Here's how to make it:

Fill Old Fashioned glass with ice cubes. Pour in 1 oz. brandy or cognac, ½ oz. rye whisky, grenadine syrup to taste and a squirt of seltzer water. Twist piece of lemon peel over drink, stir and serve on rocks. If you prefer, prepare it with crushed ice in shaker, blend, strain and serve as a cocktail.

WWL-TV... new
New Orleans Favorite

The best known railroader in these parts, Brakeman Bill, hosts WWL-TV's big new afternoon kid show Monday through Friday 4:30 - 5:45. He's a model railroad engineer, and his fabulous train layout is the envy of every child's eye. Big entertainment package includes Popeye and Bugs Bunny cartoons, too.

In the New Orleans market Brakeman Bill puts you on the inside sales track with the kids and their moms. Ask Katz for details.

As served at Maylie's, tensions fade away.

Cox takes over April 9

Kenneth Cox, Seattle attorney and special counsel for Senate Commerce Committee during recent TV investigations, formally will take over as FCC's new general counsel April 9 (see story page 46). John L. FitzGerald, currently general counsel, will be eligible for retirement from government service April 4 and, while nothing is said formally, it's believed changeover dates were arranged to allow this. Mr. Cox accepted general counselship at urgent behest of incoming Chairman Newton N. Minow.

RTES Awards in absentia

President John F. Kennedy and his erstwhile Republican opponent, Richard M. Nixon, will jointly receive Radio-Television Executives Society Gold Medal Awards March 9 in absentia. Accepting award for President will be J. Leonard Reinsch, executive director of Cox stations and Mr. Kennedy's communications adviser, while Herbert G. Klein, editor of San Diego (Cal.) Union and Mr. Nixon's press secretary during campaign, will receive award in behalf of former vice president. Twenty-first anniversary dinner of RTES will be held at Waldorf-Astoria.

Awards to party leaders will be based on their notable contributions to "bring to maximum fulfillment the potentials of radio and television as instruments of public service, education and information" during Presidential campaigns. Also cited will be record vote in elections and extraordinary large audiences which tuned in broadcast appearances, attesting "to the outstanding service rendered by radio and television." Candidates will be saluted for "courageous cooperation" and for their respect "for the importance of direct communications with the American voters through radio and television."

Battle of millions

No sooner did ABC-TV get word around at week's end that it already had $73 million in business on books for 1961-62 season than NBC-TV was countering with disclosure it could "easily" count up $94 million worth of its quick-firing fall schedule. NBC-TV claims $39 million in till for Sunday night alone (RCA and other advertisers have new Walt Disney show at 7:30; Procter & Gamble has new show called Snow White at 8:30; Chevrolet has Bonanza at 9-10, and duPont has new Show of the Week at 10. Other sales reports at NBC-TV place Sing Along with Mitch on Thursday, 10-11, as already three-fourths sold and minutes being purchased at good pace in new feature film—Saturday Night at 9 show.

Oliver Special offered

Talent Assoc. is talking with networks and/or advertisers for sponsorship and time slot for 90-minute dramatic TV production of Les Miserables. TA has Sir Laurence Olivier interested in doing drama. It was Sir Laurence and Talent Assoc. that combined to produce prize-winning Moon and Sixpence, shown last season as one-time special on NBC-TV.

Decision on clears?

That archaic clear-channel case was back before FCC last week — and is scheduled to return again in immediate future with strong possibility of final disposition at that time. Commission's thinking has changed considerably, however, and plan now is to consider break-down of clears on case-by-case basis. Under present alignment proposed new station on clear must have coverage area 25% of which is presently without nighttime service. Feeling is that admitted deterioration of some clear signals which would result would be outweighed by additional new service. New stations would be class IB's with required power of 50 kw.

Non-alcoholic and non-code

Holland House Sales Co., New York, whose attempt to place commercials for its non-alcoholic cocktail mix on WPIX (TV) New York was frustrated at suggestion of NAB TV Code Board (Broadcasting, Oct. 3 et seq.), is understood to be so "favorably impressed" with TV advertising over WNTA-TV New York, non-code station, that it's planning to advertise on other non-code stations. But Holland House first will evaluate results at WNTA-TV, including report that not single complaint has been received about its commercials. Company already has renewed on that station after first 13-week cycle and now is on rate-holder during Lenten period.

Witness warned

Justice Dept. and FCC have agreed on course of action if subpoenaed witnesses fail to show up with records and testify at March 8 continuation of programming hearing in Los Angeles (Closed Circuit, Feb. 20). At special meeting Thursday (Feb. 23), government spokesmen made plans to institute immediate contempt proceedings in court if walkout occurs. FCC Network Study Chief Ashbrook Bryant and assistant Ben Zelenko left Friday for West Coast to prepare for hearings.

Space on agenda

Under aegis of space Commissioner T. A. M. Craven, FCC plans to issue policy inquiry within next few weeks on mechanics of getting space communications operative. Respondents will be asked to comment on problems involved, including antitrust, initial capital investment in placing satellite in orbit and cooperation with government. It now is anticipated that all common carriers who desire can participate in end product on reasonably competitive basis. FCC has been working out problems jointly with NASA and general agreement has been reached. Comments on technical phase of operation are due Wednesday (March 1).

Same color tube

First reports that Zenith color sets (see story page 23) will utilize new picture tube appear without foundation. Zenith executives refuse to elaborate on announcement sets will include "technical innovations" and new Zenith-developed color demodulation system employing new tube. However, unofficial word from RCA has it that three-gun RCA color tubes will be used.

Union rebellion

Opposition to wide-spread acceptance of Fairchild Camera Corp.'s successful 8mm TV news camera (see story page 67) is said to be brewing in engineering unions. New camera, one man sound and film operation, requires no sound engineer.

Collins research

It hasn't been advertised, but NAB President LeRoy Collins' interest in ratings methodology has led him right into files and computers of major research firms. Last week he made inspection tour of American Research Bureau in Beltsville, Md. Earlier he visited A. C. Nielsen Co., Chicago.
Every important food chain uses WDAY-TV, Fargo!

These four big food chains make approximately 75% of ALL the retail food sales in the big WDAY-TV area—and that 75% equals nearly $116,000,000 per year!

Advertising isn’t the whole answer, of course, because the Fargo area is a fabulous one. But it is significant that the four important food chains in the area all use WDAY-TV on a year-round basis.

Certainly you can be sure that the biggest merchants in North Dakota know a lot about the best media values! Ask PGW for all the facts!

Broadcasting, February 27, 1961
programming standards of a television station are exposed every minute of every hour of every day. All you need do is look to see that WPIX-11, New York’s Prestige Independent, has the “network look” ... network-proved and network caliber programs night after night. Programs like M Squad, Air Power, the Honeymooners, Mike Hammer, You Are There. When you, the advertiser, painstakingly produce TV commercials, you have a right to expect they will be presented in programs that do justice to your product and your company. WPIX-11 is the only New York Independent television Station qualified to display the Seal of Good Practice.

where are your 60 second commercials tonight?
FCC OKAYS PAY TV TEST, SETS CHECKS

RKO General ready to move; opponents undecided on appeal

Gleeful RKO General officials were preparing Friday to shift Hartford, Conn., pay tv plans into high gear, after issuance of FCC decision authorizing three-year trial of subscription tv over ch. 18 WHCT (TV) Hartford.

Order, which was tentatively approved last January (BROADCASTING, Jan. 23), includes several conditions, but none was unanticipated, according to RKO General executives and lawyers.

FCC turned down objections fired at proposal by Connecticut and Hartford theatre owners, generally on ground their fears pay tv might be against public interest cannot be tested until trial has taken place. Movie lawyers were unable to say whether they would appeal, pending study of FCC document.

If no further legal actions are taken that would force RKO General to cease preparations, first pay tv service should be initiated this fall. Plans call for start of direct-payment tv service when 2,000 subscribers are signed. RKO General plans to spend up to $10 million on demonstration, although it expects to lose $1 million overall.

Mostly Movies • Bulk of programs will be motion pictures, to be provided daily during evening hours. Charges will range from 25 cents to $3.50. Goal is 50,000 subscribers.

Trial is being undertaken in cooperation with Zenith Radio Co., which will manufacture encoding and decoding equipment, and Teco Inc., holder of Phonevision license from Zenith. Teco also will attempt to provide program material.

Conditions placed on test were not as severe or rigorous as expected in some quarters. Commission directed RKO General, among other things, to screen all promotional material carefully so as not to misinform public that pay tv is regular service. This would apply also to publicity issued by Zenith and Teco. It asked RKO General to maintain file of all agreements, commitments and understandings with third parties, concerning programs, for inspection by commission.

Suggests Surveys • It recommended that RKO General make before-and-after surveys of television viewing in area, but did not require this.

Commission found favorable RKO General's promise to set up "Committee of 400" comprised of variety of local viewers to help in planning programming.

Whether pay tv will cause diversion of programs from regular tv cannot be answered with assurance, FCC stated. Test itself will provide final answers, commission observed. Commission also indicated that it would watch carefully licensee's responsibility for pay tv programming as just as agency concerns itself with this provision in regular tv field.

FCC names Cunningham for Orlando tv rehearing

FCC Chief Hearing Examiner James D. Cunningham will preside at rehearing of Orlando, Fla., ch. 9 case, agency announced Friday (Feb. 24).

Ch. 9 grant to Mid-Florida Tv Corp. (WLOF-TV) was one of several remanded by Court of Appeals following revelations of ex parte representations during congressional hearings. Commission said designation of Examiner will not take effect until it has been approved by court.

Mr. Cunningham will serve in lieu of retired Pennsylvania Judge Horace Stern, who sat for rehearing of four other ex parte cases. Other party in Orlando proceeding is losing applicant, WORZ Inc.

Philip Morris pulls two accounts from DDB

Philip Morris Inc.'s sudden withdrawal of its cigarette account brands—Alpine and Benson & Hedges—from Doyle Dane Bernbach Inc. had turned more than $4 million worth of billings loose on advertising market over past weekend.

Joint statement tersely claimed "mutual disagreement on policy." Alpine, which landed with DDB year ago as new product, accounted for most of $4 million in billings, with about half in radio and tv spot as well as network tv. Billings for Benson & Hedges, DDB account since fall of 1959, was mostly in print, but some was in network tv and spot. With sales for both products steady, the shift would seem to be another consequence of conflict of interest chain reaction started last January when A.S.R. Products, division of Philip Morris, handed its razor and blade account to Benton & Bowles (BROADCASTING, Jan. 23, 1961). Schick Inc. subsequently left BB & went to Norem, Koenig & Kummel, which in turn lost to DDB its Ronson lighter account (Ronson also makes shaving products). It was likely Philip Morris felt conflict interest was created by DDB's association with Ronson (even though Ronson's shaving account is with Papert, Koenig, Lois Inc.).

Court enjoins unions from KXTV (TV) boycott

Injunction restraining two unions from activities designed to influence sponsors and agencies against KXTV (TV) Sacramento, Calif., Corinthian station, granted last Feb. 23 by U. S. District Court, Northern Div., Calif.

Restraining order affects American Federation of Television & Radio Artists and National Assn. of Broadcast Employees & Technicians. Unions struck station last September. They are charged with joint campaign to bring about boycott of advertisers. Proceedings also are pending before National Labor Relations Board.

Burns, Ford to testify at Senate etv hearings

John L. Burns, RCA president, and FCC Chairman Frederick W. Ford will testify at Senate Commerce Committee hearings Wednesday and Thursday on etv bill ($ 205).

Others scheduled to appear include Sen. Lee Metcalf (D-Mont.); Joseph Baudino, vice president, Westinghouse Broadcasting Co.; Loren Stone, manager, KCTS (TV) Seattle, Wash.; John C. Schwarzwalder, manager, KTCA-TV

Was lens broken?

People who watched Eyewitness to History on CBS-TV Feb. 17 expecting to see full half-hour of intimate glimpses of President Kennedy at work in White House may have been somewhat disappointed. Only small portion of program was devoted to candid-type shooting, while films did not appear to come up to quality expectations. Reports that cameraman taking film shot most of it with broken lens were denied by CBS, but network spokesmen admitted that extreme and unexpected difficulties were encountered. As result some of film was not quite up to standards, making editorial selection stringent.
WEEK'S HEADLINERS

Earl W. Kintner, chairman of Federal Trade Commission during that agency's plunge into payola scandals and campaign against purported tainted TV demonstration commercials, to private law practice in Washington after successor, Paul Rand Dixon (Broadcasting, Feb. 13), is sworn off, expected before end of March. Mr. Kintner, FTC career lawyer, joins Washington law firm of Berge, Fox & Aren, whose name will be changed to Fox, Aren, Kintner, & Plotkin. Last named is Harry Plotkin, former assistant general counsel of FCC who resigned in 1951 to join law firm of Arnold, Fortas & Porter (Paul Porter is former FCC chairman) and moved over to Berge firm in 1955.

William P. McSherry named to new job of national news editor for television of ABC News and John Scali Washington diplomatic correspondent. Mr. McSherry has been with ABC News since 1943 as writer and editor. In his new post he will coordinate expanded TV activities, reporting to John T. Madigan, ABC director of news and public affairs. John Scali joins ABC Washington Team (CLOSED CIRCUIT, Feb. 20) after 15 years as AP diplomatic reporter. He covered Eisenhower visits abroad, Krushchev visits here and filed firsthand account of TV "Kitchin Debates" between Nixon and Krushchev. Mr. Scali is past president of State Dept. Correspondents Assn.

Vernon Burns, vp of NTA International Inc., appointed general manager of National Telefilm Assoc., parent company, with responsibility over all NTA divisions. He represented NTA in England from 1955-58 and was placed in charge of NTA International's European Operations in 1958. Subsequently he was named vp of division. Ted Steele, general manager of WNTA-AM-FM New York, named vp in charge of these stations. He joined stations last year after many years as air personality. In addition to his duties at WNTA-AM-FM, Mr. Steele serves as host on two WNTA-TV programs, Ted Steele Dance Party and Don't Call Us. Earlier, Mr. Steele had been personality on WOR-AM-TV New York.

Josef C. Dine named director of information and special services, CBS News. Mr. Dine will maintain liaison with all CBS press information departments, while assisting in formulation of policies relating to information concerning CBS News. Mr. Dine has been associated with Pat McDermott & Co., pr firm. He previously headed his own pr firm, Dine & Kalmus, and from 1949 to 1952 was director of press department for NBC.

Sig Mickelson, resigned president of CBS News (Broadcasting, Feb. 6), to Time Inc. Broadcasting Div., New York, to "assume broad responsibilities for Time Inc. plans in the fields of international broadcasting and broadcast news." Announcement by Time broadcasting vp Weston C. Pullen Jr. said Time has been actively looking into world broadcasting since last fall and cited Mr. Mickelson's activity in European broadcasting union over years. At Time he will coordinate with Frederick S. Gilbert, general manager of Time-Life Broadcast, and with overseas division of Time Inc. Move comes shortly after publisher's broadcast division opened New York news bureau under ex-NBC and CBS writer-producer Richard McCutchen to supplement Washington bureau headed by John W. Roberts. Mr. Mickelson had been with CBS 18 years when he left this month, starting at WCCO Minneapolis, then owned by network, and had headed CBS News Div. since 1954. He left after organizational change that placed CBS News under supervision of CBS Inc. Committee.

Stations owned by Time Inc. are KLZ-AM-TV Denver, WFBM-AM-FM-TV Indianapolis, WTCM-AM-TV Minneapolis and WOOD-AM-TV Grand Rapids, Mich.

Minneapolis-St. Paul; Mrs. R. Hornig, Greater Cleveland Television Assn.; Morton Zimmerman, president, ELECTRON Corp., Dallas, Tex.; Raymond Hurlbert, general manager, Alabama Educational Television Commission; Mrs. Edmund Campbell, Greater Washington Educational Television Assn.; Lawrence Dennis, chairman, Joint Ocinic on Educational Television; Dr. Charles Bone, superintendent of public instruction, Pennsylvania; Dr. Earl Jorgensen, director, Montana Educational Television Project, Montana State U.; George Brain, superintendent of schools, Baltimore; and Mrs. Allyson Bell, legislative associate American Assn. of University Women.

NAB opposes UPI request

United Press International proposal to FCC asking 25 kc band reserved for UPI exclusively to cover special events (Broadcasting, Feb. 6) aroused ire of NAB in comments filed Friday.

Frequencies requested (161.625-161.650 mc) are currently reserved for broadcasters' remotes. NAB said broadcasters need more frequencies, not less, in this area. Trade association pointed out UPI had cited only rare cases when it needed space and that it had got FCC special authority for those occasions. Broadcasters' need for this space is constant—particularly on special events occasions when remotes might conflict with UPI plans, NAB said.

Thomas asks am dropout

Applicant for 250 w daytimer in Greenville, Tenn. (1450 kc), Friday requested that his application be dismissed without prejudice and that his agreement for partial reimbursement by remaining applicant be approved. Norman A. Thomas was party wishing to drop out of hearing. Agreement with Greene County Broadcasting Co. Inc. provides that $2,500 be paid him from some $4,000 of listed expenses.

Cowan group discusses $800,000 buy of WFDF

Negotiations are near agreement for sale of WFDF Flint, Mich., by Trebit Corp. to group headed by Daniel Cowan, New York investment banker, at price around $800,000. Trebit is publicly held company, controlled by Harry M. Bitner Jr. and family. Bitner family at one time owned radio and TV stations in Indianapolis, Grand Rapids and Minneapolis, but sold them to Time Inc. in 1957 for record $15,750,000. WFDF was founded in 1922, operates on 910 kc with 5 kw day, 1 kw night, and is affiliated with NBC.

BROADCASTING, February 27, 1961
DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

Feb. 28-March 1—Pacific Electronic Trade Show. Great Western Exhibit Center, Los Angeles (components show).

*Feb. 28—ASCAP, West Coast membership meeting. 4 p.m., Beverly Hilton Hotel, Beverly Hills, Calif.

MARCH

March 1—San Francisco Advertising Club, luncheon. Speaker: Leonard Goldenson, president American Broadcasting-Paramount Theatres on international broadcasting and its relations to world trade and the American economy.

March 3-4—VHF translator conference sponsored by DXing Horizons. Hotel Utah, Salt Lake City.

March 7—Radio & Television Executives Society, Hawaiian Room, Hotel Lexington, N. Y. 12:15 p.m. Time buying and selling seminar.

*March 8—Hollywood Advertising Club, workshop on “How to Make a Good TV Commercial.” Hollywood Roosevelt Hotel, 11 a.m.-2 p.m.

*March 8—Publicity Club of Chicago, Sheraton Towers, Chicago. 12 noon. Pierre Salinger, news secretary to President Kennedy, is guest speaker.

March 8—Resumption of FCC hearing on radio and tv network broadcasting, with Chief Hearing Examiner James D. Cunningham as presiding officer, Courtroom of U.S. Court of Appeals, U.S. Courthouse and Post Office Bldg., St. Louis, Mo.

March 9—Radio & Television Executives Society of New York annual banquet. 7:30 p.m., Grand Ballroom, Waldorf-Astoria Hotel, New York City.

March 13—New deadline for filing comments on FCC proposed rulemaking concerning requirements for frequency monitors. Replies due March 23.

*March 15—Bureau of Broadcast Measurement, annual meeting. Hotel Vancouver, Vancouver, B. C., Canada.

*March 15-18—Assn. of National Advertisers, annual West Coast meeting. Santa Barbara Biltmore Hotel, Santa Barbara, Calif.

March 20-23—Institute of Radio Engineers International Convention. Program of 275 papers covering recent developments in all fields of all 28 IRE professional groups will be presented in 54 sessions at Waldorf-Astoria Hotel and N. Y. Coliseum. Highlight of program will be special symposium on new energy sources, March 21, at Waldorf.

March 20-25—Third annual short course for newspaper in analysis and reporting of crime news, sponsored by Northwestern U.'s schools of journalism (Medill) and law, downtown campus, Chicago.

March 21—Radio & Television Executives Society, Hawaiian Room, Hotel Lexington, N. Y. 12:15 p.m. Martin Mayer, author is speaker.

*March 22—Assn. of National Advertisers, workshop on shows and exhibits. Hotel Plaza, New York City.

*March 24—Alfred I. du Pont Awards Foundation, awards dinner. 7 p.m. Mayflower Hotel, Washington, D. C.

March 31—Deadline for entries in American TV Commercials Festival. Entries should be sent to Wallace A. Ross, festival director, 60 E. 49th St., New York 17.

APRIL

April 1—FCC deadline for applications for construction permits for authority to replace or modify temporarily authorized vhf tv broadcast repeater facilities.

April 1—Deadline for entries in the American Bar Assn.'s Gavel Awards competition, open to tv, radio stations and newspapers in major cities for “outstanding contributions to public understanding of the American legal and judicial systems.”

April 4-7—Audio Engineering Society, West Coast convention. Ambassador Hotel, Los Angeles.

April 5-7—American Society for Testing Materials symposium on electron device processing, Benjamin Franklin Hotel, Philadelphia, Pa.

April 8-10—Montana Broadcasters Assn. annual meeting. Billings, Mont.

*April 7-8—New Mexico Broadcasters Assn., annual meeting. Speakers: Edward Bell, NAB vice president for industry affairs. Anglers Motor Hotel, Farmington, N. M.

*April 7-8—Southwest Assn. of Advertising Agencies, annual convention. Marriott Motor Hotel, Dallas.

April 10-13—National Premium Buyers

RAB SALES CLINICS

April 3—Albuquerque, N. M.; Charlotte, N. C.

April 4—Phoenix, Ariz.: Atlanta, Ga.

April 6—Los Angeles; Tampa, Fla.

April 7—Bakersfield, Calif.; Miami, Fla.

April 10—Baton Rouge, La.

April 10—San Francisco.

April 11, 12—Fort Worth, Tex.

April 13—Tampa, Fla.

April 13—Memphis, Tenn.

April 14—Nashville, Tenn.

April 24—Raleigh, N. C.

April 25, 26—Richmond, Va.

April 27—Washington, D. C.

April 28—Philadelphia.

SERVING MILLIONS FROM THE ALLEghENIES

JOHNSTOWN CHANNEL 6
Where was the Bell Telephone System

ON FRIDAY, AUGUST 12, 1960?

It was handling some 210,000,000 local and long distance conversations, plus about 5000 overseas calls.

It was guiding Echo I into near-perfect orbit so Bell System scientists could make the world's first telephone call via satellite.

It was developing a world-wide communications system using satellites powered by the Solar Battery, a Bell System invention.

It was offering Bellboy personal signaling to more and more people. Device uses tiny Transistors, another Bell System invention.

