The Johnstown Tribune-Democrat Stations
"the St. Louis Story"

... is the latest project of the award-winning KTVI Public Affairs team. Locally conceived, written and filmed, "the St. Louis Story" is a twelve-part documentary, exploring municipal, social and civic organizations at work in the growing St. Louis area. From special schools for exceptional children to the complexities of air terminal operation, each program will document growth, change and people. Once a month in prime time, St. Louisans see their city from a fresh point of view. "The St. Louis Story" is another example of KTVI programming serving the viewer by adding dimension to the city in which he lives.
KRLD-TV continues its long-established pattern of dominance in the Dallas-Fort Worth market... The NSI Average Week & Four-Week Cumulative Report for August, 1962, shows that Channel 4 is 22.3% ahead of Station B in Homes Reached, 52.8% ahead of Station C, and 119.6% ahead of Station D.

This is conclusive proof that your ad dollar goes further when you buy KRLD-TV. Your Advertising Time Sales representative will be happy to offer a schedule of dominance for YOU.
KSYD to Harron?

Negotiations reportedly are under way for purchase of KSYD-TV Wichita Falls, Tex., by Paul Harron and associates. Mr. Harron is principal in WKTV (TV) Utica, N. Y., and president of World Broadcasting System, Philadelphia, radio programming service. Although confirmation was unobtainable, price being talked for KSYD-TV was said to be in $2.2-2.4 million range. Station is on ch. 6, CBS-TV affiliate owned by KSYD Television Co., Sidney A. Grayson, president. Hamilton-Landis reportedly is broker.

Baltimore hearing?

Pleased over results of Chicago local tv programming hearing, FCC staff is prepared to recommend new hearing in three-station eastern tv market. FCC has not yet been consulted but will be asked to approve hearing in Baltimore. Three stations there are WBAL-TV (owned by Hearst papers), WJZ-TV (Westinghouse Broadcasting Co.) and WMAR-TV (Baltimore Sunpapers).

Major-market pay-tv

Stepped up activity in pay-tv, particularly by wire, is predicted in wake of last week's decision of Arkansas Supreme Court ordering Southwestern Bell to supply lines for pay-tv, using International Telemeter system in Little Rock. Although further appeals by theatre owners are indicated, reports in informed circles were that Telemeter immediately would pursue project in larger market—either Dallas or Houston—for wired project, working with programming groups on franchise basis and utilizing Bell lines.

Court decision also may expedite other pay-tv projects, including plan of Richard A. Moore, former president of KTTV (TV) Los Angeles, to launch major market systems in West. Now associated with him, it's learned is Paul McNamara, former Telemeter executive. Still unconfirmed is report that Edwin Pauley, Los Angeles millionaire industrialist, part owner of ch. 2 KTVU (TV) San Francisco, and part-owner of Los Angeles Football Rams, is silent partner in Moore venture.

Harpen on Harper plan

There's noticeably little talk among top national advertisers about recent suggestion of Marion Harper, head of Interpublic and chairman of 4A's, that agency compensation system perhaps ought to be changed to cut agencies in on client profits (Broadcasting, Oct. 22). One leading student of agency-client relationships put it this way in conversation at Assn. of National Advertisers convention last week: "It's not safe to say anything will never happen—after all, we're going to the moon soon. But we're a long way from being able to measure advertising effectiveness accurately enough to divide profits on the basis of it.

If any one change is evident in relationships between advertisers and agencies, it's in that question of advertiser-agency relationships—and particularly agency compensation. Few years ago compensation issue dominated ANA conventions. Leading advertisers were calling for at least review of traditional media commission system, and in self-defense 4A's members spent lot of time talking up virtues of commission method. Now shoe has changed feet. There've been some pay-system changes on individual client-agency basis, but now it's agencies who're talking out loud about further revisions. In addition to Mr. Harper's proposal (see above), 4A's President John Crichton devoted full-dress speech at ANA last week to narrow agency profits and troublesome client-relations problems, in process suggesting new changes to give extra money to agencies for handling new product introductions (see page 34).

Lee's code crusade

FCC field bureau has been monitoring commercials of stations all over country at behest of Commissioner Lee, part of his crusade to have FCC adopt commercial limitations of NAB code. He said no support was won for plan at meeting with advertising agency executives in New York (Closed Circuit, Nov. 5) but he insisted they did not flatly reject idea. He argues restrictions will help smaller stations acquire national accounts when major outlets are "sold out."

Cox to acquire 2nd catv

In final stages are negotiations for acquisition by James M. Cox interests of second catv system—9,500 connection Aberdeen, Washington facility—for about $1.5 million. Miami Valley Broadcasting Corp. (WHIO-AM-FM-TV Dayton; WSOC-AM-TV Charlotte) is Cox company making purchase from group which includes J. Elroy McCaw, Seattle broadcaster. Negotiating transaction is Bill Daniels, Denver broker and station owner and pioneer in catv, with J. Leonard Reinsch, executive director of Cox broadcasting properties. Cox recently acquired 4,500-connection system in Lewiston, Pa., for $660,000.

Are listeners lost?

Commercial radio stations that have been used by Voice of America for Spanish-language broadcasts to Cuba are wondering if they can recapture regular nighttime audiences when they revert to normal programming—perhaps this week (see story page 42). For past three weeks any listener tuning stations at night has heard only Voice programs. What worries stations is possibility that listening habits may have been changed so drastically that recovery of pre-crisis ratings may take months.

C-P buys 'Girls'

Colgate-Palmolive, it's reported, has committed itself to Harry's Girls, half-hour series, for scheduling on NBC-TV in 1963-64 season. This buy is through D'Arcy Adv., St. Louis and New York. Among C-P products handled by D'Arcy: Wildroot Hair Tonic and Halo Shampoo. Program has been plugged by MGM-TV, its producer, for past three years, and, as one close observer puts it, "It just refused to die." Harry's Girls is comedy based to degree on MGM-TV's motion picture "Les Girls." Format has American male performer and three girls touring European continent with song-and-dance act.

New junior G-man

William Ray, onetime station owner and NBC newsman in Chicago, reportedly has been picked by FCC Chairman Newton Minow to be FCC's new boss investigator as chief of important Complaints & Compliance Div. of FCC Broadcast Bureau—succeeding John Harrington who has been tapped for assistant general counsel (Closed Circuit, Sept. 24). Both appointments need full FCC approval. Two other selections to fill key staff vacancies also have been tentatively made: Robert Greenberg, of legal staff, to be assistant general counsel and William Jensen, attorney in Opinions & Review, to be chief of that division.

NABET made party to NBC-RKO hearing

National Assn. of Broadcast Employees & Technicians was admitted by FCC Review Board as party Friday to hearing on proposed exchange of NBC's WRCV-AM-TV Philadelphia for RKO General's WNAC-AM-TV and WRKO-FM Boston (earlier story, page 40). NABET contended it's party of interest because it has collective bargaining agreement for 12 WRCV-AM-TV employees and RKO has refused to give assurances for continuance of pension and welfare plans. Review Board agreed that NABET members may suffer "injury of a direct, tangible and substantial nature."

Former FCC patent attorney William H. Bauer asked permission to testify in hearing: "... respecting the status of RCA's patent misuses through the commission's technical standards...." Mr. Bauer testified in 1958 before House Legislative Oversight Subcommittee and his charges led to recommendations that changes be made in FCC rules.

**ANA clinic studies tv commercial effects**

Special visual effects and their importance in television commercials were studied in clinic session at Assn. of National Advertisers convention Friday (early story p. 34).

Commercialists of more than dozen companies—including Ford, Chevrolet, Hertz, Maxwell House and Bank of America—were shown as examples of "tricks" and other film effect that can add to commercial effectiveness. Session was headed by Robert Bergmann, information director of Film Producers Assn., and Robert Eskridge, director of promotion and advertising for Ralston Purina Co.

New videotape techniques were to be presented Saturday morning in special demonstration by Video-Tape Productions of New York. Company President Howard Melehan; Vice President, General Manager John B. Lanigan and Sales Manager Herbert W. Hobler also were scheduled to show "cost-saving ideas and equipment innovations."

**Idaho tv outlets file economic protests**

Two existing tv stations Friday lodged economic injury protest at FCC on pending applications to transfer construction permits of KGTG (TV) (ch. 10) Pocatello and KBAY (TV) (ch. 13) Twin Falls, both Idaho. Permittee Sam Bennion seeks transfer to corporation owned by himself, E. W. McRoberts, C. N. Lane and five others for $23,000.

KIFI-TV Idaho Falls and KLIX-TV Twin Falls both claimed operation of Bennion stations would result in economic injury to them. Stations charged Mr. Bennion had abdicated responsibility, trafficked in construction permits and made no effort to construct either station (both granted 1960).

**'Opry' booster Craig honored at Nashville**

Edwin W. Craig, board chairman of National Life & Accident Insurance Co., operating WSM-AM-TV Nashville, was honored Friday at 37th anniversary celebration of Grand Ole Opry. Station, music personnel and others associated with Opry honored Mr. Craig for his role in development of famed country music program (early story, page 64).

Gov.-elect Frank Clement presented scroll to Mr. Craig describing him as "old mandolin picker." He warned governors of New York and California that they are losing their leadership in music industry.

Members of Country Music Assn. elected Gene Autry, broadcaster-vocalist, as president, succeeding Kenneth Nelson, Capitol Records. Wesley Rose, Acuff-Rose publishing house, was elected board chairman. Others: Steve Sholes, RCA Victor, first vice president; Bud Brown, Acuff-Rose, second vice president; Jack Loetz, Columbia Records, third vice president; Frances Williams Preston, BMI, secretary.

**NABFMB, Magnavox to consider fm deal**

National Assn. of Fm Broadcasters meets early this week with Magnavox Co., set manufacturer, and Kenyon & Eckhardt, their agency, in hopes of concluding deal whereby Magnavox would pay $150,000 toward establishment of NABFMB promotion arm in New York in exchange for spot time on about 150 fm stations throughout U.S. (Broadcasting, Oct. 29).

More than 120 fm stations in 102 markets had approved plan by end of week, including 37 in top 25. Two uncommitted large Southern markets were being urged to join late last week. It's up to Magnavox whether station list will satisfy earlier requirement for 150. NABFMB sources say "it looks promising."

**Overpopulation talks postponed to January**

"Shirtsleeves working conference" between NAB and FCC on radio's alleged overpopulation problems has been postponed at request of association. Originally scheduled for Dec. 5-6, sessions have tentatively been postponed until second week in January. NAB informally asked for delay because its special committees had not had time to prepare.

**Streibert, McGannon to Free Europe board**

Three new members were elected to Free Europe Committee Inc. board of directors it was announced in New York Friday (Nov. 9). They are Don-
Sarnoff report ‘good’

Brig. Gen. David Sarnoff’s “post-operative” condition was “good” on Nov. 9. This report from Roosevelt Hospital in New York City was similar to that issued day before and just after RCA board chairman underwent surgery for removal of his gall bladder.

Two western ad firms reveal working links

Two pioneer Rocky Mountain area advertising agencies announced their mutual working affiliation Friday, although no ownership merger is planned at this time. They are Ball & Davidson, Denver, and Udevitz-Dunne & Co., Cheyenne, Wyo. Presidents of each will serve on plans board of other. Arrangement will allow more effective client service in area, they explained.

New small tv sets introduced by GE

General Electric has introduced three new 22-pound, 16-inch TV sets, with suggested retail prices of $149.95. Announcement today (Nov. 12) also says company will continue marketing 16-inch models introduced in July at retail of $170 to $175.

Dec. 19 deadline set for chs. 14-15 papers

Noting that “complex matters” are involved, FCC Friday granted additional 15 days for filing of comments on proposal to reserve uhf chs. 14 and 15 for land mobile users (see early comments, page 48). New deadline of Dec. 19 was granted at request of several educational groups.

Australian programs offered to tv market

TCN in Australia is blueprinting plans to “crack” world market with some of its programs, concentrating on developing top-quality entertainment specials.

First is one-hour program taped in England spotlighting Australian opera star, Joan Sutherland. Program is being considered for one of two U. S. networks now negotiating with Charles Michelon representing TCN. Sutherland program will be carried on TCN’s six stations in Australia on Nov. 18.

Bets are down

Networks now have their sights on individual new shows they think could be hit programs for them this season. CBS-TV is placing odds on Beverly Hillblies (now No. 1 in top 10) and new Lucy Show; NBC-TV on Virginian, and ABC-TV on Combat.
...in any crowd
ONE ALWAYS STANDS OUT!

...and in the Birmingham television market WAPI-TV is always that one...because:

WAPI-TV offers the cream of NBC and CBS.
WAPI-TV owns every major feature film package available.

THINK

Why does the largest local television advertiser spend over 90% of his advertising budget on KRNT-TV? And why has he for several years?

Try to think like the owner does.

If it was all your own money and all your own sweat and tears that had built up an outstanding business, and that business was all you had between your family and the poor house, you'd soon find out the best television station to use. If it was a question of sink or swim, you'd swim or you wouldn't have been smart enough to start the business in the first place. You would want advertising effectiveness—want it real bad . . . have to have it. You could take or leave alone all that jazz about ratings, total homes, cost per thousand and on ad infinitum. You'd seek to buy sales at your dealers' cash registers for your advertising dollar. Every moment would be the moment of truth for your advertising because you had to eat on the results.

Well, that's the way this local advertiser thinks and acts and so do many more like him here in Iowa's capital city.

Think of this . . . nearly 80% of the total local television dollar is spent on this one-rate station and has been since the station's inception. In a three-station market, too, by government figures! Such popularity must be deserved!

Think—Tis the till that tells the tale.

If you seek to sell your good goods in this good market, this is a good station for you to advertise them on. People believe what we say. We sell results.

HARMONIC LONG ISLAND, N.Y.

JOSEPH A. LENN, Exec. Vice-Pres. Sales
REPRESENTED BY Gill-Penna
Until now, this was a basic question forced upon advertisers planning and attempting to evaluate a network radio campaign and the full scope of a network radio audience... Any Network Radio Audience!
The vast consumer reach of automobile radio and of transistor radio had to be utilized as an undetermined plus factor to radio in the home, as it was used over a decade and a half ago. • 41 MILLION PEOPLE (not houses) drive to work regularly and there are nearly 47 MILLION CAR RADIOS in the country today. • It is readily admitted that noteworthy numbers of transistorized radio sets are listened to daily in and out of the home in every community coast to coast. • Yet the answers to questions vital to planned, creative advertising as: WHO is listening? HOW MANY are listening? WHEN do they listen? WHERE do they listen? WHAT do they hear? — these answers have, until now, remained conspicuous by their absence!

NOW, ABC RADIO has inaugurated a reliable RADIO ACTIVITY SERVICE through SINDLINGER & COMPANY, INC., that will provide these answers for ALL NETWORK RADIO programming regardless of where or when it is listened to and regardless of the size or type of the radio unit.

THE RADIO ACTIVITY SERVICE is founded on a national consumer sample of at least 24 THOUSAND PEOPLE every month. A different national sample is taken every day, seven days a week in 187 representative markets, 287 A through E and rural counties. • REPORTS WILL BE PUBLISHED MONTHLY and will reflect total listening in terms of people of all radio programming. • MALE AND FEMALE LISTENERS over the age of 18 will be reflected separately and in total for the entire country and by geographic region — East, Middle West, West, South. • THE PER CENT OF TOTAL POPULATION over 18 years of age listening to any program will be shown in each report. • BUYING PLANS AND PRODUCT USE of ABC Radio and other network audiences will be available on special order.

THE SINDLINGER TELEPHONE INTERVIEWING METHOD has been carefully developed over the past eleven years. Its reliability for accuracy has been repeatedly proven to some of the country's leading business concerns who have utilized its results: CHRYSLER CORPORATION, FORD MOTOR COMPANY, WESTINGHOUSE ELECTRIC CORPORATION, E.I. DUPONT DE NEMOURS COMPANY, CAMPBELL-EWALD COMPANY, CHASE MANHATTAN BANK, FEDERAL RESERVE BOARD, FORTUNE MAGAZINE, GENERAL ELECTRIC COMPANY, SCOTT PAPER COMPANY, NEW YORK STOCK EXCHANGE, IRVING TRUST COMPANY, U.S. STEEL CORPORATION, GENERAL MOTORS CORPORATION, NATIONAL INDUSTRIAL BOARD.

THE FIRST RADIO ACTIVITY SERVICE REPORTS are available now through ABC Radio. Additional information, general or technical, will be supplied in full upon request. • It is the sincere belief of this network that the radio branch of the broadcasting industry is a powerful and effective selling force for American manufacturers. It is also our belief these manufacturers and their advertising agencies must have available to them regular and reliable information upon which to determine realistically the truly vast reach of Network Radio Today. • THE SINDLINGER RADIO ACTIVITY SERVICE has been inaugurated by ABC Radio to provide this information so that advertisers can fully utilize this medium's ability to sell the millions of heretofore uncounted consumers it reaches every day.
Dec. 7—Second annual Chicago awards banquet of American College of Radio, Friday evening, Grand Ballroom, Conrad Hilton Hotel. Seven awards will be given to radio stations and individuals including the radio man and woman of the year, and one award has been created for the best live or transcribed radio commercial.

Dec. 10—Academy of Television Arts & Sciences, Hollywood, 8 p.m. to be announced; BBC documentary film, "Television and the World," Collier Young, coordinator.

Dec. 11—Assn. of National Advertisers' first creative workshop, Hotel Plaza, New York. Management techniques in using creativity in advertising will be subject of the meet. Among the presentations scheduled for the workshop session are "How Can A Client Stimulate Maximum Creative Effectiveness From His Agency?" which will be presented by Wilson Shelton of Compton Adv.; "Guidesposts for the Selection of Creative People" (John Dale, Dale, Elliott & Co.); "A Good Creative Idea—Pitfalls and Precautions in Getting Management Approval," (John B. Hunter, Jr., B. F. Goodrich Co.); "Coordinating Creative Efforts of Marketing Elements Within the Company" (Ben Wells, Seven-Up Co.); "How to Capitalize on the [Creative] Idea with Salesmen, Dealers and Customers" (Robert Bragarnick, Bragarnick Inc.), and "How to Stimulate and Direct Effective Creativity" (Max Banmahl, Armstrong Cork Co.).

Dec. 12—Southern California Broadcasters Assn. 25th anniversary banquet and Christmas party at Beverly Hills Hotel. FCC Comr. Robert Bartley will be guest of honor.

Dec. 18—Los Angeles Town Hall luncheon at Biltmore Hotel, Newton N. Minow, FCC chairman, is guest speaker.

"Dec. 19—Academy of Television Arts & Sciences, Hollywood. 8 p.m. FCC Chairman Newton N. Minow will participate in panel discussion of "What Is Right and What Is Wrong with Television," with William Dozier, Screen Gems vp, as chairman. Other panel members are Sylvester L. (Pat) Weaver, board chairman of McCann-Erickson Corp. (International) and president of M-E Productions; Frank P. Fozarty, executive vp, Meredith Broadcasting Co., operators of KCMO-TV Kansas City, KPHO-TV Phoenix, WHEN-TV Syracuse and WOW-TV Omaha; Hubbell Robinson, senior vp in charge of network programs, CBS-TV and Rod Serling, writer-narrator of CBS-TV Twilight Zone. Three additional industry leaders will be recruited to complete the panel.

Dec. 27-29—American Marketing Assn., annual fall conference, Hilton Hotel, Pittsburgh. Theme of the conference is "Marketing in Transition." Information and registration materials may be obtained from the American Marketing Assn., 27 East Monroe St., Chicago 3, Ill.

JANUARY 1963

Jan. 10—International Television Festival of Monte Carlo, Monaco.

Jan. 12—Florida Assn. of Broadcasters board of directors meeting, Cherry-Plaza, Orlando, Fla. Orlando broadcasters will host a "hospitality hour" at 6 p.m. Board meets at dinner, 7 p.m. FAB members are invited to send President Joe Field or Executive Sec. Ken Small suggestions for

Disneyland Hotel, Anaheim, Calif. Some 40 exhibits of base and vehicular radio equipment together with its related control elements, microwave links, frequency measure equipment, etc., will be an important part of the overall conference agenda. Special guests will be the members of the American Institute of Electrical Engineers pending the 1963 merger of these two engineering societies.

Since Nov.-Dec., 1957, NSI Reports have never given WAVE-TV less than 28.8% more viewers than Station B in the average quarter-hour of any average week!

And the superiority during those years has gone as high as 63.6% more viewers!

More viewers = more impressions = more sales!

Jack Markward, WOOD-TV's station manager and director of sales, welcomes Mark Wodlinger, general manager of WZZM-TV to Grand Rapids. That's Markward on the right, Wodlinger on the left and Willy Wood in the background.

Shake hands and...

We have a new competitor in Grand Rapids — WZZM-TV, Channel 13, ABC. While we can't honestly say we're ecstatic about a third station coming into the market, we concede the increased competition will be healthy in the long run for viewers, advertisers and stations. Our relationship with our established competitor, WKZO-TV, has been mutually cordial for more than 11 years. And, we welcome WZZM-TV to join us in providing more and even better television to the viewers and advertisers we serve here in the nation's 27th TV market.

WOOD AM·FM·TV Grand Rapids, Mich.
TIME-LIFE BROADCAST, INC.

This is a completely revised edition, with new material making up more than half its pages, of the widely popular 1951 book of the same name by the same authors.

The most obvious change is deletion of chapters on writing in the original volume plus subsequent revisions. The authors explain that writing needs more than secondary treatment, that whole books on it are available and that by omitting it from this edition "we have been able to provide more material, and more advanced material, on production theory and practice" than was possible in the earlier edition.

Among the subjects are program formats; shots and lenses; terms, cues and directions; pictorial composition; creative uses of cameras lighting; and special effects. There are eight appendices covering camera set-ups for different types of programs. Sections of the author's out-of-print Television Scripts for Staging and Study are also incorporated.

Mr. Stasheff, formerly with WPIX (TV) New York and television supervisor for the New York City Board of Education, is now associate professor of speech at the U. of Michigan, teaching radio and tv writing and production. Mr. Bretz, formerly with CBS-TV and WPIX, is now a program and production consultant and head of the educational television office of the U. of California.

Mr. Stahl's book, "designed for the person who must take up the work of publicity without much previous background," is a basic primer of which more than a third is devoted to broadcasting. It is aimed more toward helping amateur publicists in smaller market stations, operating with limited equipment. It is definitely not the last word on this subject, and he may rankle broadcasters with such offerings as this from a suggested sample radio announcement: "MAYOR: This is Mayor..."

BOOK NOTES

Billoughby — speaking to you on behalf of the coming drive for the Community Chest. As most of you know — who have been reading the papers lately — there has been an alarming increase in juvenile crime. . . ."

Jim Hubert, NAB manager of the Department of Broadcast Management, has made Washington politics the basis for his fast-paced first novel. The plot centers around Sen. John Burnett, who, after 26 years in the capital, votes for a controversial labor reform bill and finds his seat in serious jeopardy when he loses much of his union support. Woven into the story of the senator's fight for survival are a number of lesser stories — the complicated routine of a senator's office in an election year; the aspirations of the home state governor, a protege of the senator, who hopes to win his job; the union president's problems with his membership, his wife and his girl friend. The author's years in the capital have given him the background needed to give such a novel an authentic Washington setting.

From Ground Hog Day to the most serious commemorative occasions the Chase brothers have put together a compendium of special days, weeks and months in the coming calendar year. This chronological listing of 1,064 events and observances should be useful to broadcasters for general information purposes and in timing of promotional schemes.

Fisherman's Beach, by George Vukelich. St. Martin's Press, New York; 186 pp. $3.95. A first novel about a fisherman's beach on Lake Michigan and the family that controls it. George Vukelich is a disc jockey with a nighttime program on a Wisconsin station, known as Papa Hambone. He has contributed to The Atlantic Monthly and served as creative writing instructor at the U. of Wisconsin.
Every feature film purchase of a station is expected to create business above and beyond its cost of being aired. Some features will do this better than others—because of inherent drawing power and in the way they are scheduled.

**Example No. 1.** A study of 12 markets found that when over 40% of the feature films were post '48's the average feature carried 22% more spots than the older pictures. And the more post '48 films in the market, the more business all features did. Are you programming the better features of the Fifties?

**Example No. 2.** A study of five stations which aired feature films within prime evening time showed that by scheduling a top post '48 premiere at this hour, profit potential for the time period could be increased at least 25%. Have you considered this type of scheduling of top post '48 films for more profit?

Details of these two surveys are available from your MGM Television salesman.
Before looking ahead, a look backward could be helpful

Once upon a time there were four radio networks. A lot of people listened to their stations. These were happy people because the radio stations broadcast big stars. Some—Jack Benny, Fred Allen, Eddie Cantor—were already big names from vaudeville, movies and theater. Others—Kate Smith, Bing Crosby, Guy Lombardo—were made big by radio. As I said, listeners were happy because these big stars came into their homes "live" to entertain them.

Advertisers were reasonably happy, too, in those days. They were known as "sponsors" then because they did just that. They paid for all the time and talent and literally owned the stars and shows. Thus, when the star delivered a commercial or a lead-in and generally identified with the product by means of title and mentions throughout the show, advertisers really had something going for them—and at those prices, too. When people went to the grocer's on Monday and asked for a can of Eddie Cantor coffee, they got their Chase & Sanborn and not a blank look.

