A. B. JOLLEY...

"...is probably the best known agricultural commentator in the State of Texas"...

...stated Mr. Paul W. Limerick, Western Advertising Agency, in his letter below, for which we are very grateful.

KRLD Radio, the only full-time 50,000 watt station operating in Dallas-Fort Worth, is the radio station of The Dallas Times Herald, owners and operators of KRLD-TV, Channel 4. For full information concerning the JOLLEY FARM NEWS, check with The Branham Company, national representatives.
MAJOR MOVE • There's bound to be heavy opposition to proposal, now secretly before FCC, to shift all television to one contiguous band of 25 channels beginning with present vhf ch. 7 (story page 27). But it's doubted any opposition will come from military. More than year ago it became known that military was interested in ch. 2-6 space for future use in tele-metering and long-range communications [LEAD STORY, April 1, 1957]. If tv were moved out of low-band vhf, government would be happy to move in.

Proposal for new 25-channel television band was submitted in confidence to FCC by Comr. T. A. M. Craven. It's thought that other sources may also suggest that proposed band be widened to take 11 more channels, making total of 36—enough, engineers believe, to create places for time slot of tv stations—all capable of reception on sets that would be no more expensive to make than present vhf-only receivers.

RUSSEL RETIRING? • Frank M. (Scoop) Russell, Washington vice president of NBC since 1929, reportedly is on verge of relinquishing vice presidency. It's believed he will continue to represent NBC and its parent, RCA, as Washington consultant. No successor to Mr. Russell's vice presidency will be named, it's said. Washington activities of NBC are under general supervision of David C. Adams, executive vice president.

Mr. Russell, who will be 63 on June 23, has been more than NBC representative in Washington during his nearly 30 years with company. He also has represented RCA and other subsidiaries. When he changes status from officer to consultant of NBC, he will also resign directorship in NAB, post he has held since 1930. He's had longest continuous term of any NAB director.

NOTHING SPECIAL? • ABC-TV researchers have prepared statistical blast, to be issued soon, at so-called "specials" which dot other tv networks' schedules but not ABC's. Study, based on Nielsen figures, will claim once-a-month continuing specials have average cost-per-thousand far below per-minute cost of $4.39 compared to $3.39 average for all half-hour weekly evening programs and as low as $2.83 for average quiz and audience participation shows and $2.62 for average evening western. Study concludes that "specials" are effective for introducing new product, say, or for celebrating special occasion, but fail short of week-in-week-out programming as regular advertising vehicle.

First authenticated television circulation data in two years, showing county and city breakdowns, will be made available in late June to Advertising Research Foundation members. Figures are being compiled by ARF with aid of latest Census Bureau nationwide sampling plus Nielsen data. Circulation will be based on March 1958 tv homes. NAB members and others affiliated with ARF, including media and advertiser groups, will receive copyrighted data. Publication of figures will not be permitted until Sept. 15.

NETWORK REGULATION • FCC again tomorrow (June 3) goes to Capitol Hill to tell Senate Commerce Committee what it thinks about Bricker bill (S 376) to place networks under direct regulation. Commerce Committee gave FCC $250,000 to conduct network inquiry (Barrow study) three years ago, and FCC hasn't yet completed its work, with important program phase still in investigatory stage.

It's expected FCC, through testimony of Chairman John C. Doerfer, will suggest to committee that it give directives to Commission, after report of status is given committee. View is held that committee might coordinate its network views in final report on overall television investigation which has been under way, off-and-on, for some four years.

FIRST WEEK • FCC Comr. John S. Cross, who took office last Monday, has picked engineering assistant—Bruce S. Longfellow, chief, Technical and Allocations Branch, Broadcast Bureau. He'll probably choose his legal assistant this week.

Cross, who assumed his new office only last Monday, has already set one new mark for nonchalance. He strolled through most of Senate Commerce Committee hearing on tv allocation last Tuesday—his second day on job. And as head table guest at Federal Communications Bar Assn. luncheon same day, he had time left keeping his eyes open during address by his colleague, Comr. Fred W. Ford.

NOW IT CAN BE TOLD • Zenith's late chairman, Comr. Eugene F. McDonald, called his long time adversary, Gen. David Sarnoff, chairman of RCA, after settlement of Zenith's $16 million suit against RCA last September, suggesting they let bygones be bygones. Comr. McDonald said he wanted to call personally on Gen. Sarnoff, and went so the next time he was in New York. He was never able to make the trip.

NBC-TV and CBS-TV expect to hear today (June 2) whether American Tobacco Co., will renew Your Hit Parade on NBC-TV (Sat. 10:30-11 p.m.) or—after eight years on NBC-TV—move show to CBS-TV (Fri. 7:30-8 p.m.). A broadcaster has been looking for earlier time berth. Agency is BBDO, New York.

RENEWAL FORMS • Further consideration is being given to proposed changes in licensee renewal forms [GOVERNMENT, May 19], after broadcaster's committee at May 19 meeting with Budget Bureau and FCC representatives determined that although some revisions were desirable, changes in entirety were unsatisfactory. Last week Commission agreed to withhold further action pending additional discussions. Steering group of broadcasters meets today to organize next step.

At root of broadcaster objection to changes is fact that proposed new form keeps virtually intact all program classifications in original form. Also raising broadcasters' ire (some even threatened to resign from committee if FCC went ahead with plans to issue proposal) is fact that single time is listed for measurement of commercial announcements (and these are most desirable commercial hours) rather than full broadcast day. Commission planned to ask for commercial spot count for 6 a.m.-6 p.m. for radio, 6-11 p.m. for tv.

CASUALTY • One network casualty that can be attributed to recession is expected to be Monsanto's Conquest science series. Ten shows over two-season spread had allocation of $2 million—one-third of Monsanto's total ad budget—and it's earned that advertiser and its agency, Gardner Adv., St. Louis, this week will notify CBS-TV they won't pick up second-year option. Reason: Monsanto, leading supplier of resins for auto body paints and other products used in motor industry, has been hurt by auto market slump, deems corporate advertising as luxury at this time.

CBS Inc. President Frank Stanton and Mrs. Stanton, unostentatiously left for Europe on May 14 to take in Brussels Fair and otherwise work and play. Sched-uled return is about mid-June.

SPOTS OVER KOVACS • Pabst Blue Ribbon beer, Chicago, which had been considering sponsorship of Ernie Kovacs network show, has decided against it and will put good portion of advertising budget in television spots in selective markets. Norman, Craig & Kummel, N. Y., is agency.
Summer, this 1958 finds the big
Radio WOW area a luxuriant Oasis on
the economic maps* of the U.S.A.

Cash from farm marketings hit over
$700 million with Nebraska up 35% and
Iowa up 14%. Cattle's about $25. The
ponds and creeks are loaded, too.

SAC (which annually pumps $30 mil-
lion into Omaha area payrolls and pur-
chases) will spend an extra $25 million
for missile bases.

This'll make 1958 construction total
up to a quarter of a billion.

Sow your ad dollars in the WOW
Radio Omaha Oasis.

Call John Blair now.

*See FORTUNE—April 1958, FORBES—May 15, 1958 and
RAND McNALLY'S Map of Business Trends for May 1958

NEW WOW-LAND "boom" news is the Strategic Air
Command's $25 million world missile bases project.
This'll bring 1958 construction (private and state) to
the quarter-billion mark. All this and good farm, too!

THE WEEK IN BRIEF

Tv Reallocation Studied—FCC considers secret proposal to consolidate all tv into single 25-channel band. Objective: to lick the uhf problem and create chance for vast expansion in number of operating stations. Page 27.

How Do Agencies Price Their Work?—New Study by Assn. of National Advertisers turns up. Among many other things—samples of actual contracts in use by agencies and advertisers. Page 27.

More Productive Advertising.—That's the goal of seven-volume report on three-year, $200,000 study of advertising management, being issued this week by Assn. of National Advertisers. Page 28.

Radio Back in 1960 Census—Federal bureau decides to reverse decision that had deleted radio count. Page 30.

Up and Adams—MacManus, John & Adams' Charles F. Adams blasts conformity and sterility in current ads, blames "motivational mumbo-jumbo" and other research for making creativity "a dirty word." Page 35.

Agencies in the Know?—Two executives from agency row urge advertisers to include their agencies in marketing plans, observe that agencies in the know can perform more effectively in advertising-sales objectives. Page 36.

C-P-M of What?—Media researchers challenged by author Martin (Madison Avenue USA) Mayer to show what they're counting when they cite "cost-per-thousand" statistics; only thing mass consumers have in common, he notes, are "belly-buttons." Page 38.

Sold: Hal Roach Studios—Scranton Corp. purchases all outstanding stock in Hal Roach Studios, the first major producer of feature films which converted to tv film production in 1948. Sales price will be "in excess of $12.5 million." Page 44.

Magnetic Striped Newsfilm—Newly developed film printer of CBS Newsfilm enables "high fidelity" sound track of magnetic striped film to be used in news syndication field. Page 48.

Why They Shoot Film Overseas—One thing, Philip Krasne points out, it isn't to save money. He discusses procedures involved in shooting abroad. Page 54.

The CATV Problem—Telecasters ask that community antenna systems—and translators and boosters—be related to local tv stations; Senate Commerce Committee hears dozen broadcasters and rebuff by catv representatives. Page 56.

Pressure Charges Still Fly—Legislative Oversight hearings continue on St. Louis-Springfield, Ill., decisions. WHDH-TV Boston challenges subcommittee's authority to subpoena its records in investigation of Boston ch. 5 grant. Page 64.

Senate Committee Reopens Old Wounds—Allocations. FCC Chairman Doerfer agrees selective deintermixture has not cured problem, hints that some relaxation of engineering standards may be in order although other commissioners urge pause until TASO report is in. Page 68.

FCC Orders New Miami Ch. 10 Hearing—Acting on remand from Appeals Court, FCC starts machinery for new hearing to decide if its 1957 grant of ch. 10 to National Airlines should be voided because of alleged illegalities and improprieties. Page 72.

Adam's Pulse—Station rep Adam Young hurls statistical missiles at "modern radio" critics, says radio reaches more adults than teenagers and attempts to "set the record straight." Page 77.

Reptrieve for Etv—New York's Metropolitan Educational Television Assn. wins temporary stay as Ford Foundation-supported educational tv-radio center at Ann Arbor comes through with financial transfusion; other sources—all private—also swell META coffers. Page 86.

What Price Attention?—President John G. Petrik of Petrik & Stephenson, Philadelphia, thinks it's too high in many current tv commercials, especially when it's achieved by gimmicks which obscure the sales pitch. See MONDAY MEMO. Page 105.

In Kansas City ... WHB reaches more men & women ... than the next 3 radio stations combined

Sure, WHB is consistently and dominantly first in total audience every hour of the day.* But you want to know about men and women? Great!
Of all the men and women who listen to the top 4 Kansas City radio stations ... 51.7% listen to first place WHB. (Nielsen, Nov.-Dec., audience composition analysis, 6 a.m.-6 p.m. average.)
And every hour of the day more men and women listen to WHB than to any other station.

Talk to a Blair man ... or WHB General Manager George W. Armstrong about WHB's tremendous 96-county coverage plus fantastic audience appeal.

*Whether you're talking about Metro Pulse, Nielsen, Trendex, or Homer ... Area Nielsen or Pulse.

WHB

KANSAS CITY, Missouri
P&G Sinks $13 Million Into NBC-TV Daytime Shows

New and renewal business by Procter & Gamble, Cincinnati, amounting to $13 million in gross billing on NBC-TV daytime schedules, was being announced today (Mon.) by Walter Scott, NBC vice president, television network sales. Orders are effective July 1 for 52 weeks and call for sponsorship of three 15-minute segments per week on Today Is Ours (Mon.-Fri., 3-3:30 p.m.); four quarter-hour periods per week of From These Roots (Mon.-Fri., 12:30-1 p.m.); and renewals on daily quarter-hour portions of Tic Tac Dough (12 noon-12:30 p.m) and Queen for a Day (4-4:30 p.m.) and two 15-minute segments of It Could Be You (Mon.-Fri., 12:30-1 p.m.).

New orders were placed through Benton & Bowles, New York, and renewals through Dancer-Fitzgerald-Sample, New York. P&G business raises to almost $24 million gross billing placed on NBC-TV's daytime programming during May, according to Mr. Scott.

Aid to-ETV Bill Passes Senate

Senate Thursday passed unanimously, by voice vote, and sent to House bill (S 2119) authorizing federal grant of $1 million to each state for educational tv (story page 70). Bill was introduced by Sen. Warren Magnuson (D-Wash.) and received co-sponsorship of Sen. John Bricker (R-Ohio). Proponents of measure predict House approval during current session.

KTNT ANTITRUST SUIT ASKS $15 MILLION OF CBS, KIRO; AFFILIATION SWITCH HIT

Triple damage antitrust suit asking $15 million from CBS and Queen City Broadcasting Co., Seattle (KIRO-AM-FM), filed in federal district court, Tacoma, Wash., Thursday by Tribune Publishing Co., Tacoma (KTNT-AM-TV). Also named defendant was Saul Haas, president and majority stockholder of Queen City.

Suit charges that condition of 1948 KIRO radio affiliation with CBS provided Queen City would have first chance for CBS-TV affiliation in area if it received tv station grant, offering similar first refusal to CBS. KIRO's clear channel facility (710 kc) was described as important element in negotiation.

In 1952, suit charges, CBS asked Queen City to eliminate tv affiliation pledge but latter allegedly refused to release network from its promise. CBS and KTNT-TV signed affiliation pact in 1953, agreement specifying either party could end it on six-months notice. Queen City received tv grant for ch. 7 from FCC July 25, 1957, (lost complaint continues, and on Aug. 7, 1957, network notified KTNT-TV it would end its affiliation Feb. 7, 1958. CBS then affiliated with KIRO-TV effective Feb. 8, 1958, suit continues, charging Queen City made it "condition of continuing to affiliate its radio station KIRO with CBS Radio Network."

Mr. Haas, according to suit, "has participated in and has caused Queen City to do acts described" and is party to conspiracy to restrain trade and attempt to monopolize. Tribune alleges damages amount to $5 million, asking $15 million treble damages. Tying agreement, it is charged, "fenced out" competition for tv affiliation in Tacoma-Seattle area. KTNT-TV contends it has been at disadvantage in sale of time to advertisers and its value as going concern has declined.

Counsel for KTNT-TV are J. H. Gordon of Tacoma and Lloyd N. Cutler of Washington. Mr. Cutler, specialist in antitrust practice, has been counsel to Richard A. Moore, KTIV-TV Los Angeles, in Mr. Moore's presentation of antitrust charges against tv networks before Senate and FCC.

FCC's Opinion on Editorials: Give Other Side Equal Chance

FCC believes editorializing is fine but reasonable fairness requires presentation of other side of controversy same evening or at some time shortly after editorial program. Dicta given in May 28 letter to WAPI, WAFM (FM) and WABT (TV) Birmingham, Ala., which had licenses renewed after being held up on question regarding anti-pay tv editorial program in last January.

Commission's phraseology: "A standard of reasonable fairness would call for the presentation by a proponent of subscription tv during the same evening or at approximately the same time on a week day shortly thereafter."

WABT put on discussion program three days later in morning program, with two station employees taking position of pro-pay tv adherents. Commission's action in renewing license taken as token of attitude toward other stations and networks it had queried following complaint by Sklastron's James M. Landis early this year [GOVERNMENT, Feb. 24]. Commr. Craven dissented to contents of letter to Birmingham stations.

WHOO-AM-FM Sold for $350,000

Sale of WHOO-AM-FM Orlando, Fla., to Donald J. Horton of Lexington, Ky., announced by Ted Estabrook and Red Weiss, owners. Price was $350,000. Paul H. Chapman Co., station broker, handled sale. Mr. Estabrook will remain at WHOO as general manager and Mr. Weiss as sales manager.

BROADCASTING

June 2, 1958 • Page 9
at deadline

JOHNSON BLASTS FCC INACTION ON CATV

Former Senate Commerce Committee chairman Thursday charged FCC with "outrageous" conduct in not taking jurisdiction over community tv systems.

Former Sen. Edwin S. Johnson (D-Colo.), who was until two years ago governor of Colorado, appeared in behalf of broadcasters group importing Senate Commerce Committee to force FCC to exercise authority over CATV operations—and also to limit use of translators and boosters where they adversely affect regular, local tv station operation (story page 56).

Committee completed two days testimony Thursday with completion of broadcasters' side of argument. Community antenna representatives will testify in rebuttal at later date. Committee also plans to ask FCC to return for further examination on allocations (maybe this week).

Sen. Johnson declared tv industry cannot exist "half regulated and half unregulated." CATV operations, if unregulated, will destroy local tv service, he said. FCC has closed its ears to pleas for help by "design or by happenstance," Sen. Johnson declared.

Former Colorado governor—who "authorized" unlicensed boosters in his state in defiance of FCC's ban in 1956—urged on-channel boosters be authorized by FCC. He said translators were too expensive and not reliable enough because they used uhf channels. He cited Comr. T. A. M. Craven's report last year which held that boosters could be considered receiving equipment. He said there are now 32 boosters operating in Colorado (in communities ranging from 15 homes to small cities with 1,500-2,000 population), but that only 14 are "licensed" by state.

Community antenna systems will not go into smaller communities, Sen. Johnson stated, because it is unprofitable. Since they can put local stations out of business, this discriminates against rural viewers who cannot be connected profitably to cable system.

Commission has had knowledge of this situation since 1952, Sen. Johnson recalled, yet has done nothing.

Other witnesses testifying Friday:

Dwight Dahlman, Wyoming Public Service Commission, related experiences of his state group in trying to regulate CATV operators. These are still in litigation.

J. Patrick Beacom, holder of cp for once-on-air WIPB-TV Fairmont, W. Va., told committee how cable company carried his uhf station for two days then deleted it in favor of Pittsburgh's then WDTV (TV).

William L. Putnam, WWLP (TV) Springfield, Mass., appearing for Committee on Competitive Television, denounced FCC and Congress for many years in meeting problems like CATV and uhf-vhf allocations problem, and stated that Television Allocation Systems Organization would come up with technical information already known and which would be of no help to Commission—since it must make "political" decision.

Wallace M. Bradley, Committee for Competitive Television, urged committee to order FCC to move more quickly and completely along selective deintermixture road.

FCC Opens Gates to 1 Kw Bids

FCC Thursday announced it will accept, after July 7, bids for Class IV (local) am stations to increase power up to 1 kw daytime maximum. NARBA agreement, currently pending Senate ratification, removes 250 maximum for Class IV daytime operation for all outlets located more than 62 miles from the Mexican border. No action will be taken on applications until coordination of NARBA agreement can be effected among North American countries.

Also Thursday, Commission invited comments by July 7 on proposal to abandon Class B fm allocation plan which, Commission feels, has outlived its usefulness. Plan first promulgated in December 1945 as temporary guide for allocating Class B fm frequencies.

WOAI-AM-TV Stock Shift Filed

WOAI-AM-TV San Antonio filed with FCC Friday to buy 24% of stock in licensee held by National Jewish Hospital, Denver, for $1,145,000 and retire shares to treasury. This would give Hugh Half Jr., 40% stockholder, control with 52%.

VANDA TO JWT HOLLYWOOD TV POST

Charles Vanda, vice president in charge of television, WCAU-TV Philadelphia, joins J. Walter Thompson Co. in Hollywood as director of tv programming July 15. Mr. Vanda, 23-year veteran in broadcasting, will report to Dan Seymour, vice president and director of radio and tv, JWT (N. Y.). Mr. Vanda headed programming for CBS on West Coast for 14 years, joining WCAU-TV in 1949. Cornwall Jackson heads JWT's Hollywood office.

PEOPLE

CHARLES E. DENNY, 25-year veteran of radio station management, has joined WBNY Buffalo as general manager. He has served in executive capacities with WHO Des Moines, WSYR Syracuse and WREC Erie, Pa. He retired two years ago from WSEE-TV Erie, which he had built and operated.

RAY MILLER JR. elected president of WERE Cleveland, succeeding his father, RAY MILLER SR., who is retiring to devote full time to law practice.

J. DOUCIER, with NBC's sales staff since 1953, appointed to N. Y. account executive staff, John Blair & Co. He fills vacancy left by WILLIAM O., TILENIUS, veteran of more than 25 years in broadcast field.

ALLAN EMIG, formerly with engineering and artists & repertoire staff of Capitol Records, Hollywood, named director of Columbia Records west coast recording department.

BENJAMIN M. SEIGER, formerly director of marketing, Pharmaceuticals Inc., N. Y., to "Journal of Lifetime Living" (pharmaceuticals subsidiary) as executive director.

ROBERT M. FLANIGAN, midwest manager and national sales representative for Storer group and before that with WOV New York, to John E. Pearson Co., Chicago office, as salesman.

Gen. Matejka Leaves ODM Post

Maj. Gen. Jerry V. Matejka (USA ret.) has resigned as assistant for telecommunications to Office of Defense Mobilization Director Gordon Gray. ODM spokesman said Thursday post will remain vacant for undetermined period because of pending reorganization of Defense Dept. and its components. Gen Matejka in 1956 served on four-man board which, at request of FCC, conducted study of spectrum.

Five Ams Granted by FCC

FCC Thursday announced following new am grants:

Elba, Ala.—To Howard Parrish Jr. (general manager, WOZK Ozark, Ala.) for 1350 kc with 1 kw daytime.

Flagstaff, Ariz.—To Eldred O. Smith (33 1/3% owner KHEY El Paso, Tex.) for 1290 kc with 1 kw daytime.

Charlotte, N. C.—To Queen City Broadcasting Co. (T. C. Wood Jr.) for 1310 kc with 1 kw daytime.

Grafton, N. D.—To KGPC Co. for 1340 kc with 250 w.

Bellefonte, Pa.—To Bellefonte Broadcasting Co. (Cary H. Simpson) for 1330 kc with 500 w daytime. Mr. Simpson owns WTRN Tyrone, Pa., and has interests in several other Pennsylvania stations.

Justice Holding Off on UP-INS

Victor Hansen, antitrust chief of Justice Dept., said Thursday Justice plans no action "at present time" on merger of United Press and International News Service (story page 75). In letter to UPI president, Frank H. Bartholomew, Mr. Hansen said Justice concluded consolidation "falls squarely within the failing corporation exemption" of Clayton Antitrust Act.

FIRST VTR PILOT

What is claimed to be first pilot film shown simultaneously on film and video tape and to be offered in either form is being shown to agencies this week by Video Varieties Inc., which plans to syndicate Times Square Varieties to stations either as film or VTR presentation. Pilot was filmed Wednesday in New York by Tele-Studios Inc.
We’ve all heard that one before. Often. But it’s not true.

Fact is, whether we know it or not—or admit it or not—advertising has sold something to every one of us.

And that’s all to the good.

In the first place, a basic function of advertising is to inform. To convey news. News about products. What they are. Where to get them. How much they cost.

Through this function alone, advertising sells great quantities of goods.

Secondly—even people like the little lady above, who make a conscious effort to reject advertising, are made to want the things advertised. Sooner or later, that leads to a sale.

Finally, there is a third and much broader way in which advertising sells us things. It creates so much demand that mass production is possible; hence, more goods are sold to more people for less money.

Yes, it’s all to the good, because it makes the wheels go ’round. Advertising makes possible the high-speed distribution that is the key to our economic system. Without it, capitalism as we know it would be impossible.

So, Madam, think what you will. Meanwhile, you can keep enjoying the things made available because of advertising’s vast contribution to our economic and social system.

And say what you will, Madam. It’s a free country! And that freedom, too, is part of the great tradition of which advertising is a very real part.

Advertising is our business, and we take pride in it. As one of America’s ten largest agencies, we are grateful to play a part, along with our clients, in the dynamic growth of the world’s economy.

BENTON & BOWLES, INC.
666 Fifth Avenue, New York
Advertising and Marketing counsel to leaders in American business
IT'S HOT!

Sure is.
New York's hottest hot-weather buy,
The Late Show.
Right now delivering…

Yeah!
The biggest audiences in its seven-year history.
Average of 723,438 homes tuned-in every night.
Nielsen says so.*

That ain't all.
The Late Show's ratings go up with the temperature.
Last year, its Summer audiences were bigger'n they were other seasons.
They tell me with WCBS-TV's new rate structure you can get greater circulation at less cost than before, and—

I get you. You mean, where else in all advertising can you reach more customers today for less money than it cost you yesterday?

Precisely!

OPEN MIKE

Seconding Silvernail

EDITOR:

Broadcasting is to be congratulated in prevailing upon Frank Silvernail to become its consultant [LETTERS FROM THE EDITORS]. This will certainly make an already good magazine even better.

Frank Kemp
Vice President—Dir. of Media
Compton Adv.
New York City

EDITOR:

I am delighted to know that you have engaged Frank Silvernail as a consultant on Broadcasting. Certainly there is no one better equipped than Frank to give the agency viewpoint in any discussions concerning our industry. Congratulations to you for your foresight and best wishes to you both for a happy association.

Vera Brennan
Broadcast Coordinator
Sullivan, Stauffer Colwell & Bayles
New York City

EDITOR:

Congratulations are in order to both Broadcasting and Frank Silvernail for the marriage recently completed. Believe this will be beneficial to all interested in the broadcasting field because of the long experience of both the publication and Mr. Silvernail.

Frank Coulter
Associate Media Director
Young & Rubicam
New York City

EDITOR:

Your reputation for astuteness was again re-enforced when I learned that Frank Silvernail had joined Broadcasting as a consultant. I commend you for selecting one of the outstanding men of our industry to join your already excellent staff. Few, if any, men in the agency business have contributed more to ethical relations than has Frank. I know that he will make a material contribution for many years to come.

P. A. Sugg
Vice President
NBC New York

Handouts in Program Guise

EDITOR:

Jerome Feniger of Cunningham & Walsh hit a couple of targets, but not all, in his excellent appraisal of radio '58 [ADVERTISERS & AGENCIES, May 19].

He put his finger on over-commercialization, top 40 programming and general lack of imagination.

I wish Mr. Feniger would use his forum once again to examine another factor in recent programming: the money wheels and the bountiful giveaway. This practice of buying audience, and therefore ratings, has not been given enough scrutiny by agencies. I recognize legitimate contests embodying elements of skill and overt response. But plain and simple handouts are a reflection of programming barrenness and ownership wealth. Timebuyers should be on guard.

Sol Ponitz

WQSN Charleston, S. C.

What's Watt?

EDITOR:

What makes Thompson R. Watt, radio-tv editor of the Denver Post such a great expert on the complicated business of local programming [PLAYBACK, May 19]?

If radio stations were to follow the suggestions of Mr. Watt and his ilk, the medium would be right back where it was five years ago when all the same experts predicted it was dead and buried because tv had become a reality. Of course, radio is a "mostly young" advertising medium. Of course, most of the listening to radio is done by people under 45 years of age. Is this damning? This same group happens to buy more of everything than the older people and then the children who spend all their time reading comic books and watching tv.

It is irritating for us to see so much space of your fine publication wasted, crusading for what some of the older broadcasters don't understand and therefore must assume it is a horrible thing that should be stamped out.

How about some constructive suggestions. The stations that too many of these ignorant critics are talking about also happen to be commanding the attention of more radio listeners in the major markets than local programs ever reached before. Would these critics . . . suggest a heavy load of symphony music, polkas, talk shows, or just what? Invariably, these same people have no real interest in radio programming that will get the attention of the masses. They only think that they will run the radio industry and further their own selfish causes by using meaningless cliches.

As always, the people have the final say in what they want. Mr. Watt and others like him can stop worrying about one or two stations playing music. In Denver there are at least 10 more that he can turn to and enjoy.

Evening Reading Habit

EDITOR:

. . . Broadcasting is one of my favorite publications and I read it religiously at home. I think everyone connected with it should feel mighty proud of your news-gathering service. There is a terrific timeliness. Broadcasting is certainly getting the news and reporting it to readers fast.

Edmund L. Cashman
Vice President
Footes, Cone & Belding
Hollywood

Fertilizer dealer, food chain, brewer and apparel shop—all are finding local Radio today's reliable, low cost selling medium. Big city or small, East, South or Midwest—sponsors are most happy with their commercials tailored from the Lang-Worth RADIO HUCKSTERS & AIRLIFTS SERVICE.

KAWL, YORK, NEB.:
JERRY BRYAN REPORTING—
A Lang-Worth Huckster Fertilizer jingle, run as a service spot, was bought off the air by Miller Seed & Supply Co., leading to an increase of their KAWL schedule by 30 spots a week. Campaign so successful it was cited in T-P-D national farm journal.

WPEN, PHILADELPHIA, PA.:
MURRAY ARNOLD REPORTING—
WPEN's imaginative selling and production resulted in a Huckster jingle being the base of giant Penn Fruit Supermarkets' "biggest value ever" promotion. Result: a big spot schedule for WPEN and other stations and "solid success" reported by W. B. Doner agency.

WHLF, SOUTH BOSTON, VA.:
PRESTON YOUNG REPORTING—
Station's efforts resulted in another Huckster jingle becoming the base of a large Company's campaign. Richbrau Beer subsequently increased their schedule on WHLF 50% and expanded the campaign to other markets in the area.

WJLK, ASBURY PARK, N. J.:
JOE MENZZOPANE REPORTING—
WJLK solved Grayson Stores local outlet's clamor for a hard-hitting jingle with the Radio Hucksters service. An innovation: a talented WJLK announcer sings, hums and mixes commercial with the jingle—for that custom-built sound!
We Point with Pride...

British Prime Minister Harold MacMillan, a skilled diplomat of the “old school,” is no Disraeli or Gladstone or Churchill. Quiet, short on witicism and a dispassionate conversationalist, Harold MacMillan as a personality is the Tory’s answer to Labor’s Clement Attlee. Thus, any lengthy interview with Mr. MacMillan is apt to be, for lack of any other description, colorless.

On May 12, Edward R. Murrow joined his colleague, Charles Collingwood (since Howard K. Smith’s reassignment state-side, CBS European bureau chief) at 10 Downing St., the traditional residence of British prime ministers. The half-hour discussion (no doubt culled from much more footage) touched on a goodly number of topics such as open v. secret diplomacy, summity, recognition of communist China, the European common market, West German renaissance and the parallel decline of the British empire.

Messrs. Murrow and Collingwood asked the right questions and Mr. MacMillan fielded them in a good deal of aplomb. There was little news to be had in this chat with the exception of Mr. MacMillan’s revelation that had Britain not been facing the brunt of “Operation Sea-Lion” (which somehow never got out of Hitler’s order of battle room), the A-bomb would have been developed at Harwood instead of in the squash court at the U. of Chicago. “We have a great moral claim to it,” said the British Prime Minister, not without a trace of remorse.

In one basic respect, however, the talk with Mr. MacMillan proved of great benefit. That was in his scorn for the word “problem” as applied to world conflicts. His comments are worth noting here:

“When we were children [‘problem’] meant something to which there was an answer—an algebrical problem . . . you either got it or else you got it off a friend of yours or you looked it up at the end of the book where it said ‘with answers.’ It was a thing capable of a precise solution. Now, we misuse this word ‘problem’ to mean one of the conditions [to which] there are no precise solutions . . . there’s the handling of a situation day-by-day and year-by-year and generation-by-generation until it—if it’s kept in some reasonable control—doesn’t burst into disaster . . . I believe that one of our troubles in the whole of our journalism . . . is the misuse of the word ‘problem.’”

It should be duly noted by tv’s Cassandras . . .

Production costs: $5,000.
Sustaining on CBS-TV Fri. May 23, 7:30-8 p.m.

FRANCE AT THE BRINK

In David Schoenbrun CBS News (and for that matter, radio-tv journalism in general) has a brilliant, astute and profoundly observant reporter on French affairs. A former romance language teacher and OWI propagandist-turned-newman, Mr. Schoenbrun has been pounding the Parisian beat since V-E Day, first as bureau chief of overseas news agency and since 1947, for CBS. In that time he has rubbed shoulders with many of those who make up that singularly confusing cast of characters that is now playing the denouement to the fourth French Republic.

Thus it would seem rather mawkish that 43-year old Dave Schoenbrun a week ago Sunday night felt compelled to whip out his credentials in order to prove to the American viewer that he, indeed, knew what he was talking about. Certainly those who have read his award-winning As France Goes (Harper & Bros., 341 pp.) published last fall needed no reassurance as was offered by his frequent “I know Gen. Salan” or “I have talked to Pierre Pflimlin . . .”

Mr. Schoenbrun was flown in from Paris by CBS to report first-hand on the conspiracy that is tearing France asunder “in the shadow of a man on horseback.” Though it would seem an awesome task within the short span of 25 minutes to analyze the events since May 13, Mr. Schoenbrun made it seem terribly simple.

In his book, Mr. Schoenbrun last year contended that the French people—ultrasensitive to one-man rule as typified throughout their stormy history by the Bourbons, Richelieus, Robespierres and Bonapartes—“have become convinced that they have a vested interest in weak and unstable government.” The special report on CBS indicated that the attitude is more of a vested disinterest and that, ironically, this public lethargy has created a vacuum into which an autocrat could easily step. Though Mr. Schoenbrun insisted Gen. DeGaulle is neither fascist nor dictator, the inference was clearly drawn.

In detailing the stakes both factions have in the current imbroglio and running down the “dramatis personae” Mr. Schoenbrun may have wanted to be thoroughly impartial. It must have been terribly difficult for a man who professed stanch admiration for the crack professionals helmed by the insurgent Brig. Gen. Jacques Massu. By to balance the scorecard, Mr. Schoenbrun voiced open dismay for the mystic from Colombey-les-Ducs-Eglises whom he typified as “a Hamlet . . . who cannot seem to make up his mind.”

By exercising a crisp and authoritative command of the situation-at-hand, Mr. Schoenbrun once again underscored a famed Murrow maxim that there’s more—much more—to tv journalism than trundling out a good looking announcer who reads well. Mr. Schoenbrun thinks well.

