Ever been to Mount Rushmore?

2½ million vacationers see it every year—and add $100 Million to Big Aggie Land’s income

Nice country, this part of Big Aggie Land. There’s famous Mount Rushmore in the Black Hills. The busts sculptured on the faces of this mountain are fantastic in detail and carved to proportion of men 465 feet tall. There are mountain trout streams, championship golf courses, resorts and ranches, the famous Badlands National Park, and outdoor camping sites. Yes, it’s nice country. And 2½ million vacationers visit here every year. This tourist trade adds $100 million annually to the WNAK-570 market coverage area . . . a plus factor WNAK-570 delivers to advertisers. And radio means WNAK-570 in Big Aggie Land.

America’s 41st Radio Market

Big Aggie Land is a major U. S. radio market even without the tourist bonus. WNAK-570 NCS #2 Market Coverage Area takes in 175 counties with 2,217,000 population, 609,590 radio homes and over $2,400,000,000 in annual retail sales. The NCS #2 Daytime Weekly Circulation ranks Big Aggie Land as the country’s 41st market.

These are the facts on Big Aggie Land. This is the market covered by WNAK-570. Ask your Katz man for full details.
"HEADquarters U. S. A."—in more ways than 600

Washington has more feathers in its cap than just being capital of the federal government. From Air Transport Association to Wildlife Management Institute, some 600 national organizations have established their headquarters in the Metropolitan Area—48 in the last four years alone.* They are of every type—industrial and scientific, professional and social service, trade and labor. They employ 12,000 well-paid people. They appreciate the unique advantages that only Washington, of all cities, can provide. So will your radio schedule!

This many-sided Washington has one thing in common—a desire for good radio fare that has made Station WWDC the preferred point on the dial. We have been first or a mighty close second in every PULSE of 1957 and thus far this year. We have a simple formula—to be a listenable station to our audience, and a promotional station to our hundreds of national and local advertisers. The mutually happy result—ever-increasing listeners for us, ever-increasing sales for you.

WWDC radio Washington

*Economic Development Committee, Washington Board of Trade REPRESENTED NATIONALLY BY JOHN BLAIR & CO.
your advertising dollar produces more sales on WGAL-TV

And there's a reason. This pioneer station is foremost in the three standard metropolitan markets in its coverage area: Lancaster, Harrisburg, York, as well as in numerous other cities—Gettysburg, Hanover, Lebanon, Chambersburg, Carlisle, Lewistown, etc. In short, you find that WGAL-TV’s multi-city coverage costs you less than buying single-city coverage. Put your advertising dollar to work producing more—on WGAL-TV

BACK IN THE SADDLE • House Legislative Oversight Subcommittee may make headlines again this week in investigation of FCC. Hearings begin Tuesday on comparatively non-newsmaking subjects—patents, with FCC Chairman John C. Doerr and General Counsel Warren Baker to testify—but from there committee will go into station transfers and additional comparative TV cases, with minimum of two weeks set aside for hearings. Commission has received no notice of hearings beyond patent subject, nor had announcement been seen by committee members as of Friday.

Since Robert Lithman took over as chief counsel of subcommittee after firing of Bernard Schwartz, one man on staff has spent full time in sales, “a whole lot of them.” Subcommittee thinks it can show several applicants have been ruled unqualified for licenses by FCC and subsequently became licensees through purchases. Three committee investigators—Baron Shacklette, Oliver Eastland and Joseph P. O’Hara Jr.—have spent considerable time on road since the Miami hearing; closed-combining cases in additional original TV grants. Committee Chairman Oren Harris (D-Ark.) now is prepared to go ahead. Among cases known to be targets: Boston ch. 5, Pittsburgh ch. 4, Indianapolis ch. 13.

SHAPING UP • Although new station rep firm doesn’t officially open until next month, Bob Eastman’s group of station clients is already beginning to take shape. It’s understood those already set include DuMont’s WNEW New York, one of nation’s top independents, and presumably WHK Cleveland (subject to FCC approval of DuMont acquisition of WHK); also radio members of Balaban group: WIL Chicago, WLS Chicago and, again subject to FCC approval of transfer, KGKO Dallas. Some starting dates yet to be decided. Firm is Robert E. Eastman & Co. At outset it will concentrate primarily—but not necessarily exclusively—on radio representation.

CBS-TV’s separation of itself into two completely distinct divisions — CBS-TV Network and CBS-TV Stations [Networks, March 17]—shortly will be extended right down the line. Plan is to establish separate departments for each division except in case of very broad general service areas (probably legal, for example). Among those to be split: sales promotion and advertising, publicity, accounting, even engineering to certain extent. CBS-TV Stations Div. is headed by President Merle S. Jones; CBS-TV Network by President Louis G. Cowan. They’re now in process of blueprinting separations, will announce as soon as it’s squared away.

TONGUE-TIED • WMAL-TV Washington having problem finding Congressmen willing to speak in favor of pay TV and/or pay TV test. Station, planning prime-time debate Friday, culled past issues of Congressional Record for any evidence of pro-pay sentiment, then issued invitations to appear. At weekend there were no takers. WMAL-TV deliberately avoiding vested interests on either side of pay-TV issue, will present commentator Joe McCaffery with analysis of both sides if no pro-pay speaker is found this week. It’s first time in memory Congressmen have declined chance for free air appearance.

Talk of moving TV to uhf spectrum area, revived at NAB convention, has also received discussions on how to overcome acknowledged inability of uhf to cover large hilly and mountainous areas as well as uhf do’s. Higher power is one answer (uhf stations are authorized up to 5,000 kw maximum), but there is another solution which some engineers consider superior. This is multicasting—a system of blanketing a single large area with several low-powered stations, all broadcasting on different frequencies and all, presumably, owned by the same interest. Many years ago—in connection with fm—the suggestion was made that the same results could be achieved via polycasting, whereby several low power stations, all on same frequency, would be used to cover same area.

BACK TO SOURCE • There’s strong possibility that FCC will wind up Barrow Report hearings with the man responsible for it all: Dean Roscoe L. Barrow of U. of Cincinnati law school, Dean Barrow was director of network study staff during two-year study and although assignment terminated last October has agreed to remain on call. Also being considered as “expert” witness is Dr. Jesse Markham, Princeton U. economics professor, who also was member of staff. Hearings resume May 19.

Don’t forget that although Barrow Report network hearing is due to be completed next week (it resumes May 19), major factor has not yet been issued—namely programming. That is still being worked on and writers are sweating over almost completed material on hand. However, best bet is report won’t be ready until fall—virtually year from time basic document was issued.

ON SIDELINES • Involved in programming question are allegations that network use option time to freeze out independent program sales to stations. This is key viewpoint of Justice Dept., which claims it has 60-odd affidavits to this effect. Eager Justice lawyers reportedly told Commission officials at meeting three weeks ago they are sure they could win criminal complaint against networks that option time (and must buys) are antitrust violations per se. However it was understood that Commission would complete its network study before Justice moved.

Television (network and spot) may be General Mills’ choice medium in introduction of Hi-Pro, new premium-priced nutritious cereal [ADVERTISERS & AGENCIES, May 5] but spot radio is not being overlooked. Dancer-Fitzgerald-Sample, New York, last week started ordering stations for Hi-Pro spot campaign to begin June 1. This will supplement tv spot, running in approximately same number of markets (40 to 50 in eastern U. S).

GETTING IN GEAR • Arbitron, ARB’s instant-ratings system, got its first “real” workout last week, is expected to go into more or less regular use this week. First major test, last Tuesday night, measured audience of live heart surgery shown on WABD (TV) New York; it showed ratings at 9:45 to 23.1 for start of heart operation at 10 p.m. Tuesday measurements were based on Arbitron hookup of 50-60 homes. By sometime this week ARB hopes 150 New York homes will be linked, out of ultimate total of 300. ARB also plans to start distributing Arbitron reports to agencies and other prospects this week.

Insiders report that Edsel Div. of Ford Motor Co. definitely will be in television next season. (Edsel has pulled out of Wagon Train on NBC-TV for next year, with Ford Div. moving in as participant.) Foote, Cone & Belding, Chicago, is agency.

COUNTDOWN • While Secretary of Commerce Weeks has announced there will be no radio question in 1960 decennial census (see page 58), NAB is leading quiet effort to convince Census Bureau that economic importance of radio homes count requires inclusion on enumerators’ forms. Association wants fm count in 1960, which would give first official figures for that medium. While Census will include tv homes in 1960 tabulation, NAB also insists separate uhf count is economic necessity.

Helen Alvarez, who has disposed of her interest in KFMB-AM-TV and other stations in which she was jointly associated with J. D. Wreather (story page 9) intends to continue in broadcasting. She now reportedly is negotiating for several stations in whose management she would actively participate and would have associated with her in ownership one of Hollywood’s leading personalities who already has broadcasting interests.
KANSAS CITY ROYALTY—
The sort of prize-winning Herefords you meet at the American Royal Live Stock and Horse Show every fall in Kansas City.

KCMO-RADIO, BASIC CBS-RADIO.
810 kc. 50,000 watts.

Photo: American Hereford Association

It begins in Kansas City—home of the American Royal, citadel of jazz, gateway to the Great Plains. And if you want a typically warm Western welcome, we suggest you give your product or service a voice on KCMO-Radio.

For KCMO-Radio (with 50,000-watt coverage in parts of four states) serves all the community.

How? With intelligent CBS network programming, colorful locally-originated shows, award-winning news and public service broadcasts.

The stakes (and steaks) are big in more-than-a-million Kansas City.

Ask anyone who's met the West on KCMO-Radio.

**THE WEEK IN BRIEF**

**Prodigy With Problems**—Videotape, rapidly finding its place in TV scheme, starts developing union trouble. One-day strike in New York is first evidence of dickering that may go on for years. *Broadcasting* sums up the situation. Page 31.

**The Vtr Sell**—Video tape recording fever catches on in ad agencies as Mennen Co., Florists Telegraph Delivery Assn., to name but two advertisers, abandon live commercials for the taped variety. Page 32.

**The Spectre of Community TV**—Local antenna systems, once a cozy circulation gift, now pose threats to small-city and possibly big-city TV broadcasters. A report on the status of wired TV facilities and their impact on the broadcasting industry. Page 33.

**How to Find an Agency**—Max Factor, in market for agency to replace Doyle Dane Bernbach July 1, puts applicants through 73-point screening questionnaire. Nelson Gross, Factor ad director, tells why. Page 41.

**Spot TV Fires Away**—Target is network television in The Katz Agency's new presentation to advertisers and agencies. Firm claims that "margin of efficiency" of spot TV over network has increased in only one year. Page 44.

**Radiant Over Radio**—Fuller & Smith & Ross, New York, promotes use of network and spot radio through "package plan" resulting from two-and-a-half year agency study which cites the economies and effectiveness of sound-only medium. Page 46.

**FC&B's New TV Look**—By moving key broadcast executive into New York from its Chicago office, Foote, Cone & Belding plans to get closer to advertiser-agency-network bargaining table. For agency traditionally operating its offices virtually autonomously, new shift points up how television changes way agencies must do business. Page 48.

**ASCAP Hit**—Roosevelt subcommittee raps music licensing group's compensation, election, grievance policies, recommends action by Justice Dept. Page 49.

**No Opposition to FCC Member**—Bartley sails through Senate Commerce Committee hearing with flying colors; action on his and Cross' nominations may be forthcoming this week. Page 58.

**No Radio Homes in 1960 Census**—Sen. Magnuson announces Census Bureau has eliminated radio from decennial census but will again include an accurate count of television homes. Page 58.

**Network TV Billing Up in Third Quarter**—In recession year, network TV gross time charges increase during January-March period over the same period last year. Page 62.

**Nationals Getting Together**—National Telefilm Assocs. and National Theatres talking about "an association" between two companies. Page 68.

**Rock 'n' Roll All Shook Up**—WINS New York disc jockey Alan Freed, indicted by grand jury in Boston. Meanwhile, Boston bounces r & r music from public auditoriums and cancellation of similar shows follows in other cities. Mr. Freed denies Boston charges. Page 72.

**RCA to Sell Against Recession**—Stockholders hear of RCA's lowered earnings for this year's first quarter but at NBC, says President Burns, sales increased 10%. Page 78.

**What's Good About Conventions?**—Plenty, judging by scientific poll of delegates at NAB convention in Los Angeles. The Pulse Inc. shows their likes and dislikes in survey conducted for *Broadcasting*. Page 82.

**The Simple Virtues**—There's danger that too-elaborate TV commercials can smother your client's message, warns Bea Adams, Gardner Adv. v.p. and radio-tv creative director. The commercial which sticks to first principles (The Big Promise and The Common Touch) is likely to win out in long run, she says. It's in Monday Memo. Page 113.
NOW! The New Orleans radio Station with 32.2% of the audience—WTIX—is 20 times more powerful with 5,000 watts on 690 k.c.

It happened May 7th, at 6 p.m. WTIX took over the 690 spot on the dial, and increased its power 20 times—to 5,000 watts. Result? Over 1,000,000 new listeners added! Now WTIX's 24-hour service extends over the entire Gulf area—from Texas to Florida. Now, more than ever, the big New Orleans buy is WTIX—the station which even before the change was more popular than the next 3 stations combined (Hooper), and—first in every daytime Pulse 1/4 hour, and—first in 462 of all 504 Pulse quarters.* Talk 5,000 watts and 690 kc. to Adam Young . . . or WTIX General Manager Fred Berthelson.

WTIX first... and getting firster... and now 20 times more powerful with 5,000 watts on 690 kc. NEW ORLEANS
State, Justice Money Bills
Clear House Appropriations Unit

Dept. of State and Justice fiscal 1959
money bill reported out Friday by House
Appropriations Committee earmarking
$101.7 million for USA, of which $4.75
million is to be used for “acquisition
and construction of radio facilities.”
Additional $3.59 million will be available to USA
from public funds, giving agency approxi-
mately $105 million requested by President.
Agency received $95 million for current
fiscal year.

Of $4.75 million allocated for new radio
stations, $2.9 million will be used to com-
plete construction of powerful land station
in Greece to replace present transmitter
aboard ship Courier. USAIA, in previously
secret testimony before committee last
March, made known proposal to construct
FM station on East German border because
FM is unamplifiable. It reported receiving
332,416 letters as result of USAIA broadcasts
during 1957. Agency said Iron Curtain
countries are spending $1 million yearly,
more than cost of broadcasts, in jamming
attempts.

Bill also appropriates $3.8 million to
Antitrust Div. of Justice Dept., to amount
requested by President and $15,000 over
current appropriation. Committee said it
hoped for “strong, vigorous and effective
program of enforcement of the antitrust
laws.” Bill appropriates $229 million for
fiscal 1959 to Justice overall, increase of
$2.2 million.

Kaufmans Leave Guild Films

Resignation of Reub Kaufman as chair-
man of executive committee and his wife,
Mrs. Jane Kaufman, as director of Guild
Films Co., New York, to be announced
today (Mon.), coincident with election of
President John J. Cole to Mr. Kaufman’s
former post. Two new directors include
treasurer Arthur B. Lerner and sales vice
president Irving Feld.

Messrs. Cole and Kaufman were found-
ers of tv film firm. Mr. Kaufman, who re-
tains stock interest, plans to remain in tv
film field.

DISTAFF PROMOTION

Calling all gray flannel-ettes (gals
working at ad agencies, that is). WCBS
New York is launching contest to find
most attractive, unmarried female em-
ployee of recognized agency within sta-
tions’ listening area. Send photograph
with vital statistics to station at 485
Madison Ave., New York 22, before
May 23. Prizes include $1,000 ward-
robe from leading New York depart-
ment store. Winner will be known as
“Miss New York Radio.”

Short Heads P&G Productions;
Giroux, Potter Also Advanced

Robert E. Short, associate manager of
Procter & Gamble Productions Inc., Cin-
cinnati, tv programming subsidiary of in-
dustry’s largest advertiser, appointed man-
ger of programming, it is being announced
today (Mon.). He becomes top supervisory
executive, assuming responsibility for all
P & G programming activities. He succeeds
Gail Smith, who resigned several months
ago to become independent Hollywood tv pro-
ducer. In other new assignments at P & G
Productions, George R. Giroux, Hollywood,
who continues to head west coast office,
becomes manager of west coast program-
ing, and Stanley C. Potter, Cincinnati,
program supervisor, becomes associate
manager of programming. Mr. Short joined
P & G Productions earlier this year. Mr.
Giroux and Potter joined P & G in 1952.

D.J. Taken Up on Resignation

WINS New York Friday accepted resig-
nation of d.j. Alan Freed, who was in-
dicted by Boston grand jury last week for
inducing riot, saying his letter of resignation
“came as a complete surprise” to station
management. At same time, WINS Vice
President-General Manager H. G. (Jock)
Fearnhead disclosed that station would
“soften” its programming—that is, de-em-
phasize rock ‘n roll musical fare.

Mr. Fearnhead said station’s position in
Freed case (see page 72) up to Thursday
had been one of “a third party—and se-
parate entity because the [Boston] incident
involved the non-radio activities” of d.j.
Freed. He stressed that Mr. Freed was not
fired, although “in cases of this kind the
public usually assumes that a person in
trouble is fired.”

Warther Buys Out Alvarez

Sale of interest of Helen Alvarez in
KFMB-AM-TV San Diego, and KERO-
TV Bakersfield, both California, to new
orporation and dropping of litigation in
U.S. District Court set for trial Aug. 5 were
announced over weekend. Mrs. Wrather Sr.
and Edward Petry, other owners of stations
will hold stock in new company. Mr.
Warther also has acquired Mrs. Alvarez’
50% interest in Disneyland Hotel. Her
interest in other properties in several states
also will be purchased by group headed by
Mr. Warther. No price was given but trans-
action is estimated to exceed $2 million.
Stations’ transfer is subject to FCC approval
Papers expected to be filed this week.

Three Picked to Sub for Como

Talent trio will move into Saturday 8-9
p.m. slot on NBC-TV as summer replace-
ment for Perry Como (June 14 through
Sept. 16). Show will feature Bob Crosby,
Gretchen Wyler and Helen O’Connell in
Como-type variety show.

May 12, 1958 • Page 9
Read Tells Senate Committee
Petillo Is Robbing Musicians

Los Angeles musician Cecil F. Read took his fight against American Federation of Musicians and its president, James C. Petillo, to Senate Friday. Mr. Read, who was kicked out of AFM while he was its Hollywood president in dispute over performance payments into union trust fund, told Senate Labor Subcommittee Mr. Petillo's policies have "robbed the recording musicians of their wages."

Now chairman of AFM rival, Musicians Guild of America, Mr. Read charged trust fund payments have become "political device" to help keep Mr. Petillo in office. He said employers of musicians, "notably NBC, RCA Victor Records, CBS, Columbia Records and Capitol Records, are now allied with Petillo fighting court actions by musicians designed to end the trust fund arrangement. They have evidently arrived at a working relationship with Mr. Petillo that they do not want disturbed," Mr. Read told subcommittee which is taking testimony on labor reforms.

Court Rules for WKST-TV Ch. 45

U. S. Court of Appeals in Washington ruled Friday that WKST-TV New Castle, Pa., could retain ch. 45 even though FCC in 1956 approved redesignation of ch. 45 to hyphenated Youngstown, Ohio-New Castle, Pa. area. Unanimous three-judge court held that Commission was within rights in changing designation of ch. 45 and maintaining WKST-TV on frequency, even though WKST-TV ceased operating in 1955 but had retained cp and license application, and resumed in October 1957. Case appealed by ch. 73 WXTV (TV) Youngstown and Jet Broadcasting Co., both of whom wanted to apply for ch. 45. Court held WKST-TV still a New Castle station, even though transmitter near Youngstown and it identifies itself as Youngstown-New Castle station.

Piedmont Argument Postponed

Judge Bayard Rhone of Los Angeles Superior Court Friday postponed to May 19 argument on petition of Piedmont Publishing Co. for temporary injunction to prevent Mary Pickford Rogers and Buddy Rogers from taking over Triangle Broadcasting Corp., licensee of WSJS-TV Wins- ton-Salem, N. C., prior to trial of Piedmont's suit against Mr. and Mrs. Rogers. Mary Pickford on Thursday answered Piedmont's claim that she failed to live up to her agreement to sell her Triangle stock to Piedmont by asserting she had accepted that in contract only on assurance it was designed for tax and other benefits and would not be exercised.

Georgia Educators Make Bid
For Waycross Commercial Ch. 8

Georgia Board of Education Friday applied to FCC for noncommercial educational tv station on commercial ch. 8 at Waycross, saying it has $418,000 to build station and $82,000 to operate it first year.

Multiple owner John H. Phipps is applicant for commercial tv outlet on ch. 8. He owns WKTG and WCTV (TV) Thomasville, Ga., and WPTV (TV) West Palm Beach, WTAL Tallahassee and WTY5 Mariana, all Florida.

NAB Starts Leadership Campaign

Leadership campaign of broadcasting industry, started by NAB with slogan "Learn—and Live," is designed to awaken public to need of placing more emphasis on attainment of intellect and skill, President Eisenhower was informed Friday in telegram signed by 260 radio and tv stations.

Telegram was sent in reply to Presidential message lauding campaign as "fine public service." Signers of telegram were stations that took part in "Learn—and Live" presentation April 30 at NAB Los Angeles convention.

FCC Ruling Backs Its Counsel

FCC had said no to WTVW (TV) Evansville in its request that new Commission counsel be appointed to replace present FCC lawyer. Evansville ch. 7 outlet said current Commission counsel biased and unfair. Appeal to Commission came after examiner denied same petition. Commission, in affirming examiner's ruling, said burden of proof lies with Commission, therefore FCC counsel is only doing his job. WTVW is fighting FCC show cause order which would move ch. 7 from Evansville to Louisville and put station on ch. 31.

KHON Goes on Auction Block

KHON Honolulu scheduled to be sold at public auction May 23. Station bought last October by Shirley Louise Mendelson for $75,000 after licensee went through involuntary bankruptcy in December 1956. Bidding expected to start at $50,000. Independent KHON broadcasts on 1380 kc with 5 kw.

Democratic Panel Set for MBS

Former President Harry Truman will serve as quizmaster for special MBS Political Quiz program next Tuesday (May 20, 10:05-10:30 p.m.), as part of second annual Democratic Party Night. Described as "Humorous radio quiz show" by Democratic National Chairman Paul Butler, program will feature panel consisting of Mrs. Eleanor Roosevelt, New York Gov. Averell Harriman, Alabama Sen. John Sparkman and Oklahoma Rep. Carl Albert.

PEOPLE

JAMES G. COMINOS, director of Needham, Louis & Brobrzy tv-radio department in Chicago, named vice president in charge of all tv-radio operations. SCOTT KECK, assistant director of department, named di-

WILLIAM A. CHALMERS, vice president in charge of Los Angeles office of Calkins & Holden, assigned to C&W's N. Y. office as vice president and account group supervisor. He is succeeded in Los Angeles by ROBERT J. BLACK, C&H vice president and west coast manager. Creator of tv shows such as Ford Theatre, Victor Borge Show, Tom Corbett, Space Cadet and others, Mr. Chalmers joined C&H in 1955 as L.A. manager and was elected vice president last year. Former agency associations: Campbell-Ewald, Detroit; Grey Adv. and Kenyon & Eckhardt, N. Y.

EDWIN C. CHARNEY, sales manager of Detroit office, Branham Co., station representative, elected vice president of company.

DR. ALAN M. GLOVER, general manager of RCA semiconductor and materials division since last March, elected vice president.

C. THOMAS GARTEN, commercial manager of WSAZ-TV Huntington-Charleston, W. Va., elected vice president. Fifteen-year veteran of WSAZ properties, he continues as assistant general manager of WSAZ Inc.

IRA WOLFF, sales promotion specialist, NBC-TV network sales, N. Y., named manager, sales promotion.

DONALD JOHNSTONE, formerly director of marketing and research, Burke Dowling Adams, N. Y., appointed director of research, Cohen & Aleshire, N. Y. He has been active in research field for more than 20 years, had been associated with Robert Orr, Bryan Houston, Benton & Bowles and other agencies.

JACK HEIM, sales engineer, Gem Automotive Distributors, Westport, Conn., to Associated Artists Productions as account executive in AAP's Warner Bros. division. He will cover Virginia and Carolinas.

CHARLES R. LONGSWORTH, marketing executive, Campbell Soup Co., today (Mon.) joins Ogilvy, Benson & Mather, N. Y., as account executive.

ROBERT E. LITTLE, account executive, Benton & Bowles, to J. M. Mathes Inc., N. Y., in similar capacity.

JERRY SUSSMAN, formerly with Gore, Smith & Greenland, to copywriter, Wexton Co., N. Y.

BILL GOODWIN, 48, veteran network announcer, found dead in his car Friday, apparently of heart attack. He had stopped car at roadside outside Palm Springs while driving to L.A. Survivors include wife, Philippa Hilber, and four children.

IN REVIEW

REPORT CARD 1958

Nowadays, when any crumb on education is of compelling interest, it is hard to say how many thousands of words ABC-TV's classroom pictures are worth. Last Monday's Report Card 1958 on six pioneer movements in public education was an absorbing essay.

The battery of senior correspondents who led the filmed tour of six classrooms across the country handled their job intelligently, providing stimulating live comment. But the show belonged to the young scholars and that unseen hero, the photographer. The hour was filled with irresistible shots of youngsters who seemed unaware of being watched.

Nowhere did the mechanical excellence of Report Card 1958 detract, however, from the point being made, that the U. S. educational system is developing new approaches to meet changing educational needs. ABC-TV's constructive approach to the question was pointed up by John Daly's observation that some of the experiments in reading, languages, sciences and other facets of the primary-secondary curriculum pre-date Sputnik I by as many as five years. There were no grades on the Report Card, only some glimpses of what is being done from the TV classes of Hagerstown, Md., to special classes for "able" children in Portland, Ore., and points between.

Before the space era dawned last fall, it's possible that such a documentary might not have made it as a Monday evening show. Last week it looked like logical programming for prime time, pre-empting regular shows. The session bears repeating. Moreover, if ABC were to supplement the report from time to time, it would be welcome viewing and as much a cultural contribution as was the May 5 program.

Production costs: Approximately $25,000. Sustaining on ABC-TV, May 5, 7:30-8:30 p.m. EDT.

SEEN AND HEARD

That was a delicious-looking dish Kraft Theatre served up last Wednesday evening—the commercial for Blue Cheese Gelatin salat, that is. The stuff that surrounded the commercial—Phil Reisman Jr.'s adaptation of Bret Harte's classic short story, "The Outcasts of Poker Flat"—left this corner totally unsatisfied. To make a short story long is one of TV's major vices. The beauty of Harte's little morality play lay in its brevity and irony; what came out of the Talent Assoc. wash was standard soap opera—virtue rewarded, sin redeemed. A revised modus operandi as regards commercials may be in order for NBC-TV's Jack Paar Show. Said network ought to be wished as much new business as it can possibly accept, but someone should use a bit more discretion in scheduling this polyglot of spots. Nothing can be more disconcerting than to see an urban conversation between two adults—e.g., Jonathan Winters and actress Tilli Losch—cut off abruptly by a word or two or three from the sponsor. Such inflexibility might please the second-conscious advertiser and his agency—until both realize that viewer antagonism never sells.

The Next 10 Days of Network Color Shows

(all times EDT)

CBS-TV

May 13, 20 (9:30-10 p.m.) Red Skelton Show, S. C. Johnson & Son through Foote, Cone & Belding and Pet Milk through Gardner Adv.

May 15 (9:30 p.m.) Eddie Fisher-George Gobel Show, RCA Victor and RCA-Whirlpool through Kenyon & Eckhardt and Liggett & Myers through McCann-Erickson.

May 14, 21 (9-10 p.m.) Kraft Television Theatre, Kraft Foods through J. Walter Thompson Co.

May 15 (7:30-8 p.m.) Tic Tac Dough, RCA Victor through Kenyon & Eckhardt and Warner-Lambert through Lenox.

May 15 (10-10:30 p.m.) Lux Show starring Rosemary Clooney, Lever Bros. through J. Walter Thompson Co.

May 16 (10-11 p.m.) Jerry Lewis Show, Oldsmobile through R. F. Brother.

May 17 (8-9 p.m.) Perry Como Show, participating sponsors.

May 17 (10:30-11 p.m.) Your Hit Parade, Tont through North and American Tobacco through BBDO.

May 18 (7-7:30 p.m.) My Friend Flicka, sustaining.

May 18 (9-10 p.m.) Dinah Shore Chevy Show, Chevrolet through Campbell-Ewalt.

May 20 (8-9 p.m.) George Gobel-Eddie Fisher Show, RCA Victor and RCA-Whirlpool through Kenyon & Eckhardt and Liggett & Myers through McCann-Erickson.

Network rating higher every rating period, now 41.0!

21% increase in homes reached!

30% increase in viewers!

Pre-tested as popular movie and through dozens of famous Saturday Evening Post stories, TUG-BOAT ANNIE helps Lever Brothers Limited of Canada win friends and influence sales. Lever Brothers' success story gives proof of greater profit than ever for you in your own market. Of course, the American premiere market showing is swamping all competition too!
Tulsa rates 2nd in the nation in per capita ownership of personal automobiles. Here's solid evidence that Oklahoma's No. 1 market is a rich market. Only KVOO blankets all of this rich market area, and gives you bonus coverage in Kansas, Missouri and Arkansas as well. Get your full share of this No. 1 market; get all of it; get on KVOO!

'So Many' Not the Criterion
EDITOR:
Congratulations on the fine interview with John Blair [STATIONS, April 28]. We certainly agree that Mr. Blair's opinions are held in high esteem. . . .

However, we would respectfully like to disagree with Mr. Blair, who opined that a representative organization "has to be large, well-staffed and well-equipped to do the job demanded of it under today's conditions." We don't feel that we have to have the "so many" that the large rep has, but we do have to be as good, and even try to be better in some ways. . . .

Hodges vs. R&R: Round 4
EDITOR:
I won't debate musical taste with Buzz Hodges [MONDAY MEMO, April 14] because music criticism is not my business any more than it is his. But I will say that the holier-than-thou yak about rock and roll has no more place in the advertising business than a discussion of the political, cultural and intellectual standards of newspapers, magazines or tv.

The bald fact is that a successful radio station that plays popular music (which at the moment includes rock and roll, just as it used to include hot jazz, crooning and swing) has a much larger adult audience than teen-age audience. They buy the...

There's more to Florida

Source: ARB, November 1957:
total homes reached
Florida is always a big surprise to visitors. Not its climate. Not its natural wonders, nor its unusual marine life. But its galloping economic expansion, particularly in northern Florida. One indication: in ten years, the number of "home office" insurance employees in Jacksonville has increased 750%.

..and to WMBR-TV! Key to the entire northeast Florida-south Georgia area is WMBR-TV, Jacksonville's dominant sales medium. ARB shows that throughout its area WMBR-TV maintains a total-week average lead of 131% over the competing station. This dominance results in fantastic values. Two nighttime ID's available recently (but not for long!) garnered a total rating of 91.5. Total viewer impressions: 758,900. Cost per thousand viewer impressions: 24 cents! And with 46 of the top 50 shows on WMBR-TV, adjacencies like these are the rule rather than the exception. Easy to see why advertisers find there's so much more to...

Put Your Money Where the Buying Is

by Bert Ferguson
Exec. Vice-President, WDIA

Ask any of our advertisers, "Why WDIA?" and you'll get the same answer: WDIA SELLS THE MEMPHIS NEGRO MARKET AS NO OTHER SOURCES CAN!

Here are some facts you need to know about this big buying audience.

LARGEST NEGRO MARKET IN U.S.A.

WDIA, with the only 50,000 watt transmitter in this area, reaches 2,878,666 Negroes. Almost one-tenth of the nation's total Negro population! More than the combined Negro populations of New York plus Chicago plus Cleveland plus St. Louis...with the overwhelming earnings of $16,000,000 per year. A vital economic factor in Memphis, the Negro is elevating his standard of living, his income, his buying power.

According to a 12-city survey, Memphis ranks first in ratio of total Negro income to total white income, with $25.79 of Negro income for every $100 of white income. Quite a contrast with New York—where the ratio is $5.59 for every $100, and Chicago's ratio is $7.99 for every $100!

HIGH VOLUME—SALES RESPONSIVE!

This Negro market spends an average of 80% of its income on consumer goods; last year bought 61.3% of the flour sold in Memphis...82.7% of the hair tonic and dressing...47.9% of the sugar...45.1% of the household waxes and polishes. Small wonder that WDIA consistently carries a large year-in, year-out list of advertisers that includes:

BAY R, ASPRIN...BREAST O'CHICKEN TUNA...BRUCE WAX AND POLISH...COLGATE-PALMOLIVE COMPANY...CONTINENTAL TRAILWAYS...GENERAL FOODS CORPORATION...GROVE LABORATORIES...KROGER STORES.

Negroes make up 40% of the Memphis market! And, before it buys, this big Memphis Negro market listens—to WDIA!

Low Negro newspaper readership and television ownership mean that you can't reach the Memphis Negro effectively with these media.

WDIA ALONE DELIVERS IT!

More than a radio station to its loyal audience, WDIA is an institution—an integral part of their daily lives. WDIA combines unmatched personal appeal, hard-hitting salesmanship and powerful coverage—to sell the largest Negro market in the South!

In Memphis, the Negro listens to WDIA—then buys! Gold can't buy that kind of loyalty, but it can! Write us today for facts and figures—success stories in your field!

WDIA is represented nationally by John E. Pearson Company

[EDITOR'S NOTE: Permission granted.]

SECOND'S SEAVEY SENTIMENTS

EDITOR:

As a d.j., let me lend my voice to the current rock and roll controversy. It seems that a lot of stations are banning rock and roll just because it is rock and roll and because adults don't like it.

