THE NEWSWEEKLY OF RADIO AND TV

At midnight, October 17th, WHB completed the switch from network to independent operation.

Now WHB has 24 full hours a day to transmit the kind of radio which has already started the big switch in Kansas City listening. In the few months since new management* took over, new studios, programming, personalities, ideas have put K C.'s oldest call letters (born 1922) on the lips of everybody in town.

In audience and in rates, WHB is an extraordinary buy—right now. Talk to John Blair, or Station Manager George W. Armstrong.

*Operating two other famous independents, each first in its own market (Hooper):
KOWH, Omaha — WTIX, New Orleans.

AN estimated 85,000 Midwest Farm people attended the second annual WLS-Prairie Farmer Farm Progress Show held October 7, on a Camden, Indiana, farm. They came in 20,000 automobiles and in 225 privately owned airplanes.

They came to hear about and see the newest developments affecting their own business—farming. They came to see new farming practices; new machinery; new methods. They came to learn. And they came, just as crowds always come to WLS sponsored events, because they knew when WLS told them it would be worth their while—it would be.

These are WLS listeners. They are the people who repeatedly say that WLS is their favorite station for farm service; the station they listen to most; the station in which they have confidence.

These are the people who need—and who use your product. They are the people who buy your product. They are the people who will buy more of it if you tell them about it over WLS.

These are people—not figures. They are the Nielsens; the Hoopers; the Pulse—brought to life.

WLS — Prairie Farmer advertisers took advantage of the opportunity to meet these potential customers in person by having exhibits and demonstrations at the event.

Each week at 285 Madison Avenue, 70 typical viewers—different ones every week—sit down and watch television shows and commercials. By indicating what they like, and what leaves them cold, they help answer such questions as:

... Does your commercial arouse interest quickly?
... Does your commercial devote sufficient time to the main sales theme?
... Does your commercial hold the viewer all the way through it?
... Does your commercial make the viewer feel more like buying your product?

These audience juries have been meeting since 1946. They have reviewed 532 TV shows and 1,640 commercials. Out of their reactions, Y & R has uncovered many facts—eliminated many fancies.

Result: better television for Y & R clients.

ONE SUGGESTION is advanced from high place on how to handle uhf conversion problem. Proposal is that licensee pay for mass conversion of all sets in area, charging costs to overall investment which can be written off taxwise. Station thus would have guaranteed maximum circulation in area, equivalent to vhf within range of its uhf transmitter.

CONFICT could develop in Senate if Democrats emerge victorious in Tuesday elections. Slated for chairmanship of Senate Judiciary Committee is Harley M. Kilgore (D-W. Va.) who has bitterly attacked newspaper and radio station ownership of tv outlets, network or station ownership by manufacturing companies and has otherwise plumped for complete divorce. Question: Would he seek inquiry under anti-trust laws (Judiciary is parent committee of Dept. of Justice)? Clash could come since Interstate Commerce Committee has jurisdiction over communications and its regulatory agency, FCC.

MORE JOB changes are being whispered at FCC, notably in Broadcast Bureau which sits just below Commission on all matters involving broadcast services. Both engineer Curtis B. Plummer, BB chief, and his chief deputy, attorney Joseph M. Kittner, may be slated for new assignments, former possibly to head another bureau (there's vacancy, chief, Common Carrier). Among names heard for Broadcast Bureau are engineer James E. Barr, present chief, Broadcast Facilities Division, and attorney Sol Schildhause, who has been acting chief of Opinions and Review.

WHAT WILL be total television revenue (time sales minus agency and representa-tive commissions) for 1954? One leading economist estimates it will be $600 million. FCC figure for 1953 (B&T, Oct. 25) was $432 million.

NOT SINCE early days of New Deal has newspaper interest in FCC's "diversification" stance been stimulated to present pitch. Publishers and editors have been contacting their Washington correspondents for "inside" and generally are being told that recent FCC actions indicate no fixed policy. More often than not, they cite decisions are based on "political" rather than policy factors (see feature page 86).

FCC hasn't seen hide nor hair of report forms or program flow charts of alleged "Jobs-for-Republicans" plan attributed last week to White House and Republican National Committee, according to sources at offices of chairman and personnel director. "We're not hiring anyway," was comment after reflection on recent staff cuts.

ELECTION campaigns, which always bring new business to radio-television stations, also delay other advertisers in placing new business until campaigns are over. This and fact that considerable new business was placed earlier this year, are reasons given for slowdown past few weeks.

NEW and entirely different reason, however, must be blamed for postponement of one specific campaign. American Safety Razor (Pal blades), through BBDO, New York, had planned to start radio spots in about 100 markets late last month [CLOSED CIRCUIT, Oct. 11]. But campaign had to be delayed, due to company strike in objection to moving plant from Brooklyn to Staunton, Va.

SENATE Juvenile Delinquency subcommittee might turn to film production and distribution field for more hearings on tv programming before submitting its separate report on tv as juvenile delinquency factor. Subcommittee spokesman, who said group now is studying whether it has gone into all aspects of tv sufficiently, points out only one or two representatives of film industry have been heard.

FCC SHORTLY is expected to cite for "over-commercialization" an eastern independent radio station. This will be culmination of "monitoring" survey undertaken by Commr. Robert E. Lee, who in recent address at NARTB 4th District meeting at Virginia Beach, Va., Sept. 21, evinced concern over "pitchmen" on radio and disclosed monitoring was underway.

FIVE comparative tv cases now pend before FCC for final decision, along with three "dropout" cases, each with only one applicant, competitors having withdrawn. Six other contests in which initial decisions have been reported are awaiting oral argument before Commission en banc. Only one losing applicant in tv fight has appeal pending in courts, but FCC must answer six economic protests, four involving uhf appeals of vhf grants.

ALTHOUGH no announcement has been made, Earle C. Anthony, president-owner of KFI Los Angeles, has returned to his desk after several months illness. He was hospitalized in San Francisco following Bohemian Grove encampment last June.

More Night Radio Sales, Daytime TV Boost Seen

NATIONAL soap advertisers spend 87% of their radio spot money in daytime; in television, 61% in nighttime, according to N. C. Rorabaugh Co.

In releasing Rorabaugh's second quarter 1954 radio spot expenditures of Big Three—Procter & Gamble, Colgate-Palmolive and Lever Bros.—and their competitors, Station Representatives Assn. said Friday soap percentages underscore its belief that nighttime radio "is in for better figures because of the power of good local programming and local selling personnel," while in tv, opposite trend to greater use of daytime is seen.

"For both radio and tv, national spot is in good health," SRA said. Radio spot "will have no boom" when final 1954 figures are totaled, SRA said, but noted indication of "bigger schedules in 1955." In spot tv, according to SRA, 55% increase last year ought to be duplicated this year.

All of Big Three competitors were included in Rorabaugh compilations of tv spot in soap category; only major competitors in radio.

Stanton to Address Banquet At SDX Columbus Meeting

CBS PRESIDENT Frank Stanton will address banquet closing 45th annual convention of Sigma Delta Chi in Columbus, Ohio, Nov. 10-13, Victor Bluedorn, SDX executive director, announced Friday. Banquet to be held in Deshler-Hilton Hotel, with columnist Earl Wilson as toastmaster.

Other speakers include Alexander F. Jones, Syracuse Herald-Journal, on "Canon 20" (barring crime and microphones from courtrooms); Dr. James C. Pollard, director of Ohio State U. School of Journalism, on "Right of Privacy," and Richard W. Slocum, Philadelphian Bulletin, ANPA president, on "Journalism as a Career." John Cowles, Minneapolis Star and Tribune, honorary SDX president, will keynote evening day sessions.

Spector Sees Revamping Of NBC-TV Spectaculars

RAYMOND SPECTOR, head of Raymond Spector Agency, New York, announced late Friday after meeting with Pat Weaver, president of NBC, and Robert Sarroff, executive vice president, that NBC-TV's Sunday Spectaculars would (1) possibly be cut down to one hour from hour-and-half after first of year, in 8-9 p.m. spot; (2) show would originate at Colonial Theatre instead of from Brooklyn studios; (3) better-draw talent names with more star support would be used; (4) more emphasis would be put upon appeal to black-and-white sets instead of color; (5) no more original book (continuity) but more variety and comedy; (6) Spectaculars should be referred to as "feature presentations"; (7) less emphasis on sophistication and more on mass appeal.

Mr. Spector said after Mr. Spector's announcement that network does not plan to cut length of Spectaculars, either now or in future, and that no other major changes are contemplated.

NEW TV RECORD

ALL-TIME weekly production record for tv sets was made during week ended Oct. 22, with 228,298 units turned out, according to tentative Radio-Electronics-Tv Mfrs. Assn. estimate. Previous high was 219,680 units in 1953. This year's week ended Oct. 20, 1950, according to RETMA figures.

Output of tv sets has been mounting this year after slow start. Total tv production for 42 weeks of 1954 estimated at 5,360,266 compared to 5,900,000 for 41 weeks of 1953. If present trend continues, 1954 output may exceed 1953 12-month figure. Retail tv sales for eight months are highest since RETMA began collecting retail data three years ago.

NBC Radio to Announce Five-Minute Sales Plan

NEW NBC Radio network sales technique, "Five-Minute Program Plan," offering advertisers choice of five-minute segments of talent to program them "at low cost," is being prepared by Fred Horton, network's sales director, for announcement this week.

Plan described as providing list of five-minute network time availability and list of some 30 top personalities in news and specialized service fields; advertiser may pick time spot that best suits his purpose and talent he wants to employ in it, and, depending on time and talent, pay single price for package. Authorities say plan offers maximum impact along with "extreme flexibility" in both time and program content; will provide circulation at cost as low as 52 cents per thousand, and will permit advertiser to custom-build packages for special promotion, holiday events, year-round campaigns, etc. Announcement slated this week in trade ads under slogan, "Take 5."

McConnaughey Opposed

FIRST opposition to naming of George C. McConnaughey as FCC chairman voiced Friday by Harry R. Booth, special FCC counsel during telephone probe in mid-'30s. Mr. Booth sent telegram to White House charging FCC chairman had represented Ohio Bell companies in efforts to win higher rates in official proceedings. Mr. Booth recently organized Utility Users League to fight increased telephone rates sought by Illinois Bell.

POLITE POLITICS

WEWS (TV) Cleveland, which carried talk by President Eisenhower Friday morning during latter's visit to that city, promptly contacted Ohio State Democratic Committee to offer "equal time" in return. Sen. Thomas Burke (D-Ohio), in race for U. S. Senate with Rep. George H. Bender (R-Ohio), respectfully declined opportunity "in deference to the President of the United States."

• BUSINESS BRIEFLY

CADILLAC-BLAIR SPOTS • Cadillac Motors Div., General Motors Corp., Detroit, signs to participate in John Blair & Co. national saturation group plan, which encompasses 24 spots per week on the 45 Blair-represented stations. Through MacMans, John & Adams, Bloomfield Hills, Mich., car giant use plan week of Nov. 15 to introduce 1955 models. It is fourth advertiser to sign for plan.

NECCHI NAMES GREY • Necchi Sewing Machine Sales Corp. and Elia Div. of Necchi, New York, has appointed Grey Adv., New York to handle its advertising, effective Nov. 15, Leon Lohon, president, announced Friday. Necchi, which spends approximately $750,000 annually in advertising, had reportedly planned to go over to Blow Co. when J. D. Tarcher and Benrus Watch Co. moved to Cecil & Presbrey [B&T, Sept. 27], but this deal was never fully confirmed.

SWIFT SHOPPING • Swift & Co., Chicago, reportedly shopping for network radio or television show. J. Walter Thompson Co., which handles variety of Swift products (meats, margarine, etc.), studying "all broadcast media for suitable radio or tv vehicle."

FOLGER CHANGE • J. A. Folger & Co. (Folger coffee), Kansas City spot advertiser handled by Grant Adv., Chicago, for over decade, planning to name Cunningham & Walsh, New York, as its advertising agency effective after first of year.

RAILROAD PLANS SHIF • New York Central, which has retained Foote, Cone & Belding, New York, as its advertising agency for number of years, is parting with that agency, effective Jan. 1. New appointment is expected momentarily.

Unattended Tv Satellites Sought by NARTB District

FCC was asked by NARTB District 14 (Mountain States) at Denver meeting Friday to permit unattended operation of satellite tv transmitters. Resolution adopted by district (early story page 44) pointed to serious shadow problems in rugged terrain of mountain states.

District 14 urged Commission to extend remote-control privileges to directional stations. Another resolution endorsed private ownership of microwave facilities, including multiple relay circuits without regard to assistance available from commercial carriers. Uniformity in daylight time was urged by delegates. Walter Wagstaff, KIKO Boise, is district director.

Network Line Failure Probed

FULTON LEWIS JR., MBS commentator, hasn't made up his mind whether to sue AT&T for costly Wednesday-Thursday breakdowns in MBS hookup, he told B&T late Friday. He said he is conducting thorough probe of facts. Most of network was out Wednesday and about half of time was lost Thursday, he said. AT&T described trouble to equipment failure between Louisville and Indianapolis. Mr. Lewis was broadcasting from Birmingham.

November 1, 1954 • Page 7
smart man, that Moses Cleaveland...

Even 159 years ago, he could tell a good thing when he saw it! Heading a party of 52 settlers coasting along the shores of Lake Erie, the good General arrived at the mouth of our Cuyahoga River one July day in 1796. That did it! Soldier-lawyer-pioneer Moses Cleaveland picked this site for his new town; his party, with no less enthusiasm, named it after him. (The extra "a" dropped out about 35 years later.)

As a man of consuming interests and progressive tendencies, old Gen'l. Cleaveland would volley the buttons off his weskit if he could revisit today the community he started. From 52 souls and a lot of wilderness, Greater Cleveland has grown to more than 2,000,000 customers and a panorama of diversified industry unsurpassed in the nation!

Here are over 3,000 manufacturing plants with a total output pegged at about five billion dollars annually . . . . family income that today has reached the rank of No. 4 among all U.S. metropolitan areas . . . . and retail sales topping two billion a year.

Spang in the middle of all this opulence is a device old Gen'l. Cleaveland never anticipated in those pre-science-fiction days—WXEL, the fastest growing television station of Greater Cleveland. With the same sure decision that led a smart pioneer to pick Cleveland's locale, we think he'd also have picked WXEL as a salesman-extraordinary to cover this incredibly rich area. You could do worse in judgment than Moses Cleaveland—particularly when you can have the help of the KATZ agency in planning for giant results in a gigantic market.

WXEL
Cleveland Channel 8
New Buffalo Lineup Urged; Corpus Christi Proposal

WBUB-TV Buffalo petitioned FCC Friday to permit it to move from uhf ch. 17 to vhf ch. 8 to de-intermix vhf and uhf there and relieve WBUB of its present monthly loss of $32,000. If approved, station says, loss will be removed. WBUB-TV proposal would involve moving Buffalo ch. 7, now in hearing among three applicants, to ch. 5, with WHEN- TV Syracuse, moved from ch. 8 to 7, WHAM-TV Rochester from ch. 5 to 6, WCNY-TV Carthage-Watertown, N. Y., from ch. 7 to 8. Other moves in cities with no grants but applications pending, proposed by WBUB-TV are: Escanaba, Mich., ch. 3 to 4; Cheboygan, Mich., ch. 4 to 3; Toronto, Ont., ch. 6 to 7; Owen Sound, Ont., ch. 8 to 4, and Ottawa, Ont., from no channel to ch. 7.

KVD-O-TV Corpus Christi, Tex., ch. 22, asked substitution of uhf channels for vhf chs. 6 and 10 there, both in competitive hearing status with initial decision already pending for ch. 6. WBUB-TV said Corpus Christi is "classic example" of city where de-intermixture could work if FCC wished, in view of flat terrain and 100-mile distance to any other vhf assignment.

Michelson Will Expand Film Distribution

CHARLES MICHELSOEN, Inc., New York, radio transcription company, announced plans Friday for expansion in television film distribution with acquisition of syndication rights to 156 half-hours of The Plainclothesman and 52 half-hours of Famous Jury Trials. Both shows previously were seen live on DuMont Television Network, and kinescopes of programs have been made to prints.

RCA Plans Heavy Drive For Pre-Christmas Sales

RCA this fall will use all media, space in magazines and newspapers backing up heavy broadcast media schedules, in company's largest pre-Christmas campaign for RCA radios, tv sets and phonographs. R. H. Coffin, RCA's director sales, advertising and sales promotion, has announced.

Maizlish Drops Uhf Petition

HARRY MAIZLISH, owner-operator, KWPW Hollywood, withdrew application for uhf ch. 34, Los Angeles. "Too few sets and not enough interest," he said.

Bluefield Tv Grant Impends

FINAL decision expected to be announced by FCC this week to grant ch. 6 to WHIS Bluefield, W. Va. Initial decision was issued four months after withdrawal of West Virginia TV Inc. and WHIS petitioned for prompt final action [B&T, Oct. 25].

Tupelo Tv Application Filed

NEW tv bld filed with FCC Friday for ch. 9 at Tupelo, Miss., by Tupelo Citizens TV Co., owned chiefly by Frank K. Spain and family (60%). Mr. Spain is engineering director WHEN-TV Syracuse. Joseph G. Petit, NBC tv development engineer, owns 35%.

FCC Equal-Time Actions

FREE political time complaints to FCC late last week, involving WJIB-TV Detroit and KBOI-TV Boise, were reversed by Commission Friday in wires interpreting political broadcast policy. FCC told WJIB-TV it should give comparable free time to Republican Congressional candidate Gregory M. Pillon since Rep. John D. Dingell (D-Mich.), seeking re-election, was given "free" time on regular CIO program. In KOMU-TV case, Missouri State Republican Committee protested Sunday time offer by station to answer Friday night speech of Democratic Gov. Phil M. Donnelly, wanted Friday night reply time. FCC noted governorship not in dispute, hence Sec. 315 of Communications Act did not apply and require "equal time," but Commission thought "fair opportunity" to answer should be accorded under major public issue policy.

Charlotte Transfer Filed

BID for transfer of 60% interest in WWOX Charlotte, N. C., from group of Atlanta businessmen to broadcaster Robert R. Rounsaville filed with FCC Friday. Mr. Rounsaville, who with acquisition of WWOX control would have his FCC limit of seven radio properties, pays $3,000 for 10% share, loans firm $2,000 and receives 50% share. Mr. Rounsaville manages direction of WWOX, now under construction. He also holds permits for three new uhf tv outlets.

Colorado Springs Sale

SALE of 50% interest in KRDO-AM-TV Colorado Springs, Colo., by Joseph H. Rohrer, former manager, to other principals reported in application filed with FCC Friday. William J. Gregory, Harry C. and Harry W. Hoth pay Mr. Rohrer $24,500 plus cancellation of $13,000 note due Mr. Gregory. Mr. Rohrer is manager of KIOA Des Moines.

Witness Refuses to Testify

WITNESS identified as Max Wall refused to testify Friday or give his name before FCC Examiner Herbert Sharpman in license renewal hearing on Edward Lamb's WICU (TV) Erie, Pa. Wall, who is Rackly Broadcast Bureau witness, ex-Communist Ernest Courey, testified man named Max Wall accompanied him in 1938 and 1940 to Mr. Lamb's office for an investigation of $7 for Communist Party cause [B&T, Oct. 4]. Hearing resumes Thursday.

Petersburg Petition Filed

LOSER in reversed final decision in Petersburg, Va., ch. 8 tv contest, WSSV there petitioned FCC Friday for rehearing, reconsideration and re-argument, contending "minority" of Commission (3-2-to-2 vote) was insufficient to overrule examiner's recommendation and Commission's own Broadcast Bureau. Final decision favored competitor Petersburg Television Corp. (affiliated with WLEA Richmond, WTH Baltimore) [B&T, Oct. 4].

UPCOMING

Nov. 1-4: Theatre Owners of America, Conrad Hilton Hotel, Chicago.

Nov. 4: Standard bond broadcasting conference between U. S. and Mexico, Mexico City.

Nov. 4: Selection committee, TV Bureau of Advertising, New York.

For other Upcomings see page 109.

and so WJTV took two, operating on the theory that if a thing is worth doing at all, it's worth doing more than once. The first one was an increase to 250,000 kw a couple of weeks ago, and the second one, a further increase to 500,000 kw, will be completed by January 1, 1955. With giant measures, you get giant results: in this case, the Central Mississippi market including 76% more viewers in metropolitan Jackson than any other station can claim.
LIGHT’S DIAMOND JUBILEE

THE ELECTRICAL industry spent an estimated $1 million on time, talent and facilities to celebrate the Diamond Jubilee of Light. In a four-network, two-hour spectacle [Oct. 24, 9-11 p.m.] the producers raised serious doubts about the wisdom of trying to impress an audience by monopolizing all four networks at once and/or by spending $1 million in two hours.

Unfortunately the anniversary of the electric light turned into (1) a free plug for pleasant but elderly clips from Hollywood's past; (2) an array of disjointed scenes whose waste of writers, actors and money perhaps surpassed any previous mish-mash in television history; (3) examples of bad taste in pitting amorous scenes against faith and hope; and (4) further proof that Hollywood's hackneyed press agentry and program formats are bad television.

Almost forgotten in the excitement of spending the million dollars were the 75th anniversary of light and the ability of television to dramatize this great scientific story.

Tipoff came in the slow pace of the opening four-and-a-half minutes, marked by dreary sequences of credits and a modest wish that the audience “find something entertaining in this program.” Finally action appeared—an “In the beginning . . .” narration by Joseph Cotten, who skimmed over the electrical age into Americana via the famed Tom Sawyer fence-painting clip from an old movie.

This was the first of a series of mysteriously assembled episodes. Judith Anderson suddenly appeared in a Statue of Liberty scene. Four Air Force crewmen of differing heritage but common impulses eagerly ogled a provocative girl seductively reclining in the driver's seat of a Jaguar sport car. Her widowhood was accounted for by arrival of an instructor which brought on a clutching kiss that startled a willing flyer.

This highly sexed bit somehow inspired a funny Robert Benchley film short of a past decade. A Hollywoodesque roundup of higher education provided a setting for three Eddie Fisher songs and the bawling introduction of his fiancée.

Having disposed for the moment of courtroom, the Jubilee depicted marriage via what appeared to be a modified version of an Irwin Shaw story of a married couple suffering through a Sunday afternoon. Presently, presented had a brief turn in a demonstration of push-button magic and a hilarious comedy bit by George Gobel.

An example of talent waste appeared in the Uncle Hardtack story, with Helen Hayes forced to spend endless minutes looking around a pillar while a nightclub vocalist performed in the mating-caller manner. Americans and science received another montage treatment highlighted by the final recognition of Thomas Edison, inventor of the electric light, whose voice appeared through another of his inventions—talking movies.

From covered wagon and plow scenes the Jubilee moved to Grandpa and a bored son-in-law who has tired of the rip-snorting stories of the early West, a rewrite of a John Steinbeck short story. After atom bomb and modern laboratory scenes, along with Valley Forge and Lincoln episodes, President Eisenhower gave an effective fireside talk, by film, on faith, freedom and Hallowe’en. At this point Jubilee was beginning to make sense, only to be marred by another incredible production blunder in the excellent singing of “Bless This House”—Dorothy Warenksjold sang without benefit of camera.

Television suffered a severe setback in two hours but fortunately last night (Sunday) these displaced programs were back in their regular spots: NBC-Goodyear-Philo Playhouse, Lo- retta Young, The Hunter; DuMont—Life Begins at 80, Rock King: CBS—GE Theatre, Celeste Holm, Father Knows Best, What's My Line; ABC, Walter Winchell, Martha Wright, Break the Bank, Dr. I.Q.

If Hollywood were to attempt tv sabotage, the Jubilee spectacle would do a good job. If Hollywood were to use tv to promote Hollywood, Jubilee would help a little despite its pointless array of stars and Americans.

Some day a silver, gold or diamond anniversary will be celebrated on television modestly and with power in some ways television knows best. Some day those who spend money telecasting such events will learn how to get their money's worth without phony secrecy, antiquated production gimmicks and dissipation of outstanding artistry—and without angering viewers who might prefer to tune elsewhere.

Production Cost—Approximately $425,000.
Sponsors—More than 300 electrical companies, through N. W. Ayer & Son.
Producer—David O. Selznick; assistant to the producer, Arthur Fellows; production assistant, Shirley Harden; production coordinator, Riley Jackson; associate producer, William Phillips; supervising film editor, Gerard Wilson.
Script—Ben Hecht, writer-editor; individual scenes by Robert Benchley, Arthur Gordon, Irwin Shaw, John Steinbeck, Max Shulman, Mark Twain, Gilbert Chesterton.
Music—Victor Young, composer-conductor.
Designer—Furth Lillico.
Telecast on 425 tv stations via a 4-network hookup, Sun., Oct. 24, 9-11 p.m. EST.

HALLS OF IVY

AFTER much dawdling in its premiere showing Oct. 19, the second episode of the new Halls of Ivy series last Tuesday night, was a welcome refresher for the viewers. The second film on CBS-TV presented a half-hour of whimsy and folksy humor in the academic manner that has made the series' radio counterpart so palatable.

For some reason, the first Halls of Ivy program on tv tried to “establish” the characters—Ronald Colman in the role of Dr. William Todhunter Hall, president of Ivy U.; Benita Hume as Mrs. Hall, and the sundry characters who are professors, maid etc., in this Ivy-class comedy series. This attempt came near to being crushed under its own cumbersome weight and it gave Mr. Colman, a great performer, an unfair burden.

Last Tuesday, the viewers' reaction should have been thrown from reverse into high gear. The whole program came to life. The rapid action of the professors, along with the pages of phrase and pun which made the radio Ivy good entertainment, was duplicated on tv.

The first episode dealt with the strain on a university president who awaits word from the board of governors on his re-election to the top post at Ivy U. That's been done so many times that the edge has worn off.

The second chapters of this tv series clears away all this clutter. With our president firmly
The correct equipment means "Everything" in a TV station operation. Together, the three books shown here constitute a buying guide covering the minutest of details in this field. They are RCA's answer to the question of what is best and newest in antennas, transmission line, transmitters and accessories. The three books fully describe the thousand-and-one items that make up a UHF or VHF television station.

In 300 pages filled with charts, tables and descriptions, these books present a complete and authoritative explanation of station requirements in the language of the station operator.

Ask your RCA Broadcast Representative for your copies or write Dept. J-22, RCA Engineering Products Division, Camden, N.J., on your letterhead. In Canada, address RCA Victor Company Ltd., Montreal.

Delight after Dowdling
decent individual ought to read "Passion" and asks for the professor's head.
The story is delightful. The actor Arthur O. Bryan who plays the role of Prof. Warren, the author, is a captivating character. Luckily, the second episode of the Halls series managed to climb out of the poison oak and take its place with other top quality tv entertainment.

Production cost: About $45,000.
Sponsors: International Harvester Co. through Leo Burnett Co., Young & Rubicam and Aubrey, Finlay, Marley & Hodgson, and National Biscuit Co. through McCann-Erickson (alternate weeks).
Network: CBS-TV, Tues., 9:30-9 p.m.
Creator: Don Quinns.
Writers: Dorothy Merlin and Don Quinn.
Stars: Ronald Colman and Benita Hume.

DISNEYLAND
WALT DISNEY is an individual who never has been dismayed by the vast scope and breadth of his motion picture projects. In his latest undertaking, the Disneyland tv series, which was launched last Wednesday on ABC-TV, Mr. Disney brings with him the same spirit of soaring ambition and adventure, promising to enthral viewers with material that, in some instances, transcends even life itself.

The opening show began with a few quick looks at the Disney studios, then shifted to Mr. Disney's office, where the audience was given a personally conducted tour of the real Disneyland, now under construction, from which next year's Disneyland telecasts will originate. The four sections of this place of "knowledge and happiness," as Mr. Disney described it, also comprise the four realms of entertainment to be covered by the tv series, which were previewed on the initial program.

Frontierland was introduced by a scene from "Davey Crockett" with Fess Parker portraying that stalwart Kentucky pioneer. Short looks at a reindeer roundup in Lapland, a Portuguese bullfight, penguins in the Falkland Islands and other strange creatures from faraway places provided enticing samples of the full-scale treatment of Adventurers promised for subsequent programs. A glimpse of a rocket flight to the moon was exciting enough to guarantee a large audience for the Tomorrowland program on that fascinating subject. More familiar fare was presented in the Fantasia preview, the Disney version of an Uncle Remus story.

Having shown his viewers what to expect in the weeks ahead, Mr. Disney devoted the second half of the premiere Disneyland program to a review of the career of the most famous Disney character, Mickey Mouse, beginning with "Plane Crazy," Mickey's first appearance in 1927 and continuing through other adventures, shared with Pluto, Dopey and Donald Duck, to the high point of his dramatic career as "The Sorcerer's Apprentice."

The program's star-spangled opening and closing devices were symbolic of a star-studded series ahead, if the short takes we saw last Wednesday are true samples of what lies ahead. Walt Disney for the past 25 years has entertained us royally at the movies. This year he seems destined to do at least as well by us in our own homes, via television.

Production Cost—$100,000.
Sponsor—American Motors Corp. for half an hour each week through Geyer Adv., and Derby Foods through McCann-Erickson and American Dairy Assn. through Campbell-Mithun Inc. for half an hour on alternate weeks.

Network—ABC-TV, Wed., 7:30-8:30 P.M. EST. Executive producer—Walt Disney.
Additional credits for premiere show—Producer-writer, Bill Walsh; directors, Robert Florey and Wilfred Jackson; musical score, George Bruns; photography, Charles Boyle; production coordinator, Hal Adelquist.

ALL ABOUT BABY
MOTHERS of new babies, particularly first babies, would unanimously vote DuMont's new Friday afternoon program, All About Baby, the best show on tv today, according to the mother of a three-year-old who watched the series' opening program, Oct. 15, with this reviewer.

"I'd have given anything to have a program like this when Mark was an infant," she said, as we watched Ruth Crowley, registered nurse and child expert, explain what every new mother should know about her baby, using five-week-old John Schwartz as a model, while his mother beamed proudly in the background.

Nurse Crowley explained away the natural but groundless fears every parent has over the newborn child's lack of coordination, flat feet and bowed legs, crossed eyes and other unattractive characteristics exhibited by most bundles from Heaven during their first days on earth. She handled the commercials for Swift's meats for babies with equal skill. Her calm, professional explanation of the place of meat in the baby's diet leaving an impression of honesty and knowledge that packed much more sales punch than the over-impassioned plea to buy which too frequently marks—and mars—the sales pitch of the professional announcer.

All About Baby DuMont Telecast Network, Fri., 2-2:15 p.m. EST
Production Cost, $1,824
Sponsored by Swift & Co., through McCann-Erickson Inc.
Produced by Bernard Miller for Jules Power Productions and directed by Dick Locke.
EX-OKIE HOLDS REIN ON
BIG TEXAS’ BIGGEST INDUSTRY...

WFAA’S Murray Cox makes hay with Texas’ farm-ranch market!

Broadcaster, editor, traveler, promoter Murray Cox has Texas’ big, fertile farm-ranch market under thumb. To farmers, Murray is one of them: son of an Oklahoma cotton farmer and former county agent, Murray’s feet fit a furrow. Backed by the singularly broad (even for Texas) coverage of radio station WFAA, Murray’s first-hand knowledge of farm problems and first-name acquaintance with farm-folks made his broadcasts unusually successful at selling the 35% of Texans who get their living from the land.

Murray goes among ‘em for fresh program material. He carries a tape recorder for interviews, often makes remote broadcasts from the field.

On the road as often as on the air, Cox covers about 1000 miles a week. Here he inspects irrigated cotton near Lubbock. A tireless worker for soil conservation and pasture improvement, Murray is recognized “one of the best friends of farmers in Texas.”

