CBS
Radio-Dallas
delivers

More Listeners
More Coverage
than any other full-time station
in the entire state of Texas... 

KRLD is the Only Full-Time 50,000 Watt Station in Dallas-Ft. Worth Area

KRLD does not share time and frequency with any other station. One station—one order means greater frequency discounts—full, accurate coverage at minimum cost. KRLD is centrally located in Texas' richest and most progressive area. Few natural barriers impede its full-time 50,000 Watt signal, giving you adequate coverage of the West and Southwest at a lower cost per 1,000 listeners. For the best buy, better buy KRLD. Check with a Branham man.

KRLD Radio CBS

**$100 Million Up** • Tight race is developing for win, place and show in annual agency radio-tv billings race as contest approaches year end. Top contenders at this point—in alphabetical order—are Ted Bates & Co. BBDO, Benton & Bowles, McCann-Erickson, J. Walter Thompson and Young & Rubicam. Forecast: winner will be at or over $100 million mark in broadcast billings for year, compared to $82 million for 1956 front runner (Y&R).

Harold E. Fellows, NARTB president, has been told by doctors to slow down. 

Strain of frequent travel plus heavy administrative load reportedly has Mr. Fellows on verge of exhaustion. While no reorganization in NARTB tap echelon is indicated, it's reported Mr. Fellows will delegate more routine duties to key aides.

**Facilities Shortage** • Unless AT&T comes up with facilities it now claims it can't produce, NBC-TV's ambitious plan to lick daylight saving time problem may not work for all affiliates. Network needs one more circuit than AT&T says it can supply to feed videorecorded repeats to stations in Eastern Standard Time zone. This area includes Detroit, Cincinnati, Huntington-Charleston, Indianapolis and other market areas in Michigan and Ohio.

Committee of affiliates in Eastern Standard Time zone is now trying to persuade AT&T of importance of providing appropriate facilities for NBC-TV repeats. EST stations are pointing out that there are more than 3 million TV homes that would be affected if EST stations can't take advantage of NBC-TV tape scheduling to keep programs on schedule at accustomed local times during summer.

**Wha'd He Say?** • WCCO-AM Minneapolis has developed audio version of subliminal perception. Station is experimenting with what it calls "phantom spots"—short phrases of no more than five syllables each—which are dropped into music and even into pauses in dialogue. In few days of use, new technique reportedly shows promise as aided recall device.

Boys at FCC have been viewing Lili St. Cyr movie—but no stop party implications are to be inferred. Commission received couple of letters protesting (but not vigorously) exotic's remarks about marriage in Oct. 5 Mike Wallace interview (she didn't think ceremony was important if you loved the guy), so Commission got kine of show, viewed it, decided it wasn't censorable—although individual commissioners expressed disinterest for Miss St. Cyr's casual views on love and marriage.

**Going North?** • Key ABC executives, including Frank Marx, vice president in charge of engineering, are studying possibility of moving west coast network operations from Los Angeles to San Francisco. It's believed there might be more savings in communications charges and other advantages to be gained in moving headquarters to financial capital of West Coast. Program originations would continue to be concentrated in Hollywood.

Radio showed up so strongly in recent farm radio survey that Radio Advertising Bureau is going back for another look in greater depth. Survey in three states showed more than half of farm families have three or more radios sets in working order and virtually eight of ten (78.8%) reported they "listened today." RAB is so impressed it plans new survey in twice as many states and with even larger sample.

**The Bench** • There's reserve FCC ready to step in and regulate country's communications in case of war or other disaster which might incapacitate current commissioners. Last week in Washington, the FCC had first opportunity to get together. Meeting at executive reserve conference was "substitute" FCC—former FCC Chairman Paul A. Porter; former Comrs. E. K. Jett, George E. Sterling, Robert F. Jones; Maj. Gen. Willard S. Paul (USA, ret.); president of Gettysburg College, Gettysburg, Pa., former ODM assistant director in charge of plans and readiness, and Joseph E. Baudoine, Westinghouse Broadcasting Co., Washington vice president. Comr. Robert E. Lee is present FCC defense commissioner.

Use of Conelrad for disaster warnings is next step in defense program. Arrangements are being made by Weather Bureau, Civil Defense authorities and FCC to permit government agencies to alert whole populations regionally to incoming storms, hurricanes, tornadoes, etc., via 640 kc and 1240 kc Conelrad frequencies. FCC Comm. Robert E. Lee virtually promised FCC cooperation in talk to state civil defense directors meeting in Washington last week.

**A Sleeper** • WCBS-TV New York's early-morning (6:30-7 a.m.) Sunrise Semester great books college course, produced in conjunction with New York U., may be syndicated nationally by CBS Television Film Sales. Program surprised industry last month by garnering advertiser in Barnes & Noble bookshop—first time station got "sponsor" that early in day—and it is understood that considerable number of stations (and some advertisers) would like to import Sunrise Semester into their markets.

Marlboro cigarettes (Philip Morris Ltd.) is emerging as major network TV sports sponsor, its latest buy being one-third of national leg of CBS-TV Saturday afternoon hockey coverage. At same time, network is inching closer to objective of televising sports events 52 weekends, year around, with only few blank spots left. Marlboro, which past year has bankrolled baseball, pro football and now hockey, is reportedly considering proposed CBS-TV Sunday afternoon baseball schedule in 1958, though details remain to be worked out.

**Holiday Specials** • NBC-TV understood to be interested in new concept for "specials" created by David Susskind, partner of Talent Assoc., program-package organization. Mr. Susskind's plan is to run 12 one-hour specials with "tie-in thread" of continuity from one show to next with holidays as theme. Each monthly show would feature different holiday.

All day conferences in New York and Detroit Friday by network, agency and advertiser officials pointed to sponsorship by Plymouth Motor Corp., Div. of Chrysler Corp., of Bob Hope Show one-hour specials, five more of which are set for this year and spring of 1958 on NBC-TV. Plymouth will pick up tab dropped by Timex, which bowed out of programs after Mr. Hope appeared on show sponsored in part by competing watch firm. Johnson Motors (Div. of Outboard Marine & Mfg. Co.) has signed for one-half of 1958 special, and Plymouth is understood to have signed for sponsorship of portions still available. Agency: N. W. Ayer & Son, N. Y.

**New Deal, No Sale** • Negotiations for MBS to acquire ownership of Don Lee Broadcasting System [Networks, Nov. 4] are virtually concluded with no purchase, no sale, but completely revised affiliation agreement between national and regional networks is expected to be formalized this week. New deal will allow Mutual to expand its programming on West Coast through curtailment, if not full elimination, of Don Lee sustaining programming. Don Lee, however, retains its independent identity as regional network and will continue to originate its own programs for west coast listeners and advertisers. As part of new arrangement, MBS is assuming responsibility for all line charges.

THE WEEK IN BRIEF

LEAD STORY
They Tell Us "No" on Pay Tv—Special survey by The Pulse for Broadcasting finds anti-subscription television sentiment strong among 1,400 interviewees across the country. Study also poses other questions about fee system. Page 31.

ADVERTISERS & AGENCIES

The Need for Radio Research—Workshop speakers at Advertising Research Foundation conference agree on the reawakened interest in radio, say there's a crying need for more information. Page 34.

Network-Spot Tv 8.4% Ahead of '56—TvB-Rorabaugh reports debunk reports of slackness in tv. Latest figures show who is spending and how much. Page 46.

Another Advertiser Merger—Bristol-Myers Co. takes over family-owned Grove Labs. in undisclosed cash and stock agreement which will be approved at Grove stockholders meeting early next year. Merger won't affect multi-agency structure of two broadcast advertisers. Page 40.

Edsel Studies—Commercial impact of a CBS-TV special is researched by both Pulse and TvB (via Qualitative Research Inc.). Both surveys point up imprint of Edsel's features as stressed by commercials on show. Page 41.

D'Alesandro's Compromise—Baltimore mayor reduces proposed taxes on local advertising media to a total of 6%, but it gets cool reception from those that feel they're facing a discriminatory and "bad" tax, regardless of amount. Page 50.

For later development, see AT DEADLINE, page 10.

FILM
NTA Seeks Control of AAP—National Telefilm Assoc., New York, agrees to purchase “more than 50%” of the stock in Associated Artists Productions for estimated $7.5 million and intends to negotiate for remaining stock. When moves are completed, NTA will emerge as possibly the largest distributor of feature films to tv with both 20th Century-Fox and Warner Bros. product. Page 59.

GOVERNMENT
Roundsville Replies— Broadcaster answers implications of "trafficking"; says he has never bought and sold stations for profits, but only to upgrade his holdings. Emphasizes public service operations in Negro-programmed stations. Page 99.

MANUFACTURING
RCA's Radio Planning Manual—"Bible of knowledge" to help educate equipment prospects is to be RCA's big gun in 1958 war for $10 million new-station market, backed up with major barrage of other service-type missiles. Page 83.

NETWORKS
The Need for Networks in a Sputnik Era—CBS' Stanton says fast communication to the public has become more imperative than ever. He warns that proposals such as those in Barrow report could hamper network system in fulfilling its service. Page 88.

CBS Inc. Net Income Rises $4.5 Million—Annual report shows gain for first nine months of 1957 to nearly $14 million, ascribed to financial readjustments resulting from discontinuance of CBS-Columbia Div. Page 91.

OPINION
Discontent Breeds Better Commercials—Paul C. Gumbinner says that the creative man who is genuinely satisfied with his finished product is to be pitied. The vice president and radio-tv director of Lawrence C. Gumbinner Agency writes on frustration that inspires better creativity in the MONDAY MEMO series. Page 145.

TRADE ASSNS.
Tv Code Board Warns—Subliminal perception on television and horror films were targets of NARTB committee as it met with film producers in Beverly Hills, Calif. last week. Page 68.

A New Fm Group—Seven stations in Southern California unite in new association, Kiefer becomes permanent chairman. Page 74.

"Nice looking case you have there. What's in it for us?"

"Plenty—if you're buying New Orleans. I've got a brand-new Pulse that puts WTIX further ahead."

The very latest Pulse shows WTIX with an even bigger lead over the next station in 11-station New Orleans—first in the morning, first in the afternoon, and first all day with 21.1%. Hooper continues to give WTIX top audience share in every time period, with a first place 24.1% all-day average.

First place Hooper quarter hours: 200 out of 220.

First place Pulse quarter hours: 281 out of 288.

Storz Station programming ideas and excitement have created a new New Orleans listening habit, which in turn is producing a new New Orleans time-buying habit. Next time the Young man calls, make him tell you the WTIX story. Better still, give him a call—or talk to WTIX General Manager Fred Berthelson.

'K. C. Star' Signs Decree
To Sell Its WDAF-AM-TV

Kansas City Star Co. signed consent decree Friday in civil antitrust suit agreeing to divest itself of WDAF-AM-TV Kansas City in reasonable time, as well as to end enforced combination subscription and advertising rates for its morning Star and evening Times editions.

Decree, filed in Kansas City district court, also bars defendants from acquiring any interest in any commercial radio or tv station in Kansas City area except with court approval.

Newspaper firm was found guilty of monopoly and attempted monopoly in February 1955, with company being fined $5,000, and Emil A. Sees, advertising manager, $2,500. Supreme Court refused to review criminal case last summer (Government, June 24).

Generally understood Star was asking $10 million for stations, which have been object of negotiations, it has been reported, by Harold F. Gross (WJIM-AM-TV Lansing, Mich.), Time Inc., J. H. Whitney Co. and Cox interests among others.

KRTC Sells for $175,000

Filed Friday for FCC approval was $175,000 sale of 93% of KRTC Pasadena (near Houston), Tex., by W. D. Christmas to John H. Touchstone and Leroy J. Glager. Mr. Touchstone, vice president-general manager of station, already owned 7%, and will become equal-owner with Mr. Glager. KRTC on 650 kc with 250 watts daytime. listed Sept. 30 balance sheet showing current assets of $24,630, total assets $54,828, current liabilities $3,680, retained earnings for previous years $54,828 and deficit for first nine months of 1957 of $639.

WZOK Is 315th ABN Affiliate

Addition of WZOK Jacksonville, Fla., as affiliate of American Broadcasting Network announced Friday by Carmen Marci, president of Radio Jax Inc., licensee of station, and Edward J. DeGray, ABN vice president in charge of station relations. ABN affiliates now total 315. WZOK uses 5 kw on 1320 kc. Larry Glick is vice president and general manager.

G-T to Buy Newspaper Today

Acquisition of Pawtucket (R.I.) Times by Goodson-Touman Productions for $3 million (Program Services, Nov. 11) scheduled to take place today (Monday) after 80% of newspapers’ stockholders approved sale last Friday. Goodson-Touman plans additional acquisitions through New England Newspapers Inc., which radio-tv firm controls, including entry into radio-tv station ownership. Mark Goodson and William S. Toddman began radio production firm in 1945, went into tv in 1947.

NARTB Becomes NAB Jan. 1;
Vote: 1,227 to 35 in Favor

Name of National Assn. of Radio & Television Broadcasters reverts to National Assn. of Broadcasters on Jan. 1, it was announced Friday following count of mail referendum among members. Total of 1,227 favored shorter name, 35 opposed.

Founded in 1922 as NAB, organization changed to NARTB in 1951 following merger with Television Broadcasters Assn. NARTB board of directors last June unanimously approved change back to NAB, subject to membership vote. Change was discussed at series of eight regional conferences which concluded last month.

NARTB is composed of 1,727 radio stations, 319 tv outlets, four national radio networks and three tv networks along with 117 members from allied fields.

U. S., Mexico in Tv Talks

U. S. and Mexican officials scheduled to meet today (Mon.) to begin discussions on allocation of uhf tv channels along border. Meetings, expected to last several days, will be at FCC, with Comr. Rosel H. Hyde for FCC, and Sr. Carlos Nunes for Mexican Ministry of Communications and Public Works. Agreement between U. S. and Mexico on uhf channel spacing along border was reached in 1951 and amended in 1952. In existence is agreement with Canada concerning both vhf and uhf allocations along northern border.

NBC Changes Pittsburgh Calls

Change of call letters, effective today (Mon.), for NBC's newly acquired WJAS-AM-FM Pittsburgh, station General Manager H. W. Shepard announced Friday. New calls are WAMP and WFMP (FM), letters representing “am” and “fm” outlets with “P” signifying city. NBC acquired outlets Nov. 1.

CAMPAIGNS FOR AUTO FM

WRFM (FM) New York, to encourage auto manufacturers to install fm receivers in new car models, has begun daily spot campaign urging listeners to write to presidents of major auto makers on subject of fm radio as standard car equipment. Station is seeking aid of all other fm stations by distributing sample spots. Selvin Donneson, station sales manager, points out that if each fm outlet could stimulate ten letters weekly “the campaign would produce more than a quarter of a million letters in a single year.” Spots give specific auto manufacturers’ addresses on rotation basis.

• BUSINESS BRIEFLY

Late-breaking items about broadcast business; for earlier news, see ADVERTISERS & AGENCIES, page 33.

HOLDOUT TO END • Sterling Silver-smiths Guild, N. Y., statewide association of leading silverswear companies, in its first use of consumer advertising since the 1920's, understood to have chosen radio as its sole consumer medium and will invest $400,000 in spot radio throughout country and on NBC Radio's Monitor on Saturdays. Campaign to last 13 weeks and set to break short-ly. Copy will be slanted toward young people and promote silverswear in general, tying in with print media used by individual companies. Agency: Fuller Smith & Ross, N. Y.

REYNOLDS LOOKING • R. J. Reynolds Tobacco Co., Winston-Salem, N. C., understood seeking availabilities for spot tv campaign to break in major markets beginning of year for 26 weeks. Client considering sponsorship of half-hour programs on alternate week basis, seeking nighttime periods. Agency: Wm. Esty Co., N. Y.

MULLS RADIO SPOT • Penick & Ford (My-T-Fine desserts), N. Y., considering radio spot schedule which, if approved, will break in January. BBDO, N. Y., is agency.

ACCENT ON NEWSCASTS • Lever Bros., N. Y., buying all available five-minute newscasts on MBS starting this past weekend and running through Dec. 31 for Pepsodent toothpaste and Dove hand soap. Minimum of 150 newscasts being cleared. About $100,000 will be spent through Foote, Cone & Belding (Pepsodent) and Ogilvy, Benson & Mather (Dove), both N. Y.

RIBBON SPOTTING • Burlington Narrow Fabrics Div. of Burlington Industries Inc., N. Y., for Christmas ribbons, will begin spot schedules Dec. 9 for five days in 68 tv markets and 27 radio markets. Chain breaks on women's daytime shows and late evening minutes will be used in tv and morning spots in radio. Ben Sackheim Inc., N. Y., is agency.

AIMS AT FARMS • Kendall Mills, Walpole, Mass., for Tobacco Plant bed covers, beginning 8-10 week radio spot schedule in 34 markets Dec. 1 on morning farm programs. H. B. Humphrey, Alley & Richards, Boston, is agency.

MORE FOR ASPIRIN • National Brands Div. of Sterling Drugs (Bayer aspirin), N. Y., reportedly adding tv spots in undisclosed number of markets, starting later this month for balance of contract year (ends next Octo-beer). Agency is Dancer-Fitzgerald-Sample.
**CBS-TV Plans 23 Ampex VTR's To Overcome Time Differentials**

CBS-TV will use 23 Ampex videotape machines, some of them modified to handle color, to enable virtually all affiliates to receive network programs at their accustomed clock hours during next year's daylight saving time period. Network also will use videotape to handle west coast repeats year-round.

Details, filling in plans sketched to Affiliates Advisory Board last September, were given officially to CBS-TV affiliates Thursday by closed circuit, or given by telephone, to CBS TV stations remaining broadcast to both eastern and central zone stations during DST period, feeding during DST period, feeding delayed broadcasts to both eastern and central zone stations remaining on standard time. Holly wood center will service west coast stations and also, year-round, replace kinescopes in handling of west coast repeats. Owing to shortage of transcontinental circuits, mountain zone stations during DST period will get some west coast delayed feeds and some live telecasts and accordingly will encounter some program shuffling as in past DST periods.

CBS-TV officials estimated cost of Ampex machines, additional circuits and operating costs through 1958 would come to more than $3 million. They anticipate approximately 600 hours of videotape operations per week (recording plus playback). Use of videotape to replace kinescopes on west coast repeats also will become effective with start of DST period, end of next April.

Network officials appeared confident of videotape recorders' future adaptability to color.

CBS-TV disclosure followed by week announcement of similar plans by NBC-TV, using new RCA color videotape equipment along with Ampex units [NETWORKS, Nov. 11], but CBS-TV authorities noted they had briefed their Advisory Board on general plan at Labor Day meeting but re frained from notifying on details till AT&T had given reasonable assurance that circuits would be available.

**Ampex Delivers Station Units**

Ampex Corp. will deliver first production model, VR-1000, of videotape recorder Nov. 26 to KING-TV Seattle, second to KGW-TV Portland, Ore. (under same ownership). Models in use at tv networks are prototypes, not production models. More than 100 videotape recorders will go to stations as rapidly as Ampex can produce them, company said, promising that before end of 1958 new electronic device will be available enabling VR-1000's to record color as well as black-and-white programs.

**ADDTS BERLIN TOUCH**

Claimed to be a first for Irving Berlin, composer's music with specially written lyrics will be offered for commercials on Pontiac's Annie Get Your Gun on NBC-TV Nov. 27, MacManus, John & Adams, N. Y., Pontiac agency, announced Friday. Music for commercials is from show score and will be integrated with show, according to agency Tv Vice President Mark Lawrence.

**First RCA Color Tape Recorder For Local Use Sold WBTV (TV)**

First RCA color tv tape recorder for use in originating local color and black-and-white programs purchased by WBTV (TV) Charlotte, N. C., according to Friday announcement by Thomas E. Howard, engineering vice president of Jefferson Standard Broadcasting Co., and E. C. Tracy, manager, broadcast and tv equipment department, RCA.

Mr. Tracy said that unit, custom-built in advance of production equipment, will be delivered in September 1958 at cost of $96,000. Pre-production unit is seventh engineering prototype slated for delivery next year. Six others were previously bought by NBC for spring delivery at new "Tape Central" being planned for Burbank, Calif., studios.

**Asks Multiplexing Rule Change**

Another request to FCC to revise multiplexing rule for fm stations specializing in functional music programs filed—this by Market-Casters Inc., franchise holder feeding music, news, weather service to 149 Seattle, Wash., super markets via KING-FM. Petition asked multiplexing requirement—which comes into force Jan. 1—be amended to permit, but not require, multiplexing after that date. If required to multiplex, petition said, Seattle audience would lose benefits of good music broadcasts. Same request made by WPEN-FM Philadelphia and KITE-FM San Antonio [GOVERNMENT, Nov. 11, 4]. However, there has been some opposition to this position (see page 102).

**People**

**LOY HANNA,** formerly account executive and director of new business of Eritel, Neuwirth & Sobo, N. Y., to Gore Smith Greenland Inc., N. Y., as group account supervisor and plans board member.

**JOHN PEACE** with William Esty Co., N. Y., since 1941 and a vice president and a director, appointed chairman of newly-formed "operating committee" at agency.

**KENNETH KELLER**, formerly assistant to executive vice president, Bristol-Myers, to assistant vice president and director of sales promotion, Pharmaceuticals Inc., N. Y.

Total 6% Tax on Advertising Adopted by Baltimore Council

Baltimore City Council late Friday adopted twin proposals placing 4% gross sales tax on advertising media and 2% levy on gross income of media (early story, page 50).

Advertising Federation of American board assailed adoption by Baltimore City Council of advertising taxes. ABA board charged this "ill-advised action can endanger economy of entire nation," affecting jobs of many wage-earners employed in mass production industries dependent upon advertising.

**SAG Tv Residuals Set Record**

Screen Actors Guild in year ending Oct. 31, 1957, collected and distributed to members 39,601 checks totaling $2,576,491 in residual payments on tv entertainment films. This represented more checks and more money than in three preceding years combined, Kenneth Thomson, SAG tv administrator, reported Friday at annual membership meeting. Since December 1953, SAG members have received $4,790,618 in tv residuals. Leon Ames was installed as president.

Establishment of health, accident, welfare and pension plan for SAG members will be guild's principal proposal when next negotiations with theatrical and tv film producers start in about two years.

**Pay-Tv Showing Set**

International Telemeter Corp. (Paramount Pictures subsidiary), after showing its pay-tv system in Los Angeles and New York, opens third set of demonstrations at Miami Beach this Wednesday where Theatre Owners of America and Theatre Equipment & Supply Mfrs. Assn. are holding trade show.

**CBS-TV to Cut 7-8 A.M.**

After three years of trying to program 7-8 a.m. Monday-Friday time successfully, CBS-TV is going to abandon that effort. Jimmy Dean Show, currently keynote program in that slot, will be dropped after Dec. 13 broadcast, and CBS-TV will start networking at 8 a.m., effective Dec. 16, according to announcement Friday by President Merle S. Jones. Capt. Kangaroo will continue at 8:45 a.m. with CBS Morning News at 8:45-9 a.m.

Her memory is your headache
And the remedy for one is the remedy for both! Talk to her more often. Her memory’s too short for once-or-twice-a-month messages alone to register. Every advertiser knows this. The question is how to step up your advertising frequency today — at efficient costs. The answer is with CBS Radio daytime drama. Where as little as $10,000 delivers 20.7 million commercial-minute impressions a week — 3.2 impressions on each of 6.4 million listeners. And, equally important, where your product story is delivered to an audience tuned in on purpose...to listen. THE CBS RADIO NETWORK

That’s why drug product advertisers like Carter Products Inc., The Mentholatum Company and Pharma Craft Company buy daytime dramatic serials on CBS Radio, to deliver their selling messages to an attentive housewife audience, on shopping days.
TO TURN RANDOM TUNERS INTO VETERAN VIEWERS

IN REVIEW

THE FABULOUS INFANT

The first decade of television came under the scrutiny of NBC-TV's Wide Wide World a week ago yesterday (Sunday). Unfortunately, WWW did not focus a really scrutinizing eye on "The Fabulous Infant" and it is just this kind of quasi-journalistic endeavor—loose and uncertain—that hinders the youngster's potential growth.

The trouble with this particular entry—as with other WWW treatments in the past—is that Pat Weaver's original brainchild just cannot seem to make up its mind where it wants to go and how it wants to get there. Its very flexibility is its Achilles' Heel; as the mechanical age's "roving correspondent," it is always roving, never stopping long enough at one place to dig into the essentials of the story. Here again, its intent was continually on "the big picture"; consequently, it often missed the little and far more interesting shots.

In "The Fabulous Infant"—a joint network venture in that both CBS-TV and ABC-TV cooperated in providing old kinescopes—WWW faced no shortage of time or material, yet for some unfathomable reason, it missed the point of its own story. Yet, it ignored, to all intents and purposes, the TV commercial; it said nothing about the writers introduced by television, the sociological effects of television on the home, on education and on science, nor of the economic impact on Hollywood (in terms of shuttered film palaces) and the baseball diamond (as illustrated recently by the transcontinental move of the Dodgers and Giants to pay-tv land). It dismissed the tavern whence TV staggered into millions of living rooms, and missed the true significance of the Kefauver, McCarthy and other hearings shown by not explaining that, as a result of the merciless glare of the klieg light and the unrelenting stare of the camera eye, public figures have had to adopt a new code of conduct or reckon with a force known as the national conscience.

Instead, it chose to dawdle backstage at NBC's Studio 6B where on June 8, 1949, Milton Berle made himself an American institution; a temporary one, at least, for now the fading and no longer ebullient comic talked about the "good old days" when nothing went right and about the immediate need now for new talent. WWW then whisked out to Las Vegas to let rising comic Ernie Kovacs reminisce about his ups and downs; then WWW hopped here and there—KMTV (TV) Omaha, WBZ-TV Boston and KTYV (TV) Jefferson City (all NBC-TV affiliates)—to look in on local programming. Still later, it zoomed out to Hollywood for a 90-second commercial by Jack Webb for Jack Webb, hung around long enough to transport viewers backstage to Matinee and from there took them on a whirlwind (montage) tour of the carpentry shops, make-up rooms, master control, etc.

It was only toward the end that WWW paused in its aimless resume of 10 years to come up with some food for thought. Wisely and commendably, producers Barry Wood and Herb Sussan carried some no-holds-barred comment from outstanding TV critics: Harriet Van Horne of the New York World Telegram & Sun who touched on the "vulgar excesses" of both comedies and commercials, and Hal Humphreys of the Los Angeles Mirror-News who contended that by allowing advertisers to dictate program tastes and tv standards, the fabulous infant has grown some "barflies" on its baby bottom.

Obviously, there was something to what Mr. Humphreys said. It was just as obvious that NBC (thanks to the cooperating rivals) had on hand documentation to both prove and challenge Mr. Humphreys' statement; it's a pity the network couldn't have made better use of it and, by having done so, come up with a fair and balanced document on the first 10 years.

Production costs: $200,000.
Sponsored by General Motors Corp. through MacManus, John & Adams on NBC-TV, Sun. Nov. 10, 4:30 p.m. EST.
Executive producer: Barry Wood; producer: Herbert Sussan; host: Dave Garroway; director: Van Fox; writer: Lou Salaman; technical supervisor: Cliff Paul.

HIGH ADVENTURE

With experienced traveller-moviemaker Lowell "(Cinerama)" Thomas as guide, the opener in this monthly one-hour CBS-TV series was devoted to a thoroughly fascinating excursion through the wids of "uncontrolled" New Guinea, up into the May River area, "10,000 miles from New York—10,000 years away in time."

The five-week High Adventure expedition journeyed deep enough into the interior for Australian authorities (who administer the island with restraint and wisdom) to warn that here the natives, upon but slight provocation, would "kill one another, eat one another and cut another's heads off." Such unabashed violence is even more of a threat to the white intruder. With this in mind, American radio personality and host of the spin-off Delco as an unobtrusive host, Mr. Thomas and colleagues managed to witness and film an ancient native initiation rite, a patently unfair crocodile hunt (numerous natives against a single baby croc) and the quiet courage of one Peter O'Sullivan, Australian district officer, who constantly treads the edge of danger, attempting to maintain peace among a primitive people.

Although only the more imaginative viewers could have worried about Mr. Thomas' safety (the broadcasting veteran looked more unconcerned than frightened) the program did have its share of exciting sequences. If future High Adventures develop as well, the series should easily capture season's top honors in the network travelogue category.

Production costs: Approximately $250,000.
Sponsored by Delco Div. of General Motors Corp. through Campbell-Ewald on CBS-TV, Tues. 9:10 p.m. EST. Started Nov. 12 on film from New York.
Star and narrator: Lowell Thomas
Executive producer: Gilbert A. Ralston; director: Leo Robinson; story editor: Judith
Television wasn't in the picture—back in 1923—when Y & R started in business with the basic idea of resisting the usual. Today with TV commercials calling for more and more ingenuity and imagination, it's still a good principle to follow—if you want your commercials to stand out above the rest, and get the increased attention that leads to increased sales.

