*Just one of the many great COLUMBIA POST-48's

DISTRIBUTED EXCLUSIVELY BY SCREEN GEMS, INC.
You have to believe in the potential of an area that believes in itself. In this Johnstown-Altoona Market, leading industries and major utilities are plowing millions of dollars into modernization and expansion—public and private projects are going forward at full speed. The result—a real boost in family buying power—a receptive audience for your sales story.

**IT'S TIME TO PUT WJAC-TV TO WORK FOR YOU!**

The most potent, persuasive salesman in this Johnstown-Altoona Market is WJAC-TV—the station more people watch, more of the time. And, doesn't it stand to reason—the bigger the audience, the greater the number of live prospects for your product? Tell 'em . . . and sell 'em . . . via WJAC-TV!

Get all the marketing facts from Harrington, Righter and Parsons, Inc.

SERVING MILLIONS FROM ATOP THE ALLEGHENIES
St. Louis has developed an active “See what’s on KTVI” attitude.

We encourage it with:

Total Information News
6-6:30 p.m. Mon.-Fri.,
and
The Steve Allen Show
10:15 p.m. Mon.-Fri.

“Total Information News” offers residents of the greater St. Louis area a full half hour of information starting with network news that is fifteen minutes ahead of the other stations. At 6:15, they see local news in action; ten minutes of filmed reports in motion on “City Camera”. A local sports personality captures the final five with a personal “Sports Comment”.

Steve Allen simply keeps the market awake to see what will happen next.

Programming like this balanced with the ABC lineup fosters the curiosity attitude we welcome. See what’s on KTVI; it creates a buying attitude, daily!
IN THE DALLAS-FORT WORTH MARKET
CHANNEL 4 REACHES MORE HOMES
THAN THE OTHER THREE COMBINED
MONDAY THRU FRIDAY 9 A.M. TO 5 P.M.*

Yes, according to the November-December, 1962, Nielsen Station Index, KRLD-TV reaches more homes per average quarter-hour in a 4-station market than its three competitors’ averages combined, Monday thru Friday, 9:00 a.m. to 5:00 p.m.

And, KRLD-TV reaches 43.9% more homes per average quarter-hour than the next station in the market, 6:30-10:00 p.m. Sunday thru Saturday.*

Take advantage of Channel 4’s superior market coverage. See your ADVERTISING TIME SALES representative.

*NSI, Nov-Dec., 62
Mobile meters

That long-demanded metered measurement of "the total radio audience" may not be far off. It's understood NBC Radio thinks it'll be able to announce in a few weeks that it plans to subscribe to service of that kind. Since William K. McDaniel, executive vice president in charge of NBC Radio, has been dickering with A. C. Nielsen Co. along these lines, it's assumed Nielsen has now perfected gadget that would attach to portable radio sets to record non-plug-in set usage which NBC and radio broadcasters generally have been calling for (BROADCASTING, Jan. 21).

Under a new gun

Advertising acceptance standards of radio and television will be given long, hard look in Senate investigation of land deals and health-aid products that are offered to the elderly and aged. Print media have already been criticized (BROADCASTING, Jan. 21). Investigation by Special Committee on Aging (or perhaps by new special subcommittee on frauds) will turn to broadcast advertising. There's conjecture that Sen. George A. Smathers (D-Fla.) may become chairman of Committee on Aging and new fraud subcommittee. Hearings in mid-January have provoked "unparalleled flood" of complaints of bilking and misrepresentations, committee sources say.

End of the line?

Some folks in high places are now saying that FCC's Omaha hearing on TV programming (story page 21) may be blessing in disguise. They predict it will be second and last one (first was in Chicago) largely because of congressional reaction. It was clear at last Thursday's hearing on confirmation of FCC Broadcaster Bureau Chief Ken Cox for membership on commission that both Republican and Democratic senators looked with disfavor on such fishing expeditions. And it was apparent, too, that Mr. Cox got message.

Both Republican and Democratic senators also inquired into delays in license renewals. In inquiring of Mr. Cox about renewal backing, Senator Thurmond (D-S. C.) observed that in broadcast cases it often happens that "justice delayed is justice denied."

Mattel winds up a new one

Big toymaker, Mattel Inc., which has been heavy user of television but critical of most children's programming now available, has come up with novel plan to get its advertising on what it thinks will be better shows. Toy company proposes to finance 260 five-minute kid shows (The Funny Company) and sell them "at low cost" to TV stations. As part of deal Mattel would buy spot positions in its programs. Mattel plans to merchandise toy reproductions of characters in its shows.

Mattel proposal was tried out on some 30 station representatives in private New York meeting last week, will be explained to other reps in Los Angeles this week. Word given New York reps was that Mattel will commit at least $75 million over two years to its project if stations accept it. Carson/Roberts, Los Angeles, is Mattel agency.

Sweet charity

Those 10 commercial radio stations that turned over their facilities to Voice of America during Cuban crisis will get small thanks from government. VOA has already said it can't reimburse them for their service because of statutory limitations on its funds. New Internal Revenue Service reportedly has indicated that stations cannot take tax deductions for lost advertising revenue—and what's more, operating expenses they incurred while carrying government propaganda to Cuba cannot be charged off in tax returns. IRS may be following precedent that contribution of broadcast time or newspaper space is not deductible as charitable contributions. Unmentioned so far but possible: act of Congress for special relief.

The Pacifica case

Strange case surrounding non-commercial FM stations operated by Pacifica Foundation in California and New York, currently being investigated by Senate Internal Security Subcommittee, shortly will be considered by FCC. License renewals of three non-commercial stations have been held up for three years, originally because questions had been raised about allegedly obscene poetry on station, but Senate committee, in closed session, is inquiring into purported "Communist infiltration" (BROADCASTING, Jan. 14, 28). Stations involved are KPFA Los Angeles, KPFA Berkeley and WBAI New York.

FCC staff, it's understood, now is preparing papers for commission consideration. Question of free speech may be involved since stations carry all shades of opinion, ranging from John Birch Society to California Communist Party. But there may be other questions too, involving possibility of ownership qualifications and whether substantial amount of support is derived from objectionable sources.

A look at media control

Mid-March is target date for beginning of Rep. Celler's House Antitrust Subcommittee inquiry into concentration of ownership in newspaper field, with definite radio-TV ownership overtones. For some six months (BROADCASTING, Oct. 1, 1962) Celler committee staff of seven has been preparing for public hearings with several field investigations made, particularly in Los Angeles, where two newspapers folded last year, and in New Orleans, where S. I. Newhouse interests acquired ownership of Times-Picayune.

Cramp in correspondence

FCC is shortening reins on staff members who've been trying to force changes in TV station schedules by questioning local program proposals at license renewal time. WKY-TV Oklahoma City was renewed last week after commission put stop to flow of staff hints that station refused to heed (story page 52). Staff also tried to clear second letter to WFAA-TV Dallas on grounds station's reply to its first had been unsatisfactory, but was told by FCC to start renewal machinery. Action on WFAA-TV renewal is expected this week.

Among those favoring immediate renewal of WFAA-TV license was chairman Newton Minow. Last summer Mr. Minow appeared in special interview show on WFAA-TV.

The auction bloc

FCC is still considering legislative proposal to eliminate 1952 "anti-Avco" amendment to Communications Act which prohibits commission from ordering competitive bidding in station sales. Commission had stopped practice on own motion before 1952 amendment was adopted. But some members now would like amendment scrapped and commission given "discretion" in deciding how to proceed in station transfers.

One proposal being offered would require that proposed purchaser be able to demonstrate he could do better job of broadcasting than seller. Proposal, offered by Commissioner Robert T. Barley, hasn't picked up much support. One critic says it would "put premium on being a lousy broadcaster."

ABA group opposes change in Canon 35

Canon 35 should remain as is, with slight revision, special committee of American Bar Assn. reported Friday.

Committee, which has been investigating possibility of changing prohibition against tv and radio and news photographic coverage of court trials since 1958, submitted recommendations to ABA board. ABA House of Delegates will vote on report today or tomorrow. American Bar Assn. is meeting in New Orleans.

In bow to sensitivities of broadcast industry, committee suggested that reference to radio and tv coverage as instruments that "degrade the court" be eliminated.

Report drew scathing comment from LeRoy Collins, NAB president, who called it "shocking lack of confidence in the integrity and objectivity of the judiciary.”

This was pointed at references in report which hold that many judges who are elected would find it difficult to preserve proper decorum during televised trials.

Gov. Collins also said recommendation "reflects both a lack of knowledge and of understanding . . . [and is] reactionary. . . .”

Bar Assn. committee cavalierly dismissed test series proposal, Mr. Small commented, with no good reason for refusing to judge broadcast coverage on pragmatic basis.

ABA committee said tv and radio reporters may attend trials and report via their medium outside courtroom. It also emphasized that right of fair trial is protection to defendant, not requirement that trial be publicized.

Agreeing that mechanics of covering court by tv and radio has improved since 1937 when Canon 35 was adopted following Lindbergh kidnapping trial, committee said recent examples of tv coverage continue "serious doubt" that decorum of court can be maintained.

Test series suggested by RTNDA would not be "fruitful,” committee said.

FCC grants WDKD stay

FCC has granted stay of its order for WDKD Kingtree, S. C., to leave the air by Feb. 8 (Broadcasting, Jan. 14). Commission said order will be stayed until 30 days after decision by appeals court on station's appeal from FCC order.

White now specialist

Frank K. White, retired network and agency executive, is embarking at 63 upon government career. Along with three other "specialists," he left Feb. 1 on two-month assignment in Europe for Dept. of Agriculture in its program to help expand overseas markets for U. S. farm products. Mr. White, now residing in Leesburg, Va., is on board of Advertising Council. He was former chairman of McCann-Erickson (International); president of NBC (1952-53); president of Mutual (1949-52); vice president and treasurer of CBS (1937-47) and treasurer and business manager of Newsweek Inc. (1936-37).

Fogarty criticizes program regulation

Testifying Friday at FCC's hearing on local programming in Omaha (see story page 30), Frank P. Fogarty, vice president of Meredith Broadcasting Co. and general manager of WOW-AM-FM-TV Omaha, expressed concern over FCC efforts to regulate programming.

During renewal period, Mr. Fogarty said, Omaha stations were required to give extensive public notices. Any complaints should have been made by public then, he said.

Afternoon FCC cross-examination, Commissioner Henry asked witness if antitrust waiver were provided, would it be feasible for three Omaha stations to get together on children's programming?

"I think it would be feasible but not desirable," Mr. Fogarty replied.

C. Alfred Larson, WOW-TV station manager, and William McBride, program director, took witness stand late Friday.

CBS-TV giving choice of 30-minute news

CBS-TV has revised its plan for half-hour evening newscasts next fall (Broadcasting, Dec. 10, 1962) to give affiliates a choice of time periods. Originally scheduled at 7-7:30 p.m. EST, weeknight program will be fed at both 6:30 to 7 and 7 to 7:30. This move is intended to accommodate stations unable or unwilling to move local programming out of high-volume 7-7:30 station time.

On theory that value will be diluted by inability to deliver entire lineup at one time, network is also reducing compulsory half-hour to affiliates for local use. Original plan contemplated return of 4:30 to 5 p.m. period; new plan is to return only 4:45 to 5 p.m. Some re-programming by network will be necessary; authorities indicated Edge of Night, now seen 4:30 to 5, will move to new period as yet undetermined.

Fm group approves rate standards

QXR Network, which has 43 fm station affiliates, has approved recommended standards that stations could adopt for their rate cards. Action is not binding on stations. Roughly, standardization would include half-hour at 60% of hour rate, quarter-hour at 40%, five minutes at 30%, all on one-time basis. Double "a" would include 5-11 p.m., Mon.-Sat., and Noon-11 p.m., Sunday, and "a" time would be all other periods. Rate for class a would be 60% of hour rate in double a. Maximum discounts in programming time: 5% for 13 weeks, 10% for 26 weeks, 15% for 39 weeks, and 20% for 52 weeks. Discount on spots depends on frequency with maximum of 15% for over 1,040 one-minute announcements per year. One-minute spot generally would be priced at 20% of hourly rate.

In other affiliate actions taken in recent meeting, it was disclosed Friday (Feb. 1) plan was put into motion to expand sustaining programming on network from average now of less than 5 hours per week to 7-10 hours weekly, and new study being prepared showing demographic profile on fm audience in QXR markets.

Joseph McDonald dies; was former NBC vp

Joseph A. McDonald, 59, partner in Washington communications law firm of Hessesey & McDonald, plunged to his death Friday (Feb. 1) from bridge near his suburban Bethesda, Md., home. His associates reported he had been despondent recently.

Mr. McDonald, former NBC vice president, was with network 20 years and was expert on labor and copyrights in broadcasting. He had been in private practice in Washington since 1958. Mr. McDonald is survived by his wife, one son and two daughters.
joined WBC as assistant sales manager of WBZ-TV Boston, and was named to his current post in May 1959. Previously, he served as assistant to president of Mutual Broadcasting System and as manager of Boston office of Weed & Co. Westinghouse Broadcasting tv stations are WBZ-TV Boston; WJZ-TV Baltimore; KDKA-TV Pittsburgh; KYW-TV Philadelphia; and KPIX (TV) San Francisco.

Dr. George R. Town, dean of engineering at Iowa State U., Ames, was named by NAB last week as recipient of its 1963 Engineering Achievement Award (see story, page 60). Dr. Town, who directed 1957 TASO study of TV allocations, was chosen because of “his valuable contributions to technical knowledge and literature, his development of new engineering techniques and his leadership in broadcast engineering activities,” the NAB said. The award will be presented to Dr. Town on April 3 at annual broadcast engineering conference during NAB convention in Chicago.

Richard J. Farricker, executive vp of Geyer, Morey, Ballard, New York, elected president, succeeding late Sam M. Ballard. Mr. Farricker becomes third president in GMB’s 52-year history. He had been associated with Cunningham & Walsh, Kudner Agency and McCann-Erickson before joining GMB in December 1959 as executive vp. Mr. Ballard died Jan. 25 (At Deadline, Jan. 28).

For other personnel changes of the week see Fates & Fortunes

**CBS Radio signs Smucker**

J. M. Smucker Co., Orrville, Ohio (jellies, preserves), in launching first national ad campaign in any medium, will co-sponsor Garry Moore Radio Show on CBS Radio. Contract is for minimum of 26 weeks, beginning March 18. Agency is Wyse Adv., Cleveland.

**WCBS-TV’s ‘Late Show’ marks 12th anniversary**

WCBS-TV New York will celebrate 12th anniversary of its Late Show (oldest feature film program in metropolitan New York) next month by beginning all-night programming on station (Closed Circuit, Jan. 28). Additional programming, starting Feb. 26, will consist of motion pictures titled “Late Shows,” Parts 2, 3 and 4. Length of films and period station starts following morning’s schedule will determine number of movies to be shown. (WCBS-TV goes on air at 5:45 a.m. weekdays: 7:15 a.m. Saturdays and Sundays.)
WGAL-TV delivers a loyal, responsive audience. This unequalled viewer following results from fourteen years of pioneering, finest facilities, and the most complete and modern equipment in the area. The television formula for Colgate's surging sales

The accent is on tomorrow at Colgate-Palmolive, one of the nation's oldest soap makers, now finding a new way of life in developing and marketing new products. Colgate doubled the number of products advertised on TV in one year, and added $165 million to its sales in the process. The company is now TV's No. 2 customer.

New applause for old TV in cultural retrospective

The Museum of Modern Art in New York will unveil this month its first "retrospective" devoted to television, giving the medium a cultural recognition hitherto reserved for such visual arts as the motion picture, architecture and painting. It's a 54-episode recollection of the better moments from 13 seasons of television.

What's right, what's wrong with TV—and who says so

Eight men, representing nearly all shades of opinion about the television industry, were brought together on one stage to tell what's right and wrong about the medium. Among their texts, condensed in this issue, the reader can find just about all the positions you can take, and about all there is to say, on the subject.

Networks at midseason: special 3-page pullout

As usual, no TV network found the hand it drew at the first of the season good enough to stand pat on all the way through, but one almost did. CBS, running a string of rating victories the likes of which haven't been seen ever, proved that what the people want in 1963 is (1) comedy and (2) stars. A special 3-page pullout puts it in focus.

March 18—Reply comments to FCC's proposed fm allocations table.

March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock.

*March 26—Final date for filing of applications for ch. 5 in Boston. Applications will compete comparatively with present occupant WHDH-TV.

*March 31-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

APRIL

*April 1—Stockholders meeting, Wometco Enterprises Inc., Miami, Flia.

*April 1-5—Canadian Assn. of Broadcasters annual convention, Royal York Hotel, Toronto, Ont.

*April 3-5—Assn. of National Advertisers West Coast meeting, Santa Barbara Hilton Hotel, Santa Barbara, Calif.

April 8-Oscar awards ceremonies, to be broadcast on ABC's radio and tv networks.

*April 18—Assn. of National Advertisers, workshop on international advertising, Hotel Plaza, New York.

April 19—Michigan AP Broadcasters Assn. meeting, Lansing.

*April 21-25—Ninety-third convention of Society of Motion Picture & Television Engineers, Traymore Hotel, Atlantic City, N. J.

*April 26—Pennsylvania AP Broadcasters meeting in Pittsburgh.

*April 26-27—Virginia AP Broadcasters meeting, Executive Motor Hotel, Richmond. Awards in the VAPB newscasting and telecasting contests and for public service will be presented on first night at the banquet.

April 29-May 4—"Rose d'Or" Contest; May 20-25, 1963—Television Symposium and TV Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Montreux, Switzerland. For further information write to Box 97, Montreux.
The Kline "tower package." one contact with one responsible firm covers — Tower, Lights, Erection (elevator if desired) — that's the Kline "tower package."

Towers are designed to meet all conditions and RETMA specifications are strictly followed.

