Page 4 • October 19, 1953
TRANSACTION unique in business of broadcasting being finalized whereby Paul H. Raymer Co., pioneer station representation firm, absorbs newer O. L. Taylor Co. Taylor company would operate as separate entity, continuing under Ted Taylor's direction, and with Lloyd George Venard carrying on as president. Raymer and Taylor have largely non-competitive lists in both radio and tv. Transaction has capital gains aspect, but would permit expansion of both organizations and intensification of spot selling operations.

** FCC'S NEWEST Commissioner—Robert E. Lee—intends spending next 60 days or so observing FCC operations. He plans to inspect every facet of FCC functioning down to most modest of its sections, hoping in that way to indoctrinate himself.

** **

COMR. LEE wasn't aware that his recess appointment carried no pay until next session of Congress. He plans to borrow from his bank to keep his family (wife and three children) going until Congress convenes in January. As House Appropriations Committee's expert, he drew $11,500 (FCC job pays $15,000; seven-year term from June 30, 1953). Job he originally set his sights for—Assistant Comptroller General—would have paid $16,000 for 15-year term.

** **

WHAT IS Comr. Lee's philosophy of regulation? He has told recent callers he believes in Jeffersonian doctrine: "He governs best who governs least." He doesn't believe FCC should concern itself unduly with programs or business operations, theorizing that broadcasters by dint of risk investments, experience and know-how, are best qualified to run their own affairs in public interest.

** **

JOHN GIBBS AGENCY, N. Y., talent, producing and packaging firm, expects to expand shortly with additional key executive personnel. Willson (Bill) Tuttle, former president of United Television Programs, and before that vice president in charge of radio and television for Ruthrauff & Ryan, N. Y., slated to join Mr. Gibbs as a vice president. Other executive appointments are to follow.

** **

CONTRARY to general belief, WSM Nashville is not wedded to idea of booster operation only for extension and fill-in of tv station signals; it plans to petition FCC this week for rule-making, will suggest booster and/or satellite stations as means of accomplishing the job. Booster stations are tied to one "mother" station; satellites can pick up several signals.

** **

PLYMOUTH division of Chrysler Motors planning to launch co-op advertising plan across country for first time by asking Plymouth dealers their preferences among media, including television, radio, newspapers, outdoor and movie trailers, inquiring also as to specific stations, newspapers, etc. Advertising will start in January and will be placed through N. W. Ayer & Son, N. Y. Plymouth co-op advertising scheme follows pattern set previously by other Chrysler cars: DeSoto, Dodge and Chrysler.

** **

EBULLIENT Eugene F. McDonald Jr., president of Zenith, is taking new tack in promotion of his Phonevision (box-office 16mm). He points out that Pennsylvania Turnpike, operating on toll basis, is doing land-office business but that "free" state roads are still operating. He's using this analogy to buttress argument that box-office tv can do well without disturbing "free" tv.

** **

MAJOR food chain's practice of soliciting stations for block of free time in exchange for in-store displays has brought protest to Federal Trade Commission.

** **

MOVE by manufacturers to adopt high-fidelity "seal" as means of checking lidv hi-fi claims for shoddy radio-tv sets and sound gear was indefinitely stalled last week by small custom firms who fear big companies will profit from fast-growing market for realistic reproduction. As consequence, vast promotion put behind hi-fi may be wasted if phony advertising continues.

** **

ABC RADIO officials reportedly negotiating with Norman Cash, general sales manager of Crowley Broadcasting Corp.'s WLWT (TV) Cincinnati, formerly NBC manager of radio station relations, for key post in ABC radio sales department.

** **

WILLIAM T. LANE, former manager-part owner of WLTV (TV) (now WLWA [TV]) Atlanta, is returning to Syracuse in December to establish advertising and public relations agency. He formerly was vice president-general manager of WAGE there. Since leaving WLWA last March, he has been serving as consultant to television applicants and will continue in that capacity during early months of 1954.

** **

EVEN though desire of industrial communication group to parloin part of 88-108 mc fm broadcast band is still only in gleam stage, educational interests are busy contacting legislative and regulatory agencies in effort to put out fire.

** **

MAJORITY of post-thaw uhf-vhf tv stations must file answers today (Monday) to FCC inquiry as to their "progress" and network affiliation success [B*ST, Sept. 28], but network and Radio - Electronics - Television Mfrs. Assn. reports already are in Commission hands. Virtually none of stations so far offer comment on their network situation, provide only statistics requested.

Things have changed in ARKANSAS, too!

Believe us, any resemblance between the colorful Arkansas of legend, and today’s Arkansas, is entirely coincidental! In the last decade alone, the State has made almost unbelievable progress. Effective Buying Income per family is 185.1% greater than ten years ago!*

There’s a big new Arkansas radio station, too—50,000-watt KTHS in Little Rock, CBS, and the State’s only Class 1-B Clear Channel station. KTHS gives interference-free daytime coverage of more than 3-1/4 million people, including practically all of Arkansas. Primary daytime coverage exceeds one million people, more than 100,000 of whom do not receive primary daytime service from any other radio station!

Your Branham man will be glad to give you all the facts.

LITTLE ROCK, ARKANSAS
CBS-TV Raises Basics
To 41 in New Rate Card

NEW CBS-TV network rate card (No. 10) an-
nounced Friday, raising number of intercon-
nected stations from 33 to 41 and also, in what was described as major rate change, providing 25% reduction in base rate for Sunday afternoon time by re-
classifying Sunday 1-5 p.m. from Class A to Class C, latter rate being the same as for Saturday.-

Base hourly rate for minimum-buy network goes up from $35,920 to $43,595 with boost in number of stations involved. New ones on basic network are KTVH-TV Hutchinson, Kan.; KMBC-TV and WHB-TV share-time combination in Kansas City; WSIX-TV Nashville; WTAR-TV Norfolk; KPHO-TV Phoenix; KOIN-TV Portland, Ore.; WPRO-TV Providence, and WHEC-TV and WMCT-TV's "Divided Segment" plan, an-
nounced Friday, which permits advertiser to purchase one-half of 15-minute segment of that show. Agency is Foote, Cone & Belding, Los Angeles.

HAMILTON TESTING

Hamilton Watch Co., alternate-week sponsor of half-hour Your Jeweler's Showcase on tv in 25 markets, plans television test spot announcement campaign in all markets through Christmas. If test is successful, regular schedule will follow next season. BBDO, N. Y., is agency.

DU Pont Seeks New Talent

Two BBDO, N. Y., executives planning trips to West Coast this week in search of new tv fare for Du Pont as possible replacement for this sea-
son's Cavalcade.

AIRLINES DRIVE

American Airlines, N. Y., launches radio spot announcement campaign in six major cities on Sep. 17 for eight weeks. Rutherford & Ryan, N. Y., is agency.

SMITH BROS. IN CANADA

Smith Brothers (Monopol), through Sullivan, Stauffer, Col-
well & Bayles, N. Y., buying radio spot an-
nouncement campaign for first time in Canada. Schedule will start Oct. 25 for 13 weeks in major eastern Canadian markets.

SALES ON TODAY

Drugists Supply Corp., N. Y., has purchased 16 participations on Today (NBC-TV, Mon.-Fri., 7-9 a.m., EST and CST), starting this week, through Ruth-
rauff & Ryan, N. Y., and Jarman-Williamson Co., Portland, Ore., has bought single participa-
tion in same program for Dec. 1 through Joseph R. Gerber Co. there.

BLOCK EXPANDS

Block Drug Co. (Polic
dent), through Cecil & Prenbrey, N. Y., extend-
ting tv test spot announcement campaign, now running in 15 markets, to five additional ones, starting "as soon as possible" for 13 weeks.

Pabst Buys Turpin-olson

PABST beer has signed with CBS Radio for blow-by-blow coverage of Randy Turpin-Bobo Olson boxing match from New York Wednesday night, raising speculation it may return to net-
work radio for fights coverage, at least on major bouts, after dropping radio some time ago (but keeping tv). Turpin-Olson fight will be carried on CBS-TV by Pabst, but with New York blacked out. CBS Radio coverage will include New York. Starting time: 10 p.m. EST. Pabst agency: Warwick & Legler, N. Y.

October 19, 1953 • Page 9
SURE WAY TO REACH YOUR GOAL IN TOLEDO...

Lloyd Thaxton, producer and star of the early evening LLOYD THAXTON SHOW, brings comedy and music with Broadway polish to WSPD-TV viewers. He lets the scenery and costumes go from the elaborate to the ridiculous as do his clever pantomimes and impersonations.

In early afternoon, Lloyd supplies comedy and acts as emcee of TELETUNE TIME, with Sanford, the talking parakeet, supplying novel touches. Both programs are participating shows.

For a sure score in Toledo, let Mr. Touchdown, S P D carry your product to the goal of increased sales in the Billion Dollar Toledo market.
WTIC Ownership Challenged; Owners Answer Same Day

CHALLENGE to legality of Travelers Insurance Co.'s owning WTIC Hartford, Conn., through subsidiary Travelers Broadcasting Service Corp., was filed with FCC Friday by opposing vhf ch. 3 applicant Hartford Telecasting Co. Hartford Telecasting claimed Connecticut law forbids insurance companies from engaging in broadcasting activities. WTIC responded same day, pointed to 28-year period during which its WTIC license has been renewed periodically and its books inspected by Insurance Commissioner of Connecticut and other states, with no such question ever being raised. WTIC contended that Connecticut law permitted insurance companies to lend funds to broadcasting activities, just as it would in real estate, expressly permitted by state law.

Hartford Telecasting includes Harry C. Barch, ex-CBS Washington executive and now owner of KIST and KEYT (TV) Santa Barbara, Calif., and contractor Clifford S. Stike. In a merger move last month, third applicant for Hartford's ch. 3, WDBC, dropped out with understanding that if WTIC received grant, WDBC would receive minority interest in WTIC licensee and at same time dispose of its radio properties [BT, Sept. 28].

Cleveland Grant Proposed

INITIAL decision proposing to grant new vhf station on ch. 2 to WTIC Cleveland is due Friday by FCC Hearing Examiner Fanney N. Litvin. Action made possible by withdrawal of competitive bid of WJW there (story page 50). Initial ruling specifies effective radiated power of 220.3 kw visual, 119 kw aural; antenna height above average terrain 645 ft.

Seek Ch. 7 in Traverse City

APPLICATION for new vhf station on ch. 7 in Traverse City, Mich., was filed late last week by Midwestern Broadcasting Co., licensee of WTCM Traverse City; WATT Clam Lake Twp.; WATZ Alpena Twp.; WMN E Bear Creek Twp., and WATC Gaylord, all Michigan. Principals include President Les Biederman (30%); Vice President William H. Kiker (16.4%); Secretary-Treasurer Drew McClay (15%); Fred G. Zierle (16.4%); and Edward G. Biederman (22.14%).

WITH-TV Asks Frequency Change

WITH-TV Baltimore, new vhf ch. 69 grantee, filed application with FCC Friday for change of frequency to ch. 19, most unprotected there. WITH-TV cited economies of construction since it could use present WITH-FM site and fm tower for ch. 18 operation.

Seek Montgomery, W. Va., Channel

ADDITION of vhf ch. 2 at Montgomery, W. Va., now with 100 kw channel, called off of FCC Friday in joint petition by WTP Charles-ton and WMON Montgomery. Ch. 2 can be added without affecting any other assignment, they contend, explaining vhf is needed to pair with AM stations here to "narrow, deep and deep in valleys" of coal mining region. They cite 483,000 population in 35 mile radius. Decision as to which will file for station not settled.

UPCOMING

Oct. 19-20: NARTB Dist. 5 meeting, Henry Grady Hotel, Atlanta, Ga.
Oct. 21-22: NARTB Dist. 4 meeting, the Ch. 5 T T C T
Oct. 22-23: Kentucky Broadcasters Assn. meeting, Kentucky Dom Village, Kentucky Lake.
Oct. 23-24: NARTB Dist. 3 meeting, Bellevue-Stratford Hotel, Philadelphia. (For other Upcomings see page 113)

DRAGNET PopULAR

TOP-RATED Draget tv series apparently has impressed its sponsor as well as it has viewing audience. At any rate, Liepmann & Myers Tobacco Co., which sponsors program for Chesterfield cigarettes on NBC-TV network, on Oct. 28 will start sponsoring re-runs of earlier Draget telecasts syndicated by NBC Film Div., under title Badge 714, on WOR-TV York. Agency: Cunningham & Walsh.

McGuire, Gresham Named To MPTV Positions

APPOINTMENTS of John W. McGuire as central division sales manager of Motion Pictures for Television Inc. and Maurice Gresham as western sales manager of company announced for release today (Mon.) by Edward D. Madden, MPTV vice president. Mr. McGuire, who served previously as senior account executive for ABC-TV, will headquarter in Chicago. Mr. Gresham, who will work out of Beverly Hills, is said to have organized tv film distribution for KLAC-TV Los Angeles.

Great Western Names Weed

NBC-AFFILIATED stations of Great Western Radio Network Friday named Weed & Co. national representatives. Great Western includes KDYL Salt Lake; KKLJ Butte, KKLJ Helena, KKLQ Bozeman, KKLX Great Falls, KSLI Missoula, KGHL Billings, all Montana, and KSEI Pocatello, KIDO Boise, KTFI Twin Falls, all Idaho.

Bond Drive Draws Protests

WASHINGTON office of Bonds for Israel campaign considering use of radio advertising following complaints from stations that it is buying newspaper space while requesting free radio promotion of Oct. 31 benefit to be held at Constitution Hall. Cohen & Miller, Washington agency for campaign, said late Friday initial decision on use of radio not yet reached.

Moviemen Get Continuance

CONTINUANCE to Nov. 2 of deadline for movie firms to answer government questions in its suit to force release of 16mm feature film for tv and non-theatrical use [BT, Sept. 21] approved by Los Angeles office of Justice Dept. anti-trust division.

People

JAMES D. EVANS, advertising manager of Diamond Match Co., to Sherman & Marquette, N. Y., as account executive. He formerly was with Young & Rubicam, N. Y., for 12 years as account executive.

ARTHUR A. CURRIE, assistant general sales manager of radio and television division, Sylvania Electric Products Inc., named sales manager of division. JOHN SUOR, supervisor of contract sales for same division, appointed sales manager in charge of contract and domestic sales.

ROBERT R. WARRINGER, project director of Alfred Politz Research, and before that research director of Fuller, Smith & Ross, N. Y., to Scheidel, Beck & Werner, N. Y., as director of research and marketing.

CHARLES H. WEISSNER JR., manager of media department, Morse International, N. Y., and before that account representative, J. Walter Thompson Co., to Roy S. Durstine Inc., N. Y., as member of executive staff.

BURTON DURKEE to Maxon Inc., Detroit, as account executive on Packard account. He formerly was manager of Detroit office of William H. Weintaub & Co.

Comedy, Dramatic Programs On Networks Show Increase

SHARP increase in number of situation comedy programs on network radio and television, was reported Friday by Executives Radio-TV Service, Larchmont, N. Y., in program summary based on new edition of firm's radio-tv FACTury.

Television currently has total of 63 sponsored dramatic shows of all types, according to FACTury, with number of dramatic plays increasing from 16 last year to 22 this year. Situation comedies increased from 6, as of October 1952, to 21 this year. On radio, FACTury lists 40 sponsored dramatic shows, with dramatic plays rising from 9 to 13 this year and situation comedies from 5 to 11.

Number of sponsors on television was said to have increased from 141 on 149 programs in 1952 to 159 on 162 shows this year. On radio, totals show 131 sponsors on 174 programs this year as against 139 sponsors and 196 programs last year.

Harlow Roberts Dies

HARLOW P. ROBERTS, 61, vice president, General Foods, Chicago agency, died suddenly Thursday of a heart attack at Fox Hospital in Oneonta, N. Y. Born in Racine County, Wis., Mr. Roberts studied at U. of Wisconsin, served as army captain in World War I, later became advertising manager of a farm machinery company, Emerson-Brantham Co. In 1922 he was named advertising manager of Pepsodent Co., where he made radio history by persuading bid closed circuit tv to broadcast a daily 15-minute program for Pepsodent sponsorship, Amos 'n Andy, first network strip show. He became advertising director of Purity Bakeries in 1936 and joined the old Blackett, Sample and Hummert agency in 1937. He had been with GI&M since 1941.

AT&T Reports Income

AT&T report showed Friday that consolidated net income for company and its subsidiaries was $452,146,107 in twelve months ended Aug. 31 as compared with $386,627,568 for same period of 1952. In notice to stockholders, Cleo F. Craig, AT&T president, noted that television has grown to point where Bell System provides network service to 202 stations in 130 cities, bringing programs to estimated audience of 100 million.

What measure do you use?

Whatever the method of measuring, your aim is to count a result. In television there are lots of ways of counting results. One that is especially gratifying to WJTV is—the mail bag. The results it counts for us are two: enthusiastic acceptance by thousands* of Central Mississippi viewers and equally enthusiastic acceptance by foremost national spot, network, regional and local advertisers.

WJTV, Mississippi’s pioneer television station, means profitable results—however the results are measured.

*27,813 homes, according to WJTV’s monthly independent agency survey.
Here's a statistic

Iowa isn't first in *

The average Iowa hospital bed is filled 55% of the time. The national average is 79%.

The average U.S. male lives to be 65; the average Iowa man is around 68. Iowa ladies average two years more life than U.S. ladies-in-general.

Moral: For healthy prospects, use WMT.

* and one Iowa is first in: We again led the nation in farm income the first half of this year.
IN AN aggressive move to revitalize its programming structure, NBC Radio recently introduced 28 programs to its weekly schedule, fortifying the new ones with some dependable old shows dressed up in new formats. Falling in the latter category is Fibber McGee & Molly, a program whose longevity is almost that of radio itself. The emotional, impractical Fibber and his conservative, calculating wife introduced their folkway accounts of happenings in the McGee household to radio listeners in 1935 and they've been entertaining audiences with their homespun antics ever since.

Their new quarter-hour series is heard nightly Monday through Friday. The episodes are interrelated in serial format but the content of the shows, their fans will be happy to note, remain much the same. Marian and Jim Jordan in the roles of Molly and Fibber hit on a good idea 18 years ago and have had the good sense to stick with it. Their success, it would seem, lies in the simplicity of their material. It is ordinary unpretentious chatter. There are no gimmicks or contrived situations in their broadcasts. Molly and Fibber are truly “average” as the average man might define the term, not a glamorized “average” as scriptwriters often see radio and television husband-and-wife sets.

The series illustrates a point frequently missed by writers and producers in radio and tv: Simplicity in programming can really pay off.

**THE MCGEES**

* Simplicity Pays Off

A PROFESSIONAL switch which has caused a good deal of chatter in the entertainment

**ROCKY FORTUNE**

Network: NBC Radio (Transcribed)
Time: Tues., 9:30-10:00 p.m. EST
Directors: Dave Harmon and Andy Love
Writers: George Lefevre and Ernie Kenoy
Star: Frank Sinatra

The character Mr. Sinatra portrays is intended to be a 20th Century soldier of fortune type with an impressive and varied assortment of talents. On the Oct. 13 broadcast, his dexterity at oyster shucking was investigated when he got a job in a restaurant. Imagine his surprise when in line of duty, he found not one, not two but a dozen pearls in oysters he was preparing for a customer. It took a gun in his ribs later in the evening to convince him his luck wasn’t running as high as all that.

Rocky, the man behind the gun informed him, was right in the middle of a vast and powerful smuggling ring. Of course as fate and the scriptwriter would have it, after a series of complications too familiar to mystery drama fans to even bother mentioning, Rocky broke the ring single-handed.

Between acts of gallantry, a young lady entered the picture to be properly dazzled by Rocky’s display of intelligence and strength, the latter an illusion of character that would be possible only on radio for Mr. Sinatra.

Presumably, Rocky, who works when the spirit moves him, will get a new and different job for each broadcast. Out of the situation in which the job places him a tale of bravery and heroism will emerge. The idea is a pretty poor excuse for a radio program.

**BOOKS**

HOW TO USE SIGNAL & SWEEP GENERATORS, by J. Richard Johnson, John F. Rider Publisher Inc., 480 Canal St., New York 13, 144 pp. $2.10.

The author of this technical volume has compiled scores of facts concerning the manipulation of the instruments indicated in the title. He operated on the idea that much had been written about the theoretical aspects but that little had been published on the practical side. The book carries descriptions of various types and brands, and is complete with illustrations.

Bishop Sheen has transcribed full-length tape recordings from 26 weekly presentations of his DuMont TV Network program, *Life Is Worth Living*, into an equal number of chapters, with illustrations by Dik Browne. They cover such subjects as the Irish, teen-agers, relativity, atom bomb, Marxism and Communism, Christianity, democracy, love, conscience, fear and motherhood.

G-E's 12 KW AMPLIFIER COMBINES WITH ANY UHF-TV TRANSMITTER...REGARDLESS OF MAKE!

You can get

General Electric's UHF leadership puts you on the sure road to higher TV power!

- G-E UHF TRANSMITTERS. 1 KW and 12 KW units for initial high power telecasting equipment plus a 12 KW amplifier for expanding existing facilities.
- 15 KW KLYSTRON TUBES. Product of General Electric progress. Provides exactly the power you need for strong field intensity—excellent home receiver signals.
- G-E HELICAL ANTENNAS boost radiated power up to 20-25 times and contour for ideal market coverage.
- PROVED-IN-OPERATION BY MORE THAN A DOZEN MAJOR TV OUTLETS. Go down the list of important high power television broadcasters throughout the country using General Electric equipment. Measure its value to you by their success!
Today...if your present transmitter provides only minimum output, then you may not get a strong station signal into your complete market area. That automatically cuts coverage plus important advertising revenue. Few, if any, broadcasters who need high power for UHF telecasting can afford to wait much longer. Promises of future equipment development doesn’t solve their immediate problem. Only G.E. offers the right solution.  

General Electric's "look into the future" in 1949 today gives you a single answer to all UHF equipment requirements! Five years of UHF product planning and development now provide broadcasters with a 12 KW amplifier that can be combined with your present small UHF transmitter for increased field intensity—better pictures in your market receivers. General Electric alone offers this service to UHF stations already on-the-air! G.E. alone can deliver 12 KW transmitting equipment for new TV outlets today!

15 KW Klystron Tube
Designed to achieve maximum transmitter power for UHF telecasting. This amazing tube was developed for G.E. by Varian Associates and has been proved of superior value to all other types in more than a dozen major installations.

Complete Television Equipment for UHF and VHF

GENERAL ELECTRIC
solid south: 1953 style

The changing skyline of today's mid-South is a happy sight for any advertiser who wants to harness the real sales power of television.

Throughout 29 high income counties in our pivot of the Piedmont, more and more TV homes have their antennas set for Channel 2—WFMY-TV.

It's a solid array of selling potential—compounded of the most progressive families in an area with nearly $1,500,000,000 buying power.

WFMY-TV is their television station...the daily habit, welcomed, watched and believed in homes where the most buying is done. And, significantly, where real selling opportunities exist for you—when your message is solidly delivered by WFMY-TV!
For a time Paul Bunyan had trouble getting his logs to the Northwest’s mills, because the kinks in the river caused giant logjams. He solved the problem by hitching Babe the Blue Ox to the river and pulling it straight.

**PULLING POWER!**

If you’re having trouble moving your product in the vast Northwest today, WCCO Radio can take the kinks out for you. For WCCO, with its enormous power, spreads your message across a four-state, 86,700 square-mile primary area, delivering a far larger weekly audience than any other station in this area.* And the topper is that WCCO Radio’s cost per thousand circulation is by far the lowest in the entire Northwest: only 6¢ per thousand families daytime and 11¢ nighttime!

For power that pulls results from all over the four-state Northwest, ask us or CBS Radio Spot Sales to show you the whole incredible-but-true story of WCCO Radio, the Northwest’s 50,000-watt giant.

*Minneapolis-St. Paul WCCO RADIO
Represented by CBS Radio Spot Sales*
the local TV gals
Most of these TV stations have an outstanding program tailored to sell women. It's put on by a gal who really rates with the housewives...one who is a leader in her community, a really powerful saleswoman.

Her viewers believe in her...buy the products she recommends. They see her program faithfully day in and day out.

One such program plugged a floor cleaner wax. What happened? Sales jumped 35% in 10 weeks! That's not unusual. Other such women's programs are piling up sales records week after week.

The costs are low. The sales impact is great.

our respects

to WILLIAM ARNOLD PORTER

“PORTER gets things done. He knows telecommunications. It’s a good choice.”

That comment by a consulting engineer who worked with William Arnold Porter during World War II and after sums up the esteem and reputation borne among his colleagues by the assistant director of mobilization in charge of telecommunications.

Another colleague, who worked with Mr. Porter in the Electronics Materials Branch of the Navy’s Bureau of Aeronautics during World War II, added this estimate of the man who is essentially the President’s alter ego in the vital field of telecommunications: "Bill was officially the branch’s executive officer, but actually he was handed all the dirty work. What made him so valuable was his ability to take it without getting bitter, and above all in wrapping it up fairly and squarely."

Those two comments, plus the experience of two decades in radio and communication law, sums up the man President Eisenhower chose last month to fill the spot vacated early in June by Haraden Pratt, IT&T executive. Mr. Pratt was named as the first telecommunications advisor to the President early in 1951, an outgrowth of a recommendation of the President’s Communications Policy Board. When President Eisenhower reorganized the Executive Office of the President, he abolished that post, but set up a similar job in the Office of Defense Mobilization.

Under the Communications Act, the President is responsible for assigning frequencies to government agencies. As the Chief Executive, he is responsible for setting national telecommunications policies. World-wide communications (radio and cables) are vital to the well-being of the country. And, there are defense requirements which involve communications and frequencies all over the country.

Up to the appointment of Mr. Pratt, there was no focal point within Government where recommendations, differing views or policy could be hammered out. This situation was improved in 1951 with the telecommunications advisor serving as the clearing house for all of that. Actually working as the dispenser of frequencies to government agencies is the Interdepartment Radio Advisory Committee, which now reports to Mr. Porter.

Bill Porter was born in 1906 in Chicago, but six years later his family moved to Grand Junction, Colo. It was in that railroad center and farming area that young Mr. Porter grew up and graduated from high school in 1923. He played the violin in the high school orchestra, and earned spending money as the violinist in an orchestra that played at town dances.

Washington looked like a good place to continue his education (and to work to support himself through college) and he came to the Capital in 1925 and enrolled at George Washington U. A year later he transferred to National U., from which he received his law degree in 1929. He was treasurer of his senior class and a member of Sigma Nu Phi legal fraternity.

During this period, Porter worked at various jobs—as a gas station attendant, as a construction foreman, as a sporting goods clerk in a department store.

After admission to the bar, Mr. Porter approached a friend who specialized in immigration law. The friend dissuaded him from that speciality, but fired his imagination about new fields of law, like radio practice. The same friend introduced him to Denver-born Paul Segal, who recently had left the FCC to engage in private practice. Mr. Segal put Mr. Porter in touch with George O. Sutton, and in 1930 Mr. Porter was launched on his career as a practitioner before the FCC. From then until June 1942, Mr. Porter was associated with other attorneys specializing in radio law—Ben Fisher, the Littlepages—or on his own.

Six months after Pearl Harbor, Mr. Porter was in uniform as a lieutenant in the Naval Reserve, and after a spell at Harvard U. was assigned to the Bureau of Aeronautics’ Electronics Materials Branch. As a lieutenant commander he was executive officer of the branch. Then it was headed by Lloyd V. Berkner, Lt. Comdr. Porter represented the Bureau on the radar and radio committees of the Joint and Combined Communications Board. He was also a member of a joint ad hoc committee which prepared the wartime allocations plan. For three months he was acting chief of the branch.

Mustered out in 1946, Mr. Porter joined forces with Herbert M. Bingham, Linton M. Collins and H. Donald Kistler to form the law firm of Bingham, Collins, Porter & Kistler. When he was named to the Federal post, Mr. Porter took a leave of absence from that firm.

Mr. Porter was president of the Federal Communications Bar Assn. in 1951, and a member of the House of Delegates of the American Bar Assn. in 1952. He also is a member of the D.C. Bar Assn. and of the University Club.

In 1931, Mr. Porter married a childhood friend, Florence Oyster of Grand Junction. Their home is on a 10-acre estate in the fashionable Potomac Hunt area of Bethesda, Md., a suburb of Washington. Mr. Porter was president of the Bradley Blvd. Citizens’ Assn. in 1951 and a delegate to the Montgomery County Civic Federation in 1952. He is a registered Republican but has not been an active party worker.

Today, at 47, the bald, trim assistant mobilization director has little time for the tennis he used to play regularly. Reading is his major interest. He keeps in shape by caring for his lawn, his vegetable and herb gardens and his flower plots. If he has time—quite scarce these days—he likes to relax with a mystery story.
When the Nickel Plate Road (The New York, Chicago and St. Louis Railroad Company) decided to promote a weekend excursion trip from Chicagoland to Niagara Falls through radio advertising, Station WMAQ was chosen to do the job — ALONE.

A schedule of only 15 announcements resulted in a complete sellout of 950 excursion trips—or a 3000 PER CENT return on the advertising investment. As the Nickel Plate wrote:

"This response is certainly a fine testimonial to the effectiveness of your handling of the announcements. It is my understanding . . . that your announcers were specially instructed to get results, and there is no question that they did."

HERE IS PROOF OF SELLING POWER!

Needless to say, the Nickel Plate soon was back with another WMAQ schedule. This advertiser, like so many others, has learned there is NO SUBSTITUTE for the Quality Audience and Quality Selling of

the QUALITY STATION in Chicago Radio...

Quality Programming
Quality Facilities
Quality Audience

WMAQ
CHICAGO
on all accounts

EARLY in life George G. Anthony, media director of West-Marquis Inc., Los Angeles, made up his mind he wanted to get into advertising and he has kept to that goal with a singleness of purpose.

Born in Ponca City, Okla., Mr. Anthony worked his way through the U. of Oklahoma selling space for the college paper. He received his A.B. in journalism, with an advertising major, at the age of 19. This was in 1943 and his graduation was followed by a diversified army career, ranging from tank driving to command of the Kobe, Japan, military police vice squad.

Separated from the service in 1946, George Anthony lost little time in returning to the field as display advertising salesman for the Oklahoma City Paper. In 1947, he moved to California, where he believes advertising's greatest opportunities exist, and joined the Los Angeles Examiner display advertising staff. Six months later he came to West-Marquis as media director, a change for George Anthony. Hereofore, he had been exclusively a salesman; now his duties involved buying advertising.

Meanwhile, Toni Anthony had become media director for competing Davis & Co. (now merged with Hixon & Jorgensen Inc., Los Angeles) and advertising was a major conversational topic in the Anthony home. "But we were discreet in our discussions," Mr. Anthony states. "There was no collusion against station representatives at home."

Mrs. Anthony retired early this year and young Michael Kevin, who arrived Sept. 13, is now the center of attraction in the household.

"Radio time salesmen have a tendency to underestimate their medium," George Anthony says, speaking as one who knows both sides of the fence. "They usually undersell the out-of-home audience. Southern California has a huge automobile audience which offers a bonus to advertisers. It's well worth mentioning in a sales talk."

Color tv will help sales greatly, the young media director feels. "For instance, the impact of the flying horse trademark of General Petroleum, one of our clients, will be much greater when the public sees it in color."

"Tv advertising represents 'new money' in many instances, in additional budgeting for tv, not money taken from other media," he points out. "This is a healthy situation which should benefit all advertising."
you start at 478,490 when you start with WTRF-TV. Many of these sets, developed by a VHF station 52 air miles away, are essentially fringe sets to them.

But they're A and B coverage sets to us.

To you they're sales—a VHF market of 3 million buyers in (22) counties in West Virginia, Ohio and Pennsylvania.

Ask HOLLINGBERY for availabilities today.
Another Reason Why WPTF is North Carolina's Number One Salesman

Music Maker . . . Kingham Scott!

North Carolina rates more firsts in recognized market surveys than any other Southern state. More North Carolinians listen to WPTF than to any other station.

Here's a showman, loved and listened to by three generations of North Carolinians. When Kingham Scott plays WPTF's theatre pipe organ, feet go tapping and cash registers go ringing. His quarter hour program rates a pulse of 10.9. For a ready made audience and a proven local personality who sells, contact Free & Peters or WPTF. Kingham Scott is the music maker on the team that makes WPTF North Carolina's Number One Salesman in the South's Number One State.

