISTRIBUTION DECADE
Advertising Must Win Still Wider Markets!

AMERICA is on the verge of a new era—the Distribution Decade! Now that Victory has lifted the curtain on this new phase of economic history, responsibilities and new opportunities will fall to Advertising.

Conversion from war production finds us with abundant manpower, money, materials and manufacturing facilities. Purchasing power will exist as a potential, but its activation will hinge on the success of Advertising. For Advertising must create demand among consumers.

More than that, Advertising must regulate demands to meet abilities to produce in order to maintain a stable economy. Without a demand for goods, plus a parallel course of supply and consumption, we face a menace of disastrous unemployment.

Advertising did it before—and will do it again—better. Alert agency men will be ready for the Distribution Decade. The Nation's Station will soon be ready, too; ready to go into action—with new, factual data on how to move merchandise in the 4-State market that is WLW-Land.

THE NATION'S MOST MERCHANDISE-ABLE STATION
"I'm telling Helen about this—right now!"

You're a hundred miles from "nowhere" and you just landed the finest trout in the world! You've simply got to tell your wife (and the boys) back home.

So you turn on your "handle-talkie," signal the nearest "receiving station," get put through long distance and r-r-ringing!—she's on the other end!

Doesn't this seem fantastic? It really isn't at all! For now such instruments can be made—about the size of a camera—weighing as little as three pounds— with a range of many miles.

Similar equipment that served the Allied Armed Forces was made possible by miniature electron tubes developed in RCA Laboratories. These miniature tubes are the size of peanuts and acorns. Actually, with these tubes there can be radios the size of a cigarette case or a lady's compact—with "big radio" reception!

Similar research goes into all RCA products. And when you buy an RCA Victor radio, television set or Victrola, you get one of the finest instruments of its kind that science has achieved.

Radio Corporation of America, RCA Building, Radio City, New York 20. Listen to The RCA Show, Sundays, 4:30 P.M., Eastern Time, over NBC.