Books

Rod Serling's "Requiem for a Heavyweight," cited often as the most outstanding TV play in 1956, was first prize winner of the Harcourt, Brace Award. The drama leads off the collection Best Television Plays 1957, which is a volume of the Harcourt, Brace award winning plays edited by NBC sales representative William Kaufman and published a fortnight ago. "Cracker Money," by Steven Gethers and "The Five-Dollar Bill," by Tad Mosel are the second and third prize winning plays, appearing in the volume along with four other complete plays of the 1956-57 season. The editor has included a television script market list and a roster of literary agents specializing in the TV market.

Not all television is as bad as one would believe from reading TV review pages. And while some may think that selections by writers of the best of their colleagues' work is like the blind reading the blind, the fact remains that (a) these plays are good and (b) the guild did not rely only on script writers as judges. Among them are director John Frankenheimer, CBS script editor Ed Roberts, former New York Post critic Jay Nelson Tuck, TV comics Groucho Marx and Jerry Lewis, social critic Gilbert Seldes, ABC newscaster and Vice President John Daly, playwright Clifford Odets, novelist A. B. Guthrie Jr., and actors Jim Backus, Nina Foch and Ronald Colman.

Plays included are Rod Serling's "Requiem for a Heavyweight" (CBS-TV's Playhouse 90); J. Harvey Howell's "Goodbye, Gray Flannel" (NBC-TV's Robert Montgomery Presents the Schick Television Theatre); George Roy Hill's and John Whedon's "A Night to Remember" (NBC-TV's Kraft Television Theatre); Allan Sloan's "Bring on the Angels" (CBS Radio Workshop); Leonard Stern's and Sydney Zelinka's "The $99,000 Answer" (CBS-TV's The Honeymooners with Jackie Gleason); Kenneth Kolb's "She Walks in Beauty" (NBC-TV's The 21st Precinct); James Elwood's "Paper Foxhole" (NBC-TV's Kraft Television Theatre); Stanley Niss' "The Penny" (CBS Radio's The 21st Precinct); Robert S. Greene's NBC Radio documentary Decision for Freedom; Si Rose's sketch for the Nov. 27, 1955, Edgar Bergen Show on CBS Radio; Thelma Robinson's "The Visitor" (CBS-TV's Lassie) and the contributions of gag writers Hal Kantor, Howard Leeds, Harry Winkler and Everett Greenbaum to the Nov. 12, 1955, George Gobel Show on NBC-TV.
She's your lady in waiting... waiting for your buying suggestions. When you whisper sweet somethings to her via KOIN-TV, she listens and reacts in Portland and 30 surrounding Oregon and Washington counties. The South Will Rise Again

EDITOR:

The United Daughters of the Confederacy, meeting in Richmond, Va., the capital city of the Confederacy, for their annual national convention and for the dedication of their new National Headquarters Bldg., attended a screening of a TV series based on the life and exploits of one of the Confederacy’s greatest heroes, Col. John S. Mosby.

The dear old ladies, about 500 of them, cheered themselves hoarse and several times attempted a quivering version of the rebel yell.

Vic Bikel of CBS Film Sales awarded the President General a framed scroll appointing her an Honorary Colonel of Mosby’s Raiders. She nearly fainted from the excitement and several of the ladies present offered her a whiff of their smelling salts. Oh, it was a great time for the South, suh!

Do you think The Gray Ghost will have any trouble garnering a real rating on WRVA-TV, ch. 12, Richmond?

News Reporting Is a Trust

EDITOR:

Re “The Way to Equality” [EDITORIAL, Oct. 21], there should be no concern by broadcast newsmen because print reporters requested separate interviews with travelers at Idlewild airport... The very fact that broadcast newsmen can interview on this semi-exclusive basis should give them an additional incentive to provide on-the-air scoops, not only by the immediacy of their medium but in subject matter as well.

Prohibiting broadcast newsmen from public events is quite another matter. Any infringement on the people’s right to know is contrary to the public welfare and should be so appraised by all newsmen. The relative qualifications of the reporters covering the public events have no bearing whatsoever on the principle involved.

The slow progress you speak of by some stations to accept their “journalistic responsibility” is because they do not realize what good journalism is, why good journalism is

necessary, nor even that good journalism is a public trust. It is of the utmost necessity and importance to obtain trained newsmen and to have news broadcasting included as a major subject in journalism schools. It is of primary importance to establish news seminars now for both current station newsmen and station management to help them both understand that they must fulfill those responsibilities to the public guaranteed by the Constitution, and not merely fulfill those responsibilities required by the FCC. .

To editorialize merely to attempt to “command the respect of public officials,” or to “become a force” in the community, or to use the editorials only as a “mechanism that can fight back,” would only indicate a lack of understanding of the public trust that makes editorializing necessary.

**Fm Tuners Via TV**

**EDITOR:**

It is a shame the way we (or somebody) have let fm die. Fm radio that is.

Couldn’t you or the broadcasters, or both, petition Electronic Industries Assn. (again, or somebody) to urge television receiver manufacturers to incorporate fm in all new television sets? There is a lot of blank spectrum (as far as commercial radio and tv is concerned) between tv ch. 6 (82-88 mc) and ch. 7 (174-180 mc). Our fm broadcast band begins right where ch. 6 stops.

Why couldn’t the fm band be added to tv tuners right here? Fine tuning would be used for “bandspread.” Tv antennas are broad-banded enough to serve for fm as well as normal tv reception. Switching to the new “fm channel” could also kill the tv horizontal oscillator section as well as other not needed circuits, or a separate “tv-fm” switch could be incorporated.

Actually, this fm feature incorporated in new tv sets would cost the manufacturer less than a dollar. But look what a shot-in-the-arm it would give fm radio. (And, too, modern television sets are “hotter” than the run-of-the-mill fm sets and therefore reception should be excellent).

BLUE CHANNEL

RCA-7037-The New Standard in Color Camera Tubes. More than twice the average sensitivity of any previous color image orthicon—in each channel of color camera systems.

new
IMAGE ORTHICON

for Color

You are looking at the new RCA-7037, an improved image orthicon that has much higher sensitivity—will outperform and outlast any other image orthicon—and retain high sensitivity throughout life.

Here are a few of the outstanding advantages of this new tube:
1. Higher effective sensitivity to red, green, and blue permits reduction in lighting level or lens aperture,
2. Increased ratio of blue to red sensitivity provides better balance of the effective sensitivity between color channels with incandescent lighting,
3. A new "stabilized" target greatly reduces any tendency toward an increase in picture "sticking" throughout the life span of the tube—and thus makes possible more hours of service and lowered camera operating cost,
4. Super-Dynode design insure freedom from dynode burn,
5. Micro-Mesh does away with defocusing to kill moiré and mesh pattern, and allows full aperture correction to improve picture-detail contrast.

RCA-7037 can be used in place of Type 6474 in all modern color-TV cameras—without changing color filters. RCA-7037's are available now—from your RCA Industrial Tube Distributor. For a technical bulletin, write RCA Commercial Engineering, Sec. K-13-0, Harrison, N. J.

How RCA-7037 can improve your Color Operations:
- Reduces operating costs 3 ways—in lower studio lighting costs, both initially and throughout tube life—in lower air-conditioning costs in station studios—in lower camera-operating costs
- Gives you greater freedom in staging and lighting techniques
- Delivers longer tube life
- Provides "stabilized" target operation
- Extends tube pro-rata warranty from 350 to 500 hours
- Extends 100% tube warranty from 15 hours to 50 hours
many closed-circuit radio outlets as well as wired audio systems in service hospitals everywhere. To these the Series is carried via shortwave radio from both New York and Hollywood (by transmitters ranging from 50 kw to 200 kw).

Orienting an American's Views
EDITOR:
I would like to correct Steve Parker [INTERNATIONAL, Sept. 2] about tv business in Japan.

First, Fuji cigarettes is not an advertiser but a brand name. So, if he speaks of "big advertisers," it should be Japan Tobacco Corp. (tobacco industry in Japan is a monopoly).

Second, he maintains titling is impractical since it requires vertical insertion and is done only on Ziv's Cisco Kid or CBS-TV Film Sales' reruns of I Love Lucy. On the contrary, titling here is either vertical or horizontal and, in fact, is done horizontally for I Love Lucy.

Third, Mr. Parker said, "rare are the times when a tv show gets on or off on time." There is absolutely no such thing happening as a 7:30 show getting underway at 7:55 (as Mr. Parker reports).

Also he doubts that the industry will ever match the home impact of U.S. tv. It sure does! The first commercial tv station in Japan, Nihon Tv Network, came up with the idea of installing [public] tv sets to attract people and popularize tv and build up audience. Seeing the results, bars, restaurants and beer gardens started installing tv sets. Once the people can afford a tv set, they come straight back home to watch tv.

WHAT'S ALL THE HUBBUB
ABC-TV has added a live, full-time affiliate in Boston—WHDH-TV (Channel 5)!
Now all Boston can see all ABC-TV shows, as scheduled and programmed. And
ABC-TV coverage of U.S. TV homes takes another jump—right up to 94.2%.*

Already this year, ABC-TV has added live, competitive affiliates in San
Antonio, Tucson, St. Louis, Miami, Norfolk, Peoria, Omaha, Ft. Wayne, Indianapolis and Youngstown. Now WHDH-TV in Boston (the nation's sixth market)
raises ABC-TV's live coverage to 82.3% of all U.S. TV homes. This season's
further additions—Amarillo and Chattanooga—will push that figure to a whack-
ing 83.1%.

That's the kind of news that sets a whole town buzzing. And an avenue, too—Madison or Michigan!

*Total deliverable coverage for half-hour evening program.
OUR RESPECTS

to Edward Palmes Shurick

ANALYSIS: Ed Shurick can be expected to be resourceful and reliable—but not always predictable. He underlined that fact only a few weeks ago by resigning as a CBS-TV vice president and director of station relations to become executive vice president of Blair-Tv, station representative.

Mr. Shurick, a disarming fellow who speaks gently but wields enormous influence through intimate and wide knowledge of the broadcast field, is as modern and active as the Austin Healy 106 sports car he drives.

In making the change from CBS-TV to Blair-Tv, Mr. Shurick transfers his focus from networking to spot selling. Physically speaking, however, the move meant only a few New York blocks—from 485 to 415 Madison Ave. He made this short hop by way of the Virgin Islands, where he vacationed for a short time.

As executive vice president at Blair-Tv, Mr. Shurick can be expected to provide much of the spark that is necessary to ignite new sales and research development in the spot field. He has always been one to burn the midnight oil—and is never without an attitude to go to and from his Weston, Conn., home.

Edward Palmes Shurick was born in Duluth, Minn., on Dec. 15, 1912, son of Edward P. Shurick Sr., who during his career was Minneapolis sales manager with KSTP St. Paul. Mr. Shurick Jr. attended St. Paul central high school and spent two years at the U. of Minnesota.

Among his colleagues was CBS' Eric Sevaried. (He later finished his university study at night school at the U. of Kansas City majoring in economics.)

In Minneapolis, in 1935, Mr. Shurick joined Addison Lewis Assoc., an advertising agency, after having served as a sports director and announcer (announcing play-by-play sandwiched between such luminaries as Ted Husing and Bill Stern) at WDGY Minneapolis. In 1933 he married Dolores Pipes of St. Joseph, Mo.—"getting married young to the one l did was the best decision I ever made."

IN 1938 he was local salesman for KLO Ogden, Utah ("where I really learned about the radio business"), and where he did all the varied jobs which had to be handled at a station in those years. By 1939 he was national sales manager for the newspaper that owned the station. By 1941 he was back at KLO and one of the founders of the Intermountain Network in Salt Lake City. Mr. Shurick served as that network's first general sales manager.

From 1942-47, Mr. Shurick was advertising and promotion director of Arthur B. Church's KMBC Kansas City; was account executive in charge of promotion and research for three years with Free & Peters (now Peters, Griffin, Woodward) and joined CBS in March 1950 as market research counsel for CBS Radio. In 1951 he was made account executive in CBS-TV sales and, a year later, manager of network sales development (he set up this new department).

During this period and his subsequent years in station relations—he became national director of CBS-TV's station relations in 1954—he pioneered in the study of pricing and standard affiliation practices, creating the network's affiliation plans committee. He also was the "father" of the Extended Market Plan at CBS-TV designed to aid the small market tv station.

Mr. Shurick can discuss a wide range of experience in the broadcast field, from agency to station, from network to representative. He recalls, for example, that when he first joined CBS Radio he worked on presentations, helping to deliver some "several hundred" to agencies. He also is a believer in research, an attitude he has carried with him to his new job.

Aside from his sports car enthusiasm, Mr. Shurick is a golfing, fishing, hunting and skeet shooting fan (he's a member of the Weston Gun Club). His home is adorned with antiques, a pursuit that he calls "an investment hobby." He is a member of the Ararat Temple Shrine in Kansas City (Harry Truman's Temple), the Broadcast Pioneers, the Society of Television Pioneers and the Radio & Television Executives Society of New York.

Mr. Shurick also is an author—in 1946 he published a history of radio entitled The First Quarter-Century of American Broadcasting.

The Shuricks have four children—Patricia Annette, 19, Sandra Sue, 15, Linda Jean, 12, and a son, Edward P. Shurick III, 9.
IN THE PUBLIC SERVICE OF GREATER DETROIT

"THE
WKMH TRAFFIC COMMUNICATOR"
a WKMH origination

Throughout the peak travel hours of the day the Traffic Communicator, a uniformed policeman broadcasting directly from Detroit Police Headquarters, supplies "The Man on Wheels" with up-to-the-second reports on traffic conditions—accidents, tie-ups, routes to avoid. Special bulletins are rushed on the air seconds after news reaches Police Headquarters. In the City on Wheels, where over 81% of the families own cars—where over 65% use those cars as their principal means of transportation to and from work—this information is a MUST! Here is news broadcasting at its highest level—true public service!

PAY TV VETOED IN 10-CITY POLL

- Broadcasting-Pulse Inc. survey in major markets shows 2-1 against
- Yea's want it on cheaper basis, would prefer paying per-program fee

Viewers in 10 major markets representing all sections of the U. S. are divided 2-to-1 against pay television.

This was revealed last week in a special survey conducted for Broadcasting by The Pulse Inc. as this magazine sought to explore more definitively the public attitude on one of the most controversial issues to grip television since its emergence as a major medium.

Two-thirds of the respondents voted that they were "not interested" in having toll tv in their homes even though they were told that "first-run movies, major sports events, Broadway shows, operas, ballets" were among the programs being held out to them as a supplement to their free-tv fare.

In the Pulse poll for Broadcasting, the proportion of viewers "interested" in toll television ran higher than in some other recent but more localized studies—notably one in the Salinas-Monterey and San Luis Obispo areas of California where the tally was 5,002-to-4 against pay television, and one conducted by Sen. William Langer (R-N. D.) in Bartlesville, Okla., where a wired-subscription-tv is now underway and where Sen. Langer's returns at last report indicated a 1,930-to-163 majority against [Program Services, Nov. 11].

Two-thirds of those "interested" in having pay tv in their homes said they would prefer to pay by the program, rather than by the flat monthly fee. Their reasons for this choice were not explored. But one possibility advanced is the belief that on a per-program basis they could keep a month's total expenditure below what they would be charged on a flat monthly basis giving them access to all pay-tv programming.

Of those who preferred per-program payments, the greatest preference was for $1 to $1.24 per program. A little less than 32% checked that price range. But an equal number said they were willing to pay less than a dollar per program, so that overall some 63.5% came under $1.25 in their price preferences. The second largest single preference was in the 50-74 cent range (17%) and the third largest (8%) checked the 25-49 cent span. Almost one-fourth didn't know how much they would be willing to pay.

Among those who preferred to pay by the month and see all they wanted, almost 64% fell under the $6-a-month figure. The number of those who voted for a monthly price somewhere between $1 and $2.49 exceeded all those who would be willing to pay $6 or more.

How would these figures stack up in Bartlesville?

Officials of Video Independent Theatres, now on free television. This was approximately the same number—a few less—than those who would not be interested in pay tv as a supplement to free tv. Whether the similarity in these "nay" votes indicated a bias against payment for any programs, or whether it had other significance, could not be pinpointed statistically.

The study did show that more than 93% of the viewers regarded present free-tv fare as satisfactory or better. Some 18% voted it excellent, 44.2% thought it good, and 31.3% considered it satisfactory. Asked to put a monetary value on these free programs, an even 50% chalked them down as worth $1 a week, while 22.6% rated them at $5 a week. One-fifth had no opinion.

Among those willing to pay for programs now on the air, if they were not being distributed free, Playhouse 90 was the most popular choice in the drama category; Father Knows Best in the comedy and situation comedy field; Perry Como Show among

$2 MILLION TO SELL A NAME

Science-minded chemical firm pins its hopes on a network documentary

With spurtiniks I and II beep-beeping ominously through space, Monsanto Chemical Co., fifth largest U. S. chemical concern (1957 net sales: $600 million), which claims to have a stake both in science and in our national survival, is about to make its corporate plunge into network television. Happily cashing in on front-page news, Monsanto on Dec. 1, will premiere Conquest, a new science series on 105 CBS-TV affiliates; nine additional such "one-shots" are scheduled before June 1959 [ADVERTISERS & AGENCIES, July 22].

Unlike its competitors, the St. Louis firm has no consumer products to sell. Yet it has allocated $2 million—representing one-third of its total budget—for one program series scheduled for prime Sunday afternoon time.

To get the answer to why it joined the ever-growing ranks of corporate advertisers and what it hopes to get out of Conquest, BROADCASTING last week talked with the five people most concerned with the development and execution of the new CBS-TV series: Monsanto marketing vice president John L. Gillis; his advertising director, William R. Farrell; CBS Public Affairs director Irving Gitlin; Gardner Adv. Co.'s vice president David P. Ferriss and Roland (Chick) Martini. Mr. Ferriss is account supervisor in the agency's St. Louis headquarters; Mr. Martini is executive director of radio-tv and the man who initially bought the show for Monsanto.

One reason behind Monsanto's step: like many other chemical concerns it is alarmed at the science race between the U. S. and the U.S.S.R. Notes CBS's Irv Gitlin: "Never before has science interest run so high... has the nation's need for scientists been so acute... has there been so pressing a need to attract youngsters to science... has Soviet scientific research and education aimed so dangerous a threat to national survival." Adds Monsanto president Dr. Charles Allen Thomas: "The events of recent weeks have demonstrated dramatically how science can affect the lives of us all. At no time in our history has an understanding of science been so important to our progress—even our security."

Altruism is only a part of the story. Beneath Monsanto's concern for the national welfare and its sincere efforts to stimulate science recruitment, there also is a sound business reason why Monsanto is putting most of its broadcast chips into one basket. According to Gardner executive Dave Ferriss: "We face a tremendously complicated marketing problem. "Because of Monsanto's enormous product range—some 500 different items ranging from A-9 (phthalic anhydride) to zinc benzoate, none in the consumer product category—we needed a

[Corporate—more commonly known as institutional, a term now out of favor with advertisers who claim "we aren't institutions but corporations."]

DISCUSSING the premiere performance of Monsanto's Conquest are Irv Gitlin (l), CBS director of public affairs, and Dr. Charles Allen Thomas, president of Monsanto.

St. Louis), which Monsanto purchased in 1956, currently sponsors Ziv Television Programs' Highway Patrol in 26 central-south markets. Monsanto's success in spot-broadcasting (radio and tv) for "all" ($500,000 in 1956) has prompted the firm to spend some $50,000 in farm radio in six midwest states on behalf of its fertilizers and an additional $10,000 in spot tv on the West Coast for its Rez wood finishes. Furthermore, though it does not participate in planning advertising for Chemstrand Corp. (which it jointly owns with American Viscose Co.), it encouraged Chemstrand's Acrilan this fall to pick up alternate sponsorship on NBC-TV's Salty film series starring Joan Caulfield. (Doyle Dane Bernbach, New York, is Chemstrand's agency.)

To justify Mr. Ferriss' "terribly complicated marketing problem," one look at Monsanto's sales breakdown ought to suffice. Plastics, synthetic resins and coatings account for 31.5% of its net sales; phosphates and detergents (it still manufactures "all" for Lever), 18.2%; plasticizers, 13%; agricultural chemicals, 9.2%; petroleum products, 8.8%; rubber and oil chemicals, 6.8%; heavy chemicals, 4.4%; pharmaceuticals and flavors, 3.7%, and "other" products, 4.4%.

Another factor behind Monsanto's purchase of Conquest was competition. E. I. duPONT de Nemours, ranking first among U.S. chemical manufacturers (1957 sales: $2 billion), went into tv spectacles for the first time this year with CBS-TV's duPont Show of the Month after years of having sponsored Cavalcade of America in radio-tv.

Union Carbide, No. 2 among the chemical giants (1957 sales: $1.45 billion), has been co-sponsoring Omnibus for two seasons on two networks. And while Allied Chemical and Dye Corp., No. 3 (1957 sales: $670 million) has yet to make its tv debut, Dow Chemical Corp., No. 4 (1957 sales: $630 million) is again considering tv after having backed NBC-TV's Medlic last year. (Shortly before Monsanto picked up Conquest at roughly $125,000 a show plus $80,000 for time and commercials, Dow's agency, MacManus, John & Adams, was reportedly interested in the show; so were Shell Oil Co. and Portland Cement Co.)

Monsanto doesn't need tv to bolster its sales as would, say, a food manufacturer. It has happily been riding the crest of a gigantic postwar chemical boom; witness its growth in sales from $267 million in 1952 to $542 million in 1956. For the first nine months of this year, net sales jumped 7.2% while earnings before taxes advanced 7.5%.

If it doesn't intend to "push" its products, what does Monsanto hope to gain from television? Having recently embarked on a $75 million capital expenditure program, Monsanto, according to Marketing Vice President Jack Gillis, intends to:

• Increase "favorable recognition" on a corporate scale.
• Build its reputation as "a successful, well-managed, diversified company."
• Emphasize the fact that it makes top-quality products and backs them with "the finest technical service."
• Sell its products indirectly by broadening markets for its own products and those of its jobbers.
• Expand general knowledge of the broad range of products manufactured by Monsanto.
• Create a "selling climate" for its sales force in order to assure that they'll be seen promptly and listened to closely.

Mr. Gitlin hit hard on the latter plank...
of Monsanto’s platform, quoting a "satisfied customer," the Prudential Insurance Co. of America, as having said that "Air Power and The Twentieth Century have opened thousands of doors to its salesmen as no other form of prestige advertising had been able to do."

According to Monsanto advertising director Bill Farrell, the possibility of corporate sponsorship first hit Monsanto in 1954, and it began to sell its television, free, to TV stations throughout the country, a 15-minute industrial color film showing how plastics affect our daily lives. Local Monsanto dealers and jobbers found the films of sufficient interest to sponsor them locally. Recalls Gardner’s Chick Martini: "We looked and looked for three years, rejected ‘pure entertainment’ offered to us by the networks and the talent agents. We wanted a complete scope."

Mr. Martini passed over three of Mr. Gitlin’s prize projects, The Search, Adventure and Odyssey before settling for Conquest. All three had been on the block but failed to attract an advertiser; they are not off the air.

Last Dec. 30, as part of the network’s three-hour summary, At Year’s End: 1956, Mr. Gitlin and public affairs department producer Michael Sklar teamed up with the American Academy for the Advancement of Science to present The New Frontier, an hour-long show dealing with the scientific achievements of the year. This, it turned out later, was the seed from which Conquest sprang. Critical reaction—most of it favorable—led to further development of a “science series” and by May 28, Mr. Gitlin and staff had completed drawing up a 57-page detailed presentation for Conquest.

Sight unseen, as it were—there never was a pilot film—Gardner, Adv. Co. bought the show for two years at a price tag reported at $2 million. Dr. Thomas, a member of the National Academy of Sciences (which will work with the AAAS on the show) went along almost immediately, reasoning that Conquest would reach “that special audience of theordon of industry who often don’t watch the ordinary ‘amusement’ program; thus they would be exposed not only to an adult program but to our message as well.”

Behind the actual showing of Conquest stands an intensive merchandising drive paid for by Monsanto. Tie-in print ads are scheduled to run in Life, Time and Farm Journal. Monsanto also will pre-sell its series in Garden & Gun, and special subscription offers with its key sales people in 10-12 cities. The salesmen will be sporting special Conquest neckties and lapel buttons, and let the stockholders be alarmed that their precious dividends are being funneled into television. Monsanto last month kept its thousands of “bosses” informed via special Conquest stuffers enclosed with their checks.

“Five years ago,” Mr. Martini said Tuesday, “we wouldn’t have been able to air Conquest or any show like it. The climate of public acceptance just wasn’t there.” It is today, he feels, and he credits to some degree Omnibus and Wide Wide World, not to mention the impact of Soviet scientific achievement. Such shows as the Frank Capra-AT&T series, claims Mr. Martini, have opened up new tv vistas for corporate advertisers. Five years ago, science was “for sissies only.” Today, scientific explorers, be they named Salk or Hillary, working out of a lab or on an Antarctic icecap in “Operation Deep Freeze,” are American heroes. Such a hero is U.S.A.F. Major David Simons, “star” of the Dec. 1 Conquest. Monsanto and CBS will present for the first time exclusive filmed reports on Maj. Simons’ 33-hour solitary confinement in a balloon 20 miles above Minnesota last Aug. 18 in the Air Force’s “Operation Man High.”

Monsanto hopes to clear the air of the mystery of science and stimulate interest in science as a career. It will try to do so on each show via its four 90-second commercials—produced by MPO Films and featuring announcer Nelson Case. Better yet, though, comments host Eric Sevareid, even a sophisticated, 45-year-old reporter who has literally been through hell and high water, can stand to learn from Conquest’s myriad forays past the “forbidden” frontiers of science.

RESEARCH NEEDED, ARF TOLD

- McCabe, Green, Goldberg address workshop on radio
- Well-attended session shows renewed interest in medium

Reawakened interest in radio as a sales

man was amply evident in the radio workshop session at the Advertising Research Foundation’s third annual all-day conference in New York last Thursday.

Although two other workshops were in progress at the same time, a roomful of some 75 advertiser, agency and media executives met to hear "what we need to know about radio" discussed from the standpoint of all three—and then kept the speakers overtime with questions and further discussion from the floor.

The consensus of the three panelists was that "what we need most to know about radio" has to do with additional research—especially as to the who, where, when of listenership—that would permit more meaningful use of radio by advertisers and agencies and more knowledgeable selling by broadcasters.

The panelists were Thomas B. McCabe Jr., director of advertising for Scott Paper Co.; Jack R. Green, associate media director of J. Walter Thompson Co. (see condensed text page 36), and Melvin A. Goldberg, director of research for Westinghouse Broadcasting Co.

Workshop Chairman Arthur A. Porter, JWT vice president, noted at the outset that there is "more interest" in radio today than in many years, and that this renewed interest is reaching into all areas of the advertising business—marketing, copy, research, etc.

He also thought it possible that the next big step in media research may lead to a technique for "comparing apples and oranges"—comparing different media on a common basis—even though the generally popular view has been that this could not be done. After all, he said, "every time we write a media plan, we have compared them many ways.

Mr. Goldberg said radio "has labored under a severe handicap" in that it is almost too good. For years, radio has been used by advertisers to help sell their wares, and apparently it has been quite successful. But I would venture to say it has been successful despite a serious lack of knowledge about the medium.

He told the group that radio "is too effective to be afraid of research. We need more of it, better done and on a more qualitative basis. The truth can only help us."

Mr. Goldberg cited information which the advertiser needs and which for the most part generally is available—number of sets, marketing data, station coverage, programming, audience composition and station "image" (how people feel about a station), etc. But he pointed out that research along these lines could be refined further to the advantage of both advertiser and medium.

He also cited other research areas where he thought "extremely valuable" information might be developed:

"I would like to see some studies on the problem of frequency and repetition. How much repetition is necessary to get a given message across—if the message is also being presented on tv? How much if it is radio alone? What are the communications dynamics, once a message is heard?"

"Another intangible about which we do not have hard data, but for which there is a need, is the ability of radio to reach the customers when the product is being used. When a food packager can reach the woman in the kitchen; when the company that sells tires can reach the car owner in his automobile; when the seller of any merchandise can reach the woman in the car on the way to the shopping center, or can reach her just before she leaves to go shopping, this is a substantial plus that radio does have. Unfortunately, no research service offers data on radio listening by location of set."

"As a corollary to this, I think it would be valuable to the advertising industry and, incidentally, to the civil defense administration, to know the number of radios in business establishments and the degree to which these radios are in use. This information could be gathered in the 1956 Census of Business, but it is too late. Here, ARF could take the lead."

Mr. Goldberg said another area where ARF might help is in connection with the decennial census. He thought it "a great error" that radio questions are to be omitted from the 1960 census, because such information "would again be of aid not only to the industry but to civil defense as well." He continued:

"As a result of such a survey we would have county data on the number of radios
DELCO TAKES TO HIGH ADVENTURE

Native: "Campbell-Ewald, I presume——" Account executive: "Of course——"

This bit of dialogue might well have taken place during rehearsals for a 3-minute commercial.

The place: Angorum, New Guinea; the cast, one account executive, Campbell-Ewald variety, local residents, a location crew of 38 and unnumbered natives. The occasion: filming of the Delco batteries commercial for the premiere last Tuesday of the High Adventure series on CBS-TV.

High adventure extended from the production of the show to the filming of the commercials. Campbell-Ewald, agency for Delco Div. of General Motors Corp., wanted commercials as realistic and adventure-flavored as the show itself. So, while host Lowell Thomas filmed an excursion through the wilds of New Guinea, Campbell-Ewald shot the Delco story in a New Guinea town dependent on batteries for electric power.

