THE HUMAN FACE IS THE MOST INTERESTING THING ON TELEVISION

Where do we get that idea? Well, look what's been happening with magazines.

Name the biggest, most popular ones... Life, Look, Readers Digest, SatEvePost, Time, Newsweek, and the Sunday Supplements.

More and more, their pages portray people... living people, dying people, laughing, crying, toiling people... but nevertheless, actual people facing actual situations.

Don't get us wrong. We don't mean that fiction is dead, by a long shot.

But we do know that realistic entertainment (for want of a better name) is gaining an ever-growing audience... and KCOP intends to provide that kind of entertainment.

To wit: Programs like Air Power... Bill Burndy's Wanderlust and Treasure... Colonel John D Craig's Danger is My Business... Walter Winchell's File... Jack Douglas' Seven League Boot and I Search for Adventure... the Linker family's Wonders of the World... The People's Court of Small Claims... live personality shows starring George Jessel and his illustrious guests... and the best newsmen in Southern California, Baxter Ward, whose coverage stresses the local angle.

These are believable programs, sparked by life itself. We think they provide a proper setting for believable commercials.

This must be right: Our ratings and business are better than ever.
Coverage that Counts!

**multi-city buying is in fashion, too**

Shoes with squared-off points are the latest vogue, but buying WGAL-TV’s low-cost, multi-city coverage is an established custom. This pioneer station is first with viewers in Lancaster, Harrisburg, York, and numerous other cities including: Reading, Gettysburg, Hanover, Lebanon, Chambersburg, Lewistown, Carlisle, Shamokin, Waynesboro.

Carlisle • Pottsville • Shamokin • Lewistburg • Hazleton • Mt. Carmel • Bloomsburg • Hagerstown • Frederick • Westminster
Outlook for 1959 • Forecasts for 1959 tv business range from skittish to optimistic, depending upon who's talking. Networks express caution, noting tv was last of media to feel recession and may be last to recover. Additionally, tv is fighting what NBC and CBS regard as organized campaign of print media to undermine advertiser confidence. ABC doesn't go that far but isn't unmindful of brisk competition from within and without. Spotwise, tv outlook is reverse. Leading representatives are convinced tv spot in first quarter will be 12-20% up, with outlook for entire year rather bright. Individual reps report 1958 spot up from 10-30%.

Hint for packagers • Some big advertisers are wondering whether program packagers really appreciate all that's been going on in television. Starting last fall, they point out, many network sponsors got 26-week contracts, meaning they can be dropped in March or April. "This," said one, "means that actually the next 'new season' will start in March or April, not next fall—but the talent people are still building new shows for fall, as in the past." He ventured that anybody with likely new property available now would have scant trouble finding buyer.

Missionary mission • Disturbed because of Dept. of Justice Antitrust Div. view that option time may constitute per se violation of law, broadcasters representing affiliates of all three tv networks have date with Attorney General William P. Rogers Tues., Jan. 13. Group includes C. Wrede Petersmeyer, Corinthian Stations; Lawrence H. Rogers, WSAAZ-TV Huntington-Charleston; Jack Harris, KPRC-TV, chairman of NBC-TV Affiliates Board of Delegates; John S. Hayes, Washington Post stations, representing CBS TV Affiliates Assn., and Alex Keese, WFAA-TV Dallas, chairman of ABC group. Position of affiliate groups at Barrow report hearings last year uniformly were that option time is vital to maintenance of network structures.

Under the influence • FCC Commr. Robert E. Lee was recipient of biggest surprise of the Yuletide. After he had jocularly complained to friends that because of House Oversight Subcommittee disclosures he hadn't received one bottle for Christmas, an emissary delivered to his office one handsome decanter of ancient vintage. Card read: "Oren E. Harris" (chairman, House Interstate & Foreign Commerce Committee and of its Oversight Subcommittee).

Murrow on ratings • Sen. A. S. Mike Monroney (D-Okla.) personally has been lining up big names for his rating "debunking" inquiry, to get underway in New York soon. Understood to be on call as one star witness is Edward R. Murrow, CBS commentator who, on occasions, has criticized broadcast media for lack of serious adult programming. Sen. Monroney also had planned to have Sylvester L. (Pat) Weaver, former NBC board chairman, but latter's affiliation as consultant to McCann-Erickson may change that.

Spectrum management report • Special five-man Advisory Committee on Telecommunications, named by White House to make quickie exploration of frequency allocation and management, met its year-end deadline. Report was submitted to OCDM Administrator Leo A. Hoehg last Tuesday, Dec. 30, and presumably will be released at pleasure of President Eisenhower.

While report is still secret, it's learned committee recommended further study of spectrum use and concluded present system, whereby Interdepartment Radio Advisory Committee allocates for military and other government agencies, is outmoded and inadequate. Committee did not appraise broadcast allocations (radio, tv, etc.) leaving that for authority which presumably will emerge from either full-scale presidential study or through joint congressional committee on spectrum utilization and allocations.

Sales in progress • WORL, Boston independent, will move to ownership of Paul F. Harron, ex-Philadelphia broadcaster and businessman, for $400,000 under contract negotiated with Joseph A. Dunn, present and principal stockholder of Pilgrim Broadcasting Co., subject to usual FCC approval. Station operates on 950 kc, with 5 kw day. Mr. Harron last Tuesday received FCC approval of purchase of ch. 2 WKTV (TV) and WKAL Utica-Rome, N. Y., for $4 million, plus consultancy commitment. Associated with him as minority stockholder, among others, is Gordan Gray, former v. p.-general manager WOR-AM-TV New York (see page 50).

Dr. Frank Stanton, CBS president, is in process of selling his Muzak franchises in Midwest to two broadcasters not now operating in those markets. He has held Muzak rights in Louisville, Cincinnati, Dayton and Columbus for some 15 years. He was originally in partnership with J. Leonard Reinsch, executive director of Cox radio and tv stations, who sold out to him decade ago.

Gumshoes at FCC • Oversight Subcommittee investigator Joseph P. O'Hara Jr. has returned to Civil Service Commission, whence he came, but not before submitting strong recommendation that FCC receive appropriation to establish its own full-time investigative staff. Commission currently has none and Mr. O'Hara feels it is severely handicapped in having to depend on litigants for information. While with subcommittee, he spent much time on FCC matters.

Broadcast account • Gillette Co. may diversify into men's toiletries. Already engaged in cosmetics for women (via its acquisition of Toni Co. several years ago), Gillette recently appointed Dowd, Redfield & Johnstone, N.Y., and Boston affiliate John C. Dowd Co. for six unidentified "new products." Agency head J. C. Dowd admits "television to be a major factor" in new product testing, and DR&J has had basic cosmetics-toiletries experience with Revlon Inc. and Lanvin Parfums. Mr. Dowd—declining to "speak for Gillette"—notes agency could "shortly" announce two new account appointments, both in cosmetics field.

A lot in a lot • There's more to Universal City sale by Universal Pictures Co. to MCA Ltd. (BROADCASTING, Dec. 22) than just question of giving U-I $11,250,000 working capital. Learned last week: As long as U-I had to maintain its own 370-acre lot, yearly cost came to about $4 million; now it will pay MCA landlord $1 million under terms of leaseback of studio space and property. Thus it will save not only $3 million annually, but also may write off rental as legitimate tax deductible business expenses.

Men in white • Annoying quirk has developed in effort of NAB to solve "white coat" problem in tv medical commercials. Though actors are no longer permitted by Tve Code to portray physicians or dentists, there's no code rule against commercials that feature physicians or dentists in testimonials on behalf of pharmaceutical items. As result, drug advertisers are finding licensed doctors and dentists who are happy to don white coats to promote medicines.
REACH FIRST DETROIT

with WJBK-TV's MORNING SHOW MOVIE!

Children off to school... husband off to work... a cup of coffee and now a Good Movie! The "Morning Show" is the first feature film of the day in Detroit, Monday through Friday at 9:00 AM. Every show is a top-flight feature from UNITED ARTISTS, SCREEN GEMS, NTA, RKO, and coming soon, PARAMOUNT.

Strategic programming to 1,900,000 Television homes is one reason why WJBK-TV has a consistent #1 rating in the nation's fifth market—9 billion dollars worth of purchasing power! With this leadership and being Michigan's first station with full color and Video-Tape facilities, WJBK-TV tops them all in dominating Detroit and southeastern Michigan. WEEK IN BRIEF

**Essential to shows: showmanship** • It’s so obvious, but agencies often overlook it when shopping for the tv program to suit the sponsor. William B. Templeton talks it over in **Monday Memo**. Page 29.

**Oversights aim at FCC** • Chairman Harris and House subcommittee want (1) to keep probe going; (2) to ban station buying-selling contracts until FCC has approved; (3) to halt payoffs to competing tv applicants except for out-of-pocket expenses; (4) to require public hearings before each tv grant; (5) to halt honorariums to FCC commissioners, and etc., etc. Page 31.

**Massey-Ferguson’s electronics** • Farm equipment manufacturer earmarks $2 million in radio-tv, with more than two-thirds allocated for network tv. It’s a first tv show for Massey-Ferguson, or for any farm equipment firm. To get to the farmer, M-F produces special sets of commercials. Page 37.

**Young & Rubicam’s overhaul** • Timebuying taken out of media department and consolidated with radio-tv programming function. Levathes to head new department. Page 39.

**Goines’ pedigree ID** • Benton & Bowles organizes “Canine Supreme Court,” works seven hours to place 93 dogs in line for key scene in new ID to be seen on tv later this week. Page 40.

**Radio station of the future** • Blueprint for what may be audiences’ “dream station” is seen in findings of depth study conducted for KPXC Houston by Institute for Motivational Research. Results indicate people want network affiliates’ reliability and sources combined with independents’ warmer approach. Page 42.

**PCP gets underway** • CBS Radio’s new Program Consolidation Plan starts today (Jan. 5) with acceptance by affiliates representing more than 85% of rate card and with new and expanded advertising business totaling $4.4 million net. Some stations get cancellation notices. Page 46.

**Strike post-mortem** • TVB and RAB challenges statistics issued by newspaper publishers following settlement of New York’s 19-day long newspaper deliverers strike; dispute newspaper-claimed ad losses of $17 million as “exaggerated,” hint at harder-hitting broadcast industry promotion. Page 47.

**Shooting season opens** • The 86th Congress convenes in Washington Wednesday, with FCC and broadcasters watching anxiously as all indications point to a record number of radio-tv hearings and investigations. Page 52.

**More firing at FCC** • House Antitrust Subcommittee staff report makes strong recommendation for executive code of ethics, takes swipe at Commission for not adopting code without “legislative prodding.” Page 60.

**Tv films ‘58 and ‘59** • The tv film business was good in 1958 and should be better in 1959. Things to come: Mergers of syndicators, more taped shows by film producers and stiffer competition. Page 66.

**RCA’s good ‘58** • Board Chairman David Sarnoff reports fourth-quarter upsurge brings 1958 annual volume up to 1957 record volume of $1.176 billion and points to 1959 as “a good year for business.” Page 73.

Though “K” gets a Kick
From assuming this pose, He feels it’s modest
To wear so few clothes!

Of course, it’s false modesty. Nothing can really cover up KHJ Radio’s Foreground Sound. It’s been winning agency and client friends for more than 36 years. And the New Year promises to be no exception.

1959 is still a babe in arms, but KHJ Radio, Los Angeles, is an old hand at building cumulative audience through programs beamed at the wide variety of mature, adult tastes that make up America’s 2nd market.

KHJ’s listener loyalty to both programs and advertisers proves that auld acquaintance is not forgot. (And neither is the loyalty of our auld advertisers at renewal time.)

The naked truth is that KHJ’s Foreground Sound is programmed to satisfy the variety of tastes that make up the Greater Los Angeles area.
Family Radio
Is
Scholarship, Showmanship, Salesmanship.

Bartell scholarship provides the research by which the dominant family audience is attained in each Bartell market.

Bartell showmanship develops a glittering progression of music, family fun, community service.

Bartell salesmanship produces positive results for advertisers.

Bartell it... and sell it!
Soviet rocket on vhf

Russian moon-rocket signals picked up late Friday were discovered to have been broadcast in middle of two U.S. vhf television channels: 70.2 mc, channel 4 (66-72 mc) and 183.6 mc, channel 8 (180-186 mc). Signals reported received by RCA's Riverhead, L.I., station and Army Signal Corps, Fort Monmouth, N.J. Russians announced broadcasting frequencies as 19.993, 19.995, 19.997 mc (international fixed public and aeronautical band) and 183.6 mc. They did not mention 70.2 mc broadcasts.

Top-level duties revamped by D-F-S

"Broadening of executive responsibilities" at Dancer - Fitzgerald - Sample, N.Y., announced today (Jan. 5) by Clifford L. Fitzgerald, president. Move, in making for several years, comes into effect "partly" due to recent death of D-F-S board chairman, H. M. Dancer.

Agency operation will be vested in executive committee, lessening burden on President Fitzgerald. Committee members: Lynden O. Brown, chairman of committee; Chester T. Birch, Sidney J. Hamilton, Gordon H. Johnson, Fred T. Leighty, George G. Tormey—all vice presidents—and Mr. Fitzgerald. At same time, Messrs. Brown, Hamilton, Johnson and Tormey were elevated to senior vice presidencies, as was Chicago office head, F. Sewall Gardner. Mr. Birch becomes executive vice president and Mr. Leighty, vice president-secretary-general manager, becomes administrative vice president. All are 16-year veterans of agency and are stockholders.

Mr. Dancer's stock will be retired by corporation, leaving control of D-F-S (billing over $80 million, $49 million in radio-tv) with 26 stockholders. Agency officials said, "It's been the policy to hold stock to a relatively small group of chief executives."

Need for option time seen in FCC report

Report on option time got second going-over in one week Friday (Jan. 2) when FCC spent whole day on touchy and controversial subject—and agreed to meet on final draft Friday (Jan. 9).

By bare majority of one vote, Commission tentatively found option time reasonably necessary for tv networking and that tv networks are essential (Closed Circuit, Dec. 15, 1958). Because of editorial changes, final draft will not be ready for formal action before end of this working week. FCC met on same subject Wednesday.

At tail end of meeting, commissioners discussed whether report should be released to public and parties concerned, or whether memorandum should be submitted solely to Justice Dept. No decision was made.

Report is Commission's proposed findings on option time—network practice which was under heavy fire in Barrow Report. Barrow Report recommended that option time be prohibited and Justice Dept. at informal meeting with FCC maintained practice is anti-trust violation per se.

Commission majority, it is understood, intends to maintain necessity for option time, but leans toward requiring stations to hold out half-hour in prime night hours for use of local or independent program usage.

First draft by Office of Network Study caused stormy reaction on part of some commissioners (Broadcasting, Dec. 1, 1958).

Kluge group acquires Metropolitan shares

Purchase of Paramount Pictures' 21.75% interest in Metropolitan Broadcasting Co. by multiple broadcaster John W. Kluge and associates for $4 million scheduled to be consummated today (Jan. 5).

Transaction, handled through Washington brokerage firm of Jones, Kreeger & Co. (which already owns 23.77% of Metropolitan), involves transfer of Paramount's 335,200 shares of common stock (Broadcasting, Dec. 1, 1958). Price per share is little less than $12.

Mr. Kluge, major Washington food broker, will hold about 221,210 shares under voting trust. This represents $2.64 million in purchase price. Others in trust agreement are Theodora T. Kluge, Mr. Kluge's wife; Harris H. Thomson, David Finkelstein, Marcus J. Austed (Mark Evans, Washington radio-tv personality), and Ira H. and Bernice K. Kaplan. Others in group making purchase, owning shares individually, are: Jones, Kreeger & Co., 10,000 shares; Lind & Co., 36,000; William B. and Audrey K. Mullett, 2,500; George A. Chadwick Jr., 2,500; Virginia Priepstein, 4,000; Henry Priepstein and David Finkelstein, jointly, 4,000; Charles E. and Larry Friedman, 10,000; Robert K. Thompson, 24,000; Leona Sanford, 7,000; Alma and Philip Lustine, 5,000; I. Willard Marriott (Hot Shoppes Inc.), 4,190; Ray C. and Mary P. Briggs, 7,500; Frank Topham, 300.

Metropolitan, whose 1,541,137 shares of common outstanding are owned by more than 6,500 stockholders, was selling Jan. 2 for 15% over-the-counter.

Mr. Kluge owns or controls WGAY-AM-FM Silver Spring, Md. (which is selling to Connie B. Gay [Broadcasting, Nov. 10, 1958]); KNOK, Fort Worth, Tex.; WEEP Pittsburgh; WKDA Nashville, Tenn.; WINE-AM-FM Buffalo; WLOF-TV Orlando, Fla., and WSR-S-AM-FM Cleveland, Ohio (which is being sold to United Broadcasting Co.-Richard Eaton).

Metropolitan owns WNEW-AM-FM TV New York, WTTG (TV) Washington and WHK Cleveland. Bernard Goodwin is president but Richard D. Buck- ley, vice president and 11.5% stockholder. Other major stockholder is Carl M. Leob, Rhoades & Co., 3.57%.

Radio music pacts extended by ASCAP

All four nationwide radio networks and their owned-and-operated stations signed for extensions of their old ASCAP music license agreement effective Jan. 1, ASCAP announced Friday (Jan. 2). ASCAP spokesmen said extensions were for one year. Old contracts expired Dec. 31, 1958. ASCAP announcement also claimed "approximately 50% of the local radio stations throughout the country have either signed or executed" agreements extending beyond Jan. 1. These were said to be for varying terms; it is known that some stations will continue options carrying their contracts deep into 1963. It has been estimated that approximately 1,000 stations had contracts which did not expire Dec. 31.

Signing of ABC, CBS, NBC and Mutual and other stations to extended radio contracts does not affect decision of many broadcasters, including those on All-Industry Radio Music License Committee, to ask court to set "reasonable" local rates. This course was recommended by all-industry committee when ASCAP said only way stations would get reduced rates—which committee insists are justified—would be to go to court under procedure set up in ASCAP consent decree (Broadcasting, Dec. 8, 15, 1958). That decree also provided stations
AT DEADLINE
CONTINUED

could continue using ASCAP music if they applied for licenses before old contracts ran out. It was estimated Fri-
day about 600 of those with licenses expiring Dec. 31 had so applied. If they and ASCAP fail to agree on rates
within 60 days after application, sta-
tions may ask court to hold rate-making
proceeding.

New Orleans interim operation stalled
Agreement for temporary operation of New Orleans ch. 13 stalled Friday when one of three parties refused to go
along on composition of interim cor-
poration's board. Three parties—all applicants for New Orleans' ch. 12—two weeks ago agreed to joint operation of ch. 13
borrowed from Biloxi, Miss. (Broad-
casting, Dec. 29, 1958). Three are
WJMR-TV, Coastal TV Co. and Okla-
ahoma TV Corp. (KWT[V] Oklahoma City). But Oklahoma demurred when proposed board was to include two
members representing WJMR-TV, one
each for Coastal and Oklahoma, with
fifth to be chosen by other four.

On Friday, WJMR-TV and Coastal
asked FCC for permission to continue
WJMR-TV on air on ch. 13, with FCC-
implemented deadline for joint agreement moved from Dec. 29 to Jan. 15. Late Friday FCC denied petition. Oklahoma
objected to request, presented recom-
endation that each applicant appoint
one board member, with other two ap-
pointed by court or arbitration.

FCC ordered WJMR-TV to close
down experimental operation of ch.
12 New Orleans Jan. 1 after hearing on below-level mileage separation with ch. 12 WJTV (TV) Jackson, Miss., as
ordered by appeals court. WJMR-TV,
holding permanent grant for ch. 20, was
operating dually on both vhf and uhf frequencies. It is ABC affiliate. Silencing of ch. 12 operation brought
immediate protest by New Orleans
Mayor DeLesseps Morrison. Mayor
Morrison wired FCC Chairman John
C. Doerfer and requested immediate
opportunity to appear before Commis-
sion. Mayor also wired Oklahoma prin-
cipals urging them to fall in line with
other two applicants.

Commission plan was for temporary
use of ch. 13 in New Orleans until
final disposition of ch. 12 New Orleans comparative hearing, or until ch. 13
grantee in Biloxi is ready to operate.
Radio Associates Inc. holds Biloxi ch.
13 grant, but is undergoing rehearing
on financial qualifications following re-
mand by appeals court. WLOX Biloxi
is other ch. 13 contestant.

Johnston named
Wallace E. Johnston, chief of FCC's
aural new and changed facilities branch
of Broadcast Bureau, named to head
bureau's Broadcast Facilities Division,
succeeding Walther W. Guenther, ap-
pointed assistant chief of Office of
Opinions & Review. John J. McCue
succeeds George K. Collins (deceased)
as chief of Public Safety & Amateur
Division of Safety & Special Radio
Services Bureau.

WEEK'S HEADLINERS

Peter G. Levathes, v.p. of media, and Robert P. Mountain, v.p. of radio-
television, appointed to new posts at Young & Rubicam; Mr. Levathes to v.p. in
charge of newly-expanded radio- tv department and Mr. Mountain to v.p. in
charge of new business de-
partment. Mr. Levathes for time being continues as director of media. Mr. Levathes joined Y&R in 1953 as v.p. in media,
became media director also in 1954. Before he joined agency, he was executive assistant to president of 20th Century Fox
from 1938-1947, and for next three years was in charge of 20th's tv activities. Mr. Mountain has headed radio-tv at Y&R
since 1955. He joined agency in 1938 as manager of outdoor advertising, later moved to contact department and elected in 1947 as v.p. and supervised General Foods ac-
count. These appointments, announced by Y&R President George H. Gribbin, figured in change in concept of broad-
cast programming and timebuying functions (see page 39).

S. B. Tremble, commercial manager of KCMO-TV
Kansas City, and Richard W. Evans, commercial
manager of KCMO-AM-
FM, promoted to station managers of their respective
stations. Mr. Tremble
joined KCMO in 1946 as
program director and went
to similar post with KCMO-TV in 1953 when station went
on air. He was previously with KSAL Salina, Kan., from
1937 to 1941. Mr. Evans came to KCMO in 1941 as mem-
ber of continuity department, in 1946 was named sales repre-
sentative. He was appointed commercial manager for both
radio stations in 1953. Both appointments were announced
by General Manager E. K. Hartenbower. KCMO-AM-FM-
TV are affiliated with Meredith Publishing Co., Des Moines.

Mrs. Frances Corey, board member of R. H. Macy's, New York, and senior v.p.
in charge of sales promotion, advertising and public relations, appointed to newly-
created post of v.p. in charge of west coast operations for Grey Adv., effective Feb.
15. Mrs. Corey's appointment to head
operations for both Los Angeles and San Francisco offices of Grey was said to be
prompted by "growing importance" of
west coast in country's economy and increasing significance of
marketing in advertising today. Heretofore, Grey Adv.
west coast operations were under direction of Robert D.
Wolfe, v.p. in charge of radio-tv for agency in Los Angeles,
who will continue in post, reporting to Alfred D. Hollender, v.p. and television
director of Grey in New York. Mrs.
Corey, who will continue her association with Macy's as
consultant on special projects, leaves that company after four
years service. Previously, she was sales promotion manager
for May Co., L. A., for more than 11 years, and with Bonwit Teller and Bloomingdale's in New York.

Alvin G. Flanagan, general manager of KCOP (TV)
Los Angeles, has been elected to post of v.p. and general man-
ager in charge of all operations for KCOP Television Inc.,
effective today (Jan. 5). In announcing promotion, Kenyon
Brown, president of KCOP Television, said that Mr. Flana-
gan will also become stockholder in corporation.

LETTER from the Editor and Publisher

If you're one of our regular readers, you've already noticed that this issue is trimmed to a smaller page size than its predecessors.

It's a change that you have forced us to make. As more and more of you buy the magazine, the press run gets longer and longer. We are now running 23,000 copies per week. We expect to be running 25,000 soon. We must now convert to faster presses which won't accommodate pages as big as those we have used for the past 27 years.

We can't imagine any change we'd rather be forced to make. Every new subscription is reassurance that we are publishing the kind of magazine that people in television and radio want to read—a magazine tuned to the swift and changing currents of news in the most dynamic of all media.

With new press capacity we can continue to deliver more news while it still is news and articles that haven't been warmed over after their essentials have appeared somewhere else. In short, we'll be doing the same job we've always done—but better.

Changing page size also gives us a chance to make some other improvements, all intended to make Broadcasting easier and faster to read. Several old departments have been discontinued and their contents consolidated into fewer, but more meaningful, new departments.