Production costs: $9,000.
Sustaining on CBS-TV Sun. May 25, 6:630 p.m.
Producer: Leslie Midgety; director: Verne Diamond.
Participations: David Schoenbrun, Eric Seva-reid.

BOOKS

Thank you, time buyers -- for all your letters identifying K-NUZ as the mystery station!

"...the 250-watt local independent located in the top 50 markets with more total listeners than any station in the market, including a 50,000-watt, according to Nielsen"

By now you've seen the ad on the inside front cover of this issue, so you know that WINN, Louisville, sponsored the contest.

Though your answer to the contest was wrong -- we weren't the "mystery station" -- K-NUZ is the right buy for your advertiser in the Houston market.

You know our ratings...

NIelsen - (Jan.-Feb. 1958) places K-NUZ in No. 1 position Mon.-Fri. 6 AM to 6 PM for total broadcast day average.

Pulse - (Jan.-Feb. 1958) shows K-NUZ No. 1 Mon.-Fri. for the total broadcast day average 6 AM to 12 Midnight.

Not "For the First Time in History" - but Consistently K-NUZ is Your No. 1 Buy!

Sincerely yours,

Dave Morris

From the town crier of medieval England to television today is the scope of this well-documented survey of advertising. The growth of magazine and newspaper advertising in the U.S., rise of the advertising agency and the advent of radio are detailed and illustrated by Mr. Wood. The volume is neither a critique nor a defense, but does highlight advertising's contributions during the two great world wars. A six-page bibliography plus index make the book valuable to the student or researcher.

OUR RESPECTS

to William Joseph Moyer

THE executive vice president and general manager of KARD-TV Wichita, Kan., didn’t start his career in that direction. William Joseph Moyer was going to be an investment banker—that is, until 1929. Instead he became a newspaperman, then a pilot and, in 1949, turned to broadcasting.

The impact of the stock market crash and the depression which followed left Mr. Moyer with “an indelible respect for the value of a dollar,” he recalls, reminiscing over his earlier experiences in finance. A native of Wilkes-Barre, Pa. (born Oct. 6, 1911), he attended high school in Easton, Pa., and then decided to get into finance before going to college. He worked on the board of Easton’s E. W. Clark & Co.; in the statistical, margin and clearing house departments of Dominick & Dominick, and as a bond trader and customers’ trainee at Barney & Co., both in New York.

Came the crash and the resultant bleak outlook for investment banking, and Mr. Moyer turned to a newspaper career, joining the Star Publishing Co. (Easton Plain Dealer, Washington [N. J.] Star, and five other newspapers in northeastern Pennsylvania and northwestern New Jersey). Over a span of six years he held positions in circulation, national and local advertising, editorial and composing room departments, and became assistant to the publisher in 1936. In the meantime he managed to sandwich in a year at the U. of Kentucky toward a bachelor of science degree (while working one night a week at the Lexington Times-Herald as a printer). During the summer he returned to the Star Publishing Co. and, in 1939, enrolled at Lafayette College in Easton, continuing until January 1941.

Interested in flying since 1929, Mr. Moyer had racked up 300-400 hours by 1941 and accepted a position as civilian flying instructor at an Army school at Lodwick Aviation Academy in Avon, Fla. In May 1942, he resigned and accepted a Navy commission, and exercising radar test pilot duties at the Naval Air Station, Anacostia, D. C., and participating in test pilot and ferry duties at Floyd Bennett Field and New York.

He was assigned as Bureau of Aeronautics representative in Dallas in 1944, in charge of Navy aircraft procurement contracts and inspection at various companies, including Cessna Aircraft in Wichita. He was promoted to commander before the war’s end in 1945 and continued in service for four more years, including the Korean War. Then he saw tv—the answer to an advertising man’s prayer. There it was—the ultimate in mass media of communication—a medium that embodied and usurped all of the assets of the other mass media—a medium limited only by the imagination.”

WICHITA Television Corp. was incorporated by Mr. Moyer; his brother, Dan, a Wichita attorney, and others in August 1950, with Bill Moyer as president. They solicited 15 other business people to serve as directors, with George M. Brown subsequently becoming president during a financial reorganization. For over two years Mr. Moyer grappled with various legal, operational and financing chores including an educational program for officers, directors and stockholders, and preparing preparation of various documents for the station’s application and anticipated competitive hearings. KARD-TV was involved in one of the most protracted competitive hearings in FCC history—from October 1952 to February 1953, with the record finally closed in September. FCC issued its final decision in June 1955 and KARD-TV took the air three months later with full power, 1,070-st. tower and temporary studios. (Final opposition to KARD-TV’s ch. 3 grant, carried to an appellate court, dissipated only last February.)

The station became an optional NBC affiliate in May 1956 and a basic affiliate in January 1957. KARD-TV competes with ch. 10 KAKE-TV Wichita and ch. 12 KTVH (TV) Hutchinson, ABC and CBS affiliates, respectively.

Ratings and their techniques are one of his principal interests. Mr. Moyer has been outspokenly critical of feature film programming and its effect on so-called “known rating weeks” and advocates a special “secret week” report as a competitive counter-weapon.

Under Mr. Moyer’s executive hand, KARD-TV has developed a community identification, emphasizing public service, while gradually improving its competitive position. (It won the Alfred I. duPont small station award this year, last year won a Brotherhood Award of the National Conference of Christians & Jews.) The station moved into new quarters in November 1956 and carries about 40 hours of color programming weekly, including a handful of local live shows, plus the NBC schedule. Mr. Moyer is active in various funds and other civic activities and is a member of aviation, industrial planning and government committees of the Wichita Chamber of Commerce. He also belongs to the Quiet Birdmen (a pilot organization) and the Wichita Club. He is married to the former Mae Gualding; they have no children. He likes swimming and adds “if I have a hobby, digging into ratings is it.”

What is a Pulse Radio Survey?

The PULSE is the trade name given to radio surveys conducted by PULSE, Inc. PULSE, Inc. has been taking radio surveys for seventeen years and is considered the most authoritative radio audience measuring company in the broadcast industry. Proof of this is the fact that PULSE reports are used by more radio stations than any other method and/or company.

Unlike an "independent" survey, PULSE is an authoritatively researched method in which the radio audience in a particular city is measured. "Independent" surveys are more often than not surveys taken by radio stations themselves and the coefficient of error is very high. Besides that very important fact, radio stations often take these surveys in a method which clearly slants the answer and, of course, could only come out one way. Their way.

A PULSE report is usually ordered by a group of stations in a particular city or area. The date of the actual survey is not released to the stations involved but the survey month is usually known. Each subscribing station pays their proportionate part. Part of the cost of a PULSE report is borne by (90) ninety of the leading national advertising agencies. Clearly, the advertising agency is interested in knowing the share of radio audience enjoyed by each station, since this report is used as a basic yardstick in determining which stations get the advertising dollar. Because of this, the fifty-nine remaining agencies subscribe to PULSE's entire history.

The foregoing quotation spearheads an advertisement by a radio station famous for its quality, integrity, and leadership.

Naturally we are pleased. But the important aspect is that this station's typical reaction explains the fundamental reason why Pulse has grown from one-market coverage back in 1941 to more than 200 markets in 1958.

And the first quarter of 1958 is our best in Pulse's entire history.

For pioneering an exclusive plus, out-of-home radio, correctly additive to in-home radio, per 15-minutes, per station, per program, the American Marketing Association gave Pulse a special award for its 1948-49 exploration. Since then, the out-of-home millions have been correctly reported by Pulse.

Currently Pulse finds that watching television out of home adds 4% to the in-home audience. As the service with the most subscribers, count on Pulse to incorporate this important and exclusive TV out-of-home when it becomes an important consideration for Pulse subscribers.

For greater "small-tube" reliability... use RCA "Premiums" and "Special Reds"

Equipment reliability in broadcast and TV station operations grows more and more important as the value of on-air time increases.

To raise the reliability factor of "small-tube" circuitry, why not look into the advantages RCA "Premium" and "Special Red" Tubes offer? They insure long and dependable performance—through uniformity of characteristics both initially and throughout life, rugged construction for applications critical as to shock and vibration, and special tests to weed out early failures.

Here are a few of the reasons why you can rely on RCA "Premium" and "Special Red" Tubes: RCA "Premiums" are tested for stability and survival rate, 500-hour and 1000-hour life (where applicable), audio frequency noise, and microphonics. RCA "Premiums" are rigorously controlled in manufacture for heater-cycling life performance, low-frequency vibration, fatigue, shock, glass strain—and monitored by microscopic inspection of 25 categories of tube workmanship.

The advantages of RCA "Premium" Tubes are available in a wide choice of types—from your RCA Industrial Tube Distributor.

WRC • 980

WRC delivers a higher proportion of adults than any of the 16 other radio stations in Washington...the nation's third market in average family income. "Twilight Tunes" is an excellent example of WRC's adult-appeal schedule. Weekdays, from 4 to 6 p.m., "Twilight Tunes" delivers 21,800 adults per average quarter-hour...42% more than the second station (network), 79% more than the third station (independent). With WRC Radio's "Twilight Tunes" helping you, you can open pocketbooks (and wallets) aplenty in the Capital!

NBC LEADERSHIP RADIO STATION IN WASHINGTON, D.C. • SOLD BY NBC SPOT SALES
TV REALLOCATION IS UNDER STUDY

- Long-range plan would move all TV into one area of spectrum
- Goal: end of uhf problem, vast increase in operating stations

A long-range proposal to reallocate television into a single band of 25 channels is being explored by the FCC.

The proposal would eliminate the present channels 2 through 6 and create a single band starting with the present ch. 7. An orderly transition period of seven to ten years is contemplated.

The objective would be to cure the problems created by the present allocation of television into two widely separated bands —vhf and uhf. Under the proposal, a vast expansion of the number of television stations is envisioned.

It was learned authoritatively last week that the proposal was submitted to the FCC May 21 by Comr. T. A. M. Craven, internationally recognized allocations expert. Mr. Craven was understood to have submitted it, in memorandum form, as a starting point for discussion of a new allocations policy.

Because of the FCC’s preoccupations with congressional hearings, Mr. Craven’s memorandum was given only cursory study, but it constitutes a major item of unfinished business.

Aware that talk of new allocations evokes volatile reactions, Mr. Craven emphasized to his colleagues that his memorandum was exploratory and his suggestions intended as a basis for discussion rather than espousal of a cause.

In accord with Mr. Craven’s wish, the memorandum has not been made public.
The Asstn. of National Advertisers today (Monday) is taking the wraps off its three-year, $200,000 advertising management study, hailed by Paul B. West as "the most significant step ever taken toward more productive advertising."

Results of the study are compiled into seven volumes, to be known as "Practical Guides and Modern Management Practices for Better Advertising Management." or, less formally, "The Guidebook Series."

The guidebooks reflect the experience and thinking of many leading advertisers on basic advertising problems, officials pointed out. In addition to exploring these problems in detail, they offer numerous case histories and examples which show how specific advertisers handle specific situations. thus furnishing a guide to others seeking assistance.

Announcement of the publication of the series coincides with the issuance today of Volume 5, on the always-sensitive question of advertiser-agency relationships (see separate story). The first four volumes— "Principles of Advertising Management," "Advertising Organization," "Advertising Plans: Preparation and Presentation" and "Advertising Budget and Cost Control"—were released earlier.

The remaining two—"Advertising Personnel Management" and "Evaluating Advertising Effectiveness"—will be released in the near future. The series is available to agencies, media and other non-members of ANA at $1.50.

Henry Schachte of Lever Bros., chairman of the ANA Advertising Management Committee, described the major objective of the study thus: "To show how advanced principles of management could be applied to the advertising function. We have gathered the best of all modern practices in every phase of the management of advertising—including advertising so that all of us can improve the productivity of advertising."

Importance of the study also was stressed by a number of leading officials in both advertiser and agency circles in statements issued by ANA. These were Frank O. Prior, president of Standard Oil (Indiana); Melvin Brobry, senior vice president of Needham, Louis & Brobry; J. Davis Danforth, executive vice president of BBDO and chairman of the American Assn. of Advertising Agencies; Clarence Eldridge, management consultant, and Marion Harper Jr., president of McCann-Erickson. Russell H. Colley, management consultant, was retained by ANA as editor for the series.

How agencies set their prices

Outside of their 15% commission—or whatever commission it is, in those cases where it isn't 15%—what price tags do agencies hang on their services?

Services and prices of one of the top radio-tv agencies. Young & Rubicam, are spelled out and those of a number of other agencies, mostly unidentified, are dealt with at length in Vol. 5 of the Asstn. of National Advertisers' new "Guidebook" series being announced today (Monday).

The 374-page volume, on "Advertising Agency Relations," delve into such phases as advertiser-agency plan of operation, plan of organization, the living as well as the contractual relationships, how to select an agency and how to appraise its performance. Key points to look for in contracts, agency services and compensation and the financial relationships between advertiser and agency. Inevitably, attention is attracted to compensation and other financial arrangements.

Young & Rubicam's charges and billing procedures, incorporated in text as revised Oct. 1, 1956. include these highlights related to radio-tv:

Y&R gets the traditional 15% media commission (or requires the client to make up the difference if the media commission is not 15%). Radio and tv production charges and talent are billed to the client at cost (before cash discount) plus 15%.

Among the radio-tv services that the basic 15% pays for are "the placing of radio [or tv] advertising, the creative planning and preparing of radio [or tv] programs, supervising their production, the procuring of artists and other persons used in connection with programs... and such other services as may be incidental to the managing of a radio [or tv] campaign."

In the area of special charges, the Y&R manual notes these relating to the broadcast media:

"When Y & R plans the broadcast there is no charge for writing commercials. However, for commercials prepared for broadcasts on which we receive no commission (for example, commercials by sound effects, etc.), we charge a minimum of $5 per hour plus 15% commission on shows placed by Y & R, and $9 per hour plus 15% commission on shows on which we receive no commission. No charge is made for working drawings which are not presented to the client..."
scribed deintermixture as no more than "nibbling" at the allocations problem and said it had little value even in the short range.

Whether the Craven suggestions have the endorsement, actual or implied, of the Office of Defense Mobilization, which functions directly under the White House, is not known. It was stated, however, that on March 24 the ODM suggested that it and the FCC could jointly pursue long-range planning on future use of the spectrum by this country, and jointly provide guidance and substance both at the technical and policy levels. The ODM is in liaison with ODM and is chairman of the all-important engineering policy committee planning for the International Telecommunication Conference in Geneva next year. ODM proposed that it and the FCC appoint an executive from each group to give policy guidance to the technical allocations groups of the FCC and the Interdepartment Radio Advisory Committee, which sits for the government. These steps would place the allocations planning at the highest level.

Presumably it also would augur against adoption by Congress of the identical resolutions introduced last year by Sen. Charles Potter (R-Mich.) and Rep. William Bray (R-Ind.) for the appointment of a three-man public advisory committee to supervise the allocation of frequencies allocated to the federal government [Broadcasting, June 24, 1957]. Sen. Potter and Rep. Bray were disturbed over possible demands by the military for a larger slice of the radio spectrum, particularly the lower vhf band—the very channels 2-6 that would be involved if the Craven memorandum were implemented.

Comr. Craven, himself a former naval communications officer, does not believe that the military is now using more spectrum space than it requires for peacetime operations. He also recognizes that broadcasters will be disposed to regard his long-range plan as impractical. But he has advised his FCC colleagues he feels that, if properly coordinated and planned, the plan is desirable and desirable in view of the possibility of achievement of a television program of many of the allocation problems which have crept into development and are urgently in need of FCC action.

NEW LOOK AT GARDNER

It was Media Day for some 400 sales representatives at Gardner Adv. in St. Louis May 22. The occasion: the house to unveil the agency's modernized and expanded quarters in the city's downtown area.

The extensive remodeling program provides about 40% more floor space and added facilities for new client services, notably in the broadcast media department. Major revisions incorporated there reflect the fact that 60% of the agency's $22 million billings in 1958 will be in radio-tv.

Under the renovation program, several departments previously spread over half a dozen floors at 915 Olive St. have been integrated, largely on two floors. Three different viewing areas have been set up for viewing commercials and filmed shows. A workshop and two-way projection room serves two of them.

Pictured: The reception room of Gardner's new quarters and three of the agency's top officials (l to r): President Charles E. Claggett, Board Chairman Elmer G. Marshutz and Secretary-Treasurer Herbert S. Gardner Jr. The receptionist is Shirley Staford.

CONTINUED
where payment to you is made within the time specified for cash discount. In the event that any advertising media does not allow advertising agency commission, we shall pay you 15% of the cost incurred on our behalf in the use of such advertising media. (b) for radio and television talent and production, package shows, announcements, information, jingles, tunes, lyrics, writers, directors, announcers, producers, actors, musicians, royalty, special fees, films, rights, properties, scenery, handwriting, etc., when authorized by client.

Agency commission, agency handles all of the billing for the presentations of commercials for other agencies the producing agency will be credited with the compensation the agency receives from the agency commission allowed by such station.

Another advertiser allowed a 16 1/2% commission in lieu of fees.

One advertiser, on the other hand, submitted a contract which employed the fee rather than the media commission system of compensation. It agreed to pay the agency $351,600 a year, and commissions received by the agency were to be applied against that figure.

In presenting these various contracts, ANA made clear that "circumstances vary widely from one advertiser-agency relationship to another" and that "it is difficult, if not impossible, and in any event unwise, to attempt to recommend standard or model forms of advertiser-agency contracts in indiscriminate use." Yet it was felt that "the experience and thinking of others can always be used to advantage, provided it is not slavishly followed," and the examples of actual contracts were offered "in that limited sense only."

Aside from these advertiser and agency examples of working arrangements, ANA's Volume 5 contains sections contributed by such agency leaders as Marion Harper Jr., president of McCann-Erickson; Charles H. Brower, president of BBDO; Robert D. Holbrook, chairman of Compton Adv., and George N. Farrand, treasurer of Young & Rubicam.

Advertisers who contributed case histories included National Biscuit, Morton Chemical, Olin Mathiesen Chemical, General Mills, Hamilton Watch, International Harvester and Quaker Oats, in addition to GE and Reynolds Metals.

The principal conclusions of the ANA-commissioned "Frey Report" on agency-advertiser relationships and methods of compensation [Special Report, March 3] also were incorporated.

Volume 5 was prepared by the ANA Agency Relations Subcommittee of the advertising subcommittee. Donald S. Frost of Bristol-Myers heads the subcommittee.

COUNT OF RADIO SETS BACK IN 1960 CENSUS

• Bureau reverses former edict
• Holland spearheads movement

The 1960 decennial census will tabulate the number of U. S. homes with radio and television sets, following a pattern set in 1950 when tv was a relatively new medium.

Radio had been deleted from the census earlier last month when the Census Bureau decided there was no point in making a costly national count inasmuch as nearly every home has one or more radio sets [Government, May 12].

Last week, however, the bureau reversed itself "pursuant to a request made by Sen. Spessard Holland (D-Fla.), chairman of the Senate Appropriations Subcommittee," handling the Dept. of Commerce and Census Bureau budget [Government, May 26], according to Sen. Holland's office, which announced the bureau decision after receiving a letter from Dr. Robert W. Burgess, census director.

The radio count was returned to the 1960 census after several days of fast maneuvering. Sen. Holland voiced polite amazement that radio was not to be counted when the subcommittee was questioning Dr. Burgess May 21. The director gave two reasons—the 1950 census figure of 96% radio saturation is still valid; it is not technically feasible to count these receivers.

At that point Sen. Holland noted that tv had induced a radio slump which in turn was followed by a radio resurgence. He challenged the propriety of supplying facts to the tv industry and not to aural broadcasters. He explained a "great volume of re-requests for radio data had been received by the subcommittee. Dr. Burgess then promised to review the matter.

Sen. Holland added his only desire was to have determined the number of American homes with radio and tv sets and the number having access to broadcast service. He said the set audit was important because of the need of those beyond the range who need radio weather forecasts, farm information and similar services as well as civil defense information.

Last Tuesday the Census Bureau reached
its decision to restore radio to the 1960 census, issuing this statement:

"Since the announcement in April that it is proposed to include a question on television in the 1960 census, the bureau has received many requests that a question on radio should also be included. Although nearly every household reported a radio set in 1950, there may still be significant differences from area to area as well as changes in some areas since 1950.

"Accordingly the bureau has re-examined its position. Director Burgess states that in view of the great importance of radio as a communications medium, it is now planned to include a question on radio in the 1960 census in order to provide up-to-date information on the number and location of households reporting radio. Information on types of radio receivers will not be requested because the collection of such information would be unduly time consuming and expensive."

Harold E. Fellows, NAB president, wrote Dr. Burgess Wednesday that the radio count "will result in securing information which is vital to this country's continued economic progress and well-being" and will contribute "to radio's continued ability to serve the country." He voiced regret that data on battery-powered and fm receivers would not be collected. NAB conducted an active industry campaign calling on broadcasters to state their position to legislators and the Census Bureau.

**Factor's $3 Million Account Lands at Kenyon & Eckhardt**

After a two month period of carefully viewing a number of agency presentations, Davis Factor, chairman of Max Factor & Co., Hollywood, announced the appointment of Kenyon & Eckhardt to handle the $3 million cosmetic account, effective June 2. K&E will be the advertising agency for the following Max Factor products: Natural Wave hair spray, Hi-Fi fluid make-up and the fragrance lines. "It is anticipated," Mr. Factor said, "that additional products will be assigned later." Kenyon & Eckhardt, Los Angeles, will service the account.

Anderson - McConnell, Factor's other agency, will continue to handle Curl Control, Facial Bath, Creme-Puff and a new lipstick.

Approximately $2.5 million of the Max Factor advertising budget went into television last season with sponsorship of the alternate-week Polly Bergen Show on NBC-TV. The show was not renewed for next season.

Max Factor had been with Doyle Dane Bernbach, New York, until two months ago when they jointly terminated the association.

**Smith, Greenland Leave Gore, Taking Half of Agency Billings**

In an unexpected situation becoming rarer in this day of the agency merger, Gore/Smith/Greenland, New York, has been dissolved as a triumvirate, with Meurers, Martin L. Smith and Leo Greenland walking out with roughly 50% of the G/S/G billings in their pockets. Effective June 1, Smith/Greenland Co. hangs out its shingle at 420 Madison Ave. (Plaza 9-5656)—the present address of G/S/G.

With the $2.5 million in billing that will go into the new agency are some $900,000 in broadcast allocations, principally in the food product line. Of the less-than 50 people currently employed by G/S/G, approximately 30 are slated to leave with Messrs. Smith and Greenland.

Involved in the switch of advertisers are the following broadcast accounts: Hercules Chemical Co. (tv), Hires Bottling Co. root beer (radio), Melnor Industries garden equipment (tv), Milady frozen food products (radio-tv), Osrow Products Co. brushes (tv), Roman Products Co. frozen foods (radio), Seabrook Farms frozen fruits and vegetables (radio-tv), Sau-Sue foods (radio), Louis Sherry preserves (radio), Weldon Farm Products' Alba non-fat dry milk (radio) and Zauner Foods cheese products (radio). Standard-Triumph Motor Car Co. (foreign autos), one of G/S/G's major accounts, will stay with Chester A. Gore, although it's been reported that the British automaker would like a larger agency. (Understood to be pitching for Triumph: Kudner Agency, which recently lost GM's Buick.)

Mr. Gore, now in Europe on vacation, apparently did not learn of the split until told last week by cable, but the two departing partners maintained they had told Mr. Gore of their plans before he went abroad. It was learned the rupture stemmed from "personality conflicts" between the three owners—a report more or less confirmed by the remark of one agency officer who tersned the divorce as "very personal."

Gore/Smith/Greenland came into being last August upon the merger of Mr. Gore (then president, Gore/Serwer) with Mr. Greenland (his vice president) and Mr. Smith, head of Martin L. Smith Adv.
M-E Reassigns Haight, McAvity on Two Coasts

George Haight, vice president in charge of tv-radio programming for McCann-Erickson, and Thomas A. McAvity, corporate vice president and general executive for tv-radio, have been assigned new posts, it was announced last week by C. Terence Clyne, senior vice president for corporate tv-radio services.

Effective June 1, Mr. Haight will become vice president in charge of tv-radio programming services for the West Coast. His duties will include production responsibilities for all Hollywood productions, new program development on the West Coast, and responsibility for McCann-Erickson's film productions in Hollywood.

Mr. McAvity will become vice president in charge of the home office tv-radio programming.

The new assignments of Mr. Haight and Mr. McAvity, Mr. Clyne pointed out, were brought about by the agency's expanded tv-radio volume and its forward planning.

A large portion of the agency's programming, including Westinghouse Desilu Playhouse, Steve Canyon, Eddie Fisher, Wells Fargo, Bob Hope, Death Valley Days, Chesterfield Supper Club, etc., will originate from the West Coast—as well as program ideas and pilot films.

Mr. Haight and the agency's west coast tv-radio staff will be located at 915 North La Brea Ave., Los Angeles. Mr. McAvity will move to the agency's home office at 485 Lexington Ave. He had been at 50 Rockefeller where the corporate offices are located.

Kellogg, Chrysler Fall Tv Plans

Await Burnett Recommendations

Fall tv plans of two blue-chip advertisers—Chrysler Corp. and Kellogg Co.—were still in abeyance last week, pending recommendations of their agency, Leo Burnett Co., Chicago.

Kellogg has been reappraising its network-spot picture involving (1) possible renewal of an ABC-TV children's strip; (2) a reported sizable spot tv schedule in key markets [Closeup Circuits, May 26], and (3) purchase of one or more other network tv properties. During the first quarter of 1958, Kellogg spent an estimated $2.9 million on network and $263,000 on spot. If Kellogg renews the ABC-TV across the board children's series, it's understood that two of the five programs—Sir Lancelot and The Buccaneers—will be replaced. Burnett is expected to present its recommendations to the cereal client by week's end. Sources close to the account indicate Kellogg will step up its spot activity at least in some measure.

Also still hanging in the balance is Chrysler Corp.'s network tv alignment for fall. The company already has notified CBS-TV it will drop Climax (and its once-a-month Shower of Stars) after the current season ends. The Burnett agency has been screening several network show properties.

Defendants May Appeal FTC Allowing Ruling

One or more of six large manufacturers (and top radio-tv advertisers) may decide to appeal a Federal Trade Commission ruling against chain-store merchandising by stations [Government, May 26].

Cyrus Austin, New York attorney who represented the manufacturers before the FTC, indicated last week that probably one or more of the firms will take an individual appeal to the courts (presumably to the U. S. Appeals Court). Mr. Austin said, however, that no final decision had been yet made by any one of the companies. There is no time limitation for an appeal and there are other procedural courses open, he said. He did not discount the chance that the firms would file compliance reports with the commission and not appeal the ruling.

The firms are General Foods Corp., Groveton Paper Co., Hudson Pulp & Paper Corp., P. Lorillard Co., Piel Bros. Inc., Sun- kist Growers Inc. and Sunshine Biscuits Inc., all large manufacturers whose products are sold in store, and who claim benefits offered by network-owned stations in New York, Boston, and Chicago. Six of them had appealed the initial decisions but were denied at the same time the commission affirmed its examiner's ruling. Sun-Kist's case is now under an FTC consent order agreeing not to use any discriminatory store promotion plans.

The FTC has ordered the respondents to discard practices of granting promotional allowances to favored customers "through the major radio-tv networks," noting that broadcast in-store promotion-aid is "favoring grocery chains" violate federal antitrust laws.

This decision drew scattered interest in New York City where network-owned stations have been active in in-store promotion. Aside from NBC, which had a formal statement, other networks were quiet. CBS said its attorneys were examining the FTC action and its possible import but would have nothing to say.

NBC said the decision did not affect its "Chain Lighting" plan. In a formal statement, P. A. (Buddy) Sugg, vice president in charge of NBC-owned stations and NBC Spot Sales, noted that the ruling "relates to an earlier form of the Chain Lighting plan which has been superseded by a broadened plan offering participation opportunities to all food retailers regardless of type and size. " WRCA New York operates it "with more than 3,300 individual participating stores. Of this number, " he continued, "55% are independents and cooperatives and 45% are chain stores."

Apprently whatever use was made of this type of merchandising by WABC-AM-TV New York (ABC-owned) in the past, the stations now are not so engaged. The network had no comment as to what extent other ABC stations or affiliates were using in-store merchandising plans.

A canvas of Chicago stations—network and independent—indicated they would not be affected, directly said the estimate by the FTC decision prohibiting limited in-store plans.

Feature Foods, a pioneer food merchandising organization, which has about a dozen clients among radio and tv stations, pointed out that it offers its services equally to chain and independent stores. The firms stressed that in fact, most of its work is with independent stores.

Spot Radio Racks Up Record First Quarter

National spot radio revenue for the year's first quarter totaled an estimated $46,171,000, or a gain of 4% over the $44,411,000 revenue for the same period of a year ago. Lawrence Webb, managing director of Station Representatives Assn. which released the figure last week, said the estimate represents the largest first quarter ever recorded for national spot radio business.

Similarly, Radio Advertising Bureau is announcing today (Monday) a first quarter 4% increase for both spot and local radio as compared to the first three months of 1957.

Mr. Webb predicted that if this trend continues, 1958 would prove the best year for national spot radio on record (1957 was the top year in revenue from national spot radio). Last year's total was more than $183.9 million, a 26.5% increase over 1956. Figures released by SRA are based upon reports of members which are audited by Price Waterhouse & Co.

The RAB estimate is based on a 21-man panel of industry executives who are members of RAB's board of directors and plans committee. The panel represents stations in markets of all sizes, stations of various power ratings and a variety of regional economic situations.

The panel, or "jury" as RAB refers to the group of executives, was polled by RAB during a semi-annual meeting. Figures show national spot up 5% and local radio ahead 2.9%. Polling breakdown: national spot—15 estimated spot average a 10.6% increase, five estimated an average decrease of 11%, and one reported no change; local—12 estimated an average 11.6% boost, eight estimated a 9.6% decrease, one reported no change.
40 OF AMERICA'S 200 best farm counties are in Iowa! They're the cream of American agriculture — help give Iowa farmers an average income of $11,800 per year. Yet NON-agricultural income accounts for 74.5% of Iowa's total!

WHO Radio reaches practically ALL of Iowa's 826,100 rural AND urban families—is "heard regularly" by more Iowa families than the next four commercial stations combined!

Unless you have lived or worked in Iowa, you can hardly imagine the impact that this unique radio operation has on our entire State. Let PGW tell you!
aptly describes the new 1958 BROADCASTING Yearbook & Marketbook to be published this September. For 23 years BROADCASTING has produced a Radio Yearbook (February) and a TV Yearbook (issued in August). This year, in one handy reference volume, both the radio & tv Yearbooks will be merged, fulfilling countless subscriber and buyer demands.

The new Yearbook will have the help of Frank Silvernail, Dean Emeritus of the Timebuyers, who recently retired from BBD&O. As one of the Nation's leading buyers who conservatively placed over $25 million in station time, Frank was a constant user of BROADCASTING Yearbooks. Working closely with our editors, he has suggested changes that will make the 1958 Yearbook a far more valuable tool for buyers of radio & tv.

A few of the many features: (1) radio & tv audiences, their size and composition; (2) radio & tv time sales—by network, spot and local, nationally and by individual markets; (3) market information such as retail sales, households, drug sales, passenger car registrations, food sales—all by counties; (4) analyses of specialized radio programming—foreign language, Negro markets, multiplexing, stereophonic broadcasting; (5) a review of how advertising agencies have grown in radio & tv; plus separate radio and tv station directories and other standard features which have made BROADCASTING YEARBOOKS the most authoritative, closely-read reference work in radio & tv for the past 23 years.

Advertising deadline is July 14 for proofs; July 28, final deadline, no proofs. Regular rates. 16,000 circulation. Reserve your space today!
Advertising Subverted By ‘Gimmickry’—Adams

A no-holds-barred attack on today’s role of research in advertising was made Wednesdays by Mr. Adams, vice president and Cadillac motor car account supervisor at MacManus, John & Adams, Bloomfield Hills, Mich. Addressing the Advertising Chainsaw to the point of peril, Mr. Adams noted that “imitation is the sincerest form of suicide,” and that “the advertising lookalikes have approached the point of perilous perfection where potshots are being taken at all advertising.”

Describing some of the current ads—in print as well as television—Mr. Adams said, “Here is boredom at its best, the most expensive sedatives in the history of communication. Slightly produced advertising that does everything but arouse interest in the product that pays the freight.”

He went on: “It takes a trained observer to tell whether the product involved is to be eaten, rubbed in the hair, ridden in or smoked. ‘Mildness makes the difference’ covers everything from feminine hygiene to toilet tissues.”

Advertising today, he asserted, is “beautiful . . . and sterile”; it does nothing for the consumer or the client.

Who is to blame for “this virtual collapse of persuasive power” at a time of economic recession? Mr. Adams blamed “gimmickry”—the “sure thing” that abolishes the “basic insecurity of creativity,” ergo saves an advertiser from making the wrong guess. The implementers: “researchers . . . pseudo-scientists . . . head-feelers” [who] “proposed to guarantee the results of advertising.”

This playing of the “confidence game,” Mr. Adams charged, has resulted in “creative men becoming carpenters hammering together mass-produced ingredients. And because the ingredients were mass produced and for sale to any advertiser, the resulting ads became as alike as Sundays in Philadelphia . . . and every bit as stimulating.”

“Creativity,” said Mr. Adams, “became a dirty word in some agencies and it became fashionable to be known as a marketing agency or a merchandising agency or a motivation research agency. Anything except, God forbid, a creative agency.” You cannot force the consumer to want something, noted Mr. Adams. “All the motivational mumbo-jumbo, all the Freud-infatuated figures assembled since Herr Doktor Dichter was knee high to a couch cannot make the public’s taste-buds tingle or its ego pant for a new car. . . . The public just doesn’t give a damn how much research went into the preparation nor will it buy blindly to bail the economy out of a slump.”

Bring back creativity, he urged, and delve research to its rightful place (“not as a drunk uses a lamp post . . . but to light the way”); follow the “inspired hunch” as did the Leo Burnett agency with Marlboro.

