Mighty metropolitan Detroit is a city on wheels, where 81% of all families own cars, and 65% use their cars to get to and from work. That's why the Great White Safety Fleet... dramatic new public service launched by WKMH... has been greeted so enthusiastically by such a large proportion of the million-plus drivers in the Greater Detroit area. ** Morning and night, from 6:30 to 9:30 and 3:30 to 6:30, these motorists tune in WKMH for up-to-the-minute reports on traffic conditions on main arteries and expressways... flashed directly from the White Safety Fleet... manned by former Detroit Police officers (now retired) who represent 137 years of traffic experience. This authentic service expedites traffic flow... smooths driving chores... soothes drivers' tempers. It is one more reason for the strong continuous upward surge in WKMH audience... WKMH ratings... WKMH prestige.

reaching a market that's reaching new importance!
WCBM
the BEST WAY
to REACH
the ADULT LISTENER
in the vast
Baltimore MARKET

Here . . . in this expanding market of over 1,700,000 people in the Baltimore Metropolitan area . . . is tremendous adult buying power. And you can reach em all day, every day through WCBM . . . the station that delivers a greater percentage of adult listeners in Baltimore Radio.

A CBS RADIO AFFILIATE

WCBM

BROADCASTING, October 3, 1960
The 9 counties which make up the Dallas Urban District represent the 11th largest market in the United States. . . . 11th in population, but more important, 10th in retail sales.

Cover the Dallas Urban District PLUS a bonus of 49 other counties, a total population of 2,647,894, with CHANNEL 4.

*KRLD-TV Has The Largest Coverage Area Of Any Station In Texas*
CLOSED CIRCUIT

Still another ▼ There may be fifth "great debate" between Nixon and Kennedy after all. Originally Democrats wanted five and Republicans three, with four settled upon as compromise. Now it's learned Nixon forces might go for fifth on or about Oct. 31. Networks are all but committed since they guaranteed maximum of eight hours, double the number now spoken for.

Censorship? ▼ FCC is counting spots again and finds itself again divided on extent of its authority on program issues. In sending "promise vs. performance" inquiry (McFarland) letters to two stations (WAVZ, New Haven, Conn.; KORD, Pasco, Wash.) advising them that renewals indicate necessity of hearing, FCC split 4-3. (See story page 78.) Commissioner Craven asked that minutes show he regarded letters as attempt at censorship in violation of Section 326 of Communications Act and that it was "persecution" of small stations. Commissioners Hyde and King joined in dissent, but not necessarily in his observations.

Left out ▼ Some network feathers were ruffled by NAB presidential selection committee in last week's activity which brought Florida's Gov. LeRoy Collins' name to negotiating stage (see story page 27). Networks, it seems, were not consulted or even formally notified, and consistent with practice, won't be until special board meeting is held, now tentatively set for next Monday, Oct. 10. Then network representatives on radio and TV boards will get word, assuming, of course, that in interim proposed contract is evolved. ABC has been disturbed since last March when announcement of eight-man selection committee disclosed no ABC affiliate on group. This, NAB officials assert, was happenstance.

Selection committee members confide that Gov. Collins, at luncheon conference Sept. 22, exhibited remarkable understanding of broadcasters' problems and that he was "persuasive, articulate, bright and intelligent." And, like any good salesman, "he wasn't afraid to ask for the order."

Meaty agenda ▼ When NAB board meets in special session, there will be more on agenda than ratification of selection of Gov. Collins of Florida as NAB's next president. Among other topics: pay-TV hearing called by FCC to consider Hartford test; community antennas and effect on TV stations in small areas; Federal Aviation Agency's jurisdictional claims over towers.

Tv earnings ▼ National Airlines has revealed some figures clearly showing why it's putting up fight to keep its WPST-TV Miami on ch. 10. In registration statement filed with Securities & Exchange Commission, airline reports WPST-TV during year ended June 30, 1960, had net income of $177,152 (after payment of $60,580 in management fees to parent company) and earned surplus of $11,854. In same period parent National Airlines showed net loss of almost $4 million. WPST-TV was shown in SEC statement to be capitalized at $2,500.

National states it can't predict outcome of present litigation over ch. 10, which FCC withdrew from National and granted to L.B. Wilson Inc. But in SEC statement National advises stockholders that if it were forced to liquidate Public Service Television (subsidiary owning WPST-TV), no material loss would be incurred.

Debate 'commercial' ▼ Bid for plug on Oct. 7 Nixon-Kennedy debate has quietly been made by American Heritage Foundation, non-partisan group promoting registration and get-out vote campaigns in cooperation with Advertising Council. It's unincorporated foundation would supply film clip featuring chairman of Democratic and Republican national committees.

As if TV networks didn't have enough trouble reaching agreement on their joint newspaper ad promoting first Nixon-Kennedy all-network broadcast (CLOSED CIRCUIT, Sept. 19), more trouble developed after it ran. As it finally appeared, ad was signed by ABC, CBS and NBC television and radio networks; which drew blistering reaction from Mutual on grounds that its radio-only network had been slighted. Mutual authorities claimed they were told in advance that ad, coordinated by TVI, was for TV networks only. They decided against formal protest after ad appeared with plug for radio rivals, but word is that informal complaints were heated.

Fm boxoffice ▼ Medium of fm is being studied by moviemen for special ticket-selling assignment. In talking stage now is fm campaign next month for Warner Bros.' "Sunrise at Campobello." WB agency for this picture, currently in release in five major markets, is Blaine-Thompson Co., N.Y. Roosevelt story is slated for bookings around the country around Thanksgiving holiday.

One less week ▼ For first time in decade there'll be no National Television Week, normally observed in November. NAB has no explanation, but it's understood that the old TV Board did not take up matter at June meeting through which it was on agenda. Recent TV Weeks have been marked by colossal indifference by public and by some of participating associations.

In contrast, National Radio Month has been building up momentum since it graduated from one- to four-week observance, held in May. NAB and related groups have developed intensive promotional campaigns in all parts of country and claim results are rewarding.

British debates ▼ Charles Fletcher-Cooke, British M.P. and member of Queen's Council, was so impressed with Nixon-Kennedy appearance last Monday that he proposed to recommend same kind of exposure in British elections. Format problem is involved, however, because candidates do not run for prime minister, but for Parliament, with victorious party then choosing its leader. Mr. Fletcher-Cooke, who participates on weekly tv panel over Granada network, is in U.S. making study for Associated Television on part tv and radio play in elections.

Mr. Fletcher-Cooke also foresees commercial radio in Britain to compete with BBC's non-commercial operation, but feels this will come in "package deal," perhaps in 1964 when recently named Royal Commission will report findings on proposal that second commercial tv operation be established to compete with present Independent Television Authority operations as well as sustaining BBC-TV. Related problems deal with standardization of definition to European system of 625 lines (British use 515) as well as spectrum allocations.

Space study ▼ Importance of space communications is underscored in appointment by State Dept. of FCC Commissioner T.A.M. Craven to chairmanship of new government study group to consider policy on international communications by means of space satellite relays, functioning under Telecommunications Coordinating Committee (TCC). Such matters as allocations, interference controls, costs, number of satellites that can be shot into space without creating control problems and methods of policing are all on agenda. Represented on new Craven committee will be NASA (space agency); FCC, Army, Navy and Air Corps, OCDM, Coast Guard and USIA.
AUG60

(STRONGEST PULSE)

(Philadelphia) -- Radio Station WIBG achieved the highest shares of audience in its history, for total rated time periods, according to latest Pulse of Philadelphia /AUGUST, 1960/.

WIBG, a Storer station, has been consistent leader in quantity, quality and business establishments audience, news and new ideas in community service.

New Pulse shows further gains over June-1960 with all other major stations showing losses in morning and afternoon periods.

Pulse Audience Composition Tables /Monday through Friday, August-1960/ gives WIBG clear leadership in adult audience quantity and cost-per-thousand. WIBG has more adult listeners in more time periods than any other Philadelphia radio station.

Continued dominance of Philadelphia radio listenership, and recent major gains, solidifies WIBG position as "Influential in Philadelphia."

E1023AJM

Another Great Storer Station represented by The Katz Agency, Inc.
Radio: mainstay for Main St.'s banker Out in Jacksonville, Ill., the Elliott State Bank has been in business for nearly a century. Most of that time folks just knew from their fathers and grandfathers that this was a real friendly place to do business. Recently, however, the past decade that is, Elliott has used an additional means to spread the good news. It's called radio and it works fine. Gilbert H. Todd, the bank's assistant cashier and in charge of advertising, tells about it in this week's Monday Memo. Page 22.

NAB's new president = Gov. LeRoy Collins of Florida, who tamed the Democratic conventioneers at Los Angeles in July, is picked as the new association president, succeeding the late Harold E. Fellows—subject to contract formalities and NAB board ratification. Page 27.

Seasonal invasion = Ready to combat colds, and each other, highly competitive cold-remedy advertisers gather strength for fall and winter radio-tv exposure. Page 30.

Rating on ratings = Six top agency-advertiser executives examine the whole area of broadcast ratings for NBC Spot Sales, find the top 10 concept losing significance in tv; radio is being short-changed by existing services, and the industry needs a single standard for circulation measurement. Page 32.

Tv billing is $60 million ahead = With release of the second quarter spot report, it's possible to take a mid-year look at national tv gross billing. Page 40.

Whiskey again = NAB code office persuades WPIX (TV) New York to hold up campaign for Holland House non-alcoholic cocktail mix because of whiskey bottle in commercials. Campaign for Martini & Rossi vermouth, popular base for martinis, scheduled on four New York stations. Page 42.

Research competition = TbB offers $10,000 in awards for the most promising new plans on how to measure or prove tv's effectiveness on human behavior. Page 44.

Oh, those actors' fees! = Joint negotiation by AFTRA and SAG in the area of commercials and local tv programs begins with networks and producers. Page 52.

CBS Radio's new format endorsed = New program plan is approved without dissent at an "uncommonly harmonious" convention of affiliates. The new plan starts Nov. 28. Page 62.

Compelling news picture = AP Managing Editors Assn. committee acknowledges television news competition in a report recommending a year-long study of tv's impact on newspapers. Page 68.

Hartford pay tv hearing set for Oct. 24 = FCC accedes to RKO General's wish and sets en banc hearing on Hartford application for a three-year subscription-tv trial. Page 74.

Politics revamped = First joint tv "debate" between Kennedy and Nixon draws all-time record audience, stirs public and newspaper comment and promises to revolutionize political campaign techniques. Page 88.
Conclusion: KMTV delivers more television homes weekly, daily, day, night and total than any other Omaha television station! See Petry for KMTV 3 OMAHA.

The white portion of the map indicates the counties in which this station obtained a net weekly circulation of at least 5%. Home-county for the station, in which Net Weekly Circulation was also 5% or more, is shown with cross-hatch shading.

The locations of principal commercial TV stations are indicated on the map. Counties which were clustered for reporting purposes are so indicated by a dotted line (instead of solid) between them. In a few instances, it was necessary to indicate clustered counties by means of underlining.
Comments flood FCC over vhf drop-ins

Comments pro and con on FCC's proposal to drop in vhf channels in markets needing third or more vhf outlets at less than present minimum mileage separations flooded into commission Friday, deadline for comments on rulemaking.

A pending move, which also involves changes in adjacent channel mileage separation and use of directional antennas, was host of uhf grantees and prospective applicants for tv. Opposing were most established vhf stations. General attitude was similar to stations and groups filing earlier (see page 76).

CBS proposed vhf drop-ins at 12 cities and asked FCC to consider public investment in tv sets, implement rulemaking on over-all instead of case-by-case basis and to define "important markets" as those with more than 70,000 tv homes. CBS also suggested some existing outlets in such markets could be "moved in" closer on sub-standard basis.

NBC said it would not object to commission's proposal to drop in vhf channels but urged that FCC itself set up list of cities needing such aid rather than permitting helterskelters moves. It suggested that no interim vhf assignments be made to any tv market with less than 400,000 population. Network also opposed any changes in tv rules or standards at this time. Since vhf short-millage drop ins require exceptions to present rules, there is no need to change rules in same proceeding, NBC said.

RCA submitted report of Dr. George H. Brown, RCA engineering vp, on feasibility of directional antennas for tv. Conclusion: Use of DAs is feasible and might help in current problem. RCA made no comment on reduction of mileage factors or other considerations in rulemaking proposal.

CBS Radio affiliates hear Wash. appraisal

For broadcasters, Washington is everybody's business. Maintaining high standards won't guarantee immunity from governmental attack, but letting down those standards will guarantee "ultimate defeat" for broadcasting. This theme was stressed by Richard Salant, CBS vp, in address at closed session of CBS Radio Affiliates Convention preceding day (see story page 62).

Broadcasters' best defense against governmental encroachment, especially in programming, "is careful and temperate presentation of our viewpoint [along with] good programming schedule," Mr. Salant said.

Mr. Salant expected Justice Dept. would "sooner or later" challenge tv option time's legality in court, but hoped issue would remain limited to television. He said network regulation, which he expected to be big issue in next congressional session, need not be "disastrous" but could be, depending on what tack it takes.

In another closed-session speech to CBS Radio affiliates, CBS Inc. President Frank Stanton said Nixon-Kennedy joint appearance on all networks "marked the broadcasting industry's greatest single step forward since March 13, 1938, when CBS Radio's World News Roundup, in its first broadcast, presented on-the-scene reports of Hitler's entry into Vienna." He estimated 8 million heard first Nixon-Kennedy discussion on radio, in addition to 75 million on tv. In follow-up observation Friday, Dr. Stanton said "one of the most significant aspects" of Kennedy-Nixon encounters "is the exposure of both sides to both sides."

ABC Radio adds nine

ABC Radio has added nine affiliates bringing network total to 325, Robert R. Pauley, ABC vice president in charge of radio network, announced last week.

New stations are KAGT Anacortes, Wash.; WMEK Chase City, Va.; KOOS Coos Bay, Ore.; WWHG Hinesville, N.Y.; KAAB Hot Springs, Ark.; KWBA Houston; WPGW Portland, Ind.; KFMJ Tulsa, and WNSM Valparaiso, Fla. Stations will clear for all network programming, Mr. Pauley said, and bring ABC Radio coverage figure to 47,472 radio homes, or 96% of radio homes in country.

Hollywood stars face FCC study

Top-flight tv film performers and production chiefs will testify Oct. 10 before FCC in Los Angeles when hearing on tv programming convenes Oct. 10 in U.S. Court of Appeals there.

Witnesses, announced Friday by Chief Hearing Examiner James D. Cunningham include: Dick Powell, Four Star Films; Ozzie Nelson, Stage Five Productions; Desi Arnaz, Desilu Productions; Loretta Young, Toreto Films; Don W. Sharpe, Sharpe Enterprises; Don Fedderson, Fedderson Productions; William T. Orr, Warner Bros.; William Dozier, Screen Gems; Peter G. Levathes, Fox Television; James A. Schulke, Paramount Television; George Shupert, MGM; Frank Cooper, Cooper Assoc.; Taft Schreiber, Revue Productions.

Hearing is continuance of network study by FCC which so far has led to reduction in option time and displacement of networks from spot representation.

Borel new chairman of CBS-TV affiliates

Richard A. Borel, WBNS-TV Columbus, Ohio, is new board chairman of CBS Television Affiliates Assn., succeeding William Quarton, WMV-TV Cedar Rapids, Iowa. Tom Chauncey, KOOL-TV Phoenix, Ariz., was elected secretary succeeding Mr. Borel. Board members are Paul Adanti, WHEN-TV Syracuse, N.Y.; Glenn Marshall Jr., WJXT (TV) Jacksonville, Fla.; Tom Baker Jr., WLAC-TV Nashville, Tenn.; August C. Meyer, WCIA (TV) Champaign, Ill.; Donald Sullivan, KVTX (TV) Sioux City, Iowa; J. C. Kellam, KNTC-TV Austin, Tex.; George Whitney, KFMB-TV San Diego; Art Mosby, KMSO-TV Missoula, Mont., and Joe Bauer, WINK-TV Fort Myers, Fla.
AT DEADLINE

CONTINUED

Business briefly
Accounts shift = Boyle-Midway, as expected, has parceled out its product business to agencies already handling other advertising for American Home Products of which B-M is division. Account, worth estimated $4.5 million in yearly billing, left J. Walter Thompson. New appointments effective Nov. 1. They involve Ted Bates (Aerowax, Black Flag insecticides and Sani-Flush), Tatham-Laird (Aero-Shave, in addition to B-M products Griffin shoe polishes and Easy Off oven cleaner and Easy window spray already at agency) and Cunningham & Walsh (Wizard deodorizer, to add to Easy-On spray starch which already is handled by Cunningham & Walsh).

WEEK'S HEADLINERS

George S. Dietrich, director of NBC Radio Spot Sales since 1955, promoted to station manager of WNBC-AM-FM New York. Position has been unfilled for eight months. Frederick T. Lyons Jr., eastern sales manager of NBC Radio Spot Sales, succeeds Mr. Dietrich as director. Both appointments are effective today (Oct. 3). Mr. Dietrich joined NBC Spot Sales as account executive in 1950, moved up to eastern sales manager in 1953, national sales manager in 1954 and then director. Mr. Lyons came to NBC as analyst in Spot Sales in 1951. He was appointed account executive in 1951, manager of central division in 1956, and eastern sales manager in 1957.

Raymond F. Sullivan, founder chairman of Sullivan, Stauffer, Colwell & Bayles, N.Y., elected chairman of executive committee. Brown Bolte, SSC&B's president, named vice chairman, and Alfred J. Seaman, who was vice chairman and chairman of executive committee, elected president in realignment announced by S. Heagan Bayles, chairman of board and chief executive officer. Mr. Bayles said changes were made to provide greater concentration on client service, resulting from agency's growth which he described in terms of current $65 million billing, or 63% over total of two years ago. Mr. Seaman left Compton Adv. in April 1959 where he was executive vp and creative director to take top level post with SSC&B. Mr. Bolte had been executive vp of Benton & Bowles, leaving that position in 1958 to become SSC&B's president. Mr. Sullivan is one of agency founders, had been president before becoming board chairman in 1958 and founder chairman in June of this year (Broadcasting, June 6, 1960).

C. M. Rohrbaugh, board chairman and chief executive officer of Kudner Adv., New York, has relinquished his title of chief executive officer but will continue as chairman. Mr. Rohrbaugh had planned to retire at end of this year but at request of agency's board he has agreed to continue as chairman. Charles R. Hook Jr., Kudner president, becomes chief executive officer and Robert Betts, vice president and copy chief, has been elected senior vice president and member of board and of executive committee.

Henry White, national sales manager of Screen Gems Inc., New York, resigns to join WNTA-TV New York as vp and general manager, effective today (Oct. 3), filling vacancy created when Malcolm Klein joined KJH-TV Los Angeles as vp and general manager several months ago. Mr. White served Screen Gems for six years, and earlier had been manager of the Biow Co., New York, and associated director of network programs CBS-TV.

Carl Lindemann Jr., vp of program sales, NBC-TV, since last April, elected program vp for California National Productions, NBC's film syndication subsidiary. Mr. Lindemann, who joined NBC in 1948, had been network's vp for daytime programming for year prior to his appointment in program sales.

FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES
WFBG, Altoona, always head and shoulders above the pack is better than ever. Now with 5000 watts, WFBG covers 4\(\frac{1}{2}\) times the area and double the population. And look at these records:

- Ratings nearly double competition
- 1st in every measured time period
- 5 times the power of 2nd station

Want to check the figures? Ask your McGavren man to trot out his tape measure.

Sources: Kear and Kennedy, Washington, D.C., January 22, 1959/Pulse, Altoona City, Pa., March 7-25, 1960, 5 A.M.-12 Mid., Mon. thru Fri.
Here's the prescription for sales success: advertise on WPAT. A balm to Greater New York, we're a positive tonic to the men who make and market America's leading drug products, cosmetics and toiletries. Listened to throughout 31 counties in New York, New Jersey, Pennsylvania and Connecticut where more than 17,000,000 people live, work and buy in more than 5,000,000 radio homes, WPAT is heard and preferred, among other places, in more of the Metropolitan area's 6,000 independent retail pharmacies than any other station. That's what we call point-of-purchase penetration in depth. And there's no doubt that it moves merchandise. Which probably explains why our drug, cosmetic and toiletry advertising has increased 327% in the past three years, thanks to advertisers like these: Bell Mack Laboratories, A. Brioschi, Bristol-Myers, Colgate-Palmolive Company, Coty, Lever Brothers, Miles Laboratories, Pomatex, Prince Matchabelli, Schick, Shapton, Shulton, Squibb Pharmaceutical, Sterling Drug, Warner-Lambert Pharmaceutical. All of them have advertised on WPAT . . . the station with the look of success.

Transcontinent Stations
How Come CHANNEL 10 Stays Perennially On Top in the Rich Rochester N. Y. Area?

COULD BE BECAUSE:—

we have the POWER
Yes, thanks to our new 316 KW (maximum power) transmitter, we now speak to more than a million Western New Yorkers with a stronger voice—look at them with a brighter eye! Our primary coverage area is considerably extended!

we have the SHOWS
We offer our viewers the very finest programs of two major networks—CBS and ABC—a galaxy of great stars in a brilliant host of new shows and old favorites! We also offer News-Weather-Sports, complete and accurate, twice nightly at 6:30 and 11:00 P.M.—plus many other fine, live local shows, and the great MGM movies.

we have the KNOW-HOW
Not only do we possess the technical know-how that guarantees best-quality production, but being Rochester-owned, we understand the wants and whimsies of the people of this area, give them what they want, know how to promote our station and our programs in the most effective manner.

we have the FACILITIES
Now that we have the very latest in Videotape, our facilities, both in equipment and personnel, leave nothing to be desired. Our well-trained engineers and production staffs welcome the constant challenge of handling live shows and live commercials in truly expert fashion.

we have the WILL
Perhaps our BEST quality is our ceaseless will to please! We are intensely proud of our consistent leadership in Rochester, and we are determined to maintain it!

Adequate power, top-notch programming, expert know-how, modern facilities and the resolve to please and satisfy—every one of these things is essential to a successful television station— and these are the things that attract and hold our ever-increasing number of sponsors.

SCBA's view of KYA plan
EDITOR: Have just read the editorial in your Sept. 19 issue referring to KYA and its recently adopted policy to adhere to certain commercial standards. I don't feel that it reflects the very strong opinions voiced by me and other broadcasters about your original KYA story Sept. 5.

I think after perusal of the 16 points outlined by Mr. [Mort] Wagner [general manager of KYA] you will agree that they are certainly not revolutionary and should not be referred to as a great crusade for purity.—Robert M. Light, President, Southern California Broadcasters Assn.

 Agencies 'hear' radio
EDITOR: Cheers, kudos, congratulations and hooray for the fellows at WBZ Radio in Boston, who have given us media people an extraordinary profile of their station programming in their entertaining 33 rpm record entitled "Landay-Nelson Report."

How we wish other radio stations around the country would follow suit and give us such an excellent television version of the day's programming, so we could determine station personality through listening as well as through the paper offerings, program schedules, personality poop sheets and rating reports.

Until the day when we have unlimited expense accounts and the time to chase around the country listening to radio for ourselves, this compact, 10-minute air check of a station's round-the-clock programming is a revolutionary help.—Lit Vosberg, Radio-TV Dept., Wremen & Schorr Inc., Philadelphia.

P.S.: That promotion pitch on the Pulse report was not lost or ignored, either.

[WBZ's special air-check promotion record which tied-in with new Pulse report was mailed Aug. 30 to 750 agency buyers in New York-Philadelphia. Cost involved? Using its own talent and production facilities at no extra expense, WBZ spent $300 for pressing, $150 on postage. Another $2,450 was spent on promoting promotion materials to go with the discs, backed by $9,000 in trade advertising.—The Editors.]

Movies & news at KHJ-TV
EDITOR: The "great news" of KHJ-TV Los Angeles' new format as described in your Sept. 19 issue (page 66) is enough to make one shudder, and pray that the FCC takes immediate note of the programming policy of this station in relation to its "promises" in its application for license. If the jumbo box operation of radio spreads to television, I hate to think of what will happen to "operation in the public in

COLUMBIA, SOUTH CAROLINA, IS THE STATE'S BIGGEST METROPOLITAN AREA...
now 257,961, an increase of 71.177 (38.1%) in the new 1960 Census. And, if you'll pardon my shouting, Columbia is also the SECOND BIGGEST METROPOLITAN AREA IN THE TWO CAROLINAS...second only to Charlotte (270,951), according to the same Census Bureau's figure-fibbers! "Freedom," the first full-length all-African color film; "The New American," American youth in a dramatic cure to student rights; and "Light of Tomorrow," a stirring story of answer to communism in industrial Italy. These and other films are obtainable from MRA, 640 Fifth Ave., New York 19, N.Y.

MRA is financed by the sacrifice of thousands of patriotic Americans and is entirely supported by voluntary contributions. "Freedom" and other films already have been requested for many TV stations. The film of the German coal miners' play, "Hope," will shortly be available.

Dr. Frank N. D. Buchman is the Pennsylvania-born initiator of MRA. Managing director of Scottish television is James M. Colart.—Garrett R. Steary, Director, Moral Re-Armament, Mackinac Island, Mich.

Young 'n' growin'

EDITOR: It is a pleasure to inform you that our young organization now has its second station on the air, even though our corporation, The Mitchell Broadcasting Co., is less than eight months old. We took over the ownership and management of KGRN on Feb. 1, 1960, and recently our baby KNIA in Knoxville, Iowa, went on the air.

As president of the corporation I also manage KGRN and Robert C. Betts, vice president, is manager of KNIA. Betts was formerly news director of KIOA Des Moines, where I was program director. On the staff of KNIA is Smokey Smith, an air personality also from Des Moines where he performed for KRNT; Larry Heaberlin of KNIM in Maryville, Mo., and Don Dye, who came from Austin, Minn.