For example, you won't find a department named ADVERTISERS & AGENCIES in the new book, but you will find BROADCAST ADVERTISING. In the new department will appear all the kinds of stories that used to run in ADVERTISERS & AGENCIES plus other kinds that formerly ran in other discontinued departments like TRADE ASSOCIATIONS. All the stories that have to do with the use and users of television and radio as advertising vehicles will appear in BROADCAST ADVERTISING.

There have been other departmental consolidations. The index on page 7 gives the new names and locations.

In working within this new format it will be our purpose to provide a comprehensive weekly report of all the developments of significance in tv and radio, yet to distill the news to essentials in the knowledge that our readers lead uncommonly busy lives.

Sincerely,

BROADCASTING, January 5, 1959

DATEBOOK

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

JANUARY

Jan. 6—Special meeting of interested taxpayers called by Federal Excise Tax Council to plan joint effort to obtain Congressional hearing of new Internal Revenue Service ruling on co-op advertising. Washington.

Jan. 7—A new Congress, the 86th, convenes in Washington. All legislation introduced in the 85th Congress is dead but much will be reintroduced and some committees will submit reports based on past hearings. A new rash of investigations may develop.

Jan. 16-17—Mutual Advertising Agency Network, quarterly business meeting and administrative workshop, Plaza Hotel, New York.

Jan. 17—Oklahoma Broadcasters Assn., winter meeting, Hotel Will Rogers, Claremore. Rep. Ed Edmondson (R-Okl.) will be principal speaker; his talk will be fed over a 40-station state radio hookup. KWPW Claremore is host station.

Jan. 17-18—Seventh annual meeting of Retail Advertising Council, Palmer House, Chicago.

Jan. 18-21—Newspaper Advertising Executives Assn., annual convention, Edgewater Beach Hotel, Chicago.

Jan. 20—Screen Producers Guild awards dinner, Beverly Hilton Hotel, Los Angeles.

Jan. 23-25—Mid-winter conference of Advertising Assn. of the West, Rickey’s Studio Inn, San Jose, Calif.

Jan. 23-25—American Women in Radio & Television (Great Lakes area) will meet in Detroit.

Jan. 27-29—South Carolina Radio & Television Broadcasters Assn., winter convention, Hotel Wade Hampton, Columbia. Members of General Assembly will be entertained at Jan. 28 banquet.

FEBRUARY

Feb. 1-6—Winter meeting of American Institute of Electrical Engineers, Statler Hilton Hotel, New York. Includes four sessions devoted to radio and tv experiments and operations. NBC and CBS video tape installations will be described.

Feb. 2-6—Combined NAB boards will meet at Hollywood Beach Hotel, Hollywood, Fla. Semi-annual session opens Feb. 2 with TV Finance Committee; Feb. 3, General Fund and Membership Committees; Feb. 4, TV Board; Feb. 5, Radio Board; Feb. 6, combined TV and Radio Boards.

Feb. 5-8—Hi-Fi Show, Shoreham Hotel, Washington. The newest in stereo and reproducing gear will be on display.

Feb. 8-14—National Advertising Week, sponsored by Advertising Federation of America and Advertising Assn. of the West.

MARCH

March 15-18—NAB’s annual convention at the Conrad Hilton Hotel, Chicago. Exhibits open; non-agenda meetings scheduled March 15. Formal sessions open at noon March 16 with keynote speech by Robert W. Sarnoff and continue through March 18. Tentatively scheduled are FCC Chairman John C. Doerfer and FCC—industry roundtable. Only NAB associate members supplying broadcast equipment to exhibitors are eligible to exhibit at NAB. Engineering Conference, with several joint management-technical sessions, will be held concurrently with convention in the same hotel.

APRIL

April 6-9—National Premium Buyers, 25th annual exposition, Navy Pier, Chicago. Premium Advertising Assn. of America will meet April 7, same site.

April 12-14—Assn. of National Advertisers, annual convention, Santa Barbara Biltmore, Santa Barbara, Calif.

April 23-25—Western States Advertising Agencies Assn., annual convention, Oasis Hotel, Palm Springs, Calif.

April 30-May 3—Women in Radio & Television, annual national convention, Waldorf-Astoria Hotel, New York.

May 30-May 4—3rd district, Advertising Federation of America, Tides Hotel & Bath Club, St. Petersburg, Fla.

MAY

May 1—National Radio Month opens.

May 4-6—Assn. of Canadian Advertisers, annual conference, Royal York Hotel, Toronto, Ont.

May 4-8—Society of Motion Picture & TV Engineers, semi-annual convention, Fontainebleau Hotel, Miami Beach, Fla.

May 20-22—Assn. of National Advertisers, spring meeting, Edgewater Beach Hotel, Chicago.

May 21-23—Electronic Industries Assn., annual convention, Sheraton Hotel, Chicago.

JUNE

June 7-10—Advertising Federation of America, annual convention, Hotel Leamington, Minneapolis.

June 14-17—National Industrial Advertisers Assn., national convention, Fairmount and Mark Hopkins Hotels, San Francisco.

June 28-July 2—Advertising Assn. of the West, annual convention, Tahoe Tavern, Tahoe City, Calif.
In the 20 counties which make up the Greater Washington Area, more people listen to WTOP than any other radio station.* Clear proof that in Washington the IMPORTANT one is...

Any book readers?

EDITOR:

The weekly Sindlinger reports on "How People Spend Their Time" is extremely interesting, but please, doesn't anybody read a book?

If they don't, then in my case alone, many thousands of people have laid out $3.95 for a table decoration.

J. Harvey Howells
7342 Cameo St.
New Orleans 24, La.

[EDITOR'S NOTE: Mr. Howells' address during business hours is Fitzgerald Adv., New Orleans. He is author of a novel, "The Big Company Look," which one can buy from Doubleday & Co. for $3.95. Sindlinger does include book reading in its complete report which one can buy from that firm in Ridley Park, Pa. BROADCASTING'S exclusive extract covers only media activities, omits books.]

Impact 'impressive'

EDITOR:

If ever we had reason to doubt the quality of readership of BROADCASTING, our recent mail has removed such doubts.

Since your Dec. 8 issue in which you carried the article "Men plus Machines equals Research," we have received inquiries from broadcasters and agencies throughout the country. Many were from the research directors of the top stations in the country.

We are truly impressed and we have a healthy respect for the quality of your readership.

Gans' views on fm a hit

EDITOR:

The MONDAY MEMO written by Joe Gans pertaining to fm [Dec. 15] is in my opinion one of the most helpful items concerning this medium yet to be penned. Mr. Gans to my knowledge is the first national timebuyer to openly admit that he has used fm for his clients and has been successful.

In recent months we have all read numerous articles on fm's growth and projected bright future. This medium can live up to these promises of a bright future only if more timebuyers follow Joe Gans' example and throw away the rating surveys and test-buy fm stations around the country. There is no reason to believe that if Mr. Gans has been successful buying fm other timebuyers would not meet with equal results.

Karl S. Kritz
WPFM (FM) Providence, R.I.

EDITOR:

We are very much interested in the MONDAY MEMO by Joe Gans . . . Will you be kind enough to forward us 100 copies of this article . . .

Raymond S. Green
Executive Vice President
WFLN Philadelphia

EDITOR:

The members of the sales staff of KSFM are interested in obtaining a number of copies of the Joe Gans article. We would like to know the minimum lot that we may order and the cost . . .

Bruce M. Dougherty Jr.
Advertising & Sales Manager
KSFM (FM) Dallas, Tex.

[EDITOR'S NOTE: Reprints are 5¢ each.]

Muppets are traveling

EDITOR:

Our client, La Touraine, is running a television campaign in Boston featuring the Muppets described in your Dec. 15 issue. We would appreciate your sending us as soon as possible 25 reprints of your article on the Muppets, which were used on Washington television by Wilkins Coffee.

John P. Hoag Jr.
Hoag & Provandie Inc.
Boston

[EDITOR'S NOTE: Reprints are 10¢ each.]

Offers few more facts

EDITOR:

May I point out that your otherwise commendable item [page 63, Dec. 15] about the Ford Tractor closed-circuit television program coming up Feb. 3 does not tell quite the complete story?

Although NBC-TV production facilities on the West Coast are being used, the actual producer of the show is Haford Kerbawy and TelePrompter Corp.'s Group Communication Div. is providing the network and the large screen closed-circuit television facilities.

Alfred N. Greenberg
TelePrompter Corp.
New York

A television service of The Dallas Morning News
Edward Petry & Co., National Representative
The only logical way you can see where you’re going is to look ahead of you. This wisdom is just as profound for people in the business of broadcast advertising as for navigators of submarines. Probably more so, since the deeps and shallows of our national economy in the year ahead are necessarily a matter of uncharted conjecture.

What are the potentials of 1959? More pertinently, what do they mean to you and everyone concerned with the continued health of television and radio advertising during the next 12 months?

Can 1959 be expected to take up where 1958 leaves off? Has the recurring bugaboo of recession been by-passed or merely shelved? Will consumers be confident to spend more of the unprecedented savings amassed during 1958 — and advertising budgets be scaled to tap their enormous buying potential?

Are the electronic media likely to increase their share of the U.S. advertising dollar? What changes seem probable in the general landscape of television ... of radio ... of marketing techniques ... of audience preferences and the ways of evaluating them? How do the experts look to the new year; what do they say and why do they say it?

Answering these questions calls for either the gift of prophecy — or the gift of interpretative analysis based upon solid knowledge of what you’re analyzing.

In short, it calls for perspective.

And this is exactly what a special issue of Broadcasting Magazine, scheduled for publication next February 9, will be called “PERSPECTIVE ’59”. Within its many pages will be the assembly of facts that not only evaluate 1958’s accomplishments, but also the projection of trends forward into the new, enigmatic year of 1959.

Among all publications which purport to speak for the electronic media, only Broadcasting is equipped by skills, by staff, by insight and foresight, by years of growing-up with television and radio alike to attempt such comprehensive analysis of what conceivably lies ahead.

When you — like the most important decision-makers in TV-radio advertising — open your copy of "PERSPECTIVE ’59", in early February, the least evident thing about it will be the many weeks of concentrated effort exerted by Broadcasting’s editors in quest of everything worth weighing against the future of broadcast advertising. Instead, you will find a completeness of factual content to be kept, studied, read and re-read for many months after its issue date.

Within the framework of anything so compelling, so definitely a working tool of working advertising men, the opportunity for telling your own message is as rich as a new-found claim of uranium-bearing ore! Through Broadcasting — in any issue — you command a PAID circulation greater than that of the next three TV-radio papers combined. But, with “PERSPECTIVE ’59", the bonus of readership and “pass-along" and re-readership is well-nigh like winning the sweepstakes.

If you haven’t reserved space yet in “PERSPECTIVE ’59", we suggest you up-periscope and sound your klaxon. It will be heard (on your behalf) in all the most important and profitable places!

FACTS?

HERE THEY ARE:

DEADLINE: January 26 for proofs; final deadline January 30.

RATES: No inflation here. For so much more, the cost is the same as any of Broadcasting’s 51 other issues of the year!

WARNING: Don’t forget that Broadcasting’s page size goes to a 7-by-10-inch format with the start of the year. Check any Broadcasting office for complete mechanical details.

RESERVATIONS: No time like now. Wire or phone us collect to make sure you’ll be represented the way you want, with good position.
INVENTORY — 1959...

Within this single issue of Broadcasting, almost 22,000 PAID subscribers representing TV- & radio's most influential people will be reading the most complete... the most authoritative... report, diagnosis and forecast of the broadcast advertising status obtainable anywhere. "PERSPECTIVE '59" will bring them (and you) such important features as these:

- a comprehensive boxscore of estimated TV and radio net time sales—local, spot and network—for 1958, as compiled by Broadcasting (and contrasted with totals for previous years).

- a thorough analysis of how TV and radio advertising volume in 1959 will probably parallel general economic trends—a resume evolved from the considered opinions of such expert analysts as J. Walter Thompson's Arno Johnson, TV-radio forecaster Richard P. Doherty, etc. (Hint: 1959's outlook is better than 1958's.)

- a situation report on the attitudes of television and radio audiences, as seen through the eyes (and investigations) of A. C. Nielsen—an analysis accompanied by graphic progress charts.

- informed reports by the heads of the two big media promotion bureaux working for television and radio—the by-lined outlooks of TVB's President Norman Cash and RAB's President Kevin Sweeney.

- an examination of the TV film situation... whether 1959 will see a shortage of new feature film material... what and which pilot films are in the works... how big the TV film business really is (and will be in 1959)... the facts about all major TV film syndicators.

- a look at how videotape is revolutionizing television production—and where it is likely to go during the year ahead—with some side considerations about labor repercussions.

- a report on the sturdy resurrection of FM broadcasting, and the factors which again are making it a medium to be reckoned with.

- a factual view of technical advances during the past year—with some far-seeing investigations of what the space age technocracy may hold for trans-ocean broadcasting of TV signals and wide-coverage FM relays.

These, and other important contents, will make "PERSPECTIVE '59" an exhaustive, provocative inquiry into every area of broadcast advertising activity upon which the success of TV and radio in 1959 depends. Nowhere else will facts of such scope and authority be available! And no single issue of any TV-radio business publication will command the attention or interest to be earned by "PERSPECTIVE '59".

The corollary is obvious! If you are part of the broadcast media picture, don't get left out of this one. The people whose time-buying plans determine your future will spend more time than ever with this issue. Why shouldn't they read about you while they're doing it?

Persuaders in the Public Interest

The story of a little-known band of men and women who created a Hundred Million Dollar Non-Profit Trust that works for the public good

By Jason Weems

Last summer, a father, driving his vacationing family through one of our great national forests, pulled up for the view where a mountain road looked down on a deep, wooded canyon.

Filling his pipe, he flared a kitchen match with his thumbnail, in the Western manner.

"Hey, Pop," cried his eight-year-old son, "don't throw that match out the window, break it. You know what Smokey the Bear says."

Smokey has been urging people to take such precautions against starting forest fires for 16 years. You've probably seen his messages on posters, on TV, or in print. Or heard them on the radio.

Smokey, who now lives in the Washington, D. C., zoo, was a real-life bear cub. A forest ranger found him wandering in the smoke of a forest fire which had consumed his mother. Advertising men dressed him up in print as a forest ranger and made him the greatest fire fighter of them all.

As a result of his efforts, the U.S. Forest Service estimates that, since 1942, 600,000 forest fires did not start; 260 million acres of timber did not burn; and nearly 10 billion dollars of damage was not done.

Who Made Smokey a Hero Fire Fighter?

Smokey got his start in the firefighting business in 1942 when the U.S. Forest Service called for help from a unique business organization called The Advertising Council.

You've probably never heard of The Advertising Council, but it is unlikely that a day passes in which you are not exposed to the persuasive messages, prepared and disseminated under its auspices, on the air or in print. This is a good thing for you, and for your country.

It all started when an advertising man had lunch with a Princeton professor and three officers of the Rockefeller Foundation in New York. This was in the spring of 1941.

The Adman Stuck His Neck Out

The professor was doing research in communications under a Rockefeller grant, so the lunch table talk naturally turned to the art, or science, of communication. That was when the adman stuck his neck out.

He said all foundations were making two mistakes in policy. First, they spent most of their money on the increase of knowledge and very little on the distribution of it. Second, when they did spend money on the distribution of knowledge, they used old-fashioned horse-and-buggy methods, and ignored the modern high-speed effectiveness of motion pictures, broadcasting, and advertising.

Seeing a responsive gleam in the eyes of the late, great Dr. Alan Gregg, world-wide student of medical problems for the Rockefeller Foundation, the advertising man went on to elaborate his idea in terms of what advertising could do to spread new medical knowledge among all the people.

Persuasion for the Public Welfare

His convictions, widely shared by many advertising men at that time, boiled down to this:

1. American advertising facilities and techniques had become the most effective means for the communication of new knowledge, and for persuasion to use it, which the world had ever seen.

2. This means of communication could be used just as effectively in the public interest as it was being used in the private interest.

3. Advertising being a communication facility developed by business, business itself might well consider making it available for public welfare projects and organizations.

Out of these convictions The Advertising Council was born.
ber, 1941. Its initial organizers and financial supporters were the six official organizations of national advertisers, of magazine, newspaper, radio, and outdoor media owners, and of advertising agencies.

It had barely been organized when it was called upon to play a greater role than any of its founders had envisioned.

The Stab in the Back
On December 7, 1941, the Japanese struck Pearl Harbor. A country at war found itself faced with vast new problems which could be met only with the cooperation of all the people.

Scrap metals, rubber and paper were needed in vast quantities, and they had to be gathered up from every farmyard and city cellar.

Fats and wheat had to be saved to send to our allies.

War Bonds had to be sold.

Merchant seamen, WACS, WAVES, and nurses had to be recruited.

Victory gardens had to be planted.

Altogether, before the war was over, civilians had to be persuaded to do more than one hundred things like this.

Great Britain, faced with the same problems, had turned to paid government advertising to help solve them. This made the government by far the biggest, and almost the only, advertiser in the country. Some felt this was a potential threat to freedom of the press.

America Chose a Better Way of
Our government turned to the newly formed Advertising Council, which quickly became the War Advertising Council.

The Council called for volunteers.

Advertising agencies supplied talented people to prepare the messages needed...Advertisers, magazines, newspapers, radio stations, and outdoor poster companies supplied advertising time and space to carry the messages to the country.

All these interests responded through the War Advertising Council. America responded to the messages.

By the end of the war, more than One Billion Dollars’ worth of government messages had been published and broadcast as a contribution of American business to the war effort.

The results proved what advertising men had long believed: that advertising could as effectively inform and persuade people to act in the public interest as it had in their private interest.

Waging the Peace
When the war ended, many in the War Advertising Council thought its usefulness was over. There were more who felt that the instrument of public information, which the Council had created, was far too valuable to be reserved for war.

The government still had jobs of public information which needed doing...such as forest fire prevention, and the sale of Savings Bonds; and there was the original Council concept of broad public service such as assisting the work of the Red Cross, CARE, March of Dimes, the National Safety Council, and many others. The word “War” was dropped from the name, and The Advertising Council continued. But here it faced a new problem.

Who Decides What’s in the Public Interest?
Under the imperatives of war there was no question about what projects the Council should undertake, but when it came to non-governmental organizations and non-war projects of government departments, who was to determine which ones were in the public interest?

The businessmen who were the financial supporters and operators of the Council’s facilities did not feel it was in the public interest that they alone should decide such questions.

As a result, a Public Policy Committee was created. This was a group of 20 of America’s most distinguished citizens with backgrounds and experience in various areas of American life. One of the first to accept an invitation to serve was Dr. Alan Gregg, who remembered the luncheon where he first heard how advertising might help solve some health problems.

On this page you’ll find a list of the men and women who serve, without pay, on this Public Policy Committee. They are drawn from business, labor, education, agriculture, the religions, medicine and public affairs. They represent no one but themselves and the best interests of their country, as they see them.

When a project is presented for The Advertising Council’s support, the Board of Directors first decides whether or not it can benefit from broad national advertising. If they decide it can, it goes to the Public Policy Committee which votes on whether or not it is importantly in the public interest. The Public Pol-

HELP US KEEP THE THINGS WORTH KEEPING

Ad from the current Treasury Bond campaign. Started at the outset of World War II, it is the oldest continuing campaign on the Council's docket.

Public Policy Committee must approve the project by a three-fifths vote before the Council will tackle it.

What Kind of Projects Are Approved?

Since the War, The Advertising Council, with the approval of the Public Policy Committee, has presented numerous national problems for your information and consideration, and programs for your support and action.

There are emergency programs, such as appeals of the Red Cross for disaster funds.

There are periodic programs, such as the one called "Religion in American Life", which reminds you of the strength to be drawn from attendance at your church or synagogue. (Gallup polls have shown a steady increase in attendance at religious services since this program started.)

Other programs, such as Forest Fire Prevention, have been continuous over a period of years. One is the Stop Accidents campaign for the National Safety Council. It has helped bring the traffic toll to a new low per vehicle-miles traveled. Still another is the drive for Better Schools, which has stimulated formation of State School Committees, and increased membership in Parent-Teachers Associations. Result: citizen concern about our schools and what they teach is at a new high level.

One of the largest and oldest is the campaign in support of the U.S. Treasury for the sale of Savings Bonds. You have probably responded to both your own and your country's benefit.

Doesn't Wait to Be Asked

When the Council sees a developing national need which calls for the help of better public information, it tries to get a program started.

A recent example was creating and getting support for a program of "Confidence in a Growing America" in the spring of 1958. Twenty million dollars' worth of advertising time and space told Americans why they were justified in having such confidence. This helped avert the development of a "depression" psychology. Government, economic and business leaders say it helped reverse the downswing of last spring.

More Than 100 Million Dollars a Year

Altogether, the programs of The Advertising Council get more than 100 million dollars' worth of support every year.

The support comes from American corporations, large and small. It comes from owners of magazines, newspapers, television and radio stations, outdoor and transit advertising facilities. It comes from the volunteered talent of America's leading advertising agencies.

Most of it is represented by donations of advertising time and space. But there's also cash to support the necessary staff work of the Council and some of the programs it originates.

A great deal of it results from the devoted services of a group of some 70 at America's leading corporation officers who serve the Council, without pay, as its Industries Advisory Committee.

The next time you hear from Smokey the Bear, you might like to remember the uniquely American institution that put the words in his mouth for the good of us all.

The Advertising Council demonstrates by actions, not words, the social responsibility of American business and the power of advertising in the public interest.

Even more important, it has proved that Americans will move to solve the problems of their society with intelligence, sacrifice, and courage whenever they are adequately informed of these problems and persuaded that they need solving.

The Advertising Council . . . for public service

If you would like to know more about this work, this magazine suggests you write for a free booklet to The Advertising Council, 25 W. 45th St., New York 36, New York.
Odd how numbers get tossed around these days. Newest caravansary for agency staffers and distaffers in Gotham is Top of the Six’s. Mr. Howard, maitre de at the numerically named water hole, tells us that numbers are the stuff of which chit chat is made at 666 Fifth.

And at the Top of the Six’s, they’re talking about the six that top Maine—the Hildreth Stations, of course. Now, there’s a six buy that really clicks with sales-minded buyers up and down Madison, North Michigan or Wilshire. Hildreth Radio serves up the top three markets—Portland, Bangor and Aroostook County—garnished with a tasty low cost per thousand. And Hildreth Television covers Northeastern Maine like it owned the region. (Rating-wise it does!)

Says Mr. Howard: “The wise buyer who goes by the numbers comes here for away-from-the-shop talk. And he turns to the six Hildreth Stations when he wants to pitch high sales curves Down East.”

The essential ingredient in shows is showmanship...

Does TV programming today represent mediocrity?
Yes! And unlike some of the critics who have leveled all their ammunition at
the networks, I believe agencies in general have allowed this condition to exist
by ignoring their full responsibilities to the medium. They cannot be treated
lightly. They are a definite obligation. What responsibilities? Timebuying? Re-
search? Contract negotiations? By all means, but most importantly—pro-
gramming!

There's a little question but that much of
today's TV programming is mediocre
when compared with the exciting fare
of earlier seasons. The great number of
recent programs that lived only 13 or 26
weeks before replacement is glaring
evidence of this fact. Yet, a short-run
program is far costlier for a sponsor
than one around which he can plan a
year's exploitation and sales strategy.
It takes time before a TV program de-
velops its peak impact and 13 weeks are
rarely enough.

In this day of high and ever-increas-
ing TV costs, agencies owe it to their
clients to have competent showmen upon
whose experience they can rely in
selecting programs.

There are two kinds of showmen, bad
ones and good ones. The bad ones trade
mainly on one or two successes, but
their average is below par. The good
showman will have quite a few out-
standing successes and even though he
cannot always be right, his average
consistently will be above par. This
kind of showman derives his know-how
from his years of actual experience and
association in his specific field: Entertain-
ment. It is this experience that gives
him that certain "feeling" that instinct
upon which to base his judgment.
Knowing what the mass audience likes
and sensing a change in popular taste
are those indefinable qualities that a true
showman can offer as insurance to
sponsors against loss of valuable dollars
through ineffective programming.

Programming by Default • But how
many agencies have such showmen?
Or, if they do, actually use them effec-
tively? More and more I hear reports
from various agency people of so-called
"jury pilot screenings" where members
from virtually every department attend
and offer comments and criticisms.
After viewing several pilots, a pool of
the comments indicates no outstanding
approval of any single pilot, so two or
more are chosen for screening to the
client. Consequently, with no solid
recommendation from the agency, the
client becomes involved in an elimina-
tion contest and a program ends up on
the air by default.

