5 McLendon Stations

PROUDLY ANNOUNCE

A CHANGE TO

All-symphonic music

EFFECTIVE APRIL 1

With national attention focused on the astonishing success of McLendon's KABL in San Francisco . . . first "Good Music" radio station in history to win first place in a metropolitan market . . . a sweeping change is taking place in all five other McLendon stations. Though long established overwhelming leaders in every individual market, these five stations boldly seek even brighter horizons by programming *all-symphonic music* 24 hours a day: Rachmaninoff, Brahms, Liszt, Puccini, Tchaikovsky—the masters of great music around the clock!

Good Music:

The McLendon Sound of the Sixties

(april fool)

STATIONS **A** AND **B** AGREE...

KPTV

Channel 12 Portland

HITS

HARD

Yes, **KPTV**, with the power-backed ABC network line-up and proven local programs, has the competition reeling with its double impact on the Portland market:

1. Over 50% of all local TV business is placed to **KPTV**.
2. **KPTV**'s share of audience increased in December by 14.7% over November while stations "A" and "B" dropped.*
3. **KPTV** ran away with 8 of the top 10 "once-a-week" shows.*

Three good reasons why **KPTV**, Oregon's 1st TV station, is number one with local advertisers who want their sales targets hit... but **HARD!**

P.S. At deadline - latest Telepulse (Dec.) shows **KPTV** powering into first place with greatest share of audience day and night, Monday thru Friday.

Represented by Edward Betty & Co., Inc.

*Nielsen, Nov. & Dec., 1959

First home with the message, television has become the VITAL communication service of America! Honest, factual reporting is given the irrefutable element of pictorial action. Three-dimensional documentaries enrich and interpret 1960 living with speed, depth and drama that matches reality. For these VITAL communications services, KTRK-TV has earned an increasingly honored place in the attention of the public of the Houston area.

Representative: The MEEKER Company, Inc. New York • Chicago • Los Angeles • San Francisco

Plugola pains • FCC's abrupt and summary notice that stations must identify on air free phonograph records and other plugs that are directly or indirectly paid for is headed for modification or possibly withdrawal. While commission gave no indication last week regarding what it might do, violent repercussions have caused several members to wonder about wisdom and reasonableness of interpretation.

Several members of FCC had tongue-in-cheek when FCC voted tough interpretation on March 16. Normally commission would have resorted to rulemaking procedure, seeking further comments, but pressures, along with shift in chairmanship, resulted in action taking on aspects of "Blue Book" type of regulation. Having misgivings about procedure, it's learned, were Commissioners Hyde, Lee and Cross, although they did not vote against action. Chairman Ford and Commissioner Bartley supported approval, while Commissioner Craven, who in past has adhered to hands-off-policy on programming and business regulations, was non-committal.

Fellows' successor • There's no timetable on selection of successor to late Harold E. Fellows as president-chairman of NAB. Seven-man selection committee will meet during NAB convention in Chicago and, at that time, chart course of action. Prospects are there'll be no great hurry, but if ideal individual should become available, action might be rather speedy—within two or three months. Otherwise there is good chance selection will be held up until after elections but with considerable contacting and screening done in interim.

Approach on new NAB direction is two-fold: if individual is familiar with mass communications or broadcasting field, it would be up to him to establish his chain of command. If, on other hand, some outstanding public figure not indoctrinated in broadcasting should be selected, then No. 2 man, functioning as chief-of-staff at organizational level, also might be designated.

Spot lengths • Controversy over one-minute tv announcement vs. 20-second commercial continues to rage at agencies, creative people wanting minute to get in "full message," others—media and marketing people—leaning toward 20-seconds for placement reasons (adjacencies to prime evening shows, for example). That subject is far from resolved to satisfaction of agency

policymakers was obvious from frequent references made during Kenyon & Eckhardt's seminar in New York last week (see story, page 44).

Regrets • As expected, all three tv networks have politely declined Station Representatives Assn.'s proposal for tri-partite conference on (1) increasingly knotty problem of product protection in spot announcements and network commercials, and (2) liberalization of station breaks to give affiliates (and their reps) more spot time to sell (BROADCASTING, March 14). SRA had suggested that these subjects and perhaps others of mutual concern should be explored in meeting of network officials, reps and network affiliates. Networks have now given their respective replies and, though SRA considers it improper to release contents and networks are reluctant to do so, it's known that network consensus was that these are problems best thrashed out by them with own affiliates and that, in fact, in many cases this was being done.

Dead-end • Even if bills introduced by House Oversight Committee Chairman Oren Harris (D-Ark.) to outlaw payola, license networks, crack down on station transfers and authorize middle-ground license suspensions should pass House, what chance would they have in Senate? Quick answer is practically none since Senate is now driving toward adjournment in time for July political conventions. There wouldn't be time for essential hearings with loaded Senate Commerce Committee agenda, parliamentary experts say (see page 80).

Deintermixture • Now that FCC has ordered rulemaking to deintermix Fresno, Calif., to all uhf, it's regarded as just question of time before it follows suit in Bakersfield, Calif. where situation is virtually identical. And from Bakersfield FCC may go to several other markets where only one vhf operates as island in uhf area—assuming Fresno ruling is finalized. Prior to last week's formal ruling, FCC had proposed making both Fresno and Bakersfield all vhf markets by series of channel shifts.

Up for grabs • Broadcasters who are already in trouble with FCC may be in for more of same if new prospective purchasers file for their facilities, and send renewal applications into comparative hearings. This is happening to WMEX Boston which received 309(b) letter from commission concerning payola and program discrepancies

(BROADCASTING, March 7). Joseph H. Elcock, Boston attorney, confirmed that he is helping to incorporate Allied Broadcasting Inc. which is going to apply "very shortly" for WMEX facility. Mr. Elcock declined to say who purchasers are, or whether any of them is actively engaged in broadcasting.

Brighter side • There's no cloud that doesn't bring someone little bit of sunshine. FCC action March 16 in approving and issuing sponsorship interpretation unblocked more than 400 applications which were being held in abeyance pending clarification of identification policy. Processing already has started on applications for renewals, new stations or changes in facilities by existing licensees and on transfers. All related to licensees whose practices, as reported in answers to payola questionnaires, were in doubt.

Boomerang? • Although ASCAP's new system of distributing performance credits has blessing of Justice Dept. (see page 130), some observers last week were wondering whether its practical effect will be all it's meant to be. They point out that although credits for theme and background music on twice-weekly and more frequent shows are being reduced by 75%, total monies being distributed remain unchanged. Thus while publishers and writers of such music used on most daytime programs will receive less, those represented on once-a-week shows—notably nighttimers—will get proportionately more than in past. So, they ask, does ASCAP move really curb incentive for payola, as ASCAP claims? Or, insofar as nighttime programs are concerned, does it not increase incentive? ASCAP and Justice Dept. hope that it will be more difficult to induce plays of particular song or composition on once-a-week show than it seems to have been on multiple weekly shows.

Ways around • Broadcasters and record promoters alike are concocting novel ideas on how to beat FCC's new sponsor identification ruling. One idea, being tried this week in eastern markets by record distributor (Washington, Baltimore, Richmond and Norfolk) is to rent single promotional records to stations for 2 cents each and albums for 5 cents each. After station use, these would be returned with payment of rental. Records normally retail for \$1, cost wholesaler 48¢ and dealer 65¢. Albums generally retail for \$3.98, cost wholesaler \$1.98 and dealer \$2.47.

"I HOPE WAGA-TV'S EXAMPLE WILL BE WIDELY EMULATED"

■ HERMAN E. TALMADGE, U.S. Senator

Thirty minutes of prime evening time belongs to the people of Georgia as WAGA-TV presents its public affairs program, "Reporter's Notebook." A panel of distinguished *local* and *state* newsmen interview the newsmakers. Georgia's Senator Talmadge says: "WAGA-TV is making a significant contribution

HERMAN E. TALMADGE

toward keeping the public informed. There can be no more effective way in which television can fulfill its responsibilities to the public!" ■ Seven additional half-hour public service programs are originated by WAGA-TV each week, several of which are produced with the cooperation of area colleges and universities as part of adult education courses. ■ A basic programming objective of WAGA-TV is: "... to promote community betterment . . . the development of an active, informed citizenry . . . to cooperate with the recognized governmental, civic, charitable, religious, educational and other agencies dedicated to these ends."

MR. FOREMAN

Why sponsor-program divorcement? • A top Madison Avenue agency executive wonders about the wisdom of the "hands-off" program policy announced by Standard Oil of New Jersey in connection with its sponsorship of WNTA-TV New York's *Play of the Week*. In his book, this really isn't program "sponsorship," it's merely buying spots. To Robert L. Foreman, executive vice president in charge of creative services, BBDO, New York, business-sponsored television and quality television are "thoroughly compatible." He talks about it in this week's MONDAY MEMO. Page 36.

New commissioner • Ike's appointee to fill vacant FCC chair is Edward K. Mills. A New Jersey lawyer, with a long and excellent background as administrator, he awaits confirmation to FCC post by Senate Commerce Committee. Page 43.

Tv network program buying • Kenyon & Eckhardt feels it's the "long-range" view that counts; warns delayed advertiser decisions may be fatal in view of today's feverish speed in lining up schedules. Page 44.

What it takes in network tv • A look at what's spent in gross time purchases alone by advertisers if they are to make an appreciable dent on the networks. Statistical summary based on TvB's reports. Page 52.

Broadcasters begin lily-white existence • Begin revising 30 years of practice in compliance with new sponsorship identification regulations. Anger expressed at manner of issuance and inability to challenge interpretations. Campaign begun to seek redress. Page 58.

Payola commentators • Leading broadcasters bring in siege guns and pound out series of protests against ambiguities in commission's proposed payola rulemaking. Consensus: FCC should clarify what they want, even if it has to hold hearing. Page 66.

He's reluctant • Ford tells House group he wouldn't want to be the first one to test proposed law making it a crime to fail to write up "fair summary" of rulemaking conversations. Page 74.

Tough legislation • Harris promises hearings soon on two new Oversight-inspired bills. Page 80.

Montreal monopoly officially ends • Two tv stations granted in Montreal, market heretofore reserved exclusively for CBC outlets. Page 139.

CAPITAL CITIES BROADCASTING

Ask 'rule of reason' in ethics bill quiz

Legislative proscriptions against ethical improprieties in federal agencies should be in general rather than detailed terms. Otherwise, offenses not now contemplated would escape by omission or conduct be prohibited which might not prove objectionable. House Commerce Committee was told Friday.

Warren E. Baker, former FCC general counsel and representing Federal Communications Bar Assn., testified in favor of more general language of HR 6774 (recommended by American Bar Assn.) than details of HR 4800, holding ethical standards and impropriety are "clearly matters to be governed by a rule of reason."

He was questioned so closely by Rep. Peter F. Mack (D-Ill.) about his friendship with attorney interested in Pittsburgh ch. 4 case that GOP Rep. J. Arthur Younger (Calif.) cracked questions should have been put by House Oversight Subcommittee.

Mr. Baker thought HR 6774 gives FCC proper discretion to place ban on off-record contacts in adversary-type rulemaking, but not legislation, while HR 4800 makes no distinction. HR 4800 imposes *ex parte* prohibitions against all FCC employes when only those involved in "decisional process" should be affected, he said.

'Dirtiest Work' • Rep. Mack expressed indignation at idea some rule-making shouldn't have *ex parte* bans and suggested "throwing the record out the window and letting everything be done *ex parte*. Then everyone has a chance." He charged "dirtiest work" was done in rulemaking and in some cases FCC was "honeycombed" by parties making oral comments to agency.

Fresno uhf plan

KFRE-TV Fresno, Calif., announced Friday it was willing to accede to FCC proposal to make that California city all uhf and give up its vhf ch. 12 operation. Roger W. Clipp, Triangle Publications radio-tv vice president, said that when Triangle bought KFRE-TV in 1959 there was outstanding FCC proposal to change KFRE-TV from ch. 12 to ch. 30. Triangle engineers determined that ch. 30 operation from present transmitter site would serve Fresno, Mr. Clipp said, and if ch. 30 is still

'Musicasters'

Disturbed over "unpleasant associations" now in public mind over the term "disc jockey," WEOK Poughkeepsie, N.Y., isn't going to use it any more on its record shows. Personalities on WEOK programs now are called "musicasters."

available for use in Fresno Triangle would waive its rights to hearing and acquiesce in move. FCC last week issued rulemaking to shift Fresno to all-uhf operation, with ch. 12 being reserved for educational use or shifted to Bakersfield (early story page 72).

Fm roster adds Barr

James E. Barr, assistant chief, FCC Broadcast Bureau, will address National Assn. of Fm Broadcasters at final morning meeting April 3 during NAB Chicago convention. Session is part of Fm Day (NAB convention coverage starts page 83). Other convention developments at weekend include these Conrad Hilton suite assignments: Station brokers—Blackburn & Co., 1323; R. C. Crisler & Co., 723A; Hamilton-Landis & Assoc., 1722; Norman & Norman, 834A; Edwin Tornberg & Co., 1318A; Paul Chapman, unspecified. Independent Tv Corp. was assigned 934A.

DuPont cites three

Three awards were given radio-tv March 25 by Alfred I. DuPont Awards Foundation at Washington ceremony. Receiving awards for meritorious service: WNTA-TV New York, large station category, for bold and imaginative programming to adults; KOLN-TV Lincoln, Neb., small station, for close identity with social, political, cultural and economic interests of community; David Schoenbrun, CBS news commentator, Paris bureau, for sense of history, lucid thinking and clarity of style. Awards are administered by Washington & Lee U.

Four new am grants

By final decision FCC Friday granted permits for following am stations: Irvanna Bestg. Co., Irvine, Ky., 1550 kc, 1 kw-D; Courier-Times Inc., New Castle, Ind., 1550 kc, 250 w unl.; Mainline Bestg. Co., Johnstown, Pa., 1470 kc, 500 w-D; Radio Rhode Island, Providence, R.I., 990 kc, 50 kw, DA-D.

NBC buying KTVU (TV) with RCA stock trade

NBC is paying for purchase of KTVU (TV) San Francisco-Oakland in RCA stock, agreement filed with FCC Friday disclosed. Contract showed NBC is exchanging 110,843 shares of RCA stock for all 20,000 outstanding shares of KTVU. RCA closed at \$68 Friday, making basic price over \$7.5 million for station.

In addition, contract showed that NBC is assuming KTVU obligations not to exceed \$320,000 in bank loans and not over \$280,000 in stockholder loans. NBC also is pledged to pay Willet H. Brown "residual" value of station equipment plus \$250,000. He is lessor of equipment. KTVU is owned by William D. Pabst, Ward D. Ingram, Edwin W. Pauley, Mr. Brown, Stoddard P. Johnson and Harry R. Lubcke. KTVU sale is portion of multiple-part transaction involving exchange of NBC's Philadelphia stations for RKO General's Boston outlets; RKO General's purchase for \$11.5 million of NBC's Washington outlets and sale of RKO General's WGMS-AM-FM stations to still undetermined buyer (BROADCASTING, Feb. 29).

WBBM-FM simulcasts

Separate programming operation was discontinued last night (March 27) by WBBM-FM Chicago after 20-month trial. Outlet resumes duplication of WBBM-AM. E.H. Shomo, CBS Radio vice president and WBBM general manager, said "listeners . . . can be served no better than with duplication am-fm transmissions" and programs "of great importance" from CBS Radio.

Five uhf dropouts

With deadline today (Monday), half of "idle" 54 uhf permittees have replied to FCC letter of inquiry as to their status. Scoreboard shows five drop-outs (WPTR-TV Albany, N.Y., WEOL-TV Elyria, Ohio, WKNE-TV Keene, N.H., WIND-TV Chicago, and KSPG [TV] Tulsa). WTVI (TV) Ft. Pierce, Fla., said it will begin construction soon, going on air in early fall.

WGA meet March 31

Writers Guild of America reported Friday that membership meeting has been scheduled in New York and Hollywood March 31 to give union negotiators authority to call strike against

AT DEADLINE CONTINUED

CBS, NBC and ABC if necessary. Current pact covering freelance and staff writers on live radio-tv programs expires April 1.

• Business briefly

Comeback trail • Grant Adv. acquires \$1.5 million Penick & Ford Ltd. account, moving from BBDO. Advertiser is considerable broadcast spender on behalf of My-T-Fine desserts, Cocomalt, Vermont Maid syrup and other food

products. Move means slight recoup for Grant of \$17 million Dodge billings lost when Chrysler rearranged agency-product lineup earlier this month (BROADCASTING, March 21). BBDO gained \$11 million or more at that time.

Good old radio time • J. Walter Thompson Co. is shopping radio networks and stations preparing for annual Cut-Rite wax paper picnic campaign. Last year client used short bursts during pre-July 4 shopping season on two

networks and 145 stations.

Play ball • Phillies cigars signs for renewal of half of each of 50 *Major League Baseball* telecasts on NBC-TV for 1960 season. Anheuser-Busch, Genessee Brewing and National Brewing also renewed sponsorship of telecasts on regional basis. Agencies: Phillies, Wermen & Schorr, Philadelphia; Anheuser-Busch, Gardner, Chicago; National Brewing, W.B. Doner & Co., Detroit; Genessee Brewing, McCann-Marschalk, N.Y.

WEEK'S HEADLINERS

MR. MITCHELL

MR. STAHLE

MR. SACKS

JOHN H. MITCHELL, ABC vp in charge of KGO-AM-FM-TV San Francisco, appointed manager of recently formed Central American Television Network (BROADCASTING, Dec. 7, 1959). He will be in charge of CATVN, which includes Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua. In succeeding changes, JACK STAHLE, sales manager of KGO, is appointed manager and DAVID M. SACKS, commercial manager of KGO-AM-FM-TV, named manager of KGO-TV. Mr. Mitchell joined ABC in February 1953 as vp in charge of WBKB (TV) Chicago. Later that year he became vp and general manager of WABC-TV New York and in 1954 was assigned to ABC-TV. In October 1956 Mr. Mitchell was appointed special assistant to Leonard H. Goldenson, president of American Broadcasting-Paramount Theatres, and in January 1957 assumed general managership of San Francisco stations.

MR. HOUSTON

BRYAN HOUSTON, vice chairman of board and general manager of Fletcher Richards, Calkins & Holden, N.Y., elected president, succeeding FLETCHER D. RICHARDS, who continues in active management of agency as chairman of executive committee. BRADLEY A. WALKER continues as chairman of board. Bryan Houston Inc. merged with Richards agency last July 10, consolidated operation and

at present bills in excess of \$30 million, including such accounts as Eastern Air Lines, United States Rubber Co., J. P. Stevens & Co., Heublein Food Div. and J. A. Folger & Co. (San Francisco). Before forming his own agency in 1955, Mr. Houston was president of Sherman & Marquette, executive of Lennen & Mitchell, executive vp and general sales manager of Pepsi-Cola Co. and vp of Young & Rubicam. Fletcher Richards consolidated with Calkins & Holden early in 1959.

MICHAEL J. O'CONNOR, formerly merchandising director

and plans board member at Tatham-Laird Inc., Chicago, joins Foote, Cone & Belding as vp and director of its Chicago office merchandising department. FLORY G. KORALIK promoted from staff to manager of department. Mr. O'Connor had been with T-L for seven years and previously was sales manager for General Electric Co. in Brazil. Mr. Koralik was assistant advertising and sales manager at National Tea Co. before joining FC&B eight years ago.

MR. BEAUDIN

MR. GIBBS

RALPH W. BEAUDIN, general manager of KQV Pittsburgh, appointed general manager of WLS Chicago, and JOHN GIBBS, KQV program and sales manager, named to succeed Mr. Beaudin as general manager of KQV. ABC-

Paramount Theatres Inc., which owns KQV, had owned 50% of WLS until March 18 when it signed contract to acquire remaining 50% held by Prairie Farmer Publishing Co. Mr. Beaudin joined KQV as general manager in 1957 and earlier had been in executive posts with WBNY Buffalo, and KOWH and KOIL, both Omaha, Neb. Mr. Gibbs has been with KQV since 1945, having served as news and sports broadcaster and director of public service.

BEN HOBERMAN, general manager of WABC New York, moves to KABC Los Angeles in similar position, succeeding JOHN H. PACE, who has resigned after holding post since December 1957. HAROLD NEAL, general manager of WXYZ Detroit, moves into WABC managership, succeeding Mr. Hoberman, who also came to New York from WXYZ. All stations are owned by ABC. Mr. Pace has not announced his future plans; no successor to Mr. Neal in Detroit has been named.

MR. HOBERMAN

MR. PACE

MR. NEAL

FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES

HOW DOES A TOMATO SOUND? Like the long chant of picturesque street hucksters and their horse-drawn carts. Like a tempting tossed salad on candle-lit tables in homes throughout the country. Or, like thousands of bulging lunch counters during the noon-day rush . . . This is the sound of the blossoming tomato business in Maryland . . . A rich sound . . . A growing sound. It's the busy sound of a large Maryland industry that grows, packs and ships over *one-third* of all the tomatoes consumed in the United States. It's a mighty sound that adds millions of dollars in spendable income to the millions more earned by Marylanders in countless other industries. You can harvest this plush market for your client when you plant his sales seed on WBAL-RADIO, the station with cultivated roots in Baltimore and beyond. WBAL-RADIO is the progressive Maryland station with the sound of elegance, the Sound of the Sixties... the sound that ripens prospects into full-grown customers in the massive Maryland market. **WBAL-RADIO, BALTIMORE** Broadcasting in the Maryland tradition/Nationally represented by Daren F. **A CALENDAR OF MEETINGS AND EVENTS
IN BROADCASTING AND RELATED FIELDS**
(*Indicates first or revised listing)

MARCH

March 29—Cincinnati Council, American Assn. of Advertising Agencies annual meeting. Speakers: Kevin Sweeney, president, RAB; Pete Cash, president, TVB. Queen City Club.

March 29—Assn. of National Advertisers' workshop "How to Use Advertising Effectively in Introducing New Products." Hotel Ambassador, Chicago.

March 29—Pennsylvania Assn. of Broadcasters legislative luncheon. Congressional Hotel, Washington. Pennsylvania congressmen will be guests.
March 30—Radio-Television Executives Society production workshop in cooperation with Peters, Griffin, Woodward. 12:15 p.m. Madison Room, Roosevelt Hotel, New York. Topic: "Sweet Sound of Success—in Radio 1960."

March 31—Academy of Television Arts & Sciences, Los Angeles chapter. Groucho Marx, Red Skelton and others will discuss "Comedy in Television" at 8 p.m. meeting at the Beverly Hilton Hotel, Beverly Hills, Calif.

March 31—Assn. of Broadcasting Executives of Texas. E. H. Kitteridge, Jr., executive vice president, Texize Chemicals, Greenville, S. C., and Howard K. McIntyre, vice president, Henderson Adv., that city, will discuss broadcasting's role in Texize's growth. Statler-Hilton Hotel, Dallas.

March 31—Radio Advertising Bureau's annual National Radio Advertising Clinic. Waldorf-Astoria Hotel, New York.

APRIL

April 1—Comments due on FCC proposal for shorter license periods to strengthen its broadcast enforcement.

April 1—Comments due on FCC rulemaking to duplicate 23 clear channels with additional nighttime service.

April 1—Repeat of RAB's National Radio Advertising Clinic. Sheraton-Blackstone Hotel, Chicago.

April 1-3—Women's Advertising Clubs eastern inter-city conference, Sheraton-Biltmore Hotel, Providence, R.I.

April 2—Assn. for Professional Broadcasting Education, Conrad Hilton, Chicago.

April 2—National Assn. of Fm Broadcasters annual business meeting. Conrad Hilton Hotel, Chicago.

*April 3—Daytime Broadcasters Assn. meeting. 11 a.m.-1 p.m. in private dining room 14, 4th floor, Conrad Hilton Hotel, Chicago. All day-timers invited.

April 3-6—NAB Annual Convention, Conrad Hilton Hotel, Chicago.

April 4—Academy of Motion Pictures Arts & Sciences annual Oscar awards ceremonies, Pantages Theatre, Hollywood, and broadcast on NBC Radio-TV networks. 10-11:30 p.m. EST.

*April 4—Industry Film Producers Assn. meeting.

7:30 p.m. Cinesound, 1037 N. La Brea, Hollywood.

April 4-6—American Management Assn.'s national packaging conference, Convention Hall, Atlantic City, N.J.

April 4-7—National Premium Buyers 27th annual exposition, Navy Pier, Chicago. Premium Adv. Assn. of America will hold its annual conference in conjunction with exposition at same site April 5. Major speakers: Michael J. O'Connor, merchandising director, Tatham-Laird, and G. Herbert True, director of creativity research, Visual Research, Inc.; David H. Trott, advertising manager of Procter & Gamble overseas division. The National Premium Sales Executives conducts its sales and distribution seminar April 3.

April 5—Broadcast Pioneers annual dinner meeting. Conrad Hilton Hotel, Chicago.

April 6—Academy of Television Arts & Sciences forum on New York station operations, ABC.

April 8-9—Oregon Assn. of Broadcasters annual meeting. Howard Bell, assistant to president, NAB, is key speaker. Eugene, Ore.

April 9-10—Disc Jockey Assn., membership meeting. Minneapolis (site to be selected).

April 11—Deadline for filing reply comments to proposed FCC amendment of Conelrad manual BC-3 to provide for transmission standards for the Conelrad attention signal. Deadline for reply comments is April 25.

April 13-16—American Public Relations Assn. conference, Greenbrier Hotel, White Sulphur Springs, W. Va. Registration can be made through APRA Convention headquarters, 1010 Vermont Ave., N.W., Room 812, Washington 6, D.C.

April 15-17—National Sales Executives-International spring finance and executive committee meets, Hotel Leamington, Minneapolis.

April 19—Comments on FCC proposal to add additional vhf channels to several principal markets through reduced mileage separations.

*April 20—Radio Advertising Bureau area sales clinic, New York. For complete list of clinics and cities, see THE MEDIA, this issue.

April 20—Deadline for nominations to the Advertising Hall of Fame. Nominations should be sent to the Advertising Federation of America, 250 West 57th Street, New York 19.

April 20-21—Council on Medical Television second meeting. Discussions and demonstrations open to Council members and invited observers. Clinical center, National Institute of Health, Bethesda, Md.

April 21—Pennsylvania AP Broadcasters Assn. Hershey Hotel, Hershey, Pa.

April 21-22—National Retail Merchants Assn. board of directors meet, Hotel Statler, Dallas.

Adult music with the
touch of Gold

Programatic

Programming • Equipment • Commercial Injection

AUTOMATION has come to radio!

In the few months since its inception, leading broadcasters from coast to coast — AM and FM operators of “powerhouses” and “teapots” in big cities and small ones — have buttoned down bigger adult audiences, happier advertisers and bigger profit potentials by buttoning up PROGRAMATIC for their markets.

PROGRAMATIC's unique package of distinctive adult music and fully automatic playback equipment can raise your programming standards the easy way *if* your market isn't already sold!

cornerstone:

This building is rising in Chicago. Location—Michigan and Erie. Name—the John Blair Building. Owners—63 in number, they live in widely separated areas, from Boston to Los Angeles, from Jacksonville to Seattle.

In short, the John Blair Building is owned by Blair stockholders—63 key men in the Blair companies. It is a building for which their Salesmanship forms the cornerstone.

In a still broader sense, the Blair Building bears testimony to Air Salesmanship—the superb selling-power of Spot Broadcasting. For our success in building business for any station rests largely on that station's capacity to build business for advertisers.

As a result, our working relationship with Blair-represented stations is extremely close, with highly effective cooperation on both sides. We have shared

in their progress, and they in ours.

Along with year-to-year sales goals for each of our stations, the Blair Building provides an outstanding incentive for long-range achievement.

As is customary, much of the building-cost is currently covered by sound real-estate financing. But in the years ahead, those building costs have got to be paid.

In consequence, month after month, our organization is virtually pledged to keep beating its past records in sales-performance for our stations—so that in the long run our earnings will place complete equity of land and building in the hands of Blair men.

Yes, the cornerstone of the John Blair Building is Salesmanship. And eventually the entire building itself will stand as a towering tribute to the selling-power of Spot Broadcasting.

BLAIR

salesmanship

Five years and
1,250 telecasts later,
this program is still unsold

(That's the way we want it.)

SOME PROGRAMS become “public service” because they can’t be sold. Others become salable because they render genuine service. WISH-TV’s Farm & Home Program is in the latter category. Because commercial sponsorship might create problems for its participants, the program is “sold” only to its audience.

Since 1955, for five days a week from 1:15 to 1:30 p.m., the Marion County Agricultural Agent, or the County Home Economist, or faculty members of Purdue’s agricultural extension service, or assorted combinations of agents, economists, professors and 4-H Clubbers, have gathered at WISH-TV to inform and entertain an impressive—and impressed—audience (38.4 share in an important 4-station metropolitan market).

What goes on? A turf prof. has held forth on improving the breed—of turf. Flower-arranging produced many requests for instructions—and the station never smelled so good. Cookie decorating sat well with our audience (1,500 requests) and staff (57 cookies demolished). The work of county agents, Purdue University extension services, 4-H clubs and other organizations, is widely publicized. Without stars, without artifice, the Farm & Home Program is wholesome, straightforward—and deep in the affection of its viewers.

The program *serves*. That’s the Corinthian key to good community relations. We suggest that viewer confidence so built may help establish a receptive atmosphere for our clients’ commercials.

Responsibility in Broadcasting

THE CORINTHIAN

Gainesville. (Broadcasting Day, 25th.) Main speaker: Matthew Culligan, general corporate executive, McCann-Erickson.

April 25—Academy of Television Arts & Sciences forum on pay tv vs. free tv.

BOOKS

- "BBC Handbook," 1960, British Broadcasting Corp., Broadcasting House, London W. 1; 274 pp; \$1.

The world's largest non-commercial radio and television organization has published its latest yearbook with a comprehensive review of developments, the organization, financing and philosophy of British government broadcasting.

Among technical highlights covered is development of the transatlantic cable film process, enabling BBC-TV last June to get pictures of the Queen's Canadian tour 2½ hours after the event.

The financial section shows the BBC had a gross income of \$87 million last year from receiver fees. Expenditures are detailed.

Augmenting extensive treatment of the many domestic and overseas services are analyses of program content. For tv, the breakdown is talks, demonstrations and documentary programs 24.3%; children's programs 12.7%; outside broadcasts of sporting events 12.7%; light entertainment including

ANNOUNCING **NEW** 1 KW AM TRANSMITTER!

Continental's Type 314D gives progressive broadcasters advanced design, construction and operational features for years ahead performance.

- ★ Field-proven Screen Modulation
- ★ No modulation transformer
- ★ Completely shielded RF Components
- ★ Built-in phantom antenna
- ★ Meets latest FCC regulations on spurious radiation
- ★ Built-in cut-back to 500 or 250 watts (optional)
- ★ All low-level stages on pull-out chassis — may be serviced in transmitter
- ★ Equipped for remote control

- 1 Maximum accessibility with front and rear doors. RF Components completely shielded in aluminum enclosure. Built-in static drain choke and transmission line RF ammeter.
- 2 External tuning and loading controls with separate adjustment of output power. Over-size blower cools entire tube compartment.
- 3 Vacuum Crystals—no ovens. Pull-out chassis—low-level stages may be tested in operation. No printed circuits. All wiring color coded. Complete circuit breaker protection—no fuses.

musical comedy 12%; drama 9.9%; news services 7.6%; entertainment films 7%; miscellaneous 3.7%; outside broadcasts of national and other events excluding sport 2.9%; opera, music productions and ballet 2.7%; school broadcasts 2.3%, and religion 2.2%.

Although the BBC restates its constitutional inability to take broadcast advertising fees, it's obvious the government service is able to pick up an honest pound here and there outside of set taxes. Sale of the *Radio Times* nets some millions a year, and there are 20-odd pages of advertising in front and back of the *Handbook*.

• "*Charlie Weaver's Family Album* by Cliff Arquette"; John C. Winston Co., Philadelphia; 58 pp.; \$1.95

If you like Mt. Idy and the people who live there, this book is for you. Few of Charlie's best friends will recognize the pictures in his family album, because most of people portrayed are long dead. However there is a remarkable resemblance between Charlie and his family lineage.

There are pictures of Grampa Weaver who was the first man in the Civil War to jump from a balloon without a parachute, etc., etc., etc.

• "*The Politics of National Party Conventions*" by Paul T. David, Ralph M. Goldman and Richard C. Bain; The Brookings Institution, 722 Jackson Place N.W., Washington 6, D.C.; 592 pp.; \$10.

The authors attempt to analyze the convention as a system of determining nominees for the Presidency and Vice Presidency. One chapter ("Mass Media Efforts and Voter Choice") terms radio "supreme" as the hour-by-hour reporter of convention happenings. Tv is not far behind on spot news, the authors state, and it "often adds the further impact of the visual image of persons and events."

However, the newspapers are "the principle source of detailed news."

The authors state that when the mass media speak with "something approaching a united voice" in reporting the public's opinion, they exercise an "obviously substantial" effect on convention delegates.

Messrs. David and Bain are members of the Brookings staff and Mr. Goldman is on the faculty of Michigan State U.

• "*The Invisible Presidency*" by Louis W. Koenig, Rinehart & Co., 232 Madison Ave., New York 16; \$6.95.

A book of intimate portraits of seven presidential advisers, ranging from Alexander Hamilton (George Washington) to Sherman Adams (Dwight Eisenhower). Broadcasters will be most interested in the chapter devoted to Gov. Adams, entitled "O.K., S.A." In

it, the Goldfine affair, the Mack-Miami ch. 10 case, and Gov. Adams' relations with the "independent" executive agencies (the FCC, SEC, etc.) are dealt with in an informative manner.

- *"The Armchair Theatre"* by ABC Television Ltd.; Weidenfeld and Nicolson, 20 New Bond St., London W1 England; 115 pp.; \$2.80 (20 s.)