It was building fast, reliable communications for BMWS—the nation's Ballistic Missile Early Warning System.

It was constructing a 'round-the-world communications system for America's first man (or woman) into orbit.

It was providing circuits for the speedy transmission of mountains of data for business and government.

It was providing thousands of miles of high-quality circuits for the country's local and network television programs.

And it was delving into innumerable fields of scientific inquiry at the largest industrial laboratories in the world.

It was at the scene of every major communications activity that day, as it is every day.

And for them all—communications on the ground, under the oceans, through the air, around the world—Bell Telephone people "wrote the book that everybody else uses."

How come? Because it's our job to be expert in universal communications.

You have a right to the best service in the world. And you get it!

Especially the fm
EDITOR: Perspective '61 was, as usual, a first rate job-clear, concise, well-documented and to the point. It deserves the attention of everyone in the business . . . the best piece I've seen on fm in many moons.—Joe Gans, Joe Gans & Co., Adv., New York.

‘Outstanding' piece
EDITOR: I . . . was very much interested in your Perspective '61 presentation. Particularly so in the first segment entitled "1961: Year for cautious optimism." I have been a subscriber for many years . . . and find this is probably the one outstanding presentation in recent years.—Norman Weissman, Dayton, Ohio.

Always an honor
EDITOR: . . . It's always an honor to have one's opinions valued ("Why don't stations tell how good they are?" Broadcasting, Feb. 20).—Alice J. Wolf, Timebuyer, N. W. Ayer & Son, Philadelphia.

Well, almost always
EDITOR: In your always-interesting, well-written and well-edited trade journal [Programming, Feb. 6], there is a smidgen of misinformation regarding the payment formula whereby actors, writers and technicians will get a modest share of the proceeds if and when theatrical motion pictures made after Jan. 31, 1960, are released to television.

The percentage to be received by each group is to be calculated on the distributors' gross receipts, minus a charge for distribution costs—not on the producers' sales price. The only exception to this formula is in the case of a producer making an outright sale direct to tv networks or stations in which event the charge for distribution costs is reduced 75%.—E. T. Buck Harris, Public Relations Director, Screen Actors Guild.

Elderly escalator
EDITOR: . . . You carried an article [Broadcast Advertising, Jan. 2] entitled "A rate card escalator." For your information, the basic concept of the "new" Young Tv rate card was started by WABC-Tv in February 1956. We have continued to use this concept . . . since that time. For the past two or three years, some of the top tv representatives, such as Blair Tv, have been recommending the use of this concept . . . to all of their stations.

The station and the advertisers have found this type of rate card to be extremely satisfactory in that its flexibility enables the client to achieve a far greater return for a particular budget.—James E. Szabo, General Sales Manager, WABC-TV New York.

Broadcast background
EDITOR: I was surprised that in your story on the nomination of Paul Rand Dixon to be chairman of the Federal Trade Commission and Philip Elman to FTC membership [Government, Feb. 13], you did not mention that Mr. Elman once worked for the FCC.

Mr. Elman and I were among ten young men who joined the law department of the FCC in 1940. Some of your readers might like to know he was engaged in broadcasting work for the short period he remained at the FCC and, therefore, can be expected to be familiar with the problems of broadcasters.—Leo Resnick, Attorney, Washington, D. C.

Wrong city
EDITOR: We appreciate very much the story . . . regarding the Weiner Packing Co. and WTRF-TV [The Media, Feb. 13]. However, we feel it should be brought to your attention that for the past eight years WTRF-TV has been located in Wheeling, not Charleston.—James H. Knight, Promotion Director, WTRF-TV Wheeling, W. Va.

[A busy reporter let his mind wander momentarily and with it went WTRF-TV. Sorry, we know better.]

Foreign language broadcasts
EDITOR: We have found your Yearbook to be of great assistance to us in compiling information about foreign language broadcasting. We would like to know how long you have included foreign language listings in your Yearbook? If the listing has not been continuous, could you tell us the years in which the listing did appear.—Jack Victor, Research Assistant, Language Resources Project, University of Pennsylvania.

[The foreign language programming data has appeared regularly in the Broadcasting Yearbook Marketbook since 1958. Copies of the 1956 edition are $4.00 each.]

Popular availability
EDITOR: Our IRS Mailbox series is running 13 weeks over 129 radio-tv stations in the Southwest—thanks to a recent mention of the series availability in your Programming, Nov. 28, 1960.—Elbert Huling, Special Assistant, U. S. Internal Revenue Service, Dallas, Tex.
Why WTMJ-TV bought Warner's "Films of the 50's"

Says Robert J. Heiss

"Unlike some of the assortments we've bought in the past, we can say of these Warner features, ALL QUALITY, NO RUBBISH"

The fact that many films in this Seven Arts release also give us superb entertainment for our growing color TV audience is a fine plus that fits our policy of buying 'good box office' for all our programming."

WTMJ-TV, Milwaukee
Music can have a special, selling language of its own

What will trigger the next important trend in television commercials? Very likely, music.

Music has contributed materially to most of the exciting things that have been done in our business. But the spotlight has been on the visual element, and music has yet to receive its deserved recognition.

This situation is earning some attention at present. At my urging, a special category for background music and jingles has been introduced in the judging of the upcoming American Television Commercials Festival.

While this may serve as a beginning, it is apparent that a concern with music whenever the industry reviews and judges its achievements in the commercial field would be certain to encourage further exploration. This is one area of television commercials which, in broad terms, has perhaps the greatest possibilities for development.

Music's mounting role and impact in the tv commercial (and program) field can be compared in some ways to the effect and additive supplied by sound to the movie silents. Even before sound, music itself—the playing of a piano to heighten mood and provide background—could break the spell of indifference and unreality on the part of the theatre audience watching the silent screen.

Sound Is Magic. But even with the arrival of sound in motion picture presentation, music was sustained. It was obvious that words alone—a continuous flow of "natural" sound—could provide an unintended distraction to the action on the screen. Music, working its manifold magic, was in movies to stay.

Too frequently music is tucked onto a commercial as an afterthought—a four-second gesture to shorten copy. Even at that the musical touch can give a commercial a finished effect.

But when the production involves costly original music, most of which is buried in the final mix, or worse, the musical substance ends up fighting other elements, it is then that music becomes exposed to criticism that it is an expendable luxury.

Far from being a luxury, music is recognized for its contribution to the success of many film productions, theatrical and television. A prime example is Peter Gunn on ABC-TV.

Yet another illustration of how music can be a powerful factor in a network television program series:

The theme for Alcoa Presents was made into a long-playing record. More than 150,000 copies have been sold over the counter, a paid-for proof of the theme's effectiveness.

The use of music in film has very specific application to commercials. There are such key questions to be considered as:

When must mood or location be established and changed more quickly than in a commercial consisting of a sequence of vignettes? When does a mood need sustaining more than when it's time for a close-up of product? If we want to say "modern," is it more effective to express it musically—as F&S&R did in a recent presentation of Alumina at Idlewild—rather than have an announcer assert the claim in overworked expressions? If we must say "big," how much better to say it with music and picture, avoiding pompous words!

In thoughtful use of music in commercial production, the art form generally supports and reinforces other elements. The ultimate application of this kind is the dance commercial—whether the "dancers" are human or product, live or animated. Music by its versatility can provide counterpoint, can highlight by contrast, can take a dramatic part by giving expression to what otherwise is dull action on the screen. As a viewer, for a moment, think of the heightened possibilities for an advertiser's headache remedy commercial that has a happy, jangly background to the private discomfort of a specially created character.

At this agency, we used music to verbalize titles which told the story of a new Alcoa product, Colorib, in a basically simple commercial which won the Hollywood Advertising Club's international broadcasting award as the "best live action commercial, one minute or over." Of course the Colorib commercial was not designed to win prizes, but to tell a new story a new way, to let the form of presentation speak for the modern character of the product and its maker.

Its Own Sake. Music houses themselves must share some responsibility for the limited use to which music has so often been put. Too often, to the music maker, it is music for music's sake. Basically, however, the fault lies with agency thinking—which treats music as a thing apart, keeping the people who are concerned with music out of the picture until all other elements in the production of a commercial are firmly locked down.

To be effective, music must be part of the creative concept, working side by side with copy and art, initiating as well as reinforcing ideas. The added enrichment of music can often result in economy of production and greater clarity of the spoken word.

A stock shot of a foggy London street can be romantic or mysterious, depending on the choice of chord. A table and two chairs, with the right scoring, becomes a bit of Paris. Music can make random pictures fall into place, relate, and create a whole thought or theme. We make frequent use of this approach when turning low-budget newsreel-type coverage of latest achievements in the use of aluminum, as in the Saturn rocket engine or the aircraft carrier Enterprise, into exciting, finished commercial presentations.

At F&S&R we think of music as a tool that can be used with precision to win attention and influence people. We are more concerned with audience response than frequency response. And we have found that extra production dollars will rarely buy more than when they are spent on music, used to its fullest advantage.

George Wyland started his ad career with Foote, Cone & Belding in 1947, following a stint as actor-writer-director. In 1952 he became radio-television commercial producer at Leo Burnett and later program package producer for NBC's "Home Show." He was manager, creative production, at Cockfield-Brown Co. in Toronto for five years before joining J. Walter Thompson in New York as writer-producer and commercial co-ordinator on the Ford "Startime" show. He went to Fuller & Smith & Ross, N. Y., in June 1960.

COLOR SPURRED BY ZENITH SUPPORT

Announcement of multihued-set line by largest volume maker indicates faith that this may be the year for breakthrough

Color television may remember 1961 as the year of the big breakthrough.

Zenith Radio Corp.'s announcement last Wednesday that it will enter the market this fall with a line of color receivers immediately spurred excitement and interest throughout the industry.

- RCA, and its corporal guard of color manufacturers (Admiral, Magnavox, Packard-Bell, Emerson-DuMont, Olympic) hailed the move as proof of the correctness of their judgment.

- Other manufacturers were not so moved; all, however, agreed that the impact of Zenith's entry into color tv must be considered of vital significance.

Zenith's step into the color picture is considered a major and dramatic step in the up-to-now, less than booming story of color tv production and sales. The reasons were obvious:

- Zenith has been acclaimed the top volume manufacturer in black and white television sets the past two years (more than a million each year). If Zenith has decided this is the year for color, it must be significant.

- RCA up to now has been the only major force behind color. But when a second major entity such as Zenith is added to help promote color, how far behind can others afford to be?

- Many in the black-and-white field feel the monochrome market is softening; it's on a slim profit margin diet now. Second-set promotions can't possibly cure the saturation sickness, "so where can we go except to color?"

- Color lends itself naturally to excitement and allure in promotion and merchandising and is such a glamorous companion for tie-in promotion with other lines such as fashions, home furnishings and the full range of consumer necessities such as foods and toiletries.

- Color sets cost two to two-and-one-half times as much as monochrome, hence manufacturer, distributor and dealer enjoy higher unit sale and larger profit margins. The mark-up margin is important to the trade; it enables extra working room for promotion funds and salesmen's incentive plans, as well as sales attractions such as more liberal trade-in allowances to prospective customers.

- Zenith's report gave new hope to those who profess that color tv will be the decade's multi-million dollar business that will help put America's economy back on its traditional firm foundation. The stock market reacted immediately. Although the big board was closed Wednesday when Zenith issued its short announcement, Zenith common jumped several points to close at 107 and three-quarters Thursday. Monday it closed at 105 and one-half and Tuesday 103 and one-half.

- Some manufacturers were not so sanguine.

In essence those who failed to enthuse put it bluntly in a straight commercial, marketplace philosophy:

When the American consumer wants color tv, we'll give it to him. Until then, we'll play the waiting game.

All, however, agree that color tv may herald the next major thrust in television. The only difference of opinion occurs when the date is mentioned.

At present there is an estimated 600,000-650,000 color sets in the homes of the public, or in public places like restaurants, taverns and hotel and club lounges.

Production has, in the last two years, consistently inched upward, from the meager (compared to black-and-white production) 115,000 color receivers manufactured in 1959, to 150,000 in 1960. In 1961, it is estimated, manufacturers will top 200,000. This estimate was made before the Zenith entry was announced. The impact of Zenith's push may result in galvanizing additional producers to the end that more than a quarter of a million color sets may be made this year.

A basic consideration by those manufacturers who are reluctant to place color tv on their public shelves is this: Color tv will become a force in the marketplace when its price comes down somewhere near that of monochrome. Failing this, color tv must "oversell" black and white by some technical breakthrough which will give high level color tones, stable pictures and ease of...
tuning. When either of these happens, the public will gobble up color tv.

**Net Programs Static** Although NBC over the years has continuously presented a substantial lineup of color programs, it has never had the allies in the other two tv networks it hoped for. CBS, when it presented a number of specials in color in recent years (Wizard of Oz, Danny Kaye, for example) and a few of its regular programs (Red Skelton), ABC has maintained it will program in color when the public wants it (see box, this page).

The new Zenith color sets will include a number of technical innovations that were only outlined in general terms. The Chicago-based manufacturer decided to develop the complete line so early. The sets will, however, incorporate a new Zenith-developed color demodulation system which employs a new tube invented by company engineers. Zenith will go into the market for its picture tube, a three-gun shadow mask tube, but probably also will manufacture its own version. The sets in console models probably will carry retail prices "above $600," Zenith said.

The Zenith announcement said the firm is "going into the color television business this fall, when it will introduce a line of completely new and unique color tv receivers."

**Millions in Research** Hugh Robertson, Zenith board chairman, said the new color receivers "are the result of the expenditure of millions of dollars over a period of eight years of intensive research and development work. Zenith's research has been aimed at improving the standards of both performance and reliability as well as simplification of use of the receiver in the home."

Mr. Robertson said complete details about technical innovations and styling will not be revealed until the sets are introduced in production quantities to distributors and dealers. He did mention that a new method of color demodulation has been developed, featuring a new tube. Chassis design will be horizontal with hand-wired circuits. Many models will feature Zenith's remote control ultrasonic "Space Command" device.

Joseph S. Wright, Zenith president, commented Thursday: "I think we will give color a big lift. We have always enjoyed a reputation for a quality product."

Zenith has shown its distributors color television prototypes for a "number of years," a Zenith source contributed.

What were the reactions from other manufacturers? RCA: "welcomed" Zenith's entry into color. John L. Burns, president of RCA, last Thursday said:

"The Radio Corporation of America welcomes the entry of Zenith into the color television field. Their announcement is further indication of the rapidity mounting interest in color tv on the part of the public, manufacturers, broadcasters, sponsors, distributors, and dealers during the last year.

"In announcing their color tv marketing plans, Zenith takes its place with six other important television manufacturers—RCA, Admiral, Emerson, Magnavox, Packard-Bell, and Olympic. In addition, Sylvania has said it is considering entrance into the field later this year.

"Color broadcasting is also on the increase, with NBC offering a daily schedule of network programs in color and more than 100 independent stations across the nation originating local color programs and color film presentations. We hope that, like the manufacturers, the other competing networks will join the march of progress in this great new industry."

"RCA and NBC, which introduced color television in 1954, have long felt that vigorous competition is not only healthy for the entire industry, but also in the best interests of the public."

RCA moved into the profit column in its color business last year for the first time, chalking up a net of more than $1 million.

Another RCA official commented Zenith's move is "highly significant!" because "the competition will help to break this thing loose." He said, "This is what color has needed, another major manufacturer with the promotion resources comparable to RCA that they will put into it."

**More Programming Needed** An Admiral Corp. representative commented, "We're certainly glad to see Zenith come in. Now we'd like to see the other networks besides NBC come up with some good color programming."

Admiral color set sales last year were up 35% over 1959 and color sales for the first two months of this year are running ahead still more. Prices range from $595 to $895. Admiral went into color in late 1953, but dropped out in 1957 because of the poor market. It came back in 1959.

Magnavox is enjoying "very good sales this year" in color, a company spokesman said Thursday. Magnavox is in its fifth season with a color line that features the RCA chassis, but its own sound system and cabinets. The company had its best year in color to date in 1960. Color is still only a small fraction of the firm's total market however.

Emerson Radio & Phonograph Corp. produced its first color tv set more than seven years ago. Currently it manufactures both the Emerson and the Dumont color tv sets, all of which are console models selling for $750 to $800.

Benjamin Abrams, president of Emerson, "sees no reason for the pace of color set sales to accelerate greatly." He pointed out three requirements essential to increased sales: More color programming by all three networks; lower prices for color sets and more manufacturers to get on the bandwagon to stimulate more color promotion.

Olympic Radio & Television Corp. introduced its present line of console and three-way combination color tv models to the market in June 1960. The company's first color sets were made three years ago on a limited basis for showing to the trade only. Set prices start at $695 for the console and $995 for the combination model. While declining to reveal actual set sales, the company reports that sales of the combination model are about equal to sales of its highest priced black and white models.

Olympic welcomes the arrival of any new color tv manufacturer, according to Robert S. Burros, advertising manager, who said the promotion by competitors increases general interest in color tv and benefits all set makers.
Top movies (lots of them), well programmed, result in rating leadership for WSB-TV. Audience interest is excited by showcasing movies like "High and the Mighty" and Judy Garland's "A Star is Born"—series like "Best of Gable"—sneak previews and color premieres! Superior programming that's made possible by using Warner's "Films of the 50's", RKO's "Post-48's", MGM and Paramount libraries, Shirley Temple and Tarzan packages, and 20th Century Fox movies. This all adds up to king-size audiences for advertisers on WSB-TV.
COLOR SPURRED BY ZENITH

Packard-Bell Electronics Corp. has had color sets on the market as long as RCA, using RCA components, Packard Bell designs their own chassis to combine with low-boy styling. "We've been selling color receivers as well as making them," a company spokesman said pointing out that last year Packard-Bell had 25% of total color sales in its territory (13 Western states and parts of Texas).

All P-B sets include remote tuning. They're priced competitively with other color sets which don't have color tuning, $875 for a console and $1,325 for a "home entertainment center" am-fm-tv-record player with complete stereo for all sound whether records, radio or tv.

Among the major manufacturers who are not including color tv in this fall's consumer products line (showings for the 1962 season will take place in June) are the following:

Tuba's the Thing = Motorola Inc., which has no color in its line now, was not quite so enthusiastic about the Zenith move. Motorola felt that Zenith is only doing now what it spent several million dollars to learn in 1955.

Edward R. Taylor, Motorola executive vice president, felt, however, Zenith "is going to contribute something to the progress of color." He said Motorola has no plans to enter color and probably will wait until a major technological breakthrough in the picture tube. He said this would have to be a single-gun tube.

The present three-gun picture tube, he explained, "means complex circuitry, which means high manufacturing cost and high selling cost, which means no mass market. And you need at least a million sets to make a mass market."

In 1955 Motorola introduced a color set using the CBS Hytron 19-inch picture tube. The next year the company switched to the RCA 21-inch tube. "We sold a few thousand in 1955, but it dwindled to only a few hundred in 1956 and 1957, so we just dropped out," another Motorola representative recalled.

Westinghouse, which included color tv receivers in its consumer line for three years (1955-57), has no immediate plans for a polychrome set in its 1962 family of tv receivers.

O. H. Yoxsimer, general manager of Westinghouse tv-radio division, said that Westinghouse is continuing its interest in color, but at this time only in the back rooms of its research and laboratory departments.

General Electric's S. Martin Fassler, marketing manager of the radio and television division, said that GE was showing an increasing interest in color but that there were no immediate plans to market a color receiver. There is none planned for the 1962 line, he said.

He recalled that GE came on the consumer market shortly after the FCC adopted color standards in 1952, that the company omitted color sets from its line in 1956 and has had none since then.

GE, Mr. Fassler indicated, is working on color receiver development and is looking at a "breakthrough" in receiver design that will permit color receivers to be more competitive with black and white sets.

Sylvania Home Electronics Corp. has been seriously considering a return to color television manufacturing this fall but as of last week had not made up its mind. Peter J. Grant, president of the Sylvania tv marketing subsidiary, said some weeks ago that the company had been taking a long new look at the questions of customer service, dealer and distributor profits and network programming. Sylvania made color sets in 1956 and 1957 but got out because it felt at the time there were not enough profits in the market for distributor, dealer and manufacturer.

Hoffman Electronics Corp. some years ago brought out a line of color sets, but they were too high priced to make sales count. A spokesman said Hoffman had no plans to go back into color until it can be competitively priced with black and white.

The most exciting retail activity came, as might be expected, from the Chicago marts.

Sol Polk, president of Polk Bros., expressed high enthusiasm over the Zenith announcement. Polk Bros. claims to be the largest retail seller of tv sets in the world. His Chicago-area chain has been a heavy color promoter for the past six years and is a heavy broadcast advertiser, with all tv commercials in color (Monday Memo, Jan. 2).

Polk Bros. is in the midst of setting up "great color salons" in its stores to merchandise color even more effectively, Mr. Polk said. This chain has long used an economic incentive plan for its sales force to help push color. The new salons will carry every model of color set on the market, Mr. Polk said.

Marshall Field & Co., currently welcomes customers to its tv sales area with an operating RCA color set. It's the first thing to catch the eye. Field reported color sales considerably improved so far this year. Last year was a record year.

The Fair reported a waiting period for delivery of its Magnavox color sets because sales are "so very good." During the Christmas season color sales were "excellent," a salesman said.
WE’RE AT FULL POWER
NOW IN BATON ROUGE!

Make “No. 9” a MUST For Your Lineup
In The Mid-South’s SPENDINGEST Market

*Sales Management “Survey of Buying Power”

Call BLAIR TELEVISION ASSOCIATES
National Representatives

BROADCASTING, February 27, 1961
Low cost of tv on a per-family basis

Pay-tv advocates are fired upon in

a report prepared by Television Adver-
sising Representatives Inc., New York,
for distribution among the general and
sales managers of Westinghouse Broad-
casting stations. The ammunition: tele-
vision expenditures per family, viewed
as surprisingly low when related to the
number of families served by the
medium.

TvAR's analysis, based on 1959 FCC
figures, latest available, shows the total
amount spent for tv advertising coming
to $33.48 per tv family. TvAR notes
that $4,141 was spent in retail stores
that year by the average family.

Said Larry Israel, vice president-
general manager of TvAR: "It is hard
to believe that any system of pay tele-
vision could come even close to match-
ing this low cost of toll-free television."

Investments in tv spot time by na-
tional and regional advertisers in 1959
amounted to $9.50 per tv family, based
on a tv advertising volume of nearly
$1,495 billion. According to TvAR,
these outlays in general varied with the
size of the market—the larger the mar-
et, the greater the outlay per family. In
the 10 largest markets for which FCC
figures were available, spot tv
expenditures averaged $9.19 per video
home. In markets below the "top 40"
level the investment declined to a low
of $5.32.