What segment of the audience are we trying to capture? The 40-to-60-year-olds? Or Mr. and Mrs. America whose ages range from 18 to 35 and who are just starting to furnish the house, buy tv set and the many other appliances needed to start housekeeping. . .

The emphasis should be on a well-balanced show. And let's face it: rock and roll is here to stay. So why not incorporate it into the show?

GENERAL ★★★★★
AGREEMENT

General Electric, General Foods, General Mills, General Motors—all agree it's sound strategy to be on the CBS Radio Network. Along with scores of other top-ranking national advertisers, they know that on CBS Radio, commercial salvo's hit more listeners (47% more people listen per commercial minute than on any other radio network). And they hit them harder. (By its very nature, CBS Radio programming screens out the non-listening listener.)

That's why, in the battle for the dollar, these generals make sure their campaigns are on the CBS Radio Network. Maybe what's good for them is good for you!
"930 and 931 give us high speed with no loss of quality"

reports Paul Meeks, chief cameraman at KBET-TV, Sacramento, California

"The exceptional latitude and speed of DuPont Rapid Reversal Film are the main reasons why we've used it since we went on the air in 1955," Mr. Meeks tells us. "And quality is never sacrificed; in fact, we prefer the quality of DuPont 930 and 931—both picture and sound—over other films."

Station KBET-TV must give newsreel coverage to political events, court and legislative hearings where special lighting is barred. "Often we haven't time to take a meter reading," says Mr. Meeks. "We count on the speed and exposure latitude of DuPont film. It hasn't let us down yet. Proof of the film's quality," he concludes, "came on a recent assignment when we finished shooting at 4:45, rush-processed the film for the evening news show at 5:30. Even with fast processing, a single 16 mm frame was good enough to blow up to 4 x 5 for the newspapers the next morning."

If you need speed and latitude for your motion pictures, and can't afford to lose quality, there's a DuPont film for you. Contact the nearest DuPont Sales Office, or write for more information to DuPont Photo Products Department, 2420-2 Nemours Building, Wilmington 98, Delaware.

In Canada, Du Pont Company of Canada (1956) Limited, Toronto.
LETTER FROM THE EDITORS

JOE WALLIS is a crack Western Union operator. For the past eight years he has been assigned to the toughest news transmission jobs in Los Angeles. But, as he said later, he never had a tougher job than the one he did for BROADCASTING during the NAB convention. On two days, April 30 and May 1, Joe moved nearly 30,000 words of copy over a special Western Union circuit between Los Angeles and BROADCASTING's headquarters.

The picture above was made in BROADCASTING's own news room in the Los Angeles Biltmore hotel. At the time Joe still had about 5,000 words to go to complete his filing of copy which seven of BROADCASTING's veteran editors had written—on the scene.

All that copy, plus other stories and pictures which were sent by air courier, appeared in BROADCASTING May 5—while the news was still news.

Joe Wallis may have been surprised by the workload which BROADCASTING gave him, but BROADCASTING readers were not. They have become accustomed to expect, week after week, complete, meaningful and fast coverage of the dynamic developments of television and radio. The editors of BROADCASTING count it their job to live up to reader expectations and, whenever possible, exceed them.

Covering hard news like the NAB convention or the convention of the American Assn. of Advertising Agencies the previous week [for full, on-the-scene report see BROADCASTING, April 28] is only part of BROADCASTING's job. The rest of it is best described as digging out stories which cannot be discovered without expensive editorial research.

Stories of that kind appear frequently in BROADCASTING. One of them, we are happy to announce, just won an Award of Merit in the Fourth Annual Jesse H. Neal Editorial Achievement Awards of the Associated Business Publications.

The Neal awards are given for distinguished examples of business journalism among the 160 member publications of ABP. Only publications whose circulation is audited by the Audit Bureau of Circulations are eligible for ABP membership.

The BROADCASTING award was a major article describing the huge influence which talent agents wield in television. It was jointly produced by Rufus Crater and Bruce Robertson, senior editors, Florence Smull, agency editor, and Frank Model, assistant editor. The story took two months of research in an area never before explored by a magazine. It occupied 14 pages of the BROADCASTING issue of Oct. 21, 1957.

As regular readers expect, BROADCASTING has other articles of similar significance in preparation for future issues. Meanwhile, we'll be keeping the Joe Wallises busy at keyboards all over the U. S., filing the news which our editors report wherever the news is breaking.

OUR RESPECTS

to Proctor Arnold Sugg

Shortly after P. A. (Buddy) Sugg joined NBC as vice president of the company's Owned Stations and NBC Spot Sales Div. on April 1, he outlined his objective in this rather cryptic fashion:

"I can't remember any horse which ever finished second in the Kentucky Derby."

From 1945 until last month, Mr. Sugg was the guiding hand that directed the broadcasting activities of the Oklahoma Publishing Co. During his stewardship, the broadcast operations expanded from ownership of WKY-AM-TV Oklahoma City in 1945 to include WSFA-TV Montgomery, Ala., and WTVT (TV) Tampa, Fla.

Proctor Arnold Sugg was born in Rocky Ford, Colo., on June 29, 1908. Shortly thereafter his family moved to Marysville, Calif. Following graduation from high school, he worked at various odd jobs, including a stint in the Northern California vineyards.

A boyhood interest in radio and electronics led Mr. Sugg into the broadcasting business. He went to San Francisco in 1929 and joined KPO as a control room engineer. He thereafter climbed to various engineering posts and by 1940 was supervisor of engineers for NBC in San Francisco.

In 1940 Mr. Sugg was called up from the Reserves for duty with the Navy that lasted five years, during which he advanced from lieutenant (j.g.) to captain and received numerous decorations for his combat and administrative services. He was aboard the battleship California when it was sunk at Pearl Harbor, managed to swim safely to shore despite the bombardment, and assisted in disaster operations.

During his tenure in the Navy, Mr. Sugg started the Pacific Fleet Radar School at Pearl Harbor and was later assigned to the Massachusetts Institute of Technology to evaluate electronic equipment used by the fleet. Other assignments included tours of duty on the staff of the Chief of the Naval Bureau of Aeronautics and the staff of the Naval Air Technical Training School in charge of Navy radar, radio and electrical training.

In December 1945 Mr. Sugg was hired by E. K. Gaylord, president of the Oklahoma Publishing Co., as manager of WKY. He later assumed direction of the additional broadcasting properties which the company organized and acquired.

Mr. Sugg's forte is said to be an ability to organize and to delegate authority. He is a direct, outspoken individual who avoids fancy, highblown phrases and communicates forcibly in down-to-earth language. He holds strong convictions on the role a radio or tv station should play in a community, which he summarizes as follows:

"A station should perform a service for the public. This does not mean necessarily service to professional organizations, which have tremendous resources at their disposal. It could mean a campaign for facilities that are needed in a particular community, behind which the station could place all of its resources for a long-term campaign."

He cites as an example the intensive (and successful) campaign conducted by WKY-AM-TV to establish an eye cornea bank in Oklahoma City. He believes that in each community over the country there is at least one unique project a station can adopt and hopes that some of the NBC-owned stations can utilize their facilities for such undertakings.

He intends to give managers of NBC-owned stations "the widest latitude" in day-to-day operation and envisions his role as one of providing general policy information and guidance. For the past month, Mr. Sugg has been visiting the NBC-owned radio and tv stations and is favorably impressed with the organizations at his command. Mr. Sugg views his expanded responsibilities as "a great challenge."

He is an avid-reader of non-fiction, enjoys golf, fishing, boating, skeet and trapshooting. Mr. Sugg has served for many years as a member of the NBC Affiliates Committee, the Broadcast Pioneers, Society of Television Pioneers and the Freedom of Information Committee of the NAB. He was a founder of the Assn. of Maximum Service Telecasters.

Mr. Sugg is married to the former Betty Ross of Hillsboro, Calif. They have a married daughter, Mrs. Nancy Brown, and three grandchildren. The Suggs are making their home in Manhattan until they decide on a more permanent location.

"That," said Mr. Sugg, living up to his reputation for delegating authority, "is Mrs. Sugg's department."
There may be many ways
to use adhesive bandages...
but there's only one way
to use the BAND-AID trade-
mark correctly...please say

BAND-AID
Adhesive Bandages

Remember—all adhesive bandages are not BAND-
AID Adhesive Bandages! "BAND-AID" is actually
a trademark...one of the most widely known in
the world...recognized in more than 50 countries.

It means Johnson & Johnson, not the name of
a product...and it refers to a whole family of prod-
ucts made only by Johnson & Johnson.

The "BAND-AID" trademark is always followed
by the product name, i.e. BAND-AID Plastic Strips,
BAND-AID Plastic Tape, BAND-AID Butterfly
Closures, BAND-AID Patch, Spot, Strip.

We appreciate your mentioning our products
and we hope you will continue to do so. But when
youdo, won't you please use the full name correctly?

Johnson & Johnson
The most trusted name in surgical dressings
A new standard of performance for color television systems...

The RCA TM-21 Color Monitor

This new color control monitor is a reference standard for evaluating the quality of color television pictures from any source. Providing the most precise and brilliant color picture available...this new monitor accurately reproduces the scene as the camera sees it.

QUALITY CONTROL OF COLOR PROGRAMMING—The TM-21 is used in Color Camera Chains, Switching Systems, Master Control and Transmitting Control for monitoring color picture quality. It is the basic instrument for checking registration, shading and deflection linearity...color fidelity of the entire TV system...chroma to monochrome ratio...color phase or hue adjustments.

BEST POSSIBLE COLOR—When used to display color pictures in clients’ rooms and executive offices, the TM-21 lets the station put its “best color foot forward.” Clients will be impressed by the bright, high definition picture.

COLOR ACCURACY AIDS PROGRAM PRODUCTION—Production departments can use the new monitor for accurate continuity control of color programming. Producers and directors will get a true color picture of what’s happening on the set. Costume and background colors can be seen in proper relationship. Lighting can be accurately evaluated, production aided.

SIMPLIFIED MONITOR ALIGNMENT—Initial adjustment is extremely simple. Built-in test switch reduces set-up time to minutes. Screen grid selector switch provides quick viewing of primary colors.

LONG-TIME STABILITY—Once set up, monitor adjustments “hold.” Extra stability has been designed into brightness, contrast, decoder, convergence, and linearity circuits.

Get maximum return from your color TV investment! Ask your RCA Broadcast and Television representative for further information on the new TM-21 Color Monitor. In Canada: Write RCA VICTOR Company Limited, Montreal.
Check these additional technical features:

- Feedback techniques and precision components provide long-term stability.
- Automatic brightness tracking for color balance.
- Convergence circuits designed for rapid setup.
- DC restoration at black level, stabilized by feedback.
- Stabilized diode demodulators.
- All components and tubes easily accessible.
- Automatic wide-band operation during monochrome picture intervals.
- Stabilized black level shows effects of pedestal adjustments, aids close control of color in picture low-lights.

ANGELENOS ARE DIFFERENT...

They're more community centered. In the 4,866 miles of mountains, valleys, desert and seashore comprising the Greater Los Angeles market*, there are 71 incorporated cities and more than 100 booming un-incorporated communities. “Downtown” has been replaced by 1200 “Super-Shopping-Centers.” And each one does an annual gross of more than $20 million!

SO IS KRCA! It's the one station that's programmed to hit all Angelenos right where they live. With KRCA you can reach all of these communities in 10 seconds. That's why LUX SOAP PRODUCTS used KRCA **exclusively** when they wanted to make a big new sales impression on community-loving Los Angeles.

KRCA CHANNEL 4 • LOS ANGELES—SOLD BY NBC SPOT SALES

*Los Angeles and Orange Counties. To be sure, KRCA covers the communities of five Southern California counties, with 2,300,000 TV homes.
VTR: PRODIGYPOSES SOME PROBLEMS

- Labor starts getting restless as videotape finds its stride
- Controversy may occupy bargaining tables for next five years

Videotape, only a promise in the spring of 1956, was a reality last week. The broadcasting industry could look around to see (1) all national TV networks relying on VTR to whip the daylight time quandary, (2) 37 stations either equipped or about to be for tape production and broadcast, (3) national advertisers beginning to use tape for their commercials.

Strengthening the reality was the first cloud on the VTR horizon: a one-day strike of 5,000 technicians who want to establish jurisdiction over the new technique. It was this latest portent which captured the attention—and concern—of those to whom videotape is a major factor of the future.

To pin down the facts and dispel the fancies about this developing controversy, Broadcasting editors in New York, Hollywood and Washington surveyed the field. Their report follows:

The unions anticipate videotape pinch

Videotape, hailed as a miracle worker for television programming, may need a miracle of its own to settle all the labor disputes it is stirring up.

The jurisdictional arguments between unions, the demands of unions upon networks, agencies and procedures, and the restlessness that is developing in related fields over VTR lend little encouragement, even to the optimistic, that all the questions will be settled in less than five years.

AFTRA and SAG, NABET, IBEW and IATSE are the initials in the headlines now. Symptomatic of the problem, however, and indicative of what may come are such less publicized developments of the VTR age as demands of wardrobe, makeup and scenic artists for payment at film rates when working on VTR, or set designers' desire to have re-use payments incorporated in their contracts for tape work.

The first question is whether VTR is "film" or "live." Some experts hold that strictly speaking it is neither—that actually it is a new art. But for union contract purposes it is treated as one or the other. The networks treat it as live; film companies generally go the other way, giving jurisdiction over VTR to the film unions.

Faction areas boil down to these:
- Jurisdictional disputes between so-called "live" and film unions, particularly the American Federation of Television & Radio Artists and the Screen Actors Guild.
- Establishment of salary rates and working conditions in a field in which labor and management have no precedent to draw upon and in which circumstances may change rapidly.
- Battle for jurisdiction over new producing organizations that will be established specifically for videotape.

Networks and stations are signed up with what might loosely be termed the "live TV" unions. CBS-TV, NBC-TV, ABC-TV accordingly have granted jurisdiction to AFTRA for performers; IATSE for stagehands and associated employees; Radio & Television Directors Guild for directors; Writers Guild of America for writers; American Federation of Musicians for musicians. The technicians are served by the International Brotherhood of Electrical Workers at CBS-TV and by the National Assn. of Broadcast Employees & Technicians at NBC-TV and ABC-TV.

The film studios classically have been served by the so-called "film" unions and the unions to require that IATSE be given a separate jurisdiction for both stagehand and technician work; SAG for performers; Screen Directors Guild for directors; WGA for writers, and AFM for musicians.

The disputes that already have arisen center mainly on union demands for authority over new producing organizations likely to enter the field and on "outside" work produced by rival unions. For instance, at CBS-TV, during the protracted negotiations that preceded IBEW's two-week strike last month, one of IBEW's demands involved conditions that would keep IBEW in control of VTR at the network. IBEW wanted CBS to agree not to use tape produced on the outside by non-IBEW technicians. The network rejected this condition vigorously, although it agreed that CBS-TV itself would not sub-contract work to escape IBEW jurisdiction. The networks regard as "featherbedding" an attempt by the unions to require that a tape created on the outside by a rival union be re-recorded at the network before broadcast. They have resisted this maneuver and apparently have no intention of succumbing.

More immediately pressing at the networks is the AFTRA-SAG videotape hassle. In an intelligence report circulated last week, SAG reaffirmed its jurisdiction over VTR when the tape is produced at a film studio, stating: "When television first arrived, AFTRA (now AFTRA) claimed it all. Screen Actors Guild claimed motion pictures. After many contested National Labor Relations Board elections—all won by SAG—and a decision on the matter by our AFL International [the old Associated Actors & Artists of America], Jurisdiction over live television programs done in the live manner was given to AFTRA. SAG was confirmed as the representative for players in television done in the motion picture manner.

"Some years later, AFTRA—in a 'clarification' agreement with the networks—unilaterally scrapped the lines established by the NLRB and the AAAA, and in its contract with the networks, sought to cover all videotape. "Nonetheless, in the guild's recent contract negotiations with the national advertising agencies, and in an attempt to promote peaceful relations between the talent unions, SAG agreed that any commercial taken by the agencies into network or tv stations for production on videotape would be AFTRA's. The guild's contract covers tape commercials only when made by producers other than networks or tv stations. Unfortunately, AFTRA has objected and once again there is disagreement over videotape.

"It is the guild's belief that there is a natural line of demarcation in the field of taped commercials—the first problem to be faced in the taped area. That line is that the live producers (networks and tv stations) using their tape facilities should continue with AFTRA. Studios making commercials on film or tape should fall within the realm of SAG and its contract. True, this will give to AFTRA the overwhelming majority of tape work as it is now being done. However, it is a logical division,
VTR GETS ADVERTISER’S BLESSING

This spot for Florists Telegraph Delivery Assn. lays claim to being the first VTR commercial on a tv network. It appeared on CBS-TV’s Person-to-Person May 2.

A major broadcast advertiser—dependent on “the live sell”—last week moved into the budding field of video recording. The Mennen Co., Morristown, N. J., sponsor of Wednesday Night Fights on ABC-TV, disclosed that effective June 4, Fights commercials would be produced via VTR. The move followed a test demonstration of a Mennen commercial on VTR by Telestudios Inc., New York. The VTR process, according to an executive at McCann-Erickson, New York, a Mennen agency, will eliminate the “costly procedure of sending a McCann production team around the country to cities where the fights take place.”

VTR also is making news on other fronts. Items:

- Florists Telegraph Delivery Assn., New York, another advertiser dependent on live commercials, used VTR for the first time May 2 during Ed Murrow’s Person-to-Person (CBS-TV, Fri. 10:30-11 p.m. EDT). Producer: Grant Adv., using Telestudios’ Ampex equipment.
- Gunsmoke (CBS-TV, Sat. 10:10-11 p.m. EDT), a filmster production that has originated from Hollywood over the past three seasons, was fed into the network out of New York May 3; the program was a VTR recording of a “hot kite.” However, commercials for the alternating advertisers, Liggett & Myers Co. (Dancer-Fitzgerald-Sample) and Remington Rand (Young & Rubicam) were filmed.

- National Telefilm Assn., New York, this week is expected to announce a 90-minute VTR presentation for its fall lineup on the NTA network. “Big-name star” will be NTA Board Chairman Ely Landau.

As of last week, New York agencies could go to only one independent “live” tv production studio fully equipped for VTR—Telestudios Inc. (The only other major commercial production house fitted for VTR, Unger, Elliott & Unger, works principally with filmed commercials but has not yet turned out a VTR commercial beyond demonstration or test run.)

Telestudios declines to make public the actual cost of producing VTR commercials, claiming “we aren’t competing with film producers and thus see no reason to issue a comparative rate structure.” President George K. Gould indicates, however, that an agency can save “40% of its production costs by going VTR.”

The role of VTR commercials in tv will also “open up a brand new field of continuity writing,” claims McCann-Erickson’s New York radio-tv commercial production director Chris Valentine Jr. Unlike film commercials, requiring inclusion of special optical effects and directions, a VTR script asks for few video instructions. This does not mean that VTR commercials will make film spots obsolete, Mr. Valentine adds. “There’ll be a place for both in this industry,” he maintains.

Telestudios also is preparing two VTR programs that will be made available to advertisers “very shortly.” The first is a series of commercials for the aforementioned “space shows” titled Spacemen, the second a strip of 10-minute animated cartoons titled Penny Theatre.

Based on historical background, and it is true.”

SAG recommended that a special committee of its members and of AFTRA meet to explore the problem. But AFTRA officials said they had no intention of meeting with SAG.

AFTRA’s contention is that traditionally the union has had control over actors employed in programs done “in the live manner and originated and transmitted electronically.” A spokesman said AFTRA already has made representations to NLRB complaining about SAG’s contract with film producers, to which advertising agencies are signatories. The agencies also are signatories to AFTRA’s pact with the networks and apparently it is AFTRA’s feeling that the network-agency stipulation granting it jurisdiction over videotape poses a conflict.

Radio & Television Directors Guild is one union which foresees no problems stemming from videotape. Or maybe that should be put that RTDG is one union which foresees the effects of videotape and forestalled trouble in advance. Elizabeth Gould, executive director of RTDG in Hollywood, said last week that the lines of authority over videotape are “clean cut and plainly defined” in the guild’s agreement with the tv networks and some freelance producers, while the Screen Directors Guild has contracts giving it jurisdiction over tape as well film programs in its contracts with motion picture companies and other producers.

“There’s been no problem up to now and we don’t anticipate any,” Miss Gould stated. RTDG has had no arguments with SDG since 1950, she said, because “we both stay in our own stables.”

Miss Gould said it is difficult if not impossible to compare wage scales of the two directors’ unions because one (SDG) is based on employment for one feature motion picture or one tv series, whereas the RTDG scale is based on the assumption of year-round employment in a broadcast studio. “Look at the SDG figure of: $600 for a half-hour program and our rate of $315 and you’d say, ‘Gee, they get a lot more.’ But if the program gets the maximum number of reruns, the RTDG director would receive more money than the SDG member.” The scales, brought to tv from the movies on one hand and radio on the other, retained many basic differences when they were revamped for television, she noted.

The direction that independent companies set up specifically for videotape production will take it is still moot. Both line and film unions have indicated they will battle for jurisdiction. The only company of this type already in operation, Telestudios Inc., New York (see box), considers itself a live producer, like the networks, and has signed with AFTRA, IBEW and IATSE.

One network executive summed up his approach to the immediate problem of labor relations by saying: “Why can’t we try to solve this videotape labor problem that is sure to come by placing the whole thing before the AFL-CIO council? Labor is in one big house. Let labor try to solve it before it becomes too big and too formidable.”

Lest it be thought that unions are the only ones concerned with the advent of VTR, consider the situation of those companies set up to serve the film industry. One report has it that Hollywood film processors alone lost $1 million last year in business which went to tape.

FIRST STRIKE ON TAPE

Approximately 5,000 members of IATSE went on strike for one day (Monday) against New York producers of tv filmed commercials in a dispute centering over clarification of the union’s jurisdiction over videotape. They returned to work the next day after a settlement was reached “in principle.”

The film producers stressed they never concerned the jurisdiction of that union, but they pointed out they were not prepared to spell out all the conditions IATSE sought.

For instance, the producers conceded that IATSE should have jurisdiction over subsidiary companies that they might form for videotape, but they declined to commit themselves on successor companies that might buy the subsidiary.

The union also sought jurisdiction over “sub-contractors” with whom FPA members might co-produce. FPA resisted this demand on the ground that it would destroy its members’ “freedom to sub-contract competitively,” but acknowledged that this practice would be used only when competition dictated it. After considerable wrangling, FPA also gained from IATSE a stipulation that it would have until December 1959 to “explore all the ramifications of tape to decide which crafts of IATSE would be used in the production of taped commercials.

FPA’s discussions with IATSE were to continue over the past weekend and a clarification clause on VTR is due this week.
SPECIAL REPORT

COLLISION ON TV DELIVERY ROUTES

Clash is between community antenna systems and small market tv stations. Once welcomed as free circulation builders for advertisers, community systems have grown big enough to dominate some areas, hurt, kill or exclude local stations.

Television’s bonus baby—community antenna service—has suddenly developed into a problem child.

A half-million U. S. homes, wired into local utility systems mostly in subnormal tv service areas, are now getting serious attention in advertising, legislative, regulatory and legal centers.

One tv station is off the air, naming community antenna competition as the culprit in its dying breath.

A tv station sale was cancelled for the same reason. Another station has received a pointed suggestion from an advertiser that it should cut rates on the ground community circulation doesn’t belong on the rate card.

Congressional pressure for FCC action is building up. The Senate Interstate Commerce Committee will consider community antenna television (CATV for short) at an FCC allocations hearing starting May 27.

FCC has indicated it will study the whole matter though just a fortnight ago it had disclaimed jurisdiction over CATV.

NAB’s Community Antenna Committee, long dormant, has abruptly decided to take up CATV developments. It will meet soon, probably in mid-June. This action followed intense activity at the recent Los Angeles convention by a group of tv station members.

This fear was voiced at the convention, frequently and with emphasis: Clusters of CATV systems, especially in the East, Mountain States and Pacific Northwest, could be tied into a paid television home service. This, it was argued, could start a new medium of competition with broadcasting.

An interesting development last week was disclosure that the Bartlesville, Okla., wired tv system may suspend operation, perhaps reopening with an entirely new program formula. The system has been built around extension of theatre movies into the living room by wire.

How it started: A decade ago, as the tv medium was getting started, the idea of sticking up community towers on high hills to feed neighborhoods via low-cost wire grids began to catch fire. Local capital, civic funds and even village assessments were poured into these systems, feeding the miracle of electronic pictures to remote spots beyond the effective coverage areas of tv station signals.

Currently at least 600 of these systems are in operation, much to the delight of big city stations and networks who are getting bonus circulation their own signals can’t deliver.

Unfortunately, this CATV structure with a half-million connected homes, is showing signs of becoming a young monster. In many smaller cities CATV systems had been established before the FCC got around to allocating tv channels for local use. And in tv cities having only one or two signals, CATV systems often bring in several distant stations and they may or may not carry any local station service.

Thus new tv stations have faced established competition when CATV was already operating, and existing stations have felt the impact when CATV entered the area after they had been on the air. Advertisers, too, have observed the effect of CATV where it competes with broadcast stations.

The effects have been noticed more especially in smaller cities and rural areas. Many small-city vhf and uhf channels are unused because of the economic problems created by CATV. Equally unfortunate is the fact that CATV operators are only interested in bunched homes because of the high cost of connecting rural and semi-rural areas.

Now the broadcasters who once smiled as they looked at their rate cards and the extra circulation supplied by the infant CATV systems in their outer perimeters must cope with the problems they are creating.

Their complaints are being heeded in Congress and at the FCC. The Senate Interstate Commerce Committee is expected to consider the problem at its approaching hearing, with members of the FCC as the first witnesses. The Commissioners are on record at the NAB convention as favoring a study of the community antenna problem and there were symptoms of a willingness to reconsider the recent disclaimer of jurisdiction over these wired hookups.

Sen. Mike Mansfield (D-Mont.) recently championed the cause of small-market telecasters plagued by CATV, promising their troubles will be brought to the attention of the FCC and the Senate and House Commerce Committees.

Some Senators and Congressmen have
MOVIES-IN-THE-HOME ARE ON VERGE OF FAILING

The Bartlesville dream—that movies could be merchandised over a closed circuit system that was a hybrid of community antenna operation and subscription tv—is fading.

There is a strong possibility, it was learned last week, that Video Independent Theatres Inc. may suspend Telemovie operations in the Oklahoma city in the next few months.

Henry Griffing, president of the southwest theatre chain, admitted that the company was seriously considering the advisability of discontinuing the operation in its present form.

Losses for the past four months, it was learned, have exceeded $40,000—or $10,000 a month.

Ironically, the eve of the Bartlesville experiment has come as the number of subscribers stands at its highest peak.

There are almost 800 families paying a $4.95 monthly fee to view the two services now being offered—first run movies and background music and a community tv service furnishing the signals of the three Tulsa stations.

Originally, when Telemovies began in September 1957, the charge was $9.50 and services were two; first run movies on one channel, and re-runs on the other.

In December the Bartlesville operation faced a crisis. Subscriptions had dropped from a high of 300-odd to fewer than 300. Early in 1958, the Telemovies format was drastically revised, with the concurrent price cut.

The new programming also includes a Sunday matinee of art films.

Mr. Griffing makes no brief for the project’s failure. “I was in error in thinking that the public would pay a blanket charge to see movies,” he told BROADCASTING last week. “There is no question in my mind that the viewer must have the opportunity of picking his picture and paying for it as he sees it. This means meters, but we have not been able yet to find the right device.” A test of meter payments in place of a flat monthly fee has been underway in Bartlesville for the last three months, but, according to Mr. Griffing, the instruments have not been satisfactory. And, he added, there is none on the horizon that is right.

The suspension, if it comes, will not be a closing. Mr. Griffing emphasized, but a chance to restart the project from scratch.

One reason for closing down, the Video president stated, was to permit renegotiations with motion picture film suppliers, the telephone company (which owns the distribution system) and General Precision Labs. Inc. (which has provided the studio cameras and projectors).

One major factor in the present difficulties, Mr. Griffing stated, was the competition from “free” movies on Tulsa’s three tv stations. “When we started,” he explained, “there were about 30 movies a month broadcast from Tulsa. This increased regularly, to 60 to 90.

taken an unusual approach to the regulatory problem by defending illegal booster transmitters that feed stronger signals to isolated places in mountainous areas. These boosters provide service to tv-hungry constituents in their home states, though they are widely deemed to be operating in apparent violation of the Communications Act and the FCC’s rules. The Commission is sensitive to this congressional heat and has managed to avoid a head-on approach to the problem.

Around Capitol Hill are a number of legislators who wonder if the FCC can continue much longer its nibble-and-hide policy toward the problem of tv feeder facilities—CATV, boosters and some 200 licensed translators. The number of boosters, estimated at around 1,000, is believed to have doubled in recent months.

The states are doing little about CATV regulation. Attempts to enact legislation have failed. A court case in one state is centered around the possible public-utility status of CATV.

The question of program property rights has haunted broadcasters, program originators and the CATV systems. No tv station has yet volunteered to be guinea pig in a test case, but many broadcasters consider a court review inevitable. The issue: Can CATV systems feed broadcast programs into homes for a fee, over the objection of stations, networks or program originators?

A corollary question: Can CATV systems manipulate broadcast electrical signals in the process of providing community service?

Two FCC cases strike at the heart of these problems—a protest by KLTV (TV) Tyler, Tex., against a CATV system’s plan to add four microwave relays that require FCC licenses; a petition by a group of western stations asking FCC to reconsider its disclaimer of jurisdiction over wired hookups.

CATV appears to be approaching a new episode in its life. Broadcasters are wondering what the future holds for this once cute little baby.

Where pinch is felt

Television stations in some areas served by community antenna systems are starting to worry about their life expectancy.

KGEZ-AM-TV Kalispell, Mont., went off the air in April, blaming CATV, and then ran into more trouble when its proposed sale was blocked [AT DEADLINE, April 28].

In Tyler, Tex., KLTV (TV) is fencing
and now there are 147 movie features
a month from the Tulsa stations.

"Since we have now learned that the public is not significantly interested in whether a movie is first run or re-run—
one of our major selling points—the first-run showings on Telemovies did not have the impact we thought it would."

Mr. Griffing said he was impressed
with the enthusiasm of the subscribers who were interested in the art films
(operetta, ballet, symphony and foreign).

"They are a mighty small segment of the audience," he said, "but they certainly know what they like and support it."

The Video president said he thought
the future of mass tv media might run
something along these lines:
- Broadcast tv for entertainment, sports, news.
- Closed-circuit tv for selected film features and minority type programming (cultural, etc.), to be paid for on a "use" basis.

Video Independent operates 12
community tv systems in Southwestern cities and communities. It is also building eight new ones. It has a $2 million investment in these systems, it is estimated, and its return after taxes and depreciation runs about 10%.

Its latest CATV project is Lufkin, 4 Tex., where it has joined NBC-affiliated ch. 9 KTEX-TV in a 30/50 partnership. The operation is awaiting FCC approval of 110-mile intercity microwave system to bring Houston tv signals to Lufkin.

Conversion to pay tv?

A lot of huddles around the NAB convention at Los Angeles last fortnight appeared to deal with a nebulous but nagging fear. Will a pay tv medium grow out of scattered clusters of community antenna systems?

The prospect that a subscription tv service might get off to a flying start through connected community systems, where coaxial grids are already operating, was based to some extent on undocumented and circumstantial evidence.

But that didn't quiet the fears of tele-
casters. They faced such trouble signs as these:
- FCC recently dismissed any jurisdiction over wired community systems.
- A wired system in Bartsville, Okla., is experimenting with paid tv service. (It may suspend operation but is understood to be working out a new paid program format and fee-collecting technique.)
- Vumore Co., operating the Bartles-
ville system, has another dozen CATV systems in the Southwest with another eight under construction.
- Groups of CATV operations in such areas as Eastern Pennsylvania, West Virginia, Western Maryland, Pacific Northwest and Mountain States could be connected by wire, microwave or telephone relay. These hookups, some tv operators believe, could kick off pay-tv with a built-in audience of several hundred thousand homes.
- NAB's inactive Community Antenna
Committee came to life at Los Angeles and will meet in mid-June to discuss the problem.

A new organization, Committee for Preservation of Free Hometown Television, was created at the Los Angeles convention [Broadcasting, May 3]. It is headed by William C. Grove, KFBF-
TV Chuyenne, Wyo. Other members are Ed Craney, KXLF-TV Butte, Mont., and Marshall Pengra, KLYT (TV) Tyler, Texas.

Suppose, a mountain area telecaster
suggested, that community tv systems north of Denver and Salt Lake City, and east of Spokane, were tied by micro-
wave. What about the small-city television stations? And what about the Denver, Salt Lake City and Spokane stations?

Or suppose, said another, that program-
ing from New York were fed into the No. 1 CATV cluster in hilly Eastern and Central Pennsylvania?

Even worse, another station operator said, would be a combined hookup of a big sports event and CATV systems. Several hundred thousand persons in many parts of the nation would handson-
ly to see the Robinson-Basilio fight televised in theaters. Another 500,000 subscri-
bers to CATV systems, many of them close to the theater network's transmission hookup, would offer an attractive potential to an aggressive promoter.

Compounded worries: This warning is frequently heard: if pay tv and wired systems ever marry, or even start a court-
ship, they'll soon be selling time to ad-
vertisers.

Small-city tv stations figure they would be the first victims of any form of wired pay tv. But big-city stations could be affected. Stations in one of the major Pacific Northwest cities might have as many as 30 connected CATV systems competing with them.