A new "Kansas Giant" has been born! The new 1503-foot KTVH tower is the tallest structure in Kansas, adding over 50,000 new television homes to the KTVH viewing area, with additional coverage in 26 Kansas and Oklahoma counties.
The Nashville story
EDITOR: HEARTY CONGRATULATIONS ON THE FINE COUNTRY MUSIC FEATURE AND ITS RELATION TO BROADCASTING [SPECIAL REPORT, JAN. 28]. WE KNOW ALL OTHERS CONNECTED WITH THIS SPECIALIZED FORM OF RADIO JOIN US IN EXTENDING COMPLIMENTS FOR BOTH THE EXCELLENT AND CONSTRUCTIVE DEPTH REPORTING AND ALSO YOUR DEPARTURE FROM THE USUAL “LOOK HOW MUCH MONEY THE HICKS ARE MAKING” APPROACH. WE’RE MOST PROUD TO BE SERVING ONE OF AMERICA’S MOST CONCENTRATED COUNTRY-FOLK MARKETS AND ARE EQUALLY PROUD TO BE WORKING WITH THOUSANDS OF RESPONSIBLE BUSINESS MEN AND ENTERTAINERS THAT COMPRISE C&W RADIO AMERICANA.—GEORGE A. CRUMP, PRESIDENT, WCMS RADIO TIDWATER, NORFOLK, VA.

Hix admirer
EDITOR: What a delightful surprise it was to open Broadcasting and find myself in a Sid Hix cartoon [EDITORIALS, Jan. 14]. I am honored and pleased. I have a superb spot in the middle of the wall of my office-at-home, and the
original of the cartoon would fill it beautifully. Could I have it, do you think? I would be so grateful to you and to Mr. Hix.—Joyce D. Brothers, Ph. D., National Broadcasting Co., New York.

[Dr. Brothers’ psychological approach is irresistible. The cartoon original is on its way to her.]

Close agreement
EDITOR: Your editorials in Broadcasting express my opinion almost 100%.—Joyce Speidel III, president, Speidel Broadcasting Corp., South Miami, Fla.

Sales success secrets
EDITOR: Since you ran the book note [BOOK NOTES, Dec. 10, 1962] on SUCCESS SECRETS: THE ANATOMY OF LOCAL RADIO-TV COPY, I have experienced more unexpected sales. More than 10% of all radio and tv stations in the county have bought at least one copy and many have reordered up to five additional books. Many of these sales are traceable directly to your magazine. So, congratulations on the pulling power of Broadcasting....—William A. Peck, San Antonio, Tex.

Good write-up
EDITOR: I thought that was a good write-up of the week’s event affecting the All-Industry Committee and ASCAP [PROGRAMMING, Jan. 21]. Facts, quotations and plans were all accurate and well written. Good work.—Hamilton Shea, chairman, All-Industry Television Station Music License Committee, New York.

No scorekeeping
EDITOR: Broadcasting carried a letter from Joe Klaas, KYA San Francisco [OPEN MIKE, Jan. 14], in which the following sentence appeared: “And, since California Welfare Department statistics show that more teen-age unwed mothers conceive in automobiles at drive-in movies than anywhere else, perhaps we should eliminate movie advertising.”

... Our Hollywood people advise me that the California Welfare Department does not compile such statistics and never made a report on the subject. They learned, however, that a former employee of the department had made such a statement in a report. It has been used as a basis for quotation on numerous occasions but without any basis or foundation and no formal report of this nature has ever been issued.

I have no doubt that drive-in movies have contributed to the population explosion, but so have motels, bungalows, and beds. I hope that this will not result in reducing advertising of these items.—Edward Cooper, Motion Picture Assn. of America Inc., Washington.

Bravos for Daly
EDITOR: Bravo! to Harry J. Daly for the sharp and pertinent opinions he expressed in the article, “Engineered births for radio” [LEAD STORY, Jan. 14].

If I were in any position to choose a spokesman for the radio industry, Mr. Daly would head my list of candidates for the job....

The industry could use more men who would not be afraid to open fire on those of us who discredit it by engaging in unethical practices and other nefarious forms of activities simply to gain purely selfish ends. However, at the rate things are developing, it might not be too long before a general clean-up will be forced upon us.—R. J. Bennett, general manager, WAYE Baltimore.

WMAL RADIO

Radio's golden touch can help rebuild employee morale, too

At 6 a.m. every weekday for over two years, the main plant whistle at the Buick Motor Division has signaled the start of a full hour of communications on WKMF Flint, Mich., to some 16,000 Buick employees.

Our program, Factory Whistle, began as a radio experiment on WKMF but its phenomenal success as a “house organ of the air” still gets inquiries from other companies. It has even been adapted to other industrial centers. How did we pick radio to put across our employe-relations program?

Buick in mid-1960 was completing a broad program of self-appraisal and reorganization. Manufacturing standards had been overhauled. A new policy required that more quality be built into every Buick and imposed rigid reliability tests.

Early signs showed the Buick sales curve had turned upward. That was the start of the resurgence we know today has put new zip in Buick sales.

New Challenge • All of this had been brought about by a new general manager, a vice president of General Motors, Edward D. Rollert, during his first year at Buick. He then turned to employe morale in his program of reorganization.

It was apparent that the plant’s new reliability engineer and the thousand men at his command could define quality, but only the men in the shops—not the head office—could build it into the product. The formal employe-relations program lagged. Morale certainly needed to be improved, yet the in-plant climate was not the best for reconstituting an employe-relations program. It was little better in the surrounding community.

Buick’s public relations staff knew there was a basic communication problem. There was too little contact between management and employes as people to people; too little explanation by management of what it had set out to do that would benefit the worker, his job and his family, the economy of Flint, the people of the area and, of course, Buick.

But how to communicate? There could be nothing haphazard here, no impulsive move. Existing channels were evaluated and rejected. Even direct mail was considered.

The Choice: Radio • Conventional thinking directed some attention to print, a company newspaper or magazine. For about $5,000 a month, Buick could have had a once-a-month paper, constricted to 20 tabloid columns. But the frequency seemed inadequate and the prospect of two-way communication was obscured.

That’s when radio entered the picture. At the time we could find no comparable use of the medium anywhere. But Factory Whistle, which began on WKMF Oct. 31, 1960, was soon to reach our multiple audiences five days weekly. Since the Buick day shift starts at 7 a.m., our 6-7 program would catch Buick folks dressing, eating and driving to work. It would talk to the community, too.

Factory Whistle is a competitive program and strives to hold its listeners. The show uses only a little written script, and that helps to keep the tone warm and conversational. Willard F. Lamb is producer, editor, musical director and “voice” for the program. He’s “Bill” to everyone in the plant and area. The show has music, time and weather, plus lots of news and the previous night’s sports news, provided by WKMF. Buick insists that the station cut in with all the objectivity it gives to its day-long news programming.

The Human Touch • Buick runs no commercials as such on the program, but it is loaded with unending “commercials” which sell 16,000 men and women on their jobs and their community. Bill Lamb tapes interviews with workers, tells about their promotions, weddings and births, awards and production successes. He asks for blood for the Red Cross or a helpful hand for some one in the community. During the first year, over 500 workers “talked” on the air and 10,000 wrote letters to the show.

Factory Whistle helped promote Buick’s car pool plan to lend new cars to workers for testing and comment. The show boosts work safety. It has made something special out of family visiting days and factory open houses.

There has been a regeneration of the craftsman’s pride in Buick as a product and of the company as a place to work. You can see signs that this pride is spreading. Flint is prouder that Buicks are made there and prouder of Buicks as good cars.

Four human things about Factory Whistle give greater satisfaction than all others.

First, the warm acceptance of the program when Bill Lamb visits the individual factories. He is there every day in search of the human interest that leavens all people-to-people relationships, even management and workers.

Second, the solid prestige enjoyed by Factory Whistle which permitted Bill Lamb to speak out soberly about individual responsibility, for instance, when the Community Chest drive faltered.

Third, the results of a formal questionnaire survey in the Buick plant establishing that daily listenership to Buick’s WKMF program includes 85% of those on the factory day shift who drive to work.

Fourth, this vignette from life: A union committeeman drove off in one of Factory Whistle’s loaner cars, a brand new one. He hadn’t gone far when he was brought to a stop by a clanking in the drive train. Under a nearby garage hoist, a mechanic worked for a minute, said it wasn’t seriously—only a loose nut on the transmission housing—and then commented that “some other new Buicks are that way.”

It was the committeeman’s day off, but he drove straight to the plant. He went out on the assembly line and read a purple riot act that put Buick quality and reliability up two full notches.

What better measurement of results would you want?

Gerald H. Rideout, director of public relations for Buick Motor Division of General Motors, Flint, Mich., joined GM in 1950. After graduating from Central Michigan College in 1939, he worked on newspapers in Michigan, Pennsylvania and Kentucky. He joined the United Press in Detroit in 1943 after a disability discharge from the Army. UP later assigned him to Chicago and then to New York. He has been active in Flint community affairs.

The voices that influence Indiana's most dynamic market

The hustling, thriving Mid-Indiana market—Indianapolis and its 55 surrounding counties—has all the ingredients of a self-contained empire. Highly diversified industries, progressive business and financial talents, energetic civic and cultural leadership all combine to make this a super-market of giant potentials. Best of all, it's a "reachable" market, for its customers and its suppliers. The three famous WFBM Stations help Mid-Indiana's "planners" and "do-ers" keep the public informed; help excite them to productive action. To get your share of this market’s ever-increasing sales volume, use the dynamic voices of The WFBM Stations to broadcast your selling messages in Mid-Indiana.

BROADCASTING, February 4, 1963
A candid explanation of the FCC’s New Frontier policy on program regulation was given by a Kennedy-appointed commissioner last week. The policy was outlined by Commissioner E. William Henry, who presided over hearings on local television programming in Omaha. As described by Mr. Henry, the policy boils down to this:

* Public approval is not the ultimate test of broadcast performance.
* The FCC’s own “standards” or “policies” are measurements by which a broadcaster’s performance is judged.
* The FCC is more “aware” of what is expected of a broadcaster than the general public is.

Mr. Henry made several statements on FCC policy during the Omaha hearings that lasted all week (see story beginning page 30).

On Tuesday evening, after two days of testimony that had been overwhelmingly favorable to the Omaha stations, Mr. Henry told a news conference that “most of the representative citizens of Omaha seem to be satisfied with the performance of all the stations in the area that we are investigating, namely local live programming.”

Asked if the Omaha findings would serve as a measure the FCC could use to judge stations in other communities, Mr. Henry said yes, and he added: “I think it is a measure of two things: one, of the feeling of the local citizenry about it and, secondly, the measurement of their [the stations'] performance by whatever standards the commission has, based on its statistics with regard to stations throughout the country.”

**What Standards?** Did he feel that the Omaha stations measured up to FCC standards? “That,” said Mr. Henry, “is something that we really can’t tell too much about until we hear the presentation of the stations themselves and we interrogate them about our own statistics that we have on them.”

Mr. Henry then added: “I don’t think necessarily that the standard that the community might have is necessarily the one we would have. I think perhaps we are a little bit more aware of an affirmative duty on the part of local stations to broadcast local live programming whereas the general sentiment in this community—and I imagine it’s typical—is that the stations are fulfilling their complete responsibility if they simply respond to inquiries or to suggestions from citizens that they put on some sort of local programming. But there again this is something we can’t tell as to how close the two come until after we have gone into it with the stations.”

**Educational Campaign** At the same news conference Mr. Henry observed that although Omaha citizens “still have their doubts why we are investigating the stations, my hope is that there will seep down some understanding of why we are here and that it simply is really in their interest.

“They may not like the fact that we are established to regulate their interest, but nevertheless we are, and hopefully most of them will realize that we are trying to do it in the best manner that we can.”

A day later, in another news conference, Mr. Henry said a lawyer had questioned his phrase “FCC standards” in his conference the day before, and he said he had used the term poorly. A better word would be “policies,” he said, because “there are not specific standards of the FCC. This is a gray area.”

To avoid further misunderstanding, he said he was offering this clarification: “That the FCC, I think, is aware of the responsibilities of broadcast stations to be a community outlet, which is simply another way of saying that they have a responsibility to broadcast local live programming. This is a responsibility that I think the general public is not as aware of as the FCC which establishes the policy. Another aspect of this same question is the broadcaster’s responsibility to lead and influence local public opinion as well as to reflect it. Therefore, I have conceived that their overall duty may possibly be greater than that demanded by the local public.”

In a talk before the Omaha Rotary Club Wednesday Mr. Henry said the local hearing was beneficial because it was educating the people “about rights they did not know they had.”

---

The first group of witnesses lines up before FCC Commissioner E. William Henry (right foreground) at last week’s hearing on local television programming in Omaha. The testimony of Omaha citizens added up to an overwhelming endorsement of the local stations and a repudiation of FCC program meddling. Full story page 30.
BROADCAST ADVERTISING

18 MILLION TV COMMERCIALS IN '63
That's prediction of BAR based on week's count of top 10 markets; networks will contribute about 90,000 to total

Spot and local television business in the U. S. is currently moving at a rate of 352,000 commercials per week and will total approximately 18,304,000 announcements in 1963. Network commercials will add a minimum of 90,116 to bring the grand total for the year to at least 18,394,116.

Those estimates are being projected today (Feb. 4) by Broadcast Advertisers Reports (BAR) on the basis of tabulations from BAR's first full week of daily around-the-clock monitoring of the 42 commercial tv stations in 10 key markets.

The monitoring showed that in the 10 markets alone a total of 29,572 non-network commercials, or an average of 704 per station, were carried during the week ending Jan. 11. In addition the network affiliates in this group carried 1,733 commercials, which BAR projected to a full-year minimum of 90,116.

Los Angeles led by a substantial margin in the number of spot and local commercials. Its seven stations carried 6,377 or 21% of the 30,216 total. New York was second, with 4,448 or 15% distributed among six commercial stations, while Chicago was third, with the four stations there sharing 3,118 or about 10%.

Washington Fourth - Behind these came, in order, Washington with 2,558 announcements; Detroit, 2,429; San Francisco, 2,352; Minneapolis, 2,205; Baltimore, 2,103; Philadelphia, 2,082; and Pittsburgh, 1,900.

Pain and cold relievers were the No. 1 spot users during the week, with 48 brands contributing 3,262 commercials or 11% of the 10-city total. Bufferin was far and away the No. 1 user in this field, spreading 396 messages over the 10 markets. Contac was second with 295 and Alka-Seltzer third with 201.

Tobacco products—a category of special interest because of NAB President LeRoy Collins' efforts to have cigarette advertising controlled by special tv code amendments—were represented by 24 brands which placed 826 commercials or about 2.8% of the 10-city total.

Parliament Tops - Parliament cigarettes dominated this category with 310 commercials—38% of the tobacco products total. L & M's second with 84 (including three programs sponsored on a spot basis) and Newport was third with 73.

Laundry soaps and detergents, third category whose spot activity had been tabulated by BAR last week, accounted for 19 brands and 603 commercials, or about 2% of the week's measured total. Pels Naptha products placed more than any other, a total of 97 representing 16% of the laundry spots, with Lever's Vim second (77) and Colgate-Palmolive's Dynamo third (60).

An examination of the commercials and their placement showed varying patterns among the leading spot users.

New York, Los Angeles lead BAR listing

New York and Los Angeles share top honors and Chicago, Philadelphia and Washington divide runner-up positions as markets getting the biggest chunks of the television business in the three product categories reported by Broadcast Advertisers Reports last week (See story above). New York was out in front in the drug and pain reliever category with 593 commercials in the monitored week and also in the laundry soaps and detergents group with 117. Los Angeles was ahead in tobacco products with 150. Here, by city, is how BAR's findings ranked the 10 continuously monitored markets in each of the three categories:

Pain and cold remedies—New York, 593 messages; Los Angeles 565; Washington 318; San Francisco 307; Chicago 305; Detroit 263; Philadelphia 247; Minneapolis 237; Baltimore 232; and Pittsburgh 193.

Tobacco products—Los Angeles 150; New York 129; Chicago 110; Detroit 93; San Francisco 75; Washington 69; Baltimore 57; Philadelphia 51; Minneapolis 49; and Pittsburgh 43.

Laundry soaps and detergents—New York 117; Philadelphia 70; Los Angeles 64; Baltimore 63; Chicago and Pittsburgh, 61 each; Washington 52; San Francisco 44; Detroit 39; and Minneapolis 32.

Parliament cigarettes, for instance, divided its 310 commercials among 38 of the 42 stations in the 10 markets, with the largest number (63) in Los Angeles. Generally, Parliament placed 60-second messages in late-afternoon, early-evening and late-evening movies and occasionally in sports and syndicated or local programs, with 10-second announcements and some 10's—and in Philadelphia a few 30's—in and between sports and news programs, movies and syndicated shows from late afternoon on.

L & M, whose 84 announcements ranked second among tobacco products, used 26 stations in the 10 markets and appeared to favor minutes, along with some 20's and 10's, in and around news, sports and movies, especially in early and late evening. Where Parliament concentrated its greatest weight in Los Angeles, however, L & M put more of its spots in New York (17) than anywhere else. But its Los Angeles budget included three newscast sponsorships and seven golf participations.

Newport cigarettes, third heaviest spot user, ignored Los Angeles completely during this week. It scattered 73 commercials across 25 stations in the nine other markets, dominantly using 20-second and one-minute announcements in early and late evening time.

Its heaviest weight, but not by much, was in San Francisco, which carried 11 Newport messages.

Top 10 Tobaccos - Here are the top 10 tobacco-product users of spot television in the 10 markets as measured by BAR during the week:

Parliament, 310 messages in 10 markets (heaviest in Los Angeles, New York and Chicago).

L & M, 84 messages in 10 markets (heaviest in Philadelphia and Chicago).

Kent cigarettes, 53 messages in nine markets (heaviest in Philadelphia).

Chesterfield cigarettes, 48 messages in five markets (heaviest in Los Angeles, Chicago and Philadelphia).

Winston cigarettes, 41 messages in six markets (heaviest in Los Angeles and New York).

Kool cigarettes, 39 messages in six markets.
Pintoff’s tv commercials enter west coast ad market

The first new animated commercials produced by Pintoff Productions Inc., New York, for west coast clients are off the drawing board and on the screen.

At right: A scene from a commercial made for Ralston Rice Chex (and Wheat Chex) cereal. Ernest Pintoff was director, designer and creator of the music. Guild, Bascom & Bonfigli, San Francisco agency, wrote the commercial.

