Success story:

Talk about results from WLEE! Just read this story about the Richmond chemical company which makes a liquid bleach used in washing clothes.

This manufacturer started advertising his bleach on WLEE. *In just 11 weeks, orders from retailers had exceeded his production capacity!* For four weeks he had to stop advertising the bleach (he plugged a glass cleaner in its place) until he caught up with the orders.

Results like this from WLEE are everyday events for Richmond advertisers. More and more national advertisers are learning that WLEE is the Richmond station that gets results—fast! If WLEE is not on your list, get the whole story from your Forjoe man today!

The Direct Road

to 27 New England Markets

In every important New England market you can present your product with direct, local emphasis by using a Yankee home-town station — the sure way to command immediate attention.

Every one of Yankee's 27 home-town stations has the impact that comes from complete local dealer and consumer acceptance. Each

station provides complete neighborhood coverage of its city and suburban area.

You can make your New England campaign one operation, with vital local impact in each key spot and blanket coverage of 27 top markets in six states. Yankee's 27 home-town stations are your media for sales results in New England.

Closed Circuit

FCC's VERSION of revised McFarland Bill (S 1973) to reorganize FCC expected to go to Chairman Sadowski of House Interstate Commerce subcommittee this week. Commission spent all day Friday on revising draft presumably at Mr. Sadowski's request. Commission's action may or may not have had any connection with Chairman Coy's visit to White House preceding day. Comr. Jones has already advocated McFarland Bill and probably will not go along with majority's version.

THURSDAY WAS another radio day at White House. FCC Chairman Wayne Coy had session with President and was followed by J. Leonard Reinsch, managing director of Cox Radio and TV Stations, who served as radio adviser to President during early days of his administration. Mr. Coy was noncommittal beyond commenting that international telegraph and telephone regulations had been discussed, but informed observers believe more intimate radio matters were dealt with. Mr. Reinsch's call was personal.

MEXICO, which abstained from NARBA negotiations at Montreal, reportedly has now signified willingness to join sessions when they resume in U. S., if they're delayed long enough to permit her to prepare. They're to start on call of U. S., between April 1 and Aug. 1. Mexico would prefer latter date. U. S. undoubtedly would welcome Mexican participation but probably would prefer earlier start.

COINCIDENTALLY, it's understood Mexico has revised her NARBA channel wishes slightly downward, compared to original requests. She now wants 540 kc, new broadcast channel which she's already using; two low-frequency clear channels in exchange for two of her present high-frequency clears, and one additional clear instead of two she originally asked for.

U. S. CHAMBER of Commerce sounding out broadcasters on possibility of using radio as mass promotional appeal. Theme would underscore advantages of free enterprise system. Thus far, details slim. Last Wednesday, Chamber President Herman W. Steinkraus conferred with top radio executives in exploratory session at C of C's Washington headquarters. While no conclusions reached nor plans made, understood tentative proposals would center on single national program plus possible spots for wide distribution.

COLOR TV continues to perk. Optical system, involving single tube with prisms, being shown to FCC Commissioners and staff brass by Elwood Meyers, veteran engineer, who's described as friend of Allen B. DuMont of DuMont Labs. In demonstrations (not telecast) black-and-white film came out in color. Meanwhile J. P. C. Engineering Works, Oak Park

Bulletins

STERLING DRUG Co., New York, through Dancer-Fitzgerald-Sample, to sponsor 10:45-11 p.m. segment of CBS *Sing It Again* starting Saturday, March 11. Product not announced. Sterling understood cancelling order for segment of ABC *Stop the Music* because of related product conflict involving Bert Parks, m. c.

GOLD SEAL Co., Chicago, for Glass Wax, begins regional spot one-minute campaign in about 14 Midwest markets Feb. 27 for 13 weeks through Campbell-Mithun, Minneapolis.

MURINE Co., Chicago (eye lotion), returns to spot radio Feb. 15 with one-minute commercials in more than 100 markets for indefinite period. Agency, BBDO, Chicago.

NOMINATIONS ANNOUNCED FOR NAB BOARD POSTS

LIST of nominees for 18 of 27 NAB board posts announced Friday. They include even-numbered districts and five at-large groups—large, medium, small, TV and FM stations. Included are those who accepted nominations. Three district directors elected automatically since they have no opposition [CLOSED CIRCUIT, Jan. 30].

Final ballots to be mailed about Feb. 10. District directors and those receiving largest number of votes in each at-large class to serve two years. Those running second in at-large balloting to serve one-year terms, interim procedure pending staggered two-year plan effective next year. Those elected to take office at NAB convention in April.

Two additional nominees necessary for TV directorships since four are required. NAB district directors will fill out slate this week at Chandler, Ariz., board meeting.

List of nominees follows:

- District 2—William Fay, WHAM Rochester; Gunnar Wigg, WHEC Rochester.
- District 4—Harold Essex, WSJS Winston-Salem, N. C.; E. J. Gluck, WSOB Charlotte, N. C.; Ray P. Jordan, WDBJ Roanoke, Va.
- District 6—Harold Wheelahan, WSMB New Orleans.
- District 8—H. M. Bitner Jr., WFBN Indianapolis; George J. Higgins, WISH Indianapolis.
- District 10—William B. Quarton, WMT Cedar Rapids, Iowa.
- District 12—Jack Todd, KAKE Wichita, Kan.
- District 14—William C. Grove, KFBC Cheyenne, Wyo.; J. P. Wilkins, KFBB Great Falls, Mont.
- District 16—Calvin J. Smith, KFAC Los Angeles.
- Large Stations—Paul W. Morency, WTIC Hartford; John F. Patt, WGAR Cleveland; William E. Ryan, KFI Los Angeles; Victor A. Sholis, WHAS, Louis-

(Continued on page 122)

Business Briefly

NEW SPONSOR ● Nineteen Hundred Corp., St. Joseph, Mich. (Kenmore washing machines, etc.), using radio and TV first time in release of 50 written and recorded AM spots and three TV film commercials to dealers and distributors nationally for cooperative sponsorship. Agency, Beaumont & Hohman, Chicago.

ARROWHEAD APPOINTS ● Arrowhead Network (Wisc., Minn.) names Ra-Tel Representatives as national spot representative, according to Marlin E. Smythe, national sales manager of network.

RESIGNS ACCOUNT ● Weiss & Geller, Chicago, resigns Elgin-American (compacts) account, replacing it with accounts totaling \$1,200,000, according to Marvin L. Mann, radio and TV director. Elgin-American spent \$800,000 on radio and TV last year, plans over \$1 million this year. Ruthrauff & Ryan and Russell M. Seeds mentioned among agencies likely to land Elgin-American account.

SNUBBING OF RADIO BY MILITARY PROTESTED

DISCLOSURE that Grant Advertising, agency for U. S. Army and Air Force recruiting, had no funds allocated to buy radio time, although \$1 million earmarked for space buying in first half of 1950, has provoked widespread protests by stations.

Encouraged by some national representatives and by BAB, stations have written Congressmen objecting to short changing of radio—celebrated as donator of free time to recruiting and other public service causes.

Issue may grow into general revolt against long practice by government agencies of paying for space in magazines and newspapers while seeking free time for same campaigns from radio (see story, page 15).

At least one important station reported to have cancelled number of Army programs and commercials it had been broadcasting free.

RADIO, GOVERNMENT LEADERS AT CORRESPONDENTS DINNER

PRESIDENT TRUMAN, government and broadcasting officials participated in annual dinner of Radio Correspondents Assn., held Saturday at Statler Hotel, Washington. Bob Hope was m. c. Elmer Davis, ABC is association president.

Talent, provided by networks with NBC as coordinator, included *Who Said That?* with Bob Trout, H. V. Kaltenborn, Vice President Alben Barkley, Oscar Levant and John Cameron Swayze; Russ Swan; Mindy Carson; Dennis Day; NBC orchestra under Norman Clotier. President Truman was given television table made from White House furniture. *Who Said That?* telecast by NBC-TV network.

List of head table guests follows:

President Truman; Vice President Barkley; Hugh Baillie, UP; Supreme Court Justice Hugo Black;

RCA-8D21, used in 5-kw TV transmitters

RCA-5592, used in 50-kw FM transmitters

RCA-5671, has thoriated-tungsten filament, used in 50-kw AM transmitters

Value Beyond Price

THE THREE TUBES illustrated are striking examples of RCA's pioneering in modern tube development . . . the kind of engineering leadership that adds *value beyond price* to the RCA tubes you buy.

The RCA-8D21 employs advanced principles of screening, cooling, and electron optics as revolutionary as television itself. The RCA-5592, with its "metal header" construction, requires no neutralization in grounded-grid circuits. The high-power tube RCA-5671 successfully employs a thoriated-tungsten filament that draws 60% less filament power than similar tungsten-filament types. This tube is establishing exceptional records of life performance.

RCA's unparalleled research facilities, engineering background, and manufacturing experience contribute to the quality, dependability, and operating economy of every RCA tube you buy. This unusual combination of research, engineering, and manufacturing leadership explains why RCA tubes are accepted as the Standard of Comparison in broadcasting.

The complete line of RCA tubes is available from your local RCA tube distributor, or direct from RCA.

The world's most modern tube plant . . .

**RADIO BROADCASTING
IS DIFFERENT, TOO,
ON THE PACIFIC COAST!**

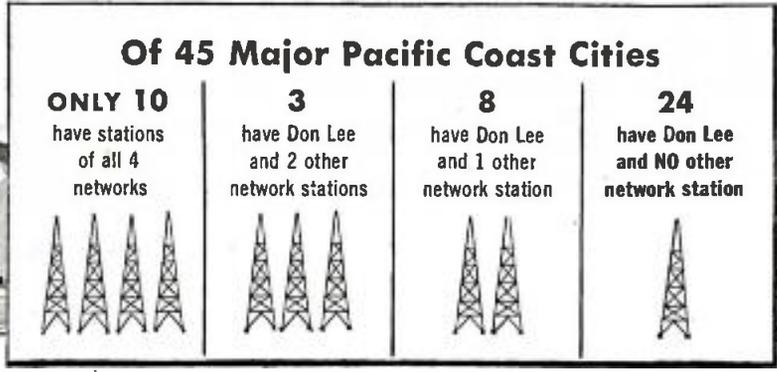

RADIO BROADCASTING certainly is different on the Pacific Coast. Thousands of mountain ranges (5,000 to 14,495 feet high), great distances between markets and low ground conductivity all put the Indian sign on long-range broadcasting.

It is necessary to use *local network stations* located in the important markets to reach all of the people all of the time.

Only Don Lee is especially designed for the Pacific Coast. Only Don Lee has a local network station in each of 45 important markets (the three other networks *combined* have only 48 stations).

Only Don Lee has the flexibility to offer a *local network station* in the Pacific Coast markets where you have distribution.

LEWIS ALLEN WEISS, *Chairman of the Board* • WILLET H. BROWN, *President* • WARD D. INGRIM, *Vice-President in Charge of Sales*
1313 NORTH VINE STREET, HOLLYWOOD 28, CALIFORNIA • *Represented Nationally by JOHN BLAIR & COMPANY*

It's the most logical, the most economical coverage you can get on the Pacific Coast. You buy only what you need, and you *get* what you buy every time.

That's why only Don Lee regularly broadcasts as many—or more—regionally sponsored programs as the other three networks combined.

Don Lee Stations on Parade: KPUG—BELLINGHAM, WASHINGTON

It is nearly 100 miles from Seattle to the Canadian border, yet Don Lee is the only network that has a station between these two points. Within 30 miles of Bellingham live 117,000 people who annually spend well over 100 million dollars in retail sales. When your program is on the Don Lee Network you get LOCALIZED coverage of this market with the 1000 watts of KPUG—one of the 45 stations used by Don Lee to cover the Coast.

ROSS, GARDNER & WHITE, Los Angeles, moves to new quarters at 2326 West Eighth St. Phone is Dunkirk 7-7211.

McGUIRE ADV. Ltd., Windsor, Ont., opens branch at 822 Sherbrooke St. East, Montreal, with Lionel J. St. Jean as manager.

BRISACHER, WHEELER & STAFF, San Francisco, announces construction on its new \$200,000 office building will begin about March 1. Building will be located on Bush St., between Franklin and Gough.

Transit radio

BUILDS RESULTS at LOW COST

Because . . .

The Riding Audience . . .

Is the BUYING Audience

IN BALTIMORE, ONE OF THE NATION'S LARGEST MARKETS, ANOTHER ADVERTISING MEDIUM IS MAKING ITS SALES IMPACT FELT BECAUSE . . .

TRANSIT RADIO REACHES AN AUDIENCE IN TRANSIT:
Riders are close to points of sale, actually in position to act now in response to your advertising.

TRANSIT RADIO REACHES A COUNTED, GUARANTEED AUDIENCE:

The advertiser knows how large an audience he is reaching. The rate he pays is based essentially on the actual count of paid passenger fares.

TRANSIT RADIO REACHES A SELECTED AUDIENCE:

Different occupational groups, age-groups and income-classes ride the buses during the various time periods of the day. Since this audience composition is known, the advertiser can select his most logical customers by selecting the hours when they ride.

TRANSIT RADIO PROVIDES PLEASANT PROGRAMMING—

Music, news, weather reports, time signals, sports scores, special features.

WASHINGTON, D. C., FEBRUARY 6, 1950

\$7.00 A YEAR—25¢ A COPY

SPOT BUSINESS AT PEAK *January Sales Hit All-Time High*

MORE spot business was broadcast in January than in any other month to date in all radio history, in the opinion of leading station representatives.

Actual dollar spot expenditures for the month have not yet been computed and tabulated and will not be for some weeks, but according to the men who sold the time, January appears to have hit an all-time high in the use of spot radio.

An influx of automotive business announcing the 1950 models was the most frequent explanation given for the peak billings in January, a month that usually lags behind December in the volume of spot radio advertising. Some representatives also noted that radio advertising of cold cures and other remedies, particularly the new anti-histamine products, was unusually heavy during January. And all the representatives remarked that the makers of foods, cigarettes, soaps and other users of spot radio maintained normal or better than normal campaigns during the month.

Lewis H. Avery, president, Avery-Knodel, told BROADCASTING: "This will be our best January. It will also be the best month since we started in business."

'Best Month Yet'

George W. Bolling, president, The Bolling Co., said: "There's no question about January 1950 being the best month in the history of the business." And he added that from all indications 1950 ought to turn out to be the best year his firm has ever had.

Joseph F. Timlin, New York manager of The Branham Co.'s radio division, said that although final figures for January are not yet available, he is sure that it will be the best month to date. Like the others he credited the all-time high billings to automotive and anti-histamine advertising.

Frank Headley, president, Headley-Reed Co., reported that "without question, January will be the best month in our business," although, he, too, said that he would not have actual dollar figures for some weeks. Conversations with managers of stations represented by his firm indicated, Mr. Headley said, that the week of Jan. 9 was probably the best week in their history, due to a concentration of

automotive advertising at that time.

John E. Pearson, president, John E. Pearson Co., said: "Our bookings for January were about 15% higher than any other January in our history. We're very hopeful that the future will turn out as well as the month of January. From indicated activity of various agencies, it is going to be a big spring for spots in both radio and TV."

Other station representatives were more conservative in their estimates of the volume of January spot business, but not one reported any decline. "Business is very good," according to Edward Petry, president, Edward Petry & Co.

"This January was better than the same month a year ago and even better than December, due largely to automotive business," an executive of Paul H. Raymer Co. reported.

Automotive Business

Automotive spot business on the air in January included use of more than 500 stations by Chevrolet Div. of General Motors, placed by Campbell-Ewald Co. GM's Buick Div., through Kudner Agency, used 80 stations in 32 markets, plus TV spots on 60 stations in 45 markets in a \$150,000 broadcast campaign. Oldsmobile Div. of GM, through D. P. Brother & Co., advertised its new cars on 177 stations. Another GM car, Pontiac, ran a late fall campaign on some 700 stations, through McManus, John & Adams, but that had concluded its run before the first of the year.

Ford Dealers, through J. Walter Thompson Co., advertised 1950 Fords on more than 200 stations in a campaign which began in the fall and which, at its peak, included more than 1,000 stations.

Hudson Motor Car Co. advertised its new models on some 700 stations in a campaign placed by Brooke, Smith, French & Dorrance. Packard Motor Co., through Young & Rubicam, also sponsored a spot campaign, using jingles for the new Packards.

Chrysler Corp. utilized extensive spot campaigns for its new cars during January, advertising Plymouths (through N. W. Ayer & Son) in 240 markets, Dodges (Ruthrauff & Ryan) in more than 1,000 markets and a widespread campaign for DeSotos (BBDO). These spot schedules have been

(Continued on page 102)

FREE TIME ABUSE *Independents Mull Problem*

By J. FRANK BEATTY

ABUSES of radio's generosity in offering free time are increasing and the NAB Unaffiliated Stations Committee proposes to stop these abuses as well as to turn some of the time applicants into customers.

The committee came up with several specific suggestions at a Thursday-Friday meeting at NAB Washington headquarters. Ted Cott, WNEW New York, presided. In addition the committee drew up plans for the "Independents' Day" meeting at the Chicago NAB Convention, Sunday, April 16, as well

as a foreign language meeting the following morning.

Basic device to impress on the countless thousands of free-time applicants that radio time is valuable and that stations are anxious to cooperate in worthy causes will be the use of a dramatic billing technique.

This plan is simple. When a government, civic, religious, welfare or similar agency asks for free time, the committee recommends that the station send the applicant a bill for the time. This bill would be marked "paid."

PROBLEMS of independent stations occupied the two-day session of NAB Unaffiliated Stations Committee. Left to right: Lee W. Jacobs, KBKR Baker, Ore.; Robert Maynard, WSVS Crewe, Va.; Ted Cott, WNEW New York, chairman; Patt McDonald, WHHM Memphis; Melvin Drake, WDGY Minneapolis; Ben Strouse, WWDC Washington.

By such a device, the time recipients would quickly realize the commercial value of the time donated by the station, the committee feels. Duplicates of the bills would be sent to a central statistical agency such as the NAB. This agency would tabulate the bills and at the end of the year would come up with a figure showing in terms of dollars how much free time was represented.

The committee noted a growing feeling among public, semi-public and related organizations that broadcasters are obligated to make their time and facilities available without charge.

Many of them, it was added, "throw the FCC at us," a coercive

(Continued on page 104)

WEAM Replaces WOL As Mutual Washington Affiliate

MBS will shift its Washington affiliation Feb. 20 from WOL to WEAM Arlington, Va., under a contract signed in the nation's capital Thursday.

The change follows sale of the WOL Cowles-owned property (1260 kc 5 kw directional) to WWDC Washington, whose 1450 kc 250 w facility was acquired by Peoples Broadcasting Corp., wholly-owned subsidiary of the Farm Bureau Mutual Automobile Insurance Co. of Columbus, Ohio [BROADCASTING, Dec. 12, et seq].

The WWDC-WOL interchange of facilities was approved by the FCC Jan. 26.

WEAM is owned by Harold H. Thoms, also interested in a group of stations in the Southeast. Two of the outlets—WAYS Charlotte and WSSB Durham, N. C.—are MBS affiliates. Negotiations were handled for MBS by E. M. Johnson, station relations vice president.

Mr. Thoms said WEAM is working on plans to open Washington studios. He added that WEAM's 5 kw transmitter is located just four miles from the heart of downtown Washington business district. WEAM took the air 2½ years ago as a 1 kw daytime outlet, increasing to 5 kw full time directional on 1390 kc last March.

MBS plans to retain, for the time being at least, its Washington office and newsroom at 1627 K St. Northwest. A. A. Schechter, MBS vice president in charge of news and special events, will continue to supervise the Washington news operation with Hollis Seavey continuing as head of the MBS capital office.

When the change-around becomes effective WWDC will move from 1000 Connecticut Ave. N.W. to 1627 K St., present WOL headquarters, and WOL, under Peoples Broadcasting, will take over the Connecticut Ave. offices of WWDC.

Fred A. Palmer, manager of the new WOL and WOL-FM for Peoples Broadcasting, notified advertisers and agencies Friday that the firm "will follow the general operating policy of WOL as a 27-year-

old station." He has temporary offices at the Raleigh Hotel, along with Edgar Parsons, assistant manager and program director. Peoples Broadcasting owns WRFD Worthington, Ohio, Columbus suburb. Mr. Parsons had been its manager.

Harold Reed, present WOL chief engineer, will retain the post un-

der the new owners. The technical setup includes a main 250 w AM transmitter in Washington with synchronized 250 w booster in nearby Silver Spring. The 20 kw FM transmitter is at the Silver Spring site.

Farm Bureau Mutual is described as the fourth largest insurer of automobiles in the nation. President

NEW MBS OUTLET for Washington will be WEAM Arlington, Va. Affiliation pact was drawn up Thursday in the capital. Present at negotiations were (l to r): Seated—Harold H. Thoms, WEAM president, and E. M. Johnson, MBS station relations vice president; standing, Howard Stanley, WEAM general manager, and Bob Carpenter, MBS eastern manager of station relations.

VENARD NAMED V. P. Eastern Sales Mgr. Of Taylor Co.

APPOINTMENT of Lloyd George Venard as vice president and eastern sales manager was announced last Friday by O. L. (Ted) Taylor, president of the Taylor Co. Inc., formerly Taylor-Boroff & Co., station representative. The change of name, which became effective Feb. 1, grew

out of the recent resignation of Edward R. Boroff, former minority stockholder who takes over management of KPHO-TV Phoenix, of which he is part owner. Mr. Boroff, former ABC Central Division vice president, had joined the organization in September 1948.

Simultaneously, the resignation of John D. Allison as manager of the New York offices of the firm was announced. Mr. Allison has not disclosed future plans.

Mr. Venard, widely known in radio, joins the Taylor company after more than a decade with Edward Petry & Co. Headquartering in New York, he will direct sales and station relations in the territory east of Chicago.

Mr. Venard's 20 years in advertising have ranged from street car card exploitation to radio. His former radio connections included the sales staff of WGAR Cleveland

Mr. Taylor

Mr. Venard

and sales managership of WCKY Cincinnati.

Mr. Taylor announced that Mr. Venard's appointment is the first step in the 1950 expansion program of the organization. Two additional men will be appointed to the New York sales staff, and additions to the list of stations represented will be announced shortly. The company plans removal to larger New York quarters as soon as space can be acquired.

is Murray Lincoln who controls other farm and insurance interests.

Mr. Palmer said the new WOL was purchased as an investment and will serve no special interests, making time available to all legitimate advertisers and giving equal time to both sides in controversial questions. He said the overall programming will be "homey" and "down-to-earth."

WWDC is planning an extensive promotion campaign for the Feb. 20 shift. Already on the air are spot announcements by radio and screen stars. Post cards will be dropped from airplanes, some entitling the finders to \$12.60. Transcriptions have been cut by local officials and civic leaders prior to inaugural ceremonies. Sandwich men with radios will patrol downtown Washington.

Ben Strouse, vice president and general manager, remains in charge of WWDC. Continuing in their posts will be Herman N. Paris, commercial manager, and Norman Reed, program director. Art Brown, WOL disc jockey, moves to WWDC along with Bert Libben, salesman. Ross Beville, WWDC chief engineer, continues in his post as do Dennis Sartain, head of the WWDC news bureau, and Irving Lichtenstein, public relations and sales promotion director. WWDC will take over the present WOL Voice of Washington news program with Les Higbe. Fred Fiske joins WWDC's announcing staff.

The station will carry all games of the Washington Senators baseball team.

CBS AFFILIATE SUIT

Network Asks Dismissal

CBS, representing KOOL Phoenix and KOPO Tucson, has filed a motion for dismissal of the suit brought Nov. 17 by Salt River Valley Broadcasting Co., for KOY Phoenix and KTUC Tucson in Chicago's Federal District Court. Late Friday it was reported that if the move is successful, the case will not be continued in court today (Monday) as scheduled. CBS contends that an oral agreement between the network and the Salt River stations was not formal and therefore not approved by the FCC. Plaintiff, through Damon, Hayes, White & Hoban, Chicago, contends that the KOY-KTUC suit is based on the original written contract and not on the oral agreement. CBS switched its affiliation to KOPO and KOOL Jan. 1.

Webster-Chicago Tests

WEBSTER-CHICAGO Corp. is promoting use of its wire recorders as teaching aids with a two-month radio test campaign in Madison, Wis., and Peoria and Rockford, Ill. One-month AM spot test begins in Memphis in March. Results of the \$12,000 campaign will determine whether a national spot schedule will be used. Agency is Fuller, Smith & Ross, Chicago. Paul Brickman is account executive.

Andrews Joins Maxon

S. JAMES ANDREWS, former producer-director at Paramount Pictures, Hollywood, and for a

Mr. Andrews

number of years prior to that vice president of Lennen & Mitchell in charge of radio and television, has joined Maxon Inc., New York. His new post is as assistant to the president in charge of radio and television. Mr. Andrews will operate on an agency-wide basis, although his headquarters will be in New York.

BMB TOASTED 2,100 Stations Covered; Gets Industry Praise NEW STUDY OUT

AGENCIES and advertisers have an improved weapon for use in spending advertising dollars, according to their spokesmen, as a result of the second Broadcast Measurement Bureau study.

Though few buyers of radio time have had a chance to study the reports in detail, they expressed enthusiasm for the new fund of facts covering the audience that broadcasters reach.

The second BMB data will "contribute largely to the medium's acceptance by those who support it financially," declared Paul B. West, president of the Assn. of National Advertisers.

Frederic R. Gamble, president, American Assn. of Advertising Agencies, declared the reports "will be welcomed and used by advertising agencies from coast to coast."

Linnea Nelson, chief time buyer of J. Walter Thompson Co., New York, called the data a "definite improvement" and added, "We can't get the reports fast enough."

Justin Miller, NAB president, said the figures "will help the buyers of time immeasurably in selecting broadcasting as a medium."

Their detailed comments follow:

Miss Nelson—"While I have not yet received the completed station reports of the second nationwide BMB survey, as a board member

Miss Nelson

I am generally familiar with the nature of the study and I believe it presents a definite improvement over the first one made in 1946. "We can't get these reports into our hands fast enough, as too many stations are still using the 1946 BMB material which is outmoded, to say the least. It is interesting that while a lot of broadcasters have grumbled about the first BMB study, the real majority haven't produced anything else in the interim.

"If we could depend on a completely intelligent and unbiased reaction, there would unquestionably be a permanent and continuing BMB."

Mr. West—"Broadcasters always have been alert in recognizing the

part that the nation's advertisers have played in the phenomenal development of this mass medium. When growth is so rapid, it becomes more and more difficult to see the whole picture of advertising impact in true perspective. The BMB's second and nationwide examination of audiences will contribute largely to the medium's acceptance among those who support it financially. It reflects, in uniform fashion, the potential markets covered by radio. This year's study, although produced in a transitional period that has been troublesome, nevertheless offers many improvements over the first study. The ANA's own enthusiasm for such measurement is evident in its continuing support of the bureau."

Mr. West

Judge Miller—"I am sure that hundreds of advertisers and advertising agencies, as well BMB subscribers have awaited this day anxiously. New data on audiences of stations throughout America will help the buyers of time immeasurably in selecting broadcasting as a medium for their advertised products. The BMB study, concluded after many difficulties, has been

anxious. New data on audiences of stations throughout America will help the buyers of time immeasurably in selecting broadcasting as a medium for their advertised products. The BMB study, concluded after many difficulties, has been

"A LOUD squeal is going to go up when station subscribers to BMB's second study take their first look at their 1949 coverage maps," Dr. Kenneth H. Baker, NAB research director and acting president of BMB, said Tuesday in announcing the completion of the study at BMB headquarters in New York [BROADCASTING, Jan. 30].

Individual station audience reports, taken directly from the tabulating machines and certified by Dr. Baker, were mailed that day to the 629 BMB subscribers, marking the completion of an 11-month undertaking that began last March when more than 650,000 ballots were mailed to radio families in every county in the nation. These reports will be followed within a week or two by printed forms containing not only the audience statistics but also maps showing each station's day and night effective coverage areas.

2,100 Stations

Noting that the 1949 study tabulated 2,100 stations in place of the 900 tabulated in 1946, Dr. Baker said that the addition of 1,200 new stations inevitably had "poked some holes and clipped off some edges" from the coverage areas of the old established stations.

On the other hand, he pointed out, power increases, network affiliations, better frequencies and better programming since the first BMB study was made give hundreds of stations increased audiences in 1949 over 1946.

"Assuming that the average hours of family listening—which are not measured by BMB—remained the same for the second study as for the first, the addition of 35 stations in North Carolina, 65 in California, cannot help but cause more dial tuning, more switching from station to station," Dr. Baker said.

He pointed out that the total weekly audience figures reported

for any station in the 1949 study are directly comparable with the 1946 report on that station. The maps are also directly comparable, he said, all being drawn to exactly the same scale for both years.

New Data

What is new about the 1949 study is the "Composition of Total Weekly Audience," comprising three tables which were not included in the 1946 reports. These cover the number of families reporting listening to the stations six or seven days or nights a week, three to five days or nights a week and one or two days or nights a week. Both day and night figures are given for each county and city under each of these headings, as well as for the total weekly audience. The report also shows the total number of radio families for each area and the percentage of the figure which the station can claim under each listening category.

These new data were designed to meet the numerous complaints which greeted the first study, Dr. Baker said. He recalled that at that time many stations complained that the BMB figures made no distinction between a local station whose listeners tune it in regularly each day and a distant station which may be tuned in once a week for a special network program not broadcast locally. As long as each of these two stations was reported as heard at least once a week by any family, it received equal credit in the BMB report for that family.

The "Composition of Total Weekly Audience" figures give the 1949 BMB study a new flexibility, Dr. Baker stated. He noted that "it will be interesting to see what will happen to these three columns," adding that "a great deal of floundering around" may be expected. He warned against any immediate establishment of rigid rules by either the sellers or buyers of time, urging that six months or a year of use of the 1949 reports precede any standard setting.

Loyalty of Listeners

The ratio between a station's six-to-seven day audience and its total weekly audience might be considered as an index of station loyalty, Dr. Baker pointed out. "The station with a loyalty index of 90% has a different story to tell than one whose loyalty index is only 50%," the acting president of BMB declared.

Asked what would be considered a "good loyalty index figure," he replied that he does not know now,

CBS NAMES KAYLIN

For AM Sales Presentations

EDWARD KAYLIN, formerly with the NRDGA and Schenley Distilleries, has been appointed manager of AM sales presentations at CBS, the network announced last week.

Gordon Hellman, formerly with Kenyon & Eckhardt, New York, and ABC, was named manager of CBS-TV sales presentations at the same time.

R. D. MERRILL (center), Seattle lumberman and heir to the Don Lee Network, gets together with Lewis Allen Weiss (l), chairman of the Don Lee board of directors, and Willet H. Brown, network president. Mr. Merrill was named sole heir to the \$9 million estate of his nephew, Thomas S. Lee, who died Jan. 13 [BROADCASTING, Jan. 23, 16].

In the belief that instruction on healthful living practices is a public service much more important than its policy-selling . . .

Metropolitan's Radio

local—to advise on health, caution on safety and to boost all health and welfare organizations such as the Red Cross and National Safety Council.

And it uses radio as one means of inviting the public to write in for its health and welfare books—pamphlets on subjects ranging from diet to safe driving, from accident prevention to cancer. These booklets are the spearpoint of as big a public health program as has ever been conducted by a non-governmental organization.

The size of its pamphleteering for health may be gauged by an almost incredible statistic—that the Metropolitan has given away one booklet a second ever since 1909.

Just how many booklets radio is responsible for distributing would be hard to assess. A listener may hear of a certain booklet on a broadcast but then obtain it by a personal call on a Metropolitan local agent. Radio should get the credit for such distribution but it wouldn't show in any records.

Yet, there are statistics that do show radio's pull in this direction. For, since June 17, 1946, 1½ millions of listeners have written to stations or network (CBS) directly requesting booklets after hearing them offered on broadcasts.

The company, however, has other reasons for spending almost half its \$2 million advertising budget on radio. Its top management, from President Leroy A. Lincoln down through Second Vice President James L. Madden, in charge of advertising, is convinced of the value of radio and it is budgeted for accordingly.

Metropolitan reasons that a greater percentage of its policyholders are concentrated in large cities and where radio can reach them. So, Metropolitan's air effort is primarily a city campaign. It uses 363 programs a week in 47 cities in the United States and Canada.

MOSTLY these programs are local 15-minute newscasts or participation programs. Newscaster Eric Sevareid, however, also is used on 15 key CBS stations Monday through Friday from 6 to

6:15 p.m. in the East while newscaster Dave Vaile is used on seven CBS stations on the Pacific Coast Monday through Friday from 8:15 to 8:30 a.m. (PST).

That mixture of network and local programming gives coverage at more different hours, the company reasons. But in addition, it provides something even more valuable—the local touch. It means that Metropolitan can engage a popular local announcer who has a good following and it means that Metropolitan can cooperate with local health agencies and thus make itself felt as part of the local community.

Metropolitan is unique, too, in the fact that its basic radio philosophy has never really changed.

It started in radio on the health and welfare theme back in 1925. In those days the company sponsored Arthur Bagley in a daily program of setting up exercises which was broadcast from Metropolitan's own famous tower in New York via WEAf and an eastern regional network. Countless thousands from

1925 to 1936 started the day off right by following Mr. Bagley's exhortations to action from 6:45 to 7:45 a.m. Monday through Friday.

Its present radio series began in 1946 and a phrase labels it—"Good Hints for Good Health." Accompanying the programs are announcements on diseases that are leading causes of death, on safety problems and on general health subjects, such as summer hazards (sunburn, etc.), safe driving, etc.

Announcements themselves are planned with the Metropolitan agency, Young & Rubicam, to fit in with seasonal factors and with campaigns by health agencies. Thus announcements on tuberculosis and the offer of a pamphlet on tuberculosis are pre-Christmas subjects, coinciding with the Tuberculosis Seal effort. Home safety and holiday safety are announcement topics right at the Yuletide, with appropriate booklets on these subjects being offered.

The announcements also complement a similar effort made via

By HERMAN BRANDSCHAIN

METROPOLITAN Life Insurance Co. has concentrated its entire radio effort not in selling insurance but in selling health.

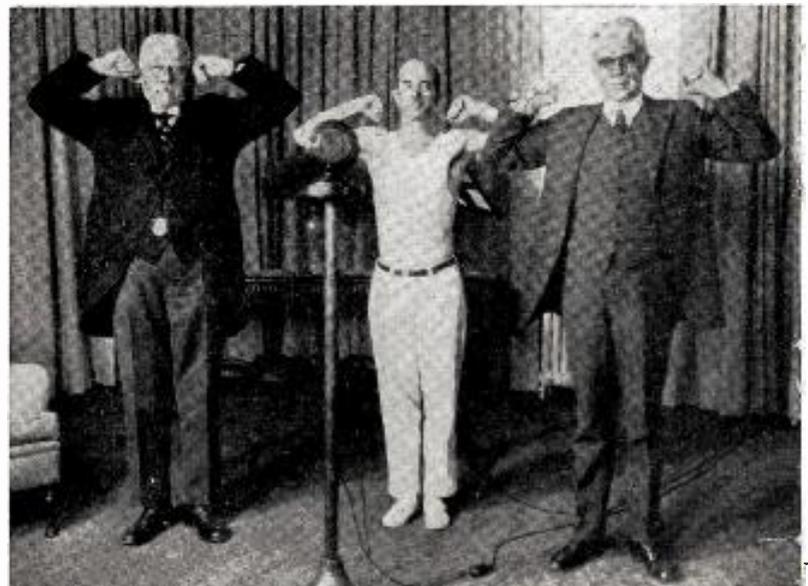

For it is partly by selling longevity, as well as by selling policies, that this company can remain the biggest non-governmental financial institution in the United States (assets: \$9¼ billions).

The longer it keeps its 33 million policyholders living, the longer they will be paying premiums. The company has a direct interest in the health and well being of more people than any other business organization on earth.

It therefore has had good reason to concentrate its entire radio effort on getting people to live longer.

The result has been an adventure in public service for which Metropolitan can be proud. And indeed, praise and goodwill have attended the company's effort.

It has used radio—network and

METROPOLITAN LIFE started its radio broadcasting on a "health and welfare" theme and has never deviated from it. Here is physical culturist Arthur Bagley (center) who used to put radio listeners through setting up exercises every morning from a studio in Metropolitan's own New York tower back in the 20's. The program was carried over WEAf, now WNBC New York and an East Coast network. With Mr. Bagley are the late Haley Fiske (l), former president of Metropolitan, and the late Robert Lynn Cox, vice president, strong backers of the health and welfare campaign.

Stresses Better Living

magazines. Radio, however, which is not on the monthly basis of so many magazines, lends itself to more flexibility and during any month's period more than one subject will be treated over the air. It also is felt that the effort to keep the radio announcements tied to one subject for a month, merely to keep in step with the magazine tempo, would overtax the listener. So the radio announcements vary either on a weekly or fortnightly basis.

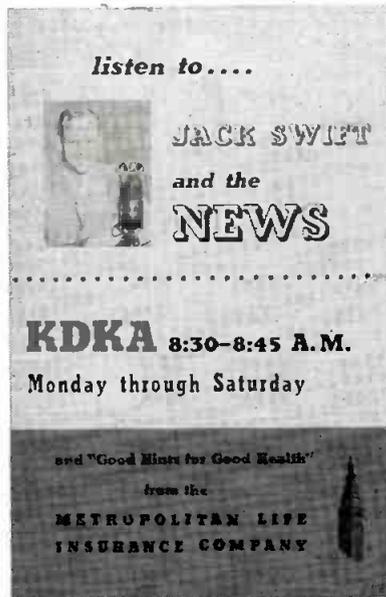

Many radio personalities know from personal experience that the announcements and the pamphlets are based on the soundest medical opinion available. It is not hard for radio personnel working on Metropolitan shows to become sold on the company's health program. Often, it has been fortunate that this has been a fact.

Mary Margaret McBride, for example, whose following over WNBC New York has made her a figure of national proportions, found that her figure also was growing by pounds as well as by repute. She took the necessary action after reading the "Overweight and Underweight" pamphlet of her sponsor. Several months later, when she underwent an operation, her physician told her that her condition might have been very much more serious had she not reduced in time.

Incidentally, the "Overweight and Underweight" booklet has won the biggest response of all Metropolitan books from the U. S. radio audience since 1946—about 260,000 requests for it having come in. Since it was announced on 18 different weeks, that means about 14,500 requests for it came in for each week it was announced.

THAT booklet, however, is not the "best-seller" in the Metropolitan health library from the standpoint of radio mail-pull. A cook book is first with an average of 26,040 requests per week; a pamphlet on rheumatism is second with an average 17,338; one on allergies is third with 14,281. The "Overweight and Underweight" booklet is next.

All this effort has won the company another kind of mail pull, too

HERE's an example of the way a local station got in back of Metropolitan's "Good Hints for Good Health" campaign. KDKA Pittsburgh promotion department produced these posters to boost the Metropolitan show and attended to distribution of the placards.

* * *

—praise for its public service work. Laudatory messages have come from listeners, ranging from persons benefited directly to Government officials, from individual physicians to medical organizations. In Canada, as well as the United States, public authorities have praised the Metropolitan's pamphleteering via radio.

A few samples from some of the letters indicate the importance the Metropolitan has assumed through its radio health program. The New York Chapter of the American Red Cross wrote, after the Metropolitan had plugged Red Cross home nursing classes:

You are our greatest implement for success. You are not only giving us encouragement but making a great contribution to the prevention of sickness and to the health of New York City.

Even as generous praise was sent by the Detroit Chapter:

This is the best response that we have ever had to radio publicity. We

received enough enrollments to organize two extra classes.

Similar messages have been sent by the top officers of such organizations as National Safety Council, American Diabetes Assn., American Hospital Assn., and many others.

The Metropolitan effort could hardly escape the scrutiny of prize-awarders. In 1948 it won the Annual Advertising Award founded in 1928 by Edward Bok for the effectiveness of radio program commercials as a social force. Young & Rubicam, Metropolitan's agency, also was named for its part in the programming. The commendation noted that approximately 280 announcements were used weekly on 50 stations in major U. S. and Canadian cities at hours which "attract the widest possible range of listeners."

Metropolitan also makes a most creditable effort to advertise its radio programming.

In its New York headquarters, it has created a focal point for propagandizing radio policies. There, the office of advertising promotion manager has been created, a post occupied by Jerry Crowley, a man with an impressive background in radio, promotion and advertising. It is his job to explain the company's advertising policies—to the public, to policyholders, to employees.

Under Mr. Crowley's direction, 600,000 leaflets go out four times a year to Metropolitan's agents to publicize the local broadcasts. These leaflets are then distributed by the local agents to people in the community. The leaflets call attention to Metropolitan's "Good Hints for Good Health" broadcasts and to the fact booklets offered can be obtained either through the local station or the local company agent. The call letters of the local station and the time of its Metropolitan programming are imprinted on the leaflets.

Thus, by this promotion ma-

THESE are a few of the booklets which are given away as part of Metropolitan's Health and Welfare radio campaign.

There Is Something YOU Can Do

On the dotted line

SEALY of the Southeast (bedding) sponsorship of full 52 weeks of Ziv Co.'s Meet the Menjous on WMPs Memphis is set by Louis Haas (r) of Sealy's. With him are Harold R. Krelstein (l), vice president and general manager of WMPs, and Jane Erdman, account executive of Lake-Spiro-Shurman Agency.

PRESENT as Lack's Auto Supply Stores, Houston, contract for The Adventures of Maisie on KXYZ Houston, are (l to r): A. I. Lack, pres., Lack's; Hubert Roussel, Houston Post; Glenn McCarthy, pres., Shamrock Bestg. Co. (KXYZ); Rube Farmer, gen. mgr., Lack's.

DISTRIBUTION of Capitol Transcription Library in Canada through Capitol Records of Canada Ltd., London, Ont., is arranged by (l to r): Lockwood Miller, pres., Capitol's Canadian firm; Cliff Odgen, sales mgr., Capitol Broadcast Div.; Floyd Bit-taker, v. p. in charge of sales, Capitol.

DAILY five-minute newscast and three daily spot announcements fill Okmulgee Western Auto Store's one-year contract for time on KHBG Okmulgee, Okla. Deal is set by (l to r): Dan Kenan, KHBG commercial manager; P. L. T. Dudley, manager of store, and Hal King, KHBG general manager.

CONTRACT with Walter B. Cooper, local Chevrolet dealer, for purchase of all available time on KCOL Fort Collins, Col., on the day the new Chevrolet was introduced, is arranged by (l to r): Dave Schlothauer, KCOL sales mgr.; Douglas Kahle, mgr., KCOL; Mr. Cooper; W. F. Michael, mgr., Poudre Chevrolet.

CAMPAIGN to promote TV sets sales on Fred Hillegas newscast over WSYR-AM-FM Syracuse prior to WSYR-TV opening March 1, is set by Floyd Piron (seated l), v. p., B. H. Spinney Co., set dealer. With him are Mr. Hillegas (seated r) and (standing l to r) Ed Taggart, Spinney sales prom. mgr.; Marvin Shapiro, WSYR acct. exec.

EDGAR BILL RETIRES *Replaced by Caley As WMBD Mgr.*

EDGAR L. BILL is stepping down from the helm as one of radio's pioneers after nearly 26 years in broadcasting operations. His decision to retire as president and general manager of WMBD Peoria, Ill., a post he has held for the past 18 years, was announced last week.

Mr. Bill's executive position at WMBD will be assumed by Charles C. Caley, station's executive vice president for the past four years, who has acquired 25% of Mr. Bill's WMBD holdings. Remainder of the shares have been retired by the company.

The career of 57-year-old Edgar Bill encompasses a quarter-century of broadcasting endeavor, high-marked by his purchase in 1931 of WMBD and the building of the station through the years as a leader in the radio field.

Before acquiring the Peoria station, Mr. Bill managed WLS Chicago for seven years. He also aided in the organization of NAB, serving as a director for six years.

In announcing his retirement decision, Mr. Bill said: "Radio has made remarkable progress in its first 25 years and I have enjoyed the part I played in its growth. I foresee even greater progress in the next 25 years—the future appears

Mr. Bill

Mr. Caley

to hold great possibilities. Charlie Caley I consider one of the young, aggressive leaders, thoroughly familiar with radio's mission, and well-qualified to help in bringing these possibilities to an early realization."

With WMBD Since 1934

Mr. Caley has been associated with WMBD since 1934 and is a well-known figure in the industry. He is serving his second term as a director of the NAB, and also is president of WDW Decatur, Ill.

While relinquishing direct participation in WMBD's operations, Mr. Bill, who is recovering from a recent heart condition, has let it be known that he is not dropping out of the radio field entirely. He plans to remain active, although to a lesser degree, in other Peoria and radio business interests to which he will devote some of his time.

In assuming his new post at WMBD, Mr. Caley said: "I welcome this opportunity to be of greater service to the broadcast industry. We have some worthy goals toward which to strive—we will do our utmost to reach them."

Under the executive realignment, Harry P. Slane has been named WMBD president and Carl P. Slane retains his position as chairman of the board of directors.

STAN LEVEY

To Reopen Ziv Chicago Office

STAN LEVEY, assistant sales manager at WBBM Chicago and associated with the CBS station for the past 10 years, will reopen the Chicago office of Frederic W. Ziv Co. next week.

Mr. Levey has been engaged in the radio and theatrical advertising business in Chicago for the past 28 years, starting as a Chicago theatre usher and later becoming assistant to Sam Schoenstadt, operator of a chain of theatres in the Illinois metropolis. He later worked for Universal Pictures in Chicago and was engaged in the advertising departments of the Hearst newspapers there.

Other Posts

Mr. Levey was assistant sales manager of the *Southtown Economist*, Chicago's largest neighborhood newspaper, also a division supervisor of R. R. Donnelly Corp., publisher of classified telephone directories, and was a salesman for the Chicago Elevated Advertising Co.