I have been told that at 27 I am the youngest two-station owner in the U.S. and would be willing to make that claim to your readership.—Forrest (Frosty) Mitchell, Manager, KGRN Grinnell, Iowa.

Japanese translation

EDITOR: The following articles in your BROADCASTING are very interesting. And I wish to translate them and insert in our semi-annual publication called The Kaiagi-Joho... [From the] April 4 issue [of your publication]: "Spring preview of fall pilots." April 25 issue: "Radio-tv take off in aircraft." June 20 issue: "Pay tv by wire or on the air?"

Our Kaiagi Joho is distributed among our staff and a small portion of it is given free of charge to public libraries, colleges and commercial broadcasting stations—Ichiro Nihira, Director, Radio and Television Culture Research Institute, Japan Broadcasting Corp., Tokyo, Japan.

FIRST THINGS FIRST: WHK
Radio: mainstay for Main St.’s banker

Radio—that strong, vibrant media that surrounds us every hour of the day and night with its fresh vitality—sounds of news, music and service. But radio is more than a public service. It is an increasingly important factor in bank advertising.

Surveys continue to show that banks spend more for radio each year and that radio is second only to newspapers in popularity as a bank advertising medium. And people—our customers—are listening to radio more than ever.

Banks in some respects have traveled a rocky road in recent years. To enumerate a few of the problems: savings and loan competition has grown, bank operating costs have skyrocketed, interest rates have been difficult to maintain at competitive levels, and public indifference to thrift and public ignorance of many bank services have continued. Widespread resentment of the “impersonal banker” image still exists.

One answer to these problems has been to step up our selling efforts. This means more vigorous and effective advertising. Advertising volume is not enough. To be effective, we need the right kind of advertising.

The Reach of Radio □ Radio reaches almost 100% of the prospective savers and borrowers. It reaches people no matter what they earn, no matter where they live. Radio can pinpoint the male audience we want. Our primary target is men, the principal family wage earner and decision maker in finances. Radio persuades the highly influential female, too, and it can influence the children, our customers of tomorrow.

Radio gets to the important suburban family. Suburbanites are in the market for new cars, appliances and furniture, so they're top prospects. Radio forces attention. No other ad nearly competes with our message, so our ad—“headlined” and standing alone—must catch the listener's ear. It's how well we tell our story that counts.

Radio furnishes repetition and impact to build good saving habits. Thriftiness is a habit, not a whim, and few decisions to borrow money are made impulsively. The widespread consumer ignorance of even the most basic financial services mean our advertising must register forcefully and often over a long period of time. With radio we can maintain the repetitive pressure we need, or we can create pointed advertising impact with spot announcements.

Friendship and Humor □ Radio builds its audience on friendship. This friend-
To us, *Time* and *Integrity* are two of the most precious things we have. Yet, to us, there is a difference between them: *Time* is not really ours, but our *Integrity* is. *Time* passes, our *Integrity* remains constant. *Time* is for sale, our *Integrity* is not.

To *You*, our *Time* and *Integrity* are precious, also; but the difference is that they are integrated in effect. They must be, and are, one and the same *Truth*.

"*Time accomplishes everything*", the philosopher says. In the Maryland Market, our *Time* and *Integrity* can help you accomplish your honest purpose.

NAB PICKS A POLITICAL CHARMER

Florida's Gov. Collins all but set for association presidency

NAB has found its president—Gov. LeRoy Collins of Florida—subject to contract formalities and ratification by the NAB board.

The search for a nationally prominent figure to lead the association was ended last week, barring unexpected developments, when Gov. Collins was picked from a list of two. The other person approached for the top job was Ambassador George V. Allen, director of the U.S. Information Agency.

Gov. Collins has the qualifications often laid down within the industry—a strong personality, a distinguished record and outstanding qualities of leadership. These factors led to his choice by the NAB presidential selection committee.

A special meeting of the NAB board is to be called for Oct. 10. The meeting will be held in Washington just prior to the Oct. 13 opening of the annual NAB fall conferences in Atlanta.

Availability the Key ■ Selection of Gov. Collins by the committee was assured when it was learned he would be available after his term as governor of Florida expires next Jan. 3. On the other hand, Ambassador Allen had not stated he would be available.

The selection committee, headed by C. Howard Lane, KOIN-TV Portland, Ore., faced another problem in discussing Ambassador Allen—reluctance to make a firm offer to a prominent government official occupying a critical post in a period of international tension.

Events moved swiftly in the last fortnight as the selection committee and NAB's policy committee, interim association guidance group, concentrated on the two candidates. These events led to a decision:

■ Gov. Collins was interviewed at a Sept. 22 luncheon held at the Statler Hilton in Washington. He made what some committee members called "a tremendous impression."

■ Ambassador Allen was interviewed Sept. 26 at a luncheon held at the Waldorf-Astoria, New York. He, too, was highly regarded by the members.

The committee decided, after reviewing both candidates, to make their first formal offer to Gov. Collins.

■ A two-man negotiating committee met Gov. Collins Sept. 28 at the Robert Meyer Hotel, Jacksonville, Fla. The three conferred 2½ hours, with Gov. Collins agreeing to study documentary material over the weekend and to give the members of the selection committee a definite reply today (Oct. 3).

A Long Search ■ Final approval of Gov. Collins for the presidency will provide a successor to the late Harold E. Fellows. First steps to fill the vacancy left by his death March 8 were

Collins in action ■ The man who will probably be the next president of the NAB became a national television personality last July when he served as permanent chairman of the Democratic national convention. Here he responds to a floor demonstration that took place when he took over the gavel July 12 at the Los Angeles Sports Arena.
taken March 14 when an eight-man selection committee was named to pick a successor, subject to NAB board ratification.

Mr. Lane was named chairman of this committee which has kept in close touch with the NAB policy committee headed by Clair R. McCollough, Steinman stations. The policy group has served as interim directing body of the association. Messrs. Lane and McCollough handled the Sept. 28 contact with Gov. Collins.

From the start of the Lane committee's search it was obvious that pressures from congressional and government agencies as well as extensive publicity dealing with payola and quiz investigations suggested the advisability of selecting someone from public life to cope with attacks on the industry and the overall broadcast image.

Gov. Collins, 51, was one of the first names considered when the selection group started meeting last spring. His record in public life had been considered outstanding and his reputation was enhanced by nationwide recognition of his role as permanent chairman of the Democratic convention in Los Angeles.

While details of salary, tenure and official association duties haven't been worked out, it appeared at the weekend that salary discussions had approached the $75,000 mark, with the possibility of an escalator provision. Mr. Fellows had reached the $75,000 point in his salary plus about $12,500 for expenses because of his critical position in the government during the present period of intensified cold war. Mr. Allen has been ambassador to Iran, India, Nepal, Yugoslavia and Greece. In the diplomatic corps since 1930, he has a wide circle of friends in Washington.

Gov. Collins, 51, was one of two men considered by the NAB selection committee for the presidency. There was a question about his availability because of his critical position in the government during the present period of intensified cold war. Mr. Allen has been ambassador to Iran, India, Nepal, Yugoslavia and Greece. In the diplomatic corps since 1930, he has a wide circle of friends in Washington.

A third public figure considered by the selection committee was former UN Ambassador Henry Cabot Lodge. His name was automatically removed from the list, however, when he was nominated as Republican vice presidential candidate.

Out of Politics • Gov. Collins had indicated earlier in the summer he was interested in entering private life when his second term as Florida governor ends in January. The selection committee's decision to make him an offer was strongly influenced by his availability as well as prominence in public life and administrative ability. The committee was anxious to make a formal announcement of an NAB presidential selection before the Nov. 8 elections. It was felt this would meet any suggestion that the selection had been made on partisan grounds.

Gov. Collins was described by one committee member as "persuasive, articulate, bright and intelligent." He was represented as advocating a firm industry stand in the face of current pressures against broadcasting. The job essentially requires, in his mind, preservation and improvement of broadcasting's image and status and the acquisition of greater freedom from oppressive regulation.

Allen's Qualifications • Consideration of Ambassador Allen by the selection committee had noted his attainment of the highest rank in the diplomatic service, held by only eight diplomats. Originally from Durham, N.C., he had delivered newspapers in the city, worked in a cigarette factory and served as a bookkeeper while attending Trinity College, now Duke U. After four years of school teaching near Asheville, N.C., he entered the foreign service in 1930.

At the age of 42 Mr. Allen was the nation's youngest ambassador while serving in Iran. He has served since as Ambassador to India and Nepal, Yugoslavia and Greece. His record of participation in international conferences is impressive and he served as assistant secretary of State for public affairs. Ambassador Allen served with the Voice of America, which later became the independent U.S. Information Agency. Last year he was coordinator of the American National Exhibition in Moscow.

T terse Report • NAB remained officially silent about the presidential negotiations until Sept. 29 when it announced the selection committee "had completed tentative arrangements" for a successor to Mr. Fellows. The announcement continued, "The committee said it would not disclose the identity of the person selected until after a contract is negotiated and until after the association's board of directors is called into a special meeting to pass on the nomination and the contract. The committee said it would have no further statement or announcement until these two steps have been taken.

News services carried speculative stories last week about the selection of Gov. Collins for what was inaccurately termed "the $100,000 a year post."

Others who have held the NAB presidency since its 1938 reorganization when it was changed from an honorary to a paid position, besides Mr. Fellows, have been Neville Miller, communications attorney and former mayor of Louisville, and Judge Justin Miller.

Members of NAB's selection committee, besides Chairman Lane, are Thomas W. Bosic, KIMA-AM-TV Yakima, Wash.; John E. Felzer, Felzer stations; John S. Hayes, Washington Post stations; Dwight W. Martin, WAFP-TV Baton Rouge, La.; William D. Pabst, KTVU (TV) Oakland, Calif., W.D. Rogers, KDUB-TV Lubbock, Tex., and Payson Hall, Meredith stations.

The policy committee includes Chairman McCollough, G. Richard Shafro, WIS-AM-TV Columbia, S.C., and Merrill Lindsay, WSOY Decatur, Ill.

Man of Experience • The new NAB president-select is a man of worldwide as well as national fame.

Gov. LeRoy Collins, of Florida, knows the problems of Florida, the United States, Russia and broadcasting.
too—all from first-hand observation.

The first Florida governor ever elected for consecutive terms, he has achieved recognition for aggressive attacks on basic state problems, including the touchy racial issue. But to many Americans, he became a national figure in his role as permanent chairman of the Democratic national convention in Los Angeles last July. There he became the first governor of either party since 1892 to serve as permanent chairman of a national political convention.

In the difficult role at Los Angeles he patiently let the demonstrators howl and shriek, finally starting persistent gavel pounding that brought order to the proceedings.

A friendly, family man (see photo, at right), he often lets a caressing twinkle or a friendly pat on the shoulder serve as controlling devices. He's an inveterate friend maker and has a knack of making people feel at ease. The natural congeniality that led him to political heights will be transferred to the colonial town house at 1771 N St. in Northwest Washington, where NAB is headquartered, and it will soon be a familiar feature at industry meetings.

"Painfully honest," as a friend once described him, Gov. Collins has demanded and obtained above-average contributions from his subordinates. "They trust him; his friends trust him; so do many of his political antagonists," another acquaintance said. He was described as a sincere church-going man (Episcopalian) and abstainer. His social reforms in Florida have been directed toward improvements in penal systems, schooling (and this includes summer school programs to keep youngsters busy), divorce laws and civil service laws.

Traveling Salesman • As a promoter, he has made several tours around the country to build his state's prestige and bring recognition to its tripartite economy based on industry, agriculture and tourism. These tours have brought in many numerous industries and have given him a reputation as a "super-salesman."

The son of a Methodist circuit-riding preacher, LeRoy Collins grew up around Tallahassee, the state capital. He worked at odd jobs to get his education and financed a law course at Cumberland U. in Tennessee by working in a bank. He passed the Florida state bar with one of the highest grades ever scored and hung up a shingle in Tallahassee.

Law earning were slim for a while, but when he ran for office as county prosecutor, he decided the pay was enough to finance a home so he married his longtime sweetheart, Mary Call. He won a wife but lost the election. They managed to keep the home going until he won a legislative seat in his second campaign. This put him into politics for 2½ decades.

His first election as governor came in 1954 when he served two years of the unexpired term of Gov. Dan McCarty, a friend who died in office. He has an ideal temperament for a politician—and for a trade association executive. Usually, he walks to work in the mornings from the executive mansion, waving and shaking hands all along the way. The glittery trappings of high office often annoy him, and the family huddles in one end of the executive mansion where all can be cozy and avoid the sightseers out front.

Those who know him figure he'll be on a first-name basis with hundreds of broadcasters by the time the 1961 NAB convention is over; thousands after a year at NAB and after the 1961 fall conference circuit.

And they're certain the new president will be on familiar terms with all the regulatory and legislative issues that move over the presidential desk.

New first family • These are the members of the family of Gov. LeRoy Collins of Florida who is expected to become NAB president next January. Seated (on floor, l-r): Jane, 22, Darby, 10, and Mary Call, 18; (on chairs) Gov. and Mrs. Collins; standing: Mr. and Mrs. LeRoy Collins Jr. Mary Call is a student at Florida State U. LeRoy Jr. is a lieutenant, j.g., in the Navy submarine service. Jane is to be married Oct. 1 to John Aurell, a civilian employee of the armed forces who works in Washington's Pentagon.
BROADCAST ADVERTISING

COLD BRANDS INCREASE SPENDING

Seasonal buying nears completion as competition becomes keen

Representing a $30 million product category in tv advertising alone, cold remedy advertisers this week are lined up with one eye on the weather and the other on competitors for the cold-sufferer’s relief-money. As the seasonal network and spot buying nears completion, two things are clear: radio-ty budgets are up and competition is keener than ever.

Agency walls are impenetrable around the ad plans of many cold remedy products. But it doesn’t appear likely there will be any shift in the spending order of last year’s top five cold relief products. Together they accounted for 75% of the tv advertising in this category, according to Television Bureau of Advertising. Based on The gross figures, Dristian, Anahist products, Vick remedies, Grove’s 4-Way Cold remedies and Coldene products spent a combined total of $22,067,868 in network and spot tv.

For all products in this category, 1959 expenditures in network tv totaled $12,241,168. In spot tv the total figure was $16,655,000, making a combined network-spot total of $29,070,168. Radio figures are not available. Tvb figures also show that spending in the first six months of 1960 is about even with the first half of 1959. It appears that cold remedy advertisers spent roughly one-half of their 1960 tv budget during the January-June period: $7,769,608 in network; $7,221,000 in spot, for a total of $14,990,608.

Aid and Comfort Relief from cold discomfort may take the form of cough drops, syrups, sprays, tablets, or whatever. All the different brands in all these product areas will be promoted widely on radio and television in the months ahead. Fail and winter broadcast plans of representative brands are listed below.

Pharma-Craft's tv commercials for Coldene this season will feature a dark-screen technique. The ID version, for instance, opens with a black screen and the sound of coughing. A woman's voice asks: "John is that Billy coughing?" A man's voice answers: "Get up and give him some Coldene." A bedside lamp is turned on, revealing a woman's hand reaching for a bottle of Coldene.

Grove Labs Inc., St. Louis, will advertise its Grove’s 4-Way Cold Remedies in a 22-week radio spot drive in over 100 markets, in addition to a tv spot push in 60-70 markets using minutes, 20’s and IDs, plus announcements on NBC-TV’s Today show. Spots feature Hollywood stars such as Gisele MacKenzie (see picture). Agency: Cohen & Aleshire Inc., New York.

Whitehall Labs., Div. of American Home Products Corp., New York, remains silent on its plans for high-spending Dristian, but it’s reported that October-to-June tv minutes are being purchased in a number of markets. Agency: Tatham-Laird Inc., New York.

The Mentholatum Co., Buffalo, N.Y., for Deep Heat Rub, cough syrup, and Colban nasal mist, will use several NBC-TV daytime shows and the new NBC-TV nighttime entry, Dan Raven, as well as radio spot schedules in many markets. Agency: J. Walter Thompson Co., New York.

Warner-Lambert Products, Morris Plains, N.J., will use heavy participations for its various Ana hist products on NBC-TV’s Riverboat, Outlaws and Westerner shows and on ABC-TV’s Roaring 20’s and The Islanders. Tv spot schedules of day and night minutes are planned for 26-week period in key markets. Agency: Ted Bates & Co., New York.

Block Drug Co., Jersey City, N.J., for its Rem cough medicine, will participate in several daytime shows on ABC-TV, supplementing with spot tv in top markets. Agency: L.C. Gumbiner Inc., New York.

Vick Chemical Co. (changes name

Star support In rehearsal of new tv spot commercials for Grove’s 4-Way preparations is singer-actress Gisele MacKenzie, flanked by Francis X. Brady (1), executive vice president of Grove’s agency, Cohen & Aleshire, and Reginald W. Testement, assistant vice president in charge of advertising, Grove Labs Inc., St. Louis. Other stars also will film spots.
GREAT DEBATES about politics on television are a Maryland tradition. For nearly a decade, prime time has been made available for the appearance of political candidates competing for office. Free State voters look forward with anticipation to the “Face to Face” debates that precede general elections in Maryland. They provide the best opportunity for a first hand comparison of the candidates.

These programs, of course, are in addition to the “GREAT DEBATES” which WMAR-TV will telecast as a CBS Affiliate.

this month to Richardson-Merrell Inc., New York) is lining up 15 or more major markets for a spot radio drive scheduled to start today (Oct. 3) on behalf of Vick's cold tablets. Six-week flights of minutes will be used. Agency: Sullivan, Stauffer, Colwell & Bayles Inc., New York.

- Monticello Drug Co., Jacksonville, Fla., starts a spot radio drive today (Oct. 3) for its 666 Cold Tablets. Over 100 markets will carry daytime minutes, mostly during peak traffic periods, for 26 weeks. Agency: Charles W. Hoyt Inc., New York.

- C.A. Briggs Co., Brighton, Mass., plans to spend 10% more than it did last year in broadcast media for its "H-B" (Hospital Brand) cough drops. Minutes, 20's and ID's in some 32-34 markets will be used in a spot radio campaign and spot tv minutes will be purchased in certain metropolitan markets. Agency: Fred Gardner Co., New York.

- W.K. Buckley Inc., Buffalo, N.Y., reportedly will have its biggest radio-tv budget to date for Buckley's Canadiol Mixture, which is said to be the largest selling cough medicine in Canada. Wider U.S. distribution will result in a saturation tv spot campaign starting in January in upper New York state. Minutes and 20's will be used. Some radio spot schedules are planned for Michigan and New York. Agency: The Wesley Assoc., New York.

- Chesebrough-Pond's Inc., New York, a leading tv user for its Pertussin product, is said to be "still looking at everything" with "nothing locked in yet." Agency: Compton Adv., New York.

Here's 1959's top five tv users in cold remedy category:

**TOP 10 FEVER IN TV SUBSIDING**

That's opinion of agency-advertiser panel; radio ratings hit today (Oct. 3), included some of the top names in agency-advertiser circles (see picture).

Marvin Richfield, media director, Erwin, Wasey, Ruthrauff & Ryan, seemed to express the consensus when he stated "Your top 10 in tv is not as important as it was. It is no longer possible to achieve a rating that is far better than someone else's ratings. Things have leveled out. Your average network show gets about a 22. There

---

**Ratings conferees** These are the media managers and NBC Spot Sales executives who participated in the examination of ratings. L to r (seated facing camera): Roger Bumshead, media director of the eastern division, MacManus, John & Adams; William E. (Pete) Matthews, vice president and director of media relations, Young & Rubicam; Marvin Richfield, media director, Erwin Wasey, Ruthrauff & Ryan; Humboldt J. Greig, vice president and manager of station relations, C.J. LaRoche & Co.; Bill Fromm, new business and promotion manager, NBC Spot Sales; Richard S. Paige, media manager for the Household Products Div., Colgate-Palmolive Co.; Leslie Towne, media director, Smith-Greenland Co.; (standing) George Dietrich, director of radio sales for NBC Spot Sales and Richard Close, vice president, NBC Spot Sales. Back to camera: Tony Liotti, manager, tv-radio research, NBC Spot Sales.

22 (BROADCAST ADVERTISING)
In the Public Interest...

Another citation for WSB-Radio, The Voice of the South

Congressman John J. Flynt (seated left) congratulates Frank Gaither, general manager of WSB-Radio, upon WSB's winning the special "Safetython" award given by the GAB. Looking on are Paul Reid, GAB award chairman, and Elmo Ellis, WSB-Radio program director.

Following a tradition of 38 years of broadcasting in the public interest, WSB-Radio joined other broadcasters during the July 4 holidays to wage an unprecedented safety campaign to save lives on the highways.

The station utilized a three-pronged approach, featuring 1100 announcements, during a three-day period, with reports from the station helicopter, the mobile news units, and prominent state and city officials.

This promotion was judged best by the Georgia Association of Broadcasters among stations serving a market of more than 75,000 population. It is this type of programming in the public interest that has served to make WSB-Radio synonymous with public service in the minds of listeners, and has won for the station a tremendous audience loyalty.
Here's the kind of programming that made ABC-TV the network success story of the decade. Fast shows. Funny shows. Family shows. And winners all. Example: for the week ending September 11th, 1960, these eleven took fifteen half-hour firsts, according to the Nielsen 24 Market report...more half-hour wins than either of the other networks. And a check of past reports will show that this kind of performance is the rule, not the exception.

Three comers: We predict the same kind of success for these new shows, among others soon to be aired: Hong Kong, The Roaring 20's, The Islanders.

STEINMAN STATION
Clair McCollough, Pres.
are some 30s, but they're few and far between and not in the upper 30s. Now, as long as you're in prime time with a decent show, you know pretty much that you're going to get numerically as large an audience as at another spot. But you might as well increase your reach by being on two totally different vehicles. It is no longer important enough to gamble a lot of money on a blockbuster hour."

Desensitized = William E. (Pete) Matthews, vice president and director of media relations, Young & Rubicam, contributed another reason for the decline in importance of the top 10, which actually amounts to looking at the same reason from the other side. That is, with the decline in exclusive sponsorships the advertiser is no longer as sensitive about his show being on a top 10 chart.

This situation, while making it harder to go wrong, also makes it harder to go right, one participant inferred.

Richard S. Paige, media manager for the Household Products Div., Colgate-Palmolive Co., noted, "In the old days, if I had a choice between a program with 10 million homes and a program with 5 million, I had a very simple choice to make. Nowadays, when the averages are all closer to 8 million, I must look for other differences."

Roger Busstead, media director of the eastern division of MacManus, John & Adams, cited one TV advantage: "The nature of television programming alone provides all sorts of criteria to aid the decision-making process. Its very nature makes it far more definitive than radio is at present. I think there's more of a need—in radio's best interest— for it to develop new types of measurements."

Cumulative Ratings = One of the radio measurements Mr. Busstead advocated is that of providing cumulative ratings, which he finds on the increase. The reason, he says, is that a cassette deals more in a specific—that is, the household net coverage of an actual schedule rather than set counts which represent only the potential audience, or ratings which are mainly a yardstick of cost efficiency. It's a way of getting closer to marketing objectives, and when combined with sound business judgments, a means of making a sound media buy. I think it's to a station's advantage, and the broadcast industry's, to provide more of this sort of information. It's good sales-making ammunition.

"The sort of studies I'm asking for don't have to be done every month. If a station completes one annually, on a variety of schedules, or even every two years, the buyer can make some sound judgments—considering variables—"
LONG ISLAND IS A MAJOR MARKET!

Humboldt J. Greig, vice president and manager of station relations, C. J. LaRoche & Co., made one observation about radio ratings with which few broadcasters would disagree: "Current surveys may sell the radio industry a very, very short. I would like to have rating services available that would help us justify appropriations at the planning board level. Instead of this, we're getting rating services strictly as a competitive tool—one station against the other.

"If you examine radio listening patterns, you find that the average station has 40% unduplicated reach weekly. Then you look at other media such as television and are forced to conclude that it is necessary to use two or three radio stations in a market to get the reach one tv station can develop. Actually, the 40% reach could grow to 60 or 70% if all the places where radio is listened to were measured.Advertisers do not want to know they will miss 60% of the homes in a market if they use only one radio station. They must know how many stations are required to reach 90% of a market. Then it is possible to make a comparison of costs, which could result in a budget for radio."

New System Wanted • All the agency-advertiser participants agreed that an all-industry effort was desirable to construct a new radio rating system that would replace the individual services now used, but there was no agreement that such a service would evolve.

One of the problems was stated by Mr. Paige, who said, "The real problem is a workable, agreed-upon definition of audience. Any research service could go right out and construct and measure that audience. It's not that there are different rating services, and not that there are differences between them, but that there is no working definition of the term 'audience'."

Another problem is who would support such a service, although at least one of the participants thought the burden was on the agency or the advertiser. According to Mr. Bumstead, "In order for us to take charge of directing how the rating services run, we—that is, the advertisers and the agencies—have got to pay the lion's share of the cost of these services rather than as at present where the media, usually, pays the largest proportion of the expense—and sometimes influences the result. It is our responsibility to our clients, and their own responsibility too, to see that the advertising dollar is spent judiciously."

Mr. Matthews, in a similar vein, said that "I feel very strongly that both the advertising groups—of agencies and advertisers—and the industry itself have put themselves in a questionable position in allowing private research organizations to determine the ways in which they're to receive information about what they are most concerned with, which is the scope and nature of the circulation of the medium."
THANK YOU KAREN and your 45,000 friends who attended WTOL's Day at the Zoo. Zoo director Phil Skeldon, said it was the biggest day the Toledo zoo EVER had!

We're proud of our ability to sell an item, an idea or an event...because both our advertisers and our community benefit. Sure, we deliver book numbers, but we wanted you to see the actual people.

