**Wassail!**

**IT'S A GREAT SEASON**

The goose hangs high at WWJ-TV.

We're delighted with our feast of NBC hits, pleased as punch by local audience-winners like Groucho Marx, Wyatt Earp, George Pierrot, Two Faces West, Ripcord, M Squad. And, we point with pride to our blue ribbon roster of sponsors and agencies.

Yes, it's a great season. Cheers!

“Great Music from Chicago”

Join this list of prestige stations. Series II now available. For details, call or wire Bradley R. Eidmann, WGN Syndication Sales, 2501 W. Bradley Place, Chicago 18, LAkeview 8-2311.

A WGN Syndication Feature
Philo T. Farnsworth: The Image Dissector Tube for transmitting television pictures is one of the more important of the 165 inventions patented by Farnsworth. In this tube the first use was made of electron optics, the electron microscope was first built and used in the study of its photoelectric surfaces, the first electron multiplier was used, the first flat window seal was made, magnetic focusing was first used, and the so-called “black light” converter (infra red light) was developed for the sniperscope by viewing the electron image of the dissector on a fluorescent screen.

**WGAL - WGAL-FM - WGAL-TV** have pioneered in the development of mass communications. Established in 1922, 1944, and 1949, respectively, these stations have been and are dedicated to serving all listeners in the cities and communities throughout their coverage areas.
KOOG-AM-FM-TV to Time-Life

Contract was being drawn last week for sale of KOOG-AM-FM-TV San Diego to Time-Life Broadcast Inc. for about $6.25 million. Sellers are Fox, Wells & Rogers, investment firm, representing majority and Newsweek division of Washington Post Co. with 46.22%.

Transaction, through Blackburn & Co., was negotiated with James Rogers of Fox, Wells and executives of Time Inc. and of its broadcast division, headed by Frederick S. Gilbert, general manager.

Washington Post Co., which last year acquired Newsweek, along with minority ownership in San Diego stations, reportedly was not interested in acquiring full ownership of stations because of geography and because its broadcast interests are in South Atlantic area (WTOP-AM-FM-TV Washington and WXJT [TV] Jacksonville).

Time-Life stations are KLZ-AM-TV Denver, WTCN-AM-TV Minneapolis, WFMB-AM-TV Indianapolis and WOOD-AM-TV Grand Rapids, plus production and foreign minority holdings.

Three-year rule

Within next two weeks Broadcast Bureau will recommend to FCC that pending “three-year holding rule” be adopted. Proposed year ago on 5-2 vote (BROADCASTING, Dec. 12), new rule would require original applicant or purchaser to hold station for minimum of three years, except in extenuating circumstances. It met violent broadcaster opposition (BROADCASTING, Jan. 30) and has been dormant since. FCC spokesman said last week that rule will not be “killed or watered down” after FCC had asked bureau to bring forth its recommendation.

Political bite?

In its early deliberations, Presidential Commission on Campaign Costs has talked enough about high price of political campaigning on air to indicate it may propose new law to put bite on broadcasters for more free time. Commission, appointed two months ago by President Kennedy (BROADCASTING, Oct. 9), has been told to submit report by next March 30, so that legislative proposals may be made in time for action by next session of Congress.

Commission is headed by Alexander Heard, dean of U. of North Carolina graduate school. Two of its nine members have broadcasting connections: Paul Porter, FCC chairman in Roosevelt administration and now Washington lawyer, and Walter Thayer, president of New York Herald Tribune, part of John Hay Whitney holdings that include Corinthian stations. At organization meeting, President Kennedy told commission members it was essential that something be done to reduce campaign costs and find means of financing that won’t leave winning candidates beholden to big contributors.

Newt. Jr. C of C selection

Among 10 outstanding young men selected annually by Junior Chamber of Commerce (and announced in January) will be at least two young New Frontiersmen. They are FCC Chairman Newton N. Minow, who was 35 last January 17, and Theodore C. Sorensen, special counsel to the President, 33 last May 8.

Spectrum specialist

White House staff is studying recommendations by Bureau of Budget for creation of telecommunications administrator in Executive Dept. He would be supervisor of that portion of spectrum used by military and other government agencies now handled by Interdepartmental Radio Advisory Committee. Move will not affect FCC jurisdiction over non-government assignments, but will plug hole in spectrum administration. After this step overall spectrum management can be considered.

WFIL’s $3.5 million center

On drawing board are plans for $3.5 million broadcast center for WFIL-AM-FM-TV Philadelphia and Triangle Publications’ radio and television division headquarters. To be located at western Philadelphia city line (across from WCAU-AM-FM-TV headquarters) facility will be situated on four-acre site with main studio, production and technical equipment housed in circular design. (KTRK-TV Houston dedicated its circular design building last month.)

Target date for WFIL plant, according to Roger W. Cllipp, vice president and general manager of Triangle’s radio and television division, is February 1963. Four-level structure will provide 75,000 square feet of usable space. Other Triangle stations are WBG-AM-FM-TV Altoona, WLYR-TV Lebanon; WNBW-AM-FM-TV Binghamton, WNBC-AM-FM-TV New Haven and KFRE-AM-TV, KRFM (FM) Fresno.

Goodyear in radio

Goodyear tire is buying spot radio in six major markets—reportedly as result of new selling technique being used by RAB (see page 30). Markets are Milwaukee, Detroit, Denver, Los Angeles, San Francisco and St. Louis, with orders for minutes predominating. Campaign slated to run six months.

FCC’s reduced workload

FCC’s workload also appears to have diminished rather suddenly. Whereas FCC meetings used to occupy all day Wednesday and on many occasions go into Thursday, FCC hasn’t had meeting that has lasted two or three hours since Congress quit last September. Agendas have been unusually light. To some degree this is attributed to delegation of more routine matters to staff and also to fact that Congress hasn’t been preempting FCC time.

Lestoll’s net-spot plans

Lestoll’s first-time jump into network tv comes to some $1.5 million, but it won’t desert spot. Announcement in mid-December will detail Lestoll’s 1962 buys. Reportedly, strategy will include participations in four nighttime shows on ABC-TV and an across-board strip of NBC-TV daytime to add to NBC-TV prime time buys already announced (At Deadline, Nov. 27). Spot tv will emerge just after beginning of year with as much as $5 million to be budgeted.

Sackel-Jackson, Boston, is agency for Lestoll, which has been heavy brand spot advertiser, last year alone spending more than $7 million in spot.

ARB-McDonald pact

Working relationship is to be announced shortly whereby American Research Bureau will market McDonald Research Ltd.’s Canadian audience measurements to U.S. buyers and McDonald will market ARB’s U.S. measurements to Canadian buyers. Purpose: To offer quicker access to ratings for agencies located in one country but buying time in other. Interchange of research data, validation studies, etc., between ARB and McDonald also provided in agreement, which involves no exchange of money or stock. Two companies have similar services, both diary and instantaneous. McDonald’s instantaneous, operating on Toronto, is Synchronous Audience Measurement (SAM); ARB’s, national is Arbitron.

Published every Monday, 33rd issue (Yearbook Number) published in September, by Broadcasting Publications Inc., 1125 DeSales St., N. W., Washington 6, D. C. Second-class postage paid at Washington, D. C., and additional offices.
WHAT WILL A BAHT BUY? When Thailand was Siam and ticals were "tender," there were thousands of these three-headed elephants in Bangkok. But as times changed, these elephant coins disappeared and Bangkokians began buying with bahts. In Thailand, the natives can tell you, but, if you want to know what a baht buys in Baltimore, WBAL-Radio has the answer... Complete Coverage, that Thailand umbrellas can't provide—WBAL-Radio covers the entire metropolitan area plus 37 surrounding counties in Maryland and four adjacent states... A Trunk Full of Listeners that even a herd of elephants couldn't produce—WBAL-Radio is DOMINANT in the market, providing more unduplicated coverage than any other station... Full Range Programming and Music for Mature Minds—a distinctive combination that's hard to match even by Siamese standards. If you want to keep your sales riding high, bring your bahts to Baltimore—and buy WBAL-Radio! 

WBAL-RADIO BALTIMORE® Maryland's only 50,000 watt station

BROADCASTING, December 4, 1961
More than 1,000,000 students in the New York area view WPIX-11 educational TV as part of their regular curriculum. From 9:00 AM to 3:30 PM Monday thru Friday WPIX-11 telecasts twenty-two different courses under the auspices of the New York State Board of Regents for in-school students and viewers at home. This marks the fourth consecutive year of WPIX-Regents programming, the only association of such magnitude in the nation between Educational Television and a Commercial Television Station.

NEW YORK'S PRESTIGE INDEPENDENT
Theatres ask court to stop Hartford pay tv

FCC, RKO GENERAL DENY CHARGE TEST IS ILLEGAL

Theatre owners moved into court Friday to block start of pay tv.

Questioning legal right of FCC to approve three-year Phonevision test over WHCT (TV) Hartford (BROADCASTING, Feb. 27), Marcus Cohn, counsel for Connecticut Committee Against Pay Tv, charged that commission violated its own criteria in Third Report and argued that fee project is contrary to public interest.

Commission's grant was defended by Max Paglin, FCC general counsel, and Harold Cohen, representing RKO General, (licensee of WHCT). Argument was before three-judge panel of appeals court in Washington.

Mr. Cohn's claims: (1) Public will have to pay for decoders, (2) public will be deprived of free programs now received from WHCT during prime hours, (3) FCC can't approve service for which public must pay without regulating charges, (4) licensee of WHCT will not have control of programs as required by FCC.

For Test Only • Mr. Paglin stressed that grant is not permanent but for trial of Phonevision pay system. "This is just the opening innings of the ball game," Mr. Paglin said. He emphasized that grant was made to get "meaningful facts" on whether public desires pay tv.

There is no question that FCC has legal authority to authorize pay tv, general counsel maintained. Mr. Cohen stressed Hartford service will be trial of fee tv in marketplace—which is best method of finding whether it is in public interest, he stated. Public

will not be taxed, Mr. Cohen said; RKO General is prepared to spend $2 to $10 million on project and expects to lose $1 million.

Ted Bates associates with agency in Paris

Ted Bates & Co., New York, has formed association with French agency, Agence Francaise de Propagande, Paris, it's announced today (Dec. 4) by Rosser Reeves, chairman of Bates, and by Pierre Guichenne, president of French agency.

New company will function in France as A.F.P.-Ted Bates, S.A., with offices at 61, Avenue Hoche, and 6, Rue Arsen Houssaye, both Paris. Armand de Malherbe, managing director of Agence Francaise de Propagande, becomes president and director general of A.F.P.-Ted Bates.

Combined Bates organization personnel in New York, London, Toronto, Montreal, and Paris, will total about 1,300 people. Estimated worldwide total billings are about $170 million, including close to $4 million annual billings of French agency.

Pepsi, Allen to part

Pepsi-Cola's disenchantment with ABC-TV's Steve Allen Show (Wed., 7:30-8:30 p.m.) is now said to be complete. Pepsi is reported to have notified network it will cancel its alternate-week, half-hour sponsorship of Allen, effective Dec. 27. Pepsi-Cola and its agency, BBDO, New York, will use funds allocated for Allen for minute participations on ABC-TV, CBS-TV and NBC-TV programs. Selection of shows is now in progress. ABC-TV plans to continue with Allen despite Pepsi's defection.

Gardner revamps media, research

Media and research departments of Gardner Adv., St. Louis, are being combined in major marketing reorganization to better serve agency clients. Three new combination media-research groups, each of equal rank and without special name, are being established, it was learned Friday.

Assistant marketing director in charge of first new group will be Warren B. Wiethaupt, formerly media supervisor. Ralph Neugebauer becomes media supervisor and Ralph Franklin becomes research supervisor within Mr. Wiethaupt's group. Don Osten, formerly account executive, becomes assistant marketing director heading second group, which will include Patricia Schinzing as media supervisor and Norman Peskind as research supervisor. Head of third group is yet unnamed but group will include Bob Faust as media supervisor and Jean Drewett as research supervisor.

Messrs. Wiethaupt and Osten will report to Fred Gerlack, formerly research director, who becomes associate marketing director, St. Louis. He in turn will report to Frank E. Heaston, who continues as vice-president-marketing director, New York and St. Louis.

R. R. Riemensneider, vice president and media director at St. Louis office of Gardner, resigns to join Campbell-Mithun, Minneapolis. Winston Miller and Joe Turner of Gardner's St. Louis media staff also resign.

Ado about 'CBS-TV Reports'

CBS-TV program, "Biography of a Bookie Joint," has stirred up controversy among law enforcement agencies. Show, blacked out in Boston, was aired on CBS Reports last Thursday (Nov. 30).

Program showed raids on bookie joint in Boston and people entering and leaving place, including several Boston policemen. Suffolk County District Attorney Garrett H. Byrne, after viewing preview of show, said he would

Bristol-Myers renews 90% discount tv deal

Bristol-Myers Co., which has been participating in so-called "bartered-time" offer through A.P. Management Corp., Beverly Hills, Calif., since September, on behalf of its Ipana toothpaste, plans to continue deal next year for other B-M Products, it was learned last Friday. Advertiser not only gets product plugs in certain five-minute programs which A.P. Management gives to stations, but also gets spots in other programs and in commercial breaks. Bristol-Myers saved estimated $900,000 in deal involving 1,600 radio stations. B-M got five five-minute programs per station per week for 13 weeks for $105,000 (card rate value estimated at $1,007,000). Stations are "paid" in programming and merchandise. A.P. Management's programs to date feature such stars as Eddie Cantor, George Raft and Jacques Bergerac, but others are in works, including one-minute vignettes on public service subjects.

BROADCASTING, December 4, 1961
William R. McAndrew, executive vp of NBC News, was elected to network's board of directors. Newly elected vps of NBC are Ellis O. Moore, director of press and publicity; Alexander S. Rylander, director of promotional services, and Grant A. Tinker, general program executive. Mr. Moore has been with NBC since 1952 and has been director of press and publicity since 1959. Mr. Rylander joined NBC in 1955 as exploitation director. Mr. Tinker has been with NBC since Nov. 2. Earlier he was vp and director of programming for Benton & Bowles, New York.

Dr. Elmer W. Engstrom, senior executive vp of RCA since 1955, elected president of corporation, succeeding John L. Burns, who has resigned. Mr. Burns will continue to serve RCA on special assignments from board chairman David Sarnoff. Arthur L. Malcamy, executive vp of RCA Defense Electronic Products, named to board of directors, effective today (Dec. 4). He fills vacancy on board created by resignation of Mr. Burns (story, page 76).

Submit evidence to grand jury in investigation of possible collusion between Boston policemen and racketeers.

Extra RCA dividends declared on two stocks

RCA board Friday (Dec. 1) declared 2% common stock dividend in addition to regular quarterly cash dividend of 25 cents per share on common stock. Dividend of 87½ cents per share was declared on first preferred stock for period Jan. 1, 1962 to March 31, 1962.

Dividend on preferred stock is pay-able April 2, 1962, to holders of record at close of business on March 5, 1962. Common stock dividends are payable to holders of record at close of business on Dec. 15. Cash dividend will be paid on Jan. 22, 1962, and stock dividend on Jan. 29, 1962.

TNT network specials compared by Arbitron

Simultaneous presentation of specials on three TV networks (Thursday, Nov. 30) offered interesting study of viewing taste with top drama, musical and documentary programs pitted against each other.

One of trio, "Biography of a Bookie Joint" on CBS Reports, garnered program's highest rating of season—with average for hour at 13.5 against 6.8 average in previous week according to National Arbitron. ABC-TV's "Yves Montand" special kept slight edge over CBS Reports.

Hallmark's "Victoria Regina," on NBC-TV (9:30-11 p.m.) maintained ratings lead for entire 90 minutes, including first half-hour against regular programs, Margie and Investigators on ABC-TV and CBS-TV, respectively.

Complete National Arbitron (overnight) ratings and share of audience figures for all network shows in 90-minute period follow below:

Galvin asks 30-vhf band or 60-uhf band for TV

Re-allocation of tv into one contiguous 30-channel band starting at present vhf ch. 7 or containment in smaller 60-channel all-uhf band was urged by Motorola President Robert W. Galvin in talk before Institute of Radio Engineers at Minneapolis. In text released Friday, Mr. Galvin urged changes to accommodate more non-broadcast services.

Mr. Galvin also called for legislation by Congress to broaden powers of FCC to function as total arbiter of spectrum instead of sharing authority with Independent Radio Advisory Committee. As alternative, he endorsed establishment by law super-spectrum agency to arbitrate between FCC and IRAC. He said FCC in ten years has lost out as principal spectrum authority and that IRAC now controls 70% of frequencies (40% on exclusive basis) and FCC controls only 30% in range from 25 mc to 10,500 mc.

Overseas sales to aid U.S. TV, says Johnson

Griffith Johnson, vice president of Motion Picture Assn. of America, predicted Friday foreign markets will provide opportunities for future growth of U.S. television.

He said U.S. TV films sold abroad will return $45 million in 1961.

Since number of television sets in use in free world outside U.S. is growing at far faster rate than in almost-saturated American market, he said, "relative importance of the foreign market as a buyer of TV film" is bound to increase. Mr. Griffith testified before House subcommittee studying question of "runaway" production—American films made abroad for U.S. consumption.

Union officials agreed importance of foreign markets for TV producers is increasing—but said this will hasten trend to foreign production of American television films.

H. O'Neil Shanks and John W. Denny, officials of Hollywood AFL Film Council, conceded runaway production is not same problem in TV industry as it is in theatrical film field. But they repeated union's prediction (Broadcasting, Oct. 2) that it will become serious "threat" unless steps are taken to prevent it.

Global TV cheaper by jet, says Craven

Much of global TV broadcasting among nations in future will be tapped, transported by space jets and placed on national networks of each country at time most suitable to local populations, FCC Commissioner T. A. M. Craven predicted in talk before Collins Radio Co. Technical Assn. in Cedar Rapids.

Though global live telecasting by satellites is technically possible, he said, many operational, administrative and economic problems make it highly impractical and unlikely. He did feel there would be instances when live programs of extreme importance would be relayed by common carrier satellites and rebroadcast live by local systems using technical standards of each nation.

Direct satellite-to-home system would require every citizen of world to have two sets, one for own national system and other for international system, because of spectrum conflicts, he explained. Cost also would be in billion dollar range.

Norge quits Chicago agency

Norge Division of Borg-Warner Corp. and agency Keyes, Madden & Jones, Chicago, announced parting by mutual agreement Friday. Norge will chose between Clinton E. Frank Inc. and Needham, Louis & Brorby, both Chicago, by end of year after considering presentations. Account bills $1.1 million in all media.
THE WORM TURNED
(in Virginia, that is)

Once upon a time there was a worm that got tired of apples and took up books. He hit on a choice morsel—a two-volume history of the Shenandoah Valley, standing straight and proud in the usual order on the shelf.

Each book contained 486 pages; each cover was \( \frac{1}{8}'' \) thick; the paper thickness ran 243 pages to the inch. Our worm started at the flyleaf of volume 1 and ate his way to the last page of volume 2. How far did the tip of his nose (if worms have noses) travel?

Apart from the fact that WMAL-TV will be delighted to receive your solution (and for which we offer our usual enticing mementos as prizes for your enterprise), there's a moral to this story: You can't worm your way into the Shenandoah Valley by buying Washington & Richmond. You need WSVA-TV, our sister station, to cover the Shenandoah Valley. WSVA-TV offers extremely attractive combination rates with WMAL-TV.

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

DECEMBER

Dec. 4—Oral arguments before the FCC en banc on network option time proposals. (rescheduled from Nov. 17).

Dec. 4—Deadline for comments on FCC proposal to deintermix Springfield, Ill., by shifting ch. 2 to St. Louis. Original grant of ch. 2 to TV was remanded by court for exploration of ex parte activities.

Dec. 4—Deadline for comments on FCC's proposal to add additional vhf channel at below minimum mileage spacing to following cities: Baton Rouge, La. (Doc. 14253); Birmingham, Ala. (Doc. 14236); Charlotte, N. C. (Doc. 14238); Dayton, Ohio (Doc. 14234); Jacksonville, Fla. (Doc. 14238); Johnstown, Pa. (Doc. 14232); Knoxville, Tenn. (Doc. 14237); Oklahoma City, Okla. (Doc. 14251).

Dec. 4—Second annual legal seminar, National Community Television Assn. Edgewater Beach Hotel, Chicago.

Dec. 6—House Small Business Committee hearing on opportunities to small advertisers to buy prime time on radio and television.

*Dec. 7—Seminar on public affairs and community radio broadcasting preparation, sponsored by CHUM Toronto, Ont. Seminar will be conducted by station executives, and will deal with manners and methods for public relations firms and charitable organizations to use in increasing the effectiveness of their announcements and station relations. Lord Simcoe Hotel, Toronto, Ont.

Dec. 7—Colorado Broadcasters Assn. special winter meeting, beginning at 9:00 a.m., with business meeting and free discussion. Dinner speaker to be FCC Commissioner Hyde. Continental-Denver Hotel, Denver.

*Dec. 9—Arkansas Broadcasters Assn. officers and past and present directors meeting primarily; but members are cordially invited to attend if they wish. Sam Peck Hotel, Little Rock.

*Dec. 9—NAB, 1961-62 committee on editorializing, first meeting. NAB Headquarters, 1771 N St., Washington, D. C.

Dec. 11—Reply comments due on FCC rulemaking to make major changes in fm broadcast operation. (rescheduled from Oct. 5).

*Dec. 12—American College of Radio Arts, Crafts and Science, special banquet honoring Chicago radio stations and allied fields. Grand prize and honorable mention win-

ners will receive awards at the dinner. Conrad Hilton Hotel, Chicago.

*Dec. 27-30—American Statistical Assn., 113th annual meeting. One session of the conference will be devoted to a panel discussion of the report submitted by the ASA's technical committee on broadcast ratings. This particular meeting is scheduled to begin at 2 p.m. on Wednesday, Dec. 27. Hotel Roosevelt, New York.

JANUARY 1962

Jan. 6-14—International Television Festival at Monte Carlo, sponsored by the government of Monaco.

Jan. 9—Final phase of FCC hearing on network tv programming practices and policies. Spokesmen for the three tv networks will testify before FCC en banc. Washington, D. C.

Jan. 17—Awards presentation of the International Television Festival at Monte Carlo. Gold Nymph awards will be presented for outstanding tv programs. The Opera House, Monte Carlo, Monaco.

FEBRUARY 1962

*Feb. 1—Deadlines for entries to the Headliner Awards contest, offering prizes for newspapers and radio-tv stations for excellence in news programming or preparation, and general public affairs service. Mail entries to Mall Dodson, executive secretary, National Headliners Club. Convention Hall, Atlantic City, N. J.

Feb. 4-13—Advertising Recognition Week. Feb. 5—Deadline for comments on FCC's proposals to expand use of uhf band, including dual uhf-uhf operation, reserved pools of uhf channels for existing operating vhf stations, abolition of uhf allocation, relaxation of technical rules for uhf sta-
"South Bend's Your Best Bet!"

Young man — put the odds in your favor by picking the South Bend market. This Metro Area alone has a household income of $7987*, highest in Indiana! Include the other 14 counties of the South Bend market, and it parleys into $1.7 billion in buying power.* South Bend's a winner, going away.

And here's how to pick the daily double. Let WSBT-TV carry your product colors. This station has the inside track into the market's TV homes . . . year after year gets over 41% share of sets in use . . . currently carries 36 of the top 50 locally-favored programs.** Top-rated CBS shows and popular local programs keep WSBT-TV in the winner's circle!

Want the latest scoop? Call your Raymer man. He'll trot over.

ONE OF CBS' HIGHEST-RATED STATIONS

Ask Paul H. Raymer, National Representative.
... and again and again and again! Each time another fact is uncovered in the 1961 WJR-Politz Study, politzomania* strikes deeper and deeper into advertising people and places. Even media vice presidents and advertising directors now fall helpless before politzomania.

The latest politzomania-causing fact reported from the field by WJR sales reps is the impact WJR news has on its listeners. The 1961 WJR-Politz Study reveals WJR as the number one choice for news by more than a million adults in the Detroit-Great Lakes Area. To be more specific, more than 1,132,000 people age 15 and older named WJR best for news. And 175 stations were mentioned in the 100-county four-state area of the study.

Please understand, then, our reps' enthusiasm as they apply this new kind of radio research to your specific advertising objectives. Well-armed with all the facts from the 1961 WJR-Politz Study, our sales reps will help you pinpoint logical prospects for your products. These prospects are profiled according to age, sex, socio-economic status, home ownership, radio listening habits, and many other helpful characteristics.

As this data passes into your hands, anticipate politzomania. Don't fight it. So far, no one has been immune.

*politzomania—newly discovered advertising affliction. Highly conspicuous. Identified by uninhibited displays of enthusiasm. Always found in WJR sales reps who have 1961 WJR-Politz Study in hand. Time-buyers and ad managers particularly susceptible. Wipes out sales resistance. Appears in flashes of marketing insight. Only known remedy: Sign the order!
Programming center for full or part-time automatic broadcasting

Plays up to 55 tape magazines and can be used to automatically start other broadcast equipment after any magazine.

The remarkable ATC 55 allows use of regular staff voices at all hours, with a minimum number of personnel on duty. Ideal for early morning and late evening hours, or to clear announcers for other duties during certain hours of the day. Let's you use your best talent during weekend or for separate FM operations. The ATC 55 will automatically play back up to 55 magazine-loaded taped spots, themes, and production aids; up to 165 full length musical selections, without resetting or re-loading. It is also designed to operate in conjunction with other broadcast equipment. A special 3200 cycle auxiliary control tone may be inserted at any point in the sequence to start (1) material recorded on reel-to-reel tapes, (2) a Seeburg record changer, or (3) the standard ATC units. Used in multiples of two or more (4), the ATC 55 may be programmed to play in any desired sequence automatically. It delivers the highest quality broadcast reproduction. And, best of all, it is so easy to operate that any of your personnel can run it. Write, wire or phone collect for complete information and literature today.

IS ANYBODY in the research business VISITING PEOPLE in their homes and asking them what they're watching or hearing AT THE TIME of viewing or listening?

PULSE IS - For many years professional and scientific boards of review have pointed to personal coincidental interviewing as the optimum (though costliest) technology. Now Pulse has developed the technology that makes it possible. For the first time in a continuing broadcast audience survey operation, Pulse is conducting personal house-to-house coincidental interviewing. At the moment, 9% of our sample is so studied.

Now we are entering a second phase of this program—"paired coincidental" which will double the effectiveness of our personal coincidental. For you who wish to read more about the technology involved, let us send you our Technological Bulletin No. 2.

NEW SUN GUN PROFESSIONAL PHOTO LIGHT

...AT A FRACTION OF THE WEIGHT, A FRACTION OF THE COST!

This is the compact new photo light that has started a revolution in studio lighting. It's the PROFESSIONAL version of the amazing SUN GUN home movie light, invented by Sylvania, that has been proved in use for over a year at top Hollywood and TV studios.

The new Sylvania SUN GUN PROFESSIONAL is remarkably light in weight... and small enough to fit in the palm of your hand. Yet it actually produces 5,000 watts of exposure at only 1,000 watts electrical cost. It's amazingly versatile, too. SUN GUN PROFESSIONAL does the job of most studio lighting equipment... and does it better!

Unlike regular studio equipment, SUN GUN PROFESSIONAL is inexpensive to buy, maintain, and ship on location. It also keeps its original brightness and color temperature for the entire life of the lamp... without reducing lamp life.

The fantastic brilliance of SUN GUN PROFESSIONAL comes from a powerful little 1000-watt High Silica Halogen lamp with 65,000 center beam candlepower... plus a specially designed reflector with more than 750 light-intensifying surfaces. The result is an intensely bright light that floods the

Scene like the sun. Light is smooth and even...balanced to 3400°K for indoor color film use.

SUN GUN PROFESSIONAL comes complete with portrait lens, flood lens, metal barn doors and 12-foot cord. It's completely adjustable, too. Head can be aimed in any direction. Instantly replaceable bulb has 12 hours average life. For more details and free literature, write Sylvania at the address below.

Sylvania Lighting Products, Division of Sylvania Electric Products Inc., 1740 Broadway, New York 19, N. Y.

SUN GUN PROFESSIONAL has a full range of optional accessories for every studio lighting need! Optional equipment includes Accessory Holder, Large Barn Doors, Daylight Filter, Special 3200° K Filter, Diffusing Filter, Snoots, Super-Spread Lens and Carrying Case.
When is a local advertiser? the retail rate rate explained

One of the most frequently misinterpreted and controversial aspects of buying radio and television today is the retail rate, almost always referred to erroneously as a local or regional rate. The retail rate is applied to the advertising of retail stores doing an "over the counter" business. It can be expanded to include any local merchant who represents and sells a nationally distributed product (local soft drink bottlers, automobile dealer associations, gasoline distributors, utility or telephone companies).

Such an advertiser normally sells to the local public through retail stores owned, controlled or managed by him alone (or by an aggregate group). He may be represented by a national advertising agency, and this is where the interpretation becomes questionable.

The reason this advertiser, whether or not represented by a national advertising agency, should be granted the retail rate is very basic. He cannot avail himself of the full power or coverage on which a medium's national rate is based. This applies to almost all media—radio, television, newspapers and magazines.

Unfortunately, misinterpretation of the retail rate has resulted in rather nebulous rate structures at many radio and television stations. The trouble has been caused by the creation of a complicated regional or local rate given an advertiser at the station's discretion.

Many advertisers are forced to go on a national rate card simply because they are represented by a national advertising agency. Because of the regional type of distribution of their product they feel they have been overcharged. Such advertisers usually are in the automotive, automotive products, gasoline and oil, telephone companies, utilities, etc. categories. The products usually are purchased from a national manufacturer. For example, automotive dealers in a given district band together to form a dealer organization.

Arm's Reach • The regional group can run an extensive, power-packaged campaign which one retailer could never afford on his own. Such retail groups often are represented by a national agency which orders the campaign. In such cases, the use of local media is extensive and small coverage areas are used almost exclusively.

The extent of a station's coverage, therefore, is not so important—provided it packs a punch within the given metropolitan area—since the station in the market immediately adjacent also will be used to cover the retailer in that city.

If the advertiser cannot avail himself of the advantages of a station's coverage, he should be entitled to a retail rate. But the buyer has a difficult job convincing the local radio or television station (or national representative) that his client should get such a rate.

Occasionally, weak links arise in the retail rate structure. One advertiser may be given a better price advantage than another and there is price cutting among stations within a market. The buyer never knows whether another advertiser might be getting a lower rate than his client. Consistency in a rate card is of prime importance—whether the station deems it necessary to have one, two or three rate cards. All advertisers in a specified classification should be dealt with fairly and equally.

More Rates • The one-rate-card system is not a good solution since the national advertiser looks for powerful-coverage stations in the major markets as opposed to either the local retailer or the regional groups of retailers. Consequently, at least two rate cards are needed. Perhaps also a flat rate for automotive, utilities, etc., could be established which would grant an equitable price to advertisers in these classifications. Some radio stations in smaller markets established this type of rate long ago.

Recently, our agency was awarded an account which has western headquarters and whose former agency was located in the same western city. The product involved was regionally distributed and the former agency had no difficulty securing local rates—because of the product's strictly regional distribution. But when we were buying the first campaign for this advertiser, since he was now represented by a national advertising agency, it was not easy to get station representatives or station management to understand the difficulties regarding coverage for the product.

Since a given number of distributors in a given metropolitan area need advertising impact, extensive coverage and elaborate facilities were not determining factors in the selection of stations used.