A documentary on the *Armchair Theatre*, a Sunday night series of plays that ABC Television Ltd. has been producing for four years, this book also includes a general survey of British drama seen on tv.

Also included are articles by leading British television craftsmen on the arts of acting, producing and writing for television.

The book is illustrated with some excellent photos of scenes from the first three years of *Armchair Theatre* productions. Some of the sets, particularly one of a mansion of the Edwardian period, are far more lavish than any seen on American tv.

All in all, the book provides an interesting commentary on contemporary British tv production of drama.

On the magazine rack:

- *"She Speaks to Seven Million Women,"* April issue of *"Ladies Home Journal"* — Feature article on Ruth Lyons, Crosley Broadcasting personality, tells of her activity with 50-50 Club on WLWT (TV) Cincinnati and other Crosley stations. Traces her 18 years in broadcasting to present day stint of 90 minutes a day, 5 days a week, 52 weeks a year. Popularity cited by fact that luncheon tickets for her broadcast have been sold as much as five years in advance. "Ruth Lyons is probably the most valuable, most-sought after non-network property in television," says author Betty Hannah Hoffman. In preceding companion piece, Miss Lyons turns autobiographer.

- *"Television, Radio, Comics and Movies,"* April issue of *"Ladies Home Journal"* by Benjamin Spock, M.D.— Dr. Spock, whose word is practically bible to parents, analyzes influences of various media on children and suggests positive steps that might be taken by parents. Included: write your senator re establishment of a government commission to study tv.

- *"Must Tv Bring the Bathroom Into Our Living Room,"* current issue of *"The Readers' Digest,"* by Blake Clark — The author, who exhibits tendencies toward nausea at the drop of a commercial, goes into a full-scale attack on tv advertising messages, and is successful in painting a picture of endless bad taste in tv.

Now... Power Savings of

—through Unique Circuit

NEW BTA-5T 5 KW AM TRANSMITTER

How It Works: The increase in efficiency in the BTA-5T Transmitter is achieved by reshaping the modulated amplifier plate current pulse to reduce the power loss in the power amplifier tube during the conduction interval. A harmonic trap in the cathode circuit squares up the wave shape of the grid driving voltage, and another trap in the plate circuit further shapes the plate current pulse. Consequently, when the tube begins to conduct current, the power loss in the tube plate circuit is low and remains so throughout the cycle.

15,000 KW Hours per Yr.!

ANOTHER WAY
RCA SERVES
BROADCASTERS
THROUGH
ELECTRONICS

permitting 90% Plate Efficiency

NEW HIGH-PERFORMANCE 5 KW AM TRANSMITTER

This new transmitter incorporates the only significant development in Class "C" power amplifier design in 20 years. A new circuit provides a plate efficiency of 90%.

With continuous operation, savings of approximately 15,000 kilowatt hours per year are realized. Only 1 PA tube is needed.

Other improvements, including all silicon rectifiers and improved protective circuits, enhance performance and extend operating life.

Functional styling provides a choice of red or grey doors to suit station decor and add a harmonious note.

Some of the fine features of the New BTA-5T

1. FEWER TUBES—Fewer tubes—a total of twelve—save on replacement cost. Only one 5762 PA Tube for lower operating cost.

2. QUIET-OPERATING BLOWER—Very low plate dissipation in the output stages reduces heat within the transmitter, and also permits use of a slow-speed blower for quiet operation.

3. SILICON RECTIFIERS—All silicon hermetically sealed rectifiers of proven reliability are ideal for remote control.

4. OVERLOAD PROTECTION—Complete overload protection is provided for all circuits. All line breakers carry

an instantaneous over-current protection, while main breakers retain instantaneous and thermal protection. Remaining circuits are protected by fast-acting overload relays with provision for external indicators.

5. REMOTE CONTROL PROVISION—Built-in provision is made for *remote control* and conversion to Conelrad, power cut-back and a carrier off monitor.

6. FCC OK—Meets all new FCC Spurious Emission requirements.

7. SPACE SAVING—New style cabinets offer excellent accessibility to all components and allow a great saving in floor space.

Your RCA Broadcast Representative will gladly provide further particulars about this new transmitter. Or write to RCA, Dept. E-22, Building 15-1, Camden, N.J. In Canada: RCA VICTOR Company Limited, Montreal.

Selling power of television

EDITOR: We have need for the March 24, 1958, issue . . . or at least a tear-sheet covering the story, "How one year with tv out-did 10 without it" (page 117, MONDAY MEMO from Thomas H. Lane, vice president, Lennen & Newell). —Bernadette A. Becker, Assistant Librarian, Campbell-Mithun Inc., Minneapolis.

[Back copies are available. One is enroute. —THE EDITORS.]

Spreading the 'gospel'

EDITOR: I am attaching a reprint of the double-spread black-and-white advertisement which you so generously arranged to carry in the Jan. 4 issue.

This reprint is being sent to some 5,000 top executives in business, advertising and media who, in one way or another, are affiliated with The Advertising Council and contribute to our programs. An additional 5,000 reprints will be circulated by council directors, clients and advertising supporters to key business people of their acquaintance.

Our purpose in distributing reprints of the advertisement, this year as in the past, is to be sure that industry, advertising and media are aware that their own good works are known to the public.

We very much appreciate the support you give to this once-a-year project and to others throughout the year.—Theodore S. Repplier, President, The Advertising Council Inc., New York.

Israel commercial radio

EDITOR: In one of the recent copies of your magazine there was a note on the introduction of commercial radio on Kol Israel (CLOSED CIRCUIT, Feb. 15). There were a number of errors in the report and I think, purely for the record, I should like to give you the complete story.

We begin commercial radio on April 3. The two hours will be from 5 to 7 p.m. on an alternate wavelength. This is being done in order to avoid any interference with our main network program. The individual spots are 15 seconds minimum and 30 seconds maximum, at a cost of IL75 (\$41.25) per 15 seconds. There are some programs in our weekly schedule for which we are asking a premium price, sometimes as high as 100% above the minimum price. We are limited to 10 minutes of commercials for the two hours, or 5 minutes in each hour. The government has approved this commercial arrangement for an experimental period of six months in order to give it a chance to prove itself.

At the end of this year, should we

of one-hour public-service spectaculars.

MEDICINE 1960

PREMIERE TELECAST ON KCPX-TV, SALT LAKE CITY... RATINGS UP 79.5%

On Friday, March 11, 1960, 9:00-10:00 PM, KCPX-TV, pre-empted its usual network programs and became the second station in the U.S. to telecast MEDICINE 1960. (KRON-TV, San Francisco, the first station, drew ratings of 18.3, 15.9 and 20.4 for the first 3 shows in the series and topped 8 out of 9 network competitors.)

Here are the impressive Trendex figures for Salt Lake City. They show a 79.5% rating increase over the previous rating report for KCPX-TV.

		Rating	Share
KCPX-TV	"MEDICINE 1960"	28.0	44.2%
Station Y	Network Western	16.2	25.6
Station Z	Feature Film	19.2	30.2

More and more stations across the country recognize that MEDICINE 1960—12 hour-long video taped programs of actual operations and demonstrations of advanced medical procedures—is, by every standard, an outstanding example of provocative public service programming.

The following are some of the other stations that have already bought MEDICINE 1960:

KRCA	Los Angeles	WWJ	Detroit
KPLR	St. Louis	KING	Seattle
WTVJ	Miami	KFSD	San Diego
WROC	Rochester	KGW	Portland, Ore.
KERO	Bakersfield	WFGA	Jacksonville
KREM	Spokane	KLRJ	Las Vegas
WLOS	Asheville	KPHO	Phoenix
KRDO	Colorado Springs	KTVA	Fairbanks
KENI	Anchorage	KNDO	Yakima
		KNBS	Walla Walla

Vtr cuts re-make costs

EDITOR: We should like to order 1,000 reprints of the article appearing in the March 7 issue, page 24, under the caption MONDAY MEMO from Kenneth C. T. Snyder (vice president, tv-radio creative director, Needham, Louis & Brorby, Chicago and Hollywood) and entitled "Vtr helps avoid costly 're-makes'."—*Richard Madsen, Ampex Professional Products Co., Redwood City, Calif.*

News conference issue

EDITOR: Why the stew over separate news conferences? As a newspaperman who also has been a radio newsman I wish they could be not only separate but private.

What can the broadcast boys lose? Theatrical effect? Unpaid actors? Prompting from the newspapermen who outnumber and outdo them?

Even the network staffs can't compare in strength or sound background, especially on politics, with those of the big dailies.

Outside of the biggest cities, most broadcast newsmen are really nothing more than announcers or cubs. Without comparable budgets, they eavesdrop on newspapermen and pirate from print. I've heard them read my newspaper copy on the air word for word. I've rarely seen them pound the beats.

When the broadcast boys can get their own stuff consistently they'll gain more respect and better access.—*Jack Magee, 1040 Madison Ave., El Cajon, Calif.*

Challenges Atlass on fm

EDITOR: . . . H. Leslie Atlass' remarks pertaining to fm, quoted in your Feb. 29 issue (page 58), cannot go unchallenged.

Referring to the fm industry in general as well as to WBBM-FM Chicago, Mr. Atlass states: "It has not been successful." Were his comment limited to the operation of WBBM-FM, we would agree wholeheartedly. However, to say, or even infer, that . . . fm radio is not successful is a gross misrepresentation of the facts which could be harmful to fm's progress, considering Mr. Atlass' status in the industry.

Many fm broadcasters in major as well as secondary markets can point to successful fm operations. The West Coast is very active fm-wise, with several stations which have made enough of an inroad to be called successful operations.

Admittedly, these stations have not

Memorable Music! Sparkling Animation! . .

The most important thing a TV station owns is its Channel Number. Now, at last, you can use your own broadcasting facilities to build a memorable, eye and ear catching channel image!

CHANNEL IMAGE IDENTIFICATION

20 fully animated segments!

- Eight 2 second, nine 10 second, three 20 second.
- Customized to your channel number and call letters.
- Black and white or full color.
- Exclusive to you in your market area.
- Thirty-day delivery.

Designed by Ajay • Animation by Elektra • Music by Larry Elgart

New Modern Radio Sound Plan

Quality music for radio IDs with the Larry Elgart Orchestra and the fabulous voice of Carol Sloane

REMEMBER! Any spot identifying your channel must be of higher quality than anything else you may broadcast!

96% of all television homes today fall within the color coverage area. More than 300 stations in the United States have all the facilities to carry network color. At NBC alone, total hours of color programming have increased more than tenfold in the past six years; over 450 hours scheduled in the first six months of 1960. Owners of color sets tend to be higher in income, better educated, more influential. The proof is all around us. Proof that color—an integral part of living—is an integral part of living television. Proof that your advertising future is in color.

NBC TELEVISION NETWORK

...unless it's in color

ED BENHAM, Chief Engineer KTTV-L.A., reports on:

"Here at KTTV, Conrac's consistent high quality has proven time and time again that Conrac's complete range of professional monitors and receivers are the best possible viewing investment for us."

At KTTV, as in hundreds of other television stations, this dependable, uniform Conrac quality means consistently excellent video response — plus, sharply reduced maintenance costs.

Every Conrac monitor
from 8" through 27"

had the union problems that beset WBBM-FM. However, even these are not quite so titanic as Mr. Atlas' remarks would seem to indicate. He is quoted as saying: "Fm for us has been expensive because of the unions. We have 45 musicians on our payroll at \$225-250 a week. None of the independents have any. Our contract with the technicians is such that it takes 45 to operate the station. Our expenses are really high."

Actually, WBBM-FM employs no live musicians per se. It does have platter-turners; but the only live music heard on the station originates from CBS Radio and local remotes. The musicians Mr. Atlas is referring to appear on WBBM-AM-TV. As for the technicians, WBBM-FM uses three per day at the studio and two at the transmitter. Since the fm and tv transmitters share the same location, there is no justification in charging fm with the two transmitter engineers. The 45 technicians constitute an am-fm-tv "pool."

Mr. Atlas states further: "I don't see any real future for fm in this area, because of good groundwave from am, just as good as fm . . . Only in areas where fm can deliver a better groundwave signal does it have commercial hope. People will take a lot of bad programming if they get a good signal."

Obviously, Mr. Atlas never dug far enough to find out why people have been spending millions of dollars each year for fm sets. They have refused to any longer accept the "bad programming" on am that Mr. Atlas referred to. The basic reasons for fm's expansion (despite the super-abundance of am fare available, particularly in the major markets) are: better programming and higher commercial standards. Better reception is a characteristic of fm; but it is of least importance when measuring the success of fm.

Analyzing the WBBM-FM situation at close range, we would say that had Mr. Atlas used the same imagination and showmanship in programming and promoting WBBM-FM that he used to endow WBBM-AM with a live personality, the fm operation in time could have become as successful as the am is . . . —Charles W. Kline, *Fm Unlimited Inc., Chicago.*

MONDAY MEMO

from ROBERT L. FOREMAN, executive vice president in charge of creative services, BBDO, New York

Why sponsor-program divorcement?

I'm just as happy as the next person (who happens to be David Susskind) that the Standard Oil Co. of New Jersey picked up sponsorship of the *Play of the Week* here in New York on WNTA-TV. My elation stems from the fact that I think a series of this quality deserves a sponsor.

However, the publicity which attended this tv buy concerns me. Not the amount of it but the content. It all seemed to focus on the fact that Esso is going to pursue a hands-off policy as far as the program itself is concerned. This leaves me unhappy.

In light of this stand-offish attitude, I wonder if the sponsor's undertaking is so noble after all. Or so business-like. Is this attitude the result of some inability to cope with the editorial content? Is this series something they really don't dig? Or believe in? Are they secretly "a-feared" of it?

Artistic Freedom? • The implication is that this tamper-free sponsorship will permit David to continue to present a series as brilliant and off-beat as he did when it was sustaining. This also implies that if the sponsor had a say over the material, the opposite would be true. I just don't believe that.

Furthermore, I think the sponsor is *shirking* his responsibility. Not only to his stockholders but to the viewing public. In addition, harm is being done David Susskind and the Muses by implying that Standard of Jersey doesn't really like good television. In fact, let's go further—it says that Standard of Jersey really doesn't *want* to be associated with the program. Because of this uneasiness, they're only going to drop commercials into each show as if they were spot buying.

Is this sponsorship? Not in my book.

Program Quality • I don't believe sponsorship necessitates downgrading of a program. I base this view on my own experiences. I've worked with clients of all sizes and types and points of view and never witnessed a pitched battle between business and art. The sponsors I've worked with turned out to have as much judgment and taste and desire to do something of value in television as any other group. By "other" I mean talent, packagers, agents and networks.

The isolated examples we sometimes hear about, "that auto maker" who insisted the Chrysler Bldg. be eliminated from the backdrop in his show and the drug company which didn't want the word "poison" mentioned in its

melodrama and the cigarette company which wanted the heavies in its play to smoke competitors' cigarettes, are to my knowledge few and far between. Amusing examples of exceptions that reflect the pathological twitchings of a nervous few.

I wish Jersey Standard had really undertaken sponsorship of the *Play of the Week*. I'm sorry they felt philanthropy was enough. Were they to work for real rapport with their series, it would have demonstrated an appreciation of what David is doing. And I'll wager the price of a Christopher Marlowe folio there wouldn't be any dilution in program strength nor any shrinking of program stature. That's because I have just as much confidence in the Esso people (whom I've never met) as I have in David (whom I have met and greatly respect).

I know the extent of David's problems with the varied group of advertisers he's worked with here at BBDO. I know all of the Madison Avenue coterie we face him with almost daily. And so far the irritations have been

Robert L. Foreman, an executive vp and director, BBDO, started his career at agency 21 years ago (1939) in trade copy department. He was made vp in 1948, when he was in charge of radio copy department. He is now in charge of all creative services, including copy, art, television, radio and public relations. In 1955 he was elected to the board and in 1957 executive vp.

minor and infrequent. In all fairness, he would have to say—my life with BBDO advertisers has been very pleasant, actually no more troublesome and maybe less than what I have with writers, set designers, choreographers, lawyers, agents and performers.

Post Script • P.S. The above point of view was presented more concisely in a recent BBDO house advertisement on the subject of our particular television programming. While this is a sneaky way of getting exposure for the ad without paying for it, I consider it no more so than the way I was conned at a cocktail party into preparing this tract. "60 caliber tv" was the headline of the ad. The copy went:

"Berating the ratings is a popular pastime these days. However, ratings properly used—instead of abused—play an important role in evaluating a television program. Audience size tells only a part of the story. It gives little clue to program caliber.

"Back in '58 we ran an advertisement on the subject under the headline, 'Nose counting is no longer enough'. There we discussed another dimension of television programming—climate—and what it meant to a number of BBDO television advertisers. Now we present the complete roster of our regularly sponsored prime-nighttime network programs. These demonstrate that good programming is good business . . . that salesmanship can flourish in a healthy climate.

"In other words, business-sponsored television and quality television are thoroughly compatible! Glance through the list below and see if you don't agree that this '60 caliber tv is high indeed." The BBDO roster given in the ad:

BBDO regular evening tv shows—"Armstrong Circle Theatre" (Armstrong Cork Co.), "Donna Reed Show" (Campbell Soup Co., co-sponsor), "The du Pont Show With June Allyson" (E.I. du Pont de Nemours & Co.), "Garry Moore Show" (Pittsburgh Plate Glass Co., co-sponsor), "General Electric Theater" (General Electric Co.) "Lassie" (Campbell Soup Co.), "Men Into Space" (American Tobacco Co.) and "United States Steel Hour" (U.S. Steel Corp.).

BBDO special programs—"Biography of a Mis-sile," "Population Explosion," "Iran—Brittle Ally," co-sponsored by B.F. Goodrich Co. on "CBS Reports"; "Oliver Twist," "Arrowsmith," "Ethan Frome," sponsored by du Pont on "The du Pont Show of the Month"; "Mrs. Miniver," "The Citadel," "Valley of Decision," co-sponsored by General Mills and Westclox on "Special Tonight"; "Miss America Pageant," sponsored by Philco Corp.; "Strawberry Blonde," "Devil and Daniel Webster," sponsored by Rexall Drug Co. on "Your Rexall Tv Specials"; "Holiday on Wheels," "Marriage—Handle With Care," "The American Cowboy," sponsored by U.S. Steel on "U.S. Steel Specials."

Jambalaya ... OLD NEW ORLEANS FAVORITE

Here's how
to make it!

Cook 2 chopped onions, 1 can tomatoes and ½ can tomato paste in 4 tablespoons butter for 10 minutes, stirring. Add 4 cloves garlic, 2 pieces celery, ¼ green pepper, ½ teaspoon thyme, 1 teaspoon parsley, 3 cloves—all finely chopped—and cook ½ hour, stirring. Stir in 1 pound diced boiled ham, 2 pounds peeled boiled shrimp; cook 10 minutes. Stir in 3 cups cooked rice. Season with salt, black pepper, cayenne. Simmer ½ hour. Serve with a bottle of chilled rosé wine.

WWL-TV... New New Orleans Favorite

How ya gonna keep 'em seated for the commercial? WWL-TV does it with a bright new series of station ID's—catchy sound and animation! Audiences stay put at station break time; advertisers get the most effective background possible for their spot sales messages. Alert programming like this is another factor that has established WWL-TV as the *new* New Orleans favorite.

Gourmet tastes? Then write today for your gift copy of WWL-TV's new *New Orleans Cookbook*, "HOW TO PLEASE A GOURMET." Just off the presses—and loaded with wonderful old Creole recipes. Write: Promotion Dept., WWL-TV, 1024 North Rampart, New Orleans, La.

ABC TELEVISION 

What makes it tick?

The *business* of television is as complex as the electronics that make it possible. As complex, in fact, as the public's expectations of television.

Since early January, KMOX-TV has been broadcasting a weekly experimental program called "Inside KMOX-TV." Its purpose is to foster real rapport between station and audience, leading to fuller understanding by the public of station policies, programming and problems—and *fuller continuing understanding by the station of what the public wants and expects from television.* The audience is invited to submit questions by mail (constructive criticism is welcomed!), and those questions which reflect widespread interest are answered on camera by station executives . . . frankly and forthrightly. (Sample questions: Why do the commercials appear to sound louder than the surrounding programs? Why do you no longer carry hockey? Why do you carry girdle advertising?)

Giving viewers a *look inside*, so that they will know "what makes it tick," is an attempt to stimulate broad public interest, and a sense of participation, in the affairs of the medium. Such participation can be of incalculable value in shaping television's role for the future.

WXEX-TV 

'LAWYER'S LAWYER' NAMED TO FCC

Edward K. Mills Jr. to fill 15-month unexpired Doerfer term

He's against any form of government censorship for radio-tv

A six-foot-three, 198 lb. New Jersey lawyer, who could have had the job three years ago, was nominated last Thursday by President Eisenhower to the 15-month unexpired term of John C. Doerfer as a member of the FCC.

Edward K. Mills Jr., former mayor of Morristown, who was 54 on March 19, is the personal selection of the President. In May 1957, Mr. Mills was cleared for the FCC, to succeed George C. McConnaughey, who had resigned as chairman, but it had been his understanding that he would be given the chairmanship too. When this went to Mr. Doerfer (the man he is now about to succeed) Mr. Mills elected to continue as deputy director of the General Services Administration in Washington.

The man who succeeded Mr. McConnaughey, as a commissioner, was Frederick W. Ford, who, in this strange sequence of events, only three weeks ago took over the chairmanship from Mr. Doerfer, who resigned under fire of the House Legislative Oversight subcommittee.

Mr. Mills told BROADCASTING Thursday that, as an attorney, he is instinctively against any form of censorship.

No 'Ex-parte' • "I do feel, however," he said, "that the same standards of ethics that apply to the courts should apply in the quasi-judicial agencies, and without attempts at *ex parte* procedures."

He said he believed this to be in accord with the views expressed by Attorney General William P. Rogers, and that it is the commonly accepted approach on the part of lawyers.

Mr. Mills added he felt there could be improvement in the quality of programming without resorting to what might be construed as censorship.

Personally, he said he would like to see less violence and crime in programming and he felt this could come about, not by regulation, but by broadcaster response to public demand and reaction. The same, he said, would hold for the Federal Trade Commission in its supervision over false advertising claims.

"I favor self-regulation without formal governmental decree or edict," Mr.

Mills added. "I am a neophyte in this field but philosophically I cannot conceive of government intervention in the areas of ideas and communications, which are protected by the First Amendment."

Mild Coronary • Mr. Mills resigned his GSA post as second-in-command last Dec. 21, effective Jan. 2. In September he had suffered a mild heart attack and was hospitalized for several weeks. He did not return to GSA, where he had served since May 1956. Mr. Mills told BROADCASTING that he is now fully recovered and former associates at GSA described his health as excellent.

COMMISSIONER DESIGNATE
Favors self-regulation

As second-in-command, he also did the trouble-shooting in this agency, which oversees the vast U.S. house-keeping, including all government buildings, transportation and communications service, the national stockpile and the National Archives. His GSA salary was \$20,000 per annum, same as the FCC commissioners' pay.

Meanwhile, there were no indications from the Senate Commerce Committee, which must act on FCC nominations, of any effort to delay confirmation of the new appointee. With the FCC functioning with only six of its seven members, there is the possibility of tie votes on important matters. The disposition, therefore, would be to confirm promptly, particularly since Mr. Mills has an excellent background as a lawyer and administrator.

The question, however, is when the committee might be called by Chairman Warren G. Magnuson (D-Wash.) to consider nominations and other urgent business. Since the impasse on civil rights legislation began several weeks ago, no committees of the Senate other than those dealing with appropriations, have been permitted to meet.

He Has Company • Now also awaiting Senate committee consideration is the nomination of Commissioner Robert E. Lee for a new seven year term beginning on June 30, 1960. Mr. Lee was nominated last February to succeed himself, but since his term did not expire for more than four months, the committee saw no reason to hurry.

Only a policy decision by the Democratic leadership to delay approval of Eisenhower appointees in this election year could change the outlook for confirmation of Commissioner Lee and of Mr. Mills. Senator Magnuson has told BROADCASTING that he personally does not propose to hold up any confirmations.

An Eisenhower Republican, Mr. Mills has had two tours of service in the federal government. His first was during the Roosevelt administration as chief of the Opinion Section of the Civil Aeronautics Authority in 1939-40. And the second began in 1956 when he

assumed the GSA position. He was active in the 1952 Eisenhower campaign as chairman of the Morris County Citizens for Eisenhower Committee.

Edward Kirkpatrick Mills Jr., comes from old New Jersey stock, tracing his family back to Revolutionary days. He went from Phillips Exeter Academy to Princeton, from which he received his bachelor's degree in 1928; to Yale Law School, graduating with his LL.B. in 1931.

In The Bull Pen • Mr. Mills' early law work was with the Newark law firm of Pitney, Hardin and Skinner. In those junior days, he shared the "bull pen" with another New Jersey lawyer, William J. Brennan, Jr., who in 1956 was named to the Supreme Court.

Mr. Mills' early practice was in corporation law, including specialization in railroad reorganization work. In 1939, he came to Washington with the Civil Aeronautics Authority. In that position he prepared the CAA's first air mail rate and new route opinions.

During World War II, Mr. Mills flew with the Civil Air Patrol on anti-submarine missions, transferring to the Air Corps as a flight instructor and becoming an Air Transport Command pilot. He also served as planning officer at ATC and on the secretariat of two Joint Chiefs of Staff committees—on Atlantic communications and on Army-Navy air transport facilities in the Pacific. For his services he received the Air Medal. He held a commercial pilot's license with a flight instructor rating and had logged more than 1,000 hours.

He returned to Morristown after being mustered out of service with the rank of major. He joined the family law firm of Mills, Jeffers and Mountain.

In 1949 and again in 1950, Mr. Mills was mayor of Morristown. In the 1930s he had served on the board of aldermen, and had served in other civic roles. He was a director of Morristown Trust Co. and of Theobald Printing Co., Morristown.

Mr. Mills is considered by those who know him as a "lawyer's lawyer." He

has had no association in the broadcasting or advertising fields. Three years ago he told BROADCASTING he had an "open mind on radio and tv" and that he likes to "marshal the facts and then reach a conclusion." He repeated that view last Thursday.

Inventor • A Mills' hobby is a serious interest in inventions. He has several to his credit, including patents on a convertible vehicle, a combination automobile, airplane and boat, and a junior pilot trainer, developed before World War II. Other inventions also are in air and automobile safety.

Mr. Mills is a member of Phi Delta Phi, national legal fraternity; Princeton's Colonial Club; the Metropolitan and Capitol Hill Clubs in Washington, and the Morristown Club. At Princeton he was on the track team (high hurdles).

Mrs. Mills is the former Shirley Burks of Brownsville, Tex. They have two daughters, Shirley Neel, 12, and Katina Slade, 10. The family resides in Georgetown, D. C. They are members of the Christ Episcopal Church.

BROADCAST ADVERTISING

15 TV NETWORK TOP ADVERTISERS

They account for 46% of total '59 billings of \$673 million

The top 15 network television advertisers last year invested a combined \$290 million at gross rates, or about 46% of the \$673 million billed by the total of 320 advertisers who were in network tv.

Network advertisers placing in last year's top 25 list paid a minimum of \$6 million each at gross rates. To place in the first 15, the advertiser's gross time charges were \$10.6 million or better, in the first 6, they were \$20 million or more.

This rule of thumb on network advertiser resources is based on a listing of 1959's total 320 advertisers in networking as released last week by Television Bureau of Advertising. The more than \$672.3 million in tv network gross

billing in 1959 represents a 10.7% gain over the 1958 total of \$566.5 million (BROADCASTING, Feb. 22).

Because TvB's figures (compiled by Leading National Advertisers-Broadcast Advertiser Reports) were computed at gross (at the one-time rate), they do not reflect discounts which would reduce the totals for each advertiser. On the other hand, production costs are not included. If these were added, the individual advertiser investment would be much higher.

Top 10 • Procter & Gamble was No. 1 in network tv. It spent more than \$50.2 million at gross rates, only a little less than its \$50.6 million in 1958. Also in the top 10 were Lever Bros., American Home Products, Colgate-Palmolive,

General Foods, General Motors, R.J. Reynolds Tobacco, Gillette, Sterling Drug and General Mills.

Comparing the advertisers' 1959 to 1958 using the gross time purchase as the base:

Lever was up nearly \$11 million, American Home spent some \$7.5 million more, Gillette invested about \$2.5 million less, Sterling was up \$3 million, P. Lorillard increased approximately \$3.1 million, Bristol-Myers dropped about \$3.4 million, Liggett & Myers picked up about \$700,000, American Tobacco spent about \$1.3 million less, Chrysler dropped \$4.8 million, Philip Morris increased \$3.6 million (nearly double), National Biscuit more than doubled by upping \$4 million, Kellogg

PEOPLE work – play – LIVE by RADIO!

WHO Radio Holds a Big Lead in Total Radio Audience in America's 14th Largest Radio Market, Sign-On to Sign-Off!

COOKING or cleaning—she listens to radio. There's no time to *stop* for magazines, newspapers or other media. Radio, and only radio, entertains her, sells her all day long!

She knows responsible, big-audience stations—like WHO Radio—give her the kind of programming she prefers. WHO Radio is *aggressive, alert, alive*—and it takes special measures to see that *each segment* of its vast audience is served with the finest in entertainment, news and special features.

The 93-county area Pulse Report (Feb.-March, 1959) gives WHO Radio from 18% to 35% of the total radio listening audience

—first place in every quarter hour surveyed
—the balance being divided among 88 other stations!

See your PGW Colonel for all the details on WHO Radio—the believable, big audience station for "Iowa Plus!"

Standard Oil copy, like its 'Play', charms and makes friends

"A friendly word from our sponsor will turn up in about 45 minutes," Standard Oil host Jim Fleming tells viewers at the start of NTA's *Play of the Week*.

When it does turn up, almost mid-point in the two hour show, it's not selling gasoline but the corporate personality of Standard Oil of New Jersey. As such, it's more like a short, short subject at the movies and so relaxed that the word commercial hardly fits. It may be a clip from the company's prize documentary, "Louisiana Story," by the late Robert Flaherty. Or it could be from a cartoon by *Punch* artist Ronald Searle on man's search for energy. Sometimes it's foreign commercials

and sometimes travel film clips with integrations from the International Friendship Series Standard Oil runs in several magazines.

When Jersey Standard budgeted more than \$600,000 to show the *Play* 13 weeks over WNTA-TV New York and WTOP-TV Washington, it was not being particularly philanthropic. The deal negotiated by David Ogilvy, president of Ogilvy, Benson & Mather, with National Telefilm Assoc. was dramatic strategy in the "public relations advertising" the agency has been practicing for its client the past two years in print.

Rescuing a poor but popular show (since sold by NTA in 24 markets)

got immediate and gratifying response from viewers, who send in an average of 750 letters per week on the show, a good start for a sponsor that doesn't make anything and has nothing but an image to sell.

M. J. Rathbone, president of Jersey Standard, said when his company picked up *The Play of the Week* that it represented sound business. It is now at mid-point in the New York contract and a decision on another stretch is at hand. The next two weeks should tell whether Standard Oil wants to go on being the urbane host to two mass urban audiences. The play's the thing, and millions await Standard's decision.

Countdown for a silent respite.

Humor takes high tone

Subtle sell shows oil before . . .

slid by \$2.8 million, Miles Labs went up \$2.7 million, S.C. Johnson picked up nearly \$2 million.

At about the same level in both years were P&G, Colgate-Palmolive, General Foods, General Motors, R.J. Reynolds, Ford Motor, Pharmaceuticals, Brown & Williamson, National Dairy Products and Standard Brands.

BEST WOMEN'S INTEREST PROGRAM ON TV: WSB-TV, ATLANTA, GEORGIA

Today's Women in Georgia

During the past year, a number of Atlanta women have been successfully presented. One of these was...

Bob Moore, host of the show, is also a well-known WSB-TV personality.

A holiday party coming up? The show's Ruth Kern illustrates how to play a variety of holiday games for fun or other kinds of entertainment.

How do you play? A lady with policy of play, Ruth Kern, herself a homemaker, is the expert.

Atlanta hostess with the color, Ruth Kern, herself a homemaker.

Housewives are the most wonderful, spendigest people! We love them, advertisers love them — and they love WSB-TV. This station's *Today in Georgia* operates on the pleasant idea that the ladies are interested in all that goes on around them. For seven years, 9-9:30 a.m., weekdays it has been the most-listened-to local women's program in the area. TV Radio Mirror's recognition of *Today in Georgia* as best in the South is shared by a host of happy advertisers. It will sell for you, too. Ask Petry about availabilities.

RADIO SELLING POWER AIRED

RTES hear advertisers praise, not bury

Radio received some advertiser bouquets at a Radio & Television Executives Society roundtable in New York last week. The donors want only one favor in return: more research.

Advertisers who detailed spot and network radio successes were D.C. Marschner, sales promotion and advertising manager of Shell Oil; Marguerite West, advertising media manager of Scott Paper, and Albert Richardson, advertising vice president of Chesebrough-

Pond's. Media representatives were George Arkedis, network sales vice president of CBS Radio, and Maurice McMurray, national sales director of Storer Broadcasting stations. The panel was chaired by Al Shepard, sales manager of Select Station Representatives.

Radio's selling points, all agreed, are cost efficiency, frequency and breadth of exposure, merchandisability and flexibility. One speaker cited an advertising sales cost of a cent on the dollar for a

seasonal radio promotion.

Shell's ad chief told how only radio can hit buyers with a sustained message at a time they will buy, while they're on the road. He's unhappy, however, that radio has "failed miserably" in counting this moving audience. Mr. Marschner's own estimate is 42 million, which is higher than some other guesses that have been made. Shell, he said, likes radio because it delivers millions of summer motorist impressions at saturation frequency at the lowest unit cost (except for outdoor, which gives only fleeting exposure), because it complements themes used in other media, reaching people other media cannot and because it can be used flexibly on Shell's seasonal plan of scheduling announcements in flights.

