The December 18, 1960 NSI shows that KRLD-TV reaches more homes in the Dallas-Ft. Worth market than any other station. Channel 4 leads in all six summarized time periods.

Simple arithmetic shows that KRLD-TV's average number of homes reached in these six periods is 57.6% greater than Station B, 77.8% greater than Station C and 159.1% greater than Station D.

Changing NAB scene

One of first "reforms" at NAB under stem-to-stern reorganization planned by President LeRoy Collins will be elimination of certain staff functions filled by house executives and retention of outside consultants. For example, vacancy created by resignation of A. Prose Walker as engineering manager may not be filled and an outside engineering firm retained. Another probable move will be elimination of NAB's present research organization, now headed by Richard Allerton, with a consulting firm to be retained.

Executive suites

With new chairman coming into FCC, game of who gets the biggest offices again is going full blast in commission's cramped quarters. Deposed Chairman Frederick W. Ford exercised his prerogative as commissioner to commander suite (7347-55) formerly occupied by Dee Pencock's regulatory division of general counsel's office. Legal minds were shifted to "temporary quarters" in second floor offices occupied by Connelrad staff, which has found new location on same floor. New Chairman Newton N. Minow will move into executive suite in 7100 corridor. Disposition of offices occupied by outgoing Commissioner Charles H. King (on both sides of 7200 corridor) has not been determined.

Hagerty picks Scali

ABC's news-special events chief, James C. Hagerty, currently in process of putting into operation gradual build-up of new experts who will "participate" in areas they cover (see story, page 45), has made his choice for State Dept. He's John Scali, Associated Press' top-run State Dept. correspondent. For ABC, Mr. Scali becomes network's expert in diplomatic area, starts on job within week or two.

No show?

When FCC Chief Hearing Examiner James D. Cunningham gets to Los Angeles next month to get testimony from MCA's Taft Schreiber and executives of Dick Fishell and Assoc. and Promotions Unlimited, firms that place merchandise on shows in exchange for air credits, he may find himself on the road without a show. Last week attorneys Allen Susman, of MCA, and Oliver Schwab, for the merchandisers, said decisions had not yet been made whether their clients would testify. Last fall, when FCC began L.A. part of its investigation into TV programming and who controls it, these witnesses refused to testify on advice of counsel (Broadcasting, Oct. 31, 1960).

Solving fm shortage

While it's still staff-level talk, new idea to solve shortage of fm frequencies in big markets is getting attention at FCC. This proposal would take away fm assignments from stations that merely duplicate their am programs and give them to applicants who will do special programming job on medium (see fm round up story page 78).

Shell game

Possibility Shell might return to television in near future opened up Friday (Feb. 17) when advertiser denied deciding to continue present newspaper only ad philosophy through budget year. Agency, Ogilvy, Benson & Mather refused comment on report it was preparing to line up spot tv campaign for Shell to start before midsummer.

Network for special

Medium-sized advertiser currently is engaged in "delicate" negotiations to line up live lineup of tv stations to "network" weekend telecast of documentary one-hour special. Program would be fed via cable facilities. Target is this spring with as many as 25 markets involved.

Spring training tapes

With baseball edging into sports picture, Sports Network Inc., New York, hopes to give coverage on tv added excitement during early spring by producing half-hour taped programs on each major league team from training camps. Sports Network Inc. also dic toring with stations carrying major league schedules. Taped programs would concentrate on how team is shaping up—providing information on new players and status of veterans.

Delinquency hearings

Look for Senate hearings on impact of television and movies on juvenile delinquency. This is one of four main fields currently being researched by Senate Subcommittee on Juvenile Delinquency, headed by Sen. Thomas Dodd (D-Conn.).

Although subcommittee members have not yet met to organize and detail plans for session, expectation is that unit will hold two days of hearings on tv and movies, with witnesses drawn from those industries and their trade associations.

Color set count

American Research Bureau can be expected to release second sample survey made for December national report showing some 600,000 homes in U.S. with color tv sets. In percentages, it breaks down to 2.08 per cent of total tv homes in country able to receive color. ARB also found 600,000 color tv home count checks off closely to that of RCA's sales figures.

Food show recipe

ABZ Assoc. (see story, page 32) reportedly has taped pilot of new show that apparently could introduce "new concept" in food programming. Targeted for daytime network slot, program, "Love to Cook," disdains standard recipe-giving format and emphasizes sophisticated entertainment and foods instead. Starring radio personality Jack Sterling and actress Jan Minor, program is said to have created interest among all three networks as possible vehicle for big national food advertiser.

DeGray consultant

New "total advisory service" for both television and radio broadcasters reportedly in process of development by Edward J. DeGray, former president of ABC Radio (1958-60) and before that with CBS and ABC in station relations, national and local management and other executive posts for some 20 years. If plans work out along lines now developing, consulting service may also include New York sales representation for stations on basis of non-conflict with their regular reps. After leaving ABC Mr. DeGray was radio-tv director of Citizens for Lyndon Johnson National Committee in pre-nomination drive last spring and subsequently worked on behalf of Kennedy-Johnson ticket.

Are brothers related?

Formation of Tedesco Inc., Minnesota public company, which has bought WMIN St. Paul (see Changing Hands, page 45), raises interesting question. Brothers Victor and Nicholas Tedesco are principals of Tedesco, Inc., but brother Albert and wife are applicants for 690 kc (500 w daytime only) in Minneapolis. Legal positions of brothers was at one time resolved by FCC (they have no business relationship and are not considered related for purposes of duopoly) but intriguing question is whether this covers situation where they will be in same market (provided Albert Tedesco wins grant for Minneapolis).
KEY OF Cleveland:

WJW-TV is in tune with Cleveland and Northern Ohio, and Cleveland and Northern Ohio tune in to WJW-TV. With diversified local and CBS programming, award-winning news shows, sponsored public service programs and top movies, WJW has built a large and devoted audience. It's an audience that responds by putting your sales on a bigger scale in Cleveland.

A STORER STATION BACKED BY 33 YEARS OF RESPONSIBLE BROADCASTING • CALL KATZ
WEEK IN BRIEF

More than bare numbers must be considered when agencies place spot business, though the circulation, cost-per-1,000 figures are extremely important. Actually the "image" projected by stations is becoming important in buying decisions. See Lead story . . .

Dragon Wins

No fairy tales. KMTV’s story is realistic. Although beset by St. Georges, KMTV’s dragon . . . experience, size, and power . . . has been winning for years. The most recent jousts (December Nielsens and November ARBs for Omaha and Lincoln) proved: In Omaha, KMTV reaches more castles . . . homes, too . . . in nearly twice as many quarter hours as any other Omaha station. In Lincoln, KMTV leads in almost three times as many quarter hours as the other Omaha stations combined. In either city, KMTV’s “Jack Paar” devours its clanking competition (anciente fylmes). Don’t let a St. George do it. Let Petry breathe fire into your campaign. You’ll get two realms . . . Omaha and Lincoln . . . for the one-realm price.

Kmtv Omaha
Program criteria proposed by FCC

After several months of kicking around (CLOSED CIRCUIT, Jan. 16), FCC released Friday for rulemaking its plans to see that broadcasters determined programming needs of their public and take steps to meet them.

Biggest cropper in document, added at special Friday meeting, would require station to cite methods of reviewing network and syndicated programming prior to airing. This provision was included at suggestion of Network Study Staff.

If rules are adopted, applicant would be required to detail measures he has taken to determine tastes, needs and desires of locality served and manner in which they will be met. Among ingredients to be detailed: Total broadcast time devoted to commercials, including breakdown by time periods; specialized programming; how controversial matters are treated; programming types, including religion, public affairs, news, sports, agricultural and entertainment.

Also, opportunities for local expression; whether applicant adheres to industry code; description of various minority groups in area being served. All applicants for new stations, renewals and sale approvals would be required to submit information in new form.

Present percentage breakdown of programming would be deleted but composite week would be retained for purposes of future checks. New forms propose to ask for specific total hours of religion, education, news, etc. broadcast per week. Also, a breakdown of and number of spots and time aired.

New requirements differ substantially from those proposed in November 1958. That rulemaking was terminated. Also, they are less stringent and demanding as set forth for rulemaking than earlier proposals under study in January and December.

Rules implement FCC program policy statement issued last summer (BROADCASTING, Aug. 1, 1960) and follow 19 days of public hearing in December 1959-January 1960. Comments are due April 3.

FCC seeks control of community tv

FCC Friday sent Congress bill designed to put community antenna tv systems under commission jurisdiction.

Express purpose of bill, FCC said, is to ease hardships of cases where local tv stations have to compete with catv.

FCC said it did not wish to be burdened with administrative details of licensing each of some 500-700 catv systems but desires authority to deal with catv in certain instances at its discretion.

Bill specifies what constitutes catv system that would fall under FCC jurisdiction, exempts those with less than 50 subscribers, as well as pay-tv or other closed-circuit programs.

CBS-TV acts to revive merchandise programs

In move pointing to revival of "prizes and merchandise" programs over CBS-TV, Lawrence White, newly-elected vice president, daytime programs, CBS-TV (see WEEKS HEADLINER, is announcing today (Feb. 20) that three such shows are being added to network's daytime schedule March 13, on Monday-through-Friday basis.

Programs and their time periods are Double Exposure (11:11:30 a.m.); Surprise Package (11:30 a.m.-12 noon) and Face the Facts (2-2:30 p.m.).

CBS-TV cut back sharply on prize shows after tv quiz scandals in fall of 1959, but network spokesman said new programs will spotlight "fun" and present "modest prizes only." Programs to be dropped to make room for new shows are The Clear Horizon and Full Circle, both daytime serials, and reruns of December Bride.

Too many plugs

Never underestimate power of woman—especially 10-year-old girl who's only allowed to watch tv from 5 to 7 p.m. and who thinks there are too many commercials during that time. She found 30 during one two-hour period.

Girl is Carol E. Quinlan of Mountain Lakes, N. J. She wrote complaint to Sens. Clifford P. Case and Peter Frelinghuyzen, both New Jersey Republicans. Sen. Case forwarded letter to FCC Chairman Frederick W. Ford who wrote girl he had informed tv stations (in New York) that she was displeased with number of commercials being carried.

Mr. Ford said FCC cannot act as censor over radio-tv programs.

What Hagerty said

James C. Hagerty, ABC's vice president in charge of news, special events and public affairs, denied (Feb. 17) that he was "attacking" quality of broadcasters' news coverage as implied by some newspaper handling of his Oberlin, Ohio, talk made night previous (see story, page 45). He said criticisms of current limitations in broadcasting news handling was not meant as "a slap at what broadcasters are doing" but as a reminder that "they can do better." Mr. Hagerty feels built-in limitations in news broadcasting removes "expert" from reality of news events themselves, but thinks individuals themselves and in most instances companies are blameless. "Rather the system itself is wrong," he said.

Joint vhf-uhf service by Fresno station opposed

Charging that KFRE-TV Fresno, Calif., "is attempting to squeeze out the last full measure of its vhf advantage in Fresno and combine it with its uhf switchover," ch. 47 KJEO (TV) there asked FCC Friday to vacate authority for KFRE-TV's simultaneous operation on chs. 12 and 30.

KFRE-TV was scheduled to begin operation on both channels Friday in final phase of commission move to make Fresno all-uhf market (earlier story page 44). Station on Feb. 8 was granted authority to broadcast on both channels between Feb. 15 and April 15.

In its complaint KJEO said two national ratings services—ARB and Nielsen—will make Fresno surveys during period of KFRE-TV dual operation. "Through the combined operation... KFRE-TV will realize a significant competitive advantage in the months ahead," KJEO said, with diversion of its national business estimated at $100,000.

Ch. 47 outlet also charged that FCC granted dual operation only 10 days after application was filed; that no public notice was given of acceptance of application; that KFRE-TV did not publish its intentions as required by Sec. 311 of Communications Act, and that KJEO was not afforded opportunity to make pre-grant protest.

KJEO asked that its petition "receive at least as prompt action as the KFRE-TV request."
This division consists of Transfilm-Caravel, producer of tv film commercials and industrial films; Flamingo Films, distributor of tv film programs and Pyramid Productions, producer of tv film programs. Mr. Palma joined Transfilm-Caravel 15 years ago as a chief accountant and held various administrative posts until 1957 when he was appointed executive vp.

Everett E. Revercomb, secretary-treasurer of NAB, was re-elected for one year by NAB board of directors at Palm Springs, Calif., meeting. Mr. Revercomb served as acting administrator of NAB following death of President Harold E. Fellows. He held this post until current president, Gov. LeRoy Collins, took office at first of year. He joined NAB quarter-century ago, becoming secretary-treasurer in 1956.

**WEEK’S HEADLINERS**

The division consists of Transfilm-Caravel, producer of tv film commercials and industrial films; Flamingo Films, distributor of tv film programs and Pyramid Productions, producer of tv film programs. Mr. Palma joined Transfilm-Caravel 15 years ago as a chief accountant and held various administrative posts until 1957 when he was appointed executive vp.

**E. A. Revercomb**, secretary-treasurer of NAB, was re-elected for one year by NAB board of directors at Palm Springs, Calif., meeting. Mr. Revercomb served as acting administrator of NAB following death of President Harold E. Fellows. He held this post until current president, Gov. LeRoy Collins, took office at first of year. He joined NAB quarter-century ago, becoming secretary-treasurer in 1956.

**Lawrence White**, director of N. Y. daytime programs, CBS-TV since 1959, appointed vp, daytime programs of network. Mr. White was formerly supervisor of programs at Banten & Bowles. He also was executive producer of agency's two half-hour daytime serials on CBS-TV: *Edge of Night* and *As the World Turns*. It also was announced that **Bruce Lansbury** has been made director of daytime programs, Hollywood, CBS-TV. Mr. Lansbury has been assistant director of program development, CBS-TV-Hollywood since 1959 and was previously assistant program director and writer-producer at KABC-TV Los Angeles.

**John S. Hayes**, president of Washington Post Broadcast Div. (WTOP-AM-FM-TV Washington and WJXT [TV] Jacksonville, Fla.), promoted to executive vp of Washington Post Co., parent organization. He continues as president of broadcast division. Mr. Hayes began his broadcasting career at WIP Philadelphia in mid-1930s, coming to Washington in 1948 as executive vp of WINX (Post station at that time, now located in Rockville, Md.). He moved to WTOP next year when it was purchased by Washington Post. He is treasurer and board member of RAB, board member of CBS Radio Affiliates, board member of Assn. of Maximum Service Telecasters and chairman of CBS-TV Affiliates Committee. Mr. Hayes also is member of Freedom of Information Committee of NAB. Appointment was made by Philip L. Graham, president of Washington Post Co.

**FCC would reopen St. Louis ch. 2 case**

FCC Friday recommended to U. S. Appellate Court that St. Louis ch. 2 case be reopened for further consideration—but refused to disqualify any applicants for off-record representations. Order found only three of seven commissioners in favor as written; Commissioner T. A. M. Craven did not participate, Chairman Frederick W. Ford concurring with statement, Commissioners John S. Cross and Charles A. King dissenting and issuing statements.

Charges that Harry Tenenbaum, principal of KTVI (TV) St. Louis, had seen and talked to commissioners on St. Louis-Springfield, Ill., deintermixture rulemaking caused U. S. Court of Appeals in Washington to send back case for examination. Hearing on allegations was held before Special Examiner Horace Stern. On March 11 last year, Judge Stern issued initial decision finding that activities of Mr. Tenenbaum rendered 1957 grant voidable, that no member of commission should have disqualified himself from voting or participating further in case, that activities of any party did not disqualify, and that such activities should not reflect adversely in further consideration.

Although FCC accepted initial decision generally, it reserved for later decision whether actions of Mr. Tenenbaum should be considered adverse to KTVI in new proceedings being initiated.

Noting that it was general understanding that *ex parte* representations were not forbidden in rule-making proceedings, FCC nevertheless expressed criticism at action of Mr. Tenenbaum in leaving memorandum and engineering study with commissioners in October 1956.

In asking court to remand case for additional proceedings (to permit parties to respond to prior extra legal pleadings), commission made point that it was not interested in matters occurring subsequent to March 1, 1957.

**Network ordered to bargain**

ABC network division of American Broadcasting-Paramount Theatres ordered by trial examiner of National Labor Relations Board to cease refusal to bargain with Musicians Guild of America in connection with musicians working on tv films in Los Angeles.

**Official films earns profit**

Official Films Inc., New York, announced Friday unaudited figures for period July 1 to Dec. 31, 1960, show company had net profit of $92,000 (before taxes), as compared to pre-tax loss of almost $1.5 million in corresponding period of 1959. Because of available tax loss carry-forward, this year's net profit will not require federal income tax payment, according to Seymour Reed,Official president.

**Survey shows tv impact**

Great capacity of television to change viewer attitudes—whether about consumer products or intangible concept such as safety—is emphasized in report to be made public this week by National Safety Council concerning its in-depth research study of viewer opinions before and after Dec. 26 CBS *Reports* telecast of "The Great Holiday Massacre" by Edward R. Murrow.

**'Vegas' goes to prime time**

NBC-TV announced Friday Goodson-Todman Productions' new full-hour adventure series, *Las Vegas Beat*, will be presented in prime time next season. Formerly titled *Las Vegas*, new film show is one of several non-game show projects of Goodson-Todman (Broadcasting, Jan. 30), will be filmed in black-and-white at Paramount studios and on location in Las Vegas. Peter Graves will star in role of Bill Ballen, public relations man.
WITH WBT RADIO YOU FOCUS ON THE ONE WHO PAYS THE BILLS

The girl in the foreground could probably recite the nation's top 98 records with her eyes closed. Her mother, one of the nation's adults who receives and controls 98% of the U.S. income.* Which customer are you? WBT, Charlotte's over-all top audience radio station for 20 years, also has a higher percentage of listeners than any other Charlotte station. Adults turn to WBT because of responsible programming, service, and the South's finest radio talent. If you want to make sales for your clients, it makes sense to choose the nation's 24th largest radio market. There's $2,690,786,000 worth of spending money in Charlotte's county basic area, most of it controlled by adults... and WBT has more of the adult listeners.

WBT RADIO

Jefferson Standard Broadcasting Company

ACCEPTANCE

...greatest ever!

Now more than ever, WCCO Radio delivers more listeners than all other Minneapolis-St. Paul stations combined! A record-shattering 62.1% share of audience in the latest Nielsen Station Index. This is the greatest share ever recorded since Nielsen began measuring the market. Dramatic proof that WCCO Radio’s acceptance is now the greatest ever!

Capturing the loyalty of 1,022,610 radio families in a 114-county basic service area, WCCO Radio also delivers the lowest cost per thousand . . . less than one-third the average cost of all other Twin Cities stations. It’s a solid mark of solid acceptance . . . the powerful way to dominate this major market in 1961.

WCCO RADIO delivers far more listeners than all other Minneapolis-St. Paul stations combined!

DRAG YOUR DRACHMS / In ancient Greece a drachm delivered many things... a seat at a Sophocles play, a ride in a two horse chariot, a ticket to the Olympic games! Drachms, of course, aren't what they used to be... even the name has changed! But drachms, drachmas or dollars, they still go a long way in Baltimore at WBAL-Radio. WBAL-Radio takes the Greek out of station buying by translating these facts into sales: WBAL-Radio is powerful – dominating the entire metropolitan area plus 37 surrounding counties in Maryland and four adjacent states. WBAL-Radio is progressive – providing its listeners with a distinctive format of full range programming and music for mature minds. WBAL-Radio is productive – reaching more homes in a given week than any other Baltimore radio station, providing more unduplicated coverage in this market than any other station. If you want your advertising to deliver sales in Baltimore and Beyond, drag your drachmas to WBAL-Radio today... or call our reps and let them do your heavy work!

WBAL-RADIO BALTIMORE, Maryland's only 50,000 watt station
Associated with WBAL FM & TV / Nationally represented by Daren F. McGavern Co., Inc.
There is nothing harder to stop than a trend.
ABC is off and winging again. Every Nielsen rating thus far this year* continues to show ABC-TV the strong network on week nights and the leader all week.

It figures when you check program performance. The current Nielsen TV Report* gives ABC-TV five out of the ten top shows. And the only two brand new shows to make it in the top ten are My Three Sons and The Flintstones. ABC shows, that is.

The trend in ’61 is to ABC-TV
Fellow fighter

EDITOR: We've joined Maxwell Dane's fight for good creativity in production (OUR RESPECTS, Feb. 6).

It will be no surprise to Mr. Dane that a medium specifically dedicated to creative expression of the proper image for a client is FM radio. Donald Green, KXTR (FM) Kansas City, Mo.

Accurate portrayal

EDITOR: It is hard to be objective about a biographical article (OUR RESPECTS, Feb. 6), but I think it was well written and accurately represents my views. —Maxwell Dane, Vice President, General Manager & Secretary-Treasurer, Doyle Dane Bernbach Inc., New York.

A suburb called Minneapolis

EDITOR: Whatever happened to the old basic rule of good reporting, called "checking out the facts"? Your Jan. 13 issue (BROADCASTING ADVERTISING) lists our agency as located in St. Paul, Minn. We happen to be doing business in a suburb of that wonderful city, called Minneapolis. —Charles E. Anderson, Media Research and Analysis Supervisor, Campbell-Mithun Inc., Minneapolis.

All month long

EDITOR: Initial returns on the Broadcasters' Campaign for Radio Free Europe (THE MEDIA, Feb. 6) indicate a high degree of public acceptance, coupled with a letter of strong endorsement from President Kennedy and one from NAB President LeRoy Collins.

It has been recommended that we extend the appeal, which began Feb. 1, through the end of February. I think this is a most serious suggestion and am, therefore, urging your support for two additional weeks. —Donald H. McGannon, President, Westinghouse Broadcasting Co., New York.

Right owners

EDITOR: Your attention is called to an error in your issue of BROADCASTING for Feb. 6, page 60, wherein you state that Robert Nelson is the owner of the Windber Community Broadcasting System, which is seeking severance.

Robert Nelson has no connection with the Windber Community Broadcasting System. —E. Z. Eperjesy, M.D., Windber Hospital, Windber, Pa.

[Mr. Nelson was 90% owner of Windber Broadcasting Co. which dropped its application for the Windber station Nov. 14, 1960. Dr. Eperjesy is one-third owner of Windber Community Broadcasting System; other one-third owners are William H. Myers, electric line crew supervisor, and Louis J. Popp, who owns a welding service.]

TIME OUT FOR LOGIC

The combined ages of Mary and Ann are forty-four years, and Mary is twice as old as Ann was when Mary was half as old as Ann will be when Ann is three times as old as Mary was when Mary was three times as old as Ann. How old is Mary? *

Drop us a line before Mary gets much older and if you've solved this ageless intricacy we'll provide a copy of Dudeney's "Amusements in Mathematics" (Dover Publications, Inc., N.Y.) forthwith. If you have a copy, say so and we'll provide a different prize.

* Station break: We missed that last cue too, but WMAL-TV's audience probably includes Mary and Ann; it's the biggest in the Washington market 6 P.M. to midnight, all week, (ARB Dec. '60, and NSI Jan. '61.)
The jingle is old, but so is that sound in the cashbox

Get off the plane or train in Buffalo and tell the cab driver you want to go to "998" and say nothing more. If he asks you for more direction, I'll pay the fare.

I've made this offer for over two years now and haven't paid off once. I can afford to do it, thanks to the strong, personal identification that our store has achieved in the minds of Mr. & Mrs. Buffalo as the result of our 23 years of consistent radio advertising centering around our famous "Sattler's 998" jingle.

You can appreciate our radio success story more as you learn our store is three miles out of the downtown shopping area—a location problem that initially was one of our biggest problems that radio helped solve so effectively.

Not that I mean to imply that radio is our dominant medium. It isn't. But it is our dominant supporting medium. The big load of our specific item selling is done in newspapers. We're the biggest user of space in the Buffalo Evening News. To support this basic item advertising in print, we put about 10% of our total advertising budget into radio to sell our store, our address, our price values, our one-stop shopping, our parking lot, etc., plus some specific item merchandise spots.

We regularly use four local stations in Buffalo, and sometimes the nearby Canadian stations, to woo our over-the-border customers. We expand to nearly all stations for short saturation campaigns. Currently we're using 13 newscasts weekly (and plan to expand) as part of our schedule of 60 spots weekly, mostly jingle variations.

The story of our jingle is our radio success story. Customers hum it when they are in the store.

Entertaining, too • Since 1937 this is the tune that's been used to tell western New York folks all about Buffalo's wonder store. From the very outset there has been a very definite method to our music, so to speak. Our jingle always has been sung and played by the finest talent available, using the most modern technical facilities in New York City. We've kept each message light and gay to preserve its entertaining manner, to entertain as we advertise.

We believe our jingles were the nation's first singing commercials to be used on a continuing, large-scale basis by a retail department store. I would love to take full credit for the jingle, but in all due modesty I must report that this jingle, which has been played without interruption for 23 years, was written by my predecessor, Bob Cornelius, who, at his retirement some two years ago, was executive vice president and sales promotion manager of Sattler's.

The music for "9-9-8 Broadway" was written by Lanny Grey and produced by Lanny and Ginger Grey, Sattler's "Singing Sweethearts."

We've used other top-flight talent too. Among these we've had jazz pianist Johnny Guinieri, bass star Trigger Alford and guitarist Frank Malatta. Tony Lane and his Air Lane Trio did a set, too. So did Slam Stewart and (his quintet. We've been bold in our musical style at times, but we've absolutely refused to compromise with quality. For instance, some of the jingles we did 14-15 years ago—at the time we did them—we felt maybe we were a little "far out" musically. But we were right. And our constant updating and adding of new versions has kept the jingle fresh and welcome. We've never had a single complaint from a listener about its being "over-worked."

Razzle-Dazzle • Sattler's in its 71 years of existence has grown from a bargain-type neighborhood shoe store into the largest department store in western New York. Our greatest growth began in 1927 when the store was headed by a three-man team made up of John G. Sattler, our founder; Aaron Rabow, as merchandise head (he's now our president), and Mr. Cornelius as sales promotion manager. To bring traffic to the suburban location they hit upon a series of razzle-dazzle merchandising stunts that ranged from elephants in the dress department to weddings in the window, monkeys on the main floor and guessing contests on the weight of the world's largest hunk of bologna.

Anyone who was anybody in the entertainment world managed to make a personal appearance at Sattler's. Eddie Cantor, Buffalo Bob Smith, Hildegarde, Tommy Dorsey, Wyatt Earp, Mrs. Casey Jones and Elsie the Cow, to name a few. Senators, congressmen and governors have joined the parade, because they always go where the traffic is, and in Buffalo that's 998 Broadway.

In 1937 we hit upon our jingle and radio pattern. Radio's consistent use since then has proved its effectiveness.

Sattler's now is No. 2 on the scenic route in Buffalo, according to the local convention bureau. Niagara Falls is still first. But that's how famous our jingle has made us. However, our marriage with radio does not end there. We use radio and radio talent in our store in various ways. We stage disc jockey promotions and events in our store, originate shows from our windows. The personal association with employees, as well as customers, is a big morale builder. The Buffalo philharmonic pops concerts we sponsor have featured the "Opus 9-9-8," our jingle in long-hair style.

Does our quality jingle cost us much more than usual? No. Over the long haul it figures out to be an added production cost that is negligible when time costs average about $40 a spot.

998 Broadway could never have become the "address known for thrift" without the medium of radio. It has been only on radio that we have played the jingle (with some light use of tv, I must add), but it has been the radio jingle that has done the job. It has become so indoctrinated within ourselves that we many times call the store "9-9-8" instead of Sattler's, even in our newspaper ads.
Many media buyers measure radio stations by their ratings. Unmeasured by ratings are quality, integrity, and responsibility, factors that build sales through believability. By both standards WELI continually lengthens its lead in the rich New Haven-centered market it serves. Make it a rule to buy WELI, the station in New Haven that gives you ratings plus quality sound.
The world's biggest radio telescope

This is an artist’s concept of the world’s biggest radio telescope. This giant telescope will use radio waves to locate objects that are billions of light years out in space. The dish-shaped mirror will be 600 feet in diameter—about the size of Yankee Stadium. It will be the biggest movable radio telescope the world has ever known.

As you’d imagine, it is going to take a lot of material to build an instrument this size. The American Bridge Division of United States Steel, as a major subcontractor, is fabricating and erecting 20,000 tons of structural steel for the framework alone. The U. S. Navy, through the prime contractor, is supervising the entire job. When it’s completed, there’ll be a power plant, office buildings and personnel facilities for a permanent 500-man crew. The site is near Sugar Grove, West Virginia.

United States Steel produces many materials that are essential for construction: structural carbon steel; high strength steels; alloy steels; stainless steels; steel piling; steel drainage products; cements; slag; reinforcing bars; welded wire fabric; wire rope; steel fence; electrical cable; and other allied products.

The most important building projects in our nation depend on steel.

HOW IMPORTANT IS STATION IMAGE?

This extra dimension is influencing more timebuyer decisions

Many stations are selling qualities not revealed in ratings

The "image" a station projects to the timebuyer has become an important factor for agencies making media decisions, particularly when placing spot.

This fact of business life was upheld last week by a consensus of leading media executives who acknowledged the growing importance of "image." While there were some exceptions and a few differing opinions, most believed that stations are doing a better job of getting their images across to the agencies.

The finding—based on a cross-section check of the radio-tv buying fraternity—here is of importance when these important points are remembered:

- A station's "image" has assumed additional importance in recent years with both advertisers and their agencies placing stress on station qualities that are not revealed in the ratings.
- There are now more than 3,500 radio and about 530 tv stations on the air.
- With so many stations vying for the timebuyer's eye and ear, for many in the broadcast business, this question has persisted: How is the important "image" dimension communicated to agencies?

Only last week an official of a management consultant firm that is substantially involved in the advertising field questioned whether the "image" of a station is "received" by agencies today.

"For the most part, agencies still buy 'by the numbers'," he said. "The only way agencies can get information that goes beyond the surface—a station's strong and weak periods, its leading personalities, the nature of its competition, its influence in the market, where this influence lies and other subtle factors—is to be there on the scene, watching and listening and talking to station officials and people in the community. For the vast number of agencies, this just isn't done. And on the occasions when it is done, for specific clients, this information rarely filters down to the timebuyer."

Getting the 'Picture' - But a sampling of leading media officials interviewed by Broadcasting rejected the contention that their agencies use the "by-the-numbers" system indiscriminately and, decried the notion that the "image" characteristic can be obtained only by constant on-the-scene visits. They maintained that their timebuyers make a diligent effort to evaluate the advantages and disadvantages of particular stations in a market before arriving at a media decision. These were the highlights of their views:

- Agency account, media and research personnel make special visits to stations, particularly when an account requires it, and make this marketing data available to buyers.
- They rely heavily upon the experience and knowledge of their senior timebuyers, who have kept abreast of the particular values of particular outlets.

Young & Rubicam executive studies tv station imponderables

Miss Jean Taylor, as director of local radio-tv programming for Young & Rubicam, New York, travels thousands of miles each year to study stations. Purpose is to uncover qualities and services not reflected in data from conventional sources—the station's "image."

Here Miss Taylor is shown during a visit to WRBL Columbus, Ga., where she is talking with the station's living trademark. Her report on the station's community prestige, its impact and merchandising support will go back to the agency timebuyers for consideration when they are making their media plans.

The unit, headed by Miss Taylor, has been in active operation since 1955 and even before that the agency made studies of stations on a part-time basis. Y&R is convinced that Miss Taylor's recommendations are valuable in giving advertisers more for their broadcasting dollars. See story page 30.
HOW IMPORTANT IS STATION IMAGE? continued

totally—on facts and figures provided by the station representative and believe that reps generally are trustworthy and reliable in giving a picture of a station.
• They study promotional and research material supplied by stations, including tapes, trade advertising and direct mail brochures.
• They glean information from station executives visiting the advertising agencies.
From this mass of information, agencies believe, they can come up with a composite of a station. Agencies acknowledge that the extent of their evaluation depends on availabilities in a market ("If you can't get the station you want, you take the second or third choice"). The type of product and the audience desired are other considerations ("sometimes you want to buy 'by the numbers' if the main thing is to reach a lot of people").

They point out that "image" is much more significant in radio than in television. ("By sheer weight of number of stations, media selection is far more difficult in radio. Then, too, 'image' in TV is often tied to network affiliation.")

Other Methods • Several of the agencies, in addition to implementing the conventional approaches, have made use of other methods, either on a permanent or temporary basis. Young & Rubicam, New York, for example, has set up a special unit under Jean Taylor (see separate story, p. 30), which makes regular visits to stations and evaluates the "plusses and the minuses" of stations in specific markets.

Jack Peters, media director of Kastor, Hilton, Cheley, Clifford & Atherson, New York, surveys program listings of newspapers in outlying areas and thereby ascertains if station signals reach there.

Lee Hanson, media director of Mac- 
ton & Bowles; Doyle Dane Bernbach; Kenyon & Eckhardt; Ted Bates; BBDO; J. Walter Thompson Co.; Sullivan, Stauffer, Colwell & Bayles; N. W. Ayer & Son, and Maxon Inc.

The importance that is attached to the "image" factor can be gauged by remarks made only this week by speakers at the Timebuying & Selling Seminar of the Radio & Television Executives Society of New York.

Both Dr. Frank Mayans, vice president and associate research director of Y&R, and Mel Goldberg, research director of Westinghouse Broadcasting Co., were critical of the quality of station research that reaches advertising agencies. Dr. Mayans referred to station image research specifically and conceded that this was "difficult," but predicted some day such research will be "formally used in planning purchases."

The agency man pointed out six areas likely to be most telling with agencies and advised listeners to bypass standard rating coverage and market data that is easily available. What is needed from stations:

• Audience profile information, available nationally but not locally, he says. ("Until this information is available, I must assume that Monitor's audience makeup is precisely identical

Agencies charge salesmen lag back of program department

Creative selling is what an agency wants most from a radio station salesman, the February workshop of the Hollywood Advertising Club was told. Agency members of the panel led the free-for-all discussion on radio sales, which went on for more than three hours last Wednesday (Feb. 15). Many members of the audience took part in the discussion.

Merv Oakner, vice president of Anderson-McConnell Adv., opened the topic of creative selling with the charge that "radio's sales department hasn't kept pace with the program department." Program people at radio stations have been creative, he said, "but radio salesmen have become a bore... We're tired of buying by the numbers. We don't sell cost-per-thousand, we sell our client's merchandise. We want to be told how to use radio better, but no station salesman has come to us with a new idea in time buying since the five-minute time block and that was 10 years ago."

Shirley Crowder, timebuyer for Fuller & Smith & Ross, asked for more qualitative information from stations, such as age breakdowns, which she asserted are more often tailored to fit the station's sales pitch than the agency's need. She drew a hearty round of applause from the station men in the audience when she admitted that the common agency practice of not revealing who actually has the power to make the buying decision on any particular account is the cause of far too much wasted time for station salesmen.

But when Norman Boggs, KGIL San Fernando, speaking from the floor, suggested that more listening to radio by agency buyers would give them many of the qualitative answers they seek, Miss Crowder and Mr. Oakner disagreed. There are many others than teenagers who like the rock and roll, they declared, and not all of Guy Lombardo's and Lawrence Welk's fans are oldsters. Panel member Gordon Mason, sales manager, KNX Los Angeles, summed this viewpoint up with the comment: "musical likes can't be equated with age; they're a matter of taste."

Other panel members were Frank Crane, vice president of the station rep firm, Torbet, Allen & Crane, who urged radio salesmen to spend more time "fighting the enemy"—newspapers, magazines, TV—and stop devoting most of their efforts to selling against each other; Ira Lauffer, vice president and sales manager, KEZY Anaheim, who asked stations to institute training programs for new time salesmen, and Norman Keats, general manager, KFXM San Bernardino, who commented that in a secondary market like his most station prospects are retailers with no advertising budget or program beyond the use of space in the local newspaper to announce a sale.

Doubt as to the value of qualitative information was expressed by Carroll McKenna of the Petry Co., who pointed out that usually the rep doesn't get called into the agency until a campaign is breaking and a lot of stations are being bought at once.

Robert M. Light, president, Southern California Broadcasters Assn., was moderator of the panel discussion, of which SCBA was co-sponsor with the Hollywood Ad Club.
If you want a big audience at low cost per home, concentrate your broadcast schedules on Charlotte’s WSOC stations. WSOC Radio, now 5,000 watts at 930 kc, reaches over one million people. WSOC-TV, serving America’s 25th largest TV market, is one of the nation’s great area stations. Use them individually or together—Charlotte’s WSOC stations are your best buys in the Carolinas.

**Agency studies secrets of station 'image'**

Young & Rubicam, New York, considers a radio and/or tv station’s “image” to be important enough to maintain a separate staff whose main mission is to ferret out as much information as possible about local radio and tv station operation in various markets.

The unit, which has been in existence since 1955, passes on the data—which includes the unfavorable as well as favorable factors—to the agency’s media staff as well as to clients.

Headed by Jean Taylor, supervisor of local radio-tv programming, it consists of a full-time staffer (Paul Theriault) a part-time staffer (David Elton) at New York headquarters, plus three part-time aides—Michael Kirby in San Francisco, Bill Wilson in Chicago and Jim King in Hollywood. Miss Taylor estimates that she and Mr. Theriault each travel about 80,000 miles per year on their business trips to local stations, while the others log less millage but are available for “hurry-up” calls (the partners usually are involved in local account work).

The unit’s to uncover qualities and services of a station that may not be reflected in data uncovered from conventional sources. They attempt to ascertain, for example, the prestige attached to a station in the community; the impact of its various station personalities; the merchandising and promotional support given to an advertising campaign; the relative strengths and weaknesses of different time periods; a characteristic of the station that makes it “different” or “unique” in a market; changes in the market, and other data “beyond the ratings.”

**Evaluation Reports** • At the conclusion of each field trip, an evaluation report is compiled and is made available to clients. Miss Taylor stresses: “This is just an added service for our clients; we make no charge for it.” The information is also offered to Young & Rubicam’s media department for the guidance of its staffs.

In addition to field trips, the unit works closely with station representatives and makes every effort to see station executives when they visit Y&R offices. The unit maintains a voluminous file of records at New York headquarters and, according to Miss Taylor, many station representatives and others make use of this information.

The unit was established on a full-time basis in 1955 and earlier was maintained on a part-time schedule. As one example of the “go-go-go” tempo of the unit, Mr. Theriault was out on a field trip all of last week and Miss Taylor spent Wednesday, Thursday and Friday in Washington, D. C., and was scheduled to spend the weekend in Asheville, N. C.
GATEWAY TO THE HEART OF SOUTH CAROLINA:
The 257,961 people who make WIS-television’s home market the state’s largest metropolitan area (and a close second in the two Carolinas after a 38.1% increase in the 1960 Census) give Channel 10 their major time and attention, not to say devotion. This adds up to a 78.5 share of audience, says ARB (March 1960). And throughout South Carolina, WIS-television’s 1526-foot tower, tallest in the South, delivers more of the state, more effectively than any other station. In short, South Carolina’s major selling force is

Hodgson tells how I-H used radio to move farmer

The support of radio in helping International Harvester change farmer habits in buying major equipment was related by H. Earl Hodgson, president of Aubrey, Finlay, Marley and Hodgson Inc., Chicago agency for I-H, before the Chicago chapter of the American Marketing Assn. Thursday night.

He said the campaign that began last Oct. 26 has included 2,500 commercial minutes per month on 125 stations. Print media, direct mail and other promotion were used. Radio copy includes farmer-voiced testimonials and live sell by station farm directors.

Mr. Hodgson reported that at the half way mark in the campaign sales are "far better than had been expected" and "literally thousands of farmers" changed their buying habits and bought early. "This is especially significant," he said, in view of the fact the drive competed with the presidential campaign and the uncertain outlook in the farm market. He said the results have shown that "by using marketing, research and advertising in the hands of experienced farm advertising specialists" could change the habits of "one of the most stubborn segments of the consumer market."

Farmers traditionally have waited until the final six weeks before planting to buy, he explained, but the "early trader's bonus" campaign has proved effective in expanding the buying period up to six months. This has benefited the manufacturer, distributor and dealer in inventory control, repairing of used equipment and selling, as well as the farmer, since the latter gets a price bonus for buying early, he said.

RAB sales clinics to get results of retail study

Results of the "Department Store Challenge" will be offered for study during Radio Advertising Bureau's 11th annual Area Sales Clinic, opening April 3 in Albuquerque, N. M., and concluding in Tulsa on May 26.

Hailed by Kevin B. Sweeney, RAB president, as the "most comprehensive study of retail advertising ever published," the report on RAB's lengthy radio advertising program in cooperation with the Higbee Co. in Cleveland will be a major attraction for broadcasters attending the clinics in Key U. S. cities this spring.

Also on the sales clinic agenda: New radio presentations, tips for closing sales, money-making promotional ideas and suggestions on how to use RAB's service throughout the year. Patrick E. Rheumep, RAB's director of member service, pointed out that for the first time meetings will be split on the basis of "most frequent local customer." Stations which derive most of their local income through advertising agencies are urged to send their sales executives to the "large market clinics," while stations which rely more on direct selling to local retailers will get material keyed to their needs at the "small and medium market clinics."

TV'S OWN KITCHEN

ABZ opens N. Y. building
for making food commercials

The opening of a special building in New York last week to facilitate the production of television food commercials would indicate that the House of Food Marketing is trying to catch up with the trend over the past few years, through packaging, to make food items themselves more attractive to the consumer.