Compromise Rate • Many times, because of station format or community acceptance, it is to our client's advantage to use the power station in a market, but the exorbitant prices charged by some of these stations on a national basis made it virtually impossible. In these cases, station management—through the representative in New York—was approached with the problem. We explained that since we could not take advantage of more than the station's metropolitan coverage—we felt a compromise rate should be established which would be based on the coverage needed by our client. With few exceptions, the stations were agreeable. But much time would be saved if such rates were incorporated into the station's rate structure.

Although the retail rate had its origin in print, it represents a fair and satisfactory solution to the problem of who should be eligible for a less-than-national rate. It is established—for all practical purposes—on the basis of buying time "by the yard" or, in other words, by the coverage the local advertiser or retailing group needs to reach potential customers in a designated market. It can also be adapted easily to broadcast media. Thus, the problem of price cuts, bonus spots, local or regional rates, and similar concessions could be eliminated.

Basic ground rules regarding the eligibility of an advertiser for the retail rate could be established. Whether the advertiser is placing the schedule on his own, or is represented by a New York agency, the rate he pays should be determined by the amount of the station's coverage that he is able to utilize effectively.

Margot Teleki, timebuyer at Reach, McClinton & Co., joined the New York agency in 1960. She began her advertising career as an assistant timebuyer with Edward Kletter Assoc. (now Parkson Advertising), New York, in 1955. She subsequently became a timebuyer with Norman, Craig & Kummel, New York, in 1958, and worked in the same capacity at J. Walter Thompson, New York, from February 1959 to October 1960.

SCOTCH BRAND LIVE-ACTION VIDEO PICTURES, SIMPLIFIES

"LIVE" LOOK! Extraordinary visual presence of "SCOTCH" Video Tape, in black and white or color, gives new dimension to product sales appeal, believability. Tape assures complete compatibility of picture source and picture (both electronic), prevents jitter, achieves greatly expanded gray scale from absolute black to pure white. Result—commercials of unsurpassed quality.

INSTANTANEOUS SPECIAL EFFECTS! Wipes, dissolves, fades...pixies and giants...split-screen and dream sequences—you name it! You can matte person or product into different scenes, combine several images of the same person, photos, drawings, titles, cartoons, movies with live or tape. No waiting for the lab—"SCOTCH" Video Tape performs with ease and economy, instantly!

AND TAPE GIVES THESE ADDED ADVANTAGES! Immediate playback of commercials created on "SCOTCH" BRAND Video Tape is today's best insurance against fluffs—provides many other production advantages. In a matter of seconds, the producer, director, performers all know exactly the result of the latest take. They can immediately determine if the scene should stand or how precisely to improve it. Work schedules are uninterrupted, permit efficient scheduling of sets, talent, crews. Clients can see and approve new commercials on the spot, when enthusiasm is high. And, the many time- and money-saving advantages of video tape are yours, whether commercials are black and white or color. Either can be recorded on any roll of "Scotch" Live-Action Video Tape.
VIDEO TAPE MAKES TODAY'S BEST-SELLING PRODUCTION, COVERS THE COUNTRY!

EDITING'S EASIER! Multiple cameras permit on-the-spot video tape editing. Direct-cutting and splicing methods have improved. Now, out-of-sequence shooting, followed by tight electronic editing, has become routine. And you can mix tape, film, live, etc. Difficult shots can be re-used. Commercials can be lengthened, shortened, modified...quickly and economically!

TAPE COVERS...NET OR SPOT! Taped commercials can reach over 90% of any product’s market. Complete tape facilities of each major network can deliver your message to 150-200 affiliated stations. Spot coverage is available coast-to-coast, in all major cities, and the number of markets reached by VTR-equipped stations continues to grow. At press time, the total was 127.

GET THE FULL TAPE STORY!
Send your next storyboard to your nearby video tape producer for analysis—and a bid that will surprise you! For a free copy of the new brochure, "Techniques of Editing Video Tape," write Magnetic Products Division, Minnesota Mining and Manufacturing Company, Dept. MBX-121, St. Paul 6, Minn.

OPEN MIKE

Beef-upper

EDITOR: Many thanks for the fine coverage ("Midwinter is bargain time in spot TV,"Broadcast Advertising, Nov. 20). We are delighted with your story and think it can substantially help in beefing up midwinter spot business.—James O. Parsons Jr., Harrington, Righter & Parsons Inc., New York.

Doubtful substitution

EDITOR: As one of those who worked . . . to get adequate secondary boycott action for broadcasters . . . [in the] Landrum-Griffin Bill, I was shocked and dismayed by the NLRB's ruling (Gov-ernment, Nov. 6).

The decision . . . involves the substitution of a dubious theory of freshman economics for the clear meaning of words and the manifest intent of Congress.

Broadcasters must and will unite to make certain that this decision does not stand.—Charles H. Tower, administrative vice president, Corinthian Broadcasting Corp., New York.

He did, too, buy print

EDITOR: I was amazed to read the item, "Poll persausation" [The Media, Nov. 13].

. . . . I felt that in the interests of accuracy the enclosed tear pages would show some of the errors in the story . . .—James F. Duggan, advertising manager, Springfield Newspapers, Springfield, Mass.

The Broadcast Advertising story, based on a report from WWLP (TV) Springfield, said Charles V. Ryan in his successful campaign for mayor of Springfield used no newspaper advertising, a report the tear pages sent by Mr. Duggan to your paper.

WWLP explains the mixup this way: "WWLP intended its release to say that no newspaper supported the winning candidate EDITORIALLY."

TIO request

EDITOR: As editor of the Television Information Office brochure, Chicago edition, I am requesting permission to quote the editorial, "Far from child's play" [Editorials, Oct. 2], in the December edition.—Ethel Daccardo, editor, TIO Brochure, Berwyn, Ill.

[Permission granted, with appropriate credit to this publication.]

Missed point

EDITOR: Broadcast's account of the settlement of Nielsen's patent suit against the ARB Division of CEIR (Broadcast Advertising, Nov. 20) is substantially misleading. It does not report the main point of the joint Nielsen/CEIR agreement which is that the suit was settled "with a licensing
Take TAE and see how to score more sales in PITTSBURGH, PA.
A TIME OF RENEWAL

Broadcast House, new four-story home of WTIC TV-AM-FM is the first unit to be completed and occupied in Constitution Plaza, an area of urban renewal which boldly foretells of Hartford's bright future. The challenging opportunity to serve the vigorous, enterprising mind and spirit of the people of Southern New England has been ours for 37 years.
"THE BROADCASTER"
An original bronze by Frances Wadsworth, was commissioned for the lobby of Broadcast House and symbolizes the act of broadcasting which sows the seeds of service.

"The Broadcaster Suite," an original musical work by Robert Maxwell, was commissioned for the dedication of Broadcast House. Its premiere performance under the baton of the composer took place on November 27, 1961, following the unveiling of the bronze by Governor John N. Dempsey of Connecticut.

A TIME OF REDEDICATION

With a deep awareness of our history-filled past, we now dedicate ourselves anew to the fulfillment of that greater service which Broadcast House and its facilities make possible.

President

WTIC • TV3 • AM • FM

Broadcast House       3 Constitution Plaza       Hartford, Connecticut
agreement under certain Nielsen patents..."

The story also is incorrect in reporting that there was no official court action other than the transfer of the case to a New York court. The final disposition of the case can be found in the records of the U. S. District Court for the Southern District of New York.

[BROADCASTING's original report failed to indicate that the settlement terminating the case was approved in court and signed by both sides. This was done in a consent decree, to which Mr. Ephron's letter refers. The consent decree specifies that the litigants had "entered into an agreement disposing of all matters which were raised or could have been raised in this litigation." As part of the settlement, ARB took out a license from Nielsen under Nielsen patents on metering devices being used in ARB's Arbitron audience-measurement system. (BROADCASTING Advertising, Nov. 27).]

Local vs. national

EDITOR: Every week someone else tries to tear down our national rate structure. Now, the eminent J. Walter Thompson agency is browbeating station owners for local rates for Ford Dealer Association funds on the ground that these funds are actually contributed by the local dealer, not the factory.

Baloney! The factory sells a car to a dealer at invoice, a part of which price is specified as FDA fund contribution. ... This cute bookkeeping wrinkle was instituted several years ago after a Federal Trade Commission investigation.

Every time a tobacco retailer buys a carton of cigarettes, he "contributes" a part of the manufacturer's advertising cost. The bookkeeping wrinkle is the only difference. ... Next, we'll be asked to accept cigarettes at local rates! — A multi-station owner (name withheld by request).

Nothing new

EDITOR: We note with interest the article, "College broadcasters set RTES-backed meet," but with dismay the statement, "first of its kind" [THE MEDIA, Nov. 20].

The 20th annual national convention of the Intercollegiate Broadcasting System, held April 22, 1960, at Carnegie Tech, Pittsburgh, was attended by over 200 students. ... The 19th annual convention, a similar success, was held at Columbia University, New York, with WKCR-AM-FM as host. Plans for the 1962 convention, to be held in April, are about to be announced. ... — Richard H. Crompton, president-treasurer, Intercollegiate Broadcasting System, Malvern, Pa.

Educational aid

EDITOR: Dr. Bernarr Cooper, head of the radio-tv department at Florida State University here has announced that next semester his classes are going to use BROADCASTING as part of their class work. Dr. Cooper reports that Broadcasting is the bible of the broadcasting industry.—Arthur Deters, general manager, WTAI Tallahassee, Fla.

Parked outside

EDITOR: It is true that all Richmond stations did an excellent job in covering the recent Imperial Airlines disaster in Richmond. However, I cannot sit idly by while WRNL claims to have been "first on the scene" [THE MEDIA, Nov. 20].

WLEE's vice president and general manager, Harvey Hudson, landed at Richmond's Byrd Field on a flight from Baltimore approximately three minutes after the crash. In the airport parking lot was his radio-equipped car. He ... and WLEE had his first report on the air almost seconds after the disaster. ... WLEE fed direct reports to 35 stations ... MBS ... and several tv stations.—David E. Lyman, program director, WLEE Richmond.

New licensees?

EDITOR: Why don't you publish a supplemental list every so often of all the new radio and tv stations that have been granted licenses? ... —James A. Sullivan, WCGO Chicago Heights, Ill.

[The names of new licensees appear in each issue of the magazine in For The Record. We have considered issuing supplemental lists from time to time, but interest has not seemed to justify it.]

Yearbook omission

EDITOR: Add our name to the vast list of those who are very pleased with your new Yearbook; however, much to our dismay you have neglected to list WSMD (FM) as a now-operating station. WSMD, a class B fm outlet serving all of southern Maryland and the Nation's Capital 18 hours a day, has been in operation since June 23. ... — John R. Dorsey, vice president, WSMD (FM) Waldorf, Md.

The cost of color

EDITOR: When you prepared your excellent article, "Is advertiser color's messiah?" [SPECIAL REPORT, Oct. 30] the vagueness of many agencies ... on the cost of color commercials must have been obvious.

Our firm, during its two years of active work in creating and filming television commercials, has never produced a black and white commercial. ... May we suggest the establishment of specific standards for the production and pricing of color commercials? ... — C. E. Feltner Jr., general manager, Advertisers Diversified Services of America, Lockport, Tenn.
See for yourself why Kraft is on Color TV for the fifth straight year!

Color TV sells 75% more Kraft prospects!

Here's an impressive (but hardly surprising) fact. A Kraft TV commercial in Color sold 75% more prospects than the same commercial in black and white.* That's how much more excitement, appeal and believability Color adds. What the sales magic of Color does for Kraft, it could do for your product, too.

Get the full Color picture today from: W. E. Boss, Director, Color Television Coordination, RADIO CORPORATION OF AMERICA, 30 Rockefeller Center, New York 20, N. Y., Tel: CO 5-5900.

Pick any 1/4 hr. between 8:30 and 11 PM, as averaged Monday thru Friday*, and ABC-TV is your #1 network.

The latest Nielsen, to which we owe this nice bit of clockwatching, might well be subtitled “TV Time-Buying Made Easy.”

For this Nielsen reports us out front with the largest audience, as checked every average quarter hour, over five most important nights of the week.

The reason, of course, is programming—both new and old.

Specifically, out of the top 10 shows registering a 40% audience share or better, 5 are ABC shows. And in this select 40% bracket, just 2 new shows made it. Ben Casey and Target: The Corruptors. ABC shows, that is.

Chances are very good you, too, can have a good time on ABC.

ABC Television

$30 MILLION SPOT RADIO BOOST?

RAB plan contemplates perking up national campaign sales

- Top 100 advertisers would be first target of drive
- Stations would pay RAB 10% of new billings they receive

A major new sales drive enlisting the cooperation of radio stations in a nation-wide movement to boost national radio advertising volume by $30 million a year will be launched within the next two weeks.

The drive is part of an overall campaign planned by the Radio Advertising Bureau to perk up sluggish national radio sales. RAB hopes to revitalize the medium through a new approach to providing radio's sales effectiveness to big-league advertisers currently cool to radio or inclined to use it as a secondary tool.

The plans, developed by RAB over the past two years, were approved by the RAB Board at the bureau's annual membership meeting last Wednesday in New Orleans. In effect they reshape RAB's national sales policy and cast the bureau in the role of marketing consultant with some activities akin to those of both station representatives and advertising agencies—but without violating the customary relationships with traditional agencies and traditional reps.

Here is the basic strategy:
- RAB will solicit radio commitments from major-top 100—advertisers not now using radio heavily, offering a series of depth studies on sales results where necessary to pinpoint the brand-share changes that occur while the campaign is in progress. The presentations will be tailor-made to fit each advertiser's specific needs, based on an RAB analysis of the company's marketing problems.
- The specific proposals will call for big-budget use of radio as a major rather than supplementary part of the advertising program and in many cases will elevate radio to a level it has not often enjoyed in recent years: That of a major "corporate buy" in which all of a multi-brand company's products can share. For advertisers reluctant to make such heavy commitments without a trial run, RAB will then draw up a test-market campaign plan.
- Upon client approval, the campaign laid out by RAB will be placed through regular agency and station-representative channels, with the bureau continuing in a supervisory role that extends to selection of markets, stations and time periods and the writing of commercials. Markets and stations will be selected by RAB on research tailored for the advertiser involved.
- While the campaign is in progress, RAB will conduct periodic research to show how well radio is paying off in terms of traceable sale and to show the advertiser how to use radio most effectively to solve his particular problems.
- To help pay for the special re-

---

Here's what RAB's 'proof-of-pudding' test campaign cost

The advertiser in the accounting reproduced below is unidentified because of an RAB commitment.

Here's what it cost RAB in money and man-hours to bring in and research one 10-station radio test campaign under the bureau's new "proof of the pudding" sales concept (see story this page).

Preliminary studies, creating the presentation and other pre-campaign expenses came to $1,013, as indicated, while brand-share studies and other work done to point up the campaign's sales effectiveness amounted to $27,725. Not counted in the grand total of $28,738 are the 82 man-hours of RAB executives and staff time devoted to the project, broken down as shown.

For this outlay, however, RAB hopes to swing the test campaign into a $700,000 annual budget for radio—and this objective is smaller than most of the targets in RAB's new drive. Research is the big item in this selling expense, rang-
search, which RAB sees as a clincher to convert test users to major users, radio stations will be asked to pay RAB 10% of whatever billing RAB places with them.

Except for the 10% "fee," the system has been tested by RAB over the past year with results described as "exceptionally successful." RAB officials say that one out of every three major advertisers they've solicited on this basis has approved a test campaign.

RAB President Kevin Sweeney told the RAB Board that the plan is aimed at boosting radio's national sales by "15% annually—or $30 million—with in 18 months." Radio's national spot volume currently runs about $200 million a year.

Up to now, RAB has been financing the special research out of its regular budget, but this has proved expensive and budget funds for this purpose are limited. Hence the call for each station to pay in 10% of any billing it gets via RAB.

Easy Goal = "With the financing available," Mr. Sweeney said, "a $30-million increase in radio billing becomes a practical and relatively short-term goal. Our limitation has been how much money we had available for the creation of the specific presentation, the research to measure growth in sales during the radio campaign and other costly elements in this type of breakthrough selling."

At least one major multiple-station owner, given details of the plan privately, has worked out an arrangement whereby his stations and their rep will participate jointly in paying the 10% to RAB.

Officials of the bureau probably will set out within two weeks on a round of visits to stations throughout the country to enlist their cooperation. In all, RAB expects to compile a list of about 30 "test markets" from which those to be used by specific advertisers will be selected according to each advertiser's marketing situation.

No market is apt to be included in the test-market list unless a substantial number of its stations are members of RAB. But in those markets that are designated, non-members as well as members will be eligible to get business placed under the test plan, the objective being to pick a station lineup that will deliver the best possible results for all advertisers—and therefore for radio generally.

All-Station Drive = In their swing around the country to line up support, RAB authorities plan to confer with both non-members and members. Obviously they hope that a by-product of the plan will be to increase the RAB membership roll.

The expense of the special research and related activities involved in this technique—unofficially called the Test Market Plan—may run as high as $25,000 even $50,000 per campaign. In other cases it may be lower.

One actual example, totaling $28,738, is shown in the table on page 35. The advertiser is not identified because one part of RAB's commitment to test campaigners is that, for protection against their competitors, details will be withheld during the campaign and for six months after it ends. During this period, also, the advertiser has exclusive use of the sales-results studies. Six months after the campaign RAB is free to use the material.

First Step = RAB's campaign blueprint anticipates that $5-7 million in test money alone will be drawn into radio during the first 18 months of the campaign. Other sales, including major commitments on the strength of successful tests, should bring the 18-month total to around $30 million. After that the rate is hoped to be $30 million a year.

RAB cites spot's problems

Broadcasting's report on the current situation in national spot radio and its problems (Broadcasting, Oct. 30) was an accurate and faithful account of facts that should be faced, the Radio Advertising Bureau reports in a message to its members. This evaluation is contained in a lengthy RAB study of the state of radio business and ways to improve it (see page 35).

The report notes that the Broadcasting account touched off a controversy that is still going on, but suggests that the controversy is hard to understand because the facts reported in the story are and have been well known to those closest to the spot radio situation. RAB agrees that there has been a slump in spot radio and that some agencies, for whatever reasons, are currently inclined to discount radio's importance. It also tells its membership that these facts should not be ignored but brought out into the open and discussed frankly, so that solutions may be found. RAB is confident that solutions will be found.
especially significant because of the timing. Although under development for two years, the new concept emerges in a period when there has been increasing talk of indifference to radio on the part of some buyers and even a tendency to discount radio's importance at a few agencies.

Survey Results • The adverse or indifferent attitudes were explored in a Broadcasting survey which showed that although they represent a definitely minority viewpoint, they do exist and clearly are retarding radio sales at the national level (Broadcasting, Oct. 30).

RAB is notifying its members that the Broadcasting study faithfully reported radio's situation and its problems (see page 36)—but it hopes to reverse the situation and surmount the problems, with their cooperation, through its new "proof-of-pudding" campaign and related efforts at all levels.

Miles David, RAB vice president and director of promotion, explained that the Test Market Plan concentrates on the top 100 advertisers for several reasons.

"Of course we want to see a selling job done with the middle-sized accounts," he said, "but our big investment in sales and in effectiveness research has to go where the big returns are. The top 100 advertisers spend $2.6 billion. Clearly the main route to substantial growth and property for radio is with the big companies."

Big Ones First • The continuing trend toward corporate mergers and big-company acquisitions of smaller companies also was seen as supporting the policy of concentrating on the big ones: Medium-sized companies, although growing fast through the use of radio, may suddenly be acquired by or merge with a company that concentrates in other media; or the small "hot" company, having built part of its success in radio, may attract a major agency that turns out to have little interest in radio.

In addition, the big advertisers are traditionally the pace-setters, whose media choices may profoundly affect those of smaller advertisers.

Although the test-market plan overshadowed other developments in last Wednesday's board meeting, the directors also approved measures designed to keep the RAB sales effort moving in other areas as well. In the process they approved an RAB 1962 budget totaling $1.2 million (counting both dues and income from supplementary services, including bulk sales of presentation material and tapes).

A step-up in local sales work is planned for the coming year. This will be accomplished partly by expansion of the so-called "Ohio Sales Caravan," a technique by which an RAB team made presentations in 10 small Ohio markets in one week earlier this fall.

Seminars to be Resumed • In larger markets RAB plans to resume its Department Store Radio Advertising Seminars, with President Sweeney or Vice President David making presentations on radio's retail advertising impact to top department store executives.

"We'll put three times as much RAB manpower into the field for direct selling in 1962," Mr. Sweeney asserted. He said the department-store seminars and the caravan techniques "have both proved highly successful" and that in addition "we can expect to create new sales services so that we can serve the needs of every kind of market."

The supplementary services are self-liquidating, in that the costs are paid by stations in the markets visited by the RAB executives.

Among new projects authorized for 1962 was a study aimed at finding or developing time-saving and money-saving techniques in radio selling and buying, in order to "make radio more profitable for agencies to buy." This has been a frequent complaint of radio salesmen against agencies: That one reason agencies don't buy more radio time is that they can make more money by buying television or other media.

The board also authorized RAB management to offer a bid for the purchase of a building on New York's east side which, if acquired, would become RAB's headquarters in 1963. Site of the building was not disclosed. RAB moved recently into new quarters at 655 Madison Ave., New York.

Radio news offers good commercial climate

10 STUDIES AUTHENTICATE ADVERTISING VEHICLE VALUE

Radio's stature as a news medium in the community and hence its value as an advertising vehicle to national spot advertisers are documented in a new booklet presentation now being released by Edward Petry & Co., New York, station representative firm.

The presentation, which runs more than 20 pages, pulls together information from 10 separate studies, including material from Radio Advertising Bureau, NAB, Alfred Politz Research Inc., R. H. Bruskin Assoc. and Fact Finders Assoc. Also in the report are extensive quotes of Dr. Ernest Dichter, president of the Institute of Motivational Research, on the subject of advertising in radio news.

Commercials Have Impact • Dr. Dichter, according to the Petry report (entitled Impact Radio News), maintains that commercials in radio news programs get as much attention as the news broadcast and are considered reliable and believable.

The "major qualities" of radio news programs from the listeners' point of view, as conveyed by Dr. Dichter: "First, a sense of timeliness. Radio news coverage provides this to a greater extent than other media could offer. Second, complete reliability. This results both from the strong impression that this news comes from authoritative

Broadcasting, December 4, 1961
sources and, because of the speed of transmission, tends to create the feeling that there is less opportunity to edit, distort or otherwise modify the news."

Ideal Vehicle • Specifically on advertising in such shows: "the special image of news programs as being sound, reputable and serious, makes them ideal vehicles for many advertisers—newspaper programs offer a public image of integrity and reliability—a most appropriate framework for presentation of the products and services of advertisers seeking to project a quality image to the public."

The Petry report claims that radio news programs offer more selling time than "straight" spot announcements: Five-minute newscasts, for example, have opening and closing billboards of 10 seconds each or more in length in addition to a full-minute spot. The report maintains that an advertiser using 15 five-minute newscasts weekly with 2 ten-second billboards as compared to 15 spot announcements will find he can total 45 separate "sales calls" using 20 commercial minutes in newscasts but only 15 separate sales calls using 15 commercial minutes in a regular spot campaign.

Research in the presentation creates this image of radio news: People listen to radio news first thing in the morning and last thing at night, and in "tremendous" numbers for day-to-day coverage when a sudden development triggers a "what happened" impulse, and they own sets primarily to hear news and more often seek out news than any other programming on radio. Advertisers are encouraged in the Petry presentation to look for "an enterprising station" that reports in depth and doesn't just "rip and read."

Management sessions set Jan. 15-19 in New York

The American Management Assn.'s "Effective Advertising Course" for management will be held next Jan. 15-19, at New York's Hotel Astor. The sessions will be held in Chicago next March 12-16 at the LaSalle Hotel. The course will return to its customary site at the AMA Academy at Saranac Lake, N. Y., April 30-May 4.

The sessions are designed for the executive concerned directly or indirectly with the advertising function. Course topics include the scope and purpose of advertising; integration of advertising into marketing; determination of the company's total advertising investment and the basic company strategy; organization, planning and execution of the campaign; agency-client relationships and evaluation of the effectiveness of the campaign.

Speakers for the sessions will be drawn from a course faculty which includes Edward L. Slater, director of advertising, Sylvania Electric Products; Robert Hull, director of product development, Coty; Mack Hanan, managing partner, Hanan & Son; Robert G. Hill, advertising manager, Columbia-Geneva Steel Division of U. S. Steel; Prof. Albert W. Frey, graduate school of business, U. of Pittsburgh; George B. Koch, merchandising manager, Industrial Products Division of B. F. Goodrich; and Ambrose Addis, director, marketing studies, Lever Bros.

When days grow shorter, television viewing grows longer

Television viewing shows a significant increase during the week after the annual autumn change from daylight to standard time.

A three-year study conducted by American Research Bureau traces the listening pattern during the weeks preceding and following the annual autumn switch of the clock. The study is based on daily Arbitron data gathered in New York.

ARB found the greatest change between 4:30 and 6 p.m. after the change to standard time. This time, when daylight gives way to darkness, "is obviously the time period most critically affected by the time change." ARB said, adding, "A reasonable explanation may be that with daylight activities restricted, people tend to turn on their sets as soon as darkness falls; thus, as it gets dark earlier, more sets will be turned on sooner."

Other explanations suggested by ARB include variations in programming (actually very few) or possible changes in hours of schooling or employment. However, ARB felt these two variations would not seem to be major factors producing a swing of the magnitude shown in the five-day average based on three different years.

The data can be used by rating services in planning their fall multiple-week survey periods and by advertisers evaluating fall measurement results, according to ARB. It continued, "The chart tracing percentage increase in sets-in-use following the fall time-change indicates a potential distortion in any data secured from a combined survey of the week or weeks before and after the time change, suggesting that any measurement period which combines pre-time change and post-time change weeks will not reflect an accurate average measurement for any one of the weeks involved.''

WHO Radio dominates Iowa audience for 24th consecutive year!

94 Other Stations Compete in America’s 14th Radio Market

CONFIRMED again . . . and for the 24th consecutive year! WHO Radio leads all Iowa radio stations in audience ratings by a wide margin. But this is nothing new to those of you familiar with 50,000-Watt WHO Radio.

The new 93-County Area Pulse Survey (March, 1961) strongly confirms WHO’s claim to superiority. The survey was conducted in 68% of all counties in which WHO has 10% or more NCS No. 2 penetration (93 of 137 counties). This area holds 75% of all radio families in WHO’s rich “Iowa Plus” coverage area (647,000 of 865,350 families).

The survey gives WHO Radio a greater share of homes using radio in all quarter hours surveyed Monday through Friday, than any of the 94 other competing stations.

WHO Radio and the 865,350 homes it serves in “Iowa Plus”—America’s 14th largest radio market—should be on every major radio-market list. Ask your PGW Colonel for complete results from the 24th consecutive survey of the Iowa radio audience.

Sources: Pulse (March, 1961), NCS No. 2.
TV vs. Newspapers

Television stands higher than daily newspapers as “first in the introduction of new products” and for “interesting and imaginative ads,” according to adults who were asked to compare media on these two counts in a study of the newspaper reading public.

Specifically, on the question of “new products,” the media ratings are: tv 71%; newspapers 60%; magazines 57%, and radio 45%. On “interesting and imaginative ads,” respondents gave high scores of 66% to tv, magazines 67%, newspapers 54% and radio 37%.

Newspapers scored higher than tv or radio on these points: “Gives a good description of the products I need”; “shows good taste in the advertising it carries”: “tells you all you need to know when buying a new product;” “sticks to the facts”; “tells me where I can buy things.”

These results are part of a comprehensive study presented Wednesday (Nov. 29) to advertisers and agencies in New York. The presentation, titled “The Newspaper and Its Reading Public,” was shown by the Bureau of Advertising of the American Newspaper Publishers Assn., under whose supervision the research project was carried out; the American Assn. of Newspaper Representatives was co-host. The survey was conducted in consultation with the Advertising Research Foundation by the Audits & Surveys Co., was reviewed by an advisory council of leading newspaper researchers, and was financed by six major Canadian newspaper manufacturers which make up the Newsprint Information Committee.

Objectives Listed = The project involved a probability sample of 4,826 interviews with individuals 15 and older, representing 2,449 households drawn from 622 sampling points in 100 sampling areas. The interviews took place between March 21 and April 8.

Charles T. Lipscomb Jr., bureau president, and Dr. Leo Bogart, vice president for marketing planning and research, delivered the presentation.

The study showed newspapers in front of tv in another respect. People were asked to describe how they would feel if they had to get along without tv or without newspapers. The response, “I would feel quite lost without it,” was selected by 49% in the case of newspapers, and by 28% in the case of tv.

In the area of personal “closeness” to media, the percentage breakdown on the question of which do you feel closest to?” was answered: “newspaper you read most often,” 40%; “tv channel you watch most often,” 33%, “radio station you listen to most often,” 14%, and “no preference,” 13%.

The study shows 42% of the readers report spending 40 minutes or more with each weekday paper they read, while 23% read 30-39 minutes and 34% up to 30 minutes. Although the results are not directly comparable because one deals with homes and the other with individuals, a Television Bureau of Advertising report recently noted that some 47 million homes average 5 hours 22 minutes of television viewing per home per day (Broadcasting, Oct. 16).

The newspaper presentation is also available in a special brochure released by the Bureau of Advertising. Additional showings of the presentation in more cities are planned for coming months, starting in Detroit, Dec. 12.

Sara Lee helps back Tv ‘Folksong Festival’

If anyone wonders whether sponsors today are willing to take the initiative in experimental programming, they should talk to Kitchens of Sara Lee, Chicago, and its advertising agency there, Hill, Rogers, Mason & Scott. Sara Lee has partially underwritten production of a one-hour tape special, “Folksong Festival,” which will air on WBKB (TV) Chicago Dec. 6 at 10:30 p.m. and later in other markets around the country.

Producer Jim McGinn will syndicate the show to other sponsors in markets not used by Sara Lee. “Festival” was taped on location before student groups at the U. of Chicago and Northwestern U. and stars folk singers such as the Weavers, Josh White and the Chad Mitchell Trio and others. The show also includes features in unusual out-of-door settings more often employed in film rather than tape technique. The sponsor found tape production cost far less than film.

Tide to Compton, Premium Duz to Grey

No reason was given for the changes, but the announcement noted that B&B is still P&G’s agency for Ivory Snow, Crest, Prell, Charmin Paper products, Fluffo and the test-market brands, Whirl and Stardust. Though B&B officials declined to comment on the development or estimate the billing remaining at the agency, it is believed that B&B is still P&G’s “No. 2” agency. Compton reinforces its position as the top P&G agency and will be responsible for about $27 million of the company’s billing when Tide is included.

Grey Adv. is the agency for P&G’s Big Top peanut butter, Ivory shampoo, Lift home permanent, Ivory Flakes, Downy fabric softener, Pin-It home permanent and Party Curl children’s permanent. Both Tide and Premium Duz are heavy television advertisers, with more than 90% of their respective budgets in television. Duz is particularly active in spot tv and Tide in network tv.

It's MARKET Street in SAN FRANCISCO...

It's MAIN STREET in Ohio's Third Market

It's a big country, and it's possible for Americans to be miles apart, both geographically and in their needs and preferences. That's why people in Ohio's Third Market should be approached in a manner that might not succeed, let's say, in San Francisco. That is the job WHIO-TV, AM, and FM has set for itself—to know what is wanted on Dayton's Main Street, and along the 23 other Main Streets in our primary listening and viewing area. Programming is aimed squarely at these known attitudes and needs. The consequence is what you would expect: a vast, fine following of people in all age groups, and at all income levels. And speaking of income levels—you have to look up to see ours. Over the years, highest in the state. If you haven't seen George P. Hollingbery lately, ask him to elaborate and particularize.