Beforehand Success • Mr. Richardson of Chesebrough-Pond's told how the CBS Sunday night hour, *Holiday With Chevalier*, was a success before it ever went on the air last fall. For less than \$30,000, and with merchandising help from the network, the advertiser found it a bargain in terms of dealer displays and new accounts. He told, too, how radio spot accomplished the tricky job of selling the idea of grooming with Vaseline hair tonic to the teenage market. Mr. Richardson said that in cost-per-thousand-homes-reached, radio is more efficient now than ever. But it has to improve its research, now that it's "no longer hanging on the ropes of bankruptcy," he said.

Scott's Miss West commended radio for special brand promotions, telling how Cutrite has used combination network-spot the past two years to sell waxed paper to the picnic trade. The cost: \$1 for each \$100 of sales. Scott, she said, finds local merchandising aspects of radio very valuable. The third Cutrite summer campaign is now on the planning boards.

CBS' Mr. Arkedis deplored the fact that young admen have grown up in the last 10 years in a television era and haven't learned the sales power of radio, a medium that's "not fashionable but dependable; it sells." He played a series of tapes of radio's great selling personalities who have stayed in the medium over the years and listed the blue-chip faithfuls among advertisers. One was Wrigley, which has been selling chewing gum on radio for 32 years and is increasing its budget this year, he said. Mr. McMurray of Storer said radio is coming into its own in the Space Age. He agreed with radio customers that the onus is on media to provide the research they ask.

Janey Murphy, Lawrence C. Gunbinner timebuyer, during floor discussion asked for help in showing clients that radio can work for them in slots other than "traffic" hours.

Something to shout about!

SHOP EARLY FOR NETWORK TIME

K&E says delay fatal for pick of fall tv network lineup; availabilities going fast

The danger to an advertiser who delays his early buying decision is to lose a choice program spot in the advance lining up of network fall schedules. This was explained last week in an intra-agency seminar held in New York for Kenyon & Eckhardt marketing supervisory executives from branch offices.

K&E, which held two identical briefings during March, had a session on tv programming last Thursday. Handling the programming briefing for the agency were Stephens Dietz, group vice president, marketing services; James S. Bealle, tv-radio vice president; Marv Antonowsky.

On programming: Availabilities for the new tv network season are going faster and earlier than ever before. For the current season 27% of prime time availabilities (night time programs) on the networks were committed to advertisers as early as the end of February, 1959; for the next season (1960-61) 33% of the availabilities were committed at the end of last month. (By March of last year 51% of the '59-'60 season was sold, 75% by April and 87% by the beginning of July.)

On programming trends: Westerns continue to get the highest ratings, but the gap over other program types is narrowing considerably; specials this season have gone down in ratings and

in audience share; mystery and drama have about average appeal in metropolitan areas.

On the networks generally: The three tv networks are dividing "ratings" fairly equally between them.

Advertiser Policy • The advertiser in network today must have a "long-range TV policy," it was observed, and often the client may have to line up his network TV long before he's scheduled media allocation of budget.

McGannon criticizes disparaging ads

The practice of "ad-vilification" in which some advertisers disparage their competitors and competing products drew criticism last week from Donald H. McGannon, president of Westinghouse Broadcasting Co.

The outgoing chairman of the NAB Television Code Review Board also scored the excesses of blatant, repetitive radio commercials ("ad-verbosity") for which, he said, national and local advertisers must share responsibility with broadcasters.

Mr. McGannon addressed the monthly luncheon meeting of the Chicago Broadcast Adv. Club last Wednesday.

He reiterated the belief that current Washington probes carry implications in advertising far beyond those already charged against broadcast programming. He also cited the Roper survey ranking false advertising claims among serious moral problems.

Discussing the relative impact of broadcast and print media messages, Mr. McGannon stressed that radio-tv advertising demands greater skill, more intense appraisal of consumer reaction and a high degree of "ad-verity" or truth. Despite criticism, he noted, broadcast advertising compares favorably with other media.

Mr. McGannon suggested that consumer reaction to dramatic ad presentations "has never been sufficiently explored since the onset of television." He also felt there is need for a "brand new look" at audience composition in terms of sensitivity to advertising and programming, at "our own images as broadcasters and advertisers" and at voluntary efforts to creative guideposts for improvement.

Noting plans for expansion of tv code review board activities in New York and Hollywood, Mr. McGannon also reported that in time, if budgets permit and conditions justify, a Chicago code office may be opened.

Detergent market tv-made, report says

The heavy-duty household liquid detergent business represents "the market that tv built," according to the Television Bureau of Advertising.

TvB documented its claim in a report last week that pointed out that these products were "virtually unknown five years ago," and today represent one of the major advertising classifications on tv. Gross time billings for six of these detergents exceeded \$35 million in 1959, more than double the amount in 1958.

The bureau noted that figures supplied by TvB-Rorabaugh (spot tv) and leading national advertisers-broadcast advertiser reports (network) show that Adell Chemical Co. (Lestoil) spent more than \$17.2 million in tv in 1959, compared with almost \$12.4 million in 1958. Other tv expenditures for leading detergents: Procter & Gamble (Mr. Clean), \$7.6 million in 1959 against \$421,000 in 1958; Texize Chemical Co., \$4.6 million in 1959 against \$3.6 million in 1958; Lever Bros. (Handy Andy), \$4.1 million in 1959 against \$740,000 in 1958. TvB said that other detergents, including Colgate-Palmolive's Genie and S.C. Johnson's Bravo and Barcelona also have been active tv advertisers.

TV PREVIEW . . .

Steel 'tours' • U.S. Steel has taped five new tv commercials to feature its new "home modernization" program that promotes home products made of steel. The steel company estimated the commercials starting late this month and continuing in April on *U.S. Steel Hour* and the daytime *I Love Lucy* shows on CBS-TV would reach respectively a potential 24 million viewers in 134 markets and a 4.5 million audience in 77 cities.

The commercials, produced by BBDO, were taped at Video Tape Productions, New York. One of the commercials, which runs 2½ minutes, presents a "tour" of a home with spokesmen pointing out various steel-made products (see picture). The BBDO production team on the commercials: Jack Zoller, executive producer; Tom Buscemi, producer, and Jim Huff, writer. Jack Brandt, Steel's "spokesman," and model

Millette Alexander were cast in the "building products" commercial.

CBS' CLOSER AGENCY CONTACT

Sales group reorganizes for tape liaison

CBS Television Productions Sales is reorganizing its staff in order to establish and maintain closer liaison with advertisers and agencies on the creation and production of taped commercials.

The realignment, which takes effect in a few weeks, calls for the assignment to each agency of a specific contact in the various categories of CBS Television Production Sales' services. For example, each agency will be assigned an account executive, a producer, a unit manager and a designer. An effects service supervisor and quality control engineers will be assigned to each individual commercial production.

The net effect of this move, according to Tom Judge, director of the CBS unit, is "to assure the agency of the availability of an expert in each area who becomes increasingly knowledgeable of agency policies, practices and creative philosophy, as revealed through successive commercial production projects." The approach, he said, enables the CBS account executive to familiarize the agency account man with the con-

cept of tape and the CBS producer to work out the creative interpretation of the commercial so that it coincides with that of his agency counterpart.

SHULTON'S 'RACE'

Network reject to run on 110 stations

Shulton Toiletries proved last week that it's possible to place a television program in prime evening time on a national basis—without depending on existing networks. The company, which had tried without success to sponsor the hour-long *Race For Space* on a network, found 150 stations which indicated they were willing to clear prime evening time including, in some cases, pre-emption of network shows. Shulton expects to use about 110 stations to carry the program at some nighttime hour during the week of April 24-30. The package was reported to involve

more than \$300,000 in time, talent and other expenses.

The Success • This special "network" coupled with similar though much more limited break-throughs in placing special programs in prime time on a spot basis recently, prompted speculation as to how seriously, if at all, the area of network option time was being invaded.

Network officials maintained that they were encountering no more difficulty than usual in getting clearances. They pointed out that stations might be (1) scheduling these special shows in periods outside of network option hours or (2) putting them in periods which, for them, are open because they were not ordered by the network sponsor.

It was clear from a partial list of the Shulton stations, however, that this was not universally the case. The limited schedule available last week plainly showed that in some important markets *Race For Space* was slotted on network affiliates at times when they would normally be carrying network shows.

Other spot specials which have invaded high-audience viewing times in recent weeks include *Way Back in 1960*, an hour-long program sponsored on some 70 midwest stations earlier this month by the Gamble-Skogmo store chain (BROADCASTING, Feb. 22); WNTA-TV New York's *Play of the Week*, which currently is being seen on some two dozen stations, and several special one-shot documentaries that have been sold in from 24 to 58 markets. BBDO, agency which cleared *Way Back in 1960*, said that six network programs on an undetermined number of stations were pre-empted by that purchase. Reports on placement of *Play of the Week* indicate many stations are moving the two-hour property around their schedules as best they can, avoiding pre-emptions if possible and if necessary holding them to minimums.

Shulton and its agency, Wesley

McCann's own • A Spree commercial for McCann-Erickson is worked out on the set by the agency supervisor and the CBS Tv Production Sales team set up to work with him. Representing M-E is Robert Dall'Acqua, director of television and radio commercial produc-

tion (seated right). Conferring with him are Lou Tedesco, CBS producer (seated left) and (standing, l to r) Robert Foster, account executive; George Snowden, unit manager, and Robert Bleyer, director representing the CBS Television Production Sales Division.

Move postponed

Advertising Federation of America announced last week it had postponed its plans to move AFA headquarters to Washington this year. Officials said the importance of convenient liaison between AFA and other New York organizations in developing better self-policing procedures made it desirable that AFA headquarters remain in New York "for the moment." They also noted that the AFA branch office in Washington was already operating as a successful Capitol listening post for AFA members.

Assoc., admittedly had several things going for them that made it easier to clear *Race For Space* than might ordinarily be the case. One is simple business appeal: If a station had to choose between *Race* and clearing for a network show, *Race* would win on an economic basis because the station would receive 100% of its rate for the time period, rather than sharing revenues with the network.

Another advantage: publicity. Producer Dave Wolper and Shulton had received abundant editorial sympathy from radio-tv columnists across the country after the networks turned down the show.

Another was a tempting re-run op-

Space dog • A Russian scientist prepares a dog for a trip into space. This is part of exclusive Russian film footage included in *The Race for Space* documentary.

portunity offered by Shulton. It works this way: If a station clears for the original broadcast, it can then purchase the re-run rights from Shulton for sale to a non-competitive local sponsor, keeping all revenues from the re-run. Shulton would then purchase from the station a number of spots equivalent to the amount the station pays for the re-run rights. (This figure would vary from market to market.)

Still another advantage was the personal advocacy of Fred Thrower, general manager of WPIX (TV) New York, and Dick Moore, general manager of KTTV (TV) Los Angeles. A telegram over their signatures was sent to all the stations from which Shulton wanted availabilities. It advised the stations that both WPIX and KTTV were taking the show and urged their colleagues to do the same, citing their opinion of the worthiness of the offering, the built-in

public relations advantages of the show and the "re-run opportunity."

Wesley's experience in clearing stations for *Race* was encouraging to that agency. It requested availabilities from 140 stations; it got them from 150, the others having heard of the offer via the grapevine. Not only that, but for the week in question (April 24-30) most stations were able to offer from two to five full hour clearances in the 7-11 p.m. bracket desired. Logically, more availabilities would have been possible for a half-hour show.

Shulton decided to syndicate the show itself, paying extra for separate film prints, after the three networks refused it on grounds that it is policy to produce their own news and public affairs programs.

Shulton President George L. Schultz, announcing the spot purchase, said, "We felt it was important that this film be put before the American public at this time. Therefore, despite the networks' refusal to air the program, we have gone to tremendous effort and expense to schedule it." He said the job was accomplished by Shulton Vice President Frank N. Carpenter, Charles Amory, account executive of Wesley Assoc. and Mr. Wolper.

BITTER COMPLIANCE TO FCC NOTICE

But 'plugola' opinion brings sharp industry responses

Stunned broadcasters last week resignedly began complying with the new FCC interpretation of what constitutes a commercial program and at the same time industry forces rallied to force a reconsideration of the FCC notice.

Compliance with the new look, issued March 16 (BROADCASTING, March 21), ran an erratic course.

As the week drew to a close many stations either ditched all free records from their air, or followed instructions by announcing they had been supplied gratis by manufacturers or distributors.

A campaign to have the document stayed or reissued in another form—to permit it to be attacked or clarified—was mounted early last week.

NAB on Wednesday filed a formal petition with the FCC asking that the new look in identifications be stayed and that further proceedings be instituted so that broadcasters could legally comment.

CBS on Tuesday asked that the interpretations be incorporated in the pending payola rule-making case and that the industry be invited to comment.

NBC asked that the commission institute general rulemaking on the subject so that comments could be filed.

An emergency meeting of the executive committee of the Federal Communications Bar Assn. was called for Friday by FCBA President Frank U. Fletcher.

Phones Busy • The FCC and Washington lawyers were flooded with telephone calls from furious station operators seeking clarification and interpretations of the FCC notice.

Broadcasters' spleen was directed at the FCC action which overturned 30 years of broadcast practice virtually without warning.

Adding choler to their anguish was the fact that broadcasters would be required to follow a purity in practices which is not required of any other business enterprise.

As the week ended, no action was reported from the FCC. The commission sat Thursday on regular agenda items. It had held no meeting on the regular Wednesday meeting day because of the absence of two commissioners.

Although the FCC notice carried no effective date, which presumed the interpretations were effective immediately, it was learned that the commission has no intention of instituting proceedings against stations which did not fully comply at the opening of business March 17. A reasonable length of time to revise practices will be allowed, an FCC source said.

No special enforcement program is contemplated, this same source stated. The normal procedures will be followed. These are based on the investigation of complaints and a check of stations' renewal applications by the staff.

NAB's petition was filed at the order of its three-man policy committee. The committee met March 21 in Washington. It is headed by Clair R. McCollough, Steinman Stations, and includes G. Richard Shafto, WIS-AM-TV Columbia, S.C., and Merrill Lindsay, WSOY-AM-FM Decatur, Ill. The committee was formed to direct NAB policy following the death of NAB President Harold E. Fellows.

The committee issued a statement explaining the FCC notice "has caused consternation within the industry" because long-established practices have suddenly been upset. Constant, repetitive announcements will be required

during recorded programs, it was explained, and the selection of music would be restrained. The committee insisted receipt of free records doesn't limit a station's musical objectivity.

A "petition for further proceedings" was filed March 23 by Douglas A. Anello, NAB chief counsel. The petition noted the "sweeping nature" of the document and its serious impact on "established and unquestioned practices" in broadcasting. Affected parties should have a chance to comment on possible changes and the basis for the action, it was stated.

NAB emphasized the confusion over the term "consideration," citing legislative history and reviewing the recording industry's practices in providing records free or at a nominal charge. "Specific rulemaking proposals" are warranted, NAB concluded.

Networks Ask Rule-making • CBS declared that the commission's notice does not clarify the situation and "goes beyond the intent and purpose of Sec. 317." If the announcements are required, the network said. "extensive changes" may be required in the regular operation of broadcast stations and networks. "It is doubtful," CBS said, "that such changes are called for in the interest of good broadcasting".

The network stated that the March 16 document involved a "substantial" alteration of present rules and asked that it be included in the present payola proceeding (see page 66) so that comments can be filed.

NBC termed the March 16 interpretations "novel" and different from previous interpretations of Sec. 317. It requested a general rulemaking so that licensees might discuss the items.

Broadcasters, meanwhile, in great

FCC should admit it goofed AN EDITORIAL

IT should be abundantly clear to the FCC that it went too far in its March 16 effusion on sponsor identification. It has thrown broadcasters into confusion. It threatens licensees without adequate warning or notice.

There appears to be no legal recourse other than an appeal to the FCC's sense of fairness and justice, since it did not issue an order. The disputed document is a 2,500 word "interpretation" vague in some areas and mercilessly specific in others.

The NAB and others in timely fashion have asked the FCC to reconsider. They ask that the memorandum be stayed pending rulemaking proceedings to clarify and modify the interpretations.

Certainly the FCC should recognize that there is need for clarification. An action as far-reaching as this memorandum should be subjected to the established procedural processes. The slightest change in a secondary FCC rule, under the law, entails rulemaking procedures with the opportunity to file comments by parties in interest.

There are some 5,000 am, fm and television licensees, including non-commercial educational stations who are confounded by the interpretative memorandum.

The FCC should admit that it goofed. It should stay the effectiveness of the March 16 memorandum and start over with rulemaking proceedings.

Caveat emptor?

FCC's notice about announcing receipt of free records when they are aired caused flip by purchaser of radio station who was on verge of closing sale last week. Station involved, whose call letters can't be used for obvious reasons, has music-news format and one of its most valuable assets is its 7,000-record library.

Purchaser's plaintive plea to lawyer: "What shall I do now? Force seller to inventory library so I know which records were received gratis and which were bought? If I take over without this knowledge, am I responsible for playing free record without making proper announcement, or does this responsibility run to old owner?"

Lawyer's comment: "I don't know."

numbers were dumping established practices to conform to the new requirements. The first and immediate impact was in identifying free records. In this field the shifts took several forms:

- Most stations accepted the FCC notice as gospel and began to cut down or eliminate entirely the number of free records played on the air.

- Other outlets began identifying free records as required by the FCC notice.

The great question—and the most severely serious to the host of small station operators—was what to do with record libraries. Many libraries comprise thousands of records, built over decades. With few exceptions the means to identify the free labels from those purchased are unavailable.

Two networks issued instructions to its owned stations:

CBS station managers were told to buy all their records from now on. They also were told to carry each quarter hour of their record shows an announcement to the effect that "broadcast and audition copies of record . . . were supplied through the courtesy of the manufacturers and distributors of these records."

NBC ordered effective Thursday that all records acquired by NBC-owned stations be paid for. Records used from existing libraries will be identified as having been supplied free.

ABC, as of Thursday, had issued no instructions to its stations.

Indignant Lawyers • Incensed Washington lawyers, besieged by frantic queries from their broadcast clients, were particularly indignant at the manner in which the notice was issued.

What anguished them was that the

interpretation was in the form of a public notice which, in legal minds, raised the question of whether it can be appealed or not, since it is an opinion and not an order.

The lawyers' indignation with the procedure followed in issuing the notice boiled over early in the week, with FCC Chairman Frederick W. Ford its target. An FCBA committee on expediting FCC processing had met with Mr. Ford to discuss this subject. Before the meeting ended, lawyers voiced their complaints that the FCC had aborted the procedural protection of the Administrative Procedures Act in issuing the interpretation in the form it did.

Broadcasters' questions to their attorneys and to the FCC took many forms.

The most prevalent was the question of free records and the need to identify them on the air as such. A major plaint was how must the identification be made? In what form? In what words?

Other queries and complaints ran the gamut. Some of them:

- How to handle network feeds, or syndication film. Must an affidavit be required from the network and the syndicator that no consideration or services have been received by the program originator? Will this be acceptable to the FCC as holding the licensee blameless in case some hanky-panky is involved?

- Why is the FCC trying to put radio and tv news reporters at a disadvantage with their newspaper competitors? Why single out radio-tv newsmen as having to pay their own way into everything or refusing to accept a handout on penalty of having to announce these facts as consideration? Why must radio-tv critics or commentators have to pay their own way into movies, theatres or state fairs, when newspaper and magazine colleagues are not so required?

- How about a record hop for charity? Must the station make announcements that it stands to benefit from the publicity?

- If there must be a commercial spot for each free record played, won't that overload the station's composite week log on spot announcements? The station will then open itself for citation by the FCC for overcommercialization.

- If a station buys records at a discount—through bulk buying—must that be counted as a free record?

- When a station covers a state fair, must this remote be classified as commercial because the station stands to accrue some commercial business from exhibiting farm implement companies, fertilizer plants or seed suppliers?

- Government agencies flood stations with press releases, invitations to junkets, and special events. Must these all

When Bartley thought differently

One of the most enthusiastic advocates of the FCC's tightened rules regarding commercial announcements is Commissioner Robert T. Bartley.

But only 16 years ago, Mr. Bartley was on the other side of the fence.

At that time, in 1944, Mr. Bartley was director of government affairs for NAB. He and Washington attor-

ney Philip G. Loucks represented the broadcast industry in conferring with the FCC's law department on proposed revisions of sponsor identity rules.

The proposed rules included a controversial section which would have required an announcement that a program was "paid for" if it were furnished free to the station or some other consideration was given to the broadcaster. This section subsequently was deleted from the final rule upon the urging of the industry representatives.

be announced as having been given gratis to the station as an inducement to be broadcast?

Reduced to Absurd • The consensus of legal experts was that the FCC's March 16 notice gave a too strict and literal interpretation of Sec. 317. The more outspoken attorneys termed some of the provisions as reducing the identification principle to the absurd.

The general thinking of knowledgeable broadcasters and attorneys was that the stringency of the identification notice stems from the Washington climate following Congressional disclosures of rigged quiz shows, payola and plugola, and the results of former FCC Chairman John C. Doerfer's Florida vacation as a guest of George B. Storer.

"Overcompensation" was the word used by several to describe the basis for the commission's identification notice.

A strong inference was drawn that the FCC's interpretation was made so stringent and all-encompassing so that broadcasters will have to look to Congress for relief—as they did in the Lar Daly-Sec. 315 opinion.

It was the opinion of many that the requirements for identifying free records, junkets, trade-outs, and other "barter" type arrangements are even more severe in calling for commercial announcements than the regulations require in identifying straightforward commercial paid programs or spots.

The general attitude on the free record requirement was that most broadcasters would turn to record services (RCA Thesaurus, LangWorth, etc.) rather than go into the bulk purchase of records from distributors.

Interpreting Sec. 317 • The FCC's March 16 notice was issued as an interpretation of Sec. 317. For the first time it laid down the thinking of the commission on what constitutes services and consideration beyond the payment of money (BROADCASTING, March 21). Some stations estimated that records would cost up to \$25,000 a year.

Basically the commission declared that commercial announcements must be made if any of the following conditions applied:

- Records used on the air are received free.
- Travel and accommodations of program personnel are paid by any outside source.
- Participation by station or personnel in record hops.
- A most serious situation is plugola—the mention of brand names in ostensibly *ad lib* remarks in a program, or the use of a recognizable product as a prop for which the station or someone on the station's staff has received payment or "valuable" consideration.

The notice was issued with no dissents by the six commissioners. An alternative notice, requested by Commissioner Rosel H. Hyde and comprising only a generalized warning (with the specifics to be included when the FCC came out with its final order on the payola rule) failed to receive any backing from the other commissioners.

Based on Questionnaire Returns • The genesis of the March 16 notice took place at an FCC meeting the last week in February. At this meeting the Broadcast Bureau staff reported on questionable practices it found common. These were based on a study of the answers it had received to the payola questionnaire sent in November to over 5,000 broadcasters. It recommended that the commission institute a policy of compliance rather than imposing sanctions.

The commission acceded to this suggestion and instructed the staff to prepare a document setting out the approach to be followed in each of the questioned areas. This document was submitted to the commissioners in advance of the March 9 meeting. It was discussed then but passed in order to consider the alternate suggested by Commissioner Hyde.

The FCC from time to time has issued interpretations and revised its

part of the profile of a great radio station . . .

MORE WFBR LISTENERS HOLD GASOLINE CREDIT CARDS

People who own gasoline credit cards are people who travel, spend money and, above all, are financially responsible. In the WFBR audience, there are proportionately 23% more families who hold gasoline credit cards than in the total sample, which includes listeners to all Baltimore radio stations.*

When you advertise on WFBR, you reach the people who have the spendable income and who spend it.

* In a recent Qualitative Survey in the metropolitan Baltimore area, The Pulse, Incorporated, matched certain socio-economic factors with radio station listening habits.

regulations to make more explicit the meaning of Sec. 317. A major revision took place in 1944 when the commission spelled out the requirement that a proper commercial announcement must be made for political speeches or the expression of views on controversial public issues where services or consideration were provided.

Originally this proposal included a similar provision for all program activity, but after industry opposition this was dropped.

In 1950 the commission issued an identification notice which detailed more explicitly the meaning of commercial identification. The gist was that the buyer of the program or announcement must be fully identified by way of his corporate name or recognizable product. References to generic terms ("The cigar man," or "Send money to Nylons, Box . . .") were banned.

The identification problem arose most recently last year when a number of tv stations carried film clips of the Senate Labor Rackets Committee hearings on the Kohler strike. These were furnished gratis by the National Assn. of Manufacturers. The commission chastised those stations which carried the films and did not announce they had been furnished by NAM.

Celler to introduce new anti-payola bill

A new anti-payola bill—modeled on one suggested by the American Society of Composers, Authors & Publishers and narrowed specifically to broadcasts of musical works—will be introduced this week by Rep. Emanuel Celler (D-N.Y.), chairman of the House Antitrust Subcommittee. A second bill would give the FCC authority to issue a one-year conditional license—instead of one for the regular three years—for violation of the proposed anti-payola measure.

The anti-payola measure would make it unlawful, with a fine of up to \$1,000 and/or a year's imprisonment, for any licensee to accept payment for performance on the air of a particular musical work or record in which the person paying has a pecuniary interest, for a person to make such payments and for an employe to accept payment for such performances from anybody but his employer. But the bill authorizes persons to buy time on a station to play musical works.

Rep. Celler said activities of the House Oversight Subcommittee, the FCC and the Federal Trade Commission indicate payola is prevalent in many forms. He said he thinks payola is responsible for rock and roll music. It's a kind of corruption the FCC should have dealt with years ago, he said.

PAYOLA PROPOSAL DRAWS FIRE

Broadcasters comment on FCC rulemaking

Unanimous in their opinion that the FCC's proposed payola rulemaking leaves much to be clarified, broadcasters fired heavy salvos at the commission last week.

The three networks, the NAB, Westinghouse Broadcasting Co., and the Meredith stations all filed comments to the proposed FCC rulemaking announced Feb. 8 which would amend the commission's rules to read:

"All licensees and operating permittees shall adopt procedures to prevent the broadcasting of any matter for which service, money or other valuable consideration is, directly or indirectly, paid or promised to, or charged or accepted by, any officer, employe or independent contractor of the station, unless at the time the same is so broadcast it is announced as being paid for or furnished by such person."

The NAB, CBS, NBC and Westinghouse told the commission that its ruling is not directed to the employe but to the broadcaster as licensee, thus imposing a liability on a licensee who takes reasonable procedures but is injured by the act of a dishonest employe. "If the licensee has exercised good faith and reasonable judgment concerning his particular operation, this is the maximum the commission should expect," the NAB said.

NBC suggested that the commission "may not have intended this literal result," and said that commission objectives would be attained if it required

that the licensee merely exercise "due diligence."

There is no safeguard procedure against payola, CBS told the FCC, that can provide a "remedy that is both complete and certain." The network using the same language as the NAB, said that the proposed rule requires reasonable diligence by the licensee but does not place him "in the position of an absolute insurer."

The opinion of the Meredith stations that the proposed rule is "ambiguous" and "inconsistent with the requirements of Sec. 317" was shared by all the respondents. The station chain urged the FCC to analyze the controls and procedures submitted by all broadcast stations in response to the commission's two-part payola questionnaire, and make its findings known to the industry.

Control Over Contractors • NBC, CBS, ABC and WBC objected to the inclusion of the "independent contractor" in the proposed ruling, since the licensee has no control over this segment of broadcasting. They pointed out that material used on shows supplied by independent contractors might have been obtained surreptitiously but that it would be impossible for a licensee to know this.

There was almost unanimous agreement that the FCC should revise its proposed ruling to read that licensees should adopt and enforce procedures reasonably designed to prevent broadcasting of payola material. Both West-

New firm claims payola 'answer'

A new variation of an old profession—the song plugger—has been organized. It is aimed at the 5,000-odd disc jockeys in broadcasting and is considered by its organizer as "the answer" to payola.

The company is Record Promotion Inc., Washington, D.C. It was announced by Hirsh de La Viez, owner of Hirsh Coin Machine Corp. Mr. de La Viez, prominent in Washington show business for 40 years, leases and maintains more than 750 jukeboxes in that area.

Record Promotion Inc. plans to have its promotion men call on the nation's disc jockeys in behalf of paying clients. These "detail" men will attempt to persuade disc jockeys to play a client's record. They will also report back to the client what the disc jockey thinks of a record

and, if it is played on the air, how the public reacts. The company will be independent of and will work separately from the promotional activities of the record makers.

Mr. de La Viez reported that he already has opened offices in five areas—Baltimore-Washington, Richmond-Norfolk, southern Florida, northern Florida and New England. He said he hopes to establish 15 other area offices in the next 60 days, employing 40 men to make the rounds of the disc jockeys.

The basic charge to clients—record manufacturers, music publishers, artists and writers—will be \$50 per record per area.

The new company, which calls its service "Practimation," is located at 1320 Rhode Island Ave. N.E., Washington, D.C.

inghouse and ABC made further recommendations.

ABC recommended that the FCC conduct a further investigation before adopting its proposed rule and that a hearing be held to "explore the proposed extension of Sec. 317 requirements . . ."

Westinghouse said "it was absolutely essential" that Congress enact a commercial bribery statute which would make payola a crime.

Covington & Burling, a Washington law firm filing comments for a group of broadcast stations, said it was "highly doubtful" whether or not the commission's proposal are specific enough to allow criminal sanctions to be imposed for "plugging" if "the personality does not receive payment pursuant to an understanding that he will promote the enterprise on his program." There is also "uncertainty" as to the kinds of practices to be prevented without appropriate announcements. "These difficulties are not easily solved . . . [and] are difficult to define except by illustration."

The following stations were represented in the Covington & Burling comments: WTOP-AM-FM-TV Washington; KXTV (TV) Sacramento, Calif.; KHOU-TV Houston-Galveston, Tex.; WANE-AM-TV Ft. Wayne and WISH-

AM-TV Indianapolis, both Indiana; KOTV (TV) Tulsa, Okla.; KERO-TV Bakersfield, and KFMB-AM-FM-TV San Diego, both California; WCIA (TV) Champaign, Ill.; WNEP-TV Scranton-Wilkes Barre, Pa.; WNOK-AM-FM-TV Columbia, S.C.; KTOD Sinton, Tex.; WGR-AM-FM-TV Buffalo and WROC-FM-TV Rochester, both New York, and WGBH-FM-TV Boston, Mass.

This, too, shall pass away, avers Kintner

Not everybody on Capitol Hill is enamored with the Federal Trade Commission's "get tough" policy on tv advertising and payola. This was revealed last week upon release of the hearing record of the House Independent Offices Appropriations Subcommittee's session last Jan. 21 with the FTC on the latter's budget.

The Budget Bureau asks for an increase for the FTC for fiscal 1961 to \$7,600,000, a \$760,000 boost over fiscal 1960 of which \$350,000 is for investigation and litigation of deceptive practices.

Chairman Albert Thomas (D-Tex.) suggested the FTC is spending too much time and effort on "inconsequential things. Advertising is what we know it to be. Nobody believes it anyway."

People who buy things, he said, are expected to use "two eyes and normal common sense," but, he continued: "What about your big things, the price fixing that is hid . . .? What about your mergers?" Rep. Joe Evins (D-Tenn.) joined in criticism of the payola and ad hunt.

FTC Chairman Earl Kintner said that because of the congressional and public outcry about payola and ad deception, manpower had been temporarily diverted to these things, but it's only temporary. In a few days they'll be back to the larger antimonopoly cases, he said.

An eye on print, too

"Equal emphasis" to monitoring of printed advertising, in addition to intensified radio-tv checks, was announced March 23 by Chairman Earl W. Kintner of the Federal Trade Commission in an address to the American Public Relations Assn. of Washington.

Charles Connolly, acting director of FTC's radio-tv advertising unit, said March 24 his staff checks 15 magazines and 20 to 25 newspapers each week, scrutinizing on a rotating schedule. Name of the unit may be changed to Office of Advertising Media, he added. Staff of the unit has been increased from six to 12 in the past year, with four persons monitoring and the rest looking into advertising picked as questionable.

Chairman Kintner emphasized the responsibility of media to police advertising, adding he hoped "the day will never come when media will be cited in complaints."

House committee acts on state-aid for etv

A bill to give each state \$750,000 on a matching funds basis to buy equipment for educational television was reported favorably by a "big majority" from the House Commerce Committee last week. The Senate has approved a bill (S 12) for \$52 million (including \$1 million to each state for equipment). It awaits House committee consideration.

The House bill (HR 10609), introduced by Rep. Kenneth Roberts (D-Ala.) last February, originally was for \$52 million but was scaled down in a closed session of the House committee Thursday. The amended bill also specifies that only \$150,000 of the money shall go to any specific project. Educational tv outlets operated by states, boards of education or state-supported colleges and universities may use the funds.

Among other funds provided in the bill is \$520,000 to assist the states in surveying needs for educational tv.

The daytime picture was never brighter!

Latest safaris into Nielsen Country continue to bring back very bright figures indeed—for ABC Daytime TV. Look close and you can see a 25.0 Share of Audience. You can see 2.3 million homes being reached by ABC per average minute during the noon to 4 p.m. program block.

The same programming strategy that's been catapulting ABC-TV into No. 1 position week after week has been paying off during the day, too. In the last six months, ABC's Share has jumped by 38%, its average audience by 86%.

And this is a *special* audience. A younger audience with larger families. Three out of four ABC homes are in this market of real *consumers*...these people who respond most actively to the fun and games of a Beat the Clock starring Bud Collyer, or take the cheerful zest of a Gale Storm Show... the edge-of-your-sofa excitement of a Restless Gun... the fun and frolic of a Love That Bob starring Bob Cummings or, for that matter, a Who Do You Trust?