ABZ Assn., a tv commercial production firm, last week opened the doors of a remodeled four-story building at 266-68 E. 78th St. which will be used exclusively as a "food production center" for the production of commercials.

The 50-year-old, remodeled former film studio contains under one roof everything needed to produce tv food commercials, reports Ann B. Zekauskas, ABZ president.

Miss Zekauskas, a tv home economist, food consultant and commercial stylist, says another advantage of the production center is that it will allow food commercials to be produced under "controlled" conditions. Formerly, Miss Zekauskas said, food commercials were produced on a "catch-as-catch-can" basis with insufficient space and props. Her new facilities, the home economist notes, allows more space and equipment to food commercials than anyone has ever done before.

Miss Zekauskas said the first floor has a shooting studio with an accessory double shooting kitchen, the mezzanine, a dressing room and lounge, the third floor a double shooting kitchen, terrace and offices, and the top floor three shooting kitchens and a prop room.

She said every floor is circulated separately to assure that all equipment will work at full capacity. "Our ovens are hot, our freezers plenty cold and when a commercial calls for 18 sets of mixing bowls, we don't have to run around looking for bowls—we have them," she said.

Commercials produced in the new center are video taped by mobile units stationed in front of the building. A good deal of ABZ's present business is handled by Video Tape Unlimited, headed by Hank Alexander, former lighting director of CBS.

Miss Zekauskas and her two brothers,
Are your salesmen blue? Give them a news service that sells.

United Press International
Ray and John, both graduate engineers, make up ABZ's board of directors; her younger sister Betty is vice president; her sisters-in-law Mrs. John (Phyllis) Zekauskas and Mrs. Ray (Felicia) Zekauskas are secretary and treasurer, respectively.

ABZ currently is doing food commercials for 30 top agencies; among its clients are General Mills, Corn Products, Standard Brands, Alcoa, Frigidaire, Goodman Noodles, Sealtast and Lipton Tea.

New firm to represent U. S. outlets in Japan

Anticipating Japanese spot buys on U.S. tv and radio stations "in rapidly increasing amounts," a new firm organized to represent U.S. stations in Japan established offices last week in New York.

Rynne & Wilson, owned jointly by Donald G. Rynne, president of the import-export firm of Rynne International Corp., and Allan M. Wilson, vice president, The Advertising Council, currently is negotiating a limited number of representation contracts with U.S. stations.

Estimates by the new company and by Dentsu Adv. Ltd., which R&W says handles 60% of Japan's advertising business, indicate that the volume of U.S. spot buying by Japanese exporters and advertising agencies will reach $10 million annually in three years. Through offices at 745 Fifth Ave. in New York (telephone: Plaza 1-3424) and a branch office in Tokyo, Rynne & Wilson will be working with Dentsu and other Japanese agencies to expand advertising expenditures in the U.S.

Agency appointments...

- Sears, Roebuck & Co., Chicago, to Ogilvy, Benson & Mather, N. Y., to handle national advertising and consult on all other phases of Sears' advertising. Sears' national spending has dropped sharply past several years after high of $2.25 million in 1957. Former agency was Cunningham & Walsh.

Business briefly...

Minute Maid Corp., frozen juices, and Tupperware Home Parties Inc., both Orlando, Fla., will co-sponsor Marine-land Circus, an Easter Sunday color special on NBC-TV (April 2, 8-9 p.m. EST). The aquatic spectacular will star Lloyd Bridges and Buster Crabbe. Agencies: Ted Bates & Co. (Minute Maid); BBDO (Tupperware).

Mutual of Omaha has purchased sponsorship on a staggered schedule basis in NBC-TV's Chet Huntley Reporting (Sun. 5:30-6 p.m. EST), starting Feb. 26 and continuing May 28. Agency: Bozell & Jacobs Inc., Omaha.

P. Lorillard Co. will sponsor a nighttime version of Concentration on NBC-TV starting April 11 (Mon. 9:30-10 p.m. EST and replacing Dante). The show also is on weekends (11:30 a.m.-noon EST). Agency: Lennen & Newell, N. Y.

Purex Corp. next season will sponsor 12 full-hour special programs, extensive segments of NBC-TV's daytime schedule and two series of special programs, including the Purex Special for Women series. This includes six new shows of the Women series (hour-long daytime specials) and five one-hour The World of... series of NBC Special Projects in the prime evening schedule. Still other Purex specials will be repeated. Agency: Edward H. Weiss & Co., Chicago.

Ralm Products Inc., Joliet, Ill., maker of Mr. D'Frost, aerosolized ice-de-

froster, names M. M. Fisher Assoc., Chicago, as agency to handle campaign that will include tv spot.

TvB cites success of auto tv schedules

Nearly 70% of all New York area homes were reached in a one-day tv schedule for Pontiac automobiles last October, reports a new Television Bureau of Advertising study released today (Feb. 20).

The study of tv's fast reach also details a four-week Rambler schedule, which delivered 97.9% of all homes in the area, with an average 8.8 Rambler spots seen by viewing families.

The Pontiac schedule (Oct. 6, 1960) consisted of 24 spots and a Victor Borge special program on ABC-TV. Unduplicated ratings in New York were: Victor Borge 26.2, the spots 60.6 and both 69.7. The average number of Pontiac commercials seen on the special were 3.1, for the 24 spots 1.7 and for the combination 2.7. Viewing both were 17.1%; 43.5% watched the spots only, and 9.1% the special only.

The Rambler tv schedule consisted of 174 minute and 20-second spots on all seven New York stations in the four week period ending Nov. 6, 1960. The report shows 13 spots in prime time on network stations, while 161 were on independent or on network stations in non-prime time, most of them appearing on Wednesday, Thursday or Friday of each week. Rambler's weekly cumulative audience was 82.6% of tv homes, the average number of spots seen was 2.6.

Women's hygiene product begins radio ad campaign

"It's more than a monthly protection; it's a blessing." With this slogan as a spearhead, Tassette Inc., makers of a new hygienic product for women, has begun its formal broadcast advertising.

Tassette, through its agency, Weiss & Geller Inc. New York, on Feb. 13 started the radio campaign of more than 110 and 30 commercials weekly on WNTA Newark, N. J. As of late last week, WNTA was the only station carrying the Tassette spots.

For several months, starting last spring and ending last month, WHEC Rochester, N. Y., and WHP Harrisburg, Pa., has been using the firm's advertising as part of a test to gauge public reaction to this type of on-the-air personal product advertising. According to an agency spokesman, there were few listener complaints in the two cities. As far as there has been no adverse reaction to the WNTA spots. Altogether, Weiss & Geller has prepared more than 100 spots for broad-

"WAGA-TV's EDITORIAL IS A SIGNIFICANT INFLUENCE TOWARDS... AN INFORMED ELECTORATE..." Bobby Jones

Since May, 1960, the telecast of editorials twice each weekday evening has brought a "free and responsible" independent editorial voice to the Atlanta area. "In the words of Robert T. Jones, Jr., world-famous champion golfer, lawyer, businessman and one of Atlanta's favorite citizens... "On the theory that good government begins at home, it is vastly important that local issues should be resolved by an informed electorate. I believe sincerely that WAGA-TV editorial is a significant influence towards this end." One of the basic programming objectives of WAGA-TV is to promote community betterment... the development of an active, informed citizenry... to cooperate with the recognized governmental, civic, charitable, religious, educational, and other agencies dedicated to these ends.

famous on the local scene... for public service

waga-tv 5
THE STORER STATION IN ATLANTA
Tenting in D.C.,

or

In One Era
and Out the Other

Finding a roof for five Corinthian tv station news-and-camera teams in Washington, as the Kennedy era began, was much more difficult than finding reason for their presence. They had no intention of duplicating CBS’s superb network coverage; they sought to duplicate only Corinthian’s success, as evidenced by coverage of last year’s conventions, in relating major political events to their own communities.

Local news doesn’t come to us. We go to it, even if it’s in D.C.—and even if our definition of local is non-traditional. Without a legacy to stand on, our individual station news teams tackled Project Washington with mike and camera. The Houston group was after, among other things, a Ladybird’s eye view; Tulsa hoped to strike oil by spending a day with Senators Kerr and Monroney; our gentlemen from Indiana got on the bandwagon with the state’s Drum and Bugle Corps; the young men from Sacramento, reversing Greeley’s advice, came east to cover the Inauguration’s pomp—and to examine plans for legislation affecting their tele-urban community.

Different regions find different meanings in Washington, 1961. Those differences are best explored by local tv reporting crews and public affairs programming, focusing on political faces and issues of special interest to the folks back home. This is the kind of journalistic initiative, under group organization, that results in high identification with regional audiences, cementing stations to communities and communities to stations.

Responsibility in Broadcasting

THE CORINTHIAN
cast use. The agency has been negotiating with the Herald Tribune Radio Network (WVIP Mt. Kisco, WVOX-AM-FM New Rochelle, WGHQ Saugerties and WFYI Mineola, all New York) to carry the Tassette campaign, but without any definite results.

Weiss & Geller authorities, however, said last week that at least three stations in the New York area are expected to accept Tassette's advertising within a few weeks. They also said the extent of the radio campaign will depend on how many stations can be cleared.

The broadcast campaign is only a small part of Tassette's overall advertising plans which got underway this month with ads in the New York Times and New York Herald Tribune, with the New York Daily News to follow. In addition, a first for a product of its kind, Tassette will be the subject of a huge Broadway sign.

$4.3 billion ad receipts in 1958; New York leads

Advertising agencies reported $4.3 billion in receipts for 1958, according to the Census of Business for that year, made by the U. S. Census Bureau. Operations of 4,240 agencies were covered. Among receipts of 3,367 agencies that reported detailed information were $3.4 billion in billings for advertising media; $725 million in billings for advertising materials and services; $89.1 million in services; $23 million in other income.

Receipts of the 847 agencies in the New York metropolitan area totaled $1.9 billion. Chicago ranked second in number of agencies with 353 but receipts were not published. Detroit was third with 121 agencies having $335 million in receipts. Los Angeles was fourth with 315 agencies and $220 million in receipts, with Philadelphia's 146 agencies having $101 million.

Valiant lets stations write own movie ad copy

In an unusual approach to radio advertising of motion pictures for key theatrical engagements, Valiant Films, New York, distributor, has decided to invite stations to write their own commercials for its new feature film release, "The Angry Silence," starring Pier Angeli and Richard Attenborough.

Benn F. Reyes, advertising manager for Valiant Films, implemented this formula on an experimental basis in San Francisco, where eight radio stations in the area carried "staff-written commercials" to advertise the feature, starting Feb. 9. He was "highly pleased" with the results and will use the approach in 30 key markets.

Mr. Reyes said he checked the San Francisco copy for content and needed to make only a "very few and very minor changes." Station managers and other selected staff members are invited to see a preview of the feature. He believes that for many campaigns such an approach has advantages over the traditional method of supplying stations

The case of the missing head

The missing head in this scene from a new TV commercial is an optical illusion achieved by "Streechilation," a new technique in commercial use that combines live action, an animation method and stop-motion camera work. The name was coined by Joseph Danis, broadcast producer of Geyer, Morey, Madden & Ballard Inc., New York, in honor of the developer of the technique, Wilbur Streech, whose company is producing a series of commercials for B. T. Babbitt Inc.'s Bab-O cleanser and Hep oven cleaner. Walter H. Wright, account supervisor at GMM&B, recommended "Streechilation" for both products. The commercials began running last month on eight daytime shows on ABC-TV. Action in the 60-second Bab-O commercial, pictured here, begins this way: Before new-formula Bab-O with germicidal action appears on the scene, pots and pans, "allergic to germs" in the sink, fly out of it. The ghost-like figures, who are played by professional actors, dodge the pans while chasing germs with the new Bab-O. "Streechilation" creates surprise visual effects comparable to sleight of hand—imanimate objects come alive and humans perform impossible feats. The music track for the commercial was created by Ralph Burns, in his first association with Wilbur Streech Productions Inc.
What picture do you want to send to the folks at home?

Which makes you look most appealing? The cloak of mystery...the mantle of drama...the tilt of a six-shooter? The answer is important, for the sophisticated advertiser knows that his sales-impact can be greatly affected by the kind of program he chooses. To him, the crucial test of a network is: How well is it doing with the kind of program he wants to sponsor?

Any advertiser who applies this test will find that one network attracts the biggest average audience in every entertainment category—as shown by nationwide Nielsen ratings for all regularly scheduled shows (6-11 pm, Oct '60-Jan '61):*

This unique achievement of audience leadership and program balance gives advertisers their greatest assurance of success with the kind of program that makes them look best.

It also explains why for the past six consecutive years the nation's advertisers have committed more of their budgets to this network than to any other single advertising medium. They just like our looks.

CBS Television Network ©
Filmways, Joe Levine plan to produce movie

A television film company and a flamboyant moviemaker have teamed up to do a motion picture next fall. At release time next year, broadcasters should take in some hundred-thousands in dollar revenue, based on past exploitations.

A story owned by Filmways Inc., New York, looked good to Embassy Pictures' Joseph E. Levine, who exploded to prominence over the past two years with highly charged promotions for "Hercules," "Hercules Unchained," and a growing succession, all produced abroad until now. Martin Ransohoff, chairman of Filmways, and Mr. Levine have agreed to produce "Boys' Night Out," based on the property owned by Mr. Ransohoff's firm and being written for the screen by Marion Hargrove. The Filmways chief will produce while Mr. Levine concentrates on executive work. Michael Gordon, director of "Pillow Talk" and "Portrait in Black," will direct "Boys' Night Out." Composer Jimmy McHugh will do the music.

This is the first big move in a diversification program announced last year by Filmways, which began with tv commercials in New York and later added a tv program subsidiary in Hollywood. Filming will be done in New York at Filmways large new studio opened in 1959 and at a West Coast lot to be determined, probably facilities of whatever company contracts for distribution.

The advertising budget for "Boys' Night Out" is expected to exceed $1 million, with tv spot getting perhaps a quarter of the money and more going to radio.

For better business

The Advertising Council, New York, which actively fought the business recession in 1958, will start on a similar campaign in March to halt the present slump. Announced last week: Bozell & Jacobs Inc. as volunteer agency to handle all public relations facets. McCann-Erickson is volunteer advertising agency as it was in 1958. The council will coordinate its fight against the recession under the overall theme of "Confidence in a Growing America."

NTA TO SELL WNTA-AM-TV; LANDAU OUT

Firm cites losses, plans to stick to TV programs, films

In a series of significant but not unexpected moves, National Telefilm Assoc., New York, last week announced the company is putting WNTA-AM-TV New York up for sale and that Ely A. Landau, its co-founder and board chairman, has resigned to form a syndicate that will make a bid for the radio-TV outlets.

The company's decision to sell the broadcasting stations, approved by the board of directors on Thursday (Feb. 16), followed a gloomy financial picture revealed earlier in the week, in which a net loss of $7 million was reported by NTA for the fiscal year ended last Sept. 30. Oliver A. Unger, who was moved up from president to chairman, replacing Mr. Landau, told a news conference in New York that the sale of the stations would serve a two-fold purpose: help reduce current indebtedness, and permit NTA to concentrate on the business of developing and distributing filmed and TV programs, which, he said, accounts for 80% of the company's gross income.

NTA's short-term indebtedness is reported to be about $6.5 million.

Mr. Landau said he is forming a syndicate that will make a bid for WNTA-AM-TV initially and also will acquire other broadcasting properties. He said he is prepared to make a "substantial" offer for the stations.

NTA bought the stations in 1958 for $2,555,000, plus $455,000 in debts, according to Mr. Unger. He said they had been operating at a loss until the past year but "now are in the black."

Started in 1953 • NTA began active operations in the TV film distribution business in 1953, with Mr. Landau serving as president until 1957 when he became chairman. Mr. Unger joined the company in May 1954 as executive vice president and was elected president in 1957. It has been an active distributor of filmed serials and feature films and has more than 500 20th Century-Fox features in its catalogue. It also distributes series produced by Desilu Productions and films made by Warner Bros., the BBC and others.

Mr. Unger said NTA has an investment of more than $74 million in film and tape programs, adding that the company's main job in the months ahead is "to make a profit on this investment."

Mr. Landau, in reply to a question, said he has approximately 21,000 shares in NTA. The stock has been selling at $3½ in recent weeks. He indicated he will hold on to his shares now but may sell later.

NTA's board of directors elected Martin Leeds to fill the vacancy caused by Mr. Landau's resignation. Mr. Leeds was executive vice president of Desilu Productions from 1953 until last September.

NTA announced earlier in the week it had a net loss of slightly more than $7 million for the fiscal year ended Sept. 30, 1960, but pointed out that this resulted from heavy amortization of its film inventory. During the fiscal year, NTA amortized almost $12 million against slightly more than $14 million in sales of motion pictures and other film products to TV.

The NTA announcement noted that over the past five years, the company has acquired an inventory of film and tape programming that has been reduced by amortization from an original cost of more than $74 million to $26,206,000. The company's net worth was said to have increased from $2 million to $4.2 million during the past fiscal year.

NTA officials noted that the heavy amortization of its inventory presages "a brighter outlook" for this year and subsequent years.

NAB 1962 fall meets

A schedule of eight NAB fall conferences for the 1962 season was adopted Feb. 10 by the NAB Board at its Palm Springs, Calif., meeting. The 1961 Fall Conference schedule had been adopted a year ago.

The 1961 fall conference schedule follows: Oct. 9-10, Jefferson, St. Louis; Oct. 12-13, Sheraton Dallas, Dallas; Oct. 16-17, Utah Hotel, Salt Lake City; Oct. 19-20, Sheraton Palace, San Francisco; Oct. 30-31, Robert Meyer, Jacksonville, Fla.; Nov. 9-10, Somerset, Boston; Nov. 13-14, Pittsburgh-Hilton; Nov. 16-17, Leamington, Minneapolis.

WHAS-AM-TV telethons prove boom to children's charities

A charity telethon crusade conducted annually by WHAS-AM-TV Louisville, Ky., always has turned in gratifying results. But after the 1960 campaign it would be no overstatement to term the results “phenomenal.”

The station got top radio, tv and motion picture talent to donate their services in exchange for contributions to The Theatre Authority Welfare Funds (under union requirements). For 16½ hours the station devoted all time to the “Crusade for Children,” with all proceeds going to charities for all varieties of handicapped children. The five-man panel of clergymen who appear regularly on WHAS’ The Moral Side of the News served as a board to decide the money allocation.

Successful telethons were conducted in 1952 and 1953 for specific charities limited to one medical problem and encouraged the station to launch the full crusade for all children’s charities in Kentucky and southern Indiana in 1954. That year $156,726 was raised in cash. Twenty agencies benefitted.

The 1955 crusade netted $183,624 and 24 agencies shared. Money was given for research, for hospitals and institutions and for scholarships for teachers of the handicapped. By 1960 the crusade had gathered such momentum that $208,174 was raised and after expenses $199,324 was distributed among 39 children’s agencies. The largest grant was $19,229 to Handicapped Children Inc. of Louisville; the smallest grant provided a $350 scholarship to qualify a trained teacher for a school for retarded children. In addition to the 16½-hour telethon, WHAS-AM-TV staged extensive promotion and publicity for the crusade.

KFRE-TV moves to uhf; backed deintermixture

The first vhf tv station to shift voluntarily to uhf took the plunge Friday. KFRE-TV Fresno, Calif. (ch. 12), began telecasting on uhf ch. 30 with a special program that included a message from FCC Commissioner Robert E. Lee, Fresno Mayor Arthur Seiland, and Roger Clipp, Triangle Publications Inc. vice president in charge of radio-tv. The move followed an FCC order deintermixing Fresno to an all uhf market.

This was supported by KFRE-TV.

For about 30 days KFRE-TV will transmit on both ch. 12 and 30 to provide a continuity of service and to permit orderly transition to uhf.

Now operating in Fresno, in addition to KFRE-TV, are ch. 47 KJEO (TV) and ch. 24 KMI-TV. In granting permission, the commission noted that an inquiry still is pending into Triangle’s compliance with sponsorship identification rules (Sec. 317 of the Communications Act) and that the action would not prejudice any final determination. Triangle also owns WFIL-AM-FM-TV Philadelphia, WFBG-AM-TV Altoona, WLYH-TV Lebanon, all Pennsylvania; WNBF-AM-FM-TV Binghamton, N. Y.; WNH-AM-FM-TV New Haven, Conn., and KFRE-KRFM (FM) Fresno.

WLW to receive first Broadcast Pioneers award

The Crosley Broadcasting Corp. will be honored with the presentation of the first annual Mike Award to WLW Cincinnati by the New York chapter of Broadcast Pioneers, Feb. 26.

In selecting WLW for the award, the Broadcast Pioneers cited the station for “distinguished contribution to the art of broadcasting, and in recognition of pioneering in development of the field of entertainment, leadership in engineering development, and advancement of the careers of performing artists.” The station went on the air March 22, 1922.

More than 100 former WLW performers are expected to join officials of radio and television networks, the Broadcast Pioneers, Crosley Broadcasting, AVCO (parent, organization of Crosley), civic, state and the press at the affair to be held in New York’s Latin Quarter. Among them are: Doris Day, Andy Williams, the Ink Spots and Rod Serling.

Coincident with the Mike Award, the Broadcasters Foundation also has been established to foster and promote the welfare of persons in need of assistance who have been employed or who are employed in broadcasting for 20 years or more; in television for 10 or more years. Robert E. Dunville, Crosley president, and H. V. Kaltenborn, founder of Broadcast Pioneers, both have been named to the new group’s board of directors.

Rebuilt WWTV (TV) back on-air after big fire

WWTV (TV) Cadillac, Mich., almost completely wiped out by a fire Jan. 24, is back on the air. Live programming is expected to be restored by next week.

Terminating the rebuilding effort "a modern miracle," Gene Ellerman, vice president and general manager of WWTV, lauded station and RCA engineers who worked around the clock to return network and film service to the station. Paradoxically, it was a calm in the weather that enabled workmen and technicians to complete their tasks in near record time. The same Michigan weather—on Jan. 24, a shivering 10 below zero with lashing winds—prevented firemen from extinguishing the blaze before WWTV had been virtually leveled.

Operations, for the time being, are being conducted from temporary structures, house trailers and the station's downtown Cadillac headquarters.

Md.-D. C. broadcasters host area congressmen

The first annual "get-together" dinner between the Maryland congressional delegation and the officers and directors of the Maryland-D. C. Broadcasters Assn. was held Feb. 9 at Washington's Statler-Hilton Hotel.

Those attending were R. C. Embry, WTHI Baltimore; Charles J. Truitt, WBOC Salisbury; Virginia Pate, WASA Havre de Grace; Lloyd W. Dennis, WTOP-AM-FM-TV Washington; Morris H. Blum, WANN Annapolis; Ben Strouse, WWDC Washington; Fred S. Houwink, WMAL-AM-FM-TV Washington; Robert B. Jones Jr., WFBR Baltimore, and Joseph W. Goodfellow, WRC-AM-FM-TV Washington.

Also Reps. Thomas F. Johnson (D), Samuel N. Fridel (D), Daniel B. Brewer (D), Richard E. Lankford (D), Charles M. Mathias (R) and Sen. J. Glenn Beall (R).

Changing hands

ANNOUNCED = The following sales of station interests were reported last week, subject to FCC approval:

- WMIN St. Paul, Minn.: Sold by William F. Johns Jr. and associates to publicly held Tedesco Inc. (Victor and Nicholas Tedesco) for $200,000. The Johns' group bought WMIN in 1955 for $75,000. Tedesco brothers at one time owned WCOW South Saint Paul (now KDWV), and other radio stations in Stillwater, Cloquet, Red Wing and Rochester, all Minnesota, and Sparta, Wis. They now own KFNF Shenandoah, Iowa, have an application pending for Chisholm, Minn., and have purchased (pending FCC approval) KWKY Des Moines, Iowa, and KBLO Hot Springs, Ark. Sale of WMIN, 250 w on 1400 kc, leaves the Johns' group with WEW St. Louis, WWOM New Orleans, KOME Tulsa and WLOD Pompano Beach, Fla. Broker was Hamilton-Landis & Assoc.

- WNOs High Point, N. C.: Sold by Charles Doss and Jim McLean (original "Dr. 1,0,"") to Frank Funderburk, J. Archie Laney, William D. Benton and Robert M. Smith, owners of WMAP Monroe, N. C., for $122,500. Mr. Doss owns WROM Rome, Ga. WNOs is 1 kw day on 1590 kc. Broker was Blackburn & Co.

- WHMS Charleston, W. Va.: Sold by Joseph L. Brechner, to Edward Clinton for $95,000. Mr. Clinton is former owner of WSSB Durham, N. C. WHMS is 140 kc with 250 w.

- KCHY Cheyenne, Wyo.: Sold by Robert S. Pommer to Charles W. Stone for $82,469. Mr. Stone is present general manager of station, which is 1 kw daytime on 1590 kc. Sale negotiated by Paul H. Chapman Co.

APPROVED = The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For The Record, page 146).

- WTHR Panama City Beach, Fla.: Sold by Helen W. King to B. F. J. Timm for $78,000. Mr. Timm has interests in WDMG Douglas and WTIF Tifton, both Georgia, and WMEN Tallahassee, Fla. Chairman Frederick W. Ford and Commissioner Robert T. Bartley dissented, expressed belief there should be a hearing to determine Mr. Timm's history of stations sales and purchases.

- KRKM-TV Roswell, N. M.: Construction permit sold by William Sam Evans to Perry C. Maxwell, Penrod Toles and Clarence E. Hinkle for $10,000 plus assumption of obligations for equipment. FCC also extended completion date. Commissioner Robert T. Bartley dissented on ground commission should not extend completion date in order to permit grantees to sell.

Broadcast newsmen soon will have vastly improved communications in their coverage of world affairs but it still will be necessary for reporters to get the news when and where it happens, ac-
Total Retail Sales
in WWTV-Land
Surpass Those in
5 Entire States!

Families in the Northern Lower Michigan area covered by WWTV, Cadillac-Traverse City, compose a greater retail sales market than you'll find in 5 entire states.

WWTV is the only medium covering this 36-county area. You'd have to use 13 daily newspapers or 16 radio stations to duplicate WWTV's coverage. WWTV is by all odds the great favorite in this area as proved by its No. 1 position in 433 of 450 quarter hours surveyed, Sunday through Saturday, 8 a.m.-Midnight (NSI, Cadillac-Traverse City—June 6-July 3, 1960).

Add WWTV to your WKZO-TV (Kalamazoo-Grand Rapids) schedule and get all the rest of outstate Michigan worth having. If you want it all, give us a call!

*Retail sales in the WWTV area are $309.8 million—more than in N.H., Alaska, Hawaii and Del. or N. (Source: SRDS, October 15, 1960)

CBS, IBEW sign pact for $10 wage boosts

CBS and the International Brotherhood of Electrical Workers last week reached tentative agreement on a new 2½ year contract, calling for a $10 weekly increase in salary and certain added fringe benefits. The proposed contract has been submitted to about 1,100 members of the union for ratification.

Under terms of the agreement, weekly wages of technicians will be raised from an average $190 to $200 per week but no other increases will be granted during the life of the contract, retroactive to Feb. 1, 1961, and extending until July 31, 1963. In addition, IBEW members will receive medical and hospitalization insurance and "substantial improvements" in severance pay for workers who are laid off.

Six IBEW locals are involved in the agreement, reached Feb. 13. The mail referendum is being taken in Boston, New York, Chicago, St. Louis, San Francisco and Los Angeles. Affected are technicians at CBS-owned stations in these cities and its shortwave operations at Wayne, N. J.; Brentwood, N. Y., and Delano, Calif.

Negotiations started Jan. 16 in New York, recessing to Washington Jan. 23. Commissioner Gilbert McCutcheon, of the Federal Mediation & Conciliation Service, participated the last two weeks. Final issues were described by IBEW as technical, primarily involving items relating to work and geographical jurisdiction, health and welfare benefits, and overtime limitations. Ballots are returnable March 6. The old pact has been extended beyond its Jan. 31 anniversary date pending the referendum.

Capitol Cities gross, net up

Capitol Cities Broadcasting Corp. announced last week that its gross income for 1960 exceeded $8.4 million, as compared with nearly $6.1 million in 1959. Net income was reported at $817,263, as against $380,545 in 1959. Net earnings per share were listed at 71 cents for 1960, as compared with 33 cents in 1959. Capitol Cities owns WROW-AM-FM and WTN (TV) Albany, N. Y.; WCDC (TV) Adams, Mass.; WTVD (TV) Durham, N.C. and WPRO-AM-FM-TV Providence.

Haskell-Volkman consultancy

John D. Haskell and Donald F. Volkman have formed a broadcast consultancy firm to serve broadcasters in the Midwest. The firm's primary function will be field engineering. Offices are located at 7265 Memory Lane, Cincinnati. (Telephone: Webster 1-0307)

Cover.

various studio-bound on anniversary of the development of aluminum, observed at Oberlin, Ohio. Mr. Hagerty said broadcasters must develop on-the-scene reporters who are not studio-bound voices. He envisions an ABC staff of reporters specializing in various fields, giving them enough exposure to assure public association of these newsmen with the events they cover.

A network of communications satellites will be operating around the world within a decade, he predicted, with ABC having reporters able to speak the language of the area they cover.

Worldwide, he said, will make it imperative for Americans to improve the image they present to the world. He spoke critically of both radio and TV networks and stations for their news coverage— including ABC in the criticism. He felt too much reliance has been placed on wire service reporting and not enough emphasis on news from a personal participation point of view. The Oberlin talk was Mr. Hagerty's first public appearance since assuming the ABC post.
"HIGH AND MIGHTY"
36.0 CUMULATIVE
LIVES UP TO NAME

Seven Arts release sweeps Sunday night competition; beats all but "Americans" premiere Monday on KTVU, San Francisco

A.R.B. coincidental, "cume" for two airings rates "High and Mighty" a 36.0 or 30% higher than combined ratings for number two station.

William D. Pabst, General Manager KTVU reports:

"We are more than happy with the strong audience appeal of Warner's 'Films of the 50's' demonstrated by the first Seven Arts feature film we've aired.

"The smashing 36.2 share of audience Sunday night was scored against Shirley Temple, Lassie, Dennis the Menace, Walt Disney and Maverick.

"Our second showing Monday also beat everything in sight except the heavily promoted debut of 'The Americans,' and even there the Warner's feature film came within one percentage point of a tie!"

The Exciting Years
on WXYZ-TV, Detroit

One of the superior productions through which creative talent and community leadership are continually building new vision into Television on stations represented by BLAIR-TV

“Our objective for programing: To provide our entire area with a well-rounded schedule, including plenty of mental nutrition, seasoned with genuine interest. In “The Exciting Years” a solid core of science has been dramatized and successfully paced. In such productions, we have made static subjects leap from the tv screen with real excitement. Advertisers tell us that such programing creates a very friendly acceptance for their messages.”

JOHN F. PIVAL
President, WXYZ-TV
Value That Endures

Choosing subjects for informational telecasts is comparatively simple. The real problem is: "How can we make these subjects come alive?"

In the Detroit area, that problem has been effectively solved by Station WXYZ-TV in its popular public-service series, "The Exciting Years." Produced by the staff of the WXYZ-TV, and scheduled every third week in prime time, "The Exciting Years" combines drama and historical fact in tracing the development of modern scientific 'miracles.' "By Transcription" for example, told the fascinating story of recorded sound, from early music-boxes up to today's stereophonic achievements.

The telecast "Flight" visualized the many steps leading to man's conquest of the air. Rare exhibits presented in "Flight" included the first glider, and Admiral Byrd's planes, through the fine cooperation of the Henry Ford Museum & Greenfield Village.

Besides its popularity with Detroit viewers, "The Exciting Years" has been endorsed by the Detroit School System, and acclaimed by press and community groups. Along with their value to Television itself, the respect and community-influence which thus accrue to the station are also of direct importance to its advertisers.

The unceasing efforts of great stations like WXYZ-TV to make television of enduring value to every age-group, are a constant source of pride and satisfaction to Blair-TV. We are happy to serve more than a score of such stations in national sales.

Brotherhood Week awards go to 11 broadcasters

The National Conference of Christians and Jews included 11 broadcast winners in a total of 28 media awards presented Feb. 16 at the New York Brotherhood Week dinner.

Broadcast recipients of the 1961 brotherhood media awards: WBZ Boston, for "Anne Frank: The Memory and the Meaning" on its Sounds of Democracy series; WNEW New York, for "An Open Letter to Gov. Rockefeller" on its News Closeup program; WCBS-TV New York, for Strangers in the City, a special one-hour documentary, and ABC-TV, for Cast the First Stone, a special documentary on prejudice, discrimination and segregation outside the South.

Louisiana may bar tv-radio

Coverage of sessions of the Louisiana Legislature, provided by radio and tv stations for years, would be prohibited by a resolution introduced last week and referred to the Rules Committee. Members of the Louisiana Assn. of Broadcasters were informed of the bill by Douglas L. Manship, WBRZ (TV) Baton Rouge, LAB president.
How Collins shook up broadcasters

HERE'S HIS FACTS-OF-LIFE SPEECH TO NAB'S DIRECTORS

The toughest speech delivered to broadcasters by a NAB president in recent memory was delivered Feb. 10 to the NAB Joint Board by the association's new president, LeRoy Collins. In it Gov. Collins said the NAB had failed to provide industry leadership, that broadcasting itself had failed to upgrade programming in response to public demand and that broadcasters faced intensified government control if they continued on the defensive course they have followed.

A news story about his speech appeared in this publication last week (AT DEADLINE, Feb. 13). Because of the exceptional interest Gov. Collins' remarks have generated, a detailed report appears below. It is only slightly condensed from his original manuscript.

To start with, I believe broadcasting is in serious trouble, that its public favor is dangerously low.

Some may disagree, but I believe this true.

This conclusion, to me, is inescapable in the light of the widespread criticism we are getting from responsible individuals, public officials and a growing variety of reputable organizations.

This criticism is being reflected in an all-time-high number of proposals for governmental intervention in areas we always have regarded as "holy ground" for private enterprise.

Early warnings of the coming storm were ignored largely, and it took the rigged-quiz and payola scandals to awaken the majority of broadcasters to the dangers. Unfortunately for broadcasting, these same sensations triggered off the pent-up hostilities of a wide variety of critics.

While there have been notable exceptions, broadcasting's reaction in most part has been defensive. Efforts were directed primarily toward cleaning up the exposed dirty linen and then warding off fresh attempts to impose more governmental regulation.

Even the "positive" aspects of broadcasting's reaction were defensive in nature; for example, the creation of the Television Information Office to tell the "good side" of TV and to create a sympathetic understanding of the industry.

And while new life was breathed into the radio and television codes, this, too, has been on such a scale as to be more defensive in nature than an affirmative response fully to meet needs and responsibilities.

At this point, let me make it clear I am not belittling the work of our codes. On the contrary, I am convinced that what has been done with the codes is of paramount significance to the broadcasting profession.

It is easy to understand why broadcasting has adopted a defensive posture. No one likes regimentation, least of all businessmen engaged in a business already cluttered with governmental "do's" and "don'ts." And from this concern it is natural that broadcasters should regard the prime threat to their profession as coming from Washington. But the real threat is only reflected in Washington; it originates in every home town in America.

If it were just a question of the natural tendency of governmental bureaus to be bureaucratic and legislators to be legislative, the problem would be a lot simpler. If it were just a matter of competing with zealous politicians, I believe the broadcasting industry could better than hold its own in a defensive engagement.

But the regulatory proposals from within government are more than that; they are manifestations of serious dissatisfactions from substantial segments of the public. And when each proposal is introduced, the proponents are receiving increasing support. Setting the record straight with excuses will gain for us little more time.

There is little to be gained now by arguing that there is no measurable connection between the extensive broadcasting of crime and violence and the growth of juvenile delinquency, for the truth is that a large part of the public feels there is.

There is little to be gained now by arguing that there is more "good" programming than "bad" programming, for a large part of the public is convinced that there is not enough "good" and too much "bad."

There is little to be gained now by pointing to the marvelous job done by the networks and the industry generally in political and news reporting if by doing so we should assume that this magnificent right in one area condones wrong in another.

There is little to be gained now by insisting that the ratings show this program or that program to be most popular, for our basic commitment is to advance the public interest—and if any program is an influence for debasement and is inimical to the public welfare, regardless of how popular, in my opinion its public broadcast cannot be justified.

Broadcasting cannot afford to fall into serious public disrepute. It simply cannot afford to become identified with what is cheap and degrading.

Broadcasters, I feel, should stand firmly on the proposition that nothing in their business which is wrong can be excused and left unattended and, further, it is their business to correct it.

Our efforts up to now leave a vacuum. And no vacuum lasts for long.

Into this vacuum are entering many who have "positive" programs:

- Newspaper and magazine commentators who increasingly are shifting from carping criticism to concrete proposals for action.
- Members of the Federal Communications Commission. (The new chairman already has stated that program improvement will be one of his major goals.)
- Members of the Congress. More and more of them are coming forward with a wide variety of external cures.
- The Supreme Court, in its recent split decision upholding the practice of film pre-screening for censorship
—which lends color to the efforts of those who want Congress and the states and the cities to regulate broadcast programming.

• More and more individual citizens with sufficient prominence in their own right to command public attention.

In my judgment, no amount of defensive posturing is going to cure broadcasting's ailing image.

It will take an offense—a positive program designed effectively to remedy wrongs—to capture the public enthusiasm, to serve better the public interest—in order to do this. It is the substance of broadcasting, rather than the image of that substance which demands our most earnest and determined efforts.

Now, if broadcasters resist strong popular pressures for needed improvements, there is no doubt that in time the government will respond to those pressures. No one can foresee just how, but of one thing we can be sure: freedom, in some measure, will become lost in the process.

To serve you well as your president, I must have not only your confidence but that of the public. This I cannot earn or deserve without dedication to the public interest. There is no conflict, because I feel strongly that your best interest and the public interest are in reality the same.

I propose to you a positive program for broadcasting. These are the overriding needs I feel must be met:

First, we must improve broadcasting's relationship with the federal government.

Second, we must improve broadcasting's relationship with the American people.

And, further, we must improve the broadcasting profession, itself.

There should be no relaxation of vigilance on the part of NAB to oppose efforts to impose governmental regulations which would impair the abilities of broadcasters to do an effective job.

NAB, rather than the networks or any of the multitude of broadcasting groups and organizations, should become the recognized principal spokesman in Washington for broadcasting.

NAB should not be regarded as another "trade association." Broadcasting is a major factor in the whole of American life, and it is this stature which NAB must reflect in the nation's capital.

When big, important matters develop concerning broadcasting, NAB too often is not regarded as the primary contact. Rather, the networks are.

This is wrong. There is no sound reason why the networks should "out-rank" NAB. No segment of broadcasting, however important, should. If NAB is to speak for all of broadcasting, its voice should be stronger than the voice of any part of it.

Now, I do not quarry with the networks about this. Prestige is something that must be earned and deserved, and it is simply up to NAB to build by its own merits its position to this status of acceptance.

A FRESH look should be taken at broadcasting's public relations—not only those of NAB but those of TIO, the networks and individual stations.

Instead of a multitude of voices, broadcasting should have a better-unified voice which can be and will be heard.

We should seek a formalized method for coordinating NAB and non-NAB public relations activities as they affect the profession as a whole.

There is another matter I feel should be of grave concern to broadcasters, and that is the development of the various audience-measurement, or program-rating, businesses.

Now, I do not here quarrel with the validity of these services, but I am shocked by their far-reaching influence in the whole broadcasting industry. In effect, their reporting is determining in large measure not only what the American broadcasting diet will be, but also at what times the meals will be served.

And yet, NAB has no check-rein or oversee-status whatever over what the raters do, or how they do it. Broadcasting is, therefore, allowing an outsider to become master of its own house, and does not even check his health card.

We can wear ourselves out in Washington, and talk ourselves hoarse trying to impress the public, but if we do not make some substantial further progress in the improvement of our own product we will be whipped before we start.

We have the beginnings of an effective program of self-improvement in our radio and television codes. But I believe that we must become involved more effectively in improving the kind and quality of programming, the diversity of programming in prime time, the extent as well as the nature of advertising and the machinery for assuring effective self-discipline in all these areas.

If we do not do these things they will be done for us—and to us. And down that road not only broadcasting but the American public will be the loser.

Our responsibility in this regard applies equally to radio as well as television, even though much more public attention has been focused recently on television. NAB is not as representative of our American radio broadcasters as it should be. We have now only a bare majority in our membership.

I deem it a major responsibility of NAB to work toward an ever-increasing stature for radio, toward steadily increasing respect for the medium in the minds of the public, the advertising fraternity and, importantly, in the minds of the people engaged in radio broadcasting.

In seeking to discharge this responsibility, NAB has the opportunity and the challenge of providing leadership and research, of giving constructive direction in an area of some considerable confusion.

These, then, are elements of a positive program I would propose for broadcasting. To accomplish them, NAB, itself, must be in position to provide the leadership. I do not believe it is now.

It is not strong enough. Its efforts are fragmented and proliferated.

Too much of the work of its staff is now directed to relatively minor matters. We are not concentrating enough on the broad-gauge problems of the whole profession from which many of the lesser problems spring.

The NAB board and committee structure seems cumbersome and excessively time-consuming.

Our present organization (officers, staff, code, committee) is reminiscent of this nation's original Articles of Confederation. The intention is fine, but there is absent the unifying, central authority necessary to give NAB the strength, prestige and respect essential to meet the needs of broadcasting.