Spot TV continues upward climb

Four newcomers to top 100 list, P&G still heads the list

Current estimates show tv nationally to be at least $60 million ahead of last year in gross time billings. This estimate is based on billing computations by Television Bureau of Advertising which last week reported spot tv grossed more than $160.6 million in the second quarter of 1960.

Network television gross for the first half of this year came to more than $336 million, while spot for the first six months added up to over $348 million, or a total of more than $684 million as compared to the $624 million grossed nationally at that time in 1959.

How Big a Gain? If spot's second quarter was figured on the same basis as quarterly spot reports in the past, the total would have come to more than $174 million, a 9.7% increase over second quarter 1959, thus upping the comparative increase over the six months another $14 million or a total gain of $74 million.

TvB's revision in estimating the spot computations (actually via N.C. Rorbaugh Co.) amounts to this: In the past, the bureau had computed its average spot rates on the basis of breaking up the day into daytime, nighttime and late night. This has been changed to daytime, early evening, prime night-time and late night.

The new revision, as now instituted, falls into early evening where stations over the years have instituted new subdivisions in rates. As expressed by TvB: "There has been a general readjustment of time period definitions throughout the broadcast day, making for greater precision in estimation of [advertisers'] expenditures."

Net effect was to bring the new, "precision" billing total for the second quarter at a level fifteen's 8% below the estimate for that quarter projected on the former method.

In the second quarter report, American Motors Corp. (dealers), Chun King Sales, Miller Brewing Co. and Union Carbide Corp. appeared in the top 100 spot spender list for the first time in any quarter.

Procter & Gamble, No. 1 advertiser in television, came in with a combined network-spot gross time billing for the second quarter of nearly $27.6 million. Other high combinations: Lever Bros. at $11.5 million, American Home Products at $10.8 million, and General Foods Corp. with $10.5 million.

Estimated expenditures of Top 100 National and Regional spot TV advertisers

Coffee salesman = Mr. Perk and Senor Bean will be sales representatives for Admirable Coffee this fall on tv stations throughout the Southwest. They will star in six 20-second spots being prepared by Animation Inc., Hollywood. Mel Blanc (Bugs Bunny's voice among many others) will speak for Senor Bean in extolling the coffee's virtues. Storyboards for the spots will be used as newspaper comic strips by Clay Stephenson Assoc., Houston, as part of the campaign they are planning for the Duncan Coffee Co. At the same time the sound tracks will be translated into Spanish and used on radio.

"This utilization in depth of animated commercials marks a forward step in actively linking various advertising media in a coordinated selling campaign," said Earl Klein, president of Animation Inc., who helped to develop the program. Ken Boehnert is the agency producer of the spots; Bob Brown of Clay Stephenson, is writer and account executive.
It's a habit...

There's only one way to build the kind of viewer loyalty KMJ-TV has — and that's with quality programming. Programming which presents a pleasing balance of top network shows, excellent local productions, the best film library including MGM releases and leading syndicated shows. For every program category, Fresno area viewers tune to KMJ-TV first and leave their dials set longest.

THE KATZ AGENCY, NATIONAL REPRESENTATIVE
CODE TROUBLE FOR COCKTAIL MIX

NAB halts demonstration spot involving whiskey sours

Sippin' whiskey, gin and vermouth arose last week to challenge the brassiere, girdle and personal product as top problems of the NAB TV Code Review Board, meeting tomorrow (Oct. 4) in Washington.

Television's voluntary self-regulation appeared to be heading into the alcoholic beverage field as the code board intimated at the last minute to halt a proposed cocktail mix commercial campaign on WPIX (TV) New York.

The station yielded to a code board request that the commercial, opening a Holland House campaign for its non-alcoholic mixes, be held up for further study by the regulatory body.

While this non-alcoholic product was having its commercials scanned by the code group, a beverage and mix in the window—the Martini & Rossi Vermouth—hoped to enjoy without interference a 12-week tv run on four New York stations. This $150,000 campaign is scheduled to wind up in December (see story facing page).

E.K. Hartenbower, KCMO-TV Kansas City, tv code board chairman, commented WPIX for delaying use of the Holland House campaign, based on a taped commercial showing mixing of a whiskey sour from the mix and a bottle of spirits. The first showing had been scheduled Sept. 25 (BROADCASTING, Sept. 26). Mr. Hartenbower said the board was concerned that the commercial did not follow the spirit and intent of the code plus long-standing copy approaches.

Fred Thrower, WPIX vice president-general manager, said the station has "certain reservations" about the position taken by the code office. He added, "However, we believe in self-regulation for our industry and since we signed up as a code member station, we intend to fulfill our responsibilities.

Surprised Sponsor = Holland House is said to have gone to considerable expense in preparing placards for dealers as part of merchandising the tv campaign. Erwin Wasey, Ruthrauff & Ryan, the agency, voiced surprise that the commercial was not withdrawn on the air. It pointed out that WPIX had agreed to carry the commercial after screening it. "We think we are doing nothing illegal or in poor taste," a top agency executive said.

The agency spent over $3,000 to produce the commercials and is said to have indicated willingness to absorb the expense if a tv outlet cannot be found to carry the spots. Executives hope NAB, after reviewing the commercials, will decide they are suitable.

Several other New York stations have voiced a desire to carry the campaign before WPIX was selected but even stations not signatories to the NAB tv code were said to have withdrawn the offer after NAB's intervention.

Last week the Michigan Assn. of Broadcasters disclosed it had obtained an official clarification of policy from the Michigan Liquor Control Commission. This defines the status of media and other promotion under commission regulations. In essence it is stated that promotion directed solely to the liquor trade is permissible but any effort to promote the sale of liquor to the public is prohibited. All alcoholic beverage ads must get commission's approval.

Another approach: While one beverage maker ran into TV code trouble with TV spots featuring mixed drinks, another was proceeding with a campaign advertising Martini & Rossi vermouth. The picture at right shows a clip for a Martini & Rossi tape commercial.

The setting of the commercial is in the hold of a ship (which accounts for the angle of the picture). In the commercial a hand comes out of a Martini & Rossi case (at left), brings out a bottle of vermouth and a tumbler and proceeds to pour. Heard in the background is a chant: “Martini & Rossi on the rocks.”

A 10-second version has been running on WNTA-TV. Three other stations, WABC-TV, WCBS-TV and WNBC-TV are to be added for a 12-week campaign running through December. In that, 20-second versions will be used. None of the spots mentions that Martini & Rossi vermouth is a standard ingredient in martinis and other cocktails.

Renfield Importers Ltd., New York, considers the cocktail mix aspect of its vermouth a coincidence. Renfield also markets Haig & Haig scotch, Gordon’s London dry gin and Gordon’s vodka. TV commercials are produced on a 12-foot rig built at the MGM Hollywood studios, with a $9,000 production budget. Erwin Wasey, Ruthrauff & Ryan is the agency.

Daniel M. Bernheim, senior vice president-account supervisor writing in the agency’s Reading Matter house organ, said the ban on mention of vermouth’s role as a cocktail mix was imposed by the industry. He added, “in fairness, it must be said that if they did not impose the restriction, the government would.”

MEDIA COMPARISON

Experts question common yardstick

The apples-and-oranges controversy over media comparison turned into a lemon session last week at the first fall meeting of the American Marketing Assn.’s New York chapter.

An agency-media panel gave Nielsen and Market Research Corp. of America executives some encouragement on the new magazine-TV services but was outspoken in its reservations about measuring viewing and reading in the same homes.

Some of the comments:

“I applaud the new measurements. But then we should sit back and ask ourselves: Have we learned something? Or are we perhaps more ignorant than before? Are they (magazine and TV audience measures) really comparable?” —E.L. Deckinger, vice president and media director of Grey Adv.

“Are these sleeping pills seducing us into a belief that you compare the two audiences?” —Thomas E. Coffin, NBC director of research.

“The industry should encourage more such work to explore dark areas of research.” —G. Maxwell Ule, senior vice president for marketing, Kenyon & Eckhardt.

Curtis C. Rogers, president, and Gus Hess, New York service supervisor of MRCA, outlined their Consumer Panel Media Service for the marketers, and Donald G. McGlathery, account executive for A.C. Nielsen Co., made his company’s presentation.

How They Count: Both MRCA and Nielsen count heads for magazines and TV on a standing national panel with these individual approaches:

MRCA’s Consumer Panel Service (Broadcasting, June 20) correlates media activity with product and service buying in more than 150 categories. About 48 advertisers use the service. Diary information is updated twice a year for 35 magazines and three newspaper Sunday supplements, by using a sub-sample of 5,000 families over four weeks and twice a year for all TV viewing, using a 2,500-family sub-sample over two weeks.

The Nielsen Media Service (Broadcasting, Sept. 26) was created specifically to help make media decisions in television and 12 major magazines (including three Sunday supplements). The NMS panel includes 2,500 homes using the Nielsen combined set-diary technique for television and interviews for magazines.

Mr. McGlathery also indicated things to come for NMS. Consumption patterns for various product groups will be included in future studies, while a study now is underway to analyze the large vs compact car market, including intent to purchase. Nielsen also is investigating a measurement of the newspaper audience as part of its “total” media concept.

MRCA’s media work has demonstrated in cross-tabulations that TV watching and magazine reading are reasonably independent of one another, with light and heavy degrees in each activity, each balancing the others. “This dispels the theory that families who watch TV do not read magazines and vice versa,” Mr. Hess said.

Apples & Oranges: The critics’ panel voiced doubts about comparability of the data provided by both services. Dr. Coffin, spokesman for television in the AMA critique, added that the new trend goes against the route advocated last year by an Advertising Research Foundation committee when it set forth the goal of measuring audience “perception” on advertising.

Mr. McGlathery acknowledged that NMS is on a “tough measure” in terms of this goal. Dr. Coffin said the ARF audience concepts committee chairman, Seymour Banks, vice president of Leo Burnett Co., was cool to the new services. Mr. McGlathery’s answer: The chairman’s company has subscribed to NMS.
A TVB BONANZA FOR RESEARCH
$10,000 competition seeks ideas for delving into TV's effects on behavior

The most promising plan for new research into the effects of television on human behavior is worth $4,500 to Television Bureau of Advertising. That sum will be awarded to the person coming up with the best plan in a $10,000 TV research competition that ends March 15, 1961.

The TVB undertaking, announced over the weekend, is unique in the communications field. A governing committee, staffed by educators and business executives and chairmaned by Mark A. May, Yale professor and chairman of the U.S. Advisory Commission for Information, will select 18 plans from those submitted. Each of the selectees will receive $250. The top idea will get another $4,000 and the second best an additional $1,500, or a total $10,000 outlay in the competition.

George G. Huntington, TVB's vice president and general manager, said the "contest" is designed to shed light on a shadowy media area. "Nobody really knows how to measure or prove the relative effectiveness of television," Mr. Huntington noted, though he admitted "everybody has conducted a research test." Though testing may point the way, there's little known why a given result happened, he said, specifying also the inability to "generalize" in relating a result in dog food advertised on television to that of a Lestoil success in the medium.

Major Investment = The competition is regarded as a major investment in the medium. It's designed to create side benefits such as delivering more brain-power to a serious look at the medium while initiating interest in TV in fields of endeavor which never before considered it. The competition was developed as part of a basic research program begun by TVB two years ago and initiated by the bureau's board of directors at a meeting last year.

A number of "outside" sources in psychological research—colleges and universities as well as researchers with top advertisers and manufacturing organizations with research facilities (IBM for example)—are being urged to enter the competition. An estimated 1,000 colleges and universities already have been sent announcements on the competition.

TVB's booklet outlining the competition's purpose cites these "examples" of problem areas from which specific project subjects might be selected: civic behavior ("voting or other community activities"); learning and education ("whether formal or informal"); consumer behavior ("the purchasing process, including the making of choices"); cultural values and activities ("changing levels of public taste, prejudices and their social manifestations"); and interpersonal relations ("the interaction of people as influenced by television").

These examples, TVB said were not restrictive, however, with research plans encouraged to deal "with any aspect of human behavior, as affected by television" and the problem defined in either "basic" or "applied" terms. It was noted that individual research projects "focused on specific problems" were preferred over "plans for complex, long-term programs."

Fresh and Feasible = Judging ranges from the conception and importance of the problem itself to the soundness, freshness and feasibility of the research strategy to anticipated results and the plan's presentation. The competition is open to all (except those connected with its conduct or with TVB). Joint authorship is permitted and a single author is not limited as to the number of plans submitted. TVB's booklet announcing the competition outlines what is expected in the presentations made.

The governing committee in addition to Dr. May: Leon Arons, TVB vice president for research; C.R. Carpenter, psychology professor and director of the Div. of Academic Research and Services, Pennsylvania State U.; John B. Carroll, Harvard professor in the Graduate School of Education; Joseph T. Klapper, consultant for communications research in General Electric's behavioral research service; Paul F. Lazarsfeld, chairman of the Sociology Dept. at Columbia U.; Wilbur Schramm, professor of communication research and director of the Institute for Communication Research at Stanford U., and Milton Sherman, client service director at Marplan Div. of McCann-Erickson. Samuel A. Stoufer, a Harvard sociology professor, served on the committee before his recent death.

M-E finding: harsh commercials on wane

McCann-Erickson has found the hard-sell, irritating commercial failing in a study of their "high and low factors of memorability," Jack L. Van Volkenburg, president of M-E Productions (a division of the agency), told a regional meeting of American Women in Radio and Television, meeting in Nashville last week. Mr. Van Volken-
The works of a master sculptor require no inscription to be recognized by the trained eye.

Similarly, that "quality touch" which sets apart great radio and television stations is just as quickly identifiable by those who know and value its importance in any successful campaign.

BURG'S theme was centered on the up-
beat signs in television programming
and advertising. Only a few commer-
cials now create an "offensive impres-
sion," he said, and this holds for TV
programming as well.

Much of Mr. Van Volkenburg's
speech debunked generally-believed
complaints. Westerns, for example, he
said, do not make up the bulk of pro-
gramming (he asserted that "tv pro-
gramming is far better balanced than
you might expect.".). Neither is it true,
he continued, that there's too much
violence in television. He thought most
people have a utopian idea of the
amount of "cultural programming" tv
should provide: "We all know that given
a choice, a mass audience will shift
from serious programming to light
entertainment."

Kenneth Runyon, vice president of
Gardner Advertising, St. Louis, had
some advice for those who use media
research. First, it should be used prop-
erly, he said, and each technique (co-
incidental, diary, roster, electronic) has
something it does better than the others.
Second, its limitations should not be
overlooked—this results in improper
use or complete rejection when it
doesn't produce what is expected. Third,
the researcher shouldn't become in-
fatuated with sheer statistics. Fourth,
there's more to research than results
and any evaluation should consider the
way they're obtained.

Walter K. Collins, radio-tv creative
director, Fitzgerald Advertising, New
Orleans, said some products can be
demonstrated well, but others not. For
the former, there's a definite place for
the "hard sell" commercial, he said.
but it's the products which can't be
demonstrated easily, like food, that
require creative ingenuity in their han-
dling.

The AWRT "Music City U.S.A." con-
ference ran Friday and Saturday
(Sept. 30-Oct. 1).

Pulse head proposes
changes in research

A proposal to overhaul several areas
of broadcast research was made by Dr.
Sydney Roslow, director of The Pulse
Inc., New York, in a speech last Tues-
day (Sept. 27) before the Omaha Ad-
vertising Club.

Ratings, according to Dr. Roslow,
are not "geared to the requirements of
modern selling, nor buying of local,
non-network, radio and television time."
Demand in spot radio is for availabil-
ities in the morning rush hours, and in
spot tv, for the evening rush hours, he
added. Selling time in non-rush hours
in radio is handicapped by the tune-in
and by the many stations in each mar-
ket, while television is faced with smaller
audiences and higher costs.

Dr. Roslow argued that the time has
come to gear broadcast research to
measures of frequency, research and
quality. Frequency, he pointed out, is
the run-of-schedule buy, which spreads
the commercial over many time periods,
and is hampered by the current use of
an individual quarter-hour rating for
each period. The use of a frequency-

Fuller & Smith & Ross tells broadcast plans

Fuller & Smith & Ross, New York, last week outlined plans to expand its role as "a major force" in the broadcast field and at the same time strongly criticized "the half-dozen giant agencies who have forced formula programming down the throats of sponsors and the nation's viewers."

Arthur E. Duram, F&S&R senior vice president for radio-tv, announced the following moves at the agency as part of its program to "assert itself" in the broadcast area. Edward H. Mahoney, formerly a broadcast vice president with Benton & Bowles and Cunningham & Walsh, both New York, has been named to the new post of vice president and manager of F&S&R's radio-tv department; George Wyland, formerly with J. Walter Thompson Co., New York, has been appointed head of a creative unit to handle television activities for Alcoa; and Peter Cardozo, vice president and radio-tv copy creative director, is assuming additional responsibilities in the area of production.

F&S&R has expanded its New York headquarters facilities to include electronic equipment and a complete-closed circuit tv system. This workshop, according to Mr. Duram, provides the agency with a proving ground where "costly risks can be eliminated prior to actual film production.

Mr. Duram emphasized that, as in the past, the agency will aim for programming providing quality, showmanship and originality for its clients. He attacked the "formula programming" practice he ascribed to large agencies, calling it "the safe-at-any-price approach to tv through its deadly adherence to programming for noses instead of people . . . ."

New survey can tell if listeners remember

A new service designed to measure recall of tv commercial messages goes into operation today (October 3). Called TV Commercial Reports, launched by the marketing research organization of Audits & Surveys Co., New York, the new commercial copy research service will measure penetration and retention of commercial messages, sales points and ideas among program viewers, according to Solomon Dutka, A&S president.

TV Commercial Reports will operate as a division of Audits & Surveys and will be headed by Jack Boyle, former president of Qualitative Research Inc. Young & Rubicam and McCann-Erick-
An electrical storm extinguishes the lights,* but not the spirit of an indomitable H-R representative, hard at work on a campaign proposal involving WMAL-TV. He requests, and receives, two candles from his secretary, lights them, and goes on with his work. Sensing an opportunity for one of these ads, the secretary points out that although the candles are of equal length, one will burn for four hours, the other for five.

When the lights go on, what is left of one candle is exactly four times as long as the remainder of the other. Our man is no clock watcher, but he needs to know how long he worked by candlelight for time records. As you've no doubt guessed, he quickly and easily computes this. Can you?

Send us the correct answer and win a copy of Dudeney's "Amusements in Mathematics" — Dover Publications, Inc., N. Y. Repeat winners can be assured of receiving a different prize.

*Good way to throw light on your product in Washington is via WMAL-TV's first-run, late-nite movies. Your local H-R man will be glad to discuss this light source.
son are charter subscribers.

The technique to be used by TV Commercial Reports will be 24-hour recall, with reports consisting of tabulated material, verbatim playbacks and story board scripts. Reports will contain: recall of the commercial at two levels; recall of correct brand name; verbatim responses to probing questions on recall of sales points; verbatim responses to recall of the commercial's main ideas and feeling; which points or ideas recalled were of most interest to the respondent, and respondent's overall appraisal of the selling effectiveness of the commercials.

In cases where the basic interviewing schedule does not meet a client's full needs, e.g., daytime broadcasts, it will be possible to cover additional programs under an identical interviewing situation, Mr. Boyle says.

**Business briefly**

**Time Sales**

Back for more = C.F. Mueller Co., Jersey City, N.J., after a summer suspension of broadcast activity for its Mueller's macaroni, has returned for 33 weeks of spot media. The radio drive consists of minutes, with live tags, in the top 25 markets. TV minutes and ID's are utilized in three markets: New York (18 weekly), Boston (10 weekly), and Philadelphia (6 weekly). Agency: Doherty, Clifford, Steers & Shenfield, N.Y.

Seasoned = Angostura-Wupperman

---

**‘Yearbook’ mailing begins**

The 26th consecutive Broadcast- ing Yearbook • Marketbook issue was put into the mail last week to subscribers. This 550-page volume is the basic reference and source-work for the business of broadcasting. It contains 46 separate directories covering every facet of the television-radio field and its allied arts.

The new 1960 edition of this desktop, one-book library contains more than a half-million words comprising the vital economic, technical and business facts that are fundamental to effective buying and selling in the tv-radio marketplace. It is organized for speedy reference by timebuyers, account executives and other agency and advertiser executives, as well as by anyone and everyone who has an interest in tv and radio.

Detailed station directories cover the 4,839 tv, am and fm stations now on the air. New statistics made available by the U.S. Census Bureau, American Research Bureau and A.C. Nielsen Co. give insight into the growth of the county-by-county marketing base. Other sections set forth the latest information on advertising billings, advertising agencies, program producers and distributors, audience, broadcast time sales and major trends and events. Additional sections cover regulation (both imposed and voluntary), trade associations and professional groups, communications attorneys, consulting engineers, station brokers, talent agents, news services, newspaper and group ownerships, networks (both national and regional), closed circuit tv, community antenna systems, pay tv interests and the facts, figures and history of broadcasting.

Single copies, as long as they last, may be obtained for $4 each. Yearbook issue plus the 52 weekly issues of Broadcasting are $11. Send orders to Broadcasting Circulation Dept., 1735 DeSales St. N.W., Washington 6, D.C. For foreign postage, add $1.
IN PITTSBURGH
Take TAE and See
TAE-Time is ABC-Time!
Let Pittsburgh's hottest adjacencies carry the ball for you this season.
The broadcast unions' first step toward their self-proclaimed goal of "united labor action" (Broadcasting, Sept. 26) was taken last week when the Screen Actors Guild participated with the American Federation of Television & Radio Artists for the first time in negotiations with the radio-television networks, advertising agencies, independent producers and New York tv film producers.

Both sides maintained a hush-hush secrecy about the demands proposed by AFTRA, but, in the words of one management official: "They're difficult to analyze but we know they're rugged, and unless the unions come way down on the demand I wouldn't be surprised to see a strike."

Though both management and labor declined to reveal any details of AFTRA's proposals, it was learned the most revolutionary demands are in the area of live, tape and film commercials and local tv programs, which also will apply to the Screen Actors Guild.

AFTRA has set up a unit system covering 22 cities of varying sizes, giving each city a certain unit. Under this system, a city under 50,000 population is given one unit; larger cities are given larger units, depending on their population, and New York gets 21.

Wild Spot Rates In the area of the wild spot commercial, this unit system will be applied to a formula consisting of $15.60 for each single unit for unlimited use of a commercial over a 13-week basis. For example, if the spot is run in five cities with a total of 20 population units, the fee would be computed by multiplying 20 by $15.60 for a total of $312. This covers on-camera performers; off-camera performers will receive 80% of the sum. The minimum fee in this category would be $156.

The unit system cannot be always compared precisely with rates under AFTRA's present pact because of the different approach. But in the larger cities it is thought that the new rates would prove considerably higher. For example, under the current contract, the 13-week, on-camera fee in New York is $175, as compared with about $325 under AFTRA's proposal.

Similarly, in the area of local tv programs covering 20 cities or less, AFTRA also has suggested a population unit formula, with $17.50 the basic yardstick. This would mean that for a group of cities totaling 20 units, the on-camera fee for 13-week unlimited use of a program would be 20 multiplied by $17.50 for a total of $350. The minimum fee would be $175 and all off-camera fees would be 80% of the on-camera payments.

A special fee arrangement is proposed for New York, Chicago and Los Angeles amounting to $400 in each of these cities for on-camera artists; $325 for off-camera performers. This cost structure again reflects a considerable increase for larger cities and a more equitable one for smaller cities.

Network TV Fees The network tv commercial fee increases sought by AFTRA are reported to be relatively modest. The minimum for on-camera performers is set at $80, and off-camera at $80, as compared with $93 and $67 in the AFTRA pact expiring on Nov. 15. AFTRA, however, is seeking a stronger re-use formula. For example, AFTRA is seeking 100% of the original fee for all additional uses of the commercial for principal performers on-camera, and 80% of the original fee for subsequent re-uses for off-camera and secondary performers.

COLOR CASSETTE

Here are the next 10 days of network color shows (all times are EDT).

a Star is Born
the present pact, the re-use principal is on a downward sliding scale after initial exposure.

In the area of network TV programs, SAG is not involved. AFTRA is seeking an approximate 15% increase to bring the single minimum payment for principal performers to $100 for a 15-minute program; $180 for a half-hour show; $200, hour show; $340, 90 minutes and $420, two hour program.

Joint negotiation and administration by SAG and AFTRA is viewed as a move toward equalizing their rates. One management spokesman said: "In some areas, AFTRA has been ahead; in others, SAG has been ahead. They hope this new pact will give them the best of both worlds."

The Negotiators — SAG's contract expired late this past summer but the pact was extended, with the agreement of the Film Producers Assn. of New York, to coincide with AFTRA's expiration date of Nov. 15. Participants at the opening session include the executives from the three TV networks, the four radio networks, and FPA. Representatives of the advertising agencies, which sign letters of adherence to all contracts, sat in as observers and a representative of the Assn. of National Advertisers attended as an "unofficial observer." Those attending were handed AFTRA's demands, into which were included provisions applicable to SAG, and were advised that other proposals will be forthcoming at the next meeting, scheduled for Oct. 11.

AFTRA's proposals also included demands in the network radio and transcription fields, and in these areas increases ranging from 10% to 20% are being sought, depending on the performers' category.

The Screen Actors Guild also is seeking a pension-welfare fund covering performers in commercials. AFTRA already has such a fund. The SAG fund would be financed by employers' contribution of 5% of gross fees.

Plea for dismissal in post-'48 case

Seven Arts Productions, Toronto, last Monday (Sept. 26) asked the New York Supreme Court to dismiss the Triangle Stations' application for an injunction to halt the sale of post-'48 Warner Bros. features (BROADCASTING, Sept. 26). Affidavits filed with the court challenged Triangle's contention that Triangle, in effect, had an agreement with Seven Arts for an option to buy the films in its station markets.