There's another bright figure in this ABC success story. That's ABC Daytime's CPM of \$1.10. For as little as \$7,633 per 1/4 hour, a sponsor gets everything. He gets time, talent, the *works*.

All in all, a very choice chartful of reasons why sponsors like Lever Brothers, Mastic Tile, General Foods, Renuzit, Johnson & Johnson, Vitamin Sales Co., Drackett, Restonic Mattress, Toni, Armour, American Red Ball Van, and Beech-Nut: all continue to choose ABC Daytime TV.

FCC wants hearing on KDB renewal bid

KDB Santa Barbara, Calif., was told by the FCC last week that its application for license renewal indicates the necessity of a hearing because of over-commercialization and a disparity between program representations and actual operation.

The commission said that in its previous applications KDB had proposed to devote 21% of its time to live local programming. But its 1959 renewal application indicated that none of the programs presented during the composite week were live. The FCC said that only .5% of KDB's proposed programming in its current application will be live. Previous KDB applications also indicated a plan to broadcast 1,130 commercial spots per week. During the 1959 composite week, 2,379 commercial spots were aired, the commission stated.

Grand jury to hear about tv quiz perjury

New York District Attorney Frank S. Hogan is going ahead with plans for a grand jury presentation this spring (within 60 days) on the possible perjury of witnesses who testified during the tv quiz investigation. (BROADCASTING, Feb. 8, PERSPECTIVE '60, Feb. 15).

Mr. Hogan acknowledged that he is directing Assistant District Attorney Joseph Stone to prepare a presentation for another grand jury concerning false statements made in the initial probe a year ago. He has estimated that perhaps as many as 100 persons had lied to the grand jury about their roles in quiz rigging. More than 40 persons already have been interviewed.

It's not certain whether the DA's office will seek perjury indictments or permit admissions which will purge the original testimony. (Under New York law, a person's false statement under oath can be purged if he subsequently tells the truth before the same body.)

Fresno to all-uhf

The FCC last week proposed rule-making that would shift Fresno, Calif., to an all-uhf commercial operation. The commission proposed to either reserve ch. 12, now occupied by KFRE-TV, for noncommercial educational use and at the same time make ch. 18 (now educational) available for commercial use, or reassign ch. 12 from Fresno to Santa Barbara. The FCC also proposed to substitute ch. 59 for ch. 30 at Madera and reassign ch. 30 from Madera to Fresno.

The commission made clear that the adoption of any proposal to make other

use of ch. 12 will be subject to decisions reached in separate proceedings involving KFRE-TV's rights as present occupant of the channel.

Two uhf stations (ch. 24 KMJ-TV and ch. 47 KJEO [TV]) and KFRE-TV operate in Fresno. Commissioner Cross dissented.

Blockbooking trial finishes third week

The third week of the blockbooking trial in New York against six distributors of feature films to tv produced additional evidence by the government last week that television stations bought films they did not want in order to acquire those they wanted. In turn, the defense elicited testimony to bolster its view that stations had bargained for and had obtained "selectivity" of films and had signed contracts without coercion (BROADCASTING, March 21).

On several occasions during the week, U. S. District Court Judge Archie O. Dawson advanced the opinion that he was disinclined to grant renegotiation of contracts, even if the government should win the antitrust case. Attorneys from both sides have indicated the case will be appealed—the defense if blockbooking is found; the Justice Dept. if renegotiation is not granted.

Defendants in the suit are Screen Gems, National Telefilm Assoc., Loew's Inc., C&C Television, Associated Artists Productions and United Artists Corp.

Defense heard in film antitrust case

In the antitrust case against Columbia Pictures, Screen Gems and Universal Pictures the defense last week offered witnesses to shore up its claim that the acquisition by SG of the Universal feature library rights did not lessen competition in the field. A recess was declared for last Friday and today (March 28).

The government case, outlined during the first week, relied mainly on points of law to advance its view that the SG-Universal agreement violates the federal anti-merger law. The defense is calling a total of 18 witnesses to demonstrate that feature films are not different from other types of programming and actually are interchangeable with other categories—a move aimed at showing that sources of film supply were not restricted because of the SG-Universal pact.

Witnesses for the defense heard during the week included Fred Thrower, WPIX (TV) New York and John J. Corson, McKinsey & Co., Washington, D.C.

ARE COMMISSIONERS HERMITS?

Chairman Ford asks Senate committee for definition of 'unusual' hospitality

The FCC's new chairman, Frederick W. Ford, last week told Capitol Hill legislators he wouldn't want to be the guinea pig to test a proposed law that would require FCC members to write up "fair summaries" of anything said to them in rulemaking proceedings—under penalty of being convicted of a crime.

This was after he had testified to the House Commerce Committee that he thought it would place a sword over the head of an FCC member to require him to record for the public record everything that had been said to him. There's the possibility he might forget something or fail to understand what was told him and his summary thus would be unfair, Mr. Ford said. Or, he added, a party unhappy for any reason might accuse him, in honesty or malice, of unfairly summarizing a conversation. "Then you're in jail."

Reminded by committee members that the proposed penalty clause of a \$10,000 fine or a year's imprisonment applies only when a violation is com-

mitted "knowingly and willfully," Mr. Ford replied:

"I wouldn't want to be the test case." But he told the committee that while the FCC objects to this halter on rulemaking cases it considers to be of a legislative nature only, "if it's enacted we'll try to follow it." He thought the restriction on rulemaking not only would hamper FCC members in requiring painstaking additional duties, but because of the criminal sanctions, might make them shy away from conversations which could give them useful information on which to base decisions: "When your head's on the block, you're much more cautious," as he put it.

Similarity • At one point when Mr. Ford—describing the legislative characteristics peculiar to the FCC's rulemaking proceedings—said this aspect of FCC members' duties is similar to that of congressmen, Rep. John E. Moss (D-Calif.) replied that congressmen are subject to re-election by their constituents every two years while FCC members are appointed for seven. Rep. Moss

launched into a lengthy discussion about the services congressmen must perform to get re-elected. He said he didn't feel he would have any trouble making "fair summaries" of constituents' talks to him. Such summaries, he said, don't have to be "blow-by-blow."

Mr. Ford, who appeared without his FCC colleagues, said Congress ought to outline—by legislation or expression of intent—the degree and circumstances which could be used as a dividing line to judge whether "hospitality" extended to FCC members is "usual" or "unusual."

A difficulty with one of the bills (HR 4800) being studied by the committee, Mr. Ford said, is that FCC members may differ in their subjective concepts of what is usual and what is unusual hospitality. Circumstances also may vary in specific cases so that what appears to be an innocent act at one time may give the "appearance" of impropriety at another, he said. Thus, he said, if an applicant bought an FCC member a Coca-Cola during a recess in an adjudicatory hearing it could give the appearance of being improper.

He felt legislative history of what has been looked upon as usual and unusual hospitality might help.

Unusual? • The FCC chairman gave this instance when a small civility could appear "unusual" after Rep. Peter F. Mack (D-Ill.) suggested the line might be drawn at such hospitable acts as lighting an FCC member's cigarette or buying him a soft drink. Rep. Mack said he felt such acts as financing a free trip to Europe for agency members and entertaining them for weekends at hunting lodges and on cruises were "questionable."

Chairman Ford agreed with committee members that a person who holds a license from the FCC might be considered at any given time to have business before the FCC (and in this broad sense be subject to *ex parte* taboos).

Mr. Ford didn't think he would have acted any differently than he has during his FCC tenure if the American Bar Assn's code of judicial ethics had been law (the FCC has said several times its members observe this code), nor would he, he said, be prepared to say that "history would have been different."

After all, he said, both judges and lawyers attend bar association conventions and FCC members see no distinction between this and their own attendance at broadcaster conventions.

Rep. Moss said he thought FCC members who accept free meals or drinks at the NAB convention (Mr. Ford had noted the government pays FCC members travel and per diem allowances) should realize that they are extended this hospitality "solely" because they are FCC members. Mr. Ford

Congruent Triangles of Eastern Iowa or *Geometry Made Difficult*

There's a triangle in Eastern Iowa formed by three of Iowa's six largest metropolitan areas—Cedar Rapids, Waterloo, and Dubuque.

There's a television station in Eastern Iowa formed by programs it carries and rejects, faces turned to its public by personalities, sap drawn from roots it has growing in communities it serves. Its artistic and commercial success is a result of congruence of style with area.

In evidence we offer some immodest pragmatism:

No matter what survey you subscribe to, WMT-TV leads in all time periods from 9 a.m. until sign-off in share of audience, Sunday thru Saturday. In station totals, WMT-TV enjoys substantial dominance from 6 a.m. until sign-off, Sunday thru Saturday.

Q (if we may say so) E D.

A senator's prerogative?

Sen. Proxmire's shoes must be pinching.

This observation seemed sound last week when it was discovered that Sen. William Proxmire (D-Wis.) who told the House Commerce Committee (AT DEADLINE, March 21) that he favored prohibiting legislative pressures on government agencies, took an active role in opposing a March FCC decision involving a Wisconsin tv station.

Sen. Proxmire wrote to the FCC on three separate occasions concerning the modification of license of WLUK-TV to operate on ch. 11 at Green Bay instead of Marinette, Wis. Sen. Alexander Wiley (R-Wis.) wrote once to the commission on the matter.

The commission released a proposed rulemaking on the channel switch on Dec. 11 1959, and granted a final decision favoring the move on March 4. The grant is now being protested by Airline Pilot's Assn. and other allied groups because of WLUK-TV's proposed antenna height.

Investigate & Advise • On Jan. 9, 1958 the senator wrote to then FCC Chairman John C. Doerfer: "I have been advised that your commission is permitting WMBV-TV [later changed to WLUK-TV] ch. 11 . . . to switch its location from Marinette to Green Bay . . . Permitting ch. 11 to come into Green Bay is going to work serious economic hardship on one of the stations already located there, at least . . . There appears to be no sizable segment of the public that will be served in any way by permitting this transfer . . . established stations will suffer . . ."

In closing, Sen. Proxmire asked the chairman "to advise me in detail" as to the "investigation . . . made with regard to this proposed transfer."

Two weeks later the FCC chairman received another Proxmire letter:

" . . . Since my previous letter to you, there have been certain factors called to my attention that merit the most serious consideration by your commission . . . As has been pointed out to me, the argument that Green Bay might be more desirable from this individual station's point of view, that would also probably be true of any one of these stations moving to Milwaukee, or Milwaukee stations moving to Chicago. There are other areas besides the most commercially profitable areas that the public interest would dictate should have tv facilities. Those applying for these station channels in the areas of smaller population are aware of this at the time their application is made, and a policy that later permits these sta-

WISCONSIN'S PROXMIRE

Do as I say . . . not do

tions, once they get their license to move into other areas, deserves the closest scrutiny. It has also been called to my attention that this station has applied for transfer of control from the present stockholders to the *Superior Evening Telegram*. Apparent desire to sell . . . and move into an admittedly more lucrative market than . . . it presently enjoys, cannot go unnoticed."

Bartley, Too • The senator asked Mr. Doerfer for a "full report" when the commission reached a decision in the channel move.

Commissioner Robert Bartley was the last recipient of a Proxmire missive which indicated the senator had taken a complete about-face in his thinking. On Dec. 8, 1959 the senator wrote Mr. Bartley:

"I have been informed by Mr. Edward Woleske, who is president of the Marinette, Wis., City Council, that he and other leading citizens . . . enthusiastically support the application of the Marinette television station . . . to be allowed to advertise . . . as Green Bay."

Sen. Proxmire rang off his letter to Mr. Bartley and ended his commission letter writing with the following: "I am forwarding this information to you strictly to provide you with an insight into the attitude of some of my constituents. I of course am not taking a position in this quasi-judicial matter. I am sure that it will be resolved by you and your fellow commissioners exclusively on the basis of the merits of the case. That is the way it should be."

Sen. Wiley wrote to the commission (with copies sent to every commissioner) on Nov. 28, 1959 asking the agency to "consider and act favorably as soon as possible" on the WLUK-TV modification of license. The senator told the FCC that such action was "clearly in the public interest."

thought this was "usual" hospitality; otherwise, he felt, the law may as well prohibit "any kind" of hospitality.

Rep. Mack questioned the FCC chairman about rulemaking proceedings, obviously attempting to touch on the Sangamon Valley tv reallocations rulemaking decision now lodged in the courts, but was steered away from the subject by Chairman Oren Harris (D-Ark.) after Mr. Ford warned that he didn't want to offer opinions which might "pre-judge" the case.

Differing Opinions • Rep. Mack

didn't agree with the FCC chairman's view that detailing individual commissioners to write opinions for decisions might overburden members and require additional opinion writers. (Mr. Ford had held each FCC member would need his own opinion writing staff, especially members who are non-lawyers.) But Rep. Mack conceded the member responsible for writing a given opinion might become an expert on the case and to some extent influence other members on how they would vote.

At the end of the hearing, Chairman Harris suggested Mr. Ford look

into the procedure used by appellate courts and the Federal Trade Commission (whose members are individually responsible for writing opinions).

Rep. Harris, answering a request by Mr. Ford in his own behalf and for other FCC members, said he is withholding committee action on two Senate-approved bills providing for legalization of vhf tv boosters until the Senate acts on a related piece of legislation providing for FCC regulation of community antenna tv systems. The catv bill is on the Senate calendar awaiting floor action.

A ceremony
the outside world
had never
witnessed . . .

A girl about to become a bride of Christ

On December 13, 1959, WDSU-TV viewers saw a ceremony never before witnessed by the outside world. Never before has a TV program inspired such interest. Following are excerpts from the script for "Life of a Carmelite," one of WDSU-TV's Special Events Series.

Narrator: "This is the home of the Discalced Carmelite Nuns in Lafayette, Louisiana.

'Discalced' means barefoot ... It is a symbol of sacrifice to the love of God ...

"The skull is a reminder that we are but dust—and that the meaning of life comes only after death.

"These are scenes no one outside these cloistered walls has ever seen before ... for her face is veiled forever from the eyes of the curious. You do not know her name or anything about her—except that she spends most of her life in the posture of prayer.

"Our photographer was not allowed to take all these pictures. The nuns were given a camera ... and these are some of the scenes they recorded.

"This is a girl about to become a Bride of Christ. She is 18 years old on this most wonderful day of her life... and in the way of all brides, she is radiant with happiness. She has already been in the monastery for nearly a year as a postulant... learning, training, proving herself. She has chosen the Carmelite rule which forbids all personal contact with those not of the Cloister.

"The ceremony begins with the Processional... The Bride is brought back to the choir... prostrates herself... completely and finally renouncing the world outside. Her new sisters scatter rose petals over the covered form... She says goodbye to all friends and relatives. To all except her family... who may come to visit her periodically. Except for them, and the sisters of her cloistered nunnery, no one will see her face again."

OREN HARRIS WARMS UP AGAIN

Two new bills of vital interest to broadcasters slated for subcommittee hearings in April

Hearings on two new bills that would impose severe shackles on broadcasting have been promised within two or three weeks by Chairman Oren Harris (D-Ark.) of the House Commerce Committee. Rep. Harris said he hoped the committee can finish its current hearings on federal agency ethics and get to the new legislation before the Easter congressional recess (starting sometime the week of April 10).

The bills (for detailed provisions see box, this page), authored by Rep. Harris and implementing recommendations made Feb. 7 by the House Legislative Oversight Subcommittee which he heads, would provide for FCC regulation of the tv and radio networks; impose restraints on station trading and alleged "strike" applications in moves aimed at trafficking in licenses; require local hearings for all initial station applications; authorize the FCC to suspend licenses for 10-day periods for certain offenses; prohibit payola and plugola activities, and making rigging of tv or radio programs a criminal offense with a fine of \$10,000 and/or imprisonment

for two years.

Rep. Harris said other bills on the same subjects also will be considered at the hearings. Still to be introduced by Rep. Harris is a bill implementing Oversight recommendations that the Federal Trade Commission be empowered to seek temporary injunctions against all alleged unfair or deceptive practices under its jurisdiction and to make broadcast licensees, networks and advertising agencies subject to criminal penalties provided in the FTC Act for false advertising of food, drugs, devices or cosmetics or cosmetics likely to be injurious to the health.

Rep. Harris last week also expressed satisfaction at the progress of hearings on the agency ethics bills.

FTC charges Schick

The Federal Trade Commission issued its eighth complaint Thursday (March 24) in its current campaign against misleading tv advertising. Charged with deceptive tv commercials was Eversharp Inc., maker of Schick safety razors and blades. Also cited in

the complaint were E. E. Ettinger, company vice president, Compton Advertising Inc., the firm's advertising agency; John Hise, a Compton vice president; and Alex Hoffman, account executive.

The FTC charged that the Schick tv commercial unduly frightens prospective purchasers of competitive razors. The ad shows a Schick razor and "an old style round head razor" shaving a boxing glove worn by heavyweight champion Ingemar Johansson. The competitive razor slashes the glove.

FTC names 8 more

The FTC last week issued eight more payola complaints against the recording industry, swelling the total to 68.

The companies: Decca Distributing Corp. (subsidiary of Decca Records Inc.), Hull Records Inc., Carlton Record Corp. and Carlton Distributing Corp., W.S.F. Inc., and Dolores Enterprises Inc., all New York City; Southern Record Distributors Inc., Nashville, Tenn.; Field Music Sales Inc., San Francisco; and Savoy Music Co., Newark, N.J.

The FTC charges that each company has given payola to disc jockeys in order to increase record sales. The commission also alleges that Decca, Field, Southern, and Carlton made payments to station personnel.

IN THE HILL HOPPER . . .

Here are capsulated versions of congressional legislation of interest to broadcasting and allied fields:

S 3244. Sen. Vance Hartke (D-Ind.)—to exempt some tuner manufacturers from liability for failing to pay tax on tubes installed before selling tuners to tv set manufacturers during the period Sept. 1, 1950, to Sept. 1, 1955. (They bought the tubes on a tax-free basis and sold their tuners to setmakers without adding tax charges, but Internal Revenue Service holds tuner makers should have paid; thus taxes would be paid twice on tubes. Finance Committee. March 21.

HR 11233. Rep. Byron Johnson (D-Colo.)—to provide free tv time for major presidential candidates, identical to earlier Senate bill. Commerce Committee. March 17.

HR 11260. Rep. Stewart Udall (D-Ariz.)—same as HR 11233, foregoing. Commerce Committee. March 18.

HR 11333. Rep. Henry Dixon (R-Utah)—to exclude tv boosters from licensing requirements and waive requirement of a permit for a tv booster previously constructed without authorization. Commerce Committee. March 23.

HR 11340. Rep. Oren Harris (D-Ark.)—would (1) restrict trafficking in and acquisition of stations without FCC public interest finding by: eliminating ban against Avco rule, requiring minimum three-year operation by licensee, requiring local public hearing where only one prospective purchaser is involved (but FCC could approve transfer without hearing in such a case if it states and publishes reasons no hearing is necessary);

(2) bring tv and radio networks under FCC regulation by requiring "operating certificate" for networks with proscriptions against illegality in programs, failure to exercise control over matter broadcast, giving unfair advantages in matter broadcast to products or services in which network has interests and making con-

tracts with affiliates inhibiting latter's operation in public interest. Commerce Committee. March 23.

HR 11341. Rep. Oren Harris (D-Ark.)—would (1) require FCC to hold local hearing on all applications for original grants or construction permits (and substantial modifications) with burden on applicant to "affirmatively" establish grant would be in public interest; set renewals, other modifications and other applications for [Washington] hearing only upon FCC finding this is necessary; (2) prohibit payment by one applicant to another for withdrawal (before earliest time FCC grant is subject to rehearing or appeal to courts) without prior FCC permission and provided payment does not exceed amount FCC thinks was "legitimately and prudently" expended in prosecuting application; require FCC to publish its consent to payment and, unless it has made the grant to another applicant than that making the payment, set aside the grant, permit the grantee to file a new application and for 30 days accept applications from "other persons";

(3) express sense of Congress that "swaps" of licenses and permits (agreement by an applicant—in return for withdrawal of another applicant—that he won't apply for or will withdraw as an applicant for another facility) are contrary to public interest. FCC would be required to consider an applicant's past activities in this respect in acting on his application for a license, construction permit or transfer;

(4) authorize FCC to revoke license for false statements in applications and their prosecution, for any conditions that would be cause for refusing to make an original grant, for willful or repeated failure to operate substantially as set forth in license, for willful or repeated failure to observe laws or FCC rules, and for violation of FCC cease and desist orders to enforce these sanctions and of certain criminal

statutes; FCC could suspend a license for up to 10 days for the same reasons if offenses were not "willfully, knowingly or repeatedly" committed. The FCC, before revoking or suspending, or before issuing a cease and desist order would be required to issue a show cause order stating the matters under inquiry and ordering the recipient to appear and give evidence; then if FCC decides to revoke, suspend or issue a cease and desist order it would have to give grounds and reasons;

(5) require person in "control" of broadcasting matter for which payment has been made to make an announcement naming the person who made payment, but would excuse him if (a) neither he nor his "employee" knew payment was made and he used "reasonable diligence" in seeking information or (b) if he made an announcement in good faith based on false or inadequate information, but could furnish a guaranty signed by the person who made the payment of the source, nature and amount of it. The person making the payment would be required to furnish a written guaranty that his representations were true;

(6) prohibit the supplying of answers or secret assistance, with intent to deceive, to participants of any contest of skill or knowledge, broadcast to the public and purported to be bona fide, where the outcome would be pre-arranged or pre-determined; prohibit bribery, persuasion or intimidation to cause a contestant to refrain from using his skill or knowledge and thus affect the outcome; prohibit production or participation or offer for broadcasting or sponsorship of any such program having knowledge or belief that such practices are involved; and prohibit conspiracy with others to commit any of the things prohibited. Sanctions apply where contests constitute all or part of broadcast programs and where prizes are offered to successful participants. Violators of prohibition against rigged programs would be fined \$10,000 and/or imprisoned up to two years. Commerce Committee. March 23.

end your tape snarl
with the startling new

Spotmaster

Designed to provide the broadcast industry with the most profitable and efficient programming of spots and commercial announcements

Extensively researched and field tested, **Spotmaster** recorder and playback units have proven their worth in operating radio stations running more than 300 spots per day. **Spotmaster** is a must for any station and is designed to give you easy conversion to an all cartridge operation. **Spotmaster's** synchronized automatic pulse cueing gives you amazing efficiency for tight programming. Check **Spotmaster** features below—and be sure to see a demonstration at the NAB Convention.

SPOTMASTER PLAYBACK eliminates the task of cueing and rewinding tapes. Several spots can be placed on one cartridge for rotating announcements without fear of replay until tape has concluded cycle. Operator gets 5 seconds to 41 minutes of playing time on each cartridge with synchronized automatic pulse cueing between each commercial. Cartridges can be changed in 1 or 2 seconds. All-transistorized playback for compact table top operation.

SPOTMASTER RECORDER gives you tapes of the highest quality—to 13,000 cycles at $7\frac{1}{2}$ I.P.S. You get less distortion—less than 2%. Wow and flutter less than .2%. A full line of accessories are available to adapt Spotmaster to your specific broadcast operation.

NEXT WEEK IN CHICAGO

Advance report on people, places, events at NAB convention

Broadcasters will move the industry's principal place of business to the Conrad Hilton Hotel, Chicago, starting next weekend, as the NAB's 38th annual convention gets under way.

Formal convention programming starts Monday, April 4, but there will be literally dozens of informal sessions, group meetings and social events.

After several Friday and Saturday meetings, including the new National Assn. of Fm Broadcasters membership session Saturday, the serious programming will start Sunday, Fm Day.

Events will run through April 6, winding up with the annual banquet.

Equipment exhibits will be located in the lower lobbies of the Conrad Hilton. The show is one of the nation's major industrial expositions. It will open Sunday noon. Following a custom set last year, the Tuesday afternoon schedule has been left open to permit visits to exhibits and to hospitality suites around the Conrad Hilton as well as the Sheraton Blackstone and other Chicago hotels.

A solemn feature of the 1960 convention will be a tribute to the late President Harold E. Fellows, scheduled the morning of April 4, by CBS Inc. President Frank Stanton.

Advance registrations indicate a near-record attendance, with strong possibility of an alltime record.

Registration at the hotel will start April 2 at 9 a.m. in the lower lobby of the Conrad Hilton. The next two days, Sunday and Monday, registration booths will open at 7 a.m. and remain open to 7 p.m. Everett E. Revercomb, NAB secretary-treasurer, is convention manager. The staff includes Ella Nelson, administrative assistant; William Carlisle, NAB station relations manager, in charge of registration desk; George E. Gayou, exhibits; John M. Couric, public relations manager, in charge of publicity.

The separate Engineering Conference, running April 4-6, is in charge of A. Prose Walker, NAB engineering manager.

Two major awards are scheduled.

Clair R. McCollough, Steinman Stations, will receive the NAB Distinguished Service Award after delivering the convention keynote address. It will be presented by G. Richard Shafto, WIS-TV Columbia, S.C., chairman of the NAB Tv Board. FCC Comr. T. A. M. Craven will receive the NAB Engineering Award at the April 6 luncheon. It will be presented by Mr. Walker.

A feature of the annual meeting will be the annual NAB convention golf tournament for the BROADCASTING trophies. The tournament will be held Sunday, April 3, at Midwest Country Club, Hinsdale, Ill. Buses leave the south entrance of the Conrad Hilton at 9 a.m.

The April 4 luncheon speaker will be Secretary of State Christian A. Herter.

The Broadcast Pioneers banquet April 5 will feature an address by ex-President Harry S. Truman.

NEXT WEEK IN CHICAGO

Registration • Lower Lobby, Saturday, April 2, 9 a.m.-5 p.m.; Sunday-Monday, April 3-4, 7 a.m.-7 p.m.; Tuesday-Wednesday, April 5-6, 12 noon-5 p.m.

SUNDAY, April 3

2:30-5 p.m. Waldorf Room

Fm Day Program • *Presiding:* Ben Strouse, WWDC-FM Washington.

Fm, Population Explosion: John F. Meagher, NAB radio vice president; Everett L. Dillard, WASH (FM) Washington, D.C.

Fm, the Count Up: Dr. Sidney Roslow, The Pulse Inc.; Frank Stisser, C.E. Hooper Inc.; Richard M. Allerton, NAB research manager.

The Fm Receiver Manufacturer Speaks: Henry Fogel, Granco Products; C.J. Gentry, Motorola Inc.; Ted Leitzell, Zenith Radio Corp.

Fm, an Official Evaluation: Robert D. Linx, FCC Field Supervisor, Conelrad.

If I Owned an Fm Station: Edward L. Barry, *Chicago Tribune*; Bernie Harrison, *Washington Evening Star*.

MONDAY, April 4

10:30-11:45 a.m. Grand Ballroom

General Assembly • *Presiding:* Thomas C. Bostic, KIMA Yakima, Wash., 1960 convention co-chairman. *Invocation:* The Reverend Kenneth Hildebrand, D.D., Central Church of Chicago. *Presentation of the Colors:* Great Lakes Naval Training Center Color Guard. *The National Anthem:* Great Lakes Naval Training Center Band. *Tribute:* to Harold E. Fellows, late NAB president; Dr. Frank Stanton, president, CBS Inc.

Keynote Address: Clair R. McCollough, Steinman Stations, chairman of NAB Policy Committee.

Presentation of NAB Distinguished Service Award: To Mr. McCollough by G. Richard Shafto, WIS-TV Columbia, S.C., chairman, NAB Tv Board.

12:30-2:15 p.m. Grand Ballroom

Luncheon and General Assembly • *Presiding:* Payson Hall, Meredith Publishing Co. Stations, 1960 convention co-chairman. *Invocation:* The Most Reverend Raymond P. Hillinger, Auxiliary Bishop of Chicago, St. Mel's Church. "I Speak for Democracy," Richard J. Smith, national winner, Voice of Democracy competition.

Address: Christian A. Herter, Secretary of State.

ON TAP IN CHICAGO

Official agenda events and unofficial sessions. Conrad Hilton Hotel unless otherwise designated. Engineering Conference agenda page 110.

2:30-5 p.m. Williford Room

Radio Assembly • *Presiding:* John F. Meagher, NAB radio vice president.

Opening remarks: F.C. Sowell, WLAC Nashville, Tenn., chairman, NAB Radio Board.

Report to the Industry: Robert T. Mason, WMRN Marion, Ohio, chairman, All-Industry Radio Music License Committee; Emanuel Dannett, New York, counsel.

Prospects on a Silver Platter, SRA presentation: Lawrence Webb, managing director, Station Representatives Assn.

Standards of Good Practice: Cliff Gill, KEZY Anaheim, Calif., chairman, NAB Standards of Good Practice Committee; Frank U. Fletcher, Spearman & Roberson; Warren E. Baker, Chadbourne, Parke, Whiteside & Wolff.

2:30-5 p.m. Waldorf Room

Television Assembly • *Presiding:* Thad H. Brown Jr., NAB tv vice president. *Welcome:* Payson Hall, Meredith Publishing Co. Stations.

The Television Code—Time for Decision: Donald H. McGannon, Westinghouse Broadcasting Co., retiring chairman, NAB Tv Code Review Board; Mrs. A. Scott Bullitt, KING-TV Seattle; E.K. Hartenbower, KCMO-TV Kansas City; Joseph Herold, KBTW (TV) Denver; Robert W. Ferguson, WTRF-TV Wheeling, W.Va.; James M. Gaines, WOAI-TV San Antonio; George Whitney, KFMB-TV San Diego; Gaines Kelley, WFMY-TV Greensboro, N.C.; Edward H. Bronson, NAB tv code affairs director.

Television Information Office Report: Clair R. McCollough, Steinman Stations, chairman, Television Information Committee; Louis Hausman, director, Television Information Office.

Washington 1960—An Election Year: David Brinkley, NBC; Mr. Brown: Vincent T. Wasilewski, NAB government relations manager.

TUESDAY, April 5

10-11:30 a.m. Grand Ballroom

Radio Assembly • *The Nature of the Enemy*, slide-sound presentation outlining strength and weakness of competitive media, a presentation by Radio Advertising Bureau. Kevin B. Sweeney, president; Warren J. Boorum, vice president; Miles David; Robert H. Alter.

10 a.m.-12 noon Waldorf Room

Television Management and Ownership Conference • (Closed Session) *Presiding:* Mr. Shafto. Tv business session and NAB Tv Board elections.

12:30-2 p.m. Grand Ballroom

Luncheon and General Assembly • *Presiding:* Mr.

Bostic. *Invocation:* The Reverend Canon J. Ralph Deppen, Cathedral of St. James.

Address: Frederick W. Ford, FCC chairman.

2-5 p.m. No scheduled sessions.

WEDNESDAY, April 6

9-10:15 a.m. Williford Room

Labor Clinic • (Closed Session) *Presiding:* Ward L. Quaal, WGN Chicago, chairman NAB Labor Advisory Committee. *Participants:* Hulbert Taft Jr., Taft Broadcasting Co.; B. Lowell Jacobsen, NBC; Cecil Woodland, WEJL Scranton, Pa.; Charles H. Tower and James H. Hulbert, manager and assistant manager, NAB Broadcast Personnel & Economics Dept.

10:30 a.m.-12 noon Grand Ballroom

General Assembly • *Presiding:* Mr. Hall. *Moderator:* Mr. McCollough. *Panel discussion, members of FCC:* Mr. Ford, Rosel H. Hyde, Robert T. Bartley, Robert E. Lee, T.A.M. Craven, John S. Cross.

12:45-2:15 p.m. Grand Ballroom

Luncheon and General Assembly • *Presiding:* Warren L. Braun, WSWA Harrisonburg, Va., chairman, Broadcast Engineering Conference Committee. *Invocation:* Rabbi Richard G. Hirsch, University of American Hebrew Congregations, Chicago. *Presentation of NAB Engineers Award:* To Mr. Craven.

Address: Whitney North Seymour, president-elect, American Bar Assn.

NAB Business Session: Mr. McCollough presiding.

2:30-5 p.m. Williford Room

Radio Assembly • *Radio's Public Relations—Your Job:* Robert L. Pratt, KGGF Coffeyville, Kan., chairman, NAB Public Relations Committee.

Promotion as a Radio Management Function: Charles A. Wilson, WGN Chicago; Janet Byers, KYW Cleveland; James Bowermaster, WMT Cedar Rapids, Iowa; John J. Kelly, Storer Broadcasting Co. A presentation by Broadcasters' Promotion Assn.

If I Were Your Program Director: Mitch Miller, Columbia Records.

2:30-5 p.m. Waldorf Room

Television Assembly • *Presiding:* Mr. Brown. *How Good Must We Be:* Television Bureau of Advertising presentation. Norman (Pete) Cash, TvB president; William MacRae, station relations director; George Lindsay, central division director.

Spending Money to Make Money: *Moderator,* Mr. Tower. "The Automated Station, a Case History," Roger Read, WKRC-TV Cincinnati. "The Economics of Video Tape," panel: Russ Baker, Ampex; Lawrence Carino, WWL-TV New Orleans; Frederick H. Houwink, WMAL-TV Washington; George Stevens, KOTV (TV) Tulsa, Okla.; E.C. Tracy, RCA.

7:30 p.m. Grand Ballroom

Annual convention banquet.

Satellite activities

FRIDAY, April 1

9-5:30 p.m. **Assn. for Professional Broadcasting Education**, board meeting and luncheon. Room 18.

SATURDAY, April 2

9 a.m.-5:30 p.m. **Assn. for Professional Broadcasting Education**, membership meeting. Room 18.

10 a.m.-5 p.m. **National Assn. of Fm Broadcasters**, membership meeting, Waldorf Room.

2:30 p.m. **Assn. of Maximum Service Telecasters**, technical committee. Sheraton-Blackstone.

6:30 p.m. **Assn. of Maximum Service Telecasters**, board meeting. Room 9.

SUNDAY, April 3

9 a.m.-5:30 p.m. **ABC Affiliates Meeting**, Grand Ballroom.