Concluded Mr. Adams: “If creativity is to conquer the head shriners, the prime force is not likely to come from 10,000 speakers at 10,000 luncheon clubs . . . but it will come from the man with the bankroll, the client. And I believe the average advertiser is rapidly becoming disenchanted with the sterile, play-it-safe advertising. He is about to lower the boom . . . and high time.”

Aiello Goes to MJ&A in July

One of the principal sparkplugs on the Buick Motor Div. account during its long stay at Kudner Agency, New York, will remain instrumental on General Motors Corp. tv advertising. Vincent F. Aiello, a high-cheked Kudner executive who voluntarily took a back seat (the agency following the loss of Buick to McCann-Erickson, is shifting in July to MacManus, John & Adams, Bloomfield Hills, Mich.-New York, in a policymaking post. MJ&A is one of principal GM agencies—serving both Pontiac and Cadillac auto accounts in addition to GM institutional advertising on NBC-TV’s Wide Wide World. Officials at MJ&A declined comment on Mr. Aiello’s move as did Mr. Aiello himself. Both indicated that an announcement would be “forthcoming.”

With Kudner since 1944, Mr. Aiello had been executive vice president and copy chief on Goodyear Tire & Rubber, Buick and GM institutional accounts.

BROADCASTING

TROOPERS RUSHED IN  • Falstaff Brewing Corp. has renewed State Trooper, MCA-TV film syndication show, in 66 markets for third successive year, through its agency, Dancer-Fitzgerald-Sample, N. Y. MCA TV Ltd. will go into production immediately for third series of State Trooper to meet requests by advertisers for additional full hour shows. New programs will bring to 104 number of segments available for regional and local sponsorship.

OLDSMOBILE SONG  • Oldsmobile Div. of General Motors Corp., Detroit, through D. P. Brother & Co., Detroit, will sponsor CBS Radio’s The Patti Page Show when singer begins Tues.-Sun. series of five-minute programs June 17. Miss Page will be heard Tues.-Fri.: 8:25-8:30 p.m.; Sat. and Sun., 7:30-7:35 p.m., and Sun., 8:55-9 p.m.

DAY AND NIGHT  • Six new advertisers have ordered schedules on NBC-TV’s To- day and Tonight shows: Amity Leather Products Co., West Bennington, Vt., for Rolfe leather goods (Edward H. Weeks & Co., Chicago); Liftsavers, N. Y. (Product Serv- ices Inc., N. Y.); Firestone Tire & Rubber Co., Akron (Campbell-Ewald, Detroit); RCA-Whirlpool, N. Y. (Kenyon & Eckhardt, N. Y.); American Optical Co., Buffa-lo, for Cool-Ray sunglasses (Sunland-Ambott, Buffalo); Fifth Ave. Color Labs, N. Y. (Maxwell Sackheim Inc., N. Y.).

PILLSBURY MILLIONS  • Pillsbury Mills Inc., Minneapolis, last week placed 52-week daytime order amounting to more than $2 million in gross revenue on NBC-TV. Purchase calls for sponsorship of alternate-week quarter-hour segment of six daytime weekday programs starting in fall. Agency is Leo Burnett Co., Chicago.

EAGER FOR BEAVER  • Miles Labs, Elk-hart, Ind., and Ralston Purina Co., St. Louis, will sponsor Leave It to Beaver when series moves from CBS-TV to ABC-TV starting Oct. 3 (Fri. 8:30-9 p.m.). Agencies are Tiffany Wade, Hollywood, for Miles Labs, and Gardner Adv., St. Louis, for RP.

RADIO ROAST  • Borden Co. (Rich Roast coffee), N. Y., has launched 12-week campaign on eight radio stations in New York metropolitan area, using 109 one-minute spot announcements per week. Agency: Do- herty, Clifford, Steers & Sheffield, N. Y.

STEVE McQUEEN STAYS  • Greyhound Corp. has renewed its sponsorship of NBC-TV’s Steve Allen Show (Sun. 8-9 p.m.) for 1958-59 season. Agency for Greyhound Corp.: Grey Adv., N. Y.

SUMMER WRAP  • Dow Chemical Co. (Saran Wrap), Midland, Mich., currently is conducting 13-week tv spot drive in nine central and eastern U. S. markets, expiring in July. MacManus, John & Adams, Bloomfield Hills, Mich., is agency.

AMERICAN COMBO  • Four advertisers have signed to sponsor segments of ABC-TV’s American Bandstand (Mon.-Fri., 4-5 p.m.). They are Minnesota Mining & Mfg. Co. (Scotch Brand tape), St. Paul, through BBDO, N. Y.; Polk Miller Products Corp. (Seagull’s dog remedies), Richmond, through N. W. Ayer & Son. Phila.; Shulton Inc. (toiletries), Clifton, N. J., through Wesley Assoc., N. Y., and Vick Chemical Co., N. Y., through Morse International Inc., N. Y.

CONTINUALLY CONTINENTAL  • Continental Baking Co., N. Y., renewed its sponsorship of Howdy Doody Show on NBC-TV, Saturdays, 10-10:30 a.m. for 52 weeks effective June 24. It marks seventh year that Continental Baking will be sponsor of series. Show itself has been on air, first as daily strip, now weekly, for past 10 years. Agency for Continental is Ted Bates & Co., N. Y.

RETURN OF ZORRO  • AC Spark Plug Div. of General Motors Corp., Flint, Mich., and Seven-Up Corp., St. Louis, renewed sponsorship of Zorro on ABC-TV for fall season (Thurs. 8-8:30 p.m.). AC Spark Plug’s agency is D. P. Brother & Co., Detroit, and Seven-Up’s, J. Walter Thompson, Chicago.

WHO’S BUYING WHAT, WHERE

Agency for Continental is Ted Bates & Co., N. Y.

RETURN OF ZORRO  • AC Spark Plug Div. of General Motors Corp., Flint, Mich., and Seven-Up Corp., St. Louis, renewed sponsorship of Zorro on ABC-TV for fall season (Thurs. 8-8:30 p.m.). AC Spark Plug’s agency is D. P. Brother & Co., Detroit, and Seven-Up’s, J. Walter Thompson, Chicago.
Give Agencies Voice In Marketing Strategy

Advertising agencies apparently are becoming increasingly conscious of the advertiser’s marketing problems and in doing so want to be counted in on marketing plans. The point was emphasized in recent speeches by three advertising executives.

A blunt appeal that advertisers “let their agencies do a full job” was made last week by Harold L. McClinton, president of Reach, McClinton & Co., New York, in an address before the 65th annual meeting of the Canadian Life Insurance Officers Assn. in Quebec. He opined that agencies find it impossible to perform their function when frequently advertisers do not include the agency as “a real part of the marketing team.”

Mr. McClinton urged that marketing procedures be brought up to date, that effective marketing strategy be emphasized and the company’s advertising director be placed on the “first team.” He cited Reach, McClinton’s relationship with The Prudential Insurance Co. of America as an example of an effective marketing strategy bearing on insurance sales objectives.

A Cunningham & Walsh executive, May 22, called on advertising companies to bring their agencies into marketing plans.

The agency spokesman was William V. Mulvey, senior vice president, member of the executive committee and of the board. Also speaking at a session of the New York chapter of the American Marketing Assn. was George Frost, vice president and advertising manager of Cannon Mills and chairman of the company’s advertising-merchandising-sales committee. Both presented views on how far an agency should go in preparing marketing strategy for its clients.

Mr. Mulvey said the agency should be called on for marketing service because it is a “selling weapon to be used” to keep an edge over competitors, and it is economical for the client. Use of agency marketing services would result in more effective advertising and add a perspective (the agency would render “a most unbiased opinion of industry developments” because it is not hampered by internal company pressures).

Mr. Mulvey said that “if the advertising agent is going to be held responsible—to the point of being canned by the client—for sales failures, then it is important that he have a voice in every phase of the distributional pattern of that product.”

Mr. Frost warned advertisers that despite the extent of agency marketing aid, it is still the responsibility of the advertiser and not the agency to make the final decision on the overall marketing plan. He said there is need for spelling out in writing the specific areas of marketing responsibility to be assumed by both the agency and the advertiser.

Accas Joining Grey Media Staff

Gene Accas, vice president in charge of sales development for ABC-TV, has resigned to join Grey Adv., New York, as associate media director, reporting to Larry Deckinger, vice president in charge of media for the agency, effective June 14. Mr. Accas has been with ABC since February 1957, and before that was with Television Bureau of Adv. for a year. Prior to that he was with ABC for a number of years and also served with NBC and Foote, Cone & Belding.

Weekly Radio Audience Up 8% Over Last Year, Nielsen Finds

Rebounding radio business got a new push forward last week.

The A. C. Nielsen Co., in a special report for release today (Monday) said radio’s weekly audience is up 8% over a year ago.

The findings were drawn from a special study, made annually by the Nielsen company.

The study showed that during “a typical mid-winter week” this year 89.5% of all U. S. radio homes used their household radio sets. Nielsen said this audience, total-

liing more than 43.5 million different homes, over 3 million (8%) ahead of the figures for a year ago.

A total of 655 million home-hours of radio listening were recorded during the week, according to the study. Listening was distributed during the day as follows: 40% occurred during the morning hours, 6 a.m. to noon; 34% during the afternoon, from noon to 6 p.m.; 21% during the evening, 6 p.m. to midnight, and 5% after midnight.

The report found that during a single week more than 24 million homes use their radio during the single hour between 8 and 9 p.m. on weekdays. During the remaining, the greatest weekly audience is between 6 and 7 p.m., when more than 20 million different homes tune in across the week.

A total of 55% of all in-home listening is done during the weekday (6 a.m. to 6 p.m.), Nielsen reported. Evening listening and listening after midnight account for 26%, while 19% is done during the day-time on weekends.

TELLING TIME AND MAKING MONEY

Last year WRCA-TV New York decided to add “a new wrinkle to an old look” and, as an experiment, started to sell “electronic time signals”—10-second, early-morning station breaks presenting time of day and a commercial.

The experiment’s success has prompted a decision to offer these station breaks to NBC’s owned and operated tv stations, more than 100 network affiliates carrying the Today show (Mon.-Fri., 7-9 a.m.) and to other affiliates presenting early-morning local programming.

WRCA-TV officials acknowledge the plan is no gold mine, but point out that by June 24, when the first anniversary of the electronic time signal rolls around, the technique will have brought in about $100,000—an overwhelming portion of which is “found money.” As of May 1, income totaling $76,200 had been billed by the station $40,750 from advertisers who had never used WRCA-TV.

Peter Afe, director of operations for WRCA-AM-TV, suggested the innovation. He felt 10-sec- ond station break announcement within Today could be sold as time signal commercials just as was the practice in radio. William Davidson, general manager of WRCA-AM-TV, and Max Buck, sales director, agreed.

The presentation to agencies and advertisers pointed out that time checks are valuable to working people, the commuter, the housewife and children. It added that these time signal breaks combine a visual and audio announcement of an advertiser’s product plus an actual on-camera clock showing the exact time. The cost of WRCA-TV: an electric clock.

The time signal consists of that clock adapted to a device for use in a teleoptic projector with a card constructed in the same way as any telop. Photographs, art work, hand lettering, hot press and film have been used in presenting the commercial message (see cuts).

The upsurge in business can be gauged by a comparison of station-break time sold before the electronic time signal was introduced (10%) and now (80%). A total of 12 spots are available daily on Today. The price to an advertiser is $250 for five station breaks which run for 15 minutes. The ad is re-peated for six weeks.

The track record of the electronic time signal plan so impressed P. A. (Buddy) Sugg, vice president of NBC owned stations and NBC Spot Sales, that he recommended other NBC tv stations consider it. A presentation outlining W R C A -T V’s experience was mailed to affiliated stations last week.
Successfully reaching more people has met only half of Bartell Family Radio objectives. Attracting and holding more different people young and old, all over town, in every walk of life — has been a continuing accomplishment. A program of broad appeal, locally accented, is in the Bartell pattern of audience composition. Here is professionalism based upon more than a decade of scholarship, salesmanship, showmanship. This is Bartell Family Radio.

DOES C-P-M MEAN BELLY-BUTTONS?

- Mayer questions tv research
- Author addresses market men

An awesome challenge was hurled at media researchers last week by an “outsider”: when you talk about cost-per-thousand, what are you counting—“belly-buttons?”

The outsider: Martin P. Mayer, author of the best-seller Madison Avenue, U.S.A. The insiders: members of the media research discussion group of the American Marketing Assn., hearing Mr. Mayer’s talk at a Thursday luncheon in New York.

Mr. Mayer’s argument is one of “comparability of units.” He contends that while researching his book he was shown numerous C-P-M studies of all media—none of which contained a hint that these figures dealt with cost-per-thousand of potential customers. Thus, he asked, if media can’t tell through such slide-rule findings the makeup of its audience, how can it hope to persuade advertisers that they are getting their money’s worth?

“This is not a technical question,” said Mr. Mayer. “The comparability of units technically is itself a massive problem. But even... if you could measure television audiences against outdoor audiences and come up with a scientifically valid analysis, you would still leave a vast area open for the exercise of plain brute judgment.”

He explained: “No advertiser seeks audience for its own sake. Baid men by the thousand may wistfully watch your hair tonic commercial but not many of them will buy your product. And those who do cannot be regarded as long-term customers, anyway. The question is not how many do you reach. It is, always and inescapably, whom do you reach.”

Mr. Mayer suggested that researchers consider the proposition of breaking down audiences into “abstract categories.” The way Mr. Mayer envisions them: (1) The person who believes in the product and uses it (the “most desirable”); (2) the person who doesn’t use the product but is ready to try it; (3) the person who has no prejudice either for or against the product and is willing to try something new; (4) the person who uses another brand but who might be convinced to switch; (5) the person who has used the product once but switched to another brand for reasons he himself doesn’t know; (6) the person who doesn’t use the product at all and who won’t spend the money for it; (7) the person who thinks the product is “no good.”

This proves, Mr. Mayer felt, that there is no such animal as a “typical consumer.” Certainly, he said, a tv advertiser cannot hope to address a “certain specific income group.” When a manufacturer sponsors an expensive program or buys a full-page advertisement he is reaching mass and somewhere in that “dense forest” may lurk the person who will buy the product.

A. C. Nielsen Granted Patent For Instantaneous Audimeter

A patent covering its new tv instantaneous measurement device has been issued to A. C. Nielsen Co.—the most recent in a series of 40 involving radio-tv audience measurements assigned to the market research organization.

The Nielsen-developed device currently is being tested in “pilot stage operations” at its Chicago headquarters and is being refined for eventual industry use, probably sometime before year’s end. It is similar in objective to American Research Bureau’s Arbitron, with certain variable features, and is called the Instantaneous Audimeter (Advertising & Agencies, April 7).

The patent (No. 2833859) covers use of the Audimeter for measurement of television audiences at a central point remote from homes being monitored and transmission of telemetering information over leased lines. The device prints total number of homes using tv and total number viewing each program by each minute of the program day. The patent also covers devices for recording data necessary “to make more comprehensive audience studies such as viewing by various market sections, audience flow and other viewing trends required by the industry.” It was issued and assigned May 6.

Three New Directors for Bates

Three new directors were elected for one year terms by Ted Bates & Co., New York, it was announced last week by William H. Kears, president of the agency. They are Edward A. Grey, vice president and director of media; Dan Rodgers, vice president and account group supervisor, and Allen M. Whitlock, vice president and account group supervisor. Mr. Grey and Mr. Rodgers have been with the agency for three and a half years, Mr. Whitlock for eight.

Klau-Van Pietersom-Dunlap Takes Over Chicago Agency

Klau-Van Pietersom-Dunlap Inc., Milwaukee agency specializing in agricultural accounts, will absorb facilities and personnel of Critchfield & Co., with the latter agency becoming its Chicago office. The move becomes effective this week. Among Critchfield’s 20-plus accounts are such radio clients as Allgauer Restaurants, Chicago Federal Savings & Loan Assn. and Crane’s Hybrid Corn Co. with agency billings of over $2 million. Klau-Van Pietersom-Dunlap bills an estimated $10 million. As part of the consolidation, Edward Nesbitt, president and owner of Critchfield, will serve as consultant and Charles Nesbitt, executive vice president, becomes Chicago office manager.

‘Challenge’ Over After Summer

The fate of Revlon’s The $54,000 Challenge apparently has been resolved, with the show—now seen Sundays, 10-10:30 p.m.—slated to leave CBS-TV the end of this summer. In its place, Revlon hopes to schedule The $54,000 Question, alternate sponsor P. Lorillard Co. willing. (Lorillard had expressed great interest in The Magnificent Montague with Vivienne Segal, but Revlon declined to stamp its approval. Though deprived of Question, long-time Tues., 10-10:30 p.m., berth on CBS-TV by next season’s scheduling of the new Garr Moore Show (10-11 p.m.), Revlon has signed to sponsor the 10-10:30 half of the program.)

BROADCASTING
NEW YORK--THE UNITED PRESS ASSOCIATIONS AND INTERNATIONAL NEWS SERVICE JOINED FORCES TODAY AROUND THE WORLD IN THE CREATION OF A SINGLE NEWS AGENCY NAMED "UNITED PRESS INTERNATIONAL."

THIS IS THE FIRST DISPATCH OF THE NEW SERVICE WHICH WILL EMBRACE THE LARGEST NUMBER OF NEWSPAPER AND RADIO CLIENTS EVER SERVED SIMULTANEOUSLY BY AN INDEPENDENTLY OPERATED NEWS AND PICTURE AGENCY. AGREEMENTS COVERING THE CONSOLIDATION OF SERVICES WERE SIGNED BY BOTH SIDES ON MAY 16TH, AND THE ANNOUNCEMENT WAS DELAYED UNTIL THE PRESS WORK HAD BEEN WORKED OUT.

SYSTEMS OF TRANSmitting Both News AND PICTURE SERVICES TO INSURE THAT NEWSPAPER OR ANY PERSON CAN ADEQUATE NATIONAL AND INTERNATIONAL NEWS PRODUCES SYSTEMS OF THE TWO ORGANIZATIONS INTO ONE EFFECTIVE TRANSMISSION NETWORK HAS BEEN UNDER WAY SINCE SEPTEMBER OF 1957. THE PLAN WAS EVOLVED BY FRANK H. BARTHOLOMEW AND LEROY KELLER FROM THE UNITED PRESS AND J.D. GORTATOWSKY AND KINGSBURY SMITH FROM THE INTERNATIONAL NEWS SERVICE.

This is the historic first dispatch of United Press International.

It marks the start of operations by the greatest independent news agency, combining the forces and facilities of United Press Associations and International News Service.

The UPI logotype represents objective, thorough, and enterprising reporting, by word and picture, throughout the world today.
There's more to Florida...
Streamlined diesel locomotives hauling tons of freight and passengers are an even more familiar sight today than Florida's abundant marine life, especially in the Jacksonville area. Rail center of the Southeast, Jacksonville is terminus for two railroads and the site of General Motors' big diesel plant. The Atlantic Coast Line Railroad is soon to move its entire 1,350-man headquarters here.

and to WMBR-TV! Amid Jacksonville's widespread expansion, WMBR-TV continues to maintain its clear-cut television leadership. The latest ARB, the March metro area study, gives WMBR-TV an 86% lead over the competition during nighttime viewing hours and a 54% lead for the total week. WMBR-TV has 22 of the top 25 weekly evening shows, 20 of the top 25 daytime programs...and is first in 334 out of 480 quarter-hours. And that's only in the metropolitan area, where WMBR-TV's vastly-superior coverage makes no difference. (The latest total-area ARB gives WMBR-TV an average 131% total-week lead!)

Metro area or total area, day or night, there's a great deal more to...

Two show businesses get together as radio-tv boosts Ice Capades sales

Radio and tv are great entertainment media, as everybody in show business will readily admit. No one in advertising will argue that the broadcast media are not great advertising media. Yet, when it comes to advertising show business, radio and tv have traditionally been relegated to the back row, well behind print media.

This seemed all wrong to George Irwin, vice president of Heintz & Co., Los Angeles, account supervisor of advertising for Ice Capades, and to John Thackaberry, account executive for this touring ice show. In the past, advertising for the traveling ice attraction has been divided among newspapers, car cards, radio and tv. But last year the Heintz executive persuaded John Harris, owner of Ice Capades, and Jack Sidney, advertising and publicity director for the show, to change that formula and put the emphasis on radio and tv.

The new approach was first tested in Boston. The results were sensational: seat sales increased one-third; gross revenue was up $180,000 over the Ice Capades' visit to Boston the previous year. Obviously, the prescription was more of the same for the Los Angeles run.

So, in January, the Heintz executives called on the radio and tv stations in Los Angeles, told them that Ice Capades was to open in that city April 30 but that its 1958 stay would be only 2½ weeks instead of the usual four weeks. Again departing from tradition, they did not tell the stations how much money they had to spend but asked them "What will it take for you to sell out the house for this limited run?"

"The reaction was great," Mr. Thackaberry said last week. "The stations gave us elaborate proposals, listed scores of availabilities, suggested planned program positions for our spots, offered merchandising and publicity tie-ins, reported on ratings and successful use of similar plans by other advertisers. They couldn't have been more helpful."

Responding in kind, the agency men didn't haggle. In virtually every instance, the station's proposal was either accepted in full or turned down. Time for Ice Capades was placed on tv stations KABC-TV, KNXT, KTLA and KTTV. In radio, KDAY, KFAC, KGIL, KMPC, KNX and KWKW were used.

Heavy emphasis was put on 10-second ID's in both radio and tv, starting April 7 and building to a peak during the week preceding the April 30 opening and the first week of the Los Angeles run, then tapering off to May 11. By then, the advertising had done its job. The last week of the run, which ended May 18, was virtually sold out before it commenced.

"We used spots as short as seven seconds and as long as full minutes," Mr. Thackaberry said, "but we used shorter ones most in the belief that Ice Capades was well known to the Los Angeles public and that our main job was to announce that Ice Capades was coming to town April 30 and that it was staying for only 2½ weeks, the shortest Los Angeles run in Ice Capades history. This was the theme of every announcement."

Supporting the spot campaign, the station's all broadcast interviews with Ice Capades stars, conducted contests with tickets to the Ice Capades as prizes. One of the most successful was that of KNX, whose morning disc jockey, Bob Crane, asked listeners to write their names on postcards and send them to the station for a chance to win an Amana food freezer. More than 10,000 responded. Each day he broadcast a mystery jingle with clues to an object frozen in the freezer, then telephoned the writers of cards picked at random until the object was identified as the coif worn by Bette Davis, now narrator of a daytime serial on KNX-CBS, in her movie portrayal of Queen Elizabeth I. Calls were made through the entire KNX broadcast day; each person called got two tickets to Ice Capades in addition to a chance to guess at the mystery object.

In addition, Mr. Crane, his wife and their son learned to ice skate in the weeks preceding April 30, their progress being fully reported on his morning programs. (KNX's outstanding promotion for Ice Capades can be attributed (1) to the opportunity to build audience for Bob Crane, a comparatively recent arrival at the station, and (2) to the fact that KNX received about 25% of the Ice Capades' total broadcast appropriation.)

The Cranes demonstrated their new skating skill on May 1, "second premiere night" of Ice Capades, during a special half-hour program put on by radio and tv stations before the regular Ice Capades performance. KTLA's remote unit picked up the broadcast talent show and put it on the air for the home tv audience. KTTV also did a remote telecast of Ice Capades on opening night. "All the stations cooperated wonderfully with special promotions of one kind and another," Mr. Thackaberry reported. "They all helped make the campaign the big success it was." He cited, among others, the promotion Spanish-language KWKW gave the Carmen ice ballet, top spectacle of the Ice Capades performance, to effect an unusually large sale of tickets to the city's Latin American population.

In cold figures, Ice Capades' 1958 Los Angeles broadcast budget was virtually doubled over 1957, while the print media received about the same each year.

The results: ticket sales for this year's 28 performances topped those for last year's 35 performances by 25%. (Final dollar figures are not yet tabulated.)

Lambert & Feasley Gets Hudnut

Warner-Lambert Pharmaceutical Co. and Sullivan, Stauffer, Colwell & Bayles, New York, have announced that by mutual agreement Hudnut hair preparation brands, now being handled by the agency, will go to Lambert & Feasley. The shift will be effective Aug. 1. SSC&B, however, will continue to serve Warner-Lambert as marketing consultant on new products as they are developed in research. Hudnut hair preparations has had a budget of nearly $2 million. SSC&B had served the account for the past year; prior to that it was with Kenyon & Eckhardt.

EVERYBODY'S IN THE ACT IN L.A.

... and the sponsor likes it. John Harris, owner of the Ice Capades, is obviously pleased with the ticket response to such stunts as the family act put on by the Bob Cranes in conjunction with the radio-tv campaign in that city (see story).
Your Omaha radio investment talks biggest . . .
where the biggest Pulse* is

New Pulse? Old Story! KOWH is first a.m.; first p.m.; first all day!
7.9 average Pulse! 32 out of 40 first place quarter hours! Thus
KOWH continues to dominate Omaha's radio day, just as it has for
almost 8 years.

The reasons: Programs and personalities that get through to people.
Audiences aren't the only ones who turn to KOWH. Advertisers do too.

SCRANTON BUYS ROACH STOCK

Price reportedly in excess of $15.5 million

The purchase of all outstanding stock of Hal Roach Studios, Culver City, Calif., by the Scranton Corp., Scranton, Pa., was announced last week at a news conference in New York by Alexander L. Guterman, board chairman of the F. L. Jacobs Co., Detroit, major stockholder of the Scranton Corp.; Harold Megargel, president of Scranton, and Hal Roach Jr.

Purchase price was not divulged but Mr. Roach said it would be "in excess of $15.5 million." He added that he could not make the figure more specific because there were numerous legal ramifications that could not be explored at this time. It is believed that Mr. Roach will receive a certain sum of cash, long-term notes, participation in sales and a substantial stock interest in the Scranton Corp. as his share of the transaction. Mr. Roach places a value of $12.5 million on the physical plant of the Hal Roach Studios alone.

As a result of the acquisition, Hal Roach Studios will be operated as a wholly-owned subsidiary of Scranton Corp. Mr. Roach will continue as president and executive producer of this division and will join Scranton as a member of its board of directors. He revealed he has a five-year contract with the new owners, plus options to renew the agreement.

In turn, Scranton will receive all the properties belonging to the Roach organization, comprising the 18-acre studios in Culver City, all existing tv and motion picture properties and the entire film library of the company.

Mr. Guterman reported that present plans call for major expansion of Hal Roach Studios activities in new fields and said the acquisition by the Scranton Corp. will provide additional capital for such expansion moves. These will include an increase in the present schedules of production of films for tv and feature-length motion pictures for theatre distribution, including production activity in Paris and London. Plans also encompass the setting up of a national distributing organization for tv films.

Hal Roach Studios was organized in 1921 and under the supervision of Hal Roach Sr. produced more than 600 features, short subjects and comedy films until 1942 when the U.S. Army leased the property. In 1948, the studios converted to tv production exclusively and in 1955 Hal Roach Jr. acquired ownership.

In addition to the film series produced especially for television, Roach motion picture properties syndicated to tv include the "Our Gang" comedies released to tv as Little Rascals, the Laurel and Hardy and Charlie Chase comedy short subjects, plus a limited group of feature films. The company also has developed 10 new tv film series which it is hoping to sell to networks or stations.

The huge backlog of tv films and motion picture product released to tv by Roach gave rise to speculation that one reason for the vagueness about the sales price is that at present a definite value cannot be assigned to the product because much of it is re-run film, depreciation value of the product is uncertain and the ultimate sales results are not predictable.

Mr. Guterman said the move is in line with diversification plans of Scranton and F. L. Jacobs. Scranton, he explained, is a local manufacturer primarily but also is active in the manufacture of electronic parts and tents. F. L. Jacobs is an automobile parts manufacturer and recently acquired Symphonic Electronics Corp., manufacturer of conventional and high fidelity phonographs.

Gross sales of Scranton Corp. in 1957 amounted to about $7 million and the company reported a loss of about $360,000. Gross volume of business by Roach in 1957 was about $10 million, and, according to Mr. Roach, the company operated "very much in the black," F. L. Jacobs' gross volume in 1957 approximated $50 million and the company "operated at a profit," according to Mr. Guterman.

Paramount to Enter Tv With New Space Series

Jim Schulke, vice president and general manager of Paramount Sunset Corp., has announced that Paramount will enter the television production field with a series entitled The Conquest of Space. The format will be a space fiction documentary, which will look back to the present era from a half-century in the future.

Paramount plans call for 39 half-hour films for the first year, starting with an orbiting space-wheel satellite launched by the U. S. The man on the satellite will travel to the moon to establish a space station. The second year of the series calls for space men's trips to Mars and Venus and the third year, the establishment of a space station on Mars.

Rip Van Ronkel, writer of "Destination Moon" screenplay, is working on Conquest of Space. The series will be filmed at Paramount Sunset Studio.

Mr. Schulke plans to go to New York early this month with a pilot of the series to confer with networks and potential sponsors. "If the expected sale is not made, Paramount will still go ahead with the series," Mr. Schulke said.

He added that Paramount had been promised the technical aid and cooperation of the Air Force in all details and that there probably won't be anything shown during the first year that won't actually happen within the next 25 years.

Film Producers Assn. Contracts For Videotape Jurisdiction

The Film Producers Assn. of New York announced last week that agreement has been reached with the International Alliance of Theatrical Stage Employees concerning jurisdiction over videotape. A dispute over videotape led 5,000 members of IATSE to conduct a one-day strike against FPA on May 5 [PERSONNEL RELATIONS, May 12].

Though IATSE always had jurisdiction over videotape in contracts with FPA members, the dispute arose primarily over IATSE's insistence for protection in the event that producers sub-contracted videotape work to companies that may not have a contract with IATSE or if producers established subsidiary companies. The agreement provided that producers shall subcontract only to firms that hold IATSE contracts, "except where there are no such subcontractors available to offer services at competitive prices." FPA also agreed to grant tape jurisdiction to IATSE in the event producers establish subsidiary companies. FPA stipulated, however, that if an FPA member sells his firm to a company holding a contract with a union other than IATSE, IATSE will have no right to jurisdiction.

The terms of the agreement have been incorporated into a basic contract which takes effect as of May 22 and expires on Dec. 31, 1959. It also provides for a trial period until Dec. 31, 1959 during which producers and various union crafts will work together to determine rates and working conditions to apply in the industry.

FPA, which consists of leading producers in New York of tv film commercials and industrial films, has two members with VTR equipment. They are Elliot, Unger & Elliot Inc. and Filmways Inc. Six other producers plan to install equipment "as soon as is practicable."
The BIG difference in Philadelphia radio is..............

WPEN is the only Philadelphia radio station presenting LIVE TALENT 24 hours a day, 7 days a week. Listeners tune to enjoy the TALENT just as much as to listen to the music.

The WPEN entertainers are in constant demand for store openings and business celebrations. They make continuous personal appearances—they are a real part of Philadelphia.

WPEN is proud of its ratings, coverage, cost per thousand, merchandising services and promotion. But the BIG difference in Philadelphia radio is TALENT . . . that sells.

Represented nationally by Gili-Perna
New York, Chicago, Los Angeles, San Francisco, Boston
December Bride, Dick Powell's Zane Grey Theatre and the Danny Thomas Show, which has been in the Top Ten ever since it moved to the CBS Television Network.

**The Ann Sothern Show.**
No one in the food business does more advertising than General Foods. No one in the food business uses more television. And no one in the food business has more customers.

For the past six years General Foods has consistently placed most of its television advertising on the CBS Television Network — where this season it presented three of the most popular nighttime programs.* Each of these programs attracted a weekly average of more than 30 million people. Combined, they brought General Foods 235 million advertising impressions a week through the October-April season.

Next season General Foods will add a fourth program** to this nighttime schedule. Its reasoning is simple and direct: The more people reached as potential customers, the better its chances for sales. Television offers the biggest potential audience, so television gets the biggest share of the company’s advertising dollar.

And since the television audience keeps on growing each year, it is only natural that General Foods’ investment should grow too.

Like General Foods, other leading advertisers such as Westinghouse, U. S. Steel, Prudential, Procter & Gamble and General Motors’ Delco Division will also profit by the expanding television audience. They have joined an impressive wave of renewals on the network which for 68 consecutive Nielsen Reports has provided the largest nationwide audiences in advertising.

**CBS TELEVISION NETWORK**
FOUND: QUALITY NEWSFILM SOUND THROUGH OXIDE STRIPING METHOD

A thin stripe of iron oxide along one edge of regular 16 mm movie film is slowly revolutionizing the television newsfilm business. It is a kind of "magnetic tape" sound track applied to the film, resulting in "live" quality sound in contrast to the "rain barrel" effect found in some newsreel clips using the traditional but lesser-quality photographic sound track.

There hasn't been much talk about this significant development because of the slow pace of introduction among TV station and other users who must adapt existing equipment and procedures and because of the highly technical nature of the innovation. There is also an element of slight extra cost, ranging from 1½ to 2½ cents per foot for the striping.

But CBS Newsfilm, under the direction of Manager Howard L. Kany, has come up with a key unit of equipment which may well be the turning point for wider acceptance of the magnetic stripe and the distinctly higher quality sound film it makes possible. This equipment is a continuous contact film printer, designed and produced under the supervision of R. C. Rheineck, CBS Newsfilm chief engineer. This equipment, now at Du Art Labs, CBS Newsfilm processing plant in New York (see picture), permits the production of syndication prints involving magnetic stripe in a single operation and in the same fast time as ordinary photographic sound prints.

The printer is the only one of its kind but it soon will be duplicated in other CBS Newsfilm distribution centers at Washington, Chicago and Los Angeles, and later Seattle and St. Louis. The printer licks the one major bottleneck in newsfilm, especially syndication: the element of time.