Triangle's application claimed that in 1957, when the station group bought pre-'48 features from Association Artists Productions, it also obtained exclusive market rights to all post-'48 features at $4,000 per feature, subject to certain stated escalation. Triangle contended that Seven Arts was established to "evade" Triangle's option, pointing out that Eliot Hyman was head of AAP and now is president of Seven Arts Associated Corp., a division of Seven Arts Productions, which distributes the post-'48 features. Seven Arts replied there is "no connection" between AAP and Seven Arts, and insisted there is no contractual agreement between Seven Arts and Triangle.

The court reserved decision, pending a study of all material submitted.

ASCAP PEEVES

Inaccurate credits, BMI raids alleged

Complaints were the order of the day at the west coast membership meeting of the American Society of Composers, Authors & Publishers, Wednesday (Sept. 28) in Beverly Hills, Calif. Despite the controller's report that ASCAP income for the first seven months of the year had totaled $19,668,982, more than $1.5 million ahead of the gross of $18,160,433 for the same period of 1959, the mood of the assembly of some 200 songwriters and publishers was one of discontent.

ASCAP President Stanley Adams started it off with a blast at the society's traditional enemy, BMI, which he accused of raiding ASCAP's membership and luring writers into the BMI fold by exorbitant payments, made not for their contributing anything to BMI, but merely for promising not to contribute anything to ASCAP.

Under the terms of the new consent decree accepted by ASCAP, the society is prevented from paying writers not to write for BMI. President Adams stressed angrily asking why BMI is not bound by the same sort of regulation. Wolfe Gilbert, a west coast director of ASCAP, called for action to oppose the BMI raiding tactics, which he called "immoral and totally unfair."

But most of the expressions of discontent were directed at the methods by which performance credits of members are collected. Walter Gross demanded that "as a society in the business of surveying and tabulating performances, we should be as accurate as possible."

SOS to FCC Mr. Gross suggested that the FCC, as the government agency responsible for broadcasting, should be asked to help ASCAP obtain performance data from the individual stations. The networks provide ASCAP with logs of performances and BMI gets this sort of cooperation from the stations, he asserted. So why can't AS-
Air Express takes priority on all scheduled U. S. airlines

AIR EXPRESS is in the auto business, now! This crew is just finishing off the latest model. Hours from now, it will bow at a glamorous auto show. Many new parts were completed just in time, and flown to this assembly point with jet speed. All 35 scheduled U.S. airlines pampered them with priority treatment. AIR EXPRESS trucks (13,000 ... many radio-dispatched) rushed them door-to-door at both ends of their flights. As each part arrived, the shipper got a teletype receipt. That’s service! AIR EXPRESS is in other businesses, too. It should be in yours. There’s no finer partner and rates are low. One phone call is all it takes.

CALL AIR EXPRESS DIVISION OF RAILWAY EXPRESS AGENCY • GETS THERE FIRST VIA U. S. SCHEDULED AIRLINES

BROADCASTING, October 3, 1960
CAP get it as well, he asked, urging the society's officials to ask this question of the FCC.

Reporting that he received seven performance credits for one tune in a period when he knew it had between 400 and 500 performances, Mr. Gross belabored the present survey as too hazardous to measure the use of recorded music by the nation's disc jockeys who are responsible for "keeping our kind of music alive."

Herman Finkelstein, ASCAP general counsel, said that he had the opportunity to examine one report made by a station to BMI and to compare it with the actual performance. "There was absolutely no similarity, coincidentally or otherwise," he declared.

An FCC order to give ASCAP full performance reports might work a hardship on stations, Mr. Finkelstein observed, but perhaps it should be done in the public interest. He commented that perhaps the compilation of such records would help abolish payola by exposing it.

Consent Decree Restriction - Stating that he had long advocated a single survey system for measuring both BMI and ASCAP performance credits, Mr. Finkelstein explained that ASCAP had nothing to do with making such measurements. Under the terms of the consent decree (Broadcasting, Jan. 11), ASCAP was ordered to select a qualified research organization to do the job. "Joel Dean Assoc. was picked and was subsequently ratified by the Department of Justice," he said. ASCAP itself can not propose a change in the setup to the FCC, but such a proposal might be made by the Judge, appointed by the court to supervise the operation of the ASCAP system. Mr. Finkelstein promised to send a full report of the statements of Mr. Gross and others at the meeting.

The other speakers included Al Jarvis, veteran disc jockey, who contended providing performance lists would be easy for stations. Mr. Jarvis said he makes five copies of the tunes played on his program on KLAC Los Angeles and gives four of them to the station, "which can reach into the file and tell you what I played seven months ago. With only a few exceptions every station in the country can tell you what all their disc jockeys play."

ASCAP membership now totals 5,085 active writer members and 1,589 publisher members, plus 635 non-participating writers, Mr. Adams told the meeting.

**BROADCASTING YEARBOOK**

*MARKETBOOK*

"One-book library of television and radio information"

46 separate directories indexing the world of broadcasting

Designed to meet your specialized needs, the all-new BROADCASTING Yearbook is the largest and most complete encyclopedia-type book ever published for the business of broadcasting. The information in this book is massive (more than half a million words), and it is organized for speedy reference. It’s a desk-top book. You’ll use it constantly throughout the year for facts and figures, names and addresses—for data available in no other single source.

Compiled, edited and written by the same staff that produces BROADCASTING — The Businessweekly of Television and Radio. Serving the business side of broadcasting since 1931.

* Published every September

Triangle inaugurates new fm programming

Triangle Stations inaugurates a new fm programming service to its five fm outlets this month. The format will consist primarily of music, classical, opera and light opera, musical comedies and popular with regular news broadcasts. It began Oct. 1 on WFIL-FM Philadelphia, WNB-FM Binghamton, N.Y., and WNHC-TV New Haven, Conn. It will start Oct. 17 on WFBG-FM Altoona, Pa., and is slated to begin Oct. 31 on KRFM (FM) Fresno, Calif. According to Triangle, the service will cover a nine-state area serving 5.4 million people. The service has involved months of pre-testing during which surveys of audiences in the top 50 markets were evaluated to determine fm audience preferences, Triangle reports.

Program notes

Crosby catv defeated Proposal by Bing Crosby Productions Inc. to establish a community television system in Lompoc, Calif., was defeated 2 to 1 in a special referendum last week. The Crosby company had asked for a 20-year franchise and this had been approved, 3-2 by the city council. The referendum was required after voting citizens petitioned for a special election. Crosby petitions for similar franchises in Santa Maria and San Luis Obispo had been held in abeyance pending the outcome of the Lompoc vote. Active in opposition to the catv proposal were KEYT (TV) Santa Barbara and KSBY-TV San Luis Obispo. Mr. Crosby is chairman of the radio-tv division of Naft Corp., which owns KCOP (TV) Los Angeles, KPTV (TV) Portland, Ore., and KFIJ-TV Fort Worth, in addition to KXYZ Houston.

The verdict C&C Films Inc., New York announced last week that the American Arbitration Assn. has rendered an award of more than $44,000 in favor of C&C against Triangle Publications Inc. C&C officials said the dispute centered around "a matter of honest differences of opinion over the meaning of contractual provisions" relating to delivery requirements of RKO feature films by C&C to the Triangle stations.

Behind bars Ed Reed and Ron Oppen, newsmen of WTVJ (TV) Miami, spent six days in prison last week—shooting a documentary about the Florida State Prison at Raiford for FYI, a prime-time news show. According to the station, the program is not intended as an expose, but rather as an attempt to present what the prison and prison life are like, the good and

the bad. The two newsmen shot over 6,000 feet of film, including interviews with prisoners and prison employees getting their views on what Raiford needs to become a model prison. The newsmen reported complete cooperation from prison authorities—no areas were declared off limits to them and they were allowed free access to film whatever they wished.

Election jingles ■ Westinghouse Broadcasting Co., which won an American Heritage Foundation award for the register-and-vote promotion announcement it created for the 1956 elections, reports that the jingles are now available free of charge to all U.S. radio stations. They may be ordered through Brendan Byrne at the Foundation’s address: 11 W. 42nd St., New York.

Fascinating rhythm ■ The Gershwin Years, a 90-minute spectacular of life in the '20s and '30s with a background of Gershwin music, will be the third in a series of specials to be sponsored by General Electric. Leland Hayward will produce the program, which is slated for Sunday, Jan. 8 at 8-9:30 p.m. EST. The cultural atmosphere of the times, and its effect on George Gershwin, will be represented by movie clips, cartoons, paintings, sculptures and other visual means.

■ Film sales

“O.T. Hush, Private Eye” (M&A Alexander Productions)
Sold to: WABC-TV New York; WIIC (TV) Pittsburgh; KSTP-TV Minneapolis-St. Paul, and KSD-TV St. Louis.
Now in 42 markets.

“Best of the Post” (ITC)
Sold to Collins Co. of Kentucky for WAVE-TV Louisville, WLEX-TV Lexington, and WFIE-TV Evansville, Ill.; to Kentucky Utilities for WPSD-TV Paducah; California-Oregon Power Co. for KPIC (TV) Roseburg and KVAL-TV Eugene, both Oregon, and Union National Bank of Arkansas for KTHV (TV) Little Rock. Also sold to WGHL-TV Billings, Mont.; Miles Labs for KING-TV Seattle; First Federal Savings Bank and Nothnagle Realty Co. for WROC-TV Rochester, N.Y., and to Graves Red and White for WAGM-TV Presque Isle, Me.
Now in 107 markets.

“Divorce Court” (KTTV [TV])
Fifty-two new episodes sold to WPIX (TV) New York.

“Greatest Headlines of the Century” (Official Films)
Sold to Armed Forces Television Services for distribution to 25 overseas bases.

CBS Radio's plans applauded

Harmony reigns at meeting; affiliates like new schedule

CBS Radio's affiliates endorsed the network's proposed shift in programming emphasis last week without a dissenting vote.

The new plan—which eliminates daytime serials, cuts back on other entertainment programming, installs 10-minute newscasts on the hour, expands other news coverage and reduces from 30 to 24 one quarter hours per week the volume of programming that affiliates are required to clear (Broadcasting, Aug. 22, etc.)—will go into effect Nov. 28 as originally planned. The announcement was made by President Arthur Hull Hayes at the end of the annual convention of CBS Radio affiliates, held Wednesday and Thursday in New York.

Network officials said unanimously and affiliates reported with only occasional reservations that the two-day session was uncommonly harmonious and singularly unmarked by affiliate criticism or opposition to the new program plans.

One report from behind the closed doors of the opening session said that President Hayes noted that details of the plan were circulated several weeks in advance, asked whether affiliates had any questions—and was asked none. At the end, the affiliates passed without dissent a resolution endorsing the program changes "as a forward-looking step in radio networking," and the end as "a means of additional radio service to (affiliates') respective communities."

"Strides Hailed" . . . John S. Hayes, WTOP Washington, chairman of the affiliates association's board of directors, which helped develop the changes and had approved them before the convention was held, reported that the affiliates considered them "a tremendous stride forward in networking." He said the affiliates voted unanimously in favor of the changes after a private 2½-hour discussion not attended by network representatives.

One unanticipated development of the convention was the acknowledged likelihood that CBS Radio will get into program syndication—in a limited way. A number of affiliates, according to President Hayes, had inquired about the possibility of buying the series of one- to-two minutes "Dimension" features which CBS-owned radio stations are using to give their programming a "distinctive" sound (Broadcasting, Aug. 29).

President Hayes said the company's o&o unit has set up a room in the Waldorf-Astoria, the convention hotel, so that affiliates could acquaint themselves with the "Dimension" series; that if enough were interested CBS Radio would syndicate the features—and that it appeared that the interest was adequate. Prices have not been set.

Other CBS authorities said they had no intention of expanding this syndication operation to include other program material.

During the convention there were some modifications of the proposed programming changes, but both network and affiliate leaders called them primarily "technical."

Compensation . . . The question of cash compensation for affiliates—a system which CBS Radio essentially abandoned two years ago in favor of the present policy of furnishing a certain amount of free programming that the stations may sell locally—reportedly was raised briefly.

The affiliates were told that the present plans were laid out on the theory that cash compensation would not be involved, and that if cash compensation were to be considered, then an entirely different type of play would have to be drawn.

One affiliate, apparently feeling taunted by NBC Radio's recent references to its own payment of cash to affiliates (Broadcasting, Sept. 26) dismissed NBC's system by saying: "Last year NBC Radio paid out $2 million or $3 million compensation. The last year that CBS Radio paid a cash compensation we received a total of $4 million and we thought even this amount was peanuts and told CBS to keep it—to give us programs to sell, instead."

There were unconfirmed reports that CBS spokesmen were claiming that NBC was able to pay cash compensation because NBC gets so much money from its affiliates in the form of co-op fees. This prompted NBC spokesmen to assert that their revenues from co-op fees last year totalled only 2.1666% of the amount they paid out in compensation.

Plans Described . . . The Messrs. Hayes—President Arthur Hull of CBS Radio and Chairman John S. of the affiliates board—reviewed the new plans at a news conference immediately following convention adjournment Thursday afternoon.

President Hayes emphasized that, while daytime serials and some other programs are being dropped, and while the network is retaining less time for network sale, the volume of program material set by the network is expected to be even greater in 1961 than this year, and that this year's total is almost sure to be higher than 1959's.

Most of the increase, he indicated, will be in unscheduled information pro-
Now, You Can Offer Your Advertisers the Newest Facilities and Your Viewers the Most Varied Programming.

First, Telechrome provided broadcasters with a vastly improved system for producing a wider variety of dramatic wipes, inserts, keying and other special effects. Now, Telechrome engineering introduces the "Joy Stick" Positioner. This makes it possible to create many hundreds more effects and to move wipes, inserts, keying or other special effects to any place on the TV screen. The effects are startling! A new era in program creativity begins now! Ask to see the "Joy Stick" Positioner demonstrated, today!
Now they'll really hit the deck

CBS Radio announced last week a new network radio signaling system so efficient that, for urgent news developments, it can rouse station managers out of bed last 2½ minutes.

The device, developed by CBS Labs and called NetALERT, ordinarily will be for less dramatic purposes. Day-to-day uses, include cueing for local commercial inserts in network-fed programs, network cueing, notifying stations that a closed-circuit announcement is coming up, and alerting affiliates that a special network news bulletin is about to move.

But when the news is urgent enough the system will alert not only the stations but also the homes of their managers or other key executives, in case it occurs after office hours or after the station has signed off for the night. When the home as well as the station alarm sounds, it means—depending on the type of signal given—that (1) "a very special one-spot news coverage is coming up" or that (2) a national emergency has occurred and all broadcasting operations have been subordinated to the nation-wide Conelrad defense alert system.

Convention Feature ■ CBS Radio President Arthur Hull Hayes' announcement and demonstration of the new system highlighted last Wednesday morning's session of the annual convention of CBS Radio Affiliates (see page 62). Mr. Hayes said the network would furnish affiliates with the necessary basic equipment at no more than nominal charge. He said the timetable calls for installation of initial units by June 1961.

CBS Radio officials said the system differs from NBC Radio's "Hot Line" system, installed in 1956, in that (1) NetALERT signals can be fed simultaneously with network programming, whereas NBC's "Hot Line," they said, can signal only during periods of no network service and (2) NetALERT is able to transmit a wider variety of information and also lets stations know instantly the purpose of the alert.

NBC spokesmen later contended that NetALERT was nothing more than an adaptation of their "Hot Line" system. They said "Hot Line" signals are not fed simultaneously with network programming but that this was unimportant because "we can break into programming whenever we want to." They said several NBC affiliates have as many as five "Hot Line" receivers in various locations including station managers' homes.

NetALERT equipment consists of transmitters which will be installed across outgoing program lines at major network points (New York, Chicago and Los Angeles and possibly Washington); receivers installed across the incoming program line in the control rooms of affiliated stations; desk-model remote indicators in individual executive offices, all connected with the control-room receiver; and the special executive alarm (also working off the control-room receiver) to be installed in the home of the local station manager or other designated official.

Beep Beep ■ The receivers and remote indicators are activated by beep-type signals from the network transmitters. The beeps, one-thirtieth of a second in length and described as unnoticeable to the home audience, activate both audible and visual signalling devices in the receivers and remote units. A buzzer then sounds, and at the same time the type of alert being sounded is shown numerically on a dial.

The possibility of using NetALERT as a form of automation also was seen by Mr. Hayes and several affiliates. It was pointed out that Alert No. 1 (for station cueing) could be used to activate a tape machine to play local commercial inserts into network-fed programs, tape special network material for later broadcast, etc.

Another jazz station

WAYL (FM) Minneapolis-St. Paul is scheduled to sign on the air this month on 96.3 mc David D. Larsen, owner and manager, has been associated with three all-jazz fm stations, KHHP (FM) San Francisco, KNOB (FM) Long Beach and KJAZ (FM) Alameda, all California. For WAYL, Mr. Larsen intends to try a different format, with a sampling of traditional, swing-era and folk music in addition to the jazz sounds. Original-cast Broadway show albums, sports car reports and discussion programs are also scheduled. Selected tape broadcasts from other fm stations will include coverage of jazz festivals and similar events. Plans for live and recorded stereo broadcasts are in the works. WAYL will broadcast from 5 p.m. to 1 a.m. weekdays and from 9 a.m. to 1 a.m. on weekends. Mr. Larsen plans an expansion of program hours in the "near future."
All getting through to the same woman

She's the suburban woman — the most influential buyer in America. And who's getting through to her? All four stations of THE HERALD TRIBUNE SUBURBAN RADIO NETWORK with their network staff, editorial knowledge and skill. Four stimulating, aware radio stations that have the power to reach the woman whose world is on power-steered wheels, whose life is in motion from supermarket, to cookout, to school meeting, to commuter express. Your commercials can put her finger on the starter button for immediate buying because THE HERALD TRIBUNE SUBURBAN RADIO NETWORK reflects her community in the type of entertainment and the advertising it carries. THE HERALD TRIBUNE SUBURBAN RADIO NETWORK offers unique powerful suburban coverage because it communicates directly and without waste to the land of the commuter family — and specifically to the woman who does 66¼% of the buying. It's time you were getting through to the suburban woman!

Changing hands

ANNOUNCED — The following sales of station interests were reported last week subject to FCC approval:

- WNMP Evanston, Ill.: Sold by estate of the late Angus D. Pfaff to Harry and Otto Semrow for $325,000. Messrs. Semrow manufacture decorative grillwork for household appliances and are associated in real estate firm. WNMP is a 1 kw daytime on 1590 kc.

- KFYN Bonham, Tex.: Sold by Charles L. Cain to Cyril W. Reddoch and Ralph L. Hooks for $75,000. Messrs. Reddoch and Hooks own KSTV Stephenville, Tex.; KDLA DeRidder, and KREH Oakdale, both Louisiana. KFYN is on 1420 kc with 250 w, daytime only. Broker was Hamilton-Landis & Assoc.

- WNCA (FM) New York, N.Y.: 49% interest sold by T. Mitchell Hastings to the New York Daily News for $147,000. The News owns WPIX (TV) New York and is associated in ownership with WGN-AM-TV Chicago (Cicago Tribune). Included in the agreement is an option for the purchase of 10 more shares to give the News 51% ownership (255 shares out of 500 outstanding). Mr. Hastings’ Concert Network also owns WBCN (FM) Boston, Mass., WXCN (FM) Providence, R.I., and WHCN (FM) Hartford, Conn. WNCA-FM operates with 15 kw on 104.3 mc.

- KDAC Fort Bragg, Calif.: Sold by the estate of the late Edward A. Merle to Charles W. Stone for $55,000. Mr. Stone was vice president-general manager of WAMS Wilmington, Del., and before that general manager of WTVU (TV) Scranton, Pa., and WNAO Raleigh, N.C. KDAC operates with 250 w on 1230 kc. Broker was Paul H. Chapman Co.

APPROVED — The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 101).

- WCHS-AM-TV Charleston, W.Va.: Sold by Tierney Co. to Rollins Broadcasting Co. for $2,598,000 plus management contracts with John T. Gelder Jr. and H.D. Battle for two years at combined annual salary of $46,200. Rollins owns WPTZ (TV) North Pole (Lake Placid), N.Y.; WEAR (TV) Pensacola, Fla.; WAMS Wilmington, and WJWL Georgetown, both Delaware; WNBR Newark. N.J.: WRAP Norfolk, Va.; WGEE Indianapolis, Ind. and WBEE Harvey, Ill. WCHS operates on 580 kc with 5 kw and is affiliated with CBS; WCHS-TV on ch. 8 with ABC affiliation. Commissioner Robert T. Bartley dissented.

- WRLC Scituate, Mass.: International shortwave station sold by Walter S. Lemon and associates to Metropolitan Broadcasting Corp. for $800,000 plus $200,000 over seven-year period to Mr. Lemon for agreement not to compete in international broadcasting. For Metropolitan holdings, see WTVP (TV) Decatur, Ill., below. Commissioners Robert T. Bartley and John S. Cross dissented.

- KTKT Tucson, Ariz.: Sold by Thomas J. and Angie M. Wallace and House Party Productions Inc. to Leland S. Bisbee Jr. and associates for $410,000. Mr. Bisbee and group own KRUX Glendale, Ariz. The transaction involved the sale of the Wallace’s 50% interest to House Party Productions for $190,000 and House Party Production’s transfer of 100% to the Bisbee group for $410,000. KTKT operates on 990 kc with 10 kw daytime only, but holds construction permit for 10 kw day, 1 kw night.

- KAGO Klamath Falls, Ore.: Sold by Riley R. Gibson and associates to A.J. Frisk and associates for $202,000. Mr. Frisk has interests in KNKS Hansford, KFIV Modesto and KFAX San Francisco, all California. Mr. Gibson and group own KXOA-AM-FM Sacramento and KLIV San Jose, both California. KAGO operates on 1150 kc with 5 kw daytime, 1 kw night and is affiliated with ABC.

MEN WHO READ BUSINESSPAPERS MEAN BUSINESS

In the Radio-TV Publishing Field only BROADCASTING qualifies for membership in Audit Bureau of Circulations and Associated Business Publications

66 (THE MEDIA) BROADCASTING, October 3, 1960
Stay away Fridays

Radio Station salesmen can cut down agency “waiting room time” by making calls on timebuyers on Wednesday mornings. That was determined by timebuyers themselves as the “most convenient time” to hear station presentations. Radio Advertising Bureau told the bureau’s regional management conference in Hollywood-by-the Sea, Fla., last Thursday.

A national survey of advertising agencies indicated that salesmen can forget about Friday agency calls altogether, and that lunch dates should be scheduled only as a last resort. RAB’s poll on preferred times showed that 30% of timebuyers picked Wednesdays and almost three times as many picked mornings rather than afternoons. Nine percent chose Mondays as the most convenient day, while only 3.4% selected Fridays. A minute 2.3% of the timebuyers want to hear station pitches at lunch. Delegates to RAB’s fifth in a series of eight conferences were informed that 83% of timebuyers consider calls by local station salesmen as productive.

Mich. AP winners

The Michigan AP Broadcasters Assn. announced the following awards at its annual meeting in St. Clair, Sept. 22: WKBJ Muskegon, member of the year; WKHM Jackson, WKZO Kalamazoo and WJRT (TV) Flint, all first place winners in their classifications for general excellence of their news operations; WKHM Jackson, documentary programs and sports.

Other stations winning honors: WPON Pontiac, best locally-scheduled news show; WHBF Benton Harbor, best locally-scheduled farm show; WUOM Ann Arbor, best local special events coverage; WQRS (FM) Detroit, best local commentary show.

More winners: WFDF Flint, best local news show; WJR Detroit, best local farm show; WJBK Detroit, best local documentary show. WJRT (TV) Flint, best local news, sports and special events coverage; WJBK-TV Detroit, best local farm show, one-time documentary program and regularly-scheduled editorial-commentary program.

A new ‘philosophy’ for radio stations

A radio station philosophy—Total Community Identification — was advocated Sept. 30 by William H. Schwarz, program services manager of Peters, Griffin, Woodward, to the Minnesota Broadcasters Assn., meeting in Minneapolis.

“TCI means that the programs of a radio station must be identified with and service the community in which the station functions,” Mr. Schwarz explained. “The concept affects not only programs but the promotion and sales operation of the station. It cannot be applied piecemeal. Total means in this case, total throughout the station, not necessarily total throughout the community.”

He said TCI “will affect the music the station plays, the way it handles news, its public service announcements, its community service activities, its promotion plans and even its copy.”

Mr. Schwarz said promotion, like sales and programming, should be identified with the community and not imposed on it. In news coverage, he said, the greatest impact is made by projecting the life forces of the community in addition to coverage of national and international news. Impact of TCI is “immediately measurable” he said in citing the impact of station editorializing on local issues.
TV AFFECTING NEWS COLUMNS

AP managing editors may study impact of tv news coverage on newspapers

Television is changing the look of news in the daily paper. Editors are acknowledging it now and adapting for co-existence.

The Associated Press Managing Editors Assn. at its annual meeting next month will get a report urging a broad year-long study of the impact on newspapers of tv news coverage. This recommendation by the general news committee is contained in its annual review of major AP stories. These are three that dramatized the issue, the committee said:

- The Winter Olympics, when intensive tv coverage caught the public fancy and caused many editors to increase space allotted to the games.

- The Khrushchev press conference in Paris following the wrecked Summit conference, when newspaper accounts "gave a picture of a dictator gone mad, while the tv tapes, shown later, made the whole thing appear mostly as a cool and calculated performance on his part."

- The national political conventions, which gave tv its quadrennial opportunity to cover live a big continuing show.