9 a.m. Buses leave south entrance of Conrad Hilton for **BROADCASTING** golf tournament.

9:30 a.m.-12:30 p.m. **Assn. of Maximum Service Telecasters**, membership meeting. Bel Air Room.

10 a.m.-12 noon **National Assn. of Fm Broadcasters**, Waldorf Room.

11 a.m. **Regional Broadcasters**. Williford-C.

11 a.m.-1 p.m. **Daytime Broadcasters Assn.**, membership meeting. Room 14.

12:45-3 p.m. **Assn. of Maximum Service Telecasters**, board luncheon, Room 9.

1 p.m. **MBS Affiliates Advisory Committee**, Royal Skyway Suite 2306.

2 p.m. **ABC-TV Affiliates Meeting**, Grand Ballroom.

3:30 p.m. **NBC-TV Affiliates Meeting**. Palmer House. Red Lacquer Room.

3:30-5:30 p.m. **Clear Channel Broadcasting Service**, membership meeting. Room 13.

5:30-7:30 p.m. **ABC Affiliates Reception**, Williford A & B.

6:30 p.m. **CBS-TV Reception and Banquet**. Ambassador Hotel.

MONDAY, April 4

8-10 a.m. **NAB Television Code Review Board**, breakfast. Room 12.

8-10 a.m. **Quality Radio Group**, breakfast. Room 9.

8-10:15 a.m. **Tv Stations Inc.**, membership breakfast. Sheraton-Blackstone, Mayfair Room.

TUESDAY, April 5

8:30-10 a.m. **Society of Television Pioneers**, membership breakfast. Lower Tower.

3 p.m. **NAB Engineering Advisory Committee**, Sheraton-Blackstone, Ivy Room.

7:30 p.m. **Broadcast Pioneers Banquet**. Speaker, Former President Harry S. Truman. Grand Ballroom.

WHERE TO FIND IT

All exhibits of equipment manufacturers will be in the lower lobby Exhibition Hall of the Conrad Hilton during the NAB convention. Exhibit space and the hospitality suites assigned as of March 23 in the Conrad Hilton or other hotels are shown.

Giant directory boards in the Conrad Hilton and Sheraton Blackstone lobbies will show associate members' suites. All suite designations are in the Conrad Hilton unless otherwise specified. (E) indicates exhibit space; (H) hospitality suites.

A Special Message
to Dresser-Ideco
Guyed Tower Owners

How to build a TALLER TOWER and save 20%

Now you can raise your antenna height as much as 750' and do the job for about 20% less than the cost of building an entirely new tower.

A new Dresser-Ideco engineering development makes this possible. We're now able to use sections of your present guyed tower, together with new sections, to create a taller tower at a considerable saving. You need never be off the air while the height increase is being made, and when you're through you'll have a standby tower left.

In one case, for example, we plan to increase a 1000' tower to 1675', keep the station on the air throughout the change-over, and leave a 400' standby tower in the bargain. The complete cost for doing this job is \$59,000 less, or 20% less, than it would cost to build an entirely new tower.

For some stations, the saving will be proportionately more. In almost no case will it be any less. The exact amount will vary with the height change, wind load, and type of antenna involved.

In any case, if you own a Dresser-Ideco guyed tower and want all the advantages of increased antenna height, this new Dresser-Ideco development is worth investigating. It won't cost you a penny to do so.

Let us show you the exact cost comparison for your station. Call or write us now . . . Dresser-Ideco Company, Tower Division, 875 Michigan Avenue, Columbus 15, Ohio. (Branch: 8909 South Vermont Ave., Los Angeles 44, Calif.)

Dresser-Ideco Company

		<p>DRESSER INDUSTRIES INC.</p>
<p>OIL • GAS • CHEMICAL ELECTRONIC • INDUSTRIAL</p>		

1

STEP 1 You're always on the air during change-over to a taller tower. Operations continue from present tower and antenna while new tower sections are erected on new foundations.

2

STEP 2 Standby antenna is side-mounted on present tower. Operations switch to, and continue from, this side-mounted antenna while top sections of present tower are dismantled and re-erected on top of new tower.

3

STEP 3 Antenna and lines are erected on new tower. Station switches to new operation. Standby tower remains for future use.

The Shape of Things

Here is the "shape" that means truly fine pictures . . . the shape of the all new black-and-white television camera, the RCA TK-12. This is the camera that gives you sparkle and impact in your commercials, whether live or taped. Your advertisers' products can be revealed clear and sharp, in all their fine detail . . . Shadings and colorings stand out, with brilliance and realism.

This completely new camera uses the large new RCA 4½-inch Image Orthicon tube. The 50% increase in image size results in the same degree of extra quality and detail you would expect from using a larger negative in advertising photography.

Here is the camera for top telecasters, for those with the reputation of providing their advertisers with the very best.

For the Finest Picture in Town!

BROADCAST AND TELEVISION EQUIPMENT • CAMDEN, N. J.

CONVENTION EXHIBITS

Latest developments in broadcasting equipment and services will be shown in Exhibition Hall and explained by company personnel in hospitality suites around the Conrad Hilton Hotel during the NAB April 3-6 convention in Chicago. All equipment exhibits are located

in Exhibition Hall, on the lower lobby level. Program and film service groups will be located all over the hotel and in the neighboring Sheraton Blackstone.

Following are summaries of the individual exhibits to be shown in Exhibition Hall:

Equipment manufacturers

ADLER ELECTRONIC INC. Space 24

Adler's equipment and displays will include its RT-3 heterodyne repeater, tv microwave system for off-air pickup, intercity relaying, tv-STL and remote pickups; UST-10, 10 w translator, FCC-approved, for extending tv station coverage to unserved areas; RA-7, 100 w translator-amplifier, claimed by Adler to be the first FCC-approved equipment for extruding translator coverage to larger unserved communities.

UST-100, 100 w uhf tv transmitter for serving communities with locally originated programs; unitized uhf antennas, for tv translators and upper uhf frequency transmitters, may be stacked horizontally or vertically for any desired gain or coverage pattern; VCA-1 low noise vhf pre-amplifier, for use in weak signal areas by translators.

Displays include a map of the location of translators which have added 2¼ million people to the audience of 100 tv stations; an educational tv rebroadcast system for western North Carolina; and an inter-city tv microwave system.

Personnel: Ben Adler, Alfred Strogoff, Stanley Lapin, Emanuel Strunin, Edward Galuska, Harry Shapiro, Mel Berstler, John Klindworth, L.A. Wallace, Robert Sinks, Willard Colvin, Arthur Turner, Roy Bright, Joseph DeBragga, James P. Quinn, Don Carmichael, Martin Silver.

ALBION OPTICAL CO. Space 39N

Albion will display Taylor-Hobson, England, professional lenses for motion pictures and tv. Included will be the Cooke Speed Panchro, Kinetel and Orta lenses, Varotal lenses, studio and outside broadcast lenses, and servo controlled variable focal length lenses.

Taylor-Hobson studio and outside broadcast zoom lenses will be displayed in operation on various tv cameras at the RCA, Ampex, and E.M.I. (Telechrome) booths.

Personnel: Benjamin Berg, Arthur Chalinor, M. Stechly.

ALFORD MFG. CO. Space 25

Alford manufactures tv broadcast antennas, diplexers, coaxial switches. The display will feature tv broadcast antennas and the recently marketed 3½ in. coaxial switch.

Personnel: Harold H. Leach, Thomas E. MacKenzie.

ALTO FONIC TAPE SERVICE Space 45N

Personnel: D. Allen Clark, Walter Merila

AMPX CORP. Space 32

A completely equipped tv studio for color and black-and-white program production will be operated during the convention. It will include Marconi IV cameras. Latest techniques in tape operation of tv stations will be demonstrated, including playback of tapes of various picture standards used around the world.

Do-it-yourself machines will give broadcasters a chance to operate vtr equipment. A mobile Videotape unit will be exhibited. The audio recorders will feature the full-track and two-channel machines (Model 351), a two and four-track stereo reproducer (Model 352-2/4) and a three-channel master recorder (Model 300-3).

An Ampex recorder (Model 351) will be mounted on a shaker table as a torture test. A recording head with 30,000 hours service will be displayed. Ampex plans a hospitality suite (505-A).

Joseph Roizen, manager of application engineering for the video division, will deliver a paper at the Engineering Conference on maintenance of the Videotape recorders.

A new tv tape system giving the viewer a far better picture will be demonstrated in the exhibit. Other displays include still-frame viewing of recorded tapes, special effects equipment and intersynchronization of multiple sources for electronic editing into a composite tape.

Personnel: George I. Long Jr., Robert L. Sackman, Phillip L. Gundy, Neal K. McNaughten, Charles P. Ginsburg, A. R. Hopkins, Thad Holt, Bob Paulson, Gerry Miller, Warren Anderson, Don Truax, Bob Baker, Rein Narma, Mark Woodworth, Bill Fink, Bob May, Don Power, Anthony Beddow, Marcel Greffard, Thomas Pressley, Jack Woolley, Jack Miller, Ellis Walker, Denis Waitley, Marty Anderson, Ross Snyder, Eldon Brown, Don Kleffman, Jack Neitlich, Tony Severdia, Chuck Swisher, Joe Roizen, Charles Riley, Cyril Teed, Bill Barnhart, Harold Clark, Byrne Hull, Charles Crum, Harold Hummel, C. E. Anderson, Paul Tarradaychik, Sid Damron, Roger Hibbard, Don Horstkorta, Stan Younger, Emil Trojack, Mike Maryatt, Alex Maxey, Jack Hauser, Tom Merson, Russ Ide, Bob

Day, Russ Baker, Frank Gonzalez Jr., Russ Williams, Len Hase, Milton Norton, Francis Nault, Jack Flynn, Donald Creswell, Ken Herring, Lou MacDonald, Al Slater, Henry Davis, Jack Harvey, Frank Benson, Charles McNamee, Lewis Parson, Jules Joslow, Eugene Sudduth, Ed Aleks, Bill Wallace.

BAUER ELECTRONICS CORP. Space 38N

Model 707 1000/250 w "Bauer Kit" transmitter will be displayed. Claimed to be the first "assemble-your-own" transmitter developed for broadcast industry, an assembled kit will be on display.

Display will also include pictorial exhibit of FB-5000-J 5000 w am transmitter.

Personnel: Fritz Bauer, Paul Gregg, Duncan Peckham.

BOGEN-PRESTO DIV. (Sieglar Corp.) Space 46N

Products to be shown include tape and disc recorders, and amplifiers and turntables.

Personnel: Thomas L. Aye, Lawrence E. Epstein.

CATERPILLAR TRACTOR CO. Space 36

Diesel and natural gas sets for primary or standby power will be displayed. Caterpillar manufactures, besides tractors and graders, diesel industrial and marine engines and sets and maintains international distribution with some 145 dealers and 800 branches throughout the world. The company is a radio-tv advertiser.

Personnel: C. U. Stone, D. U. Shupp, R. V. Bradley and B. P. Bessert.

CELLOMATIC CORP. Space 37N

Celomatic Corp. will demonstrate three new projectors to introduce new types of projection equipment for television stations, all of which will be on a rear projection screen.

Personnel: Thomas Howell, Milt Rogin, William Walsh, Owen Zapel, and Ernest Vetter.

COLLINS RADIO CO. Space 34

A number of new broadcast items will be introduced by Collins featuring new editions and additions to the automation system, various other newly developed equipments plus new engineering units

These NEW AM Radio Transmitters Speak with Continental Authority!

Here are preferential new installations made by discriminating major broadcasters. They indicate the proven quality, reliability and acceptance of Continental Electronics Transmitters,

317B 50 KW installations include: WJR, KLIF, WOAI and KFI, with WOR equipment in factory test.

Continental Electronics

MANUFACTURING COMPANY

SUBSIDIARY OF LING-ALTEC ELECTRONICS, INC.

designers and builders of the world's most powerful radio transmitters

NAB PREVIEW

EXHIBITS CONTINUED

which have not been sold by Collins previously. The display will include:

M-20 microphone, lavalier type, with frequency response from 60-18,000 cps; M-40 microphone, desk stand type, with frequency response from 40-20,000 cps. Both feature non-metallic diaphragms.

M-60 single channel microphone-amplifier, a self-contained unit including a transistorized amplifier, mercury battery and headphone; 212G-1 speech input console, self-contained, features modular construction, uncrowded control panel; CS-8, CS-12 speakers with double cone Radax construction with peak power handling capacity of 40 w. Collins announcer, three channel amplifier-console, a 68-pound transistorized unit including two TT-220 turntables.

Personnel: E. S. Gagnon, H. O. Olson, B. V. Hite, F. C. Gebhardt, R. E. Richards, C. H. Smith, F. H. Damm, R. M. Winston, E. G. Randolph, J. M. Haerle, J. H. Speck, C. P. Glade, T. W. Sharpe, E. C. Whitaker, G. R. Schneider, G. M. Bergmann, J. F. Stanbery, H. W. Hepler, F. P. Wallace, L. H. Leggett, R. N. Edwards, D. W. Hoisington, R. J. Henry, J. A. Chenoweth.

CONRAC INC.

Space 23

Conrac will exhibit its standard line of video monitors, ranging in size from 8-27 inches. Also on display will be the off-the-air receiver, Model AV12C.

Personnel: W. J. Morlland, R. M. Alston, J. G. Jones, C. A. Nichols, P. Wickham, K. Williams.

CONTINENTAL ELECTRONICS

Space 33

Continental will exhibit its new 50 kw broadcast transmitter, which will be shown complete with all components except the blower. The transmitter (type 317B) has already been installed at four stations and is being prepared for shipment to a fifth.

Personnel: James O. Weldon, W. M. Witty, Thomas B. Moseley, Mark W. Bullock, W. D. Mitchell, R. P. Buckner, Ray Tucker, Vernon Collins.

CONTINENTAL MFG. INC.

Space 41N

Fm multiplex receivers, custom designed receivers and am-fm tuners will be among products on exhibit.

Personnel: Ray B. McMartin, Leonard Hedlund, Ray Unrah, Bob Farnsworth, Bruce Trimble.

DAGE DIV. OF THOMPSON-RAMO-WOOLDRIDGE INC.

Space 3

Dage Div. will maintain its own space (last year it shared with Gates Radio Co.), displaying mobile studio console, Tele-Tran Back-Pack, fully-transistorized twin sync generator and other equipment. Tele-Tran unit is designed for political conventions and other remote purposes and weighs 13-14 pounds with battery. New ETS mobile studio console accom-

modates three-camera system and is flexible for remote use and for expanding transmitter operations at reasonable cost. Dage has fixed and mobile consoles for complete broadcast service and compatible for closed circuit tv operation.

Personnel: J. L. Leahy, Dale Schonmeyer, Allan Finstead, Joe Alinsky, Wells Chapin, Lloyd Matter, Bill Elmander.

ELECTRONIC APPLICATIONS INC.

Space 6

Included in the display will be EMT 940 turntable, EMT special cables and other units, portable tape recorder, studio and field microphones and fm operations relay receivers.

Personnel: John Costello, Truus M. Skee, Vincent J. Skee.

FAIRCHILD CAMERA & EQUIPMENT CORP.

Space 9A

The "Mini-Rapid" F316A automatic film processor will be demonstrated by Fairchild. This is an automatic, leaderless loading and self-threading unit. Fairchild will show its "Cinephonic-16" magnetic sound camera—a hand-held, single system 16mm camera.

Personnel: Herbert M. Oshan, Gerard J. Morio, Homer B. Voorhest, Richard Goldberg.

FOTO-VIDEO LABS INC.

Space 19

The new V-515 Vidicon camera and control unit will highlight the Foto-Video Labs' display of new equipment. The instrument, small enough without its lens system to store in an overcoat pocket, is modularized and has power controls that safeguard the circuit from shorts and overloads.

Other equipment on display will be high-definition live tv cameras, utility and professional monitors, transistorized power supplies, closed-circuit sync generator (portable and rack mounted), video test centers and foto products.

Personnel: A. J. Baracket, T. R. Kennedy Jr., S. Joseph Carris, Don Foyer, Joe Kaspar, Hans Nord, Larry Nagy, R. D. Hamilton.

GATES RADIO CO.

Space 2

New equipment to be exhibited by Gates will include the FM-10A 10 kw fm transmitter, professional 12-inch transcription turntables and an M-5693 modulation monitor.

Gates' fm transmitter features a new development called varialine tuning, a method of tuning a single ended vhf amplifier.

A portion of a parallel plate transmission line is made variable to capacity tune the line to operating frequency, with neither mica nor vacuum capacitors needed in the tank turntable.

The 12-inch turntable is identical to older models except for its more compact size.

Other Gates products to be on display: 5 kw am transmitter, with silicon rectifiers; 5 kw tv transmitter for both color and black and white; 1 kw am transmitter; two spot tape recorders (accommodating 101 spot announcements on separate tracks

and using an indexing system for selection). The tape itself is a vertical-playing belt 13 inches wide. In addition there are several speech input systems, remote amplifiers, frequency monitors, leveling amplifiers and the Nite Watch automatic programming system.

Personnel: P.S. Gates, Larry Cervone, Norbert Jochem, Edward Wilder, John Price, Gene Edwards, Franz Cherny, Tom Humphrey, C.O. Morgan, Bill Moats, Dick Spruill, Joe Engle, Bob Hallenbeck, London England, Urlin Whitman, Wally Warren, Abe Jacobowitz, Stan Whitman.

GENERAL ELECTRIC CO.

Space 31

A new tv film projection claimed to inject new life into old films will be shown by General Electric. It was designed by Eastman Kodak Co. for GE, to be used with the Vidicon camera.

Eastman's new 16 mm continuous tv projector (Model 350) "is the most significant development in tv projection in 15 years," according to John Wall, GE broadcast sales manager. "Now local stations can combine the economy of 16 mm projection with 35 mm quality." Effects of scratches and dirt particles are practically eliminated and a steadier image is produced on the screen, he said.

The improved image is attained through an optical system using tilting, rotating mirrors that follow the film as it passes over the projection gate, reflecting an immobilized and stable image into the system, it was explained, with additional steadiness attained by the projector's capacity to compensate automatically for film shrinkage.

Full capabilities of the GE Vidicon camera are utilized by applying an image to the tv system 100% of the time as opposed to the 30% to 50% light application found in conventional intermittent projectors, according to GE. The film moves over the projection gate without clamping, extending print life. Film motion can be reversed for cueing or stopped for still projection at any time. The system can be adapted to all tv systems.

Other products in the exhibit will include a new tv studio monitor (TM-21-A) and other monitoring equipment; several lines of cameras; a 10 kw low and high-channel vhf transmitter (TT-32-B), other audio and video equipment and microwave units. A hospitality suite (Room 1500) will be maintained.

Personnel: Robert L. Casselberry, John Wall, Charles J. Simon, Harold Towlson, Richard Putman, John Jones, Frank Bias, William G. Broughton, Lewis F. Page, Earl H. Platt, James M. Comer Jr., Thomas F. Bost Jr., Vernon H. Russell, Robert E. Lauterbach, James Douglas, Robert Cochran, Hugh Granberry; Hal-Condó; John Wätter, C.H. Jensen, A.F. Carl, M.R. Duncan, Charles H. Lake.

GENERAL ELECTRONICS LABS

Space 35

Products to be shown by General Electronic include 15 kw and 1 kw fm transmitters with fm multiplex exciters. These include main channel exciter, subchannel generator and power supply in integrated cabinet.

NAB PREVIEW

EXHIBITS CONTINUED

GPL DIVISION OF GENERAL PRECISION INC.

Space 26

GPL will exhibit a new high-resolution vidicon film chain and remote vidicon camera chains. In addition, video recorders, sync generators, video switchers, 35 mm telecast projectors, video and pulse distribution amplifiers and tv projection systems will be shown.

Personnel: N.M. Marshall, E.J. Manzo, A.F. Brundage, L.L. Pourciau.

HARWALD CO.

Space 12

Harwald again will display film inspection and editing equipment, with related gear including a 16 mm projector and such items as splicers and racks.

Personnel: Robert Grunwald, Richard Wallace, Howard Bowen, Paul Browder, Sam Caldwell, Maurice Dalton, Ray Short.

HUGHEY & PHILLIPS

Space 30

Hughey & Phillips will display tower obstruction lighting equipment featuring new tower lighting isolation transformers. Other equipment to be displayed includes: tower light control and alarm units for unattended microwave relay stations; photoelectric control and beacon flasher units; beacons; obstruction lights and other control units.

Personnel: J.H. Ganzenhuber, H.J. Geist, R.L. Lang, F.J. Little Jr.

INDUSTRIAL TRANSMITTERS & ANTENNAS INC.

Space 11

ITA will exhibit a completely redesigned line of fm transmitters of 10 w through 15 kw, plus remote control and multiplex sub-generators and STL receivers.

The 1 kw, FM-1000B uses a 4CX1000A in the final operated grounded grid. The 5 kw transmitter, FM-5000B, has been rated for 7500 w operation and the 10 kw transmitter, FM-10,000B, has been rated for 15,000 w operation. All transmitters have been designed for remote control and multiplex operations.

Personnel: Bernard Wise, Eliot Barker, Clyde Heck, Stanley Friedman, Robert Jordan.

KAHN RESEARCH LABS INC.

Space 5

Kahn will exhibit a stereo exciter-driver system to permit compatible stereo broadcasts over a single am transmitter on two am receivers. Stereo is achieved by placing two standard am receivers about six feet apart and tuning each set to the respective upper and lower sidebands. Sideband rather than carrier tuning makes am fidelity comparable with fm, Kahn asserts.

Also to be shown; a compatible single sideband to double effective transmitter power, improve audio fidelity and reduce adjacent and co-channel interference; a symmetra-peak model used to increase coverage range of am, fm and tv voice

transmissions and to improve overall limiter and AGC amplifier performance.

Personnel: Leonard R. Kahn, Kenneth B. Boothe.

KLIEGL BROS.

Space 17

A complete line of tv lighting fixtures, accessories, wiring devices and lighting selection and control equipment for monochrome and color telecasting will be demonstrated. Featured will be a new SCR semiconductor dimmer using silicon controlled rectifier.

Personnel: Herbert R. More, William F. Morris, David Safford.

MACKENZIE ELECTRONICS INC.

Space 9B

MacKenzie Electronics will present its complete broadcast line of automatic injection announcing and sound effects equipment including the 5CPB program repeater, an instant cueing device for playing of pre-recorded spot announcements, station breaks, jingles, etc., with instantaneous stop-start operation. Also to be unveiled for the first time will be a new recording unit.

Personnel: Louis G. MacKenzie, Norman J. Ostby, Wayne Graham, Jim Tharpe.

METROPOLITAN ELECTRIC MFG. CO.

Space 15

Metropolitan will display its light control systems including the lumitron magnetic amplifier, the controlled junction rectifier (C-J-R) dimmers and complete studio lighting facilities.

Personnel: Jim Connolley, Paul Shapiro, Bill Shelley, Jim Shelley, Charles Shevlin,

MINNEAPOLIS-HONEYWELL REGULATOR CO.

Space 10

Minneapolis-Honeywell will display its latest model of the transmitting station parameter automatic logger, consisting of two parts. One placed at the transmitter will measure and telemeter the parameters. The other at the studio will automatically record on a 12-inch wide strip and chart all of the various parameters, sequentially and continuously.

The recorder will log 15 different parameters, dwelling 30 seconds on each. Eight selective alarms are incorporated with the recorder which will light up when any parameter selected goes out of bounds either high and/or low.

Personnel: George McKnight, Gustave Ehrenberg.

MINNESOTA MINING & MFG. CO.

Space 40N

The complete line of Scotch brand magnetic products and accessories for broadcasting will be displayed. Among them are: audible range tapes, video tapes, the new VRB6-1/2 plastic spot commercial reel with shipping carton, available empty, or with 400 or 800 feet lengths of video tape, and new intermediate lengths of tape. All video tapes will have pre-burnished feature which reduces signal drop out.

Personnel: C. L. Alden, W. H. Madden, D. T. Windahl, Bert Holmberg, D. J. Slatery, J. S. Savidge, R. D. Stoll.

MIRATEL INC.

Space 47N

Products are video monitors and citizens band radio transmitters-receivers, Conelrad receivers, power supplies, audio controlled relays and program failure alarm.

Personnel: William S. Sadler, H. E. Kurzweg, N. C. Ritter.

MUZAK CORP.

(Programatic Broadcasting Service)

Space 1

Programatic will demonstrate its new fully automatic radio programming service under actual working conditions, showing how commercials and complete pre-recorded programs, with network cut-ins, may be integrated into virtually any broadcast schedule. A hospitality suite will be maintained in Room 605.

Personnel: John Esau, Robert H. Prater, Robert E. Fender, Gus Weber, Joseph W. Roberts and David Bain.

RCA

Space 21

A line of new tv broadcast "designed to facilitate local station or network operations and bring a living picture into the home" will be shown by RCA. Topping the exhibit will be a new monochrome camera with "a big-image 4 1/2-inch eye," an automation system display for all-day tv programming and an advanced tv tape recorder "with the ability to edit program material electronically."

The three devices are "valuable tools to enable the broadcaster to produce a picture of higher quality than ever before possible," said C. H. Colledge, general manager, RCA Broadcast & Television Equipment Div. "The RCA array of equipment is the largest ever displayed at an NAB convention."

Major developments in am and fm radio include a new 1 kw fm transmitter and a 10 kw "big brother."

The 4 1/2-inch image orthicon pickup tube used in the new TK-12 camera is designed to play a big role in magnetic tape recording, having increased resolution and better gray scale rendition than the standard 3-inch studio camera tube, according to Mr. Colledge. The TK-12 camera is entirely new, he said, leading to third or fourth generation tape recording copies comparable in clarity to the original. Live pictures will be greatly improved, he said, adding that TK-12 is "highly stable with only two operating controls and built-in ability to hold the road even during prolonged operation."

The automation system utilizes a perforated paper tape prepared when the program schedule for the day is formulated, a typewriter-like machine punching tape and turning out a printed program schedule. The tape is inserted in a control-room reader which feeds signals into the system's memory. Only manual effort required after tape preparation is the loading of film or slide projectors and pushing of the control button to start the cycle. Remote manipulation of studio tv cameras from the control room is handled through a joy-stick on the video console.

TELECHROME SPECIAL EFFECTS GENERATOR

with Exclusive "JOY STICK" POSITIONER

First, Telechrome provided broadcasters with a vastly improved system for producing a wider variety of dramatic wipes, inserts, keying and other special effects. Now, Telechrome engineering introduces the "Joy Stick" Positioner. This makes it possible to create many hundreds more effects and to move wipes, inserts, keying or other special effects to any place on the TV screen. The effects are startling! A new era in program creativity begins now! Ask to see the "Joy Stick" Positioner demonstrated, today!

New SE FM multiplex transmitters in new ratings . . .

1 KW 5 KW 10 KW

. . . with these and other SE new features . . .

- First with power supplies designed around semiconductor rectifiers for compactness, dependability, economy.
- Now in FM . . . SE-pioneered industry-accepted patchover (in 5 KW and 10 KW transmitters) protect you against lost air time.
- Power patching in the 10 KW transmitter keeps you on the air with 1 KW or 5 KW in an emergency. Make the changeover in seconds—no retuning.

And SEE the worldwide accepted SE TV transmitter line . . . featuring the experience-proved patchover system, space-saving compactness, full-length glass doors for full-time visibility of transmitter operation.

STANDARD ELECTRONICS

LET THE LEADER KEEP YOU YEARS AHEAD IN TAPE

AMPEX VR-1000-C

AMPEX — first and foremost in TV magnetic tape systems keeps you years ahead with facilities that anticipate future needs, future standards. Ampex's new VR-1000-C Videotape* Television Recorder — to be introduced at NAB — incorporates advanced features that *deliver!* Ampex *delivers* new quality in the clearest, best picture today... *delivers* new performance by "tape locking" your VTR to station or network programs. Ampex *delivers* new perfection in mixing color and black/white on the same tape... *delivers* far better color resolution. Ampex *delivers* new economy in production with the Mark IV Electronic Splicer... and so much more.

Only Ampex brings you these advanced features... Ampex always has — beginning with the introduction of the first, revolutionary VTR at NAB in April, 1956. You're years ahead with an Ampex tape system.

NEW, YEARS-AHEAD VR-1000-C... The ultimate in TV tape recorders, fully compatible with the nearly 600 VTR's now in operation.

NEW, YEARS-AHEAD MOUNTS... Now Ampex offers the proven console plus the new utility model for compact installations to meet every operational requirement.

NEW, YEARS-AHEAD COLOR ACCESSORY... Major innovations in Ampex color electronics provide new operating convenience — give maximum color accuracy and control.

NEW, YEARS-AHEAD SYNCHRONIZER... Inter-Sync* Television Signal Synchronizer makes possible wipes,

dissolves, split screen and other special effects with tape/tape, live/tape, film/tape — and many more.

NEW, YEARS-AHEAD SPLICER... Electronically controlled for absolute accuracy and quicker, easier splicing, this newest Ampex component makes quality inter-splicing routine.

SEE THE YEARS-AHEAD AMPEX TAPE SYSTEM AT NAB

... or write for detailed specification literature on the Ampex VR-1000-C and Associated Equipment.

AMPEX

NAB PREVIEW

EXHIBITS CONTINUED

A toggle switch triggers zoom lenses.

The round-the-clock automation system grew out of a predecessor capable of handling up to 25 switching functions during a 60-second station break, the "panic period" when a variety of slides, film clips, tapes and spot announcements are broadcast.

RCA's tv tape recorder now includes a transistorized processing amplifier and expanded monitoring facilities.

The new 1 kw BTF-1D and 10 kw BTF-10C fm transmitters are designed for conventional broadcasting and multiplex operation. The 5 kw BTF-5B unit completes the fm line. New high-efficiency circuitry is claimed for the BTA-5T am transmitter, "built to make possible an annual power input saving of 15,000 kw hours in a continuous program operation." A delegation of a score of executives will be headed by T. A. Smith, executive vice president, industrial electronic products. It will be supported by around two-score technicians and field representatives.

Personnel: T. A. Smith, C. H. Colledge, A. F. Inglis, E. N. Luddy, J. P. Taylor, E. C. Tracy, M. A. Trainer, V. E. Trouant, J. W. Wentworth, H. W. Wylie, P. Berquist, P. A. Greenmeyer, J. L. Grever, E. T. Griffith, J. E. Hill, A. M. Miller, D. Pratt, W. B. Varnum, R. B. Houston, C. F. Strawley, B. K. Kellom.

RAYTHEON CO.

Space 1-A

The Raytheon wideband microwave relay system for portable and fixed applications will be displayed. The KTR 1000G television relay will be installed by WDAU-TV Scranton, Pa., for intercity connection with its sister station, WCAU-TV Philadelphia and will be operating by autumn. It will be used also at the summer political conventions. The 1000-G accommodates color and simultaneous audio. It has been used by Ciba in the pharmaceutical color demonstrations based on field sequential color.

Allied accessories including antennas, waveguides and duplexers will be exhibited.

Personnel: Joe Sedick, Duane A. Crawford, Hugh Bannon, Henry Geist, W. B. Taylor and George Hinckley.

SCHAFER CUSTOM ENGINEERING

Space 14

Schafer will have on display its model 1200 broadcast automation system including four Ampex recorders, two Seeburg library units and new automation electronics. Model 1200 may be installed to conform with restricted space availability for maximum flexibility and a full day of programming may be prepared in a few hours.

A remote control system, the 400-R, also will be displayed. An all-DC system which uses no vacuum tubes, the 400-R operates on any two ordinary (low-tariff) metallic telephone circuits. The company claims nearly 1,000 are in operation. Other remote control equipment will be shown.

Also featured will be the Schafer car-

tridge recorder 2000. A simplified cartridge system, it permits one-hand operation, is lightweight and portable, uses standard electric outlet. It has full track heads, instantaneous start and silent solenoid operation.

Personnel: Paul C. Schafer, R. Paul Comstock Jr., Tom Magowan, James Brown, and Jaye Smith.

STANDARD ELECTRONICS

Space 28

New fm multiplex transmitters will highlight Standard's exhibit. Also to be shown: 1 kw, 5 kw and 10 kw fm transmitters; tv transmitters and a "patchover" system developed for tv to keep a station on the air despite emergencies and which has been applied to fm usage.

Convention visitors will receive a key to the new Standard plant just completed at Farmingdale, N. J. The plant is located on a 40-acre site with room for expansion, the company reports.

Personnel: W. H. Zillger, J. T. Campbell, Reed Haythorne, Jimmy Evans, A. R. Taylor, and Joe Ewansky.

SARKES TARZIAN INC.

Space 18

New heterodyne microwave relay equipment will be exhibited by Sarkes Tarzian. This recently developed equipment is designed primarily for multi-hop tv interconnection. According to Sarkes Tarzian, the microwave relay can handle simultaneous wideband tv signals, along with three 15 kc audio channels.

Also to be displayed will be new studio vidicon equipment, vidicon film reproducing equipment, an image orthicon camera with a new I. O. high-sensitivity tube and a new transistorized audio console.

Personnel: Morrell Beavers, Neff Cox Jr., Henry C. Cronin, Nubar Donoyan, Wendell Fuller, Gene Keith, F. D. Meadows, Biagio Presti, Bill Tarr.

TELECONTROL

Space 44N

Products include video-audio distribution systems, studio video switching and master control switching systems.

Principles involved in Telecontrol's studio switching centers, video and pulse amplifier modules and other products will be demonstrated. The system designs tie station operations together.

Personnel: John W. Doering, Leroy Jorgenson.

TELECHROME MFG. CORP.

Booth 20

A special effects generator with new positioner will be shown; a new 4½-inch image orthicon camera; a new three-vidicon color camera; new sync generator and video transmission test equipment; studio monochrome vidicon camera, and vertical internal test signal generating equipment.