I would like to prepare and present to you at the June meeting [of the board of directors] a plan of reorganization of NAB.

I anticipate that our present staff can supply most of the assistance needed in this work, but I would like to have authority to expend a modest additional sum for outside assistance. I will confer with and seek the approval of the chairmen of our Radio Board, the Television Board, and the Joint Board before any such expenditure is obligated.
Sarnoff sees thrust in tv news, color

Television is reaching a plateau, but color can open a new frontier, Robert W. Sarnoff, chairman of NBC, told the Cincinnati Advertisers' Club last Wednesday (Feb. 15).

Development of color is part of broadcasters' "responsibility to develop the medium to its full potential," the color-pioneering network's chief said. (Also see story on color tv in Perspective, page 97.)

Current events in broadcasting have set the stage for "a significant thrust in color" this year, Mr. Sarnoff believes. Two significant long-range developments he sees are "striking upsurge in news and public affairs programming, much of it in prime time" and a groundswell in color.

Advertisers have been drawn to informational programs not merely for audience numbers but for an interest in the kind of commercial impressions such a show creates, "how vivid, how deep and how favorable," Mr. Sarnoff said. He illustrated with a 10-market survey of the market impact of Timex watches' NBC "White Paper" special, The U-2 Affair, Nov. 29, 1960, (10-11 p.m. EST).

The Watch Watch • Mr. Sarnoff reported that 40% more viewers than non-viewers named Timex as one of the watch brands they knew; 64% more could correctly identify the Timex slogan; 83% more thought Timex was among the best watches they could buy, and nearly 100% more said they would be most likely to buy a Timex watch.

The Timex study was conducted for NBC by O'Brien-Sherwood Assoc., New York.

The current color audience offers advertisers "a unique and powerful tandem buy," Mr. Sarnoff said. He called color viewers the country's largest and richest "class" audience. The NBC chairman saluted Crosley Broadcasting Corp. for programming an average 25 hours of color a week in addition to network service.

Storer net $5 million in '60, sales up 8.7%

Net earnings, after taxes, of Storer Broadcasting Co. reached $5,062,668 ($2.05 per share) in 1960. This compares with $5,336,682 ($2.16 per share) for 1959, the company announced last week. The 1959 figure, Storer explained, included a nonrecurring gain from the sale of Storer's Atlanta radio station, resulting in a profit of $381,614 after taxes.

The company's gross 1960 revenues from radio and tv sales were 8.7% higher than in 1959, the announcement stated. The earning per share figures are based on 2,474,750 common and 263,000 outstanding shares for public offering. These are being sold by George Storer, president and board chairman; J. Harold Ryan and wife, and the Detroit Bank & Trust Co. (Broadcasting, Jan. 16).

Broadcast role, rights in crime reporting

True or false:

Broadcast reporters are faltering in their jobs of covering crime news—from the police beat through court trial—because they don't know their rights.

Tv script writers are giving the public a distorted view of criminal investigation.

News coverage is interfering with crime detection.

Police secrecy and abuse by the courts of their power of contempt are making a sham of the public's constitutional right to know as well as individual rights.

The controversial arguments on both sides of these issues will be explored by 31 well-known figures from the fields of law and mass media March 20-25 during Northwestern U.'s concentrated "short course" in crime news analysis and reporting. The short course, to be held for the third year under grants from the Ford Foundation, is open to radio- and tv coverage by participants (course fee: $125). Guest lecturers will also be available for interview. Location will be Northwestern's downtown Chicago campus.

Jacob Scher, former special counsel of the House Government Information Subcommittee and faculty member of Northwestern's Medill School of Journalism, indicated broadcasters could become much more effective crime news reporters if they knew their rights more clearly. He is an outspoken foe of police and court secrecy and believes the Constitution guarantees the newsman, as a representative of the public, access to public records.

Mr. Scher is one of three faculty members who will supervise the short course. The others are Fred Inbau, law professor, who set up and directed the Chicago police department's scientific crime protection laboratory and supervised mass lie detector tests of police in the city's recent scandal, and Claude Sowle, who edits the school's Journal of Criminalology, Criminal Law and Police Science. Mr. Sowle favors legalized wire-tapping.

Mr. Inbau said the police are forced to work in a straitjacket because of antiquated laws placed on them by the courts. He said this explains why he feels television script writers distort the true picture of criminal investigation.

The Perennial Clue • "According to television's so-called mystery shows, if the police will only bother to take a careful look around the scene of the crime, they will always find the clue which will make the whole case fall neatly into place and point unmistakably at the guilty party," Mr. Inbau charged.

"The truth of the fact is that there are very often no clues whatsoever and the investigators have to start from scratch with frequently no more than their own experience and imagination to guide them," he explained. "The only way to solution of a crime is to interrogate suspects—a right frequently denied the police by the courts and the legislatures." It takes time and privacy and "sometimes even a little trickery" to question a guilty suspect properly and secure his confession, Mr. Inbau said.

But Mr. Scher disagrees with Mr. Inbau. "The charge that the courts are forcing police to act in a straitjacket is absolutely untrue," Mr. Scher countered. "To allow illegal detention or incommunicado arrests by the police would be to grant them use of coercion whereby they presume the guilt rather than the innocence of a person," he added.

News freedom "is the best insurance that the law will run its due process," Mr. Scher said. "It's time to take the handcuffs off our crime reporters and let them cover the news."

GOVERNMENT

IT SOON WILL BE CHAIRMAN MINOW

Senate gives him unanimous approval on voice vote

Armed with a unanimous confirmation by the Senate, 35-year-old Chicago attorney Newton N. Minow will be sworn in as chairman of the FCC between March 1-6.

As President Kennedy's personal choice to head the FCC under the New Frontier, he was approved by the Senate last Monday (Feb. 13) in a voice vote. Mr. Minow received a dual confirmation—for the term ending June 30 and for a full seven-year stint of his own beginning July 1 and running through June 30, 1968.

A Democrat who has been active in party circles, he will replace Republican Frederick W. Ford as chairman and will occupy the commission seat now held by Republican Charles H. King of Detroit. Commissioner Ford became chairman March 21, 1960, with the resignation of John C. Doerfer. Commissioner King received a recess appointment for the Doerfer vacancy last July.

Since his Senate hearing 10 days ago (Broadcasting, Feb. 13), Mr. Minow has been busy winding up his law practice and also lining up staff additions he will make at the commission. Among the latter, he reportedly has asked Seattle attorney Kenneth Cox to become FCC general counsel, a spot now held by John FitzGerald.

Reached by telephone last week, Mr. Cox confirmed that he had been contacted about the general counselship but said he has not made up his mind whether he will accept. Mr. Cox has often served as special communications counsel for the Senate Commerce Committee. His name was prominent in speculation for appointment to the commission prior to Mr. Minow's selection. The Seattle attorney, a law school classmate of Commissioner King, had the backing for the commissionership from Sen. Warren Magnuson (D-Wash.), chairman of the Senate Commerce Committee.

Mr. Minow said that he had no one specifically in mind as general counsel but that "a lot of people have applied for the job."

Meyers and Geller - Two other attorneys who definitely will come to the FCC with the new chairman are Ted Meyers of the ABC New York legal staff and former Department of Justice antitrust staffer Henry Geller (Broadcasting, Feb. 13).

Mr. Geller, a law school classmate of Mr. Minow's at Northwestern U., formerly was in the commission general counsel's office.

It is expected that Harold Cowgill will be replaced as chief of the Broadcast Bureau, although no one has been picked as yet by the new chairman. "To me that's a key job and I am going to do some thinking about it," Mr. Minow said. The ideal man for the job, it has been reported, is an industry executive not now in government who knows the broadcasting business "up and down."

Mr. Minow said that he has made a tentative choice of his confidential assistant since his personal secretary, Rosane Eberlein, has joined Ford law partner and new U. N. Ambassador Adlai Stevenson in New York. The other women presently in the FCC chairman's office will be asked to remain, as will James B. Sheridan, special assistant to Chairman Ford, Mr. Minow disclosed last week.

The post of secretary to the commission, vacant since Mary Jane Morris resigned to enter private law practice 11 months ago, will not be filled immediately, Mr. Minow indicated. There has been considerable talk about a readjustment of the secretary's job since Miss Morris' resignation and the new chairman said he wants to think about it awhile.

One of the most pressing problems facing the Minow family before moving to Washington apparently has been solved. Mr. Minow said that a tentative agreement has been reached to purchase a house at 3312 Roland Place in Washington, although no contract has been signed. The other Minows are wife Josephine (they were married in May 1949) and daughters Susan 8, Martha 6 and Mary 2.

Southside loses again in attempt to get ch. 8

Southside Virginia Telecasting Corp. has lost some more ground in its seven-year flight to reverse the FCC's 1954 grant of ch. 8 Petersburg, Va., to Peters burg TV Corp. (WXEX-TV). In separate actions last week, the commission:

(1) denied Southside's petition for reconsideration of the original grant to Petersburg TV, which also denied Southside's competing application; (2) returned a new Southside application for ch. 8 because it failed to meet the required co-channel mileage separations from a new tv station in Greenboro Harbor Point, N. C., and (3) granted WXEX-TV a renewal of license. Commissioner John S. Cross dissented to second and third actions.

Southside has fought the ch. 8 grant

Eight radio-tv areas Magneson committee will investigate

As partial justification of its request for $315,000 in operating funds, the Senate Commerce Committee last week set forth eight major areas of the communications industry it intends to look into during the current session of Congress in Washington.

They include:

- The equal-time provision of Sec. 315 of the Communications Act, with specific reference to a bill (S 204) which would make permanent last year's temporary suspension for presidential and vice presidential candidates.

- Establishment of a policy of space communications, via the use of satellites, and a review of the military and civilian use of the entire spectrum.

- The "continuing problem" of the allocation of tv channels, in which the committee says, it is "forced to continue to urge the FCC to act." The committee's aim, it said, "is to provide for a nationwide competitive television service."

- Subscription tv.

- Television network practices. The committee said the public must be protected from abuses but, at the same time, the broadcasting industry must be protected "from what could become censorship."

- Educational television.

- Community antenna and booster problems, "an extremely controversial subject" and one "that will take up a great deal of time of the committee."

- Legislation concerning communications common carriers in the domestic and international fields.

The Senate approved without dissent the Commerce Committee's appropriations request, which was submitted by Chairman Warren G. Magnuson (D-Wash.).

Besides communications, the committee has jurisdiction over such matters as marine sciences, merchant marine and fisheries, aviation and surface transportation.
You pick your salesmen carefully...

Choose your air salesmen just as carefully...

Check List for Hiring Salesmen:
- INTEGRITY
- STABILITY
- RESPONSIBILITY

You look for these qualities when you hire a salesman. Be just as sure you get them when you hire air salesmen. In Des Moines KRNT and KRNT-TV Air Salesmen have these qualities. That's why people believe in and depend on KRNT RADIO AND TELEVISION:

- People have been dialing KRNT Radio for reliable news and sports information for 26 years. Highest ratings for years.
- ARB and Nielsen prove our television news and sports are also the "preferred ones". Always top rated.
- The community knows locally-produced religious and civic-minded shows appear regularly in our schedules.
- Local radio advertisers have given us by far the biggest share of business in a six-station market.
- Local television advertisers have given us 80% of the local business in a three-station market.

Check our ratings with the Katz Man. He can help you hire our salesmen, too.

KRNT
Radio and TV – Des Moines

An Operation of Cowles Magazines and Broadcasting, Inc.
to Petersburg TV (owned by Thomas G. Tinsley Jr. and associates) through numerous actions, both at the FCC and in the courts. Southside’s latest move was to file a new application for the TV channel when WXEX-TV’s license was up for renewal.

CBS BOW TO KENNEDY?
Ream says he cut ‘Spy’ show ‘to help’ the administration

Joseph H. Ream, CBS vice president for program practices, has told a House Un-American Activities Committee investigator that he ordered “The Spy Next Door” cancelled “to help” the Kennedy Administration.

A preliminary report of the cancellation by the committee, which has been looking into the matter, adds that Mr. Ream denies categorically that he had been approached by the administration. He acted only as “a private citizen,” he told the investigator, who talked to him in New York on Feb. 6.

Ream is reported as saying he had been influenced by President Kennedy’s moves to curb attacks on the Soviet Union by top U. S. military personnel. But when he later realized that the Kennedy Administration policy was substantially the same, on this point, as that of the Eisenhower Administration, he changed his mind about The Armstrong Circle Theatre production, according to the committee report.

CBS also revealed last week that basic network policy considerations were involved in the original decision to cancel “The Spy Next Door.” The disclosure was contained in a detailed explanation of the controversial decision made to Rep Thomas M. Pelly (R-Wash.), who has been pressing the network on the matter.

But the explanation failed to satisfy Rep. Pelly. He has asked the House Un-American Activities Committee to interrogate CBS officials, under oath, plus anyone else “having knowledge” of the program, to determine whether censorship, “self-imposed or otherwise,” was involved.

Rep. Pelly was informed at the time he made his request, the Committee’s report had not been prepared and that a script change was required because of CBS’ determination to maintain a clear line between news—under supervision of the network’s news division—and a program produced outside CBS. “Spy” was produced by Talent Assoc.

He also was told that CBS feels this line was blurred by the opening segment of the original version of the fact-based documentary dealing with Soviet espionage in America. This showed Soviet Premier Khrushchev raging over the U-2 spy-plane incident, followed by CBS newsman Douglas Edwards, who serves as narrator for the show, saying, in effect, that the Russians had no right to complain since they engage in espionage, too.

Background • This information was in a memorandum from Richard Salant, president of CBS News Division, to Mr. Ream, who sent a copy to Rep. Pelly.

In the note, Mr. Salant took “full responsibility” for instructing the Khrushchev sequence to be eliminated. He said that it “so confused the line between news functions and outside-produced programs and so translated the nature of the program into an editorial rather
KBIG minutes now have more muscle . . . because new sales-minded personalities like Joe Niagara, Jim O'Leary, and Bob Gage add strength even to undernourished advertising budgets.

KBIG can lift your sales volume for only 38¢ per thousand listening homes in metropolitan Los Angeles (1960 Cumulative Pulse). No extra cost for KBIG selling power in San Diego, San Bernardino, and 231 other vital Southern California markets.
West Virginians honor their congressmen

Members of the West Virginia congressional delegation were dinner guests of the state broadcaster’s association Feb. 15 at the Mayflower Hotel, Washington. Vincent T. Wasielowski, NAB government affairs vice president, gave an informal review of industry developments. L to r: John Shott, WHIS-TV Bluefield, W. Va., president of W. Va. Broadcasters Assn.; Rep. John M. Slack Jr. (D); Sen. Jennings Randolph (D); Rep. Elizabeth Kee (D); Sen. Robert C. Byrd (D); Rep. Arch A. Moore Jr. (R); Mel Burka, WTIP Charleston, association secretary.

than a documentary that it violated our policy."

He explained CBS policy requires that "news and public affairs programs dealing with important current issues, including problems of foreign relations, be produced by and under the supervision of CBS News Division." He added that this has led to rejection of a number of outside-produced news and public affairs programs.

Mr. Salant said he first insisted on changing the show’s opening at a meeting of CBS officials, including Mr. Ream, on Jan. 19. Mr. Ream had told Rep. Pelly that after the script change was made, network officials decided to screen the production itself before scheduling it for broadcast. This was decided on Jan. 28, and the production was taped the night of Feb. 1, about the time it was to have been aired. It was approved next day for presentation Feb. 15.

Quick Change - After receiving the Salant note Tuesday Rep. Pelly indicated he was ready to drop the matter, but the next day he was drafting his letter to Chairman Francis E. Walter (D-Pa.) of the House Un-American Activities Committee.

Bennett complaint filed against ABC

Federal Prison Director James V. Bennett, still fuming at The Untouchables, filed his long-awaited complaint with the FCC last week, asking that "appropriate steps be taken." He did not, as he threatened earlier; file against the license renewal of ABC’s owned stations and four of its affiliates (Broadcasting, Jan. 12).

Mr. Bennett charged the Al Capone program was presented as fact when in truth it was entirely fictionalized. The scenes in the episodes showing the gangster’s transfer from Atlanta to Alcatraz reflected on the good name of the Prison Service and its staff, he said. The episodes, run Jan. 5 and Jan. 12, showed a venal prison guard favoring the Chicago mobster.

In his Feb. 9 complaint to FCC Chairman Frederick W. Ford, Mr. Bennett listed seven points in the two episodes which, he charged, lent verisimilitude to the broadcasts. He also enclosed copies of letters received from active and retired prison officials and from the public.

Earlier, Mr. Bennett had complained to Sen. Warren G. Magnuson (D-Wash.) and Rep. Oren Harris (D-Ark.), chairman of their respective congressional commerce committees. He had also seen Sens. Andrew F. Schoeppel (R-Kan.) and John O. Pastore (D-R.I.), both members of the Commerce Committee.

Another aspect of The Untouchables which has drawn complaints—its heavy concentration on Italian named and accepted gangsters—may be resolved on Friday when the board of directors of the Italian-American Democratic Socie-
Baton Rouge, La. is the 4th market in the Gulf South!

No gambling when you buy WBRZ in Baton Rouge... Baton Rouge as a market ranks just below Ft. Worth-Dallas, Houston and New Orleans. It's the 4th largest market in the Gulf South—an area made up of the states of Louisiana, Texas and Mississippi. The Baton Rouge market, with a population of 1,561,000 and retail sales of $1,285,000,000.00, is served completely by television station WBRZ. Baton Rouge is truly too BIG a market to be overlooked on any list. Call your Hollingbery man.

BIG TELEVISION IN PITTSBURGH

CHANNEL

BASIC ABC IN PITTSBURGH / REPRESENTED BY THE KATZ AGENCY
ties of New York is scheduled to decide whether to picket ABC or not. If the decision is affirmative, the public demonstration will take place March 9, the natal day of Amerigo Vespucci, for whom America is named. The pressures to diminish the use of Italian names and characterizations was brought to a head by Rep. Alfred E. Santangelo (D-N.Y.) and others of a group of congressmen of Italian extraction (BROADCASTING, Feb. 6).

ABC already has begun to run a disclaimer on the show and has announced it is taking steps to reduce the use of Italian names and characters. The disclaimer reports that the The Untouchables is based on fact, but fictionalized.

Examiner favors MGA in ABC labor case

James R. Hemingway, trial examiner for the National Labor Relations Board, has found ABC guilty of refusing to bargain with the Musicians Guild of America, certified as exclusive bargaining agent for all musicians employed by ABC for TV film production.

Unless ABC agrees to bargain with MGA within 20 days of the date of Mr. Hemingway's report Feb. 9, he recommends that NLRB issue a compliance order. MGA won an NLRB election March 7, 1960, and was certified March 20, 1960, as collective bargaining agent for ABC's TV film musicians, but on May 20, 1960, ABC notified MGA of its refusal to bargain. MGA filed unfairness charges June 2, 1960, and a hearing was held Sept. 13, 1960, before the trial examiner. The American Federation of Musicians, bargaining agent for musicians employed on ABC's radio and TV network programs, intervened in the hearing in support of ABC, as did CBS and NBC.

Harris plans new group to replace oversight

Chairman Oren Harris (D-Ark.) of the House Commerce Committee plans to establish a new special subcommittee, similar in function to the oversight unit that went out of business last December.

He discussed the proposed subcommittee at the full Commerce Committee organization meeting Thursday, according to a committee member. Rep. Harris did not disclose his ideas in detail, but reportedly said the new unit, which would check on the administration of regulatory agencies, would be composed of five or six members.

Rep. Harris has introduced a resolution (HR 165) seeking $435,000 for the operation of the Commerce Committee. According to a committee source, $155,000 would be used for regular committee expenses, the remainder for the new special subcommittee, the committee's TV-ratings survey and its continuing spectrum study.

Bureau says examiner erred in Laurel case

The FCC's chief hearing examiner was accused last week by the Broadcast Bureau of going beyond his legal authority in refusing to approve a dropout agreement between two applicants for a new AM on 900 kc in Laurel, Md.

Examiner James D. Cunningham refused to sanction an arrangement whereby Intercity Broadcasting Co. would pay Laurel Broadcasting Co. $10,000 in expenses for dropping out (BROADCASTING, Jan. 30). Mr. Cunningham dismissed the Laurel application with prejudice. Laurel principals are Milton Grant, who would receive $10,000 from Intercity, and James R. Bonfils, who would receive $10.

The Broadcast Bureau said Mr. Grant's explanation of expenses is insufficient. The bureau said that nowhere in the legislative history of the 1960 amendments to Sec. 311 "is there even the slightest intimation that Congress intended that the commission explore the nature of legal and engineering fees charged for actual services rendered on applications withdrawn unless such fees are patently excessive."

Fees charged by legal counsel—Dow, Lohnes &Albertson and Laurel's engineer, George W. Davis, were both "illegitimate and prudent," the bureau and the two applicants maintained in writing the FCC to review and reverse the examiner's ruling. They argued the examiner exceeded his authority in placing on the fees that should be charged by professional counsel.

Both parties said the $10,000 was well below Mr. Grant's actual expenses and that Mr. Davis has sued Mr. Grant for $6,764.80 the engineer claims is owed him. (Mr. Davis already has been paid $4,034.99 by Laurel).

Mr. Grant and the Broadcast Bureau maintained that the examiner erred in dismissing the Laurel application with prejudice while disallowing the agreement.

Laurel Broadcasting asked that the record be reopened.

Pastore wants TV 'clean up' 

Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee, called on the television industry last week to "clean up" its own programs without waiting for government prodding. He expressed the hope that legislation would not be necessary but suggested that the FCC, through persuasion, could help promote better programming.

Rules group schedules hearing on House radio-tv
The House Rules Committee will hold a public hearing tomorrow (Tuesday) on two resolutions (HR 27 and 28) which would permit live radio and tv coverage of House sessions and committee hearings.

However, no one thinks the measures, introduced by Rep. Martha W. Griffiths (D-Mich.) have much of a chance. House Speaker Sam Rayburn, who has always opposed radio-tv coverage of either the House or its committee hearings, has not relented. He still opposes them, and observers expect the resolutions to be voted down in committee.

Rules Committee Chairman Howard W. Smith is widely regarded as having called a hearing on the resolutions only to nettled the speaker. His committee did hold hearings in 1955 on a resolution to open committee hearings to broadcasters. But he has never acted on Mrs. Griffith's measures, which have been introduced in three previous sessions.

However, Rep. Smith denies he called up Mrs. Griffith's resolutions out of resentment over his defeat by the speaker in the fight over the size of the Rules Committee. "There are a lot of odds and ends that have been hanging around here for a long time, and I thought now would be a good time to let the committee act on them when we're not too busy," he said. "We're going to let the House vote on these matters—that's what they said they wanted in the fight."

Replies on FCC financial forms mellow slightly
Replies last week to comments on the FCC's proposals to revise its annual financial forms required from broadcasters were as contemptuous of the plan as the original comments (BROADCASTING, Feb. 6).

McKenna & Wilkinson, Washington law firm, pointed out this year's forms are due in six weeks, so the new form could not be used this year, anyway. It suggested that in view of the unanimous disfavor in industry comments, the FCC carefully revise its proposal "by eliminating non-essential items and schedules, by deleting unduly onerous requirements and by correcting numerous ambiguities." Having done this, the commission should submit the revised proposal for comments, the law firm recommended.

Triangle Stations said adoption of the proposed forms would be a step backward for the commission to a form that in substance was abandoned in 1953. Triangle also protested the part of the form asking for information on revenues from sources outside broadcasting.

Taft Broadcasting Co. agreed with the comments of the NAB, which had thoroughly excoriating the proposal. Taft pointed out that it is a large company with complex procedures and that the requirements would not be too burdensome for it. But, the company said, if the new form would cause it some extra trouble the form would be a much greater inconvenience for most smaller companies.

Deadline for reply comments was Feb. 15.

Agencyman Bryan shows FTC sandpaper test
A Federal Trade Commission hearing on false advertising charges against Palmolive Rapid shave resumed briefly in New York last week (Feb. 16).

On a motion by defense counsel to dismiss respondents Ted Bates & Co., agency for Palmolive, and the Colgate-Palmolive Co., because no further substantial evidence would be introduced, Hearing Examiner William L. Pack gave the respondents and the FTC attorneys 30 days to file written proposed findings, conclusions and any additional memoranda. At that time a date will be fixed for oral argument in Washington.

Called to testify again at last week's hearing at the U.S. Court House in New York, Brantz Bryan Jr., Ted Bates' account executive on Palmolive Rapid Shave, placed in evidence three samples of sandpaper which had been shaved just prior to the hearing. Mr. Bryan testified he soaked each piece with Palmolive Rapid Shave for periods ranging from 21½ minutes to one hour and 20 minutes, and then successfully shaved each sample with a Gillette Razor and Gillette Super Blue Blade.

The FTC's complaint against Palmolive Rapid Shave, issued Jan 8, 1960 (BROADCASTING, Jan. 18, Nov. 7, 1960) charged the agency and adviser with misrepresentation in tv ads. FTC held that sandpaper used in the commercial was not identified as Plexiglass coated with sand.

Single information unit asked by advisory group
U. S. Advisory Commission on Information has urged the Kennedy Administration to consolidate its foreign information, general education, and cultural programs in one agency, whose director would have access to the President, attend Cabinet meetings and participate in National Security Council deliberations.

The commission also recommends that U. S. Information Agency withhold its requests for additional funds until the proposed consolidation is completed and country-by-country review of USIA activities is made.
"We Do More Jobs... Better" with Videotape® Recording. Business is better than it's ever been and we have a smoother, more efficient operation," sums up Al Beck. "For us, Ampex VTR is a basic piece of equipment that fit into our operation right from the start. It's no 'sacred cow' to us; everyone here operates it. And essentially, it gives us a whole crew of operators plus announcers . . . a real problem-solver when it comes to scheduling personnel. From an operating standpoint, it's tremendous. Today, for instance, the boys are knocking out 15 1-minute commercials. And we have scheduled as many as 63 recordings in one operating day. I wouldn't want to go back to operating without an Ampex." • • • Ask Ampex today for specific station histories of the Videotape Television Recorder as a basic money-making component of any competitive TV facility. Ask, too, about Ampex financing and leasing arrangements. Write Department BB.

FCC tells Philco delay necessary on WRCV-TV

Answering Philco Broadcasting Co's motion to expedite the renewal or sale of NBC's WRCV-TV Philadelphia, the FCC last week told the company that delay is necessary for the commission to unravel "complex substantive and procedural questions" involved in the case.

Philco applied for the channel (3) now operated by NBC two days after the network applied for renewal of WRCV-TV's license. Philco demanded the facility be contested in comparative hearing (Broadcasting, May 9, 1960, Jan. 16, 1961).

In last week's letter, the FCC assured Philco that every effort is being made to resolve the matter as quickly as possible. Among the questions it is studying is Philco's request that the applications be designated for comparative hearing, the commission wrote.

KLFT's Theriot asks FCC for forgiveness

Pleading that operation of KLFT Golden Meadow, La., is dictated in the main by public service rather than financial considerations, owner Joseph Leo Theriot last week asked the FCC to drop license revocation proceedings against him.

Mr. Theriot said that the violations cited by the commission in its show cause order were corrected before the order was issued (Broadcasting, Jan. 23). He expressed regret for not responding to FCC inquiries and for his "oversight" in not filing required statements. This was due, he said, to the pressure of other business interests and a "dire lack of experienced personnel." The licensee promised to comply fully in the future.

A "relatively large percentage" of KLFT's broadcast time is devoted to "reports of wind and weather [which] is of vital interest to the saving of life and property throughout the area, particularly during periods of storm and hurricane," Mr. Theriot told the commission. He said the station "can ill afford a show cause hearing in Washington or anywhere else."

The FCC last week...

- Pointed out that petitions to sever an application from a consolidated proceeding should be addressed to the presiding hearing examiner who will, if severance is granted, thereafter hold such separate hearing as is necessary and issue an initial decision with respect to the severed application. The FCC was moved to the pronouncement by applicants who had directed such petitions directly to the commission (full text in For The Record, page 146).
- Granted a cp for a new uhf tv station on ch. 62 in Allen Park, Mich., to Robert M. Farr, a Baptist minister who owns WRMP (FM) Allen Park. The station's proposed ERP of 20.4 kw visual, 11.2 kw aural with antenna height of 310 feet. The commission also granted cps for uhf translator stations in Winnemucca, Nev. (ch. 74) to translate programs of KBOI-TV Boise, Idaho, and in Point Arena, Calif., to translate programs of KRON-TV San Francisco.
- Was asked by WARD-TV Johns- town, Pa., to delete chs. 19 and 56 there and add ch. 3. The station, which operates currently on ch. 56, points out that it is at a competitive disadvantage in a city where two vhf stations are well established.
- Denied a petition by WXTV (TV Youngstown, Ohio (ch. 45), for rulemaking to delete ch. 45 and substitute ch. 15 in Youngstown, by deleting chs. 29, 15, and 45, and thus converting Canton, Ashtabula, both Ohio, and Pittsburgh, Pa., respectively. Commission denial was based on the short co-channel spacing that would be involved between WYAP-TV Parkersburg, W. Va. (ch. 15) and the proposed ch. 15 in Youngstown and would necessitate deletion in latter communities of three low uhf channels.
- Invited comments by March 15 on proposed rulemaking to reserve ch. 24 in Ogden, Utah, for noncommercial educational use. The Ogden City Board of Education petitioned for the channel, currently commercial but unused.

Loevinger to head Antitrust

A Minnesota Supreme Court justice was nominated last week by President Kennedy to be head of the Dept. of Justice's antitrust division. He is Judge Lee Loevinger, 47, a member of the Minnesota high court since April 1960. He was named to be Assistant Attorney General succeeding Robert A. Bicks of New York, who held the post as acting chief for lack of Senate confirmation and who resigned when the Kennedy administration took office. Judge Loevinger was a member of the same law firm as Orville Freeman, Secretary of Agriculture and former governor of Minnesota.

Court backs ch. 12 grant

A 1959 FCC grant of ch. 12 in Beaumont, Tex., to Television Broadcasters Inc. (KBMT (TVJ) was upheld by the U.S. Court of Appeals last week. By a vote of two to one, the court turned down the objections of Brown Telecasters Inc., the unsuccessful applicant. Brown charged that Television Broadcasters misrepresented the status of its proposed studio in its application. KBMT once operated ch. 31 but failed to make a go of uhf in the two-vhf Beaumont market (KFD-TV ch. 6 and KPAC-TV ch. 4).

Brown bill would dull editor's scissors

WOULD LIMIT EDITING OF INTERVIEWS AND DISCUSSIONS

Rep. Clarence Brown (R-Ohio), ranking minority member on the House Rules Committee, has introduced legislation that would severely restrict producers of taped or filmed interview and discussion shows dealing with public matters. The bill (HR 4232) would prohibit broadcasters from editing comments on such subjects without the express consent of the person interviewed.

Under the bill, broad should stations licensees who present an altered recording on an interview without the written consent, "to each change," of those participating in the interview or discussion, would be subject to fines of up to $10,000 or a year's imprisonment, or both.

Rep. Brown, who also introduced a network regulation bill (HR 4231), said there had been "a great many complaints from congressmen about shows that are supposed to be documentaries but are nothing but propaganda."

Faulty Editing - He declined to spell out the alleged criticisms, stating he would comment further at the hearings he hopes the Commerce Committee will hold on the measures. However, it is understood that he has complained to CBS about his own appearance on that network's program, The Keeper of the Rules: Congressman Smith and the New Frontier, on Jan. 19.

The program dealt with Rep. Howard W. Smith (D-Va.), chairman of the Rules Committee and his then-impending battle with House Speaker Sam Rayburn. Rep. Brown is known to feel that his views, given in a two-hour recording session, had been distorted in the editing process that trimmed his appearance to fit into the time allotted him on the one-hour show.

His network regulation bill (HR 4231) is identical to a measure introduced earlier in the session by Chairman Oren Harris (D-Ark.) of the House Commerce Committee. It would bring new regulations on networks, requiring them to apply for operating licenses, as individual stations do at present.
CANADIANS HAVE INVESTIGATORS, TOO
Parliamentary committee ready to start probe of radio-tv

Preliminary briefs were submitted at Ottawa on Feb. 9 by the Board of Broadcast Governors, Canadian Assn. of Broadcasters and Canadian Broadcasting Corp. to the Parliamentary Committee on Broadcasting established to probe the industry. G. C. Fairfield, Conservative member for Portage-Neepawa, Man., is chairman of the committee.

The BBG asked in its brief that Parliament give more detailed instructions in the Broadcasting Act concerning the regulatory board's functions. The BBG has been criticized in its recommendations for television station licenses, and expects to be questioned in that regard by the committee.

The BBG also asked that broadcast electioneering be permitted to the day before the election. At present the regulations require a two-day lapse between sponsored election broadcasts and the actual election day. The BBG asked that CBC indicate cities where it wants tv stations to meet its responsibilities under the Broadcasting Act. At present CBC must obtain approval of the Canadian treasury board before making an application. This leads to awkward situations when an independent group also applies for a license in the same city. Approval of the treasury board is felt in some quarters to be tantamount to CBC being granted the license.

The BBG praised the CBC for the quality of its programs and praised some independent tv stations, but pointed out that some private station programs were unsatisfactory. This, it said, was especially so in the smaller markets.

This will be the first time since its establishment in 1958, that the BBG will be questioned before a parliamentary committee.

Catv and Pay-Tv * The CAB in its submission asked that community antenna systems and pay-television facilities be brought under Broadcast Act control. The CAB charged that as things stand the community antenna system and wired tv systems defeat the whole intent of the public policy which requires control to assure proper proportion of Canadian program content and advertising.

The CAB praised the BBG as a group of "able Canadians conscientiously striving to discharge their very considerable responsibilities in the best interests of Canada generally, and providing responsible and effective leadership for the broadcasting industry of Canada."

CAB and individual independent broadcasters will probably be the first...
witnesses to be questioned by the parliamentary committee.

CBC in its submission pointed out that it is supplying a national radio and television service for Canada in both English and French at a cost out of public funds of four cents a day per household. The brief pointed out that CBC services have remained below the $15 a year target per household it set for television prior to the advent of tv in 1952.

While some of its programs have been criticized, the CBC stated it will continue to experiment in its quest for high quality television programs to meet all sections of the Canadian population. It felt that its costs would go up considerably when color tv established in Canada at the demand of Canadian viewers. CBC expects some losses on advertising with the advent of second television stations in eight Canadian cities in the current fiscal year.

Canadian tv operator seeks BBG dispensation

Ernest Bushnell, president of CJIOH-TV Ottawa, Ont., which goes on the air in March, suggested in a speech at Ottawa that non-network television stations should not be required to have 45% Canadian program content by April 1. The new regulation of the Board of Broadcast Governors goes into effect at that time for all Canadian tv stations.

Mr. Bushnell, a former vice-president of the government-owned Canadian Broadcasting Corp., said that non-network stations were placed at a disadvantage on this ruling. Network stations, he pointed out, need only join the network at any time to obtain CBC Canadian live programs, thus easily fulfilling their 45% Canadian content quota. Independent tv stations not on the network (there are eight such Canadian stations now) would have to build live programs to come within the regulations.

Canadian association plans Vancouver meeting

The annual meeting of the Canadian Assn. of Broadcasters March 13-15 at the Hotel Vancouver, Vancouver, B. C., will feature operating, sales and policy meetings, as well as panel discussions on Canadian broadcasting regulations and advertising. Murray Brown, CFPL-AM-FM-TV London, Ont., will chair the sessions, which will be open to all on March 13 and the morning of March 14, and open only to CAB members the afternoon of March 14 and all day March 15. The annual dinner is scheduled for March 15.

Panel sessions with Dr. Andrew Stewart, chairman of the Board of Broadcast Governors, and other members of the BBG as well as officials of the Canadian Broadcasting Corp. and leading advertising agencies, will discuss changes proposed by the BBG in Canada's radio broadcasting regulations and beer advertising. Panels are also planned on broadcast advertising problems.

Closed sessions on March 14 will include separate meetings for radio and television operating problems, and business sessions on March 15.

Among problems to be discussed are establishing new radio and television sales organizations by the CAB, the association's sponsoring of the Dominion Drama Festival which is to cost about $20,000, and possibly the increases in transmitter license fees proposed by the Dept. of Transport.

CHAN-TV lays off help as economy measure

CHAN-TV Vancouver, B. C., on Feb. 10 dismissed 25 of its 127 employees as part of an economy measure. The dismissals were made by J. G. Chutter, a director and shareholder, against the approval of president and general manager Art Jones, to whom the tv license was issued last summer. The station has been on the air for about three months as the second Vancouver tv outlet.

Mr. Chutter, a Vancouver businessman, explained that he was appointed by a committee of directors to head a management committee to try to put some economies into effect. The dismissals cut across all areas of operation except technical.

Mr. Jones stated that financial difficulties were experienced because operating costs were higher than anticipated while revenue was lower than expected. He also blames a power increase by CHEK-TV Victoria, B. C., shortly before CHAN-TV went on the air. This caused an increase in viewers from Vancouver for CHEK-TV and took advertising which CHAN-TV had expected. Because CHAN-TV is the first new tv station in Vancouver in six years, viewers have not changed their viewing habits as yet.

CKEY Toronto sale up for BBG action

Sale of CKEY Toronto, Ont., by Jack Kent Cooke to Shoreacres Broadcasting Co. Ltd. will be up for the approval of the Board of Broadcast Governors meeting in Ottawa Feb. 22-24.

CKEY, on 580 kc with 5 kw day, 1 kw night, is being sold to a syndicate composed of the Toronto Globe & Mail; Canadian Westinghouse Electric Corp; John Aird, John Edison and John Tory, Toronto lawyers, and William Wilder, investment banker.

The price was not disclosed. Mr. Cooke, brother of radio-tv station representative Donald Cooke, was one of the witnesses interrogated by the FCC during hearings involving the ownership of KRLA Los Angeles which is licensed to Donald Cooke (BROADCASTING, Nov. 7 and 14, 1960). Jack Kent Cooke is expected to become a U. S. citizen this spring.

Canadian fm application bothers U. S. tv outlet

A ticklish problem in international relations has arisen along the Manitoba-North Dakota border and broadcasters on both sides are treading softly.

The problem arises from the application of CKY Winnipeg for an fm adjunct, on 103.1 mc, to its radio operation. If this application is granted (it's due to be considered by the Board of Broadcast Governors Wednesday), the reception of television signals from KCND-TV Pembina, N. D. (ch. 12), will be blacked out within a radius of eight miles of the fm station's antenna, according to KCND-TV officials. Pembina is 60 miles south of Winnipeg. The cause of the proposed blackout will be the second harmonic of the fm station's transmissions. CKY officials deny that any interference will be caused to ch. 12 viewers.

The U. S. tv station feels it cannot properly participate before the BBG since it has no standing as a Canadian broadcaster. But the station says it's heartened by assurances that Winnipeg viewers and servicemen intend to protest the fm assignment.

Winnipeg is served by two Canadian tv stations as well as by the NBC-ABC affiliated KCND-TV; they are CBWT (TV) (ch. 3) and CJAY (TV) (ch. 7).

WITH SUPERMAN YOU CAN BE SURE OF THE HIGHEST RATINGS... THIS BLOCKBUSTER BEATS ALL COMPETITION!
Hailed by all responsible members of the community, SUPERMAN is recognized as a strong and healthy influence on children.

This extraordinary crime-fighter has been honored more than any other fictional character...

Newspaper Guild Page One Award  
Council of Protestant Episcopal Churches Award  
United Parents Associations of New York Award  
American Schools and Colleges Association Award  
Youth Builders Award  
National Conference of Christians and Jews Award  
Laymen's National Committee Award  
Child Study Association of America Award  
...and many more!

Parents, teachers, church groups, civic leaders, radio and television critics—all commend SUPERMAN'S struggle for tolerance, and his fight against juvenile delinquency.

FLAMINGO is proud to offer SUPERMAN as a high-quality series, one that has earned respect as well as ratings!

The SUPERMAN story is told in millions...and every year the number grows as a new group of children thrills to the daring, timeless adventures of lovely Lois Lane, reporter Clark Kent and SUPERMAN! Get your share of this huge audience now—up, up and away to your phone...call for SUPERMAN!
As this publication noted a year ago, broadcasting entered 1960 in a paradox of plenty—plenty of money and plenty of trouble. By last week both plenitudes had diminished somewhat, the former by enough to cause some concern and the latter by too little to give any reason for comfort.

The paradox that was observable at the beginning of last year had taken a slight twist by the end of it. Although total billings for the whole of 1960 for both radio and television were the biggest in both media’s histories, soft spots had appeared in the second half of the year and were persisting in the first part of 1961. Although government investigations had abated during the political campaigns in the last half of 1960 and the preparation for an administration change in early ’61, a spate of new ones was promised. And the policy of regulation at the FCC was headed toward a hardening.

In the circumstances, broadcasting faced the prospect of being caught in a squeeze between a slackening of the growth in revenue and an increase in the cost of programming, and broadcasters were not themselves wholly in control of either curve.

If the general economy did not respond to the combined efforts of business and government, the volume of broadcast advertising was bound to be adversely affected.

If the clamor for program improvement among some circles in government and out of it did not die down, broadcasters would find themselves committed to expensive experimentation in programming.