Client screening itself can add con-
fusion to this system of program selec-
tion. Television, being such a prime
selling vehicle, receives the attention of
not only the advertising director but the
heads of sales, marketing and merchan-
dising as well. Their comments can be
extremely valid in pinpointing negative
elements in a program that would
hinder their sales objectives. But such
comments, valid as they are, seldom
have anything to do with the value of
the show in terms of consumer interest.

Competence Respected • We have
found that clients do not want yes men.
They respect competence and are only
too anxious to be sold off their objec-
tions if it results in successful program-
ning. I was told of a good example of
this regarding the recent trend in west-
ers. After practically a year of ramp-
ant criticism regarding the number of
horse operas on the air, they became a
program classification to shy away
from. However, one agency after view-
ning a new western show submitted it to
its client for sponsorship. The client ex-
pressed his objections: They would be
getting in on a downward trend. Every
columnist was lampooning horse and
saddle shows and the public in general
had its fill and would not watch.

The result was a top-rated show. The client reached
a vast audience for his sales message and
was delighted. The big difference to this
story is that the client had an agency
with competent people who would give
him the kind of competence he needed
and he knew he could rely on.

The result of the jury system of series
selection usually ends up with the
lowest common denominator of judg-
ment: A compromise of opinions—
which adds up to mediocrity. This is
not to discredit the fact that some con-
sulting is healthy and should be en-
couraged, for as great a danger as the
jury system would be the "one-man
dictatorial selection.”

Just as a matter of good common
sense and purse-string philosophy, it
would seem that showmanship rather
than juries should be utilized in any
final selections.

Regardless of whether or not a client
views one or more pilot films, he should
be entitled to a showman's judgment
and the benefit of his comments upon
which he can base his evaluation for an
expenditure that represents the greatest
portion of his ad budget.

How do you tell a good showman
from a bad one? There's one sure way.
Track record!

**FIRST!**

ABC Radio News brings first word of Pope John's election to American public.

**FIRST!**

ABC Radio News reports Lebanese President Chamoun's appeal for help in Mid-East crisis.

**FIRST!**

ABC Radio News reports Charles de Gaulle will bid for leadership of French government.

1958: Year of tension and crisis. Far East, Mid-East, Latin America, U.S.A. Almost every part of the world was news. And in this memorable year ABC Radio News made news by consistently scooping its competition. The news beats above are but three examples.

One hundred and twenty-five ABC reporters and overseas correspondents bring the news to the American public almost as swiftly as it happens. Twenty-one foreign news bureaus — from Moscow to Tokyo, from London to Cairo — probe for news twenty-four hours a day, seven days a week.

ABC's domestic bureaus — staffed by such distinguished personalities as John Daly, Quincy Howe, Edward P. Morgan, John W. Vandercook, John Secondari and Bill Shadel — report and analyze world and national news.

Today's news is made — and changed — with great frequency. Major news breaks can't wait even for regularly scheduled news programs. With ABC's exclusive News Alert System, ABC stations can broadcast news flashes instantly. No matter where the news is made, their audiences keep up with the people, places and events of the hour — within seconds.

People depend on radio for news. And over 25,000,000 different people listen to ABC's award-winning news staff each month.* These people recognize ABC's leadership in news reporting. So do ABC affiliates and advertisers.

HARRIS THUMPS FOR BIGGER PROBE
Oversight also urges legal, internal overhaul of FCC machinery

Sweeping changes in the Communications Act and internal practices within the FCC were recommended in the final report of the Legislative Oversight Subcommittee, filed with the House of Representatives Saturday (Jan. 3).

While the 1958 investigations were extremely rough on the broadcasting industry, authority for a continued and broader investigation was asked during the new Congress. It was not specified whether the Oversight Subcommittee, which officially expired Saturday, in its present form should be continued and Chairman Oren Harris (D-Ark.) refused to comment on this phase.

There were no big surprises (BROADCASTING, Dec. 29, 1958) in the document as finally approved by a majority of the subcommittee following a marathon 12-hour session last Wednesday.

Recommendations — and there were many, far reaching legislative and future investigation proposals — made in the report were reported as unanimous. However, minority reports were submitted on certain language used.

Specific legislative recommendations of the report affecting only the FCC (five other agencies also were covered):

- A provision that no negotiations for sale or purchase of a station could be entered into without first notifying the Commission and receiving its approval. The Commission then would be required to make public the intended negotiations and the purchase price. The Communications Act provision which prohibits the FCC from considering the public's interest in approving transfers would be repealed. Also, the FCC would be required to hold a public hearing in all transfers unless it made a prior finding that the public interest would be served by the station sale.
- Direct or indirect payoffs to competing applicants would be prohibited, except for proved out-of-pocket expenses. When one or more applicants do withdraw, upon payment of expenses, competing applications would be accepted within 30 days.
- The provision separating members of the Commission from its staff would be repealed. "It is anomalous that the general counsel of this Commission cannot freely consult with the Commission once a matter has reached the so-called adjudicatory posture," the report states.
- A public hearing would be required before the issuance of any tv license, even if there is only one applicant, and all parties would be given the right to appear.
- Repeal of the provision authorizing commissioners to accept honorariums.

Other legislative proposals, affecting all six agencies investigated by the subcommittee, recommend a congressional-passed code of ethics; civil and criminal penalties for ex parte contacts and attempts to influence the agencies; all written communications from members of Congress and others be made a part of the public record; effective authority for the commissions to enforce their own rules and regulations. On the latter point, the report states:

"Violators presently know that they can keep the fruits of their violations and go scot free because the drastic nature of existing sanctions prevents their effective application..."

In a move to make the independent agencies more "independent" from the executive, the report recommends that the commissioners elect their own chairman, who would serve in that position for a maximum of three years. Under present law, the President appoints the FCC chairman as well as those of most of the other agencies. The President, however, would be given the authority

Seven of nine Oversight Committee members who drafted report are above: Flynt, Moulder missed picture; Moss, Heselton missed meeting.

BROADCASTING, January 5, 1959

31
to remove a commissioner from office for malfeasance or neglect of duty, but for neither reason. All the commissions would be required to grant or deny any motion within 60 days after its filing. However, upon due notice, the Commission may extend this period for 120 days and if no action is taken during that period, the petition shall be considered denied.

FCC Told To Clean Own House • The Commission was told to take several steps on its own, without the need for legislation, to improve its operations. Among them:

- A rule requiring that there be filed annually a list of all broadcast patents held by manufacturers.
- Investigate all outstanding antitrust matters within its jurisdiction which bear upon the fitness of a station owner to hold a license. "The Commission has paid little or no attention to its statutory responsibility in this area," the report stated. "The Commission is not being equal, preference should be given to local applicants.
- Review its technical standards to ensure "that such standards are not tied in with a patent or other monopoly enjoyed by one or more manufacturers or licensees.
- Re-examine its standards and criteria for comparative hearings to insure that they are "consistently applied in cases with the same or similar sets of facts."
- Take steps to eliminate the excessive length of records and opinions and unreasonable delay in proceedings.
- An investigation should be made of alleged instances of clerical errors in legal codes by attorneys practicing before the FCC with "appropriate disciplinary action."

A review by the Commission itself of the some 30 tv cases in which the subcommittee said it found instances of ex parte contacts and improper influences.

The report took a swipe at the FCC because of the "quality and content" of the annual report sent to Congress. "The Commission has done little more than supply the minimum amount of report material required ..." the report stated.

Still another recommendation would have an individual commissioner writing the FCC decisions, rather than delegating this duty to the Office of Opinions & Reviews. The opinion would be signed by the writing commissioner, with the duty rotated on a regular basis.

Further Investigation Needed • The report said the subcommittee's work is far from completed, and listed 25 matters affecting the FCC needing further study. "The record of our subcommittee and the information in its files which have not been developed at hearings," the congressmen stated, "implies us also to recommend that such commit-

tee (parent Commerce Committee) or subcommittee should undertake and complete further legislative inquiry. . . ."

A study of the use of the entire spectrum and a determination as to its allocation and use is urgently needed, the report stated. "The public interest requires that this study and determination be made objectively by the legislative branch rather than the executive because of the natural predisposition of the executive to favor its own interest in the matter," the report said. A part of this study, it was recommended, should include an investigation of the uhf-vhf situation.

The report also asked that the subcommittee be given new life to investigate the 25-year-old clear channel problem; the licensing of networks "since they provide a very considerable amount of the programs which stations themselves broadcast, and over which they (stations) have no control control; "nuisance filings" of strike applications; option time agreements and their relationship to the duty of individual broad-

First of many

At least one anti-pay tv bill will be introduced the first day of the 86th Congress, convening Wednesday, Jan. 7, Rep. Oren Harris (D-Ark.) said last week he had several bills to be introduced the first day and a pay tv measure is one of them. Rep. Harris, chairman of both the House Commerce Committee and its Legislative Oversight Subcommittee, said legislation designed to carry out recommendations of the Oversight report would not be ready this week. This will follow, he said, in the immediate future.

casters to control the programming of his station; multiple ownership of stations, and "the centralization of economic power resulting from technical developments in the broadcast field."

Continuation of the subcommittee is needed, the report stated, so that an investigation can be made, on a commission-by-commission basis, of their internal administrative setup, the functioning of each of its divisions and branches and the responsibilities delegated to others; the means employed in the making of Commission policy and the procedure followed in publishing policy statements and changes; the manner in which examiners are appointed and assigned to cases, and the technical qualifications of examiners.

Other necessary future investigations cited in asking that the subcommittee's work be continued:

- The effect of court decisions on con-

gressional intent in forming the agencies.
- Whether the Commission has neglected its obligations to the public by failing to make thorough investigations of applicants, licensees, or has it depended on information furnished by the competing parties.
- A thorough study for the reasons in variations from established criteria.

Whether the Commission's internal organization is such that a superior authority is vested in a single staff employee to the extent that such individual is able to designate what material is presented to the Commission in rule-making or adjudicatory proceedings.

What is necessary to strengthen the independence of the Commission from the White House.
- Whether the Commission should be required to submit its budget and legislative requests through the Budget Bureau.

What measures, if any, are needed to separate the legislative, executive and judicial functions of the Commission.
- Whether excessive paperwork, expense and delay in Commission proceedings can be eliminated.
- Whether the Commission takes reprisals against persons or companies who challenge its actions.

The method of assigning examiners and of changing assignments to ascertain whether examiners are sometimes assigned with the view of insuring a predetermined result.

The procedures for handling cases between the filing of the initial decision and the final report to ascertain whether they are needlessly cumbersome and time consuming.

To what extent formal decisions are based on staff memorandums, analyses or recommendations which are not available to all parties.

Support of Recommendations • "Our hearings have brought to light certain fundamental weaknesses which if not corrected will lead to lack of public confidence in the efficiency and integrity of the . . . commissions," the report stated in support of its recommendations. "The proposals we advance are aimed at eliminating flagrant abuses and certain conditions and practices which are conducive to the fostering of improper ex parte conduct."

"The recommendations also include measures to strengthen the commissions, contribute to their more efficient operations and to insure faithful, ungrudging administration of the statutes in the manner intended by Congress. . . . Congress must also make certain that improper fraternization or pressures are not permitted. Otherwise, the administrative commissions may be con-
Make us prove it! Ready?

In the last year, our steady viewers have given us Pulse ratings ranging from 12 to 15 out of 15 top shows. They’ve given us top ratings on our originated multi-weekly shows. 92% of our area people reach us through their TV sets!

This has gone on so long that we’re sure we have to know why. After all, we’re part of the community — our veteran staff people have served on Boy Scouts, P.T.A. and Community Chest for more than a decade — and we all think alike. You don’t overpower folks out here — you don’t double-talk and triple-spot them. You’re all neighbors, in one of the richest, highest home-owning urban, suburban and ex-urban areas in the country. So you go heavy on public service, programming for people and civic affairs. You earn your way — and your loyalties.

This is a climate in which audience response to intelligent merchandising offers even greater rewards than the figures show — and George P. Hollingbery has some mighty impressive ones. Ask him why America’s 17th market is even bigger than it looks!

VERTED INTO WASHINGTON BRANCH OFFICES
OF THE REGULATED INDUSTRY, OR INSTRUMENTS
OF OVER AGGRESSIVE SEEKERS OF SPECIAL
PRIVILEGES."

The report concluded that one of the
most effective steps to strengthen the
FCC and other agencies is to have as
commissioners and key personnel "men
of unquestioned ability and character...
... We strongly urge that appointment
to commissionerships be removed from
politics...

The national public inter-
est requires that the Executive appoint
commissioners men of independence,
experience and attainment in the field
of activities they are called upon to
administer."

Although no specific recommenda-
tions were made, the report said the
tenure and compensation of commis-
sioners should be such to attract and
keep the most capable men. The report
further stated that it is not enough to
tell the Commission that its decisions
must be based on the public interest.
"One of our important recommendations is that a thorough study be made
of the various statutes conferring dis-
ccretion upon a commission with a view
toward establishing more precise stand-
ards to control the exercise of such
discretion," the report said.

Not a Congressional Subject • The
committee kicked out of the report a
provision calling for an investigation of
tv programming, urged by at least one
member. "That gets into censorship,
and I don't think that is a proper subject
for Congress," Rep. Harris said when
asked why the proposed investigation
was squelched. The chairman stressed
the subcommittee has in no way tried
to tell the FCC what to do in any given
case.

On the proposed 60-day limit for the
FCC to act on motions, Rep. Harris
said "one of the problems that caused
so much turmoil has been the continued
delays, giving rise to ex parte
approaches."

A large percentage of the report deals
with testimony before the subcommittee
in the Miami ch. 10 case, Pittsburgh ch.
4, Boston ch. 5, Springfield, Ill.—St.
Louis ch. 2 shift, and others while incor-
porating conclusions reached by the
subcommittee. It was on this point that
some members balked at signing the
complete report.

Rep. Joseph P. O'Hara (R-Minn.)
said this narrative began "picking on
individuals. I am not going to be a party
to that." He said a minority report
would be submitted by himself and Rep.
Charles Wolverton (R-N. J.), but that
he did not know whether other GOP
members would sign the dissident
opinion.

Rep. John Bennett (R-Mich.) stated
he was in general agreement with the
report but that he "has a few comments
and reservations" which he intends to
file.

Members of the subcommittee in-
clude Democratic Reps. Harris, John
Bell Williams (Miss.), Peter Mack (Ill.),
John J. Flynt (Ga.), John Moss (Calif.)
and Morgan Moulder (Mo.); Republi-
can Reps. O'Hara, Wolverton, Bennett,
Robert Hale (Me.) and John Heselton
(Mass.). All except Reps. Moss and
Heselton were present for the Tuesday
closed session which gave a final ap-
proval to the report.

Many of the report's recommenda-
tions apply to the Federal Power Com-
m mission, Federal Trade Commission,
Securities & Exchange Commission,
Civil Aeronautics Board and Interstate
Commerce Commission as well as the
FCC. Individual recommendations also
were made for each of the other agen-
cies, although the FCC was the target
of a majority of the proposals.

ACTIVITY

There were 126,085,000 people in the U.S. over 12 years of age during the week Dec. 19-25.
This is how they spent their time:

*These totals compiled by Sindlinger & Co., Ridley Park, Pa., and published exclusively by
BROADCASTING each week, are based on a 48-state, random dispersion sample of 7,000 inter-
views (1,000 each day). Sindlinger's weekly and quarterly "Activity" report, from which these
weekly figures are drawn, furnishes comprehensive breakdowns of these and numerous other cate-
gories, and shows the duplicated and unduplicated audiences between each specific medium.

Copyright 1958 Sindlinger & Co. * Hour totals are weekly figures. People—numbers and per-
centages—are figured on an average daily basis. * All people figures are average daily tabula-
tions for the week with exception of the "attending movies" category which is a cumulative
total for the week. Sindlinger tabulations are available within two to seven days of the inter-
viewing week.

SINDLINGER'S SET COUNT: As of Dec. 1, Sindlinger data shows: (1) 112,743,000
people over 12 years of age have access to tv (89.4% of the people in that age group);
(2) 43,693,000 households with tv; (3) 48,184,000 tv sets in use in U.S.
THE TOP GUNS WERE IN TOWN

It happened on December 14, 1958. A fitting climax to the exciting opening promotion of the NEW KVII-TV, K-7 in Amarillo, Texas. Four of Warner Bros.-ABC's top stars headlined a K-7 telethon to benefit Multiple Sclerosis research: The Texas Panhandle was branded — and properly — in what one Amarillo agency man called "the most professional and exciting program ever televised locally".

Amarillo and the High Plains are coming to expect — and receive — BIG things from K-7. In just eight weeks, Channel 7 has:

- new ownership and management, ABC interconnection, a tremendous new programming day, full power of 316,000 watts from the area's highest tower, and a promotion campaign that has the whole town talking!

So now, the TV picture in Amarillo and the four-state marketing area it serves has changed! The dynamic new force is K-7 TV, where the most enthusiastic television people in Texas are now hard at work on even bigger plans to hold the air of excitement created by the "BIG SWITCH".

Let your Bolling man give you the full story of a station that is DIFFERENT — a station that can SELL your advertiser's product!

channel 7 • amarillo, texas
C. R. "Dick" Watts, Vice President & General Manager
Which "twin" gets your WAVE?

WAVE Radio celebrated its 25th Anniversary on December 30 — WAVE-TV its 10th on November 24.

Each of these remarkable sister stations wins the cake in its category because:

- **WAVE-TV**, Channel 3, the first television station in Kentucky,
  - is also first in ratings — first in coverage —
  - first in number of listeners — first in values for advertisers.

- **WAVE RADIO**, famed for a quarter century as the Louisville area's prestige regional station, still gives you all the richest part of Kentucky — without the cost of covering Chicken Bristle, Big Bone, Gravel Switch, etc.!
MASSEY-FERGUSON PLOWS INTO TV

Major farm equipment maker hopes to reap rich sales crop from first TV planting

Country-wide audiences, starting this weekend (Jan. 10), will be introduced to the "Massey-Ferguson kind of a man."

What's he? Well. "When a man works the land, He's a special kind of man; He's a doer, not a talker; He's a cultivatin' man; He's a get up early, Keep 'em rolling, Massey-Ferguson kind of a man."

So go the lyrics, set against a background of stirring march music, theme of the 1959 broadcast advertising campaign of farm equipment maker Massey-Ferguson Inc. (U.S. Industrial division of Massey-Ferguson Ltd., Toronto).

He's obvious, the Massey-Ferguson man. He's the farmer who tills the soil, and who, incidentally, is the customer M-F seeks for its full line of farm implements (combines, tractors, harvesting equipment, pickers, rakers, mowers, plows, planters, seeders, tillers, etc.).

First Time TV User • While the tv-radio audience will be introduced to this Massey-Ferguson "kind of a man," the tv medium itself will be in contact for the first time with a top national advertiser never before in television.

In fact, Massey-Ferguson claims to be the first farm equipment manufacturer to use network TV (it has a commitment for the weekly Jubilee, USA on ABC-TV, Saturdays, 8-9 p.m., starting Jan. 10, and running through Oct. 31, 1959, end of the firm's fiscal year). And Massey-Ferguson is no weak sister in the field—it's the world's second largest farm equipment maker, ranking next to the giant International Harvester.

For its job of harvesting farm customers by television, Massey-Ferguson will spend this year "well over $1.5 million," actually closer to $2 million in the broadcast media when adding the 60-70 radio stations on which it sponsors 10-15 minutes of farm information including news, events of special interest, weather and market data. The total broadcast expenditure probably will be 40-50% of the total U.S. ad budget.

Before tv, the company chiefly used radio and farm magazines, and, says Stanley S. Roberts, general advertising manager at Massey-Ferguson, of the new sponsorship on ABC-TV, "This is a momentous step by our company . . . to present our 1959 line of products . . . in new, unique and exciting ways." The tv medium, he continues, is ideally suited for the task of telling "The Massey-Ferguson Story," permitting graphic demonstration of equipment features to farm homes as well as supplying "the type of entertainment they enjoy."

The company—it's worldwide with 142 plants in 17 countries, operates an industrial division from Wichita in the U.S.—and its agency, Needham, Louis & Brorby (services the U.S. division), Chicago, set out to inject excitement into the commercials.

Go-Getting Man • The musical theme is basic to the ad campaign, presenting the image of the customer as a special kind of a man who is a "staunch, go-getting man of the soil." Last November, the agency and Artie Fields Productions, Detroit, went to work on lyrics and music and in Chicago recorded (at Universal Recording Studios) the march as well as arrangements in prairie, square dance and mood tempo, using separately a band, orchestra and eight-man chorus.

At the beginning of December, a mammoth operation followed. Tons of Massey-Ferguson equipment were sent to California for filming commercials in Los Angeles and Stockton. Before the L.A. shooting, Robert Hadley, M-F's chief photographer and technical adviser for the commercial production; James Steer, Mr. Hadley's assistant, and agency producer Thomas D. Thomas searched the L.A. area for a suitable outdoor location. This wasn't easy, notes the agency, because the farm had to look like a midwest locale even though the shooting was in California.

The location was found and footage for several commercials shot, in-

Big picture: It takes helicopter, airport runway to film tractor commercial

including some indoor farm scenes (which meant that walls of a room had to be moved from the studio to the farm location to retail authenticity). Filming was by Lou Lilly Productions in Hollywood.

From there the production experts and a 16-man crew moved to Stockton. There footage was taken by the crew (Schnitzer-Lawrence Productions, Hollywood) at the Drais ranch (which served as location for scenes in ‘The Big Country’ movie).

Tractors in Tempo • Next came the biggest commercial production chore: Filming at the Stockton airport where 62 pieces of farm machinery were lined up and shot as they paraded down the runways (two or three runways were closed off for most of the 2½ days of shooting). Camera work was from various angles including from a helicopter. M-F personnel as well as college and high school agricultural students were pressed into service to drive the equipment in the “parade.”

This particular commercial runs for about a minute with little voice except for a brief word from an announcer; nearly all of the commercial is made up of the vehicles parading to the tempo of march music.

Another commercial is called “the letter.” This is built around a farmer who is writing to his dealer extolling the virtues of his new M-F tractor but complaining that his son-in-law borrows it all the time for a neighboring farm and suggesting the dealer ought to make a sale. Clincer: There’s a commotion in the barnyard, the farmer sees son-in-law driving a new tractor and excitemently pointing out its features; the farmer smiles, crumples up the letter and tosses it into the wastepaper basket.

According to the sponsor’s blueprint, about 30 or 40 different TV commercials will be produced, all aimed for the farm audiences.

To hammer the word home locally, dealers have been encouraged to cut-in at the end of the program to identify themselves.

Also assisting in the commercial concepts and production: NL&B’s James G. Cominos, vice president in charge of TV-radio; Scott Keck, vice president and director of TV-radio; Kenneth C. T. Snyder, vice president and director of commercial production; George Oliver, vice president and account supervisor, and Willard Johannsen, account executive. In addition to producers Thomas and Ford of the agency, others working on the commercials were writers Robert Polatsek and Jack Trindl and art director George Lundy.

Reflects NL&B: “The entire commercial TV approach that Massey-Ferguson is following is unique and distinctive in the field of farm equipment manufacturing, as well as in the advertising field. It is gigantic in scope...” or, in other words, again as expressed by the agency: “Designed was a television commercial ‘package’ achieving a balance between a ‘nuts and bolts’ and an emotional approach.

In general, film commercials took the role of establishing the emotional facet of the campaign; of establishing visually and audibly the ‘Massey-Ferguson man’—a composite picture of today’s farmer, progressive and forward-looking, yet retaining a heritage of decades of American farming.”

SWITCH AT Y&R

Programs, timebuying combined in new dept.

Young & Rubicam, the country’s third largest agency in radio-TV billing, is overhauling its broadcast buying and programming functions.

Basic in the reorganization (effective Jan. 1) is the consolidation of all time-buying and programming activity into a single unit that will be known as the “radio-television buying department.”

Official word of the change in organizational concept came Wednesday (Dec. 31) from Y&R President George H. Gribbin who announced new posts for Peter G. Levathes, who has been vice president of media, and Robert P. Mountain, vice president of radio-TV.

Under the new setup, Mr. Levathes will head the expanded radio-TV department (and for the “time being” will continue also as director of media). Mr. Levathes has been with Y&R since 1953. Mr. Mountain, with the agency 20 years, moves to vice president in charge of new business (see Week’s Headliners, page 10).

Old Gap Shut • At most large agencies, particularly in Y&R’s billing league, there is a distinct separation of radio-TV programming (or at some agencies, the radio-TV production function) and time-buying, which is a part of the media department. At Y&R, timebuying (including network and spot) had become an integral part of media.

Mr. Levathes last week explained the change as a consequence of a “natural growth” in the broadcast media, noting that the new way of doing radio-TV business at the agency should centralize activities. Timebuying and programming, said he, had become inseparable.”