Well, I'd say the broadcasters then were pretty smart boys. They developed an entertainment-advertising medium like nothing that had ever gone before. Network radio, as it was, was unique unto itself.

Great Expectations • Then along came television. For a while it looked as if the broadcasters were going to continue to be smart. They seemed to follow the same programming "feel" that existed in radio. Milton Berle, Sid Caesar, Arthur Godfrey, were "live" friends coming into the viewer's home at the moment they were performing. Even the costs weren't too unreasonable.

But as this was going on, the broadcasters were beginning to forget the success formula that carried them from their infancy—through the depression—and into the fabulous fifties. They went "Hollywood."

At first it wasn't easy. Each time they approached the hallowed halls of the Brothers Warner, MGM, Fox, etc., the tirades and invectives hurled against the television industry were something to behold. But the broadcasters were a dauntless lot who didn't know their own strength. They kept crawling back for more abuse even while their own infant was rapidly eating away the foundations of the motion picture industry.

Then one day the Brothers Warner, et al., suddenly saw a vision—television—and decided to condescend to consider "tainting" their pocketbooks with tv money. And how "tainted" their pocketbooks became—is—well, it should just happen to you and me!

Second Hand • Now, where does that leave the viewer? Aside from Ed Sullivan, who comes into his home "live" (perhaps that's largely the answer to the perennial question, "What makes Sullivan tick?") the viewer is left alone with his ghost shadows in their versions of the B movies that helped close theaters. Gone are the friends of radio and earlier television who took the time and trouble to come into his home at the same moment he was listening or watching. tv, rather than growing into the personal entertainment-sales medium it should be, has instead grown gigantically impersonal. It is, for the most part, cold and "canned."

And the advertiser?

Many, like A&P coffees which owned a full hour weekly show in radio, or Florsheim shoes or Nestle's chocolate bars or Robert Burns cigars, which owned weekly half-hour shows, or Wrigley's gum, which owned their own nightly 15-minute show—are out of network broadcasting. Most of the others scrounge around for rating points via one-minute purchases on Hollywood's best (?)

And woe is the advertiser—and his agency—who is locked into a flop film series that is already in the can. Gone is the integrated commercial, the sponsor identification, the star endorsement and viewer appreciation. As to the latter, I can just visualize customers rushing to buy a product in appreciation for its one-minute spot on Frontier Circus, The Dakotas, or the like!

The Vital Spark • For my own part I'll practice what I preach. In guiding the television destinies of Timex watches from its start, I always tried to put them into "live" personality shows—Steve Allen, Jerry Lewis, Dean Martin, etc. We did our commercials "live," integrating the stars into them. On occasions when the show was on film we still integrated the star into our live commercials.

For example, when Bob Hope filmed a Timex special in Casablanca in July for an October air date, we had Hope on film removing his watch and throwing it across the ocean to land "live" on John Cameron Swayze's desk. In another instance, Hope—filmed four months before—conversed back and forth with a "live" Swayze, covering such timely topics as the World Series and other events happening at that moment. As for viewer appreciation, the Timex Jazz Specials brought in thousands of letters, word of mouth reactions AND sales.

The moral of this story? There really isn't any except that the addition of pictures really doesn't change the psychology of home entertainment. The home viewer still wants his "live" friends but has had to settle for the weather girls and agitated daytime "fun show" m.c.s. I have a hunch, though, that a few new Ben Bernies with all the lads would be enthusiastically welcomed in millions of homes if the broadcasters would find one. Yowsah, Yowsah, Yowsah!
A JEM FOR JACK

Oklahoma City's Adult Audience Station K-JEM featuring "Music and Talk for Adults*"—is pleased to join the list of major radio stations appointing Jack Masla & Company, Inc. exclusive national representative, effective immediately.

*Every rating service shows K-JEM reaching the second largest adult audience—all day—at 50% the cost of Station "B"
High time

EDITOR: Why don't you start a regular feature like the New York Times 'Quote of the Day.' I've got a candidate for Quote of the Week on tv, maybe of the year:

Map mishap

EDITOR: I was shocked to see in your magazine evidence of the greatest political steal in history [The Media, Nov. 5. — and coming as it did on the day before the 1962 general election makes it even worse.

ABC-TV has pulled off the gerrymandering coup of the age in trading the entire state of Kansas for Nebraska! Say it isn't so — Ed J. Mckernan Jr., president & general manager, KVOE Emporia, Kan.

[ABC discovered the mistake before election day and switched the names back to their rightful owners.]

Clagett's solution

EDITOR: I note with interest your news item about a statement by David Ogilvy, president of Ogilvy, Benson & Mather, that there are "too many commercials" on tv. It is not the mere number of commercials — it is harsh, annoying sounds, both human and mechanical — particularly jangled up volume — that at times threatens to knock your head off.

... Why doesn't the industry subdue announcements, control sound volume, avoid unnatural sounds; in short, refine away all this harsh listening? This may enable the industry to have even more commercials — and more revenue — without offending anyone. — John F. Clagett, attorney, Washington.

**WNBC-TV offers 'subscription' plan**

A "subscription" plan for selling local public-affairs programs to national advertisers was announced last week by Peter M. Affe, manager of NBC's WNBC-TV New York.

The plan offers 10 non-competitive national advertisers an opportunity to join in presenting five programs a week for 52 weeks at $25,000 per advertiser (CLOSED CIRCUIT, Nov. 5).

Each "subscriber" will be identified visually at the opening and close of each show. Two 60-second messages will be scheduled in each program, one at the start and one at the end, and these positions will be rotated among the "subscribers" so that in ten weeks each company's message will have appeared in both opening and closing positions of each of the five programs.

The commercial messages are expected to be institutional, Mr. Affe said, in keeping with the nature of the programming. The $25,000 "subscription" fee is a flat price, not discountable, and covers a firm 52 weeks.

Mr. Affe noted a growing attraction to information programs among both viewers and advertisers. He said WNBC-TV's plan, called "Pathways," offers a select group of business organizations an opportunity to join in a program of community service.

Jay J. Heitin, WNBC-TV national sales manager, said the plan is being marketed through a six-part mailing to top-level advertiser and agency executives. Mailings to clients will go to the board chairmen, presidents and advertising vice presidents, while agency mailings go to radio-television vice presidents, account executives and media directors.

The five programs in "Pathways" total 3 hours 15 minutes. They are live and are presented on weekends: Dorothy Gordon's Youth Forum (Sun., 12-12:30 p.m.) a panel geared for the high-school and college levels; Direct Line (Sun., 2:30-3 p.m.), in which viewers interview public officials; Open Mind (Sun., 3-4 p.m.), panel discussions; Dialogue (Sun., 4-4:30 p.m.), discussions of cultural pursuits of viewers, and Recital Hall (Sat., 6:15-7 p.m.), presented in cooperation with the Juilliard School of Music.

**MAXON INC. TO ABSORB A&K ACCOUNTS**

**Key personnel and about $5 million billings are moving**

The acquisition of top accounts and key executives of Adams & Keyes Inc. by Maxon Inc. was announced last week by Lou R. Maxon, president. The move takes effect Jan. 1, 1963, when Adams & Keyes will be dissolved.

The accounts involved are Revere Copper & Brass, Stauffer Chemical Co. and the Allegheny Power System, which were said to bill a total of $5 million. Revere spends about $500,000 annually in tv for its houseware products and Stauffer approximately $150,000 a year in radio for its agricultural chemicals.

In the change-over, Stanley Keyes Jr., president of A&K, will become senior vice president of Maxon. Alfred A. Anthony, a senior vice president and creative director of A&K, and Thomas A. Gullette, vice president and account executive at the agency, will serve Maxon as vice presidents. John C. Lawton and Troy Ferguson Jr., vice presidents and account executives at A&K, will join Maxon as account supervisors.

Mr. Keyes said that Revere, Stauffer and Allegheny were the three dominant accounts at the agency and indicated that smaller accounts already had been transferred to other agencies.

Mr. Maxon also announced that
Round one: WRAL-TV announces change to ABC Television, effective August 1. Round two: Switch is made and ARB study of Raleigh/Durham metro audience is authorized. Round three: WRAL-TV the winner! ARB telephone coincidental reports WRAL-TV the dominant station with king-sized 49% share of audience.

Two area stations split what's left. Ringside comment: Your commercial has Sunday punch impact seven days a week on Champion Channel Five. See your H-R man for the complete ARB report and for suggestions how to K.O. your competition in the nation's 50th tv market...Channel 5/Raleigh-Durham/North Carolina
C. Terence Clyne, who joined Maxon as a director last January, has been named executive vice president in the New York office. Earlier Mr. Clyne had been a top-level executive with McCann-Erickson, heading its radio-tv operations and serving as chairman of M-E Productions.

Radio 'public service' succeeds for Chevron

A public service-type campaign by the California Oil Co. (Chevron gasoline) with spot radio the primary medium was termed "highly successful" last week by the company's agency, BBDO New York. The campaign urged the installation of automobile safety belts at "a reasonable price" ($5.95) and at a "convenient location" (Chevron gas stations).

About $1 million was allocated, $650,000 in spot radio and the rest in magazines and tv. The campaign began last May in radio and magazines and continues through November. The television effort consisted of a one-week drive on 15 stations which carried the World Series coverage. More than 100 radio stations in the Northeast are carrying the Chevron safety-belt messages.

A spokesman for BBDO said that by the end of the year more than 250,000 safety belts will have been installed, and added: "We are highly pleased by the results of this campaign." He said the spot radio campaign originally was scheduled to end in late September, but was "so effective" it was extended through November.

Computers in advertising subject of ARF program

The use of computers in advertising will be the subject of three presentations at the Advertising Research Foundation's midwestern conference in Chicago on Nov. 29.

Under the direction of Leonard Kent, vice president and director of research, Needham, Louis & Brorby Inc., Chicago, ago, the program will consist of:

- (1) What contributions can communication theory make to constructing and evaluating an advertising campaign?
- (2) Practical media models: What must they look like?
- (3) Year-long media planning for clients.

A two-hour discussion and question/answer period will follow the presentations.

Principle speakers will be: Clark L. Wilson and Herbert Maneloveg, BBDO; Richard F. Casey and Frank Stanton, Benton & Bowles; Frank S. Scalora, Service Bureau Corp., and William T. Moran, Young & Rubicam.

Rep appointments...

- WCNS Canton and WIER Dover, both Ohio: Prestige Representation Organization, New York, as national representative.

Why regional reps? Auerbach tells—then gets more regional

When a regional broadcast sales representative walks into an advertising agency, "he is selling against a station man who knows only his own problems, rarely knows the clients, and never knows the client's problem outside his own market," said Leonard F. Auerbach last week.

Mr. Auerbach is president of Ohio Stations Representatives Inc., Cleveland, one of the 70 or so regional representative firms selling radio and television time in the U.S. His six-year-old firm represents 41 radio and four television stations in Ohio—all on a straight commission basis.

"We originally found, when we started in the business, that many stations wanted to add to their rate card because of the existence of a representative." That's no good, he said, "it looks to the advertiser as though it costs more to do business with us" if other-than-local rates are higher. "We're paid just as if we were another salesman on the station sales staff, and we pay for our own long distance calls, too," Mr. Auerbach added.

Real "Pros" = A regional representative offers experienced selling skills and a thorough knowledge of his market, his client—and the agency client's problems as well, he explained. "This extra know-how is something stations just don't have enough of, and they don't have the time to sell the regional advertisers the way the representative does.

Leonard F. Auerbach, president of Ohio Stations Representatives Inc., Cleveland, presenting "yellow books" of station information to Mrs. Joan Stockhaus, radio-tv buyer at McCann-Marschalk Co., Cleveland advertising agency.

"If a representative in New York makes sense where you're selling against other representatives, then it certainly makes sense regionally where we're just selling against the local salesman," said Mr. Auerbach. "And some local salesmen just don't know how to sell," he added.

A representative keeps an eye on advertisers and their budgets, the Ohio salesman maintained, and he knows which stations to offer. "We're called on by large and small agencies for market information and for station information and we're relied on to give the straight unbiased answers... often in markets where we don't have a station. We've never had a station. This kind of service can't be performed by one representative in a 'rep market,'" he said.

New Business = "We have been able to prove in many multi-station markets that we can get business for stations which they've never had before," Mr. Auerbach said.

An Akron station, which is so close to Cleveland that an Auerbach man commutes, "pays us greater commissions each month than they pay their top local man because they know that we can do more for them," he said.

Mr. Auerbach prods his clients to tell him what they're doing, and what's going on in their markets. This information is valuable, enabling representatives to anticipate advertising and to provide agencies with information they might not otherwise have. "We provide them with the information they need... with all the baloney extracted," he said.

Expansion = Last week, Ohio Stations expanded. It opened Penn State Reps in Pittsburgh, with Jack DeHaven, a former salesman for 12 years with WWSW-AM-FM Pittsburgh as general manager. The new Pennsylvania operation will keep Mr. Auerbach on the road even more, although he plans other additions to his four-man staff.
"In the Charlotte market results mean WSOC-TV"...Leon Robbins

"Orkin, world's largest pest control firm, is in business to sell pest and termite protection to homes and industry. An important factor in Orkin's amazing growth has been broadcast. Since the day WSOC-TV went on the air we have scheduled them each year. Results speak for themselves. In the Charlotte market, results mean WSOC-TV."

Orkin Exterminating Co., Inc.
Atlanta, Georgia

Nearby neighbors get to know a lot about you. Fast. So when you are scheduling in the Carolinas, take a lead from Southeastern advertisers and agencies who know the Charlotte market best. Go strong with WSOC-TV. You'll like the personal support and follow-through our staff people give you. You'll like the sales our big audience gives you. WSOC-TV is one of the great area stations of the nation.
AN AGENCY VOICE IN UNION TALKS

ANA, at annual meeting, forms joint committee with AAAA to advise in negotiating for TV commercials talent pacts

A joint policy committee to oversee the interests of advertisers and agencies in next year's broadcast talent union negotiations has been formed by Assn. of National Advertisers and the American Assn. of Advertising Agencies.

The creation of the committee was reported last Thursday at the ANA annual meeting at The Homestead, Hot Springs, Va. It emerged as one of the highlights of a two-day program that also delved into such diverse subjects as public and government attitudes toward advertising, computer influences, and agency-advertiser relationships.

The new committee—which was formed, officials stressed, in line with plans announced nine months ago (BROADCASTING, March 5)—would be concerned primarily with the broadcast unions' television commercials code, providing overall guidance but delegating responsibility for actual negotiations to advertising agency representatives.

The unions involved are the American Federation of Television & Radio Artists for tape and the Screen Actors Guild for film. Presumably the negotiation of program codes with these unions would remain with the networks—which in the past have negotiated agreements covering both programs and commercials.

**Expiration Next Year** · Current contracts expire in November 1963 but negotiations are expected to start early in the fall.

Harry Schroeter of National Biscuit Co., chairman of the ANA broadcast committee and newly elected chairman of the ANA itself (see below), and David Miller of Young & Rubicam, were named co-chairmen of the joint policy committee.

Other members, representing ANA, are Kenneth Baumbusch, American Home Products; E. P. Genock, Eastman Kodak; William R. Gurganus, Procter & Gamble; Daniel Ladd, P. Lorillard Co.; Palmer D. McKay, Sun Oil; Alfred L. Plant, Block Drug; Gail Smith, General Motors; and John Tyner, Bristol-McIver.

Agency members with Mr. Miller are David W. Dole, Leo Burnett Co.; Hugh L. Lucas, Campbell-Ewold; June McNamara, M-E Productions; Mildred Sanders, Honig-Cooper & Harrington; Harold J. Szaz, Ted Bates & Co.; William Schneider, Benton & Bowles; Lewis H. Titterton, Compton Adv., and Hermilio Trivies.

**Two Meetings** · The importance of broadcast union negotiations to the nation's leading advertisers was reflected in ANA's schedule of two convention sessions on the subject: one Thursday afternoon, one Friday morning. Both sessions were closed.

Last week's committee announcement was by Guy Farmer, consultant to the committee. It appeared to add little to last winter's disclosures—except the names of the committee members. But authorities said much attention was being given the whole question to make sure ANA members fully understand its importance and are aware of the procedures being followed.

In the past, agencies have participated in SAG-AFTRA negotiations as "observers," while advertisers have followed the negotiations unofficially, though closely.

After current contracts were negotiated in 1960, a number of agency-advertiser sources charged that the networks agreed to substantial increases in union fees for spot TV commercials while successfully avoiding major hikes affecting network programming.

**Do It Yourself** · Without commenting officially, networks let it be known they would not object if agencies or advertisers or both wanted to take over the commercials code negotiations.

The ANA-AAAA announcement last week said that although the joint committee would let agency men handle the negotiations, other interested industry groups including networks, film producers and advertisers might also participate.

Other convention highlights:
Frank B. Senger, chairman of the School of Journalism at Michigan State U. reported that a study of student complaints about advertising found 77.5% of the "objectionable" ads were in magazines, 14% on TV, 6% in newspapers and 2.5% in radio.

Mr. Senger cautioned, however, that "college students do surprisingly less television viewing than the rest of the population—studies and dates interfere with television on the campus."

He thought magazines may have received more than their share of the criticism because, in the study, students had to submit the ads they criticized, and it is easier to tear an ad out of a magazine than to reconstruct a commercial.

The product categories whose ad-
vertising drew the most criticism, Mr. Senger said, were health and beauty aids (20.8% of the criticisms); drugs (15.7%); foods and beverages (14.7%); household supplies (8.7%).

The principal criticisms, totaling almost three-fourths of all received, fell into one of these categories: (1) unbelievable medical claims, (2) use of "blatant sex," (3) exaggeration, and (4) general unbelievability.

**Hard to Find** - In general, however, Mr. Senger said the students "agreed that it was more difficult to find objectionable ads than they had suspected it would be."

A man whose job is to seek out misleading ads, Charles A. Sweeny, chief of the Federal Trade Commission's Division of Food and Drug Advertising, meanwhile told ANA that it and its agency have "just about the same objectives: improving the image of advertising."

Mr. Sweeny denied FTC is "anti-advertising": "In baseball," he said, "an umpire is not accused of being anti-baseball when he calls a batter 'out'."

He said FTC's actions against vitamin advertisers during the past year have not led other vitamin companies to amend their advertising. "It is apparent," he said, "that we face the wearisome task of proceeding against the advertisers one by one."

Gilbert Weil, ANA general counsel, warned against what he called a government trend that may in time require so much "affirmative disclosure" in consumer advertising as to amount to "a bill of specifications" as to the products' contents, leaving little or no time in commercials (or space in print advertising) to devote to selling the product.

Peter Langhoff, vice president and director of research for Young & Rubicam, predicted that one of the eventual results of the computer age in advertising will be "redesign of media vehicles and new approaches to media selling, with emphasis being placed on values rather than gross numbers."

**Computer Review** - This was one of a series of forecasts he offered after a review of the use of computers in advertising, particularly at his own company (BROADCASTING, Oct. 1).

The advertiser's interest and perhaps responsibility should be to "keep his advertising media healthy," Merrill Panitt, editor of TV Guide, said in a speech Thursday morning.

He noted that broadcasters get their revenues from advertisers, not the public, and that newspapers and magazines similarly are getting less and less from subscribers and more from their advertisers.

This situation, coupled with rising media costs, could intensify pressures on all media to "appeal to advertisers, possibly at the expense of informing and entertaining the public," Mr. Panitt asserted.

He said this is already evident, and asked:

"If radio stations in some areas are nothing more than wireless juke-boxes, doesn't this concern national advertisers?"

"If nearly a third of the nation's television stations refuse to sign and abide by provisions of the television code, aren't advertisers concerned?"

"If magazines become preoccupied with sex in blatant attempts to grab circulation (and what kind of circulation can it be?), shouldn't advertisers won't the magazine is?"

John Crichton, president of the American Assn. of Advertising Agencies, told the advertisers some things he thought they ought to know about agency problems—and what the advertisers could do to help solve them.

Among these problems: lack of advertiser understanding of the range and depth of agency services; inadequate communications which prevent an agency from knowing all it ought to know about clients' problems; the need for elaborate agency account organizations to match "over-structured" client organizations; new-product work and how to make it pay; instability in the agency-client relationship—and the ever-present question of making a profit.

In 1961, Mr. Crichton noted, agency profits averaged 2.49% of gross income, or 44/100ths of 1% of billing. He pointed out that the percentage has been declining steadily for the past several years.

Recalling the observation of Fairfax Cone of Foote, Cone & Belding that the agency business is the only one where "your inventory goes down in the elevator every night." Mr. Crichton reported that payroll accounts for 70% of agency expenses. Rent, he said, takes about 7%, profit-sharing 1%, entertainment less than 2%, and taxes and other expenses 17%.

He offered this quote by an agency executive to explain agencies' "apprehension over profit":

"If an agency gets a million-dollar account, and most agencies will never see one, and staffs for it at even one-half of the average rate during the 90-day period before billing begins, two or three or even four years may pass before that account is actually profitable and the agency has recouped its investment—if the agency is in an average

---

**Is ad man's entertainment fund imaginary?**

The Martini luncheon is disappearing from Madison Avenue. In fact, it may never have existed.

That's one conclusion to be taken from a report John Crichton, president of the American Assn. of Advertising Agencies, made to the Association of National Advertisers.

Showing where agency money goes, Mr. Crichton invited his audience of clients to focus for a moment on "entertainment." It amounts, he said, to less than 2%—actually 1.72%—of agencies' gross income (not of billing).

"This is far smaller than most gossip would make you think," he observed. "Also, it is trending down. It is now about one-fifth lower than it was five years ago."
position on the profit scale."

Mr. Crichton called upon advertisers to let their agencies know if they become dissatisfied—to give them notice and a chance to improve before firing them.

"No one disputes the right of the advertiser to change his agency," he said. "The request is only this: that there be a good reason, that the agency management be told what it is and have some opportunity to correct the situation."

He renewed AAAA officials' suggestion that at least six months' notice be given agencies in terminating their services. He also renewed the suggestion by Marion Harper of Interpublic, chairman of AAAA, that advertisers extend the "marketing year" to 36 months, allocating advertising budgets on a three-year basis, to permit better advance planning.

Commercials in production...

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial when available.

New products testing television

The following new products were reported last week to have entered spot tv on at least a test basis. Their activity was detected by Broadcast Advertisers Reports, a national monitoring service, in its off-the-air taping of local television advertising and is described here as part of a continuing series of new-product reports compiled for Broadcasting each week.

Monitored during period ended Nov. 2.

Product: Posieron Cough Syrup.
Company: Sauter Labs.

Schedule & Markets: Nighttime minutes in

South Central area.

Product: Golden Ladie Spaghetti Mix.

Schedule & Markets: Daytime minutes in Pacific Northwest.

Product: Post Count Off Cereal.
Company: General Foods.

Schedule & Markets: Daytime minutes in Pacific Coast area.

Product: Aqua Velva Shave Cream.

Schedule & Markets: Day and night minutes in Rocky Mountain area.

Admen prefer self-policing, says Crichton

Advertising wants to cooperate with government, but prefers self-regulation, said John Crichton, president of the American Assn. of Advertising Agencies, in a speech to the Adcraft Club of Detroit Nov 2.

The injunctive powers sought by the Federal Trade Commission were opposed by AAAA this year because "we thought FTC's present powers were sufficient," Mr. Crichton explained.

"If one looks fairly at the highly-publicized cases involving television commercials in which the FTC became engaged two years ago, it seems impossible not to feel that in most of them the FTC has somehow become engaged in trivia," he said.

In a speech entitled "What the Government Should Know About Advertising," the AAAA president said the government ought to recognize that advertising is "essential to an industrialized, expanding consumer economy."

- Has positive values invaluable to telling a sales story.
- Makes a contribution to economic growth, an especially important factor in expanding world trade.
- Builds sales, profits and revenues.
- Is basically opposed to government regulation.

Mr. Crichton also outlined three problems facing advertising in Washington: "tax deductibility of advertising aimed at legislation, defense contractor advertising, and the possibility of independent Internal Revenue Service action on advertising's allowance as a cost of doing business."

"We have not told our story well in Congress or in the executive branch," he said. "Congressmen, and government officials generally, tend to think of advertising as something apart from the rest of business," he continued. "Of course it is not. It is inseparable."

Ad Council honors six campaign workers

Six volunteer campaign coordinators and seven advertising agencies were cited Nov 8 for "outstanding public service to the national welfare" at the awards luncheon of the Advertising Council.

First-year awards went to William C. McKeehan Jr., Metropolitan Life Insurance Co.; Young & Rubicam; Robert M. Gray, Humble Oil & Refining; Grey Adv.; H. George Wolfe, Merck Chemical Division; Doherty, Clifford, Steers & Shenfield; BBDO; Joseph F. Anderson, and Dictaphone Corp.

FC&B signs - Foote, Cone & Belding's Chicago office has signed as first tenant for new $25 million building to be constructed there on Michigan Avenue opposite the Wrigley Bldg. by Equitable Life Assurance Society. Building is to be finished in early 1965 and FC&B will have 9th through 12th floors.

WSAAA scholarships - Scholarships in advertising and marketing are being offered to two outstanding students at major colleges and universities in the Los Angeles area by the Western States
BANJO BILLY

Kids love him — adults, too! Banjo, along with Captain Jack and all the “gang”, travels to scintillating, imaginative places in his daily “cruise” aboard the “Funboat” — from the Land of Moog, populated by giants, to a South Seas Island paradise; from the bottom of the ocean to miles above the earth on a wonderful magic carpet.