The way FCC has been dodging the CATV problem in the last decade, some telecasters say, provides inducement for a CATV hookup to pick up broadcast programs and peddle them on a network basis—a pay tv network with no program costs. It might even sell advertising, unless the question of property rights in programs and signals is settled by the courts.

All this is nonsense, according to
Edward P. Whitney, executive director of National Community Television Assn. He recalled that his association discussed the subject at its 1957 convention [Program Services, Sept. 30, 1957]. His members were excited about proposed wired tv systems in Los Angeles and San Francisco, but lost interest after hearing the details and analyzing the prospects, he added.

Mr. Whitney said the high cost of con-
necting CATV systems, most of them small operations, makes the subject academic. "The subject has died," he said.

WJPB-TV had the rug pulled away, ac-
cording to J. Patrick Beacon, its owner, when Fairmont Television Cable Corp. ran fullpage newspaper ads welcoming WJPB-
TV and informing the public there was no need of buying expensive uhf converters and antennas. However, Mr. Beacon said, the cable company soon pulled WJPB-TV off its line and left the station in a jam. His suit against the cable company is for $150,000. It has been taken to the state supreme court.

Threat worth $50,000

A $600,000 radio-tv station sale col-
lapsed last week—all due to the threat of a community antenna system.

Buyers Ed Craney and A. W. Schwieder (KID-AM-TV Idaho Falls, Idaho) forfeited $50,000 earnest money when they refused

May 12, 1958 • Page 35
last Wednesday to consummate their $600,000 purchase of KFBB-AM-TV Great Falls, Mont., from J. P. Wilkins, the Fairmont Corp. (newspaper publisher) and others.

Their rejection of the transaction (the FCC approved the transfer of ownership on April 3) was due, it was learned, to the prospective establishment of a CATV operation in Great Falls.

The looming Great Falls antenna system became public early in April when the Intermountain Microwave Co. filed an application to feed Spokane, Wash., tv signals to Great Falls. The application included an agreement with a group of Great Falls businessmen stating that they proposed to establish a community tv system and were agreeing to order the services of the common carrier for the Spokane tv signals. They agreed to prepay $36,000 to the carrier, with amortization at the rate of $1,000 a month for 36 months. The carrier proposed to charge its Great Falls CATV customer $5,700 per month for a three-channel service (there are three tv stations in Spokane). It also estimated that it would spend $131,000 for the 286-mile four-hop relay system.

**Echo on Madison Avenue**

The city of Tyler, Tex., is tied into a citywide CATV system whose influence has penetrated to Madison Avenue and Washington, D. C.

KLT V (TV) Tyler has tackled the CATV regulatory problem head-on despite the FCC's recent disclaimer of jurisdiction of the wired systems. It aimed at a soft spot in the Commission's disclaimer by protesting a petition of the CATV to install microwave systems connecting four cities in the KLT V area.

The protest points up the damage that CATV can do to a tv station by reciting KLT V's troubles with a major national advertiser—Whitehall Pharmacal Co. In Tyler the CATV system brings in Fort Worth, Dallas, Shreveport and KLT V.

And that's why KLT V is hurt. A family seated in a Tyler living room with a CATV connection can get the NBC-TV Jack Paar Show at four spots on the dial: ch. 5 WBAP-TV Fort Worth; ch. 3 KTBS-TV Shreveport; ch. 5 KLT V converted to ch. 6 by the cable and—provided there is a switch and/or rabbit ear on the tv set—KLT V on its original ch. 7.

But here's the catch, according to the KLT V protest: The cable's ch. 6 version of KLT V's ch. 7 signal is degraded in the process. Further, the ch. 6 signal then proceeds to louse up the on-the-air ch. 7 KLT V signal by bleeding into it the receiving set.

Either way, KLT V takes a cable beating, according to the brief, and its Tyler audience is reduced because people get the program from WBAP-TV (90 miles) or KTBS-TV (about 90 miles).

KLT V's ch. 7 is converted to the cable to ch. 6 because most cable systems have trouble delivering signals above ch. 6. From ch. 7 up they peter out quickly and need a lot of expensive amplification.

**Growing pain:** The Tyler CATV is one of the largest in the United States, and it wants to become larger by installing microwave relays that will improve and extend its service—to an estimated potential of 9,000 families in the city. Currently it has about 7,000 subscribers. An American Research Bureau survey shows a majority of Tyler tv homes getting their network programs on the cable, with only a small percentage of the cable audience tuned to KLT V.

Network and spot advertisers are "aware that by purchasing stations in Dallas-Fort Worth and Shreveport, their message will reach large portions of the Tyler audience at no additional cost," KLT V's protest states.

Take the case of Whitehall Laboratories. The KLT V protest includes a March 28, 1958, letter from R. G. Rettig, Whitehall vice president, that says the CATV at times accounts for up to 25% of the total available tv sets in Tyler.

"We do not make any payment to the people who own the community antenna," Mr. Rettig wrote, "but we still pay you the full rate for the shows which we have on your station . . . . As you know, we have both network and spot television advertising on KLT V which is affected by this situation."

And then this snapper: "Don't you think that you should review this situation and in some way compensate us with a rate change which will more truly reflect the coverage of your station? We are aware that this is a situation which has developed outside of your influence. Nevertheless, it exists and needs attention."

That's language any broadcaster can understand.

One regulatory point raised by KLT V hasn't had much official attention—the delivery by CATV systems of distorted station signals. FCC should not allow CATV systems to discriminate against local stations nor should it allow cables to duplicate from afar the programs carried locally by a tv station, broadcasters argue. They really see red—and red ink, too—when their signals are fuzzed up by CATV transmission facilities.

**Size and shape of CATV**

About 500,000 U. S. homes are receiving television service from wired hookups operated by community antenna systems—1.2% of the total 42 million tv homes.

This estimate is supplied by Edward P. Whitney, executive director of the National Community Television Assn., trade group comprising 301 system operators (some operate more than one system). Possibly another 300 non-members systems range from little clusters of connected homes to systems with several thousand outlets. The 600-odd systems do a total business of about $20 million a year.

Two other methods provide tv service to homes lacking top-grade broadcast signals or any service at all:

1. Translators licensed by the FCC pick up signals from strategic elevations, convert them to the upper part of the uhf band and transmit a low-power uhf signal that can be received on sets equipped with uhf...
IF YOU USE RADIO ADVERTISING
YOU SHOULD READ THIS MESSAGE FROM
THE MANAGEMENT OF RADIO STATION WBT

Throughout its 36-year history, WBT has followed a program philosophy of providing the best possible programs for all segments of the radio audience. We call this Full-Service Broadcasting because it is not limited to "popular" music and five-minute newscasts.

We provide our listeners with news—news in depth—reported by reputable, experienced news men and women from all corners of the globe. We provide our listeners with music—but not just one kind of music. WBT offers country music, "popular" music, classical music, and many variations of the three.

This Full-Service Programming gives our listeners discussion programs, drama, comedy and quiz programs. It means church services, educational programs—programs to stimulate the imagination, the ability to think—and the ability to feel.

Through the years, audience research surveys have shown us that this is the type programming most Charlotte and Mecklenburg County listeners prefer.

But the influence of Charlotte and its institutions is not confined to municipal boundaries. What of the listeners in Rock Hill?—in Hickory?—and in Gaffney? What do people in Winnsboro want from WBT and in Salisbury and Monroe? To find out we recently asked the Pulse, Incorporated, to send its representatives into the homes of listeners living in Charlotte and within a 60-mile radius of Charlotte to check program preferences. This was the acid test for WBT's brand of Full-Service Programming.

The results of this survey, conducted during the month of March, have just been released.

We are happy to say that WBT has met the test and its programming concepts have been justified.

The survey shows that WBT is the most popular Charlotte station in every time segment surveyed in the 25-county area (Sunday-Saturday, 6 A. M.-midnight) except one. In that segment WBT won a tie.

For this overwhelming vote of confidence by our listeners and for the support of you, our sponsors, we are everlastingly grateful and sincerely humble. And our pledge to you is a continuation of Full-Service Programming and audience leadership in the future.

WBT
CHARLOTTE, N. C.

JEFFERSON STANDARD BROADCASTING COMPANY
Interview: William B. Templeton

Bryan Houston, Inc. Vice President and TV-Radio Director, William B. Templeton, tells why he selects WLW TV-Radio Stations for NESCAFE Instant Coffee

"For instant results, we select WLW TV and Radio Stations time after time to bring home the business for NESCAFE."

"The Crosley Group always measures up a cupful of mighty flavorful returns for advertisers."

"From programs to promotion, the WLW TV-Radio Stations are brimming over with just what the ad men order!"

"Warm it up?"

Call your WLW Stations Representative . . . you'll be glad you did!

tuning facilities. About 200 translator units are retransmitting station signals.

(2) An estimated 1,000 allegedly illegal boosters are operating in mountainous and hilly terrain. They are, in essence, amplifiers that pick up weak signals and give them an added local kick.

Because of Congressional and public pressures, the FCC has not seen fit to enforce the Communications Act or its own rules. These boosters are said to cause interference with reception of a station's signal in other areas. In addition they interfere with each other and with community antenna services.

In the case of community antenna systems, the FCC has ruled it has no regulatory powers aside from licensing any shortwave relay signals.

Money in CATV: There's good money in community antenna systems, given a city or town without two or three solid signals from TV stations.

Two main types are operating around the nation—with microwave relays and without. However, there are two not-so-licitous examples:

Take the above-average case of a small city—Videburg—with only one or two fuzzy broadcast TV signals available to the average home. The public appetite for television programming is so keen that anyone offering to pipe in the popular network programs will find a good market in this city of 25,000.

Capital is raised from local or outside sources, but both. It doesn't take much money because a $150 installation fee can be charged if off-the-air service is scanty. Microwave service is bought from the telephone company or from a private utility built for the purpose (under FCC license).

The Videburg CATV has been operating five years. It has 6,000 subscribers who have paid $900,000 in installation fees. Their monthly CATV bill is $8. This adds up to $576,000 per year.

The costs consist of $6,600 per month for microwave service and $10,000 for wages, advertising and other routine items, or $192,000 per year.

Net income before taxes, etc.—$384,000.

Or take the more modest operation in Televille, a city of 25,000 where several distant TV signals are picked up by the CATV system from a nearby hilltop. No microwave service is needed. Every month 4,000 homes pay $3.50 for CATV service, or $168,000 yearly. Collections are good—no one is shut off like the telephone or electricity if bills are not paid promptly.

Televille's CATV operators have expenses of $8,000 a month, or $96,000 yearly.

Net income before taxes, etc.—$72,000. This company has taken in $600,000 in five years from its $125 installation charge. A lot of this is gross, just as it was in Videburg.

However, installation fees are disappearing in many areas.

These are highly profitable operations, with ideal conditions prevailing. But there are dogs, too—villages of 500 persons or 150 homes, and cities where marginal CATV operations exist. There are cities, small, medium and big, with competitive CATV services.

Not all CATV systems are big-money makers, but a lot of them are doing nicely.

Problem for advertisers

Advertisers and their agencies are quite aware that community television services provide TV station and network circulation that may or may not be reflected in broadcast rate cards. For the most part, however, they pay minimum attention to CATV in making up their TV network and spot schedules.

In a spot check of agencies, the great majority said that buyers do not consciously weigh CATV circulation in their buying decisions.

A few told Broadcasting they take CATV into consideration whenever they can and add that they would like to do so more often. This is complicated by what they describe as a lack of adequate information providing a uniform check point.

More CATV facts are becoming available. American Research Bureau has just published a new "A to Z Coverage Study" covering 210 markets and showing CATV circulation. Nielsen figures may be updated by a survey already conducted for internal use and slated for possible late-summer or autumn release, it is understood.

Pressure on rates: An example of advertiser pressure against a station whose hometown has CATV service is offered in an FCC document filed in late April by KLTV (TV) Tyler, Tex. (see Tyler story page 36). Whitehall Laboratories suggested to KLTV that it might be willing to scale down its rates because outside stations are brought to Tyler by CATV.

However, an executive of one of the agencies servicing Whitehall said the agency doesn't consider CATV nor does it seek information on the subject. Another Whitehall official merely states that CATV circulation as "a bonus" when it is involved in a campaign.

Officials at all three TV networks say they do not consider the presence of CATV competition in deciding whether or not to affiliate a station, and by and large they say they would not "affiliate" or sell program rights to a CATV system.

A few years ago NBC and ABC had an agreement to supply kinescopes to Transcommunity TV, an organization which was setting up a community system in the West and hoped to expand to other areas. But the understanding reportedly was that Transcommunity would not go into areas in competition with the networks, and in any event the firm was said last week to be out of the CATV business now.

NBC said flatly the network would not sell service to CATV systems now and ABC officials took much the same tack. CBS authorities said that they not only wouldn't but that they had refused in the relatively few instances where they had been asked to do so.

The Nielsen questionnaire solicited in-

PREVIEW

A titled Englishwoman named Lady Daphne who suffers from chronic Mike fright and a spirited male Bedlington terrier named Rover who is anything but shy are trying to make themselves heard over six New York radio stations. Should people listen—and rush right out to buy Spratt's assorted dog biscuits and Fido kibbled dog food—Lady Daphne and friend will invade such other Spratt's markets as Philadelphia, Baltimore, Chicago.

In mid-April when Spratt's Patent (America) Ltd., London, left Paris & Peart for Hicks & Greist, both N. Y., H&G copy chief Art Mayer wasted little time in giving Spratt's a new aural image. In this New York test campaign, now on air, Mr. Mayer has given the imported chow hound a British flavor by having English character actress Lucy Landau portray a flighty, harried member of the Veeddy Upper Aristocracy—"the sort of dame one would suspect of using nothing but grade-A porterhouse steak for her precious little darling." Her efforts to communicate with the common people are further impeded by the loud barks of her dog, "but at least it demands attention."

With three more months to go till Lady Daphne's "visitor's visa" expires, she can be depended upon to give her all for Spratt's. Comments account supervisor Harry L. Hicks Jr.: "At that time, barring illness or a call back to Whitehall to settle an uprising in the colonies, we expect her to become a permanent resident."

---

LADY DAPHNE (actress Lucy Landau) attempts to communicate the virtues of Spratt's, over interference from Rover (played here by stand-in talent) recruited from Hicks & Greist—via his owner, H&G's director of public relations, Irving Smith Kogan.
Who owns the programs?

Are community antenna tv systems "pirates"?

Yes, say program producers and many broadcasters.

Of course not, CATV operators reply indignantly.

They pick up our programs, often without permission, and re-sell them to subscribers, according to the broadcaster version. But CATV people reply that broadcasters are getting free and extra circulation in places outside the range of reliable reception.

The property rights question has never been settled in court. One of these days a hardy broadcaster is expected to start a test case, challenging the right of a CATV system to re-transmit his programs without permission and at a profit.

A clear-cut decision would wipe out a lot of the commercial static in the CATV-broadcaster controversy.

Unheeded protests: For many years broadcasters, program owners and networks have formally protested unauthorized re-transmission of their programs on CATV. They can get pretty indignant about it.

But if we ask you a wink with the protest, the CATV people say, as they blithely ignore these legalistic formalities.

One tv station, KLTV (TV) Tyler, Tex., raised the "pirate" cry in protesting to the FCC that a CATV project in Texas wanted microwave licenses to extend and improve its service (see Tyler story, page 36).

KLTV is blunt in its formal protest: "For this Commission to grant licenses to someone engaging in such illegal pirating so that they can better continue that practice, is to aid and abet an illegal or tortious act."

These formal protests have been made to the CATV operator in Tyler, according to KLTV's FCC petition:

- NBC-TV objected "to any use by your community antenna system of the NBC Television Network programs as broadcast by KWENS-TV Shreveport, La., which will consider any such use by you to be an unauthorized and a violation of our rights."
- KTBS-TV told the CATV operator its NBC-TV affiliation contract indicates "that we must request that you do not include our station" in the Tyler system.
- Ziv Television Programs said, "This unauthorized use of our property has and is causing us serious damage. We have been advised by our attorneys that this use, without our permission or license, constitutes an unlawful infringement of our copyright as well as unfair competition. We must, therefore, insist that such misappropriation of this company's property be ended immediately."
- Follow-up letters were sent, the last one dated March 14, 1958.

National Telefilm Associates, mentioning Dallas, Shreveport and Fort Worth pickups, wrote April 3, 1958: "... We demand that you refrain from picking up any of our pictures for transmission to your subscribers. Any such further activity on your part will result in legal action."

One angle that concerns tv and theatrical film companies is the fact that stations whose service areas are penetrated by signals from other stations might refuse to pay first-run rates for films that have come in via CATV.

An aging question: Every NAB convention and regional meeting held in the last decade has taken up, formally or in a bedroom huddle, the matter of property rights and CATV. The association has shown official concern but must await a willing broadcaster before suit can be started.

The CATV trade association, National Community Television Assn., says it will welcome a test case. The association, which meets June 10-12 in Washington, has a code of ethics that includes a clause pledging to deliver tv signals without additions or changes in broadcast intelligence and to comply with all legally applicable governmental relations.

Then, too, there is another property problem—the rights of a station in the electronic signal it propagates. This subject, too, may be litigated one of these days.

FCC ducks Jurisdiction

The FCC has had the nettlesome CATV problem in its hand several times—but each time it has dropped the issue.

The Commission said it doesn't have jurisdiction and doesn't want the authority to regulate CATV systems.

And, furthermore, it said, if it had to regulate CATV operators in order to protect broadcasters, it might have to regulate broadcasters too.

FCC Chairman John C. Doerfer has made these points twice in the last four years. In public speeches, he has gone on record as being opposed to the Commission taking jurisdiction over antenna distribution systems.

The latest ruling: A basic CATV case was handed the FCC in 1956 when a group of 13 western radio and tv operators filed a complaint against more than 250 CATV operators. The broadcasters asked the Commission to assume the responsibility of regulating the antenna systems as common carriers. They charged that CATV operators deftately one of the priorities in the Commission's Sixth Report and Order, that there be at least one local service in all communities, by inhibiting local tv service in small communities; that CATV upset the allocations table by bringing in distant tv signals to areas where they were not supposed to reach, etc.

In 1957, the Commission ruled (with Comr. Robert E. Lee not participating) that CATV systems do not perform the functions of a common carrier as set out in the Communications Act. The FCC said that there is a basic difference between CATV and common carrier. The latter, it pointed out, carries goods or persons, whereas in the CATV case, it declared, the signals put on the coaxial cable were determined by the operator of the antenna system, not by the subscribers. It also said it doubted that it could assume jurisdiction under its broadcast licensing authority. Even if it could, the Commission added, it doubted whether it should restrict or control CATV to protect broadcast stations.

Last week, the western broadcasters filed with the FCC a plea to reopen and reconsider the complaint. The complaints made these points:

- In many instances in its decision the Commission expressed doubts as to its jurisdiction, as to the advisability of regulating CATV operators, etc. If there are doubts, they should be decided after an open hearing.
- The Commission might not consider it wise to regulate CATV to protect local sta-

tion service, but it might prohibit unfair prac-
tices. For instance it could prohibit CATV op-
erators from "breaching" the first refusal rights of network affiliates.
- It could also impose a requirement on intercity microwave "specialized" common carriers that they not feed big city tv pro-
grams to CATV systems in direct competition with tv broadcast stations in the same area. Or the Commission could indirectly ac-
complish this by forbidding stations to per-
mit this to be done with their signals.

Doerfer's reasons: Some of the state-
ments of Chairman Doerfer spell out his attitude—presumably shared by some of his colleagues—that it would not be advisable for the Commission to assert jurisdiction over CATV.

In 1954, in a speech to the National Assn. of Railroad & Utilities Commissioners in Chicago, he explained the "dilemma" confronting the FCC in the CATV problem.

On the one hand, he said, CATV brings network service to communities. On the other hand, he added, local stations bring local expression to their cities, but no net-
work service, or at best only one. Which is best for the public?

And, he asked, how about those viewers who are too far out for connection with the CATV system and don't get clean signals from the local station?

In a June 1955 speech to the National Community Television Assn. in New York he repeated some of the above, and added a serious note for broadcasters to ponder:

"If a CATV is declared a common car-
rier, then if anyone is entitled to protection it is the common carrier under the ordin-
arily understood concepts of regulation. Hence if broadcasters seriously contend that they are entitled to protection, they, in ef-
fect, are asking for eventual regulation of their rates and services."
HOW AN ADVERTISER PICKS AN AGENCY

Max Factor’s 73-point formula for separating the men from the boys

Max Factor & Co., in its search for a new agency to take on the accounts to be vacated by Doyle Dane Bernbach July 1, has devised a 73-point questionnaire to screen applicant agencies. The philosophy behind the questionnaire was described to the Los Angeles Advertising Club last Monday by Nelson Gross, advertising director of Max Factor. It follows, condensed. Highlights of the questionnaire are covered in a separate box.

The first phase of our job was to determine what to look for. We did this first in very broad terms, and, more by chance than design, we arrived at what could be called the four Cs on which we wanted to evaluate agencies. Before discussing them briefly, let me just list them for you: Creativity, Conception, Character, Congeniality.

Every agency claims creativity of the highest order. Yet a little analysis reveals that one agency bases that claim on a successful production it may have created originally but into which it now forces every client’s advertising. A second agency may base its claim on radical, off-beat approaches—creative as hell—but also experimental and sometimes cuter than they are effective. A third agency—and this one gets at least one point on my score card—bases its claim for creativity on soundly reasoned and constant evaluated appeals to which it then adds “freshness of expression and appearance.”

Conception covers a highly important area. We want to understand an agency’s philosophy of advertising to be sure it is one in which we believe. Perhaps no answer, but only our study of their previous work, will reveal their true beliefs. However obtained, we must be satisfied that an agency’s working philosophy of advertising is at once realistic, idealistic and above all is established and firmly held.

Character is perhaps a little simpler, applying principally, as it does, to the people within the agency. It is our conviction that men of character can build only an agency with character and integrity. The important corollary to this is that such an agency can produce only advertising with character and integrity to parallel the products of Max Factor & Co., and any other kind of advertising would ultimately undermine all that our company has devoted fifty years to building.

Congeniality is more important to us than a literal definition would imply. It does not mean mere conviviality or joviality, but instead a somewhat deeper kind of “Togetherness,” if McCall’s will pardon the use of the phrase. At Max Factor & Co. we want an agency to work with us, not for us. Doing so requires a congeniality in the sense of a mutuality of respect and objective, the kind of dual, two-way understanding essential to the best advertising.

Having determined what to look for, the harder problem became how to find it.

You cannot very well ask, “Do you have character?” and expect a sensible reply. But there are indirect ways to find out. And we have devised our own measuring tool which, coupled with personal meetings and discussions, will give us the answers. This measuring tool is a questionnaire, but that word inadequately describes it. The first thing we need is information. Without facts, facts and more facts we would be forced to rely (at least to some extent) on guesses, hunches, whims and personalities—and the selection of an agency is far too important to run the risk inherent in that kind of choice.

Consequently, our questionnaire is long, detailed and comprehensive. When we constructed it, I frankly wondered if all the interested agencies would complete it. I know now that they will, because they have.

For simplicity’s sake, and because it may make it easier for any who wants to remember the categories, I can, with only a little forcing, label them as the four Ms: Men, Management, Methods, Money.

About the men (and women, of course) in each agency being considered, we want to know everything pertinent regarding all the important people in the company and regarding every person who will have direct contact with us and responsibility for all phases of our work. We want to know length of service, responsibilities and activities within the agency and prior background and experience. Some of the ques-

WHAT FACTOR WANTS TO KNOW

Among other things, the Factor questionnaire reveals a special interest in broadcast media. Television, for example, is the only single medium to which the advertiser devotes an entire section of its 73-point survey.

The tv questions:

1. Please submit the resumes of those people you believe are the closest directly involved in the production of the Factor business, together with their length of service with the organization and the amount of time you believe each would spend on Factor business.

2. Give examples of what you consider to be outstanding work that has been produced by people in your television department.

3. Give five examples to indicate how you test television copy and its effectiveness.

4. Can you provide some of the most outstanding television campaigns currently running?

5. Give us your philosophy of network programs versus tv spot, together with appropriate examples of experience you have had, successful or not.

6. Explain how your television department would or would not be involved in the purchase of television programming. The same for spot tv.

7. Name five tv commercial production companies with whom you have worked recently.

8. Who are the best tv production companies in the above mentioned?

9. Are there any other facts in the area of television you would like to add that might help us know more about your agency?

The broadcast media are singled out in other sections of the questionnaire, too. For example, Factor asks: How much of your total billing is in broadcast media? Give us a resume of the television copywriters who would spend 50% or more of their time on the Factor account. What is your policy towards commissions on tv packages?

In addition to the broadcast media questions, Factor poses a number of others which can be called provocative. Among them:

Is the management of your agency comprised of non-creative advertising people, semi-creative or creative?

What women do you have in executive capacities?

Give us a list of clients you have lost in the last five years.

Do you believe that investment spending of a considerable period of time, in order to build the client, is good business or poor business for an agency?

Have you ever traded a small account for a larger one?

Outside of your own agency, name the five agencies in Los Angeles you feel are the best generally-qualified agencies.

Assuming that everything your agency creates is the best effort that it can produce, do you allow clients to change your creative work in any way? If so, why and under what circumstances?

Who decides what ideas and plans are to be presented to the client?

What is your policy on agency personnel travel expenses when incurred in behalf of client activities?

Do you charge for layouts, storyboard, merchandise material roughs, etc., which are not used by the client?

Has the Frey report caused you to modify or change any of your present agency policies?
tions can be answered by mere counting. Some require individual resumes.

Questions regarding Management also are varied in type and, although many of them are concentrated in a separate section, many more are interspersed throughout the list. Obviously, we need to know the bare facts of each agency's size and structure, since the nature of our problems precludes consideration of even a superlative one-man or very small agency. Beyond that, however, we need to be able to compare the organizational plan of one agency with another in order to appraise their own evaluation of advertising's various phases. An agency, for instance, which has a 6-man copy staff and a one-boy research department (with the word "department" in quotes) announces its own convictions about research in a very plain way.

Methods, as a category of questions, runs throughout the questionnaire. We specifically ask how the agency handles research, market research, marketing, merchandising and media. We ask for samples and examples of projects done in many of these areas. We ask for opinions on the importance and limitations of these agency functions. We ask for an expression of attitude toward such diverse items as tv copy testing, commercial current on the air, regardless of which client or agency produced them—and for an expression of the abilities of tv production companies. Frankly, some of these questions are deliberately loose, and we are getting loose, free-and-easy answers. That's what we want, because we believe we can get an unemotionally evaluated, thinking answer into that kind of answer.

The fourth broad category is Money, and the questions pertaining to it are designed primarily to provide an understanding, in advance, of how each agency charges—and for what. As you know there is considerable variation in agency practices in this area. It is unlikely that our final selection will be greatly influenced by any agency's billing practice on storyboards, comprehensive layouts or display suggestions, but we are using the questionnaire to learn of any truly unusual policies which might affect our decision. As a tool for measuring prospective agencies, this section of the questionnaire is likely to be the least important of any.

In the beginning I emphasized the fact that what we really are looking for in a new agency is brains—capital B-R-A-I-N-S—experienced, skilled, brilliant, mature, creative brains available and applicable by that new agency to every phase of our large, complex and vital advertising problems. Each completed questionnaire will contain a full revelation of that agency's brains, quantitatively and qualitatively, in a way that is measurable alone or in comparison with other questionnaires.

You will be interested to know that 33 agencies have solicited our account and that we furnished each with a questionnaire. As rapidly as we can, we are completing our studies of the replies with the intention of narrowing the field to the best qualified six, through the use of a standardized score sheet or evaluation chart on which each of us will rank each agency. At present, we believe that the selection of six agencies for further and final investigation will give us a good cross-section of top-rank agencies, although the number might prove to be five or seven instead.

We will then visit the offices of these agencies, meet their staffs, examine their facilities and hold preliminary discussions. Later we would invite presentations. At our insistence, these presentations would be non-specific and non-speculative. They would contain absolutely no speculative ads or campaigns.

As I have tried to emphasize throughout this talk, what we are looking for in a new agency is thinking. We are not looking for a single thought, a single solution to a single current problem. Putting it bluntly, we believe that any agency—large or small, great or indifferent—might come up with a single good ad or even a single good campaign. But our products are many and our marketing problems and objectives are equally numerous. We are looking for thinking—for tomorrow and tomorrow and tomorrow.

C. Knox Massey & Assoc. Formed From Harvey-Massengale Branch

C. Knox Massey & Assoc. has announced its establishment in Durham, N. C., as an advertising and marketing agency, replacing the Durham office of Harvey-Massengale Co., Atlanta, Ga.

Principals and key personnel of the new firm: C. Knox Massey, president-treasurer; John L. Moorhead, vice president; William E. Stauber, vice president; W. D. Carmichael III, account executive; George Watts Fowler, art and production director, and C. Knox Massey Jr., secretary-assistant treasurer. All except Mr. Massey Jr. were with the H-M Durham office.

Former Durham area clients of the Har-vey-Massengale Co. are to be served by the new firm, it has been announced. They include the B.C. Remedy Co. and 25 others. Massey & Assoc. will expand personnel and activities. H-M has discontinued its Durham branch, the Massey firm reports.

Ad Council's Confidence Push Outlined in Washington Report

Advertising media have pledged large amounts of time, facilities and space to the Advertising Council's new confidence-building program, according to Charles G. Mortimer, president of General Foods Corp. and co-chairman of the council's industries advisory committee.

The plan to allay anxiety and promote confidence was explained Tuesday at the council's annual conference with high government officials, held in Washington and addressed by President Eisenhower.

Marion Harper Jr., president of McCann-Briskon, task agency for the campaign, said every major radio and tv network will promote the campaign on sustaining shows and nearly every major radio and tv advertiser will carry the message in sponsored time. He added that confident businessmen and confident consumers can quicken the return to prosperity. The theme of the campaign is "Your future is great in a growing America."

BEST AGENCY PROGNOSTICATORS in the 1958 Navigation Jackpot of WDSM-AM-TV Duluth, Minn., collected their rewards last Wednesday. Stations annually stage competition in which agency people attempt to guess the arrival time of the first ship through the Duluth ship canal to officially open the navigation season at the head of the Great Lakes. First and second prizes of $100 and $50 are given winners in New York, Chicago, Detroit and Minneapolis. Left to right: Samuel Henry, Peters, Griffin, Woodward radio account executive; Walter I. Teitz and Mary I. O'Connor, both of Dancer-Fitzgerald-Sample and New York winner and runnerup, respectively; Thomas Tilson, PGW television account executive, and Lloyd Griffin, PGW vice president and director of tv.
"TV HOUR OF STARS"… the BIG-TIME comes to daytime TV… Monday through Friday. starting in the fall on…

A SALVO SOUNDS FOR SPOT TV

- The Katz Agency updates its coverage-cost study
- Network tv claimed to be overshadowed by spot tv

The Katz Agency, station representative, has passed new ammunition to Madison Ave.'s time salesmen to use in booming spot television. On the receiving end: network tv.

The representative firm has brought up to date a presentation it released a year ago that compares the coverage and cost of spot tv to network programming. According to the new data, spot tv's "margin of efficiency" over network has increased in the past year. In that period, says Katz, there has been an increase in the use of syndicated half-hour shows by both national and regional advertisers.

Compared is a 100-market NBC-TV lineup, which Katz reports as having a potential 38 million tv homes, with a 60-market spot buy which "covers" 34.9 million unduplicated tv homes but delivering "a total of 40.1 million viewing opportunities." Thus, at $1.56 (placed 1,000) said to be $12,000.

According to the Katz story (a color slide and flip card presentation called "How to Make a Tv Half-Hour Work Overtime") now being shown advertisers and agencies:
The 100-market spot program buy (between 6 and 11 p.m.) delivers a 2.1 million more viewing opportunities at $11,700 less per showing than the 100-market network buy, or $47,400 compared to $59,100 (Katz points out that the comparison is based on the most expensive rate on the most expensive station in each spot market).
The original presentation (which came out last year) had a similar comparison showing network at $57,200 and spot at $45,200 and based on a 100-market NBC network lineup with a potential coverage of 34.5 million tv homes and spot's unduplicated tv homes covered at 31.4 million with delivery of a total 35.1 million "viewing opportunities." Thus, the representative then claimed the spot buy delivered 600,000 more viewing opportunities at a saving said to be $12,000.

Hence, the Katz agency is pointing to what it believes is the greater number of viewing opportunities from the spot tv buy, which from the figures presented show a total approximately 3/4 times greater than it was a year ago.

By buying the lowest priced station in the market between the hours of 7-11 p.m., the spot advertiser will pay $29,000 for a comparative saving of $30,000 and for 26 telecasts, $754,000 for a saving of $782,600 as against the network purchase (placed at $1,536,600 for 26 telecasts). Cost per 1,000 "viewing opportunities" is computed at $1.56 for the network lineup, $1.18 for the spot buy on highest priced stations and 72 cents on lowest priced stations.

A similar charting is given for a 30-market spot buy against the 100-market network purchase. Savings: $25,500 on highest-priced stations, $38,800 on the lowest priced outlets; on a 26-telecast basis, $663,000 on the highest priced and $1,008,800 on the lowest priced stations.

For the 30 markets, viewing opportunities are 30.7 million per telecast, according to Katz.

Other factors cited by the presentation as to why spot should be favored over network: network program costs are fixed, spot cost is flexible and market-by-market; emphasis in spot can be favored according to market but on a network an advertiser buys the same number of programs weekly in every market; a nighttime network advertiser by "common practice" will be committed to a non-cancellable contract for time as long as 39 to 52 weeks but in spot the maximum commitment is only 13 weeks; commercials can be varied in content for the local market but in network a costly and cumbersome use of cut-ins would be necessary; merchandising services by stations for spot advertisers are available and finally, stations net more from spot programs, and thus there is an added incentive to clear for the time most desired by the advertiser.