Mr. Levathes emphasized that the TV business has changed, noting “an agency no longer buys a block of time, and that shows now are put together by packagers and networks with ‘time segments of the shows and the types of shows intertwined.”

Mr. Levathes was chief architect of ABC-TV’s Operation Daybreak in which six Y&R clients enrolled as charter day sponsors at a total 52-week rate of $13.3 million. In an interview last summer, Mr. Levathes defended Y&R’s interest in Operation Daybreak and its purchases, labeling various charges such as one that Y&R would in effect be operating as a fourth TV network in the daytime, as “sleazier and utterly irresponsible nonsense” (Broadcasting, July 21, 1958).

Department Specifies • As to whether or not additional people will be assigned to the new radio-TV department, Mr. Levathes said that it was too early to say because details are not set.

Y&R has been billing at the $95 million level in radio-TV, is a leading agency among those handling network TV shows (billed about $62.5 million in network television last year) and its combined radio-TV servicing accounts for approximately 45% of overall billing.

Medic ban in effect

Any commercial appearance of TV’s “men in white” violates NAB’s TV Code.

The association’s ban on use of actors to portray physicians, nurses or dentists in spots promoting medical, dental and related products became effective Jan. 1. Code officials have been working with the 303 TV stations and three networks that subscribe to code provisions to develop enforcement techniques.

Six months grace was given following

BROADCASTING, January 5, 1959

(BROADCAST ADVERTISING) 59
adoption of the white-coat ban during the summer (Broadcasting, June 23, 1958). This was designed to allow time for revision and replacement of white-coat films already in use.

NAB’s Tv Code Review Board will meet Jan. 23 in Washington to review staff monitoring reports on commercials and programs. The board will meet again during the NAB convention to be held March 15-18 in Chicago. Board members are Roger W. Clipp, Triangle Stations, chairman; Mrs. Hugh McClung, KHSL-TV Chico, Calif.; Richard A. Borel, WBNS-TV Columbus, Ohio; E. K. Hartenbower, KCMO-TV Kansas City, and Donald H. McGannon, Westinghouse Broadcasting Co. Edward H. Bronson is code affairs director.

FSR plans May 1 move

Relocation of Fuller & Smith & Ross to new and expanded New York Corporate headquarters on or about May 1 was made known to agency employees last Wednesday noon (Dec. 31). Announcement by FSR President Robert E. Allen was made via a 6-city closed-circuit radio hookup. Believed to be the first such use of closed-circuit for inter-agency communication, the radio talk also covered FSR’s plans to expand its broadcast operations.

The agency moves from 230 Park Ave. to the 34th and 35th floors of the Tishman Bldg. at 666 Fifth Ave., which also houses such agencies as Benton & Bowles and Ted Bates & Co. The move will complete an 18-month long nationwide rehousing plan that has seen FSR move into new quarters in San Francisco, Chicago, Pittsburgh and Cleveland.

Mr. Allen, in his yearend report to the employees, said FSR’s new broadcast plant would be one of the most modernized in the industry. There will be complete tv studio facilities for pre-testings of commercials, color videotape banks, closed-circuit tv and am-fm radio systems linking all conference rooms and the executive offices.

Union Oil using vtr

Union Oil Co. of California this week becomes the first advertiser to use videotape for the distribution of its sponsored programs to stations used in a regional tv campaign. Union’s half-hour weekly series, 76 Sports Club, now is being taped at KTTV (TV) Los Angeles for distribution to 23 other stations in the West, Alaska and Hawaii for broadcast in early evening time periods considered a most likely slot to reach the all-family audience for which the tv series is designed.

The series originally was broadcast on a West Coast regional network of ABC-TV stations and moved in the fall to CBS Television Pacific Network. Difficulties in time clearance prompted the move from network to spot, it was said. Under the new set-up, the programs will be recorded on videotape at KTTV and the tapes distributed to stations equipped to broadcast them. Stations not so equipped will receive the series by kine-scopes. Agency is Young & Rubican, Los Angeles.

KTTV will repeat its Thursday telecasts (8-8:30 p.m.) on Saturday mornings at 10 a.m. All other stations are scheduled for only a single telecast per week.

AGENCY APPOINTMENTS

• Hertz Corp., Chicago, names Needham, Louis & Broby, that city, for its truck and car leasing services with estimated $1 million billings. Campbell-Ewald Co., Detroit, continues to handle Hertz’ Rent-A-Car operation.

• Bronte Champagne & Wines Co., Detroit, names W. B. Doner & Co., that city.

• Procter & Gamble Co., Cincinnati, names Grey Adv., N.Y., for its Big Top peanut butter, effective January 1959, replacing Compton Adv., N.Y.

• Ward Baking Co., N.Y., appoints Grey Adv., to handle its cake line, replacing J. Walter Thompson Co., there. JWT will continue to handle Ward’s Tip Top bread.

• Dolce Cosmetics, S.F., names Mitchell, Murray & Horn, that city.

• Oakite Productions Inc., N.Y., names Richard K. Manoff, N.Y., for its packaging division.
THE NBC RADIO NETWORK
keeps America on top of the latest happenings the whole world over with fast, accurate, dramatic news, flashed by 400 NBC News correspondents stationed in 70 nations.

- Every hour, throughout the day and evening, NBC Radio's NEWS OF THE HOUR presents a complete news summary, featuring on-the-spot reports.

- At all times, NBC's HOT LINE is on the alert, standing by to switch listeners right to the scene of big news, wherever it happens, whenever it happens.

- NBC News is constantly at work on special background reports that give full perspective on the headline of the moment.

This is the kind of news-coverage that the American public relies upon network radio to bring them—the kind that only a network can bring them. This is the kind of coverage they know they will always find on an NBC Radio station.

For complete on-the-spot coverage, all year long, around the world, America turns to the stations of the NBC Radio Network.
FORMULA FOR THE IDEAL STATION?

New Motivational Research study digs beneath the ratings to learn what people would like 'dream' radio station to be.

The outlines of what may be a new "radio station of tomorrow" emerged last week from a far-ranging study of audience attitudes, preferences and responses.

The exploration of what audiences look for in radio programming—and what kind of programming best satisfies them—was part of a detailed study conducted for KPRC Houston by Dr. Ernest Dichter's Institute for Motivational Research.

"Our research findings," the report asserts, "indicate that the public is dreaming of a new type of radio station. Unconsciously people want a combination of the virtues of the network stations and of the local stations. They wish to be guided by the authority, reliability and the vast resources of the network stations, but they also wish to be entertained, stimulated and exhilarated by the more informal, perhaps less professional, but warmer, more intimate approaches and programming of the smaller local stations."

These and similar conclusions were based on studies in Houston, but Institute authorities said they felt the "dream station" is much the same in the minds of people throughout the U.S., at least in principle. The Houston audience, they felt, is typical of all radio audiences, and its needs similar to those of audiences elsewhere. Through this study, described as the most exhaustive of its nature ever conducted in radio, they hazarded that "we are beginning to touch fundamental facts about the future of radio."

Results of the study were released in full to Broadcasting even though the detailed findings were not universally favorable to KPRC. Jack Harris, vice president and general manager of KPRC-AM-TV, authorized the release.

Mr. Harris said the study was commissioned because "at KPRC we have felt for sometime the need for better tools of qualitative research to enable us to program more directly in response to the needs of today's radio audience" and because "we have also felt that advertisers and agencies needed much sharper tools to enable them to make intelligent buys in today's radio marketplace." He said the study yielded "invaluable information" for the expansion of KPRC's services as well as "material of great value to advertisers and agencies."

Needs and Desires • The report lists 10 "basic need constellations" which "influence or even determine the listener's reactions to particular radio programs and stations." These are needs (1) for orientation within the world in which he lives; (2) for escape; (3) for emotional identification with others and other human needs; (4) for individualism; (5) to express aggression; (6) to feel moral; (7) for a heightened sense of life, excitement, emotional situations; (8) for relaxation and daydreaming; (9) for coping with personal problems and for lessons in daily living and (10) for coping with intellectual and spiritual problems.

"Whenever listeners talk about radio programs," the report declares, "they express their desire to fulfill one of these needs or, more exactly, a constellation of these needs. It is evident, for instance, that news programs gratify a person's need for orientation and focusing; that most Wild West programs gratify the need to express aggression; that mystery programs are a vehicle for the need to escape; or that glamorous spectacular programs or rock-and-roll music create a heightened sense of life.

... The effectiveness of a radio program is determined by the degree to which it satisfies one or more of these need constellations. Whenever listeners criticize a program, what they are saying is that the program fails to give them the psychological satisfactions they need. Whenever they praise a program,
THE NBC RADIO NETWORK

is on the spot—whatever the season, whatever the sport—
bringing America one exciting first-hand report after another.
Baseball and boxing, tennis and track, horse-racing, sailboat-racing, golf—even bocchi—they're
all part of the jampacked NBC schedule. Each season there are
specials like: the Rose Bowl Game, the World Series, the
U. S. Open Golf Tournament, Forest Hills' Tennis Championships, in fact, just about every
major event of the year. Weekend games and special features
on MONITOR, interviews, sports roundups, and the Friday night
fights complete the schedule.

For sports-loving America,
here's week-in, week-out on-the-
spot reporting that only a net-
work could provide.

For complete on-the-spot cover-
age, all year long, around the
world, America turns to the sta-
tions of the NBC Radio Network.
They express their happiness over feeling of psychological fulfillment in some essential respects.

Thus, the report concludes, the "psychological effectiveness" of a station depends on the number of needs it satisfies and on how well it satisfies them. On the overall question of what people need and want from radio—and consequently of what the "dream station" of the future may be—the report offers a number of findings and conclusions, some of which have been the subjects of controversy for a long time. Among them:

- "Radio in itself as a medium is felt to be a more moral instrument than tv. This is because radio enables listeners to go about their work, duties and chores while listening, while tv immobility forces them to take them away from their duties.

- "... Soap operas are becoming increasingly controversial. In our material we have noticed the trend away from listening to soap operas, especially on the part of women in their 20's."

- The need for relaxation emerged from our material as one of the most widely felt needs. Respondent after respondent stressed that one of the main functions of radio is to provide an opportunity for catching breath, simming down and just spending time pleasantly. We also find that in this area radio was probably greater possibilities to satisfy the audience than tv.

- A significant portion of our sample commented spontaneously that tv requires too much attention; it glues the viewer to his seat and demands too active a participation.

- To more and more people turn to radio for daily services such as finding out the right time, the temperature, the weather, shopping news, etc. This is a very fertile area for the future of radio.

- Here—on the level of personal services—there's a whole, large, untapped area which will be of the greatest importance in the future development of radio.

- In trying to meet people's need to express aggression, "radio is at a disadvantage compared to tv. Most of the detective stories and westerns as seen and heard over tv enable the listener to participate emotionally in a much more intense manner and thus to experience much deeper emotional satisfactions."

- "It is a well-known fact, which was again confirmed in this study, that people react not only to the music they hear over the radio but also to the (personal-to-person) communication from the personalities on the radio station—even if all the individual is doing is supplying a little conversation and chitchat between records. The smoothness, professional air, timing and charming intimacy with which a disc jockey introduces comments on and occasionally interrupts the records he plays can make all the difference in the world.

- "We know that there is a renewed nationwide interest in radio. To take advantage of this new interest, one of the main tasks of the radio industry is to make up for its lack of visual dimensions by exploiting and revitalizing its vast sound possibilities. ... Since sound is radio's element, it is in the realm of sound that exploration and imaginative accomplishment are especially important."

Regarding KPRC and the Houston market specifically, the study found loyalty "widely divided among a number of stations." The report says "the audience tends to feel that KPRC, in association with a national network [NBC], offers the most reliable coverage of important national and international events, and that it has, in general, an aura of authority and trustworthiness."

At the same time, most listeners tend to feel that the independent stations have more warmth, offer more fun and are closer to understanding the day-by-day needs of the local audience.

KPRC, the report continues, has an "exceptionally sharp image," is looked upon as "serious, expert, professional, conservative, dignified, rich, reputable, educational, 'high class'," and yet also is seen as "old-fashioned, less entertaining and less exciting than most other Houston stations."

Its commercials are considered by listeners to be "more reliable, more believable and more trustworthy than commercials of any other station in Houston." KPRC's network affiliation is regarded as promoting "the feeling that its commercials have exceptional authority and trustworthiness."

The station is "highly appreciated" and "accepted as completely authoritative in the areas of news, news commentary, educational programs, classical music—in all the intellectual and spiritual areas."

Listeners who prefer KPRC over other stations appear in many ways to fit the image pattern reported for the station itself: "Among the KPRC devotees we are likely to find a higher proportion of people from upper-level occupations, professions and social classes as well as a higher proportion of thought leaders, trend setters and community-active people... than among the audience of any other station."

The "typical" KPRC fan is described as "likely to be older than the major portion of listeners to other stations... unlikely to be in her 20's unless she has better than average education, occupational and economic status. He or she is least likely to be a teenager."

In another phase of the study the Institute found that 60% of the respondents agreed either "slightly" or "strongly" that "advertising on a network-owned station is dull, but more likely to be truthful and honest." By the same proportion, that was "slight" or "strong" agreement that "you are more likely to hear unreliable commercials on an independent station."

Regarding KPRC's ability to serve the "basic need constellations," the report finds that, "within the competitive climate," the station is "strongly positive" in meeting listeners' needs for orientation and focusing, their need to feel moral and the need for coping with intellectual and spiritual problems; "average" in gratifying the needs for emotional identification, relaxation, individualism, coping with everyday problems and emotional identification and companionship; "below average" in satisfying the need for a heightened sense of life, and "negative" in meeting the needs for escape and to express aggression ("except in terms of sports coverage").

The motivational study was authorized, officials explained, to determine the radio needs of the Houston market, to learn KPRC's relative strengths and weaknesses in meeting those needs, and to find signposts to further improvement. They said that as a result the first of a series of programming changes would start today (Jan. 3) with the addition of a new daily news staff, Monday to Friday in the 9-11 a.m. spot, the addition of Tommy Jerrell to the local news staff, addition of "Doc" Rhuman, a farm expert, to the farm department staff, and the introduction of additional features in the early morning and late afternoon Tim and Bob shows.

Although the report uses the term "network-owned station" as quoted in the foregoing paragraph, KPRC is not network owned, it is affiliated with NBC, but is owned by the "Houston Post."

Networks, AFM to talk

The American Federation of Musicians is scheduled to open negotiations with the radio-tv networks next week on a new contract to replace the current five-year pact that expires Jan. 31.

AFM is reported to be seeking one provision that would prohibit the making of recorded tracks in England, Germany, France and other foreign countries for use in network programming. It is understood the networks will press for the elimination of so-called "house" orchestras (on staff) in return for using a certain amount of live music in prime evening hours on tv.

BROADCASTING, January 5, 1959
THE NBC RADIO NETWORK

this month launched IMAGE RUSSIA. For four consecutive weeks, four nights a week, an hour-and-a-half each night, IMAGE RUSSIA is exploring every aspect of Soviet life. Listeners hear the actual voices of Russia’s leaders, of people who have traveled in the USSR. They visit the theatres, laboratories, labor camps. They hear from American Communists and from former Communists who fled Russia for the West. After a complete, objective, factual analysis, they will be able to draw informed conclusions of their own.

Through special broadcasts like IMAGE RUSSIA, and regularly-scheduled programs like NIGHTLINE, MONITOR, MEET THE PRESS, and the NATIONAL FARM AND HOME HOUR, NBC Radio keeps America informed. In 1958 alone, NBC audiences heard:

Secretary of Agriculture Benson on farm problems. Nehru on the 8th anniversary of the Indian Republic. Senator John Kennedy on education. Vice President Nixon on his South American trip. Ghana’s Prime Minister Nkrumah on the future of Africa’s newest country.

Only a radio network could offer public affairs coverage of such immediacy and magnitude.

For complete on-the-spot coverage, all year long, around the world, America turns to the stations of the NBC Radio Network.
CBS FLIPS PCP SWITCH TODAY

New radio plan gets 85% affiliate support

CBS Radio's new Program Consolidation Plan goes into effect today (Jan. 5), with network officials reporting notable acceptance by both affiliates and sponsors.

There was one new affiliate defection last week, however. WTAG Worcester, Mass., a basic affiliate since 1943, announced it was resigning because of PCP.

But President Arthur Hull Hayes said stations representing more than 85% of the network rate card—the minimum goal—had confirmed their acceptance of the plan, under which CBS Radio trims and regroups its programming and pays affiliates primarily in newscasts for local sale rather than in money (BROADCASTING, Nov. 3, 1958).

Sales Vice President John Karol asserted that new and expanded commitments totalling $4.4 million in net billings had been signed since PCP was announced two months ago. He said "it has become indisputably clear that [PCP] will continue to accelerate the addition of leading national advertisers to CBS Radio's sponsor roster."

Cancellation Notices • Officials said they were unable to estimate numerically how many of their 200 affiliates have signed for PCP. They confirmed, however, that the network sent cancellation notices to 13 affiliates who had indicated they would not clear network programming satisfactorily. They declined to identify the 13, asserting that one had since signed and explaining that they didn't want to make it more difficult, by naming names, for others to change their minds.

President Hayes said that "acceptance by some of the [unsigned] stations has been delayed by the unavailability of key executives at this season of the year. The few stations which may decide or have elected not to subscribe to the plan will continue to carry our programs under the terms of their existing affiliation contracts for a period of six months. During this period we will make affiliation agreements with other stations in these markets as replacements so that our advertisers may continue to receive complete nationwide coverage."

Network authorities also reported that allowances were being made for affiliates which could not clear the complete network schedule because of existing local commitments but which planned to clear as soon as these commitments could be rearranged.

WTAG's Herbert L. Krueger, vice president and general manager, announced his station's decision to disaffiliate, next June, last Wednesday after a WTAG board meeting. The letter of resignation to CBS was quoted:

"We consider the barter plan contrary to our concepts of responsible broadcasting. We feel we have no right to trade away control of the station's policies, programs or prices. We also have no desire to do so."

"Despite our regard for the personnel of the CBS organization and our respect for its accomplishments we do not feel that under the new plan WTAG could best live up to its responsibilities to its public or to its advertisers. Nor do we feel that the new plan advances the best interests of the broadcasting industry."

CBS Radio is known to have lost at least two other affiliates as a direct result of PCP. WJR Detroit blasted the plan, said it would disaffiliate next spring (BROADCASTING, Nov. 24, 1958) and WSAN Allentown switched to NBC (BROADCASTING, Dec. 15, 1958), effective yesterday (Jan. 4). Network officials said these are the only definite casualties to date.

New Contracts • Latest advertiser contracts, listed by Mr. Karol in an announcement being released today (Jan. 5), include Sterling Drug (through Thompson-Koch) for three 21/2-minute units of daytime serials a week for 13 weeks starting today; California Packing Corp. (McCann-Erickson, San Francisco), twenty 21/2-minute units of daytime dramas a week for seven weeks starting Jan. 12; Lever Bros.' Surf (BBDO), seven 21/2-minute units of daytime series for 13 weeks starting today and Lever's Dove toilet bar (Ogilvy, Benson & Mather), fourteen 21/2-minute units per week for two weeks starting today.

EDWARD J. NOBLE
Largest single owner of ABC stock, ABC officer

Edward J. Noble, chairman of the finance committee and largest single stockholder of American Broadcasting-Paramount Theatres, died Dec. 28 at his home in Greenwich, Conn., at the age of 76. He had been in poor health for more than a year.

Mr. Noble's career spanned industry, finance, public service and philanthropy as well as broadcasting. He was chairman of the board of Beechnut-Life Savers Inc. and at AB-PT was on the executive committee as well as chairman of the finance committee.

Mr. Noble merged ABC with United Paramount Theatres in 1953 to form AB-PT. He acquired the network in 1943 for $8 million. When the merger with UPT was completed, it was called a $25 million deal. He had bought the network—then called the Blue—from NBC, which was operating both the Blue and the Red Networks but was required by FCC’s chain broadcasting regulations to dispose of one.

Stock Holdings • At his death Mr. Noble owned approximately 75% of the preferred and 8% of the common stock of AB-PT. Much of his holdings, especially in common stock, was in the name of the Edward John Noble Foundation, which he founded in 1940 and which has made many substantial contributions for educational, religious and charitable purposes. Mr. Noble and Earl E. Anderson, vice president and secretary of Beechnut-Life Savers and also on the AB-PT board, were trustees of the foundation.

When he bought the Blue Network, re-named ABC in 1944, Mr. Noble said that especially in broadcasting "serving the public interest, convenience and necessity is not just a phase," but "an obligation and a duty." Under his stewardship, during which he served as board chairman, ABC never paid a dividend and he never received a salary.

He had entered the radio ownership ranks in 1941 by acquiring WMCA New York. He sold it when he bought ABC.

Built Life Savers • With a partner, he bought the Life Saver mint candy property from a Cleveland manufacturer in 1913 and built it into a multi-million-dollar business. It was merged with Beechnut Packing Co. in 1956.

Mr. Noble was born Aug. 8, 1882, in Gouverneur, N.Y., and received his A.B. from Yale in 1905. He held honorary LL.D. degrees from St. Lawrence U. (1939) and Syracuse U. (1955).

Mr. Noble: "Serve public interest"
N.Y. MEDIA FIGHT
It gets hot as radio-tv dispute paper claims

The traditional broadcast vs. print media battle is destined to get hotter following settlement Dec. 28 of the 19-day old New York newspaper publishers' strike, it was learned last week.

With New York's nine dailies resuming publication last Monday, the publishers said they had lost some $25 million in combined circulation and advertising revenue ($17 million due to advertising, $8 million in circulation). To underscore their plight, the newspaper faction quoted statistics compiled by such diverse organizations as the New York City Dept. of Commerce, the Federal Reserve Board and executives of leading department stores that indicated a $10 million drop in retail sales during the strike period.

These claims were challenged promptly by officials of both the Radio Advertising Bureau and the Television Bureau of Advertising. The trade associations were working overtime last week assembling what one RAB executive termed an "arsenal of fact." The first shot won't be fired for some time yet. RAB and TVB both are priming their ammunition before squeezing the trigger. But this much was indicated:

The RAB Position • RAB "shortly" will produce one of its biggest mailings—a four-page newsletter that will analyze the effects of the strike. RAB member stations will distribute them among retailers in their respective areas. It will accuse the newspaper industry of attempting to exaggerate the effect of the strike by saying that many major New York advertisers did better this Christmas than the year before—and without spending a penny in newspapers.

The RAB newsletter further will say—it's understood—that the important question is not how much higher sales were this Yuletide than last, but that newspapers are not indispensable in selling merchandise that in normal times is promoted 100% in newspapers. Citing the results of newspaper strikes in Pittsburgh (1950), Tacoma (1952), New York (1953) and Detroit (1956), the RAB-Philadelphia analysis concluded: "Each time the results have been the same; a dramatic demonstration that the absence of newspapers is by no means crippling—even when the advertising dollars in this form of customer communication."

The TVB Position • TVB as of last week hadn't yet made up its mind how to most effectively make use of its storehouse of facts and figures, whether to answer through an official statement by TVB President Norman E. Cash or a mailing similar to RAB's. But TVB's analysis shows that:

Store volume increased in the city proper from 3-5% during the Dec. 1-24 period and these increases were dwarfed by the boom in the suburbs—an extension of a national trend. Though the strike began Dec. 9, the newspaper and advertising blackout did not set in until Dec. 11. Yet, during that peak buying period—when most retail ads would have been placed—TVB found suburban store sales brought total dollar volume for the Greater New York area up 7-9% over a similar 1957 period.

In citing the Federal Reserve Board's claim that department store sales in New York were up 6% for the week ending Dec. 13 but down 3% the following week, TVB warned against the "variables" in this week-to-week comparison. For example, said TVB, the second week of December 1957 saw New Yorkers stripped of subway transportation; yet the "pent-up buying power skyrocketed the following week's business 15% in the New York area."

This, contends TVB, means that while department store may be "down 3%" they are down 3% from an abnormal 1957 high of plus 15—in short—they weren't down at all.

The Fairchild Index • TVB makes liberal use of the findings of the Fairchild index of retail buying power. It is issued by Fairchild Publications, which publishes Women's Wear Daily and other print-slanted and retail-oriented newspapers and magazines.

Findings for the week ended Dec. 27 (day before the end of the strike) show that retail sales on a national level (17 major cities reporting) tie New York with San Francisco in second place, with sales up 27% in both cities. Lead in retail was Philadelphia with a 29% gain; third was Detroit with a 21% gain, followed by Chicago, Cleveland, Minneapolis-St. Paul and Los Angeles as the top retail markets.