Banjo is in great demand for public appearances and has been seen riding on many unusual vehicles — elephants, horses, donkeys, old-fashioned high wheel bike, and the Banjo Billy landboat. Not only is Banjo in demand in person, but from 9 to 10 AM, Monday through Friday, television sets from the Palm Beaches to the Florida Keys are tuned to Channel 10.

Sponsors know it because their products sell on Banjo Billy’s Funboat!

Advertising Agencies Assoc. Scholarships are for $500 each, according to Macy Baum, WSAAA scholarship chairman. Applicants are required to submit a paper on "the role of advertising in the American business economy." This is the fourth annual scholarship program sponsored by the WSAAA.

Council on crisis = An educational campaign using radio and tv has been prepared by the Advertising Council, New York, to spread understanding of the present world situation. Radio and tv kits are being sent to all the networks and stations with announcements created by Young & Rubicam, New York.

K&E grant = A grant of $1,000 has been awarded by Kenyon & Eckhardt, New York, to the school of business administration of American U., Washington, D. C., for retailing research.

Advertising for advertisers = Clarence Jones, president and owner of WQIZ St. George, S. C., gives his advertisers extra mileage by circulating lists of his advertisers to listeners (more than 1,000 each month) and urges patronage of those establishments in special air promotion.

Quarterly dividend = Directors of Chirurg & Cairns Inc., New York and Boston advertising agency, have voted a quarterly dividend of 12.5 cents a share. It is payable Dec. 1 to stockholders of record on Nov. 15. Announcement of the dividend was made by Wallace L. Shepardson, C&C president.

New office for PGW = Peters, Griffin, Woodward Inc., New York, last Monday (Nov. 5) opens new offices in Chicago. Located in the Prudential Plaza since 1957, the Chicago office has taken larger quarters on the 25th floor of the same building.

Business briefly... Philip Morris Inc. for Commanders has purchased test campaign through Community Club Awards on CCA radio stations in eight markets that will run through February. About 10 spots per week are being used on each station. CCA is providing centralized billing for purchase. Agency is Leo Burnett Co., Chicago.

DuPont, Union Carbide Co. and National Biscuit Co. have signed as participating sponsors of NBC-TV's Eleventh Hour (Wed., 10-11 p.m. EST). Agencies: BBDO (DuPont); McCann-Erickson (Nabisco), and William Esty Co. (Union Carbide).

Film-Makers forms in Chicago

The Film-Makers Inc., a new tv commercial production company, has been formed in Chicago. The new organization is located at 615 N. Wabash Ave. Lincoln Scheurle, former commercial producer for J. Walter Thompson, Chicago, is president and creative director of the company. Edward E. Katz, former financial vice president for Fred A. Niles Communication Centers, is board chairman and general manager.

TV tape sparking local business—TvB

Television Bureau of Advertising's member stations are using tape facilities to increase local business, a survey shows. Besides being a production tool, tv tape is widely used for selling advertising.

Out of 190 stations in the study, three-quarters, or 144, have tape facilities. Of those with tape installations, 71% report increases in local business because of tape and 51% report savings in manpower. TvB, which uses its own tape facilities for sales meetings to orient agencies and representatives, said 49% of the equipped stations use tape for sale meetings.

TvB's study found that 86% of the stations with tape installations use tape for preparing sales presentations for prospective advertisers; 79% prepare commercials for prospective advertisers.

New station group formed

The Lark Network, a new station group in north Louisiana and southern Arkansas, has been formed, Ollie Bales, manager of KUZN West Monroe, La., announced. Billing will be handled by Grant Webb & Co., New York station representative, and will be on one rate card with one bill. Affiliating with Lark: KCKW Jena, KMAR Winnboro, KRUS Ruston, KVCL Winfield and KWCL Oak Grove, all Louisiana, and KAGH Crosett and KDMS El Dorado, both Arkansas.
GOVERNMENT

FCC vetoes temporary NBC-RKO swap

NETWORK EYES DEC. 31 DEADLINE FOR DISPOSAL OF WRCV-AM-TV

NBC's plan to exchange WRCV-AM-TV Philadelphia for RKO General Inc.'s radio-tv stations in Boston to comply with a consent decree entered into with the Justice Dept. reached the critical stage last week.

The FCC last week refused to approve a temporary exchange of the Boston-Philadelphia properties which would have enabled NBC to comply with terms of the decree requiring it to dispose of WRCV-AM-TV (ch. 3) by Dec. 31, 1962. Unless the U. S. District Court in Philadelphia grants an extension of the deadline or the FCC reverses its decision last week, NBC will face forfeiture of the station—an estimated $20 million loss.

Also last week, the commission denied a request by Philco Broadcasting Co. for temporary authority to operate on ch. 3 Philadelphia. Philco is contesting the proposed exchange and has applied for a regular construction permit on ch. 3 in a contest against WRCV-AM-TV's renewal application.

An FCC hearing in the case, which began Oct. 22, continued last week with testimony from Donald McGannon, president of Westinghouse Broadcasting Co., and three executives of NBC's parent, RCA, on patent licensing matters.

NBC has asked the Philadelphia court for an extension of the consent decree deadline—a move opposed by both the Justice Dept. and Philco. The court, however, said two weeks ago that it would not act on the motion pending a decision by the commission on the joint NBC-RKO request for an interim exchange. RKO stations involved are WNAC-AM-TV and W RKF-FM, all Boston.

In denying both the NBC-RKO and Philco pleadings, the commission said that it could not make a finding that the "extraordinary" relief sought is necessary at this time for the continuation of an existing service. If the court refuses to extend the Dec. 31 deadline and WRCV-TV is faced with imminent darkness, it was reported NBC could come back to the FCC for relief.

The commission denied the NBC-RKO pleading less than two weeks after it was filed and just two days after the broadcast Bureau, Philco and Westinghouse all filed oppositions. NBC and RKO were not afforded an opportunity to submit replies to the oppositions.

Hands Tied • In its plea to the court for an extension, NBC said that the consent decree does not contemplate a forfeiture on the part of the network and that it has taken every step possible to comply. The consent decree was signed the decree without an understanding that it would not be required to forfeit the Philadelphia stations.

"The Dec. 31, 1962, date was never intended to be a fixed and inflexible deadline which, without fault by NBC, would become a means to bring about a forfeiture," he said. The date (which gave NBC over three years to secure FCC approval of a transfer) was nothing more than the best estimate of the reasonable time necessary for such action, he said.

Mr. McGannon "I said he must be joking"

would become a means to bring about a forfeiture," he said. The date (which gave NBC over three years to secure FCC approval of a transfer) was nothing more than the best estimate of the reasonable time necessary for such action, he said.

Mr. Segal pointed out that within nine months of the consent decree, it sought FCC approval of the even-up Boston-Philadelphia swap even though the NBC stations were more valuable. "Certainly no one then contemplated that NBC should be severely penalized, where far from procrastinating in its performance, it has acted with utmost expedition to comply. . . ." Mr. Segal told the court.

Financial experts have estimated that the loss to NBC would be in excess of 20 million if it were to forfeit the Philadelphia stations, the NBC attorney said. "Further, NBC would also be severely handicapped in its ability to compete with . . . CBS and ABC. . . . The present competition between the three networks would be drastically reduced. And these results would occur although NBC has complied with the decree insofar as it was in its power to do so. . . ."

If NBC does not receive other stations in exchange for WRC-V-AM-TV, he said, the penalty would be more severe than any that has ever been imposed under any divestiture decree even after finding of criminal guilt, "let alone under a consent decree that was represented by the government as being fair and equitable to both sides."

In denying the request, the Justice Dept. said that it was not guilty of the antitrust charges which led to the decree and that it entered negotiations only to avoid costly and long-drawn-out litigation. At the very outset of talks with Justice, NBC said it stressed that it would never agree to a consent decree which would result in a forfeiture of any of its stations.

NBC contended that the Justice Dept. agreed that no forfeiture would be required and that the Dec. 31 deadline was suggested by network negotiators. NBC "firmly believed . . . there would be no problem in obtaining a reasonable extension," Mr. Segal said.

Purpose Defeated • In a reply to NBC, Justice told the court in a brief filed Nov. 2 and made public last week that the requested extension "would defeat the purpose of the divestiture provisions. . . . The germane directives of the judgment are unequivocal and absolute—the defendants must get out of the Philadelphia tv station business by Dec. 31, 1962, and stay out for nine years thereafter."

The judgment does not condition compliance on FCC approval of the transfer, Justice said, and NBC is attempting to substitute divestiture at an indefinite future date. Justice charged NBC deliberately risked unfavorable action or inaction by the FCC in agreeing to the deadline. The network's grounds for modification are legally insufficient and any economic hardship resulting from the decree was foreseen when the judgment was agreed to and there is no

WCYB Radio-TV continues to serve up the best

So says the Associated Press Managing Editors Association in awarding us the highest national recognition for “consistent and thorough day-to-day coverage of news.” One of the three broadcast mediums in the United States to receive this Associated Press citation (others: KRLD Radio-TV, Dallas and KNBC Radio, San Francisco), WCYB Radio-TV has also received awards this year for excellence of news coverage from Virginia and Tennessee state associations. In the thriving, growing 37-county Tri-Cities area, WCYB Radio-TV is the authoritative voice of news. WCYB-TV (first in TV coverage); WCYB-Radio (first in Radio coverage). And, the TRI-CITIES (Bristol, Johnson City, Kingsport) is the 19th largest metro county area in the Southeast! Serve up the best total audience for your advertising dollar on WCYB. Food for thought?
Voice to demobilize 10 commercial stations

Two mobile 50 kw transmitters will replace present hookup

The Voice of America hopes to begin demobilizing this week the 10 commercial radio stations that have been broadcasting its Spanish-Language programs into the Caribbean since the Cuban crisis began three weeks ago. All 10 may be released within two weeks.

This was disclosed last week by Henry Loomis, Voice director, in confirming reports that two mobile 50 kw transmitters were being installed in Florida. He said he hopes they will serve as replacements for the commercial stations.

One of the transmitters, located on Florida's Marathon Key, is VOA property (Closed Circuit, Nov. 5), and will operate on 1180 kc. The other is U. S. Navy equipment, and Mr. Loomis declined to divulge any details about it. But it was understood that the transmitter will be located on one of the Florida Keys near Marathon.

Connect With Voice • The two transmitters will be connected by land lines with VOA studios in Washington, and will broadcast day and night. This would provide greater flexibility than that offered by the commercial stations, most of which broadcast a dusk-to-dawn schedule.

Mr. Loomis said it's hoped that, because of the transmitters' location and power, coupled with the directional antennas they'll utilize, the mobile transmitters will broadcast a stronger signal into Cuba than that provided by the commercial stations.

Weakest Go First • The installation of the transmitters was expected to be completed by the weekend (Nov. 10-11). "As they come on," Mr. Loomis said, the Voice would "probably release" the two commercial stations determined by engineering tests to be beaming the weakest signal into Cuba.

At the same time, he said, the Voice would "probably reduce" the amount of time it uses on the remaining stations. Within two weeks, he said, it's hoped that all 10 can be released entirely.

In testimony three weeks ago, Westinghouse executives said that they agreed to the 1955 trade with NBC because of a fear of losing NBC affiliations, but Mr. McGannon said that was not a factor in 1959 because ABC-TV had become competitive as a third network. Also, he said, there was a "strong psychological element" which was missing in 1959. "Bluntly stated, enough is enough," he said. "We had been through Philadelphia and Cleveland. We weren't going to go through Boston and Philadelphia and ad infinitum."

Trouble network

The Oregon Assn. of Broadcasters, spurred by Gov. Mark Hatfield, has asked the FCC to call a meeting of key communications experts in that state to discuss the establishment of an emergency communications network.

Gov. Hatfield believes such a system could warn and inform Oregon citizens in time of any major disturbance, such as storm, fire or enemy attack. State officials recently decided to locate the communications center for such a network in the basement of the Capitol Building in Salem.

Gov. Hatfield has indicated to Ted Smith, president of OAB, that the government will help the OAB establish the proposed network.

equitable basis for a modification, Justice maintained.

There is no recognizable inequity in insisting that "NBC's continued exploitation of the Philadelphia market be terminated by the agreed date," Justice said. "In fact, NBC's timely departure is essential to the basic aims of the instant judgment-establishing competitive conditions in Philadelphia free from any interference by NBC...and ending NBC's enjoyment of the fruits of its unfair conduct. These underlying conditions of the judgment have not been changed by NBC's inability to accomplish an advantageous disposal."

Justice said WRCV-AM-TV are presently earning $5 million annually and will have returned to NBC by Dec. 31 more money than the network has invested in the property.

The court has not given any indication when it will rule on the NBC request for an extension. In postponing argument on the petition, the court said NBC should properly seek relief from the FCC first. That relief now has been denied.

Meanwhile, in Washington • Mr. McGannon, who became president of WBC shortly after the Westinghouse-NBC swap was agreed to in 1955, told the FCC hearing that NBC approached WBC shortly after the consent decree was signed in 1959. David Adams, NBC executive vice president, told him NBC wanted to acquire stations in two cities selected from Boston, Detroit, Pittsburgh and San Francisco, Mr. McGannon said.

"Mr. Adams' was exploring with me WBC's attitude in entering into [an exchange for Philadelphia] since of the four markets he mentioned, we had tv stations in three of them—Boston (WBZ-TV, Pittsburg (KDKA-TV) and San Francisco (KPIX [TV])."

After consulting with Westinghouse officials, Mr. McGannon said he told Mr. Adams at a second meeting that WBC could see no value in "upgrading" from Boston to Philadelphia. "I smiled and said he must be joking about Pitts- burgh," said Mr. McGannon. Pittsburgh is the home of the parent Westinghouse Electric. As to San Francisco, it is a city "in which we wanted to operate a tv station," Mr. McGannon said.

The 10 stations, which are linked up with VOA transmitters, have been broadcasting Spanish-language programs of news, commentary and analyses of the Cuban crisis since President Kennedy's Cuban "quarantine" speech Oct. 22 (BROADCASTING, Oct. 29). They are WCKR, WBGB and WMIE, all Miami; WSIB Atlanta; WWL New Orleans; WCKY Cincinnati; KAAV Little Rock; and WKWF Key West; and the international shortwave stations WRUL New York; and KGEI Belmont, Calif.

Waive Rules • The FCC on Oct. 30 waived its rules to permit WRUL to operate through the night. The station, which normally broadcasts from 10 a.m. to 11 p.m., had been operating on the longer schedule since the crisis began under special FCC permission. The waiver extends through Jan. 20.

The only break in the solid dusk-to-dawn schedule of VOA broadcasts carried by the standard wave stations occurred Tuesday night, when special arrangements were made to enable them to broadcast election results for their local audiences.

Half-Hour of Election News • Mr. Loomis said that some of the standard-wave stations broadcast 30 minutes of election news every hour on the hour, the remaining, 30 minutes every hour on the half hour. This schedule, which permitted at least half the network to be carrying VOA broadcasts at all times, was maintained until midnight, when all 10 stations resumed carrying VOA programs exclusively.

Mr. Loomis reported that, even after more than two weeks of VOA service, the morale of the stations' management remains high. He said they have willingly given up broadcasting features of great interest to their listeners when reminded of VOA's need for their facilities.

"They're completely understanding, completely public-service minded," he said.

The government has given assurances that the stations will be reimbursed for
STRIFE - SAVER!

WJXT in Jacksonville eliminates all argument about the most efficient advertising medium with eye-catching figures on the picture in the total market: 210% more homes outside the metro area . . . 30% more homes inside Jacksonville . . . 22 of the top 25 programs . . . but! why go on and on? No matter how you look at it, more people look at WJXT . . . the dominant medium in the entire North Florida/South Georgia regional market!

POST-NEWSWEEK STATIONS A DIVISION OF THE WASHINGTON POST COMPANY
Wayne, Ind., has consented to Town and Country Food the agency.

Mr. Loomis said he would like the stations themselves to "sort this thing out among themselves" and then submit a proposal for reimbursement to the agency.

Freezer firm agrees to amend advertising

The Federal Trade Commission announced last Friday (Nov. 9), that Town and Country Food Co. Ft. Wayne, Ind., has consented to an order prohibiting it from advertising practices which they have been using in various media including radio and television.

The commission had taken issue with pricing and savings claims and other "misrepresentations" the company had been using to sell home freezers, food and freezer food plans. The FTC's complaint alleged that contrary to the concern's advertising, purchasers of the freezer food plan (1) do not save enough money on the purchase of food to pay for the freezer, and (2) are required to pay interest or finance charges in addition to the price of the freezer, food and tax.

The order was contained in an agreement between the respondents and FTC staff counsel, which they have accepted. The agreement is for settlement only and does not constitute admission of violation of the law.

Arkansas high court backs wired pay tv

Pay tv scored a victory in Arkansas last week when the state supreme court upheld a Public Service Commission ruling which ordered Southwestern Bell Telephone Co. to feed subscription tv over its lines in Little Rock.

In a unanimous opinion the state court denied objections by Arkansas theatre owners who held subscription television to be contrary to the public interest and outside the jurisdiction of state agencies. The theatre owners claimed jurisdiction belongs to the FCC.

Pay tv is planned in a 10,000-home section of Little Rock by Midwest Video Corp., parent company of a group of community television systems in that area. Midwest, among whose principals is C. Hamilton Moses, former chairman of the Arkansas Power & Light Co., holds a franchise to use the Telemeter system. Telemeter is owned by Paramount Pictures Inc., and utilizes a coin box at the receiver to unscramble the video and audio program. The programs are sent to subscribers' homes on wire lines.

Midwest last year asked the Public Service Commission to require Southwestern Bell to permit the transmission of pay tv over its lines. The Arkansas commission approved. A lower state court upheld the decision.

Mr. Moses said Midwest will not begin construction of the pay tv cable system until the theatre owners have exhausted all legal remedies. Spokesmen for the theatre owners said they probably will file a petition for rehearing before the Arkansas court.

No auto log favorite, commission explains

The FCC has clarified its recent stand on automatic program logging (BROADCASTING, Oct. 8) in emphasizing the rulemaking does not favor "a particular system of automatic program logging."

The new rule allows stations to log automatically if they wish, the commission said, but neither imposes an obligation to do so nor acts as an endorsement for "any particular manufacturer."

Originally one of the least controversial parts of a proposed overall logging rulemaking, the new logging rule was adopted separately Oct. 3 and was adopted largely at the urging of ITA Electronics Corp., a manufacturer of automatic logging equipment.

Pete Holland, of S.S.C.& B., joins the Tricorn Club

How come? He's wise, that's how. Wise to the fact that North Carolina's No. 1 metropolitan market (in population, households and retail sales) is that combined three-city "tricorn" ... Winston-Salem, Greensboro, and High Point.

Want to join the Tricorn Club? You're probably eligible already, if you're also wise that North Carolina is the No. 12 state in population. And in the market upper crust today, my deah, one simply doesn't ignore the No. 1 market in the No. 12 state! And while you have your lorgnette out, remember WSJS Television is your best sales entree to all this Confederate money.

The elections’ effects on broadcasting

FEW COMMUNICATIONS LEGISLATORS NIPPED BY FALL POLITICAL FIRE

Most of the Senate and House members primarily responsible for an impressive record of broadcast legislation in the 87th Congress—the members of the Senate and House Commerce Committees—will be back to serve in the 88th.

Every member of the Senate committee who sought reelection last week was successful. With the exception of Rep. Peter F. Mack Jr. (D-III.), the same was true of the House committee.

As a result, barring juggling of committee assignments when Congress organizes in January, there will be few new members of the two committees which were largely responsible for enactment in the last Congress of the all-channel-receiver, educational-television, communications-satellite and FCC-reorganization bills.

Since the Democrats scored a net gain of four seats in the Senate, they will increase slightly their majorities on committees in that chamber. On the Commerce Committee, the line-up is now 11-6. The party alignment on the House committees should remain the same—20 Democrats and 13 Republicans in the case of Commerce.

One significant change, however, will be in the chairmanship of the House committee’s Communications Subcommittee. Rep. Morgan Moulder (D-Ark.), chairman in the 87th Congress, didn’t seek reelection.

Next Chairman • Rep. Walter Rogers (D-Tex.) is the next ranking Democrat on that subcommittee and is expected to succeed him. But Reps. John Bell Williams (D-Miss.), Kenneth A. Roberts (D-Ala.), and Harley Staggers (D-W. Va.) outran him on the full committee and would have a prior claim to the subcommittee chairmanship if they wanted to exercise it. Both Reps. Williams and Roberts, however, have other subcommittee chairmanships.

Among the winners last week were the chairmen of the two committees, Sen. Warren G. Magnuson (D-Wash.) and Rep. Oren Harris (D-Ark.). Sen. Magnuson, a member of Congress since 1937 and of the Senate since 1944, won by about 47,000 votes out of some 900,000 cast. This was a narrower margin than he was expected to post over his relatively unknown opponent, Richard G. Christensen, a 32-year-old Lutheran minister.

Rep. Harris, who in 11 previous campaigns for the House had never faced Republican opposition, was Arkansas’ biggest winner in defeating Warren Liebeng, a school supply salesman from Pine Bluff, by a 4-to-1 margin.

The lone election day casualty on either committee, Rep. Mack, was beaten by another incumbent, Rep. Paul Findley, a Republican. Their districts were thrown together as a result of Illinois reapportionment.

The House Commerce Committee lost another member when Rep. Peter Dominick (R-Colo.) a one-term congressman, gave up his House seat to make a successful run for the Senate. He defeated the Democratic incumbent, John A. Carroll.

Sen. Carroll himself is known to broadcasters as chairman of the Senate Administrative Practice & Procedure Subcommittee, which in previous congresses held hearings on bills intended to assure high ethical conduct of administrative agency personnel.

Butler Gone • The only certain vacancy on the Senate Commerce Committee involves the seat of Sen. John Marshall Butler (R-Md.), who has been in the Senate since 1950 and is ranking minority member on the committee. He didn’t seek reelection.

The members of that committee who joined Sen. Magnuson in winning another term are Sens. A. S. Mike Monroney (D-Okl.), George A. Smathers (D-Fla.), Frank J. Lausche (D-Ohio), Norris Cotton (R-N.H.), and Thurston Morton (R-Ky.). The hold-over members of the committee are Sens. John O. Pastore (D-R.I.), and chairman of the Communications Subcommittee, Strom Thurmond (D-S.C.), Ralph Yarborough (D-Tex.), Clair Engle (D-Calif.), E. L. Bartlett (D-Alaska), Vance Hartke (D-Ind.), Gale W. McGee (D-Wyo.), Hugh Scott (R-Pa.), Kenneth Keating (R-N.Y.) and Winston L. Prouty (R-Vt.).

And Republicans Reps. John B. Bennett (Mich), William L. Springer (Ill.), Paul F. Schenck (Ohio), J. Arthur Younger (Calif.), Harold R. Collier (Ill.), Milton W. Glenn (N.J.), Samuel L. Devine (Ohio), Ancher Nelsen (Minn.), Hastings Keith (Mass.), Wil-
Capehart Defeated - In another election result, the unexpected defeat of Sen. Homer Capehart (R-Ind.) removes a powerful supporter of clear-channel broadcasters from Congress. Sen. Capehart, a member of the Senate since 1945 and a former commerce committee member, opposed FCC plans to duplicate the clears and had urged, instead, higher power for them. Sen. Capehart's connection with radio goes back to the early days of the medium when he founded Capehart Inc. to manufacture radios.

Three men with broadcasting connections sought election to state-wide office. The only successful aspirant, Rep. William Scranton (R-Pa.), is being talked of as a possible GOP Presidential contender in 1964 as a result of his victory in the Pennsylvania gubernatorial election. Fred Seaton lost in his bid to become governor of Nebraska, and Alvin Bentley was defeated for congressman-at-large from Michigan.

Rep. Scranton is a 1.4% owner of Transcontinent TV Corp., which owns KFMB-AM-FM-TV San Diego, WGR-AM-FM-TV Buffalo, KERO-TV Bakersfield, WDAF-AM-FM-TV Kansas City, WNEP-TV in Scranton-Wilkes-Barre, and WDKO-AM-FM Cleveland.

Fred Seaton, who was Secretary of Interior in President Eisenhower's cabinet, is vice president and director and owns 535 of 1,200 shares of common stock in KGGF Coffeyville, Kan.; president of the station or company.

Mr. Bentley is vice president and director and owner of 300 of 900 common shares in WKNX-AM-TV Saginaw, Mich.

FCC defends Cox against NCTA attack

The FCC last week came to the defense of its Broadcast Bureau chief, Kenneth A. Cox, charging that a court brief filed against the FCC is "largely

Offspring of that Chicago local tv hearing?

Any hopes by the tv networks that the FCC's hearing in Chicago on local tv programming could be relegated to history are about to be shattered by the same commission.

The FCC soon will vote on sending questionnaires to all network owned tv stations with the "primary purpose . . . to ascertain the policies and practices of the network stations in the broadcast of local programs." The seven-page quiz (including instructions) grew out of the Chicago hearing and will be on the FCC agenda for possible approval at this week's meeting.