Katz Also Plans to Target On Local Market Situations

The tv sales development department at The Katz Agency in New York has been active on more than one level.

The unit has worked up spot-network comparison data (see separate story) on the "national" level. On the local scene, the department at the request of advertisers and agencies plans to work with client stations to develop specialized market information.

First such survey already has been completed for an advertiser who makes rifles and ammunition. The survey constituted a poll of viewers of a locally produced sports show on WOOD-TV Grand Rapids, Mich., the cooperating station. The audience was surveyed by the station for general preferences and buying habits in sporting goods and equipment for outdoor activity.

B&B Newspaper Campaign Shows 'True Picture' of Advertising Force

Benton & Bowles, New York, is currently preparing a series of newspaper ads to show the public and business community the "true picture of advertising's role as an economic and social force."

Robert E. Lusk, president of the agency, wrote a MONDAY MEMO on the same subject for an issue of BROADCASTING earlier this year [Jan. 27].

The first ad depicts the fact that "advertising has sold something to everyone of us" and the second points out that "advertising can . . . and does . . . create awareness about products and services."

The agency lists its 23 clients on the bottom of the ads and describes itself as "advertising and marketing counsel to leaders in American industry."

Grey Expands N. Y. Office Area

Grey Adv., New York, moves four departments (marketing and research, media, publicity-promotion and accounting) to additional 17,800 square feet at 445 Park Ave., effective May 1. Grey now has 525 employees; 1957 billings were upward of $43.5 million.
"Jaxie" Jacksonville, Florida's most famous Porpoise, says—the new WFGA-TV, Florida's Colorful Station, has been picked by Television Age and Billboard for national honors in Two Station Markets.

★ 2nd Place Award—General Audience Promotion
★ 2nd Place Award—Sales Promotion

We would like to thank the judges who bestowed these honors on WFGA-TV—a station that has been on the air only since September, 1957.

FLORIDA'S COLORFUL STATION
FSR PUTTING 400% MORE INTO RADIO

- Total to be $3.2 million
- All-media study motivates

Fuller & Smith & Ross, New York, is growing radiant over radio. This year the agency plans to allocate $3.2 million to the sound-only medium—up from $650,000 in 1957.

Why the expected $2.5 million “plus” for radio this year? It stems from the results of an all-media research study conducted by the agency over the past two and a half years that shows, among other things (1) the radio audience is as large as it has always been—the listening pattern is all that has changed; (2) the advertiser with a moderate budget can afford to buy network radio; (3) the network buy is given “added mileage” by the purchase of spot adjacencies by local retailers and distributors, and (4) that four times the amount of money is being spent today in radio by local retailers and dealers than in 1948 (pre-tv days). FSR promotes the local buys through a “package plan” which offers merchandising ideas to stations to sell “tie-in” adjacencies to local dealers through local advertising agencies.

The findings of FSR’s research project, which was conducted in New York, Pittsburgh, Cleveland, San Francisco, Beverly Hills and Chicago, show that people never stopped listening to radio—they are just listening differently. Radio no longer is the medium for the family as a unit (television holding down this role) but listening is done out of the living room—in different places, at different times by individual members of the family. Thus, says Gerald Arthur, FSR vice president-manager, media department, “radio’s net unduplicated audience which is accrued by the broken audience, is tremendous.”

The availability of this data enables FSR to recommend to its clients where and how to use radio to reach their particular audience and suit their particular budget.

Mr. Arthur describes the agency’s “package” as a plan whereby national advertisers buy a network segment and local distributors, through agencies, buy cut-offs adjacent to the network time from individual affiliates. About three weeks before an FSR client has scheduled a network show, the agency stages a closed-circuit broadcast to the network’s affiliates attempting to sell local merchandisers and retailers on the idea of buying adjacencies.

“Most of these local retailers have never before thought of entering radio because of expense,” Mr. Arthur said, “but we aim to show that with the added impact of the national message, the local adjacency is an economical and sound investment. On the other hand, the local cut-offs are an advantageous complement to the national advertisers’ message.”

Last fall eight FSR clients began using the plan and all, according to Mr. Arthur, have renewed for this spring, and next fall. Clients include:

- Universal CIT, Ruberoid Co., Edison Electric Institute, Commercial Solvents Corp., Sterling Silversmiths Guild of America, Aluminum Co. of America, Hercules Powder Co., and Hans Holterchem Inc., importers of Bear & Karagheusian Inc., manufacturer of Gulistan carpets and rugs, a past FSR client now handled by Foote, Cone & Belding, also made use of the plan when with FSR.
- FSR clients, while using all four radio networks since last fall, have made heaviest use of NBC and its weekend Monitor programming. Universal CIT has bought a schedule of 69 five-minute Monitor segments per weekend over a period of four weekends (last weekend in March and April, and scheduled for May 23 and June 27), spending approximately $25,000 per weekend. Prior to the April buy, a closed-circuit meeting was held in studios of 186 NBC affiliates to hear a preview of the CIT sales program featuring such Monitor personalities as George Gobel, Fibber McGee & Molly, Ed Gardner, Bob & Ray, Ben Grauer and Peter Roberts. On that weekend 60% of the NBC stations carrying the CIT program had ratings where tie-in's were being made and, by making local announcements in adjacent cut-off time periods, between 4,500 adjacencies have been purchased for the coming May 23-25 weekend, FSR reports.

Fuller & Smith & Ross doesn’t intend to stop with the current tie-in plan in its radio push. The agency hopes to establish regional break downs of networks so that changes of copy can be inserted in certain areas. Franchise of three radio stations to be used as a testing ground for clients also is planned by the radio-minded agency.

Babbitt Switches to Tv Spot

B. T. Babbitt Co. (Bab-O, Olim, other cleaners) of New York, is going all-out for tv spot. Effective immediately, Babbitt, through Brown & Butcher Inc., New York,

is cancelling its 25-30 spots-a-week schedule in NBC Radio daytime programming, and is funneling funds into “as many tv spots as our money will buy.” No explanation was given for the sudden switch, but it’s understood that Babbitt and B&B both feel that they can get more “weight” out of spot than network activity. A fortnight ago, Babbitt launched its first tv spot drive since leaving Donahue & Cee last year, entering 25 markets with a ‘til forbid schedule on an across-the-board basis.

Pontiac May Brake Tv Spot, Will Step Up Use of Specials

Though General Motors’ network tv has shown little sign of being affected by the Detroit recession, spot broadcasting seems likely to feel the pinch this fall. Pontiac Motors Div., at least, is understood to be returning to introduction-only use of spot for the 1959 models after making a valiant attempt to set up a year-round, continuous spot drive for the 1958 car. Pontiac abandoned this plan early in March when advertising funds were curtailed.

Although Pontiac’s overall broadcast plans for the 1959 auto have yet to be completed, this much is set: it will again sponsor the 1958 Notre Dame U. football schedule, Sept. 27-Nov. 29, but will switch from MBS to ABC Radio. It will increase its use of network tv “specials” from 5 to 10 (at deadline, April 28), most of them hour-long shows as against this past season’s 90-minute spectaculars. Spots will be aired prior to and during introduction time.

Though officials at MacManus, John & Adams, Bloomfield Hills, Mich., and New York, declined to spell out specifics, it was indicated that last year’s $5 million tv-radio budget would be trimmed.

Ralston-Purina Takes 3 Tv Shows

While Ralston-Purina Co. has already signed for two ABC-TV programs next season—co-sponsored of The Rifle Man and Broken Arrow (renewed)—it will not cancel Bold Journey. There had been speculation that R-P’s budget would not cover three shows. Doubts were resolved with Ralston’s renewal, for 52 weeks, of the series. The pact was worked through Guild, Bascom & Bonfigli, San Francisco, R-P agency for Rice Chex. Ralston for the two other shows is represented by Gardner Adv., St. Louis. Also renewed for 52 weeks on ABC-TV was Sylvania Electric Products (J. Walter Thompson Co.), for Real McCosy’s Journey is seen Monday, 8:30-9 p.m., while McCosy’s is on Thursday, 8:30-9 p.m.

Peck Makes Management Changes

Top-management realignment at Peck Adv., New York, was announced Monday, stemming from the resignation of president Harry Krawit for “reasons of ill health.” Sanford C. Garfield, board chairman, has been elected president of the agency, with the vacuum filled by founder Harry Peck, most recently chairman of the executive committee. Sanford L. Hirschberg, vice president, has been elevated to executive vice president and secretary.
Our congratulations to William C. Beall, chief staff photographer of the Washington Daily News, who this week was awarded the Pulitzer Prize for Photography. This prize-winner, distributed by United Press Newspictures, previously had won the National Headliners' Award and was a winner in the United Press Newspictures Contest for September. The picture shows a small boy heeding a Washington policeman's warning not to get too close to a parade. Beall's title: "Faith and Confidence."
TV DICTATES FC&B SHIFT TO EAST

The fact that tv happens to be playing a bigger role at FC&B is a testimonial to the medium. . . in rolling ahead, the agency is finding more of its tracks made in television . . . tv of necessity is playing an ever increasing part in its clients' plans [ADVERTISERS & AGENCIES, July 8, 1957]

Because of television then, modification of broadcast operations at Foote, Cone & Belding has been in the cards for some time. Over the May 3 weekend, the agency, which ranks among the top 10 in the U. S. in total (overall) billing, took a 700-mile stride in adjusting to tv's way of doing business.

FC&B has announced a major shift in its media operations [AT DEADLINE, May 5] that will give the agency, to some extent Chicago-oriented in broadcast activity in the past, a more national or "New York" flavor.

Created was a new post, that of national director of broadcasting. Tapped for the job that will encompass control of the agency's radio and tv activity was Vice President John B. Simpson, a veteran radio-tv producer and a top broadcast policy executive at the agency. Mr. Simpson moves to New York from Chicago where for the past three years he has been vice president and director of broadcast.

Mr. Simpson's role at FC&B has been one of responsibility that has included radio and tv activities of Armour & Co. and "recommendations bearing on broadcast media from all of the agency's product groups." He also was in charge of traffic and secretarial personnel for all of the agency's radio-tv supervision and operations.

The emerging pattern of a "New York" look for FC&B became apparent after election of Rolland W. Taylor as president last summer. In moving up from vice chairman of the agency and manager of the New York office, Mr. Taylor retained his headquarters in the Park Ave. building that houses FC&B's New York operation.

In making last week's announcement, Mr. Taylor put his finger on the reason for the shift: "With New York the center of television and our clients increasing their television activity, we are placing our broadcast strength where it will be most effective."

Mr. Simpson in a telephone interview last week created this general picture of developments at FC&B:

- Under the new alignment, the national director of broadcasting will represent all of the agency's offices in the acquisition of programs and time commitments, that is, in the negotiating and buying of network properties. His prime function is to "be where television is bought, sold and 'bartered.'" His office will be responsible for maintaining "close contacts with all clients buying television."
- Function of the New York operation will be to "channel" broadcast matters (particularly network television) and to "tighten up" the broadcast organization within the agency.
- FC&B's improvements in its broadcast operation are both short-range and long-range—it will take some time to smooth the flow of activity. While at first allocating some of his time to Chicago—where Homer Heck, formerly associate director of broadcast, succeeds him—Mr. Simpson expects to spend a few days each week in New York. "Some time in July," Mr. Simpson will be devoting his full time to the post in New York.
- Another veteran agency executive in handling broadcast matters, Vice President Roger Pryor, who is in charge of broadcasting in New York, will have an additional responsibility. Mr. Pryor, in addition to overseeing production (or servicing of shows) in the New York office, will be broadcast production chief for all of the agency's offices. Thus, Mr. Pryor's counseling will be available to the multiple-office set up at FC&B.
- FC&B believes the shift has been needed because most of big-time tv's activity now is centered in New York (from the advertiser's point of view); especially in network tv.
- There are no plans at present for a wholesale shifting of personnel. Involved in the move from Chicago to New York: "Only me," Mr. Simpson said.
- Effect of the newly-created national function in broadcast activity on the agency's "placing of orders" (timebuying function) apparently has not yet been taken up. These decisions will be considered presumably in the course of operating the new system.

FC&B last year had a radio-tv billing estimated to be in the vicinity of $40 million. This year expectations are that the total will run about 10% higher. The agency's tv client list is using television this summer at about the same rate as 1957, but increases in billing represent the additional allocation to the medium required by the rise in advertising costs of all media.

Traditionally each of the agency's offices is geared to supply individual attention to the account assigned to it—the agency follows a pattern of assigning the account to the office that is located nearest the client. Unlike many other agencies, FC&B does not maintain "branch offices" in the accepted sense. Instead, the various offices act virtually autonomously. Offices are in Chicago, New York, Los Angeles, Detroit and San Francisco. The agency maintains service offices in Portland, Oregon, and Houston, Tex.

Much of FC&B's business is handled in its Chicago office, and in the past, this has been true particularly with network tv activity of its clients. A year ago, the agency expressed its thinking about tv as a medium opening a new avenue in advertising and one to which the advertising field must adapt. The action of setting up a national broadcast operation emphasizes that the agency itself already is "adapting."

BUSINESS BRIEFLY

WHO'S BUYING WHAT, WHERE

QUARTER-MILLION QUART • Glamorene Inc., Clifton, N. J., has quarter-million-dollar saturation campaign working on network radio and tv for new quart-sized Glamorene liquid cleaner. Shows involved in spring promotion: Treasure Hunt, NBC-TV; Art Linkletter Houseparty, CBS; Breakfast Club, ABC; Couple Next Door, CBS. Agency: Product Services Inc., N. Y.

TEA AND INTEREST • Tetley Tea Co., N. Y., through Ogilvy, Benson & Mather, N. Y., has signed for five weekly 5-minute CBS Radio daytime serial units, for 52 weeks effective Monday (May 22). U. S. Savings Bank Loan Foundation, N. Y., through McCann-Erickson, N. Y., has purchased 23 of network's "Impact" segments and eight 5-minute news programs June 27-29.

BACK ON TRACKDOWN • Socony Mobil Oil Co. and American Tobacco Co., cosponsors of Trackdown, on CBS-TV, Fri., 8-8:30 p.m., have renewed for next season. Agency for Socony is Compton Adv., for American Tobacco Co., BBDO, all N. Y.

IN FOUR HUNDRED • Anheuser-Busch Adv., St. Louis, has announced spot drive to promote "Pick-a-Pair of 6-Paks" theme later part of this month through July. D'Arcy

Adv., St. Louis, is placing spots on 400 radio and tv stations.

SWEEPSTAKES TICKET • Canada Dry Ginger Ale Inc., N. Y., has bought 10 participations on NBC-TV's Today (Mon.-Fri., 7-9 a.m.), starting June 21 and extending over five-week period to promote company's annual sweeps. Agency: J. M. Mathes Inc., N. Y.

IDEAL ARRANGEMENT • Ideal Toy Co., N. Y., has signed for fourth consecutive year for sponsorship of telecast of Macy's Thanksgiving Day parade in New York over NBC-TV on Nov. 27 (11 a.m.-noon). Agency: Grey Adv., N. Y.

WHIPPING WEST • Borden Foods Co., N. Y., is expanding test market run for new Borden's instant whipped potatoes, by entering greater Cincinnati with tv daytime spots. Through Lennen & Newell, N. Y., Borden's already has broken into Albany-Troy-Schenectady (N. Y.) and Springfield-New Haven-Hartford (New England) areas.

EARLY NEWS BUY • U. S. Steel Corp., through BBDO, N. Y., has bought a 52-week schedule in the early-morning CBS-TV news with Rich Charles. Hottelette, 8:45-5:45 a.m. U. S. Steel also sponsors on alternate weeks "U. S. Steel Hour" on CBS-TV.
PASTORE WANTS ASCAP'S ANSWER TO WRITERS' CLOSED DOOR CHARGE

- Smathers bill opponents defend BMI's position
- One witness lashes out at SESAC requirements

With Senate hearings resumed last week on the Smathers bill (S 2834) that seeks to divorce broadcasters from ownership in BMI and recording companies, Chairman John Pastore (D-R. L) served notice on ASCAP that it will be called on to explain charges that unknown songwriters have not been permitted to join that organization.

Sen. Pastore, who is chairman of the Communication Subcommittee of the Senate Commerce Committee, has held periodic hearings on the bill, introduced by Sen. George Smathers (D-Fla.), since last March. Testimony was taken for two days last week from opponents of the bill. The hearings will resume May 21 with representatives of NBC, CBS and the movie industry to testify.

Many songwriters have testified, including Mrs. John Axton last week, that they tried unsuccessfully to become members of ASCAP. Mrs. Axton, a Florida schoolteacher and sometimes rock-and-roll composer ("Heartbreak Hotel"), said she wrote two letters to ASCAP which were not even answered.

To which Sen. Pastore said, "I will say this with all candor because I have tried so hard to restrain and contain myself in commenting on the bill or indicating in any way how I have felt. . . . I have been quite disturbed by some of the testimony that has been given to the effect that some people have tried to become connected with ASCAP and they have had difficulty. Now I would like to see that explained in the record. . . .

"I would like to have somebody come in and explain to me what happened to those two letters that Mrs. Axton wrote. I hope somebody will explain why she was ignored. . . . I call upon the side that is interested to come in, if they can explain that, because I think there is a very substantial point made here today that needs refutation if it can be refuted."

Sen. Pastore pointed out that proponents of the bill have extolled the virtues of ASCAP, charging that the American public is being deprived of music, while on the other hand "these young creative people are coming in and saying we tried to connect with them and couldn't until BMI came along."

ASCAP will have a chance to answer Sen. Pastore's query when rebuttal statements are taken at a yet unspecified date, probably late June or early July.

Robert Burton, BMI vice president-secretary, said ASCAP members can resign only if they are willing to incur substantial losses because their catalogues must remain with ASCAP. BMI, he stated, has obtained performing rights of only two former ASCAP publishers.

He said BMI rejects songwriter members only when their material is obviously unacceptable and publishing firms only when they charge writers a fee to publish their songs.

He explained the "tremendous" changes in the techniques of promoting new songs since 1940, when it was necessary to get live performances on radio from top artists. This is no longer necessary, Mr. Burton said, because of refinements in recording techniques and BMI's "open door" policy.

During the last 18 years, he said, he has met face-to-face with hundreds of performing artists, disc jockeys, talent representa-
The 20th Century-Fox Studios in Beverly Hills was the scene of a reception for over 125 of the nation's leading TV station owners and leaders. Hosted by 20th and National Telefilm Associates, the affair was arranged to acquaint them with the Fall product line-up of the NTA Film Network.

At lunch, (left to right) Bill McGrath and Robert Cheyne of WHDH-TV, Boston, with George Murph of Desilu Studios, Mr. Unger, and Ely A. Landau, President of the NTA Film Network.

Stars of TCF-TV's "How To Marry a Millionaire," Merry Anders, Barbara Eden, and Lori Nelson join guests: Dady, chair of WJAR-TV, Providence; George Higgins of KMBC-TV, Kansas City; Richard Moore of KTV, Los Angeles, and Joe Read of WDSU-TV, New Orleans. The series is one of the highlights of the Fall programming.

Gilmore Nunn of WBIR-TV, Knoxville, meets rugged Rex Reason, star of "Man Without a Gun," produced by TCF-TV and another strong series in the Fall line-up.
STATION LEADERS AT RECEPTION

Rowitch of WTVJ-TV, Miami, and Dick Moore of KTTV, Los Angeles, pose happily beside Buddy Adler Gene Cagle of KFJZ-TV, Fort Worth, with "The Man Without a Desi Arnaz, who has his arms around Patty Ann Gerrity, the forthcoming darling of TV, and her gal, Gun," Rex Reason, and his gun-slinging partner, the Marshal movie Wooten. Patty Ann and Steve will be seen in "This Is Alice," a Desilu production which augurs Mort Mills. The series concerns a newspaper editor of the old west ratings and interest.

A banner across 20th Century-Fox's Pico Avenue gate prints one of the four buses as it enters the Studios. The audience sees special trailers of the Fall product, shown for the first time to any group outside NTA Film Network officials.

Bob Schmid, Vice President in Charge of Station Relations for the NTA Film Network, Fred Weber of WSTV, Steubenville, and Jack Beriman, meet Mrs. Wooten, and the mainstays of "This Is Alice."

Al Larson of Meredith TV Stations and Leonard Patricelli of WTIC, Hartford, get first-hand information from Barbara Eden, Lori Nelson and Merry Anders, on "How To Marry a Millionaire."
mount Pictures Corp. and president of its
KLTA (TV) Los Angeles, said Paramount is
opposed to the bill because it “would bring
about a restriction in the operations of a
segment of American business which is un-
warranted and unnecessary.” It was natural,
he said, for Paramount to acquire publish-
ing and recording firms as an adjunct to
its movie-making business. Paramount owns
Dot Records and two ASCAP-affiliated
publishing firms which, he said, are of
“great importance in the exploitation of
our motion pictures . . .”

In denying any broadcaster and spe-
cifically KTLA favoritism of BMI, he said:
“It is respectfully submitted that this bill
should not be enacted because, so long as
music is available for use by all with uni-
form methods of securing licenses for the
performance of such music, the radio and tv
frequencies of this country are freely ac-
cessible to all authors and composers . . .”

The president of the Assn. of Independent
Publishers, Joseph Caida, who also is a
representative of top talent, had this to say
about charges ASCAP music is being sub-
dued in favor of BMI: “We spend too
much of our relatively modest and extremely
hard-earned capital and too many hours,
weary hours beating around the country
in an effort to get our songs played . . . to
accept without rancor the asinine charge
that our records and songs are played
merely because we are affiliated with BMI.”
He pointed out that the AIP membership
comprises both ASCAP and BMI publishers.

Bill Lowery, former disc jockey, testified
that he started his own Atlanta publishing
firm because many promising composers
had no chance to get their songs before
the public. “Many had come with much
the same story,” he said. “Most of them
had sent their songs to ASCAP publishers
and invariably their material had been
returned unopened.”

A WNTA (formerly WAAT) New York
disc jockey told about negotiations with the
State Dept. to send a delegation of disc
jockeys to Russia. Murray Kaufman, who
also is president of the National Council
of Disc Jockeys for Public Service and a
partner in both ASCAP and BMI publish-
ing firms, said he found rock and roll
extremely popular during a recent tour of
Europe. He asked: “If you explain the
popularity of rock and roll in the U. S. in
terms of a gigantic conspiracy between
BMI and the broadcasters, how do you
explain the craving for this same kind of
music among the youngsters in Europe?”

Two witnesses, William Schuman and
Avery Claflin, praised the help BMI has
given to serious music composers. Mr.
Schuman, president of New York’s Juilliard
School of Music, said BMI has given “in-
'controversible evidence of its willingness
to support the art of music over and above
business considerations” through cash
awards to young serious music composers
exceeding $30,000. Mr. Claflin, retired
banker, part-time composer and treasurer of
the American Composers Alliance, said
BMI has given ACA a “tremendous boost”
by royalty payments and subsidization of
office expenses at a financial loss to BMI.

Others who testified against the bill in-

Broadcasting

May 12, 1958 • Page 53
A year-round series of hour-long comedies, musicals and dramatic programs entitled "The Westinghouse Desilu Playhouse," plus seven Westinghouse Lucille Ball-Desi Arnaz "specials."
You can be sure—if you're Westinghouse

It would be hard to find an advertiser whose range of television experience has been so broad and consistent as Westinghouse.

Week after week for nine solid years, Westinghouse has demonstrated products ranging from an electric light bulb to an atomic power station that lights an entire city.

It has presented to a constantly growing television audience, programs of every kind—daytime and nighttime, drama and musicals, one-time "specials" and entire election campaigns. Today the audience for its weekly dramatic program is 28 times larger than it was nine years ago.

Westinghouse has just underscored its confidence in the medium it has come to know so well. It announced that next Fall it would continue to talk to its customers through a weekly network hour; it would embark on an even more ambitious scale of programming; and it would increase its annual television investment.

What is perhaps most significant about this decision is that it is not based alone on the spectacular audiences that television occasionally delivers—such as the 60 million viewers who watched Westinghouse messages on the CBS Television Network during the national political conventions. It is based equally on a firm belief in the fundamental values of television: the unique impact of each television impression; the vast audience that even the average program attracts; and the cumulative effect of these impressions week after week over a sustained period of time.

Like Westinghouse you can be sure of finding television's unique values—and indeed television's largest average audiences—on the CBS TELEVISION NETWORK
chided Winfield Scott, New Jersey publisher-songwriter; songwriter Terry Gilkyson; Moe Gale, New York publisher and former personal representative of several top stars; Lewis R. Chudd, president of Imperial Records; Charles C. Cowley, president of Muzak Corp.; Martin Melcher, ASCAP-BMI publisher, president of several top stars and husband of singer Doris Day; Don Owens, WARL Arlington, Va., country music disc jockey ("any enterprise that allows a farm boy from Alabama to compete with Irving Berlin is a very healthy system"), and singer Betty Johnson.

Martin T. Obie, vice-president-general manager of KWAD Wadena, Minn., entered a new subject into the hearings when he loosed a bitter attack on SESAC, a third licensing firm. "SESAC offers broadcasters practically nothing yet they have been able to obtain agreements from 98% of the radio stations in operation today," he charged. A majority of these agreements were secured through "unfair tactics," he said. Only 200 of KWAD's 30,000 records are SESAC, yet the station is required to pay that organization $20 monthly, he told the subcommittee.

Mr. Obie testified he wrote SESAC challenging its right to collect licensing fees and the firm used an "implied threat" in its reply. He also listed several stations which, he said, have experienced the same relations with SESAC.

Washington attorney Marcus Cohn testified on behalf of two clients seeking amendment of the bill to place their activities outside its scope. Clients are the National Assn. of Educational Broadcasters and jointly-owned Coastal Recording Co. (which rents its facilities to advertising agencies) and WHOM-AM-FM New York. Mr. Cohn said the bill would have "unintended adverse effects" on individual college members of NAEB and on Coastal.

Klug-Evans Ownership Team Expanded to New York Outlets

The station-owning combination of multiple-owner John W. Kluge and WTOP-AM-Washington personality Mark Evans is expanding with Mr. Kluge's sale of a 10% partnership interest in his New York State am-fm properties, WINE Kenmore and WILY (FM) Buffalo to Mr. Evans for $15,000.

Sale of KOME Tulsa, Okla., by Messrs. Kluge and Evans to another multiple-owning group, Charles W. Holt and associates, for $250,000 is pending FCC approval [CHANGING HANDS, April 28]. Messrs. Kluge and Evans bought KOME last year for $100,000 [FOR THE RECORD, July 22, 1957].

Mr. Evans is also associated with Mr. Kluge in the ownership of WGBH Pittsburgh. Mr. Kluge controls WGAY Silver Spring (Md.), KNOK Fort Worth and WKDA Nashville and with his wife holds a minority interest in WLOF-TV Orlando, Fla.

FCC View on NBC-WBC Swap Reiterated to U. S. Supreme Court

A restatement of the FCC's position taken during litigation over the NBC-Westinghouse swap of radio-stv stations in Cleveland-Philadelphia—that the FCC's action in approving the transfer does not preclude the Justice Dept. on antitrust implications of the transaction—was submitted by the FCC last week to the U. S. Supreme Court as a supplement to Justice's appeal of the case.

The Justice Dept. several weeks ago [GOVERNMENT, March 3] asked the Supreme Court to reinstate the government's antitrust suit against NBC-RCAs a result of the 1955 swap of NBC'S WTAM-AM-FM and WNBK-TV Cleveland plus $3 million for Westinghouse's KYW and WPTZ-TV Philadelphia.

Federal Judge William H. Kirkpatrick of the Philadelphia District Court had refused to try the Justice Dept. suit brought in December 1956, on the grounds the FCC has primary jurisdiction over a transfer and after it has approved the transaction the Dept. of Justice cannot attack it [GOVERNMENT, Jan. 20; AT DEADLINE, J1.13].

The FCC's "supplemental memorandum" last week, submitted to the Supreme Court through the Solicitor General, reiterated the FCC position that it made no error in approving the transaction, concluding "while the Commission may deny applications as not in the public interest where violations of the Sherman Act have been determined to exist, its approval of transactions such as this present case of the Sherman Act violations is not a determination that the Sherman Act has not been violated, and therefore cannot forestall the U. S. from subsequently bringing an antitrust suit challenging those transactions."

ASCAP FILE SEND TO JUSTICE DEPT.

* House group makes report
* Antitrust study recommended

A House subcommittee last week took a sweeping look at ASCAP's antitrust proceedings and voting systems of ASCAP in recommending that the Justice Dept. study antitrust proceedings against the music licensing firm.

The recommendation came in a report released by the Distribution Subcommittee of the Select Committee on Small Business. It followed several days of hearings in March and April [GOVERNMENT, March 17] on charges by several ASCAP members that they were not getting adequate royalty payments and on other society practices.

Chairman James Roosevelt (D-Calif.) said the subcommittee is turning all its resources to Justice and recommended that such action be taken as is necessary to effectuate "the terms and spirit" of the 1950 ASCAP consent decree. This consent decree settled a federal antitrust suit of several years' standing alleging monopolistic practices.

The report specifically questioned ASCAP's voting system for its directors, its system of checking on music performances, formulas used in allocating royalties and grievance procedures for dissatisfied members. "Remedies for more important problems disclosed by the hearings may be available through appropriate action of the Dept. of Justice," the subcommittee stated.

ASCAP elects its board of directors (12 writer members and 12 publisher members) by allocating a writer member one vote for each $20 of revenue and a publisher member one vote for each $500 of revenue. The report questioned whether this procedure fulfills requirements of the consent decree.

The report also questioned ASCAP's compliance with the decree in its rating of members for performance payments. "There is no consent correlation between the actual average of performance credits and the point credits to which a member is rated," the report found.

ASCAP's grievance procedures are constructed in such a way as to mitigate against a complaining member, the report indicated, and make a reward, when finally received, of relatively little value. The ASCAP board of appeals, in a majority of the cases, does not give a basis for its decisions and interpretations made of the distribution rules are not reduced to writing and are not made generally available, the report found in questioning this practice.

Rep. Roosevelt said the hearings disclosed facts "that raise serious questions of vital concern to this committee" and therefore Justice was asked to step in. Members of the subcommittee held an executive meeting with four attorneys from Justice [CLOSED CIRCUIT, April 7], which already has a sweeping investigation of ASCAP underway, seeking out the public interest where it may be closed. Other subcommittee members include Rep. Tom Steed (D-Okl.), Rep. Charles H. Brown (D-Mo.), Rep. Timothy P. Sheehan (R-N.Y.), and Rep. Arch A. Moore Jr. (D-Va.).

BARROW HEARING RESCHEDULED

FCC hearing sessions on the Barrow Report—previously scheduled for today (Monday) and tomorrow—have been postponed until next week, with the sessions extended to four days: Monday, Tuesday, Thursday and Friday (May 19-20, 22-23).

A parlay still to be heard and their order of appearance are: stations represented by CBS Spot Sales (Glenn Marshall Jr. of WMBR-TV Jacksonville and Jay W. Wright of KSL-TV Salt Lake City); NBC Spot Sales (Nathan Lord of WAVE-TV Louisville); Station Representatives ASSN. (John Blair, Blair TV and Blair TV Assoc.; Lewis H. Avery, Avery-Knodel; Eugene Katz, Katz Agency; Frank Headley, H-R TV; Lloyd Griffin, Peters, Griffin, Woodward); Edward Petry of Edward Petry & Co.; John English, Committee for Competitive TV, and representatives from the following individual TV stations: KFDM-TV Beaumont, Tex.; KVAR (TV) Mesa, Ariz.; WCSH-TV Portland, Me.; WDSU-TV New Orleans (Robert D. Sweezy); WFLA-TV Tampa, Fla., and WLAC-TV Nashville, Tenn.
Consistent and interesting programming for women listeners is one reason the Beeline delivers more for the money. Katherine Kitchen has been a Beeline feature for 25 years. Thousands of loyal listeners tune in and frequently respond directly by mail or phone. In addition, Katherine Kitchen is featured in McClatchy Bee newspapers.

As a group purchase, these mountain-ringed radio stations deliver more radio homes than any other combination of competitive stations...at by far the lowest cost-per-thousand. (Nielsen & SR&D)

McClatchy Broadcasting Company

SACRAMENTO, CALIFORNIA
Paul H. Raymer Co., National Representative
COMR. ROBERT T. BARTLEY (right-front) explains a point to five Democratic senators and their chief counsel during Senate Commerce Committee hearings on the Democratic commissioner’s reappointment to the FCC. Republican committee members were not present at the time although Sen. Charles Potter (R-Mich.) came in later. Sitting on the rostrum are (l to r) Sen. John Pastore (R.I.), acting chairman; Harold Baynton, committee chief counsel; Sen. Mike Monroney (Oklahoma); Sen. Alan Bible (Nev.); Sen. Strom Thurmond (S.C.), and Sen. Ralph Yarborough (Tex.). The hearing lasted only 40 minutes.

NO SWEAT FOR BARTLEY IN SENATE

A 40-minute Senate Commerce Committee hearing last Wednesday on the reappointment of Comr. Robert T. Bartley to the FCC turned into a back-slapping session. Five Democratic senators and one Republican had nothing but praise for the commissioner and his record.

Sen. John Pastore (D-R.I.), acting as chairman in the absence of Sen. Warren Magnuson (D-Wash.), summed up the committee's sentiment when he told Comr. Bartley: "I think you can sleep tonight."