NCS reports on county radio-tv homes

CENSUS-BASED SET TOTALS COVER 18 STATES

County-by-county television and radio home counts for 18 states have been sent to subscribers of A. C. Nielsen Co.'s NCS '61. The ownership figures are based on receiver home counts from the 1960 U. S. Census, updated to April 1961 by Nielsen.

Coverage data for all radio and tv stations in all counties, reporting weekly and daily, day and night percentage levels, have also been sent to NCS subscribers.

State-by-state station circulation figures will be available shortly when Nielsen applies the station coverage per county counts to the county receiver set ownership.

Tv and radio set ownership for the 18 states follow:

Adapted commercial best in new area—Schwerin

What approach should a television advertiser take in commercials for a foreign-language audience? Should he (1) use dubbed soundtracks and superimposed labels on existing English commercials, (2) adapt his existing commercials by recasting with local performers in local settings or (3) create original commercials in the language of the new market?

Schwerin Research Corp. studied all three approaches as they are used to reach the French-speaking audience of Montreal, Que. The results: adapted commercials are about 50% better than those which dubbed their English message in French. Original commercials, created specifically for the French-speaking audience fared a poor third.

Schwerin credited the “adapted” commercials, superiority to two areas of French Canadian responsiveness: recasting with local tv personalities who enjoy enormous popularity and prestige, and encouraging viewer involvement with family themes and situations.

Failure of some of the “original” French commercials was attributed to “false economy and falsar rationalization” (assuming that since French Canadians are outnumbered three-to-one by English-speaking Canadians, it is possible to buy the brand decisions of the French Canadian at bargain rates with underproduced commercials).

Kennedy advisors get Strouse strafing

Norman H. Strouse, president of J. Walter Thompson Co., last week unleashed an attack on President Kennedy's economic advisors, whom he accused of being “intellectual opportunists” and of using the advertising industry as a “political whipping boy.”

Mr. Strouse told the San Francisco Advertising Club that the presidential advisors mounted their “gathering assault” against advertising on “two totally false premises: first, that advertising is an economic waste, and second, that advertising is socially immoral.” To the first premise, Mr. Strouse rebutted: “a responsible administration should actually encourage the further use of advertising to expand our markets here and abroad.” As for immorality, the JWT president said that money for schools, hospitals, national defense and foreign aid come from taxes on business and that advertising helps produce an expanded economy.

“This is no time for government experimentation with special philosophies of economics, new forms of social paternalism, or divisive political that chants the creed of labor versus management,” Mr. Strouse said, “this is a time for a sense of responsibility in every segment of American life.”

He urged a program of indoctrination for ad agency employes so they won’t waver in their confidence in advertising “when they read or hear the attacks of those counterfeit intellectuals who seem to find something revolting about raising the sights of the American people toward a higher standard of living.”

The $12 billion annual advertising...
Why KTVU bought Seven Arts' Volumes 1 and 2

Says Bill Pabst:

"When you look over Warner's 'Films of the 50's' you see good star value and all the other ingredients that top grade product should have. You are assured of acceptance by the viewing public and the paying advertisers.

'We were SRO going into the first group, and expect to be equally well set before the second group goes on.'

Changing name - Henderson & McNelis Inc., New York marketing and communications research firm has changed its name to John J. Henderson & Assoc. Inc. Address is 342 Madison Ave., New York 17.

RATE GIMMICKS

Newspapers are endangering rate structure, says Grey

In their fight for the advertising dollar, newspapers are introducing "rate gimmicks" on such a scale that they may "in time . . . endanger their entire rate structures," Grey Matter, a publication of Grey Adv., asserts in its November issue.

The analysis, dealing with the assortment of rate devices by which newspapers try to "bridge the national-retail rate differentials," predicts that ultimately the solution will be a single rate standard for all newspaper advertisers, national and retail. This, says Grey Matter, is "inevitable" because it is the simplest, most direct, most understandable, explainable, defensible and equitable solution to today's problems.

The Grey study contends that "gimmick rates" make newspapers harder to buy because they confuse the advertiser and therefore may encourage him to avoid rather than use newspapers. It says gimmicks do not necessarily "switch important media dollars" to newspapers but, rather, tend to switch business from the national rate to what is a "less profitable rate" for
A "well-bred" SUCCESS story for WDAY-TV, Fargo!

Every afternoon from 4:00 to 5:00, the old Hayseed puts on a local live talent show called "Party Line"—breezy informal chatter that really wows the wimmin.

During one minute of one day, earlier this year, the chat was about the next day's opening of a new Cox's Bakery store—their eighth. Results? To quote Dale Cox himself, "We sold 500 loaves of bread before we got the door open for business; 7,300 loaves on opening day; 9,400 loaves the second day. This is a first and the people are still coming in."

"Party Line" is doing a spectacular job for a number of big-time food and household products. Ask PGW for all the facts!

Why the criticism of commercials?

IT'S BECAUSE TOO MANY DON'T REALLY SELL, EXPERT SAYS

Swamping the television screen with poor commercials is the basis for many of today's attacks on tv and advertising in the opinion of Paul C. Harper Jr., president of Needham, Louis & Broby, Chicago, one of the biggest agencies in broadcast advertising.

Mr. Harper told the Advertising Club of Denver last Thursday that too many commercials represent poor selling, which he considers negative public relations with the consumer.

The problem is not that there are too many commercials. It is that there are too many commercials that are inexpertly done.

"I believe that the problem we face is one that we have created ourselves," Mr. Harper said. "It is very simply that the airwaves are being flooded with too many commercials that are clumsily written, over-produced, atrociously acted, loud and impersonal and unreal."

The NLAB president observed that "almost everyone responds to a salesman who knows his product, knows his customer's need for it and who seems to know how important his proposition really is to his prospect. Almost no one responds to a salesman who, through tone of voice, words and gestures, exaggerates the importance of his proposition and-underestimates his customer's knowledge of her own needs.

"Yet this is what for too many commercials on the air today do, and I believe that whether they recognize it or not this is what provokes many of our severest critics."

If the trend continues, Mr. Harper said, the public at large is going to become "less and less responsive to all commercials and our critics are going to become more numerous and more bitter."

Three Rules • Mr. Harper said there is good "person-to-person" selling being done on television right now, "but it isn't being done enough." He gave three basic rules for good commercial writing and discussed typical commercials that now meet these criteria. The three rules:

• Be simple and direct. Any commercial should offer a single clear and meaningful product proposition.

• Speak the prospect's language. Speech and staging should be entirely in keeping with the prospect's ways of speech and ways of life. The commercial should not be remote, stilled or phony.

• A commercial's technique should underline the message, not undermine it. Its camera work, music and animation should accent the story rather than obscure it.

Mr. Harper said there are 10 product areas in tv today which represent the "toughest sales situations" and where there is "more money, more pressure and more commercial time involved than any others." He named personal products, soap, insurance, small loans, toothpaste, cigarettes, food (coffee and margarine), appliances, automobiles and beer.

"It is these pressures of competition," Mr. Harper said, "that often produce the worst violations of the rules of person-to-person selling. They produce the tendency to shout, to overproduce, to de-personalize the message. Nevertheless there are successful advertisers on the air today in all 10 of these highly competitive fields who use person-to-person selling."

Twelve That Sell • Mr. Harper cited the following current commercials as those which do a good job of selling in their respective categories (of the dozen he cited, his agency was responsible for four of the commercials: Household Finance, Miracle Margarine, State Farm Insurance and Renault):

BUFFERIN: "The typical analgesic commercial is usually a scenic trip down the alimentary canal, its little white tablets finally dissolving in stomach acid, the foreheads twisted in pain, suddenly relieved. But the Bufferin commercial is an unmistakable message, an air of calm, commanding authority, a problem clearly resolved."

BAN DEODORANT: "The typical deodorant commercial features cloying euphemisms, wildly unreal social situations, harsh warnings of doom. But in the Ban commercial the problem is clear and so is its solution. The situations are real and the words are few, but telling."

HOUSEHOLD FINANCE CORP.: "The field of small loans is an industry that is fighting to get away from the age-old association with usury. The leader in this fight has been HFC, which has convinced hundreds of thousands of borrowers that their offices are honest, friendly places to do business. This hasn't been done by preaching. It's been done by person-to-person selling, which takes the side of borrower—and actually counsels him against borrowing except when he absolutely has to."

SWAN SOAP: "Soap is another field where commercial writing has become so frozen in its concepts that you can almost predict the moment at which mother will draw her towels from the water and go into a froth over their whiteness—or the moment when she draws her hands from the dishpan and submits them to nibbling by a simpering husband who has clearly lost his battle to the matriarchy. So much soap advertising is so strap-jacketed, unreal and lifeless that it is a pleasure to look at a commercial like the one for Swan liquid detergent. All it does is to take the woman's hand in a real life problem and lead her conversationally to a solution."

FRIGIDAIRE: "When it comes to appliances, we are dealing with a different kind of creative problem because appliances are big and large sold on their features, and features need demonstration by a stand-up pitchman or woman. But Frigidaire is an advertiser who chose to introduce a refreshing bit of humanity into his pitch—by admitting to the viewer that a refrigerator can get just so convenient and after that is really any man's choice."

the newspapers and thus—from the newspaper's standpoint—lead to a "losing return per line, without additional lineage to make up for the loss in income per line."

"The only defensible reasons for differences [in rates for the same lineage in the same paper] lie in volume and/or continuity," Grey Matter contends. The analysis does not mention the national-local rate differentials in radio and television, where Station Representatives Assn. and a number of broadcasters have long contended that the so-called "double standard" is hurting spot broadcasting volume and that stations using it should convert to a single rate covering both classes.

Grey Matter's analysis deals not only with the double standard in newspapers but with the varying ways in which the double standard is accomplished. It explains nine different ways, ranging from "hookers" (an old but increasingly popular plan in which the national advertiser gets a lower overall rate, or larger space, if he surrounds his ad with boxes carrying individual dealer listings) to "The Hodgepodge" (a cluttered-ad approach).
MAXWELL HOUSE COFFEE and MIRACLE MARGARINE: "The differences between most competing brands of food products are small indeed, and the housewife knows it. Therefore, the advertiser who portrays the table, argues or overstates his case will not be listened to. Food products present great opportunities for disarming understatement and atmospheric staging. Here are two commercials from two of the most competitive parts of the food field—coffee and margarine. Each one says what it has to say briefly and directly—and lets musical and visual devices create the warmth and excitement that says: Buy."

IPANA: "There are many ready-made formulas in toothpaste. There is the clean-cut announcer with a graph on dental caries or the phony dentist in white waving his nutpick at you and reminding you of the awful things that are going on between your teeth. I prefer the approach IPANA has taken recently, which, like the rest of the commercials I am discussing, gets away from puffing up the proposition beyond its real importance. A new toothpaste these days is not an earth-shaking event, particularly when there are several other brands on the market with the same ingredients. This commercial speaks at the right level of excitement; it is therefore all the more convincing."

MARLBORO: "The advertising of cigarettes is a world apart. I don't know of anyone who claims he has discovered the ultimate cigarette adver- tisement—except to spend more money. I can't pretend to throw much light on this field since I don't smoke and we don't have a cigarette account. But I am struck by the fact that one of the most successful brands in recent years has used advertising that is essentially person-to-person selling. Marlboro has used real situations and plain language. It has avoided trying to say, as so many cigarettes do, that a pull on one of their cigarettes can make the difference between happiness and misery."

STATE FARM INSURANCE: "Automobile insurance is a subject of very low viewer interest. People will not listen to long tirades on the subject. All they want is low cost—and the assurance of good service. That's all State Farm tries to sell them in its current commercial."

RENAULT: "Of all the product categories, it is the automobile manufacturers who seem to have the hardest time presenting their product in its natural, everyday environment. Typically the automobile is shown on a glittering patent leather turntable, or it is being driven backwards up the east face of Long's Peak. This is in spite of the fact the automobile is second only to home itself as a symbol and a meeting place of the American family. The automobile means so many things, tangible and intangible, to the average American that it would seem to offer the perfect opportunity for person-to-person selling. Two commercial attempts by Renault do just that."

COUNTRY CLUB ALE: "Finally we come to beer, which I believe of all advertised commodities responds most readily to the truly creative touch. I have been talking throughout these examples in favor of realism, showing things as they are, talking the way people talk. Although this commercial does neither, I think in its way it is another good example of person-to-person selling. In a field of big budgets and glittering production values, this short, simple commercial makes a place for itself by being honest and, at the same time, outrageous. This is a good commercial to stop on, because if nothing else it proves that there is no rulebook in advertising. If there were, this wouldn't be nearly as interesting a business as it is."

Mr. Harper felt his list of current examples of good commercials clearly displayed an absence of "technical fireworks" that got in the way of the message; shock for shock's sake; laughs for laughter's sake; beauty for beauty's sake, and "bombast or grating unreality." He felt they did display a simple message, clearly expressed; recognition, expressed in tone of voice and technique "as to where the product really fitted into the prospect's life and scale of values;" originality, as distinguished from eccentricity, and "warmth, a personal note that made the message easy to accept." And that, of course, is the whole purpose.
GOVERNMENT

Quit taking that beating lying down

THAT’S THE UNEXPECTED ADVICE FRED FORD GIVES BROADCASTERS

Broadcasting should turn its great powers on its many tormentors, “not vindictively, but in vindication,” FCC Commissioner Frederick W. Ford told the Southern California Broadcasters Assn. last week in a strong defense of free enterprise and radio and tv.

For many years, Commissioner Ford said, the radio-tv industry has been the “whipping boy” for other forms of mass media. “These other media assign dozens of writers, some of whom are ill-equipped for the assignment, to ferret out the ills of broadcasting,” he said. “I suppose that no media of mass communication . . . has been so consistently attacked by other mass media [as has] broadcasting under the guise of improving their competitor.”

No other form of communication has attained the reputation with the public for accuracy and integrity—even with all its faults—that broadcasting has attained, Commissioner Ford said. “I am at a loss to understand, however, why the power of broadcasting has not been judiciously turned on its tormentors . . . . It seems that writers are at liberty to call broadcasting and broadcasters any names they choose, but if one little performer strikes back there is a yell of ‘foul’. I see no reason why the power of broadcasting should not be used properly to defend itself . . . .”

Speaking to a SCBA seminar on community leadership at the U. of Southern California Friday (Dec. 1), Commissioner Ford urged broadcasters to possess and cultivate a knowledge of their communities. Broadcasters must have enthusiasm, zeal and loyalty to their localities, he said, along with initiative, imagination, thoroughness and force in advocating improvement. They must have moderation and tolerance, ability, industry and courage. Such broadcasters earn the respect of their community and the FCC through the excellence of their judgment, firmness, kindness and most of all fairness, the former commission chairman said.

“These are qualities I urge you to develop in your program operations. These are the qualities which will make your station a symbol of leadership in your community,” he said.

Community Leadership • Commissioner Ford said that there is no other mass media which can compete with the broadcaster in community leadership “if you aggressively seek that leadership. This is true because no other media can simultaneously concentrate

Commissioner Ford

the attention of so high a percentage of the population of your community on any given issue.”

He urged broadcasters to editorialize, including the expressing of an opinion on political matters. In citing how a

station should meet the needs of its community, Commissioner Ford quoted at length from the FCC’s 1960 program policy statement (Broadcasting, July 31, 1960).

“The public should care what opinions your stations hold on public issues . . . and if they don’t care you should seek to make them care,” he said. “This country can no longer afford to have a sterile broadcasting industry from the point of view of community thought, action and controversy. You have been given a valuable government resource to serve all of the interests of your community and this includes political, social and economic interests as well as entertainment.”

Answering the critics of broadcasting who recommend sweeping government intervention, Commissioner Ford made these points:

• Broadcasting should not be additionally taxed by a requirement that politicians be given free time with stations paying electricity, line costs and other incidental expenses. The “enterprising spirit” of the industry in granting free time should not be destroyed by “compulsion.” “I do not consider, therefore, this suggestion as being one that should be considered further.”

• A citizens’ advisory board or a programming expert to advise the commission could not make any worthwhile contribution not now available to the FCC. It would merely confuse an already highly complex regulatory situation.

• It would not be a good idea to establish a “public network” supported by the government “so that people can see and hear what is not popular but what is good. Good from whose point of view—the government’s or the proponents of the idea?”

• There is a common disability to those suggestions which would have the FCC allocate certain portions of the day for cultural and educational programs, public issues and local live shows—“namely, a presumption that pre-determination in Washington . . . will produce better programming and protect the public taste.” Advocates of such laws assume that all communities needs and wants are the same.

• There is no reason to attempt to impose the magazine concept of advertising on broadcasting. If the business concept of those engaged in broadcasting dictates that the magazine concept would be the best method of presenting advertising messages and serving the public interest, then their judgment should prevail and not that of the government.

• “In reviewing these suggestions which have been seriously made I have concluded that they are worthless and could work great harm to our system of broadcasting and its opportunity to mature fully in community leadership and as a thought-provoking media,” Commissioner Ford said. “In fact, some of these suggestions pose a real threat, if taken as seriously as they were intended, to the freedom of this media and the public it serves.”

WJRT asks dismissal

WJRT (TV) Flint, Mich., last week asked the FCC to dismiss or deny an application by WKNX-TV Saginaw, Mich., a uhf station, for WJRT’s ch. 12. WJRT said the two cities are located so near to each other that Lake Huron would be violating FCC overlap and duopoly rules. WKNX-TV also has applied for ch. 11 Alpena, Mich., and, according to WJRT, said it would not press its bid for ch. 12 Flint if it gets ch. 11. This constitutes a “contingent application” which is against commission rules, WJRT said.
The Impresario and all he stands for still exists, although his more glamorous trappings—flowing cape, ebony stick, and silk top hat—are no longer much in evidence. At the CBS Owned Radio Stations his great showmanship goes on: finding and encouraging new talent...developing and putting on the exciting kind of shows people tune in to hear.

Take WBBM Radio in Chicago, for example. Every week more than fifty singing stars, musicians and entertainers present 35 live music shows. That means hours of rehearsals every day with a large professional staff of script writers and directors. Enough work and worry to stagger the imagination of the most ambitious impresario. Why bother? Because people know the difference between live and canned, and they want the excitement and fun of live entertainment, imaginatively created and presented. They have shown their preference by consistently tuning in to WBBM for live showmanship radio.

Such programming is typical of the idea radio you find only on the CBS Owned Radio Stations. It’s entertainment for adults—music, clever talk, interesting information. No wonder that the CBS Owned Radio Stations reach more people than any other group of stations...and more people who are tuned in to listen.

Witnesses balk before House Red hunters

QUIZ BASED ON BILL TO RESTRICT RADIO-TV LICENSES

A subcommittee of the House Un-American Activities Committee last week resumed its hearings on alleged infiltration of broadcast station technical positions by Communists. But as in its hearings in October (Broadcasting, Oct. 30), it ran into a string of witnesses who invoked the Fifth Amendment against self-incrimination in response to questions about alleged Communist Party activities.

The subcommittee, which considers employment of communists as radio or television engineers a "direct threat" to national security, is considering legislation (HR 6) to prohibit the issuance of FCC radio operator's licenses to persons who refuse to answer questions about Communist activities. Under consideration is a proposal to broaden the bill to make it apply to radio station licenses.

The subcommittee sought to establish that all but one of the five witnesses it questioned last week are now or once were radio or television engineers and said that all had been identified by informers as present or former Communist Party members. Many of the questions dealt also with membership in the American Communications Assn. An alleged small union agent for technical employees at some radio and television stations and communications companies. The ACA was expelled from the CIO in 1935 after charges it was Communist-dominated.

Only one of the witnesses conceded he is presently employed as an engineer. He is Jack Bookman, of Orangeburg, N. Y., who said he now works for WPIX (TV) New York and has been employed previously by WHOM New York. In response to questions, he said he is not now a Communist and has not been for nine years. But "prior to that, I refuse to answer," he said. He also said he has been a member of the International Brotherhood of Electrical Workers for 13 years, but would not say whether he had ever belonged to the ACA.

Served at ABC * Another witness, Leonard Lazar, was identified by the subcommittee counsel as an employee of ABC. But although he admitted he had been subpoenaed by the committee at 7 W. 66th St., New York, the network's headquarters, Mr. Lazar would not concede he is employed by the company.

Mr. Lazar's refusal to answer questions on the ground of possible self-incrimination finally caused subcommittee member Rep. Gordon Scherer (R-Ohio) to lose his temper. When Mr. Lazar refused to say what elementary school he had attended, Rep. Scherer said, "That's a prostitution of the Bill of Rights. No wonder people are advocating the abolition of the Fifth Amendment."

But the witness again pleaded the Fifth, contending that answering the question "might lead to unjust criminal prosecution." He said he is not now a Communist, but refused to discuss his politics before that. He also declined comment on subcommittee findings that he was issued FCC radio operator's licenses in 1949 and 1952.

No Longer in Communications * I. H. Sobell of New York said he has worked for WLDB New York and ABC but is no longer in the communications field. He said he had once been licensed by the FCC but does not have a license now. He refused to answer questions about Communist Party activities or ACA membership.

Eugene Seyet of Flushing, N. Y., conceded he was issued an FCC operator's license in 1951 but refused to talk about his employment or alleged

TULSA'S Finest PUBLIC SERVICE PROGRAMMING

From on-the-spot coverage of the Conference On Peaceful Uses Of Space, to 4½ hours a week of education and information programs (more than the other Tulsa stations combined), KVOO-TV offers the finest public service programs in Eastern Oklahoma. Further proof that Channel 2 is Tulsa's finest station!
"The Tri-City Bi-Station Buy" covering intimately Albany Troy Schenectady

For the first time a powerful two station combination gives you the quality audience at the lowest cost . . . WROW Albany, the Tri-Cities exclusive good music station owned and operated by Capital Cities Broadcasting Corp. and WSNY Schenectady announce the "Tri-City Bi-Station Buy" and the appointment of H-R Representatives Inc. effective immediately . . . one representative, one buy, but two stations for all of New York's rich capital district.
membership in the Communist Party or the ACA. He said he did not seek renewal of his license when it expired in 1956. He invoked the Fifth Amendment when asked if this was because the FCC had begun issuing questionnaires about Communist party activities to other applicants.

Charles L. Silverman, who said he has been editor of the ACA News since 1937, discussed his editorial and public relations services for the union, but declined to answer any questions relating to Communist Party activities.

Kerr offers proposal for satellite firm

Sen. Robert S. Kerr (D-Okla.), chairman of the Senate Aeronautical & Space Science Committee, plans to introduce legislation to provide for private ownership of the U.S. portion of the proposed world-wide communications system.

He said last week the bill would limit ownership of the U.S. share to communications carriers approved by the FCC. The bill would create a Satellite Communications Corp. to serve as a common carriers' carrier for international telephone, telegraph and television. It would have an authorized capital stock of $500 million, divided into 5,000 shares, which the participating firms would buy. The corporation would purchase its rockets, launching facilities and other necessary services from the National Aeronautics and Space Administration.

The bill would require the corporation to make its facilities available on a non-discriminatory basis to all carriers approved by the commission, and to offer opportunities for foreign participation, "through ownership or otherwise."

Sen. Kerr's proposal resembles the plan for private ownership submitted by the Ad Hoc Carriers Committee appointed by the FCC. That plan, still under consideration, has been criticized by the Justice Dept. and other officials as not meeting the requirements for private ownership laid down by the President (Broadcasting, Nov. 13).

One difference between the two plans is that the Kerr bill does not provide for government representation on the corporation's board of directors. The non-profit corporation in the committee's plan would have three government directors on the board.

Sen. Kerr, who said his committee will hold hearings on the bill soon after Congress reconvenes Jan. 10, indicated he isn't wedded to his bill. He said it would serve as a starting place, and that the hearings would enable his committee to consult with industry leaders and government officials responsible for developing the program.

UNCLE SAM EYES SANTA

FTC, TV Code disclose campaigns to prevent slick talk to children in toy advertising

Santa had better come clean this season or he'll be in trouble with the Federal Trade Commission and the NAB Television Code.

Last week the FTC disclosed it is investigating misleading advertising of children's toys in all media.

And the NAB called on advertising agencies to supply toys along with TV commercials so the code authority can check commercial copy with the items being advertised.

The government got into Yuletide merchandising when Daniel J. Murphy, director of the FTC's Bureau of Deceptive Practices, said the agency has alerted its monitors to watch for deceptive or unfair photographic representations of toys in printed advertising and misleading demonstrations of toys on TV.

Robert D. Swezey, NAB code authority director, announced that the New York TV code director, Stockton Helfrich, has asked advertising agencies to forward the actual toys they plan to advertise on TV, noting the difficulty of appraising commercials without a chance to examine the toy at the same time.

Too Far? • Mr. Murphy said: "While most advertising of toys is quite proper, we have received enough complaints from the public to warrant taking a hard look at those toy sellers who would push the Christmas spirit too far. It's one thing to excite a child's imagination and desire for a toy but quite another thing to build him up for a letdown when he gets it."

FTC officials were loath to identify any of the companies under study or the type of advertising under investigation. It was learned, however, that the bulk of the complaints deal with television demonstrations of integrated displays of individual items with the price announcement not specifically identified as the cost of a single item or group of items. Children, it was pointed out, don't understand that a price announcement coupled with an assembly of correlated toys on display applies to individual pieces, not to all.

Among the types of displays under question by the FTC, and all being given heavy exposure on children's TV programs, are cooking, chemical, construction and train sets. Announcements that prices "range from" $3 to $5 or the like do not make clear to the child, it is pointed out, that this applies only to individual pieces and not to the entire display.

Since all of the suspected advertising is designed to appeal to children, there's a possibility the FTC may decide the sophistication of the audience must be taken into account by advertisers.

Child's Eye View • Charles A. Sweeny, FTC's head man on radio and TV advertising, observed last week that "if advertising is for children, the commercial continuity must be understood by the children—even though an adult may have no trouble understanding."

He acknowledged that this opens up the possibility that a new philosophy may be aborning at the FTC—namely, that advertising must be understood properly by the audience to which it is aimed.

In discussing the FTC interest in toy advertising, Mr. Murphy pointed out

Moulder may not run for ninth House term

Rep. Morgan Moulder (D-Mo.), chairman of the House Communications Subcommittee, is reported to have decided against seeking re-election in 1962. He is said to feel that the recent redistricting of Missouri has severely damaged his chances for winning an eighth term.

The state is losing one of its 11 House seats, and the new district lines drawn by the legislature separate him from many areas of his former political strength.

Rep. Moulder, a House member since 1949, was the first chairman of the old Oversight Subcommittee that conducted the FCC probe, yielding to chairman Oren Harris. He became the chairman of the Communications Subcommittee, which deals with broadcasting matters, last January. Next ranking Democrat on the subcommittee is Rep. Walter Rogers of Texas.

Rep. Moulder, now home in Camdenton, is expected to issue a formal announcement soon concerning his plans.
"Even at 60 mph we get studio-quality pictures—with RCA TV TAPE!"

—says Henry Alexander, President
VIDEO TAPE UNLIMITED
New York City

"In the studio or on the road, our picture quality is consistently tops—we're ready to shoot anything with RCA TV Tape Equipment. We've used our mobile Recorders under all conditions—yet we get studio-quality pictures every time. Clients rave about the lifelike quality of our tapes!"

The mammoth 40-foot mobile unit pictured here can make studio-quality tapes while traveling at 60 miles per hour. Designed and equipped by RCA for Video Tape Unlimited, it includes four cameras, two TV tape recorders, switching and special effects, and control equipment. Specially-designed platforms at front and rear of the bus carry two cameramen. Cameras also may be set up on the roof so that shooting is possible from any vantage point. Completely self-contained—this mobile unit has everything a well-equipped TV unit should have—including power generator.

Why is RCA equipment the big choice among producers and broadcasters who demand the very best? There are several reasons:

RCA TV Systems are matched—electrically and mechanically. RCA makes it practicable to get everything from a single, reliable source. RCA equipment uses easy-to-find tube types, standard parts. RCA equipment is designed, built, and operated in accordance with proved broadcast procedure. And RCA equipment is backed up by top engineering counsel and service everywhere.

See your RCA Representative or write to RCA, Broadcast and Television Equipment, Dept. C-22, Building 15-5, Camden, N. J.
that parents and other adults who buy the presents for children are indirect victims of misleading toy advertising. "Because most children have discovered that Santa Claus often uses parents as his purchasing agents," Mr. Murphy said, "the children believe the parents are responsible if Christmas presents don't measure up to the exciting demonstrations of them on television."

Brief for Buyers • Mr. Murphy listed four precautions to prospective buyers of toys:

1) In the case of toys consisting of many pieces, make sure that what you are buying is not just a disappointing portion of what has been displayed in advertising or demonstrated on television;

2) If the toy to be purchased is a mechanical one, either ask to have it demonstrated, or at least assure yourself that it could perform as advertised. Ingenious as the toy may be, it might be less so than the advertising;

3) In the purchase of a kit of tools or materials (construction, chemical, cooking, etc.) don't be misled by the "models" displayed or advertised, inasmuch as many of these displays may well have required the contents of more than one kit to assemble a single kit;

4) Don't hesitate to ask the seller for an explanation of any dubious claims for a toy. Although he may be rushed and annoyed, you still are entitled to know exactly what you're buying.

"In short," Mr. Murphy advised, "don't buy a toy blindly just because your son or daughter has seen a glamorous demonstration of it. The glamour might not be included in the price."

At NAB's New York TV code office Mr. Helfrich said the staff frequently has had difficulty in appraising toy commercials without a chance to examine the item being advertised. He also told advertising agencies the price quoted in a toy commercial is the "going price" in the area where the commercial is televised.

Unfair Glamor • Toy Manufacturers Assn. has endorsed advertising guidelines laid down by NAB's TV Code Review Board last June in a move to prevent unethical or misleading TV appeals to children (Broadcasting, June 3). These guidelines cautioned against dramatizations that unfairly glamorize a toy and urged advertisers to avoid oversimplification in presenting a toy's value and price.

Mr. Helfrich reported excellent cooperation from the toy industry. He noted that manufacturers have eliminated from all commercials passing through his office the use of "only" or "just" in quoting the price of toys in excess of a few dollars. Eleven leading toy makers using TV have worked closely with the code office, he said.

As of Nov. 1, Mr. Helfrich said, 97 separate commercials had been evaluated as an aid to stations subscribing to the TV Code. Of these, four were rejected outright as not meeting the basic objectives of the guidelines and 43 others were reviewed after communications or meetings with the manufacturers or their agencies. Prior to adoption of the June guidelines 59 commercials had already been produced.

Further efforts are planned by NAB in preparation for 1962. Among the problems are the pointing of pistols at people, loud reports accompanying pictures of cap pistols and the promotion copy of discount houses.

Just how secondary are secondary boycotts?

NLRB DECISIONS OFFER BROADCASTERS LITTLE HOPE

A federal ruling that gives unions more chances to put the secondary-boycott squeeze on sponsors, agencies and the public has confronted broadcasters and the NAB with a legal problem—how to obtain relief from the courts.

Four weeks after issuance of a decision by the National Labor Relations Board in the WOGA Chattanooga, Tenn., case, no way has been found to prevent NLRB from destroying permanently a form of boycott relief provided by Congress in the Landrum-Griffin amendment to the Taft-Hartley act.

In this case (Broadcasting, Nov. 6), NLRB used a circuitous line of reasoning to show that a broadcast station providing services for an auto dealer thereby becomes one of the producers of the auto, in the intermediate stage and consequently the union is protected in the circulation of "Do Not Patronize" leaflets.

NAB, which was active in NLRB processing of the case, can't file an appeal because it isn't a party in interest. Its role was amicus curiae, or friend of the court.