The "problem" of television, the committee says, "needs much more than the occasional attention given it this year. This is a problem of major importance, and it won't just go away. It will increase in dimension as tv equipment and skill improve. Already tv has forced basic changes in the political conventions, and has become a potent factor in the campaigns. Already it, in great part, determines the public interest in sports.

And newspaper readers, editors have learned, often use what they have seen on tv as a yardstick for judgment of what they read."

Grading Networks - Committee members monitored the Democratic convention separately and handed out a commendation to NBC-TV but some reproofs to CBS-TV.

Edward T. Litchfield, feature editor of The Spokane (Wash.) Spokesman-Review (KHQ-AM-TV Spokane), said NBC did an "outstanding job of reporting," providing dramatic highlights and interpretive sidebars. Still there was ample material left for the newspapers and they made good use of it, he said, adding that "newspapers cannot and no doubt do not wish to compete with tv" in providing entertainment.

A report on CBS by Robert Mason, managing editor of The Norfolk Virginian-Pilot (WTAR-AM-TV Norfolk), underlined live television's effect on next-day papers.

Tv commentators on Tuesday night of the convention mused that there would be wholesale defection of delegates to other candidates if Sen. John F. Kennedy failed to win on the first ballot. Mr. Mason reported, "Persons reading the AP story in The Virginian-Pilot next day were disappointed," he said. "They read not about a contest but a shoo-in, not about scrambling delegates but pleasantly bantering candidates. Some of them called the newspaper and asked what went."

Morning Quarterbacking - "The AP, as it turned out (and as should have been apparent anyway) had its eye on the right ball. Television—or the CBS arm of it—had missed its audience by its emphasis upon the many maneuvers of Kennedy's opponents. In its continuous, night-long coverage, and its self-imposed obligation to keep the people entertained as well as informed, it had lost the thread of the story. Or the rope of the story: It was that big."

"The mistake is one for television to ponder. It is one which the press cannot, at the same time afford to ignore. For the night's television viewers next day, some newspaper readers, and they are likely to compare the products of the competing media, and to pass judgment, while they drink their coffee."

"There is, I think, a lesson for the AP here. It is to give perspective to the mass of what the public has seen and been told on the screen.

"I do not know how closely the AP monitors what the tv networks send out. But I feel that the monitoring should be close, and that the writing and editing should reflect it. It will do newspapers no good for readers to believe that newspaper reporters don't know the whole story—though the reporters indeed know the whole story so well that they know what part of it isn't pertinent."

Top of the News - Assessing the AP's own job, Sam Regan of The Raleigh (N.C.) News and Observer said convention stories were consistently good and remarked, "There is no denying the value of television in coverage of such events as this convention, but they have not relegated newspapers to the ash heap. The reporter with the pad and pencil is still the top man."

William B. Dickinson of The Philadelphia Bulletin headed the general news committee whose comprehensive report contains the recommendations on television. Separate sections of the general report reviewed the wire service's handling of such major stories as presidential trips, the Finch-Tregoff trial and Russian Premier Nikita Khrushchev's first visit to the U.S., which represented "a superb job in reporting by the AP," Alfred Friendly of The Washington Post (WTOP-AM-FM-TV Washington, WJXT [TV] Jacksonville, Fla.), said.

The APME will get the report when it meets Nov. 14-19 in Williamsburg, Va.

WOOK's new home - This modern plant is now under construction in northeast Washington, D.C., to house studios and offices of United Broadcasting Co.'s WOOK. Target date for occupancy is late November. General business offices and reception room will be on the first floor. The second floor will contain a large studio for group broadcasts and five additional auxiliary studios. At the side and rear of the building will be parking facilities for approximately 20 vehicles. The new building was designed by architect Eugene Delmar. Construction cost was estimated at $100,000. The station's new headquarters will be located at Riggs Road and First Place, N.E., Washington.
Facts are the fabric of sound decisions.

And it's a fact that there's gold in the Shreveport market... a major share of which is being spent by KSLA-TV viewers for products seen on the clean, clear picture KSLA-TV offers the Ark La Tex!

It's a further fact that more people watch and prefer KSLA-TV (and we have the ratings to prove it)!

Our prospectors, Harrington, Righter & Parsons, have ALL the facts and will help you "pan" your share of the gold from this rich and growing market!!
The real meaning of modern radio

What's the nature of radio today, and what kind of radio is in America's future?

Two radio professionals have given their answers to those (and many other) questions in a new book, Radio Station Management, published by Harper & Bros., New York ($6.50). The writers are J. Leonard Reinsch, executive director of the Cox Stations, and Elmo Ellis, manager of programming and production at Cox's WSB Atlanta. The new book is the second revised edition of a work that was first published 10 years ago.

Here are excerpts from two chapters, "New Concepts in Broadcasting" and "The Future of Radio."

Today's average listener tunes in more to a station than to a specific program. A housewife or a businessman rarely remembers the names of radio shows nowadays, but most people can recognize the sound of a favorite station even when dialing for it blindfolded.

What is good, modern radio?

Good radio today is bright and original and has a definite character. You should know a station the moment you hear it. If it properly combines good equipment, good production and programming, capable personnel, and a sincere broadcasting philosophy, the result is pleasant and rewarding for the listener.

Good radio today is flexible. When events develop anywhere at any time, radio swings to cover them, usually in brief, frequent reports.

Good radio is brought home with local voices, local on-the-spot coverage, and local angles.

Good radio is consistent and efficient. Features should come on the air like clockwork seven days a week, and should be geared to the needs and convenience of the listener.

Good radio is serious about its responsibilities and its opportunities for service.

Good radio is sensitive showmanship, every hour catering to the listener's finer instincts with imaginative touches, inspiring thoughts, stimulating ideas, humorous tidbits, and serious challenges.

Good radio is intimate, friendly, pleasing around the clock.

Good radio is smoothly produced with high quality equipment and an appreciation of the advantages accruing from fm, short-wave, hi-fi, and stereo.

Good radio is created with a respect for quality and sold with a respect for the rate card.

Good radio is strongly and honestly promoted on the air, in print, and anywhere and everywhere that it will convey a truthful forceful message.

Good radio is the reflected sound of a bright, alert, and happy staff, all of whom are truly neighbors and good citizens of the community.

You cannot accomplish all this overnight, but it can be done by any sized station in any town or city.

Vtr standards okayed by NAB advisory group

Standards for video tape leaders (monochrome) were endorsed for operational use at a Sept. 26 meeting of the NAB TV Advisory Committee. Wllard A. Michaels, WJBK-TV Detroit, is committee chairman.

The standards approved by the group are those of the Society of Motion Picture & Television Engineers. They have been submitted to the American Standards Assn. Technical details specify that audio and video information preceding and following recorded program material should specify minimum lengths of tape required for threading and wrap-around.

NAB's committee is responsible for development of operational standards for tape usage whereas the SMPTE group deals with purely technical standards. Other topics discussed at the Sept. 26 meeting were standard tape terminology; physical marking and identification; a form for identifying slates preceding program material and specifications for exact timing for taped commercials and the use of operable reels in trans-shipping.

Others attending the meeting were Virgii Duncan, WRAL-TV Raleigh, N.C.; Kenneth Tredwell, WBTV (TV) Charlotte, N.C.; Stokes Gresham, WISH-TV Indianapolis; Raymond J. Bowley, Westinghouse Broadcasting Co., and Charles E. Corcoran, NBC-TV. Representing NAB were Charles H. Tower, tv vice president; George W. Bartlett, assistant engineering manager and Dan W. Shields, assistant to the tv vice president.

Media reports

Teacher testing. The board of trustees of Ohio State U., Columbus, has approved a $25,500 appropriation for a new research study of tv as a teaching medium. A closed-circuit studio will be established on campus with classrooms equipped to receive the program. Certain students will be taught by television only. Some will have the benefit of the teacher's presence. Other students will be instructed by both methods. Tests will then be given all students and the effects which the teaching process has on them will be measured. The success of the experiment will determine the future course of tv instruction.

Editorial action. An editorial proposal broadcast by WERI Westerly, R. I., on Sept. 2 resulted in the adoption of a town ordinance.

When WERI learned at 1 a.m. that three teenagers died instantly as their sports car hit a utility pole in Westerly, Augustine L. Cavallaro, station manager, prepared an editorial calling for a ban on teenage after-dark joyriding in the town. By late afternoon the sta-
will amplify through their transmitters the basic interests of the community. They will be primarily local radio services, but they will be broadened and enriched by voices and sounds and ideas from all over the world, and even from outer space. There will be a growing demand for creative minds, who can explore these new dimensions with exciting programs. Radio will reawaken to the richness and wonder of the human voice, as it speaks words that are wise or witty or keyed to topics of the times. Radio will develop public interest in music of many types from many lands. And radio will inevitably be a leader in unshackling the minds of people everywhere as it combats ignorance, prejudice, and apathy.

And what of the formulas, the song rating systems, the frantic news reports, the rigidly regimented, assembly line concepts that have developed in broadcasting? Will they persist? If history is any indication, the fads and fashions of today will fade away before the new styles of tomorrow. Only that which is intrinsic to good radio will remain. Tight production, clever writing, intelligent planning, continuity of thought, and consistency of effort, are some of the basics that will be preserved.

Maturing Medium - Reams of propaganda to the contrary, there is still no real proof that radio must appeal to a low mentality, or that it should follow the dictates of its least capable listeners. Nor does any proof exist that radio is or should be a background sound. Radio has every right to be—and courageous broadcasters will see that it is—a dynamic voice serving active listeners and reputable advertisers.

The final evaluation of each station by the audience will not be on the basis of whether it is "modern" or "old-fashioned" but whether it is a "good" station or a "bad" one, whether it is a "leader" or merely a "follower" of the easy, expedient course.

Broadcasters who only scratch the surface of real service to the public will inevitably be washed away at some future date. If they plant no seeds, if they develop no roots, they cannot expect to live and flourish indefinitely in their own area.

Sincerity can never be replaced by cynicism, and trustworthiness will never give way to unreliability. More than ever before, the outstanding radio station of the future will be a first rate citizen, a loyal and dependable contributor to the progress of the community in which it operates.

**New addition** - As part of its expansion program, Felts/Dove/Dever/Cannon Inc., Seattle, has opened new offices in Portland, Ore., under the name Felts/Gunn Inc. James A. Gunn, formerly with Ziv-Tv Films and prior to that general manager of KVAN Vancouver, Wash., is vice president and general manager of the radio-tv representative firm's new office. The company has announced a new marketing division will be included in its expansion plans for Portland.

**IBEW at KMOX-TV** - A unit of production and maintenance employees at KMOX-TV St. Louis (CBS 680) has elected International Brotherhood of Electrical Workers as bargaining agent, according to a certification to National Labor Relations Board from the regional office. The union received the two valid votes cast, according to NLRB. In an election at VIP Radio Inc. (WFYI) Garden City, Long Is-

**Bi-nation scholarships** - XETV (TV) Tijuana-San Diego has established two annual scholarships—one to be awarded to a student north of the border, the other to a student south of the border, according to Julian M. Kaufman, vice president and general manager. He said XETV had provided a regular schedule of educational programs in addition to its other programs and that the scholarships were intended as a climax to this venture.

**Tall tower** - Work has been completed on the KFSV-TV Cape Girardeau, Mo., 1,676.55 foot tower, described as the tallest man-made structure on Earth. The nickel-alloy steel tower, in 30-foot triangular sections, stands on a concrete base supported by 18 guy cables. Other statistics: guy lines measure nearly 5 miles in length; over 234 million pounds of concrete and steel were used; and it takes 20 minutes to get from top to bottom by elevator. Construction time: 2½ months.

**UN Day plans** - Radio and tv will take an active role in celebration of United Nations Day Oct. 24. A committee of NAB and UN officials is planning for the occasion. Clair R. McCollough, Steinman Stations, chairman of the NAB Policy Committee, has pledged support of both member and non-member stations in the effort to emphasize the importance of the UN to world peace.

**Science fellowship** - WBKB (TV) Chicago, in cooperation with the local board of education, plans to offer a $1,000 fellowship award in conjunction with its new fall series Expedition Science. The science award will be presented next spring to a Chicago high school student who excels in scientific achievements, according to Sterling C. Quinlan, ABC vice president in charge of WBKB, and Benjamin C. Willis, general superintendent of the Chicago public school system. The programs, slated to debut Oct. 4 on a rotating third-week basis, are designed to document major scientific work done in the area and spotlight outstanding public school science students. They will be hosted by commentator Norma Ross and produced by Rose-McElroy Productions.

**Good works rewarded** - A certificate of commendation was awarded Morton J. Wagner, executive vice president of Bartell Broadcasting and general manager of KYA San Francisco, for outstanding service to the people of Osaka, Japan. The award was presented by San Francisco's mayor, George Christo-

**Olympic champion** - CBS was honored with an award from the National Assn. of Travel Organizations for its outstanding news coverage of the 1960 Winter Olympic Games at Squaw Valley, Calif. The award was one of seven presented at the association's 20th convention for significant services to travel.

**Aid to students** - KTSA San Antonio, Tex., has established two full scholarships at San Antonio's Trinity U. Proceeds from a record hop were used to establish the educational fund.

**UN Day plans** - Radio and tv will take an active role in celebration of United Nations Day Oct. 24. A committee of NAB and UN officials is planning for the occasion. Clair R. McCollough, Steinman Stations, chairman of the NAB Policy Committee, has pledged support of both member and non-member stations in the effort to emphasize the importance of the UN to world peace.

Member stations are personal displays, of the entire campaign, plays, shelf-talkers during NEMN establishing polio vaccine complete advertising package. Jim New England Merchandising Network Down Street national leaders. Dr. Crino of Merit Award for Meritorious Physician honored of specific will with WRFD ... studios. \( \text{FM} \) plans \( \text{Construction has started on WRFD-FM Worthington-Columbus, Ohio, on the site of the WRFD-AM studios. The new Peoples Broadcasting Corp. outlet will operate on 97.9 mc with an ERP of 186 kw. It is scheduled to go on the air Jan. 1, 1961. According to Peoples' President Herbert E. Evans, the fm station will make it possible for WRFD-AM-FM to broadcast full time with a 6 a.m. sign-on and a 1 a.m. sign-off. He further stated the new station will broadcast "an interesting and varied series of programs with some experimental ventures into certain types of specific programming."}

Physician honored \( \text{WROC-TV Rochester, N.Y., has presented its annual Merit Award for Meritorious Achievement to Dr. Michael J. Crino of Rochester. A 14-man award board each year selects an individual who has made a significant contribution to community enrichment. This board is comprised of business, social, religious and educational leaders. Dr. Crino was cited for his many years of service at the Lewis Street Center (social welfare settlement) and for his "monumental organizational and coordination job" in establishing polio vaccine clinics for children and young adults in 1959.}

Down-East network \( \text{Six New England radio stations have formed the New England Merchandising Network to offer food and drug advertisers a complete advertising package. Jim Keough, sales manager of WFEA Manchester, N.H., is managing director. NEMN offers the advertiser one and two weekends of aisle or dump displays, shelf-talkers during the course of the entire campaign, special promotions by wholesalers, bus cards, window displays, direct mailings to grocers, personal contacts by the network's representatives, etc. Sales offices are at WFEA and Foster & Creed, Boston. Member stations are WFEA; WGAN Portland, Me.; WCCM Lawrence; WHAV Haverhill; WFGM Fitchburg, all Massachusetts, and WWNH Rochester, N.H.}

Hearty congratulations \( \text{A radio station, a tv station and a newspaper were awarded mahogany hearts with sterling-silver inscribed plaques in appreciation of their public service effort for the Indiana Heart Assn. WOWO Fort Wayne, WFBBM-TV Indianapolis and the Hagerstown (Ind.) Exponent were the recipients.}

Newspaper buy \( \text{The Wichita Eagle, Wichita, Kan., has bought its rival the Wichita Beacon. The consideration was not announced. The Eagle owns KFH-AM-FM in the south central Kansas city. Marcellus Murdock, president of the Eagle, said the Beacon would continue to be published until details of a combined operation can be completed.}

Stone to direct \( \text{NAB Radio Code}

NAB's Radio Code, a three-decade document that recently was bolstered with enforcement provisions, will have its first administrator starting Nov. 1. Charles M. Stone, broadcaster with a quarter-century of experience, will direct code affairs. He reports to John F. Meagher, NAB radio vice president.

Under the new self-regulatory document Mr. Stone will work on a monitoring program to insure compliance by the code's member and non-member subscribers. Policy guidance is provided by the new nine-member Radio Code Board headed by Cliff Gill, president-general manager of KEZY Anaheim, Calif.

Mr. Stone, 45, is a native of Greenville, S.C. He has lived since 1936 in Jacksonville, Fia. He entered radio as an announcer at WJBY Gadsden, Ala., moving two years later to WMBR Jacksonville. During World War II he produced daily radio newscasts as a Navy Seabee in the Pacific. Returning to WMBR, he moved up to general sales manager for radio-tv. When the Washington Post Co. acquired the property he was elected vice president for tv administration, directing sales, programming, promotion and studio engineering. In 1959 he joined Mason, Dow & Stone, advertising agency, as a partner. He is a Broadcast Pioneer and a past president of the Jacksonville Ad Club.

AB-PT earnings up

Third-quarter earnings for American Broadcasting-Paramount Theatres, paced by television, are expected to mount well above last year, contributing to what is predicted as a record year, Leonard H. Goldenson, president of AB-PT, told the Boston Society of Security Analysis last week. He said ABC-TV had a 22% increase in gross time billings in 1959 and an 18% increase the first seven months of this year. Primary affiliates number 110, covering 88% of U.S. television homes. He claimed first place in share of the three-network audience in prime evening hours in 50 measured markets.

WSVL's target date

November is the target date for WSVL Shelbyville, Ind., to go on the air, according to R.D. Ingram, president. The station will operate on 1520 kc with 250 w. Studios and tower will be located 11/2 miles north of Shelbyville on Morristown Rd. H.T. Parrott is vice president and J.W. Pickett is secretary-treasurer of Shelby County Broadcasting Co., the licensee. It was announced that John A. Hartnett will be general manager and Benny Colyer will be chief engineer.

WICU-TV to go ABC

WICU-TV Erie, Pa., will switch its primary affiliation from NBC to ABC next May, it was announced last week. The station at present is a secondary affiliated of ABC, with primary NBC affiliation. This is the eighth station in four months to realign primary affiliation in favor of ABC-TV, Julius Barnathan, network vice president for affiliated stations, said. Edward Lamb, president of the station, saluted ABC-TV's "pattern of growth, of upsurge." WICU-TV is on ch. 12 in a two-station city. WSEE (TV) Erie is on ch. 35, with primary CBS affiliation, secondary ABC.

HARTFORD PAY TV PROBE IS SET

All members of FCC will hear RKO General application for test

The FCC last week decided to meet the Hartford pay tv issue head-on.

It ordered an en banc hearing starting Oct. 24 on the application of RKO General Inc. for permission to institute subscription television on a trial basis in Hartford, Conn.

At the same time the commission approved as parties to this proceeding RKO General’s Hartford Phonevision Co., the Connecticut Committee Against Pay Tv and five Hartford theatre owners. Hartford Phonevision Co. is the licensee of ch. 18 WHCT (TV) in that city, the station to be used in the toll tv test.

The five theatres are Stanley-Warner, Loew’s, Connecticut Theatres, Manchester Drive-In Theatre Corp. and Outdoor Theatres Corp.

In an order released last Thursday the commission set the issues and named the limitations on witnesses and cross examination.

The issues were framed to meet the obvious question: Does the Hartford application meet the requirements set out by the FCC in its Third Report on applying for a trial pay tv demonstration? (The Third Report was issued March 23, 1959.)

That the FCC is serious about keeping the hearing within bounds was evident in the limitations it placed upon witnesses and on cross examination. The hearing will be open only to those who have a legal right to participate, the order stated.

In carrying out this tough policy the commission turned down the request of the nationwide, theatre-sponsored Joint Committee Against Pay Tp to appear as a party. This committee has no rights in the Hartford proceeding, the FCC said, because the application involves only the Hartford area.

In setting the pay tv application for a hearing before the commission as a whole, the FCC obviously was impressed by the argument for this type of procedure advanced by RKO General in the interest of speed.

Opposed to this type of hearing were the two theatre owner committees. They had asked that the application be handled routinely, before an examiner, in a complete evidentiary hearing.

The commission held that it would be better for the application to be handled under an en banc procedure than under its normal practice. “Having responsibility for a decision in the matter,” the FCC stated, “we are persuaded that we can in this case derive more help and assistance from an opportunity to hear the parties directly than to rely on a record compiled in hearing in which the members of the commission could not directly participate.”

Pierson and Cohn Pleased = RKO General’s pleasure at the commission’s procedural action was expressed by its Washington counsel, W. Theodore Pierson. Stating he was “very pleased,” Mr. Pierson noted that by this action RKO General and the other parties can address themselves directly to the “decision makers.”

Marcus Cohn, Washington counsel for the Connecticut committee and theatre owners, expressed equal pleasure.

“For the first time since pay tv was proposed,” he said, “the seven commissioners, and Congress, will hear actual testimony and answers to cross-examination from people who are involved.” Mr. Cohn recalled that previous proceedings on toll tv were handled mostly through paper presentations or through lawyers for the protagonists or objectors.

The FCC’s attitude toward the whole question of pay tv was summed up in one paragraph in the order last week. This read as follows:

Pay tv = The “greatest revolution” in the entertainment industry since the invention of the motion picture camera. That’s what Ralph Edwards, m.c. of NBC-Tv’s This is Your Life (c above) foresees as pay tv’s effect, when and if it becomes a reality. And he predicts it will come “sooner than we think.” However, Mr. Edwards is optimistic. He says “tv as we know it will be stronger than ever.” The revolution will come as the result of the fact that in a single night, a motion picture producer could, through pay tv, get his entire production costs back, in addition to a “huge” profit, Mr. Edwards said. And, with the need for a different production every day, “the greatest flood of work and period of prosperity that the theatrical profession has ever known,” would result, he continued.

Sen. Warren G. Magnuson (D-Wash.) (l above) commented, “He’s going to be my first witness next year.” Washington’s Gov. Albert D. Rosellini is at right, above.

Televised the first time since pay tv was proposed,” he said, “the seven commissioners, and Congress, will hear actual testimony and answers to cross-examination from people who are involved.” Mr. Cohn recalled that previous proceedings on toll tv were handled mostly through paper presentations or through lawyers for the protagonists or objectors.

examination of the proposals for subscription television service, we desire to give the closest scrutiny to any possibility that any subscription television authorization might have this or any other substantially adverse effect upon the public interest.

The commission emphasized that it was not attempting to cover the broader question of subscription tv on a national basis. This, it noted, will be the subject of a future hearing.

**First Real Application**
One of the reasons why it is setting up the procedure the way it is, the FCC said, is because "for the first time [there is] available for our consideration specific details for a proposed trial operation including the text of agreements which set out mutual undertakings and understanding among all the major participants . . . ."

The application for a pay tv test in Hartford was filed last June by RKO General Inc. In connection with Zenith Radio Corp., Chicago radio-tv manufacturer which has plumped for subscription tv virtually since the beginning of commercial television in 1945, RKO General proposed to run a three-year test of toll tv. It offered to spend up to $10 million in presenting "box office attractions" to the viewing public for a fee, using the Zenith Phonevision system of on-the-air pay tv. These programs would supplement regular programming. RKO General said, not supplant it. WHTV would be operated as a regular tv station, except for a few hours a day when pay tv would be presented.

RKO General bought the Hartford uhf station last June for this very purpose. It paid $150,000 plus $242,200 for a 10 year lease of the physical property. The transfer also included an agreement to buy the property after four years for $570,000.

The FCC began its consideration of subscription tv in 1952 when Zenith filed a petition asking that pay tv be authorized. A three-year study followed. This culminated in a rule-making notice in 1955, which brought down upon the FCC the largest deluge of comments in its history. In 1957 the commission asked for further comments on the advisability of authorizing limited trial operation. Late that year it adopted the idea of limited tests and invited applications.

An outcry against pay tv, particularly in Congress, caused the FCC in February 1958 to announce it would withhold action on any application (although none was filed) until after Congress had considered various bills then pending. In March 1959 the commission issued its Third Report setting out the criteria for pay tv tests and inviting applications.

There had been speculation all through the summer and earlier in September that the FCC was considering holding a general inquiry. This was the plan, it was understood, when the FCC was not sure that it could properly hold an *en banc* hearing on the application without raising questions of legal rights to other parties. In issuing last week's order, the commission presumably felt the procedure would stand up in court.

**Five Day Hearing**
The FCC hearing will start Oct. 24 and will run for five consecutive days, if necessary.

Those wishing to participate must file a written request with the commission by Oct. 10. They must tell the commission (1) on whose behalf they intend to appear, (2) the "specific" interest of the person, organization or other group to be represented, (3) how their participation will help the FCC to evaluate the Hartford Phonevision application, and (4) the amount of time exclusive of cross-examination requested for the appearance.

The FCC said that it would announce the list of witnesses as soon after Oct. 10 as possible.

Witnesses will be cross-examined by commissioners, commission counsel and counsel for those who have been approved for appearances. Oral summations not exceeding 30 minutes by commission counsel and by private counsel will be permitted. Both commission counsel and other lawyers will be allowed to file proposed findings of fact and conclusions, briefs and memoranda of law, no later than Dec. 1.

Where individuals have something to contribute, the FCC said, but do not meet the qualifications for standing, brief appearances, not exceeding 10 minutes will be arranged.

**Profile of a FCC lawyer**

Louis C. Stephens, named as FCC counsel in what many believe will be pyrotechnic hearings on subscription tv, is an earnest, perceptive and hard working FCC lawyer who has handled the legal end of many tricky broadcast problems in the last few years.