This salesman is a farmer’s daughter. New addition to Murray’s WFAA farm department Jean Tyra, the “Gal from the Country,” mixes farm family and community activities with music.
(With apologies to Willie Mays)

**say hey! sell in the day over WMCT, Memphis**

Sell in the day on WMCT on shows that have established local personalities, in participating programs combining live personal selling with established film and local entertainment vehicles.

* Participating spots on CAPTAIN VIDEO
  available at only $1.32 cost per thousand families*

* Based on August, 1954, Pulse

CAPTAIN VIDEO is heard Monday through Friday over WMCT 5-5:15 P.M. with Trent Wood. Card rate applies—no premium charge for live announcements.

**What makes the DAY so BRIGHT over WMCT?**

- Preferred low band Channel 5
- Maximum power (100,000 watts transmitting from our 1088 foot tower)
- Audience established since 1948
- The first station in the heart of the Mid-South agricultural and industrial empire serving the largest area with the clearest picture in the Mid-South from Memphis.

**Community Service**

**EDITOR:**

The work of radio-television stations in the metropolitan Philadelphia area in serving the community was never better demonstrated than in the aftermath of Hurricane Hazel.

The damage caused by the hurricane resulted in a serious disruption of our bloodmobile schedule. One of our large firms had practically its entire force doing storm work and had to cancel two large visits because it was humanly impossible for its employees to participate.

But we needed 600 pints of blood for patients in local civilian and military hospitals—and turned to radio-television and the press for help. Within minutes after being alerted to the need, the stations made arrangements to help. They gave wide coverage to special copy prepared for the appeal. As always, the public responds when made aware of an emergency—and we were able to collect the necessary amount of blood.

May we use the medium of your news columns to give an editorial pat on the back to the stations management and personnel for their prompt and efficient cooperation. It was wonderful and everybody appreciates it—especially those folks whose lives were saved because the blood was available.

Geography Lesson

EDITOR:

Dick Doty [8-T, Oct. 18] is undoubtedly a good disc jockey and I am sure WHAM is a powerful station with all kinds of coverage. But somebody needs to take a good look at a map of Canada.

Mr. Doty says, “WHAM—late at night covers some forty states, all of Canada etc.” Canada is substantially larger geographically than the entire mainland United States and Alaska put together. No 50,000 watt station could come close to covering the single province of Ontario, just one of our ten provinces. Canada even has two more time zones than the United States—our Atlantic time zone extending eastward of our own and your eastern time zone, with the Newfoundland time zone out east of that again...

We are prepared to admit that WHAM is a powerful station, but this particular claim does seem just a shade far-fetched!

T. J. Allard, Exec. Vice President

Another pace-setting musical sales-builder from GUILD...

the FLORIAN ZABACH show

Set your sales to music, and watch them climb to melodic heights with GUILD's newest musical winner. Produced with the same 'personality magic' that has made GUILD leader in production of TV films with sales impact for sponsors.

- 39 sparkling half-hour shows available for immediate delivery!
- Quality production . . . beautiful settings . . . inspired musical arrangements!
- Featuring the surprise hit of the year . . . vivacious Mary Ellen Terry as Florian's tiny dancing pixie!
- Directed by Duke Goldstone, director of Guild's Frankie Laine and Liberace shows.

LONG ISLAND DAILY PRESS, MONDAY, OCTOBER 4, 1954

The big show on TV last night was the debut of the "Florian Zabach Show" on WPIX from 10:30 to 11 p.m.

THIS SHOW was the big one last night not because its premiere was particularly auspicious, but because this will be one of the most talked-about shows on TV in a very few months.

I don't think there's much doubt about it. Zabach is a real charmer, possessed of the properties that go to make up a matinee idol.

Filming, production and staging on the series are tops.

A combination you can’t beat… the booming voice of an established VHF station with maximum power, 1049 foot tower and CBS, ABC and Dumont programs in a pond that not only includes America’s 25th metropolitan market but the entire eastern half of Virginia (including Richmond) and all of northeastern North Carolina. Buy the granddaddy of them all — then watch your sales curve climb.

William Murphy
on all accounts

AT 26, William Murphy, timebuyer at Benton & Bowles, New York, has seen service with the Navy and four advertising agencies.

"I'd say that Bill is the 'oldest' 26-year-old I've seen in the business," one of his colleagues volunteered. "He got his maturity in a pressure cooker."

Mr. Murphy began cooking in advertising in 1948 when he joined the Buchanan Agency, New York, as production assistant on Teen-timers Club on Mutual. He served in production for a year, then turned to the media department as an assistant timebuyer under Bill Smith, then timebuyer at Buchanan on such accounts as Reynolds Metals, Texaco, DuMont TV, Welch Grape Juice, Paramount Pictures and Eskimo Pies.

In March of 1950, Mr. Murphy moved to Erwin, Wasey, New York, as a full-fledged timebuyer himself. There he handled all of the agency's accounts in radio and television.

In August 1952 he joined Harry B. Cohen, New York, for a year, transferring in September 1953 to Benton & Bowles in his present position as timebuyer on the General Foods account, Post Cereals Division. Among programs that he has cleared time for are the Roy Rogers show on NBC-TV, Mama on CBS-TV and Portia Faces Life on CBS-TV, as well as Galen Drake on CBS Radio.

Born March 3, 1928, in Teaneck, N. J., he first attended a military school, then Xavier High, after which, at the age of 17 in 1945, he enlisted in the Navy. Upon his return from service he enrolled at Nichols College, Dudley, Mass., where he majored in marketing and advertising. He received his degree in 1948, joining Buchanan immediately thereafter.

Mr. Murphy has the timebuyer's normal concern about the current ratings scramble but is optimistic about what he regards as the fine start being made by the Advertising Research Foundation. He feels that, through this industry-sponsored organization, rating services and research in general can be placed on their proper scientific level and important new fields of advertising knowledge can be explored.

Mr. Murphy married Rita Guthie in April 1952. They have two children, Richard, 15 months, and Mary Beth, one month. The Murphys currently are designing and building their own home in Pound Ridge, N. Y.

Mr. Murphy's hobbies are skiing, tennis and golf.
It's No Draw...in Omaha

YOU can "corner" the television market in the Omaha area at one low cost ... with one TV station ... Television Center KMTV.

Omaha area viewers reported in the latest Pulse* that they preferred KMTV's programming in 8 of the 9 time classifications! During the daytime, when Omaha housewives make up their minds about what products to buy, KMTV has a 63 per cent larger audience than Omaha's second station.

And when Dad and the kids get home, the dial still stays tuned to KMTV-Channel 3. Omaha families said KMTV has 11 of the top 15 weekly shows and 7 of the top 10 multi-weekly shows. And KMTV's weeknight weather-news summary was named the area's most popular multi-weekly and locally produced show!

These KMTV viewers are actually a bonus market for advertisers. Rand McNally's business survey reports that this year Omaha has been among the nation's top 10 cities for business activity more often than any city except New York. Employment is at an all-time high, and measurable family income is $841 above the national average.

You can reach all of this prosperous market by using only KMTV ... because of the flat Nebraska-Iowa terrain and KMTV's maximum power and low channel 3.

So sell the big Missouri Valley—nearly a 1½ million people with 257,000 TV sets and almost 2 billion dollars to spend—at one low cost with KMTV. Contact your Petry man or KMTV today!

our respects
to GRADY ELGIN COLE

DOWN in the Carolinas they'll tell you that no one will ever know what it was the governor of one state was saying to the other—because that must have been Grady Cole talking to himself.

Although WBT's Charlotte's farm editor has never been head of either state officially, it has been said that he could be if he wanted to. One strong deterrent to such a move by Mr. Cole, described by his employers as the Southeast's highest paid radio announcer, is that "I pay more income tax each year than either of them makes."

Last week the WBT management, which can recognize a good thing after seeing it 25 years, climbed on the Cole bandwagon with some tributes of its own after watching honors being extended on every hand to the station's "Mr. Dixie" for a quarter-century.

WBT's "Grady Cole Anniversary Week" ended last Friday night with an hour-long program on the 50 kw CBS affiliate honoring the popular farm editor. Taped anniversary greetings came from CBS President Frank Stanton, Edward R. Murrow, Perry Como, Garry Moore, the governors of North and South Carolina and other national figures. Also paying respects on the program were a farmer, a mill worker, a store clerk, a preacher and other "plain folks"—people the rough-hewn Mr. Cole likes best and to whom he has devoted his career.

The recipient of these honors was born in 1906 in North Carolina's rural Montgomery County, where agriculture was the chief occupation, but where, as Mr. Cole was quoted in a Collier's article about him, "the land was so poor the only thing you could raise was a family."

The Cole family accordingly moved to Charlotte where young Grady was sent to Major Baird's Preparatory School. He remembers himself as a highly unregimented pupil and recalls two occasions when the rawboned major disciplined him with a right cross to the jaw. At 18 he struck out for himself to New York in search of his fortune, but soon found he would never get rich working as a clerk in a coupon redemption center. He returned to Charlotte and began writing for the Associated Press, but wanderlust took hold again after several months and he took a traveling job as advance press agent for a patent medicine firm. His desire to travel subsided after a tour of the nation and he returned to Charlotte a second time from "seeing the world."

Mr. Cole contented himself with being a reporter for the Charlotte News until 1929 when he embarked on the "greatest adventure of my life"—one which later brought his name before countless southern homes and influenced the radio listening habits of generations of Carolinians.

In 1929, the News and WBT had an agreement providing free plugs for the News on WBT in return for sponsorship of a five-minute newscast, with the newspaper supplying the newscaster. The 23-year-old Mr. Cole was given the assignment and his deep-throated, stammering delivery had an instant and captivating effect on the listeners. He became a staff announcer in 1930, and was fired when the station changed ownership in 1933. In the three days that ensued WBT was flooded with mail demanding that Mr. Cole be returned to the air, the town of High Point, N. C., sending in a petition bearing nearly 10,000 signatures. On the fourth day Grady Cole and the News returned to WBT.

Mr. Cole continued his news programs and branched out with other WBT programs, all successful. It has been said his secret is that he knows the likes and dislikes of his audience, their prejudices and their strong points. And he has never gone "high-falutin'" on them. He is one of the South's most sought-after speakers at county fairs, cattle sales and other gatherings of farm folks, and even in urban Charlotte his popularity has never wavered. He explains his success on this early morning program this way: "I am the only one on radio who sounds worse than the listeners feel."

His friendliness and sincerity help make him one of the nation's top radio salesmen. Of the sponsors of his 5:30-9 a.m. Grady Cole Time, Comet Rice dates back to 1932 and B. C. Headache Powders even longer. McCoy's gas and Tennessee Coal & Iron Co. have been with him 17 years and Baxter Clothes for eight years.

Mr. Cole has been honored many times for his public service accomplishments, including a presidential plaque for his work in raising funds for a Kentucky flood disaster. One instance of his hold on listeners: some 350 babies in the WBT area have been named for him.

The WBT farm editor is one of the highest paid announcers in the business—but he works for it. He's up daily at 4 a.m., broadcasts until 9 a.m., reads mail and talks to visitors until nearly lunchtime, then is off to address a civic club or farm gathering in a nearby town. He returns to WBT studios in the late afternoon for recording sessions, then is off to emcee a banquet, attend a county fair or judge an amateur show. Then the long drive back to Charlotte and to bed by midnight. He repeats this formula seven days a week, 51 weeks a year, taking off one day, Easter Sunday, in the 52nd week.
Frequent and sudden shifts of media and methods of selling are commonplace in the advertising business. An advertising campaign must produce results or be supplanted by a different approach. Thus, we point to the fact that advertisers such as these have continued their same WSM live talent programs year after successful year. This is notable recognition of proven selling power, pointing the way to increased sales for your product in the rich Central South Market.
Respect for trifles makes WBNS-TV central Ohio's leading station.

**WBNS-TV Props**
Each prop, from buttons to backdrops is minutely checked and rechecked before air-time.

**WBNS-TV Commercials**

---

**IN PUBLIC INTEREST**

Harvest Moon Festival
PERSONNEL of WMAQ-WNBQ (TV) Chicago have been selected to take part in the annual Harvest Moon Festival sponsored by the Chicago Sun-Times in that city, with proceeds going to the newspaper's fund for hospitalized veterans. On-the-air auditions and judges will be provided by the stations to boost the project.

Tv for Sick Kids
WCIA (TV) Champaign, Ill., and tv set manufacturers have teamed up to bring hospitalized children a little diversion and happiness. The station is conducting a campaign to raise money for the purchase of 17-inch television receivers to be installed in children's hospital wards before Christmas. Manufacturers are cooperating by selling the sets at cost.

WTRI (TV) Aids Community Chest
A NOVEL TWIST was given to the Community Chest Drive by WTRI (TV) Albany, N. Y., when it filmed sequences of 12 Red Feather agencies in action in their home communities. The films were then worked into the current drive for funds as public service spots.

Diversified Charities
"CRUSADE FOR CHILDREN," a marathon radio and tv show to benefit mentally and physically handicapped children, is scheduled this month by WHAS-AM-TV Louisville, Ky. Funds are not being collected for a specific agency, but any of the recognized charities will be eligible to receive money to be apportioned by a panel of Louisville religious leaders.

Athletic Contribution
WAER (FM) Syracuse, N. Y., helped the Red Cross in a blood drive at Syracuse U. by airing station breaks recorded by university football players. The athletes spoke for increased donations to the drive.

War Waged on Polsy
WFIL-TV Philadelphia has scheduled a 16-hour telethon for the benefit of United Cerebral Palsy. Both locally and nationally known entertainment figures will appear on the show. Proceeds will provide equipment, therapy, and treatment for cerebral palsy victims.

"Porcelain Coffins"
KYW Philadelphia is pushing an attack on the "porcelain coffin"-abandoned iceboxes which have become tombs for children who locked themselves in while playing and could not get out. The campaign is being pushed with special programs, talks on established local shows, station breaks, and the proffering to the public of a safety booklet telling how to render unused iceboxes harmless. KYW hopes that its drive will culminate in the passage of a bill by the state legislature to make it illegal for iceboxes to be discarded without first removing hinges and locks.

KMOD Promotes Safety
KMOD Modesto, Calif., is promoting a traffic safety campaign with a special series from 6:30-7:30 p.m. Monday through Friday and 10-10:30 a.m. Saturday, called the KMOD School Traffic Safety Program. Wrist watches are given to winners of a traffic safety slogan contest. Slogan winners are interviewed on the air and motorists cited by the police department for their safe driving practices are interviewed by tape-recording.
FLORIDA'S PIONEER TV STATION—
WTVJ—HITS NEW HIGH IN POWER!

Main room of the WTVJ transmitter building showing visual and aural exciters, and amplifiers and control console.

With a new 35 KW G-E transmitter and a new antenna, WTVJ of Miami claims 100,000-watt power. This new high in power is 606% of the former 16,500 watts. Station executives are especially pleased because they now have the power that beckons additional advertising revenue in black and white TV. And this same transmitter also serves them for color.

According to station executives—with increased power WTVJ beams clear signals as far as Vero Beach, 156 miles north of Miami; also to Fort Myers, 154 miles west, and all the way south to Key West. Thousands of letters from TV viewers testify to the fine reception achieved since the station increased its power with the G-E 35 KW transmitter.

Now WTVJ's fine morning and evening programs reach 400,000 additional viewers. Other television fans who picked up a fringe signal now enjoy clear pictures on their receivers...just as if they were right in the heart of Miami itself!

General Electric Transmitter
Housed In New Building

The 35 KW transmitter is housed in an all-air-conditioned transmitter building 20 feet from the base of the new 1,000 foot tower. G-E field men teamed up with station engineers in planning the equipment layout to save steps and keep costs at a minimum. The transmitter delivers a 100 KW effective radiated picture signal, and a 70 KW effective radiated sound signal.

The new building also contains an auxiliary power plant for emergency use. This auxiliary can supply sufficient electricity to light a modern community of 500 homes. Engineers who tend the transmitter and tower use the building for living quarters. The new equipment is manned twenty-four hours a day.

Dependable Performance of G-E Equipment Since Station Started

Here's an interesting statement from Mr. Lee Ruvitch of the station—"WTVJ was Florida's first station to venture into TV. In over five years the G-E transmitter, antenna, and studio equipment have exceeded every promise of performance made for them. Station executives didn't hesitate to call upon General Electric to supply the new equipment. They know that the G-E trademark on a transmitter is a sure sign of superb quality—the industry's finest!"

Equipment Will Operate Even During Hurricanes

Hurricanes occasionally, and lightning storms more frequently...that sums up the weather hazards in Miami. Station executives tell us that even when hurricanes whip up 160-mile-an-hour gales WTVJ stays on the air! The sturdy 83-foot, 6-bay G-E antenna has withstood the fury of violent storms. And the tower is secure. 4½ miles of cable were used for the guy wires. They are fastened to "deadmen"—concrete anchors weighing 380,000 pounds each. Enough concrete and steel to build a big ocean-front hotel went into the 12 "deadmen" supporting the huge tower and antenna.

In extending its coverage the station again shows true pioneering spirit and the courage to move ahead. General Electric is proud that its equipment has contributed to the progress of WTVJ.

WTVJ transmitter building showing base of tower in rear and 13,000 volt power lines.

11TH HOUR RADIO-TV VOLLEYS CLIMAX TURBULENT CAMPAIGN

Both parties scramble for the mikes and cameras in closing days of crucial campaign. Claims and counter-claims for equal time mark parties' last-minute jockeying. Even as the last shots are fired networks and stations prepare for record coverage of an off-year election. Important committee chairmanships are in the balance.

A STORMY autumn of political broadcasting, marked by bickering, spending and Sunday campaigning for votes, comes to an end tonight (Monday) as major parties stage election eve programs.

Democratic feeling reached fever heat in mid-week after five radio and TV broadcasts by President Eisenhower, including the first pickup of a Cabinet session (see story page 29).

Chairman Stephen Mitchell of the Democratic National Committee asked networks for equal time in which to reply to Presidential broadcasts but the requests were denied except in the case of NBC, which promptly became embroiled in another controversy with the GOP, ending with NBC's grant of a half-hour last Saturday to both parties on radio-TV.

The Republican National Committee has preempted I Love Lucy on the CBS-TV network (140 stations) from 9:30 EST tonight for talks by the President and Vice President Nixon. The talks will be carried simultaneously on Mutual and ABC Radio.

The election eve Eisenhower-Nixon telecast will be carried at 8 p.m. on CST zone stations and at 7 p.m. Mountain Time. The telecast will be carried by hot kinescope on West Coast CBS-TV stations at 9 p.m. PST. President Eisenhower's talk will originate in Washington, while Mr. Nixon's speech, summarizing his findings on his western speaking tour, will originate "somewhere in the West," according to a committee spokesman.

The spokesman said the committee has urged GOP state committee chairmen to purchase adjacent time to the network broadcast for use by respective GOP candidates.

The Citizens for Eisenhower Congressional Committee bought what it termed as the largest paid political telecast in history last Thursday night (9:30-10 p.m. EST), plus a simultaneous network radio lineup. The telecast included 218 TV outlets, comprising NBC-TV, 71 CBS-TV outlets and "a few" DuMont stations. The 471-station radio network, the spokesman said, included NBC Radio and ABC Radio.

The television network broadcast, he said, reached 50 to 60 million people. The President's speech originated at a committee banquet staged at Washington's Statler Hilton.

Intensified last-minute campaigning by the GOP included President Eisenhower's flying trip Friday to Cleveland, Detroit, Louisville and Wilmington, Del. FCC joined the pre-election turmoil Thursday by ruling that three Nashville TV stations have not violated Sec. 315 of the Communications Act or FCC regulations in refusing to accept paid political broadcasts of candidates.

In a letter to Leonard W. Hall, chairman of the Republican National Committee, the Commission explained its ruling on protests made by Thomas P. Wall Jr., candidate for the U.S. Senate, and Robert Donihii, candidate for Congress, both Republicans.

The Nashville electioneering has involved filing of libel suits by Edward Lamb, station operator now involved in FCC renewal proceedings, and Lacey Reynolds, his Washington representative. The situation became so tense that WSM-TV, WSIX-TV and WLAC-TV refused to sell time to some candidates because of "intemperate" statements.

John H. DeWitt Jr., WSM-AM-TV president, in a letter to the FCC had said their attorneys had advised the stations they should not subject themselves to libel for liability in political broadcasts. WSIX-TV stated it seriously doubted the qualifications of Mr. Donihii to run as a legally qualified candidate.

With announcement of the decision and of the Democrats' acceptance and assignment of Adlai E. Stevenson as their speaker in a half-hour free NBC telecast and broadcast slated last Saturday night (8:30-9 p.m. on NBC-TV

BROADCASTING

IF THE DEMOCRATS WIN

These would be chairmen of the Senate and House Interstate & Foreign Commerce committees, which have jurisdiction over most legislation affecting radio and tv.

Sen. Magnuson, also a member of the Senate Appropriations Committee, comes from Seattle; and from 1931-35 served as prosecuting attorney of King County (Seattle), in the Washington State Legislature and as assistant U.S. district attorney. He was a Lieutenant commander with the Pacific Fleet in World War II. Sen. Magnuson was named to the old Senate Commerce Committee in 1945 and became a member of the Senate Interstate & Foreign Commerce Committee which was organized in 1947.

Rep. Percy Priest (Tenn.) would be in line for chairmanship of the House Interstate & Foreign Commerce Committee, replacing GOP Rep. Charles A. Wolverton (N.J.). Rep. Priest currently is on his seventh term (since 1940) as congressman and has been a member of the House Interstate & Foreign Commerce Committee since 1943.

Rep. Priest was ranking House Democrat on a joint committee which worked out Senate-House differences in the McFarland Act of 1952, first major amendment to the Communications Act of 1934. He was a member of the House Commerce Communications subcommittee from 1943 until that unit was discontinued in the 80th (GOP) Congress in 1948. His media experience includes 14 years (1926-40) on the Nashville Tennessean—from reporting to the managing editorship.
ELECTION

The THE

date

and 10:30-11 p.m. on NBC Radio) the Republicans came back with a bid for free time of their own in which to answer Mr. Stevenson.

NBC resolved the Democrats-GOP free time hassle late Friday by granting the GOP the 8-8:30 p.m. spot for the last Saturday on NBC-TV and NBC Radio. The half-hour was to be shared by Attorney General Herbert Brownell, cabinet member Oveta Culp Hobby and Bertha Adkins, assistant to the Republican National Chairman.

In his request for NBC time, Democratic Chairman Mitchell referred to 'the unusual amount of partisan political content in the talk shows' by Eisenhower before non-political audiences which have been carried by the national radio and television networks free of charge,' but did not mention specific cases.

NBC said its decision to grant Mr. Mitchell's request stemmed from "NBC's long-standing policy of maintaining balance and fairness."

Other networks meanwhile stuck to their no's.

In a lengthy telegram replying to a second appeal by Mr. Mitchell, CBS President Frank Stanton on Thursday made plain he is still persuaded that "our denial of your request for free time for Adlai Stevenson to balance time given to President Eisenhower and members of his staff is wholly consistent with the CBS tradition on public service, a tradition which you recognized in your telegram."

"As I previously stated," Mr. Stanton continued, "our position is based on our long-established policy not to provide time to reply to the President or members of his Cabinet when they broadcast as such or are reporting to the people on their official activities."

The CBS president enumerated CBS Radio and TV broadcasts by the President and Cabinet members during the past two months, totaling about two hours, and the amount granted the Democrats for the 1954-1955 off-year Congressional elections campaign when Mr. Truman was President, which totaled about eight hours.

He concluded:

No 'Blackout,' Says CBS

"We believe . . . that our record in this as well as in prior campaigns establishes that we have always maintained fairness and balance in our free time as you request and which is our first objective. We vigorously deny your assertion that there has been any 'blackout of Democratic arguments' in our 'free time' or any 'political discrimination' on the CBS Radio and Television networks."

"While I personally interpreted your Oct. 26 wire as a request rather than a demand, a few of our newscasters did report it as a 'demand. I regret that this terminology disturbed you. I would respectfully call to your attention, however, that in circumstances such as these the line between 'request' and 'demand' is not always easy to draw and a number of newspapers and wire services similarly described your wire as a demand.'"

On behalf of Mutual, President Thomas F. O'Neill rejected Mr. Mitchell's request after "careful study" with the statement that MBS' broadcast of recent Eisenhower addresses was in conformity with its 'established policy' of affording time to the President and his officials when appearing in their official capacities."

"I want to assure you," Mr. O'Neill continued, "that it is our continuing endeavor to provide free time for the maximum coverage of pre-election political activities and to treat with complete fairness the Democratic, the Republican and other political parties."

HISTORICAL PRECEDENT: THE CABINET ON TV

CABINET MEETING, 1954, made political and tv history last Monday. Before a portrait of Abraham Lincoln, a CBS cameraman picks up the proceedings for the network pool. At table (clockwise from l): Secretary of Labor James P. Mitchell; Postmaster General Arthur E. Summerfield; Secretary of State John Foster Dulles; President Eisenhower; Secretary of Defense Charles E. Wilson; Secretary of Agriculture Ezra Taft Benson; UN Ambassador Henry Cabot Lodge; Maxwell W. Robb, Secretary to the Cabinet; Sherman Adams, Assistant to the President; Secretary of the Treasury George M. Humphrey; Attorney General Herbert Brownell Jr.; Secretary of Commerce Sinclair Weeks; Secretary of Health, Education & Welfare Oveta Culp Hobby.

TELEVISION and radio brought the White House and President Eisenhower to the public three times within 24 hours last Sunday-Monday, making governmental history as a Cabinet session was broadcast for the first time.

Echoes of the Presidential appearances were heard all last week as networks were called on by Democratic leaders to give them time to reply on the ground that the broadcasts affected the political campaign (see story page 27).

Most of the controversy followed a Monday simulcast (7-7:30 p.m.) from the Cabinet room of the White House, where Secretary of State John Foster Dulles reported on the recent agreement on European defense. Public reaction to the Cabinet meeting was predominantly favorable, according to the Executive Office.

The broadcasts established Secretary Dulles as an effective speaker before the microphone and camera. His informal story of foreign events, interrupted by several planned and unplanned questions, brought the public an effective outline of what has been happening in Europe in recent weeks. Prize flub of the broadcast series came during an awards ceremony later that night when President Eisenhower referred to Frank Folsom, RCA president, as "Mr. Stanton," apparently confusing him with Frank Stanton, CBS Inc. president.

Unsolved late last week was an industry mystery: Who asked CBS to ask the White House to telecast the Monday Cabinet meeting?

Mr. Stanton wouldn't tell, apparently being under obligation to protect a confidence. Murray Snyder, assistant to Presidential Secretary James C. Hagerty, told B&T the President has long felt the public would like to observe a Cabinet meeting, and was convinced Sunday while at his Camp David (Md.) retreat that the Dulles report provided the ideal vehicle for such a simulcast.

Unexplained are the routine steps between the President's decision and the request of networks for permission to pick up the Cabinet meeting. CBS-TV handled the Cabinet telecast with Sig Mickelson, news-public events vice president, in charge of overall supervision. Larry Beckerman directed and Ted Ayres produced. Lew Shollenberger was announcer. Cameramen were Norman Hicks, Jack Wadron and Jack Lepine. The meeting was unheated, aside from several prepared questions and a 10-minute camera check, the White House having insisted on special-events treatment. Production went so smoothly that many newspaper critics described the meeting as a carefully rehearsed production in which Robert Montgomery had a part. Mr. Montgomery was not involved in any way.

All Monday evening the Cabinet simulcast was presented on the air in delayed versions. NBC carried quick kines on the Camel Caravan (7:45-8 p.m.). DuMont interrupted Morgan Beatty's Alka-Seltzer newcast at 7:15 p.m., devoting most of the quarter-hour to the live Cabinet pickup and inserting commercials with White House permission since Mr. Hagerty interpreted the program as a news event. Edward R. Morrow devoted most of his CBS Radio program to a delayed pickup of the Cabinet meeting.

President Eisenhower appeared late Monday evening in a speech following presentation of the James V. Forrestal award to him by Mr. Folsom, president of the National Security Industrial Assn. The President spoke by film on the Diamond Jubilee of Light program Sunday evening, his remarks dealing with faith, hope and the American way of life.

Newspaper editorial comment on the Cabinet pickup was generally favorable, though in most cases it was observed that the simulcast had political implications.

every half-hour, starting at 9:25 p.m.

WOR New York will present frequent cut-ins from Mutual's coverage under the sponsorship of Harris, Upham Co., New York investment firm, starting at 9:05 p.m. The agency is Lewin, Williams & Saylor, New York.

WMCA New York will broadcast up-to-the-minute summaries of election returns every 15 minutes from the time the polls close, with a 10-minute prediction program scheduled for 7:15 p.m. The entire coverage will be sponsored by Willys Motors Inc., on behalf of its dealers in the Greater New York area, through Canaday, Ewell & Thurber, Chicago.

WNBC New York will turn over its entire broadcast facilities and commercial time to election returns from 7:30 p.m. until crucial contests are resolved.

WOR: New York will devote its entire broadcast schedule to returns, interspersed with musical selections should political activity flag, starting at 7 p.m.

WNHC-TV New Haven will begin its election coverage at 6:15 p.m., presenting local returns until 9:00 p.m., when it will carry NBC-TV coverage.

DuMont's WABD (TV) will present regular news bulletins, starting at 9 p.m. Coverage will be under the direction of James Caddigan

November 1, 1954 • Page 29
Election Color

WRCA-TV New York reported last Thursday that it will present its local "cut-in" coverage of election returns tomorrow (Tuesday) in compatible color, claiming it is the first time that color will adorn such programming. A spokesman said that special teletype paper in various colors will be used on the telecast and Bill Berns, director of news and special events, has asked Democratic and Republican spokesmen to indicate which color they desire for the political "thermometer" which will chart returns. The color cutting will be presented for five minutes every half-hour, starting at 9:55 p.m. EST and continuing through 12:55 a.m. Bromo-Seltzer, through Lennen & Newell, has signed to sponsor WRCA-TV's coverage.

and David Lowe. The station was to present a special half-hour filmed program yesterday (Sunday) under the sponsorship of Amalgamated Lithographers Local No. 1 (CIO). The program was to consist of a talk by Franklin D. Roosevelt Jr., candidate for Attorney General in New York, to 3,000 members of the union. The agency is Paul Minor Assoc., New York.

National Carbon Co. (Prestone), for the third successive year, has brought sponsorship of WPXZ (TV) New York's coverage. Special bulletins will be presented from 9-11 p.m., when the station will devote its entire schedule to election results. WAAF Newark will cancel its commercial programs at 9 p.m. to present returns from New York and New Jersey contests. Starting today (Monday) at 7:30 p.m., WAAF will allocate its broadcast time to programs sponsored by the New Jersey Democratic and Republican committees, with the Democrats purchasing 3½ hours and the Republicans 1¾ hours.

Individual stations across the country have reported extensive plans for pre-election and election eve coverage of the election.

WTIC Hartford, Conn., is joining forces with the Hartford Courant to bring reports from more than 30 locations throughout the state. Remote crews are scheduled to be present at the headquarters or homes of major candidates. A feed to NBC also is planned.

WIP Philadelphia is covering its local area plus the Pennsylvania and New Jersey state capitals on election night. An assistant professor of political science from the University of Pennsylvania is to help the news staff analyze trends as they appear.

John Vandercook, ABC commentator, recently originated one of his nightly programs from WFIL Philadelphia. Mr. Vandercook interviewed candidates and looked over the local TV and radio facilities as part of his preparation for the job of handling ABC's coverage on the night of the election.

WMAR-TV Baltimore plans state-wide coverage of the contests there with the help of newsmen from the Sunpapers owned by the licensee of the station.

WAAM (TV) Baltimore expects to give the election heavy coverage on election eve which is the second day of the station's seventh year of programming.