The magnetic stripe offers several factors which enhance the quality of the sound track over the optical system. These include improved frequency response, greater signal-to-noise ratio and lower harmonic distortion. Magnetic stripe in addition provides the operational advantage of permitting the camera crew to monitor the pickup during filming and to adjust sound control immediately. There is also some reduction in size and weight of gear the camera crew must carry on any assignment.

CBS News began practical use of magnetic stripe in November 1956 in footage for Douglas Edwards With the News. CBS-TV Network use has expanded since then. CBS Newsfilm, which syndicates a minimum of 60 stories weekly to 109 stations in the U. S. and 16 foreign countries, shipped its first optical prints made from magnetic stripe originals earlier this year, the first story being Secretary of Agriculture Ezra Benson's April 24 news conference. About 40% of all footage now is being shot with magnetic stripe and is expected to hit 100% by the end of the year, Mr. Kany predicted. Conversion of existing camera gear and acquisition of new gear with magnetic stripe heads included is underway.

NBC-TV, which does not have the print problem since it is not involved in syndication, also has been converting to magnetic stripe sound tracks over the past year and about 80% of all news footage is in the newer medium. NBC-TV has installed new projectors in New York, Washington, Chicago and Los Angeles to handle the film and is converting and acquiring new film camera equipment. NBC syndicated its news films for six years, dropping out of this phase in 1953.

ABC-TV does not have its own news film crews like CBS and NBC, instead retaining INS-Telenews as basic supplier. Produced by Hearst Metrotone, Telenews uses the photographic sound system but has been considering magnetic stripe and will supply it when there is sufficient demand, according to Manager Robert H. Reed. A limited amount of footage for foreign consumption is supplied in magnetic stripe to permit language voice dubbing. Telenews' New York processor, Deluxe Labs., which handles magnetic stripe in the theatrical field, explained it must still use a double process to produce magnetic stripe prints.

Telenews entered TV news syndication in 1948 and now serves over 100 stations in the U. S. and some 20 foreign markets.

UP Movietone, which has been syndicating TV since 1951 and supplies 94 stations domestically and abroad, sees the photographic system long entrenched as far as syndication is concerned but will go magnetic "when the users want it." Since all stations can project optical sound and very few can handle magnetic, UP feels any big demand for magnetic is still a long way in the future. Even the most enthusiastic users of Movietone are not asking for magnetic stripe, content to voice-in live over film the local dialect, rather than use dubbing.

The principal projector makers, RCA, Eastman Kodak and Bell & Howell, are reported making magnetic adaptors available to TV stations for their existing equipment and CBS engineers say the conversion job is fairly simple and can be handled by station personnel.

Why does "rain barrel" sound occur in some news films using photographic sound and not in theatrical movies or feature news films using the same process? The difference is that spot news films, because of the precious time element, are shot by "single system" whereas the higher quality theatrical and feature films are done by the much slower "double system." In the single sys-

![Howard L. Kany (left), manager of newsfilm, CBS News, nears from inventor R. C. Rheineck, chief engineer, CBS News, how this custom-built prototype of a magnetic stripe film printer operates at Du Art Film Labs., New York. Mr. Rheineck's right hand is pointing to assembly which makes magnetic print directly from magnetic original (both film picture and magnetic sound stripe). Assembly below this makes regular optical sound-and-picture print from magnetic original.](image)
KNOWLEDGE

Knowledge and speed guide the surgeon's hand.

In our fast-moving field, too, knowledgeable decisions frequently must be made quickly.

That's why ... when we give you facts ... we're careful to make them accurate, complete and pertinent. And, whenever possible, get them to you fast while they still have meaning and application.

Reverse Stock Split
Sought by C & C Tv

C & C Television Corp., New York, will ask stockholders at a special meeting June 17 to approve proposals for a one-for-two reverse stock split and for reduction in the authorized share of stock from 10 million to 3 million. If approved, the transaction will have the end result of authorizing the company to raise an extra $2 million in stock sales.

A spokesman explained that the par value of stock now outstanding is 10 cents per share or a total amounting to $1 million. The stock has been selling at $1 per share on the American Stock Exchange in recent months, and, according to the company spokesman, the exchange initiated the one-for-two reverse split. This means that if the plan is approved, there will be one million shares outstanding at $1 a share. If the second proposal is passed, C & C would be authorized to issue shares at 80 cents per share, or one for every five original shares.

Stockholders also will be asked to change the name of the company from C & C Television Corp. to Television Industries Inc. in order to "reflect more accurately the purpose of the company." C & C Tv owns the RKO library of feature films and other motion pictures, which it makes available to stations in exchange for time. The time is sold to International Latex Corp. under terms of a five-year agreement which reimburses C & C in the amount of an estimated $20 million over that period. C & C recently acquired control of Hazel Bishop Inc.

In its annual report mailed to stockholders, C & C Tv reported a new income from television operations in 1957 of $937,323 but a combined net loss from the year of $205,257. The loss took into consideration the operation on non-television subsidiaries which were transferred to National Phoenix Industries Inc. under a reorganization dated July 31, 1957.

It was explained that up to last July, a company called C & C Super Corp. was in existence, which consisted of C & C Television Corp. and National Phoenix Corp., the latter composed of Lorraine Mfg. & Power Products and Nedick's Inc. Last July 31, C & C Super stockholders voted to spin off National Phoenix Industries and establish a new company for television activities, C & C Television. The spokesman explained that it was the deficit operation of Phoenix Industries for the first seven months of 1957 that resulted in the combined net loss shown by C & C Tv for 1957.

Stereotoons Formed to Produce Three Dimensional Animations

Stereotoons, a new company specializing in the production of three-dimensional animated motion pictures for tv and theatres, has been formed by Don Hillary, retiring business agent for Motion Picture Screen Cartoonists, IATSE Local 839, Hollywood. Stereotoons is at 1546 No. Highland Ave., Hollywood; telephone: Hollywood 3-2326.

Associated with Mr. Hillary in the new company are Dave Fleischer, veteran producer-director of such animated films as the Betty Boop and Popeye series, and Jack Palladino of Disney studios.

The company's first production, a 20-second public service tv film, is now being distributed to tv stations by mental health groups across the country. A theatrical short film, "Lil' Pedro and Tasty Taco," will be premiered in June in 36 Arizona theatres.

NTA to Extend Trade Ads
On Fall Programming Plans

National Telefilm Assoc., New York, has reported that its advertising campaign on behalf of the NTA Film Network has been "so well received" that the effort will be extended to three additional weeks. Originally, the campaign in consumer and trade publications was scheduled to cover 11 advertisements in a three-week period. It is being lengthened to encompass 14 advertisements over five weeks and will involve expenditures of about $200,000.

The decision is said to have resulted from "favorable response to the impact created by the campaign among advertising agencies and advertisers," which are now receiving full-scale presentations on the network's fall programming plans. The campaign was conceived by Kermit Kahn, director of advertising for the NTA Film Network and Ely Landau, board chairman, in association with Moss Assoc., New York, the company's advertising agency.

UPA Inaugurates Friendly Pitch:
Open Houses, Seminars to Order

UPA Pictures Inc. this week will begin "selling" advertising agencies that there's more to commercial animation than merely to illustrate the Piel Bros.—Bert and Harry—who two of UPA's "clients." At the request of agencies, UPA will conduct "seminar screenings," bicycling around town, as it were, flying squads of UPA people helmed by a studio producer. The UPA "team" will show five or six reels of animated film, cartoons and commercials, then answer any and all questions posed to it by attending agency personnel. One major agency, Compton Adv., already has requested two such seminars for its executives.

Furthermore, UPA will hold "open house" each Wednesday afternoon at 5 p.m. at its New York headquarters, 60 E. 56th St., for all "communications workers" interested in seeing what animation is all about and how best it can be used for selling purposes. The screenings will be accompanied by open afternoons.

Both programs are under the direct supervision of Paul Garrison, transferred from Burbank to take over the sales operations of the New York office. He succeeds Eli Feldman, who resigned a fortnight ago to become vice president of sales at Pelican Films Inc., New York.

**TRENDEX**

Date: May 25, 1958  Time: 1-6:30 P.M.  Recall Sets in Use: 54.9
On May 7th, WNTA-TV, the new station in town, started operations with a wallop. (We're quoting Time Magazine.) And the rest of the press concurred, judging from a few typical comments you'll find at the right. The ratings, too, registered impact, as you can see by studying the left-hand page. Both ARB's Telephone Coincidental and Trendex showed WNTA-TV was the Number 3 station in town in at least three time periods! A special hit seems to have been made by Art Ford's "Jazz Party", and so we asked Trendex to double-check it. Result: 22% of those queried (or a member of their families) had seen this show that had been on the air only a few weeks, Trendex reported. Naturally, we were pleased, but this is only the beginning...what with a host of new programming in the making that we'll telecast...as the local flagship station of the NTA Film Network. That includes, starting in the fall, such audience-winning new program series from 20th Century-Fox and Desilu Studios as..."This Is Alice", "Man Without A Gun", "How to Marry a Millionaire", "Premiere Performance", "TV Hour of Stars", The Shirley Temple Specials, to name a few. And we intend to keep coming up with fresh, bright, imaginative programming...based on the principle that there are plenty of minds and imaginations in that audience out there, just waiting to be stimulated, nourished and entertained. Keep looking!

Jack Gould, N. Y. TIMES: "On its second night of operation, WNTA-TV has shaken up tired New York television with a resounding wallop."

TIME: "WNTA-TV began with a wallop...By the end of its first day, WNTA had...increased its number of viewers (over WATV) 4,200%."  

VARIETY: "WNTA-TV's Razzmatazz Freem Zings up N. Y. Video Spectrum."

Jo Coppola, N. Y. POST: "If there's a lesson to be learned in the reception accorded WNTA-TV, it is that a telecaster with a little boldness, imagination and know-how could command the attention of the nation's viewers."

Ben Gross, N. Y. DAILY NEWS: "Live programs of network quality."

CUE: "WNTA-TV's ambitious programming concepts may make it a channel to be reckoned with."
Why they shoot films overseas, and why saving money isn't why

Any saving in the cost of day-to-day shooting of tv films abroad is quickly dissipated by the added expense of doing business so far from home base, according to Philip N. Krasne, partner in the tv film production-syndication firm of Gross-Krasne Inc.

“Hollywood is the best place in the world to make tv films," Mr. Krasne declares. “Unless there’s an overriding reason for doing the production abroad, it’s much better, much easier and no more expensive to do it at home. Producers who think they can go anywhere else and get a saleable product more cheaply are in for a big surprise.”

Last summer, Gross-Krasne entered into a co-production arrangement with Kenya Productions Ltd., British company with permanent production facilities in Nairobi, where two tv series, African Patrol and The Adventures of a Jungle Boy, are in production for American syndication by G-K. From this experience, Mr. Krasne notes:

Actors: Leads and main supporting players, cast in London, work in Nairobi under a portal-to-portal plan which, despite the lower salary scale, gives each London actor total earnings more than his Hollywood counterpart would get for the identical role.

Casting: Parts are cast in London under the supervision of Guy Thayer, executive vice president of Gross-Krasne Ltd., G-K’s English subsidiary, and Donald Hyde, vice president who was producer of the Lone Wolf and O. Henry Playhouse tv series, to insure that characters and accents are of the kind that are readily accepted by American audiences. Messrs. Thayer and Hyde also supervise all scripts for the same reason.

Production: Kenya Productions does the physical production, but Hal Klein, formerly G-K production supervisor, has been in Nairobi since last May as the G-K on-the-scene representative.

Editing: All film is processed and edited by G-K editors and Mr. Krasne gives the films a final inspection in Hollywood.

Transportation: Round-trip plane fare, London to Nairobi and return, amounts to about $1,000 per actor. Air freight costs for shipping equipment from here to there and for sending film back also add up.

In addition might be added a sizable item of executive supervision. Mr. Krasne went to Africa last summer to set up the physical operation, a task which entailed working out a sort of lend-lease arrangement for approximately $150,000 worth of equipment. His partner, Jack Gross, has been spending half his time in London, as part of what Mr. Krasne calls “the insurance factor in getting the quality product we’re after.”

The authentic jungle backgrounds needed for these jungle tv programs provided the main incentive for going to Africa to film them, Mr. Krasne says. “We could have stayed in Hollywood and used stock footage and a stage jungle, but if we had we’d have wound up with “B” pictures broadcast at “B” times, before 6 p.m. or after 11 p.m., and we’d have to sell them at “B” prices. We’re asking, and we’re getting, top prices for African Patrol because it’s a good enough show to play in top time. We couldn’t do this with an African series made anywhere but in Africa.”

Mr. Krasne predicts that this series on its first United States run will gross about the same as O. Henry Playhouse did, $1.6 million. He does not expect widespread reruns, but does expect some, and rather quickly, in some markets. There is one economic advantage in filming abroad: the foreign-made films are not subject to the rerun fees required in contracts with the U. S. guilds, saving up to $2,500 per episode by third rerun. Mr. Krasne estimates.

“To make top quality adult programs of the type we are having made takes the kind of budget that needs a worldwide market to be repaid. We couldn’t absorb the entire costs out of the proceeds of U. S. syndication alone," Mr. Krasne states.

Films made under a British production set-up automatically qualify as “quota pictures” in the United Kingdom, he says, pointing out that 86% of tv film playing time in Britain is restricted to British-made product, with only 14% left for imported pictures. “This means $5,000 per episode in film rentals that would otherwise not be available,” he says, noting that with only a limited amount of quality British-made tv films there’s a “healthy sellers’ market.”

The situation is quite the other way for U. S. tv films, which are forced into intense competition for the limited amount of British air time available to them, he explains. “Our only U. S.-made tv series to get into the United Kingdom was O. Henry Playhouse and we got only $2,000 an episode for it, which is the top price for American tv films as far as we know.”

By providing most of the financing for the African films, Gross-Krasne receives the United Kingdom rentals on them, in addition to exclusive distribution rights in the Western Hemisphere, which so far means the U. S. and Canada, although G-K is planning to invade Latin America in the near future and eventually to get worldwide distribution for its tv films.

“We believe that adventure films with a South African background have a universal appeal,” Mr. Krasne states. “In African Patrol there are all of the elements that make good westerns popular as adult escapist entertainment, played against a background that is more strange and therefore more exciting than the too-familiar western hills and prairies. Jungle Boy, which is being filmed in color, might be described as an African Lassie, only the boy’s pet is a cheetah instead of a dog.”

With no particular wish or intention of specializing exclusively on "adult Africans," Gross-Krasne believes that this is a field that can profitably be worked for some time to come. Production is now well along for a third series, based on the adventures of Trader Horn.

FCC OUGHT TO ROPE, BRAND CATV, WESTERN TV OPERATORS TELL HILL

- They ask same rules for both broadcasters, antenna operators
- Troubles with microwave, poaching boosters, translators aired

Small town telecasters mainly from the wide-open spaces of Montana, Idaho and Wyoming went running last week for community TV operators.

Their hunting ground was the Capitol chamber of the Senate Committee on Interstate and Foreign Commerce.

A dozen telecasters told the committee that the FCC ought to take control of catv systems so that they play under the same rules that apply to tv stations.

Many of them also urged that the Commission be required to weigh the impact on existing tv stations of translator or booster services. And, that translators or boosters be required to shut down when a local tv station is established.

The broadcasters told the committee that small town tv operation is threatened by the unregulated establishment of community antenna systems which bring into their backyards three or more tv signals from distant, big-city markets.

They asked that the FCC:
- Regulate catv systems so that broadcasters and antenna operators operate under the same rules.
- Permit tv stations to own and operate their own microwave relays in order to bring network programs to their communities.
- At present, FCC allows this, but caution that such service belongs to common carriers and broadcasters must be ready to amortize this investment in a short period.
- Amend present translator regulations—and incorporate in prospective low powered, vhf booster rules—to preclude translators or boosters from bringing in outside tv programs which would adversely affect existing local tv stations. And, to provide that such services go out of business if a local tv station is established.

The FCC, one broadcaster said, should and must regulate the radio signal “from the studio to the home receiver.”

The question of catv, booster, translator and satellite impact on hometown tv began Tuesday afternoon, with FCC Chairman John C. Doerfer making an impassioned plea that the Commission remain out of this picture. He strongly emphasized that the Communications Act provides that broadcasting is a competitive enterprise. He asserted that this meant the FCC should not intervene to protect the economic status of tv stations.

“The FCC’s primary duty is to prevent interference and to aid in the development of a good and efficient service,” Mr. Doerfer asserted.

If Congress thinks that the Commission should weigh the economics of broadcasting, then it should amend the Communications Act, Mr. Doerfer said, to make it plain that broadcasting is not an unregulated industry in free competition.

Mr. Doerfer referred to “disgruntled” broadcasters who run to the Congress when they are in trouble. Presumably he was referring to economic trouble.

Mr. Doerfer referred to the catv inquiry now underway by the FCC and said that the FCC would prefer to gather the facts on catv, boosters, translators and satellites and then present them in a package to Congress.

The Commission invited interested parties to submit by June 27 answers to a list of 14 questions regarding the impact of these services on tv stations (Government, May 26).

Mr. Doerfer’s statement outlined the problems involving the impact of catv operations on tv stations and the Commission’s doubts regarding jurisdiction. He repeated the arguments in the Commission’s notice of inquiry two weeks ago—that aside from the jurisdictional question, there is a question whether the Commission should deprive small town viewers who are receiving a choice of multiple programs through catv operations to a single network or perhaps two from local stations alone.

On the other hand he acknowledged that catv operators—and translators and boosters and satellites—do have an impact on local tv station operations and that they do affect the allocations picture by bringing in distant signals to small communities not contemplated to be covered by metropolitan tv outlets.

Mr. Doerfer did say that the Commission’s policy was not to authorize a satellite station where a regular broadcast outlet was operating.

The Wednesday afternoon session was plagued by the inability of the committee staff to find a senator to preside. Sen. Allen F. Ellender (D-La.) presided for half of the afternoon session, but was called away.

Kenneth Cox, Seattle attorney who is special counsel for the committee on tv matters, presided for a half hour, but was forced to declare a recess when a member of the staff of Sen. John Bricker (R-Ohio) objected to the absence of a senator. Finally, Sen. John Pastore (D-R.I.), who is chairman of the Commerce Committee’s communications subcommittee, took the chair and insisted that all statements be placed in the record unread. He promised that the remaining broadcasters (eight had not had the opportunity to testify) would be placed in the witness chair for cross examination on Thursday.

Mr. Cox introduced into the record a 1952 FCC common carrier bureau staff memorandum holding that the Commission had the authority to regulate catv operations.

Sen. Mike Mansfield (D-Mont.), the opening witness, related his concern with the catv problem and expressed the hope that the committee would find a means of solving the dilemma. Sen. Mansfield said he had received over 20,000 letters on the subject—both pro and con catv.

Broadcaster viewpoints were given by:

- Vincent T. Wastlewski, NAB government relations manager—NAB believes “uncontrolled” development of catv presents threat to allocations plan and to survival of small-market tv broadcasting. FCC should assert jurisdiction over applications for common carrier microwave to bring big city tv signals to small town catv systems to take into consideration effect on allocations systems and public interest. Also catv

ON WAY TO SKIN A CAT

The complexities of telecasting in the wide-open spaces of the west were never better exemplified than in the interconnection methods used by broadcasters testifying last week before the Senate Commerce Committee.

Item: KXLK-TV Butte, Mont., picks up network programs off-the-air from KID-TV Idaho Falls, Idaho, which in turn picks them off-the-air from Salt Lake City stations. KKLX-TV pays the Salt Lake City outlets $500-$550 a month for this service.

Item: KBOI-TV and KIDO-TV Boise, Idaho, pick up network shows off-the-air from KKLX-TV Twin Falls. KKLX-TV picks up network programs from KID-TV Idaho Falls, which in turn picks them up from Salt Lake City outlets.

Stations using their own microwave relays (in temporary authority of the FCC) spend about $15,000 in building them and from $50 to $100 a month in operating them. Common carriers have asked anywhere from $1,200 to $2,000 a month for the same service.

These operations discriminate against except for -Fears

GOVERNMENT

per received cancellations amounting to $3,000

A service area of

expressions of

Mr. Craney asked that FCC:

"Microwave-fed" catv's "true pay tv." These operations discriminate against rural population, serve only heavy concentrations of a city's population. "Here is pay tv for the wealthy city dweller and nothing for the poor man and the rural dweller."

Catv operators have no requirement to serve the public with local origination, local news, and weather, local public service programs.

FCC should exercise jurisdiction over radio signals from the studio to the home receiver. It now exercises only partial control over radio transmissions.

Mr. Craney asked that FCC:

- Impose freeze on microwave grants.
- Require that catv, booster and translator operators get permission from originating station to rebroadcast signals.
- That stations be permitted to build and operate their own microwave systems—with no cutoff date.
- That translator operation in the grade A service area of a local station be prohibited if it brings signals from a station outside the home community.

Tom Bostic, KLEW-TV Lewiston, Idaho

Opposes establishment of translators or boosters in communities where regular tv station operates. KLEW-TV suffered economic boycott by promoters of translators in Lewiston after it filed protest with FCC, received cancellations amounting to $3,000 per month. After withdrawing protest, KLEW-TV lost $120,000 in 1957, with monthly advertising revenues amounting to $7,700. KLEW-TV cost "more than a quarter of a million dollars" to build Translator group, whose stations are not yet on the air, took over operation of an illegal, unlicensed booster in Lewiston which FCC had ordered shut down. Translators plan to pipe two Spokane, Wash., stations into area.

If translators actually begin operating and divide market into three pies, KLEW-TV will have to delete all local, live programs and reduce staff.

Mr. Bostic urged that the FCC:

- Deny authorization to any translator operating within the Grade A or B contour of an existing regular station.
- "Come to grips" with problem of illegal boosters and require compliance with law.
- Require common carriers which transmit regular tv signals to catv systems to have the approval of originating station.

Arthur J. Mosby, KMSO-TV Missoula, Mont.—Telephone company asked $7,800 a month to interconnect. Private microwave company, feeding Missoula catv with Spokane signals, asked three-year contract at $2,000 monthly charge. KMSO-TV just wanted 1957 World Series games. Now uses its own microwave facilities from KXLY-TV Helena.

Cable company puts KMSO-TV on cable, but changes channel from ch. 13 to ch. 5 resulting in "deteriorated" picture at receiver. Receivers hooked into cable cannot receive KMSO-TV or any other station off-air.

KMSO-TV lost almost $50,000 in last six months of 1954, when it started operating. In 1955 operating loss was over $50,000. In 1956 this was cut to slightly over $10,000. Cable company began operating in November 1956, and in 1957 KMSO-TV again lost over $50,000.

Antenna companies are "parasites." They don't pay for programs they pick up and sell for profit.

Mr. Mosby asked that Congress either tell FCC to exercise jurisdiction over catv systems and microwave companies or amend Communications Act to give Commission this authority.

Gordon C. Glasman, KLIX-TV Twin Falls, Idaho—Urges that FCC assert jurisdiction over catv systems, treat them under same regulations under which tv stations must operate, and require that catv operators and microwave companies furnishing catv with outside signals obtain permission of station whose signals they are using.

Spent over $400,000 building KLIX-TV, which serves 117,800 people. Furnishes all three networks to area, picking up Salt Lake City stations via KID-TV Idaho Falls, Idaho.

If KLIX-TV loses $4,000-$5,000 monthly to catv operators, station will be in red. If local cable company (now serving 94 subscribers) expands as projected to serve 4,000 customers mostly all in concentrated area of Twin Falls, 82% of area population will be deprived of tv service it station. Not only that but KBOI-TV and KIDO-TV, both Boise, Idaho, will lose only source of network programs (they pick up off-air KLIX-TV network shows).

William C. Grove, KFBC-TV Cheyenne, Wyo.—Has spent over $500,000 in building Cheyenne and Scottsbluff, Neb., stations. Catv systems in "heart" of stations' coverage area—in Laramie, Rawlins, and Pine Bluffs, all Wyo.; Scottsbluff, Alliance, Kimball, and Sidney, Neb., and Sterling, Colo. Most all being fed Denver tv signals via microwave relay systems connected with catv systems. Advertisers know of this "bonus" coverage and aren't interested in buying Cheyenne and Scottsbluff time.

Key to problem is that catv operators are not required to secure permission to pick up and transmit over wire regular stations' signals. This is violation of property rights. Catv systems have paid no attention to legal notices forbidding them to carry...

Since the last ARB was taken—a scant six months ago—KNAC-TV has soared to a 159 percent increase in quarter-hour wins! And it's only the beginning. Here's why:

- New, aggressive, knowledgeable management
- Newly-purchased MGM and WARNER BROS. feature packages
- New local news operation with extensive on-the-spot film coverage
- New, full scale promotion: newspaper, radio, outdoor, direct mail
- Expanding lineup of CBS shows

PLUS EXCLUSIVE OUTSIDE COVERAGE

KNAC-TV, with high-powered VHF, serves 18 counties in prosperous western Arkansas and Oklahoma.

Station B, with UHF transmission, can be seen only in 7 counties.

Call H-R Television today for prime availabilities—while they last.

KFBC-TV programs.
Low power vhf boosters, if authorized, should be licensed on case-by-case basis, required to use signal of nearest station and provision must be made to shut them down when regular station comes on air serving same area. They too must receive permission to use signals of regular stations.
There is a need for catv systems, but only to fill in bad spots in station coverage; not to bring in distant big city signals.
Small stations also need to own micro-waves, not temporary permission as at present.
Marshall H. Pengra, KLTG (TV) Tyler, Tex.—Catv system had 4,000 subscribers, 20% of Tyler homes, feeding two Dallas and one Fort Worth station in October 1954 when KLTV began operating. In August 1956, local catv engaged in $100,000 expansion, adding KTBS-TV Shreveport, La., plus KLTV to cable. Changed KLTV channel from ch. 7 to ch. 6, with degraded picture. Cable viewers have choice of three Nbc pictures—WBAP-TV Dallas, KTBS-TV Shreveport and KLTV; of two CBS pictures, from KRLD-TV in Dallas and KLTV, and of two ABC pictures, from WFAA-TV Dallas and KLTV.
In July 1956, CBS cut network rate from $225 to $50, based, it is presumed, on field study indicating extensive cable viewing. Thus, KLTV lost six topflight network programs—still available to cable viewers but lost to non-cable customers and rural viewers. Ultimate result will be reduction of KLTV staff to engineers, elimination of local live shows entirely. Catv connections means viewers cannot receive KLTV off air.
In American Research Bureau survey, it was found that out of 83 cable-connected viewers watching specific program, 28 were watching Dallas station and only 14 KLTV. In same survey of non-cable connected viewers, 57 of 63 viewers were watching same program via KLTV.
Catv systems are part of broadcast industry and should abide by same rules and regulations. Catv systems must secure permission to use programs and signals of stations. Tyler antenna company has disregarded orders from stations, networks and film companies forbidding use of program material.
FCC has authority to regulate catv operations, and must consider these systems on a case-by-case basis. Some catv operations are worthwhile and perform a function in serving underserved areas—but where they impinge on existing station they must be weighed against loss of service provided by local station.
Also filing statements were Barclay Craighead, KXLJ-TV Helena, Mont.; Mrs. Mildred Ernst, KWRB-TV Riverton, Wyo.; Fred Weber, WBOY-TV Clarksburg, W. Va., and C. N. Layne, KID-TV Idaho Falls, Idaho and Frank Reardon, KGEZ-TV Kalispell, Mont.

**LAREDO SHOWDOWN**
KHD-TV Laredo, Tex., has asked the FCC to set for hearing an application by Mesa Microwave Inc. for authority to establish a common carrier radio relay system to bring San Antonio tv signals to Laredo to be fed to a proposed community tv system.
The ch. 8 Laredo station began operation Jan. 5, 1956. It has been feeding network programs to Laredo viewers via kinescope and film. This July it will begin bringing network programs to its viewers live, by an off-the-air pickup from San Antonio through AT&T installations. The cost will be $1,892.50 per month with a three-year guarantee of $31,300. The station will provide the land, building and tower for the terminal installment, it pointed out. This will permit to boost operating hours from the present 52 hours weekly to 119 hours weekly, the station said.
KHD-TV lost $38,000 in 1956 and $3,000 in 1957, the petition stated.
Mesa Microwave, a subsidiary of southwestern movie chain Video Independent Theatres Corp., proposes to construct the 150-mile relay for $145,000, and to feed the San Antonio tv programs to a catv company proposed to be built by Vumore Inc., also a subsidiary of Video Independent.

Ford in FCCA Speech Attacks 1952 Communications Changes
FCC Comr. Frederick W. Ford last Tuesday attacked some of the principal elements of the 1952 amendments to the Communications Act. Mr. Ford made his observations in a speech to the Federal Communications Bar Assn. in Washington. This was the first public address by Mr. Ford, who was appointed to the FCC last August, as a commissioner.
He made a strong plea for a revision of the separation of functions amendment which bars the Commission from consulting even its own general counsel. He also suggested that the review staff be permitted to confer with commissioners in deciding adjudicatory proceedings and called for a change in the protest rule, which "has added more red tape and delay in the processing line." Mr. Ford questioned whether Congress really meant to forbid commissioners from seeing parties to comparative hearings because, he pointed out, the Senate-House conferees deleted that portion of the House bill which prohibited ex parte discussions. And, Mr. Ford said, he was confused by the "inconsistencies" in the elaborate due processes established for deciding between competing applicants for a facility and the lack of standards for approving a sale of a broadcast station. He also said he opposed suggestions that commissioners be required to write their own decisions. This does not make for a well-rounded decision, he said, and would further delay matters at the FCC.
ON APRIL 2, anniversary of Dallas' disastrous '57 tornado, WFAA-TV treated their viewers to an hour-long telecast showing films of the destruction and presenting local weather by radar for the first time to a TV audience. Since this initial indoctrination, WFAA-TV's radar weathercast has become a conversation piece.

To quote Warren Culbertson, weather announcer and a graduate meteorologist, "Viewer reaction has been highly complimentary. If rain is falling on a viewer's house, he wants to see the echo on the radar scope, not to hear the weather man talk about scattered showers. Even if there are no echoes to be seen, viewers are attracted by the sheer fascination of the rotating trace on the scope."

The Dallas station installed the entire Collins C-Band Weather Radar System in its studio. The antenna is mounted on a platform on the roof with the waveguide extending downward into the building to the receiver-transmitter and synchronizer units. An indicator and control unit are mounted in the wall near the weather slides. Another indicator is rigged in a shadow box for camera closeups. Acetate maps of the WFAA-TV area, corresponding to the 20-, 50- and 150-mile ranges, are placed over the indicator to pinpoint weather activity with geographical location.

"The Collins radar offers commercial possibilities to WFAA-TV of a magnitude that we have not yet been able to fully exploit," advised Manager Mike Shapiro. "Besides strengthening our regularly scheduled weathercast, radar ID's and radar surveillances are highly saleable during all seasons of the year."

Call, wire or write for prices and information about making your weathercasts the talk of your TV area.
HARRIS HEARS SPRINGFIELD CASE

Pressure charges exchanged in hearing on ch. 2 grant

- GOP politicos accused in award to WMAY-TV, now on ch. 36

Two days of hearings were held last week by the House Legislative Oversight Subcommittee on efforts of the two contestants for ch. 2 Springfield, Ill., to gain a "fair advantage" over the other.

Also a part of the record was a staff report on the FCC’s exchange of ch. 2 Springfield for ch. 36 St. Louis and assignment of ch. 2 Springfield to St. Louis.

And, after many charges of political pressure, many of the subcommittee members were still working to obtain the "impression" the senator obtained the information from an unnamed commissioner.

None could state, however, the source of information that one commissioner had shifted his vote because Sangamon was a "bunch of New Dealers." Also, they said, the name of Comr. Robert E. Lee was not mentioned in this connection in the Dirksen meeting or at any other time.

Mr. Angland stated Sen. Dirksen was "extremely upset that Mr. Hall would be interfering in Illinois political problems without any word to the senator.

Mr. Keller said Sen. Dirksen announced plans to talk to Mr. Hall about the ch. 2 case but that the senator did not report if such a talk was held. When asked Thursday if he actually did discuss the case with Mr. Hall, Sen. Dirksen said: "I don't think it's anybody's business." He said it was a matter between himself and his constituents.

Mr. Hall, in Mineola, N. Y., last week again denied "absolutely, flatly" that he played any role in the Springfield ch. 2 case or any other matter before the FCC.

March 1, 1957. Also, he said, despite the fact "the Commission expressly disavowed any intention of changing Signal Hill’s [KTVI] authorization to ch. 2. . . . the Commission actually did give ch. 2 to Signal Hill. . . ."

"Some 15 months have elapsed since the matter of ch. 2 was made for the ostensible purpose of 'enhancing the opportunities for more effective competition among a greater number of stations.' Actually, no more stations have resulted." Mr. Angland continued that if the shift had not been made, there would be a second station operating today in Springfield—on ch. 2.

Mr. Angland charged that "every action taken by Signal Hill throughout the proceeding reflected its absolute confidence not only that ch. 2 would be moved to St. Louis, but also that it would get the channel." He introduced a contract signed with General Electric on Jan. 25, 1957, by KTVI for ch. 2 equipment. It is "significant . . . that the Commission moved ch. 2 from St. Louis and gave it to Signal Hill on Feb. 26, 1957," he said. [BROADCASTING, in its Jan. 21, 1957, LEAD STORY, reported that ch. 2 would go to KTVI in St. Louis.]

Negotiations for vhf equipment were begun by KTVI-GEO as early as October 1956, according to documents introduced by Mr. Angland.

An October 1953 letter from then FCC Chairman Rosel Hyde to White House Assistant Sherman Adams was entered into the record by Mr. Angland. Comr. Hyde sent Mr. Adams a status report on the St. Louis ch. 4 and Flint, Mich., comparative TV cases. A followup letter in April 1954 from Comr. Hyde to Mr. Adams told of the St. Louis ch. 4 grant made possible by a merger of the competing applicants. Of the Hyde-Adams letters, Mr. Lishman asked: "If this is an independent agency, what is he [Hyde] doing here writing these letters in the first place?" Comr. Hyde said he "may have been the wrong specific letters but that they were the type the FCC would send to any citizen in answer to a legitimate request."