50 EAST 58TH STREET NEW YORK, N. Y. ELDORADO S-0405

NLRB, call letter used by Middle South Broadcasting Co. when it filed an appeal in 1960, may be eligible, but it's a tricky legal question because Middle South no longer operates the station.

Not a Party • WMOC, the call letters adopted by Dick Broadcasting Inc. when it bought the station after NLRB proceedings had begun, wasn't a party to the events that led to the original complaint against the union. There's doubt, too, as to its right to appeal.

The curious language of NLRB in its ruling that broadcasters are car makers had moved Commissioner Philip Ray Rodgers in his dissenting opinion to note that this production role of broadcasters "will come as something of a surprise not only to WOGA, but to General Motors, Ford, Chrysler and other manufacturers."

If no way can be found to appeal this precedent-making decision—and NLRB construes most of its precedents as sacred—there still is one other possibility.

Due within a few weeks from NLRB is a decision in the case of KXTV (TV) Sacramento, Calif., also a victim of secondary-boycott tactics. Like WOGA, KXTV's position was supported by an NLRB examiner after hearing.

KXTV went to NLRB for relief in November, 1960, when the American Federation of Television & Radio Artists and the National Assn. of Broadcast Employees & Technicians joined in distribution of handbills directed at the station's advertisers. The complaint was filed a year ago by Great Western Broadcasting Corp., a Corinthian station. The NLRB's general counsel obtained a U.S. District Court injunction last Feb. 23 to halt the union tactics. Last May 4 an NLRB examiner held
Much of the nation's capital is in Washington! When it comes to income, families served by WRC-TV earn more per household than those of any other area in the country. Washington is the only metropolitan area in the United States in which all counties (5) rank in the "top ten" for Effective Buying Income per-household. And two of those counties top the list!* All of which means that on WRC-TV you reach the most able-to-buy families in the country. If you want to reach and sell those families, bear in mind that ARB for Oct. '61 reports WRC-TV as first in share of audience and number of homes delivered all week long, from 6:00 P.M. to midnight. What better way to make your advertising most productive? Get your message to the Washington market on WRC-TV...leadership station in the nation's capital.

*Sales Management Survey of Buying Power May 10, 1961
both unions had violated the secondary-boycott ban in the labor act.

Should NLRB use the Chattanooga case as a precedent and upset the examiner's decision against the unions, then Corinthian would be in a position to file an appeal to a U. S. court of appeals, it's believed.

NLRB has exclusive jurisdiction in labor disputes. The general counsel decides if the board is to accept or reject a complaint.

**FCC refuses to move hearing**

Firm in its policy of holding license revocation and renewal hearings in the community a station is licensed to serve, the FCC last week reversed a hearing examiner's ruling permitting KWK St. Louis to present its defense evidence in Washington, D.C., and ordered that the hearing be continued in St. Louis. The station is in a license revocation proceeding on charges of conducting fraudulent contests and making misrepresentations to the commission.

The FCC declared moot the question of whether KWK might present defenses but said if KWK still wishes to take them in light of the hearing site change, it should notify the hearing examiner, who can set a new date.

**A WARNING FROM FCC-FTC**

**Broadcasters' responsibility for advertising copy stressed at Philadelphia meeting**

Warnings that the FCC-FTC alliance means business—and possibly some loss of business to certain broadcasters—were issued last week to members of the Television & Radio Advertising Club of Philadelphia by representatives of the agencies and an advertising-oriented attorney.

Richard M. Saul, chief of the FCC Complaints Branch, said he thought most broadcasters would be relieved to know that when they turned down advertising as possibly deceptive that a competitor would carry it only at the risk of losing his license. Moreover, he felt, it would give a broadcaster a good worm to turn down certain copy without offending the advertiser.

A question that the FCC will probably be asking with increasing frequency, according to Mr. Saul: What steps do you follow to satisfy yourself that certain advertising is proper and that the advertiser is reliable and has a good reputation?

If a broadcaster takes reasonable steps to check the veracity of questioned advertising, including the standing of the advertiser, by consulting Better Business Bureaus, the FTC or other sources, and if he investigates listener complaints, his license will not be in danger. But if he leaves all responsibility to the advertiser, ignores actions or litigation pending against an advertiser and merely refers complaints to the advertiser, watch out, Mr. Saul warned.

**GOP got biggest contributions from broadcasters—AFL-CIO**

Top broadcasting officials who made political contributions of $500 or more in 1960 apparently favored Republicans over Democrats, according to figures compiled by the political wing of the AFL-CIO.

The report, dealing with officials of 328 major U.S. firms, shows that executives of four licensees donated $20,500—most of that from CBS officials—to Republican candidates, and nothing to Democrats. But the report is admittedly incomplete.

The Committee on Political Education (COPE) prefaced its report by noting that it's an updating of a 1956 compilation. It says that persons not listed in that year are not included in the 1960 report. In addition, it says officials making contributions from states other than those in which their home office is located are probably not included.

The report shows that Republican candidates received $13,000 from CBS executives. CBS Board Chairman William S. Paley is said to have donated $7,500; President Frank Stanton and his wife, a total of $3,000; and board members Ralph F. Colin and Joseph A. W. Iglehart, $1,000 and $500 respectively.

COPE was unable to find contributions from officials of ABC or NBC. But it found that Victor Emmanuel, board chairman of AVCO, which owns Crosley Broadcasting Corp., contributed $1,500 to Republicans. Other Crosley officials listed, with their donations to GOP candidates, were Joseph B. Hall, $1,500; and Earl H. Blaik, $1,000.

Other licensees mentioned as contributing to the GOP:

- Meredith Publishing Co.—Fred Bohen, $2,500, and Edwin T. Meredith Jr., $1,500.
- Storer Broadcasting Co.—Charles V. McAdam, $500.
- The report's listing of officials of leading advertising agencies showed Republicans received $17,600 from these sources, and Democrats $3,000 (At Deadline, Nov. 20). The largest single gift was made by Fairfax M. Cone, chairman of Foote, Cone & Belding's executive committee, who donated $5,000 to the Republicans.
- Five executives of BBDO gave a total of $4,100 to the Republican party, according to the report. It listed Bruce Barton, board chairman, as giving $1,000; Bernard C. Duffy, vice chairman, $1,100; James R. Schule, vice president and secretary, $1,000; William J. O'Donnell, vice president and assistant to the president, $500; and Herminio Traviesas, vice president and manager of the TV-radio department, $500.
- The two top officials of J. Walter Thompson Co. gave the Republicans a total of $3,500. Board Chairman Stanley Resor, $2,500, and Vice Chairman Henry C. Flower, Jr., $1,000.

The remaining $5,000 counted as donated to the Republicans was credited to R. D. Wallace, vice president in charge of marketing planning, Benton & Bowles, $2,000; Theodore L. Bates, honorary chairman of the board, Ted Bates & Co., $1,500; and Sigurd S. Laronn, chairman and chief executive officer, Young & Rubicam, Inc., who contributed $1,500.

Democratic contributors, according to the report, were William Da- sheff, senior vice president, Lennen & Newell, $1,500; Draper Daniels, executive vice president, Leo Burnett Co., $1,000; and William W. Mulvey, senior executive vice president, $500.
In 1944 family life depended on precious ration stamps. Everything from sugar to gasoline was rationed. WBNS Radio kept Columbus and Central Ohio abreast of OPA.

At least one Central Ohio enterprise was carrying on business almost as usual. Even during war, flowers go right on growing and people keep on appreciating them. Viereck the Florist began using WBNS Radio in 1944, and now, 204 consecutive months later, we’re still helping the Viereck business bloom.

No one can evaluate the power of a home town radio station better than a home town businessman. Viereck the Florist will testify that when it comes to making sales grow, Radio Station WBNS has a green, green thumb.
The road to renewal: it isn’t routine

FCC TAKING CLOSER LOOKS, ISSUING MORE SHORT-TERM LICENSES

Mention the term “license renewal” to the average station owner or executive and the reaction will be somewhat different today than two years ago.

No longer is a regular three-year renewal considered pro forma by either the industry or the FCC. Witness to this fact are the 28 short-term renewals granted in the past year and the approximately 500 renewal applications held up by the commission for reasons ranging from payola to operation in violation of technical rules.

Enforcement is not a new word at the FCC but it is a word with a new meaning to both the agency and the industry. And, in recent months, the commission has gone to great lengths to tell its licensees what is expected in certain areas.

The “new meaning” dates back—in the minds of most broadcasters—to the FCC’s payola questionnaire in late 1959 and the formation of a Complaints & Compliance Division in the Broadcast Bureau. The commission soon followed up by asking for—and receiving—congressional authority to fine stations and grant licenses for less than three years.

In July 1960, the FCC issued its “report and statement of policy” detailing the agency’s concepts of a broadcaster’s obligations in the programming field. This statement was the forerunner of currently outstanding rulemaking revising extensively the required programming information in applications. Several FCC public statements designed to guide licensees have been made since, including the general letter on proposals vs. actual operation which accompanied a short-term renewal for KORD Pasco, Wash. (BROADCASTING, July 17).

Inspections, Letters Every am, fm and tv station in the U.S. is inspected by the FCC ahead of its license expiration. And, those stations which receive inquiries on their renewal applications have increased materially in recent months. The commission questions contain such phrases as: “It appears” your operation is not in the public interest because of too much entertainment, or too little news, talks, education, religious, or too many spots and commercial interruptions.

Licensees are getting more and more letters from the commission staff regarding complaints against a station even when a renewal application is not pending. Under present practices, the FCC queries an individual station immediately upon receiving a complaint against that station and no longer waits until an application is filed.

The on-the-spot renewal inspections are conducted by the Field Engineering & Monitoring Bureau and its 24 field offices. Before making such an inspection, the FCC men monitor and tape the station involved and compare actual programming against operating logs, although the inspections are primarily of an engineering nature.

Inspections begin in a specific state about 18 months before licenses expire for stations in that state and are usually completed several months ahead of expiration. For example, inspections were completed last summer in Illinois and Wisconsin where licenses expired last Friday (Dec. 1).

When technical and engineering violations are found, the station receives an immediate citation. Programming and other violations are forwarded to the Broadcast Bureau which has jurisdictions in those areas. FEMB also submits complete reports on inspections to the bureau for consideration when

network commercials and exercise judgment on whether they want them on local outlets. It is clearly the right of any broadcaster to refuse advertising any time, he stated.

Mr. Simon said that stations might run into license renewal trouble if they fail to bring to the attention of the FTC any questionable material or claims offered them as commercials which they refuse, even though these claims are not already the subject of FTC action and may never be broad- cast. (Mr. Saul, in the question-and-answer period, pointed out that although the FCC “hoped” licensees would do this, failure to do so could hardly be made the basis of the FCC’s refusing license renewal.)

Charles A. Sweeny, chief of the food and drug division of the FTC’s Bureau of Deceptive Practices—and the man responsible for keeping a watch on radio and tv advertising—said it isn’t the FTC that has been changing its mind; it’s the ingenuity of American advertising men who continually keep coming up with different approaches in selling products and services.

Mr. Sweeny made reference to a statement made by John W. Burgard, advertising director of Brown & Williamson Tobacco Co., that the greatest menace to advertising today is the “constantly evolving labyrinth of rules and regulations propounded by the Federal Trade Commission. Mr. Burgard made these remarks, and also alleged that the FTC rulings were “capricious,” in a talk to the Washington (D.C.) Advertising Club last month.

This is how Mr. Sweeny answered this attack:

“It seems to me we are fighting a purely defensive battle. The advertising profession accepts uniqueness as a watchword. New and different presentations for new and different products appear daily. Many of these are fine and we applaud the ingenuity and the creativity of him who develops a unique means of presenting his product to the public. But when, under the guise of creativity, the merits of the product are distorted, and the public misled, we honor the campaign without more critical attention . . . we are merely applying, to different situations, our one basic rule, that advertising must not be unfair or deceptive.”

No Time n Complaints that the FTC’s requirement that all details of guarantees be spelled out cannot be met in minute spots on radio or tv were answered by Mr. Sweeny succinctly: Don’t use the word “guarantee” unless you can spell out the details. He said: “. . . if there is not time to explain the guarantee and its limitations so that the consumer can know what he is talking about, the word “guarantee” just does not belong in the announce- ment.”

Mr. Sweeny dwelt at length on the methods used by the FTC in checking radio and tv continuity and how questionable advertising on the air is correlated with similar advertising in print media.

Hearing machinery set for three vhf contests

Examiners have been assigned and hearing dates scheduled by the FCC among multiple applicants for newly-assigned vhf channels in Grand Rapids, Mich., and in Rochester and Syracuse, both New York.

The hearing among 11 applicants for
a station's renewal application is being studied. Violations of a major nature are turned over to the Complaints & Compliance Div. for any further action that is warranted. Contrary to a popular belief, it is not Complaints & Compliance which make the renewal inspection. This office, headed by John Harrington, has been unable to keep up with unsolicited complaints and can call on only 10 professional staffers, including the chief.

A commission spokesman estimated last week that Complaints & Compliance needs double its present staff just to handle matters now in its shop. There are over two dozen "real serious" complaints needing immediate field investigations but there is nobody to assign to them, he said. This is not to mention dozens of others which are handled through correspondence but need closer scrutiny.

No Spot Checks = Mr. Harrington's office has not made any spot pre-renewal investigations since those in Florida a year ago. Originally, such spot investigations were to have been one of the primary purposes of the office but the staff shortage has not permitted completion of this mission, it was pointed out.

Station licenses expire every other month on a geographical basis, by states. For example, no licenses expire in January but coming up Feb. 1, 1962, are all radio, tv and fm stations in Iowa and Missouri. Following is a list of the remaining states with license renewal dates:

<table>

Those Now Pending = As of the first of October (last breakdown available), there were approximately 500 renewal applications which had been pending at the FCC for over three months—some as long as two years. The largest single number—162—are held up because of technical violations. Failure to provide information requested by the commission has kept 122 stations from being granted a renewal. The information mainly falls into such categories as failure to file an ownership report, incomplete financial information, failure to public local notice that the renewal application had been filed, discrepancies in balance sheet, incomplete program logs and unresolved complaints.

Programming questions have caused the FCC to delay 135 license renewal applications, as of Oct. 1, and another 92 stations were being held up because of payola charges. Twenty-two renewal bids were stalled because of character qualifications and over 70 were facing financial questions. The commission has sent hearing notices to 15 of the stalled renewal bids and 16 others faced antitrust questions. Nine applicants were involved in ex parte matters and seven contain questions of an unauthorized transfer of control.

Petitions to deny renewal had been filed against two of the pending applications and miscellaneous matters were delaying an additional three dozen. Eight fm stations have not been renewed because of simple operations in violation of commission rules. (Note: many of the above applications have been held up for two or more of the listed reasons which accounts for a total well in excess of 500.)

Examiner David Kraushaar will conduct a comparative hearing among 10 applicants for ch. 9 Syracuse, beginning Jan. 29 as previously announced (Broadcasting, Nov. 27). A pre-hearing conference will be held Dec. 19.

Aspirants for ch. 9 include Ivy (owner of WOLF Syracuse and other stations), Veterans Broadcasting Co. (WROC-AM-TV Rochester and 80.5% of KVTE [TV] El Dorado, Ark.), Syracuse Tv Inc. (80% owned by Founders Corp. which is licensee of WFBL Syracuse and other stations), W. R. G. Baker Radio & Tv Corp., Onandaga Broadcasting Co., WAGE Inc., Syracuse Civic Tv Assn., Six Nations Tv Corp, Salt City Broadcasting Corp. (50% owned by the Outlet Co. which owns WJAR-AM-TV Providence), and George P. Hollingbery, station representative (Broadcasting, Nov. 13).

Doubtful WDXI-TV asks FCC to pass on program

Broadcasters and program producers tread on eggshells when they approach the FCC these days. Last week WDXI-TV Jackson, Tenn., asked the commission for a "declaratory ruling" that the program Let's Go to the Races, produced by Walter Schwimmer Inc., Chicago, is not a lottery. Given such a ruling, station owner Aaron B. Robinson said he will run the program; the producer also seeks assurance because he plans to sell the program to several stations and points out it would be unprofitable in a single market.

WDXI-TV said it was advised by counsel that the program is not a lottery under a 1957 court decision on a similar matter. "However petitioner is mindful that the commission is now reviewing programming very carefully and may not consider itself bound by the doctrine of the [1957] case." The station also pointed out that it is mindful of jail penalties and fines for broadcasting a lottery.

Let's Go to the Races is a half-hour program featuring five horse races filmed at various tracks during the year. During the week preceding the show, viewers pick up cards from local merchants giving numbers for win, place and show in each race. The viewer whose card has numbers corresponding with those of the horses in the show wins a jackpot merchandise prize. The
producer outlined safeguards against advance information on the program leaking out or any violation of the laws set forth by Congress against "quiz rigging." He also emphasized that viewers do not have to purchase anything to get the cards and that it costs them nothing to participate. The program would not violate FCC rules against broadcasting of race information (Broadcasting, Nov. 27). Producer Schwimmer said, because the races in question would have been run months ago and could not motivate professional gamblers.

'Tic Tac Dough' winners get suspended sentences

Two former winners on the "Tic Tac Dough" program last week received suspended sentences after they pleaded guilty to perjury. Timothy Horan, of White Plains, N.Y., and Joseph Rosner, of New York City, were censured, however, by Special Session Justice Thomas I. Rohan in New York.

The defendants admitted in their pleas that they had lied when they told a grand jury that they had never received any help prior to their appearances on the quiz show. Mr. Horan won $30,400 on the nighttime version of the program and $4,800 on the daytime version. Mr. Rosner had won $1,700 on the day show.

Of the 19 quiz show contestants acted against by the grand jury, four have pleaded guilty and received suspended sentences. One has received youthful-offender treatment by the court. The remaining defendants are scheduled to go to trial Dec. 15.

USIA needs more money, Murrow tells tv audience

Edward R. Murrow, U.S. Information Agency director, is not waiting for congressional appropriations committee hearings next spring to plead for more money for his agency. He told an ABC network television audience Nov. 26 that the $115,500,000 granted his agency for the 1962 fiscal year is insufficient.

That amount, he said, is less than he requested and is about $10 million short of the $125 million the Russians spend yearly to jam the agency's Voice of America radio broadcasts. A single Polaris-missile submarine costs more than the appropriation granted his agency, he said.

Mr. Murrow, former CBS vice president and news commentator, appeared with Adlai E. Stevenson, U.S. Ambassador to the United Nations, on the latter's regular Adlai Stevenson Reports program.

LIMIT ON FOREIGN RECORDING SOUGHT

AFM claims heavy losses to Americans in tv

The president of the American Federation of Musicians was ready to ask Congress Friday (Dec. 1) for legislation to protect the television and movie jobs of American musicians from "mechanical wetbacks"—the term he used to describe foreign-made recordings.

In testimony prepared for delivery before the House Subcommittee on the Impact of Imports and Exports on American Employment, Herman Kenin said the foreign recordings were denying American musicians about half the jobs that might otherwise be theirs in television alone.

The subcommittee was set to take testimony from actors and musicians' unions and movie industry representatives on the "runaway" production of television and movie films by American producers, as well as on the use of foreign-made sound tracks in both media.

Television and movie star Charlton Heston was scheduled to testify Saturday morning in behalf of the Screen Actors Guild. He is a vice president of that union.

Mr. Kenin, in his prepared statement, asked that Congress either bar imports of the foreign music tracks, or raise the customs charge on them "to make these cut-rate foreign recordings competitive.

Criticizes Producers = He said he didn't deny "an occasional justification" for an overseas production of an American film or the import of "serious music works." But he deplored the "fast buck" domestic producers who would destroy a national asset (American music) to enrich themselves.

He said the duty on the foreign tapes is one cent a linear foot and that the approximate cost of recorded foreign music is $40 per minute as against $120 in this country.

Mr. Kenin cited an AFM survey of Hollywood production centers that showed 35 television series, totaling about 1,431 episodes, are now being produced "without a single note of American-made music on their sound tracks."

He said this is costing American musicians 6,465 man jobs and a wage loss of $742,500. He added that of 2,445 musicians available in Hollywood between Nov. 6 and 10 for recording, "only 290 or less than 12% were employed by the booming tv film industry."

He also urged enactment of a bill (HR 9198) introduced in the last session of Congress by Rep. Emanuel Celler (D-N.Y.) that would require the screen labelling of the origin of foreign music in American-made programs.

Deintermixture furor clarified in Madison

Copies of letters from FCC Chairman Newton N. Minow and Commissioner Robert E. Lee clarifying the status of the commission's uhf-vhf deintermixture proceeding were mailed last week to two newspapers in Madison, Wis. Rep. Vernon W. Thomson (R-Wis.) sent the copies with a request that the newspapers print them to clear up misunderstanding he feels exists in the Madison area about the deintermixture proposal, particularly as it affects that city's Ch. 3 (WISC-TV).

Rep. Thomson, an opponent of the deintermixture plan, asked for FCC clarification as a result of stories which appeared in the two Madison papers, Wisconsin State Journal and Capital Times, on Nov. 10. The accounts, based on a speech by Mr. Lee, indicated the deletion of the Madison uhf channel was "a virtually accomplished fact" (Broadcasting, Nov. 27). Actually, the FCC is several months away from a final determination; Feb. 5 is the deadline for comments on the proposal.

Mr. Minow said "no final or 'virtually' final" decision has been made. He added the deadline for filing comments on the proposal has not expired and that the "ultimate decision will be made on the basis of all information properly before the commission."

Mr. Lee said no inference that the case was virtually settled should have been drawn from his speech; he expressed "regrets" that his remarks apparently had been misinterpreted. He also promised to "give most careful consideration" to all comments filed in the case before casting my vote in a final determination."

In his letter accompanying the copies, Rep. Thomson asked the two Madison papers to print the entire exchange of correspondence between himself and the FCC. "Only in this way could you do your share in dispelling the misunderstanding which the news stories created," he said.

Both Madison newspapers have broadcasting interests in that city. The State Journal is a part of Lee Enterprises, which owns WMTV (TV), a uhf station. The Capital Times Co. owns two-thirds of WIBA-AM-FM.

State Journal interests hold the remaining one-third interest.
WMAR-TV, the Baltimore station that built "The Port that Built a City and State"!

Baltimoreans — and Marylanders — realize the importance of their Port, since Baltimore was the 2nd Port of the United States in foreign trade tonnage handled in 1960.

Folks here have faith in their Port and the future ... and they learn of the importance of shipping in their everyday lives through "The Port that Built a City and State" the only show of its type in the United States. Helen Delich Bentley, Maritime Editor, Baltimore Sunpapers, is the originator, producer and hostess of this award-winning weekly series.

Sponsoring the unique program is the following cross-section of leading business firms ... who believe in the Port of Baltimore's potential ...

- American Export Lines
- The Arundel Corporation
- Association of Maryland Pilots
- Baker-Whiteley Towing Company
- Baltimore Gas & Electric Company
- Baltimore and Ohio Railroad
- Bethlehem Steel Company's Shipbuilding Division
- Carling Brewing Company
- Consolidated Engineering Company
- Curtis Bay Towing Company
- First National Bank
- Robert C. Herd and Company
- R. G. Hobeimann and Company and Harbor Terminals
- C. J. Langenfelder and Son
- Lavish of Baltimore
- The Martin Company
- Maryland Port Authority
- Maryland Shipbuilding and Drydock Company
- McCormick and Company Spices
- Ramsay, Scarlett and Company
- Ruhter Terminals Corporation
- Steamship Trade Association of Baltimore
- United States Lines Company
- Western Maryland Railway Company

This is Viewmanship at its best ... Salesmanship for the great Port of Baltimore!

**Witnesses submit affidavits in Jacksonville ch. 12 case**

Testimony by some two dozen witnesses was placed in the record of an FCC re Hearing of the Jacksonville, Fla., ch. 12 case last week—but none of the witnesses was present to testify in person.

In a 1½-hour session, Chief Hearing Examiner James D. Cunningham accepted affidavits in lieu of personal appearances from various persons mentioned in earlier testimony (BROADCASTING, Oct. 23). The commission ordered a rehearing of the 1956 grant of ch. 12 to Florida-Georgia TV Co. (WFGA-TV) on charges that ex parte contacts with the FCC were made on behalf of all three applicants for the TV station. The other two parties were Jacksonville Broadcasting Co. and the City of Jacksonville (WJAX), which is no longer an applicant for ch. 12.

Many of the affidavits submitted last week centered around the activities of the Right Rev. Maurice S. Sheehy and James Stockton, president of Jacksonville Broadcasting. Monsignor Sheehy, a former Navy chaplain in Jacksonville, said that he helped Florida-Georgia get Naval clearance for a proposed 1,000-foot tower at the request of Lester Foley (BROADCASTING, Oct. 16). He also said that he attempted to interest Florida-Georgia principals and Mr. Stockton in working out a merger of their applications.

“I did not consider the assistance I endeavored to give as taking sides in this matter,” he said in describing the ch. 12 case as “a rather trivial incident in my life.” Monsignor Sheehy said he never talked to any member of the FCC about Jacksonville ch. 12 before the case was decided.

Fred H. Kent, a Florida attorney for Jacksonville Broadcasting, stated in an affidavit that Monsignor Sheehy had told him (Kent) that he (Sheehy) was “trying to help Les [Foley] and some associates get a license to operate a TV station in Jacksonville.” (Mr. Foley is not a principal in Florida-Georgia application and earlier testified his only participation was in helping obtain tower clearance.)

Stockton Moves • Mr. Stockton said that he heard rumors—after Jacksonville Broadcasting had been favored in an initial decision and FCC preliminary instructions to its staff—that Florida-Georgia would get the ch. 12 grant for political reasons. He said that after July 1, 1956, “I did everything I could to find out what was going on at the commission and . . . I talked to any and everyone I thought would be help-
456 homes destroyed. 14,150 acres of watershed in ashes. The recent Bel Air fire was the most disastrous in Southern California’s history. A KMPC helicopter pilot spotted the first curl of smoke at 8:15 in the morning. Within two minutes KMPC News had alerted the city and county fire departments. KMPC listeners learned of the fire seconds later. Without this early warning many hillside residents might have been trapped by flames that raced a 55-mile wind.

KMPC’s news fleet, two helicopters and four ground units, followed the fire from initial puff to final ember. The story took the station’s newsmen into blazing canyons, over smoke-clouded ridges. Listeners heard the snap of burning brush, the anxious voices of people driven from their homes. They heard it all. Still, there was something they did not hear. To bring listeners continuous coverage, the station cancelled all commercial announcements.
The farm director: an essential breed

GOOD ONES KNOW PRODUCTS FARMERS USE, NATRFD TOLD

The successful radio or tv farm director is a business specialist in agriculture who knows his products and audience so well he can match the service qualities of one with the economic and cultural or comfort needs of the other more effectively than is possible through other media.

In summary, that is the message farm directors heard repeated by broadcaster panels and advertiser and agency speakers during the 18th annual convention of the National Assn. of Television & Radio Farm Directors in Chicago Nov. 24-26. The meeting was followed Nov. 27 by a special farm sales promotion luncheon for agricultural agency and advertiser representatives in the Midwest.

The NATRFD convention was timed to permit farm director delegates to cover the International Livestock Exposition and National 4-H Club Congress in Chicago and to send tapes and films to their stations for immediate airing. They got lots of help. For example, Aubrey, Finlay, Marley & Hodgson, a Chicago agency heavy in "ag-vertising," sent hundreds of interview tapes to stations in behalf of one client, International Harvester.

Bob Palmer, media supervisor of Cunningham & Walsh, New York, told the NATRFD the basic questions the agency asks when it selects the farm director and station on which it plans to place an account. First is whether the farm director appreciates the value of his advertisers, he said.

"The advertiser is the guy who keeps us in business," Mr. Palmer said, "and we want to make sure that the farm director realizes it and works to see that the advertising gets the greatest possible mileage."

Awareness - Mr. Palmer explained that C&W also wants to know if the station management appreciates and understands the value of its farm department. "We feel that no business can operate successfully unless it is aware of all facets of its business," he said.

Dixon L. Harper, farm radio-tv director of Aubrey, Finlay, Marley & Hodgson, said the ideal farm director can be summed up in two words: "He knows" — knows himself and his strength or weakness and how to use both to the advantage of those he serves. He also knows his community, his customers, his market or territory and his responsibilities, Mr. Harper said.

The farm director's "customer" is both the listener and the sponsor, Mr. Harper observed, and he must understand both sufficiently well enough to serve them each in their respective needs. He should know the product well enough to be able to suggest new ideas, Mr. Harper said, and he knows his competition too.

Mr. Harper recalled the marketing assistance farm directors have given to International Harvester but noted that a few still have failed to answer a vital questionnaire on local product reaction.
There's always something worthwhile to be done in Atlanta, and WSB Radio is always there. Whether it's in the interest of public safety, vital news, community projects or education, WSB Radio is synonymous with public service in the minds of listeners. This is the kind of programming that has won national and regional awards and has built a vast loyal audience for WSB Radio.
that was sent out in August. "We can't live in each station's coverage area 12 months of the year," he said, "and seasons vary, local equipment model preferences vary. We need guidance from someone who knows the territory."

Phil Flannagan, general sales manager of Henry I. Christal Co., New York, told the farm broadcasters and advertisers that their audience influence is really much larger—by 100 per cent—than they normally consider, based on the findings of the special Politz study in five major markets (Broadcasting, Aug. 28). He said the Politz study showed slightly over 1.7 million adults living on farms in the five markets, but a total of 3.5 million expressed interest in farm programming.

"The study shows that there is a greater opportunity for the development and appreciation of quality programming in radio today than either the station or the advertiser is aware," he said.

More Prestige » James M. Patterson, director of public relations, American Oil Co., Chicago, pointed out that the growing prestige of the farm director, his personal participation in community affairs and public service, plus the large audience he reaches, are very important to the advertiser. He noted that farmers are the largest single group of petroleum users and the oil firms have staff specialists geared to serve this market.

Howard C. Tuttle, public relations manager, Ford Motor Co. Tractor & Implement Division, also stressed the importance of the work of the farm director in correcting the mistaken public image of the subsidized farmer. He felt this can be done effectively if farm broadcasters cooperate more closely with the industry's efforts in this area.

Local Effect » Richard L. Kathe, public relations director of American Feed Manufacturers Assn., felt that since it is difficult to develop any national public relations program for agriculture it becomes more important for the farm broadcaster to develop an effective local program. He emphasized the need for professionally trained workers in public relations and communication.

Farm broadcasters must not underestimate the national importance of their role in correcting false public images, especially about agriculture, according to Henry J. Andreas, chairman of the California Raisin Advisory Board and a member of President Kennedy's Agricultural Advisory Commission. He said that since the city listener or viewer does not seek out information on farm problems, "the information must seek them."

The urgency of telling the farm problem to the public also was emphasized
The combination of less farmland, fewer people on the farm, tremendous population growth and the growing shortage of agricultural specialists could turn out to be a loaded gun held against our national future,” he warned.

Farm Advertising • For those stations with farm departments, the average income from farm advertisers totals 28% of total station revenue in radio and 24% in television, a survey report by Wilbur Levering, WIBW-AM-TV Topeka, Kan., disclosed. The study was based on a response of 80 questionnaires from 200 farm directors sampled. All were NATFED members. The average number of people in these farm departments was 1.46.

The study also found that as a result of farm mechanization the farmer is getting up later these days, so farm programs are shifting, too. Most programs range in the 5:30-7:30 a.m. period and the 11:50 a.m.-1 p.m. period, the study showed, and a few are in the 6-6:30 p.m. spot. All but 4% of the farm directors deliver the sponsor’s message in person. The study also disclosed that 19% of the farm directors sell their own accounts, carrying rate cards and signing contracts. Another 72% help the salesman directly in this selling job, but they do not personally carry rate cards or sign contracts.