NTSC, INDUSTRY PUT COLOR THROUGH ITS PAGES FOR FCC

Waldorf demonstration, the last major hurdle before approval—or disapproval—of the color TV standards, went off without a hitch.

No one will say whether or not it passed the test—but Chairman Hyde hints a decision by Christmas is likely.

NATIONAL Television System Committee and the individual companies which cooperated by transmitting color program material and color sets on which to receive it covered themselves with glory—and in full color—Thursday when they gave the FCC and the House Committee on Interstate & Foreign Commerce a full-scale demonstration of the system, of compatible color television proposed by NTSC.

Individual FCC members were noncommittal following the demonstration, for which all seven commissioners journeyed to New York. Chairman Rosel Hyde, however, when cornered by newsmen, admitted that the NTSC had now fulfilled all the legal requirements of a petitioner before the FCC and that the matter of approval—or disapproval—of the NTSC compatible color standards was now up to the Commission. He declined to say when a decision might be forthcoming, but when asked if one might be expected by Christmas, he termed that date as a reasonable guess.

Studio programs and out-of-door pickups, programs received off-the-air and by closed-circuit, directly from the studio and after a round trip from New York to Washington and back; via both microwave relay and coaxial cable, live programs telecast by vhf transmitters and slides broadcast on uhf—all came into the Starlight Roof of New York’s Waldorf-Astoria hotel with all the clarity and vividness of life itself.

Color sets, chiefly experimental models, were supplied by 13 manufacturers to enable the delegations from the Commission and Congress, as well as the press and a full complement of top executives from the TV manufacturing and broadcasting companies, to witness the demonstration, final step in the process of presenting to the FCC the NTSC petition for commercial authorization of compatible color.

Sets Vary
Color intensity varied appreciably from one color receiver to another; some emphasized reds, others yellows; some were brilliant, others subdued; all provided color pictures that, to this viewer at least, were of sufficient quality to be acceptable for home use whenever they become available. One broadcast engineer explained the variations as due to the kind of color thought preferable by the receiver manufacturers, the sets being designed to provide color values they believe will be most acceptable to the public. Another engineer pointed out that differences in viewing tubes and in receiver circuitry will produce differences in color quality.

The demonstration opened with a 20-minute studio presentation provided by NBC, which was designed to meet the FCC’s request for “motion indoors with close-ups, medium length shots and normal and rapid movements.” Program included a song-and-dance number, a trained love-bird act, a song by Nanette Fabray, a Kukla, Fran and Ollie sequence in which a number of packaged products were shown, and a closing dance routine in which varicolored skirts and petticoats worn by the dancers were pictured in rapid motion and under various conditions of highlight, soft light and shadow.

Parts of this program were then repeated by closed-circuit transmitted directly from the Colonial Theatre to the Waldorf by local telephone company facilities, sent over the AT&T coaxial cable to Washington and back, and sent to Washington and back by the AT&T microwave relay—the three routes being used in sequence and with changes from one to another at 30-second intervals. Except for brief breaks when the change occurred, the picture quality appeared as good as during the original broadcast. The trip to Washington and back had no noticeable effect on the images on the receiver screens, nor did the coaxial cable transmission—which required a signal modification to reduce the color subcarrier frequency from 3.6 mc to 2.4 mc for its trip through the cable and its recomversion at the receiving end—suffer in comparison with either the direct or the microwave transmission, which required no such conversion. AT&T reported that a new Bell Labs convertor made its debut for this demonstration.

Third Test
The third test, showing “motion outdoors and typical outdoors scenes” in accordance with the FCC request, was provided by CBS. This sequence opened with a panoramic view of the New York skyline as viewed by a color camera atop the CBS Bldg., then shifted to the garden of the Museum of Modern Art where a dance routine of girls in brightly
colored costumes was followed by close-ups of fruit, flowers and food.

Primed by the unfavorable reports of the showing of CBS color the week before, this observer watched closely for flaws but found scarcely any. Overall, the colors seemed less brilliant than NBC's indoor pickup provided, but whether this was caused by CBS equipment or by the midday sunlight it is impossible to say. Occasionally the colors seemed to deepen, then to pale out again, but not to the extent of becoming annoying to the viewer—this viewer, anyway. One CBS executive was overheard muttering to himself: "This is the demonstration we should have made last week."

DuMont Shows Slides

The final sequence of the demonstration was a uhf broadcast of color from the DuMont experimental uhf transmitter, utilizing as subject matter some two dozen test color slides prepared by Eastman Kodak Co. to cover the full range of color saturation and including close-ups, medium and long-range shots, televised on flying spot slide scanners at the DuMont station. At the conclusion of this telecast the slides were broadcast and received first in monochrome, then in color. Quality was excellent throughout.

Introducing the demonstration, which began at noon and continued until 2 p.m., Dr. W. R. G. Baker, vice president, General Electric Co., and NTSC chairman, pointed out that NTSC is "a voluntary association of engineers and scientists, representative of the entire electronics industry, which undertook to develop technical signal specifications for compatible color television broadcasting to the point where they could be proposed to the Commission for adoption as technical transmission standards."

"NTSC," Dr. Baker stated, "does not design apparatus; it does not produce apparatus; it does not approve or withhold approval of apparatus. That is the concern of individual companies in the industry."

"However," he said, "NTSC could not succeed unless it obtained assurance that the signal which it developed could be demonstrated through apparatus on something more than a laboratory basis. We believe that this has been accomplished through the medium of the extensive field test program of NTSC, conducted over a period of the past 20 months."

Pointing out that the detailed record of these field tests was included in the NTSC report filed with the Commission Sept. 8 in support of its color standards proposals, Dr. Baker urged that the Commission base its decision on the full NTSC report, rather than on the demonstration they were about to see.

"This standard proposal is the culmination of over a million engineering man-hours," he declared, "and it cannot adequately be evaluated on the basis of a single 70-minute showing."

Dr. Baker emphasized that the studio and transmitting equipment and the receivers utilized in the demonstration represented "individual designs of individual companies. There has been no pooling of apparatus know-how—instead there has been only the strongest possible incentive for the development of competitive individual apparatus designs, and that incentive will continue and reach new heights should the Commission proceed to the adoption of these proposed standards."

David B. Smith, Philco vice president and NTSC vice chairman, was chairman of the demonstrations committee and as such introduced the demonstration several times. Like Dr. Baker, he pointed out that the demonstration was made possible through the "voluntary cooperation of the several broadcasters and several receiver manufacturers" who supplied the programs and the receivers, which included several standard monochrome sets as well as the experimental color models. All sets were fed RF signals by a distribution amplifier provided by RCA, he said, with three antennas on the hotel roof picking up the broadcast signals and passing them along to the distribution amplifier.

All Show Receivers

Each company contributing a color receiver for the demonstration also provided operators for its own set, Mr. Smith reported. These companies were: Admiral Corp., CBS-Columbia Inc., Creden Div. of Avco Mfg. Corp., Emerson Radio & Phonograph Corp., General Electric Co., Halliburton Co., Hazeltine Electronics Corp., Motorola, Philco Corp., RCA, Sylvania Electric Products, Westinghouse Electric Corp., and Zenith Corp.

All sets were closely watched and their pictures compared as the crowd of several hundred spectators at the demonstration walked from one end of the room to the other past the line of color sets along one wall. The CBS-Columbia Inc. receiver came in for special attention, particularly during the CBS part of the program, both from those who had witnessed the previous week's showing of the CBS color system and from those who had only heard about it. The consensus seemed to be that this time CBS came out well on both counts.

The members of the House Committee on Interstate & Foreign Commerce who attended the color showing, like the FCC commissioners, were not willing to make any public statement of their reaction to what they saw, but their attitude indicated that they had been both interested and pleased by this latest development.
AUTO INDUSTRY ACTIVE IN TELEVISION; P&G, GF OPTIONS DUE TO EXPIRE

New York Chrysler dealers buy 'Stork Club' locally; General Tire and Chrysler Motor Co. among accounts placing new and renewal business.

**AUTOMOTIVE** interests bought local and network television last week, with New York dealers of Chrysler Division of Chrysler Motor Co., leading way by sponsoring The Stork Club on WNBT (TV) New York Wed., 7-7:30 p.m., starting Oct. 28.

Other tv negotiations during the week included one renewal, a regional sponsorship signing and a substantial purchase of network participations.

The advertisers involved were General Tire & Rubber Co., Federds-Quigan Corp, and Chrysler Motor Co, in addition to the New York Chrysler dealers.

Moreover, Procter & Gamble and General Foods were facing within a week the expiration date of their option on two separate daytime dramatic strips on CBS-TV. The total tv commitment if the option is picked up would mean approximately $2 1/2 million. Executives at agency and company are meeting this week to consider the budget and the option.

The Chrysler development was this: Chrysler dealers in New York signified their interest in placing the Stork Club on WNBT (TV). The program has been on CBS-TV sustaining for the past season and before that was sponsored by Fatima cigarettes.

Meanwhile, the parent company, Chrysler Motor Co., through BBDO, New York, renewed for another 13 weeks its sponsorship of Chrysler Medallion Theatre on CBS-TV.

Fedders-Quigan Corp., manufacturers of air conditioning equipment, purchased 110 segments of NBC-TV's Today (Mon.-Fri., 7-9 a.m.) in one of the largest purchases the show has had. Contract, placed through BBDO, New York, starts Dec. 1 and runs through August 1954.

It is believed that Fedders-Quigan is the first air conditioning firm to buy major network time in tv, and also the first in its field to conduct a large scale out-of-season advertising campaign, as it will be doing the winter months.

General Tire & Rubber Co. will launch a weekly quarter-hour tv show regionally on Nov. 16 in more than 30 markets. D'Arcy Advertising's Cleveland office is placing the business.

Maier Sets $500,000 On Los Angeles Campaign

MAIER BREWING CO., Los Angeles (Brew 102), in a time purchase estimated at $500,000, has begun an intensive tv campaign of six hours filmed programming weekly on the seven Los Angeles stations.

The half-hour film series are Douglas Fairbanks Presents and Dangerous Assignment, KNBH (TV), both for 52 weeks; Orient Express and Affairs of China Smith, KECA-TV, both for 13 weeks; 102 Drama Showcase, KLAC-TV, 52 weeks; Premium Playhouse, KTLA (TV), 26 weeks; Heart of the City and Captured, KTIV (TV), both 26 weeks, and Star-Time Theater, KNXT (TV), 26 weeks.

A series of 90-minute feature films, 102 Theatre, will be run on KJH-TV for 26 weeks. Agency is Enterprise Advertising Agency Inc., Los Angeles.

Butterflies & Color

TWO of the topmost rivals in radio-television, RCA-NBC's Brig, Gen. David Sarnoff and CBS' William S. Paley, got together with utmost cordiality during NTSC's color tv demonstration for the FCC. And what did the board chairman of CBS say to the board chairman of RCA-NBC?

"Mr. Paley, maneuvering so that the general could get a better view of the performance of the newly unveiled CBS color set. The board chairman of RCA-NBC agreed with a smile, after which Dr. Peter Goldmark, leader in CBS color developments through the years-long color battle between CBS and RCA, interjected that possibly the better description would be that it's been a period of butterflies' weeks."

Gen. Sarnoff, incidentally, watched the CBS set intently and at some length before walking on to get another look at the pictures on other receivers. After that was over he was heard to tell an acquaintance who wanted his reaction to the day's proceedings: "It's a great success — and it's nice to have it over with."

Wolverton Urges Prompt Approval for Color Tv

"ONLY requirement at this time [on compatible color television] is the prompt approval of these new standards by the FCC," Chairman Charles A. Wolforton (R-N. J.) of the House Interstate & Foreign Commerce Committee, said last Thursday. Rep. Wolverton attended the networks' demonstration of NTSC standards last week (see story, page 27).

Rep. Wolverton, who consistently has urged approval of the NTSC color standards, last April predicted compatible color off the manufacturing line by Christmas (BT), April 6.

The Congressman asserted, "There may be a tendency in some Commission quarters to delay approval of the new system until all members of the television manufacturing industry are lined up approximately in the same competitive position with regard to color television. The Communications Act gives no such mandate to the Commission and it would be singularly unfortunate if it did because then the private interests of members of that industry would become paramount to the public interest."

He said that unless last week's demonstration "discloses serious flaws in the system," he believed the public interest would be best served by prompt adoption of the new standards. The demonstration, he said, "should be the last way-station on the road to adoption of new color television standards."

BROADCASTING • TELECASTING

**FIRST** to place business with NBC Radio's Thrice Plan is Lewis Howe Co., St. Louis, for its Tums. Sponsor will get participations on three different programs: Fibber McGee & Molly, It Pays To Be Married, and Second Chance. Negotiating the participations are (l to r): seated, Oscar A. Zahner, vice president, Ruthrauff & Ryan, St. Louis; Nelson H. Howe, Howe Co, vice president-general manager; O. C. Utley, Howe sales vice president; Mr. T. Dooley, Howe secretary; standing, M. M. Angenmeyer, Howe comptroller; George Diefendorf, account executive, NBC Chicago, and W. P. Littell, Ruthrauff & Ryan Chicago vice president.

October 19, 1953 • Page 29
Liability Issue Discussed
At Agency League Meet

Attorney tells agency men that liability for purchases in behalf of a client depends largely on the nature of the individual contract.

THE QUESTION of the liability of an agency for the time and space purchased on behalf of a client rests, in large part, on the nature of the contract between the agency and the media, according to Morton J. Simon, counsel to the League of Advertising Agencies and a specialist on advertising law.

In a talk before the League in New York on Oct. 8, Mr. Simon took up the question of agency liability, referring at length to the recent suit brought by WGN Washington against Cohen & Miller Adv., Washington, resulting from the financial difficulties of the client, Phillips Tv and Appliance Inc. Mr. Simon stated that the agency's defense has been that it did not have time or space for its own advertising but purchased it as an agent of Phillips and that the station knew of this relationship at the time the advertising was placed.

"Assuming that the time contract did not provide that the agency was to be liable for the cost of the radio time," Mr. Simon said, "we probably have a case similar to the 1913 New York case of Clarke v. Watt, in which the court held that an advertising agency, as an agent of the advertiser, is not liable to the publication but that the advertiser himself was so liable."

Cites Other Cases

Mr. Simon cited several other cases in which the courts have contended that the advertising agency is not liable for media charges provided there is no promise by the agency to substitute its liability for that of the advertiser or to supplement the advertiser's liability.

As examples of orders that contain specific provisions under which the agency undertakes responsibility for the charges, Mr. Simon referred to agreements negotiated with some of the television networks, and added:

"We are concerned here with the contract which provides for the 'sole liability' of the advertising agency as it may be set forth in the so-called Standard Order Blank. There is no question but that the agency, if it sees fit to sign such an agreement, is liable to the medium. This is a matter of affirmative and positive legal understanding. Once again, the rule applicable to the situation is merely an extension of the general rule of the law of the agency. If an agency undertakes to substitute its own liability for that of the principal, the agency is liable. This does not make the agent any the less the legal agent of its principal. It is merely undertaking an additional liability as a matter of contract."

New Youngstown Agency

THE opening of Simon, William, & Robert's Advertising Agency, Youngstown, Ohio, was announced last week by Robert E. Thompson, executive vice president. The new agency has signed Marjorie Mariner Kitchen Korners show on WFMJ-TV Youngstown, for its client, Century Foods, and is handling radio and television shows for the democratic candidate for city mayor, Frank X. Kryzan. Address is 226 S. Phelps St.

SPOTS commentary show on KMOX St. Louis is contracted by The Texas Co., which will sponsor Robert L. Burns (second from r.), St. Louis Globe-Democrat sports columnist, in a five times-weekly program. The principals here are (l to r) Don W. Stewart, Texas Co. advertising manager; L. F. Raymond, assistant manager of the Texas Co.'s central territory sales department; Mr. Burns, and Robert Hyland Jr., KMOX general sales manager.

Subsidies Advocated
For Early Color Clients

ADVERTISERS should get a "free ride" from the networks in the early stages of color tv transmission because of the limited audience, William J. Halligan Sr., president of Halcrafters Co., Chicago, declared last Monday. Addressing the Advertising Men's Post of the American Legion in Chicago, Mr. Halligan predicted "only a very few complete shows in color at first because of the great expense involved." He felt that at the outset "it would be best for just the commercials to be in color," and called for partial "subsidies" for advertisers.

Mr. Halligan noted the cost of installing color television station transmitting equipment but felt the transition from black and white to color would not be as long as some people think. He said a small quantity of sets would be on the market this spring and that the growth from a "small trickle to a "mighty stream" would depend entirely on tube production.

NEW BUSINESS

Mishawaka Rubber & Woolen Mfg Co. (all weather boots) through Fletcher D. Richards, N. Y., planning television spot announcement test campaign, starting Nov. 2 in Detroit and Indianapolis. Twenty announcements are to be used on each station, spread over varying periods. If successful, expansion is expected.

Sego Milk Products Co., Salt Lake City, will sponsor Mary Lee Taylor program, Tues., Thurs., 10:15-10:30 a.m., on Great Western Radio Network (10 NBC stations in Utah, Idaho and Montana), effective tomorrow (Tues.). This is first program sale for network, which was formed a month ago.

Club Aluminum Products Co. renews Club Time on ABC, Saturday, 5:30-45 p. m. CST, for 52 weeks, effective Oct. 31. Agency: Buchan Co., Chicago.

AGENCY SHORTS

Western Adv. Agency Inc., L. A., has taken over packaging and national distribution of The American Religious Town Hall Meeting, weekly half-hour panel program currently seen on WMVN-TV St. Paul (Minn.). Inter-denominational panel, consisting of six or seven members of clergy, discusses a variety of subjects, led by moderator and former packager Bishop Leiske. Agency will offer program for live network presentation or possibly on syndicated film basis.

Wayne Welch Inc., Denver adv. and public relations firm, announces it will move to new office building at 800 West 9th Ave. about Nov. 1.

AGENCY APPOINTMENTS

Charles Antell Inc., Baltimore, names Kastor, Farrell Chesley & Clifford, N. Y., as its advertising agency to handle 1954 appropriation of $2,000,000 for Formula 9, shampoo and soap products.

General Electric Co., Syracuse, N. Y., names Barlow Adv. Agency Inc., that city, to handle community relations advertising campaign. Radio and tv will be used, B. J. Stapleton, Barlow radio-tv director and account executive, will head contact group.

Southwest Food Products Co., L. A. (onnie Brae preserves and jellies and Dude Ranch pancake syrup), appoints Glenn Adv., that city. G. Del Winkler is account executive.

Red Snapper Clam Chowder, Burbank, appoints Factor-Breyer Inc., L. A.

Barbizon School of Modeling, N. Y., names Blaine-Thompson Co., N. Y., to direct intensive radio, television and publicity campaign for coming year.

Consolidated Tea Co. (Swee-Touch-Nee tea and coffee) names A. B. Landau Inc., N. Y., to handle its advertising. Media plans as yet undetermined.

National Vulcanized Fibre Co., Wilmington (maker of vulcanized fibre and laminated plastics) names Harris D. McKinney, Phila., to handle advertising, effective Jan. 1.

Mega Macaroul Co., Harrisburg, Pa., appoints Weightman Inc., Phila., for promotion of Pennsylvanian-Dutch Brand Bott Boi and egg noodles. Tv is planned.
HYDE, CLARK NAMED IN G-K EXPANSION

Jack Gross and Phil Krasne name Donald Hyde, executive vice president, and Vernon Clark, vice president-general manager of Gross-Krasne in plans for growth.

IN line with continuing expansion plans started when they acquired sole ownership of United Television Programs Inc. (B&T, Oct. 5), Jack Gross and Phil Krasne have announced the appointment of Donald Hyde as executive vice president of Gross-Krasne Inc., taking an active part in overall policy planning. Recently affiliated with Paul Small Artists Ltd., Mr. Hyde formerly served as vice president of U. S. Pictures Corp., after a 14-year association with William Morris as a talent agent.

Vernon Clark, formerly Gross-Krasne studio manager, has been named vice president and general manager of the firm and its California Studios. He also takes over the newly established division for the sale and production of filmed commercials. Active for some time in filming commercials for Lever Bros. (Surf and Lifebuoy), Maier Brewing Co. and other accounts, the firm expects to launch a drive for additional accounts.

Martin Scott, Gross-Krasne comptroller, now will serve as treasurer of all the firm's enterprises, including production activities, operation of California Studios and UTP. Ben Frye is expected to withdraw Telescriptions and other films from the UTP list, but hasn't done so yet.

Through Gross-Krasne, Eugene Solow, head of Solar Productions Inc., has contracted to produce three half-hour films based on John Steinbeck's "Pastures of Heaven," for inclusion on CBS-TV Omnibus. After showings on the Ford Foundation's TV Workshop, the films will be available for world-wide distribution through UTP.

Harry Horner, motion picture director and 1949 Academy Award winner for black and white art direction on "The Heiress," will direct the Steinbeck scripts, which go before the cam-

er
eras Thursday. The first film is "Nobody's Fool," starring Thomas Mitchell with Mr. Steinbeck narrating.

Meetings currently are underway in Hollywood to determine whether CBS-TV Lux Video Theatre will continue on a live basis or go film. Gross-Krasne filmed three half-hour programs to open the fall season with a fourth in reserve for emergency. Lever Bros. executives will start meetings Oct. 27 to make the live or film decision. The show goes to one hour in January.

Jaffe Named to Head MPTV's Eastern Sales

APPOINTMENT of Herb Jaffe, senior account executive of Motion Pictures of America, as eastern sales manager of Motion Pictures for Television Inc. was announced last week by Edward D. Madden, MPTV vice president.

Mr. Jaffe will handle East Coast sales under MPTV's $30 million project embracing the production of "name" tv shows and their sale to national, regional and local advertisers for sponsorship on local tv stations rather than on national networks. First program, Dairy's Tavern with Ed Gardner, currently is in production by Hal Roach Jr. MPTV said it is expected to cost nearly $5 million and will consist of 117 half-hour shows. Six other "name" shows are planned.

Mr. Jaffe worked in live television as assistant to the head of MCA's tv department and also organized the company's film syndication division. Before joining MCA he worked in the motion picture, amusement, and public relations fields.

'Inner Sanctum' Film Series Announced by NBC

AVAILABILITY of Inner Sanctum, a new series of 39 half-hour tv dramas on film, for syndication by local stations and local and regional sponsors, was announced last week by John B. Cron, national sales manager of the NBC Film Division.

Mr. Cron pointed out that the series, which is being filmed in New York by Galahad Productions, raises to 14 the number of properties the NBC Film Division currently has available for syndication. He said that 13 dramas already have been filmed, and noted that a different cast will be presented in each episode, with performers to include Ernest Truex, Everett Sloane, Constance Ford, Ian Keith and Paul Stewart.

The series is being produced by Hal Brown, originator of Inner Sanctum on radio. The production staff includes Allan Neuman, director; Mende Brown, associate producer, and Richard Sybert, set designer. The production will be supervised by Stanton M. Osgood, manager of production for the NBC Film Division, and coordinated by George Wallach.

From 1941-52, Inner Sanctum was presented on radio and was said to have been renewed a total of 46 times by such national advertisers as Colgate-Palmolive-Peet, Carter Products, Thomas J. Lipton, Emerson Drug and Mars Candy.

Foley Sets Race Films

SERIES of 26 quarter-hour films titled The Thoroughbred, with production budget of $300,000, will be put into production this month by George F. Foley Inc., New York, in cooperation with the Thoroughbred Racing Assn. (a group of major race tracks in the nation). The films will be released after Jan. 1.
**UHF OPERATORS ESTABLISH OWN TRADE ASSOCIATION**

Group to further the cause of ultra high frequency operation and to avoid pitfalls that beset fm. Formed Oct. 14, the new association met for the second time last Friday.

THE "little" guys have banded together and they hope to spraw their way to the level of the "big" boys.

That is the meaning of the formation of the Ultra High Frequency Assn., announced last week.

Comprising uhf station operators and grantees, UHFA hopes to protect and enhance uhf television. Need for protection and the realization that unless they combined in numbers they would never match the present superior position of vhf operators and permit-holders brought about an initial Washington meeting two weeks ago (Closed Circuit, Oct. 12).

A second meeting took place in Chicago Friday.

Underlying concern among uhf broadcasters—openly admitted by those who have pledged themselves to the new association—is that uhf may turn out to be "another fm."

In another vein, one spokesman put it this way: "Unless we sell networks, advertisers, agencies and the worth of uhf, we'll all be just a bunch of 250-watters."

The non-profit association was incorporated in the District of Columbia Oct. 14. General counsel is William A. Roberts, senior partner of the Washington law firm of Roberts & McInnis. Mr. Roberts has long represented Allen D. DuMont Labs. in Washington. He was also counsel for the Television Broadcasters Assn., before it merged with NARTB.

Acting executive secretary is Melvin A. Goldberg, former DuMont Television Network official and present deputy director of the Office of Research and Evaluation, U.S. Information Agency, on a consulting basis.

Public relations chief is Washington newspaperman J. Bernard McDonnell.

Attending Meeting

Representatives of eight uhf stations participated in the first meeting. They were: Paul Peltson, WTVI (TV) Belleville, Ill. (St. Louis); Marshall H. Pengra, KSTM-TV St. Louis; Harold Cowgill, WTBP (TV) Decatur, Ill.; Ted Nelson, WFEF (TV) Evansville Ind.; U. R. Norman, WTVH-TV Peoria, Ill.; Lou Poler, WCAN-TV Milwaukee; Brownie Ackers, WEEK-TV Peoria, Ill.; Jack Garrison, KACY (TV) Festus, Mo. (St. Louis).

First move, it is understood, will be to lend assistance to uhf operators and grantees in Milwaukee where an additional vhf channel has been proposed.

In Milwaukee, the Commission has proposed to allocate vhf ch. 6 to Whitefish Bay, six miles from that city.

A counter-proposal to delete unassigned vhf chs. 4 and 11 from St. Louis was filed last week by KSTM-TV (see separate story on page 54).

Other trouble spots, according to a UHFA source, are New Orleans, Duluth, Watertown, N.Y., and Sacramento, Calif.

"Assumption is," the same UHFA source explained, "that our people knew what they were up against when they applied for uhf grants in mixed (vhs-uhf) cities. We're not going to sit by and see the Commission derogate the allocations table by adding more vhf channels—which will make it tougher for us all along the line."

A second UHFA objective, it was stated, is to put pressure on manufacturers to hurry commercial production of uhf transmitting and low-priced converters and receivers.

Uhf stations are permitted a maximum of 1,000 kw from 2,000-ft. antennas. Thus far only 12 kw transmitters have been put into commercial production. These give about 200-250 kw effective radiated power with high gain antennas.

The cost of uhf converters and receivers capable of receiving uhf, plus the more critical receiving antenna installation, ranging from $52 to $75, is considered another barrier to the quick acceptance of uhf, it was said.

UHFA spokesmen were quick to point out that it had no connection with the group of uhf grantees who are pushing for the acceptance of subscription-tv (Broadcast, Aug. 30, et seq.).

Statement of objectives, contained in the UHFA announcement, was as follows:

The immediate problems include the need for restoration of the principles announced by the Federal Communications Commission at the time it created ultra high frequency broadcasting by the adoption of two allocation and processing plans.

Changes in priority of consideration of applications, the over-simplification of processing of vhf applications, and in the development of rules-making procedures to modify and weaken the allocation pattern are the problems. Good engineering practice, require firm and well-equipped representations.

The Association will have the necessary staff to accomplish its purposes of research, investigation and the transmission of information concerning the status of equipment, facilities and practices in ultra high frequency television.

The announcement said that the organization planned "immediate" entry into several proceedings now pending before the FCC. It also plans a promotion campaign on the "superiority" of uhf and the "fair playability" of all-wave equipment for advertisers, agencies and the public. The organization will "examine and act" with respect to network and intercity cable allocations as they affect uhf stations, the statement concluded.

**Upper Midwest Sales Meet Set for Minneapolis Nov. 5**

"REBIRTH of a Salesman" is the slogan of the Seventh Annual Upper Midwest Sales Conference to be held Nov. 5 at the Hotel Radisson, Minneapolis, according to Douglas R. Manuel, general chairman of the event.

Themed as an "Old Fashioned Revival," the all-day conference beginning at 8 a.m. is expected to draw about 800 sales and merchandising executives. The conference is sponsored by the Minneapolis Chamber of Commerce and the Minneapolis Sales Executives in cooperation with other sales and educational groups.

**BROADCASTING • TELECASTING**

---

**Film Sales**

Guild Films Co., New York, announced last week that it has signed the 110th station for its half-hour Liberace tv filmed program and claimed that the pianist is now carried on more stations weekly than any individual entertainer in television. Long musical stations to sign up for the show, according to Guild, are WTVI-TV Decatur, WBUF-TV Buffalo, XELD-TV Brownsville, WFMJ-TV Youngstown, KC7B-TV Minot, KDRO-TV Sedalia, WTVB-TV Elmhurst, KRTV (TV) Little Rock, WEAU-TV Eau Claire, and KGTV (TV) Des Moines.

**Production**

SIGNING of Peter Godfrey as director of the first eight Janet Dean, R.K. tv films was announced last week by Ella Raines, president of Cornwall Productions. The firm, which was organized several weeks ago [8*T, Oct. 12], will start production on the series, starring Miss Raines, on Nov. 1.

Princeton Film Center Inc., Princeton, N. J., announces that the Conservative film rehearse will be seen on tv in a Christmas feature film "Christmas Carol Vignettes," a special half-hour holiday program being released this month for sponsored tv programming. Produced by Sherman Price with Herbert B. Friedman, the film provides 266 minutes of carols and three minutes for opening and closing sponsor credits or other local announcements against a background of Christmas music.

American Cities Productions Inc., Hollywood, has been formed by writer Jack Townley and director John Yardbrough. In December, the firm will start filming two half-hours in Police-woman series, with San Francisco story background, shooting both in S. F. and Hollywood.

George F. Foley Inc., N. Y., tv film production firm, has signed to produce 13-five minute films on the Coast Guard Academy for the U. S. Coast Guard.

Family Theatre, Hollywood, has secured rights to the Spanish-produced feature film, "Dawn of America," based on Christopher Columbus, for Thanksgiving Day release to tv stations at no charge. Film is being cut to 60 minutes with English dubbed in.

Screen Gems Inc., Hollywood, is completing filming on "The Fugitives" for NBC-TV Ford Theatre. Co-stars Barry Sullivan and Anita Louise are each making a second appearance on the series. Phil Karlson directed his first film for the firm.

**Distribution**

FIVE NARTB DISTRICTS YET TO MEET; NATION-WIDE SLATE CLOSES NOV. 5

Districts 5, 4 and 3 convene this week, with the last sessions (Districts 2 and 1) to conclude the gatherings next week.

THIS week's NARTB district meetings in Atlanta, Asheville, N.C., and Philadelphia will leave only two more districts to iron out their broadcasting problems and end this year's district gatherings series.

Scheduled for Monday-Tuesday in Dist. 5 (Ga., Ala., Fla., P.R.) at Atlanta's Henry Grady Hotel; for Wednesday-Thursday, Dist. 4 (N. C., S. C., Va., D. C., and Montgomery and Prince-Georges Counties, Maryland) at Grove Park Inn, Asheville, and for Friday-Saturday, Dist. 3 (Pa., Del., Md., W. Va.) at Philadelphia's Bellevue-Stratford Hotel.

After This Week

The remaining meetings after this week are Dist. 2 (N. Y., N. J.) on Oct. 29-30 at the Ten Eyck Hotel, Albany, and Dist. 1 (New England) on Nov. 4-5 at Boston's Somerset Hotel.

Last week's meetings were those of Dist. 12 (Kan., Okla.) at Lake Murray Lodge, near Ardmore, Okla., on Monday-Tuesday; Dist. 13 (Tex.) at the Adolphus Hotel, Dallas, on Wednesday-Thursday; Dist. 6 (Miss., La., Ark., Tenn.) at the Buena Vista Hotel, Biloxi, Miss., on Friday-Saturday.

The Dist. 12 broadcasters heard opening remarks by Jack Todd, KAKE Wichita, district director; an annual report by NARTB President Harold E. Fellows, and talks by Ralph Hardy, NARTB government relations director; Dick Doherty, NARTB employee-employer relations director, and O. L. (Ted) Taylor, of O. L. Taylor Co., New York.