C-E Account Executive Donald Kraatz traded grey flannel for khaki shorts and traveled some 10,000 miles from his Detroit office to supervise filming of the commercial. Shooting took a week in Angorum. The same camera crew that worked on the High Adventure story was employed.

Residents of New Angorum, used as the cast, added realism to the commercial, which showed their use of Delco power in everything from running the local hospital to providing light for an evening crocodile hunt (see above).

Plans are scheduled for a location commercial for each of the six High Adventure shows to come. For the Dec. 23 show, the commercial crew goes to the Arctic. On the future itinerary: Madagascar, Timbuktu, Morocco, Nepal and the Australian bush country.

in the home, where they are placed, numbers of portables, transistors, automobile radios, etc. It seems to me this would be well worth the extra money and effort."

He also proposed—crediting the idea to Harper Carraine, CBS Radio director of research—that warranty cards on new radio and tv sets be used to gather industry information.

"Why," he asked, "couldn’t ARF contact the radio manufacturers, or have RETMA [now Electronic Industries Asso.] or NARTB make the contacts, to get a continuing analysis of the warranty cards . . . ?

The usual warranty card includes questions as to who made the purchase, whether it was bought for oneself or received as a gift, how many radios are owned, what kind, etc. If the industry got behind such an analysis we could, in all probability, include certain other questions which would be of mutual interest. And, incidentally, the same data would be available for fm and tv. Obviously, secrets such as who the manufacturers are, or their individual names, could be eliminated from the finished reports."

Mr. McCabe, whose firm is in both radio and television, had six questions whose answers, he said, would permit more meaningful use of radio:

1. How does radio and tv compare in impact? If it is true that tv's impact is greater, than how many radio minutes are needed to equal the impact of one tv minute?

2. What frequency of commercials is necessary to make radio advertising effective? At what point does the advertiser reach the point of diminishing return?

3. Are participations as effective as sponsorships of full segments?

4. The imagery transfer concept assumes.

he felt, that radio is part of "a media mix" rather than a medium standing by itself. If that is correct, does radio have a serious limitation as an exclusive medium? If it is effective as an exclusive medium, what products can benefit more from its use—the new, the relatively new, or the established? (Later he said he had little concern about radio’s ability to introduce new products, but was more concerned about its ability, when used exclusively or almost exclusively, with established products.)

5. It is hard, he said, to merchandise radio properly, on the basis of present research. Can research be developed in this connection to show radio in its proper relationship to other media?

6. Advertisers are concerned about over-commercialization of radio in peak listening periods, he asserted. Has this commercialization watered down the effectiveness of

BROADCASTING

November 18, 1957 • Page 35
DATA LACK HURTS RADIO—GREEN

Is radio, the “most universal” medium, even more universal than it thinks? Is it short-changing itself regarding both its reach and its impact? Jack R. Green, associate media director of J. Walter Thompson Co., thinks this may be the case—owing to an inadequacy of research on the media habits of individuals.

One of three panelists at the radio workshop in the Advertising Research Foundation’s third annual conference last week (see page 34), Mr. Green noted that “drastic changes have occurred in the past two decades in every aspect of [radio] except the research tools and techniques used to measure it.” Among other changes affecting advertising, he noted “an explosive growth in population and the size of our national economy,” shifts in population, the trend toward product diversification and the absorption of advertising into the marketing structure. His talk as he then developed his theme is presented here in condensed text:

“Each medium must be evaluated in light of its contribution to the effective use of media. That means it must be evaluated in various possible combinations with other media as part of the planned marketing mix.

“In effect, the key question has changed from ‘what should we buy in radio?’ to ‘should we buy radio?’

“During this evolutionary period the radio medium itself has undergone many changes.

“Through the installation of radios in the kitchen and bedroom, in the workshop and barn, in automobiles and on tractors, radio has been transformed into the most universal and the most personal of all media. It has also created equally sweeping changes in programming patterns and in the methods of selling radio. The concepts of ‘big name’ programs, first refusals on franchise time periods, and exclusive sponsorship of individual programs, have virtually disappeared from radio.

“Equally significant is the often overlooked but current selling practices of participation sponsorships and the revised rate structures now give every advertiser an opportunity for access to king-size audiences at efficient cost. A decade ago only a limited handful of advertisers were lucky enough to come up with a hit show or a franchise on a key time period that could deliver audiences comparable in size and cost efficiency.

“Because radio is now so ubiquitous, it is almost certain to be listed by the agency media man as part of one or more of the combinations that are considered in the media plans for products with a broad marketing base.

“In examining the radio portion of these possible combinations, it is relatively easy to get a pin-point fix on the number of homes that will be reached by radio. It is also possible with currently available data to determine how many homes these homes will be tv or non-tv households and to estimate what portion of each subgroup will not be reached by any of the other media on the schedule.

“But at this point the trail suddenly vanishes and the media man has to grope his way through the balance of his evaluation on sheer intuition, due to the absence of pertinent research data on the actual listeners—as distinct from households reached.

“This is particularly frustrating in the situation where 25%-50% of a million dollar or more budget may be under consideration for use in radio. Although the radio segment may represent a large gross number of homes and impressive frequency, it usually subdivides into at least three or four distinct categories—where the radio message will have a different role to play.

Of Many Categories

“As a minimum, these categories would be (A) non-tv homes, (B) tv homes not reached by the product’s tv schedule, (C) tv homes that will also be reached with messages. If the plan includes print media, the categories become more numerous and complex.

“Current radio research tools can provide a reasonable fix on the total number of listeners reached by any schedule—but even this requires some ingenious calculations and assumptions if we want to include the out-of-home audience.

“However, none of the available data on listeners provides more than a faint clue concerning the distribution of the listeners between tv and non-tv homes. And there are no clues whatsoever that will enable us to determine, within tv homes, the differences in number, kind or quality of listeners who are also exposed to the brand’s message on tv and those who are not.

“Analysis of set use patterns indicates that within each socio-economic group of tv households, there are families with marked differences in radio and tv set use habits. In the absence of satisfactory research data about the media habits of individuals within these households, we can only speculate on the explanation for the differences in radio or tv set use. We cannot determine whether they are due to differences in the number and kind of people who are at home at various hours or to differences in the mood and attitudes of the individuals involved.

“Similarly, we cannot determine whether out-of-home radio listeners are the same individuals we are reaching with our radio or tv messages at other parts of the day or week.

“In the absence of clear-cut evidence about the differences in media habits of individuals who are exposed to the radio and tv messages in homes that are reached by both schedules, we frequently have to assume that both messages reach the same person. This probably means that radio is being short changed on the estimates of the number of individuals it reaches exclusively with the advertiser’s message.

“But even more important than this short changing in the number reached exclusively is the possible understatement in terms of quality and selling impact.

“Most of the current copy testing techniques tend to imply that the ‘sight plus sound’ approach usually has an advantage over ‘sound only’ in registering effective impact for an advertising message. But the conclusion is based on overall averages—and does not allow for the possible differences in mental set among people who turn on the radio rather than the tv set as their media choice.

“The fact that an individual is listening to the radio at the time our message is broadcast may in itself pre-dispose him (or her) to greater receptivity for the message than he displayed under typical copy test conditions.

“The longer we delay in getting research undertaken on the listening habits of individuals within the household, the more difficult it will become to isolate the sales effectiveness of radio. Media patterns are becoming more complex. Each new component added to the mix for a product increases the research problem of identifying the specific combination of media exposure that individuals have received. Since the trend is still toward greater flexibility in media patterns, the present void in audience data may place an even greater handicap on radio as the emphasis increases on evaluation of the profit potentials for various combinations as the basis for final media selections.”
DOMINATION IN DEPTH

The first study of local television ever made by the highly respected ALFRED POLITZ RESEARCH CO. reveals that almost everyone watches movies on television.

88% of the 11,420,000 New Yorkers over age 11 watch movies on television, and 75% of these viewers feel that movies are as enjoyable, or more enjoyable than other TV programs.

Which movie programs do viewers watch?

Politz studied the five leading television movie programs in New York and found that over a four week period...

| Million Dollar Movie | 7,757,000 |
| Movie Program A      | 5,589,000 |
| Movie Program B      | 4,630,000 |
| Movie Program C      | 3,681,000 |
| Movie Program D      | 3,218,000 |

Which movie program has the best movies?

More people believe that Million Dollar Movie shows the best movie on television.

| % of all Movie Viewers in 4-weeks |
| Million Dollar Movie | 44.8% |
| Movie Program A      | 19.8% |
| Movie Program B      | 13.5% |
| Movie Program C      | 10.7% |
| Movie Program D      | 5.1% |

Politz also studied the scheduling of TV movies in order to determine if viewers find these programs convenient to watch. Million Dollar Movie topped the other movie programs with 82.5% of all viewers reporting that if there is a particular movie they want to see they find it convenient to watch on Million Dollar Movie.

A breakdown of movie viewers by categories such as income level, age level, residence, reveals that over a 4-week period Million Dollar Movie reaches more people in every single category than any other television movie program! This is truly domination in Depth.

You can get the full details of the Politz Study from WOR-TV's booklet: "N. Y. TV's 10 MILLION MOVIE VIEWERS" For your copy write: William P. Dix WOR-TV, 1440 Broadway, N.Y. 18, N.Y

Again WBRE-TV shows its outstanding leadership in Pennsylvania's Great Northeastern Wilkes-Barre-Scranton Market.

As you read this, men and machines are at work on the first phase of WBRE-TV's new home shown above. WBRE-TV's expansion comes shortly before its Fifth Anniversary...to be celebrated January 1, 1958.

Always First With The Finest in engineering know-how...programming...audience...coverage...and ratings, WBRE-TV's expanded facilities will provide the most modern studios and equipment for the presentation of "live" television shows...Black and White or COLOR!

No time to lose...get the very best in both Radio and Television in America's 24th market.
RESEARCH TOPS TV WORKSHOP

Research problems of television, including those of getting people to pay attention to research findings, occupied the television workshop at Advertising Research Foundation's third annual conference last Thursday in New York.

J. Eliasberg, CBS-TV research director, offered findings to dispense such "legends" as those based on the idea that television has become "too expensive" and those blaming inferior programming for the summer drop-off in viewing; W. M. Weilbacher, vice president of Sterling and McCormick, presented advanced standards for making cost-per-thousand computations more useful, and Bud Sherak, vice president of Kenyon & Eckhardt, appraised long-term planning in research.

In one of the question-and-answer developments after the formal presentations, a representative of the New York Bureau of Advertising got Mr. Weilbacher—who had dealt with cost-per-thousand in his talk—to agree that he would give "a highly qualified 'no'" to the use of cost-per-thousand in comparing different media.

This exchange prompted an interruption from the floor participant who was appalled from others in the audience when he told the group that cost-per-thousand cannot be disregarded in making inter-media comparisons. No matter how imperfect they are, he said, they are done—and people in advertising "can't fold our hands piously" in the face of the problem.

The meeting, held with Grey Adv. Vice President E. L. Deckinger presiding, was one of eight workshop or general sessions held during the one-day conference, for which Arthur Hull Hayes, president of CBS Radio, was program chairman.

Striking at "legends" that have grown up desiring to dispense with them, Mr. Eliasberg first tackled the one that says TV's expensiveness is driving advertising into alternate-week sponsorships. During the four-week period which ended last January, he acknowledged, 44 of 138 regularly scheduled network evening programs were sponsored on an alternate-week basis.

But, he noted, there are other reasons for alternate-week sponsorships. Assuming that an advertiser who sponsored at least two hours of evening network programming in that four-week period could have afforded a single half-hour every week, he showed that 85% of all evening network time was sponsored by advertisers who could have afforded every-week sponsorships. Moreover, he said, the percentage of hours sponsored by advertisers who may not have been able to afford every-week programs has remained "virtually constant" (from 14% of evening hours in 1953 to 17% in 1956) through the years when tv costs are suppose to have skyrocketed.

Mr. Eliasberg conceded that time costs on the average half-hour nighttime network program had risen from $10,150 in 1951 to $44,200 this year, while talent costs have gone from $10,400 to $33,900. But, he noted, "network lineups now consist of substantially more stations than they did then and, more important . . . each of these stations provides a much larger audience for the advertiser's program than it did in past years." Actually, he continued, the cost per thousand home hours of viewing has risen 9% since 1951—from $16.50 to $18.10.

In contrast, he added, newspapers' cost-per-unit has gone up 14% and magazines' has increased 16%.

He next tackled the "Sunday afternoon intellectual ghetto myth"—the notion that "good" programming is being sacrificed by being shown on Sundays. Actually, he pointed out, one program got an average of 16 million homes per average minute on a Sunday afternoon—while none of four "good" programs shown that same afternoon got more than 21% of that number. He showed further that "good" programs have been switched from Sunday afternoon to prime evening periods with little or no improvement—and sometimes lost—in ratings.

To answer the "legend" that the summer slump in listening wouldn't happen if networks and advertisers maintained their program standards, he outlined eight programs which used no summer repeats and had no summer-winter differences in production standards. Yet, the average rating for the May-September period dropped 23%. He went on:

"In 1956, we see that the typical American television family spent 13 hours 36 minutes with its set. January-June of last year, the family spent 38% less time watching summer programming. It sounds as though summer programming is really bad, doesn't it? What happens in May? I know of no program that goes off for the summer as early as May, or which starts running again in May. Nevertheless, the typical American television family spent only 3 hours 53 minutes with its television set [in May], a drop of 31% from the January high. Notice that 81% of the January drop has already been accounted for by May, and that the movie could have had nothing to do with it at all."

This point returned to haunt Mr. Eliasberg a little later when a participant arose to ask when the networks were going to revise their rate cards to reflect this summer slump. Mr. Eliasberg replied, however, that the "typical summer slump" is already recognized in rates and discounts for 52-week advertisers.

Mr. Weilbacher offered these standards for useful cost-per-thousand computations:

1. They should be based on people.
2. They should be based on people actually exposed to the advertising message—those who have been exposed directly in front of the set during the commercial.
3. So far as possible, they should be based on delivery of the advertising message to people who actually are prospects for the advertised brand.
4. One should be "warfy" of cost-per-thousand comparisons. Ad spending on advertising programs may be justified when marketing, merchandising and other specific considerations are taken into account; some cheap programs cannot be justified at all.
5. One should not make cost-per-thousand comparisons without being sure that he knows the true costs in all cases involved. Mr. Sherak described several long-term research problems . . . which grow out of the basic recommendations of the business: the size of the advertising budget, the media strategy, the creative platform, and the merchandising and promotion plans and outlined some of the work being done in the area of television research.

Many basic problems, he felt, could be solved by developing a "theoretical model which attempts to explain objectively how advertising works in producing sales." Among the elements in this model, he said, should be "advertising exposure and a number of psychological variables," including "product acceptance" cutting across "all the special departments in advertising research, integrating media research, copy research, consumer research and motivation research."

He continued: "I think we should invest our time and effort to try and improve our techniques of measuring these variables and try to refine the model with additional variables. . . . Finally, I think there is a desperate need for more basic research through ARF. Advertising researchers are just beginning to find out how to tackle some of our major problems systematically, and they need time, money, patience and the support of the ARF to do the job."

Other workshop sessions explored radio [see page 34], copy research, newspapers, magazines, motivation research and an all-media study showing that "there are no exclusive audiences."

At the luncheon, presided over by Mr. Hayes, Executive Committee Chairman Wallace H. Wulfek of William Esty Co.
stressed that "in this industry have a moral obligation to find ways of accurately measuring what a dollar spent in advertising produces in sales—and sold.

Dr. Wulfeck admonished, "means stressed ADVERTISERS & AGENCIES we tentative and quantitative factors able to years.

"It must be emphasized that all information is relative and changed in their proper frame of reference. It means we must find ways of understanding the whole complex of consumer dynamics as it plays its part in the rapidly changing economic development for the next few years."

In the afternoon session, BBDO made public for the first time a study of how Americans spend their leisure time and found them to be listening more, viewing more, reading more, and—in general—devoting "more time to more activities."

The report, outlined in an address by BBDO Research Vice President Ben Gedalia, was introduced by Ford Motor Co.'s institutional advertising head Ben R. Donaldson, who said:

"... Some of us have to be awakened by the rude alarm clock of progress. ... We must recognize that we live in a changing world. "He said that "the time is past" when a single broadcasting station could "with pride, to its audience and claim it as its prize possession," the BBDO study, noted Mr. Gedalia, even surprised the agency, for "we found ... rather quickly ... [that] people were not behaving quite as we had anticipated."

He declared that the survey spiked the oft-quoted myth that the more intelligent the person, the more media he read or viewed. Conversely, the survey also belied the contention that heavy media users are not as active—physically—as those people who use one or two media. In recent years, he went on, there has been a noticeable upsurge in viewing, listening, reading and other self-active activities among all strata of all sexes and of all income levels. But does all this "rushing around" imply that the advertising message may be lost in the maze of activity? No, says BBDO, which finds that "the heavy media users... are more likely to retain what they have seen. When the heavy media user reads or watches..."

Wulfeck Again Heads ARF Board; Slate of Directors Approved

Dr. W. H. Wulfeck, chairman of the executive committee of William Esty Co., was elected to his second consecutive one-year term as chairman of the board of Advertising Research Foundation last week. Ben R. Donaldson, director of institutional advertising, Ford Motor Co., was re-elected vice chairman and Arno H. Johnson, vice president of J. Walter Thompson Co., was re-elected treasurer. William A. Hart continues as president and A. W. Lehman continues as managing director, ARF reported.

New directors of ARF are William R. Farrell, director of advertising, Monsanto Chemical Co., and Donald S. Frost, vice president, Bristol-Myers Co., representing advertisers; Charles L. Rumrill, president-board chairman, Rumrill Co., and Dr. Lydon O. Brown, vice president in charge of media, merchandising and research, Dancer-Fitzgerald-Sample, representing agencies; Donald M. Harrison, president, Curtis Pub. Co., and John W. Hartman, president, Hill Bros. publications, representing media.

Previously elected advertiser directors are Rex M. Budd, director of advertising, Campbell Soup Co.; Frank W. Mansfield, director of marketing research, Sylvania Electric Products Inc.; J. Ward Maurer, vice president-advertising, Wildroot Co., and Paul B. West, president, Assn. of National Advertisers.

Continuing as advertising agency directors are Charles A. Pooler, senior vice president, Benton & Bowles; Vincent R. Bliss, president, Earle Ludlig & Co. and Sherwood Wixom, executive vice president, Fletcher D. Richards Inc.; and Frederic R. Gamble, president, American Assn. of Advertising Agencies.

ARF directors representing media also include Arthur Hull Hayes, president, CBS Radio; John C. Sterling, chairman of the board, This Week magazine; Andrew Heiskell, publisher, Life magazine; Walter C. Kurz, advertising manager, Chicago Tribune; David C. Adams, executive vice president, NBC, and William B. Carr, advertising director, McCall's.

Bristol-Myers Acquires Grove Labs in Merger

Bristol-Myers Co., New York, which by Dec. 31 expects to effect close to $100 million annual sales, and Grove Labs, St. Louis, which hopes to rake up $13.5 million sales by year's end, have culminated six months of secret talks and will merge pending Grove stockholder approval.

Joint announcement of the merger was made last week by Lee H. Bristol, B-M president, and James H. Groves, Grove president. Bristol-Myers, which has purchased the total business and assets of Grove through a stock-and-cash deal the terms of which were not disclosed, will run Grove as a wholly-owned subsidiary. It was understood the merger already has been approved by B-M's 15,000 stockholders. Grove, a family-owned firm, has approximately 100 shareholders. They are slated to meet in January at St. Louis.

According to B-M officials, no changes are contemplated either in Grove management, its sales force or its multi-agency structure. A helluvaheither broadcaster, adver-

Boroquine, a $1 million account that in 1956 switched to Gardner Adv., St. Louis, from Benton & Bowles, New York; NoDoz Awakener and Shut-Eye sleeping formula, the former a radio network adver-

Bristol-Myers' ad budget is considerably higher than Grove's. Last year, it spent approximately $21 million, of which over $10 million was in television, $9 million in radio, the balance in figure agencies include BBDO; Doherty, Clifford, Steers & Shenfield; Young & Rubicam, and two other agencies servicing ethical advertising. The B-M products most often mentioned on the air include Bufferin, Ban, Sal Hepatica, Vitalis, Mum, Theradan, Ipana and Minti-Rub. Among tv the radio stations now involved with B-M are CBS-TV's Alfred Hirschco Presents and Playhouse 90 and ABC-TV's Mickey Mouse Club.

Bristol-Myers also is quite active in daytime network radio and makes considerable use of spot radio and tv.

The acquisition of Grove follows by over a year B-M's division of two divisions, neither of which manufactured products bearing "a logical relationship between the present and indicated future lines" of the products and "the basic business of the company." A year ago last July Bristol-Myers sold to Sherwin-Williams Co., paint and brush manufacturers, its Rubberset Co. (shaving brushes) and that December, effected a stock deal with American Can Co. for Canco's acquisition of B-M's Sun Tube Corp. The corporation now has three divisions—Bristol-Myers Products Div., Bristol Labs Inc. and the ethical drug division. Grove Labs may eventually be run as the fourth.

Broadcasters to Attend Meets on D'Arcy Operations

Radio-tv station representatives will be invited to attend the first of a series of media-relations meetings scheduled by D'Arcy Adv. Co., St. Louis, and announced last week by its president, Harry W. Chesley Jr.

The purpose of the program, under which D'Arcy will set aside one day each month for a small group of visiting media representatives or clients to person-alize agency-media relations and to familiarize media people with D'Arcy operations. Brief talks by agency department heads and a tour of the company are included.

Radio-tv station representatives will kick off the series Nov. 20, to be followed by representatives of other media, including newspapers, magazines, and transportation firms. Agency talks will explain D'Arcy's integrated operations, from conception of a product through all advertising and marketing stages to final sales at the consumer level. Special slide film will be utilized as a prelude to the talks by creative radio-tv, media, research, merchandising, copy, public relations and marketing heads.
MEASURING EDSEL'S TV IMPACT

- Two surveys draw like conclusions on public reaction
- Push-button gear shift stands out as most-remembered

Two approaches to the commercial impact of a network tv program were demonstrated in New York last week as the new Edsel and its tv introduction (The Edsel Show, a one-hour, one-shot program starring Bing Crosby and Frank Sinatra on CBS-TV Oct. 13) got a thorough statistical going-over.

COMMERCIAL REACTION, AUDIENCE ATTITUDES

A survey by the Pulse Inc. profiled not only the reaction of the audience to the commercials on the Crosy-Sinatra extravaganza but also audience attitudes on the Edsel itself—the advantages or disadvantages of the newly-introduced car, its cost, its prospects, its potential customers and how it stacks up against the cars that viewers are now driving.

In the commercials, the thing that stuck most in viewers' minds was the fact that the Edsel's push-button gear shift is on the steering wheel. A total of 23% noted this feature. Next in remembrance, with 9.2%, was the fact that the Edsel line offers a number of different models. Third most impressive feature, noted by 4.9%, was not related to the car itself but to the commercials—the feeling that the sales messages were not too numerous, in good taste and "not thrown at you."

Next in line were attractiveness of the Edsel and recollections of its styling (4.6% each), and the push button for the trunk (4.4%).

At the other end of the scale—some 25 features were covered—32.9% said they remembered "nothing particular," and 3.7% found the commercials "stupid," "repeated" or "tense."

The answers were broken down between "car owners" and "non-car owners," and often commercial remembrance was higher among non-owners, on a percentage basis, than among owners.

Comparing the Edsel to their present cars, 4.7% thought the Edsel "much better" and 27.7% thought it "better"—while another 27.7% thought it "not as good.

A total of 75% felt it "has to be better" because it's a 1958 model; 6.7% thought one was as good as the other, and 21.6% felt they didn't know.

Almost half (49.9%) thought the Edsel has advantages over other cars—push button driving, modern design and styling, and advanced controls and other improvements were named most often, in that order—while 32.9% felt it has no advantages and 17.2% had no opinion. A total of 22.8% felt it hasn't improved to their liking, dislike of controls etc., and a feeling that it would not be economical were most frequently mentioned—but 60.1% saw no
disadvantages and 17% had no opinion.

Among the car owners, 10.4% said they thought they would choose an Edsel for their next car; 51.5% said they would not, and 38.1% didn't know. Of those who thought their next car would be an Edsel, 15.7% said they were influenced by their liking for it and the fact it was made by Ford; 13.7% because they liked the styles and models, and 11.8% because they liked the trim and other features. A total of 17.6% gave no particular reason.

Among those not planning to make their next car an Edsel, chief reason (cited by 25.3%) was the feeling that it was priced beyond their reach.

Asked for their views on Edsel's "prospects for the future," owners and non-owners followed generally similar patterns. Of the total, 17.2% thought the prospects were "excellent, very good"; 41.6% thought them "good"; 12.3% voted "fair, okay, all right"; 22.1% had no opinion; 6% regarded the outlook "poor" and 0.9% called it "very poor, terrible."

The kind of person apt to buy an Edsel, in the opinion of the greatest number they felt about Ford Motor Co., the sponsor. More than half (53%) said they were "more favorable" than before; 1.5% said they were "less favorable," and 45.5% had "no particular reaction."

Pulse spokesmen said researchers called on 200 persons in each of the 20 markets covered and interviewed every third person who had seen the program, getting complete answers from 587 (491 car owners, 96 non-owners).

SECOND SURVEY USES NEW DEPTH TECHNIQUE

The research file on the Edsel was considerably fattened a few days after issuance of the Pulse survey with the release of research conducted by Qualitative Research Inc. under the direction of the Television Bureau of Advertising.

In the research, Dr. Leon Arons, TvB's research director, noted that a "special technique" was developed. Four groups were interviewed via the telephone recall method. Used were "matching" groups of viewers and non-viewers of the program. In each case of viewer and non-viewer, one group (the matched) was interviewed before the show and the other immediately after the show.

According to Dr. Arons, "Each group consisted of next door neighbors of the other group. We could expect that the non-

OBJECT of all the commercial research reported by the Pulse and Qualitative Research Inc. is the Edsel itself. The picture at right shows a closeup of the push-button gearshift featured in one commercial on the show. This proved to be the most-remembered feature of the Edsel commercials.
Beech-Nut Life Savers, Inc.
and its agency,
Young and Rubicam,
are Sold on Spot as a
basic advertising medium.

Following its merger with Life Savers, Beech-Nut Gur adopted an aggressive new sales policy, aimed at overcoming distribution problems and at making Beech-Nut Gum the leading national brand. The method: a giant initial build-up in America's top 50 markets. The medium SPOT RADIO.

Using 63% of its total advertising allotment, Beech-Nut Gum is blanketing the top 50 markets with a 10-second spot campaign, ranging from 30 announcements per week to 115 per week in New York City. The schedule covers radio's high-traffic periods, Monday through Friday, 7-11 a.m. and 4-6 p.m., with emphasis on the latter part of the week, when most family marketing is done.

Jim Parker, Advertising Manager, tells why SPO
Beech-Nut Gum is

SOLD ON SPOT

Radio figures large in Beech-Nut Gum's future plans: Using those regions where its distribution is already established as a springboard, Beech-Nut Gum is making national splash. Only Spot Radio gives the frequency required for such a tremendous job at such reasonable cost. To its extensive and continuing schedule in the top 10 markets, and to NBC Spot Sales' radio stations in every market where they play a part, goes much of the credit for the overwhelming success of the Beech-Nut Gum campaign.

Whatever you're aiming at a specific region, or trying to hit all the top markets, you'll find that you can really all your advertising shots when you use Spot... especially on these leadership stations, represented by...
to 9.6% of those non-viewers interviewed before the program.

In determining respondents' attention to specific features in the commercials (there were three commercials on the program—one, a broad sweep of the model, two, of the whole Edsel line, and three, on Edsel features), 51.8% of the viewers gave the correct information with respect to the push-button transmission compared to 21.8% of their neighbors interviewed before the program.

In measuring attitude toward the Edsel, 67.8% of program viewers gave favorable ratings, while 39.1% of their neighbors interviewed before the show were favorable. For all persons interviewed, this "in favor attitude" rose from 40.8% of persons interviewed before to 54.4% interviewed after the telecast. No significant differences in attitude were recorded of non-viewers to those interviewed before the program.

According to Tvb, the increase in favorable ratings "seemed to come largely from responses of the 9.7% of persons interviewed after the Edsel before the telecast. In different ratings of the car were given by 28.2% of program viewers, a drop of 25.8% from the level of those interviewed in advance (54%)."

"As seen by Norman E. Cash, Tvb president, this new technique measures the first point of advertising—the public's opinion of a product." It means, Mr. Cash said, that "last advertisers have a technique for measuring the basic effectiveness of their advertising." He indicated the same technique could be applied to other media. The results, he continued, show tv "increasing the consumer knowledge and, more important, the favorable attitude toward the product.

"... We are not measuring audience size, we are measuring the depth of impression television created in each viewer."

Thus, he said, the survey found "marked increases in the awareness of viewers to specific selling features" of the Edsel after just one tv exposure.