At left: A still from Folger’s coffee commercial. Mr. Pintoff also handled the directing and designing for this production. Fletcher Richards, Calkins & Holden, San Francisco, wrote the script and music.

The two commercials represent Pintoff’s “entry” into the west coast tv commercial area.

markets (heaviest in Detroit).
York cigarettes, 36 messages in eight markets (heaviest in Los Angeles, Chicago and New York).
Montclair cigarettes, 28 messages (all in San Francisco, Baltimore and Washington).
Santa Fe cigars, 26 messages (all but one in Los Angeles).

Other tobacco brands monitored in the 10 markets, using from one to 18 spots during the week, were (in order) Spring cigarettes, R. C. Dun cigars, Raleigh, Lucky Strike, Bel Air, Camel and Salem cigarettes; La Palina, White Owl and Harvester cigars, and Dumarier, Flair, Marlboro and Pall Mall cigarettes.

Pain-Cold Remedies * In the pain and cold remedy category, the top 10 were:
Bufferin, 396 messages in 10 markets (heaviest in New York, Los Angeles, and Baltimore).
Contac, 295 messages in 10 markets (heaviest in New York, Los Angeles and Chicago).
Alka-Seltzer, 201 messages in 10 markets (heaviest in New York, Los Angeles and Detroit).
Anacin, 165 messages in 10 markets (heaviest in New York, Los Angeles and San Francisco).
Compoz, 156 messages in five markets (heaviest in Los Angeles).
Bromo-Seltzer, 148 messages in 10 markets (heaviest in New York, Chicago and Los Angeles).
Excedrin, 139 messages in 10 markets (heaviest in Los Angeles, New York and Chicago).

Vicks products, 137 messages in 10 markets (heaviest in New York, Pittsburgh and San Francisco).
Four-Way products, 127 messages in 10 markets (heaviest in Los Angeles, Chicago and Detroit).

Other advertisers in this category during the week, with from one to 121 commercials apiece, were, (in order) Dristan, Congestaid, Romilar CF cough syrup, Thorexin, Duractin, Sucrets, Super Anistat, Coldene, Isodettes, Rem cough medicine, Pertussin, Bromo Quinine, Actin, Isodine, Sleep-eze, Sinex, Doans Pills, BC Remedy, Pepito Bismol, Rollaids, Narbain cough tablets, Nervine remedy, Liquiicap cough cures, Primatene remedy, Aspergum, Dri Con cold remedy, Bayer products, Heet liniment, Smith Bros. products, Buffer children’s aspirin, Ben Gay rub, Brioschi antacid, Eno antacid, Medic Men remedy, Musterole, Pinex cough remedy, Sleep Caps, and Tums.

Soaps-Detergents * In the soaps and detergents category, the top ten found by BAR were:
Fels Naphta products, 97 messages in eight markets (heaviest in New York, Detroit and Pittsburgh).
Vim tablet detergent, 77 messages in 10 markets (heaviest in Los Angeles and New York).
Dynamo liquid detergent, 60 messages in five markets (heaviest in Philadelphia and New York).

Alka-Seltzer, Excedrin, 139 messages in 10 markets (heaviest in New York, Pittsburgh and San Francisco).

Four-Way products, 127 messages in 10 markets (heaviest in Los Angeles, Chicago and Detroit).

Other advertisers in this category during the week, with from one to 121 commercials apiece, were, (in order) Dristan, Congestaid, Romilar CF cough syrup, Thorexin, Duractin, Sucrets, Super Anistat, Coldene, Isodettes, Rem cough medicine, Pertussin, Bromo Quinine, Actin, Isodine, Sleep-eze, Sinex, Doans Pills, BC Remedy, Pepito Bismol, Rollaids, Narbain cough tablets, Nervine remedy, Liquiicap cough cures, Primatene remedy, Aspergum, Dri Con cold remedy, Bayer products, Heet liniment, Smith Bros. products, Buffer children’s aspirin, Ben Gay rub, Brioschi antacid, Eno antacid, Medic Men remedy, Musterole, Pinex cough remedy, Sleep Caps, and Tums.

Soaps-Detergents * In the soaps and detergents category, the top ten found by BAR were:
Fels Naphta products, 97 messages in eight markets (heaviest in New York, Detroit and Pittsburgh).
Vim tablet detergent, 77 messages in 10 markets (heaviest in Los Angeles and New York).
Dynamo liquid detergent, 60 messages in five markets (heaviest in Philadelphia and New York).

Alka-Seltzer, Excedrin, 139 messages in 10 markets (heaviest in New York, Pittsburgh and San Francisco).

Four-Way products, 127 messages in 10 markets (heaviest in Los Angeles, Chicago and Detroit).

Other advertisers in this category during the week, with from one to 121 commercials apiece, were, (in order) Dristan, Congestaid, Romilar CF cough syrup, Thorexin, Duractin, Sucrets, Super Anistat, Coldene, Isodettes, Rem cough medicine, Pertussin, Bromo Quinine, Actin, Isodine, Sleep-eze, Sinex, Doans Pills, BC Remedy, Pepito Bismol, Rollaids, Narbain cough tablets, Nervine remedy, Liquiicap cough cures, Primatene remedy, Aspergum, Dri Con cold remedy, Bayer products, Heet liniment, Smith Bros. products, Buffer children’s aspirin, Ben Gay rub, Brioschi antacid, Eno antacid, Medic Men remedy, Musterole, Pinex cough remedy, Sleep Caps, and Tums.

Soaps-Detergents * In the soaps and detergents category, the top ten found by BAR were:
Fels Naphta products, 97 messages in eight markets (heaviest in New York, Detroit and Pittsburgh).
Vim tablet detergent, 77 messages in 10 markets (heaviest in Los Angeles and New York).
Dynamo liquid detergent, 60 messages in five markets (heaviest in Philadelphia and New York).

Alka-Seltzer, Excedrin, 139 messages in 10 markets (heaviest in New York, Pittsburgh and San Francisco).

Four-Way products, 127 messages in 10 markets (heaviest in Los Angeles, Chicago and Detroit).

Other advertisers in this category during the week, with from one to 121 commercials apiece, were, (in order) Dristan, Congestaid, Romilar CF cough syrup, Thorexin, Duractin, Sucrets, Super Anistat, Coldene, Isodettes, Rem cough medicine, Pertussin, Bromo Quinine, Actin, Isodine, Sleep-eze, Sinex, Doans Pills, BC Remedy, Pepito Bismol, Rollaids, Narbain cough tablets, Nervine remedy, Liquiicap cough cures, Primatene remedy, Aspergum, Dri Con cold remedy, Bayer products, Heet liniment, Smith Bros. products, Buffer children’s aspirin, Ben Gay rub, Brioschi antacid, Eno antacid, Medic Men remedy, Musterole, Pinex cough remedy, Sleep Caps, and Tums.

Soaps-Detergents * In the soaps and detergents category, the top ten found by BAR were:
Fels Naphta products, 97 messages in eight markets (heaviest in New York, Detroit and Pittsburgh).
Vim tablet detergent, 77 messages in 10 markets (heaviest in Los Angeles and New York).
Dynamo liquid detergent, 60 messages in five markets (heaviest in Philadelphia and New York).

* October 1962 figures revised as of January 22, 1963.

fulltime monitor list by the end of March, with additional markets then being added at the rate of about six a month until the 236 stations in the top 75 markets are on a continuous monitoring basis the first of 1964. Meanwhile BAR is also continuing its periodic monitoring of these markets.

The monitoring company’s projections of commercial time slots anticipated for 1963 were based on its 10-market findings. The average of 704 commercials per station in the week of Jan. 5-11 was applied to an estimated 500 commercial stations to get a weekly national estimate of 352,000, then projected to the 52-week total of 18,304,000.

BAR officials noted that during most of the year commercial traffic is heavier than in early January and said this fact should counterbalance any drop-off in the per-station average in smaller markets. Actually, they said, BAR’s experience indicates that on the average there is no wide discrepancy between the number of commercials carried by large and small stations, although the rates charged differ widely.

Ideal Toy, Kenner buy King Features series

Two toy manufacturers, Ideal Toy Corp., New York, and Kenner Products, Cincinnati, have bought participations in more than 70 markets on King Features Syndicates’ cartoon package of 150 5½-minute programs, starting this fall.

In announcing details of this transaction, a King Features spokesman said that Ideal, through Grey Adv., has purchased participations in more than 50 markets and Kenner has bought directly into more than 20 markets. The cartoons also have been bought by WPIX (TV) New York, KTAL (TV) Los Angeles, WTAE (TV) Pittsburgh, WEWS (TV) Cleveland, WTCN-TV Minneapolis and CKLW-TV Windsor Detroit.

The series consists of Beetle Bailey, Barney Google an’ Snuffy Smith, and Krazy Kat.

Norsworthy-Mercer is agency’s new name

Taylor-Norsworthy Inc., Dallas advertising agency, has changed its name to Norsworthy-Mercer Inc. The change, according to T. W. Norsworthy, president, reflects the increased responsibility of Melville M. Mercer, who has been named executive vice president.

Mr. Mercer was an advertising executive with a large food chain before entering the agency field in 1950. He joined Taylor-Norsworthy as account supervisor in 1954 and was made vice president in 1960.

Mr. Norsworthy was co-founder of the agency in 1946 with J. B. Taylor, who recently resigned to open a new Dallas advertising operation. Mr. Norsworthy is also president of the Southwestern Assn. of Advertising Agencies.

Norsworthy-Mercer serves some 30 national, regional and local accounts.

USS joins Armstrong to sponsor Kaye series

U. S. Steel Corp. reportedly has joined Armstrong Cork Co. on the new Danny Kaye Show on CBS-TV for the 1963-64 season.

The Kaye series will be in the

Wednesday, 10-11 p.m. EST period now filled by U. S. Steel-Armstrong’s drama hours. The two advertisers, both handled by BBDO, New York, are now in alternate week positions. They each will sponsor an alternate-week hour next season.

Armstrong signed for the series a little over a week ago (CLOSED CIRCUIT, Jan. 28). CBS-TV announced the signing of Danny Kaye to a contract for his first regular television series some three months earlier (BROADCASTING, Oct. 29, 1962).

AFA-AAW CONFERENCE

Advertising and government to be theme in Washington

Advertising and government will be the theme of the fifth annual Advertising Federation of America/Advertising Assn. of the West conference in Washington beginning tomorrow (Tuesday). Several advertising, broadcasting, and government leaders will address the two-day conference.

Approximately 700 media executives are expected for the sessions on “Advertising Speaks to Government—Government Speaks to Advertising.” Ivan A. Nestingen, under secretary of the Department of Health, Education & Welfare, will speak at the Wednesday luncheon. A morning panel presenting advertising’s message to government will feature Donald McGannon, president of Westinghouse Broadcasting Co.; Peter G. Peterson, president of Bell & Howell Co.; Paul S. Willis, president, Grocery Manufacturers of America; Andrew Heiskell, board chairman of Time Inc., and Palmer Hoyt, publisher of the Denver Post.

Speaking for the government Wednesday afternoon will be FCC Chairman Newton N. Minow; Federal Trade Commission Chairman Paul Rand Dixon, and Dr. Persia Campbell, member of the President’s Council of Economic Advisors and head of the economics department of Queens College, City U. of New York.

At the opening session Tuesday afternoon, Rep. Bob Wilson (R-Calif.) will tell advertisers “How to Be Effective in Dealing With Your Congressman.” Rep. Wilson is an inactive partner in the San Diego agency of Champ, Wilson & Scoum. John J. Ryan, AFA general counsel of Sawyer, Sullivan & Ryan, will forecast the fate of important media matters that are coming before the new 88th Congress.

All sessions of the conference will be held in the Statler-Hilton Hotel, Washington. It will close with a reception for members of Congress and the executive branch of government.

Al Pettus is our “go-team” specialist

He knows football inside out. He should. He's one of our highly skilled remote crew which covered more than 50 AFL, NCAA, Southwest Conference, and high school games during the past three years alone. These men operate as precisioned as a pro offensive unit. Practically all of them, directors, cameramen, specialists, have worked as a team for more than 12 years. In constant demand for network "specials" and advertisers' commercials, they traveled nearly 15,000 miles last year in our quarter of a million dollar cruiser. It's equipped, by the way, with six Marconi's and two Ampex VTR units. This type of equipment requires seasoned performers, and the men of our remote crew are just that. They are typical of WFAA-TV's high degree of professionalism, another reason why we deliver such a steadfast, selective audience.

Radio '63: bigger, more influential medium

BLAIR RADIO REPORT STRESSES LOCAL SALES POTENTIAL

A new brochure portraying today's radio as "a bigger, more influential and successful sales medium than ever" was issued last week by Blair Radio and will be distributed personally by Blair representatives to advertising and agency executives across the U. S.

Titled "Radio '63," it stresses the local sales potential of the 52 radio stations represented by Blair Radio and of the Blair Group Plan in particular. The Blair Group Plan, initiated five years ago, is a one-order, one-bill plan by which advertisers may tailor their use of Blair-represented stations according to their individual needs.

The brochure treats the 52 Blair-represented stations as the equivalent of a network, and offers a check-list comparing their "influence" (based on average listening) with that of each of the four national radio networks. It shows the Blair stations as covering 75.4% of the U. S. population with 79.2% of the total consumer disposable income.

Success Stories - The presentation also divides the 52 stations into 38 "concentration" or big-city stations and 14 "extension" or far-reaching multi-market stations, and shows the managers and significant details for each station in each group. Leading success stories among Blair Group Plan users also are pointed up.

Arthur H. McCoy, president of Blair Radio, reported in presenting the brochure to trade newsmen that the success of the Blair Group Plan this year already has been "so phenomenal that I can't even quote the figures for you."

He ventured that Blair Radio handles as much volume in time sales - disregarding talent payments and line charges - as all four national networks combined (four-network total for 1961, latest year, for which FCC figures are available, was $35.8 million).

Ward Dorrell, research vice president of the parent John Blair & Co., reported that Blair Radio and its stations are currently conducting a national radio measurement which will be the biggest of its kind, based on 2,000 personal interviews and showing "the kind of people that listen to radio." Results of this study may not be available to about two months, Mr. Dorrell said.

In discussing "Radio '63," Mr. Dorrell also reported that Blair-represented stations spend $283,633 a year for audience research alone. For these stations, he said, Pulse Inc. makes more than 995,000 personal interviews a year.

Airlines plan joint advertising program

A committee of top airline executives has been formed to evaluate a proposed industry advertising campaign to expand air travel.

Stuart G. Tipton, president of the Air Transport Assn. of America, announced last week that the group will serve in an advisory capacity to the ATA board of directors. The plan for a jointly financed advertising program was outlined to the ATA board last December.

Decision on an advertising agency pends a report by the special committee to the board. Appointed last week to the committee: G. Marion Sadler, vice president and general manager, American Airlines; Rex Brack, senior vice president, Braniff International Airways; Harding L. Lawrence, executive vice president, Continental Air Lines; Thomas M. Miller, vice president, traffic and sales, Delta Air Lines; Frank Sharpe, executive vice president, sales and services, Eastern Air Lines; Casey M. Britt, vice president, sales and service, Frontier Airlines; Thomas B. McFadden, vice president, marketing, Trans World Airlines; and Robert E. Johnson, senior vice president, sales and advertising, United Air Lines. Jack M. Slichter, ATA vice president - traffic, will serve as secretary. ATA headquarters is at 1000 Connecticut Ave., Washington 6, D. C.

Business briefly...

Lincoln-Mercury, through Kenyon & Eckhardt, has set a major spot radio campaign to start Feb. 7 and to run four weeks to March 6 in the 70 top Mercury car sales areas. Campaign calls for 500 spots to be placed in the largest sales markets, and up to 200 spots in the smaller Mercury markets.

Roma Wine Co., New York, has begun a spot TV campaign in eight markets including New York, Baltimore, Miami, ...
What happened when Davidson met Goliath?

Even come what did, a lot of WSOC-TV viewers went to bed warm and satisfied.

It happened this way:

Tiny Davidson (N.C.) College, a thousand students thereabouts, and a love of nearby Charlotte, had knocked off nationally ranked big Duke U. Next on schedule, giant No. 1 Cincinnati in Ohio. And the faithful dreamed.

Alas, the vision did not come true. Davidson lost. But the fans won, for in a special telecast direct from the Bearcat fieldhouse, WSOC-TV had brought the game to thousands of Carolina supporters.

Good public service programing in every area of public interest is a forte of Charlotte's WSOC-TV. Wins fans for the station—and its advertisers, too.
Public utility media spending up 10% in '61

Public utility companies increased their advertising expenditures in 1961 about 10% in four media (tv, radio, newspapers and outdoor), according to a survey conducted by the Public Utilities Advertising Assn.

The study shows that television expenditures increased more than those of other media, but not enough to change the "media mix" of 59.7% of public utility budgets in newspaper advertising: 22.5% in television; 10.5% in radio and 7.3% in outdoor advertising.

Of the 156 gas and electric companies reported, 100% used newspapers, 96% were on radio, 77% purchased television time and 73% used outdoor advertising.

Gas companies increased their advertising 14.3%, electric companies increased 5.2% and combination gas and electric firms were up 12.2.

Average annual per meter expenditures for the four media were up 2 cents from 64 cents to 66 cents.

To announce the March introduction of its special offer of a 64-page American Space Digest free with the $1 purchase of a Schick injector razor and its magazine of Krona Edge injector blades, Schick Safety Razor Co., through Compton Adv., Los Angeles, will use tv spots, in 37 top markets, featuring actual flight footage of the X-15 and an interview with Scott Crossfield, X-15 pilot. The spots will also be used on the company's ABC-TV shows, Combat and Stoney Burke, and radio spots, adapted from the tv spots, will run in top markets.

The California Credit Union League has started a $45,000, 3-week radio-newspaper campaign to tell Californians the advantages of credit union membership. KGBS Los Angeles, KGO San Francisco, KCBE Fresno, KPMC Bakersfield, KFMB San Diego and KFBK Sacramento, are broadcasting the credit union jingle twice a day.

Agency appointments...