To widen the gap between the curve of revenue and the curve of expense appeared to be the biggest problem facing broadcasting in 1961.
1961: YEAR FOR CAUTIOUS OPTIMISM

Tv growth will continue, but recession may slow it down
Radio, although hit harder, should at least hold its own

Economists trying to make sense out of 1961 are being doubly cautious because of the way they flubbed 1960. They predicted boom but what they got, while thankfully not a bust, was very definitely a recession that wasn't supposed to be there.

Unlike the economy, however, they were recovering from this bloop by mid-February and predicting with something like their old aplomb that the current slide—which started last July—would peter out by mid-1961. Some experts saw signs of an even earlier upturn: They stressed that the downward movement unquestionably would continue for a while yet, but their projections indicated that it might bottom out by May and find the economy moving nicely on the rise by midyear.

If general economists were cautious, broadcasters trying to forecast both the economy and its probable effects on their own business were handling the crystal ball as if it were loaded—as, indeed, they agreed it might be. But even among broadcasting economists, optimism was beginning to dominate the talk by the middle of February.

It was discreet optimism, certainly, bounded on all sides by careful qualifications. But through the qualifications there emerged these general conclusions:

- The recession probably will slow television's rate of growth but in all likelihood will not bring that growth to a stand-still, calculated on a full-year basis;
- Radio will feel the recession's effects, but probably will maintain its current volume of business and may

*In 1948 FCC reported only "total revenues" (from time, talent and services, from "network programs" and from business "sold directly by stations." Hence figures for that first year of television financial reporting are not comparable with figures for time sales in ensuing years.

**Total includes regional network and miscellaneous time sales not assignable to network, national, non-network and local categories.

†1960 figures estimated by Broadcasting.

No matter how shaky the economy seemed in some spots in early 1961, broadcasting—as an entity—could look back on 1960 as the biggest revenue year in history. As the tables above and at right show, television and radio recorded bigger time sales last year than in any year of either's history. For television the total was $75 million bigger than the year before, for radio it was nearly $42 million bigger.

These are Broadcasting estimates of net time sales after all frequency discounts but before deduction of commissions to agencies and station representatives. They are comparable to the records compiled annually by the FCC. The FCC reports for 1960 will not be issued until late in 1961.

Television In sources of revenue television's biggest gain in 1960 came from national spot advertisers whose time purchases were up more than $45 million. Its next biggest gain was network business, up some $16 million.

For the past several years local business has accounted for only 20% of total television time sales. That proportion was maintained last year.

Radio For radio local advertisers in 1960 were again the mainstay source of business. More than 60% of radio's sales were made in the home community.

As has been happening each year since 1948—except for a minor upswing in 1957—the volume of radio network advertising declined. But a bottoming-out of the descending curve was indicated. The percentage of network decline was by far the least of any year since 1957.

The 1960 Broadcasting estimates of time sales were compiled from a survey of a large sample of stations according to a formula that has been used successfully since 1935. Tabulations were prepared by the Washington firm of Sinrod & Tash, certified public accountants.
show a modest gain in total sales for the year.

The broadcast media’s two principal sales organizations, the Television Bureau of Advertising and the Radio Advertising Bureau, seemed inclined to subscribe to these general conclusions, although RAB added a more optimistic qualifier to the prediction for radio.

RAB felt the radio outlook at the moment is clouded by non-recession factors as well as general economic influences and that if the picture begins to brighten in the second quarter, then radio could wind up the year with a strong advance over 1960.

Television - In television, TVB is looking for overall gains for the full year 1961, but on a somewhat smaller scale than the gains indicated for 1960 over 1959. Only spot television is expected by TVB to make strides comparable to those it stepped off in 1960.

Here’s how TVB currently expects a recession-spanning period from 1959 through 1961 to work out for tv billings covering time, talent and production costs (the 1961 figures are TVB projections; those for 1960 represent TVB estimates based on 11-month data plus projections of December billings, more exact figures on which will not be available for another week or so):

The gains on both network and local tv are expected to fall a couple of percentage points behind those recorded last year. On an overall basis, TVB expects 1961 television billings to move 6% to 7% ahead of those for 1960, as against last year’s 8.5% increase over 1959.

Radio - RAB refrained from making any dollar predictions for radio for 1961, explaining that factors having nothing to do with the recession—the bad weather’s abnormally depressing effects on retail business, for example—made predictions at this time doubly hazardous. In addition RAB authori-

1960 figures estimated by Broadcasting.
YEAR FOR CAUTIOUS OPTIMISM continued

The four major consumer markets account for roughly three-fourths of all personal spending for goods. In the case of the $80-billion food and beverages market, 1961 spending is likely to exceed 1960 spending even if business conditions were to ease further in early 1961. On the same conservative assumptions, the 1961 market for clothing and shoes would have about equal the 1960 market.

A continuation of the present moderate decline in business for another six months, followed by a general recovery, would yield a spending level for furniture and household equipment modestly below the 1960 level; for automobiles, the decline would be considerable. On the more optimistic assumption of a recovery starting promptly in 1961, a marked improvement should be expected in both categories.

Assuming that business conditions continue to decline through the spring of 1961, and then experience a typical recovery, aggregate personal income in 1961 may nevertheless be moderately higher than in 1960. If business conditions were to begin recovering immediately, the year-to-year increase in personal income would approach $20 billion.

In 1961, "discretionary income"—the income available after meeting essential living costs and repayment obligations—is likely to be only slightly less than in 1960 if the less favorable of the two assumptions described above should turn out to be correct. On the more favorable assumption, discretionary income in 1961 may be as much as 10% greater than in 1960.

Charts from McCann-Erickson
In 1959, WMCA 570 kc, ranked as one of the top three radio stations in 15 out of 30 regular New York rating reports. In 1960, 29 out of 30.*

*Hooper Radio Audience Index, Total Rated Time Periods—12 Reports/NSI, Mon-Sun, 6 am-12 Mid—6 Reports/Pulse, Mon-Fri, 6 am-12 Mid—12 Reports
1961: YEAR OF CAUTIOUS OPTIMISM continued

but according to most experts began to
firm up about mid-January and are ex-
pected to finish the first quarter of 1961
in a reasonably solid position. There
was no indication of any real slippage
in network television in either the third
quarter or the fourth, although sales-
men acknowledge that they are en-
countering stiffer resistance now and
say their first-quarter figures may show
the economy's tightening influence.

Radio network billings, which have
had rough sledding for years, in good
times as well as bad, declined some-
what in both the third and fourth quar-
ters and may not be able to reverse this
trend in the first three months of this
year, according to general estimates.

Spot radio, which has held to a fairly
even course over the past two or three
years, with only slight upward and
downward variations except for the
usual seasonal adjustments, appears to
be weathering the storm with no sig-
nificant ill effects. Some observers
thought they saw the start of a decline
in the third quarter of 1960, but on
the basis of a bounce-back in the fourth
quarter they changed their minds and
decided that what they had seen was
no more than what for spot is a rela-
tively normal variation. Spot sales ex-
ecutives say January and February have
been moving at about the same pace as
last year.

Difference in Markets • Authorities
emphasized that throughout these ap-
praisals they were speaking of broad-
cast business—whether television or ra-
dio—as a complete entity, not of busi-
ness conditions that might exist in any
one station, network or market. Thus
one broadcaster might be enjoying the
best business in his history while an-
other could be experiencing his worst,
as happens regardless of the condition
of the general economy.

A study of radio and tv performance
during prior recessions in the last dec-
deade may or may not be helpful in try-
ing to anticipate the effect of the cur-
rent slide. The present recession is the
third since 1950. The first lasted from
about July 1953 to about August 1954,
while the second, considerably shorter,
ran from August 1957 to about April or
May 1958.

Radio and television reacted to those
earlier dips in opposite ways (see chart
at left). The first downturn in the gen-
eral economy, in 1953-54, injected
hardly a quiver into television's steady,
year-by-year climb. But radio tailed
off and did not regain its 1953 level
until four years later.

The second recession of the 1950's,
although shorter than the first, was ac-
companied by an obvious easing off in
television's rate of growth. Billings con-
tinued to climb, but the rate of ascent
was less steep (partly because, aside
from the recession, television by 1957
was past its fastest-growing years and
approaching its grown-up stage). Radio
billings leveled off too, but they lagged
less obviously—and recovered more
quickly—than they had done the first
time.

The current dip, if it moves accord-
ing to present predictions, will be more
akin to the 1957-58 decline than to the
one in 1953-54, at least in duration.
And the general expectation is that both
radio and television probably will react
to it in a fashion akin to their behavior
in 1957-58, with billings for the year
continuing to rise but at a perceptibly
lower rate than was the case before
the 1960-61 downturn set in.

For the long range, economists gen-
erally are optimistic and, in fact, not
much dismayed by the unexpectedly
limping start with which the 1960's got
under way. They see vigorous growth
ahead both for the economy and for
advertising as a whole. Moreover they
see intensive competition among the
makers and sellers of goods and ser-
vice—in some cases more intense than
they would have predicted a year ago—
and that is the sort of climate that
makes advertising media salesmen, as
well as the creators of advertising,
happy to roll up their sleeves.

Are television and radio recession-proof?
Past recessions have had remark-
ably little effect on advertising ex-
penditures in television and radio.
This chart matches the dollar expend-
itures by advertisers (for time, talent
and production) in television and ra-
dio with the Federal Reserve Board's
index of industrial production year-
by-year since 1950.

The 1954 drop in the FRB index
casted not the slightest dent in televi-
sion's rising curve, and radio's de-
cline in that year and the next was
caused less by general business con-
ditions than by tv competition.
Similarly the 1958 sag in the gen-
eral economy had no perceptible ef-
fet on tv. The first signs of slow-
down in tv's curve occurred two years
before at the end of television's first
convulsion period of growth. And ra-
dio, recovering from the influence of
tv, made a slight gain in 1958 despite
the faltering of general business.

The chart was prepared from infor-
mation supplied by the CBS Dept. of
Economic Analysis, based on McCann-
Erickson estimates for 'Printer's Ink.'

broadcasting, February 20, 1961
A dramatic spurt in fm development

MORE STATIONS, BIGGER AUDIENCES; TARGET NOW: MORE BUSINESS

The fm broadcasting medium is going only one direction—upward.

This superior national advertising and programming service at last is starting to get what it needs most—a few of the numbers that influence buying decisions of advertisers and agencies.

Fm, 1961 model, can boast one of the most spectacular media gains of recent years: a 70% increase in added circulation in 1960, compared to its 1959 increase.

Last year American factories turned out 905,000 fm-only and fm-am radio sets compared to 540,000 in 1959 and 400,000 in 1958.

And that's really only one part of the story. Possibly 400,000 of the phono radio-tv outfits made last year had fm tuners; another 190,000 custom fm tuners were made and perhaps 100,000 fm sets were imported from Japan and Germany.

To sum it up:

* The number of fm-only and fm-am radio sets turned out annually by U. S. factories has doubled in the last two years.
* About 1.7 million fm-tuning units were put into U. S. retail markets in 1960.

While set production has mounted, the other numbers by which the fm medium is measured have been increasing.

* Local and national advertising revenues are going up steadily but not fast enough to satisfy either timebuyers or stations themselves.
* The number of stations on the air continues to increase, along with permits to build and applications.
* Fm frequencies are getting scarce in top markets; in some there simply aren't any available. Those old-line station operators who had been aloof are getting in while they can.
* Auto fm sets and tuners are beginning to sell. Several are on the market—Motorola, Granco, Blaupunkt, Bendix and Gonset, for instance.
* Fm stations are showing up in Hooperatings in an impressive way.
* Few fm stations are giving up the ghost though many are losing money. They're optimistic about fm and believe in its future.
* More big-name national advertisers are buying fm, but it's not a stampede in any sense.
* New fm network and station groups are appearing.

These trends—and they're generally accepted in the media field—have one notable weakness: They aren't backed by the elaborate research timebuyers demand.

Research and promotion are critical soft spots in fm broadcasting. It's a relatively new medium; its components are fighting, grooping and sometimes floundering. There's little money for such luxuries as plastic-bound brochures and stacks of statistics—especially from the national viewpoint.

Yet fm offers a superior broadcast service, with the same coverage pattern both day and night, freedom from noise, market saturation up to 60% and diversified programming.

Variety of Tastes * One of fm's proudest claims, its high-income and well-educated audience, actually backfires in the case of timebuyers interested only in easy-to-buy, mass impact. In the last several years the programming of fm has started to diversify. Added to the good-music operators are hundreds of stations that broadcast variety, lighter music, jazz and even hillbilly and rock 'n' roll. Many stations cover a wide range of programming every day.

In some markets there's claimed to be more listening to fm than to am radio.

Most agencies know or suspect all this.

"But why aren't they buying our mousetrap?" a station operator asked in a moment of frustration, of which there are many in the fm business.

Two years ago Broadcasting took a cold, nationwide look at the fm medium. Its check of main fm concentration points. ("Have audience, can sell"—fm), a feature of the Feb. 9, 1959 Perspective issue, led to this conclusion: "Full-toned fm, aristocrat of the radio spectrum, can't break into Madison Avenue's exclusive agency row but there are signs it is gaining recognition."
Fm's business hasn't caught up with its audience. But fm will have trouble entering agency doors until it comes bearing numbers. . . . Fm broadcasters are trying to convince agencies they can't buy a select, quality audience by the numbers."

An even more extensive look around the nation was taken in preparation for this analysis. Literally hundreds of phone calls and personal interviews were made in an effort to see (1) why fm's cash register still hasn't caught up with its audience, and (2) what's being done about it.

These two questions are mutually exclusive. Not enough research, promotion and selling have been done to sway a large segment of the advertising world.

It's that simple. The product is superb but it's not selling. And it's not selling because fm is a relatively young, fluid, sometimes convulsive and insufficiently organized industry.

"By any standard, fm broadcasting is a growth industry," according to John Degnan, NAB assistant to the radio vice president. "It excites the imagination of its audience, mostly those in the upper economic and educational brackets. This audience is 97% adult with high educational and earning standards. Another boost is expected from stereo-multiplexing."

NAFMB's Problems - The young National Assn. of Fm Broadcasters is sparked by its energetic president, Fred Rabell, of KITT (FM) San Diego, Calif. With scarcely any organization and with scant funds, he has laid the base for a national trade and promotional association. Letters, phone calls, bulletins and contacts have poured out of his office. Next May 6-7 NAFMB will meet preceding the NAB Washington convention. A year ago NAFMB jammed an auditorium during the NAB convention in Chicago. NAB itself provided an afternoon of fm programming that was equally popular. Next May, NAB will observe Sunday, May 7, as Fm Day at the 1961 convention, cooperating with NAFMB.

Industrywide, regional and local promotion are badly needed, done on a scale that will match the professional zeal of am radio, tv, newspapers and magazine exploitation. After all, fm seeks business from the same agency sources. NAB's role is limited to dispensing and gathering information, aside from its all-industry functions. Its publication FM-phasis rounds up trade information but NAB lacks funds for major research and lacks authority for sales promotion.

The research shortage is acute. NAB two years ago guessed fm set circulation at 15 million sets. There's no reliable figure anywhere on national fm circulation and only a limited amount

of local data. Mr. Rabel and NAFMB are working on a pocket sales tool—a wheel device that will show fm penetration by markets and changes in market and listening patterns.

A marked speedup in cooperative local promotion by fm stations has developed in the last two years. Public tastes are getting better, due to fm's good music, generally increased interest in serious musical and discussion programs, the improved sound of long-playing records, tape decks on record players and greater appreciation of the arts. Some community antenna tv systems feed free fm music.

Expanding Circulation - Fm is catering to these tastes and adding more cosmopolitan programming to widen its appeal to the entire audience.

Popularity of low-cost sets is a big factor in expanding fm circulation. For example, Sarkes Tarzian introduced a $19.95 fm set plus a $29.95 fm-am model last year. About 100,000 of them were sold in 1960, many through local distribution by fm stations. Granco is probably the largest maker of low-cost sets. Zenith, GE, RCA, Motorola—all big makers have fm.

Transmitters are moving, too. It seems the recent entry, Industrial Transmitters & Antennas, Lansdowne, Pa., has jumped to the million-dollar mark, with fm transmitters (including private brand) a factor. "We look forward to even further substantial growth in the fm transmitter field," said Bernard Wise, ITA president. Ling-Temco in Dallas has a compact, low-cost, automated fm transmitter with integrated features. Standard Electronics, Collins, RCA and Gates are among transmitter firms selling fm.

The following summary of fm trends and developments indicates important progress in the last two years. It is based on contacts from Bellingham, Wash., to Miami, and from Boston to San Diego plus a study of printed commentaries on this branch of broadcasting.

Fm is still on the way upward. Its
gains are important. It awaits the improved service that serious broadcasters can provide, the pavement-pounding salesmanship that marks all media, skilled management, earnest staff work and finally the combined promotional push of its individual operators.

Those who predicted years ago that fm would fade out must still be deemed the worst prophets of the electronic era.

Locally fm is having both ups and downs. The current status of the medium is shown by results of a spot check or some of the principal fm markets. The list is partial and does not include many good fm areas. Here are the summarized findings:

New York: Despite admittedly slack business in recent weeks, New York commercial fm operators believe 1961 will be their best year, topping 1960, which one sales manager said was twice as good as 1959. Currently, they think the slow period is temporary and that it's part of the general slowdown affecting all business. By early spring, stations report, the advertisers who were expected to place orders starting in January will be back in force.

Commercial and non-commercial fm stations alike are satisfied with the steady growth of fm interest in the metropolitan New York area—the country's largest fm market—even though some thought the progress of general fm acceptance should have been greater by this date. The variety of available fm programming is indicative of the many types of audiences and points up the generally non-competitive nature of the 20-odd fm stations in and near the city. Each station has its own particular audience and there is little duplication in programming or services, considering the number of stations.

A large number of advertisers has begun to take note of the select fm audience in the area. Surveys put the number of fm homes in the 19-county area at 2.7 million, or 60% of the total.4.5 million homes. The penetration represents 18% of the total number of fm homes in the country. This means that nearly one out of five fm homes is in the New York market. Adding to advertisers' interest are findings by Pulse that show the affluence of the New York fm listener. His average age is 37.5; his average income is $9,500 annually, and he listens to fm an average of 18 hours weekly.

The total number of stations is listed below with a classification of its operation: Full-time duplication of commercial am stations (WCBS-FM, WEVD-FM, WNBC-FM, WNEW-FM, WOR-FM, WNTA-FM, WPAT-FM and WQXR-FM) and part-time duplication of commercial am station (WABC-FM). Non-commercial fm stations are WBAI (FM), owned by Pacifica Foundation Stations and financed by subscribers; WNYC-FM, duplicates programming of city-owned WNYC; WRVR (FM), owned and operated by The Riverside Church, WBFM (FM), owned and operated by Muzak Corp., and WHOM-FM, a storecast operation. Non-commercial educational stations are WFUV (FM), owned and operated by Fordham U.; WKCR-FM, owned and operated by Columbia U., and WNYE (FM), owned and operated by New York City Board of Education. Commercial and non-duplication of programming: WNCN (FM), a Concert Network Station, and WRFM (FM), which has the same licensee and staff as WWRL, Long Island Broadcasting Co.

Fm listeners in New York are assisted in their program selection not only by the various station program guides, which subscribers get for prices ranging from $1 to $4, but by complete weekly listings in 'Cue' magazine. The station guides also render special services to listeners. WRFM, for example, lists the playing time of all selections for listeners with home tape recorders.

The programming by the three commercial, non-duplicating fm outlets—WNCN (FM), WRFM (FM) and WABC-FM, which has separate program from 6 p.m. to 12 midnight—consists of classical music, ranging from light, familiar classics to the serious and more obscure. Except for a few weekly interview programs, none of the three has conversational programs.

Boston-Providence: A good fm set will pick up at least 15 fine fm signals in the Boston-Providence section of New England, centuries-old art center. Some growth in fm business was appearing at yearend and many station operators look for a substantial gain in 1961.

A consultant at Harvard's famed business school induced a New England account, Monks Bread, to try fm, with the business placed on WPFM (FM) Providence by Livingston Adv. Co. This high-priced bread firm had spent large sums trying to find the right commercial mention came at station breaks during the 17-hour-long program. According to NAB, Samuel S. Rogers, BBDO account executive, said the program enhanced the sponsor's image as a public servant interested in cultural aspects of the community.

Philadelphia: "Fm stations are finally being recognized as competitors to am radio," said Raymond S. Green, general manager of WFLN-FM Philadelphia and its daytime associate, WFLN. The operation started in 1949 as fm only, adding the am outlet in 1958. WFLN duplicates the fm programming during its daylight-only hours. The fm-only night rate is the same as the combination fm-am daytime rate.

Philadelphia fm programming spans the range from jazz on WHAT-FM, 24-hour station, to the concert music of WFLN-FM. The news-music fm format of WFLB-FM, Triangle's separately programmed station, was extended last autumn to WFGB-FM, new fm outlet opened Oct. 1 in Altoona, Pa., and to

80 (PERSPECTIVE '61)
FIRST in the eyes of adult Milwaukee

The close friendship between Channel 4 and adult Milwaukee is reaffirmed by the latest complete ratings for the current television season. They reveal that WTMJ-TV has more adult viewers per average quarter hour than any other Milwaukee TV station. And these adult viewers are Milwaukee's buying viewers. They control the purse-strings in a rich metropolitan area that ranks sixth in the nation in average family incomes over $7,000 ... where retail sales average over $45,500,000 weekly. So if you're in no mood for "kidding" around ... if your message is for adult Milwaukee, buying Milwaukee ... your best results will come through

WTMJ-TV
THE MILWAUKEE JOURNAL TELEVISION STATION
FM UNITS DOUBLE IN TWO-YEAR PERIOD continued

John D. Scheuer Jr., of Triangle, said sales activity is starting to bring results. "We're very bullish on fm," he explained. WFIL-FM is "virtually sold out at night" and daytime business picking up, he said. Bell Telephone buys a nightly musical hour seven evenings a week on WFIL-FM. The series started five years ago.

Good Music Broadcasters Inc., headed by Mr. Green, is national representative for 35 stations in the concert music field. He said business is up 15% over a year ago, with advertisers showing more interest.

Chicago: The medium has reached such maturity here that intra-fm competition has become fierce and leading stations now emulate the older am brothers in the game of "rating war." This is the language agencies understand, and buy upon, fm sources explain.

WFMT (FM) made local history in 1958 by breaking into the Hooper "Top Ten" list of local radio (am) stations and it has continued to score since. After Hooper expanded the list to Top Twenty other fm outlets are on the am listings. The fm regulars include Zenith's classical music WEFM, independent 24-hour WFMF ("adult instrumental music") and suburban WEAW-FM Evanston.

Talman Federal Savings & Loan Assn, on Feb. 9 signed for its fifth year of daily 6-8:30 a.m. sponsorship on WFMT. Talman claims to be Chicago's second largest and the nation's tenth largest institution of its kind. Jonathan Pugh, Talman executive vice president, said, "WFMT is still the most productive advertising medium ever used by Talman in terms of traceable response and in relation to its cost." The station cites several national and local accounts.

WXFM (FM), under new management by Howard Grafman, cites several national and local accounts. WXFM (FM) programs about 90% music that ranges from jazz and folk music to Broadway and concert hall.

Sid Roberts, WFMM, which claims to be Chicago's only 24-hour fm operation, cited Chrysler Imperial's '27 fm market buy of last fall (including WFMF) as an example of the medium's maturity.

WFKFM (FM), which confines itself chiefly to instrumental standards, semi-classicals and occasional familiar classics, enjoys a list of "prestige advertisers who have been with us for a long period of time." Commercial Manager Dick Stern said that although fm stations generally in that market up until now "have not been receiving a great deal of business from agencies, we are finally obtaining an audience in order to present our story." He sees fm's high standards and programming eventually capturing the am audience and part of that of tv.

WSBC-FM, now on the air a little more than a year, is making its mark with what it calls a "healthy balance" of serious music, folk music, jazz, plays, opera, Broadway shows and readings. A newcomer this year is Plough Inc.'s WJJJD-FM, an automated operation under the management of Jim Brassfield. Another serious music operation that enjoys national accounts is WNIB (FM). In lighter vein, WCLM (FM) has just inaugurated a new weekend local format somewhat akin to NBC's Monitor.

Buddy Black, whose WEBH (FM) claims it had the "original" format of music and news, said, "We are the most mimicked fm station in the country."

Mr. Black is rather brittle in his feelings about agency-representative failure to recognize the value of the fm market. He wants them to "get off their fat salaries and do something for the medium that is no longer a step child but a full-grown individual that has caused more interest in broadcasting than they care to believe."

WDHF (FM), which started in March 1959 and now programs show tunes, light classics and other popular fare, got that way by studying the perpetual inventory at the record store of its owner, James DeIaan.

Fm set ownership is now pushing 1 million for 42.9% saturation and the station population has grown to two dozen outlets, including noncommercial, educational and religious stations. All class b channels are in use and suburban class a assignments are being quickly gobbled up.

Business on the leaders is reported good, including some blue chip major advertisers placed through the big-name agencies. Others, though reluctant to admit it, still are struggling to establish economic footholds.

Some stations still duplicate their am counterparts, including CBS-owned WBBM-FM and NBC-owned WMAQ-FM. ABC-owned WENR-FM programs separately. Chicago newspapers are devoting more attention to fm news now. Fm program guides are popular; WFMF and WFMT publish their own.

Washington-Baltimore: The nation's capital and its neighbor, Baltimore, provide all any listener could ask in varied programming—from the longest-hair music to pure jazz and hillbilly. This is another of the areas where a score or more fm signals can be picked up by the average set.

One of the oldest of the separately programmed stations, WTH-FM Baltimore, reported its 1960 business was well over 1959 which in turn exceeded

Supermarket chain buys Houston fm package

Henke & Pilott, division of Kroger Co., one of the nation's giant supermarket chains, is using KHGM (FM) Houston for hard-sell promotion of grocery items as well as institutional copy. The account was placed by Aylin Agency, Houston.

The contract calls for purchase of all daylight time every Thursday, 6 a.m.-5:25 p.m., covering the months of January and February.

Left to right: Harold Hajovsky, advertising manager for the 24-market Henke & Pilott chain; Jo Moore, Aylin Agency; Paul E. Taft, owner of KHGM.
FM UNITS DOUBLE IN TWO-YEAR PERIOD continued

1958. "And we hope to double our 1960 volume this year," said Sam Kravitz, manager. Several new fm outlets are in the market. WITH-FM is the QXR Network outlet, picking Kravitz, manager.

Mr. Kravitz notes that the station "is processing along with tape masters, and making signal -62.

FM L.

Several new fm outlets are in the market. WITH-FM is the QXR Network outlet, picking Kravitz, manager.

Mr. Kravitz notes that the station "is processing along with tape masters, and making signal -62.

FM L.

Mr. Kravitz feels fm station programming, particularly in the musical field, is ahead of public response but he sees the public rapidly catching up with the service. "Fm is economical to operate," he said. "It needs no multiple antenna arrays or directional equipment. It provides a healthier climate for development. Signal patterns reach out 30 miles or more, extending beyond suburbs now out of range of some am stations as market limits are widened."

Mr. Dillard added, "The day we get the numbers we'll whip them. We're getting closer every year."

Indianapolis: Fm interest in Indianapolis picked up last year with entry of the Time Inc. station, WFBM-FM, into the market. Shirl Evans, WFBM-FM manager, introduced 24-hour operation last Dec. 1, a year after the station went on the air. Variety in music is offered in the 1-6 a.m. period, with news headlines every 20 minutes between 6-9 a.m. as well as news in depth. WFBM-FM is billed as "The Golden Sound of the Middle West."

The station broadcasts "custom-created adventures in sound" from 6:30 p.m. to 1 a.m. Mr. Evans estimates circulation in the area in 205,000 sets, with 26% of homes fm-equipped. An active regional account is North Woods coffee. Boeing Airplane Co. bought time to promote its engineering recruiting plan.

WIBC-FM went on the air last year. Next will be WISH-FM but its completion awaits milder weather. "We've found fm interest growing," said Robert B. McConnell, vice president-general manager of the Corinthian outlet. He added, "This is no longer a hobby or plaything. The number of grants is increasing. We should be in fm if we're going to have a complete broadcasting service."

Asked if WFBM-FM is in the black, Mr. Evans said, "Year on the way. Indianapolis has 31% penetration. We have made progress in a year." The station has issued certificates to advertisers as part of its promotional campaign. A January survey by WFBM-FM showed a 92% increase in local set sales last year, with 80,000 estimated fm homes in Marion County.

Detroit: If every city had the fm enthusiasm that marks the Detroit audience, the better-sound medium would be an easy one.

Two years ago there were 10 commercial stations in Detroit; today there are 16 on the air and two on the way.

A survey conducted by the research department of Michigan State U. for WLDM (FM) showed 52% saturation, according to Harold J. Tanner, president-general manager of this highly profitable operation. Figuring on a 60-mile radius, he said 846,032 sets are within the effective signal area. WLDM is increasing its power from 20 to 165 kw and buying two new transmitters.

Set sales are at a peak, he said. Auto sets are becoming popular in this motor-minded market. Ford installs fm as original, optional equipment in its higher-priced models. Detroit is buzzing with rumors that General Motors will introduce a Delco fm auto set.

The prestige Fred Sanders Store (baked goods, candy) recently placed a $20,000 spot account on WLDM. BOAC has been on the station two years; a brief Columbia Record Club campaign brought 850 new members in a month. Detroit Edison has renewed for the eighth year. The giant J. L. Hudson Co. department store has a weekly WLDM hour.

Two Detroit newspapers have caught the enthusiasm. The News carries fm highlights daily and the Free Press has a weekly summary in its Sunday issue.

Houston: With eight stations now on the air, and two on the way, Houston provides one of the most significant examples of fm's swifter pace. All stations belong to Houston Fm Assn., which holds frequent luncheons as part of a promotion program high-spotted by Fm Week at Christmas time. Latest circulation figure claimed for Houston is 163,000 sets.

Dave Morris, general manager of KQUE (FM), is "very enthusiastic" about this new adjunct to KNUZ. "I gave it a year to get in the black," he said. "Now I expect to beat that goal.

Penetration pushes past 40 % mark

Fm set penetration in major U. S. markets is 43.5%, according to a composite of 16 Pulse studies conducted in 1959-60 and compiled by National Assn. of Fm Broadcasters. The Pulse data show 56.5% of fm homes listening sometime each week; 51.3% listening every day; 13% multiple fm homes; 10% offices and business establishment with fm sets. Last month Pulse started quantitative fm surveys in six or seven markets, according to Lawrence Roslow, associate director. The surveys will show for individual stations the average number of fm homes reached for the average quarter-hour; total number reached daily, weekly and monthly. A formula for quantitative data was worked out with National Assn. of Fm Broadcasters.

Here is the NAFMB compilation of available metropolitan market penetration and fm homes figures (within last three years):

by six months." Mr. Gielow said. A high-priced bread account Feb. 2, moving him to say, "That made eight new contracts in 10 days." He tailors complete promotion programs to each account. KNUNZ has one full-time salesman and a programming staff of five. Easy-listening music is featured. "This is the kind of am station I would like to run," Mr. Morris said.

Houston's entry into the fm scene as a major factor began three years ago when KFMK (FM) and KHGM (FM) were added to two local am duplicators. More were added in 1959 and by mid-1960 the city was one of the most fm active spots in the nation.

An unexpected entry into Houston's sponsor list in January was the Henke & Pilott division of Kroger Co. super-market chain, which bought all Thursday daytime hours on KHGM (FM) for January and February. (photo page 82)

Kansas City: Kansas City has an active promotional group, Fm Broadcasters of Greater Kansas City. Last September a 17-minute slide-sound film in color, depicting fm's growth, was shown agency, advertiser and media executives. The showing was a success, according to Chris J. Stolfa, commercial manager of KCNO-FM and chairman of the association. A follow-up mailing was added. Oct. 2-8 was celebrated as Fm Radio Week in Kansas City. Five commercial stations are operating.

Fm penetration is described as now nearing 40%. All this activity reached out 60 or 70 miles to Topeka, where some fm signals come in from the east. Recent public comment induced one of the oldest Kansas stations, WIBW, to enter fm, according to Thad Sandstrom, general manager.

Newest addition to the Kansas City fm market will be WDAF, another longtime am outlet. Equipment is on hand and a winter target date has been set. A new outlet, KBEY-FM, went on the air in January, featuring good music. A fifth commercial outlet is due next summer. David Green, vice president of KKTR (FM), said an increasing number of institutional-minded advertisers are going into fm. He estimated local advertisers spent over $100,000 on the four commercial stations that operated last year.

Pacific Coast: Up and down the coast a promotion priced bread account by FM was nearing was follow-up mailing was added. Oct. 2-8 was celebrated as Fm Radio Week in Kansas City. Five commercial stations are operating.

Fm day has 18 hours with peak in afternoon

The typical fm commercial outlet is on the air 18 hours a day, with peak audiences between 4:30-6 p.m. and 7-9 p.m., according to Sidney J. Wolf, president of Fm Broadcasting System Inc., Chicago. FMBS has 7i affiliates around the nation. Mr. Wolf also heads Keystone Broadcasting System, am network.

Recognizing the need for nationwide fm data, he has conducted several surveys along with coverage-listening studies. These are used as the basis for profiles of affiliated fm stations. "We are finding a rising interest and enthusiasm for fm among national advertisers," he said.

Two out of every three fm stations report between 31% and 50% fm saturation in their markets, the FMBS research showed, with highest penetration, 60% in New York City were (WRFM (FM)) is the affiliate.

At-home tunein runs between six and seven hours, according to the survey. Some affiliates reported all-day listening (27% of listeners in Seattle, according to KLSN (FM). Out-of-home listening is gaining fast, Mr. Wolf said, as business firms install fm sets.

In analyzing programming, FMBS figures show good music 44%, popular music 15%, symphonic 33%, religious 6%, special events 2%, news—average of five-five-minute segments per day.

In San Antonio, incidentally, three out of four fm listeners cite superior sound/superior reception as the main reason they listen to fm. Jack Roth, general manager of KITY (FM), began serious promotion of the decade-old fm outlet last June in a three-station fm market, setting up separate sales and program departments. The reason: "People were talking a lot about fm." "We were in the black within 30 days," Mr. Roth said. Accounts include Hamilton Watch. Fm penetration in San Antonio is 21.5%.

Three Pacific Coast states fm is growing, with Los Angeles, San Francisco and San Diego the spots of highest interest. Sacramento and Fresno, along with other markets, are feeling the impact.

Fm is here to stay in Los Angeles, 25 commercial operators insist. It's a tough job for many of them because of the extensive and intensive competition, despite the estimated 1 million fm circulation. While business isn't rolling in, it's easier to get than was the case a year ago.

One Los Angeles fm salesman put it this way: "Less than two years ago when I called on agencies I had to ex-plain what fm was and who, if anyone, ever listened. Today I get right down to time selling and sell fm just as I would am, aside from the difference in programming and signal. Buyers know what it is and many are fm fans." The last year fm stations felt the general dip in Southern California business, but several stations wound up the year in the black. All sorts of business firms are buying fm, especially those catering to the upper half of the family income bracket where the music and softer-selling commercials are especially appreciated.

Of the 25 commercial fm stations in Los Angeles, eight are entirely or largely duplicating am programs and 17 are exclusively fm.

North American Van Lines tested fm last year and found it produced a greater volume of long-distance hauling than other media. This led it into other fm markets across the country. Savings and loan companies and auto dealers are big buyers of fm.

A significant trend in programming was developed by KRHM (FM), which has across-the-board shows featuring Steve Allen and Johnny Green in programs that have gone into syndication. Ford Dealers of Southern California, sponsoring Johnny Green's World of Music on KRHM, have added Phoenix and San Diego and are urging Detroit to make the series a national vehicle.

San Francisco continues to be one of the leading fm markets with 23 fm stations serving the immediate area—17 of them separately programmed. Gary M. Gielow, president of San Francisco Bay Area Fm Broadcasters Assn., said the latest Pulse saturation figure is 47.3%, one of the nation's highest.

Mr. Gielow called the fm association's local Fm Month promotion, Feb. 19-25, one of the most extensive in the industry.

Your **TOP SECRET** will cause more tune in and tune up ... you to be talked about and talked up ... with **SOUND OF THE CITY** **TOP SECRET** is **YOURS!**
Why don’t stations tell how good they are?
AGENCIES FAVOR FM BUT WANT PROOF OF AUDIENCE

The men who really know their numbers, agency timebuyers, want more and better circulation figures from fm broadcasters—a lot of each.

A dozen agency executives, some of whom would not be quoted, agreed they would not accept fm as a major national medium until they can get up-to-date and accurate data on the number of fm sets in circulation, the number of fm families in larger markets, the amount of tune-in and specific market data.

Many timebuyers are friendly toward fm and are following the medium’s development. However, a majority tend to shrug off fm as a good type of signal providing good music to a selective audience. The qualitative data showing the traits of fm’s upper-crust audience are widely accepted. But this very trait convinces many timebuyers that fm is a deluxe service aimed at a desirable but limited segment of the populace.

"Where are the reps?" one agency man asked. "If fm is so wonderful why aren’t the reps hounding us?"

Another asked, "Why don’t stations get off their behinds and tell us how good they are?"

"Let’s see their cost-per-1,000," said a third.

This poses a dilemma to hundreds of fm operators who can’t afford the luxury of Madison Avenue selling but who would give two bays off their 800-foot antenna for the fun of signing some national business.

Where are the reps? They’re mostly waiting for fm’s numbers to catch up with the enthusiasm of its operators. There are a number of specialized reps—Good Music Broadcasters Inc., Heritage Reps and Fine Music Hi-Fi Broadcasters, for example. Representation-sales functions are also performed by Fm Broadcasting System (fm cousin of the am Keystone Network), QXR Network and others. Many of the leading national reps are giving fm a closer look than their spokesmen will admit in public.

Many of these are prestige accounts serving a higher-income audience. Many of them have success stories to tell about fm results. But the flow of top national advertisers into fm is slow and mostly they have gone into the top 25 markets.

The most active research firm has been Pulse, which has conducted surveys in two dozen top markets. Last month Pulse started a regular fm survey service which Lawrence Roslow, associate director, said already covers six markets with others expected to follow. The new service will supply daily quarter-hour averages 6 a.m.-6 p.m. and 6 p.m.-midnight as well as daily, weekly and monthly cumulative figures. National Assn. of Fm Broadcasters was active in developing this new research.

Alfred Politz has done qualitative surveys for the Heritage Station group. C. E. Hooper Inc. has discovered fm stations appearing all over its radio

the key
to successful
"automatic programming"
is
PROGRAMMING!

Every radio station operator
knows it. That's why astute broadcasters
are hailing the new automated radio
programming by Magne-Tronics.

For Magne-Tronics top quality programming, on tape,
consists of outstanding "name" musical productions from both
sides of the Atlantic. Almost 80% of the music is popular
and popular-concert, pleasingly balanced with symphonies, vocals
and, of course, seasonal and holiday numbers.

PROGRAMMING WITH INFINITE VARIETY

Magne-Tronics music comes in ten 8-hour reels. A new reel added
each month keeps the schedule fresh and exciting . . .
continually builds your library. The interspersing system in the
equipment enables stations to achieve infinite variety
in the sequences of the numbers.

PROVED, FAMOUS-MAKE EQUIPMENT AVAILABLE

Specially designed, famous-make equipment (available, if
required, through Magne-Tronics) provides continuous, trouble-free
automated radio programming — including commercials
and announcements.

Yes, with Magne-Tronics you get all the economies of automated
broadcasting, plus radio programming that gives a lift to your schedule.
And priced for economy-minded budgets!

Write today for full details . . . audition tape — and exclusive
rights in your market.

* Be sure to look into the Magne-Tronics background music
service which broadcasters are finding a valuable station asset.
Exclusive franchises in preferred markets still available.

Magne-Tronics, INC.
49 West 45th Street, New York 36

Hooperatings (see Hooper story page 92). Many stations have used university
research departments and business
to provide circulation and qualitative data.

The Numbers Game • The big agencies, however, keep wanting numbers
comparable to those supplied by am
radio, television and print media. They
wonder why fm broadcasters can't get
organized and produce uniform national numbers. NAFMB has taken steps in
this direction under the leadership of
Fred Rabell, of KITT (FM) San Diego.

Agency interest is increasing, but not
fast enough to suit fm stations. Hund-
dreds of buyers are fm fans and like the
medium but they get down to hard facts
at the office and they think of it as a
narrow, specialized medium.

"Fm must be approached in a com-
mercial way," said Alice Wolf, N. W.
Ayer timebuyer. "There must be some
way to make it succeed," she pondered,
adding, "but of course you know there's
more advertiser interest and fm buying
every year." But she suggested fm
programming should be more diversi-
ified. "It's not good for all accounts,"
she said. Among Ayer fm clients are
Hamilton Watch and Steinway. Michi-
gan Bell has been showing interest in fm.

Edward C. Fieri, media supervisor of
BBDO, New York, said, "The calibre
of the fm audience is due to the program-
ing, not the physical facilities." As to
numbers, he said, "We need audience
data. What are stations delivering? Are
people listening? The audience profile
information is good but there is little re-
search reflecting the size of the audi-
ence."

Ray L. Stone, radio-tv timebuyer at
Maxon Inc., New York, described fm's
progress in the last two years as "spot-
ty." He said, "The faults that existed two
years ago are still there—lack of selling,
promotion, education and research."