WTOP-TV Washington, D. C., donated time for a "Meet the Candidates" program during which the nearby congressional candidates spoke. Maryland's gubernatorial candidates are to talk tonight (Monday).

WWDC Washington plans wide area coverage plus MBS national election eve coverage. WJAN-AM-TV St. Petersburg, Fla., will begin the election round-up in cooperation with the St. Petersburg Independent, shortly after the polls close and will join ABC radio and tv networks later in the evening.

Crosley Broadcasting Corp. plans to televise election day daily from the State House in Columbus, Ohio, to its tv stations in Ohio. Statewide resumes are scheduled as are pickups from the Ohio Crosley stations.

KLZ-MTV Denver, President Hugh B. Terry said, will join forces with the Rocky Mountain News, with headquarters at the newspaper's city room. KLZ will move cameras and microphones into the city room after polls close and will broadcast and televise complete returns from Wyoming and Colorado.

WHIM Providence announced that instead of selling political time for candidates it is setting aside free time for candidates up to the time of election through its public service program, Political Forum, handled by Bruce Williamson, news and public affairs director. All qualified candidates for top offices have accepted the offer, the station said. KPRC-AM, Houston, has also made available to candidates, according to Jack Harris, general manager. He said he had invited all 26 candidates in the race for the city council to make statements on Election Eve (Nov. 1) from 10-10:30 p.m.

KCBS San Francisco aired "Ballot Box 1954" in which were presented candidates' views of themselves and their opinions of local and state propositions to be voted on in tomorrow's election.

KRON-TV San Francisco is featuring live coverage of key political contests throughout the country.

TV IS SURE WINNER IN N. Y. STUMPING

INCREASED use of television as a medium for political election campaigns was pointed out last week by estimates that the Republicans in New York State have spent about 70% of their budget for TV and the Democrats about 80%.

This expanded television activity, according to spokesmen for both parties, has resulted in the elimination of political rallies in such places as Madison Square Garden and the Academy of Music in Brooklyn, which were favorite sites of old-time campaigns. Nor was there as much newspaper political advertising as in former years. Party spokesmen said that overall costs may not have been increased by the extensive use of TV, because, they reported, rental of a large auditorium, plus advance preparation costs, runs into "big money."

In radio, Democrats estimate that spending for the final campaign weeks was at one-fifth of a pre-television year like 1946. The Republican budget division was said to be 80-20 in favor of TV.

As an indication of rate of political spending for television, estimated costs of expenditures for New York State campaigning only on the seven stations in the New York metropolitan area were reported unofficially last week as follows:

Client Hosts Networks

THERE'S going to be plenty of food for thought—and eating—on CBS-TV and NBC-TV tomorrow night (Tuesday) as those networks tabulate election returns. The networks are going to set up electric Rotobroilers in their studios to feed their staffs at work. Trained crews of the Rotobroiler Corp., Long Island City, will prepare the food, which will be served piping hot to staffs, and special regional and international dishes will be available for foreign and out-of-town dignitaries visiting the TV studios. Rotobroiler is sponsoring portions of the election night returns on both networks.

ADV. & AGENCIES

FOUR ADVERTISERS TAKE NETWORK TIME

Making network purchases last week were Sweeps Co. of America, Gemex Watchband Co., Longines-Wittnauer Watch Co. and Buick Motor Div.

Sweeps Co. of America (Tootsie Roll), Hoboken, N. J., led three other advertisers in network buys last week.

Other advertisers active in network signings were Gemex Watch Bands, Longines-Wittnauer Watch Co. and Buick Motor Div. of General Motors Corp.

Sweeps Co. of America, for its Tootsie Roll, made two network time purchases, a weekly half-hour children's show effective Nov. 20, featuring Paul Winchell and his dummy, Jerry Mahoney, on NBC-TV, Saturdays, 10:30-11:15 p.m., and a one-time show Tuesday, Nov. 9 at 8-9 p.m. on NBC-TV, starring Steve Allen with Winchell and Mahoney. The latter buy became available as a result of the trip Bob Hope made to London Nov. 9. With the comedian off, General Foods, his sponsor, refused to pay for the program time. As a result, NBC-TV sold the time to the Sweeps Co. General Foods will sponsor the next Hope show, which will be filmed in London and presented on the air Dec. 7.

Mosselle & Eisen, New York, is the agency for Tootsie Rolls. The candy account is also a sponsor of the Pinky Lee Show on NBC-TV.

Gemex Watchband Co. of New York, becomes the first sponsor of "The Starck Club" on ABC-TV, Nov. 13, Saturdays, 10-10:30 p.m. The Starck Club was formerly on another network and is entering its fifth year on television.

Longines-Wittnauer Watch Co. for the sixth consecutive year will sponsor the annual Thanksgiving Day "Festival Hour of Music, Song and Dance," on CBS-TV Thursday, Nov. 25, 2-3 p.m. Highlight of the show will be the pantomime-ballet on the "Sleeping Beauty" fairy-tale theme. Victor A. Bennett Co., New York, is the agency.

Buick Motor Division of General Motors Corp. is sponsoring segments on NBC Radio network to introduce its 1955 models. The buys are as follows: one five-minute newscast, 9 p.m. on Nov. 18; one participation in "The Great Gildersleeve," 10:15 p.m. on Nov. 18, and one participation in "Fibber McGee and Molly," 10 p.m. on Nov. 16.
EVEN good ad should contain four points, Maitland Jones, vice president, Sullivan, Stauffer, Colwell & Bayles, New York, said at a weekly discussion session held last week at the agency. While his remarks primarily related to print advertising, they were also deemed applicable to radio-commercial copy.

The four points: (1) promise; (2) interest; (3) conviction, and (4) distinction.

He explained as follows:

"1. Promise: A clear, concise statement of what your product will do for the reader (or audience) in terms of the reader's self-interest. In stating the promise it is better to be specific than general. "Look lovelier in 10 days" is better than "look lovelier soon."

"2. Interest: An ad can do little for your product if it is not interesting to people. Interest comes largely from technique; or the method used to tell your story — i.e., strip, picture and caption, recipe, service, testimonials, etc. Pond's cold cream, for instance, uses testimonials of society women, while Lady Esther uses the personality of Ludy Esther herself.

"3. Conviction: It is also pretty obvious that if people don't believe your ad, advertising does the product no good. Most often conviction comes from a strong reason why your product will do what you promise it will. If this reason why is exclusive with your product, so much the better. But conviction can come also from the way you write the ad, from the tone of your copy.

"4. Distinction: By this I mean your ad should not look like everybody else's in the same field. It should stand out, have its own character and style. Most often this is accomplished by the layout and art treatment. But it can also be accomplished by the writing style, though perhaps not so easily or obviously.

"Now, every good ad may not have all these qualities," Mr. Jones added. "But it is pretty certain that if an ad does have them all, it is not a bad ad."

RUTHERFAFF & RYAN RESIGNS MOTOROLA

MOTOROLA Inc., Chicago, last Thursday announced that Rutherford & Ryan has resigned its $3-$3.5 million advertising account after a five-year association. Announcement of the severance was made by the electronics firm after a series of conferences involving executives from Motorola and the agency. R & R had handled radio, tv and other advertising for Motorola, which said it does not expect to appoint a new agency for "several weeks."

Sverance of the advertiser and agency came one day after Paul Galvin, Motorola president, has announced plans for a vigorous campaign on color receivers at the retailer level (see story page 78).

Admiral Plans Record Budget for Advertising

ADMIRAL Corp. has announced "the most ambitious and comprehensive" advertising program in its history for 1955. Between $1.25 and $1.5 million will be allocated to Bishop Fulton J. Sheen's Life Is Worth Living on the DuMont tv Network starting Nov. 2. It was held possible that Admiral may launch a radio and/or tv spot campaign perhaps next spring or summer.

Spokesmen said that, while details had not been finalized on the budget, the outlay for all media probably would "exceed $15 million," the amount reportedly spent on advertising this past year.

BB Pen Names Fairfax Inc.; Plans Test For New Product

BB Pen Co., Hollywood, with a radio-tv advertising budget of more than $609,000, has named Fairfax Inc., New York, to handle advertising of its ball pens, effective Nov. 1. In addition the company is planning to put out a new product which will be tested in Fresno, Calif., for 30 days, starting in the middle of November.

The firm and its new agency are in the process of working out the 1955 national advertising plan. Meanwhile the radio and television spot campaign currently running will continue through Christmas.

K&E Resigns Natl. Brewing

NATIONAL Brewing Co., Baltimore, National Premium Beer, with an advertising budget of about $1.5 million, has been resigned by Kenyon & Eckhardt, New York, effective Feb. 1. The brewing firm currently is screening other advertising agencies before making an official announcement.

American Dairy to Allot $1 Million for Butter Push

AMERICAN DAIRY Assn. is planning to launch a $1 million advertising campaign on radio, television and in other media to promote the use of butter in American homes. Plans for the drive were to be submitted to the organization's executive committee Friday.

Contemplated is greater allocation of monies to butter as a product on the association's three programs — the Bob Crosby Show on CBS-TV, Bob Hope on NBC Radio and Disneyland on ABC-TV. American Dairy traditionally allocates funds by product groups. The agency is Campbell-Mithun Inc., Chicago.

The campaign is designed to promote butter as a "prestige" product and for use in cooking. It is based on the assumption that Americans are more apt to serve butter to their guests than to members of their families.

Tv Spots in West Coast Cities To Introduce New Crocker Mix

TELEVISION will be used along with other media in six West Coast cities to help introduce the new Betty Crocker Instant Frosting Mix, General Mills, Minneapolis, announced last week.

Tv spot and other media will stress the product through California, Washington, Oregon, Idaho, Nevada and Arizona, it was reported. Coupons will be given with Softasilk Cake Flour and Betty Crocker Cake Mix packages. Size of the tv campaign was not disclosed. Agency is Knox Reeves, Minneapolis.

Barnett, SSC&B Head Drive

JAMES A. BARNETT, vice president of Lever Bros., and Sullivan, Stauffer, Colwell & Bayles, N. Y., have agreed to act as volunteer coordinator and volunteer agency, respectively, for the 1954 Red Cross drive sponsored by the Advertising Council. The same team headed last year's drive, which netted the Red Cross $83 million. Henry C. Wehde Jr. is the Council executive.

ART LINKErrEs (with cap), star of NBC-TV's People Are Funny show, receives a "Christmas present" of a $50 "Diamond Heart" Paper-Mate pen in celebration of Paper-Mate's co-sponsorship of his program on 140 NBC-TV stations. Others joining in the presentation are (1 to r): Earle Dugan, Foote, Cone & Belding; Edward E. Ettinger, executive vice president of Paper-Mate, and Jim Beam, advertising director of the pen company. Mr. Linkletter will be featured in all displays and store material of Paper-Mate's $1 million Christmas advertising drive.

Hamm’s, Oklahoma Oil Sign
For ’55 Baseball on WGN-TV

WGN-TV Chicago has renewed exclusive contracts with the Chicago White Sox and Cubs for tv rights to all daytime home games of the two baseball clubs. Theodore Hamm Brewing Co. and Oklahoma Oil will co-sponsor 55 home contests of the Sox and 77 games of the Cubs in 1955. Agencies are Campbell-Mithun Inc., and Maryland Adv., respectively. Oklahoma picked up half of the games when Liggett & Myers (Chesterfield cigarettes) dropped out locally. Agreements cover two baseball clubs.

Announcements of the pact were made jointly in each case by Frank P. Schreiber,

EXCLUSIVE contract for tv coverage of all 1955 Chicago Cubs home games has been completed by WGN-TV Chicago and the National League baseball club. Present at post-signing ceremonies are (l to r): Frank P. Schreiber, manager of WGN Inc.; Harry Creighton, who will aid Jack Brickhouse on play-by-play, and James T. Gallagher, business manager of the Cubs.

manager of WGN-AM-TV, Frank Lane, general manager of the Sox, and James T. Gallagher, business manager of the Cubs. Completion of negotiations with the Sox marked the seventh consecutive year the station has telecast its games. City series with the Cubs also will be telecast before the regular season gets underway.

Chevrolet Splurges

WHUM-TV Reading, Pa., put out the SRO sign on spot announcements for last Wednesday, Thursday and Friday. A spokesman for the uhf station reported that the Chevrolet Dealers Zone Headquarters in Harrisburg bought all spot announcements from 7 a.m. to past midnight on the three days.

McCann-Erickson Holds S. American Agency Meet

WHAT was said to be the first conference of advertising agency people ever convened in South America will be held at Buenos Aires, Argentina, during the week of Nov. 1 by managers and key personnel of McCann-Erickson's Latin American offices.

"Our clients at home and abroad have expressed such keen interest in the development of locally stimulated Latin American industries," said Marion Harper Jr., president of McCann-Erickson, "that it seemed fitting for us to select one of the larger South American capital cities as the site for this conference."

Frank White, chairman of the board of McCann-Erickson Corp., New York, and Arthur Grimes, vice president of the international agency, also will attend the conference.

Ball & Davidson, Axelsen Agencies Merge in Denver

TWO DENVER advertising agencies—Ball & Davidson Inc. and the Axelsen Agency—have merged, effective Nov. 1, according to an announcement by principals Carl A. Salstrand, president of Ball & Davidson, and Thomas H. Axelsen, head of the agency bearing his name.

Mr. Salstrand, who has headed Ball & Davidson for the past 20 years, will manage the consolidated agency. Mr. Axelsen also operates Axelsen, Bennett & Clark Inc. in Salt Lake City and will devote most of his attention there.

The merged firm will be located at Ball & Davidson's new building at 670 Delaware St. B & D now is in its 36th year. It is a member of the American Assn. of Advertising Agencies.

Cardinals Seek Co-Sponsor
With Anheuser-Busch in ’55

THE ST. LOUIS Cardinals National League club is seeking a co-sponsor along with Anheuser-Busch (Budweiser beer) to pick up the tab for 1955 baseball, it was revealed last week.

Anheuser-Busch plans to share sponsorship of Cards' games on WTV1 (TV) Belleville, Ill., and KXOK St. Louis, plus a regional radio network of over 100 stations in over 10 states as it did this past year, it was reported. A national or regional advertiser is being sought for half of each game. The plan is to telecast Cards' road games again next year.

The Budweiser account is serviced by D'Arcy Adv. Co., St. Louis.

W. J. Krebs Dies at 69

W. J. KREBS, 69, chairman of the board of directors of Rogers & Smith, Kansas City advertising agency, died Oct. 19. Mr. Krebs was president of Potts-Turner Co., Kansas City, from 1931 until 1954 when the firm merged with Rogers & Smith. Mr. Krebs had been active in the Kansas City agency field since 1909 when he joined the advertising department of the Peet Brothers Co. He is survived by a wife and daughter.

Youngstown Agency Changes

THE Simon, William & Roberts advertising agency of Youngstown, Ohio, effective today (Monday) will cease to be a division of The Rosenblum Bros. Co. and will continue with Albert Solomon as operator and sole owner, it was announced last week by S. M. Rosenblum, president of Rosenblum Bros. The agency will be located at its present offices at 226 S. Phelps St., its own building. The Rosenblum Bros. will no longer have any interest in the agency, the announcement said.

AGENCY APPOINTMENTS

Max Factor Inc. (cosmetics), L. A., appoints Doyle Dane Bernbach, N. Y. Radio-tv will be used.

Bond Pickle Co., Oconto, Wis., has appointed Geare-Marton, Phila.

A&A PEOPLE

William Knudsen, vice president, Smith, Hagel & Snyder, N. Y., elected executive vice president.

Arthur W. Cowles, account executive, Henri,
Still looking?

If you're still nosing around for the best way to move goods fast, follow the lead of some of the smartest advertisers. They know they get real results tracking down sales with spot radio, on key stations. Don't search everywhere when a handful of good stations reaches almost everybody. For instance, WJR's coverage includes 15 million people—some 10 per cent of U. S. buying power. Ask your Henry I. Christal representative about WJR.

charge of physical production, and a group of
New York real estate men. In buying out the
other stockholders, including Fred Ley Jr.,
Edwin Pauley, Daniel Reeves and Bob Hope,
the operation of the studio will in no way be
changed, according to Mr. Stephens. The
syndicate reportedly has made a 30% profit on
the original purchase price of $1,100,000.

Currently in production by ANS is the ABC-
TV Treasury Men in Action with additional
programs to be announced shortly. Also filmed
on the lot are NBC-TV's Medic and Dear
Phoebe.

**Federal Telefilms Sues For Cut in ‘North’ Series**

SUIT for declaratory judgment was filed Tues-
day in Los Angeles Superior Court by Federal
Telefilms Inc. against John W. Loveton, Vir-
ginia F. Loveton, Advertisers Television Pro-
gram Service Inc. and three John Does. Involv-
ing re-runs of the Mr. and Mrs. North half-
hour tv film series, the suit charges the sum
received by the plaintiff last August, which
purported to be 15% of the distribution pro-
cedure, was in reality arrived at after Mr.
Loveton had deducted 30% for distribution
fees. The complaint contends that Federal
Telefilms is entitled to its 15% off the top.

**Fox Studios Sale Pends**

SALE of 20th Century-Fox's little-used studios
at Sunset Blvd. and Western Ave., Hollywood,
to the Roller Derby group definitely is pending,
according to a 20th-Fox spokesman. Roller
Derby, operators and organizers of track roller
skating teams throughout the country, plans
to use the studios for tv film production of its
own and other producers' projects, it is under-
stood.

**L. A. Ad Club Briefed On Plans of ‘Disneyland’**

DESPITE eight months' preparation, Walt Dis-
ney Studios seemingly jumped into tv over-
night, according to Hal Adelquist, studio pro-
duction coordinator, who discussed “Disney-
land” before the Los Angeles Ad Club last
Tuesday at the Hotel Statler. Saying that the
production of ABC-TV Disneyland series is
being approached with the producer's “charac-
teristic perfectionism," he said that there are
10 units at work on 22 programs. Four pro-
grams have been completed with dubbing cur-
rently in progress on two more films. Mr.
Adelquist gave members a description of the
upcoming programs and showed portions of
the first film in the series, which started on
ABC-TV last Wednesday.

Speaking on Disneyland, the $9 million
amusement park now under construction in
Southern California, Sandy Cummins, liaison
between ABC-TV and Walt Disney Studios,
said that the program will emanate from the
park starting with the first show of the 1955
fall season. Of major interest to his audience
was the fact that numerous advertisers will
sponsor stores and displays in the amusement
center.

**BIB Directory Advises Checking Film Ownership**

ADVERTISERS should check carefully the
ownership of television feature films they use
since some organizations are distributing films
that have outlived their copyrights, accord-
ing to the latest issue of Tv Film Program Di-
rectory—Feature Film, released last week.

The directory, published by Broadcast In-
formation Bureau, New York, lists 3,046 fea-
ture films available for television, plus 992
"westerns." Julienne Dupuy, editor, noted that
the current directory has omitted more than
500 titles that appeared in previous editions be-
cause "the quality now has been judged insuf-
icient for telecasting."

**FILM SALES**

Richard H. Ullman Inc., Buffalo, N. Y., an-
nounces Ad-J-Motion series of 240 fully ani-
imated film clips has been sold or renewed with

RETAIL DEALERS PREFER TV TO MOVE GOODS-ICR SURVEY

Study, conducted for CBS-TV by Institute of Communications Research, reveals that 63% of dealers questioned would have the national advertiser use tv in preference to other advertising media.

AMONG retail dealers, 63% look upon television as the medium through which the national advertiser can best help them move his goods. If they were allocating a million-dollar national advertising budget, these dealers would put $430,000 of it into television, splitting the rest among five other national media.

These are highlights of a survey, conducted for CBS-TV by the Institute of Communications Research, which also showed that radio, ranking next to newspapers (or in) third place on the most-preferred list, would receive $150,000 of that hypothesized million-dollar national advertising budget.

The study is based on answers given by 3,100 dealers in 17 cities across the country last February-March. There were answers from 1,000 groceries, 400 drugstores, 500 gasoline dealers, 300 new car dealers, and 300 appliance dealers. The dealers were given a list of six major media (the order in which the media were listed was changed from one review to the next) and asked two questions:

1.) Which one of these types of advertising placed by the manufacturer helps you the most in selling advertised brands to your customers?

2.) You know that millions of dollars are spent on national advertising. Suppose that a manufacturer with a million-dollar budget to spend left it up to you to decide how that million dollar should be divided. Just how much would you spend in each of these six ways of national advertising?

In evaluating media helpfulness in moving advertised brands, 63% of the dealers put tv at the top of the list; 23% ranked newspapers first; 5% rated radio ahead; 4%, magazines; 3%, billboards, and 2%, Sunday supplements.

In allocating the hypothetical million-dollar budget, the dealers said they would put $430,000 into television; $210,000 into newspapers; $150,000 into radio; $90,000 into magazines, and $60,000 each into billboards and Sunday supplements. Incorporated into a presentation for the use of CBS-TV salesmen, the study showed that "all five retail groups prefer television," as indicated in the following table:

<table>
<thead>
<tr>
<th>Media</th>
<th>Gas</th>
<th>Car</th>
<th>Appliance</th>

</tr>
</tbody>
</table>

"Compared to the second-rankng medium," the presentation notes, "television is the first choice a third time more than supermarkets . . . more than five times as many drug stores . . . more than five times as many gasoline dealers . . . more than one and one-third times as many new car dealers . . . more than one and two-thirds times as many appliance dealers.

The study also noted that television gets first preference regardless of the size of the retail outlet. In a further breakdown, it pointed out that the more the dealers watch, the more they are inclined to rank it first, but that 'even those who watch least' (those who had not looked at tv the day before the interview) voted it most efficient. Additionally, both chain stores and independents ranked tv on top (65% of chain grocers; 63% of chain drug stores; 77% of independent grocers, 81% of independent druggists).

The way in which each group of dealers would distribute a manufacturer's million-dollar budget is shown in the following tables:

**BAB Reports Study Of Children's Listening**

THE AVERAGE network five-a-week children's radio program in a single month is heard in more than five million radio homes-half the total number of homes in America that have children between the ages of 6 and 12 years—according to the latest cumulative audience study released last week by Broadcast Advertising Bureau, New York. The report has been sent to BAB's member stations.

The size and scope of the children's market available to radio advertisers as well as specifics on listenership to children's programming are covered in the study, titled "The Cumulative Audience of Children's Radio Programs." It is the 12th piece in the BAB series showing the net, or unduplicated, audience for different types of radio programming.

The report is based on data from Nielsen Radio Index. Advertisers and agencies may obtain copies at BAB.

**CBS'S Marciano-Charles Bout Tops Nielsen Radio Ratings**

BEATING all other radio show during the two weeks ending Sept. 25, according to the latest Nielsen rating, was the Marciano-Charles bout which was shown on home tv. Only non-CBS-NBC program to show up in the ratings was MBS' The Shadow.

Everyone has something he does best...

Special jobs—whether repairing power lines or representing television stations—are best done by those with specialized abilities.

We believe in the principle of specialization and apply it wholeheartedly. As the first and only representative whose sole concern is the TV medium, we bring our abilities and experience exclusively to the needs of the quality television stations below. If you, too, believe that single responsibility produces sounder results, there may be other reasons for learning more about each other.

**FACTS & FIGURES**

**NETWORKS' GROSS INCOME SALES IN AUGUST EXCEEDED SAME MONTH IN 1953 BY 19%**

PIB statistics also show in August both radio and tv had an increase over July. Tots in both radio and television: P&G. Second in tv was Gillette. In radio it was Miles Labs.

GROSS NETWORK times sales last August showed considerable increases in combined totals over the same period last year, according to compilations based on Publishers Information Bureau reports.

The major increases in percentages were marked:
- Combined network time sold in August was nearly 19% above August of last year.
- For the eight months, Jan.-Aug., of this year, the combined network time sold was more than 10% above the same period last year.
- Compared to July 1954, the August total of gross radio network time sales maintained its level (actually showing about a 0.5% increase) while the total of gross tv time sales was 5% ahead.

In the top 10 list of advertisers for August, the only change from the preceding month was the addition of Swilt & Co. in radio, replacing General Foods. Tv's top 10 were the same.

Comparing the top 10 last August to those for the same month a year ago, General Mills, P. Lorillard and Swift & Co. replaced General Foods, Manhatta Soap and Kaiser Motors in radio. A reshuffling of three advertisers in the top 10 tv listing also occurred in August compared to the same month a year ago: Chrysler Corp., General Electric and General Mills replacing Liggett & Myers, Lever Bros. and Phillip Morris.

ABC brings Walt Disney to TV... and Disney brings new sponsors to ABC

Last Wednesday you saw ABC's latest premiere of the fall season and the most eagerly awaited: Walt Disney's "Disneyland." Here's a show that literally has everything: fantasy, realism, adventure, documentary... and three alert sponsors (two new to the network) who signed up practically before the ink was dry on the storyboards. What a show! What a showman! What a fitting climax to a Fall season filled with new programs, new sponsors, new excitement on ABC!

You're in smart company on ABC-TV

AMERICAN BROADCASTING COMPANY
Census Bureau Figures Show West Gained Most

NEVADA, Arizona and Florida led the nation in their percentage population gain between the time the last census was taken in April 1950, and July 1, 1954, according to provisional estimates issued by the Census Bureau.

Taking the figures by regions, the West was found to have the largest percentage gain, 13.9%. Largest gain in actual population, by states, was recorded in California where 1,800,000 persons were added in the four-year period. Florida ranked second with an increase of 707,000 persons.

The estimate for each state was obtained "by adding to the civilian population on April 1, 1950, an estimate of births, (2) adding or subtracting an estimate of net civilian migration, and (3) subtracting estimates of civilian deaths and of the movement of civilians into the Armed Forces," according to the Census Bureau.

Following are estimates by regions, divisions and states (persons in the armed forces stationed in each area are excluded):

**CBS RADIO-TV TIME SALES STAY ON TOP**

Latest Publishers Information Bureau tabulations show NBC trailing CBS by over 4½ million for September time sales.

CBS continued ahead of NBC in both radio and television network sales in September by a combined total of nearly $17 million to more than $12 million, according to Publishers Information Bureau tabulations. These figures, however, representing gross time charges, showed NBC to have narrowed the gap slightly over the $16 million to $10 million recorded in August [BT, Oct. 4].

Each of the four tv networks showed a gain in billings over September a year ago. Network totals were $26,045,177 for September this year compared to $18,395,406 the same month last year.

**FACTS & FIGURES**

**Broadcasting**

Research Foundation, the ARF said Friday in announcing that the full report—which was summarized by ARF a few weeks ago [BT, Sept. 27]—had now been published and is being distributed in copyrighted form to all ARF subscribers.

**Titled National Survey of Radio and Television Advertising Associated With U.S. Households —May 1954, the report contains 78 tables. It is based on personal interviews conducted in 11,020 households located in 1,014 different sample segments distributed over 140 counties in 70 primary advertising units. The survey was requested and undertaken by ABC, CBS Radio, MBS, NBC, and Broadcast Advertising Bureau, and was supervised and validated by ARF.**

Objectives, design and scope of the study were approved by the ARF technical committee under Arno H. Johnson of J. Walter Thompson Co. ARF staff members observed actual interviewing in 25 primary sampling areas across the U. S., and ARF supervision and validation also included the checking of tabulations and the preparation of the report. The committee that supervised the project is headed by Harper Terrace, CBS Radio, and includes G. S. Brady, General Foods; E. L. Deckinger, Blow Co.; and Kevin Sweeney, BAB.

**Full Polilt Report Issued On Set Census**

TOTAL of 96.4% of U. S. households have radio or television sets in working order.

This is one of the findings in the full report on the radio and tv set census conducted by Alfred Politz Research Inc. for the Advertising Research Foundation.
Free KCMO Feature Foods Merchandising makes sales a cinch!

... if you're selling a grocery store product in the Kansas City Market. Here's the merchandising you get FREE in 200 high-volume independent and chain markets:

1. Point-of-purchase merchandising—a minimum of 200 store calls in 13 weeks.
2. A minimum of 75 special one-week displays in top-volume stores each 13 weeks.
3. 50 days of Bargain Bar promotions each 13 weeks, plus demonstrating, sampling, couponing, distribution of recipes or product literature.
4. Full reports twice each cycle on all activity in each individual store.

Nothing is left to chance—the KCMO Feature Foods merchandising staff works in the stores, actually handles the promotion, arranges shelf displays and stocks, pushes your product at the Bargain Bar, and reports fully on every step!

Wrap up the Kansas City market now for your product by calling KCMO or your nearest Katz Agency representative.

ATTENDANCE UP AT DISTRICT MEETS

Over 100 more delegates registered for the first 15 NARTB district meetings this year than did for the corresponding time last year.

District 16 calls for realignment of districts.

MARKED UPTURN in attendance at NARTB district meetings was noted in the last two weeks as the annual autumn schedule neared an end. Total registered attendance of delegates was 1,436 for 15 meetings compared to 1,333 for the same districts last year.

Districts 10 (Iowa, Mo., Neb.), 4 (Va., D. C., N. C., S. C.) and 17 (Wash., Ore., Alaska) showed the largest increases over last year, the increases running 34, 31 and 28 respectively.

The final leg of the meetings resumes Thursday when District 12 (Kan., Okla.) meets at Ponca City, Okla. Director Cy Casper, WBBZ Ponca City, will be presiding at his first meeting since his election to the post. The 17-meeting series ends Nov. 9-10 when District 13 (Texas) meets at Houston, with Kenyon Brown, KWFT Wichita Falls, as director.

District 16 (Ariz., So. Calif., Nev.) met Monday-Tuesday at Phoenix followed by District 14 (Mountain States) at Denver Thursday-Friday.

DISTRICT 14

WITH attendance of 120, nearly double the 1953 registration, Mountain States broadcasters met Thursday-Friday at the Brown Palace Hotel, Denver. Walter Wagstaff, KIDO Boise, Idaho, presided as district director.

Participating in a panel discussion Thursday were James D. Russell, KVOR Colorado Springs; Henry Fletcher, KSEI Pocatello; J. P. Wilkins, KFBF Great Falls; A. M. Caldwell, KOAT-TV Albuquerque; George Hatch, KALL Salt Lake City; William C. Grove, KFBC Cheyenne. Guest speaker at the tv session was Robert W. Ferguson, WTRF-TV Wheeling, W. Va. On the Friday panel were G. Bennett Larson, KTIV (TV) Salt Lake City; Tom Breen, KFEL-TV Denver; C. N. Layne, KID-TV Idaho Falls, E. K. Hartenbouwer, KCMO Kansas City, was guest radio speaker.

Named to the resolutions committee were Rex Howell, KFXJ Grand Junction; Ian Elliott, KALT Miles City; Frank McIntyre, KLIX Twin Falls, and Don Hathaway, KSPR Casper, Wyo.

Gussner Elected NDBA Head

PAUL C. GUSNER, KGCU Mandan, was elected president of the North Dakota Broadcasters Assn., succeeding F. E. Fitzsimonds, KFYR Bismarck, at the NDBA’s Oct. 16 meeting.

Other officers elected were Chester Reiten, KSHJ Jamestown, vice president, and William Hurley, KXJB-TV Fargo, secretary-treasurer. Elected to the board were Mr. Hurley; Jack Dunn, WDAY Fargo, and Garry Fox, KFDO Fargo.

DISTRICT 16

REALIGNMENT of the NARTB geographic breakdown of the nation into 17 separate districts was advocated last week as District 16 (Ariz., So. Calif., Nev.) held a Monday-Tuesday meeting at Camelback Inn, Phoenix.

A resolution was adopted asking the NARTB board to re-examine the lineup so districts “conform as far as possible with areas of common interests and mutual problems.” Revised districting has been urged frequently by broadcasters in the last decade, with only minor changes having been made although a number of new breakpoints have been submitted to the board in this period by C. E. Arney Jr., secretary-treasurer.