Also in the forseeable future is the possibility that the same questions will be asked of all stations owned by multiple licensees. This proposal, however, is not before the FCC at this time but there is some thought that stations owned by the networks should not be singled out. In addition, it was pointed out that many of the same problems in the selection of local programming by stations owned by the networks are now being solved when a non-network licensee operates a group of stations.

However, if the questionnaire is sent to all multiple-owned stations, approval of the Budget Bureau is needed—one of the factors prompting the commission staff to single out the network outlets at this time.

As presently drafted by the staff, the questionnaire asks for a detailed statement describing the efforts and activities by the network stations (except in Chicago) to ascertain the needs and interests of the public for local programming. The stations are instructed to contact 10 types of civic leaders and organizations (plus "others") in reply. These include public officials, educators, religious groups, ethnic groups, labor, business, cultural, entertainment, etc.

Names, Too - Names and positions of persons contacted also are to be submitted in reply. The statement "shall include but need not be limited to any efforts [by the station] (1) to make a canvass of the listening public and (2) to consult with civic leaders and others who bespeak the interests of the community or communities served. . . ."

The station is asked if it maintains a complaint file and, if so, the number and nature of those received during past year on local programming. A series of questions order "a description in reasonable detail of the policies and practices established by the network licensee to enable the management of each station to plan, devise and provide a program schedule to serve the needs and interests of the local community." In this connection, the licensee must submit the names of all persons who participate in programming decisions and the extent of their authority and who has final authority in case a conflict occurs.

Stations are asked if local management has authority to refuse network shows and, if so, to cite examples with descriptions of the network and local shows involved.

NAB, Notice - Although all networks and their owned stations are subscribers to the NAB codes, this question is asked: "Do you have established policies with respect to programming and advertising standards (whether developed by station or contained in a code of broadcasting standards and practices) which guide the operation of the station? If yes, attach a copy of such policy statements, or a summary thereof if policies are not in written form. Describe station policies and practices designed to implement such programming and advertising standards."

The stations are asked to describe the facilities, staff and equipment available for the development, production and presentation of local programs. Under this question is included the name and title of each person engaged in any phase of local program presentation. Another commission question requires a listing of all local programs between Nov. 1, 1962, and Nov. 1, 1963, as to classification (talk, religion, agriculture, entertainment, public service, etc.). Also, the licensee is asked to state whether "these programs have been developed by the station in cooperation with, or to meet the needs of, specific community organizations." In addition, the local programs are to be identified as to day, time and number of weeks scheduled.

During the month of October, 1962, the network stations also are asked the number of public service announcements they broadcast. In addition, each station is permitted to "supply any additional information which will assist the commission in understanding the policies and practices of the station in serving the needs of its community for local programming." The FCC even submits an example of a program which might provide an "opportunity for local self expression."
based upon scandalous material" and constitutes a "personal attack" upon Mr. Cox.

The brief in question (Broadcasting, Oct. 15), was filed by the National Community TV Assn. in behalf of Carter Mountain Transmission Corp., a common carrier first granted, then denied an application to carry Idaho, Wyoming and Montana channels. NCTA charged that Mr. Cox swayed the FCC from its traditional position of claiming no jurisdiction over catv, causing the FCC's "capricious" action.

NCTA alleged no fact that indicates "any impropriety" by Mr. Cox, the commission told the court. Mr. Cox "acted in complete accord with his duties and responsibilities," the agency brief said, and the charges made against him are "nothing but irrelevant innuendo."

The FCC concluded its defense of Mr. Cox by asking the court to rule out any "further participation in the case" by NCTA.

A BAD BLOW TO UHF?
Land mobile users proposal would deter uhf, FCC told

Three Broadcast groups opposed a proposal to allocate television chs. 14 and 15 for land mobile radio use in comments to the FCC last week.

The Land Mobile Section of the Electronic Industries Assn. initiated the proposal by asking the FCC to provide 470-482 mc for land mobile use (Broadcasting, Oct. 1). Ch. 14 operates on 470-476 mc, and ch. 15 on 476-482 mc range. The EIA unit had held the present facilities are overcrowded.

That request drew opposition from the Maximum Service Telecasters Inc. and others. "It would fly in the face of the will of the Congress, explicitly declared at the last session, that maximum development of all 70 uhf television channels is to be encouraged," MST said.

It would hurt uhf development as chs. 14 and 15 are the two most desirable uhf channels, the organization said. Indiana Broadcasting Corp. concurred and called it a poor reward to uhf pioneers "to shunt them off to the upper uhf channels."

Both MST and Indiana noted the 1959 study by the Television Allocations Study Organization which emphasized the greater effectiveness of the lower uhf channels over the upper. The TASO results show that the effective distance for chs. 14 through 40 is about 40 miles and for chs. 41 and up is only about 30 miles.

Workhorse channels • MST gave these figures on the utilization of the lower uhf channels: as of Oct. 4, 1962, of 196 uhf tv authorizations 148 (75%) are on channels below ch. 40 or 39% of all uhf channels; 56 (29%) are on channel 20 or below, or 10% of all channels; only 12% of all authorizations are above ch. 50, or 30% of the channels. MST calculated that the average uhf channel load is 2.8 authorizations, and that there are 5.7 on chs. 14 through 39. "The low uhf channels are thus the workhorse channels of the uhf band." MST said.

MST's land mobile users have not made extensive use of the 450-470 mc band because they consider it less well adapted for all-around use than the lower frequencies.

Manufacturer Interests • MST charged that the Land Mobile Section does not speak for mobile users but only for the manufacturers of such equipment. It also pointed out that the recent all-channel receiver legislation "is replete with express statements that the purpose . . . is to facilitate maximum development of all 82 channels."

Triangle Publications Inc. argued that the proposed allocations are a "contradiction" to the FCC plans to develop the uhf spectrum.

Only American Telephone & Telegraph supported Land Mobile Section's request but said even then the two channels couldn't provide the frequency space that land mobile services require. AT&T said more FCC investigation is needed and referred to the company's proposals in the 1959 inquiry for the development of the 25-890 mc band.

Two balk at transfer of WHHM Memphis

Two minority stockholders in WHHM Memphis last week asked the FCC not to approve an application for transfer of the station on the grounds their rights as stockholders had been violated and that the consideration ($160,000) was below the fair market price.

Joseph P. Trantino and Victor Muscat, trading as Vic-Tran Co., charged the terms of the sale were designed to suit the interests of two persons (William H. Grumbles, president, 51%, and Marie Copp, over 45%) contrary to the interests of the licensee corporation, Mercury Broadcasting Inc. Two weeks ago, Vic-Tran filed suit in Chancery Court of Shelby County, Tenn., seeking a permanent injunction against the sale to Thomas W. Shipp and last week the FCC was asked to either dismiss the application or withhold action pending court action.

Vic-Tran charged that Mr. Shipp, who owned WHHM in 1959-60, took control of the station last May in viola-

tion of FCC rules. The minority stockholders claimed that Mr. Shipp advanced funds to the station, hired and fired employees, signed checks, and performed other functions associated with management.

Mr. Grumbles, Vic-Tran said, left Memphis several weeks ago and has not exercised supervision of the station since, although still retaining the title of president. (Mr. Grumbles currently is general manager of WNYS (TV) Syracuse, N. Y.). Messrs. Trantino and Muscat said that they purchased 20 shares in the WHHM licensee from Miss Copp. The transfer was filed for FCC approval in September.

ETV REQUESTS

Shifts in Neb., Kan. allowed; Pa. asks similar allocations

Tv channel allocations—proposed, granted and denied—played a prominent role in the FCC's business last week, as two states were allotted channels for etv networks, another state asked for a similar rulemaking, and asserted channel shifts were appraised by the commission. A rundown of the happenings:

- Nebraska received 6 channels for its proposed statewide etv network in addition to KUON-TV (ch. 12) Lincoln, among which were ch. 16, unapplied for, in Omaha; and chs. 13 in Alliance and 9 in North Platte (both presently commercial). Other assignments were ch. 3 to Lexington, ch. 7 to Bassett, and ch. 25 to Albion. FCC also assigned two commercial channels to Nebraska, Albion receiving ch. 8 and Superior ch. 4.
- FCC simultaneously with the Nebraska actions provided for a similar statewide etv network in Kansas, shifting ch. 8 from Manhattan (etv station KSAC-TV Manhattan recently surrendered its cp) to Hutchinson and reassigning ch. 11 from Lawrence to Topeka. Topeka also received ch. 48. Other assignments: ch. 9 to Lincoln, ch. 3 to Lakin, ch. 21 to Chanute and ch. 33 to Oakley. Having moved these channels, the commission found it necessary to delete commercial ch. 9 from Garden City, substituting ch. 13, and commercial chs. 21 from Ottawa and 20 from Independence.
- Pennsylvania's Dept. of Public Instruction, in a move similar to the earlier proposals of its midwestern sister states, asked the FCC to allocate channels for a statewide etv network. Channels eyed were: 39 in Allentown, now commercial; 36 in Altoona; 3 in Clearfield (Pa. State U. has asked the FCC for the same allocation); 65 in Harrisburg; 68 in Scranton; and 71 in Shamokin (this would mean the deletion of commercial ch. 65). According to the petition, the proposed channels are all in areas presently void of etv reservations.
- FCC shifted ch. 26 from Richmond, Ind., to the site it occupied prior to 1960, Anderson, Ind. Previously used by WCBC-TV Anderson, the channel was shifted at the request of James A. Chase and William J. Wheat, who want to apply for a cp using ch. 26 and the technical equipment and site of WCBC-TV. The station suspended operation in 1958.
- The commission denied a proposed ch. 3 shift from Sterling, Colo., to Cheyenne, Wyo., on the grounds that the present tv channel assignments in those cities should not be disturbed.
- The same Sterling, Colo., channel was noted in the commission's refusal to grant a shift of ch. 3 from Alamosa to Colorado Springs. FCC said the shift would violate the commission rules on short-spacing.
- FCC invited comments on its proposed allocation of channels in South Dakota, which would add commercial ch. 11 to Lead, etv ch. 9 to Rapid City, and switch the etv reservation in Pierre from ch. 22 to ch. 10.

Ch. 8 losers file court, FCC pleas

Three unsuccessful applicants for ch. 8 in North Carolina's Winston-Salem-Greensboro - High Point triangle launched attacks on the FCC's decision of last month which granted the vhf facility to Southern Broadcasters Inc. (BROADCASTING, Oct. 8).

Jefferson Standard Broadcasting Co. and High Point Television Co. both filed appeals with the U. S. Court of Appeals in Washington. TriCities Broadcasting Co. asked the FCC to reconsider the decision.

Jefferson Standard, owner of WBT and WBTW (TV) Charlotte and WBIG and 19% of WFMY-TV Greensboro, all North Carolina, and of WBTW (TV) Florence, S. C., argued that the commission failed to state "rational" reasons for the conclusions it reached in ranking the applicants and in weighing the significance of the comparative differences.

Jefferson Standard also maintained that TriCities should be disqualified because one of its principals was, with his family, a large stockholder in Jefferson Standard. Jefferson Standard had promised to dispose of its interest in WFMY-TV if granted ch. 8.

High Point called the FCC criteria in its decision "inherently contradictory . . . inequitable . . . [and] unreasonable." High Point said the decision disregards the Communications Act provision for equitable distribution of
Always the Winner
In the Central New York Market!

WSYR-TV
Best Programming
Best Facilities
Best Coverage
Best Talent

There's no beating the best. It isn't as if nobody tried. Competition is keen—and, to give credit where it's due, competitive programming often merits real praise.

But when you consider that the programming service of WSYR-TV is under the direction of executive personnel with an average of 19 years broadcasting experience right here in Central New York, a top talent staff with an understanding of its job and its audience, and a firmly established tradition of being several laps ahead of the field—staying ahead comes kind of naturally.

WSYR-TV does work at it, however, steadily and conscientiously. The results speak for themselves.

NBC—once again the network most people elected to watch...

NBC—the network that drew an Election Night audience nearly as big as the other two networks’ combined...

NBC—the network that always attracts more people whenever all networks cover a national event, whether it is the flight of an astronaut or a Telstar broadcast or a President’s report on a crisis.

The reason? NBC News leadership in bringing world news to the nation rapidly, accurately, responsibly.

*Source: National Arbitron.*
This is NBC—largest single source of news, information and entertainment in the free world.
facilities, because Southern is primarily owned by a Winston-Salem group.

A Drop-in • Ch. 8 was dropped into the North Carolina tri-city area in 1958. In 1961, an FCC examiner's initial decision favored a grant to TriCities. Last month the FCC voted to make the grant to Southern. Three commissioners (Hyde, Craven, Barley) voted for Southern and two (Minow and Ford) for TriCities. Commissioners Lee and Henry did not participate.

Southern is 55% owned by principals of the now-deleted uhf outlet, WTOB-TV Winston-Salem, headed by James W. Coan. It is 35% owned by stockholders of the deleted uhf, WNAO-TV Raleigh, N. C., and by four High Point businessmen.

TriCities is owned equally by Har-grove Bowles Jr., James G. W. Mac-Lamroc, R. H. Nutt and Ralph C. Price. Messrs. Mac-Lamroc and Price each own one-third of WKIX Raleigh, N. C. High Point principals include George W. Lyles Jr. as president, and Paul Ingie, David A. Rawley and Dorothy P. Terry. Mr. Lyles owns 15% of WTNC Thomasville, N. C., and Mr. Ingie 69% of WOHs Shelby, N. C. Mr. Rawley and Miss Terry have interests in the High Point Enterprise and the Burlington (N.C.) Times-News. Mr. Ingie is editor of the High Point Enterprise.

**SECRET PROBE OF PENTAGON SECRECY**

Rep. Moss to investigate, but just what is under wraps

The staff of the Government Information Subcommittee is investigating the government's controversial news dissemination policies in the Cuban crisis. A year ago, Rep. Sam Archibald, staff director, said investigators have questioned information officers—including those at the policy-making level—at the White House, Defense and State Deps. about policies broadcasters and newspapermen have criticized (Broadcasting, Nov. 6).

He said a report will be submitted to Rep. John E. Moss (D-Calif.), subcommittee chairman. He said the report will enable the subcommittee to decide—if it's reconstituted in the next Congress as expected—whether to hold hearings.

There is some question about how much will be made public in the inquiry.

Mr. Archibald said details have been given the staff, but the information involves military security and he can't release it. He said if hearings are held, the classified nature of the material would require the subcommittee to hold most of its hearings behind closed doors.

Opportunity To Explain • But he said hearings will enable government information officers to explain their acts and the subcommittee to "weigh the adequacy" of the administration's information policies.

Rep. Moss has said his subcommittee will review government plans for releasing information under varying conditions of emergency. Mr. Archibald said Rep. Moss wants to know if there is such a system in existence or if policies are improvised as situations arise.

The Pentagon has been criticized for requiring that personnel report the substance of interviews with reporters to supervisors. The State Dept. has a similar order.

Another controversial point is Assistant Secretary of Defense Arthur Sylvester's statement that news is part of the government's "weaponry" in the Cuban crisis—which caused newspapers to charge the government is attempting to manage the news. Assistant Secretary, Mr. Lyles, president of CBS News, said the Sylvester statement makes it "imperative" that the government remove the restrictions the White House asked newsman to impose on themselves in covering the Cuban crisis (At Deadline, Nov. 5).

The Defense Dept. said it may set up a centralized office to establish standards for classifying and declassifying information.

A spokesman said the office would help "increase the flow of news." The Moss subcommittee has urged creation of such a centralized office, holding it would permit reporters to appeal for declassification of information they do not feel should have a secrecy label.

**Harkins asks ch. 20 for Phoenix pay tv**

A former broadcaster-theater owner last week asked the FCC to allocate ch. 20 to Phoenix and announced plans to apply for a pay tv station there if the channel assignment is made.

Dwight Harkins, a pioneer in fm multiplexing who developed a system in wide use, made his request of the commission in a one-paragraph petition. He said he proposed to operate a pay tv outlet only, with no commercials or free programming at any time.

Mr. Harkins said he would use a pay tv system he has invented, different from all other systems proposed or in use. "I would rather not expose the technical details . . . at this time," he said. But he said both the audio and video signals would be scrambled.

Ch. 20 is not currently assigned to

Mr. Harkins holds the Muzak franchise for Phoenix and in the 1950’s equipped more than 75 U. S. fm stations for multiplexing. He presently owns an electrical repair firm in Phoenix.

Appeals court backs FCC cutoff date

The U. S. Court of Appeals in Washington last week upheld the FCC practice of announcing a cut-off date after which the agency refuses to accept mutually exclusive applications to those already pending. A unanimous court turned down an appeal by Century Broadcasting Corp. which in 1961 had sought to apply for a new am on 1510 kc in Jeannette, Pa.

Century tendered its application after the announced cut-off date had expired and the court ruled the FCC was within its rights in refusing to accept the application. The court noted that Century did not file its application until four months after competing applications had been set for hearing.

NIXON IN DEFEAT

Radio, tv get his praise, but newspapers are blasted

Richard M. Nixon, in a bitter farewell to public life, asailed the press last week for the way it reported his unsuccessful campaign for governor of California, but he had high praise for television and radio.

The former vice president, in conceding the election to Gov. Edmund G. (Pat) Brown, told a televised news conference:

“I think that it is time that our great newspapers have at least the same objectivity, the same fullness of coverage that television has. And I can only say thank God for television and radio for keeping the newspapers a little more honest.”

Mr. Nixon singled out only one newspaper reporter—Carl Greenberg of the Los Angeles Times—as having given him coverage he considered fair, objective and complete.

To the assembled reporters, he said: “You won’t have Nixon to kick around any longer.”

Mr. Nixon also swiped at the FCC. Declaring that he didn’t think publishers should tell their reporters how to write their stories, he added: “I don’t believe the FCC or anybody else should silence the one voice raised in the wilderness” in his behalf.

This was an apparent reference to the FCC inquiry to KTTV (TV) Los Angeles about complaints that station’s Tom Duggan had spoken out strongly in support of Mr. Nixon’s candidacy. As a result of the inquiry, the station added a 15-minute program to its schedule to present the Democratic viewpoint.

This FCC action was attacked last week in a front page column of the Hollywood Citizen News. Dave Heyler, the author, called the action “the most diabolic and vicious attack on free speech ever perpetrated on a free America.”

WLYH-TV to identify as Lancaster-Lebanon

The FCC reallocated ch. 15 from Lebanon, Pa., to Lancaster-Lebanon last week (Nov. 7) (FOR THE RECORD, page 92). The action permits WLYH-TV Lebanon to establish main studios in Lancaster and is the latest in a series of maneuvers affecting the CBS-TV lineup in the Central Pennsylvania area:

WLYH-TV will become a CBS-TV affiliate for the Lancaster-Lebanon area effective Jan. 1, 1963, and will be interconnected with two other uhf stations which were linked to carry CBS programs last May: WHP-TV (ch. 21) Harrisburg and WSBA-TV (ch. 43) York (BROADCASTING, May 21, and CLOSED CIRCUIT, April 9). WLYH-TV will maintain its Lebanon studios, according to Roger W. Clipp, vice president of Triangle Stations, WLYH-TV licensee.

WGAL-TV (ch. 8) Lancaster, now primary NBC-TV and CBS-TV, will drop CBS.

KRCK denies group’s charges

A complaint by the Ridgecrest, Calif., chapter of the American Assn. of University Women against the programming of KRCK, that city (BROADCASTING, Oct. 10), contains “inadvertent errors or misstatements,” the station told the FCC several weeks ago.

Victor M. Farel, KRCK owner, said that the survey by the AAUW unit is “quite unrepresentative” of the station’s overall programming. He said KRCK does feature classical and semi-classical music, contrary to misstatements of AAUW, and has “numerous” opinion and informational and public service programs.

He said the intellectual and cultural programs of the station have failed to obtain the support of the complaining AAUW group.

The day Dad gives Jimmy his first shaving gear is a big one for both of them. The father in the background is one of the nation’s adults, who receive and control 98% of the U. S. income.* In the WBT 48-county basic area, adults receive and control most of the $2,690,786,000 worth of spending money** ... and WBT radio has the largest number of adult listeners. Clearly, the radio station to use for more sales is the one that reaches more adults....

WBT RADIO CHARLOTTE. Represented nationally by John Blair & Company.

58 (GOVERNMENT)

BROADCASTING, November 12, 1962
Mr. F. E. Vale, General Manager of Station KLMX, Clayton, New Mexico, reports on the new Gates Ambassador Single Channel Transistor Audio Console:

"The results are not only amazing, they are outstanding and almost beyond belief. We are getting full value from our decision to purchase the Gates Ambassador transistorized console."

Stir your listener's imagination with a completely new programming format built around the Ambassador's touch-control nerve center. For example:

**MUSIC:** ESTABLISH THEME, UNDER.
**ANNCR:** This is Entertainment Central.

**MUSIC:** UP AND UNDER.
**ANNCR:** WZZZ is now programming through the dramatically new touch-control nerve center located in Studio A. Red control-contact Number 8—one of 12 command circuits readied with a special entertainment payload—is in prime position. All systems are go!

**MUSIC:** UP FULL.

The totally new 12-position touch-control nerve center provides almost unlimited programming from a wide range of tape and ET sources. Turntables and tape machines are readied and then activated at the precise moment by the Ambassador's illuminated touch-control keys. You have complete control coordination.

And, as illustrated above, you can capitalize on this new switching concept with an exciting new format right out of the space age—emphasizing push-button command and control communications.

Let us tell you more about the Ambassador.

Our 40th Year, 1922-1962
ITC SHARE-REVENUES PLAN

Distributor offers 'after hours' tv programming to stations in return for percentage of revenues

Independent Television Corp. thinks it has hit a nerve that "触ches upon an industry-wide problem."

The film distributor said last week its "after hours" plan has caught the attention of a number of tv stations, some outlets in major markets. The plan offered to supply programs to stations without charge for telecast in hours which come after the normal sign-off time (BROADCASTING, Oct. 29).

Any revenue gains from sale of time to advertisers would be shared with ITC.

Latest development, said Abe Mandell, ITC's executive vice president, is a flood of requests from stations asking for further information.

Mr. Mandell notes that "it seems as if almost every station has some problem that it believes can be answered by our offer."

"An Arizona station asked if we would accept acres in a new land development in return for programs. There are stations that have no interest in telecasting later at night but would like to start earlier in the morning."

"Some have been thinking of cutting back their telecast schedule because of the difficulty in selling late-night time."

Help Wanted - Mr. Mandell said the latter stations asked to be included in ITC's plan so they could continue on a 24-hour schedule. Others (in Seattle and Philadelphia, for example) had found full-time programming too costly but are willing to try again via the ITC-proposed route, particularly if some revenue might be revived.

ITC said after an inquiry is received

an analysis is made based on each market's nature and size; the current programming situation and the "ITC history" in the area. The station then is advised of programs available to it and the formula for sharing revenue should any sales be derived. The film distributor provides free prints and asks the station to pay shipping charges plus a nominal handling charge.

Meany foundation plans annual show on NBC-TV

A new foundation named in honor of George Meany, AFL-CIO president, will sponsor an annual program on NBC-TV's The Eternal Light series.

The establishment of the George Meany Foundation to "further the understanding of the ethical principles by which all moral men live," was announced in New York Friday (Nov. 9). The foundation was created by trade union friends of Mr. Meany within the Herbert H. Lehman Institute of Ethics.

The network program was announced as one of the foundation's first projects. This year's program, devoted to the life of William Green, late president of the American Federation of Labor, will be seen Nov. 25 (Sun., 1:30-2 p.m. EST). The Eternal Light is produced under the auspices of The Jewish Theological Institute.

NBC-TV's 'Virginian' extended to 1963-64

The 90-minute Virginian on NBC-TV (Wednesday, 7:30 p.m.) has been extended for a full season, Revue Productions said last week.

The extension apparently settles in part the question asked by program experts as to whether the series would prove successful as a concept (BROADCASTING, Oct. 8).

Also announced were production plans for a pilot in a proposed series for ABC-TV by Warner Bros. for the 1963-64 season and called Ready for the People. The series filming starts today (Nov. 12) on location in Brooklyn. It is being produced in cooperation with the National District Attorneys' Assn. Kings County (Brooklyn) District Attorney Edward Silver is offering his assistance.

Heller-Ferguson Inc. set up in Hollywood

Heller-Ferguson Inc., a new consultant and programming firm, has been formed by Hugh Heller as president and general manager and Allyn Ferguson, vice president in charge of production. Headquartered at 1800 North Argyle Ave., Hollywood, the firm is an out-
And there I was, big as life, on TV
(and in one of the top-40 markets, too!)

Flint-Saginaw-Bay City, of course ... where Helen Luther sandwiches March of Dimes and Salvation Army work in with her daily duties as housewife and mother of three. And where this Civil Defense Director gave area residents the lowdown on near receiver warning systems and sandbag shelters on WJRT's well-attended "In Our Opinion" discussion show.

You see, like most communities, industrial Flint-Saginaw-Bay City has an abiding interest in defense and post-attack survival. But these are just a few of the many interests which abound here-ranging from scuba diving to Little League and coin collecting.

Splendid opportunity, we think, for WJRT's "programming from within" concept. And, in fact, in the past 30 months over 25,000 area people have appeared before Channel 12 cameras to talk about these and half a thousand other interests.

Splendid opportunity for you, too, if you advertise on TV. Because households here (75,000 of them watch WJRT on the average night) have an extra $10 of weekly income*. Or nearly $550 more each year than the national average household to spend for cars, boats, houses or whatever you sell.