- Louisiana State Rice Milling Co., Abbeville, La. (Mahatma and Water Maid brand rice products), has appointed Tracy-Locke Co., Dallas.
- E. E. Mucke & Sons Inc., Hartford, Conn. (Circle M meat products), has appointed R. W. Bacon Co., Bloomfield, Conn. Radio and tv announcements schedules are being prepared.
- The Flavour Candy Co., Chicago, has appointed M. M. Fisher Assoc., that city. First assignment will be campaign to introduce Fan-Tastix, a new candy product.
- Bekins Van & Storage Co. has appointed Doyle Dane Bernbach. DDB will take over the national mover's account beginning July 1.
- O'Keefe & Merritt has named Anderson-McConnell Adv., Los Angeles, as advertising agency for the company's line of ranges, dishwashers and other kitchen appliances. Merv Oaker is account supervisor. Company has been without an agency since breaking with Cunningham & Walsh in June 1961.

National Cotton Council buys network tv schedule

The National Cotton Council, Memphis, Tenn., will begin its first television campaign in March. The drive, which is budgeted at an estimated $800,000, will include participations on daytime CBS-TV and nighttime ABC-TV and NBC-TV from March through June. Another network flight begins in August. In addition, the council bought a tv spot schedule in 31 markets, mainly in the Southwest, to back up its network advertising.

According to a spokesman at Fuller & Smith & Ross Inc., New York, the council's agency, the tv campaign's purpose is to show viewers the values of cotton fabric as opposed to the properties of synthetic fibers.

Rep appointments...

- KICU-TV Fresno, Calif.: Avery-Knodel Inc., New York, as exclusive national representative, effective immediately.
- WJON St. Cloud, Minn.: The Deveny Organization Inc., New York, as national representative.
- WJET Erie, Pa.; Ohio Stations Representatives Inc., Cleveland, as Ohio representative.

Aniforms process used by Best Foods

A new continuous-movement animation process developed by Aniforms Inc. and employed by Videotape Productions of New York (Broadcasting, Nov. 19) is being used commercially for the first time by Best Foods, New York, in a series of taped commercials for H-O Cereals.

The commercials will run every week through March on The Story Of . . . (Thursdays, 7-7:30 p.m.), a Best Foods program on WNBC-TV New York. They first appeared on Jan. 24. A spot campaign in New York will also feature the commercials.

The Aniforms process employs dummy forms which are articulated and tape recorded or filmed while in motion, giving the appearance of animation. Videotape's exclusive arrangement with Aniforms is for use of the process on tape.

Production time for the commercials was trimmed by at least six weeks by use of the process, according to Warren Bryan, production supervisor, Sullivan, Stauffer, Colwell & Bayles, New York, agency for Best Foods.

"In standard film-cell animation the time lapse from approved storyboards to air-date would have been from eight to ten weeks," he said.

Dick Uhl, creative supervisor and vice president, SSC&B, conceived the campaign concept, which is a humorous dialogue between "Mr. H. O.," chairman of the board and a fellow executive.

Eli Bauer, chief Aniform designer, created the characters in collaboration with Julian Dowell, agency art director. Goeffrey Kelly was agency producer.

NAAN plans Memphis meeting

The eastern regional and midwest regional conferences of the National Advertising Agency Network will be consolidated in one meeting at Memphis, Feb. 8-9.

The host agency will be Merrill Kremer Inc., Memphis, and conference chairman will be William B. Houck of Houck & Co., Roanoke, Va. The agenda will emphasize creativity, new business and market research. Individual sessions will be held by principals and staff members of 14 NAAN agencies. A directors meeting will precede the conference on Feb. 7.

Liking tv not enough, Omaha learns

FCC MUST DECIDE WHAT PROGRAMS ARE BEST, HENRY IMPLIES AT HEARING

Folks out in Omaha may love their local television programs, but the stations still may not stack up to what the federal men at the FCC back in Washington figure is good enough.

What's more, Omahans may be typical of neighbors in towns all up and down the road. They just don't know about stations' "affirmative duty" to put on local live shows, so they're satisfied with getting just what they've asked for.

This sums up the regulatory philosophy which the FCC's freshman member, Commissioner E. William Henry, explained to newsmen last week during the agency's probe of local live television in Omaha. Commissioner Henry presided at the five-day proceeding which heard more than 130 public witnesses and continues there this week to hear more evidence offered by the three local tv stations involved, KETV (TV), KMTV (TV) and WOW-TV.

On The Record  * Commissioner Henry's comments about FCC's role also included some expressed on the record to assure several concerned citizens, including Nebraska's governor, that the commission may not by law and does not wish of itself to dictate concerning local programs. Combined they constituted an insight into FCC thinking seldom before expressed so candidly on a subject that has been controversial for years (see separate story on page 21).

Unlike the commission's tv probe in Chicago last year where dissident voices of certain groups rang out a bit louder and more frequently, the Omaha inquiry last week was marked by only a sprinkling of complaint, part of which was directed not at the stations but at the government for intruding there.

The great weight of the public testimony displayed considerable pride in the home town television efforts. And the parade of witnesses—many of whom represented organizations solicited in advance by the FCC through invitations mailed to a list based on Omaha's telephone directory—indicated no reluctance to express it.

Among other highlights of the hearing:

  * The testimony of many witnesses showed that from their experience or knowledge all three Omaha tv stations not only have been generous in granting requests for support or coverage of local activities but the stations also have sought out opportunities to do special shows or render aid.

  * Spokesmen for some community groups said they could have had or were offered more television opportunities than they could take advantage of because of staff or financial limitations. Others noted that if anyone with a valid tv message didn't get time it must have been his own fault for not asking. Several testified that without the tv support their fund drives never could have been successful.

  * Educational and religious leaders generally spoke highly of the three stations' efforts in their fields, particularly commending pioneering education series in connection with such institutions as Creighton U. and the universities of Omaha and Nebraska FCC's interrogation showed some of these were completely school "packaged" however.

  * Educator-cleric criticisms, including some self-directed analyses, ranged hopes for better planning, timing and experimentation and better shows for children, educational-television spokesmen lauded the financial and technical help given them by all three stations for non-commercial KUON-TV Lincoln, which plans expansion.

  * Citizens especially praised the objectivity and scope of local news programming by all three stations, a few citing its beneficial impact on the city's only daily newspaper, the Omaha World-Herald, whose parent firm also owns KETV. Agricultural program service got its mention too.

  * Payson Hall, president of Meredith Broadcasting Co. on Thursday afternoon became the leadoff station executive to testify in the proceeding. He explained the broad corporate policies of the Meredith radio-tv and publishing complex, of which WOW-TV is part and to questions put by FCC counsel said local Meredith station managers are not given "profit quotas" which they must meet.

Other WOW-TV officials were to testify last Friday and executives of KETV and KMTV, in that order, are slated to testify at further hearing in Omaha this week.

  * The FCC Thursday introduced de-
etailed analysis of October 1962 logs for all three stations, plus other statistical data. FCC figures for total local live as percents of total hours on air: WOW-TV, 11.6%; KMTV, 14.7%; KETV, 9.8%.

Total regularly scheduled local live (excluding special programs, adjusted to weekly basis): sign-on to 6 p.m.: WOW-TV, 8.9%; KMTV, 14.5%; KETV, 15.5%. For 6 p.m. to midnight: WOW-TV, 16.7%; KMTV, 14.3%; KETV, 7.7%. News shows accounted for about half of day percentages, and a major portion of night percentages.

Financial data entered by the FCC showed the three tv stations in 1961 had combined revenues of $4.8 million, and profits before federal taxes totalling over $1.23 million. They spent nearly $3.6 million for expenses of which almost $1.6 million was for programming expenses (37.2% film expenses, 17% talent). Combined costs of news services (other than salaries) was $66,400.

Other developments concerning the FCC’s probe of Omaha television came out of Washington last week. Sen. Carl T. Curtis (R-Neb.) said if a study of the record shows him the proceeding was only a “three-ring circus staged to satisfy a lot of power-hungry Washington do-gooders,” he may propose a Senate investigation of the FCC. Sen. Thruston B. Morton (R-Ky.) discussed the Omaha probe in connection with the confirmation hearing on FCC-appointee Kenneth A. Cox (story page 38).

Surprise Witness * Nebraska’s Governor Frank B. Morrison, a Democrat now serving his second term, appeared as a surprise witness Monday. He warned that citizens of his state would oppose any attempts by Washington to dictate what local programs they could see. The previous week the Nebraska

state legislature unanimously adopted a resolution charging that the Omaha hearing was an unwarranted intrusion by the federal government into the freedom of broadcasting and the affairs of a sovereign state (Broadcasting, Jan. 28).

Praising the programming initiative of the three Omaha tv stations, Governor Morrison said it appeared that “this hearing is aimed at determining whether or not in the opinion of the commission there is sufficient time given to local talent. My problem has been to keep off these local television stations rather than get on them.” He said he believes that no one who had “something worthwhile to say or any talent for which there was any public demand” would be denied access to the air in Omaha, nor could he recall ever hearing any person or organization complain they were denied access.

“There no doubt may be some crackpots that exaggerate the demand for

their talent,” the governor said, “but I would say from my experience that would be without foundation because I haven’t heard of any criticism.”

Governor Morrison continued: “I would hate to see the FCC inaugurate or open the door to anything that would be construed as federal censorship. We in Nebraska would resist that very strongly because it would indicate that somebody in Washington or elsewhere knew more about what was good for us than we knew ourselves.”

Paternalistic Interference * He felt such a course would impugn “our own judgment to regulate programs within our own borders and to improve our own tastes and accept the responsibility for listening to the kind of entertainment or programs that we want to listen to without paternalistic interference in them.”

The harm that could come from this approach “would far exceed any possible benefit from it,” he said.

“I have listened to radio and heard television in several parts of the world and I know of nowhere that the broadcasting industry has done a better job of accepting their responsibility for community betterment than they have here in the city of Omaha,” Governor Morrison said. Affirming his confidence in the local stations, he concluded, “I don’t think that supervision from the outside is necessary. It would be a step that we would think would be very harmful in laying the foundation for regulation of the type of programs that we should listen to.”

Commissioner Henry explained that the FCC is prevented by law from censoring programs. He assured the governor that “we loath to get into that area and I know I speak for the entire commission when I say we have no intention to do so.” However, the FCC is required by the law “to exercise some

LIking TV NOT ENOUGH, OMAHA LEARNS continued

Overall control over the stations' program service.

Local Expression • Commissioner Henry indicated he understood that the wording of the 1934 law, more particularly "enunciated in '46 (FCC's Blue Book) "is that the stations in each community must not only be a transmission facility, they must be a source of local expression."

For this reason, he explained, "our sole interest here is to find out from the people whether they are satisfied—or that is, as outlets for local expression of all kinds—and if the people of Omaha are satisfied with it, we will be very happy to find that out.

We in no way seek to impose our own opinions on the people of Omaha."

The governor did not stand alone Monday in his concern about the hearing. Omaha Mayor James J. Dworak and Donald R. Ross, Republican National Committeeman for Nebraska, both spiced their praises for the three local tv outlets with interjections of protest over the proceeding. Another outspoken witness was Helen Moeller, president of the Omaha Advertising Club and part owner-vice president, Allen & Reynolds Adv.

"I can see no reason whatsoever for a hearing of this type," Mayor Dworak said. He detailed the cooperation of the tv stations in explaining the issues in special elections and in supporting vital civic projects. The stations cover the news "in a fair and objective manner," he said, a tribute he declined to give to the city's only daily newspaper.

The competition of television news has had a salutary effect on the paper however, the mayor said, forcing it to carry rather than omit "any important issue."

Mr. Ross felt that one good thing about the hearing was that it made "the people realize what a good thing we have" in the outstanding services of the local tv stations. The Republican committeeman, however, thought that the commission "is inquiring into a subject you have no moral right to inquire." He termed the proceeding "extremely wasteful" of time, effort and the taxpayers' money.

Minow's FCC Wasteland • "The wasteland which your Mr. Minow (FCC Chairman Newton Minow) talks about is the free-spending policies of his own department," Mr. Ross charged. He noted there has been "a lot more cooperation" from the tv stations than political candidates themselves to debate on the air.

Miss Moeller testified that "there was a rather overwhelming amount of indignation" on the part of the members of the advertising club "at what was felt to be federal interference in, implied censorship of and an attempt to exert influence on Omaha tv programming—especially since the hearing is not based on any pending applications, complaints, petitions or suggestions of violations." She said the members felt this way even though they understood the FCC is "empowered to do this job."

Miss Moeller explained that her fellow members "feel quite strongly that Omaha residents do not require FCC help to determine whether what they see on tv is what they need." She said they seem to agree with the three dissenting commissioners "who saw no need or excuse for an Omaha hearing."

How well are Omaha's tv stations serving local public service needs? "Very well," Miss Moeller asserted.

City Council Views • The thoroughness with which the tv stations regularly cover the weekly meetings of the Oma-
LIKING TV NOT ENOUGH, OMAHA LEARNS continued

R. Bader, local WAC recruiting chief, cited the "highest cooperation" of KMTV, while Army Capt. Harold L. Shellabarger and Marine Capt. J. M. Dean praised all three stations for help in recruiting coverage.

Omaha Fire Chief Martin J. Dineen felt the public image of a fireman has improved since television expanded the mass media available there. Other city officials volunteering commendation to local tv for specific support of their respective fields included Douglas County Election Commissioner Jerry Hassett, Acting Postmaster John P. Munnelly, Juvenile Court Judge Seward L. Hart, Douglas County Treasurer Sam J. Howell and Internal Revenue Service District Director Richard P. Vinal.

Mr. Hassett said tv helped register 30,000 new voters last year, a local record for an off-year election when registrations usually fall.

Karl Joens, Omaha Power District, recounted many years of successful sponsorship by his firm of local public service-type special programs and documentaries in prime time on the three local tv stations as well as regular news, weather and sports. Charles W. O'Rourke, Union Stock Yards Co., noting that Omaha is the world's largest livestock market, praised the farm and livestock coverage on local tv.

John A. Johnson, Bellevue Area Chamber of Commerce, said local tv shows helped put his suburban Omaha community on the map.

Doctors Speak • Dr. Thomas J. Gurnett, Omaha-Douglas County Medical Society, reported that the outstanding cooperation of all three stations in last year's Sabin oral vaccine inoculation project set a national record, inoculating 85% of the population on several Sundays designated for the series of shots.

Representing Meredith's WOW-TV at the Omaha hearings were (I to r) counsel Jerry Thornton, vice president and general manager Frank Fogarty, attorney Andrew Haley and Meredith president Payson Hall.

Praise for extensive tv support came on Tuesday from other medical organization representatives too. These included James Canady, Omaha Area Hospital Council; R. D. Ferguson, Leukemia Society; Mrs. Mary Elaine Hall, Meyer Children's Therapy Center; Congdon E. Paulson, National Foundation; Dorothy S. Beal, Omaha Hearing School, and George H. Thompson, Nebraska State School for the Deaf.

During testimony Tuesday by Prof. Jack McBride, U. of Nebraska, concerning the extensive financial, technical and program assistance to educators by the three commercial tv stations of Omaha, Commissioner Henry disclosed deep concern over the amount of tv viewing by children. Mr. Henry cited the responsibility of parents to supervise their children's tv, but he felt this of schools, said he is on local tv for more time than he is able to spend viewing it. If more effective use of the medium is not made, he said, "it is our fault and not theirs" because of insufficient funds and staff facilities. Pointing out that the knowledge explosion is far outstripping the population explosion, Dr. Miller pointed to special needs for both child and adult education which tv could help meet.

Tuesday was farm spokesmen day too and they spoke out generously in behalf of local tv farm programming, some making particular mention of WOW-AM-TV's pioneering in this field as well as KMTV and KETV. The list included H. L. Tilney, Farmers National Co., a farm management company; Barney Kamp, Nebraska Farm Bureau Federation; Elton Berck, Farmers' Educational and Cooperative State Union of Nebraska; R. E. Cunningham, Omaha Livestock Exchange; Robert W. Kochler, Nebraska-Iowa Non-Stock Cooperative Milk Assn.-Iowa Non-Stock farmer Robert Goos who after praising WOW-TV's farm shows pointed out a favorite on KMTV "that's in color too."

Dr. E. L. MacQuiddy, Greater Omaha Historical Society, praised local tv documentaries of great historical interest in recent years while Alfred G. Ellick, Omaha Bar Assn., said the stations would do even more shows in his interest field if his group were prepared to supply the proper materials.

Asked how many of the more than 130 public witness scheduled to appear were there last week as a result of the FCC's pre-hearing invitations, Commissioner Henry said he could not tell. "We wrote a great many organizations" he said, because the commission did not know individuals. The list used came from the Omaha telephone book, he said.

Will the FCC hold other similar hearings? Commissioner Henry felt anything is possible; did wish that it would be decided immediately since it was too early for him to predict his own recommendations. "I, as a new commissioner," he said, "of course relied to some extent on Commissioner (Robert E.) Lee's feelings about the Chicago inquiry and my own discussions with the staff who worked there."

Commissioner Henry certainly will consider the views of responsible witnesses like Governor Morrison in making his decision about future hearings but as of that moment he said he "still is of the opinion that they are proper or certainly within discretion."

Follows Pattern • In the pattern of the first two days, Wednesday saw another thirty witnesses, many from civic and charitable organizations with commendations for local tv cooperation.

For the first time, however, there were
Why WMAR-TV bought Seven Arts' "Films of the 50's"

Says Jack Jett:
Vice President and Director of Television WMAR-TV Baltimore, Md.

"WMAR-TV was the first commercial station in Maryland and the 2nd station in the entire nation to join the CBS Television Network. Since its inception WMAR-TV has been a community leader in public service, television 'firsts'—and audience.

WMAR-TV has always been the leader in this market with its feature film programming, that's why we bought Seven Arts' 'Films of the 50's'... to continue our dominance in feature film programming. Before we purchase films we analyze them very carefully paying special attention to three important prerequisites of top quality features:

1—We look for star value in the films.
2—Their impact on the public at the time of its original presentation. This includes the critics' reviews, and the attention given the films.
3—The length of the film... this is generally a tip off as to whether it's a class A picture or not.

Seven Arts' 'Films of the 50's' met our requirements on all points, insuring a loyal, happy audience and contented sponsors.