He was the principal Broadcast Bureau adviser on legislative matters to both FCC Chairman George C. McConnaughey and John C. Doerler. He was the draftsman of proposed and final rules on such significant proceedings as the clear channel case, all three of the pay tv documents, and the orders establishing uhf boosters and repeaters, as well as the commission's position on catv.

In his six years at the FCC he has had a dual career. He was legal assistant to two commissioners, the late Frieda Hennock and John S. Cross. He also has been an attorney in the Broadcast Bureau's rules and standards division. He is now the chief attorney in that division, with the title of assistant chief. This is the office that writes regulations and engineering standards for broadcasting.

Lou Stephens was born 46 years ago in New York City. He was graduated from Roanoke College, Salem, Va., received a law degree from George Washington U. in 1941. He was a captain in the Air Force in World War II, serving with the Air Transport Command.

Following the end of the war, Mr. Stephens served the United Nations Relief Administration and the International Refugee Organization in various capacity in London, Paris and Geneva. He returned to the United States in December, 1952 and was on the legal staff of the Office of Price Administration for a year until he joined the FCC in July 1954.

BROADCASTING, October 3, 1960
PROS AND CONS ON TV MILEAGE

ABC for, AMST against FCC proposal to trim separation rules for drop-ins

Strong reasons supporting and opposing the FCC’s proposals to issue dispensations from heretofore rigidly enforced mileage proposals on tv channel allocations were filed last week.

Deadline for comments to the commission’s rule-making notice, issued last January, to modify existing minimum mileage separations in special cases to permit the assignment of a vhf channel, was last Friday.

As of Thursday a handful of comments were filed with the bulk due on Friday.

Favoring the commission idea were ABC, Storer Broadcasting Co. and a number of non-television entities which urged specific assignments in their localities.

Strongly opposing the proposals were major broadcasters lead by the Assn. of Maximum Service Telecasters. In this group was Westinghouse Broadcasting Co.

Highlights of early comments and some to be officially filed Friday were as follows:

The commission’s proposals found strong favor with the American Broadcasting Company. In comments stating that ABC has “long urged” the commission to adopt interim policies which would permit the establishment of at least three competitive services in each of the first 100 to 125 tv markets, the network noted that an interim policy must be tailored to accomplish “interim objectives only” and that waivers of mileage separations must be limited to those situations where they are essential to fulfill immediate needs.

To protect existing services, ABC recommended adoption of the FCC’s proposal that short-spaced stations be required to utilize directional antennas so that the effect upon existing stations will be no greater than that from stations meeting all separation requirements.

ABC further stated that the commission’s criteria for short separations are generally sound and that the network is in accord with proposed new engineering rules and standards.

To illustrate what could be accomplished by the application of the interim allocations policy, ABC filed summary descriptions of specific allocation recommendations for 14 of the major markets in which a third channel “is essential to competitive network operation.” These markets included Grand Rapids-Kalamazoo, Mich.; Louisville, Ky.; Syracuse, N.Y.-Johnstown-Altoona, Pa.; Rochester, N.Y.; Birmingham, Ala.; Raleigh-Durham, N.C.; Charlotte, N.C.; Providence, R.I.; Jacksonville, Fla.; Wheeling, W.Va.; Steubenville, Ohio; Baton Rouge, La.; Knoxville, Tenn., and Dayton, Ohio.

AMST Agin’! AMST opposed the whole concept of drop-ins at less than present minimum mileage separations on a number of grounds:

- Such a move would cause loss or degraded service to a large rural and small town audience now receiving good tv service, without any provision to replace it.

- There is no need to upset the present engineering standards to force extra vhf channels into areas since the great bulk of the population of the United States is receiving tv service—in fact, 90% or more of all tv homes can receive at least three tv stations.

- Even under present regulations, most tv stations are actually farther apart than the minimum requires. AMST showed, in a selected sampling of 12 representative market areas, covering 166 stations, that all but three exceed the minimum mileage separations.

In a chart on all ch. 8 assignments in Zone I, where the minimum separation is 170 miles, all stations but two exceed this distance—some having as much as 300 or more miles co-channel.

Should the FCC feel impelled to institute vhf drop-ins, AMST said, it should not open a general land rush, but should on its own specify what cities had the “very greatest need” for an extra vhf channel. The FCC, AMST said, should call for recommendations for drop-ins with required supporting data to indicate the need and hard engineering factors. It should then determine just which markets should receive an additional vhf, and refuse to consider any further suggestions.

Unless this is done, AMST said, the commission will be faced with a snowballing demand for exemptions from the mileage criteria which could end up by destroying tv service as it is known today.

The AMST filing, a 92-page printed document plus as many pages of exhibits, attacked ABC's championship of vhf drop-ins by asserting that the network has claimed as long ago as March 1959 that it had live coverage of 90% of U.S. television homes and that in that year ABC-TV President Oliver Treyz stated that a third vhf in seven cities would take care of the network’s problems.

Storer Broadcasting Co. asked the FCC to drop in one or two vhf assign-

In Roanoke in ’60 the Selling Signal is SEVEN...

Wig-wagging will get you nowhere, but your selling message on WDBJ-TV will go into over 400,000 homes in Virginia, N. Carolina and W. Va. . . . a rich and growing Television Market of nearly 2,000,000 people.

You can sell like sixty on seven. In Roanoke, seven is WDBJ-TV . . . best in sight, day or night, for higher ratings at lower cost. Your only station in this area offering CBS network shows — plus superior local programming, plus hard-hitting merchandising assistance.

ments in 25 of the top 100 markets—using 115-mile separations for co-channels and keeping the present 60-mile adjacent channel separations [At Deadline, Sept. 26].

Storer said its plan would put 3 vhfs in 86 markets, 2 vhfs in 4 cities, 1 vhf in 4 cities and 6 cities would have 3 or more uhfs.

Storer asked the 115-mile separation minimum to prohibit “further derogation” of the tv system by other requests and suggested a two-year “moratorium” (freeze) on further short-spacing requests, after finalization of the present proposal, to “evaluate” operations with directional antennas in view of the scant experience with directionals. Storer would require drop-in stations to furnish a series of proof-of-performance reports to protected outlets.

The Storer plan asks assignment changes in seven geographical areas. The plan would add 1 vhf in 21 markets and 2 in four cities.

The Storer proposal would add a third vhf to such markets as Hartford, Kalamazoo-Grand Rapids, Birmingham, Charlotte, Louisville, Dayton. Providence, Syracuse, Toledo and Rochester and to 11 other markets. It would add two vhfs to Binghamton, Austin, Tex., Topeka and Macon, Ga., all one-vhf cities. It would overlook Raleigh, N.C., Knoxville, Tenn., Columbus, Ga., and Augusta, Ga., two-vhf cities.

Long Range View Comments filed by Westinghouse Broadcasting Co. stated that any “compromise” of existing standards, even on an interim basis, must be approached with consideration for the long-range public interest. The firm noted that in setting up the allocation table and all subsequent adjustments, the commission used rulemaking proceedings which set forth the exact changes proposed. In this instance, however, the commission sets out only general standards to be applied to future changes in the allocation table.

WBC believes that the public interest would best be served by following the old procedures and it urged the commission to issue specific rule-making proposals setting forth the exact location and nature of “all proposed changes” in the allocation table following a specific set of limitations. WBC also suggested that the commission’s proposals concerning service fields be adopted, but opposed the proposals concerning adjacent channel separation and the use of tv DA systems.

WXIX-TV (ch. 18) Milwaukee, Wis., did not like the proposal, but recognized the fact such a policy might well become part of the commission’s rules. In light of this, the station suggested that the commission give consideration to the possibility of waiving...
Pay tv's horoscope

WHCT (TV) Hartford, Conn., will begin subscription tv operations within six months after the FCC authorizes the test. This was the prediction of Ted Leitzell, public relations director of Zenith Radio Corp., speaking to the Hartford Rotary Club last Monday (see page 74).

The ch. 18 station, Mr. Leitzell said, will begin transmitting Phonevision programs when 2,000 homes have decoders installed. "We believe that 10 years from now, the whole nation will look back on the beginning of subscription tv here in Hartford as the beginning of an entertainment revolution in America—the kind of revolution that America is famous for—bringing something new and better to more people at lower cost . . .," Mr. Leitzell said.

Movie operators who are opposing pay tv, the Zenith spokesman said, are motivated by fear of competition.

Zenith is allied with RKO General Inc., owner of WHCT, in the pay tv trial. RKO General plans to spend up to $10 million for the three-year demonstration, using Zenith's Phonevision system of toll tv.

the present "duopoly" rules in critical markets and assigning short-spaced vhf channels to existing uhf licensees who would telecast on both uhf and vhf channels until such time as a longer range allocation plan is put into effect. This, in conjunction with pending legislation concerning the "essential" all-channel receivers, would ensure both the survival of uhf in intermixed markets and the perpetuation of uhf tv until its broadcast potential is developed, the station stated.

WXIX-TV also noted, however, that no interim policy can be put into effect, at present, "without prejudicing the direction of the long-range determination."

WVUE (TV) New Orleans asked for waiver of minimum mileage separation requirements so ch. 12, assigned to the New Orleans area, may be granted nearer to the city than the present assignment requirements. Under the present minimum separations, a ch. 12 station would have to be constructed at some distance from the city and/or require a low antenna or power to protect co-channel WJTV (TV) Jackson, Miss., or satisfy aviation hazard requirements. WVUE (TV) proposed a station to protect WJTV at less than minimum separation (162 miles), using either reduced power or directional antenna.

Other Proposals • Charlotte Telecasters Inc. asked drop-in of ch. 11 at Charlotte, N.C., and proposed to apply for it and use a directional antenna to protect co-channel stations WJHL-TV Johnson City, Tenn. (111 miles), and WTVD (TV) Durham, N.C. (128 miles). The firm's stockholders are local businessmen incorporated to ask for the drop-in assignment.

Community First Corp. asked for drop-in of ch. 10 at Jacksonville, Fla., for which it would apply. The firm would use a directional antenna to protect co-channel stations WALB-TV Albany, Ga. (143 miles) and a proposed television station at Largo, Fla. (Tampa-St. Petersburg) (164 miles). Community First's stockholders are local businessmen.

MIA Enterprises Inc., licensee of KWBE Beatrice, Neb., filed comments in favor of the commission's proposals. They further asked that ch. 4 be assigned to Beatrice, a city with a uhf allocation that has not been applied for and no vhf reservation at all.

Buckeye Broadcasting Corp. proposed a drop-in assignment of ch. 11 at Dayton, Ohio, and said a station could be built with directional antenna to protect co-channel stations WHAS-TV Louisville (134 miles) and WTOL-TV Toledo (138 miles).

West Virginia-Ohio Broadcasting Co. proposed a ch. 3 drop-in at Wheeling-Stebenville.

Kentuckiana Broadcasting Corp. suggested that ch. 6 be dropped-in to Louisville, Ky.

Both the last two companies are composed of local businessmen planning to apply if their recommendations are accepted.

FCC eyes spots; stations must explain

The FCC's "get tough" policy on programming and spot announcements is getting tougher. Two stations, KORD Pasco, Wash., and WAVZ New Haven, Conn., were advised by the commission last week that their applications for license renewal would have to go to hearings because of promises-vs-performance differences on just such issues.

KORD was informed that the programming promises made in its application for a construction permit varied from the actual performance as stated in the station's application for license renewal. The commission noted that KORD had originally said that it would devote time to agricultural, educational,
ALL NEW FROM AMPEX

In sound quality, in operating principle and in features, this is the compact professional recorder that will set the standards for all others. New in every detail and Ampex throughout, the PR-10 is all you expect of the name. It is a worthy companion of the big Ampex recorders that make the master tapes of nearly all the recorded performances sold in the world today. To a heritage of excellence, the PR-10 adds the completely new electrodynamic frictionless tape handling system that makes possible studio-quality performance in a compact machine. Your dealer has it. See it operate soon.

FEATURES AND ESSENTIAL DATA

PR-10: stereo/monophonic model records and plays back stereophonic, monophonic, sound-on-sound, cue-track, selective track and mixed or unmixed two-microphone sound. PR-10-1: monophonic available full-track or half-track. Pushbutton controls of professional relay/solenoid type. Full remote control provisions and accessory remote unit. New automatic 2-second threading accessory, optional. All new compact electronics. Professional monitoring includes A-B switches, VU meters, phone jacks and output circuits. Separate erase, record and play heads. 4-track stereo playback optional on open fourth head position. Two speeds with options: 15 and 7½ ips or 3½ and 7½ ips. Hysteresis synchronous motor. Electrodynamic tape handling for lowest flutter ever in a portable/compact recorder. Plug-in modules for flexibility of equalization and input characteristics. Portable or rack mount. Dimensions for both models: 19" w by 14" h permitting easy replacement of many older rack recorders.

Complete descriptive literature available from Ampex. Write Dept. B-1.

FCC's option for short-term licensing

The FCC put some power behind the punch last week when it put into effect an amendment to the rules which gives it the authority to issue licenses to radio or TV stations for less than the normal three-year period. Under the new ruling, short-term licenses can be issued when it is "in the public interest."

The amendment to the rules is the result of a rulemaking study begun by the commission in March (Broadcasting, March 7), which followed exposure of rigged quiz shows and payola. The commission at that time said that the rule "would not only have a bettering effect on the performance of the station involved but would also have a beneficial influence on broadcast stations generally." This sentiment was echoed last week when the amendment was adopted.

The commission noted that the new rule will make it possible for that body to make "occasional" use of shorter-term licenses in the case of any station which "requires observation during a shorter period of operation before being considered for a normal-term license."

The rule conforms to an amendment to the Communications Act signed by President Eisenhower Sept. 13.

Commissioners Rosel Hyde and T.A.M. Craven dissented to last week's action.

talk and miscellaneous programming and would give 6% of its air time to local live offerings. It also had proposed, according to the commission, a limit of 700 commercial and 84 non-commercial spot announcements weekly.

Basing its judgement on the composite week reported in the renewal application, the commission told the station that it appeared that only minimal amounts of religious and agricultural programming were broadcast, that no time was devoted to educational or discussion programs and that no local live shows were carried. Further, the commission noted, the composite-week log showed that the station carried 1,631 commercial spot announcements and 41 non-commercial spots.

Also New Haven - Commercial spot announcements were also a part of the commission's consideration to designate for hearing the renewal application of WAVZ New Haven, Conn.

The station, which operates on 1300 kc with 1 kw fulltime power, was told by the commission that in a previous application for license renewal the station proposed broadcasting 1,052 commercial spot announcements per week. However, the commission's letter noted that WAVZ's 1960 application showed that 2,369 such announcements were used during the composite week. This, said the FCC, showed cause for a hearing.

In the case of both stations, Commissioners Rosel Hyde, T.A.M. Craven and Charles King dissented in the need for the hearing procedure.

FCC grants extension in Boston ch. 5 case

The FCC last week gave Boston ch. 5 applicants a two-week extension, to Oct. 12, on the deadline for filing briefs in advance of the commission's reconsideration of its 1957 grant to WHDH Inc., that city.

The postponement was granted by Commissioner John S. Cross on a motion by Greater Boston Television Corp. The original deadline was Sept. 27.

Last week, also, a second Boston ch. 5 applicant asked that the FCC dismiss

one of the original applicants because it is no longer in existence. Massachusetts Bay Telecasters Inc. filed a petition with the commission to dismiss the application of Allen B. DuMont Labs. on the ground DuMont Labs. is now defunct. The Massachusetts Bay pleading said DuMont Labs. went out of business in 1955 when its broadcast properties were assigned to Paramount Pictures Inc., and then to Metropolitan Broadcasting Corp. The set manufacturing division of DuMont was acquired last July by Emerson Radio & Phonograph Co. and the remaining assets by Fairchild Camera & Instrument Corp., the pleading stated.

If the FCC agrees to this deletion, it would leave only these three applicants in the race for the Boston vhf channel. In its July 14 decision the FCC found that principals of the Boston Herald-Traveler (WHDH-TV) and Massachusetts Bay Telecasters had engaged in off-the-record talks with then FCC Chairman George C. McConnaughey and others.

The Boston Herald-Traveler is fighting this decision before the FCC and in the U. S. Court of Appeals. The FCC has denied its request for a stay of its order, but a petition for rehearing is still pending. In its appeal to the circuit court in Washington, the newspaper charged that the FCC erred in voiding its grant; it stated that the commission could only recommend this action to the court.

Earlier in the week the FCC's general counsel informed the commission that it planned to take no further part in the Boston ch. 5 case unless specifically ordered to do so.

**Two more payola orders from FTC**

The Federal Trade Commission approved two more payola consent orders last week. This brings to 71 the total number of consent orders issued under the unfair practices provision of the FTC Act. One final order was issued in default.

Agreeing to the latest order were Sue Records Inc. and Apollo Records, both New York. The orders require that any payment for playing a record over the air be disclosed to listeners.

In issuing the orders, the FTC affirmed earlier initial decisions by hearing examiners against the two firms which asserted that the companies had paid for exposure of their records without these payments being made public.

Payola complaints issued by the FTC now number 102. The high geared campaign against payola in radio and tv has about come to an end with a commission warning that a renewal of the practice would bring a new FTC drive.

**Philadelphia civil suit charges payola**

A civil suit charging payola by 11 record distributors and 58 disc jockeys was filed last week by Philadelphia District Attorney Victor H. Blanc in the city's common pleas court. The suit charges violation of the state's commercial bribery law, and resulted from an eight month investigation.

Consent decrees were accepted by all of the distributors and more than a dozen disc jockeys. The consent judgments do not admit guilt.

More than 35 disc jockeys of Philadelphia stations who have moved from the city were served with registered mail complaints, Mr. Blanc said last week. Some have already responded, agreeing to sign consent judgments, he stated.

Common Pleas Judge David Ullman set Oct. 10 as the hearing date.

**Judge Stern resigns FCC special post**

The resignation of Judge Horace Stern, special FCC examiner, has been accepted by Chairman Frederick W. Ford "with considerable personal re-

Ford, FCC chairman, and FCC Commissioners Robert T. Bartley, Robert E. Lee and T.A.M. Craven. Horn antenna in back- ground was used to receive the picture, which has been in orbit since August 12.

The grant of Miami ch. 10 to National Airlines.

The criminal charges were brought following disclosure that Mr. White- side had interceded with Mr. Mack in the 1957 Miami ch. 10 television case. This was publicized in the Harris Legislative Oversight Committee hearings in 1958, following which Mr. Mack resigned. A trial last year resulted in a hung jury. Federal Judge Alexander Holtzoff is to preside.

Government briefs
One less for Reno • The Nevada Broadcasters Fund Inc., applicant for ch. 4 Reno, Nev., has asked the FCC to dismiss its application. The firm, headed by Alex Gold, president, stated that it has been unable to find a suitable site in Reno to put it on a comparable competitive basis with the five other applicants for ch. 4.

V.I. merger • The proposed merger of two firms seeking ch. 8 in Christiansted, St. Croix, V.I., has been announced. Radio American West Indies Inc., a firm headed by Hazel M. Higdon, and Supreme Broadcasting Co. of Puerto Rico, Robert Moss, president, proposed the merger. They have petitioned the FCC to dismiss the application of Radio American and approve the consolidation. A new firm resulting from the move, of which Supreme will own 60% and Radio American 40%, will apply for the available channel if approval is granted. Supreme is the licensee of WORA-TV Mayaguez, P.R. and owns 40% of WVUE (TV) New Orleans, La. Radio American owns WIVI in Christiansted.

Channel change • A petition to switch tv channels in Texas has been filed with the FCC by the Texas-Longhorn Broadcasting Corp. Filed by John R. Powley, president, the petition asked that the tv table of assignments be changed by deleting ch. 70 from Austin and adding 67; deleting 52 from Brenham and adding 70; and deleting 53 from San Marcos and adding 80. Mr. Powley also asked that the educational assignment for Austin be changed from ch. 70 to ch. 18. The petitioner claimed that the changes meet all of the mileage separation requirements and that he would apply for ch. 67 in Austin.

Union protest out • A protest against the license renewal of WGAL Lan- caster, Pa., filed by the United Electri- cal, Radio and Machine Workers of America, has been dismissed by the FCC. The union was advised that a re- view of WGAL’s operations during the past license period indicated that the station’s treatment of controversial issues had been consistent with commission policy. The union had complained that the stations refused to carry its an- nouncements during a campaign to rep- resent workers at the RCA plant in Lancaster, but did carry announcements of a rival union. The commission noted that it could not, in this instance, interfere in the station’s business policy.

Identity sufficient • The FCC has told WLOS-TV that is can identify itself as Asheville, N.C., but cannot add Green- ville-Spartanburg, S.C., to its call sign. The commission informed the station that there is insufficient community of interests with the South Carolina cities to allow the additional 1D and that the ch. 13 facility had not shown any undue hardship resulting from denial of its request. The commission had withdrawn previous approval for the station to identify itself with the three cities in March, but took a second look at the situation after WLOS-TV appealed for reconsideration.

Uncle Sam’s take • Internal revenue collections (excise) for radio and tv sets, phonographs and components totaled $169.4 million for the 1960 fiscal year ended June 30 compared to $152.6 million in the previous fiscal year, ac- cording to Internal Revenue Service.
Power Savings of 15,000 KW Hours Yearly...
with New 5 KW High-Performance AM Transmitter!

NEW BTA-5T

This new transmitter incorporates the only significant development in Class “C” power amplifier design in 20 years. A new circuit provides a plate efficiency of approximately 90%.

With continuous operation, savings of approximately 15,000 kilowatt hours per year are realized. Only 1 PA tube is needed.

Other improvements, including all silicon rectifiers and improved protection circuits, enhance performance and extend operating life.

Functional styling provides a choice of red or grey doors to suit station decor and add a harmonious note.

Your RCA Broadcast Representative will gladly provide further particulars about this new transmitter. Or write to RCA, Dept. M-22, Building 15-1, Camden, N.J. In Canada: RCA VICTOR Company Limited, Montreal.

Some of the fine features of the NEW BTA-5T

1. FEWER TUBES—a total of twelve—save on replacement cost. Only one 5762 PA Tube for lower operating cost.
2. QUIET-OPERATING BLOWER—Very low plate dissipation in the output stages reduces heat within the transmitter, and also permits use of a slow-speed blower for quiet operation.
3. SILICON RECTIFIERS—All silicon hermetically sealed rectifiers of proven reliability are ideal for remote control.
4. OVERLOAD PROTECTION—Complete overload protection is provided for all circuits. All line breakers carry instantaneous over-current protection, while main breakers retain instantaneous and thermal protection. Remaining circuits are protected by fast-acting overload relays with provision for external indicators.
5. REMOTE CONTROL PROVISION—Built-in provision is made for remote control and conversion to Conelrad, power cut-back and a carrier off monitor.
6. FCC OK—Meets all new FCC Spurious Emission requirements.
7. SPACE SAVING—New style cabinets offer excellent accessibility to all components and allow a great saving in floor space.
EVEN MORE HEARINGS IN '61

Alabamans hear Washingtonians discuss issues to be resolved by Congress, FCC

The Senate and House commerce committees both are honor bound to hold hearings on FCC licensing and regulation of the networks next year, the Alabama Broadcasters Assn. was told last week by Chairman Oren Harris (D-Ark.) of the House Commerce Committee.

Speaking Thursday at ABA's fall meeting in Tuscaloosa, Rep. Harris said his committee probably will hold hearings also on daytime broadcasters' requests for longer hours and possibly on pay television. Rep. Harris, who also is head of the committee's Legislative Oversight and Communications & Power subcommittees, told the association that legislation to control the spectrum "becomes more urgent all the time."

Broadcasters also were warned this year's suspension of Sec. 315 in the presidential campaign is only an experiment and they shouldn't assume Congress intends to make the suspension permanent. Neither does it relieve broadcasters of the requirement that they operate in the public interest, Rep. Harris said.

This means, he said, "that they must be fair in their presentations of public issues." It does not permit them to be partisan in their political presentations on radio and television programs. The Sec. 315 suspension this year is limited to equal time provisions and applies only to presidential and vice presidential candidates.

He said he hopes the newly-enacted legislation on payola, quiz-rigging and other subjects will prevent any "wholesale recurrences of these manifest evils which have severely affected some segments of the broadcasting industry."

The new law, he said, modifies the FCC interpretation last spring requiring Sec. 317 announcements in the case of free phonograph records. It also specifically covers payola practices involving persons other than the licensee, he said.

The law also gets at producers of programs and others where quiz-rigging frauds are concerned, Rep. Harris said, with the result that broadcast licensees who air such programs in good faith will be exonerated, instead of being the "victims of large-scale, well-organized frauds perpetrated by some of the producers of these deceptive programs."

Last Recourse Only • Rep. Harris said he hopes the FCC will use its new power to impose forfeitures only when "absolutely necessary." He said he expects the overwhelming majority of broadcasters not only will comply with the law and FCC rules in the future but also will follow "diligently" the NAB radio and TV codes.

"While there are always a few recalcitrant members in any industry who do not mind giving the whole industry a black eye, the majority certainly does not require the threat of forfeitures to assure operation in the public interest," he said.

The Arkansans said he's glad no Alabama broadcasters have been involved in any of the ex parte contact cases which have placed both the broadcast industry and the FCC "at least temporarily—under a cloud."

Interest in Code Subscribers • John F. Meagher, NAB radio vice president, told the Alabama group he is convinced the FCC will ask NAB for a list of stations subscribing to the Radio Code. He recalled an FCC request at last winter's program hearings was dropped when NAB explained it was planning to enlarge its code to admit non-member stations.

One out of four radio stations—a total of 823—subscribes to the code, which now has enforcement provisions and a set of administrative fees, according to Mr. Meagher.

The list of subscribers, he said, "is far short of what is needed to convince Congress and the FCC and the Federal Trade Commission and the Attorney General and all other regulatory authorities, to say nothing of the public, to persuade these people that radio broadcasters are sufficiently mature, and sincere, and competent and determined to be entrusted with self-regulation."