Despite the rep company's correla-
tion between spot tv expenditures per
household and market rank, there were
wide variations within the various mar-
et groups. Miami, for example, 26th in
market rank, was at the top of list in
spot billings per tv family of $11.77. Market-by-market figures are
attached to TvAR's report.

Mr. Israel reminded the WBC sta-
tions that the investment by television's
advertisers ($33.48 per tv family) de-

livers service to the American public
from three tv networks, local program-
ing by network affiliates and independ-
ent-station programming in the four-or-
more-station markets.

Dodge drops Welk show, may make tv cutback

Chrysler Motor Corp., Dodge Div.,
last week announced it is ending its six-
year association with the Lawrence
Welt Show on ABC-TV (Sat.,-9-10
p.m.), effective June 10. Dodge has
been spending about $3 million in spon-
soring the program on an alternate week
basis (with J. B. Williams Co.).

Dodge started to sponsor the Welk
program in 1955 on a full-hour basis
and since last June has been an alter-
ate-week advertiser. It was understood
that the decision to drop the program

In 1959, WMCA 570 kc, ranked as one of the top three radio stations in 15 out of 30 regular New York rating reports.

In 1960, 29 out of 30.*

*Hooper Radio Audience Index, Total Rated Time Periods—12 Reports/NI, Mon-Sun, 6 am-12 Mid—6 Reports/Pulse, Mon-Fri, 6 am-12 Mid—12 Reports
was simply that the show "no longer is selling automobiles" for Dodge. In recent years, Dodge has made compact cars and more expensive automobiles and company executives reportedly felt that the program no longer was reaching the audience it needed.

D. W. Moore, Dodge's advertising director, said its future plans for advertising could involve presentation in all media, including tv, but it is believed that a cut-back will be made in television. The agency for Dodge is BBDO, Detroit.

Chevy help wanted ads accentuate the positive

Cutting through the gloomy news of rising unemployment, Chevrolet Dealers of Southern California are devoting part of the commercial time on their evening tv newscasts to reading help wanted ads from "tomorrow morning's Los Angeles Times." "There's so much talk about layoffs, that it seemed like a good idea to point out that many employers are looking for help," Jess Johns, president, Eisaman, Johns & Laws, agency for the Chevy dealers, said when questioned about the campaign. He recalled that the association used a similar plan on radio during the recession of 1957 and said the current revival of the idea on tv had been suggested by a number of dealers who remembered the good effect it had had before.

The upbeat messages are seen and heard on the newcasts of George Putnam, KTTV (TV), Jack Lathan, KRCA (TV) and Baxter Ward, KCOP (TV), all Los Angeles, three evenings a week.

Business briefly...

John Morrell & Co. (Red Heart dog food) through John W. Shaw Adv., Chicago, currently is buying the second flight of radio and tv spots as part of a continuing campaign which this year has shifted major emphasis from print media to broadcast. The first flight of 13 weeks got under way last month in 19 tv and 40 radio markets using 7 to 15 spots a week in each market. Account executive at Shaw is Charles Allen.

United Airlines, through N. W. Ayer & Son, Philadelphia, on March 6 starts a 52-week contract to co-sponsor the Frank Goss 5:45-5:55 p.m. newscasts on an 18-station CRPN hookup. Farmers Insurance is the alternate sponsor.

Mother's Food Products Inc., Mother's Gefülle Fish, Newark, N. J., will include spot campaigns on WPAT-Paterson, N. J., and WABC New York in a Jewish Passover promotion campaign. Radio spots are scheduled Monday through Friday from the first week in March through April 10, when the schedule may be extended. Agency: Dunay, Hirsch & Lewis Inc., N. Y.

Procter & Gamble Co. will sponsor a newly-edited special repeat presentation of How Tall Is a Giant on NBC-TV March 23 (Thur. 7:30-8:30 p.m. EST). The portrayal of how a Monterrey, Mexico, team won the 1957 Little League World Series was first presented June 14, 1960, on NBC-TV. Tennessee Ernie Ford again will serve as host. Agency: Benton & Bowles Inc., N. Y.

Chock Full O' Nuts Corp., N. Y., which launched a heavy radio-tv spot campaign in New York on Feb. 19 to introduce its new instant coffee brand, will extend the "blockbuster" spot campaign in April to Albany, N. Y., Connecticut and New England. Minutes, 20's and IDs are being used. In time, the instant coffee brand will reach all markets which have distribution of the company's regular coffee brand. A copy point in the instant coffee commercials is the admission that regular coffee is better: "... [instant] is not as good as our regular coffee, even though it is made of the world's finest, most expensive coffee beans. .. ." Agency: Grey Adv., N. Y.

Vintner buys tv campaign

In a saturation campaign over WCBS-TV New York, United Vintners Inc., San Francisco, has bought a 19-week schedule to begin on Wednesday (March 1) that will spotlight the use of 1,310 ten-second announcements over the period. 

The purchase is in two cycles: for the first six weeks, the advertiser, on behalf of Petro wine, G&D Vermouth and Italian Swiss Colony wine, will utilize 110 ten-second spots per week; for the next 13 weeks, it will schedule 50 ten-second announcements per week, plus eight one-minute spots per week. The agency: Harrington & Miner, San Francisco.

Psychologist says agency must compete to thrive

Agencies that grow fast are those whose executive leadership is not afraid of tough personal competition with other agencies. Agencies that don't grow may have leadership afraid of personal competition.

These are the conclusions suggested by Dr. William H. Lundin, psychological consultant to several midwest advertising agencies and director of psychological Dynamics Inc., Chicago. He spoke Feb. 16 in New Orleans before the southwest regional conference of the American Asn. of Advertising Agencies.

Dr. Lundin said some agency executives "are afraid of competition" and this is why "many of the men who enter the service business do so to avoid the competitive struggle, preferring to rend er service to others rather than engage in the hand-to-hand combat which

Chun King's humor pays off

To long-faced detractors of humor in advertising, one advertiser has a cheerful comeback: Sales are up 40%.

That's the record so far this year in media markets for Chun King chow mein, as joyfully announced by Jeno F. Paulucci, president of the Duluth, Minn., food firm. He thought it appropriate to report progress after the Hollywood Advertising Club called a Chun King spot the world's best radio commercial of 1960 (BROADCASTING, Feb. 13), the latest of several accolades by RAB and others.

Chun King commercials have been using an acute approach the past few weeks, beginning with tv animation, switching to live-action film last year and adding radio last fall. Freeberg Ltd., Hollywood, has been handling production for BBDO, Chun King's agency.

The winning radio commercial, one of the first two transcriptions for the chow-mein canner, was a minute interview by Stan Freberg with a Chinaman who likes hotdogs. Another in the first batch of radio commercials established a questionable chow mein copy point being picked up from time to time in succeeding ET's, that "95% of the people in the USA don't eat it." (In actual fact, more than half the population does eat it; chow mein is a $30 million market, the manufacturer says, and much of it must belong to Chun King. Mr. Paulucci does not say how much, but his family of products besides Chun King, the biggest brand, there are Jeno's Italian foods, pizza mix, frozen foods, Nokomis wild rice, Wilderness pie filling and Living Earth—did better than a $30 million sales volume last year.)

American Dollars = Chun King is light-heartedly spending around $1 million for radio and tv in the year that began last fall ("more than the rest of the Oriental food industry combined"). The advertiser uses 25

30 (BROADCASTING)
Film frames from the commercials are used for postal promotion of TV schedules.

big markets around the country in both radio and TV lineups, running heavy schedules in two- to six-week flights. In addition, Chun King uses occasional early morning and late-night time on NBC-TV, section inserts in the Reader’s Digest and small-space newspaper ads for special sales.

The company doesn’t stop at handing the consumer a laugh, however. The advertising is conscientiously merchanised. In the summer of 1959, Mr. Paulucci sent private planes around to his media markets and invited the grocery trade inside to see an advance TV presentation he personally filmed. Stations traditionally cooperate to spread the advertising word to the trade and even have been moved to promote the commercials with newspaper tune-in advertising. Now Stan Freberg carries the merchandising ball, making conference calls to brokers and retailers, filming pitches and commercial previews. Teaser mailings from Chun King and stations also preview the spots.

Copy for the on-off radio-TV campaigns is changed often enough to keep the commercials from sounding like Joe Miller’s joke book. Whether or not the audience is amused has not been established, but something has them in the supermarket aisles.

How to cross-pollinate creative ad people

MJ&A TEAMWORK, TV HELPED SELL PONTIAC’S TEMPEST

Agency team effort is the story behind the sales success of Pontiac Motor Division’s Tempest compact car.

Introduced late last fall, the four-cylinder Tempest has “captured 7% of the compact car market,” and executives from MacManus, John & Adams Inc. told a time-buying and selling seminar of the Radio & Television Executives Society in New York last Tuesday (Feb. 21) how they turned the trick and how TV played a major role.

Robert E. Britton, vice president and executive director of marketing, media, and research, and Robert S. Marker, vice president and director of creative service, mixed their remarks on the topic of “Making the Match—Media and Copy” with slides and TV commercial films.

At a time when “appeals must be directed at what is often a very small target,” MacManus, John & Adams suggested meshing marketing, psychological, social, and research sciences with artistic judgment. In brief, the agency’s Tempest project was based on this three-point platform: “Find compatible people who appreciate the usefulness of all the tools of advertising, not just their own little specializations. Put these men together at the top, the initial planning stage. And cross-educate them continuously in one another’s fields. Result: Better balanced agency services, better performing creative people.”

Among the agency’s media recommendations for Tempest was a series of commercials on Pontiac’s participation in ABC TV’s Surfside Six, a program acknowledged as being “very good for the Tempest.” Though dealers did not receive shipments of the automobile until mid-November, the first TV commercial was presented on the network Oct. 31, 1960. The agency was heartened to learn that subsequent TV commercial research showed a “49% recall” of that announcement. One of the slides shown last week pointed out the agency’s claim that Tempest print ads and TV commercials “obtained the highest scores we have seen to date for any ads or commercials.”

Campbell Soup opens labs

Heavy broadcast advertiser Campbell Soup Co., Camden, N. J., may reveal new commercial copy points as well as new food products in an expanded basic food research program getting underway at two new Food Science & Nutrition Lab structures, completed last week in Camden and Moorestown, N. J.
17 out of 30

ABC-TV says fall lineup already tops $73 million

The first dollar sign of a fast-breaking TV network selling season came last week from ABC-TV. The network's president, Oliver Treyz, asserted the network already has over $73 million in prime-time billings "sold" (that is, recorded on the books) for the new 1961-62 season.

Though Mr. Treyz did not refer to last year's pace, it was reported that ABC-TV's programming committed to advertisers at this time last year fell far short (as of March, the total stood at some $49 million). The entire prime-time schedule sold to advertisers this season represented some $160 million.

Among the blue-chip advertisers whose business accounts for the fat millions: Procter & Gamble, Lever Bros., American Home Products, Ralston, Aluminum Co. of America and Brown & Williamson Tobacco.

Also in advertising...

Sharp spending - In 1960, the Gillette Co. spent 17% of its net sales on advertising throughout the world. Advertising expenditures incurred in the U. S. were larger in relation to sales than in other parts of the world. The Gillette Co., which includes the Gillette Safety Razor Co., The Toni Co. and The Paper Mate Co., enjoyed its most successful year in 1960 with net earnings reaching an all-time high at $37.123 million, surpassing by 19% earnings the previous year and net sales increasing by 7% over 1959, reaching a record $224.737 million.

Petry moves - Edward Petry & Co., Radio Div., has moved to new and expanded quarters on the 11th floor of the building now occupied by the company at 3 E. 54th St. The telephone number will continue to be Murray Hill 8-0200.

International deal - The affiliation of G. Street & Co. Ltd., London, and Kastor, Hilton, Chesley, Clifford & Atherton, New York, has been announced by both agencies, Street, with a staff of over 260, maintains two offices in London, and offices in Leicester and Manchester, to serve clients through affiliates in Europe, Australia, New Zealand, South Africa, and Argentina. Kastor Hilton, which has a branch office in Toronto, stated the move will accommodate growing interest in European markets by clients some of whom plan to establish manufacturing or marketing facilities there during 1961 and in the future.

Ad year reading - "Advertising, What's In It For You," a 16-page booklet based on material supplied by Lawrence C. Gumbinner advertising agency, New York, has been published in a 40,000 run. It is aimed at eventual circulation of 400,000. The publisher is Employee Relations Inc., N. Y., which distributes publications to more than 400 offices and plants throughout the country. Sumner H. Wyman, vice president of Gumbinner, said his agency wanted to give a straightforward exposition of advertising's function to consumers. Written by Sy Ethan, Gumbinner account executive, the booklet backs up the story of advertising with an explanation of work by the Advertising Council and Advertising Federation of America, carrying the advertising year symbol and slogan, "Advertising Keeps Us Rolling."

L&N expands - Lothen & Newell Inc., N. Y., reports it has acquired Martin & Tottle Inc., west coast advertising agency with billing of about $1 million and offices in Los Angeles and Seattle. This marks the second expansion in six months of L&N's four-office western division. It opened a branch in Honolulu in September 1960, and has offices in Los Angeles, San Francisco and Seattle.

Sound of Spring: Soon high heels and shoes will be clicking on the bare pavement of Philadelphia's Rittenhouse Square, unmuffled by winter snow and ice. Another sound of Spring: The warming and enlightening voice of WIP, as active in the public weal in good weather as through Winter's many snow emergencies. A 40-year record of public service and Metropolitan's fresh concepts of service are rapidly moving WIP to the foremost audience position in Philadelphia. Advertisers are keeping pace with the times... on WIP, Metrodelphia, Pa.
TAFT STATIONS SWITCH TO ABC-TV

'Meteoric rise' in programming given as reason for move

Switch of the Taft Broadcasting Co. stations from affiliation with CBS-TV to ABC-TV was made last week. Effective April 30, WKRC-TV becomes ABC-TV's primary tv affiliate in Cincinnati, while Taft is giving notice of termination of a 12-year affiliation with CBS-TV in Cincinnati. Taft also will assign primary affiliations agreements with ABC-TV for two of its other stations: WBRC-TV Birmingham, Ala., and WKYT (TV) Lexington, Ky.

WTVN (TV) Columbus, from its inception has been affiliated with ABC-TV, which was pointed to by Hulbert Taft Jr., president of Taft Broadcasting Co., as a favorable experience and partly responsible—along with ABC's "meteoric rise" in programming—for the changeover.

Mr. Taft said his company was "convinced its progressive improvement" of service in all three areas now would be "accelerated."

CBS-TV will affiliate with WCPO-TV Cincinnati. The station formerly carried ABC-TV programs.

Mort Watters, vice president and general manager of the WCPO stations, in announcing the termination of the contract said "WCPO-TV has been operating on a month-to-month basis with the network since Oct. 1. The disaffiliation comes as a result of WCPO-TV's unwillingness to accept the latest contract proposal of ABC-TV which was made by the network on Feb. 15."

$4 million offer to buy WNTA-TV called too low

An offer to buy WNTA-TV New York for $4 million and use it for a non-commercial educational television station was rejected by the station's management, it was reported last week. The offer was termed "inadequate" by station officials.

Howard Stark, a New York station broker, acknowledged that he had forwarded the proposal to WNTA-TV's management on behalf of a group of leading citizens in New York. He said he has been authorized to "offer more money at the proper time."

National Telefilm Assn., owner of the station, announced several weeks ago that it was placing both WNTA-TV and WNTA up for sale in order to raise funds to retire short-term debts (Broadcasting, Feb. 20). Reports circulated last week that NTA has placed a price of $7 million on WNTA-TV.

Ely A. Landau, who resigned from NTA as board chairman in order to bid for the station, was reported to be "confident" that he could form a syndicate to top the educational group's offer.

The group of citizens that hopes to buy the tv station is headed by Howard C. Sheperd, board chairman of the Greater New York Fund and retired chairman of the First National City Bank, New York. The National Educational Television & Radio Center has been assisting the citizens' group in planning for an educational tv outlet in New York.

AN ART, NOT A CRAFT

That's how NAB's Collins describes broadcasting

Broadcasting must be developed as a profession to reach "a pinnacle of responsibility we can all be proud of,"

NAB's Assn. of State Presidents was told Feb. 23 by NAB President LeRoy Collins at the concluding luncheon of the group's sixth annual Washington conference.

In a talk to state association officers representing 45 states, Gov. Collins described broadcasting "as an art, not a craft." He said that to deserve a professional status, the broadcaster "must give a full measure of his talent. He must recognize that his greater and greater power in a free society carries with it a greater and greater responsibility to serve."

Once again Gov. Collins made a reference to the role of networks in industry affairs. He told the state presidents broadcasting "doesn't belong to the networks, advertisers or rating firms but is theirs to build into a noble structure." In his Feb. 10 talk to the NAB board he had said NAB should be the industry voice rather than networks.

The nation's struggle for freedom can be successful, he said, "only with the aid of electronic communication. In foreign lands people who cannot read must be helped to understand freedom through words they can hear and pictures they can see. At home, through broadcasting, our democratic institutions can be strengthened to become vigorous, moving, achieving forces—or, by lethargic indifference or misuse, they can crumble away."

Looking at the practical side, Gov. Collins added, "The spirit I want to see can mean more profits to you . . . and can build broadcasting to a pin-
...FEATURES YOU NEED AND CAN AFFORD

Here in an Ampex under $1000 are all the features broadcasters have requested—combined in a professional recorder so compact it fits just 14 inches of rack space. The Ampex PR-10 offers complete remote control, full monitoring facilities, two professional speeds, optional self-threading, all-electric pushbutton controls, and new frictionless clutch system for gentle tape handling. Alignment controls are all accessible from the front panel, permitting simple installation and adjustment. All parts have been thoroughly life-tested to give broadcasters assurance of studio quality performance and low maintenance over a long life of continuous daily operation.

FEATURES AND ESSENTIAL DATA

PR-10-1 Monophonic model (5845) available full track or half track—
PR-10-2 Stereo/Monophonic model (5945) records and plays stereophonic, monophonic, sound-on-sound, cue track, selective track and two-microphone sound • Pushbutton controls at professional relay/solenoid type • Full remote control provisions and accessory remote unit • New automatic 2-second threading accessory, optional • All new compact electronics • Professional monitoring includes A-B switches, VU meters, and 500 ohm output circuits • Separate erase, record and play heads on individual mounts • Open fourth head position for optional 4-track or other playback head • Two speeds: 15 and 7 1/2 ips or 7 1/2 and 3 1/2 ips • Hysteresis synchronous motor • Proven electrodynamic clutch system for lowest flutter ever in a portable/compact recorder • Plug-in modules for flexibility of equalization and input characteristics • Portable or rack mount • Dimensions for both models: 19" w by 14" h permitting easy replacement of many older rack recorders • Associated equipment includes a four-position stereo/mono mixer (MA-10) and a new 40 watt speaker-amplifier system (SA-10).

Literature including specifications, features, benefits and applications available from Ampex. Write Dept.

BROADCASTING, February 27, 1961
NAB state presidents in conference assembled

Forty-five state associations were represented Feb. 22-23 at the sixth annual conference of NAB State Assn. Presidents, held in Washington. Members conferred with the NAB staff and heard an address by President LeRoy Collins.

Third row: Kenneth Hastie, WMT Cedar Rapids, Iowa; Fred L. Beard, WJDX Jackson, Miss.; Gordon L. Carey, KSRV Ontario, Ore.; Walter Dickson, WABI Bangor, Me.; William Carlisle, NAB station relations manager; Lloyd W. Dennis Jr., WTOP Washington; Harry Peck, KODY North Platte, Neb.; Carl V. Kolata, WITN Watertown, Wis.; Hollis Seavey, NAB government relations; John Perry, NAB assistant to the president.

Fourth row: John Ellinger, WNAB Bridgeport, Conn.; George R. Durham, WNBV Binghamton, N. Y.; Jess Jordan, WTVB Troy, Ala.; Gale Mix, KRPL Moscow, Idaho; Don DeGroot, WWJ Detroit; Ronald A. Murphy, Seattle; John F. Degnan, assistant to NAB radio vice president; Robert H. Warner, KMON Great Falls, Mont.; Douglas A. Anel- lo, NAB chief counsel; Joseph S. Sinclair, WJAR-TV Providence, R. I.; Lee Rutchick, WTVJ (TV) Miami.

Sixth row: Harvey C. Smith, WDEL Wilmington, Del.; James Hairgrove, KBRZ Freeport, Tex.; Gene Hendryx, KVLF Alpine, Tex.; Ernest N. Thwaites, KFUN Las Vegas, N. M.; Mrs. Thwaites; Gene Trace, WBWW Youngstown, Ohio; Carlton Dargusch Jr., Columbus, Ohio; Harold B. McCarley, WBLE Batesville, Miss.; Julian F. Haas, KAGH Crosett, Ark.

Speakers table: Charles H. Tower, tv vice president; Edward H. Bronson and Stockton Heffranch, tv code directors; Howard H. Bell, affairs vice president John F. Meagher, radio vice president; Vincent T. Wasi- lewski, government affairs vice presi- dent; Charles M. Stone, radio code director; John M. Crouie, public affs- manors.
5th market in America ... and going up!

COVER IT WITH WJR

With WJR you achieve single station coverage, penetration and domination of the Detroit-Great Lakes area, the fifth richest market in America. The facts show that almost 10% of the nation’s business and wealth is concentrated here. See your Henry I. Christal representative for details.

Represented by
Sarnoff sees TV gains, radio plusses, more color in new season

NBC is leading from and with strength at the approaches of a new television sales season, and there's every indication that the network will maintain a profit momentum in 1961, making it an even better business year than 1960, the biggest profit year in NBC's history.

This bullish report comes from Board Chairman Robert W. Sarnoff, interviewed last week in New York by Broadcasting editors.

Among the highlights of his pre-1961-62 season assessment:

- For the full year of 1961, business will be higher than in 1960, both for television generally and NBC-TV specifically.
- NBC-TV led all three networks in gross time sales in the last three monthly gross billing reports (October through December, 1960), a substantial amount of this gain coming from daytime sales which he expects to continue and increase.
- NBC Radio continues in the black (as it had for the full year 1960) and Mr. Sarnoff feels that NBC has "finally found the fundamental answer to maintain a radio network service."
- An even further expansion in color programming at NBC-TV is in sight for the 1961-62 season (also see color expansion story, page 23).
- Events have reduced to something of a "paper plan" the so-called Doerfer plan of programming an hour in prime time each week but in non-competitive time periods with one half-hour turned back to the affiliates every third week for their own use in local information programming. This is chiefly because the networks are doing so much more

The international operations of NBC are "going strong" though "the competition is getting pretty keen." NBC is investing abroad where the law permits, is providing management services and is selling NBC programs (both tape and film). President Robert E. Kintner's current Latin American journey includes the objective of opening up new facilities for news.