He said the test of fm will come with
keyed-response campaigns in which both
results and cost-per-1000 are matched
with newspapers, television, magazines
and other media. The Maxon agency
is not currently buying fm. About a
year ago it bought some fm time from
General Electric.

"Disappointed" • Joe Gans, head of
the New York agency bearing his name
and a longtime fm booster, is "frankly
disappointed because fm hasn't ful-
filled its potential." He contends fms
should supply a needed service midway
between tv and am programming, add-
ing that the public wants more than
good music.

Mr. Gans' agency has been described
as one of the heaviest buyers of fm ad-
vertising in the country. Among current
accounts are Harpers in over 50 mar-
kets, American Heritage magazine,
Time magazine, and Cadie Products.

Two years ago Mr. Gans was con-
"RCA Color TV Tape...Equal of Color Live!"
— says William B. McGrath, V.P. and Managing Director, WHDH-AM, FM, TV, Boston

"Here at WHDH-TV we are enjoying great success with our RCA Color Television Tape operation. Taped programs, commercials and special events sparkle in color. We find color tape the equal of color live—and with the convenience and ease that only RCA TV Tape can give.

"RCA Color TV Tape Recorders have completed our RCA color facilities. We do all our local programs in color. By adding the client convenience of television tape to the new dimension of color, we have an unbeatable combination for success."

RCA Color TV Tape Recorders are proving themselves in installations like WHDH because they are designed for color. Picture quality is virtually built in, thanks to multiple monitoring checks. You can check through the entire system for the very best picture. Precision head-wheel interchangeability for color, too, means you can play back tape on any machine, regardless of where it was made.

More and more broadcasters are specifying RCA TV Tape for color operation because it is part of a completely matched line of color equipment available from one single source—including color TV tape recorders, studio color cameras, 3-V film cameras and projectors, color monitors, switching and special effects. They find service before and after the sale of the kind that only RCA with its broad background in color television can perform.

vinced fm’s future was “absolutely rosy,” with possibility of a “boom” in four or five years. His February 1961 view is about the same. “Fm stations must have more than music,” he told Broadcasting. “Their programming often isn’t up to par. But I’m still enthusiastic about fm’s future.” He reminded that the audience is growing despite the lack of promotional help from manufacturers.

“Fm can’t be bought on a cost-per-1000 basis,” he said. “It can’t be bought by the numbers, by a nose count or by sets sold.” He’s encouraged by signs of a “mass-media approach” through trade association activity and low-cost sets.

Walker-Rawalt, national representative firm, now represents 28 major market fm stations (selling individually or as a group), Quality Music Fm Stations. All are located in the first 50 markets, according to C. Otis Rawalt, vice president.

“Fm got off the ground in 1960 and 1961 is even better,” Mr. Rawalt said. “Our fm billings for the first two months of this year are ahead of the first quarter of 1960. That’s the direction radio is moving—into fm. Advertisers are showing more interest. They know their commercials can get good exposure.”

Mr. Rawalt noted a trend toward separate programming by fm adjuncts of am-fm operations. He predicted several other representatives are getting ready to move into fm. “The trend is turning,” he added. “Fm stations are starting to sell harder and are contacting national advertisers.”

Hooperatings beginning to show fm listeners

All of a sudden fm is developing conspicuous numbers symptoms. While factory set sales zoom 70% in a year and the number of stations increases, fm still faces the demand of agencies for ratings and cost-per-1000 data—numbers that are consistently applied to the purchase of advertising.

The newest development that has come in recent weeks, according to Fred H. Kenkle, of C. E. Hooper Inc., is the appearance of one or more fm stations in a score of metropolitan Hooperatings.

“One year ago they rarely showed,” Mr. Kenkle said. “Now they have ratings in a score of cities. A 5 or 6 rating isn’t unusual any more. We’re terribly conscious of fm in the last two months and fm stations are starting to subscribe to our service.”

Among cities where fm stations are appearing in Hooperatings are San Francisco, Chicago, Houston, Indianapolis, Pittsburgh, Los Angeles, Albany, Syracuse, Washington, Toledo, Wilmington (Del.), Allentown (Pa.), Cleveland, Kansas City, Lansing (Mich.), Lincoln (Neb.), Denver, and Bakersfield, San Bernardino and Sacramento (Calif.).

Audience too is superior, Politz reports

Fm families are the best families for advertisers, according to a 1960 survey conducted for Heritage Stations by Alfred Politz Media Studies in five West Coast markets.

The Politz firm based its findings on the type of audience reached per advertising dollar spent in the fm medium. Here are the Politz fm breakdowns as announced by Heritage:

- Almost twice as many high-income families as mass media; 43% of fm families have an annual income of over $7,000 compared to only 27% of the mass audience.
- One-third more college-educated heads of households; 49% of fm heads of households have a college education (only 33% of all heads of households have attended college).
- One-third more professional, managerial, sales or clerical heads of households; 54% of fm family heads are in this category (only 40% of the total population are thus occupied).
- One-third more two-car families; 32% of fm households own two cars (compared to 23% of all house-

and added, “Fm stations are starting to sell harder and are contacting national advertisers.”
When time is money...

and quality counts

USE MACKENZIE "INSTANT" AUDIO

Proven by millions of hours of continuous service

NOTHING FASTER... NO HIGHER QUALITY!
The completely transistorized 5CPB features perfect quality and greatest reliability. It is the fastest automated audio unit you can get... carefully designed and built to give you the continuous, dependable service you need.

A PERFECT COMPANION! MacKenzie 1CPR Instant Recorder — and single-channel playback repeater — assures perfect pre-recorded announcements...made in leisure time. Provides natural live quality reproduction...instant playback...instant automatic erasure, interlocked against accidental operation. Saves waste motion, lost time... makes every precious second count... for you!

MACKENZIE 5CPB Five-Channel Selective Program Repeater gives you quick returns on your investment

TIME IS MONEY! And every second saved... every miscue or fluff that you eliminate means more time to be sold... fewer penalties... and all of these mean greater return on your investment.

The ruggedly built, completely dependable MACKENZIE 5CPB contains five continuous loop tapes that may be used simultaneously or individually... plays pre-recorded spots, announcements, commercials, station breaks, jingles, music bridges, sound effects... any material requiring precision cueing and instantaneous stop-start operation. Saves seconds-minutes-hours... puts money in your pocket!

Gentlemen,

Please contact us immediately.

Please mail me the complete story on MACKENZIE money-making equipment.

Networks fill many functions for stations

NEW ENTRANTS IN FM FIELD INDICATE GROWING INTEREST

Fm networking, like the medium as a whole, is making steady progress. "At least we're going up while the am networks are going the other way," one fm broadcaster said.

The main network operations differ somewhat from am networks in the broad base of their functions. They serve as combined program sources, live, tape and disc; perform as national or regional representatives in many respects; provide national accounts, though it's often a tough sell, and supply promotional aids. All these are often on a much looser basis than is the case with am networks and their affiliates.

Among new entrants in the field are Fm Broadcasting System, operated by Sidney J. Wolf, head of the huge Keystone am transcription network, and the Heritage Stations group headquartered in Bellingham, Wash., with International Good Music Inc. as parent company. IGM owns five of the Heritage fm outlets. Rogan Jones, KVOS Bellingham, Wash., founded the project.

Fm networking is successfully operated by the QXR Network of WQXR-AM-FM New York, owned by the New York Times. It claims the largest national account in fm history—five-weekly, five-minute 52-week commentaries for Chrysler Imperial automobiles on the 19 QXR stations interconnected by the network and the stations associated with the network by tape. Young & Rubicam, New York, is agency. The series is titled The Imperial Press Club.

Business is fine, according to Elliott M. Sanger Jr., executive vice president of WQXR-AM-FM. "Last year was better than 1959 and 1958," he said. "Prospects are bright and we're very optimistic." And he added, "We're making money." Accounts include Cadillac, Olds, Hamilton Watch, Citroen, Grace Lines, Sabena airlines, among others. Marine Midland Banks recently bought a Boston Symphony series on the QXR New York division. The network claims 2.7 million fm families (33.7% penetration) in its total coverage area, 730,400 for the New York State division.

Sales Up ▶ Concert Network, operating four classical-music stations in the Northeast, enjoyed "a considerable increase in business" in 1960, according to H. Stilwell Brown, general manager. Its stations are WBCN (FM) Boston, WXCN (FM) Providence; WHCN (FM) Hartford; WNCN (FM) New York. In addition it serves several affiliates. WAVA (FM) Arlington, Va., Washington suburb, is an associate station.

A novel tiein with WOR-AM-FM New York for Philadelphia Symphony concerts provides several stereo combinations, WOR carrying the right channel on both am and fm, and WNCN (FM) carrying the left channel. Mr. Brown said 16% of the families around New York have two fm sets. WNCN recently signed a 16-week contract with New York Telephone Co. through BBDO.

FMBS is headquartered in Chicago and has national sales offices in New York, Detroit, Los Angeles and San Francisco.

John Hartigan, FMBS secretary, said stations must provide timebuyers with audience composition and coverage data before fm can be recognized as a major medium. "Then it can become as commercial as other media," he said. All FMBS stations are members of National Assn. of Fm Broadcasters. National advertisers are offered the entire FMBS lineup on which they have a minimum schedule of 13 weeks, using one announcement per day seven days per week on each station. Maximum schedule is based on 52 weeks and three announcements per station per day. The minimum 13-week, 71-station rate (one commercial daily each week on each station) is $205 for one announcement (one-minute) or $1,400 plus per week, a 13-week campaign total of $18,672.

Heritage is now operating in 20 markets with its automated tape program service, based on serious music. The program service is labeled Heritage Music. Stations are represented nationally by Heritage Representatives.

Heritage Expands ▶ John D. Tuttle, administrative vice president at Bellingham, Wash., headquarters, said Heritage will enter six other major markets in the near future. He said two syndication salesmen are on the road and stations will be added at the rate of four to six a month. Fred Von Hoefen has been named national sales director in New York. Sales offices are also maintained in Detroit, Chicago, Los Angeles and San Francisco.

Heritage is adding an am program service based on automated tape but using lighter music.

Among accounts are Langendorf bread, which recently renewed on the West Coast through Botsford, Constan-tine & Gardner, Book of the Month, Tuborg beer and Matson Lines.

Westinghouse Broadcasting Co.'s four fm stations launched a non-commercial, non-duplicated program service about 18 months ago. They are: WBZ-FM Boston, KYW-FM Cleveland, KDKA-FM Pittsburgh and KEX-FM Portland, Ore.

Westinghouse fm outlets have locally created program formats, but it is economical for them to make "group buys" when program packages of interest to all are available.

Automation is becoming more important to fm stations, with Heritage, Magne-Tronics, Programatic (Muzak subsidiary) and others added to the vast supply of music available to am stations. Automated tape can be cybered around to various stations.
Central Florida's exclusive TV market covers 19 counties, one-fourth of Florida's TV homes. Coverage based on 1960 ARB report.

Central Florida market

MORE VIEWERS WATCH and are loyal to these Central Florida Stations than any others.

FLORIDA'S ONLY INLAND MARKET with primary and Grade B TV coverage over ground. No signal waste over ocean.

EXPOSE YOUR SELLING MESSAGE over 1,143,600 consumers.

ORLANDO is the third fastest growing metropolitan market in the U.S.

WAREHOUSES for some products distributed in the Central Florida market are located in seaports of Jacksonville, and Tampa, but the CONSUMING Central Florida market is penetrated only by WESH-TV, WDBO-TV, and WLOF-TV.

BROADCASTING, February 20, 1961
A tight, on-the-nose format means more sales appeal for your station.

With the Gates Spot Tape Recorder, control room operations are greatly simplified and perfect program continuity is maintained. **You stop wasted motion!** Operation is simple and exact . . . you simply move the index lever to the spot your log calls for, push the play button and let Spot Tape do the rest.

On one tape 13" wide are 101 announcements, jingles, themes, station breaks or any other program content up to 90 seconds duration each. **This is versatility!**

Through planned rehearsals using multiple voices, background effects and themes, each announcement is aired with **professional perfection.** When complete, the tape automatically reverses and then cues up for **split-second airing** of the next spot. Erase any track not needed and record a new one as schedules change. The adjacent track is not affected.

**Spot Tape Recorders are now available for immediate delivery. Place your order today.**

---

Opinions differ on value stereo will have for fm

Stereo or multi-dimension sound promises (1) to carry fm broadcasting into exciting new heights and gross income or (2) to saddle the medium with an over-rated gimmick whose value already has been wrecked by high-pressure promotion. It all depends on who's talking. Competent experts are heard on both sides.

The FCC is currently considering a technical report submitted last October by the industry's National Stereophonic Radio Committee, an industry group that conducted extensive field tests of six different ways of multiplexing (mx) or hitching one or more fm subcarrier signals to the main carrier.

In essence, multiplex (mx) stereo is based on carrying a program on the main fm carrier and adding a separate pickup to a subcarrier. The FCC adopted the mx idea several years ago with the thought of letting fm stations earn extra money by transmitting communications services (taxi dispatching, paging and background music, for example), as well as stereo.

Impatient fm stations eagerly await the FCC's decision, due within two or three months. The Commission may approve any one of the six systems or some hybrid form. The systems tested were developed by Murray Crosby, Calbest, Multiplex Development, EMI, Zenith and General Electric.

A lot of paper work remains to be done by the FCC. Some of its problems include the selection of a stereo system free of cross-talk and capable of delivering high-grade stereo. Crosby-Teletronics was actively promoting its version of stereo in mid-February at the Washington Hi-Fi Show and at a news luncheon. M. Robert Rogers, show chairman, described stereo as "one of the most revolutionary developments in the broadcasting field." He formerly owned WGMS-AM-FM Washington.

There are hints that when the FCC picks a system, the action will take the form of a report and order. This is as final as an FCC action can get, and it could mean that mx stereo adapters for fm sets will be on sale in 1961.

Stereo boosters often argue the service will be the "one big thing" they need for identification with advertisers and agencies and a startling feature that will set fm apart from am radio.

The FCC has issued some 300 authorizations for non-broadcast mx services such as background music, paging and similar functions but there is no record of the number of these grants that are in active operation.

This oversimplification of stereo-mx progress indicates the whole business is in a fluid state, awaiting FCC action and then public reaction.
The long-expected, long-awaited, long-delayed "breakthrough" in color television is emerging, not in the sudden sunburst sense of the word, but slowly and gradually, more like the first light on a clear, cold morning.

Or, in a more appropriate metaphor, like a peacock unfurling his feathers—slowly and deliberately.

A check of some of the leading television stations across the country finds that virtually all of them are convinced that color is the coming thing—and that most are doing something about it. What they are doing, as indicated in the sampling (see page 100), ranges from literally all-out to relatively limited and spasmodic color ventures or reliance primarily or even exclusively upon their networks, and of course a great many stations are as yet doing nothing at all about color, network or local.

But it seems clear that in important markets in all sections of the U.S. more and more viewers are gradually getting more and more exposure to color.

Here is a status report on some of the principal elements by which the progress of color television toward recognition as a major communications and advertising medium may be judged:

**Sets in Use** - The best available estimates, although not official, put the current U.S. total at 600,000 to 650,000. Annual output is gaining at a rate which, although the unit figures look small in comparison to black-and-white sales, is impressive in terms of advances. The generally accepted estimates, for instance, say that production totaled about 115,000 sets in 1959, rose 30% to 150,000 in 1960 and probably will go up another one-third or more to 200,000 this year. By comparison, incidentally, black-and-white sales are currently running behind last year's levels, and have been for several months.

**Manufacturers** - RCA, which developed and is by any yardstick is the biggest manufacturer and promoter of compatible color, is still carrying the ball almost single-handedly: It is believed to account for close to 95% of all color production. But color is getting more than lip-service from a growing number of other manufacturers. Admiral Corp. has been turning out color sets in significant numbers for the past two years, and Emerson-DuMont, Magnavox, Olympic and Packard-Bell also are currently marketing color sets. The Westinghouses, General Electrics, Zeniths and Philcos have not indicated plans to go into color right away (although some of their retailers have indicated very clearly that they wished they would), and RCA quite frankly is relying on its offering of color to strengthen and expand its ties with dealers and distributors for franchises covering not only color sets but other RCA consumer products as well.

RCA meanwhile experienced a color breakthrough of its own last year: For the first time it made a profit on color set sales which could be "measured in seven figures," according to Brig. Gen. David Sarnoff, RCA board chairman, who has spearheaded RCA's color activity from the beginning. It was the second year that RCA had operated "in the black" on color, but it was the first million-dollar return, in profits, on a

**There's plenty of color film programming available**

Color film programming in fairly substantial quantities is available for television stations but distributors acknowledge there has been as yet "no great rush" for such product from TV stations.

The added cost for color film prints, which syndicators pass on to stations, appears to have held up demand for color programming. The bulk of color product consists of film cartoons, both those produced originally for theaters and those made expressly for TV. Feature films swell this total and there are available some serials produced over the years. But there appears to be scant inducement to produce new series in color. Stations ordering programs produced in color usually request black-and-white prints.

Distributors reported that product available in color includes the following:

- National Film Assn.: 20th Century-Fox features (68)
- Seven Arts Associated Corp.: Warner Bros. Post-'50 (26).
- Jayark Films Corp.: Bozo's Cartoon Storybook (151 six-minute episodes);
  Jayark Blockbuster Features (5).
- Sterling Television Co.: Captain Sailor Bird Cartoons (190 5½-minute episodes);
  Adventure Theatre (78 half-hours).
- Banner Films Inc.: Judge Roy Bean (39 half-hours), Speedwagon International (39 half-hours), Cartoon Classics (216 five-minute episodes); Banner Features. CBS Films Inc.: Terrytoons Cartoon Library (200), Deputy Dawg (104), Heckle and Jeckle (104); Mighty Mouse and Tom Terric (for CBS-TV's Captain Kangaroo. (All cartoons run about 7 minutes). (Number undetermined.)
- Independent Television Corp.: Best of the Post (26 half-hours), Diver Dan (104 seven-minute, animation-live action episodes), Golf Tip of the Day (195 five-minute episodes).
- Official Films: Spunky & Tadpole cartoons (130); Adventures of Sir Lancelot (14 half-hours).
- Television Industries Inc.: Minute of Prayer (365 one-minute featurettes).
- MCA-TV: Paramount Pre-'48 features (9).
- Flamingo Films Inc.: Stars of the Grand Ole Opry (96), Superman (52).
- California National Productions Inc.: Danger Is My Business (39 half-hours);
  Cameo Theatre (26 hours); Gumby (22 half-hours).
- United Artists Assoc.: Warner Bros. Pre-'48 features (25); United Artists features (55); RKO features (25); Popeye the Sailor cartoon vehicles (27); Mel-O-Doons Cartoon vehicles (52) and Warner Bros. 7-minute cartoons (311).
- Ziv-UA: Cisco Kid (26).
COLOR TV IN EVOLUTION continued

The total RCA color investment which has been estimated at $130 million. The manufacturing industry's total color sales, including station equipment as well as sets, amounted to $100 million in 1960.

Gen. Sarnoff also has predicted that most television manufacturers will be engaged in the production of color sets within two years, three at the outside.

Networks - Like RCA among manufacturers, its subsidiary, NBC, is carrying the color ball almost single-handedly among networks.

CBS-TV is hewing to what it calls a "middle-of-the-road" course. It has color equipment, including video-tape machines converted for color use, and it feels that color will be "a big plus, eventually." But it also has taken the position that while it is spending hundreds of thousands of dollars a year on color activities, it will "put our millions into programs which can be seen in all television homes . . . until the sale of color sets indicates more than just partial acceptance by the public." Its color programming consists of an occasional Red Skelton Show and a special now and then.

ABC-TV is programming nothing in color, but like CBS-TV it says it's ready when the time comes: "When American viewers show, by their purchase of color television sets, that they want color tv, ABC will start broadcasting in color. Our studios in Los Angeles, New York and Chicago are equipped to broadcast color within days of a go-ahead. ABC has not set a definite figure of a specific number of color sets in the hands of the public to trigger its start of colorcasting. The public will cue us—they will let us know, not only by the eagerness with which they start buying color sets, but by their demands for color direct to us and through our affiliates."

While the other networks are playing it cool, NBC has been playing it big. In 1960 NBC-TV programmed more than 1,000 hours in color—an average of almost three hours a day—and at year's end colorcasting almost 80% more than at the same time the year before. Indications are that 1961 will be even bigger: A weekly Walt Disney hour and a number of Disney specials, for example, are among the sure additions set for the existing color schedule in the new season.

Apart from its steadily expanding list of regular colorcasts NBC-TV inaugurated in late 1960 a concept of special "Color Days"—a program which already has been broadened in 1961. On the first "Color Day"—last Nov. 11—more than nine hours of color programming were broadcast. This was followed on Dec. 8 by "The Most Colorful Night of the Year," on Feb. 9 by a second "Color Day" in which 18 out of 20 programs were carried in color (everything except two shows that had been pre-filmed in black-and-white), and in March there will be a "Festival of Color" in which for a week (March 13-17) 90 minutes of afternoon programming will be added to the regular color schedule.

Aside from regular and special programming, much of NBC-TV's sports coverage has been in color, including championship tennis, the World Series, All-Star baseball game and football bowl games.

Film Programming - The number of film programs available in color—both syndicated programs and feature films—is substantially larger than the casual observer might think, and much of it is being programmed in color, although the distributors as a whole report that the demand for color prints is by no means heavy according to the usual standards (for details on film product available in color, see separate story, page 97).

Advertisers & Agencies - Almost a hundred advertisers sponsored regular color series on NBC-TV last year, and 23 sponsored color specials. In both cases, color commercials were used occasionally by many advertisers and exclusively by a number. In addition, this year Reynolds Tobacco has used color commercials on the black-and-white Wagon Train, Whitman candy used both color and black-and-white commercials on the String of Beads special, and Ballantine Beer is using color tape and color film commercials in its Sing Along With Mitch series.

Users of exclusively color commercials on 1960 NBC color specials were American Telephone & Telegraph Co., Chrysler, Ford Motors, General Motors (United Motor Service and AC Spark Plugs), Hallmark Cards, Minute Maid, Pontiac, The Smith, Kline & French Pharmaceutical House and U. S. Steel. Those using only color commercials in regular NBC series included Chemstrand, RCA, Chevrolet, Ford, General Motors and Plymouth.

On CBS-TV, four 1960 color specials were accompanied by color commercials: General Motors on The Danny Kaye Show, Timex on a Red Skelton special, Whitman Candy and Benrus Watches on Wizard of Oz, and Ford on Christmas Star Time. In addition commercials of Johnson's Wax and Pet Milk, regular sponsors of Red Skelton Show, were in color whenever the show was done in color.

For both advertisers and agencies, the value of color has been documented in research. One study, for example, by Burke Marketing Research Inc., commissioned by WLWT (TV) Cincinnati, found that the impact of color on commercials is such that, in effect, 1,000 color homes are equal to 3,589 black-and-white homes. The study showed not only that more people will watch a show in color than in black-and-white (if given a choice), but a greater share will recall the advertising considered persuasive and remember more details than is the case among black-and-white viewers (Broadcasting, May 16, 1960).

Profile of the Audience - Another factor holding interest for advertisers and agencies is the composition of the color audience. A study by Market Facts Inc., made for NBC a year ago, showed that the median income of color-set families is $13,123 as against $5,417 for the U.S. as a whole. In addition, 41% of the color owners were found to have incomes exceeding $15,000, as against a national average of 3%. At the other end of the scale, color owners have incomes of less than $5,000, as compared to 45% in the country as a whole. Almost half—48%—of the color owners were classified as "proprietary, managers, officials," whereas 10% of the U.S. population fits that influential description. In addition, 51% of the color owners were found to own two or more cars, as against 13% for the U.S. average.

Color Set Costs - There is a lot of talk about "when mass production brings prices down." Actually, they probably won't come down much. The $495 price tag on RCA's least expensive model isn't expected to drop significantly in the foreseeable future. RCA is tooled up now for mass production: It "mass produces" color sets continuously. More importantly, the circuitry in color sets is different from that in black-and-white; it's the color tube that makes the difference in cost, and unless somebody comes up with a much less costly way of producing tubes—tubes using one gun instead of three, for instance—the difference is apt to stay substantially where it is now. Marketers do not feel, however, that this difference is a real deterrent to color buying.

Stations - The last time NBC checked, which was some months ago, a total of 367 stations were equipped to rebroadcast color programs fed them by a network. Of these, 179 are NBC-TV affiliates, which means that approximately half are affiliates with CBS or ABC, even though those networks currently are feeding little or no color programming. In all, 104 stations were equipped to originate some kind of color locally: 100 could handle color slides, 99 could broadcast color films and 37 could originate local live color. These 104 stations included affiliates of all three networks and some non-network stations.
MORE ACCEPTANCE! Every one of these progressive stations bought a new Type 315B/316B 5,000/10,000 watt transmitter from Continental Electronics. This positive proof of the acceptance of Continental transmitters and related equipment is the best reason we have for telling you to call Continental today... you cannot make a better investment for tomorrow!
Color adds zest to sport, or symphony
EVERY TYPE OF PROGRAM IN CROSS-SECTION OF LOCAL ORIGINATIONS

With more than 100 stations equipped to originate some kind of color and nearly 40 capable of originating live multi-chrome more and more viewers are given the opportunity of seeing other than network programs in their natural hues. These programs vary from sports and parades to symphony concerts.

Following is a cross-section report on what a few of these stations are doing at the local level:

**WHDH-TV Boston:** During the last baseball season, WHDH-TV Boston originated 26 Boston Red Sox games in full color. These included both day and night contests. The results of the night as well as the day games were “extremely gratifying,” according to William B. McGrath, vice president and general manager. The station uses a high sensitivity color tube in the night baseball pick-ups.

WHDH-TV has been programming in color since November 1957. At the present time it originates more than four hours per day of local color programs, including children’s shows, news, public service, weather and feature film fare, most of which are live.

Some of the advertisers who have been sponsoring WHDH-TV include the Great Atlantic & Pacific Tea Co., Atlantic Refining Co., Northeast Airlines, Sandran, Standard Brands, and Calgon on the various news and weather shows. The station reports it also has a wide assortment of participating advertisers for its other color originsations.

Mr. McGrath says it is difficult to give a percentage figure on the extent to which color has added directly to the station’s revenue. But he points out that since WHDH-TV is the only New England “full color” station, this has added substantially to its prestige. Color, he added, has given the station’s staff “tremendous experience” in every phase of the business and will be a strong factor in the station’s future growth.

“Here at WHDH-TV we are highly satisfied with what we have been able to accomplish in color tv programming during the past 3½ years,” Mr. McGrath declared. “We are greatly enthused about the tremendous possibilities of color tv for the future. This enthusiasm for color is reflected in our entire operation—not only local, live programming but in our full schedule of color video taping as well. Boston is a color-conscious market and the future of New England television is indeed colorful.”

**WGN-TV Chicago:** During 1961, WGN-TV plans to present “more live color programs” than any other station in the country. Its color schedule will include 130 day home baseball games of the Chicago Cubs and White Sox for the second consecutive season, and all of its live shows, encompassing 40 hours per week (exclusive of baseball).
WGN-TV's accent on color has been accomplished without benefit of any network programming. The station's philosophy regarding color is summed up by Ward L. Quaal, vice president and general manager of WGN Inc. "We believe in color because it's better television. Color is a most potent and dramatic innovation in television, adding a fourth dimension of increasingly greater importance to the matchless combination of sight, sound and motion."

"In 1961 television will have its most successful, and certainly, its most colorful year. We have made considerable investments in this medium for better television. Our faith in the future of color television is reflected in the fact that our new radio and television center will be an all-color operation on live programming, plus increased emphasis on use of color prints on feature and syndicated film product."

The major color productions on WGN-TV during the past six months were: Great Music from Chicago, now in its second year; Treetop House series on education, and Chicagoland Church Hour. The station intends to continue with these programs and on Feb. 18 scheduled a two-hour colorcast of the Chicago Automobile Show.

As part of its large schedule of local color programming, WGN-TV carries cartoon features, syndicated films and feature films. It presents about 2½ hours of syndicated color films weekly and carried nine color features over the past six months.

WGN Chicago: Since 1956, NBC's WNBQ has presented all of its local live programs in color. WNBQ bills itself as "the world's first all-color television station," and currently telemcasts 14 hours a week in local color apart from an average of 36 hours of network color. It recently started using color newsreel films on its regular newscasts, and since late 1959, with the help of a video-tape battery now totaling four machines, has been active in promoting the use of color commercials by local clients. Polk Bros., Chicago's biggest retail appliance dealer, uses pre-taped color commercials exclusively in its post-midnight programs throughout the week. Henry C. Lytton (clother) and John M. Smyth (furniture) are also heavy users of color commercials.

One of WNBQ's most ambitious color productions is an alternate-week half-hour hour, Artists Showcase, which started last fall and which presents, live, the NBC Chicago concert orchestra and young classical music talent. Other local color presentations include religious programs, education, public affairs and farm shows as well as news and weather reports. The station averages two feature films in color each week but currently carries no syndicated color films.

Lloyd E. Yoder, vice president and general manager, thinks television "is on the threshold of a major breakthrough in color." He said: "In 1960 we found more and more local advertisers becoming aware of the sales potential of color television. One of our biggest clients, Polk Bros., is especially bullish. It was at Sol Polk's suggestion that WNBQ video-taped in color the inauguration parade coverage of NBC-TV, which Polk Bros. sponsored as a repeat broadcast in place of this client's regular late-night programming. Also, Polk conducted a color television open house at its seven Chicago locations on Jan. 2, attracting thousands of Chicagoans who watched the Tournament of Roses Parade and the Sugar Bowl football game in color."

WLWT (TV) Cincinnati: More than 42 hours of color programming currently are being telecast by WLWT Cincinnati each week, of which approximately one-half is provided by NBC-TV. But this total does not include network specials local origination of basketball games or late night movies.

This color output is one sign-post of the confidence that Crosley Broadcasting Co., owner of WLWT, has in the tinted medium. Its faith in color was amply supported by the results of a three-month survey commissioned by Crosley last year (Broadcasting, May 16, 1960). R. E. Dunville, president of the Crosley Broadcasting Corp., outlined the results of the survey and touched upon other implications of color TV in the following statement: "With the overwhelming effectiveness of color commercials versus black-and-white as indicated by recent color surveys, it is only a question of time when black-and-white will be the ex-

Color television camera of WLWT (TV) Cincinnati is located behind home plate where it pivots to permit sportscasters to handle live color commercials. Three color cameras are used to cover the games. The Crosley station is currently programming 42 hours of color each week, of which about half is provided by NBC-TV. In sports it colorcasts not only baseball but basketball and football games as well.

The 1961 Fort Worth Stock Show Parade was televised in color this year by WBAP-TV. The station has origi-
COLOR ADDS ZEST TO SPORT, OR SYMPHONY continued

ception rather than the rule. Based upon the study, when commercial effectiveness in color indicated three-and-a-half times more effectiveness in color than in black-and-white, a 5 or 6% penetration of color immediately becomes a 25% share-of-audience increase in color homes. It is our sincere belief that the Crosley stations will be doing a great proportion of their total fare, whether live or by film, in color.

"In creating a market for color, it has been Crosley's premise that color must be 'mass demonstrated.' The ability of Crosley Broadcasting to televise in color under normal lighting conditions all sports events (and with strategic placement of color receivers in public places) has created an even greater demand than any other form of promotion."

Regularly scheduled live color shows on WLWT include two daily audience participation shows—The Paul Dixon Show and Ruth Lyons' 50-50 Club—which have attracted 15 and 18 local and national advertisers respectively. Public service programs carried regularly in color include World Front, Probe, Church By the Side of the Road, A Family Affair, U. C. Horizons and City Manager.

The station's largest color project within the last year was said to be its colorcast of a night baseball game from Crosley Field in Cincinnati on May 16 (using a new, highly sensitive tube developed by WLWT engineers with General Electric). This "first" was viewed on color sets in the ballroom of the Sheraton-Cincinnati Hotel by more than 500 guests, including civic officials, clients, agency executives, members of the press and RCA and NBC officials. In all last season, WLWT carried 23 home games in color, which were sponsored by Hudopohill Brewing Co., Sohio and Colgate.

Other color highs of the past year: on Sept. 27, 1960, the station colorcast the celebration of a pontifical mass in honor of Archbishop Karl J. Alter of Cincinnati on the occasion of his 75th birthday; on Nov. 11-12-13, the station marked "Color TV Weekend" with the presentation of 24½ hours of color programming.

WWJ-TV Detroit: The complete NBC-TV color schedule, plus about 9½ hours of color film origination, is carried each week. Heart of the local color schedule is the George Pierrot Presents series of hour-long travel-adventure programs, presented seven days a week and in color since October 1955 (before that in black-and-white since February 1953). WWJ-TV also carries about two hours a week of syndicated films in color.

WBAP-TV Fort Worth: Since the first of the year, WBAP-TV has scheduled three special local colorcasts—and it is no surprise that they had a strong Texas accent.

On Jan. 27, the station covered the Southwestern Exposition and Stock Show parade in a one-hour remote, sponsored by Stetson Hats and Luksey's Western Store. On Jan. 31, the station scheduled a 30-minute remote from the Amon Carter Museum of Western Art, showing the art collection in the recently-completed museum. And on Feb. 4, WBAP-TV presented three hours of color coverage of the Stock Show Rodeo, sponsored by Old Milwaukee beer.

WBAP-TV has been colorcasting for 6½ years. It carries 30 hours of NBC color programs each week and all local live programs in color.

The station schedules 3½ hours weekly of syndicated film in color (including cartoons) and schedules feature films (other than black-and-white) on special "color days." WBAP-TV hopes to add to its color schedule of live programs. A new 30-minute weekly show, Teenage Downbeat, was scheduled to start on Feb. 18. In the planning stages are the showing of a color feature on a regular basis each week and a group of public service programs with a panel of community leaders discussing civic problems.

The current local schedule in color includes news, weather, women's interests and sports shows, as well as syndicated product.

Roy Baca, manager of WBAP-AM-FM-TV, said: "Since WBAP-TV has been telecasting in color 6½ years, color circulation has increased to an extent that nearly everyone 'considers color' for his next purchase. Considerable telephone response is evident when there are variations in published color schedules. The color future at WBAP-TV means that every plan for new shows will find color utmost in consideration. All new show intros and closes are created in color. Preference is given to purchase of new shows when in color. "Color has been an effective sales promotion tool for the total station image since we are the only area station doing consistent color programming."

WSAZ-TV Huntington, W. Va.: An hour and a quarter of feature films in color have been presented each week since about Dec. 1, plus an hour and a half of color cartoons, on top of 27 hours of NBC-TV color each week. All ID's and many promos are also in color. Said C. Thomas Garten, vice president and general manager: "We are of the opinion that within the next two to three years color telecasts will grow tremendously in number as well as in local live presentations. For some time all [of our] sets, etc. have been designed for live color; it will be a comparatively easy matter to go into local live color. The viewing public is becoming more and more aware of the tremendous amount of color now on our air . . . More and more dealers are putting their sales efforts behind color receivers. There is no doubt that presentation of color programming increases the station's image . . . ."

WFPM-TV Indianapolis: Last May color tape came into daily play at the Indianapolis Motor Speedway and the $50,000 Golf Tournament at the Speedway course. Enlisting the cooperation of RCA and a giant NBC mobile unit, WFPM-TV did 18½ hours of taping on track and greens.

Fifteen quarter-hour Tracksides telecasts were taped at the Speedway with the broadcasts sponsored by Bryant-Hedback Co., air conditioning and heating firm. Golf pickups totalling 3½

102 (PERSPECTIVE '61)
The most exciting new profit ingredient in local broadcasting is COLOR TV!

Today, 104 TV stations, network and independent, are equipped for local color. Most of them are programming in color on a regular daily basis.

Other stations, in large and small markets, are tooling up—33 plan to acquire live equipment, 44 plan to acquire film equipment in the near future. These station operators know that they must invest in color now if they want to enjoy improved profits in the '60's.

Look what local color can mean to you:
- Color provides an exciting promotable plus.
- Color builds station prestige... strengthens station image in minds of viewers and advertisers.
- Color doubles program ratings in color homes.
- Color commercials have greater impact—3½ times recall over black & white.
- Color attracts new local advertisers. Department stores, automotive dealers and others need and want color.
- Color wins praise from newspaper TV critics.

If you want to know more about profits in color, call or wire William Boss, Director, Color TV Coordination, RCA, 30 Rockefeller Plaza, N.Y.C. Columbus 5-5900.

hours were underwritten by the local Fallender Construction Co., Falls City Beer and Mennen.

WFBM-TV telecasts Frances Farmer Presents in color Monday-Friday. This means all live segments of the 5-6:45 p.m. show, plus the feature film when color prints are available. Other color on WFBM-TV includes an average 20 hours a week of NBC programming.

Color has not affected sales directly, but Don Menke, manager of WFBM-TV says it has added to the medium’s appeal and “there is no doubt that color television has enhanced our image in Indiana.” Since introducing color in their part of the state, WFBM-TV and dealers have seen receivers move into good-income homes. Mr. Menke looks for the mass-market break-through by 1963.

WISH-TV Indianapolis: Some color telecasting is being done, but WISH-TV takes a restrained view of color’s importance to the public at the current stage of color’s growth. The station carries color in the limited schedule of color offered by CBS-TV; carried a color movie in early-evening time once a week for 13 weeks before Christmas and is currently carrying a syndicated color program, also in early-evening time once a week, but from this experience “can only conclude . . . that color does not materially increase our audiences,” according to Robert B. McConnell, vice president and general manager. He said that when color seems more important to the public than it does today, he expects CBS-TV to increase its color schedule “and we will, of course, make an effort to expand color activities locally.”

WFGA-TV Jacksonville, Fla.: This station designed its studios for color, signed on in color and at present does 10¾ hours of regular chrome a week, plus local and network specials and 18 hours of regular NBC programming.

Set distribution is slow but WFPGA-TV thinks the continuing experience with color is valuable and encourages viewers to consider color when they shop for new tv sets, according to Jesse H. Cripe, vice president and general manager. Examples of the station’s special efforts in color are a public-affairs documentary on the Federal Aviation Agency operation in Jacksonville and the annual Christmas symphony program. Regular weekday color includes live early morning shows, news and weather, Romper Room and the late afternoon cartoon.

KCMO-TV Kansas City: Color is programmed on a daily, weekly and special basis. KCMO-TV finds it a strong attraction to color set owners, most of whom, the station feels, will tune a color show over something in black-and-white that they might otherwise prefer. If a program is changed from color at the last minute, “the switchboard really gets a workout,” S. B. Tremble, manager of KCMO-TV, says.

While his station makes no extra charge for color and doesn’t think advertisers can be led into it until a bigger audience is available, Mr. Tremble believes that “color is so good and color commercials have such a terrific impact that it is unfortunate more advertisers do not get into color on an experimental basis.”

KCMO-TV’s color schedule: Daily cartoons and live interludes on the afternoon Early Show, with monochrome feature films following the color cartoons; one night a week of color feature film on the Five Star Theatre; Cartoonland for a half hour Saturday mornings and 15 minutes Sunday mornings; most of The Sportman’s Friend with Harold Ensley, who shoots all his film in color; CBS network and special local shows.

WGN-TV color cameras move in for a close-up of the Chicago Symphony Orchestra during a recent telecast of ‘Great Music from Chicago.”

WGN-TV color cameras move in for a close-up of the Chicago Symphony Orchestra during a recent telecast of ‘Great Music from Chicago.”

KHJ-TV Los Angeles: This independent station started programming color film on Oct. 30, 1960, piled up 45 hours of color the first week and has been averaging about 25 hours a month since then, mostly in features. In addition, it has carried five 90-minute color specials, Children’s International Film Festival, consisting of selected foreign films, under the sponsorship of RCA Victor Distributing Corp. KHJ-TV also filmed the 1961 Tournament of Roses Parade and carried it in color the same night. “We feel that color has been a very promotable factor for the station and has established another plus and bonus to the present station image and prestige,” according to Program Director Hal Phillips.

KRCA-TV Los Angeles: This NBC-owned station, currently is adding close to 11 hours of color each week to the approximately 37½ hours it gets from the network. The local total consists of 8¾ hours of live color—news, sports, weather, public affairs, etc.—plus two hours of feature films every other week, a weekly half-hour of syndicated film, and two weekly half-hours combining live and film.

The station is especially proud of a series of special Christmas programs colorcast on Dec. 24-25, 1960, and a new series of half-hour music-dance programs, Hollywood Record Room, which started early this month and are seen once a week. In addition KRCA-TV does its edition of the “Doerfer Plan” public affairs programming in color, and has plans for two half-hour color specials in connection with local art exhibits.

“KRCA supplements NBC network color with local color programming at every opportunity,” according to Vice President and General Manager Thomas C. McCray. “There is no question that color adds a powerful dimension to the enjoyment of the viewer and the prestige of the station. It also enhances the effectiveness of the advertiser’s message. We have definite proof that clients turn to KRCA because color facilities are available to them.”

WTMJ-TV Milwaukee: A strong conviction that there is a profitable future for color tv has been backed up with equipment and programming since 1953. Color “certainly has made a very definite contribution to the station’s total image,” says George Comte, vice president and general manager of the Milwaukee Journal station, which claims pioneer honors in Wisconsin.
COLOR ADDS ZEST TO SPORT, OR SYMPHONY continued

WTMJ-TV originates a half-hour of live color Monday-Friday and each week averages 2½ hours of color film, all added to 23-25 hours of NBC color. In addition, the station participates in the NBC "Color Day" promotions and undertakes such local specials as a one-hour Christmas play that was a year in the making. This was the ancient "Play of Coventry," telecast in color Sunday, Dec. 18, as part of the monthly Community Drama Series.