Our success with feature films, incorporating all the Seven Arts' releases thus far, may be attested to by our 'Big Movie Of The Week' on Saturday nights starting at 11 P.M. This is a showcase for first-run features. Our latest audience report, ARB November-December, shows a 61% Metro Share on Saturdays from 11:45 P.M. to midnight... an audience of 113,100 homes for WMAR-TV at this late hour!"

"TO CONTINUE OUR DOMINANCE IN FEATURE FILM PROGRAMMING"

For list of TV stations programming Seven Arts' "Films of the 50's" see Third Cover SRDS (Spot TV Rates and Data) Individual feature prices upon request.
LIKING TV NOT ENOUGH, OMAHA LEARNS continued

a few strong dissenters among them.

Donald Conway, national executive secretary of AFTRA, New York, charged that "the amount of local live programming here is insignificant." He said a study of all three stations' schedule for the week of Oct. 21, 1962, by his local membership found an average of only 11% local live in the period sign-on to 6 p.m., and of this almost one-half was news. In the after-6 p.m. period he said they found only an "unbroken string" of network, syndicated and "old" movie shows other than news.

KMTV counsel observed that the week of Oct. 21 was during the Cuban crisis.

Mr. Conway said AFTRA represents talent at WOW-TV. Commissioner Henry noted that based on the testimony so far it was his impression there isn't too much talent around Omaha and the stations seem to have used it in the best way that they could.

However, Mr. Henry said it is his conviction "talent is there if you look for it."

AFM Complains * Lad V. Tesar, AFM local 70, complained that local talent has to go to Lincoln to get on the air because there is so little local opportunity except for the Eddy Haddad Show on KETV. WOW-TV's Breakfast with Tommy uses one musician, he said. "A hearing of this type is needed," he felt.

Rena Murtagh, music teacher and performer, charged that television programs do not conductive to the refinement of tastes." There is enormous" talent reservoir untapped in Omaha, she said, and asked where else but locally could young artists gain experience.

This view was challenged by another witness, Kendrick Wilson, director of the Omaha Playhouse, who presented a detailed analysis from his experience of the many practical obstacles which preclude anything but negligible use of amateur performers.

Lawrence W. M. McVoy, National Assn. for the Advancement of Colored People, charged "station management has not done enough" for his race, although support for NAACP activities was appreciated.

Harlow Brown, KMTV employe and head of NABET Local 45, described the extensive technical facilities of his station and showed how they are put to use for local programming, including color. He said NABET also represents KETV while WOW-TV is IBEW, but he was not familiar with their facilities.

Thomas S. Nurnberger, volunteer head of the 1962 fund drive for United Community Services, said it would have been impossible for the Red Feather drive to have reached its $4.1 million goal, double the amount normally sought, had it not been for the support of the stations and the help of their staffs.

The Red Cross and other groups appearing Wednesday echoed Mr. Nurnberger's views.

Bob Danze, Omaha Central Labor Union AFL-CIO, commended all three stations for objective news reporting even during strikes. He also appreciated the fact that commercials on television stimulate business and thereby "create jobs."

Thursday Session * Another two-dozen witnesses Thursday morning followed the established pattern of testimony generally highly complimentary to the local outlets. State Senator George Syas said the stations generally show what the public wants and personally he would rather have programs that are not the best from government-regulated programming.

Adam Reinemund, retired midwestern advertising and station representative who still handles a few advertising accounts, said that from his experience and based on the amount of local programming activities in Omaha, it is evident that "nowhere" are stations "more alive" to the needs of the community. He considered the hearing, "costly to the taxpayers, is not necessary to establish" local needs.

John Tate, midwest employees counsel, took up his entire allotment of time chastising federal bureaucracy, the New Frontier and FCC Chairman Newton Minow for attempting to substantiate its opinions as to what the public should have for the traditional public right of free choice in a free market place.

"What qualifies you men to determine for me what we should see?" he challenged the FCC.

Mr. Tate noted that Congress created the "FCC monster" through the 1934 law but that like other law of that era now overruled, Congress could also destroy it. "Perhaps it should," he concluded, "before the monster destroys its creator."

On Thursday afternoon, S. Payson Hall, president of Meredith Broadcasting Co. and vice president-treasurer of Meredith WOW Inc., the WOW-TV licensee, was the beginning witness for the station portion of the FCC inquiry. He described the corporate complex of parent Meredith Publishing Co., which is diversified in publishing and other communications — WOW-AM-FM as well as KCWO-AM-FM-TV Kansas City, KPLO-AM-TV Phoenix and WHEN-AM-TV Syracuse.

Mr. Hall said the principal responsibility of day-to-day operation rests with each Meredith station general manager although the Meredith central office provides broad policy, guidance, services and facilities to all of its stations. For example, he said, a company-wide policy to editorialize on the air was set after study during regular management conferences last year, but each station manager is vested with responsibility to carry it out in choosing subjects, point of view, program times and other details.

An outline of the extensive experience and achievements of the company's station executives also was presented by Mr. Hall. He said it is Meredith policy that all of its people take active roles in the civic and charitable work of their communities.

Probe given extensive radio-tv coverage

The FCC's Omaha TV probe received extensive broadcast coverage by the three tv outlets and area radio stations. The TV stations pooled technical facilities for both live and tape pickups in the hearing room. NAB joined them in sharing costs for a working newspaper at the Sheraton-Fontenelle Hotel.

WOW-TV aired considerable portions of the daily video tape of the inquiry plus spot news coverage. KMTV (TV) aired nightly hunks of re-cap, plus some live. KETV (TV) treated the probe as straight news. KTVH (TV) Wichita-Hutchinson assigned a newsmen and aired portions. WOW-TV and KMTV reported heavy listener calls Monday night complaining about presumption of normal fare or inquiring about the probe. Calls dwindled as the week continued.

The spectator portion of the hearing room usually was crowded but virtually all were witnesses waiting to testify. A sprinkling of broadcasters including Television Information Office's Carl Burkland and NBC's Tom Knode observed.

The city's only newspaper, Omaha World-Herald, carried front-page stories daily, but no banner headlines as daily press did in Chicago. The evening paper, Wednesday, editorialized: "The current inquiry into Omaha television gives rise to grave misgivings about the growing authority exercised, even if gently, by Big Brother in Washington."

4 February 1963
A leading advocate of the FCC’s controversial hearings on local tv programming in Omaha found that subject the only real conflict during a Senate committee proceeding last week on his own qualifications to be an FCC commissioner.

Kenneth A. Cox, chief of the Broadcast Bureau, which laid the groundwork for the Omaha hearing (see page 30), ran into stern criticism for the FCC’s action from two Republican members of the Senate Commerce Committee, which questioned Mr. Cox Thursday (Jan. 31).

Mr. Cox, who served intermittently as special counsel on the committee’s Communications Subcommittee before joining the FCC in 1961, defended the Omaha proceeding, but said he will have to study the hearing record before attempting an evaluation.

The 46-year-old lawyer was led over less sensitive ground in questioning by other committee members, including Sen. Warren G. Magnuson (D-Wash.), chairman of the committee, who has sponsored Mr. Cox since the latter’s early work as special counsel.

Replaces Craven  Mr. Cox was nominated to complete the unexpired term (ending June 30) of Commissioner T.A.M. Craven, who reached the retirement age of 70 on the day of Mr. Cox’s hearing. Mr. Cox also was nominated for a full seven-year term to begin July 1. Commissioner Craven will continue to serve until Mr. Cox is confirmed by the Senate.

The nominee was introduced to the committee by a fellow Washingtonian, Sen. Henry M. Jackson (D-Wash.), who said he thinks Mr. Cox will serve the commission “fairly, justly and impartially.” The nominee also won warm support from Chairman Magnuson, who said he would have presented the nominee in Sen. Jackson’s place were he not presiding.

Although each committee member endorsed Mr. Cox after the questioning, no vote of approval was possible because a filibuster on rules has put a damper on all Senate business.

Omaha on the Carpet  Sen. Norris Cotton (R-N.H.), ranking GOP committee member, started to lead questioning around to Omaha when he asked the nominee for his views on the FCC’s duties and authority in the programming area. “I think the FCC has no authority in, nor has it ever sought to control programming,” Mr. Cox replied. In the case of Omaha, it was certainly not the agency’s purpose to dictate to tv stations there what they should broadcast, he said. The FCC wants to know what the stations have done in local programming, and what the community thinks about the service, Mr. Cox said.

Asked by Sen. Cotton if he believes the agency should try to censor programs in any way, the nominee said the most the agency can do is to advise the industry of criticisms from the public about programs or advertising but leave the “ultimate decision” to the stations.

‘Better Method’  Sen. Thursto B. Morton (R-Ky.) told Mr. Cox he agrees with the contentions of NAB President LeRoy Collins and Sen. Roman L. Hruska (R-Neb.) that the hearings impose hardship on the Omaha stations (Broadcasting, Jan. 28). “It seems to me some better method [than the hearings] can be devised,” the senator said.

The proceedings have been “rather upsetting” to the stations, whose licenses were renewed without challenge last August 1962, said Sen. Morton. The agency’s actions in Omaha have created suspicion in the community, he added.

“I hope the FCC will think long and hard before continuing this practice,” admonished the senator. The FCC should not endanger public confidence in stations nor should it “scare” stations into great expense to defend themselves against unknown charges, he said.

Mr. Cox answered that the agency has tried to make it clear that the FCC is not “challenging” the Omaha stations. To ease their preparations for the proceedings the FCC had met with the stations’ attorneys in Washington, Mr. Cox said.

Sen. Strom Thurmond (D-S.C.) said he had a few questions but thought they ought to be asked in executive (closed) session. He would not explain the nature of his planned inquiry.

An FCC Building?  Chairman Magnuson raised the subject of obtaining a new building for the agency, and Mr. Cox agreed the FCC needs new housing. Sen. Magnuson said he thinks the FCC is “Exhibit A” when Congress considers inadequate housing of government agencies. Mr. Cox’s vivid description of the FCC’s cramped, over-heated quarters in the Post Office Department Building compelled the senator to remark, “You keep testifying like this and we’ll transfer you to the slum clearance section.”

The nominee, well aware that Sen. Magnuson is also chairman of the appropriations subcommittee that handles the FCC’s budget requests, said, “I hope we can do better here.”

When Sen. Magnuson asked Mr. Cox

What makes the listener turn the dial to your FM station? Superior programming and superior quality rendition. Programming at such levels virtually demands highest fidelity transmission. To achieve such standards, the unquestioned choice of knowledgeable FM stations is RCA's unmatched Direct FM Transmitter. RCA had "Direct FM" in its first FM transmitter, built in 1941—and in all the FM transmitters built since then (over 500).

With their time-proven Direct FM exciter, RCA FM transmitters supply the widest frequency response, with minimum distortion. Such a system is simpler, requires fewer tubes, and needs less adjusting. Consequently, RCA FM transmitters have the finest sound, and are easily tuned and maintained. Such performance is the happy result of RCA's long background of pioneering and achievement in the world of radio.
THE FIDELITY OF DIRECT FM

RCA designs and builds its complete line of FM transmitters to accommodate stereophonic signals and an SCA multiplex sub-channel. For complete technical details on any of RCA's Direct FM transmitters, see your RCA Broadcast Representative. Or write: RCA Broadcast and Television Equipment, Dept. S-22, Building 15-5, Camden, N. J.

For STEREO the Easy Way...
With an RCA FM transmitter (any post-war model) all you need to do is add the relatively simple RCA BTS-1A Stereo Generator. No need to buy a new exciter—the RCA BTE-10B Exciter, incorporated in all RCA FM transmitters since 1957, provides for SCA, too. (Those with earlier type exciters need change to 10B only if they want SCA.)
about the FCC’s role in the regulation of a communications satellite corporation (whose incorporators were nominated by President Kennedy last week [see page 54], the nominee said he thinks the space communications program merits the FCC’s “highest possible priority.”

Sen. Ralph W. Yarborough (D-Tex.), chairman of a watchdog subcommittee on political broadcasting, won Mr. Cox’s promise that the FCC will give increased attention to enforcing Sec. 315 of the Communications Act.

**Maker, agency deny Geritol ads false**

The FTC complaint charged that contrary to tv and newspaper advertisements, Geritol does not correct tiredness, loss of strength, run-down feeling, nervousness or irritability.

During the 13 years Geritol has been on the market, the company averred, it “has made a substantial contribution to the cause of good nutrition in the United States.” The company further claimed that “in all the years in which Geritol has been available to the public, the company has received no complaint or report from a consumer, a doctor, or any other person which lends support to the proposed medical warning statement which the commission would require in its advertising.”

This was a reference to the FTC charge that in many instances anemia is caused by disorders or diseases requiring medical treatment and that the use of Geritol might cause a person to forego seeing a physician.

Other FTC actions in the geriatric field:

- An FTC hearing examiner recommended that a 1958 FTC complaint against Drug Research Corp. and its advertising agency, Farrell, Chesley & Clifford, both New York, be dismissed.
- Drug Research was charged with making false claims for its weight reducing preparation, Regimen Tablets. Dismissal of the complaint was opposed by the respondents, according to the FTC. The FTC counsel moved to dismiss the complaint on the ground that the company is on trial in New York State and that boxes of Regimen Tablets were seized under the federal Food, Drug and Cosmetic Act.
- The commission ordered Hadacol Inc., Chicago, to discontinue alleged false claims that “New Super Hadacol” will ease nervousness and exhaustion. The FTC adopted a decision filed last November by a hearing examiner (Broadcasting, Dec. 3, 1962).

**Philco: FCC lacks power to veto plan**

Philco Broadcasting told the FCC last week it lacked the authority to disapprove the plan under which Philco would pull out of the ch. 3 Philadelphia fight and be reimbursed its expenses by NBC, the present occupant of that channel (Broadcasting, Jan. 7, et seq.).

Philco said the Communications Act provides authority for such review only in cases where two or more permits for construction are pending. In the Philadelphia contest, only Philco is seeking a construction permit; NBC has a license it wants renewed.

But Philco added that if the commission interprets the Act as giving it authority, it should approve the agreement to withdraw, as being in the public in-

**Craven gleans multiple honors on retirement**

Last week was farewell week for retiring FCC Commissioner T. A. M. Craven who will become the commission’s consultant on space communications activities.

Commissioner Craven was toasted by commission engineers Tuesday (Jan. 29) at a luncheon in his honor. Here he was presented a globe, for use in his space work, and a scroll signed by all commission engineers. The engineers tried guessing by ear the frequency that sound from an oscillator nearby. The prize was of a liquid nature.

On Thursday, Commissioner Craven was again honored, by his fellow commissioners and the agency’s staff. Well-wishers presented him an overnight executive case. The other six commissioners honored him with a plaque signed by all.

Commissioner Craven will continue at his old post until Commissioner-designate Kenneth Cox is confirmed by the Senate (see story page 38) and is sworn in.

Pictured above is the head table at the luncheon, l to r are: Frank Kratokvil, assistant chief of field engineering bureau; Lew North, chief engineering assistant; Ralph Renton, Assoc. chief engineer; Commissioner Craven; Fred Heister, engineering assistant; Curtis Plummer, executive director of FCC; James Barr, chief of Safety & Special Bureau; M. H. Woodward, chief of International & Common Carrier Services.
LIONEL NEWMAN has produced themes, incidental music and scores for such popular TV series as "Hong Kong," "Bus Stop," "Adventures in Paradise," and "Margie," to name a few. As a musical director with 20th Century-Fox, he has a long list of enviable screen credits, and has been nominated for the Academy Award four times. He's been affiliated with BMI since 1951.

A new dodge in town—and the FCC's after it

The FCC warned all stations last week to avoid entering agreements to set combination advertising rates. The commission said such activities are illegal and clearly violate commission policy.

The arrangements concerning the commission, one official explained, are usually engineered by an advertising salesman who organizes several stations in a town into a "network." He then offers combination rates to an advertiser for spot time on all the "network" stations.

The commission notice didn't indicate how many stations are involved in such arrangements. But one source said at least 12 stations—all am—are known to have participated in them.

The problem is a fairly new one for the commission. It reached the commission level several months ago through the Renewal and Transfer Division which had received complaints about stations entering into combination agreements.

One official said stations participating in them apparently don't realize they are violating the law. He said there's nothing "covert" about the arrangements. Much of the commission information about them comes from promotion brochures.

Interest, and the proposed payment of $523,000.

The company made its comments in reply to a Broadcast Bureau recommendation that the withdrawal be approved but the payment denied (AT DEADLINE, Jan. 21). The bureau, questioning Philco's good faith in filing its application, said there was "a serious question" as to whether the application was merely a device to improve the bargaining position of the parent Philco Corp. in its court fight with NBC's parent, RCA, over patent rights.

Court Settlement • A settlement, under which RCA paid Philco $9 million, ended that court fight at the same time agreement was reached on Philco's withdrawal from the ch. 3 contest (BROADCASTING, Jan. 7).

In contending the Communications Act doesn't apply to the NBC-Philco case, in which one applicant is seeking renewal, the other a construction permit, Philco presented an analysis of Sec. 311 (c). This is the section cited the Broadcast Bureau as the basis for the commission's jurisdiction.

Philco noted the section, added in 1960 to outlaw "pay-offs," speaks of situations in which "there are pending before the commission two or more applications for a permit for construction..."

"Technical words and phrases," Philco said, "are assumed to have been used by a legislative body in a technical sense. Terms of art in a statute are to be taken in their technical meaning which is presumed to have been understood by those responsible for the passage of the law."

Turning to the bureau's main argument against approving reimbursement, Philco said there is no evidence to support a contention of bad faith. It notes that Bureau files there is no evidence for concluding that there was "a lack of bona fides," only a doubt.

The company said the agreements settling the various court suits have already been executed and cannot be affected by the fate of the ch. 3 issue. Attached to its filing are affidavits by Joseph H. Gillies, president of Philco Broadcasting, and David B. Smith, vice president, stating that the application was filed only because Philco wanted to operate a Philadelphia tv station, not because of the litigation between Philco and RCA.