A round table discussion included methods of compensating salesmen, sales practices, double billing, accounting practices, collections, staff and station needs, lotteries, news and public relations.

Participating in the round table talks were L. A. Blust Jr., KTUL Tulsa; Cy Casper, WBBZ Ponca City; Bill Hoover, KADA Ada; John Riesen, KYSO Ardmore; Frank Lane, KRMG Tulsa, and Matt Bonebrake, KOCY Oklahoma City.

Harold Anderson, KOLN-TV Lincoln, Neb., presided at the tv management clinic, and presented the story of his operation. Messrs. Blust, Casper, Hoover, Riesen, and Bob Schmidt, KAYS Hays, Kan., served as a resolutions committee.

Dist. 12 passed resolutions expressing confidence in and calling for a vigorous NARTB, praising President Fellows, thanking Mr. Todd for his two terms as district director and Mr. Riesen for arranging the district meeting and calling on NARTB to resist discrimination against radio in sports news, asking that the matter be kept in a top priority position among NARTB activities.

One resolution asked district broadcasters to call upon all segments of the industry to reaffirm support of radio and urge all to do or say nothing deprecating radio, its value, its program service and its high valuation by the people as a primary source of news, education and entertainment.

Also passed was a resolution calling for a study to determine whether radio and tv matters should be separated on district meeting agendas. Tabled was a resolution asking that consideration be given to holding district meetings and NARTB national conventions during alternating years.

Taylor At Dallas

At the Dist. 13 meeting in Dallas 83 broadcasters heard a Wednesday luncheon talk by Mr. Taylor, who also spoke at the Dist. 12 meeting at Ardmore. In his address, "Selling Radio," he advised:

"Keep to the ratings and sell success stories; sell the sales powers of radio." Mr. Taylor urged broadcasters to learn how to sell competitively against other media. "Teach your salesmen the use of shoe leather," he said.

Broadcasters, said Mr. Taylor, should (1) sell radio to themselves and to their staffs, (2) sell radio to the listener and (3) sell it to the advertiser. "Merchandise your audience story so that the advertiser knows your potential—your plus selling factors," he said.

Harold Anderson, who also spoke at the Dist. 12 meeting, in a talk Thursday to the Dallas tv management clinic, gave his audience

---

AAAA SCHEDULES EASTERN MEET

THE 1953 eastern annual conference of the American Advertising Agencies will be held Nov. 23-24 at the Hotel Roosevelt in New York, with major addresses by Ben Duffy, president of BBDO; Roy Whittier, retired chairman of plans board of Young & Rubicam; Alphonse Holber, chairman of the executive committee of Benton & Bowles, and Earl Ludgin, chairman of the board of AAAA.

More than 500 agency men and women from the New York, New England and Atlantic States councils of the AAAA are expected to take part in the conference. The meetings are open only to members of the AAAA because of the demand for seating, Edwin Cox, senior vice president of Kenyon & Eckhardt and chairman of the executive committee, reported.

Theme of the two-day session will be: "What's New in Advertising?"

New ideas, new trends and new thinking will be explored at 13 group meetings scheduled for the conference in the following areas: Copy and art, trade and industrial advertising, radio and television production; marketing, international advertising, management, research, contact, media, publicity and public relations.

The radio and television production committee of the AAAA is composed of Ted Erickson, Young & Rubicam, chairman, and Wickeff Crider, Kenyon & Eckhardt; Arthur Pryor, BBDO; James Douglass, Ted Bates & Co., and L. T. Steele, Benton & Bowles.

Pennsylvania AWRt Holds Pittsburgh Meet

AMERICAN Women in Radio & Television in Pennsylvania met for their second annual conference at Pittsburgh's William Penn Hotel Oct. 10. State Chairwoman Alma Cramer of WARD Johnstown presided at the session with co-chairmen Jean Connelly, WDTV Pittsburgh, and Gertrude Trobe, WBVP Beaver Falls.

Two panel discussions featured the meeting. The first—"Your Participation in Radio and Television"—was moderated by Jane Smith, WOR Johnstown, with panelists Bess Kallas, WYBC St. Mary's; Linda Dial, WPJH Pittsburgh, and Jane Ellen Ball, WIAS Pittsburgh.

The other panel—"Personality-Plus-Minus"—was moderated by Dolly Banks, WHAT Philadelphia, with panelists Ben Kallas, WBEN St. Mary's; Linda Dial, WPJH Pittsburgh, and Jane Ellen Ball, WIAS Pittsburgh.

October 19, 1953 • Page 33
this advice: "Before you go into tv, make a comprehensive study of your market from every conceivable angle. After you get into tv, anticipate the inevitable losses and be sure initial capital is ample to finance you through the early trial and error periods.

"Hire a qualified tv engineer to supervise technical and production aspects, because no small station can afford to hire a complete, experienced staff at the beginning. The qualified engineer can train your personnel from the start and save you countless dollars."

Others on the tv panel were: Ralph Nimmons, WFAA-TV Dallas; George Storer Jr., KEYL-TV San Antonio; Jack Harris, KPBC-TV Houston; Joe Bryant, KCBK-TV Lubbock; W. D. Rogers Jr., KDUB-TV Lubbock; Frank Myers, KCMC-TV Texarkana; Ken Brown, KWFT-TV Wichita Falls, Dist. 13 director, and John Crandall, Sherman & Marquette, New York.

Resolutions commended President Fellows and NARTB staff members for their part in the meeting, Dist. 13 Director Brown and Mears, Crandall, Taylor and Anderson for their talks.

Members of the resolutions committee were: Chairman Jim Curtis, KPRO Longview; Mr. Roger of KDUB-AM-TV; C. B. Locke, KFDM Beaumont; Alex Keese, WFAA Dallas, and Eugene Roth, KONO San Antonio.

**FLANAGAN SAYS NETWORK PRESSURE MAY DRAW MORE FEDERAL REGULATION**

Station Representatives Assn. head throws another barb in current battle with networks over spot business. He tells New York meeting that network pressure already is 'excessive.'

EXCESSIVE network pressure on the affiliated stations could easily lead to further and more stringent regulation of broadcasting by the FCC, which may receive broader powers from Congress calling for the licensing of networks as well as stations, or to action by the Dept. of Justice, T. F. Flanagan, managing director, Station Representatives Assn., declared Wednesday.

Speaking before a luncheon meeting of the Radio & Television Executives Society in New York's Roosevelt Hotel, Mr. Flanagan made it plain that he considers the pressure already exerted by the networks to fall within the "excessive" category. Citing renewed network efforts to persuade stations to name them as sales representatives for spot as well as network business, to persuade affiliates to take network programs in station time or "to give up income so that the network can have more income," and to "force traditional non-network business into network spot carriers with obvious lesser financial opportunity for the station," he asserted.

"It gives the networks a picnic for pressure and they sure apply it. In present day business morality, the exercise of that pressure is all that is needed for its removal by Dept. of Justice action."

Station operators, Mr. Flanagan said, report networks offering them tv affiliations in exchange for representation contracts and increases in tv network rates if they will agree to raise their spot rates, too.

Mr. Flanagan submitted the new Mutual plan, under which the network "pays" its affiliates for carrying network commercials up to five hours a day not in money but by providing them with 14 hours a week of programs which the stations may sell locally and retaining all the revenue, and said it "will be interesting" to see what happens.

"Is this an invasion of the stations' non-network business?" he asked. "Is it true that Mutual can sell spot announcements in network shows at a price determined by Mutual? Will Mutual do it? If so, how can the station sell announcements at any other rate than the rate set by the network?" And he added: "The network rate could be mighty low."

Giving the networks "due credit" for their early contributions to broadcasting, Mr. Flanagan said, "The networks created the broadcasting business by creating new program ideas, new formats. . . . Since the show's the thing, the networks soon saw the power of programming and proceeded to sew up the talent, the shows. Now they have the programs, the option time, the power to decide station rates on network programs."

He had some specific recommendations as to what stations can do to prevent the networks from abusing their power. First, he said, "there should be a strong body to speak for the stations." SRA, he pointed out, does the best it can, "but we are not an association of stations; our members are merely agents."

Despite this handicap, Mr. Flanagan noted that SRA "did a good job a few years back when our number one advertiser, a network and an agency ganged up to try to freeze tv station rates for two or three years. A good dose of publicity stopped it."

Second, he stated, "we should define the economically necessary fields of national and regional network and non-network business."

"Third, stations should have the right to reject network programs for any or no reason, as they may under FCC regulations."

"Fourth, stations should build up their local and national spot business against obvious hurricanes forming off-shore."

"Fifth, stations should have complete control over their rates, including (not excluding, as at present) rates for network programs."

"Sixth, networks should discipline themselves into avoidance of the use of the pressures and controls that their present power gives them."

"Seventh, in television, transmission that is not simultaneous, not interconnected, is spot business."

**ON HAND for first fall meeting of the newly-named Radio, Television & Advertising Executives Club of New England are (1 to r): seated, Ralph H. Harmon, Westinghouse Radio Stations; C. Herbert Masse, club president and WBZ-TV Boston sales manager; W. C. Swartly, manager, WBZ-TV; standing, Doty Sinclair, WJAR-TV Providence, R. I.; Rudy Bruce, New England Coke Co.; Tom Batson, WCNAC-TV Boston; Richard E. Farnham, WBZ-TV, and George Hollberg, WCNAC.**

---

**RECENT CHANGES NAME TO INCLUDE TV, ADVERTISERS**

THE first 1935-54 meet of the Radio Executives Club of New England was in Boston last fortnight. First order of business was to approve a new name for the group: Radio, Television & Advertising Executives Club of New England.

C. Herbert Masse, club president and sales manager of WBZ-TV Boston, presided at the session. Appointment of Ben Bartzoff, vice president-general manager of WVOM-TV Boston, as second vice president of the group was confirmed.

Featured was an address by Ralph H. Harmon, engineering manager and director of Westinghouse Radio Stations, Washington, who described research on radio and tv efficiency measurements.

Mr. Masse announced committee chairman to serve for the year. They are:

WDAY-TV
(FARGO, N.D.—CHANNEL 6)
COVERS
THE NATION'S
THIRD-BEST* COUNTY
IN RETAIL SALES
PER FAMILY!
(WITHOUT OVERLAP FROM ANY OTHER TV STATION!)

And besides — Cass County, Fargo's home county, is the nation's 73rd wholesale market. Fargo ranks higher in wholesale sales than many larger cities such as Camden, New Jersey and Wilkes-Barre, Pennsylvania.

Which is just to say that our Hayseeds throughout the rich Red River Valley make a whole lot of mazoola — and spend it rapidly on practically everything you can think of, including television receivers and your products!

May we — or Free & Peters — give you the whole story?

*Cass County is third-best among all U. S. counties of over 50,000 population.

4 "Choice of Programs—To Fit Your Needs!"

by WILLIAM W. BRYAN
Manager, Detroit Office

All Americans may be born "equal" before the law—but oh, how different they are in tastes, habits, needs and desires.

A lot of these differences are regional. So much so that audience ratings for even the biggest national radio shows often vary by hundreds of percents, from city to city.

This sets up one of the basic advantages of Spot Radio. It permits alert advertisers to capitalize on local or regional program preferences—to select programs which appeal to their best prospects in any or every market.

Most of the top-notch stations listed at the left have local Spot Radio programs that out-rate and out-sell big-time network shows—and save their sponsors' money at the same time.
65 FIRMS OPPOSE SMALLER FM BAND

ATTEMPTS to slice into the 88-108 mc band used by fm broadcast stations to obtain new frequencies for industrial communications drew the organized opposition of 65 electronic manufacturers at New York Thursday under auspices of Radio-Electronics-Tv Mfrs. Assn.

The manufacturers adopted a resolution notifying the FCC they are opposed to any attempts to reduce the size of the fm broadcast band. The resolution was adopted by RETMA's high-fidelity and equipment sections, a unit of the Sound & Amplifier Division.

The resolution cited recent developments in high-fidelity broadcasting and pointed to increased fm activity in the band. New methods and equipment will permit increased fm public service activity, the resolution noted.

Fear that industrial users would try to break down the fm broadcast band followed a talk by FCC Comm. E. M. Webster Sept. 21 at the NABRT Dist. 14 meeting at Sun Valley, Conn. Webster told the NABRT group the FCC might look into requests of industrial users unless the 88-108 mc band is more widely utilized for broadcast purposes.

Attending the RETMA session, held during the Denver Fair (see page 70), were engineering representatives of most of the major firms making radio and sound equipment as well as the expanding list of firms making components and high-fidelity gear for custom installations.

Efforts to adopt a code of advertising practice or certified hi-fi seal were delayed as spokesmen for small equipment firms claimed such a set of standards would bring down all high-fidelity gear to the minimum level and thus benefit the large manufacturers.

Speakers charged that some of the current hi-fi advertising claims are false and "just plain lies." It was claimed the terms hi-fi and high-fidelity are becoming meaningless because they are applied loosely to inferior equipment.

F. H. Slaymaker, Stromberg-Carlson Co., chairman of a subcommittee that has been drawing up minimum hi-fi standards for industry, was named to take some of the definitions agreed on by the group. Suggested minimum for a speaker was a 60-100,000 cycle audio range plus minus 8 db. This was a disappointment to the makers of hi-fi stereophonic speakers but it was explained that it ruled out a heavy share of cheap table-model radio speakers.

After Mr. Slaymaker had completed reading the standards, the meeting developed into a lively exchange of charges directed mostly at large manufacturers.

Finally Howard Souther, Electro-Voice, chairman of the RETMA High-Fidelity Committee, agreed to name a special committee to study what action should be taken toward drawing up a code of advertising practices.

Glen McDaniel, RETMA president, said RETMA and the Federal Trade Commission expect to be in agreement before the year's end on what their practices in the high-fidelity manufacturing industry. He said any advertising code or hi-fi seal would have voluntary compliance to avoid antitrust laws. He said Better Business Bureau will cooperate with manufacturers by putting out a hi-fi booklet and checking up on equipment carrying hi-fi claims.

He said that if the committee adopted hi-fi definitions and standards they would be submitted to FTC for possible inclusion in the fair-practice code.

Ridgway to Address RTNDA

ARMY Chief of Staff Gen. Matthew B. Ridgway will address the Radio-Television News Directors Assn. during the group's Oct. 26-28 convention in Washington (B'Wt., Oct. 12). Tom Eaton, WTAF, association presi-

dent, said that Gen. Ridgway will speak at a Pentagon session with Defense Secretary Charles E. Wilson and Asst. Secretary Fred Seaton.

Thad Holt Addresses Alabama Broadcasters

ALABAMA Broadcasters Assn. members were told that "radio can do for Alabama whatever you radio men and women want it to do" by Thad Holt, Birmingham radio pioneer, at a luncheon Oct. 9 on the U. of Alabama campus at University, Ala.

A total of more than 100 members of ABA, Mr. Holt added, "is that powerful a force in our state today." He listed prosperity, progressiveness and peace as things he wants for Alabama. Mr. Holt contrasted radio's pioneers with broadcasters of today, who, he said, are successful businessmen and molders of public opinion.

A panel discussion, "How I Get and Keep My Listeners," was moderated by Lionel Bax-

ter. The panel included talks on disc jockey, hillbilly, quiz, sports, farm and women's programs. The Oct. 10 program featured talks on civil defense in Alabama by Col. J. M. Garrett Jr., Montgomery, and Ernest C. Theleman, Washington, D. C., FCC area supervisor for the South Central states. Hudson Miller Jr., WKUL, Cullman, moderated this program.

"Committee Selling' Practice Grows

GROWING practice of metropolitan radio sta-

tions forming committees to jointly solicit major local advertisers was described last week by Kevin Sweeney, vice president of BAB, as "the most important advance in media selling in the past ten years." Mr. Sweeney made this observation at the fall meeting of the Indiana Broadcasters Assn., French Lick, Ind. He told the group that committees have been formed in at least 25 large cities to prepare a plan for submission to major local accounts.

The concept of "committee selling" will be extended to the national advertising field late this month, Mr. Sweeney disclosed, when com-

mittees of BAB member stations in the top 34 cities in the country will call on district man-
gers, field executives and dealers of two major national advertisers recommending larger allo-

cations of their advertising budget to radio.

AD UNDERSTANDING AIM OF AFA DRIVE

ADVERTISING Federation of America Thurs-
day launched its fifth campaign to increase public understanding of advertising with an announcement stressing that television spot film announcements will be used for the first time on the project.

The addition of tv spots, according to Ralph Smith, chairman of the national campaign committee and a vice president of Sullivan, Smith & Colwell Inc., is expected to increase coverage of the campaign during the coming year and "improve public receptivity." He said that the 10-second tv announcements with eight-second sound track will point up the campaign theme of "America Lives Better Because of Advertising."

The support of the radio broadcasting in-

dustry has been "especially encouraging," Mr. Smith added, pointing out that all four major networks already have given 10- to 15-minute time on their private "closed-circuits" to urge affiliates to give AFA material "repeated usage when it is available." Nine spot announce-

ments recorded on a 15-second tape will be available to stations, he said, as well as printed scripts. More than 900 radio stations used AFA material in past years.

Commenting on the AFA campaign, William B. Ryan, president of BAB, declared: "Why people will not buy if they do not believe advertising claims is a talk before radio.

Operator will use every announcement provided by AFA—and supplement these with some of his own—and often."

Among those who helped plan the campaign as members of Mr. Smith's committee were Frederic R. Gamble, president of AAAA; An-

thony LaSala, vice president, Geyer Advertising, and Roy Meredith, radio and tv director.

Tv Accented at Meeting Of AAAA Central Council

ANNUAL meeting of the AAAA Central Council was held at the Blackstone Hotel in Chicago last week, with television occupying a prominent place.

Sessions were conducted behind closed doors Thursday. Thomas D'Arcy Brophy, president of the American Heritage Foundation, ad-

dressed a luncheon meeting Friday. Speakers and topics were these:

Paul Cone, president of Poste, Cone & Belding; "Ten TV Commercials I Wish We Had Done;" Lou Brockway, executive vice president of Young & Rubicam; "The Importance of Environment;"

Earle Ludgin, president of Earle Ludgin & Co.; "There's Life in That Old Firm"; "The Impact of National TV in the Future;"

Dr. John Jeuck, U. of Chicago business school, "Education for Advertising."

Deason Named President Of Texas Broadcasters

WILLARD DEASON, vice president-general manager of KVET Austin, was elected presi-

dent of the Texas Association of Broadcasters at its Oct. 8-9 meeting. Louis R. Cook, KNOW Austin, was elected vice president, and Richard Lewin, KTRE LuFkin, secretary-treasurer. New directors elected were Tom Krizter, KGN C Ama-

rillo; George Christmartz, KBAP Fort Worth, and W. C. Fouts, KSFA Nacogdoches.

Speakers at the sessions, held at Mineral Wells, included Sen. Lyndon Johnson (D-Tex.) and Elmer Wheeler, sales specialist. Attendance (141) was the largest in TAB history.
"Big Mo" Has Changed the St. Louis Picture!

Yes, the "sold out," "no availabilities," "one station programming" flags are being hauled down from St. Louis' television fort. These days, television means "a variety of the best" and "choice availabilities" in a multiple-station-market.

Very soon now "Big Mo," St. Louis' ABC affiliate, will bombard area television screens with a sparkling array of network and local shows. Individual televiewers will be in a position to make their personal choice of programs, and advertisers will have a wider selection of program and spot availabilities.

Yes, the St. Louis television picture has changed . . . thanks to KSTM-TV. Get on the main deck now! Join the steadily growing list of important forward-looking national and regional advertisers aboard "Big Mo" . . . St. Louis' most-welcome, new television battlewagon.

H-R TELEVISION INC. NEW YORK • CHICAGO • SAN FRANCISCO • LOS ANGELES

KSTM TV

ST. LOUIS

AFFILIATED WITH AMERICAN BROADCASTING COMPANY AND RADIO STATION KSTL
First VHF television stations were granted by FCC last week for Duluth-Superior; Orlando, Fla.; Mason City, Iowa, and Cape Girardeau, Mo., while new uhf outlets were authorized for two operating VHF markets, Erie, Pa., and Wilmington, Del.

In a final hearing decision, the Commission awarded VHF ch. 6 to Superior, Wis., to Ridson Inc., operator of WDSM there. Now operating on uhf ch. 38 in the area is WFTV (TV) Duluth.

The other VHF grants were non-hearing actions resulting from the withdrawal of competitive applications. They become the first stations in their areas.

At Orlando, ch. 6 was issued to WDBO after competitor Central Florida Enterprises Inc. dismissed its bid. WORZ, WHOO and WLOF Orlando continue in contest for VHF ch. 9 there. WLOF is newly sold to principals in WGY Silver Spring, Md. (story on page 46).

To Cape Girardeau, KFVS received a conditional grant on ch. 12 after KWK Inc. (KWK St. Louis) withdrew its application there. KWK continues in contest for ch. 4 at St. Louis.

Making final initial decision, the Commission granted uhf ch. 35 to Erie to Great Lakes Television Co. and uhf ch. 3 at Wilmington, Del., to WILM. At Erie, where WICU (TV) operates on vhf ch. 12, the ch. 35 grant to Great Lakes was made possible by withdrawal of Civic Television Inc.

WILM won the ch. 83 ruling after what Philadelphia gave up its Wilmington bid for that facility. Wilmington has operating WDEL-TV on vhf ch. 12.

Merger Proposal

The Commission’s final ruling to grant ch. 6 to WDSM Superior came after withdrawal of the competing application of Lakehead Telecasters Inc. Part of the Lakehead stockholders, identified with operation of WREX Duluth, have obtained minority interests in WDSM and WREX has been deleted.

Concurrently, the Commission announced its memorandum opinion and order denying a petition by WEBG Duluth for reconsideration of an earlier FCC ruling declining to consolidate the ch. 3 and ch. 6 cases. WEBC seeks ch. 3 at Superior and argued that the four applications, all two channels should be consolidated into one proceeding since the channels are allocated to a “hyphenated” or dual-city area, hence should be decided on the basis of Sec. 307(b) of Communications Act which calls for equal distribution of channels among the various communities.

FCC also denied WEBG’s request for amendment of its application to specify ch. 6 in lieu of ch. 3, but on its own motion, the Commission changed the issues in the ch. 3 case to include a possible determination on the basis of Sec. 307(b). KDAL Duluth is in contest with WEBC for ch. 3.

Meanwhile, WEDC has requested the Commission to allocate ch. 10 to Duluth by substitution, chs. 13 at Buhl, Minn., for ch. 10 at Hibbing, Minn. Buhl is between Hibbing and Virginia. WEDC’s earlier plea for the addition of ch. 12 to Duluth-Superior has met with protests in cities where channels would have to be substituted (B&T, Oct. 3).

Details of last week’s new TV grants follow:

Orlando, Fla.—Orlando Bestco. (WDBO) granted new tv station on vhf ch. 6; effective radiated power 150 kw visual and 50 kw aural; antenna height average terrain 460 ft.

Mason City, Iowa—Lee Radio Inc. (KGO) granted vhf ch. 3; ERP 100 kw visual and 50 kw aural; antenna height average terrain 900 ft.

Cape Girardeau, Mo.—Hirsch Bestco. (KFVS) granted vhf ch. 12; ERP 316 kw visual and 150 kw aural; antenna height average terrain 460 ft.

Erie, Pa.—Great Lakes Television Co. in final decision granted uhf ch. 35; ERP 66 kw visual and 35 kw aural; antenna height average terrain 415 ft.

Wilmington, Del.—Delaware Bestco. (WILM) granted uhf ch. 83; ERP 132 kw visual and 71 kw aural; antenna height average terrain 455 ft.

Harold P. Danforth, president-general manager of WDBO Orlando, reported the new ch. 6 outlet should be on the air within six months. It is presumed the station will be affiliated with CBS. Blait Television will be national representative. Equipment is DuMont. The station will be nationally represented by Weed Television. National affiliation has not been negotiated, but KGO is affiliated with CBS.

Robert R. Ridder, president of WDSM, indicated that because of unusual ground conditions, it is difficult to determine how soon the new vhf ch. 6 station at Superior would be on the air, but construction will proceed as rapidly as possible. Free & Peters will be national representative. GE equipment is planned. WDSM is in ABC affiliation.

Oscar Hirsch, president-general manager of KFVS Cape Girardeau, indicated the new ch. 12 station would be constructed as soon as possible after the Logansport allocation proceeding is settled, as specified in the condition to the grant. Pearson TV will be national representative. DuMont equipment is specified in the application. KFVS is a Mutual affiliate.
The first ratings of the season are in! And NBC Television programs are off to a breathtaking start.

Here is Nielsen's first report for the 1953-54 season for all NBC Television programs which premiered before September 13:

**NOTE:** Only those shows which premiered before September 13 are included in Nielsen's first report for the 1953-54 season. Programs starting after September 13 will be reported later.

Most of these programs topped all competition. The average rating for all NBC premieres was an impressive 27.4, a full 24% higher than the average network evening show.

Placing a show on NBC Television assures big audiences from the opening gun. It happens year after year. And now that the 1953-54 season is under way, NBC leadership has emerged stronger than ever.

HIGH COURT TAKES GIVEAWAY ISSUE

Supreme Court accepts jurisdiction over FCC's rules which would limit giveaway programs as violations of the Lottery Law. A lower court has held that the Commission's regulations are illegal.

ORAL ARGUMENT on the legality of the FCC's regulations regarding giveaway programs has been set Oct. 10 before the U.S. Supreme Court. FCC's brief is due Nov. 13, and the reply briefs by the networks on Dec. 3.

Action setting the date for oral hearing followed the Supreme Court's acceptance of jurisdiction in the case last Monday. In accepting jurisdiction, the Supreme Court turned down a motion to affirm a lower court's decision that the Commission's rules on giveaway programs were illegal. Both motions had been submitted to the Court following the New York special court's two to one ruling that the FCC's regulations misconstrued the Lottery Law and violated the no-censorship provisions of the Communications Act (B&T, Feb. 9).

Drawn Up in 1949

The give-away regulations were drawn up by the Commission in 1949. Following the appeal to the courts by ABC, CBS and NBC, the Commission suspended the effectiveness of the rules pending the outcome of the action.

At issue is the Commission's description of what constitutes "price" or "consideration." Among the criteria which the FCC said violated the "lot" or "chance" provisions of the Lottery Law were:

1. If a listener is required to furnish any money or thing of value or is required to have in his possession any product sold, manufactured, or distributed by a sponsor of a program broadcast on the station in question.
2. If the contestant must be listening or watching the program in question.
3. If he answers a question whose answer has been given or hinted on an earlier broadcast.
4. If he is required to write a letter in a prescribed manner or answer the phone in a prescribed manner or way has been broadcast over the station.

The majority ruling of the special court upheld the FCC's right to promulgate the regulations, and also the first condition regarding the choice of a contestant by lot or chance where the contestant must furnish money or something valuable or must have the sponsor's product in his possession.

Other Conditions

The other conditions, the court ruled, are not "price" or "consideration" of the sort banned in the Lottery Law.

"The act of listening to a broadcast of a giveaway program, or viewing it on television, does not constitute "price" or "considerable," nor is it an essential element of a "lottery,"" District Court Judge Leibell wrote in the majority opinion.

Judge Leibell also noted that the Attorney General had told the FCC in 1940 that giveaway programs, similar to those at issue, were not lotteries in the accepted sense of the word. He also pointed out that the FCC had asked Congress to legislate on the matter, but that Congress had not done so.

Joining Judge Leibell was District Judge Edward Weinfeld. Circuit Judge Charles E. Clark dissented.

The Commission's argument had been that the act of listening to or viewing a giveaway program was the "price" or "valuable consideration" factors which brought giveaway shows under the lottery ban.

Judge Leibell also said in the majority decision that although FCC's rules on lotteries do not infringe free speech or free press "... some of their provisions go beyond the scope of Sec. 1304 of the Criminal Code [and] may be considered as a form of censorship and to that extent they would be in violation of the First Amendment."

GIVEAWAYS ARE IN GREATER NUMBER NOW

As the U. S. Supreme Court accepts jurisdiction on FCC's four-year-old rules against giveaway programs, a compilation of the number on the air shows a decided increase.

LAST WEEK'S U. S. Supreme Court ruling that it will hear argument on FCC's four-year-old rules against giveaway programs—rules which have been suspended until the courts finally pass upon their legality—came at a time when the number of network "giveaways" on the air is considerably in excess of the number being broadcast when the rules were first adopted.

The increase, though, reflects the development of network television during the ensuing years.

In August 1949, when the rules were announced, a count showed 38 programs which gave away money and/or assorted commodities. But there were all radio network programs. Last week the number stood at 57 on the four radio and four tv networks. The number on the radio networks stood at 27.

All Prize Shows

Network spokesmen who compiled the lists emphasized that they were counting all shows on which prizes were awarded. FCC indicated long ago, on the other hand, it was not prima-facie, if at all, concerned with giveaway shows which depend upon studio audience participation alone—the category into which most current giveaways appear to fall. The ban was taken to be directed to a major extent against giveaways involving telephone calls to contestants, of which, the networks point out, less than a handful show up in the current lists.

The size of prizes, too, appears to have been deflated in the past four years. On CBS-TV, the top-paying show is Big Payoff, which hands out something like $8,000 in awards in a month. NBC's You Bet Your Life is one of that network's highest prize givers, with intermediate awards going up to a chance at a "giant jackpot" which starts at $1,000 and increases by $500 a week until somebody wins it. Mutual's Queen for a Day hands out $5,000 to $7,500 in prizes a week. The winnings on DuMont's A Dollar a Second go up to about $1,800 a week.

A far cry, these figures, from the $50,000 jackpot of money and merchandise on CBS' Sing It Again a few years back, the approximately $20,000 in merchandise offered on ABC's Stop the Music, the estimated $27,500 worth on NBC's Hollywood Calling, and the average $12,500 worth on Mutual's Queen for a Day—all in the giveaway's heyday.

By networks, the current crop of programs that give away prizes ranging from money to beauty treatment, are as follows:

ABC radio: Turn, Say, Double or Nothing, What's the Name of That Song? and Joining the Judges.

ABC-TV: Turn to a Friend, Erin Morrow Show, Mlle, and You'll Miss Me, the Bingo Game, Girls, Girls, Super Circus and The Name's the Same.

CBS radio: Give and Take, Two for the Money, Wizard of Odds, Fun for All, House Party and Paging Mr. Brown.

Mutual: Radio City, A Day, Wonderful City, Take a Number, and the Aloha Show.

NBC radio: Break the Bank, Strike It Rich, Phantom That Pays, Second Chance, It Pays to Be Married, Walk a Mile, College Quiz Bowl, You Bet Your Life, Truth or Consequences, Know Your NBC's and Can You Top This, and You Are What You Wear.

NBC TV: Mont's Travelers, On Your Account, Name That Tune, Judge for Yourself, This Is Your Life, You Bet Your Life.

Behind the Curtain

WITH an assist from CBS Radio, the Voice of America plant to beam behind the Iron Curtain the story of a haven in the U.S. for persons displaced or escaped from communist-dominated territories. The Voice recently applied to the Commission to rebroadcast a recent program of CBS Radio's The World Today series (Sun., 4-43 p.m., EST), which described the Tolstoy farm for refugees near Nyack, N. Y., which is operated by Countess Alexandra Tolstoy. The broadcast includes the voices and comments of children on the farm and of former refugees who have left the farm to become American citizens.

Only Two Comments Filed On Uhf Allocation Plan

TWO comments, both concerning Lexington, Ky., were the only pleadings filed with the FCC by deadline last Tuesday on the Commission's proposal to allocate additional uhf channels in some 35 cities to help ease the television application deadlocks there (B&T, Sept. 14).

FCC proposes to add uhf ch. 70 at Lexington, where the Sixth Report had provided uhf chs. 27 and 64, WLP and West-Bingham TV Co. are competing for ch. 27 while WLEX and WVLK seek ch. 64.

WVLK informed the Commission that ch. 15 or ch. 16 could be added there as well as ch. 70, thereby allowing four channels for four applicants. This could be accomplished by substituting chs. 69 for 15 at Louisville or ch. 72 for 18 at Gallipolis, Ohio. In both cities, no uhf needs and conditions for the channels involved, WVLK said.