Albert D. Johnson, KOY Phoenix, presided at the District 17 meeting as district director. Named to the resolutions committee were Cliff Gill, KBIG Hollywood, chairman; Harper Phillips, KV0A Tucson, and Howard Stalmaker, KPHO Phoenix. Other resolutions followed the general pattern of the 1954 series.

E. K. Hartenbouwer, KCMO Kansas City, vice chairman of the NARTB board and District 10 director, appeared as radio guest speaker. Calling radio “the new advertising medium,” he said 100,920,000 radio sets have been sold in the last five years compared to 28,450,000 tv sets, with radio having 98.3% home saturation compared to 63% for tv. He added that 32% of homes have two radios and 23% have three to seven sets, plus 29 million car radios.

Radio is a mature industry, Mr. Hartenbouwer said, and is growing within the area of its total existing market rather than expanding its boundaries.

Jack Harris, KPRC-TV Houston, appeared as tv guest speaker, a role he had previously filled at the current series in the far West [B&T, Oct. 25]. RCA held its usual coffee club sessions and was host at cocktails. DuMont, too, was host at cocktails.

Taking part in a tv roundtable were Mr. Harris; James T. Aubrey Jr., KNXT (TV) Los Angeles; George Whitney, KFBM-TV San Diego; Colin Selph, KEYT (TV) Santa Barbara; Richard B. Rawls, KPHO-TV Phoenix; Richard Lewis, KVAR (TV) Phoenix; John Merino, KFSC-Tv San Diego, and Charles Garland, KOOL-TV Phoenix.

DESERT MURAL provides backdrop for this broadcast group at NARTB’s District 16 group at Phoenix (1 to r): seated, George Whitney, KFBM San Diego; Glenn Snyder, WLS Chicago; Mrs. Charles Garland and Mr. Garland, KOOL Phoenix; Jack Harris, KPRC Houston; standing, Richard Lewis, KVAR Phoenix; Al Johnson, KOY Phoenix, district director; Harold E. Felows, NARTB, and Richard Rawls, KPHO Phoenix.

ANOTHER District 16 delegate group (seated, 1 to r): Mrs. Howard Loeb and Mr. Loeb, KBLZ Phoenix; Mr. and Mrs. Richard Hooper, KGLV Las Vegas; Mr. Hooper, RCA Camden. Standing, Lee Little, KTUC Tucson; Robert Myers, DuMont; E. K. Hartenbouwer, KCMO Kansas City; Don Davis, KMBC Kansas City; Calvin J. Smith, KFAC Los Angeles.
Tonight and every Wednesday, Disney's sure-fire appeal will draw millions to ABC.

"Disneyland" wraps up in one bright, shiny package all the showmanship, imagination, and fabulous drawing-power (pun intended) that put Disney on top of the entertainment world. And there is no age limit to his unique appeal. The three canny sponsors (American Motors, Derby Foods, and the American Dairy Association) are well aware of this. Through this delightful show, they'll make firm friends with the whole family. And so, of course, will ABC.

You're in smart company on ABC-TV

AMERICAN BROADCASTING COMPANY
SMPE discusses
COLOR TV COSTS

TECHNICAL problems of TV received major attention on the agenda of nearly 900 members of the Society of Motion Picture and Television Engineers, in convention a fortnight ago in Los Angeles, with discussion and demonstration of color TV, tape use, large screen video and TV filming.

Technological problems need no longer determine whether or not a TV film producer shoots in color, Sidney Solow, vice president and general manager, Consolidated Film Industries, Hollywood, told a color video session. The sole consideration today is if the project can financially sustain the additional costs-

ANNUAL technical awards of the Society of Motion Picture & Television Engineers were presented at the society’s 76th semi-annual convention in Los Angeles by Herbert Bernet (l), SMPTE president. Recipients of the awards were (l to r) Ray D. Kell, David Sarnoff Gold Medal award; Lorin D. Grignon, Samuel L. Warner Memorial award, and Armin J. Hill, SMPTE Journal award.

Wickes Engineering and Construction Co.
John G. Frayne, director of research, Westrex Corp., Hollywood was elected 1955 president by the SMPTE membership, with Barton Kreuzer, RCA, Camden, N. J., executive vice president; Norwood L. Simmons, Eastman Kodak Co., Los Angeles, editorial vice president; Byron Roudabush, Byron Inc., Washington, convention vice president; and Edward S. Seeley, Altec Service, Los Angeles, secretary.

BAB Plans for Board,
Stockholders Meetings

A ROUN of meetings of BAB nominating, finance and executive committees was held last week at the Ambassador Hotel in New York preparatory to the Nov. 16 board and stockholders meetings, also to be held in New York.

The nominating committee, which decided some time ago to recommend Joseph Baudino, Westinghouse Broadcasting Co., as chairman of the BAB board, reportedly settled on three nominees for a one-year term, but their identities were not disclosed. Mr. Baudino, who is chairman of BAB’s executive committee, would succeed Charles C. Caley, WMBD Radio, Ill. Chairman of the nominating committee is John Patt, WJR Detroit.

In its session, the finance committee, headed by Mr. Caley in the absence of Ward Ingrin, Don Lee Broadcasting System, reviewed BAB’s budget for the second half of its fiscal year ending March 31, 1955. It is expected the committee will recommend board approval of a 7% increase over the first half’s budget.

The group also reviewed suggestions of the executive committee for accelerating BAB’s progress toward a million dollar budget.

The executive committee, meanwhile, prepared details for the Nov. 16 board meeting. It also went over BAB’s plans for a spring convention, explained sales clinics and other extensions of service it provides its members.

A 20-man plans committee, headed by Donald Thornburgh, WCAU Philadelphia, was to meet Friday to sift BAB’s plans for the second half of the year and report on eight major projects on which BAB’s management has asked help or suggestions.

Pioneers Fete Heising,
Espenschied, Thomas

MORE than 150 members and guests of the Radio Pioneers, including some 50 delegates to the National Assn. of Educational Broadcasters convention (see story page 4), were on hand for a dinner meeting of the club in New York last Wednesday night. FCC Commissioners Rosel H. Hyde, E. M. Webster, and Frieda Hensock were among the dignitaries on hand for the festivities, to be continued on July 31.

Mr. Heising had a noteworthy radio career of 44 years and his invention of the system of modulation utilized in almost every standard broadcasting station in the world,” to Lloyd Espenschied “for his brilliant 45-year radio career which included pioneering development of systems of voice communication and the coaxial cable,” and to Newman Lowell Thomas, “for a vivid chronicle, day by day, over 25 years, of the news of the world he has traveled so widely, always factual and passionate, but delivered with a human warmth which makes him a beloved figure to millions.”

Dr. Heising and Mr. Espenschied were both key engineers of Bell Labs for many years before their presentations were made by William S. Hedges, NBC vice-president.

C. E. Butterfield, retiring radio-tv editor of the Associated Press, was presented a radio by G. W. (Johnny) Johnston of the National Assn. of Mfrs. on behalf of the Pioneers Club.

Entertainment, arranged by program chairman Irene Wicker, included skits featuring Mr. Thomas, H. V. Kaltenborn, Lanny Ross and others.

300 Attend RTES Seminar
On Timebuying, Selling

A TURNOUT of some 300 persons for the first session in the Radio & Television Executives Society’s “Timebuying and Selling Seminar” in New York last Tuesday was described by leaders as “most heartening.”

The seminar, consisting of 13 luncheon meetings held Tuesdays at Toot Shore’s restaurant, was conceived by RTES to serve “the newer elements in the business” particularly and at the same time to be “a valuable refresher for veterans of buying and selling the broadcast media.”

The first session, last week, was devoted to “audience research” and featured Ward Dorrell, research director of John Blair & Co., and Donald Corry, ABC director of television research, in discussions of “what audience measurements are—and aren’t,” developing the background and growth of rating services generally and of the various techniques which have been and are employed. Gordon Gray, WOR-AM-TV, was moderator.

Several other sessions will be devoted to audience research, and other meetings will explore such subjects as qualitative research, engineering factors, agency practices, sales practices, networks and how they work, spot sales, markets, merchandising, and color. The roster of speakers includes industry leaders who will discuss their particular fields. Registration fee is $2 for the entire course, with luncheon costs at $3.50 per person per meeting.

WBKB TOPS all Chicago TV stations in presenting each day outstanding LIVE programs to entertain the moppet set.

Such recognized shows as THE PLAYHOUSE with Angel Casey, TIME FOR UNCLE WIN featuring Win Stracke, THE PIED PIPER starring Art Hern, GARFIELD GOOSE with Frazier Thomas, (pictured here), and SANTA'S NORTH POLE REVUE have won unanimous approval from mothers and their children. These programs offer excellent opportunities for added holiday — as well as year-a-round sales results.

For further details, contact the WBKB Sales Department, 20 No. Wacker Drive, Chicago, Illinois or your nearest BLAIR-TV Representative.
GOLDEN GATE meeting of NARTB District 15 found this group in a corner of the meeting room (I to r): seated, J. G. Paltridge, KROW Oakland; Don Pontius, Robert Meeker & Assoc.; Morris Mindel, KGST Fresno; Ken Hildebrandt, KEAR San Mateo; standing, Ralph Brunton, radio consultant; A. E. Joscelyn, KOVR-TV Stockton, and Pierre Weis, World Broadcasting System.

Committee Named to Plan Week Honoring Advertising

Committee appointments were made by John Kemp, Hollywood advertising agency owner and senior AAW vice president, who stated appointments were confined to the Los Angeles metropolitan area to facilitate planning for event.

The Los Angeles office of Young & Rubicam Inc. has volunteered its services and will prepare all advertising and publicity for the event under supervision of account executive Eric Lefser, Mr. Kemp announced.

Cady Named Assistant To Bronson at NARTB
CHARLES S. CADY, recently producer-public service director of WBNS-TV Columbus, Ohio, has been named assistant to Edward H. Bronson, NARTB director of Television Code affairs. He succeeds Bette Doolittle, who has joined P. Ballantine & Sons, New York, in the public affairs department.

Mr. Cady joins NARTB Nov. 1. His activity will deal with monitoring of TV programs and other administrative assignments. He has been with WBNSTV five years and during World War II served four years in the Signal Corps, being discharged as a captain. He is a graduate of Ohio State U. and was a TV production instructor in the speech department. In Columbus he was chairman of the Junior Chamber of Commerce public relations committee and board member of the Columbus Council of Churches.

Colorado Broadcasters Meet
PARTICIPATION of broadcasters in civil defense was reviewed at a meeting of Colorado Broadcasters Assn. held Wednesday just prior to the NARTB District 14 meeting in Denver. About 50 delegates attended the state meeting, with James D. Russell, KYOU-KKTV (TV) Colorado Springs, presiding as association president. FCC Comr. John C. Doerffer reviewed regulatory problems at the luncheon meeting. Officers of the association include Frank Bishop, KPEL Denver, vice president, and Elwood Meyer, KYOU Greeley, secretary-treasurer.

Fund for the Republic To Probe Entertainment
Ford Foundation unit's study, principally of hiring and firing practices, is a fair bet to cover radio and television.

THE EXISTENCE—and if so, to what extent—of boycotting, black-listing and censorship in the radio-tv field will be explored as part of a $100,000-budgeted study to be made by The Fund for the Republic, an agency established in December 1952 as an independent unit of the Ford Foundation.

Robert M. Hutchins, president of the Fund, said Oct. 22 that the organization will sponsor "a study of civil liberties in the entertainment industry, with special reference to hiring and firing practices."

W. H. Ferry, the Fund's vice-president, told BWT last week in New York that it would be "fair to say" the study would encompass the radio and tv field.

The entertainment industry phase of the civil liberties program of the Fund is but one of many which have been in the process of exploration since the allocation more than a year ago of $15 million for an overall study [BWT, March 2, 1953].

This is the first time that the Fund has narrowed the scope of any inquiry specifically to the "entertainment industry."

It was learned that the Fund already has been active in touching the field on the question of whether it should sponsor a study. As yet, no personnel nor staff has been assigned to the study. Fund spokesmen said "further announcements" as to staffing will be made as appointments and scope of the study are decided by the Fund's board of directors. Decisions may be made within a month, it was said.

The 13-man board is chaired by Paul Hoffman, board chairman of Studebaker-Packard. George Shuster, president of Hunter College, is vice chairman. The other 11 members of the board are leading educators and industrialists.

Among other projects being directed by the Fund are studies on restrictions and assaults upon academic freedom, due process and equal protection of the laws and protection of the rights of minorities.

Asked if the controversial Red Channels which in 1950 published names of radio-tv people, including performers, writers, producers, directors, etc., with associations of alleged memberships in "subversive" organizations, and which created a stir throughout the industry would enter the study, a Fund spokesman said "all aspects most likely will be studied."

Actually, three matters in all must be ascertained by the directors before the Fund actively begins its study: (1) extent of the study, (2) method it will pursue and (3) personnel to direct it.

Mr. Hutchins' announcement described the Fund as "an independent organization whose activities are directed toward the elimination of restrictions on freedom of thought, inquiry, and expression in the U. S., and the development of policies and procedures best adapted to protect those rights." The Fund's headquarters are in New York.

Louisiana Assn. to Meet
AUTOUMN meeting of the Louisiana Assn. of Broadcasters will be held Nov. 12-13 at the Jung Hotel, New Orleans. Maurice Mitchell, president of Encyclopaedia Britannica Films, and Charles H. Tower, NARTB employee-employer relations manager, will speak on business and economic problems. Ken Davis of the New Orleans AP bureau will head a panel on salability of news. John Arthur, Arthur Adv. Agency, New Orleans, also will speak. Business meeting will be held the second morning, with election of officers scheduled. Willard L. Cobb, KALB Alexandria, is association president. Other officers are Frank H. Ford Jr., KENT Shreveport, vice president, and Dierrell Hamm, KANE New Iberia, secretary-treasurer.
This SOIL grows bigger crops—makes better markets!

Here are some basic facts about the fabulous Red River Valley that you ought to know. First, read what the Encyclopedia Americana says:

“The surface of the land in North Dakota is made up of three broad steps of prairies, rising half a mile in altitude as they cross the state from east to west. The eastern and lowest step is the fertile and level Red River Valley. The soil in the Red River Valley is among the most fertile in the world.”

The Americana hit it on the head. Our hayseeds obviously don’t need magic to make farming pay big dividends. The Valley’s rich black top-soil averages 16” in depth, and believe us, “no other region in America can make that statement”. The result — average gross farm income in the Red River Valley is $9518, as compared with the national average of $6687.

Also, annual per-family retail sales average $4164, as against $3584 for the rest of the U.S.

Right plumb in the heart of the Valley is Fargo — home of WDAY, and the shopping and trading center for a 26-county market which contains almost half a million people.

Many of these facts must have rubbed off on you advertisers long ago, because you’ve always invested heavily in the Red River Valley — especially with radio!

Ever since the Atwater-Kent days back in the twenties, we've made WDAY the Valley's one BIG radio value, outstripping all "competition" by tremendous margins. Fan mail rolls into WDAY by the bagful, averaging more than 400 letters a day, including Sundays and holidays. More than 10,000 families maintain paid subscriptions to "Mike Notes", our monthly WDAY newspaper. Thousands of our listeners apparently never tune to any other station at all.

Let Free & Peters give you all the facts on WDAY. It's quite a story!
SALES, APPROVALS TOTAL OVER $14 MILLION IN WEEK

Milwaukee, Pittsburgh channels involved in merger action. FCC approves Storer's purchases of WXEL (TV) and KPTV (TV) and sale of KGBS-AM-TV. Also approved: KTSA-AM-FM sale, KWK-AM-TV reorganization. Also sold: KQV Pittsburgh, WLOK-AM-TV Lima. Cowles reportedly negotiating to buy CBS' 47% in WCCO-AM-TV for about $4 million.

POSSIBLE merger of tv applicants in Milwaukee's ch. 6 hearing while the virtually certain Pittsburgh ch. 4 merger unraveled highlighted tv activities last week which also saw:

- Purchase of KQV Pittsburgh by Tele-Trip Policy Co. for about $700,000.
- FCC approval of the $8.5 million-plus purchase of Empire Coeil Co. and its two tv stations (WXEL [TV] Cleveland and KPTV [TV] Portland, Ore.) by Storer Broadcasting Co.
- FCC approval of related sales of KGBS-AM-TV by Storer to the San Antonio Express, for $3.5 million and of KTSA-AM-FM by the Express to O. R. Mitchell Motors Inc. for $175,000.
- FCC approval of the ownership reorganization of KWK-AM-TV St. Louis and the sale of KXOK St. Louis by Elzy Roberts Sr., to Elzy Roberts Jr. and Chester L. Thomas.
- WIMA, Lima, Ohio, has bought WLOK-AM-TV, that city, with Lima to have one radio and one tv station.

Meanwhile, there were repeated reports of negotiations looking toward ownership changes in both uhf and vhf stations. NBC was keeping its situation "flexible," it was said, but hasn't yet decided where it would move. ABC was simply "watching" and while rumors abounded about DuMont, nothing concrete developed.

Negotiations looking to the merger of the applicants for Whitefish Bay's ch. 6 (Milwaukee) were held last week in Washington, with agreement reached in principle for WISN-Heairst, and the non-broadcasting Independent Television Inc. to merge, and for WMIL Milwaukee to withdraw.

The controversial Whitefish Bay allocation is under attack by ch. 25 WCAN-TV Milwaukee in the federal courts. WCAN-TV claimed that the allocation jeopardized its position in the Milwaukee market and violated the tv table of allocations.

The allocation to Whitefish Bay, a suburb of Milwaukee, came after a bitter fight by WISN to (1) remove the educational reservation from ch. 10, (2) get ch. 6 assigned to Milwaukee proper. It was on petition by WISN that the Commission finally allocated ch. 6 to Whitefish Bay.

Result of the merger negotiations are expected to be ready for the next hearing conference, scheduled for Thursday.

Independent Television is composed of Detroit and Milwaukee businessmen. Sales to WKBK-Detroit by owners Irwin D. Wolf and Earl F. Reed and associates to Tele-Trip Policy Co., aviation insurance specialists, which already own KPOA Honolulu and WTAG-FM Chicago, was announced last week, subject to FCC approval. Although the purchase price was not disclosed, it was understood to be in the neighborhood of $600,000-$700,000.

The CBS-affiliated 5 kw Pittsburgh station (on which ch. 4 is moving) was understood to be in preparation for the merger agreement in the Pittsburgh ch. 4 case [BWT, Oct. 25]. However, it has failed to materialize although there is hope that agreement still may be reached.

Until last month, KQV, which was founded in 1919, was 45% owned by CBS. In straightening out its ownership affairs, in order to meet the FCC's multiple ownership rule, CBS sold back to Messrs. Wolf and Reed the 45% interest for $236,250—what it paid for it in 1952 [BWT, Oct. 4].

A cryptic statement in the sale announcement said the Wolf and Reed acted "on behalf of themselves and other Pittsburgh people who have been interested in KQV's plans to continue prosecution of a television application. Allegheny as such will have no interest in the television applicant."

Present Pittsburgh ch. 4 applicants are WCAE and KQV Pittsburgh, WLOA Bridgeport, Pa., Wapan Television Inc., and Irwin Community Television Co.

KQV sale agreement is for the purchase of all Allegheny Broadcasting Corp. stock by Tele-Trip.

Directories of Tele-Trip include Eugene D. Bonner III, H. J. Rand, John G. Getz Jr., Henry B. Lamy Jr., Philip Gandert, Joseph P. Kane and Mr. Shaheen.

Tele-Trip bought KPOA from J. Elroy McCaw and John D. Keating for $400,000 earlier this year [BWT, March 29], and WTAG from Trendle-Campbell Broadcasting Corp. last summer for $287,000 [BWT, Aug. 9]. Both stations are owned by Radio Hawaii Inc., of which Mr. Shaheen is president and Finley Hollinger is executive vice president.

Merger of the five Pittsburgh ch. 4 applicants, widely bruited as virtually accomplished [BWT, Oct. 25], fell through early last week when one of the applicants refused to join with the other four contestants. This was Wapan Television Inc., composed of Pittsburgh attorney Scott Fink and Sons, it was understood.

The Pittsburgh ch. 4 hearing, scheduled to begin taking testimony last Tuesday, was continued to Dec. 7 when KQV's attorney announced that the station was being sold.

A $12.5 million parlay, involving the ownership of three sets of stations, was approved by the FCC last week—over the stinging dissects of Comrs. Robert T. Bartley and Frieda B. Hennock.

The Commission, acting 10 months after the application had been filed, approved the $8.5 million purchase by Storer Broadcasting Co. of Empire Coeil Co., owner of WXEL (TV) Cleveland and KPTV (TV) Portland, Ore.

It also approved the $3.5 million sale of Storer-owned KGBS-AM-TV Lima to the Huntress-San Antonio Express interests, and the $175,000 sale of the Express-owned KTSA-AM-FM San Antonio to O. R. Mitchell Motors Inc. of that city.

In order to stay within the limits of the FCC's multiple ownership rule—which prohibits any one entity from owning more than seven am or fm stations or more than seven tv stations (of which not more than five may be in the vhf band)—Storer decided to sell the San Antonio stations. In order for the Express to purchase these stations, it was necessary for the newspaper to dispose of its radio properties.

Still pending is the application of Storer for FCC approval of the $300,000 purchase of WJW-AM-FM Cleveland from William O'Neill [BWT, Oct. 11]. This would give Storer's newly purchased WXEL (TV) an am sister station in Cleveland.

With last week's sales approvals by the Commission, Storer now owns WJBK-AM-FM-TV Detroit, WSPD-AM-FM-TV Toledo, WAGA-AM-FM-TV Atlanta, WBRC-AM-TV Birmingham, WGBS-AM-FM Miami, WWVA-AM-FM Wheeling, WXEL and KPTV.

The Portland tv station operates on uhf ch. 27; all the others are vhf stations.

STORER Broadcasting Co.'s $8.5 million purchase of Empire Coeil Co. and its two tv stations (story on this page) is another milestone in the history of pioneer broadcaster George B. Storer. In radio-tv 27 years, Mr. Storer's firm is considered to be the largest independent station business in the field.

It all started at his home in Toledo in his youth in 1912, he recalls, through tinkering with a primitive bread-board transmitter. In 1927, his family oil company discovered radio spots could sell gas—on WTAL Toledo. The campaign was so successful that the Storer firm bought the station.

The WTAL call soon was changed to WSPD for Speedene, the name of the gas then being promoted by the Storer oil firm via the new advertising medium.

Today, WSPD has grown to include fm and tv affiliates as well, the first of a whole family of "Storer Stations."

Under present rules, Storer is eligible to own one additional uhf tv station.

Comr. Bartley's dissent (see text on page 52) was based on his belief that the moves would result in greater concentration of control of mass communications. This is in line with his remarks on the subject as expressed in speeches earlier this year at Athens, Ga.; Clemson, S. C., and in April in Dallas, Tex. Comr. Hennock concurred with Mr. Bartley's views, except that she did not agree with his attitude toward network ownership.

Storer bought KGBS-TV (then KEYL [TV])
Only STEEL can do so many jobs so well

Sea-Going Water Heater. This space-saving 7 gallon storage water heater operates on butane gas to provide hot water up to 180° in a 30-foot Tahiti ketch. Running hot water, like many other "comforts of home," is usually ruled out on a small ship because of space restrictions. But this midget heater, made of USS Steel Sheets, is just the ticket for small craft.

America's Underground. The gas industry has truly worked a modern miracle by building a vast network of underground pipelines to carry vital natural gas to almost every part of the nation. Because of it, areas far from the gas fields can enjoy the comforts, conveniences and economies of natural gas fuel, at low cost. United States Steel supplies thousands of miles of steel pipe like this for major transmission lines.

Handy Entry! A yard-to-basement entrance like this permits garden tools, lawn furniture, screens and storm sash, children's toys to be moved in and out of storage quickly and easily. Tracking through first floor rooms is eliminated. The burglar- and weather-proof doors come in standard sizes, are made of 12-gauge hot rolled steel sheets produced by U.S. Steel.

This trade-mark is your guide to quality steel! SEE THE UNITED STATES STEEL HOUR. It's a full-hour TV program presented every other week by United States Steel. Consult your local newspaper for time and station.

November 1, 1954 • Page 51
from original grantees W. L. Pickens, R. L. Wheelock and H. L. Coffield in 1951 for $1.05 million. It went on the air early in 1950 and is affiliated with CBS, ABC and NBC. Storer bought KGBS (then KABC) in 1953 for $700,000 and its two television stations license will retire from Cleveland, Ohio, and Portland, Ore. These stations will then be acquired by a multiple-station licensee.

"The sum total of the transactions here involved is greater concentration of the control of mass communications. I believe that, as a result of the consummation of these transactions, the nature of competition will be affected in the San Antonio, Tex.; Cleveland, Ohio; Portland, Ore.; Atlanta, Ga.; Birmingham, Ala.; Detroit, Mich.; Miami, Fla.; Toledo, Ohio, and Wheeling, W. Va., radio and/or television markets. Indeed, the transactions may involve additional areas, because in order for Storer Broadcasting Co. to make the necessary financial arrangements to consummate these deals, permission will be required from a licensee who owns radio and tv stations in Charlotte and Greensboro, N. C., and Florence, S. C., and who also owns 96% of the preferred stock of Storer Broadcasting Co.

"In view of what has happened in recent years with respect to switching of network affiliations after Storer entered a community by purchasing a station, I have no doubt that the effect of these transactions will extend to network affiliation, national spot advertising, and to some extent, local advertising. I think it is very probable that if not, all, of these areas. Should this occur, the program service in these areas will be altered. There will be an impact on the public interest in the nature of competition in the advertising business, both national and local. Whether these changes will result in the public interest being served can only be determined, in my opinion, through the development of all the facts in a public hearing."

"As I have stated publicly on several occasions, the reasons for allowing multiple ownership of radio or television stations which impress me are limited primarily to two: namely, the need for station control by networks to originate programs and the needed revenue from operating stations in order to make networking attractive. It will be noted that neither of these elements is present in the transactions involved here.

"When it is realized that if concentrations such as this proposed by Storer are allowed others, then the result will be an increase of television stations in the U. S. can reach each television receiver. I believe it is clear that a more searching analysis than we are able to make on the basis of mere written applications is required in the public interest. To me, the greatest weapon against concentration of thought ever invented lies in diversified operation of television and, contrariwise, the greatest tool for thought control ever invented is concentrated control of television operation."

"Storer gives as one of the reasons for requesting these transfers the very laudatory purpose 'that the acquisition of these stations represents a great challenge and opportunity which will enable the company to take a step forward towards the goal of developing the company as a strong, public-minded, representative of independent broadcast operations throughout the country.' If, as implied, our present broadcast structure is such that a concentration of this scope is necessary for 'the defenses of independent operation', then the obstacles, if any, which prevent strong independent operation with less concentration should be fully explored.

"Commissioner Hennock stated:"

"I concur with the dissenting statement of Commissioner Bartley except that portion of it in which Commissioner Bartley states his views concerning the reasons for allowing the multiple ownership by networks of radio and television stations."

"KSTP-AM-TV Minneapolis-St. Paul, and Elze Roberts Sr. and associates was approved by the FCC last week.

"At the same time, the Commission approved the sale of KXOK St. Louis from the senior Mr. Roberts and assistant Mr. Roberts Jr. and Chester L. Thomas for $300,000 over the dissenting opinion of Comr. Frieda B. Hennock.

"St. Louis transaction resulted from a merger agreement among the three applicants for St. Louis channel, that there would be a merger of KWK to receive the grant. Agreement provided that Mr. Convey and associates would hold 28% of KWK Inc.; St. Louis Globe-Democrat, 23%; KWK Radio Corp., 23%; the other stations and associates, 23%, and St. Louis residents of then applicant Missouri Valley Television Co., 3% [BT, April 12].

"Because of the Roberts' interests in KWK, it was necessary to sell KXOK (5 kw on 630 kc) in order to come within the provisions of the FCC's duopoly rule. This prohibits one person or firm from owning or controlling more than one station of the same class in the same market. Sale was made to Mr. Roberts' son, the present president of the station, 75%, and to Chester L. Thomas, present general manager, 25%.

"Because of the father-son relationship, Comr. Hennock represented to Mr. Bartley, she claimed that the ownership remained virtually unchanged, "merely" passing from Mr. Roberts Sr. to Mr. Roberts Jr.

"KWK-TV began operating in July of this year, is affiliated with CBS and ABC. KWK, which is 27 years old, operates on 1380 kc with 5 kw, and is affiliated with MBS.

"ABC-affiliated KXOK will specialize in music, news and sports, Mr. Roberts Jr. announced the day following FCC's approval of the sale. Mr. Roberts entered radio following his graduation from Princeton U., joining KXOK in 1946 after serving with the Navy during World War II. Mr. Thomas is a 26-year veteran of radio, becoming general manager of KXOK in 1943.

"Threat of litigation regarding the KWK grant of ch. 4 evaporated last week when ch. 54 WTVI (TV) Belleville, Ill. (St. Louis) withdrew its protest to the FCC and at the same time dismissed its appeal to the U. S. Court of Appeals in Washington [BT, July 5, May 17].

"The WLOK-AM-TV Lima, Ohio, transfer was filed Friday at the FCC. Under its terms the 750 shares of outstanding stock will be purchased for $1 a share from WLOK Inc. by North Western Ohio Broadcasting Corp., operating WIMA-AM-TV Lima. North Western agrees to assume obligations of WLOK Inc., totaling $186,691 with interest. Discount of the liabilities to not less than $149,250 is to be arranged.

"Upon FCC approval of the contract, WLOK Inc. will turn in its radio license and application will be filed for modification of WLOK-TV's television grant from ch. 73 to ch. 35. North Western holds a construction permit for ch. 35.

"WLOK Inc. stock is held by the estate of Lloyd A. Pixley, holding 255 shares, and by W. Lyman Case Jr., Ward C. Case and Robert B. Case, along with Standard Realty Inc., owned by the Case interest.

"The transfer means that WLOK, 250 w on 1240 kc, will be deleted, with Lima having one radio and one tv station. WIMA operates with 1 kw on 1130 kc. Robert O. Runenstrom has managed WLOK-AM-TV as executive producer.

"Final negotiations for the sale of CBS 47% interest in WCCO-AM-TV Minneapolis-St.

Johnson to Manage KGBS-AM-TV; Other Changes

ALBERT D. JOHNSON, former general manager of KOY-AM-TV Phoenix, Ariz., has been named general manager of KGBS-AM-TV San Antonio, Frank Hunteess Jr., president of the Express Publishing Co., announced last week. Acquisition of the San Antonio stations by the San Antonio Express and News from Storer Broadcasting Co. for $3.5 million was approved last week (see story page 50). Mr. Hunteess also announced the appointment of Wayne Kearl, until recently assistant general manager of KGMB-TV Honolulu, as national sales manager of KGBS-TV. "We are not contemplating further changes in the KGBS and KGBS-TV staff," Mr. Hunteess said.

Mr. Johnson said he was retaining his 20% interest in KOY Phoenix. KOY-TV was bought by KOOL-TV Phoenix, with which it was sharing ch. 10, earlier this year.

John L. Hogg, president and commercial manager of KOY, has added the position of general manager.

Mr. Johnson
Mr. Kearl
Mr. Hogg

Paul to Cowles Broadcasting Co. for about $4 million understood to have gotten underway in New York late last week, with the deal scheduled to be closed possibly this week.

CBS joined forces in 1952 with Mid-Continent Radio-Television Inc., grantee of what was then WTCN-TV by turning over to the merged group its o&o WCCO Minneapolis. For this it received its 47% interest in the present licensee, Midwest Radio-Television Inc. Mid-Continent, the 53% owner, in turn owns 50% by Northwest Publications Inc. (Ridder newspapers) and 50% by the Minnesota Tribune Co., a holding company, headed by W. J. McNally. The latter firm owns 14.6% of the Star and Tribune Co.