He entered radio in 1937 as a salesman for WIND Chicago. After two years he became associated with the Illinois Meat Co. He joined WBBM in 1940 and has amassed a total of billings "well into the millions," according to station records. His billings for 1949 alone have totaled nearly \$500,000.

Mr. Levey brought to WBBM such accounts as Atlas Brewing, Edelweiss Brewing, Silver Cup bread, Broadcast meats, First Federal Savings & Loan of Chicago and Rival dog food. The Ziv Co. has had no office in Chicago since last fall.

SHURICK TO CBS

Counsel on Market Research

EDWARD SHURICK, former promotion manager and director of research for Free & Peters, station representative, has been named market research counsel for CBS effective March 1. The announcement was made last week by J. L. Van Volkenburg, network vice president in charge of network sales.

Mr. Shurick was sales promotion manager for KMBC Kansas City, Mo., before joining Free & Peters, and prior to that was sales manager for the Intermountain Network. He also is the author of a book *The First Quarter Century of American Broadcasting*.

NARBA SNARL

Delayed by Cuba Minister Shuffle

SURPRISE RESIGNATION of the Cuban minister of communications delayed the scheduled opening of U. S.-Cuban conferences on new NARBA terms last week, and dampened U. S. broadcasters' hopes of early success in the negotiations.

Carlos Maristany, head of the Cuban delegation which won substantial concessions in the 1946 NARBA sessions, was named acting minister upon the resignation of Arturo Illas, whose more temperate attitude had encouraged hopes of U. S.-Cuban accord.

Appointment of a permanent successor to Minister Illas is expected within the next few weeks. His resignation, announced Jan. 27, was one of several among the Cuban cabinet, all attributed to political factors unrelated to radio.

Whether Mr. Maristany will get the post of minister was a matter of speculation. One Cuban authority thought the appointment might go to Dr. Jose R. Gutierrez, head of the Cuban delegation at the Montreal phase of the NARBA negotiations last fall.

WESTINGHOUSE

Campbell to New Sales Post

CREATION of a national sales coordinator in New York for all Westinghouse Radio Stations Inc. radio and television properties was announced today by J. B. Conley, general manager. Mr. Conley also announced that Eldon Campbell, KEX Portland, Ore., sales manager, will fill the new position.

Mr. Campbell

Mr. Campbell, who will begin his duties Feb. 15, joined Westinghouse in 1948 at WOWO Fort Wayne. He is a native of Alert, Ind. When Westinghouse acquired KEX Portland in 1945, Mr. Campbell went there as program manager, and subsequently took charge of all station sales. During his stay, KEX increased its power from 5 kw to 50 kw, completed new studios and under Mr. Campbell's personal direction realized a sharp increase in local time sales, Mr. Conley said.

As national sales coordinator, Mr. Campbell will be responsible for all radio and TV contracts for Westinghouse in the Gotham area. Mr. Conley said the work, "which is becoming increasingly important," would include close liaison with both Free & Peters and NBC Spot Sales, Westinghouse's representatives for radio and TV, respectively, and with advertisers and advertising agencies. Robert H. Prigmore, of KEX's sales staff, succeeds Mr. Campbell as station's sales manager.

First meeting of the U. S.-Cuban conference was held Wednesday at the insistence of Mr. Maristany, over the protest of FCC Comr. Rosel H. Hyde, head of the U. S. delegation. It was a general meeting devoted to general speeches. The first business meeting was slated for Saturday (Feb. 4).

The U. S. delegation, including FCC and State Dept. representatives as well as the industry advisory group, knew nothing of Minister Illas' resignation when they reached Havana early last week.

Conference Set

The conference was set up when the NARBA sessions at Montreal became stalemated last December by Cuba's channel demands and the U. S. delegation's refusal to accede to them [BROADCASTING, Dec. 12, 1948].

The meeting is designed to reconcile the two nations' differences with respect to proposed channel assignments, after which the full NARBA conference is slated to resume in this country at the call of the U. S. sometime between April 1 and Aug. 1.

Resignation of Minister Illas came less than a month after he had issued a statement, at the direction of Cuban President Carlos Prío Socarras, subscribing to the "status quo" policy adopted by other NARBA signatories with respect to new assignments pending

'LIGHTNING' FILM

A SELECTED group of radio industry leaders and newsmen was struck by lightning, the kind that talks, at a preview in New York last week of the All-Radio Presentation promotional movie.

If the bolt did not leave its preview audience dazed, it at least made it tingle.

Although unobtrusive in style, "Lightning That Talks" is a persuasive presentation of the influence of radio on America. It is touched in places with humor, but never comedy, and in other places with sobriety that successfully stops short of the pretentiousness that comes too easily to documentaries.

Indeed the picture is a documentary, although it has an editorial point of view that is sharp enough to provide an excellent introduction to any broadcaster who uses it as an opening for a sales talk.

It is a picture that can be depended upon to put a potential customer in the mood to listen to a localized presentation of the case for radio advertising.

Pictorially it surpasses its script, excerpts of which were carried in BROADCASTING Jan. 23. In utilizing non-professionals throughout its cast, it achieves a kind of homely realism that is genuine.

The only paid actor, who plays a professor of journalism, gives prob-

negotiation of a new treaty [BROADCASTING, Jan. 2].

Members of the U. S. official delegation to Havana:

Chairman Hyde, D. R. MacQuivey of State Dept.'s Telecommunications Division, and FCC Engineers James Barr and Underwood Graham, along with Ray Harrell, State Dept.'s telecommunications attache in Havana.

Industry representatives include Edmund A. Chester, news director, and James D. Parker, engineer, for CBS; William S. Hedges, vice president in charge of planning and development, and Raymond F. Guy, manager of radio and allocations engineering, for NBC; Andrew G. Haley, Washington attorney for ABC; John A. DeWitt Jr. of WSM Nashville, engineering director of the Clear Channel Broadcasting Service; Neal McNaughten, NAB engineering director; J. G. Rountree of the consulting engineering firm of A. Earl Cullum Jr., Dallas, and William E. Bennis Jr., Washington consulting engineer.

Requests Hearing

HEARING on FCC's order to revoke the license of KPAB Laredo, Tex., was requested by the station fortnight ago in notice sent to the Commission. The Commission revoked KPAB's license in early January on grounds alleging the station had been transferred without FCC approval from Mark Perkins to Allen K. Tish, William Prescott Allen and others [BROADCASTING, Jan. 9].

Special Preview Held in N. Y.

ably the least convincing performance in the film. It may be that the canny producers arranged this knowingly, for the professor's arguments on behalf of newspapers are expertly contradicted by Maurice B. Mitchell, BAB director, who is no more at a loss for a pro-radio argument in the picture than he is on the road.

Most observers at the preview agreed that the film's principal usefulness will be an introduction to sales talks. It is not a slam-bang presentation, probably wisely so. Broadcasters can capitalize effectively on this quality of the picture to use it as a springboard for their own arguments.

As shown last Thursday in New York, the film needs still more editing, a fact which Mr. Mitchell, in advance of the showing, said was known to the producers. The principal cutting needs to be done in the introduction, which in the version last week was too long.

When finally trimmed, the film promises to be worth every cent of the \$135,000 its production and distribution will cost.

IT may be sun bathing, but it's also a business meeting in the patio of KTUC Tucson. Carelton Coveny (l), of John Blair Co.'s Los Angeles office, and Lee Little, manager of KTUC, discuss program and promotion details in connection with KTUC's recent switch to Don Lee-MBS. John Blair Co. is national representative KTUC.

ABC APPOINTS

Trevarthen Is Technical Head

WILLIAM H. TREVARTHEN last week was appointed ABC director of technical operations, succeeding George O. Milne, who died Jan. 28 (see earlier story, page 96).

Mr. Trevarthen has been engineering operations supervisor of the network since 1947. Coincident with his elevation, George F. Fisher Jr., former engineering maintenance supervisor, was appointed engineering operations supervisor.

Mr. Trevarthen joined ABC as a staff engineer in 1943 after service during the war as a research associate at the underwater sound laboratories of Harvard U. Before the war he was equipment engineer for Western Electric, field engineer for General Electric Co. and maintenance engineer for NBC.

Mr. Fisher entered radio as a studio engineer for NBC in 1941 and a year later transferred to the ABC field engineering group. After war service as a radio-radar officer in the Navy, he returned to ABC as a maintenance engineer and became engineering maintenance supervisor in December 1948.

FCC Actions

FINAL decisions to grant four new AM stations reported by FCC last week, including new outlet on 740 kc at Dallas with 10 kw day, 5 kw night, to Texas broadcasters Roy Hofheinz and W. N. Hooper. WARM Scranton, Pa., granted change from 250 w on 1400 kc to 5 kw on 590 kc. Initial decisions for approval of two AM outlets reported in addition to regular grants for six AM stations. Details of these and other FCC actions may be found in FCC Roundup on page 120 and Actions of the FCC beginning on page 114.

TRANSIT RADIO'S CASE

Values Cited

By C. L. (CHET) THOMAS

President, Transit Radio Inc.
Gen. Mgr., KXOK-AM-FM St. Louis
THE CASE for Transit Radio has never been fully made. It is impressive. The main arguments in favor of Transit Radio are four.

I. *The riders of public transportation like Transit Radio.*

They like its music. It is good music—popular in the best sense, neither heavily classical nor radically “jive.” It is the type of music that, according to psychologists and experts in industrial relations, soothes people and reduces tension. Without cost the riders of public transportation are given the same kind of service with which many businesses at considerable cost provide their customers and employes. Without cost the riders of public transportation receive the very best radio service available to the riders of private automobiles. Without cost they hear this service reproduced with a fidelity equal to that of the most expensive receiving sets in private automobiles. The riders of public transportation receive this excellent transmission of this excellent program during what is to most of them the most tedious parts of their day.

Cites Listener Appeal

The riders of public transportation like the non-music services provided by Transit Radio also. They like the brief newscasts and weather reports. Most of them like the advertising, because it acquaints them with available goods and services.

We know the riders of public transportation like Transit Radio, because we have checked it. Here

INTRODUCTION of a new advertising method always incurs the opposition of established media sooner or later. Transit Radio is now going through that period in the opinion of C. L. (Chet) Thomas, president of Transit Radio Inc. In this article Mr. Thomas, general manager of KXOK-AM-FM St. Louis, TR franchise-holder, sums up main arguments for musically soothed rides. He points out that Transit Radio advertising really is “no different” from other types—they all command attention—adding there is no such thing as “privacy” in public vehicles. He sees the end result of establishing Transit Radio will be more business for all radio without cutting into current AM, FM budgets. A recent pilot survey by Edward G. Doody & Co. showed 85.6% of St. Louis respondents unopposed—continuing the trend established in other polls in St. Louis, Washington, Baltimore and Kansas City. The present discussion of Transit Radio has been particularly bitter in St. Louis and Washington where newspapers have prominently displayed opposition testimony and editorialized against the innovation. The FCC has shown an interest on a staff level in forming a policy on the new medium. Mr. Thomas, a radio veteran of 22 years, started at WLW-WSAI Cincinnati, where he was named station activities manager. Subsequently he became assistant manager of WINS New York, manager of WCAE Pittsburgh, and sales manager of KSD St. Louis. Later he joined KFRU Columbia, Mo., then a St. Louis *Star-Times* station, as general manager, switching in 1944 to *Star-Times*-owned KXOK where he rose from program director to his present post. Mr. Thomas also is president of the St. Louis Advertising Club.

is the summary of the results of five surveys made in St. Louis, Washington, D. C., Baltimore and Kansas City by Edward G. Doody & Co. during 1948-49:

“Eight out of 10 riders favor Transit Radio as a part of regular service. Less than one out of 10 object. The rest don't care or are undecided. However, even among those who say they object, there is a substantial group which would not object, if the majority favored permanent installations. Thus, only a fractional group of active objectors remains, opposed even against majority will.”

II. *Transit Radio helps the transit companies provide sound, efficient and economical service.*

Insofar as Transit Radio pro-

vides public transit companies with a source of income in addition to their fares, it is helping to make possible good public transportation at minimum cost.

III. *Transit Radio is a main support of FM aural radio.*

How high were the hopes of the American people for FM aural radio at the end of World War II! Some people saw it as a rich opportunity for broader expression of opinion.

The fans of FM aural radio pointed to its freedom from static, its fidelity of tone, the relative cheapness of its transmitting equipment, etc. But most enthusiastically they pointed to the fact that it made room for many more radio stations. Under the present AM system there are only about 2,200 stations. Under the FM system between 3,000 and 5,000 new stations are possible.

On Nov. 15, 1948, the FM Assn. released a survey showing that FM had grown 100-fold from a \$10 million business in 1946 to a \$1 billion industry. It was then called the “fastest growing industry in America.”

Foundation for FM

But what happened? The number of FM aural radio stations in operation by Dec. 31, 1948, was 700. The number on Dec. 31, 1949, was 733—a net gain of only 33 in a whole year. During this year 217 FM authorizations were surrendered, 45 of which had been in actual operation.

Over 99% of the 733 FM stations, which are the components of this billion-dollar industry are operating at a loss. They will continue to do so until a firm financial foundation is built under FM. Transit Radio is such a foundation.

Transit Radio can benefit, not merely one, but several FM radio stations in a community. In St. Louis, KXOX-FM sponsors Transit Radio; in East St. Louis arrangements for Transit Radio are being

Mr. THOMAS

* * *

negotiated by an East St. Louis station. In Washington, D. C., Transit Radio is sponsored by WWDC-FM; in Bradbury Heights, Md., a suburb of Washington, another station sponsors Transit Radio. Similar arrangements are being made elsewhere.

The advance of Transit Radio is certain to be the advance of Frequency Modulation radio—a type admittedly finer technically than amplified modulation radio. Most of the FM aural radio stations that offer a program fare different from that on associated AM stations are those sponsoring Transit Radio.

Reaches Other Points

Transit riders are not the only persons served by Transit Radio. These fine programs are broadcast to the entire community. They are designed to please listeners in homes, hotel lobbies, banks and countless other places. Many listeners leave their radios on for hours tuned into the FM station sponsoring Transit Radio in preference to all the other programs available.

Transit Radio makes possible a wider and better radio service to an entire community, not merely the riders on busses and streetcars, but everybody within range who tunes in.

IV. *Transit Radio makes it possible for the drivers of busses and streetcars to meet emergencies.*

In this regard, Transit Radio has already shown its capabilities. Because of newscasts received over Transit Radio, bus and streetcar drivers in Washington, D. C., and St. Louis have known how to avoid areas blocked off by fires. Because of newscasts over Transit Radio, drivers in Houston, Tex., did their jobs better during a hurricane. These instances are portents of vastly more important uses.

The American people are just beginning to look full in the face the job of reducing their vulnerability to atomic attack. The need

(Continued on page 105)

BATTLE of words and pictures over transit radio flared into open in St. Louis Jan. 27 when the *Star-Times*, licensee of KXOK, city's TR franchise-holder, scored the rival *Post-Dispatch* in an editorial titled “The P. D.'s Captive Pen.” Latter was chided for its reference to transit FM as “ideological acorn” as *Star-Times* cited surveys showing 85% to 90% unopposed to musically-soothed rides. Accompanying editorial was this cartoon, “The Captive Pen.”

FOLLOWUP of *Star Times*' editorial assault on the *Post-Dispatch*'s anti-transit FM position was this cartoon published three days later by the Pulitzer newspaper. It was captioned, “‘Service,’ Whether You Like It or Not.” The *Post-Dispatch* cartoon was reprinted by the *Washington (D.C.) Post* in its Feb. 3 bulldog edition. The *Post* similarly has opposed transit radio in the Capital where stormy public hearings were held [BROADCASTING, Nov. 7, 21, 28, 1949].

Spot Radio *Does* Cost Less Today—

Startling Comparisons Prove That WHO Costs 52% Less Than In 1944!

By every standard that means anything whatsoever to forward-looking advertisers, advertising on *WHO* costs less today than in 1944.

Comparing figures from the 1944 and the 1949 Editions of the Iowa Radio Audience Survey,* you find that in 1949 Iowa radio homes had increased to the point where *WHO* cost 10.6% less per thousand radio HOMES than in 1944!

Even more startling, you find that in 1949, multiple-set homes had increased to the point where *WHO* cost 52% less per thousand radio home SETS than in 1944 — and modern research has proved that the increased number of home sets is even more important than the increase in radio homes. (Junior listens to his favorite serial program while Dad hears the evening news — Mother listens to a dramatic program while Sister is tuned to popular music — or the whole family listens to the same program, but in different parts of the house. Thus it is no longer correct to speak of “radio homes” — SETS make today’s audiences!)

By applying the Iowa Surveys’ percentages of one-set radio families and multiple-set radio families, against population estimates,** you find that Iowa had 769,200 radio homes in 1949, against

*The 1949 Iowa Radio Audience Survey is the twelfth annual study of radio listening habits in Iowa. It was made by Dr. F. L. Whan of Wichita University — is based on personal interviews with over 9,000 Iowa families, scientifically selected from cities, towns, villages and farms all over the State.

As a service to the sales, advertising, marketing and research professions, *WHO* will gladly send a copy of the 1949 Survey to anyone interested in the subjects covered.

**Sales Management’s Surveys of Buying Power.

only 596,000 in 1944. Whereas there were only 904,000 sets in Iowa homes five years ago, this number had sky-rocketed to 2,140,000 in 1949! Yet this 136% increase in radio sets is for homes alone; it omits the hundreds of thousands of sets in

Iowa cars, offices, barns, stores, trucks, restaurants, etc.

The phenomenal increase in the number of Iowa’s radio homes and radio sets — and the decrease in costs — boils down to this:

WHO — CLASS C — ¼-HOUR MAXIMUM DISCOUNT†

	Number of Iowa Radio Homes	Cost	Cost Per Thousand Radio Homes	Percent Decrease In Cost Per Thousand Radio Homes In 1949
1944	596,000	\$67.50	\$0.113	10.6%
1949	769,200	77.00	\$0.101	
	Number of Iowa Radio Sets (In Homes)	Cost	Cost Per Thousand Radio Sets (In Homes)	Percent Decrease In Cost Per Thousand Radio Sets (In Homes) in 1949
1944	904,000	\$67.50	\$0.075	52%
1949	2,140,000	77.00	\$0.036	

†The ¼-hour rate is indicative of all other time segments since *WHO*’s cost is figured on a ratio basis. Class C time is shown because it changed very little during the last five years — that is, Class C has remained primarily Daytime . . . from 8 to 12 mornings and from 1 to 6 afternoons.

Note that all these figures are based only on extra sets in Iowa homes. The figures do not include hundreds of thousands of “non-home” Iowa sets, plus millions of sets in *WHO*’s BMB secondary night-time

counties — these are the reasons why *WHO* is today a “better buy” than ever. For additional facts about *WHO*’s great audience-potential, write to *WHO* or ask Free & Peters.

PORT HURON TEST *Philadelphia Case Feb. 13*

TEST as to the interpretation of FCC's famous Port Huron decision may be established as a result of a forthcoming court hearing Feb. 13 in Philadelphia.

The Philadelphia case involves five stations, KYW (Westinghouse Radio Inc.), WCAU (CBS), WFIL (Philadelphia Inquirer), WPEN and WIBG (both independent), all of which are fighting a libel suit brought against them by Attorney David H. H. Felix, of that city. Mr. Felix charged in a complaint filed with the Federal District Court last November that all five stations on Oct. 24, 1949, and/or on Oct. 25, 1949, aired a political speech which allegedly was a "false and malicious publication by broadcast."

The complaint alleges William Meade, Republican city chairman, speaking on behalf of local GOP candidates during the city's municipal election campaign, referred to the Americans for Democratic Action as a "Communist-infested" group. Mr. Felix is a member of ADA, which reportedly also filed suit against Mr. Meade in a state court.

Series Rebroadcast

Mr. Felix's suits ask \$50,000 in damages from each of the stations. The Meade broadcast, 15-minutes long, originated from KYW on Oct. 24 and subsequently was rebroadcast over the other stations.

In its brief, KYW has filed a preliminary motion for dismissal contending there is no liability on the stations under Section 315 of the Federal Communications Act of 1934 which prohibits federal censorship of a political speech. The other stations are taking a similar position. KYW, whose case will be argued first, has filed admission that the speech was made but will argue on the question of its permissibility.

In the celebrated Port Huron decision, the FCC held that a station may not censor a political broadcast even if it contains libel. It also indicated that the FCC believes the federal law's ban on cen-

sorship would supersede state laws against libel.

Walter Saul and Allen S. Olmsted, of the law firm of Saul, Ewing, Remick and Saul, Philadelphia, are preparing the case for KYW. It is understood that the other stations will stand fast until KYW's argument is presented. Mr. Felix is a practicing attorney in Philadelphia.

KSFO-KCBS CASE

FCC Denies Both Extensions

THE ONE-TIME proposed exchange of frequencies between KSFO San Francisco and KCBS (formerly KQW) San Jose was closed last week as FCC denied extensions of completion date to both outlets and declared the KSFO permit for the switch to be automatically forfeited.

The stations decided not to make the change last fall, proposing instead that KCBS assume KSFO's permit for 50 kw on 740 kc there [BROADCASTING, Oct. 31, 1949]. While not allowing transfer of the permit, FCC left the way open for KCBS to file for reinstatement of its original bid for that assignment.

1948 Authorization

Under the exchange granted by FCC in 1948 after eight years of proceedings, KSFO had proposed to change from 5 kw day, 1 kw night on 560 kc to 50 kw fulltime on 740 kc, directional. KCBS, now wholly-owned by CBS, was to switch from 5 kw on 740 kc to 560 kc with the same power, using KSFO's site in San Francisco. KSFO, licensed to Associated Broadcasters Inc. which also owns KPIX (TV) San Francisco, decided last fall to drop the plan and "concentrate more fully upon development of television broadcasting."

FCC denied extension to KSFO "because completion of construction has not been prevented by causes beyond control of the permittee." Considering that KCBS' failure to complete the exchange "was due to causes beyond your control, and specifically because of the failure of Associated Broadcasters to meet its commitments under its construction permit upon which yours was contingent, the Commission, in denying extension to you, does so without prejudice to your filing a petition to reinstate" KCBS' application for 50 kw on 740 kc.

Hart Takes Leave

LEE HART, Broadcast Advertising Bureau's retail specialist, will take an extended leave of absence, it was announced last week by Maurice B. Mitchell, BAB director. Miss Hart has returned to her home in Washington, D. C., where she plans to devote some time to analytical studies and reports on radio and television advertising techniques while on leave from BAB.

ASSOCIATION OF AMERICAN RAILROADS
TRANSPORTATION BUILDING
WASHINGTON 6, D. C.

WILLIAM T. FARICY
PRESIDENT

February 1, 1950

To the PRESS and RADIO:

Subject: SAVING NINE BILLION DOLLARS A YEAR

More than 60 per cent of the operating cost of producing rail transportation is in wages; another 30 per cent in the cost of the fuel, materials and supplies which railroads buy and use.

Since 1921, the first year after the return of the railroads from government operation during the first World War, railroad wage rates have gone up two and one-half times and the level of prices of fuel, materials and supplies has almost doubled. The same amount of labor, fuel and supplies for which they paid \$1.00 in 1921 now costs the railroads an average of \$2.25.

But labor and materials are combined and used so much more efficiently that the average unit of service, freight and passenger combined, which the railroads produced in 1921 for an operating cost of \$1.00 is now produced for \$1.03 -- and, it should be added, the service is sold to the public at charges which, on the average, have increased since 1921 no more than this same three per cent.

Behind such tremendous gains in efficiency, there is a little-noted but very real story of progress and improvement. Partly, it is a story of new products and devices unknown in 1921 -- diesel electric locomotives, centralized traffic control, electro-pneumatic car retarders in major freight yards, to name but a few. Partly it is a story of improvements in more familiar things -- a 50 per cent gain in the pulling power of the average steam locomotive -- an even greater gain in its ability to keep heavier loads moving at higher sustained speeds -- the tripled life of the average crosstie.

Partly it is a story of increased use of the railroads, partly a story of better methods in using improved plant and equipment -- but it all adds up to such results as a virtually doubled average daily transportation output of freight cars, a more-than-doubled daily output of locomotives, an increase of more than 150 per cent in the average hourly service of freight trains, and achievement of the safest operation in transportation history.

To make all this possible, the railroads have spent on additions and improvements since 1921 almost 17 billion dollars. But the saving in operating cost, as compared with what it would have been if railroads were using materials and manpower at present prices and wages but with the efficiency of 1921, amounted in 1949 alone to more than nine billion dollars -- a saving which has been passed on to the public.

The best part of the story is that it is still going on. The same skill, ingenuity and determination which have saved these billions of dollars a year in the cost of producing transportation are still at work on the railroads -- for now and for the future.

Sincerely yours,

William T. Faricy

TRANSIT ASSN.

Spaulding Is Riders' Counsel

HECTOR G. SPAULDING, of the Washington law firm of Spaulding & Reiter, has been named legal counsel for the Transit Riders' Assn. to aid in its fight against radio-equipped vehicles in the District, it was announced last week.

Mr. Spaulding, a professor at George Washington U. law school and formerly practicing attorney in New York, Illinois and Minnesota, stated in accepting the TRA invitation that "transit radio is a direct intentional attack" on the "freedom of attention" and quoted Supreme Court Justice Felix Frankfurter as saying:

Modern devices for amplifying the voice or its recording afford too easy opportunities for aural aggression. If uncontrolled, the result is intrusion into cherished privacy. The refreshment of mere silence, or meditation, or quiet conversation, may be disturbed or precluded by noise beyond one's personal control.

The transit association and two Washington attorneys—Guy Martin and Franklyn Pollak—are awaiting a decision on their appeal for a rehearing before the Public Utilities Commission which has ruled that transit radio is not "inconsistent with public convenience, comfort and safety."

Mr. Martin and TRA spokesmen said again last week that if the commission refuses to reopen the case, they will take the issue to the Federal District Court.

Gen. Marshall To Speak at Williamsburg Ceremony

GEN. GEORGE C. MARSHALL, wartime Chief of Staff and now president of the American Red Cross, will address the youth of the world Feb. 27 by radio when the four national winners of the Voice of Democracy broadcast essay contest [BROADCASTING, Jan. 16] appear in the historic House of Burgesses at Williamsburg, Va. Host to the four high school winners will be John D. Rockefeller III.

Gen. Marshall and Mr. Rockefeller will address a group of distinguished guests from the spot in which Patrick Henry delivered his famed "if this be treason, make the most of it" speech. The addresses will be heard at 2 p. m. and carried by delayed broadcast on CBS 5-5:30 p. m. Voice of America's globe-circling transmitters also will carry the talks.

Robert K. Richards, chairman of the Voice of Democracy Committee and NAB public affairs director, said the event will close a week of awards and entertainment for the four students. The radio script contest is sponsored annually by NAB, U. S. Junior Chamber of Commerce and Radio Mfrs. Assn., with endorsement by the U. S. Office of Education.

The four student winners will

repeat their broadcasts before high school students in Williamsburg. During the preceding week they will receive \$500 scholarship awards at a Washington luncheon, visit President Truman at the White House and call on Congress, Cabinet members and the U. S. Supreme Court.

Winning students are Richard L. Chapman, 17, Brookings, S. D.; Gloria Chomiak, 17, Wilmington, Del.; Anne Pinkney, 17, Trinidad, Colo., and Robert Shanks, 17, Lebanon, Ind. The contest was held as feature of National Radio & Television Week, with nearly a million students writing and voicing five-minute scripts on the topic, "I Speak for Democracy."

BERT HORSWELL

Rites for MacGregor Mgr.

FUNERAL services for Bert Horswell, 42, Dallas manager of C. P. MacGregor Co., Hollywood, were held at the Wee Kirk of the Heather in Forest Lawn Memorial Park, Glendale, Calif., last Tuesday. Cremation followed.

Mr. Horswell died on Jan. 28 from pneumonia which developed following severe injuries sustained in an automobile accident near Lufkin, Tex., three days before. Besides his wife Beverly, surviving are two small daughters.

TRANSIT STAND

Miller Asks NAB Board.

NAB PRESIDENT Justin Miller has informed the Washington Transit Riders' Assn., which opposes FM-equipped vehicles, that he has asked NAB's board of directors whether it wished to take a stand on transit radio.

In his reply to a letter from Claude N. Palmer, president of TRA which claims some 450 members, Judge Miller noted that the request, "so far as I can recall . . . is the first suggestion that it should take such a position." Mr. Palmer had contended that "forced listening" is inconsistent with NAB's insistence upon "freedom of the air."

The association pointed out that NAB has condemned the "evils practiced in less enlightened countries and has urged the American public to support and defend 'the American principle of free radio.'"

Referring to contentions that FM "is not catching on" and that the "captive audience is its only means to success," Mr. Palmer predicted "much harder going" for the radio industry if FM is made to depend on transit radio. He cited cessation of broadcasts in New York's Grand Central Terminal and Muzak Corp.'s "withdrawal" of its service from stations where TR contracts exist.

Feature of the Week

THE broadcasting skies have broken clear and bright for Francis Davis, WFIL - AM - FM - TV Philadelphia weather man. Barometer is the 52-week renewal for sponsorship of his daily radio program by Cities Service Oil Co.

Mr. Davis by his manifold activities, the station reports, negates the popular conception of the weatherman who spends hour on hour concocting weather prospectuses. Instead, the agile Mr. Davis has worked out a formula for keeping sponsors and listeners pleased with his work before both microphone and camera while doubling as a professor, a student, a member of the Air National Guard, and speaker for service and church clubs.

Secret of Mr. Davis' success is a hard-driving routine which takes in studio and classroom in a one-day stint. First weather man to be employed fulltime by a Philadelphia station, Mr. Davis joined the WFIL staff in October 1947, after serving as a wartime weather officer in the Air Force.

His program schedule consists of two five-minute radio shows daily, 6:55 p.m. and 11:10 p.m., and a

Mr. Davis studies instruments and a weather map at WFIL studios.

TV program at 7:25 p.m. Mr. Davis' early evening radio broadcast has been sponsored continuously by Cities Service and the Petrol Corp. since October 1948.

He begins his WFIL work at 3 p.m. laboring diligently with charts and instruments until he has completed his AM shows and the telecast. The 11:10 p.m. program is recorded early in the evening. But

On All Accounts

THE partnership of Rockett-Lauritzen, Los Angeles, claims the unusual distinction of having been spawned by a trailer house. This unique formation occurred five years ago when Donald Christie Lauritzen, now president of the advertising agency, bought a new trailer.

Proud of his purchase, he invited a neighbor, Robert R. Rockett, over to see it one night. Seeing led to talking, and before the evening was over, talking resulted in the birth of Rockett-Lauritzen, art and production service.

The way the art and production service turned into an advertising agency the following year was just as accidental. It all happened when Don redesigned a boat for a man who wanted to go into boat manufacturing. The man was so appreciative of the job done that when the following year Franklin Research Co., Philadelphia (wax emulsions), was looking for someone to handle their advertising, he led the firm's representative into the offices of Rockett-Lauritzen. Since that first account, they have been an advertising agency.

It is no accident however, that in the five years since then the agency

has developed into a healthy radio-active firm and one of the largest buyers of television on the West Coast.

At the present time Don handles for the agency all radio and television for Ross Food Co., Los Angeles (Dr. Ross Dog and Cat Food, Skippy Dog Food), and TV for Arizona Canning Co., Phoenix (Sun Vista Products), and supervises several other accounts.

Radiowise, Ross currently is sponsoring, for Dr. Ross Dog and Cat Food, *Hopalong Cassidy* on the full Don Lee network in addition to newscasts and spot shows on several West Coast stations. In television Ross has the *Ruggles Show* on KECA-TV Los Angeles, KING-TV Seattle, KPHO-TV Phoenix, KFMB-TV San Diego, and KGO-TV San Francisco; five-weekly, two-daily *Telenews* on KPIX (TV) San Francisco; five-weekly *Dog of the*

DON

Hour on KPIX and KLAC-TV Los Angeles; plus spots on several other California stations. For Skippy Dog Food the firm has *Pets Unlimited* on KRON-TV San Francisco.

Arizona Canning Co. is sponsoring *Just For Fun* on KFI-TV Los Angeles. *(Continued on page 92)*

a new promotion plan for increased sales...

O'Brien & Dorrance now makes available its complete agency service, its seasoned counsel by experts in media promotion, and an unsurpassed knowledge of radio and television promotion to radio and television stations throughout the nation... all at a moderate cost.

The O'Brien & Dorrance promotion plan gives individual stations a unique opportunity to improve their promotion and trade magazine advertising... get it *read and understood* by time buyers, advertising managers, account executives and others in the business of *buying time in a highly competitive market*.

As a station operator, you cannot afford to experiment with uncertain, badly-designed, wasteful promotion... with trade paper ads that do nothing but fill expensive space. Editorial

BMB at Deadline

LAST WEEK BMB began mailing out reports of the day and night audiences of 629 subscribing stations as measured last spring in BMB's second nationwide study of station audiences, final step in a Herculean task of distributing and tabulating 357,000 ballots that represents one of the most comprehensive media-impact analyses ever attempted.

Will it be the final step for BMB as well as for the second study? That's the question of the day in advertising circles. And it's a question whose answer is perhaps even more eagerly awaited by the sales and research executives of competitive media—particularly newspapers—than by the broadcasters themselves.

Advertisers and agencies have repeatedly gone on record as to BMB's value to them in evaluating not only individual stations in relation to each other but radio in relation to other media. BMB is the first and only radio measurement of circulation, comparable to the ABC figures for newspapers and magazines and to the Traffic Audit Bureau figures for outdoor advertising. "We want BMB continued," the buyers of advertising insist.

But the broadcasters are not so certain. It's less easy to be certain when you're the one to pay all the bills, as the broadcasters do for BMB. Without belittling the value of comparative and competitive media circulation statistics, many station operators believe that program audience measurements provide them with a more effective sales tool. Perhaps the answer to BMB's future is a new type of organization with an expanded scope which would bring in revenue to at least partially offset its expenses. The BMB function certainly should not be abandoned until every possible means of continuance has been thoroughly explored.

But whatever the future holds for BMB, the thanks of radio and of radio's customers should be extended to Acting President Kenneth H. Baker and his stripped crew of associates for saving BMB from the ignominious fate which confronted it a few short months ago.

No Bull, John

THE BBC is going commercial!

Don't fall off your side-saddle, old boy. It isn't really going to the American Plan of free competitive operation.

The story was tucked away in the *London Mirror* a few days ago. It recites that in its bid to sell British goods by radio the BBC has formed a team of experts to plan a "Buy British" series. It is for broadcast on the General Overseas Service with recordings to be flown to stations all over the world. Whether the BBC will buy time in the U. S., or seek it on a "public service" basis, wasn't revealed.

"The drive is being aimed particularly at the North American markets," says the dispatch. "The series will concentrate on showing how British industries have learned the lessons of production and showmanship."

More power to you, John Bull. But why not go all the way and admit a subsidized monopoly like BBC is wrong and that the American Plan of free competitive enterprise is right? You have now sitting a Government Commission to determine whether the State monopoly system should be continued after 1952.

The answer is evident. When BBC wants American dollars it uses the American way.

Anti-Trust Busters

THERE MAY be legal skeptics who will find fault with the U. S. Court of Appeals' opinion holding that freedom of the press is not violated by denial of a radio license to a newspaper which seeks to monopolize advertising in its market through alleged coercion. Generally, however, we believe there will be few in radio who will disagree with the opinion sustaining the FCC's finding that the *Mansfield Journal* and *Lorain Journal* should be denied grants for AM and FM because of alleged monopolistic practices.

While that may be so, it also is evident that abuses can develop if the FCC follows the court's judgment without wisdom or balance. Within a week of the court's opinion, the FCC called an oral argument for Feb. 13 (now postponed to April 10) on proposed policy regarding licensing of stations which violate any U. S. laws, unrelated to radio.

Never in all of radio's tumultuous regulatory experience has there been a proposition as drastic or far-reaching. If invoked, it would constitute a drag-net into which could be drawn for revocation any licensee who violated any law or ordinance. Expectoration on the side-walk, divorce or driving while inebriated presumably would constitute offenses.

It's equally obvious that what the lawyers are shooting for is anti-trust, and that they hope to compromise on that aspect. The balance is too preposterous to take seriously.

The springboard for this proposed policy, then, obviously is the anti-trust aspect. It does not stem primarily from the Horvitz case upheld by the Court of Appeals although that ruling would appear to buttress the FCC's position. It had its origin in a 1948 Supreme Court decision holding major motion picture producers to be in violation of the anti-trust laws. Shortly thereafter the FCC served notice that it was considering the question whether an anti-trust violator is qualified to operate a station.

As a consequence, a dozen motion picture producers or exhibitors, and several companies in the manufacturing and appliance fields have been placed under the stigma of temporary licensing.

None of those holding temporary licenses has been adjudged guilty of monopoly in radio or communications. Should the FCC conclude to disqualify them, and should the courts uphold the Commission, it would mean the biggest upheaval in radio and TV since the art began. Conceivably, every station using AP news service would be culpable, since AP was adjudged an anti-trust violator several years ago.

To deny newspapers, the motion picture people, or equipment manufacturers or any other legitimate class the right to hold radio licenses is to make of them second-class citizens, forever stigmatized in the public gaze. Radio could not have built to its present stature of leadership among media without the participation of these entities.

This new inquiry has all the earmarks of the newspaper ownership thrust of the FCC in the early days of the FDR era. Many newspapers would not list competitive station logs. We opposed the newspaper divorcement as discriminatory. There are fewer abuses now.

We hope the FCC will move warily in weighing what its lawyers may regard as newly discovered authority. If the courts wanted the FCC to enforce the anti-trust laws (in fields other than communications) or other criminal and civil statutes, it would have so specified. Certainly that wasn't intended, since the FCC is an expert agency created by Congress to perform the regulatory functions of the law-making body in the specialized fields of radio and communications.

Our Respects To—

LOWRY HYER CRITES

ONLY hangover for Lowry Hyer Crites from a southern exposure in Texas is a hand-made metal and leather belt and a penchant for people with a direct and natural business approach. As administrative assistant at General Mills to Samuel C. Gale, vice president in charge of advertising and public services, Mr. Crites smoothes the muddled paths trod by a battalion of GM executives and key men from the firm's four advertising agencies. He insists on a straightforward yet casual clearance of business detail, usually foreign to a corporation the size of General Mills.

The fancy belt stands out as a unique hold-over from Texas despite Mr. Crites' many years of habitation there. He was born in what was to become Lawton, Okla., on July 21, 1906. The land was Indian territory at the time and was not chartered as a state until a year later. His parents and he, an only child, lived there in the heart of the broom corn industry where his father manufactured sweeping brooms from the corn.

When he was two years old, the family moved to Wichita Falls, Tex., where he attended high school and junior college. Bored with the academic rigors of higher education, and intrigued with the prospect of being a successful businessman, young Crites quit classes to begin a cotton-growing venture with another young entrepreneur. A third friend, with dubious inclinations toward generosity, offered the pair 300 acres of land rent free for their cotton-growing project.

"On paper, we figured we'd get at least a bale an acre and in five years would be rich," Mr. Crites says. But when they went out to survey the land, they found it loaded with mesquite, a high, rugged and brambly bush which "would have taken 500 Mexicans 10 years to clear. We had the 10 years, but couldn't find enough Mexicans who would work for nothing."

Practicality won out for the time being, and Lowry Crites returned to college and Oklahoma U. in Norman. Surrounded by oil fields and 10-gallon-hatted millionaires, he decided to become a geologist and work for large oil concerns. Between school terms (and occasionally, during them when he was disinclined to burrow into the books), he took off for the hinterland to do some practical engineering in determining elevations on wells. The depression, however, put a fast stop to oil exploitation and young Crites' dreams. Forced again to be practical, he studied business administration.

From college he returned to the heat of Wichita Falls, the directness of the Texas

FRED L. BERNSTEIN, WTTM Trenton, N. J., sales manager for two years, and former general manager of WFAK Charleston, S. C., appointed assistant general manager of WTTM.

WILLIAM PHILLIPSON, formerly counsel to Rockefeller Committee on Inter-American Affairs and Dept. of State counsel for International Broadcasting Div. joins legal department of ABC.

JACK COALSTON appointed manager of CKMR Newcastle, N. B. He was manager of special services for British United Press, Toronto, and prior to that manager of CJNB North Battleford, Sask.

JOHN W. ELWOOD, general manager of KNBC San Francisco, elected for four-year term on advisory board of San Francisco State College.

FRANK STANTON, CBS president, will serve as national chairman of the radio-television committee for Brotherhood Week, Feb. 19-26, which is sponsored by National Conference of Christians and Jews. His committee includes 40 persons, station and network executives, union leaders, actors and

writers. **JOHN AKERMAN**, new assistant manager of WBBM (CBS) Chicago, is Chicago radio chairman.

R. MAIN MORRIS, assistant manager of KLZ Denver, named a director of Wolhurst Skeet Club, group made up of local business and professional leaders.

HARRY ACKERMAN, CBS vice president and director of network and television programs, Hollywood, is in New York for two weeks conferences.

Philip Morris Sales

SALES by Philip Morris & Co. Ltd. for the nine months ending Dec. 31, 1949 were \$192,639,200, a 12% increase over the record of the corresponding period in 1948, the company announced last week. The tobacco firm, a heavy radio and television advertiser, reported estimated net earnings of \$5.49 per common share in the last three quarters of 1949, compared with \$4.43 for the same period the year before.

GUY C. HAMILTON Succumbs to Heart Ailment

FUNERAL services for Guy Clarence Hamilton, 71, former vice president and general manager of the McClatchy newspapers and broadcasting interests (KFBK KERN K M J K W G K O H), were held in Sacramento, Calif., Jan. 31.

Mr. Hamilton

In failing health for the past two years, Mr. Hamilton died at his home in Sacramento Jan. 27 following a heart attack. He had retired from the McClatchy organization in 1942.

Born in Richland Center, Wis., March 3, 1879, he helped pioneer Pacific Coast radio [BROADCASTING, May 1, 1940]. Mr. Hamilton also was a pioneer in the field of facsimile. During the late thirties he secured permission of the FCC to use the regular wave channels of KFBK Sacramento and KMJ Fresno for facsimile broadcasts.

Upon the death of C. K. McClatchy, editor and owner, Mr. Hamilton, on April 27, 1936, was named general manager of the McClatchy newspapers and broadcasting interests, continuing in that

capacity until his retirement.

Besides his widow Elizabeth, surviving are four children, Paul, Clarence, and Helen Hamilton and Mrs. Margaret Kerins.

S. H. CAMPBELL JR. WSPB Board Chairman Dies

FUNERAL services were held last week for S. H. Campbell Jr., 45, chairman of the board of directors of WSPB Sarasota, Fla., and interest holder in WJHL Johnson City, Tenn., and WDUK Durham, N. C. He died at his Sarasota winter home Jan. 29.

Mr. Campbell also was president and owner of the Campbell Oil Co., Chattanooga, head of the Chattanooga Baking Co. and a director of the city's Hamilton National Bank. He also held interests in other enterprises, including the Peerless Woolen Mills, Rossville, Ga.

Rothman Appointment

E. E. ROTHMAN, assistant general manager and vice president of Campbell-Ewald Co., New York and Philadelphia, has been appointed general manager of the agency. In addition to being in charge of the Detroit office, Mr. Rothman will supervise the New York, Chicago, Los Angeles and San Francisco offices.