Riding on the FCC decision is NBC's hope of early renewal and its transfer of its Philadelphia properties—WRCV-AM-TV for RKO General's Boston stations, WNAC-AM-TV and WRKO (FM). NBC is required to dispose of its Philadelphia stations by a 1959 Justice Dept. consent decree.

Rep. Bennett proposes administrative court

An administrative court proposed by a Florida congressman resembles in some ways the communications court suggested in a monograph prepared for the consideration of the Federal Communications Bar Assn. (BROADCASTING, Jan. 29).

In H.R. 43, Rep. Charles E. Bennett (D-Fla.) would provide a United States Administrative Court to be composed of nine justices appointed by the President for 11-year terms. With powers equivalent to a U. S. district court, the administrative tribunal would appoint hearing commissioners and "establish such divisions or panels as it may deem appropriate for the conduct of its proceedings."

A communications court patterned after the tax court would assume the adjudicatory functions now exercised by the FCC, according to the bar association's proposal.

Rep. Bennett's court would consider matters of all agencies, unlike the specialized court proposed by the bar association.

Station owner complains about wire-service terms

Complaints of a radio broadcaster that five-year contracts required by suppliers of radio news wire services are too long have been reported turned over to the FCC and the Department of Justice.

Paul Compton, president of South Jersey Broadcasting Co., Camden, N. J., claimed such contracts are arbitrary and non-cancellable. His company, licensee of WKDN-AM-FM Camden and WARN-AM-FM Ft. Pierce, Fla., cannot foretell economic conditions over such an extended period of time, he contended. Two-year contracts would be fairer, he added.

Mr. Compton argued that network affiliation contracts were for two-year periods, and FCC licenses for only three years.

The New Jersey broadcaster filed complaints with two federal agencies and commerce committees of Congress. Both committees referred the matter to the FCC for study.

The FCC last week...

• By its Review Board granted John A. Egle a construction permit for a new am station on 1600 kc (1 kw) in Golden Meadow, La. At the same time, the board denied a joint request by Mr. Egle and competing applicant KLFT Radio Inc. for reimbursement of expenses incurred by the later in processing its application (BROADCASTING, Dec. 24, 1963).

• Granted, by Chief Hearing Examiner James D. Cunningham, a petition by the Broadcast Bureau to hold a field hearing on the application of Geoffrey A. Lapping for a new am station in Blythe, Calif. Mr. Cunningham last November denied a request by Mr. Lapping for the field hearing (BROADCASTING, Dec. 3) but stated that matters set forth in the bureau's petition and disclosures at the pre-hearing conference now warrant a field hearing.

• Hearing Examiner James D. Cunningham was designated, by himself, as chief hearing examiner, to preside at the commission's investigatory proceeding concerning the alleged misrepresentations made by the McLendon Corp. concerning its intended programming for WYNR Chicago (BROADCASTING, Jan. 28). Hearing will be held in Chicago beginning March 5.
This...is a jury?

It is indeed! Every day WFGA-TV is on trial before it. The jury is fair. It is open-minded. It knows what it wants. It seldom listens to alibis from those who fail to deliver. Decisions are quick: it simply turns to another channel.

Because WFGA-TV is constantly on trial, we work unceasingly towards determining the public's wants and needs. We try to provide the best entertainment and the most satisfactory community service during the year. From what we've learned, the jury likes it.
WHAT GOALS FOR THE FCC IN '63?

Renewal procedures; radio overpopulation, network regulation are just a few of the increasing issues facing the commission

The FCC is moving toward important changes in its license renewal procedures aimed at reducing the possibility of interference by its staff in local programming and, hopefully, opening up better communications between licensees and the commission. A key proposal calls for the “clarification” and, for the first time, publication of the criteria used to determine whether licensees merit automatic renewal.

The commission is also expected to take steps to curb the proliferation of am stations but at the same time allow some daytime-only stations to broadcast before sunrise. A continuation of the FCC’s effort to secure regulatory authority over the nation’s networks (though not to the extent recommended by the network study staff) and catv systems (though not with much hope of success) is also forecast.

These and other conclusions emerge from comments by the FCC members in discussing the problems of the commission for the year ahead. “We’re not coming up with panaceas,” Chairman Newton N. Minow noted. “These problems don’t lend themselves to easy solutions.”

The proposed adoption of the NAB commercial codes as an FCC rule, the freeze on fm grants, final implementation of the decision to duplicate 13 of the 25 clear channel stations (and the possibility of higher power for one or more of the remaining clear channel stations), station filing fees, the continuing question of what to do about the equal-time section of the Communications Act—these issues, too, confront the commission.

Letterwriting Campaign - But cutting across all of these issues is the fundamental one of how far the commission can go in regulating broadcasting without interfering in stations’ programming. The revelation of the scope and nature of the staff letters to renewal applicants—with their implication of program dictation—came as a shock to some commissioners (Broadcasting, Dec. 3, 1962). Even Chairman Minow, who maintains the staff acted within the authority delegated by the commission, feels changes in procedure are required.

These are being made. Procedures are being drafted by which the commission membership would be brought into any renewal case in which an applicant’s first letter of explanation fails to satisfy the staff that he has met the requirements of the 1960 statement on programming policy and that he wants renewal (Closed Circuit, Jan. 14). Essentially, that policy requires broadcasters to make a continuing survey of the licensees.” Commissioner E. William Henry said the aim of the proposed revisions is to “permit better understanding between the commission and the licensee so that the commission can act more quickly.”

What Criteria? - Just what kind of criteria will eventually emerge, however, is uncertain. The staff now uses percentages of various types of programming as “a rule of thumb” in determining whether licensees should be automatically renewed. Some commissioners, notably Commissioner Ford, oppose this approach. But since this question is closely tied in with the program reporting form, it is assumed no final decision will be made until the commission completes its long-awaited revision of that document.

Commissioner Ford, who heads a committee of three commissioners working on the form, hopes to have it completed “in a couple of weeks.” But the form has been so drastically revised since it was put out for com-
casters as to whether they are giving enough time to certain types of program.ing.” He said “there is a difference between the FCC substituting its judgment for that of the broadcasters and finding out whether the broadcast-er has collected the data on which to make a judgment.”

Commissioner Rosel H. Hyde is also concerned about this issue—and in a speech before the Utah Broadcasters Assn. in Ogden last October, he lashed out at broadcasters for not being more concerned themselves. He accused broadcasters of acquiescing in the com-mission’s action in passing judgment on their over-all program performance “while at the same time disavowing any interest in particulars.” He called on the industry to oppose what he consid-ered the government’s growing power over programming (BROADCASTING, Oct. 15, 1962).

But if the commissioners can’t yet agree on the final shape the program form is to take, most seem to be of one mind with regard to the am pop-ulation growth. They feel it should be slowed down. But they also agreed unanimously with the NAB view, ex-pressed at the commission’s am over-population hearing (BROADCASTING, Jan. 14), that the government shouldn’t ex-tend economic protection to existing stations. Most favor a “tightening up” of engineering rules. Some advocate tougher financial qualifications.

Minow Dissent = Dissenting from this last view is Chairman Minow. He cited the case of two young men, Gary Gielow and James Gabbert, who estab-lished an fm station in San Francisco with $11,000 in 1957 and made a suc-cess of it (BROADCASTING, Jan. 14).

“How could enterprise like that be ac-commodated within tightened financial rules?” he asked. But he feels the com-mission should be careful about the financial qualifications of prospective buyers in the case of station transfers.

How long will the current am freeze last? Most commissioners think it will be lifted within six months. Chairman Minow said a proposed rulemaking could be ready in a month.

Although the commission seems headed toward tighter engineering rules for new am stations, the agency ap-pears ready to relax these rules to per-mit daytime-only stations to go on the air an hour or so sooner on dark win-ter mornings. The question of whether daytimers in single-station markets should be permitted to broadcast be-fore sunrise is the subject of a pro-posed rulemaking on which comments are due March 15. But most commis-sioners have already predicted that “something” will be done for the day-timers.

Chairman Minow expressed sympa-thy for daytimers, saying they have had “a shoving around.” Some com-missioners admitted their sympathy was inspired largely by pressure from Capitol Hill, where the House last year made its wishes known by passing a bill to permit pre-sunrise operation by day-timers (BROADCASTING, July 9, 1962).

The Senate, however, didn’t act on the measure.

Network Regulation = The commis-sion is sure to send Congress another request for regulatory power over the networks. But although the proposal will be drafted in light of the report submitted by the commission’s network study staff (BROADCASTING, Dec. 3), it’s doubtful that many of the staff recom-mendations will be incorporated. Cer-tainly the staff’s most controversial pro-posa—that all broadcasters be required to join a government-supervised trade association—doesn’t command anything like majority commission support. Commissioner Robert T. Bartley is the only member who has spoken kindly of the report, at least in public (BROAD-CASTING, Dec. 17).

Commissioner Robert E. Lee’s pro-posal that the commission adopt the NAB radio and tv commercial codes as part of its rules, however, is very likely to be issued as a proposed rule-making. This plan was voted down by the commission, 4-3, two months ago (CLOSED CIRCUIT, Nov. 26, 1962). But this result could be reversed after Mr. Cox, who is believed to endorse the idea, replaces Commissioner Craven, who opposed it. This doesn’t mean the rule will eventually be adopted, how-ever. Although he has pushed hard for the proposal, Commissioner Lee now says he’s “not sure” he would vote for it. He said recently he wants to see the industry’s comments first. Commissioner Henry, who also voted for the rulemaking proposal, said the same thing.

The commission will also make an-other plea to Congress for authority to regulate catv systems. The commis-sioners feel they need this power, con-sidering the potential threat catv poses to television stations. But they realize the chances of congressional action are slim, in view of the adamant stand against such legislation by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee (BROADCASTING, June 25, 1962).

Fm freeze = The freeze on fm grants, imposed last month when the commis-sion proposed its nationwide table of allocations for the 80 U. S. fm commer-cial channels (BROADCASTING, Dec. 24, 1962), will probably last well into the summer. In the meantime, the commis-sion will give a great deal of attention to the protests of those who have asked the commission to return to its protected contour concept of station assignments. Several commissioners indicated some compromise is likely between the two proposals.

Still hanging over broadcasters’ heads, and all others doing business with the commission, is a proposal to charge fees for applications. The commission was swamped with protests when it put this idea out for comments last spring (BROADCASTING, May 21, 1962), but
Kennedy, advisory group meet in White House

President Kennedy conferred with the U. S. Advisory Commission on Information at the White House, following a meeting of the group in Washington (AT DEADLINE, Jan. 28). Shown here (l to r): Louis T. Olom, staff director of the commission; Sigurd Larmon, Young & Rubicam; J. Leonard Reinsch, executive director of the Cox stations and chairman of the commission; the President; Clark Mollenhoff, Washington correspondent for the Cowles newspapers; Morris S. Novik, New York; John L. Steigenthaler, Nashville Tennessean; Edward R. Murrow, U. S. Information Agency.

Chairman Minow, prime mover behind the proposal, still thinks it's sound. Other commissioners, even some who voted for the rulemaking, doubt that the proposal will be adopted, at least for the foreseeable future. They say there are too many practical problems involved in arriving at a "reasonable" fee for each applicant.

Waiting on Congress - The next move in the clear-channel case, all commissioners agree, is up to Congress. After the commission voted to duplicate 13 of the 25 clear channels, the House adopted a resolution last July asking the commission to delay action for a year and also to authorize power higher than the present 50 kw limit. This second proposal runs counter to a 1938 Senate resolution asking the commission to limit radio stations' power to 50 kw.

The commissioners say if Congress takes no further action by July, they will proceed to assign second fulltime stations to the 13 channels. But several commissioners, including Chairman Minow and Commissioners Ford and Lee, said they would be willing to take a fresh look at the question of lifting the 50 kw limit on power. They said the commission would move very cautiously, however, to make sure granting of higher power wouldn't have an adverse economic impact on other stations.

The equal-time section of the Communications Act, Sec. 315, remains as much of a headache for the commission, which must administer it, as for Congress, which is constantly besieged with requests from broadcasters to liberalize it if not repeal it. But it will do Congress no good to ask the commission's advice. The commission will probably support as a minimum, suspension of the law in 1964, as in 1960, to exempt candidates for president and vice president. But beyond that, only Commissioner Ford has a solution—to repeal the section and give the FCC responsibility for assuring broadcasters fair play under a fairness doctrine (BROADCASTING, Nov. 12, 1962). The other commissioners agree Sec. 315 is difficult to live with. But they say any substantial change would probably make it worse.

The FCC, however, will ask Congress to resolve the conflict between the Sec. 315 provision prohibiting censorship of candidates and another section of the Communications Act prohibiting rebroadcast of material without the originating station's permission. This conflict resulted in a complaint on which the commission divided 2-2 during last

It's what camera says, not how, FTC told

Does a tv advertiser have the responsibility to make sure no subterfuge is used in his commercials even though the product will perform exactly as shown?

This was the question argued last week before the Federal Trade Commission in the Libby-Owens-Ford and General Motors safety plate glass commercials in 1957-58. GM counsel William Symonds argued that the method by which the film is made is irrelevant so long as there is no misrepresentation of the product.

Joseph Smith, for L-O-F, said there was no fraud on the public in commercials shot through an open window and represented as having been taken through an L-O-F safety plate glass window because the view is exactly the same.

An initial decision by FTC Examiner Harry R. Hinckes found the respondents guilty of trickery and false demonstrations (BROADCASTING, Aug. 6, 1962). The examiner ruled that L-O-F commercials had misrepresented the alleged distortion of a competitor's safety sheet glass and had represented to the public that pictures taken through an open automobile window had been shot through L-O-F safety plate glass. A GM commercial, the examiner found, had filmed sheet glass through Vaseline to cause distortion.

FTC counsel Edward F. Downs and Anthony Kennedy Jr. told the Trade Commission that GM and "L-O-F should be held jointly responsible for the alleged false representations. The examiner ruled that the advertising campaigns were separate. Mr. Kennedy charged that GM gave advance approval to the L-O-F commercials promoting safety plate glass.

Mr. Downs said the commercials were an unfair method of competition and that the consumer has a right "to see what he thinks he sees." Both L-O-F and GM claimed that they didn't know, until the FTC filed a complaint, that camera tricks had been used in filming the commercials. "L-O-F not for one minute approved of that shenanigan," Mr. Smith said. "These films were shown by L-O-F in the best of good faith."
Moss subcommittee
given broader range

A powerful new House subcommittee has been given new tools for a broad investigation of government information policies—including a deep, detailed examination of the "news management" revealed by the Cuban crisis.

Rep. John E. Moss (D-Calif.), who has headed the highly-active but limited-in-power Special Subcommittee on Government Information for eight years, was named chairman Thursday (Jan. 31) of the Subcommittee on Foreign Operations and Government Information of the Government Operations Committee.

Already squarely on the record in favor of pushing back unnecessary and unwise curbs on access to information—not on the Congress alone but on the general public as well—Rep. Moss also has expressed great concern about administration policies which seek to manage news (BROADCASTING, Jan. 14).

His new subcommittee is the result of a major overhaul of the Government Operations Committee organization by Chairman William L. Dawson (D-Ill.), who has supported Rep. Moss throughout the latter's special subcommittee's activities in the informational field. The chairman augmented the old freedom of information unit with a subcommittee on foreign operations.

Overseas Looksees, Too* Rep. Moss' new subcommittee will have authority to investigate overseas for the first time.

Although subcommittee plans have not been formally announced, the chairman is known to be especially interested in getting into problems of news management by the government. It is likely panels of newsmen will be formed to describe information problems met during the Cuban crisis.

Another area into which the subcommittee can be expected to probe is lobbying activities of government information arms, as well as their general efficiency and economics.

WRITER'S CRAMP AT FCC?
Along with letter that almost wasn't sent, WKY-TV gets license renewal, despite defiance on programs

WKY-TV Oklahoma City, which had refused to bend to FCC staff pressure to revise its programming policy, received a three-year renewal of its license last week.

The commission's action, on a 6-0 vote, was announced along with the release of a copy of a letter to the station which stressed the importance the commission attaches to the station's efforts to determine community needs and to its broadcasts of 21 local live programs in prime time.

But the letter—coming after the commission's staff had raised serious questions about WKY-TV's proposed programming—was regarded by some observers as a "face-saving" device. At least two commissioners voted against sending it, it was learned.

The letter said the renewal was being granted "on the basis of information submitted in the amendments to your application." Actually, the station didn't amend its application. The commission apparently was referring to a detailed explanation of how the station had determined community needs.

WKY-TV had been one of dozens of stations across the country whose programming proposals had been questioned by the commission's Broadcast Bureau during its review of their applications for renewal (Broadcasting, Dec. 3). The letter-writing campaign was seen by some as an effort to induce stations to carry local live talk shows.

Received Two Letters • WKY-TV, whose license expired last June, received two letters inquiring into its lack of proposed local live programming in prime time and asking whether the schedule had the "flexibility" to meet the needs of minority groups.

But the station refused to amend its application to eliminate the questions raised by the Broadcast Bureau. To the first letter, the station replied with a description of its effort to determine community needs. It also asserted it had a policy of preempting regularly scheduled programs for local live shows in prime time when such preemptions were warranted. This policy resulted in 21 local live programs in prime time in 1961.

To the second letter, the station said that although it doesn't consider its judgment infallible, its "program schedule is the result of its considered opinion based upon its knowledge of the area and its evaluation of the various factors which must be considered in any determination of what program best serves the public interest."

The bureau, it was understood, had a third letter of inquiry ready to send to the station. But the commission, at a meeting two weeks ago, told the bureau to cancel it and prepare another one announcing the station's license would be renewed. The commission has been disturbed by the extent of the staff's letter writing campaign, and is taking steps to curb it (see story page 48).

Survey Cited • In its letter to the station, the commission said that in granting renewal, it "considered carefully the fact that you conducted a comprehensive survey of community organizations in November 1960, and that based thereon the application of your pre-emption policy in 1961 resulted in your carrying 21 local live programs during prime time."

The commission noted this was a "substantial increase in such local live programming in these hours" in comparison with 1959, when six such programs were carried, and 1960, when there was only one program of that type. "We have assumed," the commission said, "that the results of your 1961 pre-emption policy, which were based on a community survey, are a better measure of your plans for the ensuing period, and have renewed your license in reliance of such an understanding."