- Mr. Sarnoff has "no qualms" in stacking up NBC's service "against any criteria," whether in program balance, quality, program types, or leadership in improving the public taste.
- The recent controversial speech of Gov. LeRoy Collins, president of NAB, needs additional study but Mr. Sarnoff believes "the industry should have a strong NAB to represent it" and that NAB "can only have leadership if it has leadership at the top." He feels that in the past, industry leadership has been left to the networks who had to represent themselves and were "perhaps the most articulate." (Mr. Collins' talk was critical of the programming level in tv.)
- It is not always (and in fact it is seldom) that the networks provide the public's general impression of television around the country. There are only three networks, they are large and they program big and so they are "singled out" but the usual impression is "what's fed from a station." A Nation's Future (NBC-TV information show), though programmed by a network, may lose its national value when some stations fail to clear it.

Mr. Sarnoff emphasized that a tv station can easily end up with an unbalanced schedule, though the net-works—and here he bracketed both NBC and CBS—are feeding balanced fare.

The NBC board chairman asserted that the effect of Gov. Collins' speech was in fact to "alert stations as to their program structure," and, he specified, the network program is but part of the station's overall structure.

During the interview, Mr. Sarnoff was asked for his opinion on objections raised recently against certain interpretations by network shows, such as The Untouchables on ABC-TV, and Harvest of Shame on CBS-TV. Did he have a formula for NBC "for staying out of trouble?" Said Mr. Sarnoff: "I think you (a network) would be unsuccessful if you programmed to stay out of trouble." Mr. Sarnoff felt most programs dealing with controversial issues will bring some complaints but that the network's objective is "to present all the facts our research can un-
cover and present them in such a way that the facts speak for themselves," a procedure, he noted, in use in the White Paper public information show.

In other areas covered by Mr. Sarnoff:

- Action-adventure seems to have the biggest hold at the moment in entertainment programming and while westerns would seem to be as popular as ever in the hour form, the half-hour westerns may be "having trouble."
- NBC sees no drastic changes in its selling pattern. Mr. Sarnoff does not expect any changes in daytime TV selling, though the network naturally is watching the effects of the CBS-TV move of selling minutes in its 10 a.m. noon programming (plan went into effect on Feb. 13).

Mr. Sarnoff reflected that he did not think the CBS-TV plan "responsive" to competitive needs, and pointed out that a couple of years ago when NBC-TV was having its own daytime sales problems "we took our losses and poured our money into developing programs" so as to improve the salability.

As for the CBS-TV plan to add game shows in the daytime periods, Mr. Sarnoff emphasized that NBC had never ruled out game shows as such, and that the network always felt they could be policed and therefore kept in the schedule on that basis.

- There may be an increase in the three-network total of nighttime hours sold as participations (that is in one-third of hours) in the fall, but Mr. Sarnoff reminded, this was not to say that all new hour-long shows will be sold in this way.
- The new program prospect appears optimistic. Already buttoned up for the fall: A new Walt Disney hour in color at 7:30 Sunday, feature films at 9-11 p.m. Saturdays, an "important" new hour-long Dick Powell series; and an expectation of probably having a Mitch Miller and a new Dinah Shore (Chevrolet has dropped her show for next season) hour-long series. As to powerhouse carryovers, he pointed to Wagon Train and Perry Como.

There will be a continued and increased emphasis on news and public information shows (there seems to be a rise in public interest for these programs). In the specials category, Mr. Sarnoff predicts, there may be about the same level or just a few less entertainment shows but probably more information programs.

As to new programming forms, it would appear the networks are approaching something of a plateau, at least in black-and-white. It is a more mature medium. The networks now, he thinks, are faced with a constant search for improvement of substance within existing forms, while also looking for new forms. New programming was easier to formulate in the early days of television when everything was new. New forms will be developed in the future but they'll come occasionally.

The current business recession, Mr. Sarnoff reflected, is having some effect on TV both in network and in national spot with some advertisers exercising their rights under short-term commitments, "although I fully expect that they will be back in as we start the new season." Both TV in general and NBC in particular will be up this year over last.

Mr. Sarnoff paid special tribute to the radio network operation, asserting in part:

"I think we have finally found the fundamental answer to maintain a radio network service.

Pat on Back: "You know, you might just give the boys a pat on the back, or the company a pat on the back. With all the brickbats you take sometimes for running a television network, there is very little recognition given to the fact that long, hard years of effort and a lot of money went into maintaining what is an important national service: the radio network. It would not have been hard to drop it.

". . . But it has helped our affiliates maintain their position in their communities. It has maintained a national service that can be called upon instantaneously: it has provided important news."

Some of that answer, Mr. Sarnoff said, lies in the increased emphasis placed on news with the news interest the "keystone" of the radio network, and on the facts that rates were not "depressed" while the conventional relationship of paid compensation to stations was supported.

Of the whole NBC "picture," Mr. Sarnoff concluded: "I think we are in the best position I have seen in a long time. With the new nighttime hits we expect to be coming in we ought to be in real top shape."
THE REACTION TO COLLINS' SPEECH

From Capitol Hill to Bismarck, it's generally favorable

The firm position taken by NAB President LeRoy Collins on behalf of improved programming, public service and industry unity has received favorable reaction from a cross-section of station, business and legislative interests.

Gov. Collins made his views dramatically clear in his first appearance before the NAB board, meeting Feb. 10 in Palm Springs, Calif. (Broadcasting, Feb. 13, 20).

A sampling of presidents of state broadcasters associations, taken last week at NAB's annual presidential conference, showed general approval of Gov. Collins' leadership, with some awaiting actual performance of the new NAB administration.

Ivan W. Sarnoff, NBC board chairman, said the industry needs strong leadership and a strong association. He noted that historically the networks have been forced to represent themselves. Gov. Collins told the board he felt NAB, rather than networks, should be the industry voice and he was critical of industry programming.

On Capitol Hill * Three prominent legislators commented favorably on the talk, taking the position Gov. Collins appeared to be just the man to cure what they regarded as broadcasting's ills.

Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, who inserted the speech in the Congressional Record, said the address had "candor and courage." He added that "If the broadcasters of America heed the advice ... in his speech, I feel they will move in the right direction in discharging the important public responsibility placed on their shoulders."

Sen. A. S. Mike Monroney (D-Okla.), a member of the Senate Commerce Committee, called the speech the "freshest breeze we have heard from the medium that monopolizes the recreation of so many Americans."

A frequent critic of television rating services, Sen. Monroney found particularly rewarding Gov. Collins' all-out criticism of that aspect of the industry, "I take my hat off to Mr. Collins," he said.

Sen. John Marshall Butler (R-Md.), another Commerce Committee member, found the speech a timely warning to an industry that "has shown recent signs of self-satisfaction." He said Gov. Collins' "plan of reorganization might help to produce" a universally respected spokesman and, in addition, "that articulate and persistent voice of conscience which is vital for the growth of every country and industry."

More Reaction * Here are typical comments made to Broadcasting by state association presidents:

Thad M. Sandstrom, WIBW-AM-TV Topeka, Kan.: "Broadcasting needs this kind of forceful leadership and broadcasters must wake up to a lot of these problems. Too many of them are not aware of community responsibility and the need for better programming. People aren't aware of the good programs on the air, creating a need for positive action."

Douglas L. Manship, WBRZ-TV Baton Rouge, La.: "I'm glad we're on the offensive instead of the defensive, for a change."

Floyd Fletcher, WTVD (TV) Durham, N. C.: "He took a very positive position, and did what we ought to be doing. The industry needs a strong program indicating what we are doing and our potential."

Lee Ruwitch, WTVJ (TV) Miami: "His talk was candid and forthright, showing a keen sensitivity to our problems. We can't wash away our troubles. It's better to be honest with ourselves."

Richard C. Johnson, KBOI Bismarck, N. D.: "If he can effectively implement the course he has laid out, we'll be on the right road."

Harold B. McCarley, WBLE Batesville, Miss.: "I believe he will lead broadcasters and the NAB with a full understanding of the industry problems. He has proven his ability as a leader."

Thomas Y. Gorman, WEEI Boston: "Excellent. This type of positive approach is what we need. A concerted broadcasting front will bring better recognition."

Robert C. Walker, WCHV Charlottesville, Va.: "An outstanding address. He said some things that will make people sit up and take notice. Broadcasters who have their hearts in the industry should be pleased with it."

A. D. Smith Jr., WMTS Murfreesboro, Tenn.: "I'm convinced he'll be a good leader and good for the industry."

In a letter to Broadcasting, an independent operator, Stephen A. Cisker, WLVL (FM) Louisville, said: "For the first time it has been suggested by a top NAB official that the organization start representing the stations and not just the networks ... I propose that those of us who have remained outside the NAB now get behind President Collins by becoming active members where possible."

Hawaiian girl wins Voice of Democracy

Fifty-one winners of Voice of Democracy statewide broadcast scriptwriting contests received their awards and all-expense Washington trips last week, winding up with the annual luncheon held Feb. 22 at the Statler Hilton Hotel.

All winners made it to Washington despite airline strikes and bad weather. Carol Ogata, of Pahoa, Hawaii, named top winner, was grounded when she reached the West Coast but friendly travelers gave up air accommodations to help her reach Washington.

Miss Ogata was awarded a $1,500 scholarship. Second winner was Miss Briony Sharan, of Peterborough, England, an exchange student who won the New York State contest. She received a $1,000 scholarship. The other two finalists were Joseph G. Quill Jr., Raynham, Mass., $750 scholarship and William C. S. Mays III, Providence, R. I., $500 scholarship. The four finalists received gold recordings of their winning scripts on the theme, 'I Speak for Democracy.'

LeRoy Collins, NAB president, presided at the awards luncheon. Participants in award ceremonies included Associate Supreme Court Justice Tom C. Clark, L. Berkley Davis, General Electric Co., president of Electronic Industries Assn.; T. C. Connell, commander-in-chief, Veterans of Foreign Wars; Wayne O. Reed, deputy U. S. Commissioner of Education; FCC Chairman Frederick W. Ford, and Dr. Ellsworth Tompkins, executive secretary of the National Assn. of Secondary School Principals.

The contest is jointly sponsored by state broadcaster associations, NAB, EIA, and the VFW. A board of judges selected the four finalists.
WCBS-TV ON THE 10th ANNIVERSARY OF THE LATE SHOW AND IS PROUD TO HAVE CONTRIBUTED THE TOP-RATED FEATURE FILM ON FOUR OF THE SEVEN NIGHTS OF THE WEEK DURING THE PAST 5 YEARS.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KIOA Des Moines, Iowa: Sold by Lester Kamin to W. Clark Swanson, George A. Bolas, Robert A. Hall and William E. Worthing for over $600,000. Mr. Bolas is Chicago advertising executive; others are businessmen. Mr. Kamin retains KAKC Tulsa and KBKC Mission, Kan.; he bought KIOA in 1957 for $185,000. KIOA operates with 10 kw day, 5 kw night on 940 kc and is affiliated with MBS. Blackburn & Co. acted as consultants in this transaction.

• WMET-AM-FM Miami Beach, Fla.: Sold by James R. Williams and associates to George I. Norman and Cloyd Wangsgard for $250,000. Mr. Norman owns KSVN Ogden, Utah and has an interest in KTWL, Golden, Colo. Mr. Wangsgard is an accountant. The Williams group acquired the station in 1958 for $150,000. WMET is 250 w on 1490 kc; WMET-FM operates on 93.3 mc with 13 kw. Broker was Paul H. Chapman Co.

• KRES St. Joseph, Mo.: Sold by Jock MacGregor and Raymond J. Cheney to Earl F. Hash, Charles Cutler, and Mrs. Mabel F. Perry for $115,000. Mr. Hash owns WTMT Louisville, Ky. KRES is 5 kw on 1550 kc, affiliated with MBS. Broker was Hamilton-Landis & Assoc.

• WBAZ Kingston, N.Y.: Sold by Austin Harkins to Olin Tice and George Bryan for $104,500. Mr. Tice controls WKEN Dover, Del.; WCAY Columbia and WMYB Myrtle Beach, both South Carolina; WKTC Charlotte, N.C., and is half-owner of WBQ Augusta, Ga. WBAZ is 500 w daytimer on 1550 kc. Broker was Edwin Tornberg & Co.

• WEMB Erwin, Tenn.: Sold by Max Blackmore to V.F. and H.E. Jackson and James E. True Jr. for $55,000. Mr. True formerly was a broadcasting station executive in southwestern Virginia; Messrs. Jackson are in oil distribution and in the retail hardware and furniture businesses. Mr. Blackmore is 50% owner of WCVP Murphy, N.C. WEMB is 5 kw day on 1420 kc. Broker was Paul H. Chapman Co.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 76).

Outstanding Exclusive Broadcast Properties

This is a powerful 24-hour operation in a solid top-100 market. Area is growing fast and has a good diversified economy. Large cash requirement with a 6 year payout at 6%.

Daytime property in an excellent market that has a high income standard. Heavy cash requirement. Negotiable terms and down payment.

A good 250 watt fulltime facility along with a popular FM. Market is an established metropolitan area. Combination operation with real estate. Liberal payout.

Roy Danish, assistant director of the Television Information Office, discusses program notes with Mrs. Dorothy Doolin, acting director of broadcasting for the New York Board of Education, before the opening of the first session Feb. 16, of a 15-session comprehensive course on television offered by the city’s school system at the Donnell Library Center. Entitled “Television in Today’s World,” the in-service course is being taken by some 260 New York City school teachers for their general instruction and to help them direct students to more discriminating tv viewing.

• WRIB Providence, R.I.: Sold by Frank and John Roa and Irma Pace to Paul J. Perreault and associates for $225,000 and agreement not to compete.

• KFST Fort Stockton, Tex.: 55% interest sold by George, Frank and Emily Baker to Billy H. Hubbs, Kenneth Z. Bond and Rex L. Billingsley for $37,750. Mr. Hubbs and father, Barney Hubbs, have interests in KIUN Pecos, KVLF Alpine, both Texas. Mr. Hubbs Sr. has interest in KVFC Cortez, Colo.

Bartell group buys control of Macfadden

The Bartell Broadcasting Corp. has acquired control of 62-year-old Macfadden Publications Inc., it was announced last week by Irving S. Manheimer, Macfadden board chairman. Bartell and others paid approximately $1.5 million for 30% of Macfadden.

At a special meeting of the company’s board of directors, Gerald A. Bartell was elected president, replacing Mr. Manheimer, who was named chairman; Lee Bartell was elected secretary. The Bartell brothers were elected to the Macfadden board, replacing A. A. Whit-
ford and Edward McSweeney. Mr. Manheimer will continue actively with the company. No other personnel changes were contemplated.

Macfadden Publications publishes True Story, Photoplay, TV Radio Mirror, True Love, True Experience, True Romance, Sport, Saga, Climax, True Detective and several annuals and periodicals. Bartell Broadcasting owns and operates WADO New York, WOKY Milwaukee, KYA San Francisco, KCBQ San Diego and also controls and operates three television stations in the Dutch West Indies.

ITALIANS TO PICKET
They're still dissatisfied with ABC's 'Untouchables'

In a stormy meeting held on Feb. 17, the board of governors of the Federation of the Italian-American Democratic Organizations of New York voted to picket ABC on March 9 in protest of The Untouchables program. The board's action came after they had heard a report on the Feb. 1 Washington meeting of Congressmen Joseph P. Addabbo (D-N.Y.), Victor L. Anfuso (D-N.Y.), Alfred E. Santangelo (D-N.Y.), and ABC Vice Presidents Thomas W. Moore and Alfred Schneider (BROADCASTING, Feb. 20).

Rep. Santangelo, president of the Italian-American group, said that the "assurances" given to himself and Congressmen Addabbo and Anfuso by ABC not to link crime and Italian or Italian names in subsequent programs of The Untouchables were "unsatisfactory." Besides reaffirming their determination to picket, the board voted to invoke "economic sanctions" against sponsors of the high-rated ABC-TV crime series. The program currently is being sponsored by L&M Cigarettes on alternate two-thirds and one-third participation by Beecham Ltd. and Armour & Co. on weekly one-sixth participations, and by Whitehall Labs on alternate one-third participations.

The board listed five reasons for rejecting the network's conciliatory efforts. Among them were charges that The Untouchables was still using a disproportionate number of Italian characters and in repeated instances using the name of an actual Italian person allegedly involved in various criminal activities without offering any substantiating proof of these claims. Four future shows, April 13, 20, 27 and May 14, in the ABC-TV series were cited by the board as using a central Italian criminal character. The program was also charged with contributing to juvenile delinquency by its emphasis on violence and crime. The Italian-American group further charged that the disclaimer ABC is now making at the end of each Untouchables program labelling portions of the show as "fictionalized" are lost among a welter of post-program commercials. Congressmen Santangelo, Addabbo and Anfuso have been authorized by the board to hold another meeting with ABC officials before March 3, the date of the federation's last scheduled meeting before the March 9 picket deadline.

How television can change viewers' minds

The usefulness of television for altering consumer attitudes was emphasized last week in a research report issued by the National Safety Council. The report analyzed viewer opinions before and after the Dec. 26 telecast of "The Great Holiday Massacre" on CBS-TV, one of the CBS Reports programs with Edward R. Murrow (AT DEADLINE, Feb. 20).

The study, claimed the first of its kind involving documentary programs, showed that basic advertising principles apply just as much to the "selling" of concepts as safety to consumer products. The conclusions indicated that safety documentaries have placed too much emphasis on merely inciting anxiety (horror of accidents, crash scenes, etc.) that they have not adequately demonstrated the "product" benefits that would enable an individual to translate his anxiety into specific things he can do to avoid accidents. This does not mean generalities such as "drive safely," found to be totally ineffective, but careful point-by-point teaching of "how" to drive safely.

Only television provided the built-in controls necessary for isolating and studying viewer attitudes, said John Naisbit, public information director for NSC.

In the CBS-TV program, the study noted, two drunk on screen less than three minutes had the greatest impact on viewers, but the effect was not helpful from a safety education standpoint.

What happened, the study said, was that the average driver subconsciously found the two drunks, as well as reckless teenagers, speeders and other atypical "scapegoats" enabled him to get himself "off the hook." Research study was made by Creative Research Assoc., Chicago.

A threat in FCC’s new program forms?

EXHAUSTIVE REQUIREMENTS PROMPT TWO COMMISSIONERS TO QUESTION

Drastic revisions planned by the FCC in its program reporting forms were made public last week with two commissioners—in concurring statements—expressing grave misgivings. They feared the required data would place the commission in programming and administrative areas where it has no business.

Ten days earlier, the FCC had announced its proposed rulemaking and asked for comments by April 3 (Broadcasting, Feb. 20). Specifics to be reported were disclosed for the first time last week after months of study which began with en banc hearings in December 1959.

The commission stated that replies to the questions will be used to compare a licensee’s past performance against future promises. In addition to renewals, applicants for new stations and for transfer approval would be required to complete the forms.

Replies to the new forms will be of considerable length and entail a great deal of work for the applicants. If the rules are adopted, for instance, stations would be required to describe their service area with such factors as population, foreign language and minority groups, agricultural population, religious and educational institutions, recreational, sports and cultural facilities, other broadcast services and newspapers.

Another “brief statement” would be required detailing steps taken by the applicant during the past three years to ascertain the needs and interests of his audience, followed by these three requests:

“State the scope and results of consultations with civic leaders, including but not limited to public officials, educators, religious leaders and representatives of agriculture, business, labor, nonprofit organizations and the professions with respect to the needs of their groups.

“How does the applicant propose to translate into its schedule programs designed to fulfill the needs found through the consultations and efforts described above?”

“State the extent to which, and the procedure by which, complaints and suggestions from listeners have been and will be considered by the applicant and acted upon if appropriate. For past operation, give specific examples.”

Leading Community Issues • Another section on controversial issues of public importance requires the applicant to describe at least two local issues for each of the past three years and specific programs broadcast in connection therewith. The applicant also is asked about his past and proposed handling with respect to fair presentation of controversial matters, including the frequency of editorials and the opportunity for presentation of opposing views.

The applicant is directed to describe steps taken to encourage development of local talent and whether past or proposed programming falls into a specialized category, such as popular music and news. If the answer to the latter is yes, the broadcaster would be required to tell how he has determined that such specialization is in the public interest “... with appropriate attention being given” to the same “speciality” of one or more stations in the same community.

On review of programming, the FCC would require this information: “State your policy and practice and describe regular procedures within your organization for review of programs and advertising prior to transmission or exhibition through your station: (a) as to programs produced or originated by your station; (b) as to non-network programs produced by others (syndicated programs, etc.) and originated by your station; (c) as to network programs.

A breakdown of the weekly average of programming in eight categories, both past and proposed, is asked for in the new forms. They would require specifics on whether the programming is carried daily or weekly and the average number of hours or minutes per week. Categories include religious instructive, public affairs, agricultural, news, sports, entertainment and other (specify). Gone from the old renewal forms are such categories as educational (replaced by instructional) discussion and talks. New are sports, public affairs and instructional.

Code Subscriber? • The new form would require the applicant to state whether he “adheres to the principles of any code of broadcasting ethics” but does not ask outright if he is a code subscriber. Also, “what measures the applicant has taken or proposes to take to insure the maintenance of programming and advertising standards.”

An explanation is asked about the average weekly time devoted to programs prepared by, in behalf of, or in

Minow entourage arrives

Newton N. Minow will be sworn in as chairman of the FCC this Thursday (March 2) at 10:30 a.m. He will receive the oath from Supreme Court Justice William O. Douglas.

Mr. Minow chose Thursday to replace present Chairman Frederick W. Ford to avoid assuming command on a regular FCC meeting day—Wednesday. He said that he probably will not attend the Wednesday meeting since he will not then be an official member.

It was learned authoritatively last week that Seattle attorney Kenneth Cox will become general counsel of the commission, although neither Mr. Minow nor Mr. Cox would definitely confirm it.

Mr. Cox will take over the general counselship early in April, at which time the incumbent, John FitzGerald, will attain 25 years of government service. At this plateau, Mr. FitzGerald can retire under involuntary separation with an annuity based on his highest average salary for the past five years. He became general counsel in September 1958 and prior to that had been chief of the Office of Opinions & Reviews.