A SERVICE OF THE PARAMOUNT TELEVISION NETWORK

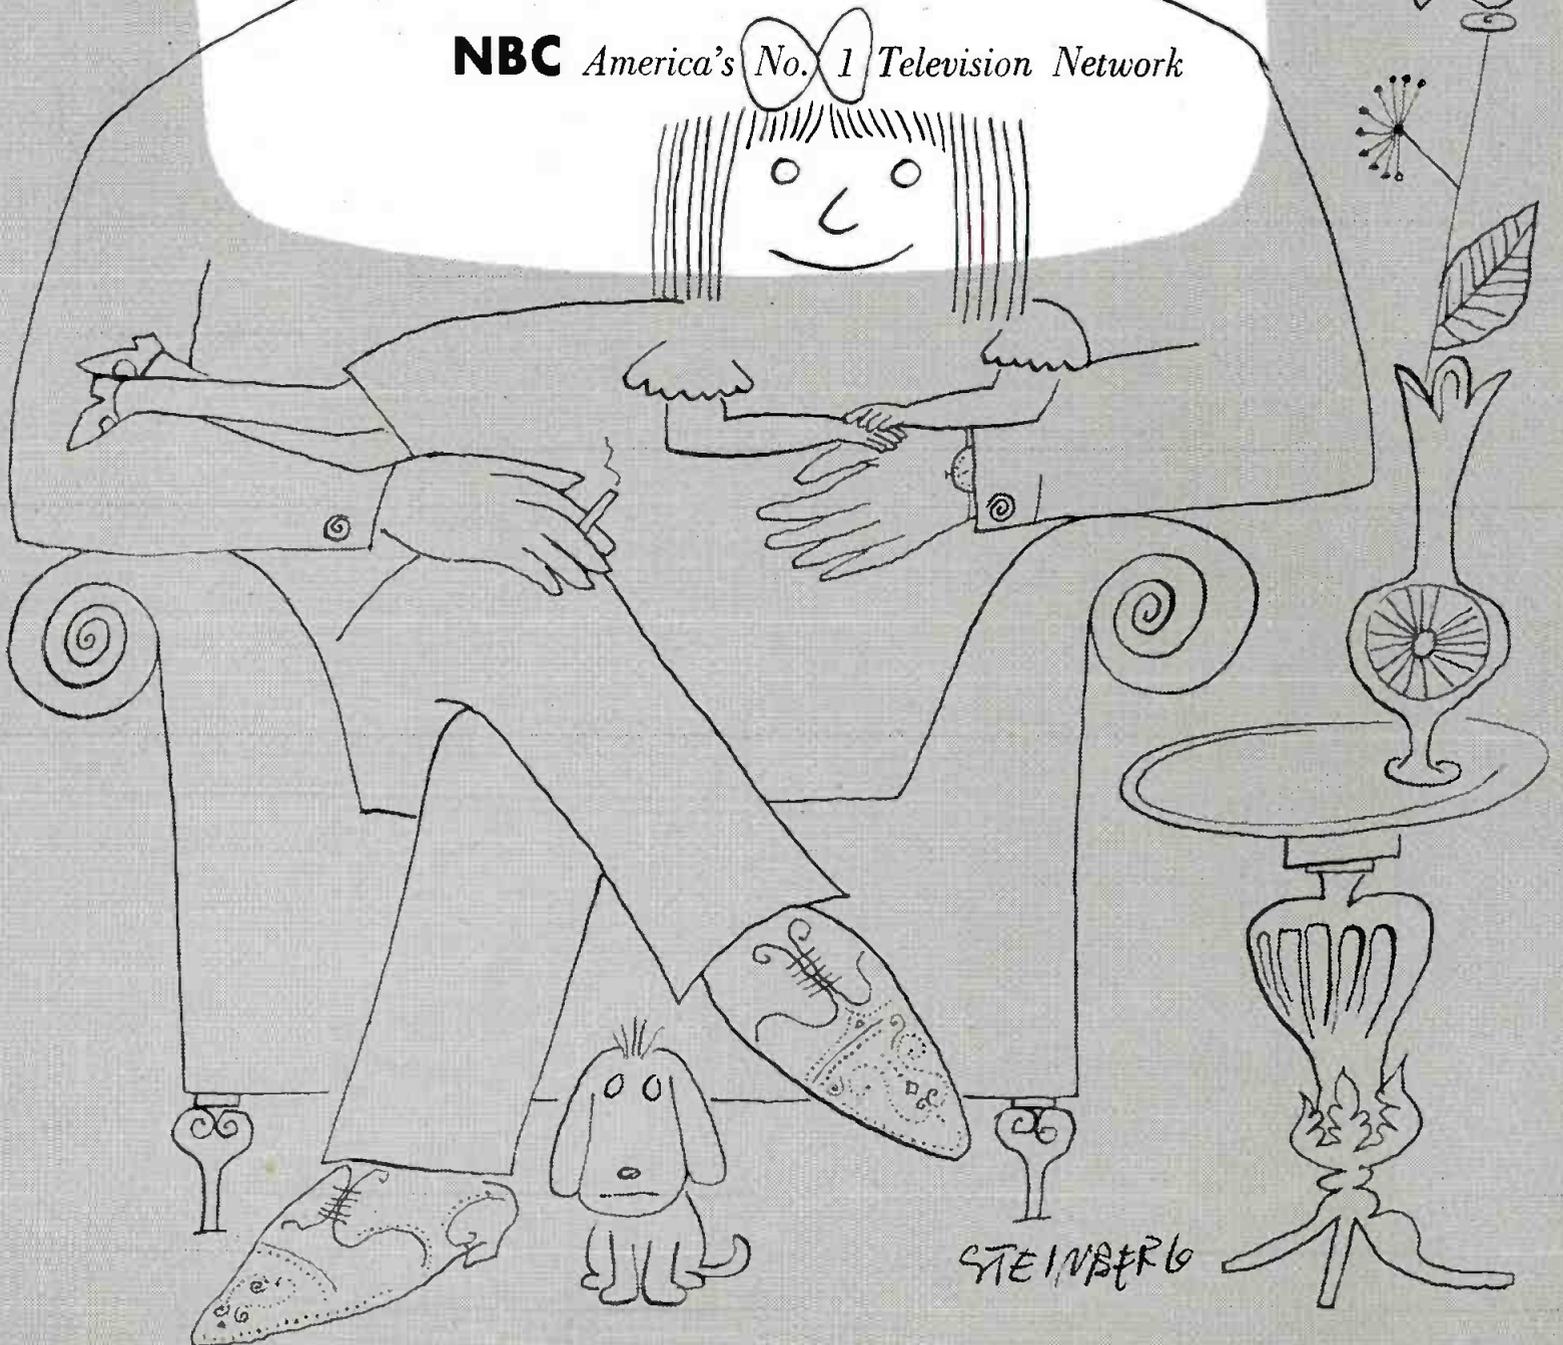

During one week

NBC Television programs attract more than
20,000,000 individual viewers—the largest audience
in sight-and-sound.

That's something to think about—the next time
you're thinking of *mass media*.

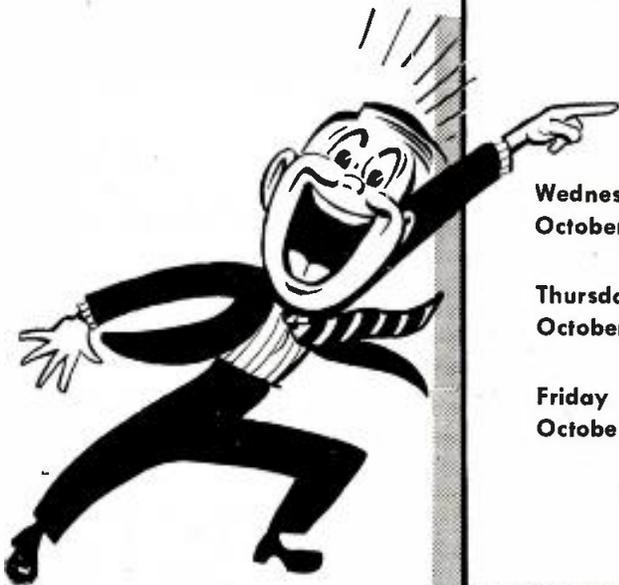

NBC America's No. 1 Television Network

Worth Shouting about!

● Seldom do you have an opportunity to make a true test of station popularity... a test involving all stations carrying the same program at the same time. The 1949 World Series finally provided the opportunity for this comparison. Check WGN-TV's ratings on the World Series telecasts against the other three stations in Chicago, and you'll see why we believe the results are worth shouting about:

	WGN-TV	STATION A	STATION B	STATION C
Wednesday October 5	25.5	8.4	7.5	off
Thursday October 6	23.5	7.8	4.5	4.8
Friday October 7	20.8	6.7	4.6	6.3

Jay & Graham Videodex, Oct., 1949

Here's overwhelming proof that WGN-TV is the favorite television station with Chicago viewers... conclusive evidence why more and more advertisers are joining the trend to WGN-TV

... Channel 9 in Chicago.

The Chicago Tribune Television Station

BAROMETER READING ON THE FREEZE Thaw Remote

"... I have to admit that what you really want to know from me is what the Commission is going to do about the freeze, when it's going to do it, what we are going to do about the UHF spectrum and when we're going to do it, and when we are going to have color television."
—From an address by Wayne Coy, FCC Chairman, at TBA Clinic, Dec. 8, 1948.

By RUFUS CRATER

THIS READING of the industry mind is just as apt today as when it was phrased 14 months ago, two months after the freeze was invoked, and the answers seem no less elusive.

In the meantime the FCC has embarked upon a television hearing—or a series of hearings—which is concededly one of the most complex and inclusive FCC proceedings since the original allocations of 1928 or the general

allocations hearing some 16 years later.

Now, with a series of bad guesses behind them, Commission authorities are reluctant to speculate on the probable date when they can wind up the proceedings and lift the freeze. When the freeze was formally invoked, on Sept. 30, 1948, they expected it to last six to nine months. A year later the first round of hearings was just getting under way, and the end is not yet in sight.

The boldest observers, however, while guaranteeing nothing, will venture on the basis of the current outlook that:

- It's unlikely FCC will complete all the processes it has set in motion, get out its decisions, and be in a position to lift the freeze before late this year—and it may take much longer.

- FCC will be "forced" to open the UHF along lines already indicated, for want of enough channels anywhere else, but a few years probably will pass before this upstairs region is in extensive use.

- The split over color is so wide, with forces of such potency on each side, that some compromise may have to be devised to recognize the imminence of color while still leaving the door open for further development before rigid standards are adopted.

It seems generally accepted that the freeze will last "two years plus," from the time it was imposed. And any estimate of a fall "thaw" is predicated on FCC's meeting what seems to be the minimum time requirements for the various steps it has outlined.

Citing the complexities and complications involved, plus the demands of other Commission busi-

ness, more pessimistic observers hold little hope for a return to normal licensing before 1951. In support they note that the color phase, Part I of the hearing, for which three weeks were set aside when it started last Sept. 26, is still uncompleted and apparently has several additional weeks to run.

FCC recognized the delays that have occurred and are still in store when, last week, it extended until

in three sections, starting with color.

That phase, which commenced Sept. 26 and recessed in December, resumes Feb. 20 in Washington with the first official demonstration of the color system of Color Television Inc. Comparative showings of the three competing systems—those of CTI, CBS, and RCA—will be held Feb. 23. Direct testimony then resumes Feb. 27, to be followed by cross-examination.

Chronology of the Freeze . . .

May 6, 1948: Broadcast and non-broadcast sharing of TV channels abolished; Channel 1 deleted; new allocation plan proposed.

June-July 1948: Hearing on new allocation plan, raising questions as to tropospheric interference and related problems.

Aug. 27, 1948: Because of these questions, FCC called FCC-industry conference on desirability of revising engineering standards.

Sept. 13-14, 1948: FCC-industry conference held, setting up technical sessions for November-December looking to revision of standards.

Sept. 20-23, 1948: UHF hearing.

Sept. 30, 1948: VHF freeze announced.

May 26, 1949: Preliminary plans for far-reaching VHF-UHF hearing announced with color among subjects to be considered.

July 11, 1949: Formal proposals for hearing announced, along with proposed VHF-UHF allocation plan envisioning use of 42 UHF channels with present 12 VHF channels.

Sept. 26, 1949: First phase of hearing opens, restricted to color.

Nov. 22, 1949: Color sessions recess; FCC issues field test notice.

Feb. 20, 1950: Color sessions to resume with demonstrations followed by further direct testimony starting Feb. 27.

March 24 the deadline for comments (or amendments of previously filed comments) on the specific city-by-city VHF-UHF allocations. Time for filing oppositions to those comments or amended comments was extended to April 7. The deadlines previously had been last Aug. 26 and Sept. 26, respectively.

The hearing is being handled

Authorities see little chance that all this can be completed before the end of March and expect that it may easily extend into April if the pace exhibited up to now is continued.

Both the CTI showing and the comparative demonstrations will be held at FCC's Laurel (Md.) laboratories, where "there will be

TBA's Television Clinic Program ● Waldorf-Astoria, New York ● Feb. 8

A.M.
9:30—Registration for Clinic and luncheon (until 1 p.m.) Starlight Ballroom Corridor.
10:00—Annual meeting of the members of Television Broadcasters Assn. Inc. (open only to official representatives of TBA members) Palm Room.
11:00—TBA TELEVISION CLINIC. Charles C. Barry, vice president, ABC, presiding, Starlight Ballroom.

I. PROGRAMMING
A. Program Production Problems—Agency Style; Roland Gillette, Young & Rubicam.
B. Local Station Production Problems; Klaus Landsberg, KTLA (TV) Los Angeles.

II. BUYING AND SELLING
A. Local Station Viewpoint: Kenneth Stowman, WFIL-TV Philadelphia.
B. Agency Viewpoint: Linnea Nelson, J. Walter Thompson Co.

III. INTERCONNECTED VS. NON-INTERCONNECTED STATIONS
A. Paul Adanti, WHEN-TV Syracuse, N. Y.
B. Jack Boyle, WAVE-TV Louisville.

IV. QUESTION AND ANSWER PERIOD.
(Adjournment at 12:30 p.m. for luncheon)

P.M.
1:00—ANNUAL TBA LUNCHEON: J. R. Poppele, toastmaster, Starlight Ballroom. Guest Speaker: Milton Berle. Entertainment: "Stop the Music" quiz especially arranged for TBA luncheon, starring Bert Parks. Prizes.
2:30—Reorganization meeting, Board of Directors, Television Broadcasters Assn. Inc. Palm Room.
2:45—TBA TELEVISION CLINIC. (Afternoon Session) Charles C. Barry, presiding, Starlight Ballroom.

I. PROFITABLE AFFILIATED STATIONS: Edward Lamb, WICU (TV) Erie, Pa.

II. LOCAL TELEVISION PACKAGES:
A. Russ Johnston, Jerry Fairbanks Productions.
B. Maurice Rifkin, Frederic W. Ziv Co.
C. Ralph Cohn, Screen Gems Inc.
— 10 Minute Intermission —

III. ROUNDTABLE DISCUSSION: Paul Mowrey, ABC, moderator.
NBC; ABC; DuMont Television Network; CBS

IV. THE JURISDICTIONAL PROBLEMS IN TELEVISION: Ernest de la Ossa, NBC.

V. THE FUTURE OF SPORTS IN TELEVISION: Ned Irish, Madison Square Garden Corp.

5:30—Adjournment.

DuMONT PAT

On Stand Re NBC's Saturday Plans

DuMONT LABS claimed last week that NBC's revised plans for a 2½-hour Saturday night television series do not modify the "basic occasion" of DuMont's complaint [TELECASTING, Jan. 9, 30], though they do correct some of the "specific matters of complaint."

DuMont had asked for an FCC investigation of alleged monopolistic aspects of NBC's proposal, which involved the offer of a 13-week series of 2½-hour Saturday night programs to NBC television affiliates. NBC subsequently withdrew the plan and offered a new one in which affiliates in markets having three or more stations were asked to take the entire 2½-hour program, while those in markets with only one or two stations may accept only part of the proposed show.

On the heels of NBC's changes, William A. Roberts of the Washington law firm of Roberts & Mc-

Innis, DuMont counsel, wrote FCC last Wednesday:

As DuMont has advised the management of NBC, the basic means of establishing monopoly is the general purchase of bulk time by a network, with assurance of payment without specified clients or programs, thus excluding competition of other networks with the clients in servicing stations and restricting the freedom of the independent broadcaster in his choice of network programs.

The extension of this system of operation would initiate competition among the networks for the bulk purchase of the facilities of independent broadcasters to the exclusion of the interests of both the advertiser and the individual broadcaster. It is particularly objectionable at present when a number of stations and the intercity transmitting facilities are so inadequate as to permit exclusive control in many instances.

When coupled with affiliation agreements providing little or no compensation to affiliates for the initial sub-

stantial block of time, and progressive increases in compensation as the network acquires control of substantially all of the useful time of the affiliate, provisions of such agreements ostensibly permitting rejection by individual stations of a portion of the bulk order, are not impressive.

The relationship of the basic substance of this complaint with the national spot advertising case in some aspects is apparent. Since the authorization and construction of ade-

quate practical television stations to serve competitive networks in the principal markets seem far removed, the necessity for emergency control of network methods is urgent.

DuMont attached a copy of a telegram which it said was received from Sylvester L. (Pat) Weaver Jr., NBC vice president in charge of television, outlining the new offer as it was made to affiliates in single-station markets.

The telegram said the offer is dependent upon acceptance by "a sufficient number of affiliates to justify our proceeding." The original

UHF SUCCESS

By RICHARD W. DAVIS

THE old saw that "television will mean ruin for the small broadcaster" has taken a bit of tempering lately, but it has still left many an AM manager looking at the future with sawdust in his knees. In Connecticut, however, we have watched the growth and progress of a new television which will open vast areas of entertainment, public service and profit to present AM broadcasters.

This new television is Ultra High Frequency — UHF — and it shows great promise for the future.

On appropriately named Success Hill in Bridgeport, NBC and RCA have constructed their experimental UHF television station. The eyes of the radio and television industries have been on it, but we have been there with our hands, hearts and hopes as well.

From the time the FCC granted the construction permit on May 4, 1949, the progress of the new station has been closely followed by us, and through us, by the people of New Haven. Our personnel have made almost daily visits to the modern, compact and efficient transmitter building with its 250-foot antenna overlooking the Bridgeport area, and when the station began retransmitting the test patterns and programs of WNBT (TV) New York, one of the first adapted receivers was made available to us for tests in homes and in our mobile unit. At this point we are confident that UHF television is a fact and the Bridgeport station is proving the feasibility of telecasting in the upper reaches of the spectrum.

Success Seen

Though this UHF station has been labeled "experimental," those who have worked with it so far believe, as do our engineers, that it has come a long distance from the experimental stage. It is considered to be in the operational level; the only testing being done is a thorough analysis of reception characteristics.

The equipment is comprised of two-thirds standard VHF trans-

mitting units, and the rest has been working economically and efficiently. As for reception, our tests have shown it to be superior to the New York and New Haven VHF signals in Bridgeport when a side-by-side comparison is made.

The equipment is compactly housed in a small Cape Cod building, the units arranged on two sides

of a master control board. None of the tubes in the picture or aural transmission systems is expensive, the highest cost of tubes in the final amplification stage is approximately \$48.00. All are cooled by forced air, not water.

Two significant facts have emerged from our reception tests. One is that UHF is practically free from man-made distortion. Automobile ignition and neon sign interference that tears a VHF picture apart disappears with UHF. The other fact is that UHF signals can be received over much longer

RICHARD W. DAVIS, general manager of WELI New Haven, Conn., is a

Mr. Davis

veteran of 18 years in the broadcasting industry. He became program director of WMAS Springfield, in 1932. In 1935 he was appointed general manager of WONS Hartford, and in 1944 became general manager of WELI.

RCA and NBC's Connecticut Test Indicates Greater Vistas

distances than were first thought possible. The Bridgeport signal is being clearly picked up in Port Jefferson, Long Island, 20 miles away. An antenna on the RCA Building in New York City, 50 miles away, is also receiving the station.

In the latter case, the antenna height is the answer to the reception, but the clarity demonstrates a lack of rumored ghosts and variances supposedly associated with

UHF. In any case, the average community is seldom more than 10 square miles in area, thus UHF provides the answer to community television—perfect reception in the primary area.

Since UHF will be more of a community project, we look for greater goodwill and greater sponsor identification and support. The proximity of other UHF stations

SELL FURNITURE BY TV BAB Gives Tips

FURNITURE DEALERS are apt to be more receptive to television as an advertising medium than most retailers, BAB's first television Retail Information Folder told video station sales forces. The folder was mailed to stations fortnight ago [BROADCASTING, Jan. 30].

Designed to supply station salesmen with ammunition, the folder is devoted entirely to furniture. Copyrighted by NAB, BAB's parent, it carries a January date and is the first of a series of monthly

releases on various industries.

In explaining the receptivity of furniture men to video, the folder says:

"The furniture dealer has already been sold on television . . . more than any other type of retailer . . . because a good part of his revenue in most cities comes from the sale of TV sets. He can see first hand the public reaction to television. He knows, almost before anyone else, the scope of public interest by the number of

sets being sold to his customers."

The point then is made that the television set, which itself is being successfully sold by television, has created a demand for new types of furniture — swivel chairs, corner tables, mobile furniture. The suggestion of selling both the sets and accessory pieces via TV should be presented to the retailer-prospect, the folder advises.

Among other suggestions made in the folder:

- Find out the local members of the National Retail Furniture Assn. and tie in with their nationally scheduled promotions.

- Women's programs can be especially effective for retail furniture sponsorship. NRFA has recommended such shows to its members.

- Sell furniture retailers on the value of TV in pulling up the "valleys" in their sales curves, pointing out that when furniture sales are low (during the early months of the year) . . . TV viewing is high.

The stations are then advised to use success material to show the furniture retailer that television will sell furniture. The folder gives one example of a success story—Castro Furniture Co., New York, manufacturer of hide-away beds.

Starting with one one-minute film spot on one station in 1948, Castro now buys \$800 worth of video time weekly on four New York stations. During the same period, the company expanded from one to four floors, attributing most of the rapid growth to TV.

(Continued on Telecasting 34)

TV'S GROWTH IN '49

By BRUCE ROBERTSON

DURING 1949 commercial television more than doubled the number of stations in operation—from 41 on the air in December 1948 to 98 a year later. The number of market areas whose residents received program service from these stations in the same period increased from 23 to 57. And gross TV time sales rose, according to TELECASTING estimates, from \$8.7 million in 1948 to \$24.75 million in 1949 [BROADCASTING, Jan. 23].

An overall picture of last year's growth of commercial television may be obtained from a study of the monthly Rorabaugh Reports on Television Advertising. Based on data provided by the TV stations and networks, these reports list the network, spot and local TV advertisers, the products advertised and the programs or spots used to convey those sight-and-sound advertisements to the television audience. These records are not absolutely complete, as not all stations report every month, but they are complete enough to give a reasonably accurate picture of the development of video advertising.

While full lists of the network and spot advertisers on television during 1949 are printed elsewhere in this issue (the network list starting on TELECASTING 9, the spot list on this page), the year's growth is summarized in the tables on this page, comparing the records of the final month in 1948 and in 1949.

Table I, analyzing television's network and spot advertisers by product groups, shows that the number of TV network advertisers rose from 37 in December 1948 to 72 in December 1949. In the week of Dec. 5-11, 1948, 41 stations reported 211 spot advertisers. A year later, Dec. 4-10, 1949, 89 sta-

tions reported 416 spot advertisers. The changes in rank order of the various product classes perhaps provide an indication of the eventual pattern of TV as an advertising medium. Or it may merely indicate that this new medium is still in a state of flux. Certainly, the December 1949 rank order is quite different from that of a year earlier.

Among network advertisers in December 1948, radio and video set manufacturers ranked first, as against a tie with automotive companies for third place in December 1949, when foods were first, as against second place the year before. Smoking materials—cigarettes, chiefly—ranked second in the network list in December 1949, with toiletries and gasoline and motor oil tied for fifth place. This is reasonably close to the rank order of the various product groups on the radio networks.

Food Advertisers High

Food advertisers also topped the TV spot list in December in both 1948 and 1949. In the final month of 1948, apparel advertisers ranked second, beer and wine third, household equipment fourth and radios and TV sets fifth. A year later, beers and wines had moved up to second place, with household equipment third, candy and soft drinks fourth and toiletries fifth.

A different sort of analysis is offered by Table II, which compares the number of accounts—network, spot and local—using video time in each of the country's TV markets during the final month of 1948 and of 1949. In the network list, each sponsored program is considered as a separate account, so that an advertiser with two network TV shows is counted twice. In the spot and local-retail lists, each product campaign is considered to be an account.

The more than doubling in the

Sales, Outlets, Markets More Than Double

number of cities with TV service during 1949 is naturally reflected in the distribution of business among these markets. New York, which ranked first in number of total advertisers in December 1948, had dropped to fourth place by December 1949, despite an increase in TV accounts from 179 to 242. Los Angeles, which ranked sixth in December 1948, with 59 accounts on its three stations, a year later was in first place, with 325 accounts on the seven stations now providing TV service in that area.

Philadelphia, which ranked second in number of TV accounts in December 1948, dropped to third a year later, being passed by Chicago which had ranked only seventh the previous year. Baltimore meanwhile dropped from third to fifth place among all TV cities.

When the network, spot and local accounts are considered separately,

the relative city standings are even more varied. New York and Philadelphia were tied for first place in number of network accounts in December 1949, with Chicago third. New York also led the spot list, with Chicago second and Los Angeles third. Los Angeles, first in number of local TV accounts by a more than two-to-one margin over second place Chicago (202 to 89), ranked no better than 21st on the network list, lacking cable or relay connections with the east where most of today's TV network programs originate.

A month-by-month analysis of the number of TV markets and stations supplying data for the Rorabaugh TV reports since their inception in June 1948, showing also the number of network, spot and local accounts reported each month, is given in Table III.

Table III
REPORT ANALYSIS

Editorial

Today's Text

AN ERUDITE observer of the TV scene sums up the allocations dilemma this way: "It comes, I think, to this: The FCC is holding up the development of the monochrome television service whilst it tries to decide whether or not industry is holding up the development of the color television service. See Matthew VII:3."*

*"And why beholdeth thou the mote that is in thy brother's eye, but considereth not the beam that is in thine own eye?"

Figures Don't Lie, But—

BEST INDEX to the amazing strides made by television in the past few months is the weekly set summary published on our TELESTATUS page. Current tabulations show the number of receivers in operation is over the four million mark.

This is an important figure—this total number of sets in actual use in the United States. It is the circulation denominator of the medium. From it an advertiser can compute the number of viewers in any given market.

Because of its importance it is imperative that this figure be accurate and impartial.

There is today lack of uniformity in the methods of computation. In many markets, such as Washington and Baltimore, the set count is accurately estimated at regular intervals by an independent and unbiased committee. The reports are figured on the basis of distributors' and dealers' sales, on power company estimates, and are often audited by periodic coincidental telephone surveys. Such a check recently by WTMJ-TV Milwaukee showed the percentage of error on the station's calculations as only .3 of 1%.

Then there is the other extreme—the station where management is so concerned with an attractive set census figure that they throw accuracy to the winds. Such a short-sighted policy usually backfires.

Television badly needs a standardized and practical formula which can be applied in every market where a station is in operation. No cumbersome and expensive machinery is necessary—merely a set of standards which can be adhered to by each reporting agency so that clients can have faith in the results.

The need is a challenge to telecasters. It necessarily means teamwork among competitors. But, in the end result, it will bring confidence in the integrity of TV's vital statistics.

TV Taste

IT IS NOT a fanciful exaggeration to report that unless measures are taken to prevent repetition of recent lapses in program standards, the television art is inviting trouble.

Without identifying specific instances of questionable presentations, it can be remarked that their number is enough to warrant concern. Responsible telecasters will have to take serious notice of the condition.

Counteraction might lead to hamstringing creativeness. It can be avoided if individual telecasters are willing to discipline themselves.

Good taste is hard to define in a paragraph. Perhaps it can be said that a good way to judge the acceptability of a program is to remember that the television audience is not ten rows of bald heads at Minsky's, a table of tipsy celebrants in a saloon or a theatre full of sophisticates. The television audience is a family in a living room.

Frostbitten

JUST 14 MONTHS ago TBA met in annual convention in New York to chart the course of the fastest moving object since science learned to measure the speed of light. Then the FCC's freeze on TV allocations was less than three months old. It was to be thawed in six months—there was hope it would be done not later than February.

Another whole year has elapsed since that target date. And, from all outward appearances, the only way the video ice-jam can be broken in the foreseeable future is by legislative blasting.

Much has transpired since the FCC, on that eventful September day, decided it would redo the admittedly faulty TV allocations to catch up the errors in separation and to open new bands which would make possible a "truly nationwide" competitive service.

Actually that which has happened is mere side-show. The main event isn't even definitely booked. The FCC was diverted into color-TV. It did not want to see the public mulcted into buying prosaic black-and-white receivers when color might be just around that corner.

But the amazing thing is that the public doesn't seem a bit concerned. Wherever people are exposed, whether by coaxial cable, by microwave relay or by kinescope-recording, they clutch TV to their bosom. Even with a freeze, and with less than 100 stations on the air in 58 markets, 4,000,000 receivers have been sold to the tune of about \$1 billion.

When the TBA last met there were 41 stations on the air and fewer than 700,000 receivers. Under existing authorizations, there can be only 111 stations—all authorized prior to the freeze and of which 99 are on the air.

Yet TV is expected to double its set population in 1950, with output expected to reach 4,000,000 units. The price trend is down, and color or no, the public has indicated that it will buy TV if signals are within eyeshot.

Solutions galore have been proposed. The Commission has seldom, if ever, been called upon to handle a hotter issue. It is under the gun of the Senate Interstate & Foreign Commerce Committee, which has ensconced itself as a sort of super-FCC. And now the House Committee is seeking to muscle in, evidently under the tutelage of some of the FCC's own legal minions.

It is still our view that if the FCC thawed the freeze, a substantial number of the 333 pending applicants would drop. Where there are conflicts hearings must be held anyway. No decision will be reached on color standards until comparative showings and the rest of the color hearings are out of the way, which probably won't be until spring, and the decision itself may come much later.

It seems obvious, moreover, that the six-megacycle channel width will be adopted for color as well as black-and-white. There remain the precise standards to be adopted. Certainly the public isn't being gypped when people snap up TV receivers as soon as service is available.

Those willing to risk capital should be accommodated. If additional VHF channels become available through realignment of frequencies now occupied by government immediately adjacent to the present band, the law of supply and demand will take over. If the UHF is workable, there will be bids for its use.

A mere 111 stations in 70-odd markets aren't going to provide "truly nationwide service" or permit development of competitive networks.

TV can't wait for a "planned economy." If sound broadcasting had waited for the Government to devise model allocations through service prefabricated for every trading area of the nation, the gooseneck speaker and three-dial tuning probably would still be in vogue.

A Richmond Radio Pioneer Leads the Way in TV

RICHMOND gave birth to telecasting—broadcasting's giant baby—at WTVR (TV) on April 22, 1948. In a few months from now, WTVR will be two years old, and Virginia's only television child promises to break into the profit column before the year's end.

It's not surprising that perhaps the greatest electronic feat in history was introduced to Virginians by a radio pioneer and maker of broadcasting history in the home state of the Presidents.

WTVR's interest in television antedates more than a decade. As early as 1939 when television was less than an infant, Wilbur M. Havens, owner and founder of the station, joined an RCA engineer in TV tinkering at Atlantic City.

Even in those days, Mr. Havens had visions of presenting this new sight and sound offshoot of broadcasting to Old Dominionites, who traditionally are quite addicted to historic events.

This is the same Wilbur Havens, holder of a first class engineer's license since 1925, who built Havens & Martin Inc.'s AM station's (WMBG) first transmitter on his kitchen table one year later. Mr. Havens also is president and general manager of WCOD (Capital of Old Dominion), Virginia's first FM station, which he helped place in operation in October 1946 with a radiated power of 47 kw. WCOD maintains an 18½ hour per day program schedule, offering separate and duplicate programming with WMBG.

On April 26, 1944, Havens & Martin filed an application for a television station in Richmond. This statement of intentions soon started the city talking when a public announcement was aired over WMBG and full page newspaper ads saluted the advent of Virginia's first TV outlet. Mr. Havens in that year let it be known, in no uncertain terms, that the former capital city of the Confederate States had its video future planned.

With an eye focused on untold possibilities foreshadowed by the new media, Mr. Havens in 1944 said:

"Of all post-war developments promised, by progress, in the art of science and radio, television shows the greatest opportunity. Television will open a new era of broadcasting entertainment, information and education to the home. Furthermore, it will be a development of great economic and social significance to labor, industry and government.

"In the immediate post-war era, NBC will deliver sight and sound television programs of the world's best entertainment, sports events

and educational features to you in Virginia and Richmond through the medium of WTVR's television transmitter.

"I promise you the best in television of the future, even as WMBG listeners will receive the best in radio today."

* * *

ABOUT two years later, on May 16, 1946, Richmond's stake in post-war video was assured when WTVR's construction permit was granted. It was the first TV grant in Richmond and in the state, and one of the first six TV grants in the nation.

From that time on, it was literally 18 hours per day devoted to the station's construction. The transmitter building, which houses AM, FM and TV facilities, had to be more than doubled in size, a television studio had to be completed and a film projector and control room constructed and equipped. Associated circuits and equipment were to be installed for permanent use. In order to fulfill the promise made the people by Mr. Havens, continuous research was conducted to assure the finest in services. Today, the station's studio building stands as a remarkable architectural as well as broadcasting unit. It was voted one of nine most noteworthy examples of modern architectural designs by *Architectural Record*.

Pre-"T-Day" preparations were carefully and intricately keyed to public information. An aggressive educational and promotional TV campaign featuring periodic reports via radio and newspaper kept residents posted on WTVR's progress.

Several months before the approach of "T-Day," an elaborate series of television manufacturer, distributor and dealer meetings were held in the station's auditorium. These served to educate the set handlers in all phases of merchandising and public service, thus paving the road for the smooth flow of receivers to consumers once the debut date was announced.

Finally, with the announcement of "T-Day," the heavens nearly broke with promotional rain in Richmond. Radio, direct mail, newspaper, posters, traveling news signs, counter cards and window space blanketed the eastern section of the Cavalier State for two straight weeks. When the storm subsided, WTVR made its debut with an inaugural program extending from 7:30 p.m. to 12:15 a.m. On the program were the state's governor, the mayor of Richmond, WTVR and NBC officials and other representatives and dignitaries from the industry. Bulk of the programming consisted of live studio productions.

Over 2,000 people were invited to look over the studios during the evening. TV dealers in the city held open house and capacity crowds caught their first glimpses of video. Initial programming by the station was two hours in the evening, 7:15 to about 9:30, Tuesday through Sunday, and made up principally of live studio shows.

* * *

ANOTHER landmark for WTVR was reached in June 1948 when the station linked with the NBC-TV Network and coinci-

dentally became a pioneer NBC interconnected affiliate. It was this month that the station presented a complete coverage of the Republican National Convention. That day, June 23, WTVR was on the air from 9 a.m. to 3:09 a.m. A month later, the station carried the activities of the Democratic National Convention.

Set distribution in the WTVR area has increased 20-fold from 1,000 sets in 1948 to nearly 21,000 today. These figures show that Virginians are becoming more and more video-conscious.

WTVR has come a long way since its first thrust into commercial television. Now the station operates an average of 42½ hours weekly. Minimum operating schedule is 5-10:30 p.m. Network programs occupy periods of from 5-6 p.m. and 7-10:30 p.m. with local programming confined to the 6-7 p.m. hour and/or before 5 p.m. At present, there is a total of 82 commercial accounts on WTVR with the breakdown showing the network placing the greatest chunk (46), with local (21) totaling greater in number than national (15).

WTVR's policy, the station states, "is to provide the viewing public with not only the first but the finest which television has to offer." In conjunction with this theme, Mr. Havens has added his belief that plans in this new art must be flexible and geared for adaptation to the rapid pace that this giant baby is setting.

A quick look at programming gives a somewhat clearer idea of the quality and flexibility that is the established WTVR tradition.

* * *

OF the more successful commercial shows, WTVR cities eight programs, each of them local. This double-stamps the station's enterprise in video programming in a non-competitive TV area.

Continuous mail response was received from a pre-Christmas show last December that was locally produced. Called *Santa Reads His Mail* and telecast Monday, Wednesday and Friday from 6-6:30 p.m., it featured Santa reading mail sent in by the kiddies and Mother Claus, who assisted in the chores and recorded the names of the children. From one announcement prior to the initial program, Santa received 246 responses. The amount of mail he received in the first two weeks exceeded 2,500 pieces. Nolde Bros. Bakery sponsored the program.

The other seven programs encompass the field of entertainment and education. *Sports-light* is shown three times weekly from 6:45-7 p.m. It features the station's sports commentator, Jack Lewis, who presents sports resumes together with interviews of personalities. Its drawing power is attested by sponsorship by a local brewer for more than a year.

Question hunters in the vicinity tune in on *Viz-A-Quiz*, sponsored by Rockingham Clothiers. Two civic clubs match wits weekly with the cash prize a donation to the winners' favor-

* * *

STUDIO (r) and transmitter facilities for WTVR are housed in the same buildings with the station's sister AM and FM operations.

Mr. HAVENS

* * *

ite charity. Questions are of visual nature. This show is presented 15-minutes weekly.

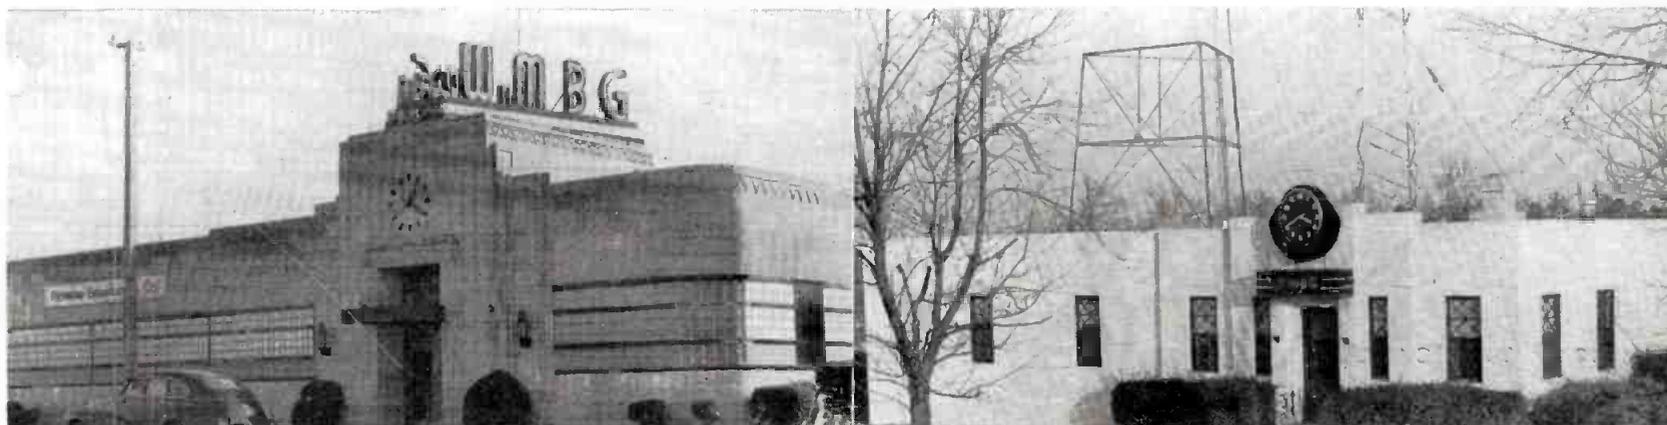

A public service type program is offered viewers in *Richmond Roundtable*, which is presented from 6:30-6:45 p.m. each Friday. Outstanding public officials, dignitaries and civic leaders are provided a forum to express their opinions on important current issues. This program has stimulated state-wide interest and has included members of the President's cabinet, the state's governor, the city's mayor, state departmental heads and leaders of business and industries.

For the women's taste, *Woman's Video Journal*, with Jerry Lane, WTVR women's commentator presiding, gives culinary hints, fashions and interviews with local feminine personalities. This is aired 6:30-6:45 p.m. each Wednesday.

A liting format typifies three musical shows, *Dude Ranch*, *On Wings of Song* and *Swinson Brothers Quartette*. Each program has one thing in common in being a WTVR (TeleVision Richmond) production. The *Ranch* show fills the Saturday evening 6:30-7 p.m. slot with western musical stylings complete with ranch settings. The *Wings* program, 6:45-7 p.m. on Tuesday, a relatively new feature, presents easy-on-the-ear piano selections by Pianist Everette Seay and vocal renditions by local artists. This program is beamed for TV showing since no spoken audio chops the program. All announcements are presented via video slides over appropriate musical bridges. The *Quartette* program completes the musical show trio. On this program, presented Tuesdays, 6:45-7 p.m., the rendition of songs of the Southland, another Virginia tradition, has attracted wide and faithful audiences.

WTVR has compiled special programming achievements highlighted by the National Convention relays. Visual events, some of them

EVERYTHING IN LIGHTING.

Incandescent Lamp Bank, Type TL-5A

The standard 12-lamp light source for normal studio operation. Ideal for slow fades. Provides equal light distribution on "douses." Maximum load per circuit, 3 kw; Per unit, 6 kw. Single cast aluminum-grille construction. Rotates 360 degrees. Tilts 170 degrees. Noiseless controls.

Rotatable Lamp Mount, Type TL-15A

With extension bars for mounting individual or multiple flood lamps. Control spindle can rotate 360 degrees—tilt 170 degrees about the point of support.

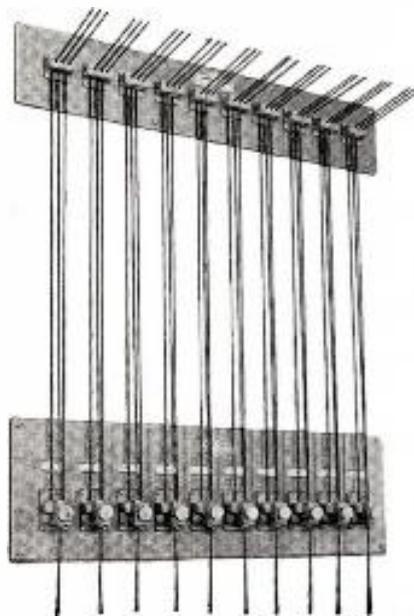

Fairleads, Type TL-32A

A practical way to guide mechanical control lines to control board without noise. 170-degree tilt and 360-degree angle of rotation around its point of support provides maximum flexibility for mounting anywhere. Equipped with quick-release gridiron clamp. Nine chromed bushings reduce control-line friction.

High-Intensity Light Dolly, Type TL-26A

The ideal mobile floor unit that puts high-intensity side illumination where you want it. Uses the TL-1A High-Intensity Fluorescent Bank. Rotates the bank from horizontal to vertical position; tilts it through 90 degrees. No high-voltage floor cables, because lamp ballast is right on the dolly.

Light-Control Panel, Type TL-31A

Includes ten headlocks and ten rope locks for controlling ten light banks. Available in single units or on ready-to-operate panels, as illustrated.

Spot-Light Fixtures, Type TL-10A—TL-11A

Standard control spindle for use with a Mole-Richardson or Oleson 2-kw Solar Spot, or a 750-watt Baby Spot. Rotates 360 degrees. Tilts 170 degrees about its point of support.

FOR TV STUDIOS...

New silent-control lighting equipment enables you to "tailor" the lighting system to fit your studio—correctly, without expensive experimenting.

AVAILABLE for the first time—a complete line of studio-tested lighting equipment from a single manufacturer. Available for the first time—packaged studio lighting systems to match the response curves of modern studio cameras.

Combining high-intensity fluorescent banks, high-intensity spots, and incandescent banks for handling any studio set-up, RCA lighting systems are capable of delivering more than 200 foot candles of light energy. All lights can be rotated 360 degrees horizontally and 170 degrees vertically. All lights are designed for pyramid-mounting on studio ceilings. All lights are mechanically controlled through silent-operating fairleads that terminate in a central control board.

With this lighting equipment you can swing each light for basic work, modeling, or back lighting. You can direct each light to more than one acting area. You can "dim" by tilting, rotating, or cutting off half banks—and without upsetting light distribution. All equipment and wiring is off the floor. No ladder hazards or expensive catwalk installations. No danger of burning artists or technicians.

Here is the system that delivers correct illumination with as little as two-thirds to one-half the usual amount of equipment—and with proportionate savings in power. No more experimenting for the individual studio. No more junking of extensive lighting installations.

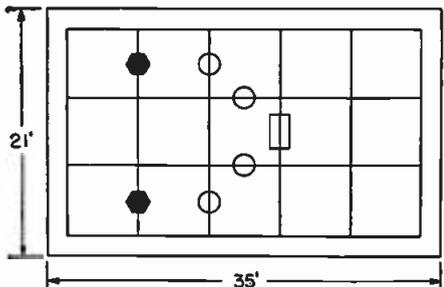

For help in planning your studio lighting—correctly—simply call your RCA Broadcast Sales Engineer. Or write Dept. 19BA RCA Engineering Products, Camden, N. J.

High-Intensity Fluorescent Bank, Type TL-1A

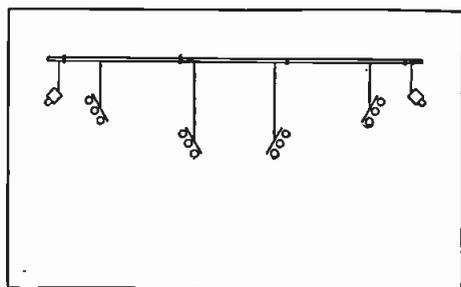

Assures optimum light response from TV studio Image Orthicon cameras. Uses six 3500-4500 Kelvin slim-line tubes. Only 600 watts connected load. Includes noise-free, double-rubber cushioned, built-in ballast units; heavy-duty jumper cord connections; instant start high-voltage striking circuit. Uses pre-focused individual alzac parabolas. Rotates 360 degrees. Tilts 170 degrees. Noiseless controls.

TYPICAL TV STUDIO-PROVED FLOOR PLANS AND CEILING ARRANGEMENT FOR RCA LIGHTING SYSTEMS

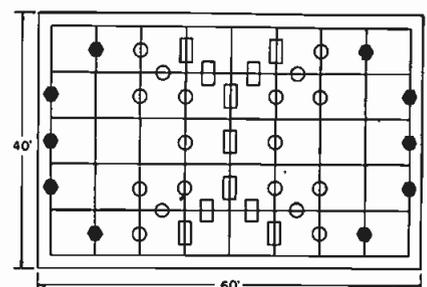

For a small Interim-type studio, 21 feet x 35 feet. This plan more than meets the minimum lighting requirements of 200 foot candles and a contrast range of 2-to-1.

- | NO. REQD. | SYMBOL |
|---------------------------------|--------|
| 1 HI-INTENSITY FLUORESCENT BANK | □ |
| 4 INCANDESCENT FLOOD-LITES | ○ |
| 2 CONTROLLABLE SPOT-LITES | ● |

Cross-sectional view of a TV studio, showing RCA's inverted pyramid-type of lighting. This system delivers unobstructed light to every point in the studio.

For the average-size studio, 40 feet x 60 feet. This plan more than meets the minimum lighting requirements of 200 foot candles and a contrast range of 2-to-1.

- | NO. REQD. | SYMBOL |

3 great ABC-TV shows

for sale

Your TBA chairman, Charles "Bud" Barry (ABC's VP in Charge of Programs), developed the shows on this page. They're all good examples of the kind of entertainment-wise, budget-wise programs that Bud and his Boys are coming up with for ABC's television clients.

Super Circus... a fabulous, thrill-packed full hour under the Big Top. The biggest thing for small fry on television! (First half-hour sponsored by Canada Dry). Every Sunday afternoon at 5:00 pm (EST).

That Wonderful Guy. Here's lively, likable comedy for all the family, featuring a brand-new, sure-fire television star, Jack Lemmon. He's great! With Cynthia Stone, Neil Hamilton. Wednesdays, 9:00 pm (EST).