Let Harrington, Righter and Parsons carry it from there. Call them in New York, Chicago, St. Louis, Boston, Atlanta, Los Angeles or San Francisco.

Final curtain falls on block booking

U.S. SUPREME COURT UPHOLDS ORDER BANNING FILM SALES DEVICE

Broadcasters now have a green light to choose among feature films offered for tv showing. The U. S. Supreme Court last week unanimously ruled that six distributors of pre-1948 films for tv violated the Sherman Act when they forced tv stations to take packages containing films they didn’t want or not prohibited block booking; it added more stringent provisions to a lower court’s proposed judgment to prevent the practice.

The decision, announced Monday, was notable in three other respects: It was the first written by freshman Justice Arthur J. Goldberg; it was the first decision of the court’s new term, and it came only 20 days after the case was argued (BROADCASTING, Oct. 22).

Supreme Court decisions usually come three weeks after oral argument.

Last week’s ruling brings to a close a government antitrust suit against six feature film movie distributors, brought in 1957. That suit resulted in a guilty verdict by federal Judge Archie O. Dawson of the U. S. District Court in New York in 1961. He found the defendants had violated the antitrust laws. Judge Dawson proposed not only to forbid block booking and tie-in practices, but also to require distributors to put a price on individual films.

The movie distributors appealed that verdict as well as some of the provisions of the judgment. The government also appealed the judgment, holding it was not strong enough.

The distributors affected: Loew’s Inc. (MGM features), Associated Artists Productions Inc. (Warner Bros.); C&C Super Corp. (RKO), National Telefilm Associates (20th Century-Fox), Screen Gems Inc. (Columbia) and United Artists Corp. (independent productions).

Horrible Example - In discussing the illegal contracts, Justice Goldberg illustrated the practice by citing the experience of WTOP-TV Washington, D. C. WTOP-TV paid $118,800 for 99 AAP features, but had to take some “dogs” to get some good films. “To get Treasure of the Sierra Madre,’ ‘Casablanca,’ ‘Johnny Belinda,’ ‘Sergeant York’ and ‘The Man Who Came to Dinner,’ Justice Goldberg said, ‘WTOP also had to take such films as ‘Nancy Drew, Troubleshooter,’ ‘Tugboat Annie Sails Again,’ ‘Kid Nightingale,’ ‘Gorilla Man’ and ‘Tear Gas Squad.’ ”

Because the films are all copyrighted, Justice Goldberg said, “the requisite economic power is presumed.” He thus answered an argument that since the films were only a small part of the tv stations’ programming, the seller’s dominance of the market must be shown before a tie-in practice can be ruled illegal in such cases.

“Moreover, there can be no question in this case,” Justice Goldberg said, “of the adverse effects on free competition resulting from appellants’ illegal block booking contracts. Television stations forced by appellants to take unwanted films were denied access to films marketed by other distributors who, in turn, where foreclosed from selling the stations.” Nor can there be any question as to the substantiality of the commerce involved. The 25 contracts found to have been illegally block booked involved payments to appellants ranging from $60,800 in the case of Screen Gems to over $2.5 million in the case of Associated Artists. A substantial portion of the licensing fees represented the cost of the inferior films which the stations were required to accept. “These anticompetitive consequences are an apt illustration of the reasons underlying our recognition that the mere presence of competing substitutes for the tying product, here taking the form of other programming material as well as other feature films, is insufficient to destroy the legal, and indeed the economic, distinctiveness of the copyrighted product. . . .”

Paramount Decree - Answering the argument that the 1948 Paramount case (which held block booking in theatrical exhibition to be illegal) does not apply to the growth of Archer Productions, producers of radio and television programs and commercials, now owned by Mr. Ferguson and with which Mr. Heller was formerly associated. Mr. Ferguson and Mr. Heller will operate as separate entities.

Besides producing radio and tv commercials for advertisers and agencies, the new firm will offer its programming services to stations direct as a package. (Programming aids, comedy and promotion materials, where needed, and disc jockey and personality talent on request). It will also create an image type of station-community identification similar to those now being serviced by the firm to more than 35 outlets. On one occasion, they urge on five to 1½ minutes in length and consist of from a small jazz combo to huge orchestra.

Mr. Heller was program director of Golden West Stations (KMPC Holly- wood, KSFO San Francisco, KEX Portland, KVI Seattle) before organizing his new firm which is being retained by the stations on a consultant basis. Mr. Ferguson was an orchestrator for name singers.

Screen Gems net up, though gross is down

The net income of Screen Gems Inc. for the fiscal year ended June 30 amounted to a record high of $3,466,294 ($1.37 a share) compared with $2,665,371 ($1.05 a share) for the previous fiscal year, it was announced last week by A. Schneider, president.

The record income was despite a decline in gross to $52,188,900 for $55,821,052 in fiscal 1961. The company’s consolidated statement showed that in the 1962 fiscal year, Columbia Pictures Corp. and affiliated companies were paid $5,960,998, while in the 1961 fiscal year Columbia was paid $10,328,401. Columbia Pictures holds 89% of Screen Gems stock.

Jerome Hyams, executive vice president and general manager of Screen Gems, noted that the outlook for the 1963 fiscal year is promising. He said contracts for film programs to be delivered in fiscal 1963 amount to $25.1 million, 15% higher than at the end of the previous year. In addition, Mr. Hyams said, SG has a record number of 534 half-hours and 132 hour programs for re-run release.

Screen Gems owns WAPA-TV San Juan, P. R., and through WAPA-TV holds a third interest in WOLE-TV Aguadilla, P. R. Screen Gems bought the San Juan properties last April for $1.5 million. The company also is buying KCXP-AM-FM-TV Salt Lake City from Columbia Pictures for approximately $2.5 million. Columbia Pictures bought the Salt Lake City stations in 1959 for $3.1 million.

Screen Gems also owns the Cello- matic Corp. (audio-visual products) and is associated with a local group in seeking a tv license for Sydney, Australia.

In a notice of the annual stockholders meeting to be held Nov. 27 in New York, the following aggregate remuneration of officers was listed:

A. Schneider, president, $52,000; Leo Jaffe, chairman of finance committee and first vice president, $30,083.17; Jerome Hyams, executive vice president and general manager, $52,000; and the following vice presidents—William Dozier, $54,960; John H. Mitchell, $55,
to tv, Justice Goldberg stated: “Enforced block booking of films is a vice in both the motion picture and television industries, and that the sin is more venal (in dollar amount) in one than the other does not expiate the guilt for either.”

Justice Goldberg also refused to accept the explanation offered by C&C Super Corp. that its practices were different from the other distributors and therefore that company should not be found guilty. He stated: “... the thrust of the antitrust laws cannot be avoided merely by claiming that otherwise illegal conduct is compelled by contractual obligations.”

C&C Super had maintained that it bought the RKO features with cash advanced by the Independent Latex Corp. International Latex, it was explained, required that tv stations buying the films pay for them with spot time to be used by International Latex.

In the judgment issued by Judge Dawson, film distributors are prohibited from conditioning the sale of one feature film on the purchase of another. They are also banned from conditioning the sale of films to a group broadcaster on condition he also purchase the motion pictures for all his stations. Any price differential between the package and the individual films, Judge Dawson ordered, must not have the effect of a tie in. He did not bar package film sales or a better price for the package as against single films.

The government complained that this order does not ban the practice of offering a package to one tv station in a market on an all or nothing basis, and, if unaccepted, offering it on the same terms to other stations in the same market—before breaking the package down into individual films. The order, the government also complained, does not bar “unreasonable” differentials between the package price and individual film prices, and it does not require that an adequate description of every film in a package be furnished tv stations in advance of negotiations.

To close these loopholes, Justice Goldberg ordered that the judgments require (1) distributors to quote individual film prices at the same time that they offer packages to tv stations; (2) that they be prohibited from establishing prices for individual films that do not bear a cost relationship to savings made on package sales; and (3) that distributors be prohibited from stalling with one tv station while they attempt to sell the same package to other stations in the area. Under the Supreme Court decision they would be permitted “briefly to defer licensing or selling to a customer pending the expeditious conclusion of bona fide negotiations already being conducted with a competing station on a proposal wherein the distributor has simultaneously offered to license or sell films either individually or in a package.”

There were two dissents to the changes in the judgment orders. Justice John M. Harlan objected, calling the changes “comparatively trivial glosses” upon the District Court’s decree. Justice Potter Stewart joined Justice Harlan in his dissent.

**Tagging along**

*NBC Films’ Hopalong Cassidy has a steady commercial sidekick in Fresno, Calif.*

Last week’s renewal by Producers’ Dairy Assn., that city, was for the 10th straight year. Clifford Ogden, NBC Films’ West Coast sales head, said another familiar note is KJEO-TV Fresno, which has carried the series for all but 2 of the 10 years.

**WFAA-TV sends camera back to Tyler court**

The Billie Sol Estes trial returned to live television coverage last week after a hiatus imposed on the medium by a Texas law which specifies that no witness may hear the testimony of another witness in the same case (BROADCASTING, Oct. 1, 15).

During testimony only film cameras were allowed but last Monday WFAA-TV Dallas, whose equipment was used to feed the trial proceedings to the three major networks, returned its camera to the Tyler, Tex., courtroom of District Judge Otis Dunagan.

The camera was placed inside a specially constructed booth at the rear of the courtroom and precautions were again taken to insure that broadcasting equipment was as unobtrusive as possible.

Coverage of the trial ended last Wednesday when Mr. Estes was convicted of swindling and sentenced to an eight-year prison term.

**RCA Records shifts promoters**

RCA Victor Records has expanded its radio and tv relations department to increase artist promotion.

In the new expansion, Stan Pat has been promoted to manager, West Coast radio and tv relations and artist promotion. Mr. Pat formerly covered the Chicago-Milwaukee-Minneapolis territory.

Augie Blume, who previously represented RCA Victor artists in Baltimore-Washington, will move into Mr. Pat’s former territory.

**New MGM-TV post-1948s**

MGM-TV will release a third group of 30 post-1948 feature films in January.

The new package, titled the 30/63 group, will include “The Blackboard Jungle,” “Silk Stockings” and “Go for Broke.” The two earlier offerings were released in 1961 and in January of this year.
3,000 ATTEND COUNTRY MUSIC EVENTS

BMI passes out honors at WSM's country music festival

The growth of Nashville as a center of the music business was shown last weekend as more than 3,000 disc jockeys, musicians, publishers, composers and record executives met there. Over 250 top songwriters, publishers, artists and recording officials were guests of Broadcast Music Inc. Thursday night at its annual awards dinner. The awards were presented by Robert J. Burton, BMI vice president, and Frances Williams Preston, BMI's southern representative.

BMI's open-door policy for composers is given much credit for Nashville's growth as a music center where writers outside Tin Pan Alley can have their works performed.

The weekend included a series of events during the 11th annual country music festival of WSM Nashville, whose 37-year-old Grand Ole Opry is evidence of worldwide interest in folk and western music, and the fourth annual convention of Country Music Assn., whose 700 members represent various facets of the music industry.

WSM's festival opened Friday with a welcome by John H. DeWitt Jr., president. Governor-elect Frank Clement of Tennessee was the principal speaker. WSM was the host Saturday at the 37th anniversary performance of Grand Ole Opry.

Ken Nelson of Capitol Records, who reported to the membership as CMA president, said tv stations and networks are showing more interest in country music. A CMA survey of all tv stations that brought a 50% response showed 70 stations are using live country talent, 32 are using country music films only and 28 are using both film and live talent, a total of 130 tv stations performing country music. Of the stations 83 use gospel and religious; 88 use no country music; and 56 are not interested.

The CMA survey showed that 57 stations are interested in using well-produced country music films, 39 are "possibly" interested, 16 said no, 15 said doubtful, 3 are interested if the films are sponsored and 2 would accept free films. Canadian stations showed a marked interest in country music.

Surveying radio stations, CMA found that two of 74 fulltime country music stations changed their format in the last year. This was more than offset by the addition of 23 new fulltime country music stations, making a total of 97 stations on a fulltime basis including some 50 kw stations. CMA is preparing a radio kit to aid stations and advertising agencies in using and promoting country music.

Douglas to produce color commercials

An independent television film series producer has announced his firm will produce color film commercials.

Jack Douglas, president of Jack Douglas Co., Hollywood, said last week he has formed Jack Douglas Sales Co. to produce films for industry and "specialized products and services."

Miss Winifred Waring, formerly with Kenyon & Eckhardt Inc., will be supervisor. Larry Krassner, sales manager for the Douglas organization, will direct the sales arm. Headquarters will be at 8833 Sunset Blvd., Hollywood 69.

No financial tie-in

The proposed establishment of Filmways-Sutherland Assoc. by Filmways Inc. (Broadcasting, Oct. 22) will not involve a financial interest by either company in the other, Martin Ransohoff, chairman of Filmways, said last week.

The Sutherland organization will lease certain Filmways' facilities in New York and "take-over" personnel who have been engaged in tv commercial production, Mr. Ransohoff pointed out. Fred Raphael, former production executive at Filmways, has been named president and general manager of the new company.

Program notes...

New office location • Sextant Inc., New York production firm, has consolidated its production offices at the Time & Life Bldg., in New York. Telephone is LT 1-7611.

Trans-Lux earning up • Trans-Lux Corp., parent company of Trans-Lux Television Corp., has reported unaudited net profits of $552,235 (72 cents per share) on 743,037 common shares outstanding for the first nine months of 1962. This compares with a net profit of $465,815 (63 cents per share) on the same number of shares for the corresponding period of 1961.

Spanish series • A new series of 260 half-hour Spanish musicals for radio called Lucho Gatica Canta is being syndicated by Tele-Radio & TV Sales, New York. The program, featuring Lucho Gatica, Latin American singing star, will be offered to Spanish-programmed stations in the U. S. and Puerto Rico.
Hey!
We've changed our name to KNBC!

Psssst! We've changed our name. KRCA/4 Los Angeles is now KNBC/4 Los Angeles. And we've moved to more modern television facilities in the NBC studios here. Of course, our transmitter stays exactly where it is. And we'll continue to provide the same strong coverage in the ever-growing Los Angeles area. We wouldn't have it any other way. Come to think of it, neither would our viewers.
GE engineer envisions space-to-home tv

HE FEELS LOW-COST SYSTEM FEASIBLE FOR VAST, UNDEVELOPED AREAS

Direct television transmission from space to the home set, struck off the list of feasible uses of communications satellites by most top ranking engineers and communications specialists, has one champion.

Mr. Haviland, who specializes in future developments in the space field for GE, made his suggestion public for the first time at the Television Symposium last summer in Montreux, Switzerland. His ideas have been reported with some prominence in Sweden and India.

Simply stated, Mr. Haviland’s belief is that there is a possibility space satellites can be used as transmitters in the sky to cover whole continents with television. He mentions, for instance, such wide undeveloped areas of the world as South America, Africa and Asia, where television is almost non-existent.

“You get a Syncom satellite up and, with the proper power and beaming of its antenna, you can cover all of South America,” Mr. Haviland says.

Syncom is the term for a synchronous communications satellite orbited 22,300 miles above the earth so that its rotation is the same as the daily rotation of the earth. Thus it remains in the same relative position above a particular point on earth.

Power and Directivity • Mr. Haviland figures a transmitter radiating 10 kw, with a directional antenna, could cover the South American continent.

With that amount of power, and the gain coming from a directional antenna, he says, home receiver antennas would not have to be much more elaborate than some used now by many tv viewers in suburban areas.

Mr. Haviland warns that the system he has in mind is a minimum service, “something like two hours a day.” The limit is necessary to conserve power in the satellite.

He agrees the U. S. has no space vehicles powerful enough to orbit a satellite big enough to accommodate a 10 kw transmitter, although he thinks the time may not be far away for that development.

He feels the transmitting elements for 10 kw, with suitable revisions in design, could be carried in a 500-pound spacecraft. The power supply under present conditions would require 10,000 pounds, although new designs for solar silicon cells could reduce the amount to half. If there were nuclear power, the power supply element would need only 1,000 to 2,000 pounds, he said.

So far, U. S. space communications satellites weigh less than 200 pounds. Telstar, radiating about 2.5 watts, weighs 170 pounds, and is orbiting the earth 500 to 3,500 miles up. Relay, the government’s communication satellite scheduled to be placed into orbit next year, will radiate 10 watts and will weigh about the same as Telstar. It will orbit 800 to 5,000 miles above the earth.

In about two years, the National Aeronautics & Space Administration expects to put its first Saturn booster, capable of lifting 20 tons to a 300-mile height, into operation.

Esperanto, Anyone? • One of the major obstacles against the feasibility of worldwide space teletcasts to home viewers is language.

Mr. Haviland doesn’t think this holds water for his system, at least in South America. “If we beam our signals down to a single continent, which is what I am talking about, there is no real problem. Take South America, for instance. Except for Brazil, everyone speaks Spanish. Therefore we’ll use Spanish. And for Brazil, perhaps certain programs in Portuguese.”

In other parts of the world, Mr. Haviland acknowledges that language may be a problem. In Africa hundreds of dialects are spoken, and in Asia even thousands, he agrees. “We would have to pick the most popular or the most basic language and by broadcasting in that tongue make it the lingua franca of the continent,” he explained.

Other objections to space-home teletcasts, such as time differentials and cultural differences, are not germane, Mr. Haviland emphasizes, because he is talking only of broadcasting to one sector of the world at a time.

He agrees with the bearish views on this subject enunciated most recently by FCC Commissioner T. A. M. Craven and AT&T scientist John R. Pierce—but only as they apply to the United States. “In this country,” he said, “we have a comprehensive and mature system of television and we do not need wide area coverage from such a unique system as direct space transmission. This might also be true of Europe. So I agree with Craven and Pierce there. But I’m talking about areas of the world where television, and radio too in most respects, is on the threshold of coming into service.”

Perhaps the most exciting of Mr. Haviland’s ideas is how relatively modest he thinks the cost will be for his project. “I say we can cover South America for about $35 million; to cover the major continents of the world, I’d say $200 million to $500 million.” This would pay for the entire program—from research and development to a full operating system over a 10-year span, he says.

Not Official • His views are not the official GE policy, Mr. Haviland emphasizes, but he notes that GE’s top management has not objected to his expressions on this subject.

Mr. Haviland joined GE 15 years ago, after serving in the Navy’s Bureau of Aeronautics during World War II as a lieutenant commander.

GE will devise pay-tv set fittings

General Electric Co. has contracted to design consumer equipment for a pay-tv system developed by Home Entertainment Co. of America, for use with existing television sets.

Under the system, transmission of programs will be directly to subscribing homes with signals carried through cables installed by local telephone companies.

GE is designing the metering device which will compute the charges for programs watched and a push button selector which will allow the viewer to switch back and forth between regular

---

Honors for Goldsmith

Dr. Alfred N. Goldsmith, honorary vice president of RCA, has been elected a Benjamin Franklin fellow of the Royal Society of Arts of England.

Dr. Goldsmith joined RCA in 1919 as director of research and was responsible for the development of the first commercial radio with only two control knobs and a built-in speaker. He has also made contributions to development of the first color tv tube to be used commercially.

He is co-founder of the Institute of Radio Engineers and was president of that organization in 1928.
puzzle:

Separate the Men from the Girls — (Algebraically)

A group of guys and gals from WMAL-TV's Sales Department, working overtime on a knotty problem,* went to supper in a neighborhood beanery. Their bill came to $12. (This was for food only; no cocktails or other potables were served. These dedicated young people wanted to keep clear heads for their clients.)

"Let's just split it even all around," came the generous offer from the heaviest consumer in the group.

"Let's not," demurred the local Galahad. "If we men pay the two gal's share and then split it, it'll only cost us 50 cents more apiece."

How many men were there in the group? (No value judgments, please. Treat the term "men" in its narrowest biological sense.)

The ability to make lightning calculations of this sort has enormous practical application, so work this out on the back of an old restaurant check and send it along. A small but interesting prize will come your way.

*Solve your clients' problems without working overtime with WMAL-TV's widely discussed, widely watched, hour-long, daily 6:30 P.M. Evening Report. Compiled by Washington's largest, most experienced, best equipped news staff, the Evening Report is a "must" for well-informed Washingtonians, a great buy for well-informed sponsors. Check H-R for current availabilities.

Puzzle adaptation courtesy Dover Publications, New York 14, N. Y.
commercial programs and one of the two planned channels offering subscription programs.

Home Entertainment Co. of Los Angeles, franchised by HECA, has signed commitments with the General Telephone Co. of California to install the cable system in Santa Monica, Calif., where operation is scheduled to begin in 1964.

Zenith sales, earnings reaching new records

Zenith Radio Corp.'s sales and earnings for the third quarter and the first nine months of 1962 were at new highs stemming from continued increases in sales of tv-radio and other products the company said Thursday. The nine-month earnings rose 17% to nearly $11.6 million on sales of $227 million, up 21% from last year's previous high for sales.

Zenith claimed its monochrome tv set unit sales achieved "the highest percentage of industry sales in history," but declined specifics. Late in October, however, Zenith announced sale of a million units several weeks earlier this year than last.

Technical topics...

New Norelco • North American Philips Co., New York, has introduced a Norelco four-track stereo recording and playback transistorized tape recorder featuring the new fourth speed of 15/16 per second for up to 32 hours of recording on a standard 7-inch reel. Called the Continental 401, it records stereo and monaural. Suggested list price is $399.50.

Sweep generator • A new sweep generator which is designed to simplify optimum alignment of video tape recorders is being distributed by Visual Electronics Corp., New York, for Allen Electronic Corp., Palo Alto, Calif.

Adler earnings up

Alder Electronics Inc., New Rochelle, N. Y., manufacturer of uhf translators among other broadcast and electronic apparatus, reported net earnings after federal taxes of $440,000 (65 cents per share) for the fiscal year ended June 30. This is an 88% increase over the 1961 net earnings of $234,000 (35 cents per share). Per share earnings are based on 671,754 shares outstanding at the June 30 date compared to 670,504 shares last year.

Sales for the year were $16,624,000, an 85% increase over the prior year's $8,963,000.

Set output and sales continue upwards

Production and sales of tv and radio sets reached new highs in September, the Electronic Industries Assn. reported last week. In tv, 731,517 sets were produced and 731,100 receivers sold by distributors. In radio, a total of 2,196,371 sets were made and 1,255,346, excluding auto radios, were sold by distributors. These were the highest figures in both categories for the year so far.

Cumulative totals for the nine months of the year:

THE MEDIA

GOLDEN WEST TO TRY PAY TV

Preliminary organization is set up but two-year study is planned before group goes into operation

Golden West Broadcasters, owner-operator of four major market radio stations plus a majority interest in the Los Angeles Angels, baseball team, is adding pay tv to its interests. GWB's intention to invade this new field was revealed last week with the appointment of Norman Boggs as general manager of this phase of GWB's activities. The division does not even have a formal name as yet but Golden West Subscription Television or Golden West Pay TV are under consideration.

Two-Year Study • Mr. Boggs, who resigned last month as president of KGIL San Fernando, Calif. (BROADCASTING, Oct. 22), will begin his new duties by exploring every aspect of subscription television, from Zenith's Chicago test of broadcast service and Paramount's Palm Springs cable system in the mid-1950's to the current tests in Toronto (using the Paramount wired system) and Hartford (with a scrambled broadcast signal). At the conclusion of his research, for which up to two years is allowed, Mr. Boggs will make recommendations to GWB for its own pay tv operation.

"We expect Mr. Boggs to dig into every phase of pay tv," GWB's executive vice president, Loyd Sigmon, said last week. "When he is through we want firm recommendation as to what kind of system we should have, what kind of program service we should offer and what the economics of the operation should be."

Mr. Sigmon reported that he had reached a number of tentative conclusions regarding pay tv as a new GWB operation, but he emphasized that these are subject to drastic alteration if they are not upheld by Mr. Boggs's research. "For instance, our present thinking is to distribute our program service to subscribers via the broadcast method, using a uhf band to transmit scrambled signals unsyncrambled at the receiving end by a coded device of some sort. But we don't intend to close our minds to wire or any other method which may turn out to be more feasible."

Printed Circuit • If the scrambled signal procedure is followed, Mr. Sigmon said, the unscrambler would prob-
A STROKE OF ACCURACY
...not luck makes THIS the outstanding and ONLY complete master clock system in broadcasting today.

From the master clockmaker of over 100 years—the standard-bearer, by which Swiss watches are timed for accuracy—comes a completely integrated system of master clocks with the widest selection of secondaries.

Precision-engineered for:
ACCURACY
RELIABILITY
FLEXIBILITY
at Low Installation Costs to you.

ACCURATE:
Guaranteed within 5 seconds per month. Sweephand advances in one-second intervals. All secondaries advance simultaneously. All studio clocks constantly on-target.

RELIABLE:
Entire system, (all secondaries), unaffected by sudden power outages. No extra batteries for secondaries.

FLEXIBLE:
System can drive program automation unit, assuring perfect synchronization with the studio clocks. Choice of 38 styles for secondaries—from traditional to modern, any decor.

LOW-COST INSTALLATION:
Simple — economical! No extra power lines to each clock. Easy maintenance. Pendulum is free of typical clockwork mechanisms. No clock specialists required.