The U. of Kentucky, however, suggested that ch. 70 be reserved for educational use. The school acknowledged that as its radio needs are served by uhf channel 10 the school expects its uhf needs will be similarly met. The school added, however, that "it is conceivable that future needs and conditions may dictate a re-evaluation of our position and indicate the desirability of our own educational tele-
HALF FRIED IN THE PANHANDLE
or water over the dame*

There was a guy weaving along the street with a snoot full. We read somewhere that there are more than fifty illnesses which can produce the effect of drunkeness—vertigo, epilepsy, brain tumor and so on—but this character had a plain old-fashioned snoot full. One of Amarillo's finest picked him up, poured him in a wagon and took him to the jailhouse. "You were brought in for drinking," explained the officer. "Thass real great," was the quick reply. "Less get started."

Practically nobody in Texas is as dry as he was back in May. A lot of liquid has been soaked up, not all of it intoxicating. The drought is out, plains pastures are on the way back, and some farmers already have wheat up. Both cotton and grains sorghum yields may set new records. Prospects are fair to excellent for feed crops.

This is just to let you know that all the scare headlines shouldn't be taken too seriously. The Panhandle has survived weather before, even before folks had KGNC AM and TV to comfort them.

You were bought in for time buying. Let's get started.

*Actually, it's water over everybody, but dame's a better headline.

NEW FCC RULING ON

APPLICANT'S MEANS

FCC issues procedural decision in Canton uhf ch. 29 hearing. New ruling says hearing examiner can determine if an applicant can carry out proposals under a specific budget, regardless of overall finances.

PRECEDENT procedural ruling was made by FCC last week respecting the Canton, Ohio, uhf ch. 29 television hearing which considered proposals for a local station. The Commission decided the hearing examiner may enlarge the issues of the case to determine if one applicant actually can carry out his proposals under the specific budget, irrespective of his overall financial strength.

The new interpretation follows by a week the Commission's decision in the Evansville, Ind., vhf ch. 7 case to allow the examiner to enlarge the issues to inquire if an applicant actually is financially qualified to carry out his proposals even though general financial qualification was acknowledged by the Commission before hearing (WF, Oct. 12).

The Canton ch. 29 hearing, in progress before Commission Comr. S. E. Litvin, involved competitive bids of Brush-Moore Newspapers Inc. (WHBC), Stark Telecasting Corp. (WCMW) and Tri-Cities Telecasting Inc.

FCC's newest ruling was based upon a petition filed by Mr. John W. Kluge, owner of WLOF, who proposed for a non-network station. The Kluge ruling was issued against a petition to enlarge the issues to inquire if the applicant was financially qualified to carry out his proposals under the specific budget.

In its opinion, the Commission said "sums proposed to be spent may be relevant to the comparative merits of the management and operation proposals of competing applicants. But before a claim of superiority in this respect will be available as a point of difference to be relied upon pursuant to Sec. 1.841 of our rules and regulations, it must be clear that the allegation is material and can, if successfully supported by the evidence, affect the decision."

In other words, the opinion stated, the allegation must meet the requirements defined in the Commission's rules and regulations.

The examiner need not accept such a statement unless it is composed of allegations sufficiently particularized to justify, if proven, it would establish significant differences among the competing proposals. It should be apparent that evidence of greater expenditures and claims on standing alone, will seldom support a finding of comparative superiority. Inadequacy, insufficiency, and experience can often be determined in the amount of money to be spent should be related, by other competent evidence, to the result which is sought to be achieved.

In the [Evansville] case, we reexamined our usual approach to determinations of the financial qualifications of competing applicants. Although we have found all the applicants in that proceeding financially qualified, we gave the examiner discretionary authority to review the issues so as to determine if evidence deemed to rebut the prima facie determination that the funds shown to be available to any applicant will be sufficient to carry out its proposals. We believe our determination, in this proceeding, that an applicant was financially qualified would be subject to the same approach. Therefore, upon a reasonable showing by Stark that pro forma evidence cannot be addressed, the examiner may enlarge the issues to permit evidence on the question of whether funds available to Stark-Moore give fair assurance that its proposal will be effectuated. Similar evidence concerning both Stark and Tri-Cities is, of course, admissible under the financial qualifications issues now specified for those applicants.

WLOF Sale ApplicationFiled With Commission

APPLICATION for sale of WLOF Orlando, Fla., by William Joe Sears and Walter Shea for $215,000 to principals in WGAY Silver Springs, Mass, FCC last week (CLO. Circuit, Oct. 12). WLOF is a test meet for vhf ch. 9 at Orlando.

Messrs. Sears and Shea, Jacksonville attorneys, sell entire WLOF holdings to Joseph L. Bruchner and John W. Kluge, co-owners of WGAY, whose president, Mr. Bruchner, WGAY manager, "will take an active role in the operation and management" of WLOF, the transfer application states. WLOF is assigned 5 kw on 950 kc, directional night, and is a Mutual affiliate.

Share Holders

Mr. Bruchner will become president and 26% owner of WLOF while Mr. and Mrs. Kluge together will hold 35%. Mr. Kluge, who would be secretary-treasurer of WLOF, is also president of KKXL St. Louis and president of Kluge & Co., food brokerage firm. Vain Polyzois, Washington treasurer, will be vice president and 20% owner of WLOF while Harold H. Thomton, Mr. Kluge's brother-in-law, will be director and 15% owner. Ernie Tanen, WGAY program director, will own 4%. Mmes. Kluge and Thomas are part owners of WHIM Partnership.

No major changes in staff are proposed for WLOF, FCC was told. The station's balance sheet as of Sept. 30 listed current assets of $55,620.86 with current liabilities $19,067.58. Total assets were $186,600.35 with total liabilities $85,510.60, surplus $66,289.75 and capital stock $15,000.

Comparative TV Hearings Set

THREE more comparative television hearings were scheduled by FCC last week to commence in Washington on Nov. 13. The cases are: Guy Gannett Broadcasting Services (WGAN) and Murray Carpenter & Assoc., both seeking vhf ch. 13 at Portland, Me.; Capital TV Inc. and The Tierney Co. (WCHS), vhf ch. 8, Charleston, W. Va.; and Durham Radio Corp. (WDNC) and Durham Broadcasting Enterprises Inc. (WITK), vhf ch. 11, Durham, N. C.

FCC Revises Its Policy On Pre-Hearing Data

In a move to further expedite handling of television hearing cases, as well as similar am and fm proceedings, FCC last week announced a change of policy to require applicants to submit detailed information about their station plans before going into the hearing.

Effective immediately, the Commission sends an applicant his pre-hearing McFarland letter, such letter will bear an attachment asking for specific data on the background and experience of the station's officers, proposed programs, equipment, studio layout and facilities, management and staffing and operating budget. This data must be filed not later than 15 days before the scheduled date of hearing and will cut down a good deal of the required oral testimony, the Commission indicated.

Full text of the procedure change may be found on page 123.

FCC's McFarland letter itself advises an applicant that his bid is mutually exclusive with the application of another and may ask the applicant to submit explanation or more information on his general qualifications as set forth in the application.

Questions Asked

The new attachment, for example, solicits answers on "how you propose to staff your station operation with such activities as programming, engineering, news and special events, advertising and promotion, general administration, etc. Show the personnel assignment schedules, if any, for network programs in the proposed typical week." As for estimated budget, FCC will ask for figures on the first year's operation, "for example, salaries of personnel in engineering, programming, sales, news and special events, advertising and promotion, general administration; general administration expenses and programming expenses, such as cost of talent, news service, music license fees, film costs, etc."

FTC's Mead Dissents On New 'Free' Policy

DISSENTING opinion in the Federal Trade Commission's relaxed policy on use of the word "free" in advertising [BT, Sept. 28] was issued last week by FTC Comr. James M. Mead. Comr. Mead and then Comr. Stephen J. Spin- garn, who since has been succeeded by Comr. John W. Gwynne [BT, Sept. 28], both differed from the softening of FTC policy on use of "free" as stated in a decision dismissing FTC charges against Walter J. Black Inc.

The FTC majority opinion in the Black case said offers of merchandise "free" conditioned upon purchase of other merchandise would be acceptable provided such conditions were dropped in the advertisement. There was a drastic softening of FTC's 1948 policy statement saying that "free" could be used only when no strings were attached.

Comr. Mead said in part: "Under the new policy the advertiser is allowed to use a literally untrue statement provided he uses it reason- ably. The new policy has the virtue of flexibility and the vice of uncertainty."

Stating that a relaxed policy similar to the new FTC stand on "free" existed for a time before the 1948 policy statement, he found unworkable, Comr. Mead said: "... Their dis- cussion ... has only postponed a problem which will return in a different but more difficult and more virulent form. . . ."

WSAL ATTACKS FCC ALLOCATIONS

Station's attorney Booth says table of allocations violates 'fair and equitable distribution of radio service' clause of Communications Act. FCC counsel counters Mr. Booth's arguments in appeals court.

DIRECT attack on the legality of the FCC's table of allocations for tv channels was made last week by WSAL Logansport, Ind., in the U.S. Court of Appeals for the District of Columbia.

Challenge to the FCC's action in making the table of allocations part of the tv rules, made by attorney Robert M. Booth, Jr., of the legal firm, Bingham, Collins, Porter & Kistler, was based on the ground that it violated the "fair and equitable distribution of radio service" clause of the Communications Act (Sec. 307b).

That provision, Mr. Booth argued, assumed the Commission only could act after receiving an application for radio service. There is no such thing as "service," he said, without a station transmitting signals. And, he added, there can be no station without an application first.

Denying that the court had already ruled on the legality of the FCC's table of allocations, Mr. Booth claimed the basic question in the so-called Lancaster case (which involved the switch of WQAL-TV from ch. 4 to ch. 8) did not include the legality of the allocation plan. Two months ago, the Court of Appeals said the Commission has the power to formulate a nationwide allocation plan (B&T, Aug. 10). This was a unanimous ruling by Circuit Judges E. Barrett Prettyman, James M. Proctor and David L. Bazelon.

Judge Prettyman is also sitting on the Logansport case. Associated with him are Judges Charles Fahey and George Thomas, Washington. Case is No. 11,601.

Appeals FCC Denial

The WSAL appeal is from a ruling by the FCC declaring invalid for the allocation of vhf ch. 10 to Logansport instead of to Terra Haute.

Other arguments by WSAL were that (1) the Commission did not consider "all relevant and material evidence" and (2) the FCC's final order was different from its proposed rule (Third Report).

In arguing on his assumption that the allocation plan is illegal, Mr. Booth declared the Commission violated two fundamental principles: (1) That the location of a station cannot be determined until someone files an application and it is granted, and (2) that "radio service" as expressed in the equitable distribution provision of the Communications Act cannot be supplied unless there is a station broadcasting such a "service."

Bolstering his contention, Mr. Booth referred to Congressional debates on the Davis amendment to the Radio Act of 1927.

Judge Prettyman asked Mr. Booth if the "practical" requirements of television did not make it necessary for the Commission to establish a fixed table of allocations. Mr. Booth disagreed.

In an answer to a question by Judge Fahey, Mr. Booth explained that Logansport deserved ch. 10 instead of uhf ch. 51 because uhf frequencies permitted wider coverage than uhf wavelengths and Logansport's market included rural areas 35 to 40 miles distant.

Mr. Booth also suggested that the 525 stations granted or on the air could be used as the basis for determining where other grants should be made. This is how am broadcasting grew, he pointed out, using those stations on the air at the time of the Communications Act as the basis for additional grants. This also was in answer to a query from the bench.

Strong objections to Mr. Booth's position were voiced by FCC Assistant General Counsel J. Roger Wollenberg. If allocations only could be determined by applications, he said, it would require that everybody involved (applicant, stations on the air and other applicants seeking the same or adjacent channels) be made part of a case. That would make application processing complex, unwieldy and drawn out, he said.

Mr. Wollenberg declared that WSAL was not claiming Logansport had no tv service, but only that it did not have a vhf channel. He admitted that at present uhf provides smaller coverage, but he said ultimately both bands would be equal.

Demo Donors

AMONG list of major contributors to the Democratic National Committee in 1952-53 were two only in broadcasting circles. They were Barry Bingham, publisher of Louisville Courier-Journal and Times (WHAS-AM-FM-TV) and Edward Lamb and wife, owners of WIKK and WICU (TV) Erie, Pa. (Erie Dispatch), WTOD and WTRT (FM) Toledo, Ohio, WHOO-AM-FM Orlando, Fla., and WMAC-TV Massillon, Ohio. Mr. Bingham contributed $5,000, the maximum permitted by one person. Mr. Lamb, who is also the prospective purchaser of WTQV (TV) Pittsburgh, contributed $2,500 and Mrs. Lamb $1,000. Former broadcaster Marshall Field and Mrs. Field aided the Democratic cause by $3,000 each. The names were made public with the filing of contribution lists with the Clerk of the House by the two parties.

Three Honolulu Chs. Open

THREE of Honolulu's six vhf television assignments remained unsought last week after FCC granted the petition of Royallet for dismissal of its ch. 2 application. Other open channels are ch. 13 and reserved (educational) ch. 7.

KULA-TV is under construction on ch. 4 while KGBM-TV is operating on ch. 9 and KONA (TV) is on ch. 11.

Commerce Dept. Merges NPA

NATIONAL Production Authority has been merged with several older Commerce Dept. bureaus into a new Business & Defense Services Administration, Secretary of Commerce Sinclair Weeks has announced. The new bureau's 25 industry divisions include electronics.

RADIO-TV ROLES
KEY LEAGUE SUITS

Baseball cases now before Supreme Court hinge on whether broadcasting has put the sport into interstate commerce.

RADIO and tv have so changed American baseball it no longer is a sport, the Supreme Court was told last week by oral argument on three suits against major league ball clubs and the former commissioner of baseball.

Cases were those of George Earl Toosom against the New York Yankees, Walter J. Kowalski against the Brooklyn Dodgers and Jack Corbett, owner of the El Paso minor league club, against former Commissioner A. B. (Happy) Chandler. Damages amounting to $475,000 are asked by the two players, and $300,000 by Mr. Corbett.

At issue is whether a 1922 unanimous ruling by the Supreme Court, written by the late Justice Oliver Wendell Holmes, should be overruled. In that 30-year-old decision, the Supreme Court said baseball was a sport, played as a local exhibition, and did not come under the antitrust laws concerning interstate commerce and restraint of trade.

20% of Baseball Income

Attorneys for the players and Mr. Corbett stressed that the sale of radio and tv rights brought in $75 million to organized baseball, 20% of its income, they declared. Since radio and television broadcasts cross state lines, the game has now become interstate in character, they said. They also pointed to the growth of "major league club "farms" and other non-local activities, including advertising and promotion, as evidence that baseball now is interstate commerce.

Defending attorneys claimed that the sale of radio and tv rights was only "incidental" to the local exhibition characteristic of the game. They said nothing had developed in baseball since the 1922 decision to change that ruling.

Mears, Toosom and Kowalski claim they were denied free television contracts by the clubs because of the reserve clause in baseball contracts. This binds the player to the first club, which can sell, trade or shift him at will to other clubs. Mr. Corbett's suit followed Mr. Chandler's prohibition against hiring Mexican League players for the El Paso club.

The reserve clause was termed "slavery" and "peonage" by the players' attorneys.

The appeals were made to the Supreme Court after Federal Lowers tabled the suits on the grounds that they had no jurisdiction.

Baseball clubs' attorneys, in answer to queries from the Court, declared that although baseball would go on if the reserve clause were eliminated, it "would wreck the present organization of the game." If free to bid individually for players, they said, the richest teams would get the best players.

No decision is expected until spring of next year.

Influence of radio and television in determining whether professional sports are subject to antitrust prosecution or not is one of the key considerations in the antitrust suit against the National Football League (B&T, June 15 et seq.). Decision on that is being awaited from Judge Allen Grim of the U. S. District Court in Philadelphia.
NOW, IN MEMPHIS IT'S

WHBQ-TV

the big, new selling medium of the Mid-South

WHBQ-TV Memphis, the second VHF station in the market and a CBS affiliate, went on the air September 27, 1953... with everything to catch the 1,169,922 eyes of viewers in the Memphis trading area. And everything to interest the advertiser who has a product or service to sell in the nation's 12th ranking wholesale distributing center.

WHBQ-TV offers Memphis for the first time not only a choice in its television viewing, but a roster of programs studded with the top network shows and regionally-geared local programs.

In every way a big-time operation, WHBQ-TV will soon have a 1050-foot tower, the tallest permitted in this geographical section; and will go from 100,000 watts (highest power now in the market) to maximum power of 316,000 watts.

To the advertiser as well as to the television audience, WHBQ-TV offers a genuine service in terms of facilities, programming and experienced, highly respected management. Call your BLAIR-TV man today!
VOICE STEPS UP ASIA OPERATION

VOICE of America is thrusting deeper into communist territory and through Russia's backdoor.

Director Theodore S. Streibert of the U. S. Information Agency said last week VOA signals are penetrating further into Eastern Asia, particularly China, North Korea, Manchuria and Eastern Siberia. Signals come from two powerful transmitters, each powered by a 5,000 kw diesel engine, using the regular wave band. The relay stations are named "John" and "Jade," the former on Okinawa and the latter north of Manila in the Philippines.

Programs are about 60% news and the rest commentary, produced in New York and relayed to Okinawa and the Philippines by shortwave transmitters in California, Mr. Streibert said. Consulting engineers, he said, estimate the broadcast nighttime range at about 1,600 miles in certain directions. Area coverage has about 11 million radio sets out of an estimated 16 million in all of the Far East. Both stations are newly completed although "John" must undergo testing and adjusting before it is put into full scale operation.

Plan is to put the transmitters on a 12 hours daily schedule with most of the programs carried in nighttime. "John" now broadcasts 5 hours 15 minutes and "Jade" four hours each evening.

The taking off of wraps of the relay stations followed by a few weeks disclosure by Mr. Streibert that the Voice operates a longwave transmitter in Munich [B*T, Sept. 28]. The Munich operation reportedly is rolling back Radio Moscow's nighttime signal on the 173 kc frequency both facilities use [Closed Circuit, Oct. 12].

By stepping up its Far East operation, the Voice during nighttime hours now pumps strong broadcast signals into satellite communist nations and across both eastern and western borders of the Soviet Union.

Detroit UHF Ch. 62 Grant Proposed for UAW-CIO Corp.

INITIAL decision proposing to grant uhf ch. 62 to UAW-CIO Broadcasting Corp. of Michigan was issued last week by FCC Examiner William G. Butts.

The proposal came after competitive applicants Knight Newspapers Inc. and WEXL Royal Oak, Mich., dropped out of the contest. The Commission previously had found UAW-CIO "legally, financially and technically qualified to construct, own and operate a television broadcast station.

UAW-CIO Broadcasting Corp. is controlled by the International Union UAW-CIO. Principals include President Walter P. Reuther, president of CIO; Secretary-Treasurer Emil Mazy, Vice President Richard Gosser, Vice President John W. Livingston and Director Norman Mathews. All hold identical positions in UAW-CIO.

KXOC Power Boost Approved

KXOC Chico, Calif., has received authority from FCC to increase nighttime power from 10 kw to 100 kw in order to improve the signal in directional antenna system. KXOC will now operate on 1060 kc with 10 kw full time, directional night.

Lee Names Aide

NEW FCC Comr. Robert E. Lee has appointed David C. Williams to be his attorney advisor, effective last Wednesday. The announcement was made Thursday.

Mr. Williams for the last 15 years has been employed by the U. S. Court of Appeals for the District of Columbia and for 13 years was a secretary on Capitol Hill. Born in Beverly, Mass., in 1906. Mr. Williams received his LLB in 1933 from National U., Washington. Comr. Lee took office a fortnight ago [B*T, Oct. 12].

New KGBS, Hofheinz Move Made to Appeals Court

SEEKING reversal of the FCC's decision ordering it to cease 50 kw non-directional daytime operation and return to directional antenna operation, KGBS Harlingen, Tex. (formerly KSOX) and Roy Hofheinz, former owner of KGBS, have petitioned the U. S. Court of Appeals in Washington last week.

KGBS and Mr. Hofheinz contend the Commission erred when it withdrew program authorization permitting the 1530 kc station to operate omni-directionally from local sunrise in Harlingen to local sunset in Cincinnati. WKCY Cincinnati is the dominant station on 1530 kc, and has sought to force the FCC to reverse its grant of omni-directional daytime operation to KGBS [B*T, Oct. 12].

In its appeal to the court, KGBS and Mr. Hofheinz (now Mayor of Houston) claimed that they did not get a full and fair hearing before the FCC, that the August FCC order violated Commission rules and Communications Act provisions as well as Administrative Procedures Act sections, that revocation of permission to operate non-directionally violated the due process clause of the Fifth Amendment, that the Commission's action was an "unreasonable" departure from a local-Free TV precedent and that the order was based on speculative evidence.

Peninsula Seeks Ch. 5

NEW TV application was filed with FCC last week by Peninsula Television Inc. for vhf ch. 5 at San Quentin, Mich., the channel FCC proposes to change to ch. 6 so that ch. 5 can be added to Green Bay, Wis., thus freeing ch. 6 at Green Bay for allocation to Whitefish Bay, just north of Milwaukee [B*T, Oct. 12]. FCC's reallocation is based upon a petition by Hearst Corp., long-time litigant for Milwaukee's ch. 10, now reserved for educational use. Hearst owns WISN Milwaukee, President and 66% owner of Peninsula Television is Jerome Sils, general manager, secretary-treasurer and a 25% owner of WMIL-AM-TV Milwaukee (uhf ch. 31).

WHK Is Ch. 19 Survivor

WHK Cleveland became the sole applicant last week for a new tv station on uhf ch. 19 as FCC consented to dismissal of a competitive bid by WII from the market. FCC conditioned it was "inadvisable" at this time to continue prosecution of its application, which was slated for competitive hearing with WHK. FCC retained the WHK bid in hearing status before Examiner Fannin N. Livin for preparation of an initial decision.

**NBC RADIO**... headquarters for new ideas
KSTM-TV AsksTradeOf 2 Vhfs for 4 UhfsREQUEST to delete vhf chs. 4 and 11 from St. Louis and substitute four uhf channels was made to the FCC last week by KSTM-TV St. Louis, operating under an STA on uhf ch. 36 and due to begin commercial programming Oct. 25.

Petition for rule-making emphasized that vhf ch. 5, now occupied by KSD-TV, and ch. 9, assigned to the St. Louis Educational Television Commission, not be touched. By the elimination of the two vhf frequencies and their substitution by uhf channels, presently competing applicants for vhf could be granted uhf wavelengths without hearing. This would hasten full-scale tv in St. Louis, the petition said.

St. Louis has one vhf, KSD-TV, and two uhfs, Wad. "If it is the policy of the Commission to provide the greatest amount of service technically and financially feasible, then the allocation should be changed and changed as soon as possible so as not to inconvenience the present applicants."

Specific recommendation of the proposed rule change is to delete vhf chs. 4 and 11, add uhf chs. 64, 70, 76 and 82.

Brooks Drops Tv BidFORMER Sen. C. Wayland Brooks (R-III.) and Mary T. Brooks, doing business as Brookwell Enterprises, petitioned FCC last week to dismiss their application for a new tv station on vhf ch. 8 at Peoria, Ill., which is in contest with competitive bids of WMBD and WIRL Peoria. The Brookwell pleading said that "since reading the Commission's releases, petitioner believes that the prevailing substantial number of am operators who have received grants for television facilities is not a statistical argument to authorize the billing of service experience outside of radio against two competing am license applicants requires an additional burden of proof which was not originally contemplated."

WHLM Changes FacilitiesWHLM Bloomsburg, Pa., last week was granted a construction permit by FCC to change facilities from 690 kc, 1 kw daytime to 550 kc with 500 w unlimited, directional.

Wov Counter-Claim Equality With PressWOV New York follows up its victory over IBC in Mariano-LaStarza bout 'round-by-round' spot, requesting dismissal of IBC's suit against the station and asking equal rights with press for broadcasters in covering sports.

WOV New York, which led the fight that won for broadcasters the right to give round-by-round summaries of the LaStarza-Mariano championship boxing bouts [B5, Sept. 28,] went back into court last week and asked for a ruling that "broadcasters have the unlimited right to broadcast any news which they can obtain legally."

This request, as phrased by WOV Executive Vice President Ralph N. Well, was contained in a more legally worded counter-claim filed by Wodaam Corp., WOV licensee, against the International Boxing Corp., whose injunction proceedings against WOV touched off the court hearing that "broadcasters have the unlimited right to broadcast any news which they can obtain legally."

As a result, the court may be asked to declare that broadcasters have equal rights with the press in covering sports events. In his statement, Mr. Well expressed hope for a full-dress trial before the end of November. He asserted:

"Our claim is based on the traditional American interest in boxing and the fact that mass communication media pre-fight publicity creates much of the public interest which enables the International Boxing Corp. to do business. Therefore WOV asks the court to declare that broadcasters have the unlimited right to broadcast such information as they can obtain legally. This station contends that once news is released to the press, it is released for all purposes, including broadcast purposes."

"WOV also demands that International Boxing Corp. produce and disclose any contracts on which it relied for exclusive broadcasting or tv rights to the Mariano-LaStarza fight. "The issues raised by WOV's counter-claim affect the rights of every broadcaster."

WOV's counter-claim, filed by Charles B. McGroddy Jr. of the New York law firm of Alexander & Keenan, is the aftermath of an injunction granted by the New York State Supreme Court on Sept. 23, against WOV, which denied the stations use of the fight on radio or complete round-by-round reporting. It went farther than IBC had wanted, however, by permitting broadcasters to carry a 75-word summary at the end of each round in place of a similar report at the end of each third round as insisted upon by IBC.

After tracing the background of the dispute and stressing the contention that the radio broadcaster is entitled to equal privileges with the press in disseminating news as soon as it is obtainable, the counter-claim asks for the following relief:

"A. For the dismissal of the complaint against them, on the merits and the dissolution and vacation of the temporary injunction now in existence against the defendants, and for their costs, disbursements, damages and counsel fees resulting thereon."

"B. For a declaratory judgment against the plaintiffs International Boxing Corp., settling and determining the disputed jural relationship now existing between them as follows:

(a) Adjudging and declaring that the defendant station WOV is entitled to broadcast without being limited to number of words or in any other manner, all news or intelligence of or relating (1) to the aforesaid boxing contest between said Mariano and said LaStarza or (2) relating to any boxing contest held or to be held in the future by or under the auspices of the plaintiff International Boxing Corp., as soon as said news or intelligence may be legally obtained by said station last, so long as the following conditions are fulfilled:

"(a) There is no breach of contract, or tort, or violation of any statute, rule or regulation of any applicable authority committed in obtaining the aforesaid news and"

"(2) There is no deception of the public in broadcasting and news."

"C. Adjudging and declaring that the release of news of the aforesaid boxing contest between said Mariano and said LaStarza, or of any boxing contest to any medium of mass communication, either directly or through wire services, places the material so released in the public domain as news and permits the broadcasting thereof as soon as said material can be obtained by station WOV either directly from said wire service pursuant to its aforesaid contract, or from any such medium of mass communication."

"And the defendants pray for such other further and different relief as to this court may seem just and proper."

KFAB Scores 'First'KFAB Omaha's Al Bates was the first newsmen from any medium on the scene after an ammunition truck collided with a car carrying four elderly women there, resulting in the loss of four lives. Mr. Bates reached the scene even before firemen. He sent back shortwave reports which were recorded at KFAB, including explo sions for news stories from 105 mm shells which were set off by a gasoline fire. In the interests of public safety KFAB refrained from putting the bulletin on the air until the explosion had subsided, to prevent a rush of the curious to the scene. The station presented a story of the disaster on its half-hour news program that evening and the next evening put a half-hour documentary, including interviews of officials, on the air. The KFAB staff covering the disaster included News Director Carl Uhlarik, Morning News Editor Sam Co hen and Hugh McCoy, Thompson Holz, Ernie Spealman and Wilbert Lewis.
The South's Greatest Salesman — still reaching NEW homes every day

PUT YOUR PRODUCT IN THIS BASKET AND YOU'LL GET:

1 The sales-making impact of the radio station that reaches more Deep South families than any other medium—at far lower cost per family.

2 The continuous backing of WWL's own powerful advertising—24-sheet posters, streetcar and bus signs, newspaper ads that dominate radio pages.

3 Smart, aggressive merchandising support for WWL-advertised products, with big-scale store displays that catch customers while they're spending.

Only WWL gives you intensive penetration through this four-state market humming with new industry... rich with new payrolls... an area still unquestionably radio-dominated.

WWL — leading station in New Orleans night and day—with more listeners now than ever before!*

*Pulse, July-August, 1953

NEW ORLEANS

50,000 watts CBS radio affiliate Clear channel
A department of Loyola University
Represented nationally by the Katz Agency
FIRST VHF FOR PORTLAND, ORE.; TOTAL NINE TVS DEBUT IN WEEK

First tv station in Portland was the nation's original uhf tv outlet, KPTV (TV). Now industry will watch what will come about in market with the addition of new, vhf KOIN-TV.

VHF came to Portland, Ore., to compete with first uhf station in the U. S. KOIN-TV Portland, vhf ch. 6, started commercial last Friday (granted Nov. 2 granted Spr. 15, Nov. 16, repre- sented by Avery-Knodel Inc., WCOC-TV and represented by The Katz Agency, Nov. 16, 1953). WKBW-TV Rochester, vhf ch. 16, started commercial Oct. 25. WASP-TV Oklahoma City, vhf ch. 5, started commercial Oct. 19, represented by John E. Pearson Inc., WROX-TV New York, vhf ch. 7, started commercial Oct. 15, represented by The Katz Agency, Nov. 16, 1953.

Nine new tv stations took the air last week bringing first local outlets to four cities; five other cities received their second and third home stations.

The nine were:

**KIEM-TV** Eureka, Calif., vhf ch. 3 (ABC, CBS, DuMont, NBC), represented by Blair-Tv Inc., WKBW-TV Rochester, vhf ch. 16, represented by Avery-Knodel Inc., KFVR-TV Twin Falls, Idaho, vhf ch. 12, represented by KFVR-TV, Inc., Pocatello.

**KNJU-TV** Houston went on the air with uhf ch. 39 test pattern Oct. 10, and it making its commercial debut this Thursday. Strong signal is being received 40 miles and out, according to George W. Johnston, sales promotion man- ager. Mr. Johnston also reported that there are 27,900 sets capable of receiving ch. 39. WTVH-TV Poeria, Ill., started regular commercial operations on uhf ch. 19 Oct. 12, and held opening ceremony yesterday (Sunday) with shows from three networks. KOY-TV and KCOI-TV Phoenix, sharing ch. 10, will start formal commercial programming Oct. 24. WNOW-TV York, Pa., uhf ch. 49, is due to go on the air today (Monday) with commercial operations. Uhf conversion count now is 30,000.

**KOCY-TV** Twin Falls, Idaho, vhf ch. 5, started commercial Oct. 25.

This is being closely watched because it is the first time that a vhf station has entered an area that already was covered by a uhf outlet.

As this picture shows, the studios and offices of KLIX-TV Twin Falls, Idaho, are nearly ready, although the tv outlet's projected debut is still seven days away. The station will transmit from a butte 14 miles from Twin Falls with a tv transmitter built in a Salt Lake City workshop, says Frank C. McIntyre, KLIX-AM-TV vice president-general manager.

Station Manager Fredric Clair said:

"Stations due on the air in the next 30 days are:

**Arizona**

KIVA-TV Yuma, vhf ch. 11, represented by W. Q. Grant, Nov. 30 (granted STA Oct. 14).

**Arkansas**

KATV (TV) Pine Bluff, vhf ch. 7, represented by Avery-Knodel Inc., Nov. 15.

**California**

KQED (TV) Berkeley-San Francisco, vhf ch. 9, Nov. 1.

**Buffalo Duel**

FLAG duel between the towers of WBES- TV and WBUF-TV Buffalo went into another round when WNYU Thunder-cloud, identified as a full-blooded Mohawk Indian, shinnied to the 428-ft.-above-street-level top of the WBSB-TV tower and unfurled Old Glory. Previously, Confederate sympathizers had flown their standard from the WBUF-TV structure.

**KCKY-TV** Sulare-Fresno, uhf ch. 27 (DuMont), represented by Forrey-Tv Inc., WBNL (TV) Bloomington, uhf ch. 18 (ABC), represented by The Katz Agency, Nov. 16, 1953.

**Colorado**

KLZ-TV Denver, vhf ch. 15 (CBS), represented by The Katz Agency, Nov. 1.