Warren E. Baker, of the law firm of Chadbourne, Parke, Whiteside & Wolff, advised broadcasters not to carry public service merely for the sake of developing favorable log statistics but rather because a service to the public needs to be done. Mr. Baker is a former FCC general counsel.

Stations frequently get larger audiences by giving people interesting programs than by following the safe course of neutral programming, he said. "I believe you have nothing to fear from a closer Commission look at your programs if you take advantage of your freedom to serve community needs," he suggested.

Mr. Baker reviewed recent economic and regulatory developments in radio and television as well as legislative actions at the last session of Congress.
How quickly the misuse of money—when found out—sparks our moral indignation into fires of investigation!

Yet how slow we are to see that the misuse of man-hours is as morally wrong and harmful as ever the misuse of money.

Padding the hours with a man’s mere presence on the job, without using either his mind or his muscles, can be morally crippling to him. In fact, the deliberate waste of a man’s power to produce and stand in the dignity of a living fully earned, is waste of a man.

Whoever causes such waste—for another or to himself—would be responsible for damaging not only the person, but would be contributing to weakening the nation’s economic strength.

In man’s striving to accumulate wealth, the elimination of waste is a vital tool. The elimination of inefficiency through wear and loss is another. Republic Steel has many developments that make materials and products work better, last longer.

One of these is a nut. This special nut is Republic’s NYLOK®. It has a little nylon plug imbedded in it. The continuous pressure of this resilient nylon pellet wedges metal to metal tightly, forming a unique locking action, resistant to vibration, age, or moisture.

Imagine the time—and tempers—saved by this special fastener when used in power mowers, for example. Here vibration is terrific. It takes a lot of holding power to keep the engine, wheels, and other parts of your power mower firmly in place. Small as they are, Republic NYLOK Nuts by the millions do a mighty job wherever fasteners have to hold tight. NYLOK Nuts are but one of 28,000 types and sizes of standard and special fasteners made by Republic’s Bolt and Nut Division.
Would be backbone of around-the-world tv

The future satellite communications system, capable of providing around-the-world tv signals as well as voice, teletypewriter and data processing channels, will consist of stationary active satellites, 22,300 miles above the equator.

This was the consensus of scientists who addressed the communications meeting at the IRE's symposium on space communications and telemetry in Washington.

The most emphatic prediction was made by Dr. Samuel G. Lutz, Hughes Research Labs., Malibu, Calif.

His prognostications were backed up by Army Signal Corps scientists from Fort Monmouth Labs. They were Donald Jacoby, George N. Krassner and James E. Bartow.

Dr. Lutz emphasized that the estimates of the need for overseas communication channels envisages 100 mc of bandwidth by 1980 and 1,600 mc of bandwidth by the turn of the century. He estimated that present cables and short wave radio amount to 1 mc of bandwidth.

The only place this will come, he asserted, is through space communication systems.

Three Satellites • A stationary satellite system around the equator will be the backbone, Dr. Lutz said. This will require three satellites. In order to cover polar regions, Dr. Lutz called for a supplementary system of low-flying active satellites.

When a satellite is 22,300 miles above the earth, Dr. Lutz pointed out, it is "stationary" in relation to a fixed point on earth. Such a satellite can usefully "see" a portion of the earth covering a 71.5° arc.

Dr. Lutz said that because of this great height, and fairly narrow transmission beams, it should be possible to repeat the frequencies used on earth for ground-ground communications.

The system could have a capability of 10,000 mc, he estimated.

The Signal Corps scientists discussed the parameters and requirements for a three step development which would finally result in a satellite capable of transmitting six, 100-mc channels with a power output of 5 w per channel in the 4400-5000 mc range and with ground stations capable of transmitting equivalent bandwidths, using 10 kw transmitters and 60-ft. antennas.

RCA package ordered by KSTP-AM-TV

An RCA "package" of its most advanced tv broadcast equipment valued at $751,000, has been ordered for the expanding plant of KSTP-AM-TV Minneapolis (BROADCASTING, June 20).

Units in the RCA package include a station break automation system, tv tape recorders, complete color facilities, transistorized switching equipment and a mobile studio capable of handling both color or black-and-white remote programs. RCA engineers have been working with the KSTP-AM-TV engineering staff in drawing up plans for an integrated layout which features centralization of all equipment in one area. "Equipment central" will be a 60 by 80-foot room in a new addition, now under construction, to the present station building. The addition also will house a 40 by 60-foot color studio. A $300,000 building improvement plan provides for modernization of studios and special studio facilities to stage closed circuit tv presentations for audiences up to 300 persons. The station also plans to use new RCA TK-12 monochrome cameras, with 4½-inch image orthicon pickup tubes.

Automatic logger shown IRE group

An automatic program logger which, according to its developer, can save $10,000 in salaries was announced at the 10th annual broadcast symposium in Washington Sept. 23, sponsored by Institute of Radio Engineers Professional Group on Broadcasting.

The device for automatic keeping of program logs was developed by Robert M. Brockway and Robert Flanders, WFBM Indianapolis, Ind., and was put into use at WFBM-FM where a salary of $10,000 is paid for the sole purpose of keeping program logs. WFBM-FM operates 18 hours daily with pre-recorded programs, with live news and weather reports supplied by parent WFBM personnel.

The system incorporates the "rough log" made up when programs and announcements are being recorded. As programs are broadcast, a sub-audible tone on both announcement and music tapes activates an electrical time clock which registers time and transport being used.

Comparison of the time register with the rough log identifying announcements and programs can then be accomplished by regular clerical help in the billing office.

A request for permission to use this system has been made to the FCC, the Indianapolis operators said, but the commission has not yet acted. Present FCC rules require program log notations to be made by someone physically present when program changes occur.

Radio engineers also heard technical presentations on tv station automation by Floyd R. McNichol, RCA; Adrian B. Etlinger, CBS-TV; and James B. Tharpe, Visual Electronics Corp.

Collins research

Collins Radio Co. is forming a corporate research division for advance basic research in electronics, to be located in Southern California near a university, A.A. Collins, president, has announced. It will be directed by Dr. R.L. McCreary, presently research director at Collins' Cedar Rapids (Iowa) division and his staff, to be the nucleus will move during 1962. Two sites under consideration are at La Jolla and Newport Beach, both near facilities being developed by the U. of California.
nothing up this sleeve... but plenty in reserve

SYLVANIA SMALL POWER TUBES

No magic, no secrets, no foolin'. Conservatively rated, Sylvania small power tubes have plenty in reserve. For one thing, there's the outstanding Sylvania reputation for providing quality. The kind of quality that means long-life expectancy, lower tube costs per hour of operation, reduced maintenance time. For another, there's Sylvania power tubes' high reliability for maximum assurance of on-air continuity.

Call your Sylvania Industrial Tube Distributor for prompt service. He has plenty up his sleeve—one of the widest lines of tubes for broadcasting available. Ask him, too, for your copy of the informative "Sylvania Industrial Tubes" booklet. Or, write Electronic Tubes Division, Sylvania Electric Products Inc., Dept. 1210A, 1100 Main Street, Buffalo, New York.

Values given are for Class C oscillator, RF power amplifier

BROADCASTING, October 3, 1960
‘GREAT DEBATE’ RIGHTLY NAMED

Nixon, Kennedy set a precedent that will be hard to abandon

The whole course of political campaigning has been changed by a single broadcast—the Sept. 26 simulcast of Vice President Nixon and Sen. Kennedy.

A second Kennedy-Nixon debate, or more accurately a news conference, will be fed to the nation and world from WRC-TV Washington next Friday (7:30-8:30 p.m. EDT).

Around the nation the largest TV audience ever tuned to a single program—nearly 75 million—watched the two presidential candidates match wits, forensic skill and personalities on the combined TV and radio networks.

Having seen and heard the candidates as they appeared before the cameras and microphones, Americans spent much of the rest of the week talking over the most exciting single episode they had personally observed in this campaign.

The reaction was worldwide as foreign nations heard the debate on radio or saw delayed films. Even staid British politicians were talking about applying the technique in the empire.

The Next One • At the weekend the staffs of network and party officials who do the planning had converged on Washington for next Friday's second chapter.

Originally slated for pickup at KYW-TV Cleveland, the second simulcast was shifted in mid-week to the nation's capital. The format will be based on four newsmen as questioners (two print media, two network), with Frank McGee of NBC as moderator. The network newsmen will be chosen by CBS and ABC. The print newsmen will be picked from reporters who regularly travel with the candidates.

Julian Goodman, of NBC-TV Washington, will produce. He will have available the extensive facilities of the NBC Washington plant.

A similar news conference is planned for the third program, scheduled Oct. 13, except they will use a split-screen program as the candidates are interviewed from separate cities. The fourth, Oct. 21, will deal with foreign affairs and generally conform to the pattern of the first debate.

Though limited by party-network conferences to four debates, talk of fifth simulcast near the end of the campaign was heard around party headquarters last week. This had not developed into concrete action by the end of the week, however.

Record Audience • The Sept. 26 audience was measured at 10 p.m. by the national Arbitron (American Research Bureau) at:

- 29,659,000 homes tuned to the program.
- 74,147,000 people watching the candidates (2.5 persons per set).

ARB's figures do not include in-
dependent stations, viewers who picked up the program delayed, or listeners who heard it on network or independent radio stations. And of course they don't include literally thousands of newscasts featuring parts of the debate as news.

The multi-city Arbitron taken in only seven markets showed 53% of all TV homes tuned to Nixon-Kennedy. The New York City tune-in was 57%.

A. C. Nielsen, measuring 17 counties in the New York area, estimated the cumulative audience over the hour at 62.2% of all TV homes in the area, or 2,581,000 homes. The program had a "holding-power index" of 85.4%, meaning that percent of homes tuned in the first quarter-hour remained during the last quarter-hour. Nielsen also reported a big jump in TV sets-in-use in New York—72% of all TV homes against 52% during the same hour the previous Monday. The four independent TV stations share was about 25%, which Nielsen said was about the level of the same hour the preceding week.

Change of Scene — The shift from Cleveland to Washington for the Oct. 7 program brought comments from NBC-TV, whose affiliate in that city had been selected as the original site, and from Westinghouse Broadcasting Co., operating the station.

At NBC the official explanation was that, based on observations at Chicago, the program could be handled more efficiently at Washington where stations are more accustomed to handling press and broadcast newsmen, party officials and others who could be expected at the studio. NBC-TV

said, too, the security problem would be simpler and candidates would be assured of a proper atmosphere of privacy because of availability of executive offices and studio facilities.

Franklin A. Tooke, WBC area vice president, said a group of NBC officials and Nixon-Kennedy advisors had met at KYW-TV to survey facilities. "It was the consensus that facilities would be ideal for the debate," he said. "The only problem was accommodating over 350 newsmen at the time of the telecast. At our suggestion, other potential sites in Cleveland were surveyed, including hotel ballrooms." The hotel idea met network and party resistance because of technical difficulties.

The pace of the campaigning picked up noticeably after the first debate, bringing charges and counter-charges that contrasted with the polite manners shown on the air. Crowds at whistle-stop and auditorium assemblies were described as larger in many cases because of stimulated interest in the campaigners.

The first debate appeared to inspire more newspaper comments and stories than any telecast within memory. Much of this was unbiased and favorable; a little was of the pouty sort, reflecting apparent resentment of broadcasting's ability to capture the public's eyes and ears (see editorial roundup page 90).

World Distributions — U.S. Information Agency carried the English text to the world. Voice of America, the radio division, started transmitting to Latin America a half-hour after the Monday debate was over. Tuesday VOA sent the radio text to the Far East, South Asia, Europe, the Middle East and Africa at peak local listening hours.

USIA's TV service shipped kines by air for telecasting in 48 countries and the motion picture unit sent kines for theatrical showing in another 52 countries. All USIA news reports highlighted the debate in 36 languages. USIA will give similar treatment to the three remaining debates in the Kennedy-Nixon series.

Network officials who watched the Sept. 26 broadcast and later watched public and newspaper reaction expressed themselves as pleased with results.

Frank Stanton, president of CBS Inc. and widely heralded as the prime advocate who brought about the presidential debate project as well as legislative relief from Sec. 315, called the broadcast
"a basic breakthrough for broadcasting."

"Not only did the broadcast have the largest audience of any single program in television history but, even more significantly, scores of millions who tuned in at the beginning stayed with it until the end," he said.

Leonard H. Goldenson, president of American Broadcasting-Paramount Theaters, said, "You have watched democracy in action... The broadcasts should go a long way toward helping the American public make its choice of the next leader of the United States." John Daly, ABC vice president, said the program worked out well in its main purpose, "the complete subordination of everything to the principals."

Robert F. Hurleigh, MBS president, said the debate "proved broadcasting fully recognizes its responsibilities as a mass communications public service to all of the American people."

Robert W. Sarnoff, NBC board chairman, said the program "demonstrated the ability of broadcasting to present the views of both Sen. Kennedy and Vice President Nixon in a balanced structure. This technique will, in my opinion, be incorporated into our campaigns as a permanent feature. The Sept. 26 program, contrary to some fears, wasn't dull but actually developed

**The Capital Station**

Columbus 15, Ohio

Represented by:

Robert E. Eastman & Co.,

\[ \text{Interested observer} \]
The producer of the first Nixon-Kennedy debate on TV and radio was Don Hewitt (I), of CBS into a lively informative view of the issues as well as giving new insight into the personalities of the candidates.

**Paid Programs**

A lineup of 129 CBS-TV stations was scheduled for the first sponsored national TV program of the Republican National Committee tonight (Oct. 3). Ambassador Henry Cabot Lodge, vice presidential candidate, was the speaker selected for this opener, with foreign affairs as the topic.

The GOP tied together a nationwide series of fund-raising dinners through a closed-circuit TV loop. President Eisenhower, Messrs. Nixon and Lodge, Gov. Nelson A. Rockefeller and others were featured on the program.

**Editorial comments on the N-K debate**

The first Nixon-Kennedy debate provided an interesting political program somewhat devoid of excitement and unlikely to have changed many votes, according to a check of newspaper editorial comment following the Sept. 26 simulcast. Few editors offered an opinion on the won-or-lost aspect of the program.

The New York Herald Tribune (Ind. Rep.) noted that neither candidate "could resist opening a can of corn here and there" and then concluded the debate "left the electorate better prepared for November's judgment day." The New York Times (Ind.) said, "They offered an, at times, interesting but at no time inspiring picture of two capable young efficiency experts proposing to oil up the same machine—with different quantity and grades of oil."

In Seattle the Times (Ind.) hoped the candidates in future debates "trade their verbal punches with less restraint and with less of an eye on the stopwatch." The Miami (Fla.) Herald (Ind.) called the opener "a decorous draw" and the Atlanta Journal (Dem.) was impressed by "the sincerity, honesty, good taste and ability displayed by both men."

The broadcasting industry drew criticism from the New York News (Ind.). "If the TV tycoons won't let Kennedy and Nixon at least try to do as well as Lincoln and Douglas did, why go on with this powderrpuff performance?"

The opener provided "what Round One of a truly championship match so often is: A cautious sparring between overtrained experts..." according to the Buffalo Evening News (Ind.). The Christian Science Monitor (Ind.) thought the debate "highly successful in helping citizens gauge the character and purpose of each candidate" and "in clarifying the difference between them on national issues."

"American presidential campaigning will never be the same again," said the Milwaukee Journal (Ind.), adding, "It was unprecedented. It was exciting. Most of all, it was informative."

An editorial in The Wall Street Journal (Ind.) awarded an edge to Sen. Kennedy on the basis of performance. Like many papers, The Journal noted that Vice President Nixon seemed nervous, hesitant and tired. "Those ghostly figures with their backs to the cameras (network newsmen) were nothing but distractions... The ques-
tions were incredibly bad. . . . If, instead, the two candidates had been left alone to speak, to question and reply to each other, they would inevitably have pushed themselves to the hard questions. . . . Much was left in disappointing obscurity."

Political sidelights

- WSB Atlanta broadcast primary election returns Sept. 13 from the city room of the affiliated Atlanta Constitution. News cars brought reports from key polling places and from candidate headquarters in DeKalb and Fulton counties.
- Time for candidates of both major parties has been offered by WONE Dayton, Ohio. Free Sunday periods, 6-8 p.m., have been set aside for candidates for local offices.
- Prime hours for debates by the two gubernatorial candidates have been donated by N.L. Benton, president of WLOR Minneapolis. Several debates between the candidates are proposed.

Beeps for Nixon

Celebrities for Nixon-Lodge Committee is providing nightly beep phone calls from entertainment industry figures for the Barry Gray program on WMCA New York and WBNY Buffalo. Jules Alberti, national director of the committee, provides the celebrity phone calls which are scheduled to continue until the election.

The committee said Messrs. Gray and Alberti "have parlayed talents in a radio-personality project that could make a substantial contribution to Republican progress in the critical Empire State. . . . Gimmick is celebs can call in from anywhere in the U.S. during the Gray broadcast (by prearranged schedule set by Alberti) and go right on the airwaves."

Bob Cummings was the first caller, kicking off the series Sept. 19. Dick Powell, Merle Oberon, Faith Baldwin and Helen Hayes are other names on the schedule. The committee added, "Gray, long an ardent Democrat, has a strong following among show biz folks and liberals. His support of the Republican ticket, implied by beepaphone, could be effective in a close New York contest."

The committee said it is not paying for the calls. "By reversing the charges, Barry Gray gets a celebrity on his program for the price of a phone call," according to the committee.

In Philadelphia and Camden . . .

ALL ACROSS THE FM DIAL

IT'S ITA

ALL THE WAY

TODAY ITA PRODUCES AND SELLS MORE FM TRANSMITTERS THAN ANY OTHER COMPANY

A few of the reasons for this leadership are

ENGINEERING FEATURES—Modern, ceramic, long life tubes; self-neutralization; independent driver; multiplexing; expandable power; and remote control.

QUALITY—All FM units are constructed with High Quality Standard Components, designed for easy accessibility. All units are constructed to give maximum efficiency and long life.

SERVICE—Factory trained representatives supervise installation and tune-up of ITA transmitters on the site—at no additional charge. When needed for follow-up these representatives are as close as your telephone.

COST—Another reason why ITA leads the way in FM transmitter sales is low cost. Due to simplicity of design and in plant efficiencies, ITA transmitters are the best value available.

DELIVERY—10/15 KW and all other FM Broadcast Transmitters can be delivered 30 days from receipt of order.

Engineering, Quality, Service, Economy, and Delivery are some of the important reasons why "Across the FM dial—Across the Nation—it's ITA all the Way."

Plush treatment heralds WBC series

A fleet of 10 Rolls-Royce limousines, said to be the largest ever assembled in public, transported guests of Westinghouse Broadcasting Co. to Sagamore Hill, the Oyster Bay, N.Y., home of former President Theodore Roosevelt, on Sept. 19 to hear a concert of past political campaign songs. The junket was in connection with WBC’s Songs for Presidents program, a series of eight half-hour documentaries, which started Sept. 14 on six Westinghouse radio stations, as well as being syndicated to major markets.

The elegant procession of rented limousines, bearing musical experts, members of the press, congressmen and advertising people, was greeted at the Roosevelt home with rousing musical selections played by 28 members of the Oyster Bay High School Band. Wearing Teddy Roosevelt campaign buttons, the group sat down to a campaign luncheon served in the main dining room—the first meal there since the President’s death in 1919, WBC reported. Campaign songs, dating back to roughly 1840, were sung by the Honeydreevers. Sheet music to the Progressive Party’s campaign song of 1912, “Throw Your Hat in the Ring,” was distributed to the guests for a singing session taped by WBC engineers for inclusion in one of the programs. The song was first sung in the same dining room in June 1912.

Musical experts on hand, who were asked to choose the greatest campaign song in American history, but couldn’t reach agreement, were: Sigmund Spaeth, musicologist; Congressman Alfred Santangelo of New York; William Vandervel Heuvel of New York, candidate for Congress, and Sam Chase assistant publisher of The Billboard. William J. Kaland, national program manager, WBC, who produced Songs for Presidents, talked briefly about the series, its purpose and content and its part in WBC’s continuous project of education by entertainment.

WELI’s moonlight cruise

WELI New Haven, Conn., put a social twist on merchandising with a moonlight cruise across Long Island Sound that brought together some 200 independent grocers and wives with major food and beverage distributors.

The station supplied entertainment by radio personalities, square dancing and community singing. Continental Baking, Keebler Biscuit Co., Sperry & Barnes Div. of Swift & Co., and New Haven Distributors Inc. (Schlitz Beer) supplied food and drink—all advertised on WELI. The four-hour cruise between Bridgeport, Conn., and Port Jefferson, N.Y., was a “Good Living Go-Together” promotion, illustrating WELI President Richard Davis’ belief that “we are, in effect, distributors ourselves.”

‘Lifeline Day’

Sept. 27 was celebrated by WBAY Lexington, N.C., as “Lifeline Day,” with civic and business groups joining in a patriotic celebration based on the syndicated Lifeline radio program.

Ed Fuller, assistant manager of WBAY, said two-thirds of the station’s sponsors were donating time to a non-partisan observance. The station program, he said, would include guests from each industry as well as spokesmen for farm groups.

Working with the Central Carolina Civilian Club, groups around the state were contacted to spread the observance into other areas. Wayne Poacher, voice of the Lifeline program, was an invited guest at a dinner jointly sponsored by civic clubs. Lifeline Foundation, syndicating the program, is supported by H.L. Hunt Siceloff Mfg. Co., manufacturer of work clothes, sponsors Lifeline on WBAY.

Drumbeats

Naval aid = KING Seattle last week came to the rescue of the Navy. Although it is official sports station for U. of Washington, when disc jockey Frosty Fowler learned that Navy’s football team would not be able to transport its famous mascot to the West Coast he furnished a fine specimen of a billy goat to the Middles in time for the Navy-Washington game.

Coffee = Coffeehead Hal Raymon, air personality of KISN Portland, Ore., has been brightening the mornings of white collar workers. Each morning his crew walks into a different business firm with an urn of coffee and a supply of doughnuts.

Boosting the band = WABX (FM) Detroit, classical music and concert station, devoted the entire day of Sept. 18 to promotion of the Detroit Symphony Orchestra. Recordings by the orchestra and by guest artists planned for this season were played and interviews with members of the orchestra also were aired. The purpose of the
A 'really big shew'

KPIX (TV) San Francisco went all out to welcome Ed Sullivan to the Bay City for the first of his "See America" series. Greeting him and Mrs. Sullivan at the airport is Louis S. Simon, KPIX general manager (r), and the Saint Mary's Catholic Girls Chinese Marching Band. Mrs. Sullivan holds a bouquet of California-grown roses named in her honor. The band has struck up "When Irish Eyes Are Smiling."

The airport welcome was just the beginning. Mr. Simon had arranged for a seven-man production unit to cover the visit, an advertising campaign to utilize all media, tie-in promotions with various civic celebrations and fund-raising charity drives, personal appearances and participation with regional representatives of Mr. Sullivan's network sponsors, Colgate and Kodak. Troops of girls, each representing a county in Northern California, held placards spelling out WELCOME SULLIVAN at the airport. Another bevy of beauties, each a representative of California's grape and wine industry, presented a similar display at the Mark Hopkins Hotel.

Mayor George Christopher bestowed the key to the city upon the CBS-TV star. Ed was also the honored guest at a whirl of dinners and cocktail parties—a party thrown by KPIX introduced the Sullivans to local dignitaries and representatives of his sponsors and their advertising agencies (J. Walter Thompson and Ted Bates), the San Francisco Press and Union League Club honored Mr. Sullivan at another KPIX party and the Junior Chamber of Commerce held a luncheon for him.

Mr. Sullivan addressed the San Francisco Advertising Club before an audience of over 1,000 people; he also bought the first ticket to the Society for Crippled Children's benefit, helped open the United Crusade campaign. boosted such local events as the Berkeley Football Festival and the Monterey Jazz Festival. In appreciation of his busy week, the Retail Florists' Assn. created a seven-foot caricature of "The Great Stone Face" sculptured in flowers.

day-long salute was to stimulate the sale of season concert tickets. It was estimated that the time contributed to the Detroit Symphony was worth about $2,000 at current rates.

Civic help • WGRB (TV) Schenectady, N.Y., assisted GUTS Inc. (Gear Up for Tomorrow in Schenectady) by offering the civic organization's anniversary report as a local spectacular Sept. 23. The two-and-one-half hour program in prime time reviewed the efforts of GUTS in bringing new industry to the area, gave progress reports on industrial development, listed job opportunities in Schenectady and provided entertainment by area musicians. M. c. for the show was Merv Griffin, star of NBC's Play Your Hunch.

Dress right • Joe Beagain, a guest on the Sunup morning show on KFMB-TV San Diego, has instituted a campaign to make San Diego women more feminine. He is founder of the "Femme Club," which encourages women to dress in a ladylike manner, particularly when they are in the downtown area. Mr. Beagain says that cards and letters have poured in from both men and women applauding the idea and membership in the club grows daily. Bob Mills, host of the show, has appointed himself official girl watcher for further research into the problem.

FATES & FORTUNES

Broadcast Advertising

August A. Wavpotich, associate director of art at Ogilvy, Benson & Mather, N.Y., elected vp.

John Thomas, formerly of BBDO, joins O&B&M as senior account executive; Robert Savage of Procter & Gamble, named account executive at Ogilvy, as well as James Fisher who joins agency from McCann-Erickson.

Robert S. Buckbinder, formerly board member and executive vp of Frederick Clinton Adv., N.Y., joins The Zakin Co., that city, as senior vp.

Douglas R. Hathaway, director of media, vp and secretary at J.M. Mathes, N.Y., retires.

A.E. (Gene) Staley III, formerly vp and account supervisor at Dancer-Fitzgerald-Sample, Chicago, to Arthur Meyerhoff Assoc., that city, as marketing director.