The commission also cited its decision in the KORD Pasco, Wash., case, in which it said that programming "proposals made are not "binding" to the last decimal point" and that "a programming format in a particular community is not a fixed, immutable concept. The commission set its "promising vs. performance" policy in the KORD decision (Broadcasting, July 17, 1961)."

There was considerable speculation—some of it contradictory—as to what effect the WKY-TV decision would have on future renewal cases. Some commission officials said no dramatic changes should be expected until the commission finally decides what it will include in its revised program reporting form.

But there was considerable agreement that the decision was, at least, a "clarification" of the authority the commission has delegated to the staff. From now on, according to one official, the commission will probably not "insist" on regularly scheduled local live shows. "If a station has a policy of preemptions for local live shows, and implements it effectively, this will probably be acceptable," he said.

Daytimers oppose FCC proposal

CONTEND IT WILL DO MORE HARM THAN GOOD

"Six to six or fight," the motto of the Daytime Broadcasters Assn., was reinforced by the group's board of directors in Washington last week. The board decided to (1) oppose the FCC's current pre-sunrise ruling and (2) open an office in Washington to continue the crusade for daytime stations.

In its current rulemaking, the FCC has proposed to permit daytimers operating on Class III regional channels to operate pre-sunrise only in communities not served by a local full-time station. Such pre-sunrise operation would be limited to non-directional antennas and 500 watts. All operation by daytimers after sunset would be prohibited under the proposal. Comments are due March 15.

DBA maintained that the proposed rules are even more restrictive than present provisions, under which many daytime stations are permitted to operate pre-sunrise. The FCC plan will not help those communities served only by daytime stations operating on clear channels, DBA said.

In a January bulletin to member stations, DBA said that a study in Illinois showed that 24 communities in that state would benefit with pre-sunrise service from the FCC proposal while 37 cities with daytime only stations would not. Of the 37 Illinois cities, 28 do not have a fulltime station. "This places the local public interest in an engineering strait jacket," DBA said.

The association urged its membership to "fully acquaint" the members of Congress with the daytime problem and to push for legislation during the present session. "It takes grass roots support to get action in Washington, D. C."

A DBA stressed.

A Washington office will be opened by the daytime broadcasters at 1001 Connecticut Ave., N.W., the DBA board announced. Staffing plans will be announced later. A membership meeting of the association will be held in Chicago during the March 31-April 3 NAB convention. Board members present for the DBA meeting in Washington last week included Ray Livesay, WLBT Mattoon, Ill., chairman; Richard Adams, WKOX Framingham, Mass., president; Ike Cohen, WCAP Lowell, Mass.; R. W. Olson, KWOA Worthington, Minn., and Thomas Rogers, WCLT Newark, Ohio.
BUT... With WKZO Radio, Ride
The Crest in Kalamazoo
and Greater Western Michigan!

WKZO Radio is the station with the biggest splash in Greater Western Michigan: NCS '61 credits WKZO Radio with more circulation than any radio rival—with 40.4% more than all other Kalamazoo stations combined.

And it's high tide at all hours, too: the 6-county Pulse of Sept., '62 shows WKZO Radio outrating all competitors in 358 of 360 quarter-hours surveyed—dominating all hours surveyed in both total listening and adult listening.

And rising fast! Sales Management has predicted that Kalamazoo will outgrow all other U.S. cities in personal income and retail sales between 1960 and 1965.

Let your Avery-Knodel man give you the complete log!

*A wave 112 feet from trough to crest was computed from U.S.S. Ramapo in 1933.
WLOV (FM) has its license revoked

The death penalty was dealt to WLOV (FM) Cranston, R. I., by the FCC last week on grounds the station made misrepresentations to the commission, committed numerous technical violations and had been financially irresponsible.

WLOV was warned in November 1961 that it was liable to have its license revoked. But the station waived the right to a hearing (Broadcasting, March 19, 1962). WLOV, in an explanatory letter to the commission, admitted some of the transgressions, claimed some of the technical violations had been corrected and said that revocation was too severe a punishment "in view of failings due primarily to human frailties rather than a pernicious design to reap huge profits by making deceptive representations."

The commission, however, decided that WLOV had a record of "total disregard" for its rules and that it could not depend upon the word of the station.

FCC gets court support in interference order

A federal appeals court in Washington last week upheld the FCC's right to deny an applicant whose proposed operation would receive more than 10% interference.

In an opinion by the court as a whole, the U. S. Court of Appeals rejected an appeal by WBRD Bradenton, Fla., a daytimer, to overrule the FCC's denial of the station's application for nighttime operation. WBRD operates with 1 kw on 1420 kc.

In denying the WBRD application for nighttime service the FCC found that 50% of the people in the proposed service area would receive interference from other stations. The court agreed that this was a judgment within the "expertise" of the commission.

Initial decision favors Miller in Kennett case

FCC hearing examiner Basil P. Cooper issued an initial decision last week favoring a grant of a new AM station on 1440 kc with 1 kw daytime in Kennett, Mo., to William L. Miller.

In April 1962 the commission ordered a hearing held on Mr. Miller's application following a petition by KBOA Kennett that charged him with "willful misrepresentations" to the commission (Broadcasting, April 16, 1962). Mr. Miller and Luther Pillow had applied to the commission for permission to sell KHSJ Hemet, Calif., because Mr. Miller wished to devote his full time to real estate interests. Mr. Miller, KBOA claimed, applied for the Kennett frequency on May 23, 1960, one day after the sale of KHSJ.

Examiner Cooper, for several years a member of the transfer and assignment section of the FCC, said he was not aware that the commission had ever asked if a licensee planned to re-enter broadcasting after selling a station.

There is no logical reason for anyone to conceal from the commission that they might re-enter the broadcasting field, Mr. Cooper concluded.

Comsat incorporators submitted to Senate

President Kennedy last week submitted the names of 12 incorporators for the Communications Satellite Corp. to the Senate, where they were referred to the Senate Commerce Committee. No date has been set for a hearing.

The incorporators nominated by the President are the same as those named under a recess appointment last October (Broadcasting, Oct. 15, 8, 1962), except for Philip L. Graham, president of the Washington Post Co. (Post-Newsweek stations), chairman of the board of incorporators, who resigned last week. Sam Harris, New York attorney and director in two mining companies, who was vice chairman of the board, succeeded Mr. Graham. Mr. Graham told the President in his letter of resignation that he had promised to serve until the corporation was established. He also indicated reasons of health for resigning.

Besides Mr. Harris, the roster of incorporators includes:

Edgar F. Kaiser, Kaiser Industries (with broadcast interests in Hawaii and California); Leonard H. Marks, partner in Washington communication law firm of Cohn & Marks; George L. Killion, president of American President Lines and chairman of Loew's Inc., former owner of WHN (then WMGM) New York; Bruce G. Sundlin, Washington attorney who is secretary and general counsel of The Outlet Co. (WJAR-AM-FM-TV Providence, R. I.) and David M. Kennedy, Chicago banker; Sidney J. Weinberg, New York investment banker; A. Byrne Litschi, Florida attorney; Beardsley Graham, Kentucky research company president; Leonard Woodcock, Detroit union official; George Feldman, New York attorney and businessman, and John T. Connor, New Jersey drug company official.

WHDH-TV contests order on ch. 5

WHDH-TV (ch. 5) Boston, renewing its efforts to retain the Boston channel, has charged that the commission's Dec. 19 order, making ch. 5 available until March 26 for comparative applications, is not in accord with the Communications Act.

WHDH-TV, owned by the Boston Herald-Traveler, received a four-month license to operate ch. 5 last fall (Broadcasting, Oct. 1, 1962). It originally received the ch. 5 grant in 1957 but a rehearing was ordered because of off the record contacts with commissioners.

The FCC's failure to act on WHDH-TV's renewal application—required when the four-month license was granted—is "illegal and invalid," since the law requires action on uncontested renewals within three months, the station said.

Opposition by Charles River Civic TV Inc. is not relevant because, the station said, Charles River is not actually an applicant.

WHDH-TV said Boston Broadcasting Co. is not an applicant because it has formed no corporation and Massachusetts Bay Telecasters Inc. because it is not legally qualified to be an applicant.

WLBW-TV completes testimony on ch. 10

L. B. Wilson Inc. completed its direct testimony last week in the comparative hearing being held to determine which of four applicants will operate on ch. 10 Miami.

L. B. Wilson, owner of WLBW-TV, which is now on the channel, has based its case largely on the qualifications of its management, the station's programming record and the plant investment it has already made.

But as the hearing ground into its second week, Charles H. Topmiller, president, and Mrs. Jeanette Heinz, vice president and treasurer, were cross examined at length on changes in the capital structure of L. B. Wilson. Opposing counsel indicated they thought the changes—which saw the outstanding stock reduced from 1,465 shares to 458—should have been reflected in the company's license application.

Sol Taishoff, president of Broadcasting Publications and owner, through Jolar Inc., of a minority interest in L. B. Wilson, testified Tuesday under subpoena by Civic Television Inc.

Civic's counsel, Quinn O'Connell, sought to determine Mr. Taishoff's relationship with L. B. Wilson in light of his background as a newpaper and the news sources he has established over the years, and whether he has an important voice in the station's management.

Mr. Taishoff, however, said he leaves all decisions to management. He also said he never offers any advice unless asked and added that his contacts with the management group are limited to about one or two a month.

Jolar Inc. owns 11.3% of L. B. Wil-

In view: new squeeze on public utility ads

Advertising by public utility companies for the purpose of "influencing public opinion with respect to public policy" is the target of proposed new rules by the Federal Power Commission. The new rules would require such companies to give a detailed accounting of non-operating expenditures of this type as justification for their deduction for tax purposes.

About one third of public utilities' budgets is devoted to radio or television. Comments are due next Tuesday (Feb. 12) on the proposal which would require utilities to make a detailed accounting for the following: "Expenditures for the purpose of influencing public opinion as to the election of public officers, referenda, proposed legislation, proposed ordinances, repeal of existing law or ordinances, approval or revocation of franchises, for the purpose of influencing decision of public officers, or having any direct relationship to public matters, including the influencing of public opinion with respect to public policy."

An earlier FPC decision, which the U. S. Supreme Court refused to review, held that power companies could not deduct the cost of advertising discussing the question of private vs. public power. The proposed new rules are based on this decision and would make the restriction apply to all types of public utilities under the power commission's jurisdiction.

Report on Red propaganda

The USIA has released Communist Propaganda Around The World, a compilation of data on communist activities. Subtitled "Apparatus and Activities—1961," the study covers Red bloc efforts for 1961, although the USIA notes that 90% of the general information may be considered currently valid.

Sections of the book are devoted to both radio and television activities of communist propagandists, and charts are included which compare broadcast growths of free-world and communist countries.

Top committee post goes to Grinstein

Gerald B. Grinstein, former counsel on the Senate Surface Transportation Subcommittee, was named chief counsel of the Senate Commerce Committee last week by Chairman Warren G. Magnuson (D-Wash.).

Mr. Grinstein is a resident of Seattle. He replaces Harold I. Baynton who had been acting chief counsel since the death of Frank Pellegrini in 1955. Mr. Baynton indicated he would stay with the committee.

Mr. Grinstein, 30, is a graduate of Yale U. and the Harvard U. Law School.

THE MEDIA

NEW UHFS AIM FOR NEGRO AUDIENCES

D.C.'s WOOK-TV starts Feb. 11; L.A.'s KIIX in March

Los Angeles and Washington, D.C., are about to get second uhf television stations. And both will aim their programming at the Negro audience.

WOOK-TV, ch. 14, Washington is scheduled to begin operations next Monday (Feb. 11) according to John Panagos, vice president of United Broadcasting Co. KIIX (TV), ch. 22, Los Angeles, expects to start sometime in March, according to H. Calvin Young Jr., president of Central Broadcasting of California Inc., which just acquired the station, formerly KBIC-TV from John Poole for $180,000 (BROADCASTING, Jan. 28).

(KMEX [TV], ch. 34, Los Angeles, specializes in Spanish-language programming, and WETA [TV], ch. 26, Washington, is an etv station.)

For its Feb. 11 opening, WOOK-TV plans a five-hour "musical extravanga" which will be produced by the station's music director, jazzman Lionel Hampton.

WOOK-TV plans to be on the air on weekdays from 5-11 p.m. and from 3-11 p.m. on Saturdays and Sundays. Live programs will include two daily half-hour news programs, a daily Teen Dance Party and a variety show, using local talent three times weekly.

Film programs, which will make up over half of WOOK-TV's schedule, include Oscar Brown Jazz Time, U.S.A. Mahalia Jackson's spiritual programs, Broadway Goes Latin, and a 90-minute weekly series One Night Stand.

KIIX will start with a daily schedule of "4 or 4:30 p.m. to 11 p.m. or midnight" according to Mr. Young. The station will program in two-hour segments "each conducted by its own personality, who will play records, introduce guest entertainers, interview news-worthy individuals and in general keep things moving rapidly, pretty much like a deejay on an independent radio station, or, to use a tv simile, like the Today program on NBC-TV." KIIX also plans a 30-minute children's program each afternoon and a half-hour of news in the early evening.

The KIIX studios and offices will be housed at 2330 W. Washington Blvd., in a Negro residential area. The building formerly housed an automobile showroom which is being converted into a main studio, which will be open to the observation of sidewalk passersby as well as to studio audiences.

WOOK-TV is owned by United Broadcasting Co., Richard Eaton, president. Other UBC stations are: WOOK-AM and WFN (FM) Washington; WSID-AM-FM Baltimore; WINX Rockville, Md.; WJMO and WCUY (FM) Cleveland; WANT Richmond, Va.; WMUR-TV Manchester, N.H.; WFBF South Miami, Fla.; and WBNX New York. United also holds a construction permit for WTLF (TV), ch. 18, Baltimore. (WOOK, WSID, WJMO and WANT specialize in Negro radio programming.)

Mr. Young has been engaged in Negro-programmed radio station operation for more than a decade. He is currently president of WENO Madison (Nashville), Tenn., and a stockholder in WGUS North S. C. (Augusta, Ga.) and WYAM Bessemer (Birmingham), Ala.

WOOK-TV will have 275 kw effective radiated power and KIIX will have 540 kw.

ASSN. VIPS MEET

8th meeting will review and study regulation of radio-tv

Government regulation of broadcasting will dominate discussions at the NAB's 8th annual Conference of State Association Presidents in Washington Feb. 26-27. A detailed review and analysis of regulatory issues and problems facing radio and television by NAB executives, including President LeRoy Collins, will open the conference.

Joseph W. Goodfellow, vice president-general manager of WRC-AM-FM-TV and president of the Maryland-D.C. Broadcasters Assn., will serve as conference chairman and also will preside

BROADCASTING, February 4, 1963
Ampex offers the widest selection of professional broadcast recorders today. Each providing superior performance. Each providing maximum reliability. There's the Ampex 351, standard of the broadcast industry. The Ampex 352 recorder for monophonic or stereophonic sound. The Ampex 354, recorder/reproducer designed for stereophonic sound. The Ampex 601, professional quality portable recorder/reproducer. The Ampex PR-10, suitcase-size recorder/reproducer with capabilities of a studio console. And the Ampex 3200 duplicator, master/slave combination for high quality tape duplicating at low cost. Most Ampex recorders have stereophonic versions. The 350 and PR-10 Series offer 4-track playback. All are dependable, flexible, easy to operate. And all carry the Ampex "Four Star" one-year warranty. Ampex also makes 600 series professional tape noted for long life and constant performance. For more details write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter St., Redwood City, California. Sales and service engineers throughout the world.
Sindlinger finds radio's popularity rising

Radio since 1960 has been growing in popularity. Statistics drawn from Sindlinger National Media Activity Reports and put in bar graph form (above) indicate the trend.

In the January-November period for each of the past three years, the move has been upward. Last year's period showed radio activity—measured in terms of total daily time spent by the public listening to radio—to be 6.1% ahead of 1961.

Radio also scores at a faster rate than other media in the report of total time spent by the public with the four major media. While radio went up 6.1%, tv dropped 5.2%, according to this analysis, and newspapers and magazines rose 1.7% and 2.5%, respectively.

The graphic analysis was released last week by Maurice Webster, CBS vice president and general manager of CBS Radio Spot Sales. He said the climb reflects "new trends in imaginative and informative programming" but warned that the popularity factor would appear to point up a need for more accurate measurement of radio's dimension.

At the opening session on "The Washington Outlook," participants, in addition to Gov. Collins, will include Vincent T. Wasilewski, NAB executive vice president, as moderator; Paul Comstock, vice president for government affairs, discussing the congressional scene; General Counsel Douglas Anello on the FCC, and Howard Bell, vice president for planning and development, will brief delegates on government news policies. Robert R. Williams, general manager of WHLM Bloomsburg, Pa., and president of the Pennsylvania Assn. of Broadcasters, will preside at the Feb. 26 afternoon session. It will feature reports on five outstanding projects of state associations and a roundtable discussion.

Glenn B. Sanberg, executive vice president of the American Society of Association Executives, and Charles M. Stone, manager of the NAB Radio Code, will speak at the Feb. 27 morning session. The second afternoon will be devoted to a conference for the executive secretaries of state broadcaster associations with Jack Williams, executive secretary of the Georgia Assn. of Broadcasters, presiding.

A major luncheon address, with the speaker not yet named, will be given the first day, according to Mr. Bell. A reception and buffet in honor of state presidents will be held that evening. No members of the FCC have been invited to appear on the program, although they will be issued invitations to attend.

New deal in Denver

Option held by Bill Daniels, Denver, to buy control of KTVR (TV that city from Elroy McCaw, present owner, has been allowed to lapse. Instead a new corporation, Channel 2 Corp., is being formed with Mr. McCaw as board chairman and Mr. Daniels as president. KTVR will open pay tv services later in year, probably May, using Macfadden-Bartell Teleglobe system in which subscriber pays to get sound via telephone line (Broadcasting, Jan. 28).

Wired community tv set for Austin, Tex.

A community tv system using wire lines to carry tv programs to subscribers is due to be inaugurated in Austin, Tex.

Last week the city council signed a non-exclusive contract with Capital Cable Co., one of four applicants seeking a franchise to serve Austin with catv.