Tvb admitted it might foster other similar surveys by Qualitative Research Inc. (an independent firm), but emphasized that it hoped the results of the study on the Edsel would encourage others to employ the technique developed. Dr. Arons acknowledged that Ford had "cooperated" with the survey but was "semi-surprised" at the results. Foote, Cone & Belding, Edsel's agency, assisted by providing field people with scripts of the commercials. People were not asked to "rate" the program itself.

AAA Meeting Plans To Scrutinize Tv Ads

The broadcast media—particularly the tv commercial—will come under professional scrutiny Tuesday and Wednesday when the American Assn. of Advertising Agencies holds its annual eastern conference in New York at the Roosevelt Hotel.

Seven workshops—on research, radio-tv commercials, media buying, marketing, account management and two on print—as well as a concluding "look-ahead meeting" on Wednesday will highlight the conference.

The "look-ahead meeting" will feature a talk on serving clients by Raymond O. Mithun, president-chairman of the board, Campbell-Mithun, Minneapolis; a speech on the agency's creative function by Eugene Harrington, president of Fletcher D. Richards Inc., New York; and a treatment of the management's view from AAAA Board Chairman Melvin Broby, senior vice president, Needham, Louis & Broby, Chicago. This session will be presided over by Brown Bothe, executive vice president, Benton & Bowles, New York, and chairman of the AAAA's eastern region.

Among agenda highlights:

Research workshop, Tuesday afternoon: "How close can research come to measuring the sales effectiveness of advertising?" with three speakers taking different approaches; the general—Wroe Alderson, partner of Alderson & Sessions; the qualitative—Paul Gerhold, vice president in charge of media research at Foote, Cone & Belding, and the quantitative—John DeWolf, vice president and director of research, G. M. Basford Co. Peter Langhoff, Young & Rubicam will preside.

Tv-radio commercials workshop, Tuesday afternoon: "Here comes video tape," by Ross H. Snyder, manager of special products division, Ampex; "new techniques in tv film commercials" by Film Producer Assn. of New York and narrated by Bert Hecht of WNEW's technical services and in commis- sion an "TV-writer, "probe, critic, commercials" with Marie Torre, syndicated tv columnist of New York Herald-Tribune, and Mike Wallace, ABC-TV commentator; "the new sound of radio," by Kenney Sweeney, president of Radio Advertising Bureau, and "the seven lively arts of television," a special presentation by Cunningham & Walsh. Elizabeth Pike, vice president, Benton & Bowles, will preside over the commercials workshop.

Media buying workshop, Wednesday morning: "How to plan media strategy." Three media directors—Robert H. Boulware, associate media director, Bryan Houston; Newman F. McEvoy, senior vice president and director, Cunningham & Walsh, and G. Maxwell Ule, senior vice president, Kenyon & Eckhardt—will analyze a hypothetical advertising problem and recommend media strategy.

The marketing workshop also is slated for Wednesday morning with sessions on account management, print creative functions and print productions scheduled for Wednesday afternoon.

Merger Forms New L. A. Agency

The merger of Atherton Advertising Agency and Mogge-Privett Inc., both Los Angeles, into Atherton-Mogge-Privett Inc., will occur Dec. 1, according to a joint announcement by Norton W. Mogge, president of Mogge-Privett, who also will be president of the new agency, and Alfred A. Atherton, owner of Atherton, will be executive vice president of the new A-M-P Inc. Other officers of the new firm include John A. Privett, vice president and secretary-treasurer; James Lothian, vice president, and Milton Zolotow, vice president. Headquarters of the new agency will be at 8467 Everly Blvd., present address of Atherton Advertising Agency.
Can Newspapers Provide Effective Coverage of the $2 Billion WSM Police?

Here are the facts.
There are 14 daily newspapers in the area. They have a combined circulation (ignoring duplication) of 318,542.
One 600 line insertion (approximately ¼ page) in these 14 papers costs $894.00.

Within this same area, WSM delivers a comparable unduplicated daytime audience plus an outside bonus audience even larger than that for which you pay. And on WSM you can achieve real penetration at amazingly low cost.

On WSM, $894.00 buys
- 24 one minute announcements in a week,
- or a choice quarter hour in the Grand Ole Opry for 3 weeks,
- or a 15 minute morning newscast 5 days weekly, for 3 weeks.

Ask Bob Cooper, or any Blair man for the facts and figures.

There is a difference... it's WSM radio

NETWORK, SPOT TV UP 8.4% OVER '56

TvB-Rorabaugh: nine-month spot total $329,899,000, up $39,243,000

- Reports of slackness in television buying were belied last week by computations showing gross expenditures in network and spot television for the first nine months of 1957 ran more than $54 million (about 8.4%) ahead of the same period in 1956. Nine-month totals: $697,975,607 this year, $643,617,824 last.

Television Bureau of Advertising's quarterly report on spot tv spending brought the spot total for January-through-September 1957 to at least $328,899,000, while Publishers Information Bureau computed gross expenditures in network television for the same period at $369,076,607 [At Deadline, Nov. 11]. The totals at the end of three quarters in 1956 were $289,656,000 in spot and $353,961,824 in network [Advertisers & Agencies, Nov. 19, 1956].

TvB, whose spot figures are compiled for it by N. C. Rorabaugh Co., estimated third-quarter spot television expenditures at $93,094,000 for the 325 stations reporting.

TvB also noted that new reporting procedures had been inaugurated with the third-quarter report, designed for greater accuracy and completeness. All reporting now is being done on a full 13-week basis each quarter, making it unnecessary to project quarterly totals from sample weeks. Norman E. Cash, TvB president, complimented both the cooperating stations and Rorabaugh "for their effort and care in making such information available."

Mr. Cash said that "while this third quarter report [on spot tv] reflects the normal seasonal drop in all media, it shows expenditures of almost $10 million over the same quarter last year and an increase for the nine-month period of over $39 million. An analysis of 270 stations reporting, common to both periods (third quarter, 1956 and 1957), shows a 13% increase in gross dollars for the current period."

The third-quarter seasonal drop is reflected in a comparison of third and second quarter spot tv totals: in the second quarter the total was $118,870,000 while in the third it came to the $93 million-plus figure.

Mr. Cash singled out household cleaners, cleansers, polishes and waxes as the major product category showing the greatest gain in tv usage during the third quarter—up from $592,000 to $1,099,000 for an increase of 85.6%. Household laundry products rose 62% from $3,284,000 to $5,321,000; cosmetics and toiletries 49.4% from $8,950,000 to $13,367,000; automotive 36.9% from $1,827,000 to $2,501,000; gasoline and lubricants 29.7% from $3,908,000 to $5,070,000, and ale, beer and wine 20.6% from $8,463,000 to $10,211,000.

Nine newcomers were noted in the ranks of third-quarter top 100 spot tv spenders: Atlantic Refining, Ex-Lax, General Cigar, Harrison Labs, Kroger Co., National Brewing, Regal Pale Brewing, George Wiedemann Brewing, and J. B. Williams Co. A number of others expanded their spot tv usage in the quarter, among them Continental Baking, Miles Labs, Adell Chemical, General Mills, Bristol-Myers, Ford Motors, and Gillette.

WHAT THE TOP 100 SPENT FOR SPOT TV

THIRD QUARTER 1957

1. PROCTOR & GAMBLE $7,306,600

THE NATION'S VOICE

Politz Facts Point Up Strategy of Using Leading Stations

Almost everyone is included in radio's huge daily audience. Radio is where your customers are. Whenever they may be, radio follows them, reaching their minds while their hands are busy. Only radio can be...and is...the constant companion of the American people.

This powerful advertising factor, unique to radio, is dramatically documented by a continuing series of Alfred Politz Research projects. And it is coupled with the significant finding that the radio audience is highly selective in its choice of stations. Together, these confirmed facts provide the basis of a potent advertising strategy called The Nation's Voice.

This strategy uses just 48 selected stations of the 3000 now broadcasting. Located in key marketing areas, these stations reach the greatest number of adults. And they command, to an extraordinary degree, the trust and confidence of their listeners—having earned their respect through outstanding broadcasting standards. The impact is personal. The loyalty is deep.

These facts have been confirmed again and again. There are seven separate Politz studies now available. Five of these present complete data for divergent markets served by individual great stations. The sixth, recently released, develops complete data for Upstate New York—served by four great stations. Now the latest study, conducted nationwide, adds new detailed information both on radio and on the reach and value of The Nation's Voice strategy.

This strategy is effective for budgets small and large. Whatever you are selling and whatever the appropriation, it will pay you to investigate the sales power of The Nation's Voice. Just call the nearest Christal office.

FIRST ON EVERY LIST ARE THESE 18 GREAT RADIO STATIONS

WBAL Baltimore
WAPI Birmingham

Parker Bros. Allocs $125,000
To Make 'Careers' a Success

Parker Bros. Inc., Salem, Mass., is backing up a new entry in the game market with a $125,000 advertising budget—reported to be the largest single advertising budget for a game in the history of the toy industry. Approximately $108,000 has been set aside for radio-TV.

The game is called "Careers" and sells for $3. According to Parker Bros. President Robert B. M. Barton, "Careers is the biggest thing since we introduced 'Monopoly' in the winter of 1935-36."

Approximately $38,000 was spent to introduce the game last winter in the greater Chicago market—$20,000 in radio, $18,000 in tv. The remaining $70,000 in broadcast allocations will be spent between now and Christmas, according to President Barton and the largest single advertising budget for a game in the history of the toy industry. Approximately $108,000 has been set aside for radio-TV.

Transcontinent Television Corporation is proud to announce the acquisition of two major broadcast properties, WGR-TV and WGR Radio in Buffalo, the nation's 14th market.

welcome...

Serving over a million people in the 3 billion dollar Western New York State area, plus a vast Canadian audience, and affiliated with the ABC Television and Radio Networks, these distinguished stations have an outstanding record of service to the community and to the advertiser. Transcontinent, with its policy of service, welcomes these additions to its family.
includes $2,639,800 for oranges; $1,233,900 for grapefruit, and $126,300 for tangerines. There are campaigns for fresh, canned, frozen and chilled products.

The Citrus Commission, holding its November meeting, was told that the incidence of colds and flu has greatly stimulated sales of processed citrus products. A special flu and cold campaign is a part of the winter advertising program.

North Adv. Names Feldman To Head West Coast Office
Edward H. Feldman, formerly vice president of Desilu Productions, has been appointed to head North Adv. Inc.'s office in Beverly Hills, Calif., it was announced Friday by Don Paul Nathanson, North president. He will be responsible for production of North broadcasting properties originating on the West Coast.

Mr. Feldman was vice president in charge of all commercial business for Desilu, including agency contracts and programming. Previously, he headed Biow Co.'s West Coast tv operations, working on such properties as I Love Lucy, Rocket Squad and My Little Margie. He also produced shows featuring Milton Berle, Eddie Cantor, Garry Moore and Jack Paar and produced and directed $64,000 Question and Take It or Leave It.

Mr. Feldman succeeds Walter Hiller, who left North to join MCA on the West Coast. Among tv programs originating for North clients in Hollywood are You Bet Your Life, People Are Funny, House Party and Queen for a Day.

Stisser, McEwen Get Top Posts At Hooper Inc. as Knife Retires
Appointment of Frank G. Stisser Jr. as president and W. Bruce McEwen as executive vice president of C. E. Hooper Inc., New York, is to be announced today (Monday) by retiring President and Board Chairman James L. Knipe. Both Hooper veterans, Mr. Stisser in radio research and Mr. McEwen in market research.

Mr. Knipe plans to devote full time to his personal business interests and to "an occasional consulting assignment in the field of finance or general economic analysis." He continues as a Hooper stockholder.

Stevens to Zenith Ad Manager
The appointment of Robert M. Stevens, former McCann-Erickson account executive, as advertising manager of Zenith Radio Corp. was announced Friday by Erik Isgrig, Zenith vice president in charge of advertising. Prior to joining M-E in 1955, Mr. Stevens was successively assistant advertising manager, sales manager and finally advertising manager of Servel Inc. over a 10-year period.

Baltimore Mayor Thomas D'Alesandro's tactical move last Thursday in reducing from 7½% to 4% the gross sales tax planned for local advertising media [Lead Story, Nov. 11] has done little to placate proponents of the measure. In the wake of this latest announcement, media spokesmen pointed to the difference that the proposed amount of tax does nothing to undo the basic wrongfulness of the "discriminatory" plan.

"A compromise measure does not make it a better tax in any sense," Wilbur Van-Sant of Van Sant & Dugdale, declared late Thursday. The proponents and opponents of the measure, declared that the tax is still a "bad" one and that he "vigorously opposed" its adoption.

Joseph Katz, Joseph Katz Co., Baltimore agency, attacked the move as being "based on the notion that the city administration thought was good politics for their side." The reduction, he said, is "like cutting down on the water in fighting a big fire. If all the tax changes go into effect, then the name of Baltimore should be changed to The Deserted Village—for these are village taxes.

"Nevertheless, it appeared last week that the latest move may have succeeded in swaying some members of the city council, which must approve the measure, to the administration's point of view. Prior to the reduction—which cuts the advertising media gross sales tax to 4% but does not effect the cable television proposal, a 2½% levy on the gross of all advertising media, six of the 21 councilmen had openly expressed opposition to the plan. The latest strategy of Mayor D'Alesandro and his budget and finance committee only served to deepen pessimism among media observers in their efforts to sidetrack the tax.

One thing is sure: the tax, if enacted, will be fought in the courts.

A fever reducing on the anti-tax sentiment was offered last Wednesday at the public hearing of the Baltimore City Council when proponents and opponents of the measure had their say. The proponents' forces consisted of just three city spokesmen who explained why the City of Baltimore needs an additional $17.5 million in its annual budget and attempted to prove the legality of such a tax.

The opposition numbered more than two scores of speakers from agencies, radio, tv, traffic managers, labor unions and citizens groups, the majority of whom were crammed into the last hour of the 6½-hour-long proceeding.

The first three hours of the proceeding were telecast in rotation by WJZ-TV, WMAR-TV and WBAL-TV, Baltimore's three tv stations. When it became apparent the hearings would run well overtime, WMAR-TV and WBAL-TV each added one hour's coverage.

Observers noted that practically all of the administration's arguments were presented within the telecast hours, while much of opposition viewpoint—including statements on behalf of the agencies and the radio-television industry—was presented after the telecast.

Agencies Katz was among those who took a dim view of the conduct of the council's proceeding.

"It wasn't a hearing," he charged, "it was an inquisition. The [budget finance] committee did all the talking. Speakers for the other side were interrupted and insulted. The hearing was loaded. It was a field day for the mayor and his council."

Judge Charles A. Benton opened the proceedings by devoting close to an hour to an explanation of reasons for a city budget increase of $17.5 million. Deputy Solicitor Hugo A. Ricciuti next defended the legality of the proposed taxes and assured news media of "deliberately disseminating" false information "to create the impression that the city is blazing a vicious trail" by proposing a tax never imposed elsewhere.

And before the telecast time was up, Aaron Baer, an assistant city solicitor, leveled an attack on what he described as big money interests without regard for "the little man." He declared that opposition to the tax proposals came from such big businesses as the Ford Motor Co. and R. J. Reynolds Tobacco Co. He charged that labor leaders who testified against the tax were "cat's paws" who had been "sold a bad bill of goods."

Judge Sherbow further testified that Baltimore industries, such as its breweries, would be placed in an unfair competitive position with out-of-town firms that could resort to radio-tv network and national magazine advertising without paying the advertising tax.

Shelton Earp, general manager and part owner of WBDM Baltimore, appearing on behalf of the Citizens Committee and who also serves as counsel for the Baltimore News-Post and its WBAL-AM-TV, opened the opposition testimony by charging that the administration spokesman in the preceding 1½ hours had failed to show why this particular type of taxation was wanted.

Judge Sherbow further testified that Baltimore industries, such as its breweries, would be placed in an unfair competitive position with out-of-town firms that could resort to radio-television network and national magazine advertising without paying the advertising tax.
More people listen to WTOP RADIO than any other radio station in the Washington, D.C. area*

HELP YOURSELF TO NEW BUSINESS, NEW REVENUE, WITH RCA THESAURUS LIBRARY COMMERCIAL FEATURES

RCA THESAURUS LIBRARY SERVICE: The all-inclusive recorded library designed to give you a wide variety of sure-fire commercial features for making your station more attractive and effective for advertisers! Here's what you get:

1. SINGING COMMERCIAL JINGLES: Attention-getting lead-ins for your commercials, assuring sponsors more effective advertising. Over 2,000 of these for more than 70 local sponsor classifications, plus shopping, time, weather, station break and holiday jingles. A bonus for your advertisers.

2. "SALES BOOSTER" CAMPAIGNS: Series of fascinating recorded teaser features that attract greater sales for your sponsors. Jingle lead-in capture interest, hold audience through commercial, then "pay-off" for sponsor and station. Now includes five saturation announcements: "Double Talk," "What's the Meaning of This Name," "Sound Advice," "Little Known Facts," and "Impersonations."

3. SHOW THEMES: To introduce local commercial shows, like disc jockey, news, sports, home and farm, etc. Show Themes give your station a personality.

4. SHOW STOPPERS: Adds a staff of 60 voices to your station! Library of over 360 recorded comic situations and lead-ins to commercials. Recordings with scripts that work your DJ's right into the act. Completely catalogued for easy daily use.

5. SHOP-AT-THE-STORE-WITH-THE-MIKE-ON-THE-DOOR Merchandising Service for Sponsors: RCA Thesaurus' famous copyrighted promotion package that regularly brings stations $5,000 to $20,000 extra income annually. Operating manual gives step-by-step guide to greater profits. Test-proven and used by more than 400 stations, 20,000 merchants. Includes jingles, voice tracks by big-name stars, decals with your call letters for stores, and other features. Sells products ... sells sponsors ... promotes your call letters.

6. ECHO ATTENTION-GETTERS: New, clever, uniquely effective device! Words such as "Startling," "Bargains," "Big Sales" ... heard first in clear, then rapidly repeated on echo. A wonderful audience-alerter to lead into commercials.

7. COMMERCIAL SOUND EFFECTS: Over 300 special sound effects, to add new impact to commercials. Now available to hypo sales in 35 different sponsor classifications.

8. MONTHLY RELEASES of new commercial features. PLUS ... monthly marketing bulletins, catalogues, and brochures to help you sell sponsors.

RCA Thesaurus offers a complete service including: The Lawrence Welk Show; Paul Whiteman's "I Remember When"; Over 5000 Musical Selections; Weekly Continuity Service; and Recorded Holiday Programs. Get the whole story of low-cost, profit-making RCA Thesaurus today! Call or write...

BUSINESS BRIEFLY

KEEPS GOING • American Tobacco Co. (Tareyton Filters, N. Y.), through Lawrence C. Gumbinner Adv., N. Y., renewing "some" of its tv markets effective Nov. 18 and Dec. 28.

SKOL • Bowey's Inc. (egg-nog), Chicago, will use two weeks of daily participation on Panorama Pacific (Mon.-Fri. 7-9 a.m. PST) on 9-station CTPN hookup, starting Dec. 16. Sorenson Advertising Co., Chicago, is agency.

SPECIAL NEWS • Rexall Drug Co., Los Angeles, will sponsor its second special tv show Hansel and Gretel on NBC-TV next spring. No date is set. Show, like firm's first special, Pinocchio, will be produced by Talent Assc. BBDO, N. Y., is agency.

GODFREY FANS • General Electric Co. (Colorama lamps), Schenectady, N. Y., planning to sponsor portion of Arthur Godfrey on CBS Radio, effective mid-January. BBDO, N. Y., is agency.

BROKEN RECORD • Record racked up at NBC-TV Nov. 8 in total sales on participation programs with Tonight reportedly garnering $3.1 million in a single day. Bulk of business came from new buys which started last week by Bufferin (Y&R, N. Y.), Ipana (Y&R) and Webcor (John W. Shaw Adv., Chicago), with extension beginning in January ordered by Polairod (Doyle Dane Bernbach, N. Y.).

Toni Shifts Four Products Involving $4.6 Million Outlay

The Toni Div. of Gillette Co. has re-signed among three agencies four products involving billings, present and potential, of $4.6 million, with a substantial amount in broadcast media. The agency changes become effective Jan. 1.

The three-way realignment calls for the transfer of Prom permanent from North Adv. Inc. to Tatham-Laird; Hush deodorant from T-L to North; Bobbi pin curl permanent T-L to Clinton E. Frank, and a new unidentified product from Frank to T-L.

Billings of the three identified products combined reportedly exceed $3 million, with both Prom and Bobbi heavily active in broadcast media. Hush has been introduced nationally, but its billings are well under $1 million.

Toni's new product, which Tatham-Laird inherits from Clinton E. Frank, is reported to represent a potential of $3 million in billings, though its outlays at present are about $1 million. Toni places an estimated $9.5 million of its estimated $13 million advertising budget in single media, with several network tv and radio properties.

PACIFIC Gas & Electric, San Francisco, described by its agency, BBDO, as America's largest utility, has picked The Big Story film series to supplant its O. Henry Playhouse in eight California markets. Arranging for the half-hour show are (1 to r) Barney McKell, west coast sales manager for Official Films; Robert R. Gros, vice president of Pacific Gas & Electric, and Harry Burton, account group supervisor for BBDO, San Francisco.

BEDDING BUY • The Spring Air Co. (bedding equipment), Chicago, will use broadcast media to promote a contest starting Jan. 3. During the 60-day sales period for the firm's "Modern Model 70," mattress, 33 Spring Air plants around the country will buy radio-tv spot announcements in local areas. In addition, Spring Air will use promotion on CBS' Robert Q. Lewis, Galen Drake and Amos 'n' Andy shows and on MBS' Gabriel Heather program. Theme of the campaign is "Turn Back the Clock to the Old-Fashioned Price." Agency: Gourfain-Loeff Inc., Chicago.

Woolworth to Drop CBS 'Hour'

CBS Radio began shopping last week for another advertiser to pick up the Sunday afternoon Woolworth Hour package featuring the Percy Faith Orchestra and guest stars. F. W. Woolworth Co. will let its contract expire Dec. 28 despite the sponsor's satisfaction with program results according to its agency, Lynn Baker Inc., New York. The agency explained Woolworth is off on a new promotion "kick" involving newspapers and hence is slashing its radio budget. Just last spring, the sponsor had cited its satisfaction with success of the Woolworth Hour [ADVERTISERS & AGENCIES, April 29].

Ayer Timebuyers to Philadelphia

N. W. Ayer & Son, Philadelphia, announced last week that the timebuying division of the agency, now located in New York, will move to Philadelphia headquar-

At the end of the day...more profits

When your programming is built around AP news

News is prime listening material every hour of the day. AP news helps you make the most of that fact...its authoritative, complete coverage of regional, national and world-wide events keeps your audience listening and your sponsors satisfied. AP brings your station the Added Prestige that means Added Profits at the end of each day.

THE ASSOCIATED PRESS
50 Rockefeller Plaza
New York 20, N. Y.
We have been forging ahead ever since the day when as a group of Working Partners we cast our lots together to start a representative organization which would provide a mature, sales minded and distinctively personalized service to radio and television stations and buyers of time. In offering our services then, we promised as Working Partners, that we would "always send a man to do a man's job!" We are still working partners! That promise is still being kept today!
NTA TO BUY CONTROL OF AAP CORP.

- Purchase price for stock estimated at $7.5 million
- Involved is big library of features, shorts, 'Popeye'

National Telefilm Assoc., New York, last week accelerated its already-rapid expansion program with an announcement that the company has contracted to acquire "more than 50%" of the stock outstanding in Associated Artists Productions Corp., New York, a forming tv distributor, and that NTA plans to purchase the balance of AAP stock. The purchase price for the stock was not specified but is estimated at $7.5 million.

When this transaction is concluded, NTA will obtain the majority interest in a company that owns the Warner Bros. library of more than 800 feature films plus 1,500 short subjects, and also owns the popular "Popeye" cartoons. This thrust by NTA is the latest in a series of movements in the past 18 months that has solidified the company's position as a dominant distributor of feature films in the industry and has transformed NTA into a multifaceted operation covering network activity (NTA Film Network), station management (purchases of KMGM-TV Minneapolis, WAAAT-AM-FM and WATV [TV] Newark, all subject to FCC approval), theatrical film distribution (NTA Pictures Inc.) and co-production with Desilu and 20th Century-Fox Corp., requiring NTA to pay Fox $30 million for about 450 feature films, deliverable over a five-year period. As part of the transaction, Fox acquired 50% of the NTA Film Network. The film network began operations in the fall of 1956 but has not yet achieved the ambitious blueprint it set for itself. It programs 1½ hours of feature films weekly under the name of Premiere Performance and also is presenting four Shirley Temple features this fall and winter under the title, Holiday Specials. NTA executives insist, however, they will expand the programming by next spring and attempt some live telecasting of sports and special events.

The NTA already has bought KMGM-TV Minneapolis and WAAT-AM-FM and WATV (TV) Newark, the sales awaiting FCC approval. The company has gone on record as intending to purchase the full complement of radio and tv stations allowed by the Commission.

NTA's gross sales for the fiscal year ended last July (still unreleased) are expected to reach about $17 million as compared with about $2 million in the year ended July 1955, according to Mr. Unger. NTA officials declined to reveal last week the source of financing for this latest venture, except to say it comes "from internal and external sources."

It is reported that internal friction within Associated Artists weighed heavily in the decision of the majority stockholders to sell their shares in the company. The Warner library was purchased by NTA in March 1956 for about $21 million and later that year bought the "Popeye" cartoons from Paramount Pictures for about $2.5 million.

What's Behind AAP's Sale? Policy Split Hints

There was no evidence last week to indicate Associated Artists Productions Corp. had other than a bright financial future when National Telefilm Assoc. stepped into the picture as a proposed buyer of 50% of AAP and eventually the whole company. Why, then, AAP's apparent decision to sell? AAP's board of directors was closed Thursday in a day-long meeting, but this much was indicated: AAP had been torn recently by two factions. One, as represented by Board Chairman Louis Chesler and director Maxwell Goldhar, looked forward to continuing profit-taking, while the other, as represented by President Eliot Hyman, purportedly sought a slow corporate build-up.

Failure to reconcile these stockholder and operational groups may have led to the decision to sell. AAP Corp., which operates AAP Inc., Associated Artists Enterprises (merchandising) and Dominant Pictures Corp, as wholly-owned subsidiaries, has been in business since July 1956.

In its first annual report last summer [Film, July 11], AAP Corp. had reported negotiation of sales contracts totaling a little more than $31.6 million for its first seven months of activity. From this, AAP realized a net profit after taxes of $963,524. For the first quarter of 1957, AAP showed sales contracts at the $8.1 million level. The company had expected it would have more than $3.5 million in net profit this year (1957).

AAP had been projecting its thinking into terms of eventual tv commercial production for national and regional advertisers and their agencies.

The corporation acquired its assets in July 1955 by acquiring the Warner Bros. library for $21 million, financed by $7 million on hand, a loan of $9 million from the Manufacturers Trust Co and a $5 million deferred payment to Warner Bros. The bank last April assumed the Warners' obligation and consolidated the $14 million debt into one loan that by last summer AAP already had reduced to a little more than $11 million. Also in April, the AAP directors approved a four-for-one capital stock split. AAP has kept 35.7-5.5% of "collections" (income), paying the balance to the bank to retire its debt.

It is believed AAP had set the end of next year as the time it would have the whole outstanding debt retired. Also acquired in July 1955 were tv rights to "Popeye" cartoons from Paramount Pictures Corp. and King Features for $2,225,000, a deal financed by the sale of $3,945,000 of 6% convertible sinking fund debentures to provide the working capital. Most of the principal amount of the debentures was outstanding as of the first annual report.

Among properties owned and distributed: more than 800 Warner Bros. features, an additional feature library produced by various U.S. and British companies, 337 "Looney Tunes" cartoons from Warner, 234 Popeyes and approximately 1,400 Warner Bros. short subjects and documentaries being held back from tv. (At one time, Hal Roach Jr., of Hal Roach Film Co., Culver City, Calif., had been negotiating with AAP for rights to these films.)

In addition, AAP Corp.'s operations include theatrical reissues, cartoon reissues, rental of films to non-theatrical and non-tv sources, motion picture remake rights, stock footage library, radio adaptation rights, live tv rights, distribution of kinescopes overseas, acquisition of new products, conversion of literary properties to legitimate or theatrical productions, adaptation of silent features, merchandising rights and industrial films.

Formation of the merchandising subsidiary (AAE) was made known earlier this...

DOMINANT

FILM CONTINUED

month [Film, Nov. 11], and along with substantial merchandising success, this AAP
unit has been mulling a revival of Popeye
production. Another recent AAP action
was the withdrawal of some of its Warner
features and cartoons from about 30 major
markets. The distributor said its decision
to shelve the unsold pictures was based on
hopes their value would increase in the
future, perhaps with the advent of such
developments as pay tv which would require
additional film products (Closed Circuit,
Nov. 4).

AAP claims the Warner Bros. features
have been sold in more than 100 U. S.
markets since they were first offered to tv.