The new chairman’s confidential assistant will be Gloria Coe, formerly with Guild, Bascom & Bonfigli, San Francisco, and aide to J. Leonard Reinsch, director of the 1960 Democratic convention, during last summer’s convention preparations. Another Minow aide, former ABC attorney Tedson Meyers, reported for work at the commission last Thursday (Feb. 23). He is slated for the post of legal assistant to the chairman.

After winding up his Chicago law practice, Mr. Minow arrived in Washington late last week. He was confirmed by the Senate to serve on the FCC until June 30, 1968. When he is sworn in, Charles H. King, an Eisenhower recess appointee will go off the FCC. Mr. King, on leave as dean of the Detroit College of Law, plans to return to that post in the near future.

Thursday
WLEX-TV pioneer station in industrial Kentucky, is pleased to announce the appointment of the PAUL H. RAYMER CO. as its national representative... effective immediately.
cooperation with educational organizations exclusive of sporting events. The maximum and minimum daily operating hours of recorded, live, network and total operating hours also must be detailed.

On commercial operation, the broadcaster is asked to state the maximum amount of commercial time during any one hour of the day (both spot and continuity) which he has broadcast in the past and plans in the future—plus the maximum number of spots in any one hour.

Fm stations which duplicate the programs of am outlets serving the same general area would be required to "state . . . the basis for applicant's belief that such duplication serves the public interest of the area served."

Operating Policies • Under this heading, the commission made inquiry into an area which at least one member said was the lone preserve of the licensee and of no concern to the government. The required information:

"State applicant's general plans for staffing the station, including the number of employees in each department . . . ."

The document describes all programming types asked for in the new forms with the additional intelligence that it is determined by the character of the program material, not the nature of whatever commercial material or non-commercial spots are carried. Other definitions include such programs as network, recorded, live, commercial, participating and sustaining, plus commercial and non-commercial spot announcements.

Retained from the old forms is the composite week, which Chairman Frederick W. Ford said that he would have eliminated. He also would have required the applicant to "better reflect the actual programs proposed and broadcast as well as the number of weeks involved," plus the time per week.

Both Commissioners Rosel H. Hyde and T. A. M. Craven said that they concurred in the issuance of the notice for the taking of comments but their agreement with the majority generally ended there. "I have misgivings concerning certain phases of the procedures proposed and the possible overall implications," Commissioner Hyde said. He continued:

"The approach, however well intended, in which the licensing authority endeavors to prescribe certain guidelines for the programming of stations would seem to assume responsibilities which should remain as the clear responsibility of licensees. The more the agency gets into this business, the more impossible its position is likely to become. It could find itself being held responsible by the public in matters involving creative effort, taste and opinion, which it would be hopeless to deal with aside from the traditional objections against government intervention in such matters and the specific prohibition of Sec. 326 [anti-censorship provision of the Communications Act]."

Adverse Reaction • Commissioner Hyde said that he also is concerned "that this attempt to give direction may tend to limit rather than expand the potential of broadcast services." He said that it would be most difficult for an applicant to put the tastes, needs and desires of his community into a written formula.

"Does it assume that a definitive statement of actual needs can be posted for each community to be used as some kind of a standard for weighing of the services of all broadcasters serving the community?" he asked. "If, on the other hand, it means submission of an applicant's opinion or judgment . . . how can the agency undertake to approve or disapprove?"

Commissioner Hyde said there is a need for diversity and competition as opposed to conformity and sameness which would be the product of the proposed new forms. He suggested the

FCC put more emphasis on the showing it requires of an applicant as to the effort it makes to provide a successful and useful service and on steps taken to insure integrity of service.

Commissioner Craven agreed with Chairman Ford that the composite week should be deleted. He also took issue with the requirement that the number of hours devoted to various types of programming be specified. “I have been in the past, and I will continue to be, unalterably opposed to the commission establishing guidelines for the programming of broadcast stations,” he said.

The commissioner maintained that this is the legal obligation and privilege of the licensees and that it is “...not for the government to ascertain the mass communication needs, tastes and desires of the communities of this country. Establishment by the commission of programming types which the applicant must follow in order to be seriously considered by this agency would mean the throttling of initiative, creative thinking and the legal rights and duties of licensees in violation of the censorship provisions of the Constitution and the Communications Act.”

It is the government’s duty merely to determine whether the licensee has the sense of responsibility required to operate a station in the public interest and whether he has been diligent in ascertaining the needs, tastes and desires of his community, Commissioner Craven declared.

More power urged for vhf television boosters

The Senate Communications Subcommittee last week heard mountain state witnesses urge the adoption of new FCC regulations for vhf boosters.

Sen. Gale McGee (D-Wyo.), who held hearings Feb. 21 and 22 in Salt Lake City, Utah, and Casper, Wyo., cited the “obvious” need of regulations to control the duplication of service by boosters and local stations that exists in some areas. He said the stations want protection.

He also said that a number of witnesses, especially in Casper, expressed the need for more power than the one watt allowable under present regulations. He said they recommended that the FCC consider each booster station individually. Particularly high mountains in the area were given as the reason for the need for more power.

Sitting with Sen. McGee was Sen. Frank E. Moss (D-Utah). He is not a member of the Commerce Committee, but he wrote the original booster bill which was enacted last summer after revision by the committee. Representing the FCC at the hearings was Commissioner Robert E. Lee.

**SUSPENSE ON CAPITOL HILL**

Long overdue ‘impartial’ report on rating services may be released any time now

The suspense among those who provide television’s rating services and those who use them—as they await a so-called “impartial” report to Capitol Hill on ratings, overdue since Jan. 3—was becoming almost unbearable last week.

Those who had seen a lengthy questionnaire sent to the ratings services last summer by a three-man commission—sponsored by the American Statistical Assn.—could well understand why.

The awaited report, the legacy of the late House Legislative Oversight Subcommittee, now is reported far enough along that it may be released any day, and almost certainly within the next three weeks.

The nervousness, which is evident among those who use the ratings services as well as those who provide them, is based on the awareness of the motives of Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee which inherited responsibility for the ratings report from its former subcommittee, and other members of the committee.

The ratings services and their users have reasons of their own to believe that some congressmen who participated in the 1959-60 tv quiz and payola scandals show have reasons of their own to try to put ratings in a bad light.

The ratings services, in other words, already have answered all the questions the three-man Technical Committee on Broadcast Ratings is going to ask, and none of them have complained openly about the comprehensive questionnaire and the ensuing personal visits and “hundreds” of phone calls. They’re worried that congressmen, those who have worried most vociferously about ratings, may choose to withhold the report if it’s favorable to the present ratings systems, or may extract from it only information which suits their own purposes.

As the head of one major rating service put it: “We want to see all the report released, whether it murders us or not.” But the same man, who is, after all, a statistician, couldn’t bring himself to believe that a report by three eminent members of the American Statistical Assn. would be so black for the future of broadcast ratings.

One rating service spokesman said he suspects the report already in the hands of House Commerce Committee members. It’s almost certain congressmen have at least a working draft of the report by now.

The lengthy questionnaire actually was only a beginning, it was understated, in that answers to the questionnaire suggested further questions, and so on.

The ratings inquiry was the last major project of the Oversight Subcommittee, which had heard testimony in its tv quiz scandal hearings to the effect that quizzes were rigged to intensify audience excitement and thus bolster ratings. Whether Rep. Harris felt ratings to be cause or effect, he announced last March that Oversight had asked the ASA to examine the validity of ratings (BROADCASTING, April 4, 1960).

The ASA group is headed by Dr. William G. Madow of the mathematical statistics department of Stanford Research Institute, Menlo Park, Calif., and includes Dr. Raymond J. Jessen, General Analysis Corp., Los Angeles; Dr. Herbert Hyman, acting head of the sociology department at Columbia U., New York, and an undisclosed number of staff people. The group’s expenses are being underwritten from Oversight Subcommittee funds.

The questionnaire to the ratings services:

1. Name of survey for which information is provided.
2. What is the population concerning which you wish to make estimates?
3. What is the population from which you select your sample?
4. How do you select your sample?
   a. What is the frame or list from which the sample is selected?
   b. How do you select from the elements of the frame or list?
   c. What elements do you exclude from the list?
   d. How many elements do you select?
   e. How do you deal with shifting households and population growth in your sampling frames?
   f. How do you define the household or family about which information is obtained? What about roomers, etc.?
   g. What characteristics are you trying to measure? (e.g. sets on, station tuned, number of persons watching [or listening], program identification, sponsor identification, audience composition, etc.)
5. What interviewing technique do
Nielsen Station Index now measures TV viewing of all stations in U.S.

NSI reports TV use seasonally...market by market...station by station...with time-period totals, ratings, audience composition, and other significant performance data.

Launched in 1954 in only a handful of major markets, NSI now measures continental U.S. in its entirety. So comprehensive is today's NSI service that it warrants its own Directory of TV Stations and Cities.

This brand-new reference cross-indexes more than 560 U.S. TV stations now in operation, their 300 home cities, and the 200 NSI Report books in which the station audiences are reported.

NSI is the only validated source of station audience facts. In addition, it is the most complete and comprehensive audience measurement service...

providing reliable information for broadcast advertising decisions.
you use (telephone, diary, mechanical or electronic device)? Specify.
6. What procedure do you use if you obtain a refusal?
7. How many refusals do you obtain at first contact?
8. How many of those who refuse then enter the survey after further contact?
9. Do you substitute when a refusal occurs and if so, what technique do you use?
10. What procedure do you use when someone is not at home at the first contact?
11. Do you make callbacks, and if so, when and how many callbacks do you make before treating the sampled unit as a "not-at-home—repeated call."
12. List the other reasons by which you classify non-interviews and frequency with which each occurs.
13. How do you contact the elements of the sample? Do you make a personal call? Do you write to them? Do you telephone them? Please indicate which you do and indicate several if you do more than one.
14. How do you select the staff who visit the elements of the sample?
15. For what purpose is the visit made?
16. How often are the visits made?
17. How do you select the staff who make the telephone inquiries?
18. Do they ever telephone the same household for more than one survey?
19. How do you check on whether they are actually calling the right households and whether they are performing the interview satisfactorily?
20. What training do your interviewers obtain?
a. How long does the training last?
b. Does the interviewer interview respondents under the supervision and observation of the trainer?
c. Is the work of the interviewer checked by the trainer after the interviewer goes out on his own?
21. How many interviews do your interviewers make each day, and how many interviews will an interviewer make during an entire survey?
22. For this survey, list for some time period the number of interviews made by each interviewer.
23. How are households assigned to an interviewer?
24. What do you do about schedules that are lost?
25. How do you edit?
26. What estimates do you make? Please state the formula or procedure that you use in computing each of the estimates.
27. How do you weight data in making estimates?
28. Do you provide sampling errors? (By table? By formula? By other means?)
29. How are your studies validated?
30. Have you ever run other studies or obtained other data or have others done so that seemed to provide evidence concerning the reliability of the information obtained in your surveys? Please list such studies.
31. How long do households stay in the sample?
32. At what rate do they drop out?
33. How do you replace drop-outs?
34. What studies have you made of the effects of having the same households stay in the survey over the periods mentioned?
35. To what conclusions have these studies led?
36. How do you deal with households with more than one set?
37. Where your survey is confined to a single week out of a month or some other fraction of a "rating period," how do you choose the survey period (for example: the first week of each month)? What difficulties, if any, would you encounter if your survey period were kept secret?

Portland grant made final

Going along with an initial decision issued Dec. 31, 1959, the FCC last week granted Fisher Broadcasting Co.'s application for ch. 2 in Portland, Ore., and denied the competing application of the Tribune Publishing Co. Fisher's principal owner is O. D. Fisher and family (60%), owners of KOMO-AM-TV Seattle. The other applicant publishes the Tacoma News-Tribune and owns KTNT-TV Tacoma.

The commission also made effective an initial decision of Nov. 8, 1960 which grants ch. 8, Christiansted, St. Croix, V.I., to Supreme Broadcasting Co. of Puerto Rico. The application of Radio American West Indies Inc. for the same facility was dismissed without prejudice. The two companies had previously reached a merger agreement.

Supreme operates WORA-TV Maya-guez, P.R.

Government briefs...

Unfair practices • WATE-AM-TV
Knoxville, Tenn., engaged in unfair labor practices in 1960 by refusing to bargain with the International Brotherhood of Electrical Workers, according to a Feb. 16 intermediate report and recommended order by Stephen S. Bean, trial examiner of NLRB. The stations were directed to cease refusal to bargain with the IBEW local.
throw the switch for 250 watts nighttime

With the Gates BC-IT 1000/250 watt transmitter, you efficiently reduce power to 250 watts nighttime operation by changing the primary voltage of the plate transformer. In this manner, when operating at reduced power of 250 watts, the primary power consumption is at a minimum, and the use of plate voltage dropping resistors, which are power consuming, is eliminated. The reduced plate voltage at 250 watts power to both the modulator and power amplifier tubes results in hundreds of added tube hours and a great savings in power cost.

The exclusive Gates feature of the inbuilt dummy antenna will also be appreciated by the engineer. With two-power operation at 1000 and 250 watts, initial alignment and periodic proof of performance required at two power levels is accomplished with utmost simplicity.

In summary, the BC-IT 1000/250 watt transmitter offers you the convenience of already having a one kilowatt transmitter installed—needing only to throw the switch for a change in power. Power change may also be remote controlled.

For complete technical information on the BC-IT 1000/250 watt transmitter, write today for Engineering Bulletin No. 109-D—yours for the asking.
RULES UNIT WON'T WAIVE THE RULES

Rayburn bloc blocks House vote on tv committee coverage

House Rules Committee Chairman Howard W. Smith (D-Va.) won new fame as a needle last week when his group held hearings on a proposal to permit the televising of House committee hearings.

But Speaker Sam Rayburn (D-Tex.), the object of the needle, had the votes, and used them to shelve the issue 8 to 6.

The speaker has consistently ruled against radio-tv coverage on the ground that it would impair the dignity of House proceedings. However, broadcasters did cover committee hearings during the Republican-controlled 83rd Congress, when Rep. Joseph W. Martin (R-Mass.) was speaker.

Calling up the tv measure, known to be anathema to the speaker, was Chairman Smith's reaction to the House vote last month to increase the size of his committee and, in effect, transfer its control to Speaker Rayburn.

That fight was over the issue that Chairman Smith bottled up too much legislation. But last week it was Speaker Rayburn's loyal majority that put the stopper on bills.

The rules committee action on electronic coverage was on a resolution submitted by Rep. George Meader (R-Mich.), who since 1955 has vainly urged adoption of a rule that would authorize committees to permit camera and microphone coverage of their hearings, as presently authorized by Senate committees.

The hearing originally was scheduled for two resolutions authored by Rep. Martha W. Griffiths (D-Mich.). They called for opening the House chamber as well as its committees to radio and television coverage.

Have Bill, Will Travel • But Rep. Griffiths, who has been introducing these resolutions since 1956 to no avail, was in Detroit when the hearing came last week. She said she needed more time, but some observers suggested she was absent on Speaker Rayburn's advice.

Rep. Meader, whose resolution would give House committees discretion to set the terms for broadcasts of their hearings, said, "If self-government is to work, people have to know what their representatives are doing." And there's no better way, he contended, than through radio and television.

He also appealed to the committee members' pride in their House. Pointing out that President Kennedy uses television to get his views across to the nation and that some Senate committee members have become household figures because of televised hearings, he said, "Why should there be a blackout in the House? Won't that down-grade House members?"

Rep. Meader received support from the only other witness to be heard, Rep. J. Arthur Younger (R-Calif.). He said the Un-American Activities Committee is an example of a House committee that would benefit from television. "It would show the public what that committee is up against, and the public would have a different attitude toward it."

Indubitable • The questions and comments of the Rules Committee members, however, removed whatever doubt there was as to how the vote would go.

Rep. James J. Delaney (D-N.Y.) remarked that the New York City Council permitted television coverage of its proceedings but had to end it when the meetings became a "burlesque and a comedy show."

Rep. Ray J. Madden (D-Ind.) indicated the extent of his interest by inquiring about color television. "Do we have to go into make-up rooms?" he asked. And Rep. Clarence Brown (R-Ohio) expressed fear for the lives of many House members "who might get killed" rushing to get in front of the cameras.

It was Rep. Brown, however, who gave the resolution's proponents the stiffest going-over, even though he is presumed to have voted to clear the proposal for the floor. (He normally votes with Rep. Smith in the conservative coalition that previously dominated the committee.)

Rep. Brown's concern was with "doctored" telecasts of committee proceedings. "Would the tv camera be permitted to pick up what it wants to pick out and neglect what it wants to neglect?"

Plastic Surgery • He observed that words can be erased and even transposed on tape, and film edited, and added: "A clever editor sitting in New York could change completely the picture of a committee hearing." Rep. Brown has introduced legislation to prohibit the broadcast of recorded discussion programs edited without the express consent of those involved.

"If it's broadcast live, that's all right," he said. "But if it's broadcast later, then it can be altered and edited. Many tv stations and national organizations are concerned about it, according to the mail I've received," he said. "They feel the programs are getting into the area of propaganda."

Rep. Meader conceded the possibility of distorted television, but said, "I have more faith in the honesty of telecasting than that."

The day after the defeat of his measure in the Rules Committee, Rep. Meader went to the floor of the House to score the Rayburn majority for being "unwilling to let the House pass judgment" on the resolution.

The senator thought the words appropriate

 Sen. Warren G. Magnuson (D-Wash.), stepped briefly into the space age last week when he placed a half-million-mile telephone call from his office in Washington to Seattle, Wash., via the moon.

The call was a signal to start ground-breaking ceremonies for a $3.4 million Federal Science Pavilion at Seattle's Century 21 world's fair. The senator's voice was carried by land line to Bell Telephone Laboratories at Holmdel, N. J., where it was transmitted via short wave (frequency 960.5 mc, 10 kw transmitter) to the moon. On its return, the Senator's message was received by the General Electric Laboratory at Schenectady, N. Y., placed on American Telephone & Telegraph land line and microwave facilities and carried to its destination. The roundabout route required 2½ seconds.

While Senator Magnuson was waiting to be "cut through on the moon circuit," as one of the telephone company technicians put it, his line became involved in an old-fashioned crossed wires situation with a Glendale, Calif., woman trying to telephone Washington state. When informed she was talking to Washington, D. C., she exclaimed "Good heavens!"—a remark Sen. Magnuson thought "very appropriate."

DIXON, KINTNER ON BROADCAST ADS

Incoming, outgoing FTC heads strongly oppose deception

The Federal Trade Commission may strike out in new directions—most probably in the monopoly field—under Paul Rand Dixon, its chairman-designate, but the agency will continue to scan television and radio advertising with the same attention it has in the past.

These sentiments were expressed last week by Mr. Dixon, who, having been nominated to be chairman of the FTC, succeeding the present Republican chairman, Earl W. Kintner (BROADCASTING, Feb. 13).

The monopoly-minded Tennessee Democrat has strong views on false and misleading advertisements. In his mind shady advertising is one of the sharp practices that are just as much "a detriment to free enterprise as monopoly or price discrimination."

"What is the purpose of a false tv commercial?" Mr. Dixon asked rhetorically. His answer: "Monopoly, of course."

Mr. Dixon speaks from a strong FTC background. He was with that agency 20 years (with time out for Navy service in World War II). In 1957 he joined the Senate Antimonopoly Subcommittee headed by fellow Tennessean, Sen. Estes Kefauver (D). This committee, with Mr. Dixon as its chief counsel, has warred on pricing policies in the drug, automobile and steel industries.

Looked - The stocky, 47-year-old lawyer acknowledged that over the years, the committee staff looked into such broadcast matters as talent agencies, music licensing and network operations as possible subjects for investigation. None, however, ever developed.

One subject that did come before the committee was blackouts of baseball games. This was during the committee's hearings on baseball and the antitrust laws.

He questioned whether the FTC has primary jurisdiction in these matters. They seem to be more in the province of the Dept. of Justice, he speculated.

As for broadcasting's responsibility for commercial continuity, he continued, this might be more in the area of FCC jurisdiction. The FTC, however, does have responsibility for deliberate acts.

Mr. Dixon expressed strongly his feeling that all media must guard against misleading advertising. This is the responsibility of business and of all citizens, he said.

No Letup - Don't relent. This is the advice from retiring FTC Chairman Earl W. Kintner who discussed broadcast advertising last week.

"The great danger in reform move-

ments," Mr. Kintner said, "is to let up and permit a return to old practices. Advertising and broadcasting," he added, "cannot afford backsliding."

If new scandals should occur in broadcasting, or in advertising, Mr. Kintner felt it is doubtful whether they can escape legislation. "Self-improve-

ment must be maintained," he stated.

The Indiana lawyer, who is going into private practice after his successor takes over (see WEEK'S HEADLINERS, page 10), said voluntary regulation is still the best defense against more government controls. As for broadcasting, he said, the tv and radio code boards should do even more than they are doing now. He said he means by this that they should continue striving to embrace all tv and radio stations under the codes. They should also, he added, maintain a continuous review of code provisions, and seek to improve methods and practices.

Firmness - Plumping for clear and determined sanctions, Mr. Kintner observed that enforcement teeth are necessary to make a voluntary code work; "otherwise," he said, "a wayward broadcaster can bring the whole industry into disrepute."

The quiz show and payola scandals during the last two years, Mr. Kintner observed, actually helped the broadcasting industry. They opened the eyes of responsible members to the harm that was going on.

Mr. Kintner said credit for the clean up should go to those "statesmen" in advertising and broadcasting who are "voices in the wilderness" committed to professionalizing their crafts. These men must be kept in the saddle, Mr. Kintner warned, or government regulation will encroach more and more.

"The good health of broadcasting affects everyone," the FTC chairman said. "If a few broadcasters give the industry a black eye, they should be quarantined by their peers. Otherwise the government will quarantine the whole industry."

Applicant challenges Miami ch. 10 ruling

Charge that the FCC may not revoke a grant without a hearing was made last week by National Airlines. The argument was submitted to the U. S. Court of Appeals in Washington as all parties in the Miami ch. 10 case filed replies to previous pleadings.

National Airlines claimed that the commission's action in revoking its 1957 grant and issuing a new permit to L. B. Wilson was illegal because no evidentiary hearing was held. The hearing before special examiner Horace Stern, National declared, was to determine whether allegations of off-the-record contacts with commissioners had sufficient substance to support further proceedings. The Stern hearing, National said, was more like a grand jury hearing.

Last July, the FCC ordered National Airlines off ch. 10 and voted to give the grant to L. B. Wilson, the only one of the original four applicants it found untainted with ex parte activities.

In other reply comments:

- North Dade Video Inc. claimed that the FCC erred in holding that it was disqualified because former FCC commissioner and former congressman Robert F. Jones had been hired to persuade Congress to prohibit an airline from holding a tv permit. This was not improper, North Dade said.