Paul Whiteman TV Teen Club offers an unbeatable combination: a full hour of sock entertainment... a real public service to youth. Saturdays, 8:00 pm (EST) (Second half-hour to be sponsored by Griffin Mfg. Co.).

"To fly anywhere in the world, fly Eastern." Dan Sinkler, Eastern Air Lines official, gives the pitch to Lee Jordan and Jim Bridges who handle Eastern Air Line's daily news.

WSB-TV's sports program is one of the nation's stand-outs. Georgia Tech home games (with Kentucky, above) are exclusive with "The Eyes of the South." General Electric and Hotpoint sponsor the series.

Now over a year old, original WSB-TV "Woody Willow" puppet show has biggest juvenile audience of any television show in Dixie. Standard time units, or spots, are available for sponsorship. Ask about it.

local impact

has made the Atlanta area one of America's more desirable television markets

The advertiser, whether national or local, primarily is interested in only one thing. And that is *the local impact his message makes.*

We at WSB-TV, likewise, have one primary objective. Which is *delivery of that local impact.*

The WSB-TV formula for building local impact does not vary. The method: intense programming on the local level . . . integrated with outstanding national productions.

Circulation growth in the Atlanta television area, and viewer loyalty to WSB-TV prove the effectiveness of this formula. Ask your nearest Petry man for the facts.

WDTV

PITTSBURGH'S WINDOW ON THE WORLD

THE NATION'S EIGHTH MARKET AREA

● WDTV—Pittsburgh's Only Television Station

Picture for Yourself

Picture for yourself the potential WFIL-TV's *special* delivery opens up for you.

SPECIAL because WFIL-TV offers top coverage in the world's second largest television market—nearly 4,207,000 people in 17 buying counties.

SPECIAL because the Philadelphia market's 266 receivers per thousand families represent the highest concentration of television sets in the Nation.

SPECIAL because WFIL-TV's primary coverage area includes cities like Allentown, Bethlehem, Reading, Wilmington and Trenton, in addition to the Philadelphia-Camden heart of the Nation's Third Market.

And **SPECIAL**—especially—because *results* show that dollar returned for dollar spent, WFIL-TV is your best buy in Philadelphia television.

Consider all these things. You'll see. You'll agree. WFIL-TV delivers the picture for yourself.

THE BOSTON TELEPULSE

will be published on February 25, 1950, and monthly thereafter. Each report will cover a full week's tele-viewing from 12 Noon to 12 Mid-night. Each daily ¼ hour rating will be based on 150 television homes (Monday-Friday ratings on 750 Homes).

OTHER available TelePulse mate-rial includes monthly reports in:

- CHICAGO
- CINCINNATI
- LOS ANGELES
- NEW YORK
- PHILADELPHIA
- WASHINGTON

THE Multi-Market TelePulse gives weighted ratings of network pro-grams in these cities, and is also issued monthly.

For information about these and other Telefacts . . .

The Newsweekly of Radio and Television

READ

by more agency-
advertiser executives
than any other
radio or TV journal

Only BROADCASTING brings together the week in radio and TV. Spot news—largely unduplicated elsewhere—new business, agency-advertiser personnel changes, program, promotion ideas, talent news and costs . . . all easily read and quickly grasped.

ADVERTISERS read BROADCASTING—to know everything that will make their radio-TV advertising more productive, more economical.

ADVERTISING AGENCIES read BROADCASTING—to do a better, more complete job for their clients.

STATIONS, NETWORKS, SERVICES read BROADCASTING—to learn quickly and reliably what is happening, week by week, in their business.

9/6 YOUR business concerns radio-television you need BROADCASTING-TELECASTING—the only authentic reporter of every significant development in the field of mass radio communications.

BROADCASTING TELECASTING

NATIONAL PRESS BUILDING

WASHINGTON 4, D. C.

VIEWING of television tends to be a "complete attention" activity, according to results just released of a study of household activities of men and women during evening hours conducted at the Dept. of Speech, Ohio State U.

The study was made under the supervision of Buren C. Robbins, graduate student in radio programming. It was based on 6,842 attempted telephone calls to Columbus homes between 5:30 and 10 p.m. last Oct. 31-Nov. 4.

Prof. Harrison B. Summers, of the Dept. of Speech, commented that the study appears to indicate that if television is to be used as widely as radio during evening hours, some major adjustments in listeners' work schedules may be necessary.

In surveying Columbus evening activities, the group of radio programming students completed 70% of calls, obtaining data from 1,670 men and 2,971 women. These basic findings were cited:

1—Television viewing tends to be a "complete attention" activity; 85% of the men and 75% of the women television viewers were "doing nothing else" but watching television at the time of the telephone call.

2—Radio, on the other hand, is largely a divided-attention activity; of men and women who were listening to radio programs, only about 30% were "just listening to the radio" at the time the telephone rang, while the remaining 70% were eating meals, reading, dressing, or doing housework of various kinds.

3—Assuming that television continues to be a "complete attention" activity, the amount of time which may be devoted to television viewing per evening will be considerably less than that now given to radio listening, since the "complete leisure" time of men and women interviewed amounts to only one-fifth of the total time between 5:30 and 10 p.m., and other leisure activities, such as talking or visiting with others, playing cards or reading, account for only another 35% of evening time. Approximately 45% of all evening time is spent in various non-leisure activities most of which could not be carried on by television viewers.

A survey of daytime household activities, conducted last spring under Prof. Summers' direction, showed radio sets were in use in 31.6% of Columbus homes [BROADCASTING, June 6, 1949].

In the evening study, it is pointed out, data was obtained by telephone and represents only telephone families. Furthermore, information was obtained only on weekday evenings and omits talking on the telephone as an activity.

The use of television and radio by men and women in various non-listening activity groups is shown in the following table (figures in first column show minutes per evening devoted to non-listening ac-

tivity indicated; those in other columns give percentages of men or women in activity group who were using television or radio):

	Min. Per Eve.	Saw TV	Heard Radio
Men—who were			
"Just resting"	57	24.6%	64.4%
Reading books, newspapers	66	0.5	40.8
In other leisure activities	36	2.4	29.9
Eating meals, etc.	29	1.8	32.7
Working in kitchen	22	1.2	40.8
Doing other work	60	0.3	26.6
Women—who were			
"Just resting"	53	23.9	64.4
Reading books, newspapers	54	0.8	38.6
In other leisure activities	35	3.6	27.4
Eating meals, etc.	24	3.1	33.9
Working in kitchen	33	2.1	37.0
Doing other work	71	1.3	40.6

Total Markets on Air 58;		Stations on Air 99;	Sets in Use 4,056,234

* Lancaster and contiguous areas.

Editor's Note: Sources of set estimates are listed for each city as available and since most are compiled monthly some may remain unchanged in successive summaries. Total sets in all cities surveyed is necessarily approximate since two areas may overlap. To offset this there are many scattered sets in areas not included in the survey.

New Rate Card For ABC-TV

ABC announced its television rate card No. 3 Jan. 27 with these major changes: Class C time reduced to 50% of Class A rate instead of 60% as heretofore for period from 10:30-11 p.m. Local time seven days a week made Class A instead of Class B in the hour from noon to 1 p.m. Local time Saturdays and Sundays dropped from Class A to Class C; total rate for 52 ABC-TV stations for 30 minutes of Class A time on 52-week basis set at \$11,003 compared with former rate of \$6,285 for 35 stations. Rates became effective Jan. 15.

'Depth of Penetration' Surveyed by WTMJ-TV

LANCASTER, Pa., a single station market, led all other cities in a "Depth of Penetration" survey released by WTMJ-TV Milwaukee.

Other single station markets in the top 10 include Milwaukee sixth; Schenectady, eighth, and Buffalo, tenth.

The "Depth of Penetration" is defined by the station as the number of television sets per 1,000 families and is based on Jan. 1 set figures. The complete list as compiled by WTMJ-TV follows:

Area	No. Receivers per 1,000 Families	Position	Dec. 1 1949

Pittsburgh Video Set Owners Surveyed

TELEVISION set ownership has almost doubled in the Pittsburgh area in the last three months, according to Guide-Post Research, which has just surveyed 1,523 families within a 20-mile radius of the city.

The survey, conducted in the first two weeks of January, found

How to Increase Your Audience (And Revenue) With Film

IN city after city, Hooper and Pulse ratings record phenomenal audiences for film programs.

The films that are building up these phenomenal audiences are mostly Westerns and Mysteries.

If you want to tap this tremendous audience potential *you should get in touch at once with Associated Artists Productions, Ltd.*

Associated Artists Productions, Ltd., has the largest catalog of Hollywood-produced-film for television.

These are the films that are breaking audience rating records!

The films distributed by Associated Artists Productions, Ltd., are tailored for salability. They are properly timed for program spotting. They will mean more revenue for you.

Send for our catalog today!

SHOP BY TELEVISION
 With Ruth Crane, Jackson Weaver
 30 Mins., Tues., 7:30 p.m.
 HECHT CO.
 WMAL-ABC, Washington

This is a "first" for this town, and possibly for the country, in TV retail merchandising. Now beginning its third month, the program has so pleased its sponsor, the Hecht Co., large department store here, that, after five weeks, it was expanded from its original 15 minutes to a full half-hour.

Unusual gimmick of the show, offered as a "shopping service," rather than entertainment, is that merchandise displayed on the program is actually bought during and immediately after the telecast. A trio of eye-filling models appears on the set taking phone orders and opening charge accounts, and the ringing of the telephone bells is audible to the TV audience, thus adding authenticity as well as undoubtedly serving to lure other shoppers.

Format of the program is fairly conventional, with Ruth Crane, director of Women's Activities for WMAL-TV, conducting the show, while her announcer, Jackson Weaver, doubles as funnyman and stooge. The articles displayed are plugged by Miss Crane, with an occasional wisecrack from Weaver, and usually has the added interest of live models to display the wares of the evening. At sponsor's insistence—they have sole say in selection of merchandise offered for sale on the program—the accent is on low cost items. This tends to slow the program at times and keep it from the glamor of certain high-priced articles, like women's fashions. On the other hand, there is no question that, because of it, sales are consistently lively and the weekly take more than warrants cost of the show.

Miss Crane, an accomplished emcee and thoroughly hep to the femme angle in radio and merchandising, keeps things rolling even under the handicap of lack of variety, as in last Tuesday's (3) program, when a succession of face creams grew monotonous. She televises extremely well, and should impart her secret of successful video makeup to others in the field. Weaver's bids for laughs are not always successful, but there's no question that his role on the show can be developed into successful backgrounding. The pair work well as a team, for they've been at it a long time.

The idea for the show, which was dreamed up by the station, is a slick one and a natural for video. The prospect of cramming the channels with too many of them would be a frightening one, but, in moderate doses, it's something different and quite viewable.

Love.

 WASHINGTON, D. C.

Hint Pays Off

CONVINCED of TVs selling power is Ed Bowman, general manager of Enoch Chevrolet Co., South Gate, Calif. Participating sponsor in the Friday night telecasts of wrestling matches from Ocean Park Arena on KECA-TV Los Angeles, he was interviewed recently between matches and dropped a hint that potential auto buyers could save the Los Angeles city tax by purchasing their new cars in his community. In ensuing 48 hours over 5,000 persons jammed Enoch Chevrolet showrooms. Ten bought the cars he had in stock. Gratiified salesmen also got 49 orders for future delivery of cars.

WJAX-TV PLANS

FCC Proposes Time Extension

RECOMMENDATION that the City of Jacksonville, Fla., be allowed additional time to complete construction of WJAX-TV was made by FCC Hearing Examiner Jack P. Blume in an initial decision issued last Thursday. WJAX-TV would be operating within six months of final extension approval, it was found.

Examiner Blume, who presided over FCC's hearing to determine whether Jacksonville had been diligent in prosecution of its permit, said the record showed:

"The delays... are not attributable to any preconceived plan on the part of the applicant to 'stall' with the object of reserving a channel to some indefinite future date when it would be considered prudent to construct." Rather, he concluded, "the delays are traceable to honest mistakes in judgment and an overly cautious, but understandable, approach on the part of the city officials of Jacksonville to its fiscal affairs, and in particular, towards the spending of public monies before adequate financial arrangements have been completed."

Permit for WJAX-TV was issued by the Commission in August 1948 with requirement that the station be on the air in April 1949. The extension request filed in March last year was the subject of FCC's hearing. Examiner Blume found that Jacksonville obtained permission from the state legislature to issue \$300,000 worth of revenue certificates to finance the TV station and these certificates were to be repaid from earnings of the city's WJAX, AM outlet.

However, city officials considered this amount insufficient to also meet initial operating losses and sought to amend the plan, the initial decision said. Later it was discovered the statute approving issuance of the certificate made no provision to include operating expenses. Funds for the latter are now available.

The decision further noted that construction of WJAX-TV already is underway, that a manager has been selected and other plans made.

FILM PRODUCERS

3% Sales Tax Poses Problems

TELEVISION film producers in Hollywood are facing a complex problem in working out the 3% sales tax recently imposed on their products by the California State Board of Equalization.

Objecting to application of the tax, it is expected that wholesale protest will be made. Film producers and distributors want the Board of Equalization to clarify the many ramifications involved and "work out a fair solution."

Spot announcements and any other length commercial film shot before last June 30 is being assessed 2½% of advertisers purchase price. The 3% tax is on footage filmed and sold to or made for sponsors since that date.

It was pointed out that there are thousands of completed product on the shelves which have changed hands several times and also that many of the original producers are out of business. Under the Board of Equalization setup, back tax is involved. In many instances present owners of these commercials will have to collect back tax from advertisers who used the film on TV or pay out of pocket.

Producers declare that although legally liable, many advertisers and their agencies who bought film refuse to pay because they weren't billed assessment at time of sale. It was further pointed out that many advertising agencies up to now hadn't heard about the new application of the state sales tax and will have to collect back from their clients, thus adding further confusion.

NBC-TV Signs WTTV

WTTV (TV) Bloomington, Ind., was announced last week by NBC-TV as the network's 59th television affiliate. The station also is an affiliate of ABC-TV, CBS-TV and DuMont Television Network.

WSB COLORCAST

To Air Hospital Assembly

WSB-TV Atlanta, Ga., is to telecast in CBS color today (Feb. 6) the opening ceremonies of the Atlanta Graduate Medical Assembly from Grady Hospital. Transmission will be on WSB-TV's regular Channel 8 (180-186 mc) and is claimed to be the first colorcast south of Washington using standard monochrome equipment.

The Atlanta Journal outlet on Tuesday evening will present a special closed circuit color program to an invited group of some 600 prominent Georgians at Atlanta's Municipal Auditorium, produced by Brad Crandall and featuring WSB-TV talent. Color equipment being employed is that developed by CBS and owned by Smith, Kline & French Labs.

During the Feb. 6-8 medical assembly of practitioners from throughout the South, CBS and SKF will pick up operations at Grady Hospital and relay them by polyethylene cable to the color receivers in Municipal Auditorium as it has done before similar groups in other cities.

WSB-TV on Jan. 18 was luncheon host to local television distributors to acquaint them with details of the color demonstrations and to supply informational data for distribution to dealers and consumers. The Journal's Sunday magazine supplement on Jan. 22 featured a color spread and story on color TV and some 13,000 extra copies were mailed to the medical profession in the South.

'FREEZE' LIFT

Smith Urges FCC to Act

THE FCC was urged last week to remove the "freeze" on TV applications in a Philadelphia speech by David B. Smith, vice president of Philco Corp. Mr. Smith addressed a joint meeting of the Franklin Institute and the Institute of Radio Engineers last Wednesday.

Mr. Smith said: "One of the things which is seriously troubling the television industry is how to open up the aerial highways so that these remaining 20 million citizens (not now covered by TV) will not be deprived of TV programs. . . . About 20% of those now having television service get their programs from a single station, whereas they could, if it were not for the 'freeze,' have more than one service."

In reference to color television, Mr. Smith said Philco is convinced that "the same channels now being used for black-and-white television can eventually be used for color television" and that existing receivers will be able to pick-up color in black-and-white without modification. To this end, he said, new color receivers designed to work on the compatible system are still in the industry's laboratories and will not be ready for public use "for some time."

PRISMACOLOR

FCC Seeks More Information

ALTHOUGH not outrightly denying the petition of Prisma-color Pictures Inc. for permission to participate in FCC's color television proceeding, the Commission has indicated the Chicago color photography firm has not made sufficient showing that its methods are adaptable to color TV. FCC suggested additional information be submitted so the petition might be considered further.

Prisma-color told the Commission in November, when it requested leave to enter the color TV hearing, that its method of additive color photography "is a natural for adaptation to television." The system produces color pictures from black-and-white film [BROADCASTING, Nov. 21, 1949]. In its reply to Prisma-color, FCC said:

The Commission has considered your petition and proposed statement and is of the opinion that a prima facie showing has not been made that your system of color photography can be adapted to color television. On the contrary, it appears from your petition and statements that at the present time your proposed color television system is predicated on the asserted success of your system of color photography; that there has been no research and development of the proposed color television system in the laboratory to determine fundamentals and to explore basic problems; and that no transmitting or receiving apparatus have been constructed by you which would be suitable for either laboratory or field testing.

In the light of the above facts it appears that a grant of your petition for participation in the above proceedings would not contribute any substantial scientific data to the color television record of the above proceedings. If you have any additional information to submit to the Commission, or if you have any transmitting or receiving equipment which you have adapted to color television, please submit such information and we will be glad to give your petition further consideration.

GOLDMARK TALK

Phila. Hears Color Data

DETAILS of CBS' color TV system were presented to industry representatives in Philadelphia last week by Dr. Peter C. Goldmark, developer of the system, in an address at the Poor Richard Club, traditional Quaker City advertising organization. The speech was in climax to 13 days of color TV reception in the city.

WCAU-TV (CBS) Philadelphia has been showing color transmissions over sets placed in the station's lobby and at various times in other central city locations. Transmissions were received daily, 11-11:30 a.m. with special viewing groups made up of advertising agency men, WCAU clients, business and civic leaders, and students. WCAU reported viewers were favorably impressed.

WBTV

helps

Duchess with wooing

"Great!" said the Duchess (Duchess Pie Company, that is,) when three one-minute slide announcements on WBTV pulled 669 entries in her customer-wooing History Mystery Man contest.

"When you note," beamed the Duchess, "that this response has been generated among 10,000 set owning families it works out to a response for practically 1 out of every 15 TV sets in WBTV's realm."

"And consider, your grace," WBTV added humbly, "how the response is building—from 135 on the first announcement to 292 on the third."

To assure your product its rightful place among the Carolina sales nobility, associate with the Duchess on WBTV.

MANUFACTURERS OF SOUND-ON-FILM
RECORDING EQUIPMENT SINCE 1931

FACT giving WCPO-AM-TV Cincinnati television and radio rights to Cincinnati Reds baseball games for the next five years [BROADCASTING, Jan. 30.] was widely heralded by Queen City fans and officials alike. Discussing the new contract are (l to r): J. F. Koons Jr., Midland Adv. Agency; M. C. Watters, vice president of Scripps-Howard Radio Inc., licensee of the stations and general manager of WCPO-AM-TV; W. H. Moeller (background), secretary-treasurer, Burger Brewing Co., traditional Reds' sponsor; William J. Huster, president of Burger Co., and Byron J. Fischer, Midland agency. Announcer Waite Hoyt, former major leaguer, will describe the games, to be fed to 27-station network covering southern Ohio, west Virginia, northern Kentucky and eastern Indiana. Telecasts will be carried by WHIO-TV Dayton and WTVN (TV) Columbus. Byron Fischer, radio-TV director of Midland Adv. Agency, Cincinnati, handling Burger account, stated WCPO-AM-TV five-year deal includes not only home games but as many road games as can be cleared via coax or micro-wave. He said WLWT (TV) and WKRC-TV, both Cincinnati, initially were in negotiations.

REDS BASEBALL

WCPO-TV to Air Road Games
MANY, if not all, of the road games played by the Cincinnati Reds will be telecast this year for the first time by WCPO-TV Cincinnati, M. E. Watters, general manager of the WCPO stations, announced last week.

In making the announcement, Mr. Watters said: "We've been working on this deal for a week in co-operation with the Cincinnati Baseball Club and the DuMont Television Network."

Chief obstacle to the arrangement, Mr. Watters stated, was obtaining use of a fourth daytime coaxial cable from New York to cover the games on the East Coast. The AT&T has notified both WCPO-TV and DuMont that the necessary cable would be available, he stated.

In the case of cities which do not have "remote" trucks, such as Pittsburgh, mobile units will be sent from Cincinnati or Cleveland, he said. The road games also will be seen on WHIO-TV Dayton and WTVN (TV) Columbus.

Canada Theatre TV

FIRST theatre TV in Canada has been licensed by the Dept. of Transport, Ottawa, for the Imperial Theatre, Toronto, and the Canadian Famous Players Corp., Toronto, a Canadian subsidiary of Paramount Pictures Inc. The Toronto theatre will carry spot TV news from an RCA-Victor mobile TV transmitter bought by Famous Players some months ago. The corporation has spent over \$100,000 in theatre TV, J. J. Fitzgibbons, president, has announced.

L. A. SET SALES

1949 Estimate—\$80 Million
AN estimated \$80 million was paid for television sets in the Los Angeles area during 1949.

This is the figure given by Richard W. Millar, TV committee chairman of Los Angeles Chamber of Commerce, who pointed out that set ownership more than quadrupled in the area during 1949:

Mr. Millar reported local TV set sales totaled 270,036 for the year, boosting the number of receivers from 79,640 a year ago to 349,676 as of Dec. 1 last.

William J. Quinn, managing director of Southern California Radio & Appliance Assn., said there was one TV set for each 3.8 families in Los Angeles County. In the area covered by the seven Los Angeles television stations (KFI-TV KNBH KTTV KLAC-TV KECA-TV KTLA KTSN), there is a set for each 4.6 families, he stated.

DENIES ZAHARIS

Experimental Renewal Refused
RENEWAL of license was denied by FCC Jan. 26 for the experimental television station which Gus Zaharis, owner of WTIP Charleston, W. Va., has been operating there since 1944. The present license for KA2XAF which has been making equipment and other tests on commercial TV Channel 2 (54-60 mc), expired Feb. 1.

FCC indicated that the experimentation proposed on antennas and synchronizing generators could be done in the laboratory without need for actual telecasting. The Commission said it didn't believe the other experiments proposed would "advance the TV art."

Telestatus

(Continued from Telecasting 32)

10.2% have TV sets in the home. Penetration is somewhat higher in the 5¢ telephone area. The same 1,500 families were surveyed last October and at that time only 5.2% had TV sets.

Sets are concentrated in the upper income levels. Of the families with over \$5,000 a year income 12% have sets; 14% of those with \$3,500 to \$5,000 incomes have sets; 10% of those with \$2,500 to \$3,500 incomes have sets, and only 4% of those with under \$2,500 incomes have TV sets, Guide-Post Research reports.

Biggest restraining influence in set purchases reportedly is still cost. Of those who do not have and do not intend to buy sets this year 66% say it is because of the high price, 24% say the reception is too poor, 23% say the programs are not good enough and 44% won't buy because they think the set will be obsolete too soon. Of the non-owners of TV sets, 93% say they will not buy this year, the research firm reports.

* * *

Videodex Ratings Given for January

MILTON BERLE's *Texaco Star Theatre*, with a rating of 61.4, led the January Videodex network ratings. The program was seen in 1,780,200 homes in reporting markets, according to the research firm. Other programs in the Videodex top 10 ratings for January were shown as follows:

Program	Rating	No. of Markets*	Homes Reached*
Texaco Star Theatre	61.4	17	1,780,200
Arthur Godfrey Friends	47.0	17	1,362,300
Talent Scouts	46.1	8	1,031,600
Toast of Town	41.8	16	1,234,200
Kraft TV Theatre	38.4	15	975,300
Cavalcade of Stars	35.9	14	985,600
Stop the Music	35.5	16	922,600
Fireside Theatre	35.4	13	812,800
Suspense	34.5	14	939,600
Philco TV Playhouse	33.2	17	962,900

* Number of markets indicates Videodex individually reported markets including four various programs: New York, Chicago, Los Angeles, Detroit, St. Louis, Cincinnati, Cleveland, Columbus, Dayton, Pittsburgh, Toledo, Schenectady, New Haven, Boston, Baltimore, Washington, Philadelphia, Buffalo, Milwaukee.

** Homes reached represent a projection to a 50 mile radius of the individually reported markets carrying the program.

FOR MUSIC IN
Television
NOW AND IN
THE FUTURE,
IT'S BMI

The BMI license with television stations—in effect since 1940 and for the next ten years—covers all performances both live and mechanical and whether by means of records, transcriptions, or film soundtrack.

It provides for the performance of BMI-licensed compositions without special clearance headaches.

The catalog of music licensed by BMI contains over one hundred thousand copyrighted titles ranging from folk music and be-bop to classical.

BMI offers to television film producers all the information and help they need in obtaining the right to record music on films from individual copyright proprietors.

BMI's television Service Department is headquarters for complete information on performing and other rights in the music of BMI, AMP, and the hundreds of publishers affiliated with BMI.

MUSICAL CATEGORIES FOR SCENE SETTING

BMI has compiled a CATEGORICAL INDEX as a basic guide in setting musical scenes and providing appropriate background music for script situations. It is proving itself indispensable to TV producers and program directors everywhere.

Write to BMI's Television Service Department for your copy.

(Continued on Telecasting 42)

*Memo to TBA
people meeting in
New York Feb 8*

Here are two fellows you should know if you want to know more about the amazing WTTV operation in

*Bloomington, Indiana **

LYNN L. BARNARD,
of Barnard & Thompson, Inc.,
299 Madison Avenue, New York,
National Representatives for
Station WTTV.

LYLE WARRICK,
of Bloomington, is special events
director on the staff of
WTTV-WTTS and is familiar with
all phases of station operation.

Both will be attending the
TELEVISION BROADCASTERS ASSOCIATION
clinic in the Waldorf February 8th

*Bloomington, the home of Indiana University, is a county seat town of 20,000, the smallest city in the nation with TV. A sister station to WTTS (leading AM station in the area) WTTV goes in heavily for sports coverage and local programming, featuring home-town talent.

LET OUR NATIONAL REPS. GIVE YOU THE COMPLETE STORY

WTTV
A Regional Station
on the Air 24 Hours
a Day

RADIO AND TELEVISION CENTER • BLOOMINGTON, INDIANA

Owned and Operated by Sarkes and Mary Tarzian

WTTV
Indiana's Second
TV Station

FIRST in the QUAD CITIES

In Davenport, Rock Island, Moline and East Moline is the richest concentration of diversified industry between Chicago, Minneapolis, St. Louis and Omaha. The Quad Cities are the trading center for a prosperous two-state agricultural area. Retail sales, total buying and per capita income rate higher than the national average, according to Sales Management.

WOC-AM 5,000 W. 1420 Kc. • **WOC-FM** 47 Kw. 103.7 Mc.

WOC delivers this rich market to NBC Network, national spot and local advertisers... with 70 to 100% BMB penetration in the two-county Quad City area... 10 to 100% in adjacent counties.

WOC-TV Channel 5 22.9 Kw. Video • 12.5 Kw. Audio

On the Quad Cities' first TV station NBC Network (non-interconnected), local and film programs reach over 5,000 Quad Cities' sets... hundreds more in a 75 air-mile radius.

(Continued on Telecasting 44)

YOU CAN'T SEE THE TELEVISION INDUSTRY THROUGH A MENTAL KNOTHOLE!

Bankers, Investors, Broadcasters, Advertisers, Agency-men, Film Producers: You know that there are no cheap mistakes in television. Yet everybody's convinced there's a gold mine in the TV sky somewhere. Wouldn't you like to have a radar map showing what's behind each TV cloud!

We haven't got such a map. But we have got a book... a big book full of specific figures about the size, shape and cost of national television. For instance, we figure it would cost \$1,740,352,500 per year to run 4 TV networks consisting of 1200 stations for 70 hours per week.

It took six months of patient data gathering, factual research and thoughtful analysis to establish and document our figures and conclusions. We do not ask you to accept them — in half an hour, using our formulas and your own best estimates of the facts, you can arrive at a complete set of specific answers of your own about TV's future as it affects your interests.

Our major objective was to devise a system of thinking about television — a means of reaching specific answers to the Billion Dollar Questions About TV. How much will "National television" cost? Can Advertising pay for it? What will TV do to Sports? Movies? Radio? What about

"box office" television? How can we break TV's program-cost bottlenecks? Is TV a good investment risk? An Uproar has been buzzing about our heads ever since the study was released. The office is strewn with praise and brickbrats, but nobody has questioned the

thoroughness or the thought-provocative scope of our analysis.

We Are Embarrassed because at the moment we have no copies of our research document-turned-best-seller. The first printing has gone — to radio and TV executives; advertisers and agency men; Hollywood studios; broadcasters; set makers; bankers; radio and TV artists and directors; to people in London, Mexico, Canada and places we never heard of. The general reaction was well summed up by a big TV advertiser who told us, "The three hours I spent reading your document was the most valuable 'television time' I ever expect to buy. It's worth many times the \$5.00."

The second edition is at the printers... due off the presses immediately. If you want \$5.00 worth of insurance against some million dollar mistakes you will want to read 'the best buy in television.'

Use this coupon — or write — for your copy, today!

COLOR PHASING

FCC Gets RCA Description

TECHNICAL description of RCA's new method of automatic color phasing, as demonstrated in mid-January in Washington [BROADCASTING, Jan. 23], was submitted to the FCC last week by E. W. Engstrom, vice president in charge of research.

The technique replaces the manually operated TV color system demonstrated last autumn and is believed to eliminate the lack of uniformity that marred pictures shown at that time.

In his letter Mr. Engstrom said that January tests of automatic phasing showed "satisfactory results even under conditions of very high noise." Accompanying the letter is a 12-page description of the process, based on transmission of a burst. It is described as solving problems of noise immunity and automatic color phasing simultaneously.

Mr. Engstrom emphasized that the RCA system is "fully compatible, all-electronic and provides the same picture definition in color as in standard black-and-white television."

New Hopalong Sponsor

GORDON BAKING Co., New York (Silver Cup bread), Sunday, Jan. 29, began sponsoring the Hopalong Cassidy film telecasts on three NBC-TV stations for 52 weeks. The stations are WNBT (TV) New York, WSPD-TV Toledo, WWJ-TV Detroit. N. W. Ayer & Son, New York, is the agency.

WNBQ (TV) IN BLACK

Station Reports New Client:

WITH the signing in 10 days of 5½ hours weekly involving several new clients, two renewals and an order for 260 one-minute spots WNBQ (TV) Chicago (NBC) reportedly is in black. Station has only 2¾ hours of unsponsored time, according to John McPartlin, sales manager.

New clients include Shonberger & Sons (Gold Spun noodles), through Robert Kahn & Assoc.; John T. Shane, direct; Better Brands of Illinois (Miller beer), direct; Electric Assn. of Chicago, through J. R. Pershall Co.; Jewel Food stores, direct; Hauser-Nash Sales, through Guenther-Bradford Agency; Chicagoland Studebaker Dealers, through Roche, Williams & Cleary. Renewals: Edward Hines Lumber Co. and Evanger's Kennel Foods. Order for 260 one-minute spots, 52 weeks, is from Sears, Roebuck Chicagoland Stores, through Mayers Co.

TV Writing Contest

CBS and World Video Inc. last week announced a television drama writing competition for college students. Under joint sponsorship of the network and the production company, which produces *Actors' Studio* on CBS-TV, the competition will involve four awards at monthly intervals, the first to be given March 31. Students at any qualified college may compete for the prizes which will amount to \$500 if the winning script is a one-hour program and \$250 if it is a half-hour.

UHF Success

(Continued from Telecasting 7)

will mean more regional interchanging of programs. Each station will be able to pick up programs telecast by neighboring stations on an exchange basis, eventually bringing into being a series of area networks, much on the order of the rural FM broadcasting networks. The ease of these relays will also mean that each community will be able to carry top network shows without the cost of expensive coaxial cables or microwave relays. This will result in high quality television for areas all over the country now without TV and without hope of getting it under the present VHF channel allocations.

As for stations within the market area of a present VHF station the outlook is equally good. Converters will be inexpensive and efficient, antennas small and simple and reception will be better. There are stations in operation in New Haven a VHF station and the city is TV-conscious. In the past few months we have been broadcasting news stories and reports on the progress of UHF and have sent out releases in the area as a part of an educational program. We have also publicly announced that we will install converters at cost in present TV homes when UHF comes to our city. Consequently, interest in UHF in our area is high—among advertisers, too.

UHF is the answer for the small broadcaster who looks to the future with optimism, and it has already provided the answer to the pessimists. The UHF television station on Success Hill in Bridgeport is the forerunner of nationwide TV. UHF is here and it won't be long before every hill on which there is a UHF antenna will also be a Success Hill.

CTI To Use WMAL-TV

COLOR TELEVISION Inc., of San Francisco, sponsor of one of the three rival color TV systems in FCC's video hearings, will employ the transmitting facilities of WMAL-TV Washington in the demonstrations slated before the Commission Feb. 20 and 23, it was announced last week. It will be the first CTI showing.

Command' Showings

CBS SAID last week it would resume its schedule of public demonstrations of color television in Washington Feb. 13-21, "by public demand." Network spokesmen estimated more than 13,000 persons saw color telecasts at the downtown viewing center between Jan. 12 and Feb. 1. The showings were halted Feb. 1 so the equipment could be shipped to Atlanta, where medical demonstrations are scheduled Feb. 6-8.

WHEN WNBW (TV) Washington wanted to come up with a real honest-to-gosh branding iron to lend realism to its popular *Circle Four Roundup Rangers*, it contacted Bill Day of KOA-NBC Denver for the real article. Mr. Day air-expressed it by way of Sen. Ed Johnson (D-Col.) for use on the children's TV show, which includes a feature film and a Ranger club meeting, Mon.-Fri., 4-5:15 p.m. [BROADCASTING, Jan. 23]. Taking part in the official presentation are (l to r): Raymond Michael, who conducts Ranger's meeting after the movie; William R. McAndrew, WRC-WNBW general manager; Sen. Johnson; Charles de Lozier, WNBW sales manager.

Closed Circuit TV

DuMONT Television Network last week announced a new plan to provide closed circuit telecasts of business and industry conventions. Convention proceedings in New York, under the plan, may be telecast by special closed circuit hookups to various cities among the 21 connected to the television network.

Esso Video Show Set

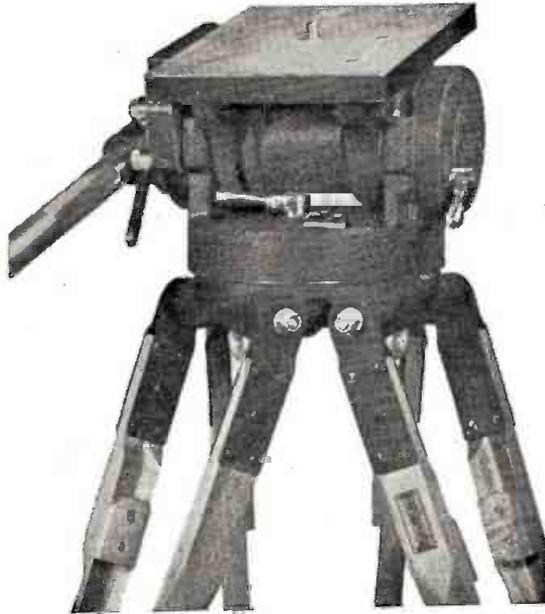

ESSO STANDARD Oil Co., New York, will sponsor the *Alan Young Show* on the CBS-TV network beginning in mid-March [CLOSED CIRCUIT, Jan. 16]. The show, originating in Hollywood, will feature Alan Young in a weekly half-hour comedy series. Agency for Esso is Marschalk & Pratt.

Floating Action!

for all TV Cameras

"BALANCED" TV TRIPOD

(Pat. Pending)

This tripod was engineered and designed expressly to meet all video camera requirements.

Previous concepts of gyro and friction type design have been discarded to achieve absolute balance, effortless operation, super-smooth tilt and pan action, dependability, ruggedness and efficiency.

Below:

3 wheel portable dolly with balanced TV Tripod mounted.

Complete 360° pan without ragged or jerky movement is accomplished with effortless control. It is impossible to get anything but perfectly smooth pan and tilt action with the "BALANCED" TV Tripod.

Quick-release pan handle adjustment locks into position desired by operator with no "play" between pan handle and tripod head. Tripod head mechanism is rust-proof, completely enclosed, never requires adjustments, cleaning or lubrication. Built-in spirit level. Telescoping extension pan handle.

Telefile

(Continued from Telecasting 11)

in the world of sports, which Richmondites saw, include:

Boxing direct from Madison Square Garden in New York two months after the station took to the air. A few days later, tennis matches from Jackson Heights in New York were presented. Shortly afterward, a baseball game between the N. Y. Police Dept. Athletic Assn. and its counterpart N. Y. Fire Dept. club was seen. On June 25, sports fans watched the heavy-weight championship bout between Joe Louis and Jersey Joe Walcott. On Aug. 9, still in 1948, Virginia viewers saw Olympic Games which were filmed in London and rushed to this country for TV screens. The variety in sports ranged from football classics, boxing and wrestling to the World Series and The Hole in One Golf Tournament.

* * *

IN back of the programming are the Havens & Martin staff numbering 55. The television staff includes those who devote their entire time to WTVR as well as personnel who work also for WMBG and WCOD. Exclusive TV staff consists of Conrad G. Rianhard, program manager; four production managers, and their three assistants, a TV special events director, an artist, film clerk and four salesmen. Technical staff of nine engineers is headed by James W. Kyle. Continuity writers, promotion and publicity directors, announcers and secretaries work for all three facilities.

Mr. Havens, president and general manager, finds his first love in engineering. Although his actual work in this field has been limited because of other pressing duties, he can be seen delving into a complicated circuit when a serious engineering problem presents itself. He maintains a modern machine shop and experimental laboratory at home.

Key station personnel include William J. Filer, director of local sales; J. Albert Tillery, engineer in charge of control room operations; J. Reginald Reith, chief accountant; Allan J. Phaup, director of news and special events, and Gwendolyn Dalton, traffic director.

Other executives were hand-picked for experience. Walter A. Bowry Jr., treasurer, is entering his 10th year with H&M. Now in his thirties, Mr. Bowry served aboard a minesweeper during World War II and as a communications officer with the Pacific Fleet. He was promoted to his present position last year. Mrs. Katherine Germain, secretary, has a 14 year service with H&M. During her radio career she has acquired a working knowledge in about every phase of radio. Mr. Kyle, chief engineer, has made technical study a life's career. He joined H&M about 15 years ago as staff engineer.

WTVR transmits on Channel 6 (82-88 mc) with 6.3 kw aural and 12.16 kw visual power.

H&M's modern AM-FM-TV studio building is located at 3301 West Broad St. The transmitter building, also housing three facilities, is on Staples Mill Road.

WTVR's equipment includes: An RCA aural transmitter; DuMont video transmitter; an RCA superturndstile antenna, installed on a 317-foot self-supporting insulated Lehigh tower with an overall height of 417-feet (located 225-feet above sea level, its effective radiation height is 642-feet); two image orthicon studio camera chains; two 16mm projectors; two 35mm projectors yet to be installed; a 2 x 1 slide projector; Baloptican; RCA lateral recording equipment and turntables; photographic and film processing laboratory; 35mm and 16mm film cameras, and Speedgraphics.

At present, WTVR has one studio (29 x 17½ feet). An extra-large second studio is planned for 1950, and will include dressing rooms, property rooms and carpenter shops.

Basic Class A rates for studio one hour are \$300; basic Class B rates \$225, and basic Class C rates \$150. Film one hour rates are \$240 for Class A; \$165 for Class B, and \$90 for Class C.

Plans for the future are to retain full TV service for the public; subject to instant re-adjustment with a change in the direction of video's path. The station expects to turn a profit this year depending on "how much spot and local business can be secured during 1950 because it will be from these sources that the principal operating revenues will come. . . . I there is enough spot business and there are not too many network intervals this summer as there were last (summer), then it is possible to come out of the red during 1950 and go into the black."

DuMont Pat

(Continued from Telecasting 6)

plan required acceptance by at least 15 affiliates.

Identity of advertisers will be

made known "prior to their inclusion in program," according to the telegram. The series is slated to start Feb. 25. It will be variety type, the first hour originating in Chicago and produced by Ted Mills, the last 1½ hours originating in New York and produced by Max Liebman.

Payment Plan

"You will be paid regular network compensation computed as if each half hour were sold to sponsors at your network half-hour rate," the telegram declared.

Mortimer W. Loewi, executive director of the DuMont TV Network, to whom the telegram was sent as an offer for DuMont's WDTV (TV) Pittsburgh, replied that the new plan "does not affect the basic objection of our original complaint."

Index Finger to Nose

A SIGNAL system of red and green lights will keep speakers on schedule at Wednesday's TBA Television Clinic. When each speaker begins, a green light visible only to him will be turned on. When his time is up, a red light, also visible only to the speaker, will warn him to conclude. A minute later, if he is still speaking, a large red light will begin flashing in full view of the audience. Developed by J. R. Poppele, TBA president, and his engineering staff at WOR New York, the speaker-traffic light system was successfully introduced at the last TBA clinic in December 1948.

Film Report

DICK STROME TELEVISION, with studios at 2403 Spruce St., Philadelphia, according to Edward Davies who handles administrative end of business, has just completed most successful year of creating and producing TV film commercials. Some local and national advertisers include Gretz Brewing, one-minute full animation film, and near completion on five-minute color animation; Cities Service, one-minute semi-animation; Clearview Television Service, 20 seconds with sound. Dick Strome, head of firm, is nationally known cartoonist whose work appears in *Saturday Evening Post*, *New Yorker* and other magazines.

Coronet Films, Chicago, releasing series of five motion pictures to TV stations for first time. One-reel films have running time of 10 minutes, those available include "King Midas and the Golden Touch." Others are "The Cow and the Sprite," "Rumpelstiltskin," "The Legend of Pied Piper" and "The Honest Woodsman." Called *Coronet Fantasies*, series is composed of puppets enacting popular folk tales. WSB-TV Atlanta and WCPO-TV Cincinnati have booked all five. Program directors can preview series by paying transportation charges.

Films of the Nations Inc. announces new office at 62 West 45th St., New York 19; telephone Murray Hill 2-0040 . . . Five Star Productions, Hollywood, producing six

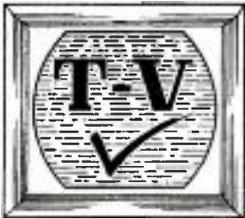

one-minute and six 20-second TV film commercials for Goetz Brewing Co., St. Joseph, Mo. Agency Potts-Turnbull Co., Kansas City Same firm doing 14 one-minute spots for 7 Eleven Stores, Dallas (drive-in grocery chain with 7 stores in Texas), through Stanley Campbell Inc. that city. Firm currently has 91 TV commercial spots in production for 11 sponsors.

Young & Rubicam, New York has signed for services of Screen Gems Inc., New York producer of video commercial films, to do five spot announcement films for Borden Dairy Products. Screen Gems produced now-famous B. V. D. spots and short films for Hamilton's "Peggy and Jim" magazine ads . . . TV Ads Inc., Los Angeles, has completed half-hour video film "Dixie Dugan" . . . Television Picture Distributing Corp., Los Angeles, will cut approximately 400 feature-length western films into 27-minute segments for serial use. Toby Anguish is head of firm.

TALENT UNIONS

TVA Urges Partnership

RESOLUTION calling for true 50-50 partnership between Television Authority and Screen Actors Guild, provided some plan be made for resolving deadlocks, was passed at a meeting Jan. 31 of the Hollywood membership of five live unions of Associated Actors and Artistes of America that make up the TVA. Motion followed an earlier resolution, voted down, that the only partnership acceptable to TVA must include a provision for joint membership and joint action.

Basic problem in such a partnership, without which solution no such arrangement could last, is the determination of what such a plan would be. TVA maintains that joint membership meetings should be called to resolve deadlock issues; SAG and Screen Extras Guild remain firm in clinging to their basic guild contracts calling for 75% vote from total membership by mail referendum in determining any important action, such as a strike vote.

Discussing the latest SAG proposals sent TVA Jan. 18 [TELECASTING, Jan. 23], George Heller, TVA national executive secretary, stated they "differ in many respects" from ideas originally set forth by both groups and resulted in widening the area of disagreement. Among points disputed are the question of closed kinescopes and filmed spot announcement over which both groups claim jurisdiction.

Also presented to membership was a tentative proposal on wages and working conditions prepared by the TVA board wages committee. Proposal calls for \$95 for a 60-

minute show, plus \$6 for rehearsals, with wage scales varying down according to length of show.

In the meantime, SAG is continuing its wages and working conditions negotiations with Television Film Producers Assn. Next meeting is scheduled for tomorrow night (Feb. 7).

Surgery on TV

SERIES of five operations at Sinai Hospital, Baltimore, were picked up by WMAR-TV there Friday and relayed by microwave closed circuit to the local Southern Hotel for observation by some 100 doctors who were attending a sectional educational meeting of the American Urological Assn. Done in monochrome, the program lasted about five hours. Operations were not telecast for the public by WMAR-TV which operates on Channel 2 (54-60 mc).

Program Displays

PHOTOGRAPHIC blow-ups of leading TV shows will be displayed by the four video networks at the TBA Television Clinic on Wednesday at New York's Waldorf-Astoria Hotel. Each network is creating a display of its outstanding programs specially for the clinic attendees, to include advertiser, agency and program firm executives as well as TV broadcasters.