**Florida**

WJDM (TV) Panama City, vhf ch. 7 (CBS, ABC), represented by George P. Hollingsbery Co., Nov. 1.

**Georgia**

WBRB-TV Columbus, vhf ch. 4, represented by Georgia P. Hollingsberry Co., Nov. 1.

**Kansas**

KOAM-TV Pittsburg, vhf ch. 7 (NBC, CBS, DuMont), represented by The Katz Agency, Nov. 16, 1953.

**KWBW-TV** Topka, vhf ch. 13 (CBS), represented by Capper Sales, Nov. 15.

**Louisiana**

KTAG (TV) Lake Charles, uhf ch. 26 (CBS, ABC, DuMont), represented by Adam Young TV Inc., WJMR-TV New Orleans, uhf ch. 61 (DuMont), represented by The Bolling Co., Nov. 1.

**Michigan**

WBBC-TV Andover, vhf ch. 14, represented by Paul H. Raymer Co., Inc., Nov. 15.

**Mississippi**

WCOC-TV Meridian, uhf ch. 30, October.

**Missouri**

**Montana**

KOOK-TV Billings, vhf ch. 2 (CBS, DuMont), represented by Wecker Telecasting Co., Nov. 1 (granted STA Aug. 11).

**Nebraska**

KHOL-TV Kearney, vhf ch. 13, represented by Meeker TtV Inc., Nov. 15.

**New York**

WCHU-TV Ithaca, uhf ch. 30, Nov. 15.

**Ohio**

WXEC-TV Rochester, vhf ch. 16 (ABC, CBS), represented by Everett-McKenney Inc., Nov. 1 (time with WVEG-TV).

**Pennsylvania**

WHTV-TV St. Louis, uhf ch. 36 (ABC-TV, represented by H-R Telecasting Inc., Oct. 26 (granted STA Aug. 25).

**North Carolina**

WAYS-TV Charlotte, uhf ch. 36 (ABC), represented by The Bolling Co., Nov. 1 (time with WVEG-TV).

**Ohio**

WCIC-TV Dayton, vhf ch. 61 (DuMont, NBC), represented by H-R TV Inc., Nov. 1.

**Oregon**

KPRC-TV Portland, vhf ch. 9 (ABC-TV), represented by The Bolling Co., Nov. 30, 1953.

**Pennsylvania**

WLR-Tv Lebanon, uhf ch. 15, Oct. 25.

**WNYP-TV** York, uhf ch. 48 (DuMont), repre- sented by WNYJ-TV Inc., Oct. 19.
...we use the wide angle

Quality representation of a television station calls for sales volume—but much more, too. A station, properly represented, should have at its disposal many services—for its problems include more than those alone of selling time. The representative who performs the job fully brings to it a wide angle outlook encompassing all sales and management situations.

Successful television deserves the complete—not partial—attention of the representative. Without this intensity of effort, the television station fails to get all that it pays for, and should receive.

Our awareness of broad responsibilities...and our sole attention to television only...is the prime reason why Harrington, Righter & Parsons, Inc., is privileged to serve the distinguished television stations listed below.

Harrington, Righter and Parsons, Inc.

New York
Chicago
San Francisco

No newspapers, no radio—television only.
WEWS (TV) Documentary

WEWS (TV) Cleveland last Wednesday was scheduled to show to station executives, newspapermen and set distributors a film, “Right Before Your Eyes,” which it has completed on the past-to-present progress of television in the Northern Ohio area. The 28-minute sound film, which WEWS expects to televise Saturday, features the stories, not only of WEWS, but of nine other or planning competed tv stations in the area. These are WFMJ-TV WKBW-TV Youngstown, WAKR-TV Akron, WICA- TV Ashtonabia, WMAC-TV Massillon (now in pre-construction stage), WERE- TV Cleveland (in pre-construction stage) and WHK Cleveland (applicant for tv), all uhf, and WIXEL (TV) WNK (TV) Cleveland.

Radio-TV Bring Meredith $3,774,386 in Revenues

RADIO and tv properties of the Meredith Publishing Co., Des Moines, brought the firm revenues of $3,774,386 for the fiscal year ending June 30, according to a company annual report. This compares with $2,057,460 radio-TV revenues for the first year ending June 30, 1932. The report was made by Fred Bohlen, president, and E. T. Meredith, vice president-general manager.

This year’s radio-TV revenue figure represents about one-tenth of Meredith’s total revenue of $39,009,361 the past fiscal year, the statement said. Meredith publishes Successful Farming and Better Homes & Gardens magazines. Meredith’s total net income for the past fiscal year was $3,349,153 [B*T, Oct. 5].

Meredith’s application to buy KCMO-AM-FM-TV Kansas City, Mo., for $2.5 million, from Tom L. Evans and Lester E. Cox, was filed with the FCC this month [B*T, Oct. 12].

The publishing firm has owned WHEN (TV) Syracuice since it began in December 1948. It bought WOW-AM-TV Omaha for $2.5 million in September 1951, and KPHO-AM-TV Phoenix in 1952 for $1.5 million.

Radio-TV during the past fiscal year was Meredith’s third biggest revenue source, the firm said, with magazine advertising and magazine circulation revenue first and second, respectively. Broadcasting represented only 6% of Meredith’s fiscal 1952 revenue and only 2% of its 1951 revenues, the statement said.

WJHP To Be Housed In Former Night Club

WJHP-AM-FM-TV Jacksonville, Fla., has purchased for more than $100,000 a lavish, former night club, the Peacock Club on Philips Highway, for its new home.

Built during World War II, the club failed to prosper during the post-war period and was closed down when WJHP-TV officials saw its possibilities as a combined radio-tv outlet. WJHP-TV is expected to go on the air in December.

The building includes a large ballroom, stage, other space and elaborate fittings. It has been described as the plusher of north Florida casinos.

WBRE-TV Shows Admen Commercial Techniques

WBRE-TV Wilkes-Barre, Pa., staged a demonstration of television techniques in producing commercial announcements for the Advertising & Sales Promotion Conference of Northeastern Pennsylvania. The show was incorporated into the station’s regular program schedule as well as being televised to the conference. Manager David M. Baltimore wrote the hour-long demonstration, which was narrated by operations director Franklin Coletti and directed by Fred Foerster.

KMLB Renewal Protested

KNOE Monroe, La., has protested to FCC the license renewal of competitor KMLB Monroe, charging that KMLB has been violating the Commission rules and standards with respect to blanket area limitations. KNOE alleged that it has complained to the Commission since 1959 respecting the KMLB blanket -condition, contending that listeners in the KMLB blanket area particularly cannot tune in KNOE. KMLB is assigned 5 kw on 1390 kc, directional night; KMLB, 5 kw day, 1 kw night directional, on 1440 kc.

WGGA Boosts to 5 Kw

WGGA Gainesville, Ga., boosted its power from 250 to 5 kw and switched from 1240 to 550 kc last month during ceremonies in which important public figures and station personnel participated. WDUN Gainesville will occupy the 1240 kc frequency. Licensed to Blue Ridge Broadcasting Co., of which Charles Smithgall is president, WGGA calls itself “The Voice of Poultryland.”

Silver Dollar—Hot Potato

It’s hard to sell silver dollars, at full or half price—at least that’s what WIBW Belleville, Ill., has found. According to station, announcer Bill Bailey started out with 40 silver dollars and was only able to dispose of four. Mr. Bailey paraded the front’s main street for 30 minutes, offering the coins to 17 persons picked at random for 50 cents each. He sold two for 50 cents, another for 25 cents and a fourth for 11 cents. The stunt was engineered by the Belle- ville National Bank as part of its silver jubilee.

WEKY Goes on Air

WEKY Richmond, Ky., last Saturday was scheduled to begin operations on 1340 kc with 250 w on a 6 a.m. to midnight schedule. Station, owned by Degas I. Boyle, is affiliated with MBS. O. C. Halyard, formerly WLWK Lexington (Ky.) program director, is general manager. Other personnel are Jack Parrish, commercial manager; Bob Dell, with WCSS Columbus, Ind., and WDLB Marshfield, Wis., program director, and Reed Anderson, formerly with WSFC Dornsife, Ky., chief engineer. Studios are in the McKee Bldg. in downtown Richmond.

WGGA Gainesville, Ga., boosted its power from 250 to 5 kw and switched from 1240 to 550 kc last month during ceremonies in which important public figures and station personnel participated. WDUN Gainesville will occupy the 1240 kc frequency. Licensed to Blue Ridge Broadcasting Co., of which Charles Smithgall is president, WGGA calls itself “The Voice of Poultryland.”

Why UHF stations prefer the RCA "1-KW"

- UHF stations can get an RCA "1-KW" when they want it (shipments are being made within 30 days after order).
- RCA UHF engineering experience pays off for YOU. WBRE-TV writes: "Not only are we getting the coverage where we wanted it—WE ARE GETTING COVERAGE FAR BEYOND OUR ORIGINAL EXPECTATIONS!"
- RCA UHF spells Reliability and Simplified operation. WTPA-TV says: "Our TTU-1B operates as reliably as any AM transmitter. It's easy to maintain too—just a routine weekly maintenance and cleaning is all that's needed."
- RCA can supply every UHF accessory you need. WSBT-TV reports: "We like to get everything from one place, work with ONE responsible supplier—RCA."

Your RCA Broadcast Sales Representative is at your service for technical help. Let him get going on your UHF plans.

Exclusive features of the RCA "1-KW"

- You can change power amplifier tubes in LESS THAN A MINUTE
- The only 1-KW UHF with true centralized control panel control
- High Level (PA) modulation for superior linearity and flat response

30-DAY DELIVERY
2 More Advertisers Join WOR-TV ‘Double Exposure’

Ehlers coffee adds its ‘Pulse of the City’ and Conte shampoo its ‘Lilli Palmer Show’ to the WOR-TV plan. Meanwhile, KJH-TV Los Angeles, also owned by General Teleradio, launches the same plan.

WOR-TV New York’s new “double exposure” concept of programming—whereby sponsors of film shows on other stations may put them (including commercials) on WOR-TV without cost—was to be resumed last Saturday, with two additional advertisers participating.

Meanwhile, the same plan has been launched on KJH-TV Los Angeles, which like WOR-TV is owned by General Teleradio Inc., radio-television subsidiary of General Tire & Rubber Co., also owner of Lee and Yankee networks and controlling owner of Mutual.

In New York, in addition to the users of the “double exposure” concept for presentation of their own programs, four advertisers have signed for spot adjacencies—which is where the station makes its money under the plan.

The “double exposure” programs are presented on Saturdays and fall into two groups. One is the “juvenile bloc,” consisting of Wild Bill Hickok at 5:30-6 p.m.; Sky King at 6-6:30 p.m., and Captain Midnight, which will start next Saturday in the 6 p.m. spot. Second bloc includes Man Against Crime at 9-10:15 p.m.; Inspector Mark Saber at 10-10:30 p.m.; Lilli Palmer Show at 10:30-45 p.m., and Pulse of the City at 10:45-11 p.m.

Pulse and Lilli Palmer are the latest “double exposure” entries, sponsored by Ehlers coffee and Conte shampoo, respectively. The former is on WABD (TV) New York and the latter was carried previously on WCBS-TV New York. Of the other programs, Hickok is sponsored by Kellogg Co., which carried it on WABD; Sky King by Derby Foods (on ABC-TV); Captain Midnight by WAND Co., (station spokesman said it had not appeared previously in New York); Man Against Crime by R. J. Reynolds Tobacco Co. (on CBS-TV); Mark Saber by Sterling Drug (formerly on ABC-TV).

Advertisers signed for spot adjacencies were listed as: Northwest Airlines for a 26-second announcement following Man Against Crime, through Cunningham & Walsh; New York Telephone Co. for one minute before Man Against Crime, through BBDO; Wrigley’s chewing gum for one minute following Mark Saber, through Arthur Meyerhoff & Co., and Conte shampoo for one minute adjacent to its Lilli Palmer Show, through Bermuda, Castleman & Pierce.

Refuse Telecast

THE U. of Cincinnati and Xavier U. refused to allow WLWT (TV) Cincinnati to telecast their annual football game last Saturday, citing that they could not “break faith” with the fans who had purchased tickets to the sellout. The refusal came after the NCAA television committee, NBC and General Motors had given the “hearty approval” to WLWT’s request to pick up the game instead of the regularly scheduled Alabama-Tennessee clash.

Church Honors McCollough

CLAIR R. McCOLLOUGH, general manager of the Steinman Stations, last week was elected chairman of the department of radio and television of the Presbyterian Church in the U.S.A. He succeeds the Rev. Theodore F. Savage, who has held the position since 1948. A consultant of the church’s radio-television department since its formation in 1948, Mr. McCollough became a department member this year. Mr. McCollough is a member of NARTB’s television board of directors and has been a leader in radio and television affairs for many years.

WCAN New York Office

NEW YORK office for WCAN-AM-TV Milwaukee is scheduled to be opened Nov. 1 at 347 Madison Ave., with Vice President Alex Rosenman in charge.

Truck Rodeo ‘Stars’

MINNEAPOLIS radio personalities won top honors in the Correspondents Section of the National Truck Rodeo held this year in that area under sponsorship of the American Trucking Assn. Driving passenger cars in the correspondents’ competition feature of the truck rodeo Sept. 25, Dean Sherman of WDGY won first place and the station’s Bill Cleary took third. “Low man on the totem pole” award went to Miss Meredith Woods, assistant to WCCO’s Cedric Adams. Others taking part included Kal Karnstedt and Julian Hoshal, KSTP; Johnny Morris, WLOL, and Merle Edwards, WMIN.

CHECKING the Gates remote transmitter control unit just installed at WCRA Effingham, Ill., one of first in the state, are Jack Arnet (l), general manager, and George Kregotis, chief engineer. Consulting engineer Theodore A. Giles of Fred O. Grimwood & Co., St. Louis, supervised installation.

PEOPLES SELLS WOL TO RAU, DILLON

Appliance dealer and Defense Dept. radio-television man pay $125,000 for the Washington station. Peoples says it is giving up the outlet to make way for larger properties. Sale marks still another transfer of ownership for WOL.

WOL Washington was sold last week by Peoples Broadcasting Co. to two residents of suburban Alexandria, Va., Henry Rau, former appliance distributor, and Charles Dillon, for four years in charge of the Radio-Television Branch, Office of Public Information, Defense Dept.

The sale, subject to usual FCC approval, involved a consideration of $125,000. It was negotiated through Blackburn-Hamilton.

Transfer of WOL ownership marks another in a series of transactions in which the station has changed hands. The present WOL equipment and real estate, originally sold to Peoples in December 1949 by WWDC Washington for $125,000, figured in a transaction by which the Joseph Katz interests moved their WWDC from 1450 kc 250 w to 1260 kc 5 kw. At that time the Katz interests bought physical equipment of the former WOL from Cowles Broadcasting Co. and retained the WWDC call letters in the shift of frequencies.

Herbert E. Evans, Peoples vice president, said the firm sold WOL “in keeping with our desire to acquire larger properties so we can render a broader type of service.” Peoples operates WTTM Trenton, N. J.; WMMN Fairmont, W. Va., and WRFD Columbus, Ohio. It is a unit of the Murray Lincoln Farm Bureau cooperative organization.

Messrs. Rau and Dillon negotiated the purchase as Washington Broadcasting Co. Mr. Rau is president and Mr. Dillon is vice president as well as proposed general manager. They said they both will be active in station operation and properties to emphasize “fast news coverage of the metropolitan area and music to suit general tastes.”

Versatile Radio

WAVE Louisville’s Bob Kay asked listeners what they were doing during his Saturday Night Dancing Party on the station. Some of the 170 answers: A farmer was milking, an embalmer was embalming but enjoying the show, a couple was dancing, another was kissing with the lights out and a girl was putting pictures in a scrapbook. Various men were: Soaking feet, making a book cabinet, eating homemade soup, listening to band practice, doing wife’s housework, cleaning false teeth, guarding an industrial plant and planning to jump off a bridge because of unrequited love. Women were: Ironing, making dressing, rolling up hair and reading the comics and preparing papers to sue for divorce. WAVE’s point: You can take radios anywhere and do anything you want to with them.

1,307 Respond to Test On Frequencies by WQXR

WQXR New York has reported some 1,307 listeners from 18 states and Canada provided the station with information on the high and low frequency responses audible to them on their radio sets.

The data was sent as part of an experiment conducted on the Sept. 13 broadcast of the Adventures in Sound program, which is devoted to high fidelity sound reproduction of music. During the program, test frequencies ranging from a low of 50 cycles to a high of 15,000 cycles were transmitted, and listeners were invited to provide frequency information and to specify whether the test was made on am or fm radios.

The station said 51% of the 1,307 responses indicated the lowest and highest tones were heard. Based on letters received, the station noted, 69% of listeners used fm sets, 22% am sets, and 9% unspecified.

KBTO Slates Debut

KBTO El Dorado, Kan., is scheduled to go on the air late this month with 500 w on 1360 kc using remote control operation, William R. Tedrick, who has been acting general manager, has announced. Bill E. Brown has been appointed general manager by O. A. Tedrick, owner, who also holds interest in KWOC Poplar Bluff, Mo.

Double Reverse

REPAIRMAN Homer Wills, who specializes in refrigerators, found that he was hopelessly swamped with work. In desperation, he bought time on KCNI Broken Bow, Neb., and asked people not to call him. But the advertising in reverse boomeranged. Customers immediately called, noting his advertising, but beseeching him to "work them in too."

WTVO (TV) Claims 90% Uhf Conversion

NINETY per cent uhf conversion total, said to be the highest in the nation, was claimed last week by WTVO (TV) Rockford, Ill., in reporting that the station is "in the black" after five months of operation.

Hal Froelich, sales manager of WTVO, noted that the 90% conversion total is shown by American Research Bureau figures, and pointed out that the station is in the fringe area of seven vhf transmitters. He attributed the high percentage of conversions to outstanding management, programming and promotion, citing the holding of dealer meetings, dinners and public forums on the subject of mass conversions.

Programming Noted

According to Mr. Froelich, WTVO programs from 6-11 p.m. It has 10 syndicated half-hours, all sold to national spot advertisers, plus network ant local programs and a children's show, Fun Time, sponsored by the Dean Milk Co. Mr. Froelich said that Dean reported a 25% increase in milk sales in the WTVO area since starting sponsorship of the show.

The station is affiliated with NBC-TV and DuMont. Its national representative is Weed Television.

Station Shorts

WKJF-TV Pittsburgh, Pa., appoints Martsteller, Gebhardt & Reed Inc. to handle its advertising. Uhf outlet began operation on ch. 53 Aug. 1.

WAUG Augusta, Ga., appoints Robert S. Keller Inc., N. Y., as sales promotion representative in N. Y.

Representative Shorts

WSTV-TV Steubenville, Ohio, appoints Avery-Knodel Inc. as national sales representative.

WSMI Litchfield, Ill., appoints Hil Best as national representative.

Political Rates Cut

RATE for political spot announcements on WKBS Oyster Bay, N. Y., has been cut from $8 to $1, Lee Hollingsworth, president, has announced. The station took the move to increase interest in political broadcasting and to present campaign issues repeatedly.

Buy Christmas Seals

Until and unless it strikes your family, you can scarcely imagine the heartbreaking and despair, the suffering and expense, caused by tuberculosis.

It's not possible yet to "keep everyone safe" ... but you can help answer the little girl's prayer.

Your Christmas Seal dollars work year round in cutting down the tragedy of tuberculosis.

So, please, send your contribution today to your tuberculosis association . . . one of the families helped may be your very own.

Page 62 • October 19, 1953
STATE, NATIONAL OFFICIALS FETE BRAVES AND WEMP

Last home stand of Milwaukee team is scene of festivities sponsored by Association of Commerce; LOOK Magazine presents awards; Gillespie gets plaque.

GOVERNOR of the State of Wisconsin, Walter G. Kohler, helped the Milwaukee Association of Commerce, LOOK magazine; the Disabled American Veterans and the Veterans Administration salute the Milwaukee Braves and Earl Gillespie, WEMP sports Director, for the station's broadcasts of the games. The ceremonies took place during the Braves final home stand of the season.

Before a "standing room only" crowd, Gillespie presented gold watches to Warren Spanh, star pitcher, and Eddie Mathews, National League home run hitter, on behalf of LOOK Magazine.

At a game earlier in the week, Gillespie received a plaque presented by the DAV and the Veterans Administration honoring WEMP for its outstanding service to veterans in connection with broadcasting of the games and public service announcements.

Thirty-six members of the ball club received sterling silver money clips with their names engraved on them. President of the Milwaukee Association of Commerce, I. R. Wittthun paid tribute to its Sports Committee headed by Frederick C. Miller, president of Miller Brewing Co. and sponsor of the WEMP broadcasts. Lou Perini, owner of the Braves and Warren Giles, president of the National League represented the club and organized baseball. Lawrence Timmerman, chairman of the Milwaukee County Board of Supervisors spoke for the taxpayers of Milwaukee County who will have invested about $7,000,000 in the beautiful ball park stadium.

That the Braves games and their broadcasts over a five-state network fed by WEMP were a boon to Milwaukee business was attested to by the Association of Commerce statement, "The publicity and good will which has been spread for our community this year could not be purchased for any amount of money."

With the Braves playing season over the WEMP sports department has turned to play-by-play broadcasts of Green Bay Packers pro football; Marquette University football; University of Wisconsin basketball and Milwaukee Hawks pro basketball. To aid in handling sports programming, WEMP has added Dave Martin, former Big Ten sportscaster, to its staff.

EMPLOYEE-OWNERS WILL OPERATE WEMP MILWAUKEE

New Officers and Directors Named
As Stock Re-alignment Is Announced

A STOCK realignment in the Milwaukee Broadcasting Company, operator of Radio Station WEMP and WEMP-FM and applicant for VHF television Channel 12, has given station employees controlling interest in the company. New officers and directors have been named as a result of the transaction, according to A. M. Spheeris, President.

The stock sale, now awaiting approval of the Federal Communications Commission, was instituted (Sept. 9) by previous stockholders and directors. Glenn D. Roberts, Madison attorney and President of the Milwaukee Broadcasting Co. for the past seven years, sold his stock and resigned as President. Roberts said the press of Madison duties prompted his action.

The transaction increases employee-held stock from 20% to 50 1/2%. Employeeholders are Spheeris, Hugh K. Boice, Jr., John Gagliano, Suzayne C. Cleaveland, Thomas T. Dyson, Rolland E. Paske and Earl W. Gillespie, Jr.

New employee officers and directors are Spheeris; Boice, Vice-President; Mrs. Cleaveland, Treasurer; Gagliano and Dyson, directors. Boice is general manager of the radio station; Gagliano, sales manager, Mrs. Cleaveland, comptroller and Dyson a sales representative. Paske is chief engineer and Gillespie is sports director. Boice, Gagliano, Mrs. Cleaveland, Paske and Dyson have been active in the management of the station for the past eight years.

Other stockholders, under the new alignment, are Mrs. Robert M. LaFollette, Jr., Washington, D. C., widow of former Wisconsin senator, Robert M. LaFollette; Dr. Wellwood M. Nesbit, Madison; Mr. and Mrs. John E. Roe, Madison; W. Wade Boardman, Madison; Mrs. William L. Petrey and Mrs. William B. Dolph, Charlottesville, Virginia; Mid-Continent Radio-Television, Inc., operator of Minneapolis CBS Radio Station WCCO and Television Station WCCO-TV.

Commercial Programs Cancelled to Air Remote of Archbishop rites

WHEN Milwaukee greeted its new Archbishop of the Roman Catholic church recently, WEMP pre-empted several commercial programs in order to bring the colorful ceremony to radio listeners.

The enthronement proceedings of Archbishop Albert G. Meyer were broadcast direct from St. John's Cathedral on the morning of September 24, 1958 exclusively by WEMP.
Here's a TV film series that combines mass appeal with a stirring program content that's unique in television.

The jungle locale... the exciting shots of wild animals... the Hollywood-scaled production—give Ramar pay-off audiences in any time period, against any competition. Ratings like 24.1 in Philadelphia... 21.8 in Detroit... 30.7 in Houston are typical of Ramar performance.

Avoid Identity-Loss with RAMAR

With Ramar, there's no chance of sponsor mix-identification because of confusion with similar program types. There can't be any confusion with Ramar because there's no other show like Ramar on television.

No wonder this TPA package is smashing all distribution records. If you're interested in a sure sales builder, write or wire for remaining availabilities.
starring JON HALL

the only show of its kind in all television

729 Seventh Avenue, New York 19, N. Y. • 1041 N. Formosa Avenue, Hollywood 46, Calif.
Speculation becomes rife once more concerning CBS designs on NBC radio and tv outlets as WBEN-AM-TV Buffalo follows WTAR-AM-TV into the CBS fold, leaving NBC to look to am and tv replacements in New York State's second and the nation's 14th market.

THE leadership battle between CBS and NBC flared anew last week as CBS signed to take over its second major NBC radio-TV affiliation of the year, reviving speculation-dormant since the incipient "revolt" of NBC-TV affiliates was quelled last spring—that CBS also has its sights trained on other top-ranking NBC outlets.

CBS President Frank Stanton announced Tuesday that WBEN Buffalo, affiliated with NBC since 1930, and WBEN-TV, only vhf station (ch. 4) operating or yet authorized in New York State's second largest market, the nation's 14th, were switching to CBS Radio and CBS-TV.

Officials of NBC—which lost WTAR-AM-TV Norfolk to the CBS networks in a signing last spring which became effective in September—said they had no immediate comment on the Buffalo situation other than that they did not yet know what stations would be their new affiliates there.

Observers thought it a good bet that WGR, a primary affiliate of CBS Radio since 1946, might become the NBC Radio outlet. In television, WBUF-TV is in operation on uhf ch. 17 and is affiliated with CBS-TV, ABC and DuMont, while WJRE-TV operates on uhf ch. 59, and WTVF-TV is under construction for operation on uhf ch. 23. Two vhf channels have been allocated there—Nos. 2 and 7—but each is the object of competing applications.

If NBC-TV signs a uhf outlet, observers felt, it probably would launch a high-powered campaign to further uhf set conversions in that area, similar to the one it has been conducting in the Norfolk area where it signed WTAW-AM Hampton (ch. 15) as successor to WTAR-TV (ch. 4).

Effective Nov. 1

WBEN-TV's move to CBS-TV as a primary basic affiliate becomes effective Nov. 1. WBEN becomes a "secondary basic affiliate" of CBS Radio effective at once, but does not take over as a full basic outlet until next June 1. Until that time, when WGR's contract with CBS Radio expires, WBEN can carry only those CBS Radio programs which are not carried by WGR.

Like NBC officials, WGR President and General Manager I. R. Lounsbury—who has long been identified with CBS affiliate-network management relations, having served as head of the Columbia Affiliates Advisory Board—said he had no statement to make about the switch.

WBEN operates a 5 kw outlet on 930 kc. WGR operates with 5 kw on 550 kc. Other Buffalo radio outlets include WKBW (30 kw on 1520 kc), an ABC affiliate; WEBS (2 kw on 1300 kc), affiliated with Mutual, and three independents: WWLO, a 1 kw daytimer on 1120 kc; WVRN, 1 kw daytime on 1080 kc, and WBNY, 2 kw fulltime outlet on 1400 kc.

With the news of the switch of the WBEN stations, which are owned by the Buffalo Evening News, speculation immediately arose as to whether CBS might not have some other affiliation moves in the offing.

The so-called "critical list" of last spring—a group of some seven NBC radio-TV affiliates which at the time were reported considering moves to CBS—was quickly recalled. The Buffalo stations at that time were on the "critical list"—a list that seemingly ceased to exist after Brig. Gen. David Sarnoff, board chairman of RCA and NBC, made his now-famous Princeton speech that snuffed out any signs of revolt among the NBC Television affiliates.

WHAM Stopped Guessing

The WTAR stations, also on the "critical list," had signed with CBS before the affiliates' meeting with Gen. Sarnoff. Walter Damm of WTMJ-AM-TV Milwaukee, which also had been deemed a switch-over possibility, was a leader in rallying around NBC after its plans had been detailed by Gen. Sarnoff, and any "revolt" that may have been threatened was considered gone when WHAM-AM-TV Rochester clearly took itself out of the "critical" category a short time later by renewing with, and publicly reaffirming its confidence in, NBC.

Last week, however, it became clear that CBS authorities had continued working—at least on the Buffalo stations. They would not confirm or deny that they also were at work on others. But in some quarters it was considered a strong possibility that they might have an eye on, say, General Electric's WQY and WRGB (TV) Schenectady, among others, al-
though GE authorities gave no indication that a switch was contemplated.

CBS President Stanton, in announcing the WBEN stations' moves, said that "for the CBS Radio and CBS Television networks, the new affiliations represent the best possible facilities in the second largest market in New York State and the 14th largest in the country. It is a market which has long had virtually 100% radio set ownership, and which has so recently changed the medium of television, that after only five years 85% of its homes already have television sets.

"These new associations follow by less than a month after the important transfer of the leading stations in Norfolk, Va., to CBS Radio and CBS Television.

"We believe that this news in both markets illustrates the leadership of CBS Radio and CBS Television in the broadcasting industry, and expresses the confidence of stations that these networks will continue to bring to listeners and viewers the finest entertainment, the most compellingly heartening and the most stimulating personalities of the day."

NBC Radio Signs $7 Million In New Business, Renewals

NBC Radio Network has signed $7 million in new business and renewals in the last six weeks, William H. Finesshifer Jr., vice president in charge of the network, reported Wednesday. New business accounted for $1.75 million while renewal business, he said, listed Miles Labs, Hexol Inc., Lewis-Howe Co., Stewart-Warner Corp. and Socony-Vacuum Oil Co. as those placing new business with NBC since Sept. 1. Coupled with the $18 million worth of business signed in the 60-day period ending Aug. 14 [8*7, Aug. 17], this brings the NBC Radio Network's gross billings in new and renewed business since mid-June to a total of $35 million, of which $3,750,000 is new business, acquired since the radio network was set up as a separate entity.

Mr. Finesshifer said the new business "is particularly heartening to us since it comes at a normally slack period of the year, after most budgets have been allocated. It is not only additional evidence of the advertisers' confidence in the NBC Radio Network as an advertising medium, but a direct result of our new programming and development of new merchandising concepts to insure the greatest value for the sponsor's dollar."

Van Volkenburg Sees Color Demand

Advertisers will want color tv more than they now want color in magazines, CBS-TV President J. L. Van Volkenburg tells CBS-TV affiliates at New York color clinic.

ADVERTISERS will want color television even more than they want color in their magazine advertising, J. L. Van Volkenburg, president of CBS-TV, predicted in a speech to 141 executives of CBS-TV affiliates at the network's closed clinic on color in New York on Oct. 9 [8*7, Oct. 12].

He said this is true "not only because of what color will do for their products, but because their customers will want television even more than they do today—and they'll spend even more time with it." His prediction followed his observation that "American business regards color as so important that last year, for example, two out of every three advertising pages of Life magazine appeared in color—and at premium rates as high as 50% over black-and-white."

Reviewing CBS-TV's coloring p l a n s , which also were detailed by CBS Inc. President Frank Stanton, William H. Hylan, vice president in charge of television network sales, said that "once a color network is a reality . . . we plan to schedule and offer for sale on a multiple sponsorship basis a limited number of daytime programs which will provide not only good advertising value in black-and-white, but experience (and ever increasing circulation) in the color medium as well."

Mr. Hylan, noting that one of CBS-TV's large audience studies is currently being converted for color use, said every CBS-TV client would get a chance to have his program originated in color.

"Although no specific charges have yet been determined," he continued, "every effort will be made to limit costs, over and above existing costs to the advertiser for black-and-white television, to a bare minimum."

In another of the clinic addresses, from which excerpts were released last week, CBS-TV Engineering Vice President William Lodge cautioned stations against holding back until color is more fully developed. "CBS Television has satisfied itself that NTSC color will gradually move into American homes, and we want to move in with it," he said.

"CBS Television intends to spend several million dollars in facilities and in broadcasting during the initial growth period. And we sincerely hope that CBS Television affiliates will find it desirable to make the smallest expenditures involved in equipping their stations to transmit properly network color programs."