Mr. Angland also read a January 1954 memorandum prepared by attorney Andrew G. Haley relating to a proposed merger among the three St. Louis ch. 4 applicants—KWK St. Louis Globe-Democrat, KXOK St. Louis and Missouri Valley TV Co. (Stanley Hubbard and associates). The merger later was completed and made possible the 1954 grant.

With the hearing recessed Tuesday, WMAY-TV principals had their "day in court" Wednesday. They were represented by former U. S. Sen. and Democratic majority leader Scott Lucas, plus Washington counsel Marcus Cobn.

The three witnesses—WMAY-TV President Gordon Sherman, Vice President Richard S. Cohen and Springfield restaurateur Herman Cohen (who has no stock interest)—each denied applying political pressures on behalf of WMAY. Without mentioning Mr. Angland by name, Mr. Sherman charged that "by omitting certain relevant facts, a distorted picture has been painted

COVERS LINCOLN-LAND — NEBRASKA'S OTHER BIG MARKET

Avery-Knodel, Inc., Exclusive National Representatives
Rep. Oren Harris (D-Ark.), chairman of the House Legislative Oversight Subcommittee, last week denied a request by WHDH-TV-Boston Herald-Traveler to quash a subpoena subpoenaa for the newspaper-station records—in no uncertain terms.

The request came in a strongly-worded letter from attorney William Dempsey of WHDH-TV, owned by the Herald-Traveler. Mr. Dempsey maintained that a subpoena committee investigator, Francis X. McLaughlin, had acted improperly and that the committee's request was irrelevant and unconstitutional under the Fourth Amendment.

Mr. Harris' immediate reply last Monday, during hearings on the ch. 2 Springfield, Ill., grant to WMAV-TV: "The committee has no intention of withdrawing any subpoena at all... The committee will not tolerate any undue and unnecessary such arbitrary moves designed to prevent the committee from obtaining information that it is justified in receiving." He said that several other subpoenas have been issued in connection with an investigation of the grant of ch. 5 to WHDH-TV and "there seemed to be some reluctance on the part of those who have the information to permit the staff to obtain it.'

Following Mr. Dempsey's Monday letter to Rep. Harris and the congressman's subsequent statement, a meeting was held Tuesday between WHDH-TV counsel and the subcommittee. Rep. Harris again rejected a WHDH-TV request that the subpoena be dismissed.

It was served May 20 and called for compliance by May 26. Specifically, the subpoena seeks all information about telephone calls and trips made by Herald-Traveler personnel to Washington and several other points since January 1955.

The hotly-contested grant, currently the subject of a court appeal, long had been rumored as one the Subcommittee would look into in a fact-finding investigation of the FCC. Last week's flare-up was the first public confirmation that such an inquiry is underway.

In his letter to Rep. Harris, Mr. Dempsey stated: "As you are well aware, your committee's activities have been plagued and persons vitiated by smears in slanted news stories and columns based on leaks from members of your staff. To turn over files and records which have no relevance to the committee's function to your staff under these conditions would be as foolish as it would be craven." Mr. Dempsey specifically took exception to the follow-up alleged actions by Mr. McLaughlin, who was accompanied to Boston by staff investigator Joseph P. O'Hara Jr.:

He did not tell WHDH-TV the subcommittee's purpose in seeking admittance to its records and those of the Herald-Traveler.

He said the subcommittee was interested only in the company's stock transfers and left instructions with the telephone company that WHDH-TV-Herald-Traveler was to be denied access to long distance toll slips.

He sought to interview WHDH-TV President Robert Choate, who also is the Herald-Traveler publisher, and refused to submit in advance a list of proposed questions.

Mr. Dempsey said it is "difficult to reconcile" Mr. McLaughlin's action regarding the telephone calls "with any proper, or indeed with any honest, investigatory purpose." He said it is obvious the telephone calls deal with "matters completely unrelated" to the subcommittee's stated purpose.

Mr. Dempsey stated, "is whether the Fourth Amendment to the U. S. Constitution which safeguards the private affairs of citizens from prying by the government applies as a limitation on the investigative powers of congressional committees." The WHDH-TV attorney then cited several Supreme Court decisions which he said "demonstrate your subpoena to be completely invalid."

In a memorandum prepared for Rep. Harris, investigators McLaughlin and O'Hara emphatically denied the charges made by Mr. Dempsey. The Choate questions were not stated, the attorneys stated, on the instructions of the subcommittee chairman and chief counsel.

Also under instructions of the chief counsel the subcommittee denied WHDH-TV use of the toll slips, which also had been subpoenaed, until it had answered the original subcommittee questions. McLaughlin and O'Hara maintained that they advised Mr. Choate and other WHDH-TV principals that the subcommittee was making a full investigation of the ch. 5 grant and denied Mr. McLaughlin stated that only stock transfers were of interest.

In denying to dismiss the subpoena or accede to writing out questions in advance, Rep. Harris stated the subcommittee could not be told how to conduct its inquiry.

concerning the adjudicatory hearing for ch. 2..." in previous testimony.

He expressed "amazement" that it had not been pointed out to the subcommittee that the grant was made to WMAV by a 5-1 vote, with Comr. John C. Doerfer being the dissenter. He said the hearing examiner, Millard French, was trying his first tv case and "had no background whatsoever in the field of communications." The examiner's decision failed to cover all the facts, Mr. Sherman said, while the Commission's decision did, making "inevitable a grant to us."

He strongly denied WMAV-TV "had changed its position overnight" on deinter-mixture, contending it had fought to the end to retain ch. 2. Mr. Lishman took sharp issue with this point and questioned the witness at length on various pleadings filed by WMAV-TV with the FCC and courts.

Mr. Lishman entered into the record a January 1958 letter from Springfield Mayor Nelson Howarth to Mr. Keller expressing concern over WMAV-TV's alleged lack of effort to retain ch. 2.

A condition placed on WMAV-TV's receiving a grant for ch. 36 was that it not fight for retention of ch. 2 in the courts, Mr. Sherman contended. He said for this reason, and on advice of counsel, WMAV-TV did not appeal to the courts the FCC's shift of ch. 2.

Mr. Sherman told of attempts to consummate a merger with the Sangamon interests even after WMAV-TV had secured the grant. He denied this was a move to cause Sangamon to relinquish its legal rights to continue its appeal of the grant.

WMAV-TV has not abandoned plans to go on the air, Mr. Sherman maintained, and has been actively seeking a network affiliation. He said that if WMAV-TV was to be built with a uhf channel, it preferred ch. 36 because used equipment for that channel could be purchased from General Electric.

Under questioning by Rep. John Moss (D-Calif.), Mr. Sherman admitted the equipment in question was formerly used by KTVI when that station operated on ch. 36. The witness further stated that Messrs. Peltason and Tenenbaum visited him in Springfield in the spring of 1956 and the KTVI owners told him ch. 2 would be shifted to St. Louis.

Mr. Sherman said that he, in the company of Richard Cohen, had met with Mr. Hodge on three occasions. He denied, however, that any WMAV-TV stockholder ever asked Mr. Hodge to intervene and that he personally had no knowledge of any steps taken by Mr. Hodge. When asked whose idea it was to bring Mr. Hodge into the case, Mr. Sherman replied he did not know the prominent Republican was "in on it."

Mr. Cohen testified that he asked Mr. Hodge for "advice" on what WMAV-TV could do to counteract the "strong political position" of Sangamon. He denied, however, that he asked Mr. Hodge to intervene in any way personally or to talk to members of Congress or the FCC. Mr. Hodge, according to Mr. Angland, stated that Richard Cohen asked him to contact the Illinois congressional delegation.

Mr. Cohen testified Mr. Hodge never told him what, if anything, he had done or been half of WMAV-TV's application. He said Mr. Hodge only stated: "I'm your bookkeeper. I'm working for you." Rep. Moss told the witness he was a "very naive young man" to think that, when Mr. Hodge asked for all the details relating to the case, the

then Illinois auditor did not plan to take action.

Hermon Cohen testified that he and his brother, Louis (father of Richard) had loaned WMAY-TV $13,000 to purchase a site for the proposed station. Also, he said, the Cohens planned to build a $175,000 physical plant and lease it to the station. He said he had never discussed the WMAY-TV application with Mr. Hodge, Mr. Hall, or anyone else outside the WMAY-TV stockholders.

He denied any knowledge of two $7,200 entries in Mr. Hodge’s “brown envelope” bank account—one a check by Mr. Hodge in payment to a Louis Cohen and the second a deposit to the account by a “Mrs. Cohen” of Grant City, Ill.

McConnaughey, L’Heureux

Dissolve D. C. Law Firm

Former FCC Chairman George C. McConnaughey and Robert D. L’Heureux, his administrative assistant at the FCC, who have operated a law partnership in Washington since leaving the Commission last year [GOVERNMENT, July 1, 1957] have announced they are dissolving the firm.

Mr. McConnaughey explained the partnership is being dissolved because Mr. L’Heureux has decided to devote the bulk of his time to the teaching and practice of law in Washington. The former FCC head said that since Mr. L’Heureux has been “on the scene” to work “on legal matters that I had in Washington” and since Mr. L’Heureux no longer will be available for this work, “I have decided to handle both my Columbus and Washington practice from my Columbus law office.”

The Columbus firm, in which Mr. McConnaughey also has been a partner since leaving the FCC, is McConnaughey & Stradley. Mr. McConnaughey said that his Columbus law practice has demanded “virtually all of my time since I left the FCC.”

Mr. McConnaughey said he and Mr. L’Heureux and George O. Sutton had shared the same suite of offices in the National Press Building in Washington, with the two partners paying rent to Mr. Sutton, and that the three had a law firm (McConnaughey, Sutton & L’Heureux) in name only. “Our arrangement with Mr. Sutton has been ended by mutual consent,” he said.

The Ohio Republican was FCC chairman from Oct. 4, 1954, to June 30, 1957. Mr. L’Heureux joined the FCC as his aide in January 1956 after several years’ service as counsel on the Senate Commerce Committee and other congressional committees.

Goldwater to Oppose McFarland

Sen. Barry Goldwater (R-Ariz.) last week announced that he would seek a second term. In a speech, Sen. Goldwater’s opponent will be the man he defeated in 1952 who currently is Democratic governor of Arizona, Ernest W. McFarland. Gov. McFarland was majority leader of the Senate and chairman of the Commerce Committee when defeated by Sen. Goldwater in 1952. He is the author of the 1952 amendments to the Communications Act, which bear his name.

RELAXING OF ENGINEERING RULES

NEEDED TO ALLOW FOR VHF: DOERFER

FCC Chairman John C. Doerfer told Congress last week that some relaxation of tv engineering standards is necessary in order to add more vhf channels to top markets, thus equalizing facilities.

He also hinted strongly at the FCC and the President’s Office of Defense Mobilization would sit down soon on an exploration of the whole spectrum, including television allocations.

The FCC chairman testified before the Senate Commerce Committee last Tuesday. He was flanked by the entire Commission plus aides. The Senate committee was chair-

manned by Sen. Frank J. Lausche (D-Ohio), who for the most part is the only senator present. Kenneth Cox, Seattle attorney who supervised the 1957 hearings on tv allocations, was again special counsel.

The inquiry was ordered to determine what progress the FCC has made in the uhf-vhf allocations problem. It also looked into the impact of community tv systems, boosters, satellites and translators on small town regular tv stations (see page 56).

Deintermixture has yielded little results and has no future, Mr. Doerfer told the Senate committee. It is only a partial answer to the problem, he said, adding that as far as he is concerned “it’s too little and too late.”

Mr. Doerfer declared there must be some flexibility in applying the engineering standards. For example, he said, suppose a third vhf channel can be allocated to a city but it is only 167 miles from its co-channel station. Since the rules require a 170-mile separation, the Commission is stymied. There must be flexibility, he iterated, and that includes such other techniques as directional antennas and cross polarization.

Other commissioners, however, differed with Mr. Doerfer. Most insisted that no change be made in present engineering standards until the results of the Television Allocations Study Organization investigation is submitted. This is due late this year.

When the report of the Television Allocations Study Organization is submitted, by the end of this year, Mr. Doerfer said, the FCC will have the “tools” to grapple seriously and from a long range viewpoint with the allocations picture.

In the course of his testimony, Mr. Doerfer referred several times to the recent “invitation” issued by ODM for the two groups to sit down and take a long range look at the future use of spectrum space in the U. S. ODM acts for the President in assigning frequencies to government agencies, including the military services.

The FCC and ODM in 1956 attempted to work out a method of trading uhf frequencies for more vhf channels, but this was turned down by ODM in April of that year.

Mr. Doerfer reviewed the work of the FCC in grappling with the allocations television situation. He referred to the June 25, 1956, FCC memorandum which suggested the ultimate solution might be the change from tv stations from uhf to vhf or for the whole country or for the eastern half of the nation. This, the Commission held, should await an intensive engineering study of the potentials of uhf as a mode of propagation and its equipment. This is under study by TASO now.

As a short-range first step, the Commission in 1956 suggested a program of deintermixture—unmixing areas where uhf and vhf channels had been assigned together.

Mr. Doerfer reported that the FCC has deintermixed 12 areas, denied 12 petitions for deintermixture and has pending 14 petitions.

The FCC also has shifted channels in 44 cases, denied 4 and has 13 such petitions still pending, the chairman said. He also said that the Commission had acceded to requests to delete educational reservations in six instances, and denied such petitions in three. There are two such petitions still pending, Mr. Doerfer said.

Craven Takes Long View

Comr. T. A. M. Craven told the committee that a basic problem is the difficulty of manufacturing tv receivers which are required to cover wide spreads of the spectrum. He alluded to developments on the horizon which would require a portion of the 25-890 mc band for long range communications and for national security.

(Later, Mr. Craven said he was referring to tropospheric scatter propagation for space flight communications and telemetering.) He urged immediate deintermixture in major markets so that there are comparable facilities. He suggested that any intermediate steps be deferred until the TASO report has been completed. The long range approach must await a study between FCC and ODM, he said. Mr. Craven was the author last year of a plan to permit the establishment of at least three vhf channels in the top major markets in order to ensure comparable facilities.

Other commissioners said that uhf should not be abandoned and that it is a worthwhile service where uhf stations are not in direct conflict with vhf stations.

Mr. Cox questioned whether the FCC could not make some move now to alleviate the plight of uhf broadcasters without waiting for the TASO report. The special counsel, who read a letter from an unidentified official to his salesmen which brought out ABC-TV’s “tisky” position regarding station clearances and which was to be used in selling advertisers against ABC-TV. This showed, Mr. Cox said, that one network was not averse to using ABC-TV’s lack of vhf affiliates in top cities against that network.
Get the most out of your originals...

Ansco Type 238 16mm duplicating color film

The long tonal scale of this extraordinary film is your guarantee of prints true to every detail, every tone, of your original. With its luminous shadows, well-graded highlights, full-range color fidelity, Type 238 gives you a film that is a duplicate only in name... for it is an original in quality.

Storer Gives Up Plan
For Experimental Tv

Storer Broadcasting Co. last week dropped its proposal for an experimental tv station on ch. 12 in the Wilmington, Del.-Philadelphia antenna farm area. Storer, licensee of ch. 12 WNVE (TV) Wilmington, had asked permission for the experimental station to make a year's test of a new type of directional antenna at an operating cost of $130,000.

The Storer proposal met objections from ch. 12 WNBF-TV Binghamton, N. Y., under common ownership with WFIL-TV Philadelphia, on grounds this would reduce the mileage separation between WNVE and WNBF-TV below the minimum permitted by the FCC and would cause objectional interference to the Binghamton station. Among others objecting were WPFO-TV Providence, R. I. (on interference grounds), Assn. of Maximum Service Telecasters (objection to below-minimum mileage) and WIP Philadelphia. Storer, in submitting its petition last February [Government, Feb. 24], proposed to broadcast the regular programs of WWVE on the experimental station.

In asking for dismissal without prejudice of its application last week, Storer said it had been prepared to spend more than $750,000 for the test to help the FCC reach a "sound solution" to the tv allocations problem. But the likelihood of lengthy hearings and legal delays implicit in a May 22 decision by the U. S. Court of Appeals for the District of Columbia promises to make the experimental tv station "impracticable," Storer claimed.

Storer added that WVUE would continue to serve the "greater Delaware Valley from its present transmitter location at Pitman, N. J."

The May 22 court decision ruled that the FCC "erred" in granting, without hearing, an application by WMJN-TV New Orleans for experimental operation on ch. 12 [Government, May 26]. The experimental transmitter was less than the minimum required mileage from co-channel WTVT (TV) Jackson, Miss., which had charged WMJN-TV was "not proposing a bona fide experiment." WMJN-TV (ch. 20) was broadcasting its programming simultaneously on ch. 12.

Five More Legislators Favor
Removing Excise Tax From Sets

Congressional sentiment for removal or suspension of the excise tax on radio and television sets and other commodities has reached a new high. Three such bills have been introduced in the House, while two senators indicated relief for the consumer is on the way.

Rep. William Bray (R-Ind.) and Rep. Frank Osmers Jr. (R-N. J.) both introduced bills which would repeal the 10% excise tax on all radio-tv sets as well as other electrical appliances. Rep. Osmers' bill, like a measure introduced by Rep. Harold R. Collier (R-III.), would also remove the 10% tax on communications.

All three bills were referred to the Ways & Means Committee, which now has pending eight bills to remove the tax on all tv sets. In addition, the committee has pending four bills which would exempt all-channel (uhf) sets only from the tax; three to reduce the tax on all tv sets to 5%; one to reduce the tax to 5% on all-channel sets only, and one bill which would suspend the 10% levy on all receivers for one year.

On the other side of the Capitol, Sen. Norris Cotton (R-N. H.) proposed a "moratorium" of excise taxes to promote a "nationwide bargain sales." The tax suspension should last until the end of this year or early 1959, he said. Sen. Styles Bridges (R-N. H.) also noted the need for adjustments in excise taxes, including those on radio and tv sets.

Window Firm Settles FTC Charge

Famous Window Co. of Pennsylvania, Pittsburgh, has agreed not to use bait advertising for its storm windows, screens and doors. A consent order signed by the firm was announced last week by the Federal Trade Commission. The action grew out of an FTC complaint a year ago charging that Famous Window used misleading bait techniques in advertising on radio, tv and in newspapers. The consent order is for settlement purposes and is not an admission of violating the law.

Federal ETV Subsidy
Backed by Committee

The Senate Interstate & Foreign Commerce Committee last week unanimously approved a bill (S. 2119) introduced by its chairman, Sen. Wirth (D-Colo.), which would provide up to $1 million for each state to aid in the development of educational television.

Sen. Magnuson predicted that the Senate would take speedy action on the measure, introduced a year ago last week [Government, May 27]. Hearings were held in Washington of the bill with Sen. Magnuson, the Health, Education & Welfare Dept.—which will have the responsibility of administering e.tv grants to states under the bill expressing opposition.

The bill, as reported out, included one important change from the original draft. It was amended to make it possible for e.tv stations operating under non-profit organizations to receive federal grants. Originally, the bill provided that a station must be under the direct supervision of the state supervisor of public schools.

Sen. John W. Bricker (R-Ohio), ranking minority member of the committee, co-sponsored the bill with Sen. Magnuson.

Under provisions of the bill, a state may receive more than one grant for e.tv, "but the total of such grants to any state shall not exceed $1 million." The District of Columbia, Hawaii and Alaska also are eligible for federal assistance.

Action on Slow UHF Builders
Urged by L. A. Tv Applicant

William E. Sullivan, former announcer at several midwestern radio stations and partner with Frederick Bassett in a contest application for a ch. 34 station in Los Angeles last week called on the FCC to deal more harshly with uhf permittees who are reluctant to build their stations.

Mr. Sullivan charged the FCC has "unwittingly caused the failure of a truly nation-wide competitive television industry, due to a lack of attention and other weak pressures."

The FCC early last month again considered, but took no action on, the question of uhf permittees who have repeatedly asked for renewed extension of the date on which they are required to complete construction to retain their permits; also considered were those uhfs which have gone off the air, but which are holding their construction permits in the hope uhf competitive and economic problems will be alleviated.

"The Commission," Mr. Sullivan said, "is passively backing the now monopolistic holders of government-granted uhf facilities and new prospective permittees have no opportunity to use the locked-up channels."

Some permittees have held permits for six years, he said.

He asked allocation of more uhf channels to the 10 major cities and called on the FCC to enforce its rules by which a permittee forfeits his grant if he doesn't build in the maximum period of eight months after grant.
A year ago this picture would have had to be faked

Until recently, nobody knew how to make thin Stainless Steel sheets as wide as the one you see here. But aircraft manufacturers needed a sheet like this, so United States Steel found a way to do the job. A standard-size sheet of Stainless Steel is inserted between two heavy carbon steel plates and the plates are welded shut around the edges. This steel sandwich is then heated and rolled, widening the Stainless sheet inside. A Stainless sheet as wide as 120 inches can be produced to exceedingly close tolerances with this ingenious method... one more way that United States Steel's versatile facilities develop better steels for better products.
JUSTICE IN ON CH. 10 HEARING

The headline-making Miami ch. 10 television case was designated last week for hearing by the FCC, acting upon a mandate by the U. S. Court of Appeals for the District of Columbia remanding the case to the Commission [GOVERNMENT, April 21].

The FCC membership (new Comr. John S. Cross not participating) ordered a prehearing conference in Washington June 23 on four issues involved in the 1957 grant of ch. 10 in Miami to Public Service Television Inc., a subsidiary of National Airlines.

The Commission, significantly, also ordered that the presiding officer at the hearing permit the Justice Dept. to participate in the hearing, "upon request made," as amicus curiae. The appeals court in its decision had said Justice should be a party.

The four issues:
1. Whether any FCC member who participated in the ch. 10 grant should have disqualified himself from voting.
2. Whether any one influenced or attempted to influence the FCC in the award of ch. 10 in any manner whatever except by the recognized and public processes of adjudication.
3. Whether any party to the proceedings "directly or indirectly secured, aided, confirmed, ratified or knew of any misconduct or impairments...."
4. Whether, from these issues, the grant was "void ab initio from the beginning"
and if not whether it was voidable and should have been set aside; whether any of the four applicants "was and is disqualified" for a grant, and whether the conduct of any applicant, even if not disqualifying, has been such as "to reflect adversely upon such applicant from a comparative standpoint."

Last week's FCC action was the latest development in a furor over the ch. 10 grant which had its beginning when the House Legislative Oversight Subcommittee began hearings Feb. 10 and developed testimony charging that former Comr. Richard A. Mack sold his vote to the winning applicant in Miami for $2,650 [LEAD STORY, Feb. 17].

The climax was when Comr. Mack resigned [GOVERNMENT, March 10]. His resignation from the FCC came after internal wrangling among the members and staff of the House subcommittee brought the resignations of its chairman, Rep. Morgan Moulder (D-Mo.), and its chief counsel, Dr. Bernard Schwartz, over how the investigation should be conducted. The House subcommittee, now headed by Rep. Oren Hazris (D-Ark.), also questioned other commissioners about fraternization with members of the broadcast industry. The committee probe is still going.

The FBI entered the case when it was revealed that money and other considerations were given to Comr. Mack by Thurman A. Whiteside, Miami attorney, whom Mr. Schwartz had described as a "fixer" working in behalf of National Airlines, winning applicant.

A federal grand jury in Washington began closed sessions immediately after Comr. Mack's resignation, hearing testimony from Mr. Mack, Mr. Schwartz, Mr. Whiteside, all the four applicants in the contest and FCC representatives. Its investigation also is still going and has reached out into cases involving other FCC grants.

Attorney General William Rogers noted last week that the appeals court specified that the Justice Dept. should be a party to the upcoming FCC hearing and added, "We will comply with the request of the court."

He said Justice's role as amicus curiae will be announced formally in a few days.

In announcing the hearing last week, the FCC said consideration will be given to holding hearing sessions at locations other than Washington, leaving the possibility some or all the sessions may take place in Miami or elsewhere. "All parties to these cases" before the FCC may participate if request is made by June 5, with opportunity for cross-examination and rebuttal testimony, the FCC said.

The FCC said: "In order last week, did not specify that it would be held by one of its regular FCC hearing examiners, but by a "presiding officer." Although the Commission has not made a choice of who will hear the case, it is understood a search is on for an outstanding jurist—a state or municipal judge, an outstanding lawyer, or perhaps an examiner from another government agency. If the FCC is unable to find such a presiding officer, it was said, one of the FCC's examiners may be assigned to the case. The person selected would have to agree to submit to the Civil Service Commission for special appointment to ensure proper legal safeguards.

The idea of using a retired federal judge was dropped after it was realized that the case is on remand from a federal court which still retains jurisdiction over the outcome and that such retired federal judges are on tap for other work as needed by the federal courts.

The three other applicants for Miami ch. 10 in addition to the National Airlines subsidiary are WKAT-AM-FM Miami, L. B. Wilson Co. (WCKY Cincinnati) and North Dade Video Inc. The National Airlines station, WPST-TV, has been on the air since last Aug. 1.

J. Frank Katzentine, owner of WKAT-AM-TV, and George T. Baker, president of National Airlines, charged each other in testimony at the House subcommittee hearings with using "pressure" in Washington before the FCC grant was made.

Pittsburgh Asks Additional ETV

The Pittsburgh educational tv organization last week asked the FCC for permission to operate a second non-commercial, educational tv station in that city. It filed an application for ch. 22, to be operated for direct broadcasts for educational rooms, in addition to its present WQED (TV) on ch. 13.

Last July the educational station asked the FCC for ch. 47 in addition to ch. 13 [GOVERNMENT, July 1, 1957]. Ch. 47 is held by WTVQ (TV) which has never begun operating but which still holds a construction permit. Recently WQED asked the FCC to assign ch. 22 to Pittsburgh, and last week's application was filed contingent on the Commission making that move. It is estimated the station would cost $150,000 and spend $40,000 a year in operations.

WHAS-TV Back Before FCC

With Fifth Tall Tower Proposal

WHAS-TV, Louisville, which has been trying for four years to increase its rural coverage in Kentucky and southern Indiana, last week asked the FCC to approve its latest (fifth) proposal for a tall, tall tower.

The Louisville station's proposal for a tower 1,859 feet above ground to be located at a site 17 miles northeast of the city was turned down by the Washington Airspace panel last February. Four other tall tower proposals have been rejected by either that group or the New York Regional Airspace Subcommittee, the first in 1954.

Last week Victor Sholis, vice president and director of WHAS-AM-TV, requested, in hearing before FCC Hearing Examiner Charles J. Frederick, that the FCC approve the proposed tower despite the "airspace groups" disapproval and the opposition of aviation interests. WLEX-TV and WKXP-TV Lexington (both uhf) and WKRC-TV Cincinnati, stations which object to the increased coverage WHAS-TV would have in their directions.

Supporting the WHAS-TV proposal were Orrin Towner, chief engineer, who described plans for lighting and marking the tower which are looked upon by broadcasters as unusual; Prof. H. Richard Blackwell, director of the U. of Michigan's visual research lab, who testified in the hearing last week that the proposed lighting will satisfy visibility standards more than adequately, and Lowell Wright, independent aviation consultant.

Mr. Sholis said WHAS-TV has examined 27 tower sites and has had six sites under option. WHAS-TV's earlier site proposals, planned for a "more logical" area southeast of Louisville, also were turned down by the airspace groups. WHAS-TV witnesses testified Monday through Thursday. Opponents will be heard when testimony resumes tomorrow (Tuesday).
FCC Examiner Favors Ch. 11 For N. D. Broadcasting Co.

North Dakota Broadcasting Co. was favored for a new TV station on ch. 11 in Fargo, N. D., in an initial decision last week by FCC Hearing Examiner Elizabeth C. Smith.

Involved was the competing application of Marvin Kratter, doing business as Fargo Telecasting Co., which was dismissed at Mr. Kratter's request early this year. Prior to this dismissal ch. 6 WDAY-TV Fargo had been granted a petition for intervention in the case. Issues included the question of overlap between Fargo ch. 11 and ch. 4 KXJB-TV Valley City, N. D., also owned by North Dakota Broadcasting. The question of concentration of control was also raised in the light of the applicant's other broadcast holdings in North Dakota.

North Dakota Broadcasting is the licensee of KSJB Jamestown, KXJB-TV Valley City, KBMB-TV Bismarck and KCJB-AM-TV Minot, all North Dakota, and the permittee of KXAB-TV Aberdeen, S. D.

Eastern Renews Ch. 10 Fight

Eastern Airlines, which last year sought to intervene in the Miami ch. 10 proceedings before ch. 10 was granted to a subsidiary of National Airlines, Eastern's fierce rival for airline business, last week renewed its petition to the FCC to intervene. The ch. 10 case was remanded to the FCC last month by the U. S. Appeals Court for the District of Columbia following controversial hearings by the House Legislative Oversight Subcommittee involving the integrity of former Comr. Richard A. Mack. Eastern said last week that although the FCC had dismissed Eastern's petition made in February 1957, the language of last month's appeals court decision "might imply the necessity" of a formal pleading for Eastern.

Hassle Over Beaumont Ch. 6

Back in Court Following Appeal

The four-year-old Beaumont, Tex., ch. 6 case was back in court, following a second appeal by the Enterprise Co. The Enterprise Co. (Beaumont Enterprise and Journal-KRIC) was one of three applicants for the vhf channel. The appeal was filed last month.

The newspaper company asked the court to set aside an April 21 supplemental decision by the FCC which affirmed the 1954 grant to the Beaumont Broadcasting Co. (KFDM). This was remanded to the FCC by the court in 1955 following an appeal by the Enterprise Co. Last March an FCC examiner recommended that ch. 6 be granted to the newspaper company, following a second hearing. Last month, however, the FCC voted to affirm the original grant. Comrs. Robert T. Bartley and Frederick W. Ford did not participate in this decision.

Key to the contested case is the arrangement whereby Houston publisher-broadcaster W. P. Hobby loaned $55,000 to KFDM in exchange for an option to purchase 32.5% of the corporation to be formed to be the licensee of KFDM-TV. KFDM used this money to pay unsuccessful applicant KTRM Beaumont its out of pocket expenses to withdraw from the threcornered race. Mr. Hobby had a 10% interest in KTRM and an option to acquire 35% of that station in the event it was successful in winning a tv grant. The new Hobby-KFDM transaction came after KFDM had been granted the vhf channel, but while a petition for reconsideration was pending before the FCC. Mr. Hobby is president of the Houston Post Co. (Houston Post-KPRC-AM-FM-TV).

In its new appeal the Enterprise Co. maintains that the FCC failed to find that the arrangement between Mr. Hobby and KFDM changed the nature of the KFDM application.

No Way Out of Tax on TV Loot, Published IRS Ruling Affirms

A ruling published last week by the Internal Revenue Service emphasized the impossibility of avoiding taxes on television quiz show winnings—even when the money is going to a tax-exempt organization.

The question was raised last year when the executive director of a tax-exempt organization agreed to go on a giveaway show with the understanding that winnings were to be paid his group. When he won "60x" dollars (paid directly to his organization), he contended he did not have to report it since...
CO-OP TAX DISCOUNT BAN Fought

The Internal Revenue Service proposal to eliminate cooperative advertising as a price discount for manufacturers' excise taxes met vigorous opposition at a hearing in Washington last week. A total of 41, representing manufacturers, advertisers and agencies attended, and others filed protests against the proposed tax ruling.

The Advertising Federation of America on behalf of 30,000 members said a definition of price which fails to allow advertising discounts is in effect a tax on money spent for advertising and therefore a tax on advertising. "This, of course, will have a seriously damaging effect on industry as a whole and it will be particularly damaging to local advertising media where it is estimated as much as 90 cents of the cooperative advertising dollar is spent," AFA said.

Witnesses agreed in objecting that the proposal reverses earlier rulings by the IRS and Congressional intent.

Electronic Industries Assn. endorsed present IRS rulings allowing a manufacturer to pay excise on the price after advertising allowances are deducted, saying these have become settled law and cannot be reversed "by mere administrative action." EIA and AFA both referred to interpretations made for the House excise tax subcommittee in 1956. EIA cited a statement of the House subcommittee report that the forthcoming IRS ruling would confirm the current interpretation with "no change recommended."

The tax clarification originally was demanded by the House Ways & Means excise subcommittee headed by Rep. Aime Forand (D-R.I.).

The Federal Excise Tax Council said, "The added tax will contribute to the current decline in consumer sales." It also protested the ruling would reverse IRS policy of long standing, "publicly affirmed to the House subcommittee two years ago."

The National Assn. of Manufacturers was among those protesting the excise proposal and individual manufacturers represented, included Columbia Records, CBS, Hytron, General Electric, Raytheon, Sylvania, Philco and RCA-Whirlpool.

For manufacturers acting under prior special rulings, the new regulation will take effect when published. Others will be subject to three-year retroactivity, but unless amounts involved are large, this is not likely to be enforced, an IRS spokesman said.

Rep. O'Hara Leaving Congress To Enter Private Law Practice

Rep. Joseph P. O'Hara (R-Minn.), a member of the House Interstate & Foreign Commerce Committee and its Legislative Oversight Subcommittee, has announced that he will retire from Congress at the end of his current term. He plans to enter private law practice either in his home state of Minneapolis, or in Washington, D.C.

An 18-year veteran of Congress, Rep. O'Hara surprised colleagues with the announcement. He is second-ranking minority member of both committees and would have stepped up to rank Republican next January. Rep. Charles A. Wolverton (R-N.J.), chairman of the committee during the 83rd Congress, had announced his retirement several months ago.

Rep. O'Hara, as a member of the committee in 1952, played an active role in adoption of the McFarland Amendment to the Communications Act.

Wanamaker Stymied Again; Mistrial Ruled in Oklahoma

Mrs. Pearl A. Wanamaker, former Washington state superintendent of public instruction, has suffered another setback in her multi-million dollar libel suit against affiliates of MBS.