AND MOST IMPORTANT—YOU CONTROL YOUR OWN SYSTEM!
Whether you are building a new Studio, planning it, or simply disturbed over current maintenance and breakdown problems—contact your Visual Engineer for a precision-made system, economically "packaged" for your needs. Or write to Visual for complete details on the FAVAG Master Clock System.

VISUAL ELECTRONICS CORPORATION
356 West 40th Street • New York 18, N.Y. • Tel: 6-5840

FAVAG systems now in operation by leading broadcasters in New York, Pittsburgh, Los Angeles, Roanoke, Hartford, Hollywood, Baltimore, Ames; Montreal; Ottawa; and Halifax.

FAVAG reports J. E. Newman, Chief Engineer for Roanoke's WDBJ-TV, a Favag master clock system user since early 1961. "The dependable, precise second movement has proved ideal for our broadcast requirements."

The gracefully styled master Favag clock enhances the decor of Newman's private office, while acting as the nerve-center for the station's clock system.

This Favag secondary, located in the announcer's console, has an oil bath movement for complete silence. Other secondaries are located in the Film Projection VTR room, the main studio, the Master Control room and in the news editing room.

Additional Favag secondaries are throughout the building in corridors, offices, control rooms and the WDBJ reception area.

THE ROAD TO MARKET
MUST PASS MAIN STREET
To reach Main Street, U.S.A., turn at Mutual.
Main Street, U.S.A. is the big "buy-way"—the street
that sells through local radio. Mutual owns Main
Street, U.S.A. lock, stock and big town—with 453
local affiliates everywhere.
If you want to sell where
the buying is biggest, check
the signpost, turn at Mu-
tual. LANDMARK: Mutual
delivers 97 of the top 100
Main Streets in America.
Mutual Radio
A Service to Independent Stations

ably be a card bearing printed circuit,
not unlike those used to open the gates
of parking lots which some companies
maintain for their employees. The cards
would be changed monthly, the old
card being sent in by the subscriber
when he receives a new one for the
month ahead. The returned cards
would be used in billing, he said, adding that
quite possibly this would be handled
by a credit card organization, whose
other services might also be made avail-
able to GWB pay tv subscribers. Pre-
liminary talks with Diners' Club execu-
tives have evoked considerable interest,
Mr. Sigmon reported.

Instead of mounting a descrambling
device on the present TV sets of sub-
scribers, Mr. Sigmon suggested that
GWB install new TV sets with a fixed
dial permanently tuned to the pay-tv
frequency, leased to subscribers in
much the same way the telephone
companies rent their instruments to
the users of their service. There
would be an installation charge of $60.00
and he said he had no idea what it
would be, pending exploration of the
cost of manufacturing the one-channel
receivers.

If a cable is used in place of a broad-
cast channel to deliver programs to pay-
ing viewers, the cable can also be used
profitably to provide other services dur-
ing hours when it is not needed for
pay TV. Mr. Sigmon pointed out that
the circuits in the cable could be util-
ized for reading gas and/or water
meters, with computing equipment
recording the reports of usage and aut-
matically making out the bills for the
gas and water consumers.

Buttons for Reaction • With its own
receiving sets, GWB could add but-
tons enabling subscribers to register
their pleasure or displeasure with what
they are viewing, Mr. Sigmon noted.
The sets could also include a clock
device to register tune-on and tune-off
times "giving us a built-in rating sys-
tem of our own as well as providing a
record of viewing for billing pur-
poses."

As to billing, he said that under con-
sideration is a combination plan which
offers the subscriber a chance to buy
all the station's programming for a
fixed monthly fee, all of one type of
programming (sportscasts, for ex-
ample), also for a fixed fee, or individ-
ual programs individually priced.

The program plans for the pay
television service are extremely nebu-
los, Mr. Sigmon stated, but he noted
that sports programming will undoubt-
edly play an important part. "One rea-
son for our interest in pay TV is to
protect our investment in the Angels."
Stage shows from New York and Las
Vegas presented live or on tape would
have high audience interest, he believes,
and he added that color receivers
would be available to subscribers for a
slight extra fee.

During times when pay program-
ning is not offered, the station may
offer educational features or other pub-
lic service programming, unscrambled
and available without charge not only to
subscribers to the pay-tv service but
to any owner of a TV set able to receive
GWB's UHF channel. "All of this is
going to cost money," he declared. "I
wouldn't want to inaugurate a pay TV
service in Los Angeles, say, unless a
minimum of $10 million was available.
And to provide the kind of service that
will make subscribers good pay cus-
tomers—and happy to be so—is going
to take a lot of professional know how,
both in the programming and technical
phases of the service."

A potential partner in GWB's con-
templated subscription TV program ser-
vice is Autry-Sigmon Communications,
a microwave relay carrier system de-
signed to serve West Coast community
antenna systems. ASC, owned by Mr.
Autry and Mr. Sigmon, has recently
received a grant to build and operate
a microwave relay connecting Los An-
geles with San Luis Obispo (about half-
way between Los Angeles and San Fran-
cisco) and is applying for a second
such relay between San Luis Obispo
and the Bay City to provide L.A.-S.F.
service. Conceivably, KMPC, which
now feeds play-by-play broadcasts of
the Angels during the summer and the
Los Angeles Rams, pro football team,
in the fall-winter season, to a special
radio sports network, could supply
closed circuit video coverage of these
games to ctw operators as an intro-
duction of pay-tv sports programming
into the ctw communities along the
coast. The Golden West station in San
Francisco, KSFO, could similarly pro-
vide coverage of the San Francisco
Giants and the pro football 49ers of
that city, to whom it now gives regional
radio coverage. This kind of TV service,
or any kind for that matter, would
have to be arranged for by new con-
tracts, as the Golden West stations
presently have only radio rights to the
baseball and football games.

Earl Culm of Dallas, Tex., is con-
sulting engineer for GWB's new pay-tv
project. Dowe, Lohnes & Albertson
serve as Washington legal counsel for
this as well as the organization's other
interests.

KALF goes on air in Mesa

KALF Mesa, Ariz., held its grand
opening Oct. 27 with an afternoon
open house at 930 Country Club
Drive. The new station operates with
10 kw daytime on 1510 kc. Its mail
address is P.O. Box 1510 and phone
is 964-5641. Sheldon Engel is president
and general manager. KALF is licensed
to Maricopa County Broadcasters Inc.

BROADCASTING, November 12, 1962
YOU MAY NEVER SEE SUCH JUMPS*

BUT... WKZO-TV Can Make Your Sales Grow by Leaps and Bounds in Greater Western Michigan!

If you want the greatest area coverage in Michigan outside Detroit, WKZO-TV will head your list.

NCS '61 tells why. Daily, nightly, weekly, WKZO-TV reaches more homes than any other Michigan station outside Detroit. 456,320 homes, to be exact, in 30 Western Michigan and Northern Indiana counties. It's a market SRDS credits with annual retail sales of over two and one-half billion dollars.

Avery-Knodel has all the dope. And if you want all the rest of outstate Michigan worth having, add WWTV, Cadillac/WWUP-TV, Sault Ste. Marie to your WKZO-TV schedule.

*Kangaroos can cover 42 feet at a bound, clear heights of 10½ feet.
EDITORIAL BY COMMITTEE?

NAB Dallas meeting hears that several heads may be better than one in preparing editorials

Southwest broadcasters were urged last week to consider breaking away from the personal journalism traditionally associated with newspaper editorials and experiment with a committee system to determine editorial viewpoints.

Newspaper-owned stations need not necessarily reflect the positions of their "parents," but ought to establish their own stands on issues, some of which may conflict with the parent newspaper point of view, members attending the NAB fall conference in Dallas were told Friday (Nov. 9).

The speaker was John F. Dille Jr., president of the Communicana Group Stations (WSJW-TV, WTRC-AM-FM both South Bend-Elkhart, and WKJG-AM-TV Pt. Wayne, all Indiana) and Truth Publishing Co., of Indiana. The combination newspaperman-licensee, a member of the NAB editorializing committee, was a participant on a newspaper editorializing panel.

Favors Differences • "I think shades of difference or diametric difference are all right," Mr. Dille said. He asked whether an editorial couldn't represent many voices, a consensus of the board of directors, staff or even of members of the community.

In another discussion of editorials, NAB President LeRoy Collins told the conference at a Friday luncheon that the association would publish early next year a revised edition of its booklet on editorializing which would contain an "expanded set of broad guidelines to help the growing number of broadcasters who speak their convictions on important issues."

Gov. Collins also revealed that NAB would sponsor a local version of an editing seminar which would include the fields of news gathering, reporting and interpretation during the annual state presidents conference in Washington next February.

On Nixon • Asked at a news conference to comment on former Vice President Richard M. Nixon's remarks concerning press responsibility, Gov.

Collins said he thought some of the Californian's statements were a great compliment to broadcasters but that his comments about a biased press were, while understandable, not excusable (see story, page 56).

Formal presentations at the Dallas meeting were similar to those made at earlier full conferences in Atlanta, New York and Chicago. The next conference is scheduled at the Muehlbach in Kansas City Nov 12, 13.

Next-door property purchased by NAB

The search for a new headquarters for NAB ended last week.

The association announced purchase of the property next door to its present building in Washington, D. C. (CLOSED CIRCUIT, Oct. 22). The announcement was made by Clair R. McCollough, board chairman, and LeRoy Collins, NAB president.

The price for the property (6,900 square feet) at the corner of 18th & N Sts., northwest Washington, was not announced. It is understood to be about $425,000.

The deed, filed with the District of Columbia Recorder of Deeds on Nov. 6, carries D. C. recordation stamps in the value of $2,125. This is supposed to represent 0.5% of the purchase price.

The property, now used as a parking lot, was bought from the National Presbyterian Church, located across N Street from the present NAB headquarters building. The church bought the land in 1953.

There are no specific building plans and no date has been set for beginning construction. It would be some thought given to construction of a single new building covering both the present and the newly purchased land. This would require razing the present headquarters, at 1771 N St.

NAB moved into its present building (a converted private town house) in 1946, buying the land and building from the Canadian Military Mission. The land is over 7,000 square feet.

Radio's best listeners have high incomes

PULSE SURVEY EXAMINES ABOVE-$7,500-FAMILY AUDIENCE

A study of the U. S. radio audience released last week indicates that relatively high income families make up the largest segment of "heavy" radio listeners.

"Dimension '62," prepared by The Pulse Inc., New York, for four national radio representative firms "as a contribution to the industry," represents 2,000 in-house interviews conducted March 20-31, 1962. It characterizes the audience by age, income, sex, education, place of listening (at home, in car, etc.) and provides an hour-by-hour breakdown of who's listening from 6 a.m. to midnight.

A few highlights:

• Of the 54,662,000 households in the U. S. (reported by the U. S. Bureau of the Census), 49,844,000 are radio homes.

• Of these radio homes, 14,081,000 (28.3%) fall into the $7,500 or above average income group.

• These high income radio families make up 35.4% (4,411,000) of those families which do the "heavy listening." (Pulse defines "heavy listening" as 11.8 hours total per family per week-day).

• High income families also make up 30.8% (3,838,000) of those homes characterized as "light listeners" (averaging 1.3 hours of total listening per week-day).

• The unduplicated radio audience consists of 38,455,000 radio homes (77.2%) on an average week day.

• The average total number of hours listened per family per weekday is 4: 54% at fixed, in-home sets (2.2 hours); 25% at movable in-home sets (1 hour); 13% at auto sets (0.5 hours) (these are March figures—out-of-home listening would presumably be greater during the summer); 8% at other places (undefined) (0.3 hours).

Peak years for radio just ahead—Sweeney

Kevin B. Sweeney, Radio Advertising Bureau president, claims radio's growth in the late 60's and early 70's will be based on its "ability to capture virtually all adults for an average of nearly two hours a day through its simple availability." He told the San Diego Advertising Club last Wednesday (Nov. 7) that radio is "probably two or three years from its greatest growth as an advertising medium."

Comparing the outlook for radio with that of other media, the RAB executive suggested that newspapers will have "the most serious growth problem from 1965 on, because there is apparently no solution to the economics of their dis-
Catch-2

"Don't waste your time," Doc PhD told him.

"There must be other stations in Eastern Iowa."

"We disappeared them."

"Read me your last line back."

"Read me your last line back."

"Not my last line—your last line."

"We disappeared them."

"How can you disappear a station?"

"Atrophy."

"A trophy as in coveted award?"

"No. Atrophy as in a tv set's front end."

"Where?"

"In Eastern Iowa. The Darwin of the air waves* has chronicled evolution at work. Because WMT-TV (Channel 2) (CBS television for Eastern Iowa) is number one in share of audience in all time periods from sign-on to sign-off, Sunday through Saturday, many channel selectors of the front ends of sets in the area have atrophied."

"There must be a catch."

"Yeah. Catch-2, as Eastern Iowans do."

*ARB. The Katz Agency, our national reps, has additional anthropological and technical data.
OAB TOLD ABOUT MEN AND MACHINES

Denenholz, Harrison, Ford address Columbus meeting

The value of the radio salesman and the usefulness of the computer were among the subjects explored last Thursday (Nov. 8) at the opening of the Ohio Assn. of Broadcasters fall meeting. The two-day session in Columbus also heard FCC Commissioner Frederick W. Ford urge the repeal of the political broadcasting section of the Communications Act (see story, page 27).

Computers are here to stay and broadcasters are going to have to learn to live with them, Daniel Denenholz, vice president and director of research and promotion, The Katz Agency Inc., New York, told the OAB.

He offered four suggestions to help station operators adjust to the "computer age."

First, he said, keep informed about what's going on; find out all you can about electronic data processing as a system.

Second, he suggested that stations urge TiB and RAB to make arrangements to work with agencies and research services to coordinate data requirements and find out and evaluate from the point of view of the over-all spot medium, the input data, the value judgments and assumptions being fed into the machines vis-a-vis other media."

Third, Mr. Denenholz urged broadcasters not to "risk the danger of short-changing your medium because of insufficient data." He said that in self-protection broadcasters should be "realistic about furnishing audience data by to satisfy reasonable agency requirements—once they are clearly defined."

His final suggestion was that broadcasters encourage research designed to replace subjective assumptions with objective facts.

Formula for Sales • The radio salesman of today can be successful if he knows intimately both his medium and the products to be advertised, Thomas Harrison, vice president, Blair Radio, Chicago, told the meeting.

He indicated that the "blue-sky" salesman of the past is gone. The two most important characteristics of the radio salesman of today are enthusiasm for his medium and a keen knowledge of radio and advertising. He noted that Blair salesmen work closely with other units in the representative organization, such as research, planning, promotion and advertising, to achieve what Mr. Harrison calls the "creative" sell.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KVON Napa, Calif.: Sold by Jack L. and Alyce M. Powell to Jan-Lar Inc. for $275,000. Jan-Lar is owned equally by Lawrence W. Scheer and Janice Lynn. Mr. Scheer is a reporter for KTLA (TV) Los Angeles and Miss Lynn is an actress. Station is fulltimer on 1440 kc, 500 w. Broker was Blackburn & Co.

• KBIC-TV Los Angeles: Sold by John Poole to Martha W. Mills and H. C. Young Jr. for $180,000. Mr. Young Jr. along with Walter Duke owns WENO Madison, Tenn.; Mrs. Mills plans to buy Mr. Duke's half interest in WENO. The Young Jr. and Mills combined ownership of KBIC-TV will then be transferred to Central Broadcasting Corp., licensee of the Madison station, making that company the parent (95%) of KBIC-TV licensee Central Broadcasting of California. KBIC-TV, now dark, operates on uhf ch. 22, with 540 kw.

APPROVED • The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For
Network radio looks strong in new study

Robert A. Pauley, ABC Radio president, and Albert E. Sindlinger, president of Sindlinger & Co., asserted last week that network radio is reaching three times the audience previously estimated.

They drew this conclusion from the first results of studies being conducted for ABC Radio by Sindlinger.

In releasing the data, Mr. Pauley pointed up Sindlinger's figures showing that increased audiences are being attracted not only to ABC Radio but other network radio shows (Sindlinger sample is based on 28,000 interviews per month, with its make-up changing as compared to a fixed panel).

Sindlinger's appointment to service ABC Radio was announced Sept. 11 and details released then on the methods used (BROADCASTING, Sept. 17).

ABC Radio, in the meantime, announced its intention to raise rates at the start of next year (BROADCASTING, Nov. 5). Its increased audiences are cited as one of the basic reasons for the rate hike.

Mr. Pauley said that the network next week will start a series of cross-country presentations showing the new data to agencies.

Washington shirked news problem—SDX

Neither the White House nor the Congress seems ready to take positive steps to find an answer to "the major American problem" of secret government in Washington, the annual report of the Freedom of Information Committee of Sigma Delta Chi, national journalistic society, concluded Friday.

Close contact during the year with the federal government, study of government news policies and an exchange of letters with President Kennedy and congressional leaders disclose that there has been "no major change in the bureaucratic censorship" carried on through the withholding of records and information from the public, according to V. M. Newton Jr., committee chairman.

Mr. Newton is managing editor of the Tampa (Fla.) Tribune.

Mr. Newton was encouraged by gains in the campaign for laws requiring state, county and city governments to keep their records and meetings open to newsmen and the public. He said 25 states have adopted one or both of SDX's model laws for open records and open meetings.

He said President Kennedy has expressed "doubt as to whether the fundamentals of the problem are susceptible of being dealt with by statute." Similar responses came from congressmen, he said.

Mr. Newton thought the fight by tv-radio newsmen and of photographers to cover trials and hearings received "a serious setback" from the tightening of a ban on photo and broadcast coverage by federal judges and from the general "atmosphere of antagonism" among lawyers at the annual meeting of the American Bar Assn. last summer.

The report cited examples of tv-radio coverage bans in the Indianapolis milk price hearing by the Federal Trade Commission and train derailment hearing by the Interstate Commerce Commission at Missoula, Mont.

AB-PT buys Florida site

Florida's Silver Springs, a scenic tourist attraction, has been acquired by American Broadcasting-Paramount Theatres Inc., New York.

Silver Springs, located near Ocala, Fla., is the second attraction center in Florida acquired by AB-PT. The company also owns Weeki-Wachee Spring, near Tampa.

AB-PT sold its interest in Disneyland last year, but continues to operate food concessions in the amusement park.

Phononews reported latest news medium

A new advertising medium which operates like the telephone companies' time and weather reports is being introduced to broadcasters in the Southwest by Jack Roth, president and general manager of KONO San Antonio.

Although the system, called Phononews, reportedly has operated in San Antonio for a year, Mr. Roth wouldn't talk about the venture last week. He said he isn't ready to release information.

But others say he has been offering the system to stations as a new way to sell advertising time. One Texas station reportedly has already bought rights to use the system.

They say it works this way: a station records late news items, plus paid advertising and station promotions, and hooks the recording to a telephone ex-

$50,000.00 (or less) DOWN!

SUNNY WEST—Based on cash flow record, this fulltime radio station can pay out $185,000.00 total price in ¾ of required time. $50,000.00 down!

SOUTHWEST—Fulltime radio station with owner-operator profit of over $25,000.00. Priced at $90,000.00 with $30,000.00 down.

NORTHWEST—Daytime-only facility grossing $45,000-plus annually. $5,000.00 in cash and accounts receivable included. Total price of $57,500.00 with $16,000.00 down.
change. In the meantime, listeners have been told the telephone number to dial to hear the latest news.

It's understood that stations buying Phononews pay a royalty for the idea and the name.

The Texas station understood to have purchased Phononews is said to have reported 38,000 daily calls during the peak of the Cuban crisis and a daily average of some 10,000.

The system now appears in some danger of losing its news sources. Mr. Roth originally relied on regular United Press International service and AP for Phononews items. But UPI has since informed Mr. Roth its service may not be used for this purpose. Last week, AP said it is considering whether its contracts permit its news to be employed for Phononews.

UPI believes Phononews ought to pay a proportionate share of the cost of covering the news. The news service feels that Phononews is a "new" news medium that competes with broadcasters and publishers who are paying, wire-service subscribers. UPI also said last week that its news coverage is available to Phononews in the same manner it is to broadcasters and newspapers—on a contractual basis.

Mr. Roth didn't appear worried last week about UPI's position. He indicated his major concern at the moment is in reaching agreements with various telephone companies around the country to clear the way for wider distribution of Phononews.

Improved status shown in H&B report

H & B American Corp., Beverly Hills, Calif., operating 22 community antenna tv systems in the U. S. and Canada, last week said that its operating earnings before depreciation (cash flow) in the fiscal year ended July 31, 1962 were $1,186,035 or 46 cents a common share as compared with $322,008 or 13 cents in the like 1961 period.

David E. Bright, president, in his report said the company's goal in the next 12 months is the addition of some 10,000 new subscribers to the present 68,800 through continued growth in its operation and from the construction of new cable systems.

Revenues for fiscal 1962 were $3,845,768, double the $1,928,773 generated by the company's community antenna television systems the previous year, Mr. Bright said. H&B American now is devoted exclusively to the catv field.

Net income in 1962 after depreciation and amortization charges but before special items was $66,214 and with special items was $225,928. This compares to a net loss in 1961 after depreciation and amortization but before special items of $41,455 and a net loss with special items of $259,188, Mr. Bright's report said.

The special items are retroactive adjustments with respect to renegotiation refunds, federal income tax and expenses of prior years, and expenses incurred in connection with proposed public financing.

Kentucky's etv goal: tv in every classroom

Television classes in every classroom in the state by 1963 is the stated aim of the Kentucky Authority for Educational Television. The chairman of the authority, Roy Owlsley, admitted this goal is "a little too optimistic" but he foresees substantial completion of the plan by that time.

A survey will be launched soon to determine the location of microwave stations for a proposed network. An appropriation of $11,990 has been made by the state for the survey and the contract has been awarded to Collins Radio Corp., Dallas.

The state network, which will cost an estimated $5.4 million, will have 11 assignments. Main production facilities will be at the U. of Kentucky, Lexington.

UNESCO asks help of radio-tv

One-minute film clips of U. S. Attorney General Robert Kennedy delivering a message on the theme of human rights will be sent to television stations along with a letter asking cooperation in publicizing the special week.

3M notes 12% rise in operating revenue

Total operating revenues of Minnesota Mining & Manufacturing Co. (which owns the Mutual Broadcasting System) were up 12% for the first nine months of this year, compared to the same period last year. For the three quarters of 1962, net sales and other operating revenues reached $505,759,118, which compares to the 1961 nine months' $452,298,918.

Net income after taxes for the three-quarter quarter was $58,815,685 ($1.13 per share), which compares to $53,496,604 ($1.03 for the similar period in 1961. The 1962 net figures are based on 52,017,557 shares; the 1961, on 51,722,837.

Sales for the third quarter this year were the highest in the company's history: $171,246,746, compared with $158,723,022 for the third quarter of 1961. Net income was $20,065,425 (39 cents per share), compared to $19,027,421 (37 cents per share) for the same period last year.

Marion uhf starts

WTAF-TV Marion, Ind., began regular operations on ch. 31 Saturday (Nov. 3), Eugene C. Thompson, president, announced last week.

Studios and transmitter are in the Elks Building, located in Marion's central business district. Robert Fincham is general manager. Weed Television Corp. is representative.

Media reports...

BPA changes schedule • Broadcasters' Promotion Ass'n is changing the schedule for the annual BPA on-the-air promotion awards competition for members to Dec. 15 as deadline for entries with winners announced in February. The later date was made necessary due to heavy promotion work load carried by all stations in the fall, according to Dave Partridge, chairman of the BPA awards committee.

New location • KTTV (TV) Los Angeles has moved its New York sales office to 555 Madison Ave., New York 22. Phone is Murray Hill 8-8555. Charles Young, KTTV national sales director, heads the New York office.
Who helps you put superior spots before your sponsors' eyes?

Better local spots mean more money for you. And now you can produce them with your VTR. It's possible with the Ampex Electronic Editor operating with Ampex Inter-Sync. The Electronic Editor allows you to assemble, insert, add effects or make changes electronically until you get just what you want to see—all without cutting an inch of tape. Add a Special Effects Generator and you have every conceivable transitional effect at finger-tip control. There's no need for specially trained film crews. Your own staff can handle every job. Another Ampex accessory for better programming: Amtec—an automatic time element compensator that gives you geometrically perfect pictures. For more information write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter Street, Redwood City, California. Sales, service throughout the world.
WHAT THEY CHARGE FOR TV OVERSEAS

ABC1 releases rate cards of foreign stations it represents

A quick look at the commercial rates being charged by television stations in many parts of the world was provided last week in rate cards released by ABC International.

The cards, reflecting recent changes in a number of cases, detail the rate structures of most of the foreign stations represented—and in a number of instances partly owned—by ABC1. They were released by Charles P. Dwyer, ABC1 sales manager. One radio rate card also was included.

Some of the highlights are presented below. These show gross rates (before discounts) for basic time units in the highest-priced periods of the day (usually evening time but in some cases also including about two hours in midday). ABC1 officials have pointed out that U. S. advertisers may pay in U. S. dollars or in local currency.

Central American Television Network (To-
Beirut): ABC1, TV-2 Panama (ch. 2) and YSDR-TV San Salvador, HRTG-TV Honduras, YNSA-TV Nicaragua, TI-TYCR Costa Rica and TV-2 Panama—Hour, $859, participation, rates on request.