(At the close of the clinic, which included a demonstration of CBS' new color developments—the Chromascoder and one-tube Chromaducer and nothing else that your staff cannot do on the CBS-Columbia color set—these affiliates went on record with a resolution lauding CBS for "meeting the challenge of color television" and for having "again demonstrated its leadership in broadcasting," and pledged "full support in making color television a nationwide reality for the near future.")

Hubbell Robinson Jr., CBS-TV vice president in charge of network programs, outlined promising aspects of color, on which he said is "probably the most miraculous single new development" in the history of the entertainment business.

Merle Jones, vice president in charge of stations and general services, said that analytical market studies of color set production and sales indicated that "one generalization that can be drawn . . . is that transition will be orderly, and that there is some possibility of color dominating the market for new sets as early as 1957."

E. Carlton Winkler, CBS-TV production manager, said, "There is nothing that is impossible in the field that your staff can learn to do with the same skill and ease with which they now handle black-and-white."

John Hayes, president and general manager of WTOP-TV Washington, appraised the significance of color tv to local broadcasters and said that color would quickly attract department stores into heavy use of television.

The workings of the color system were explained in a short, non-technical talk by Peter Goldmark, CBS Labs vice president, and long a key figure in CBS color developments.

NBC-TV to Colorcast Pasadena Rose Parade

TENTATIVE plans for tv coverage of the Pasadena Tournament of Roses parade on New Year's Day include use of two color and three black-and-white cameras during the approximately 90-minute telecast from the top of the Tournament of Roses, Antelope, Calif. This was announced last week in Hollywood by Barry Wood, NBC-TV coordinator of color, and Roy Neal, network West Coast supervisor of news and special events.

Mr. Wood, in Hollywood to familiarize West Coast personnel with the color tv situation, said of the parade coverage, "The telephone company has assured us we'll have a West-to-East line converted to color by that time. Two of our remote trucks will be driven across country to make the pickup in Pasadena."

According to Mr. Neal, the exact starting time for the telecast locally and nationally, and coverage of the colorful mustering area. Present plans call for national viewing, sponsored by Woolworth Co., to go on the air at 12:15 p.m. EST for approximately 90 minutes. Although the parade video will be both in color and black and white, commercials will be only in black and white, he said.
SARNOFF, FOLSOM SELL RCA STOCK
IN RESPONSE TO 'FINANCIAL PRESSURE'

Board chairman and president of RCA dispose of three-quarters of the 150,000 shares they acquired under an option early this year. Both say they sold to cover loans negotiated for the original purchases.

BRIG. GEN. David Sarnoff, RCA board chairman, and Frank M. Folsom, president, reported last week that financial pressures forced them to sell three-fourths of the 100,000 and 50,000 shares of RCA common stock that they respectively had purchased under restricted stock options.

The stock was purchased in February, both men reporting that they had been obliged to borrow money from the banks. They said they had hoped to have their personal loans extended, but pointed out that "there has been a material change in financial markets" since the loans were obtained and that, accordingly, it became necessary to substantially reduce the amounts outstanding.

- Nationally Honored
- HELENE DILGER
  Winner U. S. Department of Agriculture
  Award for Superior Service

NOW CONDUCTS "TODAY'S COOKING"

Homemaker's program—Today's Cooking—10:00-10:30 a.m., Monday through Friday, has proved such a big-time telecast that WOC-TV proudly announces appointment of a big-time home economist, Helene Dilger, as conductor of this series.

Helene Dilger has been a home economist for 24 years. She is winner of many awards including:
1. In May, 1950, the U. S. Department of Agriculture honored her with a certificate for superior service in home economics extension work.
2. In 1946, the Iowa Home Demonstration Agents Association named her the outstanding Iowa home economist of the year.

Miss Dilger knows how to help housewives plan interesting and appetizing meals . . . her years in food demonstration work enable her to show an advertiser's product to its best advantage. She has learned her sales technique through years of talking before women's groups . . . and her telecasts are both friendly and authoritative.

Helene Dilger brings new selling punch to "Today's Cooking"—a series that has already proved itself as a good sales vehicle. For further facts about "Today's Cooking," and Helene Dilger, see your nearest F & P man, or write us direct.

Page 68 • October 19, 1953

The shares were bought at $17.75 each, the price established in the option agreement approved by the RCA board in November 1950 and by the RCA stockholders at their annual meeting in May 1951. For the total 150,000 shares, this represents an outlay of $2,418,750.

Gen. Sarnoff sold 75,000 shares and Mr. Folsom 37,500 on Sept. 22 in private transactions at what was said to be approximately two points under the $23.50 at which RCA common stock closed on that day. At $21.50, Gen. Sarnoff's shares would have represented $1,612,500 and Mr. Folsom's, $806,250, for a total of $2,418,750.

Gen. Sarnoff said he now owns 30,000 shares of RCA common—25,000 acquired under the option and 5,000 acquired previously—and that "this represents substantially all my life savings." Mr. Folsom said he owns 13,000 shares, of which 12,500 are from the option acquisition and 500 were acquired before, and that in his case, too, "this represents the major part of my life savings."

Both Gen. Sarnoff and Mr. Folsom made clear their faith that RCA stock "is, and will remain, a sound investment," and said they intend to retain their present holdings for investment.

The sales were reported in letters sent by the two executives to the RCA board. The letters were as follows:

"Gentlemen: On November 30, 1950, the Board granted Mr. Folsom and me restricted stock options on RCA Common Stock. These options were approved by more than 93 per cent of the votes cast by the RCA stockholders at their Annual Meeting on May 1, 1951. In February, 1953, I exercised my option in full.

"All of this information has previously been reported both to the Board and to the RCA stockholders. The purpose of this letter is to report or bring to your attention my having exercised my option in February, 1953, in order to purchase the stock under the option I was obliged to borrow a substantial sum of money. It is also to disclose that I have never been a wealthy man and I would not have been able, without such borrowing, to exercise the option in full before it expired in 1955. I therefore obtained personal loans from banks and I have paid back that it would be possible for me to have these loans extended.

"It has always been my intention to retain a substantial amount of RCA stock as an investment. Mr. Cahill (John T. Cahill, board member and attorney) in answer to a question by a stockholder at the May, 1961, Annual Meeting of RCA stockholders correctly stated that I retained my position when he said that, to the extent that my stock was not sold, there would be a payment obligation of $2,662,500. When I telephoned Mr. Cahill on May 21, I learned that my position had been changed and that my loans are now in the hands of a financial institution. As you know, there has been a material change in the mortgage markets since February, 1953, when my loans were obtained. As a result, it became necessary for me to seek to have the loans extended and to dispose of a part of my life savings in the hope that it would be possible for me to have these loans extended.

"As you know, there has been a material change in the mortgage markets since February, 1953, when my loans were obtained. As a result, it became necessary for me to seek to have the loans extended and to dispose of a part of my life savings in the hope that it would be possible for me to have these loans extended.

As a result, it became necessary for me to seek to have the loans extended and to dispose of a part of my life savings in the hope that it would be possible for me to have these loans extended.

Sincerely,
David Sarnoff"

"Gentlemen: I have read General Sarnoff's letter of October 1 to you and I write this letter to report on matters relating to the stock option granted to me which have occurred since February, 1953, when I exercised the option in full.

"As is the case with General Sarnoff, I also am not a wealthy man and, in order to exercise my option in full before its expiration in 1955, I was obliged to obtain personal loans from banks. I too hoped that it would be possible to have the loans extended.

"It was always my intention to retain a substantial amount of RCA stock as an investment and the statement made by Mr. Cahill at the May, 1961, Annual Meeting of Stockholders, re-
In Washington, D.C. . . . EVENING IS EVEN BETTER
particularly over WWDC, Washington’s Personality Program Station

It’s an eye-opener but it’s true— evening radio time is even better than early morning which is indisputably a splendid value considering listeners per set, audience turnover and family-type audience.

For example, a survey* made in Washington, D.C. of the three hour periods 6:00–9:00 P.M. versus 6:00–9:00 A.M. Monday through Friday produced this astounding comparison:

40% higher average ratings on WWDC in the evening.
2% more sets in use in the evening.
16% more listeners per set in the evening.

The figure for sets in use at night is especially arresting because Washington, D.C. is a mature television market, and a city where early rising hours have contributed to greater radio listening in the morning.

And Washington, D.C. is just one of many other markets across the nation—again including mature television areas—where evening radio offers a much bigger audience than early morning, and a much lower cost per thousand for advertisers.

All percentages point to evening radio as today’s best buy. Advertisers and agencies who want to get the most for their money can get detailed proof of this statement simply by calling their John Blair man today!

*Source: The Pulse of Washington, July-August, 1953

This is one in a continuing series of advertisements based on regular syndicated audience measurement reports. To achieve a uniform basis of measurement, the radio stations chosen for this series are all John Blair-represented outlets . . . all in major markets.
Hi-Fi Gear Draws Crowds
At New York Audio Fair

LATEST developments in high-fidelity sound equipment were displayed last week in New York as the fast-growing hi-fi industry held its fifth annual Audio Fair at the Hotel New Yorker. Fortified with such industry names as RCA Victor, General Electric, Philco, Zenith, Hallicrafters, Webster, Columbia Records and Stromberg-Carlson, the fair drew thousands of manufacturing delegates as well as an estimated 25,000 public viewers.

The vastly increased interest in equipment designed to bring high-quality sound to the public via radio, TV and recording devices was reflected in the enlarged space devoted to the fair and the close attention paid to the amplifiers, pickups, speakers and other gear. Four floors of the hotel were devoted to exhibits. The fair was held in conjunction with the fifth annual convention of the Audio Engineering Society.

Exhibits showing binaural sound, with two speakers fed by double sound tracks, were focal points for fair delegates. Several of the major manufacturing firms showed high-fidelity lines for the first time.

WQXR New York was the only radio station exhibiting at the fair. Its room featured high-fidelity equipment reproducing the station's programs.

Papers giving details of latest high-fidelity developments were read at the engineering society's proceedings.

FM MULTIPLEXING SYSTEM UNVEILED

Maj. Armstrong demonstrates simultaneous transmission of programs. Method would allow dual use of each channel.

SIMULTANEOUS transmission of two programs broadcast within a standard fm band of 200 kc was successfully demonstrated Tuesday at Pupin Physics Labs Bldg. on the campus of Columbia U. in New York in the first public showing of a system of fm multiplexing developed by Maj. Edwin H. Armstrong, professor of electrical engineering at Columbia and inventor of the fm system of broadcasting, and John Bose of the U's Marcellus Hartley Research Labs [B&T, March 23].

The demonstration was presented before the Radio Club of America and the Audio Engineering Society at an evening meeting at which the multiplexing process was described in a technical paper, "Some Recent Developments in the Multiplexed Transmission of Frequency Modulated Broadcast Signals." An advance demonstration was given in the afternoon at a news conference at which Dr. Armstrong informally explained that the main result of the multiplexing system is to permit a secondary use of each regularly assigned fm channel, making possible the use of broadcasting for services previously restricted to wirelines by the scarcity of frequencies in the radio spectrum.

The second channel might, he said, be devoted to a succession of special services, each of interest to, say, 20% of the total audience, who could never be given these services via the main channel, as the broadcaster could not afford to alienate 80% of his listeners to please 20%. Market news was cited as one such service; binaural musical broadcasts as another, and one for which multiplexing is peculiarly fitted as binaural recordings can be broadcast most easily from a single control room when two channels are available.

Tested Several Years

The system demonstrated, which has been tested for several years at KE2XCC, Maj. Armstrong's experimental fm station at Alpine, N. J., "is based on new modulation methods in which the modulation functions for the different channels are performed in separate parts of the transmitting system, so that one channel is protected from the cross-modulation effects of another and so that noise effects originating in one channel are prevented from straying across into and adding to the noise level of the other channel," Maj. Armstrong said.

The subcarrier frequency used is 27.5 kc and it in itself is frequency modulated by the program of the second channel, he said. "At present, an 8 kc modulation range is employed on this channel and at the limit designated by the FCC of the service range of an fm station, the receiver will give on the second channel a signal-to-noise ratio that is the equal of the FCC standards for the signal as it leaves the antenna of the transmitting station."

The demonstration began with the reception of two musical programs for KE2XCC, one broadcast on the main channel, the other originating at WASH (FM) Washington and fed by land line to KE2XCC, which rebroadcast it on the second channel. There was no audible difference in quality between the two programs, as the operator of the receiver (with 13 tubes for the main channel, six for the side channel) switched from one program to the other.

Next, binaural transmission was demonstrated, programs binaurally recorded being broadcast from Alpine for simultaneous dual reception. The third demonstration contrasted a program originating at WALK (FM) Patchogue, L. I., picked up on an fm receiver at Alpine and rebroadcast on the second channel, with an Alpine-originated program on the main channel. No interference was audible.

Another Demonstration

Another example was a program broadcast by a 50 kw New York am station (unidentified except that it was the one whose transmitter was nearest Bayport) and the same program, broadcast concurrently by that station's fm transmitter and picked up and rebroadcast on...

KNOE-TV Monroe
Covers "Television Starved" Shreveport

KNOE - TV
Monroe, Louisiana

Gentlemen:

Thank you.

Not just for coming on the air with a new station, even though this is important to television-starved Shreveport, capital of the ultra-fringe area of the United States,

Not just for coming on with an immediate array of first line, high quality programs instead of the usual heavy diet of public service films and old movies that we have come to expect of a new operation,

Not for using more than one camera to provide a variety of angles and for obtaining from heaven knows where cameramen who are clearly qualified,

Not for having a man in the control booth who apparently knows exactly what he is doing (and may I say that unless one has watched and suffered through a new operation while a new control man learns his job, unless one has grown accustomed to inverted and reversed advertising and station break slides, long blank spaces in the picture, and announcers and performers left with their faces hanging low after the picture should have been cut-unless one has experienced this, it is hard to appreciate the satisfaction of watching a competent control booth in operation),

Not just for any of these things in particular, but a little bit for all of them, do we again say

Thank you.

W. D. Whitley

the second Alpine channel. Here there was plenty of contrast. The am program was received with a noticeable and annoying background of static plus snatchers of dialogue from a Spanish-language station; the second channel fm repeat was clear as a bell.

Finally, the same comparison was made except that this time the Bayport reception of the am and fm broadcasts of the same program was recorded on a stormy August night. The static this time was noticeable and annoying in the average home; the fm second channel rebroadcast was unaffected by the weather.

"We've now proved," Maj. Armstrong declared, "that fm's second team can lick am's varsity."

**Gates Ships Three**

GATTS Radio Co., Quincy, Ill., last week announced shipments of radio transmitters to WVOS Liberty, N. Y. (250 w replacement unit); WMVO Mount Vernon, Ohio (500 w), and KBTO El Dorado, Kan. (500 w).

**CBS-Columbia & Transistors**

SUCCESSFUL use of transistors in its production test equipment was reported last week by CBS-Columbia Inc., radio-tv manufacturing subsidiary of CBS. David H. Cogan, president, said that CBS-Columbia is using transistors in high-gain, low-level voltage amplifiers, together with uhf signal generators and auxiliary equipment.

**DuMont, GE, RCA Ship Tv Equipment**

COMPLETE microwave equipment was shipped last week by Allen B. DuMont Labs. to KVEC-TV San Luis Obispo, Calif. (ch. 6); KVTH (TV) Hutchinson, Kan. (ch. 12); KERO-TV Bakersfield, Calif. (ch. 10), and KTYL-TV Mesa-Phoenix, Ariz. (ch. 12).

DuMont has also shipped a 1 kw uhf ch. 39 transmitter to KNUZ-TV Houston, Tex., and has sold a 1 kw uhf ch. 49 transmitter to WNOW-TV York, Pa.

GE shipped 20 kw amplifiers to KTTV (TV) Los Angeles (ch. 11) and KGO-TV San Francisco (ch. 7). Shipped also was a 12 kw amplifier to WJHP-TV Jacksonville, Fla. (ch. 36), and a 1 kw amplifier to WOSI-TV Oshkosh, Wis. (ch. 48). A 100 w transmitter was shipped to WKAR-TV East Lansing, Mich. (ch. 60) and to KSTM-TV St. Louis (ch. 36). GE also shipped a four-ray helical antenna to WUTV (TV) Youngstown, Ohio.

RCA shipped a 1 kw uhf ch. 58 antenna to WRTV (TV) Asbury Park, N. J., and two 10 kw uhf transmitters to KOAM-TV Pittsburg, Kan. (ch. 7) and KFYR-TV Bismarck, N. D. (ch. 5).

**Federal Promotes Frabbutt**

J. A. FRABUTT, manager of sales to government agencies for Federal Telephone & Radio Co., an IT&T Division, Clifton, N. J., has been appointed general sales manager of Federal. He joined the company in 1939 as a radio engineer and until his assignment to sales activities was associated with the technical development of airplane instrument landings and other navigational aids.

**Eight Get Remotes**

EIGHT complete remote control systems were shipped by Gates Radio Co. during the Oct. 5-10 period, L. J. Cervone, general sales manager, reported last week.

Hooper, Pulse and Standard Audit & Measurement Survey unanimously acclaim WREC as Memphis' most listened-to radio station. Survey after survey confirms this fact. Join the list of advertisers who gain "better half" coverage of both the rural and metropolitan audience in the $2 billion Memphis market with a single schedule on WREC. Surprisingly, rates are 10% LESS, per thousand listeners, than in 1946! Call your Katz man now!
LOCAL live television programs have the most selling power in Los Angeles that means KTLA.

KTLA has more top local live programs than any other television station in Los Angeles.

KTLA, its programs and its personalities won 8 out of 21 awards for POPULARITY this year . . . that is twice as many as any other television station received and more than any other two Los Angeles stations put together.
The influence of farm radio:

**Survey Shows Listener Loyalty**

MORE than half the members of the California Farm Bureau Federation listen to the Bureau's *Voice of California Agriculture*, broadcast five mornings a week (6:30-45) on seven radio stations. These results and others are indicated in a survey conducted by the Bureau among 5,000 of its members, according to Milton L. Levy, general manager of KLX-AM-FM Oakland, where the farm program originates.

Of the 300 specialty crops for which California farmers received $2.7 billion in 1952, tops in the nation, Farm Bureau members produced 80%, according to Mr. Levy. The Farm Bureau, which felt that a broader, regional daily radio program was needed in addition to coverage by individual stations, several years ago started the *Voice* program.

**Weather, Market, Crop Reports**

Conducted by Bért Buzzini, the Bureau's radio director, *Voice* is a complete farm news program with a state-wide weather report, market news, crop reports and important industry matters, plus information for members. Last September *Voice* was voted the top California agricultural program at the state fair, and Gov. Earl Warren (now U. S. chief justice) presented the program a plaque for "pre-eminent public service."

Of 5,000 questionnaires mailed to Bureau members, 740 were returned, representing replies of 14.8%, more than the 10% needed to take an accurate sampling, Mr. Levy said. Of the 372 families (50.2%) who said they listened to the program, some 58.5% said they "listened yesterday" to *Voice*, 31.1% listened "last week" and 6.7% "last month." There were 2.39 listeners per Farm Bureau family.

*Replies indicated listeners in 48 of the 53 California counties having Farm Bureaus. Questionnaires were allocated to 49 counties. The program, originating at KLX (5 kw), goes to KFBK Sacramento (50 kw), KFRE Fresno (50 kw), KMPC Los Angeles (50 kw), KFXM San Bernardino (1 kw), KBD Santa Barbara (250 w) and KXO El Centro (250 w).*

**Two-Year Audience Increase**

The survey showed a 7.9% listenership gain over a similar study in 1951. Percentage of listeners by stations were KFBK (31.7%), KFRE (30.7%), KLX (12.9%), KMPC (10.4%), KXO (5.1%), KFXM (2.9%) and KDB (1.7%). There was overlapping coverage in some areas.

The study, which showed that 50.2% of California's 64,559 Farm Bureau families listened to *Voice*, would indicate that the total audience is 74,455, based on 2.39 listeners per family. Of this total, 43,556 would be among those listening every day.

The three current contributing advertisers on *Voice* were correctly identified by respondents, in a sponsor identification test question, as follows: Cal-Farm Insurance Co. (78.2%), General Petroleum Co. (67.1%) and Bank of America (63.1%). Others listed on the questionnaire received these percentages: Sears, Roebuck & Co. (16.3%), J. C. Penney (16.1%), Safeway Stores (14.2%), Anglo California Bank (4.3%), County Mutual (3.2%) and Bank of California (0.008%).

KSD-TV thinks spot news can be made more comprehensible on TV than on radio—if simple but effective visual aids are used. The station has borrowed the “illustration” techniques of newspapers and magazines to add meaning to its TV news stories by use of pictures.

Making TV News Understandable

By Richard M. Weiss

IT IS possible to telesact real news in a way that is easier to understand because it is on television. Television news can be easier to understand than radio news. It can be easier to understand than newspaper news. Usually it is not.

Usually, when the news telesact does not consist of an announcer's face on video and a radio newscast on audio, it is made up of newsgreel of day-old or week-old news or—worse—something that never was news at all but that happened to be scheduled at a place and under conditions that made sound film easy to get. Films of style shows, publicity stunts, bathing beauties, Boy Scout Jamborees, cornerstone layings, block par- ties and testimonial dinners can be made into interesting programs—we use them our- selves—but they do not make newscasts, no matter how much money networks, newsreel syndicates or local stations spend to get them.

It was shortly after Paul W. White con- cluded in a BROADCASTING • TELECASTING article that "Spot News Is Better on Radio" (Feb. 9 issue) that we at KSD-TV decided to demonstrate, to the contrary, that spot news is better on television.

We started with two cardinal rules: The most important news of the day should be covered as completely as possible in the time allotted to the newscasts. There should be no production on the screen that does not help the viewer understand the news item.

We do not include any news item just because we happen to have a picture of it, still or moving. An item on our spot news- cast has to be more important than any item left off it. That is one of the most ob- vious rules conceivable, but it is more viol- ated than observed in most television newscasts across the country. Going a step fur- ther, we allot time to items of our spot-news telecasts in proportion to their importance, compromising only to the de- gree that some stories of somewhat lesser im- portance must be told in some detail to be understandable.

We don't put a picture or a film on the screen for the sole purpose of getting the newscaster off the screen. A still picture of a man who has made news does not illustrate what he has said or done. It only distracts the viewer, who sees one thing and hears another. We also concluded that a moving picture of a man saying, or even doing, what has made the news often fails to tell the story as it should be told.

Sensible Summarizing

When President Eisenhower proposes a five-point tax program, it may be possible to get a sound newscast of the President making the proposal—that is, if you are not so far from Washington that the film will not arrive until a day or two late. But Mr. Eisenhower speaks for half-an-hour or more, and we want to tell the story in 90 seconds, or less. His own words, in his own voice, can be abridged, but they cannot be made into a clear summary. It is much better to sum- marize his words in a statement written by our own news staff specifically for television. We can help the audience understand the points by using just about the simplest tele- vision technique there is: List the points on a sheet of paper and telecast the list. Point to each item as it is discussed.

It is easier to make a statement under- stood by showing it in print at the same time that it is stated by word of mouth. That is the reason that same technique is used with such great frequency on television commercials.

Speaking of commercials, how many graphs have you seen purporting to prove that "our" product is many percentage points better than products A, B and C? How many television newsmen have argued that the public does not understand graphs and charts? At KSD-TV our newsmen cast

Mr. Weiss is on the news staff of KSD-TV St. Louis, owned by the St. Louis Post-Dispatch.

Page 78 • October 19, 1953
When possible, KSD-TV shows audience actual item making news. Here newscaster Del King holds issue of American Mercury that carried article on communism in churches that cost J. B. Matthews, its author, his investigating job with McCarthy committee.

Maps can be animated by flipping over sheets of clear acetate, hinged to top of mounting board with masking tape. Markings on acetate overlays can be changed within seconds of air time. KSD-TV sets deadline for any production device at moment it goes on camera.

When U. S. and Spain signed pact to give U. S. bases, KSD-TV used map with two acetate overlays, one showing naval bases (circles), the other showing air bases (stars). Bases were indicated with pointer by newscaster as he explained where each was and its importance.

A simple but effective way to show rise in cost of living index illustrating story on that subject is this. Point to be made was that an article costing a dollar in the base period, 1947-49, cost a dollar and 15 cents in August 1953.
Making TV News Understandable  
(Continued from page 78)

had rocks. The “breeding” of atomic fuel is not too different. The props required for the demonstration are a piece of coal and a rock for the newscaster to hold in his hands and to indicate as he compares them to atomic materials. The cost of the production is nothing.

We have found at KSD-TV that we do not need a crew of artists and prop men for our news productions. We need only a newscaster with imagination and energy and a newscaster with sufficient poise to use gestures as he speaks. Smaller stations might be able to combine the two jobs.

There is nothing very tricky or difficult about drawing graphs and maps and animating them. Anyone with two hands and ten fingers can make a presentable map by tracing it through onion skin paper with a speed-ball pen. Lettering can be handled with stencils. We have prepared clear, neat, animated maps in as short a time as ten minutes.

We animate our maps and graphs by stapling them to cards and hinging clear sheets of acetate to the top with masking tape. The transparencies are flipped over the map or graph as cued in the script. We mark the acetate with china-pencil for simple lines or lettering. For more involved animation we use pressure-sensitive tape or rubber cement to attach names, arrows or anything else to the acetate.

KSD-TV subscribes to a wire picture service and a syndicated newsmagazine service. We use both extensively on some programs but only in a very limited manner in our spot news programs. Occasionally we get a newsmagazine clip that is both timely and apt. Once in a while wirephotos are worth using. We usually animate still pictures by panning across the picture. We maintain a large library of stills for occasional use where appropriate, e.g., “This is the type of plane that crashed.” We also animate stills with acetates or superimposition when appropriate.

We get our productions on and off the screen in a hurry. No one is going to stare very long at a map or chart. If they are as simple as they should be, 15 seconds will give enough time to understand them. Occasionally, on a major story with several acetate flips, the production may run as long as 30 seconds.

What is the result? We have a ten-minute daily spot-news telecast that has a film clip once or twice a week, an occasional still picture, one or two maps most days—always animated—a couple of charts most days, many of them animated, an occasional graph, always animated. The announcer is on camera about half the time, but rarely for more than one minute at a time.

The audience is interested. It is informed better than it could be in ten minutes listening to the radio or ten minutes reading a newspaper. It learns the top news of the day in an interesting way.

Test for Television:  
Toy Sales in January

“YOU CAN’T follow Santa Claus” is the running play in the toy industry. Yet one firm did it— with television. Employing the medium in a unique post-Christmas campaign last year, the Playskool Mfg. Co., Chicago, achieved such conspicuous success that, as a direct consequence of the effort, the company is now devoting 35% of its overall budget to TV and expects to expand even further next year.

It all started last January when Playskool decided to test television. The firm deliberately chose a notably weak selling period for toys, January, after the climactic Christmas push, and launched The Pioneer Playhouse on WCAU-TV Philadelphia Saturday mornings, 10:30-11 a.m., on Jan. 24, for its Lincoln Logs.

The impact of the Philadelphia test series was so exceptional that Wanamakers reported a 500% increase during the period of the program.

One jobber of toys revealed that during February he totalled 68% of his entire 1952 business on Lincoln Logs.

The show opened with a Pulse rating of 4.0, and five weeks later had virtually doubled the rating to 8.0. This gave the program the highest pre-noon children’s show rating in the area and made it one of the top TV shows in recent Philadelphia history. Nearly one out of every ten sets in the region, figures proved, was tuned to Pioneer Playhouse. The show also achieved a rating almost double that of shows seen on other stations in the area at the same time— one of them a top network children’s program.

The format of the show featured a host, named Patches, plus an incorporated Gene Autry television series seen for the first time in that area. As an added means of selling the product, Playskool inaugurated the "Lincoln Logs Building Contest," worked out in cooperation with local toy and department stores. The contest was opened to local youngsters from 6 to 10 and applications were distributed through stores which forwarded them to the station.

Five youngsters were chosen to appear on the show each week and build structures from Lincoln Logs. The contest began at the outset of the program and winners were announced at the show’s close, with attention also focused on the contestants during the program’s half-point break.

The contest, originally conceived as a selling device, developed into the show’s chief attraction, with a flood of applications pouring in from stores every week. The contest also won the admiration of noted educators who saw in this demonstration an admirable use of TV as a means to encourage youngsters to play constructively.

On the basis of its success in Philadelphia, Playskool arranged to take the show to Chicago effective Oct. 9. As with the earlier package, the program is hosted by a local television personality, in this case Bob Atcher, a Chicago cowboy character, who will fill in with tales and tunes of the Old West in the intervals between the Gene Autry film serial, The Phantom Empire.

The Lincoln Logs building contest, in which five local youngsters between the ages of 6 and 11 build log projects before the TV camera, will be repeated as the commercial part of the program. Each week the juvenile contestants, whose applications to appear will have been submitted through cooperating toy and department stores, will compete for top prize of a bicycle, a watch and other awards including Playskool toys and Appleton Juvenile furniture.

Patches, star of Pioneer Playhouse, demonstrates Lincoln Logs.

A personal appearance tour in some of Chicago’s major department stores will be booked for Bob Atcher.

In addition, at the ABC theatre, the star will give three special shows on Thanksgiving Day. Tickets for this performance will be available at Chicago toy stores, thus giving the smaller merchants a chance to benefit promotionally from the program.

Tom Grimes, advertising manager for Playskool, told B&T that “we are all gratified with the results of our Philadelphia television show and we are watching with a great deal of interest the results of the expanded fall program. In a large measure it will determine our planning and budgeting for 1954.”

Lee Friend, partner of Friend. Reiss McGlone, New York, agency for Playskool, is credited with inspiring the firm’s plunge into television. Heretofore, in its 26-year history, the toy company had used mostly magazines and some newspapers. After one season in television, the company will now be allocating more than a third of its budget to that medium. By spring the figure may be up to half.

THE QUESTION has often been asked: "How you gonna keep 'em down on the farm?"

The answer might well be: Put them on Mutual's Man on the Farm program, now in its 16th year under the sponsoring wing of the Quaker Oats Co.

This half-hour, farmer-participation show is one of the oldest commercially sponsored programs on the air today, and one of the very few that have been on the air continuously for the same client over 10 years.

So it must be reckoned that Quaker is gratified with the results of a farm feature on which it advertises its Ful-O-Pep feeds (also a spot for Ken-L-Ration). Its executives have indicated as much.

Today, Man on the Farm is aired each Saturday, 12:12:30 p.m. (12:30-1 p.m. on the West Coast) on some 420 stations of the far-flung Mutual network, on which it has been a fixture since Aug. 27, 1949. Before that it was a modest transcribed feature appearing on some 50 outlets throughout the country.

What makes Man on the Farm especially appropriate as a title is the fact that the program originates at the Quaker Oats poultry experimental farm at Libertyville, Ill.

In the past 15 years, the Libertyville poultry center has become a haven of farm fun, entertainment, instruction and quiz prizes, all of which have served to make avid listeners — and participants — out of farm folk.

This listener loyalty (comparable in some ways to that manifested for ABC's Breakfast Club) has paid rich dividends to both the sponsor and the network and afforded a suitable vehicle for the talents of Chuck Acree ("The Man"), who has been doing business at this old stand since the program originally started. He also directs and produces the series.

The program also commands the very personal interest of Quaker's own executives, including Arno Dennerlein, manager of Quaker feeds division, who serves as personal broadcast spokesman for the client. "Denny" has lived with the show since it began. What does Quaker think of its farm feature in terms of a commercial property?

Says Mr. Dennerlein: "Our purpose is to give coverage to our dealers — what we consider a low-cost coverage. The program has been of tremendous help to dealers. Since we bought Man on the Farm, our growth on poultry feeds has been very substantial."

Maximum Discount

Quaker's feeds division is able, indeed, to enjoy low-cost coverage, when one takes into account the maximum discounts Quaker realizes from its other shows on Mutual.

The history behind Man on the Farm is an interesting one. The story goes that Arthur Marquette, now president of Sherman & Marquette, broached the idea to George C. Biggar (then as now with WLS Chicago). Mr. Biggar's production talents (he was executive producer then, now directs the National Barn Dance) have long been recognized in Chicago. The result: The show got underway Feb. 12, 1938, on WLS.

It soon branched out as a transcribed feature to 13 and later 50 stations throughout the country, but even then Quaker thought it could obtain better coverage results commensurate with its distribution.