Personnel: J. R. Popkin-Clurman, H. Charles Riker, Kenneth Owens, Alex Jones, E. Herman, Sy Krinsky, Don Dudley, Ray Wulfe, D. Chapman, W. Beaver.

TELEPROMPTER CORP.

Space 22

High spot of the TelePrompTer exhibit will be the new Telepro 6000 projector

with the Model 300 changer. In addition, speech prompting equipment and the Tel-lens camera attachment will be displayed.

Personnel: William V. Sargent, E. J. Spiro, Don Redell, Ted Boismeu, George Andros, Brad Macy, Ted Atwood, Joseph Munisteri, Joseph Kovalchik.

TELESCRIPT-CSP INC.

Space 8

Telescript-CSP will exhibit Telescript Prompting Equipment, the TV-7000 Rear Screen Projector, the Polarization Optical Effects Kit and the Video Tape Editor, first of a new line of electric products designed to enable roll-free video tape splices by making sure the splice falls within the blanking period while maintaining accurate sync time.

Personnel: Robert P. Swanson, Curtis Howard, Peter Jackson, Trygve W. Lund, Charles R. Krumm, David J. Reiner.

TELEVISION SPECIALTY CO.

Div. of Federal Mfg. & Eng. Corp.

Space 43N

Products include kinescope recording cameras, newsreel cameras with portable power pack, film inspection equipment and 35mm Cameraflex movie cameras.

Personnel: Howard Ryder, John Schlager, Lawrence Scheu.

TOWER CONSTRUCTION CO.

Space 16

Tower Construction's booth will include exhibits depicting its am, fm, tv and microwave towers and erection service.

Personnel: M. M. Lasensky, C. A. Wright, G. S. Chesen, A. C. Tilton.

UTILITY TOWER CO.

Space 4

Utility will exhibit a complete line of radio broadcast towers and accessories. A model tower fabricating plant, showing the entire scope of operation in the manufacture of towers, will be featured.

Personnel: C. E. Nelson, V. G. Duvall, Jim D. Nelson, M. N. Sholar.

VISUAL ELECTRONICS CORP.

Space 27

Program automation for video and audio systems will be featured by Visual. For tv: visual automation system, all-transistorized power supply systems, program repeater units, studio clock systems, 16mm tv projectors, and distribution equipment.

Exhibits for am-fm: transmitters and remote control system, audio console and microphones, tape recorders and multiplex receiver equipment.

Visual's exhibit includes items from specialist manufacturers which the company sells nationally. MacKenzie, Favag, GPL, Eastman, Conrac, Smith-Florence, Decca weather radio, Prodelin, Superior and Dynair are some of the manufacturers whose products are handled.

Personnel: James B. Tharpe, John P. Gallagher, Morris A. Mayers, Bert Kupperman, Mrs. Jess Rafsky, Felix Bonvouloir, Wayne Marcy, Richard Witkovski, A. R. Hopkins, A. W. Greeson Jr., Al Kallman, L. C. Radford Jr., Robert Richards, Jim Sims, F. Cecil Grace.

tions; Giraud Chester, vice president in charge of daytime programming; Theodore Fetter, vice president and program director, tv network; Stephen Riddleberger, vice president for owned and operated stations; Thomas Velotta, vice president for special projects, news and public affairs; Slocum Chapin, vice president for western division, tv network sales; Robert Coe, director of tv station relations; Michael Foster, vice president in charge of press information; Ralph Hatcher, manager of tv station relations; Donald Shaw, director of station clearance, tv network; Joseph Giaquinto, manager of tv station clearance; Mario Cucinotta, account representative in tv station clear-

Says HOWARD LEPPLE, Chief Engineer,
WLW-T, Cincinnati:

"Ten percent of normal TV lighting is all we need with General Electric's new camera tube!"

"We're proud that Station WLW-T made the first colorcasts of indoor sports events, showing professional basketball November 21 and 22, 1959. New super-sensitive G-E camera tubes, like the one on my desk, made this possible, since the light for basketball, bowling, and hockey is too low for colorcasts with standard tubes. Now, our GL-7629's add the thrill of color to sport.

"Another plus for General Electric's new tube, is the use we can make of it for black-and-white "remotes" where the light is too dim for standard camera tubes. And we like the GL-7629's built-in protection against burn-in. No trace of this fault has appeared; whereas, with most tubes, burn-in starts to show at an early stage.

"We consider the new General Electric camera tube a fine long-term investment, as well as a promising program builder for WLW-T!"

* * *

Get . . . now . . . the complete facts on Type GL-7629 from your G-E tube distributor! This great new tube is interchangeable electrically and mechanically with all standard image orthicons. *Distributor Sales, Electronic Components Division, General Electric Company, Owensboro, Ky.*

NEW

SCHAFER CARTRIDGE RECORDER 2000

Insert a cartridge and push the button to air a spot, a program, or any material of 40 seconds to 31 minutes duration. This simplified cartridge system permits one-hand operation. Lightweight and easily portable, unit may be plugged into any standard electric outlet. A positive locking device permits system motor to run only when cartridge is in position. Cartridge reuse ends forever the disadvantages and cost of acetate recording. The Model 2000 features full track heads, providing excellent fidelity and signal to noise ratio. Instantaneous start and silent solenoid operation help maintain good station sound. Each is a completely self-contained recorder, as well as playback, providing a microphone input and line input. You can buy or lease the "2000" for \$12.50 per mo. See it in operation at the NAB Convention, April 3-6, Conrad Hilton, Chicago.

GATES High Fidelity
Album

SMOOTH as SILK

Gates 16-inch
Transcription Turntable

Gates 12-inch
Transcription Turntable

**For truest high fidelity reproduction, play this recording on
Gates Professional 12 and 16-inch Transcription Turntables**

To meet the exacting performance demands in the broadcasting of transcribed music . . . to greatly improve the reproduction qualities of each on-air recording . . . these are the desires of every broadcaster. And achieving this *smooth as silk* reproduction is the primary characteristic of the new Gates 12 and 16-inch professional transcription turntables for 33 $\frac{1}{3}$, 45 and 78 RPM.

Rumble for both the 12 and 16-inch models is at a new low for either broadcast or high fidelity standards, while wow and flutter far exceed acceptable standards for high-quality commercial broadcasting.

The new Gates 12-inch turntable is *identical* to the 16-inch sales leader, model CB-500. In the new CB-77 12-inch chassis is the same ingenious inner hub drive system to greatly reduce rumble, the same smooth speed change system, the same smooth and silent rocker arm, illuminated on-off switch . . . the only difference is the reduced size, affording broadcasters a more compact turntable arrangement in today's busy control room.

For complete information on both 12 and 16-inch turntables and accessories, write today for the new Gates 12-page *Turntable Guide*—yours for the asking.

Golf match

The annual NAB convention golf tournament for the BROADCASTING magazine trophies will be held Sunday, April 3, at Midwest Country Club, Hinsdale, Ill., near Chicago. To qualify for trophies, contestants must play at least nine holes.

Tee-off time is 10 a. m., with buses leaving the south entrance of the Conrad Hilton Hotel at 9 a. m. Golf clubs are available for rent. Low gross and low net trophies prizes will be awarded. Blind bogey handicapping will be used.

The annual NAB golf tournament will be held regardless of the weather: sunshine, rain or snow. For those wishing to make afternoon meetings, bus will leave country club around 2:30 p. m. for return to Conrad Hilton.

Send reservation to nearest BROADCASTING office.

CHIEF ENGINEER'S REPORT ON RCA-6166...

"OLD
GRAND-
DAD"
RETIRES
AFTER LONG
AND FAITHFUL
SERVICE

Henry Goldenberg, Chief Engineer of KMBC-TV, says: "Several RCA-6166 tubes in our 50 Kw TV transmitter have piled up quite an impressive number of hours. One of them—we call it "Old Granddad"—accumulated 28,616 hours on-air before it was finally retired. Two others went well past 18,000 hours before being replaced. We check all tubes regularly and make sure we stick within the proper operating voltages at all times."

The extreme longevity experienced by KMBC-TV is, of course, exceptional. But it is an exception that forcefully demonstrates the high-quality of the RCA-6166.

This inherent quality plus proper care of the field-proven 6166 often results in performance beyond "normal" life expectancy. This means direct benefits in reduced transmitter maintenance and downtime as well as more hours of service per tube dollar.

Your RCA Distributor of broadcasting tubes will be happy to supply your needs promptly. He also carries RCA Sound Tape—the quality tape. Whether it's tubes or tape, count on him for fast delivery.

RADIO CORPORATION OF AMERICA
Electron Tube Division **Harrison, N. J.**

ANOTHER WAY RCA SERVES THE BROADCASTING INDUSTRY THROUGH ELECTRONICS
BROADCASTING, March 28, 1960

NEXT WEEK IN CHICAGO

Progress in television tape techniques resulting from almost universal use by tv networks and stations will be woven with stereo, camera progress and automation in papers to be read at the 14th annual NAB Broadcast Engineering Conference to be held April 3-6 at the Conrad Hilton Hotel, Chicago.

Warren L. Braun, WSVA-AM-FM-TV Harrisonburg, Va., is chairman of the Broadcast Engineering Conference Committee that drew up the program. A. Prose Walker, NAB engineering manager, is conference arrangements director, aided by George W. Bartlett, assistant director.

The three-day technical agenda opens the morning of April 4 with Raymond F. Guy, NBC senior staff engineer, presiding. After a single paper by Mr. Braun, in which convention exhibits will be reviewed, the delegates will join the NAB convention management group in a general session. They will join the management group at lunch also.

Afternoon of April 4 will be devoted to a series of technical papers. Eight papers will be read the morning of April 5, to be followed by a joint engineering-management luncheon.

Exhibit Time • Afternoon of April 5 is left open for inspection of exhibits. This is a non-agenda afternoon for management delegates as well. The annual FCC roundtable, at which delegates join members of the FCC in informal discussion of industry problems, will be held 10:30 a.m.-12 noon April 6.

At the joint engineering-management luncheon April 6, Mr. Walker will present the NAB Engineering Award to FCC Comr. T.A.M. Craven, a former consulting engineer. Eight more technical papers will be read that afternoon, followed by the annual banquet which is the last program event.

A preview of the fifth edition of the *NAB Engineering Handbook*, to be published by McGraw-Hill Book Co., will be given by Mr. Walker on the opening afternoon. The 1,800-page volume, with 1,272 illustrations, has been in preparation three years. It embraces new technical developments and will be the standard technical reference work for broadcasters.

Technical papers will go into new cameras that improve tv picture quality, automatic logging as tested at WTOP-

2:30-2:55 p.m.

The New NAB Engineering Handbook by A. PROSE WALKER, manager of engineering, NAB.

For the past three years, the NAB engineering department has been engaged in the preparation of the fifth edition of the *NAB Engineering Handbook*. This undertaking has resulted in

a handbook which consists of approximately 1,800 pages and 1,272 illustrations. The book is being published by the McGraw-Hill Book Co. and is the

MR. WALKER

only technical handbook of its kind that treats the entire broadcast system in a logical order, from antenna to studio. This paper will provide you with a "sneak preview" of the new handbook and explain how to use the material to maximum advantage.

3-3:25 p.m.

"The Present Status of Stereophonic Broadcasting," by C.G. LLOYD, former chairman, National Stereophonic Radio Committee

MR. LLOYD

Stereophonic broadcasting has received increased attention by broadcasters recently, and the FCC has proposed rule making looking toward the establishment of appropriate transmission standards for stereo broadcasting on fm stations. The National Stereophonic Radio Committee has been engaged in a study of available systems and has submitted information to the FCC to aid in their consideration of the standards. This paper reviews the various systems which could be utilized and points out the considerations involved in determining transmission standards to be utilized by the industry.

3:30-3:55 p.m.

"Sine Squared Pulses in Tv System Analysis," by RALPH KENNEDY, development engineer, NBC.

MR. KENNEDY

The history of the development of sine squared pulse testing as it has occurred in Europe is traced followed by a comparison of heaviside step vs. sine squared pulse spectra and their effect on a system. The methods of pulse generation are

SOUND REASONS WHY

it pays to replace with Sylvania tubes for broadcasting

1 BREADTH OF LINE

Sylvania offers a wide line of types to fill your tube requirements for AM, FM, VHF, and UHF. Gold Brand Tubes, well-known for their reliability, the finest in high-vacuum power tubes, small power tubes, image orthicons and mercury-vapor rectifiers — all are available from a single dependable source of supply, your Sylvania Industrial Tube Distributor.

2 READY AVAILABILITY

from a specialist in fast service. Your Industrial Tube Distributor's prompt attention to your needs makes him a valuable man to know. He can fill your emergency needs or your normal replacement requirements from his factory-fresh stock. What's more, his extensive inventory is backed by Sylvania's nationwide system of warehousing. Count on him for immediate delivery.

3 QUALITY

Sylvania quality offers you lower tube costs per hour of operation and reduced maintenance time—helps your station keep its best foot forward with more hours of continuous transmission.

Ask your Sylvania Industrial Tube Distributor for your copy of the informative "Sylvania Industrial Tubes" booklet. Or write Electronic Tubes Division, Sylvania Electric Products Inc., Dept. 123, 1100 Main St., Buffalo, N. Y.

GENERAL  ELECTRIC

NAB PREVIEW

TECHNICAL PAPERS CONTINUED

next presented. The methods of testing various portions of system bandwidth by use of shaped bars, T and 2T pulse is discussed. Rating factors, time-series computations, envelope delay and linearity testing are also considered. It is intended that the paper present a summary of the whole area of sine squared pulse use for system testing.

4-4:25 p.m.

"Improving Tv Picture Quality Through Phase Equalization," by R. S. JOSE, broadcast transmitter design engineer, RCA.

MR. JOSE

The vestigial side band system of tv transmission has many advantages but it introduces phase distortion. This characteristic must be corrected if the optimum in picture quality is to be obtained. The factors causing this phase, or time delay, distortion are reviewed and the effects on picture quality are illustrated. Practical means of correcting the transmitter envelope delay characteristics are highlighted. Typical calculated and measured envelope delay curves are shown, together with the characteristics of compensating networks. A method of measuring envelope delay at the transmitter site as described and typical system measurements displayed.

4:30-4:55 p.m.

"Automatic Logging of Operating Parameters in Lieu of a Manual Log for AM-FM-TV Stations," by GRANVILLE KLINK JR., chief engineer, WTOP Washington, D.C.

MR. KLINK

This paper will describe the development and installation which is associated with the automatic logging system now in operation at WTOP-AM - FM - TV, Washington, D.C. There are 35 different parameters for five broadcast transmitters, measured and recorded, with only a few seconds interval between each point on the multipoint strip-chart recorders. Fifteen of the measurements for two am transmitters are sent over a single pair telephone line by means of a telemetering servo unit. This information is recorded on a strip chart located in the television master control room some 12 miles distant

from the am site. Two more strip charts are provided to handle the three other transmitters, fm, tv video and tv aural.

5-5:30 p.m.

"A New Approach to Balanced Audio Levels," by ROBERT B. MONROE, senior project engineer, CBS Television Network.

MR. MONROE

CBS Television Network undertook an extensive study of television audio levels. This paper gives a full account of the CBS audio level study. It also describes equipment changes and new operating techniques that have been adopted at all CBS-owned television stations to control the factors responsible for loudness discrepancies and thereby insure the transmission of programs with well-balanced audio levels. As a result of the application of these techniques, listener complaints have been effectively eliminated.

In the past, television viewers have registered complaints that portions of television programs are sometimes unpleasantly loud. To determine the reason for these complaints, the

Tuesday morning

8:45 a.m.—Crystal Ballroom

Presiding: JAMES D. PARKER, director, radio frequency engineering, CBS Television Network

Session Coordinator: GEORGE HIXENBAUGH, chief engineer, WMT-AM-TV Cedar Rapids, Iowa

8:45-9:10 a.m.

"Effects of Tower Lighting and Isolation Circuits Upon the Resistance of Various AM Towers," by VIR N. JAMES, consulting radio engineer

MR. JAMES

Calculations and tower resistance measurements indicate that a considerable alteration of antenna resistance of am towers results from isolation circuits. Changes in antenna resistance of as much as 50% occur from improper tower isolation circuits. These resistance changes may be positive or negative. Major resistance changes occur where the self impedance or reactance of the tower is high. Isolation circuits having a reactance opposite in sign to the tower reactance raises the effective tower resistance. Austin transformer isolation under some conditions causes significant

changes. This paper will outline the means for minimizing the effects on tower resistance by the various isolation circuits.

9:15-9:40 a.m.

"Characteristics and Applications of Tunnel Diodes," by ERICH GOTTLIEB, application engineer, General Electric Co.

MR. GOTTLIEB

This paper, illustrated with slides, deals with the unique device characteristics of the tunnel diode as well as its temperature, noise and radiation resistance behavior. After analyzing the frequency limitations of the device, the author establishes the gain and stability criteria of amplifier circuits by graphical means. Practical results are discussed including simple switching circuits.

9:45-10:10 a.m.

"Recent FCC Rule Changes," by JAMES E. BARR, assistant chief, Broadcast Bureau, FCC.

MR. BARR

Rules governing the broadcast services have purposes and objectives, which, when applied, achieve an over-all improved broadcast system. The principles involved in the formulation of such rules are discussed together with some difficulties experienced in their application. The administration of broadcast rules and regulations are not immune to controversy and disagreement. Recent amendments to certain of the broadcast rules will be discussed in the light of the administrative agency and their impact on the industry.

10:15-10:40 a.m.

"Determining the Operational Patterns of Directional Tv Antennas," by DR. FRANK G. KEAR, Kear & Kennedy and STEPHEN W. KERSHNER, A.D. Ring & Assoc. (Paper presented by Mr. Kear)

In January 1959, TASO authorized its committee on directional antennas to conduct tests on operating directional tv antennas looking toward development of a means whereby the operational antenna pattern could be determined and to explore the effect of reflections and anomalous propagation on the degree of directivity actually obtained as compared with that calculated.

MR. KEAR

Tests were carried out at WBZ-TV Boston and at WKY-TV Oklahoma City with special directional antenna systems possessing various degrees of directivity. This paper describes such tests and a procedure which was developed whereby the operational antenna pattern could not only be determined but also rechecked at suitable intervals.

10:45-11:10 a.m.

"Constant Level Program Amplifier", by JOHN BIRCH and CHARLES KING, project design engineers, Gates Radio Co. (To be presented by Mr. Birch).

A technical and operational description of an expander-compressor amplifier that does not degrade the system signal-to-noise ratio under "no signal" conditions. Most limiting and compressing amplifiers return to their maximum gain when no signal is present, this raising the system noise by the amount of limiting or compressing used. The amplifier to be described attains maximum gain only when signal is present. Under controlled conditions, it is possible to increase the s/n ratio in the system.

11:15-11:40 a.m.

"The Folded Unipole Antenna for Broadcast," by JOHN B. MULLANEY, consulting engineer.

MR. MULLANEY

Reducing the physical height of an antenna system without impairing its electrical characteristics is accomplished by means of the folded unipole theory application. Rather than using inductive or capacitive loading, it will be shown that by grounding a structure

FM's big day

Sunday, April 3, has been proclaimed "Fm Day" by Mayor Richard J. Daley of Chicago. It's also Fm Day at the NAB convention. Mayor Daley lauded radio, including fm, for contributions to American living. The proclamation was issued March 24. The mayor called radio "the major educational, cultural and entertainment medium in America."

TECHNICAL PAPERS CONTINUED

and folding back one or more conductors, it is possible to obtain a wide range of radiation resistances, and at the same time a bandwidth much greater than is possible with the same antenna without loading and the unipole method of feed. A formulation is given for determining the transformation ratio, the radiation resistance, the axial spacing from the tower and the method for determining the ratio between the diameters of the folds and the tower itself. It will be shown that a folded-unipole antenna can operate with a limited ground system and shorter physical length with equivalent efficiencies for normal ground systems and quarter wave antenna heights.

11:45 a.m.-12:10 p.m.

"Experimental Operation of a Co-Channel Supplemental Transmitter to Provide Coverage Fill-in," by DANIEL H. SMITH, *vice president and director of engineering, WTEN (TV) Albany, N.Y.*

MR. SMITH

When WTEN commenced operation, it became apparent that the "shadowed" Hudson River Valley received very little signal from the transmitter located 35 miles away, although city grade coverage was predicted over this area based on the FCC Sixth Report. This paper will describe an experiment which was made using an on-channel supplemental transmitter with antenna pattern and location selected to fill in this low signal area. To minimize interference between the two transmitters, precisely offset carrier frequencies were employed, with the offset frequency an even multiple of frame frequency.

12:15-12:30 p.m.

"Manifestations of the Special Law of Electron Eccentricity in Broadcast Equipment," by JOHN W. WENTWORTH, *manager, educational electronics, Broadcast and Television Division, RCA.*

Research scientists have understood for many years that electronic devices, even those using transistors, are heat-producing devices and hence subject to the famous three laws of thermodynamics. Only recently, however, has serious attention been devoted to the problem of developing a special theory to explain the frequent deviations be-

tween observed and predicted results in electronic devices. It has now become apparent that there is a fourth law,

MR. WENTWORTH

which has been called the "special law of electron eccentricity." This paper consists of a brief historical review of the events leading to the discovery of the special law and a summary of its major manifestations in broadcast equipment. This paper is presented at the request of the NAB Broadcast Engineering Conference Committee.

2:30-2:55 p.m.

"Tv Automation," by FLOYD R. MCNICOL, *manager, Broadcast Systems Group, RCA.*

MR. MCNICOL

Automation of the program assembly function is one of the most promising approaches to cost reduction in operation of a tv station. Developments along this line have reached a practical stage and have been installed in existing stations. Important steps in these developments have been the consolidation of equipment and controls and the introduction of age and alc. This paper will describe the development of basic automation equipment and a system utilizing punched paper tape as the memory device.

3-3:25 p.m.

"Aural Program Automation Techniques," by PAUL C. SCHAFER, *Schafer Custom Engineering.*

MR. SCHAFER

This paper explores the basic requirements of an automation system. As a part of that analysis, the description of essential equipment functions provides a background for the explanation of the methods of integrating these functions into an automation program se-

quence. To further the understanding of this integrated operation, there is a detailed description of the automation circuitry and how it operates. As a conclusion, the discussion of the use of auxiliary equipment summarizes the value of such equipment in enhancing the operation of an automation system.

3:30-3:55 p.m.

"Maintenance: Key to Minimizing Videotape Recorder Operational Costs," by JOE ROIZEN, *manager of application engineering, Ampex Corp.*

MR. ROIZEN

The purchase of an Ampex VR-1000B Videotape recorder brings with it the responsibility of adequate maintenance to keep the equipment in top-notch operating condition. Not only does preventative maintenance serve to maintain the machine in prime condition but more important, minimizes the chance of accidental failure while it is being used on the air. With this in mind, the Ampex Videotape recorder has included in its design many innovations which make maintenance relatively easy and help keep down operational costs by rapid check procedures that are incorporated into the operational setup of the machine. This paper will describe such procedures.

4-4:20 p.m.

"Video Tape Recording Interchangeability Requirements," by K. B. BENSON, *senior project engineer, CBS Television Network.*

MR. BENSON

Interchangeability requires close control of many manufacturing parameters and operating standards. Mechanical dimensions of particular importance include those relating to the video track azimuth, pitch and width as well as the angular placement of the four rotating heads. Essential electrical parameters include the value of carrier frequency corresponding to reference video levels. In addition, response frequency characteristics of audio, video, and carrier frequency channels must be standardized. The significant factors concerning the video signal are discussed relative to proposed industry standards and current CBS Television Network practices.

4:20-4:40 p.m.

"Integration of Video Tape With Live and Film Programs," by W. W. MALANG, video facilities engineer, ABC and M. C. WORSTER, eastern division manager, television engineering operations, ABC.

This paper is to be presented in two parts. The first will deal with the op-

MR. MALANG

MR. WORSTER

erational problems involved in integrating video tape into live programming. The "pros and cons" of the various systems in use today will be discussed. The second part will explore the technical characteristics and limitations of the systems used to date

BROADCASTING, March 28, 1960

to integrate video tape with live programming.

4:40-4:50 p.m.

"New IRE Roll-Off as Related to the Broadcaster," by G. EDWARD HAMILTON, director of engineering operations, ABC.

There have been two IRE standards established for the measurement of video levels (1950 and 1958). The advent of color television brought into focus the need for a measuring tool which would evaluate the luminance component of the signal. The 1958 standard was made to insure adequate suppression of the chrominance components thus permitting its use for either color or black and white signals. Application of the new standard has indicated the desirability of its use with a reduction in

MR. HAMILTON

tolerance such as to provide more uniform measurement of video levels.

4:50-5:20 p.m.

"Improvements in Television Cameras," by JOHN H. ROE, manager, tv camera engineering, RCA.

The utilization of advanced circuit techniques and components has made possible significant improvements in the performance of television cameras. Important among the improvements are better stability and reliability which permit simplified operating techniques and less effort on maintenance. In addition, pictures of noticeably better quality are obtained. Development of improved camera tubes is an important aspect of the situation. New equipment embodying these developments will be described.

THE BIG NEWS FOR

1960

IS IN ROOM

1906

Be sure to visit suite 1906 at the Hilton and learn all the details of **THE AMERICAN CIVIL WAR**, the Sylvania Award-winning series produced by the Westinghouse Broadcasting Company.

Trans-Lux invites you to share the excitement of **THE AMERICAN CIVIL WAR**; and will be glad to arrange an audition screening at our offices near the Conrad Hilton Hotel.

TRANS-LUX TELEVISION CORP.

520 N. Michigan Avenue, Chicago
Superior 7-3995
NEW YORK • LOS ANGELES

P. S.

FELIX THE CAT, the rage of the 1959 convention, has something to purr about this year too. See him!

POWERFUL 15 KW FM TRANSMITTER

Superior in every way! That's the opinion of experts reviewing the circuitry and cabinetry of the most powerful FM transmitter in regular production—the GEL FMT10A. Built by the quality manufacturer of successful multiplex equipment. and a leader in quality high power FM.

General Electronic Laboratories, Inc.

195 Massachusetts Ave. Cambridge, Mass., University 4-7920, Sal Fulehino, Broadcast Sales Mgr.

Sold Nationally by:

See the GEL FMT10A on display during the NAB Convention in Booth 35. Or visit the Hospitality Suite 1200, Conrad Hilton.

Build Your Own Bauer Kit 1 Kw Broadcast Transmitter

Now, a top quality AM transmitter, of proven design, is also available as a kit... a complete kit that your engineering staff can build.

ATTENTION CLASS IV STATIONS!

You can now enjoy substantial savings on your daytime power increase if your engineering staff builds the transmitter with the new Bauer Kit. The finished transmitter will be fully inspected, tested and guaranteed by the Bauer Electronics Corporation. Built-in power cutback, remote control, and dummy antenna; 100% silicon rectifiers and automatic voltage control are but a few of the new Bauer transmitter's features.

WRITE TODAY FOR THE COMPLETE STORY

Or See Our Display at the NAB-Booth 38-N in the North Hall

Bauer Model 707. 1000/250 Watt Transmitter (In Kit Form) . . . \$3,495.00*
 Bauer Model 707. 1000/250 Watt Transmitter \$4,495.00*

TO THE IMAGINATIVE INDIVIDUAL CAPABLE OF ADVANCED TELEVISION ENGINEERING:

RCA has several unusually attractive openings in its Broadcast Studio Engineering Division.

New assignments include development and design of color cameras, television tape recording, and other TV studio equipment . . . as well as systems and project engineering involving the planning of TV equipment for automatic programming.

These openings call for television specialists with initiative, ability and above all, imagination. Preferred candidates will have an advanced degree in electrical engineering. Tangible achievements in broadcasting, or TV development and design, will gain special consideration.

If you qualify, and are interested in advancing your professional career with a steadily-growing organization that is a leader in its field, we invite you to arrange a confidential interview by sending a résumé to:

Mr. M. H. Kessler, Dept. BR-30

NAB PREVIEW

NAB's 1960 convention in Chicago will be six days long—Friday, April 1 through Wednesday, April 6—though the official program doesn't open until Sunday the 4th.

A series of off-agenda meetings that will cover a wide range of industry organizations and informal groups will get underway Friday at the Conrad Hilton Hotel. (See formal agenda, pages 84-85).

All national networks have listed business and social events. NBC-TV will unveil its autumn program schedule and promotion plans Sunday at the Palmer House. The meeting opens at 3:30 p.m. in the Red Lacquer Ballroom.

CBS-TV plans a banquet Sunday for affiliates. It will be held at 8 p.m. in the Ambassador Hotel, Guild Hall, and will be preceded by a 6:30 p.m. reception in the Room of the Four Georges.

ABC-TV executives and affiliates

Plenty of activity

will meet Sunday at 2 p.m. in the Grand Ballroom of the Conrad Hilton. The meeting will be followed by a 5 p.m. reception in the Williford room, with both radio and tv affiliates invited.

Mutual's plans include a Sunday luncheon meeting of network executives with members of the Mutual Affiliates Advisory Committee. The luncheon is scheduled for 1 p.m. in the Royal Skyway Suite (2300) of the Conrad Hilton.

A number of special-interest station organizations have scheduled meetings. They include Assn. of Maximum Service Telecasters, Tv Stations Inc., Regional Broadcasters, Daytime Broadcasters Assn., Clear Channel Broadcasters Assn., National Assn. of Fm Broadcasters, and Quality Radio Group.

What They'll Hear • AMST starts its agenda with a technical committee meeting Saturday, 2:30 p.m., in

the Sheraton Blackstone, and a Board of Directors meeting in the Conrad Hilton (Room 9) at 6:30 p.m. Another board session will be held Sunday at 12:30 p.m. in the same room. An AMST membership meeting is scheduled Sunday, 9:30 a.m., in the Bel Air Room of the Conrad Hilton, with Jack Harris, KPRC-TV Houston, in the chair as president. The membership will hear reports from Lester W. Lindow, AMST executive director; Howard T. Head, of A. D. Ring & Assoc., and Ernest W. Jennes, Covington & Burling, counsel. The new board will proceed to elect officers.

Tv Stations Inc., a broadcaster-owned, program-buying organization comprising over 100 stations, will hold its fifth annual membership meeting April 4, 8 a.m., prior to the formal convention opening. The group will meet in the Mayfair room of the Sheraton-Blackstone. W. D. Rogers Jr., KDUB-TV Lubbock,

Tex., board chairman, will make the feature talk. He will tell how to upgrade the quality of syndicated programs to network level without an accompanying price spiral. Herb Jacobs, president, will speak on buying patterns. Tv Stations Inc. will have a hospitality suite (2023A) in the Conrad Hilton during the convention.

Regional Broadcasters will meet Sunday, 11 a.m.-1 p.m. in Williford C, Conrad Hilton. Daytime Broadcasters Assn. will have a membership meeting at the same time in Room 14 of the Conrad Hilton. Quality Radio Group will hold an April 4 breakfast meeting in Room 9 of that hotel.

New Fm Group's Session • The new fm organization, National Assn. of Fm Broadcasters, will have a board meeting Friday night; membership meeting 10 a.m.-5 p.m., Saturday, in the Waldorf Room, and an open fm program Sunday, 10

a.m.-12 noon, in the Waldorf Room. Officers and directors will be elected Tuesday, April 5.

Assn. for Professional Broadcasting Education will open a two-day program with a Friday board meeting, 9 a.m.-5:30 p.m., in Room 18. APBE will hold an open meeting Saturday. Speakers include Charles H. Tower, NAB broadcast personnel-economics manager, who will review a joint NAB-APBE employment study now under way; E. K. Hartenbower, general manager of KCMO-TV Kansas City, chairman-designate of the NAB Tv Code Review Board; Miss Avery Gibson, H-R Representatives, New York, and H. W. Bussman, A. C. Nielsen Co., Chicago. A business session will be held at 4 p.m. followed by a reception at 5 p.m. Informal APBE discussion is scheduled in the evening. APBE is a cooperative project between NAB and regionally accredited four-year colleges with broadcast courses.

PAY TV PRESSURE TACTICS HIT

Fund for the Republic report criticizes opponents, proponents

The handling of the pay-tv controversy has been so thoroughly botched and bungled that an intelligent answer to the issue is hard to find.

But there is "no valid reason" why pay-tv tests should not be conducted—but "under strict standards" and with Congress writing out the "prescription" and seeing that it's adhered to.

These conclusions form the essence of a 12-page report, "To Pay Or Not To Pay," published last week by the Fund for the Republic's Center for the Study of Democratic Institutions (CLOSED CIRCUIT, March 21). It was written by Robert W. Horton, former newsman, and as in all such publications by the Center, the author is responsible for both factual content and conclusions.

Opponents • Mr. Horton charges that opponents of pay-tv distorted the issues by making it appear, under the FCC's 1957-58 test plan, that pay-tv stations would carry no free programming when in fact the FCC's plan required that they carry free as well as paid shows. He charges also that they lobbied extensively and stirred up "grassroots" movements against the project, meanwhile making "expensive gestures of lavish hospitality and contact with members of Congress." CBS is cited as having staged a dinner for 315 executives and 700 government notables, but also is quoted as denying it hoped to influence votes by this exclusively entertainment affair.

In the end, the report continues, the Senate Commerce Committee "apparently yielded to strong outside pressure" and requested the FCC to postpone the 1958 experiments, which the FCC did.

Proponents • "Whatever the tactics of the opposition," the report asserts, "the record shows that the proponents of pay-tv also share responsibility for the public confusion that surrounded the attempt to set up their experiment."

The proponents are accused of being especially vague about fees, talking in terms of \$2.50 for a baseball game or \$3.50 or more for a Broadway play, when actually it is "reasonable" to think that "fees of a nickel or a dime would finance programs that even the most prosperous sponsor under existing conditions could not afford." The pay-tv promoters also talk about offering "different" programming—but generally specify types that are already on the air and make little or no mention of "the educational potentialities" which some people feel may be "pay tv's greatest public value." The report continues:

"The question is whether a radical departure from the existing system of television broadcasting, such as pay tv, should be permitted to invade an important area of the public interest without some guarantee that it would serve that interest properly.