TV2 Panama (ch. 2)—Hour, $.999, minute, $.02. YNSA-TV Managua, Nicaragua (ch. 6)—Half-
hour, 337.50 Nicaraguan cordobas or $45; minute, 30 cordobas or $.45 (7.50 cordobas equal $1).

CTV (Venezuelan Network) station lineup in Venezuela (chs. 4 and 9 in Caracas; ch. 9, Picacho, ch. 6 Terepama, ch. 8 Agua Linda and ch. 4 Maya)al-Half-hour (26 minutes) 3,900
Venezuelan Bolivares; minute, 16,000 Bolivares (4.76 Bolivares equal approximately $1).

JDOO-TV Osaka, Japan (ch. 4)—Hour, 600,000 Japanese yen, 30 seconds, 120,000 yen ($50 yen equal approximately $1).

CFTO-TV Toronto, Canada (ch. 9)—One hour, $1,400; one minute, $335.

CHCH-TV Halifax, N. S. (ch. 5)—Hour, $400; minute, $90.

Ch. 11, Beirut, Lebanon—Hour, 1,100 Lev

ane pouns; one-minute spot, 270 Lebanese pounds (2.98 Lebanese pounds equal $1).

Hippodramic Television, Tokyo, Japan (ch. 10—Hour, 750,000 Japanese yen; minute, 90,000 yen $90 yen equal approximately $1).

DZBB-TV Manila, Philippines (ch. 7)—Hour, 400 Philippine pesos; 26-second spot, 88 pesos (3 pesos equal approximately $1).

LS-84 (Teleonce) Buenos Aires (ch. 11)—Half-hour, 30,000 Argentine pesos; minute, 6,000 pesos. (Recent free rates, approximately 100 pesos equal $1).

HCPTVE2 Guayaquil, Ecuador (ch. 4)—Hour, 1,250 Ecuadorian sucre; minute, 192 sucre. (25.53 sucre equal approximately $1)

YSEV-TV (ch. 6) and YSDR-TV (ch. 8) San Salvador, El Salvador—Half-hour, 147.69 Salvadoran colones; minute, 30 colones. (2.50 colones equal approximately $1)

HRTG-TV Tegucigalpa, Honduras (ch. 5)—Hour, 150 Honduran lempiras; minute, 18 lempiras. (2 lempiras equal $1)

TVOR San Jose, Costa Rica (ch. 7)—Hour, 494.75 Costa Rican colones or $75; minute, 99.75 colones or $15.65 colones equal approximately $1.

Radio

CKFJ Vancouver (1430 kc, 10 kw day, 5 kw
night)—10 minutes, $45; 10 spots a week, $18.5 per spot.

Beaumont buys into Aljanciv, Paris agency

George B. Beaumont, former vice
president of Benton & Bowles Inc., New
York, and a former director of Benton & Bowles Ltd., London, has purchased an interest in Aljanciv S. A., Paris advertising agency.

Mr. Beaumont will share financial control and management of the agency with its current managing director, Jean-Pierre Liger. Aljanciv's name is being changed to Liger, Beaumont & Aljanciv.

Mr. Beaumont has been active in

account and agency management during the past five years in London, Brussels and Paris, where he supervised advertising on Procter & Gamble brands. Before moving to Europe in 1957 he worked for five years in B&B's New York office.

Mr. Liger has been with Aljanciv for 16 years and has been managing direc-
tor since 1955.

L.B.A expects to bill about $2 million in 1963. Clients include Max Factor, KLM and the Florida Citrus Commission.

CHSJ, CKAR can't quit

CBC radio, says BBG

CHSJ Saint John, N. B., and CKAR
Huntsville, Ont., must serve as affiliates of the Canadian Broadcasting Corp.'s new English-language radio network, the Board of Broadcast Governors ruled at Ottawa Oct. 30.

The two stations had requested dis-
affiliation for economics. The BBG denied the request and they must carry the minimum of 26 hours and 7 minutes of CBC programs weekly, some sponsored and some sustaining in even-
time.

Television rebroadcasting station li-
censes, with transmitters of 5 w were granted to CHAU-TV Carleton, Que., at Port Daniel, Que., on ch. 5; at Chandler, Que., on ch. 5; at Gaspe, Que., on ch. 10; at Santa Anna, N. B., on ch. 5; and at Perce, Que., on ch. 5 with 154 w video and 77 w audio power.

Similar rebroadcasting facilities were granted to CKBL-TV Matane, Que., at Murdochville, Que., on ch. 9 with 5 w, on the understanding that the service is to be expanded with more such stations in the area.

CKAM-TV Upsalquitch Lake, N. B., has been granted permission for a 5 w tv rebroadcasting station on ch. 12 at Gaspe West, Que. Arrow Lakes TV Society is recommended for a ch. 4 station with 3.3 milliwatts power at Nakusp, B.C. The new station will pick up the programs of KXLY-TV Spokane, Wash.

CFCY Charlottetown, P.E.I., has been recommended for a power increase on 630 kc from 5 kw to 10 kw.

A new tv station at Chicoutimi, Que., licensed to John Murdock, will go on the air with 61 kw instead of the original 68 kw video power, and the same 34 kw audio; its antenna will be 440 feet instead of the originally planned 431 feet above average terrain.

CHED Edmonton, Alta., is getting a power increase from 10 kw day and 1 kw night to 10 kw on 630 kc.

CFTK Terrace, B.C., has been

Japan enters family of space communicators

Another country is joining the group of nations which plan space communications systems. Japan has signed a "Memorandum of Under-
standing" with the U. S. National Aeronautics & Space Administration under which both nations agree to cooperate in testing experimental communications satellites launched by NASA.

This brings to six the number of nations which have or plan to have ground stations for communicating via satellites. The others are Great Britain and France, where stations are already operative, and Italy, Germany, and Brazil, where stations are under construction.

Next year NASA hopes to launch the first of a series of "Relay" satel-
lites. These will be placed in a 5,000-to-6,000-mile equatorial orbit. The relay satellite is being built for NASA by RCA. Later next year, NASA plans to launch a Syncom satellite in a 22,300-miles-high orbit; its rotation will be synchronous with the earth's and it will appear fixed above a particular point of the earth. Syncom is being built by Hughes Aircraft.

Meanwhile, AT&T's Telstar satel-
lite continues its 3,500-miles-high orbit, but communications between the U. S. station at Andover, Maine, and Great Britain and France will be suspended six weeks beginning Nov. 26 for maintenance work.

</table>
CFAX Victoria, B.C., was denied an application for an fm station on 100.3 mc and a frequency change and power boost from 1 kw on 810 kc to 10 kw on 1070 kc because of unsettled conditions in the broadcasting market in Victoria.

Because CBC has applied for a 10 kw station at Fredericton, N.B., two applicants for stations here on 970 kc and 900 kc have been turned down. The BBG feels that Fredericton cannot support three stations in the city where CFNB is now the only station.

CJSS-TV Cornwall, Ont., ceases to be a local station and becomes a re-broadcasting station of CJJOH-TV Ottawa, Ont., as a result of BBG decision to allow CJJOH-TV to purchase CJSS-AM-FM-TV. BBG will review the situation in 1965 when the CJSS-TV license comes up for renewal.

CFPL Toronto, Ont., has been temporarily denied the right to form an fm network, pending new regulations for fm broadcasting now being studied. A planned CBC-FM network of CBL-FM Toronto, CBO-FM Ottawa, and CBM-FM Montreal, has been allowed to terminate because of Canadian government austerity measures.

A French-language radio network has been sanctioned by BBG to the CBC with three CBC stations in Quebec province, 26 independent stations throughout Canada, and 14 CBC repeater stations in eastern Canada.

CFPL charged by board

CFPL London, Ont., is one of four Canadian stations being charged by the Board of Broadcast Governors in court with overcommercialism infractions of the Canadian Broadcasting Act. CFPL is charged with exceeding the 1,500-minute weekly limit of commercial time by a total of 60 minutes during one week.

It is BBG's first court charge against any station. The other three stations have not yet been identified by the BBG.

Pakistan tv demonstration

Almost 78 hours of the scheduled programming has been supplied to the Pakistan government by Screen Gems, New York. The programs include Father Knows Best, Huckleberry Hound, The Flintstones, Tin Tin and Shirley Temple Storybook.

Radio-tv use rises in UK for quarter

Greater use was made of tv and radio during the July-September quarter in Britain than in the corresponding period last year.

Figures issued by BBC's Audience Research Department show that during the three months ended Sept. 30, a total of 31 million people viewed one or more programs on the average day compared with 30.4 million a year ago. The number who watched BBC-TV only rose from 8.7 million to 9.7 million and the number who watched only the commercial network fell from 11 million to 10.4 million.

Viewers with multi-channel sets (i.e., able to get both tv networks) spent 44% of their time watching BBC-TV and 56% watching the commercial network programs. In July-September last year the proportion was 39% for BBC-TV 61% for the commercial network. The total time spent in watching was similar to a year ago—about 12 hours a week for each person.

The report shows that the total number of people with tv sets has increased more than a million over the year to 42,080,000 and more than 86% of the population can now tune to tv. The number of people with multi-channel sets went up more than 2.25 million and there was a decrease of over a million in sets that can pick up only BBC-TV. The audiences for BBC-TV have climbed; the daily average is 5.2 million compared with 4.7 million last year. The commercial network audiences have gone down a little, averaging 6 million against 6.2 million a year ago.

More people used radio and listened longer. The number who listened to any BBC radio during the average day rose 1.1 million to 25.5 million. The amount of listening between 7 a.m. and 11 p.m. rose from 7.5 to 8 hours a week per person. The total number of people with radios went up over the year nearly half a million to 46.3 million. Most of them also had tv sets and the number with radio only has fallen to 6 million.

Canadian unions merge

The Asn. of Radio and Television Employees of Canada (ARTEC), representing 2,300 employees of the Canadian Broadcasting Corp. in 12 locals, has joined the National Union of Public Service Employees (NUPSE), effective Nov. 1. The merger was announced at Montreal and Toronto, respective headquarters for the two unions. NUPSE has 30,000 members in 116 locals. The merged union hopes to invade the realm of independently owned radio and television stations.

FCC Approves Automatic Program Logging

On Oct. 5, 1962, the FCC issued an order to establish rules permitting automatic program logging. This is a significant move for broadcasters.

Automatic programming is being used more and more by stations to improve production, conserve manpower, and make air personnel available for more profitable pursuits than just routine control board operation. However, much of the value of automation is lost if personnel is still restricted to the board for logging procedures.

ATC has developed a system which automatically prints all required logging data directly from ATC magnetic tape equipment. On the opposite page is a reproduction of the scheduling of WJBC-FM, Bloomington, Illinois, and the printed verification. This station has been field-testing the ATC system since Dec. 1961. Similar systems have now been purchased by WHBF, Rock Island, Illinois, and WBNS, Columbus, Ohio.
Uninvited White House caller not greeted

SOUND TRUCK, PETITIONS UNWELCOME IN DRIVEWAY

A television film producer learned last week that White House guards and Washington police aren't accustomed to Hollywood publicity stunts—and apparently aren't interested in a closer acquaintance with the subject.

Jay Ward, partner in Jay Ward Productions, producers of The Bullwinkle Show (Sunday, 5:30 p.m., NBC-TV), drove a gaudily painted truck, loud speakers blaring an outrageous song, the "Moosylvania Anthem," into a White House driveway Thursday (Nov. 8) to present a petition to the President urging creation of a State of Moosylvania (for Bullwinkle, a dull-witted moose featured in the program). "You can't go in there," Mr. Ward says he was told by an irate guard. "And turn off those loud speakers!" Informed the Californian sought to petition the President, the guard said an appointment was required. Before the producer could drive away, however, he'd been chewed out by at least two other guards. Two passengers who had gone along for the ride (WRC-TV Washington's Mrs. Pat Humphrey, TV promotion coordinator, and a reporter) indicated they'd apparently picked the wrong day to visit the President.

Efforts to arrange an appointment by telephone failed, Mr. Ward reported, but he promised to continue his efforts by correspondence. Meanwhile, he was able to pay a social call on FCC Chairman Newton N. Minow, although he presented no petitions.

Mr. Ward is concluding a 30-day cross-country driving tour during which he is plugging his statehood movement at local television stations.

Drumbeats . . .

School salute • Georgia broadcasters are marking Broadcast Education Week (Nov. 11-17) and Georgia School Day of the Air (Nov. 12) with special programming. The Georgia Assn. of Broadcasters has announced a $500 annual radio-tv scholarship as a contribution to the state-wide educational effort.

Special tour • A "see-through-feeling" tour of the KMBC-TV Kansas City studios was conducted last month by 13 students in the fifth and sixth grades at the Kansas State School for the Blind. Prepared for an examination of a Free for All studio set, the children were surprised to learn they also made a live appearance on the show.

All outdoors • KABC-TV Los Angeles reports its outdoor advertising campaign on a "Set Your Watch" theme for its program lineup, in cooperation with ABC-TV, marks the largest use of billboards (12) by a broadcast advertiser in that area.

Fore! • Four champion U. S. golfers played an exhibition round Nov. 4 at the KTVH (TV) Wichita, Kan., benefit for the National Institute of Logopedics, whose main facilities are in that city. A Wichita team of Jim Vickers, former national collegiate champion, and John Stevens, Missouri Valley Conference champion, combined for a one-under-par 70 to beat Labron Harris Jr., national amateur champion, and R. H. Sikes, U. S. Public Links champion.

Pretty corn pusher

Gloria Bartl, 20, WXYZ-TV Detroit's "Miss Award Movie," distributed popcorn at area newspaper offices to signal the start of its run of the post '48 Screen Gem Columbia-Universal film package. The corny goodies were tagged for area newspapermen: "To be eaten by [writer's name] only when watching Award Movie on ch. 7."

Jack for Boys' Clubs

KEWB Oakland has donated $6,132.46, the sum KEWB earned on a record album, "KEWB Disc/Covers," to the Boys' Clubs of America.

KFWB Los Angeles, which like KEWB is owned by Crowell-Collier Broadcasting Corp., turned over the profits from a similar album in January to the Hollywood Chapter of the Boys' Club.

Tightest fit wins? • KEX Portland, Ore., will help open the ski season at Timberline Lodge, Mt. Hood, Nov. 24 and 25 with a weekend "Winterfest," featuring gag contests, a "Pray for Rain" dance, mountain climbing and a "Miss Stretch Pants" competition.

Cottage small • KDKA Pittsburgh has awarded a modern "A" frame cottage in the Bear Rocks resort area to Mr. and Mrs. C. F. Ferguson of Youngwood, Pa., the winners of the station's "Sound Around" contest during celebration of KDKA's 42nd anniversary.

Jack for Boys' Clubs

KEWB Oakland has donated $6,132.46, the sum KEWB earned on a record album, "KEWB Disc/Covers," to the Boys' Clubs of America.

KFWB Los Angeles, which like KEWB is owned by Crowell-Collier Broadcasting Corp., turned over the profits from a similar album in January to the Hollywood Chapter of the Boys' Club.

Listen here • WKBW Buffalo reports 100,000 listeners to a listening contest in which they sent 300,000 mailers to homes in Niagara and Erie County. Listeners were instructed to send in entry blanks cut from the mailers and listen for their names on WKBW. The winner received a $2,500 free shopping spree.

Sights for seeing • Ad Man's Guide to Boston is being distributed by WBZ-TV Boston to agency and media people. The guide includes phone numbers and addresses of production firms, stations, hotels, talent agencies, and other information.

Last chance • The Charles L. Burrow Co., Portland, Ore., sales representative firm, will welcome agencies and advertisers Nov. 15 at "The Last Fourth of July Picnic of the Year."
BROADCAST ADVERTISING

William L. Ballard and David C. Loomis, account group heads at Ted Bates & Co., New York, elected senior vps. Mr. Ballard, who joined Bates in 1939 and was elected vp following year, was formerly with John W. Shaw Adv., Chicago. Mr. Loomis joined Bates in 1955 and became vp in 1956. He was formerly at Dancer-Fitzgerald-Sample, New York.

Jack Northrup, general manager of grocery products division; L. C. Bruce, director of advertising and marketing research; and William R. Tinchler, special assistant to president of Purex Corp., Ltd., Lakewood, Calif., elected vps. Edwin M. Burke, president of E. H. Ludlow & Co., Peapack, N. J., elected to Purex Corp.’s board of directors, succeeding Frank G. Burke Jr., who resigned.

D. J. (Bud) Oister, former sales manager of Regal Beer and sales and advertising manager of Papoose Food Products, elected vp of Ronny Caire Adv. Agency, New Orleans.

Donald Knoob, promotion art director at Conover-Mast Publications, joins C&W as art director.

Robert B. Harris, advertising manager of Gluek Brewing Co., Minneapolis, promoted to general manager in charge of sales and advertising, effective Dec. 15. Harlow G. Harris, vp in charge of marketing, resigns effective that date. Before joining Gluek, Robert Harris was executive on Gluek account at United Breweries of America. Earlier, he was sales promotion and merchandising director for Friendly Group of radio-tv stations in Steubenville, Ohio.

John Ormond, publicist previously with Walt Disney Studios and Jerry Lewis Productions, joins Mann Scharf & Co., Los Angeles pr firm, as associate.

Martin L. Nierman, executive vp of Edward Petry & Co., New York, re-elected to board of directors of Television Bureau of Advertising, that city, for new two-year term. Mr. Nierman was re-elected to position by vote of TVB’s station representative membership.

W. Ware Lynch appointed vp and manager of newly established New York branch office of Jack Wyatt Co., Dallas-based advertising and pr firm. H. Eugene Dickhuth and Sallie Kreda join Wyatt’s New York branch as account executives in charge of east coast financial pr and marketing and sales promotion, respectively. Wyatt’s New York City office is located at 225 E. 46th St.

Jack Clyde Moser, tv production manager of WAVY-TV Norfolk - Portsmouth - Newport News, Va., appointed radio-tv production director of McCurry, Henderson, Enright, Norfolk advertising agency.

William L. Morrison, director of administration and assistant secretary-treasurer of Radio Advertising Bureau, New York, joins Advertising Research Foundation, that city, in administrative capacity.

Bill Greene, for past two years with Electrical Products Corp., Seattle, appointed general manager of Choate Advertising Service, that city. Agency recently moved to downtown location at 715 Logan Bldg., Seattle 1. Telephone: MA 4-3520. Tom Herbert, who formerly operated his own pr firm, joins Choate as pr and publicity director. Other Choate appointments: Jack Armstrong, for past four years producer-director-writer with KIRO-TV Seattle, to radiotv director, and Pat Kalke named art and production director.

Howard F. Gersten, former principal of Gersten & Smith Inc.; Norman Vale, Sullivan, Stauffer, Colwell & Bayles; and Theodore Angelus, formerly with BBDO, join Lennen & Newell, New York, as executives on Colgate-Palmolive account.

James D. Killins, senior copywriter, and John MacClure, senior art director, Geyer, Morey, Ballard Inc., Detroit, elected vps. Both work on American Motors Corp. account. Mr. Killins was also named associate creative director.

Carl Ewert Jr., advertising and pr manager of Advanced Scientific Instruments Inc., Minneapolis, joins copywriting staff of Erwin Wasey, Ruthrauff & Ryan, St. Paul, Minn. Mr. Ewert’s major responsibilities will be in connection with EWRR’s work for Control Data Corp., Twin Cities-based manufacturer of high-speed, digital computers and St. Paul Port Authority.

JACKSON, MISSISSIPPI
George T. Maniates, for three years art director with Hill, Rogers, Mason & Scott, Chicago, joins Clinton E. Frank Inc., that city, in similar capacity.

E. James Charlesworth, account executive at Needham, Louis & Brorby, Chicago, has been transferred to agency's New York office. Mr. Charlesworth has been with NL&B for 11 years.

Humphrey Sullivan, associate pr director of Lever Bros., New York, promoted to pr director. He succeeds J. E. Drew, who retired.

THE MEDIA

James P. Clarendon II, former advertising manager of Life en Espanol in Mexico City, joins Time-Life Broadcast Inc., New York, as manager of Latin American operations. Time-Life Broadcast recently announced its participation in Proartel Argentine tv program production company. Mr. Clarendon has been with Time Inc. for eight years.

Alexander P. (Kai) Hunter, assistant vp of broadcast division of King Broadcasting Co., Seattle (KING-AM-FM-TV), named station manager of KREM-AM-FM-TV Spokane, effective Dec. 3.

Don E. Fuller, former regional and local sales director of WSJY (TV) Elkhart-South Bend, Ind., promoted to commercial manager. Mr. Fuller will continue to handle national sales for WTRC-AM-FM Elkhart. Both stations are owned by Truth Publishing Co.

Roy Shapiro, senior analyst in research department of ABC, New York, joins Westminster Broadcasting Co., that city, as assistant director of research. Mr. Shapiro fills vacancy created past summer when James Vergin assumed research directors post vacated by Melvin Goldberg, who left WBC to become vp and research director of NAB. Prior to joining ABC, Mr. Shapiro held marketing research post at Benton & Bowles.

Robert A. Mortensen, executive vp of WIIC (TV) Pittsburgh, elected vp of Phoenix Press Club.

Jack Murphy, station manager of KOOL-TV Phoenix, elected president of Phoenix Press Club.

Robert J. Zimmerman, sales manager of KRUX Glendale, Ariz., assumes added duties of station manager.

Dan Milikin joins WNOP Newport, Ky., as sales manager. Ray Scott named program director, and Dean Miller joins as air personality. Ty Williams, WNOP air personality, assumes added duties as promotion and publicity manager.

F. Proctor Jones, sales manager, promoted to director of sales for WNAC Boston and Yankee Network. Thomas F. Bateson, vp, continues in charge of WNAC-TV sales. Move was made to completely divide responsibilities for sales in both radio and tv. Mr. Jones joined Yankee in April 1950 in sales service department. In January 1955 he was named assistant sales director, and two years later promoted to national sales manager for WNAC-AM-TV and Yankee Network. In October 1961 Mr. Jones assumed responsibility for firm's local radio sales as well as national.

Robert A. Stuart, former advertising representative of Curtis Publishing Co. in Midwest and Southwest, joins Chicago tv sales staff of The Katz Agency.

Ray Padden joins Los Angeles office of Venard, Torbet & McConnell, radio-tv rep firm, as account executive.

Charles C. Allen, general manager of radio-tv department at Kudner Agency, joins ABC-TV, New York, as director of sales service for tv network. Mr. Allen was with BBDO for 11 years before joining Kudner in 1959.

Martin K. Hawthorne, formerly with WHK-AM-FM Cleveland, joins WJW-AM-FM, that city, as account executive.

Jim McGuade, manager of financial and administrative services for WCB-S-AM-FM New York, named radio ac-
account executive, replacing Bob Hopkins, who has joined CBS Radio Spot Sales. Win Gould, WCBS sales service manager, becomes manager of financial and business services, and Don Steffens, coordinator of WCBS Yankee baseball broadcasts, appointed sales service manager.

Robert J. Brewster, formerly with McCann-Erickson, Chicago, as vp and radio-tv director and J. Walter Thompson Co., there as radio-tv group head, joins NBC-TV, Chicago, as account executive.

Doug Settlerberg, commercial manager of KETO-FM Seattle, named commercial manager of KETO-AM.

Aline Daly appointed sales service director of KMOX-AM-FM St. Louis. Miss Daly, with 12 years broadcast business experience in St. Louis market, had previously served at KMOX as director of advertising and sales promotion, as well as availability manager.

Jack V. Arbib, former sales executive with NBC Films and Cellomin Div. of Screen Gems, joins Blair-Tv, New York, as sales executive. Mr. Arbib has also served as circulation sales manager of New York Daily News.

Richard Lewis, for past five years operations and program director of KSODO San Diego, Calif., resigns to join American Freedom Network, Bonita, Calif., as director of programming and production. In addition Mr. Lewis will head newly formed commercial production and programming service, utilizing Freedom Network's studio, recording, and high-speed dubbing facilities. Keith G. Allen named AFN's research and special projects director.

Ron Zimmer appointed director of programming for KPRO Riverside, Calif. Mr. Zimmer, former program manager of KBIS Bakersfield, Calif., joined KPRO in June 1961.

William N. Ellison, for past three years program director of CSST-AM Cornwall, Ont., joins WBJA-TV Binghamton, N. Y., in similar capacity.

Richard J. Lamoreaux, former operations director of WOOD-FM Grand Rapids, Mich., appointed assistant program and production manager of WWJ-TV Detroit.

Tony Donald and Herb McMurray named program director and commercial manager, respectively, of WABW Annapolis, Md.

Donald M. Schulman appointed director of Casper Citron Show on WRFC (FM) New York.

R. Lee Gray, formerly in charge of production and special events at WOKY Milwaukee, named production supervisor at WIND Chicago.

Douglas H. Rand, formerly with Procter & Gamble Co., Cincinnati, joins WBAM Chicago as merchandising manager, succeeding Charles Harley, who transfers to station's local sales staff as account executive.

Betty Ann True appointed merchandising director of WCCO-TV Minneapolis-St. Paul.

Howard Stalnaker, KPHO-TV, elected president of Metropolitan Phoenix Broadcasters for 1963, succeeding Gene Spry, KPHO radio. Other officers elected: Ray Odom, KHAT, vp; Hayes Stewart, KTAR-TV, secretary-treasurer. Elected to board of directors: James Ross, KOY-AM-FM; John Redfield, KIFN; Bill LaDow, KTVK (TV), and Mr. Spry.