Hugh Ferguson, WCAU Philadelphia, related the success of a public service campaign which aided not only the listener but also an entire product industry, local retailers and other sponsors too. Last August for a week he aired an “Eggs ‘Round the Clock” promotion with brief features every hour on how to use eggs in various ways for meals or snacks at all hours. Robert E. Caskey of the Poultry & Egg National Board, Chicago, said that the WCAU promotion resulted in “a very significant increase in sales at the retail level.” PENB is following up by expanding the idea nationally with a script kit quarterly to stations starting next February. The tie-in value with other products is unusually high, they noted.

Results • According to reports from agency circles Tuesday, the NATFED sales promotion luncheon on Monday for agency and advertiser guests produced immediate reaction. Agency spokesmen said the presentation awakened new interest on the part of farm advertisers and exploration of availabilities began in behalf of several broadcast advertising accounts. The Monday presentation featured Henry Clay, executive vice president of KWKH Shreveport, La., and KTHS Little Rock, Ark.; Fred Rupp, sales manager of Granite City Steel, and Orion Samuel-son, WGN Chicago, with Bruce Davies, KFAB Omaha, as moderator.

Mr. Clay said a station in a farm area can’t possibly be “above average” without a farm service director. He said that from his personal experience in station management he has learned that the farm director is more important than a women’s director or sports director. Farm problems are very complex, he noted, and therefore the station must have an expert in all phases of agriculture. Advertisers, too, pay greater attention to the caliber of the farm director and the impact he makes on his audience, Mr. Clay said.

Network control feared by Bartley

Broadcasters should guard their local autonomy jealously and not surrender it to networks lest the government step in, FCC Commissioner Robert T. Bartley warned the Arizona Broadcasters Assn. at Apache Junction, Ariz., last week.

“The farther away programming determination is from the local licensees, the farther away from the public it is,” Commissioner Bartley said. What the licensee does will determine whether tv retains its freedom or whether control gravitates via network headquarters, out to Hollywood, back to Madison Avenue, down to Wall Street and thence, ultimately to Washington, D. C."

The commissioner defended the FCC against charges of censorship, holding that the agency does not exercise day-by-day advance control of program content. The U. S. Supreme Court has held that denial of a broadcast license does not in itself constitute censorship. He said he is a firm believer in self-restraint by the broadcasting industry and self-regulation in programming practices. He added that he feels certain areas exist in which the FCC has an “affirmative duty” to see that the Communications Act is not violated.

Commissioner Bartley urged broadcasters to editorialize but emphasized the “fairness doctrine” governing such broadcasts. He said that “news-slanting” by licensees is an abuse which should not be condoned by the commission under any circumstances.

This week Commissioner Bartley, in his capacity as defense commissioner, will attend the National Security Seminar in Las Vegas, Nev., conducted by the Industrial College of the Armed Forces.
Western
Without
Stagecoach

In the Sacramento area, where stagecoaches rolled and gold once rushed, many people need look no further than their family trees for action stories of the Old West. Finding modern, live dramatic fare, however, is another matter. Like so many areas west of Broadway, Sacramento has very little live theater.

Corinthian station KXTV is doing its part to remedy this. "The Ties Have It," a drama locally written and acted, was produced and aired by KXTV. Finalist in the Corinthian Stations Public Service Award competition, the show is one of several being presented to encourage local writing, local little-theater groups, local talent, and local dramatic schools.

In a computer world of machine decisions and hot pursuit of numbers, KXTV's action is hardly calculated to make Sacramento's Broadway replace its eastern namesake. It is, however, typical of the Corinthian viewpoint: A station's ties to a community, like all friendships, need to be kept in good repair. We believe that this kind of originality is not only good citizenship but a sales virtue as well.
WHAT'S RADIO ABOUT?

It's time for FCC study to reaquaint itself—Cox

An examination-in-depth of the radio industry and current FCC rules governing radio may be undertaken in the near future by the commission, according to the agency's Broadcast Bureau Chief Kenneth Cox.

Addressing the Oregon Assn. of Broadcasters, Mr. Cox said the FCC has become so engrossed in the paramount problems of television that "it has failed to maintain its expertise as to radio broadcasting." Therefore, he said, when the commission finalizes its current program and logging rulemaking "it seems to me . . . we might embark upon a very informal proceeding looking toward updating the commission's information on radio and what it is all about.

Mr. Cox proposed that such an inquiry would not be a normal rulemaking proceeding in that no new rules would be proposed at the outset. "It would, of course, be possible that as an end result of this sort of thing we might come to some revision of the rules, or it might be simply that the commission would then proceed to apply, enforce and interpret the rules with a little more intelligence in the light of current conditions."

Among questions the FCC might pose in such a proceeding, he said, would be: What does the licensee consider the role or function of his station? What is the proper role of the network in radio? Is there room in radio today for comedy, drama and serious discussion of public affairs? "Or must talk be kept to not more than two or three minutes at a time on the theory that if the spoken word lasts longer than that you're going to lose your audience?" Sources of programming available to radio stations?

Also, is the claim that radio stations serve as an outlet for local self-expression "an actuality or simply a pious phrase which is used at time of application?" What is the importance of radio to the various sources of advertising revenue?

Four FCC members make WUHF operation official

WUHF (TV) New York, an experimental uhf station which has been operating for several weeks, was formally dedicated last Wednesday (Nov. 29) with four members of the FCC in attendance. The FCC provided $2 million for the experiment to determine if a uhf signal can serve a so-called "canyon city" as effectively as a vhf signal.

FCC Chairman Newton N. Minow, who threw the switch that put the station formally on the air, later told a news conference the FCC intends to turn the station over to New York City if uhf is found to be technically satisfactory. The city's Municipal Broadcasting System is operating the station on a 14 hours-a-day basis, with programming largely provided by commercial outlets in New York. Mr. Minow said he believes tests of reception, currently under way, could establish by the end of 1962 if uhf is workable in New York.

Other FCC members who attended the ceremonies were Robert E. Lee, Rosel H. Hyde and John S. Cross. Mayor Robert F. Wagner of New York, who was unable to attend the event, issued a statement expressing hope the city would assume operation of ch. 31 before the end of 1962.

Commissioner Lee estimated there are 78,000 uhf receivers in New York City. He noted the FCC had purchased 100 uhf sets for the experiment and is installing them in homes in the area for periods of a week to ten days. Commission engineers, he said, will check reception during these test installations.

Madow rating report subject for panel

Broadcast ratings will be one of the subjects for discussion at the 121st annual meeting of the American Statistical Assn. in New York, Dec. 27-30. A panel discussion session will be given over to consideration of the report on the subject from the ASA's Technical Committee on Broadcast Ratings.

The panel will be chaired by Andrew Stevenson, advisor to the House Interstate and Foreign Commerce Committee, and will include: William G. Madow, Stanford Research Institute, Menlo Park, Calif., and chairman of the reporting ASA committee; Raymond J. Jessen of C-E-I-R Inc., a member of the committee on broadcast ratings; Hyman H. Goldin, FCC economist, and representatives from the rating services, networks, and agencies.

Ballot recount shows KPRC stations correct

The Houston City Council declared Earl M. Pruitt a winner in the District B council election after a recount. The recount was ordered after conflicting findings in an earlier count were reported by KPRC-AM-FM-TV Houston and the Houston Post.

The stations last week claimed that while others declared H. H. Ricker the winner by a narrow margin, tabulations by the KPRC stations and the Post indicated a discrepancy and that Mr. Pruitt actually had won.

Subsequently, the recount of official vote showed the KPRC-Post tally to be correct.
MARKER BUOYS indicate the path of a MILS submarine cable as it is pulled from the cable-laying ship. These are the cables that link MILS shore stations to outlying underwater networks of hydrophones.
Listening, thousands of miles beyond the coasts of the United States, are the sensitive ears of MILS: the system that hears the ocean impact of missiles, satellites, and nose cones and determines their exact location.

Early in 1956, Western Electric and Bell Telephone Laboratories — because of their long and diverse experience in designing and building communications systems for the Bell System and the Government — were selected for the unusually difficult MILS project.

MILS is built around a number of strategically-placed hydrophones (underwater sound receivers), connected through range stations to a control center. The approximate area of a missile impact is determined by those hydrophones which hear the object hit the water. The exact point of impact is then calculated by electronic computers at Cape Canaveral, Florida, or Point Mugu, California — East and West Coast MILS headquarters — from the hydrophone information.

After the basic design of MILS had been developed by Bell Laboratories, Western Electric, as prime contractor, was called upon to apply its experience in submarine cable engineering, oceanography, hydrography and acoustical physics. Installation of the necessary cable and hydrophones was accomplished through the joint efforts of Western Electric’s Military Engineering Service and the U. S. Navy.

The success of MILS was possible only because of the coordinated efforts of the Navy, the Bell Telephone System, and hundreds of suppliers and subcontractors. Western Electric is proud to have been selected for this communications project — so vital to our nation’s missile and space programs.
L.A. MEETING TO OBSERVE NBC'S 35TH

Executives, affiliates, stars plan birthday observance

An address by Robert W. Sarnoff, NBC board chairman, Thursday night (Dec. 7) will highlight this week’s joint annual convention in Los Angeles of NBC's radio and tv affiliates, and the network's 35th anniversary observance.

NBC expects a record attendance at the Dec. 6-8 convention to be held at the Beverly Hilton Hotel. A closed meeting of radio affiliates is slated for 8:30 a.m. Dec. 6 followed by a meeting of affiliates with NBC executives at 10 a.m. A trip to Disneyland is also set for that day.

The tv affiliates closed session begins at 10 a.m. Dec. 7 with a brief address by Mr. Sarnoff at luncheon and an afternoon meeting of tv affiliates and NBC executives. The anniversary dinner and address by Mr. Sarnoff are scheduled for 8 p.m.

A visit to Revue Productions' studios and the Metro-Goldwyn-Mayer lot in Culver City on Dec. 8, will be followed by a cocktail reception and dinner in the evening.

In advance of the convention, NBC last week released a 35th anniversary history of network activities that emphasized NBC's climb this year in gross billings (see table, page 42) and called attention to its programming performance.

The NBC compilation of its history spans the 35 years from 1926, when RCA launched NBC to provide "the best programs available for broadcasting in the U.S.,” to the present day of broadcasting.

Among top NBC executives attending the convention and anniversary observance in addition to Mr. Sarnoff will be Robert Kintner, president; David Adams, senior executive vice president; Walter D. Scott, executive vice president, tv network; William K. McDaniel, executive vice president, radio network; and Thomas Knodle, vice president, station relations.

NBC International has also invited overseas affiliates and associates to attend from Argentina, Australia, the United Kingdom, France, Japan, Peru, Mexico and Venezuela.

An array of NBC stars is expected to provide entertainment at the banquet. Among them: Dick Powell (master of ceremonies), Milton Berle, Joey Bishop, Jimmy Durante, Bob Hope, Jack Leonard, Art Linkletter, Groucho Marx and Bob Newhart.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

- WZIP-AM-FM Cincinnati, Ohio: Sold by Carl H. Lindner and associates to the Waukegan (III.) News-Sun for around $450,000. Owners of the News-Sun own WKRS in Waukegan. WZIP operates on 1050 kc with 1 kw daytime; WZIP-FM is on 92.5 mc with 83 kw.

- KMAK Fresno, Calif.: Sold by Robert O. and George T. McMahon to Fresno Broadcasting Co. for $200,000. Fresno Broadcasting comprises Orin Lehman, J. G. (Jock) Fearnhead, Fin Hollinger and Albert Heit among others. This group also owns KPOI Honolulu, Hawaii, and WHUC Hudson, N. Y., and is awaiting FCC approval of its purchase of KITO San Bernardino, Calif. KMAK operates on 1340 kc with 1 kw daytime and 250 w nighttime. Broker was Edwin Tornberg & Co.

- WCOY Columbia, Pa.: Sold by Lester P. Etter, H. Raymond Stadiem, Eugene Silverstein and M. Leonard Savage to Donald and Joan G. Huff of Morrisville, Pa., for $85,000. The sellers own WLBR Lebanon, Pa. WCOY operates daytime only on 1580 kc with 500 w. Broker was Howard S. Frazier Inc.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 127).

- WBNY Buffalo, N. Y.: Sold by the

avoid the hazards of selling on your own

Why take the risks involved in negotiating without our knowledge of markets, of actual sales, of responsible contacts? In speaking to any buyer, Blackburn's experience and reputation for reliability naturally lend greater weight to our opinion than any seller can reasonably expect to be given to his own.

estate of the late Nathan Straus to Gordon and Barton McLendon for $650,000. The McLendons already own WYSL in the Buffalo area which they are selling in order to comply with the FCC's duopoly rule (see below). The McLendons own also KLIF and KROW (FM) Dallas, KILT and KOST (FM) Houston, KTSY San Antonio, and WAKY Louisville, Ky. The McLendons also have bought WGES Chicago and are selling WAKY (CHANGING HANDS, Sept. 25). The WBNY grant was conditioned on the McLendons disposing of their interest in WYSL and also any creditor interest in the group buying WYSL. The commission said its action was without prejudice to any action it might take on the McLendon's interest in X-TRA Tijuana, Mexico (CLOSED CIRCUIT, Nov. 13).

- KDUO (FM) Riverside, Calif.: Sold by Southeastern California Broadcasting Co. to KFXM Broadcasting Co. for $60,000. KFXM Broadcasting is the licensee of KFXM San Bernardino, Calif.; it is owned by Howard L. Tullis and John P. Hearne who also have major interests in KAFY Bakersfield and KDEO El Cajon, both California. Mr. Tullis is 52% owner of KEAF Fresno; Mr. Hearne owns KVEN-AM-FM Ventura, Calif., and KUAM-AM-TV Agana, Guam. Southeastern California is a non-stock, non-profit organization headed by John W. Osborne as president and chairman.

KODA reports election, gives returns in stereo

Like other stations, KODA-AM-FM Houston has been faced with the problem of what to do with stereo broadcasting, and how it can be used effectively.

The Houston outlet answered its own question experimentally on the air the night of the city's primary elections: it broadcast the returns in stereo. In the 1 1/2 hours between first and final results, KODA interrupted its programming five times with the latest returns and election forecasts. The two reporting station newscasters were seated at separate points, and compared notes informally to maximize the "spaciousness" of the stereo effect.

At another point, a taped interview with one of the candidates was broadcast with an engineer feeding the questions to one side, and the answers to another.

The stereo experiment was considered successful, and it will be repeated with different effects Tuesday during station coverage of the election run-offs.

AFTRA defers KFWB action

Action by the American Federation of Television & Radio Artists on appeals of seven disc jockeys and staff members at KFWB Los Angeles from expulsion and fines for alleged strike-breaking activities has been postponed six months at the request of Edwin H. Franzen, attorney for the appellants. Appeals from the union's disciplinary action were to be heard last Wednesday (Nov. 29) at an AFTRA membership meeting in Hollywood. An eighth KFWB employee, Jack Colon, had notified AFTRA that he would appear at the meeting, but did not do so and his fine and expulsion were upheld. The other seven are: Bill Angel, Chuck Biore, Hal Murray, Jim Hawthorne, Art Nelson and B. Mitchell Reed.

TelePrompTer excludes U.S. radio from bouts

There will be no U. S. radio coverage of two heavyweight boxing features tonight (Dec. 4) in Toronto (Floyd Patterson-Tom McCneely) and Philadelphia (Sonny Liston-Albert Westphal) because TelePrompTer Corp., which holds coverage rights, didn't get its price.

Irving B. Kahn, TelePrompTer president, said about a million people in the U.S. and Canada will see the closed circuit tv versions, 500,000 on large screens and the others on catv hookups totaling 150,000 sets.

He said TelePrompTer asked and got $100,000, $170,000 and $300,000 successively for radio rights to the three Patterson-Johansson fights, though the company's asking price wasn't as big for tonight's fights. The company bought radio-tv rights for $300,000 plus a percentage of the revenues it receives over that amount. The closed circuit tv potential reportedly is $2 million. The Toronto fight will be carried on CBC Radio under sponsorship by Carling Breweries Ltd., through F. H. Hayhurst Co., agency.

Fremantle International, New York, has acquired overseas radio and television distribution rights to the bouts.

SELLER NTA THREATENS TO END TRANSACTION WHEN BUYER ETMA REFUSES TO PAY CASH

The sale of WNTA-TV New York to
an educational television group, delayed
by a series of legal maneuvers, ran into
trouble from an unexpected source last
week when National Telefilm Assoc.,
New York, owner of the station, set
today (Dec. 4) as the deadline for
either the completion or the termination
of the transaction.

Officials of NTA and of Educational
Television for the Metropolitan Area
Inc. met last Tuesday (Nov. 28) for
the closing of the transaction, but ETMA
representatives balked at paying the $6.2
million purchase price in cash, and in-
sisted that the money be placed in
escrow. ETMA representatives pointed
out that the U.S. Court of Appeals for
the District of Columbia has set a
hearing for Jan. 10 on the underlying
merits of the case—whether the FCC
was correct in approving the sale in the
manner it did. If the court upsets the
sale, the money ETMA paid might not
be immediately recoverable, a spokes-
man stressed. NTA executives vetoed
the escrow suggestions, made several
counter proposals that were unacceptable
to ETMA and finally laid down its
ultimatum for today.

It appeared on Monday (Nov. 27)
that the final legal obstacle to the ac-
quition of the station by ETMA had been
removed when the court of appeals
signed a 5-3 vote, lifting a stay issued
by three of its judges on Nov. 9. The
stay had been obtained by the State of
New Jersey, which has opposed the
sale largely on the ground that WNTA-
TV is the state’s only tv outlet.

Leonard Davis, NTA chairman,
claimed that ETMA is putting NTA
in the position of taking all the risk in
the event the court of appeals voids
the transaction in January. It was
learned that NTA had made two alter-
native proposals after rejecting ETMA’s
escrow offer. One called for the pay-
ment in cash of $2 million, followed by
payments of $1 million a year for a
total of $9 million. The second propos-
al called for the payment of $2 million
now and of $6.2 million after one year
for a total of $8.2 million.

thumbs down * ETMA officials
turned down both these counteroffers
and suggested that Mr. Davis was try-
ing to raise the price as a means of
resolving the problem posed by the legal
actions of Gov. Robert Meyner of New
Jersey.

Mr. Davis claimed that the delay in
closing the sale already has cost NTA
more than $500,000. He noted that
ETMA wanted to take title to the sta-
tion without paying any cash; have use
of the outlet for weeks or months, and,
if the sale is disapproved, return the
station with ETMA’s $6.2 million still
intact.

A source close to the proceedings said
that if the money was placed in escrow,
NTA would derive only a modest in-
terest rate—3 1/2%. This was said to be
another factor in NTA’s rejection of
this proposal.

Mr. Davis said that if ETMA does
not complete the transaction by today’s
deadline, WNTA-TV will proceed with
plans for “expansion and improvement
of the creative and public-service pro-
gramming for which our station is well
known.” The stations have held nego-
tiations with Liebman Breweries Inc.,
New York, which holds radio-tv rights
of the New York Mets baseball team,
for telecasting its games over WNTA-
TV.

Highest Court * As of last Thursday,
all principals were awaiting a ruling by
Chief Justice Earl Warren on the
request by New Jersey for the reinsta-
tion of the stay. This request was
opposed by the FCC, through the Solici-
tor General of the United States, and
by NTA and ETMA.

Gov. Meyner took his reversal earlier
in the week to the U.S. Supreme Court.
He submitted the motion for stay to
the Chief Justice who is the member of
the Supreme Court responsible for the
District of Columbia circuit.

Although it is presumed Chief Justice
Warren will act on the motion himself,
it is within his province to ask the en-
tire Supreme Court to rule.

The appeals court reheard argument
Nov. 27 on New Jersey’s motion for a
stay. Gov. Meyner argued for the
state, basing his plea on the fact that
WNTA-TV is New Jersey’s only tv sta-
tion. Opposing Gov. Meyner were

New Jersey Gov. Robert Meyner (c)
stands outside the U. S. Court of Ap-
peals for the District of Columbia
after he made a stirring appeal for
continuance of a stay against the sale
of WNTA-TV New York to an educa-
tional group in that city. Flanking

presentation: G. Douglas Hofe Jr.,
deputy attorney general of New Jer-
sery (l), and Sigmund Timberg, Wash-
ington attorney.
Daniel Ohlbaum, for the FCC; Justin M. Golenbock, for NTA, and Henry Fischer, for ETMA. Seven of the nine circuit judges were present for the rehearing.

The 5-3 decision, announced that afternoon, lifted the stay and set Jan. 10 for argument on the merits of the case. The three dissenting judges were the same ones who earlier had granted the stay: Chief Judge Wilbur Miller, and Judges E. Barrett Prettyman and Walter M. Bastian. Judges Bastian and Warren E. Burger did not attend the reargument, but Judge Bastian did participate in the second decision.

A basic consideration, it was apparent, was the judges' belief that if the stay is not lifted, the transaction would be terminated and the case mooted.

**WRVA event features Reed, Harrison, Hyde**

W. T. Reed Jr., president of Larus & Brother Co., licensee of WRVA Richmond; Albertus S. Harrison, Virginia governor-elect, and Commissioner Rosel H. Hyde of the FCC were the key speakers at the formal dedication of WRVA’s new 50-kw transmitter and the inauguration of service of the new 200-kw WRVA-FM Nov. 30 at Varina, Va.

Mr. Reed told 150 civic and state leaders of WRVA’s public service record over 36 years, and said that nearly $180,000 in station time had been devoted to public affairs programming this year.

WRVA operates on 1140 kc with 50 kw and is the companion station of WRVA-TV, owned by Larus & Brother Co. William Preston is president of the Larus stations. John B. Tansey is general manager.

**NAB’s Carlisle hits talk of censorship**

"An honest man with a plan need not fear excessive government regulation," according to William Carlisle, NAB vice president. Speaking to the Arizona Broadcasters Assn. at Apache Junction, Ariz., he took issue with those who say the FCC and Chairman Newton Minow "are trying to impose censorship on the industry."

Collecting information isn't censorship, Mr. Carlisle said, adding, "Nor is asking broadcasters to make a reasonable effort to determine community needs and requiring a broadcaster reasonably to match up promise and performance."

He advised broadcasters to appraise NAB and its leadership by looking for "first-hand fact instead of second-hand gossip." He added, "Be from Missouri if you wish, but also be at the meetings where you can get the truth first-hand."

**LEADING WASHINGTON STATIONS STREAMLINE THEIR OPERATION WITH SPOTMASTER CARTRIDGE RECORDERS**

SPOTMASTER cartridge tape recorders are now in operation and proving of outstanding value for WAVA, WDON, WINX, WMAL, WMAL-TV, WOOK, WPGC, WQMR, WTOP, WTTG-TV, WUST and WWDC. These Metropolitan Washington, D.C. stations who demand precision performance and extended reliability for their spots, themes, I.D.'s, news inserts and sound effects, chose SPOTMASTER over all other cartridge recorders. With a touch of a button you are on the air with the highest quality sound, instantly, on cue, every time for every client. SPOTMASTER cartridge equipment is in operation in top rated stations in all 50 states, Canada, Australia and Mexico. If you would like to know more, please write or call.

Engstrom replaces retiring Burns at RCA

SENIOR EVP GETS PRESIDENTIAL POST, CLIMAXING 31 YEARS WITH FIRM

Dr. Elmer W. Engstrom was elevated to the presidency of RCA last Friday in a move triggered by the surprise resignation of President John L. Burns.

Dr. Engstrom, 60, is widely known as one of the leaders in the development of both black-and-white and color television and for his work in other technical fields. He was senior executive vice president of RCA at the time of his promotion to the presidency.

Mr. Burns' resignation, attributed to "personal reasons," applies to his posts as director of RCA and subsidiary companies as well. He will continue, however, to serve RCA "on special assignments" from Brig. Gen. David Sarnoff, board chairman, who announced the changes following the December board meeting Friday morning.

Mr. Burns is known to have sold most of his RCA stock, largely acquired under the RCA stock-option plan, since early October at a profit estimated at approximately $310,000. He retains about 4,000 shares out of 21,443 held earlier this year, according to Securities & Exchange Commission records.

How It Was Sold - During October, RCA President John L. Burns sold 17,443 shares of common stock in the corporation from total holdings of 21,443 shares, SEC "insider" transaction reports reveal.

Mr. Burns owned some 400 shares, mostly stock awards from the company, until July 24, 1959, when he exercised special option to buy 20,000 shares at $33.75 per share. Until October of this year he did no trading in the stock, although he acquired further shares from dividends and stock awards. In October RCA common stock was selling for approximately $52 per share.

On Oct. 11, 1961, he sold 6,000 shares; Oct. 16 he sold another 3,305; he sold 3,800 more on Oct. 25 and another 4,338 the next day. His current beneficial holdings are 4,000 shares of common stock.

Sarnoff Lauds Engstrom - In announcing the changes, Gen. Sarnoff said the selection of Dr. Engstrom for the presidency "reflects our confidence in his ability and his experience, particularly in those areas where RCA anticipates great future growth. In his 31 years as an employee of RCA he has advanced step by step through progressively more important executive assignments.

"In doing so, Dr. Engstrom has demonstrated an unusual blend of business, administrative and scientific abilities. Under his supervision, several major divisions of RCA have registered consistently outstanding performance and have made their greatest contributions to corporate profits."

Mr. Burns, 53, during whose tenure as president RCA has moved heavily into the data-processing and astronautics fields, said he was resigning for "personal reasons" and added: "My experience with RCA convinces me that, as one of America's outstanding companies, it will continue to grow and prosper and make material and significant contributions to the security and economy of the United States. It is a source of great satisfaction to me that my relationship with RCA and its distinguished chairman will continue on a special-assignment basis."

Gen. Sarnoff will continue as board chairman and chief executive officer of RCA. Dr. Engstrom will supervise all company operations and will report to the chairman.

Engstrom Background - Dr. Engstrom, who joined RCA in 1930, is a member of the company's board of directors and the boards of its subsidiaries, NBC and RCA Communications Inc.

He was born in Minneapolis Aug. 25, 1901, and received a B.S. degree in electrical engineering from the U. of Minnesota in 1923. He was received an honorary degree of doctor of science from New York U., and honorary doctor of laws degrees from Findlay College, Findlay, Ohio, and from Rider College, Trenton, N. J.

Dr. Engstrom joined the General Electric Co. in 1923 and was assigned to the radio engineering department. In 1930 GE's radio engineering and manufacturing activities were transferred to RCA and Dr. Engstrom continued as division engineer in charge of Photofone development and design for RCA Mfg. Co., Camden, N. J.

Beginning in the early 1930's, he participated in the evaluation of tv, which was still in the experimental stage, and was responsible for the development and construction of apparatus used in field tests and in the planning and coordination that led to black-and-white tv service. Following this, he and his associates conducted research on color tv.

Progresses Rapidly - He was a member of the National Television Systems Committee at the time tv standards for broadcasting were established, and was a member of the Radio Technical Planning Board. He was also a member of the NTS committee which developed technical signal specifications for color television transmission, adopted by the FCC on Dec. 17, 1953.

Dr. Engstrom was named RCA director of general research in 1942 when all of RCA's research activities were brought together at Princeton, N. J., and in 1943 was named director of research for RCA Labs. In 1945, he was elected vice president in charge of research of the RCA Labs Div. and in 1951 was named vice president in charge of that division. In 1954, he
was elected executive vice president, RCA Labs, and later that year was elected executive vice president, research and engineering. On Oct. 21, 1955, he was appointed senior executive vice president of RCA.

Dr. Engstrom has received many awards for research in radar, radio, airborne television, electronics and acoustics. In 1949, he received the silver plaque of the Royal Swedish Academy, and in 1955, the Progress Medal Award of the Society of Motion Picture & Television Engineers.

He is the author and co-author of many articles that have appeared in technical journals. Dr. Engstrom is a member of various scientific societies and organizations, including the Defense Science Board, the Institute of Radio Engineers, American Institute of Electrical Engineers, and the IRE Awards Committee. He is active in Princeton, N. J., in various community organizations, including the American Red Cross, the Rotary Club, and the Young Men's Christian Assn. He is a member and trustee of the Westerly Road Church of Princeton.

Burns Background In submitting his resignation, Mr. Burns left the RCA presidency after four years and nine months in the post. A partner in the management consultant firm of Booz, Allen & Hamilton, whose clients include RCA and NBC, he had worked closely with RCA officials for 10 years, and was called in to take the presidency on March 1, 1957, when Frank Folsom resigned.

A native of Watertown, Mass., and trained in electrical engineering and metallurgy, he taught at Harvard and Lehigh U. while both working with Dewey Almy Chemical Co., and acquiring his doctorate in metallurgy from Harvard. He subsequently was with Republic Steel, starting there in 1934 as a worker juggling coils of white-hot metal in a rod mill and winding up as superintendent of the company's wire division. He moved from Republic to BA&H in 1941 and became a partner in the firm less than a year later.

Stelma field engineering

The establishment of a field engineering service as a division of Stelma Inc., Stamford, Conn., has been announced by Alfred B. Reiss, president of the electronic telecommunications equipment firm. The new division, formed to serve in the telecommunications, broadcast, television, radar, data-processing and telemetry field, is headed by Clarence K. Laubach, formerly with Cook Electric Co. The Stelma field engineering service is located at 4205 Branch Ave., S.E., Washington, D.C.

WWTV-Area Auto Sales Are Larger Than Delaware-Alaska Combined*

People in the proven WWTV coverage area—Cadillac- Traverse City and Northern Lower Michigan—spend 12% more for automobiles than all the people in Delaware and Alaska combined!

No other television station—no other medium—even approaches WWTV's penetration of this important market. WWTV delivers more homes than Station B in 433 of 450 quarter hours surveyed, 8 a.m.- Midnight, Sunday through Saturday (NSI, Cadillac-Traverse City—June 6–July 3, 1961).

Add WWTV to your WKZO-TV (Kalamazoo-Grand Rapids) schedule and you get all the rest of outstate Michigan worth having. If you want it all, give us a call!

*Auto sales in the WWTV Area are $191.5 million compared to $136.3 million for Delaware and Alaska. (Source: SRDS, September 15, 1961)
ALL-CHANNEL LAW OPPOSED

EIA consumer products division asks plan's delay until FCC has completed its New York uhf test

Continued opposition to any legislation that would require TV manufacturers to make all-channel receivers was approved by the consumer products division of the Electronic Industries Assn., meeting last week in Los Angeles.

The division registered approval of the previously-adopted EIA stand opposing any law that would require manufacture of vhf-uhf receivers only pending completion of the test of uhf broadcasting now being conducted in New York City. The FCC has asked Congress to pass such a law.

The consumer products group also recommended opposing any attempt to move all TV broadcasting into uhf until the New York tests are completed, and endorsed the EIA position that the entire question of frequency allocations should be placed in the hands of a single authority of the federal government.

The jumbled spectrum is caused by inefficient administration, L. Berkeley Davis, EIA president, charged in a news conference at the opening of the winter conference. EIA advocates the establishment of a single spectrum authority to rule on the allocations now made by the Intergovernmental Radio Advisory Committee (representing government users) and the FCC, Mr. Davis explained. IRAC and the FCC have largely ignored each other in making their allocations, Mr. Davis charged, and the result is that the vhf and uhf television bands are separated by a number of other, unrelated services.

The vhf-uhf problem can be settled more efficiently by new and better frequency assignments than by the proposed requirement that all TV sets be able to receive all channels, Mr. Davis declared. With only 15% of sets going into areas with uhf service, such a requirement would make the purchaser of a TV set buy and pay handsomely for something he does not need and cannot presently use, he said. This is patently unfair, he stated.