Cowles owns KRTN-AM-FM Des Moines (and is an applicant for tv there), WNAK Yankton, S. D., and KVTV Sioux City, Iowa, Cowles publications are the Des Moines Register and Tribune, Minneapolis Star and Tribune and Look magazine.

Meanwhile CBS' reported purchase of ch. 9 WSTV-TV Steubenville, Ohio, gained further credence last week. Speculated upon was the report that a price of about $3 million is being considered for the primary CBS affiliate, 33 miles from Pittsburgh, and serving the Steubenville-Wheeling-Pittsburgh area.

Sellers of the Steubenville tv station (the am is not involved) are the Friendly Group (Jack and Louis Berkman, John J. Laux and others). It was reported they are seeking to acquire another radio-tv property in another major market.

Two weeks ago, CBS announced the purchase of ch. 19 WOYK-TV Milwaukee for a sum reported to be in the neighborhood of $335,000. This was CBS' first move into the uhf field, following the effective date of the FCC's revised multiple ownership rule requiring a single owner to have seven tv stations (but only five in the uhf band).

Other multiple owners have not announced any moves, although it is known that NBC will soon file for two uhf stations in major markets. CBS has said it is eyeing another major market for its second uhf application or purchase.

Page 54 * November 1, 1954

FIVE RENTERS SIGN EMPIRE STATE PACT

OWNERS of five of the seven New York area tv stations operating from the Empire State Bldg.'s 1,472-foot-high tower last week signed new 15-year contracts, with both cancellation and extension provisions, for continued use of the tower at $80,000 a year apiece, a $10,000 annual increase over the past rate.

The two other stations, DuMont's WABD (TV) and General Teleradio's WOR-TV, were still negotiating with the building management over differences reportedly relating not to the $80,000 tower rental but to terms for floor space they respectively occupy within the building. It was generally expected that some agreement would be reached.

Cable Co. signing the new leases were NBC (WRCA-TV), CBS (WCBS-TV), American Broadcasting-Paramount Theatres (WABC-TV), WPIX Inc. (WPIX [TV]), and Bremer Broadcasting Co. (WATV [TV] Newark). The contracts were for general management to last May 1, but each station has an option at the end of 15 years to continue for five additional years at the same rate. On the other hand, any station may cancel after 10 years by paying an $80,000 penalty.

While the $80,000 annual tower rental per station represents a $10,000-a-year increase, the rate for transmitter and other space within the building is unchanged. Floor space rentals vary among the stations according to size and location. One estimate placed the various floor-space rentals as ranging from around $10,000 a year to about $35,000.

Broadcasting authorities appeared pleased with the new agreements, particularly in view of their long-term range. Additionally it was pointed out that the $80,000 annual tower rental per station compares with the building management's original use, when negotiations started almost a year ago, of a $200,000-per-station-year figure, although the station representatives never took that "asking price" seriously.

Signing of the five stations was announced Thursday by Col. Henry Crown, president of the Empire State Building Corp. Owners of two of the outlets, CBS and AB-Pt, put out separate announcements. Meanwhile, there appeared to be some divergencies in arithmetic, or in interpretation of it. The building management was quoted as saying the new contracts would bring in more than $11 million over a 15-year period. But even counting all seven stations as "signed," the tower license fees over a 15-year period would amount to $8.4 million and if floor space rentals should come to $150,000 a year from all stations—a figure one source described as "probably high" —the building's total take still would be less than $11 million. And this assumption still counted two unsigned stations as signed—though there was no indication that WOR-TV and WABD would not be able to reach satisfactory settlements with the building management—and also assumed that none of the seven would exercise its option to cancel at the end of 10 years.

WTVW (TV) DEBUTS AS MILWAUKEE'S 4TH

WTVW (TV) Milwaukee began commercial programming last Wednesday as the city's fourth tv outlet and second vhf. The ch. 12 outlet, owned by the Milwaukee Broadcasting Corp., is affiliated with ABC and DuMont. A special opening film featured appearances by Gov. Walter Kohler and Mayor Frank Zeidler and WTVW officials and staff. The starting date was chosen to coincide with the premiere of ABC's Disneyland show.

WTVW will operate from a temporary 300-ft. tower with 100 kw until after the first of the year when it is scheduled to go to 316 kw from its new 1,105-ft. tower.

Reports from other stations:

WRI (TV) Plattsburg, N. Y. (ch. 5), has purchased property and buildings for its plant and expects to air test patterns this month, Joel H. Scheier, president and general manager of permittee Great Northern TV Inc., has announced. Film properties in excess of $100,000 have been contracted for and are currently being auditioned. James Sherman, former director of WPIX (TV) engineering staff, is studio technical supervisor.

WEAT-TV West Palm Beach, Fla. (ch. 12), expects to make its debut New Year's Day as a primary ABC affiliate, J. R. Meacham, president and general manager, has reported. Test patterns are scheduled for Dec. 15. Transmitter will be Standard Electronics and the Tower Construction Co. is building the 365-ft. tower. Walter Representation Co. is national representative.

KBET-TV Sacramento, Calif., owned by Sacramento Telecasters Inc., composed mainly of local businessmen, expects to begin operation next February. John H. Schacht, former affiliated with KMGH Denver, Colo., is vice president and general manager of the ch. 10 station. Equipment will be General Electric throughout, including a 50 kw transmitter and eight-bay antenna.

Educational WCET (TV) Cincinnati, which has been operating since July, has dedicated last week at formal ceremonies. FCC Chairman George C. McConnaughy participated in a special program last Monday night and Tuesday, Frieda B. Hennock added the Monday luncheon that was sponsored by the National Citizens Committee for Educational Television. Benjamin Abrams, president of Emerson Radio & Phonograph Co., appeared on a dedicatory program last Tuesday (see story page 76).
WDIR

A scant few years ago, GATES announced its new air conditioned 1000 watt Broadcast Transmitter, the BC-1F. Then, as now, it was described as a large, heavily built, rugged and full fledged transmitter — as fine as a broadcast transmitter can be made.

The enthusiastic acceptance with which the BC-1F has been greeted is unquestioned verification of quality, since only quality of the highest order could build such an impressive "owner list" as that below!

OWNERS OF GATES BC-1F BROADCAST TRANSMITTERS:

*Above list excludes all export sales other than Canada. Any domestic omissions are unintentional. Substantial military purchases of this model cannot be listed for obvious reasons. Purchases after December 30, 1952, not shown.

TY-FOUR HOURS A DAY  •  SEVEN DAYS A WEEK
WCKY'S L. B. WILSON DIES UNEXPECTEDLY

Pioneer broadcaster is victim of heart seizure last Thursday at Cincinnati residence.

L. B. WILSON, 63, president and general manager of WCKY Cincinnati, and one of the best known personalities in broadcasting, died unexpectedly Thursday night at his apartment in the Sheraton-Gibson Hotel, Cincinnati. A heart attack—which came without warning—proved fatal before he could be removed to a hospital.

Mr. Wilson had been in apparent good health. He had shown no outward signs of concern over his pending Miami TV application or his affairs generally, his associates said Friday. When he felt badly Thursday at 10:30 p.m. he called his doctor, complaining of a pain in his chest. The doctor arrived in 10 minutes and administered morphine and adrenalin. Mr. Wilson rallied, and while arrangements were being made to move him to a hospital, he began to fade. The end came in about half-an-hour.

Mr. Wilson, with a theatrical background, introduced showmanship in the WCKY opera-
tion upon taking over its active management the youngest of seven children. L. B. was ac-
tually reared in show business, starting in his teens as an impresario for penny neighborhood theatres. In 1912 he spent nine months in Eu-
rope with his brother Hansford, doing a turn on the stage as a song and dance man. Back in Covington he managed neighborhood the-
atre, operated a cigar shop, which became a favorite gathering place for business and pro-
fessional men, and served for 10 years as ex-
ecutive secretary of the Industrial Club.

In 1910 he got a job on the Cincinnati Times-
Star covering Covington. His biggest assign-
ment was covering the Republican National Convention.

In 1923 L. B. re-entered show business and built his first theatre—the Liberty—in Covington. Afterward he built additional theatres, organized a bank and, finally in 1929, established WCKY in Covington. WCKY subsequently was moved to Cincinnati, after an unprecedented promotional barrage which had identified the station as "One Minute from Cincinnati!" and "Doing a Job for the Adver-
siser."

Mr. Wilson, who stood barely five feet, was renowned as a humanitairian and humorist. He abstained completely from alcohol. He claimed his greatest vice were candy and ice cream.

The body lay in state at John J. Gilligan & Son Funeral Home in Cincinnati on Sunday. Services are to be held in Miami Beach on Wednesday, 2 p.m., at the Walsh & Wood Funeral Home, 7140 Abbot Ave., with inter-
ment in Woodlawn Park, Miami.

NBC Spot Sales Meets With Stations in N. Y.

MANAGERS of promotion, publicity and merchandising for stations represented by NBC Spot Sales will hold their third annual meeting in New York Thursday and Friday. Theme of the meeting will be "12 giant steps forward." Twelve steps, one for each of the year, will be developed during the clinic. Ideas will be exchanged among the stations represented at the meeting and a system for a constant ex-
change of such ideas will be established. Meet-
ings will be held at the Hotel Warwick.

Top management executives who will attend and address the meeting include: Charles R. Denny, vice president of NBC owned stations and NBC Spot Sales Div.; Thomas B. McFad-
den, director of NBC Spot Sales; Harry Mason Smith, vice president of Crosley Broadcasting Corp.; and Hamilton Shea, general manager of WRCO-AM-TV New York.

H. W. Shepard, new business and promotion manager, Mort Gaffin, advertising manager, Max E. Buck, merchandising director, and Rob-
bert F. Blake, assistant to the president, are co-chairmen of the NBC Spot Sales clinic. Among advertis-
ing and promotion managers who will attend the session are: Bob Adams, WRCO-AM-TV Washing-
ton; J. Byron Felter and Frank Goerg, WRGB (TV) Schenectady; Charles Hill, WAVE-
AM-TV Louisville; Dick Jones, Crosley Broad-
casting Corp.; John Keynes, WMAQ-WNBQ (TV) Chicago; John Kenaston, KRCA (TV) Los Angeles; Tony Kramer, WRCO-AM-TV New York; Dean Mosley, KBC San Francisco; Dave Pasternak, KSDK-AM-St. Louis; Al Perlmutter, WRCO-AM-TV; Clem Searbach, WATM-WNKB (TV) Cleveland, and Milt Schwartz, WAGA-AM.

Merchandising managers who will be in at-
tendance are: Harry Camp, KRCA (TV) Los Angeles; William Dallman, WATM-WNKB

KGO-AM-TV MERGES RADIO-TV FUNCTIONS

IN KEEPING with the American Broadcasting Co.-United Paramount Theatres economy program, commenced early in the year, G. O. McPherson, presently vice president of ABC's KGO-AM-TV San Francisco, today announced consolidation of the stations' radio and television operations, effective Nov. 1.

In the announcement Mr. Connolly said he would take active charge of KGO and KGO-TV, with Vincent Francis, formerly the tv station manager, becoming local radio and television sales manager and David Sacks, formerly tv sales manager, becoming national sales manager for both radio and television.

Russ Baker, tv program manager, takes over the same job for the radio station. Roy Grande, formerly program manager for radio, has resigned. Other changes include the resignation of A. G. (Shortie) Evans former business manager for the two stations. Harry Jacobson, formerly chief of tv engineering, has been named chief of engineering and building maintenance for both radio and television.

Additional changes will be a result of the consolidations will be announced soon, Mr. Connolly said.

Harley West Named Manager For WKST-AM-TV New Castle

HARLEY M. WEST JR., formerly manager of WNEM (TV) Bay City-Saginaw, Mich., has been appointed manager of WKST-AM-Tv New Castle, Pa., according to Sam W. Townsend, president of the station. Mr. Townsend also announced that A. W. Graham, one of the founders of WKST, has retired to Florida, but will continue as an officer, director and stockholder of the station.

WJIM-AM-TV Dedicates Elaborate Country House

DEDICATION of the new WJIM Country House of WJIM-AM-TV Lansing, Mich., was scheduled yesterday (Sunday) evening with 200 guests from the nation's public life as well as leaders in advertising and other business lines. Harold F. Gross, WJIM president, arranged the inaugural ceremonies.

The million-dollar expansion project brings to Lansing what is described as one of the most impressive radio-tv structures in the nation, incorporating many new features and providing efficient facilities.

FCC Chairman George C. McConnaughey and Mrs. McConnaughey were honored guests at the formal opening along with Sen. Charles E. Potter (R-Mich.). An author program included such tv artists as Eddie Fisher, George Gobel, Janice Paige, McGuire Sisters, Tommy & Jimmy Dorsey orchestra, Bud & Cici Robinson and others. Greg Garrison directed and produced the program.

The radio and tv stations have been going through a 30-day shakedown period in the new quarters.

WABD (TV) Sets Color

DuMONT'S WABD (TV) New York was to begin color telecasting yesterday (Sunday) at 6 p.m. with three filmed programs. A color program will be presented by the station each Sunday thereafter, at the same time, according to James L. Caddigan, DuMont's director of programming and production. The series, titled Sunday Suppyletoral, will consist each week of three "pages." The premiere program was to feature "The Story of Colonel Drake," which recounts the drilling of the first oil well in Pennsylvania, plus cartoon and a travelogue.

DUAL WABC POSTS GO TO RENAULT

APPOINTMENT of Michael A. Renaut as acting general manager and sales manager of ABC-owned WABC New York is being announced today (Monday) by Robert E. Kintner, president of ABC. Mr. Renault succeeds Ted Oberfelder, who has been named vice president and general manager of ABC's WABC-TV New York [BtT, Oct. 25].

Mr. Renault, who will assume his new post today, joined WABC (then WJZ) in 1950 as an account executive, and was promoted to commercial manager in December 1952. Previously he had been with the representative firms of Donald Cooke Inc. as New York manager and with Headley-Reed Co., New York, as account executive. During World War II, Mr. Renault served five years in the U. S. Army.

CBS Spot Sales Releases New Issue of Market Book

LATEST edition of CBS Radio Spot Sales Market Book is being distributed, Richard F. Hess, director of research for CBS Radio Spot Sales, announced last week. The 21-section, 157-page volume features major city media information for each of the 14 represented markets, including base rates for radio stations, tv stations and newspapers.

Market data includes a new feature: income and spending unit data by size of spending unit income.

Information in the new volume was summarized mainly from material in the latest Sales Management Survey on Buying Power and the farm portion of Standard Rate & Data's Consumer Markets.

WKB-TV Increases Power From 16 Kw to 160 Kw

TEN-FOLD power increase, from 16 kw to 160 kw, has been announced by WKB-TV Youngstown, Ohio, by Warren P. Williamson Jr., president and general manager. Using its new 125 kw RCA transmitter, the changeover went into effect on Oct. 17.

Hanrahan Advises Aussie TV

JAMES C. HANRAHAN, general manager of WEWS (TV) Cleveland, Ohio, was scheduled to leave yesterday (Sunday) for Australia to serve as consultant to the developing tv industry there. A Royal Commission recently formulated allocation plans for commercial and government-owned channels. Mr. Hanrahan expects to be back in the U. S. by Christmas.

The Lowdown - Radio ★ TV - B MIKE

By William Moyes

A GENT JUST RETURNED from touring across the country... with his car radio turned on... reports programs are about the same... mostly records. The big change is in the announcers.

The old, dignified spiers have either been fired or quit and gone to work... and station owners have replaced them with noisy morons they apparently rounded up in pool halls, cocktail bars, under bridges and in the waiting rooms of psychiatrists' offices. Bums that 10 years ago they wouldn't have hired to clean out the washrooms.

INFORMALITY is the motto of this new type gabber. He aims to be as relaxed and limp as a bar rag. Old type spiers used to say "off the air, due to circumstances beyond our control." The up to date host breathes his head back and blarts "Hey! Whatstell's wrong with the power?"

You know who's responsible for this new kind of loud.

Arthur Godfrey. Today every platter spinner is his own Godfrey. Panting, sneezing, coughing into the mike... as relaxed as a hunted suspect. He stands at the mike, head down... his tongue hanging down like a deflated circus balloon... and he never bothers to retract it into his bazoos even while talking.

The changes are so dress in soiled Hollywood sports clothes, like that other exponent of relaxation, Bing Crosby.

THE STATION MANAGER general manager, that is, who five years ago would have fired the no-good loafer in two minutes, does nothing now... because he's got his own troubles. He sits in his office with his legs wound around each other like spliced wire... worried stupid over the dropoff in billings.

If he ever thinks of firing this sweatshirt Psycho at all... it's only to make way for some crazy cowpoke he's heard about in Mississippi who can Yahoolo to loud people can hear him without evening turning their sets on.

IT ISN'T ONLY in little cities which you hear while touring that things in radio have become as relaxed as a handful of dead beef liver. A certain big network station in Los Angeles has gone sloppy too... sloppier than anyone else.

Leave us look at what the brains of that big flagship station have come up with in the way of becoming informal.

"POSSIBLY the most informal radio program on radio..." says the station's press agent. "It has been fired for economy reasons and it's the perpetrator who's doing the talking!"

The program is called "Meet the Melodist." Formerly a recorded music program, Henry is now incorporating amusing gags which he plays with the audience, interviews and gallons of coffee for everyone.

"I've guest has any special preference in music, Henry tries to play some records for him."

"IN FORMER DAYS, Henry wouldn't just try to play some records. He'd play them or else he'd be fired. But on this show, it seems even the turntable is informal; it plays only if it wants to."

"THAT'S modern informal radio in L.A. a room with 100 people in it... asking each other questions... playing games (loose). I suppose of lying on the studio carpet, bubbling at the mouth and wishing the management would turn up the air conditioning, or install Turkish baths for use in cold weather. Encouring this group is old Sloppy himself (probably in bare feet and shorts pondering on whether to wave at the men in the control booth to try and spin one or two records."

Since presumably there's a mike in the studio, some of the lazy proceedings must be getting out onto the air. And in an office building downtown, the board of directors is probably planning to ask the FCC if they shut down the transmitter, to save juice."

AT THE LABORATION in Astoria, who is sec of the creation of L.A., one of the talkers was at the hotel parlor.

We believe that the esteemed William Moyes is a bit too caustic in appraisal of radio personnel in his column... but it is being reprinted in its entirety as a warning to everyone connected in Radio, Television and allied electronics an honorable profession that must never include the "noisy morons," so cynically referred to by Mr. Moyes... We do not agree with him in his castigation of Arthur Godfrey and Bing Crosby... Neither needs defense against such criticism... Millions of viewers and listeners are proof of that... But our industry, because of its very necessity in reaching every home, every family, every child and every adult, much maintain its just dignity... Northwest Radio and Television School is proud that every one of its thousands of graduates has followed through with that principle. The ones now being trained will do the same.

THE NORTHWEST RADIO AND TELEVISION SCHOOL

BLAIR APPOINTS HARRISON
TO HEAD ST. LOUIS OFFICE

THOMAS C. HARRISON, director of national spot sales, WSM Nashville, has been appointed manager of the St. Louis office of John Blair & Co., radio station representative firm. He succeeds J. Chris Hetherington, whose retirement was announced last month [B&T, Oct. 25]. Mr. Harrison will join Blair immediately before the first of the year.

For the past three years, Mr. Harrison has been director of national spot sales for WSM. Prior to his association there he was with Brown Radio Production, Nashville. He entered the advertising field in 1946 with the sales and radio promotion department ofRalston-Purina Co., St. Louis.

LACEY RENEWS WINS CONTRACT

NEW five-year contract has been signed with WINS New York by its seven-year veteran m.c., Jack Lacey, it was announced last week by Robert J. Leder, vice president and general manager. According to Mr. Leder, the salary increase which was included in the contract will place Mr. Lacey in the nation’s “top five” disc jockey category, financially. Mr. Lacey, who gave up teaching at Connecticut State Teachers College to enter radio as an announcer, joined the outlet in 1947 and has two radio shows daily.

VON KAENEL, FERRARA TO PETRY

JOAN VON KAENEL, advertising and promotion staff of National Newspaper Syndicate, Chicago, has joined Edward Petry & Co., that city, to work on tv promotion and service Petry’s Midwest accounts. She also will develop sales service information for use by all Petry offices. Mrs. Von Kaenel was formerly with the advertising and promotion department of NBC New York, and promotion assistant at WTAM and WNBK (TV) Cleveland.

Nancy Ferrara, formerly of Hilton & Riggio, has been added to Petry’s tv promotion staff in New York as sales service manager.

KPTV (TV) PLANS MEGAWATT

KPTV (TV) Portland, Ore., the country’s first commercial uhf station, expects to be operating at maximum 1,000 kw by March 1955. Russell K. Olsen, general manager, announced last week. The project will cost about $350,000. Mr. Olsen said, with construction now underway to replace the ch. 27 outlet’s present 210-ft. tower with a new 340-ft. structure. The new tower is expected to be completed by Nov. 15 with delivery of an RCA 23 kw transmitter and 45-gain antenna set for February.

NOT MISSING A MINUTE

TEST PATTERN from 10 a.m. to 2 p.m. on WOTM-TV Lansing, Mich., ch. 54 outlet there, has been sold by the station to the newly-formed Radio Television Assn. of Lansing, organization of appliance dealers and servicemen. Each day over the six-day-a-week schedule a different service station is plugged on the network, with the first transcription cutting in every hour to identify the particular dealer. In announcing the sale, Tom Shull, station president, said that in addition to increasing WOTM-TV’s revenue, dealers have an opportunity to align sets and sell new receivers and converters.

STATION PEOPLE

Reginald P. Merridew, program director, WGAR Cleveland, appointed director of operations.

J. Frank Doody appointed sales manager, CHSJ-TV St. John, N. B.; William Stewart appointed program director; Fred Blizzard appointed film editor.

Alexander Field, formerly public relations director, promotion manager and special events announcer, KENI Anchorage, Alaska, to WLW Cincinnati as assistant director, special broadcast services department.

Bill Goodnow, formerly with sales staff, WTMI Milwaukee, appointed sales manager, WCN there.

William B. Faber, formerly vice president of tv, Headley-Reed tv, N. Y., appointed sales manager, WFLA-TV Tampa, Fla.

Chuck Conner, commercial manager, KTVA (TV) Anchorage, Alaska, and Jack Markward, WHAS-TV Louisville, Ky., to sales staff, WOOD-AM-TV Grand Rapids, Mich.; Charles Robinson, formerly with engineering staff, WBFM-AM-TV Indianapolis, Ind., to WOOD-AM-TV as assistant chief engineer.

Betty Mattison appointed public relations director, WCFL Chicago.

Robert J. McIntosh, formerly general manager, WJPS Evansville, Ind., to WWJ Detroit as local sales manager.

Fred Haner, formerly art director, WROW-TV Albany, N. Y. to WTRI (TV) there in same capacity, succeeding Charles Cummings, who moves to Hewnor Adv., same city.

William R. Rollins, announcer-disc m.c., WAYS Charlotte, N. C., transfers to WAYS-TV as chief announcer.

Gordon Lochwood, formerly with KPDN Pampa, Tex., to WELI New Haven, Conn., as disc m.c.

Bill Traphagen, production manager, WTVB-AM-FM Coldwater, Mich., to WKZO-AM-TV Kalamazoo, Mich., as disc m.c.

STERLING ADVICE

UNPRECEDENTED “institutional” messages, in which an ABC vice president will tell viewers of his station’s daytime programming plans, have been announced by the network’s odo WBKB (TV) Chicago. Sterling (Red) Quinlan, vice president in charge of the outlet, will go before the cameras Nov. 6-8-11 for a half hour each evening and explain WBKB’s “Half-Nelson” plan of programming blocked for different types of audiences throughout the telecast day.

Thomas W. Thuman, sales manager, WSAI Cincinnati, appointed to newly created position, national sales manager.

Jim Brown, announcer, KSN San Diego, Calif., to KFSF there, in similar capacity.

Ed Joyce, announcer, WRBG (TV) Schenectady, N. Y., to WBBM Chicago in similar capacity.

Jim Shirek, formerly news director, KNUJ New Ulm, Minn., to news center staff, WMT Cedar Rapids, Iowa.

Lloyd Perrin, vacation replacement announcer, KFI Los Angeles, appointed permanent announcer, succeeding Jim Todd, promoted to farm director.

Gino Dan Da Dan, accounting staff, WMAQ-WNBQ (TV) Chicago, transfers to advertising-promotion staff as writer.

Terry Saint, announcer, WMAZ-TV Macon, Ga., to WINO-TV West Palm Beach, Fla., in same capacity.

John Hartman, announcer, KWKH Shreveport, La., to WKY-AM-TV Oklahoma City, in same capacity; Barbara J. Embree and Barbara Winkler to public relations staff, WKY-AM-TV.

Harold Bates, formerly with KONA Honolulu, to KGMB there as announcer.

Thomas Blake, 28, former vice president and general manager, KSTV Stephenville, Tex., died Oct. 11.

REPRESENTATIVE APPOINTMENTS

KULA-TV Honolulu has appointed Adam Young Television Corp., N. Y.

KILO Grand Forks, N. D., appoints Everett-McKinney Inc., N. Y., effective today (Mon.).

WOTM-TV Lansing, Mich., has appointed Everett-McKinney Inc., N. Y.

KOSI Denver has appointed Forhoe & Co., N. Y.

WKDA Nashville, Tenn., has appointed John E. Pearson Co., N. Y.
This month Big Mike salutes the truckers who play such an important part in getting the livestock, grain and other farm produce... as well as manufactured items... to market.

Several of the nation's largest and best known trucking firms started and maintain their headquarters in Nebraska. Last year there were nearly 60,000 commercial trucks and more than 78,000 farm trucks registered in Nebraska. Monthly payroll of the industry in Nebraska alone estimated at $40,000,000. These 138,000 trucking units form an important transportation link in connecting the production areas with the market and ultimate consumers and keep Nebraska one of the nation's top markets.

Just as truckers play an important part in the development and progress of the Nebraska Market... so does Big Mike. Smart advertisers have recognized the power and the influence of KFAB in the Midwest Empire. Free and Peters will be glad to tell you how you can reach the people who make this area tick by using KFAB... or get the facts from Harry Burke, General Manager.

Big Mike is the physical trademark of KFAB — Nebraska's most listened-to-station
McCONNAUGHEY PUTS HIMSELF ON RECORD AT RTES-NAEB MEET; HENNOCK DISSENTS

FCC chairman takes a strong stand against program censorship. Comr. Hennock explodes at chairman’s suggestion that educators explore use of, among other things, community antenna systems. Top industry officials were in attendance.

WITH LESS than a month in the chairmanship of the FCC, George C. McConnaughey strode onto the radio-tv scene Thursday with a maiden speech on the media, drawing an attendance of top industry leaders and also a vigorous “dissent” by FCC Comr. Frieda B. Hennock.

Mr. McConnaughey’s speech, made in New York before a record audience of some 600 at a joint Radio & Television Executives Society and National Assn. of Educational Broadcasters luncheon in the Hotel Biltmore, placed the chairman on record with the following:

- A strong stand against program censorship.
- An invitation to educators to do something about idle tv channels reserved for them and also suggestions where they could use tv in other than a broadcast capacity.
- A reminder that commercial broadcasting is free to so far as listener and viewer are concerned and dependent on advertisers to keep it alive.
- A caution to broadcasters that the commercial air “should not be confined to just sales plugs interspersed with entertainment.”

Miss Hennock’s explosive and highly-emotional attack—without that Chairman McConnaughey by name—was made during a news conference held by the chairman after his luncheon address.

In attendance at the conference, Miss Hennock, while directing her remarks against “commercial interests” in the broadcast field, challenged those portions of Mr. McConnaughey’s speech which dealt with educational tv channels.

Her attack centered on Mr. McConnaughey’s suggestion near the close of his talk that educators explore “other non-commercial fm and tv outlets” open to them, including cooperation with commercial stations in the community, “campus networks,” closed circuit tv and community antenna systems.

Miss Hennock, vociferously informing newsmen, “I’m fighting mad about this and I don’t mind saying so,” labeled what she called the suggestions of “commercial interests” for educational exploration other than tv channels an “outrage.”

Continuing her attack, Miss Hennock said, “I challenge all four networks to debate” the issue. Educators, she cried, “will not be relegated to closed circuit tv.” What have the networks done for educational tv? she asked. Their record on educational tv, she asserted, “is not a pretty one.”

No Reorganization Planned

During his news conference, Mr. McConnaughey said the FCC had received the Bricker questionnaire (Senate Interstate & Foreign Commerce Committee investigation into network affiliations) and that FCC’s staff was working on it. He also said he did not anticipate any reorganization of the Commission in the wake of his appointment as chairman.

In his speech, Chairman McConnaughey said he favored “as few controls as possible, and only those that are justified and basically necessary in the public interest.” He said this applied to federal regulation of other types of electrical communication under FCC jurisdiction as well as to broadcasting.

Congress, he said, “specifically posted a ‘hands-off’ sign as far as federal censorship is concerned.” He quoted President Eisenhower on the “repugnance of thought control” when—in the words of the President—“censorship goes beyond the observance of common decency or the protection of the nation’s obvious interests, it quickly becomes, for us, a deadly danger.”

“As far as broadcasting is concerned,” Mr. McConnaughey said, “the industry is its own policeman. Radio and television groups operate voluntarily under codes of their own.”

At another point in his talk, he said:

“Though many people feel, and rightly so, that some commercial blurs are overdone—that now a ‘word’ from our sponsors’ has become the longest ‘word’ in the English language—sight should not be lost of the fact that commercial broadcasting in our country is free as far as the listener and viewer are concerned and, therefore, it must depend upon advertisers to keep going.”

On commercial broadcasting which is “confined to just sales plugs interspersed with entertainment,” Mr. McConnaughey asserted: “The

GOVERNMENT

What's their whole name?

Products, like people, are sometimes known by just part of their name. In the case of 'Vaseline', this is a mistake. Because, actually, 'Vaseline' is not in itself a whole name. It's the trade mark used to designate a whole line of products, viz: 'Vaseline' Petroleum Jelly, 'Vaseline' Hair Tonic, 'Vaseline' Lip-Ice Pomade, etc. So when you refer to a 'Vaseline' product, won't you please use its whole name? We'll appreciate it a lot!

ANSWERS: Mary Margaret McNirde

public won't stand for that. It also wants some sober thought and enlightenment."

The FCC chairman said he was "apprehensive" at times that use of the term "educational program," "tubs many listeners and viewers the wrong way." To the man who "twists the dials primarily for entertainment, the words recall enforced study in the classroom and imply academic instruction."

Mr. McConnaughey said, "It is impossible to agree on what constitutes an educational program, or where the educational element ceases and the commercial aspect begins." He cited music, news, travel, round-table discussions among many entertainment programs which also could be called "educational."

"To my mind," he said, "there is some degree of education in all types of broadcasting—am, fm, tv, closed circuit "and even amateur conversations on the air."

200 Hod Licenses

In reviewing the history of educational broadcasting, Mr. McConnaughey pointed out that by 1925, nearly 200 educational groups held am licenses but when the FCC was created in 1934, "for various reasons most of these stations were off the air." He said about 35 stations licensed to educational institutions still operate in am, a score of these being non-commercial. When FCC in 1938 set aside certain am frequencies for educators, "only a few took advantage of them. Some of those which did so changed" to fm, he said.

After educators pleaded for fm channels, Mr. McConnaughey said, the FCC in 1945 reserved 20 channels. "But the educational response to fm's opportunities has been disappointing," he asserted, despite fm's low-cost in operation. FCC authorized low power operation and later remote-control of fm, he reminded—"yet today this considerable space in an otherwise congested spectrum is still going begging."