The weekday, live color show is Woman's World, a "spot carrier." The weekly film budget of color includes a half-hour of syndicated programming and about an hour of travelog. The Saturday night movie is in color every other week, 10 p.m.-12:30 a.m. On NBC's Color Day Nov. 11, WTMJ-TV did all local live shows and the afternoon movie in color for a total of 4½ hours to extend the nearly 12 hours of network color.

WDSU-TV New Orleans: The excitement and flavor of New Orleans' traditional Mardi Gras celebration were captured in color by WDSU-TV, which allotted six hours of color programming from Feb. 10 through Feb. 14 to coverage of this annual spectacle.

The Mardi Gras presentation represented a special all-out effort by the station. But WDSU-TV has been color-conscious for several years and in April 1960 it added three local color programs to NBC-TV's extensive Wednesday schedule. It started to promote Wednesday as "Color Day," when these local color programs were added—Today With Six, an early morning news and weather show; Byline, an interview program with personality Mel Leavitt as host; and Pato Playhouse, a feature film program.

These local color efforts, when added to an average of 16 hours of network color programs each week, permit WDSU-TV to give New Orleans viewers "more color than ever before," according to A. Louis Read, executive vice president of the station.

This year's Mardi Gras coverage in color by WDSU-TV included three parades and the grand meetings of the courts of Rex and Comus, two of the organizations that sponsor the event. Mr. Read explained that the live color coverage of these remotes was made possible through the cooperation of NBC and RCA, which sent mobile color units to New Orleans for the carnival festivities.

The organizational parades that were covered were Hermes on Feb. 10; Mid City on Feb. 12 and Rex on Feb. 14. The meeting of the courts of Rex and Comus, the traditional climax and closing of the Mardi Gras events, were shown in color on Mardi Gras night (Feb. 14) at 11:30 p.m.

The Mardi Gras parades, WDSU-TV officials point out, require many months of preparation. The remote units were situated along the parade route at the point where the cameras were able to best capture the spirit of the spectacle and the crowd participation.

In discussing the expanded Mardi Gras coverage this year, Mr. Read said: "Certainly few events lend themselves so naturally to color television, as does Mardi Gras, one of the most inherently colorful celebrations anywhere. The enthusiastic response which we received after introducing color during last year's Mardi Gras encouraged us to expand our color coverage in 1961."

WNBC-TV New York: This NBC colored, puts on 2½ hours of color film programming each week on a regular basis—apart from network color—but sets a lot of store by color specials, for both audience and commercial reasons. It is especially pleased with results of a sequence of fashion shows for which it gives credit to color almost exclusively.

The first, in March 1960, was presented in conjunction with Macy's under the sponsorship of Alpine cigarettes—and more than tripled the usual sales in Macy's European sales department. In all, WNBC-TV has done four such shows in color under various sponsorships, aside from color specials on art and other subjects.

The two color shows in WNBC-TV's regular schedule are the Saturday morning Children's Theatre and the Friday afternoon Movie 4.

William N. Davidson, vice president and general manager, says that "both our image and our prestige have been enriched by color, with sponsor and public alike. A program in color carries with it a 'class' label that is almost implied. . . . The value to the advertiser of commercials in color is limited only to the economics involved: and the balance will continue in favor of color selling as color sets in use increase. . . ."

WOR-TV New York: An independent, WOR-TV started carrying color films last October and had reached a total of about 160 hours in color by the end of January. This was accomplished through Million Dollar Movie, which presents the same movie 16 times in the course of a week, and Kingdom of the Sea, a series of weekly half-hours. At least five other color features are scheduled during the next two months, and two syndicated half-hours in color are to be added in March. WOR-TV plans a steady expansion in color programming, which it feels already "has definitely added to our prestige in the local market."

COLOR ADDS ZEST TO SPORT, OR SYMPHONY continued

has been eagerly straining forward in color since 1954 and augments an average 25 hours of NBC color a week with local origination, including the Sunday afternoon feature movie. For NBC-TV "Color Day" promotions last Nov. 11 and Feb. 9, WKY-TV colorcast all its local programs, news and weather, too, on top of the network fare.

The Oklahoma Publishing Co. station ordered RCA color equipment in September 1949 and took delivery of cameras in February 1954, the first ones off the production line after NBC's, Norman P. Bagwell, WKY-TV's vice president and general manager, recalls. The chrome units went on the air April 8, 1954, and on April 23

visitors who attended the "Home Show" of the Omaha Home Builders in the city's Civic Auditorium. This total during the three-day period included both regularly-scheduled network and local programs over KMTV and other color shows fed to sets in the auditorium via closed circuit.

KMTV cooperated with the Sidles Co., Omaha area RCA Victor distributor, in this promotion. Sidles arranged to have RCA color set dealers in the KMTV booth at all times to answer questions and to distribute literature. On Feb. 9, which was NBC-TV's "Color Day," Sidles bought a saturation spot campaign on KMTV to encourage traffic in dealers' showrooms.

Throughout the past year, KMTV

feature film, sports, music and many live features. Fifty Omaha area RCA dealers were open from noon to midnight on that day (a Sunday) and each reported 250 to 600 visitors came in.

KMTV carries about 30 hours of NBC-TV color programming each week and schedules eight hours of local color programs each week. These include Noon Edition news show (Mon.-Fri., 12-12:30 p.m.), sponsored by participating advertisers; Over The Garden Fence, (Mon.-Fri., 12:20-12:30 p.m.), sponsored by the Earl May Seed Co., Omaha; Conversations, a program geared to women's interests (Mon.-Fri., 12:30-12:45 p.m.) and which is unsponsored because of its public service nature; Name and Claim, a program (Mon.-Thurs., 12:45-1 p.m.), an audience participation program sponsored by various advertisers; The Market Place, a women's interest program, which is unsponsored and World's Greatest Cartoons (Mon.-Fri., 5-5:30 p.m. and Sat., 11-11:30 a.m.), sponsored by participating advertisers. According to KMTV General Manager Owen Saddler: "Regarding color's contribution to KMTV's image, we can say unequivocally it has helped greatly. Color is not only a fine addition to a station's overall program capability, but is a definite stimulus to experiment and try new program ventures... Further, the numerous times that manufacturers have reported Omaha first in the nation in color set sales are definite reflections of our station's prestige and impact in this market because up till now we have been, and are, the only Omaha station originating and promoting color."

WFIL-TV Philadelphia: For 6½ hours last Jan. 2, Philadelphia area viewers were spared the rigors of standing on cold street corners in jammed crowds to view one of the city's landmark events—the annual Mummer's Parade. In the comfort of their living rooms, viewers could witness the gala event in color over WFIL-TV. The colorcast (11 a.m.-5:30 p.m.) was sponsored by Procter & Gamble, Sun Oil Co., Schmidt's Beer and P. Lorillard & Co.

Roger W. Clipp, general manager of WFIL-AM-FM-TV, hailed the station's coverage of this event in these terms: "Color is the future of television. We are convinced that the audience prefers color.

"Let me cite just one example. When WFIL-TV this past New Year's Day telecast the traditional Mummer's Parade in color, we achieved an unprecedented 52% average audience. We believe that the addition of color was largely responsible for the Mummer's Parade chalking up unheard of audience superiority against the famous football bowl games." Look at these

average ratings: Mummers' Parade, 29, Orange Bowl, 16; Mummers' Parade, 33, Sugar Bowl, 6; Mummers' Parade, 40, Cotton Bowl, 9.

“Although industry research to date is admittedly not conclusive, we are convinced that there is a decided audience swing to outstanding color features, such as the Mummers' Parade and leading network color programs such as the Dinah Shore Show. This is a trend that is snowballing to the advantage of the network carrying color.”

“WFIL-TV was the first station in the Philadelphia area to telescast in color. WFIL-TV telecasts more than 16 hours of locally-originated color programming. Because we are so firmly convinced that color is our future, we have supported these color efforts consistently and intensively through advertising, promotion and publicity.

“Color movies more goods for the advertiser. Color gets bigger ratings for the programmer. Color can mean more revenue for the independent broadcaster and for the network...”

Regularly-scheduled local color programs over WFIL-TV include Breakfast Time (Mon.-Fri., 7:30-9 a.m., participating sponsors); Color Television Newsreel (Mon.-Fri., 7-7:10 p.m. and 11:10-11:15 p.m., RCA and RCA Whirlpool); What's The Weather (7:10-7:15 p.m. and 11:10-11:15 p.m., Bell Telephone Co.); The Best of The Post anthology series (Sun., 6:30-7 p.m., Sun Oil Co.) and Starr Theatre (Mon.-Fri., 6-7 p.m.), featuring live personality with color cartoons. The station receives no color service from ABC-TV.

KFSD-TV San Diego, Calif.: Although not equipped for live origations, KFSD-TV averages two to 2 1/2 hours of color films programming a week, in addition to about 30 a week via NBC. It is getting some business as a result—from color set dealers—and about a year ago sold a special local color film to a patio construction firm which felt that “the type of person who owns a color set would be the best kind of potential client for a new patio.” KFSD-TV also has developed a series of ID's, “Your Window to the World,” done entirely in color. Says William E. Goetze, vice president and general manager:

“We feel that color definitely adds to our station image in both local and network programs. We have been especially impressed with the impact created by shows filmed here in San Diego. These shows have caused wide public comment. Certainly the family that owns a color set develops a greater loyalty to a station that regularly programs color. We believe that as techniques continue to improve in both origination and reception, color will continue to play a larger and larger part in local broadcasting.”

KTVU (TV) San Francisco-Oakland: An independent, this station is doing about eight hours a week in color film programming, using both features and syndicated programs, and finds that “color has been a factor in several important sales.” William D. Pabst, general manager, said that “the fact that 26 of the 40 films were in color was one of the reasons Gateway Chevrolet picked up half-sponsorship of the Sunday-Monday evening package” of Seven Arts-Warner Bros. post-1950 films. Other color advertisers include Burgermeister beer, Italian Swiss Colony wines and Imperial margarine.

“From our viewer mail,” said Mr. Pabst, “it seems evident that people with color sets will select a color program over any black-and-white offering. RCA estimates 75,000 color sets in our coverage area, and this is a figure worth considering. We plan to add more color to our schedule soon.

“From the standpoint of image, color transmissions establish rank of the stations with color set owners. Strictly from income alone, color set owners are community leaders. We don't want to miss the boat when it comes to building image with any portion of the community opinion molders.”

KING-TV Seattle: In 1955, KING-TV started colorcasting slides. It currently carries about 30 hours of NBC-TV color per week, plus a weekly syndicated show and the cartoon elements of a children's show on weekdays. In addition, most of its slides are telecast in color. Officials say color hasn't "appreciably affected" revenues yet but that they are "aware of the present importance and unlimited future of color television" and expect it to figure more and more prominently in the station's operations.

KHQ-TV Spokane: Telecasting color since 1954, KHQ-TV has had a color remote unit in operation since 1956. The station operates from color-equipped studios and last fall added two video tape machines equipped for color. Live color coverage of the Armed Forces Day parade has been an annual event since 1956; this station has also had considerable experience color-casting the live portions of a half-hour daily local newcast. RCA dealers and distributors recently joined KHQ-TV in presenting a series of afternoon movies in color. Noting that KHQ-TV also carries NBC-TV's complete color schedule, President Richard O. Dunning said:

"As more and more color sets are put in homes, we believe color will become an even more important part of our programming. The significant fact is that color is not some future dream, but it is here, and today is part of our regular program service."

KPLR-TV St. Louis: "Some color movies and occasionally a St. Louis Cardinals baseball game in color," are carried by KPLR-TV but currently it originates no studio programs in color.

KVVO-TV Tulsa: Color is being pushed via newspaper ads, billboard promotions and the mailing of monthly color program schedules to a list that now totals some 1,500 names. KVVO-TV carries NBC-TV's entire color schedule, does all its ID's in color and broadcasts color films as available. It recently ran 10 full-length features in color under the sponsorship of Dunlany's, RCA distributor in Oklahoma. These "added considerably to our income, but we in turn spent a fair amount of money in promoting them," according to General Manager John Devine. He added: "Our attitude toward color is still very enthusiastic. . . . We are known as the color station . . . and will continue to push this fine facet of television in order to grow with the industry."
Seven out of Ten Winners

That, according to the latest area Nielsen, is how KARK-TV scored in the once-weekly shows.

Results were one better in the top multi-weekly programs, eight out of ten, with the KARK-TV 6:00 p.m. News leading the pack.

In fact KARK-TV led every three-hour segment in the week-long breakdown of average station audience, Sunday thru Saturday, 6:00 a.m. to midnight.

That's why the odds-on favorite with advertisers in the Little Rock market is consistently KARK-TV.
Kennedy, Minow see eye to eye

BETTER PROGRAMMING AIM OF BOTH, WASHINGTON IS ASSURED

The President of the U. S. is vitally concerned about good television programming and will take a personal and active interest in seeing that “quality” shows are presented in a goodly number. “He will get on the telephone to Newt Minow when he wants something done.”

Authority for the above is one of President Kennedy’s close associates. This was borne out last week when the President sent a personal wire to Bob Hope congratulating the comedian for his sports award program.

And this, in a nutshell, serves notice on network and stations—both radio and tv—of just what facet of their operations will most concern the New Frontier symbolizing the present Administration. The President was careful to pick in Newton N. Minow, as chairman of the FCC, a man who shares his philosophies.

In both his public and private utterances, Mr. Minow has been positive about one thing—the FCC has both the authority and the duty to see that broadcasting offers the public something better in the way of programming than it has in the past.

And, just how will this be done? Mr. Minow mentions a close scrutiny of promise vs. performance at license renewal time. Another member of the Kennedy team said “quality” programming will be accomplished through “fear, the moral persuasion technique and with an obvious club over the broadcasters’ heads.”

“Jack Kennedy wants an improved tone of programming,” a presidential associate stated. “He wants ample opportunity, also, for more local programming incorporating local views and talent. This interest of Kennedy’s is bound to be reflected in Minow’s thinking.”

Much has recently been made of the fact that the President reads several daily newspapers. Missing from the

President Kennedy met two weeks ago with Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, and reportedly allayed the congressman’s fears. Of his meeting with Rep. Harris, the President said: “... We are going to continue to work together to try to speed up the procedures of the regulatory agencies and improve their action.

“Whether we should have such a White House liaison [as recommended by Landis] or center is a matter we are going to consider. The Congress bears special responsibility for these agencies and, therefore, I think it is probably not likely that major responsibility in this area would be released to the White House and I am not completely sure it is wise.”

The Chief Executive said that Mr. Landis was “asked to come to the White House,” not as the agency czar which he had recommended, “but merely to

work with the White House and with the interested members of Congress. ... He is going to stay some months and do that.”

Senior Kennedy’s Support * It has been reliably reported that the person most interested in James Landis and his report was Joseph Kennedy, father of the President. The Landis recommendations were hand delivered to the then President-elect last December in Florida by the senior Kennedy. “Landis got the idea that he should be the agency czar and this was not the President’s thinking,” according to a source close to the situation. “Congress was vitally concerned and Landis had to be pulled down to size before an open revolt erupted. His contributions to the new Administration will be at a minimum.”

The presidential source said that Mr. Landis will remain at the White House only a few months and then “quietly slip away.” Echoing this view, a Demo-

KENNEDY, MINOW SEE EYE TO EYE

continued

critic member of Congress said that he is no longer concerned about any effort of Kennedy-Landis to usurp authority where Congress claims sole jurisdiction. "I don't mind admitting that I was vitally concerned for awhile, however," he stated.

While Mr. Landis was considered a power to contend with, however, Congress was preparing its siege guns for an all-out battle. The House Commerce Committee, "afraid that we are going to have quite a round over the Landis report," ordered a thorough analysis of the recommendations and conclusions.

"There was not much we could agree on," a committee member said. "You can bet your bottom dollar that our responsibility is not going to over to somebody else and we will stand by and see them take it over."

A brief Senate appraisal of the Landis report: "It is viewed with considerable misgivings, if not disdain." Still another Hill view: "The report shows Landis will go out of his way to step on people's toes whether he has to or not."

Assurances to Minow - Did Newton Minow have any misgivings about guiding the FCC's destinies under the New Frontier? Mr. Minow himself has not said but it is known that he was assured by the White House that Mr. Landis would not have any authority as an "overseer" of the commission and that the chairman would deal directly with the President when matters of mutual concern arose.

Mr. Minow has not seen the President since his appointment to the FCC but a meeting has been scheduled soon after he takes over as chairman. The 35-year-old Chicago attorney said that he also expects to confer with Mr. Landis but has not done so as yet.

The President has requested the power to reorganize agencies of the government—authority withheld from President Eisenhower during his last two years in office. The reorganization bill already has cleared the Senate and is not expected to meet serious opposition in the House—with Congress retaining the right to item-veto any action of the President.

Mr. Landis said that when such reorganization powers are forthcoming, he will appoint a "task force" to take a close look at the FCC. He said this group will then report directly to him and that he will pass the conclusions on to the President with personal comments. Mr. Landis himself concluded that there was just about everything possible wrong with the commission.

The Chairman's Views - Mr. Minow sees no drastic revisions or shake-ups in the FCC table of organizations under the New Frontier. He said that talent and dedication of the staff will make it possible to accomplish most of the things he wants done. "I intend to award talent and will push good men up," he explained in discussing his plans.

The new chairman, who was confirmed by the Senate last week, has been encouraged by interest shown in his program by present broadcasting and advertising professionals. He said that many persons now employed in the industry, at much higher salaries than the FCC could offer, have asked for the opportunity to join Mr. Minow's commission. "There is an interest in this thing and tremendous strides can be made," he emphasized.

Mr. Minow got a pretty good idea of how the commission staff is functioning through a full-day presentation staged by present Chairman Frederick Ford (Broadcasting, Jan. 23). An even more comprehensive appraisal will be available a few months after he takes office when an independent survey being conducted by Booz, Allen & Hamilton, management consultants, is completed (Broadcasting, Dec. 5, 1960).

Networks and stations are underestimating the tastes of the American public with the current programming fare they are putting forth, Mr. Minow said in connection with his announced drive to upgrade the over-all product. The government cannot specify a certain program at a given hour but it has the duty to encourage quality programming and "I intend to do so," he said.

The new chairman conceded that this is "certainly a sensitive area" because of the censorship question but stressed that certain things can and must be done. These will include a close inspection and scrutiny at renewal; increased monitoring of individual stations; industry encouragement for self improvement.

Mr. Minow indicated that he thinks ratings are among the reasons for poor programming and told the Senate Commerce Committee that he "certainly will" do something about them. He said they properly fall within the purview of the FCC and that something is wrong when the various services vary so widely. If a station offers nothing but westerns for three years because of ratings, then that station will have a serious problem when it applies for renewal.

Mr. Minow already has aligned himself 100% with the move to provide a better opportunity for the development of local shows. During his Senate confirmation hearings, he promised to put his powerful office behind efforts for more and better local programming in prime time. He agreed with the senators that the threat of loss of net-

An ever-expanding program pattern

**Dimension** is creating a new depth of audience interest in seven of the largest markets, coast-to-coast. **Dimension**—exciting vignettes in sound that stir the imagination: “This is my Profession,” “Hometown Recollections,” “American Landscape,” “Bennett Cerf Stories,” “Wonderful World of Teens,” “Yesterday’s Heroes Today,” “The Year 2000,” Richard Joseph’s “Travel Notes,” “Dorothy Kilgallen Introduces,” and more. **Dimension**—conversation pieces by the world’s most interesting people: Raymond Massey, Vincent Price, Burgess Meredith, Hildegarde, Carl Sandburg, Celeste Holm, Shelley Berman, Zsa Zsa Gabor, Mischa Elman, Theodore Bikel, Margaret Mead, William Zeckendorf, and many others. **Dimension** has been added to the strongest local programs on radio, those of the CBS Owned Radio stations—the idea stations. **Dimension** is an added reason for expanding your sales by reaching large and attentive audiences on:

**WCAU Philadelphia, KMOX St. Louis, KNX Los Angeles, KCBS San Francisco, WCBS New York, WEEI Boston, WBBM Chicago: The CBS Owned Radio Stations**
work affiliation has stifled local efforts in the past.

Possibly due for an overhaul to include stiffer provisions is the FCC's "statement of policy" on programming issued last summer (Broadcasting, Aug. 1, 1960).

The Hour Is Important * The FCC also will be watching the hour at which a station broadcasts its public service and quality programming, Mr. Minow indicated. For instance, a 6:30 a.m. or midnight offering will not count much with the commission in considering the overall offering. Mr. Minow's championship of educational tv is well known and he said that he hopes to liberalize rules for etv stations to make it easier for them to get on the air and continue operation. One proposal which will get a thorough study will be to allow etv stations to sell time and accept advertising—strictly forbidden under present rules.

From the House of Representatives and the Senate comes widespread support for Mr. Minow's programming views. During his confirmation hearing two weeks ago (Broadcasting, Feb. 13), senator after senator attacked current programming fare.

The charge that FCC activity in programming is censorship is "completely out of line," a Hill spokesman said last week. Such a function is necessary to keep stations under "a continued state of tension" and forestall a feeling of self satisfaction. The worst thing that could happen, he said, would be for the government to dictate programming.

Industry Prepares * Taking stock of the growing trend in Washington, the industry already is making moves of its own to beat the New Frontier to the punch. At the NAB board meetings the past fortnight, association President LeRoy Collins warned that if tv programming isn't improved, "we're whipped before we start" (Broadcasting, Feb. 13). As the first move, the NAB put new teeth into its codes and pressed for tightened voluntary controls.

One of the major problems facing the industry, a broadcasting executive said, is the failure of critics to realize that tv cannot be both educational and entertaining for every minute, 15 hours a day, seven days a week. He stressed that the efforts of the New Frontier are not needed to make most broadcasters aware of their obligations.

Critics of the network offerings, however, already are pointing to tentative 1961-62 programming plans as a case in point (Broadcasting, Feb. 6). As one congressional critic put it: "If these plans bear fruit, there will be more horsewhippings, shootings and delinquency on television than ever before." Chairman Minow has made it plain that he subscribes to the congressional theory that the radio spectrum is a natural resource and, as such, belongs to the public. "The public is not now reaping the dividends it deserves from its property and indications are that it will not unless the FCC intercedes," a congressional critic charged.

Away in Space * Future communications, including tv, by space satellites will play a major role in communications planning under the New Frontier. The FCC already has recognized the need for planning and policy decisions and has assigned a commissioner, T. A. M. Craven, and a lawyer, Paul M. McDonough, to the problem.

A recent report of the Senate Aeronautical & Space Sciences Committee stressed the importance of formulating policy without delay (Broadcasting, Dec. 5, 1960). The report said the U. S. must determine the benefits of space telecommunications and be ready to negotiate for space frequencies when the International Telecommunications Union meets in Geneva in 1963. "Critical decisions" are needed promptly because of the emerging significance of artificial satellites in global communications, the report said.

And, for the first time, the Senate Commerce Committee included a chapter in space communications in its request for funds during the new Congress. The enabling legislation included the standard investigation of communications with this language added: "including a complete review of national and international telecommunications and the use of communication satellites." Committee Chairman Warren Magnuson (D-Wash.) stressed that the whole field of communications will be tremendously changed by the use of satellites.

"A policy for space communications, probably via the use of satellites, must be established and this will lead to a review of the entire spectrum by both military and civilian users," Sen. Magnuson said. Rep. Harris and Sen. Vance Hartke (D-Ind.) already have introduced bills calling for an investigation of the spectrum.

On domestic allocations, Sen. Magnuson said: "Tv channel allocation is a continuing problem and we are forced to continue to urge the FCC to act. A special ad hoc committee of outstanding experts appointed by this committee to study the allocation of tv channels has reported and more hearings will be necessary. . . . To date, the

Programatic's faith in radio is matched by his faith in
Programatic's "Leadership Programming." Here's what he says:

"In the operation of WJEF-FM we feel it is imperative to give the public the finest in programming available. Because of Programatic, its product, its unduplicated programming, and its untouchable library, it is an integral part of our FM programming. Our mail and telephone calls convince us that the concepts of Programatic are welcomed by the listening public in increasing numbers. Programming of this type fits well with a promising and profitable future."

Mr. Lee speaks from experience, as do scores of other successful station operators who know Programatic's concepts of leadership programming mean more profitable station operation.

Fine as Programatic's "Sound of Success" is today, it is not content to sit on its laurels. In the months ahead Programatic will continue to strengthen its leadership, adding more new instrumental and vocal selections, program services and audience-building techniques.

How does Programatic sound on WJEF-FM and other stations? Send in the coupon and find out.
Programatic is available to only one station per market. Make that station yours!

Programatic Broadcasting Service

*WJEF-FM will increase power from 115 KW to 500 KW Spring, 1961.

BROADCASTING, February 20, 1961
KENNEDY, MINOW SEE EYE TO EYE continued

FCC has failed to develop a specific policy. . . ."

The commission, however, soon will send a new proposal to the senator’s committee. It will be hinged on a push for all-channel receiver legislation and a plan to set up a pool of uhf channels to be assigned whenever and wherever they will be used. The FCC also will encourage vhf stations to operate simultaneously on uhf to ease the way for a shift to the upper frequencies of all tv if it is ever deemed advisable.

More of Congress = The 87th Congress will have to move fast to equal the record of its immediate predecessor, the 86th, in approving broadcast legislation. The old Congress was the most productive of any in recent years in passing new laws covering radio-tv, the FCC and the Communications Act. In spite of this record, however, many perennial industry proposals already are back again for consideration.

Moving quickly into the new session, the Senate Commerce Committee already has held hearings on Sec. 315 and more are promised in March—as soon as the FCC reports finally on coverage of the 1960 election. Even before the 87th convened, however, the House Campaign Expenditures Committee aired the controversial equal time provisions of the Communications Act (BROADCASTING, Dec. 5, 1960). After hearing testimony from industry and government leaders, this body said that proposals to repeal Sec. 315 in its entirety should be “fully explored.”

Sen. John O. Pastore (D-R.I.), chairman of the Senate Commerce Committee Communications Subcommittee, who chaired the recent hearings, has given little encouragement to the advocates of outright repeal but has promised broadcasters a further liberalization. There has been little criticism of industry coverage of the presidential election with the cramping provisions of equal time suspended; a permanent injunction (S 204) against Sec. 315 was the vehicle for Sen. Pastore’s hearings (BROADCASTING, Feb. 6).

This bill, introduced by Sen. Magnuson, will reach the Senate floor soon after the additional March hearings and Sen. Pastore has given broadcasters hope that congressional action will go beyond a permanent exemption of presidential campaigns. He has warned, however, that there is “no chance” for outright repeal but thought that some “compromise idea” will be forthcoming.

A second subcommittee of the Senate Commerce Committee, headed by Sen. Ralph Yarborough (D-Tex.), also is planning hearings in the immediate future on Sec. 315. Unlike the legislative sessions already held, the Yarborough hearings will deal with specific complaints lodged by candidates or their supporters against stations and networks during the 1960 campaigns.

That Other Body = The Sec. 315 picture is not so favorable in the House. “How can broadcasters expect to get 315 repealed,” a prominent Democratic congressman asked last week. “I’m not so sure permanent suspension for the President is such a good thing, either.” he continued. It was in the House that the temporary relief faced its stitest opposition last summer, winning on the House floor only after lengthy debate and a standing vote.

Rep. Harris’ committee will take up Sec. 315 after the Senate acts. He, too, probably will schedule hearings. Adding impetus to the move for a permanent injunction was the statement by the President that he would not be willing to debate his Republican opponent in 1964 (BROADCASTING, Feb. 6).

The House Commerce chairman has committed his committee to hearings during this Congress on ex parte legislation; longer hours for daytime stations; trafficking in licenses; allocations;

---

INSTRUMENTS FOR PRECISION CIRCUIT ANALYSIS

Proved in every type of service, these quality instruments are used by experts for FCC “proof-of-performance” tests and supplied as original equipment with many broadcast station installations.

**Model 100 Linear Detector.** Combined RF detection and audio bridging circuits for use with any distortion meter. 600 kc to 30 mc range with 20-30 volt RF carrier. Essentially flat frequency response from 20 to 50,000 cps.

**Model 306 Frequency Meter.** Measures audio frequencies to 30,000 cps in 6 ranges. Integral power supply and input level control.

**Model 200 Audio Oscillator.**
- Frequency Range: 30 to 30,000 cycles.
- Frequency Response: Better than ±1 db, 30 to 15,000 cycles with 500 ohm load.
- Stability: Better than 5%.
- Calibration: ±3.0% of scale reading.
- Voltage Output: 10 volts into 500 ohm load.
- Distortion: Less than .2% at 5 volt output.

**Model 400 Distortion Meter.**
- Frequency Range: Fundamentals from 30 to 15,000 cycles. Measures Harmonics to 45,000 cycles.
- Sensitivity: .3 volts minimum input required for noise and distortion measurements.
- Calibration: Distortion measurements ±.5% of full scale at 1000 cycles.
- Residual Distortion: .015%--.05%--15,000 cycles.
- Residual Noise: .075% or less.

**Model 600 Dip Meter.**
- Covers 1.75 to 260 mc in 5 bands.
- Monitoring Jack & B+ OFF switch.
- Shaped for use in hard-to-get-at places.
- Sturdy, color-coded, plug-in coils.
- Adjustable 500 microamp meter.

Esky doffs his hat to The Atlanta Journal for its kind words about WQXI!

"A GREAT NEWSPAPER – THE ATLANTA JOURNAL – REPORTS ON A RADIO STATION’S PROGRESS – “... things are changing at WQXI. They have become daringly different in the field of news. ‘Auditorial’ is the first new venture – it’s a public interest segment heard six times a day, and basically new to the Atlanta radio sound. WQXI is the only station ... that airs an editorial program. WQXI has no definite designs on editorial policy, except that they believe radio should speak out on local and state affairs.” – The Atlanta Journal, January 7, 1961.

WQXI uses its voice to reflect the personality and pace of Atlanta ... and to promote projects that make Atlanta a better place in which to live. Its accent on community service is part of a vibrant new Exciting Radio format. In its first month, according to C. E. Hooper, Exciting Radio increased the WQXI Atlanta audience share by almost 100% in both the morning and the afternoon. Now, more than ever, Atlanta’s best buy is WQXI!

Represented by John Blair & Company, effective March 1

BROADCASTING, February 20, 1961
The TF-14-A amplifier is housed in three standard size cubicles designed to mount side by side in a straight line. The rectifier cubicle, however, may be placed in a remote location since operating controls are in the aural and visual cubicles.
...with driving power less than 5kw!

GENERAL ELECTRIC'S NEW 35KW HIGH-CHANNEL TV AMPLIFIER
LETS YOU EXPAND YOUR COVERAGE AREA TO THE FCC LIMIT
WITH NO COSTLY CHANGES IN PRESENT EQUIPMENT!

The General Electric VHF high-channel TV power amplifier Type TF-14-A is designed to provide 35 KW sync peak power for channels 7-13. Your present 5 KW transmitter provides ample power to drive the TF-14-A amplifier to a full 316 KW ERP signal when you employ a standard three-bay helical antenna (2,000-foot tower or higher), or a 12-bay batwing antenna (1,500-foot tower or higher).

Important new design features assure higher picture quality, greater reliability, and simplicity of operation. A new and exclusive double-stud output loading control delivers optimum output matching. The "brute force" bias supply, a 3 phase bridge circuit whose output is filtered for reduction of the 360 cycle component, eliminates problems associated with vacuum tubes. The unique triplex cavity with three parallel tubes makes possible the use of fewer components, protects against detuning. DC filaments improve video signal-to-noise ratio. Separate aural and visual reflectometers, specially designed by General Electric, provide maximum antenna protection, internal amplifier protection. And the new "built-in" electronic r-f sweep generator simplifies tuning.

To take advantage of this great step forward in TV transmission, simply call your G-E Broadcast Equipment Sales representative. For complete technical data write Section 4821-13, Technical Products Operation, Communication Products Dept., General Electric Company, Lynchburg, Virginia.

- High quality signal — black and white or color
- Conservatively rated, flexible power output
- Low power drive
- Front panel metering and tuning adjustment
- Separate aural and visual antenna protection
- Separate operation of aural and visual amplifiers, if necessary
- Interchangeable components, smaller inventory
- Greatly simplified tuning

GENERAL ELECTRIC

BROADCASTING, February 20, 1961 121
KENNEDY, MINOW SEE EYE TO EYE continued

educational tv financial aid, and probably pay tv and network regulation. On his bill to ban off-the-record presentations to members of the FCC (HR 14), Rep. Harris stated: "I pledge my best efforts to see to it that this legislation will be enacted..." A further indication of what broadcasting can expect from Congress this year, the Arkansas Democrat told those attending the 35th anniversary of the Grand Ole Opry in Nashville:

"Congress will have to re-examine some of the premises on which our American system of broadcasting is based. Congress must ask and answer questions as—what happens to the opportunity for local self-expression on radio and tv stations? What happens to the need for developing and using local talent in radio and tv programming? What happens to programs designed to serve minority groups and special tastes?"

A Network Yolk * in its final report to Congress, Rep. Harris' Legislative Oversight Subcommittee recommended that a bill calling for network regulation be re-introduced "and made the subject of legislative hearings" (BROADCASTING, Jan. 9). Rep. Harris immediately introduced such a measure (HR 1164) and sentiment for the proposal is growing weekly in Congress and elsewhere.

"Network regulation is coming for sure and they [networks] have only themselves to blame when it happens," a member of the President's official family predicted just last week.

Last March, the subcommittee commissioned the American Statistical Assn. to make an independent study of the statistical validity of rating services. The report by the three-man ASA committee is overdue on the Hill and indications are that it will lay the groundwork for a thorough investigation of ratings by the Harris committee.

One final recommendation was made in the oversight report. With that investigatory body expiring Jan. 3, it recommended the establishment of a permanent subcommittee of the Commerce Committee for continued agency surveillance. This subcommittee would have its own staff and special appropriations and it is understood that enabling legislation will be introduced in the near future.

Magnuson's Pet * Sen. Magnuson twice has pushed legislation through the Senate authorizing federal subsidies for the establishment of etv stations only to see both measures die in the House. He has scheduled a new round of hearings beginning March 1 on his bill which would grant each station up to $1 million. Prime supporter in the House is Rep. Kenneth Roberts (D-Ala.), who is the author of an etv bill which calls for each station to match any federal monies it receives.

Communications matters will continue heavy on the Senate side when Sen. Pastore takes his subcommittee to Salt Lake City and Cheyenne, Wyo., tomorrow (Tuesday) and Wednesday for on-the-spot reports from booster operators. Congress authorized vhf repeaters stations just last summer and the committee wants a first-hand report on how the system of spreading tv signals in the Northwest is working.

As in past Congresses, several industry bills which always are introduced and often get hearings but no action, again are before the 87th. These include bills to ban the advertising of alcoholic beverages in interstate commerce, prohibit the broadcasting of horse race and gambling information, outlaw pay tv, establish a federal commission on ethics and office of administrative practices, legalize professional sport tv blackouts, set up a cabinet-level post on communications and transportation, have the government pay campaign expenses and charge fees for FCC services.

The later proposal, which has been cropping up for many years, may get a close scrutiny—from both the legislative and executive branches—this session. It is known that the Budget Bureau is studying ways and means to make licensees of the FCC and other agencies pay for services rendered by the regulator. The Kennedy Administration, it is reported, already has expressed interest in such proposals to obtain badly-needed extra revenue.

Many Kennedy aides know radio-tv

When the Administration has a radio-tv matter to work on, the President will not be lacking in industry-indoctrinated minds for advice.

First, there is J. Leonard Reinsch, executive director of the Cox stations, who has long been active in top Democratic circles. Mr. Reinsch was manager of the 1960 Democratic convention in Los Angeles and served President Kennedy as tv consultant during the campaign. He will continue to be on call on a consulting basis and probably will be appointed to an advisory committee.

On the President's legal staff are Myer Feldman, former broadcaster, and Richard N. Goodwin and Lee C. White, who have served with congressional committees investigating the FCC and the industry. Mr. Feldman, legislative assistant to the President when he was Sen. Kennedy, recently sold KLAD Klamath Falls, Ore., and his 30% of WADK Newport, R. I. (BROADCASTING, Nov. 28, 1960). He also formerly had interests in KOMA Oklahoma City and KITO San Bernardino, Calif.

Mr. Goodwin was the center of controversy while a staff attorney for the Legislative Oversight Subcommittee. He did much of the leg-work in the tv quiz investigations and while still on the subcommittee staff bylined an article in Life magazine billed as an "expose." Soon after the article was published, he joined Sen. Kennedy's staff. Mr. White was counsel for a special Senate Small Business Subcommittee which conducted hearings on the continuing efforts of daytime stations to broadcast longer hours. He authored a report which was critical of the FCC for its failure to take action in the case. Mr. White was administrative assistant to Sen. John Cooper (R-Ky.) just prior to joining the White House staff.

The cowboys are being put to pasture

TV PILOTS FOR '61-'62 LED BY ACTION, COMEDY AND CARTOONS

That hard-riding champion of the American viewer, the television cowboy, has been unhorsed by other heroes who get there first afoot or with more modern locomotion, if this year’s spring crop of new pilot films correctly indicates a trend.

Fewer than 10 western pilots are on the list, a number matched both by new drama series and documentaries as the spring selling season gets into full swing.

Action-adventure shows lead the list, comedies are a strong second and, surprisingly, animated cartoon programs are in third place. The flood of pilots in these categories obviously was inspired by the successes of adventure, comedy and cartoons in the current season. The predominance of hour-long episodes among the action-adventure offerings also is clear evidence that the popularity of such programs as The Untouchables and 77 Sunset Strip have not gone unnoticed by the pilot makers.

Already the networks are busily showing advertisers and agencies those new shows in which the former have vested interests, usually through pilot-financing, and which tentatively have been listed in network fall programming schedules. Producers of pilots with no network angel just as avidly are presenting their new programs to the same potential buyers on the one hand and trying to persuade networks to add these shows to their schedules on the other. Even if it means scratching some already scheduled for the 1961-62 line-up.

The programs listed do not, of course, represent all the pilots to be presented this spring. Nor will all of the pilots in this list be produced. At this time of year each day sees new titles added and old ones dropped, in accordance with the changing ideas of their producers as to what will or will not be salable for fall. Many small companies come into being, make a pilot or two and fade from sight, some never even achieving the permanence of a listing in the telephone directory. A few larger program producers refuse to divulge any information about their plans. Their number, incidentally, has increased since the Los Angeles visit last fall of a delegation from the FCC to inquire into the nature of network tv programming.

The programs briefly described below, however, do represent a fair sample of what is being offered.

Action-adventure

Acapulco—A pair of Korean War veterans, coming to this Mexican coastal resort town in search of fun and romance, find them both and adventure too when they meet the father of a former pal, killed in Korea. He is a retired criminal lawyer whose former underworld associates don’t want him to remain retired. Ralph Taeger and James Coburn are the heroes, with Telli Savalis as the old attorney and Allison Hayes and Bobby Troup also regular members of the cast. Billy May will compose and conduct the music for the series, which producer-writer John Robinson’s Libra Enterprises is producing in cooperation with Ziv-UA for NBC-TV. The half-hour series starts Feb. 27 in a Monday, 9:30-10:30 p.m., time period, with R. J. Reynolds Tobacco Co. as sponsor.

The Asphalt Jungle—A deputy police commissioner in charge of field operations in a modern American metropolis (Jack Warden), a tough captain on his staff (Arch Johnson) and a young sergeant trying hard to make a name for himself (Bill Smith) are the central characters of this hour-long series, produced by Arthur Lewis at MGM-TV, which will start on ABC-TV April 2 as a Sun. 9:30-10:30 p.m. series. Duke Ellington wrote the background score.

The Beachcomber—A highly successful businessman decides to take life easy as a beachcomber, finds this even more active and exciting than big business, in the half-hour tv series that Film- aster is producing at Winter Park, Fla. Four of the 39 episodes had been completed by Feb. 1. Nat Perrin is the producer, Cameron Mitchell the star.

Cabana 54—Shelter Island Inn in San Diego Harbor is the locale for this half-hour series which combines action and

James Coburn and Julie London star in ‘Acapulco,’ an action-adventure half-hour being produced by Libra Enterprises and Ziv-UA for NBC-TV.
THE COWBOYS ARE BEING PUT TO PASTURE continued

adventure with a healthy dash of espionage. Richard Garland stars as the club owner who is also an undercover agent. Sam Gallu produces for California National Productions. Pilot is ready for running.

Caribbean—Rory Calhoun stars in this hour-long romantic adventure series which Four Star will produce for Calciv Productions, company owned by Mr. Calhoun and Vic Orsatti which previously produced The Texan. Richard Simmons wrote the script for the pilot, which will go into production the end of the month, while a second unit is shooting background footage in the Caribbean.

The Corrupters—The records of the Kefauver Committee and other crime investigating groups provide the basis for the episodes of this series of the adventures of a newspaper labor reporter-columnist. The hour-long series is produced at Four Star by Leonard Ackerman and Don Burrows for ABC-TV.

Counter-Intelligence Corps — McCann-Erickson Productions is cooperating with Desilu in the production of this hour-long series based on the exploits of former CIC agents, created by Josef Shaftel, who is also the executive producer. Leonard Kantor wrote the opening episode, a two-parter titled "Teheran."