- FCC opposed the argument submitted previously by Elzey Roberts, former St. Louis broadcaster, that the Miami channel should be thrown open to all comers. Mr. Roberts, the FCC said, had no standing, since he is trying to enter a case which has gone through the hearing process.

- L. B. Wilson also attacked the Roberts' intervention plea. It claimed not only that the regulations prohibited the acceptance of his late application, but that under his argument National Airlines would be continued on the air although the FCC has found it disqualified to be a licensee.

- Mr. Roberts attacked the qualifications of L. B. Wilson to be a licensee on the ground that the ownership of the applicant had changed considerably since it filed its original application, and
Look for a tougher antitrust attitude

It's a tough antitrust lawyer President Kennedy has picked for the role of administration trust buster. Lee Loewingr, a justice of the Minnesota Supreme Court, was named by the President to be chief of the antitrust division of the Dept. of Justice (Broadcasting, Feb. 20). His nomination is expected to go to the Senate shortly.

Judge Loewingr is known in Washington as a strong believer in private antitrust law suits as balance wheels in the workings of the Sherman and Clayton Acts.

If his policies are put into effect at the Dept. of Justice, all industries, including broadcasting, may see a surge in private, treble-damage antitrust suits.

Three years ago, testifying before a Senate Small Business Committee, Mr. Loewingr criticized the Justice Dept. and the Federal Trade Commission for agreeing to too many consent judgments. This technique, he stressed, forestalled private suits. He urged a policy of strong reliance on private actions to accomplish the purposes of the antitrust laws.

Another antitrust approach with implications for broadcasting came during the same testimony. Mr. Loewingr urged a broadening of the antitrust laws to require producers, sellers and distributors engaged in interstate commerce and who control a substantial portion of that commerce to deal with all buyers on a non-discriminatory basis. This thinking might be applied to networks.

Senate Prober - No stranger to Washington, Judge Loewingr served as special counsel in 1951-52 on the Senate Small Business Committee's investigation of the newspaper problem. He submitted a report that held that the heavy increase in advertising was responsible for the shortage of newspaper. He chided publishers for not raising advertising rates to the extent necessary to bring newprint use into better balance. This recommendation was never accepted by the Senate committee and did not appear in the completed report.

KWK St. Louis denied bill of particulars

The road was cleared last week for continuation of the license revocation proceeding against KWK St. Louis. The FCC turned down the station's request for a bill of particulars as to the specific charges against it (Broadcasting, Nov. 28, 1960). General charges listed when the FCC demanded KWK show cause why its license should not be revoked dealt with alleged fraudulent contests conducted by KWK.

Hearing Examiner Forrest McClennning originally set the hearing for Dec. 15, postponed it at the request of the Broadcast Bureau, set it for Jan. 18, then postponed it again, saying he would not begin the hearing until the FCC took action on KWK's request for particulars.

The FCC consistently has held that respondents in such proceedings are not entitled to such particulars. The most recent ruling of this type was in license revocation proceedings against KAKJ (TV) Reno, Nev., in 1957. It was also pointed out that a party in such hearings retains the right to cross-examine and to challenge evidence.

The Broadcast Bureau had opposed the KWK request, stating that it was standing commission policy to deny licensees in such cases "discovery of statements in the commission's investiga-
Sky spies, dry docks & boy wonders

About once a year the FCC shows a sparkle of humor not generally apparent in the bulk of its documents. This happens when the commission presents "interesting cases gleaned" from reports by its Field Engineering & Monitoring Bureau. For example:

* The bureau’s Savannah, Ga., office was alerted by citizens who encountered a group of people on a Florida beach using telescopes and radio transmitters. When asked what was going on, a spokesman for the group (with a beard and a foreign accent) replied that radio signals were being received from Jupiter. An alerted FCC official rushed to the scene to discover a class of students studying celestial navigation and synchronizing their observations with time signals from the Naval Observatory. The bearded professor explained the work had been interrupted so many times by silly questions that he was giving silly answers.

* Viewers near Portland, Ore., complained to the bureau of “heringbone” patterns on their tv sets. Alert investigators tracked the interference to the hydraulic laboratory of a big dam where a radio-controlled miniature ship was used in a model basin for study of river flow and lock navigation. The remote-control device was found guilty of excessive harmonic radiation. “The little boat was drydocked until its mastermind could be adjusted,” the FCC concluded.

* A Tennessee am station sent an FCC field office a copy of a handbill announcing the opening of “a new broadcast station” in the same town. When no new station was found in FCC’s records, an FCC engineer visited the scene. He found a 14-year-old boy who had advertised a low-power mail order “broadcast station” to communicate with playmates in the immediate area.

* Two youngsters in Wisconsin were discovered operating a crystal-controlled transmitter in the middle of the broadcast band to transmit rock ’n’ roll record tunes to teenagers within a radius of 20 miles. They proudly told the FCC engineer they had spent eight months planning and constructing their equipment—had even built the control console and installed a modulation modifier. Their call letters were not on regular station lists.

* Two other cases involved boys who insisted on trying to operate in the broadcast band, one with 50 watts, after receiving two FCC warnings. Reports the commission: “Their parents agreed to do some personal monitoring.”

Rep. Walter drops ‘Spy Next Door’ case

“The Spy Next Door,” the on-again-off-again television documentary on Soviet espionage in this country, appears to be fading as an issue on Capitol Hill. Chairman Francis E. Walter (D-Pa.), whose House Un-American Activities Committee staff has been digging into CBS’ reasons for originally cancelling the program, last week indicated the matter would not be pursued.

Rep. Thomas M. Pelly (R-Wash.) had asked Rep. Walter to question CBS officials “under oath” to determine whether censorship, self-imposed or otherwise, was involved in the cancellation of the Armstrong Circle Theatre production (Broadcasting, Feb. 20).

But Rep. Walter already had a committee investigator’s report that Joseph H. Ream, CBS vice president for program practices, had accepted sole responsibility for the original cancellation. The investigator reported that Mr. Ream said he had acted as “a private citizen desiring to assist the [Kennedy] administration” in what he felt was a new policy toward the Soviet Union.

Rep. Walter also had a copy of an inter-office CBS memo in which Richard Salant, president of CBS News Division, assumed full responsibility for insisting on a change in the script of the show. This involved the deletion of a lead-in film clip showing Soviet Premier Khrushchev ranting over the U-2 incident.

Rep. Walter cited these documents in his reply to Rep. Pelly, along with a New York Times article criticizing CBS for attempting to construe Kennedy Administration policy as “inhibiting informational media from dealing soberly with many matters that the Soviet Union may find embarrassing.”

“In view of the above,” Rep. Walter’s letter concluded, “we should consider whether it is desirable to give further attention to this matter.”

Rep. Pelly interpreted this to mean the matter was being dropped. He indicated displeasure over this develop-
What makes RCA FM Transmitters better...

If you want the very best FM Transmitter available, you need not shop around. RCA FM Transmitters are the finest built for broadcasting. They are designed to the highest standards of quality in the industry.

Examine our FM Exciter, for example. Note especially its direct FM system. It is capable of producing a higher fidelity signal. Also, the RCA Exciter is easier to tune—and keep tuned—than exciters using other modulation systems.

Why do RCA FM Transmitters cost more? *Because of our aim at RCA to always build the very best.* This superior quality often shows up in small but vital features. Take the use of circuit breakers in the 1 KW RCA FM Transmitter. Fuses could have been used, but we think of the lost air time when fuses fail... We include a harmonic filter of special design to assure the reduction of all harmonics to more than meet latest FCC requirements.

Throughout the RCA FM Transmitter line you will find that all tubes and components operate well below normal safety factors. This greatly reduces chance for component failure. It saves on maintenance costs and helps keep the station on air.

Many more of these significant advantages add up to the kind of quality that proves itself in year after year of dependable operation. In addition, you'll find that RCA Transmitters usually have *higher* resale value...

Experience for yourself the quality that makes RCA famous. There is a full line of RCA Transmitters to choose from: 1 KW, 5 KW, 10 KW, 20 KW, and on special order 25 KW or higher. Exciters and multiplex subcarrier generators are also available—along with a series of broadband antennas. Get the complete story before you buy. Call your nearest RCA Broadcast representative or write RCA Department RD-22, Building 15-1, Camden, New Jersey.

RCA Broadcast and Television Equipment, Camden, New Jersey

The Most Trusted Name in Radio

RADIO CORPORATION OF AMERICA
The Spy Next Door," originally scheduled for broadcast Feb. 1, was finally shown on Feb. 15. The committee investigator said Mr. Ream changed his mind about the show when he realized he had misunderstood Kennedy Administration policy.

Ellender would cut some USIA functions

Sen. Allen J. Ellender (D-La.) has called, in effect, for some dismantling of the U.S. Information Agency. He says his proposals would make the agency "relatively free of the taint of propaganda" and save millions of dollars.

He would eliminate all foreign information centers, which he says "are regarded in most foreign countries as purely propaganda outlets for spreading imperialism," and replace them with jointly supported bi-national centers.

He would also put USIA libraries under the supervision of these centers, with local nationals in charge. In addition, he would eliminate USIA's press operations. He says U.S. embassies could provide the press service.

These recommendations run counter to those offered by the U.S. Advisory Commission on Information. This commission, which was created by Congress to study government information practices, feels USIA's scope should be broadened and its status upgraded to cabinet level (Broadcasting, Feb. 20).

Another critic of our overseas information program has been Sen. Alexander Wiley (R-Wis.), ranking minority member of the Senate Foreign Relations Committee. He is urging a strengthened Voice of America, especially in broadcasts beamed to Latin America.

He said he was "shocked" to learn that the over-all American overseas broadcasts total only 565 hours weekly, as opposed to 3,000 hours from Iron Curtain countries. He noted that this country beams only 3 1/2 hours weekly to Latin America.

Meanwhile, the man who will administer USIA—former CBS newsmen Edward R. Murrow— is still awaiting confirmation. President Kennedy picked him for the post on Jan. 28, but has not yet sent his nomination to the Senate.

Another station gets short-term license

The Rev. William Emert, licensee of WPHB Philipsburg, Pa., received a short term renewal and a reminder of his obligations for fairness from the FCC. WPHB was renewed only until April 1, 1962, following a commission investigation of statements aired by Mr. Emert which allegedly unfairly attacked members of the Philipsburg Ministerial Council and various other groups.

The licensee is not a member of the council and has made written promises to air the views of others in the future. He also has offered a position on the station's policy committee to the council. Commissioners Robert T. Bartley and Charles H. King dissented on the grounds further investigation was needed and that Mr. Emert had used WPHB to make unfair statements. In a separate action, the commission also granted the station an increase in power from 1 to 5 kw.

ABA opposes bill for allocation board

Legislation that would create a special frequency allocation board apart from the FCC was opposed last week by the House of Delegates of the American Bar Assn., meeting in Chicago.

The House of Delegates deferred formal action on the recommendation of a special ABA committee that a national conference on administrative procedure be established in Washington. The conference, to be set up by Congress with top appointments to be made by the President, would seek to improve the operation of federal regulatory agencies such as the FCC, the Federal Trade Commission, the Securities & Exchange Commission and others.

ABA gave no indication when this recommendation would come up again for consideration, but it is likely the proposal will be on the agenda for the annual meeting of the House of Delegates at St. Louis in August.

ABA also took no action concerning questions of professional ethics and ex parte contact with commissioners or other government agency officials, review of Canon 35 which prohibits in-court broadcasting or telecasting, or problems of copyright.

Although the ABA did go on record against the bill that would create a frequency allocation board, the House of Delegates took no action about that portion of the recommendation calling for active opposition. The bill was introduced both in the 86th and 87th Congress.

The legislation calls for the creation of a frequency allocation board that would be responsible for the division of the radio frequency spectrum between federal government users and non-government users. It would also establish a government frequency administrator responsible for the assignment of the government frequencies among the government users, under the direction of the President.

ABA said the non-applicability of the
ABA continued, "raises a serious question to private frequencies "already licensed by the FCC to private users during the term of the license, without prior notice, without hearing and without judicial review," ABA continued, "raises a serious question under the due process clause."

Proposed FCC pay-off rule draws opposition

An FCC proposal which would further tighten its rules on pay-offs, drop-outs and mergers of two applicants for the same facilities drew quiet moans in comments last week.

The suggested rule would allow 30 days after an applicant asked for dismissal of his application before granting the facility to a remaining applicant. The commission already has been authorized by Congress to ascertain that money given by one applicant to a withdrawing rival shall cover only "legitimate and prudent expenses."

ABC in comments questioned "both the wisdom and necessity of interposing additional artificial hurdles which will only serve to delay the resolution of conflicting applications and the establishment of new stations." The network pointed out that much of TV service now existing is the result of settlements through pay-off, drop-out and merger.

ABC said the new procedure would result in delay and encourage strike applications—for the purpose of being paid off or to delay construction of a station.

The Federal Communications Bar Assn. asked for an extension of time to file comments to March 13. It said the proceeding was issued on the date FCBA was electing officers and that the added time would enable the organization to get views of the membership which would be of "material assistance" to the commission.

The Washington communications law firm of Haley, Wollenberg & Bader, on behalf of several broadcasters, claimed that recent rules changes have obviated the need for the proposal. They said adoption of it would adversely affect...
Missing manager mystery muddles FCC

A minor mystery was unveiled last week. It all started when the FCC received a telegram stating:

"HAVE JUST LEARNED TUESDAY FEB. 14, 1961, WREA EAST PALATKA, FLA., WENT OFF THE AIR DUE TO DISAPPEARING OF MANAGER. WHERE ABOUTS MANAGER PRESENTLY UNKNOWN. IMMEDIATE STEPS BEING TAKEN TO RETURN WREA TO OPERATIONS. WILL ADVISE FCC AS SOON AS WREA IS BACK ON AIR. S/ PETER CORRADO, PARTNER."

Efforts by Broadcasting to reach the FCC's ability to act promptly. They added there was "a serious question" of the commission's statutory authority.

The law firm said that potential applicants had ample opportunity to apply for facilities under the recently amended Sec. 307(b) of the commission rules, since a formal public notice must be published by applicants in local papers.

"Indeed, it appears that the proposed rules are antithetical to the commission's own oft-stated desire to expedite the processing of applications," Haley, Wollenberg & Bader concluded.

2nd KFRE-TV competitor protests dual operation

A second Fresno, Calif., uhf station has protested to the FCC the dual operation of KFRE-TV there on chs. 12 and 30. Ch. 24 KMJ-TV claimed the dual operation authority was granted on an ex parte basis and that KFRE-TV hid from the commission the real reason for its request.

The commission has made Fresno an all-uhf market by deleting ch. 12 and adding ch. 30, which subsequently was assigned to KFRE-TV, a Triangle station. The station asked for authority to operate on both channels until April 15 in a letter to the FCC Jan. 30. Permission was granted Feb. 8 and the dual operation was scheduled to begin Feb. 17. Ch. 47 KJEO (TV) Fresno immediately protested on much the same basis as the objection lodged by KMJ-TV (AT DEADLINE, Feb. 20).

KMJ-TV charged that the real reason for KFRE-TV's request was "... for the purpose of obtaining an unfair commercial competitive advantage over the existing uhf stations in Fresno." The station told the FCC that both ARB and Nielsen will conduct rating surveys of Fresno between Feb. 16 and March 15. Responses are based on call letters tuned in, rather than channels, KMJ-TV said, and thus KFRE-TV actually will be two stations during the surveys.

The ch. 24 station also maintained that the present KFRE-TV operation is in violation of Sections 309 and 311 of the Communications Act in that no public notice of the request was made; it was not published locally as required, and the commission acted after only 10 days without complying with the pre-grant procedure.

Tedescos would pay rival to drop am application

Oral argument was held last Friday (Feb. 24) by Chief Hearing Examiner James D. Cunningham on the joint petition of Albert S. and Patricia W. Tedesco and of Robert E. Smith, applicants for am facilities in Minneapolis and River Falls, Wis., for approval of an agreement for dismissal of Mr. Smith's application. The Tedescos and Mr. Smith each applied for 690 kc, 500 w daytimers in their respective localities.

Mr. Smith said he's asking dismissal because it would cost him some $56,000 to construct his station. Since he first applied, he said, WIXK New Richmond, Wis., has gone on the air to supply River Falls with a "good signal." Mr. Smith expressed doubt that the town (population 3,887) could support another station with satisfactory economic results.

The Tedescos asked to reimburse Mr. Smith for $5,051 in expenses. He claims he spent $2,981 in engineer fees, $1,411 in legal fees and $282 for long distance phone calls, and that he incurred other minor expenses. The Tedescos asked that Mr. Smith be allowed to drop out and that the facility be granted to them in the immediate future.

Albert S. Tedesco is a brother of Victor and Nicholas Tedesco, purchasers of WMIN Minneapolis-St. Paul, but they have no business relationship (CLOSED CIRCUIT, Feb. 20).

WPTR renewal hearing indicated, says FCC

A civil contempt conviction against against the licensee of WPTR Albany, N. Y., caused the FCC to say last week that a hearing is necessary on the station's renewal application. The commission also questioned whether there was an unauthorized transfer of control of WPTR a year ago.

J. Meyer Schine and members of his family own WPTR through the family corporation, Schine Chain Theatres. In 1949, Schine Theatres entered into a consent decree agreeing to dispose of several of its theatres after a Justice Dept. charge of unfair trade practices against independent theatres.

In 1957, executives of Schine Theatres and the company were fined $73,000 in a criminal contempt proceeding for failing to observe the decree. The fine was upheld by an appellate court and the U. S. Supreme Court refused last year to review the decision.

The commission's action last week was based on the 1957 fines and not on the original consent decree, which
had not affected the licensee's qualifications by past commission practices.

The unauthorized transfer involves a merger of two Schine enterprises, Schinebro Inc. (parent of Schine Theatres) with Hildemart Inc., to form Schine Enterprises Inc. The licensee explained the change was of a corporate nature only, within the family, and that it did not know prior approval was required.

There was no comment from the FCC on whether last week's action portends possible future steps the agency might take in the light of antitrust fines and jail sentences levied against officers of parent corporations of broadcast licensees. These involve Westinghouse Electric Co. and General Electric.

The GE-Westinghouse case differs from the Schine conviction in that Schine violated an earlier consent decree while the actions against GE and Westinghouse were taken in an original antitrust case. It is known that there have been unofficial talks within the commission concerning the GE and Westinghouse convictions two weeks ago, but no official steps have been taken or are contemplated at this time.

The court did not invoke Sec. 313, covering antitrust violations, in the most recent case; this which would have forced the FCC's hand.

**The FCC last week...**

- Was requested to assign ch. 27 from Paterson, N. J., to New York City. Petition from Pan American Broadcasting Co. suggested ch. 47 could then be assigned to Paterson. The company said if the channel is assigned to New York, it will apply for it and proceed "diligently" to construct and operate. Rulemaking was asked also to assign ch. 20 from Coshocton to Athens, both Ohio, and to reserve it for non-commercial educational use. Petitioner was National Educational Television & Radio Center, which suggested ch. 20 be replaced by ch. 71 in Coshocton.

- Set aside its Jan. 25 grant of a short-term license renewal to WITT Lewisburg, Pa., because of "subsequent evidence of new technical violations and non-correction of previously cited violations." The original reason cited for WITT's renewal of only 15 months was that a transfer of control to WKVA Lewiston, Pa., had taken place without FCC authorization (BROADCASTING, Jan. 30). Warren and Jeanne Fisher own the largest single interest in WITT (600 of 4,000 shares).

- Denied a request of South Jersey Radio Inc. to waive policy and assign call letters WOND-FM to its Atlantic City fm outlet to correspond with the WOND call of its Pleasantville, N. J., am. Commission policy does not favor assignment of common call letters to stations of the same licensee in different service areas. The Atlantic City station is presently designated WOSI-FM. Commissioner Cross dissented.

- Granted the application of KVAN Camas, Wash., to move the station to Vancouver with continued operation of 1480 kc, 1 kw D. Chairman Ford and Commissioner Bartley dissented.

- Went along with a Nov. 10, 1959, initial decision and granted renewal of license of KMA Shenandoah, Iowa, to May Broadcasting Co. The application was set for hearing in February 1959 on the question of whether the station's 48.86% ownership of KFAB Omaha violates duopoly regulations (BROADCASTING, Feb. 16, 1959). Commissioner Bartley dissented to last week's action.

- By action of Chief Hearing Examiner James D. Cunningham, dismissed with prejudice application of Oregon TV Inc. for ch. 3 in Salem, Ore. Oregon TV had asked for dismissal to alleviate necessity of comparative hearing with Willamette-Land TV Inc. and to expedite the start of local tv service for Salem. Naft Corp., parent of Oregon TV, acquired the applicant when it purchased KPTV (TV) Portland, Ore., from George Haggarty in June 1959. No consideration was paid for withdrawal, which left Willamette-Land (W. Gordon Allen & Assoc.) as the sole applicant.

- Received plea from Laurel Broadcasting Co. asking for procedure it should follow in further prosecution of petition for withdrawal of its application for new am in Laurel, Md. Laurel pointed out that Chief Hearing Examiner James D. Cunningham has dismissed its application with prejudice but refused to approve agreement whereby remaining applicant, Interurban Broadcasting Co., would pay Laurel $10,010 as partial reimbursement for expenses (BROADCASTING, Feb. 13). Since then, Laurel said it has appealed to the commission, with the backing of the Broadcast Bureau, and also has been ordered by the examiner to furnish additional information (BROADCASTING, Feb. 20). "Laurel is therefore uncertain as to the propriety of its complying . . ." with the latest Cunningham order, the applicant said, in asking for a ruling as to whether matter is properly before commission or examiner.
20th Century-Fox seeks tv leadership

SALE OF POST-'50's TO NBC FINANCES MAJOR EXPANSION INTO MEDIUM

They are busy this week at 20th Century-Fox Television. A $1 million pilot production program has a big staff hopping in a determined assault by a major motion picture studio for tv leadership. To help finance the effort, 20th Century-Fox has some $6 million from its post-1950 movie sale to NBC (Broadcasting, Feb. 20).

Across the country from the humming production scene, Peter G. Levathes, president of 20th Century-Fox Television, last week was in his New York office contemplating a workload that is at least doubled. Depending on the success of network negotiations of the next month or so, it could be even bigger.

Mr. Levathes views the ferment calmly, quietly explaining the mushrooming growth. About the NBC deal:

The first-year fee for NBC's pick of 30 from more than 150 recent motion pictures is something around $6 million. This will go higher if NBC chooses to exercise its option in the two years following.