Bar Advertising? • "The FCC can extract guarantees from the newcomer. It can prohibit advertising, for example. It can insist upon concrete displays of his ability to perform a public service . . .

"Once the large sums needed to organize pay-tv operations are definitely committed, a vested interest is bound to be established. If the operations are allowed to continue for three years under the loose regulations now proposed by the FCC, any attempt to correct major policy mistakes during or

after that period will meet with powerful resistance. The FCC itself has suggested the possibility of trouble ahead in that direction, but it has not had the strength or the determination to minimize it beforehand.

"If the experiment is undertaken—and there is no valid reason why, under strict standards, it shouldn't be—then an informed Congress should write out the prescription immediately and make sure that it is adhered to.

Questions • "An effective prescription requires a thorough appraisal of existing attitudes and practices in sponsored tv. Are they consistent with the basic requirements of the law? Is the law consistent with the needs of broadcasting in both its private and its public characters? Is the existing law being administered competently? Would the introduction of pay tv require any change in the basic philosophy of broadcasting? And, finally, should the FCC be abolished? Should it be replaced by an agency responsible only for granting licenses, as well as for regulating the licensees' and networks' performance?"

"Only Congress is competent to answer these questions."

One other conclusion in the report: Tv is too potent to fool around with. It is a forceful media.

SETTLEMENT NEAR SAG and producers resume negotiations

An early conclusion of the three-week old strike of the Screen Actors Guild against the major movie makers was looked for Thursday (March 24) as representatives of SAG and of the Assn. of Motion Picture Producers resumed negotiations after a recess of nearly a week.

With agreement in principle reported on the major issues of contention, presumably all that was left for the negotiators was to dicker over the amount of money the producers would pay to the union in the form of "past credit" payments and whether or not the payments made by the producers to the actors for the use of post-1948 theatrical films on tv should include a provision for those pictures which had lost money at the box office.

When the strike set in, March 7, there were three major unresolved issues. First was a SAG demand that the pro-

radio and TV stations across the nation . . .
and to the Northwest Schools graduates
who have contributed to their success.

Stanley Deck, General Manager, KDIX-TV
Dickinson, North Dakota

KDIX-TV

Channel 2 • DICKINSON, NORTH DAKOTA

Channel 2 went on the air October 1, 1956, joining KDIX Radio which began broadcasting early in 1947. Transmitting facilities atop Golden Butte make the antenna North Dakota's highest point—3,556 feet. Operating with 26,000 watts of power, KDIX-TV reaches a vast market rich in farming, ranching, oil, uranium, coal and water power.

KDIX-TV is a CBS affiliate and serves its audience through many notable activities. The latest is PROJECT 60, an adult education college course being presented in conjunction with the Dickinson State Teachers College.

Mr. Deck has this to say of Larry Heidt,
Northwest graduate who recently joined the
staff of KDIX-TV as Cameraman:

"Larry does excellent work and is well grounded in television fundamentals. His knowledge and ability have contributed to our success and we are quite pleased to have him on our staff."

ducers pay an amount equal to 5% of the total actors' salaries (limited to \$100,000 for any actor in any picture) into a SAG pension, health and welfare fund. This, the producers have reportedly accepted.

Second was the SAG demand for payments for the right to use post-'48 theatrical films on television. This, the producers at first refused even to discuss, asserting that they had paid the actors in full for their work on these theatrical films and to pay them again when the pictures are shown on tv would be to pay twice for the same work. The solution to this dilemma was a plan whereby the producers would make a fixed payment into a pension fund to place the actors in a position comparable to the other guilds and unions which have been in the existing Motion Picture Industry Pension Plan since October 1953," to quote a joint SAG-AMPP statement.

Acceptable Plan • This plan was acceptable to both sides, but SAG figured that the amount of the lump sum payment should be \$3.6 million, which the Guild calculated the actors would have received had they been part of the industry pension fund since its inception. The producers offered a lump payment of \$1.5 million. The \$2.1 million remained to be worked out in the negotia-

COLORCASTING

Here are the next 10 days of network color shows (all times are EST).

NBC-TV

March 28-31, April 1, 4-6, (6:30-7 a.m.) Continental Classroom.

March 28-31, April, 4-6, (11-11:30 a.m.) Price Is Right, participating sponsors.

April 2 (10:30-11 a.m.) Ruff and Reddy Show, Borden through Benton & Bowles.

April 2 (7:30-8:30 p.m.) Bonanza, RCA through Kenyon & Eckhardt.

April 3 (1:30-2 p.m.) Frontiers of Faith.

April 3 (9-10 p.m.) Dinah Shore Chevy Show, Chevrolet through Campbell-Ewald.

"for the specific purpose of compensating for pictures which did not make a profit in theatres." It was also pointed out that an agreement on a flat percentage for all pictures would eliminate the need for SAG inspection of company books and also prevent endless wrangling over accounting procedures.

A little elementary arithmetic reveals that if, on the average, post-'60 pictures get \$100,000 for tv rights, the actors' share would be \$4,200 (7% of the gross less 40% allowed for distribution expenses), which SAG claims is not very much to ask from the \$100,000 gross.

WGA, which has been on strike against AMPP and also against the Alliance of Television Film Producers since Jan. 16, and which called out freelance writers of material for network filmed programs to the strike list March 18, last week prepared to expand the scope of its strike range if necessary. Members of WGA's radio and tv branch were summoned to special membership meetings to be held in New York and Los Angeles on March 31 for the purpose of voting authorization to the Guild councils to call strikes against the networks for live tv, radio continuity and news writing and against some 50 producers of tv films not affiliated with either the major movie companies or ATFP.

WGA has been negotiating with networks in New York over a new contract for the news and continuity writers, whose present pact expires March 31.

Harry Ackerman, executive producer of Screen Gems, Los Angeles, predicted in Seattle last Wednesday that there will be more live than taped television network shows next fall because the strike of tv writers is rapidly depleting the supply of scripts and production is grinding to a stop.

Payola scare prompts ASCAP to cut royalties

The faint aroma of payola caused the American Society of Composers, Authors and Publishers last week to change the formula for payment of royalties for music performances on network shows. ASCAP announced it had reduced to 25% of maximum the credits for background and theme music used on network programs which run more than once a week.

The move was made, ASCAP explained, because it had learned that background and theme music on multiple shows was receiving far greater than normal use. "This suggested that such disproportionate use was the result of factors other than the needs of the programs or the merit of the musical works," ASCAP stated.

The Justice Dept. concurred.

tions beginning last Thursday.

Third major impasse was the SAG demand for payments to actors of a share in the proceeds from the sale to television of theatrical films made after the signing of the new SAG-AMPP contract. AMPP, in a statement issued last Wednesday before the resumption of negotiations, called this "a demand which could have dire consequences on the future of our industry." Pointing out that SAG "seeks additional payment on all post-'60 theatrical pictures, even those which may not recoup their cost . . . we find it difficult to accept the principle of additional payments on loss product."

SAG, elated over the fact that the producers, who had formerly refused to accept the principle of any sharing of tv revenue for theatrical pictures with the actors, were now objecting only to these additional payments "on loss product," pointed out that the percentage being asked takes into consideration the fact that Universal-International agreed to pay SAG 7% on the tv revenue of post-'60 theatrical pictures (BROADCASTING, March 21). This sum, it was noted by John L. Dales, SAG national executive secretary, is a substantial reduction for the original SAG demand of 17.5% which was made

CBS VIEWS CATV Local duplication draws network fire

A tv network has taken a firm position on community antenna systems: it is against catv where the cable company duplicates the programming of the local on-the-air tv station. It also emphasized that it has property rights in its programs and has never granted permission for its programs to be picked up by a community tv system.

The stand was taken earlier this month by Richard S. Salant, CBS vice president, in a March 7 letter to the mayor of Scottsbluff, Neb. The communication resulted from a request by William C. Grove, general manager of Frontier Broadcasting Co., which operates CBS-affiliated ch. 10 KSTF (TV) in Scottsbluff. Mr. Grove said that an application for a catv franchise in Scottsbluff was anticipated. No application had been filed as of week's end.

Mr. Salant made the property rights point at the outset:

"First, I would like to emphasize that the CBS Television Network has certain property rights in the network programs which it transmits. We do not believe that a community antenna system can legally pick off the signals which comprise a CBS Television Network program without permission of CBS. And CBS has never yet granted such permission."

Widest Choice • CBS believes. Mr. Salant said, that the best system of television is the one which gives the widest possible choice of programs "without the audience having to pay any sums in addition to what they paid for their television sets and for the maintenance of those sets."

Catv operations achieve some of these objectives, but defeat others, Mr. Salant said. In a community where there is only one local tv station, he observed, the community antenna system does permit a choice by bringing in multiple signals.

But the catv system may actually cut down the choice of programs to the people, the CBS vice president stressed. This would occur, he said, when the catv operation duplicates the programs being carried by the lone local station. This endangers the survival of the local tv outlet, he pointed out, because advertisers will find no need to buy the local station if their messages are being carried on the cable from another out-of-town station.

He continued:

"Thus, there is a tendency for community antenna systems which duplicate at least some of the programs carried by the local television station to deprive that local station not only

of important programming but also of the economic revenues which are necessary to permit it to survive. And if the television station cannot survive because of these circumstances, it will follow that all the people in the area served by the station who cannot afford to subscribe to the community antenna system or who are geographically beyond its reach will lose *all* tv service.

"Further, of course, if a community antenna system drives out the local over-the-air television station, the area served by that station will be deprived of all local programs dealing with news, local public affairs and other means of local television expression."

The communication was considered by the Scottsbluff council but, since there was no application pending, it was filed.

First Public Stand • The CBS position was believed to be the first official public stand taken by a network on the matter of catv operations. NBC, it is understood, some years past told catv systems they could not have permission to use programs, but nothing was ever done about this.

In 1954. KOA-TV, the NBC affiliate in Denver, attempted to arrange "affiliation" agreements with three cable companies. in Casper and Laramie, Wyo. and in Sterling, Colo. The station asked the catv operators to sign an agreement providing that its signals be used without deletion of commercials. It also asked that a minimum of 25 hours weekly be used, with at least 14 hours after 6 p.m. No payment was to be required. The catv systems refused to sign this agreement.

The chairman said that although the FTC had made advertising agencies as parties to a complaint where it appeared that they were either wholly or partly responsible for false advertising claims, the commission has not yet so named the "publishing" medium. However, he warned, "there is no express statutory exemption for media." There are no laws which give media "general immunity from FTC jurisdiction."

The public and moral responsibility of advertisers, Chairman Kintner said, must be shared by the media. "Whether this sharing of public and moral responsibility also should involve a sharing of legal responsibility to the extent that media are cited as parties respondents . . . is another matter," he said.

Special tv network to cover conventions

Plans for special independent tv network coverage of the Democratic and Republican nominating conventions are underway involving WGN-TV Chicago, United Press International, Canadian Broadcasting Corp.

Independent stations plan convention coverage

Sparked by WPTR Albany, N.Y., a number of independent radio stations are banding together for specialized coverage of the 1960 political conventions in Los Angeles and Chicago.

Major networks may lose some of their thunder in the comprehensive plans worked out by Jerry Cartledge, executive editor at WPTR, who contacted and won the cooperation of four other strategically

located stations: KOL Seattle. KNUZ Houston. KWKY Des Moines and WITH Baltimore.

News personalities from these five outlets plus WPTR's "Action Central" news editor, Don Byrne, in Washington, will staff a news booth on the convention floor at both sites. Each of these stations is making ar-

rangements to feed 20-25 other stations in its respective region with "personalized" convention stories.

Duncan Mounsey, executive vice president and general manager of WPTR, told BROADCASTING that while WPTR will provide the hotel facilities for the participating newsmen, all five stations will share the cost of the booth and the phoned news feeds. Mr. Mounsey, in comparing the nature of the coverage, says the major networks rely on analytical reports of national interest, while WPTR's plan concentrates on local area interest. He said that since the stations will be sending newsmen who know the political leaders from their geographical areas they can arrange for special interviews on specific area issues . . . and "each area will know how, what and why its particular delegates are supporting or rejecting people or issues."

Floor Plans • The independent convention coverage group will

operate from a "base" broadcasting booth equipped with more than a dozen radio-equipped telephones, sound and taping apparatus, typewriters manned by high-speed operators, and a bank of "interview" desks and tables. In Los Angeles a conference room will be maintained at the Ambassador Hotel. Similar facilities will be in operation at the Hotel Hamilton in Chicago. All facilities will be staffed and working two days prior to both political gatherings.

A schedule of five-minute feeds to individual stations has been set up on a four-per-day regular basis. Special feeds will be rushed as important news develops, and a final wrap-up for 11 p.m. news broadcasts will be fed, utilizing a round robin report from the viewpoints of each represented section of the country. Newsmen at the five key stations will process the feeds for immediate airing and distribution to participating stations in other markets.

and stations in Los Angeles and New York.

WGN-TV plans to offer feeds to other stations, presumably also network affiliates, from the Democratic conclave in Los Angeles July 11 and the GOP meet in Chicago July 25. There's no indication how many stations would accept the originations.

Coverage of the Democratic convention calls for feeds from Los Angeles to Chicago, to Buffalo and to New York by AT&T cables. CBC would receive network service from WGN-TV via Buffalo, tentatively slated to operate 4:30-5:30 p.m. and 8:30-9:30 p.m. UPI would supply camera crews and feed coverage over AT&T lines. Events would be put on film, quickly processed and edited. WGN-TV, still negotiating with Los Angeles and New

York outlets for active participation in the project, would provide technical, production and other specialists, it's understood.

PUBLIC OFFER

Metropolitan registers debentures with SEC

Metropolitan Broadcasting Corp. has filed with the Securities & Exchange Commission to register \$6 million of convertible subordinated debentures due 1975. The issue will be offered for public sale with interest, public offering price and underwriting terms to be supplied by amendment.

Metropolitan owns and operates WNEW-AM-TV New York. WTTG (TV) Washington. WHK-AM-FM Cleveland. WIP-AM-FM Philadelphia. KOVR (TV) Stockton-Sacramento, Calif., KTVH (TV) Peoria, Ill. and (pending FCC approval) WRUL New York (World Wide Broadcasting) and WTVP (TV) Decatur, Ill. It also owns the Foster & Kleister Div. of W.R. Grace & Co., outdoor advertising company.

Net proceeds of the debenture sale to the extent of \$5 million will be used to repay a bank loan incurred for the corporation's recent and pending acquisitions. It gave Metropolitan's income for the year ended Jan. 2, 1960, as \$13,855,314 with net income of \$1,500,025 or 97 cents per share of outstanding stock. President and board chairman is John W. Kluge, (salary \$65,154 annually); Bennet H. Korn, executive vice president for tv and general manager of WNEW-TV, (\$70,000); John V.B. Sullivan, vice president and general manager of WNEW, (\$68,653); Richard Buckley, former president and consultant, (\$62,653), and Bernard Goodwin, former president and consultant, (\$77,884). Employment agreements were listed with key officers including date of agreement, date of termination and annual compensation: Mr. Kluge (11/16/60—12/31/63), \$100,000; Mr. Korn (10/6/58—9/30/61), \$70,000; Harvey L. Glascock, vice president and general manager of WIP (3/1/60—1/31/64), \$40,000; John E. McArdle, vice president and general manager of WTTG (3/1/58—6/3/62), \$25,000 plus percentage of sales, which was \$6,648 in 1959; John V.B. Sullivan (10/22/58—9/30/61), \$70,000; Benedict Gimble, vice president and consultant (2/8/60—1/3/70), \$35,000.

Profit and loss statements in the registration statement for the year ended Dec. 31, 1959: KOVR had income of \$1,485,575 and a net loss of \$64,767; WIP's income was \$1,526,556 with a net loss of \$86,506; Prairie Tv and World Wide Broadcasting had income during the year of \$856,892 and net loss of \$11,425.

Keystone citation • Clair R. McCollough, Steinman Stations, was cited by Gov. David L. Lawrence, of Pennsylvania. "for the honor you have brought to your native state."

Mr. McCollough will receive the NAB 1960 Distinguished Service Award after delivering the keynote speech at the formal opening of the NAB convention April 4 in Chicago. The citation was presented by Gov. Lawrence (I.) in a ceremony at the Lancaster headquarters of the Steinman Stations.

Gov. Lawrence recalled the first commercial broadcast originated in Pennsylvania in 1920. "During the intervening years you have aided the growth of broadcasting and, through your constant effort, have assured its responsiveness to public need and community service," he said. "As a television pioneer, you have built the strong foundation of education, information and entertainment on which this vital young medium will flourish and continue to grow."

CBS does about face on canned laughter

CBS-TV has had second thoughts about canned laughter, or more particularly, the on-air identification of it. The network last week rescinded its earlier instructions that all cases of "technically augmented or supplied" audience reaction must be labeled as such at the close of any program using them.

In issuing the turnabout regulation, Joseph H. Ream, director of practices for the network, pointed to a loophole in the initial policy (issued Dec. 14) to change its dictates as "experience and continued study indicate." He also said they were being modified in light of "general reactions" to the procedures. General reaction to the canned laughter element was negative and vocal, particularly on the part of such network

stars as Jack Benny and Red Skelton.

Also dropped: the announcement that "certain portions of this recorded program were pre-recorded" and the requirement that the word "live" must be deleted from a program that originated live but has been recorded for repeat broadcasts. Now the word can stay, but the show itself must still be identified as pre-recorded.

NAFI Corp. to make public stock offer

NAFI Corp., licensee of KCOP (TV) Los Angeles, KPTV (TV) Portland, Ore., and (pending FCC approval) KXYZ Houston, has filed a registration statement with the Securities & Exchange Commission offering 200,000 shares of capital stock to the public. The public offering price and underwriting terms will be supplied by

amendment. NAFI engages in automotive and carpet, oil and gas business in addition to broadcasting.

NAFI has arranged to buy all outstanding stock of the Chris-Craft Corp., well-known boat manufacturer, and intends to use part of the money raised through the stock issue to repay a bank loan of \$6 million, borrowed for this purpose, the statement says. Financial statements on KCOP and KPTV are included in the prospectus: For the year ended June 30, 1959, KCOP made \$4,214,792 in tv revenues, but showed a net loss of \$481,838; KPTV, in the four months of 1959 that NAFI owned it, showed a net profit of \$133,473 before deduction of \$66,257 for "amortization of intangibles." The prospectus stated that "since its inception, KCOP has operated at a loss."

Paul V. Shields is chairman of the board of NAFI and a partner in Shields & Co., N.Y., which is underwriting the stock offering. John G. Bannister is NAFI's president. NAFI earned \$990,935 for the year ended Dec. 31, 1959, or \$1.01 per share on the outstanding 1,029,155 shares of capital stock.

Changing hands

ANNOUNCED • The following sale of station interests was announced last

week, subject to FCC approval.

• **KRAM Las Vegas, Nev.:** Sold by A.R. Ellman and Anthony C. Morici to Suna Broadcasting Corp., Leonard Blair, president, for \$328,000. Messrs. Ellman and Morici continue holdings in KIST Santa Barbara and KGMS Sacramento, both California. KRAM operates on 920 kc with 1 kw daytime and 500 w nighttime. David Jaret Corp. was broker.

• **WSBS Great Barrington, Mass.:** Sold by John Parsons, James Miller and Dorothy Crane to J. Leo Dowd for \$122,000. Mr. Dowd is a marketing consultant and was formerly sales director for International Silver. WSBS operates on 860 kc with 250 w daytime. Broker was Paul H. Chapman Co.

• **KVNA Flagstaff, Ariz.:** Sold by Frontier Tv Corp., group headed by John L. Hogg, to Albertson Broadcasting Corp. for \$70,000. Purchaser is headed by Roy L. Albertson Jr., 73%, Roy L. Albertson Sr., 9%, and others. The Albertsons formerly owned WBNY-AM-FM Buffalo, N.Y. Mr. Albertson Jr. has an interest in KNOT Prescott, Ariz. KNVA is on 690 kc with 1 kw daytime, 500 watt nighttime. Sale was handled by Wilt Gunzendorfer & Assoc.

• **WDAL Meridian, Miss.:** Sold by Southwestern Broadcasting Co., headed by Louis Alford, to Mr. and Mrs. Roth Hook, Hugh Hughes, Willie Weems and others for \$65,000. Mr. and Mrs. Hook have interests in WDOB Canton, WELZ Belzoni, WMAG Forest, all Mississippi, WKIZ Key West, Fla., WRUS Russellville, Ky., and WRAG Carrollton, Ala. Messrs. Hughes and Weems are associated with WMAG Forest, Miss. Southwestern continues its holdings in WAPF McComb and WMDC Hazelhurst, both Mississippi. WDAL is 1 kw daytimer on 1330 kc. Sale was handled by Paul H. Chapman Co.

• **KLOG Kelso, Wash.:** Sold by James D. Higson to K-L Broadcasting Inc. for \$65,000. Purchasers include Marcus and Myra De Launay. Mr. De Launay was formerly manager of KVAN Vancouver, Wash., and Mrs. De Launay was employe of KISN Portland, Ore. KLOG is a 250 w daytimer on 1490 kc. The sale was handled by Wilt Gunzendorfer & Assoc.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see FOR THE RECORD, page 143).

• **KTRN Wichita Falls, Tex.:** Sold by Texoma Broadcasting Company, headed by A. Boyd Kelley, to Broadcasting Associates Inc. for \$379,450. Broadcasting Associates is controlled by C. A. Sammons who, through holdings, has majority stock in KWAT Watertown, S.D. Raymond Ruff, who purchased 20% of KTRN, has a minority interest in KITO San Bernardino, Calif.

• **WINE-AM-FM Amherst, N.Y.:** Sold by John W. Kluge and Marcus J. Austad to the McLendon Corp., Gordon McLendon, president, for \$287,500. McLendon owns KLIF and KOST (FM) Dallas, KILT and KROW (FM) Houston, both Texas, and WAKY Louisville, Ky. Through subsidiaries or affiliates, the corporation owns KTSA San Antonio, Tex., KEEL Shreveport, La., and KABL, Oakland, Calif. Commissioner Robert T. Bartley dissented.

• **KCLE-AM-FM Cleburne, Tex.:** Sold by George Marti to Jim Gordon for \$145,000. Mr. Gordon has been regional sales manager for KCEN-TV Temple, Tex., for six years.

Business climate down South

Sit-down strikes in lunchrooms and demonstrations by Negroes demanding civil rights in the South have caused a small flurry of cancellations by local advertisers on Negro programming stations in the affected areas. On the whole, however, the stations tend to be optimistic and predict no long-range effects.

In a sampling of major Negro-radio chains owning stations in the deep South, BROADCASTING found the belief that the Negro community had confidence in their stations. None of the stations takes editorial stands on the integration problem, though WDIA Memphis reported programming forums on the question with both Negroes and whites participating, as well as opinion programs of listener telephone calls.

Some cancellations by local advertisers were reported in at least four trouble spots. One explanation of this was: "There is always a percentage of businessmen who get scared quick.

It's an emotional thing with them." A Little Rock station found that local advertisers who had cut their schedules during the first integration crisis there soon returned to the station and that subsequent crises in that city have produced fewer and fewer cancellations.

"The advertiser who uses a Negro station shows that he is interested in the Negro market and realizes that he is possibly less likely to be boycotted and more likely to be patronized by Negroes than [one who uses another station]," was a common opinion of station management. All sources pointed to Negro public service programming as another incentive advertisers should recognize.

One manager predicted that although some temporary loss of business had been incurred, the trouble would benefit Negro radio in the long run by producing a more closely-knit Negro community, with its own particular interests and identity.

Television Assn. said WCYB-AM-TV were judged on quantity and quality of 277 stories made available to other AP members. WKY Oklahoma City took second place for supplying the greatest number of stories, 438, and KNUZ Houston won third for a single breaking story providing AP with a "42-minute beat" on the explosion aboard a tanker last November.

New Texas network

A new network, to be known as the "Big-K", is being formed to link KLUE Longview and KMHT Marshall with additional stations in east Texas.

According to H.A. Bridge Jr., vice president of KMHT and KLUE, the present programming plans of the new network call for "a diversified schedule of local and regional news, plus on-the-spot broadcasts of major events that occur in the east Texas area."

Earl Godwin award

Keith S. Glatzer, director of news, special events, WFOR Hattiesburg, Miss., has been named winner of the third annual Earl Godwin Memorial Award. Mr. Godwin died September 1956, after more than two decades of radio newscasting. The award goes to an NBC affiliate newsman who distinguishes himself in covering a news or feature story for NBC Radio. Mr. Glatzer won the award for his coverage of the Mack Charles Parker kidnapping

and murder case in Poplarville, Miss. The award includes a six-month assignment as an NBC news correspondent in London.

WMAK staff resigns in r 'n' r protest

A policy switch from "good music" to rock 'n' roll at WMAK Nashville resulted in an estimated 4,000 phone calls of protest, over 1,000 letters and telegrams, and the resignation of entire staff including the commercial manager. According to WMAK's report, this "melee of fantastic proportions" was triggered by a decision by Fred Gregg, president and general manager, to switch to rock 'n' roll. He said, "I've found you can build audience more quickly with rock than with anything else."

The phone calls followed him all the way to his home in Lexington, Ky. By midnight, the resignations had come in, spurred by a disc jockey who resigned on the air. Mr. Gregg sent telegrams at 6 a.m. the next day announcing the station would go back to the good music formula and rehiring all hands. All the rebels returned but one, he said.

Mr. Gregg last Thursday summed up the incident: "We were the low-rated station in the market on Pulse. That's why I decided to make the change. As a result of publicity and the fantastic hubbub created, I would guess our listenership has tripled."

CBS to have employe stock purchase plan

An employe stock purchase plan, a deferred bonus plan and liberalization of retirement benefits for CBS employes will be voted on by the company's stockholders at their annual meeting, April 20, in New York.

Details of the proposals are spelled out in the proxy statement for that meeting. It also shows Chairman William S. Paley and President Frank Stanton again heading the company's salary and bonus list—with \$294,375 each—in 1959.

Messrs. Paley and Stanton each received \$150,000 in salary plus \$144,375 in additional compensation. In addition, \$5,625 was set aside for deferred payment to each.

Merle S. Jones, president of the CBS-TV Stations Div., ranked next with \$75,000 salary, \$35,000 bonus plus \$5,000 deferred. James T. Aubrey Jr. received \$68,942 salary and \$20,000 bonus as CBS-TV vice president, executive vp and, beginning Dec. 8, president. Louis G. Cowan, president of the tv network until his resignation as of Dec. 8, received \$69,808, with no bonus. Others among the highest paid executives:

Arthur Hull Hayes, president of CBS Radio, \$60,000 salary, \$17,500 bonus and \$2,500 deferred bonus; Goddard Lieberman, president of Columbia Records, \$67,500 salary, \$21,875 bonus, \$13,125 deferred; Henry C. Bonfig, corporate vice president and director, \$50,000 salary, no bonus; Arthur L. Chapman, president of CBS Electronics,

\$60,000 salary, \$12,500 bonus, \$7,500 deferred.

These figures do not include sums set aside for these executives under the CBS pension plan. The pension figures ranged from \$35,585 for Mr. Paley and \$24,626 for Dr. Stanton to \$11,210 for Mr. Chapman.

Changes in the pension plan for CBS employes would establish larger retirement benefits than the current plan provides but reduce termination and death benefits.

The employe stock purchase plan to be voted upon would allow employes to buy CBS stock, with the company then giving each participant one share for each five shares purchased, plus additional shares after each consecutive three-year period of participation in the plan.

The practical effect of the proposed new deferred additional compensation plan would delay payment of part of bonuses. Upon termination of employment, participants would receive the equivalent of what they would have received if the deferred portion had been invested and reinvested in CBS stock.

WRCV-TV rate card

WRCV-TV Philadelphia has introduced a new rate card that will become effective April 1. Current advertisers will receive rate protection through July 1; program advertisers until Oct. 1, the card states. Program time rates have been increased slightly; evening 10 and 20 second station breaks have

Boston shuffle

A complete reshuffling of television network affiliations in Boston became a virtual certainty last Thursday as CBS-TV announced that WHDH-TV, *Boston Herald-Traveler* station headed by William B. McGrath, would become its primary outlet in that area effective no later than next Jan. 1. WHDH-TV is now on ABC-TV. First step in the shuffling loomed when NBC closed its deal to acquire WNAC-TV from RKO General in exchange for WRCV-TV Philadelphia, part of an agreement also involving their respective radio stations and the purchase of NBC's WRC-AM-FM-TV Washington for \$11.5 million (BROADCASTING, March 21). Assuming the Justice Dept. and the FCC approve the Philadelphia-Washington swap, ch. 7 WNAC-TV—currently a CBS-TV outlet—will take on the NBC affiliation. With CBS and the ch. 5 WHDH-TV now signed, Westinghouse Broadcasting's ch. 4 WBZ-TV presumably will go from NBC to ABC. CBS authorities said their affiliation with Westinghouse's KPIX (TV) San Francisco would not be affected.

been adjusted while daytime station breaks remain unchanged. All minute participation rates have been increased.

EQUIPMENT & ENGINEERING

LATEST ELECTRONIC GEAR SHOW

IRE meets in New York and exhibits new equipment

Electronics experts seeking a single package of latest developments had their appetites whetted last week at the Institute of Radio Engineers 1960 international conference in New York.

A more concentrated wrap-up on broadcasting will be available next week in Chicago at the NAB Convention (see story, page 90).

Developments ranging the spectrum of electronic equipment were shown and explained. Some of these are adaptable to commercial broadcasting though the stress was on military and industrial applications as well as on space flight and communications.

IRE's four-day program consisted of technical papers at the Waldorf-Astoria and an engineering show at the Coli-

seum. It drew an estimated 65,000 engineers from 40 countries.

Sun Bounce • Donald J. Blattner, RCA Labs staff, theorized on use of the sun as a huge reflector that would relay radio signals between distant points on earth during periods when the moon was unavailable. He described the method as technically feasible via known transmission techniques and perhaps feasible via known transmission techniques and perhaps justified by a growing demand for more communication channels.

Scientist Blattner visualized a system of large antennas, powerful transmitters and advanced electronic data-handling equipment accomplishing the feat of reliably reflecting coded radio signals in

the solar atmosphere of ionized gases.

Signals transmitted at 40 mc would be reflected from the corona (outermost portion of the sun's atmosphere). Required would be a million watt power output and a 120-ft. parabolic antenna capable of following the sun as well as a wide-band receiver coupled with associated data, handling equipment for processing to handle some "smearing" of relayed signals caused by the sun's rotational speed. It would take about 16 minutes for the signal to cover the round-trip distance between earth and sun (speed limited by the use of 20-second pulses for communicating coded information which would overcome spurious noise created by the solar atmosphere.)

Tv by moonlight • Picture at left is a simulated demonstration of how television would look when taken by the light of a crescent moon, using a standard broadcast tube. This pretty much represents a telecast of a moonlight scene without additional illumination. Photo at right, using the same subject, camera settings and equipment, was made using General Electric's new "see-in-the-dark" image orthicon (Z-5358), showing the powerful effect of the new tube in a live demonstration at the IRE show in New York last week.

Various papers were delivered on space communications.

Among the tape refinements announced at IRE:

- A new magnetic recording tape developed by Reeves Soundcraft at a cost of \$9 million and designed for multi-track stereophonic sound. This includes a new oxide formulation to meet higher performance standards. Reeves also exhibited a new commercial video-tape.

- Pre-production models of a new hi-fi stereophonic tape cartridge system for the home recorded music market. A technical paper and demonstration were provided under auspices of Minnesota Mining & Mfg. Co., CBS Labs and Zenith Radio Corp. 3M and CBS Labs conducted the research program and Zenith is developing the first commercial machine for the new system (expected to hit the consumer market next year). The paper was presented by Dr. Peter C. Goldmark, CBS Labs president, and his associates, Dr. C.D. Mee, J.D. Goodell and Dr. W.P. Guckenber.

Officials of the three companies demonstrated a one-reel tape cartridge no larger than a folded handkerchief which has continual play for 64 minutes; an automatic changer for tape cartridges and a new recording technique providing hi-fi at a speed of only 1 7/8 inches per second. Up to six hours of music could be played on Zenith machines now being prepared for production. The cartridge changer could be designed to handle more cartridges if desired.

Two sessions on broadcasting were held during the week. The first included a report on the Geneva radio conference by W.H. Watkins of the FCC, a discussion of future possibilities (and how currently limited) for

mechanizing tv station film and slide operations by James H. Greenwood, WCAE-AM-FM, WTAE (TV) Pittsburgh, and an up-dating by RCA's George H. Brown of information on tv directional antennas.

The second took in engineering aspects of tv tape recording production (Edward E. Benham, KTTV (TV) Los Angeles), discussion of modernization in tv transmitter plant input system (Joseph L. Stern, CBS-TV), a paper on special effects amplification for either noncomposite or composite black and white or color signals (Ralph C. Kennedy, NBC-TV) and discussion of remote control handling of tv microwave equipment (John B. Bullock RCA).

Still other sessions reported advances in audio, microwave tubes, broadcast and receiver tubes, stereophonic sound production, magnetic recording, space electronics and antenna-propagation problems. One paper offered by two Japanese scientists—M. Morita and S. Ito of Nippon Electric Co.—explored methods of improving high sensitive receiving systems for fm receivers.

The usual welter of electronics equipment—heavy on space and industrial application—was highlighted at the more than 850 exhibit booths set up.

RCA Display • RCA emphasized uses of its thimble-size Nuvistor electron tube developments and miniature tunnel diodes. Employment in tv sets of the Nuvistor in vhf tuners, to provide improved fringe-area reception, and in a two stage, double-tuned intermediate-amplifier was displayed.