Asks Women's Wear Daily in its news columns: Isn't it necessary to re-evaluate the quantity of newspaper advertising during the Christmas season?

More RTDG talks

The two-year contract between the Radio & Television Directors Guild and ABC, NBC and CBS expired Wednesday (Dec. 31) but the deadline for negotiations was extended to Jan. 14. Talks have been held since Dec. 4 [BROADCASTING, Dec. 8, 1958] but "scant progress" has been achieved to date. RTDG is said to be stressing provisions in a new contract that would prevent possible unemployment resulting from increasing use of videotaped programs and commercials.

New AFTRA pact set for L.A. & 80 outlets

Staff announcers with a year's seniority at network owned and operated stations in Los Angeles will receive an increase in minimum pay from $155 to $170 a week under a new contract reached last week between the stations and the Los Angeles chapter of American Federation of Radio-Television Artists. Pay for beginning staff announcers rises to $155.50 a week under the two-year pact. It is retroactive to Nov. 16, 1958, and runs through Nov. 15, 1960, AFTRA reported.

Agreement covers AFTRA members at three radio stations—KABC (ABC), KNX (CBS) and KJH (Don Lee-Mutual)—and three tv stations—KABC-TV (ABC), KNXT (TV) (CBS) and KRCA (TV) (NBC). No distinction is made between announcers at radio or at tv stations in the agreement, which raises in-shift commercial fees by 10% and in-shift participation program fees by 5%.

Freelance minimum fees are increased from $66 to $70 for a one-hour program, with freelance rates for out-of-town getting a 10% increase. Staff announcers are to be paid freelance scale for work done out of shift. Announcers will also get a 10% premium for working in the midnight-to-6 a.m. period.

For taped programs, either audio or video, a staff announcer taping programs out-of-town will receive no extra payment, provided another staff announcer is assigned to the show at the time of the broadcast. If the show is broadcast on the announcer's day off, however, he is to be paid either his freelance or contract rate.

AFTRA's insistence that a standby announcer be assigned to any program taped by a staff announcer who is not on duty at the time of broadcast, although accepted by the network-owned stations, has been vigorously opposed by the four independent stations in Los Angeles—KCO-P (TV), KJH-TV, KTLA (TV) and KTTV (TV). Their position, as presented by Harry Warner, counsel for KTLA, is that this is featherbedding and a violation of the Lea Act. Negotiations are continuing between these stations and AFTRA, but with little progress toward an agreement reported.

Reruns of taped programs at the o&o Los Angeles stations are to carry fees of 75% of the original each for the second and third broadcasts, 50% for the fourth, fifth and sixth performances and 10% for all further plays. For syndicated taped programs a similar scale goes into effect.
Thanks to you, our viewers and sponsors ABC is still the No.1

And ABC is the only network... whose evening ratings are up

And in the daytime?  ABC-TV's ratings for the 7th and 8th Daybreak are up 30% over the pre

vious Nielsen Report.**  ABC TELEVISION
ANNOUNCED

The following sales of station interests were announced last week. All are subject to FCC approval.

- KSAL Salina, Kan.: Sold to James Stuart by KSAL Inc. for $350,000. KSAL Inc. is owned by John P. and the estate of Sidney Harris, owners of six newspapers and KIUL Garden City, Kan. Mr. Stuart also owns KFOR Lincoln and KRGJ Grand Island, both Nebraska, and KMNS Sioux City, Iowa. The sale was handled by Blackburn & Co. KSAL is on 1150 kc with 5 kw, directional antenna night, and is affiliated with MBS.

- WKTV (TV) Utica and WKAL Rome, both New York: Sold to Mid-New York Broadcasting Corp. by Myron J. Kallet and others for $4 million plus employment of W. T. MacNeilly, one of the partners, as a consultant at $30,000 per year for at least 10 years and agreement to purchase certain real estate for $100,000. Gordon Gray is president of transferee corporation, majority stock of which is held by Paul F. Harron and wife. Transferee officials have interests in WORL Boston, WALL Middletown, N.Y., WSPB Sarasota, Fla., WGR-AM-TV Buffalo, N.Y., WROC-TV Rochester, N.Y.; and the corporation is 60% owner of WSVA-AM-FM-TV Harrisonburg, Va., and half owner of WNEP-TV Scranton, Pa. WKTV (TV) is on ch. 2 and has a primary NBC affiliation. WKAL is on 1450 kc with 250 w and is affiliated with MBS.

- KFRE-AM-TV, KFRM (FM) Fresno, Calif.: Sold to Triangle Publications by Paul R. Bartlett and others for $3 million. This grant is conditioned to action the Commission might take in ch. 12 Fresno rule making proceedings. It was made without prejudice to any action arising out of the Network Study Staff report. Triangle owns: WNHC-AM-FM-TV New Haven, Conn., WNBF-AM-FM-TV Binghamton, N.Y., WFLF-AM-FM-TV Philadelphia, WFBG-AM-FM-TV Altoona, Pa., and WLYH-TV Lebanon, Pa. Comr. Robert Bartley abstained from voting in this decision. The sale was handled by Howard Stark. KFRE-TV is on ch. 12 and is affiliated with CBS-TV. KFRE is on 940 kc with 50 kw, directional antenna different pattern day and night and is affiliated with CBS. KFRM (FM) is on 93.7 mc with 68 kw.

- WVIP Mt. Kisco, and WNRC-AMFM New Rochelle, N.Y.: WVIP sold by Martin Stone and E. Monroe O'Flynn and WNRC-AM-FM sold by Martin Stone to VP Radio Inc. (Martin Stone, president) for an aggregate amount of $325,000. VIP Radio Inc. is 50% owned by Plymouth Rock Publications. Plymouth Rock is in turn owned by multiple owner John H. Whitney. Conr. Robert Bartley did not participate in this decision. WVIP is on 1310 kc with 1 kw, directional antenna day. WNRC is on 1460 kc with 500 w, day. WNRC-FM is on 93.5 mc with 1 kw.

- KIDO Boise, Idaho: Sold to Mesabi Western Corp. (William E. Boege Jr., president, owner of KWLK Longview, Wash.) by KIDO Inc. for $181,000. KIDO is on 630 kc with 5 kw, directional antenna different pattern day and night, and is affiliated with NBC.

- WCMB-AM-TV Harrisburg, Pa.: Sold to Hudson Broadcasting Corp. (James A. McKenna Jr., president, has interest in KEVE Minneapolis, Minn.) by Edgar T. Shepard (Rossmyone Corp.) for $160,000. Also, at the election of Shepard, Rossmyone Corp. will pay him $10,000 over a five year period as consultant and $37,500 over the same period to compete. WCMB-TV is on ch. 71. WCMB is on 1460 kc with 5 kw, directional antenna different pattern day and night and is affiliated with MBS.

- WEZL Richmond, Va.: Sold to WEZL Inc. (Ben Strouse, Samuel E. Feldman and Leon B. Back) by William E. Benns Jr. and Barbara Benns for $111,000. Mr. Strouse has interests in WEBB Baltimore, WWDC-AM-FM Washington, D.C., and WMBR-AM-FM TV Jacksonville, Fla. WEZL is on 1590 kc with 3 kw, day.

- WBUZ Fredonia, N.Y.: Sold to Dun-kirk-Fredonia Broadcasting Inc. (H. K. Williams III, president) by Louis W. Skelly for $67,500. Comr. Robert Bart-ley dissented, asking for clarification of this grant's position in the Commission's diversification policy. WBUZ is on 1570 kc with 250 w, day.

MIDWEST

Daytimer making excellent profit. One station market. Owns good real estate. 29% down balance on easy terms.

NORTHWEST

Booming market. Fulltime facility on low frequency. Only station in city. Grossing over $100,000 annually. 50% interest and attractive management contract available to owner-manager for $20,-000 cash.

FLORIDA

Powerful regional facility in a major Florida market. Reasonable down payment and flexible terms depending on buyer's qualifications.

CAPITOL HILL FORECAST: STORMIER

86th Congress will probably stir up record radio-tv activity

Still on rubbery legs from the rigors of the last session of Congress, broadcasters and the FCC face no respite as the 86th Congress prepares to open. In fact, indications are that an even more radio-tv-minded Capitol Hill will be primed to top the 85th Congress when all existing records for industry investigations and hearings were broken.

There probably will be one big difference in the old and new Congresses: A majority of the industry hearings may be concentrated in Sen. Warren Magnuson's (D-Wash.) Senate Commerce Committee in a shift from Rep. Oren Harris' (D-Ark.) Legislative Oversight Subcommittee.

A major action after week of hearings held in 1958 involving the FCC and/or broadcasters—and over 150 industry bills were introduced—not a single major piece of legislation was passed. While the 85th Congress failed to turn its talk into action, current congressional temperament is such that several important changes in the Communications Act are freely predicted.

Leaders of both houses have stated privately and publicly that the ills turned up by Rep. Harris' investigations must be cured through legislation.

The tv industry will continue to bear the brunt of attack after attack from members of Congress. And, as a result, the public will continue to foot the bill for investigations of everything from television ratings to a possible death of the FCC. According to a Broadcasting estimate (Broadcasting, March 17, 1958), the cost to the government went as high as $12,000 for just one day's session of last year's lengthy House investigations.

Starting point for the Senate probably will be New York hearings on tv ratings, with the FCC to be placed on the carpet soon afterward for questioning on what it has or has not done to solve the allocations problem.

Rep. Harris has promised January hearings by his House Commerce Committee on pay tv (also a lead-off subject in 1958). The committee also will have for early action recommendations made in the report of its Oversight Subcommittee (see story, page 31).

Listed below are Senate and House committees which will be active with broadcasting legislation during 1959. In addition, several other committees will receive bills for consideration which will include provisions affecting radio-tv. All bills introduced in the 85th Congress are dead and must be submitted again to receive further consideration.

Senate Interstate & Foreign Commerce Committee • Chairman Magnuson, in private conversations, has outlined a busy schedule for radio-tv and FCC matters during the first session of the 86th Congress. Under the gun, but not necessarily in the order of importance: allocations, tv ratings, corrective FCC legislation, community television-translators-boosters, spectrum study, pay tv, financial aid to educational tv, direct regulation of networks, advertising of alcoholic beverages, and Barrow recommendations.

It is an open secret that individual members of the committee are displeased with the FCC for not taking a positive step in solving the allocations problem. The committee repeatedly has asked for a Commission report on progress in allocations. The FCC each time has begged off replying until it receives the Television Allocations Study Organization report—now due.

Reports two weeks ago (Closed Circuit, Dec. 22, 1958) had the FCC no nearer an allocations solution—or agreement on what course to pursue—than it was when the freeze was lifted in 1952. On this point, the Commission received a verbal lashing last spring from Sen. John Pastore (D-R.I.) and other committee members.

A spokesman at the FCC last week said the commissioners have wrestled with the allocations situation "time and time again." He said the Commission is in a "position" to send something to the committee but did not indicate if any definite steps or planned action would be included.

Committee Plan • The Committee will have an allocations report of its own for consideration. Special counsel Kenneth Cox is scheduled to submit his conclusions and recommendations in the near future. Mr. Cox also is to file a report, prior to the allocations study, on CATV and tv service to sparsely-populated areas.

This is a pet project of many members of Congress from the Northwest, whose states rely on CATV or some other means for tv service. Several have demanded that the FCC authorize boosters on vhf channels and legalize current outlawed operations under Commission rules. Several bills of this nature, unless the FCC takes prior positive action, are sure to be introduced.

The Commission consistently has maintained it has no authority over CATV. Counsel Cox, it is believed, will take the opposite view in his report. He believes the Commission has jurisdiction through that part of the Communications Act giving the FCC authority to explore and develop new developments in communications. It is this section the FCC has cited to Congress in claiming it cannot authorize pay tv.

Barrow Report • Sen. Magnuson said the committee also still is awaiting FCC recommendations on the Barrow report—which has been hanging fire for 18 months. In previous appearances before the committee, the Commission has refused to comment on recommendations made in the Barrow report, but promised to take a stand "no later than January 1959."

On the proposed spectrum study, Sen. Magnuson said: "I still think that we have to take a look at that spectrum." He indicated this would be one of the first items to be considered by the committee and that some changes would be necessary in the bill passed...
New arena for livelier acts • When FCC and radio-tv spokesmen are called before the Senate Commerce Committee this year, they will have a big, new hearing room in which to testify. The committee has moved from its cramped quarters on the gallery floor of the Capitol to Room 5108 of the New Senate Office Bldg. The telephone remains the same: Capitol 4-3121, Ext. 5115. Planning seating arrangements for the new committee room, which will feature a public address system, are Ed Jarrett (l), the committee’s chief clerk, and Nick Zapple, communications expert.

last summer by the Senate. It was introduced by Sen. Charles Potter (R-Mich.), who was defeated for re-election. He said the committee would discuss the spectrum proposal with the House before any measure is approved.

Sen. Magnuson thought the report of the President’s special committee would not negate the necessity for a study but would be a starting point for Congress. President Eisenhower appointed a five-man committee in November (Broadcasting, Nov. 24, 1958) “to review the role of the federal government in the management of telecommunications.”

Commission Correctives • And, some type of corrective FCC legislation is almost sure to come from the committee following hearings on the subject. “We’ve just got to have some kind of bill on these commissions [FCC as well as others],” Sen. Magnuson said. He said the Senate undoubtedly would receive many bills on ex parte contacts, code of ethics, improper pressures, term of office of commissioners and appointment of chairman and other matters brought up by Oversight hearings.

Still active in committee files, and due for consideration according to Sen. Magnuson, is a “ripper” bill abolishing the FCC. It was drafted last spring but was never introduced. The Washington Democrat said this bill and all the others introduced will be explored in public hearings. The committee then will report out a measure combining the desired features of all those under consideration, he said. Actually many of the bills on influence, ex parte contacts, etc., will be referred to other committees such as Judiciary.

Sen. Mike Monroney (D-Okla.), a member of the Commerce Committee and its Communications Subcommittee, said he thought the Senate should wait and let the House make the first step in corrective FCC legislation. Citing the Oversight Subcommittee, he pointed out it has carried the ball in the past and should be allowed to do so in the future. However, he said there is without doubt a need for corrective legislation.

The committee several weeks ago announced January hearings in New York on tv rating services. For most of the past year, this has been a one-man crusade by Sen. Monroney but of late Sen. Magnuson also has become interested. In fact, the hearings originally were scheduled for December but were postponed because both senators could not be present.

Rating Impact • A one-day session on ratings was held last spring with presidents of five rating services testifying. At the New York hearings, the network presidents and others such as former NBC president Pat Weaver will be witnesses. “We can’t legislate against tv ratings but we owe it to the public to point out the effect of ratings on programming,” Sen. Magnuson said. The public should know just how the ratings are used in determining programming and the size and accuracy of samples, he stated.

Sen. Monroney is working for an industry-wide agreement on the type of base to be used in ratings. He has been a critic of the alleged “life and death” hold ratings maintain over programming for over a year. “Are ratings the Ten Commandments for programming?” he asked.

For the past two Congresses, Sen. John W. Bricker (R-Ohio) has authored a network regulation bill. A former chairman of the Commerce Committee, he was defeated for re-election and will not be a member of the 86th Congress—but his network regulation bill in some form probably will be.

Sen. Paul Douglas (D-Ill.) has stated that he is considering some sort of network regulation bill if the FCC does not take what he would consider to be a favorable action in the APTRA-NBC fight over the alleged cutback of locally-originated programming on the network’s WNBQ (TV) Chicago. Sen. Douglas, the union and several Illinois congressmen have protested to the FCC, as well as NBC.

“Tyranny” Hit • A protest also has gone to Sen. Magnuson’s committee and he has promised to look into the matter during the new Congress. Sen. Monroney did not indicate he is in favor of FCC regulation of the networks but charged the networks are encroaching more and more on local station time. This, he said, confines local advertisers to station breaks in telling their sales stories and results in a “tyranny of national over local interests. This results in sterile programs which reflect only the time-worn script ideas which originate in Hollywood and New York,” Sen. Monroney stated.

Sen. Magnuson said he expects the committee to receive several bills against pay tv and “I suppose we will have hearings.” Sen. Strom Thurmond (D-S.C.), committee member, was one of the chief Senate pay tv foes in the past Congress and introduced both a bill and resolution banning this method. The distilling industry received a pat on the back from Sen. Magnuson for refusing to buy radio-tv time. He said...
liquor advertising on radio and TV would give drunks a stronger arguing point in their campaign to ban advertising alcoholic beverages in interstate commerce.

The chairman predicted Senate approval early in the year on his bill, to be re-introduced, granting each state up to $1 million for TV. The bill was approved by the Senate last spring but died in the House Commerce Committee.

Power Balance • During the past Congress, there were eight Democratic and seven Republican members of the Commerce Committee. With the heavy influx of new Democratic senators, the party in power is expected to get 10 of the 15 committee seats. All Democratic committee members are returning (leaving two vacancies), while four of the seven Republican members (the other three were not up for re-election) were defeated, also leaving two seats open.

Sen. Pastore, as chairman of the Communications Subcommittee, during last winter and spring sat for lengthy hearings on a bill which would prevent networks and stations from owning TV. Sen. Pastore has sent the hearing record to both Justice and FCC for comment and neither, as yet, has replied. However, the bill was attacked openly by Sen. Pastore and Sen. George Smathers (D-Fla.) stated he has no present plans to reintroduce it.

Senators-elect Clair Engle (D-Calif.), Frank E. Moss (D-Utah) and Howard W. Cannon (D-Nev.) are known to be seeking the two seats open to their party on the committee. Sen. Magnuson said that Sen. Engle, who moves over from the House, has first priority because of his service in the lower body (although he was not a member of the House Commerce Committee). The chairman also said he would like to have Sen. Moss on the committee. The chances of Sen. Cannon are considered slim since Sen. Alan Bible (D-Nev.) already is a member.

Sen. Andrew Schoeppe (R-Kan.) will move up to ranking minority member, replacing Sen. Bricker. He said there had been no discussions as to what Republicans would be assigned to the two committee vacancies. John M. McIntyre, Sen. Bricker's administrative assistant, will replace Bert Wissman as minority clerk of the committee [CLOSED CIRCUIT, Dec. 22, 1958]. Mr. Wissman will remain on the committee's professional staff.

Subcommittee on Legislative Oversight of House Commerce Committee • This investigatory body expressed FCC and broadcasting claims during 1958 hearings which began in February and continued sporadically through December. The committee's past has been a stormy one—both internally and externally—and its future is up to the new Congress.

The subcommittee was established in March 1957 with a $250,000 appropriation to determine if federal regulatory agencies are carrying out their duties as Congress intended. The House appropriated an extra $60,000 last August for its use during adjournment.

Meeting in Washington last week to draft their final report (see page 31), the members recommended that the investigative body be continued during the 86th Congress.

Whether the scope of 1959 investigations will be the same as those in 1958 remains to be seen. However, members returning to the new Congress have publicly stated the subcommittee has only scratched the surface in its planned investigations. It will be necessary for the full House to approve the subcommittee's continuance. While there will be opposition from individual members of Congress, the House is expected to go along with the subcommittee's own recommendations.

There has been some talk of disbanding the Oversight Subcommittee as such and continuing its work under an existing Commerce Committee subcommittee. Rep. Harris in the past has recommended this course.

Broad Impact • Work of the subcommittee has had far-reaching effects on the FCC in particular and the broadcasting industry in general. The courts have returned TV cases to the Commission as a result of testimony before the subcommittee and the FCC has opened others on its own motions.

The subcommittee thoroughly aired the Miami ch. 8 question. As a result, then Comr. Richard A. Mack resigned, the record was re-opened and the FCC now has before it a special examiner's recommendation that the grant to National Airlines be revoked. Also coming under subcommittee scrutiny in public hearings were TV grants in Boston (ch. 5), re-opened by the FCC; Pittsburgh (ch. 4), and the shift of ch. 2 from Springfield, Ill., to St. Louis. Several other cases were mentioned in subcommittee proceedings — and many others (over 30)—were investigated but no full hearings were held.

Most of the charges before the congressional body concerned improper pressure against the FCC, ex parte contacts between commissioners and litigants, gifts to commissioners and unauthorized disclosure of FCC actions.

Rep. Morgan Moulder (D-Mo.) started 1958 chairman of the subcommittee. He "resigned" in February soon after the chief counsel, Bernard Schwartz, had been fired as the aftermath of a bitter and well-publicized fight with the subcommittee members. Rep. Harris replaced Rep. Moulder as chairman. Rep. Moulder remained on the committee. Other Democratic members are Reps. John Bell Williams (Miss.), John Moss (Calif.), Peter F. Mack (II) and John J. Flynn (Ga.).

House Commerce Committee • If Sen. Harris sticks to announced plans, the first 1959 performance of this body will be a repeat of January 1958 hearings on pay TV. Last summer, Rep. Harris prevailed on the FCC to withhold approval of a toll test until the 86th Congress could take action. That time, he promised hearings early in January and the FCC agreed not to act until the new Congress adjourns its first session the following summer.

In preparing for the hearings, Rep. Harris last fall queried professional football and baseball teams and pay TV proponents on TV contracts or plans had been formulated. The congressman has received replies but they weren't revealed.

Rep. Harris, and many other members of his committee, are outspoken foes of pay TV. Observers, therefore, believe the committee will report out a bill early in the session banning any form of over-the-air pay TV.

It has not been announced whether the full committee or the Communications Subcommittee, also headed by Rep. Harris, will sit for the pay TV hearings. After the sessions a year ago on the same subject, Rep. Harris stated privately that there would be no more hearings conducted by the full committee because of its size, 33 members.

It is felt with 33 interrogators, the proceedings get out of hand and the chairman loses control.

Spectrum Study • Another major broadcast item facing the committee will be the formation of a special commission to make a spectrum study—a controversial issue in the latter stages of the 85th Congress. The Commerce Committee last August approved a White House-amended version of the Senate-passed Potter bill which immediately ran into stiff opposition from broadcasters. The bill was scheduled for full House consideration the last week of the 86th Congress but was withdrawn when the unexpected opposition arose.

In the Senate, Magnuson, Rep. Harris has stated that such a study is necessary. However, the first move during the new Congress probably will be made by the Senate. Rep. William Bray (R-Ind.), author of a spectrum study measure in the past Congress, said last

Nielsen, Oct.'57 thru Apr.'58
"I read Ad Age religiously"

says DONALD R. KEOUGH
Director of Advertising
Paxton and Gallagher Co.

"For my money, Advertising Age gives more advertising news, more currently, than any other publication I read. Anyone in the coffee business knows with what dazzling rapidity deals are introduced, new promotions originated, etc. In this wheeling-dealing business, we frequently pick up competitive information from Ad Age almost as fast as our own sales force reports it to us. Of course, I read Ad Age religiously."

Time after time, admen freely tell us they never miss an issue of Advertising Age because it brings them "more advertising news, more currently." What's more, they value the penetrating analyses of trends, and file (for repeated reference) the special roundups and surveys. That's why, when it comes to reaching most of the executives of importance to you—those who influence as well as those who activate major broadcasting decisions—you can count on Ad Age.

The Paxton and Gallagher Co., for example, has found broadcast media effective in telling their Butter-Nut coffee story. Many of the firm's radio franchises have run continuously for more than twenty years, and a major portion of this coffee concern's ad budget is allotted to television. Expenditures for spot tv alone topped $811,000 during 1957.*

Every Monday, 7 paid-subscription copies of Ad Age bring the news, trends and developments of marketing to Paxton and Gallagher and its agency, the Buchanan-Thomas Advertising Co.

Add to this AA's more than 42,000 paid circulation, its tremendous penetration of advertising with a weekly paid circulation currently reaching over 12,500 agency people alone, its intense readership by top executives in national advertising companies—and you'll recognize in Ad Age a most influential medium for swinging broadcast decisions your way.

DONALD R. KEOUGH
Mr. Keough has served the Paxton and Gallagher Co. in both sales and advertising. Starting in 1950, he managed the display department for two years, after which he became assistant sales and advertising manager for the Omaha coffee concern. He was advanced to his present position in November, 1957. Under Mr. Keough's advertising management, Paxton and Gallagher has had remarkable success with the use of humor in radio commercials for its new Instant Butter-Nut coffee. More than 1,000,000 jars were sold after five weeks of the light approach in commercials introducing this product.

Away from guiding advertising campaigns, Mr. Keough is a family man who devotes much of his leisure time to civic organizations and service clubs. Among his community interests are the Red Cross Blood Program, the South Omaha Youth Center and the Serra Club, which fosters the entrance of young men into the Catholic priesthood.
Legal & Monetary Affairs Subcommittee of House Government Operations Committee • This eight-member investigative body, headed by Rep. John Blatnik (D-Minn.), will bear watching by broadcasters during the 86th Congress. Not generally known is the fact that the Blatnik group was poised to launch an all-encompassing investigation of the FCC prior to formation of the Oversight Subcommittee.