Crawford's Key—A man who owns his own island off the Florida coast is the central figure in this action-adventure series which Nat Perrin will produce for Filmaster. The pilot script is now being written.

Arch Johnson (l.) and Jack Warden in 'Asphalt Jungle' which is being produced by Arthur Lewis at MGM-TV for ABC-TV showing. Duke Ellington wrote the background music for this big city police thriller.

87th Precinct—The police personnel who work in and out of the station house in New York's 87th precinct, familiar to readers of the Ed McBain mystery stories on which the hour-long tv series is based, are the characters of the tv programs which Hubbell Robinson Productions is filming at Revue for NBC-TV. Boris Kaplan produced the pilot.

Everglades — This is a Ziv-UA produced adventure show written by Budd Shulberg and directed by Andy McLaughlin. The half-hour series, which may be considered by CBS-TV for next season, stars Ron Hayes.

The Force—Exploits of the Royal Canadian Mounted Police will form the basis for this series of hour-long adventure dramas which Joseph Mansfield will produce at Warner Bros. The series is not yet cast and the initial script is still in work.

Homicide—The homicide bureau of a big-city police force provides the setting and personnel for this 60-minute series of police dramas, not yet cast, which Mort Briskin will produce for Desilu.

The House on the Rue Riviera—Adventure on the Cote d'Azure, where the great and near-great, the wealthy and the want-to-be-wealthy rub shoulders on the beach and at the gambling table. The series formerly was titled Monte Carlo, is developed in this hour-long series which Douglas Hayes is producing in color at 20th Century-Fox Television for NBC-TV.

The Hunters—Big game hunting in Africa is the theme of this series of 60-minute programs formerly titled Tanganyika, which Robert Blees is producing at 20th Century-Fox Television for ABC-TV. William Self is executive producer.

The Impatient Ones—American fliers of World War I, the gay, reckless boys whose exploits in the air over the front were matched only by their adventures in Paris streets and bistros, are the heroes of this half-hour series now in preparation by Q.M. Productions for ABC-TV. Quinn Martin is the producer. Series has not been cast.

The Insiders—A New York publicity man (David Janssen) spends more time keeping his clients out of trouble than getting them into the papers. In this Screen Gems series of hour-long adventure dramas. William Sackheim is the producer. Elliott Silverstein the director and Richard Alan Simmons the writer. Polly Bergen is guest star of the pilot, which is ready for showing.

Kovach—John Robinson is writing and will produce the private detective series of half-hour programs for Libra Enterprises in cooperation with Ziv-UA.

The Lady in Red—Suzanne Lloyd is starred in this half-hour adventure series which Shirley Mellner is producing for Heritage Productions.

Las Vegas—Peter Graves stars as a public relations man who doubles as a trouble-shooter for the plush hotels and gambling houses in the Monte Carlo of the West. The hour-long series being packaged by Goodson-Todman for NBC-TV. Andrew J. Fenady is the producer; the series is being filmed at Paramount.

BEING PUT TO PASTURE continued

The Man From Telegraph Hill—Dan Dailey stars in the title role of this hour-long series of adventure dramas produced and written by Richard and Mary Sale for Desilu.

Man in the Middle—Robert Sterling plays the part of a New York night club owner who is also an amateur archeologist with a penchant for solving mysteries and helping people in trouble. Donna Douglas co-stars. Robert Sparks is the producer; Oscar Rudolph the director and Margaret and Paul Schneider the writers of the Screen Gem half-hour series. Pilot is already filmed.

The New Breed—The elite squad of the Los Angeles Police Dept., young men who fight crime with brains rather than brawn, provides the setting for this half-hour series starring Leslie Nielsen which Q.M. Productions is producing for ABC-TV. Quinn Martin is executive producer.

The No. 1—Highlights from the lives of the greatest reporters of all times and the stories they covered are presented in dramatized form in this hour-long series which Nat Perrin will produce for Filmaster.

Number 7 Cannery Row—Robert Knapp portrays a Pinkerton-type guy with a business called the Pacific Maritime Security Corp. in this on-and-offshore series of half-hour adventure dramas which is being filmed on the California coast in the Carmel-Monte-Carlo area. Sam Galt produces for California National Productions. Pilot is ready to be seen.

Open File—The police files are full of unsolved cases for which this half-hour drama series will attempt to present logical, although not necessarily the actual, conclusions. Vernon Clark produced the pilot for the series in which David Brian is host. Herta-Lion International Corp. is producing in cooperation with ABC Films.

Panama—Three adventurers join forces to undertake difficult assignments which take them to many interesting places and much action in a Central American setting. John Larkin will produce this hour-long series in color on location for NBC-TV.

Patrol Boat 999—Based on the book of the same name by Harold Waters and Aubrey Wisberg, this hour-long series deals with the U. S. Coast Guard in the prohibition era. Lindsley Parsons is executive producer; Mr. Wisberg is producer-writer; Lindsley Parsons Inc. is producing the series in association with Allied Artists.

Police Doctor—Authentic experiences of a police surgeon assigned to Los Angeles Central Receiving Hospital provide the basis for this series of half-hour dramas, starring Richard Carlson and produced by Henry Kesler for California National Productions. The pilot is ready for showing.

Portofino—Lisa Corbett portrays a young widow in this hour-long adventure-romance-dramatic series whose home base setting is a small hotel on the Italian Riviera where she and three bachelor friends of her late husband reside. Bruce Geller wrote the pilot which NBC-TV is filming at MGM-TV.

Solitaire—Ray Danton and John van Dreelen are to star in this hour-long adventure drama series with a European background. Howie Horwitz will produce at Warner Bros.

Foreign-mades being offered on U. S. market

ASSOCIATED TELEVISION OF LONDON MAKES STRONG BID

In addition to U. S.-produced film for tv, there are also series produced abroad by foreign companies that are available for sale in this country. For example, Associated Television of London, which distributes in the U. S. through subsidiary Independent Television Corp., New York, has successfully sold its seven newest filmed series to overseas networks, and hopes to do the same here.

In the works are six 26-week half-hours and one hour-long show. The Adventures of Sir Francis Drake, being made on location in London and in the Mediterranean area right now, consists of fictionalized episodes based on the exploits of the famed seaman. Anthony Bushnell produces the MGM-made series, while Terence Morgan stars as Sir Francis. This series and the other six have been sold to Associated TV for 12 British stations; to Associated TV Stations of Australia for seven stations, and to Associated TV Stations of Canada for the CBC Network.

Ghost Squad, the one hour-long series, which goes into production April 27 at J. Arthur Rank Studios in England, is an adventure-drama-detective show starring Sir Donald Wolfit. The show, in which the characters appear in various disguises, is produced by Connery Chappell.

The adventures of a roving photographer in Monte Carlo, Riviera, which goes into production June 15, will be filmed by Victerene of France on location in Monte Carlo. Dennis O'Dell is producer. No star has been selected as yet.

Harry Fine is producer of an ATv series to be filmed by MGM of England in Jamaica, B. W. I. in August. The romantic-melodramatic series will be called Montego Bay. Filming of Mike Mercury Super Car, a children's adventure show employing electronically controlled puppets, has already been finished and now is being shown on ATV outlets abroad.

Only the titles are available on two ATv stories scheduled to go into production in September and October respectively. They are King, Queen and Knavc and Grand Tour.

The Dick Powell Show—Dick Powell will host this hour-long anthology series of contemporary adventure dramas which Four Star Television is producing for NBC-TV. Mr. Powell will also star in one out of every three of the 39 programs.

Rio—Roy Huggins, creator of Maverick, also conceived this hour-long contemporary adventure series, dealing with two Americans running a travel agency in Rio de Janeiro. Adam West and James Best play the leads. Series is now in production at Desilu and on location in Brazil. Alvin Cooperman is executive producer for Ron Com Productions.

Satan's Waitin'—Raymond Walston stars in this modern-day suspense-adventure-romance series of half-hour episodes which Don Fedderson Productions is planning.

17 Battery Place—Ron Randell stars as an investigator for the Port of New York Authority in this Revue series, to be filmed in New York and Hollywood.

Shannon—George Nader stars as an insurance investigator assigned to protect his company's transportation clients from hi-jackers, thefts, etc. in this half-hour TV Screen Gems series. Producer: Robert Soarks; director: James Neilson;
Swiss Family Robinson—The children's classic of the shipwrecked family and their adventures on an uninhabited island will become a half-hour TV series, produced by Fritz Goodwin for Film- aster. The pilot script now is being written.

Three to Get Ready—Joby Baker, James Callahan and Joe Partridge have been signed for the leading roles of a pilot, co-pilot and flight engineer of a global air charter service in this comedy-adventure series which Bud Yorkin and Norman Lear will produce under their Tandem Productions aegis, in association with CBS-TV and Paramount Studios. The hour-long pilot was written by Mr. Lear, who will also produce it, with Mr. Yorkin as director.

Three White Hats—Joseph Campanella, Ron Foster and L. Q. Jones are starred in this series of half-hour programs based on the present-day Texas Rangers. Wilbur Stark and Al C. Ward produce for California National Productions. The pilot film has been completed.

Tightrope—Mike Connors will again be starred in the hour-long version of the earlier half-hour series which Clarence Greene and Russell Rouse are preparing at Screen Gems for broadcast on ABC-TV. Quinn Redeker will be featured.

Tramp Ship—Neville Brand stars in this series of half-hour adventure-dramas which Don Fedderson Productions is producing at San Pedro, Calif., harbor and Desilu. John Brahms directs the initial segment; Fred Henry is executive producer, Milton Merlin associate producer, John Stephens production supervisor and Judy Adkins casting director. Dick Patterson, Mike Manor, Buddy Hayes and Mike Gallo- way are cast for continuing featured roles in the series for which an 8,000-ton cargo ship has been leased as chief locale of the action.

War Birds—World War I pilots, the first men to fly airplanes in military combat, are the protagonists in this half-hour series in which Wayde Preston and Don Francks have the leading roles. Sam Neuman and Al Simon produced the pilot for California National Productions.

Woman in the Case—A woman is the central figure in each of the hour- long dramas in this anthology of suspense stories, whether as criminal, vic-
99 SQUEEZES... That's a lot! But just you watch as multi-image after multi-image dissolves...

dissolves...

dissolves...

dissolves...

dissolves...

dissolves...

dissolves to multi-image after multi-image! Right, it's a lot—but easy when it's film that's in the plot!
FILM does the “impossible”!

How to say “99 squeezes” (make every last squeeze count); How to say “soapy . . . soapier . . . soapiest!” How to do it all with such zest that the new Brillo Soap Pads sing out in the mazes of morts everywhere!

Answer: Do it in words and pictures. Put it to music. On film, of course! Because film, and film alone, gives you commercials, crisp, vivid, exciting—the way you want them—and when!

And that’s not all! Film alone provides the optical effects you require for sharp, high-polish commercials; in addition, assures you the convenience, coverage and penetration market saturation requires.

In other words . . . look before you shoot!

Animation

The Alvin Show—Alvin, mischievous member of the chipmunk choral group, stars in this half-hour animated cartoon series created by Ross Bagdasarian, who supplies the voices here as he did on the records which started Alvin and his friends on the road to fame. Sy Gomberg created the series which Herbert Klynn is producing at Format Films.

Calvin and the Colonel—Calvin, a bear, and the Colonel, a fox, are the central characters in this animated half-hour series which TV Spots is producing for ABC-TV. Freeman Gosden and Charles Correll, radio’s Amos ‘n’ Andy, will provide the voices for Calvin and the Colonel; Joe Connolly and Bob Mosher, who wrote and produced Amos ‘n’ Andy for 15 years, will produce the new series.

The Green Hooper—Although the main characters in this half-hour animated cartoon series are talking animals—a frog named Hoppity, a bear, Fillmore, and Professor Waldo, a wolf—Bill Scott and Jay Ward, co-producers, say it is beamed at an adult audience. Jay Ward Productions has a pilot ready for showing.

Keenan, the Invisible Boy—Magic and mischief blend humorously in this half-hour animated series, based on an original story by Herbert Klynn and Jules Engle. Lou Carlin wrote the pilot, which Alan Zaslove will direct at Format Films.

Muddled Masterpieces — The art classics are satirized in this five-minute color animation series which Gerry Ray, Sam Nickelson, Bob Gaon and Norm Gottfredson have ready for production at TV Spots.

Shaggy Dog Tales—A talking dog wins a scholarship to a university and runs into many unusual experiences in this five-minute color animated cartoon series. TV Spots is the production company; Gerry Ray, Sam Nickelson, Bob Gaon and Norm Gottfredson are the producers.

The Shrimp—The laughter and tears of the world of kids show up in this sentimental series of half-hour animated comedies created by Sy Gomberg from his own magazine stories and produced by Herbert Klynn at Format Films.

Simpson and Delaney—The esza-

Comedy

All in a Day’s Work—Carl Reiner wrote the pilot, which Sheldon Leonard produced for this half-hour character comedy series dealing with the life of a tv comedy writer, Dick Van Dyke and Morey Amsterdam starred. Carreland Enterprises (Reiner, Leonard and Danny Thomas) filmed the pilot.

Baron Gus—a Luxembourg baron (Ricardo Montelbaan) marries an American girl (Pippa Scott) and starts to see the United States, traveling in a trailer drawn by a Jaguar. John Hess, who wrote the Alex Guiness tv show, Evil Scheme of Jebal Deeks, is writing the series, with Dan Petrie directing at MGM-TV for CBS Films.

The Joey Bishop Show—Joey Bishop plays the fall guy in an advertising agency in this half-hour series. The pilot, produced by Sheldon Leonard and Lou Edelman, has been filmed and will be seen as a segment of The Danny Thomas Show on March 27.

Bus Stop—The William Inge play, a

PERSPECTIVE ’61) 129

smash hit on Broadway and in theatrical motion pictures, becomes an hour-long series which 20th Century-Fox Television will produce. William Self is executive producer.

The Jack Carson Show—Jack Carson plays the part of the driver of a charter bus, going wherever the charterer wants it to, in this half-hour Screen Gems comedy series. He is also a bachelor trying to rear a 7-year-old niece and to avoid matrimony. Robert Sparks will produce the pilot.

The Jeanne Crain Show—Jeanne Crain plays a top model and John Vivyan the editor of a swank fashion magazine, who are also married and the parents of two children, in this sophisticated situation comedy series of half-hour shows being produced by Screen Gems. Tony Owen is the producer, Norman Tokar the director and Barbara Hammer the writer. The pilot has been completed.

Coffee, Tea or Milk?—An air hostess, portrayed by Barbara Nichols, is the central character of this series of half-hour situation comedies, which Herman Saunders is producing at Mark VII Productions. Filming is scheduled to start late in February.

The Colonel’s Lady—Eve Arden is starred in this half-hour comedy produced by Stanley Roberts for Ardley Productions.

Daddy-O—The Dobie Gillis team of writer Max Schulman and producer-director Rod Amateau are again collaborating in this new CBS Films comedy series about the man who plays an addle-pated father on a tv series and wants to quit because his real family keeps confusing him with his tv character. Don DeFore is “Daddy-O” with Lee Phillips co-starring.

The Drum Beater—The exploits and predicaments of a press agent provide the theme of this hour-long series starring Pat Harrington and Andy Clyde. Edward J. Montague produced the pilot for Bonnaker Productions.

Father of the Bride—Leon Ames stars in the title role of this half-hour comedy series based on the best-selling novel, with Ruth Warrick, Myrna Fahey and Burt Metcalfe also regular members of the cast. Rudy Abel, producer, and Robert Maxwell, executive producer, filmed a full-hour pilot, which includes vignettes from a number of episodes as well as one complete half-hour, “The Wedding,” which will be shown at the 11th of the 26-week series. Katherine and Dale Eunson wrote the pilot episode and will do a minimum of 13; they have completed story outlines of all 26. MGM-TV is producing the series. Anton Leader directed the pilot.

Johnny Fletcher — Frank Gruber wrote the books on which this half-hour series is based. Mr. Gruber produced the pilot for the Frank Gruber Co. Johnny Goddard and Read Morgan are starred.

Fractured Flickers—Take an old silent movie, cut it down to a half-hour and edit it for comic effects, disregarding the original story line, add a supercilious host named H. Carleton Fotheringill and you’ll be doing what Jay Ward and Bill Scott of Jay Ward Productions have done with the pilot for this series. Hans Conreid portrays Mr. Fotheringill.

The Ginger Rogers Show—Glamorous Ginger Rogers portrays a fashion designer in this half-hour romantic comedy series which William Self is producing at 20th Century-Fox Television.

The George Gobel Show—Two different scripts have been prepared for this series, which will bring George Gobel back to tv each week in a domestic comedy with his tv wife, Alice, as yet uncast, and both will be tested before the pilot is filmed. Gomulco Productions is producing.

Phil Harris and Alice Faye Show—Desilu in association with NBC-TV is producing this half-hour domestic comedy series dealing with the fictionalized home life of this musician married to an actress.

Ricardo Montalban and Pippa Scott star in the new CBS Films pilot ‘Baron Gus,’ a comedy in which Montalban plays a European newspaperman covering the U.S.

Harry’s Girls—Larry Bydlen portrays a song-and-dance man traveling through Europe with three American show girls in his act in this romantic comedy series. Three half-hour episodes have been filmed for MGM-TV on the French Riviera. Ralph Levy is the producer; Alan Jay Lerner the executive producer; Joseph Stein, head writer and script supervisor.

The Hathaways—The twist to this domestic comedy is that the family consists of Father (Jack Weston), Mother (Peggy Cass) and three youngsters who are chimpanzees (the Marquis Chimps) rather than human children. Screen Gems is producing the half-hour series for ABC-TV.

Hazel—Shirley Booth stars as the housekeeper for a wealthy family, a character inspired by the Saturday Evening Post cartoons, in this half-hour Screen Gems series. James Fonda produces with Harry Ackerman as executive producer; William Russell directs and the scripts are written by William Cowley and Peggy Chantler. Pilot is now in preparation.

Her Honor O’Connor—The trials and tribulations of a female judge are humorously expounded in this half-hour series created by Michael Kraike and Clark E. Reynolds. Not yet cast, the series is scheduled to go into production this spring with Alvin Cooperman as executive producer for Ron Com Productions.

The Holidays Abroad—Dan Duryea and Margaret Hayes are starred in this half-hour situation comedy series which Josef Shaffel is producing for Desilu.

Jimmy and Me—A talking dog, “Mike,” and his boy, “Jimmy,” are the central characters in this half-hour comedy created by Ray Berwick. Arthur Lake does Mike’s talking and is also producer of the series. Irving Cummings is executive producer; Emil Newman, musical director, and Charles R. Marion and Nat Tanchuck are among the writers. Mr. Berwick also directed the pilot, filmed at Desilu for Berwell Productions.

Ladies in Retirement—Two aging stars continue their friendly rivalry into their days of retirement in a home for old actors in this half-hour comedy-drama. Estelle Winwood and Gladys Cooper are starred. Buddy Bregman is the producer for Heritage Productions.

Margie—The movie “Margie” which 20th Century-Fox made some years ago with Jeanne Crain as star is now being turned into a half-hour tv series by 20th Century-Fox Television. Hal
TOWER OF STRENGTH

We wish to thank our clients around the world for making 1960 our finest year. We are proud to have contributed to their growth and to the growth of the Broadcast and Tower industries. Dedicated to meet the present and future requirements of the Broadcast industry, the specialized and technical skills developed by Utility have been successfully applied to the task of producing better Towers around the world. The design and construction of AM-FM and TV towers, two-way communication, microwave relay, antennas, ground systems, lighting equipment and coaxial cable lines calls for varied skills and long experience. Utility Tower is uniquely equipped to offer such services—plus careful budget control through familiarity with all time and cost factors. Our record of new assignments is long and varied. It includes the names of many clients previously served. We thank them and invite you to profit from our background and experience as designers, manufacturers, installers and maintenance.

THE COWBOYS ARE BEING PUT TO PASTURE continued

Goodman and Larry Klein are co-producers; William Self is executive producer.

Mickey and the Contessa—Eva Gabor and Mickey Shaughnessy are starring in this half-hour comedy series which Cy Howard will produce at Desilu for ABC-TV.

Mister Doc—Dean Jagger stars in the title role of this sentimental comedy, a period piece set in 1905. Frank Gabrielson, the writer; Ralph Nelson, the producer, and Ruth Gates, prominent in the cast, formerly served in similar positions with Mana, nostalgic tv series which ran for several season with Peggy Wood starred. Pilot was filmed at Desilu by CBS Films.

Mother Is a Freshman—Gertrude Berg and Sir Cedric Hardwicke star in this half-hour schooldays comedy series which Four Star has sold to General Foods for broadcasting next season. Tom McDermott produced the pilot.

Mr. In-Between—Three landlubbers who don't know their bilge from the flying bridge jointly buy a boat and are launched on the adventures which make up this half-hour comedy series. Pilot script is ready for casting; Nat Perrin will produce for Filmaster.

My Fifteen Blocks—Danny Thomas, financing the pilot for this new half-hour comedy series, promises it will be "one of the first new story ideas in television in years," but refuses to divulge any details until he has it ready to show.

My Wife's Brother—Comedians Rowan and Martin are starred with Carole Cook in this half-hour situation comedy series which Cy Howard is producing at Desilu for ABC-TV.

The Jants Paige Show—This is a musical-comedy half-hour tailored to the talents of its star, William Asher is producer-director for Desilu.

Permanent Waves—Hope Holiday, Kathleen Freeman, Dee Arlen and Beverly Wills co-star in this half-hour situation comedy series concerning the adventures of four girls who are making the Navy their career. Jerry Lewis Enterprises is the production company; Ernest D. Glucksman is the producer. The pilot is now being shown to agencies.

Sweet Sixteen—The home life of a typical American family—father, mother, Miss 16-year-old, younger sister and baby brother—is portrayed by George Murphy, Janet Gaynor, Suzie Kaye, Barbara Neaird and Donald Washbrook in this half-hour series for which the pilot was written and produced by Ed James, creator of Father Knows Best. John Rich is the director. Series is being filmed at Desilu by Home-James Productions for NBC-TV.

You Can't Win 'Em All—Bob Schiller and Bob Weiskopf are the writers of this comedy half-hour series on Desilu's list for production for fall. It has not yet been cast. Show is based on The Long Season, novel of the home life of a big league ball player, written by Jim Brasman, publisher of the Cincinnati Red Legs.

In the new Desilu series Dan Duryea and Margaret Hayes are starred. Called 'Holidays Abroad,' it is produced by Josef Shafteil.

The World of Lisa Boston—Ruth Roman stars as the curious and intrepid editor of a women's magazine, who travels the globe in search of material, accompanied by a conservative male photographer, not yet cast. Phil Shukun and John Greene wrote and will produce the pilot, which Herts-Lion International Corp. is filming with and for ABC Films.

Documentary

Crime and Punishment—Interviews, unrehearsed and uncensored, conducted by newscaster Clete Roberts, with long term inmates of San Quentin Prison, make up the contents of this half-hour taped series, which also includes a commentary by Richard A. Magee, director of corrections for California, on each program. Collier Young is the producer, with Robert H. Hil as associate producer. Collier Young & Assoc. is producing the series for syndication.

David Brinkley's Journal—The NBC reporter-commentator will review the week's news and give his personal reactions to it, while the tv audience looks over his shoulder, so to speak, and eavesdrops on his relaxed, post-deadline observations, which will be shown in color, live, tape and film. NBC News and Public Affairs Dept. is package-producer of the half-hour series, scheduled for the 1961-62 season.

Lie Detector—William A. Schmidt, pioneer user of the lie detector, will be featured on this half-hour series which offers anyone ever accused of lying about anything the chance to prove his veracity by taking a lie detector test on camera on this new series which KHJ-TV Los Angeles is co-producing with Andrews-Spears, who made the pilot. Ralph Andrews is host on the half-hour programs which KHJ-TV is taping for syndication. KHJ-TV also will broadcast the series in Los Angeles, Fri., 7-7:30 p.m., starting Feb. 24.

Nightside—The award-winning radio series originated by KMPC Los Angeles is turned into a five-minute tv series depicting the colorful and off-beat side of the city after dark. Don Reed is narrator of the series, directed by Richard Cunha and produced by Fritz Goodwin for Filmaster. Three pilot episodes have been filmed.

Success: It's Up to You—How to get a job, how to keep it and how to make it a stepping stone toward a better job just about sums up the subject matter of this self-help series of half-hour semi-documentaries. Dr. Donald Curtis is the narrator-counselor. Elnora M. Rock produced the pilot for El-Von Productions.

Drama

Big Brothers—The Big Brothers of America's files of case histories of the boys they have befriended provide the stories dramatized in this series of half-hour dramas created and produced by Ralph Andrews. Meredith Willson will host with a weekly guest star (Jack Haley in the pilot) of this series, which Andrews-Spears Productions is filming in cooperation with Screen Gems.

Cain's 100—"Cain" is a bright young lawyer, played by Mark Richman, who heads a government law enforcement agency battling syndicated crime; the "100" are the members of the crime syndicate most wanted by the authorities; the time is now. Paul Monash created, wrote the pilot and is executive producer of this hour-long series, being
produced by MGM-TV for NBC-TV.

The Greenhorn — Mickey Rooney portrays the same Eastern city boy in the early West that he did on Wagon Train in this series which Revue is preparing.

Dr. Kate—Jane Wyman portrays Dr. Kate Pelham Newcomb, whose life of dedication to the people of rural Wisconsin is described in Adele Coman- din's novel, Dr. Kate, in a half-hour series which Josef Shafel will produce at Desilu for ABC-TV. Willard Parker plays Dr. Kate's husband. Harry Essex wrote the pilot script.

Dr. Kildare—Dick Chamberlain portrays the role which Lew Ayres had in the MGM feature film on which this MGM-TV half-hour series is based. Raymond Massey plays Dr. Gillespie, the role of Lionel Barrymore in the movie of 20 years ago. Norman Felton is executive producer of the series, an Arena Production program, with Herbert Hirachman as producer. Boris Sagal will direct the pilot, written by E. Jack Neuman.

The Lawyer—Lin McCarty portrays a crusading attorney fighting for the underdog in this series of hour-long dramas produced by Hubbell Robinson Productions at U-T for ABC-TV.

M.R.—Comparative laws around the world are the basis of this 60-minute series to be produced by Dozo S.A. Productions in various foreign countries. Initial script was produced in Japan in association with Nichibei Eiga Co. Ltd. John Florea is creator-producer. Pilot is ready for showing.

Our Town—Nat Perrin will produce a half-hour series based on Thornton Wilder's Pulitzer Prize-winning play for Filmaster. Script is being written.

Small Town D.A.—This half-hour series is based on the book of the same name by Robert Traver, for 14 years the district attorney in a small city in northern Michigan. Mr. Traver also wrote Anatomy of a Murder. Ziv-United Artists will produce the series for ABC-TV.

Tramp Ship—Neville Brand stars in this half-hour dramatic series of the captain and mate and passengers of a modern tramp ship. Don Fedderson Productions are producing the series, based on an idea bought from Jack Lord.

Education

Art—Just for the Fun of It—California artist Charles Bragg talks about painting and demonstrates the fundamental principles in this informal half-hour series which Medallion TV Enterprises is taping for syndication. Alan Lane is the producer.

The World Book—Dr. Frank Baxter will be host of this half-hour educational series, aimed at a teenage audience, which Ralph Andrews created and Ralph Andrews Productions will film in association with World Book Encyclopedia.

Interview

Great Day in Sports—Interviews with sports stars, past and present, on their greatest sports moments, backed up with stock film footage, make up this five-minute series, created and produced by Ralph Andrews, with Vin Scully, L.A. Dodgers broadcaster, as host. Andrews-Spears Productions has a pilot ready.

Raw Deal—Any one who thinks he's had a raw deal is invited to appear on this program and air his grievance, but the person accused of creating the raw deal also appears to give his side of the story in the half-hour show. Ralph Andrews created and will produce the series, with John Milton Kennedy as host. Andrews-Spears Productions has completed the pilot.

Miscellaneous

The Daring Deeds of Donny Dru—A seven-year-old boy (Scott Lane) with a vivid imagination transforms the everyday problems of home life into fantastic adventures in this half-hour series based on a weekly half-hour serial. Jeff Donnell plays the role of Lionel Barrymore in the movie of 20 years ago. Norman Felton is executive producer. Boris Sagal will direct the pilot, written by E. Jack Neuman.

The Lawyer—Lin McCarty portrays a crusading attorney fighting for the underdog in this series of hour-long dramas produced by Hubbell Robinson Productions at U-T for ABC-TV.

The Daring Deeds of Donny Dru—A seven-year-old boy (Scott Lane) with a vivid imagination transforms the everyday problems of home life into fantastic adventures in this half-hour series based on a weekly half-hour serial. Jeff Donnell plays the role of Lionel Barrymore in the movie of 20 years ago. Norman Felton is executive producer. Boris Sagal will direct the pilot, written by E. Jack Neuman.

Now Is Tomorrow—Events that are possible but not probable, such as the election of a woman as President, are dramatically depicted in this half-hour anthology series created by Harve Bennett and Burt Rosen. Charles Bickford is the host of this Ron Con series. Alvin Cooperman, executive producer, has completed the pilot.

Observation—Contestants from the audience are shown certain objects and try to identify them before the buzzer sounds for prizes in this audience participation show which Don Fedderson Productions is preparing for ABC-TV to start late in the spring as a five-a-week daytime show. Abe Stark is producer; Fred Henry, executive producer.

Ramparts—NBC News and Public Affairs Dept. got cooperation from the Defense Dept. and related civil agencies such as National Aeronautics & Space Administration in preparing this half-hour filmed series with the nation's power-for-peace activities of today. Irving Gitlin is executive producer.

The Unbelievable—Unlikely things that actually happened are recreated with tongue-in-cheek presentation in this five-minute dramatic series, created and produced by Screen Gems for NBC-TV. Jeff Donnell plays the role of Lionel Barrymore in the movie of 20 years ago. Norman Felton is executive producer. Boris Sagal will direct the pilot, written by E. Jack Neuman.
THE COWBOYS ARE BEING PUT TO PASTURE continued

produced by Ralph Andrews, with Baxter Ward as host. Andrews-Spears Productions has a pilot ready to show.

U.S.A.—Bill Burrud, whose other non-fiction programs, Wanderlust, Treasure, Vagabond and Holiday, have filmed their footage in all parts of the globe, will travel the United States in this new series of half-hour color programs which Bill Burrud Productions is packaging in association with the Jerry Ross Organization. Gene McCabe, Burrud executive vp, will supervise production.

Walt Disney's Wonderful World of Color—Harry Tythe, European representative of Walt Disney Productions, and Steve Previn, contract director, have delivered two hour-long color programs for the NBC-TV series and plan to film one this summer in Vienna and another this fall in Paris, in addition to the ones being produced in the U. S.

What Do You Want?—Groucho Marx will attempt to counsel his guests, including many well-known individuals, on how to achieve their hearts' desire in this new half-hour series, which John Guadel is producing (Guedel Productions) to replace You Bet Your Life. There will be no quiz, but the guests will have a chance to win $1,000 by answering one question at the end of the show.

Musical

The Curt Massey Show—Curt Massey and Martha Tilton sing and converse in this music-variety series video taped in color from its live showing on KRCA(TV) Los Angeles, where it has been a popular five-a-week, 15-minute early evening series for the past two years. Robert Cawley produces for Medallion TV Enterprises.

Jo Stafford Show Specials—Guests such as Ella Fitzgerald and Peter Sellers will visit Jo Stafford and chat and sing with her on this series of hour-long shows which Independent Television Corp. is producing.

Take My Advice—Dr. Lorine Johnson, Ph.D., Hedv Lamarr, Carl Reiner and Bob Sweeney as panel members, plus George Fenneman as moderator, will advise guests on how to handle personal problems on this half-hour show which Guedel Productions will present.

Sports

$100,000 Hole in One—Two top professional golfers aim for aces each week and compete for big money prizes in this half-hour series which Mitchell J. Hamilburg Productions is producing in association with Jerry Ross and Hal Marienthal, with Fred Briskin as executive producer-director and Jesse H. Martin as associate producer. Jerry Barber is referee and commentator; Gil Stratton, sportscaster for KNXT(TV) Los Angeles, is host. Pilot was filmed in Los Angeles in January, with Mike Souchak and Don Finsterwald on the tee.

Million Dollar Bowling—Ralph Story is master of ceremonies in this hour-long show where bowlers will compete for prizes up to $1 million. Ralph Andrews is producer with Erwin Buckspan as co-producer for Trojan Productions.

Western

The Jayhawkers—A western, but with light touches, laid in the period shortly after the end of the Civil War. Robert Bles is the producer of the hour-long series at 20th Century-Fox Television, with William Self as executive producer.

The Outlawed—Frontier justice in the late 19th century is the basic theme of this series of hour-long dramas, starring Mike Galloway. Margro Productions is the producing company, Margia Dean the producer. The pilot is completed.

Russell—Fess Parker stars in this "different" western series, based on the life and paintings of Charles M. Russell, noted American artist. Bordon Chase created and will write the half-hour programs, with Gordon Kaye as producer for CBS Films. Series will make liberal use of Russell's paintings of the Old West.

Tumbleweed—A drifting cowboy, neither gunslinger nor bounty hunter, moves from place to place, helping to resolve a situation in each half-hour episode. Richard Trotter stars as Tumbleweed Jones. Tom Corradine & Assoc. has completed the pilot.

The Yank—James Drury stars in this post-Civil War series of western action half-hours as a young doctor trying to "bind up the nation's wounds." Andrew J. Fenady produces for Goodson-Todman.
Florida beckons to tv film producers

IT HAS ALMOST ALL KINDS OF SCENERY, PLUS ECONOMY, CONVENIENCE

Balmy Florida, with year-round sunshine, is becoming an increasingly important tv film production center.

There’s no danger Hollywood’s supremacy is about to be challenged. Rather, this Florida expansion takes the form of a trend that is catching the attention of major agencies, advertisers, broadcasters and the military.

With its concentration of defense installations, Florida offers a convenient place for the production of the training and technical films used by the Air Force, Navy and other branches of the service.

But there are other reasons Florida is on the way upward in the tv film business:

- Every possible natural setting is available, except high mountains and snow. There’s even horse country.
- Outdoor commercials are in demand.
- Important savings in travel costs and time are available for New York agencies in shooting tv commercials.

Madison Avenue is becoming aware of the economy and convenience of Florida shooting.

- Several production companies are turning out excellent product at a price Hollywood can’t very well meet. There’s little feather-bedding and both union and non-union crews can be used.
- Technical and talent pools are developing, especially in the Miami area.
- Studio and equipment can be leased, with no need to ship in heavy gear for special shots, feature productions, commercials or backgrounds.

A rather recent entry in the Florida field, Filmaster, is shooting the seventh in a 39-episode tv film series, The Beachcomber, starring Cameron Mitchell. Filmaster, headed by Robert Stabler, has its Florida headquarters at Winter Park, adjacent to Orlando. It does tv commercials, military films and industrial work out of Winter Park. In addition it uses Republic and California Studios in the Los Angeles area. Filmaster has produced commercials for du Pont, Super Suds, Gold Medal flour, Cashmere Bouquet soap, Marlboro and Chesterfield cigarettes, Timex and Elgin watches, Carling beer and others.

In at Start * Rainbow Pictures Inc., Miami, went into the business in 1948 at the start of television. It is headed by Walter Resce. The Miami studio, built in 1958, is claimed to be the biggest in the Southeast. This week Rainbow will shoot a Kaiser Aluminum series of commercials, with Young & Rubicam as agency. It has just completed a Reynolds Aluminum series of commercials placed by Clinton E. Frank Inc., Chicago agency. Rainbow leases equipment and studios to location crews filming series.

Recla Films Inc., subsidiary of WTVJ (TV) Miami (Wometco Enterprises), operates a complete motion picture production center, renting equipment and studios. All types of laboratory work are handled and video tape recorders are available along with crews. J. Van Hearn, manager of

In addition, Eastern offers freight space on over 400 daily passenger flights—including DC 8-8 Jets and Prop-Jet Electras—to 128 cities in the United States, Canada, Bermuda, Puerto Rico and Mexico.

For Information and Freight Reservations, call your Freight Forwarder, Cargo Agent or Eastern Air Lines.

EASTERN AIR LINES
Reela, also operates Vizcaya Productions Inc. in Miami.

Camera Equipment Co., New York, has a Miami branch, leasing all types of gear. Other production firms include Soundac, Film Sound Center and Academy McLarty. Location shooting around Miami has been done by Ziv-United Artists for the Miami Undercover TV series.

Florida welcomes all this film activity, realizing that even a small group shooting TV commercials may leave $1,000 a day in the state.

Mr. Stabler, a native Californian, became interested in drama and show business at UCLA. After school he entered talent management, including General Amusement Corp. He became vice president of Capitol Records and in 1952 joined Hopalong Cassidy Enterprises, producing 52 episodes of that TV series.

Active: The original Filmaster was formed by Mr. Stabler in 1955 as Filmaster Productions. The company produced 156 episodes of Gunsmoke and 78 Have Gun, Will Travel, until 1959. "We brought in both shows on schedule and appreciably under budget at a time when production costs were going up," he said. Filmaster produced four CBS-TV Playhouse 90 programs and won the Death Valley Days program from 29 other bidders. Production of a second group of 39 episodes of Death Valley Days has just been completed for U.S. Borax via McCann-Erickson. In 1959 Filmaster Inc. was formed to engage in every phase of motion picture production, with a $2 million stock issue sold to the public.

Filmaster figures it will sell The Beachcomber to a national or regional advertiser, "We're not in the syndication business," Mr. Stabler said. His winter/spring schedule includes a half-hour Our Town series based on the Thornton Wilder classic; Swiss Family Robinson, pilot completed; Mr. In-Between, comedy; Crawford's Key, Florida adventure series and The Number One, notable news stories.

"Florida is only half as far from Madison Avenue as Hollywood," Mr. Stabler said. "There's a trend to authentic outdoor TV commercials and we can produce top films at low cost," he added.

Amazed: Some of the Miami production firms voiced amazement at the way New York agencies send big crews of executives and talent to shoot TV commercials. "Sometimes they whip up a junket to Caribbean islands, knowing the jolly old sponsor will foot the bill," one producer said.

Rainbow produced 10 episodes of Blue Angels, Navy film for CBS-TV and Sam Gallu, with sponsorship by Continental Oil. Its feature films include part of Hole in the Head and next on the list is "Pity Me Not," Gayle-Anthony-Swimmer Productions.

There's everything in Miami, its film operators claim. "All they need to hire is stagehands," one producer said.

The state's commerce and industry is becoming more diversified as the population increases. Newer sophisticated industries are serving the military as well as private enterprise with intricate devices of the era.

In any case, Florida definitely has a promising film future if it can avoid the costly and often unnecessary personnel and the plush overhead items that run up costs in Hollywood.
NEW BENCO LOW POWER TRANSLATOR

MODEL T-1

FEATURES STABLE OPERATION... MINIMIZES 'FALSE' SHUT-OFFS

The new Benco T-1 is the reliable way to increase coverage of existing TV signals. Engineered and manufactured by Benco (Canada) this new translator is now available through the Blonder-Tongue organization in the United States. The T-1 offers a host of advantages over other translators that can be summed up as long life and trouble-free operation, stable operation, foolproof automatic shut-off, and ease of maintenance. It is FCC type accepted.

MINIMIZES "FALSE SHUT-OFFS" CAUSED BY SIGNAL FADING — will not shut off unless the input signal from the remote master station falls below 10 microvolts for longer than 4 seconds.

FOOLPROOF AUTOMATIC SHUTOFF — When the master station goes off the air, this device turns off the transmitter. Ordinary shut-off systems work on the overall signal level. In weak signal areas, where a number of amplifiers must be used, noise generated in the amplifiers can be mistaken for the received signal and transmitted—even though the master station is off the air. The Benco Automatic Shut-Off can tell the difference between noise and the desired TV signal. It cuts off the transmitter anytime the 4.5 MC beat between the sound and picture carriers is missing. A time delay prevents cut off due to momentary signal fading.

PROVIDES STABLE OPERATION EVEN AT THE END OF POOR QUALITY POWER LINES — voltage regulating power transformer supplies the various units in T-1 with stable voltage. Eliminates stress on components caused by unstable supply voltages.

LONG LIFE AND TROUBLE-FREE OPERATION — full sized, underrated transmitting tube in output stage. Less stress on components due to stable operation.

EASY PERFORMANCE CHECKS — a built-in direct-reading power indicator checks power output; built-in test jacks for monitoring plate voltage and current of output tube.

RAPID SET UP OF CODING WHEEL OF IDENTIFICATION UNIT — The appropriate call letters for your area can be set up rapidly without need to cut copper contacts.

TECHNICAL SPECIFICATIONS

Translates input VHF channels to output VHF channels (2-13).

- Primary power source: 117 V ±20% 60 c/s
- Power Consumption: 150W
- Temperature Ambient: -30°C to +50°C
- Input: 75 Ohms
- Output: 75 Ohms
- Recommended Input: 50-2000 microvolts
- Max. Permissible Power: 1 Watt
- Overall Noise Figure: 1.0 db
- Band: Low Band: 4 db ±1 db, High Band: 6 db ±1 db
- Frequency Stabilty: ±0.25 db
- Gain: 50 microvolts input to one (1) watt output = 105 db
2000 microvolts input to one (1) watt output = 125 db
- Maximum gain: 73 db

Band Width between Carriers: 4.5 Mc ±2.5 db
Dimensions of Housing: 35" x 28" x 10½"
Weight: 130 lbs.