Griffin on ABC-TV

GRIFFIN CO. (shoe polish) will begin sponsorship of a half-hour of the hour-long Paul Whiteman's TV Teen Club over 11 ABC-TV stations March 4. The contract, for the 8:30-9 p.m. half is for 26 weeks through Birmingham, Castleman & Pierce, New York.

WENR-TV SALES

Are \$150,000 in Jan.

JANUARY sales at WENR-TV Chicago totaled more than \$150,000. A compilation last week showed:

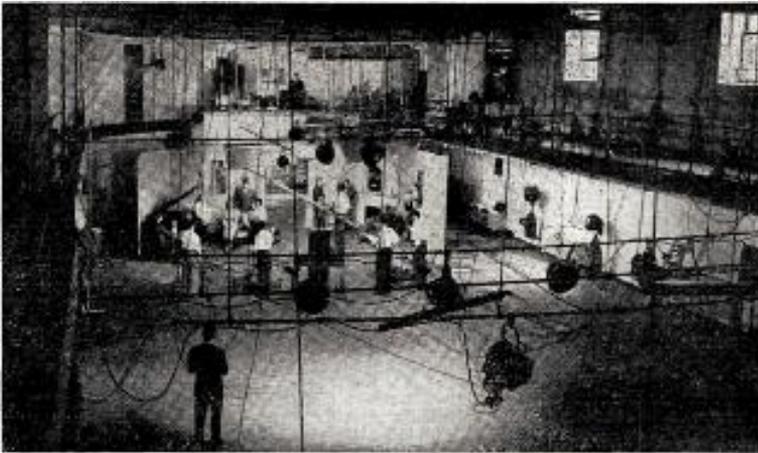

Projected contracts were for French Sardine Co., quarter-hour film, Sunday, starting Feb. 12, through Rhoades & Davis; Tauber on Broadway (Ford dealers), 18-week renewal of Parade, Monday, half-hour, American National Video Productions; Courtesy Motor Sales (Hudson), renewal of Wednesday wrestling matches from 9 p.m. to conclusion through Malcolm - Howard; Hunding Dairy, 10-minute Sunday film from Feb. 5 through Guenther-Bradford; Slavin Motors, Monday night Masterpiece film feature from 8 p.m. to conclusion from Mar. 6 through Ray Freedman Inc.; Kralee Insurance Service, Our Gal Toni, half-hour, Friday nights from Jan. 13, Turean & Umbs Agency, all Chicago.

Spot business—National Carbon Co., William Esty Agency; Chrysler (Plymouth), N. W. Ayer; DeSoto, BBDO; General Motors (Buick), Kudner; Duffy-Mott (Juices), Young & Rubicam; Petry Wine, Young & Rubicam; U. S. Envelope, S. R. Leon; Simmons Mattress, Young & Rubicam; American Cigar & Cigarette (Pall Mall), SSC&B; E. J. Brach & Sons, J. Walter Thompson.

BIG 10 TELECASTS

Group Okays Post Game Shows

CONTINUED telecasting of post Big 10 football game highlights was approved by the conference television committee Tuesday in Chicago, but rigid pricing and restriction policies were established for future contracts with TV stations. Recommendations made by the three-man committee will be referred to Big 10 conference athletic directors at a meeting in Chicago next month.

The six-hour session Tuesday afternoon was attended by Big 10 Commissioner K. L. Wilson, chairman of the video committee; Douglas R. Mills, athletic director, U. of Illinois, and Ted B. Payseur, athletic director, Northwestern U. Non-committee members present were Charles E. Flynn, athletic publicity director, U. of Illinois, and Walter Byers, Comr. Wilson's assistant. Discussion was limited to showing of post-game highlights, but the ever-growing question of the effect of telecasts on gate receipts is expected to command most of the attention at the March meeting.

Your Solution for Better TV Broadcasting at LOWEST COST - The New Stage No. 1

and the **GRAY** **TELOP**

This most versatile tele-casting optical projector enables dual projection with any desired optical dissolve under exact control.

The accessory STAGE NUMBER 1 adds three functions separately or simultaneously: a) teletype news strip, b) vertical roll strip and c) revolving stage for small objects.

The TELOP, used with TV film cameras, permits instant fading of one object to another, change by lap dissolve or by superimposing. Widest latitude is given program directors for maximum visual interest and increased TV station income.

DuMONT HITS FREEZE Asks Congress Action

DECLARING that a continuation of the FCC television freeze presents a threat to the jobs of thousands of New Jersey men and women, Dr. Allen B. DuMont will meet with New Jersey Senators and Representatives tomorrow (Feb. 7) morning in Washington to request Congressional action to terminate the freeze.

Dr. DuMont, president of Allen B. DuMont Labs which employs several thousand persons in its New Jersey manufacturing plants in Passaic, Clifton and East Paterson, pointed out in a statement released for publication today that the manufacture of TV broadcasting equipment, including cameras and transmitters, is already at a standstill. He added that it is only a question of time until the manufacture of receivers and viewing tubes also will be affected.

Dr. DuMont

"The delay of the Commission is directly responsible," Dr. DuMont said, "and if the freeze drags on as it now threatens to do, its adverse economic effects can be tremendous. The big fellows can probably survive but the hundreds of little companies now in television are going to experience some very tough going. The long delay has opened the door to monopoly in both broadcasting and manufacturing and we at DuMont are not interested in monopoly."

When the freeze was put into effect 18 months ago, the DuMont statement noted, it was designed to permit a study of the possible utilization of UHF channels for TV broadcasting in addition to the 12

VHF channels now in use. At that time it was anticipated that the technical studies and hearings could be completed within four or five months and the freeze lifted immediately thereafter.

"That was a year and a half ago," Dr. DuMont said today, "and what has happened? Little or nothing to decide the original problems. Instead the Commission spends its time investigating the possibility of color television now, and the industry stands by doing all it can with a limited market. How soon the freeze will end or how soon the available market will be exhausted except for replacement sets, is the big problem now. Already the broadcast equipment part of the television business has been forced to close shop for lack of customers, and that part of the industry is almost entirely in New Jersey enterprise, located in Clifton and Camden. These plants should be employing thousands of skilled workers today, but they only have skeleton forces of a few key engineers."

New Jersey is one of the two leading states in the manufacture of TV equipment and component parts, Dr. DuMont said, employing at least 25,000 persons directly for the production of transmitters, cameras, receivers and cathode

ray tubes and with at least another 25,000 indirectly employed by component manufacturers, retail sales outlets and TV servicing and installation companies.

Questions Raised

Noting that many of TV's technical experts, including officers of Radio Mfrs. Assn., feel that color television is much farther away than just around the corner, Dr. DuMont asked:

"Why then do we avoid the real issue of utilizing the ultra high frequencies to increase the number of television stations the country can operate; create a road block in the path of normal expansion of a great new industry, and threaten the economic stability of thousands of skilled workers in this and other states? We in DuMont will be ready for color television when color television is ready for the public but we see no reason except personal opinions of a very small minority in and outside of the Commission to hold back the further progress of black-and-white television which is ready, is accepted by the general public where it has been permitted to start operations, and is offering employment to thousands and adding greatly to the country's economic welfare."

TELEPULSE

Berle Leads Top 10 Shows

MILTON BERLE's *Texaco Star Theatre* led the top 10 network programs in the multi-market Telepulse survey made Jan. 3-10, it was announced last week by The Pulse Inc., New York. The figures:

TOP 10 NETWORK PROGRAMS

	Prog. Average Rating	
	Jan.	Dec.
Texaco Star Theatre (NBC)	58.4	62.2
Toast of Town (CBS)	39.8	40.6
Talent Scouts (CBS)	39.3	43.5
Godfrey & Friends (CBS)	37.6	40.3
Fireside Theatre (NBC)	33.8	34.7
The Goldbergs (CBS)	33.7	37.6
Stop The Music (ABC)	31.6	36.6
Studio One (CBS)	30.8	29.7
Suspense (CBS)	28.2	29.3
Kraft TV Theatre (NBC)	27.2	27.4

AVERAGE ¼ HOUR TV SETS-IN-USE Entire Week, 12 Noon-12 Midnight

	Jan. 1950	Dec. 1949
	Boston	20.5
Chicago	24.1	23.9
Cincinnati	30.3	29.5
Los Angeles	24.1	22.7
New York	28.1	27.6

available to the Commission's staff facilities for interference tests, for observance of ghost phenomena, and for the operation of color television receiving equipment in weak signal areas." In making this announcement last week the Commission also pointed out that the laboratories offer more space than was available for the first demonstration, and that an adequate power supply also is available there.

Last week's announcement also cleared up a point of procedure. Upon conclusion of the color phase of the hearings FCC "will proceed to consider evidence relating to the general issues" of the proceeding. At one point authorities had been inclined toward a recess and decision on the color question before taking up other phases.

The "general" subjects, or Part II, include changes in television rules and standards, the question of opening some 42 UHF channels, use of carrier offset, synchronization and directional antennas, Stratovision, Polycasting, channels for noncommercial educational TV stations, and a proposal that the 470-500 mc segment at the bottom of the UHF region be allocated to common carrier service.

More Delay Foreseen

Although some of these subjects have been touched in color television testimony, observers see little chance of this phase being completed in less than four or six weeks.

Then comes the final phase—FCC's proposed city-by-city UHF-VHF allocation plan, providing for 2,245 stations in some 1,400 communities. This is the time when applicants and would-be applicants will come in and tell FCC what is wrong with the allocations proposed for particular communities. The enormity of the task is suggested by the fact that some 200 participants are slated to appear.

This, authorities feel, will take care of another four weeks, at least.

Then the decisions.

Nobody can hazard a guess as to how long it will take the Commission to formulate them, but it is conceded that the questions are among the most vital and difficult to face FCC in recent years. The difficulty is multiplied by the obvious fact that each day's delay means another day's delay in getting television moving.

If a proposed rather than final decision is issued, as seems necessary in the color phase at least, lifting the freeze will be delayed by the time needed to prepare for and hold oral argument and then to reach and issue the final decision.

Authorities agree that FCC cannot lift the freeze without first having decided certain aspects of the color question—except at the risk of precluding color completely or being forced to go through another reallocation to accommodate color.

The minimum decision in this respect, it is felt, would be a conclusion that bandwidth and the interference and propagation characteristics for color will be the same as for black-and-white.

In this connection, FCC's assumption throughout the color hearing has been that color, like black-and-white, will employ 6-mc channels, and all three of the demonstrated color systems operate on that basis. As to interference and propagation, RCA has submitted results of co- and adjacent-channel tests indicating a substantial similarity in color and monochrome.

Need General Standards

What FCC may finally do with respect to color is anybody's guess. Sen. Ed C. Johnson (D-Col.), chairman of the influential Senate Interstate and Foreign Commerce Committee, has reiterated his advocacy of "broad and sufficiently general standards." Though opposed in many quarters, he seems to be winning adherents in others.

Some FCC staff authorities reportedly are among those who feel this course would offer the most satisfactory compromise of the bitter fight. The industry generally

favors a cautious approach to color, CBS advocates prompt color, and Comrs. Robert F. Jones and Frieda B. Hennock in particular, along with Sen. Johnson, favor color and are outspoken in criticism of what they regard as industry "stalling."

Whatever the answer on color, the pattern of TV development will be vitally and perhaps permanently affected by other decisions which must be reached.

Unless the UHF is found capable of being used without too great delay, for example, the development of a competitive, nation-wide television system will be retarded by that much. In any event it seems likely that a surplusage of applicants will make hearings necessary before further grants can be made in the nation's major markets.

One of the prime questions to be settled is one which contributed largely to the freeze in the first place—the effects of tropospheric interference, not taken into consideration in existing standards. The decision on this point will affect the separations to be provided between co-channel and adjacent-channel stations, and, there-

fore, the number of stations that can be accommodated.

The tropospheric problem was recognized after FCC had solved another interference problem by eliminating the sharing of television channels by non-broadcast services. To accommodate the non-broadcast services thus displaced, FCC deleted TV Channel 1.

This plan was made final on May 6, 1948. At the same time FCC came out with a proposed new allocations plan based on 12 instead of the former 13 channels and yet providing for twice as many stations in three times as many cities as the old plan.

Hearings on this new allocation were started in late June 1948. These sessions, continuing over some four weeks, raised serious questions as to tropospheric effects and such related subjects as directional antennas, antenna heights and powers. FCC therefore called an FCC-industry engineering conference to start Sept. 13, 1948, to consider:

1. Whether FCC should initiate proceedings to revise the television allocation rules and standards prior to a final decision on the reallocation plan then under consideration;
2. If standards were to be revised, what policy should be adopted with respect to pending applications;
3. What procedures should be adopted in order that revised standards might be based on the best available engineering information.

This conference, held Sept. 13-14, led to a series of highly technical

sessions Nov. 30 and Dec. 1-2, 1948. These resulted in formation of the so-called ad hoc committee whose compilation and evaluation of pertinent data were used largely by FCC in its now-pending proposal for revised standards.

Meanwhile, the freeze was ordered into effect on Sept. 30, 1948.

Ten days earlier, the question of opening the UHF had been canvassed in a four-day hearing which produced (1) broad agreement that the 470-890 mc area should be opened, and (2) divergent views on how this expansion should be accomplished. The questions involved in this hearing, although it was a separate proceeding, inevitably became entwined with those involved in the VHF freeze.

Plan Withdrawn

In setting up the current overall proceeding, FCC resolved to make a fresh start. The May 1948 allocation plan, which had been the subject of weeks of hearings, was withdrawn and the industry was required to file new notices to be eligible to participate.

The color question was here injected for the first time since the 1946-47 hearings on the CBS color proposal ended in a decision that color was not yet ripe.

The allocation currently in effect is premised on 150 miles separation between stations on the same channel and 75 between those on adjacent channels, but in many cases it falls far short of these goals. Based on the ad hoc committee's data, the proposal now awaiting hearings would extend these spacings to 220 and 110 miles, respectively.

This proposal, however, does not require the use of either synchronous or offset-carrier operations, which proponents contend will curtail the venetian-blind effects of co-channel interference to a point where the old 150-mile separation standard could be followed. The desirability of requiring such operations, which FCC's present proposal would only "encourage," is among the subjects due for airing before the proceeding is over.

Spectrum Allocation

Meanwhile, there remains a widespread feeling that television's prime problem—inadequate spectrum space—could be largely overcome by assigning to video some of the unused or little used frequencies allotted to government services.

Efforts have been made intermittently to secure such space, preferably adjacent to the VHF television bands. The military and other government agencies thus far have resisted successfully, not yielding to industry argument that government's right to reclaim use of frequencies in time of national emergency is established by law.

The subject of government use of frequencies is currently under study in both houses of Congress. A Senate Interstate and Foreign Commerce Subcommittee, headed by Sen. E. W. McFarland (D-

Ariz.), is looking into the question as part of a broad communications probe. In the House, the Sadowski Bill (HR-6949) focuses attention on the subject via its proposal to establish a Frequency Control Board which would allocate between government and nongovernment agencies and also make nongovernment assignments.

COLOR READY?

RMA, 'Coronet' Say No

IF COLOR television standards were adopted now and proved unsatisfactory, it would be impossible to change them "without involving obsolescence of every piece of transmitting equipment and every set then in existence," RMA asserts in a brochure, "Is Color Television Ready for the Home?", published last week.

"When standards are set all future improvements must be within the framework of those standards," says RMA, which opposes immediate approval of color and has set up a National Television System Committee to work out and recommend color standards.

The booklet discusses the rival RCA, CBS, and CTI color television systems and FCC's current color proceeding. It contends that not all telecasts will be in color even when color TV is approved, and that not all new receivers will be equipped to receive in color, because of the cost factor.

Meanwhile, an article in the February *Coronet* entitled "How Much Bunk in Color Television?" contends color TV is not ready and should not be offered commercially until "actually perfected." The article, by John L. Springer, quotes "the experts" as saying color TV is not just around the corner and warns that "a debacle" would result from premature approval.

MOCK TV set, on which spots and shows can be previewed by the Edward Petry Co., national station representative, was introduced to Chicago agency people at the firm's television room preview [TELECASTING, Jan. 30]. In this group (l to r): J. Ralston Fishburn, Petry Television staff, explaining the device's operation; Howard Ketting, vice president, Ruthrauff & Ryan; William Weddell, radio manager, Le Burnett; Don Calvin, account executive, Leo Burnett.

THESE Radio Rowers were among those attending the Petry preview. They included (l to r): Norman Hayne, radio director, Ruthrauff & Ryan; Milton Blink, vice president, Standard Radio Transcription Service; Pat Schlesinger, timebuyer, Tatham Laird; C. C. Tucker, vice president, R. J. Potts-Calkins & Holden, Kansas City, Mo.

OTHER Petry partygoers included (l to r): Keith Kiggins, Petry-TV; Ed Fitzgerald, timebuyer, J. Walter Thompson; Bill Condon, timebuyer, Wad Advertising; Richard Montgomery, account executive, Compton Advertising; Edward Voynow, Petry Chicago vice president.

When Mickey and Felix were our leading “TV” stars...

Those celebrated “movie actors”—
Mickey Mouse and Felix the Cat—were
pioneer helpers in television research

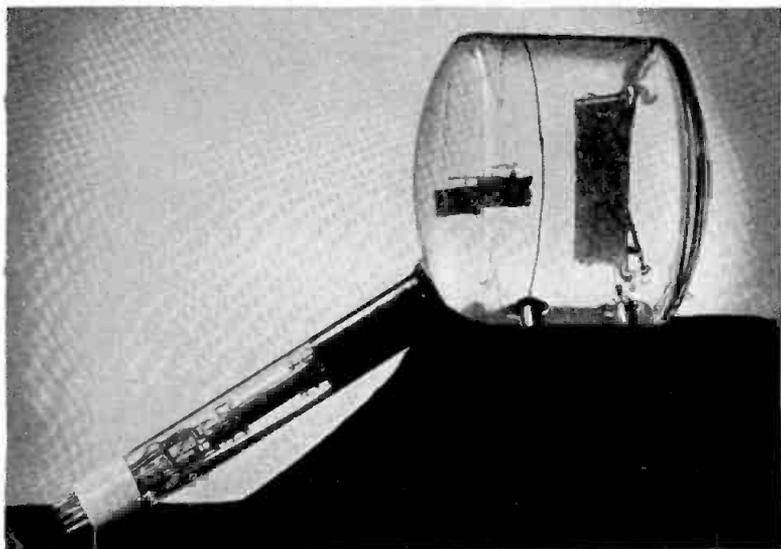

No. 1 in a Series Tracing the High Points in Television History

Photos from the historical collection of RCA

Strange though it may seem, a pair of toy figures had a lot to do with television as you now enjoy it! As “stand-ins” during television’s early days, Mickey and Felix helped RCA scientists and engineers gather priceless information.

Choice of this pair was no accident. Their crisply modelled black-and-white bodies were an ideal target for primitive television cameras. The sharp contrast they provided was easy to observe on experimental kinescope “picture tubes.”

Would living actors have done as well? No, for what RCA scientists were studying was the effect of changes in instruments and telecasting techniques. With living actors it could never have been absolutely certain that an improvement in the televised image came

The iconoscope, electronic “eye” of television, invented by Dr. V. K. Zworykin, of RCA Laboratories.

Felix the Cat and Mickey Mouse were, during television’s experimental period in the ‘Twenties and ‘Thirties, the most frequently televised actors on the air. Using them as “stand-ins,” RCA engineers and scientists gathered basic data on instruments and techniques.

from an improvement in equipment and techniques—or from some unnoticed change in an actor’s appearance, clothing, make-up. Mickey and Felix provided a “constant,” an unchanging target which led to more exact information about television.

Problem after problem was met by RCA scientists, with the results you now enjoy daily. For example: In the “Twenties” and early “Thirties,” there were still people who argued for *mechanical* methods of producing a television image, despite the obvious drawbacks of moving parts in cameras and receivers. Then Dr. V. K. Zworykin, now of RCA Laboratories, perfected the iconoscope, to give television cameras an all-electronic “eye”—without a single moving part to go wrong. Today, this same all-electronic principle is used in the RCA Image Orthicon camera, the supersensitive instrument which televises action in the dimmest light!

Also developed at about this time, and again by Dr. Zworykin, was the *kinescope* tube whose face is the “screen” of home television receivers. On its fluorescent coating an electron “gun”—shooting out thousands of impulses a second—creates sharp, clear pictures in motion. Those who may have seen NBC’s first experimental telecasts will remember the coarseness of the image produced. Contrast that with the brilliant, “live” image produced by the 525-line “screen” on present RCA Victor television receivers!

Credit RCA scientists and engineers for the many basic developments and improvements which have made television an important part of your daily life. But don’t forget Mickey Mouse and Felix. They helped, too!

TV FEATURES

OF THE

MAURER

16 MM. CAMERA

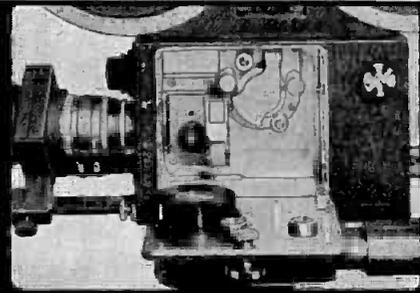

*The New Maurer
Multiple Sound Track
Details on Request*

The Maurer 16 mm. camera is the answer to your exacting TV production requirements. Designed *specifically* for professional use, it produces steadier, sharper and more accurately composed pictures under all conditions. Ease of operation, combined with many other unique features make the Maurer Professional tops in performance and dependability.

**The 16 mm. Camera Designed
Specifically for Professional Use!**

*For details on these and other exclusive
Maurer features, Write:*

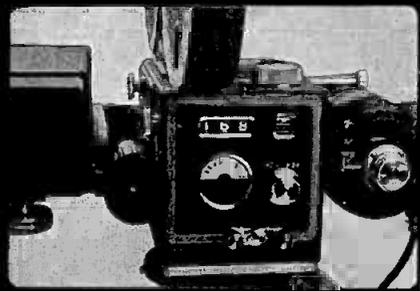

J. A. Maurer, INC.
37-01 31st Street, Long Island City 1, N. Y.

In the exclusive Maurer intermittent movement the functions of the pull-down claw and registration pin are combined, giving accurate registration in old or new film. Because it depends to a minimum extent upon the accuracy of 16 mm. perforations, this movement provides the most accurate registration obtainable.

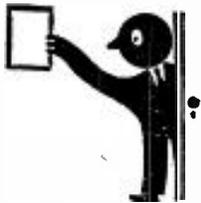

The unique Maurer focusing system provides full field composition through the taking lens. The image seen through the clear glass reticle permits the greatest magnification ever obtained in a motion picture camera for critical focusing, therefore obtaining the greatest accuracy.

The Maurer variable shutter has a 235° open segment . . . allowing use of a smaller aperture with the same lighting . . . giving greater depth of field. Calibrated in 1/2 lens stops, it permits quick and accurate change of exposure while shooting. The additional light transmission permits you to shoot your originals in color easily, a factor which is valuable now and may become much more important.

**16mm
maurer**

From where I sit by Joe Marsh

Give Us Back Our Sidewalks, Slim!

I wrote that over an article in our newspaper last week, but I didn't like doing it. After all, the man it was aimed at—Slim Henderson—is a good friend of mine.

Slim came into quite a windfall last month, and bought the old Clarke place. The deed gave him title to all the land—right down to the street. Then Slim started to take up the sidewalk to make his lawn look better.

I felt it wasn't fair to the town and said so in my article. Next morning Slim comes around and wants to know what I mean—getting folks riled against him. I felt ornery myself, and we had quite a set-to over the whole business.

From where I sit, that was foolish. Once we'd cooled off (over lunch and a bottle of beer at Andy's Tavern), Slim decided the sidewalks should stay—for the common good and I promised next time I'd take a good look at the other fellow's point of view before writing any articles about him!

Joe Marsh

JOE BOLLES, program director for WKRC-TV Cincinnati, named sales executive for station.

RICHARD HASBROOK, manager of Los Angeles office of Avery-Knodel Inc., elected chairman of Los Angeles Chapter, National Assn. of Radio Representatives.

THOMAS F. FLANAGAN, managing director of National Assn. of Radio Station Representatives, elected life trustee of Trinity College, Hartford, Conn.

JACK TIPTON and **JOHN McENIRY**, salesmen for KLZ Denver, join nighttime faculty of U. of Denver radio school.

ZELON H. WHITE, commercial manager of KSUE Susanville, Calif., appointed chairman of National Foundation for Infantile Paralysis for Lassen County, Calif.

ADAM J. YOUNG Jr. Inc. appointed national advertising representative for Midnight Sun Broadcasting Co. stations, KFAA Fairbanks and KENI Anchorage, both Alaska. Firm will represent stations throughout U. S. excepting Pacific Coast states where stations continue to operate their own office in Seattle, headed by GIL WELINGTON, national advertising manager.

'KORN KOBBLERS'

Old Judge Buys Ziv Show

SALE of *Korn Kobblers Show* to Old Judge Coffee Co. (product of David Evans Coffee Co., St. Louis) was announced last week by the Frederic W. Ziv Co., producer of transcribed programs. *Korn Kobblers*, featuring novelty and dance music on washboard, tin can, wash-tub, etc., was purchased by Old Judge Coffee for 12 markets in Illinois, Indiana and Kentucky.

Also announced is the leasing of Ziv-produced *Guy Lombardo Show* by Andrea Television in cooperation with its Cincinnati distributor, Johnson Electric Supply Co., to sell television sets via radio. Program was initiated on WCPO Cincinnati Jan. 29. Some 81 store owners attended a "kick-off" sales meeting at the Hotel Terrace Plaza sponsored by Haehnle Advertising Agency for Andrea retailers in cooperation with Joseph Kotler, Ziv account executive.

ABC *Bride and Groom* show moves to new 3:00-3:20 p.m. (PST) time slot, Monday through Friday. Program has taken new quarters at Lido Room of Hollywood Knickerbocker Hotel.

WILTON GUNZENDORFER, formerly general manager of KROW Oakland [BROADCASTING, Jan. 1], joins KYA San Francisco as sales manager.

CHARLES F. MILICI, **DANIEL J. BERNSTEIN** and **JOHN S. PALMER** in sales staff of WMGM New York. Milici formerly was on ad staff former *New York Sun*; Mr. Bernstein attended Harvard Business School, and Mr. Palmer was in television packaging business.

M. G. RAMBEAU Co. appointed national representative for WLIO East Liverpool, Ohio, effective immediately.

JOBERT M. DOOLEY, formerly with FAB and KOIL Omaha and KFOR Lincoln, Neb., named national sales manager for WOW Inc. He will represent WOW-AM-TV Omaha and WODY North Platte, Neb., all owned by WOW Inc.

JOHN SCHENK joins WMLL(FM) Evansville, Ind., as account executive.

WELLS ARMER, formerly with KTAR Phoenix, Ariz., joins sales staff of WSMO San Mateo, Calif.

FILION, formerly with Pan American Airways, joins New York sales staff of Robert Meeker Assoc., station representative.

MURRY GLYNN, former sales service manager of WLS Chicago, will join Walker Co., station representative, as Chicago manager, Feb. 13, replacing WILLIAM LEE, who will join Katz Agency, representative firm, as radio salesman. Mr. Lee will be assigned to Chicago office of Katz.

ARTHUR DURAM, sales promotion manager for CBS-TV since Jan. 1949, named network's television market research counsel. He will be responsible for delivering major presentations and for liaison between research department and CBS-TV salesmen. He went to CBS television in 1949 from WBBM (CBS) Chicago, where he was sales promotion manager. Previously he was with O'Brien & Dorrance, New York, as copywriter and contact and with Hillman Publications as promotion manager.

RED ELLIOTT, formerly of continuity department of WKRT Cortland, N. Y., transfers to station's sales staff.

WACK COSGROVE, formerly with sales staffs of WOC Davenport, Iowa, WJMS Ironwood, Mich., WATW Ashland, Wis., and most recently with WEBC Duluth, Minn., appointed sales manager of WEBC.

MURRAY T. GOERGER has been appointed executive assistant to Rowland Guilford, sales manager for New York sales office of Allen B. DuMont Labs. Inc. Mr. Goerger was formerly assistant district manager for the New York area of Ford Motor Co., having been with that organization 17 years.

how big can a
5,000 watt be?

Plenty big...if the station has one of the half-dozen best frequencies in U. S. radio.

that's WMT -- 600 k.c.

Plenty big...when ground conductivity and freq. combine to push the 2.5 mv. line way out

that's WMT -- with a 2.5 mv. contour of 19,100 sq. mi.

Plenty big...when there are people living in all those square miles

that's WMT land -- a "city" the size of Washington, D. C., spread out over the richest land in the world

WMT adds up to the kind of a station an advertiser needs to cover Eastern Iowa economically!

• The Katz man will provide full details. •

Now in our 27th year

FRANK ALLAN, news editor and disc jockey for KECK Odessa, Tex., is the father of a girl.

On All Accounts

(Continued from page 30)

Angeles with plans to expand in regional television within the next few months.

In addition, 10 other agencies are planning to go into radio and television soon.

Don Lauritzen has been faithful to Los Angeles ever since he was born there in 1914. Following in the footsteps of an older brother, he took up art work at Wiggins Trade School for two years following high school graduation. For the next few years he worked with Picc Sign Co., did free-lance art work and photography. In 1937 he joined Pacific Outdoor Adv. Co. first doing photographic work and later becoming merchandising manager.

Two weeks after entrance of the United States into the war in 1941 he joined civilian ranks at Todd Shipyards, San Pedro, Calif., a supervisor in Navy material where he remained the next four years.

Present Firm Organized

His next step upon leaving there was to form his present partnership.

Rockett-Lauritzen recently opened a Pasadena office and has further plans to expand its operation. Future plans also include going into packaging of television shows.

Don formed another, but less hasty partnership in 1939 when he married Margaret Cooper, who he had known for 11 years. Additions to their West Los Angeles staff include Donald Ross, 9; Robert Dillon, 7; Christina, 5.

Don's spare time is taken up with building and sailing small sailboats. He and Bob Rockett claim the building of the first plastic sailboat in that area.

In the realm of clubs, Don is a member of Academy of Television Arts & Sciences.

DISABLED VETS

Urged To Buy Radio Time

SUGGESTION that Disabled American Veterans Service Foundation, New York, buy radio time just as it is buying full-page newspaper and magazine space, has been made to the foundation in connection with its request for free facilities.

Promoting its third annual \$100,000 prize contest, the foundation sent a form letter to disc jockeys asking them to carry announcements "as a public service." Two announcements were enclosed with suggestion that they be used "as frequently as possible."

Maj. Gen. Irving J. Phillipson, Ret., chairman of the foundation's finance and budget committee, concludes his letter as follows: "We earnestly hope we may have your continued, wholehearted cooperation in this vital work on behalf of America's war-disabled veterans."

FCC POLICY

Hearings Are Postponed

ACTING on requests of industry or sufficient time to prepare for FCC's "uniform policy" hearing—at which licensee-eligibility of violators of U. S. laws other than the Communications Act will be considered and reviewed—the Commission last week postponed the proceeding until April 24. Hearing was to commence Feb. 13 [BROADCASTING, Jan. 30].

The Commission also postponed its deadline for filing of briefs and appearances from Feb. 6 to April 10. The proceeding was announced by FCC only a fortnight ago and, as was pointed out by petitioners for extension, less than two weeks was allowed to prospective participants to prepare for the case, which has wide implications. Some noted FCC apparently had been preparing for at least a year.

FCC's effort to secure uniform procedure for handling applications of those involved in civil and criminal proceedings outside the jurisdiction of the Communications Act stems from a 1948 Supreme Court decision holding the major motion picture producers to be in violation of anti-trust laws. Action on about a dozen broadcast applications has been held up because applicants or licensees were found by a federal court to have violated U. S. laws on monopoly, restraint of trade, unfair competition and the like.

In substance, FCC wishes to determine what violations or charges it might or is authorized to consider in its license procedures, and how far such consideration should extend.

NAB told the Commission that its general counsel, Don Petty, would participate. In requesting postponement of the hearing, NAB noted the "difficult and important legal issues raised." Among others filing requests and comments were Loew's Inc.; 20th Century-Fox Film Corp.; Welch, Mott & Moran, Washington radio law firm; and Ralph Walker, Washington radio attorney, individually, and on behalf of WKY Oklahoma City, WNAO Raleigh, N. C., and Yankee Network.

BENJAMIN DARROW

'School of Air' Founder Dies

BENJAMIN DARROW, 60, founder of the country's first *School of the Air* on WLS Chicago in 1924, died in Columbus, Ohio, Jan. 28. Public relations director of The Ohio Public Expenditure Council at the time of his death, Mr. Darrow also at one time organized a school of the air program at WLW Cincinnati.

Surviving are his widow, four children and a sister. The eldest son, Richard W., is a director of public relations for the Glenn L. Martin Co. in Baltimore.

A Touch of Disney

IT starts about 7 p.m., and sometimes sings until midnight. A crooner? A bird? No, a mouse. KAYL Storm Lake, Iowa, reports that this unique songster was captured in a Cherokee, Iowa, home after some folks heard what they thought was a bird singing in the house. KAYL further reports that it sounds exactly like a thrush or canary and the public has been flocking in to see it at the studio. The station made a tape recording of one of "Midnight's" song fests and played it on the Jan. 19 noon hour newscast.

PULSE RATINGS

Top 10 N. Y. Shows Listed

TOP TEN evening and daytime radio shows in New York during the week of Jan. 3-9 as measured by The Pulse Inc. were:

Sealy Plans Radio-TV

SEALY Mattresses, Chicago, will introduce its new orthopedic mattress, claimed to be the only one on the market approved by the American Medical Assn., in a heavy national radio and TV spot campaign starting April 10. Bulk of advertising (other media will be used) will be used that month. Spot announcements and station breaks for AM will be released to 29 factories for sponsorship locally. Some of the national business will be paid for by the parent company. Agency is Olian Advertising, Chicago, and Jerry Joss is account executive.

He Fences In All Types of Homes

His audience is as wide as the country; he appeals to housewives in Oregon, farmers in Texas, laboring men in Michigan. Says Mr. D. W. Thompson, Secy-Treas. of the Angelina County Lumber Co., Lufkin, Texas, to Station KTRE:

"Mr. Lewis' stand on old-time Americanism is just what this company likes to keep before the public. We are pleased to tell you that his program has a very wide listening audience in all types of homes: that is, among the laboring class, as well as among the business-men and management, and farmers. Our company owns forestlands in other counties . . . and the wide coverage afforded by KTRE facilitates our taking to the people a very fine daily news commentary."

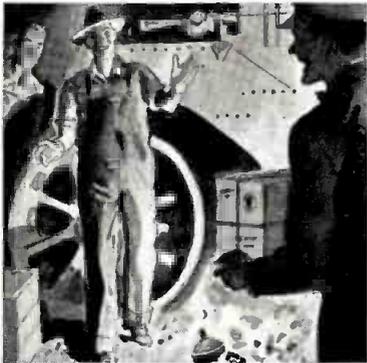

Lively, stimulating, widely followed, the Fulton Lewis, Jr. broadcast is currently sponsored on more than 300 stations. It offers local advertisers the prestige of a network feature, at local time cost with pro-rated talent cost.

Since there are more than 500 MBS stations, there may be an opening in your city. If you want a ready-made audience for a client (or yourself), investigate now. Check your local Mutual outlet—or the Co-operative Program Department, **Mutual Broadcasting System**, 1440 Broadway, NYC 18 (or Tribune Tower, Chicago 11).

Contractor saves penalty of \$500 — by investing \$3.84 in Air Express

Time clause in housing project paving contract stood chance of being invoked when equipment broke down at 5 P.M. 10-lb. carton of replacement parts Air Expressed from 1200 miles away. Delivery in 8 hours. Air Express charge only \$3.84—and contractor completed job on time.

\$3.84 is small charge indeed, since it covers door-to-door service. Anytime delivery, 7 days a week, at all airport cities. This feature makes the world's fastest shipping service the most convenient to use.

Air Express always goes by Scheduled Airlines; this means extra dependability, experienced handling. And shipments keep moving 'round the clock. Regular use of Air Express keeps any business moving.

Only Air Express gives you all these advantages

- World's fastest shipping service.
- Special door-to-door service at no extra cost.
- One-carrier responsibility all the way.
- 1150 cities served direct by air; air-rail to 22,000 off-airline offices.
- Experienced Air Express has handled over 25 million shipments.

Because of these advantages, regular use of Air Express pays. It's your best air shipping buy. For fastest shipping action, phone Air Express Division, Railway Express Agency. (Many low commodity rates in effect. Investigate.)

Rates include pick-up and delivery door to door in all principal towns and cities

A service of

SCHEDULED AIRLINES of the U.S.

KLEBAN NAMED

Is Simmonds & Simmonds V.P.

MONTE KLEBAN, former member of the executive staff of KTRH Houston, has been named vice president in charge of the new Southwest branch of Simmonds & Simmonds Inc., Phil Tobias, president of the advertising agency, has announced.

Prior to serving at KTRH, Mr. Kleban was program and production manager at WOAI San Antonio. Mr. Tobias announced the opening of the new office to handle Southwest advertisers and to service national accounts advertising in the vicinity. The office is located at 533 Fidelity Bldg., Dallas 2. Phone number is Central 8504.

Mr. Kleban

TR CONTRACTS

Placed in Five Markets

CONTRACTS, including renewals and first-time sponsorships, were announced last week by Transit Radio Inc. for five separate transit markets.

A third successive renewal of TR advertising in Houston, Tex., for Bond Stores has been placed by Neff-Rogow Agency, New York, calling for 12 announcements per week, the firm said.

Other contracts were:

Terre Haute Brewing Co. through Pollyea Agency, 24 announcements per week for 52 weeks at Flint, Mich.; Bauer & Black Inc. (Bluejay products) through Henri, Hurst & McDonald, Chicago, 20 announcements per week for 13 weeks at Evansville, Ind.; Miles Labs. Inc. (One-A-Day Vitamins) through Wade Advertising, Chicago, 17 announcements per week for 26 weeks at St. Louis. Renewals in Cincinnati were John Shillito department store, Biedenbender Clothing Co. and Cincinnati Gardens Inc. New account is Song Shop, 26 announcements per week.

P. LORILLARD CO.

Names Three to Adv. Dept.

P. LORILLARD CO., New York (Old Gold cigarettes), has appointed three new executives to its expanded advertising department, H. A. Kent, president of the company, announced last week. The new executives are Fred G. Robbe, formerly account executive with Young & Rubicam, New York, as assistant advertising manager; Claude W. Berkley, previously with the company's sales department, as media director, and George Whitmore, formerly business manager of the Burke Dowling Adams Agency, as supervisor of advertising control and analysis.

The expansion, according to Alden James, director of advertising and public relations, resulted from increased advertising promotion, healthy growth of the company's cigarette brands and creation of the cigar division.

'BAD AXE BABY'

Song Heralds WLEW Debut

IN connection with its scheduled opening next Saturday (Feb. 11), WLEW Bad Axe, Mich., has had published a song titled "I Found My Baby in Bad Axe." With words by Chet Hey and music by Ted Shunk, the song is printed in standard size sheet music, brightly colored.

Owned and operated by the Saginaw Broadcasting Co., which also owns and operates WSAM Saginaw, WLEW will operate daytime on 1540 kc with 250 w. Milton L. Greenebaum is president and general manager of the Saginaw Broadcasting Co.

TAX-FREE ISSUE

WGGG Asks Limit on WRUF

CHARGE that Florida stations enjoying tax support while accepting advertising are unfairly competing with privately-owned tax-paying stations is made by WGGG Gainesville.

WGGG has asked the Florida State Board of Control to prevent WRUF Gainesville, U. of Florida outlet, from competing with it for local advertising, according to an Associated Press dispatch. WGGG operates with 250 w on 1230 kc. WRUF is a 5 kw outlet on 850 kc.

The state board took no immediate action on the plea other than to instruct the manager of WRUF to defer efforts to sign broadcast rights for local professional baseball games until a university committee studies the situation.

President R. M. Chamberlin, of WGGG, said WRUF competition for local advertising hurt his enterprise and contended WRUF could operate without loss by obtaining income from national advertisers. Should WRUF not get enough revenue from state appropriation or national advertising, he added, "it should at least raise its rates to the average charged by other 5 kw stations instead of competing with WGGG at 250 w rates."

Hollis Pineheart, member of the state board, said he was inclined to agree with Mr. Chamberlin's proposal except that Gainesville merchants may be relying on WRUF's 5 kw coverage, according to the AP dispatch. The topic will be discussed by the board Feb. 16 at a Gainesville meeting.

It is contended WRUF along with WJAX Jacksonville (city-owned) and WSUN St. Petersburg (city-owned) enjoy tax support. WGGG also points out that privately owned outlets pay real estate and personal property taxes as well as license and other fees.

PROMOTION for "Children's Dental Health Day," today (Feb. 6) was carried by more than 50 AM and FM stations in New York state. Each station carried one special 15-minute show pointing up importance of day.

Production

ISLAND window, completely encased in glass and "viewable" from all sides is effective local promotion used by WENT Gloversville, N. Y. Using slogan, "WENT is in the Window," station moved its studio operation into window, which belongs to town's largest department store, for Radio Week. Complete studio, plus control room, newsroom and copy-commercial room, carried on its activities before the public eye with full staff present. Two week promotion over station preceded move, with slogan lines at bottom of newspaper promotion carried week before and during window operations. Segments of daily programming were carried from window with public asking questions and being shown intricacies of operations during off-the-air hours.

WERE is There

PHRASE, "WE'RE Cleveland," has been used by WERE that city since it took the air. Station's programming often carries "We're" tag line also, for example: On-the-spot news coverage is tagged, *WERE There*, and children's show, *WERE Pretending*.

Long Quiz

QUIZ show lasting 20 days currently being carried as part of 20th anniversary promotion by WBTM-AM-7M Danville, Va. Ten prizes have been donated to station by local merchants. Station visits two stores per day, shows merchants' prizes and tells them to "talk for it." Speeches are recorded for judgment by panel of judges at end of month, with prizes going to 10 top winners. Show is called *Talk for It*.

Coverage Folder

NAVY, blue and white folder sent to grade by WBTW (TV) Charlotte, N. C., pictures map of Carolinas. Flags set up from map carry quotes of viewers who have seen WBTW from points as much as 160 miles distant. Line up of remarks from set owners in points throughout the Carolinas and adjoining states complete folder. Station remarks, "WBTW is providing satisfactory television service to 57 Carolina counties with over 3,000,000 population."

Katz for Women's Shows

FOUR-page booklet issued to trade by Katz Agency Inc., station representative firm, summarizes women's service programs available on participating

basis on Katz represented stations. Twenty-three shows on 22 stations from Miami, Fla., to Spokane, Wash., are included. Rates, time and other pertinent material is incorporated in folder.

Born With Silver Spoons

ALL New Year's Day parents who wrote to 1847 Rogers Bros. and MBS *Queen for a Day* show, substantiating their blessed event with name of hospital and physician, are receiving special presents from company. Children receive silver spoons. Gimmick reportedly drew response from approximately 20% of parents of children born that day.

Trade Reprint

HEADING on latest promotion bulletin from WWDC Washington announces, "WWDC Turns 'Headlines' in 'Buy Lines'." Bulletin deals with reprint of success story concerning Jon Massey, Negro disc jockey for station. Pulse report on Mr. Massey's listener pull is recorded.

Gift Certificate

CLIENTS of WMAQ (NBC) Chicago—network, local and spot—last week received "gift certificates" representing their share in a promotional announcement bonus totalling \$1,004,614 worth of free time. Mailed by Promotion Manager Harold A. Smith, the certificates represented 15,652 promotions aired last year.

Blue Promotion

SSOLID blue bulletin promotes *Melody Merry-Go-Round* on WLAW Lawrence, Mass. Disc show was reviewed by trade magazine and reprint of review appears on bulletin accompanied by picture of Bob Perry, show's m.c.

WORZ's Sign

LARGE neon sign, measuring 30 by 18 feet and featuring thermometer six feet in diameter, is passed by 70,000 Floridians daily. Sign was erected by WORZ Orlando and prominently displays its call letters, dial position and NBC affiliation.

Building Promotion

FOR persons who wish to watch construction on building being erected by Baltimore Federal Savings & Loan Assn., Baltimore firm has set TV peepholes into fence around excavation. Behind each peephole is set a wheel bearing various slogans. Wheel must be turned past these slogans before

viewer can see construction work. Loan Assn. sponsored *This Is Your Zoo* on WAAM(TV) that city, for 17 weeks, stopping sponsorship when its building was torn down. Promotion for show, still carried by station, is seen on wheels.

Personnel

JACK MCKENNA, in radio for more than 10 years, appointed promotion and program manager of WEBC Duluth, Minn., replacing BILL CONNOR, resigned.

DON KELLY, director of public relations for WBBM Chicago for five years, resigns. Before joining WBBM he spent six years with WLS Chicago as promotion and publicity director.

STANLEY G. BOYNTON RADIO ADV., Boston, reappointed to handle advertising for WJR Detroit.

GEORGE FIRESTONE joins advertising and promotion staff at NBC's Central Div. He formerly worked in sales promotion for International Truck Div. of Clark Equipment Co., Battle Creek, Mich.

WILLIAM A. GORMAN, formerly with Bert Dunne Inc., and before that with Super Grocers News and Budde Publications, all San Francisco, joins KFI Los Angeles promotion department. He will work on station's grocery promotions and other merchandising projects.

AL ALPERSTEIN, member of promotion staff of Pan American Broadcasting, New York, is the father of a girl, Eleanor Reba.

M-G-M ADDITIONS 36 Subscribe in January

METRO-GOLDWYN-MAYER Radio Attractions added 36 stations to its list of subscribers during the first three weeks of January, bringing to more than 150 its total subscriber list. Announcement was made last week by Bertram Lebharr Jr., director of WMGM New York and head of the recently-created transcription service.