In Oklahoma City, federal District Judge W. R. Wallace on May 21 declared a mistrial after a jury reported it was unable to come to an agreement. Mrs. Wanamaker sued Oklahoma stations KOY Oklahoma City, KOME Tulsa and KGWA Enid for $100,000.

The chain libel suit is based on a broadcast by MBS commentator Fulton Lewis Jr. in January 1956. Mr. Lewis linked Mrs. Wanamaker with Communism [GOVERNMENT, Jan. 16, 1956]. The Washington official (she since was defeated for re-election to her school post), filed suit against more than 30 MBS affiliates for damages of $2 million. Early in 1958 the suit in Baltimore resulted in a hung jury. A verdict for $10,000 in Mrs. Wanamaker's favor in Walla Walla, Wash., is awaiting a ruling on a motion for a new trial. Mr. Lewis has filed a counter claim against Mrs. Wanamaker for malicious litigation.

Two Am Grants Finalized

The FCC last week finalized two previous initial decisions and made am grants to Jackson County Broadcasting Co. for a new outlet on 1320 kc with 500 w, day, in Maquoketa, Iowa, and to Philip D. Jackson for a new outlet on 800 kc with 1 kw, day, in Weed, Calif. In the case of the Maquoketa grant, the Commission also denied a petition by Jackson County Broadcasting to strike exceptions of KROS Clinton, Iowa.
UPI BORN OUT OF MERGED UP-INS

- Telenews to be continued by Hearst Metrotone Inc.
- Bartholomew made chief; Justice Dept. investigates

The consolidation of International News Service with United Press Assns. to form United Press International was confirmed in an announcement May 24 [At Deadline, May 26].

The fate of the INS-Telenews operation, which supplies tv newsfilm and programming to stations throughout the country, was clarified later in the week: the organization will be continued by Hearst Metrotone Inc. It was explained that Telenews was not involved in the merger because the organization is owned 50% by Metro-Goldwyn-Mayer and 50% by the Hearst Corp., which also owned INS and International News Photos, both of which were covered in the consolidation.

The announcement of the merger did not touch upon the financial considerations involved but it was reported that an undisclosed amount of UP stock will be paid to the Hearst Corp.

Frank H. Bartholomew, president of United Press, becomes president of UPI. Kingsbury Smith, general manager of INS, will serve as vice president and associate general manager. The board of UPI will be enlarged to include William Randolph Hearst Jr., editor-in-chief, Hearst Newspapers; J. D. Gortakowsky, chairman of the board of Hearst Consolidated Publications Inc., and G. O. Markson, vice president and treasurer of the Hearst Corp.

Mr. Bartholomew said that "the consolidation of the two services will assure a stronger competitive news and pictorial news-report to newspapers, radio and television stations through the entire civilized world." He indicated that "economics" was an "important factor" in the merger, citing "steadily rising costs."

Attorney General William Rogers said Tuesday the Justice Dept. should be able to announce its position within the "next few days" on whether it feels a violation of the Clayton Antitrust Act is involved in the merger, following a meeting last Monday of Assistant Attorney General Victor Hansen, antitrust chief, and Justice lawyers, with UPI President Frank H. Bartholomew and counsel. Mr. Hansen said he heard rumors of the merger and sent telegrams to UP and INS officials asking that the merger not be consummated until Justice had studied the plans. Mr. Bartholomew replied that the merger had been reached May 16, but was not announced at that time pending various operational arrangements.

Chairman Emanuel Celler (D-N.Y.) of the House Judiciary Committee said Monday the merger emphasizes the need for passage of his bill (HR 7698) to require that the Justice Dept. be notified of mergers beforehand. The bill was reported to the House by the Judiciary Committee May 27, 1957, but has been held up in the House Rules Committee since then.

He felt that competition may have been "substantially" lessened as that term is used in the Celler-Kefauver Amendment to the Clayton Act, and that "undoubtedly, the public's opportunity to get news has been substantially diminished."

Sen. Estes Kefauver (D-Tenn.) said Tues-

FINAL negotiations of the UP-INS merger were consummated by (standing l to r) Raymond McCauley, INS general counsel; Harvey Lipton, INS attorney; Joseph R. Fawcett, UP attorney; Glen Offenbacher, UP attorney; J. D. Gortakowsky, Hearst Consolidated Publications Inc. board chairman; J. Kingsbury Smith, INS general manager; Mims Thomason, UP vice president-general business manager; Robert L. Frey, UP executive assistant to president; (seated l to r) E. K. Bryan, UP attorney; Frank H. Bartholomew, UP president-general manager; Richard E. Berlin, Hearst Corp. board chairman, and Lee Keller, UP vice president-general sales manager.

* Counted population
A. D. Ring and Assoc.
1950 Census.
day he had asked the Justice Dept. to "seriously consider" seeking a preliminary in-
junction against the merger. He also urged
passage of pre-merger-notification legisla-
tion now before the Senate Antitrust &
Monopoly Subcommittee of which he is
chairman.

An INS official estimated that only about
10% of the total INS force of about 600
editorial, business and operational employ-
es will be retained by UPI. UP said none of
its staff would be discharged.

The United Press was created in 1907
by E. W. Scripps, who also was the founder of
the Scripps-Howard Newspaper Group.
Controlling interest in the UP and the
newspaper group is still retained by E.
W. Scripps Co. INS was founded in 1909
by the late William Randolph Hearst. It
was wholly-owned by the Hearst Corp.

UP services about 1,900 radio-tv station
clients. No figure was available on INS' station
list but it is estimated to be "less
than 100" and includes the four radio net-
works. The INS wire reportedly was used
by stations largely as a supplemental wire.

A UPI official said all INS contracts will
be assumed by the new agency. He stated
these contracts will be "negotiable" between
UPI and its clients, where duplicate cover-
age existed. He said in the event that sta-
tions subscribed to both UP and INS,
UPI would attempt to sell the station a sup-
plementary wire, such as sports, business,
or local, that the client might not already have.

Telenews was regarded as probably the
most active broadcast unit of the Hearst
Corp. Telenews serviced 158 stations and
ABC-TV with daily newfilm strips running
from five to 12 minutes; a weekly news re-
view program of 15 minutes and a quarter-
hour "this week in sports" program. The
organization also supplied a 15-minute farm
news filmed show, which recently completed
a 13-week cycle on 64 stations under the
sponsorship of The American Cyanamid
Corp.

Robert H. Reid, who was television sales
manager of INS, covering Telenews, has
been named general sales manager of Hearst
Metrotone's Telenews operation. He was in
the process of laying off a staff, since
former Telenews salesmen had been on the
INS payroll and had been discharged. It
is likely that some of the INS personnel will
be hired by Mr. Reid.

Hearst Metrotone also distributes "news of
the day" newsreel to theatres.

Telemeter's Novins Confident
That Pay TV Still Has Future

Shutdown of the Bartlesville, Okla.,
closed-circuit community toll tv system after
eight months [PROGRAM SERVICES, May 26]
has not discouraged International Telemeter
Corp., developer of the Telemetering coin-
box system of pay tv. On the contrary,
Louis A. Novins, ITC president, said last
week that the Bartlesville experience with
service offered for a flat monthly fee con-
firmed Telemeter's belief that "an effective
pay television system must (1) identify each
program purchased by each subscriber; (2)
provide the means for varying prices de-
pending on the attractiveness of the enter-
tainment offered and (3) provide the viewer
with complete freedom of choice as to the
selection of his programs."

Mr. Novins asserted that "around the
end of this year, Telemeter will be in
operation in several communities" with such
a system. His office declined to identify
these communities until all details for the
installations have been fully worked out.
This caution is not surprising after the
experience of ITC and Skiatron in Los
Angeles where, after fighting for months
to get city franchises to install their sys-
tems, they then found themselves faced with
a public referendum battle and surrendered
their franchises instead [PROGRAM SERVICES,
March 3].

Commenting that one conclusion of the
operator of the Bartlesville toll tv system
was that other types of programming than
motion pictures are needed for success, Mr.
Novins said: "Telemeter is now actively
engaged in organizing a separate corpora-
tion with experienced personnel to develop
and obtain a wide variety of live programs,
both local and national. In a matter of
weeks, Telemeter will make announcements
signifying that pay television is moving from
conversation into hardware, from planning
into the market place."

Goodson-Todman Set Busy Summer

Goodson-Todman Productions, New
York, has announced it will have 22 half-
hour programs running weekly on the tv
networks this summer (up from last sum-
mer's 17 half-hours weekly), claiming this
was to be a record for an independent package
producer. Seven live and two film series are
involved. The firm has sold Number
Please to CBS-TV for the Tuesday
8:30-9 p.m. period starting in early July
as the replacement for Wingo, now defunct.
Other series set this summer include: Beat
the Clock, Play Your Hunch, To Tell The
Truth, I've Got a Secret, Undercurrent and
What's My Line, all on CBS-TV, and The
Price Is Right and Jefferson Drum on
NBC-TV.

Weaver Gets Double TV Exposure
On Camera and as Film Producer

Sylvester L. (Pat) Weaver Jr., former
NBC president and board chairman and
now a tv consultant, will get a "double ex-
posure" this week, on tv itself and as the
supervising producer of a new live tv film
series being offered for sale next season.

Mr. Weaver will be the guest on next
Sunday's (June 8) Mike Wallace Interview
on ABC-TV (10-10:30 p.m.) Mr. Wallace
currently is host of a special series on the
theme of "Survival and Freedom" presented
by ABC-TV in association with The Fund
for the Republic. Said Mr. Wallace, "We
plan to ask him how well he feels television
is living up to his ideas, expressed several
years ago, that it must be the instrument
which prepares us for tomorrow's good society or steels us to fight
for our democratic way of life."

Mr. Weaver's new live tv series—a pilot
will be made today (Monday) in New York
—is called Are You a Star? The series, star-
ing comedian Jim Backus, is being pre-
pared by Mr. Weaver's Program Service
Inc., which is responsible for production
supervision, and is aimed for the fall season.
Producer is George McGarrett. The series
will have fledgling actors or actresses com-
peting with one another in comedy sketches
in which professional talent will be em-
ployed.

Truman Urges Toll Tv Trial
In Letter to Virginia Paper

Ex-President Harry S. Truman last week
reiterated his belief that pay tv should be
given a trial because it has "great possibil-
ities." In a letter to his old Democratic
friend, Clayton Fritcheay, publisher of the
Northern Virginial (Arlington) Sun, Mr.
Truman said "there is no reason why this
could not be accomplished under proper
safeguards established by the FCC."

Last October Mr. Truman voiced these
views in a talk to the NAB regional meeting
in Kansas City [TRADE ASSNS., Oct. 14,
1957]. At that time he told broadcasters he
felt they should "at least have the oppor-
tunity to conduct pay tv" since they are
subject to federal regulation. He contended
the public should make the ultimate choice.
He told broadcasters at that time that he
knows little about subscription tv and "prob-
ably cares less."

Mr. Fritcheay is a former editor of Dem-
ocratic Digest, party organ, and held the
top Defense Dept. public relations post
during the Truman administration.
A spirited defense of 'modern' radio:
Adam Young report testifies that it works

A 24-page study designed to dispel the "myth" that "modern radio" caters mainly to rock 'n' roll-loving teenagers is being released today (Monday) by Adam Young Co. [AT DEADLINE, May 26].

The special report on "The Audience of Modern Radio"—based on a Pulse study conducted last fall in 10 major markets—contains that: (A) the audience of "modern" radio stations is predominantly adult (84.9% as against 11.7% teenagers and 3.4% children); (B) "modern" radio stations reach more adults than "old-line" network affiliates (50% more in the 6-9 a.m. period, 80% in the 9 a.m.-3 p.m. period, 60% in the 3-6 p.m. period); (C) "modern" radio stations reach more impressionable younger women than "old-line" network affiliates (85% more).

Markets in which the Pulse study was conducted were Los Angeles, New York, Chicago, Minneapolis, Cincinnati, Milwaukee, Atlanta, Miami, New Orleans and Seattle. Only in the latter market did the Young companies pick on a "compatible affiliate," KING Seattle—a station that, says President Adam Young, programs "similarly to independent stations." KING is an ABC Radio affiliate. In the nine other markets the study contrasted an independent with a network affiliate.

"We picked Pulse," Mr. Young said last week, "because in most agencies station buying is done according to Pulse. We felt their [Pulse's] findings would impress agency buyers."

Mr. Young further explained that while his report concentrated on major markets, sample surveys conducted in smaller markets (e.g., Greensboro, N. C.) tended to bear out his feeling that listening habits don't change very much in non-metropolitan areas.

The Young companies represent stations in five of the 10 markets analyzed but the findings in those five were not confined to client stations, Mr. Young points out.

In releasing the study, Mr. Young said he suspects the "muddled thinking" that equates modern radio with rock 'n' roll music. Although his personal tastes in music don't include R & R he maintains a Voltaire-like attitude towards it. He will defend to the death a station operator's right to include R & R in his music selections assuming such programming can be justified in terms of the broadest mass audience appeal and, through its, advertiser impact.

"Our salesmen found," he explains, "too many agency timebuyers who picked stations not on up-to-date market and audience factors but on reputations the stations had built over a period of years. Apparently it made little difference to these buyers that their image of stations had long been shattered by the arrival of modern radio."

Rock 'n' roll, according to Mr. Young, is but "one small facet of modern radio today." Granted, he said, that the single most important element of modern radio is the kind of music that inevitably determines station popularity, by itself music is not the total answer to the development of modern radio. A modern station, as opposed to "traditional" independents and network affiliates, also will stress local public service and news programming and will innovate "where others have feared to tread," Mr. Young asserted. In the realm of news broadcasts, a modern radio station will open with local news—usually delivered by on-the-spot reporters—and will rely as little as possible on wire service copy, he said.

Another thing, according to Mr. Young: modern radio station management must control music policy to the very last record "unless it wishes to surrender program dictates to the likes and prejudices of its various disc jockeys." A traditional radio station, said Mr. Young, will depend almost primarily on the Top 40, thus wind up with a station that has no personality of its own. People today must have a reason to turn to any given station; "people no longer listen to stations per se . . . they pick a station because they expect something."

Not only does Mr. Young feel that Top 40 is a misnomer when thought of as R & R ("After all, the No. 1 hit at WINS New York last week was the non-R & R 'All I Do Is Dream'") but that it is a complete fallacy that stations can buy audiences by means of gimmicks.

"No station has enough money to 'buy' its audience . . . Furthermore, in the final analysis no station can keep its audiences—assuming for a minute that it can buy listeners—unless it services their likes and needs."

As regards the rock 'n' roll controversy, Mr. Young feels that it has been "fostered by the trade press and a certain radio net-

---

**YOUNG'S PREMISES**

1. The audience of 'modern' radio stations is predominantly adult.

   ![Pie chart showing 84.9% adults, 11.7% teenagers, 3.4% children](chart)

   The Young-Pulse tabulations of the 10 markets showed the modern radio station with adult audience ranging from a high of 88.8% in New York to a low of 79.6% in New Orleans.

2. 'Modern' radio stations reach more adults than 'old-line' network affiliates.

   ![Graph showing 85% adults in 'modern' stations compared to 60% in 'old-line' stations](chart)

   The modern station was ahead of the "old-line" in all instances save three, all during the 6-9 a.m. period, in Atlanta, Los Angeles and Milwaukee.

3. 'Modern' radio stations reach more of the impressionable younger women than 'old-line' network affiliates.

   ![Graph showing 85% women in 'modern' stations compared to 60% in 'old-line' stations](chart)

   The modern radio lead in the eight markets tabulated (New York and Seattle were omitted from this section) ranged from 233% in Cincinnati to 29% in Los Angeles.

work vice president" whom he identified as NBC Radio's Matthew J. Culligan. Also serving as targets for Mr. Young's slings and arrows: Columbia Records' artists and repertoire director Mitch Miller ("who is against R & R because he's pushing album sales and sees Columbia and the other big firms being murdered by the new singles disc firms. . .") and Cunningham & Walsh's Jerome Feniger ("who in a recent talk [ADVERTISERS & AGENCIES, May 19] criticized the people who were implementing the very things he recommended at the outset. . .").

The severest critics of modern radio, Mr. Young went on, "fail to realize that programming today is no mere hit-or-miss proposition; programming today is based on long and careful study for how else do you explain that when a modern radio operator enters a new market, sets in use increase by a fantastic percentage?" These critics, he contends, "are those who have never had the problem of running a station or of building local audiences."

Much of the anti-modern radio fire emanates, Mr. Young charged, "from the networks who in olden days of radio were the 'haves' and today find themselves playing the part of 'have-nots' in terms of audiences. These are the men who are accusing independent station operators of doing the same things they themselves tried to do . . . but unsuccessfully. The successful affiliate operators today are those who on station time emulate their independent rivals."

One reason Mr. Young gives for the "passions" inherent in the current controversy is that "rock 'n' roll does not allow indifference; people either love it or they hate it." He believes those operators who are currently playing R & R "to the hilt" (and "R & R is definitely a fleeting fad . . . look at the Top 40 today as against the Top 40 of six months ago . . .") exercise a "censoring eye" on the more blatant and vulgar selections. He also dismisses the "tired refrain" that "R & R programming is a contributing factor to the alarming growth of juvenile delinquency: "I feel that TV shows that glorify crime should take most of the blame . . . if any blame is to be apportioned to broadcasting."

Mr. Young questioned the "hypocrisy" of some people who charge R & R is catering to a distinct minority, thereby ignoring the wants of most listeners: "What do you think WQXR (New York) and other classical music stations are doing but catering to a distinct minority, I ask you?"

**WMGM's 'DeGaulle' Interview**

WMGM New York last week found itself the victim of a classic hoax: its facilities were used to plug rival WINS New York by someone purporting to be Gen. Charles DeGaulle of France. WMGM's troubles began last Tuesday when it placed a direct overseas call to the home of Gen. DeGaulle in Colombey-les-Eglesis; there was no answer. The station tried again on Wednesday at 9:30 a.m. DST. At 10:30, the telephone rang; would WMGM now be ready to talk with M. DeGaulle? It would, and was. WMGM's Bill Edmonds rushed into a studio equipped with beeper phone and tape recording equipment as the engineer began cutting tape. After some brief contact with "DeGaulle" (who conveniently agreed to talk in English), Mr. Edmonds identified WMGM, in answer to lengthy questions that finished with the voice on the phone finally saying "but my favorite station in New York is WINS . . . vive la France!" (click.)

WMGM, checked the New York telephone company and found that its call had not gotten through. It immediately went on the air with an announcement confessing it had been "taken." It then called WINS Vice President Jock Fearnhead. Mr. Fearnhead denied any complicity by his station. WMGM's associate director, Ray Katz, said that the FCC has taken the case under advisement and WMGM has asked it to take "whatever action it deems appropriate."

**Swezey Protests Legislators Decision for Secret Session**

The Louisiana Legislature's decision to hold a closed session for consideration of the state's fiscal situation and teachers' salaries was protested Wednesday by Robert D. Swezey, executive vice president and general manager of WDSU-AM-TV New Orleans.

He said he was "shocked" by the decision "to shield deliberations from the open view of the public and the press," adding the action was in violation of the spirit and purpose of the state's public meeting law. The excuse of the legislature that more work can be accomplished in secret "is the same excuse that totalitarian governments use to justify secrets and censorship," he said.

WDSU has covered past legislative sessions by live, film and tape facilities.

**L. A. Broadcasters Oppose Delayed Disaster Reporting**

Proposal that broadcasters delay carrying news of disaster long enough to permit police, firemen, ambulance crews and other emergency persons to do their work without hindrance from curious spectators alarmed by radio and tv found no endorsement from Los Angeles broadcasters. A spot check by Broadcasting revealed station executives sympathetic with the public servants whose work is hampered by idle onlookers but unanimously opposed to the suggested solution.

The plan for delayed reporting of air crashes, fires and other disasters was made Tuesday by Los Angeles County Supervisor Burton Chase at a meeting of the board of supervisors. The matter was referred to L. S. Hollinger, chief administrative officer.

Several broadcasters expressed the opinion that prompt reporting of such news as the Hancock Oil fires (see page 79) kept away many who might otherwise have seen the heavy smoke and gone to investigate its cause. They agreed that emotional reporting of the "this-is-the-worst-scene-in-the-world . . . you can't-imagine-how-bad-it-really-is" variety would attract people to the scene but they termed such reporting a thing of the past.

But more public education is still needed, he declared. He urged broadcasters to impress on listeners and viewers that they can learn much more by listening and watching radio than by rushing to the scene.

Such a campaign, he indicated, would be of more value to authorities than withholding news of a disaster.

"Calm unemotional reporting of the facts, coupled with requests to the public to stay away, finds most people cooperative," Robert Forward, program director of KMC said. He cited the fire at Malibu where policemen assigned to keep the public out of the way found themselves with little to do because listeners had followed broadcast instructions and stayed away.

"Certain former privileges have to be given up when people live in large cities like Los Angeles, and running after fire engines is one of them," Arthur C. Hohman, deputy police chief of Los Angeles said. "The solution is not withholding news but controlling the manner in which it is presented, he declared, pointing out that Sigalert was developed for that purpose. Sigalert is a system whereby emergency police bulletins are received by radio stations in the area and either broadcast immediately or taped for subsequent use. The matter of fact police reporting, devoid of excitement or emotion, has made Sigalert a successful tool that aids rather than hinders, Chief Hohman said.
LINCOLN—The five-man news team dispatched by WOW-AM-TV Omaha to cover the Starkweather trial wound up its work with delivery of the first-degree murder verdict in Lincoln, Neb. After broadcasting this bulletin, the stations featured interviews with key trial figures, including defendant Charles Starkweather.

WOWO Fort Wayne had its Lincoln correspondent on the telephone as the jury filed in and their decision was relayed seconds later. Fort Wayne listeners. Tapes of the broadcast were sent to other Westinghouse Broadcasting Co. stations in Pittsburgh, Boston, Cleveland and Portland, Ore.

KETV (TV) Omaha broadcast the verdict bulletin and within 30 minutes had a special five minute program on the air. Among film and tape interviews presented was one with the governor of Nebraska who was reached by telephone minutes after his return from the Florida governors' conference. Another interview was with the defendant's attorney, T. Clement Gaughan.

Earlier, a filmed interview with Mr. Starkweather was obtained by KOLN-TV Lincoln through a jail cell window. One of KOLN-TV's four-man team covering the court proceedings, cameraman-reporter Don Wright managed to talk to Mr. Starkweather (until chased away by a jailor) during a noon trial recess. The station's staff artist, Bob Regler, illustrated the trial for KOLN-TV viewers.

KWFT Wichita Falls, Tex., got its coverage of the trial via a satellite report from KFOR Lincoln. The Texas station carried direct reports at the time of the murders and of the confessed murderer's capture.

LONG BEACH—It got hot on Signal Hill, Long Beach, Calif., May 22, but this time it wasn't for the all-jazz programming of KNOB (FM) on top of the hill. For the first time, the station had to pre-empt its jazz-only schedule, when studios were rocked by a series of explosions at the Hancock Oil Co. at the foot of the hill. Announcer Chuck Niles put the news on the air 40 seconds after it broke. For 12 hours, until sign-off, KNOB worked with Signal Hill police, broadcasting warnings to people in the area and reassurances to families of oilworkers who came to the studios. As things cooled down KNOB went back to jazz the next day.

KTTV (TV) Los Angeles started remote coverage in the afternoon and kept it up periodically through the evening. KTLA (TV) Los Angeles kept its remote units with the $15 million blaze until 1:10 a.m. KMPC Los Angeles reports it got a tip on the fire from a listener 10 minutes before the Los Angeles County firemen received the call. A KHPC mobile unit was on its way to Signal Hill less than an hour later.

HREVEPORT—Al Crouch, news director if KENT Shreveport, La., was credited last month with obtaining news of an International Geophysical Year satellite-tracking station in that city. The AP carried the story day 21, crediting KENT with breaking it day 20 in an exclusive interview with Ed Juttull, supervisor of electronics for the research department of United Gas, which installed the IGY secondary tracking station. KENT also recorded the sounds of Sputnik III.

MIDDLETOWN—Reports of the Nike explosion, in Middletown, N. J., were fed to more than 25 stations by WILK Asbury Park, N. J. The station also kept its own listeners informed, as well as giving comments to MBS and several Canadian stations, via beeper reports from newsmen Linc Harner, Andy Parrish, Dan Akens and Frank Wilgus.

PARIS—WEMS (TV) Cleveland, Ohio, has sent two staffers here to cover the French government crisis and the Algerian rebellion. Men on the scene are Newsreel Manager George Grant and newsmen Jack Moffitt. (The latter had only returned from a three-week European trip—in connection with a promotion of WEMS' One O'Clock Club—two days before being given the assignment.) Messrs. Grant and Moffit's daily reports will be telecast on WEMS newscasts.

KDKA Pittsburgh's News Director, Jim Snyder, is here reporting the French political scene for Westinghouse Broadcasting Co. stations. He was diverted to Paris while on his way to Brussels to cover the Benny Goodman band's WBC-sponsored concerts [ABROAD IN BRIEF, April 28; STATIONS, Feb. 17].

LONG BEACH—Six newsmen of KFOX, equipped with miniature tape recorders, staged their own raid on a gambling establishment in nearby Huntington Beach, Calif., May 16, collecting evidence of alleged illegal gambling operations and possible police corruption. One staffer tape recorded the words of the operator of the place as he told reporters he'd never be raided because he was paying for protection.

Pat Michaels, KFOX news manager, said that he telephoned a formal complaint to Huntington Beach police and subsequently broadcast the recording. Now, reports KFOX, Mayor Earl Irby and Police Commissioner Ray D. Bryant have launched a full-scale investigation of the town's police department.

Another expose by the station—narcotics traffic in the Orange County Jail—earned a commendation by Rep. Craig Hosmer (R-Calif.). The legislator telephoned from Washington to commend KFOX.

FORT WORTH—Working from a long-range flood coverage plan, KFIZ-TV Fort Worth, Tex., as the current flood season got underway, placed its entire facilities at the disposal of Civil Defense authorities. Shortly after Civil Defense ordered a 24-hour watch of river and lake levels, KFIZ-TV stationed a mobile unit at CD headquarters, telecasting hourly water level readings and a CD officer's statement of conditions. Then when an evacuation became necessary at 1:30 a.m., it was orderly, calm and efficient, KFIZ-TV reports.
ANNUSED The following sales of station interests were announced last week. All are subject to FCC approval.

KITE SAN ANTONIO, TEX. • Sold to Connie B. Gay, multiple station owner, by Charles W. Balthrope for $250,000. Mr. Balthrope will retain ownership of KITE-FM and will serve as consultant to KITE. The station, operated by Hamilton, Stubblefield, Twining and Assoc. KITE is on 930 kc with 1 kw, day.

KSO DES MOINES, IOWA • Sold to N. L. Benton, Joseph R. Floyd, Edmund R. Ruben and Tony Moe by KSO Inc., Lyman S. Ayres, president, for $202,500. Messrs. Benton, Floyd and Ruben also own WLOL Minneapolis, KELO-AM-TV Sioux Falls, KDLO-TV Florence, and KPLQ-TV Re- liance, all South Dakota. Anton J. Moe, sales manager of WDAU-TV Scranton, Pa., will be general manager of KSO, it was announced. Sale was handled by Allen Kander and Co. KSO is on 1460 kc with 5 kw.

KGEE BAKERSFIELD, CALIF. • Sold by Carl E. Haymond and associates to comedian Danny Thomas and his manager, Eli Parker, for $150,000 plus assumption of liabilities totaling almost $70,000. Mr. Thomas will own 90%, Mr. Parker 10% of the 250 w, 24-hour independent on 1230 kc. C. Dexter Haymond will remain as manager of station under consulting contract for one year.

KLYK SPOKANE, WASH. • Sold to Harold Lampbell, 50% owner of KINK Phoenix, for $120,000 by D. Gene Williams and Delbert Bertholf, multiple station owners. The sale was handled by Jack L. Stoll and Assoc. KLYK, formerly KSPO, operates on 1340 kc with 250 w.

WGOL GOLDSBORO, N. C. • Sold to Better Advertising Inc. of Kinston, N. C., headed by William S. Page, president, and Jack P. Hammon, secretary and general manager, for $35,000 by Wayne Broadcasting Co. Messrs. Page and Hankins own and operate KELS Kinston. The sale was handled by Paul H. Chapman Co. WGOL operates on 1300 kc with 1 kw, day.

APPROVED The following transfers of station interests were approved by the FCC last week. For other broadcast actions see For The Record, page 91.

WTVP (TV) DECATUR, ILL. • Sold by W. L. Shellabarger and others to businessmen headed by George A. Bolas, media director, Tatham-Laird Inc., Chicago agen- cy, for $200,000 for stock and debentures plus lease of premises for $20,000 a year for five years with the opportunity to buy for $225,000. The station is on ch. 17 and is affiliated with ABC-TV.

KOMA OKLAHOMA CITY • Sold 10% to Raymond Ruff, acting manager, by the other partners for $35,000. The FCC also approved the transfer of 10% of KOMA to Bessie von Zumft for $3,500 in a gift-purchase transaction with Donald S. Rubin, a partner in the station and a relative of Mrs. Zumft. Other partners are Arnold Lerner, Burton Levine, Myer Feldman and Harold Thurman. KOMA operates on 1520 kc with 50 kw.

KDBX (FM) LOS ANGELES • Sold construction permit to Radio Beverly Hills (KBCA [FM] Beverly Hills), Saul R. Levine, president, by James W. Hartford, Lucie Miltenberg and Rube Goldwater for $3,625 plus $8,875 for equipment. Mr. Levine is permittee of KBCO-FM San Francisco and 25% owner of KCAL Redlands, both Calif. This sale is conditioned that prior to its consummation, assignee disposes of KBCA (FM). KDBX operates on 105.1 mc with 17 kw.

KRBIB MASON CITY, IOWA • Granted assignment of license to Western Broadcasting Co., William F. Johns Jr. president and 51% owner, in a stock transaction. Mr. Johns has interests in KIHO Sioux Falls, W. W. WMIN St. Paul, Minn., WOSH-AM- TV Oshkosh, Wis., and KMNS Sioux City, Iowa. KRBIB operates on 1490 kc with 250 w.

Stations Not in Tampa Sale

The purchase of the afternoon Tampa (Fla.) Daily Times by the morning Tampa Tribune at an undisclosed price was announced last week, with the new owners to take over June 2. No transfer of real estate was involved. WDAE-AM-FM Tampa, owned by the Times, was not involved in the sale and will continue under the same management, it was announced. The Tribune owns WFLA-FM-FM Tampa and the David Tennant Bryan family, majority owner, also is majority owner of the Rich- mond (Va.) Daily Dispatch and News Leader (WRNL-AM-FM). Allen Kander & Co., Washington, handled the transaction.

D.J. Ted Steele Signs with WMCA

Veteran New York disc jockey Ted Steele was signed last week to a three-year contract by WMCA New York which reportedly will pay him $60,000 a year. He will handle two shows daily (except Sunday) at 11 a.m.-1 p.m. and 5-7 p.m. effective June 2. Mr. Steele, for nearly 20 years a New York radio-tv music fixture, will continue with his WOR-TV New York program until June 13.

WBBF Declares Single Rates

WBBF Rochester, N. Y., has published a new single-rate card, eliminating separate local and national rates. The station, under direction of Kenneth M. Cooper, noted current publicity on the local-national question and stated that the single rate card is "the only truly bold and real solution."

Radio a Success in Video Age

It may be that tv is the consuming Saturday night interest in many house- holds, but even in the video age WWVA Wheeling, W. Va., has radio enthusiasts flocking into the Virginia Theatre for the WWVA Jamboree. It's a live audience habit of 25 years standing.

After the show's 25th anniversary broadcast early in May the quarter-century box-office was figured at $2.2 million. This was racked up by more than 2 million paying guests, with broadcast revenue—hundreds of thousands worth—-not taken into account.

The anniversary audience was a typical one with visitors from 16 states present for the 7:30 p.m.-2 a.m. show. The weekly influx from the 25-state signal radius has meant several millions in business for Wheeling merchants over the last quarter-century.

Cognizant of this, the Wheeling City Council and the Ohio Valley Board of Trade sent congratulatory resolutions to the Storer station on the show's 25th birthday. The governor transcribed greetings for the broadcast. The Jamboree's country and western stars—more than 750 of them so far—have drawn listeners from 575-650 counties to see the broadcast. (WWVA figures its coverage in the country's northeast quadrant amounts to about 39% of the country's total population.) At last count two years ago, it was found that listeners had driven 250,000 miles to and from Wheeling for Jamboree. The 25th anniversary of the WWVA Jamboree attracted not only a full complement of listeners and visitors but also wide publicity both in print and on the CBS network (which regularly carries a Jamboree segment on its Saturday Night Country Style).
GE Realigns Executives At Schenectady Stations

General Electric's broadcast operation (WGY-WGFM (FM)-WRGB (TV) Schenec-
tady, N. Y.) has a new alignment.

In the new plan announced last week by J. Milton Lang, general manager of broad-
casting station operations, Robert F. Reid, manager of WGY, becomes manager of
marketing, and Merl L. Galusha, manager of WRGB, becomes manager of operations.
Mr. Reid in his new post will direct sales, traffic and promotion, and Mr. Galusha
will be responsible for all programming and tech-
nical operations for all stations.

Mr. Lang noted that the new alignment
would permit a fluid organization and maxi-
mum use of talent in both media. He also
said that Frank A. Pasley, Caleb Paine
and Willard J. Purcell continue in their
respective posts of manager of accounting,
director of public service and head of ad-
vanced technical planning and research for
all of the stations.

Berkmans Named to Top Offices
In Chicago Greeting Card Firm

Louis and Jack N. Berkman, president
and vice president, respectively, of the
Friendly Group stations, have taken top
offices in a reorganization of United Printers
and Publishers Inc., Chicago greeting card
and calendar producer.