In tv, he said, "enthusiasm in educational circles is particularly intense" but the fact that it is the most costly form of broadcasting "is proving to be a considerable stumbling block at the present time." He said: "The economic truth is that more than just 'vision' is required to 'see' educational television."

Noting the slow pace of educational tv grants—33 since mid 1952, Mr. McConnaughey said only seven thus far have made their air debut. Stressing costs, he also warned educators to be aware that color if envisioned by them, will greatly increase budget needs.

With facilities for 252 non-commercial, educational channels open, "it is now up to the educators to use them," he said. "The development and future of educational tv depends upon it. This is a challenge to the educators."

He said cooperation between local commercial am, fm, and tv stations and schools or other educational institutions has been "very successful" with programs aired generally without cost to educators. He said networks, national, state and regional, welcome "suitable programs" which help emphasize what they are doing in the matter of educational service.

Mr. McConnaughey noted, "This is a day of high competitive program selection. The general public is so accustomed to depending upon commercial radio and tv for entertainment, enlightenment and relaxation that educational subjects must be expertly presented in order not to bore a critical viewing or listening public which is quick to turn the knob."

Miss Hennock was highly critical of both the am and fm picture as related to educators drawn by Mr. McConnaughey, in his talk.

Miss Hennock also said that hearings on subscription tv were long "overdue" at the FCC and that she believed they should be held as soon as possible. She also outlined the relationship of pay-as-you-see tv with uhf. On uhf, Miss Hennock was critical of the Potter sub-committee which held hearings on the status of uhf, asking why the group did not publish an interim report.

Washington, N. C., Ch. 7
Granted to WRRF Owners

GRANT for the first new tv station at Washington, N. C., on ch. 7, was issued by the FCC last week to North Carolina Television Inc., headed by W. R. Roberson Jr. He and other members of the Roberson family own WRRF at Washington. Commissioner Hennock dissented.

Other stockholders in the new tv venture include officers and stockholders of WGBR Goldsboro; WVOT Wilson (H. W. Anderson); WELS Kinston (William S. Page); WCPS Tarboro (V. E. Fountain); WHIT New Bern, and WTVI (TV) Durham (Harmon Duncan), all in North Carolina.

The application of North Carolina tv disclosed affidavits by each stockholder agreeing that separate staffs, management and contracts will be maintained by the tv and each am station and, that no combined rates, purchasing or simulcasts will be permitted.

Suppose steel couldn't price its own product

The steel companies and the railroads have a great deal in common. Each is basic to the nation's economy and defense. Each is a large and good customer of the other.

However, while steel management is entirely free to exercise its judgment in adjusting prices to obtain business and meet competition, railroad management is not. It is prevented from doing this by regulations originally aimed at curbing railroad monopoly, a situation which disappeared many years ago.

Steel can adjust its prices overnight by management decision—which is as it should be in a free economy. The railroads must first submit proposals to the government before they can raise or lower rates, and then are frequently subjected to delay.

Steel can quickly stop the manufacture of any item which dwindling demand causes to be made at a loss. The railroads are prevented from abandoning many unprofitable services without recourse to long and involved regulatory processes—and then are often denied approval and forced to continue unneeded services at heavy expense.

Because of these and many other inequalities, the railroads—vital to the country and its economy—operate under increasing difficulties that handicap their managements in taking steps aimed at giving the best possible service to the public.

The railroads do not seek relief from all regulation. They ask only that the regulations under which they operate be modernized in line with today's highly competitive conditions in the transportation industry...

Eastern Railroad Presidents Conference, 143 Liberty Street, New York 6, N. Y.
LAMB CASE HEARS STORY CONFLICTS

Ex-Communist Eugene Stoll, FCC Broadcast Bureau's eighth witness, believes Edward Lamb never accepted Communism in any form.

CONTRADICTION of testimony by earlier FCC Broadcast Bureau witnesses and the opinion that broadcaster-publisher Edward Lamb never accepted Communism "intellectually or any other way," were among highlights of testimony last week by ex-Communist Eugene Stoll in the FCC hearing on license renewal of Mr. Lamb's WICU (TV) Erie, Pa.

The hearing, before Examiner Herbert Sharpman, included issues whether or not Mr. Lamb falsely represented to FCC that he never had Communist ties [B&T, Sept. 20 et seq.]. Mr. Lamb, who awaits completion of the Broadcast Bureau's case before he can present his evidence and witnesses, has denied any Communist associations and describes the proceeding as a "political frame-up."

Mr. Stoll, who was active in Toledo Communist Party affairs from 1937-1945 and executive committee member, on Tuesday related he first met Mr. Lamb in 1934 and sold him a subscription to the Sunday edition of the Daily Worker. He said he visited Mr. Lamb's law office on various occasions through the early 1940s, usually on trade union matters.

The witness, now an electrician at Swanton, Ohio, said he saw Mr. Lamb in June of this year for the first time since 1944. It was at Mr. Lamb's office in Toledo at a meeting pre-arranged by Sunne Miller, manager of Mr. Lamb's WTOD Toledo, he said. Asked by Broadcast Bureau counsel Thomas Fitzpatrick what he said to Mr. Lamb at the June meeting, Mr. Stoll related, "I said that I was under the impression that this attack [on Mr. Lamb] was due to the hysteria of the times and that I was only interested in one question.

"I made known to him my position as being opposed to the Communist movement today, to the position of the Communist Soviet Union in world affairs, . . . and that as far as his case was concerned before the FCC, that if he still had any connection with the Communist movement, that there would be no hope for him and I said, 'Man to man, eye to eye and face to face, do you have any connection with the Communist movement?'"

"And he looked me straight in the eye and he said, 'Gene, as God is my witness, man to man, eye to eye and face to face, I have no connection with the Communist movement. I never had any connection with the Communist movement and I don't intend to have any.'"

On Wednesday, when Mr. Stoll said he was sure Mr. Lamb never accepted Communism intellectually or any other way, the examiner questioned why Mr. Stoll used the word "still" when he quizzed Mr. Lamb in June. The witness explained "there was a question of timing in this whole thing—what was a Communist Party from 1932 to 1942 and what was it from 1945 to 1954?"

"Now, Mr. Lamb worked with unions that had Communist leaders; they had Communist members, and it was to do this union work he had to do business with Communists," Mr. Stoll said.

Under cross examination by Russel Morton Brown, counsel for Mr. Lamb, Mr. Stoll testified he had never heard of Communist Party meetings being held in 1936 at the Chittenden Hotel in Columbus, Ohio, and explained that state meetings usually were held in Cleveland.

Mrs. Marie Natvig earlier claimed she met Mr. Lamb at Columbus meetings and on one occasion in 1936 was Mr. Lamb's "guest" at the hotel. She claimed he told her of plans for world revolution, including seizure of U. S. communications [B&T, Oct. 18, 11].

Mrs. Natvig, who claimed she was a Communist Party member from 1935-37 at Toledo, didn't recall making any formal membership application or paying regular dues. Mr. Stoll, who held various party offices, said members had to sign an application and were required to pay dues every month in proportion to their income.

Mr. Stoll's testimony also differed with that of previous witness Ernest Courcy as to the location of Mr. Lamb's law office in Toledo's Edison Bldg. during the 1930s. Mr. Stoll said he helped build the Edison Bldg.

Mr. Stoll told Mr. Brown he was expelled from the party in 1946 under framed-up charges, although he had broken with the Communists intellectually the year before. He claimed William Garfield Cummings was responsible for the frame-up and his expulsion. Mr. Cummings, the Broadcast Bureau's first witness against Mr. Lamb when the case opened in September, said he was asked by the FBI to join the Toledo Communist Party in 1942 and report on its activities [B&T, Sept. 20].

Under questioning by Mr. Brown, Mr. Stoll said he never heard of any "must list" of persons to be contacted by the party for financial contributions nor did the local party keep any file boxes of membership, both of which had been alleged earlier by Mr. Cummings.

On Thursday, the Broadcast Bureau introduced its ninth witness in the proceeding, Mabel Flicker, also of Swanton, near Toledo. Miss Flicker testified she remembered seeing Mr. Lamb in 1944 at the dedication of Lincoln House in Toledo, described as Communist UNION TRUST BUILDING CINCINNATI 2, OHIO Tel. DUhar 7775 RICHARD C. CRISLER LINTON WELLS
headquarters for a time. She said she was in the party from about 1934 to 1946.

Miss Flicker recalled that her former husband, Kenneth Osthimer, was “quite a reader” and in 1936 had offered to help Mr. Lamb with a biography of the Russian leader, Nikolai Lenin, but that Mr. Lamb told him he would let him know if he needed any help. Mr. Stoll also testified he had discussed such a proposed book with Mr. Lamb in 1936.

On Monday, Mr. Brown further cross examined Mrs. Natvig about the circumstances of the second of her three marriages and divorces to test her memory. He has challenged her mental competency several times and characterized her as “lunatic” among other descriptions, which have drawn objection by the examiner and Broadcast Bureau counsel.

Mrs. Natvig claimed “personal privilege” and refused to tell what name she used at Radcliffe College during the 1920s. When the examiner said he would strike all her testimony in the case if she did not answer, Mrs. Natvig indicated she was not sure just what name she might have used. Mr. Brown then introduced a Radcliffe letter claiming no one under several names mentioned earlier by Mrs. Natvig had ever attended the college during the period cited.

Mrs. Natvig also disclosed that 10 days previously she had met her first husband, Mr. Harris, in New York and he told her he had been contacted by the FBI about the Lamb case. She said she did not now know his whereabouts. Examiner Sharfman felt the contact was a “breach” of an earlier understanding among counsel since Mr. Brown wanted to see Mr. Harris first for questioning.

**FCC Stays KGUL-TV’s Move Nearer Houston**

MOVE of KGUL-TV Galveston to a new site nearer Houston was stayed last week by the FCC following a protest against the shift by KTRK-TV Houston [B&T, Oct 25]. At the same time, the Commission ordered that a hearing be held Nov. 15 on the complaints of the Houston ch. 13 grantee against the Galveston ch. 11 station’s transmitter move.

KTRK-TV charged that the Galveston station was moving closer to Houston in order to maintain its CBS-TV affiliation, and also to sell advertisers on its coverage of the Galveston-Houston market. This violates the TV table of allocations, KTRK-TV said. It also alleged that KGUL-TV had opened studios in Houston before the FCC granted its transmitter move.

In its opposition to the KTRK-TV petition, KGUL-TV claimed that KTRK-TV had no standing as a party in interest and also that since it had been serving Houston with a Grade A signal before it moved the transmitter, no actual change in its coverage is involved.

The Commission ordered that the burden of proof shall be on KTRK-TV.

**Four Standard Grants Issued by Commission**

PERMITS for four new standard daytime stations were issued by FCC last week. They were for Riverhead, N. Y.; Greer, S. C., and Loveland and Lakewood, Colo.

- At Riverhead, new facilities on 1390 kc with 500 w were awarded to Suffolk County Broadcasting Corp., licensee of WALK-AM-FM Patchogue, N. Y.
- At Greer, a new station on 1300 kc with 1 kw was granted to Greer Radiocasting Co.
- At Loveland, permit for a new station on 1570 kc with 250 w was granted to Loveland Broadcasters.
- At Lakewood, facilities of 1580 kc with 250 w were granted to Lakeland Broadcasting Service.

**Examiner Favors Renewal Of CBS’ WBBM-TV License**

INITIAL decision renewing the license of CBS-owned WBBM-TV Chicago and modifying its license to specify regular operation on ch. 2 instead of ch. 4 there was issued by FCC Hearing Examiner Herbert Sharfman last week.

The action followed dismissal of Zenith Radio Corp.’s application for the ch. 2 facility two weeks ago [B&T, Oct. 25].

The examiner also granted WBBM-TV authority to operate with full 100 kw power.

The much-controverted Chicago ch. 2 case began early in 1953 when CBS bought the ch. 4 facilities of WBKB (TV) Chicago for $6 million. This followed the FCC’s approval of the merger between ABC and United Paramount Theatres Inc. which saw the new American Broadcasting-Paramount Theatres Inc. owning two TV stations in Chicago (ABC-owned WENR-TV and UPT-owned WBKB). Earlier, the Commission in its 1952 Sixth Report and Order had directed the shift to ch. 2.

Zenith’s application for ch. 2 in Chicago had been filed in 1948, but the FCC had dismissed it on the grounds that the radio-TV manufacturer...
had not participated in the allocation proceedings or the WKBK renewal case. Zenith appealed this dismissal to the U. S. Court of Appeals in Washington, and the court ordered that Zenith should have a comparative hearing with applicants.

In its agreement settling the ch. 2 case, CBS paid Zenith $375,000 for Zenith's transmitter and other equipment and Zenith bought a quarter segment of Omnibus on CBS-TV at about the same cost.

ALL TV'S IN LINE FOR BRICKER PROBE

IT SEEMED pretty definite last week that all U. S. television outlets will be among the groups receiving questionnaires in Sen. John W. Bricker's Senate Commerce Committee investigation of the tv networks and the uhf-uhv situation, provided the whole probe isn't scuttled or its direction turned elsewhere by a Democratic victory tomorrow (Tuesday).

The Ohio Republican's committee investigation staff members, headed by attorney Robert F. Jones, former FCC commissioner and Ohio congressman, seem to have a fairly clear idea of the kind and extent of information they want. Out are holding up questionnaires to find out first how much data they can get from the FCC and the networks to whom queries have been sent [B+T, Oct. 25, 11]. To this end, at least two conferences have been held with FCC staff members.

U. S.-Mexican Radio Taps Begin Nov. 4

REPRESENTATIVES of FCC, State Dept. and the radio industry leave the U. S. this week for bilateral talks with Mexico on the use of the standard broadcast band, to begin Thursday in Mexico City. Two dozen industry "observers" will attend along with the official U. S. delegation, headed by Comr. Rosel H. Hyde [CLOSED CIRCUIT, Oct. 25].

Lower frequencies, higher power ceilings and prior rights to 540 kc are understood to be primary aims of Mexico, who was not a party to the 1950 North America Regional Broadcasting Agreement. NARBA still awaits ratification by the U. S. Senate.

Vice Chairman of the U. S. delegation will be John S. Cross, State Dept. Telecommunications. Others in the group include Joseph M. Klintner, James E. Barr and Bruce S. Longfellow, FCC Broadcast Bureau; Vera Nordness, secretary to Comr. Hyde, who will be secretary of the delegation, and Raymond L. Harrell, telecommunications attaché of the U. S. Embassy at Mexico City. Delegation headquarters will be the Reforma Hotel.

Observers attending on behalf of Clear Channel Broadcasting Service include Hollis M. Seavy, CBSU director; attorney Russell Eagan and W. C. Earman and George F. Leydorf. Daytime Broadcasters Assn. will be represented by counsel Harry J. Daly while Daytime Petitioners Assn. will be represented by attorney Leonid H. Marks.

Attending in behalf of Westinghouse Broadcasting Co. will be D. A. Meyer, technical field director, and Ralph N. Harmon, vice president. James P. Verhoff, director of BCA Frequency Bureau, and engineer John M. Flynn will represent NBC. CBS representative is James D. Parker while counsel Andrew G. Haley will attend for American Broadcasting-Paramount Theatres.

Other observers and the principal stations they plan to represent, according to State Dept. include: Consulting engineer P. A. M. Creaven, Storer Broadcasting Co.; KRLD Dallas; KFRE Fresno, KING Seattle and WJJD Chicago; consulting engineer George P. Adair, WQXR New York; Herbert E. Evans (WGAR Cleveland); Carl Lindberg, WPIX Alexandria, Va.; Paul R. Bartlett, KFRE Fresno; Benito Gugino, attorney, Peoples Broadcasting Corp. and WCCO Minneapolis; James A. McKenna Jr., attorney, and John H. Poole, KRIG Avalon and KBIF Fresno, Calif.; Arthur W. Scharfard, attorney, WICO Houston; KPMD Bakersfield, Calif.; and Head of the Lakes Broadcasting Co.; Harriett T. Buehling, KFWY Oklahoma City, WDSU New Orleans and Time-Life Stations; Eugene L. Burke, attorney, WCFL Chicago; Bert H. H. Fowle, executive director, California Farm Bureau Federation.

Meanwhile, Mr. Poole made public last week results of a survey of 160 U. S. radio stations operating on Mexican clear channels. Of 180 respondents, 91% said they wanted to change the present "gentleman's agreement" between U. S. and Mexico so as to permit nighttime broadcasting. They presently are restricted to daytime operation under the informal pact.

Mr. Poole said 59% of those replying wanted the power ceilings for U. S. stations on these channels to be boosted to 5 kw or more.

FitzGerald to Head FCC Opinions, Review

JOHN L. FITZGERALD, principal land attorney of the Housing and Home Finance Agency, has been appointed chief of the FCC Office of Opinions and Review effective Nov. 15, it was announced last week by the Commission [CLOSED CIRCUIT, Oct. 19].

The first major staff appointment since Chairman George C. McConnaughey assumed office, Mr. FitzGerald succeeds Broadcast Bureau attorney Sol Schildhause who has been detailed as acting chief of the office for more than a year. Mr. Schildhause will return to the Broadcast Bureau.

Born in Nebraska in 1908, Mr. FitzGerald has been a government career employee for 17 years. He has been principal land attorney with HHFA since 1949.

We Wouldn't Be In Today's Air Age

—if We Hadn't Had A Free, Competitive Oil Industry

by

RALPH S. DAMON
President,
Trans World Airlines

You can step aboard a plane at noon in New York today and dine in San Francisco tonight. You can breakfast in Washington, D. C. and lunch in Chicago... or you can leave New York in the late afternoon and be in almost any capital in Europe for lunch or dinner the following evening. Just a matter of routine, these days—part of the almost 19 billion passenger miles U. S. domestic airlines will fly this year.

Yet this still swiftly-growing industry, which has literally grown into manhood during my own working lifetime, didn't just happen. And while the spotlight has justly been on the swift, shining planes and the men who fly them, it's worth remembering that today's air age as we know it couldn't have come about if we hadn't had a free, competitive oil industry.

Today's planes—and I can say this out of 35 years of first-hand observation—are the result of the closest kind of teamwork between plane designers, engine designers and oil scientists. The whole spectacular history of aviation in this country demonstrates the success of this collaboration. And throughout this history, America's oil companies have surely lived up to their great responsibility for aviation's development.

Abundant supplies of low cost fuels were just a beginning. Year after year, better fuels helped make better, more efficient engines possible. And every step of the way, for oilmen, engine-makers and aviation people alike, the spur has been the driving force of competition—under a system where the opportunity for rewards exists.

This competition in America today is real and it is constant. I know, for when TWA buys aviation gasoline in the U. S. (we used some 107 million gallons last year) we are able to buy in a competitive market, with many companies anxious to bid for our business.

We, in commercial aviation, benefit with quality oil products at the lowest possible prices. And because the airlines are competitive, these benefits are swiftly passed along to you, the public.

This is one of a series of reports by outstanding Americans who were invited to examine the job being done by the U. S. oil industry.

This page is presented for your information by The American Petroleum Institute, 50 West 50th Street, New York 20, N. Y.
10 MILLION COLOR SETS IN '59—ROBERT SARNOFF

NBC's executive vice president tells Buffalo Advertising Club an estimated 2 million people already have seen color tv.

AT LEAST two million people have seen color tv shows, according to NBC's Executive Vice President Robert W. Sarnoff, who estimated the figure was "banker-conservative," in a talk Tuesday before the Advertising Club of Buffalo. The estimate, he said, was based on the "hundreds of people" who have at least caught a glimpse of color on the 10,000 color sets now in national circulation.

To bolster his estimate, Mr. Sarnoff traced reports he has received from various population centers. He noted a minimum of 150,000 in Philadelphia watched one or more color shows through cooperation of 200 RCA dealers who opened their stores for viewers of both NBC and CBS colorcasts.

He said Walter Damm of WTMJ-TV Milwaukee, NBC's affiliate there, reported 50,000 people in that area saw color; the Chicago estimate was 300,000; Oklahoma City, 25,30,000; and in St. Louis some 5,000 have been registered for each color show thus far.

Mr. Sarnoff took issue with certain claims that only small audiences have tuned in to NBC-TV's color "spectaculars." He said that this type of show is "worth doing" when "one out of nearly four Americans is interested in seeing a big off-beat television show." He said, "We at NBC intended to continue doing them."

He asserted that national ratings have been increasing—since the 37 million audience report for the first such spectacular—for each successive color spectacular.

Other points made by Mr. Sarnoff, who received keys to Buffalo during "NBC-WGR Week" proclaimed by the mayor, included: Use of tv by advertisers is at its peak with NBC-TV totaling 165 and CBS-TV 85, for a total of 250 advertisers "between us." Local use has been up, too. In 1952, tv's share of all media advertising was 7% which he predicted should be no less than 20% in 1956.

Mr. Sarnoff said his confidence in future tv growth was predicated on three important developments of recent years: (1) Lifting of the tv freeze and the subsequent swelling of tv stations, (2) the magazine concept of advertising started by NBC five years ago and (3) color tv—a conservative guess is that five years from now there will be 10 million sets in use.

Radio Sales Effectiveness
Cited by CBS Radio's Karol

A RADIO BUY may be a greater challenge to the advertiser today than it was in 1948 but "the returns can be even bigger than when the medium had all the glamour of a spectacular," John Karol, vice president in charge of network sales, CBS Radio, said Wednesday.

Mr. Karol, in a speech at a Radio-Television Advertising Executives Club of Boston luncheon, said that in 1948, an evening advertiser reached an average of 4.8 million homes, once-a-week with three minutes of commercial time for $19,000, or more. But today, he said, that advertiser, for less than $15,000 a week, can reach more than 5 million different homes spread over five nights per week with a total of five minutes of commercial time.

"And because the advertiser's message reaches some of these homes more than once, his gross weekly audience is around 9 million homes," he said, while for $30,000 he can have a still bigger audience and 12½ commercial minutes.

He also pointed out that the nation's major advertisers have maintained confidence in radio "as a great selling medium" despite a belief their dollars were being diverted to other media. "In 1948, 28 out of the top 30 advertisers were using network radio," he said. "Today we're doing even better—29 out of the top 30 are using the medium."

Mr. Karol's talk followed the showing of the CBS Radio film presentation, "Tune In Tomorrow."

Craig succeeds Tatum
At ABC Hollywood Post

KENNETH CRAIG, tv program director of ABC Western Div., Hollywood, has been named to succeed Donn Tatum as director of tv affairs for the division. Mr. Tatum has resigned with future plans not announced. In other western division personnel shifts, Cam Pierce, chief technical director, has been appointed to the newly-created post of engineering coordinator, with Ralph Denechaud as administrative assistant. The resignation of Phillip G. Caldwell as chief engineer also has been announced.

Courtney McLeod, traffic and scheduling supervisor, ABC national and regional radio, Hollywood, adds similar duties for ABC-TV.

Two Tvs Linked to Bell

ADDITION of WSAN-TV Wausau, Wis., and WCNY-TV Carthage (Watertown), N. Y., to the Bell Telephone System's nationwide network facilities was announced last week by the Long Lines Dept., AT&T.

Network programs for WSAN-TV, according to Long Lines, are fed over the Chicago-Minneapolis radio relay route to a tower located near Barnaboo, Wis., and from there a new 109-mile microwave link carries the shows to WSAN-TV's transmitter. WCNY-TV receives its programs from the Albany- Buffalo radio relay route via a new 77-mile microwave link.

KEYD-TV Basic DuMont

KEYD-TV Minneapolis-St. Paul (ch. 9) will be DuMont Television Network's primary affiliate in Twin Cities when it starts Jan. 9, Elmer B. Lyford, DTV's director of station relations, announced Friday. Owned by Family Broadcasting Corp., station will operate with 316 kw.
FINAL REPORT MADE BY ALL-INDUSTRY LOCAL TV MUSIC GROUP; REFUNDS DUE

Stations that contributed total of $161,288 are slated for a 48% return.

The FINAL report of the All-Industry Local TV Music License Committee, formed some five years ago to negotiate television license terms with ASCAP, was mailed last week to the stations which supported it—and with a notice possibly without parallel in the history of the committee.

The notice: Contributing stations will get a substantial portion of their money back.

Dwight W. Martin, vice president of General Teleradio and chairman of the committee, notified the stations that $78,510.69 of the $161,288 they had contributed for committee support would be returned to them. The report included an audit by Arthur Young & Co., which showed the refunds to amount to 48% of the station contributions. Mr. Martin said it was the first case on record where an industry committee had returned a substantial portion of its funds.

In his letter, Mr. Martin also expressed the committee’s appreciation to ASCAP both for the ability of its negotiators and for ASCAP’s $100,000 contribution (made after the agreement on license terms was reached) toward defraying costs of counsel fees and other committee expenses. It was the ASCAP contribution, he noted, which enabled the committee to refund so much of the stations’ contributions.

The formula for making refunds to contributing stations was spelled out as follows in the report of the auditors, who will mail out the checks to stations entitled to rebates: "The committee decided that the amount of refund, if any, to a local TV station should be the excess of its contributions over the actual net expenses of the committee allocable to that station based generally upon four times its card rate in effect at time of pledge as requested by the committee in its letter of March 13, 1951, after appropriate adjustment for those stations who failed to contribute the required amount."

Mr. Martin also voiced gratitude to the networks for contributing substantial time, effort and financial assistance, even though they were not committee members, and he highly lauded the work of Stuart Sprague and Judge Simon H. Rifkind as committee counsel.

The negotiations between the committee and ASCAP reached a successful conclusion early this year when terms agreeable both to the stations and to ASCAP were finally evolved. The committee’s final report thus was described as terminating a "long and successful life" of the group. A court action initiated by a group of stations against ASCAP still pend in U. S. District Court in New York but it is expected to be withdrawn as soon as the last of these stations signs with ASCAP. All TV networks and most stations already have signed.

The terms worked out by the committee-ASCAP negotiators and approved by stations and the Society represent an appreciable reduction in rates from those previously paid.

The ASCAP blanket license for stations, which is the one most of them have chosen, calls for a commercial rate of 2.05% of revenue from the sale of time and a sustaining rate of the station’s highest quarter-hour card rate per month. The per program license calls for a commercial rate of 9% on net revenue from annnouncements during which ASCAP numbers are used, except that if such numbers are used only as background on films not made primarily for television, then the rate is 4%. The per program sustaining rate is 3.5% of the card rate applicable to each sustaining program period containing ASCAP music, except that the total annual sustaining bill shall not exceed 12 times the station’s highest quarter-hour rate.

The new licenses, both blanket and per-program, are for four years, retroactive to Jan. 1, 1954.

The networks agreed to blanket licenses, slightly higher than those for stations.

In his letter to contributing stations, Mr. Martin said the committee believed its efforts "have resulted in benefit not only to you, but
Hagenah Joins RCA Recorded Prog. Serv.

GUS HAGENAH, vice president of Standard Radio Transcriptions Services Inc., has resigned after 10 years with the firm to join RCA Recorded Program Services. Mr. Hagenah will make his headquarters in Chicago.

During his association with Standard, Mr. Hagenah supervised national sales for the company, produced recordings in the Chicago studio, and handled managerial duties for United Television Programs Inc., when that firm was operated by Standard.

Before joining Standard, Mr. Hagenah was with SESAC for eight years. In 1936 he entered the company's station relations department. In 1944, he left SESAC, where he was manager of the program department, to move to Standard.
programming, since it is government sponsored, is not as much enjoyed as our type of commercial programming,” and because the high standard of living of the American middle class does not exist on any large scale in Europe. Thus, purchases of tv sets by average Europeans represent a very much higher percentage of annual earnings.

He also predicted greater use of the European television network, which he said gained wide success early last summer.

CJON Bests CBC For St. John’s Tv
THE Canadian Broadcasting Corp. has been turned down by the Canadian government for a license for a television station at St. John’s, Newfoundland. CJON St. John’s has been granted a license to operate a tv station on ch. 2 there, the 29th in Canada. The ruling of the Canadian government is the first time that the government-owned CBC has been refused a license for an am or tv station.

When the CBC board held its meeting at St. John’s on June 18-19, CJON executives C. W. Stirling and D. Jamieson appeared with their application. The CBC board in its recommendations following this meeting recommended that the CBC be licensed for a tv station, the first in Newfoundland [B&T, June 28]. In its recommendation it emphasized the need of a CBC station there for its national tv network. It recommended CJON for a license if the government did not approve of a CBC tv license for St. John’s.

The government ruling has interesting interpretations, although no reasons were advanced in the official announcement of Transport Minister George C. Marler on Oct. 20. However, it is felt in radio industry circles that the move may be the government’s gradual realization that CBC tv stations and programming have not met complete public approval and that the government is beginning to listen to the groundswell of discontent with CBC policies discussed at Liberal party (the government is Liberal) conventions, especially among young Liberal groups and central Canadian Liberal group meetings. The ruling also is interpreted as forecasting an early change in government policy to permit establishment of independently-owned tv stations in major market areas now having only CBC stations.

Guatemala Tv Station Under Active Planning
PLANS for a Guatemala tv station are under active consideration by that Latin American country’s communication officials. It became known last week. The station would be based at mile-high Guatemala City and operated by an independent group under the control of the Guatemalan Ministry of Communications, it was understood.

Among those involved in the bid to build and operate the station, it is understood, are J. C. Wilson Jr., director in Guatemala of Pan American Airways; A. Frank Katszente, owner of WKAT Miami Beach, Fla., and Paul A. Porter, former FCC chairman and now in private low practice in Washington. Others in this group are Guatemalan citizens, it was said.

Hammond to Head CAAA
G. C. HAMMOND, Cockfield Brown & Co. Ltd., Montreal, was elected president of the Canadian Assn. of Advertising Agencies at its 31st annual meeting at Toronto Oct. 21. Mark Napier, J. Walter Thompson Co., Toronto, and Elton Johnson, Locke, Johnson & Co., Toronto, were elected vice presidents.
UNESCO PLANS TELEVISION SERIES TO DRAW FROM WORLD-WIDE POOL

Even Russia indicates interest in project which envisions documentary comprised of five-minute film sequences taken in each nation.

SERIES of three television projects are under consideration by the United Nations Educational, Scientific and Cultural Organization, in which countries throughout the world would participate.

The projects were outlined by Henry Casirer, head of tv for UNESCO with headquarters in Paris, who described at length a plan under which countries throughout the world would participate in the filming of international tv documentaries. A former CBS news editor and freelance, he is on a brief visit to the U. S.

As Mr. Cassirer envisioned this project, tv stations or some other organizations in each country would shoot a five-minute film sequence on such topics as health services, children's games, the winter season or street music, and these segments would be put together as a world-wide documentary, available to all participating stations. He said the plan has received "enthusiastic support" in many countries, and reported that Soviet representatives were "highly interested."

Other projects proposed by Mr. Cassirer were the establishment of a clearing house for tv information on what programs are available for exchange, and the organization of a series of international seminars to be held in Latin America and Europe next year. He said the seminars would be attended by production experts concerned with the exchange of "technical experience and ideas."

Mr. Cassirer said he would like to see the international documentary project set in motion by the beginning of 1955. He added it would operate under his expanding tv unit, for which he expects "a considerable increase" in budgetary funds, to be voted next month.

Mr. Cassirer explained his work with UNESCO is to help member nations develop tv stations and the use of television through interchange of experts and information. His office, located at 19 Avenue Kleber, Paris 16, France, does not produce programs, however.

He reported 30 nations now have tv stations in operation while another 30 countries are actively planning or constructing them.

The French pattern of community viewing groups in the country schoolhouse appears to be a solution for the spread of tv in under-developed countries. The practice also stimulates community unity and action, especially for government health or agricultural education films, he noted.