AAP Inc. was acquired originally through
an exchange of stock in March 1956 by
PRM Inc. with the corporate name then
changed to Associated Artists Productions
Corp. Mr. Chesler is a wealthy Canadian
industrialist and has extensive mining and
real estate interests. Mr. Hyman has diverse
interests including automotive and real es-
tate and is connected with Moulin Produc-
tions which was associated with the motion
picture production of such features as
"Moulin Rouge," "Moby Dick" and "African
Queen," among others. He reportedly
also has been associated with Ray Stark (in
charge of west coast operations for AAP
Inc. and member of AAP Corp. board) in
production tie-ins with Warner Bros.

Florsheim Heads General Sales
Of NTA's Famous Films Unit

Appointment of Stanley C. Florsheim to
the newly-created post of general sales
manager of NTA's Famous Films—Pro-
grams for Television was announced last
week by Harold
Goldman, executive
vice president. The
NTA division sells
re-run feature films
and serial products.

Mr. Florsheim
served most recently
as general sales man-
ger of Economee
Tv, a unit of Ziv
Television Programs,
which also is respon-
sible for the sale of
re-run products. He was associated with the
Frederic W. Ziv Co. for eight years in va-
rious executive sales capacities. Earlier, Mr.
Florsheim had been with the Adams Hat
Co. as director of advertising and sales pro-
motion and with ABC in the network co-op
program sales department.

Disney on N. Y. Stock Exchange

Walt Disney Productions, Burbank, Calif.,
was listed last Tuesday on the New York
Stock Exchange, with 2,700 shares traded
the first day. The stock opened at 14½,
its high, and closed at 13%, its low. There
are 1,729,093 common shares of $2.50 par
value.

AAP announces four motion pictures from ranks of companies. They are Christmas Carol, and presenting Raymond Massey as host, and The Lamb in the Man-ger, recounting story of birth of Christ Child, with Maureen O'Sullivan as story-teller.

Company also announces that it is releasing to tv stations new package of 75 feature films, produced by 20th Century-Fox Film Corp., Stanley Kramer and several independent producers. Package includes such films as "The Bells of St. Mary," "High Noon," "Claudia and David," "My Friend Flicka," "Uncle Harry" and "To the Shores of Tripoli."

**FILM PRODUCTION**

Screen Gems Inc., N. Y., announces new half-hour comedy tv film series based on exploits of Howe and Hummel, famous New York criminal attorneys in 18th century. Series, to be produced in association with Diana Green, Monty Shaff and Eddie Joy, will go into production at SG's studios on West Coast in February for showing to prospective sponsors in the spring.

**FILM SALES**

Ziv Television Programs, N. Y., reports sale of new half-hour tv film series Sea Hunt in 100 markets, with sales in eight markets last week: New York, Birmingham, Rochester, Syracuse, Charlotte, Tampa, Duluth and Greenville, N. C.

Screen Gems Inc., N. Y., reports sale of its half-hour package of cartoon programs to NBC-TV, including new "Ruff and Reddy" serial that deals with cat and dog space travelers. Also announced is "Shock" package of horror feature films sold in 15 additional markets, raising total markets on series to 65. Latest stations to sign: WBAL-TV Baltimore, WTOP-TV Washington, WROC-TV Rochester, WISH-TV Indianapolis, KGUL-TV Galveston, KOTV (TV) Tulsa, WMCT-TV Memphis, WBRZ (TV) Baton Rouge, WTVS-TV Shreveport, La., WGAN-TV Portland, Me.; WBKB (TV) Chicago; KPTV (TV) Portland, Ore.; WSIX-TV Nashville; WJTV (TV) Elkhart Ind., and KELP-TV El Paso, Tex. Company also reports its sale of Casey Jones to Associated Television Ltd. for telecasting in United Kingdom and reports renewal pacts with Granada TV Network in Britain for The Adventures of Rin Tin Tin and with BBC for Circus Boy. Company also reports sale of its half-hour tv film series, Circus Boy, to Anderson, Clayton & Co. (tv subsidiary of Columbia Pictures). Also announced is sale of Jungle Jim and Circus Boy to Cuban stations, CMF-TV and CMQ-TV, both Havana.

**FILM DISTRIBUTION**

AAP announces four motion pictures for Christmas-season viewing are being offered to tv stations and advertisers. They are "Star in the Night," Warner Bros.' featurette and Academy Award winner; "Silent Night" (available to one station per market during holiday season, except in 22 markets in which movie is being sponsored by Rheingold beer); "A Christmas Carol" (stars Ali-stair Sim as Scrooge) and "The Emperor's Nightingale." Bob Rich, AAP's general sales manager, noted that requests should be made early to assure availability of prints.

National Telemark Assoc., N. Y., has announced availability of three programs designed for showing during Christmas season. They are Christmas Carol, narrated by Vincent Price and featuring Taylor Holmes as Scrooge; Mont's Heritage, telling story of Bible and presenting Raymond Massey as host, and The Lamb in the Man-ger, recounting story of birth of Christ Child, with Maureen O'Sullivan as story-teller.

Company also announces that it is releasing to tv stations new package of 75 feature films, produced by 20th Century-Fox Film Corp., Stanley Kramer and several independent producers. Package includes such films as "The Bells of St. Mary," "High Noon," "Claudia and David," "My Friend Flicka," "Uncle Harry" and "To the Shores of Tripoli."

PROGRAM SERVICES

WCUE Settles Suit by UP,
Will Resume Use of Service

WCUE Akron, Ohio, last week announced settlement of a suit brought by United Press which had claimed the station owed $57,40 for service.

WCUE has agreed to pay $313.70, according to Tim Elliot, president, and will resume use of UP service. The latter action negates a second portion of UP's suit (for $7,481.62). UP had claimed this would have been its profit on the WCUE contract during the remaining 2½ years of the agreement.

The dispute, according to Mr. Elliot, originally stemmed from increases in the weekly UP charges which he said were contrary to a 1953 verbal agreement with UP to the effect that no increases would be made during WCUE's current six-year contract with the news service.

TNT Tele-Sessions Announces
Four Executive Appointments

Four executive appointments and offices have been announced by TNT Tele-Sessions Inc., New York, closed-circuit service firm.

John B. O'Connor, national sales representative for TNT for the past year, has been promoted to eastern division manager, and will headquarter at 575 Madison Ave., New York.

Gordon N. Morford, formerly western advertising manager, Street & Smith Publications, has been named western division manager with offices at 612 N. Michigan Ave., Chicago. Fred V. Davis, head of TNT's Detroit office for the past year, will be located in the Fisher Building, Detroit, as central division manager. Douglas George, head of TNT operations on the Pacific Coast for two years, is now Pacific Coast division manager, with headquarters at 5859 Melrose Ave., Los Angeles.

RCA Thesaurus Sales Up 350%

A 350% increase in sales for the combined months of August, September and October 1957 compared to the same period a year ago was claimed last week by RCA Thesaurus for its radio transcription library. A. B. Sambrook, manager of the library, attributed the sales rise to the success of sales booster campaigns, among them "Double Talk" featuring Al Kelly, "Sound Advice," "Little Known Facts" and "What's the Meaning of This Name?"

Andrews Sets Up Record Firm

Vincent S. Andrews, business manager for broadcast and theatre personalities, has announced formation of Candle Records Inc., New York, to produce religious and educational records. Mr. Andrews has named Louis Livingston, president of World-Wide Promotions Inc., New York, to be executive vice president of the new firm. Plans for the first Candle albums, to be composed of religious records, will be announced shortly, according to the president, who continues his business representation activities. Candle is located at 501 Madison Ave., New York 22; telephone Plaza 3-9110.

NARTB WARNS ON SP, 'HORROR'

• Tv group blinks red light on subliminal perception
• ATP, other tv code subscribers to get NARTB seal

Warnings against the use of subliminal perception on tv and the scheduling of horror programs were issued by the NARTB Code Review Board Wednesday at the conclusion of a three-day meeting at the Beverly Hills Hotel, Beverly Hills, Calif.

Rudy Abel, producer of the Lassie tv series, asked if use of the code seal might help get better acceptance for American tv films abroad.

Mr. Fellows replied that the U. S. system of broadcasting, one of the few in the world free from government control, is not too popular in some places, but he thought the use of the code seal might help "if we can tell them what it means.

One questioner asked what the code board has done about KOP (TV) Los Angeles, charged with code violations. Mr. Fellows replied that the board had not acted against KOP because it is being sold to a group which has pledged to abide by code provisions.

Asked whether the board has acted on a proposal for a tv legion of decency, Mr. Bronson said the papal encyclical did not call for such an organization to police television.

Mr. Bronson reported on monitoring activity and indicated that by the end of the year two-thirds of the more than 300 stations subscribing to the code will have been monitored. The board made provisions for extending the monitoring in 1958 to cover stations in small communities as well as in large markets.

The full code board attended the three-day meeting. Besides Chairman Quarton, members are Mrs. Hugh McClung, KISSL-TV Chico, Calif.; Richard A. Borel, WBNS-TV Columbus, Ohio; Roger W. Clipp, Tri- angle Stations, Philadelphia, and Donald H. McGannon, president, Westinghouse Broadcasting Corp., New York.

Members of the executive committee of the ATPF who met with the code board are Maurice Morton, Alliance president; McCaIden Productions; Maurice Unger, Ziv T; John Findlater, Revue Productions; Archer Zamlock, Hal Roach Studios; Hal Roach Jr., Hal Roach Studios; Armand Shaefer, Flying A Productions; John Zinn, Alliance executive secretary, and Richard St. Johns, Alliance legal counsel.

At a closing meeting Wednesday, continuity acceptance editors of the television networks, Alliance producers and directors, code board members and NARTB staff representatives held a "shirt-sleeve" session, discussing problems connected with maintaining high standards of programming. Network executives participating in the meeting were for ABC, Continental Acceptance Director Grace Johnson and West Coast Director Dorothy Brown; for CBS, Director of Editing Herbert A. Carllberg and West Coast Manager William 1anjesley; for NBC, Director of Continental Acceptance Stockton Helffrich and Hollywood Manager Robert Wood.

NARTB staff members taking part in code board sessions, in addition to Mr. Fellows and Mr. Bronson, were Thad Brown, television vice president; Douglas Anello, chief attorney; Donald N. Martin, assistant to the president for public relations; Charles S. Cady, assistant director of television code affairs, and Robert K. Richards, consultant.

Tv Damned, Praised

By ATAS Panelists

"Creative" tv programming came in for both boosts and knocks Tuesday, as four agency executives looked at network programming and found it (a) wanting and (b) "as good as can be."

Featured as speakers at the New York chapter of the Academy of Television Arts & Sciences were Maxwell G. Ule, senior vice president, marketing, Kenyon & Eckhardt; Hal Davis, vice president, radio-tv, Grey Adv.; Walter Craig, vice president, radio-tv, Norman, Craig & Kummel, and— in absentia—Nicholas E. Keesely, vice president, radio-tv, Lennen & Newell. Mr. Keesely's comments were read by Terry Sullivan, a tv announcer-personality.

Mr. Craig said the basic trouble with television today is that its overnight success made "people want to turn a quick dollar too fast," and that this desire to "share the wealth" led to imitative programming. Claiming that "good product" and not handwriting is the answer to pay-tv, Mr. Craig called for a revival of "romantic writing" where boy-gets-girl instead of "all this realism" which, he charged, borders on "dust."

Mr. Davis, using props, said the current season can be summed up by "the stoo... the stool pigeon and the gun holster. (The stool, he said, referred to the "relaxed" type of musical programming.) The "ideal show," said Mr. Davis mockingly, is "to get a cowboy sitting on a stool in an isolation booth." At the same time he said that rival media cannot afford to hit television too hard, stating that a current best-seller is Grace Metalious' Peyton Place and that Broadway's lowest grosses come from Peter De Vries' "Tunnel of Love." Both, he charged, bordered on very bad taste. He predicted agencies will recapture their production power in tv.

Mr. Ule said creativity is "an overworked term." He defined it as a reconstruction of past experience and formats to develop a good rating. It's not the ratings that count, he noted, but the "emotional plus" a program gives the audience.

Mr. Keeseley defended tv, saying that if people really did not like television, they would soon turn off their sets. They haven't, he said, and therefore, "things can't be so bad after all." Television, maintained Mr. Keeseley, excels at promoting its programs, but it does little in promoting itself. Putting the blame on the tv critics for tv's chronic compulsion to defend itself, Mr. Keeseley said the industry ought to spread the word on "what it is doing, not what it isn't." Tv criticism, he concluded, is "absurd, dangerous and meaningless" if based on the pre-
KNOWLEDGE

Knowledge and speed guide the surgeon's hand.

In our fast-moving field, too, knowledgeable decisions frequently must be made quickly.

That's why... when we give you facts... we're careful to make them accurate, complete and pertinent. And, whenever possible, get them to you fast while they still have meaning and application.

The show. Criticism that is valid ought to come from people within the industry, those who "can do something about bad programming," he said.

**Must Be 'Watchful Over Radio-Tv,' Say Catholic Bishops at Meet**

Citing the continuing need for such agencies as the National Office for Decent Literature and the National Legion of Decency, Catholic bishops of the U. S. last week recommended, "Nor can we fail to be watchful over the fields of radio and television."

The bishops, meeting last week at Catholic U. in Washington, D. C., released a 2,400-word statement entitled "Censorship." In it, the bishops noted that civil authority has the right and duty to exercise such control over various media to safeguard public morals, "yet civil law, especially in those areas which are constitutionally protected, will define as narrowly as possible the limitations placed on freedom."

For this reason, the bishops said, "civil legislation by itself does not constitute an adequate standard of morality."

The statement referred to the Sept. 8 encyclical of Pope Pius XII and said that "Our Holy Father has spoken not only of the competence of public administrators, but also of their strict duty to exercise supervision over the more modern media of communication and entertainment—radio and television. He warns public officials that they must look on this matter not from a merely political standpoint, but also from that of public morals."

**Half Radio Homes Tune In From 9 a.m.-4:30 p.m. — RAB**

More than half of all radio homes in the nation can be reached during the 9 a.m.-4:30 p.m. period throughout the week, according to the most recent study of the cumulative radio audience made for Radio Advertising Bureau by the A.C. Nielsen Co. The study, seventh in a series undertaken for RAB, discloses that more than 50% of all radio households tune in regularly during the week (Sunday through Saturday) to programs aired during this time segment.

The typical family's total listening time for the week averages nearly 4½ hours, the study stated. The research further reveals that over a four-week period better than 75% of all radio homes average more than 13½ hours of listening in this period.

**48 More Radio Outlets Join RAB**

Fully 48 new station members and three representative and associate members joined Radio Advertising Bureau in September-October, representing the largest gain in membership in any two-month period since RAB's inception, according to Kevin B. Sweeney, president. The new membership reportedly represents $22,000 in annual income. The previous record period for new membership was January-February 1956 when 48 were added, Mr. Sweeney said. Membership now exceeds 850, RAB reported.
RESEARCH THAT WON A MEDAL

This year, for the first time, The Franklin Institute’s coveted George R. Henderson Medal—awarded for achievements in research in railroad technology—was not given to an individual inventor or engineer. It was awarded to an association—the Association of American Railroads.

This award honors the contributions made by the Association's Mechanical and Engineering Divisions to the advancement of railroad safety, progress and efficiency.

These contributions are reflected in 92 patents which have resulted from the Association’s research. Currently, the Association has some 96 projects under way at its research center on the campus of the Illinois Institute of Technology in Chicago. And it is planning additional facilities to expand this research.

The railroad industry will continue its scientific research to provide transportation service that is constantly increasing in efficiency and economy.

ASSOCIATION OF AMERICAN RAILROADS
Washington, D. C.
Vertical Field Pattern of new RCA TF-12BH 50-kw antenna. Note complete absence of vertical nulls. Operated in conjunction with an RCA 50-kw TT-50AH transmitter, this antenna will "saturate" your service area with strong signals.

RCA 50-kw VHF transmitter, TT-50AH. Now in regular production, this transmitter is the ultimate in high power for channels 7 to 13. P.A.'s operate with standard power tubes (obtained from any RCA Tube Distributor).
RCA's new 50-kw VHF transmitter, and an RCA TF-12BH Superturnstile antenna, will "flood" your service area with strong signals—close in AND far out!

Tailored to "consultants' specifications," RCA's 50-kw antenna-transmitter combination is your answer for maximum ERP and "saturation" coverage on channels 7 to 13.

"Rain" your signals in all directions!
No need to "beam" to reach specific areas. You get saturation everywhere—close in and far out. Reason: RCA's TF-12BH high-gain antenna delivers two to three times the required field strength—even in minimum signal areas. And it makes no difference whether you use an extremely high tower—or one of average height. This is the one transmitter-antenna combination that develops 316 KW ERP—with power to spare!

Antenna System takes full 50-kw Input!
RCA's TF-12BH high-gain antenna and antenna components will take the full output of the 50-kw VHF transmitter—with a high factor of safety. Designed for pedestal or for tower-mounting, RCA antennas withstand windloads of 110 miles, and more. A unique switchable feed system enables you to switch power from one part of the antenna to another QUICKLY—an important advantage that will keep you on-air during an emergency.

A 50-kw VHF System—completely matched!
RCA can supply 50-kw systems matched precisely for peak performance—from antenna, transmitter, transmission line, fittings, tower, r-f loads, wattmeters, and diplexers—to the hundreds of individual components required by the carefully planned station plant.

Qualified planning help is vital!
For experienced assistance in planning a transmitter-antenna system that will literally "blanket" your service area with strong signals, call your RCA Broadcast Sales Representative. He knows systems-planning from A to Z.

SDX Report Notes Ups, Downs Of Broadcasters in Access Fight

The successes and failures of broadcasters in gaining access to court rooms and legislative proceedings during the past year were noted last week in the report of the Advancement of Freedom of Information Committee of Sigma Delta Chi. The professional journalistic fraternity met last week in Houston, for its annual convention attended by some 400 newsmen from all over the nation.

The report also mentioned instances in which working relations between newspaper reporters and radio-tv newsmen "did not always reflect harmony." It specifically referred to instances in Los Angeles and New York where newspapermen refused to allow recorders and tv cameras to be set up at news conferences and pool interviews.

TRADING PROFESSIONALS

Tv Artists Corp. Organized As Personal Management Outfit

Television Artists Corp., 527 Madison Ave., New York, a firm "specializing in personal management," has been formed through a merger by Jack Bertell, onetime executive vice president of MCA, and John Greenhut, formerly head of John Greenhut Enterprises. Mr. Bertell has headed his own personal management firm since 1947.

Performers to be represented by the new firm include: Polly Bergen, Bill Hayes, Carol Haney, Jackie Miles, The Chordettes, Jane Morgan, Carol Lawrence, Jackie Kannon, Morey Amsterdam, Earl Wrightson, Louis Hunt, Elaine Malbin and Larry Daniels. Creative roster includes James Starbuck, Joe Cates, David Tihmar, Earl Wilson, Peter Gennero, Luther Henderson and Jerome Shaw.

Mendelsohn Forms Own PR Firm

The establishment of his own public relations firm, with emphasis on radio-tv clients, has been announced by Howard Mendelsohn, former midwest publicity director of CBS-TV (WBBM-TV Chicago). Hs will maintain headquarters at 612 N. Michigan Ave. (Telephone: Michigan 2-0244) and represents Ruido Productions (radio-tv producers) and other clients. Mr. Mendelsohn recently completed a radio-tv campaign for the Julian J. Jackson agency and, in a freelance capacity, worked on the Chicagoland Fair account this past summer.

Talent Service Begins in Chicago

A new talent agents' organization has been created in Chicago to simplify booking procedures between studios and agencies with uniform contracts. Called Chicago's Assn. for Radio and Television Artists, the organization claims to have completed negotiations and signed applications for a Screen Actors Guild franchise in that city. Talent
Now for the FIRST TIME the curtain's going up on ALL of the top NBC shows via WINR-TV, Binghamton's Great New Channel NOW ON THE AIR!

An impressive new studio building... our own microwave relay system... and an energetic promotion campaign which led to thousands of conversions before our test pattern was on the air are but a few of the indications of the strength and stability of this new sales signal in the Binghamton market.

One of the most powerful on the air... WINR-TV, with a million-plus watts, is the first station to offer full network programming from the first day of operation.

Jr. and G. B. Wickizer, of RCA Labs radio research staff at Riverhead.

The research team pointed out that meteor path propagation promises ultimately to increase the versatility of all radio communications by providing a means of sending information at times and over distances for which other means may not be available. It also offers a valuable means of supplementing the overcrowded radio spectrum, the scientists added.

They explained the material to be transmitted is recorded on 35 mm film, which is scanned to produce a signal in a manner similar to the techniques used in television film transmission. The resulting signal is sent out from the transmitter through a highly directive antenna aimed in the direction of the receiving area. The signal is picked up by another directive antenna each time it is reflected during the brief life of an ionized meteor trail, and the information is fed to a cathode-ray tube for display on a viewing screen. In the experimental system, photographic techniques are used to record the image as it appears on the screen.

The research team reported that the scanner and transmitter are run continuously, sending copies of a picture over and over at the rate of two complete scans each second. The receiver is also on continuously with the recording unit in a "standby condition."

"When a passing meteor closes the transmission path, the incoming signal trips the recorder . . . to permit reproduction on the phosphor screen," they said. "The circuit then resets for the next burst." The report said the experimental transmitter produces 20 kw of power at 40 mc.

$1 Million CBS Labs Building Going Up in Stamford, Conn.

Ground-breaking ceremonies were held in Stamford, Conn., Thursday for CBS Labs' new $1 million-plus building, with occupancy targeted in the summer of 1958.

The 33,000-sq.-ft., one-story, air-conditioned building will provide research and development facilities for a scientific and administrative staff of 150 persons. Participating in the ground-breaking ceremonies were Dr. Frank C. Stuart, president of CBS Inc.; Dr. Peter Goldmark, president of CBS Labs; Mayor Thomas F. J. Quigley of Stamford; State Sen. Benton H. Grant, and the Rev. Donald Campbell.

A sound capsule, containing four long-playing records of the Edward R. Murrow radio series, I Can Hear It Now, was placed in the foundation of the building. The capsule was treated with radioactive material so it can be detected by Geiger counters 100 years from now.

RCA Puts Color in Co-op Homes

RCA Electronics has installed a Wescott series console RCA color receiver, as well as RCA Whirlpool-Imperial refrigerator, built-in oven, range, dishwasher and clothes washer-dryer combination.

The project will be featured in RCA Victor's network television and magazine advertising this month.

Radio-Tv Sales, Output High in September—EIA

September turned out to be one of the best months in recent years for radio and tv set production as well as for sales of receivers, Electronic Industries Assn. announced last week.

Radio receiver output was 1,610,748 (including 446,419 auto sets), making September the second highest month in 21 months. Only December 1958 was better.

Tv set production reached 367,049 units (including 87,040 with uhf tuners) and proved to be the best of the past 21 months with the exception of September 1958.

Nine-month total for radio sets was 10,376,534 units as compared to 9,535,896 for the same period in 1956.

Tv's nine-month output was 4,589,164, down from the same total in 1956 when 5,299,271 units were produced.

EIA's production totals for the first nine months of 1957:

Retail sales of both radio and television sets hit their highest marks since last December, according to EIA. Radio set sales for first nine months of 1957 totaled 5,640,372 as compared with 5,405,052 for the corresponding period last year. These radio figures cover radios sold through retailers and do not include auto sets which are produced and sold directly to the car makers.

Tv set sales for nine months of this year totaled 4,452,081 compared with 4,603,626 during the same period for 1956.

RCA-UNIV. C.G. Camera Chain

(1TV-201), priced at about $3,000, embraces a compact, portable vidicon-type tv camera, a separate, self-contained control unit and a viewing monitor. Mr. Tracy said the new camera "meets a need in the educational, industrial and commercial fields for a tv camera chain that can be used either as the foundation of an expand-as-needed closed-circuit tv system or as an addition to a system already in operation," he reported.

RCA Makes Five Appointments in Electron Tube Division

Five appointments to the industrial tube products marketing activity, RCA electron tube division, Harrison, N. J., were announced Thursday by G. W. Duckworth, manager, marketing.

Clifford H. Lane, previously manager, planning and scheduling, cathode ray and power tubes, has been named manager, market planning; Max E. Markell, formerly manager, equipment sales, RCA components division, has been appointed manager, industrial sales; Gene R. Rivers continues as manager, government sales; Clarence S. Rockwell Jr., manager, controls, cathode ray and power tube marketing, was named manager, marketing administration, and James T. Wilson, formerly manager, power tube planning in cathode ray and power tube marketing activity, has been appointed manager, contract administration.

At the same time, organization of the newly formed commercial operations administration division of the activity was announced. Charles R. Klinger, previously manager, western equipment sales district, has been appointed manager, commercial administration, western area, headquarters in Los Angeles. Other members of the commercial operations administration staff who will continue in their present positions are: Peter J. Faber, manager, commercial administration, central area, Chicago, and John W. Kirschner, manager, Washington office.

MANUFACTURING SHORTS

D. P. Bushekill & Co., Pasadena, Calif., announces color microscope designed for tv technicians to calibrate mosaic of color tv tube. Extensile foot equalsizes effect of tube curvature, permitting focusing to depth of 70 mm and interchangeable opaque-transparent bases allow microscope to use either reflected or transmitted light. Weight 5½ ounces. Height: 135 mm (closed), 200 mm (fully extended). Price: $14.95 (includes one opaque and one transparent extensile base in leather carrying case).

Fairchild Camera & Instrument Corp., Syosset, N. Y., will hold demonstration of its new automatic 16 mm film processor in New York today (Monday). Company claims roll of exposed film can be placed in processor and processed within 20.—In
we deliver 1000 like this* for 31c

Much prettier, actually, from a sponsor’s point of view, because these ladies buy! And at WVNJ you can talk to a thousand of them (and their families) for one minute at a cost of only 31c. Same rate for men, too.

Most advertisers know that the New WVNJ has more listeners than any other radio station broadcasting from New Jersey. As a matter of fact—almost twice as many as the next 2 largest combined.*

Most advertisers know the quality of this audience—for the new programming concept of playing only Great Albums of Music has brought the station thousands of new and potentially better buyers than ever before.

Most advertisers know, too, that WVNJ delivers this audience at less cost per thousand than any other radio station not only in Jersey but in the entire metropolitan area as well.

That’s why WVNJ is the hottest radio station in the New Jersey market—bar none. Get the facts and you’ll make WVNJ part of your advertising day.

WVNJ
Newark, New Jersey

The CHALLENGE

April 19th, 1775—a musket fired a single round on the Lexington green in the Commonwealth of Massachusetts, and this became known as “the shot that was heard around the world”.

December 7th, 1941—the sound of falling bombs may never have been heard by some of the men at Pearl Harbor that Sunday morning... but the reverberations carried into every city, town and hamlet of the United States and probably to every living soul on the face of the earth!

October 4th, 1957—a mighty roar heard by a select few in a remote part of the USSR... and then, a steady beep, beep which may well become the most significant sound in all recorded history!

It was this sound, flashing through the sky at an unheard of speed, a torrent of words on a subject which promises to be the most important item on our national agenda for years to come. The subject is Science and Education.

From the President on down, the voices are now being heard and they are all saying essentially the same thing. We need young scientists, we need boys and girls to look toward a career in physics, electronics, chemistry... to specialize in the various technological areas of rockets, missiles, fuels, outer space... and many, many more to delve into the more hum-drum activities of higher mathematics, electronic calculations, nuclear theories, and the never-ending research and laboratory work needed to turn out the imaginative products which will keep this country abreast, if not ahead, of any other country in the world.

It will take years for a democracy to implement the actual training needed at all levels of our educational system. Before we can have graduating students, we must have competent instructors and teachers. Textbooks must be written and revised. Educational methods must be written and revised. Educational methods must be up-dated, and in many instances, speeded-up, to cover the vast amount of knowledge that is pouring forth at an unprecedented rate. Local school boards, state levels of educational systems... even PTA groups... must be aroused to the need for new directions, more action, and far less oratory.

The television industry has a unique opportunity to demonstrate its far-reaching influence over the lives and customs of millions of families. The trickle of programs at the network level is only a teaser for what the local stations can accomplish in the long run. Surely, these thoughts have crossed the minds and desks of the Managing Directors, Program Directors, and staff producers of many, many stations; perhaps even before the current emphasis on what appears to be close to a national emergency.

But how to accomplish this... and do it effectively. The answer to that question which will be asked more and more often in the coming months, is not simple... but there is one word which will keynote the efforts of each and every station... and that word is "IMAGINATION"! When you consider the seriousness of the problem, you realize how important it is that the best brains at your command be put to work on creative formats, new uses of old tools. This is not science-fiction, this is not for fun, this is as real as that beep, beep in the sky!

If each television station in the country turned out only one half-hour program per week, based on the theme of the scientific future... and directed such programming to youngsters and teenagers particularly, with side emphasis on the parents... the nation, as a whole, would soon show signs of awareness which, otherwise, would take almost a generation to accomplish. It is not suggested here that television stations become "Classrooms of the Air", nor is it necessary to conceive of programming which necessarily teaches... but what is needed, is the creative presentation of a scientific career as a stimulus to the imagination of the viewers. The keen sense of accomplishment, the reward of discovery, the fascination of probing the unknown, and the tremendous opportunities for financial security in an area where the income levels seems to know no ceiling are some of the points to be emphasized in this kind of programming. There are scientists, educators, professors, industrialists... a tremendous untapped "talent pool" for the stations to draw upon when selecting the right personalities to get across this very basic theme. There are hundreds of wonderful films which have been produced with painstaking care to illustrate some phase of the scientific discovery or development which can be presented in the context of such a program. There are factories, laboratories, power plants, airports and scores of other "sets" for remote telectas when the equipment is available.