Louis Berkman, also president of the Follansbee Steel Corp., Follansbee, W. Va.,
was elected chairman of the board of United
Printers. Jack Berman was elected chair-
man. Friendly Group stations are WSTV-
AM-TV Steubenville, Ohio; KODE-AM-
TV Joplin, Mo.; WBOY-AM-TV Clarks-
burg, W. Va.; WPAR Parkersburg, W. Va.;
WPTP Pittsburgh, and KMLB Monroe, La.

REPRESENTATIVES APPOINTMENTS

KAKE Wichita, Kan., has appointed Venard
Rintoul & McConnell, N. Y.

KDAN Eureka, Calif., has named McGavren-Quinn Corp.

WWCO Waterbury, Conn., has appointed
Jack Masla Assoc.

STATIONS SHORTS

WRCA-TV New York reports its most suc-
cessful April in station's history—13% in-
crease in total billings over that month last
year.

WABD (TV) New York has reduced its sta-
tion personnel effective June 6 by three em-
ployees—all assigned to Nightbeat inter-
view program which is slated to go off air
for summer. Affected are Norman Gelb,
Morton Silverstein and Ellen Schapiro.

WPOW New York reports increase in over-
all monthly billing since December 1957
amounts to 250%.

KMMJ Grand Island, Neb., announces it
has increased power from 1 kw to 10 kw.

WBBF card lists three types of rates, the 10
a.m.-3 p.m. daytime plan, (with flat rates
for 6-10 a.m. and 3-7 p.m.), evening plan
and separate news rates for five-minute news
shows and news headlines, all with fre-
quency discounts.

WITH Adds Audit Service
As Food Merchandising Aid

Food store audits every two weeks now
are part of the WITH Baltimore food mer-
chandising program, it has been announced
by R. C. Embry, vice president of
the station. The audits measure the retail volume
of sales for any item or brand.

Sidney Hollander Assoc., independent
Baltimore marketing research organization,
will supervise the program and prepare de-
tailed reports. The cost will be shared by a
number of clients, offering participants a
convenient and economical means of deter-
mining a brand's share of the market, Mr.
Embry said. Special rates are available to
WITH sponsors.

Brand reports will cover unit volume,
unit brand share, dollar sales and dollar
brand share.

Details are available from WITH or Sid-
ney Hollander Assoc. The service will begin
this month.

WNPS on Air; WTI X Moves to 690

Todd Storz, president of Mid-Continent
Broadcasting Co., last month formally pre-
sented the Orleans Parish school board with
WNPS, the city's new educational station
which uses the facilities of Mid-Continent's
WTIX [PROGRAMS & PROMOTIONS, May 12;
EDUCATION, Feb. 10]. WNPS operates on
WTIX' old 1450 kc, while the latter trans-
fers to 690 kc. The educational station com-
nenced operating at 6 p.m. at a dedication
ceremony that included the mayor of New
Orleans, Dr. James F. Redmond, president
of the Orleans Parish school board and Mr.
Storz.

KBIQ (FM) Gearing for Stereo

New highpower transmitting equipment
now is being installed at Mount Wilson for
KBIQ (FM) Los Angeles, new call of sta-
tion formerly designated KPLA (FM). When
installation is complete, late this summer,
KBIQ will start daily stereophonic broad-
casts in conjunction with its am affiliate
KBIG Avalon (Catalina), John H. Poole,
president of both stations, announced.
Otherwise, Mr. Poole said, KBIG and
KBIQ will be programmed independently.

The stations will offer time at a combined
package rate, however.

New John Blair Calculator Out

A third edition of John Blair & Co.'s sat-
uration calculator (first issued nearly two
years ago) is being made available to agen-
cies and advertisers. The firm's theme is
that in spot radio, it is saturation and cir-
culation which make up what it terms
"satureach." The calculator permits the user
to see at a glance the cost of 12, 24, 48
or 96 announcements weekly for five mar-
kets or more (grouped by fives) up to 150.
Also included are the costs under premium
time plans.
NIGHT RADIO VALUE CITED AT KBA MEET

- D'Arcy's Renfro boosts am
- Kentuckians hear appraisal

Radio stations should sell their night hours "as the best dollar-for-dollar value in advertising," in the opinion of Harry K. Renfro, radio-tv director of D'Arcy Adv. Co., St. Louis.

Addressing the Kentucky Broadcasters Assn. luncheon meeting at Louisville Thursday, Mr. Renfro described radio as "the quickest and most effective way of reaching people." He topped his appraisal of the medium with suggestions designed to increase its effectiveness.

Field trips of D'Arcy executive and Pulse surveys demonstrate radio's power as an advertising medium, he said. The Pulse figures, he explained, show no difference in the quality of prime time and nighttime radio audiences.

"The night cost-per-thousand is often lower than prime time," he added, suggesting stations that concentrate on selling only the 7-9 a.m. and 4-6 p.m. periods are short-sighted. "It is difficult to operate at a profit if most of a station's income comes from a few hours a day.

Mr. Renfro said the Pulse study shows "greater advertising impact and sponsor renewal factor in the commercially uncrowded night hours." He suggested night radio also offers "greater separation from competitors' commercials and more freedom of choice of commercial locations."

Besides attractive discounts, he continued, night (6-10 p.m.) radio averages as many adult listeners as daytime radio (7 a.m.-6 p.m.) although more homes are tuned in during the early period. He said radio delivers more audience than tv each hour between 7 a.m. and 5 p.m. "10 of the 17 hours in the broadcast day."

"Day or night," he said, "more than 85 out of every 100 radio listeners are adults." He offered this formula to stations—sell night as the best dollar-for-dollar in advertising and sell daytime in packages coupled with night spots.

D'Arcy is placing radio advertising for the Budweiser account on 300 stations in 180 markets, with its campaigns receiving many citations, Mr. Renfro said. The commercials were created "to blend with today's radio."

The agency's field studies showed that "some operators sold their souls to the record companies and gave their stations to the disc jockeys," he told the KBA session, adding, "I have nothing against disc jockeys." He was concerned because stations "sweat over their engineering standards, work to build a good sales staff, hire a good representative and then turn over their programming to disc jockeys."

As to music, he said, "Music should be controlled by policy, not by personal whim. Radio music should be compatible with the products advertised in various time segments. Morning music should be different from afternoon music; stormy day music from that of a sunny day."

Mr. Renfro said many stations show a lack of imaginative management. He said commercials should be based on catchy copy, colorful language and attractive claims—all presented with sincerity and believability.

"The best commercial is lost if not directed to the proper market or consumer," he said.

Less than one-third of all the millions of sets being bought by the public are for replacement, Mr. Renfro said, the balance being "new places to listen."

NABFRAT Lashes out at T.V. For Increased 'Violence'

The National Assn. for Better Radio & Television last week lashed out at tv for its "increasing incidents of violence." During the week of May 3-9, the organization monitored the crime programs shown before 9 p.m. on seven Los Angeles tv stations and reports that incidents of violence portrayed on these programs included 223 killings of human beings.

Clara S. Logan, NABFRAT president, said, "Our report indicates that crime on tv has reached an all-time peak and the prospect ahead is even more frightening because the networks have taken their fare from the independent broadcasters in presenting death and sadism on the programs which reach millions of youngsters each week."

She cited the NBC station in Los Angeles and said that during its survey week this year, 500 more killings occurred than in the 1952 survey made by NABFRAT. Mrs. Logan claimed that the three Los Angeles network stations accounted for 61% of the deaths tabulated, compared with 39% for the four independent stations. In 1952, the network stations presented only 22% of the killings.

"Thus we see," she said, "increasing care on the part of some independent broadcasters, but a complete dropping of the bars by the networks—which indicates a continuous worsening of the situation nationally."

From whence this "raw material"? Mr. Sweeney says the people are being recruited from such diverse fields as Fuller brush and office systems sales, from advertising agencies, newspaper classified departments and stores.

RAB MATRICULATING SALESMEN

Radio time salesmen will leave New York's media "street" June 15 to go back to school—a one week course to be given for the first time by Radio Advertising Bureau in a pilot schooling operation, called "Graduate School of Radio Selling."

Kevin Sweeney, RAB's president, ran through the details last week. About 20 station salesmen will spend the week, made up of "hard work and nightly homework" under the direction of 11 members of RAB's staff and six "experts," at the Shoreham Club at Old Greenwich, Conn.

Scheduled are 39 different subjects ranging from a simplified version of radio engineering to basics of grocery store and furniture advertising and to lectures on radio's principal media competitions.

Says John F. Hardesty, vice president and general manager of RAB, should the experimental school prove "effective," a similar effort will be made for RAB members in other sections of the country next year.

Purpose of the "school" is to aid sales personnel experienced in other fields and new to the practice of selling time. Observes Mr. Sweeney: "79% of the most effective station salesmen now selling radio time had no prior radio selling experience, a survey of our members indicated last year. In small markets it runs over 92%. But even the stations in the largest markets find over 70% of their best men coming without prior radio experience."

From whence this "raw material"?

Mr. Sweeney says the people are being recruited from such diverse fields as Fuller brush and office systems sales, from advertising agencies, newspaper classified departments and stores.

National Community Tv Assn. Opens First Convention June 10

First convention of the National Community Tv Assn. in Washington will be held at the Mayflower Hotel June 10-12. The three-day meeting will feature a reception and demonstration for congressmen and senators on June 10 and a discussion by NCTA general counsel E. Stratford Smith on the attacks on catv systems by tv broadcasters. The convention will be opened by Attorney General Herbert Brownell and will also hear FCC Chairman John C. Doerfer, Sen. J. W. Fulbright (D-Ark.), and Wendell B. Barnes, administrator of the Small Business Administration. New officers will be elected, with George J. Barco, Meadville, Pa., the retiring president. Convention-goers will also hear J. B. Rundle, Meadville, Pa., as well as Jack Schwartz, telephone solicitor expert; C. Hamilton Moses, Arkansas Power & Light Co. Management session will be moderated by Martin F. Malarkey Jr., Pottsville, Pa.; technical sessions will be moderated by Ray Schneider, Williamsport, Pa., and Archer S. Taylor, Missoula, Mont., consulting engineer.
NAB’s Fellows Names Five Board Committees

Five NAB board committees were appointed effective June 2 by President Harold E. Fellows. The board’s semi-annual meeting will be held June 18-20 in Washington, preceded by a June 16 briefing session for new members.

The new tv convention, tv finance and general fund committees will meet June 17.

Members of the new board committees follow:

Convention—I. Frank Jarman, WDNC Durham, N. C.; John H. DeWitt, WSM Nashville; William Holm, WLPO LaSalle, Ill.; Fred A. Knorr, WKMH Dearborn, Mich.; Joseph E. Baudino, Westinghouse Broadcasting Co.; C. Howard Lane KOIN-TV Portland, Ore.; James D. Rissen, KTV (TV) Colorado Springs, Colo.; C. Wrede Petersmeyer, Corinthian Broadcasting Corp. Mr. DeWitt and Mr. Rissen will serve as liaison members with the Broadcast Engineering Conference Committee. The vice chairman of the Radio Board and the Television Board will be chairman of the Convention Committee. Mr. Fellows will act as chairman until the boards elect their vice chairmen during their meetings.

General Fund Finance—Alex Keese, WPAA Dallas, chairman; Raymond V. Eppel, KORN Mitchell, S. D.; Robert T. Martin, WMRN Marion, Ohio; Merrill Lindsay, WSOY Decatur, III.; William C. Grove, KBFC Cheyenne, Wyo.; Robert L. Pratt, KGFG Coffeyville, Kan.; John E. Fetzter, WKZO-TV Kalamazoo, Mich.; Payson Hall, Meredith Publishing Co.; C. Howard Lane, KOIN-TV, Portland, Ore.

Service Meet to Hear Bartley

FCC Comm. Robert T. Bartley will be principal speaker at the Southeastern Electronic Service convention banquet in Miami, Saturday night, Lewis Winner, convention chairman and producer, announced last week.

The convention, described as first of its kind, is expected to attract more than 1,000 technicians to Miami’s Municipal Auditorium for four days starting Thursday. Mr. Winner said more than $1 million worth of the latest electronic equipment will be shown and demonstrated.

Stations, Talent to Benefit From Videotape, ATAS Hears

Videotape will enable tv stations to go after local advertising dollars now spent mostly in newspapers, Jack R. Hauser, promotion manager, Professional Products Div., Ampex Corp., said Monday in a speech to the Los Angeles chapter of the Academy of Television Arts & Sciences.

Big-space newspaper advertisers like department stores, furniture stores, supermarkets and chain stores have not appeared on tv "to any considerable extent," Mr. Hauser said. "One important reason is that tv stations have not solicited this business because of their own scheduling and programming problems."

Citing an example from KRLD-TV Dallas, Tex., Mr. Hauser said that "an auto dealer wanted 10 spots a week scheduled at different times each day and of a type which called for two live cameras. A two-camera crew could not be made available for live production during each of the 10 desired availabilities, except on an awkward and expensive overtime basis. This would have priced the customer right out of the market."

"Solution: the spots are regularly taped, all at once, and scheduled freely according to station time availability and sponsor desires. This is work that local talent would have lost, yet the cost of taping, both for the sponsor and the station, is less than live production would have been. This does not mention the problems of moving automobiles in and out of studios during peak load times."

Allott to Address Colorado Meet

Sen. Gordon Allott (R-Colo.) will address the June 6-7 meeting of the Colorado Broadcasters & Telecasters Asso. at the Antlers Hotel, Colorado Springs. Other speakers include W. D. Rogers Jr., KDUB-TV Lubbock, Tex.; Walter McClintiff, Television Bureau of Advertising; Revill Fox, head of Revill Fox Adv. Co., Denver; David Button, KMIN Grants, N. M.; A. Prose Walker, NAB engineering manager, and Tom Morrissey, consulting engineer. Presiding will be Robert H. Dolph, KFTM Fort Morgan, CBTA president. James A. McKenna, of McKenna & Wilkinson, Washington law firm, will moderate a panel discussion. Officers will be elected.

Ken. Radio Asso'n. Elects Booth

Arden Booth, KLWN Lawrence, was elected president of Kansas Asso'n. of Broadcasters at its May 24 meeting in Topeka. He succeeds Grover Cobh, KVGB Great Bend. Tom Basham, KFH Wichita, was re-elected to the board and Max Falkenstein, WREN Topeka, was elected vice president. The 1959 meeting will be held at Wichita.

MBS ‘In the Black’ At First Year Mark

With the new business now under contract, Mutual is operating "in the black," board chairman Armand Hammer last week told more than 100 advertising agency executives attending a luncheon meeting in New York commemorating the first anniversary of the network under its present ownership.

Mr. Hammer attributed the network’s economically feasible method of operation to its formula of stressing news, music, sports and special events programming. He acknowledged that Mutual had been "in the red" for the first four months of this year after operating at "a break-even point" for the last five months of 1957. Mr. Hammer indicated that network radio operations cannot operate economically with "lavish programming," and contended that affiliated stations prefer news, music, sports and special events shows from a network.

He reported that MBS now is receiving 90% clearance on its network shows from its more than 400 affiliates.

Robert F. Hurleugh, MBS vice president in charge of news and the Washington office, served as toastmaster for the affair. He described MBS’s "operation newsbeat," under which persons of affiliated stations serve as MBS correspondents for significant news developments, and the network’s new special service department, which begins functioning on June 5. This department, in essence, will serve as a Washington bureau for affiliated stations, providing, on request, special coverage in the capital for the MBS outlets.

CBS News Appoints Horton

Michael Horton, director of information at NBC, will assume a newly-created post of director of information of CBS News on June 8, Sig Mickelson, vice president of CBS Inc., announced Thursday. In the new post, Mr. Horton will be responsible for planning and developing a public relations and promotion program for CBS News and will act as liaison with press information, sales promotion and advertising units of the various CBS divisions.

Mr. Horton joined NBC in 1953 after eight years in Europe. He was a member of the New York Herald Tribune European staff 1946-51, serving also as Paris correspondent for MBS.

Manno Named to ABC Radio Post

Charles Manno, assistant national program director of ABC Radio, has been named eastern program director for the network, Edward J. DeGray, vice president in charge of ABC Radio, announced last week. Mr. Manno has been with ABC Radio since June 1949, was associate staff director for four years and became assistant national program director in November 1957. Before he joined the network, he was in sales for a year with the New York Herald Tribune and before that in sales and promotion with Capital Records.
Stirrings of Renomination Draft Squeezed by Pettrillo's Stand

A movement to draft James C. Pettrillo for renomination as president of the American Federation of Musicians was under way last week prior to the union's annual convention in Philadelphia starting today (Monday)—but it apparently will fall on deaf ears.

Mr. Pettrillo made plain early last week in Chicago he will not reconsider his decision to quit the parent AFM helm after 18 years, but [PERSONNEL RELATIONS SHORT, 14]. He also declined again to recommend his successor, though his endorsement would be tantamount to election. Among candidates mentioned for the AFM presidency are Al Manuti, AFM Local 802 (New York); Charles Bagley, AFM vice president, and Herman Kein, board member from Los Angeles. Mr. Pettrillo did indicate a preference, however, for a member of the union's present executive committee.

Evidences of a "draft" movement were reflected in claims by some AFM officials that they have canvassed enough delegates on the floor of the convention to make the outgoing AFM czar acknowledged he has been urged to reconsider his announcement of May 14, adding: "They can do all the drafting they want but they need a younger man for the job and that's what they are going to get. Our executive board is crowded with talent but my favorite son candidate will not be known until after the election."

Little Immediate Effect Seen If SDG Strike Materializes

If Screen Directors Guild calls its members off their jobs at studios producing films for tv today, the action would have little immediate effect a survey made Wednesday by Broadcsting revealed.

Some of the tv film companies said they already have enough programs in the can to take them well into next winter. 20th Century-Fox has completed 30 episodes each of How to Marry a Millionaire and Man Without a Body. ABC, scheduled to begin fall on the NTA Film Network. Four Star Films has completed its main shooting schedule and is out of production until July. Screen Gems also is currently not in production. NBC's National California Productions is within the last week of completing its new Silent Service series. McCabe Productions also is within a week of finishing its two series, Burns & Allen and No Warning.

Tv-Radio Arm, WGAW, Names Slate

Don Mulhall was elected president of the Tv-Radio Branch of the Writers Guild of America West at the group's annual meeting May 15. Other officers for the coming year are Leonard Freeman, vice president, and Anthony Ellis, secretary-treasurer. Board members elected for two years are Arthur Alsheimer, Richard Collins, Samuel Newman and David Victor, with Kay Lennart winning a one-year term. Ken Epperson was elected president of the screen writers branch of WGAW, with Ben Roberts, vice president; Winston Miller, secretary-treasurer; Herbert Baker, Isabel Lennart, Mel Shavelson, James Webb, two-year term directors; Lewis Meltzer and Charles Hoffman, one-year term directors.

Parent Firm Brings WEDC Under Labor Law, NLRB Says

The combined gross revenue of WEDC Chicago and the Emil Denemark Inc. automobile business must be included in the Denemark firm's income by the National Labor Relations Board in deciding whether WEDC comes under the national labor law, according to a May 26 NLRB ruling. The board sustained a demurrer by its ex-officio SDG strike service week last week can Federation of Musicians Squelched

Broadcasting

$2,000 annually; 495 members earning up to $5,000; 259 members earning up to $10,000; 200 up to $20,000, 129 up to $50,000 and 49 earning more than $50,000 a year. By categories, 83% of the actors fail in the group earning $2,000 or less per year, as do 74% of the singers, half of the announcers and 90% of the dancers and specialty acts.

Local 47 Musicians Close Ranks To Defeat Fund in Philadelphia

Administration and rebel forces in the Hollywood local (47) of the American Federation of Musicians united last Monday to instruct the local's delegates to the AFM national convention, starting today (Monday) in Philadelphia to fight for the rights of individual musicians in all payments for their services. Specifically, the local 47 delegates were ordered to ask the convention to remove the 5% payment on new tv films, to resume paying the $25 fee for the use of their films on tv to the musicians other than the trust funds, and also to pay the 21% raise in recording scale to the musicians instead of the trust funds.

The local's membership adopted almost unanimously a motion urging their delegation to oppose any attempt of the convention President James C. Pettrillo for a new term of office. He has announced his retirement.

The rebel faction of Local 47 won a major victory over administration supporters when the meeting voted to instruct convention delegates to urge the AFM to agree to a Local 47 plan to give all the musicians Guild of America to determine representation of the musicians now on strike against the major motion picture studios [PERSONNEL RELATIONS, Feb. 24 et seq.] Delegates also were instructed to ask the national AFM to institute proportional representation and the secret ballot on convention business and to curtail the powers of the union's president and international executive board.

An administration motion to authorize an increase in the work tax from 1 1/2% to 2% for the last six months of 1958, to reduce the $16 dues from the studio musicians, was defeated.

Sidney Heads SDG Eighth Term

George Sidney has been elected to his eighth term as president of Screen Directors Guild, the membership overriding his proposals that he served too long already. Other officers for the coming year are George Stevens, first vice president; John Sturges, second vice president; John Rich, secretary and Lesley Selander, treasurer.

Assistant directors elected Richard Modet president of their council; Ridgeway Callow, first vice president; Robert Vreeland, second vice president; James Berne, secretary; and Henry Brill, treasurer.

PERSONNEL RELATIONS SHORT

National Labor Relations Board has ordered election among employees of WFLA-AM-FM Tampa, Fla., to determine whether they desire to be represented in collective bargaining by International Brotherhood of Electrical Workers. Board laid down rules covering eligibility of specific employees.
3-Day Electronics Show Predicts Hard-Sell Era

The picture of a "hard sell" era for manufacturers and a "buyer's market" for distributors was painted at the annual electronics parts distributors show in Chicago a fortnight ago.

At the same time the functions of electronics are becoming more diversified and invaluable for the nation's welfare, some 14,000 show delegates were apprised. They were also told that there's nothing wrong with the nation's economy that hard sell won't cure.

The three-day exposition, held at the Conrad Hilton Hotel, was jointly sponsored by the Electronic Industries Assn. (also holding its annual convention in that city), National Electronic Distributors Assn., Assn. of Electronic Parts & Equipment Mfrs., West Coast Electronic Mfrs. Assn., and producers of associated components for electronics. Nearly 300 parts manufacturers displayed their newest products. The show was conducted by Electronic Industry Show Corp., Chicago.

The "streamlined" 1958 show included educational forums, with distributors taking in management and/or sales sessions to survey their special problems. Delegates heard several suggestions for helping the electronics industry fight the recession and viewed products designed to improve business distribution methods and business in general.

There was no scarcity of new products, judging by the display. For example, Jerrold Electronics Corp., continuing its emphasis on the consumer market, unveiled a tv-fm amplified home system. The system was designed to improve existence distribution methods and business in general.

Jerrold claimed it to be the first such system which amplifies signals before distribution. Tv and fm signals are piped to every room in the house; tv or fm hi-fi sets can be plugged anywhere into the system's outlets. The system is designed for easy installation in existing homes or those under construction and to provide tv with high fidelity quality previously associated with fm.

Jerrold also entered the converter market with two uhf units—"at a time when stress on educational uhf stations spells revival of uhf broadcasting, long a stepchild of the television industry," according to the firm. A feature of the Jerrold exhibit was an hourly film demonstration of the tv-fm home distribution system.

Another highlight of the parts show was General Electric's new CARI plan for keeping distributors automatically supplied with tv receiving tubes and controlling inventories. Details of the plan in effect since January, were revealed at the parts show.

Various hi-fi stereo developments also were shown at the trade show, including V-M Corp.'s new automatic record changer for use in disc reproduction systems and Shure Bros.' stereo and monaural phonograph pickups, featuring its studio dyneic tone arm and cartridge.

All major recording tape manufacturers were represented (Audio Devices, OrRadio Industries, Reeves Soundcraft Corp.), save Minnesota Mining & Mfg. Co.

### Rohn Mfg. Expands Production To Include Broadcasting Towers

The Rohn Manufacturing Co., Peoria, Ill., has started production of heavy-duty communication towers for stations. The firm for many years has been making steel towers for television reception.

Rohn reports several of its new towers are in am and fm broadcasting use. These are the same type towers, the firm says, as are being used for microwave radio-telephone and elsewhere in electronic communications.

The Rohn line includes towers that can be installed self-supporting to 66 feet or guyed to 2,300 feet or more. They come in 10-ft. sections requiring no special installation equipment. The triangular units are precision-made with mass production machinery.

The complete broadcasting package includes lighting, guying, insulator base and all other materials for completely installing a broadcast tower. Rohn Manufacturing maintains representatives coast-to-coast and also offers a complete engineering service to prospective broadcasters.

### MANUFACTURING SHORTS

Magnavox Co., Fort Wayne, Ind., has reported decline in earnings to $791,000 or 81 cents per share on sales of $20,854,000 for third fiscal quarter ended March 31. For similar period of 1957 Magnavox had net income of $924,000 or 94 cents per share, on sales of $22,042,000 based on 895,756 shares of common stock outstanding on March 31, 1958.

Westinghouse Electric, Metuchen, N. J., has announced line of six basic portable phonograph models, ranging in price from $29.95 to $89.95. Line includes high-fidelity model, 45 rpm model and both automatic and manual four-speed phonographs.

Raytheon Mfg. Co., Waltham, Mass., has announced that negotiations are in progress for construction of new, 150,000 square foot building in Burlington, Mass., for company's microwave and power tube division. Estimated completion date is early 1959.

Emerson Radio & Phonograph Corp., Jersey City, N. J., claims to have broken "bulk barrier" with what it describes as "America's smallest all-transistor portable radio with self-contained speaker." New radio (999 Champion) is only slightly larger than pack of cigarettes, weighs 10½ ounces and retails at $36.

Durant Sound Equipment Corp., N. Y., announces availability of German-produced Tealid condenser microphone k-125 with frequency response of 30 to 18,000 cycles and variable output range from -40 to -95 db. It has switch controlled non-directional or cardiod pattern and output impedance of either 200 ohms balanced or 10k ohms unbalanced. Price is $225.
ETV still in infancy, conference agree

The use of television as a means of educating students and the general public is still an early stage of development, a group of educators generally agreed last week at a conference held at the U. S. Office of Education in Washington. National Assn. of Educational Broadcasters cooperated in the Monday-Wednesday meeting.

Techniques and problems of electronic visual education were explored in detail. Marion B. Folsom, Secretary of Health, Education and Welfare, set the tone of the meeting in his message of welcome by pointing to the broad possibilities for enrichment of future classrooms opened up by educational tv.

"It is an exciting prospect," Secretary Folsom said, "that through television an inspired teacher may reach unlimited numbers of students, and with teaching materials at her fingertips that heretofore could not be given general use. We know that there is no substitute for the devotion and capabilities of a good teacher—but television may bring greater opportunities for the good teacher to reach more children."

The largest modern activity, according to Marshall McLuhan, editor of Explorations, Toronto, Ont., is "the consuming of information electronically processed." He said, "Globally mankind is now a community of conscious learning. And our industrial establishment is setting up higher and higher educational programs for its top executives. For decision making today calls for exact knowledge of almost universal group dynamics."

Frederick H. Garrigus, NAB manager of organizational services, said informational and educational programming on both commercial and educational broadcasting stations are going through an upgrading process. More ingenuity, thought and planning now go into the presentation of programs on commercial stations, he said.

Mr. Garrigus said educators and commercial broadcasters are showing more willingness to communicate. He found an increased awareness of the need for more ingenious and thought-provoking programs along with a growing response on the part of the audience to educational programs presented on commercial stations when the programs are thought-provoking and professionally presented.

John E. Ivey, vice president of New York U., proposed formation of a national ETV network supported in part by federal funds.

Dr. Novice G. Fawcett, president of Ohio State U., described television as "not just another teaching device but a medium of communication of extraordinary power and versatility going through an upgrading process. The three-year-old child tomorrow learns to tell time sufficiently well to turn on his favorite 'noise' and if you doubt the impact of the medium on his life, listen for a short time to his vocabulary."

He suggested the home and community "can increasingly re-enforce the work of the school and, with the use of the television medium, might appropriately begin to capture some of the responsibilities that the schools have been forced to assume in the past."

David C. Stewart, executive assistant director, Joint Council on Educational Television, said the 32 operating tv stations serve an area of more than 50 million people, with the number of stations expected to reach 50 in another two years. Addition of vhf facilities in Washington, New York, Cleveland and Los Angeles would add 26 million people to the audience, he said.

Leonard Marks, communications attorney, said broadcasters are showing growing awareness of their responsibility in forming public opinion. He suggested that educators, with a vast reservoir of talent, should ask for time on commercial stations.

Edgar Dale of the Ohio State U. educational research bureau outlined trends in educational television and the need for more facilities. He said some stations will need more than one channel, citing WQED (TV) Pittsburgh as an example. WQED has applied to the FCC for a uhf facility to supplement its vhf service.

Ford Foundation gives META partial reprieve

Metropolitan Educational Television Assn., New York, has received a last-minute reprieve out of the coffers of the Ford Foundation. META less than a fortnight ago announced its intention to dissolve as of June 1, because of a lack of funds [Education, May 26].

But last week, the Ford Foundation-supported Educational Television - Radio Centre at Ann Arbor, Mich., assigned META a contract to produce several series of filmed programs during this summer, keeping New York's budding cvt production center alive at least for the immediate future. But META will stick to its decision to suspend all live programming June 1, a move which it said it had "intended" to make in the first place in order to give its employees summer vacation time.

While META officials were highly reluctant to divulge the financial aspects of the ETRC deal, it was learned that the contract calls for an initial $50,000 worth of production, plus an "implicit commitment" for further funds to cover additional production of the series after July 31.

Additional funds from private sources also have bolstered META's finances. META President Dr. Alan Willard Brown expects on or about June 7 to announce the amount of privately-donated emergency dollars, now understood to be approximately $15,000. Dr. Brown said that the on-air appeals by WNCA, WRCA-TV and WCRS-TV, all New York, have netted "a larger volume of mail than cash," but donations—ranging from $1 to $200—have run into "several thousands of dollars."

The three series ordered for ETRC include 13 half-hour filmed programs on astronomy, an unspecified number of academic discussion programs titled Dialogue and 7 half-hour programs on Unity of the Arts with Rutgers U. professor-poet John Ciardi.

Of the 45 employees slated for unemployment, only 13 now will be let go and these—explained a META spokesman—"are mainly secretarial and non-production assistants."

Though Dr. Brown is hopeful of resolving the META status problem New York State Board of Regents "long before August—meaning that a Regents stamp of approval would further prolong META's life—he is still somewhat pessimistic about the long-term future. He said the lack of operating funds for the balance of 1958 was "acute as ever," and that META still had "a hard way to go" before realizing its needed $200,000 with which to meet expenses through Dec. 31.

KUHT (TV) Marks Fifth Year

KUHT (TV) Houston, Tex., pioneer educational television station of the U. of Houston, celebrated its fifth anniversary a fortnight ago with a special 8 p.m. telecast presenting educational tv leaders.

One of the programs was announced by KUHT Acting Manager Roy Bentholt: Richard B. Hull, director of radio and television, Ohio State U., who formerly was president of the National Assn. of Educational Broadcasters, executive director of the Joint Council on Educational Television and manager of WCFS-TV Ames, Iowa; Dr. John C. Schwarzwalder, first general manager of KUHT, now manager of educational station KTCA-TV Minneapolis-St. Paul; Jack Harris, general manager of KPBC-TV Houston, representing the university tv advisory committee and Houston's commercial telecasters, and others. Friday was declared Educational Television Day by the mayor of Houston.

EDUCATION SHORTS

U. of Illinois, Urbana, announces its program for Ph.D. in Communications has been reorganized. Students may specialize either in field of group or social communications process (which covers theory, philosophy policies and structures of communications, public opinion and attitude formation and advertising) or field of individual communication (covers interpersonal communication, psycholinguistics, linguistics and experimental phonetics). Complete information may be obtained through Dallas W. Smythe, chairman of Committee on Graduate Study in Communications, 119 Gregory Hall, U. of Illinois, Urbana.

National Assn. of Educational Broadcasters reports it has awarded nine summer scholarship grants of $250 each as "part of its program to improve professional qualifications of educational broadcasting personnel nationally."

American Public Relations Assn., N. Y. chapter, has set up $300 scholarship for upperclassman in School of Journalism, School of Commerce, Accounts & Finance, NYU, who has majored in public relations and plans to enter that field upon graduation.

Page 86 • June 2, 1958

Broadcasting
WINN Names Three Winners In Timebuyer Rating Contest

WINN Louisville, Ky., has announced names of the three first timebuyers to guess the station's identity from clues given in a May 12 Broadcasting advertisement. Rena Mayer of Campbell-Ewald Co., New York, took the $250 first prize. Leonard Kay of McCann-Erickson, Chicago, second ($150) and Frank W. White of Kirkland, White & Schell, Atlanta, third ($100).

The three were first to post airmail replies to WTMJ-AM teaser ad stating that a 250 watt independent in the top 50 markets had achieved a record listenership rating. A total of 459 correct replies was received from timebuyers of recognized national advertising agencies.

WTMJ-AM-TV Get 9 Awards in Milwaukee Competition

The Milwaukee Radio and Television Council May 22 announced its fifth annual awards at a luncheon in the local Jewish Community Center, with the Journal Stations (WTMJ-AM-TV) capturing nine of the 20 honors.

The awards by station and program type:

Radio—WTMJ for children's, social and personal problems and public issues: WISN for recorded music and WFMF (FM) Glendale, Wis., for cultural programs.

Television—WTMJ-TV for young children's, literature, children's science, women's, religious, and panels on controversial issues; WISN-TV for teenagers, community information; WXIX (TV) for public issues, controversial issue interviews and college credit courses; WITI-TV, social, and WMVS-TV (educational outlet) for travel and study, cultural, and non-credit colleges courses.