"Television has a much greater hold on people than radio ever had," he commented, citing the impact on a community when the group viewing project began.

U. S. Experiences Cited

In other countries, he said, television is often the subject of heated discussion, with the experience of the United States as background. Three points of dispute most frequently mentioned are (1) sponsor influence in programming, (2) crime shows and children and (3) excessive hours of viewing and their effect on the individual.

Many nations, he explained, could not economically support a commercial tv system patterned after the U. S. if they wanted to.

In his report of the first international study course for producers and directors, sponsored by UNESCO last July 5-24 in London with the BBC as host, Mr. Cassirer said delegates from the U. S. and 11 other countries, including Russia, discovered many common problems in tv.

Chiefly, he said, these included viewer passivity and efforts to get the viewer to take action: television "snobism," or the feeling of the intellectual or well-to-do that tv is "all right for the masses but not for me," and audience research, especially qualitative analysis.

Mr. Cassirer noted that the U. S. delegates to the London study conference planned a follow-up meeting last week in New York at the National Assn. of Educational Broadcasters (story this page).

Response was "overwhelmingly" in support of Eurovision, the international exchange of programs over a single European network last summer, he said, citing results of a survey made in various countries.

Educational tv Needs Help From Governments—Abrams

EDUCATIONAL television must receive public funds from federal, state and municipal governments in order to become established firm. He expressed the belief and survive as an education force, Benjamin Abrams, president of Emerson Radio & Phonograph Corp., New York, declared last week.

Mr. Abrams offered this commentary last Tuesday in a talk at formal dedication ceremonies of educational station WCET (TV) Cincinnati, to which he presented a check for $10,000. WCET is the sixth station to comply with the terms of the Emerson $100,000 Educational Television Grant, under which the first 10 tv stations to begin broadcasting on channels allocated by the FCC for non-commercial educational purposes will receive $10,000 each.

Mr. Abrams asserted that if all 232 channels reserved by the FCC for non-commercial educational use are to be built, financial support must come not only from government but also from "all segments of our society—from individuals, foundations and industry," He noted that Emerson's motive in establishing the $100,000 grant to aie members was to bring about financial help to educators for "television, to cultivate additional financial and moral support for this medium."

NAEB SESSIONS HELD IN NEW YORK CITY

Educational television heads list of topics discussed by more than 250 delegates.

NATIONAL Assn. of Educational Broadcasters' 30th annual convention was held in New York last week at the Hotel Biltmore, with more than 250 business and civic leaders, educators and representatives of radio-tv in the final registration, according to Seymour N. Siegel, director of WNYC New York and chairman of the convention committee.

The Oct. 27-30 convention was preceded by meetings of the convention committees, NAEB members and directors and engineering seminars which began Oct. 24 and ended Oct. 26 with a dinner for the board of directors given by Arthur Hays Sulzberger, president and publisher of the New York Times.

On Wednesday morning, delegates were welcomed to New York by Mayor Robert F. Wagner, who accepted an award from NAEB on behalf of WNYC New York. The station was cited for "its long years of distinguished service to the citizens of New York; in recognition of the outstanding leadership provided by Seymour Siegel and for the support given this service by Mayor Robert F. Wagner."

A special reception followed at United Nations where NAEB members were addressed by Ambassador Henry Cabot Lodge Jr. and toured the UN and its communications facilities. Radio Pioneers dinner in honor of NAEB was held Wednesday evening.

The association's business meetings got underway Thursday morning with a session devoted to committee reports, followed by the keynote session under the chairmanship of Dr. Edwin S. Burdell, president of the Cooper Union.

NAEB members heard Dr. Buell G. Galagher, president of the College of the City of New York and Leo Rosten, editorial advisor. Look magazine.

At the same session, Prof. Charles Siepmann, chairman of the department of communications, New York U., addressed the delegates on "Clues to the Future Success of Educational Broadcasting." Prof. Siepmann praised the NAEB for advances it has made since it organized 30 years ago and expressed the belief that the solidarity of the educational broadcaster could be traced to his ability to serve the individual. It is this kind of service that basi-
cally distinguishes educational from commercial broadcasting which serves a mass audience, he said. Although both forms of broadcasting are essential, their roles are different and in their difference lies their respective strengths, Dr. Stephen J. Siepmann pointed out at a meeting of the National Educational Television Center, New York City, on Thursday (see story, page 64), and in the afternoon workshop sessions were held. The promotion, publicity and audience building group heard Sydney H. Eiges, vice president in charge of NBC press and public relations, and Joseph Cook, supervisor of the tv network's on-the-air promotion, while at another meeting Joel Tall, CBS tape editor, discussed and demonstrated tape editing.

A panel discussion was held on programming an educational radio station, with the following as panelists: Marie Scanlon, chairman, supervisor of radio-tv, board of education, Newark, N. J.; D. D. Lusty, CBC; Margaret Tyler, director, WOSU Columbus; Harry Lamb, director, WTDTS Cleveland; J. J. Stillinger, Cleveland public schools; Gale Adkins, Radio House, U. of Texas, and Cecil Suferin, WNYE New York.

Another session, with Dorothy Klock, production supervisor of WNYE, as chairman, was devoted to the utilization of the educational radio program. James MacAndrew, director of broadcasting for the New York City schools, headed a discussion on "The Nature of the Audience." An engineering technical session was held at WNYC New York, where Clarence Lebel, president of Audio Instruments Inc., led the discussions and demonstrations on testing and maintenance of tape recorders and the use of audio testing techniques.

Baxter Addresses J CET

A 2 p.m. general session of the Joint Committee on Educational Television was addressed by Dr. Frank Baxter, U. of California, on "Shakespeare and TV." Ralph Steege, executive director of the Joint Committee, gave a progress report on educational television.

Friday morning's general session was chaired by Dr. William Jansen, superintendent of New York City schools. Speakers were Dr. George Morehead, chairman of the Educational Television Center, New York U.; Robert Saudek, director, Ford Foundation Radio & TV Workshop; Dr. W. R. G. Baker, vice president, General Electric Co.; Raymond Wortcoft, Canadian Television Commission, and Raymond Hurtibert, president, Alabama Educational Television Commission.

Dr. Baker expressed the belief that for the next few years educational tv will "go through a period of trial and error, advancing slowly, and even slipping back a step or two on occasion." But, he added, at the end of such a period, educational tv should "emerge as an integral part of the teaching tools for the printed book..." Dr. Baker, speaking as a businessman who looks at the potential of educational tv, pointed out the strong connection between the medium and the business world, saying that "if 25% of those who are dropping out of school before completing high school could be convinced through educational tv they should continue their educations it would give increased importance to teaching tools for the nation, to the creation of new jobs calling for greater skill and learning, to the advancement of our standard of living," he said.

A Friday afternoon panel discussion under the chairmanship of Dave R. Wainscott, director of radio-tv, New York U., on programming for the educational tv station, was followed by a color demonstration and a visit to rehearsals of CBS-TV's "I Remember Mama." Samuel Brownell, Commissioner of U. S. Office of Education, addressed the Friday dinner meeting. Awards and citations were presented by Graydon Amsmun of the U. of Alabama, president of NAEB, to Richard Hull, director of WOAC, Iowa, and Harold B. McCarty, director of the Wisconsin State Broadcasting Service, Madison, Wis.

Convention was to close Saturday morning with a business session.

WTTW(TV) Names Robertson
To Program Manager Duties

APPOINTMENT of Ellis J. Robertson as program manager of WTTW (TV) Chicago was announced last Monday by John W. Taylor, executive director of the educational, non-commercial channel. Mr. Robertson will assume his new duties November 15 after seven years in a similar capacity at WTMJ-TV Milwaukee, the Journal outlet. WTTW plans to commence operation sometime next year.

He formerly was program director of Wnam Marquette, Wis., in 1942 and the following year held a similar post at WCLO Janesville, Wis. Mr. Robertson joined the staff of WTMJ Milwaukee as announcer-producer in December 1943 and was appointed program manager in January 1946.

CBC Undertakes Extensive
Educational Tv Experiment

DURING NOVEMBER the Canadian Broadcasting Corp. and the Canadian National Advisory Council on School Broadcasting will undertake a program of informal experiment in classroom television programming. - According to Dr. E. D. Stillinger, director of WNNM Marquette, Wis., in 1942 and the following year held a similar post at WCLO Janesville, Wis. Mr. Robertson joined the staff of WTMJ Milwaukee as announcer-producer in December 1943 and was appointed program manager in January 1946.

The experiment, called Let's Take a Look, will be carried by all Canadian tv stations now on the air at approximately 2 o'clock in the afternoon Tuesdays and Wednesdays during November. The CBC has obtained the cooperation of all Canadian independent stations to go on the air that early in the day with live network. Each network of the eight programs, four of which are designed for grades 5 and 6, and four for grades 7 and 8. The programs are all 15 or 20 minutes in length, and were prepared by the CBC educational television studios and the National Film Board at Ottawa.

The Radio-Television Mfrs. Assn. of Canada has placed tv sets in some 75 schools throughout Canada, thus assuring wide coverage for the experiment in all geographic sections of Canada. A manual has been prepared for teachers to accompany the tv lessons.

The grade 5 and 6 programs deal with "How Columbus Navigated," with safety, art education and an adventure story to encourage reading of Canadian books. Programs for grades 7 and 8 deal with a tour of historic Mackenzie House at Toronto, with development of iron ore deposits in Labrador, with methods of soil conservation and with current events.

Educ. Tv Progress Brochure

COLORFUL new brochure on the progress of educational television, issued by the National Citizens Committee for Educational Television, Ring Blvd., Washington 6, D. C., points out that $15 million worth of assets are on hand or committed to the non-commercial outlets. Of this amount, the brochure notes, $9 million has been pledged by national and local foundations, $2.5 million contributed by commercial broadcasters. The other $5 million has been raised through contributions from corporations and individuals.

MANUFACTURING

RCA Tube Division
Promotes Holleran

APPOINTMENT of Lee F. Holleran, sales manager, as general marketing manager of RCA's Tube Division, was announced Thursday by Douglas Y. Smith, vice president of the division.

Mr. Holleran, 20-year veteran of RCA sales and product activities, succeeds to the marketing post held by Mr. Smith prior to the latter's elevation as top executive of the division.

As general marketing manager, Mr. Holleran will have direct administrative responsibility for the planning, production, scheduling, promotion and sales of all RCA Tube Division product lines. These include color and black-and-white picture and camera tubes, cathode ray and power tubes, electronic components, test equipment, and radio batteries.

Faber to RCA Tube Post

APPOINTMENT of Peter J. Faber to the newly-created position of director of commercial administration-midwest, Tube Division of RCA, was announced last week by Lawrence S. Thees, general manager of the division. Mr. Faber, who will headquarters in Chicago, will be responsible for planning and promotion affecting sales in that area and maintenance of top-level contact with major RCA Tube Division customers in the Middle West and will assist in commercial and sales planning affecting the division. Before joining RCA, Mr. Faber was manager of the radio-tv and electronics division of Montgomery Ward & Co., Chicago.

RCA, GE Stay Request
Set for Argument Today

ORAL ARGUMENT will be held today (Monday) in U. S. Court of Appeals, Chicago, on the request by RCA and General Electric Co. for a stay in the $16 million anti-trust suit pending involving Zenith Radio Corp. and its subsidiary, Rauland Corp.

The three judges in the appellate court are expected to hear arguments on both sides over the RCA-GE plea for a writ of mandamus, which Zenith challenged two weeks ago. Zenith claimed such a writ would permit corporations of the size of RCA and GE to destroy completely an effective remedy available to the ordinary litigant in the federal courts.

Earlier, RCA and GE had challenged a ruling by Federal District Judge Michael Igoe that they should not be issued a stay. They held that Judge Igoe erred on several counts, including his contention that the Chicago trial should proceed without regard to the outcome of action on a similar suit in a Delaware district court.

Zenith is supporting Judge Igoe's decision in the $16 million suit charging RCA, GE and others with a monopoly in patents. The Zenith suit is in the form of a counterclaim to RCA's charge that the former infringed on certain patents.
Lawrence Granted Patent
On Chromatron Color Tube

PATENT No. 2,692,532 covering basic concepts of the Lawrence Chromatron color television tube was presented personally last Monday by Comr. Robert C. Watson of the Patent Office to Dr. Ernest O. Lawrence, inventor.

Several Chromatrons are on display at the Dept. of Commerce, Washington, with network tv programs shown to the public. One section of the display is devoted to an exploded layout of the new rectangular color tube, single-gun type. Dr. Lawrence developed the tube as a director and consultant to Chromatic Television Labs., Paramount subsidiary to which the patent is assigned. Chromatic will not make tubes but will license their manufacture.

Mr. Lawrence said color tv sets using the Chromatron can be produced at a lower price than sets using other types of color tubes. In granting the patent, covering fundamental concepts in the design of single and multiple-gun types "in which post deflection electron focusing and color switching or focusing alone is used," Comr. Watson said, "the patent which Chromatic is receiving covers an accomplishment of years of research culminating in this tube, which is no doubt of the greatest value to the people of this country."

DuMont Says Lower Prices Will Key Color Acceptance

WIDE public acceptance of color—still several years away—will come about once the price of color receivers drops below the $500 level, Dr. Allen B. DuMont, president of Allen B. DuMont Labs, said last week.

Dr. DuMont was guest speaker at the 13th annual luncheon held Wednesday at The Pulse Inc. at the Roosevelt Hotel, New York. He was presented a plaque by Sidney Roslow, president of The Pulse.

The current cost of the color cathode ray tube, which is about $175, must come down in price to the $20-100 level of the black-and-white tube before color can capture about 70% of the set market, Dr. DuMont said.

He also noted the importance of programming color. According to Dr. DuMont, only those network shows which are produced with color in mind are worthy of the addition of color—specifically he noted the "spectacular" type of variety program. Panel and dramatic shows which have been telecast in color would have done well without color, he said.

Looking to the future, Dr. DuMont added his predictions to those of RCA and GE leaders, that the set with the new look will consist of a large screen, a few inches deep, hung on the wall and controlled by a small-sized cabinet. Experimental work aimed at such a receiver is underway by manufacturers, he said.

In time, he said, uhf transmitters will close the gap which now exists between uhf and vhf signal transmission. Already, he said, the industry is watching with interest the 1,000 kw transmitters now available for uhf.

Dr. DuMont once again hit at FCC's tv allocations, criticizing intermixture of markets. He said FCC in accepting the theory that mixed markets would enhance uhf's development, proceeded along this path—"so they mixed and messed them up quite a bit." But, he said, the situation of too few stations in populated markets is now being rectified by FCC in granting high power to stations, which had been located in nearby locations.

Motorola Monochrome Sales Reach Record for Company

UNIT sales of monochrome tv receivers are the highest in the history of Motorola Inc., Chicago, and automobile sets are again in full production after a dropoff in the third quarter, it was announced last week by Paul Galvin, president of the firm.

At the same time, he revealed that the company is mapping a "vigorous merchandising" program for color television in the weeks ahead.

Motorola last Thursday announced the resignation of Rutherfaff & Ryan as its agency and said that appointment of a successor to R&R would not be disclosed for several weeks (see story page 31).

The company expects to complete introduction of its 19-inch receivers in about 85 markets at the retail level within a fortnight.

Motorola also reported an increase in net income during the third quarter over last year's period and a dropoff in earnings. Profits for the past three months (July-September) hit $1,731,766, or 90 cents per share, as compared to $1,536,158, or 79 cents a share for that period in 1953. Sales were off from $49,070,159 to $47,038,843. Earnings were $4,590,067 against $6,176,837 for that quarter last year.

Third quarter sales decreased from $158,603,127 to $139,564,053.

'Fortune' Folsom Feature

NOVEMBER ISSUE of Fortune magazine carries a story complete with pictures of the Folsom Center, nearly-completed $2 million structure which is located five miles east of Camden, N. J. Total floor space is 320,000 sq. ft., or about that in a 35-story office building, and will serve as headquarters for RCA Victor's Radio-Tv Divisions and for the RCA Service Co., the article states. The center consists of four separate buildings connected by bridges and is named after Frank Folsom, RCA president.

MANUFACTURING PEOPLE

Will James, plant operations director, CBS-Columbia, Long Island City, N. Y., appointed operations director; David Baer Monson appointed regional manager, national sales force, covering Louisiana, Mississippi, Tennessee and Arkansas.

Clifford M. Riggsbee, manager, commercial service, RCA Service Co., Gloucester, N. J., appointed administrator, consumer products analysis, product planning, RCA, Camden, N. J.; Conrad R. Odden succeeds Mr. Riggsbee.

Roger L. Thaxter, formerly with Muzak Corp., N. Y., to Magne-Tronics Inc., same city, as salesmarketing director.

Ruben E. Carlson appointed high fidelity products coordinator, Fairchild Recording Equipment Co., Whitestone, N. Y.

Norman Lorber appointed public relations director, Chromatic Television Labs, N. Y., succeeding Sol Sanders, who has moved to McGraw-Hill, same city.

Louis Silver, vice president, Wilcox-Gay Corp., N. Y., resigns to establish manufacturer's sales representative office in that city.

A DISC JOCKEY TRIES THE VIEW FROM BEHIND THE OWNER’S DESK

MAYBE radio people are natural grippers, or maybe they have a sincere desire to improve the industry, but you do hear a lot of complaints, always prefaced "boy, if I owned this station . . ." Not many of us ever get to own the station and do whatever it was we would do if we did, so I thought the boys might like to hear how one of the rank and file feels on the other side of the desk, and how he got there.

I first became eligible to start saying "boy, if I owned this station . . ." about eleven years ago. I had been a musician—first trumpet player with some pretty good name bands. When I got tired of one-nighters, I decided on radio as an interesting profession where a background of music might be useful. So I got my first job announcing at a small station. Several small stations later, I concluded that announcing wasn’t my forte—managers kept firing me! They said I didn’t "conform".

Not being sure what that meant, I came to Shreveport in 1947, and told the station manager I was a disc jockey, and the whole thing worked out all right. Actually, I just disc jockeyed the same way I had been announcing. You see, I was a single man at the time, with a habit of staying up late . . . probably a hangover from my musician days. I guess I did talk sort of slow and gravel-voiced, due to the hangover. Anyway, the boss soon gave me a good raise, and everybody was acclaiming me as a character . . . which seems to be an all right thing if you’re a disc jockey and not an announcer.

For the benefit of any announcers who are toying with the idea of becoming characters so they can become high-priced disc jockeys, I do want to say that the reputation, once acquired, is impossible to lose down. Since I’ve settled into the respectable habits of married life, I’ve become quite a “joiner” . . . frequently passing along some of my deepest and most serious thinking to the boys at the Elks or Optimists. But they just keep slapping their knees or each other’s backs and saying "Oh, that Monroe!"

You’re probably wondering what all this has to do with me building KJOE. It’s just that over the years I got pretty close to the people, and got to know what they liked. One thing they kept telling me they liked was the popular music I always played, and one thing they didn’t like was the excessive amount of hillbilly and race programs on all the stations in town. A lot of them even went so far as to say that after I came off the air in the morning, they couldn’t find anything to suit their musical taste until I came back on in the afternoon. I told the station manager what the people were saying, but he didn’t take any action on it program-wise. That’s when I started thinking about giving the people an all-popular music and news station.

It wasn’t too hard to sell 50% of the stock to people who believed in me and the idea. We got a good lawyer and formed Audicasting Inc. I’ll admit I got pretty itchy wading through the legal forms and red tape involved in building a station, but we finally got on the air August 1, complete to the call letters KJOE, which I requested for obvious reasons.

I guess the people really are pleased to have an all-popular music station . . . we’ve gotten over 700 pieces of mail saying they are. It’s been tough on our switchboard operator, who single-handedly took over a thousand calls the first week, but the doctor says she can leave the hospital as soon as she stops thinking she hears bells. All the sponsors are happy with the direct results they are getting. There are quite a few of them, too . . . enough to put us in the black for the first month of operation.

As for me, things don’t look too much different from the other side of the manager’s desk, where I sit when I’m not on the air. I’ve put a lot of my own production and policy theories into effect, and I believe they make for a smoother operation. Anyone who works at KAY-JOE and feels an urge to say “boy, if I owned this station . . .” knows he’s welcome to come in and tell the guy who owns it. We’ve put a lot of those ideas into effect, too, for a happier, more efficient organization. Regarding sales, I must admit that some of my friends at the Elks and Optimists have taken on a peculiar illusion . . . sometimes a strange halo forms over their heads spelling out “potential advertiser,” but I plan to have my eyes examined. Meanwhile, I just keep passing along some of my deepest and most serious thinking at the meetings, and they keep slapping their knees and saying “Oh, that Monroe” as they sign their contracts.
WHY U.S. STEEL USES TELEVISION
LAUREL-LADEN, THE 'U.S. STEEL HOUR' ENDS ITS FIRST YEAR

By Patricia Kielly

ON OCT. 27, 1953, the television curtain rose on the initial program of one of the most anxiously awaited and highly publicized regular dramatic series in tv history. An avalanche of news releases, spot announcements, posters and newspaper ads had proclaimed that on that Tuesday evening The United States Steel Hour, sponsored by United States Steel Corp., the world's largest steel manufacturer, and produced for the company by Theatre Guild, would launch its alternate-week series of hour-long drama shows on ABC-TV.

Last week, U. S. Steel completed its first year in tv. For the television industry, the year had meant increased revenue of some $2,300,000, the estimated sum spent annually on the Steel Hour. For U. S. Steel, it had been a year crowded with highly successful productions of every dramatic type which had won the Steel Hour a sizable audience, a healthy network rating, a number of top awards and enough favorable press clippings to feed a blast furnace.

U. S. Steel, as the biggest steel production firm in the world, had a sales volume of $3,860,000,000 last year. Its steelmaking plants, which dot the nation, poured out more than 35 million ingots of steel during 1953.

Since U. S. Steel's products don't turn up with any degree of frequency on the grocer's shelf or the housewife's shopping list, there rises natural speculation as to why it chooses to spend well over $2,000,000 a year in television, the medium par excellence for moving products out of markets, shops and stores into the consumer's home. Why does U. S. Steel use tv?

J. Carlisle MacDonald, assistant to U. S. Steel's chairman of the board, told B&T that the corporation uses tv drama to tell its story to a vast audience as a direct means of communicating information on its plans and activities and to remind viewers that "only steel does so many jobs so well." Tv keeps the corporation in touch with the public, and the public familiar with steel products.

Aside from the basic audience acceptance and popularity of dramatic shows, the company feels they are ideally suited for commercial messages at the end of each act—another important reason for selecting this type program in preference to any other. Almost without exception, U. S. Steel messages are geared to increase the public's understanding of the corporation's contributions to industry and the general welfare of the nation. There is no "hard sell" in commercial segments. The first is handled by George Hicks, who has been delivering institutional messages for U. S. Steel since 1945, first on radio and now on tv. A second commercial message, aired during the second and third act intermissions, is concerned with steel products and their use in the American home. Mary Kay and Johnny, a personable husband-and-wife team, appear in informal "at home" scenes to demonstrate the many everyday uses of steel.

U. S. Steel commercials, as well as the plays themselves, are ambitious and well handled. On one occasion a full-scale house, fabricated with U. S. Steel components, the largest product ever offered for sale on tv, was a feature of Mary Kay and Johnny's sales presentation.

Response to the house commercial increased U. S. Steel's mail count by over 50,000 letters, a clear indication that the corporation's between-act messages are watched and listened to. All such responses are handled by the Market Development Dept. at U. S. Steel offices in Pittsburgh, except in cases where products are manufactured by subsidiaries of U. S. Steel. Mail stimulated by the house commercial was sent to Gunnison Homes Division. In instances where detailed answers are demanded, extra personnel is hired or mail is forwarded to an outside mail answering service.

When letters request it, names of dealers who handle the advertised product in the letterwriter's area are identified.

U. S. Steel points out, however, that the emphasis in both the Mary Kay and Johnny and the Hicks commercials is not on direct sales but on building goodwill for manufacturers of products made with steel. One commercial used on the show last Tuesday, for example, was an explanatory message on a number of films made by the corporation.

"They are produced by U. S. Steel as a public service to tell the exciting story of steel making," said Mr. Hicks at the outset of the announcement. Picking up a film catalog folder, he continued: "This catalog, which we will be happy to send you, lists them all, but let's take a look at a few."

This opening was followed by concise to-the-point copy supplemented with camera cuts from one scene in the manufacture of steel to the other, lending visual impact to Mr. Hicks's script. After showing highlights of two U. S. Steel films, the camera again focused on Mr. Hicks, who said, "Other films tell of the construction of the United Nations Headquarters in New York... the building of America's newest and most modern steel plant, Fairless Works at Morrisville, Pa.... erecting the San Francisco-Oakland Bay Bridge.... These are just a few of the films listed in this catalog. They are available to you for the asking... just write to me, George Hicks, care of Film Distribution Center, U. S. Steel, Pittsburgh 30, Pa." The commercial ended with a dissolve to a title card bearing U. S. Steel's address.

For the general viewing public as well as for the professional onlooker who appraises tv with a critical eye, U. S. Steel's entrance into television was a welcome event and one that was long overdue. The semi-monthly series, under the theatre-wise guidance of Theatre Guild, was destined to add new entertainment value to the viewing schedule. Rosy predictions made for these teleplays were grounded in U. S. Steel's previous dramatic activity. The television debut was preceded by an eight year "run" in radio under the title, Theatre Guild on the Air. These weekly broadcasts, exploring radio as a dramatic tool and bringing audio drama techniques to near perfection, were "must" listening in countless homes.

Early in 1953, at the conclusion of the radio series, U. S. Steel began to consider moving to television. Top management, including Benjamin F. Fairless, chairman of the board, and Roger M. Blough, vice chairman, had watched closely tv's development.

A number of new program ideas for television were advocated, but since drama had served the corporation so well on radio, a decision was made to stay with the dramatic format. The Theatre Guild, an established and outstanding theatrical production organization for 35 years, was retained as producer, the same
function it performed on Theatre Guild on the Air. In the early planning stages, the name of the proposed series was changed to The United States Steel Hour as a means of more positive sponsor identification.

To maintain top-quality production, characteristic of U. S. Steel’s radio shows, the television schedule was decreased to two programs a month because of the heavy demands tv makes upon actors, directors, writers and production personnel. U. S. Steel selected ABC for its series when that network proposed to produce its own hour-long drama which would alternate with the Steel Hour, Tuesdays at 9:30 p.m. An additional attraction of ABC was the network’s ability to clear time that was not highly competitive on a desirable number of stations. Since U. S. Steel’s commercial time is devoted largely to institutional and public service messages, the company had no desire to split an audience by competing with a firmly established show on another network.

It was decided primarily for an available audience with which it too could become quickly established in markets of its own choice.

When network negotiations were completed and time was cleared for the new series, the next matter of major significance was the selection of a director. Alex Segal, who at a very early point in his directorial career had won a Peabody award for ABC’s experimental Actor’s Studio, was chosen the assignment and accepted it. Mr. MacDonald, who is in charge of all the corporation’s public relations activities, feels that the polish and success of the Steel Hour’s productions during the first season clearly illustrates that the selection of Mr. Segal as director of the series was a wise one.

Finding a play of particular distinction for the opening telecast was the next step toward getting the series underway. “What we needed,” Mr. MacDonald recalls, “was a theme of enormous scope. GIs returning from prisoner-of-war camps in Korea with their stories of enemy brutality and communist ‘brain-washing’ were receiving wide coverage in the daily press.” David Davidson, novelist and tv writer, was asked to submit a script that was a general theme. His teleplay was titled “P.O.W.” Among many scripts considered, it was the unanimous choice of U. S. Steel, BBDO, agency handling the account, and the Theatre Guild.

Critical coverage following the premiere was equally unanimous. Jack Gould of the New York Times called it “One of the season’s noble achievements. Superbly directed and beautifully played, it was topical theatre of both potency and power.” The New Yorker said, “One of the finest, most stirring, most honest, and most disturbing plays ever projected onto a television screen.” Top-notch dramatic fare,” reported the New York Daily News. “Powerful, outstanding, wonderful,” said the Chicago Daily News. C. E. Butterfield of Associated Press wrote, “Applause from all directions has been pouring in on the Theatre Guild and its sponsor for the outstanding dramatic presentation.”

It appeared that U. S. Steel on television, like television itself, was certainly here to stay.

When U. S. Steel made its tv debut, it brought along a $2,300,000 yearly television budget. This figure represents the estimated total production and station time costs for the series. Of this amount, approximately $1,050,000 is allocated for production expenses while $1,250,000 is for time costs covering 102 outlets.

Credit for the superiority of the Steel Hour’s dramatic production rests largely with Theatre Guild; Mr. Segal; S. Mark Smith, script editor; John Haggott, associate producer; Albert Heschong, set designer; Gene Coffin, costumer, and U. S. Steel’s Mr. MacDonald, who takes an active interest in the series and is top supervisor of the entire Steel Hour production.

Theatre Guild members Lawrence Langner, Theresa Helburn and Armina Marshall meet weekly with U. S. Steel personnel under Mr. MacDonald’s direction as well as with representatives from BBDO. At these meetings, scripts—for which U. S. Steel pays from $1,500 to $3,000 each—are proposed and discussed, casting suggestions are made and general policy matters relevant to the series are talked over. TV writers such as Arthur Arent, Irving Gaynor Neiman, Ira Levin and N. Richard Nash have had plays produced on the program.

Casting of each show is handled by Mr. Segal, the Theatre Guild and representatives from BBDO. Among the stars who have made appearances on the series are Howard Lindsay, Gerrit Reitberg, Julie Haydon, Diana Lynn, Gary Merrill, Walter Hampden, Teresa Wright, Thomas Mitchell and Dorothy Gish.

Rehearsals for each Steel Hour show extend from the Monday of the week preceding the telecast through Tuesday’s show date, a total of some 44 hours. The group meets for the first time in Mr. Segal’s office on Monday for a five-hour reading. Actors take Tuesday off to memorize lines. Wednesday through Sunday rehearsals run anywhere from four to six and a half hours a day. On the following Monday the cast moves into Studio TV-1 at ABC to start camera rehearsals. These sessions last through Tuesday till the show goes on the air at 9:30 p.m.

In addition to the director a minimum technical staff of 42 people operates behind the camera to get the Steel Hour on the air. This number includes 22 technicians who handle electronic equipment, eight stage hands, three pages, two make-up men, two costume dressers, three lampers and three assistants on the director’s staff.

Since the opening of the series a year ago, subsequent shows have varied in subject matter and treatment. In a range from light comedy to serious drama, shows which primarily reflect a segment of American life have been selected and produced. Among them have been Born for a Harvest, treating racial discrimination in a story of California wine growers; a lively comedy titled Man in Possession, which starred Rex Harrison and Lilli Palmer in their debuts as tv’s Mr. and Mrs. Gabler, in which Tallulah Bankhead made her tv bow as the heroine of the Henrik Ibsen classic, and a live tv “western” called The Last Noch which many critics called television’s answer to filmland’s epic movie cowboys.

Although Mr. MacDonald feels that awards do not necessarily indicate the real quality of any particular tv series, he points out that they are significant as indicators of public favor and goodwill.

The first year, Steel Hour was named top dramatic program of the year by a number of trade and general readsership publications; it won two "Emmys" from the Academy of Television Arts & Sciences as "best dramatic show" and "best new show" of the year, and was cited by Saturday Review and Town Hall Club for production excellence and outstanding commercials. A Christopher award and a medal from the Freedoms Foundation for "P.O.W." are two other honors received by the series in its first tv year.