Among stations which signed contracts in January are three 50 kw outlets: WBAL Baltimore, KABC San Antonio and KRMG Tulsa. Others signed were: KFBI Wichita, 10 kw; WREN Topeka, 5 kw; KTRI Sioux City, 5 kw; WJPS Evansville, Ind., 5 kw, and KSO Des Moines, 5 kw.

Seventeen additional Intermountain Network stations were signed to take in the entire network of 23 stations. They were: KID Idaho Falls, KVMV Twin Falls, KFXD Nampa, all in Idaho; KBMY Billings, KRJF Miles City, KMON Great Falls, KOPR Butte, KPRK Livingston, all in Montana; KRAM Las Vegas, Nev.; KSUB Cedar City, and KSVC Richfield, both Utah; KVRs Rock Springs, KSPR Casper, KWYO Sheridan, KPOW Powell, KOWB Laramie, KOVE Lander, all in Wyoming.

Also signed: WVOA Tucson, Ariz.; WEEK Peoria, Ill.; KFOR Lincoln, Neb.; KBON Omaha, Neb.; WAEB Allentown, WCNR Bloomsburg, WCPA Clearfield, WBPZ Lock Haven, WPPA Pottsville, WBAX Wilkes-Barre, WRAK Williamsport, all in Pennsylvania.

Is frequency important?

you bet it is!

...and it's doubly important in radio. For example, WHTN has Huntington's most favorable frequency (800 kc.) and is Huntington's only clear channel station. That gives WHTN the best .5 mv/m contour of any station in town, regardless of power, plus a clear, strong signal that reaches the homes of over 100,000 families. Add to this an FM bonus on WHTN-FM, most powerful FM station in the Central Ohio Valley, and you've got a low-cost, high power medium for tapping the gold in these hills. Take a look at the Huntington Market ...then make up your mind to get your share by using WHTN and WHTN-FM.

Respects

(Continued from page 32)

populace and the wooing of his childhood sweetheart, Mary Jane Nelson. Living there with his family, he got a statistical job with General Mills when his uncle sold the firm a flour mill. The uncle is still suspected of putting a clause in the sale contract which called for a job for his favorite nephew. Between then (1929) and now, Lowry Crites rose from statistical clerk to media director in 1942 and to Mr. Gale's administrative assistant in 1947.

"Best work I ever did, though, was marry that Nelson gal," he says. They were wed May 23, 1931 in Oklahoma City, where the bridegroom was working as assistant to the comptroller of GM's southwestern division, which covered Oklahoma, Texas, Arkansas and New Mexico.

Resigning this post to become sales manager for GM's bulk products—flour and feed—he was reassigned in 1935 to the deeper south, and went to Atlanta as comptroller of the southeastern division. In 1940, Mr. Crites steamed northward to Minneapolis headquarters, where he progressed from comptroller of advertising to his present post.

For several years now, he has had direct charge of the premium division, accounting and all media. Until a year ago, he also headed the motion picture unit, which was then separated from other media. General Mills produces numerous institutional and still films.

Screens Prize Ideas

Premium activity is one of the firm's major projects, as General Mills has pioneered in offering Buck Rogers rings and the like to children with a voracious appetite for Wheaties. Eighty percent of the premium ideas, however, are submitted by the firm's agencies—Knox-Reeves, Minneapolis; Dancer-Fitzgerald-Sample, and BBDO, both New York, and Tatham-Laird, Chicago. Mr. Crites screens all prize suggestions submitted by private persons. One man from each agency works with him in selecting between 40 and 50 kinds of merchandise offers each year.

Because his duties are manifold, and because the theme of the entire corporation is teamwork, Mr. Crites' functions are broad and lack specific definition. One responsibility, however, is coordination of policies and activities among the agencies. He also establishes procedure in getting General Mills time and space franchises.

As media director, he supervises radio and television. The talent or creative aspects are handled separately. The most advertised of the company's products are 17 in the grocery line and five among mechanical appliances. Advertising on these represents about 95% of the total ad budget per year, although several hundred other prod-

ucts are manufactured by the milling firm, including feeds, flours and special items.

Between 40 and 45% of the 1949 advertising budget—some \$6 million—went to radio, with about 5% additional for television. At this point, the only TV investment is *The Lone Ranger* on ABC-TV and a few scattered spots around the country. AM shows include *Today's Children* and *Light of the World* on NBC, and *The Lone Ranger*, *Jack Armstrong*, *Modern Romances*, *Betty Crocker*, and *Breakfast Club* on ABC. For the fourth consecutive year, General Mills was the highest single ABC advertiser in 1949. Happy about the way viewers are reacting to *The Lone Ranger*, Mr. Crites' only comment about TV is "I kinda like it."

Prevents Overlapping Duties

Working for maximum coordination as a member of a large team, he confesses his main administrative problem is stepping in where agency duties overlap. He presents to each agency his suggestions and ideas after checking closely with other top-echelon GM men. Acting as a liaison "between different members of the same family," he sees that agencies get statistical information on sales and returns as soon as the parent company. Agency executives, rather than taking cues from him directly, get enough basic data to work on their own. He accepts agency recommendations about 95% of the time.

Liked as well as respected by agency men with whom he works, Mr. Crites is noted for two jokes branded with "L.C." A favorite definition, which he uses as a needle, is one of a smart man, "who always agrees with me." And, when presenting a costly project, he explains that it is by "Crites arithmetic, one million off one way or the other."

Long, lithe and lanky, with a Texas twang softened by a deep south drawl, Lowry Crites indulges his love for seclusion by living 25 miles outside Minneapolis on Lake Minnetonka. There, with his wife and 15-year-old daughter, Jane Ann, he dons blue jeans and sports

shirt and fishes for bass from his front porch. Ice fishing is fine, too "but not after it reaches 10 below." He's one of the few avid fishermen who admits he learned all about it from his wife.

His duo alter ego—complete with two nicknames, Pete and Skinny—enables him to combine the rustic with the modern, the unhurried with the harried. That's why he can confer with corporation presidents about a \$10 million project in the morning and put on Texas boots that evening for a square dance in Wisconsin. "Only trouble though," he says, "I get worn down to a nub in 30 seconds—by Virginia reels, that is."

Among his other social activities Mr. Crites is a member of Kappa Alpha fraternity and the University Club of Minneapolis.

WARNER-HUDNUT

Two Firms Realign in One

WILLIAM R. WARNER & Co. and Richard Hudnut Co. will be realigned and be known as Warner Hudnut Inc., it was announced at the board of directors meeting in New York last week.

At the same meeting Elmer H. Bobst, president and director of the parent firm, William R. Warner & Co., was elected president of Warner-Hudnut. He also becomes director of the company. Other remaining in their posts are Robert J. Davis, Warner-Hudnut executive vice president and director, and Charles A. Pennock, director and president.

Microgroove Records

NEARLY 1,100 U. S. and Canadian stations are equipped to play Long Playing microgroove records, Robert J. Clarkson, general manager of Columbia Transcriptions Inc. has announced. Mr. Clarkson said that microgroove transcription have already been used by such CBS clients as Dancer-Fitzgerald Sample, Benton & Bowles, Marc Dimes and National Medical Health Assn.

Every single one of the nation's ten largest agencies evaluates local market potentials with the aid of—

SALES MANAGEMENT'S "Survey of Buying Power."

(1950 issue May 10; Reservations Close Feb. 17; Copy March 10)

JOHN A. GUINAN, formerly with WGBI Scranton, WCAU Philadelphia and WGR Buffalo, N. Y., joins WQAN-AM-FM Scranton as production manager and sports director.

ALAN YOUNG, comedian, signed to five-year contract covering radio and television by CBS.

ROBERT ARMBRUSTER, conductor-pianist with NBC for several years, named musical director of NBC Western Div. effective Feb. 12. He fills position vacated by **HENRY RUSSELL**, who leaves to devote full time to Hollywood advertising career he has formed with Vick Knight. He continues, however, as musical director of NBC *Halls of Ivy* show.

ROSCOE GROVER, former manager of KSUB Cedar City, Utah, joins program department of KSL Salt Lake City. He began his radio career 20 years ago with KSL. **JOSEPH A. KJAR**, former announcer for KSL, appointed assistant program director for station.

ARNIE COURTNEY, former newscaster at CHVC Niagara Falls, Ont., appointed program director of CHNO Sudbury, Ont.

BILL BRYAN becomes m.c. of five weekly hour recorded music program on KFMV (FM) Hollywood and KWIK Burbank, Calif.

CHARLES RAY, formerly with KENT Shreveport, La., KRUS Ruston, La., and WQBC Vicksburg, Miss., joins announcing staff of WRBC Jackson, Miss.

DANA ADAMS, former announcer with KFRO Longview, Tex., and KTBB Tyler, Tex., joins announcing staff of KFDX Wichita Falls, Tex.

B. CLARK, formerly on announcing staff of WBT Charlotte, and before that program director of WRAL Raleigh, WDNC Durham and WAYS Charlotte, all North Carolina, appointed assistant to **GRADY COLE**, WBT commentator.

VICK REIGHARD, former part-time announcer in Akron, Ohio, joins WCUE Akron as morning man.

"DOC" BENJAMIN, Miami entertainment editor, starts 15-minute across-the-board evening series, *Speaking Entertainingly*, over WTTT Coral Gables, Fla. Series is sponsored by Old Gold cigarettes.

LEE HAMILTON, formerly with CHUM Toronto, returns to station as disc jockey and special events man.

LOUIS LENNON named studio assistant for WAAM(TV) Baltimore. **ROBERT DEMETRICIAN**, former lay-

Production

out artist, promoted to assistant art director, and **FREDERICK SCHNEEMAN** appointed layout artist for WAAM.

RICHARD von ALBRECHT, former production manager of Herbert S. Laufman & Co., television packaging house in Chicago, joins WKRC-TV Cincinnati as program director. **F. C. LAMBERT**, former assistant to director of engineering for DuMont network, named head of WKRC's television technical operation. **SYD CORNELL** ap-

Mr. von Albrecht

pointed commercial production manager for WKRC-TV.

ED MURPHY, formerly of WGN-AM-TV Chicago, joins WSYR Syracuse, N. Y., as morning man.

BOB SEAMAN, formerly with KVSM San Mateo, Calif., joins KIBE Palo Alto, as announcer-producer and newscaster.

NORM KELLER, news editor for WSNH Quincy, Fla., named program director for station.

FRED FISKE, former staff announcer for WOL Washington and before that with WKLX and WLEX Lexington, Ky., joins announcing staff of WWDC-AM-FM Washington. While at WOL, Mr. Fiske was Mutual's commentator on veterans affairs.

KITTY BROWN, formerly of WHKK Akron as continuity director, joins WCUE Akron in same capacity.

JOHNNY McKNIGHT, former announcer at WMCA New York and WTOP Washington, joins announcing staff of WVNJ Newark.

ROBERT ARDEN, currently doing weekly quarter-hour *American Looks Abroad* newscast on KFMV (FM) Hollywood and KWIK Burbank, Calif., starts same program on KFOX Long Beach.

TOM CORRADINE formerly head of Embro-Madison TV Productions, Hollywood, joins KTTV (TV) Los Angeles as film director.

MIKE RICH joins announcing staff of WHLI-AM-FM Hempstead, L. I. He formerly was with WROW and WOKO Albany, WTRY Troy and WLIB New York.

NORMAN FEASTER, formerly with Pan-American Airways in Miami, Fla., joins WTVJ (TV) Miami, as assistant film director.

ERNIE SIMON, formerly of continuity department of WKRT Cortland, N. Y., and later program director of WOSC Fulton, N. Y., rejoins WKRT continuity. **JOHN LOUTHER**, formerly of WNDR Syracuse, N. Y., joins WKRT announcing staff.

MILT KOMITO, former night traffic man at WMAL Washington, appointed to production staff of WMAL-TV.

EDDIE HIGGINS appointed feature editor on George Putnam's new programs, *Broadway to Hollywood* and *Headline Chues* on DuMont television.

BILL WOODSMALL, winner in CBS *Horace Heidt Show* competitions, airs 15-minute show, Tues., Thurs., 8:30 a.m. on WBBM Chicago.

MICKELL NOVACK, Hollywood correspondent for *Philadelphia Evening Bulletin* and freelance magazine writer, joins panel of *ABC Hollywood Byline*.

BOB ROBB, chief of KECA Los Angeles continuity acceptance department and chairman for Southern California's National Defense Week activities, is in Washington as ABC representative to work with Air Force Reserve headquarters on plans for TV broadcast in celebration of National Defense Week. All four major networks will carry broadcast. Mr. Robb is Air Force Reserve major.

MRS. N. EDWARD WORSTALL, women's news editor of WSTV Steubenville, Ohio, appointed general chairman of women's chapter of American Red Cross fund raising campaign in Jefferson County, Ohio.

JACK MATRANGA, production manager of KSYC Yreka, Calif., resigns to attend technical school. He was formerly with Armed Forces Radio Service in Japan as civilian program director.

DON CORDRAY, disc jockey for WJR Detroit, is the father of a boy, David Stanton. Mrs. Cordray is former **PAT FIELD**, disc jockey for BBC.

HUGH JONES, newswriter at WBBM Chicago, is the father of a girl, Rebecca, born Jan. 23.

JOSEPH WILLIAM KELLY, Jr., announcer at WELL Battle Creek, is the father of a boy, Shawn Charles Kelly, born Jan. 22. Child is the second grandchild of Quizmaster Joe Kelly on NBC's *Quiz Kids*.

CKVM Ville Marie, Que., new 1 kw outlet on 710 kc, went on the air on Jan. 7, according to report of Radio Branch, Dept. of Transport, Ottawa.

CHRIS O'BRIEN, attorney and former executive in American Federation of Radio Artists, named assistant executive secretary for West Coast branch of Actor's Equity. He replaces **I. B. KORNBLUM** who had acted as special representative for AE. Mr. Kornblum will continue to be associated with union office as member of legal counsel.

PAUL O. RIDINGS, former president of Ridings & Ferris Inc., Chicago public relations firm, and most recently director of publicity and head of journalism department at Texas Christian U., Ft. Worth, Tex., joins Guy Witherspoon, public relations firm, Ft. Worth, as partner. Name of organization becomes Witherspoon & Ridings, with offices continuing at 1705 Electric Bldg.

RALPH ROCKAFELLOW, in charge of publicity and sales promotion of Paramount Pictures Corp., appointed advertising and sales promotion manager. Before joining Paramount, he was with Buchanan & Co. and Young & Rubicam, New York, for several years.

FRANCIS CARTER WOOD Jr., partner and vice president of Sound Masters Inc., New York, assumes full re-

sponsibility for all television activities of firm. He reportedly plans to reorganize entire television department at Sound Masters.

JOHN NEWMAN, formerly advertising and publicity director of International Artists Corp., appointed director of advertising and program promotion for TV-Programs Inc., New York. **DON ROSS** named director of sales.

TED WICK, formerly radio director of David O. Selznick Productions, Hollywood, named assistant to Martin Lewis, radio director of Paramount Pictures Inc., that city. He will write spot announcements and talent interviews for broadcasting.

MARY ANN MERCER, singer, signed by Story-Ad Films Inc., Hollywood, for 15-minute television show.

ASSOCIATED ARTISTS PRODUCTION Ltd., New York, announces removal of offices to 444 Madison Ave., New York 22.

Equipment

JOSEPH R. BRANSFORD, personnel director of Western Electric Co. since May 1, 1948, elected financial vice president succeeding **GEORGE L. BEST** who resigned to accept vice presidency with AT&T. In addition

to his new duties, he will continue to be responsible for personnel administration. Western Electric engineer since 1928, he was in charge of WE shops producing radar and radio equipment for armed forces during war.

COLONIAL RADIO Corp., manufacturers of radio and TV sets and wholly-owned subsidiary of Sylvania Electric Prod. Inc., absorbed by that company. **E. E. LEWIS**, formerly president of Colonial, elected vice president of Sylvania in charge of Colonial Radio and TV Div. Other personnel and policies of subsidiary company remain unchanged.

GENERAL ELECTRIC Co., Syracuse, N. Y., announces modified replaceable stylus assembly for use with its variable reluctance phonograph cartridge. New design is called "Baton Stylus."

Dr. HARVEY FLETCHER, former director of physical research for Bell Telephone Labs., appointed visiting professor of electrical engineering at Columbia U. School of Engineering for spring session, beginning today (Feb. 6).

Feature

(Continued from page 30)

this activity is only a sample of his daily routine.

As an assistant professor of physics at Drexel Institute of Technology, Mr. Davis has a teaching schedule of 15 classroom hours per week plus many more hours of preparation. In addition, he attends classes at Temple U. three days a week for a total of nine hours in pursuit of a Ph. D. in physics.

Once-a-week he participates in night drill exercises as captain in the Air National Guard. To keep his "spare hours" occupied, Mr. Davis makes himself available at least one night a week as a speaker at club functions.

A few more talents are seen in radio-TV weather forecasting by Mr. Davis. He says "the television weather man must be a combination scientist, actor, artist and diplomat." According to WFIL's student of the elements, "television will hardly make the weather man a better forecaster, (but) it could very well be the biggest aid in promoting good public relations the weatherman has ever had."

GEORGE O. MILNE

ABC, NBC Pioneer Dies

FUNERAL services were held last Wednesday at Paterson, N. J., for George O. Milne, 47, director of technical operations for ABC, who died Jan. 28, in a Miami Beach hospital of a heart attack.

Mr. Milne joined WEAJ New York (now WNBC) in 1923 as maintenance man. In 1928 he was advanced to operations supervisor at that station. He joined NBC in 1930 as division engineer and remained there until 1942 when he left to go with ABC. He is survived by his wife, Mildred, and two sons, George F., and Douglas.

N. C. GROUP

Annual Meet Set May 22-23

THE EXECUTIVE committee of the North Carolina Assn. of Broadcasters, meeting Jan. 28-29 at the

Mr. Jarman

Mid Pines Club Southern Pines heard a report of the reorganization committee of the association named a new legislative committee, selected May 22-23 as the date of the 1950 annual convention and Chapel Hill as the location, and discussed other business matters.

Reporting as chairman of the reorganization committee, J. Frank Jarman, WDNC Durham, presented proposed plans which were adopted by the executive committee. The reorganization committee was directed by the executive group to present the plans in written form to all stations in the state in advance of the May meeting. At the annual meeting the proposal will be placed before the membership for approval.

Richard H. Mason, WPTF Raleigh, was named chairman of the legislative committee which will study several matters of primary interest to broadcasters, looking toward action to be taken at the next session of the General Assembly.

Attending the Southern Pine meeting were: President Robert H. Wallace, WOHS Shelby; Vice President Earl Gluck, WSOC Charlotte; Executive Secretary-Treasurer Jack Younts, WEEB Southern Pines; Directors Harold Essee of WSJS Winston-Salem, Louis Howard, WHIT New Bern, and Cecil Hoskins, WWNC Asheville. Mr. Jarman and Walter Goar WAYS Charlotte, members of the reorganization committee.

OMAHA AD CLUB

Local Selling Stressed

EFFICIENCY in local advertising was stressed in an address by W. J. Broman, division and sales manager for Frederic W. Ziv Co., transcription firm, before the Omaha Advertising Club Jan. 24. Omaha stations played host to leading business firms.

Pointing out that 75% of the nation's business is of local nature Mr. Broman told the group that "today's prosperity is dependent upon good buying, selling and distribution of goods" and that "sales programs are too often set up on chance." Advertising creates the need, desire and demand for goods he reminded, and must deliver "if our prosperity is to continue."

REGULAR City council meetings are aired weekly Monday 9-9:30 p.m. directed from council chambers by KCMO Kansas City, Mo.

MUSICAST FM

Plans To Sell Franchises

MUSICAST, an FM continuous music service employing a muting device, has announced it plans to grant franchises for a flat fee to other FM stations in the country sometime in February. The service was developed by Sundial Broadcasting Corp., owner of KDFC (FM) San Francisco which now services 60 individual firms—such as banks, beauty shops, restaurants, retail shops, etc.—in the Bay area.

According to Musicast, many broadcasters "who in the past could only foresee the failure of their FM investments can now look forward to future profits with Musicast." The special muting device, which permits the FM station to eliminate a specially constructed receiver's portion of its programs that it desires, was perfected four months ago by Oscar C. Darack, KDFC staff engineer.

A Musicast operation franchise, the firm explains, will include the rights to the copyrighted name, muting, installation and maintenance of receivers and speakers which receive the continuous program of background music (8-1 m.) and exclusive territorial rights. A continuing monthly rental will be charged on each receiver leased to the franchise holder, which the company says would enable FM station to enter this type background music service on a small capital investment.

Muzak Corp. has pending a petition before the FCC for a rule-making proceeding to permit it to use FM stations to carry its programming [BROADCASTING, Jan. 15]. Muzak's petition envisions the use of supersonic signals and of multiplexing.

NEW AP UNIT

Formed in South Carolina

THE ASSOCIATION of South Carolina Associated Press broadcasters was organized Jan. 21 by AP radio members in the state. The group met following a meeting in Columbia, S. C., of the South Carolina Broadcasters Assn.

James Hicks, manager of WCOS Columbia, was elected president. Scott Russell of WESC Greenville as chosen vice president, and Paul Benson of WJMX Florence, secretary. Directors in addition to the officers, are: Robert Bradburn, WTMA Charleston, and Frank Best WRNO Orangeburg.

Small City Hoopers

E. HOOPER Inc. is offering to produce one-time Hooper station audience indexes for small cities at \$50 each, which sum may be paid by one station or prorated among all stations covering that market. Surveys will be made by the mail ballot method developed by the research firm for its area coverage index and will cover both telephone and non-phone homes.

JUNKETING FARMERS

Three Individual Stations Back Tours

VISITS by farm groups to many parts of this hemisphere and to Europe will get underway this spring under sponsorship of three individual stations, each serving the nation's rich farm belt. Stations are KCMO Kansas City, Mo., WOW Omaha and WKY Oklahoma City.

Mr. Hansen

Purposes of the tours are to acquaint the American farmer with his counterpart in other parts of the U. S. and in foreign lands.

KCMO's tour will be composed of 20 farmers who will be Europe-bound this month for a 25-day study of the Old Continent. All of the party's members are leaders in their communities. Flying from LaGuardia Field, New York, on Feb. 14, the tour's first stop is France where the Americans will be guests of the General Confederation of Agriculture at Chatres. Next journey's leg will be Italy.

From Italy, the KCMO tour will move into Switzerland at Brugg, headquarters of the Swiss Farmers Union. Other countries to be visited include Germany, France, Holland, England and Monte Carlo. At each place the group will meet with agriculture officials and visit farms typical of the country. The tour is scheduled to terminate in New York March 11.

WKY Tour Next Month

Meanwhile, WKY's 30-day tour of Latin America—with stops in 10 countries—will have begun a week earlier on March 4. This tour will take southwestern farmers, business men and women on a 15,000-mile swing through the southern hemisphere with stops scheduled for Guatemala, Panama, Peru, Chile, Argentina, Uruguay, Brazil, Trinidad and Puerto Rico. According to Sandy Saunders, WKY farm director, the tour will end April 3.

Mr. Saunders reports interest in the trip by some 200 persons in Oklahoma and surrounding states. The journey's itinerary will include inspections of farms, plantations and ranches, harvesting and marketing processes, industrial plants and oil fields. Programs will be recorded by Mr. Saunders for his daily *Farm Reporter* broadcasts over WKY. Films also will be made for showing on WKY-TV.

Mal Hansen, WOW's farm director, has announced that the scheduled "New South" and Havana boat trip tour, scheduled to begin in mid-March [BROADCASTING, Jan. 23], brought in 65 paid reservations and more than twice that many requests for applications in the first 10 days following the initial announcement. John J. Gil-

lin Jr., president and general manager of Radio Station WOW Inc., said the response proved farmers have money to spend and that they are eager to learn the other fellow's operation. WOW's tour is the station's third, the others having covered the Far West and Europe.

LEHRBAS NAMED

Gets State Dept. Promotion

LLOYD LEHRBAS, director of the Office of International Information which administers Voice of America broadcasts, has been appointed special assistant to Undersecretary James Webb, the State Dept. announced Jan. 27. He will handle special assignments while continuing administration of the Voice.

Mr. Lehrbas has directed the department's overseas information program since June 1948, handling production and distribution of publications and documentary films, in addition to Voice programs. Before joining the State Dept., Mr. Lehrbas served as foreign and war correspondent, and newsreel and magazine editor. During World War II, he was a colonel and aide-de-camp to Gen. Douglas MacArthur in the Pacific.

STORECAST CORP.

Adds 14 Advertisers in Jan.

STORECAST CORP. of America signed 14 new advertisers during the month of January. This makes a sum of 110 products which use Storecast music and service programs in 500 super markets in Southern New England, Pittsburgh, Philadelphia and Chicago.

In southern New England via WMMW-FM Meriden, Conn., the following are new advertisers: Dif Corp., Garwood, N. J.; Judson Dunaway Corp., Dover, N. H.; Adell Chemical Co., Holyoke, Mass.; General Foods Corp., Hoboken, N. J.; Kitchen Art Foods Inc., Chicago; Groveton Paper Co., Groveton, N. H.

In the Pittsburgh area, via KQV-FM, new products are: General Foods Corp. (Bakers Chocolate), Dorchester, Mass.; General Foods Corp. (Maxwell House coffee), New York; McCormick & Co. (McCormick teas), Baltimore; Puritan Co. of America, Chicago.

In the Philadelphia area Sylvan Seal Milk Inc. will use Storecast. In the Chicago area via WEHS (FM) Chicago, both Helen Harrison Foods Inc., Bloomington, and Modglin Co., Chicago (Perma Brooms), are using the service.

Sweetheart Sponsors

ALTERNATING day sponsorship by Manhattan Soap Co. (Sweetheart Soap) of six weekly newscasts is to start March 7 on 12 Columbia Pacific Network and three Arizona stations, 7:30-7:45 a.m. PST. Arizona stations are: KOOL Phoenix, KOPO Tucson, KCKY Coolidge. Frank Goss is to handle newscasts beginning Feb. 13. Mennen Co., Newark, sponsors the other three segments. Agency is Duane Jones, New York.

SCHICK CONTEST

Names WLW, KJBS, WCOP

WLW Cincinnati, KJBS San Francisco and WCOP Boston, and three newspapers, won the merchandising contest held last fall by Schick Electric Shaver Co., it was announced last week by the company in New York.

The winning newspapers are *The Birmingham News-Age Herald*, *The Seattle Times* and *The Des Moines Register & Tribune*.

Fifty-eight stations and 44 newspapers competed for the awards. They mailed over 34,000 letters, cards and news bulletins on Schick exclusively to key dealers in their territories; made 900 personal calls to follow-up, and used the Schick campaign story in station and newspaper publications totaling 725,000 total circulation.

In presenting Schick Supers to the winning stations and newspapers, S. D. Moorman, Schick sales manager, commended them for exceptional cooperation beyond what was requested.

The contest was organized and explained by the company's agency, BBDO, New York, last September. The agency requested that the stations and newspapers write letters to dealers, seek tie-in advertising and make at least five personal calls on the trade.

For a 13 week period during the fall the Schick radio and TV schedule included spot announcements on 142 stations.

WHITE NAMED

Is WEIR General Manager

PAUL G. WHITE, former manager of WLIO East Liverpool, Ohio, has been appointed general manager of WEIR Weirton-Steubenville, Ohio, Harry B. Chalfant, vice president of the Tri-State Broadcasting Co., owner of the new outlet, announced last week.

Mr. White also was engaged in the advertising business in East Liverpool. Earlier, he was affiliated with WCMW Canton and WKBN Youngstown. His early radio experience was with the Yankee Network. WEIR, Mr. White said, will be on the air in about four months with studios in Weirton and Steubenville. The new station is assigned 1 kw on 1430 kc.

WXLW-FM Suspends

PERMISSION was given by FCC fortnight ago to WXLW-FM Indianapolis to cease operations for 60 days pending negotiations by Radio Indianapolis Inc., licensee, to sell the 20 kw outlet on Class B Channel 234, 94.7 mc. WXLW, the AM station operated by the same firm, continues without interruption, FCC reported. Firm told the Commission that the FM operation has been entirely unprofitable.

RECEIVING Schick Supers from S. D. Moorman (r), sales manager, Schick Electric Shaver Co., are these three representatives of winning stations (l to r): Martin Beck, The Katz Agency (WCOP); Ed Jameson, WLW sales office (WLW), and Bill Shrewsbury, Headley-Reed (KJBS).

GUILD STRIKE

A THREATENED strike by the Radio and Television Directors Guild against the networks was averted at the eleventh hour last week. After a series of negotiational sessions—one lasting through the night until 6 a.m.—it appeared probable the parties would reach agreement on a new contract.

The guild, an AFL affiliate, reportedly had at least tentatively accepted counterproposals by the networks of wage rises ranging to \$15 a week. The guild originally had demanded a \$70 a week increase for staff radio directors and a \$170 a week increase for television directors.

Strike, which had been called for midnight Jan. 31, was forestalled when, at the request of a state mediator, the guild and the networks agreed to a 24-hour armistice and further negotiation. On Feb. 1 both sides met in the office of Mabel Lesie, of the New York State Board of Mediation, at 10:30 a.m.

Except for brief respite, the negotiation session continued until the next morning at 6 o'clock. The discussions were resumed that afternoon (Thursday) and continued into the evening.

Counter Offer

Until the counterproposals were offered by the networks, the guild had demanded that radio directors, who received top minimum scale of \$130 a week under the old contract, be raised to \$200 a week and that television directors, now earning top minimum of \$130, be boosted to \$300.

The network counterproposal tentatively agreed to, according to authoritative sources, was \$145 top minimum for both radio and television directors.

Various details of salary levels in respect to other classifications of guild members remained to be worked out, it was said.

As of Thursday evening, the guild had not withdrawn its strike notice, but informed sources predicted that agreement by week's end was probable.

Involved in the negotiations were ABC, CBS, NBC and WOR and WOR-TV New York. The guild's

Averted by Networks, Radio-TV Directors

contracts with all of them expired last Dec. 31, but were extended pending resolution of the negotiations.

TEXAS STORM

Several Stations Hit

ICE and freezing rain knocked out stations intermittently in North Texas last Tuesday and Wednesday in a storm that damaged power and telephone lines over a wide area.

Several stations in Dallas and Fort Worth were hit.

WFAA-820 kc Dallas and WBAP-820 kc Ft. Worth, sharing frequency, were off the air from about 1:30 p.m. Wednesday to the following morning. They are the NBC outlet for the area.

KRLD Dallas, a CBS station, KIXL-FM and KLIF Dallas also suffered interruptions to program service.

For a time Thursday WFAA-820 and WBAP-820, were feeding programs to transmitter plant at suburban Grapevine by FM and communicating with the engineers there by hand radio.

All the stations throughout North Texas, except those disabled, rendered service by broadcasting special announcements as normal communications were disrupted.

Scandinavian Jubilee

THE SWEDISH broadcasting system, Radioj nst, owned by the newspapers and radio manufacturers and supported by license fees from the public, began official celebration Jan. 6 of its organization 25 years ago. Sweden's neighbor, Denmark, also observes an anniversary April 1 when Statsradiofonien, the state-owned broadcasting system, celebrates its 25th year.

TO DROP WTHT-FM

'Times' Asks FCC To Delete

THE HARTFORD *Times*, owner of WTHT-AM-FM Hartford, Conn., has asked FCC to delete its FM license, for economic reasons.

The *Times* said WTHT-FM was off the air for a week during January due to failure of high-voltage power supply, and that one letter was received noting the silence.

"We were consistently unable to demonstrate any sizable audience on FM," the Commission was told.

"We see nothing in the future to restore or increase the interest in FM in Hartford . . . We cannot justify continuing the operation of WTHT-FM."

The station went on the air Feb. 11, 1948, less than three months after FCC issued the grant. It had been a fully licensed station since Feb. 2, 1949, a Class B outlet on Channel 291 (106.1 mc).

TRANSIT SCOPE

WCTS Aids Public Travel

TRANSIT RADIO, sometimes scotched by critics as an imposition of "enforced listening," finds it can effectively perform a public service in times of emergency.

Transit Radio Inc. reports that WCTS, FM affiliate of WKRC Cincinnati, which supplies music transients on the Cincinnati Street Railway, came to the railway company's rescue during a recent slestorm. As a result, the firm plans changes in communication and supervisory technique.

During the storm, WCTS, at the request of the dispatcher, broadcast instructions to all bus operators to pickup passengers waiting for streetcars and trolley bus when they were delayed because ice formation on trolley wires. The plan was quickly executed. No as a result of this experience, arrangements have been completed to make possible such announcements through WCTS when rerouting transit vehicles is necessary because of traffic jams, accidents or other disasters. Morrie Edwards, president of the street railway, said WCTS also plans to make the service available to other public agencies for emergency announcements.

President's Speech

FOUR MAJOR radio networks will carry President Truman's address at the Jefferson-Jackson Dinner in Washington Feb. 1. Charles Luckman, dinner chairman, has announced. Speech will be aired by ABC, CBS, MBS and NBC from the National Guard Armory, 10:30-11 p.m. Other media coverage, including television, is to be announced shortly. This will be the second consecutive year all networks have broadcast the President's address.

MEDIA SELLING

Papers Trail All, NAEA Told

NEWSPAPERS were stiffly reuked—by a \$16 million customer addressing a meeting of the Newspaper Advertising Executives Assn.—for complacently ignoring the progress made by other media in the past 25 years, it was learned last week.

The criticism came from Joseph P. Kasper, president of the Associated Merchandising Corp., whose 25 member department stores spent \$16 million in newspaper advertising in 1948. He spoke at an NAEA meeting in Chicago Jan. 23.

Mr. Kasper, noting that there are 155 fewer daily newspapers in the U. S. than 10 years ago, said that the "tendency toward amalgamation and elimination of individual papers is, in my opinion, a serious trend."

The virtual newspaper monopolies existing in "the majority of towns and cities" create an unhealthy situation which "makes for complacency and smugness and can eventually lead to self-destruction," he said.

"It appears to me," said Mr. Kasper, "that there have been literally no changes, innovations, improvements, or evidences of progress in the newspaper business in the past 25 years." He said there was a growing complacency on the part of newspaper advertising staffs.

"Most newspaper men, I believe spend their time selling against other newspapers and regard each

other as their major competitors," said Mr. Kasper. "Perhaps you have been so busy doing this that you have failed to recognize the progress which has been made in practically all other media during this 25-year span I speak of.

"Take a quick look at what the average man is exposed to in the way of advertising today. My own case is fairly typical: I get up in the morning and while dressing I listen to a news program on the radio.

"Part of it is a commercial—a pretty lively selling job, too—indefinitely better done than it was 20 years ago. I drive to the station and pass a number of billboards—bright, breezy, colorful; vastly better advertising than 20 years ago. Even on the station platform the posters there bear almost no resemblance to their early beginnings.

No Advances Seen

"I open my morning newspaper and although the ads admittedly are more attractive than they were 20 years ago because they are lively, that is about the only difference. Nor can the newspapers take too much credit for this. If the advertising is better, it's because stores and agencies have improved their art work and layouts and copy—almost in spite of the newspapers. Production is about as bad as it always was—a black dress continues to be just a smudge of printer's ink . . .

"Going home at night, I read my newspaper again—same story: Nothing new or different there. And when I get home, I may pick up a magazine or two and what do I see? Superb four-color work, bleed pages, nothing remotely resembling magazine advertising of 20 years ago . . .

"Midway through my perusal of the magazine, my wife says to me: 'Come on now, we are going to watch—you guessed it—television. And the rest of my evening is a

pleasant combination of entertainment and exposure to salesmanship. For here, out of the restlessness and imagination of another group, is potentially the greatest advertising force we have ever seen.

"Think of the millions and millions of dollars invested in the development of television. What investments have been made by the newspaper industry toward the re-birth of its product?"

Mr. Kasper urged the newspaper executives to undertake expanded research that would help newspaper advertisers improve the productivity of their advertisements.

He said that despite his critical attitude, he could assure the newspapers that retailers would continue to "put the blue chips on the newspaper because we have not yet lost faith in your ability to produce results."

KAKE Representatives

RADIO Representatives Inc. has been appointed national sales representative of KAKE Wichita, Kan., according to Jack Todd, general manager of the MBS outlet. KAKE operates on 1240 kc with 250 w fulltime.

News Credentials

IN AN EFFORT to obtain for radio newsmen the same credentials newspaper reporters receive, Sheriff Eugene Biscailuz of Los Angeles for Radio News Club, is sending letters to sheriffs of 11 Southern California counties inviting them to meet Feb. 10 at his office with officers of the club. Radio newsmen are seeking to obtain one pass that will be recognized in all the counties, thus allowing them to move unhampered from county to county. Thus far this privilege has been allowed only to newspaper reporters. Radio News Club officers who will attend the meeting are Bob Garred, Al Gordon and Clete Roberts.

Advertising Exams

ADVERTISING examinations conducted annually by the American Assn. of Advertising Agencies will be held this year in New York at the Waldorf-Astoria and Packard School on Feb. 18 and 25. In the first session, 15 aptitude-temperament tests and a quiz on the economics of advertising will be given. The second session will be devoted to optional tests on advertising knowledge.

WBMD PROMOTION

New Show Termed Success

WBMD Baltimore's new station promotion plan via the *Social Security Numbers* program has created so much word of mouth advertising for the station in the first eight days that advertisers have already bought up half of the available time, according to H. Shelton Earp, WBMD general manager.

Mr. Earp emphasized that while "WBMD has this plan exclusively for Baltimore," it is available to other stations in the country. "As a matter of fact, WWDC Washington, WSRS Cleveland and WLEE Richmond are now airing the show with equally amazing results," he said.

The show is a copyrighted promotion by Azrael Advertising, Baltimore agency, and advertisers pay only for air time, Mr. Earp pointed out. The station offers \$100 on the hour every hour if anyone can match the numbers read with his Social Security card. Ten different numbers are used a day. Promoters, who pay all of the prize money, get a fee based on population in station area, with graduated costs until the station sells all available commercial time, before reaching maximum cost, Mr. Earp pointed out.

SPORTSCASTERS

Third Annual Dinner Feb. 14

THE THIRD annual Sports Broadcasters Assn. dinner will be held Feb. 14 at New York's Hotel Park Sheraton. At the dinner, Baseball Commissioner A. B. (Happy) Chandler will be given the annual Graham McNamee Award presented by the association to the individual who in its opinion contributes most to sports during the year.

WMGM New York, whose sportscaster, Marty Glickman, is president of the association, has invited 150 executives of agencies and sponsors of sports broadcasts on the station as its guests at the dinner. Bertram Lehar Jr., director and sales chief of WMGM, will be host to the group.

Spot Business

(Continued from page 15)

cancelled because of the UAW strike at Chrysler, but it is believed that radio will be resumed as soon as the strike is settled.

Among advertisers to start campaigns during January 1950 are the following: French's Instant Potatoes, through J. Walter Thompson Co., New York, which started a campaign in mid-January; Tide Water Gasoline, through Lennen & Mitchell, New York, on Jan. 15 began its schedule in a dozen markets; another L & M account, Lustre-Creme Shampoo also used radio spots starting about the same time.

Lever Bros. Adds

Lever Bros.' Spry account through Ruthrauff & Ryan, New York, normally a network advertiser only (Aunt Jenny on CBS), has added a spot announcement campaign which started in January.

Another Lever Bros. product, Surf, through Benton & Bowles, New York, also has been using a heavy radio spot announcement schedule.

Procter & Gamble's Ivory Snow, through Benton & Bowles, is using spots in a number of markets, which started in December and will continue through June.

A new radio spot advertiser is Nucoa Margarine, through Benton & Bowles, which started in January in Ohio and then extended its

WE DON'T TOSS BOUQUETS TO DAISY (Ky.)!

Hard-boiled us, we don't cultivate Daisy (Ky.)! It's probably a garden spot, botanically speaking, but just too rustic and remote for sales-minded WAVE!

We stick to our State's one great blossoming market, the Louisville Retail Trading Area. Nearly a billion dollars in Retail Sales stem annually from these 27 flourishing counties, and our average family has an Effective Buying Income 40% higher than the Kentucky norm!

If you want to put a little advertising fertilizer into Kentucky, try WAVE's concentrated formula. It'll really put you in clover!

Re: Rate Cutting

EDITOR, BROADCASTING:

I note with interest a story on rate card cutting on page 42 of your Dec. 12 issue and just want to comment that it seems to me that anybody in the advertising agency business, or in any other part of the advertising business,

spot schedule to include California. Currently the agency is preparing a further extension to cover Southern markets.

The spot picture for February and March looks as if it, too, will maintain a high level of activity. For example, Silver Star Blades through Ruthrauff & Ryan, is currently preparing a spot schedule to start on Feb. 20.

General Foods (Devil's Food Mix), through Young & Rubicam, has started a small campaign in California markets, but expansion is expected.

Continental Oil Co. (Conoco), through Geyer, Newell & Ganger, will use 50 markets in the Middle West to start about Feb. 15.

Crosley Div. of Avco (Shelvardor), through Benton & Bowles, New York, is planning a spot campaign to start on March 6. Also on that date, Garrett Wine Co., through Ruthrauff & Ryan, will start its seasonal spring campaign.

Shinola, manufactured by the Best Co., another semi-annual spot advertiser, is preparing a campaign to start in March or early in April, through Benton & Bowles.

Phillips 66, through Lambert & Feasley, is expected to drop its current network show, *Barn Dance* on ABC but will replace it with another show probably on another network. In addition the advertiser is expected to use a heavy spot campaign this spring. Final plans are expected to be announced next week.

RCA THESAURUS has released *Here's June Christy*, new program series, to subscribers to its transcribed library service.

for that matter, is putting the advertising business on fairly unsound ground if he is not extremely careful how he says that any advertiser should pay a national rate when he can get a local rate.

In other words our first interest should be the advertiser and it may be rather difficult to defend the position that any advertiser should be forced to pay a higher rate if the stations are willing to give him a local rate.

I think we know all of the angles on this situation—and I mean all of them—and I make this comment having all of these considerations in mind.

Help Small Towns

EDITOR, BROADCASTING:

Radio will celebrate its 30th birthday in 1950. Wouldn't this be a good year for radio engineers to get together and settle the problem of the small town listener?

We have no trouble in tuning in Mutual network programs at night in Statesville, N. C., because we are fortunate in having a Mutual radio network station here. We can receive CBS programs through a 50,000 w radio station in Charlotte. But unfortunately when we try to dial ABC or NBC programs we are at the mercy of atmospheric conditions and Cuban and Mexican radio stations. . . .

Although directional antennas are excellent for protecting radio stations from interference, they play havoc in the way they detour programs around the small town. I'm not complaining, just asking for help. Will some radio engineer explain how the small town listener

can have available all network programs every night in the week regardless of atmospheric conditions

Claims DB 'First'

EDITOR, BROADCASTING:

I noted with interest the letter sent to you by Bob Mackall of WFMJ in Youngstown, claiming to be the first one to DB the Drew Pearson program.

Just for the record, let me say that WSRS, at my instigation in conjunction with ABC and the William Weintraub Advertising Agency, DB'd the Drew Pearson program first. . . .

I sold the plan of the live broadcast at 6 p.m. with the DB at 1 p.m. the same evening, which we considered an excellent idea by ABC and the Weintraub agency. All of this took place in the early days of the 1948 baseball season because of the inability of the local ABC outlet to consistently schedule this program properly. So let's clean the record up and put WSRS on top of the heap with a great big "first" in this particular matter.

Sam Sague
President
WSRS Cleveland

AD WOMAN OF YEAR

AFA Names Contest Judge

ADVERTISING Federation of America (council on women's advertising clubs) has chosen a panel of judges to select the Advertising Woman of the Year in its annual contest. Judges are: Mrs. Ella B. Myers, former advertising director of General Foods Corp. and presently an advertising consultant who was the 1948 award winner; Frederic R. Gamble, president of the American Assn. of Advertising Agencies, and Dr. Kenneth Dameron, Ohio State U.

Winner of the contest will be chosen during the annual convention of the Advertising Federation of America, to be held in Detroit May 31-June 2.

HOUSE HEARINGS

Allocations First on Agenda

By JOHN OSBON

INTERNATIONAL and federal machinery dealing with extensive radio frequency allocations and assignments will command top priority on the agenda of the House Interstate Commerce communications subcommittee when it begins hearings the next fortnight on major radio legislation. [BROADCASTING, Jan. 30].

This was apparent last week as the subcommittee, headed by Rep. George Sadowski (D-Mich.), whose own measure (HR 6949) embraces sweeping substantive changes on government and FCC levels, revealed its tentative hearing agenda. Sessions may last up to six weeks though authorities indicated last week the subcommittee hopes to conclude them in four weeks' time. Rep. Sadowski already has indicated his group "may not" press for legislation.

Bulk of testimony during the first week of the hearing, tentatively set for Feb. 20, will deal broadly with the allocations problems on the "international, hemispheric and national" levels, committee spokesmen said last week.

Second Week Agenda

Second week will be devoted to issues on FCC's chain broadcasting regulations, monopoly anti-trust phases and, finally, sanctions as covered in the Sadowski Bill introduced Jan. 24, and the Senate-approved FCC procedural bill (S 1973) authored by Sen. Ernest V. McFarland (D-Ariz.)

Discussion is expected to center around legislation (HR 2410) proposed by Rep. Harry Sheppard (D-Calif.) which would divest networks and equipment manufacturers of radio station ownership, and restrictions on FCC's anti-trust authority as provided in the McFarland bill.

The following weeks primarily would concern the various other facets of the new Sadowski Bill and Sen. McFarland's measure, according to present plans. Among points to be taken up is Rep. Sa-

dowski's proposal to give licensees immunity from criminal or civil actions for libelous remarks in political broadcasts.

Subcommittee Chairman Sadowski's measure also would set up an independent five-man Frequency Control Board—a "super FCC"—which would hold broad powers over the Commission and usurp some of its major functions. Also, it would give FCC a new set of administrative sanctions or penalties in the form of license suspensions, fines and cease-and-desist orders.