This is the Challenge! Not where to slot another western series, not the rating yardstick which puts Sullivan ahead of Allen, not the star names in a feature package... but a public responsibility... a true... a dire need to face the future squarely... to recognize that the national effort is only the sum total of all the local efforts... and to meet the challenge in a manner which befits the television industry.

November 18, 1957 • Page 87
Dr. Frank Stanton, CBS president and recipient of this year's Paul White Memorial Award from the Radio-Television News Directors Assn., believes that developments such as Sputnik make it all the more mandatory that people be kept enlightened through the fastest possible communications. In his acceptance speech at the RTNDA convention Nov. 9 [TRADE ASSNS., Nov. 11], Dr. Stanton stresses the vital role that networks must maintain in informing and warns inroads such as those embodied in the Barrow Network Study pose a serious threat. This is a condensed version of his text:

The rise of Sputnik I and the traumatic reaction of the world's peoples thrust before all Americans problems wholly new—problems to which the slow processes of democracy are not yet adjusted. The rise of Sputnik II dispelled any doubt about the gravity of these problems.

Whether we like it or not, we now have to examine our practices and habits as a nation to accommodate them to those facts. We must recognize that Russia—or any other dictatorship—has a certain head start on a democracy. One man, or a handful of unanswerable men, make all the decisions. They make them fast, and with finality. And the people obey. There is no chance to discuss, to justify, to approve or disapprove.

The energies of a democracy, on the other hand, spring from below. Here, the leadership must be in league with the people. This depends upon a forthright, honest and open exchange of information and ideas. It depends upon the national leadership to maintain confidence in the people with the facts, and upon a fully informed people responding in a ground swell of public opinion that forms the basis for a program of decisive action.

Always, in the past, this process has given us in America a united and steadfast strength that has overcome the lead time of a dictatorship. But the movie-like velocity of the democratic process has almost always been exploded by some event—a Concord and Lexington, a Fort Sumter, a market collapse, a Pearl Harbor—that suddenly gave point to our capacities as a people. In the past we have had the luxury of time in which to mobilize those capacities.

In the ICBM age we are not going to have this luxury. We may have only minutes. We certainly won't have months.

The Russians catapulted a 184-pound satellite into outer space on Oct. 4. One month later, they followed it with a half-ton satellite of still unknown potentialities. Of course, these events do not, in their tremendous swiftness, signal the bankruptcy of democratic ways. But they do flash the stark need to make those ways work faster and work better.

To meet the challenge before us, the first need—the vital need—is to minimize the slowness of the decision-making mechanism inherent in a democracy and to make sure that it moves with the certainty of a completely informed people. And the first job—the vital job—in broadcasting is to speed up, if we can, and improve, as we must, the dissemination of the information that is the primary step in the decision-making process. If there is a failure at that step, the whole democratic scheme fails.

This is an immense job. It is a responsibility we cannot ignore.

In carrying it out, it is essential that we lead from a position of strength and certainty. For this reason alone—if for no other—we of CBS will oppose as forcefully as we know how any attempt from any quarter to weaken the present structure of broadcasting and therefore its ability to discharge this commanding responsibility.

Consider the facts that shape that responsibility.

We are living in a nation where 98% of the families have radios; where 83% have television sets; where more than 1,000 radio stations, and over 500 television stations, are on the air virtually around the clock.

It seems to me providential that we are thus able—at this pivotal point in world history—to reach into nearly every home in America simultaneously at a moment's notice; that we can bring to scores of millions across the country instant reports, the meaning of crucial events—even events themselves and the men controlling them.

This is not merely a miracle of technology. It is the product of organized human effort supported by the straightforward economic of present day marketing.

I believe that if we tamper now with the system we have evolved to use those opportunities, we are striking at one of the very instruments of the democratic method in what is perhaps the most perilous time in our history. Events today far surpass the training and ability of most of us to comprehend them without the aid of the best, the fullest, the quickest information sources. If the ability of the great news-gathering and disseminating organizations to do their job is impaired in any respect, and if information is unnecessarily or unwisely withheld from the American people, we as a people shall be left powerless to make decisions, to contribute towards a body of opinion that can be translated into public policy and then into action.

I am speaking, of course, particularly of the broad contributions that network television and radio are making to assure always an informed public. Most certainly I am aware of the creative ingenuity and enterprise of the newsmen in the stations throughout the country. The reporting job you are doing is exerting a positive and healthful influence upon your communities.

But for the job on which I am trying to focus your attention lies the network that is vital. True, our history in using television in this way covers little more than a decade. But in that time—under the pressure of one world crisis after another—we have evolved methods, built experience and put together world-wide organizations that have brought the world and its leaders into every American home.

As a result, the American people have not just learned of significant happenings; They have often been present as witnesses—in the case of the political conventions, for example.

The restless and precarious Middle East—long a cluster of political abstractions to the majority of Americans—has been translated by television journalism into specifics that can be recognized as forces capable of shaping the future of our whole world. I do not think I claim too much for broadcast journalism if I suggest that no distant and isolated event ever had such reality and immediacy for the American people as the Suez and Hungarian crises of a year ago seen through television.

Millions of Americans have watched—on such programs as Meet the Press and Face the Nation—the leaders of our time explain themselves and their policies. Through such living and vivid expositions as See It Now's "Great Billion Dollar Mail Case," millions of Americans have been shown—not merely told about—important and troubled areas of government.

Behind these growing efforts to construct a broader, more direct, more arresting informational broadcasting service—one constantly on the alert all over the world—we must have strong, economically sound broadcasting units. They must be national in their scope, international in their resources.

This is a function that only the nationwide networks are able to undertake.

To perform it we must have the personnel, the intricate technical equipment and processing methods, the disciplined and world-wide organization, the connective network of outlets across the country. And we must be able to draw from other broad-

casting operations the money we need to do all this.

At stake is the necessity for short-cutting the trail to a thoroughly informed nation. Better and expanded network journalism can do the job by bringing to our people day by day a truer picture and a deeper understanding of the changing world. The average of scientific determination, the whole issue of disarmament, for example, cannot be fully understood unless the scientific facts underlying the race for ultimate weapons—and the complexities of counter-measures—are also known and understood. To provide more people with scientific information is among clearly understandable to them a new CBS Television program, *Conquest*, will go on the air Dec. 1. Produced in cooperation with the National Academy of Sciences and the American Assn. for the Advancement of Science, this program is an example of the complicated technical kind of broadcast journalism that can be done only through the resources of a network.

Yet at this very moment network broadcasting is facing the serious risk of precipitous actions that strike at the roots of its vitality.

The cumulative effect of the recommendations of the Barrow Report—whatever their intent—could so weaken networking that it would be economically impossible to sustain informational activities at the present level—let alone respond with better organization and better technical facilities to the new demands of a missile age.

To run this risk seems to me the blindest folly.

All of this must be made abundantly clear to the American people. Chip away at the basic economics of the commercial networks of free television, and no mathematical legerdemain is going to make multi-million-dollar news services possible. They own the airwaves. It is their future that is at stake. The risk is theirs.

Let me summarize. The realities of our time are putting an extreme strain on our democratic institutions. We are up to our necks in the dilemma of adjusting those institutions to meet the threat of dictatorship that has demonstrated it can move with speed and skill and boldness. The cruze of that dilemma lies, to a great extent, in the gap between their inherently rapid decision-making process and our inherently slower one. We must narrow that gap. We can begin to do it partly by strengthening and accelerating the first step—informing more people, faster, more effectively, more fully—day in and day out.

This requires a news-disseminating medium of technical speed, of expressive power, and of arresting immediacy. As the instrument for this purpose, we have no proved alternative to the present broadcasting structure, built up over more than a quarter of a century. We have demonstrable evidence of its ability and effectiveness.

This is your job and my job. If we fail in our responsibility to the American people, the decision-making start that dictatorships always have over democracies may be—in the lightning speed of today's events—not merely an initial advantage but a determining one.

**CBS Inc. Net Income Up by $4.5 Million**

Consolidated net income of CBS Inc., for the first nine months of 1957 rose to $13,898,171 from $9,368,073 for the same period of 1956, William S. Paley, board chairman, announced last week at a board meeting. It was pointed out the figures for 1957 are "abnormally high" because of financial adjustments resulting from the discontinuance of the CBS-Columbia Div., the set manufacturing unit.

Current earnings, Mr. Paley said, are equivalent to $1.82 per share, compared to $1.25 for the nine months of 1956. He noted figures for 1956 include provisions for expenses and losses attributable to the closing of CBS-Columbia. Per share earnings were calculated on the average number of shares—7,651,697 in 1957 and 7,490,438 in 1956—outstanding during the respective nine months' periods.

Net revenues and sales for the 1957 period were reported at $275,276,269 against $256,379,847 for the nine months of 1956.

The board of directors declared a cash dividend of 25 cents per share on its Class A and Class B stock payable Dec. 13, 1957, to stockholders of record at the close of business Nov. 29. The board also declared a stock dividend of 3% on its present outstanding Class A and Class B shares. No fractional shares will be issued in connection with the stock dividend but stockholders will receive non-transferable order forms for their interest in fractional shares. The stock dividend will be paid on or about Dec. 27, 1957, to holders of record at the close of business Nov. 29.

**NBC-TV Sets One-Day Record For Sales on ‘Tonight’ Show**

Seven advertisers reportedly placed more than $4 million in gross billings Nov. 8 on NBC-TV's participating *Tonight* program, marking what is claimed to be the largest amount of business recorded by the show in a single day, according to William R. Goodheart Jr., vice president, NBC-TV sales. Block Drug Co. and Bristol-Myers contracted for the largest single orders in the history of the network's late evening program, Mr. Goodheart said.

Block Drug, through Sullivan, Stauffer, Colwell & Bayles, New York, placed a total of 234 participations on *Tonight*, scheduled over 52 weeks starting Dec. 30. Bristol-Myers has ordered 208 participations over 52 weeks for Bufferin and 28 participations to run during the last quarter of this year for Ipana. Young & Rubicam is the agency.

Other advertisers now on *Tonight* with agencies in parentheses are: North American Phillips Co. (C. J. LaRoche) for its Norelco Electric Shaver, has ordered 115 participations to run during spring and fall of next year; Harrison Labs. (Product Services) for its Ten Day Press-On Nail Color and Tuck Cellophane Tape, has ordered 42
ABC-TV Affiliates to Meet
For Progress Review, Planning

ABC-TV has set Dec. 19 as the date for its annual meeting to review progress during the year, and to set plans for the coming season. The meeting will be held at the Hyatt House, Chicago.

*WJAR-TV Area Per NCS No. 2, 1956

WJAR-TV
CHANNEL 10, PROVIDENCE, R.I.

Represented by Edward Petry & Company, Inc.
Katz Agency Begins On Expansion Project

The Katz Agency, station representative, is expanding.

Involved are the election of three new vice presidents, a 50% increase in office space and the appointment of 20 more people to the sales staff by next March 15.

Elected to vice presidential posts: Daniel Denenhholz, who is in charge of research-promotion; Morris S. Kellner, radio sales manager since 1952, who is in charge of radio; and Mr. Donahue, tv sales manager since 1952, who is in charge of tv sales. All three are company directors.

The Katz Agency moves to larger New York quarters March 1. The firm has signed a lease for 25,200 square feet on the 29th and 30th floors of a newly-constructed building at 666 Fifth Ave. Katz now is located at 477 Madison Ave.

The representative's current staff of 261—of which 162 are in New York—will be brought up to "at least" 280 by March 15.

$100,000 in Religious Shows Canceled by New KABC Manager

KABC Los Angeles is dropping all of its commercial religious programming as of the first weekend in December. Seven network and eight local programs are affected, a total of seven hours, 55 minutes each week. The decision, entailing a loss of approximately $100,000 a year in station revenue, reportedly was made by John H. Pace, who on Dec. 1 becomes general manager of the ABN-owned outlet [STATIONS, Nov. 11]. Mr. Pace also is assuming responsibility for the operation of KGO, the ABN-owned radio station in San Francisco.

According to Eugene Katz, president of the Katz Agency, the new growth will be necessary to maintain "comprehensive agency, advertising, and client servicing in the face of growing competitive requirements."

Mr. Denenhholz, with the firm since 1931, supervises advertising, publicity, research and sales data activities; Mr. Kellner joined Katz in 1932, and Mr. Donahue was sales manager at WPX (TV) New York before he moved to the Katz Agency in 1950. The client relations department continues to be in charge of Edward Codel, who is a vice president.

It is believed probable the same no-commercial religious programming policy will be put into effect there.

KABC will continue to carry three religious programs as a public service and without payment. They are Message of Israel, The Christian in Action and Pilgrimage.

WKTX Announces Target Date

WKTX Atlantic Beach, Fla., has announced a Jan. 1 target date for completion of construction. The 1600 kc facility (1 kw, daytime) is owned by W. H. Adams Jr., owner of the Jacksonville Fisherman's Supply Co., and Mrs. Adams. Robert K. Lynch, station manager and formerly engineer with WFAA-Dallas, was named manager of the Dallas office effective immediately.

DATELINES

PITTSBURGH—WJAS here spent 85 cents for toll charges and came up with a television interview of a former Curtis LeMay during his record-breaking flight from Buenos Aires to Washington, D. C., Nov. 13. News Editor Herb Morrison of WJAS, a lieutenant colonel in the Air Force Reserve, called Andrews Air Force Base in Washington and was connected with the general's jet tanker while it was over Galapagos. Speeding toward its 6,525-mile record, the plane was doing 510 miles an hour against headwinds at the time of the interview.

SAN DIEGO—Those who appeared on the "People in the News" segment of This Day on KFMB-TV San Diego, Calif., Nov. 10, weren't in the news before their tv appearance. But they and the station had gotten nationwide coverage by the time of their second appearance Nov. 13. Richard Mike-
sell, professional hypnotist of San Diego, put housewife Billie Tatum in a trance on the 7:30 p.m. telecast Sunday. It was the beginning of a 12-day experiment in teaching Spanish by hypnotic suggestion. After being exposed to recorded Spanish lessons at the hypnotist's offices for three days, Mrs. Tatum was brought back to take her place once more among "People in the News" on the Wednesday show. Quizzed by a Spanish interpreter, Mrs. Tatum was found to remember some of her subconscious teaching, but no conclusions about the experiment were drawn on the program. Harold Keen, moderator of the KFMB-TV program, later announced that "equal time" would be granted a professor of San Diego State College to comment on the hypnotic test.

CHICAGO—The 100,000th newscast in a 12-year series of hourly broadcasts by WIND Chicago, cooperating with the Chicago Daily News, was ticked off at 8 a.m. Nov. 14. Arthur Hall, general manager of the Daily News, and Ralph Atlass, general manager of the Westinghouse station, were on the milestone program, presided over by Bernie Allen, WIND's morning news editor, who has been with the station nine years. Mr. Atlass and Mr. Hall profiled growth of their outlets during their 12-year association and looked forward to its continuation.

WALKER TALKS

Former President Harry S. Truman was covered for the first time last week by a WRCA New York newsmen with a walkie-talkie, and Mr. Truman expressed lively interest in the device. In New York for a visit, he was accompanied by a herd of newsmen on one of his early-morning "constitutional," including Gabe Pressman, news director of WRCA-AM-TV New York. He noticed Mr. Pressman's walkie-talkie and asked what it was. Mr. Pressman explained the device and its functions, and Mr. Truman quipped: "Gosh, that's the first time I've been covered by one of those, though one time a man covered me while on roller skates." Mr. Pressman's coverage of the "constitutional" was carried live on WRCA's early-morn-ing Pulse show.

*Robin Moore set this world’s record in Stanford, California on May 19, 1956.
ANNOUNCED The following sales of station interests were announced last week. All are subject to FCC approval.

WROD DAYTONA BEACH, FLA. • Sold to Radio of Daytona Inc. by John S. Murphy and James F. McDonough for $145,000. Radio Daytona comprises Morton Bassett, John Blair & Co. 80% and Mr. McDonough, 20%. Mr. McDonough remains in executive capacity. Station is 250 w on 1490 kc. Brokers: Allen Kander & Co. and Chapman Co.

WTAL TALLAHASSEE, FLA. • Sold to Victor Diehm and associates by John H. Phipps for $149,571. Mr. Diehm and group own WAZL-AM-FM-TV Hazleton, WHOL Allentown and WHLM Bloomsburg, all Pennsylvania; and WIDE Biddeford, Me. Mr. Phipps retains WTYS Marianna, Fla.; WKTG and WCTV (TV) Thomasville, Ga., and WPTV (TV) West Palm Beach, Fla. WTAL operates on 1270 kc with 5 kw and is affiliated with CBS. Broker: Chapman Co.

WCOS COLUMBIA, S. C. • Sold to George H. Buck Jr. by Charles Pittman for $107,500. Mr. Buck and father are major owners of WJNO West Palm Beach, Fla. WCOS is on 1400 kc with 250 w. Broker: Chapman Co.

WGKV CHARLESTON, W. VA. • Sold to Joseph L. Brechner by Walter and Jacob Evans for $77,500. Mr. Brechner has an interest in WLOP-AM-FM-TV Orlando, Fla.; WERC Erie, Pa., and only recently sold interest in WGAY-AM-FM Silver Spring, Md. Station is 250 w on 1490 kc. Broker: Chapman Co.

KASI AMES, IOWA. • Sold to Bill Evans, Chicago freelance radio announcer, by William Rupe, Hollis Nordyke and Arthur Skinner for $57,000. Station operates on 1430 kc with 1 kw daytime. Broker was Allen Kander & Co.

WOV NEW YORK, N. Y. • Morris S. Novik, 69% owner of 5-kw independent WOV New York (on 1280 kc) last week sought FCC permission to sell 19% of the station's common stock to minority stockholders Georgia L. Weil, wife of Ralph N. Weil, executive vice-president-general manager, and Edna M. Hartley, wife of Arnold Hartley, programming vice president, for $7,600. The transaction is the result of an option held by the Weils and Hartley when the station was bought in August 1955 by Mr. Novik and associates to purchase up to 50% of the station at this figure. At the present time the Weils own 16.53% and the Hartleys, 14.46%. If approved by the FCC, the New York foreign-language station will be owned 50% by Mr. Novik and 50% by the Weils and Hartleys.

KUSN ST. JOSEPH, MO. • Sold to W. Schnupp and associates by J. D. Spears for $50,000. Mr. Schnupp is manager, KWMT (formerly KEOK) Fort Dodge, Iowa. Station is 1 kw daytime on 1270 kc. Broker: Blackburn & Co.

WMEG MADISON, GA. • Sold to Howard C. Gilreath and F. K. Graham by W. C. Woodall Jr. and others for $30,000. Mr. Gilreath owns WVOP Vidalia, Ga. WMEG is 1 kw daytime on 1250 kc. Broker: Chapman Co.

APPROVED The following transfers of station interests were approved by the FCC last week. For other broadcast actions see FOR THE RECORD, page 127.

WTRY TROY, N. Y. • Sold to WTRY Broadcasting Corp. (Victor W. Knauth 76.1% and Daniel W. Kops 23.9%), by C. George Taylor, Robert T. Engles, Mowry Lowe and Kenneth M. Cooper of Tri-City Radio Inc. for $1,300,000. Mr. Knauth is president and 20% owner of WAVZ New Haven, Conn., and Mr. Kops is executive vice president. WTRY is on 980 kc with 5 kw.

WDLP-AM-FM PANAMA CITY, WCOA PENSACOLA, both FLA. • Sold to Dixie Radio Inc. (Denver T. Brannen 99.4% and others) for a total of $400,000 ($150,000 for WDLP-AM-FM, $250,000 for WCOA) by Perry Enterprises Inc. Mr. Brannen owns KCIL Houma, La. and WDEB Gulfport, Miss. WCOA is on 1370 kc with 5 kw. WDLP-AM is on 990 kc with 1 kw. WDLP-FM is on 98.9 mc. Both WDLP and WCOA are NBC affiliates.

WKIX-AM-FM RAILEIGH, N. C. • Sold to Ted Oberfelder Broadcasting Co. Inc., (Theodore L. Oberfelder, Louis P. Randell, Norman R. Glenn, each 25%), and Leonard B. Frutkin and Benjamin N. Rippe, each 12.5%), by Sir Walter Television Co. for $167,925. Mr. Oberfelder is president, Burke Stewart Co., station representative; Messrs. Frutkin, Rippe and Randell are attorneys; Mr. Glenn is editor and publisher of Sponsor magazine. WKIX-AM is on 850 kc with 10 kw day, 5 kw night. WKIX-FM is on 96.1 mc. They are affiliated with ABC and MBS.

Box Appointment as Exec. V. P. Of Balaban Stations Announced

Appointment of John F. Box Jr. as executive vice president in charge of the Balaban radio stations was announced Wednesday by President Elmer Balaban. Mr. Box, since 1954 executive vice president of Bartell stations and currently general manager of Bartell's WILD Boston, also becomes managing director of Balaban's WIL St. Louis, where he will headquarter. Balaban also owns WRIT Milwaukee and has interests in KFII Wichita, WTVO (TV) Rockford, and WICS-TV Springfield, both Illinois.

SALES strategy was outlined for station managers and sales chiefs by Gordon F. Hayes, general manager of CBS Radio Spot Sales, at a special day-long meeting last week. Mr. Hayes reported that during the first nine months of 1957 the representation firm did business with 809 accounts, compared to 300 in 1947. Of the 1957 total, 359 were new accounts. With him on the dais are (1 to r): Sam Slate, general manager of WCBS, who outlined his station's new programming pattern; Edward O'Herst, research director of CBS Radio Spot Sales, and Jules Dunes, vice president in charge of station administration, CBS Radio. Other speakers (not shown) were Joseph Connolly, vice president in charge of programming, WCAU Philadelphia; sales managers of CBS Radio Spot Sales' seven offices throughout the country, and Fred Heywood, sales promotion manager of CBS Radio Spot Sales.

Wasn’t Trafficking, Rounsaville Tells FCC

A profit of about $200,000, before taxes, realized in the sale of nine stations since 1941, does not constitute "trafficking" and "does not even approach the capital gains involved in many single station sales."

Such was part of a sworn statement filed with the FCC last week in behalf of Robert W. Rounsaville, multiple station owner, in reply to a Commission complaint which said his latest station sale and purchase negotiations raise serious question of "trafficking." [GOVERNMENT, Oct. 28]. Mr. Rounsaville added that he has never sold a radio property for capital gain, but rather to gain a foothold in one of the big markets while still complying with the multiple ownership rules, to dispose of one in financial distress or for other legitimate business reasons.

The FCC has displayed concern over what it describes as Mr. Rounsaville's sale of interest in eight radio stations and acquisition of others since 1944. But Mr. Rounsaville replied that "the seven stations which (he) now owns, have been owned by him for an aggregate period of approximately 28 years."

As noted, the issue here arose when the multistate broadcaster last August filed applications with the Commission to sell WOBS Jacksonville, Fla., for $500,000 (he said he is likely to have capital gains of only $240,000 after a 13-year period of payments), and to buy WMRY New Orleans for $250,000.

Four commissioners voted to send him a McFarland letter indicating that neither of the two applications can be granted without a hearing. Observers believe these latest station sale and purchase transactions have been singled out for a possible test case. It is the first time in post-war years that the FCC has raised the out-and-out question of trafficking on the part of a multiple owner.

Part of Mr. Rounsaville's reply included lengthy documentation of what he said has clearly been a public service to most of the communities involved. He noted that most of his programming has been designed to suit the tastes and interests of Negro audiences in the absence of stations which do not devote their entire format to Negroes.

Fm's Place in Radio Spectrum Spelled Out by Fm Broadcasters

Fm's place in the radio spectrum was spelled out last week by Fm Broadcasters, a group of 150 fm stations, in comments filed in the FCC's current study of the 25-890 mc area of the radio spectrum.

The organization said there were 539 fm stations on the air as of Oct. 31, representing an investment of at least $25 million. It also declared there were 12 million receivers in the hands of the public, representing a minimum investment of $500 million. It pointed to recent fm activity in New York and Los Angeles, where applicants for fm channels were required to undergo comparative hearings, and to the 85 applica-

NEW ENGLAND

Massachusetts single station market, 250 w. full time in manufacturing city of 17,000. Last 12 months gross —$93,165. Owner will take $109,000 with 29 pct. down. Real opportunity for aggressive resident management.

MIDDLE ATLANTIC

1000 w. daytime monopoly in thriving city of 10,000. Will gross close to $70,000 this year with good earnings record. Price $75,000 with $25,000 down.

MID-WEST

1000 w. daytime in solid city of 35,000. Grossing at rate of $115,000. Price of $150,000 includes transmitter and seven acre site, plus $9,000 in net quick. Excellent equipment. $45,000 down.

WIDE WIDE WHIRL

A 500-mile-high astronomical space platform, carrying a giant 36-inch telescope whose pictures would be transmitted to earth via television, is one of the projects in the early planning stages by the Navy.

Tentatively scheduled for launching in about four years, the $500,000, one-ton platform would circle the earth once every 90 minutes with its telescope peering out into the galaxy. It would have a life of 20 years, it was estimated. Attached to the eyepiece would be a standard vidicon camera modified for 1,000-line definition, which would feed into a transmitter for direct broadcast to astronomers on earth. Not yet determined is the power or wavelengths to be used for this tv function, but Navy and industry scientists have indicated that regular, commercial equipment would be used. Power would be gained through solar batteries, it was explained. The telescope would be electronically focused on various objects in the earth.

The Navy's plans were made known by Dr. Martin Spitzer, professor of astronomy at Princeton U. Dr. Spitzer is chief advisor on astronomical problems to the Office of Naval Research. Dr. Spitzer also disclosed that film cameras have been used in 83,000-foot balloon flights in recent months. Getting a telescope this far above the earth's atmosphere has resulted in clearer views of the sun and stars, Dr. Spitzer explained.

Radio-Tv Columnist Sentenced; She's Released Pending Appeal

Radio-tv columnist Marie Torre of the New York Herald-Tribune Tuesday was held in contempt of court and sentenced by U. S. District Judge Sylvester J. Ryan to 10 days in jail. Miss Torre, however, a witness in the $1.4 million libel and breach of contract suit filed by actress Judy Garland against CBS Inc., was released in her own recognition pending determination of appeal.

Miss Torre earlier had been asked by the court to name the unidentified CBS "source" who, according to the complaint filed by Hess, Mela, Segall, Popkin & Guterman, Miss Garland's counsel, allegedly had made disparaging remarks about the star. When Miss Torre declined on constitutional grounds, the court served a show-cause order on the columnist. Miss Torre again refused. Her contempt of the CBS executive ran in a Jan. 10, 1957, column in part about Miss Garland's proposed CBS-TV spectacular which never came off.

The columnist's counsel, Cahill, Gordon, Reindel & Ohl, Tuesday filed an appeal with the second Circuit Appellate Court in New York. Sheldon Oliensid of CGR&O said he and his associate, Mathias F. Correa, are prepared to take the appeal to the U. S. Supreme Court, if necessary, for the columnist's protection and for all whether a reporter can be forced to identify confidential sources. The law firm argues that if Miss Torre is compelled to name her source, it not only would be an encroachment on the press but also a "possible interment of the right of the public to read all the news."

Lionel Popkin, Miss Garland's attorney, said that if Miss Torre is sustained, his associates will be prepared to call to the stand "all CBS officers and executives" and "confront them" with Miss Torre.

The appeal probably will not be returned until early next year.

Movies or No, It's Pay Tv
At Bartlesville, Says Langer

Sen. William Langer (R-N. D.) doesn't care what Henry Griffing, president of Video Independent Theatres Inc., calls his method of distributing motion pictures to televiewers—it's pay tv to the senator, and he's against it.

In a Nov. 13 letter to Mr. Griffing, Sen. Langer said Telemovies, which is what Video Independent terms its movie distribution system, is the same as any other form of subscription tv and he is going to introduce a bill in Congress in January to prohibit any form of toll tv, off-the-air or wired. Sen. Langer's letter was in response to a communication from Mr. Griffing last month explaining the difference between toll tv and Telemovies (SPECIAL REPORT, Nov. 4). The North Dakotan said:

"I wish to assure you that I am fully aware of the various forms of pay-as-you-see television, be it toll television, Tele- movies, or whatever you wish to give it. The important thing in my mind is that the public will have to pay under any method of transmitting programs through television sets. Telemovies, as you call it, can be wired or wireless and can be expanded to include tele-boxing, tele-baseball, tele-grand opera, tele-musicals, and on and on until programming to be transmitted to free television will be impaired and the television public will be damaged."

Hearing May Be Necessary On WTVQ TV Sale, Says FCC

Loren Berry and Ronald B. Woodward, who more than four years ago filed for FCC approval of the sale of ch. 47 WTVQ TV (Pittsburgh to Edward Lamb, last week were notified by an FCC McFarland letter that a hearing may be necessary on the sale.

In the letter, the FCC said the permittee's principal reason for not proceeding with construction of the station (awaiting FCC action on the transfer) does not meet requirements of the Communications Act. Any delay in constructing WTVQ has been due to a voluntary decision, FCC said.