With 102 tv outlets currently carrying the series, U. S. Steel reaches an estimated audience of 15 million viewers with each show it presents. It is the ability to reach this audience which really explains U. S. Steel’s two-fold interest in television. "A backlog of favorable public opinion is a valuable asset but we do not desire goodwill as an end in itself," Mr. MacDonald stressed. "Through our television programs we are also seeking greater acceptance of our products by customers and potential customers in addition to a favorable attitude toward our policies on the part of the public and its representatives. Progress toward these goals is being aided considerably by the use of the television medium.”

U. S. STEEL officials at rehearsal for a Steel Hour production: Clifford F. Hood (r) is president of the U. S. Steel Corp.; J. Carlisle MacDonald, assistant to the board chairman, supervises the show’s production for the corporation.

DIVERSIFICATION:
ITS CASE HISTORY

FCC DENIES DISCRIMINATION, BUT NEWSPAPERS STILL LOSE OUT

By Earl B. Abrams

THERE'S a churnin' and a burnin' in newspaper circles today.
Publishers have a large suspicion that the FCC is sharpshooting at newspapers that want to go into tv.
The facts seem to bear the suspicions out.
Since the tv freeze was lifted in 1952, there have been seven, after-hearing, final decisions involving newspaper-owned or affiliated applicants. Only one of these was in favor of a newspaper.
In the other six such decisions, the fact of newspaper ownership was counted as a strike against the applicant. It served to throw the weight of preference toward the non-newspaper applicant.
The theme of the Commission's attitude toward newspaper applicants—and the same thing applies to multiple broadcast station owners—is diversification. This is the long-established FCC policy that newspaper ownership, or other station ownership, counts against an applicant in a comparative hearing. Only a superior showing in several of the criteria on which the Commission bases its judgment as to who shall receive a grant has prevailed against the onus of newspaper or multiple station holdings.
These other tests involve such things as local ownership, integration of ownership and management, program proposals, staffing, equipment, etc.
Applicants for tv stations who had newspaper connections lost out after hearings in Fort Wayne, Ind.; Portland, Ore., Tampa-St. Petersburg, Fla.; Sacramento, Calif., and Beaumont-Port Arthur, Tex.
There were two tv hearings for Ft. Wayne and for Tampa-St. Petersburg.
Only in the first Tampa-St. Petersburg, Fla., hearing was the newspaper involved successful.
Multiple broadcast ownership played a part in decisions in Flint, Mich.; Portland, Ore., and Denver, Colo. Only in Denver did the broadcaster win out over a newcomer.
Before this bleak recital starts anyone muttering about discrimination, damned socialists, and other epithets directed to government bureaucracy, it should be pointed out that the FCC has no rule—repeat, none—barring grants to newspapers or multiple station owners.
In fact, of the more than 500 tv stations authorized as of the beginning of 1954, 23.2% were affiliated in one way or another with newspapers. This is 129 to be specific.
The snapper, of course, is that most of these received their grants without opposition. It is rare indeed for the Commission to turn down an unopposed applicant, unless it can be shown that he is disqualified on one of the basic requirements—legal, financial or technical. The toughest test is the FCC's attitude toward newspaper and plural station ownership was given in 1944 when the Commission issued its report following the abortive newspaper investigation begun in 1941.
In that later year, the FCC under the chairmanship of James Lawrence Fly, proposed to bar newspapers entirely from radio station ownership.
During the three-year-long investigation, the full fury of newspapers was directed at the FCC. Newspaper groups are still touchy where broadcasting aspirations are concerned. Only 39 decisions involving applicants, general manager of the American Newspaper Publishers Assn., directed an inquiry to the Broadcast Bureau of the FCC, asking whether it was true, as he had been informed, that the Bureau held newspapers should not be accredited as broadcasters. The Broadcast Bureau replied that it was only carrying out FCC policy that newspaper ownership was a factor in comparative hearings and that there was no bar to the ownership of a broadcast station by a newspaper.
The 1944 announcement by the FCC, in essence, held that although there would be no prohibition against newspapers owning radio stations, the principle of diversification would be followed wherever possible.
From that time on, this principle has been used by the FCC whenever it had two or more applicants applying for the same facility. In television it was used immediately following the end of World War II and the resumption of commercial telecasting.

THE TEXT of the FCC's 1944 notice on diversification reads as follows:

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

PUBLIC NOTICE
JANUARY 12, 1944

The Commission, in the exercise of its power to receive applications for the grant of licenses to own and control tv stations, and to grant such licenses, is informed that the Premo-Pickens Newspapers, Inc., of Portland, Ore., have filed an application for the grant of a license to own and operate a television station in the city of Portland, Ore.

The Commission, however, has concluded, in the light of the evidence presented to it, that the applicant does not meet the requirements of the law and Commission regulations as to the ownership of a tv station.

It is the judgment of the Commission, therefore, that Premo-Pickens Newspapers, Inc., is disqualified as an applicant for a license to own and operate a tv station in the city of Portland, Ore.

In the very first tv hearing case, that for the four channels allocated to Washington, D. C., the Commission used the diversification issue in two ways: In the one case, it granted a channel to the Washington Evening Star (WMAL) because the Washington newspaper company was a newspaper company. In the other case, the FCC granted Bamberg Broadcasting Co. (WOR New York) another channel because it did not then have a tv station whereas another competing already licensed tv out.

From then until recently there were virtually no instances where the question of diversification in a tv case was a problem. Indeed for almost four years, from 1948 to 1952, tv application processing was at a standstill while the Commission struggled with uhf, color tv, and station separation. This was the famous tv "freeze." Competitive hearings for tv outlets began in the latter part of 1952, and the first final decision following a hearing was not issued until early in 1953. This was in the Denver ch. 7 case.

However, there was one pronouncement during that video ice age which, indirectly, involved a tv station. This was in the WMAL, Baltimore renewal fracas, which is considered to be the happy ending to the ominous Blue Book accusations issued by the FCC in 1946.

The Hearst-owned WMAL's license was set for renewal hearing, following the application for the same facilities by Public Service Radio Corp. (Drew Pearson and others).

That case involved not only newspaper ownership, but also multiple ownership, for the Hearst organization also owned WINS Mill.
What can you do with $296?

For $296, you have dozens of choices. You could buy a new set of tires for your Hispano-Benz. Or take a modest flyer in some Uranium stock. Or even send your better half on a shopping spree!

But if you're interested in a real radio buy, just remember this:

ON WOAY, $296 will buy 13 quarter hours!

WOAY, Oak Hill, is West Virginia's second most powerful station.

WOAY covers 21 West Virginia counties.

WOAY delivers a total Nielsen audience of 102,200 radio homes — an average daily Nielsen audience of 51,320 radio homes!

Write direct for full details.

OAK HILL, WEST VIRGINIA

Robert R. Thomas, Jr., Manager
10,000 Watts AM—20,000 Watts FM
ONCE AROUND THE PARK

THIS ONE always wears 'em at bar association dinners.

Seems a gal asked a large, plush, Wall Street law firm to represent her in a breach of contract suit against one of the oldest families. She claimed she was violated one festive night in a hansom cab while being driven through Central Park, with her, at that time, beau.

The senior member of the law firm in question, after checking the law library for cases which might be used in this suit. Weeks later the law clerk reported chagrined back to his chief. There had never been any case in the history of American jurisprudence which involved rape in a hack. But although this article on the FCC's principle of diversification looks like a legal brief with its extensive quotations from FCC decisions, the writer does not use the writer's format. This is that each quotation, albeit seemingly similar to others, is based on a separate set of facts and contains nuances that are not true in the other case. Like the legal profession's "Rape in a Hack" story, there are no cases exactly alike.

In order, therefore, to give the flavor of this decision, it was thought best to reprint the Commission's favorable be-decision repeats something already set down, it has been paraphrased.

waukean and through a related company, WCAE Pittsburgh. Although not directly at stake, WBAL-TV's license was also in jeopardy if Hearst was found disqualified to own a radio station.

The license of WBAL was renewed. In the final decision, the Commission discussed the diversity principle in these words:

"The first criterion, given to the principle of desirability of diversification of control of media of mass communication, is the function of involving licenses of existing facilities, vary with the facts in each individual case. We believe that the public interest is furthered by the following element where a person has been licensed by the Commission and operates these stations in the public interest; whether the public interest will be served by the license, not in the public interest. In the instant case our rules governing multiple ownership are not being violated and we do not believe the last made point has been established by the record. The stations owned and controlled free broadcast stations in seven separate communities (WISN Milwaukee, WTTV Indianapolis, WSPA Cleveland, WITN Greenville, WLW Cincinnati, WMUR Manchester, WMBF Myrtle Beach). Each of these communities has a several stations. This would arise from concentration of control in a single community, this situation is not present. The record does not show that the common control of WBAL and the Baltimore newspaper has been employed adversely to the interests of the community, and an inference can reasonably be drawn that these conditions which have previously obtained will continue.

But, the then FCC Chairman Wayne Coy had other ideas. To him the diversity dogma was practically over-riding. This is what he said:

The Commission is committed to the principle that, under proper over-riding considerations, preference should be given to a non-newspaper, non-broadcaster applicant which publishes a newspaper or has other broadcast interests which will result in greater diversification of control of the media of mass communication, unless concentration of ownership with the public interest is not present. It is the belief of the public interest is not present.

In the other six cases the Commission turned thumbs down on newspapers. In the Fort Wayne ch. 33 case, the Commission picked WKJG Fort Wayne and turned down the News-Sentinel's WGL. It particularly did not like the forced combination rate for WHBI and the Tribune, which the Commission and the Journal Gazette practiced as part of their joint mechanical, advertising and business departments. This was also the case in the Tribune.

The very same combination practices, involving the same newspapers, impelled the Commission in the Fort Wayne ch. 69 case. Here the FCC picked WANE Fort Wayne (identified in ownership with WISH-AM-TV Indianapolis and WYLI Lima) and Anthony Wayne Broadcasting Co., whose principals are Paul V. McNutt and James R. Fleming. Messrs. McNutt and Fleming are major stockholders in the Journal Gazette. In this the Commission reversed the Examiner.

In Fort Wayne ch. 69

This matter of forced combination rates has tended to become more and more important to newspapers in recent years. This is what the FCC said in the Fort Wayne ch. 69 case:

By forming a combination which has resulted in a reduction of the rate for one or more of the rates of the newspapers upon advertisers in their newspapers, Newspapers Publishers Bureau (NPB) and its members have, with their dominant positions as publishers of Fort Wayne's only major newspapers in a manner inconsistent with the public interest in their area. We are of the view, moreover, that these advertising rates and other rates and practices, the qualifications of Anthony Wayne to be a license applicant for a non-printing station owned by Messrs. McNutt and Fleming cannot dictate the advertising rates and other rates and practices which the Commission is able to control the Journal Gazette Co., however, they are now in fact being controlled by the Commission with respect to these advertising practices. Because of the Commission's inability to take any steps to bring about the abandonment of these practices, the Commission concludes that it is powerless to take any steps to bring about the abandonment of these practices, the Commission concludes that it is powerless to take any steps with respect to these advertising practices. Because of the Commission's inability to take any steps to bring about the abandonment of these practices, the Commission concludes that it is powerless to take any steps with respect to these advertising practices.
Electric Companies to Make Power from the Atom

The picture above shows Richard and Gerry Noble, a pioneer family in the atomic power age.

For Mr. Noble, an engineer, is working on the first power plant that will use the heat of nuclear energy to produce electricity for homes, farms and factories. His wife may be among the first to use electricity produced this way.

Mr. Noble is employed by one of the electric light and power companies now studying the future promise of nuclear electric power. Co-operating with the Atomic Energy Commission in this research, they are hunting ways to make electricity from nuclear energy both practical and economical, so that its benefits will be available to customers.

The nation's electric companies have much to contribute to the development of nuclear energy's usefulness.

These companies have had nearly 75 years' experience in turning the energy of other fuels into electric power efficiently and economically. And they have brought low-price electricity—and plenty of it—to every corner of the United States.

AMERICA'S ELECTRIC LIGHT AND POWER COMPANIES*

*Names on request from this magazine

Richard Noble and his wife inspect a small model, about 1/30 actual size, of the nuclear power plant he is helping to design. This plant, except for its heat-producing unit (foreground), will look much like any other power plant. It is to serve as a "laboratory" from which much will be learned about using the atom as a fuel to help fill future needs for more and more electricity.
attendant upon preferring an applicant involved in practices which, if carried over into the broadcast field, would raise serious public interest questions.

In the Portland, Ore., ch. 12 case, the Commission picked Oregon Television Inc., composed of local businessmen, and turned down KPOJ—Portland Oregon Journal, Wesley I. Dunn (owner of KSFO and then owner of KPIX [TV] San Francisco) and Northwest Television and Broadcasting Co., one third owned by John J. Keating (who's interests include 50% in KYA San Francisco, 25% in KONA [TV] Honolulu and 25% in WINS New York).

Following the lead of the examiner, the Commission held that diversification was one of the issues and that the newspaper ownership in the KPOJ bid was disqualifying. In addition the other broadcast ownerships involved in the KPOJ and Northwest were also disqualifying, the FCC held. In this case, Comr. Robert T. Bartley dissented, favoring the KPOJ application.

The Beaumont-Port Arthur ch. 6 case was tricky. KRJ-Beaumont Enterprise and Journal was in opposition to KFDM Beaumont, whose major stockholder, D. A. Cannan, also had an interest in KFDX-AM-FM Wichita Falls, Tex., and to KTRM Beeville, which had made an arrangement for selling one third interest to the Houston Post (KPKC-FM-TV). The examiner favored KTRM, but the Commission forsook its connection with the Houston Post and KPOJ-AM-FM on which it covered part of the Beaumont area and granted the channel to KFDM. Comrs. Rosel H. Hyde, John C. Doerfer and Robert E. Lee dissented on that score.

Here is what the FCC said about the Beaumont-Port Arthur diversification issue:

With respect to the factor of diversification and concentration of media for mass communication, the examiner awarded no preference. We are of the view, however, that Beaumont Broadcasting (KFDM) merits a clear superiority in this respect, and also, other significant difference among the applicants, than that of the Houston Post and KPOJ-AM-FM. The FCC recognized that diversification was one of the factors of the Commission's decision in the case. We find the opinions of the Commission in this case make no change with respect to this principle in its consideration in 1952 of appropriate amendment to the Communications Act; rather, it indicated its agreement with the "prevailing law". Beause the FCC is in agreement that a permit should not be denied, it is not determined whether it is otherwise engaged in the dissemination of news; the difference is a matter of emphasis only one criterion to be considered in the comparative process. As shown above, the differences may be even more by offset other criteria. See e.g., Aladdin Broadcasting Co. Inc., 9 RH 1; The Tribune Company, FCC 54-1027.

Perhaps the most direct and detailed explanation of the FCC's attitude toward ownership was given earlier this month in the Sacramento Post. The examiner in the Sacramento case favored the grant of the Sacramento ch. 10 to the McClatchy Broadcasting Co. and proposed to deny Sacramento Telecasting Inc. McClatchy owns KMOD Modesto, KK McClatchy's viewing area, including media other than broadcast facilities. Thus, although the case on the air, and the Commission said in its decision: the Commission, in the Interest of competition and consistent diversification, as has been a part of the philosophy of the Commission, made no change with respect to this principle in its consideration in 1952 of appropriate amendment to the Communications Act. Rather, it indicated its agreement with the "prevailing law." Because the FCC is in agreement that a permit should not be denied, it is not determined whether it is otherwise engaged in the dissemination of news; the difference is a matter of emphasis only one criterion to be considered in the comparative process. As shown above, the differences may be even more by offset other criteria. See e.g., Aladdin Broadcasting Co. Inc., 9 RH 1; The Tribune Company, FCC 54-1027.

McClatchy Evaluated

In evaluating the factors in this case, we find that McClatchy is the holder of a construction permit for KMOD Modesto, California; operates the only 50 kw am station in the Sacramento television market and owns two daily newspapers in Sacramento; publishes nine dailies, four weekly dailies, 10 Sunday newspapers and four weeklies in the Sacramento and 15 in the Modesto area.

In the case of McClatchy, the applicant involved in practices which, if carried over into the broadcast field, would raise serious public interest questions.

In the case of McClatchy, the applicant involved in practices which, if carried over into the broadcast field, would raise serious public interest questions.
cause it is otherwise engaged in the dissemination of mass communication in a manner which the Cleveland Company would necessarily compete in the collection of news. In Associated Press v. United States, 356 U. S. 1, 20 (1953), the Commission held that the application of the Sherman Act to the Associated Press might interfere with the freedom of the press. In this connection, the Court said that the Amendment rests on the proposition that reasonable and possibly disseminative publication of information from diverse and antagonistic sources is a national policy of public welfare. While it is not in a different context, this thought is the key to the present question. It seems to the writer that the realization that new media communication is subject to public selection and, through the exercise of judgment, and the other is not, the Commission, in the interest of competition and consequent diversity, which might have been commanded by the fact that WBLK is a newcomer, would not be considered as a factor in the application of the Commission's non-discrimination principles. In the Cleveland case, we have seen the assistance of the superior and the free press protected in the realization that the public interest is well within the law when, in choosing between two applicants, it attaches significance to the fact that one, in contrast with the other, is dissociated from the existing media of mass communication. The fact that an applicant is free of association with existing media of communication, and the other is not, the Commission's non-discrimination principles, if such a finding was made on one applicant, it said, also must be made on the other applicant.

In the question of other broadcast interests, the pattern has not been set solidly in tv as yet. In the Denver ch. 7 case, KLZ was given the grant over newcomer Denver Television Co. In the Flint, Mich., ch. 12 decision, the multiple owner (Harry M. Bliner interests) lost out to WJR Detroit. And, in the Portland, Ore., ch. 12 case, the multiple owners were found substandard on the diversification issue. These were KPOI-Oregon Journal-Welsh I. Dunn, and Northwest Television and Broadcasting Co. (John D. Keating).

This propensity of the Commission to use the diversification issue as a strike against a newspaper owner—more times than not—not has escaped the attention of Congress. In the original McFarland Bill, a prohibition against discrimination was included.

This provision, however, was deleted in conference as unnecessary since the Commission had no regulation barring newspapers from broadcast station applications.

The conference's statement on this issue read as follows:

It is the view of the conference committee that under the present law the Commission is not authorized to make or promulgate any rule or regulation the effect of which would be to discriminate against any person because such person has an interest in, or association with, a newspaper or other medium of gathering and disseminating information. Also the Commission could not arbitrarily deny any application solely because of any such interest or association.

Back in 1944, when the Fly-led FCC crusade against newspaper ownership was in full swing, a bill had been introduced to forbid the Commission from taking any action which would dis

**I got power!**

But down in Northwest Alabama and Northeast Mississippi WERH dominates 14,095 square miles within its 0.1 MV/M contour.

Yes, speaking of power, WERH has the most powerful signal in these parts. Folks are eager listeners to its entertainment loaded programs. So you'll capture all of Northwest Alabama and Northeast Mississippi with the most powerful broadcast station, WERH.

**WERH: putting out a signal that pulls in the sales.**

November 1, 1954  Page 91
SNOWY BLEACH PROMOTION

SINGER Jo Stafford is to be the center of a promotional campaign beginning Nov. 9 over 85 CBS-TV stations for Gold Seal’s “Snowy” bleach. Miss Stafford has made special recordings of “St. Louis Blues” and “I Only Have Eyes for You” which will not be sold in record shops, but which will be available for 25 cents plus a Snowy bleach boxtop. The record and the bleach tie-in will be promoted for a month on Miss Stafford’s nationally televised show originating in Hollywood. Special Snowy packages displaying the record offer on three panels also have been designed to augment the campaign.

KSRO RIOT COVERAGE

KSRO Sioux Falls, S. D., provided quick coverage of a recent riot which broke out at the South Dakota State Penitentiary. Fifteen minutes after the outbreak, KSRO’s mobile transmitter was feeding bulletins from the scene. Regular programs were interrupted during a 24-hour period to bring listeners the news as it occurred. In addition, Ray Lofthouse, KSRO program director, was given permission to tape-record interviews with non-riotifying prisoners who wished to make their grievances known.

KSD-TV NEWSPAPER ADS

KSD-TV St. Louis has placed 50,000 lines of advertising in the St. Louis Post-Dispatch to run in a three and a half month period, promoting all programs carried by the station and the NBC spectaculars in particular. Ads range in size from 100 lines to a series of seven full page ads, three of them in color. Although KSD-TV and the newspaper are owned by the Pulitzer Publishing Co., the station is paying the regular advertising rate.

PRESS TRUCKS PLUG WDTV (TV)

WDTV (TV) Pittsburgh recently made use of some previously unavailable advertising space to call attention in the nation’s newspapers to TV programs. The makeshift—the sides of Pittsburgh Press delivery trucks—never had been used before for anything else but Press promotion.

SHEEN PROGRAM RETURNS NOV. 2

DUMONT TV Network will resume Bishop Fulton J. Sheen’s Life Is Worth Living Nov. 2 on a predominantly live hookup of over 110 stations, it was announced last Tuesday by Admiral Corp., sponsor of the 26-week series for the third consecutive season. The contract represents an expenditure of between $1.25 million and $1.5 million for time and facilities. Edmond J. Eger, Admiral vice president for advertising, said teletranscriptions will be used on the West Coast and in certain non-network cities. Because of the three-hour time difference, live coverage would be “impractical” for the West Coast, it was explained.

HALL SHIFTS AT WITH

SHIFT in programming spot has been completed at WITH Baltimore for Russ Hall, personality of that station. Mr. Hall, who since 1935 has been in radio, tv and screen work, has been director of the station’s All Nite Show. His new program, Musical Show Case, is heard from 6:45-9 p.m. and is the only feature length show on the air in Baltimore during those hours, WITH reports. Succeeding Mr. Hall on the All Nite Show is Dick Coleman, disc m.c. who formerly had the same spot and who has been on a leave of absence to complete his college studies.

RELIGIOUS PROMOTION

EXTENSIVE radio and television promotion is planned by the Advertising Council for its sixth annual campaign, slated this month, to increase attendance at churches and synagogues. Specially prepared kits are being sent by the Council to 385 tv stations, the four tv networks and 285 local radio stations, with some 200 network commercial radio shows set to promote the "Religion in American Life" drive.

WJOB FLOOD COVERAGE

WJOB-AM-FM Hammond, Ind., stayed on the air continuously from 7 a.m. Sunday until 12:01 a.m. Tuesday during the recent midwestern floods to bring up-to-the-minute information to the stricken populace. Realizing its programming, the station instituted "Weather Watch," utilizing its entire staff to cover the floods. Live pickups and tape-recordings were originated from 50 locations including a direct broadcast from an airplane surveying the scene. Numerous studio interviews with victims also were aired.

‘ELLERY QUEEN’ PROMOTION

TELEVISION PROGRAMS of America, N. Y., is promoting its Ellery Queen film series by means of Ellery Queen mystery novel sound book packages. Sealy Mattress Co., which sponsors the show in Baltimore and Washington, and the Lee Optical Co., advertiser in Dallas, have purchased 11,000 copies of the books for distribution to customers using Sealy’s 200 retail outlets and Lee’s three stores. Customers may select one of 20 different “Queen” books, which contain a letter inviting the recipient to view the series and giving appropriate information as to time, day and station.

NBC-TV SLATES BASKETBALL

NBC-TV is presenting an 18-game series of professional matches of the National Basketball Assn., starting last Saturday, it has been announced by Thomas S. Gallery, sports director of NBC, and Maurice Podoloff, president of NBA. The telecasts will be carried weekly through Nov. 27, immediately following NBC-TV’s coverage of Canadian professional football games.

For local and national programs the Atlanta audience depends on WSB-TV, the great area station of the Southeast

EVIDENCE:

According to Pulse, Inc., in the month of September the top 5 programs of all surveyed were on WSB-TV. These programs were Dragnet, Fireside Theatre, Circle Theatre, Truth or Consequences, I Married Joan. According to American Research Bureau, WSB-TV carried 4 of the top 5.

In the same month on the night when all three Atlanta stations were programming election returns of the Georgia Democratic Primary, WSB-TV had an average audience 40% greater than station B and 80% greater than station C according to Pulse, Inc.
TELESTATUS

Television Stations on the Air With Market Set Count
And Reports of Grantees' Target Dates

Editor's note: This directory is weekly list report of (1) stations that are operating as commercial
and educational outlets and (2) grantees. Triangles (△) indicates stations now on air with
regular programming. Each triangle (△) is listed in the city where it is licensed. Stations, vhf or uhf, report
their set estimates of their coverage areas. Where estimates differ among stations in same
area, triangles (△) are placed for each set estimate. Further queries about them should be directed
to their respective stations.

TOTAL U.S. set in use is unduplicated B-T estimates.

Stations not preceded by triangles (△) are grantees, not yet operating.

Nov. 28: (4-6 p.m.): Hall of Fame, “Macbeth,” Hallmark cards through Foot, Cone & Belding.

[Note: This schedule will be corrected to press time of each issue of BR-TV]
The Great Game of...

IT IS unfortunate that the historic appearance of the President’s Cabinet on television was marred by an air of artificiality.

To begin with, the performance should never have been described in advance as a Cabinet meeting. It was simply a report by the Secretary of State—a clear, earnest and impressive report, which needed no phony trappings to enhance it. The presence of the other Cabinet members added nothing to the occasion and indeed detracted from it.

The lesson here is that when a government has an important message to deliver to its people, there is no need to hoke it up. If Mr. Dulles has a message as significant as the one he brought home from Europe, he can deliver it more effectively by talking directly to the people via television than by pretending to let the people eavesdrop while he talks to his Cabinet colleagues. Such a pretense cannot help but make the presentation less convincing.

...Tv Politics

THOUGH it certainly did not damage the Republican cause and may even have been arranged with the thought of political advantage in mind, the Cabinet telecast was not, in the true sense of the phrase, a political broadcast. The international agreements which Mr. Dulles explained were the accomplishments of an administration which happens to be Republican and which happens to have as much Democratic as Republican support for its European policy.

Hence, the Democrats’ appeal for equal time was wholly unjustified. It was, however, in character with the general jockeying for free time that the Communications Act and FCC interpretations of it encourage.

The answer of Frank Stanton to the Democrats’ demands was eminently sound: “Our established policy has been not to provide time to reply to the President of the United States or members of his cabinet appearing and speaking as such, or reporting to the people on their official activities over our facilities. . . . We have applied [this policy] alike to Republican and Democratic administrations.”

The night after Dr. Stanton issued that statement, a Democratic candidate for Congress from New Jersey, was granted an appearance on Strike It Rich on CBS-TV because his Republican opponent had appeared on the show earlier.

Aspirin, anybody?

Sanity in Selling

EVERY now and then a daring department store, defying the cherished but antiquated axioms of the retailing craft, takes a plunge into radio.

Sometimes the radio money is spent unwisely. When it is spent well, the results are good—as in the case of The Aug. W. Smith Co., of Spartanburg, S. C. [8ST, Oct. 18].

The Spartanburg radio story opens a line of retail thinking that no department store can ignore, no matter how much its staff loves the printed sketch of a gown or the thump of a studhorse headline. Goaded by high-handed newspaper pressure, the store simply diverted the bulk of its budget to radio. It bought time—carefully selected time—on all stations in the city and sat back to observe results. The results: A series of radio success stories.

Being realists, operators of the store expect to restore newspapers to a prominent place in their media planning. When that happens, newspapers will be budgeted on an equality with radio. The old 70-30 newspaper-radio ratio has been cast aside.

The Aug. W. Smith Co. likes all media. Three months of radio-dominated advertising, tied into other promotion, taught this enterprising store that radio can do the basic department store advertising job.

What happened in Spartanburg should be studied by every thoughtful retailer—and every broadcaster, too. In the heat of competition, newspapers have belittled radio in the selling, and vice versa. Advertising history has proved that there is room for all major media. Retailers have been slow to adopt radio, mainly because they have been newspaper-minded for generations and because broadcasters haven’t done an effective sales job.

Both should heed the suggestion of Tom McGee, president and treasurer of The Aug. W. Smith Co.: “Stores that use radio for a month or two don’t give it a fair test. Retailers should decide to spend a certain amount of money for a year and then go ahead and do it.”

Down Mexico Way

NOW THAT the “radio is here to stay” stalwarts have established a firm beach-head in this high-flying television era, it behooves them to turn their attentions to an almost forgotten problem—radio allocations on the North American continent.

Since 1950, when all North American nations except Mexico agreed to an allocation of the standard broadcast band (NARBA), little more than cursory attention has been given to assignments. Without an understanding, the broadcast band could be shot through with interference. There are now serious interference problems in some areas of this country.

This week, official delegations of the United States and Mexico meet in Mexico City to negotiate a bilateral agreement which would bring Mexico within the scope of NARBA. There is no assurance that an agreement can be reached, but our delegation is encouraged because Mexico took the initiative.

Mexico, it is indicated, wants more lower channels, higher power and prior rights to 540 kc, the most recent addition to the standard broadcast band. Four years ago Mexico walked out of the NARBA conference, nullifying the hope of an all-embracing agreement.

The United States has an able delegation, headed by FCC Comr. Rosel H. Hyde, who was chairman of the 1950 sessions. Engineering and legal observers representing the various domestic broadcasting interests will be present. The delegation will be prepared to act if Mexico’s proposals are reasonable and equitable. They were not in 1950.

Because radio is the only all-inclusive medium of communications, it becomes more essential than ever in this atomic age that service be maintained and, where possible, improved in the remote areas of the United States. The U. S. delegation will not be disposed to deal on any proposals that would further degrade this service or barter away our rights.

International conferences are a matter of give-and-take. But compromises must be sound. An agreement should take into account national needs, good engineering standards mutually applicable and rigidly enforced, protection of national service, and those difficult but essential ingredients of equity and fairness. The climate and the timing seem to be right for an accord.
This is the form that starts wheels rolling in Big Aggie Land. In this case the "wheels" are attached to corn cribs. But it could be for practically anything that rolls, flies, walks, stands, moves, eats or is eaten, or helps farmers or town-folk.

WNAX-570 has been putting its voice to the wheel for 32 years in Big Aggie Land—Minnesota, the Dakotas, Nebraska and Iowa. Wheels within wheels start turning with a WNAX Start Order. Distributors perk up their salesmen. Retailers get calls; displays get displayed. Consumers consume.

To be a big wheel in this market, see the Katz Agency.
The _BIG TOP_ is UP in Kansas City!...  

**KMBC-TV TALL TOWER WILL SOON BE IN OPERATION**  

**EQUIPPED FOR RCA COLOR TRANSMISSION**

KMBC-TV will out-tower, out-power, and out-perform every television facility in the Kansas City market. With a 1,079-foot tower—1,079 feet above average terrain and 1,946 feet above sea level—and with 316,000 watts maximum power, Channel 9 is the undisputed BIG TOP TV Station in the Heart of America. The predicted 0.1 mv/m coverage map below, prepared by consulting engineer A. Earl Cullum, Jr., shows how KMBC-TV dominates the Kansas City market—a market offering close to one-half million TV homes!

**BIG gest power**  

**TOP most tower**

With its tall tower and full power, KMBC-TV brings an entirely new value to television advertising in the Heart of America. No other Kansas City station gives you the unbeatable advantage of mass coverage plus the audience-holding programming of CBS-TV... the nation's leading network... combined with KMBC-TV's own great local shows.

**Get on the CHANNEL 9 Bandwagon NOW!**

Contact KMBC-TV or your Free & Peters Colonel for choice availabilities.

ONE OF AMERICA'S GREATEST BROADCASTING INSTITUTIONS—Here Channel 9 (and Radio Stations KMBC-KFRM) originate some of the most ambitious local programming seen and heard in the Heart of America. TV facilities include 15-set TV studios, a 2600-seat theater, both RCA and Dumont studio camera chains, RCA film cameras, telops, telejectors, film projectors, rear-vision slide projector, spacious client viewing room and two complete sets of remote equipment. Color telecasts can be handled from the new RCA 316,000-watt transmitter.