The company operated a modified "sportable" (an experimental tv receiver with 10 developmental Nuvistor tetrodes and eight developmental Nuvistor

triodes) in order to demonstrate potential compact tv set design. A nuvistORIZED fm tuner for use in fm radio, hi-fi and stereo systems was on display.

RCA's semiconductor and materials division demonstrated tunnel diodes and other electronic devices. The miniature tunnel diode has direct application in ultra-fast computers. RCA's exhibit contained a super-power tube that has potential use in intercontinental tv. This tube, of nail-keg size and weighing 150 pounds, can produce 5 million peak watts of long-pulse power at an average 300 kw power level at 450 mc. This provides enough power, according to RCA, to transmit a tv picture halfway around the world via bouncing a signal off a metallic balloon or other object in outer space. Latest RCA-made audio tubes for hi-fi, vidicons, storage tubes, a new color picture tube faceplate, and magnetic recording tape were shown.

General Electric's power tube department showed its "see-in-the-dark" camera tube for closed circuit tv; a hi-fi audio tube line; a new type of fabricated tubular cathode and a newly developed receiving tube that has an extra "shadow grid."

Corning Glass Works displayed a laminated tv picture tube that eliminates plate reflections (diffuses 75% of reflected light) while Sylvania Electric Products (General Telephone & Electronics Corp. subsidiary) exhibited new low-power electroluminescent applications.

Still Tv • Telectro Industries Corp., manufacturer of magnetic-tape equipment, demonstrated a system ("telectrovision") that transmits still tv pictures over ordinary telephone line. The device has application in military and banking fields, in advertising (to approve

or alter material near insertion deadline) and in news servicing (for tv stations and newspapers).

Many exhibits concentrated on the continuing trend to smaller and lighter electronic equipment to meet the demands of the military, of space programmers and industrial design engineers. Miniaturization found tiny tv cameras (one developed by Foto-Video Labs weighed only a few pounds and was less than a foot long), while a low-power tv station (translator-type transmitter for smaller communities and for educational purposes) was exhibited by Electron Corp., division of Ling-Altec Electronics Inc., (Dallas).

Tv "Eye" • A television-equipped "eye" that would orbit the earth in a satellite and operate for several years was discussed by Roy L. Zastrow, senior physicist, research labs div., Bendix Aviation Corp. Orbiting at a 300-mile minimum and 3,000-mile maximum, the tv device may be applied to such peacetime applications as weather reconnaissance, patrolling of sea lanes, seasonal forestry surveys and large-scale mapping. The Bendix scientist indicated that the "eye in the sky" could distinguish such objects on earth as an airliner parked on a runway.

Because of the problems of sensitivity requirements at night, the solar-battery powered system will have to "get down to starlight operational level" before continuous coverage will be possible, he said, and the system will continue to be limited to areas not covered by clouds. Mr. Zastrow stated that expected improvements in tube fabrication and automatic control circuitry make feasible installation of an image

orthicon system in a satellite. Although vidicon tv cameras are less complex, less bulky and lighter, they are not as sensitive for reconnaissance purposes as is an image orthicon camera. In most applications the tv signal would be telemetered directly to a ground station, avoiding the need for tape recording on the satellite, he said.

EIA members oppose any vhf-uhf set law

Tv manufacturers are going to oppose legislation which would require that television receivers be capable of receiving the whole vhf and uhf band. This position was taken at a spring meeting of the Electronic Industries Assn. in Washington.

The position is a reiteration of previous statements and was approved by EIA committee. EIA has asked to appear in any hearings scheduled by the House or Senate commerce committees. Pending before Congress are bills (S-3115 and HR 10817) which would require all tv sets to be capable of receiving the whole band of frequencies allocated for a particular service.

The EIA Board approved a resolution asking for Congressional legislation to require permanent marking of country of origin on tubes and semiconductors. It also authorized EIA executive vice president James D. Secret to call the FCC's attention to the fact that many foreign tv receivers do not meet radiation limitations imposed on U.S. manufacturers.

David R. Hull, EIA president and Raytheon vice president, was chosen to receive the EIA 1960 Medal of Honor.

New RCA tube • Radio Corp. of America last week brought out a new monochrome image orthicon (TK-12) television camera equipped with a four and one-half inch "big-image" pickup tube. RCA says it will achieve high picture quality for live broadcasting or tape recording copies of uniform clarity. The new

camera will be shown for the first time at the NAB Convention next week in Chicago.

The TK-12's simplicity of operation, RCA reports, does away with the need for constant operator attention to maintain picture fidelity, making it possible for a single operator to handle a group of cameras simultaneously. The big picture tube, a product of RCA's Electron Tube Div., involved the use of a large "target" and a relatively small photocathode—the same size as the photocathode on the standard three-inch tube. Lenses on the new camera need be no larger, according to the company. Electronic magnification produces the large image at the target, resulting in a corresponding increase in picture resolution for finer detail. The camera, which uses RCA's recently developed thimble-size Nuvisor tubes in the video preamplifier and in other camera modules, weighs only 130 pounds.

INTERNATIONAL

NO CBC MONTREAL MONOPOLY

BBG gives tv channels to CFCF, L'Anglais

Two privately-owned television licenses for Montreal were recommended last Tuesday (March 22) by the Board of Broadcast Governors. Grant for a second English language ch. 12 tv outlet went to CFCF Montreal, whose radio operation has been in existence since September 1919.

The other new station was awarded Paul L'Anglais, veteran program producer, who proposed a second French language service on ch. 10. Associated with Mr. L'Anglais are French film distributors J.A. Deseve and Andrew Ouimet.

Hearing on the Montreal tv applications were held by the BBG during the week of March 7. Montreal currently is served by the English language CBMT (TV) on ch. 6 and the French language CBFT (TV) on ch. 2. Both are owned by the Canadian Broadcasting Corp.

The Toronto Scramble • The BBG on March 19 wound up its hearing on the Toronto ch. 9 contest as final applicants echoed earlier proposals of rivals on programming with a predominantly Canadian content (BROADCASTING, March 21).

On the final day, March 19, CFRB based its application on its 33 years of broadcasting as a community station and dealt in detail with the programs it would telecast in 89½ hours a week early next year if granted the coveted license.

The case for CFRB was presented by Joseph Sedgwick, counsel. He and President Thornton Cran, assured the BBG that the radio and television operations would be highly competitive with separate staffs for sales, programming and operations.

CFRB is owned by Standard Radio Ltd., Toronto, with shares available on the Toronto Stock Exchange and at present is 99.32% Canadian-owned. Argus Corp., Toronto, a large Canadian holding company, has owned 49% of Standard Radio since 1947. The station has paid out \$1,827,500 in dividends since 1941. Station would build studios in the northeastern Don Valley suburban area alongside space bought by the

Canadian Broadcasting Corp. for a radio-tv center. In addition, CFRB has a tentative arrangement with CBC for sharing a mast to be built on CFRB-AM station property at Clarkson in western Toronto suburban area. The antenna installation would also be available to any uhf educational station licensed in the future.

CFRB officials outlined its proposed programming including 34 hours a week of live fare. They reported vast sources of British, French, Italian and German film available to cater to the heterogeneous Toronto population.

Toronto Telecasters Syndicate, headed by Toronto financier Henry Borden and Southam Newspaper chain, which has interests in CHCH-TV Hamilton, Ont.; CFPL-AM-FM-TV London, Ont.; CFAC Calgary, Alta.; CJCA Edmonton Alta., and All-Canada Radio & Television Ltd., Toronto, representation firm, appeared on March 18. Mr. Borden stated the station would be prepared within 90 days of starting to offer to every tv station in Canada 14 half-hour, one 20-minute and one 15-minute program weekly. The programs would be first offered national advertisers, and those not accepted would be sold to local stations for local sponsorship. The station would be located near Newmarket, Ont., 25 miles north of Toronto.

Jack Burghardt, formerly production manager of CHCH-TV Hamilton, who would be general manager of station, stated that it would start with 90½ hours a week, of which 55% would be basically Canadian.

Tower location • On March 19, Ralph Snelgrove, owner of CKVR-TV Barrie, Ont., urged BBG to heed the experience of stations in the United States which like the applicant Toronto Telecasters built their antenna in a different direction from that of the majority of receiving antennas. He pointed out that viewers would not buy antenna rotators to look at a second station, and since practically all receiving antennas in the Toronto area were erected to tune in Buffalo, N.Y., south of Toronto, a station north of the city would have poor reception in the city it was licensed to serve.

Summit Television Ltd., represented by Toronto lawyer J.S.D. Tory, would issue 27.3% of its stock for public sale, the BBG was told. Associated with Mr. Tory, who would hold 20% of the voting stock, are the morning *Toronto*

Globe and Mail with 23.9% voting stock, and the British J. Arthur Rank film organization, which would have a similar amount of stock. Five percent of the station's equity would be donated to universities.

Summit Television plans 111 hours of telecasting a week with a 60% Canadian content. The company plans to share tower with CBLT Toronto, when it is moved to its new site in the Don Valley area in northeastern Toronto, and meanwhile would arrange to share the present CBLT tower in downtown Toronto. The station would arrange for free time for political broadcasting as now done by CBC.

On March 17, Maclean-Hunter Publishing Co. Ltd., presented its brief for

Channel Nine Limited, which would be 80% owned by Maclean-Hunter and 20% by Associated TeleVision Ltd., of London, England. Floyd Chalmers. Maclean-Hunter president, emphasized his company had experience since 1887 in publishing periodicals in competition with U.S. publications, and so was well aware of the need and methods for providing high Canadian content in its tv programming to combat U.S. influence from Buffalo, N.Y.

Don Hildebrand, formerly of CKNX-TV Wingham, Ont., would manage the station. Plans are to start with 103 hours weekly late this year, if the license is granted.

Closed circuit showing of its program fare was made by Baton Aldred

Rogers Broadcasting Ltd. The presentation was made by Edwin Goodman and John Bassett, publisher of the *Toronto Telegram*. The newspaper would own 40% of the shares. Foster Hewitt, owner of CKFH Toronto, would have 10% investment, and Paul Nathanson, Sovereign Films Ltd., a similar amount. Nathanson has a share in CHCH-TV Hamilton, Ont.

Baton Aldred Rogers Broadcasting would build in the northern part of Toronto and start operations with a staff of 303 people, telecasting 15% of its programs live. The station plans French-language programs as well for Toronto's French-speaking population and to familiarize English-speaking citizens with Canada's second language.

FATES & FORTUNES

Broadcast Advertising

• WILLIAM A. MARSTELLER, president of Marsteller, Rickard, Gebhardt & Reed, Chicago, elected board chairman, succeeding E.A. GEBHARDT, named special consultant to chairman. RICHARD C. CHRISTIAN elected president and MARSHALL C. LEWIS succeeds Mr. Christian as executive vp and general manager of agency's Chicago office. A.W.

Hearing Cases

INITIAL DECISIONS

Hearing Examiner Basil P. Cooper issued initial decision looking toward granting (1) application of Grabet Inc., Radio Enterprises for new am station to operate on 940 kc, 250 w, unli., DA, in Tucson, Ariz.,

and (2) petition by W.H. Hansen to dismiss without prejudice his application seeking same facilities. Ann. Mar. 17.

Hearing Examiner Charles J. Frederick issued initial decision looking toward granting application of Tri-Cities Bcstg. Co. for new am station to operate on 920 kc, 500 w, D, DA, in Granite City, Ill., and denying applications of Madison County Bcstrs. and East Side Bcstg. Co. for same facilities. Ann. Mar. 21.

Hearing Examiner Forest L. McClenning issued initial decision looking toward granting application of Satellite Center Radio Co. for new am station to operate on 1550 kc, 10 kw, D, in Arvada, Colo., with engineering conditions, and denying application of Denver Bcstg. Co. seeking same facilities in Denver. Ann. Mar. 21.

Hearing Examiner Millard F. French issued initial decision looking toward granting application of Muhlenburg Bcstg. Co. to change frequency of station WNES Central City, Ky., from 1600 kc to 1050 kc, continuing operation with 500 w, D. Ann. Mar. 23.

Hearing Examiner David I. Kraushaar issued initial decision looking toward granting application of Hiawathaland Bcstg. Co. continuing operation on 1230 kc, 250 w-N, to increase daytime power of station WSOO Sault Ste. Marie, Mich., from 250 w to 1 kw, continuing operation on 1230 kc, 250 w-N. Ann. Mar. 23.

Hearing Examiner Elizabeth C. Smith issued initial decision looking toward (1) granting application of Bert Williamson and Lester W. Spillane for new am station to operate on 1290 kc, 500 w, D, in Santa Barbara, Calif., and (2) dismissing competing application of Goleta Bcstg. Assoc. for same facilities in Goleta, Calif. Ann. Mar. 23.

Hearing Examiner Isadore A. Honig issued initial decision looking toward granting applications of Tobacco Valley Bcstg. Co. for new am station to operate on 1480 kc, 500 w, DA, D, in Windsor, Conn., and Telecolor Corp. to increase daytime power of station WTXL West Springfield, Mass., from 250 w to 1 kw, and install DA for daytime use, continuing operation on 1490 kc, 250 w-N, engineering condition. Ann. Mar. 23.

OTHER ACTIONS

Commission has adopted an order revising sec. V-A of FCC form 301. "Application for authority to construct a new broadcast

station or make changes in an existing broadcast station." Revisions, effective April 25, 1960, were made to secure in more detail, and on uniform basis, engineering showing of required interference study in support of such application for standard broadcast facility.

Applications for new standard broadcast stations, or major changes in facilities of existing stations, and amendments, which are tendered for filing after May 25, 1960, must contain required engineering showing. Applications which are listed on "cut-off" lists (pursuant to sec. 1.354 (c) of commission's rules) adopted by commission after April 25, and any timely filed applications involving engineering conflict therewith, must be amended by "cut-off" date specified for listed application. All other applications which are presently awaiting processing must be amended by Oct. 25, 1960.

Time consumed in processing of standard broadcast application is matter of continued concern to both commission and applicants involved. Commission study of matter indicates that processing time could be reduced substantially if engineering data submitted with applications were prepared on more uniform basis and in form which could better serve as basis for required study by commission's staff.

Engineering showing required by said revision of sec. V-A, FCC form 301, should expedite processing of standard broadcast applications and, therefore, be of advantage to all applicants. Ann. Mar. 17.

Commission addressed following letter to KWTX Bcstg. Co. (KWTX-AM-TV) Waco, Tex. Comr. Lee abstained from voting and Comr. Craven dissented.

"This is with reference to your letter of Jan. 26, 1960, addressed to the commission, and a copy of a letter you addressed to Mr. William H. Brigham of Waco, Tex., requesting a declaratory ruling on the request of Mr. Brigham for broadcast time under section 315 of the Communications Act of 1934, as amended.

"In your letter to the commission, you state in substance as follows:

"KWTX Broadcasting Company has in its employ a Mr. Jack Woods. Mr. Woods is employed to broadcast weather news on KWTX-TV and KWTX Radio. This is his sole employment and he alone is responsible for the preparation and presentation of all weathercasts on KWTX-TV and all

Attention NAB GOLFERS

of AMERICA**

Tmk(s) ®

weathercasts on KWTX Radio with the exception of two broadcasts daily direct from the United States Weather Bureau. Teletype machines are installed at our station providing continuous weather reports from all United States weather reporting stations throughout the nation, affording the latest information for these reports.

"Mr. Woods broadcasts the weather news from approximately 10:18-10:24 p.m. nightly within our TX FINAL NEWS segment which runs from 10:00-10:30 p.m. seven nights per week. Mr. Woods also presents the weather news from approximately 12:20-12:25 p.m. each Monday through Friday as a segment in our television farm program. Mr. Woods also does a television weather newscast from 8:08-8:14 p.m., Monday through Friday. Mr. Woods also issues special weather news bulletins during emergency conditions. In addition, Mr. Woods does a three or four minute weathercast Monday through Friday at 6:15 p.m. and 10:30 p.m. on KWTX Radio, and also issues special weather warnings and weather news bulletins during emergency conditions. The above mentioned programs deal exclusively with weather news and do not in any manner give reference either directly or indirectly to political matters. Mr. Woods is now identified on these programs not by name, but as the TX Weatherman.

"Mr. William H. Brigham of Waco, Tex., has announced his candidacy for the Texas Legislature in opposition to Mr. Jack Woods who has also announced his candidacy for the Texas Legislature, Representative Place 1. Each of these men is a legally qualified candidate. Mr. Brigham has advised KWTX Broadcasting Company that each appearance by Mr. Jack Woods on either KWTX-TV or KWTX Radio in his regular job as weathercaster constitutes a use of these broadcast facilities, and he (Mr. Brigham) is demanding an equal amount of time on behalf of his political candidacy.

"I have advised Mr. Brigham that the aforescribed weather newscasts are not political in nature, that under section 315 (a) of the Communications Act of 1934, as amended, the appearance by a legally qualified candidate on any bona fide newscast shall not be deemed to be use of a broadcasting station and that, therefore, in our opinion the appearance of Mr. Jack Woods in his regular job of reporting weather news on KWTX-TV and KWTX Radio does not constitute the use of our broadcast facilities from a political standpoint under the meaning of the equal time provisions of section 315 of the Communications Act of 1934, as amended."

"In light of the above facts, and in view of the amendment to section 315 of the Communications Act (enacted by the Congress last year) which specifically exempts bona fide newscasts, it is our view that the equal time provisions of section 315 are not applicable and that, consequently, it is not required that the station 'shall afford equal opportunities to all other such candidates.' Our opinion in this case, as in all others, is, of course, limited strictly to the facts which have been brought to our attention." Ann. Mar. 17.

By memorandum opinion and order, commission dismissed petition by Woodward Bestg. Co., applicant for new am station in Wyandotte, Mich. (850 kc, 5 kw, DA-2, unl.) for reconsideration of Sept. 2, 1959 grant of application of Storer Bestg. Co. to increase daytime power of station WJW Cleveland, Ohio, from 5 kw to 10 kw, continuing operation on 850 kc, 5 kw-N, DA-2, and to change DA patterns. Ann. Mar. 17.

By order, commission stayed effective date of Feb. 1 initial decision which looked toward granting application of Fayetteville Bestg. Inc., to change facilities of station KHOG Fayetteville, Ark., from 1450 kc, 250 w, unl., to 1440 kc, 1 kw, D, pending further review by commission. Ann. Mar. 17.

Routine Roundup

ACTIONS ON MOTIONS

By Commissioner John S. Cross

Granted petition by KLIX Corp. (KLIX-TV), Twin Falls, Idaho, for extension of time to March 25 to reply to petition by Idaho Microwave Inc., for reconsideration and deletion of issue 2 in protest proceeding on its applications for new fixed microwave stations in Kimport Peak, Rock Creek, and Jerome, all Idaho. Action Mar. 18.

Washington 6, D. C.
for availabilities

applications of York County Bestg. Co. (WRHI), Rock Hill, S.C., et al. Action Mar. 21.

By Hearing Examiner David I. Kraushaar
Granted petition by Creek County Bestg. Co. for leave to amend its application for new am station in Sapulpa, Okla., in order to disclose his acquisition of majority control of Plains Bestg. Inc. (KGYN), Guymon, Okla., and to reflect changes made in its financial statement. Action Mar. 16.

By Hearing Examiner Forest L. McClenning
Upon request by Newport Bestg. Co., West Memphis, Ark., extended from March 15 to March 21 date for exchange of exhibits in proceeding on its am application, et al. Action Mar. 15.

Granted petition by Broadcast Bureau, and extended from March 16 to April 1 date for filing of proposed findings of fact and conclusions of law in proceeding on am application of Suburban Bestg. Inc. (WVIP) Mount Kisco, N.Y. Action Mar. 18.

By Hearing Examiner Herbert Sharfman
Upon request by Wabash Valley Bestg. Corp., extended from March 18 to March 28 time for filing initial proposed findings of fact and conclusions, and from March 28 to April 7 for replies in Terre Haute, Ind., tv ch. 10 proceeding. Action Mar. 16.

Pursuant to agreement at March 21 prehearing conference, continued hearing from April 21 to June 6, and scheduled further prehearing conference for May 23 in proceeding on application of WDUL-TV Corp., for mod. of cp of station WHYZ-TV Duluth, Minn. Action Mar. 21.

By Hearing Examiner Elizabeth C. Smith
Pursuant to agreement of counsel, and upon motion made at March 14 oral argument involving group 2 of proceeding on am applications of Florence Bestg. Inc., et al., continued from March 15 to April 1, for exchange of engineering exhibits for group 2, and from April 1 to April 15 for further prehearing conference and dismissed as moot petition for postponement of final engineering exchange date by Western Ohio Bestg. Co. Action Mar. 14.

Granted petition by Tenth District Bestg. Co., McLean, Va., for leave to amend its am application to reduce maximum expected operating values, except in null regions, to same as theoretical values; application is in consolidated proceeding with am applications of Florence Bestg. Inc., Brownsville, Tenn., et al. Action Mar. 15.

Granted petition by Catonsville Bestg. Co., for leave to amend its application for new am station in Catonsville, Md., to reduce height of ant. towers, etc.; application is in consolidated proceeding with am applications of Florence Bestg. Inc., Brownsville, Tenn., et al. Action Mar. 15.

Denied petition by Charles H. Chamberlain for leave to amend his application for new am station in Urbana, Ohio, to reduce power from 1 kw, nondirectional, to 500 w, directional operation; denied motion by Citizens Bestg. Co., Lima, Ohio, insofar as it requests that Mr. Chamberlain be held in default, and granted insofar as it requests that engineering data exchanged by Mr. Chamberlain be stricken, without prejudice, however, to exchange by Mr. Chamberlain of his preliminary engineering data in conformity with his application on or before March 25 and exchange of his final engineering exhibits on date fixed for all applicants in proceeding on am applications of Florence Bestg. Inc., Brownsville, Tenn., et al. Action Mar. 15.

On motion by Broadcast Bureau and consent of all applicants in proceeding on am applications of Radio Muscle Shoals Inc. (WOWL), Florence, Ala., et al., continued from March 22 to March 30 date for exchange of engineering exhibits, and non-engineering exhibits, if any, in final form. Action Mar. 21.

Upon agreement of parties, continued to date to be fixed hearing scheduled for March 22 involving group 2 of consolidated proceeding on am applications of James E. Walley, Oroville, Calif., et al. Action Mar. 21.

Box 798S, BROADCASTING

BROADCASTING JOURNALIST

for California news operation

We are searching for the form of broadcast journalism that will attract consistently 50% of the radio and TV audience in our viewing area of 425,000 TV homes. We have a 12-man News and Public Affairs department but we need at least one more broadcast journalist. We are not ready to prescribe the specifications of a broadcast journalist but we believe that he should:

1. know how to go out and get a story;
2. be able to put it into words that make sense to a large number of people;
3. have the faculty to communicate with these people through the facilities of a mike and a camera;
4. be excited about doing these things daily, under the pressure of the clock;
5. bring to his task a knowledge of these things fostered by a solid educational background and some experience in journalism, broadcasting or otherwise.

If you believe you are this man, write me a letter and tell me the facts you believe I want to know. We shall make further inquiry, based upon your letter. Tom Breen, Manager of News and Public Affairs, KCRA Radio and Television, Sacramento, California.

Situation Wanted—Sales

Can make your radio station a profitable business: Strong on sales and production and over-all operation. Responsible individual with a background that can be checked. Can bring my own crew.

I'M IMPRESSED, KLM. NOW, HOW ARE THINGS INSIDE ?

Friendly, that's how. On the KLM DC-8, it seems you're the only one who matters. Want to catnap before lights out? Here's a comfortable eyeshade. Bring the kids with you? Bet they'll be proud of these junior pilot's wings. Seen today's paper, sir? And how do you like your cocktails? KLM likes doing nice things for people like you. And on the KLM Douglas DC-8, every point of service is managed with thorough, quiet Dutch efficiency.

RESERVE THE KLM DC-8 TO EUROPE NOW! Wing across the Atlantic at 600-mph speeds, with never a shake or a shimmy. It's the kind of flying that puts you in the perfect mood for Europe. Non-stop from New York starting in April. See your travel agent (professionals plan better trips) or KLM Royal Dutch Airlines, **THE WORLD'S FIRST AIRLINE**

LOUIS, SAN FRANCISCO, SEATTLE, SYRACUSE, WASHINGTON, D. C.

OUR RESPECTS TO . . .

Adam Young

One morning 30 years ago a hopeful and enthusiastic Brooklyn lad of 17 hopped the subway to Manhattan to apply for work at NBC, then at 711 Fifth Ave. Adam Young's chief qualification: unafraid of hard work.

Now the president of the Adam Young station representative companies, Mr. Young, born in Brooklyn Aug. 22, 1913, had left school at 15 to work in his uncle's grocery store. The depression had sidelined his father, and with seven younger brothers and sisters at home he was determined on a better job. It was a momentous day in 1930 when he returned home—hired as an NBC page.

With this sense of urgency and a desire to get things done quickly to be ready for the next task—still his work philosophy—he moved on. In months he was captain of the page staff and also manager of the New Amsterdam Theatre Roof, where he worked overtime seven nights a week and where many of NBC's top nighttime radio shows originated. Other NBC posts followed. After a little production experience he was chosen to supervise the page and guide staffs when NBC moved to the RCA Building.

Research • After the move, Mr. Young shifted to the artists service bureau and then to the research department, where he spent three years. His flair for mathematics flourished with benefit of night school studies. He supervised some 20 people hired to carry out NBC's first network area study. He also wrote sales pitches to persuade accounts to increase their station lineups.

In 1937, with seven years of network radio experience to offer, Mr. Young was appointed radio director of Kiese-wetter Advertising Agency, New York, and worked on such accounts as Mennen, Kaywoodie and Walgreen. He did radio research, bought all radio time, purchased talent and produced radio shows. In two years he moved on, becoming a station rep salesman for Joseph Hershey McGillvra Inc., which represented both U.S. and Canadian stations. Before leaving McGillvra in 1944—to start his own rep company in November—he had become sales manager and general manager.

Starting as a specialist in Canadian radio stations and with the aid of one assistant—Joanne Scott, now his secretary—Mr. Young opened shop on West 42nd Street as Adam J. Young Jr. Inc. (later his name was changed legally to Adam Young). His first two station clients were CFRB Toronto and

CKLW Windsor-Detroit, both currently represented by Young Canadian Ltd.

Cautious • He moved cautiously, using no razzle-dazzle techniques to attract clients, but realizing he had to prove his capabilities. He looked for "real tough-sell" radio stations which he felt he could build into good, saleable properties. The list of satisfied station operators grew. As their incomes rose, Mr. Young had to add people to meet demands for expanded service.

Currently, Adam Young Inc. represents 27 radio stations, while Young Television Corp., started 12 years ago, has a roster of 19 tv stations. Nine of the tv outlets were acquired in the past year. Stephen A. Machcinski, now vice president for radio, was Mr. Young's first full-time tv salesman. Mr. Young is confident the tv business is just now beginning to hit its full stride, with the biggest growth yet to come.

Mr. Young has felt in recent years that the tv networks should make more good time available to their affiliates for spot business. This corresponds with a proposal made earlier this month by Station Representatives Assn. (BROADCASTING, March 14). Mr. Young is a former president of SRA and was one of its founders.

Young Specialty • Research is the byword in the Young organization. "While research doesn't replace selling," Mr. Young admits, "it does provide tools for the salesman. Media research practically runs agency media departments today," he claims. A major research project was launched last fall

REP YOUNG
His drive was built in

by Adam Young Inc., in association with The Pulse Inc. Called "advertiser area" radio surveys and covering the Tulsa and Pittsburgh markets, the surveys used the help of 80 advertising agencies in determining the area of "maximum advertiser interest" for each. The Pulse reports (BROADCASTING, Dec. 28, 1959) measured total radio audience on week days (6 a.m. to 6 p.m.). During April Pulse will conduct in the Hartford, Conn., market a third "advertiser area" study, with eight additional advertising agencies participating.

In the Young headquarters at 3 E. 54th St., a newly expanded research department and a larger tv sales department have just been completed for greater efficiency and further development. Time-saving devices will speed billing and sales analysis will be handled by IBM electronic computers.

Of more importance, on that date a new corporate entity enters the Young family. It's Southern Advertising Representatives Inc., headquartered in Atlanta and managed by Hal Parks, previously eastern sales manager of Young Television Corp. An SAR branch will open in New Orleans the same day headed by Charles E. Trainor, formerly head of Young's Atlanta office. SAR will embrace a 15-state area, as both an autonomous unit and as the southern division of Adam Young's radio and tv companies.

Time to Marry • Before leaving NBC Adam Young found time to court, and marry on March 1, 1936, a Brooklyn girl named Margaret (Peggy) Kelly. Their children are Richard, 22, senior at Brown U.; Susan, 19, sophomore at Syracuse U.; Sharon, 16, junior in high school, and Vincent, 12, in grade school. The family lives in Forest Hills Gardens, Queens, and maintains a summer home in Westhampton, L.I., where Mr. Young likes to play golf at Westhampton Country Club and enjoys boating, fishing and swimming. A new hobby is collecting antique guns, "but I have a lot more studying to do about them."

He has served on the board of Radio Advertising Bureau, is a member of the Men's Club of Forest Hills, and is former chairman of the Community House teenagers' center there.

Mr. Young's interest in youth activities goes back to the struggle of his own early years. His courage, responsibility and will to succeed during his youth qualified him for one of his proudest honors. In 1957 he was one of 11 American men voted a "Horatio Alger Award" by the American Schools & Colleges Assn. Winners are selected by more than 3,000 campus leaders. The awards serve as reminders to young people that opportunities for them still exist.

Turning tables

BROADCASTERS, it seems safe to say, haven't had many opportunities for fun lately. They've been too busy warding off blows from government, print media and assorted critics who don't watch television as much as they talk about it. But we venture that not many have failed to get an occasional lift by considering what pleasure they could have in doing unto their critics, from time to time, what their critics have been doing unto them.

In a modified form this salutary exercise in reciprocity is now going to be given a trial. CBS has announced that its owned television stations will start carrying weekly reviews of print media (BROADCASTING, March 21), and we should be surprised if the idea doesn't take hold and spread. We hope it does—provided that these commentaries are handled with thought and competence.

Television certainly is the most thoroughly reviewed medium in the world, although "review" is too charitable a word for the biased fulminations that many newspapers and magazines have let loose at every phase of tv, from what it does to what it doesn't do. Newspapers and magazines, on the other hand, are the least reviewed. All other major forms of entertainment, education and culture—books, motion pictures, theatre, music, ballet—are examined daily in the public prints. But there have been few attempts to appraise with regularity the performance of newspapers and magazines. CBS-owned WCBS New York did it on radio in the late 1940's but that was the exception not the rule.

This void is one which only television and radio can fill. Newspapers and magazines cannot be expected to do it—or to do a fair job if they should try.

The void ought to be filled—but responsibly. Carping criticism and competitive knocks, for the sake of knocking, will be fruitless. We think CBS is on the right track: no "sophomoric criticism," but rather an examination of whether the print media, through their selection of stories, display, attention to important world, national and community issues, etc., are themselves showing an awareness of the public interest.

In this sort of evaluation, bias and distortion would be superfluous. An objective presentation of the truth will be enough to give the public a fresh perspective and perhaps, in time, even lead to some improvement in the print media.

Somber but embattled

THERE will be serious business in Chicago next week at the 28th annual convention of the NAB. Broadcasting is in deep trouble and broadcasters know it. The advance registration is the biggest ever.

It will be a somber convention. There isn't much to shout about. NAB has lost its president and chairman. Harold E. Fellows had given everything he had to the job.

In the year that has elapsed since the last convention, broadcasters have been pilloried by Congress, by the competitive press and by the intellectual minorities. Both the FCC and the FTC have been forced, by these pressures, to go far beyond their normal intent in showing that they mean business. An FCC chairman, John C. Doerfer, gave up the ghost because of circumstances which, in any other political climate, would have resulted in a slap on the wrist.

If ever broadcasters needed solidarity and a singleness of purpose, it is now. Like it or not, they are in a fight that isn't apt to end any time soon. The faint-hearted, or those interested only in a maximum return on their investments, do not belong.

How to fight back is the job of the stronger elements. A

committee of three respected broadcasters is functioning as an NAB policy group during the vacancy in the presidency. A thoroughly representative committee of eight has the assignment of selecting a successor or successors to Mr. Fellows. These committees will meet during the convention to chart a course of action to be recommended to the joint board of directors.

In Clair McCollough, G. Richard Shafto and Merrill Lindsay broadcasters have working for them during this emergency a regency of capable men. They are giving voluntarily of their time and energy to direct the sizeable headquarters in Washington until new permanent leadership takes over.

The natural impulse is to select a new president—or possibly two new executives—as quickly as possible. The policy committee would like to be relieved soon. The woods are full of candidates. But the stakes are too great to make any mistake now. It would be far better to canvass the field thoroughly—until after the November elections if need be—than risk less than an optimum appointment.

For several years we have urged a streamlined reorganization of the NAB more in keeping with the evolution of the broadcast media. We have envisioned the NAB as an umbrella over the various trade groups with its area of authority to cover broad public policy, legislation and nationwide public relations—a sort of federation of broadcasters.

We haven't changed our view, but at this crucial stage there must be business as usual to cope with unusual problems. The NAB organization must keep functioning with least possible dislocation until a new full-time leadership takes over. The new man at the top certainly will have ideas about reorganization.

There have been no changes in the NAB structure since the 1951 reorganization when Mr. Fellows assumed the helm. Since then television has developed miraculously, and the whole face of radio has changed. In the past few months, television has undergone severe alterations in programming and business methods because of congressional investigations, abetted by a tidal wave of press criticism engendered by competitive motives.

Broadcasters have one great advantage, if they will use it wisely. They provide indispensable public services in both television and radio. The public, as every unbiased measurement has shown, is for them—and for the American free enterprise system. Broadcasters can demonstrate their strength in Chicago next week by their determination to fight to defend their free estate.