Move to Uhf • Some EIA members, like some FCC commissioners, believe all TV should be moved to uhf, Mr. Davis reported. EIA officially has taken no official position on that question and is not likely to, he noted, indicating he thinks this is more a broadcasters' problem than one for manufacturers.

Factory sales in 1961 will go over the $10 billion level, Mr. Davis announced. He predicted further growth in 1962 and a $20 billion level in 1970 (with consumer products accounting for $3 billion).

The dollar volume of consumer products dropped slightly in 1961, from $2.1 billion last year to $2 billion this year, Mr. Davis noted. He attributed the fall-off in part to decreased output of TV sets (from 3.9 million in 1960 to 5.7 million in 1961) and a trend to the buying of less expensive portable receivers in place of the more costly consoles.

Because of a large inventory of unsold TV sets at the end of 1960, Mr. Davis commented, retailers sold more TV sets to the public in 1961 than in 1960.

The EIA president, a GE vice president, also noted that the factory sale of auto radios dropped from 6.4 million in 1960 to 5.1 million this year. This, he said, was largely due to the increased purchase of low-priced compact cars without radios. Home radio sets sales stayed at about the same level in 1961 as in 1960, he said, and there was a continuing increase in the FM field.

Noting that there is an increased demand for stereophonic phonographs, which accounted for 74% of all phonographs sold this year against 68% last year, Mr. Davis predicted that stereo will be in equal demand by buyers of FM sets as soon as stereo FM broadcasting spreads to national proportions.

Other highlights of the EIA meeting:
- The EIA board also took a position on imports, patent rights, taxes and even accepted an invitation from the Japanese Electronics Industries Assn. to send representatives to Japan to look at the state of electronics manufacturing in that country.
- John L. Hanigan, vice president of the electronic products division of Corning Glass Co., was elected to the executive committee of the EIA tube and semiconductor division. Stephen Levy, assistant general manager of the Lansdale Division of Philco Corp., was elected chairman of the semiconductor section of the tube and semiconductor division.

Collins emergency service

Collins Radio Co., Cedar Rapids, Iowa, has instituted a new 24-hour "customer emergency service" to assist commercial and military customers on any problem at any time. The new direct telephone at Cedar Rapids, Empire 5-3600, gives immediate access to
To merge, or not to merge is the question

P. E. Haggerty (l), new president of the 90,000 member Institute of Radio Engineers, and Warren H. Chase (r), president of the 70,000 American Institute of Electrical Engineers, talk over the possibilities of combining their organizations into one international engineering society (BROADCASTING, Oct. 30). The boards of directors of both organizations have appointed a committee to study the question. A report will be made Feb. 15, 1962. Target date for the merger will be Jan. 1, 1963.

Technical topics...

Remote console - RCA has introduced a new portable audio console for remote originations or as auxiliary studio equipment for advance preparation of taped shows. It is fully transistorized and weighs about 65 pounds, includes three preamplifiers, a remote line amplifier, and two built-in, three-speed turntables.

Studio monitor system - Electro-Voice, Buchanan, Mich., has announced the addition of studio monitor speaker systems to its line of broadcast and recording equipment. The Sentry I model is designed for wall or ceiling mounting. The Sentry II is a floor model of the same basic design. The cabinets have been sanded and sealed, for finishing to suit studio decor.

Vote on venture - Audio Devices Inc. stockholders will meet Dec. 18 at the company's New York headquarters to vote on a plan to convert subordinated notes into common stock. The company has entered into agreements with several institutional investors for the private placement of $1.5 million principal amount of 5.5% convertible subordinated notes due Nov. 1, 1976, to refinance outstanding bank debt and to obtain additional funds for plant expansion and working capital. The initial conversion price will be $30 a share.

Stereo cartridge - General Electric Audio Products Department, Decatur, Ill., has developed a new variable reluctance stereophonic cartridge, the "Orthonetic," featuring a new suspension and damping system. Two versions are available. The VR1000-5, with a 0.5 mil diamond stylus for professional and automatic turntables (suggested list price, $29.95). The 0.7 mil version, the VR1000-7, for use with high quality changers ($24.95).

Stockholders okay transfer of Philco

Philco Corp. stockholders last week approved the sale of the company to the Ford Motor Co. The completion of the $110 million transaction—whereby the Philadelphia electronics-appliance firm becomes a division of the automobile company—is scheduled to take place this week.

The transaction, announced three months ago (BROADCASTING, Sept. 18), provides that each Philco stockholder will receive one share of Ford Motor
Program plans for the annual Broadcast Engineering Conference to be held April 2-4 during NAB convention week in Chicago were drafted at a Nov. 28 meeting of the NAB Engineering Conference Committee, of which Jack Petrik, KETV (TV) Omaha, is chairman.

George W. Bartlett, NAB engineering manager, was named chairman of a subcommittee to propose a recipient for the 1962 NAB Engineering Achievement Award, to be presented at the convention. Serving with him on the subcommittee are Mr. Petrik; William S. Duttera, NBC, and William B. Honeycutt, KRLD-AM-TV Dallas.

Attending the committee's session, held in Washington were (clockwise from foreground): Mr. Bartlett; Frank Marx, ABC; George L. McElhanan, KPHO-AM-TV Phoenix, Ariz.; Glenn G. Boundy, Storer Broadcasting Co.; Orrin W. Towner, WHAS-AM-TV Louisville; Mr. Honeycutt; Virgil Duncan, WRAL-TV Raleigh, N.C.; Mr. Duttera and Chairman Petrik. Formal agenda will be announced later.

Co. stock for 4½ shares of Philco stock. Ford closed at 115½ Thursday. This is Ford's third diversification move in the last 12 months. Ford spent $386 million to acquire 100% interest in Ford Motors Ltd. in England, and $28 million to buy Electric Autolite (batteries and spark plugs).

The possibility that the Dept. of Justice would object to the merger was dispelled when a Justice Dept. spokesman stated that there is no evidence competition will be stifled in the sale of Philco to Ford.

Although there has been speculation that the new ownership might withdraw Philco's application for ch. 3 in Philadelphia, there has been no recent change in the firm's position as stated in September by James Skinner Jr., president of Philco. In a letter to the FCC at that time, he said Philco intends to prosecute its application even after the merger. Ch. 3 is now held by NBC, which proposes to exchange this station, along with its radio adjunct, for RKO General's Boston radio-tv stations. Philco also is asking triple damages from RCA in a civil suit over patent licensing practices.

Color Tv - In a related action, Philco won the right to a color tv patent when a federal judge in Philadelphia denied an RCA suit for patent infringement. Involved is the development of a sine wave modulator to produce chromatic information, invented by Philco scientist Robert C. Moore.
$7.4 million gross for SG in quarter

Screen Gems Inc., New York, announced last week that its gross income for the first quarter of the current fiscal year ended Sept. 30 amounted to $7,448,000, compared with $6,218,000 in the corresponding period of 1960. Net income was listed at $3,457,735, or 13 cents a share against $152,544 or 6 cents a share in last year's quarter.

The report was made by A. Schneider, SG president, at the company's first publicly-held annual stockholders' meeting in New York on Tuesday (Nov. 28). A half-hour presentation on Screen Gems, "Past...Present...Future," was shown to shareholders.

The visual presentation showed SG's various activities, including its national sales division, syndication division, international division, and Elliot, Unger & Elliott, the tv commercial production division. The presentation noted that the international division had a gross income of $7.8 million in fiscal 1961 against $5 million for fiscal 1960.

All of the company's directors were reelected. They are Mr. Schneider and Leo Jaffe, Jerome Hyams, William Dozier, A. Montague, Samuel J. Briskin, Alfred Hart, Louis J. Barbano, Donald S. Stralem, Leo M. Blancke and John H. Mitchell.

Film sales...

Ullman, CRC to end agreement on sales

An agreement for Richard H. Ullman Inc. to act as exclusive sales representative for Commercial Recording Corp. will come to an end Dec. 31, according to a joint announcement by Peter Frank, president of Ullman, and John J. Coyle, president of CRC. The termination of the distribution agreement, which began in August, was attributed to expansion plans of each of the two companies which would bring them into competition. CRC is a major producer of jingles and the Peter Frank organization, of which Ullman is a wholly-owned division, also owns Stars International, a radio production company which is planning a major expansion in the jingle field. Richard H. Morrison, who resigned from CRC to become a vice president of Ullman, will stay with the latter organization.

Writers' Guild suit brought against Wolper

Writers' Guild of America last Tuesday (Nov. 28) called a strike against David L. Wolper, David L. Wolper Productions, Wolper-Sterling Productions and any other firm in which Mr. Wolper has a substantial interest, charging that the documentary producer has not signed the WGA standard tv agreement.

Admitting the charge, Mr. Wolper said that he has been trying to negotiate a special contract with the Writers' Guild that would cover conditions applicable to writing documentaries, con-
ditions which he called quite different from those applying to the usual entertainment programs on television. "For instance, in documentary work we don't write a word of the script until the film is completed and edited," he said.

The guild proposed that he accept a standard contract, then ask for a waiver whenever a problem arose, Mr. Wolper reported. Commenting that "we'd have to ask for a waiver every day, under that plan," he expressed a desire to work out an appropriate contract with WGA, but added, "there's no point in signing a contract we can't live under." The WGA strike has not hampered his operation, he said, as most of his producers do their own writing.

Sterling Television Co. reports gains in all directions

Sterling Television Co., New York, reports record levels were attained in gross revenues, net earnings and earnings per share for the six-months ended Sept. 30.

Gross revenues for the period totaled $656,556 compared with $383,642 for the equivalent period in 1960. After-tax earnings were $36,149 or 8 cents per outstanding common share, compared with $16,833 or 4 cents per outstanding common share in the same period last year.

The Sterling report to stockholders noted progress "in all areas" where the film producer-distributor does business. Predicting that fiscal 1962 would be the company's best year, Saul J. Turell, president, cited one feature-length movie, "The Great Chase," which is currently in negotiation for distribution. A second feature film, "The Legend of Rudolph Valentino," has been "successfully" introduced in Syracuse, N. Y., and will go into national distribution shortly.

Pension plan announced by WGA for film writers

Writers of tv and theatrical films who have worked 10 qualified years at that occupation are eligible to receive pension benefits on retirement at age 65, under a pension plan negotiated by Writers Guild of America.

James Webb, secretary of the pension plan's board, said the pension plan is financed by contributions by Assn. of Motion Picture Producers and Alliance of TV Film Producers, employers. A qualified year is one in which a writer works a minimum of eight weeks.

The pension a writer will receive will amount to 10% per year of the total sum contributed to his credit, with a minimum pension of $120 a month being paid writers who have 400 credited weeks of employment in 20 qualified years, with three of these years subsequent to 1954. Participants in the plan are eligible for death benefits after two qualified years of work. Employers' contributions equal 5% of a writer's a theatrical picture or twice the minimum scale for tv films. There is also a total of $661,000 which is being paid in 10 annual installments for past service credits.

Employer payments have been made since March 31, 1960, and approximately $1.5 million is now in the fund. Charles Boren, executive vice president of AMPP, is chairman of the pension board, whose employer members include Richard W. Jencks, president, ATFP, as well as representatives of six individual production companies. WGA also has eight members on the board.

Complete details of the pension plan will be included in a booklet now in preparation for distribution to WGA members.

Program notes...

New documentary = Europe Without Frontiers, a documentary film on the European Common Market, is available to tv stations for public-affairs broadcasts. The 18 1/2-minute film, distributed by Association Films Inc., New York, explains how the six-nation economic federation operates and what it means to the free world.

"Country' stations buy films = Australia's 13 new "country" stations have purchased 12 program series from CBS Films. They are: Assignment Foreign Legion, Air Power, The Honeymoons, Our Miss Brooks, Rawhide, The Phil Silvers Show, The Red Skeleton Show, Terrytoons, San Francisco Beat, Whirl- birds, I Love Lucy and Perry Mason. Two or three of the stations plan to start operations this month. The remainder plan 1962 openings.

INDUSTRY SPURS VIRGINIA TO NEW WEALTH continued

rich Fredericksburg to Richmond passes the southern leg of what . . . sooner than you think . . . will be a mass market extending from Portland, Me., to the growing Richmond-Petersburg area and on through Colonial Williamsburg to the massed Tidewater cities.

The new Eastern Shore-to-Norfolk bridge-tunnel (17½ miles costing $200 million) will provide augmented facilities for the north-south highway traffic. This direct route, 70 miles shorter than any other between New York and Florida, already is sparking a modest boom in the Eastern Shore bread-basket, which has the added impetus of the Wallops Island missile base.

All over the state other markets are keeping up the statewide pace. Charlottesville reveres Thomas Jefferson and the University of Virginia that he founded early in the last century but its boundaries are pushing beyond the outlying highway cloverleafs to make way for its growth.

Across southern Virginia industrial Danville, with the world's largest textile facility, South Boston and Martinsville are spreading their influence into northern North Carolina, and vice versa. The mountain-surrounded cities of Harrisonburg, Waynesboro, Clifton Forge, Covington, Staunton and Lexington have caught the spirit of a mechanized age with its mobile population and busy transport facilities.

Air traffic is heavy along Piedmont's Washington-and-Norfolk to Cincinnati lines and feeders as well as such national airlines as United, Eastern and American.

Prosperous Transport • But Virginia is conspicuous for its prosperous old-line transportation—railroads and shipping. Four of the world's most successful railroads are Norfolk & Western, Richmond, Fredericksburg & Potomac, Chesapeake & Ohio and Southern.

Any observation about the decline of railways will draw head-shaking if not a fast rebuke from those who know and study Virginia transportation.

Similarly the shipping and shipbuilding business continues to expand, with no noticeable effect from the growth of airways. The harbors in the Tidewater cities are swallowing thousands of cargoes of coal and grain a day and dumping into foreign markets—a commerce that leads the entire nation in export tonnage.

Virginia, according to the American Automobile Assn., is "a veritable potpourri of battlefields, Colonial Williamsburg, Monticello, Mount Vernon—the list could go on and on. All are centers of history and natural wonders. The mountains, running generally in a northeast-southwest direction, are rugged and beautiful. They are paralleled by lush, fertile valleys. The rolling Piedmont hills flatten east of Richmond into coastal plains severed by the watery fingers of rivers and bays.

Virginia proudly accepts the title, "Mother of Presidents," and cherishes the memories of its military heroes. Over 60% of the Civil War—pardon, War Between the States—took place on Virginia soil.

The signs of Virginia's past glories are all around, as an up-and-down-and-across tour will show. But the fact-gatherer with money and markets on his mind will learn after a few weeks of air, rail and highway travel that past concepts of the state must be laid aside if Virginia is to be viewed accurately.

Industry Increasing • Prior to World War II the state was predominantly agricultural, supported by industries devoted to the processing and handling of farm products. But industry has moved into Virginia, joining agriculture and transportation as major sources of income. Political leadership has historically been on the conservative side, featured by a state government based on a pay-as-you-go policy. Thirty-two independent cities have governments completely independent of the counties in

*Data compiled by Virginia Chamber of Commerce from U. S. Dept. of Commerce
Industry spurs Virginia to new wealth

HISTORIC STATE PROSPERS; COMMERCE ADDS TO RICH FARM INCOME

Historic old Virginia, home of beloved traditions and gorgeous scenery, now echoes with the hum of factory and clatter of commerce.

The grace of past glories persists in the stately halls of Richmond but even that former Confederate capital points proudly to the shiny aluminum palace erected by Reynolds on the outskirts of the city and to the might of the atomic-powered carrier Enterprise fresh out of a Tidewater shipyard.

Old Virginia has gone modern. The double-strip superhighways that carry fun-hunting tourists and merchandise-laden trucks between Maine and Florida are lined by huge motels, warehouses, small and large factories, communities that have burst out of farmland, and petroleum palaces that serve the needs of America on the move.

Tidewater Market • Pitiless bulldozers are clearing the slum areas of Norfolk to make way for wide streets and the structural needs of the state's Tidewater cluster of a million consumers. The world's largest bridge-tunnel is sprouting out of Hampton Roads, world's finest harbor, and the brand new Enterprise is the world's largest ship.

Around the state the pace is the same though the setting is different. Roanoke is plotting an overhaul of its busy downtown to match the sudden prosperity of its suburbs. Big factories lie in its perimeter, producing the sophisticated trappings of modern America.

Down in the southwest corner of this spread-out state old Bristol is teaming up with neighboring Tennessee cities to carve an extensive market that defies state and city boundaries.

And Shenandoah Valley, cradle of natural wonders and historic legends, is scarred by the functional structures of industry that augment with welcome dollars the income from world-famed poultry farms and the spending of tourists who revel in the mountain beauty as autumn glories yield to the approach of winter.

Hilly Lynchburg is pushing away from the antique symbols of its riverside commercial and industrial complex into the outlying hills where General Electric, Babcock & Wilcox and other symbols of the 1960s produce devices that keep the world communicating and convert the atom into energy.

Historic Homes * Across northern Virginia from Winchester through Leesburg to Washington the antique homes and buildings of the past are being preserved, supplemented by the needs of a new and modern economy. South of Washington the bursting communities of Arlington, Fairfax, Alexandria and Falls Church are part of the tremendous Washington market though much of their spending is in Virginia.

From Washington through tradition-

All times listed are New York Time.
Richmond, Virginia's fast-growing capital city, combines the historic past with the bustle of modern industrial development. Skyline view shows some of its factories and warehouses as well as the skyscrapers of the central city.

which they are located.

American industry was born at Jamestown in 1607 when settlers searched for metals, precious and functional. A glass factory was built first. Bricks were being made by 1611. A foundry with 40 workers was set up in 1619. Today Virginia plants are turning out complex computers, synthetic fibers (it leads all 50 states in production), nuclear reactors, paper and packaging products, chemicals, pharmaceutical products, aluminum items, commercial and military ships, aeronautical devices and textiles.

This is the market of four million people whose income is rising at a faster rate than the national average. Virginia's manufacturing, retail and wholesale trade, service industries, motor vehicle registrations and bank deposits and housing units are rising (see chart page 106).

The largest single source of income in Virginia is government—federal and state and local. With the Pentagon on the banks of the Potomac and the entire seat of national government across the river in Washington, about 225,000 people have civil jobs. Another 150,000 are employed by the military, including civilians, mainly around Norfolk.

Tourist Millions The roving millions who inspect Virginia's relics, admire its scenery and patronize its motels and hotels, will spend before 1961 is ended perhaps $700 million. They worship at historic shrines, gaze from Blue Ridge and Allegheny mountain lookouts and take part in the events of the four-year Civil War centennial.

Virginia is justly famed for its 28 universities and four-year colleges. They lack the 10,000-and-upward enrollments of institutions in other states where husky, bowl-minded youngsters fill vast stadia, but the quality of their curricula and professors is unsurpassed. College of William & Mary was founded in 1693 and Wren Bldg. is the oldest academic building standing in the U. S. Washington & Lee is administrator of the DuPont radio-tv awards.

University of Virginia has emphasized its academic program since Thomas Jefferson served in 1819 as its founder and first rector. Its nuclear laboratory and other huts house leaders in the sophisticated sciences. Similarly Virginia Polytechnic Institute at Blacksburg has a nuclear laboratory. Its educational and athletic rival, Virginia Military Institute, was the first state military college in the nation. The colleges are renowned for their scholastic achievements.

Virginia's institutions are scattered all over the state. Their branches and extension courses meet the educational needs of a commonwealth thirsty for knowledge. Two medical colleges—University of Virginia and Medical College of Virginia—top their field.

Old Virginia is infused with the newest in industry, commerce and the arts. Its Dulles airport, southwest of Washington, will open in 1962 as the world's largest. Its lengthy Chesapeake bridge-tunnel will take motorists out of sight of land. Its interstate highways will enhance an advanced state-operated road system.

In all this progress, the state retains its beloved official song—Carry Me Back to Old Virginny.
Ship, railroad, coal industries growing

FARMING, FISHING ADD INCOME; LABOR CLIMATE FAVORS FACTORIES

A few days before the carrier Enterprise, world's largest and most powerful military machine, was turned over to the Navy, the man who built it gazed out over a mile or so of docks, derricks, soon-to-be submarines and the other equipment in the world's largest shipyard.

"You think ships are on the way out?" William E. Blewett Jr. snorted in a way familiar to those who have dealings with the president of Newport News Shipbuilding & Dry Dock Co.

"There'll always be surface ships. They're the cheapest haul. And ships will wear out and become inefficient. Naturally, the Navy will always have ships and ship repair is an important local industry."

**Floating Airport** • Outside his office building the biggest thing ever plowpped into the ocean by man stood 23 stories high, a $200 million floating airport. The Enterprise is the first atomic-propulsion carrier. It can go around the world 20 times—as far as earth to moon—on a single shot of atoms.

If you're not very smart about ships and inclined to worry about the future of shipbuilding or Mr. Blewett's yard, don't. "We have a $500 million backlog that will take us through 1963," he said. "Over 300 new freight and passenger-freight ships will be built in the next 15 years." He didn't say it, but nobody doubts the Blewett shipyard will get its share of this business because Newport News ships are rated by many marine experts as the finest afloat.

The yard is building nine atomic submarines and a submarine tender. The subs run around $25 million each. Nine cargo ships and one tanker are under way. The plant employs 18,400 people, according to a pre-Thanksgiving count. "We're paying the community $100 million this year," Mr. Blewett said. Peninsular Shipbuilding Assn., an independent union, represents the workers. Pay is high and the strike-free record is probably unsurpassed in big industry.

**Roanoke Viewpoint** • Shipbuilding is a centuries-old business. So is railroad ing. In Roanoke some 250 miles west of the Newport-Hampton-Newport News-Portsmouth area, easily the most populous in the state, another Virginia businessman took a rather tolerant attitude toward a hint that railroads might someday be a shaky phase of the Virginia economy.

Stuart T. Saunders, president of the nation's most profitable railroad, directed the spending of $1 million in area development in 1960 as the Norfolk & Western went hunting for new plants and industries. "We originate 14% of the coal produced in this country and handle much more than that," he said. "We've spent $65 million on port facilities at Norfolk and have the largest grain facilities on the Atlantic seaboard. We've ordered 1,000 85-ton coal hopper cars from our Roanoke shops. We're spending or authorizing $57 million in 1961 for new equipment and facilities."

N&W, richest of all railroads, pays for this in cash. It absorbed the Virginian line two years ago and its pending Nickel Plate-Wabash merger and lease plan would take it from 2,700 to 7,000-plus miles. N&W's stock has a market value of $809 million compared to $194 million for the Pennsylvania. Last year's N&W profits totaled $67 million after taxes for the nation. The line earns 8,000 in Virginia and is the state's second largest taxpayer. Last Nov. 12 N&W broke its own record by dumping 1,326 cars of coal into 11 ships and barges at its Norfolk docks.

The rapid-talking man who directs all this railroading excitement is strictly an optimist as he looks into the future. But he's also a planner, a negotiator and a trader. "This is a great and growing territory," he said, "and the N&W is helping it grow."

**Expanding Business** • A casual observer might wonder about an economy so dependent on what are sometimes referred to as three question marks in today's industry—shipbuilding, railroad ing and coal. But all are expanding with the nation's and Virginia's industries. Coal is enjoying a heavy foreign demand—in one late summer month N&W loaded 45 ships with coal for Japan. Coal is in demand by industry, especially electric power plants. Virginia is the sixth ranking coal state.

But ships, railroads and coal are only part of the Virginia economic story. The newer scientific industries—electronics, computers, nuclear, synthetics—are appearing all over the state. The pay is above average and each new plant brings new site and supply industries. Over 400 major plants were established in the last decade. Electric power generation has tripled at Virginia Electrical & Power Co. and Appalachian Power Co.—from 350 million kwh to nearly a billion. Over $100 million in highway contracts has been allotted recently.

Factory employment hit an alltime peak of 283,600 in September. Retailing jobs went up 31% in a decade.

**Fish Processing** • With all that water, Virginia has a big fishing industry employing 10,000 plus processors. The catch runs $25 million a year, including...

SHIP, RAILROAD, COAL INDUSTRIES GROWING continued

ing the succulent Chincoteague oysters. Virginia's oyster harvest is tops in the U. S. and a fourth of the Atlantic-Gulf total.

Half the state population lives in a chain of communities running from Washington on the Potomac to Richmond-Petersburg and southeast to the Tidewater.

Per capita income was $1,868 in 1960, nearing the national average. From 1950 to 1960 it rose from 76.7% to 83% of the national average, faster growth than that of the southeast or the U. S. as a whole. Percent of non-white population dropped from 27% to 21% in the last 30 years due to outward migration of nonwhites and inward migration of whites.

Leading providers of work for Virginians in 1960, according to the Federal Reserve Bank of Richmond, were these industries (by number of jobs): Textiles 36,400; foods 32,900; chemicals 32,500; lumber 24,700; apparel 23,300; transportation equipment 30,000; furniture 17,100.

Reasons Why = Virginians like to list 10 reasons why it's the best place for industry. Here they are: Nearness to domestic and foreign markets; good labor market and fine labor-management relations, with right-to-work law; ample mineral resources, including limestone and coal; efficient rail and air transport, with ice-free Hampton Roads and deep-water channels reaching 150 miles inland; water riches, both surface and underground; 16 million acres of forests; abundant power and fuel supplies; mild climate; efficient pay-as-you-go state government; unsurpassed recreational, educational and cultural attractions.

The Norfolk & Western Railway, having spent $1 million on industrial development last year, noted that 236 plants were built or enlarged in its territory as a result, with $161 million capital investment. One aid this came 8,464 new jobs, and the multiple jobs that come from each job created.

Many New Plants = Around the state are such new and modern plants as these: A. S. R. Products Corp., employing nearly 1,000 at Staunton in production of blades; United Elastic, employing 1,050 at Stuart in production of webbings and elastics; American Oil, Yorktown refinery; Johns-Manville, Jarratt, 450 employees, insulating board; Thomas J. Lipton Inc., tea processing plant at Suffolk, 250 employees who process 15 million pounds of tea (that's 3 billion cups) a year; Sperry Piedmont, Charlottesville, 900 employees, precision equipment; Reynolds Metals, headquartered at Richmond with five plants in state employing 3,200 in production of aluminum and plastic products; Melpar Inc., Falls Church, electronics, 3,000 employees (down from 6,000 during transition from manned aircraft to missiles-rockets); Brunswick-Balke-Collender, Marion, 1,500 employees producing aircraft-missile components and sports equipment; Babcock & Wilcox, Lynchburg, 800 employees producing nuclear reactors for worldwide market; H. K. Porter Co., Danville, 400 to 500 employees making Disston tools; Dulaney Foods, on Eastern Shore, freezing 15 million pounds of food a year and expanding; Yale & Towne, Salem, 700 employees producing locks and hardware; Crown Cork & Seal, Winchester, serving Shenandoah Valley packers and those in neighboring states; Imco Container (Rexall), Harrisonburg, 130 employees making squeeze bottles.

These are a few of the new and expanding enterprises that appear in a tour around the state. They're close to transport and natural resources. They especially like the tough right-to-work law and willing spirit of Virginia people who turn out a good day's work and rarely strike—qualities these industries claim are responsible for superior products and low costs. Work stoppages are one-fourth the U. S. average.

Plants moving their technical and management people into Virginia find they are happy in the cities and towns with their proximity to seashore, rivers, mountains and other conveniences. Of more than 350 moved from upstate New York to Salem, where one of General Electric's fleet of Virginia plants is located, only one asked to be transferred and he later regretted the step.

Tidewater complex state's largest market

MILLION PERSONS LIVE, WORK, BUY IN CENTRAL CITIES AND SUBURBS

The hallowed waters of Hampton Roads, top-tonnage export harbor of the nation, are surrounded by a market of 1 million people.

A collection of industrial communities draped around and along the harbor and the rivers that feed into it can now be classed among the million-population markets but the 1960 U. S. Census splits the four contiguous cities into two markets—Norfolk-Portsmouth and Newport News-Hampton.

Figures Prove Point = The claim of the Tidewater area to 1 million inhabitants has solid statistical support. Last year (April) the 1960 census showed a total of 803,010 people in the two statistically separate markets.

As New Year's Day 1962 approaches, this figure rises to an estimated 840,000, using a growth rate of 3% a year, 30th U. S. market.

But there's more to this landscape than the metropolitan figures. Reaching out 25 miles from the two main city groups, another 160,000 people live in normal trading range and are an inherent part of Tidewater Virginia, the state's largest market.

The goings-on that lie behind this freak of Washington bureaucracy grew out of Bureau of the Budget and Census Bureau rulings, with political overtones lurking in the background. However, electronic impulses of broadcasting stations ignore the foibles of politics.

Even an astigmatic observer, stand-

John Blair AND COMPANY
Incredible—but True!

Yes, metro Norfolk-Newport News is greater in urban population than all those metro areas combined (source: Sales Management's Survey of Buying Power).

Dig a little in Tidewater Virginia and you'll find other surprises—and a lot of treasure buried statistically.

For example, standard market statistics omit many millions in retail sales by the dozens of commissaries, post exchanges, shops, clubs, etc., operated here by Army, Navy, and Air Force bases for service personnel, their families, and authorized civilians.

Just the civilians employed by federal installations here (greatest military concentration in the world) outnumber all manufacturing production workers in the State of Delaware!
Another hidden plus—of $200 million in effective buying income—lies in the fact that the huge armed forces payroll is largely available for discretionary spending.
The world famous Newport News shipyards here accommodate both the United States (top) the world’s fastest passenger ship and the Enterprise, world’s largest vessel. The Enterprise was dedicated November 25th.

ing on the front porch of Hampton’s Chamberlain Hotel, can spot Norfolk’s Willoughby Spit 2½ miles across tunnel-connected Hampton Roads. But the two federal bureaus in their wisdom have decided these two markets should not occupy the same statistical bedroom, to the confusion of those who do business in the area.

**Business Boosters** - If the census definitions are fouled up, the business indicators aren’t. The market has Virginia’s largest industrial unit, the Newport News Shipbuilding & Dry Dock Co., employing over 18,000; a military payroll of $400 million; a total spending of roughly $5½ billion in 1961; bank debits of $5½ billion; a population growth 2½ times the national average; a fourth of the total population and purchasing power in Virginia.

Things are popping as the area rides the crest of the general southward movement of industry. Air and auto explorations plus extensive forays into government and commercial agencies provide a revelation in community progress. Old Norfolk, once famed for its slums and sailor-teasing morals, now presents an attractive and modern civic facade. The slums have been blasted, making way for new municipal and commercial palaces. New, wider boulevards are being cut through areas that angered venturesome motorists who hazarded the once skimpy water crossings en route to a shore vacation.

**Pace for Progress** - Tidewater Virginia has assumed a new look in the last decade, setting the pace in the Southeast for civic progress. New industrial plants are strengthening an economy once highly dependent on the sprawling military bases and the coming and going of naval vessels.

A few miles east of the relatively new Hampton Roads bridge-tunnel connecting Hampton and Norfolk there are miles of piers and tubes that two years from now will provide a short cut from New York to Florida. This 17-mile bridge-tunnel, costing $200 million, will speed the Tidewater boom and open up the rural Eastern Shore peninsula. The James River bridge and other tunnels to the Portsmouth area provide fast, easy access to this once semi-isolated metropolis.

From a United Viscount entering the Norfolk airport’s landing pattern an interested gazer can see the homes and working centers of 800,000 people. Richard L. Woodward Jr., president of Tidewater Virginia Development Council, put it like this: “The mass market, considered properly as a unit, has a strength unknown to those who cannot

---

**Statisticians take a new look at old Virginia**

Population rose 20% in the ’50s—from 3.3 to 3.97 million. Right now it’s past the 4 million mark.