Sen. Ralph Yarborough (D-Tex.), in introducing his fellow Texan to the committee, called Comr. Bartley's reappointment a "great tribute" in light of recent attacks on the FCC during investigations of the House Legislative Oversight Subcommittee. Noting the commissioner's record as a "disserter," Sen. Yarborough stated the FCC would not be in the "mess it is in today" if its decisions had gone the way Comr. Bartley voted.

On questions about matters before the FCC, Comr. Bartley had this to say:

Daytime broadcasters' petition for longer hours—Work is "very active." He said comments are due later this month (May 19) and that the Commission will act promptly when all pleadings are in.

Reappraisal of industry payment of hotel bills—"We have had occasion to do that in the recent past [NAB convention in Los Angeles two weeks ago for which commissioners paid their own bills]." While contending there is nothing "basically wrong" with the practice, Comr. Bartley said, "They aren't going to pay any more of my bills."

Code of ethics—"Would be a very helpful thing."

Community antenna tv problem—FCC is well aware of the situation. The question, he said, is whether CATV should be limited at the expense of limiting viewers in sparsely-settled areas to only one local service. Sen. Mike Monroney (D-Oklahoma) said the FCC should regulate CATV systems.

Channel reservations for educational tv—There are "no intentions" of deleting such reservations. "I endorse heartily the view that we must preserve these channels longer for non-commercial educational purposes."

Pay tv—Mr. Bartley's position is a matter of public record. When he dissented to the FCC announcement it would accept applications for pay tv.

The only discordant note was a brief, strictly partisan exchange between Sen. Pastore and Sen. Charles E. Potter (R-Mich.), who was present for only the last few minutes of the Bartley appearance. Sen. Pastore hit the administration for allegedly replacing "true" Democrats with "Eisenhower Democrats" on the federal agencies. He said Comr. Bartley "exemplified" the true public servant, and that the reappointment was the first one made of a Truman-appointed Democrat by the present administration. In the past, Sen. Pastore charged, minority party members had been appointed only because "they had leaned the other way in a campaign—a pay-off."

D. C. Bar Offers Trial Manual

A 130-page manual on administrative trial techniques has been published by the District of Columbia Bar Assn. It contains a general section written by D. C. Circuit Judge E. Barrett Prettyman, followed by chapters on detailed practice and procedures of 16 federal agencies (Armed Services Board of Contract Appeals—Tax Court of the U.S.), including the FCC.

The manual, a reprint of a 1950 publication, was prepared by the Junior Bar Section of the D. C. Bar Assn. Jerome H. Heckman is chairman of the section's Administrative law committee. The Junior Bar section is comprised of Washington attorneys who are 36 or under. The revision took two years and may be obtained from the D. C. Bar Assn. Price is $3.

of every administration, the senator added.

Sen. Potter, who said he was "delighted" at Comr. Bartley's reappointment, took issue with Sen. Pastore's statements and pointed out that several other Democrats have been reappointed to agencies by President Eisenhower.

Committee approval of Comr. Bartley's reappointment is scheduled for consideration at an executive meeting this Wednesday. First appointed by President Truman in 1952, his current term expires June 30. Also on the agenda is the appointment of John S. Cross to fill the FCC vacancy created by the resignation of Richard A. Mack. There have been indications, however, that Mr. Cross may be called back for further questioning.

'60 CENSUS TO OMIT RADIO HOME COUNT

The 1960 decennial census will not include figures showing the number of homes with radio sets, according to Secretary of Commerce Sinclair Weeks.

This will be the first census since 1930 to appear without an accurate count of radio households.

Television homes will be counted in the 1960 census, according to a letter sent by Secretary Weeks to Chairman Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee.

NAB had proposed to the Census Bureau that the 1960 census include data on both am and fm radio reception, as well as tv. The radio proposal met with opposition based on the difficulty of obtaining breakdowns of receiver types and the high radio saturation currently existing.

The 1950 census showed roughly 40 million radio homes, a 95.6% saturation point. Most every home now has one or more radios, a situation that makes a 1960 radio homes tabulation of little interest to many marketers.

In 1950 the census showed 12.3% tv home saturation at that early stage in television's history. The last Census Bureau sampling survey of tv homes showed an estimated 41,924,000 tv sets as of January 1958, or 83% of all U.S. households. This sample
Why are utilities investing in atomic-electric power?

High cost is one of the much-discussed problems of the development of atomic-electric power plants now being planned, built or operated by the independent electric light and power companies. Compelling reasons for their investment in this field are outlined by Raymond Moley in this column from Newsweek.

The utilities will be operating these [atomic-electric power] plants over the years ahead when it may be possible to recoup the unprofitable outlays that are necessary in these experimental and relatively primitive years. For no one yet knows either the type of reactor which will ultimately be the answer, the best type of fuel, or the metallurgical angles yet to be solved.

They face, however, the inexorable prospect of astronomical increases in the demands for electricity in a miraculously growing economy.

In terms of a huge unit of measurement called the Energy Unit, the world now uses two-tenths of an EU a year. The total energy used in the world from A.D. 1 to 1860 was six and a half units. From 1860 to 1957, five more were consumed. By A.D. 2000, ten to twenty more units will have been used. But by that time one unit a year will be needed, five times the present consumption. We must take a sharp look now at the energy sources conventionally used, such as coal, oil, gas, and falling water. And we must plan to use some other form of energy-producing resources.

The need is emphasized by the estimates of power needs in the United States. Between 1946 and 1956 the private investor-owned companies increased their generation of power 154 per cent.

In New England, where population growth is only moderate, power consumption increased 95 per cent. The current growth in that region is shown by the fact that the companies there have scheduled for construction in the next three years an increase of 20 per cent over the present. In the upper Midwest from Ohio to the Dakotas generating capacity is being increased over 11 per cent a year.

In the Pacific Northwest, the past ten years have seen a 66 per cent increase. In the mountain region comprising Utah, Wyoming, Colorado, New Mexico, and Arizona the plant capacities of the investor-owned companies have increased in the past ten years three and three-quarters times and the present rate of increase is 9 per cent a year. In the region comprising Texas, Oklahoma, Arkansas, Louisiana, and Mississippi, the second fastest growing region in the nation, the growth of electrical-energy supply has not only kept pace with general economic progress and population growth but has made expansion in other fields possible. The Southeastern region has increased generating capacity by 63 per cent in five years.

For the ten-year period from 1946 to 1956 California had an increase of 170 per cent in power supply.

Of course, these regions differ greatly in their energy resources. New England is decidedly needy in coal and oil. This adds to the cost of producing power from conventional sources. Utah and the region nearby is indescribably rich. These differentials count in the urgency with which the companies are seeking the solution through atomic power.

Thus the progress of nuclear power will be conditioned by costs. Taking a close look at the new source, most [companies] are deep in investing in atomic plants, planning toward the time when that inexhaustible source will be competitive with what they have now.

survey was conducted for Advertising Research Foundation.

Secretary Week's statement to chairman Magnuson, based on a query about the agency's authority to count radio-television homes, follows:

"We do have authority to include questions on radio and television, and inclusion is feasible, since we have collected information on both of these subjects in the 1950 Census of Housing. After evaluation of all pertinent circumstances, the decisions reached are that ownership of a television set is to be included [in the 1960 census], but that no questions on radio should be included because the 1950 census found radio in nearly every home."

SEC Reports for April

Common stock transactions by officers and directors of companies in the radio-television and allied fields, reported by Securities & Exchange Commission for the month of April, were as follows:
C&C Television Corp.—Matthew Fox, bought 100 shares in January and 800 in March; sold 400 shares in February and 1,900 shares in March, resulting in total holdings of 615,800 shares (of which 607,000 shares are held as collateral against loans). Walter S. Mack, sold 2,000 shares in February, reducing total holdings to 184,206. Guild Films Co. Inc.—David Van Aalstine Jr., sold 2,000 shares in March, resulting in reducing holdings to 7,407. Harry A. McDonald, sold 200 shares in March, with holdings now 500 shares.
National Theatres Inc.—B. Gerald Cantor, bought 500 shares in March, with total holding now 109,000. Jack M. Ostrow Corps., bought 1,400 shares in February and 20,000 shares in March, increasing holdings to 80,000. E. C. Rhoden Holding Cos., bought 2,000 shares in March, making holdings 55,525.
Skelton Electronics & Television Corp.—Arthur Levy, sold 13,350 shares in February, reducing total holdings to 340,331.

Byrne Seeks Excise Tax Relief

Rep. Emmett Byrne (R-III.) last week introduced a bill (HR 12307) which would remove the federal excise tax on several products and services, including the 10% tax on radio and TV sets, phonographs and communications. The measure was referred to the Ways & Means Committee, which has several similar bills pending.

Phoenix ID Permitted KVAR (TV)

The FCC last week granted KVAR (TV) Mesa, Ariz., permission to identify itself with larger, neighboring Phoenix. Comr. Frederick W. Ford dissented to the action. Comr. Ford has been opposed in principle to stations' dual identification of themselves with markets other than that to which they were originally assigned.

KXJK Requests Channel Shift

The reassignment of TV ch. 8 from Jonesboro, Ark., to Forrest City, Ark., was requested last week by KXJK Forrest City, which told the FCC it would apply for the TV channel if ch. 8 is reassigned. The station said such a move would meet the FCC's requirements on objectional interference and mileage separations of adjacent and co-channels.

Seven Am's, One TV, One FM Authorized by Commission

The FCC last week granted Trans Video Co. of Oregon a construction permit for ch. 27 in Portland.

Construction permits for AM stations granted last week by the Commission included:
- Sanford A. Schaitz, Lorain, Ohio, to operate on 1380 kc with 500 w, day. Comr. Robert Bartley did not participate in this decision. An initial decision of Dec. 4, 1956 proposed this action.
- Atlantic Broadcasting Corp., Farmville, N. C., to operate on 1050 kc with 250 w, day; engineering conditions.
- James B. Childress, Murphy, N. C., to operate on 1390 kc with 1 kw, day; engineering condition; remote control permitted.
- Evans County Broadcasting Co., Claxton, Ga., to operate on 1470 kc with 1 kw, day.
- Albany Broadcasting Co., Albany, Ky., to operate on 1390 kc with 1 kw, day.
- Gateway to the North Broadcasting Corp., Clare, Mich., to operate on 990 kc with 250 w, day; engineering conditions.

Among the grants of FM construction permits last week:
- RKO Teleradio Pictures Inc., San Francisco, Calif., to operate a class B FM station on 106.1 mc with 71 kw; engineering condition; remote control permitted.
- Evans County Broadcasting Co., Claxton, Ga., to operate on 1470 kc with 1 kw, day.
- Albany Broadcasting Co., Albany, Ky., to operate on 1390 kc with 1 kw, day.
- Gateway to the North Broadcasting Corp., Clare, Mich., to operate on 990 kc with 250 w, day; engineering conditions.

Among the grants of FM construction permits last week:
- RKO Teleradio Pictures Inc., San Francisco, Calif., to operate a class B FM station on 106.1 mc with 71 kw; engineering condition; remote control permitted.
- Comm. Frederick Ford did not participate in any of the am-fm decisions.

For other broadcast actions of the FCC see FOR THE RECORD, p. 103.

Elder to News Post in Senate

Oscar Elder, for the past year director of press information for RAB, New York, has been appointed news secretary for Sen. Edward W. Brooke (D-Mass.). A native Floridian, Mr. Elder for several years was associated with NAB. He left NAB with Robert K. Richards in July 1955 when the latter established a public relations firm in Washington. Mr. Elder subsequently went from the Richards firm to RAB.

Comr. Ford to Address FCBA

FCC Comr. Frederick W. Ford will be the speaker at the monthly luncheon of the Federal Communications Bar Assn. at the Willard Hotel May 27, it was announced last week. Mr. Ford, appointed as a commissioner August 29, 1957, will review some of the problems affecting the Communications Act. This is his first public speaking engagement.

Networks

TV Networks 13.5% Above '57

Network tv gross billing in the first quarter of this year reached $143,704,116, or a 13.5% increase over the same month a year ago. ABC-TV alone was up 37.5%; CBS-TV increased 5.2%, and NBC-TV was 13.3% ahead of its March 1957 total. March was the peak month for ABC-TV. The figures indicated that March also was the high point during the January-March period for NBC-TV, while for CBS-TV the March billing was not quite up to the level scored in January.

The complete breakdown follows:

Rapid Gains for NBC Operations

Show Up in RCA's Annual Report

NBC emerged from last week's RCA stockholders annual meeting in New York (see page 78) with an image of a network increasing rapidly in strength and growth.

In his report to stockholders, RCA President John L. Burns credited NBC with the following:
- An increase of 10% in net sales (after all discounts) for the first quarter of this year as compared with the same three months of last year. (An NBC spokesman claims a "substantial part" of the rise is attributable to a gain in time and program sales.) Included in the NBC operation are the radio and television networks, their owned and operated stations, California National Productions, spot sales and NBC International.

- A rise of 45% in net sales at NBC Radio alone for the first quarter of this year compared to that period last year. Mr. Burns reported that "in 1957, NBC reversed the downward spiral of network radio."

- Capture of the title, "number one television network," during peak hours of nighttime programming, while the radio network
NOW ON THE COLLINS LABEL

TT-400/200 TURNTABLES

- RUGGED: built of heavy cast aluminum
- SIMPLIFIED: only three moving parts in drive mechanism.
- CONVENIENT OPERATION: gear shift speed selector; indentation for 45's, requiring no adapter; on-off switch with reverse on synchronous motor models.
- EFFICIENT: simplified drive with double-ball thrust bearing
- FOUR MODELS: TT-400, 16'' with 4-pole motor, $199.50; TT-400S, 16'' with synchronous motor, $235.00; TT-200, 12'' with 4-pole motor, $99.50; TT-200S, 12'' with synchronous motor, $139.50.

TURNTABLES FOR MODERN STATIONS

COLLINS
CREATIVE LEADER IN COMMUNICATION
"became number one in terms of sponsored hours." He said "NBC's share of the national television audience has increased tremendously this broadcast season, and the latest audience survey shows NBC leading the second network by 14% in average evening ratings and the third network by 39%. This achievement resulted from a drastic re-programming of the television network, which required a heavy investment and thus adversely affected NBC's 1957 profits.

"NBC's recapture of the top position in nighttime audience popularity represents the greatest one-year audience shift in television's history."

According to TVB's report of network gross time billings for the first quarter of this year, NBC-TV had a total of $53,975,286 or a 12.2% gain over the corresponding quarter of last year.

POST-GRADUATE COURSE IN NETWORKING

Some 150 NBC executives got a broader view of the network's business, its objectives and its major problems in a different sort of school that wound up last month. It was the NBC Advanced Management Program, said to be the first of its kind in broadcasting, and it consisted of four one-week study sessions at the Nassau Tavern Hotel in Princeton, N.J. Some 37 executives attended each week, studying a curriculum that kept them busy from 8:30 a.m. to 11 p.m.

Following a committee system of studying "cases" based on actual situations, all students by the end of their week had been called upon to make executive decisions in major areas.

NBC President Robert W. Sarnoff explained the course's purpose thus: "Changing conditions, both in the broadcasting industry and within our company, dictate the necessity of reviewing regularly the overall NBC operation. Then, too, as executives progress up the managerial scale, it is necessary for them to broaden their knowledge of the areas in which we expend our major efforts."

In addition to the committee discussions, the groups were addressed by Mr. Sarnoff and guests from outside NBC. These included Edwin Cox, board chairman of Kenyon & Eckhardt, and Alfred L. Hollender, vice president and radio director of Grey Adv., who discussed agencies' view of the networks; Jack Barry, Dave Garroway and John K. M. McCaffrey, who gave the performers' view; George Benson of Robert Saudek Assoc., explaining the program packager's position, and John L. Burns, RCA president, Theodore E. Smith, executive vice president for RCA industrial electronic products, and W. Walter Watts, executive vice president for RCA electronic components.

The "school" was conducted by the NBC personnel department under vice president B. Lowell Jacobsen, in conjunction with Harbridge House Inc., Boston, consulting firm that specializes in executive development programs. D. C. Wallace of RCA was coordinator.

HALLS OF IVY: NBC went back to Old Nassau (the Nassau Tavern Hotel, Princeton, in this case) for its seminar.

SCHOLASTIC STUDY: Bill Davidson, general manager, WRCA-AM-FM-TV New York, concentrates on a problem.

BURNING THE MIDNIGHT OIL: Tony Krayer (l), business manager for NBC Spot Sales and owned stations, and Hank Shepard, general manager, WAMP-WFMP (FM) Pittsburgh, find that back to school means back to the books.

PRESIDENTIAL PEDAGOGUE: NBC President Robert W. Sarnoff took on a teaching stint at one of the sessions.
Sampson sees Red

and cashes in on award-winning local news!

Rhode Island Red proudly points out to timebuyer Sampson B. Sagamore that only WJAR-TV has: (1) 6 daily newscasts prepared from 5 news services plus on the spot coverage! Philco television microwave systems provide economical transmission of NTSC compatible color or monochrome TV signals ... plus full audio channel. Here is modern microwave ... especially designed to meet the needs of community TV operators for thoroughly dependable operation. Philco TLR systems provide S-T-L relaying in the 5900 to 7400 mc bands.

Heavy duty power supply provides 1 full watt output to insure outstanding operational reliability in continuous unattended service.

All components mount in standard 19" racks.

Unitized circuit construction simplifies maintenance. Built-in test and metering circuits combine with automatic stand-by to assure uninterrupted service at all times.

Here is reliability of performance unaffected by severe weather, free from the many limitations of wire and pole lines, unhampered by problems of difficult terrain, overwater transmission or expensive rights-of-way.

Philco engineers will be happy to help you with your special Microwave requirements. Please contact us for further information. Look ahead ... and you'll choose Philco.
Highly reliable, unattended one-watt operation
Field proven in extended multi-hop applications
True repeater permits top quality, long haul operation
Highest power in the industry
Full voice channel multiplexing
Philco offers complete turnkey service...surveys...installation...maintenance

Repeater—The Philco TLR-4 Microwave Repeater is a true repeater utilizing the heterodyne principle to produce high performance quality and simplicity of operation and maintenance.

Because video performance of a microwave system is determined mainly by the transmitting and receiving terminals, the introduction of the TLR-4 Heterodyne Repeater, which is essentially transparent, results in optimum overall system performance.

The output frequency of the TLR-4 Repeater is derived from the input signal (±190 mc) provided by a crystal. Therefore, the output frequency is independent of adjustment or drift of the microwave local oscillator.

Field maintenance testing of the TLR-4 Repeater is rapid, consisting only of RF and IF bandpass checks. Only simple IF sweep equipment is needed to obtain original factory alignment of the IF strips for differential phase and differential gain requirements. No special phase testing nor phase correction adjustments need be made.

Transmitter—The Philco Model TLR-6 Transmitter consists of three basic units: (1) a transmitter chassis, (2) a +750 volt dc power supply and (3) a +300 volt dc power supply. All units are designed for rack mounting in a standard 19" relay rack.

Transmitter chassis contains the reflex klystron r-f generator and associated modulator, a-f-c circuits, wavemeter and amplifier, metering circuits for monitoring within the equipment, a built-in test signal generator, and a -500 volt power supply. All operating controls and the more frequently used maintenance controls are located on the front panel of the transmitter chassis.

Receiver—The Philco Model TLR-6 Receiver consists of seven basic units: (1) a Pre-Amplifier and Mixer Assembly, (2) a Receiver Chassis, (3) an Automatic Frequency Control Chassis, (4) a Local Oscillator Chassis, (5) a Video Chassis, (6) a 300 Volt Power Supply and (7) a 103 Volt Power Supply.

The Pre-Amplifier and Mixer Assembly is connected to the waveguide support at the rear of the rack, while the remaining six units are rack mounted.

The Receiver Chassis contains an IF amplifier plus metering circuits for monitoring critical points within the equipment.

The Automatic Frequency Control Chassis contains a repeller power supply in addition to the AFC circuits.

To meet the challenge of advancing technology, support the rapid expansion of scientific education. At Philco, opportunities are unlimited in electronic research and engineering—transistor circuit applications—computer logic design, test and evaluation and input/output equipment design.

Elaine Carrington, 66, Dies; Created First Radio Soap Opera

Elaine Sterne Carrington, 66, who in her lifetime conceived radio's first daytime serial and went on to produce personally an output of 12,000 anguished daily installments, died in New York Hospital on May 4 after a short illness. In 1932, Mrs. Carrington gave life to Red Adams, a thrice-weekly show starring Burgess Meredith; a change in sponsors—a chewing-gum company—necessitated the change to Red Davis. In 1933-34, "Red" became Pepper Young and Pepper Young's Family to this date is still an NBC Radio fixture. (NBC officials indicated last week that the series would continue, but would be written "by others.")

In her peak years, Mrs. Carrington ground out 38,000 words a week for such other serials as When a Girl Marries, last on ABC Radio and before that, on NBC Radio and CBS Radio, and Rosemary, a CBS Radio serial.

Mrs. Carrington wrote all her shows in bed. Initially, she would turn out a five-day synopsis, then reel off 15 minutes of dialogue—playing all the characters with different voices—into a dictaphone, more recently a tape machine. Two stenographers then would take over.

Her husband, Robert Dart Carrington, died in 1945. She is survived by a son, Robert Bruce, and a daughter, Patricia.

TOA Feels CBS-TV Report Mashed Too Hard on Its Toes

CBS-TV's feature treatment of the many uses to which former movie houses have been put, aired on the April 25 Douglas Edwards and the News, drew the fire of theatre owners of America last week.

TOA asked CBS Inc. Board Chairman William C. Paley for "corrective action." But CBS Director of News John F. Day replied TOA was "perhaps unnecessarily concerned." The program showed former movie houses which now are a bowling alley, church, tv studio and delicatessen.

Mr. Day explained "this story made no effort to report the full scope of the revolution in the motion picture industry, and as a matter of fact, we could not possibly report in such scope on any one Edwards news show. The fact is not unique in your particular field." Noting the Edwards show has had many stories on various facets of the movie industry, Mr. Day assured TOA "we will have others, some of which you will undoubtedly like better than you did the one in question."

NTA Natl. Theatres Mulling 'Association'

National Telefilm Assoc. and National Theatres Inc. jointly announced Thursday that discussions are being held looking to "an association" between the two companies. The statement said the talks will continue and studies will be made "over the next few months."

The announcement came after reports circulated that National Theatres was negotiating to purchase NTA. A spokesman for the tv film-production-distribution company emphasized that the basis for talks, which have been held for several months, as "a possible merger" between the two companies.

The statement, issued by Ely A. Landau, NTA board chairman, and Elmer C. Rhoden, president of National Theatres, said: "Discussions are taking place to explore the question of whether there would be a basis for an association of National Telefilm Assoc. and National Theatres and whether that association would be desirable and to the best interest of both companies and their respective stockholders."

"Exhaustive studies of the matter will be made by both parties during the next few months."

National Theatres Inc. is considered the second largest theatre chain in the U. S., consisting of about 300 theatres, principally on the Pacific Coast, in the Midwest and the Rocky Mountain areas. Recently the company developed Cinemiracle, a new three-dimensional motion picture process now in its debut in New York and scheduled to move to other cities shortly. The company recently acquired WDAF-AM-TV Kansas City (CHANGING HANDS, April 28).

The company's revenues are reported to have declined approximately 33% since 1947-49 and this situation apparently prompted its diversification program—it's broadcasting operation in Kansas City its launching of Cinemiracle and its exploration of its tie-up with NTA.

NTA is regarded as one of the fastest-growing organizations in the tv field. In the past five years, it has grown to become one of the leading distributors of tv film programs, largely feature films. It has embarked upon an ambitious co-production program in association with Desilu Productions and 20th Century-Fox Corp. Together with Fox, it owns the NTA Film Network. NTA also owns WNTA-AM-FM Newrk and KMSP-TV Minneapolis-St. Paul.

"American producers," says Mr. Rettig. "All that is needed: stories and scripts "written by experts with full knowledge of what viewers like to see on this side of the ocean." In other words, Mr. Rettig wants "compatibility in production where the native talents of both our countries are blended best."

Mr. Rettig says NCP is ready to cook up a tv film series in Britain using facilities there (cited were the advantages of an "infinite variety of foreign locations which actually contribute strong pictorial values") once the recipe is found with the "right elements," that is, U. S. stars with British supporting actors and a good story and script that "blends."

Life and times of a pilot film

Spring is the season for pilots. In darkened rooms up and down Madison Ave., film company salesmen are showing pilots of new tv series they hope the agencies will buy for broadcasting during the 1958-59 season. Agency executives watch intently, hoping that here will be the show they've been searching for to carry the messages of that special client into the homes of the public week after week.

These pilots did not arrive in New York at the rub of a genie's lamp. Someone had an idea; someone thought it was a good idea; someone put a lot of time and effort and thought and money into getting that idea down on film so that its value would be evident to the agency man who's watching it now and to the advertiser who will make the final decision about becoming its sponsor. In that sense, the story of all pilots is the same. Yet the story of each is uniquely its own. Here is one of them:

In March 1957 tv producer Herbert B. Leonard was in Canada to discuss with government officials a proposal that he make a series of propaganda films for them and to look for a good location to shoot some outdoor snow sequences for his Rint-Tin-Tin series. In Toronto he met a studio owner, Arthur Gottlieb, who was interested in renting his facilities for use in either or both of these projects. Discussing this, Mr. Leonard discovered that Mr. Gottlieb controlled the tv rights to "The Naked City," the motion picture about New York made and narrated by the late Mark Hellinger.

It had been 10 years since Mr. Leonard had seen the movie, but once its name was mentioned he was struck with the idea that it would form an excellent basis for a tv series. When he expressed the thought to Mr. Gottlieb, it was airily rejected with a comment that Mr. Gottlieb was planning to do just that himself, the only difference being that the series would be made in Toronto, not New York.

This was heresy to Mr. Leonard, but it was also unanswerable at the time. Herbert B. Leonard Productions produces programs for Screen Gems, tv subsidiary of Columbia Pictures, so on his return to New York he went to Leo Jaffe, legal vice president of Columbia. Very soon after that Columbia acquired the right to release "The Naked City" to tv.

"But what about me?" Mr. Leonard asked. "What about my plan to use the theme for a series? What about those rights?"

"Go ahead and don't worry," he was told. Negotiations for the serial rights were under way; Columbia would not put the motion picture on tv until the series had run its course; he had nothing to worry about except making his series.

Mr. Leonard began watching "The Naked City" over and over. "I don't know how many times I saw it, but looking back it seems as if I spent weeks in the projection room. I soaked up the feel of the picture, the feel of the city that is its real star; I began to get ideas for capturing this feel for the tv series. Then I called in a young writer, Sterling Silliphant. He watched with me. He got the feel too and presently we had an idea of how we were going to proceed."

They still didn't have the tv serial rights, but Mr. Leonard scarcely noticed this lack. He was too busy arguing with Columbia executives over treatment. He wanted to follow the approach of the movie. They said it couldn't be done in a half-hour series. Mr. Silliphant had convinced him that he as producer should do the narration of the tv series, just as Mr. Hellinger had narrated the picture. Officials balked at this unorthodox idea for tv, capitulating only when he drove home his clincher that if they were going to just another cops-and-robbers series they were wasting their money buying rights to "The Naked City." And what about those rights, anyway?

Once more he was told not to worry about the rights; they'd come through eventually. But when he announced that he planned to shoot the series in New York, he started another argument. "Hollywood's the place to make movies," they told him. "New York and we spent less than we would have in Hollywood. There was just one worry. We had about $80,000 invested in the series, but I still lacked the right to make it."

Breaking down the $80,000, he said that about $5,000 had gone for story development; $15.00 for screen tests and travel expenses; something over $50,000 for the actual filming of the pilot, including three extra days to get footage that may be useful for future episodes ("showing how confident, or perhaps foolhardy, I was"), and another $5,000 or so for miscellaneous items, such as props, options on studios and the services of the cameraman, director and other key personnel, including the two leads and three continuing supporting members of the cast.

Back in Hollywood, the pilot in the can, Mr. Leonard drew a deep breath of relief on learning that the contract for the tv rights was signed and in the studio vault. But he blew it right out again when the Columbia executives watching the studio screening told him that he'd have to delete the scenes he'd taken from the original picture, as he had no right to use them. By now the pilot had been edited and scored; to comply would mean doing that all over again, perhaps require another shooting session in New York, and certainly add to the cost of the project. So he began arguing again and again won his point.

On April 17, 13 months and $80,000 after its inception in Toronto, the pilot of The Naked City tv series was in New York, ready for screening for advertisers and agencies. The price will probably be about $40,000, give or take 10%. "My part is done for the moment," Mr. Leonard says. "It's now up to Screen Gems to make the sale. After that, I'll go to work again, getting the series ready to go on the air this fall."

Everybody likes happy endings. This story has one. Screen Gems made the sale. Naked City will go on ABC-TV this fall in the Tuesday 9:30-10 p.m. slot. Cosponsors are Quaker Oats Co. through J. Walter Thompson Co., Chicago, and Brown & Williamson Tobacco (Viceroy) through Ted Bates Inc., New York. Mr. Leonard can sit back, relax and watch the show.
The secret of nine successful men!

W. H. Ehrenberg of St. Joseph, Michigan, has served as a City Commissioner for 15 years. He was mayor pro tem for seven years, and was voted "Young Man of the Year" in 1947. He has had a Standard Oil dealership for 21 years.

The nine men on this page are all successful businessmen. They are important men in their communities, important as consultants to one of America's biggest companies, important for the part they play in performing civic and community jobs for the benefit of all.

What is the secret of their success? Actually it's pretty simple. Their friendliness, helpfulness and efficiency have never been confined to business alone.

You will find them serving their communities in many ways—from membership on City Councils to active participation in youth work. They also serve 16,000 fellow businessmen, sharing their time and knowledge to help solve mutual problems.

Who are they? Strangely enough, they are all in the same business. And there are thousands more as friendly and efficient in the same business. They are all Standard Oil dealers!

These nine men are independent businessmen—not employees of Standard Oil.

Charles Poll of Chicago, Illinois, has worked on neighborhood improvement projects as a member of the Garfield Park Chamber of Commerce. He also has served on committees of the American Petroleum Institute. He has had a Standard dealership 28 years.

W. E. Cook of Kansas City, Mo., has been active in Boy Scout work for years and is now a troop chairman. He is a leader in youth programs, such as boys' baseball and Sunday School work. He has had a Standard dealership 18 years.

A. V. Vissel of Minneapolis, Minnesota, is a member of the Commercial Club, a business organization interested in neighborhood improvements. He has served four years on the Dealer Advisory Council and has had a Standard dealership 24 years.

Harry Hjorth of Atlantic, Iowa, is chairman of the Roads Committee of the Chamber of Commerce. He has been a volunteer fireman since 1940 and has worked on Red Cross fund drives. He has had a Standard Oil dealership for 20 years.

D. J. FREED—BLAMED IN BOSTON

Boston was in revolt last week against rock and roll music and in the process Alan Freed, WINS New York disc jockey and a rock and roll radio pioneer, was implicated.

A grand jury in Boston’s Suffolk County Thursday indicted Mr. Freed on charges of violating Massachusetts’ “anti-anarchy” law, and later also with a legal action taken by the WINS d.j. who had taken his personal, non-broadcast rock and roll stage show with Jerry Lee Lewis into the Boston Arena May 3.

The indictment’s impact made itself felt in New York hours later where WINS Thursday night—without explanation—yanked Mr. Freed’s The Big Beat (7-11 p.m.) and substituted “soothing” popular music with M.C. Paul Sherman.

Speculation immediately arose whether Mr. Freed and WINS had parted company but neither station officials nor the disc jockey could be reached for comment late Thursday.

The Boston jury deliberated less than three hours after hearing testimony of witnesses including several victims of the Saturday night escapade. Boston police charged Mr. Freed with making statements to his audience that later led to a fracas outside of the arena. Mr. Freed, according to news reports, denied the charge admitting that the violence (a stabbing, beatings and a robbery) took place far from the locale of his show staged for rock and roll enthusiasts. He also denied making inflammatory statements to the audience.

Mr. Freed was indicted on a charge of “inciting the unlawful destruction of property” during the rock ‘n’ roll session at the arena. As announced by the District Attorney in Boston, the indictment said the disc jockey “by speech did advocate, advise, counsel and incite the destruction of real and personal property.”

Mr. Freed was not being held in Boston. As of Thursday night there were no reported steps toward extradition, and Mr. Freed had canceled other stops of his tour (Lewiston, Me., and Providence). WINS in New York reported that Mr. Freed was at his Stamford, Conn., home and was “incommunicado.” He was said to be preparing a statement for release this week. The station said it was not associated with the tour.

The Sunday before the indictment and the day after the arena troubles, Boston Mayor John B. Hynes and District Attorney Garrett H. Byrne officially banned public demonstrations of rock and roll.

The Lewiston, Me., event went on without Mr. Freed. Emceed by WLAM disc jockey Frank Sweeney, this show was marred by an arrest of a youngster who insisted he share the stage with the performers. The show at Providence (also without Mr. Freed) was policed by 20 officers, policewomen, plainclothesmen and others.

A scheduled program at the Rensselaer Polytechnic Institute’s field house in Troy, N.Y., where proceedings would have gone to the Catholic Youth Organization charities in that area, was cancelled by WTRY Troy executives because of the “riot” (as one Boston newspaper headlined the clash on page one).

The Boston Herald reported that State Sen. William D. Fleming (D-Worcester), will seek legislation banning rock and roll from state-owned buildings and quoted the police. “I feel that rock and roll music was the primary cause of the trouble. . . . I have been informed that certain products, narcotics, were sold. It was not the music which sent the youngsters along the path of destruction.”