WBZ, WKOX Get Mass UP Awards

The 1958 Tom Phillips Awards of the UP Broadcasters Assn. of Massachusetts for the best news stories broadcast in the commonwealth were awarded May 15 to WBZ Boston and WKOX Framingham. UPBAM President Arthur King, news director of WEEI Boston, cited WBDX newspapers John Grubbs and Art Gardner for their coverage of the Little Rock integration crisis during President Eisenhower's summer vacation in Newport, R. I., and WKOX newsman Les Levinson for his interview of a wrongfully-jailed murder sus-pect named Santo Rodriguez. WBZ won in the 5 kw and more station class, WKOX for stations under 5 kw.

Engstrom Given Research Medal

Dr. Elmer W. Engstrom, senior executive vice president, RCA, was awarded the Industrial Research Institute Medal for 1958, presented at the Institute's annual meeting in Colorado Springs, Colo., May 20. Dr. Engstrom was cited for "distinguished leadership in industrial research, combining rare qualities of humility, understanding and vision to organize creative talents in the achievement of major research objectives; for his correlation of research with engineering and commercial production to provide new electronic services to industry and the public."

AWARDS SHORTS

WFGA-TV Jacksonville, Fla., has received "Certificate of Achievement Award" from Third Army for its "comprehensive and accurate news coverage" of area recruiting office activities and for aid in securing enlistments for regular army. Station also awarded certificate of appreciation from 11 local Lions Clubs for "invaluable services and cooperation" in organization's aid-to-the-blind and sight conservation programs.

KDKA Pittsburgh has received human relations award from local branch of National Assn. for Advancement of Colored People for station's weekly NAACP series.

KRNT-TV Des Moines, Iowa, has received "Washington Freeman Peck Award" from Iowa State Medical Society for station's live telecast of heart operation in May 1957.

KPTV (TV) Portland, Ore., has received award of merit for its "High Time for providing entertainment to combat juvenile delinquency" from Lower Columbia River Peace Officers Assn.

WOW Omaha, Neb., has received "Award of Merit" for "outstanding community service performed during the year" from Ak-Sar-Ben, state-wide civic service organization. Award was for series, City Salutes, which "promoted inter-community understanding throughout Nebraska."

WPIX (TV) New York, Metropolitan Educational Television Assn. and New York City Board of Education were cited by Manufacturing Chemists Assn. for "their cooperative efforts in the advancement in scientific education. Citation is for "Science Corner," "Science Club" and "Careers in Focus," programs of station's The Living Blackboard educational series which is piped directly to over 1,000 classrooms in metropolitan area.

WJA, Junior Achievement Co. of WMC Memphis, named Memphis "Company of the Year" from among 48 local miniature companies.

WGY Schenectady, N. Y., Junior Achievement Co. known as "Voice of Junior Achievement," has received "Top Achievement Award" as "best of 16 JA companies in Schenectady area."

J. A. Broadcasting Co., Junior Achievement group counselled by WBNH New Bedford, Mass., named first place winner in local JA awards competition.

NBC's Life and the World received plaque from American Cancer Society in recognition of program's "service in informing the public about cancer research."

Drewrys Ltd., U. S. A. Inc. was recipient of certificate of appreciation from U. S. Navy for brewery's sponsor support of The Silent Service film series on WLWI (TV) Indianapolis and WKZO-TV Kalamazoo, Mich.

Charles M. Skade, senior v. p., administration, Fuller & Smith & Ross, N. Y., received Leffingwell Medal, given annually to member of National Office Management Assn. who "through distinguished work or some outstanding contribution or accomplishment in the broad field of office management, is deemed worthy of the award."

Richard Woodies, New England manager of Henry J. Christal Inc., station representatives, was awarded plaque as outstanding alumnus of Emerson College Broadcast Department at school's Annual Broadcasting Day May 20. He graduated in 1950 with first broadcasting class.
**BBC's $16.8 million television city begins taking shape on London outskirts**

The following status report on BBC's television city was written for Broadcasting by Ernest Chisholm Thomson, London journalist and commentator, who was the BBC's first TV press officer in 1936. It was arranged through the British Information Services.

A mass of steel and concrete is beginning to take shape on London's western outskirts towards the airport. It is the British Broadcasting Corp.'s new Television Center at Shepherds Bush, West London.

When completed in the next two or three years, at a cost of more than £6,000,000 ($16,800,000), it will be the largest "Television City" in Europe. Four of its seven studios will be bigger than any others now in use in Britain. All will be equipped with the most advanced television camera channels, including provision for color.

A television city has been the BBC's dream since it opened the world's first public television service in 1936. Accommodations then were limited to two studios measuring 70 x 30 x 25 ft. at Alexandra Palace, a 50-year-old amusement pavilion in London's north suburban Nervous. Numerous film studios have been converted for television purposes and new ones opened in various parts of the country. The independent television companies, which did not begin operating until 1955, have striven Britain with studios of their own. But the BBC's television city will be the first specially-built, self-contained and completely functional grouping of studios, scene shops, restaurant and offices in the United Kingdom.

BBC's architects designed the building so that studios, all at ground level, splay outwards, fan-fashion, from an inner ring. The design is both pleasing to the eye and functional—to keep things moving fast and smoothly.

Hub of the television city is the central courtyard, already enclosed in the nine-story main block. The open space, 150 ft. in diameter, will be laid out as a garden with fountains and statues, etc.

Encircling the garden are a colonnade, dressing rooms and a two-story main entrance hall which can be used for televising the arrival of VIPs. The ground floor and basement together will contain 120 dressing rooms for about 550 people, with adjoining make-up rooms. Artists will enter the studios from the inner ring, those with basement dressing rooms travelling by escalator.

Also in the basement will be a lecture theatre, band practice rooms and a telephone exchange big enough to serve a small town.

All equipment, props, scenery and the like will be brought in from a runway skirting the studios at the outer end.

The biggest studio—and the last to be completed—will be No. 1. Measuring 108 x 100 x 54 ft., it will have a 7 ft. 6 in. pit which can be flooded as a swimming pool for aqua shows. The floor is designed to carry a team of elephants. No. 1 will accommodate a studio audience of 600.

Studios 2, 3, 4 and 5 will come into service in 1961 as the first operational unit.

Stretched in a great arc around the first floor of the inner ring will be the control rooms, each looking down on its particular studio from about 14 feet above floor level, with windows extending the full width of each studio.

The nerve-center linking all studios will be in a segment called the central wedge, between studios 3 and 4, where the flow of program material from all sources will be controlled. It also will contain the announcer's presentation studios. The central inner ring, most of the space will be used for offices, topped by a roof garden for the staff.

A great "spur" or "tail" will eventually run north from the main block, but construction of this and a works block must be postponed until the easing of restrictions on capital investment. By 1960, however, the main block will stand complete, and will go into operation less than a year later.

**JWT Canadian Market Survey Profiles Rich, Expanding Area**

Market statistics on Canada compiled by the J. Walter Thompson Co. have been published in a 178-page volume by McGraw-Hill. In the marketing study, called The Canadian Markets, the agency says Canada "provides an extremely rich and well-developed market based on a high level of purchasing power."

In a section on advertising media, the agency notes that the broadcast media reach practically every Canadian home—186 stations as of Jan. 1, 1957, and 39 TV stations currently on the air. TV can reach 80% of Canada's 16 million population, the book points out.

Among the many findings: the higher income group is expanding—1 out of 10 taxpayers were making $5,000 or more in 1955 but this ratio will climb to 4 out of 10 by 1980; domestic investments jumped 90% from 1947 to the present; younger and older age groups are growing fast; population has increased 15% in five years and by

YOUR FUTURE IS GREAT IN A GROWING AMERICA

THE CITY THAT DIDN'T EXIST A MONTH AGO

Every 30 days the U.S. adds as many new Americans as live in Norfolk, Va.—creating brand-new wants and needs which must be satisfied.

What does this mean to you? It means greater opportunities than ever before—in all fields. Home construction is expected to double by 1975. Power companies plan to increase output 250% in the next 20 years to provide the power for scores of new labor-saving devices. Clothing suppliers predict a one-third increase in 7 years. With 11,000 new citizen-consumers born every day, there's a new wave of opportunity coming.

7 BIG REASONS FOR CONFIDENCE IN AMERICA'S FUTURE

1. More people... Four million babies yearly. U.S. population has doubled in last 50 years! And our prosperity curve has always followed our population curve.

2. More jobs... Though employment in some areas has fallen off, there are 13 million more jobs than in 1939—and there will be 22 million more in 1975 than today.

3. More income... Family income after taxes is at an all-time high of $5500—is expected to pass $7000 by 1975.

4. More production... U.S. production doubles every 20 years. We will require millions more people to make, sell and distribute our products.

5. More savings... Individual savings are at highest level ever—$340 billion—a record amount available for spending.

6. More research... $10 billion spent each year will pay off in more jobs, better living, whole new industries.

7. More needs... In the next few years we will need $600 billion worth of schools, highways, homes, durable equipment. Meeting these needs will create new opportunities for everyone.

Add them up and you have the makings of another big upswing. Wise planners, builders and buyers will act now to get ready for it.

FREE! Send for this new 24-page illustrated booklet, "Your Great Future in a Growing America." Every American should know these facts. Drop a card today to: ADVERTISING COUNCIL, Box 10, Midtown Station, New York 18, N. Y.

(This space contributed as a public service by this magazine.)
1980 should show a 90% gain, or more than 26 million.

The book calls attention to plans under-
way in Canada for a microwave network that will ultimately connect all TV stations from coast to coast.

To permit comparisons on a national or provincial scale, the volume employs an ar-
rangement of data under 12 market in-
dicators.

WBC-Backed Goodman Steals Brussels Show

The propaganda battle between U. S. and U. S. S. R. "cultures" was being won for the first time in many months by America—thanks to Benny Goodman and his sponsor, Westinghouse Broadcasting Co.

After finding visitors to the U. S. Pavil-
ion at the Brussels World's Fair walking away disappointed, and seeing the Soviets outscore and outperform the Americans on practically every entertainment front, the U. S. had a hit last week as pavilion guides had to turn away hundreds from the Benny Goodman jazz concerts, staged at the American Theatre and promoted by WBC.

Not only were the various Goodman ag-
ggregations—trio, quartet, sextet, band and Benny playing solo with the Belgian State Symphony—wowing 'em at the fair, but a special telecast last Tuesday night via Euro-
vision, the Western Europe tv network, went out to an estimated 8 million viewers.

A radio broadcast Thursday night was
carried by the Belgian Radio Network and
delayed behind the iron curtain via Voice of America transmitters. Last Thursday, too, the Westinghouse radio stations in the U. S. —WBZ Boston, WBZA Springfield, KYW Cleveland, KDKA Pittsburgh, WOWO Fort Wayne, KEX Portland and WIND Chicago —began carrying, each night through this coming Wednesday, the tape recordings of the May 25-31 jazz programs under the catch-all title of Benny in Brussels. One non-WBC station, municipally owned and operated WNYC New York, also is carry-
ing the series. WBC intends to make avail-
able later this summer to its tv stations —KYW-TV Cleveland, KPIX (TV) San Francisco, KDKA -TV Pittsburgh and WIND-TV Chicago—filmed reports of the jazz programs. Columbia Records Div. of CBS Inc. has recorded the concerts' high-
lights and plans to issue an "lp".

WBC officials explaining why WBC agreed to underwrite the Goodman one-week stand, said it was a "needed public service" that prompted WBC President Donald H. Mc-
gannon to propose the show. They pointed out last week that the Goodman troupe's phenomenally-successful trip through the Far East in December 1956 was jointly sponsored by the State Dept. and the Amer-
ican National Theatre & Academy, and that such support was now "conspicuously lack-
ing at a time when such aid of the arts is more vital than ever." Privately, they hoped that "le jazz hot" might take out some of the sting of Nikita S. Khrushchev's antici-
pated visit to the fair later this summer, pointing out that "not one American official of high government rank has yet visited the fair. . . ."

Russian Writes About Global TV

The possibility of global television in the future by using especially constructed space satellites as transmitters is explored in an article in the current issue of Popular Elec-
tronics titled "Russian Proposes Global TV." The article is a summary of data compiled by a Soviet engineer, V. Petrov, who sug-
gests that space satellites could pick up sig-
als from stations on earth, bounce them to other satellites for near-distant relay, and thereby enable nearly every tv station on earth to pick up a single broadcast.

PLAYBACK

A GEOGRAPHICAL EQUALIZER?

Television is one of the means through which a Southerner could be elected

president, Gov. Leroy Collins (D-Fla.)
declared May 21 during an interview with

dave Garroway on NBC-TV's Today

which originated at the 50th annual

Governor's Conference in Miami Beach.

Gov. Collins said in part:

I think this machine right here is the
great geographical equalizer. I think the
American people aren't basically con-
cerned with where a man comes from

g eographically. They are concerned with

that man himself, what his character is

and what his background is, and whether

or not he has basic competence and

qualities of leadership. And through tele-

vision and public communication gen-

erally—through increased interest of the

press—I think that any man, from any

spot in the United States, can have an

opportunity to aspire to any public office.

CANADIAN CONFLICT

F. Hugh Horler, vice president and

director of radio and television, Mac-

Laren Adv. Ltd., Toronto, speaking to

the Asn. of Canadian Advertisers

last month:

It has been quite clearly established

that the advertiser will be a full-time

partner [in the expanded, competitive tv

system]. For the first time in a Royal

Commission report we read that "Adver-
tising is a positive contributor to living

standards of economic activity and should

not be regarded as a regrettable and even

deplorable part of our public broad-
casting system." This, in contrast with

two previous commissions which branded

costly advertising as both regrettable

and deplorable.

While we are welcomed as a partner

it's sometimes with reluctance. Ironically,

in my opinion, advertising and the Ca-

adian attitude to a broadcasting system

are almost incompatible. Our job is to

sell goods and services at the lowest

possible cost. Which means relatively

inexpensive programs, most of which

must come from foreign lands, or the

next choice—the type of program that

has so far been discouraged—the give-

aways, the roller derbies and the other

relatively inexpensive shows.

HUXLEY ON MADISON AVENUE

Aldous Huxley, controversial author

( Brave New World) and outspoken critic

of modes and manners, on The Fund for

the Republic's Mike Wallace Interview.

ABC-TV, said:

... advertising plays a very necessary

role, but the danger, it seems to me, in a

democracy is this. I mean, what does a
democracy depend on? A democracy de-
dpends on the individual voter making an

intelligent and rational choice for what

he regards as his enlightened self-interest

in any given circumstances. But what

these people are doing . . . is to bypass

the rational side of man and to appeal
directly to his deeply unconscious forces

below the surface. So that you are, in a

way, making nonsense of the whole democ-

cratic procedure which is based on con-

scious choice on rational ground. . . .

NEWS BUDGET

Sig Mickelson, vice president and gen-

eral manager of CBS News, speaking at

the awards luncheon of the California

AP Television-Radio Assn., recommend-
ed a high place for news in the broad-
cast scheme of things, saying:

Radio and television newsmen are cer-
tainly a more competent and aggressive

group now than they were 10 years ago,

but I am afraid that there are still too

many stations relying on ex-disc jockeys,

former saxophone players or inexperi-

enced recent college graduates to provide

a quality news service . . .

[Noting that one station had promoted

its news director to promotion manager,

he continued] . . . If promotion manager

is a notch higher than news director in

the opinion of station management, the

station can never climb higher than

serving as a conduit for someone else's

news and runs a real risk of serving in-

accurate or distorted news with the con-

sequent loss of public confidence and even
danger of libel suits.

WHDH-TV Prison Film Praised; WNTA-TV Repeats Documentary

A half-hour documentary film program on prison life produced by WHDH-TV Boston and presented on that station May 7, received such favorable response from viewers and community leaders that WNTA-TV Newark sought and received permission to teacast the film yesterday (Sunday).

A station spokesman for the station indicated that the documentary, "Inmate—the Walpole State Prison Story," will be made available to tv stations that request it, provided clearances can be obtained from unions involved in the production. The film was produced within the walls of the prison by WHDH-TV with news staff in cooperation with the Massachusetts Dept. of Correction. In order to get "the feel" of prison life, three WHDH-TV staffers — producer-writer Joe Levine, director-editor Matt Connolly and associate producer Jim Harrington — spent 24 hours in the prison as "inmates" for the actual filming, with a staff cameraman and a sound engineer joining the team, took eight days in jail.

The station was besieged with congratulatory messages from government and community leaders, including Gov. Foster Furculo of Massachusetts.

KRC&A TV Viewer Wins Trip

For guessing nearly all the impressions made by the tv commercial characters, Mr. Gaffers and Mr. Satter, on the audience of KRC&A TV (Los Angeles during February and March, Harold Satter won a trip for two to Hawaii sponsored by Utility Alliance Corp., Los Angeles. Contest was conducted among dealers in Gaffers & Satter products and their employees to stress the change in name that identifies all Utility appliances as Gaffers & Satter, following the success of the tv cartoon characters in selling ranges [ADVERTISERS & AGENCIES, Dec. 23, 1957]. Mr. Satter, a serviceman for Anthony Bros. refrigeration sales and service of Inglewood, Calif., guessed that the pair had made 41,221,404 viewer impressions during the two-month contest period, only 13,796 off the official total of 41,234,600. This figure was arrived at by averaging the ratings of Pulse and Nielsen for the KRC&A programs in which or between which the G & S commercials appeared, multiplying this average by the number of tv homes in the KRC&A signal area (approximately 2.3 million, KRC&A told contestants and that figure by two (average number of viewers per set). How Mr. Satter arrived at his winning figure was not disclosed. Utility's agency is Robinson, Jensen, Fenwick & Haynes, Los Angeles.
contest: A helicopter load of gifts (ranging from a cigarette lighter to a $100 bill) fitted with small parachutes were dropped and two trucks loosed over 10,000 gift certificate-bearing balloons. A dozen models were hired by KMYR to give out numbered leaflets plugging the treasure hunt. Numbers were broadcast and prizes given to the people who presented the corresponding leaflets. Color movie trailers were placed in six downtown theatres and many thousands of flyers were given out by stores in the station's coverage area.

Clues to the check's location led a large number of hunters to converge on a residential section (a housing contractor has instituted a claim against KMYR for $40,000 for damage done by zealous hunters) and the check was eventually found in that area. Due to the length of time taken to find the prize, the check was for $1,000. At one point during the hunt, a temporary restraining order was issued by a local judge to stop the station airing further clues as searchers were trespassing and damaging property. KMYR subsequently sent a squad in a truck to help clean up the area.

**Helicopter Reports for WJBK**

Detroit motorists driving to and from work are being aided by WJBK-AM with a series of traffic-copter reports.

Each Monday, Thursday and Friday during the morning and afternoon rush hours the station's program director, Bob Martin, takes a mike up in a helicopter and broadcasts traffic conditions on the city's main arteries. The reports are heard on Monday's *Morning Express* and the afternoons on Martin's *McLeodsville, U. S. A.*

**How to Sell Men's Wear—RAB**

Radio Advertising Bureau is distributing to its membership a seven-piece information kit on men's wear retail trade which the bureau claims was researched and compiled in the shop over a four-month period at a cost of $10,000. Included is a booklet titled "Your Store Can Get Results Like These With Radio," a 15-page analysis of the successful radio strategy used by 15 different men's wear retailers throughout the U. S. Markets covered vary in size from small towns such as Watertown, S. D. (pop. 13,000) to major cities such as New York (pop. 9 million).

**Grocers See Convention On Film**

KFMB-TV San Diego contributed toward the city's efforts to attract conventions last month by filming activities in connection with the meeting of the Western States Chain Grocers Assn. at the Hotel de Coronado.

For the third consecutive year KFMB-TV produced films of the convention and presented them at the conclusion of the sessions. This year the group adopted a resolution expressing thanks to Dan Bellus, head of the promotion department of the station, who directed the film production. The grocers also voted to return to the Coronado next year.

The time factor was a handicap to hurdle in getting footage of the last evening session on the film for showing later that night. The last foot of film was taken at 8:15 p.m. and delivered across the bay to the station for processing, editing and splicing. The completed film was returned to the convention hall in time for the 10:30 p.m. showing to more than 225 delegates and their wives.

**WITH Aids Straw Hat Revival**

A cooperative venture to revive the "Straw Hat Day" tradition in Baltimore was conducted May 15 when Dick Skeen, president of Warner & Co., men's store there, dramatized the occasion by inviting WITH Baltimore to broadcast from the window and the front sidewalk of the store from 10 a.m. to 8 p.m.

Baltimore men were made straw hat conscious again by the guests who were interviewed during the day. Celebrities participating at the revival event included political candidates for governor and for the U. S. Senate, and singing star Julius LaRosa.

**WISN, WRIT Go Stereophonic**

Two Milwaukee radio stations, WISN and WRIT, are cooperating on a weekly series of stereophonic broadcasts and report excellent response. Both tracks of stereophoric are played on special equipment at WISN, with one fed via telephone line to WRIT and aired simultaneously with the WISN signal (all WISN station break commercials are aired on WRIT). Listeners are advised to place two radios about eight feet apart and equate volume of both receivers. Program is aired Tuesday, 10:30-4:55 p.m., and sponsored by Standard Electric Co.

**ABC-TV to Focus on Youth**

ABC-TV announced last week it will this fall present *Youth Anonymous*, an hour-long filmed and live study of teenagers and juvenile delinquency problems. The report, part of the network's newly inaugurated series of which *Prologue 1958* and *Report Card 1958* were forerunners, will feature ABC News head John Daly, Washington bureau chief John Secondari and commentators Edward P. Morgan, Quincy Howe, Don Goddard and Robert Fleming.

**WGN Searching for Opera Talent**

WGN Chicago is cooperating with the Illinois Opera Guild in a four-month search for new talent, with winners to appear on a new series, Opera Auditions of the Air, starting Nov. 1. The search will be conducted in five midwestern states and is designed to find the "wealth of undiscovered talent" not yet heard on the air. The winner will receive a $1,000 prize from the guild toward advancement of his career. Contestants may enter by requesting entries from WGN Inc., 441 N. Michigan Ave. Deadline for entries is Sept. 30, with an age range of 18-30.

**Mobile Unit Shown by WBKB (TV)**

A mobile telecasting unit, claimed to have features previously found only in large stationary installations, was displayed to the trade and public by ABC o&o WBKB (TV) Chicago May 21. Included are a complete director's control and dual channel audio console, capable of originating two tv programs simultaneously. It may be equipped with as many as five cameras and manned by a crew of 7 to 11 technicians if desired. Intricacies of the equipment are explained to visitors by Frank Genereux, WBKB engineer. The mobile unit, over 34 feet long and less than 10 feet high, was on display in front of ABC Chicago headquarters at 190 N. State St.
NEW — SEND TEST SIGNALS DURING PROGRAMMING

The Telechrome Model 1008-A Vertical Blanking Interval Test Signal Keyer is a self-contained portable unit that makes possible transmission of television test and control signals between frames of a TV picture. Any test signal (multiburst, stairstep, color bar, etc.) may be added to the composite program signals. The keyer will operate anywhere in the TV system and operates from composite video, sync, or H & V drive. The test signals are always present for checking transmission conditions without impairing picture quality. The home viewer is not aware of their presence.

These continuous reference signals may be used in connection with various Telechrome devices for automatic correction of video level, frequency response, envelope delay, differential gain and differential phase.

IMPORTANT:
Checking after programming is costly and at best highly inefficient since conditions constantly vary. The Telechrome Vertical Interval Keyer minimizes post-program checking and overtime expenses. It provides instant indication of deteriorating video facilities so that corrective measures can be undertaken immediately—manually or automatically during programming.

NOW in use by CBS, NBC, ABC, BBC ITA (Brit.)

J. B. Fuqua, president-general manager, WJBF (TV) Augusta, Ga., re-elected to Georgia House of Representatives. This will be his second term as member of legislature.

Lloyd E. Yoder, NBC v.p. and general manager of WRCV-AM-TV Philadelphia, elected member of board of directors for local Chamber of Commerce.

Eugene W. Wilkin, sales manager, WPRO-TV Providence, R. I., named v.p. of Providence Advertising Club.

Norah Adamson Yardley, publicity and sales promotion director, WCOP Boston, died at Elliot Hospital in Manchester, N. H., May 18.

The National Father's Day Committee last month named Dr. Milton S. Eisenhower (1), president of John Hopkins U., "Father of the Year" and CBS newsman Walter Cronkite, "Radio Father of the Year" at an award luncheon. The committee is using "In- tegrity Starts in the Home" as the theme of Father's Day, which will be celebrated June 15.
Why Chrissie slept in the basement

She did it on advice of counsel — conked off promptly at eight in the southwest corner. Counsel in this case was a weather counsel — WOOD-TV’s Frank Slaymaker who is looked at and listened to with confidence by all WOODlanders. When Frank broadcasts in tornado season, it’d be well to sleep in the southwest corner of the basement out of harm’s way — down goes Chrissie and all other sensible WOODlanders (including that needle-nosed mutt named Nick).

If you would have your advertising believed, associate it with people whose word is accepted at face value — like WOOD and WOOD-TV personalities — like Frank Slaymaker.

WOOD-TV is first — morning, noon and night, Monday through Sunday — November ’57 Grand Rapids ARB
WOOD-AM is first — morning, noon and night, Monday through Sunday — April ’57 Grand Rapids Pulse

Everybody in Western and Central Michigan is a WOODwatcher!

WOOD AM TV
WOODland Center, Grand Rapids, Michigan
WOOD-TV - NBC Basic for Western and Central Michigan: Grand Rapids, Battle Creek, Kalamazoo, Muskegon and Lansing. WOOD - Radio - NBC.
Don’t let the gimmick derail the pitch

The other evening we watched a television commercial which showed a deep sea diver getting into his gear and then being lowered into the briny. As he descended we could see frothy little bubbles being manufactured in the water for a length of air hose unreeling, and a pump operating above.

All this activity consumed perhaps 20 seconds of a 1-minute commercial. Just when we were getting interested, all a-twitch at the prospect of leading a sal-avage expedition for sunken treasure, the announcer spun it, surprise! He was selling oil pumps.

Not deep sea diving suits, or skin diving sets, or even an oil pump for motor boats—but an oil pump for our automobile.

To say that we felt let down is to
understate the case by several fathoms. Not a bit of quick mental arithmetic seemed in order. Boat, gear, diver—men—all had to be rented and hired; throw in an expensive time slot, plus the time wasted trying to attract the viewer—how high was it all costing per second of commercial?

Lots more than it should.

Nor is this high cost of attention an isolated case in television commercials. There are the prancing cigarettes. There are also the fancy-dancy boys and girls, pirouetting and arabesquing over, around and under television consoles with a precious irrelevance strictly for balletomaniacs.

All of which brings us to what this little piece is about—attention, gentlemen. Are television advertisers paying too much attention to “attention”?

Back in the days when we were busy avidly sopping up the A-B-C’s of good salesman lore, learning the ground rules of advertising technique, the notion was commonly held that attracting attention is a scientific process which, assiduously adhered to, would almost certainly lead to the much-desired, ultimate objective—the sale.

Attention, we were quaintly told, was a means to an end. It should be caught instantly. After that, there was more work to be done, with a big spade, before the sales transaction could be consummated, or desire for your particular brand excited in an advertising

It was all that simple. Step 1, 2, 3, 4. Play the game according to the rules and you couldn’t lose.

How archaic was that notion.

Today, somewhat older and possibly wiser, we wonder and wince as we watch advertisers’ messages. Attention is no longer a means, it is in danger of becoming the end. Tele-

vision producers are paying more attention to the act of attracting attention than to the business of furthering the “purchase sequence” which, they would appear to be saying, is only a lot of antiquated nonsense anyway.

If the creators and producers of commercials are lavishing so many precious seconds out of every commercial (and make no mistake—tv time is valuable) on the technique of getting the viewer’s attention, how much time is left over for the important steps. Such as:

count us among the first to declare for more creativity in commercials. But equally vital is the need for a better sense of proportion in creating. What price ingenuity if it be ingenuity wasted on self-love. For that is what the current obsession with the attention process happens to be.

COSTLY INFATUATION

This is ingenuity which doesn’t know where or when to stop. Like a beady, prolonged infatuation with a glamorous mistress, it can be a costly affair.

True, an analysis doesn’t occur to most sponsors, but a breakdown of his tv commercials would likely reveal that he is paying an exorbitantly high price solely to get attention value.

Which is to say he is paying for motivation, and getting an “opening gimmick” instead.

Let us ask another question at this point. Would a manufacturer or his sales manager, unless he is crazy in the head, long tolerate a salesman, genius though he might be at opening doors, but who did not know how to “close”?

Or take tv’s kissing cousin, print advertising.

What knowing creative director or account executive—or what sane client—would okay an ad which spent 80% of its effort (which is not necessarily the same as 80% of its space) to arrest attention with an irrelevant picture de-

vice, or expensive hand-lettering—all at the expense of motivation?

Measured in terms of potential return per ad dollar spent, this is indeed a prohibitively high cost of selling.

Print ads don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t don’t do
**Spotted Fever**

In the current to-do about triple-spotting, broadcasters have been pushed into an unbecoming position—they're damned if they do and at least damned if they don't.

Let us say right here that we have no intention of defending over-commercialism. We're against any practice that dilutes the impact of legitimate commercials or deprives a network advertiser of broadcast time that he's entitled to, as triple-spotting surely must do if the commercials are of more than fleeting duration.

But it's a problem that has to be considered in perspective and this, we contend, the Assn. of National Advertisers did not do when it let loose its blast a week ago (LEAD STORY, May 26). The ANA report arrogated to advertisers all the rights and assigned to broadcasters all the responsibility—an apportionment which marketing experts among the ANA membership ordinarily would refer to as uneven distribution.

Advertisers and their agencies have a responsibility as well as a right. Broadcasters have a responsibility, but they also have a right—the right to expect advertisers and agencies to cooperate in correcting whatever abuses exist. Too often it doesn't work that way.

Even once would be too often, but more than one broadcaster can testify to advertiser and agency pressures to get commercials scheduled within periods that were already filled. So why don't the stations refuse? It's a simple question, but it gets immeasurably complicated when the stations are threatened with the loss of other schedules unless they also accommodate this new one, as has been known to happen.

This is an area where the responsibility lies first with the advertiser and the agency. The extreme pressure of threatening to cancel running schedules is unusual and untypical, but it has happened and when it does it is no less an abuse than triple-spotting itself. Certainly, agencies and advertisers who insist on getting into sold-out periods no matter what—and who on occasion may even wave a threat or two—have no right to complain about the evil of over-commercialization.

Broadcasters also are being handed another millstone which they should not have to carry alone. The American Medical Assn. wants to clean up "offensive and misleading advertising" (ADVERTISERS & AGENCIES, May 26), a commendable desire except that the good doctors seem to want media to do most of the broom-swinging. They invited advertisers and agencies as well as media to their meeting, but privately they're said to discount the theory that the advertising should be cleaned up before it gets to media.

Like triple-spotting and other forms of over-commercialization, this is a problem for all hands to work on. Broadcasters should not be expected to do it alone. Advertisers and agencies who do not work with them are automatically working against them.

**Reallocation: Major Convulsion**

Licensee blood pressures boil whenever the prospect of a television reallocation is mentioned. Blood pressures have boiled innumerable times since the FCC's "final" allocation of 1952.

It's happening again and is destined to happen several times between now and the adjournment of Congress in about mid-August. But it is no longer mere conversation; the FCC is approaching the end of the line.

The locale last week was the Senate Commerce Committee, scene of most previous eruptions. The FCC made another appearance. Commissioners seem to agree only that deintermixture is not the major solution. They are likewise agreed that the existing vhf channels cannot accommodate a nationwide competitive system.

Almost forgotten has been the Ad Hoc Committee of engineers named by the Senate Committee in 1955 to evaluate the vhf-uhf allocations. The chairman is Edward L. Bowles, consulting engineer of Boston and MIT. The committee report, which has been kept under wraps, is not unanimous. But it will be explosive. From what we are able to glean, it goes far beyond technical planning and into the whole economic structure of tv on the notion that everything that has been done is wrong. It isn't the approach that is likely to win support either from the FCC or broadcasters.

Understandably, members of the FCC have turned to their learned engineering colleague, Comr. T. A. M. Craven, for guidance on the allocations enigma. Comr. Craven in his previous tenure on the FCC, both as an engineering executive and a commissioner (1928-1944), had been a key figure in evolving broadcast allocations. As a former naval communications officer he has knowledge of military-government requirements. He is the FCC's liaison with the Office of Defense Mobilization and the military.

Purely as a basis for discussion, Comr. Craven has prepared a memorandum designed to stimulate FCC thinking. It recognizes that the solution must be long-range, to permit amortization of the multi-billion dollar investment of the public, government and industry in the existing television complex. His thinking is in three phases (1) to provide for three comparable services in major markets; (2) to improve competition in the first 150 markets; (3) long-range though radical changes in allocations.

It is phase 3 that will stimulate discussion—and violent repercussions. It would delete channels 2-6, leave channels 7 to 13 as is, and add 18 channels beginning at 216 mc. This would provide a contiguous band of 25 6-mc. channels. The some 270 assignments now on chs. 2-6 would move into the new bands.

Such a project, in Comr. Craven's view, would entail a 7-10 year transition. There would be no differentiation between uhf and vhf. (The proposed new band would begin at 174 mc and run to 324 mc. The present uhf allocations begin at 470 mc and run to 890 mc.) Existing services in the new band would move to the 470 mc space. A contiguous band would make possible the design and manufacture of an efficient "all-channel" receiver, more reasonably priced than existing models which must by-pass the jumps between channels 2 through 6 and 7 through 13 and thence into uhf through ch. 83.

Comr. Craven has emphasized to the FCC that his memorandum dose not constitute a plan, but simply a starting point for discussion. But plan or memorandum, it is controversial in the extreme.

What are the alternatives? Some one may come up with a better plan. Some genius may devise a scheme to split channels so that the present 12 could become 24.

But will Congress wait? Can television progress in a climate of scarcity? Are the alternatives more rigid controls, or sharply reduced separations that will downgrade service?

These are questions to be pondered by the FCC and by the licensees. Whatever solution is decided upon, it will be a major convulsion. If the Craven "memorandum" does no more than stimulate constructive thought, it will have made a major break-through in the television allocations impasse.