Full length U. S.-produced motion pictures in network prime time, an idea with a certain amount of shock value, is to Fox TV a logical extension of the trend to longer programs. "Networks were asking us for 90-minute programs," Mr. Levathes says. "Now, this is a creative problem of the first magnitude, and it led to the question, 'why not take features?'" The eventual acceptance of this idea was a "natural and inevitable development," as he sees it. Slotting feature films as prime program fare, as NBC will do in Saturday 9 p.m. time, can be valuable, he explains, both tactically and to build circulation. As Mr. Levathes understands it, the shows will be on an "open end" basis to allow for uncet screening.

And Then: The future sale of the post-1950 pictures can only be enhanced by network showing, Mr. Levathes is convinced. He refers to syndication successes of post-network tv series and explains that one national broadcast doesn't come anywhere near exhausting a show's potential.

Only a couple of sound stages on Fox's three lots remain in the service of theatrical features, the tv studio head reports. In the wake of a million-dollar production load in tv pilots, the company is planning studio changes for tv that will cost several millions. The building will get underway in the spring at the 60-acre main lot at "Fox Hills." (The three Fox locations are Hollywood's Beverly Hills, Western Avenue-Hollywood and Malibu Ranch, Calif.)

Much of the tv production will be done on location, which fits in with the company's basic tv philosophy, that is to push back the frame and put the shown on a much broader canvas. This philosophy was signalled by Adventures in Paradise, which weathered a rocky introduction in the 1959-60 season on ABC, with some doctoring became a success and is on the books for next (its third) season in the same Monday 9:30-10:30 p.m. (EST) period. There are plans to take Adventures in Paradise out of its own west coast lagoon across the Pacific to Tahiti this summer.

On the Road: Next season's shows take 20th Century-Fox farther abroad and up and down the highways of this country. Film was rolling last week on these pilots:

Bus Stop, hour series based on the William Inge play, with Marilyn Maxwell, Joseph Cotten and Tuesday Weld in the cast, produced by Robert Blees and directed by Don Siegel.

The Hunters, hour show to be shot in Africa, written and produced by Mr. Blees, directed by Pete Lyon and featuring in the cast Brett Halsey, Skip Homeier, Guy Stockwell and others.

Margie, half-hour storyline taken from a 20th Century-Fox movie that starred Jeanne Crain, now with Cynthia Pepper in the title role, produced by Hal Goodman and Larry Klein and directed by Jack Sher.

House on the Rue Riviera, 60-minute program directed by Douglas Heyes and starring John Ericson, Richard Anderson, Jayne Mansfield and Diana Trask.

The Ginger Rogers Show, a half-hour with the star in twin roles and Charles Ruggles in a key part, and

The Jayhawks, a post-civil war, hour western, with Dan Dailey, Ann Blyth and others in the cast.

The Circus, which had been discussed as an hour series of specials, has been postponed by Mr. Levathes.

Insurance: All are co-production deals with networks except one, The Ginger Rogers Show, and the heavy pilot activity is in addition to Fox's regular workload on Adventures in Paradise, Hong Kong and Dobie Gillis. The half-hour Dobie show is still uncommitted for CBS next season, but dopesters had pencilled on their network forms early this month (Broadcasting, Feb. 6).

The new production budget completes Fox's network spread. House on the Rue Riviera is with NBC, The Jayhawkers with CBS and the rest with ABC, which also was the interested
COLORCASTING

Here are the next 10 days of network color shows (all times are EST).

**NBC-TV**
- Feb. 27-Mar. 3, 6-8 (6:30 a.m.) Continental Classroom (modern chemistry), sus.
- Feb. 27-Mar. 3, 6-8 (6:30-7 a.m.) Continental Classroom (contemporary math), sus.
- Feb. 27-Mar. 3, 6-8 (10:30-11 a.m.) Play Your Hunch, part.
- Feb. 27-Mar. 3, 6-8 (11:11-12:15 a.m.) The Price Is Right, part.
- Feb. 27-Mar. 3, 6-8 (12:30-12:55 p.m.) It Could Be You, part.
- Feb. 27-Mar. 3, 6-8 (2-2:30 p.m.) The Jan Murray Show, part.
- Feb. 27-Mar. 3, 6-8 (11:15 p.m.-1 a.m.) The Jack Paar Show, part.
- March 1, 8 (8:30-9 p.m.) The Price Is Right, Lever through Ogilvy, Benson & Mather, Speidel through Norman, Craig & Kunnel.
- March 1, 8 (9-10 p.m.) Perry Como's Kraft Music Hall, Kraft through J. Walter Thompson.
- March 2 (9:30-10 p.m.) The Ford Show, Ford through J. Walter Thompson.
- March 3 (9-10 p.m.) The Bell Telephone Hour, AT&T through N. W. Ayer.
- March 4 (10-10:30 a.m.) The Shari Lewis Show, Nabisco through Kenyon & Eckhardt.
- March 4 (10:30-11 a.m.) King Leonard and His Short Subjects, General Mills through Dancer-Fitzgerald-Sample.
- March 4 (7:30-8:30 p.m.) Bonanza, RCA through J. Walter Thompson.
- March 5 (6-6:30 p.m.) Meet the Press, cor.
- March 5 (7-8 p.m.) The Shirley Temple Show, RCA through J. Walter Thompson, Beech-Nut through Young & Rubicam.
- March 5 (9-10 p.m.) The Chevy Show, Chevrolet through Campbell-Ewald.

party in the shelved Circus. Network co-production is a way of life for the kind of show Fox is doing. “We couldn’t afford syndication,” the tv chief says of his large-cast, mostly 60-minute, big facility shows. Then, to sell an hour show you have to bring several advertisers together, and this is something a network does best, he explains. Sure, advertisers sometimes come to him, Mr. Levathes acknowledges, but his company has no advertiser-financed shows and sees no trend in that direction.

Another basic Fox policy is to make a show for a specific reason, not to “have a lot of pilots kicking around.” Mr. Levathes is counting no chickens in the hatching season, but his conservative and five hours of co-production deals add up to a strong probability of doubled activity for the next year. If Hong Kong, Dobie Gillis and the new Ginger Rogers show make it, the work will be nearly trebled.

This score doubtless led to the decision to build new tv studios at Fox Hills. At present 300-400 people are filling all the lots to capacity, but the fact that much of the new shooting and some of the old is away from home may give carpenters some leeway. East Africa is the locale for The Hunters, Italy and France for The House of Rue Riviera, and both Bus Stop and The Jayhawkers are roaming this country.

Revving Up • The tv peaks came about 14 months after Mr. Levathes left the advertising agency side of the business to return to Fox, where he had served years earlier. At Young & Rubicam, New York, he was radio-tv vice president, and from 1938 to 1953 he had been with 20th Century-Fox Film Corp., first as executive assistant to President Spyros P. Skouras and later in charge of the company’s television. Soon after Mr. Levathes rejoined Fox, the tv subsidiary completed purchase of its first television station, KMSP (TV) Minneapolis. Now it is taking vigorous new steps in world tv and domestic syndication of product on hand.

Alan M. Silverbach, a 15-year Fox man who had been managing foreign sales, has moved over to the tv subsidiary as director of international sales, handling both tv programs and motion pictures. He has nine tv shows in action around the world, some pictures and sees “no ceiling” to the market. The current domestic network programs are playing internationally, in addition to Five Fingers, My Friend Flicka, Crusade in Europe, The Greatest Drama, Three Guests and Broken Arrow (the last is syndicated by International Television Corp. here and in Latin America but by Fox Television elsewhere).

Dubbing goes on in French, Italian, German, Spanish, Portuguese, Asian tongues and others. Some of the hot international spots are the new United Arab Republic Network, Japan, Latin America, Australia, and the company will move into the Philippines and Siam soon.

On the domestic selling front, Charles W. Goit joined 20th Century-Fox Television last September as national sales manager, coming from International Television Corp. and TPA (which ITC absorbed), where he did the same thing. Mr. Goit is organizing for action now and will be pitching networks as well as domestic syndication customers.

Key men on Mr. Levathes’ Hollywood production team are Roy Huggins, production vice president, who came from Warner Bros. with credits for Maverick, Cheyenne and others, and William Self, executive producer, who used to be with CBS. Their names are on the pilots in work now.

There are 30 films in the NBC $6 million purchase from 20th Century-Fox. Among the many which are outstanding are: On the Riviera’ (top) with Danny Kaye; ‘The Black Rose’ (second) with Tyrone Power and Orson Welles; ‘How to Marry a Millionaire’ (third) with Marilyn Monroe and Lauren Bacall, and ‘The Titanic’ with Barbara Stanwyck and Clifton Webb. NBC has options for two more years, with an increment in the annual $6-million fee.
Enright, Crown, to do live tv shows for SG

Screen Gems, Inc., New York, announced last week it has concluded a co-production agreement with Aladan Productions, New York, headed by Dan Enright and Alfred Crown, for the development by Aladan of an assortment of live dramatic and panel shows.

This will mark Mr. Enright's re-entry into television after an absence of a year and a half. As a partner of Barry-Enright Productions, Mr. Enright was active in the production of various network programs, including Twenty One on NBC-TV, which went off the air after the tv quiz scandals. The first of the series to be produced by Mr. Enright and Mr. Crown is expected to be ready for network presentation next fall.

The move is the second step in the development of a live packaging operation by Screen Gems. The company recently announced that it had retained Herbert Susan, former director of programs for NBC-TV, to develop a package of live dramatic and musical specials (Broadcasting, Feb. 20). Since his absence from tv, Mr. Enright has been developing motion picture properties with Mr. Crown, a veteran producer who has been vice president of Samuel Goldwyn Productions and president of Moulin Productions.

Desilu blames profit drop on writers’ strike

Desilu Productions had net profits of $264,949, equal to 23 cents per share, on gross income of $14,432,798 for the nine months of fiscal 1961 ended Jan. 28, the company reported last week. Third quarter gross was $5,970,303, with a net of $144,032, or 13 cents per share.

For fiscal 1960, Desilu's first nine months gross was $17,553,899 and its net was $708,121, or 61 cents a share. The third quarter figures showed a gross of $9,091,404 and a net of $587,204, or 51 cents a share.

In a report to stockholders, President Desi Arnaz blamed the decreases this year on a late start in production caused by the writers' strike and the fact that Desilu is currently doing no tv shows for syndication. The syndication market has become uneconomical to the point where the company would be obliged to invest money on a speculative basis, which it is unwilling to do, Mr. Arnaz stated. He reported that negotiations are in progress for the sale or residual use of the studio's full inventory, which will total 1,014 half-hours of entertainment by April 30. The recent realignment of key personnel, he said, will enable him to concentrate on sales and top programming, with three operations vice presidents in charge of programming, production and studio operation, administration and finance.

New newsfilm service

British Commonwealth International Newsfilm Agency Ltd., whose daily newsfilm service, Visnews, is being used for the first time in this country by Metropolitan Broadcasting's WNEW-TV New York and WITG (TV) Washington, D. C., plans to expand into other major U. S. markets. George Tyler, Visnews assistant commercial manager just in from London, and New York office manager Alan White currently are working on details. They expect commercial manager Norman Dickson from England later this month to announce new U. S. customers. Visnews covers world events from its London headquarters.

Producers Studio leases California Studios lot

Producers Studio, a new corporation, has secured a long term lease on the property formerly operated by California Studios at 650 N. Bronson Ave., Hollywood, plus the equipment needed to operate a first-rate studio, the company announced last week. The transaction, involving more than $500,000, covers nine sound stages ranging from 8,000 to 16,000 square feet. Gunsmoke and Have Gun, Will Travel are among the tv shows produced on the property, which started in tv production in 1950.

Principals of Producers Studio are: Fred Jordan, president; Gerald L. King, vp and secretary; John Young, vp and treasurer; Arthur J. Gaunt, vp. Phil Rapp will join the organization on completion of his duties as executive producer of the Tab Hunter Show.

Philip N. Krasne, operator of California Studios before the property's takeover by Producers Studio, is returning to full-time film production activity.

California Studios Div. of Visual Merchandising, slidefilm production firm, continues in operation under the supervision of its vice president and general manager, Richard S. Degner. Mr. Krasne and Mr. Degner are partners in this operation.

MGM plans to release post '48 films to tv

Metro-Goldwyn-Mayer plans to prepare to release post-1948 films to tv. Joseph R. Vogel, president of MGM, indicated to stockholders last week that the firm would "maintain a significant gap" between the theatre presentation of a film and the time it is licensed for tv release. Among major film companies, Warner Bros., Columbia Pictures, 20th Century-Fox, RKO Pictures and United Artists Corp. already have released post '48s.

Mr. Vogel also told stockholders that earnings in the fiscal year ending on Aug. 31, 1961, are expected to increase 25% over 1960 profits. Last year MGM showed a profit of $9,595,000, equal to $3.83 a share. MGM's president predicted that profits in 1962 and 1963 will show further increases over his estimate for this year.
8MM MOVIE GEAR FOR TV

Great film economies expected through use of new camera equipment developed by Fairchild

A major breakthrough—the complete use of 8mm magnetic sound film equipment for a television news cast—was claimed last week by Fairchild Camera & Instrument Corp., Syosset, Long Is., N. Y.

Fairchild claims the process will work both in color and in black and white at substantial savings to comparative 16mm and 35mm models.

According to Fairchild, KPHO-TV Phoenix, Ariz., successfully telecast a seven-minute interview which had been recorded, processed and projected with slight adaption using Fairchild's new 8mm sound movie camera equipment.

A giant stride in the trend toward miniaturization, KPHO-TV's success also indicates unlimited possibilities in news and special events programming in addition to great economic savings. It also opens the door for many stations—which otherwise would be stymied financially—to engage in local production of news films.

Specifically the cost factor is quite notable. Broken down it reads thusly: camera, $249; adapted projector, about $500; processor, $1,375. Total, about $2,125. Fairchild, however, has come up with another angle to fetch possible customers. It will lease the equipment to any station for $50 per month, including complete servicing. This figure to $600 yearly for a complete sound film operation.

A film user in a major market told Broadcasting its cost without sound was about $17,500, a marked increase under any measurement scale.

The experiment, one of the main features at the NAB engineering conference (May 7-10) in Washington, will be demonstrated and described more fully at that time.

Main opposition in using 8mm for TV has been poor resolution, but Fairchild claims to have solved the problem in addition to the lesser difficulties that have prevented the smaller film's success in prior experiments.

The color film was successfully produced by Color-Sound Inc., N. Y., producer of promotion and sales films. Firm now has three pilots in the works which will be on display in New York starting March 20. Camera used was a modified and adapted Fairchild Cinephonic 8mm.

Equipment used by KPHO-TV in its test included a portable, 8mm handheld, sound movie camera (5 pounds in weight), companion 8mm sound projector and a rapid film processor. The camera, equipped with its own power supply and recording system built in, enables its user to carry the entire system in one hand.

Sound is recorded by pushing the start switch while another knob adjusts the volume. Monitoring is achieved through a miniature headset, similar to a conventional hearing aid.

The camera permits about 2½ minutes of shooting time in each half of the 50 foot film roll. The spool is then reversed, allowing a total of approximately five minutes of shooting time. The film goes directly into the Mini-Rapid 16 processor (currently in use in many TV stations) with no changes or adjustments.

Satellite successful in vlf-vhf retransmission

Navy's ionospheric-probing satellite, boosted into 110-618 mile high orbit from Cape Canaveral Feb. 21, is operating properly on 18 kc, receiving vlf signals from Panama Canal Zone Navy installation and retransmitting them back on a vhf circuit through the F-1 layer.

The satellite—one of a pair—was put into orbit via an Air Force Thor-Able-Star rocket. The two satellites (the primary one was a Transit III-B navigational experiment) failed to separate as planned, but are traversing an elliptical orbit together. Both are operating, but the orbital height is not considered good for the Transit sphere.

Lofli, for "low frequency trans-ionospheric," weighs 54 lbs. It is designed also to report electrical lightning phenomena through the ionosphere to ground stations.

Walker says best stereo is Zenith-GE

The man who ran the field tests on fm stereo standards ticked off the pros and cons of the various proposed systems last week—and stuck his neck out to the extent he started a buzz of three-dimensional speculation among fm broadcasters and manufacturers.

A. Prose Walker, manager of NAB's engineering department and chairman of the National Radio Stereo Committee's field test committee, gave his views on the six stereo systems at a Washington IRE professional chapters meeting. He suggested that if he were an FCC commissioner he would "knock the

NOW! Increase TV coverage!

The EMCEE VHF TRANSLATOR for simplest installation and maximum performance! FCC TYPE ACCEPTED!

Here's the new VHF Translator with outstanding advantages for all installations. EMCEE Translators are the result of long experience in quality design and trouble-free construction by some of America's leading experts. Now fill in troublesome areas with the advanced EMCEE VHF Translator.

heads” of GE and Zenith together to force them to mesh their proposals.

Mr. Walker said he arrived at his choice in this way: Crosby Electronic’s system does not permit the simultaneous broadcast of stereo and subsidiary communications (storecasting, musicasting, etc.). Since the income of most fm broadcasters comes mainly from these non-broadcast services, Mr. Walker observed, the approval of the Crosby method would be a disservice to fm.

Multiplex Corp., Calbest and EMI systems were found to be still in developmental stages, he noted. None was at the commercially feasible level.

This leaves the GE and Zenith systems, he concluded. Both are commercially developmental systems were found to be still in developmental stages, he noted. None was at the commercially feasible level.

Meanwhile, the simmering battle between Crosby and GE took a new tack with supplemental filings by both. Crosby told the FCC several weeks ago that it should beware of freezing stereo by adopting too rigid standards based on the state of the art now, obviously aiming its barbs at the GE and Zenith proposals. Last week, GE responded by telling the commission it should be chary of adopting any system which contains segments that have not been field tested. This was a reference to some revisions submitted in the Crosby supplemental submissions.

Video Tape Unlimited's station-on-wheels

Video Tape Unlimited Inc. of New York, a self-contained tv station-on-wheels, is shown being demonstrated for the first time last week in conjunction with the opening of ABZ Assoc.'s (BROADCASTING, Feb. 20, 1961) new production center for tv commercials. Equipped by RCA, the mobile studio carries full power equipment and is stationed outside the ABZ building at 266-68 E. 77 St.

AT&T shoots for 1962 satellite communications

Transoceanic satellite communications, including television, “the early part of next year” is the goal of AT&T. This was reported by Frederick R. Kappel, president of the giant Bell system, in his annual report to stockholders issued last week.

Mr. Kappel said that man-made satellites can be used successfully and economically to provide high quality, large capacity microwave radio channels across the oceans as additions to present cable and shortwave radio circuits. AT&T's goal, Mr. Kappel stated, was to test a satellite in orbit in cooperation with Great Britain and Europe early in 1962. Plumping for the satellite to be privately owned, Mr. Kappel explained that AT&T would own and operate the ground stations in the United States and share satellite costs with the communications agencies overseas.

The Bell System completed its biggest construction program in 1960. It spent $2.6 billion. It reported total revenues of over $8 billion for 1960, with net income over $1½ billion ($5.53 per share). This compares with $7.5 billion gross income and $1.1 billion net revenues ($5.22 per share) in 1959.

The AT&T took a dim view of the authority granted by the FCC last year for private use microwave systems. This permits tv stations, as well as other users, to install and operate their own inter-city relay systems.

Super-power tv station

The RCA Victor Co. Ltd., Canadian subsidiary of RCA, has completed arrangements for building and installing what it claims will be the most powerful low-band tv transmitter in North America at the Canadian Broadcasting Corp.'s new station, CBXT-TV Edmonton, Alta. The new CBC transmitter will be capable of 318 kw ERP, nearly double that of any low-band station (channels 2 through 6) in Canada and three times as powerful as any in the U.S. The exceptional high-power output is achieved by a special super-gain antenna designed by RCA Victor engineers in Montreal where the transmitter is being built. CBXT-TV is scheduled to begin broadcasting on Sept. 1.
Canadian stations broadcasting too many spot announcements in violation of Board of Broadcast Governors regulations should be fined in the amount of their excess income from such advertising. Dr. Andrew Stewart, BBG chairman, suggested to the Parliamentary Committee on Broadcasting at Ottawa in mid-February.

At the same meeting the Canadian Assn. of Broadcasters filed a brief with the BBG saying private broadcasting has become an industry large enough to be a significant factor in the Canadian economy.

Dr. Stewart said that under the Canada Broadcasting Act stations can be fined only by license suspension, a punishment he feels is too drastic. He said monetary fines would fit the crime better than the present BBG power to suspend a license.

This was the first time the BBG has been questioned by a Parliamentary Committee since its appointment in 1958. Dr. Stewart was also asked what is being done about undue influence by advertisers on radio and television programs. He stated his belief that such pressures exist but did not know its magnitude. He felt that under the North American system of program sponsorship this would be hard to control, and it is too late now to permit spot announcements only, without identification with specific programs.

Warning: Dr. Stewart warned Canadian television stations that the BBG would strictly enforce its requirement of 45% Canadian program content after April 1. He felt that in fairness to upcoming new television stations or those recently started in major cities as second stations, the 45% Canadian program content would not be enforced till Sept. 1. In a year the Canadian program content will be 55%.

Some committee members questioned Dr. Stewart regarding the same percentages on commercials. This has come up, Dr. Stewart stated, in submissions made by Canadian commercial advertising producers, but no decision has been made yet. The BBG is looking into the possibilities of enforcing a 45% Canadian content requirement for commercials.

CAB told the committee it represents 162 of the 193 privately-owned radio broadcasting stations in Canada, and 42 of the 45 such television stations and 4 of the 11 such tv stations licensed but not yet on the air.

Payrolls: Other facts: 85 radio stations in the past financial year employed 2,248 fulltime personnel, 17 tv stations reported 945 fulltime employees, 19 combined operations reported 748 fulltime employees, representing 3,977 fulltime employees for 121 stations replying to CAB's recent questionnaire. Of the radio-stv stations, 106 employed 9,543 artists and casual help during the preceding financial year; 85 radio stations reported a total annual payroll of $10,534,214; 17 tv stations reported a payroll of $3,501,763; 19 combined operations reported an annual payroll of $3,743,854. Total payroll for 121 stations: $17,769,831.

Fringe benefits of $571,222 were paid out by 114 radio and tv stations; 83 paid $3,137,546 for Canadian program material; 120 paid $896,186 in copyright fees; 97 spent $1,222,521 on further encouragement of creative and performing talent; 65 spent an additional $439,762 on artist fees, and 39 stations spent another $99,132 for other programming purposes.

The brief showed that 75 radio stations reported fixed assets at $16,097,-426; 17 tv stations $11,228,102; 17 combined operations $7,894,716, for a total for 109 stations at $35,220,244.