A proposed “concert” Thursday at New Haven’s Arena Theatre was canceled by theatre managers, and the townsmen of New Britain, Conn., also posted a “Stay Out” sign to Mr. Freed and friends. In Tren- ton, N. J., Wednesday night, Maj. Gen. James Cantwell, commander of the state national guard, canceled a Friday night concert that was to have been held in the Newark, N. J., Sussex Ave. Armory. Acting Attorney General David D. Furman concurred with the guard’s action, as did New- ark Police Director Joseph P. Sughrue. Both said they had acted “for the public’s safety.”

The New Haven theatre executive who canceled the Freed show was backed by local police. After a similar hearing, Newark Judge Sidney A. Johnson said the police “did not exceed [its] authority” after counsel for the WINS d.j. had objected.

Following announcement in New York and Newark papers that the Newark Friday night event was to be canceled—WINS itself made no mention of it on the air—the station found itself besieged by “hundreds of phone calls” from teenagers demanding a refund under the mistaken impression that WINS was promoting the event. Mr. Freed’s personal promoter, ex-welterweight boxer “Izzie” Grove, picketed Newark City Hall Thursday but was removed by local police, according to WINS.

The station, at about 4:15 p.m. Thursday, also was subjected to a bomb scare and station personnel evacuated the premises until police reported the call was a hoax.

Throughout, WINS maintained a discreet “hands-off” position. Vice President-General Manager H. G. (Jock) Fearnhead said that WINS “in no way is connected with this tour,” that “as far as we are concerned Mr. Freed is on leave of absence,” and that he would return to work this week. Mr. Fearn- head’s explanation was made before WINS decided to cancel Big Beat that night.

Campbell Named Branham V.P.

The advancement of Thomas B. Campbell from director of sales for radio and television of the Branham Co., station representative, to vice president in charge of station relations was announced last week by Monroe H. Long, board chairman. Mr. Campbell joined the radio sales staff of Branham in 1941 and was named sales director in 1952. In his new post Mr. Campbell will supervise station relations activities of the 11 Branham offices.
It is only one of many competitive tools that help keep food prices down.

It is an axiom of American business that for every new competitive sales tool that comes along, another new one will come along and try to surpass it. So it is with the trading stamp.

Trading stamps are only one of several competitive tools available to the merchant seeking to increase his business volume. He may give a discount for cash. He may cut some prices and feature "loss leaders." Or he may use prize contests, giveaways or other promotion devices.

All these sales tools have two things in common. First, to be successful, they must pay their own way by the creation of new business volume. Second, they cause intense competition which has the effect of helping to hold prices down even during inflationary times. Because stamps are given nationwide, marketing experts connected with universities have been able to measure this effect in the case of stamps.

Food prices in five cities where stamps were not given by supermarkets and in ten cities where stamps were given were compared with the U.S. Bureau of Labor Statistics Price Index for the two years ending in December 1956. Food prices in the "stamp" cities rose less than the national average. Price increases in "non-stamp" cities were more than the average. No evidence was found that stamp stores, as a class, charged more than non-stamp stores.

It seems clear that in these inflationary times the trading stamp is needed to work side by side with the many other competitive tools also helping to keep prices down.

"Competition and Trading Stamps in Retailing." Dr. Eugene R. Beem, School of Business Administration, University of California.
The following sales of station interests were announced last week. All are subject to FCC approval.

**KULA-TV HONOLULU, HAWAII** • Sold to Henry J. Kaiser by the Television Corp. of America (equally owned by Jack A. Burnett, Arthur B. Hogan, Richard C. Simonton and Albert Zuginsht) for approximately $685,000. Kaiser Hawaiian Village Television Inc. is currently studying plans for the disposition of ch. 13 KHVH-TV Honolulu. The Kaiser KULA-TV purchase relates solely to television, reports Kaiser, and does not involve the Kaiser or KULA radio stations. KULA-TV operates on ch. 4 and is affiliated with ABC. Mr. Kaiser announced last week that KULA-TV would be modified to “permit televising programs in color... We will show top rated feature films from the largest film libraries available to television today... With the facilities to be acquired and the programming planned, we expect to provide improved services in all phases of television.”

**WBBC Bessemer, ALA.** • Sold by Bessemer Broadcasting Co. to John M. McLendon & Assoc. Inc. for $70,000. McLendon operates the Ebony Radio Group—KOKY Little Rock, Ark., KOKA Shreveport, La., and WOKJ Jackson, Miss. WBBC is on 1450 kc with 250 w.

**WBCR CHRISTIANSBURG, VA.** • Sold by Dr. Vernon Baker to A. Hundley Griffith Jr. for $60,000. Mr. Griffith, currently with sales department, Modern TeleService Inc., New York, formerly was radio and tv director, Doremus & Co., New York. He will become president of WBCR Inc. Broker: Blackburn & Co. WBCR is 1 kw daytimer on 1260 kc.

**KRXU GLENDALE, ARIZ.** • Sold to Don G. and Otilie Owsley by Bartell Broadcasters Inc. for $200,000. KRXU operates on 1340 kc with 250 w.

**KIMO INDEPENDENCE, MO.** • Sold to KIMO Inc. (RAB President Kevin B. Sweeney, Kenyon Brown and Glenn Griswold) by Craig Siegfried for $87,400 plus $50,400 for 10-year land lease and $60,000 to assignor for personal services and non-competitive contract for 10 years. Mr. Sweeney and Mr. Brown each acquired 40%. Mr. Griswold, 20%. Mr. Brown, who also has part interest in KCOPE (TV) Los Angeles and Mr. Sweeney also bought KFOX Long Beach, Calif., last December for about $700,000. Mr. Sweeney, Mr. Griswold, former general manager of KFEQ-AM-TV St. Joseph, Mo., and F. F. (Mike) Lynch, general manager of KBYE Oklahoma City, acquired KBYE for $180,000 at about the same time [STATIONS, Dec. 23, 1957]. KIMO operates on 1510 kc with 1 kw, day.

**KEAP FRESNO, CALIF.** • Sold to KEAP Inc. by B. L. Golden for $150,000. Herbert J. Edelman is president of KEAP Inc.; subscriber Howard L. Tullis has interest in Other Bakerfield and KFXV-FM, San Bernar- dino, and Mortimer W. Hall owns KLAC Los Angeles. KEAP operates on 980 kc with 500 w, day.

**WAHR-AM-FM MIAMI BEACH, FLA.** • Sold to Community Service Broadcasters Inc., which is headed by Fred Bernstein and Richard B. Baker of Cincinnati, by Alan H. Rosenson and wife for $150,000. WAHR operates on 1490 kc with 250 w. WAHR- FM operates on 93.9 mc with 13 kw. Comr. Robert Lee dissented, on grounds of the station’s overcommercialization.

**WAZF YAZOO CITY, MISS.** • Sold to David B. Highbaugh by E. O. Roden and Assoc., for $125,000. Mr. Highbaugh was formerly 50% owner of WHIR Danville, Ky. WAZF operates on 1230 kc with 250 w, is affiliated with MBS. Comr. Lee dissented, claiming WAZF also has indulged (see WAHR-AM-FM above) in overcommercialization.

**KTKn KETCHikan, ALASKA** • Sold to Midnight Sun Broadcasting Co. by Robert C. Mehan for $30,000. Midnight Sun has agreed to cease operation of its present Ketchikan outlet, KABI, upon this grant. Other Midnight Sun stations: KFAR-AM- TV Fairbanks and KENI-AM-TV Anchorage, both Alaska. KTKN operates on 930 kc with 1 kw, is affiliated with CBS.

**KCLN CLINTON, IOWA** • Sold 75% stock to Rock River Broadcasting Co. by John R. Livingston, Kenneth Parker and Errett Zednit for $600, plus $15,000 to John Livingston, as trustee for the present stockholders of the corporation, plus other amounts to Mr. Livingston on notes he now holds. Rock River Broadcasting operates WRRR Rockford, Ill. Its stockholders have principal interests in WMBV-TV Green Bay, WMAM Marinette, WBEV Beaver Dam, all Wisconsin, and formerly KXGI Fort Madison, Iowa, among others. KCLN operates on 1390 kc with 1 kw, day.

**KRTV (TV) to Go on Air; Appoints General Manager**

KRTV (TV) Great Falls, Mont., has announced plans to go on the air next month. It was authorized May 29, 1957, as a 100 w station, but has increased its power to 600 w, with FCC approval.

The permit for KRTV originally was issued to Cascade Broadcasting Co., but the name of the operators will be changed to Rocky Mountain Broadcasters. The station plans to go on the air as an independent, programming with film. A schedule of three to four hours of television a night is planned for the summer. In addition, KRTV is planning live studio programs. Snyder, partner of KUDI Great Falls, has been named general manager of the new station.

**OWNERSHIP of WNTA-AM-FM-TV Newark, N. J.** (formerly WAAT-AM-FM- WATV [TV]) is formally transferred to National Telefilm Assoc. as papers for the $3.5 million sale are signed. At the ceremony (seated, 1 to r): Edythe Rein, NTA senior vice president; Irving R. Rosenhaus, president of the selling group; Oliver A. Unger*, president of NTA; (standing, 1 to r) Raymond E. Nelson, new president-general manager of WNTA-AM-FM; Ted Cott, NTA broadcasting vice president, and Gerald O. Kaye, president-general manager of WNTA-TV. The FCC approved sale of the Newark stations last month [GOVERNMENT, April 7].
Tele-Broadcasters Inc. Sets New Stock Issue

Multiple radio station owner Tele-Broadcasters Inc. is preparing to issue another 40,000 shares of common stock (par value 50¢) at a selling price of $3.25.

The prospective offering, subject to Securities & Exchange Commission non-registration approval, will be sold through Sinclair Securities Corp., New York. The underwriter will receive 65¢ for each share sold. Also included is an arrangement for Seymour Blauner of the Sinclair firm to buy 10,000 of the 40,000 shares.

Tele-Broadcasters, which is controlled by H. Scott Killgore, owns KUUL Kansas City, WPOP Hartford (Conn.), WPOP New York, KTIX Seattle, and KALI Pasadena, Calif. It also once owned WKXL Concord, N. H.; WARE Ware, Mass., and WXV Knoxville, Tenn.

Tele-Broadcasters also holds a two-year lease on XGEM Tijuana, Mexico (covering the San Diego market), with options for renewals for 10 years.

The SEC notice stated that Tele-Broadcasters will use the proceeds from the 40,000 stock sale to build KALI as a full-time station. It also indicated that a study was underway to put KUUL full time.

Tele-Broadcasters is authorized to issue 900,000 Class A shares, of which 100,000 are now outstanding. These were issued in 1956 and were sold for $1.50 a share. Dividends of 21/4¢ per share were paid to Class A stockholders twice in 1957 and were authorized again in March 28, 1958.

Also authorized and outstanding are 350,000 shares of Class B common. Class B shareholders may convert to Class A, on a one-for-one basis. Mr. Killgore owns 256,500 Class B shares and is listed at a salary of $25,000 a year as president. Dividends are paid only to Class A stockholders.

The over-the-counter price of Tele-Broadcasters has fluctuated from a low of 1% to a high of 31/2.

Tele-Broadcasters balance sheet as of Dec. 31, 1957, showed total assets of $1,170,551.45, with current assets shown as $131,751.31. Current liabilities are listed at $268,330.15, mortgages due at $711,865.18, and earned surplus at $7,846.14 and capital surplus at $137,745.00. The SEC notice showed that Tele-Broadcasters incurred a deficit in 1956 of $20,866.91. In 1957 its operating profit was $79,104.20 compared to $28,612.42 in 1956.

Phillips Named to KDAY Post

Irving Phillips, president and general manager of KYA San Francisco until its sale by J. Elroy McCaw and John D. Keating to the Bartell Family Group (Stations, March 10), has been appointed vice president and general manager of KDAY Santa Monica, Calif., effective today (Monday). He succeeds Frank Crane, who has been promoted to executive vice president of Radio California, licensee of KDAY, which is owned by Messrs. McCaw and Keating. In his new post, Mr. Crane will be respon-
### BEAR FACTS

It's not always lonely at the top. Take it from transmitter engineers of WSVA-TV Harrisonburg, Va. This hardy crew, working on Massanutten Mountain, 20 miles from home studios, frequently is favored by interesting visitors.

One such happened by last month when Buddy Lowe, Harold Richardson and Gray Williams were on duty. Mr. Williams went to shut out the night air and found himself facing a bear reared against the window, peering in. Another time, departing WSVA-TV engineers found their way into an intrepid band who tread softly through the woods, keeping guns and cameras at the ready. Bears abroad on Massanutten include some that are half-tame and others not at all tame, rangers say.

### ST. LOUIS—Six-year-old kidnap victim Kathy Hampton, found after three days, was interviewed on KSD-TV even before returning to her home. The broadcast climaxed extensive coverage by the station, which two nights earlier had carried her parents' appeal for her return. Frank Eschen, special events director, arranged the interview immediately after the family left a local hospital. The girl, clad only in underwear, was found after escaping from an abandoned house where the kidnaper left her. Mr. Eschen provided her with clothes from his own daughter's wardrobe. Austin Bridgman, KSD-TV news director, also figured in the kidnap coverage.

### NANAIMO—CHUB, at this British Columbia resort, received a message at noon May 3 that a lioness had escaped from a zoo. The station immediately aired warnings to parents to collect their children and asked members of the Nanaimo Fish & Game Club to report to the zoo with their rifles. Staffers Des Kearney and Burton Scott—armed with a tape recorder—joined the posse and the Royal Canadian Mounted Police at the zoo to learn that the lioness had mauled an eight-year-old child to death. Messrs. Kearney and Scott reported this to CHUB, then joined in the search.

Two hours after the animal was located and killed, CHUB played back the story as recorded by its staffers who, it was later learned, had not been more than 200 yards from the killer since arriving on the scene. The zoo's owner was featured in a half-hour report that evening.

### CLEVELAND—After Cleveland industrialist Cyrus Eaton aired some controversial opinions on national policy in a network tv news show, WDOK here rode developments for two days. Morning News Editor Norman Wain on Monday stirred vigorous listener reaction when he broadcast a beeper phone interview in which Mr. Eaton elaborated on his statements of the evening before. The next day, News Director Brian Hodgkinson took an editorial position on Mr. Eaton's "unwise remarks." Local newspapers noted the WDOK coverage and listeners continued to react days after the industrialist raised the flurry of comment.

### PENDLETON—KUMA here interrupted its regular programming schedule to report on the Eastern Oregon floods a fortnight ago. General Manager Ted A. Smith (whose own home was flooded) toured the danger area in a mobile unit and broadcast bulletins on the damage. KUMA's facilities were used to help in the evacuation of people living in the vicinity and to keep them informed of the progress in fighting the flood.

### LITTLETON—J. Kenneth Brother, co-owner and manager of KUDY Littleton, Colo., reports he was the first radio reporter to get to confessed murderer David F. Early for an interview after his capture. The ex-convict is charged with murdering three people in this Denver suburb and now is in Arapahoe County Jail awaiting trial.

### CHARLOTTE—WTB-WBTV (TV) here refrained, at the request of safety-concerned authorities, from broadcasting news of an Eastern Airlines craft's three-hour air struggle with a jammed landing gear Thursday. But a seven-man news crew was busy on the story and ready to broadcast it at 2:57 p.m., four minutes after the craft was put down safely on a foam-bedded airstrip.

WBTV had its film report on the air 72 minutes after the plane touched ground, and 10 minutes later the footage was on its way by plane to CBS-TV in New York. Additional film interviews with Eastern Pilot Capt. John Randall and passengers were run on the WBTV Esso Reporter 6:30 p.m. newscast.

After the landing, WBT supplied spot reports to stations in nine cities.

### REPRESENTATIVE APPOINTMENTS

KHSI Chico and KVCV Redding, both California, name McGavren-Quinn Co. Both are McClung stations.

WAND Canton and WJER Dover, both Ohio, appoint Breen & Ward, N. Y. Both are Dover Broadcasting stations.

WDXB Chattanooga, Tenn., has appointed Venard, Rintoul & McConnell, N. Y.
NLRB, Court Actions Favor Rebel Musicians

The Hollywood musicians who have rebelled against certain policies and procedures of the American Federation of Musicians and its Hollywood Local 47 won two victories last week.

First, the National Labor Relations Board ordered a hearing May 20 on the petition of the Musicians Guild of America for an election to determine whether AFM or MGA should represent musicians employed at the motion picture studios as collective bargaining agent (MGA was organized earlier this year by Cecil B. Read, leader of the rebellion against AFM policies in which he lost his AFM membership some two years ago [PERSONNEL RELATIONS, March 31]).

Next, Judge Bayard Rhone of Los Angeles Superior Court issued a preliminary injunction ordering Local 47 to stay the suspension of seven supporters of the rebel movement until they have exhausted the remedies for appeal within the AFM. Judge Rhone also ordered Local 47 to hold a new election to fill seven directorships of the Musicians Club, a corporation of members of Local 47 which controls the property and assets of the local. Six of the seven suspended members of the local were selected directors of the club March 6, when a rebel slate defeated a list of candidates put up by the current administration of Local 47. The ousted directors alleged local President Elliot Daniel had suspended them to prevent their taking office and gaining control of the union’s funds. Pending the outcome of the new election, Judge Rhone ordered both sides not to withdraw any funds from the club’s $50,000 bank accounts.

The previous week, the administration of the local barely averted having its suspension of the ousted members overruled when a move to reinstate them failed by 29 votes to muster the two-thirds majority needed to override the administration action.

The vote, climaxing six hours of debate before more than 1,600 members of Local 47, was hailed as a moral victory by the rebel faction despite its failure to reverse the Daniel faction.

NABET Seeks Solution To Network Problem Tomorrow

National Assn. of Broadcast Employees & Technicians reported late Thursday that it expected by tomorrow (Tuesday) "a resolution" of its contract impasse with NBC and ABC [AT DEADLINE, May 3]. The contract signing was held up on May 2 when 98 out of 2,000 NABET workers at the two networks failed to ratify the pact.

At that time, the union proposed that the pact be signed for all employees except those who had not ratified it, but the networks declined to be party to a "piecemeal" contract. No meetings were held last week and network spokesmen declined to discuss developments. A NABET official would only say that "a resolution" of the conflict was expected to develop by tomorrow but preferred not to elaborate on the situation.

SDG Resuming Talks With Film Producers

Contract talks between Screen Directors Guild and Assn. of Motion Picture Producers & Alliance of Television Producers are scheduled to resume tomorrow. Discussions had recessed for a week because Charles S. Boren, AMPP vice president for industrial relations who heads that organization’s negotiating committee, was down with a virus infection.

SDG negotiators return to the bargaining table with a mandate from the union’s membership to get a prompt settlement on SDG terms, or else. A meeting held May 3 set June 2 as the deadline, with the guild to strike against the film companies if new contracts are not set by that date. Directors have been working on both theatrical and tv films on an interim basis since March 13, when the motion picture studio agreement expired, and April 3, when the tv film agreement ended.

As is usual in labor negotiations, money is important and the SDG considers the flat 5% increase in base scale offered by film makers somewhat less than adequate. But this time the major issues are not concrete...
facts like wage scales and working conditions but intangible future possibilities like the sale of post-'48 feature films to tv and the advent of toll tv into the entertainment scene.

The guild contends that the director of a theatrical picture which is later released for telecasting should get a part of the proceeds of the sale to tv, a stand which has also been taken by the unions representing actors and writers working in motion pictures. The producers maintain that when the director has been paid for his services to a picture his financial interest in that picture is ended and any money derived from tv belongs to the producer alone. As to pay tv, the producers have declined to agree even to discuss this subject with the union when, if this possible new market for movies becomes a reality.

Screen Directors Guild reportedly has received assurances of full support in the event of a strike from Radio-Tv Directors Guild, Screen Actors Guild and Writers Guild of America.

**Blast From AFTRA Touched Off By DeMille Speech to Pioneers**

The American Federation of Television & Radio Artists has withdrawn its support from attempts to organize a Hollywood chapter of Broadcast Pioneers and now is urging its members not to join the Pioneers, the Hollywood office of the talent union has announced. A change of heart followed the address of Cecil D. DeMille at the annual banquet of the Broadcast Pioneers during the NAB convention. The motion picture producer vigorously attacked the union for expelling him from membership, so ending his career in radio as host of the Lux Radio Theatre because he refused to pay a $1 assessment for a political activity with which he disagreed (NAB Convention, May 5).

"We feel it is more than a coincidence that Mr. DeMille has been selected as the recipient of an award by the Broadcast Pioneers at the inception of one of the most intensive campaigns in the history of the state of California to destroy the collective bargaining strength of unions in our state," the union declared.

**Earnings Up for Tv Writers,**

Television writers earned $9,224,000 in the year ending March 31, 1958, up more than 35% from their earnings of $6,814,000 the preceding year, according to the annual financial report of the Writers Guild of America, West, made last week by Edmund H. North, treasurer. Earnings of radio writers dropped from $467,000 to about $300,000 but screen writers' earnings held surprisingly well for a year supposedly so critical in the movies, dropping only 1% from $11,151,200 in fiscal 1957 to $11,028,100 in fiscal 1958.

"The tv-radio branch contributed 34.7% of the Guild's income (in dues based on gross earnings) in 1956, 35.9% in 1957 and 46.5% in 1958," Mr. North reported. "Screen writers, on the other hand, in a levelling process as television has grown, contributed only 53.5% in 1958 as compared to 65.3% in 1956."

**MANUFACTURING**

**RCA READIES NEW SALES ASSAULT AFTER QUARTER EARNINGS DROP**

- Stockholders given three-pronged economic program
- New departments, products introduced to record turnout

RCA, the electronics industry giant, last week documented a program to "sell our [RCA's] way to higher volume and higher profits."

In a talk to stockholders in New York, RCA President John L. Burns revealed: (1) a first-quarter earnings dip, (2) a three-point program to counter the economic slump and (3) promotion of new products—and a look at one of them.

The annual meeting at NBC's huge Studio 8-H Rockefeller Center, was unusually noisy, lasted 2 hours and 40 minutes, featured entertainment (not all of it scheduled) and had a record turnout of stockholders (about 1,400).

Highlights of the meeting, which was presided over by RCA's board chairman, Brig. Gen. David Sarnoff:

- Earnings: First-quarter earnings declined 29.7% to $9,004,000, or 59 cents a share, on sales of $278,339,000. Last year's comparable period: net of $12,810,000 equal to 87 cents a share, on a $295,773,000 volume. But, said Mr. Burns: "Our plans contemplate our business for the full year 1958 running ahead of the rate for the first three months, and we hope that economic conditions for the nation as a whole will so develop that we will be able to carry out these plans."

RCA's business volume last year reached a record $1,176,277,000, an increase of 4.3% over the preceding year, and the third year in a row that the company's sales of products and services went over the billion dollar mark. But profits for the year were reduced 3.7%.

- NBC—Net sales of the network for the first quarter of 1958 were 10% above the same period last year and network billings have reached "a new high." (See story, page 62.)

- Products—RCA's research will make available this year to the public six new products. Shown at the stockholders' meeting was the first of the six products, a high-fidelity tape cartridge. Stockholders also got a glimpse of RCA's fountain pen-size radio, still in the development stage. (See separate story.)

- Three-point program—RCA ("We believe that the best way out of a recession is to sell your way out") intends to (1) expand existing activities that "show promise of returning a fair profit," (2) create new departments to go after business in certain key areas, and (3) introduce important new products and services that will create new markets.

In the category of profit-showing activities, the NBC operation (includes owned and operated stations, the radio and tv networks, film syndication, spot sales); color tv—"Sales of color sets to consumers are running well ahead of last year"—which will advance in programming and in merchandising, automation in business and industry (called "one of the most promising fields of future growth") and national defense.

New departments to be created include the BMESW Dept. (Ballistic Missile Early Warning System). RCA is prime contractor for the warning system that represents billings of more than $400 million over the next several years.

Still other new departments: Educational Electronics Dept.—"more than 200 colleges and technical schools have installed closed-circuit television, and more than 30 educational tv stations are on the air"; Telecommunications Div. (broadcast and tv equipment and communications products); Semiconductor and Materials Div.; Atomic Energy Services; Model C Stellarator Project (research into controlled thermonuclear reaction); Astro-Electronic Products Div. (to develop and produce satellites, space vehicles and associated equipment).

At the end of his talk, Mr. Burns pressed a button to start a demonstration of stereophonic sound. Played through an array of speakers hung from the huge studio stage were sounds of ping pong play, a steam engine pulling into the station, selections of various types of music with a grand finale: "The Stars and Stripes Forever."

The non-scheduled entertainment was provided by the surprise nomination of Elvis Presley (a top recording star in RCA Victor's stable), as a "balance" to the nomination of Gloria Parker (a songstress who claims "grievances" against Broadcast Music Inc. in both the courts and in stockholder meetings of various broadcast companies) to be a director of the corporation. (Mr. Presley's name was not considered seriously. Miss Parker received 720 votes in her favor, more
than 12-million against.)

Barney Young, who said he held 10 shares of stock and is a plaintiff in several lawsuits brought against RCA, offered the names of both Mr. Presley (Gen. Sarnoff quipped: "Have you talked to Presley?") and Miss Parker. Mr. Young also voiced other objections as to the running of the meeting by the General and the qualifications of one of the board of directors.

Stockholders seeking a chance to comment, make speeches or ask questions at times created a three-ring circus of comedy, shouts and noise but the meeting never did get out of hand under Gen. Sarnoff's freewheeling but tight hold on proceedings.

Overwhelmingly defeated were resolutions by minority stockholders that would have imposed restrictions on option plans (that the right of purchase not be cumulative and it expire over a set period of years) and would have substituted cumulative voting for directors as opposed to the current voting by shares.

Only at one point in the meeting did Gen. Sarnoff appear irate. Addressing himself to an inquisitive stockholder as to what Gen. Sarnoff had done with RCA holdings in the past, the General declared that the "investment" in RCA represents most of my fortune" and that most of himself had been put into the corporation.

A stockholder asked why NBC had not sold educational programs to "sponsors because after all isn't it the business of RCA to get the dollar?" Another asked if color tv was in the "black." Gen. Sarnoff said it was not, but he wished it were. He told still another questioner that "all major divisions of RCA are operating in the black."

A stockholder asked about Perry Como's contract with NBC-TV. Gen. Sarnoff said he would pass that over to Robert W. Sarnoff, NBC's president and Gen. Sarnoff's son. The NBC chief said this was competitive information, that he thought Mr. Como's contract was for a seven-year period but in any event, the network had Mr. Como's talents signed up for as long as the star is a performer.

Less than a dozen hands greeted a question posed by a stockholder of how many people there had purchased color sets "on their own." Gen. Sarnoff (as did Mr. Burns) suggested more color sets be bought by shareholders.

Other highlights:
RCA spent more than $32 million last year on advertising and sales promotion,

GE'S NEW FIGURE
General Electric Co.'s new color television camera sells for $49,500—not the $39,500 figure quoted in Broadcasting's story on the new unit a week ago [NAB Convention, May 8]. GE spokesmen said the lower price was inadvertently quoted to Broadcasting's reporters at the demonstration and that the error was discovered when queries began arriving "from all over the country."
through less was spent last year in promotion. Attention was drawn to RCA's demonstration of radio automation systems at the NAB convention in Los Angeles and to new government orders at RCA for the first quarter increased by $130 million over the same three months last year. (RCA expects to be about 10% ahead of 1957's volume of $267 million worth of government contracts).

Burns Shows Tape Cartridge, Miniature Radio at RCA Meeting

A new product soon to be offered to the public and an experimental radio, the size of a fountain pen, were shown to RCA stockholders last week by RCA President John L. Burns.

The new product is a high-fidelity tape cartridge for home hi-fi record players. Mr. Burns said the new cartridge holds enough tape to provide two hours of regular music or one hour of stereophonic music; it can be slipped into place simply and eliminates the need for threading magnetic tape from one reel to another, and will be on the market this fall.

As an example of RCA activity in electronic miniaturization and to illustrate the electronic industry's "major breakthrough" in radically scaling down basic components, Mr. Burns held up for the assembled stockholders a new RCA experimental radio the size of a fountain pen. It contains batteries, antenna and earphone, weighs only two ounces and has five modules, each about one-tenth of a cubic inch, which correspond to the tubes and accompanying circuits of conventional five-tube radio receivers.

RCA notes that the use of micro-modules will make possible a ten-fold reduction in size and weight of electronic systems for missiles, earth satellites and field equipment.

First Quarter Loss Reported To DuMont Labs Stockholders

The outlook for Allen B. DuMont Labs electronic manufacturing prospects, in the past behaving in teeter-board fashion, is in a new decline. A DuMont stockholders meeting last week revealed the depressing news that the laboratories had a $943,000 loss on sales of $9,806,000 in the first quarter of this year. This compares with a loss of $353,000 on sales of $10,059,000 for the corresponding period last year.

DuMont last year lost $353,000, compared with the loss in 1956 (after reduction by a tax carryback) of $3,887,000. The president of the corporation, David T. Schultz, commenting in the annual report on 1957's improvement then cited cost reductions, and a pick up in business for the second half of 1957 [MANUFACTURING, March 24]. Said Mr. Schultz last week: the upward trend had been reversed; the company is feeling the lowered level of the national economy and the letting of defense contracts has been slow.

Re-elected as officers: Dr. Allen B. DuMont, Mr. Schultz, Barney Balaban (president, Paramount Pictures Corp.), Armand G. Erp (partner, Carl M. Loeb, Rhoades & Co.), Dr. Thomas T. Goldsmith Jr. (vice president in charge of engineering at DuMont), Paul Raibourn, (vice president, Paramount Pictures Corp.), Percy M. Stewart (partner, Kuhn, Loeb & Co.), and corporation counsel Edwin L. Weil (partner, Simpson, Thacher & Bartlett).

MANUFACTURING SHORTS

Westinghouse Electric Co., Metuchen, N. J., has announced plans for marketing phonograph equipment that will "convert any Westinghouse high fidelity model to stereophonic sound." Company will offer auxiliary cabinet unit with multiple speakers and amplifier plus "conversion kit" for adapting present high fidelity models to play stereophonic discs. Also included will be a replaceable phonograph cartridge that will reproduce either stereo or monaural records.

Columbia Records Div., CBS Inc., has announced it would begin distribution of automatic phonograph record vender named "Dia-l-a-Disc" and developed for Columbia by Holley Assoc. Device, available to record stores and supermarkets through Columbia's network of independent and company-operated distributors at $595 (F.O.B. Merchantville, N. J.) is "pilferproof" and offers stores first workable automatic vending machine for "most strongly-sold non-food products available today."

Sylvania Home Electronics, division of Sylvania Electric Products Inc., has introduced Somerset, 17-inch 110-degree portable television receiver. Suggested price: $169.95.

Motorola Inc., Chicago, announces net sales for quarter ending March 31 were $40,894,492. Earnings: $677,782. Comparable figures last year: $52,281,795 and $2,137,587.

Audio Devices Inc., N. Y., has released annual report to stockholders which shows increase of 29% in sales of magnetic tape recording discs for 1957 over 1956—$4,774,523 as compared with $3,707,576. Operating profits from these sales were $506,735 before federal income taxes, increase of 21% over comparable profits of $417,457 for 1956. Sales for first quarter of 1958 exclusive of silicon rectifier have increased 25% over same period for 1957, report disclosed.

Magnecord Div. of Midwestern Instruments Inc. announces two new instruments, Stereo Magneordenette and P-75 Editor II, both with recording and playback features. Magneordenette has tape speeds of 3\(\frac{3}{4}\) and 7\(\frac{1}{4}\) inches per second. Among special features are playback and record amplifier controls consisting of 2-gain channel, master volume, controls. Unit retails for $395. P-75 Editor II unit provides tape speeds of 7\(\frac{1}{4}\) and 15 inches per second (no retail price given).

Fairchild Recording Equipment Co., Long Island City, N. Y., announces availability of booklet dealing with story of stereo sound and particularly stereo disks.
**THREE STEPS TO INFINITE PRE-SETTING**

**FOR LIGHTING CONTROL**

1. **MARK LIGHT SETTINGS ON LUMITRON CUE SHEETS**
2. **STACK CUE SHEETS IN CONSOLE READERS**
3. **CROSS-FADE SMOOTHLY FROM ONE PRE-SET TO THE NEXT WITH MANUAL FADER**

**IT'S AS SIMPLE AS 1, 2, 3!**

The all-electronic, all-new LUMITRON INFINITE PRE-SET LIGHTING CONTROL SYSTEM, far superior to anything now available, eliminates guessing, cue translation, and human error to permit the prompt accomplishment of the desired lighting design. Every cue is electronically interpreted and always explicitly followed. The tubeless LUMITRON System provides an infinite number of Pre-sets for the swift achievement of the finest, most complex lighting designs... and frees the Lighting Designer from routine tasks.

Here, in a compact, table-sized Console, is the most revolutionary concept of stage lighting control yet devised.

**CHECK THESE ADVANTAGES:**
- Unlimited number of pre-sets available to the lighting designer
- Provides an alterable or permanent record of the lighting plot of every show
- Absolute simplicity of operation
- Automatic, yet always under the control of the operator
- No tubes—nothing to wear out—low maintenance
- Competitively priced with systems limited to only ten pre-sets
- Fully guaranteed—installed and maintained by expert LUMITRON engineers

May 12, 1958 • Page 81
What they think about conventions (continued)

Are NAB conventions worthwhile? What programs do delegates like? What about the size of the 1958 conventions? Is the plan to cut the size of conventions popular with broadcasters? Do they want both equipment and program service exhibits? These questions and many others were answered by delegates to the April 27-May 1 convention held in Los Angeles. The Pulse Inc., nationally known research firm, was commissioned by Broadcasting to get the answers.

The first preliminary returns on the Pulse survey showed that an overwhelming number of delegates found the programs generally valuable [Broadcasting, May 5]. Complete results of the Pulse survey appear herewith.