Sale of WTVQ for $5,000 to Mr. Lamb was filed at the FCC July 22, 1953. The station, which was granted in 1952, has never been on the air.

A second McFarland letter informed Storer Broadcasting Co. that its application for modification of the construction permit of WSPD-tv Toledo, Ohio, appears to necessitate a hearing. This is indicated, the Commission said, because the proposed modifications would make the Grade A contour of WSPD-tv overlap substantially
According to statistical information, the BC-5P is the transmitter that more U.S. stations are purchasing this year than that of all other makes combined.

WHY? Because without a doubt, this is the finest 5 kilowatt transmitter on the market today, and station managers and engineers throughout the nation recognize its leadership. They know that this is a quality product ... a transmitter superior to all others. If sixty-one percent of all U.S. stations installing a new five kilowatt transmitter purchase the Gates BC-5P, you know that its reputation for dependability and outstanding performance are not just claims made by Gates, but are facts substantiated by an overwhelming customer preference!

Why don't you get all the information on this industry leader? Contact the Gates Radio company today for complete details on the BC-5P 5kw transmitter.

*Statistics compiled through October 1, 1957, from 5 kw sales records maintained by Gates, which are assumed to be accurate.

with the signal of Storer's WJKK-TV Detroit.

WSPD-TV has requested a transmitter site 6½ miles northeast of Toledo and an increase in antenna height from 510 to 1,000 feet, with a power of 316 kw.

**Government Lifts Prohibition On Photos in Federal Buildings**

The General Services Administration has removed restrictions on taking news photographs in public areas of federal buildings, Rep. John E. Moss (D-Calif.), chairman of the House Government Information Sub-committee, announced last week. The new GSA order, signed by Administrator Franklin G. Floete, states:

"News photographers may, without prior permission, take any pictures they desire in public space controlled by the General Services Administration, in single or multiple occupancy public buildings, except where applicable security regulations or a federal court order or rule prohibits such photography."

GSA is the government agency charged with ownership and maintenance of federal buildings.

In announcing the new order in a letter to Rep. John Bell Williams (D-Miss.), who had faced a protest with the subcommittee against the camera ban, Rep. Moss said his subcommittee had asked Mr. Floete to make sure that "unjustifiable restrictions would not be placed on photographic access ... to federal buildings. "The people have the same right of photographic access to information as they have to information gathered by pen and pencil reporters," Rep. Moss pointed out.

The rescinded order required that "permission of the GSA building superintendent or custodian must be obtained to take photographs" in all corridors, lobbies and other sections of federal buildings. Photographers then had to take part only in "mural or historic or other features" of federal buildings, according to Mr. Floete.

**KBET-TV Modification Grant Set for Hearing by FCC**

The FCC last week set for hearing its Dec. 9, 1954, action granting KBET-TV Sacramento, Calif., a modification of its construction permit. The action complied with a mandate of the U. S. Appeals Court in Washington, D. C.

The modification had been protested by McClatchy Broadcasting Co. (KFBK Sacramento), losing applicant for the ch. 10 facility held by KBET-TV. The case, with a long history of litigation, has been before the courts—and the FCC—several times since KBET-TV received the ch. 10 grant in October 1954. This grant was upheld by the appeals court early in 1956 [Government, Jan. 30, 1956].

The FCC approved the KBET-TV application to move its transmitter site and decrease antenna height less than 60 days after the original grant. McClatchy appealed this action and asked for a hearing which was denied by the FCC on the ground McClatchy had no further standing in the case. The losing applicant then appealed again to the court, charging that the modification constituted a fraud.

On this appeal, the court ruled in favor of McClatchy and returned the case to the FCC [Government, Oct. 22, 1956]. As a result, the commission last week scheduled a hearing on the KBET-TV modification to determine, among other things, if KBET-TV and/or its president, William P. Wright, made false representations to the FCC. McClatchy was made a party to the proceedings.

In the same order which set the case for hearing, the FCC denied a second McClatchy request that the modification grant be stayed pending a final disposition of the case.

**FCC Sets New England Trip To Inspect UHF Operations**

A field inspection trip of uhf operations in New England is scheduled by the FCC this Friday. Sponsoring the trip Committee for Competitive Television, five FCC commissioners plus top staff members will inspect ch. 22 WWLP (TV) Springfield, Mass., its satellite ch. 32 WRLP (TV) Greenfield, Mass., and its ch. 79 translator in Claremont. N. H. WWLP also holds construction permits to translators in Lebanon, N. H. (ch. 81), which includes Hanover, N. H., and White River Junction, Vt., and in Newport, N. H. (ch. 71).

Scheduled to participate in the 24-hour flying trip are FCC Chairman John C. Doerfler and Comms. Frederick W. Ford, Richard A. Mack, Robert T. Barney and Rosel H. Huey. Among staff executives are Harold G. Cowgill, Broadcast Bureau chief, and Mary Jane Morris, FCC secretary. Also among the guests are Dr. George W. Town, executive director, Television Allocations Study Organization, and Nicholas Zapple, professional staff member (communications) of the Senate Commerce Committee.

**FM Unlimited Favor's Retention Of FCC Multiplex Requirement**

FM was asked Thursday to deny WPEN-FM Philadelphia's petition for deletion of a Commission rule requiring fm stations engaged in functional music to convert to multiplex by Jan. 1 [Government, Nov. 4].

Filed in the form of an "open letter" to the FCC by FM Unlimited Inc., Chicago, sales and promotion representative firm for 30 fm outlets, the petition also asked for a re-examination of "the entire fm picture," because of the multiplexing situation and the interest of non-broadcast services in "all or part" of the fm band. It was signed by Charles Kline, FM Unlimited president, and sent to individual commissioners.

The petition represented an all-out attack on background music operators, who were charged with feeling "they are responsible for the success of fm." It claimed the WPEN-FM petition poses a battle-line between "genuine broadcast service for the public" and "the use of fm channels for specialized services not intended for the public."

WPEN-FM had claimed that, unless the FCC rule is deleted, fm stations will be unable to continue operation.

**PERSONNEL RELATIONS**

**RTDG-NABET Dispute at NBC Goes to Mediator George Meany**

The Radio & Television Directors Guild and the National Assn. of Broadcast Employees & Technicians had until last Friday to submit various memoranda to arbitrator George Meany, president of the AFL-CIO, to support their respective positions on their dispute governing instructions to technical crews working on NBC-TV programs [At Deadline, Personnel Relations, Nov. 11].

Both unions indicated they would have their briefs in Mr. Meany's hands by the deadline and have pledged to abide by the outcome of arbitration. At a meeting with the unions on Tuesday, Mr. Meany said a decision would be issued "shortly" after he received the memoranda.

The dispute began the weekend of Nov. 1-2 when RTDG decided to implement a right it claims it has in its contract to give instructions on programs directly to NABET crewmen without liaison with NABET technical directors. By tradition, for more than 10 years, directors had operated through technical directors at NBC-TV. On Nov. 8, RTDG personnel walked off NBC-TV program, charging a "lockout" because the network asked directors to operate under the conventional system. The following day, an agreement was reached to submit the dispute to arbitration and to continue the traditional system of operation until the arbitrator's decision is announced.

**Chicago AFM Local Nominates Petullo for New Five-Year Term**

James C. Petullo was a shoosh-in this week for a new five-year term as president of the American Federation of Musicians Local 10, Chicago, starting Jan. 14.

Approximately 300 of Local 10's 12,000 members attended a meeting for nomination of officers. Mr. Petullo, who has been president of the AFL-CIO American Federation of Musicians 17 years, was renominated Wednesday without opposition with his election a mere formality.

Mr. Petullo disclosed he makes $26,000 a year as head of the parent musicians union and $26,000 as head of Local 10. He said he favors regulation for proper control of international and local union treasuries to "prevent misuse of dues." Mr. Petullo, vice president of the AFL-CIO, also favors other corrective labor laws, including proposed legislation on pension and welfare funds.

**WCKY Charges Secondary Boycott**

Unfair labor charges have been filed by WCKY Cincinnati against the American Federation of Television & Radio Artists and its Cincinnati local, according to the National Labor Relations Board. The station charges AFTTRA is causing a secondary boycott through transcription firms which service WCKY. Seven members of local 477 members of AFTTRA, have been on strike since Aug. 28. Earlier, the union filed an unfair labor charge against the station but withdrew it Sept. 18.
TO FILM
A SUCCESSFUL SHOW...

It takes more than just a good script to insure the success of a top-rated network program. The on-stage performances of the stars and supporting cast must be outstanding, carefully timed, superbly directed. And the camera must perform flawlessly in its vital role of recreating the superior quality of the show for millions of TV viewers.

Mitchell cameras—internationally famous—provide the matchless photographic performances so necessary to the successful making of the finest theater quality films. That is why, wherever top quality filming is the foremost consideration, Mitchell Cameras are to be found... bringing success into focus.

MITCHELL The only truly Professional Motion Picture Camera

Sullivan Develops New Strategy As Warner Notes Trendex Score

As an obvious pitch for a bigger share of the youthful audience, CBS-TV’s Ed Sullivan Show (Sun., 8-9 p.m. EST) last week announced it has signed “a host of singing stars whose records have captured the fancy of the nation’s youth” for appearance during the first half-hour of each program. Artists include Sam Cooke (“You Send Me”); Eberly Brothers (“Wake Up Little Susie”) and the Rays (“Silhouette”) among others.

The Sullivan announcement came as Warner Bros. announced that its western Maverick on ABC-TV in the same period had “won a stunning double victory over both the Ed Sullivan and Steve Allen shows (NBC) in the weekly Sunday evening Trendex battle.” Warner Bros. said Maverick hit 22.1, Sullivan 16.7 and Allen 13.8 Nov. 10. Warner boasted Maverick achieved in eight weeks on the air “what no other show has been able to accomplish in almost nine years.”

KYW-TV Marches for MGM Movie

A live lion was used to lead a street parade in Philadelphia honoring the MGM film, “Thirty Second Over Tokyo” shown on KYW-TV Cleveland Nov. 6. The Civil Air Patrol gave a display of precision marching, while CAP aircraft flew overhead. Also in the parade through the city were an Air Force color guard and vehicles, a bevy of models in 1958 convertible cars, an MGM float, drum majorettes and an Irish wolfhound. The commander of Cleveland’s Air Force Recruiting Office presented a certificate of merit to KYW-TV for showing the film about the Air Force.

KPHO-TV Promotes With Twins

Identical twin girls appeared on behalf of KPHO-TV Phoenix at the opening of the Arizona State Fair Nov. 2. The 17-year-old brunettes distributed bright green lollipops imprinted with the station’s “Channel 5” as they toured the fairgrounds. The girls wore short white flared costumes trimmed with green “S’s” and carried banners identifying them as the “KPHO-TWINS.”

ABN Runs Affiliates Contest

American Broadcasting Network last month circulated a plea for promotional ideas to ABN affiliates in the form of a contest. Each month the promotions and exploitation department will award $25 to the promotion director submitting the “best promotion or exploitation idea of the month.” Contest will be repeated each month with winning ideas being circulated among other affiliates. Entries will cover station promotion, personality promotion, merchandising tie-ins, stunts and gimmicks.

Romeo & Juliet Opinion Asked

WTIC-TV Hartford, Conn., presented J. Arthur Rank’s 2-hour, 20-minute “Romeo and Juliet” film without cuts Nov. 3. The station undertook this so students of Shake-
Symbol

We rather like this photo of our Floyd Conn... we think it's symbolic.

Here Floyd, who is a Western Electric installer, is soldering telephone cable in a new Bell central office... helping install dial switching equipment made at our factories. And the connection he makes symbolizes the close bond that exists between ourselves and Bell telephone communities—including yours—through telephone service.

Each month, Western Electric installers are busy on about 4,000 separate jobs in over 500 cities and towns across the country... making additions, modifying equipment, changing manual switching equipment to dial service— to mention a few. By working closely with Bell telephone companies—as we have now for 75 years as the manufacturing and supply unit of the Bell System—we become part of the community's Bell telephone service.
NOW TOPS 82 MAJOR TV MARKETS WITH 30.4 SETS-IN-USE SCORE!

Illinois' No. 1 market, outside Chicago, is prosperous Peoria area—where your TV commercials have greater impact than in New York, Los Angeles, Philadelphia, St. Louis or 78 other big TV market areas. Sets-in-use actually average 30.4%—sign-on to sign-off—one of the nation's most phenomenal ratings! (ARB Jan., Feb., Mar., '57)

And in this No. 1 market, there's a No. 1 station—with the top programs, the top power (500,000 watts), the top tower (660 feet) and the top ratings:

ALL FIVE Columbia radio stations (WCOS, WIS, WNOK, WMSC and WOIC) cooperated in the city's "Million Dollar Days" promotion, during South Carolina Fair Week. The governor and the mayor of Columbia attended the occasion which is built around the U. of South Carolina vs. Clemson College football game. The local Chamber of Commerce retained Tom Daisley Advertising Agency to plan and coordinate the outdoor and radio phase of the promotion. The agency used a saturation spot campaign in which 625 announcements were made for the 62 merchants participating in the Fair Week promotion. Pictured at an agency-planning meeting are (l to r): W. Mende, assistant manager, WOIC; Betty Blair, account executive, TD Adv.; Tom Daisley, president, TD Adv.; Gerry Quick, sales manager, WNOK; (standing): Hub Terry, sales manager, WCOS; James H. Whitaker, sales manager, WIS, and Miller Montgomery, sales manager of WMSC.

KEYT Goes Gardening With Gordon

A garden at KEYT (TV) Santa Barbara, Calif., studios is the scene of its new "Gardening With Gordon" show, which started Nov. 15. Well-known western gardening authority Gordon Baker Lloyd and his wife, Sassy, joined the station to present the show, which stresses practical gardening for beginners, plus information and demonstrations for the care of indoor plants, shade plants lawns, soil development and advanced study for more active gardeners. A special feature is the issuance of printed matter concerning the topic discussed on each week's program.

CHWO Feeds Breakfast to 250

When the local electric power commission announced that power would be off during the morning hours on Nov. 2, CHWO Oakville, Ont., told listeners it would continue broadcasting directly from the transmitter site, rather than from studios where power would be cut. Discussing how CHWO would handle the morning programs, the announcer said the staff would be fed barbecue style at the transmitter site. That morning 250 listeners, some from 25 miles away, turned up for breakfast at the transmitter. They thought they had been invited. The CHWO staff prepared enough food and drinks for all.

WGN-TV's 'Supermarket Quiz'

A daily "Supermarket Quiz" has been launched by WGN-TV Chicago. Each day Jack Brickhouse emcees a telecast from a different supermarket, interviewing homemakers, supervising games and quizzes and presenting prizes. The station describes the undertaking as a substantial engineering and production remote. To call attention to its new series, WGN-TV sent out baskets of food products which are advertised on its facilities to members of the trade. Among the stores visited are those operated by National Food Co., Kroger Co. and Jewel Tea Co.

Pigeons Promote WINE in Buffalo

Fifty leading Buffalo advertisers and retailers each received a beribboned box from WINE Buffalo, N. Y., inside which they found a live homing pigeon. Each recipient was asked in an accompanying note to put a message in the tube on the bird's leg and release it. The pigeons winged their way back to the loft near WINE's studios. Several orders were placed as a result of this unusual promotion.

TV FREEDOM FIGHTERS

KOOL-TV Phoenix, Ariz., the station that some time ago adopted the battle cry, "See it free on KOOL-TV," has organized a speaker's bureau as the latest step in its mobilization against toll television. Staffers who will speak "anytime, anywhere" on free television are Homer Lane, assistant general manager; Kenneth Morton, station manager; Jack Murphy, assistant manager; Jack Ware, news editor; Ralph Painter, news photographer, and Don Harvey, news commentator.
THE COLLINS MAN IS HERE WITH YOUR RADIO STATION, SIR.

Everything you need to get on the air fast with the strongest, cleanest signal . . . from microphone to antenna. Collins is a single, complete source of broadcasting equipment.
Steelworkers Complete Lineup For TV Program on 29 Stations

The debut of United Steelworkers TV Meeting of the Month was completed in 29 markets yesterday (Sunday) as the AFL-CIO union rounded out the station lineup for its new half-hour film show.

The program, first seen in some markets Nov. 10, is designed to show union operations and labor issues to both membership and public, according to David J. McDonald, president of the steelworkers, who listed another goal as encouragement of membership to attend local meetings.

Carrying the half-hour program are WLWA (TV) Atlanta; WMAR-TV Baltimore; WGLV (TV) Easton, Pa.; WBRC-TV Birmingham, Ala.; WHDH-TV Boston; WGR-TV Buffalo, N. Y.; WKRC-TV Cincinnati; WEWS (TV) Cleveland; WJBJ-TV Detroit; WDSM-TV Duluth, Minn.; WBKB (TV) Chicago; WTPA (TV) Harrisburg, Pa.; KPRC-TV Houston; WTTV (TV) Bloomington (Indianapolis); WJAC-TV Johnstown, Pa.; KCOP (TV) Los Angeles; WISN-TV Milwaukee; WPIX (TV) New York; WFIL-TV Philadelphia; KDKA-TV Pittsburgh; KCSJ-TV Pueblo, Colo.; KTVM (TV) Salt Lake City; KGO-TV San Francisco; KTVV (TV) Seattle; KTVI (TV) St. Louis; WTVT (TV) Tampa, Fla.; WTTG (TV) Washington; WSTV-TV St. Louis; WTVI (TV) Steelville; Ohio-Wheeling, W. Va., and WFMJ-TV Youngstown, Ohio.

GUESTS of WFGA-TV Jacksonville, Fla., at its weekend dedication ceremonies Nov. 8-9 went to the Florida-Georgia football game Saturday in the "Gator Bowl also as guests of the Florida-Georgia Television Co., which has been telecasting on ch. 12 since September. Front row fans (l to r): Jesse H. Cripe, WFGA-TV station manager; H. Preston Peters, president, Peters, Griffin, Woodward Inc., national representative for WFGA-TV, and Thomas E. Knude, NBC vice president, station relations.

Several hundred attended the WFGA-TV weekend party from ranks of local and state governments, Congress, NBC, PGW, RCA, NARTB, national trade publications and others. Mr. Cripe, Mr. Knude and Mayor Hayden Burns of Jacksonville appeared with the station staff on the dedication telecast Friday evening. After the ceremonies, station guests adjourned to the George Washington Hotel for a reception and buffet supper. The public, invited to see the new WFGA-TV studios Sunday and Monday, turned out 5,000 strong. One drawing card was the porpoise Jaxie (embodifying WFGA-TV's ID mascot), who was brought from Marineland, Fla., and installed in a tank outside WFGA-TV studios.
"Microphones Make the Difference!"

... says A. FRIEDENTHAL
Chief Engineer, WJR, Detroit

WJR modernizes with

ElectroVoice®

"... because of their quality of reproduction, and amazing economy."

"After checking repair and maintenance costs, we changed to Electro-Voice one year ago. Frequency of repair and cost of repair was five to six times as great on other brands," says Mr. Friedenthal. "Now, Electro-Voice is the WJR microphone."

Since 1927, WJR, The Goodwill Station, has been active in the development and construction of equipment best suited to the broadcasting art. Much of this equipment utilizes basic Electro-Voice components—proof of one of the country's leading station's faith and confidence in Electro-Voice broadcasting equipment.

PROGRAMMING CONTINUED

TEENAGERS GET NEW NIGHTSPOT

To give high school students an opportunity to dance to music they like in a "grown-up, sophisticated atmosphere," WTTM Trenton, N. J., opened a teenage night club Friday. Luxuriously appointed and styled "after Broadway's finest," the Castle Roc, as it will be known, is opening exclusively for students Tuesday, Wednesday and Thursday 3-10 p.m., Friday 3-midnight admission: 25 cents before 6 p.m., 50 cents after. The project grew out of WTTM's broadcasts from its studios at Seaside Heights, N. J. The station will originate its Dance Party from the high school night club and a live entertainment policy will be scheduled for Friday and Saturday evenings. Such cities as Detroit, Chicago, Indianapolis and Buffalo have teenage night clubs and, in following the pattern, it is WTTM's plan to, "help cut down juvenile delinquency by giving teenagers a respectable place to go for dancing after school and after the weekend movie date."

Standing Room Only at WKRS
WKRS Waukegan, Ill., took a full-page ad in the Oct. 29 Waukegan News-Sun to announce, "in the interests of good programming, our facilities for advertising have been sold out until Jan. 1, 1958." WKRS reported it is not accepting any new contracts except those effective after that date. The ad was captioned, "We've reached our limit . . . at least for the present," and added that WKRS' acceptance of more business would mean interfering with listeners' enjoyment of musical programs and its refusal means the station is "literally turning away thousands of dollars in revenue."

Parents Tuning In to Teeners
Parent-listeners to KSFO San Francisco who wonder what their teenage children talk about when alone are interested in its new "eavesdropping" program, KSFO reports. Each Friday and Saturday night disc jockey Kay Winfield airs his Nightcap show from the sponsor's drive-in restaurant and turns over the first hour to the teenagers gathered there. Between selections of records to be played, the young people chat about whatever they choose, while the drive-in sees they're well supplied with hamburgers and milkshakes.

WHK Gets 'Party Line' Answers
WHK Cleveland is airing a listener-participation program, Party Line (Mon.-Fri. 1:05-2 p.m.), with listeners phoning in "I've got a problem" questions to m.c. Bruce Charles, who invites others in the radio audience to call in suggested solutions.

LATEST entry in the mobile broadcasting field is this Vespa scooter van now used by KIMA Yakima, Wash. Chief Engineer Dovel De Von looks over the completely battery-powered unit, which includes two-way short-wave broadcast and tape machine equipment. KIMA, a CBS affiliate, is owned by Cascade Broadcasting Co.
PERSON TO PERSON

While aboard the sea-going S.S. Catalina, Carl Bailey, KBIG Santa Catalina, Calif., disc jockey, got in touch with the pilot of a plane circling above. The aircraft, from the Los Alamitos Naval Air Station, was "tracking" the ship for radar spotting practice and the d.j. described it to listeners of his regular sea-going program. Coincidentally, the flyers were using KBIG as a navigational fix and when Mr. Bailey called to the plane to dip a wing if it was tuned in, the pilot complied. When he returned to Los Alamitos, where he is stationed, the pilot wrote a letter thanking the disc jockey for the Navy plug and invited Mr. Bailey to visit the anti-submarine air station. KBIG listeners had a full report of the conducted tour and are awaiting a play-by-play account of a sub-hunting mission in which the disc jockey also has been invited to participate.

KPBA Gets Stuck in the Groove

On its fourth day of commercial air operation Oct. 25, KPBA Pine Bluff, Ark., was giving its record introductions normally, except for one thing—it played the same record over and over for six hours. By that time more than 100 carloads of curious people had come by the studios and the phone had rung 8,000 times, until the station stopped answering it, pulled down the blinds and locked the doors. Pine Bluff's new station got stuck in the groove to "test its listenershhip," and to "point out that KPBA is a different type of radio, where there's very little talking and a lot of music...."

Firms Give Own Plugs on KSIL

Personnel to operate KSIL Silver City, N. M., on its Grant County Day celebrations, was provided by 45 local firms. The station got as many businessmen to participate as possible and from sign-on to sign-off they played the records, read all the news, commercials and announcements. During his stint at the mike, each guest was allowed to identify himself and give his own business a plug. The visitors were taken on a tour of the station. "It helps them understand our business and problems much better," said Jim Duncan, KSIL's owner-manager.

Quaker Oats Signs for 'Roses'

Quaker Oats will sponsor CBS-TV's coverage of the 69th annual Tournament of Roses in Pasadena, Calif., on New Year's Day in a two-hour broadcast beginning at 11:30 a.m. The parade, covering a five-mile route, will be covered by four CBS-TV cameras.
STAMPS FEATURING RADIO AND TV: (1 to r) top, France for tv, Luxembourg for tv and radio, and, lower, by Italy for tv, Monaco for Radio Monte Carlo, by Turkey and by West Germany for its radio, tv and shortwave broadcasting installation at Berlin.

RADIO-TV'S PROGRESS CHRONICLED IN STAMPS OF OTHER NATIONS

To the philatelist, no greater homage can be rendered a person, place, event or industry than the issuance of a commemorative stamp. So it was natural that a stamp collector, whose livelihood is from radio, recently pointed out that numerous foreign countries have accorded such recognition to the electronic media. However, he added, these nations do not include the U. S. or Canada where radio and tv have made its largest contribution to national welfare.

"Many other industries have been featured on stamps of these countries," he said. "Perhaps the NARTB and the Canadian Assn. of Radio & Television Broadcasters can persuade their respective governments to publicize some future anniversary of radio-tv on stamps, especially for mail to other countries."

A study of several foreign stamp issues shows how radio and television is receiving philatelic recognition abroad. When television started in Italy in 1954 and in France in 1955, the postal authorities in those countries issued special stamps. Italy's stamps are the only ones issued anywhere which feature a television receiver screen, while the French stamp shows the television transmitter antenna on the Eiffel Tower and tv antennas on rooftops.

Luxembourg, that small principality between France, Belgium and Germany, where commercial broadcasting has been in existence for many years, issued a postage stamp in 1953 for Radio Luxembourg. The stamp shows the antenna layout and transmitter building of that well-known European broadcasting station. On the occasion of the opening of Television Luxembourg in 1955 a stamp was issued picturing the television antenna at Dudelange.

One of the first countries to feature radio on its stamps was the small republic of Guatemala which in 1919 issued a stamp showing two towers with a flat-top antenna hanging between them. It commemorated Guatemala's start in radio.

Anniversaries often are used by countries to issue special stamps. In 1955 Turkey marked a centenary of its modern communications, and one of the stamps printed portrayed a modern radio and television tower. Similarly, Western Germany last year for an industrial fair at Berlin pictured the antenna system of its radio and television broadcasting establishment at Berlin.

The small coal and steel mining area of the Saar, between France and Germany, which recently reverted to Western Germany by popular vote, last year marked the event of its first television station with a view on a commemorative stamp of a tv transmitter antenna and a number of microwave antennas and microwave discs on a tower at Saarbrucken.

Monaco, on a 1951 set, publicized Radio Monte Carlo, one of Europe's few commercial broadcasting stations. The stamp showed an air view of Monte Carlo with the station's antenna in the background.

Switzerland in 1952 marked a century of its telecommunications systems with a set of four stamps, the top two values of which featured radio and television, while the lower values were devoted to telegraphy and the telephone.

Norway, on a postage set for the centenary of its telecommunications, showed...
radio towers of the government broadcasting system on certain stamps of the set.

These are but a few examples of what some countries have done to honor radio and television on postage stamps. In many cases the postal authorities in these countries also operate the radio and TV stations.

While no commercial broadcasters have been portrayed on stamps as yet, some personalities who played important parts in the development of radio communication have been portrayed. For example, Marconi was featured on Italian stamps in 1938. Nicholas Tesla has been on several issues of Yugoslavia. Russia, which claims A. S. Popov invented radio, issued a stamp to the inventor in 1945 on the occasion of the 50th anniversary of his invention of radio. Hungary in 1948 also had a stamp for Popov. Others who have contributed to various segments of tele-communications, such as Thomas Edison, Samuel B. Morse, and Alexander Graham Bell, have been featured on stamps of a number of countries, including the United States and Canada.

Boston Agency Strikes Back At Reds With U. S. ‘Giveaway’

A Boston advertising agency, striking back at Moscow Radio’s ideological quiz contest, has promised a bigger and better one from the U. S. to Moscow. Chambers, Wiswell, Shattuck, Clifford & McMillan Inc., Boston, has announced the ‘American Million Ruble Sweepstakes’.

Two shortwave operations, WRUL Scituate, Mass., and Radio Liberation, Munich, Germany, have offered to carry the Million Ruble Sweepstakes free, but no decision has been made yet. According to Benjamin Shattuck, president of the New England agency, the promotion is intended to give Communist-dominated peoples an idea of the American standard of living.

Nathaniel H. Sperber, vice president in charge of public relations and creator of the shortwave giveaway, said the agency is carrying it out on its own patriotic initiative. Quiz prizes are being donated by manufacturers of boats, freezers, phonographs, cameras, shotguns and other commodities typifying the American standard.

Although the show won’t be heard for some weeks, professors from Harvard U., Massachusetts Institute of Technology and Boston U., already have held their first meeting on Sweepstakes questions. They will be phrased to show material and cultural standards of U. S. citizens.

Announcement of the American Million Ruble Sweepstakes came on the heels of Moscow Radio’s report that its shortwave quiz for North Americans had come up with more winners than prizes available. Listeners answering seven questions on Russian communist history correctly totaled 39, but only 10 prizes were available. The Reds solved the problem by drawing 10 U. S. names out of a hat to receive radio sets, cameras and records. The two-week quiz drew 1,270 entries from North America, it was reported.
Representatives of 14 nations attended the First World Congress on Commercial Television in London. Sparked by Gen. Robert W. Johnson, chairman of the board of Johnson & Johnson, the congress was sponsored by the firm as a public service to television. It was held in September in conjunction with a Juronet promoting Johnson & Johnson’s Robin Hood. Those attending, including 66 U.S. tv editors, viewed commercial samplings from Luxembourg, France, Great Britain, Monte Carlo, Iraq, the U.S., Cuba, the Philippine Islands, Puerto Rico, Canada, Japan, Mexico, Brazil and Argentina. George N. Thomas, KDKA-TV Pittsburgh news editor, reported his impressions to Broadcasting:

How does a Pakistani prefer his pitch? Serious, if the informal survey taken at the First World Congress on Commercial Television bears any weight.