These "advantages" of moving to a network have been cited:

1. A uniform time period of broadcast in each time zone at a time favorable to high farm listenership.
2. The bulk of the 350 Mutual stations are located in the rural area.
3. Permitted selecting stations based on distribution of Ful-O-Pep feeds.
4. Provided primary coverage for better than 85% of all dealers.
5. Made possible the mentioning of dealer names over the individual stations. (Mentioning 1,824 at present.)
6. Permits localizing the show within six areas with special management talks, commercials, and Blue Ribbons.

Program on Tape

Until recently, Man on the Farm was originated as a live program, but Mr. Dennerlein and his associates soon found that taping had its advantages (a faster-paced show by editing and flexibility in use of the program in different areas). Quaker can dub in cattle, hog and other feed specialists locally, as well as dealers' names. Thus, according to Mr. Dennerlein, "it becomes practically their radio program."

The broadcast is now tape-recorded each Saturday for use by all stations the following week at the same 12:12:30 p.m. period. (The program ran a full hour until 1950.)

The recorded sessions sometimes run 45 minutes and the material is later edited for local station use.

The Mutual farm series doesn't rack up any overly impressive figures by Nielsen or other research rating methods, but network and sponsor both tend to discount this lack, noting that Nielsen Audimeters are conspicuous by their absence in rural areas. But even so, Nielsen reports the show is heard on the average in better than one million homes each Saturday.

"This means we reach approximately 200 homes per $1—which is much less than it would cost us to send a post card," Mr. Dennerlein has reported.

Mutual does point to a "Hometown, America" survey (prepared by J. W. Ward

At beginning of Man on the Farm's 16th year, Chuck Acree, the program's m.c., was presented with cake, featuring a sugared brood of poultry.
but actually negotiated by MBS) of February-March 1952. The broadcast showed up well in areas where MBS is the only network represented (by some 329 stations). The program posted a creditable 15.6% compared to a top of 3.7% for one of the other networks whose programs were heard from nearby cities.

A second or non-ty study of cities outside normal television range gave Man on the Farm a 10.2% as against 5.5% for the next top network offering.

Additionally, Quaker’s feeds division has conducted its own surveys, including a rural mail study covering 8,000 subscribers in eight states. It received a 24% return from subscribers to farm papers and a 54.6% response from men, which was considered phenomenal in view of the theory that farmers don’t write many letters.

In its own way—and after its own fashion—Man on the Farm has evolved as fully a commercial success as perhaps other more established agricultural shows. Sherman-Marquette handles the Ful-O-Pep and other Quaker products, with Harry Barger as account executive.

Neither Mutual nor various farm organizations has lacked for ideas when it comes down to the matter of promoting the vehicle. "Man on the Farm Week" is rapidly becoming a national institution. (This was the second year.)

Network Promotion

For its own part, the network recently went all out in its promotion department and devised a spot announcement schedule ("teasers") for what it called "Buildup Week" (Aug. 9-15) in advance of the actual occasion (Aug. 16-22). It fed recorded and live material to its 560 MBS affiliates in the form of special promotion kits.

MBS also arranged for salutes from a host of its network programs (Faith in Our Time, Twenty Questions, Farm Quiz, Ladies Fair, Rod & Gun Club, Take a Number, Joe Bier Show, Queen for a Day and others). The American Meat Institute also joined hands with the National Grange and 4-H clubs to pay homage to the show. And Secretary of Agriculture Ezra Taft Benson also offered his congratulations. Local stations partici-
Baseball, Beer and Radio: Milwaukee’s Favorite Diet

WHEN Milwaukee became the home of the Braves last summer the Miller Brewing Co. of that city made a smart decision. It decided broadcasts of the Braves baseball games were big enough to be carried on two Milwaukee stations, WEMP and WTMJ.

That the brewing concern was right is attested by what followed. Surveys showed that during the game, listeners were being broadcast 75% of all radio sets in use were tuned to baseball.

In addition 19 Wisconsin, Michigan and Minnesota outlets carried the games, plus 19 others of the United Broadcasting network on the East Coast and in the South.

What happened in Milwaukee has seldom been equalled. Thousands of Milwaukee fans resurrected sets and installed them in bathrooms, attics, basements, offices and garages. They didn’t want to miss a single inning. Radio set servicemen reported booming trade with repair jobs frequently 100% above normal. Distributors reported radio set sales increases of 100-200% with portable sales reaching as high as 1,000%.

WEMP was selected to feed the networks with its sports director, Earl Gillespie, doing the play-by-play, assisted by Blaine Walsh of WTMJ. Lou Riepenhoff, WEMP public relations director, tells this story:

“A neighbor and I walked down the block one night last summer. Everything was open and sound traveled well. We decided to count the radios where Earl Gillespie’s voice could be heard broadcasting the Braves game. There were 15 houses on our side of the block. Twelve of them had the game on.

“Wonder what ever happened to television? my neighbor inquired whimsically. Though I was aware his thinking wasn’t completely accurate I couldn’t help but chuckle a bit myself. For I knew that accredited surveys had long since confirmed his observation and radio—the medium that was supposed to have been relegated to obsolescence several years back—was thriving as it never had before.”

Mr. Riepenhoff continues:

“Fans attached portable sets to belts when they went fishing and hooked them on caddy carts on the links. Riders asked cab drivers if there was a radio aboard. If not, they looked for another cab.

“When games were in the East, they started in the late morning. Restaurants lured lunch trade by piping games into the dining room. It was the biggest thing that had happened to Milwaukee radio in as long as anyone could remember.”

Miller’s WEMP-WTMJ local arrangement was so successful that the same setup has been introduced this fall, with the Green Bay Packers pro football broadcasts also carried on the two Milwaukee stations as well as on 35 Wisconsin, Michigan, Minnesota and Iowa stations. Tony Flynn of WJPG Green Bay has been added to give a state-wide flavor to Mr. Gillespie’s broadcasts.

The wisdom of Miller’s approach on its Braves and Packers broadcasts through its agency, Mathisson & Assoc., is readily apparent and obviously fruitful. This same smart use of radio on Marquette U. football (in the past) and basketball and Milwaukee Hawks and Wisconsin U. basketball, coupled with solid 1953 merchandising techniques, has meant increased audiences, consumer impact and sales for Miller and other play-by-play sports advertisers.

Much credit is given to Mr. Gillespie for the upsurge in Milwaukee radio during the three years he has done Milwaukee Brewers baseball (carried 13 years on WEMP), Marquette football, Milwaukee Hawks basketball and Packers and Braves games for WEMP. His career, according to Mr. Riepenhoff, is a “Horatio Moncrieff” story of the first order.

Originally Mr. Gillespie chose baseball as a career and played with Madison in the Wisconsin State League and with the Green Bay Blue Jays before the war, returning after war service as a Marine fighter pilot to broadcast sports for WJPG Green Bay. According to Mr. Riepenhoff, Mr. Gillespie “talked” the 1951 Milwaukee Brewers to the Little World Series pennant, the 1952 Brewers to the American Assn. title and the Braves to second place in the National League.

Mr. Gillespie receives all sorts of good luck charms and once received two pulled teeth from an old lady who was certain they would keep his teams winning. Besides play-by-play, he prepares and broadcasts three sportscasts daily on WEMP. He is assisted by Dave Martin on Marquette football, for the Allis Chalmers Mfg. Co., and other sports broadcasts.

oded the limitless list of satisfied radio advertisers the Billings Motor Co., Buick dealer in Billings, Mont.

Until recently the motor company had used radio only slightly, but Joseph Koesl, the manager, was encouraged to try a more concentrated radio campaign because of success that other Buick dealers had reported with radio advertising.

The Billings dealer bought eight one-minute spots per day for eight days, then six per day for the next week, all advertising new Buicks. That was followed with a campaign for used cars, using eight one-minute spots per day for three days, seven per day for two days and six per day for a week. The campaign was broadcast on KBMY Billings.

The special campaign cost $512. Here’s what happened as a direct result, according to Mr. Koesl: Thirteen new cars and 14 used cars were sold—at an advertising cost of only $18.92 per sale.

Under the best business conditions such a record would be considered an exceptional advertising success, but in this case it was spectacular. As Mr. Koesl put it, “These sales, both new and used, were conducted while the Midland Empire Fair was in progress, normally a very slow period, and also while Billings was paralyzed by a complete city-wide strike.”

Sportscaster Earl Gillespie’s popularity rose with that of the Braves. He’s a public figure in Milwaukee.

Commercials:
The Simpler The Better—and Cheaper

By Horace S. Schwerin
President, Schwerin Research Corp.

ALL along the line, costs are a pre-eminent concern of the television advertiser. There is no single put formula that will solve the problem for him "like magic."

There is, though, a point of view that can help a lot. It involves accepting Othello's formula to deliver "a round, unvarnish'd tale." Or, to put the matter in more modern terms, it means accepting and acting upon the philosophy that, in making commercials, the simplest approach is generally the best.

In the course of testing several thousand commercials to learn what audiences remember, these are among the basic conclusions we at Schwerin Research Corp. have reached:

- Most commercials would actually gain in effectiveness if their formats were made simpler.
- Most of the special production effects that are used add nothing as far as remembrance of sales points is concerned; in some instances these special effects actually decrease viewers' recall.

In short, economies can usually be effected both in over-all planning and in the details of execution—and, chances are, you will at the same time be strengthening the commercial's impact.

Statements like this may sound dogmatic. But they are backed up by carefully controlled studies we have done for major advertisers.

For example, the results of tests for a food product company are illuminating.

First of all, we tested a commercial containing five main video elements; after viewing it, around two-thirds of the audience remembered the brand name and some idea. Far from losing effectiveness, this simpler version actually gained one-fourth more remembrance than the more complex one.

In the case history just presented, each of the versions used only one announcer's voice throughout. Actually, of course, it is important to strive for simplicity in the audio as well as the video. No more scenes or voices should be employed than are really necessary to the sales story.

An apt illustration is the experience of one of our clients with his toiletry product commercials.

He began with a very elaborate production that had 10 short scenes and five changes in the dominant voice used. Only about four-fifths of the viewers remembered the brand name and some idea. Far from losing effectiveness, this simpler version actually gained one-fourth more remembrance than the more complex one.

PROGRAMS & PROMOTION

WNAK-KVTV CARD HOLDER
TEN-WAY plastic card holders have been sent to 10半月 buying throughout the country by WNAK Yankton, S. D., and KVTV (TV) Sioux City, Iowa. The ten-card holder which enables the owner to find a card easily without a frantic search, comes filled with cards providing important information for the station such as a “license” card which states that WNAK was first licensed in 1923. Another reads, “Use this card for your social security card. Assure your social and financial security by using KVTV.” Other cards include a credit card, picture card, KVTV Canyon Kid Club membership card, identification and club card. A final card, which indicates that it is to be retained, gives information about the stations, including network affiliations, tower height, power and station representative.

KTAG (TV) DEALERS’ TRIP
THIRTY-SEVEN Lake Charles, La., tv set dealers, practically none of whom had ever seen a uhf picture, were taken on tour of WAFB-TV Baton Rouge by KTAG (TV) Lake Charles. Both stations are uhf outlets. The dealers witnessed live programs being produced and were guests at a dinner. T. E. Gibbens, manager, and Don Allen, chief engineer at WAFB, talked with the dealers about the uhf band and answered questions, and Walter Zammit, who waged a successful selling campaign when WAFB-TV went on the air, answered questions about his sales program.

JOE THURSDAY REPORTING
WEATHERMAN Paul Dean, WTAG Worces-ter, Mass., surprised listeners who expected to hear the usual in weather reporting with commentary such as this: “The story you are about to hear is true. This is Joe Thursday. . . . My job: Report the weather on Sunday. After further investigation, a high pressure area over New England was found to be responsible for this condition. The sun sets today at 5:46. The weather is exactly as predicted. Weather forecaster not guilty. Case closed.” And then the Droghet theme.

$2 PUBLICIZES CH. 2
STATION Manager William Quarton of WMT-AM-TV Cedar Rapids, Iowa, recently paid his 92 employees in two-dollar bills in an effort to publicize the station’s ch. 2 tv opera-tion, on the air since Sept. 30. Salesman George Dorrington conceived the two-dollar stunt, reasoning that local businessmen would wonder why scarce two-dollar bills were suddenly so scarce and would ask questions to find out. The station reports that many such questions were asked and that ch. 2 was widely pub-licized.

'SPOTLIGHT ON WKBN'
COINCIDING with the dedication of its new radio-tv center, WKBN Youngstown, Ohio, has released a 24-page, three-color booklet, entitled “Spotlight on WKBN.” The multi-pictured pamphlet is filled with photographs of offices, equip-ment and particularly personnel. For each staff member pictured there is an accompanying job description. Also pictured are views of the station’s modern building.

WRESTLING MATCHES IN GARAGE
ALBUQUERQUE’s wrestling matches, which are telecast by KOB-TV there, were in danger of being disrupted temporarily when the city’s Ice Arena, where the matches are usually held, was destroyed by fire. The Galles Motor Co., which sponsors the matches, felt the show must go on so it offered KOB-TV and promoter Mike London the use of its service garage. Due to limited space, admission was by invitation only, but the show did go on.

CONTEST FOR SALESMEN
A CONTEST for radio station salesmen on Canadian stations is now in full swing for the fall months, with Spence Caldwell Ltd., Toronto, syndicated program distributor, offering prizes. A catalogue full of prizes is available for selection by winning salesmen on a point basis, with station commercial managers making reports on sales by each salesman. In addition to sales, points are also given for salesmen’s improvement of audience listening through supply-ing best possible programs for sponsorship.

CANADIAN DEVELOPMENT
THREE ONE-HOUR tv shows are being spon-sored by the Canadian government for the Eighth Canada Savings Bond campaign during October. The first show, a dramatic review of Canadian development over the past decade, The Giant and the Dwarf, was telecast on Octo-ber 12, 8-9 p.m. on CBLT Toronto, CBOT Ottawa and CBF Montreal. A musical revue was scheduled for Oct. 15, 8:30-9:30 p.m., over the same network, and originating at Montreal. The third program is to be telecast Oct. 23, 8:30-9:30 p.m. The two musical revues will have settings in typical Canadian English-speaking and French-speaking towns.

HIGH SCHOOL FOOTBALL CONTEST
FINANCIAL support for athletics in 103 of the nation’s high schools will be provided by the Kellogg Co., Battle Creek, Mich., in a contest associated with its Wild Bill Hickok program (Mutual, Mon.-Wed.-Fri., 5:30-5:55 p.m.). Through Nov. 30, listeners will be asked to write a letter naming their favorite high school football teams and the reasons for their popularity. The winning team, plus the letter writer, will be taken to Miami for the Orange Bowl football game on New Year’s Day, and additionally, the school athletic fund will be

Better Fair Work
WAVE-TV Louisville reports this year’s attendance at the Kentucky State Fair was record breaking. The total 338,770 admission, the station says, can be at-tributed mainly to more effective pub-li-city by tv, radio and newspapers, and directly related to WAVE-TV’s increased coverage (with switch to ch. 3, doubling of antenna height, new transmitter, increased power). It’s not guesswork either, the station says. A picture con-test was held, showing photographs of fair visitors coming from communities 75 to 150 miles distant and asking view-ers to identify the persons—result: Hun-dreds of postcards. Station telecast 14 separate programs from the fair.
TAKE AWAY THE TURNSTILE

for the ASSOCIATION OF AMERICAN RAILROADS
NO SANDLOT FOR MINOT
THE World Series provided baseball excitement for thousands of North Dakota viewers who saw their first baseball classic on television via KCBJ-TV Minot, according to John W. Boler, president of the North Dakota Broadcasting Co., operator of the station. Arrangements were made with Maxon Adv., Gillette and NBC-TV to have films of the games carried at 9 p.m. on the same day of play. The films were made on "red hot cine" at WOI-TV Ames, Iowa, 500 miles away, and shuttled to Minot by chartered plane. Mr. Boler said clubs, schools, labor organizations, dealers and distributors supported KCBJ-TV's effort. TV set dealers were swamped with orders.

GIAN'T TELEGRAM SENT
TO HERALD the return of WOR-TV New York's Broadway TV Theatre last Monday, the station sent to editors a giant telegram measuring 22 by 16 inches. It points out that the program is one of a "long list of outstanding shows" to be featured on WOR-TV this season. The station returned to the air last Monday with regular programming following the settlement of a strike that began on Aug. 18 [B&T, Oct. 12].

QUIZ ABOUT NETWORK
NEW audience-participation quiz program designed to stimulate interest in other NBC Radio shows is Know Your NBC's, which made its initial appearance on Oct. 10. The program, carried on Saturdays at 8:30-9 p.m., EST, enables contestants to win cash prizes if they can answer correctly questions based on NBC programs broadcast during that week. The show is produced by Masterson, Reddy & Nelson, with John Nelson as m.c.

MOBILE TELEPHONE
WORTH of mobile telephone in emergencies was demonstrated during series of artifical fires, when KSEM Moses Lake, Wash., utilized staff mobile telephone car to cover fires, to broadcast notices of city officials directly and to alert fire and police units to new fires. Allen Miller, station manager and local civil defense director, patrolled city in mobile telephone car, keeping constant touch with station, which was acting as emergency communications center, and with firefighting units.

'BIG PREVIEW'
FRED ROBBINS is master of ceremonies for The Big Preview on NBC Radio, 11 a.m.-1 p.m. A well-known disc jockey himself, Mr. Robbins is assisted by three guest deejays from different parts of the country in previewing forthcoming record releases.

MFA Mutual Insurance Co., Columbia, Mo., signed to sponsor all 10 U. of Missouri football games of the season on 19 Missouri radio outlets. Shown here inspecting a promotion poster are (l to r) W. Judd Wyatt, advertising director of MFA; Mahlon Aldridge, manager of KFJR Columbia, who handles the broadcasts; Don Faurot, Missouri's football coach, and Sparky Stalcup, MU basketball coach, who assists Mr. Aldridge on the broadcast.

WGN CORN PICKING CONTEST
FIRST and second place winners in the nine Midwest state corn picking contests will compete in Bloomington, Ill., Oct. 24 in the National Corn Picking Contest, sponsored, under the auspices of the National Corn Picking Assn., by WGN Chicago and the Bloomington Normal Junior Chamber of Commerce. The purpose of the nine-state project is to promote greater safety and efficiency in corn picking operations. Stations cooperating in the project are: KFEQ St. Joseph, Mo.; KSOO Sioux Falls, S. D.; KYMS Mankato, Minn.; WEKZ Monroe, Wis.; WIBS Indianapolis, Ind.; WMT Cedar Rapids, Iowa; WOW Omaha, Neb., and WRFD Worthington, Ohio.

'PARADE OF HOMES' COVERED
KPRC-TV Houston's afternoon variety show, Mazinee, was telecast recently from the city's 1953 Parade of Homes site during the event's eight-day run. Each day the program was telecast from in front of one of the homes, with Dick Gottlieb, star of the program, its singers and musical combo all on hand. The parade, staged in conjunction with National Home Week and sponsored by the Houston Home Builders Assn., exhibited 31 completely furnished model homes, all situated on one street for easy viewing. The station reports that the Parade of Homes was host to 152,000 visitors, which represents one-fourth of Houston's population.

FOOTBALL PROMOTION
KMOD Modesto, Calif., is circulating 10,000 handbills featuring football promotion. Written in bold letters is "Football is here and KMOD has it." Pictured are players in action and a KMOD mike. Copy gives the "All Star Line-up."

CBC TO AIR BRITISH GAMES
CANADIAN BROADCASTING Corp. has obtained complete radio, TV and newsreel rights to the British Empire Games being held at Vancouver next summer. The games, which are the olympics of the British Commonwealth, will be telecast as quickly as possible over all
Some people are born leaders

...like WCAU, Philadelphia

RADIO—Ever since the inception of audience measurement surveys, WCAU-Radio has always been first in Philadelphia (currently 37% more families each week than station B).

TELEVISION—More Philadelphians view WCAU-TV than any other Philadelphia television station (8 out of 10 television families every week).

The Philadelphia Bulletin Radio and TV Stations • CBS Affiliates • Represented by CBS Radio and Television Spot Sales
Canadian and U.S. tv stations wishing to carry them, on am stations as running commentary, and newsreel for tv. Moving pictures will be shipped by air to Great Britain and other parts of the Commonwealth, according to present plans.

LADIES' DAY
THE LADIES took over KLAS Las Vegas Oct. 13 for the station's second annual Ladies Day, held in conjunction with the observance of Business and Professional Women's Week. Approximately 35 members of the Las Vegas Business & Professional Women's Club moved in at 7 a.m. and took over for the day all phases of station operation, from programming to sales to transmitter operation.

NBC EXHIBITS SHOW
AS A MEANS of focusing local attention on NBC-TV's Robert Montgomery Presents program (NBC-TV, Mon., 9:30-10:30 P.M. EST), NBC-TV's press department has arranged with leading department stores throughout the country to display a special traveling exhibit of the show. The exhibit includes mounted photo blow-ups of the step-by-step process of putting together a typical show, as well as model stage sets, working scripts and a dramatic film clip from a recent production. Some of the locations where the exhibit already has been shown are the Higbee Co., Cleveland; Rich's, Atlanta; Strawbridge & Clothier, Philadelphia; B. Forman Co., Rochester, and Milwaukee Boston Store, Milwaukee. NBC-TV affiliates are tying in with on-the-air announcements and other promotional efforts.

BOOKS SENT TO AGENCIES
TWO-VOLUME sets of the writings of O. Henry (Sidney Porter) have been sent to top advertising agency executives by Gross-Krasne Inc., accompanied by an engraved announcement of the firm's acquisition of tv film rights to 240 short stories from Doubleday & Co. A proposed series of 39 half-hour films is aimed at national sponsorship rather than distribution on a syndicated basis.

GIRL SCOUTS CONVENTION
COVERAGE of portions of the 32d National Convention of the Girl Scouts of the U.S.A., which opened yesterday (Sunday) in Cincinnati and will continue through tomorrow (Tuesday), will be carried on the radio networks of NBC, CBS and ABC. Proceedings will be broadcast on NBC today from 10:30-11 P.M. EST; on CBS Radio today, 11:11-11:15 P.M. EST; and on ABC tomorrow, 4:45-5:25 P.M. EST.

‘NEWSWEEK’ SCHOLARSHIPS
ESTABLISHMENT of Newsweek scholarships for three college students was announced on NBC-TV's Kate Smith Hour program on Oct. 9 by Malcolm Muir, president and chairman of the editorial board of Newsweek magazine. Mr. Muir said the scholarships will consist of a $500 salary for the students who write in the magazine next summer. He designated Ted Collins, Miss Smith's producer, as chairman of the committee that will select the three winners.

WBNS SENDS CRYSTAL SETS
AS PART of its second annual “Fall Festival,” pointing up the return of CBS Radio shows for the fall season, WBNS Columbus, Ohio, sent crystal sets to agencies and local newsrooms to promote “the biggest thing to happen in radio since the invention of the cat whisker.” Other features of the festival, held Oct. 5-13, included: four contests in which 25 portable radio sets were given away to students in local newspapers; use of “Fall Festival” table tents at all meals in a leading local restaurant throughout the nine-day period; souvenirs distributed by WBNS stars, and 5,000 letters sent to grocers, druggists, agencies and clients.

HOWDY DOODY SILVER
KAGRAN Corp., New York, owner of the Howdy Doody, which opened its week as a licensed International Silver Co., Meriden, Conn., to retail for one dollar a two-piece Howdy Doody set consisting of a spoon and a fork, which will have the face of Howdy on the handles.

HOPE PUSHES RICE
A REVERE copper and brass skillet, along with a package of General Foods Minute Rice, was sent to editors last week as a promotion piece to spark the launching of Bob Hope's new show on NBC-TV from Cleveland on Oct. 20, sponsored by General Foods. "What's Cooking" is the copy heading on an accompanying cutout of Bob Hope's face. "Why the new Bob Hope NBC television show of course! And for a real tasty dish of your own step out to the kitchen and whip up the recipe Bob will feature on the show—Spanish Rice Pronto, it's made in this skillet."

TALKING MAILBOX
A SPEAKER installed in a downtown Detroit mailbox by WJR there proved to be quite an attraction and publicity-getter during the "Air-mail and Air Parcel Post Month" proclaimed by Detroit Mayor Albert E. Cobo during the month of October. The mailbox told people: "I hope you have sent me airmail because I will get there faster," and "Do you want really fast service? Then send it airmail... I've had this stand on this corner for 50 years and I know good service when I see it." Some people carried on conversations with the mailbox (postal representative out of view on third floor of a building overlooking the mailbox provided the voice). Police had to supervise the crowds around the box, according to the station.

KOIN NEWSPAPER SUPPLEMENT
THE COVER page of the tv section of a recent Portland Oregonian is filled with pictures of tv fare such as Jack Benny, Gene Autry, Sid Caesar, Howdy Doody, a chorus line, baseball game and scenes from dramatic presentations. Superimposed upon this and colored in red is a KOIN-TV camera and cameraman. The newspaper section presents pictures and information on the new station's broadcasts well as the CBS and ABC stars that KOIN-TV viewers see.

**Prints Own Logs**

KGVO Missoula, Mont., “because the daily newspapers will not print radio station logs,” has developed its own, incorporating its schedule and program and station promotion. KGVO prints 7,000 copies per month, charging $1 for a two-year mailed subscription and making them available free at retail stores, according to A. J. Mosby, president.
Surely, you believe in sea serpents!

To millions of children this sea serpent is as real as you are. He is definitely Cecil the Seasick Sea Serpent, the fabulously fearless pal of television's beloved Beany... star of Bob Clampett's "Time For Beany."

Perhaps you are hopelessly grown up and prefer figures to figments. Very well, consider these substantial facts:

TIME FOR BEANY is rated among the "Top Ten Multi-Weekly Shows" in Buffalo, San Francisco, San Diego. *In Los Angeles its share of the viewing audience averaged 49.1% for a period of more than a year.

TIME FOR BEANY has pulling power plus. A Los Angeles sponsor offered youngsters a plastic train for 50 cents and a wrapper from a 19 or 29 cent candy package. The offer brought 84,000 replies in ten weeks—a total viewer-cash-outlay of $64,680. Later, a sponsor offered a free photo of Beany. A supply of 200,000 was exhausted in 48 hours.

TIME FOR BEANY has won television's highest awards: The Academy of Television Arts and Sciences named BEANY the "best children's program of 1952." In the same year, the Society of Radio-Television Editors chose BEANY as the "best children's show" on the air.

Parent-Teachers associations and other national organizations have selected BEANY for similar honors.

TIME FOR BEANY is fully merchandised, with such sales and audience-building aids as posters, slides, ad mats, safety and health campaign cartoons... with premiums such as balloons, rings, puzzles, pictures, buttons, tumblers, story books, coloring books and comic books.

Now, TIME FOR BEANY is available in a new, half-hour version—a meticulously produced film recording that sells for the merest modest price.

Use your imagination. Buy BEANY and end up with profits as real as a child's trust in sea serpents—and BEANY commercials.

Write or call the nearest Consolidated office for complete details. Until you do, neither salesman nor sea serpent will call on you.

Stan Dale, WXYZ Detroit, to WJJD Chicago.

Johnny Argo, disc jockey at KVLJ Little Rock, to W Lok Cleveland in same capacity.

Timely Newscast

AN Oklahoma publisher thanks WKY Oklahoma City's Grant Foster for getting him home safely last week. The publisher, Jack Stamper of Hugo, was coming back from the state fair and was about to drive into a filling station when Mr. Foster's newscast came on. He elected to drive on rather than interrupt the newscast. He passed over the Canadian River bridge. Then Foster signed off. Then the bridge collapsed, sending five cars and a truck into the river bed.

Cam Langleford, formerly of CJOY Guelph, Ont., and Harvey Kirk, KeyK Eye Toronto, announcing staff of CHUM Toronto.

Harry S. Sylk, vice president of WPEN Philadelphia, named general chairman of 1954 Allied Jewish Appeal.

Frank A. Tooke, general manager of KYW Philadelphia, accepted trophy award on behalf of Dragnet and NBC as best radio show in a readership poll conducted by Pittsburgh Courier, national Negro publication.

B. George Barber Jr., commercial manager of WGBG Greensboro, N. C., awarded trophy as "Greensboro's Outstanding Toastmaster" in recognition of his work as Area Governor for Toastmasters International.

Reginald P. Merrilien, program director at WSGR Cleveland, elected president of Cleveland Kiwanis Club.

Pete Peterson, farm editor at WNAX Yankton, S. D., received Honor Award Citation for Outstanding Public Service in Fire Prevention during 1952 on behalf of station by National Board of Fire Underwriters.

Max Rezlick, producer-m.c. of all-Jewish radio-tv show on WARY Arlington, Va., and WTTO (TV) Washington, received Americanism award from American Veterans of World War II for "outstanding service to the community and the nation."

Fred Hall, announcer, KEYT (TV) Santa Barbara, father of boy, Timothy Warren, Oct. 6.

Walter M. Windsor, general manager of WGBA Columbus, Ga., father of girl, Wendy May, Sept. 21.

Dr. Michael Maresca Y Ansulvi, 58, who was known as "The Good Samaritan" in his Italian-language radio programs over WOV, WBNX and WHOM New York, died last Monday (Oct. 12).

Jack F. Allison, 39, producer at CFRB Toronto, died Oct. 9 after a brief illness.

Networks

William MacGruer Walker, media buyer for Young & Rubicam, to NBC Radio sales staff as account executive.

Things are humming in CONNECTICUT!

At the Connecticut plants of Anaconda's subsidiary, The American Brass Company, some long strides are being taken in stepping up production of copper, brass, bronze and other copper alloys in mill forms.

Similar activities are underway in other mills at Buffalo and Detroit; Kenosha, Wisconsin, and New Toronto, Ontario. Principal benefits accruing from this program are a streamlined flow of materials through the plant; improvement in the quality of sheet, wire, rod, tubes and special shapes; superior surface finishes; and the ability to supply the trade demand for much larger metal "packages" which provide economies to fabricators by virtue of fewer interruptions.

This plant-improvement, projected throughout The American Brass Company mills, is only a part of Anaconda's company-wide building program, now being carried toward completion in the United States, Mexico and South America. This far-flung program has one purpose—to supply more metals and better metal products.

'No Trouble With Tv,' Ascap Tells Newsman

ASCAP anticipates no special difficulty in coming to a copyright agreement with the television industry, according to Arthur Schwartz, who presided at a Tuesday breakfast tendered by Ascap to Washington newsmen. Mr. Schwartz said Ascap and television stations and networks "obviously need each other," and recalled that telecasters "were charged nothing for our music while the industry got on its feet."

Ascap is promoting legislation to repeal a section of the 1909 Copyright Act which permits juke box operators to play records without liability for copyright fees. The society provided talent for a dinner tendered in Washington Monday for delegates to the 42d conference of the Inter-Parliamentary Union.

The Ascap-television five-year contract expires Dec. 31.

Injunction Suit Filed to Stop 'Hollywood Story' Title Use

INJUNCTION suit to stop use of the title, The Hollywood Story, was filed Oct. 9 in Los Angeles Superior Court against NBC, Publicists Guild, producers Ben Pearson and John Gibbs and others by Shirley Thomas, packager-m.c. of Columbia Pacific Radio Network's weekly half-hour Shirley Thomas from Hollywood, known until two months ago as The Hollywood Story.

Miss Thomas claims prior rights to the title and, through Los Angeles attorney Nathanial H. Willis, served notice on NBC protesting use of the title for a new weekly half-hour radio program which started Oct. 4 in association with Publicists Guild.

Produced by Mssrs. Pearson and Gibbs, PG's first radio series, claimed in the works for more than four years, dramatizes the lives of film capital luminaries. The program will net PG $300 weekly while on a sustaining basis, which goes into an emergency fund for the Guild.

Rountree to Quit Tv Shows To Further Own Programming

MARTHA ROUTREE will leave as moderator of Meet the Press and The Big Issue television programs next month to devote herself to several shows of her own in the public affairs field, it was announced last week. She recently sold her interest in both programs to her long-time associate, Lawrence E. Spivak, who produces and appears on both shows.

Miss Rountree and her husband, Oliver M. Presbyre, head a company that controls Leave It to the Girls, Washington Exclusive, Nation's Press Conference and other programs.

AT&T Florida Relay Plan Adds Orlando—Jax Service

AT&T on Wednesday filed plans with the FCC for the construction of a radio-relay system between Jacksonville and Orlando, Fla., as the second link in a proposed route which ultimately will connect Atlanta and West Palm Beach. Augmenting present wire lines and coaxial cable connections between Jacksonville and Orlando, the new route will provide four channels, one each way for telephone service and one each way for protection and maintenance, releasing two channels of the Jacksonville-Orlando cable for television service.