Preliminary work already had been done along this line but the subcommittee bowed out in favor of the Harris subcommittee. And now, with the future of Legislative Oversight in doubt, the Legal & Monetary unit again is prepared to carry the ball.

Advertising Probes • During the past two years, the subcommittee devoted a good deal of its time to false and misleading advertising. Last summer, it issued three separate reports severely chasting the FTC for its alleged failure to crack down on advertising claims of weight-reducing, tranquilizer and dentifrice manufacturers (Broadcasting, Aug. 25 & 18, 1958).

Antitrust Subcommittee of House Judiciary Committee • When the Second Session of the 86th Congress convened a year ago, this body was awaiting action by the FCC and Justice Dept. on recommendations made in the Barrow report and the subcommittee's own Celler report (Broadcasting, June 10, 1957). Presumably the subcommittee still is waiting because neither body has taken any positive steps on either report.

The subcommittee made some strong recommendations of its own, especially on network option time and must-buy practices, 18 months ago, none of which have been carried out—or for that matter, turned down—by the FCC. Rep. Celler, chairman, has made no statement on any planned action.

Again this year, the subcommittee will be asked to deal with legislation exempting professional sports from antitrust law.

Sports Supporters • An amendment removing language in the Celler bill which called for exemption of those phases of professional sports "reason- able and necessary" only was pushed through on the House floor by Reps. Francis Walter (D-Pa.), Kenneth Keating (R-N.Y.) and others. A staff report released today (Jan. 5) by the subcommittee includes a draft of a proposed across-the-board code of ethics for former and current government officials (see page 60).

Broadcasters were actively against the measure as it passed the House.

The subcommittee plans early hearings on conflict-of-interest proposals as related to Title 18 of the U.S. Code.
Travel Notes • During a fall trip to Europe, Rep. Celler took a careful look at that continent's television operations (CQ, Nov. 23, 1958). The chairman long has been a critic of certain network operations, but came back singing the praises of this country's overall system. The subcommittee staff currently is digesting information compiled on the trip.

Rep. Celler, personally, is expected to continue his all-out fight against pay TV. He was one of the first members of Congress to take a public stand against it.

All members of the subcommittee except Rep. Keating, who was elected to the Senate, were re-elected. The current make-up consists of four Democrats and three Republicans and there has been no word as to whether this ratio will be changed. Rep. William M. McCulloch (R-Ohio) moves up to ranking minority member, replacing Rep. Keating.

Antitrust Subcommittee of Senate Judiciary Committee • Headed by Sen. Estes Kefauver (D-Tenn.), this body effectively stopped last summer's steamroller on behalf of the sports antitrust exemption. The subcommittee held a month of hearings and in early August tabled the bill passed by the House (Broadcasting, Aug. 4, 1958). The reason given was that senators were not satisfied with the Celler bill and there was not enough time to draft a substitute.

Sen. Thomas Huddings (D-Mo.), member of the subcommittee and author of S 4070 (companion to the Celler bill), is undecided on whether to reintroduce his measure. A subcommittee spokesman stated last week there would be no definite plans for continuing the sports hearings until after the new committee had been formed. It was his belief the Senate body should wait until the House again has acted on a sports bill. He made it plain a majority of the senators did not favor an exemption, including a possible radio-television blackout, such as contained in the bill that died with the end of the 86th Congress.

He said the baseball people should compromise with opponents of last year's measure. "They wanted to be above the law," he said. "Are they willing to come down from that position?"

It has been reported that Sen-elect Keating plans to re-introduce a sports measure. All members of the committee will return for the 86th Congress which makes it doubtful if Sen. Keating will be seated on Judiciary.

The parent Judiciary Committee, headed by Sen. James Eastland (D-Miss.), undoubtedly will receive several bills on reforms in government agencies, including the FCC. A spokesman said hearings on such measures would have to be planned as the bills are received.

House Rules Committee • Observers are predicting that one of the first intramural fights in the new House will be an effort to curb the power of the chairman of the Rules Committee. The charge has frequently been made in the past that any legislation the chairman, Rep. Howard Smith (D-Va.), does not favor will not stand a chance of clearing the Rules Committee to be placed on the House agenda.

A move currently is underway to restore the 21-day rule, thrown out by a Democratic-controlled House in 1951, removal of the a.m.-on all-ed up in the Rules Committee for 21 days to be considered on the floor on the motion of a chairman or ranking minority member of the committee which has jurisdiction.

The committee undoubtedly will be asked to consider bills which would remove House Rules Rep. Henry Rayburn's (D-Tex.) ban on radio-television camera coverage of House proceedings and committee meetings. Four such measures were introduced in the past Congress. None of them ever saw the light of day.

Excise Taxes Subcommittee of House Ways & Means Committee • As in the past Congress, this subcommittee undoubtedly will be faced with several bills designed to remove or reduce the 10% excise tax on radio and television sets. Of 14 such measures pending last August, a majority placed emphasis on removal of the a.m.-on all-ed up in the bill.

Heavy pressures were brought to bear during the last two years on behalf of removal of the uhf tax, but, despite a reported favorable climate 13 months ago, the measure did not get out of committee. Those urging repeal of the uhf tax were the chairmen of the Senate and House Commerce Committees.

Rep. Wilbur Mills (D-Ark.), chairman of the full committee, announced Dec. 11 that no plans would be formulated until after the new Congress has been organized. Rep. Aime Forand (D-R.I.) is chairman of the Excise Taxes Subcommittee.

Senate Constitutional Rights Subcommittee of Judiciary Committee • Chairman Thomas Huddings (D-Mo.) has announced the subcommittee will hold hearings this month on the public's right to information in government files. Sen. Huddings feels that HR 2767, which was approved by the 85th Congress and signed into law by the President (Broadcasting, Aug. 18, 1958), does not plug the loopholes available to government "bureaucrats" seeking to withhold information.

Just a fortnight ago, Sen. Huddings charged that President Eisenhower lent his support to a "startling and dangerous" belief that government officials are free to withhold information the public should have. He stated, writing in the Federal Bar Journal, that the President subscribed to this theory in signing HR 2767, introduced by Rep. John Moss (D-Calif.). The bill amends a 1798 "bureaucrats" statute to prevent its use as the basis for withholding information.

The Missouri Democrat, during the 85th Congress, introduced his own freedom of information bill. S 921, which will be the basis for the new hearings. News-gathering media were strong in their support of the Moss bill, but its effect on government secrecy is somewhat dubious. There still are some 80 statutes on the books which authorize secrecy of one kind or another.

FCC HITS BOOSTERS
No new ones; old ones have to go in 90 days

The FCC last week served notice it will prosecute the operators of uhf tv boosters which go on the air now on. The Commission said it also will take legal steps to halt operation of uhf boosters now on the air if they don't indicate within 90 days their intention to convert to uhf translators or some other type of authorized tv station.

The Commission ordered a halt to uhf booster operation after dismissing a petition by the governor of Colorado for reconsideration of the FCC's June 1957 order which rejected proposals for authorization of uhf boosters and terminated rulemaking which proposed uhf and uhf "repeater" operation.

Comr. T.A.M. Craven issued a separate statement disagreeing with the majority except for the provision to defer action against uhf booster operators. He said he felt the FCC "can and should establish reasonable rules providing for the authorization of uhf boosters on a practical basis." Comr. John S. Cross concurred in the FCC decision, but said he feels the Commission should have adopted an alternative course, suggested by him, which would have authorized existing uhf boosters to continue for two to three years if they meet "certain specified technical conditions designed to prevent interference with uhf operations." He called his plan "a more reasonable period of time for a change-over."

Waiting Legal Backing • The FCC said it has withheld action to compel the unlicensed uhf boosters to cease operation pending litigation, "in which it has now been determined that the emanations from these types of stations..."
MORE HILL CENSURE FOR FCC

Report by House Antitrust Subcommittee points finger at FCC on ethics question

The House Antitrust Subcommittee today (Jan. 5) is releasing its second staff study on conflict of interest legislation. And as has been the case frequently in recent congressional reports, the FCC again takes a rap on the knuckles.

In strongly recommending a code of ethics for all executive employees, the report specifically cites the FCC, saying: "It is regrettable that legislative prodding should still be necessary to induce this agency to adopt a code of ethics."

The report, in three parts, deals with (1) more than 50 conflict-of-interest and code bills introduced in the 85th Congress, (2) a detailed study and analysis of the rules adopted by federal departments and agencies (including the FCC) to prevent conflicts of interest among members and employees and (3) a proposed code of ethics (including draft of a bill) for the agencies.

The staff study also recommends enactment of HR 12547, introduced in the last Congress by subcommittee Chairman Emanuel Celler (D-N.Y.), which would revise and strengthen criminal laws on conflict of interest and bribery.

What's Wanted • Effect of the recommendations, the report states, would include:

"Administrative penalties, including discharges for employees who engage in unethical conduct.

"Suspension or disbarment of representatives who violate rules governing the activities of former employees.

"Disqualification for contracts and grants of private parties who engage in unethical conduct in dealing with the government."

FCC Target • Covering all government departments and agencies, the report singles out only the FCC for individual criticism. In addition to the all-encompassing ethics bills introduced in the past Congress, it notes that several others would apply to the Commission alone.

"Although the focus of the present study is primarily upon government-wide, as distinguished from individual agency problems of conflict of interest, it may be noted that the Antitrust Subcommittee has long been concerned over practices characterizing the conduct of the business of the Federal Communications Commission," the report states.

Rep. Celler's bill is the desired solution, the report concludes, and other bills that go beyond its proposals "would add unduly to the already formidable array of criminal enactments in this area."

In supporting its recommendation that Congress legislate a code of ethics, the report states that a number of practices within the agencies are contrary to the public interest. "These practices place a burden on a public official's impartiality in his conduct of official business, tempt him to place his private interests ahead of the interests of the government, unfairly prejudice members of the public in dealing with the government, and generate distrust and suspicion of the federal service," the report continues.

"In order to remove any doubt about the impropriety of this type of conduct . . . Congress should enact a code establishing clear and unambiguous minimum standards of honesty and fair dealing in the conduct of government business and require the vigorous enforcement of this code by government administrators . . .

"Implementation in response to the needs of particular situations may be left to the agencies. Nor should such a code provide criminal penalties. Existing laws . . . will adequately penalize more serious offenses. The proposed code should, however, authorize decisive disciplinary action for violation, to be administered by agency heads."

"Improper" Conduct • The proposed code labels "improper" for a government official or employee: (1) Acceptance of gifts, discussion of future employment or frequent or expensive social engagements "with any person outside the government with whom he transacts business . . ."; (2) personal business transactions or private arrangements for personal profit through his office; (3) divulsion of confidential information; (4) acquisition or retention of conflicting interests and engagement in conflicting activities; (5) transaction of official business in the presence of a disqualifying interest, and (6) any appearance of anything improper in personal affairs.

Under provisions of the code, a former government official would be prohibited forever from "changing sides" in a litigated case or from appearing before his former agency for

BROADCASTING, January 5, 1959
1959 is going to be a great year! Starting today, with the launching of CBS Radio's new Program Consolidation Plan, network and spot advertisers will reach the biggest audiences in years on the stations of the CBS Radio Network.

(This is the network which, over the past 14 months, has delivered an average of 14 percent larger commercial minute NRI audiences than the second network.)
Leading affiliates coast-to-coast endorse new plan

"The new plan is a big step forward for the preservation of the kind of radio which the public can get only through a strong network and its affiliated stations. The result is bound to be bigger audiences for station's and network's advertisers."

CLYDE W. REMBERT, Pres., KRLD Radio Corp., KRLD, Dallas
(Owned by Dallas Times Herald)

"Delighted with this forward-looking step in radio broadcasting. This new relationship between the network and its affiliates brings a dynamic new concept in programming to the American public and will result in even greater values to advertisers."

"We have long had confidence in the values to our stations of affiliation with the CBS Radio Network. Our enthusiasm is even greater now because of the potential we see in the new CBS Radio plan. In our opinion it provides for ideal blending of local creativity with the admitted excellence of network programming, news service and special events."

FRED BOHEN, Pres., Meredith Companies
WHEN, Syracuse; WOW, Omaha; KMGM, Tulsa; KCNO, Kansas City

"Our two stations affiliated with CBS Radio Network are enthusiastic about PCP. It will keep intact the important public service programming and the best of entertainment programming, and will provide a greatly expanded news service. These are exactly the things we want from a network to complement local programming."

C. WERDE PEETERSMEYER, Pres., Corinthian Broadcasting Corp.
WISH Ind.; WANE, Ft. Wayne

"Delighted to know plan is all set. I'm confident it will do what it sets out to do: deliver bigger network and local audiences to our stations."

LEE B. WAILES, Exec. VP, Sater Broadcasting Company
WGES, Miami; WAGA, Atlanta; WWVA, Wheeling

"...Unites the strongest features of network service with the intimate appeal of local programming, and we predict a new high in WCCO-CBS Radio audience acceptance."

WCCO, Minneapolis

"The network's programming sets a station above run-of-the-mill stations. And this new plan will give advertisers better clearances. It is a good solution to a fairly rough situation both for network and stations. I feel this puts us all in a healthier condition."

HUGH B. TERREY, Pres., Aladdin Broadcasting Corp.
KLS, Denver
(Owned by Time, Inc.)

"Very enthusiastic about PCP. Sure it will work out for the benefit of both of us."

ROBERT W. DUMM, Pres., KROY, Inc., Sacramento

"...Looking forward to this new arrangement. Feel more certain than ever it should prove of great value to our listeners and profitable to all of us--especially advertisers."

RICHARD A. BOREL, Pres., Radiodisk, Inc., WBNS, Columbus
(Owned by Columbus Dispatch)

"Advertisers in our market gain maximum sales results through PCP RSL personality programming plus CBS Radio Network features add up to an unbeatable selling combination."

JAY W. WRIGHT, Exec. VP, Radio Service Corporation of Utah
KSL, Salt Lake City

"...Let me add that the way we feel about the new Plan is, 'Now you're talking.' 1959 should be quite a year. Prospects for bigger audiences and revenues look good."

WNBP, Binghamton

"One aspect I like about it is its definiteness."

LESLIE C. JOHNSON, V. Pres., The Rock Island Broadcasting Co.
WBFB, Rock Island

"As well as building larger program audiences for both local and network advertisers, one of the most important parts of plan is the hourly national and international news service plus the news in depth CBS News programs. This will give more and better information to listeners in our area than any other station."

CHARLES C. CALEY, V. Pres., WMDB, Inc., WMDD, Peoria

"A fine plan and it's going to give advertisers even bigger values than before."

TOM CHAUNCEY, Pres., KOOL Radio-Television, Inc.
KOOL, Phoenix

"The first real advance in a quarter of a century for network radio more valuable and useful to the public and advertiser. We applaud it."

WALTER J. BOYD, Secy-Treas., Lee Broadcasting, Inc.
KGO, Mason City; WTAD, Galveston
two years after leaving government service. Attorneys and others appearing before the FCC and other agencies would be prohibited, under the proposed code, from (1) making gifts to, discussing future employment of, or becoming unduly involved socially with government officials; (2) seeking to obtain confidential information from the government; (3) unethically employing former government officials, and (4) making ex parte representations to agency members or employees regarding litigated cases.

The code would give an agency chairman the authority to dismiss employees, disbar private representatives of applicants and disqualify applicants. Rep. Cellier's Antitrust Subcommittee already has announced it would hold hearings on conflict-of-interest legislation during the new Congress. Today's staff study is a follow-up to a report released last March on the same subject.

New Miami bid opposed

The FCC Broadcast Bureau and general counsel last week jointly opposed a petition by Elzey Roberts asking permission to file as a new applicant for Miami ch. 10 and to intervene in the FCC's current proceeding on ch. 10.

The statement noted that until the FCC acts on the initial decision in the case (BROADCASTING, Dec. 8, 1958) and it has been passed on by the appeals court which remanded it for rehearing, the present licensee, Public Service TV Inc., "remains the grantee" and there would be "little point" in accepting applications which can't be processed. Until such a time when the FCC would have to consider the legality or advisability of receiving new applications, the statement said, "we can't see how" any potential applicant for ch. 10 as an intervenor would materially "enhance" the FCC's ability to deal with the question.

NAB wants say on vtr

NAB wants a chance to state its views in the drawn-out National Labor Relations Board study of videotape jurisdictional problems. American Federation of Television & Radio Artists seeks exclusive jurisdiction from NLRB over persons making vtr commercials. Screen Actors Guild opposes the AFTRA plea.

Charles H. Tower, NAB broadcast personnel-economists manager, asked NLRB Dec. 31 for permission to enter the vtr proceedings as an intervenor, stating its desire to protect the interests of tv stations. NAB is interested in station vtr activity, not agency or network contracts. It contends AFTRA is asking blanket power which could upset long-established bargaining patterns based on local single-employer negotiations rather than national multi-employer bargaining as requested by AFTRA.

In another labor proceeding, NAB has asked the Wage-Hour Division, Labor Dept., for more flexibility to small-station operators in pay and hours for radio-announcers who also sell advertising.

Government notes

- Tomah-Mauston Broadcasting Inc., which received grant for 500-w daytime on 1390 kc in Tomah, Wis., last October, stayed after protest by WRDB Reedsburg, Wis., last November, asked U.S. Court of Appeals in Washington last week to unfreeze stay. Grantee claimed FCC has discretion in matter, does not have to clamp lid on building pending outcome of protest.

- A construction permit for ch. 17 in Bakersfield, Calif., was granted by FCC last week to Kern County Broadcasting Co. Authorization was without prejudice to such action the Commission might take as a result of a court decision involving ch. 29 KBKX-TV. Also, the FCC reserved the right to substitute for ch. 17 another channel which may as a result of current rule making be assigned to Bakersfield. The FCC also denied a motion by KBKX-TV for a stay of action on the Kern application pending final determination of the KBKX-TV petitions requesting deletion of ch. 10 in Bakersfield or the addition of ch. 8 there.

PLAYBACK QUOTES WORTH REPEATING

As Welcome As Can Be

Judge Thomas J. Faulconer Jr., of Marion County (Ind.) Criminal Court, like his predecessor, Judge Saul I. Rabb [GOVERNMENT, Dec. 6], promises there will be no restrictions on electronic news coverage of his court proceedings providing it operates "within the bounds of propriety." The judge, who will preside over the January trial of Mrs. Connie Nicholas (charged with the murder of Forrest Teel), told Bob Hoover, mobile news chief of WIBC Indianapolis:

"I figure the taxpayers are my bosses. They put me in office and they have a right to know what goes on in my court. My courtroom is a small one. I can't accommodate a big crowd and if I could I would not expect people to lay off work just to come and hear a trial. They can't afford it and it would be fair to their bosses. Therefore, I will encourage the media that will acquaint my bosses with what is going on in my court. Radio, tv and newspaper cameras are as welcome as can be.

"The constitution has many provisos. Three of which I will mention in passing. Number one is freedom of the press. Number two is the right of a defendant to a speedy, impartial and fair trial and number three is a man's right to privacy. I know that newsmen, radio, tv or newspaper, are just as interested in protecting a defendant's rights as they are in defending their own.

"I'll expect their cooperation in regard to the above. I shall expect them to stay within the bounds of propriety. If the mark is overstepped I shall take prompt steps to oust the individual or individuals guilty. Dignity must prevail in my courtroom. We are all working for a living and we can continue in our individual veins of effort if all cooperate. Just remember that when a defendant enters my courtroom he is as innocent as you or me until proven guilty beyond any reasonable doubt."

Anti-Tv Snobs Snubbed

 Scripps-Howard staff writer Andrew Tully, after a "long diet of holiday cocktail parties, [is] fresh out of patience with a common bore of the canape circuit . . . the anti-tv snob." Mr. Tully notes in his syndicated column:

Some day I'm going to challenge one of those types to spell "cat." 

Tv is a bum a lot of the time . . . , but on frequently increasing occasions it is a whopping entertainment value. 

Two or three hours a week I find something entertaining or stimulating on my 17-inch screen and that makes the set a bargain.

The kid who is allowed to watch tv five or six hours a day is flirting with permanent idiocy, but the parent who okays such a schedule already has achieved that stature. "But it's so pernicious," says one lady of my acquaintance. "It makes children watchers rather than doers."

Baloney. Three of my kids play the piano with considerable affection. A fourth has her head in a book several hours a day. . . .

A tv set presumably can ruin a child. But so can too much oatmeal or an overdose of Euclid.
NEW
RCA
500- AND
1000-WATT AM
TRANSMITTERS
pace the
latest trends!

The design philosophy behind these new broadcast transmitters is based on years of experience in developing the most reliable of broadcast transmitters, but the features are radically new. Simplified tuning, reduced installation time, and built-in provision for remote control are some of the improvements. Also included in the design are provisions for remote Conelrad switching.

O NEUTRALIZATION REQUIRED
Struts throughout simplify the tuning.

JILT-IN PROVISION FOR REMOTE CONTROL
Terminal strips are provided in the transmitter for connection of a remote-control unit.

LEVEL MODULATION
VCR's very low order of distortion results in improved soundability.

WER TUBES
Small tube inventory means reduced cost of operation.

ACCESSIBILITY
Vertical construction permits easy access for maintenance.

AMPLIFIED TUNING
Only one tuning control—on the front panel. All operating controls are conveniently located on front, at both sides of door.

CTIONAL COLOR STYLING
解脱 any surroundings through choice of color for doors—blue, green, red or gray.

EASE OF ACCESS
All tubes can be reached from the front by merely opening the door. Access to the rear is provided through two interlocked panels behind the transmitter. These panels are easily removed with thumbcrew fasteners. Typical RCA vertical construction permits easy access and maintenance. Removable base makes the transmitter easy to move.

NEW OSCILLATOR
Three switchable temperature controlled crystal units, a spare on the main frequency, plus one for automatic Conelrad switching are incorporated in the new crystal oscillator of both transmitters. Six thumb-screws hold the etched oscillator-buffer circuit board to the exciter subassembly. All oscillator and buffer connections are made through a plug type terminal strip. Frequency stability is ± 5 cycles for the new RCA crystal units.

SIMPLIFIED POWER INCREASE
The exciter unit is the nucleus of the basic transmitter; all low-level rf and audio stages are built into a single unit used in both 500- and 1000-watt transmitters. Thus, power increase is made easier.

For further information about these and other transmitters, call the nearest RCA Broadcast Representative. In Canada call: RCA VICTOR Company Limited, Montreal.
PROGRAMMING

NO PLATEAU IN SIGHT FOR TV FILM

Competition to intensify as medium matures; tv tape, international market growing factors

The volume of business grossed by tv film distributors in 1958 was "substantially higher" than in 1957 and the outlook for 1959 is even more promising.

This evaluation of the past year and a projection into 1959 was provided in Broadcasting in a roundup of opinion of leading tv film distributors. Other pertinent observations offered:

- In some instances, though gross sales were higher, net sales did not rise commensurately or even were lower in 1958 because of increased overall costs of production and distribution.
- The year 1959 is likely to be the "most competitive" since the advent of tv because the medium has reached full maturity in terms of set ownership, coverage and intensity of viewing, and tv films cannot rely heavily on the tv growth factor.
- There is a likelihood of a rash of mergers among the smaller and medium-sized tv film syndicators, who cannot operate profitably in the more competitive climate of 1959.
- By the end of the year, more tv film companies will have either entered videotaped production and distribution or formulated plans to move into tape, growing with VTR installations at stations.
- The international market will become a more important sales target in 1959.

This is the yearend situation for some of the leading tv film companies.

Independent Television Corp. • This company was formed last September when the Jack Wrather Organization, in association with Associated Television Ltd., British program contractor, bought Television Programs of America for $11,350,000. A spokesman said TPA had "a fine year," but ITC is looking to the future. Jack Wrather, board chairman of ITC, regards 1959 as "a year of building and preparation for a strong foundation for the future." By 1960, Mr. Wrather believes ITC "will lead the field of American companies in national and international tv."

California National Productions • Total sales in 1958 were at a record high, soaring above those of 1957 by 80% and over those of 1956 by 125%. Earl Rettig, CNP president, believes that sales will go even higher in 1959 and has set a sales target of $16 million for this year. CNP, he said, invested $9 million on new programs during 1958, many of which still will be on the air in 1959. At least three new but not further identified series are planned for 1959.