Employment—1.45 million people employed.

Manufacturing — Increasing 7% per year (by value added). Now ranks fourth among 11 southeastern states (over $2 billion in 1958). Leading products are textiles, food, chemicals, lumber, apparel, transportation equipment, furniture, tobacco, pulp and paper, metals. Leads U. S. in output of synthetic fibres.

Tobacco — 81.7 million crop, 142.5 million pounds in 1960. Total value of manufactured product, $1.3 billion. No. 2 tobacco state.

Farming—Marketing plus federal payments, $477 million in 1960. Dairy products, poultry-eggs, cattle, tobacco, fruits-vegetables are main products.

Services—Over $500 million a year, up 64% from 1954 to 1958.

Commerce—Wholesaling and retailing totaled $7.2 billion in sales at last count (1958), split about half-and-half. Retailing in 1961 expected to be close to $4 billion if holiday season is good.

Per capita income—$1,848 in 1960, exceeded only by Florida in entire Southeast.

Natural resources — 26 million acres of land, ranging from 4,000-foot mountains to extensive tidewater area. National forests cover 1.5 million acres. Shenandoah National Park, Blue Ridge Parkway, 800 miles of shoreline. Lots of water, ample rainfall. Mild weather. Vast areas of inland water.

Economic growth—Virginia leads national growth rate in 23 of the 26 key economic indicators (see p. 96).

allow their thinking to spring beyond the boundary lines of their individual cities or counties.

Radio-TV Help: The council and broadcasters (Norfolk-Tidewater Television Market Council) cooperate in joint promotion of this market. New industries are being brought in and old ones encouraged to expand. The Tidewater message is being spread around the nation but it takes time to accomplish the dissipation of misconceptions.

The development council embraces the area extending from the northern edge of the Virginia peninsula on the Atlantic Coast to South Norfolk, Portsmouth and beyond. Newport News and Hampton have their own Peninsular Industrial Commission. The two groups compete for new industries but cooperate in the joint effort to promote the entire area.

This educational process shows signs of important results. The Tidewater market celebrates its 355th anniversary Dec. 20, paying tribute to the courage of Capt. John Smith and Christopher Newport who arrived in 1606 in three tiny ships.

The area had every known natural gift except mountains when the settlers landed at Jamestown-wide rivers, bays, one of the world’s finest natural harbors, fertile soil and plentiful water supplies.

Yet 355 years later Mr. Woodward looked into the future this way, “The Tidewater really is only in the cocoon stage. With the new transportation facilities it will burst forth as an economic power beyond our fondest dreams a decade ago.”

Big Boom Ahead: With Clarence H. Osthagen, vice president-executive director of the council, he has fought and overcome widespread apathy to acceptance of industrial development as a joint area objective. Now the market is fondling hopefully a proposed title, “Manhattan of the South.” The 18 subdivisions of the area will reach 1½ million people in a breeze by the time the next census is taken in 1970, the two development leaders believe. And they’re thinking of 2 million by 1975, with perhaps a little help from trade-connected communities in nearby North Carolina.

“The Hampton Roads bridge tunnel opened the door to markets of the West,” Mr. Osthagen said. “Now the Chesapeake Bay bridge-tunnel will eliminate the barrier to the North. The area will be the main mid-point truck terminus for the eastern seaboard. Trucks will dodge Washington and Baltimore to save 70 miles of extra travel.” All this will strengthen the Tidewater’s role as a distribution center and focal point for shipping lines that reach out to all the world.

New plants keep coming into the market. Here are a few of the recent entries—General Mower Corp., Campbell’s Photo, Star Band Co. employing 800, Gordon Paper, Diesel Injection Sales & Service, Tabet Mfg. Co., Tidewater Oil, Lone Star Cement, Atlantic Cement, Universal Atlas Cement (U.S. Steel), Sunnyland Refining (margarine), Newark Packing, Economy Stores distribution center; Colonial Stores distribution; new American Oil $30 million refinery at Yorktown; Lipton Tea $2 million; Dow Chemical $15 million fiber plant; Cargill grain elevators; expansion at Ford assembly plant. The names go on and on—Union Bag Camp Co.; Phillips Petroleum; Maida Development (capacitors), Boykins Narrow Fabric, DuPont’s St. Joe Paper Co.

Few Labor Problems: The strike record is exceptional. When Ford workers were involved last fall in the nationwide strike, they voiced no complaint on labor conditions, according to local businessmen. Instead they like to say, “Norfolk Fords are the best Fords,” a pride also apparent at strike-free Newport News shipyard where management and workers boast they make “the best ships in the world.”

This fastest-growing city on the Atlantic Coast is currently embroiled in an annexation project. Norfolk would be pleased to join into a single municipality with Princess Anne County and Virginia Beach, whose growth patterns are among the swiftest in the nation. The voters will decide Jan. 5, 1962. Next logical step, Norfolk believes, would be one big independent city covering all the communities and finally a single metropolitan unit comprising...
On-the-base strength of naval civil service personnel totals in the neighborhood of 30,000. Then there are around 15,000 military folks who are shore-based, and over 50,000 in fleet commands based offshore along with an estimated 27,000 naval families.

**Biggest Store** The commissary and post exchange business is huge, one selling $80,000 on a recent day. The Naval Supply Center, serving the fleet, is the world's largest store and it could tuck a hundred supermarkets in one corner.

All the naval facilities plus the Continental Army Command, NASA and other military units add a direct half-billion dollars to the market. Then there are 27,500 retired from the military, most with private jobs, and the large numbers of civilians who serve in the active reserve.

The Norfolk & Western Railway is putting $25 million into new coal piers, the state another $16 million into general cargo piers. Thirteen new public schools were completed this year at a cost of $10.3 million. Shopping centers are showing up all around. A new tunnel is being built under Elizabeth River. The C&O has extensive terminal facilities to handle the heavy traffic moving over its lines.

**Tonnage Heavy** Harbor tonnage totaled 15.4 million tons in the first half of 1961, compared to 21.4 million for New York and it is described as ice-free in winter.

Newport News and Hampton are growing fast, along with nearby towns as well as the adjacent peninsulas abounding in the Tidewater. Colonial

Largest source of export tonnage at nation's No. 1 export port is the Norfolk & Western Railroad. Stuart T. Saunders is president of this coal-hauling and profitable carrier.

the adjacent trade area. Princess Anne County, incidentally, grew 165% in the last decade. And new housing is breaking all records in the market.

**New Building** The Norfolk rehabilitation project, most ambitious in the South, developed a decade ago as modest shame at the sight of slums developed into downright indignation as property values started to drop and parking space simply didn't exist. It was either rebuild, or else. Now Norfolk has the $6.5 million Golden Triangle Hotel, part of a huge medical center, low-cost housing, vast new library, lower court building and public safety center, part of a $15 million municipal center. A 15-story maritime tower is in the works. Luxury apartments and low-cost housing are being extended. The government spent $230 million in new facilities in the decade and a 400-acre industrial park was developed.

The naval contribution to the Tidewater economy adds up to more than $400 million a year, based on final 1960 figures. This includes $158 million civil service; $79 million shore-based military; $123 million fleet based military; an estimated $50 million in allotments.

And there's a surprise package in all this packet of pay from Washington—the payroll of naval personnel has over 40% more buying power than comparable civilian pay due to added allowances and benefits—a $200 million hidden payroll available for discretionary spending.

For students of marketing, the Tidewater market offers a dramatic display of spending any time the fleet's in, or any unit of the fleet. A day or two after a ship has anchored or tied up the Tidewater stores have collected as much as $25,000.

Richard L. Woodward Jr. (l), president, and Clarence H. Osthagen (r), vice president and executive director of the Tidewater Virginia Development Council, regional promotional agency.

Williamsburg drew 405,000 registered visitors in the first nine months of 1961. Total annual visitation is estimated at 850,000. Bank deposits at the colonial shrine exceed $12 million compared to $8.6 million in 1954. Since 1928 the assessed value of Williamsburg property, spurred by the Rockefeller restoration, has risen from $1.2 million to $14.7 million.

Little Smithfield, with 3,000 people, ships up to $75 million worth of meat (including the peanut-fed hams) and Suffolk's peanuts contribute millions to the economy.

That's the way it's going in the Tidewater. Yet a world-renowned advertising agency allocates its Newport News-Hampton media budget to the Richmond territory, nearly 100 miles away, instead of Norfolk, barely three miles distant.
Historic Richmond, site of 500 factories

HALF MILLION PEOPLE PROSPER IN CAPITAL, PETERSBURG, HOPEWELL

Richmond, capital of Virginia, and its neighbors—Petersburg and Hopewell—boast more symbols of past glories than any city in the state. But historic Richmond must be viewed in 1961 not as a shrine but as a metropolitan area of more than 500,000 persons.

Misty memories of the past are present all along Monument Avenue and around the Capitol. Battle sites abound. These symbols of other decades fall into perspective, however, in a drive around the seven hills. All is changing as Richmond assumes the economic aspect of the missile era.

Convention Center • Industries • 500 of them—decorate the shores of the James River at its fall line and spread out beyond the suburbs. A towering medical center pierces the downtown sky. It will be enlarged. The hotels are being modernized to draw conventions and to serve the thousands of visiting businessmen who call at offices and plants.

Reynolds Aluminum has one of the most modern buildings found anywhere to serve as headquarters for its vast operations, including five Virginia plants. This metallic palace lies outside the central city. Like other cities, Richmond is developing its perimeters and at yearend was involved in a move to merge with populous Henrico County’s 120,000 residents.

Tobacco Center • Old Tobacco Row still knows no equal in the production of cigarettes. It turns out in a year enough cigarettes to reach to the moon and return—113 billion in 1960. Richmond has a dozen tobacco plants and 100 warehouses, storing, processing and packaging the fragrant leaf for the world. It claims production of one out of every four cigarettes manufactured—all this in one city and environs. This runs up to a billion dollars a year in tobacco products and $38 million in wages.

Tourists enjoying Civil War Centennial events—and they'll be going on another three years—can see Tobacco Row, DuPONT, Reynolds, Allied Chemical and other modern industries in the Richmond-Petersburg-Hopewell area—that is, if they're looking for the new and economic side of this northern headquarters for the Southeast's business. They can see railroad shops and yards, ships, fleets of trucks and airplanes. All are part of the facilities serving plants turning out $1½ billion in manufactured products a year.

A wholesale center, Richmond has 775 wholesale plants with annual sales of $1½ billion. Their merchandise fans out into a wide market. And more than 3,500 retail stores serve this market of a half-million people.

Half Million • An independent city, Richmond consists of 410,000 people who live in the metropolitan area (including Henrico and Chesterfield counties). Add 40,000 at Petersburg, 22 miles away, another 20,000 at Hopewell and other communities in the immediate trade area and the total at year end reaches around 520,000. And of course the population in a wider radius raises the figure impressively, depending on the arbitrary boundaries drawn in the

Industry, commerce well blended into beautiful Virginia landscape

The hard economic facts of modern Virginia escape the monument-hunting tourists who roam its coastal plains and western hills. These facts can best be discovered by a month of travel around the mountains, valleys and plains, with attention focused on industries, commerce and growth (itinerary below). Seen from plane, auto and train, Virginia is revealed as a modern and progressive state. Its business leaders are abreast of, often ahead of the national pace. This route, taken by J. Frank Beatty, senior editor of Broadcasting, included nearly all of the important markets and communities.

This review of the Virginia, 1961-62 model, is based on over 2,000 miles of travel, hundreds of interviews, probing into governmental and private economic sources, and inspection of many major enterprises. It is one of a series of regional and major market reviews by Broadcasting.
Double Exposure

It's no accident to WXEX-TV advertisers. They not only put their commercial messages before an unsurpassed Central Virginia audience, but also get energetic follow-up with in-store merchandising and unceasing promotional activity by a staff of trained merchandising experts. That means getting the message across to consumers with double impact, right at the places they buy: drug stores, food stores, supermarkets.

See us about Community Club Awards, too. Maybe you'll triple expose.
heavily settled region. Richmond claims the title "34th largest U. S. market." Charlottesville, 30,000, and Fredericksburg, 14,000, have close market ties.

With the 5th district Federal Reserve Bank, Richmond serves as an important financial center for the Southeast. Its manufacturing and employment is rising steadily. Urban renewal is under way. A recent $2.25 million grant and $3.95 million loan from the Urban Renewal Administration will enable clearing of another site, 155 acres, for residential, public and industrial development. A score of insurance companies based in Richmond invest in area commerce and industry. As capital it serves as nerve center for the state.

Record Employment • Some all-time employment records are being made in the waning weeks of 1961 and the year is better than 1960. The recent depression left little impact. Unemployment is half the national rate. State, local and federal governments are stabilizing economic influences.

Petersburg is about 25 minutes away by the new toll road. Its 40,000 residents and its commercial ties are part of a metropolitan complex of 100,000.

PRINCE GEORGE'S COUNTY

POULTRY, TOBACCO ARE BIG

Agriculture brings state about $450 million annually; Richmond biggest cigarette center

A few miles west of U. S. 11, a main northeast-southwest highway in the Shenandoah Valley, the world's largest poultry plant had a good run of turkeys just three days before Thanksgiving.

Before the day was over 14,600 gobblers had been processed on the mass-production lines of Rockingham Poultry Marketing Cooperative. Another 32,000 chickens had come off the conveyor belts that day, according to Durwood E. Whitmore, co-op sales manager.

Big Processors • These weren't tur-
has long been a big source of income for the state of Virginia. This billion-dollar contribution to the economy owes its start to a few small bags of seed brought into the Tidewater surreptitiously from Spanish Caribbean islands just three-and-a-half centuries ago. The seeds were planted in 1612 on the farm of John Rolfe at Jamestown.

That started an industry that saved a colony about to be abandoned.

Wears Out Soil * But tobacco tends to cause tired soil, so the colonists moved westward to the James River fall line where Richmond stands and farmed fresh ground. They spread on into western Virginia and into the Carolinas, and then into Kentucky. But even tired soil was good for some types of bright tobacco, a principal ingredient in cigarettes.

While magic machines turn out literally miles of cigarettes a week, there's still plenty of hand labor and a quarter-million people join the regular labor force at harvest time. Auctions are held in 18 cities. Farmers' income for their crop is nearing the $100 million mark ($82 million in 1960). Tobacco factories hire 15,000 and have a $50-million-plus payroll.

The seven cigarette factories, concentrated in Richmond, turn out around 120 billion cigarettes a year, plus 25 million pounds of smoking tobacco, a million pounds of chawin' 'backer and 125 million cigars. The total value of tobacco goods is over $1.3 billion. Virginia's tobacco output is exceeded only by North Carolina.

With all the mechanization and movement into cities, farm products are still big money-makers in this state once noted mainly for its rural economy (139,100 jobs in 1960; 9% of labor force compared to 13% in 1950). Main contributors besides tobacco are cattle, $75 million; hogs (including the dreamy Smithfield hams) $45 million; broilers $36 million; turkeys $15 million (the 1961 prices are low); eggs $31 million; daily products $120 million; corn $55 million; hay $60 million; peanuts $25 million; apples $17 million; truck crops $17 million.

Roanoke builds for prosperous '60s
NEW SEALTEST MILK, MADISONIT KNITTING PLANTS SET PACE IN '61

The factory and railroad city of Roanoke, focal point for a metropolitan population of 160,000 and largest Virginia city west of Richmond, is pushing ahead with a combination industrial development and municipal preening job.

This forward movement contrasts with 1958, when the mountain-surrounded market faced two problems—switch of the Norfolk & Western Railroad, with headquarters and shops in Roanoke, to diesel locomotives, and closing down of the American Viscose Corp. rayon plant because rayon was yielding popularity to the newer synthetics.

The switch to diesels cut into employment at the N&W shops. At the time Roanoke was in a growth pattern that is still under way. Over 25,000 people had moved in during a 10-year period. General Electric's 2,300-employee plant at Salem, and other industries had provided work but the city's businessmen felt the need to find more jobs.

Roanoke's commercial and financial influence extends as far as Bluefield, W. Va., for example, spreading in all directions. Half of the business of larger stores comes from outside the immediate metropolitan area.

Upward Trend* Three years after the 1958 setbacks Roanoke has over 200 industries with $82.5 million in annual payroll. Growth has been consistent and selective in this largest market beyond the coastal plains.

Roanoke is winding up 1961 with a new $1½ million Sealtest plant under way, a new Madisonit knitting plant, downtown razing to provide parking space, extensive new shopping centers, and chain stores entering in quantity—always a good sign. Appalachian Power is building a $50 million dam starting about 20 miles out. It will have 600 miles of shoreline in two lakes and be completed in 1963, said William P. Booker, Roanoke district manager. Private investors have taken over the old American Viscose plant for an industrial park. N&W and Appalachian Power have blended their industrial development programs with Roanoke Valley Development Corp.

Suburbs are attractive and well integrated with the central city's business and industry. Kroger has a vast warehouse at Salem. Winn-Dixie, Colonial and Mick & Mack are competing for supermarket dollars, drawing half their trade from points as far away as West Virginia. Shenandoah Life Insurance Co., with Roanoke as home base, has doubled its insurance in force in the last decade, according to G. Frank Clement, president. Insurance money is invested in the area. New business has quadrupled. N&W has placed a big order for hopper cars in its local shops.

More Jobs* Employment is gaining in Roanoke. Pet Milk and Beatrice Foods are coming in. Edward H. Ould, president of First National Exchange Bank of Roanoke, said the bank's deposits have increased from $58.3 million in 1947 to $125 million in 1961. "We'll benefit from the N&W's plan to absorb Nickel Plate and leave the Wabash," he said. "Production and consumption of coal is increasing."

Roanoke has the South's largest flour mill, Roanoke City Mills. Other key names among the 200 industries are Valleydale Packers, Clover Creamery, Broad Weave Fabric Mills, Burlington hosiery, Kenrose Mfg. Co., Lone Star Cement, Rowe Furniture, American Bridge and Knit Outerwear & Underwear Mills. Veterans Administration has an extensive regional headquarters.

Douglas Southall Freeman Award
For Public Service Through Radio Journalism
WSLS-TV
ROANOKE
By the Virginia Associated Press Broadcasters

The Shenandoah Life Stations are proud of this award. It is the Douglas Southall Freeman Award - the highest honor a Virginia station can receive for public service through TV-Radio Journalism.

The Freeman Award was given WSLS-TV because of the station's editorials, which an impartial board of judges described as "penetrating . . . hard-hitting."

This award signifies that WSLS-TV fully realizes its obligation to keep the public informed on community problems and issues. It perpetuates the principles on which this station was founded . . . the principles of honesty, sound judgement and fair play.

WSLS-TV speaks its mind through its editorials. And the Douglas Southall Freeman Award is a reminder to the staff and management that the station's editorials are a force for positive thinking in our community.

ROANOKE, VIRGINIA
include a 2,000-bed hospital.

Bank clearings are double those a
decade ago. National firms have
brought in technical and management
personnel. Martinsville 40 miles south,
has 18,000 people. Hercules Powder is
spread over a wide acreage. The man-
facturing city of Radford, 42 miles
west, feeds into the Roanoke market.
It has 10,000 population.

Optimism. Shortly after the 1960
U. S. Census was taken, Roanoke had a
set of 100,000 signs printed. When
the figures were released, the count was
97,110 (city only) so the word "almost"
was added. Nobody's made a count,
but the 100,000 mark has probably been
reached and passed. There are 64,000
outside the city in Roanoke county,
plus the numerous markets in the active
trading area. The tv stations have an-
tennas atop a 4,000-foot mountain and
their signals cover many cities.

Roanoke is surrounded by the Blue
Ridge and Allegheny mountains. Mill
Mountain juts up inside the city with
a 100-foot lighted star. Hollins College,
Roanoke Valley Technical Institute and
other centers of higher education feed
money into the Roanoke market.

Stuart T. Saunders, N&W president,
is prodding a drive to get federal aid
funds for urban renewal. A couple of
days in Roanoke will show the fervor
of its business leaders. Thoughts of
1958 have given way to future planning.

RICH TRIANGLE OF 100,000

Two Bristol, Johnson City
and Kingsport center

of important, still growing,

industrial complex

A road sign at the airport serving
three cities in Southwest Virginia and
Northeast Tennessee bears this legend
-Bristol 14 miles, Kingsport 14 miles,
Johnson City 14 miles. This strategic
spot is the hub of an industrial area
whose statistics merit careful perusal.

The 1960 census report for Virginia
credits the city of Bristol with 17,144
people. That's the understatement of
the decade. It includes only Bristol, Va.,
lying on the north side of the Virginia-
Tennessee line that splits State St. right
down the middle. South of the line is
Bristol, Tenn., credited with 18,820 in
the census. The two have a combined
municipal population of 35,964.

Rich Triangle. But the story of this
market of triplets is only begun. Kings-
port, western point of the triangle, has
a city population of 26,315. Johnson
City at the southern tip has 32,275,
bringing the total city population to
94,554; by yearend it will be around
100,000.

And there's more. Using a familiar
metropolitan concept, the immediate
four-county area adds up to a current
population of approximately 285,000
(Washington County, Va.; Carter, Wash-
ington and Sullivan Counties, Tenn.).

This surprising economic entity, sit-
ting at the kickoff point for the Ten-
nessee Valley system of dams and related
projects, is described locally as the 94th
U. S. market, bigger than Des Moines,
Iowa; Greensboro-High Point, N. C.,
Trenton, N. J., or Columbia, S. C. With
75,000 households, it's claimed to be
ahead of such markets as York, Pa. or
Baton Rouge, La. Bristol, Va., is closer
to the state capitals of North Carolina,
South Carolina, Georgia, Kentucky and
West Virginia than to Richmond and
Nashville, each 316 road miles away.

Industries Well Known. • Jay Fields,
St. Gobain, building a new plant near the city; Sperry-Farragut and Raytheon at Bristol, and North American Rayon at close-by Elizabethton. A half-hundred nationally known industries feed around $100 million into the Tri-Cities. Others are Kingsport Press, described as the world’s largest book printer, and neighboring Mead Corp., providing the paper, and Monroe business machines.

Bristol Steel & Iron works is fabricating a 300-foot radio telescope, world’s largest, for installation at Green Bank, W. Va. The area is rich in coal, including the gigantic Clinchfield Coal Corp. operation. Tennessee Eastman is rerouting the Holston River to make way for plant expansion. Olin Mathieson makes rocket fuel and Holston Defense Corp. is expanding employment.

“There is no dominant newspaper in the market and the local dailies have negligible circulation within the other cities,” Mr. Fields said, adding, “Hence it is ideally a broadcast market.”

Impact of the TVA dams and lakes is important to the Tri-Cities. Several dams are nearby. Emerging from the dream stage is a projected barge channel down the Holston River to Knoxville, providing a waterway to the Mississippi Valley, Gulf and Atlantic.

Agriculture includes dairy products, beef cattle and tobacco. Cattle graze blue grass hillside too steep for row crops.

The triangle is a transportation center and is on Interstate 81. The climate is favorable for continued industrial expansion.

SHENANDOAH RANKS FOURTH

Industry, farming make quarter-million inhabitants of valley among most prosperous of entire area

The verdant hills and rolling fields of Shenandoah Valley—fourth largest Virginia market—are populated by 250,000 people, 8 million chickens and 1 million turkeys plus the purse-filling plants of several hundred industries.

It takes a bit of looking—but pleasant looking—to perceive the intricate details of this historic area and its progressive residents. The market is thriving and expanding. In the three-county area around the cities of Harrisonburg, Staunton and Waynesboro more than 20 major industries have set up shop within five years.

Rockingham County, famed for its chickens and turkeys (see Agriculture, page 110), is the top farm county of Virginia and third in area. Like other segments of the valley nestled between the Blue Ridge mountains on the east and the Alleghenies on the west, it was settled originally by Germans and Scotch-Irish. Their influence persists today and the thrifty Mennonites retain many of their centuries-old customs.

Like No Other • The valley is like no other Virginia market. Its relatively small cities are connected by good highways and almost continuous strung-out areas known in the valley as the “rurban” population. Rurbanites live outside central cities on large lots ranging from a half-acre to 25 and 50 acres. They’re loose-jointed suburbs with houses getting closer every year. Some day it will be built solid from Staunton to Winchester, Shenandoah boosters predict.

Rockingham county has 40,485 inhabitants (1960 census) and another 12,000 live in Harrisonburg, county seat. But Harrisonburg is the shopping center for an area of 100,000, according to Darcy P. Davis, president of Rockingham County Development
Corp. This agency both competes against and cooperates with Staunton (22,232) and Waynesboro (15,694) in the aggressive drive to industrialize the area. The latter two cities are located in Augusta County, which has another 37,363 people by the last census count.

The basic nine-county Shenandoah Valley market area has a total population of 280,000. This includes Charlottesville, which also has trade ties with Richmond though only about 20 miles east of Waynesboro through a pass in the Blue Ridge.

**Mild Climate** The contiguous Shenandoah Valley market of Virginia starts at Winchester (15,110) in northwest Virginia. By geological standards it actually begins at Harpers Ferry, W.Va. For a 145-mile stretch southwestward from Winchester to Natural Bridge the valley ranges from eight to about 30 miles wide. Its climate is mild by northeastern standards, with easy-to-take summers and winters.

New Market, Luray, Woodstock, Front Royal, Strasburg and Lexington are tied to the Harrisonburg-Staunton-Waynesboro economy. Interstate highway 81 will improve access and Piedmont plans to expand tri-cities airport service.

Descendants of the early settlers are honest, hard-working people, according to Fred O. Funkhouser, president of Home Loan & Thrift Corp., in Harrisonburg. This financial house, with resources of $13 million compared to $100,000 a quarter-century ago, has the astonishingly low loss rate of 1/13th of 1% on its loans.

Staunton has a Westinghouse plant with 1,200 employes and an A.S.R. Products plant (blades, razors) with 1,000. It has a garment plant, Staunton Mfg. Co., employing 1,000, with expansion under way. Waynesboro is industry-minded. DuPont has 3,000 employes, General Electric 1,200 and Reynolds Metals makes water-soluble plastics at Grottoes (400 employes). Staunton colleges include Mary Baldwin and Staunton Military Academy.

**College Town** Madison, Bridge- water and Eastern Mennonite colleges are located at Harrisonburg. County industries include Rockingham Poultry Marketing Cooperative, 450 employes; Merck & Co., chemicals and animal medicines, 650; National Fruit Products Co., H. D. Lee, Walker Mfg. (mufflers), Victor Metal and others.

The area around Rockingham County was picked by the U. S. Public Health Service as "Anywhere U.S.A." for its extensive series of studies into accident prevention. Harrisonburg is clearing its substandard housing with federal aid. Waynesboro and Staunton have modernizing programs.

Shenandoah Valley Meat Packers processes 75,000 hogs and 9,000 cattle in a year. Its record was 22 miles of hot dogs produced in a week. National Fruit Products (White House apple products) employs 300 in season. One plant turns out 375,000 gallons of apple vinegar a year. Chickens and turkeys processed in the Valley on Monday are marketed Tuesday in New York.

You can't worm your way into the Shenandoah Valley by buying Washington and Richmond.

You must buy WSVA-TV, Harrisonburg, Virginia

Melpar Inc., in northern Virginia, employs 3,000 workers. It specializes in rocketry and space vehicles and is a big government supplier.
Northern Virginia: more than a bedroom

Northern Virginia has almost doubled its share of the state of Virginia's population in the last decade. This area of 550,000 people now comprises 13% of the state's total compared to 7% in 1950.

As a market Northern Virginia divides its allegiance and dollars among the District of Columbia, its own merchants and the state government at Richmond. Though part of the Washington metropolitan area, Northern Virginia businessmen boast of the site of an expansion of its new Falls Church plus Arlington and Fairfax counties are assuming basic traits of an economic unit. They dispute the claim the southern side of the Potomac is purely a Washington bedroom.

Economic growth has been phenomenal. Eighty thousand homes have been built in a decade as population has doubled. These homes are one-fourth of all those built in the state.

Two big industrial employers are scientific plants—Melpar with 3,000 employed and Atlantic Research, 1,800. Melpar had $26.1 million in sales in the first nine months of 1961, with orders going up as the transition is completed from manned aircraft to space vehicles. The company is a subsidiary of Westinghouse Air Brake Co. Atlantic Research, extensively in rocketry, has gadgets all over almost every space vehicle that leaves the earth's surface, including Project Mercury. Jansky & Bailey, communications engineering firm, is a subsidiary.

Metropolitan Washington's reach extends into Fredericksburg, 13,639 population, 55 miles to the south, and to Warrenton, Leesburg and scores of other communities.

The Northern Virginia work force consists of 94,400 non-federal workers, 92,325 who work for the government in the area (plus non-federal workers who commute to Washington) and 9,850 self-employed.

The population is expected to reach 750,000 by 1970. Among new facilities will be Dulles airport (world's largest), Central Intelligence Agency and Army Engineer Center.

LYNCHBURG NOW METROPOLITAN AREA

Manufacturing center home for 100 industrial plants

The hills of Lynchburg literally shook with joy last spring when the U. S. Bureau of the Budget included the central city and neighboring counties of Amherst and Campbell in the list of metropolitan areas.

For Lynchburg had passed the 50,000 point (54,790), according to the U. S. Census. The metropolitan area had 110,701 when the census was taken in 1960, an increase of 14.2% over 1950, giving the market national recognition.

This hilly metropolis in the geographical center of Virginia celebrated its 175th anniversary last Oct. 12, recalling the day when John Lynch started a ferry crossing at what later became the site of the city. Out of the tobacco and iron-mining industry of that era came the present manufacturing center.

The newest in industrial science is found in Lynchburg. The atomic muscle that powers the new carrier Enterprise came from Babcock & Wilcox, a plant employing 800 in its two units. General Electric has 2,500 employees in its communication products and rectifier components plant, and an expansion program is under way. Craddock-Terry has 2,500 people turning out shoes.

Lynchburg Foundry, 1,100, and Lynchburg Hosiery Mills, 800, carry the municipal name to customers around the nation. Glomar Pipe & Foundry has up to 1,000 at peak employment. H. K. Porter Co., Imperial Battery, Weyerhaeuser-Southern, Mead Corp., E. J. Lavino, Blue Buckle, Vac-U-Sel Rectifier, Components Mfg. Corp., N&W Industries—these are other majors in the Lynchburg industrial lineup.

The 100 industrial plants have a payroll of around $80 million this year, it's estimated, with around 20,000 employed.

Business has been good in 1961, judging by local indicators. Bank debits were $713 million for the first nine months of the year, up 4.4% from 1960. They were $913 million in 1960, up 65% in a decade. Three times as many new families moved into the city compared with 1960. New construction includes a 232-unit $21/2 million apartment and a million dollar downtown motel.

Among institutions of higher education are famed Sweet Briar and Randolph-Macon, both women's colleges. In the outlying hills are Natural Bridge of Virginia and Peaks of Otter on Blue Ridge.

LYNCHBURG LEADS THE SOUTH ATLANTIC AREA

Sales Management has listed Lynchburg as a preferred city of the South Atlantic area for the 24th time in 25 months.

*Source: Lynchburg Telepulse, Dec., 1960, Monday thru Saturday, 7:30-11:00 P.M.; Sunday, 6:30-11:00 P.M.
Ride Parkway. Historic buildings and Appomattox, where Gen. Robert E. Lee surrendered, are tourist attractions. Important markets within an hour or two motoring range are Roanoke, Charlottesville, Waynesboro, Danville and Martinsville. Richmond is 110 miles to the east.

Historic Lynchburg is a pace-setter for Virginian industry.

Monticello, home of Thomas Jefferson, attracts thousands of tourists every year to Charlottesville. There are many other historic spots in the area.