A majority (57.8%) of delegates to the recent NAB convention in Los Angeles approve of NAB’s plan to limit the size of future conventions.

Only a small minority, however, like the plan to keep film-program service exhibits out of the annual meeting and confine them to autumn regional conferences.

Broadcasters delegates have faith in the FCC, a majority believing the Commission is not influenced by private talks. They feel it is being done a good allocations job, and doubt if Congressional probes of the Commission have hurt the broadcasting industry.

The size of conventions is “too big,” according to 52.7% of the delegates polled, with 44.8% feeling the size is “about right.” Half (52.6%) anticipate better radio and tv business this year and 31.2% figure it will be at least as good as last year.

The most valuable program at the Los Angeles convention, according to the survey, was the joint session addressed by Dr. Frank Stanton, president of CBS Inc. and keynote speakers, and FCC Chairman John C. Doerfer. It was attended by both management and engineering delegates.

The joint session at which members of the FCC took part in a panel discussion, answering delegates’ questions, drew a light vote. This session was held Wednesday morning, April 30, the day 12 professional interviewers conducted the Pulse study. Many of the delegates were interviewed early Wednesday before this discussion was held, a fact that must be considered in evaluating the results.

Next session in popularity and ranking in second place was the labor clinic, an overflow meeting held the first day (Monday) of the convention. The tv management-code discussion ranked in third place. The “luncheon talks” classification ranked tenth. However, this figure was influenced by the fact that engineering and management luncheons were held separately and the management luncheons were limited to those having the Biltmore Bowl.

The luncheon figures must also be interpreted in the light of the time of interviewing. Some of the surveying was done prior to the Wednesday luncheons. No evaluation of Thursday luncheons is reflected in the results.

A majority of those interviewed (55.6%) felt that the recent Congressional investigation of the FCC did not hurt the broadcasting industry. As to the FCC itself, 74.1% felt the Commission is doing a good allocations job. At the same time 55.8% took the position that the FCC is exposed to political pressures. Interestingly, 63% supported the Commission’s integrity by saying they feel it is not influenced by private talks.

Pulse’s survey revealed that 74.7% of broadcaster delegates at the convention consider the television code effective. Asked if the code could be improved, 53.9% felt it could. Most mentioned way to improve the tv code was “more enforcement.”

A predominant share (93.6%) of delegates consider NAB an effective trade organization. Over half (53.3%) of these see room for improvement, however. The answer most mentioned was “everything can be improved.”

Complete results of the survey follow:

**Personal message:**

When good fellows get together!

Personally, we think that your product and our viewers were just made for each other! And, believe us (or any Rochester Area Survey!), we've got a LOT of viewers in this rich Rochester territory!

If you're seeking real pay-off spots in this area, buy CHANNEL 10, the channel that gets the majority of viewers, over all, from sign-on to sign-off, according to the latest Rochester Metropolitan Area ARB Survey, February, 1958!

The meeting of your product and our viewers will be accompanied by the background music that is so popular with every sponsor—the jolly ringing of the cash register with the one-word lyric—SALES!
FOR IMMEDIATE RELEASE
A Public Service Film Available For Any 10-Day Period Without Charge

"CHALLENGE IN ASIA"

Narrated by Lowell Thomas

* A 13-minute film short on today's challenge in Asia. Will the Philippine people and their President, with their English-speaking, Christian heritage on an Oriental background provide a fresh means of peace in Asia and understanding with the West? In this film President Garcia gives his answer.

* Here is an inside look at President Garcia at work in Malacanang Palace, the Philippine White House. The film includes a special sequence on his role as host to the SEATO conference, which helped firm up the anti-Communist alliance in Asia. There are live sound statements by Secretary of State John Foster Dulles and Philippine President Garcia, also intimate glimpses into the workday and the private home life of President Garcia... including Cabinet Meetings, as host at a state dinner for SEATO foreign ministers... receiving a newly appointed ambassador... talking with a delegation of American boys... welcoming world-renowned personalities, Marian Anderson and others... relaxing with his family... playing chess... with a final interview of broad impact on tomorrow in Asia!

* A remarkably different public service film for the TV program director seeking to give his viewers a fresh insight into Asia and President Garcia's objectives for the betterment of Philippine-American understanding.

Produced by Alfred Wagg Pictures, narrated by Lowell Thomas, directed by Alfred Wagg, written by Joe DiMona, photographed in 35mm black and white, and 16mm prints are available, with synchronized sound and music.

BROADCASTING
"I read Ad Age on Monday and hear about it all week"

says THOMAS H. LANE
Senior Vice-President
Lennen & Newell, Inc.

"Awareness and understanding are essentials in our business. That’s why I read Advertising Age on Monday and hear about it all week."

Every Monday, like clockwork, most of the advertising executives of importance to you—those who influence as well as those who activate major broadcast decisions—turn to Advertising Age. But Ad Age is more than a Monday-morning ritual. The news and trends of marketing in AA—yes, and the sales messages about markets and media too, get referred to and discussed throughout the week.

At Lennen & Newell, Inc., for example, where $24,500,000* of its 1957 billings were placed in radio and television, planning broadcast schedules is a vital part of the agency’s operation. Among its important accounts are such broadcast-minded concerns as the P. Lorillard Co. (Old Gold, Kent, Newport cigarettes, etc.), the Colgate-Palmolive Co. and the Benrus Watch Co.

Every week, 82 paid-subscription copies of Ad Age keep Lennen & Newell executives up with changes and developments affecting them. Further, every Monday, 72 paid-subscription copies reach marketing planners of the advertisers mentioned.

Add to this AA’s more than 40,000 paid circulation, its tremendous penetration of advertising with a weekly paid circulation currently reaching over 12,000 agency people alone, its intense readership by top executives in national advertising companies—and you’ll recognize in Advertising Age a most influential medium for swinging broadcast decisions your way.

*Broadcasting Magazine 1957 report.

important to important people

200 EAST ILLINOIS STREET • CHICAGO 11, ILLINOIS
450 LEXINGTON AVENUE • NEW YORK 17, NEW YORK

1 Year (52 issues) $3

THOMAS H. LANE

A graduate of Dartmouth College, where he was editor-in-chief of "The Daily Dartmouth," Mr. Lane started his business career as a reporter for the New York Herald-Tribune. His first agency association was with Young & Rubicam, which he served successively as copywriter, radio producer, and account executive. At the outbreak of World War II, when the U. S. Treasury Department asked Y & R to "lend" a man to head up all national war bond advertising and publicity, Mr. Lane was sent to the Treasury for four years as director of advertising, press and radio. After the war, the Rexall Drug Company, Los Angeles, named him vice-president in charge of advertising and sales promotion. Mr. Lane returned east in 1949 to join McCann-Erickson as a vice-president, director and member of its plans board. In 1955, he accepted the post of senior vice-president at Lennen & Newell.
AFCCE, FCBA Study
On Tall Tower Issue

A joint committee of the Assn. of Federal Communications Consulting Engineers and the Airborne Communications Bar Assn. will undertake a study to determine a more equitable arrangement in securing airspace approval for tall tv towers.

The move was initiated at the annual meeting of the AFCCE in Mexico City three weeks ago, with FCBA representatives in attendance.

At present, tv stations and applicants proposing antenna towers 500 ft. or higher above ground must receive approval for the proposed heights and locations from the Airspace Panel of the Air Coordinating Committee. The ACC is a Presidential advisory committee established primarily to coordinate aeronautical activities. The Panel is composed of representatives of the Air Force, Army, Navy, Commerce Dept., the FCC and other government agencies. Civilian organizations, such as the Air Transport Assn., Aircraft Owners & Pilots Assn., the NAB, AFCCE and FCBA, are associate members but have no voting rights.

Although the recommendations of the Airspace Panel are not binding on the FCC, in practice the Commission finds it difficult to approve an antenna proposal that is disapproved by the panel.

The feeling among broadcasters for some years has been that the broadcasting industry should have more equitable representation on airspace matters, particularly as they refer to radio and tv. Tv applicants have had a difficult time obtaining approval of antenna proposals in many cases, since the majority of the panel is composed of aviation-minded representatives. The FCC representative who is a member of the Commissions aviation division usually abstains from voting on broadcast matters.

The joint AFCCE-FCBA airspace committee will consist of three members from each organization. They will be appointed in the near future.

Elected at the AFCCE Mexico City meeting were the following new officers:

George E. Gautney, Gautney & Jones, president; Howard T. Head, A. D. Ring & Assoc., vice president; Robert M. Silliman, secretary; William E. Benns, Jr., treasurer.

New directors are David L. Steel, Page, Creutz, Steel & Waldschmitt; Edward F. Lorentz, Commercial Radio Equipment Co., and John H. Mullaney.

Southeastern Service Meet Set

The first major southeastern electronic service convention is scheduled for Miami’s Municipal Auditorium June 5-8 under sponsorship of the Radio-Television Technician’s Guild of Florida and the Tampa Bay Radio-Television Service Assn., it was announced last week by Lewis Winner, head of the Federation Co., New York. Invitations are being addressed to the FCC and members of Congress, Mr. Winner’s office said, although specific addressees have not been selected. Convention committee membership includes Norman Bean, WTVJ (TV) Miami. Agenda topics include monochrome and color tv, fm-tv antennas, auto radios, tubes and transistors plus components and service and industrial subjects.

Fellows Rebuts Hoover Charge That Tv, Movies Breed Crime

The charge of J. Edgar Hoover, head of the FBI, that a dangerous trend toward glorification of crime is evidenced in tv programs and motion pictures is not supported by authoritative research, according to NAB President Harold E. Fellows.

Replying to the charge at Los Angeles May 1, Mr. Fellows said there have been many studies by educators and others in the field showing that tv is a constructive influence on young people. He added that the NAB television code admonishes against violence and indecency, with NAB constantly monitoring stations. "Our research shows that programs presented by tv code stations and networks reflect the national conscience," he said.

Mr. Fellows described Mr. Hoover as "one of our great patriotic citizens and an able counselor to and friend of the broadcasting industry." Voicing surprise at the remarks, he said that to the best of his knowledge and that of the tv code board "There have not been released any authoritative studies, made by accepted scientific methods, supporting the contention that television contributes materially to juvenile delinquency."

Mr. Hoover, writing in the May issue of the FBI Bulletin, called for strong public pressure against tv and movie programs which "flaunt indecency and applaud lawlessness." He did not identify such programs, but did credit many leaders in tv and motion pictures with helping law enforcement with "genuine portrayals of criminals."

EIA First Quarter Report Shows Drop in Radio-Tv Set Output

Radio and tv set production in the first quarter of 1958 showed a decline from the same 1957 period, according to Electronic Industries Assn.

Output of radios totaled 931,341 in March (including 234,911 auto sets) and 2,834,759 in the first quarter of 1958. Radio output in March 1957 totaled 1,609,073, (including 597,532 auto sets); in the first quarter of 1957 the total was 3,199,367.

Output of tv sets totaled 416,903 in March (of which 36,050 had uhf tuners) and 1,221,299 in the first quarter of 1958. Total tv output in March 1957 amounted to 559,842 sets; in the first quarter of 1957 production totaled 1,474,729 sets.

Retail sales of radio receivers totaled 538,963 in March and 1,493,668 in the first quarter compared to 534,115 and 1,818,976 respectively, in the same 1957 periods.

Tv retail set sales totaled 416,756 in March and 1,446,969 in the first quarter of 1958 compared to 534,115 and 1,682,911 in the comparable 1957 periods.

RAB Executives Urge Greater Station Action

Two Radio Advertising Bureau executives last week called for the expression of greater personal interest in (a) radio advertising and (b) combating the recession. The remarks were made 1,000 miles apart, with RAB President Kevin B. Sweeney addressing the sst meeting of the Ad-Vertising Conference of U. of Notre Dame at South Bend, Ind., and RAB Vice President-General Manager John F. (Jack) Hardesty talking to the Advertising Club of New York in Manhattan.

Mr. Hardesty, in a National Radio Month address to the advertising course alumni, called for a grass-roots campaign in station operation. He maintained that "creators of radio commercials aren't spending enough time listening to what their competition is doing," while "timebuyers, in most instances, aren't oriented on the mechanics of station operation."

He felt that if the creators and placers of radio commercials would only "be exposed to even a limited one-week indoctrination in local radio stations," advertisers would benefit from "increased effectiveness" of the commercial itself and its position.

"Too often," he went on, "advertisers have a great commercial going. To the wrong audience because of poor timebuying or a smart timebuy with a weak sales message." He did not propose "copying" commercials; "to the contrary, I'm saying do more radio listening so that you can be more creative than others—to avoid the pitfalls of such a commercial idea or approach that someone else has simply because you 'haven't heard it.'"

Mr. Sweeney, in South Bend, took "personal responsibility" for the current recession. He apologized for not doing as much buying as he should, but "no one has asked me." Mr. Sweeney said that the $3 billion in savings that can't be unlocked by advertising alone. Not by $10 billion worth of advertising or $20 billion worth —unless this advertising is accompanied by personal salesmanship. A lot of people are buying simply because no one has asked them to buy.

Only radio, he felt, could do the job of "asking." The RAB head described the current market as "an everyone market—everyone can buy." But the market also is "one of exploding selling costs—an advertiser must spend 10% a year more for sales and advertising, just to stand still. And there's a market where advertising's effectiveness is reduced because there's so much of it."

Radio's costs are decreasing as its audience—especially in the rapidly-growing suburbs—is on the increase; its voice is "trusted" and it reaches "everyone."

Last week Mr. Sweeney also spoke at the Phoenix Ad Club Club, where he addressed the Ad Club of Peoria, Ill., and the Fifth District Conference of the Advertising Federation of America in Mansfield, Ohio.

Henry Watt May 31/2 programs, KOA over WATTS your 1958 they understand 33-

Don't underestimate the capabilities of the tv viewer. He not only can tune in the best picture obtainable, but he knows when he's getting a poor picture.

That was the sentiment expressed by William L. Hughes, Iowa State College, Ames, Iowa, in a paper presented at the meeting of the American Institute of Electrical Engineering and Institute of Radio Engineers in Washington, D. C.

Mr. Hughes is chairman of a committee of Panel Three of the Television Allocations Study Organization. Panel Three is charged with correlating field strength and picture quality for uhf and vhf tv service throughout the country.

Mr. Hughes had nothing but praise for the average tv set owner.

"The ability of the receiver owner to get optimum performance from his receiver was much higher than most of the survey participants expected," Mr. Hughes said. There were exceptions, he added, but in three-fourths of the cases the engineers agreed they couldn't have done a better job. This ability to fine-tune a tv receiver, the Iowa State professor explained, increased with distance from the transmitter and seemed equally true for uhf as well as vhf signals.

And, Mr. Hughes continued, the householders' rating of picture quality was seldom significantly different from that of the engineer, accustomed to watching a high quality monitor in the studio.

"A householder may watch a lousy picture," Mr. Hughes declared, "because it is all that is obtainable, but never think for a moment that he or she is not aware of the fact that the picture is lousy."

Based on initial studies of field surveys made for TASO by the Assn. of Maximum Service Telecasters, CBS and the FCC, Mr. Hughes said that these "interesting" observations may be made:

- Multipath problems in both uhf and vhf "are not as serious as one might think." Viewers living in areas subject to multipath problems apparently go to great lengths to get good pictures.
- The quality of antenna installations varies from town to town rather than from house to house. Degradation of receivers for age was felt to be more important in picture quality than aging of antennas.
- In areas of adequate signal strength, rough terrain causes less difficulty than was expected. This is probably due to the fact that servicemen in such locations learn to probe for optimum signal. There is more variability in uhf than in vhf in these circumstances.
- Seasonal variations in both uhf and vhf picture quality do occur, but they are not unduly severe.
- Effects of weather conditions cause greater variations in picture quality than seasonal variations. This was true of both uhf and vhf.
- The competence of servicemen varies from community to community and from area to area in a single community. "There were disturbing cases where serviceman incompetence was obviously costing the householder unnecessarily." More variation was noted, however, in receiver performance due to misalignment and related problems than in improper antenna installations.

Mr. Hughes explained that during the field strength surveys—in Albany-Schenectady-Troy, N. Y.; Baton Rouge, La.; Madison, Wis.; Fresno and Bakersfield, Calif.; Columbia, S. C., and the Connecticut River Valley in New England—two engineers, each representing a vhf and a uhf station, visited homeowners to check picture quality and correlate their findings with the tv set owner's analysis.

"It was never necessary to restrain a man from boosting his own station," Mr. Hughes said, "but on occasion it was necessary to insist that each man make his rating as objectively as possible and not lean over backwards in favor of the other station."

Mr. Hughes also described a November 1957 survey made by Iowa State on variations in picture-to-sound power on Des Moines vhf television outlets.

The communications panel also heard P. F. Crabbil Jr., Chesapeake & Potomac Telephone Co., on tv coverage of the Presidential Inauguration and Harry Fine, FCC, on the TASO field strength measurement and analysis program. Members also visited the new WRC-TV Washington transmitter and studio facilities. Cyril M. Braun, Joint Counsel on Educational Tv, was moderator.

NAB Unveils 'Learn and Live'; Material Ready for Station Use

NAB's "Learn—and Live" campaign, designed to stimulate greater development and use of the "national brain power" in the space age—was unveiled to the NAB convention April 30.

It is based on radio and tv spot announcements aimed at encouraging the quest for knowledge at all age and social levels. NAB will distribute basic materials and also provide literature and other data for use by stations in developing local interest and participation.

John Outler, retired general manager of WSB-TV Atlanta, stressed the importance of the campaign to make "more and better use of our national brain power." Donald N. Martin, assistant to the NAB president, told how the campaign will work.

President Eisenhower sent a telegram calling the drive a "fine public service." Hundreds of other national business, educational, political and religious leaders also have endorsed the drive, NAB reported.

ARF to Meet Twice in Fall

The Advertising Research Foundation announced that it will hold two meetings this fall, with the fourth annual conference scheduled for the Waldorf-Astoria Hotel in New York on Oct. 2 and the annual subscribers' meeting on Dec. 11 at a location still to be selected. The conference will deal with the broad aspects of "Measuring the Effectiveness of Advertising."
WJZ-TV’s McBee Elected Head Of Chesapeake AP Broadcasters

Keith McBee, news director of WJZ-TV Baltimore, was elected president of the Chesapeake AP Broadcasters Assn. at the group’s annual meeting in Baltimore May 2. He replaces Lou Corbin of WFRB Baltimore. Howard Streeter of WFRB was elected vice president.

Area stations cited for consistently sharing news were WJZ-TV, WFRB, WBAL and WCAO, all Baltimore; WWDC Washington; WGAY Silver Spring, Md.; WBOC Salisbury, Md.; WCEM Cambridge, Md.; WASA Havre de Grace, Md.; WFMF Frederick, Md., and WJWI Georgetown, Del.

Howard T. Orville, who headed the President’s Advisory Committee on Weather Control, addressed the Chesapeake AP Broadcasters luncheon on peacetime uses of earth satellites. A conference panel featured Glenn Leonard, WCEM; Bud Bowers, WGAY; John Lewis, WBAL; David Von Sothen, WRC Washington, and Joe Phipps, WWDC.

The Chesapeake group includes more than 30 stations in Maryland, Washington, D.C., and nearby Virginia, West Virginia and Delaware.

Conn. Broadcasters Meet May 23

The Connecticut Broadcasters Assn. annual meeting will be held Friday, May 23, at the Waverly Inn, Cheshire, Conn., with Rep. Oren Harris (D-Ark.), chairman of the House Commerce Legislative Oversight Subcommittee, as featured speaker. An earlier story incorrectly gave the meeting date as May 3. Sig Mickelson, CBS-TV vice president in charge of news and public affairs, and Robert M. Gray, manager of the advertising and sales promotion division of Esso Standard Oil Co., also will speak. CBA President Charles Bell, manager of WHAY New Britain, will preside.

Fm Listening Survey Discussed

Plans for an all-industry survey of Fm listening in Southern California were discussed at a recent meeting of the organization committee of the Fm Broadcasters Assn. of Southern California. The group, which has received its charter from the state of California as a non-profit corporation, also discussed by-laws, which will be prepared by Saul Levine, counsel for the group, for submission to the full membership.

RAB Releases Co-Op Data

Data on 100 co-op plans, supplied regularly by Radio Advertising Bureau to keep members informed on precisely what co-op ad money is available to local retailers, have been released by RAB. “About half of all co-op advertising funds go unspent, RAB President Kevin B. Sweeney said, “simply because retailers don’t know the money is available to them.” Co-op plans offered by manufacturers in the following categories are supplied in the new 100-plan release: apparel, appliances, automotive, drugs and toiletries, grocery, heat-light-plumbing, home furnishings, paint-hardware-building and radio-tv-phonographs.

NEMS • CLARKE Type TRC-1
TV Color Rebroadcast Receiver

The Nems-Clarke Type TRC-1 Color Rebroadcast Receiver has been designed specifically to meet the requirements for a high-quality receiver for use in direct pickup and rebroadcast of black and white and color signals. It embodies features which give the reliability necessary for full-time commercial use and provides signals of exceptional quality.

The mechanical construction of the receiver is the same as that normally used in transmitter input equipment. Bathtub construction provides maximum accessibility to all tubes and controls, the other components being readily accessible on the rear of the chassis.

Three outputs are provided by the receiver—video, audio, and stripped-sync. The video signal is available at the normal level and polarity provided by a network interconnection. The signal provided is exceptionally clean and every effort has been made to minimize impulse noise. The R.F. section of the receiver is a separate crystal-controlled, plug-in unit. Where it is desirable, the station can obtain a separate R.F. unit for each channel to be received. The changeover from one channel to another can be accomplished during a station break with minimum interruption. By providing individual R.F. units for each channel, each R.F. unit can be aligned to give maximum performance for its particular channel without the compromises inevitable in a switching-type device.

The sound channel is separate from the video channel so that in case of failure of the video transmitter the sound is not lost.

EDUCATION

Annual IERT Meet Opens in Columbus

Annual Ohio State U. Institute for Education by Radio-Television opens today (Monday) in Columbus, Ohio. Quincy Howe, ABC news analyst, will discuss "Is There a Future for Public Service Broadcasting in This Country?" in a major address tomorrow (Tuesday) at the Deshler-Hilton Hotel meeting site. His talk will be based on the Bill Costello Report of the Assn. of Radio-Television News Analysts, which he heads as president.

In addition, Mr. Howe will act as moderator of a round-table discussion following his talk. Those taking part in the round-table include George D. Crothers, director of public service programs for CBS; Franklin Dunham, chief, radio and TV, U. S. Office of Education, and E. Arthur Hungerford Jr., director of operations, Metropolitan Educational Television Assn., New York.

Clinics on specialized broadcasting areas are scheduled for the four-day meet and include one tomorrow on adult education broadcasting. This clinic will be presided over by Gregor Ziemen, chairman of the Council of National Organizations of the Adult Education Assn. and public education director, American Foundation for the Blind.

WCET (TV) Schedules Workshops

Non-commercial, educational station WCET (TV) Cincinnati has invited 21 TV stations in a four-state area to send representatives to two workshops on lighting and directing at WCET studios May 17 and May 24. Greg Haney, CBS lighting director, and Alan Beaumont, producer-director of network shows, will conduct the six-hour sessions, answering questions and demonstrating techniques. The workshops are sponsored by the Educational TV & Radio Center, Ann Arbor, Mich.
12 Winners Announced For 1958 Sloan Awards

Twelve radio and television stations and advertisers were presented Alfred P. Sloan Awards, for public service in the highway safety field, at the tenth annual award dinner, in the Waldorf-Astoria, New York, last Tuesday. Bronze plaques, presented by Mr. Sloan, president of the Alfred P. Sloan Foundation and former chairman of General Motors Corp., were given to:

Sloan Award winners were among recipients of National Safety Council 1957 public interest awards presented last month [AWARDS, April 14]. All winners of NSC awards in April immediately became eligible for the Sloan citations.

Ned H. Dearborn, president, National Safety Council, was chairman of the judges for the Sloan awards. Other judges were Kenneth G. Bartlett, vice president and dean of public affairs, Syracuse U.; Frank C. Turner, deputy commissioner and chief engineer, U. S. Bureau of Public Roads; Mrs. Stephen J. Nicholas, executive director, General Federation of Women's Clubs, and William S. Lampe, editorial assistant to the president, Hearst Newspapers.

Harold E. Fellows, president of the NAB, and Walter F. Carey, chairman of the board of directors of the National Safety Council, were speakers, with Mr. Sloan, at the dinner.

Hoefer Announces Opening Of Western Ad Competition

Opening of the 1958 All-Western Advertising Craft Competition has been announced by John Hoefer, president of the Advertising Assn. of the West.

The radio portion of eight separate media sections is sponsored by the radio industry of the West and the Vancouver Advertising and Sales Bureau. Sponsors of the television competition are Television Bureau of Advertising and the Hollywood Advertising Club.

The All-Western awards, now in their 10th year, offer trophies and cash for advertising in the 11 western states, Alaska, Hawaii and British Columbia. Robert E. Mangan, vice president of BBDO, San Francisco, is general chairman. Winning entries will be announced and displayed at the 1958 AAW Convention in Vancouver, B. C., June 22-25. Information is available at local advertising clubs or from the AAW, 425 Bush St., San Francisco 8. Deadline is May 30.

They Asked For It...

This kind of rugged training isn't something these young men were forced into. They asked for it—and are paying hard cash for the privilege!

They are Seventh-day Adventist youth, members of the church's Medical Cadet Corps. The corps prepares draft-age Adventist men to move quickly into medical duty when tapped for military service. Approved by the U.S. Army, a course will be held June 3-17 at Grand Ledge, Michigan, near Lansing.

Although listed as "conscientious objectors," Adventist men object only to the bearing of arms. They willingly enter the armed forces when called and believe that as medics they can best serve their country while maintaining religious convictions. Many have won high awards for bravery in this line of duty. Of course, there are also Adventist physicians, nurses, technicians, and chaplains.

The armed forces of many countries provide for the convictions of Adventist men in the bearing of arms and in the observance of the seventh-day as the Christian Sabbath. Occasional misunderstandings arise but these are rare exceptions in a long record of good relationships.

In appreciation for this consideration, Adventist men believe that, as Christians, they are doing no more than their duty in preparing themselves for more competent national service.

That's why you will find them going through their tough courses next month at Grand Ledge.

For a comprehensive statement of Seventh-day Adventists principles of noncombatancy and a record of the church's national service program, military and civilian, write:

National, State Awards Made
At Oklahoma AP Radio Meeting

Two Oklahoma stations took national awards at the annual meeting of the Oklahoma AP Radio Broadcasters Assn. last month at Western Hills Lodge in Sequoyah State Park. State awards and election of officers were main items on the agenda.

KAKC Tulsa (Bud Curry, news director) was singled out as the top news-contributing station in the nation. KRMG Tulsa (Glen Condon, news director) came in third in the country for total stories supplied the AP in 1957.

Jim Naughton, former news director of KCCO Lawton, accepted the plaque for best state news contributor from a small market station. Mr. Naughton now is an AP staff member in Tulsa. WKY Oklahoma City (Bob Gamble, news director) took the plaque for outstanding coverage of the Oklahoma blizzard in the spring of 1957. Wilbur Martin, Oklahoma AP bureau chief, made the awards.

Ben DeKinder of KWCO Chickasha was elected president of the association, succeeding Mr. Gamble of WKY. Jack Morris, news director of KTUL-TV Tulsa, was named vice president.

OPC Gives Broadcasting Awards

The Overseas Press Club, New York, at its 19th annual awards dinner gave the top broadcasting award to "Algeria Aflame," a CBS-TV special program, and to CBS Cairo correspondent Frank Kearns and Egyptian cameraman Yousef Masraff. Citations were given ABC's John Daly, CBS's Howard K. Smith and NBC's Chet Huntley for "best radio-tv interpretation of foreign affairs" and to CBS's Daniel K. Schorr and NBC's Welles Hangen for radio-tv reporting from abroad. CBS's David Schoenbrun was given a special award for As France Goes, judged "best book on foreign affairs in 1957."

KMTV (TV), KFAB Top Winners
In Omaha Gold Frame Awards

KMTV (TV) and KFAB, both Omaha, took the top number of honors in competition for this year's Gold Frame awards of the Omaha Area Radio-Television Council, earning respectively five and three show citations. The council, composed of 38 civic organizations and 10 radio and tv stations, annually selects the best shows in nine categories. This year they went to:

- Children's or youth programs—WOW-TV, Teen Topics; KSWI (Council Bluffs, Iowa), Gypsy Caravan. Classical music—KBON, Pops Matinee; KOOO, Sunday Concert Hall. Educational—KMTV, Ty Classroom; WOW, The Nebraska Story. General news—KMTV, All the News; WOW, Four Bell News. Non-classical music—KFAB, The Morning Watch.
- Special programs or series—WOW-TV, This Is Alcohalism; KFAB, KFAB Editorial Voice; WOW, WOW Farm Hour. Sports—KMTV, Omaha Cardinal Baseball. Religious—KMTV, Adventures in Life; KBON, Church in the News. Special commendation—KETV (TV), Satellite Survey; KMTV, Conversations; KFAB, Who's Delinquent?; KOOO, European folk music on Sundays.

The Gold Frame citations were made April 24 at a banquet attended by more than 100. Special guest Al Sorensen, president of the Omaha City Council, discussed "Public Service Contributions of Radio and Television."

Ayers, Vicas Get Hillman Awards

Theodore Ayers, CBS-TV producer, will receive the $500 television award of the annual Sidney Hillman Foundation Awards to be presented in Atlantic City Wednesday. Mr. Ayers will be cited for the network's Face the Nation interview with Premier
Nikita Khrushchev of the Soviet Union, George A. Vicas, producer, CBS Radio, will receive the $500 radio award for his Radio Beat program which featured debates between American and Soviet scientists and educators. Last year no awards were given in radio and television.

L.A. Adwomen Present Lulu Awards

Le Ora Thompson, head of Le Ora Thompson Assoc., Los Angeles, won the first Lulu awards for TV commercials in both black-and-white and color categories, it was announced last Sunday at the awards luncheon of the Assn. of Los Angeles Advertising Women. Actress Shelley Winters presented Miss Thompson with golden Lulu trophies for her video commercials for De Soto (monochromne, used on the Groucho Marx Show) and DuPont (color, used on DuPont Show of the Month). Fran Harris Tuchman, Harris-Tuchman Productions, Los Angeles, won the second award in the black-and-white TV class for her commercial for Sebb shampoo. The annual achievement awards competition (this is the 12th) are conducted in honor of Miss Frances Holmes, who in 1909 opened an advertising agency in Los Angeles, first woman in the nation to have her own agency.

AWARDS SHORTS

Fulton Lewis Jr., MBS commentator, has received annual award from American Jewish League Against Communism, "for his fearless, crusading Americanism."

Manuel Chotzinoff, producer of NBC Opera, has received Page One Award of Newspaper Guild of New York. Program was cited "for its efforts in presenting new works to the American public and offering the finest in established operas in clear English versions." Merit citations were given NBC-TV's Omnibus and David Susskind for "outstanding contributions" to TV industry.

William Dempsey, program manager, KPIX San Francisco, given Westinghouse Broadcasting Co.'s "Lamp of Knowledge" award for his supervision and direction of Decision or Dilemma, This Is San Quentin, and several other special programs.

Howard A. Chinn, chief engineer, CBS-TV New York, named fellow of American Institute of Electrical Engineers "for his contributions to the development of measuring and monitoring equipment in the audio and video broadcasting field." Joseph B. Epperson, vice president in charge of engineering for Scripps-Howard Radio Inc., Cleveland, also named fellow "for achievement in the broadcasting field."

Dale Wolters, assistant chief engineer for WOOD Grand Rapids, Mich., received "Cosmo G. Calkins Award" at annual convention of Michigan Amateur Radio Assn. for his "outstanding achievement in amateur radio" and his communications work with Red Cross and Civil Defense.

Johnny Grant, d.j. at KMPC Los Angeles, has received Medallion Award of Los Angeles area USO Council for his "contribution to the morale and welfare of service- men and women." Mr. Grant has made 11 trips to Orient, two to Europe and Alaska and one to Caribbean, plus nearly 1,000 side trips to camps, hospitals, etc., to entertain military personnel.

Larry Williams, writer-producer, received first Special Recognition Award for best television manuscript from California Tuberculosis & Health Assn. for his production House Call on KPIX-TV San Francisco.

Dorothy Fuller, WBET Brockton, Mass., commended by City Council for "outstanding community service" in resolution introduced by Mayor Wilfred Derosier.

Joe Gamble, chief engineer, WRBL-AM-FM-TV Columbus, Ga., has been named "Outstanding Engineer of 1957" by Columbus chapter of Georgia Engineering Society. Award, known as "Joe Gamble Trophy," was received for "outstanding effort and service to his fellow engineers" and will be presented each year to local engineer.

Dr. Harold S. Black, research engineer, Bell Telephone Labs, awarded 1957 Lamme Gold Medal by American Institute of Electrical Engineers.

WCBS-TV New York, NBC and TV Guide were cited May 1 for best publicity-promotion work during 1957 by American Public Relations Assn. WCBS-TV publicity director Robert A. Fuller won Silver Anvil, highest award, for drumbeating on Sunrise Semester, etv program, with Prof. Floyd Zulli Jr; NBC cited for its letters-to-radio-TV editors by network president Robert W. Barnoff, and Triangle Publications (TV Guide), special citation for promotion work done on behalf of etv in Hagerstown, Md.

WWJ-TV Detroit received "Distinguished Health Service Award" at special Michigan Clinical Institute testimonial luncheon for its live colorcast of heart surgery at Grace Hospital, that city, in 1957.