Although commercial television is not yet every country’s meat, the question of what type of commercials the public likes was a major topic at the congress. Representatives chose a “typical” commercial from a sampling session. Some of the results: Mexicans take to a humorous sell; British and Americans prefer commercials brief and “sincere.” Japanese audiences vote for a restrained and indirect selling message; in Pakistan, where tv is seen only in theatres, the serious approach sells best. Although France is blacked out to commercial tv, French-made commercials tend to be artistic and beautiful.

From all reports, the American sell has had its impact on world tv, but an American viewer would find some differences. In Monte Carlo, in Great Britain, in Japan, there’s no such thing as the familiar “and now a word from our sponsor...” The commercial is woven into the program, perhaps by an actor who holds the product in his hand as the camera dollies in on the label. The actor keeps right on going with his lines. In Great Britain, sponsors’ products are sold one after the other in “commercial programs” from a minute to 15 minutes long.

Wherever there’s tv, the viewer wants to be entertained. News shows with a flexible “roving reporter” format are popular everywhere. In France, news shows open and close the broadcasting day. In Monte Carlo, Brazil and Luxembourg, they are the most popular viewing fare.

Children’s shows are programming features in half the countries with tv. In Iraq, the children’s story-teller is so popular he is on the air seven days a week. Most of the popular children’s shows are U.S. commercial products.

General consensus of opinion at the congress was that in nations where both government-owned and commercial stations compete, dialed seem to turn more often to commercial programming.

In other sessions, the meeting, delegates discussed the potential of television as a medium of peaceful communication between nations. Robert E. Button, chief of the International Broadcast Service of the U.S. Information Agency, reported on U.S. aid in developing tv in Iraq, Sumatra and Lebanon. At a luncheon session, delegates heard Charles E. Wilson, president of the People-to-People Foundation, urge tv executives to use the medium to promote friendship and international understanding. Television, he said, “is truly the window of the world,” and he asked for television’s aid in “leaping governments,” if necessary, so that the people of East and West can learn more about one another.

Canadian Am Bid Planned

International Radio & Television Corp. Ltd. plans to seek a license for a new radio station on 1140 kc with 1 kw at Kitimat, B.C., at the Dec. 6 meeting of the board of governors of CBC at Ottawa. The station will be located at a new aluminum smelting town 400 miles north of Vancouver.

CKTR Three Rivers, Que., will request the CBC board of governors to allow a change of ownership from CKTR Limitee to Paul Aboud of Three Rivers, who plans to form a new company to buy out the present owners.

Canada Radio Sales Up, tv Down

Radio receiver sales continue upward while those for television are still on the downturn in Canada, according to the January-September figures of the Radio-Electronics-Television Mfrs. Assn. of Canada. In the first nine months of this year, radio set sales totaled 389,509 units compared with 370,370 for the similar 1956 period. Television set sales amounted to 285,338 sets compared with 411,562 in the 1956 period.

The province of Ontario accounted for the largest number of radio sets, 179,420, and tv sets, 111,206, in the January-September period. Quebec province followed with 90,027 radio receivers and 84,289 tv sets.

Canadians Pay 18 Cents Weekly
For CBC Services, Says Report

National broadcasting service costs the
average Canadian family 18 cents a week
in public funds, the CBC told Canadians
in a "report to 16,420,000 shareholders."
The paper was a condensation of the CBC's
annual report.

The report points out that "the CBC, with
the assistance of privately-owned stations,
operated five national radio and television
networks, three in English and two in
French" last year at a combined cost in
public funds of about $40 million. Because
the CBC is a publicly-owned corporation
every Canadian is a shareholder, and
this is the reason the CBC has issued the mini-
ture report, General Manager Alphonse
Ouimet said. The report deals primarily
with CBC program activities.

GIFT HORSE

John G. Clark Jr., commercial manager of WNCT (TV) Greenville, N. C., won $140,000 in the Irish Sweepstake run on the Cambridgeshire Handicap at Newmarket, England. The Clarks plan to share it with Mrs. Clark's mother—who sent them the ticket as a gift. Mr. Clark figures the U. S. government will take $111,000, with the state government getting about $9,000.

Charles A. Bornstein, formerly assistant news editor, NBC, to traffic staff of N. W. Ayer & Son, N. Y., radio-tv department.

Lucille Widener, John E. Pearson Co. (station representative), to Victor & Richards, N. Y., as timebuyer succeeding Janet Murphy, who joins Lawrence Gumbinner, same city, in similar capacity.

FILM

Donn B. Tatum, named vice president, TV marketing, Walt Disney Productions, Burbank, Calif. James A. Johnson, executive vice president, Walt Disney Music Co., and secretary of Walt Disney Productions, resigns his position with WD Productions to devote full time to Music Co. Luther R. Marr, legal staff, succeeds him as secretary.

Richard Sassenberg, traffic manager, RKO Television, resigns to become president of Piclear Inc., N. Y.

Sam W. Steele Jr., southern account executive of Official Films, promoted to manager of southeast area, succeeding Jeff Davis, who has resigned. T. C. Calender added to sales staff.

Alfred E. Stern, formerly publicity director, RKO Radio, appointed west coast public relations director, National Telefilm Assoc., N. Y.

John Cooper, named managing editor of CBS Newsfilm.

Jay Piccinati, sales representative, Alexander Film Co., Colorado Springs, named marketing director. Other appointments include: Cliff Parker, general sales manager, theatre screen advertising general manager; Cy Martin, northern division sales manager, home office sales manager; Frank Clinebell, southern division sales manager, eastern division sales manager, succeeded by Bert Adcock, district sales manager. Don Bates, sales representative, becomes head of western division.

AMPEX AUTOMATIC PROGRAMMING

Anyone for Automation?

Yesterday it was easy to say "No" or "Maybe" to the question of automation. Tomorrow there will be few station operators who can afford to say anything but "Yes."

In fact, many are saying "Yes" today, and finding it both easy and profitable to take the first step toward automation. Installing an Ampex Model 355 Integrator, at a cost of well under $1000, provides a variety of basic automatic functions adaptable to a wide pattern of station operation methods.

Whether you're interested for today or for the future, it will be helpful to have the facts from Ampex. Call in the Ampex man, or send for the new Ampex Automatic Programming Brochure.
PEOPLE CONTINUED

Edward Lewis, producer-writer, Bryna Productions, Hollywood, named tv program and packaging department head.

Herman Rush, president, Flamingo Telefilm Sales Inc., N. Y., and Lee Savin, Hollywood sales representative, to Batjac Corp. as sales representatives.

Westinghouse Electric Corp. announces appointments of marketing directors for three of company's major product divisions. Appointments were: S. F. Davies, with WEC since 1939 and most recently sales manager of M'craw division, Hampton, S. C., to marketing director, General Products division; L. H. Loufek, to continue as manager of customer relations and retail syndicate operation, also will serve as marketing director, apparatus products; and R. M. Wilson, since 1954 sales manager of Defense Prod-
Markets are changing. Pressures are increasing to create more demand for goods and services. Advertising and marketing men are more than ever enthusiastic about PRINTERS' INK. Because more than ever it puts the focus on the integration of advertising, selling and marketing with the fast-moving events which influence the currents of business.

The editorial program of the new PRINTERS' INK is unique in covering the broad scope of the activities in today's concept of marketing. It pin points the subjects and covers them in depth; in authoritative, exciting news magazine style that has won the acclaim of top executives across the land.

No other publication is doing this kind of a job for the all important distribution half of American business. Only PRINTERS' INK attempts to so integrate the advertising, selling and marketing functions and techniques with the whole of business management. With its rich background of reporting the best thinking in the field, enhanced by recently expanded facilities, PRINTERS' INK is admirably equipped to do this competently.

The key men in the marketing process who influence and make the decisions on advertising for their companies are readers of the new PRINTERS' INK. You can reach more of them with your sales message in PRINTERS' INK than in any other advertising publication.
FOR A HAPPY PRESENTATION

The joy of accomplishment is a universal happiness. Especially in the case of a film which is your creation, born out of hard work and careful planning.

Because Precision's staff of specialists adds its own creative efforts to yours by the use of specially designed equipment, and by careful handling and intelligent timing—you might say we are fellow creators, working with you to bring out all you've put into the original...Yes, and maybe more!

So, when you turn those 16mm dreams into realities, be sure to call upon Precision for the accurate, sound and exact processing your films deserve.

Remember: Precision is the pace-setter in processing of all film. No notchng of originals—same to same color correction, optical track printing, all are the very best...35mm service, too!

you'll see...and hear Precision

FILM LABORATORIES, INC.

In everything, there is one best...in film processing, it's Precision

IVONE THE TESTY

Sir Ivone Kirkpatrick, appointed to head Great Britain's commercial television service, Independent Television Authority, either enjoys a challenge or possibly neglected to consult a vocational counselor before he took the job. At a London news conference after his appointment, Sir Ivone said he doesn't like commercials very much and added quiz programs and crooning to the peewee list. The new commercial tv chief succeeds Sir Kenneth Clark, who resigned the $8,500-a-year post last August. Sir Ivone is retired from the British Foreign Office.

ucts division, Pittsburgh, to marketing director, Defense Products.

Fred Hertz, formerly with radio-tv department of Willard Alexander Inc., appointed director of programming and production, Gotham Recording Corp., New York.

INTERNATIONAL

Johnny Nadon, sales staff, Canadian Marconi radio-tv sales division, to CJMS Montreal, as manager.

Peter Stursberg, formerly United Nations commentator, Canadian Broadcasting Corp., to research officer in office of Canadian Prime Minister John Diefenbaker, at Ottawa.

H. M. Smith, regional engineer, Canadian Broadcasting Corp., Halifax, N. S., has been loaned to Jamaican government to advise on broadcast engineering problems.

TRADE ASSNS.

John P. Cunningham, president of Cunningham & Walsh, N. Y., named to board of directors and executive committee of Advertising Federation of America.

Harold V. Phillips, general manager, WTVH (TV) Peoria, Ill., named midwest vice president of Committee for Competitive TV.

Julius Haber, Radio Corp. of America, renamed 1957-58 public relations-advertising chairman of Electronics Industries Assn., Washington.

Dr. Burton Paulu, radio-tv director, U. of Minnesota, re-elected president of National Assn. of Educational Broadcasters, St. Louis.

EDUCATION

Don Quayle, news supervisor, WOSU Columbus (Ohio State U.), named acting program director, succeeding Les Spencer who joins WBNS, same city.

April

April 24-26: Advertising Federation of America, fourth district convention, Florida Hotel, Tampa, Fla.

the high speed and wide latitude of Du Pont “Superior” 4!

Speaking for NBC cameramen all over the world, Mr. Gene Juster, Manager of NBC Newsfilm, said that Du Pont Superior® 4 Motion Picture Film is the best combination of wide exposure latitude and high speed they have found.

News cameramen have to shoot many situations with only available light and they have found that “Superior” 4 lets them get good newsreel shots in almost any light. In fact, as a test of this film’s speed, a man was photographed in a darkroom, holding a lighted match a foot from his face. With this single light source, Du Pont “Superior” 4 recorded recognizable features.

99 times out of 100, these cameramen cannot afford the luxury of a meter reading before they shoot. They rely on their experience and their confidence in the film they use to get a good picture—and they usually can’t go back and try again. Many of the men assign their own speed ratings to a film, and NBC has learned to depend on the wide latitude of “Superior” 4 to handle these varied ratings during processing.

In view of the confidence which NBC’s experienced cameramen, like those shown above, place in Du Pont “Superior” 4, it’s not surprising to find that this fine film is in NBC’s film stocks.

FOR FURTHER INFORMATION about Du Pont Motion Picture Films, ask the nearest Du Pont Sales Office, or write Du Pont Co., Photo Products Dept., Wilmington 98, Delaware. In Canada: Du Pont Company of Canada (1936) Limited, Toronto.
RADIO'S STERLING QUALITIES

Stephen B. Lubunski, vice president in charge of programming, American Broadcasting Network, told the Providence Advertising Club that it is difficult to make a bad buy in radio and virtually impossible to make a bad buy in network radio. He made these points about radio to advertisers and agencies seeking effective advertising at a reasonable cost:

We think that network radio offers you some possible answers. Radio is the only medium which effectively combines entertainment, communication, information and advertising all at once. It offers showmanship in entertainment plus salesmanship by personalities. It offers you copy control and the kind of careful integration of commercials into the body of radio shows which makes your advertising more effective.

Radio has the quality of multi-access—the ability to reach into every room in the house, into the automobiles, and everywhere else outside of the home. Radio is ambivalent—it allows listeners to continue doing the things they have to do or want to do while listening to the radio. Radio is the ideal medium for reaching 170 million people through (140 million radio sets—the largest potential circulation you can buy for reaching entertainment, communication, information) to the ability or want of the best to be absorbed at a reasonable cost: a quarter of a million people for reaching 17 billion dollars worth of goods and services.

WHAT'S FUNNY ABOUT TV FUN?

Critic-writer John Lardner, in the Nov. 2 New Yorker magazine, examines the whys and wherefores of good humor as expressed on the air and finds it little better than "synthetic fun."

In a number of recent television shows, the dominant note has been one of good humor without visible or audible cause. The performers in these shows—Frank Sinatra, Dinah Shore, Bing Crosby, Perry Como and Louis Armstrong, among others—have worked long and hard to establish the point that comedy on radio, the mere display of cheerfulness or gaiety, is a satisfactory substitute for comedy itself. Heard comedy, they seem to suggest, is drivel; that unheard and accounted for is just as funny. It's a tenuous proposition, at best. In practice, comedy on credit, or synthetic fun, is bound, I think, to embarrass and frustrate the spectator who was brought up on the product of outright professional comedians. Gay or not (and much of the best is it sad and sour and wolfish), real comedy has a sound metallic base. It accounts for itself.

It's true that we're living at a time of crisis for comedy in television. The air has been almost completely purged of trained comedians, on commercial grounds. Live entertainment in the costly evening hours has fallen largely into the hands of "personalities" like Mr. Sinatra, Miss Shore, and the others... ("Personal" seems to be catching on in the trade for the singer who goes on performing between songs). The personality, or singer, is asked to manage the entire gamut of crowd-pleasing, from music to clowning. The fun he or she produces turn out invariably to be synthetic fun— the comedy of the baffling wink, the groundless giggle, the exotic gesture, the private joke or allusion in a language that appears to be rooted in jazz dialect or Athapascan, or both.

What's disturbing about this state of affairs is that the taste for complete comedy (which at its best involves not only a comic point but an opportunity for satire and comic criticism) is in some danger of being bred out of our species entirely, like the taste of natural orange juice.

The sham comedy of the singer-personality has several subdivisions. One is nonchalance, a time-honored substitute for wit. Nonchalance on television ranges from the easy, polished, almost ingrained equanimity of Mr. Crosby, which seems to arise logically from his character, to the utter sang-froid of Mr. Como, who is nonchalant in a purer, more literal sense, like a damp match. In Miss Shore, who now sometimes practices it for humorous purposes, nonchalance is a little out of place, as it might be in any normally vauacious and straightforward woman. Mr. Sinatra, a somewhat adaptive performer (though an excellent singer), is fine at nonchalance when he is working with an expert like Mr. Crosby. At other times, he handles the mood uncertainly; he is probably not a nonchalant understudy. There's a tendency among personalities who are expert at composure to "break up," as the current jargon goes—to laugh, sometimes from nervousness, sometimes deliberately and wishfully, with no provocation whatsoever.

GLOSSY OR SHADOWS AHEAD?

The biggest business boom in history, to start around 1962, is predicted by Arch N. Booth, executive vice president of the Chamber of Commerce of the U.S. Speaking Thursday before the Insurance Federation of New York, Mr. Booth warned that governmental restrictions on private enterprise can endanger this bright outlook. A portion of his talk follows:

The business boom which America has been enjoying for the past ten years, the experts tell us, is slowing down. But no widespread slump is in sight.

For the five-year period ahead—the next year and 1962—the economists see a steady growth of the economy. And, then—beginning about 1962—this country will experience the greatest business boom in its history. The business future is bright, indeed—but it will be, and it will be
determined by the decisions that are made in the legislative halls and the administrative offices of Washington.

If we are to enjoy good business in this country in the months and years ahead, we must have a philosophy back of our national policies and national laws that is conducive to good business—and not a philosophy that frowns on free enterprise and considers it an evil... The whole future of private business could be changed by laws passed in one single session of Congress. And there is plenty of evidence to show that it definitely would be, if the business community were thoroughly well organized, alert to what is happening and vigorously on the job.
and the giant punch board

This is a nuclear reactor. And neutrons from the tons of pure uranium metal inserted in these holes produce radioisotopes — the strange and wonderful prizes of the atomic age.

While these man-made radioactive materials have been available for only a short time in commercial quantities, they have already found a wide range of uses—in industry, in agriculture and in medicine where radioisotopes have practically replaced radium in the treatment of cancer.

Every day new uses are being found for uranium in nuclear power developments. To meet these present and future needs, Anaconda has developed reserves of millions of tons of uranium ore. These reserves, together with new ore processing methods pioneered by Anaconda at its Bluewater, New Mexico plant, have made Anaconda America's leading producer of uranium concentrate.

Other Anaconda products are also contributing to the expanding use of nuclear energy. Many are used in the actual production of radioisotopes, while lead—another metal produced in large quantity by Anaconda—is employed as radiation shielding wherever radioactive material is present.

Anaconda's role in nuclear energy is typical of the way in which its extensive line of non-ferrous metals and metal products—the broadest combination offered industry today—is contributing to America's growth and progress.

FOR NEWS IN THE NATION'S CAPITAL...

WRC IS THE SPEAKER OF THE HOUSE!

WRC is Washington's favorite radio station for news! Its Monday-through-Friday local news programs win an average 26% share of audience—greater than the competition on any of the other 16 radio stations in the nation's Capital. Now, more than ever, listeners want news. And because these audiences want news, and listen attentively, your sales story—within the news program format—goes over with maximum impact. You can benefit immediately from WRC's big news "beat." Your NBC Spot Sales representative will supply you with current availabilities in a flash. Call him.

WRC-980

WASHINGTON, D.C. SOLD BY NBC SPOT SALES
THERE'S INSPIRING FRUSTRATION
IN CREATING COMMERCIALS

Once there was an author who wrote a book, had it published, and was wholeheartedly satisfied as he read the first bound copy. He was equally pleased when he re-read it a year later. That's why he never was able to write a second book fit for publication.

Pity the creative man who is genuinely satisfied with his creative work. An ad may look good in final proof form ... the answer print of a commercial may be fine ... a finished pressing of a radio spot may sound great. But when he sees it in print or catches it on the air weeks later—he generally finds it could have been better. There's one thing about it that's not right—and that one thing becomes progressively worse to him each time he sees it.

Frustrating? Sure! But these are the things on which he builds—the flaws of his own making that he must avoid in the future. Avoid them he will, only to discover new ones. And, as long as he's in the business, he had better squirm at the human, mechanical and electronic errors that inevitably crop up in broadcasting.

Take radio. You create a certain type of effect on paper, in the mind, in the “inner ear.” You “hear” it mentally—describe it enthusiastically. But when it turns audible—others, you must work with a producer, a composer, an arranger, a sound-effects man, a group of musicians, singers, announcers and an engineer. Each of them “hears” it differently than you do. But with enough time, patience and money, you finally get what you're after.

And it sometimes isn't until weeks of repeated hearings on the air that you feel it has too much bass. So from then on you're acutely conscious of an excess of booming accompaniment.

TV BREEDS ITS DISCONTENT, TOO

Take television. Live commercials aren't so bad unless the announcer fluffs, the technical director pushes a wrong button, or a prop misbehaves on camera (in a tight close-up, of course). But at least its creator sees it just once and retains only a memory (or a kinescope). It may haunt him in retrospect, but it won't be constantly rubbed under his nose.

Not so film. Every time he views a commercial, one little something is very apt to take over in prominence, like the proverbial sore thumb.

For instance, he dislikes increasingly the angle at which a room scene was shot. It would have been better off the other wall, more interesting, with more free area for the cast. But he hadn't been able to see it in camera until pretty late.

To move the camera and re-light would have taken the best part of an hour. And with so much stuff still to shoot, that would have meant overtime and who'd pay for it? They were right up to the budget.

In fact, the matter of budget had caused a change in the whole opening sequence, long before production started. He had visualized opening black, with widely-separated cones of light coming on one after the other, to reveal three different people—“Something like Durant's exit.”

But that required a really big stage, and a camera mounted on a crane (Item: crane, $5200 per day) and a scaled down matching set for a transition from people to product close-ups.

It would have been great, but the producer screamed about the cost. So did the client.

They finally worked out a single shot dollying along the three people, then the three packages. It was effective all right—but the original idea ... that would have been a knockout!

And how about that “testimonial” film by Magda Glamor of Hollywood? Every time he watched it, he was hypnotized by her eyes darting from lens to cue-card. The b--- (for beauty) refused to bother memorizing four short takes for 30 seconds of script. Nice, cooperative girl. And that after sitting around for the extra hours it took the make-up man to remove the bags under those famous eyes.

Frustrating? Sure, but look at the things he has learned, painfully, through the years.

PRE-PLANNING PREVENTS HEADACHES

It's wise to explore camera angles in advance via a really comprehensive story board. Experiment on the board. It's cheaper per sketch than per hour on the set.

Or have the sets up a day in advance when possible. Take a few Polaroid shots from the planned camera positions, with people standing in where the cast will do its stuff. You'll learn a lot.

Avoid tricks, unless the sky's the limit in a production budget. When a special effect is highly essential, work with the producer in advance, before the idea is so cemented in your mind that you'll never be able to pry it out. Together, you can get that idea, or a reasonable facsimile, immortalized.

Be sure of the cast. That cocking good announcer may look fine on camera full face, but go clinkless in profile. The pretty girl may audition well, but freeze up on the set. The celebrities' quirks of working (and they do have them!) should be ferreted out beforehand, and planned for.

When you're frustrated in your private life, you can learn to live with it. But in the creative broadcasting busines, your frustrations should be stepping stones that carry you ever onwards and upward. Excelsior!

And if you ever achieve a commercial that's absolutely irrebuttable, in-every-way perfect—man, you'd better quit! (Note: As this article is finished, I think it's pretty good. But when I re-read it in Broadcasting, I'm sure I'll like it a lot less...)

Paul G. Gumbinner, b. Feb. 4, 1905, New York. One of four founding members of Gumbinner agency in 1923, starting as "general office boy" and copywriter, now vice president and radio-tv director. First active in broadcasting in 1927 as agency director of a radio show for Webster cigars, identified later with Norwich Pharmacal Co's Fat Man series on ABC Radio and with Joan Davis for American Tobacco Co's Roi-Tan cigars. Currently in charge of heavy spot campaigns for such clients as Block Drug Co., Bourguignon Inc., Chap Stick Co., Q-Tips Inc., Manischewitz wines, Sutton Cosmetics and American Tobacco Co's Herbert Tareyton cigarettes.
The Public's Interest

The more the public attitude toward pay television is explored, the more it seems that proponents consist chiefly of those who stand to benefit financially.

Within the past 10 days three totally unrelated surveys have produced evidence to support these conclusions. Pay tv came out on the short end of the stick every time—twice with the end almost too short to permit a hand-hold.

Most recent as well as broadest of these was conducted for Broadcasting by the Pulse Inc. The survey was run in 10 major markets and the tabulations, completed last week, showed an even two-thirds would not "be interested" in having pay television in their homes. This even though they were told specifically that "first-run movies, major sports events, Broadway shows, operas, ballets, etc." might be among the attractions waiting for them.

The two other surveys, conducted within specific areas, were even more one-sided. In California, KSDB-TV Salinas and KSBY-TV San Luis Obispo went on the air with a special program to find out what their viewers wanted. The result: 5,002-to-4 against pay tv. In Bartlesville, Okla., where a wired subscription television test is in progress—although the people there don't regard it as pay tv in the strictest sense—Sen. William Langer (R-N. D.) has been running a mail poll and has found overwhelming opposition to subscription television.

The Pulse survey for Broadcasting went farther than these, and some of the additional findings merit attention here. If the pay tv forces find encouragement in the fact that one-third of the respondents would be interested in toll tv, they may think twice when they see what these people would be willing to pay. First, a majority preferred to pay by the program, presumably because they want to keep total expenditures down; of these, almost two-thirds said they would pay less than $1.25 per program. Among those preferring a fixed monthly fee, about two-thirds would pay less than $6 a month.

Moreover, almost two-thirds of all respondents said they would not be willing to pay for present free tv programs, either. Since this figure parallels the number who opposed pay tv, and since more than 90% rated the present free tv program service as satisfactory to excellent, the obvious conclusion is that the people just didn't want to pay, period.

Whether these conclusions apply equally to wired as well as on-the-air pay television remains to be seen. The findings do point up again that it is not the public which is agitating for toll television.

The Cork Doesn't Fit

We expected to be criticized when we published an editorial in our Oct. 28 issue advocating the acceptance of liquor advertising on radio and television, and our expectations have been realized.

A sampling of our mail on the subject has appeared in Open Mike. A few writers have approved our position. More have opposed it. The opposition, in the main, has come from two sources: broadcasters who fear the political repercussions of putting liquor advertising on the air and prohibitionists who oppose not only liquor advertising but also liquor.

Let us dispose of the latter opposition first.

By every indication, prohibitionists constitute a minority—an inconceivable minority—of the U.S. public. There is no evidence whatever to suggest that the majority of the people wish a return to prohibition. Until a majority votes liquor out, liquor will be legal. If liquor is legal, the advertising of it must also be legal. It must therefore be fully within the broadcaster's legal right to broadcast liquor advertising.

As we said in our first editorial, there are moral problems involved in liquor advertising. Moderation is to be encouraged in the drinking of liquor. So it should be sought in liquor advertising.

Several broadcasters have pointed out to us—as though they were quoting sources as binding as a decision of the Supreme Court—that the radio and television codes advise against the acceptance of liquor advertising. This is true. It is also true that the liquor admonition was written into the codes as a grandstand renunciation of something which nobody was accepting anyway.

To say that liquor advertising should be rejected because the codes reject it is to grant the codes a meaning they do not actually possess. Besides, the codes can be and have been changed, by amendment, by interpretation and occasionally, by violation.

Political repercussions would undoubtedly follow a revision of the codes to admit liquor advertising—whether done formally or by the practical disregard of those code provisions. How serious would those political repercussions be?

Some congressmen would make speeches and introduce bills to outlaw liquor advertising. The congressmen would react adversely to the introduction of liquor advertising on the air would be of the same kind that have been introducing anti-liquor legislation of one sort or another in every session since the repeal of the 18th amendment 24 years ago. In short, they would be those from communities where dry sentiment is strong. This kind of congressman must oppose liquor advertising whether it is carried on the air or not.

To both classes of our critics we wish to announce that we are neither in the pay of the devil nor naive about politics in Washington. And we still think it would be perfectly proper to put proper liquor advertising on the air.

How More Can Do Less

The rival allegations of the two unions whose dispute disrupted NBC-TV programs over two weekends cannot be discussed with clarity until more facts are known.

What can be said, with clarity and apprehension, is that the dispute between the National Assn. of Broadcast Employees & Technicians and the Radio & Television Directors Guild is symptomatic of jurisdictional difficulties in network television.

Unless these jurisdictional rivalries are brought under control, television is apt to wind up in the strait jacket that for years has encased the movies. The movies allowed unions to establish jurisdictional lines so finely drawn that inefficiency has resulted.

Perhaps the movies can afford the time and money that are wasted by the partition of jobs into idiotic fragments. Television cannot. Yet television even now is being squeezed by jurisdictional pressures that could lead to the rigidities of craft distinctions that obtain in Hollywood.

The question at issue at NBC is whether directors can talk directly to technicians or must convey instructions through a technical director who, like the technicians, is a NABET member. We have never understood why a competent director needs to communicate through an intermediary, and so the question seems to us of relatively minor significance.

But the fact that NABET and the directors guild regard it as important enough to create trouble is in itself an indication of the way that television unionism could go if management does not assert sensible controls. Television production costs already are high enough. They do not need to be padded by the creation of jobs by jurisdictional rivalries.
WSAZ-TV delivers 1000 homes between 9 and 5 PM for $1.31

The Second Station's Cost per Thousand Homes is $1.96
50% Higher

What's under the KILT?

NOTHING...
BUT THE OTHER SEVEN HOUSTON RADIO STATIONS!

Everyone in and around Houston already knows the answer... there's nothing under the KILT but the seven other Houston radio stations, lagging far behind! The new August Area Pulse proves it beyond a shadow of a doubt. Not only is KILT the number one station in Houston metro ratings (any Hooper, any Pulse, any Trendex)... but its strong signal and unique programming reaches 70% more listeners in the 53-county Houston area (Pulse) survey than the next station in the area.

Call your John Blair man for rates and availabilities... and go KILT to the hilt!

KILT HOUSTON • KLIF-KFJZ DALLAS-FORT WORTH • KTXA SAN ANTONIO

(now in common ownership with KEEL, Shreveport)