Asked To Testify

Invitations to testify the first week are being issued to government officials including, in addition to FCC, the State Dept., each of the military branches, IRAC (the Interdepartmental Radio Advisory Committee, which the Sadowski bill would replace with the Frequency Control Board), Telecommunications Coordinating Committee, and certain private consultants and attorneys. Names were not disclosed.

Authorities said the subcommittee is hopeful of clearing up the allocations phase in the first four days. In that event, they speculated, the fifth day (Feb. 24) could be devoted to FCC proposals. It is known that Chairman Sadowski has asked the Commission to present a broad outline detailing international and U. S. frequency needs and requirements falling within the scope of "wireless and wire" facilities.

Another Bill Unlikely

The network-sanctions-monopoly phase, now set to begin Feb. 27, is expected to encompass debate on the McFarland-Sadowski-Sheppard bills. Authorities last week thought it not unlikely that Rep. Sadowski still might introduce another bill, designed to cover other phases now contained in the McFarland measure. If he does, that would be considered, too, they felt.

Networks, independent broadcasters, Justice Dept. and others

will be invited to air their views on present network-affiliate relationships; complaints that networks violate government anti-trust laws; the McFarland Bill provision which would remove FCC's power of revocation over licensees whom the courts have found guilty of anti-trust violations, and the comparative merits of sanction clauses in the Sadowski and McFarland bills.

The Sadowski bill provides for institution of revocation or suspension proceedings against station licensees, permittees, and networks alike for tending to "induce or coerce" other licensees or permittees to violate FCC rules and regulations, or for following any "course of action" which would justify a license or permit denial. FCC could demand forfeitures up to \$500 per day for any offense in lieu of suspensions or revocations.

The subcommittee also revealed last week that it considers Sections 4 and 5 of the McFarland Bill of

FCC FUNDS

Larger Budget Asked

NEED for increased funds to carry on its various broadcast and non-broadcast activities was detailed by FCC last Monday in closed session before a House Appropriations subcommittee hearing budget requests for fiscal 1950-51.

Five of the seven FCC commissioners, including Chairman Wayne Coy, and staff members reviewed Commission functions covering commercial TV-AM-FM operations, safety and special services, field engineering and monitoring, technical research and frequency allocations, and common carrier duties.

The President has asked Congress for roughly a 2.7% increase over FCC's 1950 total appropriation of \$6,737,000—or \$6,914,600. The 1951 budget estimate contemplates boosts in funds over the 1950 estimate for each of these categories [BROADCASTING, Jan. 16].

Details were unavailable on Monday's hearing, but it was understood that Chairman Coy carried the brunt of testimony for the Commission. FCC stressed no particular service with respect to its budget, it was also understood. The meeting reportedly was harmonious and devoid of drawn-out discussion on any phase.

Also present were Comrs. George Sterling, Edward Webster, Robert Jones and Frieda Henneck. Staff members included John Willoughby, FCC acting chief engineer; William Norfleet, chief accountant; W. K. Holl, executive officer; Benedict Cottone, general counsel, and Harry Plotkin and Harold Cohen, assistant general counsels. Members of the safety and special services, common carrier and monitoring divisions also were present.

prime importance on its hearing agenda. They are certain to be brought out—both in FCC's written comments on the McFarland bill for the record and in oral testimony before the group.

These sections deal with "job-jumping" prohibitions covering FCC Commissioners, bureau heads and their assistants; salary provisions (now outdated in view of pay boosts passed last year); appointment of a legal assistant to each Commissioner; requirement of a legal assistant to each Commissioner; requirement that FCC submit annual reports to Congress on broadcast application data, deadline on FCC action on applications.

FCC and Civil Service Commission have indicated disapproval of some of these provisions.

ASSOCIATED SHOWS

Yankee Network Contracts
ASSOCIATED Program Service last week announced arrangement of a contract with the Yankee Network for Associated's transcribed library service and special series of "shows that sell."

The agreement, Associated stated, covers all owned or operated Yankee stations in New England including WNAC-AM-FM-TV Boston, WEAN Providence, WICC Bridgeport, WMTW Portland, WAAB Worcester, WONS-AM-FM Hartford. Contract negotiations were completed by George W. Steffy, vice president of the network, and Richard Testut, vice president and general manager of Associated.

Free Time Abuses

(Continued from page 15)

device familiar to all station officials.

In adopting resolutions to implement the free-time device the committee favored the use of free-time agreements. Groups would be asked to sign pacts including the question, "Do you plan to spend money in any advertising medium?"

Going further, the time applicants would agree to pay for any time donated should they later decide to pay for advertising in any other medium.

The committee felt that program material by public service agencies should provide opportunity for participation by local sponsors. In the case of newspaper mats, it was pointed out, local advertisers can include credit mention.

Another angle relates to a purported practice among defense agencies. Under this technique, military personnel are assigned to take mats to newspaper advertising prospects and solicit them. If this is done for other media, committee members argued, it should be done in the case of radio recruiting and similar campaigns.

The committee figures broadcasters should get a larger share of the money spent by government agencies to advertise for recruits. Independent stations, it was argued, are especially good prospects in recruiting campaigns because they

direct much of their appeal to the younger audience.

NAB representatives are to confer with advertising agencies placing government business in an effort to persuade them to spend more money for radio time, the committee was told. Members suggested independents should be represented on the NAB committee. They contend they have been among the most generous broadcast groups in providing free time.

Some of the current public service campaigns, and some with mercenary motives, were discussed among committee members. One instance cited was that of the Disabled American Veterans Service Foundation, which asks free radio time though it buys full-page and double-spread space in newspapers and magazines (see story page 92).

Going into other problems facing independent stations, the committee voiced concern over abolition of the NAB Program Dept., a project that developed out of a past committee recommendation. The department was dropped by the NAB board in last summer's reorganization.

Functions of the Program Dept. will be handled through the Radio and Television Divisions, the committee was promised.

Much of the two-day discussion centered around plans for the Sunday "Independents' Day," a session that drew some 400 broadcasters at the 1949 NAB Convention, under Mr. Cott's chairmanship.

Cott to Serve

Because WNEW is withdrawing from NAB membership Feb. 28, Mr. Cott will not serve as chairman of the program. Furthermore, he is resigning the committee chairmanship effective Feb. 28. At the committee's request he agreed to serve as program consultant for the Sunday session in Chicago.

Chairman of the Sunday program will be Lee W. Jacobs, KBKR Baker, Ore. Again the program will be of the no-speeches type. Panel sessions will be wide open, with specialists leading the discussion.

Facts on out-of-home listening will be given by Dr. Sydney Roslow, president of The Pulse Inc., New York. Dr. Roslow's findings will be distributed to NAB members in printed form. Patt McDonald, WHHM Memphis, will chair a panel discussion on means of capturing and increasing the out-of-home audience. Related subjects will cover promotion material and specialized programming for this audience.

William B. McGrath, WHDH Boston, will be chairman of a sports session. Sponsor and agency representatives will take part, along with an attorney to cover anti-trust angles. The problem of using Western Union play-by-play reports is on the tentative agenda. Sports are a mainstay of independent stations, the committee pointed out. The NAB general

GOLD plated microphone awarded to high scorer on the Sound Production Group team which won a sales contest sponsored by the RCA Engineering Products Dept., goes to S. D. McIntosh of Dallas. This group at presentation ceremonies (l to r) T. A. Smith, sales manager, Engineering Products Dept. H. V. Somerville, administrator of field sales of the department; Mr. McIntosh; W. W. Watts, vice president in charge of the department, who made the award; H. C. Elwes, merchandise manager, Sound Products Group; K. A. Aitken, of Cleveland, and H. T. Schrule, of Philadelphia, field representative of the Sound Section.

counsel's office was asked to supply a legal summary of sports broadcasting problems, to be available at the convention.

Another panel will deal with use of magnetic tape recording in programming and sales expansion. Demonstration of techniques is planned, including tape editing.

A debate is scheduled on the pros and cons of per inquiry and mail order business. Dangers and virtues of these practices will be explored. NAB is traditionally opposed to P. I. as an association but individual member stations have diversified views on the subject.

Other topics slated for a thorough working over by the independents are new program tools, new and unusual program devices, BMI services and government and overseas program sources. Among overseas sources is the upcoming series of *Orchestras of the World* transcriptions obtained through the Economic Cooperation Administration (see story page 118). In this series of 13 one-hour transcriptions the leading symphony orchestras of Europe will be made available to broadcasters. NAB agreed to send out letters to stations describing this series, originally produced for broadcast on European networks.

The Monday morning meeting,

first convention session covering foreign language station problem will be directed by co-chairmen. They are Ralph Weil and Arnold Hartley, both WOV New York vice presidents.

The foreign language session will be held at the same time as the FM meeting [BROADCASTING Jan. 30]. NAB officials suggested the Monday morning scheduling because the foreign tongue problems are highly specialized and of direct interest to only a portion of the membership.

In its two-day discussion last week the committeemen unloosed some sharp suggestions about NAB's headquarters operation and the special services independent stations desire.

No appointment will be made to fill the chairmanship after Mr. Cott's resignation becomes effective, the committee was told, because NAB President Justin Miller plans to name a new committee member after the April convention.

Committee members attending the meeting were Messrs. Cott, Jacobs and McDonald; Melvin Drake, WJZY Minneapolis; Robert Marnard, WSVS Crewe, Va., and Ben Strouse, WWDC Washington, alternates. Glenn Shaw, KLX Oakland, director-member, was unable to attend.

'Who Are We?'

WHENEVER the members of NAB's committee for independent stations holds a meeting, the members ask themselves, "Who are we?" Part of the committee's discussion last week dealt with the problem. Officially the committee at one time was called the Unaffiliated Stations Executive Committee. Then the name was changed to Nonaffiliated, etc. Last week they were referred to as both. Members say they can't understand why NAB stubbornly refuses to call it the Independent Stations Committee.

Transit Radio

(Continued from page 22)

was underscored once when the United States developed the atomic bomb. It was underscored a second time when the Soviet Union did likewise. It is being underscored a third time by debate over the forthcoming development of a hydrogen bomb, potentially 1,000 times more powerful than the A-bomb. One of the obvious and essential requirements of civil defense will be a means by which the public transportation systems can be mobilized to move great numbers of people out of threatened areas and to move civil defenders to their posts of duty. The means, of course, is FM radio, which was used by tanks, artillery, planes, infantry, etc., during World War I.

Thanks to Transit Radio, the buses and streetcars of 19 American cities are already equipped with radio which in the event of an emergency could be used for guidance. This is done without cost to the taxpayers, the riders or the public transit companies. It is being done while giving the riders the best radio service available. It is being done while giving that same service to the entire community. Arrangements are under way to provide Transit Radio to 25 or 30 other American cities.

Against this imposing array of advantages, only one argument has been advanced by its critics. "It violates the rider's right not to listen," they say. "In this way it

violates his right to privacy and assails the freedom of his mind."

First, how many riders of public transportation do not like Transit Radio? Take the eight out of 10 riders who like Transit Radio. Add those who are undecided. Add those who do not care. Add those who do not like it but who withdraw their objections in deference to the majority preference. As the Edward G. Doody Co. says, "... only a fractional group of active objectors remains. . . ." This fractional group ranges from 1.2% to 5.3%.

But the critics brush these figures aside. "It isn't a question of percentages," they say. "It is a question of the rights of the minority however small. The offensive thing about Transit Radio is that it holds its audience captive."

Is advertising over Transit Radio really different from advertising generally? The answer is no. All advertising tries to hold the attention of its audience.

Take the ads in newspapers and magazines. Can a person escape seeing them? Not if he wants to read the paper or magazine. The periphery of his vision takes them in, willy-nilly.

Highway Signs

Take advertising on aural radio or TV. Can a person in his home escape hearing and seeing the "plugs?" Not if he wants to listen and watch. Of course, he could switch the program off or turn it down during the commercial. But he doesn't. And to do so would require a greater attention and a greater exertion than not doing so.

Take advertising signs along the highway, particularly those head on at curves. Can a driver escape seeing them? Not if he wants to keep the car on the road.

This list could be expanded—the show windows of stores, the card advertising in busses and streetcars, the posters on subway pillars, etc.

In each case, the individual who does not want to hole up like a hermit is exposed to advertising.

But he certainly is not a captive. He frees himself by controlling his attention, either consciously or, more often, unconsciously. The stream of stimuli assailing the senses is limitless and unending, even on a desert island. The mind selects those it wants to use and of necessity ignores the others. This

is elementary psychology. Everybody does this every minute of every day, even when asleep. One does it so naturally that one isn't aware of doing it. Nobody on a bus or streetcar who doesn't like Transit Radio need pay attention to it. One can bring to bear the same habits by which one is able to ignore other things one wants to exclude.

People who ride public transportation systems are already prepared to "tune out" Transit Radio if they want to. They have been trained to do so by the noises that inevitably attend public transportation, the sound of the motor, the clash of gears, the jolts and jars, the horn, etc.

Privacy on a bus? The same kind of privacy that there is in Madison Square Garden: the privacy of concentration. If a rider doesn't want to listen to the conversations of his fellow-passengers, he doesn't have to. ("This morning when I got up I didn't feel well. I wasn't really sick. Just butterflies in the stomach, you know. . . .") If he wants to, he can pay attention. ("And I told my husband, if you want to keep your little girl friend, you can, but you can't keep me. . . .") In the same way the rider can tune Transit Radio in or out at will.

Rights at Stake

Minority rights are not at stake. But the rights of the majority are at stake—the rights of the eight out of 10 riders, who want Transit Radio. These the competitors of Transit Radio would deprive. They would deprive them of the radio service they like. They would deprive them of an agency that may some day save millions of lives.

The real reason for most of the opposition to Transit Radio is not ideological at all. It is mercenary self-interest.

Transit Radio is able to do effectively what all advertising tries to do. It reaches a mass audience. It can tell its clients precisely how big. It reaches special kinds of audiences. It can tell its clients precisely what kinds and the precise times when they can be reached. It provides these services to the advertisers in the best tradition of advertising—while providing a public service that the people need and like.

Competition for the pieces of the pie of the advertiser's dollar has always been keen. It has never before been so keen as it is today. Established media have always tried to block newer competitors. AM radio was opposed. FM radio was opposed. Car card advertising was opposed. Billboard advertising was opposed. And so on. Now, and for the same reasons, Transit Radio is being opposed. The only differences are two: The opponents of Transit Radio are hiding their commercial motives behind a facade a bit more fancy than usual. And the opponents of Transit Radio are resorting to tactics of unprecedented viciousness and desperation.

950 KC CASE WHOM Appearance Approved

WHOM Jersey City won permission last week to appear as *amicus curiae* in defense of foreign-language programming in FCC's oral argument today (Monday) on the Boston 950 kc case. Authorities said it was one of the few times a licensee has been authorized to appear before the Commission in an *amicus curiae* role.

WHOM, which broadcasts virtually all its programs in foreign languages, will oppose passages in the examiner's decision in the Boston case which question the merits of foreign-language programs. [BROADCASTING, Nov. 7, 1949]. The FCC General Counsel also has filed exception to these passages.

The case involves five applicants for the 950 kc assignment vacated when WORL Boston failed to win license renewal because of alleged concealment of ownership. Pilgrim Broadcasting Co., owned by 22 Boston area business and professional men, was nominated for the grant in Examiner Hugh B. Hutchison's initial decision.

WISH Moves

WISH Indianapolis moved Jan. 27 to 1440 N. Meridian St., Indianapolis, George Higgins, general manager, announced. Studios of the ABC outlet formerly were located at 215 Board of Trade Bldg.

Mr. Charles Oppenheim
Director of Program Promotion
Columbia Broadcasting System
New York City

Dear Charley:

Three uv arr fellers jest got back from Cincinnati whur they went 'cause WCHS

was a first place winner in th' Kroger Contest las' fall. Charley, these fellers here at West Virginia's Number One Station certainly did put on a big permoshun fer them Kroger Shows. They really threw th' book at that one — used ever'thin' from turtles ter air-planes — an' they won! They's jest th' way these boys at WCHS does ever'thin'. They really fermotes their shows whuther they be local, national, er CBS. Durned effen there ain't sime big permotin' stunt goin' on all th' time, and his certainly goes ter show that WCHS don't jes set back on hits laurels er sumptin' an' let th' radio shows carry themse'ves! Fellers like you likes ter hear thet, eh Charley?

Yrs.
Algy

BMB Toasted

(Continued from page 17)

made possible by the faith of the subscribers and by the firm belief of the sponsoring organizations (the NAB, AAAA and ANA) in the need for scientific audience measurement. We trust that the result achieved by the bureau will emphasize again the need for continuing audience measurement in some form or other, maintaining radio's front position as the medium that knows most about itself and tells more to its clients."

Mr. Gamble—"This is good news day for buyers of time, those advertising agency executives whose job it is to select the broadcasting stations to deliver their clients' messages to America's buying public. Agency timebuyers have long been looking forward to this occasion. The BMB station audience reports, bringing up to date a measurement of subscribers' station audiences on a uniform basis, will be welcomed and used by advertising agencies from coast to coast. The American Assn. of Advertising Agencies is glad to have acted as one of the three sponsors of this nationwide study and is particularly grateful to those broadcasters who continued to support the basically sound principle of tripartite research represented by BMB."

Mr. Gamble

forward to this occasion. The BMB station audience reports, bringing up to date a measurement of subscribers' station audiences on a uniform basis, will be welcomed and used by advertising agencies from coast to coast. The American Assn. of Advertising Agencies is glad to have acted as one of the three sponsors of this nationwide study and is particularly grateful to those broadcasters who continued to support the basically sound principle of tripartite research represented by BMB."

Phila. Safety Awards

ROGER W. CLIFF, general manager of WFIL-AM-FM-TV Philadelphia, and Owen F. McConnell of the *Philadelphia Inquirer* will be honored jointly tomorrow at the Philadelphia Highway Traffic Board's first annual award luncheon for "Traffic Safety Man of the Year." Luncheon will be held in the Bellevue-Stratford Hotel. Both will be cited for their "outstanding contributions to highway traffic safety in 1949." Both WFIL and the *Philadelphia Inquirer* are owned by Triangle Publications Inc.

DOES THE U. S. GOVERNMENT use any non-governmental source of data on local markets?

Yes . . . in studies by the Department of Commerce, in hearings before the Federal Communications Commission, in setting bond sales quotas for the Treasury Department, and in planning recruiting drives for the Army and Air Force, data on local markets is taken from—

SALES MANAGEMENT'S "Survey of Buying Power."

(1950 issue May 10; Reservations Close Feb. 17; Copy March 10)

AN INSCRIBED, silver vase, the 'Virginia Assn. of Broadcasters' tribute to former Gov. William M. Tuck, honoring his past four years of service as the Old Dominion's chief executive, is presented to Mr. Tuck by Philip Allen (l) of WLVA Lynchburg, VAB president. Taking part are two VAB past presidents, C. T. Lucy (2nd r), manager of WRVA Richmond, and E. S. Whitlock (r), manager of WRNL Richmond.

New Study Out

(Continued from page 17)

but that BMB contemplates working out an average loyalty index figure for all stations, with perhaps further averages computed for stations by power and by city size groups. These average index figures, he said, would enable any station to see how its own loyalty index compares with the average and whether it is a strong selling point or a warning signal that changes should be made.

Whenever a broadcaster sees his station's BMB figures his first question is invariably, "How's the competition doing?" and by "competition" he invariably means other stations and never newspapers or billboards, Dr. Baker reported. He noted somewhat wryly that most broadcasters seem to have forgotten that BMB was established in large part to provide radio with circulation statistics comparable to the ABC figure for newspapers and the Graphic Audit Bureau statistics for outdoor advertising.

For comparative and competitive media use, the three-to-five days a week listening figure is probably most comparable to a newspaper's

ABC, Dr. Baker commented. He added that in many cases the station could use the six-to-seven days a week audience and still compare favorably with its newspaper competition on the cost per thousand people reached.

"BMB is a horizontal measurement of coverage, comparable to engineering coverage measurements, except that BMB measures where people *do* listen instead of merely where they *can* listen," Dr. Baker explained.

"BMB does *not* measure the amount of listening" he declared. "There is nothing in the BMB reports to show how many hours a day any family listens to any station."

100 Copies Per Station

Following the transcripts of the tabulating machine records received by BMB's station subscribers last week, each station will get 100 copies of a printed report which will include these audience figures and the station's day and night coverage maps. Copies of reports for all subscribing stations will be sent without charge to members of the American Assn. of Advertising Agencies and to members of the radio-television group of the Assn. of National Advertisers. (AAAA and ANA, together with NAB, comprise the tripartite governing body of BMB.) Subscribing stations may get reports of other subscribers from BMB at 40 cents each, or may swap with other stations.

Data on non-subscribing stations in their area will be released to subscribers for the cost of processing them, Dr. Baker said, running from \$50 for a station covering up to 50,000 families to \$450 for a station covering three million families or more. Subscribers may obtain extra copies of these non-subscriber reports for \$1 each, Dr. Baker said, for use in presentations to advertisers and agencies, but they are not publicly reproducible. That is, the non-subscriber data may not be

used in advertisements or promotional brochures of the subscriber, station in any way that might reveal the identity of the non-subscriber.

This is a much tougher restriction than is imposed on the use of subscriber data, Dr. Baker said. He explained that the rules governing the use of subscriber data, a copy of which was sent to each subscriber, are designed merely to prevent misrepresentation.

Advertisers and agencies may obtain non-subscriber data only by requesting them from subscribing stations. This procedure was adopted to protect subscribers, Dr. Baker said. And also to show the extent of the use of BMB data by the buyers of time, which some broadcasters have questioned. If it proves too cumbersome, he said it may be altered by the BMB board as experience dictates.

Cards for Networks

The three subscribing networks—ABC, CBS, NBC—will get complete sets of IBM cards for all of their affiliate stations which the will tabulate themselves. The have all asked BMB for a copy of the Mutual data and BMB is now calculating the cost.

Data on FM and TV stations in the same partially processed state as for non-subscriber stations, Dr. Baker said, can be completed if the sample adequately reflects FM and TV set ownership which BMB will run a sampling test to determine. If the sample prove too small the payments of the four or five FM and single TV subscribers will be refunded, he said. He added that a number of counties in the New York, Philadelphia and Chicago metropolitan areas show TV station audience exceeding the 10% of all radio homes figure which is BMB's minimum for tabulating the count data.

The overall cost of the second study is \$1.2 or \$1.3 million, Dr. Baker reported. He said that this represents all BMB expenses since July 1, 1947, and all came from subscribers except for an NA.

plan which remaining subscriber payments will cover.

About 50 subscribers dropped out since July 1, 1947, he said, but they are beginning to come back—two came in on Tuesday—and he estimated that the study may wind up with 800 or 900 subscribers. Stations subscribing now may get full reports, the same as earlier subscribers, by paying the same rates as they would have been charged if they had subscribed from the study's inception.

Dr. Baker commented that he would like to make an analysis of the BMB data to show what has happened to clear channel, regional and local station audiences, as groups, between 1948 and 1949. He said he would also like to analyze the U. S. audiences to Canadian, Mexican and Cuban stations and the effects of these stations on the audiences of U. S. stations. He noted that the tabulations show reports of listening to one Mexican station as far north as North Dakota. Such data would be of value to the NARBA conferees, he said.

Use of Data

Asked if he would suggest the way in which the BMB data should be used by both sellers and buyers of time, Dr. Baker said he had considered holding a series of district meetings to explain the data and their significance, but he now feels that this would perhaps be unduly extending the scope of BMB, whose function is to report facts and not to interpret them. Perhaps standards for BMB's use should more properly be set by such bodies as the AAAA Radio Committee or the NAB Sales Managers Executive Committee, he suggested. He repeated his warning against premature standard setting, stressing the need for experience in working with the new BMB data in determining the proper way to use these new audience facts.

Dr. Baker refused even to hazard a guess as to the future of BMB beyond the current study, despite persistent questioning.

DURING 1949, 38,466 housewives were present at airing of *Cinderella Weekend* show of WHAM Rochester, N. Y., station reports.

BELLEVILLE GRANT FCC Issues Revised Decision

REVISED initial decision by FCC Hearing Examiner Leo Resnick, recommending a second time the grant of a new station at Belleville, Ill., on 1260 kc with 1 kw, directional night, to the Belleville *News-Democrat*, was reported by the Commission last Monday. Bid of WTMV East St. Louis, Ill., to switch from 250 w on 1490 kc to 1 kw on 1260 kc would be denied.

The Commission meanwhile also issued an initial decision by Hearing Examiner Elizabeth C. Smith recommending denial as in default of the application of Olney Broadcasting Co. for 1590 kc, 250 w daytime, at Olney, Tex. Partners Robert E. Thompson and Sidney R. Sanders failed to appear at scheduled hearings and present evidence, ruling said.

In the Illinois case, Examiner Resnick favored Belleville over East St. Louis because the latter already has one fulltime local outlet (WTMV) while the former has only one daytime station, WIBV. The first initial ruling was set aside for further hearing by the Commission last summer upon CAA's disapproval of the proposed site [BROADCASTING, July 25, 1949]. The *News-Democrat* is owned by Richard P. and Robert L. Kern.

N. Y. Adwomen Ball

ADVERTISING Women of New York will hold its Postillion Ball on Friday, March 3, at the Hotel Astor, New York. Proceeds from the ball are for charity.

SENATE CONFIRMS Miller, May, Allen Approved

NAB President Justin Miller was confirmed by the Senate last Thursday as member of the U. S. Advisory Commission on Information for a three-year term expiring Jan. 27, 1953 [BROADCASTING, Jan. 16]. Judge Miller has served on the five-man commission since it was authorized by the 80th Congress. Senate also confirmed Mark May, human relations director, Yale U.

Simultaneously the Senate also approved the nomination of George V. Allen, former Assistant Secretary of State for public affairs, to be ambassador to Yugoslavia. In his former State Dept. post, Mr. Allen supervised all international and educational exchange activities, including the Voice of America.

Metropolitan's Radio

(Continued from page 19)

chinery, Metropolitan can get in radio advertising's "Three Tells,"—Tell them you're going to tell them; tell them; then tell them you told them.

It must not be thought, however, that Metropolitan is aggressive in any part of its radio effort. The contrary is the case.

The company does not even use the names of those who write in for booklets as sales leads—an almost unbelievable chapter in business history. For those requesting booklets comprise people who are interested in health and safety, people who have the normal kind of consideration for the future which is part of the make-up of the good life insurance prospect. But Metropolitan is so serious in the pursuit of its philosophy that its advertising be concentrated on health and welfare that company feeling persists that it should not be tied in, even remotely, with sales.

The health and welfare announcements, then, have not become sales aids. They remain public service messages on a very high institutional advertising level.

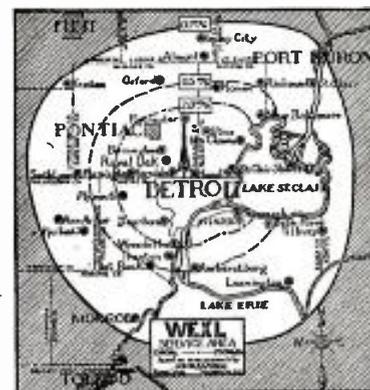

But since they play a part in keeping the company's policyholders alive longer, the announcements can truly be said to be health and wealth messages for both the listener and the company—a goal which any commercial radio venture could be proud to attain.

'Radio Technology'

RADIO TECHNOLOGY. By Ernest J. Vogt. New York: Pitman Publishing Corp. 556 pp. \$6.

FEATURING a complete technical course in radio with higher mathematics eliminated, the single volume *Radio Technology* reference library is designed to meet the need among technicians, hams and operators for a simplified work. In a single chapter, the book reviews mathematics necessary to understand the material discussed in the volume. The book contains basic essentials of radio, television and facsimile for study for any FCC ticket.

PACKAGE FIRM

Formed for Smaller Stations

ORGANIZATION of Promotion Specialists, packager of program for 250 w or smaller market stations, has been announced by Lloyd Nixon, account manager of the new firm.

"Our aim," Mr. Nixon said, "is to affiliate good, experienced radio entertainers from smaller radio stations and to syndicate their programs by tape, with commercials included, at low cost." Jay Berry is president of Promotion Specialists. Offices are at 326 Park Row Bldg., New York.

'GOOD FRIEND'

Panama Paper Cites Johnson

WHEN HE speaks as chairman of the Senate Interstate & Foreign Commerce Committee, Sen. Ed C. Johnson (D-Col.) not infrequently has fiery words of woe for FCC and segments of the radio industry—but down "south" he is an "amiable North American" and "good friend of Panama."

This was indicated in an editorial published recently by the *Panama Star* and inserted in the *Congressional Record* last week by Sen. Ernest W. McFarland (D-Ariz.), colleague committeeman and head of the communications subcommittee. The editorial referred to Sen. Johnson's visit last December to the Panama Canal zone in connection with pending proposals before his committee, authorized by Senate resolution last year.

Sen. Johnson's visit apparently dealt with four points—communications, political stability, transportation and new industries. He told government officials he thought there was need for "better communications of all kinds," according to the editorial, and stressed the valuable geographical location of Panama. The visit did not constitute "intervention," the article concluded, for "legal advice, kind words are guideposts . . . they demonstrate good will, and sincere and human concern."

DO AGENCIES obtain local market data from any one accepted source?

A survey of 14 leading advertising agencies by the Special Libraries Association found that the only two annual reference books used by all 14 agencies polled are the World Almanac and—

SALES MANAGEMENT'S "Survey of Buying Power."

(1950 issue May 10; Reservations Close Feb. 17; Copy March 10)

Milestones

SEEN celebrating the 10th anniversary of the incorporation of the Keystone Broadcasting System, Chicago, are system executives (l to r) Naylor Rogers, executive vice president; Arthur Wolf, vice president; Edwin R. Peterson, special representative, and Sidney J. Wolf, secretary-treasurer.

► A special breakfast Feb. 8 will honor Swift & Co's nine years of sponsorship of *The Breakfast Club* on ABC. ABC Central Division Vice President John H. Norton Jr. will be host to network officials attending, including: President Robert E. Kintner; Fred Thrower, vice president in charge of sales; Robert Saudek, vice president in charge of public affairs, and Charles Harry, vice president in charge of programs. Swift executives and the program's cast will also attend.

► WKY Oklahoma City, reportedly third oldest station in the U. S., is celebrating its 30th year of operation. Station took to the air in 1920 as a 20 w experimental station, 5XT, and was purchased by the Oklahoma Pub. Co. in 1928. In the same year, WKY joined NBC.

► Feb. 3 marked the 15th anniversary of WEAV Plattsburg, N. Y.

Station, the former WMFF, is owned and operated by Plattsburg Broadcasting Corp., headed by George F. Bissell, president and general manager.

► *The Court of Current Issues* will enter its third year of consecutive telecasting tomorrow (Feb. 7). The program, a sustainer, is seen Tuesday, 8-9 p.m. over WABD (TV) New York and the DuMont Television Network.

► Grady Cole, commentator-announcer for WBT Charlotte, N. C., has completed his 20th consecutive year with station.

► The 1,200th consecutive broadcast of *Morning Devotions* on WBAP Ft. Worth, Tex., has been observed.

► WSTV Steubenville, Ohio, this year is celebrating its 10th anniversary.

► Carl Ide celebrated the first anniversary of his *Carl Ide Calling* disc show on WNJR, Newark, N. J., Jan. 31 by holding open house at the WNJR studios.

► Dramatized historical sketch titled *Cavalcade of WING*, highlighted 25th anniversary program of WING Dayton, Ohio, Jan. 22. Program was presented from National Cash Register Auditorium.

► Mort Nusbaum Jan. 10 began his second year as morning man on WHAM Rochester, N. Y. He is the conductor of a weekly talent show which will soon make its debut over WHAM-TV. This is his 15th year in radio.

► Paul Gibson, story-teller and commentator for WBBM Chicago, passed the 7,000 mark in his number of daily broadcasts last month.

MONOPOLY UNIT

No Radio Probe This Year

PROGRAM agenda and hearing schedule of the House Judiciary monopoly subcommittee for the second session of Congress was announced Jan. 24 in a news conference held by Rep. Emanuel Celler (D-N. Y.).

Rep. Celler, chairman of the full House Judiciary Committee, told BROADCASTING that he contemplated no hearings involving the radio industry in this session. He said he had received "some but not many, complaints" dealing with radio and that he saw no pressing need for a probe at this time.

Among specific industries cited for exploration beginning this month are Lever Bros. and its whole network of American and foreign subsidiaries, newsprint U. S. Steel and monopoly in the legitimate theatre.

Mr. Celler told reporters that Charles Luckman, retired president of Lever Bros., would be asked to testify and would be subpoenaed "if necessary." A similar probe of company has been demanded also in the Senate in a proposal (S Res. 213) by Sen. William Langer (R-N. D.) [BROADCASTING, Jan. 23].

The subcommittee will also hold a hearing on forthcoming legislation which would require the Justice Dept. to report periodically to Congress on the "nature, number and reasons" for all consent decrees and pleas of *nolo contendere* in anti-trust cases.

WCTU HITS NAB

Criticizes Liquor Ad Stand

NAB was charged last week by Mrs. D. Leigh Colvin, president of National Woman's Christian Temperance Union with "hypocrisy and deceit" in its defense of alcoholic beverage advertising over its member stations. She referred to NAB's letter to the Senate Interstate Commerce Committee's hearings on the Langer bill (S-1847) to ban advertising of alcohols.

Mrs. Colvin contended the stations have, ever since repeal, ignored state and local rights by pouring wine and beer advertising and sometimes whisky, into large areas dry by local option. Promotion for drinking appears in programs, she added. She suggested this advertising "is no doubt responsible for more juveniles taking to drink than any other single influence." NAB itself refers to manufacture and sale of alcoholic beverages as a moral problem, she said.

OREGON MEET SET

Group To Convene Feb. 10-11

MEMBERS of the Oregon State Broadcasters will hold their annual meeting Feb. 10-11 on the U. of Oregon campus at Eugene, according to President Lee W. Jacobs, WBKR Baker.

The state group was invited by the university to dedicate several new campus buildings, particularly Willard Hall which will be devoted to radio speech and drama. Gov. Douglas McKey will take part in the dedication and will be principal speaker at the Saturday banquet. Maurice B. Mitchell, director of Broadcast Advertising Bureau, will address a joint Friday luncheon of the Eugene Chamber of Commerce and the state association. Election of association officers is scheduled Saturday. Lee Bishop, KORE Eugene, is chairman of the Eugene committee arranging the meeting.

XXXL RENEWAL

FCC Affirms Denial

DENIAL of license renewal to XXXL Reno, Nev., on grounds of transfer without FCC consent, was ordered by FCC last week in a final decision affirming an earlier hearing examiner's recommendation [BROADCASTING, Jan. 2]. FCC also dismissed as moot an application for proposed sale of the station.

KXXL, assigned 250 w on 1230 kc, was destroyed by fire in November 1948 and has been off the air since that time. Hearing Examiner Panney N. Litvin found that Byron Samuel, now sole owner, had acquired without FCC approval the one-third interests each held by Frederick W. Kirske and Edward Margolis, who had been partners with him in the licensee. Mr. Samuel proposed to sell KXXL to Chet Gonce, original owner of the station.

PRICE of its seven-inch long-playing records has advanced five cents, according to Columbia Records Inc.

A FEW of the old-timers at KVOO Tulsa, Okla., with a combined service record of 141 years, get together at an office party in observance of the NBC affiliate's 25th anniversary. L to r (number of years of service shown in parenthesis): William B. Way (18), vice president and general manager; Mary G. Everage (15), traffic manager; Weymouth B. Young (15), musician-comedian; Ruth Dickens (12), commercial department; Ken Miller (18), news director; Norma Jane Cohen (16), violinist; C. A. O'Donovan (18), treasurer; Vick White (11), engineer (standing in front of Mr. O'Donovan), and Gustav K. Brandborg (18), commercial manager.

TREASURY SHOW

Oklahoma U. Widens Coverage

A NEW and increased method of network distribution of *This Is Oklahoma*, produced for the Savings Bond Division of the U. S. Treasury by the Broadcasting Workshop of the U. of Oklahoma, was inaugurated Jan. 26 over the facilities of the Oklahoma Group Broadcasters.

Previously carried weekly for a year and a half by transcription, the programs will be produced live in the studios of KOCY Oklahoma

City and relayed by FM to the cooperating stations. Several stations will record for delayed broadcasts, while others will relay the program live. Stations not included in the network will continue to receive the program by transcription. The list of stations now carrying the program includes:

KOCY Oklahoma City, KRHD Duncan, KSMI Seminole, KOWE Clinton, WNAD Norman, KADA Ada, KTAT Frederick, KTJS Hobart, KASA Elk City, KHBG Okmulgee, KBIX Muskogee, KWON Bartlesville, KIHN Hugo, KVLH Pauls Valley, KTMK McAlester, KSIW Woodward, KSWO Lawton and KWCO Chickasha.

RADIO AT HEARINGS

Becomes City Council Issue in Chicago

CHICAGO City Council aldermen will consider a resolution permitting radio stations to record testimony at a public hearing at its next session Mar. 2.

Resolution, expected to be presented by Ald. Nicholas Bohling, follows uproar in City Hall Jan. 31 during a Chicago Transit Authority hearing before the council's transportation committee. At that time WGN-TV's *Chicagoland Newsreel* staff was refused permission to film proceedings for a video show by William Fort, public relations assistant to the mayor.

WMAQ (NBC) Chicago Newsman Len O'Connor was turned down also when he wanted to tape record some discussion for his daily *News on The Spot* program. Ald. Bohling, after asking the committee why stations were being censored, was told by Ald. James F. Young, chairman of the transportation committee who conducted the meeting, "perhaps the city architect had refused permission."

A simple majority vote will carry or dismiss the resolution. In the meantime, Mr. O'Connor is interviewing Aldermen on tape for his show, asking (1) Do you think Council and Council committee proceedings should be broadcast, (2) Would you as an alderman personally support such a resolution,

and (3) Could you conclude any reasons why the council should be afraid of such broadcasts? Aldermen declining to comment are mentioned.

Mr. O'Connor told BROADCASTING no provision ever has been made in the council for radio station personnel, although individual seats and desks are assigned to newspaper reporters. The situation was reported also on WMAQ by John Holtman and Jim Hurlbut.

WHITE HOUSE

Plans Radio, TV in Every Room

THE NATION's "modern" White House will be well communications-equipped in this atomic age. Public Buildings Administration engineers, designers of a complex and intricate master control system, revealed their plans fortnight ago.

The Executive Mansion, now under repairs at an estimated cost of \$5,400,000, will be outfitted with a central control communications network of unestimated but expensive cost. The network calls for a television screen in every room, radio (both AM and FM), Muzak, facilities for wire and tape recordings and a public address system. Any one of these can be received by dialing a number similar to the procedure for telephones.

Any program can be recorded by a dial spin. In addition, direct lines will connect the White House to all major radio networks for programs which do not happen to be broadcast by a Washington station. TV screens are tuned in by a swish of the dial. A giant 6-ft. by 8-ft. TV screen will be built into the movie theatre located in the executive office part of the building.

FORD MOTOR CO.

Buys 9 Additional Shows

FORD MOTOR CO., Detroit, through its agency, J. Walter Thompson Co., New York, has purchased another group of nine network shows for a short term in addition to its schedule already announced [BROADCASTING, Jan. 16].

Starting today through Feb. 15 the following programs will be used on MBS: *Adventures of Peter Salem*, *Official Detective*, *Can You Top This?*, *I Love a Mystery*, *Crime Fighters*, *Mutual Newsreel*. On ABC, *Blondie* will be used, and on CBS, *Escape* and *Lum 'n' Abner*.

SOUTHERN Democratic Conference in Raleigh, Va., covered Jan. 28 by WMBG Richmond. All speeches were tape recorded and presented following day in special program.

DYNAMITE CASE

WBT Hearing Postponed

PRELIMINARY hearing on Sterling L. Hicks' alleged involvement in the blast attempt on WBT Charlotte, N. C.'s tower [BROADCASTING, Jan. 26] was postponed last Thursday to Feb. 23 at the Mecklenburg county recorder's court.

Mr. Hicks, business manager of the IBEW in Charlotte, has been charged with conspiracy in the dynamiting try at the foot of WBT's 429-foot tower on Jan. 22. Acting on a tip, police had said a fortnight ago that they intercepted Chesley M. Lovell, a Columbia, S. C. house-painter, who they said had "a long criminal record," as he reportedly lit the fuses of the dynamite sticks which had been detonated.

Police said subsequent questioning of Mr. Lovell led them to the arrest of Mr. Hicks and the lodging of conspiracy charges against him. Two other men, whom the police named as being implicated, were free on bond in South Carolina. They were said to have been instrumental in assisting the explosion plot.

EXPORT section of Allen B. DuMont Labs. instrument division has increased its activities in European reconstruction, creating 25 distributorships in major cities, including London, Paris, Milan and Stockholm.

NEW FIRM

Standard Electronics Corp. Succeeds WE

FORMATION of a new company, Standard Electronics Corp., Providence, R. I., to succeed Western Electric Co. in the design and manufacture of broadcasting and studio equipment for radio and television for distribution through Graybar Electric Co., was announced last week.

Graybar has been the principal distributor of broadcasting equipment made by Western Electric Co., but the latter company is about to withdraw from the field.

The new company, whose formation was announced by George F. Hessler, Graybar vice president, will succeed Western Electric as Graybar's supplier of transmitting equipment.

Mr. Hessler said Graybar would have no financial interest in the new concern.

Heading the new company is Edwin M. Martin, as president and chairman of the board. Mr. Martin was formerly chairman of the board of American Bosch Corp. and before that was vice president, secretary and director of Farnsworth Radio and Television Corp.

Robert F. Moyer, president of Standard Machinery Co., of Providence, will become vice president and treasurer of Standard Electronics.

Agreement With Hazeltine

Standard has an agreement with Hazeltine Electronics Corp. to manufacture products which Hazeltine—employing a staff of 300 engineers—has developed through research.

Hazeltine is currently planning a complete television equipment package, for production by Standard, Mr. Hessler said.

The new company has been privately financed, Mr. Hessler announced. It will operate its own plant at 4175 Elmwood Ave., Providence. Members of the board of directors are David G. Baird, financier; Sylvester Muldowney, president of Security Bank Note Co.; Wesley Peoples, president of United

States Radiator Corp., and Daniel Schaffer, director of the Pennsylvania Railroad, Curtiss Wright and Universal Pictures.

Mr. Hessler said Western Electric had entered an agreement with Standard for the latter company to provide maintenance parts and service to all users of Western Electric equipment.

According to the announcement, the company plans to develop and manufacture TV, microwave and radio communications equipment and gradually add other electronic equipment.

WCLE EXTENSION

FCC Sets March 1 Deadline

FINAL extension of authority to remain silent was given WCLE Clearwater, Fla., by FCC last week pending financial reorganization. March 1 was set as the deadline. Station has been off the air since early November.

WCLE has pending an application for assignment of its license to Florida West Coast Broadcasters Inc. for \$32,500 [BROADCASTING, Jan. 30]. Assignee includes Arthur B. Mundorff, 50% owner; and William S. Perry, 20% owner, both formerly with WPAT Paterson, N. J. WCLE owners, Houston Cox Jr. and M. L. and S. L. Rosenzweig earlier had proposed to sell the station to Dr. William T. Watson but this transfer was dropped in December after FCC had ordered an investigation of Dr. Watson's qualifications to be a licensee [BROADCASTING, Oct. 31, 1949]. WCLE is assigned 1 kw daytime on 680 kc.

REVOCATIONS

KPAB, KWIK Hearings Set

UPON REQUEST of stations involved, FCC last week designated for hearing its orders of revocation for KPAB Laredo, Tex., and KWIK Burbank, Calif.

KPAB, assigned 250 w on 1490 kc, has been transferred without Commission approval, FCC alleged [BROADCASTING, Jan. 9]. Hearing is to commence in Laredo March 6 before Comr. Paul A. Walker. FCC said Mark Perkins "has caused control of KPAB to be transferred to Allen K. Tish, William Prescott Allen and others without Commission approval, and that KPAB is now operated by these persons without a license." Mr. Perkins acquired KPAB in December 1948.

KWIK, assigned 250 w on 1490 kc, was charged also with transfer without approval, before going into bankruptcy [BROADCASTING, Dec 19, 1949; Jan. 2]. Hearing is scheduled March 20 in Burbank before Comr. E. M. Webster, as requested by Leslie S. Bowden, trustee in bankruptcy. However, FCC also wishes to determine legality of this request since the trustee is not the licensee although he presently is operating KWIK.

International Ladies' Garmen Workers Union, owner of FM stations WFDR New York, WVUN Chattanooga and KFMV Los Angeles, has pending offer to buy KWIK for \$40,000. Issues for the hearing are as follows:

(1) To determine whether all transfers of stock in Burbank Broadcaster Inc., licensee of station KWIK, made prior to March 14, 1949, have been reported in accordance with Section 1.321, 1.342 and 1.343 of the Commission's Rules and Regulations, and whether the license granted to Burbank Broadcasters Inc., or the right and responsibilities incident thereto have prior to March 14, 1949 been transferred, assigned or disposed of directly or indirectly without the consent of the Commission and in contravention of the Communications Act of 1934, as amended, and more particularly Section 310(b) thereof.

(2) To determine whether the letter filed December 30, 1949, by Marcu Cohn [Washington attorney] on behalf of the "applicant" [trustee] is legally sufficient under the provisions of Section 312(a) of the Communications Act of 1934, as amended, to suspend or Order of Revocation, dated December 14, 1949.

WHLI and WHLI-FM Hempstead L. I., broadcast 8,847 spot announcements during 1949 on behalf of local non-profit organizations such as Red Cross, cancer drives, etc. In addition 1,765 Long Island organizations were given meeting and activity announcements, station reports.