KWTY (TV) Oklahoma City, Okla., cited by U. S. Marine Corps Commandant for "cooperation and assistance in maintaining and furthering interest in the achievements of the U. S. Marine Corps."

WHIT-TV Huntington-Charleston, W. Va., awarded "Certificate of Merit" by American Heart Assn. for "outstanding service in advancing the heart program and stimulating

Great, Smidley just great!

You've done it again. Ya missed the biggest single TV buy in the West. You passed up the Cascade Television package again... this KIMA-TV with its satellites. AWARDS CONTINUED

NATIONAL Recognition Award for Association Achievement was presented by the U. S. Chamber of Commerce to James D. Secrest (1), executive vice president of Electronic Industries Assn., during the chamber’s recent annual convention. The award was presented by Phillip M. Talbott, chamber president, for EIA’s pioneering in closed-circuit TV as an educational tool. EIA sponsors a Washington County, Md., experimental program involving 23 schools.

public support of the fight against heart disease.”

WQXR New York has announced it will add $500 award to prizes for best chamber music composition submitted in 1957 student composers radio awards conducted annually by Broadcast Music Inc. and BMI Canada Ltd. Winning composition will be broadcast stereophonically this fall by WQXR String Quartet.

WLW (TV) Indianapolis received “Outstanding Service Award” from that city’s United Fund Campaign for its service through The World of One. Program was carried for 13 weeks during and after UF campaign.

American Motors Corp. cited NBC affiliates for their “exceptional ingenuity and resourcefulness in radio advertising” in connection with recent sales campaign on stations and NBC Monitor. Campaign reportedly resulted in 81% increase in sales this year over same period last year.

Academy of Television Arts & Sciences first Governors’ Awards were presented to Desi Arnaz, president, Desilu Productions and Maurice Morton, vice president, McFadden Productions and president of Alliance of Television Film Producers. They received awards, gold medallions, from ATAS West Coast President Harry Ackerman for their “outstanding contribution to the television industry.”

Television Bureau of Advertising has been cited by Lithographers National Assn. for design of its business stationery letterhead. TVB will win one of awards in Eighth Lithographic Awards competition officially announced at LNA's 53rd annual convention, April 28-May 1, in Phoenix, Ariz.

INTERNATIONAL

CHANCE FOR U.S. TV IN IRELAND

There may be a chance for American television interests to build or provide capital for a commercial television system in Ireland.

Last week the Irish government invited U. S. telecasters to submit proposals for the establishment of commercial TV in Eire. The invitation implied that proposals for American construction and operation of one or more Irish stations would be considered. The invitation was issued through the Irish embassy in Washington by a special television commission which the Irish government set up last March. It is the commission’s job to recommend to the government the form TV should take in Eire.

Radio in Eire is operated by a state authority not unlike England’s British Broadcasting Corp. and most of its revenue comes from receiver license fees. (Some 20% of Irish radio income is derived from commercial programming allowed only during daytime.) But the Irish government lacks the money to build or run a television system. It has instructed its special television commission to come up with recommendations for a system financed by private funds but operating under the control of a government television authority.

The government also wants to make sure that the programming of whatever system is established will “provide for the use of the Irish language [as well as English] and for the adequate reflection of the national outlook and culture.”

There is now some television reception in parts of Eire from British stations in North Ireland and in England. An embassy official estimated last week that some 20,000 TV sets exist in the Dublin area. According to his calculations a TV station located in Dublin could cover a population of about 1 million.

The embassy official asked that U. S. proposals be submitted to the secretary of the Irish television commission, Hammond Buildings, 11 Upper O’Connell St., Dublin, Eire.

Havana Color Outlet Operating

Havana now has an all-color TV station, operating 20 hours daily using film, including color film newscasts. It is on ch. 12 and atop the new Hilton Hotel. Headed by Gaspar Pumarejo, ch. 12 is identified with the founding of ch. 4 CMUR-TV there in October 1950, Pioneer Cuban monochrome TV outlet. The new color station began March 19, coincident with the Hilton opening, according to Communications Counselors Inc., New York, public relations subsidiary of McCan-Erickson, in a news release in behalf of its clients, the National Plans Board of Cuba.
CARTB Meet Focuses On Regional Networks

Establishment of regional radio and television networks by independent stations is due for discussion at business sessions of the annual meeting of the Canadian Assn. of Radio and Television Broadcasters. A number of resolutions will deal with the network situation. The four-day meeting opened yesterday (Sunday) at the Queen Elizabeth Hotel, Montreal.

Plans call for discussing the necessity of organizing co-operative networks for both radio and television and obtaining government permission to operate such networks. Reasons advanced for such networks include the promotion and development of Canadian talent and the creation of possible profit centers by independent stations so as to shift the burden of cost to the broadcasting industry from the taxpayer, who now pays through government grants to the Canadian Broadcasting Corp.

The business sessions will also deal with the topic of moving to establish an independent regulatory body for telecommunications, especially broadcasting, and the opening of television to independent stations in major Canadian markets now reserved to the CBC. The latter recommendation was made by the recent Royal Commission on Broadcasting. Resolutions up for consideration from regional Canadian association meetings include one from the British Columbia Assn. of Broadcasters on the question of establishing the principle of a fixed percentage rate for the performing rights fees charged to broadcasters by the Canadian Assn. of Publishers, Authors and Composers. At present the rate is 13 1/2% of gross revenue of radio stations, with an increase to 2% now under consideration.

The Western Assn. of Broadcasters has asked the CARTB meeting to appoint a regional representative to attend business conventions to promote broadcasting.

Atlantic Assn. Officers Named

Don Jamieson, general manager of CION-AM-TV St. John's, Nfld., was elected president of the Atlantic Assn. of Broadcasters at the group's annual meeting at Amherst, N.S., April 22. Jack Lewis, manager of CKEN Kentville, N.S., was elected first vice president; Bob Large, manager of CFMc-AM-TV Charlottetown, P.E.I., second vice president, and Tom Tonner, the manager of CKCW-AM-TV Moncton, N.B., secretary-treasurer.

Promotions During Rating Weeks Under Investigation by P&G Ltd.

Procter & Gamble Co. of Canada Ltd., Toronto, has notified the Bureau of Broadcast Measurement, that city, that it will ignore semiannual BBM rating reports for markets in which it is known that individual stations put on special promotions during survey weeks. In a letter to the BBM, J. A. MacDonald, media manager of Procter & Gamble of Canada, stated, "We feel very strongly that stations which actively try to distort audience habits during survey weeks are making a mockery of the only rating service largely owned by the stations themselves. Where we drop a market from our BBM report there is a strong possibility that our radio buying in that market will be reduced."

Investigations now are being made not only by P&G of Canada, but also by other major advertisers and BBM about special promotions put on by stations during the current survey period. Investigations have already shown that some promotions were done in the period in the metropolitan Winnipeg, Man., area, and this is one market which may be affected by the Procter & Gamble of Canada policy.

CBC Seeks Central Headquarters

Canadian Broadcasting Corp. is negotiating with the civic authorities in Montreal for a location in downtown Montreal for a central CBC headquarters to provide some 1,300,000 square feet of floor space. CBC now occupies the old 12-story Ford Hotel on Dorchester St., opened about 1950, and at that time considered large enough for CBC's radio and tv activities in Montreal. Now CBC has space at various locations in the city and plans to consolidate all into one building for local radio and television broadcasting, French-language networks, and engineering division for the entire system. If a site can be arranged it is expected construction of the multi-million dollar structure can start next year and will take about five years.

In the Syracuse Market

WSYR's COVERAGE EQUALS THAT OF 3 MAJOR COMPETITORS*

The amazing coverage superiority of WSYR is illustrated by these facts:

- It reaches 80% more homes than the No. 2 station in Syracuse.
- It's weekly circulation is as great as that of stations 2, 3 and 4 combined!

That's probably because WSYR attracts the adult, able-to-buy audience by high quality programming in all major areas of entertainment and public service.

Edward F. Taylor Jr., formerly electronics and appliance sales manager for Charles L. Martin Distributing Co., Atlanta, to Sylvania Home Electronics as south central district sales manager.

James A. Elliott, formerly with Collins Radio Co., Cedar Rapids, Iowa, joins Rixon Electronics, Silver Spring, Md., as engineer in charge of quality control.

Edmund Fredric Giguere, 44, electronics consultant for RCA, died May 4 in his home in New York. Earlier he had held executive post with IT&T.

**PROFESSIONAL SERVICES**

Ray Yocom, former director of advertising, McQuade Assoc., N. Y., marketing organization, to S. Jay Reiner Co., Mineola, N. Y., merchandising-contest consultant for radio-tv and other media, as director of station relations.

Kenneth W. Klise (Col., U.S.A.F., retired), who has spent 23 years in planning, implementation and administration of communication and navigational-aid systems, has joined Page Communications Engineers, Washington, as project manager.

E. Tillman Stirling, assistant U. S. attorney for D. C., joins Washington law firm of Welch, Mott & Morgan. Mr. Stirling joined Office of U. S. Attorney in 1955 and had been assigned to appellate division until January of this year when he began handling special proceedings. Before joining U. S. Attorney's office, he served as law clerk for Judge Wilbur K. Miller of U. S. Court of Appeals for D. C. for one year. He received his B. S. and law degree from George Washington U. in 1951 and 1953 and was admitted to D. C. Bar in 1954.

Eugene S. Cowen, formerly public relations man with member of Congress and federal government, joins Standard Public Relations, Washington. For past 18 months he has been information specialist with Office of Secretary of Dept. of Health, Education and Welfare and with Federal Flood Indemnity Administration.

**PROGRAM SERVICES**

Walter B. Orwell, midwest sales manager of Columbia records custom division, to United Film & Recording Studios, Chicago, as sales manager of its recording division.

Richard N. Robbins, associated with enterainer Roy Hamilton for past 4½ years, joins Community Club Services Inc. as publicity and promotion director. Mr. Robbins will continue as public relations director for Mr. Hamilton in addition to his new job.

**INTERNATIONAL**

J. Everett Palmer, general sales manager of Canadian TPA Films Ltd., Toronto, and former radio-tv director of McCann-Erickson Canada Ltd., that city, to broadcast manager of Breithaupt, Milsom Ltd., Toronto advertising agency.

W. Bruce Butler, formerly general manager of Jos. A. Hardy & Co. Ltd., Toronto and Montreal, has resigned to form his own station representative company, Bruce Butler & Assoc. Ltd., Toronto and Montreal. Joining Mr. Butler as associates are H. E. Pepler and A. E. Stewart, both well-known in Canadian station representative field. Temporary offices have been established at 82 Royal York Rd. North, Toronto.

Bob Kinsman to sales manager of CHEX-TV Peterborough, replacing Jim Gibson, who moved to similar post at CKWS-TV Kingston, Ont.

Jack Turrell, for past 10 years sales manager of CKEY Toronto, to general manager of CKOY Ottawa, Ont. Jim Armstrong formerly of Liberty magazine, Toronto, to sales manager of CKEY.

Allan Slaight, promotion manager of CHED Edmonton, Alta., to promotion and production manager of CHUM Toronto.

Dave Devall, part-time announcer of CFRB Toronto, to announcer of CHEX-TV Peterborough, Ont.

Bob Laine, announcer of CFNS Simcoe, Ont., to announcing staff of CHUM Toronto.
Barbasol Holds Bowling Night

The Barbasol Co. (toiletries), Indianapolis, sponsor of CBS Radio's Sports Time with Phil Rizzuto (Mon.-Sat. 7-7:05 p.m.) is promoting a “Barbasol Night” at a Clifton, N. J., bowling alley next Thursday (6-9 p.m.). The promotion is for New Jersey food and drug chain executives and personnel and will feature bowling matches between newspapermen and ballplayers. Erwin Wasey, Rathrauff & Ryan, New York Barbasol agency, helped plan the evening.

KGO Covers Commuters in 'Copter

High-flying traffic coverage was inaugurated last Monday at KGO San Francisco when newscaster Bob Day began reporting from a KGO helicopter hovering over commuter routes at 6:15-9 a.m. and 3:30-5:45 p.m. each weekday. KGO commuter-copter traffic reporting was launched after a similar operation at KABC Los Angeles (both ABC-owned stations) had proved successful [PROGRAMS & PROMOTIONS, March 31]. The idea was conceived by John Pace, general manager of KABC and managing director of KGO.

ABC-TV Tells Merits of ‘Mickey’

ABC-TV currently is issuing a brochure to advertisers on the merits of The Mickey Mouse Club, as told by "satisfied advertisers" Mattel Inc., California toy manufacturer. The firm has renewed its contract for the forthcoming season. Reproduced in the brochure is an ad which appeared in the New York Times last March, telling of Mattel's success since becoming a full-time MMC advertiser. Carson Roberts Inc., Los Angeles, is the agency.

H-R Tv Issues Summer Tv Facts

H-R Television Inc., station representative, New York, has released a brochure promoting summertime television. Among the facts enclosed in the 24-page color booklet is that “retail sales during the summer quarter are conspicuously higher than the average for the other three quarters!” Retail sales in August are higher than for any month except December, and food sales are at their year's peak during this summer month!

“This summer, average daily television viewing will top 10 million home-hours,” the brochure points out, “outstripping the peak winter viewership of a scant two years ago—the October 1955-June 1956 season.”

Another section emphasizes that “during an average week in the summer of 1958, a mere 2.0% of American tv families will be away from home on vacation—only 870,000 families in the entire United States.” Other pages illustrate the fact that “four of the top ten tv advertisers, as well as 18 other blue chip giants, spend more in the summer quarter than they do in the first or second.”

NEA Department Given History

The Minnesota Mining & Manufacturing Co., St. Paul, last month presented a history of magnetic recording to the Dept. of Audio Visual Instruction of the National Education Assn. The occasion was the association's national meeting in Minneapolis April 21-25, reportedly attended by more than 1,500 educators. The history, prepared by MMM, deals with the "development of magnetic recording from the turn of the century . . . into the present era."

BAB Issues Canadian Tv Facts

A set of colored cards, similar in size to Canadian standard rate book cards for radio-tv stations, outlining the basic facts of Canadian television, has been distributed by the Broadcast Advertising Bureau, Toronto, Ont. The cards include such information as 84% of Canadian homes now have television, 78% of all homes watch television an average of five hours a day during the week, and give breakdowns on the amount of tv viewing by hours of the day.

No Triple-Spots, Vows WCKT (TV)

The practice of triple-spotting, to which at least one network and many agencies are opposed [ADVERTISERS & AGENCIES, March 17, et seq.], comes under fire in a full page ad placed in leading trade publications by WCKT (TV) Miami, Fla. The spread, timed to coincide with the NAB convention, comprises an open letter from Niles Trammell, president of Biscayne Tv Corp. In the letter he remarks that triple-spotting is not “good advertising” and that "WCKY never did . . . does not triple-spot. . . ."

Chamber Meet Tapes Available

During the Chamber of Commerce’s 46th annual meeting in Washington a fortnight ago, its Audio-Visual Services Dept. recorded all the principal addresses. Tapes of the speeches are available at $6 each from the A-V Services Dept., 1615 H St., N.W. Washington 6, D.C.

‘Hostess’ Film Offered Free

Association Films Inc., New York, distributor of a 28-minute color film “How to Be a Successful Hostess,” sent embossed “invitations” to tv stations last week inviting them to present the film produced by Reed & Barton silversmiths. Reply cards and stamped envelopes were included. The film is available on a free-loan basis.

Pirates First on KDKA's VTR

The arrival of the Pittsburgh Pirates at their hometown airport gave KDKA-TV there the opportunity to initiate its new Ampex VR-1000 videotape recorder. KDKA-TV's cameras were at the airport when the ball team disembarked as were a high school band and thousands of fans complete with banners. The station's recording of the welcome was telecast at 11:15 that evening.
WBZ Performers Take to Hills

WBZ Boston performers and name stars headlined entertainment the weekend of April 26-27 at Jug End Barn, a resort in the Berkshires (South Egremont, Mass.). From Friday night until Sunday afternoon, Carl DeSuzo, Alan Dary, Bill Marlowe, Norm Prescott, John Bassett and Sports Director Leo Egan broadcast their shows from the mountain resort. They took part in a variety of stunts and helped entertain 300 guests at a WBZ party that provided on-the-spot coverage of the Barn’s 30th birthday celebration.

Baseball-Based Quiz on WTTG (TV)

A team of government employees vs. a team from private industry vie each week for baseball knowledge honors and prizes in WTTG (TV) Washington’s Bat a Thousand (Wed. 9:30-10:30 p.m.). Umpired by radio personality-movie actor Steve Allison, the live quiz game gives contestants the choice of going for a “single,” “double,” “triple” or “home run”—the difficulty of the questions to be asked being determined by the “batter’s” selection. Prizes also are given to viewers who submit the nearest guess of the winning team’s score.

‘WWVA Jamboree’ in 25th Year

The 25th consecutive year of broadcasting ‘WWVA Jamboree’ will be celebrated May 10 by the Wheeling, W. Va., station. The station is taking over the city’s Virginia Theatre on that night for a special broadcast-stage show that will feature many of the 750 hillbilly-western artists who have appeared on Jamboree during its run. A half-hour excerpt of the show will be carried on CBS’ Saturday Night—Country Style as a salute from the network. WWVA estimates that more than two million people, from every part of America, have traveled to Wheeling to see Jamboree.

Auto Races to Originate at WJMX

Broadcasts of the annual late model stock car races at Darlington, S. C., May 10 (the state’s Confederate Memorial Day) and Sept. 1 (Labor Day) will originate at WJMX Florence, S. C. Both meetings reportedly will be carried by about 70 stations in nine states.

Hat-Trick for WAGA-TV’s Scotty

The Scotty dog that appears on WAGA-TV Atlanta’s station breaks now has a hat for every season. WAGA-TV reports that when the weather and its trademark headgear changes, the dog is sent fan mail and that advertisers are requesting merchandising tie-ins with its popular emblem.

Smooth Tom Collins Keeps Vow

Tom (The Beard) Collins, disc jockey at WKBZ Muskegon, Mich., made a vow to his listeners in 1956 that he would never play an Elvis Presley disc on his show. He furthermore announced that he would grow a beard and keep it until Mr. Presley’s sideburns came off. With the hillibilly star in the army and undoubtedly shorn, The Beard was asked if he intended to keep his word and shave. . . . A Muskegon d.j. now faces the world—sans beard and nickname—but with his promise kept.

CNP Adds Bingo-Type Games

New game entries with TV program identity have been licensed by California National Productions in its merchandising activity. They are “Auto-Bingo” and “License-Bingo” which can be played in automobiles, buses and trains, and identified with NBC-TV’s Wide Wide World. The games make use of numbers from license plates, signs and billboards.

School Board Gets Record Gift

Mid-Continent Broadcasting Co.’s donation of the facilities of WTIX New Orleans to the Orleans Parish school board [Education, Feb. 10] was supplemented April 28 when Columbia Records presented the school board with more than 600 LP classical and semi-classical records. The presentation of the discs, to be used in the operation of New Orleans Public School’s WNPS, was made by Mitch Miller of Columbia Records.

WAND Programming in ‘Depth’

Talk between records played on WAND Canton, Ohio, is “carefully controlled by the management . . .” in its new Depth Programming.” While maintaining a music-news format, WAND gives disc jockeys just 60-seconds (apart from commercials) and something constructive to talk about. Each half-hour the theme changes; e.g., from household tips to hints on “how to raise a happy husband.” Depth Programming, WAND says, gives radio an opportunity to cover features much as a magazine or newspaper does, while still retaining the same music content.

NOBLESSE OBLIGE

KFWB Los Angeles has taken public notice of opposition programming. As KLAC Los Angeles began a new schedule of music and service minus disc jockeys [STATIONS, April 14], KFWB newscasts reported the change “across the way.” Listeners were reminded that on Jan. 2 KFWB had introduced “color radio” and would continue to emphasize “personalities plus vital, exciting sounds.” The Los Angeles listener “is the beneficiary of the results of the most competitive, vital radio in America,” said KFWB as it wished KLAC “good luck and all speed forward” in its new programming.
Campanella Contest on KMPC

Tieing in with the inauguration of big league baseball in Los Angeles, KMPC there conducted a contest for a "stand-in" for Roy Campanella, injured Dodger catcher. Boys aged 8 to 12 were invited to write 25 words or less giving the reasons "Why I would like to be Roy Campanella's stand-in opening day." Between 1,500 and 2,000 letters were received during the contest week.

KWKW Airs Dodgers in Spanish

American Tobacco Co. and Pabst Brewing Co., co-sponsors of broadcasts of all 1958 games of the Los Angeles Dodgers over a special Dodgers hookup of nine radio stations in Southern California and Nevada, have added Spanish language to 90 games on KWKW Pasadena. The station is programmed exclusively for the 600,000 Latin Americans living in the Greater Los Angeles area. Young & Rubicam, Los Angeles, is agency for Pabst; BBDO, N. Y., handles American Tobacco.

Criminals’ Problems on WQED (TV)

To highlight the social problems created by law-breaking, WQED (TV) Pittsburgh (non-commercial educational) April 14 presented Crime and the Man (10-11 P.M. EST). The program featured opinions of experts who were attending the Pennsylvania & Middle Atlantic Probation & Parole & Corrections Assn.'s annual conference in Pittsburgh. Among the questions asked the attending probation and parole officers and criminal court judges were "what happens to a young man who has become an offender in the eyes of the law and how great is the need for better services to rehabilitate him?"

WJOT LURE SETS

Sports Director Hap Palmer of WJOT Lake City, S. C., lost when he dared the world to catch a bigger fish than he could. But he did get a rise out of the Russians and from a thousand people who came to the First Annual Hap Palmer Fishing Derby sponsored by WJOT last month. The boast also gained WJOT a string of publicity, counted at about 175,000 words written about the big day of fishing plus wire service and film coverage.

Fishermen from 3 to 75 rose to the bait offered by Mr. Palmer’s bold challenge. The Russians accepted but backed out the day before, WJOT reported with some disappointment but enthusiasm still undampened. On hand to present the winning fisherman, P. W. Locklair of Olanta, S. C., with his trophy and cash award was Lt. Gov. Ernest F. Hollings of South Carolina and Annette Fagen, queen of the WJOT event. Sports Director Palmer caught one small fish.

OFF FISH DERBY

WJOT’s fishing derby drew Dick Taylor (c), sports director of WBTW-TV Florence, S. C., out of a sick bed to report the event for his tv audience. He is interviewed by Ray Starr (l), general manager of WJOT, and Hap Palmer (r), WJOT sports director.

KMOX Starts W. C. Handy Fund

A drive to raise funds for a “living memorial” to the late blues composer W. C. Handy is underway on KMOX St. Louis with the cooperation of city's Variety Club. The fund will provide free eye glasses to the city’s needy children. Eighteen of the station’s personalities are supporting the round-the-clock campaign with on-air announcements.

Children's Safety CHUM

CHUM Toronto, Ont., has started a new children’s traffic safety program. Each week a CHUM reporter and two police officers of the Toronto Traffic Safety Council visit a different public school where the children record messages to motorists for airing as public service spots.

WBAI (FM) Airs From Home Show

During the course of an eight-day International Home Show at the New York Coliseum, WBAI (FM) New York originated its 4 p.m.-midnight programming from the Coliseum. The station’s booth contained high-fidelity broadcasting equipment with personnel on hand explaining fm operations. WBAI broadcast announcements of important events taking place during the show, in which high fidelity manufacturers and allied industries took part for the first time.

WINS Holiday for Dog Tired

WINS New York offered a Miami Beach vacation to a "harried city hound or pooped pooch" and his master. Anybody with a dog who could use a vacation was invited to enter the contest which was judged by a board of dog experts last Saturday morning at the station.

New CBS-TV Western Next Fall

A new hour-long western will premiere on CBS-TV next season. Titled Rawhide, it will be produced by Charles Marquis Warren, creator of "Emmy"-winning Gunsmoke series. Scheduled for Mondays, 7:30-8:30 p.m., Rawhide will be directed by a number of Mr. Warren's colleagues on Gunsmoke and on CBS-TV's other "adult western," Have Gun Will Travel: Ted Post, Richard Whorf, Other noteworthy directors assigned to the series include David Swift and William Russell. Topic of Rawhide will be the cattle drives from Texas to Chicago which, according to CBS-TV Programming Executive Vice President Hubbell Robinson Jr., "will [open up] tremendous new vistas by the source material . . . from one of the most exciting and dramatic periods of the West."

Cubs Fans Get WGN Package Deal

WGN-AM-TV Chicago are offering baseball fans special weekend package tours in a deal worked out with Happiness Tours. The package, effective throughout the baseball season, includes accommodations at a top Chicago hotel, Gray Line tour of the city, and reserved seat for a Saturday and/or Sunday Cubs game at Wrigley Field. WGN Inc. has a new six-year pact for Cubs radio baseball rights but is promoting the package on both stations. WGN-TV televisions all Cubs and White Sox daytime home contests.

WMBR-TV Gets Game—Just

A ruling that rights to telecast the first major league exhibition game in the Jacksonville, Fla., area would be granted if the game was a sell-out prompted WMBR-AM-TV there to carry saturation spot campaigns promoting the event. For a week preceding the game the stations exhorted listeners-viewers to "get out to the park." One minute before the opener started the park was declared full and CBS-TV engineers gave WMBR-TV the go-ahead to carry the game.

WBIR-AM-FM Start Stereo Series

WBIR-AM-FM Knoxville, Tenn., billed "Tennessee's first stereophonic radio broadcast." It was the first of a weekly stereo series from 2-3 p.m. Sundays. Additional binaural shows are being programmed 9-midnight Sunday and 2-4 p.m. Saturday. Before the initial show the stations held a closed-circuit stereophonic preview for radio and electronic parts distributors and dealers. Handling the preview were John P. Hart, general manager of WBIR-AM-FM-TV, and Leon Ridings, commercial manager of WBIR-AM-FM.

Hauzer to Visit Russia for MBS

It could be borscht or caviar or maybe vodka. Anyway, Gaylord Hauzer, MBS' nutrition expert, plans to visit Soviet Union in late May and interview Russians on their everyday diet. He will tape-record these interviews and air his findings on his weekday morning broadcasts.

Believable as the re-awakening of nature, a child's wonder, a mother's love. That is WWJ-TV in Detroit. Eleven years of superior television service to southeastern Michigan—strict adherence to the public interest—have given WWJ-TV such dominant stature that every advertiser enjoys a priceless advantage, every product a cordial acceptance that quickly leads to sales.
Don’t lose your commercial message in a maze of elaborate production

There is evidence that TV advertisers, in this economy-conscious year, will spend more money on their commercials. Why? Because they've found it's the commercial that makes their advertising investment pay off.

So far so good. But where is the extra money going? Judging by some, it's going into more elaborate production. I question that that's where it ought to be going.

Certainly, the TV commercial must be created with the reluctant consumer in mind. But does it follow that this must then be the age of the elaborate production, the commercial spectacular? That seems to be the general idea—and I say, watch it. You just could be frightened into creating commercials so stupendous they'll go out of space without ever making contact with the coveted consumer. Some will make a big noise and not even get into orbit.

When an unstupendous fellow like Lawrence Welk can rate a TV commercial that makes their advertisers shudder with fear, why can't rate a terrific listenerhip, when an easy-going guy like Como can keep packing 'em in, when the honest westerner and the father-who-knows-best can continue to corral viewers, I wonder if there isn't some hidden power in simplicity.

Isn't there a danger, in this tighter economy, of trying so frantically to achieve the terrific that we lose sight of the target? Isn't there a danger of getting so panicstricken that we forget the two basic ingredients that give a TV commercial its power to persuade? The two ingredients to which I refer are (1) The Big Promise and (2) The Common Touch.

The Big Promise—the basic selling proposition—is the core of your commercial. Maybe it's something tangible that you can demonstrate dramatically. Right now, in one TV commercial, a watch is being battered about in a mixer and slushed around in a tank of water to demonstrate how shock-proof and water-proof it is. It's dramatic. And believable. But what I miss is the connecting link—the things that happen in a consumer's life to make such a watch wanted.

Sometimes the Big Promise isn't so tangible. Sometimes you must demonstrate with feeling rather than fact. The current Zest commercials are good examples. There is no demonstration of product-ingredient. But there is undeniable demonstration of consumer benefit—the Big Promise. What you get out of the Zest commercial isn't fact, but feeling. A promise of something wonderfully refreshing, even though you can't put it into words.

Always, the Big Promise must begin and end with the consumer, with what the consumer wants and why. And how your product can satisfy those wants and why. Too many commercials seem to be more the product of shotgun weddings than planned parenthood because the Big Promise is given with such reluctance.

The Big Promise is the specific benefit. The Common Touch is what transforms the commercial from intruder to friend. For both you need a tremendous amount of human understanding. I've said this before, and I guess I'll never stop saying it: You can know your product from here to hereafter, but you'll never create great commercials until you know your customer at least as well. Advertising's big job is to make contact with hidden desires.

MEETING THE MIDDLE MILLIONS

When you can begin to see your product and its potentials through the eyes of the Middle Millions, when you really understand these people who buy most of the things that most of the people have to sell, you'll find many ways to put the Common Touch into your TV commercials.

One way is with words. Not the crunchy kind you'd feel silly using face to face. But the warm, pungent kind. Words that by their shape and sound and association have meanings for the Middle Millions. Meanings beyond dictionary definitions.

Having the right words, you'll see that they're delivered right, too. By the right person. Not someone with a pretty face and dandy diction, but someone who can project the Common Touch. And that calls for more heart, less hammer, more naturalness, less oration.

And that brings us to the TV commercial family, the people who eat the food, wax the floors, shampoo the hair. Again your casting must be done with the Middle Millions in mind. Select people who can help the viewer get personally involved. Your best consumer should be able to see himself in your commercial—or someone he'd like to be, or like to know. Please, let's have a little less accent on glamour, a little more accent on consumer identification.

That same bit of advice applies to clothes, props, settings and, above all, what happens on the screen. Is it natural? Is it real? Does it touch the consumer's life, if only the reachable day-dream part of it? It should.

Although I've talked about words first, the vital video really comes first. And this isn't a solo job. Writer, art director, producer—all should work together thinking it out, dreaming it out, acting it out, always keeping in mind the exciting tools of the medium—camera angles, lighting that contributes its own special magic, nostalgic sounds, music that gives your words or pictures added emotional values.

Sometimes it's best to shoot film without a script, or at least to shoot the film before you cut the sound track. This is especially desirable when you want to show babies or dogs, because who can predict what memorable things the camera will catch? The audio can always be written to fit. And I suspect, if we had more time and faith, more TV commercials would be produced this way, and would hit new potency.

Amidst all of 1958's commercial spectacles, I predict that the simple, slice-of-life commercial with the Big Promise and the Common Touch will win by more than a whisker.

**Seven-Year Hitch**

The questioning of FCC Comr. Robert T. Bartley by members of the Senate Commerce Committee last Wednesday was gentle enough to suggest that Mr. Bartley's nomination to a second term on the FCC will not be obstructed.

There is no reason that it should be.

In the six years he has served as a commissioner, Mr. Bartley has compiled an enviable record of principled consistency in an agency where principle and consistency sometimes have been subordinated to other considerations. We have not invariably agreed with Mr. Bartley's views. We doubt that we will invariably agree with his future decisions.

But for the good of broadcasting and the people it serves, Mr. Bartley should be promptly confirmed for reappointment to a full, seven-year term. He is a man who can be trusted to vote his conscience even when it conflicts, as it often does, with the votes of an FCC majority.

**Radio and ASCAP**

Radio broadcasters everywhere can take heart from the earnestness displayed by a little band of them, 10 days ago in Los Angeles, they met to organize for the forthcoming ASCAP radio music license negotiations.

The group was small in size, totaling about 100, but it was big in determination to stand up and fight for the best deal radio can get. These were men who remembered—many of them from firsthand experience—the time nearly two decades ago when ASCAP's outlandish demands forced them to go for months without ASCAP music and, in self-defense, to organize their own Broadcast Music Inc.

The terms finally negotiated in settling that unpleasantness are now, after an automatic renewal nine years ago, about to run out. The contracts expire Dec. 31 of this year.

To conduct radio's negotiations for new licenses, the group at Los Angeles authorized the formation of an interim committee, headed by Robert T. Mason of WMRN Marion, Ohio. This will lead into a permanent committee after a ballot in which all radio stations are eligible to vote. The only voting strings attached are that a station must agree to help underwrite the committee's legal, research and other expenses.

Stations can hardly wish to do less. The committee's job is a back-breaking one. To get lower ASCAP rates—and there was no question after the Los Angeles session that a rate cut is what the broadcasters are driving for—will not be easy. As Dwight Martin of WAFB-TV Baton Rouge pointed out to the radio group, on the basis of two protracted negotiations for ASCAP tv licenses, the broadcast contracts are financially the most important ones ASCAP has, and ASCAP consequently will do its utmost to get the best deal it can.

Mr. Martin made another point. If broadcasters give their committee anything less than "unqualified support," the committee's difficulties will be multiplied. Broadcasters should not let this point escape them. They should remember, too, that they are not bound to accept whatever terms the committee finally recommends. They can accept or reject as they wish, and—happily—they can ask the courts to set the fees if that seems the only way to get reasonable terms.

**Propaganda and ASCAP**

The broadcasters who are now preparing to negotiate new radio contracts with ASCAP have an advantage they would have lacked if the negotiations had begun a few months ago.

The advantage is that the ASCAP campaign to discredit if not outlaw BMI, ASCAP's only significant rival in music licensing, has begun to crumble.

For this happy circumstance broadcasters may thank Rep. James Roosevelt (D-Calif.) and Sen. George Smathers (D-Fla.), though for entirely different reasons.