14 Using INS Facsimile

INS Television Dept. announced last week that 14 tv stations currently are operating on INS' facsimile network and seven others have signed for the service and are awaiting installation.
Page 120 of the new Gates catalog describes the new CC-1 ten-channel, completely plug-in speech input console. The very last word in up-to-date speech equipment for TV.

Page 142 of the big new 250-page Gates catalog tells the "Studioette" story. This is the small big console for TV. Handles 4 microphones, 2 turntables, 2 projectors, network and much else.

Page 155 in your 250-page buyer's guide tells of a new, modern and unusual sound effects wagon. For productions, there is no substitute for the finest in S.E. equipment.

Page 157 is about "old workhorse". The most used and we believe, most successful transcription turntable made today. Nearly 2000 in use. This item, the maintenance engineer can forget about.

AWARDS

Christopher Awards Set For Two Radio, Two TV Shows

PERSONNEL associated with two radio and two television programs will receive Christopher Awards for the third quarter of 1953, Father James Keller, founder of the Christopher movement, announced last week.

In the television category, awards will be made to producers William McAndrew and James Fleming, writer Arthur Holich and director Charles Christensen for NBC-TV's Assignment Tomorrow, presented on Aug. 23; Dr. Frances Horwich, producer Judith C. Waller and director Reinald Werrenrath Jr. for NBC-TV's Ding Dong School.

In radio, Christopher medallions will be presented to writer James Poe and producer William Gay for CBS Radio's Sam Houston, and CBS Radio news analyst Allan Jackson for his Sept. 24th spot check of the conditions of educational facilities in various cities in the country.

WPTZ (TV) Philadelphia was cited for the second year, by the Institute for Education by Radio-Television of Ohio State U., as winner of its first-place award for "outstanding educational contribution and distinguished television production." Rolland V. Tooke (r), station general manager, receives the award from Dr. Louis P. Hoyer, Philadelphia public schools superintendent. WPTZ won the honor for its Operation Blackboard, in-school-viewing program.

Democracy Workshop Planned

WINNERS of the 1953 Voice of Democracy contest will take part in the fourth annual Democracy Workshop to be held Feb. 19-21, 1954, at Colonial Williamsburg, Va. The four national winners plus about 30 state winners will be guests of the historic town in a series of roundtable discussions and programs.

Sponsoring the Voice contest are NARTB, Radio-Electronics-Television Mfrs. Assn. and the U. S. Junior Chamber of Commerce. The national winners will receive their scholarship awards and gifts at a luncheon to be held in Washington. The annual contest will be conducted during National Radio & Television Week, Nov. 1-7.
than any other 4 x 5 commercial slide projector

The famous GRAY TELEP I
Makes profits grow — projects low-cost, easily produced commercials. Four optical openings for projection of opaque and transparent photos, rolling titles, slides, small objects, etc., with superimposition, lap dissolve, or fade-out effects. America's best-known, most-used television optical projector!

GRAY TELEP II
Another TV profit maker — with two channels accommodating slide holders, light boxes and accessories for special effects. Gives professional results — and one operator does it all!

GRAY 3A TELEJECTOR
New, compact unit for automatic remote control projection of standard 2 x 2 slides . . . in uninterrupted sequence . . . with fading, lapping and superimposition. Solves many problems for both large and small stations.

Get all the facts, now!

TWA Approves Split Into Two Area Groups

REORGANIZATION of Television Writers of America into two semi-autonomous groups, headquartered in Hollywood and in New York, was approved at a membership meeting in Hollywood Oct. 8. The national office presently is in Hollywood.

A final mail vote on reorganization details, including constitution and bylaw changes, will start within two weeks, with a vote count 20 days after ballots are mailed.

Regional Offices

Changes tentatively provide for each region to set up its own offices, consisting of president, staff and executive board, and conduct their own negotiations. National organization would pass on matters like strikes or affiliations. Regional presidents, plus the national president, will comprise the national executive committee, while local boards will form collectively a national board of directors. The national president will be nominated alternately each year by the respective regional board.

Date for opening negotiations with TV film producers will be announced shortly by the Hollywood office, TWA officials revealed. Negotiations with major networks currently are in progress in New York over freelance writers contributing to network programs.

TWA Votes Board Members Must Take Loyalty Oaths

ANTI-COMMUNIST oaths will be required of Television Writers of America board members, following approval of a constitutional amendment by 80% of the group's national membership.

In the same mail vote, counted a fortnight ago, another amendment requiring anti-communist oaths from the entire membership was rejected, 57 to 43%. Richard Powell, TWA president, had opposed the blanket loyalty oath because "it would divide the union and make an investigative body of it."

Hollywood members met Oct. 8 to select a nominating committee for TWA November elections, to hear plans for revision of regional and national organizations, and to hear reports on negotiations with networks and independent TV producers.

NLRB Dismisses IBEW Bid

PETITION of IBEW asking to represent employees of Palm Springs (Calif.) Community Television Corp. has been dismissed by NLRB on the ground that it lacks jurisdiction. NLRB found negligible evidence that the firm operates in interstate commerce. It is 100% owned by International Telemeter Corp.

AFTRA Record

RECORD $231,677 in claims was collected during the past year by Los Angeles local of American Federation of Television & Radio Artists, according to executive secretary Claude McCue. Sum represents 2,637 individual payments for rebroadcasts and disputed claims.

CONSERVATIVES GIRD FOR COMMERCIAL TV; DECISION MAY COME SOON, M. P. SAYS

Cyril Osborne, a member of Parliament, gives Bt the pros and cons of commercial tv in England. The climax to debate in the House of Commons may come as early as this fall, Mr. Osborne declares.

THE BATTLE of Britain over commercial tv may come to a climactic ending as early as this fall. And a vocal member of the House of Commons, which will debate the subject, thinks the proponents of commercial broadcasting have a good chance to win the battle.

A Bt interview last week with Cyril Osborne, Conservative Member of Parliament, brought the picture into focus. Here is a summary:

- The Government’s White Paper advocating commercial television as an adjunct to the tv monopoly operated by the Government’s British Broadcasting Corp. is before Parliament for debate. The new session of the House of Commons convenes Nov. 3.
- Many Conservatives, Mr. Osborne among them, believe they have the arguments which will carry the commercial tv proposal to legislative victory.
- If and when Great Britain has commercials, they will be on the subtle side. Mr. Osborne envisions airwave advertising in the manner of Annie Oakley, the character in the musical, who when trapping her man: “She doesn't shoot him, she doesn't frighten him, but, on the contrary, she acts a bit coy.”

While in this country, Mr. Osborne has visited national advertisers and advertising agencies and has toured the Eastman Kodak plant, inspecting experimentation in color tv film processing. He plans to visit Brig. Gen. David Sarnoff, RCA-NBC board chairman, before he returns to England.

Mr. Osborne was in Washington last week as a delegate to the 42d conference of the Inter-Parliamentary Union. He has held his seat in Parliament for eight years as representative of Louth, Lincolnshire, and serves on the House of Commons’ committees on Industry and Finance. In private life he is a textile manufacturer, a stock broker and a member of the board of a number of food companies.

He believes strongly in radio and tv, particularly in the effectiveness of video as a molder of public opinion. He got his dramatic taste of tv in political life when in the U. S. a year ago during the television talk on personal finances by the then Senator, now Vice-President Richard M. Nixon. Mr. Osborne observes: “It was a brilliant piece of showmanship and it successfully served the purpose for which it was designed. It got both money and votes.”

Politics—and the right of candidates to take the airwaves—has much to do with Mr. Osborne and his colleagues’ fight for commercial tv. He explains that with only one tv channel in all of Britain it is necessary for party caucuses to decide which candidates will represent the parties on the sole tv channel in an election campaign. But this practice leaves little room for the people’s alternative choice—the independent in politics. Additional facilities, brought about by private enterprise tv (although under government regulation as in this country) would bring choice in viewing.

Opponents to the proposal of adding commercial tv to the existing one-channel, BBC operated television monopoly (with boosters BBC’s programming has the goal of 90% saturation) claim if more channels are wanted, BBC should add them. In radio, for example, BBC has three radio services or channels. But, Mr. Osborne warns, additional BBC tv would spiral the license fee per tv set from the current $6 to about $70, compared to the license fee per radio set of $3.

His solution is simple: Get additional service by permitting the advertiser to foot the bill and provide the revenue. This, he explains,
Up to Parliament

ONLY a fortnight ago Earl de la Warr, England's postmaster general, announced that the British government will soon announce its plans for a new television service accepting advertising [AT DEADLINE, Oct. 12]. The announcement of the postmaster general, who is in charge of broadcasting affairs, came at the Conservative Party's annual conference. He said the new service would accept advertising but not the sponsorship of programs. BBC, which at present has a monopoly on tv, would continue to operate. The program when announced must be approved by Parliament (see story).

would not interfere with the BBC, but, in fact, strengthen it by urging BBC to maintain quality in programming.

The M. P. asserts tv will be the greatest factor in forming public opinion. He believes it will be greater in its influence than the press and the pulpit. If public opinion is to be free, he concludes, the public must be given the alternative viewpoint and that brings up the need of an alternative tv facility in his country.

Mr. Osborne admits the average Britisher doesn't go along with U. S. commercials. For his part, they are "too damn blatant." The Socialists go further, finding commercials ". . . raw, raucous, rather adolescent and containing appeal to the juvenile teen-ager . . . they are not on an intellectual plane . . . and to us they are disconcerting." The British, Mr. Osborne reminds, are more modest and subdued in temperament.

His idea: Preserve the high quality which he says BBC has in tv programming but add the "best of the U. S. commercial system without the blatant shouting of commercialism."

He also goes along with the current plan among the advocates of some commercials in tv of permitting advertising only before and after a particular program—no cut-ins would be allowed.

An argument of opponents is that the housewife will be immersed in commercials and find them obnoxious. Mr. Osborne says that's no problem—all the housewife has to do is turn the knob and she will have BBC and no commercials.

Greatest setback to Mr. Osborne's bloc of supporters was the U. S. networks' alleged bumbling of commercials spotted or carried on the Coronation program in June, according to the M. P. This drew educators and religious leaders to the side of the opposition. But Mr. Osborne looks forward to a good show in the House of Commons and he's picked up some new material in the States to buttress his arguments.

Peron Interview on NBC

NBC was scheduled to present an interview, which it described as "exclusive," with Juan D. Peron, president of the Argentine Republic on its Weekend radio program ARGENTINA (Sun., 4-6 p.m. EST) yesterday.

The interview was obtained by George Natanson, NBC correspondent in Argentina, and, a network spokesman said, was the first one granted by President Peron to a foreign radio newsmen in the last four years. NBC-TV will carry the sound-on-film version in a special 15-minute presentation tomorrow (Tuesday) from 10:45-11 p.m. EST.

For TV towers up to 3000 feet

Specify Emsco engineered "Towers of Strength"

Conservatively engineered, Emsco towers rigidly meet both RTMA and AISC standards. Their bolted construction permits quick, sure visual inspection. Hot dip galvanizing reduces maintenance costs . . . and insures long structural life.

Every Emsco tower design is unconditionally guaranteed! . . . backed by a pioneering experience of more than 25 years in steel tower fabrication . . . and by a staff of structural engineers who are specialists in tower design.

For guyed or self-supporting towers unequalled for safety . . . performance . . . and economy . . . specify Emsco. Prompt delivery assured!

CBC-TV Shifts Schedules For Evening Programs

POPULAR TV PROGRAMS will have early evening showing, according to a new policy of Canadian Broadcasting Corp. Programs with a high cultural or educational content CANADA are to be featured during the late evening hours, from about 10:30 p.m. on. More U.S. network shows and films are being imported, some sponsored and some on a sustaining basis, in order to gain audience for the Canadian tv stations. Late evening shows will consist of live Canadian musical shows, panels and little-known films.

SIEGEL REPORTS ON ITALIAN RADIO MEET

WNYC's director and chairman of NAEB's International Relations Committee urges commercial radio to take part in international radio affairs.

"WHY don't the U. S. stations and networks participate in these international radio affairs, or if they don't want to get in as individuals why doesn't NARTB take part as representative of the American broadcasting industry? Why should the National Assn. of Educational Broadcasters carry the ball alone?"

Those questions were asked last week by Seymour N. Siegel, director of WNYC, New York's city-owned station, and chairman of NAEB's International Relations Committee. Mr. Siegel had just returned from Palermo, where he had represented U. S. radio at the annual Prix Italia conference which also included broadcaster representatives of Austria, Belgium, France, Great Britain, Italy, Monaco, The Netherlands, Portugal, Switzerland, Trieste and Western Germany.

Mr. Siegel also on behalf of U. S. radio in general and the NAEB in particular entered two programs into the competition for this year's awards for the best musical and documentary programs. The musical entry was "Pentaptych," a work for chorus and orchestra by Nicholas Flagello; the documentary was "A Work in Your Ear" by Lister Sinclair from the Ways of Mankind series produced last year by NAEB.

"Neither entry won the prize for its class," Mr. Siegel said, "although both were commended by the judges. Our musical entry was rated highly as music but it was pointed out that it could be performed just as well in a concert hall as on the air and therefore lacked the quality of being particularly and peculiarly radio that it stressed so highly in this competition."

The Prix Itàlia awards, amounting to some $7,500 apiece, are contributed jointly by the participating national groups, Mr. Siegel said. Competitions were established in 1949 by Radio Italiana, the corporation which operates Italian broadcasting under a 25-year governmental grant which unlike other European systems permits commercial operations. In addition to Prix Itàlia awards for the best musical and dramatic programs, Radio Italiana on its own makes less substantial cash awards for top programs in these categories and this year the Italian Press Assn. inaugurated an award for the best documentary.

Prix Itàlia winners for 1953 were: Musical—Route of Columbus, submitted by Radio Italiana; dramatic — Christopher Columbus, submitted by the Belgian radio. The Radio Italiana awards went to The Country Doctor, entered by the Union of Radio of West Germany, as the best musical work, and to BBC's Streets of Pompeii as the best radio drama. Radio Italiana's documentary, Nocerine in Kosmos, won the new Italian Press award.

In all, 11 musical programs, nine dramatic shows and seven documentaries were entered for the various awards. Mr. Siegel said. These programs are all being made available for broadcast in all participating countries, he said, reporting that WNYC on Oct. 25 will broadcast the Route of Columbus, using an English translation of the text.

He noted that NAEB "stumbled into this" a year ago when it sent a committee abroad to stimulate the exchange of programs between American and European stations.

Selling time by serving the "party who makes up the lists"

George W. Harvey, General Manager, WFLA, Tampa, says:

"For a small station that does not spend a lot of money on trade paper advertising, we think that STANDARD RATE affords one of the most convenient and effective as well as economical methods of telling our story to the party who makes up the station lists."

8 ways a Service-Ad in SRDS helps sell time

1. It helps known prospects recall the gist of the sales story your representatives and your promotion are telling.
2. It helps unknown prospects to decide to call in your representatives.
3. It goes to agency-client conferences.
4. It remains instantly accessible to the SRDS user who is working nights or weekends.
5. It provides liftable material for inclusion in media proposals.
6. It makes possible a good "action" closing for other promotion, directing prospects to your Service-Ad in SRDS for more information, fast.
7. It keeps your story in the only place you can be certain that everyone who uses it is interested in stations right then.
8. It provides a "last chance" point from which a prospect can get a final "briefing" on your story before he makes his final decision.

Informative Service-Ads like the one shown here sell time for you because they deliver wanted information to your prospect at the time he is using Standard Rate to make station selections.

T HOUSANDS of vacations are already slipping away and fun on Florida's West Coast—and more are on the way! They will spend millions of dollars on almost every type of goods and service during the next few months. WFLA delivers this big bonus in listeners at no extra cost. Make hay where the sun shines. Cuba Tv Outlet Repeats Feature 4 Times Daily

NOBLE type of video programming, based on motion picture theatre practice, is working out well at CMBF-TV Havana, Arturo Chabau, vice president of Circuito CMQ S. A., owner of the station, said last week in New York.

Station goes on the air at 2 p.m. daily, Mr. Chabau reported, with a two-hour feature film, which is repeated at 4, 7 and 9 p.m., a children's hour of cartoons and other juvenile programming going into the 6-7 p.m. period.

This type of program repetition, after six months of operation, has an average quarter-hour rating of 5.8 and a cumulative audience rating of 24 for the day, Mr. Chabau said. It is also better than 30% sold, he stated, with advertisers buying announcements which are telecast in groups of three at half-hour intervals. He feels that triple-spotting each half-hour is preferable for both advertiser and viewer rather than a policy of interrupting the film every ten minutes.

Tv Popular With Britons, Admiral's Siragusa Reports

TELEVISION is as popular in England as in the U. S., with approximately 2.75 million sets now in use, Ross D. Siragusa, president of Admiral Corp., reported last Tuesday.

ENGLAND

Mr. Siragusa, who visited radio and tv plants on a recent European business trip, said that the English video industry is producing receivers at the rate of 800,000 to 900,000 per year. Most of them are equipped with small screens, although there is a gradual shift to larger sizes, and picture quality is good, he added. Average price of a 17-inch set is about $225 with taxes.

A decision is expected shortly, perhaps next month, on a proposal to authorize commercial tv operations in England, Mr. Siragusa reported. In any event, BBC already has announced plans to allocate additional channels.

Programming in England is limited to between five and six hours daily, with no strict adherence to precise time schedules, the Admiral president noted.

U.S., Canadian RETMAs To Review NTSC Test

RESULTS of color tv field tests by National Television System Committee will be reviewed before the Oct. 26-28 joint meeting of U. S. and Canadian Radio-Electronics-Tv CANADA Mfrs. Assn., to be held at Toronto, Ont. Knox McIlwain, Hazeltine Electronics Corp., will describe the tests. The new CBS color tube (BT, Oct. 12) will be described by N. F. Fyler, W. E. Rowe and C. W. Cain of CBS-Hytron.

Use of transistors, new developments in tv receivers and means of preventing spurious radiations will be explained at clinic sessions.

Erwin, Wasey Co. Readies English Radio-Tv Plans

CREATION of a radio-tv department in the London office of Erwin, Wasey & Co. has been announced by Howard D. Williams. Charles L. Hutcheson, formerly on the creative staff in the agency's Los Angeles office, will head the new department.

Explaining that British agencies feel radio-tv will soon be approved by the government as advertising media, Mr. Williams added his agency's London office "is making plans to launch extensive campaigns for its clients in these media just as soon as they become available."

INTERNATIONAL SHORTS

Grove Pharmacal Ltd., St. Louis (Bromo-quinine tablets), has started campaign of 20 spot announcements weekly on 30 Canadian stations. Agency is Vickers & Benson Ltd., Toronto.

Procter & Gamble Co. of Canada Ltd., Toronto, (Deft, Oxydol) has started for one year segments of local daytime radio shows in six major Canadian markets. Agency is Dancer-Fitzgerald-Sample, N. Y.

KAUM Guam, scheduled to start operations Dec. 1, appoints Adam J. Young Jr. Inc.

Stafford Foods Ltd., Toronto, appoints Mccoll, Eastman & Co. Ltd., as advertising agency. Definite radio plans have not yet been announced.

Seeck & Kade Inc., N. Y. (Pertussin), appoints Mc Cann-Erickson, N. Y., as its advertising agents for U.S. and Canada.

British Travel Assn. names Hewitt, Ogilvy, Benson & Mather, N. Y., to handle its advertising in United States.

Meloids, throat pellets made by Boots Ltd. of England, appoints Ed Shapiro, Phila., to handle advertising.

'Speed Broadcasting'

A BRIEF on radio and television was presented to Prime Minister Louis St. Laurent and the Canadian cabinet by the Assn. of Canadian Advertisers Oct. 8 at Ottawa. The brief has not yet been released by the ACA but is understood CANADA stood to urge greater freedom for private broadcasting and television, faster development of television by private enterprise in Canada. Presenting the brief to the CAB were J. O. Pitt, Canadian Fairbanks Morse Co., Montreal, ACA president, and J. E. Potts, Pepsodent Division, Lever Bros. Ltd., Toronto, chairman of ACA's radio and television committee.

Bulletin To: Monochrome Television Engineers Who Wish To Advance in the Field of COLOR TV

In preparation for color television, RCA now has several excellent positions open in the design and development of:

COLOR CAMERA • TRICOLOR MONITORS
COLOR MULTIPLEXING EQUIPMENT

We are looking for senior engineers with design and development experience in either the monochrome or color tv field. This is an opportunity to build your future on the sound foundation of RCA's experience in television... advance into a stimulating field that is new and challenging.

At RCA you will enjoy unsurpassed laboratory facilities, professional recognition and pleasant suburban or country living in the greater Philadelphia area.

Interviews arranged in your city.

For additional information regarding career opportunities and benefits for you and your family, write today to:

MR. ROBERT E. McQUISTON, Manager
Specialized Employment Division, Dept. B-401, Radio Corporation of America, 30 Rockefeller Plaza, New York 20, N. Y.
From where I sit
by Joe Marsh

It's the Principal of the Thing!

Every autumn our High School has a contest to see who can get the most ads for The Recorder—the school magazine. The winner becomes honorary Principal for a day.

Skip Roberts won last week, and his first (and only) official act as "Principal" of the school was to announce in a loud, clear voice: "I hereby declare today a school holiday!"

Knowing Miss Gilbert, the real principal, it was no surprise to me that she laughed as hard as anybody else . . . and said to go right ahead.

From where I sit, it's no wonder our youngsters think Miss Gilbert's a wonderful person (even though they know they'll have to make up that day). Her tolerance, her friendly way with people of all ages reflect in everything she does. For instance, at my house Miss Gilbert prefers tea but respects my preference for a glass of beer. As a real person . . . in any community, Miss Gilbert belongs at "the head of the class."

WBZ-TV Films 'Fire'

WBZ-TV Boston has released for tv showing its film, titled "Fire," produced by the station in color in the interest of furthering fire prevention. It will be made available to the Boston fire department and the Massachusetts Dept. of Education. The film depicts the operation of the fire department. WBZ-TV received an award from the National Board of Fire Underwriters for its 1952 campaign in fire prevention.

WFIW Aids Wreck Victims

MORE than $825 was raised by WFIW Fairfield, Ill., on the air only a few weeks, to help a Michigan family involved in a car wreck there. The father had been killed and six members of the family were injured, including the mother.

KTLA (TV) on Smog

RESPONSE of over 15,000 letters supporting KTLA (TV) Hollywood in its anti-smog campaign has resulted in plans for a mass meeting Oct. 24, to be sponsored and televised by the station. Experts from medical and academic fields will consider solutions to the smog problem suggested from both letters and floor discussion. City, county and state officials have agreed to meet with the board. KTLA also will teletcast a follow-up meeting. The campaign started with a series of station break and program announcements requesting viewers' opinions.

MILESTONES

➤ WROK Rockford, Ill., has requested that the city honor its silver anniversary on 1954 vehicle stickers. The station's appeal, the first filed with the Rockford City Council, stressed that it is important that the city recognize the first significant milestone of radio in Rockford because "in its comparatively few years of existence it has become so vital in the lives of individuals and society." The request came from John Dixon, commercial manager of WROK.

➤ KSOO Sioux Falls, S. D., in observance of its 25th anniversary, sponsored a tour of 66 persons from Iowa, Minnesota and South Dakota through the eastern states, with stops in Chicago, Detroit, Niagara Falls, New York, Washington and Cincinnati. E. C. (Red) Stangland, station farm director, is planning a station-sponsored tour of the South for 1954.

➤ KKWV Pasadena, Calif., celebrated its 11th year of operation recently, according to William J. Beaton, general manager. The station broadcasts on 1300 kc with 1 kw.

➤ Northwestern U. Reviewing Stand started its 20th year yesterday (Sunday) with a special program on WGN Chicago. The series was first broadcast as a 15-minute program devoted to philosophy and scientific developments but later changed to forum format, touching on world events. The program has been moderated for 10 years by Director James H. McBurney.

➤ JOSEPH GALLICCHIO, NBC Chicago music director, is celebrating his 25th year with the network. He has been a staff conductor since the network purchased WMAQ and was appointed Central Division music director in 1946.

UPCOMING EVENTS

Oct. 28-29: Kentucky Broadcasters Assn., meeting, Kentucky Dam Village, Kentucky Lake.
Nov. 1-7: National Radio & Television Week.
Nov. 2: North Carolina Broadcasters Assn., meeting, Asheville.
Nov. 3-5: Amer. Institute of Electrical Engineers, fall meeting, Hotel Muehlebach, Kansas City, Mo.
Nov. 5: Upper Midwest Sales Conference, Hotel Radisson, Minneapolis.
Nov. 5-6: Ohio Assn. of Radio-TV Broadcasters, meeting, Neil House, Columbus.
Nov. 9-10: New Jersey Broadcasters Assn., fall meeting, Hildebrecht Hotel, Trenton.
Nov. 15-16: National Assn. of Industrial Broadcasters, fall meeting, Hildebrecht Hotel, Trenton.
Nov. 18-20: Louisiana Assn. of Broadcasters, election of officers, Captain Shreve Hotel, Shreveport.
Dec. 7: FTC hearing on proposed trade practice rules for radio-va industry, 10 a.m. FTC Bldg., Washington.
Dec. 9: Supreme Court to hear Oral Argument on FCC's "giveaway" regulations. Washington.
Jan. 6: Second session of 83d Congress begins.

SPECIAL LISTING

(NARTB District Meetings)

Oct. 19-20: Dist. 5, Henry Grady Hotel, Atlanta.

ACTION ON MOTIONS

By Hearing Examiner Annie Neal Hunting

KFBC Cheyenne, Wyo., Frontier Bcstg. Co.—Examiner continued hearing in proceeding re application of KFBC from Nov. 15 to Nov. 17, 1953 examiner anticipated, and proceeding held for new tv station on ch 35. Action Oct. 7.

By Hearing Examiner John Sheehan

By Hearing Examiner Robert L. Couch

By Hearing Examiner John V. Delgadillo

By Hearing Examiner R. Mills

By Hearing Examiner F. J. Callahan

ed petition to amend its tv application (Docket 1065; BPTC-1522), to substitute new trans. and station location, for 308(a) of the Communications Act to Section 308(b) of the Communications Act of 1934, so as to include the following paragraph: "The following were granted to the FCC for the proposed typical week (Program schedule in Section 308(a) of the Communications Act of 1934)."

FCC Ruling to Further Expedite TV Hearings

FCC Oct. 14 announced additional changes in its policies designed to expedite the completion of applications for new broadcasting stations—am, fm and tv.

Additional data concerning the proposals involved in the hearings will be required of each applicant to be presented prior to the commencement of the hearing. This will facilitate the work of the examiner and parties at the opening hearing conference in arriving at the points upon which the various parties will rely in their proceedings.

Hereafter, each pre-hearing letter sent an applicant for new broadcasting facilities pursuant to Section 308(b) of the Communications Act of 1934, an amendment to the examination statement signed under oath, setting forth the detailed support to be presented to the examiner hereto. This material, which must be consistent with and in support of your application, must be filed not later than 15 days prior to the scheduled date of hearing.

A copy of the attachment referred to in the above paragraph is annexed to this Public Notice.

FCC, 32 Wharf St., Washington, D.C. 20554.

WCKY 50 GRAND IN WATTS

DOING THE REAL JOB FOR THE ADVERTISER

The L. B. Wilson Station, Cincinnati
Dollars and Censuses

AN energetic and wholly commendable effort appears to be shaping up among business groups to bring about a restoration of government funds needed for the important U. S. census of business. It is an effort which the radio and television businesses ought to support with every means at their disposal. As it stands now, the next business census due to be taken next year will be an inadequate substitute for the comprehensive survey that heretofore has been conducted every five years.

The economy-minded Congress cut the business census appropriation from the $10 million that the Census Bureau had requested to a comparatively scanty $1.5 million. At that figure only spot checks and slightly educated guesses can be made. Whatever the detailed, city-by-city, county-by-county, state-by-state information that a real business census produces, the advertising industry will be severely handicapped. For it is from the business census that marketing plans can be drawn, that retail sales can be discovered and projected, that much of the basic information needed to conduct intelligent campaigns can be obtained.

Congress has business on its side in its general determination to cut useless spending, but in this case it cut too far. Changes are needed in the milieu, persuading the businesses to reallocate their census budget if those who understand its importance make an effort to be heard.

High Court Looks at ‘Giveaways’

ONE of the strangest lawsuits of all time is going to be reviewed by the nation’s highest tribunal—the four-year effort of the FCC to ban radio and television giveaway programs as lotteries.

The case is strange because we believe that if the FCC, as presently constituted, were called upon to decide on the legality of giveaway programs, it would agree hands-down to do nothing about them. The FCC which sought to ban these programs acted with only four of its seven members present, and one (Comr. Hennock) strongly dissented. This deed was done Aug. 18, 1949. Presiding was the then Acting Chairman Paul A. Walker. Absent were the then Chairman Wayne Coy, Comr. Robert F. Jones, and the then commissioner and now Chairman, Rosel H. Hyde.

The case is bizarre for other reasons. Those three commissioners, goaded by an aggressive legal staff, had trifled with the Constitutional guarantees, the courts, the Department of Justice (which didn’t join with the FCC in the appeal), the Post Office Department, which previously had approved the same “giveaways,” and the will of the people, who happened to like the programs.

The FCC “majority” had ruled that effective Oct. 1, 1949, licenses of stations carrying the particular network giveaway programs would not be renewed. The contention was that these programs were lotteries because of the time and attention given them by the public and that this constituted “consideration.”

Appellatepanels appealed to a statutory three-judge court in New York, which overruled the FCC. It was from this ruling that the FCC (under the Fair Deal) appealed to the Supreme Court, which last Monday agreed to take a look.

We wonder whether Attorney General Herbert Brownell, as the chief government lawyer, would today acquiesce in such an appeal. Would FCC Chairman Hyde (who didn’t vote in 1949) and the new members of the FCC even entertain the lottery issue? And we wonder whether Comrs. Webster and Sterling, who voted originally with Acting Chairman Walker, would vote the same way.

Be that as it may. The case is before the highest court. The FCC is not likely, at this late date, to seek dismissal. We do not know whether the Department of Justice would intervene against the FCC. Attorney General Brownell has demonstrated that he isn’t above litigation instituted against business by the previous administration. He might decide to oppose the FCC, as he threatened to do in another case on procedure to be followed in invoking Section 309 (c) of the Communications Act, where a showing of economic interest is adequate to get an FCC hearing.

Lest we be misunderstood, we reiterate the position we have taken from the start. We are opposed to money and prize giveaway programs customarily associated with radio and television enterprises but public institutions. We believe they are groundless. They occupy the irreconcilable positions of wanting to protect the gate and coincidentally gouge radio and television for rights to broadcast.

Understandably, broadcasters are not universally clear-headed either. Some of them have publicly claimed that the broadcast media have an inherent right of access to sporting events, as though sporting events were not commercial enterprises but public institutions like the government.

The extremes of misunderstanding on both sides are most unfortunate. It would be to the advantage of both if blood pressure could be brought down to manageable levels.

Take the case of the attempt last month by the International Boxing Club to restrict broadcast coverage of the Rocky Marciano-Roland LaStarza championship fight to 75-word summaries of the action after every three rounds. These summaries were to be prepared from blow-by-blow reports carried by the wire services. Newspapers could print the blow-by-blow accounts, but radio and television couldn’t broadcast them.

The silliness of that order was best illustrated by a New York court’s refusal to uphold it. It is to the credit of WOV New York, whose Italian-language audience was particularly interested in the Marciano-LaStarza fight, that the attempt of the IBC to reinforce its order with an injunction was beaten.

However, it must be pointed out that the court sustained the IBC’s right to prohibit radio from re-creating the fight as though it were an on-the-scene broadcast. Last week WOV filed an amended answer to the IBC’s injunction action requesting the court to remove all restrictions against broadcast use of legally-obtained news, i.e., from wire services.

WOV and its able manager, Ralph N. Weil, showed the good sense that is customarily associated with that station in recognizing that radio should be given the same privileges as the press to use wire service information any way it wants to and also in recognizing that radio cannot go beyond that point in its demands for access to privately-operated and wholly commercial sports spectaculars.