Ziv Television Programs • An optimistic outlook for Ziv during 1959 is based on the record of 1958. John L. Sinn, president, reported that total sales in 1958 rose by 32% over 1957, "itself a banner year." Mr. Sinn views the following as the most important task for 1958: "The development of new ideas and the men to implement them with imaginative, top-quality production"—now that tv films cannot depend upon the medium's growth factor to help sell films. During 1958, Ziv tv released two series for network showing and seven for syndication.

National Telefilm Assoc. • NTA reported an increase in its gross income in its 1958 fiscal year amounting to almost $15.5 million, said to be an increase of 41.2% over the 1957 fiscal year volume. Ely A. Landau, board chairman, believes that 1959 will be "even more promising" but noted that top-quality production and star values must be present in film series more than ever before. NTA is one film organiza-

ction that intends to accelerate its plans in the tape field. Through its subsidiary, Telestudios Inc., New York, NTA will announce after the first of the year a schedule of program series to be taped both in New York and Hollywood. The stock of NTA is to be acquired by National Theatres sometime this year but NTA will operate with its present management.

MCA-TV Film Syndication Div. • Business at MCA-TV during 1958 was "highly satisfactory," according to a company spokesman. He noted that by the end of the year MCA-TV had "almost" recouped the $50 million it committed to pay Paramount Pictures for the feature film library it acquired at mid-year. The library now is in 27 markets, he reported, and since many of the major markets are still in negotiation, the potentialities of 1959 are "very interesting." One indication of MCA-TV's expansion plans for 1959 and the future is the acquisition recently of the Universal-International physical plant for $11.25 million for productions by the MCA-TV subsidiary, Revue Productions. The company plans to announce several new tv film series for 1959 shortly.

CBS Films • Total sales during 1958 rose over those of 1957 by more than 30%. Sam Cook Digges, vice president-administration, looks forward to an "even better year," and based on sales expectation, CBS Films plans to introduce seven new series and produce several new pilot films. CBS Films enters 1959 with the largest budget in its history, according to Mr. Digges. He noted that during the past year the company released four new series and said the company was "particularly pleased" that its product attracted several large regional advertisers to tv for the first time.

Screen Gems Inc. • The 1958 fiscal year of Screen Gems, ended last June 30, was the highest in sales volume in company history, amounting to $28
Stockholders to vote on NT buy of NTA

National Theatres Inc., Los Angeles, which has obtained court sanction of its plan to acquire the stock of National Telefilm Assoc., New York, will hold a special stockholders' meeting in Los Angeles Monday (Jan. 8) to vote on the proposal.

The final legal barrier was removed over Christmas when Federal Judge Edmund L. Palmieri signed an order, approving the acquisition plan. Judge Palmieri acted after receiving assurance from NT that NTA would purchase the 50% interest of the 20th Century-Fox Corp. in the NTA Film Network (BROADCASTING, Dec. 29, 1958). This stipulation was dictated by the Justice Dept. because an association between Fox and NT, which formerly was the theatre exhibition arm of Fox, might contravene the consent decree of the motion picture industry.

NT stockholders already have received a proxy statement, outlining the terms under which the company would obtain the stock of NTA (BROADCASTING, Dec. 22, 1958). The proposal calls for NT stockholders to be offered an $11 debenture and a warrant to purchase 1/4 of a share of National Theatres' common stock for each share of NTA stock. NT directors, already have approved an agreement to obtain approximately 15% of NTA stock from its principal stockholders (Ely A. Landau, board chairman; Oliver A. Unger, president and Harold Goldman, executive vice president) on the same basis.

UA in giant deal

Multi-million dollar deal between United Artists Corp. and Aubrey Schenck and Howard W. Koch—calling for production of TV and theatrical film properties—was signed last week. Messrs. Schenck & Koch had been UA contract producers under former Bel-Air Productions Banner, will rename their venture as Olympia Productions Inc. First TV series for UA-TV Distribution-financing will be Miami Undercover, to be shot at Desilu studios.

Syndicators welcomed

The Television Bureau of Advertising is opening up its membership ranks to include TV film syndicators as associate members. Effective immediately, film syndicators are offered access to all TVB sales, research, sales promotion and development materials. Full details are available from William B. MacRae, TVB director of station relations, 444 Madison Ave., New York 22.

TO ELIMINATE “F. & S. J. V.” HEADACHES

If the billion dollar Fresno and San Joaquin Valley gives you buyers headache or various other assorted ills, eliminate the pain, the strain, by using KJEO-TV, the ALL-FAMILY TV Station. With a choice selection of 10, 20 and 60 second avails in addition to program, KJEO-TV has solved many buyers problems, it could solve yours. Call your H-R Man today.
NOBEL PRIZEMEN ON NBC-TV

'Continental Classroom' largest academic conclave world has ever known: Sarnoff

Continental Classroom, NBC-TV's early-morning course in atomic-age physics, has lined up seven Nobel Prize winners to appear as guest instructors in coming months.

Robert W. Sarnoff, NBC board chairman, is announcing the lineup in his latest "Letter" to radio-television editors, being released today (Jan. 5). "Wouldn't any university in the world trade its parliament birthright for a physics department of that calibre?" he asked.

He said about 270,000 high school and college students and teachers, business men, housewives and others tune daily to Classroom, conducted by Dr. Harvey E. White of the U. of California at Berkeley and presented at 6:30 a.m. on weekdays. This audience, Mr. Sarnoff noted, is "hardly more than a single rating point, but still the largest academic conclave the world has ever known and one that would take Dr. White more than 1,300 years to instruct if he were to divide it into five standard college classes a day."

Classroom, designed to help overcome the critical, even menacing, shortage in this country of qualified physics instructors," was described by Mr. Sarnoff as "the most dramatic and perhaps the most useful of all post-Sputnik efforts to close the perilous gap in America's science education."

Yet, he said, "It is not particularly dramatic or difficult on NBC's part. We offer technical facilities, production know-how, air time and an existing national lineup of stations." The American Assn. of Colleges for Teacher Education is "a knowledgeable partner," and eight other organizations and companies help financially. "I think our principal contribution is that we exist," Mr. Sarnoff asserted. "Only because of our structure as a national network, able to reach Americans everywhere, can this massive infusion of scientific knowledge be attempted."

He reported that 149 stations carry the program, 250 colleges and universities offer full academic credit for the course, 5,000 high school teachers and teachers-in-training are registered enrollees, and 27,000 others have sent in 50 cents each for a syllabus.

The seven Nobel Prize winners set by Dr. White to appear as guests are Dr. Walter H. Brattain of Bell Labs (Nobel Prize 1950); Dr. Polykarp Kusch, Columbia U. (1955); Dr. Isidor I. Rabi, Columbia U. (1944); Dr. Felix Block, Stanford U. (1952); Dr. Glenn T. Seaborg, U. of California (1951); Dr. Carl D. Anderson, California Institute of Technology (1936) and Dr. Edwin M. McMillan, U. of California (1951). They are slated to make single appearances, starting in February.

PROGRAM NOTES
- Gross-Krasne-Silberman Inc., N. Y., reports that plans for its new Fate anthology series calls for simultaneous production in Europe and Hollywood. Some episodes in 39-program, half-hour series will be filmed in Europe while others are being produced in Hollywood, starting in January. GKS believes simultaneous filming will speed up production and thereby reduce shooting time; broaden production scope (international location shooting) and widen story material possibilities.
CBS-TV will introduce an hour-long dramatic series, Rawhide, on Jan. 9 (Fri., 8-9 p.m.) under the sponsorship of Lever Bros. and Pharmaceuticals Inc., it was announced last week by William H. Hylan, CBS-TV executive vice president of sales administration (Broadcasting, Dec. 29, 1958). The agency for Lever Bros. is J. Walter Thompson Co., New York, and for Pharmaceuticals Inc., Parsons Adv., New York. CBS-TV’s Trackdown moved out of the Friday, 8-8:30 p.m. period last week and will be presented on Wednesday, 8:30-9 p.m., effective Jan. 28.

Wilding-Tv Div. of Wilding Picture Productions, Chicago, has allocated $1 million for expansion of equipment and facilities used in making tv commercials, announced Joseph Morton, general manager of newly-created division, who also reported 40% increase in tv commercial revenue for Wilding in 1958 over previous year.

Vincent Michaels Inc., new “radio ads” service offering advertising mats to radio stations for newspaper promotion of local programs, has been opened by Michael Bogen, specialist in syndicated ad mats, at 21 E. 28th St., New York 16. Telephone: Murray Hill 3-7803.

What’s new?—A vacuum type crystal eliminates air gap adjustments and time consuming installation procedures—a new simplified circuit built around Gates solid process printed wiring for greater accuracy and prototype uniformity—may be direct connected or “off the air” monitored—100% parts accessibility with hinge-down front panel—blanket type heater for absolute even heat distribution to vacuum crystal and oscillator components—simplified extension for remote control, just add the second meter for up to 20 miles of line, nothing else.

There are a host of other new features, of course, as this fully FCC approved Gates M4990 frequency monitor is entirely new!

Price in the United States is only $765.00. Delivery is prompt. If you are just starting, specify the Gates M4990 Frequency Monitor. If you need a replacement, the Gates M4990 is the only truly new monitor in recent years. For additional information, write today for brochure No. 84.

Remember, in radio broadcasting, you can always expect the new from Gates...leader in creative engineering.

* Whip antenna for off air monitoring optional accessory.
Supermarkets thrive on KTTV (TV) formula

Early last year KTTV (TV) Los Angeles discontinued Star Shoppers, a five-year-old series of weekday morning telecasts from Southern California supermarkets. Out the window with the program went the backbone of the station's merchandising program.

In a search for a new merchandising approach, Jack O'Mara, director of KTTV merchandising and promotion, and his associates approached the problem by asking and answering the basic question, "What is merchandising?" Their answer: "Merchandising is what a medium can do to help its advertisers move their products." It was the foundation for KTTV's new PM (Product Movement) Plan, now proven in operation.

Under the PM Plan, KTTV's advertisers may choose 14 specific merchandising aids. They select the help they want in amounts determined by the value of the advertising they purchase on KTTV. A "value point" scale is used.

Participating at the retail end are 19 foodstore chains with more than 300 supermarkets. Merchandising aids offered (each with value point "prices") include: calls on key buyers; consumer surveys conducted in stores and by telephone; store displays; trade mailings; distribution checks, and Spotlight Boxes and Value Vouchers in the stores' printed advertising, which offer KTTV-advertised items at special discount prices.

Each merchandising service has a cost value point. These points are charged against the total points earned by the advertiser through his total time purchases on KTTV in each 13-week cycle.

Stores participating in the PM Plan also earn points which are redeemed as credit towards the purchase of time on KTTV. When a store offers a discount price on an item through the Value Voucher in its newspaper ad, the station credits the store with half the value of the discount for each item sold. When the 47-store Thriftmart chain offered Post cereals at a special price of 5 cents for a 21 cents package and sold 14,000 boxes, KTTV gave the store a credit of 8 cents a box, or $1,120, toward the purchase of time on KTTV.

The 40 stores of the Fox Markets chain used Spotlight Boxes in its newspaper ads to offer Yuban coffee at a reduction of 30 cents a pound. In a four-day period 68,000 sales were made and Fox Markets earned a KTTV time credit of $10,200.

An outstanding characteristic of the PM Plan is its flexibility, Mr. O'Mara claims. A client wanting a special promotion assist outside the 14 points offered will find that KTTV can provide it, he adds. One advertiser preferred to have its own salesmen handle arrangements for store displays. The advertiser conducted a contest among its salesmen and KTTV provided the prizes, charged at two value points per dollar retail price.

Documentary proof of the effectiveness of the PM Plan is offered by Mr. O'Mara as he points to the thousands of redeemed Value Vouchers received by the station at the conclusion of any promotion. He says, "We have tried to develop a plan stripped of all pretense and fluff, a plan which at every step of the way tries to document precisely the results obtained."

The PM Plan has been in operation eight months now. Some of the products for which it has been used are: Value Vouchers—Scott Paper products, Vel, Heinz soups, MJF coffee, White King soap; Spotlight Boxes—Alka Seltzer, Olympia beer, Yuban coffee, Clorox, Schiltz beer; Displays—Colgate, Baker's chocolate and Jif peanut butter.

Supermarket chains participating in the plan range from the 47-market Thriftmart to the 2-market Shopping Basket group located in Southern California.

Young ideas on KTVU (TV)

KTVU (TV) Oakland, Calif., is giving a youthful production firm a chance to show what it can do.

The company is Alpha Productions, a project of Junior Achievement, the youth organization that establishes businesses for its members. For 13 weeks starting Jan. 18, Alpha will have a live Sunday afternoon series on KTVU. The young company creates, produces and sells ($15 for a minute spot, compared with KTVU's $300 rate) the entire series. Alpha stockholders get profits at conclusion of the project.

Ad Week kits available

Advertising's role in the nation's economy will have the support of radio and television in an intensive promotion effort to launch Advertising Week (Feb. 8-14). Participation in the all-media campaign was planned by radio-tv executives and Benton and Bowles, agency for the nationwide project. The material to be offered to networks and stations will advance the theme: "More jobs, better products, lower prices. Advertising works for you!"

The radio kit, including a record with
announcements by well-known personalities, a campaign jingle and scripts for live broadcasts, is available at $2. The tv kit consists of one-minute and 20-second films and an eight-second ID spot, and costs $12. Both kits are available from Advertising Federation of America, 250 W. 57th St., New York 19, N.Y. Advertising Assn. of the West is co-sponsor of Advertising Week.

State to use WMTR report

A departure from the usual “straight facts” treatment of a tragic automobile collision was prepared by Bob Stoepker, news director of WMTR Morristown, N.J. The listener impact was such that a tape recording of his report has been selected for use in a pilot program to teach safe driving in New Jersey’s public high schools. Mr. Stoepker reported the deaths of four teenaged boys in a head-on crash from the viewpoint of a parent who “suddenly sees 17 years of work and dreams snuffed out in a few violent moments.” The original newscast was rebroadcast twice that same day, and a number of Morris County high schools fed the report through their intercom systems for the students to hear. This resulted in a request from the state’s traffic safety director, J. Raymond Manahan, for a tape to use in a planned driver education program.

Call letters greet WISN

A lot can be said on a postcard if you have the time and patience of the winner in contest conducted by WISN Milwaukee. The station invited listeners to write “WISN” as many times as possible on the message side of a card measuring 5¼ by 3¼ inches and offered a $100 cash first prize. A salesman at Wisconsin Magneto Co. wrote the call letters 11,839 times by using 10 well-sharpened No. 9 drawing pencils with a magnifying glass, and the feat required 80 spare-time hours of work, according to WISN.

NBC demonstrates slogan

NBC Radio has sent a ball-and-cup game to advertisers and agencies as the “clincher” of a five-week campaign to popularize the network’s “engineered circulation” concept—that advertising on NBC Radio is timed to reach listeners during responsive periods. The game is designed to illustrate the campaign slogan: “The trick is in the timing.”

WKCB-WKCQ (FM) pucksters

The Berlin (N.H.) Maroons, an amateur hockey team, are playing this season for the banner of WKCB-WKCQ (FM) Berlin, Richard P. McKee, the stations’ owner, has announced. Under station management, the Maroons will play teams throughout New England and New York.

To herald 12 major motion pictures premiering on KNXT, “Miss Paramount Week” has been calling on the press, riding in holiday parades, appearing at public functions and posing for lots of pictures.

Backing up its front woman, KNXT sent up a plane over the New Year’s Day Rose Bowl parade with an exclusive sky-writing franchise to reach an expected 1.5 million parade watchers. Also in the Paramount Week promotion kit: $30,000 worth of air promotion time, 18,000 lines in local newspapers, four pages in Tv Guide, giant bus posters, market cards, direct mail, bottle labels, billboards and a full-scale publicity campaign in newspapers and magazines.

The 12 Paramount Week features are being shown on the weeknight Early Show and Big Hit Movies. Saturday’s Fabulous 52 show and a Sunday day film program. Paramount Week movies star Bing Crosby, Bob Hope, Fredric March, Herbert Marshall, Barbara Stanwyck, Jack Benny, Fred MacMurray, Claudette Colbert, Marlene Dietrich and others.

NTA’s Dream Package

Advertising in Business Papers
Means Business

In the Radio-TV Publishing Field only Broadcasting is a member of Audit Bureau of Circulations and Associated Business Publications

Tv Movie Missionary • Starlet Sandy Warner holds up some of the Paramount footage KNXT (TV) Los Angeles charged her with promoting for a movie splash starting this week.
Prize Promotions • These took $5,000 top prizes in NBC-TV’s affiliate contest for daytime promotion (Broadcasting, Dec. 29, 1958). The presentation of KOA-TV Denver, winner in the basic affiliate class, is by Dean Faulkner, station promotion manager. Peggy Cooper of WITN (TV) Washington, N.C., directed the winning campaign in the contest among optional affiliates.

The winning formulas:

KOA-TV built its campaign around a dirty, “All Day Every Day it’s NBC on KOA-TV,” which was recorded by local personalities and used in a number of ways. The tune was background for all sustaining station breaks for 31 days.

NBC daytime also was promoted in 8,769 lines of advertising in two daily and 10 weeklies plus the local TV Guide, in five to eight one-minute spots a day on KOA-TV plus promotion on local live shows, and four times a day on KOA Radio. A KOA-TV contest offered an expense-paid week in Havana and 50 lesser prizes, for best answers to “why 1 like” specific NBC-TV daytime shows (50,000 entry blanks distributed). Banners, cards, store displays and other aids also were used.

WITN promoted the network day lineup in 210 one-minute spots placed on seven independent radio stations, by “Miss North Carolina” and WITN personalities on WITN shows, by a “Keyhole Contest” offering prizes for correct identification of NBC-TV stars from partial photographs; 1,797 announcements on the station and an airplane towing a banner.

Other WITN attention-getters: 2,751 lines of advertising in 18 newspapers plus the local TV Guide, a parade with high school band, a banner railroad caboose on one and two-day stopovers in nine cities, telephone promotion by women’s clubs in eight counties (10,023 calls in 13 towns) and 5,000 program schedules plus other mail matter.

No escape

There may be a long road awinding but stop in Ponca City and pick up a package at Aunt Lucy’s. This is the sort of message wives of traveling salesmen in the WKY Oklahoma City listening area can relay to husbands via the public service program. Service for Salesmen, broadcast four times each weekday, WKY points out that Oklahoma City is headquarters for many distributorships which have salesmen whose homes are in that city but who travel the entire Southwest on their jobs. Emergency messages from salesmen’s families are scheduled at times they are likely to be on the road, at 8:30 a.m. and 12:30, 5:30 and 9:30 p.m.

WQAM prods tourist inflow

When WQAM Miami learned that the Eastern Airlines strike was slowing down the annual tide of winter vacationers to that city, the station set out to revive southbound traffic. It launched a week-long “Operation Air Space” campaign in which listeners were urged to write to their friends and relatives up north to emphasize the fact that seats were still available on the other airlines serving the city. With airplane seats going begging, according to WQAM, there was no reason why the strike should keep northerners from enjoying Florida weather.

Better underwater, they say

KJH-TV Los Angeles has taken steps to see that tv editors get the most out of its feature this week (Jan. 5-11) on Channel 9 Movie Theatre. To condition them for Howard Hughes’ “Underwater,” starring Jane Russell, KJH-TV has sent along enrollment certificates for a 15-hour course at the American Institute of Diving. The potential students also have been provided with rubber flippers, goggles and a snorkle by the station. KJH-TV’s accompanying letter explains: “We feel you will enjoy the picture more if you have the proper equipment and training . . . Motto for the picture is: ‘It’s better underwater!’”

WJR sends sound samples

A free demonstration record of samples radio commercials developed by the Recording and Production Div. of WJR Detroit is being offered to advertisers and agencies in a direct mail piece. The promotion disc features WJR’s staff of composers, writers, musicians, vocalists, announcers and producers in a variety of commercial approaches and effects. Jimmy Clark, composer and arranger, heads the division and Ned Nolan is chief recording engineer.
A year-end statement issued last week by Brig. Gen. David Sarnoff, RCA board chairman, points out that increased sales in the fourth quarter of 1958 gave RCA an annual volume of business approaching the record high of $1.176 billion set in 1957.

Gen. Sarnoff reported that profits during 1958 will total about $2 a share, compared with $2.55 in 1957. The RCA board of directors, he said, declared the same dividend as last year—$1.50 (25 cents a quarter regular and 50 cents extra). Gen. Sarnoff interpreted this action as an "indication of RCA's improving profit picture and of the confidence of the board in the corporation's prospects for 1959 and subsequent years." Dividends to stockholders for 1958, he added, amounted to $2,886,000.

Gen. Sarnoff noted that sales to the government in 1958 totaled about $300 million, which he described as a 14% increase over 1957. He said the backlog of government orders at year-end is approximately $300 million, an increase of $50 million during 1958.

NBC Gains Cited • He reported that NBC registered "board gains" during 1958, and added:

"For the eleventh straight year, national advertisers invested more heavily than ever before in NBC's television network. And NBC-TV again led all networks in number of sponsors. Gross time sales in 1958 exceeded the previous year by 11%, more than double the network's volume of five years ago.

"NBC reaffirmed its faith in radio by developing a wider variety of new programs and formats. Toward the end of 1958, NBC Radio had 48% of all measured radio network sponsored time, and commercial radio business was up 20%.

"Gen. Sarnoff commented upon the expansion in and the growing importance of the electronics field, pointing out that the industry, in the past 12 years, has grown at a rate more than six times that of the national economy as a whole. He described electronics as a $14 billion a year industry and observed that RCA, as a pioneer in the field, has made significant contributions in this area.

**Tv via Satellites?** • In this connection, Gen. Sarnoff disclosed that RCA is investigating possible uses for special-purpose satellites, including a relay station for international television, and orbital post offices and weather stations.

Among RCA's major achievements of 1958, listed by Gen. Sarnoff, were: the introduction of almost 100 new products, including the first fully-transistorized, general-purpose electronic data processing system (RCA 501); the introduction of stereophonic sound to the popular market with the first complete line of stereo high-fidelity instruments and a stereo tape cartridge providing four times as much music as the standard tape; the development of an automatic checkout system that will reduce the "countdown" time for the Atlas ICBM; the development of a new micromodule concept in electronic circuitry that makes possible the reduction of many military items to one-tenth—and in some cases to one-thousandth—their present bulk.

**Tv stereo by Motorola**

Motorola Inc., Chicago-based electronics manufacturer, claims to have developed the world's first compatible stereophonic sound system for television. The company unveiled a four-unit "Home Entertainment Center" at the opening of the Winter Home Furnishings Show in Chicago's Merchandise Mart Sunday (Jan. 4). It consists of a stereo unit with tape cartridge, fm radio and record player, tv receiver, and two speaker boxes.

The stereo tv sound system was demonstrated by means of closed circuit, utilizing cable feeds from WGN-TV that city. The first few minutes of a quarter-hour test program were aired monaurally. Transmission was then converted to stereo through Motorola decoding adapter equipment.

A Motorola spokesman pointed out that the FCC has not yet devised standards for stereo tv. For that reason, he noted, the demonstration was a closed circuit transmission utilizing multiplexing techniques. The system includes two tracks each for sound and video. The complete "Homecenter" is valued at between $500 and $700.

The program was videotaped earlier on Ampex recording facilities and fed by WGN-TV via cable to the Merchandise Mart. The system was devised by Motorola's engineering staff working closely with WGN-TV technical representatives.
**FATES & FORTUNES**

**Advertisers**
- Walter C. Fisher has been appointed marketing director of Norge Div. of Borg-Warner Corp., Chicago, with responsibility for all home appliance advertising, merchandising and related activities. James D. Dougherty, formerly assistant marketing director, Campbell-Ewald, Detroit.
- Arthur L. Terry, since 1943, media director in Detroit office of Kidner agency, to media director, Detroit office, of newly-formed Geyer, Morey, Madden & Ballard Inc.
- Kelsa M. Tager, director of media, McCann-Erickson, Detroit, elected v.p.
- Jack Cummings, formerly production manager of Honig-Cooper, Harrington & Miner, S.F., named head of agency’s new department of administrative control, effective Feb. 1.
- Tom Nason promoted to manager of mechanical production department. Cecelia Miller, assistant secretary of corporation, adds duties of assistant treasurer.
- Arnold Leeds, formerly producer with Dancer-Fitzgerald-Sample, N.Y., to Kenyon & Eckhardt, as commercial producer.
- Andrew Stewart, executive v.p. of Denhard & Stewart, N.Y., elected president.
- Lawrence C. Puchta, formerly senior account executive with McCann-Erickson, N.Y., to Kenyon & Eckhardt, N.Y., in similar capacity.
- David A. Barba, recent graduate of Art Center School, L.A., to Kenyon & Eckhardt, N.Y. as assistant art director.
- Richard Jackson to Detroit office of Grant Adv. as copywriter.
- Robert M. O’Brien resigns as southwest representative of Community Club Services Inc., N.Y., to return to Sacramento, Calif., to form company dealing with merchandising, advertising and sales promotion.
- Roy R. Stewart, formerly business representative of Appleton (Wis.) Post-Crescent, to Brady Co., Appleton advertising agency, as director of media and research department.
- Lloyd N. (Larry) Newman, account executive of Adrian Bauer & Alan Tripp Inc., Philadelphia advertising and public relations agency, promoted to public relations manager.
- Joyce B. Kelly, previously with Quaker Maid Co. to Kenyon & Eckhardt as assistant home economist in merchandising department.