Programming: About half the brief was devoted to programming developed by the CAB member stations in their communities, and to their public service record. A total of 103 radio and tv stations reported a time card value of $6,890,582 for their public service programming and announcements.

Among the public service programming listed are the national festival choir and national ballet performances aired by Radio Nord stations in northern Quebec; Talent in Toronto programs by CHUM Toronto; musical talent development programs by CHRC Quebec City, Que.; CFTU Toronto; CFQK Saskatoon, Sask.; and CHWO Oakville, Ont., and others. The report details 58 typewritten pages of programs by members in the public service category, ranging from the roving reporters of CFTU Simco, Ont., sent to 31 world cities, to drama festivals sponsored by CFCL-TV Timmins, Ont.

Caldwell signs five tvs for proposed network

Spence Caldwell, Toronto film and equipment distributor recently licensed by the Board of Broadcast Governors, Ottawa, to form a second Canadian television network, has lined up five second stations in as many Canadian cities.

His license requires him to sign six of the eight second stations in the cities where these have been licensed, before he can start operation. Mr. Caldwell reports he has lined up CJAY-TV Winnipeg, Man.; CHAN-TV Vancouver, B. C.; CFRN-TV Edmonton, Alta.; CFCH-TV Calgary, Alta.; CJCH-TV Halifax, N. S. Not yet signed are CFCF-TV Montreal, Que., CFTO-TV Toronto, Ont.; and CJOH-TV Ottawa.

Mr. Caldwell expects to have 10 hours of network programming available for the group, some produced by affiliated stations. He hopes to have 28 hours of network programming available ultimately, with three hours of national news. He has been given till August to get underway.

Canadians plan own Radio Advertising Bureau

Canadian Assn. of Broadcasters is now busy organizing a new Radio Advertising Bureau. It will operate as a separate entity, with no connection with the Ottawa CAB headquarters. The Canadian RAB will headquarter at Toronto.

Establishment of the CRAB is expected to be a controversial topic at the closed business sessions of the CAB convention at Vancouver in mid-March. Membership in the CAB is expected to mean lower fees for members of CRAB.
The modern way to select new call letters

SAN DIEGO STATIONS DID IT WITH AID OF COMPUTER

KFSD-AM-TV San Diego will become KOGO-AM-TV on March 1, a fact that, among other things, proves that broadcasting and science do mix. It does not imply, however, that the station has gone egghead, but that its officials have gone their cohorts one better in selecting a new identity.

Here's the story: A call letter change had been under consideration for some time but station officials wanted to be positive before making so rash a move (KFSD had been the call since 1926). So they packed up their dilemma and headed for the nearby Convair Astronautics missile plant, hoping to coax the answer from the plant's IBM 7090 computer. And they did. Within 15 seconds the machine had calculated all possibilities of four call letters beginning with the letter K. Two minutes later it had typed out 17,576 combinations.

After several days, 17,575 possibilities had been eliminated for various and sundry reasons—they were already in use, they weren't suitable or they didn't fit the image.

To celebrate its new call, the station has announced a fresh musical image, a $50,000 contest, a jumping kangaroo named Kogo-Roo (a mascot), and more extensive news coverage. KFSD-FM, which programs separately, will retain its call letters.

How to attract teens to television news shows

How can a television station attract the teen-aged audience to its already top-rated early evening newscast?

A big splash for 'Assignment: Undercover'

KPIX (TV) San Francisco has gone in for realism in the promotion of its new action-adventure series, Assignment: Undercover. Capitalizing on the "beauty" end of the show (and there's nothing fishy about that), KPIX hired model Bonnie Robin, dressed her in a bathing suit and aqualung and sent her around to visit the Bay area press—which she did with a big splash. In photo above Bonnie poses for a cameraman in dry dock. He was a landlubber and she really didn't need any water to put the point across to him.

That was a problem facing WBNS-TV, Columbus, Ohio. To reach this age group, WBNS-TV enlisted the active participation of 31 public, parochial and private schools in a project it calls "Youth Reports." The program provides an opportunity for journalism, writing, radio-tv and English classes to prepare three-minute scripts on various school activities. The station's public affairs department picks one script from each school, and the news department helps the students illustrate their story with film and photos. A student handles the introduction and narration of each "Report."

WBNS-TV presents two "Youth Reports" each week on its 7 p.m. newscast with Chet Long. At the end of the school year, the best presented "Report" will be chosen and the school it represents will be awarded a $500 prize.

And, WBNS-TV hopes, the students will be watching for the report on their own school and develop a viewing habit with its early evening newscast.

Budweiser plans day-in-sun

For the past two years station representatives and salesmen for other media have gone to St. Louis for briefings from D'Arcy Adv. and Anheuser-Busch Inc. on the annual major "Pick-a-Pack" promotion for Budweiser beer. But this year they will head south instead. The meetings will be held March 14-18 in Tampa, Fl., and will cover details of Budweiser's extensive broadcast plans, including tie-in merchandising. D'Arcy has chartered a plane to fly the invited representatives from Chicago and St. Louis and will be host with Budweiser at several social events, but the representatives are paying transportation and hotel expenses.

KALL has "Heart of Gold"

The Heart Fund is receiving aid from KALL Salt Lake City with its "Heart of Gold" contest.

Throughout the broadcast day, KALL plays records with the word "heart" in the title. Every hour a name is called out. That person is given a time limit to call the station and name all tunes the station has played with the magic title word. For each tune named, the listener receives a dollar. An identical amount is donated by KALL, in the listener's name, to the Heart Fund.

KDKA rings transit's bell

KDKA Pittsburgh, is engaged in a campaign to encourage its listeners to use public transit facilities. As part of the effort, area residents
are receiving free rides on a "solid gold streetcar" and chances at prizes being awarded by KDKA. The special car is placed on a different route each day.

Leading up to the campaign, KDKA personality John Stewart went through the training course for streetcar operators and actually operated a Pittsburgh Railways Co. vehicle for several days. He made reports on his progress and experiences on his John's Other Life which is a part of KDKA's nightly feature Program PM.

**KDEO billboards blanket San Diego**

What is it golfers go for, dog lovers dial, sun lovers tune, bird lovers like and debutantes dig? The answer is KDEO, Radio "91," according to 516 fullscale 24-sheet outdoor boards lining every highway and main traffic artery in and around San Diego, Calif. "This is by far the greatest outdoor showing in the history of San Diego media," declares John H. Pace, general manager of KDEO. The impact has been nothing short of sensational. Among those impressed by the boards was the advertising manager of a large West Coast company who had planned to use another station in San Diego but after driving around town decided that a station whose management got its name across so decidedly would probably do just as good a job for its advertisers. So he placed his business on KDEO.

**BPA plans awards for on-the-air promotion**

The Broadcasters' Promotion Assn. will recognize "excellence in on-the-air promotion techniques" with a series of awards to be presented at the 1961 BPA Seminar in New York.

John F. Hurlbut, BPA president, WFBM Indianapolis, reports that entries will be received from non-members of BPA as well as from BPA members. He stated that BPA is establishing its awards to encourage "more creative use of the best promotion tool at our disposal—our own air time."

Categories for the competition are:

**Television** • Station image announcements (call letter, channel number, trade mark); special events (news, sports, public affairs); general programs (show, personality).

**Radio** • Station image (call letter, frequency, sound trade mark); special events and personalities and programs.

Mr. Hurlbut has appointed Dorothy Sanders, WLWD (TV) Dayton, Ohio, chairman of the Awards Committee. Other committee members are Chuck Gay, WHO Dayton; Harvey Clarke, CFPL, London, Ont., Canada; Jack Dorr, WBN-S-TV Columbus, Ohio; Dave Kimble, Grey Adv., New York and Steve Libby, Communications Counselors Inc., New York.

Two classes of awards will be presented: "Awards of Merit" and "Awards of Honorable Mention."

**Drumbeats...**

Mail call • At a recent special ceremony in the postmaster's office of the Philadelphia Post Office, Dick Clark, star of ABC-TV's daily American Bandstand, opened the five-millionth piece of viewer mail he has received since the program started in August 1957. The Bandstand office at WFIL-TV Philadelphia, where Mr. Clark's daily mail load is normally delivered, has processed letters from state governors to pre-teenagers.

Roanoke research • Avery-Knodel Inc., New York, has prepared for distribution to spot tv advertisers and their agencies a study of the Roanoke, Va., tv market on behalf of WSLS-TV that
BROADCAST ADVERTISING

William B. Bachman Jr., senior vp at MacManus, John & Adams, N. Y., named director of client service.

Lester Wunderman, Wunderman, Ricotta & Kline, N. Y., appointed chairman of agency's newly-formed plans board. Other members are Harry Kline (secretary), Ed Ricotta, Irving Wunderman, Peter Rabar, Harry Hites, Thomas Collins and Ralph Siegler.

Horace W. R. Barry, formerly group promotion manager in Nestle's chocolate division, appointed advertising and sales promotion manager of The Nestle Co., White Plains, N. Y.

Ivan T. Galanoy, former copy director at Cunningham & Walsh, Los Angeles, joins Kenyon & Eckhardt, that city, as copy chief.

James R. Dwyer Jr., formerly with Young & Rubicam, N. Y., to Robert Conahay Inc., that city, as copy supervisor.

Roy F. Segur, who was formerly vp in charge of marketing and research, Lambert & Feasley, N. Y., appointed director of research at Lawrence C. Gumbiner Adv., that city. Mr. Segur is a voluntary consultant to National Securities Resources Board and Dept. of Commerce.

Richard B. Neff, former vp and senior group head for tv-radio-print at Compton Adv., N. Y., joins creative staff of Geyer, Morey, Madden & Ballard, that city. Prior to joining Compton last year Mr. Neff spent nine years with J. Walter Thompson, N. Y., as copywriter and group head.

Richard J. Cox, Marvin H. Koslow, Colgan Schlank, Martin J. Waldman and Kenneth A. Wood Jr., all members of radio-tv department of Young & Rubicam, N. Y., named supervisors.

Robert C. Shea, field sales manager, consumer products, Westclox Div., General Time Corp., N. Y., appointed manager of marketing of division. Mr. Shea, who was field manager since Oct. 1958, succeeds H. T. Millikin, who has been appointed special assistant to Roland B. Hally, vp and general manager of Westclox.

Help Wanted—Management

You may be an assistant, or a full-dressed sales manager, who is old fashioned enough to believe in loyalty to your employer; but young enough to have initiative and real talent for selling yourself and your station. One reason you would leave your present job is because you find little opportunity for advancement. You have had some years of radio sales experience, and have a fair knowledge of station operation. If this sounds like the real you, send your resume here with an old, established 5000 watt, CBS affiliate in an area you would over- see local sales, and handle regional and national sales yourself. If you know you can meet these requirements, give full particulars, along with snapshot, in first letter. Box 286D, BROADCASTING.

Your chance to move into management from sales. Successful market station in sunny South Florida needs manager who can sell and do a board shift. Base plus percentage of what you sell and percentage of gross revenues. Expect long hours, hard work in this job which will be your first station management position and your stepping stone to larger markets within the chain. Return to Box 786D, BROADCASTING.

Washington, D. C. Our sales manager just received a promotion. We're looking for a young man to fill his shoes. This is an unusual opportunity with top income. Box 292E, BROADCASTING.

California, Sunshine and opportunity. Management plan, 5000 watt. Growing area. Box 276E, BROADCASTING.

Connecticut opportunity, New Haven suburb, want engineer, to act for principal AM applica- tion, job. 20% ownership plus management must be diversified. Survey and frequencies completed. Box 282E, BROADCASTING.

Sales

South Florida metro market. $100.00 week plus 15%. Weekly collected sales of $5000 you get $750. $1000 you get $150. You must have a proven record in radio time sales which will be thoroughly checked. A great opportunity for the hard working pro. Box 787D, BROADCASTING.

Salesman-announcer needed at once. Light announcing, heavy sales. Salary plus com- mission. Send references and actual data to Box 166E, BROADCASTING.

South Georgia—Top station in multiple market has opening for sales manager, advancement manager possible. Box 292E, BROADCASTING.

FOR THAT "LIVE" LOOK, TAPE IT...
on Scotch® Brand Live-Action Video Tape!

"Real-life" presence is the new TV look achieved by today's commercials using "Scotch" Brand Video Tape. Until now, the home-viewer's picture has been an ingenious compromise—an optical medium shown on an electronic screen.

Not so with tape! "Scotch" Brand Video Tape offers complete compatibility of picture source and picture—both electronic—with a greatly expanded gray scale for gradual transitions from absolute black to absolute white. In addition, tape eliminates jitter, provides excellent sound quality and an "unlimited" number of special effects. It all adds up to cleaner, crisper originals of unsurpassed quality. . . with exceptional Video Tape duplicates and kines from master tapes.

"Scotch" is a registered trademark of 3M Company. © 1961, 3M Co.

Tape has many advantages—for advertiser, agency, producer. Playback is immediate, serious goofs can be remedied at once by retakes. Special effects are made instantaneously . . . no lab work and waiting. Costs are competitive, savings gratifying.

Tape is easy to work with, no mystery. . . talented specialists are available to help you. Prove it to yourself!
Send your next TV storyboard to your local tape producer for an estimate that will surprise you—at no cost or obligation.

Write for the new brochure, "The Show is on Video Tape"—a case history of six commercial tapings. Enclose 25¢ to: 3M Co., Box 3500, St Paul 6, Minn.
OUR RESPECTS to Representative Oren Harris (D-Ark.)
He's damned by some—praised by others

As chairman of the House Interstate & Foreign Commerce Committee and its Legislative Oversight Subcommittee, Democratic Congressman Oren Harris of Arkansas has become a byword in every phase of broadcasting.

To most he is just a name or symbol. He has been damned and painted as a man with horns by some. He is feared by those who do not know him.

To others—who do know him and have watched him at work—Oren Harris is described as the best friend broadcasting has in Congress. "I think he has been a tremendous benefit to radio and tv by knowing and understanding us and our problems," a network vice president said.

"He absorbs abuse intended for the industry and wards off sharp blows from every Tom, Dick and Harry who knows nothing about our problems."

Many broadcasters have come to realize that there is no man in Congress who knows and studies his field like Rep. Harris. He doesn't go off "half-cocked," one broadcaster says. "He knows what will and what will not work and does not rush into bad legislation."

House Speaker Sam Rayburn (D-Tex.), a Harris crony and himself a former chairman of the Commerce Committee, has his reasons for liking the Arkansan: "I have watched many chairmen of the committee in my time here, and I think Mr. Harris has as wide a grasp of the functions and duties of that committee as any chairman I have ever known. In my estimation, he is one of the great chairmen that have served on that committee.

A similar appraisal was given by Rep. John Bell Williams (D-Miss.), who ranks just below the chairman on the Commerce Committee. He said: "No congressman works harder or longer than Oren Harris. He has acquainted himself thoroughly with every piece of legislation that comes before us."

Rep. William Springer (R-Ill.), No. 2 minority member of the Commerce Committee, agreed that Rep. Harris is an expert in all phases of commerce, particularly communications. "Whether you agree with his views or not, you know that they have been reached only after extensive study."

Minority Is Heard • The chairman's committee members agree that Rep. Harris never tries to ram anything through and always listens to the views of all. He is by the same token a very strong chairman and always maintains control. Once he makes up his mind it is pretty hard to change, a colleague said, and "he can be awful stubborn at times."

"There's one thing about it, our Leg-islative Oversight Subcommittee has got everybody busy doing something," Rep. Harris said last week in reviewing the record of the controversial investigative body. He is proud of the accomplishments of the subcommittee, although, he said, some of the methods used at times were undesirable.

He doesn't mention it, but the Saturday Review last spring honored the subcommittee "... for distinguished service to advertising," the first such award to a congressional committee.

Although the name will be dropped, a permanent subcommittee with the same oversight functions will be continued in the new Congress. Such an investigative arm is considered a must by Commerce members and Speaker Rayburn because several other committees are just waiting for a chance to launch radio-tv investigations of their own.

This Man, Harris • Oren Harris was born in Hempstead County, Ark., Dec. 29, 1903, the son of a farmer-school teacher-politician. The Harris home was a combination frame and split-log house. A teenage Oren decided to become a lawyer one day while plowing his father's field—farming did not appeal to him.

An extra good cantaloupe crop of his own financed his early high school education and his ability as a football halfback provided the wherewithal for college.

He graduated from Prescott (Ark.) High School in 1925 and received his LL.B. in 1929 from the Cumberland U. Law School in Lebanon, Tenn. His undergraduate days were spent at Henderson State College (Arkansas), where he was president of the freshman and senior classes, and a football star.

During the summers, Oren was a highly regarded catcher on semipro teams and from 1940-54 he continued to star as the Democrats' catcher in the annual congressional baseball game. He accepted his wife's advice and "retired" when he couldn't get out of bed after the 1954 game.

The year 1930 found him teaching school while he qualified for the Arkansas bar. The following year he entered practice in Prescott and moved to El Dorado (his present home) a few months later. In January 1933 he became assistant prosecuting attorney and in 1936 was elected district attorney for Union, Columbia, Calhoun and Ouachita counties. Four years later, in 1940, he unseated incumbent Rep. Wade Kitchens and has been representing the 4th District ever since.

Shortly before moving to El Dorado, Oren began courting Miss Ruth Ross, whom he had known only slightly while both were in college. They were married in May 1934 and have two children, Carolyn Harris McCloud (the national Cherry Blossom Princess of 1959), and Jimmie, 13.

A Proud Record • "There are several things that stand out in my 20 years in Congress," Rep. Harris says. One was his 1941 vote with the majority, while a freshman member, which continued the selective service by only one vote. This was just a few months before Pearl Harbor.

Others:
(a) Becoming chairman of the Commerce Committee with the start of the 85th Congress in 1957;
(b) his work with the regulatory agencies the past four years;
(c) the "timely exposure of deceptive and fraudulent practices in broadcasting ..." and the resulting corrective legislation and
(d) chairmanship of a special subcommittee on programming in 1951-52 which led to the present broadcast codes.

Mrs. Harris revealed that her husband's favorite tv shows are westerns, naturally. He spends many evenings reading and watching tv.

Rep. Harris is a 32nd Degree Mason, member of Knights of Pythias, SAE fraternity and part-time Sunday School teacher at Washington's Calvary Baptist Church.

The congressman devotes as much time as possible to his family (this past weekend he took Jimmie and fellow Boy Scouts to a Rockville, Md., outing) and on a few Saturdays can be found on the golf course.

Rep. Harris has promised to delegate more authority to his committee members this session, with his family and hobbies to be the main beneficiaries.
EDITORIALS

Measuring methods

The report of the American Statistical Asso.'s committee on broadcast ratings, being prepared for the House Legislative Oversight Subcommittee, promises a thorough review not only of audience measurement practices but limitations and usefulness of the results as well.

Judging from the 37 probing questions that were submitted to the major rating services and are described elsewhere in this issue the group has in its possession exhaustive information regarding this important segment of the broadcasting business. Rep. Oren Harris, in giving the committee more time to finish its report, expressed his desire that the findings be complete. Committee men say the report is in draft form, implying that it may be issued within a few weeks at most.

These findings, prepared as they are by members of an ethical and experienced group, may very well help to clear the air about the ratings services. The tendency to blame broadcasters for so-called deficiencies in ratings practices may often be blamed on misconceptions of the purpose of and misuses of audience measuring results by people in positions of responsibility in government and even in industries related to broadcasting.

Exposure of the entire ratings procedure to scrutiny may react not only to educate everyone involved but could suggest methods of improving the ratings themselves.

Since advertisers insist on some form of counting the house as a basic ingredient in determining the effectiveness of radio and TV purchases we have long held that broadcasters might well have more control over the methods used to measure their media.

The end result of this report might easily be just such industry participation.

Another chance for freedom

Broadcasters have a chance to regain some of the ground they lost a year ago when, perhaps inadvertently, they invited the FCC to poke its nose deeper into programming. The commission has at last issued a proposed license application form involving a new approach to the applicant's report on programming and has asked for comments on it.

We do not think that most broadcasters—or for that matter most non-broadcasters who cherish the constitutional guarantees of free speech—will like the FCC's proposal. Many of them will side with FCC Commissioner Rosel Hyde who concurred in the issuance of the rule-making notice "for the purpose of obtaining comment" but who expressed "misgivings" about the rule the FCC proposed.

Said Mr. Hyde: "The approach, however well intended, in which the licensing authority endeavors to prescribe certain guidelines for the programming of stations would seem to assume responsibilities which should remain as the clear responsibility of licensees. The more the agency gets into this business, the more impossible its position is likely to become. It could find itself being held responsible by the public in matters involving creative effort, taste and opinion, which it would be hopeless to deal with, aside from the traditional objections against government intervention in such matters and the specific prohibition of Section 326."

What the FCC has proposed is what broadcasters themselves asked for when they testified at the commission's program hearings in early 1960. The NAB made a particular point of arguing that applicants for station licenses ought to write a narrative report showing how they had tried to meet the needs of their communities. That, in amplified form, is what the FCC now wants to be done.

But to comply with the requirements that the FCC now suggests would be a heavier burden than many broadcasters could bear. The preparation of a renewal application would be as difficult as the preparation of an application for an original grant. If this rule goes through, only the lawyers will benefit.

To us, the FCC proposal promises a government excursion into an area of program control that is marked off-limits by the First Amendment. It is to be hoped that the NAB, now under new leadership, will enter a more vigorous dissent to government intervention than it did a year ago. And all broadcasters ought to enter comments, which we trust will be mostly unfavorable, in response to the FCC's request.

Temporary telephobia

As everyone predicted, the House Rules Committee has again shelved the proposal to permit televising of House committee hearings.

Arguments of Rep. George Meader (R-Mich.) that there's no better way for the people to know what their representatives are doing than through radio and television met a stone wall of indifference from the political henchmen of Speaker Sam Rayburn. Arguments that President Kennedy is relying heavily on television to sell his program to the nation and reminders that many Senate committee hearings have been televised failed. The committee vote was 8 to 6.

Broadcasters may console themselves that the Rayburn victory can be only temporary. The fact remains that our government is a people's government and the voters have the right to see and hear their elected congressmen in action.

As more elected officials use broadcasting to report their problems and their activities it will be more and more difficult for reactionary forces to operate entirely behind closed doors.

Even though eventual victory seems assured, broadcasters must do their bit to hasten its arrival. Congressmen should be reminded at every opportunity of the advantages which live television and radio reporting can have for our form of government. Every vote helps in the effort to break down these artificial barriers to reporting the news as it happens.

We've momentarily lost our picture, but we will continue with the audio portion of the program!"