Bob Martin, former program director of WHUM-TV Reading, Pa., joins WCUE-AM-FM Akron, Ohio, as director of traffic and continuity. Dick Fain, Fred Meeks, and Ed. Kalail join WCUE's announcing, news and sales staffs, respectively. Dick Kenyon, WCUE account executive, promoted to local sales manager.

Richard Bell, art director at W. G. Spencer Adv., Los Angeles, joins promotion department of KNXT (TV), that city, as art director.

Pat McGee, former assistant manager and news director of WZBY Torrington, Conn., joins WRYM Newington, Conn., as news correspondent and analyst. Henri E. Campisi, WRYM account executive, assumes added duties as special events coordinator. Frank Michaels, with WRYM for past year, appointed program director.

Charles M. Sias Jr., for past six years sales manager of WABI Bangor, Me., appointed to newly created position of state-wide sales manager for Hildreth Radio Network (WABI-AM-FM Bangor, WPOR Portland, and WAGM Presque Isle).

Wanda Ramey, who left KPIX (TV) San Francisco several months ago to give birth to her first child, returns to station's Noon News show as co-news-caster.
Joseph Brush, formerly with WCAU-AM-FM-TV Philadelphia, joins news staff of WGR-AM-FM Buffalo, N. Y.

Steve Armstrong, former air personality at WJAB Westbrook, Me., joins WJNO West Palm Beach, Fla., as announcer-newsmen.

Dick Wahl, former news director of KGBS Los Angeles, joins announcing staff of KNX-AM-FM, that city.

Mrs. Lois Zeiler, editorial assistant and columnist for Wantagh Citizen and Bellmore Home News, both Long Island weekly newspapers, joins public-affairs staff of WHLI-AM-FM Hempstead, N. Y.

Ernie Schultz, member of WKY-TV Oklahoma City news department since joining station in August 1955, promoted to news director, succeeding Dick John, who resigned.

Hugh Harper, for past three years member of pr staff of Philco Corp., Philadelphia, joins KYW-TV Cleveland, effective today (Nov. 12), as pr director.

Laddie Scharffer, former program director-disc jockey with WFJX Fort Jackson, S. C., joins WLIR (FM) Garden City, N. Y., as air personality.

David A. Boyle, formerly with Baker-Johnson & Dickinson Adv., Milwaukee, joins WISN-TV, that city, as assistant to Robert L. Meyer, director of publicity-promotion.

Harold E. Carpenter appointed local sales manager of WPRO-AM Providence, R. I. Mr. Carpenter, who joined WPRO sales staff in March 1959, formerly served as commercial manager of WNBH-AM-FM New Bedford, Mass.

Irwin Spiegel named promotional specialist in New York office of Avery-Knodel, radio-tv sales representatives.

Ken Malden, public affairs director of WGBS-AM-FM Miami, named promotion manager, succeeding John P. Hanly, who resigned to join Harris, Buggeln & Brumby, advertising agency, that city. Mike O'Neil succeeds Mr. Malden as public affairs director.

Jay Neely, former announcer and newscaster with WTH-AM-FM Baltimore, joins announcing staff of WJZ-TV, that city.

Peter Kraus joins WLIS Old Saybrook, Conn., as staff announcer.

Marge Injasoulian, former secretary and assistant to promotion director of WISN-TV Milwaukee, named promotion director of KOOL-AM-FM-TV Phoenix.

Richard J. Braun appointed promotion manager of KBTV (TV), KBTR Denver. Mr. Braun, formerly assistant promotion manager, will in his new duties place all advertising for dual broadcast operation.

PROGRAMMING

Joseph C. Bernstein, former vp and partner in Wyde Films, New York, named general manager of New York film studios of Fred Niles Communication Centers Inc. He will supervise both sales and production.

Merwin Bloch, previously with Donahue & Cee Adv., as copywriter on MGM and Columbia Pictures accounts, joins advertising department of Paramount Pictures, New York, working under supervision of Jerry K. Levine, advertising manager. Mr. Bloch had also done free-lance writing for motion pictures, radio and tv in New York and Hollywood.

W. R. Higginbotham elected vp and producer of Movietone News Inc., New York, unit of 20th Century - Fox Film Corp. handling newsreels, short subjects and other film production. He succeeds Edmund H. Reek. Mr. Higginbotham, who was with UPI since 1935, joined UPI-Movietone tv news film operation in 1951. He was European news manager of UPI, then United Press, from 1945-49.

Monroe Glasberg named manager of special services for Warner Bros. Records, with headquarters in company's New York offices. In addition to coordinating sales with eastern distributors, Mr. Glasberg will maintain sales liaison with company's Canadian licensee, The Compo Co., and coordinate Warner Bros. Records' activities in premium field. Matt Gilligan appointed operations manager. He will report to Ed West, treasurer, and will be responsible for purchasing and inventory control, with headquarters in Burbank, Calif.

*Figures on applications for new stations and major changes not in hearing and in hearing are for September; October figures yet released.
*Includes 3 stations operating on unreserved channels. All figures as of September.

By order in proceedings on applications of W KBO Albuquerque, N. M. and American Broadcasting Companies Inc. for renewal of licenses of station WABC and KXW, New York, N. Y. (docs. 6584 and 14258), commission granted petition and proposed amendment to change corporate name from K WBO Inc. to Hunt Corp., Inc. and closed record. Action Nov. 7.

By memorandum opinion & order, commission granted petition for waiver of Sec. 135.1(c) of rules to permit further processing of its application to change facilities of station WTOR Torrington, Conn., from 1490 kc, 1200 m., to 610 kc, 2500 m. Petitioner asserts that there is substantial possibility of increased loss of transmission due to change in ownership of land; that because of great expansion and rising land costs in Austin area, only economically feasible land in rural areas east of Austin requiring nighttime daytime service.

By memorandum opinion & order, commission granted petition for waiver for The Louisiana Broadcasting Co., Inc. for waiver of Sec. 135.1(c) of rules to permit further processing of its application to change facilities of station KWTQ Thibodaux, La., to 1466 MHz, 500 kw., to 1450 MHz, 50 kw., to 640 kc, 1500 m., to 1450 kc, 1000 m. and for elevation of transmit antenna. Petitioner asserts that there is substantial possibility of increased loss of transmission due to change in transmission site. Action Nov. 7.

By memorandum opinion & order, commission granted petition for waiver of Sec. 135.1(c) of rules to permit further processing of its application to change facilities of station WSCR-WKBX, Inc. for elevation of transmit antenna. Petitioner claims that there is substantial possibility of increased loss of transmission due to change in transmission site. Action Nov. 7.

By memorandum opinion & order, commission granted petition for waiver of Sec. 135.1(c) of rules to permit further processing of its application to change facilities of station WLBJ Austin, Tex. Petitioner claims that there is substantial possibility of increased loss of transmission due to change in transmission site. Action Nov. 7.

By initial decision in docs. 14908-14910 and granted applications of San Juan Non-Profit TV Assn. for three new uhf tv translator stations on chs. 73, 77 and 83 to serve Farmington-Bloomfield Highway and Huerfano-Bloomfield Highway areas, N. Mex., from trans. on Huerfano Peak by transmitting programs of Albuquerque stations KGGM-TV (ch. 13), KOB-TV (ch. 4) and KOAT-TV (ch. 7). Commissioners Ford and Henry not participating. Action Nov. 7.

By order in proceedings on applications of W KBB Pullman and KTW Seattle, Washington, to specify operating facilities in accordance with agreement entered into by these licensees, two stations will operate pursuant to commission's Jan. 8, 1962 decision in docs. 14649-14650 (K WSC Pullman licensed to operate unlimited time, but not during the hours 11:15 p.m. to 6:30 a.m., daily, and KTW licensed to operate during daytime hours only and during nighttime hours after 11:15 p.m. and before 6:30 a.m.) except that KTW will operate on Sunday evenings between local sunset and 11:15 p.m. and on Sun. mornings between 6:30 a.m. and local sunrise on Sunday mornings during pledge week from Nov. 1. Agreement also provides that K WSC may operate on Sunday evenings between sunset and 11:15 p.m. if K TW does not request, upon 90 days notice, preempt Sunday 6:30 a.m. to 11:15 p.m. sunrise period. Commission's Nov. 16 decision was, accordingly, modified by this agreement.

By memorandum opinion & order, commission granted joint petition of The Los Angeles Times Inc. and American Broadcasting Companies Inc. for refund of licenses of station W ABC and KXW, New York, N. Y. (docs. 6584 and 14258), commission granted petition and proposed amendment to change corporate name from K WBO Inc. to Hunt Corp., Inc. and closed record. Action Nov. 7.

By memorandum opinion & order, commission granted petition for waiver of Sec. 135.1(c) of rules to permit further processing of its application to change facilities of station WSCB-TV in Austin, Tex. Petitioner claims that there is substantial possibility of increased loss of transmission due to change in transmission site.

By initial decision in docs. 14612 and 14613 and granted applications of James C. Chase and William J. Wheat for channel return so they may apply for channel that is assigned to current station W CBF-TV in Austin, Action Nov. 7.

By report & order, commission finalized rulemaking in doc. 14988 and reallocated to station WLCN Lebanon, Pa. At same time, it modified license of Triangle Publications Inc., which had petitioned for commercial license to operate station WLYH-TV at Lancaster instead of WLCN. Petitioner claims that existing main station studio location requirements of Sec. 3.902, as applied to WLYH-TV does not intend to change license or studio location of station when it applies to one of its Lebanon studios, and commission expressed willingness to continue to act on petition. Commissioner Craven abstained from voting. Action Nov. 7.

By memorandum opinion and order in proceeding on NBC-ROI broadcast transfer and related applications of U. S. against RCA in two cases and RCA and NBC in third. Action Nov. 1.

RADIO

Help Wanted—Management

The man I need is intelligent, ambitious, creative, ready, and able to settle down in a lifetime career: a happy family man, 30-40 years old, willing to relocate; an engineer with first phone ticket, but also has had at least five years experience in sales and/or management. He types and is familiar with fundamental accounting and good business procedures. He and wife must be willing for him to travel 3 days spending it 4 nights away from home. If this is you, write me full details of your past experience and future hopes for the future. Convince me and I'll deal with you. Write my name in confidence. The man I select will receive a comfortable base salary plus uncertain incentive compensation, retirement benefit, insurance, travel expense, and unlimited advancement opportunity. Box 12345, Broadcasting.

BROADCASTING.

Sales manager with proven sales background. Midwest station with room to grow. Excellent salary and incentive. Box 212R, Broadcasting.

ANNOUNCERS.

Aggressive young station manager wanted by new owner of metropolitan, progressive Georgia station. Station is located in a large market. Must be family man, (2) Strong on sales, (2) Record of longevity with previous employers, (3) Basic honesty for success and responsibility. The right man will get a fair percentage of company and opportunity for eventual partial ownership. Unless you are a strong creative salesman do not apply. Box 16R, Broadcasting.

Immediate opening for general manager of KPSO, Falfurrias. Good profit sharing plan for management and new and long time employee leaving because of family problem. Send full information in first letter to Box 1849, Raymondville, Texas.

Sales

First phone combination man wanted by Florida daytimer. Work in sales or announcing. Send resume and tape to WPTT, P. O. Box 10, Ft. Walton Beach, Florida. No phone calls please.

Two salesmen needed by number one rated station in the upper West Texas. Must be able to sell in competitive market. Will be paid commission against guarantee. Growing station with winning sound. Grow with it. Bill Dahistren, General Manager, KAWA, Box 462, Waco, Texas.

Detroit radio station. Good growth potential. Prefer outstate Michigan time salesman, but man into a large market. Box 189R, Broadcasting.

Outstanding opportunity for aggressive young man or woman with drive and confidence. Adult programming in a million plus market. Guaranteed draw commensurate with background, and prospects good for five figure earnings. Ability to engage in part time announcing would enhance earnings capability. Send experience, details and references. Box 258R, Broadcasting.

Help Wanted—(Cont'd)

PUBLIC COURT SALE OF RADIO STATION KITE

KITE—Independent • Standard radio broadcasting station • Located at Terrell Hills and San Antonio, Texas • Only good music station serving Greater San Antonio area • Power 5,000 watts daytime and 1,000 watts nighttime • Frequency 930 kilocycles • Operating schedule 5 A.M. to 1 A.M. (Next day) • Owns 12½ acres at transmitter and towers site at Terrell Hills close to San Antonio • Leased offices in Kallimn Building, 535 S. Main Avenue, San Antonio • Well equipped • Profitable operation • Tax advantages.

A hearing will be held by the Court in Room 1105, United States Court House, Foley Square, City, County and State of New York, on November 19, 1962 at 10:30 A.M., E.S.T., or any adjournment thereafter to consider and act upon:

1. An agreement which has been made with Mr. Howard L. Burris, subject to the approval of the Court to sell KITE in the form stated below, at a base price of $390,000 to said party in lieu of the defined net income (of loss) of KITE for the period of July 1, 1962 to the closing date; and

2. ANY BETTER OFFER which may be made before or at such hearing.

The agreement with Mr. Burris, the balance sheets and profit and loss statements, the books of account, records and other pertinent documents of KITE are available for inspection in New York City.

The sale will take the form of transfer of 100% of the capital stock of KITE Broadcasting Company, a Delaware corporation which owns and operates the two unsecured demand notes, liabilities of Kite Broadcasting Company, in the unpaid principal sum of $12,374.84, with accrued interest of $1,591.83 as of September 30, 1962. It will be accompanied by the resignations of all the directors and officers of Kite Broadcasting Company. The buyer will thus be vested with stock ownership of KITE, and with control of all of its assets, subject to all of its liabilities, including the above notes and their tax advantages.

No other offer will be considered unless accompanied by a $50,000 deposit on account of the purchase price in the form of a bank cashier's check or cash, or cashier's check in the amount of five percent of the purchase price and a bond in favor of the Trustee, payable in five days to the Trustee,_drawn or duly endorsed and delivered to the Trustee. No other offer will be considered unless the Court is satisfied as to the financial and other ability of the offerer to complete the transaction. Any better offer shall be made on the same provisions and conditions as those contained in the agreement with Mr. Burris; with such modifications as to price and otherwise as may be required to reflect such better offer. The balance of the purchase price will be payable on the closing date, to be fixed by notice after approval of the transaction by the Federal Communications Commission.

Published pursuant to order of the United States District Court for the Southern District of New York, made "In the matter of TOWNEBEND GROWTH FUND, INC., Debtor. In proceedings for the reorganization of a corporation under Chapter X of the Bankruptcy Act, Pte No. 5875/61."

For further information write or phone the Trustee.

Chrysler Corporation warrants every part on this page for 5 years or 50,000 miles.

Chrysler Corporation makes possible this new warranty* by your authorized Chrysler Motors Corporation Dealer, covering all major parts of the engine, transmission, torque converter, drive shaft, universal joints, rear axle, differential, and rear wheel bearings. It pays for labor as well as parts.

It comes with our 1963 Plymouth, Valiant, Dodge, Dart, Chrysler and Imperial cars, and Dodge trucks. It can be transferred to the new owner if you sell your car.

It lasts for 5 years or 50,000 miles, making your car more valuable at trade-in time.

The only thing we ask is that you have your car serviced at reasonable intervals. (You'd probably do that anyway.)

This broad new protection is a result of establishing and maintaining the highest engineering and production standards, combined to give you another great automotive "first" from Chrysler Corporation.

*Your authorized Chrysler Motors Corporation Dealer's Warranty against defects in material and workmanship on 1963 cars has been expanded to include parts replacement or repair, without charge for required parts or labor, for 5 years or 50,000 miles, whichever comes first, on the engine block, head and internal parts; transmission case and internal parts (excluding manual clutch); torque converter, drive shaft, universal joints (excluding dust covers), rear axle and differential, and rear wheel bearings, provided the vehicle has been serviced at reasonable intervals according to the Chrysler Motors Corporation Certified Car Care schedules. Trucks are included, but are subject to additional limitations of 1500 hours operation if mileage does not accurately reflect the extent of actual use and operation of parts covered by the warranty. Coverage will not apply to trucks subjected to prolonged power-take-off or off-highway use.
OUR RESPECTS to Morris S. Novik

He has dedicated his life to people and the issues affecting them

Few broadcasters have kept as vigilant an eye on the extent of station participation in the 1962 political campaigns as M. S. Novik. As a public-service radio-tv consultant, he has made it his business the last few months to help stations carry out their public-service role at the local political level.

A 30-year radio veteran, Mr. Novik has definite opinions about a station's responsibility to its audience.

Mr. Novik believes "good" radio management requires the allocation of political time in the same way as other commercials. "It can be not only a public-service feature, a basis for a good story in the next morning's paper, but also a good audience builder. But the station must be on the level and cannot play favorites."

He insists that no station can take the position that it will not clear time for politics. That may be within the law, he says, but it is not good public relations. "Radio and tv stations will not be able to get away forever with the excuse that the good time is sold."

"Radio and tv cannot beg for the privilege of broadcasting hearings of legislative committees without assuming the proper responsibility during election time."

Grew Up in New York • Morris S. (initial only, no middle name) Novik was born Nov. 15, 1903, in Nevel, Russia. Coming to America a dozen years later with his parents, he grew up on New York's Lower East Side.

In the early 1920's he became interested in the activities of the Socialist movement that was growing in popularity. This association, from which he divorced himself when Communists began to assert control of the organization, led to his appointment in 1927 as director of Unity House, supervising the cultural and educational work of the Pocono Mountains summer resort of the International Ladies Garment Workers Union.

Working there in the production of musical shows and similar amateur program ventures prepared Mr. Novik for a career in professional theatrical circles. From 1927 through 1936 he spent summers at Unity House and, beginning in 1928, winters in New York as director of the Discussion Guild. All was going well until radio rushed the demise of the guild in 1932.

Can't Beat Radio • In 1932, Mr. Novik saw that radio could offer a much greater platform than all the auditoriums combined, for discussions of contemporary public affairs. On Sept. 10, that year, he joined WEVD New York, owned by The Debs Memorial Radio Fund Inc. He was the station's program director until 1938, with responsibility for all non-Yiddish nighttime programs.

His most successful program, The University of the Air, was an outgrowth and extension of the forums he had been staging earlier.

He had been in radio for only one year when he accepted an additional post that was to launch him in the consultant field. The Social Security Board, in 1933, named him the radio specialist in charge of its first registration campaign.

In 1936, Mr. Novik introduced Brown & Williamson Tobacco Corp. to radio advertising. He sold B&W on the idea of sponsoring WEVD's coverage of the American Federation of Labor convention in Tampa, Fla. The commercials for Avalon cigarettes emphasized that the brand was "union made."

Turns Non-commercial • Mr. Novik shifted from commercial to non-commercial radio in 1938, becoming director of communications for New York City and director of municipal station WNYC. Mayor Fiorello La Guardia later appointed him the city's first commissioner of communications. During World War II, Mr. Novik assisted the mayor in his weekly Italian language program that President Roosevelt had asked Mr. La Guardia to broadcast to Italy via the BBC.

In 1940, he became executive secretary of the National Assn. of Educational Broadcasters, a post he held until 1948. In 1945 he was a member of the ETO mission of 12 broadcasters that toured European installations of the armed forces and advised on the utilization of radio facilities.

Mr. Novik and his younger brother Harry acquired WLIR New York in 1950, which they established as a Negro programming station. Five years later Morrie resigned as president of WLIR to become owner and president of WOV New York, specializing in Italian programming. He sold WOV in 1959, but has kept his interest in WLIR.

President Harry Truman appointed Mr. Novik to the Paris UNESCO conference of 1952, and the following year Mr. Novik was a participant at the UNESCO London conference to assist European countries starting in tv.

Since 1946 he has been radio-tv consultant to the AFL (since 1955, AFL-CIO), which sponsors news commentator Frank Morgan's broadcasts on ABC Radio. Mr. Novik has produced the program since it started in 1949.

Last May Mr. Novik was appointed to the U.S. Advisory Commission on Information. He also is presently program consultant to Ohio State U.'s Radio Institute and is a frequent lecturer on communications at universities. He maintains an office in the apartment house where he also resides with his wife on New York's West 23rd Street. He married the former Manya Davidson on Sept. 13, 1930. They have no children.

Consultant Novik
Capitol Hill hearings have benefited from his expertise
The outlook from the 88th

From now until the new Congress convenes in January the pundits and the politicians will expound on the crazy-quilt pattern of last Tuesday’s elections. Each party will discern clear signs of victory in the presidential sweepstakes two years hence.

Some candidates will grouse about radio and television treatment, alleging 315 violations. The FCC will harass stations with questionnaires and other unconscionable demands for information—much of it non-existent and most of it none of the government’s business.

What concerns broadcast licensees, advertisers and agencies most is the complexion of the 88th Congress and its probable disposition toward radio and television. Their search for improvement will prove futile.

The elections brought no significant changes in congressional alignments. The chairmanships of both the Senate and House Commerce Committees, which ride herd over both the FCC and the Federal Trade Commission, will continue with their 87th Congress occupants—Sen. Warren G. Magnuson of Washington and Rep. Oren Harris of Arkansas. Similarly no significant changes are indicated on subcommittees specifically charged with communications and advertising matters.

If anything, the hand of the New Frontier has been strengthened. There aren’t likely to be any changes in the regulatory philosophies of the FCC or the FTC.

Tougher regulation is indicated, particularly by the FCC. Regulation will become increasingly stringent if the broadcasters do not fight back. The most docile broadcaster now must realize that acquiescence leads only to subservience.

Watch and ward society

The mechanism for government enforcement of the NAB radio and television codes, without the formality of government regulation, could be seen in action last week.

In an address last Thursday at a regional NAB meeting in Dallas, LeRoy Collins, the association president, exhorted broadcasters to subscribe and adhere to the codes. “It is our responsibility,” Gov. Collins said, as he has at all the regional meetings of the past month, “to improve our codes to the point that any eligible broadcaster will be embarrassed not to be publicly identified as a member.”

On the same day, by what must be presumed to have been coincidence, the FCC was giving serious consideration to the adoption of sections of the NAB codes as FCC rules. The commission postponed voting on the matter, but it listened for more than an hour to Commissioner Robert E. Lee, the principal advocate of the proposal.

Mr. Lee and his like-minded colleagues, it is now plain, have at last discovered in the NAB codes a ready-made apparatus for imposing their will upon broadcasting. They can argue, as they have, that since the codes were written and approved by broadcasters themselves, broadcasters cannot object if the government endorses those standards. The response of the NAB has been the obvious one: The only reason the FCC is thinking of adopting parts of the codes in its own rules is that, under self-regulation, many stations pay no attention to them. To head off the FCC threat, code subscriptions must be vastly increased and code compliance enforced with more vigor by broadcasting’s own code authorities.

This sequence of threat and response can be continued indefinitely with the probable result that more and more stations will subscribe to the code and cede more and more power to the NAB code authority. At any time that code subscriptions decline or enforcement weakens, the FCC can revive the threat of assuming jurisdiction.

Mr. Lee’s proposal cannot at this time attract a majority of FCC votes. At best, it is conjectured, he can muster three: his own, Chairman Newton Minow’s and, possibly, one from the newly appointed member, E. William Henry. At this point he needs no more than three, for three are enough to emphasize the existence of the threat of government intervention and to persuade at least some broadcasters to take refuge in Gov. Collin’s sanctuary.

Either way the present course veers, it must eventually arrive at one destination: a powerful, central code authority to which all broadcasters pay allegiance under threat of FCC reprisal of some kind.

Another course would seem to be more desirable if radio and television are to avoid being forced into a state of faceless conformity that requires all stations to sound or look alike. What is needed is the courage to ignore Mr. Lee’s threats and to be prepared to resist the FCC if he can ever persuade enough members to issue rulemaking orders.

How many voices?

The 10 commercial radio stations that have scrapped their regular nighttime schedules to carry Voice of America broadcasts to Cuba fully deserve the praise they have received. They have been an act of patriotism in a time of national danger, and no one will begrudge the points they may have made with an FCC that set up the arrangement.

It in no way means the service these 10 have rendered to suggest that undesirable precedents may have been set. Who is to say when another emergency will arise or how broadcasting might seem useful to the government? Ten commercial stations have been used as vehicles to transmit propaganda to Cuba. What is the difference between that and the use of other stations, in a troubled time, to transmit propaganda to Mexico, say, or Canada or even the U. S.?

The Voice of America undeniably provides a useful service that was improved by the inclusion of the 10 commercial stations in its broadcast structure. As a permanent policy, however, the Voice—and the American system of private broadcasting—would be better served by an expansion of the Voice’s own facilities. As reported elsewhere in this issue, a start has been made in that direction with the installation of Voice stations in and near Florida.

"Remember that famous western star... the one in all those stories of the early West?"
Nearly every television station that broadcasts live color—does it with an RCA color camera. The improved model, Type TK-41C, features precision yokes, prism optics and stabilization of all critical control circuits. These features assure precise registration of colors and unmatched resolving power. The result is living color performance.
Governmental affairs are important

Channel 3 is located in the State Capitol City of Wisconsin. News and public service coverage of all Governmental Departments is an essential service to WISC-TV viewers.

In the past month here is a list of departments which have received such special public service coverage: Highway, Motor Vehicle, Conservation, Agricultural, Industrial, Health, Civil Defense, Natural Resources, and all Elective offices.