SHOULD NETWORKS CONTROL SHOWS?
Advertiser, agency spokesmen state case against it

"There are more important things in the long run" than high television ratings, Douglas L. Smith, advertising and merchandising director, S. C. Johnson & Son, Racine, Wis., said in a panel discussion before the Chicago chapter of American Women in Radio & Television Feb. 11.

Mr. Smith also thinks network control of programming has become "dictatorial." He called for some degree of advertiser voice in programming when the sponsor bears "ultimate responsibility" for what is aired—at least in the mind of the viewer.

"The networks must control programming up to a point, but not completely," George A. Bolas, vice president and director of media activities, Tatham-Laird Inc., Chicago, said. The networks must allow contributions from sponsors and agencies, he said. Since the networks have newly asserted their control over programming, costs have risen sharply, he said. Programs that cost $30,000 when packaged by the agency or sponsor now cost $52,000, he added.

Others discussing who does and who should control tv programming included Sterling (Red) Quinlan, vice president in charge of ABC-owned WBKB (TV) Chicago, and Sid Bernstein, editor, Advertising Age.

Mr. Quinlan said the networks "do have final control and they exercise it" today in tv. Posing the question whether anyone but the networks should be involved, Mr. Quinlan said consumer panels advise General Motors about what "should" go into the features or style of its cars, but GM has the right and responsibility of deciding finally just "how" it would manufacture them.

Mr. Bernstein held to his publication's editorial stand for complete advertiser divorce from programming by a "magazine" format which would allow advertisers to buy only spot "adjacencies" to tv's "editorial content."

The Magazine Concept • Johnson's Mr. Smith, however, disagreed with a magazine concept that would divorce sponsor and programming on the basis of a practical reality: it couldn't be done. Even in spot advertising, the viewer automatically associates the advertiser with the surrounding programming and holds him accountable, Mr. Smith said.

In one sense, he said, "we have the magazine concept now. We have no control over programming except that we do have ultimate control over taste." The tv medium is so potent and intimate, Mr. Smith explained, that the sponsor must have a voice. "We are a guest in the living room and, like it or not, we are responsible." Johnson once scrubbed a story sequence from the Red Skelton series, Mr. Smith recalled, but it wasn't easy. He said Irish groups loudly resented portrayal in one continued skit of a "Kelly" family as being at the wrong end of the social ladder; it was cut after the fourth appearance.

Program ratings have their function, Mr. Smith commented, since "we must look carefully when we're spending several million dollars," but other factors also are important. The efficiency of the overall marketing plan must be watched, he said. Time periods and program vehicles are vital, he explained. He said Johnson is considering public information shows for next fall because their desirable association factor.

He said his company wanted to continue the situation comedy series Angel on CBS-TV next fall because its highly favorable association factor and wholesome entertainment values were far more important than the rating. However, because of the low rating "the network said no, so who controls programming?" he asked.

To amplify this point, Mr. Smith quoted the president of his company as saying that even if he could get all the wax business in the country he wouldn't sponsor ABC-TV's Untouchables.

Sensitivity to viewer taste has caused the sponsor to develop and bring good programs to the air, something he can't do today under present policy, Mr. Smith said. "If there never had been a Johnson's Wax, there never would have been a Fibber McGee and Molly." Tatham-Laird's Mr. Bolas underscored this. Sponsors and their agencies were responsible for developing day-time television, he said, not to mention such network programs as Lassie, Dennis the Menace, General Electric Theatre, Armstrong Circle Theatre, Huckleberry Hound and I've Got a Secret.

Ultimate Responsibility • "Many a network advertiser spends more for a television show than his net after taxes," he said, "so how can he sit on the sidelines?" He should have some say in running his business intelligently and practically and that includes some say in his tv program, although not exclusively or completely, Mr. Bolas said. The advertiser does have ultimate responsibility for viewer reaction, he noted.

Mr. Bolas felt ratings are secondary when more meaningful audience and marketing data are available. The advertiser really wants prospects, not people, he said. Today, the network competition is forcing more hour programs on the air because they get higher ratings, he noted. "Agencies now are on the sideline," he said, although they and their clients pay the costs. There must be a more "cooperative venture," he argued.

During another panel on industry trends, Peter G. Peterson, executive vice president of Bell & Howell, Chicago, related the success of his firm's sponsorship of controversial documentaries on ABC-TV, a case history that defies the "folklore of marketing." Now in its third year, the tv series is under contract through 1962, he said, and all of Bell & Howell's money in television will continue to be put into controversial programming.

Mr. Peterson said the viewer-customer is becoming more mature, awakening to thoughtful consideration of the major issues of the times. He said mail response is 40 to 1 favorable to the shows and Bell & Howell's share of market "is at an all-time high."

Montez Tjadage, promotion manager of KWTV (TV) Oklahoma City and president-elect of AWRT, gave the keynote talk on credibility and confidence in tv advertising. She stressed the point that even one local exaggerated claims would "do a discredit to every advertiser on the station," including the national sponsors. She also thought the credibility of the message, not the message itself, is important. She felt "some" of today's radio-tv programming does not create "a favorable climate for the credibility of advertising messages." This credibility is a personal as well as a group responsibility for all those in advertising, she said.

SUMMER SPORTS ON ABC
Saturday afternoon specials will have world as a field

A world tour of summer sports spectacles will get underway on ABC-TV April 29, in an unusual programming plan sparked by Roone Arledge, executive producer, Sports Programs Inc., an independent packager producing for ABC-TV. In an interview last week, he said the new series will be presented as "live" as possible, using video tape and production techniques to convey to viewers a close sense of "being there."

Mr. Arledge said the basic concept for the series of 20 late Saturday afternoon programs "is to travel the world to cover sports events that are outstanding in themselves instead of specially set up matches or exhibitions." Stops on his as yet incomplete itinerary: U. S.-Russia track meet in Moscow in July; British open golf tournament; LeMans sports car race; Japanese-all-star baseball game; International golf tournament in Puerto Rico, British soccer championship game; Pennsylvania U. and Drake U. relays; National AAU
Live television cameras catch U. N. riot

CBS-TV cameras in this off-the-tube picture caught the startled expression of U.S. Ambassador Adlai E. Stevenson as he looked up in disbelief when demonstrators in the Security Council's visitors' gallery interrupted his speech Wednesday (Feb. 15). Several newsmen and a U.N. guard were injured in the ensuing violence.

Sensing the "tense situation" in the Security Council, CBS-TV preempted its regularly scheduled programs at 11:30 a.m. to carry Ambassador Stevenson's speech on the network live. The CBS News Special Report, introduced by Richard C. Hottelet, CBS News correspondent at the U.N., continued through the riot, which broke out about 11:45 a.m. The rioting was re-broadcast at noon and again at approximately 12:20 p.m. on video tape. A fourth showing of the riot was presented in CBS-TV's 1 p.m. news program.

While CBS-TV was the only TV network with live coverage of the gallery outburst, all other radio and TV networks interrupted their programs for continuing developments in the Security Council. WNTA-TV New York was on the air from the U.N. when the demonstration started. Mutual, which had two newsmen on the scene, broke into its noon news show with a live pickup of the rioting as it was taking place. At 12:50 p.m., Joseph Coggin reported on MBS that he had recognized eight demonstrators as participants in the pro-Castro and pro-Khrushchev demonstrations last summer outside the Hotel Theresa in Harlem. His report preceded by 45 minutes the State Dept.'s official announcement that the U.N. riot was communist inspired.

Armed Forces Radio Network, which was carrying ABC Radio's live coverage, also picked up Mr. Coggin's special report from Mutual, thus getting a jump throughout Western Europe on the Russian interpretation of the demonstration.

CBS-TV followed up its network newscast on Wednesday with a special U.N. report from 11:15 to 11:45 p.m., EST. The network's Eyewitness to History program on Friday (10:30-11 p.m., EST) reported on "The U.N. in Peril."

track and field event, and the festival at Seville (bullfights), which may be the initial offering of the series.

Negotiations with various foreign government television services for their cooperation with sports programs are nearing completion. Mr. Arledge will be leaving shortly for France to firm up plans with Radio Television Francaise for use of its coverage of the LeMans race. Aside from the normal coverage, Mr. Arledge also hopes to arrange for special TV feature material, such as possibly having Sterling Moss, champion sports car racer driving over the course to explain the unique problems in advance of the actual race.

Viewers will see each program on the first Saturday after a particular event is concluded. Mr. Arledge would like to see all events conclude on Fridays so that tapes could be flown by jet direct to New York for showing the next day.

Though no advertisers are yet committed to sponsorship, Mr. Arledge indicated he expects an announcement soon.

Dinah, Chevy, reach a fork in the road

NBC-TV TO GRIND OUT FEATURE MOVIES ON SATURDAYS

NBC-TV's purchase of post-1950 feature films and the anticipated departure of Dinah Shore from the General Motors roster (but not from NBC-TV) headlined last week's actions preparing for the new TV season next fall.

The features will be selected from 150 produced by 20th Century-Fox with NBC-TV to program for one year with options for the next two years. On the basis of the one year alone, the network's financial commitment might run as high as $7.5 million.

The network said the features will be slotted on Saturdays at 9 p.m. with each motion picture presented in its full-length, uncut version with most in color.

As expected, the Chevrolet division which has been seeking ways to reduce its long-time association with and commitment to the Dinah Shore Show (Broadcasting, Feb. 6), has decided to drop the program next season but retain the time period (Sunday, 9-10 p.m.). Last week's report was that Bonanza appears to be the front-runner as Chevrolet's choice.

Meanwhile, ABC-TV, meanwhile, noted that Adventures in Paradise, will be back for a third season next fall in the Monday, 9-30-10:30 p.m. slot, an announcement eliciting no surprise. CBS-TV got a lick in for the current season by noting the hour-long Ziv-UA show The Aquanauts will get a new name. Starting with this Wednesday night's show it will be called Malibu Run.

NBC-TV, it was learned, can be expected to continue Miss Shore's association. The star, who is under contract to the network, may be placed in specials next season.

The feature film deal includes such titles as "Titanic" with Clifton Webb and Barbara Stanwyck; "On the Riviera" starring Danny Kaye; "The Desert
Kodak makes move into magnetic tape

Eastman Kodak Co. will expand into the magnetic tape field later this year, it was revealed last week. The tape will be manufactured at the firm’s plant in Rochester, N. Y., and will be distributed through Kodak’s regular organization of photo dealers.

At the same time, it was indicated that Kodak also will eventually market data recording tape for computers and video tape for film producers. Its associate company in France, Kodak Pathe, has been producing and selling tape for more than 12 years, and its success in the field is said to be a factor influencing Kodak’s move.

Digital tv operation would use less bandwidth

Use of digital operation for tv was described to the Washington (D.C.) chapter of the Institute of Radio Engineers last week by William C. Coombs, chief, space communications division, Radio Systems Division, Boulder Laboratories, National Bureau of Standards.

On the assumption that 95% of a tv picture is redundant, Mr. Coombs spelled out a theory which would permit the scanning of a subject on a sampling basis, with the information broadcast via pulse transmission. Use of this system virtually eliminates noise, Mr. Coombs pointed out. The possibility that a pulsed system sampling only 5% of the picture could be transmitted in one-twentieth the bandwidth was also discussed. At the present time, however, pulse transmission of tv pictures requires a larger bandwidth than the present 6 mc.

Demonstrating some of the equipment used in the laboratory experiments was Richard C. Webb, Colorado Research Corp., Broomfield, Colo.

All set sales up; radio production up, tv down

tv and radio set sales for 1960 surpassed 1959, the Electronic Industries Assn. has announced.

tv sales were 200,000 more for the 12 months of last year than the year before — 5,945,045 compared with 5,748,676.

Production of radio receivers increased in all categories during 1960.

Total tv set production fell back to 5,708,346 in 1960, compared to 6,349,380 in 1959, including tv sets with uhf tuning—428,527 from 435,571. Fm radio production almost doubled—904,766—compared to 540,522 in 1959. EIA year figures:

*Includes 428,527 tv sets with uhf tuners compared to 435,571 such receivers in 1959.

**Includes 6,432,212 auto radios and 904,766 fm radios.

***Excluding auto radios.

Ampex audio-video re-aligns

Ampex Professional Products Co., Redwood City, Calif., has been reorganized into two individual companies to provide separate manufacturing, research, development and marketing facilities for the audio and video products. The audio division has been consolidated into Ampex Audio Co. at Sunnyvale, Calif., putting both professional and consumer audio products under Herbert L. Brown, company manager and a vice president of Ampex Corp. The video part of Professional Products Co. becomes Ampex Video Products Co. L. E. Good, formerly manager of Ampex Professional Products Co., is now manager of the new company.

Technical topics…

New switching system - A new modular switching system composed of flexible, transistorized modules especially geared for use in the television broadcast field, is being produced and demonstrated by Tarc Electronics, Westbury, N.Y., a division of the Gotham Broadcasting Corp. The system, which provides an infinite variety of switching combinations, requires only 35 inches of panel space on a standard 19-inch rack. It is available with either binary (model vs9400), or decimal switching logic control, and may be ordered with less than its full capability and later easily expanded.

Radar and communications - Two new, small, developmental Nuvistor tubes were described by RCA engineers at the American Institute of Electrical Engineers meeting in New York. A high transconductance, general purpose, small signal Nuvistor tetrode (RCA Dev. No. A-2654H), was developed for use in rf, if, and video circuits. A small-signal Nuvistor triode (RCA Dev. No. A-15211) is designed to provide low-noise amplification in uhf.

EQUIPMENT & ENGINEERING

Film sales...

Various feature films (NTA): Sold to CJAY-TV Winnipeg, Man.; CBNT-TV Winnipeg; CFCM-TV Calgary, Alta; CFTO-TV Toronto; CKBI-TV Prince Albert, Sask.; CCFN-TV Montreal, and CJCH (TV) Halifax, Nova Scotia. The Bishop Sheen Program was sold to CKOS Yorkton, Sask., while The Tv Hour of Stars went to CKCO-TV Kitchener, Ont.

Sixty-One for '61 (NTA): Sold to WBZ-TV Boston; KKTU (TV) Colorado Springs; WRAL-TV Raleigh; KCRA-TV Sacramento; WESH-TV Orlando; KMJ-TV Fresno; WDAF-TV Kansas City; KHOW-TV Houston, and KTHV (TV) Little Rock. Now in 65 markets.

Films of the '50's (Seven Arts Assoc.): Sold to KBMT (TV) Beaumont, Tex.; WILX-TV Onondaga, Mich.; WKZO-TV Kalamazoo; WAVY-TV Norfolk, and WTCN-TV Minneapolis. Now in 44 markets.

Miami Undercover (ZIV-UA): Sold to Albers Supermarket for WLWC (TV) Columbus, Ohio; Joseph's Supermarkets in Toledo; Piggly Wiggly Stores, KDUB-TV Lubbock, Tex.; Texas State Optical for KTBC-TV Austin; Rockdale Quarries Corp., WSLS-TV Roanoke; Hanson's Service Station, KVOA-TV; Sarn;k: Richard's Construction and Hart Jewelers, WIMA-TV Lima, Ohio; Knapp Chevrolet and Valley Implement Co., KGBT (TV) Harlingen, Tex., and Lee Optical, KDUB-TV Lubbock. Also sold to WJBF (TV) Augusta, Ga.; KGHL-TV Billings, Mont.; WAST (TV) Albany, N. Y., and KLYD-TV Bakersfield, Calif. Now in 117 markets.

Superman (Flamingo Films): Sold to WREC-TV Memphis; WJW-TV Cleveland; WOI-TV Ames, Iowa; WHYN-TV Springfield; WDAU-TV Scranton; WMFJ-TV Youngstown; KSYD-TV Wichita Falls; KTHV (TV) Little Rock; KPHO-TV Phoenix, and KSL-TV Salt Lake City.
Two new distinguished books come out of BMI's Award Winning Program Series

CONGRATULATIONS! To the more than 1,200 broadcasters who presented these program series over the past several years. You should feel extremely proud of having played a vital role in the birth of these important books on American history.

THE AMERICAN STORY

Edited by EARL SCHENCK MIERS
Published in 1956 by Channel Press, Inc.—$5.00
ALLAN NEVINS, eminent author, historian and twice winner of the Pulitzer Prize, in his Introduction to THE AMERICAN STORY, writes: “The book is unique, also, in that it grew out of an application of scholarly talent to the mass media...These papers, now somewhat revised, first reached the public over the radio. They were heard by audiences which certainly aggregated millions of people.”
BROADCAST ADVERTISING

Charles Fredericks Jr. elected vp of Ogilvy, Benson & Mather, N.Y. Mr. Fredericks, who joined agency in 1956 as account executive, became account supervisor last year. Before joining Ogilvy, he was account executive with The Biow Co., N.Y.

Jay S. Salamon, director of marketing, ASR Products Div., Philip Morris Inc., N. Y., named vp. Wayne M. Biklen, who was general manager of Staunton operations at ASR's main plant in Staunton, Va., also named vp.

Thomas H. Young Jr. appointed vp in international department of Fletcher Richards, Calkins & Holdren, N. Y. He has been working on U. S. Rubber international account for which he continues in addition to new post.

L. L. Trudeau elected vp of Street & Finney, N. Y. Other personnel movements: William C. Whittemore Jr. to S&F as assistant vp and account executive; Charles Reges joins copy department.

Robert Haag appointed vp in charge of sales and member of board of directors at Alberto Culver Co., Chicago. Other promotions: Bernard Katz, national field sales manager; Robert Davis, personnel manager; Sherwin Marter, New York divisional sales manager; Ralph James, Chicago divisional sales manager; Jack Mathis, syndicate sales manager.

Frederick D. Sulcer, manager of tv-radio creative department of Needham, Louis & Brorby, Chicago, elevated to account executive. With agency 14 years, he also has been associate copy director and assistant manager of copy department. John J. Calnan, group head in tv-radio creative department, named to succeed Mr. Sulcer.

Jones Hawley, formerly account executive at Hal Stebbins Inc., joins Eiseman, Johns & Laws, Los Angeles, in same capacity.

Alan Johnson, formerly copy group head, Norman, Craig & Kummel, N. Y., named to same post at Mogul Williams & Saylor, that city.

Anthony J. Amendola, member of field marketing group of D'Arcy Adv. since 1956 and most recently assigned to agency's New York office as eastern region account executive for Anheuser-Busch Inc.'s Budweiser beer, appointed manager of D'Arcy's regional marketing service for Anheuser-Busch. He will headquarter in St. Louis.

John C. Hartsuff, account executive of Gray & Kilgore, Detroit, named vp.

M. A. (Jerry) Souers appointed director of media and shows for General Mills, Minneapolis. He fills vacancy created by death of C. S. Samuelson who died Jan. 26. Mr. Souers formerly was manager of broadcast media and shows.

George Plass, marketing manager of Jell-O Div., General Foods, White Plains, N. Y., named special projects consultant to Herbert M. Cleaves, GF's executive vp—marketing. Succeeding Mr. Plass is Howard R. Bloomquist, who was marketing manager, Post Div., Battle Creek, Mich. James R. Darling, advertising and merchandising manager, Jell-O Div., becomes marketing counselor in corporate marketing area headed by Robert H. Bennett, vp and senior marketing counselor.

Ted Krough and Bob Haumesser named co-creative directors in San Francisco office of Honig-Cooper & Harrington. Fred Herschleb named manager of art department.

Richard Hassell, formerly senior traffic and production supervisor of D'Arcy Adv., New York, named traffic and production manager of D'Arcy's San Diego office.

George H. Ogle, formerly account executive at Benton & Bowles, N. Y., joins Lennen & Newell, that city, as account executive on Colgate-Palmolive.

THE MEDIA

Jay W. Wright, president, of Radio Service Corp. of Utah (KSL-AM-TV Salt Lake City), resigns effective April 1. He will be succeeded by Arsh L. Madsen, assistant executive director of Assn. of Maximum Service Telecasters, Washington (CLOSED CIRCUIT, Feb. 13). Mr. Wright, corporation president since 1959, previously served as executive vp and administrative vp.

Top executive changes announced at PKL

Mr. Koenig Mr. Lois Mr. Grulich Mr. Murphy

In a series of executive advancements at Papert, Koenig, Lois Inc., N. Y., Frederic Papert, president, becomes board chairman; Julian Koenig succeeds him as president; George Lois is named first vp; Norman Grulich becomes executive vp; and William A. Murphy is named vp. Mr. Papert, who began with Messrs. Koenig and Lois in Jan. 1960, was formerly creative supervisor, Kenyon & Eckhardt, N. Y., and copy supervisor, Foote, Cone & Belding. Mr. Koenig, who was copy head, Doyle Dane Bernbach, N. Y., from 1958-60, also served Ellington & Co., N. Y., as copywriter from 1952-58. Mr. Lois, art supervisor, previously served Sudler & Hennesey, Lennen & Newell and Doyle Dane Bernbach, that city. Mr. Grulich, PKL's account supervisor, was with Benton & Bowles from 1955-60 as marketing supervisor on Procter & Gamble, and with Philip Morris from 1952-55. Mr. Murphy, PKL media and research director, previously served W. B. Doner, Baltimore.
NCC elects Rev. Spencer radio-tv board chief

The board of managers of the Broadcasting & Film Commission of the National Council of Churches elected The Rev. Harry C. Spencer of Nashville, to succeed Mrs. Theodore O. Wedel of Washington, D. C., past president of United Church Women, as executive board head. Rev. Spencer, general secretary of the Methodist Television, Radio & Film Commission, will give leadership to the National Council of Churches' Broadcasting & Film Commission, which among other things, is an interchurch liaison with the broadcasting and film industries and carries on a program of religious broadcasting training.

Four new vice chairmen of the commission were also elected: Rev. Roy P. Adelberg, New York, director, Dept. of Visual Aids, Reformed Church of America; Dr. Robert Kirkpatrick of Union Theological Seminary, Richmond, The Rev. Everett C. Parker, New York, director, office of communication, United Church of Christ; The Rev. C. S. Weasner, Indianapolis, executive secretary, department of visual services, United Christian Missionary Society. Lisa Sergio, Washington, D. C., was elected secretary. All officers will serve a two-year term.

Prior to that he was with CBS, New York. He has not announced future plans. Mr. Madsen, in broadcasting since 1933, served at KSL from early 1930's to mid-1940's in various capacities. He was board member of RAB and was named head of its member services department in 1954, position he held until joining AMST.

Ray Golden, formerly program director of KAYO Seattle, named general manager of KPON Anderson, Calif. Other personnel changes: Joe Clark and Dick Knight named account executives and air personalities; Ian Evans and Bill Wooten air personalities; Harry Shelby chief engineer; Neva Ross traffic manager.

James D. Psihoulis, formerly sales manager of WKWK Wheeling, W Va., appointed general manager.

James G. Wells, national sales director of Bisbee Broadcasting Co. (KRUX Phoenix and KTKT Tucson, both Arizona), promoted to assistant general manager.

Charles A. Wilson, manager of sales development, WGN-TV Chicago, named director of national sales, Chicago office, KDAL-AM-TV Duluth, acquired earlier this year by WGN Inc. (Broadcasting, Jan. 23). Mr. Wilson also has been named director of sales, farm division, WGN Inc., to implement all sales efforts involving farm programming on WGN-AM-TV. He has been with WGN since 1948.

Stephen Q. Shannon Jr., director of promotion for KPHO-AM-TV Phoenix, named assistant to executive vp of Meredith Broadcasting Co., Omaha. Mr. Shannon has been associated with Meredith since 1954.

Charles R. Sanders, formerly manager of Sears-Roebuck, Spartanburg, S. C., appointed assistant to president of Spartan Radiocasting Co. (WSPA-AM-TV, that city).

Harry H. Haslett, formerly manager of WSID Baltimore, transferred to New York as manager of WBNX. Both stations are owned by United Broadcasting Co. Before joining UBC, he was associated with WBAL-AM-TV Baltimore.

John C. McCloy appointed director of sales for Arizona Network (encompassing some 10 stations throughout state). He has been member of sales staff of KOY Phoenix, key station of network. Before joining KOY he served in executive capacities at KDKA Pittsburgh, Wkat Miami, and WROK Rockford, Ill.

Clyde D. Pemberton, local sales manager of KFIZ Fort Worth, retires. Charlie Temple, formerly salesman, promoted to vacancy. Other personnel changes: Vandy Anderson to announcing staff; Aileen Spradlin to continuity and production office.

Sam Feigenbaum joins sales staff of WEJL Scranton, Pa.

Bill Beaton, general manager of KWKW Hollywood, Calif., resigns to head financial group which plans acquisition of Southern California radio properties and affiliated interests.

Norman P. Bagwell, vp and manager of WKY-TV Oklahoma City, elected president of Oklahoma Television Assn. Bill Swanson, vp and manager of KTUL-TV Tulsa, elected vp and

Could it be HIGH BLOOD PRESSURE?

Many men—and women, too—are asking themselves this question.

If you think you have high blood pressure, see your doctor. Only he can tell.

Thanks to recent medical progress, most cases of high blood pressure can be controlled. The danger of heart damage and "stroke" can be reduced with the help of new drugs and surgery.

For medical advice, see your doctor.
For more information, ask your Heart Association.
For greater advances against heart disease,

GIVE to your HEART FUND

Jacques DeLier, assistant manager of KWTV (TV) Oklahoma City, re-elected secretary-treasurer.

Ray Hard appointed station manager of WBMI (FM) Meriden, Conn.

Robert Rafelson joins ABC-TV as manager of program development. Mr. Rafelson, who was formerly story editor and writer for *The Witness* on CBS-TV, will be assistant to Dan Melnick, vp of program development. Mr. Rafelson also served as story editor and adapter of 30 plays for *Play of the Week*, WNTA-TV New York feature, as well as writer and associate producer, Talent Assoc., N. Y., and director of advertising and promotion, CBS owned stations.

John W. Parham, formerly with New Orleans Times-Picayune, joins WDSU-TV, that city, as member of sales department.

BROADCASTING, February 20, 1961
Collins — the perfect answer to automatic tape programming and a first step toward complete station automation. Just insert the tape cartridge, push one button, and the program is on the air, on cue. Automatic tape programming with Collins equipment means perfection in recording and playback. Its quality is absolutely unmatched by any cartridge tape unit anywhere.

Collins Radio Company • CEDAR RAPIDS, IOWA • DALLAS, TEXAS • BURBANK, CALIFORNIA

syllable-separating start and stop time of less than 0.1 second • 7½ inch per second tape speed • frequency response: 200Hz to 15kHz • 12,000 sq. ft. of recording, monitoring and master control facilities available. For information contact your Collins broadcast sales engineer or write direct.
Help Wanted—Management

You may be an assistant, or a full-fledged sales manager, who is old fashioned enough to believe in loyalty to your old employer, yet young enough to have initiative and real estate for selling yourself and your station. One reason you would leave your present job is because you find little opportunity for advancement. You have had some years of radio sales experience, and have a fair knowledge of the industry. You are ready to take a management position and your stepping stone to becoming a major metropolitan California fulltimer. You will become a major market radio salesman for Alert, aggressive man who can assist in news stations. Send complete resume to Gene G. Cook, WHY 563 North Orange Ave., Orlando, Fla. Good salary, plus commissions for sales manager. Send full information to M. Wirth, WHMI.

Florida's Number One Country music station needs sales manager. New modern approach to country music has made us a strong force in this market. Send complete resume to Gene G. Cook, WHY, 563 North Orange Ave., Orlando, Fla.

Experienced salesman familiar with small market operations for commercial manager. Send full information to M. Wirth, WHMI.

Big W-RIP, Chattanooga, Tennessee. Big opportunity! Salary, commission.

Sales

Excellent opportunity for good producer. Must have 5 years experience, preferably in broadcast. Excellent salary plus commission, plus benefits. Box 390D, BROADCASTING.

South Florida metro market. $100.00 week plus 15% weekly collected sales of $500.00 or more. Excellent territory! Send resume to Mr. Perchik, WTEM-FM, Ft. Lauderdale, Fla. Radio sales experience, plus commission, to successful candidate. Box 530D, BROADCASTING.

Keep your job! Easily earn $100 or more a week with a very fast new radio! It moves...it talks...it sells! Absolutely unique. Great opportunity. Box 530D, BROADCASTING.

Salesman-business manager. Age 30-40 for large California commercial radio station. Strength in selling and leadership essential. Generous earnings with outstanding opportunity for alert, aggressive man to demonstrate he is worth more. Write full information, background, references and resume to Box 530D, BROADCASTING.

How successful TV stations handle unsold time . . .

7 steps that increase the effectiveness of TV station time salesmen

STEP 1 ARB LOCAL MARKET REPORTS—This industry standard is a basic ingredient in any station's sales effort. As a complete quarter-hour measure of television audience by both metro and local area, this report provides each and every station in the country with data that is recognized throughout the industry as the ultimate in accuracy, reliability and believability.

STEP 2 ARB 1960 COVERAGE STUDY (with Totals Updated to November 1960)—Station coverage strength in areas of importance to your marketing program is essential . . . and ARB's full county-by-county report documents your station story. Updated station totals based on November 1960 survey results are also available for stations where changes have occurred since the basic study was made.

STEP 3 SPECIAL TABULATIONS—Demonstrating to a timebuyer how the cumulative audience for your spot package ranks with the "Gunsmokes" and "Wagon Trails", makes extraordinary sales (dollars and sense). Dozens of other specially tailored ARB tabulations can have equally effective results for your specific needs.

STEP 4 OVERNIGHT COINCIDENTAL REPORTS—New program or new time period availabilities occurring between ARB market reports receive quick audience documentation with a special ARB Telephone Survey. Results are available overnight . . . in time to whisk them off to the timebuyer's office for a "proof of performance" sales presentation.

STEP 5 SPECIAL SURVEYS—Studies of your picture quality in competitive fringe areas . . . . analysis of farm audience delivered . . . or a report on audience reaction to your news programming are but a few of the special areas where your efforts to inform the buyer will turn the trick in your favor.

STEP 6 ARB TV-NATIONALS—This complete and qualitative report on the audience to all network programs will greatly aid the local network affiliate in selling surrounding time spots to the "specific audience" conscious buyer. A wealth of detailed information in the TV-National complements the ARB Local Market Report, especially in sales presentations.

STEP 7 MULTI-CITY ARBITRON—Local network affiliates who receive this report daily are kept up to date by this competitive program index. Fast rising new programs are spotted immediately, and local spot adjacencies are sold just as quickly when such evidence is presented to the buyer.

The next step should be taken in the direction of your telephone to contact your ARB representative. And, may we remind buyers that all these steps will work equally well for you in evaluating your present or planned TV campaign.

Broadcasting, February 20, 1961
OUR RESPECTS to Bernard Gilbert Hoberman, vp, gen. mgr., KABC Los Angeles

It took him 20 years to get back to the West Coast

Last May, Ben Hoberman became general manager of KABC Los Angeles, ABC-owned radio station. On Aug. 1, KABC inaugurated a new program format which turned its back on the music-and-news pattern predominant in the L.A. market in favor of a conversational format. Ratings improved and, more importantly, billings for the final five months of 1960 were up 12% over the same period of 1959. Early in January, Mr. Hoberman was made a vice president of ABC.

That capsule success story, while covering only a few months of the history of Bernard Gilbert Hoberman, epitomizes his career in broadcasting, which is to say, his life. For from the age of 10, Ben has known that the world of broadcasting was the only one for him. In high school in his native Chisholm, Minn., his chief extra-curricular activities were dramatics and public speaking. The aptitude tests showed him no further than parts in school plays, but his oratorical talents made him Minnesota champion in the National Forensic League competition two years running. In 1939, the NFL national finals took him to California for the first time. "I spent many moments during the next 20 years trying to figure a way to get back," he said last week.

On-the-Job Education • Ben got his start in radio as an announcer-salesman at WMFG Hibbing, Minn. (not far from Chisholm and about twice as large). "I began hanging around the station in 1940," he recalled, "and in 1941 they put me on the payroll." He was 18 at the time (for the record, his birth date is July 21, 1922). The job at WMFG forced him to make a difficult decision. On graduation from Chisholm High, he'd been offered scholarships at Northwestern and Drake. "If they'd had courses in radio as they do today there'd have been no problem," Ben commented. "But they didn't. So after some earnest soul-searching I decided that since radio was going to be my career I'd stay where I was and get my education on the job."

But World War II came along and in November 1942 Ben enlisted as a private in the Army. Far from interrupting his career in radio, military service brought him a chance for experience far beyond what he had left behind. Assigned to the Armed Forces Network, Ben worked at AFN headquarters in London until late in 1944, when he was sent to Paris to put AFN's first continental station on the air. Next, he had charge of a mobile station that traveled with the First Army until the end of the war in Europe. En route, Ben received a field commission and became a lieu-

tenant. After VE Day, he moved to Munich to build an AFN station there. This was the day, decided most powerful station, with two 100 kw transmitters, one in Munich, the other in Stuttgart, linked to get its programs on the air.

Wartime Troubles • On June 10, 1945, at 5:55 a.m., the new station began operations with this sign-on announcement: "This is the Armed Forces Radio Network, Seventh Army, Munich." One listener, Gen. George S. Patton Jr., shaving as he listened, cut himself, swore and threatened to court-martial the announcer (Maj. Robert M. Light, now president of the Southern California Broadcasters Assn. of which Ben is an active member) and everyone else connected with the operation for not knowing that the previous night Gen. Patton's Third Army had replaced the Seventh in the area.

Less than two months later, Ben, officer of the day, decided to try and find out how much truth there was in the persistent rumors that the war with Japan was about to end. He picked up the phone and talked to a Japanese military attaché in Berne, Switzerland, who, between sob's, said he had been in contact with Tokyo and it was indeed true that the war was over. Ben passed the news to headquarters in London, which informed the rest of the world, and sat back, proud of a job well done. But instead of praise he was told (jokingly) that in contacting the enemy on his own authority he'd violated a basic rule of conduct and was sure to be court-martialed.

Peace-time Pays off • But again he was lucky and for several months more he stayed in Munich. He then returned to Paris to head the entire French AFN network of 12-15 stations, to which the British operation was added.

The end-of-the-war incident had more lasting effects, however. Lt. Col. John S. Hayes, then head of all broadcasting to American troops in Europe (now president of the Washington Post Broadcasting Div.), told the story to a group of broadcasters making an inspection tour of the European Theatre. One of them, Harry Wilder, was so impressed by Ben's alert aggressiveness that he offered him a job when he got out of service. And so, in 1946, Ben became assistant general manager of WELI New Haven, Conn.

Another member of the broadcasters' party was Morris Novik. At his instigation in 1948, Ben and his bride, Jacklyn Ann Kanter of Duluth, moved to Detroit. Here Ben put WDET (FM) on the air for the United Auto Workers, which Mr. Novik served as radio consultant. Ben stayed on as general manager for two years. "We won several awards but very few advertising contracts," he remembers.

Into TV and Back • So, in 1950, Ben left WDET, and radio to become Detroit's first full-time tv salesman, for WXYZ-TV. In the next eight years he picked up a number of competitors but he also picked up enough business for WXYZ-TV to make a very comfortable living for the Hoberman family, which by now included three youngsters. "I'd probably still be there," Ben observed, "if Jim Riddell, who hired me, hadn't gone to New York as executive vice president of ABC. He persuaded me to go there too as manager of WABC. Then he moved west and I reminded him that I wanted to get out there. So last spring when the KABC job opened up, he asked me if I wanted it and here I am.

Ben, Jacklyn, Tommy (10), David (8) and Joan (6) now make their home in Brentwood, about a half-hour's drive from Ben's office. "The first thing I did was to build a pool. Swimming in it is my main exercise," he said. "That, and an occasional game of golf are all I have time for." Reading, mostly material pertaining to his business, takes up many evening hours. Aside from SCBA, Ben's only memberships are in the Hollywood Advertising Club and the Radio & Television Executives Society of New York.

Proud of KABC's record in 1960, prouder still that in the first three weeks of 1961 the station signed as much new business as had been added in the first three months of last year, Ben has just extended the conversational programming into the evening hours and foresees even better results in the months ahead.
Shock treatment

WHEN Gov. LeRoy Collins was called a few months ago to the presidency of the NAB, he was told that broadcasting, above all, needed strong leadership. He delivered that leadership a fortnight ago with a declaration of policy to the NAB board of directors that has most broadcasters talking to themselves.

Broadcasting needed a shock treatment. Gov. Collins didn't spare the kilowatts. If his bill of particulars as to shortcomings seems extreme (and it is, in our view) it nevertheless will have served its purpose if it awakens broadcasters from their deep slumber. Adjustments in Gov. Collins' "positive program" can be made to meet the true circumstances. If only half of his goals can be achieved in the next two years, he will have fulfilled his leadership pledge and earned the right to a five-year extension of his contract, along with the everlasting gratitude of the profession.

Gov. Collins, we think, overstated his case in some particulars. We question, for example, whether broadcasting is in mounting public disfavor. More people are listening and viewing than ever before.

The Magnusons, the Pastores and the Proximires, as well as others in Congress, have been glowing in their praise of news and information programming since the political conventions and the elections. President Kennedy would not want live pickups of his news conferences if broadcasting were in disrepute. If Gov. Collins had confined his appraisal of disfavor to specialized groups—the intellectuals who do little viewing or the professional critics—he would have been right. Minority segments are always critical of all mass media and, what's more, of all advertising.

Gov. Collins, we think, also overstated the case against research and rating services, obviously and understandably based on a lack of knowledge of their overall functions. The broadcaster isn't responsible for the creation or the operation of the services, which admittedly have shortcomings and which admittedly have a powerful hold on the economics of broadcasting. Broadcasting's customers—the advertisers—demand and, to a degree, underwrite the projections into audience research. They demand much more than the bare audience ratings.

Again, we agree that while the rating indictment is overstated, the need does exist for a thorough reappraisal so that broadcasters will have more of a voice in their own economic well-being.

Between now and the NAB convention in Washington in May, there will be many arguments about Gov. Collins' shock treatment. Should he have released the text and thus given to broadcasting's adversaries a check list? Should he have held his fire until he had more experience on the job? Was his pronouncement a well-timed bid for leadership or was it a premature pitch for czardom? Whatever the answers, Gov. Collins has asserted the leadership expected of him. His instincts are good.

In our judgment, he has already earned the status of broadcasting's spokesman.

Broadcasting's 1961 assignment

IT WOULD be over-simplification to say that radio and television can sell America out of the slump, but it would be difficult for recovery to take place without an enlargement in the volume and improvement in the quality of radio and television advertising.

That, it seems to us, is the principal message of the information assembled in the special section of this issue that we call 'Perspective '61.'

The American economy is an instrument so complex and delicate that no body of diagnosticians can come to unanimous agreement on its ills when something goes wrong. Indeed there are some businessmen who say that current talk of a recession is nonsense. They are in the minority, however, and we must side with the larger number of business leaders and economists who are concerned, in some measure, over the figures on unemployment, dwindling retail sales and lagging production that prevail in some parts of the country.

But it is evident that the recession can be cured. The question seems only to be how long it will take for the cure to become effective. The time of cure, it seems to us, can to an appreciable extent be decided by radio and television and the advertisers who use those media.

The unemployed can be put to work and idle factories restored to production only if consumers who have money can be persuaded to spend it. The activation of that spending is a function of advertising. The function will be best performed if broadcasters and broadcast advertisers take the maximum advantage of the great persuasive powers that are uniquely radio's and television's.

Double reason for sales effort

ONE component of the broadcasting structure has a particularly difficult selling job to do in 1961. It is fm.

The story of fm broadcasting's recent growth in circulation and diversification in programming is told in detail elsewhere in this issue. But the fm story has one unhappy note. The medium's advertising income is failing to keep pace with other measurements of its expansion.

The lag in income is the fault of fm broadcasters themselves. They are failing to utilize on their own behalf the selling skills they are supplying, in some cases with conspicuous success, to the advertisers they have managed to attract.

Fm desperately needs the strongest push its operators can supply. It needs to provide agencies and advertisers with the facts on which buying decisions can be made. At this point of fm development the medium lacks the resources to build an industry-wide selling agency as big as am radio's RAB or television's Tvb. But it ought to be able to scrape together enough money for some kind of centralized sales effort.

Absent a discernible improvement in the selling of fm, the service will have to live on the leavings of other advertising media. The leavings aren't enough for fm to grow big on.
KPRC-TV SELLS SO MANY HOUSTONIANS, A BLOODHOUND COULDN'T FIND THE ONES IT DOESN'T!

No "ifs" about KPRC-TV. KPRC-TV keeps Houstonians tuned to Channel 2 up to 27 hours a day! And not just by tricking them with hoopla and gimmicks. KPRC-TV helps persuade all Houston—all day and night. That's selling power! KPRC-TV is the neatest, fastest, easiest-to-use salesman you ever laid hands on. Try great new KPRC-TV selling!

Represented nationally by EDWARD PETRY and COMPANY
Perseverance and faith in a new concept are the basic elements which help to create progress. Frank Lloyd Wright believed in the architectural concept that form should follow function. And his perseverance in face of strong opposition was justly rewarded. Today his great "know how" is reflected in more than thirty states. In all facets of our present-day business world it becomes evident that those firms who fully utilize their collective "know how" are the ones justifiably rewarded by the new business it creates.