WALE CASE

Hearing Issues Reported

ISSUES have been reported by FCC for its investigation to determine whether WALE Fall River, Mass., has lived up to the program and ownership-management promises it made in its original application which helped it win over other applicants in a competitive hearing.

The Commission also has set March 6 and Fall River as date and location for its hearing involving the WALE license renewal bid as well as the application of Bay State Broadcasting Co. seeking WALE's assignment, 250 w on 1400 kc [BROADCASTING, Oct. 31, 1949]. Bay State, permittee of WBSM New Bedford, Mass., was loser in the initial competition for the Fall River assignment on 1400 kc. Bay State petitioned FCC last year for the new comparative proceeding.

FCC earlier had planned to incorporate in the new hearing an application for approval to sell WALE to WNBH New Bedford, but this request was subsequently withdrawn. Among the issues specified for the comparative hearing are the following:

1. To determine the legal, technical, financial and other qualifications of the applicant, Bay State Broadcasting Co., to construct and operate the proposed station, and of the applicant, Narragansett Broadcasting Co. (WALE) to continue to operate WALE.

2. To determine whether the representations and proposals heretofore made by Narragansett Broadcasting Co. to the Commission with respect to the ownership and operation of the station were made in good faith and whether Narragansett Broadcasting Co. has carried out, or has failed to carry out, such representations and proposals with particular reference but not limited to the following:

(a) The shares of stock issued to and subscribed for by Clark F. Murdough, George L. Sisson Jr., Albert Pilavin and Leonard P. Cohen and the participation of the said persons in the operation and management of WALE.

3. To determine whether Narragansett Broadcasting Co. has carried out, or has failed to carry out, the representations and proposals heretofore made by it to the Commission with respect to program service.

4. To obtain full information concerning the nature and character of the program service which has been

rendered by WALE, with particular reference but not limited to the following:

(a) The amount of time the station has devoted to the broadcasting of discussions upon controversial issues of public importance; (b) The amount of time which the station has devoted to the broadcasting of local live talent programs; (c) The amount of time the station has devoted to broadcasting of agricultural and educational programs; (d) The amount of time which the station has devoted to the broadcasting of recorded programs.

5. To obtain full information concerning the nature and character of the program service proposed to be rendered by Bay State Broadcasting Co. and Narragansett Broadcasting Co.

6. To determine the overlap, if any, that will exist between the service areas of the station proposed by Bay State Broadcasting Co. and of the operation of WBSM by Bay State Broadcasting Co., the nature and extent thereof and whether such overlap, if any, is in controvention of Section 3.35 of the Commission Rules.

WORK OF FTC

House Group Has Hearing

PUBLIC interest in the responsibility of the Federal Trade Commission over false or deceptive advertisements is great, because "tens of millions of our people purchase goods relying on the truth" of radio and other media statements, FTC Comr. James M. Mead has advised a House Appropriations subcommittee.

Comr. Mead and Acting Chairman Lowell B. Mason testified before the group last month on FTC's fiscal 1951 funds. FTC is requesting \$4,225,000 for 1950-1951 covering operation and pay raise increases. In addition to the litigation method in this field, the commission has developed informal and cooperative procedures designed for wider coverage of law enforcement at a lower cost, Comr. Mead said. Importance of its anti-monopoly work also was stressed.

Thomas E. Walsh

THOMAS E. WALSH, 61, vice president of McGuire Adv. Ltd., Windsor, Ont., died in his office following a heart attack on Jan. 24. He was former president of Walsh Adv. Ltd., Windsor, from which he retired in 1946.

At a contract signing for Toni Talking are (l to r): James Crawford, WPEN sales manager; Edward C. Obrist, general manager; Mr. Palumbo and Toni Spaulding.

KOME INCREASE

Tulsa Outlet Now on 5 kw

KOME Tulsa, formerly operating on 1340 kc with 250 w, took to the air Jan. 22 with increased power of 5 kw on 1300 kc.

Included in the MBS outlet's improvement, KOME officials report, is a new transmitter site complete with latest obtainable equipment installed in an air conditioned transmitter building at 86th and S. Harvard in Tulsa, and four Blaw Knox Towers, each 284 ft. high.

During the opening day ceremonies, KOME received congratulatory messages and salutes to its new power from Mutual key stations on several network programs. Owned and operated by the Oil Capitol Sales Corp., KOME went on the air as an MBS affiliate on Dec. 25, 1938.

Officials said changes in the KOME setup are the result of a large expansion program started more than a year ago by Harry Schwartz, president.

SCRIPT CONTEST

AER Lists Five Donors

FIVE donors of expense and prize money for the annual script competition of the Assn. of Education by Radio have been announced by the contest office. The five are Audio Devices, New York, undertaking sponsorship for the third successive year; The School Broadcast Conference and World Book Encyclopedia, both of Chicago; the Webster Electric Co., Racine, Wis., and the Protestant Radio Commission, New York. Regional sponsors are yet to be announced.

Open to students enrolled in colleges and universities in the United States, the contest has for its purpose the encouraging of good script writing among college students and calling the attention of the industry to promising writers. Rules of the contest, which closes April 1, may be obtained from Sherman P. Lawton, Oklahoma U., Norman, Okla.

CBI Sydney, N. S., undergoing alterations to provide better facilities for handling network broadcasting between the Canadian mainland and Newfoundland.

HAND-IN-HAND

WPEN, Sponsor Plug T

NIGHT OWLS in Philadelphia know about Toni Talking to a —or WPEN-AM-FM and sponsor Frank Palumbo, local Ford Mercury dealer, missed a bet in pooled promotion-proof campaign. One full week of fun, tricks and few bolts of promotion light that would have blistered Franklin's key were employed before the program's inauguration, 2-7 a.m. Jan. 17.

Toni Talking is conducted by Toni Spaulding, claimed by WPEN to be the only all-night girl disc jockey in the country. Program debut also introduced Philadelphia to the start of WPEN's 24 hour program schedule. Not only is the program soothing for the night crowds' ears but its time sold from start to finish—Frank Palumbo Motors splits the tire with a local General Electric dealer.

Working hand-in-hand, WPEN and Mr. Palumbo chalked up a series of promotion hits. The conventional uses of circulars, ads, radio spots were put in play. But the spectacles which started people talking about Toni Talking, WPEN says, were these: An elephant adorned with a Toni banner stalked Quaker City streets; faster mode of transportation included a hot air balloon and a fleet of Mercurys parading through the streets, and a smoke writing airplane. Posters were tacked on 35,000 telephone poles, the name, time, station and sponsor painted on every downtown street corner and Palumbo Motors girls called homes in the city and suburbs to suggest a show for family listening. A regular "first nighter" was held at Mr. Palumbo's night club with celebrities and radio people on hand. Results already are in. WPEN reports Miss Spaulding received thousands of cards and letters from fans the first morning's mail.

General Foods Shift

TWO General Foods shows on CB; will shift time and day periods of the network. My Favorite Husband now heard on Friday under Jell-O sponsorship, is to move to Sunday, 6 p.m., starting March 5. The Goldbergs, for Sanka coffee, formerly heard Friday night, move to Saturday, 8:30-9 p.m., effective Feb. 4. The 6 p.m. Sunday time now is occupied by Prudential Family of Stars, which will be cancelled Feb. 26. Young & Rubicam New York, is the agency for GF

A. ADWOMEN

Radio-TV Feature Meeting

Radio and television will come in for a session each during the Los Angeles Advertising Women Inc. "Advertising at Work" lecture series starting today, Feb. 6, for 13 weeks. Sessions, to "everyone interested in advertising," will be held Mondays at Hollywood Studio A, Sunset Avenue.

Bert J. McAndrews, executive director, Southern California Broadcasters' Assn. will speak on "Radio" at the April 17 meeting. Scheduled for April 24 is a television panel made up of Los Angeles television station executives, including Hal Bock, manager, Western network television, NBC; Charles Glett, KTVL (TV) Los Angeles vice president in charge of television; Harrison Dunham, TTV Inc. acting general manager; Don Feddersen, general manager of radio and television, KABC-TV Los Angeles. Martha Weston Bigelow, KFOX Long Beach, Calif., account executive, will be moderator.

In addition, discussion of TV by Don McNamara, director of television, Telefilm Inc., will be a session with "Photography" April 10.

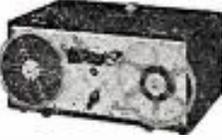

Other speakers will include Charles W. Collier, executive vice president, Advertising Assn. of the West; Clarence Davenport, account executive, McCarty Co.; Burt Shran, vice president, McCann-Erickson Inc.; Hal Stebbins, president, Hal Stebbins Inc.; Ted L. Amberger, vice president, Westquist Inc.; Walter Criswell, art director, BBDO; Ward Ritchie, production manager, Foote, Cone & Bunting; Herbert H. Kirschner, president, AAW and Kirchner & Co., San Francisco.

WQXR-FM FEEDS WFMZ (FM)

Program Exchange Without Wire Lines Studied

WQXR-FM NEW YORK, the *New York Times* station, last week began an experiment to make its programming available to WFMZ (FM) Allentown, Pa. If the tests are successful, WQXR-FM will make its broadcasts available to FM stations in other localities.

Elliott M. Sanger, executive vice president of WQXR, said there are no commercial aspects to the present arrangement, as both stations are cooperating without financial compensation between them during the test period, which will continue for one month. The project, however, may determine the commercial possibilities of a group of FM stations being programmed from a central point and transmitting

programs without wire line facilities, Mr. Sanger said.

Starting Feb. 1, WFMZ began rebroadcasting the WQXR-FM programs weekdays from 7:30 p.m. to midnight and Sundays from 12:30 p.m. to midnight.

WQXR-FM announced the move also was the first step toward meeting requests from various parts of the country for obtaining its programs.

George B. Evans

FUNERAL services were held in New York Jan. 27 for George B. Evans, 48, pioneer radio publicity agent of 25 years, who died suddenly of a heart attack in his Bronx home the previous day. He had represented over 200 radio, stage and screen personalities including Frank Sinatra, Rudy Vallee, Lena Horne, Duke Ellington, Margaret O'Brien, Glenn Miller and the A&P Gypsies. Mr. Evans was born in Latvia and came to the U. S. in his childhood. Before entering the public relations field, he was with the sales division of RCA-Victor. Surviving are his wife, Mrs. Emma Evans, two sons, two brothers, two sisters and a grandson.

RADIO AUDIENCE

Booklet Defines Meaning

DEFINING AND MEASURING RADIO AUDIENCES. A Survey Guide for Radio Stations. By George Fisk. Bulletin No. 10, Economic and Business Studies. Bureau of Economic and Business Research, State College of Washington, Pullman, Wash. 40 pp.

THIS bulletin appraises the meaning of a radio program listener and the radio station listener by sorting out the terms used by various radio-rating services. It also attempts to show small and independent station operators "how to plan their own surveys with a minimum of outside help."

Author of the booklet is George Fisk, an assistant professor of business administration at the School of Economics and Business, Washington State College, Pullman, Wash. The bulletin is divided into three parts: A definition of the radio listener, description of survey methods, and research procedure for the small station. An attached "Part IV" presents a detailed "case study in small station listener research." To illustrate procedure, this study presents procedural method employed by KWSC, the college's AM station in Pullman, in its survey to measure listener opinions of programming and talent.

Pacific Coast Survey

SECOND volume of the economic survey of the Pacific Coast is being released by the Pacific Coast Board of Intergovernmental Relations with title of *Economic Outlook for the Pacific Coast, 1950-1960*. The report, based on Volume I studies, analyzes the extent and nature of recent and impending growth of the area. Feature is detailed accounting of growth of markets for different commodities by a breakdown of increases in children, active working age population, elderly group and family units. Copies at \$1 each can be obtained from Stanley Crook, Board secretary, 121 Federal Office Bldg., San Francisco 2.

AGRICULTURE

Information Seeks Fund Raise

AGRICULTURE DEPT.'s Office of Information is seeking nearly a \$30,000 increase in funds for fiscal 1951—largely for television activities to meet requests for additional information on the new medium.

This was revealed in testimony released fortnight ago by a House Appropriations subcommittee considering 1950-1951 funds for various government branches. Funds for the department's information office for 1950 were estimated at \$1,261,328. The new '51 budget estimate calls for \$1,290,800.

R. L. Webster, associate director of information, Dept. of Agriculture, told the subcommittee that "the good record we made in radio (over 25 years) is embarrassing us a little bit so far as television goes, because people expect us . . . to be experts in that field."

He said the department's two-year project would eventually pay "big dividends" in television, especially in the film field, because many television stations just starting "are interested in getting film material which they can run at less expense than live programs."

THURSDAY edition of five weekly MBS *Queen for a Day* now being recorded on Tuesday for Thursday presentation because of time conflict with telecasting of the weekly TV version of the program on Don Lee television.

(By Examiner J. Fred Johnson Jr.)

Carl F. Kneierim, Grand Coulee, Wash.—Granted leave to amend application so as to specify 1400 kc in lieu of 1240 kc and for removal from hearing.

(Continued on page 119)

LAMB CANDIDACY

Won't Enter Senate R

EDWARD LAMB, president of WTDOD Toledo, WTVN (TV) Columbus (both Ohio) and W (TV) Erie, Pa., announced Jan. 26 that he would not be a candidate for the Democratic Senatorial nomination in Ohio during the 1950 election. He gave "pressure professional, business and personal affairs" as the reason.

Mr. Lamb, who also is publisher of the *Erie Dispatch*, licensee WICU (TV), reportedly had been in the running for the nomination as opposition to Sen. Robert Taft (R-Ohio). WTVN is licensed Picture Waves Inc., WTDOD (and its FM affiliate, WTRT) to Uni-Corp. Inc.

McIVER SHOW

WMAW Sets Three Sponsors

MRS. STEPHENS McIVER, wife of the late Senator, joined WMAW Milwaukee past fortnight after 18 years with WTMJ Milwaukee as "Nancy Grey," revealed Jan. 26 in Chicago that she has three sponsors lined up for her new five-week show starting March 9. Sponsors are Coplin Furrier, Badger Paint Co. and Doering Motors, all Milwaukee.

Mrs. McIver stopped in Chicago driving a new sedan, property of Doering Motors, on which her new program is gaily advertised, before proceeding to southeastern Wisconsin.

Mrs. McIver and Jack Bunz, WMAW general manager, inspect the Magne recorder which she will use to record her new show.

states where she will tape-record series of interviews, complete with commercial lead-ins. She will air special tapes weekly to WMAW from where her half-hour show (Mon. through Fri., 12:30 to p.m.) will originate.

After making recordings in South Carolina, Georgia and Florida, Mrs. McIver will head west covering Texas and California before returning to "live" broadcasts from Milwaukee in May. Already her itinerary are the U. of Georgia Florida's Everglade Club, Rona Plaza Hotel, Houston's Shamrock Hotel, San Francisco's famous waterfront establishments and the homes of Actor Vincent Price and Columnist Hedda Hopper in Hollywood.

ROSEY'S NEW SUCCESS

WJAS Sportscaster Is Hit on Morning Show

WITH all the grace and coordination of the big league stars whose performances he has so often described, A. K. (Rosey) Rosewell is now threatening to smash radio's best batting averages with his new morning show, *Rosey Bits*, on WJAS Pittsburgh.

Rosey, whose WJAS broadcasts of the Pittsburgh Pirates games earned him one of the highest Hoopers of any broadcaster handling baseball, is featured in an hour-long show mainly compounded of his original poetry, with music by Lee Kelton's band.

WJAS reports that by far the biggest chunk of fan mail is for the man who introduced to Pirates fans unusual baseball phrases like "dipsey doodle," "open the window, Aunt Minnie" and "put 'em on and take 'em off." His listeners number many of long standing including 3,000 shut-ins in Pittsburgh homes and hospitals who have been listening to him ever since he began broadcasting some of his original poetry in the home-made crystal set days.

The big mail pull, however, is from the "lady of the house," for whose ear both Rosey and WJAS officials worked out the show.

Just before his new program opened, a group of civic, educational, professional and religious leaders in Pittsburgh gave Rosey a big send-off at the William Penn Hotel. Typical of the guests were Baseball Commissioner A. B. Chandler and former New Jersey Governor Harold G. Hoffman, for whom Rosey campaigned in 1926.

"But the new program doesn't drag in baseball by the hair," Rosey claims. "There's enough going on around this town now—new building, new ideas, and new shows—to provide lots of radio copy. I'm

ADAM J. YOUNG

Reveals New Realignment

EXPANSION of Adam J. Young Jr. Inc., station representative, has caused departmental realignment, President Adam J. Young Jr. told the recent annual meeting of the firm's board of directors.

Chief adjustments were in the Canadian department. There, in keeping with the company policy of maintaining separate sales departments for each operation, it has assigned John Carter, long with the U. S. AM department, as assistant to Director Tom F. Malone in New York-Canadian sales.

Part of the increased Canadian business is due to the company's work for the newly-formed Trans-Quebec Network, which will provide coverage via CKAC Montreal, CHRC Quebec City and KCRS Jonquiere as basic stations and CHMC New Carlisle, CKBL Matane and CFJB Riviere-Du-Loop, as affiliates.

kind of glad, just the same, that I got a lot of poetry off my chest in the early days—it comes in pretty handy right now on the new WJAS show."

NAB SERIES

Offers Concerts on Tape

A SERIES of 13 hour-long recorded concerts by 13 leading orchestras of Europe will be made available to U. S. stations free, the Unaffiliated Stations Committee of the NAB has announced.

The special series will be tape-recorded in Europe under auspices of the ECA and will begin in April. Stations desiring to use the programs may obtain information from Ted Cott, vice president of WNEW New York and chairman of the NAB Unaffiliated Stations Committee.

Each of the transcriptions will include a five-minute intermission commentary on Marshall Plan activity by Bill Murray, commentator for the Armed Forces Radio Service in Europe.

Transcriptions with commentary in Italian and other foreign languages also will be made available. Arnold Hartley, vice president of WOV New York and chairman of the foreign language subcommittee of NAB, was associated with Mr. Cott in the development of the series.

'MASTER INDEX'

Electronics Volume Issued

1947-1948 ELECTRONIC ENGINEERING MASTER INDEX. Edited by John F. Rider. New York: Electronics Research Publishing Co. Inc. 339 pp. \$19.50. THIS volume, third in a series, is a subject index to the contents of electronic and allied engineering publications printed throughout the world from January 1947 through December 1948.

Edited by John F. Rider and containing more than 18,000 new entries, the *Master Index* lists almost three times the number of publications listed in previous volumes. Among these publications are more than 230 of the major international scientific magazines, journals and proceedings, resulting in a comprehensive bibliography of the electronic and allied engineering arts.

WCAU Contracts

WCAU Philadelphia reports a greater volume of radio contracts on hand than at any other time in its 27-year history, according to Donald W. Thornburgh, president of WCAU-AM-FM-TV. New business in the latter part of 1949 and the first weeks of 1950 brought the outlet 15 contracts. Sponsorships of individual programs, participations and spot announcements total 1,190 accounts, he said.

NARSR COUNCILS

Hasbrook, Rhodes Electe

DICK HASBROOK of Avery-Knudel was elected chairman of the Los Angeles Council of the National Assn. of Radio Station Representatives Jan. 26. He succeeds Lincoln Simonds of Weed & Co.

Ray Rhodes of Paul H. Raymer Co. was elected chairman of the San Francisco Council Jan. 19, succeeding Lindsey Spight of John Blair & Co.

The announcements were made by T. F. Flanagan, NARSR managing director, who also said the San Francisco and Los Angeles councils are joining in arranging an award for spot radio campaign. Purpose of the award, he said, is to promote the best use of spot radio on the West Coast.

MRS. JANE PRALL DIES

Widow of Ex-FCC Chairman

MRS. JANE B. PRALL, 78, widow of Anning S. Prall, former FCC Chairman, died Jan. 28 at her home, 160 College Ave., Westerleigh Staten Island. Mr. Prall served on the FCC from June 1935 until his death in July 1937.

Mrs. Prall formerly was vice president of the Federation of Women's Clubs of New York City; past president of the Port Richmond Women's Club and a founder and member of the Staten Island Better Films Council. Survivors are a son, Bryan W. Prall, and two sisters, Mrs. Margaret B. Knox and Mrs. Sadie A. Hall, all of State Island.

WCSS Amsterdam, N. Y., adds *Family Theatre* series to its schedule of transcribed programs.

May 22-23: North Carolina Assn. of Broadcasters annual convention, Chapel Hill, N. C.

Aug. 10-13: AFRA convention, Sheraton Hotel, Chicago.

ANTI-TRUST LAWS

Harsher Penalties Asked

PENALTIES for violations of the Clayton and Sherman anti-trust laws should be raised appreciably above present levels, officials of the Justice Dept. and Federal Trade Commission told a House Judiciary monopoly subcommittee last Wednesday.

Herbert Bergson, assistant attorney general, Justice Dept. Anti-trust Division, and James W. Cassidy, associate general counsel of FTC, told members the present 5,000 fine was outmoded, and placed their support behind legislation (HR 6679) by Rep. Francis Walter (D-Pa.) to raise the amount to \$50,000 to discourage potential anti-trust offenders. Mr. Bergson said the Justice Dept. did not favor the top figure as "mandatory" but only as a maximum fine which it could impose.

BOGGS ELECTED

WMCA Board Member, V.P.

NORMAN BOGGS, for the past year general manager of WMCA New York, last Thursday was elected vice president and a member of the board. He has been with the station since Feb. 14, 1949. Before that he was president and general manager of WLOR Minneapolis and prior to that he was with WGN Chicago as general sales manager and director of its New York office.

Mr. Boggs

Helen S. Straus, vice president, also was elected to the board of directors. The two vacancies on the board were created by the recent resignations of Irving L. Straus and R. Peter Straus, sons of Nathan Straus, president of the station.

Irving Straus, an account executive, is now in business for himself, while his brother, R. Peter, previously director of special events, has joined the International Labor Organization at Geneva, Switzerland.

CBC SESSION

Governors To Meet at Toronto

FIRST CBC board of governors meeting to be held at Toronto for many years, is being held at Royal York Hotel, Toronto, Feb. 10-11, with several applicants for new AM licenses to be heard, as well as new regulations regarding bingo games by radio. The CBC board will consider passing a regulation against the broadcasting of bingo and similar games and will hear representations at its public hearings Feb. 10.

New AM stations are being requested by Pierre Brisson for 1 kw on 1380 kc at Victoriaville, Que., and by Gibson Bros. Ltd., for 250 on 1230 kc at North Vancouver. CJSH-FM Hamilton, has application in for increase in power from 745 w on 102.9 mc. to 9,200 w on same frequency. A number of stations are requesting permission for share transfers.

Canada's Hearings

ROYAL Commission on Arts, Letters and Sciences which is holding hearings currently throughout eastern Canada on broadcasting and radio control, is expected to have its report ready for submission to Parliament at Ottawa sometime this fall. Commission is headed by Hon. Vincent Massey, one-time Canadian ambassador to Washington. Hearings have been completed in western and central Canada, are now being conducted in the Atlantic coast provinces, and final hearings will be held at Ottawa this spring. Commission's report will set policy for radio and television in Canada for at least a generation.

FINAL DECISIONS

Texas Star Bcstg. Co., Dallas, and KTRH Houston, Tex.—Announced final decision granting application of Texas Star for new station on 740 kc, 10 kw day, 5 kw night, directional, and denying bid of KTRH (now operating on 740 kc with 50 kw using directional day and night) for permit to change daytime directional. Proposed decision issued last May [BROADCASTING, May 23, 1949]. Decision Feb. 2.

Belle City Bcstg. Co., Racine, Wis., and Metropolitan Bcstg. Co., Milwaukee—Announced decision denying as in default application of Metropolitan for new station on 1470 kc with 500 w daytime and granting application of Belle City Bcstg. for new station on 1460 kc with 500 w daytime. Proposed decision issued last fall [BROADCASTING, Oct. 24, 1949]. Decision Feb. 2.

Coast Radio Bcstg. Corp., Los Angeles; Huntington Bcstg. Co., Huntington Park, Calif., and San Gabriel Valley Bcstg., Monrovia, Calif.—Announced final decision to grant application of Coast Radio for new station on 1540 kc with 5 kw day only and to deny bids of Huntington Bcstg. and San Gabriel Valley Bcstg. for same facilities in their respective cities. Proposed decision was last September [BROADCASTING, Oct. 3, 1949]. Decision Feb. 1.

Beer & Koehl, Ashland; Mt. Vernon Bcstg. Co., Mt. Vernon; Zanesville Bcstg. Co., Zanesville, and Mound

Order Adopted

WALT Tampa, Fla.—Adopted order amending Commission order of June 8, 1949, designating for hearing application of WALT to enlarge issues.

February 2 Applications . . .

ACCEPTED FOR FILING

AM-1150 kc

WCEN Mt. Pleasant, Mich.—CP to change from 1150 kc 500 w D to 1150 kc 1 kw D.

AM-1460 kc

WHGB Harrisburg, Pa.—CP new AM station to change from 1400 kc 250 w unl. to 1460 kc 5 kw unl. DA-N AMENDED to request DA-2.

AM-1320 kc

WRIO Rio Piedras, P. R.—CP new AM station to change from 1140 kc 1 kw-D 500 w-N to 1320 kc 1 kw unl.

License for CP

WGRA Cairo, Ga.—License to cover CP new AM station.

Modification CP

KCHC El Paso, Tex.—Mod. CP AM station to change from 860 kc 500 w D to 860 kc 1 kw D.

Modification CP new FM station for extension of completion date: WASH Washington, D. C.; WKAT-FM Miami Beach, Fla.; WTBO-FM Cumberland, Md.; WOR-FM New York; WTOL Toledo, Ohio.

Renewal of License

KING-FM Seattle, Wash.—Request for license renewal, FM station.

KFI-FM Los Angeles—Mod. CP new FM station to change ERP to 16.8 kw.

Modification of CP

Mod. CP new commercial TV station for extension of completion date: WNAC-TV Boston to 6-1-50; KSTP-TV St. Paul, Minn. to 9-16-50.

Bcstg. Corp., Newark, all Ohio—Announced decision granting Beer & Koehl station on 1340 kc with 250 w fulltime and denying competitive bid of Mt. Vernon Bcstg. for same facilities. Adopted separate decision severing from consolidated proceeding and denying applications of Zanesville Bcstg. and Mound Bcstg. for same assignment as they did not protest proposed decision [BROADCASTING, April 25, 1949]. Comr. George E. Sterling dissented in Ashland-Mt. Vernon decision because he considered evidence insufficient to warrant grant deviating from FCC engineering standards. Decisions Feb. 1.

KXXL Reno, Nev.—Adopted as final, initial decision of Dec. 28, 1949 [BROADCASTING, Jan. 2, p. 59] denying renewal of license to KXXL and dismissed as moot application for assignment of license from Edward Margolis, Frederick W. Kirske and Byron J. Samuel to Chet L. Goncse. Final decision Feb. 1.

WARM Scranton, WBAX Wilkes-Barre, Pa.—Announced decision to grant application to change from 1400 kc 250 w unl. to 590 kc 5 kw unl. DA eng. cond., and denied application of John Stenger to change facilities of WBAX from 1240 kc 250 w unl. to 590 kc 1 kw unl. DA. Final decision Feb. 1.

INITIAL DECISIONS

Belleville, Ill.—Announced initial decision by Examiner Leo Resnick to grant application of "Belleville News-Democrat" for new station on 1260 kc 1 kw unl. DA-N and to deny WTMV East St. Louis, Ill. change of facilities from 1490 kc 250 w unl. to 1260 kc 1 kw unl. DA. Decision Jan. 30.

Olney, Tex.—Announced initial decision by Examiner Elizabeth C. Smith to deny application of Olney Bcstg. Co. for station on 1590 kc 250 w D as in default. Applicant failed to appear at hearing either in person or by counsel. Decision Jan. 30.

Jacksonville, Fla.—Issued initial decision by Examiner Jack P. Blume to grant application of City of Jacksonville for extension of completion date of television station WJAX-TV. See story this issue. Decision Jan. 31.

OPINIONS AND ORDERS

Roy Hofheinz and W. N. Hooper d/b as Louisiana Bcstg. Co., New Orleans; Bayou Bcstg. Co., Baton Rouge, La., and KGBC Galveston, Tex.—By memorandum opinion and order granted petition of Bayou Bcstg. insofar as its requested ruling on each of its exceptions in matter of its application for new station on 1540 kc, 50 kw day, 10 kw-night directional, denied by FCC last May in ruling granting Louisiana Bcstg. 1540 kc directional, 50 kw day, 25 kw night, and KGBC to switch from 1 kw day, to 1 kw day, 250 w-night directional, on 1540 kc [BROADCASTING, May 23, 1949]. Bayou petition denied in that it sought reversal of grant, or reopening of hearing to receive evidence re protection proposed to XENC Celaya, or further argument before Commission en banc. Comrs. Walker and Jones dissented on grounds Texas Star "has not satisfied its burden of proving that the grant to it is warranted despite the great interference to KSEO" Durant, Okla. They preferred grant to KTRH. Comr. Sterling dissented for same reason and further on ground Texas Star did not meet provisions of Sec. 3.24 of rules. Decision Feb. 2.

WCEC Rocky Mount, N. C.—Commission in memorandum opinion and order denied application of Josh L. Horne for SSA to operate WCEC on 810 kc with 1 kw from 5 a.m. until local sunrise in addition to presently authorized hours of operation, and dismissed motion by WGY Schenectady requesting

said application be designated for consolidated hearing. Order Feb. 2.

WTNB Birmingham, Ala.—By memorandum opinion and order granted amendment by Thomas N. Beach to cure defective verification of his application for CP. Further ordered that Pilot Bcstg. Corp. is granted permission to file amendment within 30 days showing that it is applicant for CP to change facilities of WTNB. If such amendment is filed application for CP will be set for comparative hearing with mutually exclusive application of Johnston Bcstg. Co. for new station at Birmingham of 850 kc, 5 kw-D, 1 kw-N on issues specified by Commission. Petition for final grants filed by Thomas N. Beach and Johnston Bcstg. were denied. Decisor Jan. 27.

WHAT and WTEL Philadelphia WRAW and WEEU Reading, Pa.—Announced memorandum opinion and order denying petitions by WTEL, WRAW and WEEU for reconsideration of FCC's final decision to abolish share-time arrangement between WHAT and WTEL by assigning 250 w daytime or 860 kc to WTEL and 250 w fulltime or 1340 kc to WHAT [BROADCASTING, Oct. 3, 1949]. Dismissed as moot petitions by WTEL and WRAW seeking stay of effective date for re-assignment and ordered re-assignments shall become effective in 30 days. Order Feb. 2.

WHOM Jersey City, N. J.—Granter motion to file brief and participate a *amicus curiae*, concerning general question of broadcasting of foreign language programs, in oral argument scheduled Feb. 6 in matter of Pilgrim Bcstg. Co. et al, Boston applicants for 950 kc. Ruling Feb. 2.

Non-Docket Actions . . .

WMMJ was granted request to cease operation from Oct. 23, 1949 to Dec. 29, 1949 pending financial reorganization BROADCASTING, Oct. 31, 1949, p. 351 and further extension was granted until Feb. 21, 1950. Mr. Venezky hopes to effect a sale for the benefit of his creditors in that time. WMMJ is assigned 1020 kc 1 kw D. Filed Feb. 2.

KSWA Graham, Tex.—Assignment of license from George W. Smith Jr., Clay

Airplane view of KROW Island, opposite the toll gates on the San Francisco-Oakland Bay bridge (lower left).

* * *

KROW OAKLAND

Island Is Transmitter Site

KROW ISLAND in San Francisco Bay will be the site of a new 5 kw fulltime transmitter to be constructed by KROW Oakland within the next four months. Final contracts for the \$200,000 construction project will be let this week and work will begin immediately.

The new transmitter already is completed by RCA and is in process of shipment. Upon completion, the new transmitter station will provide KROW with the only fulltime 5 kw signal among independent Bay Area stations. The station's present 1 kw transmitter is located at 1520 Eighth Ave., Oakland.

KROW Island, consisting of 14 acres, was created years ago from dredgings pumped out in the course of deepening channels leading into the Port of Oakland. It lies 200 feet north of the toll plaza on the Oakland approach to the San Francisco-Oakland Bay Bridge.

AFRA Convention

ANNUAL American Federation of Radio Artists convention will take place at Chicago's Sheraton Hotel Aug. 10-13. Details will be announced later.

E. Thompson Jr., Harland V. Newsom and Guy C. Hutcheson a partnership d/b as Graham Bcstg. Co. to new corporation Southwestair Inc. composed of same partners with exception of Mr. Smith. Mr. Smith wishes to liquidate and sells his holdings of 53.332% for \$8,850.44. Holdings in new corporation C. E. Thompson 70%; H. V. Newsom 10%; Noel E. Thompson 10% and Guy C. Hutcheson 10%. KWSA is assigned 1330 kc, 500 w D. Filed Feb. 2.

KSRO Santa Rosa, Calif.—Assignment of license from Ruth W. Finley individual and sole owner of KSRO to a corporation with no change of ownership. Mrs. Finley requests change of form of ownership to improve her tax position and formulate a policy of estate planning involving her extensive properties. KSRO is assigned 1350 kc 1 kw unl. DA-1. Filed Feb. 2.

WKNY Kingston, N. Y.—Assignment of license from Kingston Bcstg. Corp. to newly formed corporation Monadnock Radio Foundation Inc. Principals in Monadnock own WKNE Keene, N. H. and wish to extend their radio interests. Purchase price of WKNY is \$80,000. Interests on Monadnock include: Luette S. Close 2.00%; WKNE Inc. 61.04%; Joseph K. Close, president 22%; Lyman Spitzer 10%; George Smith, treas. 20%; Phillip Faulkner, vice president and Mildred M. Smith 4.76%.

SEATTLE TALENT

AFRA Quizzes Admen on Use

A SURVEY of 300 advertising experts was launched Feb. 1 by the Seattle AFRA group to discover why greater use is not made of local talent in radio programming. Directed at station executives, advertising agencies and advertising managers of local business firms, the 28-item questionnaire asks types of programs used, why, determining factors in choice, constructive criticism, etc.

The survey, expected to take two months, will be conducted through personal visits by a corps of between 20 and 30 AFRA members. The resulting yes-no answers then will be tabulated. In each case, additional comments also are invited. The findings later will be available for examination by all interested persons.

Sam Pearce, KOMO Seattle announcer and president of the AFRA group, explained that there has been a growing concern among Seattle radio talent at the dearth of locally produced programs.

Preparation of the questionnaire was in the hands of a committee under the chairmanship of Bob Hurd, KOMO producer. Other members are Carl Person, KJR Seattle writer; Dick Keplinger, freelance commentator and newscaster, and Scott Easton, KOMO announcer.

Lang-Worth Clients

LANG-WORTH Feature Programs Inc., New York, announced last week that KXGI Ft. Madison, Iowa, became a new subscriber for the eight-inch Lang-Worth library while 24 other stations renewed contracts. Renewing are:

KWSL Lake Charles, La.; WELL Battle Creek, Mich.; KWYO Sheridan, Wyo.; WTIC Hartford; WELI New Haven; WEEI Boston; WMAZ Macon, Ga.; WJHP Jacksonville, Fla.; WTOC Savannah; WOMI Owensboro, Ky.; WILK Wilkes-Barre; WNOR Norfolk, Va.; WRVA Richmond, Va.; KTUL Tulsa; WRAK Williamsport, Pa.; WKWB Dubuque; WLRD (FM) Miami Beach; Melody Inc. (wired music) Miami Beach; WOXF Oxford, N. C.; KRDU Dinuba, Calif.; WLOF Orlando, Fla.; WALT Tampa; WHAP Hopewell, Va.; WPTF Raleigh, S. C.

GAME CHARGES

Wis. League Takes Stand

EDWIN WILKIE, former district attorney of Dane County (Madison), Wis. will be retained as counsel for The League of Wisconsin Radio Stations, it was decided at a meeting of the league last week.

Mr. Wilkie attended an all-day league conference Monday in the Plankinton House, Milwaukee, and assisted in drawing up a hard-hitting resolution designed to discourage the U. of Wisconsin from charging commercial broadcasting stations for carrying university football games. The league, whose members now pay \$100 for originating broadcasts of the games, went on record as "opposed to the principle of assessment of fees for booth rentals" at the Wisconsin Stadium.

"If the State of Wisconsin has an operating headache because of its broadcast activities, it should get out of the business and let experienced commercial operators handle them," observed Sidney H. Bliss, president of WCLO Janesville and WGEZ Beloit.

Letter Released

Previously, League President Ben Laird had released copies of a letter he and Vice President Joseph D. Mackin had written the university Board of Regents in December lamenting the fact that no provision has been made at the institution for radio coverage of athletic events "without overlapping responsibility between the university Radio Committee and the Dept. of Intercollegiate Athletics."

The letter objected to the following university policies:

Denying faculty members and students permission to appear as individuals on commercially sponsored broadcasts; prohibiting commercial announcements from the buildings and grounds of the university where commercially sponsored programs are involved; permitting commercial exploitation through newspaper advertisement of broadcasts from the university station; prohibiting rebroadcasts of university station programs unless each program unit is carried in its entirety as a continuous, uninterrupted performance; and permitting political campaign speeches to be made over the university station.

Lobbying Probe

CONCURRENT resolution (H Con Res 62) to create a joint Senate House committee to probe lobbying activities was turned aside by the Senate last week at the request of Sen. Scott Lucas (D-Ill.), Senate majority leader. The proposal was originated and passed last session by the House which then set up its own lobbying group, headed by Rep. Frank Buchanan (D-Pa.). Group currently is scrutinizing compliance of registrants, and those who failed to register, under the Lobbying Act.

At Deadline...

NBC-TV SATURDAY PLAN ACCEPTED BY 20 STATIONS

TWENTY NBC-TV affiliates have agreed to carry all or part of new Saturday night 2½-hour show beginning Feb. 25, network reported Friday.

Of stations responding to NBC-TV time request, eight reportedly agreed to carry whole program. Total weekly program cost for time, talent and production (based on full 22-interconnected station network) will approximate \$90,000, James Nelson, television advertising and promotion director, announced. Of \$90,000, at least \$50,000 to be spent for talent and production.

NBC-TV hopes to sell 15 one-minute commercials per week (three per half-hour), with up to 15 advertisers each receiving one commercial per week. Commercials time-slotting to be rotated. Cost per week per announcement will be \$6,202 for time and talent—more than same spot would cost on regular station basis but cheaper than magazine or newspaper space, NBC contends, citing impact of big-name variety show.

JERRY STOLZOFF NAMED V.P. BY CRAMER-KRASSELLT

APPOINTMENT of Jerry Stolzoff, radio-TV director Cramer-Krasselt Co., Milwaukee, as vice president in charge of both media, and Ken Hegard, formerly public relations director of Goodwill Industries and previously with WTMJ and WFOX Milwaukee, as TV account executive, announced by Milwaukee agency.

New TV test campaign by Moeller Mfg. Co. (Snap-Tite Bottle Stoppers), including film participations on WNBQ (TV) Chicago and KSTP-TV Minneapolis-St. Paul and live spots on WABD (TV) New York *Kathi Norris Television Shopper*, also announced.

NEW OWNERS GET WNEW

OWNERSHIP of WNEW New York passed officially Friday from Arde Bulova and Milton Biow, former principal stockholders, to new owners, including group of Providence, New York and St. Petersburg businessmen and Ira M. Herbert, WNEW vice president in charge of sales, and Bernice Judis, vice president and general manager. FCC approved transfer fortnight ago.

WWJ ADOPTS POLICY FOR LABOR DISPUTES

POLICY governing future labor-management disputes involving public interest—guaranteeing without charge minimum of one hour Class A time weekly for "joint" use by disputants—set forth by WWJ-AM-FM Detroit. Issue arose after Luckoff, Wayburn & Frankel, Detroit agency, had requested time for its client, the UAW-CIO, now involved in dispute with Chrysler Corp.

Harry Bannister, WWJ general manager, in policy statement to agency, noted that "any use of WWJ's facilities which does not completely and meticulously ensure in advance that neither party will make greater or more effective use of facilities must serve, in effect, to make WWJ a partisan." Under procedure, parties to controversy must agree in advance among themselves to use facilities jointly, then jointly request use of time, for presentation or rebuttal, or for joint forum discussion. WWJ would furnish moderator for latter.

EXCISE TAX WOULD BOOST TV SETS AT LEAST 5%

EXCISE tax on TV receivers proposed Friday by President Truman would mean increase in retail price of 5% to 7%, according to first manufacturer estimates. Tax was proposed in message to Congress asking cut in many excise levies as business aid.

TV tax of 10% at factory level would raise estimated \$40 million, Secretary of Treasury John W. Snyder told House Ways & Means Committee.

Radio Mfrs. Assn. to consider proposed tax at mid-winter meeting starting Feb. 15 in Chicago. Last year radio excise tax produced \$40 million compared to \$60 million in 1948.

AFM SUSPENSION OF PAUL TO BE APPEALED

JERRY FAIRBANKS Productions Hollywood, Friday prepared to appeal suspension-fine levied by American Federation of Musicians against Edward Paul, firm's musical director. AFM charged Mr. Paul with "alleged violation" of union's rules banning recording of any music for TV films, though AFM members have been allowed to play for "live" and kinescoped shows.

Fairbanks firm describes charges as "vague" and sometimes "inaccurate," cites past negotiations for scales and working conditions for TV film music; asserts it was forced to record background music outside of country.

MONTGOMERY'S HOOPER

ROBERT MONTGOMERY's Lucky Strike show, Mon., 9:30-10:30 p.m., made 35.2 Hooper on premiere last week over NBC-TV network. NBC claims this is record for TV premiere. Previous week *The Goldbergs*, which plays opposite on CBS-TV, had 34.9 Hooper which put it in top ten.

PEEL FOR CENSUS POST

ROY VICTOR PEEL, director of Institute of Politics at Indiana U., nominated Friday by President Truman to be director of U. S. Census Bureau, to succeed late James Capp.

DuMONT Network affiliates to meet Feb. 7-8 in New York. DuMont Labs last Friday gave short demonstration of color system at Pas-saic, N. J.

MBS BOARD MEETING

BOARD of directors of MBS late Friday wound up two-day quarterly meeting in Washington. Action confined to routine matters, was stated officially after meeting. Network programming policies discussed but no formal action taken. Board members visited President Truman at White House Friday and had luncheon with Secretary of Commerce Charles Sawyer as luncheon speaker. They attended Radio Corespondents Assn. dinner Saturday night.

It's still **bargain** **day at WLW**

The number of radio stations competing for listening within the WLW Merchandise-Able Area has increased from 153 in 1946 to 258 in 1949 . . . an increase of 69 percent.*

Nevertheless, during February-March, 1949, WLW received 20,046,400 Home Hours of Listening per week—compared to 20,315,137 during the same period in 1946 . . . a decrease of only 1.3 percent.*

Further, on a cost-per-thousand basis, WLW delivers advertising impressions at slightly more than half the cost of using a combination of the best local stations in each of the 21 major markets of WLW-Land.

And that's why we repeat . . . it's still *Bargain Day* at The Nation's Station!

CROSLY BROADCASTING CORPORATION

BUTTERNUT RENEWS FOR 12th CONSECUTIVE YEAR

YANKTON, S. DAK., JAN. 1—
WNAX announced today that
Paxton and Gallagher, makers
of Butternut Coffee, had renew-
ed their sponsorship of Whitey
Larson's 10:00 p.m. 15-minute
news period.

This makes the 12th consecu-
tive year that Butternut has
carried a schedule on WNAX.

Commenting on the renewal,
Robert R. Tincher, station gen-
eral manager, said, "the renew-
als year after year b

*ADVERTISING Stays
WHERE IT Pays*

Paxton and Gallagher, makers of Butternut Coffee, began an advertising schedule on WNAX January 2, 1939. Recently they began their twelfth uninterrupted year on WNAX, with a 52-week renewal of a Class A quarter-hour news strip.

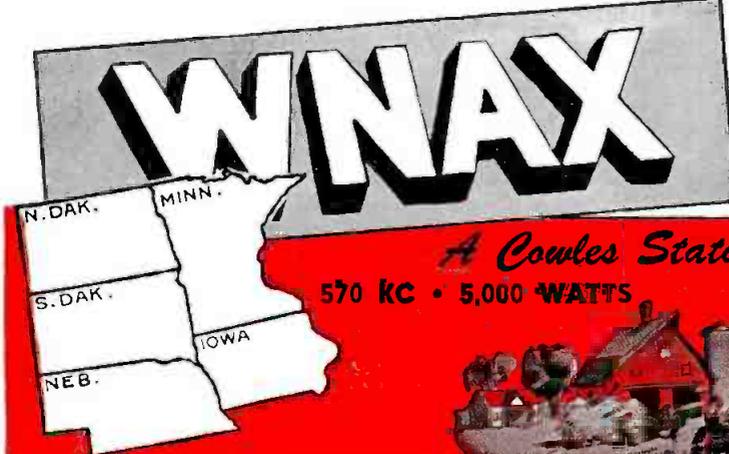

Like many other blue chip advertisers, Butternut has found that WNAX advertising is a continuing good investment. These advertisers renew their WNAX schedules year after year because they get a consistent return on every advertising dollar invested with Big Aggie.

Big Aggie Land, a Major Market, served only by WNAX embraces more than a million radio families in 308 BMB counties of Minnesota, the Dakotas, Nebraska and Iowa.

In 1948, folks in Big Aggie Land with a buying income of nearly \$5-billion—greater than Milwaukee, San Francisco or St. Louis . . . accounted for \$4-billion in retail sales—greater than Los Angeles, Philadelphia or Detroit.*

Ask your Katz man to show you how WNAX can produce good will, increase sales of your product or service.

*Compiled from 1949 Sales Management Survey of Buying Power.