**Networks**
- William P. Munro, assistant to president of CBS International since 1954, appointed v.p. of CBS division.
- Court McLeod, director of traffic operations and supervisor of sales service, ABC-TV’s western division tv opera- tion, named administrative manager, program department, ABC-TV western division.
- Robert Trout, CBS News correspondent, elected president of Assn. of Radio & Tv Analysts. Other officers: Bill Downs, CBS, and John MacVane, United Nations, v.p.’s; Blair Clark, CBS, secretary, and Cesar Saechinger, treasurer. New members of executive board include retiring President Quincy Howe, ABC; H. V. Kaltenborn, NBC, and Leon Pearson, NBC. New members elected to association are Don Goddard, ABC; Wilson Hall, NBC, and Bill Shadel, ABC.
- Mike Wallace, under contract to ABC, signs MBS contract to become narrator of *The World Today* (Mon.-Fri., 8:05-30 p.m.), succeeding Westbrook Van Voorhis, takeover date uncertain. While Mr. Wallace’s ABC contract runs through April, network has agreed to Mr. Wallace’s two-network run.
- Edwin S. Friendly Jr., CBS-TV daytime program director since March 1957, named producer of CBS-TV’s *The Jimmy Dean Show*, relinquishing former title to return to active producing.

How WSB-TV tower was modified for new TF-12AL antenna

1. Existing tower inspected, damaged members replaced, all bolts tightened.
2. New guy pulloffs installed, diagonals and girts reinforced.
3. New guy anchor material installed.
4. New guys installed and tensioned.
5. Existing 14-layer channel 2 super-gain antenna and AM antenna removed, all tower steel above 798' level removed.
6. New steel installed above 798' level.
7. New RCA TF-12AL antenna and new side-mounted Collins FM antenna installed.
8. New transmission lines installed where required.
9. All guys retensioned.
10. All areas affected by modification repainted.

Our antenna is brand new but we’ve transmitted from this Dresser-Ideco tower since 1951

“T’m Bob Holbrook, Chief Engineer for WSB-TV, Atlanta. Recently we decided to replace our original antenna with a new RCA TF-12AL and increase our overall tower height 17’.

“As a result of these changes, we have noted not only the increase in coverage radius anticipated and improved fill-in of the entire area, but a marked improvement in the quality of the transmitted picture. We feel that this installation has made full use of the advanced technology in antenna and transmission line design.

“The change-over was a complex job and required extensive modification of the tower Dresser-Ideco built for us in 1951. To assure a structurally-sound installation, we called in Dresser-Ideco to plan the changes. They calculated the alterations in the tower and guys necessary to support the new equipment and designed and fabricated the new tower members needed. Then Dresser-Ideco supplied the erection contract with detailed drawings and instructions for making the modifications and installing the new equipment.

“Dresser-Ideco worked from the original drawings and design calculations for our tower and gave the modification job the same careful attention that impressed us when they built the original tower. The new antenna installation moved along at a fast pace, with completion on schedule.”

Dresser-Ideco's unique tower modification service is available to all Dresser-Ideco tower owners. A permanent file is maintained of all tower drawings and design calculations. This modification service is another of the many exclusive extras you get when you specify Dresser-Ideco, the nation's most experienced tower builder. Call your broadcast equipment representative, or contact us direct. Write for Tower Catalog T-57.
Riding high with Balaban • Top salesmen at the Balaban stations will be riding in Cadillacs in 1959, announced Executive Vice President John F. Box. Mr. Box, also group managing director, revealed that winners in an incentive contest at each station would be awarded Cadillacs. First winner was Dan Hereford (above, left), account executive at WIL St. Louis, who is receiving keys from William McKibben, assistant to vice president of WIL.

- Hugh M. O'Neill, member of board of directors of Cleveland Broadcasting Inc. (WERE-AM-FM Cleveland), elected chairman of board, replacing late Herbert Gleitz.
- Norman H. Stewart, on sales staff of WFAA-AM-FM Dallas for past three years, appointed national sales manager for stations.
- James R. Osborn, formerly account executive at WCBS-TV New York, to WXIX (TV) Milwaukee as general sales manager of CBS o&o station.
- Hugh D. Lacrosse, with WKRC-AM-FM-TV Cincinnati since 1942, promoted to chief engineer of all three stations, replacing Ralph Mlaska, elevated to home office of Radio Cincinnati Inc. (WKRC-AM-FM-TV; WTVN-AM-TV Columbus, Ohio; WBRC-AM-TV Birmingham, Ala., and WKYT (TV) Lexington, Ky.).
- Lloyd Webb, formerly manager of WAIT Chicago, appointed general sales manager at WJJD, Plough station in that city.
- Al Weeks, sales manager, K B A M Longview, Wash., promoted to station manager.
- James W. Whatley appointed national sales director of WETU Wetumpka, Ala.

- Monte Strohl, for past year manager of Cascade Broadcasting's KEPR-TV Pasco, Wash., appointed sales manager, Cascade television division. William Grogan, KEPR-TV sales manager past two years, to succeed Mr. Strohl as station manager.
- William E. McClanahan, formerly general sales manager of WKOW-AM-TV Madison, Wis., appointed executive v.p. and general manager of WQUB Galesburg, Ill., effective Feb. 4. Mr. McClanahan was previously owner of his own station representative firm and commercial manager of KCRG-TV Cedar Rapids, Iowa.
- Charles Quillian, formerly of WLLY Richmond, Va., to WJBW New Orleans, recently acquired Tarlow Assoc. station, as managing director. Ken Manley, formerly of WHYE Roanoke, Va., and George Fennell, formerly of WHIL Medford, Mass., to WJBW as operations manager and air personality, respectively. Jim Clark, formerly of WTOB Winston-Salem, N.C., to WHYE as program director.
- Jim Hamby promoted from local sales manager to sales manager of KTS A San Antonio.

Ownership Changes

--- ACTION BY FCC

KFRE-AM-FM-TV Fresno, Calif.—Granted transfer of control from Paul E. Bartlett, et al., to Triangle Publications Inc.; consideration $3,000,000; conditioned that grant is (1) subject to such action as Commission may deem necessary to warrant relinquishment of permit and its final determination in pending rule making proceedings relating to ch. 12 in Fresno, and (2) without prejudice to such action as Commission may deem warranted as result of its final determinations with respect to conclusions and recommendations set forth in network study staff report, Triangle Publications now owns WNHC-AM-FM-TV New Haven, Conn., WNIT-AM-FM-TV Binghamton, N.Y.; WFLI-AM-FM-TV Phila-delphia, Pa.; WFGO-AM-FM-TV Allentown, Pa. and WLBR-AM-FM-TV Lebanon, Pa. Conn. Bartlett abstained from voting. Announced Dec. 30.
KIDO Boise, Idaho—Granted assignment of licenses to Merabi Western Corp. (William E. Boeing Jr., president, owner of KWKL Longview, Wash.) for $11,000. Announced Dec. 30.

WJZ Fredericksburg, N.Y.—Granted assignment of license to Dunkirk-Fredonia Bestg. Inc. (H. K. Williams III, president) consideration $67,500. Comr. Bartley dissented with following statement:

"Assignee gives as a reason for requesting Commission consent to this assignment of license that 'Operation of radio station will provide needed diversification of assignee's interests in field of public communications and will enable it to better serve public needs.'" Announced Dec. 30.

"If this means, as facts would appear to indicate, that community's only radio station will now be taken over by community's only newspaper (owned by the assignee), then assignee apparently confines Commission's policy of diversification of ownership of media of mass communications in public interest, with 'diversification' of its own private interests.

'I would not grant consent to this assignment until full showing had been made by the applicants with respect to public interest factors involved in Commission's diversification policy.'" Announced Dec. 30.

WSNB Idaho Falls, N.Y.—Granted transfer of control from George E. Kline Sr. and Jr. to Seymour Malman; consideration $6,000 for additional 25% interest. Announced Dec. 30.

WSYB Ocala, Fla.; WKAL Rome, N.Y.—Granted transfer of control from Myron J. Kallet, et al., to Mid-Farm Bestg. Corp.; consideration $400,000 plus employment of W. T. MacNeil, one of transferees, as consultant at 25,000 per year for at least 10 years and agreement to purchase certain real estate for $100,000. Gordon Gray is president of transferee corporation, majority stock of which is held by Paul F. Harrison and wife. Different transferee officials have interest in WORL, Boston, Mass.; WALL Middletown, N.Y.; WSIP Saratoga, Fla.; WGR-AM-TV Buffalo, N.Y.; WROC-TV Rochester, N.Y., and corporation is 65% owner of WVSA-AM-FM-TV Harrisonburg, Va., and half owner of WNEP-TV Scranton, Pa. Transfer includes auxiliary. Announced Dec. 30.

WCMB-AM-TV Harrisburg, Pa.—Granted transfer of control from Edgar T. Shepard Jr., to Hudson Bestg. Corp. (James A. McKenney Jr., president) has interest in KEVE Minneapolis, Minn.); consideration $160,000 and, at election of president, E. Rossyme Bestg. Corp. will pay him $10,000 over five-year period as consultant and $2,000 over same period not to compete. Announced Dec. 30.

WEZL Richmond, Va.—Granted assignment of license from George G. Benns Jr., and Barbara Renus to WEZL Inc. (Ben Strouse, Samuel E. Feldman and Leon B. Back); consideration $111,000. Mr. Strouse has interest in Eleventh Ten Bestg. Inc. (WVDC-AM-FM Washington, D.C. and WSCR-AM-FM Washington, D.C.); consideration $100,000. Announced Dec. 30.

WQON Roanoke, Va.—Granted transfer of control from Charles E. Springer to James E. Cook for consideration $4,500 for 84.5% interest. Announced Dec. 30.

APPLICATIONS

KXXA Pasadena, Calif.—Seeks assignment of license from Pacific Coast Bestg. Co. to Eleven Ten Bestg. Inc.; consideration $600,000 plus or minus adjustments. Mr. Cooke is station representative. Announced Dec. 30.

WJFM (FM) Jacksonville, Fla.—Seeks assignment of license from Radio Jax Inc. to Irving Glick; for $110,000. Mr. Glick is general manager-salesman, WJAX Jacksonville. Announced Dec. 29.

WMVO Cleveland, Ohio—Seeks assignment of license from Friendly Bestg. Co. (Richard Eaton) to Preston C. Tushman for $250,000. Mr. Tushman is steel products company president. ANNOUNCED Dec. 30. Agreement in grant of WBSB-AM-FM application filed.

WSNB-AM-FM Cleveland Heights, Ohio—Seeks assignment of license from WBSB-AM-FM Bestg. Inc. to Friendly Bestg. Co. (Richard Eaton) for $350,000 plus interest of $20,000 per year for five years. Mr. Eaton, holder of multiple broadcast interests, has applied for sale of WMJO Cleveland (see above). Announced Dec. 30.

WMOD Mountville, Va.—Seeks transfer of exclusive control of station to Carolina Valley Bestg. Co. (Donald W. Levinson to John T. Taylor, formerly 34% owner, will take full interest) 100%. Purchase price: $15,000. Announced Dec. 29.

Hearing Cases

FINAL DECISION

By order, Commission adopted, and made effective immediately, initial decision of November 14 and granted L. Berenece Bronlow for new am broadcast station in St. Helena, Ore., to operate on 1600 kc, 1 kw, day and night.

OTHER ACTIONS

By memorandum opinion and order, Commission granted joint petition of Oklahoma Television Corp. and Coastal Television Corp. for reconsideration of Sept. 17 memorandum

Get More Coverage
With The New RCA
500- and 1000-Watt AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. O-22, Building 13-1, Camden, New Jersey.

4 There has been, in addition, one uhf educational tv station granted but now deleted.

opinion denying leave to amend their applications to specify alternate ant. site, waive certain rules and enlarge issues in proceeding on their applications for new tv stations to operate on ch. 22 in New Orleans, La. and Supreme Broadcasting Co., for mod. of cp of station WZMB-TV New Orleans, to change from ch. 50 to ch. 19. Announced Dec. 30.

By order, Commission granted petition by Broadcast Bureau for reconsideration of Nov. 21 Commission order which adopted and made effective immediately Oct. 5 initial decision granting application of Grady M. Binyard for new am station to operate on 1010 kc. 600 w. DA, D, in New Boston, Ohio, and corrected initial decision to delete any reference to the use of directional antenna. Announced Dec. 30.

By order, Commission dismissed as moot (1) question certified to it by hearing examiner for advice as to whether L. Elif, Bostg. Co., Jet Bostg. Co., and WERD Bostg. Corp. were entitled to indefinite continuation of hearing on their applications for new tv stations to operate on ch. 66 in Erie, Pa. for pendency of the rule making proceedings; and (2) petition by Broadcast Bureau to dismiss applications without prejudice on the basis of not having filed a timely notice of appeal. Announced Dec. 24.

By order, Commission granted joint request by WMBQ Inc. (WMBQ-FM) and Auburn Publishing Co. (WMBQ-FM), Auburn, N.Y., for extension of time to Feb. 2, 1960, to file applications for renewals of licenses of those stations. WMBQ-AM-FM had sought reconsideration of a May 22 grant to Herbert P. Michels for new am station (WBQ) to operate on 1000 kc. 1 kw. day, in Auburn, because of economic impact, to which Commission's July 30 order afforded an evidentiary hearing. Commissioner Hyde voted for grant to regular time for filing renewal applications. Announced Dec. 30.

[FOR THE RECORD] 87
Florida's population gains continue to make good news

One of last winter's hottest news stories was the cold spell in Florida. Just about everyone learned it was the state's longest "cold snap" in 43 years. Predictions were many that the effect would seriously cut the flow of new residents and set back Florida's rapidly expanding economy. But what happened? People kept right on coming at a rate of over 18 thousand per month.

Florida's year-in, year-out population growth was not curtailed. It still goes on. Despite record cold weather and its widespread publicity some 225,000 people moved here in 1958. A gain in one year equal to the population of Spokane or Youngstown.

Not all of these new residents are retirees either. Far from it. Twenty-seven percent are in the under-18 age group. Forty-five percent are in the 18 to 44 age group. Twenty-one percent are 45 to 64. Only seven percent are 65 years and over. Florida is growing with young families and with an active earning and spending population that is building a prosperous market for goods and services.

Add to these significant numbers the 8 million-plus tourists who visit Florida yearly and you have an idea of its broad economic base. Four and a half million resident Floridians with per-capita incomes topping all other southeastern states, plus the additional buying power of one billion, three hundred million tourist dollars per year. The total is making Florida's retail sales volume grow even faster than its population—$5 billion, 900 million in 1957, according to Sales Management figures. A 29% jump in 2 years. Preliminary figures for 1958 show retail sales well ahead of 1957.

Last winter the big news from Florida was cold weather. But the good news was its continuing dynamic economic expansion. One that even a 43-year record cold spell did not unbalance.

For news of prime interest to the millions still looking toward Florida—for vacations, for living, for business and investment—it will pay you to keep an eye on its progress. For factual details on any aspect of Florida economy, simply write:

OUR RESPECTS TO . . .

Henry Miner Schachte

Of an early winter evening the view from Henry Schachte's office on the 21st floor of Lever House is striking in its beauty. The lights of the RCA Bldg. off to the right, the Empire State Bldg. sequined in the distance, Grand Central Terminal ahead and, if the expression may be pardoned in Lever House, the Colgate-Palmolive Bldg. down the street—all these add up to one of the most spectacular views in nighttime New York.

But the scenery, much as he enjoys it, is not the reason Henry Schachte may be found so often in his office after nightfall. The fact is that he likes to work. It often brings him to the office early, not before the sun is up—he isn't that much addicted to work—but before many occupants have arrived in the buildings he looks out on.

Mr. Schachte is advertising vice president of Lever Bros., and as such presides over an advertising budget of more than $1 million a year, of which an estimated 75 to 80% is spent in television. He currently is serving also as chairman of the board of the Assn. of National Advertisers, a post to which he was elected last November after several years in a variety of important board and committee assignments. These, hinting the range of his personal and professional interests, have included the radio committee, the magazine committee, the advertising research committee, the executive and finance committee and the advertising management committee.

Against this sort of background there seems little reason to argue—or belabor—the point that he likes to work.

Adman's Beginning • Henry Miner Schachte was born 46 years ago next Monday, on Jan. 12, 1913, in Pittsfield, Mass., the son of William and Susie Schachte. His father was an electrical engineer at General Electric Co., and after school—Williams College, class of 1935—young Henry went to GE, too, though not in the electrical line.

He started as an industrial copywriter, first at the Pittsfield plant and later in the advertising department in Schenectady. He won the transfer not because of any industrial copy he turned in, but through what might be termed social copy. He was asked to write a notice for a cocktail party, which happened to be on top of the incoming pile within view of a visiting advertising executive from Schenectady. The visiting executive liked it and arranged his transfer.

This was about 1938, and from industrial copy he moved into corporate advertising, becoming manager of general corporate advertising before he left in 1942.

When he left, it was to go to Young & Rubicam as a writer on the Westinghouse Electric Co. account. A month later Y&R gave up Westinghouse and took back General Electric—but a rule of the shop was that no one who had worked on Westinghouse could work on GE. This left him, or so he feared, out of a job for only a month at Y&R. The dilemma was solved, however, with his transfer to the contact department, where he rose to account executive on the Borden Co. account.

Agency to Account • Two years later, in 1945, he moved over to Borden as assistant to the director of advertising, subsequently becoming director of the department. He left this post in 1953 to join Bryan Houston agency as senior vice president, leaving in June 1955 to become Lever Bros.' advertising vice president. Less than a year later he was elected to the Lever board of directors. As Lever's advertising vice president, Mr. Schachte performs two basic functions: (1) he is consultant to the general management and the marketing divisions of the company; (2) he has administrative responsibility for the media, promotion, packaging, public relations and marketing research departments.

Mr. Schachte has been in ANA for 14 years, during which time he has run up a record which seems to justify the philosophy he expressed when asked to define his objectives as ANA chairman. "What you do in ANA," he says, "is not done during your one year as chairman, but over a long period of membership."

He does have some general areas that he is exploring with the thought that specific programs may be worked out to improve them. One of these is creativity, an intangible whose importance he feels has been submerged in ANA's concentration on such other fields, however important, as marketing and advertising management.

Need for Creativity • The growth of advertising and especially television, he points out, makes it "much harder to be a good student of creative advertising today that it has ever been" and this at a time when "it has never been more important to be a good student of it." It is ANA's obligation to promote resultful advertising, he notes.

If ANA should turn out a study of creativity even approaching the magnitude of its recently completed work on advertising management which was conducted under the chairmanship of Mr. Schachte, it could become known as the definitive job to date. The advertising management studies, in preparation for three years at a cost of $200,000, produced a series of seven guidebooks which many experts regard as the greatest step ever taken toward more effective advertising.

Mr. Schachte was married in 1933 to Marie Hill of his native Pittsfield. They have four children: Peter, 24, a senior at Emerson College in Boston, where he is studying television; Judy, 22, is married to Gary Malkin and lives at Weston, Conn.; Henry Jr., 21, a student at the Rhode Island School of Design, and Susan, 17, in Marymount Academy at Tarrytown, N. Y.

The Schachtes have a home at Weston, Conn., where they spend their weekends, and an apartment in New York, near his office, for weekdays. Mr. Schachte's hobby is reading, especially history, and he also is a member of the Fairfield Hunt Club in Connecticut and the Williams College Club. In addition to his ANA activities, which have included representation on the Advertising Research Foundation board for three years, vice chairmanship of ARF for one year and chairman for one, he served last year as radio-televison chairman of the national United Community campaign.

Lever's tv-minded ad boss is now chairman of the ANA

Searching for 'the answer'

THOUGHTFUL (and sometimes desperate) radio broadcasters have been looking for "the answer" ever since television arose to chill their spines 10 years ago. What sort of programming, they wanted to know, will hold audiences and keep sponsors happy against the glamor of tv?

In the intervening decade most of the panic has disappeared, for radio has proved indestructible—though not one but many answers to the programming question have been found and put to work.

The latest large-scale search for answers has just been completed. This is a depth study commissioned by KPRC Houston and conducted by the Institute for Motivational Research. The findings, reported elsewhere in these pages, give what IMR officials regard as a strong clue to the kind of programming—in short, the kind of station—that radio listeners want to hear. What they want, says IMR, is a combination of "the authority, reliability and the vast resources of the network stations" and "the more informal, perhaps less professional, but warmer, more intimate approaches and programming of the smaller local stations."

That is what IMR researchers found in Houston. Whether they would find the same desires in Albuquerque or Pocatello or Chicago we do not profess to know. IMR officials think they would. But in many ways this is less significant than the attitude behind the study—the station's desire to find out how it can serve its public better, backed by a willingness to spend what must have been a substantial sum to get this information.

This is a notable but by no means isolated example of radio's continuing effort to improve itself by improving its service to its audiences. The search for "the answer" has been conducted by many stations in many ways. And at the network level, CBS Radio just this week is putting into effect what it regards as its own answer, the "Program Consolidation Plan," just as other networks have devised different solutions in the past.

Broadcasters must continually re-examine programs and audiences to make sure they are in tune with each other. KPRC has made a significant contribution, not only by adding to basic radio research but also by calling attention, through its example, to this need for constant reappraisal and improvement. Constantly beset as we are by claims of supremacy, even incomparability, we cheerfully add a special commendation to KPRC for its having released the findings unexpurgated when in fact it could hardly be pleased, competitively, with some of them.

Oversight overtones

AFTER the gyrations and bombast which animated the investigations of the House Oversight Subcommittee during the past year, it comes as no surprise to find that the report to Congress of the Committee's majority embodies a mixture of good, indifferent and preposterous legislative recommendations.

Those who had hoped that the subcommittee would recommend its own demise are obviously disappointed. The majority wants the work to continue, and asks for additional funds, though the Oversight unit itself might not be continued. By whatever name it may be called, it would still be objectionable if it continued its reckless course of admitting hearsay testimony and of permitting reputations to be besmirched without proper opportunity for rebuttal.

It was to be expected the majority would go all out against ex parte contacts. Practitioners and applicants, as well as Congressmen, should know such practices are improper and unethical, but they won't end until politics are eliminated from administrative government and commissioners are appointed for longer tenures.

All to the good are the majority recommendations that direct and indirect pay-offs (strike applications) be prohibited; that the artificial barrier between the FCC and its staff be eliminated; that decisions on motions be issued in 60 days to end hinder-and-delay tactics and that the FCC show greater consistency in the application of its criteria in deciding cases. There is merit too in the recommendation that the chairman be selected by the FCC itself, although we have misgivings about limiting the chairman's term to three years.

In the area of the preposterous is the proposal that FCC approval must be obtained before anyone can negotiate to purchase an existing station and that hearings must automatically be held. This is even more untenable than the old Avco procedure, whereby facilities would go to the highest and best qualified bidder. After a trial period, this provision was repealed in 1952 upon insistence of the FCC, licensees and Congress too.

On the one hand, the majority proposes to eliminate red tape and paper work, and then, in its transfer proposal, it would add infinitely more. An automatic hearing on transfer alone, without regard to the FCC's prior approval to negotiate, would mean perhaps a two-year delay in each instance. Consider the social and economic changes likely to occur in a two year span. This provision, if adopted, would probably discourage transfers to the point of freezing ownerships.

The majority is to be commended on one conclusion. It flatly rejected a proposal that television programming be investigated, properly concluding that this invaded forbidden areas and constituted censorship.

The majority report should be appraised in proper legislative juxtaposition. It is a report of a subcommittee to the full Interstate & Foreign Commerce Committee. The chairman of both is Oren Harris (D.-Ark.). Before there can be action, legislative hearings must be held. We have no doubt that many—probably most—of the Oversight Committee recommendations will be washed out. Those that are wholesome and in the interest of better administration and better regulation, should be adopted.

"Put a dress on her. His first tv fight comes up Friday."