John M. Simmons joins Winfield Adv., St. Louis, as vp and account supervisor.

Ralph Rosenberg Jr. rejoin copy department of Lennen & Newell, N.Y., following year as vp and copy director at Reach, McClinton, that city.

Harry W. Prichett, formerly president of Harry Prichett Assoc., N.Y., joins SHAL, design organization of Sudler & Hennessey, as vp of audio-visual division.

Jon Christopher, formerly tv writer with Erwin Wasey, Ruthrauff & Ryan, Chicago, to MacFarland Aveyard & Co., that city, as creative director of radio and tv.

Alvin Griesedieck Jr., advertising director of Falstaff Brewing Corp., St. Louis, promoted to assistant director of marketing.

Randy Grochoske joins Guild, Bascom & Bonfigli, San Francisco, as tv art director. He formerly was with Young & Rubicam.

Jack Goggin joins account management staff of Earle Ludgin & Co., Chicago. He formerly was with Chicago Tribune.

Gerald Levey, formerly of Cortez-Enloe, N.Y., joins Donahue & Coe, that city, as account executive in drug products division.

James Blair, sales manager in equipment sales division of TelePrompTer Corp., N.Y., joins N.W. Ayer, Detroit, as service representative for radio and tv on Plymouth-DeSoto-Valiant.

Mrs. Nelle Bell appointed media buyer at Harris & Weinstein Assoc., Atlanta, Ga.

Rolly Bester, tv commercial spokeswoman, joins Ted Bates, N.Y., as casting supervisor.

Thomas Dettelbach joins Ralph Bing Adv., Cleveland.

Otto Prochazka, formerly of Compton Adv., N.Y., appointed vp and group supervisor of copy department at Dancer-Fitzgerald-Sample, that city. Phyllis Houston, formerly of Mr. Prochazka Young & Rubicam, joins D-F-S as copywriter.

The Media

Harry A. Karr Jr. appointed acting station manager of WRC-AM-FM Washington. He has been station's sales manager for past eight years and continues those duties in addition to new appointment.

Jack Coopersmith rejoins KFBW Wichita, Kan., as general manager. He formerly was sales manager of KSIR, that city, and before that was member of sales staff of KFBW.

Orm Duck, formerly with WSEN Baldwinsville, to WBZU Fredonia, both New York, as station manager.

Tom Shumate, formerly with KCID Spencer, Iowa, joins KFTM Ft. Morgan, Col., as program director and assistant manager.

Bob Schneider, formerly research manager with CBS-TV Spot Sales, N.Y., to Edward Petry Co., station rep, that city, as director of research for tv division.

BROADCASTING, October 3, 1960
John S. Hayes, WTOP Washington, re-elected chairman of board of CBS Radio Affiliates Assn. at affiliates' annual convention last week (see page 62). Jay Wright, KSL Salt Lake City, named vice chairman and E.K. Hartenbawer, KCMO Kansas City, re-elected secretary-treasurer. Three directors-at-large were elected: Thomas C. Bostic, KEPR Kennewick, Wash., and incumbents Larry Haeg, WCCO Minneapolis, and Robert McConnell, WISH Indianapolis.

Steve Bailey, in sports department of KMPX Los Angeles, appointed director of program operations.

Robert S. Hix, general manager of KHOU Denver, resigns and sells stock to Western Broadcasting Co. which owns station. Before joining KHOU, Mr. Hix was general manager of KOA, that city. He has not made available his future plans.

Frank Bishop, formerly managing director of KFEL-AM-TV Denver named station manager of KHOU.

Daniel D. Calibraro, assistant to general manager of WGN Inc. (WGN-AM-TV Chicago) assumes additional duties as manager of press and community relations. Other changes: Bruce Dennis, manager of news for WGN Inc.; Thomas A. Fay Jr., director of news features for WGN Inc.; Daniel T. Pecaro, radio program manager; James G. Hanlon, manager of promotional and merchandising services for WGN Inc.; Charles A. Wilson, manager of sales development for WGN-TV; Jack Brickhouse, manager of sports for WGN Inc.; Dr. Mark Munn, manager of research for WGN Inc.

Rita Garner, formerly pr director at WMCA New York, joins WABC, that city, as advertising and exploitation manager. Dick Stone, formerly sales executive at Avery-Knodel, and Don Huber, previously regional manager of Radio Advertising Bureau, join WABC as account executives.

Larry Carothers named promotion manager of KTBC-AM-FM-TV Austin, Tex., succeeding Mrs. Alice McElhinney. Mr. Carothers formerly was promotion director of KVET, that city.

Dale R. Woods, radio advertising bureau regional manager, named division manager of member service department.

Mark L. Wodlinger, executive vp of Community Telecasting Corp. (applicant for ch. 8 in Quad-City [Moline, Rockford, Rock Island, all Illinois, and Davenport, Iowa] area), becomes manager of WMBD-TV Peoria, Ill. In addition to new post, he continues to represent WMBD-TV as national sales representative. Mr. Wodlinger has been retained by WMBD-TV until FCC reaches final decision on the ch. 8 application.

Robert C. Buckley appointed production manager of KHAS-TV Hastings, Neb. Other appointments: Mrs. Ardis Bequette, program director; John Parsons, chief photographer.

Milton R. Neaman, assistant secretary and assistant general attorney in CBS corporate legal department, named director of facilities.

Dick Paul, formerly promotion director of WBRE-AM-FM-TV Wilkes-Barre Scranton, Pa., named director of promotion, advertising and merchandising for Tidewater Teleradio (WAVY-AM-TV) Norfolk-Portsmouth-Newport News, Va., succeeding Mike Schaffer.

Dwight Case, William Hoftyzer and Sam Posner join KQBY San Francisco as account executives. Mr. Case formerly was general sales manager of KRAK Stockton-Sacramento, Calif. Mr. Hoftyzer was with KFRC San Francisco and Mr. Posner was general manager of KBAY-FM San Francisco.

Wally Rich appointed regional account executive in Denver office of Intermountain Network. He formerly was with KYSN Colorado Springs.

Janet Baker-Carr rejoins WXHR (FM) Boston. She formerly was music director of WBAI (FM) New York after having previously served as program director of WXHR in 1958.

Robert Dressler, production manager of WNBP (TV) Chicago, promoted to production manager of station's new video tape department. Stanley Brightwell, film coordinator at WNBQ, succeeds Mr. Dressler.

Marvin Shapiro, announcer at WAKR-AM-FM-TV Akron, Ohio, promoted to promotional director.

Hugh Robinson, formerly operations manager of WHOO Orlando, to
WMBR Jacksonville, both Florida, as promotion and production manager.

Olin Terry, formerly production manager of KFJZ-TV Fort Worth, to WJBK-TV Detroit as assistant program manager.

Ralph Kanna, personality at WHCT (TV) Hartford, Conn., promoted to program director. Mr. Kanna, broadcasting veteran of more than 20 years, previously was general manager of WMMW Meriden and WONS Hartford, both Connecticut.

Hugh E. Neeld, formerly on sales staff of KTBB Tyler, Tex., to KDOK, that city, as commercial manager.

John T. Whitaker, formerly in art department of WCAU-TV Philadelphia, named art director of WFBM-TV Indianapolis.

Donald Chapman, formerly of Adam Young, N.Y., joins WPIX (TV), that city, as account executive.

George L. Pierce, sales service assistant at KABC-TV Los Angeles, promoted to sales service manager.

John A. Garland, formerly with Scott Paper Co., N.Y., joins sales staff of Devney-O’Connell, station rep, N.Y.

Rex Miller, formerly account executive with WAKY Louisville, Ky., to similar position at KOMA Oklahoma City.

Robert B. Farrow, formerly account executive at KATZ St. Louis, to WICS (TV) Springfield, Ill., in similar capacity.

Dr. Malcolm Katz, associate professor of education at Union College, appointed research consultant for Mohawk-Hudson Council on ETV, Schenectady, N.Y. Responsibilities will be in addition to Dr. Katz’s duties at Union.

Jack Deignan, formerly personality with WHEN Syracuse; N.Y., to WBFL, that city, as assistant news director.

Nate Freedman appointed mobile news reporter for WBZ Boston and WBZA Springfield.

Henry Clark, formerly with WAKI Patchogue, Long Island, to WEAV Plattsburgh, both New York, as staff announcer.

Jim Mortell, formerly air personality at WTTN Watertown, Wis., to WISN Milwaukee, as staff announcer.

Crawford Rice appointed director of programs, news and public affairs for WTIV (TV) Tampa-St. Petersburg, Fla., in revision of station’s program and news departments which have been combined. Move is in line with station’s heavy news and public affairs programming. Joe Loughlin becomes news director in reorganization.

Eddie Cary joins KXJB-TV Valley City, N.D., as announcer.

Ida Blackburn, host of Romper Room on KOCO-TV Oklahoma City, appointed host of station’s new women’s physical fitness show.

Ollie Raymond, formerly personality at KMOS St. Louis, joins WBBM Chicago.

Jack Palvino, formerly program director of WGVA Geneva, to WBBF Rochester, both New York, as air personality.

Max D. Pride appointed vp in charge of sales department of Fred A. Niles productions, Chicago, succeeding Fred Foster.

Peter A. Griffith, TV producer and account executive at Transfilm Caravel, N.Y., appointed vp.

Arthur Trofeisen, formerly of General Artists Corp., joint Mercury Artists Corp., N.Y., as vp in charge of program development, TV and motion picture activities.

Robert L. Meinsner, Radio TV Reports, N.Y., named supervisor of West Coast monitoring operations.

Philip McEneny, formerly unit manager of network shows and commercials at NBC-TV, joins Videotape Productions of New York (Videotape Center) as sales account executive.

George Mitchell appointed Seven Arts Associated southwest division manager with headquarters in Dallas. He formerly was with United Artists-TV.
Peter M. Robeck, formerly vp of Crosby/Brown Productions, has organized own syndication firm, with headquarters at 230 Park Ave., N.Y. He will handle distribution of The Pioneers reruns of Death Valley Days programs owned by United States Borax & Chemical Co., formerly syndicated by Crosby/Brown.

Louis A. Novins, president of International Telemeter Corp., Division of Paramount Pictures Corp., elected vp of parent company.

Carl H. Lawton appointed sales representative for Magna Film Productions, Watertown, Mass. Previously he had been film buyer for WBZ-TV Boston and KYW-TV Cleveland.

**Equipment & Eng’ring**

Cameron G. Pierce, president of Ling Electronics, Los Angeles, named to board of directors of Crestmont Consolidated Corp., San Marino, Calif. (electronics firm).

Ercell B. Harrison, sales manager of Peerless Electrical Products Div. of Altec Lansing Corp., Anaheim, Calif., appointed general manager of division. He will retain current responsibilities in addition to new duties.

W.W. Smith named chief of engineering development at Babcock Electronics Corp., Costa Mesa, Calif.

Norman P. Norlie, director and vp of sales at Wilber B. Driver Co., Newark, N.J., manufacturer of precision electrical equipment, retires after 31 years service. Ernest W. Swift named vp of sales and Fred A. Locke named director of sales engineering.

Jack Carter appointed manager of pre-contract engineering and marketing at Jansky & Bailey, Washington, D.C., electronic and communication firm.

**Allied Fields**

Laurence J. Jaffe, vp of Market Research Corp., N.Y., joins Audits Surveys Co., that city, as vp of new service development.

Robert Van Roo joins A.C. Nielsen Co., Chicago, as promotion director of Nielsen coverage service. He will be responsible for all promotional activities for firm’s 1961 nationwide survey of circulation of radio and tv stations.

William H. Craig, formerly manager of employment at NBC, joins Katherine S. Falk, personnel agency, as personnel consultant in advertising and radio-tv.

**International**

Rick Hart, commentator for CBC-TV, Toronto, appointed newscaster of CFTO-TV, that city.

Ted M. Fielder, president and managing director of CFRS Simcoe, Ont., also assumes duties of national sales manager.

**Deaths**

George H. Jasper, 63, radio pioneer and president of WCCM and WGHJ-FM Lawrence, Mass., died Sept. 26 following long illness. Mr. Jasper, in broadcasting for 38 years, was founder of Massachusetts Broadcasters Assn. and was manager of WBBZ Boston and WBZA Springfield from 1922-1927.

Nat L. Cohen, 56, director of sales for WGR Buffalo, N.Y., died Sept. 28 of heart attack. Mr. Cohen had been associated with WGR organization since 1930 when he joined station as account executive.

Joseph Horner Jr., 73, vp and general manager of Green Bay Newspaper Co., died Sept. 18 from effects of skull fracture suffered at his home. Green Bay Newspaper Co. owns WJPG Green Bay, Wis.

NEWEST IN THE LINE OF RCA FM TRANSMITTERS

1 KW FM Transmitter for Full Fidelity Operation

Only a single PA stage is used beyond the exciter to assure true high fidelity performance while keeping operating costs low. Distortion and noise are extremely low even when the transmitter is multiplexed. When combined with the RCA broadband FM antenna the BTF-1D is capable of producing ERP's up to 12 KW. This new 1 KW transmitter can easily be expanded to 5, 10, or 20 KW by adding higher power amplifiers.

RADIO CORPORATION OF AMERICA

INTERNATIONAL

CBC-TV TO MAKE IT ALL LEGAL

Network and affiliates to sign contracts

Representatives of 46 English and French-language Canadian independent television stations will sign a network agreement with the Canadian Broadcasting Corp. by the end of 1960. The network affiliation agreement will set down details of the verbal agreements established over the past seven years. With a second television network being planned in Canada, a signed agreement was termed necessary at a meeting of the CBC and its affiliates held in mid-September at Ottawa, Ont.

The meeting decided to establish a joint advisory committee of 15 members to make recommendations to the CBC on matters of mutual interest, including network schedules and commercial requirements.

CBC and its affiliates will present the first of a series of annual awards in the spring of 1962 for programs and personalities on both the English and French-language networks.

New tv station

CKPG Prince George, B.C., has been recommended for a television license in this mountainous area on Canada's west coast on ch. 3 with 210 video and 114 audio. The Canadian Board of Broadcasting Governors originally recommended...
CKPG for the license on May 24 but on July 5 recommended deferment of the license pending further study of the area's broadcasting needs. On Sept. 9, the BSB announced that following its study CKPG had indicated the possibility of establishing satellite television stations in the area to give service to adjacent communities. CKPG will conduct tests to determine the economic and technical feasibility of satellite services.

Italian tv in New York

The first foreign office of RAI (Radiotelevisione Italiana) opened Sept. 15 in New York. In Rome to officially inaugurate the new operation, located at 717 Fifth Ave., were Marcello Rodino, RAI president, and Rodolfo Arata, general manager. Giorgio E. Padovanego, executive vice president of RAI Corp. and its representative in North America, is in charge of the office, which was established for the purpose of exchanging programs, ideas, talent, technical facilities and information between RAI and radio and tv of the U.S. and Canada. Emphasis will be on cooperative exchange of educational, cultural and public affairs programs. RAI expects to have a second channel opened in Italy in the fall of 1961. Messrs. Rodino and Arata are scheduled to return to Rome Sept. 30.

**111**
STRESS: HOW DOES IT AFFECT YOUR BODY?

Stress—physical, mental or emotional—can be either good or bad for you.

In fact, a normal amount of stress is actually a good thing. For example, if you get “keyed-up” over an interesting or challenging job, you may do your work more effectively.

But prolonged or intense stress—caused by too much work or worry or anxiety—can threaten health.

That’s because continued stress upsets some of the body’s chemical processes. In particular, severe or persistent stress causes overactivity of certain glands that produce hormones.

If this glandular overactivity is continually triggered by stress, it may upset almost every system of the body.

And this may lead to illness.

If you find that it’s difficult to relax or “take things easy” or get a good night’s sleep, chances are you’re under too much stress. And it’s up to you to learn how to handle your tensions. Here are some ways to help you:

When your work load seems overwhelming, remember that some things can almost always be set aside until later. Concentrate on one particular job. That way your work will go faster and you’ll be under less strain.

When tense and upset, try physical activity. It helps relieve tenseness so that you can come back and tackle irritating problems more calmly.

Talk out your troubles—with your clergyman or family doctor or with an understanding friend. Getting things “off your chest” prevents a lot of unnecessary emotional stewing.

Have regular medical check-ups. If you keep physically fit, you’ll have more zest for living and be able to take stress and handle tensions more easily.

OUR RESPECTS TO...

JOHN VAN BUREN SULLIVAN

John V. B. Sullivan, general manager of WNEW New York, is proud that many show business headline writers regard the station as possessing "the finest in sound." But as an astute businessman, Mr. Sullivan is quick to add this meaningful observation: "We’re happy that professionals like and respect us, but we’ve even prouder that Mrs. Shmalowitz and Mrs. O’Toole from the Bronx and Brooklyn like us."

Mr. Sullivan’s association with the station has paralleled the period of WNEW’s most spectacular growth. But he modestly points out that the station has been a powerhouse since the late 1930s under the aegis of the then general manager, Bernice Judis.

Mister In-Between ■ Mr. Sullivan, a tall, robustly-built man with brown hair and distinctive silver sideburns, speaks quietly but glowingly of WNEW’s stature through the years.

"Some stations may aim at the teenage audience," he explains. "And others may go after the oldsters. We like to think that WNEW caters to the great mass in-between."

He explains that through the years WNEW has earned a reputation—and justly so, he thinks—as "probably the best known, most successful and most copied radio station in the United States." He believes that statistics will support his contention that WNEW’s revenue of $7 million in 1959 was "the largest of any station." He estimates that 1960 business will equal that amount. "You can see that we have a lot of Mrs. Shmalowitzes and Mrs. O’Tooles listening to us, or advertisers wouldn’t be asking us," Mr. Sullivan commented with a smile.

Doughnuts to Dollars ■ Mr. Sullivan, known to his friends as Jack, has been in the general area of communications since he left Dartmouth College in 1935—with two exceptions. He worked one day as a clerk in a doughnut shop and ten months as a shoe salesman.

John Van Buren Sullivan was born in Omaha on April 20, 1914. When he was nine the family moved to Chicago. He graduated from Evanston (Ill.) High School and attended Dartmouth College for two years, but the depression forced him to leave school.

After his brief encounters with the doughnut and clothing industries in Chicago, Mr. Sullivan joined the advertising staff of the Chicago American in the spring of 1936. The newspaper was part of the William Randolph Hearst enterprises and that fall, he effected a transfer to the Hearst General Advertising Dept. in New York.

This Hearst unit served as a training ground for young advertising executives who subsequently were assigned to various Hearst newspapers and radio stations. In January 1941, Mr. Sullivan joined the retail advertising staff of the New York Mirror.

Observation ■ During his years in New York Mr. Sullivan noticed the steady growth of radio. In January 1942 when he heard about a vacancy in the promotion department of WJZ New York, he applied for it and was named promotion manager. His work soon attracted the attention of Bernice Judis, then general manager of WNEW, and he was offered a similar post there. He joined WNEW in July 1942. Mr. Sullivan has served the station continuously ever since except for U.S. Army service during World War II.

Most of Mr. Sullivan’s tenure in the Army—from November 1942 through January 1946—was in writing assignments, initially as a radio news writer for the Army News Services and later as a Yank correspondent in Europe.

Back to Work ■ After Army discharge as a staff sergeant he returned to WNEW and his work as promotion manager but set his sights on a sales man’s post. In November 1948 he was transferred to sales as an account executive. In June 1957 he was named vice president and sales manager and in April 1959 was appointed general manager of WNEW and a vice president of Metropolitan Broadcasting Corp.

During his association with WNEW the station has changed hands six times—the first time in 1950 for $2.1 million and the last time to Metropolitan for $7.2 million.

Mr. Sullivan attributes the success of the station to a skillful blending of three ingredients—music, news and station personalities. But he stresses this formula is not enough, adding:

“For instance, our music approach always has been not only to cater to the music tastes of our audience, but to cultivate it. Therefore, we program music that has been popular over a three or four month period; has been popular over the last two or three years; has been popular over a long period of time—that is, the standards—but above all, we also spot new songs that our own appraisal considers appealing.”

In the area of news, Mr. Sullivan explained, WNEW started to accentuate news programs on the hour and bulletins on the half hour shortly after Pearl Harbor. For many years, WNEW presented the news in cooperation with the New York News, but in December 1958 the station established its own 16-man news department.

Radio’s Own Voice ■ “We felt then that radio needed its own sound,” Mr. Sullivan remarked. “We decided to put on the voices of the people who made news or in some way contributed to the making of the news. Just putting on voices, of course, is not enough.”

The WNEW news staff of 16 members, he believes, “is by far the largest of any station in the country.”

Through the years the station always has presented a lineup of well-paid, popular personalities (they are not called disc jockeys at WNEW). The emphasis, according to Mr. Sullivan, is on personalities who have “sexy voices.”

Mr. Sullivan married the former Joan Claire Dillon of New York. The two make their home in Larchmont, N.Y., with their four children—Rosemary, 20; Armanda, 12; Sheila, 10; and Michael, 9. Mr. Sullivan is a member of the Bonnie Briar Club in Larchmont, the Dartmouth Club of New York, the Radio & Television Executives Society and the Advertising Club of New York.

WNEW’s Sullivan

Hits, possibilities & sexy voices
Undebatable

Television and radio established new identities as the superlative mass media they are. Television alone reached an audience estimated at more than 74 million. And a precedent was established that will make the broadcast media the primary campaigning vehicles in all future presidential elections.

Broadcasters kept faith on the promise to donate prime time, once relieved by Congress of the ridiculous burden of providing equal time to splinter parties.

The first debate became a conversation piece wherever people met—on street corners, at coffee breaks, in taxicabs. It became a classroom topic and is certain to become part of history and civics curricula.

What will develop from upcoming joint appearances can’t be foretold. But widespread interest already has been generated and the public will be better indoctrinated on the issues than ever before. The vote is certain to be large.

Broadcasters, through teamwork with networks on time clearances, and despite heavy losses in commercial revenue, have elevated their stature as responsible journalism forces. The networks handled the almost insurmountable task of reconciling differences between the contending parties under inordinate pressures. The detractors of broadcasting have been answered. It was a great opportunity and the unified broadcasters have made the most of it.

NAB’s new president

IT IS now virtually certain that Governor Collins of Florida will become the new president of the NAB and, as such, the spokesman for the nation’s broadcasters. All that remains is completion of the understanding and its ratification by the full NAB board at a special meeting Oct. 10.

Thus, to all intents, ends a search that has been underway for nearly eight months to find the best-qualified man available for the most important assignment in broadcasting. It is a happy and inspired selection.

The NAB Selection Committee had worked assiduously since the death last March of President Harold Fellows, in screening a list of some three dozen nominees. It sifted the list down to two—Governor Collins and George V. Allen, director of the U.S. Information Agency and a career ambassador in the top diplomatic echelon. It would be difficult to find two other men as eminently qualified for the task.

Governor Collins’ second term as Florida’s chief executive expires on Jan. 3. He had disclosed that he wished to forego politics for a business career. Mr. Allen, on the other hand, hadn’t said he would accept the NAB presidency even if it were offered. But he must have been intrigued by the prospect of performing a genuine public service while serving in private enterprise. Because of Mr. Allen’s responsibilities as head of all of our external communications at this critical juncture in world affairs, some felt he should not be taken away from government at this time.

Broadcasters will discover that their new spokesman is no figurehead or mere ceremonial officer. Behind his disarming charm is a personality of great vigor and of extraordinary intelligence. He is a “take charge” executive. His performance as permanent chairman of the Democratic convention in Los Angeles won him deserved tribute not only from his party colleagues but from the viewing and listening public.

Governor Collins, his intimates say, is one who will assert his full authority over policy and personnel. He will forsake partisan politics once his appointment is given board confirmation.

The formalities have been handled. Swift ratification is desirable so that announcement of Governor Collins’ appointment can be made before the Nov. 8 elections to dispel the notion that the selection was in any way based on political considerations.

Other options

ALTHOUGH voted by the narrowest of margins, 4-3, the FCC’s ruling reducing network option time from three to two and a half hours appears likely to stand. It is evident that the networks will not seriously protest it, for the decision contained what the networks want most—a defense against antitrust prosecution.

In the ruling the majority said that option time was “reasonably necessary” to the conduct of network business. If the Dept. of Justice were ever to test an antitrust suit what its former antitrust chief, Victor Hansen, repeatedly said—that option time was in itself an antitrust violation—the networks could argue that another agency of government had pronounced the practice necessary.

So the option time ruling will probably stand. Now, we suggest, the FCC may wish to turn its attention to still another feature of its chain broadcasting rules. If it wishes to assist in the orderly conduct of network-affiliate relations, it could do much by eliminating the present time limits of affiliation contracts.

These contracts are now limited by FCC regulation to two years. There is no reason why any limit should be imposed. Networks and affiliates ought to be as free to enter agreements as other businesses are.

And while we’re on the subject of time limits, we suggest that the FCC consider an extension of the station license period, if not the elimination of a fixed period altogether. The new amendments of the Communications Act give the FCC vastly greater powers of discipline. With these powers at its command, the FCC will hardly need to wade through the enormous paperwork entailed in reviewing and renewing licenses every three years.
This status symbol you have to lug around

This one you can see anywhere

Carrying an attaché case won't make you a vice-president overnight. Putting advertising on KPRC-TV in Houston, Texas, won't do it either. But it will help you make sure your customers see your commercials in a clean, crackly environment with an inviting, colorful presentation. Use KPRC-TV in Houston. Commercials on KPRC-TV have a better chance of getting read, heard, seen, remembered and acted upon. Besides, they look good. And they cost less than you think.

See your Edward Petry & Co. man. Use KPRC-TV, Channel 2 in Houston for your next Houston sales campaign. KPRC-TV, NBC in Houston, Texas.