University, industry enrich Charlottesville

SCHOOL MEANS $16 MILLION, PLANTS $17 MILLION YEARLY

Nothing can happen in the waning weeks of 1961 or early 1962 that can upset the joy that reigns in Charlottesville, home of U. of Virginia. Civic tranquility is assured by an important economic, social and athletic event that happened Nov. 25. That was the day U. of Virginia beat mighty Maryland, a major football upset of the season.

The crowded stands brought big money into Charlottesville. The university means $16 million annually to the city, based on a $9 million plus payroll and the money spent by 4,000 students. Other outside money comes from 750,000 tourists who visit Monticello and other historic spots. They spend at least $7 million a year, figuring on a conservative estimate of less than $10 per tourist.

Gateway City - Located 70 miles northwest of Richmond in the rolling Piedmont, Charlottesville has a city population (1960) of 29,427 plus another 30,969 in Albemarle county or a total of 60,396. In addition Fluvana, Buckingham, Louisa, Orange, Madison, Greene plus parts of Nelson, Augusta and Rockingham counties lie within the trading area—125,000 people within 30 miles, according to local businessmen. The city is a gateway through the Blue Ridge mountains to Waynesboro and the Shenandoah Valley.

The industrial payroll runs $17 million a year. Five major industries added in the last decade have doubled their plants. Frank Ix & Son rayon mill employs 700; Charlottesville Woolen Mills 150; Sperry-Piedmont scientific instruments 800 and U. S. Instrument 400. Neighboring Ponzet has Acme Visible, 500 and Continental Baking 1,300.

Among cities and towns feeding the market are Culpeper, Madison, Ruckersville, Orange, Gordons and Stanardsville.

Danville mills, leaf market are important

Danville, southern border city, asserts two claims to world fame—the world's largest single-unit textile mill, Dan River Mills with 10,000 employees, and the world's largest tobacco auction market. A single-unit mill takes raw cotton and processes it into finished material. Employment runs around 10,000, payroll $33 million.

The tobacco auction runs from Sept. 15 to Dec. 1. At the end of November it appeared the market would sell over $41 million worth of leaf. The P. Lorillard plant, the city's second largest employer, has a new $7 million facility and employs 1,600. Disston Div. of H. K. Porter Co. has a new tool plant and the new Corning Glass Co. has an employment complement of 300.

Danville is a basic industrial community located in an agricultural area. Its 1960 U. S. Census population was 46,577. The trading area within a 30-mile radius is described as having a population of 300,000. Martinsville and South Boston are among nearby communities as well as Reidsville, N.C., 17 miles away, and other Carolina markets. Danville has annexed areas in Pittsylvania county as population has spread, giving the city a growth rate of 32.8% in a decade.

Agricultural income is increasing, especially beef cattle. Grain and flour contribute to the economy.

One of the favorite tourist spots is a marker showing the place where the "Wreck of Old 97" occurred Sept. 27, 1901, an event that lives in railroad history and is immortalized by a song of the same name.

This is a typical tobacco auction at one of the Danville warehouses.
company for national syndication are “Vignettes by Vincent,” a series of three-minute radio programs currently scheduled on the CBS Dimensions program; Video Vignettes by Vincent; and Sports with Bud Collins, a series of three-minute sports editorials.

Extended 60 days • Screen Actors Guild and Artists’ Managers Guild have agreed to extend their present contract from Dec. 1, 1961, to Jan. 31, 1962, for their mutual convenience, while negotiations continue for a new contract.

Trujillo interview • WLBY-TV, new station on Miami ch. 10, carried an exclusive interview with Hector Trujillo after he fled the Dominican Republic. The interview, carried on the station’s 7 and 11 p.m. reports, was conducted by Alberto Gandero, Latin American program director.

Palm Springs golf • ABC-TV has acquired the tv rights to the third annual Palm Springs golf classic to be held Jan. 31-Feb. 4 in the California resort area. Five country clubs will participate in the classic: Bermuda Dunes, Eldorado, Indian Wells, Tamarisk and Thunderbird. ABC-TV plans to broadcast the tournament live from Indian Wells, Saturday, Feb. 3, 5-6 p.m., and from Bermuda Dunes, Sunday, Feb. 4, 5-6:30 p.m. Martin enterprises of Chicago sold the event to ABC-TV. Last year CBS-TV covered it.

Children’s series • Robert Saudek Assoc. has acquired television rights to three Random House children’s book series and reports it plans to produce one or more weekly programs based on the books. The properties are the Landmark series (including 150 titles dealing with history, biography and contemporary affairs); World Landmark Books and All About Books.

Add 12 • The Right Thing to Do, featuring Amy Vanderbilt, etiquette authority, has been purchased by American Greeting Card Co. for use in 12 radio markets. The series, created and produced by Alan Sands, consists of 130 episodes and has been sold in 25 markets.

Ziv-UA’s ‘documatic’ • A new half-hour program, Keyhole, was placed into distribution by Ziv-United Artists last week. It will explore off-beat subjects, such as the life of a private eye and a Hollywood photographer. The series is produced and narrated by Jack Douglas. Called a “documatic,” Keyhole will devote each episode to a single subject. Starting dates of the series will be in January.

Filmaster-ITC deal • Independent Television Corp., New York, has reached an agreement in principle to distribute Filmaster Inc.’s The Beachcomber series. Filmaster, which has sold the series in 119 markets, plans to concentrate on the production of series for network sponsors. It currently produces Death Valley Days for United States Borax in selected markets, as well as The Beachcomber. The agreement, when signed, would give ITC domestic and worldwide rights to the series.

Miller on tv • Playwright Arthur Miller’s only published novel, “Focus,” will be dramatized as a full-hour special on NBC-TV next year. An NBC public-affairs presentation, it will be produced in cooperation with the American Jewish Committee’s Institute on Human Relations.

New drama series • Our Five Daughters will start on NBC-TV Jan. 2 (3:30-4 p.m. EST). The program will replace From These Roots. Five Daughters will be produced by Eugene Burb and directed by Paul Lammers.

Astronauts • Screen Gems, New York, has announced it is preparing a new comedy series, Astronauts, for the 1962-63 season. The series will depict the comical experiences of a pair of young men undergoing the hazards and rigors of astronaut training. Robert Sparks is the producer.

Paramount plans tv cartoon

Paramount Pictures Corp. has signed with the Independent Television Corp. to produce a 3½-minute color cartoon series, *Kozmo—the Kid From Mars*, it was announced last week by Abe Mandell, ITC vice president in charge of sales and administration.

The series will be financed by ITC, which also will have world-wide distribution rights. Ashley-Steiner Inc., ITC’s network representative, will be in charge of network sales for the cartoon series. Paramount has produced many animated cartoons for theatrical use, which later were sold to television (Popeye; *Casper, the Friendly Ghost; Little Lulu*), but *Kozmo* represents the company’s first cartoon series to be made specifically for tv.

**Part of CLGA okays UA pact**

An agreement between the Composers & Lyricists Guild of America and United Artists was approved by the Guild’s western membership at a meeting Nov. 21, and similar approval is expected from the eastern members. The contract is substantially the same as those signed last spring with the major motion picture producers and in September with Universal-International, according to Leith Stevens, CLGA president. The contract with the major studios, which runs through May 31, 1964, provides for minimum wage scales of $325 a week for term contract composers and lyricists and $350 for those employed on a week-to-week basis (Broadcasting, May 29). The UA pact became effective Dec. 1 and runs through Nov. 30, 1964.

**Freedman sets DuPont series**

A series of live, original dramas will be produced by Lewis Freedman for NBC-TV’s *DuPont Show of the Week* (Sun. 10-11 p.m. EST) beginning in January.

Mr. Freedman produced more than 40 dramas for the NTA Play of the Week series. Last summer, he produced and directed NBC-TV’s *Great Ghost Stories* series.

The DuPont show will continue to present creations from Donald B. Hyatt, director of NBC Special Projects and Irving Gitlin, executive producer, creative projects, with NBC News & Public Affairs. BBDO is DuPont’s agency.

**FATES & FORTUNES**

PKL as media buyer on Burlington Industries, Exquisite Form, Xerox, Dutch Masters cigars and *New York Herald-Tribune* accounts. Mike Sloan, account executive, Ogilvy, Benson & Mather, New York, joins PKL as account executive on Dutch Masters cigar account.

H. Victor Grohmann, president, Needham & Grohmann Adv., New York, elected chairman of trustees of American Assn. of Advertising Agencies’ group insurance plan, succeeding J. Lewis Ames, formerly of Erwin Wasey, Ruthrauff & Ryan, New York. Mr. Ames had been chairman since plan was started in 1951.

Eugene H. Blanche joins marketing staff of Lambert & Peasley Adv., New York on Listerine antiseptic unit. He was in sales staff of William S. Merrell Co., Cincinnati pharmaceutical company.

**BROADCAST ADVERTISING**

James C. Cowhey, vp, D’Arcy Adv., St. Louis, appointed director of agency’s new business activities. Mr. Cowhey began his advertising career in D’Arcy’s outdoor department in 1938, and was later named assistant manager of that department. He served successively as research assistant and account executive, and in 1956 was named manager of agency’s Detroit office. Mr. Cowhey left D’Arcy in 1958 and became advertising and sales promotion director of Chrysler and Imperial divisions of Chrysler Corp., Detroit. He resigned this post in 1960 to return to D’Arcy as vp.

Edward Lasker, partner in Hastings & Lasker, Los Angeles law firm, elected director of Philip Morris Inc. Mr. Lasker was first vp and general manager of Lord & Thomas Adv., New York, predecessor agency to Foote, Cone & Belding.

Thomas B. Kerr, advertising manager, Borden Foods Co., named director of advertising and promotional services, succeeding Paul L. Gabriel, who becomes assistant marketing manager of milk-based Borden products.

Richard A. Getz, president, Getz & Sandborg, Beverly Hills, elected board member of Western States Advertising Agencies Assn. He will continue to serve as chairman of WSAAA membership committee.

Ron Krueger, formerly with TV Stations Inc., New York production firm, elected vp for radio-tv, W. Craig Chambers Adv., Pittsburgh. Earlier, Mr. Krueger was midwest sales manager for Banner Films.

Richard L. Seaton, west coast representative of Washington State Apple Commission, handling promotion, publicity and field merchandising in Seattle and Los Angeles, joins the McCarthy Co., Los Angeles advertising agency, as merchandising director.

Richard Frank and Ed Hakim join Block Drug Co., Jersey City, as product advertising managers. Mr. Frank formerly served as account executive with Ben Sackheim Adv., New York, and Mr. Hakim with Young & Rubicam, that city.

Charles E. Loizeaux named director of marketing services, Buchen Adv., New York.

Les Towne, media director, Smith/Greenland Co., New York, appointed to account service department of agency.

Charles Fox, art director, Young & Rubicam, New York, joins New York office of Buchen Adv., Chicago, as director of creative services.

Douglas G. Kennedy, art director at Charles Bowes Adv., Los Angeles, joins Donahue & Coe, that city, in similar capacity.

Dean C. Crebbin, formerly with Maxwell Assoc., Bala Cynwyd, Pa., joins N. W. Ayer & Son, Philadelphia, as copywriter.

THE MEDIA

Sherwood R. Gordon, president of KS.DO San Diego and KBUZ-AM-FM Phoenix, assumes general management of KS.DO following resignation of Joe Miller as station manager. Peter A. McMathon, senior sales executive, becomes director of pr of KS.DO and will assist Dwight Case, general sales manager of the Gordon Group, with local and regional sales development. Roy Gatenby, comptroller, assumes additional duties as group director of administration. The Gordon Group has established an executive office at 2655 Hyde St., San Francisco.
James H. Schoonover, general manager, KTUL Tulsa, elected vp of Veterans Broadcasting Co. (WROC-AM-TV Rochester, N. Y., and KTHE (TV) El Dorado, Ark.), succeeding Paul C. Louther, who will supervise Veteran's public-service arrangements. Mr. Schoonover will serve as station manager of WROC.

Arden Swisher, KMTV (TV) Omaha, re-elected president of Nebraska Broadcasters Assn. Others re-elected: Bob Thomas, WJAG Norfolk, vp; and Richard Chapin, Stuart Stations, secretary-treasurer. Directors re-elected: Roger Larson, KFOR Lincoln; Max Brown, KRKN Lexington; Frank P. Fogarty, Meredith Broadcasting Co., Omaha; Harry Snyder, KHUB Fremont; and David Young, KSID Sidney (THE MEDIA, Nov. 27).

Cy Ostrop, vp and general manager, Texas Triangle Co., U. S. sales representative of XETRA Tijuana, Mexico (all-news station broadcasting in English for California listeners), today (Dec. 4) joins KLAC Los Angeles as vp in charge of sales. David Muhltstein, general operations manager of Texas Triangle, will take over Mr. Ostrop's duties there pending appointment of successor.

Edward S. Whitlock, vp and general manager, WRNL Inc. (licensee of WRNL-AM-FM Richmond, Va.), elected executive vp and Frank Soden, general sales manager, to vp and general manager. E. T. Moore, account executive, named general sales manager. Vincent Wolstenholme, chief engineer, appointed operations manager, and Jim Proffit to assistant chief engineer. Mr. Whitlock joined WRNL as sales manager in 1938, and in 1939 became general manager. He was elected vp and general manager in January 1961.

Charles H. Topmiller, president, L. B. Wilson Inc. (WCKY Cincinnati and WLBW-TV Miami), elected president and general manager, WLBW-TV (THE MEDIA, Nov. 27). DEATHS

James H. Turner, 75, founder of Turner Adv., Chicago, died Nov. 20 at his home in Kenilworth, Ill. Mr. Turner began his advertising career with Lord & Thomas in 1910.

Isidor Goldberg, 68, founder and president of Pilot Radio Corp., Long Island City, N. Y., died Nov. 23 in Mount Kisco, N. Y.

Alan Lipscott, 69, writer for Danny Thomas Show, People's Choice and Bachelor Father, died Nov. 20 in Hollywood. He and his partner, Bob Fisher, had just sold new comedy series Hooray For Love, to ABC-TV.

Arthur J. Maus, 55, engineer for 28 years, WBBM Chicago, died Nov. 25 following accident in his Evanston, Ill., home.

John Coleman, 71, former Chicago area syndicated radio and newspaper columnist, died Nov. 26 at his home in Palm Springs, Fla. His weekly radio program was Meeting of America. Mr. Coleman was three-time winner of Freedom Foundation Valley Forge medal.

Vic Barnes, 60, former newscaster with WCHL Chicago and more recently with San Francisco Examiner, died of heart attack Nov. 19. He was first president of Chicago Editorial Assn.

William E. Best, 45, assistant to director of information services, KNX Los Angeles, and former manager of Los Angeles Bureau of United Press, died Nov. 27 after brief illness. Before joining CBS-owned station, Mr. Best was partner in pr firm of Best & Fine.
KGBT-TV's rebels yell with a Mexican accent

Saving Confederate money need not be as idle an occupation as it may sound; especially if there is a KGBT-TV Harlingen, Tex., representative around. Confederate bills, Mexican pesos, and Texas cigarillos have come staples in the station's current market presentation.

The promotion is designed to counter a lack of market understanding that many "medium-size" market stations feel national advertisers are inclined to have. And to make the lesson easier to understand, KGBT-TV representatives will be offering media people whom they encounter an opportunity to use their Confederate money and Mexican pesos.

The CBS-TV and ABC-TV outlet plans to offer invitations to lucky people whom their men meet to visit Harlingen, on the coast of the Gulf of Mexico, for a couple of days, and then to make available its suite in Mexico City for a few more days. The pesos can be used in Mexico City to buy whatever one feels he needs; the cigarillos can be smoked. And of course, everybody knows that Texas uses Confederate money.

Air Force praises WMGM for recruiting help

WMGM New York has been credited with helping the U.S. Air Force double its quota of male applicants for its officer training program in the greater New York area during the month of November.

Lt. Col. Stevens Keller said WMGM's month-long campaign was "an outstanding public service effort ... one that we hope will set a pattern for the radio and television industry throughout the country." Final stage of the campaign came when WMGM's Bob Cullen broadcast for three hours from the cockpit of an X-15 rocket plane on display in Times Square.

In addition to the male applicants, five times the quota of female applicants were recruited.

Tommy Seven carnival

With a new toy as the price of admission, over 15,000 people packed Madison Square Garden to see the "Tommy Seven Christmas Toy Carnival," a two-and-a-half-hour circus show sponsored jointly by WABC-TV New York and the New York Fire Dept.

The show launched a two-week drive in the New York metropolitan area to collect new toys for needy children and to create an awareness of fire prevention. Firemen collected a new toy from each person entering the Garden. Officials estimated that nearly 1,000 people were turned away.

‘Camouflage’ promotion

Jerry Hammer Productions, New York, producer of ABC-TV's Camouflage game show, is launching a promotion during the Christmas season which will enable veterans hospitals through-out the United States to win color tv sets, phonographs, tape recorders and other electronic equipment. Contestants appearing on the weekday Camouflage between Dec. 1 and Jan. 1 will be competing for themselves as well as for veterans hospitals. Their winnings will reflect the number of gifts to be contributed to the hospitals.

There's more to a title than just plain sound

A lagging United Fund campaign provided the motive; a successful, Broadway-bound musical gave the idea; and an enterprising air personality of WIP Philadelphia carried to fruition a plan to help the city's charity drive over the top.

Working closely with David Merrick, producer of "Subways Are For Sleeping," the Carol Lawrence-Sidney Chaplin musical, the Philadelphia Transportation Co. and United Fund officials, WIP began a saturation spot campaign, asking listeners to complete the statement, "People should give to the United Fund because..." in 25 words or less. As contest prizes, the station offered free tickets to the musical.

Further to underscore the United Fund's need, and as a tie-in with the show, WIP personality Marty O'Hara began a 24-hour residence in a private subway car sided in a busy station. Mr. O'Hara interviewed subway travelers, eliciting their comments on the value of contributing to the United Fund.
and talked with visiting celebrities who stopped by his new home. Visitors to the WIP car were given coffee and doughnuts, and serenaded by a marching five and drum corps that somehow managed to be heard above the strident screams of the angry subways.

**Drumbeats...**

Polka partners • Jay Jay Records Co., Chicago, and WJRT (TV) Flint have gotten together to produce a disc entitled “WJRT Polka.” The composition, written by Jock Check and played by the Michigan Dutchmen band has been recorded on a 45 r.p.m. disc. The Dutchmen appear weekly on the station’s Michigan Polka Party telecast, and have recorded polka and waltz albums for the record company.

**Spots scheduled • An advertiser’s dream come true! That’s what it was for KPIX (TV) San Francisco when the Westinghouse outlet was forced by popular response to place newspaper advertisements carrying the schedule of its station promotional spot announcements. The appearance of comedienne Phyllis Diller in a series of seven, one-minute spots prompted requests for the time schedule. The promotional series was conceived and produced by Miss Diller, A. H. Christensen, KPIX (TV) promotion manager, and program manager Ray Hubbard.

petition for review of examiner's ruling which refused to quash KWK's notice of intention to take depo-sitions. In connection with discussion on depositions, commission stated that "it is not intended to imply that KWK should now promptly and reason-ably give notice of any depo-sitions it wishes to take, the examiner may not au-thorize the taking of such deposition and give consideration there to in his determina-tion of a new date for the recommence-ment of hearing." Action Nov. 17.

By order, commission denied petition by Crawford County Bcstg. Co., Bucyrus, Ohio, for reconsideration of hearing order in am proceeding in Docs. 14056 et al and for dismissal of application of New En-terine, Bucyrus for failure to comply with requirements of Sec. 301(a) of Communi-cations Act and Sec. 1360 of commission's rules concerning signatures of applications by applicants under oath or affirmation. Commission stated that signature was veri-fied by notary public who attested that application was subscribed and sworn to by Dr. Emerling. Petition for reconsideration of hearing order in am proceeding on behalf of the facsimile, notary's public attestation renders latter invalid. Action Nov. 17.

Eating Need Not Be A Problem for Chemists

We dairymen certainly believe there is much that is favorable to be said about the efforts being made to encourage the people of this country to select their foods on the basis of providing a daily diet that is well balanced in terms of good nutrition. However, it seems to us that some people tend to carry this idea to unnecessary extremes.

Judging by some of the more rabid food and drug advertising appearing these days, it would appear that we are all expected to take courses in chemistry, and perhaps physics as well, in order to select what we are supposed to eat.

If present trends continue, we may expect our favorite waitress in the corner restaurant to be asking us if we want our polyunsaturated acids boiled or fried, and in what proportion to amino acids do we want the lipids.

The way things are going, we could expect to hear the waitress holler back to the kitchen something along this line: "Scramble two vials of polyunsaturated acids with half an ounce of triglycerides. Mix in four portions of high grade amino acids, one portion of all purpose vitamin pills, and make it look like a T-bone steak."

It's surely miserable enough to have to read and to hear about medicine when one is ill, but we are still old-fashioned enough to believe that medicine ought to be prescribed by the physicians who have spent years being educated in how to care for the sick. Medicine-prescribing certainly is not a job for food advertisers, and it can certainly prove to be disastrous for people who are really ill. Sick people need the help of doctors of medicine and ought to ignore the pseudo-doctors of bewitching.

There is no good reason why perfectly healthy people should have to be exposed to all these efforts to take the joy out of a good meal. This is especially bad when so many of the recommendations being made these days are nothing more than the latest fantastic ideas of food faddists and quacks who capitalize on the general public interest in good health in order to make a fast buck. Much of the information being offered to people today is based on research work that is far from conclusive and which certainly provides no firm basis for making general recommendations about what people should be eating or doing.

The time has certainly arrived when we must apply more intelligent appraisal to the kind of information which is being passed along to the public which is eager to learn what should be done to enjoy good health. Health news, in advertising or editorial form, deserves very careful consideration. Misinformation can mislead many people. The mass media, to which so many people look for guidance, have a very important responsibility to check facts.

Food processors and distributors also bear this same measure of responsibility in the kind of information which is presented to the public about foods. It would be most unfortunate if the high level of good health enjoyed by most people in this country today were to be endangered by any more failures on the part of food distributors and the mass media to be factual.

We dairymen pledge ourselves to continue our support of nutrition research which seeks to provide facts, and we further pledge that we will strive to present these facts to the American people.

OUR RESPECTS to Wilmer C. Swartley, senior vp, Westinghouse Broadcasting Co.

Broadcasting cannot abstract itself from the community

The accent now being placed on public affairs programming is bringing Wilmer Cressman Swartley's pioneering work in this field to general industry notice. He has been involved with it for some 23 years now, as long as he has been in broadcasting.

Mr. Swartley is the senior area vice president for Westinghouse Broadcasting Co., in charge of WBZ-AM-FM-TV Boston and WBZA Springfield. He has devoted his entire business career to community relations and awareness of community needs. He has seen his philosophy reap rewards, bringing success to himself and to WBZ-TV, the station he has headed for 15 years.

Mr. Swartley more or less stumbled on the opening that has made him a "pr man's pr man." During his college days at Cornell, he was a mechanical and industrial engineering student, following a scientific bent inherited from his father, he says. His schedule included a number of industrial relations courses in which he began to take more than a passing interest.

Engineer to Salesman = When Westinghouse Electric came to Cornell to recruit graduating engineers for its sales training courses, Mr. Swartley was struck by Westinghouse's adult education program, particularly as it affected community relations, and he joined the company.

He quickly caught the eye of William G. Marshal, vice president in charge of industrial relations (there was no public relations staff at the time), who made him a staff assistant in the department. Mr. Marshal's influence has been instrumental in propelling Mr. Swartley upwards.

In 1936 Westinghouse worked out a plan for giving junior executives in-shop training that would accelerate their advancement in, and service to, the company. Mr. Swartley was the second person under the program to move into the president's office, where he got the total view of the firm that the plan was supposed to give. From this vantage point, he saw and became interested in Westinghouse's broadcasting division.

He mentally devised a plan by which he could hitch his public affairs and community interests to the company's broadcast properties (WBZ Boston, WBZA Springfield, KYW Philadelphia and WOWO and WGL, both Pt. Wayne).

At the same time that he was thinking in terms of broadcast management and program development, he began (under the name of Bruce Carlton), to do a number of dramatic radio shows for WCAE and KDKA, both Pittsburgh. One night, Walter Evans, vice president of Westinghouse Broadcasting division, came in to KDKA and saw Mr. Swartley taking part in a dramatic show. He asked Mr. Swartley if he would undertake some special broadcasting division assignments, including a position on the committee handling KDKA's 17th anniversary. Mr. Swartley said he would, thus making his first "official" appearance as a member of the Westinghouse broadcasting team.

Salesman to Programmer = In 1938 (at age 30) he was named general manager of WGL and WOWO, and given an opportunity to implement the programming theories he had devised earlier. It took him just three years to establish the stations as forces in the community. He developed programs featuring local newspaper editors with analyses of the news, developed close ties with the chamber of commerce, the Indiana department of education, the Hoosier state's governor, Fort Wayne's mayor, and other civic leaders.

After two years in Fort Wayne, Mr. Swartley was transferred to Boston, to WBZ and WBZA in 1940.

His ROTC commission was activated in 1941, detouring his broadcasting career until November 1945 when he was discharged from the service as a major in the ordnance department.

He returned early in 1946 to Westinghouse, and was immediately handed the job of developing WBZ-TV which had been granted a construction permit that year. He was given the title of general manager. In 1955 he was promoted to area vice president.

Mr. Swartley was born in North Wales, Pa., in 1908. In 1926, he graduated from Philadelphia's famed William Penn Charter School, and went on to Cornell U. He was graduated in 1930 with a degree in mechanical engineering.

Programmer to Public Servant = He is married to the former Eleanor Mc-Knight (his nurse during a tonsillectomy) and has a daughter, Ariel, 15. The Swartley family lives in a modest 10-year-old colonial style house in West Newton, 10 miles from Boston.

Mr. Swartley doesn't have too much time for hobbies, but he is able occasionally to crank up his movie camera. His favorite subject: Ariel, whom he has photographed in Nantucket (where they have a summer place) during the past decade and has a 40 minute feature film to show for his efforts. He also claims to have the shiniest and best surf casting rod in Nantucket, but admits wryly he can't catch any fish.

To those who know him, it's a wonder Mr. Swartley can get to Nantucket even two weeks a year. He's a devout joiner who always seems to have a project in the works. He is the immediate past president and director of the Massachusetts Broadcasters Assn., past director and vice president of the Assn. of Professional Broadcasting Education, member of the Boston Ad Club, chamber of commerce, Broadcasting Executives Club, the Algonquin Club, the Governor's Industrial Advisory Committee and is a member of the board of trustees of the Newton-Wellesley Hospital. In addition, he has served on some 15 other committees.

The combined staffs of WBZ-AM-FM-TV have followed Mr. Swartley's example, and now list memberships in 172 different organizations, following the maxim that if you intend to program for a community you have to know that community.

His personal broadcasting philosophy, which has been translated into concrete terms in the programming and general policies of the Westinghouse stations he has headed, centers around determining and then fulfilling community needs. To perform these two successive actions effectively, Mr. Swartley feels that the station must, first, "believe strongly in creativity"; and, second, "believe that good public service programming will deliver an audience, and that it will 'pay off' for a station."

NBC's 35th

We can think of several reasons why NBC chose Beverly Hills as the site of this week's birthday party and affiliates convention at which the network will celebrate its move into first place in audience and billing.

One is that Beverly Hills is a nice place in which to celebrate anything.

Another is that NBC has large and impressive facilities there and a cluster of glittering talent available to entertain the affiliates.

Still another is that Beverly Hills is comfortably distant from Washington. In the light of recent experiences in Washington, it is a wonder NBC did not choose to hold its party in Hong Kong.

It was almost exactly five years ago, on the eve of a similar NBC celebration in Miami, that NBC and its parent RCA were sued by the government in a civil antitrust action that was to lead to a consent decree under which the network agreed, among other concessions, to divest itself of its Philadelphia stations. That decree in turn was to lead to a complicated station exchange agreement with RKO General that the FCC has set for a major hearing.

Today (Dec. 4) NBC and the two other television networks are scheduled to make a defense against still another attempt by the government to complicate their business practices. They are to participate in arguments before an FCC that is threatening to reduce option time or eliminate it altogether.

It would take this entire page to summarize other government problems that all networks and all broadcasters now face. To look only at those problems would lead to the assumption that broadcasting is replete with rogues and thieves. It strikes us as a grotesque anomaly that the record of accomplishments that NBC will display to its affiliates this week is a record of service to the American public unmatched by any other corporation of any kind.

It was NBC that originated regular radio network operations 35 years ago. NBC was the leader in the early development of television networking. The measure of the debt the American people owe to NBC is the number of hours of enjoyment and enlightenment that the network has broadcast since Nov. 15, 1926. That is a big debt and we do not think it can be paid by government harassment.

Unfair, false & misleading

All broadcasters have been put on notice by the FCC that they are expected to become agents of the Federal Trade Commission in a kind of advertising policing more suited to Moscow than to Washington.

The FCC has announced an intensified system of cooperation with the FTC that is plainly intended to euche television and radio stations into throwing advertising off the air before the advertising has been subjected to an orderly test under formal procedures in the FTC and the courts. From now on all stations will receive—reportedly at monthly intervals—the FTC’s “Advertising Alert,” a leaflet describing FTC investigations, complaints and orders. The FCC says broadcasters ought to be guided by it.

No broadcaster who places any value on his reputation will knowingly broadcast advertising that misleads or perpetuates a fraud. Hence no reputable broadcaster would quarrel with a system of cooperation in which the FTC alerted him to advertising that had been proved to be misleading or fraudulent.

But the FCC, in cooperation with the FTC, is now asking broadcasters, at least by implication, to reject advertising before it has been proved misleading or fraudulent. It is asking broadcasters to do the FTC’s work without the benefit of the FTC’s resources and without the protection to the advertiser that formal FTC procedures provide.

It is the history of the Trade Commission that far more complaints are filed than cases won. The FTC itself dismisses some complaints. When it does issue cease and desist orders, the orders are infrequently obtained by the appellate courts. As we have observed in earlier editorials, an FTC complaint is no more a proof of guilt than a poison-pen letter.

Yet under the new system of cooperation between the FCC and FTC the broadcaster will be deluged with reports of mere complaints and mere investigations. What is he to do? If he rejects the commercial of an advertiser under investigation and the advertising is eventually cleared by the FTC, he will have lost business and unfairly closed a route of public access to the advertiser. If he takes the risk of carrying the commercial and the advertising is eventually ruled illegal by the FTC in a decision confirmed by the courts, the broadcaster faces disciplinary action from the FCC. In these circumstances, the natural tendency will be for broadcasters to reject more quickly than they risk.

It is not a tidy way to run a democratic government.

Rubles and kopecks

PITY the poor Soviet Union. It spends billions (where we spend millions) in propaganda claiming superiority in everything military, scientific or economic. It spends an estimated $125 million to jam the Voice of America broadcasts—more than the total appropriation of $115 million for all of the activities of the U. S. Information Agency.

But Russia can’t afford to increase its small contribution to maintain the United Nations for reasons that are too fuzzy to understand in the light of its boasts.

The Soviet Union pleaded poverty when confronted with an increase in assessment of from 13.62 per cent to 14.98 per cent of the UN budget for 1962-64. The United States now pays 32.5 per cent and the proposal is that this be trimmed slightly to 32.02 per cent.

Certainly these facts should impress the new and developing nations beingromanced so assiduously by the Communists who would give them a more abundant life.

The USIA could do a better job of informing the world of the facts if Congress would give it the appropriations it needs. A starting point might be a sum equal to what the Soviet spends in jamming the Voice transmissions.