Capital Cable Co. is a subsidiary of Midwest Video Inc., a group operator of catv systems with headquarters in Little Rock, Ark. Hamilton Moses, retired president of Arkansas Power & Light Co., is president of Midwest and also of Capital Cable. Mrs. Lyndon B. Johnson, wife of the Vice President, is principal stockholder in LBJ.

LBJ Co., licensee of Austin's only tv station, KTBC-TV, holds an option to acquire up to 50% of Capital Cable.

The contract with the city provides that Capital Cable will pay the city 2% of its annual gross receipts. It also agrees not to charge an installation fee for connecting a subscriber to the system, that the monthly service charge will be no higher than $4.95, and that the operating firm will pay the city $3 per year for each of the city-owned poles used to run lines throughout the area.

The other applicants were Vumore Inc. (RKO General), Micro Corp. of Dallas and Independent Cable of Austin. The last is composed of Glenn Flinn, catv owner in Tyler, Tex., and the Austin Daily Statesman.

56 to attend NAB's Public Service Institute

Registration has closed for the NAB's Public Service Institute with 56 representatives from 51 nonprofit organizations and the government planning to attend. The Feb. 7-8 seminar will be held in Washington's Mayflower Hotel in conjunction with American U.

During the two-day meeting, delegates will be guided on the best possible use of public-service time made available by commercial broadcasters. To help them on techniques and problems in using broadcasting, 12 industry experts will give advice during the conference. Classroom instruction on the American U. campus on such subjects as program preparation, studio equipment, news writing, creation of spot announcements and communications law will be given.

William Ruder, president of Ruder & Finn public relations firm, will address the delegates at a Feb. 7 banquet while NAB President LeRoy Collins will speak at luncheon the next day. Field trips to WRC-AM-FM-TV Washington and WAVA-AM-FM Arlington, Va. will be highlights of the seminar.
Compared to most of the things you have to buy these days, food prices are still low. They are up, of course, over what they used to be—but not nearly so much as most items in your budget.

A big part of the reason is more efficient farming. Farmers are producing more food with less work. They’ve replaced expensive manpower with cheap machine power—especially electric power, which costs less per kilowatt-hour today than 30 years ago.

Most of the electricity used on farms—two thirds of it—is produced by the investor-owned electric light and power companies. Most of this electricity goes to farms the companies serve directly. The rest is sold to rural electric cooperatives at wholesale rates. This electricity is then distributed by the co-ops to their customers.

If your food prices are to be kept down, farmers will be using even more electric power in the future—several times as much as they are using today. And the more than 800 investor-owned electric companies are planning and building now to make sure there will always be plenty—for rural and city areas alike. They can supply all the electric power all of the people of America will ever need.

Investor-Owned Electric Light and Power Companies... serving more than 140,000,000 people across the nation.
NAB engineering advisory group reactivated

WILNER TO HEAD 12-MAN UNIT; TOWN TO BE HONORED

A permanent engineering committee again will be available to advise the NAB on technical broadcast matters.

NAB President LeRoy Collins last week announced reactivation of the Engineering Advisory Committee, disbanded in 1961; John T. Wilner, vice president and director of engineering for the Hearst Stations, will be chairman of the 12-man group. Mr. Wilner was the recipient of the NAB’s first Engineering Achievement Award in 1959.

Dr. George R. Town, dean of engineering at Iowa State U. and director of the 1957 TV Allocations Study Organization, was named last week to receive the 1963 Engineering Achievement Award (see Week’s Headliners, page 10).

Mr. Wilner said that he will be pleased to serve as chairman of “this most important committee.” There had been considerable agitation within the industry for reactivation of the Engineering Advisory Committee, abolished two years in a general reorganization of the NAB (Closed Circuit, Dec. 31, 1962).

“With the fast-moving technological developments in broadcasting, the work of this committee should be most beneficial to the entire industry,” Mr. Wilner said. Citing the “ever-increasing speed of technological developments,” the NAB said the committee was reformed (1) to bring to the attention of the association’s engineering department important technical problems and (2) to study and recommend courses of action to solve them. George L. Bartlett is NAB manager of engineering.

Serving with Mr. Wilner on the committee will be Max H. Bice, general manager of KTNT-AM-FM-TV Tacoma, Wash.; Richard K. Blackburn, technical director of the Gannett Stations; Glenn G. Boundy, vice president for engineering, Storer Broadcasting Co.; William S. Duttera, director of allocations engineering, NBC; George Hixenbaugh, chief engineer, WMT-AM-TV Cedar Rapids, Iowa; Thomas E. Howard, vice president for engineering, Jefferson Standard Stations.

Also, Leslie S. Learned, director of engineering, Mutual Broadcasting System; Carl E. Lee, executive vice president, Fetzer Stations; Frank Marx, president of ABC engineers; James D. Parker, director, TV engineering, CBS-TV, and David L. Steel, president of the Assn. of Federal Communications Consulting Engineers.

Town Honored • Dr. Town will receive his award April 3 at the annual Broadcast Engineering Conference in Chicago, held as part of the NAB convention. He was chosen, the NAB said, because of his valuable contributions to technical knowledge and literature, his development of new engineering techniques and his leadership in broadcast engineering activities.

Statewide West Virginia news network started

The formation of the Broughton West Virginia Centennial News Network, to be sponsored by Broughton’s Farm Dairy Inc., Marietta, Ohio, is announced by Carl L. Broughton, president of the dairy, and Paul J. Miller, general manager of WWVA Wheeling, W. Va.

The program will be on seven West Virginia stations at 7:30 a.m. Monday through Friday: WWVA Wheeling, originating station; WPAR Parkersburg; WMOV Ravenswood; WKEE Huntington; WTIP Charleston; WJLS Beckley; and WPDX Clarksburg. It starts today (Feb. 4) and will include world and national news and West Virginia news, with emphasis on progressive happenings in West Virginia and the state’s centennial observance.

It is claimed to be the first statewide news network. The news commentator, Bob Terry, news director of WWVA, and his staff will cooperate with Carl Sullivan, executive director of the West Virginia Centennial Commission, in providing centennial news.

Changing hands

ANNOUNCED • The following sales of stations interests were reported last week subject to FCC approval:

• WLAP Lexington, Ky.: Sold by William R. Sweeney to Dee O. Cee, Brendan J. Stewart, J. B. Huckstep and Robert P. O'Malley for $400,000. Mr. Cee owns WWCA Gary and WLOI LaPorte, both Indiana. Mr. Stewart is an official of Incentive Capital Corp. of Gary, Ind. Station operates on 630 kc with 5 kw daytime and 1 kw nighttime. Broker was Blackburn & Co.

• WBRR-AM-FM East St. Louis, Ill.: Sold by Larry R. Picus, Robert Walker and associates to Paul Adams for assumption of $305,000 mortgage. Mr. Adams is chief engineer of WCPO-TV Cincinnati. Mr. Picus continues to own WOBS Jacksonville, Fla. WBRR is a fulltime station on 1490 kc with
Access fight brews in California
TV CAMERAS REFUSED ENTRY TO TWO STATE HEARINGS

Official action to deny tv cameras access to the hearings of California state agencies as well as to courtrooms, in effect extending the prohibition of Canon 35 of the American Bar Assn., to cover administrative as well as judicial hearings, occurred twice in Los Angeles during the last month. Public hearings of the California Division of Corporations and of the state’s Public Utilities Commission were halted because of the presence of tv cameras, although no objection was made to pad-and-pencil newspaper reporters.

The first denial occurred on Jan. 9. The State Division of Corporations had scheduled a hearing on a stock option agreement made by Westgates Petroleum Co. in connection with a controversial harbor oil lease. Camera crews from KABC-TV, KTTV (TV) and KTLA (TV), all Los Angeles, were there at the appointed place and time. Corporations Commissioner John G. Sobieski, who was conducting the hearing, ruled that the presence of the tv equipment would disrupt orderly proceedings and ordered them to leave. When the tv crews stood their ground the hearing was adjourned. When it reconvened the cameras were still there. After three futile postponements, Commissioner Sobieski went to court, seeking an injunction barring the cameras. Judge Kenneth N. Chantry of the Los Angeles Superior Court did not immediately grant the petition, but set a hearing for Jan. 30 at which the tv stations will have a chance to show cause why the injunction should not be granted.

The hearing has been postponed, first to Feb. 4 and then to Feb. 25. The second postponement came at the request of the California Bar Assn., which has asked the right to appear as amicus curiae and is reportedly retaining special counsel to argue that tv cameras should not be allowed to cover the so-called “public hearings” of the Division of Corporations and other state agencies.

The second refusal to allow a hearing to go on in the presence of tv cameras occurred last Wednesday, when William Dunlop, examiner for the California Public Utilities Commission, ordered the camera crews of KABC-TV,

Salant wants radio-tv in Congress, Supreme Court

Richard S. Salant, president of CBS News, has proposed that Congress and the U. S. Supreme Court adapt rules permitting microphone-camera coverage of their proceedings.

Mr. Salant’s analysis of rights of access by tv news is contained in material prepared for publication Feb. 2 in the American Society of Newspaper Editors’ The Bulletin.

The CBS News executive makes his case for electronic journalistic coverage of the legislative and judicial bodies on the public’s “right to know” rather than on a constitutional interpretation of rights only.

Mr. Salant said he thought the “most flagrant derogation of public interest and public policy” is the U. S. House of Representatives’ prohibition on microphones and cameras at all House proceedings, except for the opening session and State of the Union message.

He said he would not place coverage of jury trials in the same category because this area was not as clear-cut. He emphasized tv and radio access to congressional and Supreme Court proceedings could bring to the people the great issues of the day in the philosophy that the public has a “right to know” and to understand these issues.

500 w daytime and 250 w nighttime. WBBR-FM operates with 37 kw on 101.1 mc. Broker was Hamilton-Landis & Assoc.

- KOMY Watsonville, Calif.: Sold by Robert H. Delph to Craig Lawrence Jr. and Phillip E. Rather for $139,000 plus management contract to Mr. Delph. Messrs. Lawrence and Rather own KMEL Wenatchee, Wash. KOMY is a fulltime MBS affiliate operating on 1340 kc with 1 kw daytime and 250 w nighttime. Broker was Edwin Tornberg & Co.

- WINT Winter Haven, Fla.: Sold by Angelo L. Fazzari to Douglas Montgomery and Donald Lamerson of Alma, Mich., for $100,000. WINT operates on 1360 kc with 1 kw daytime only. Broker was Associated Media Brokers.

APPROVED - The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For The Record, page 78).

- KCHU (TV) San Bernardino, Calif.: Sold by Norman H. Rogers to Sun Co. of San Bernardino for $180,109. Sun Co., with James A. Guthrie, president, publishes San Bernardino Daily Sun, Evening Telegram & Index and Sunday Sun-Telegram. KCHU, which began operating year ago, is on ch. 18.

ATTRACTION STATION BUYS!

- MIDWEST—Daytimer serving area of 50,000-plus population. Priced at $90,000.00 with $25,000.00 down.

- MOUNTAIN STATE—Beautifully equipped facility in one of top 65 markets. Total price of $155,000.00 on ten year terms.

- SOUTHWEST—Daytimer grossing $65,000.00 annually priced at $85,000.00 on ten year terms.

- CALIFORNIA—Only station licensed to market of over 50,000. Grossing $79,000.00 monthly. Priced at $157,000.00.

BROADCASTING, February 4, 1963

61
KNXT (TV) and KTLA, all Los Angeles, to leave the hearing room, in which a Pacific Telephone & Telegraph rate hearing was to be held. They refused and he recessed the hearing until the following morning. At the time the hearing was to reopen, the original three stations were back, joined by others from KTTV and KCOP (TV), also Los Angeles. At this time public utilities Commissioner Frederick Holoboff appeared and read a lengthy statement to the effect that the PUC has had a long standing policy of refusing pictorial coverage of any of its hearings. Perhaps the time has come for a reexamination of this policy, he said, so, instead of citing the TV crews for contempt, he delayed the hearing until Feb. 13.

WNDT gets ‘grant’ from Philip Morris

WNDT (TV) New York, the ch. 13 educational tv station for the New York metropolitan area, has finally won a sponsor—but it’s not called that in tv circles. It’s called a grant.

Beginning Feb. 11 and for a 13-week period, Philip Morris cigarettes has agreed to underwrite the production costs of the World at 13, a news and analysis program broadcast daily Monday-Friday, 10-10:30 p.m. Philip Morris receives mention at the beginning and at the end of the program.

The announcement was made last week by Dr. Samuel B. Gould, president of the station and former president of Antioch College, Yellow Springs, Ohio. Dr. Gould was in Washington to speak at the Institute of Contemporary Arts.

The Philip Morris grant, Dr. Gould hopes, is the first of many to help the New York tv station build up its local news programming.

Just how much Philip Morris is making available was not made public. “It about covers production costs,” Dr. Gould said.

Although WNDA now has a substantial audience (number unknown), its major problem is finances. What Dr. Gould would like to see, he said, is 200,000-250,000 people paying $10 a year as a subscription fee for the WNDA monthly program guide.

Up to now contributions have been averaging about $1,000 a day, Dr. Gould acknowledged. Most of these are in $1 to $10 sums he said.

WNDA’s operating budget this year, Dr. Gould stated, is $3,191,000. This includes, however, amortization and interest payments on indebtedness, including mortgages. One of the major items in the tv station’s budget, Dr. Gould explained, is $90,000 a year rental for its transmitter atop the Empire State Bldg.

Bunker says broadcasters undersell radio medium

“Broadcasters are underselling radio as a medium. Moreover, they are making the mistake of selling the station instead of the medium.” Edmund C. Bunker, president-elect of Radio Advertising Bureau put these points foremost in a talk to the Assn. of Broadcasting Executives of Texas last week.

Stressing the need for increased professionalism in radio selling, Mr. Bunker said that in spite of the 200 million working radio sets in the U. S. and increased radio listening, “our share of the total national advertising budget has dropped.”

Mr. Bunker said that the answer to the dilemma was a more positive approach to selling to convince potential customers of the efficacy of radio advertising.

NBC-TV edits ‘libelous’ remarks from Griffin show

NBC-TV had some fast editing to do last week to eliminate remarks its lawyers regarded as libelous in an appearance by lawyer Morris Ernst on the taped Merv Griffin Show.

In the taping of the Wednesday show, Mr. Ernst, appearing as a guest, construed the Federal Trade Commission consent orders signed by three rating services (Broadcasting, Jan. 7) in a way that NBC attorneys considered inaccurate and actionable. These brief passages were edited out of the tape version before it went on the air less than an hour later.

Left untouched were criticisms directed by Mr. Ernst at the networks for what he considered over-emphasis on ratings and an attitude of abdication rather than dedication to principles of public enlightenment and advancement.

KTVH tower nearly ready

KTVH (TV) Wichita-Hutchinson, Kan., expects to begin using its new 1,504-foot transmitting tower about Feb. 15. Final sections of the new tower have been erected, according to Dale Larsen, vice president and general manager of KTVH (ch. 12). The tower was constructed by Kline Iron & Steel Co., Columbia, S. C. A new RCA transmitter is being installed.
Replacement for Conelrad in planning stage

NEW SYSTEM WILL PROBABLY USE AM, FM AND TV

A special industry-wide committee has begun working to draw up plans for a new alerting system for the American public through the use of both radio and tv.

The committee, formed last week from members of the National Industry Advisory Committee, is headed by John F. Meagher, radio vice president of NAB.

The outcome of the committee's deliberations, it is expected, will result in the establishment of a new system of warning to the public for use in a war emergency. It will use am, fm and tv, and may very well supersede the air raid sirens now relied on to alert the public.

One major problem in using radio and tv as an alert system is how to reach the people who do not have their radios or tv receivers turned on at the time. Various possibilities have been suggested, including a system called Sigalert, developed by Loyd Signon of KMPC Los Angeles, and a special portable, battery-operated receiver developed by Philec Corp.

The committee is under instructions from the Dept. of Defense's civil defense office to investigate the feasibility of a broadcast warning system which will provide an instantaneous alarm on a 24-hour-a-day basis and with a capability of covering 98% of the population.

Replace Conelrad • If accepted by the Dept. of Defense, the new system will take the place of Conelrad which was inaugurated in 1951 at the request for Conelrad as a means of denying navigational aid to enemy aircraft (Broadcasting, April 30, 1962). This decision came after a re-evaluation of Conelrad by the Joint Chiefs of Staff, undertaken at the request of the NIAC.

During Conelrad's 10-year life, broadcasters spent an estimated $20 million in equipment, time and manpower to perform their functions. There are at present about 2,000 am radio stations in the Conelrad network, of which 480 are "key" stations.

At a recent meeting of NIAC, the fourth annual Defense Communications Seminar was tentatively scheduled for Feb. 28-March 1 in Washington.

Triangle un-cancels

The Triangle Stations were reported last week to have given cancellation notice on their A. C. Nielsen Co. audience measurement service subscription—and then to have cancelled the cancellation. The original cancellation notice was said to have been issued shortly after the Federal Trade Commission announced that Nielsen, The Pulse Inc. and American Research Bureau had signed FTC consent orders (Broadcasting Jan. 7). The un-cancellation reportedly came after authorities of John Blair & Co., national sales representative for the Triangle stations, and others interceded on grounds that ratings information is needed for sales and programming purposes.

Bruce Curtis, of Leo Burnett, joins the Tricorn Club

Membership in the Tricorn Club stands for professional savvy about North Carolina's Golden Triangle Market. Bruce got tapped by correctly answering these two profound questions: (1) What is the Golden Triangle Market? (2) What is North Carolina's No. 1 metropolitan market in population, households and retail sales? In case you're pining to make this elite fraternity, the answer to both questions is the combined three-city "golden triangle": Winston-Salem, Greensboro, High Point. You'll pass if you also know North Carolina is our 12th state in population. So — what does knowing the No. 1 market in the No. 12 state add up to? A sure sales scoop for clients. Maybe a raise from the boss. At the least, an official hat from the Tricorn Club.

WFAW-AM-FM sign on

WFAW-AM-FM Ft. Atkinson, Wis., licensed to Blackburn Broadcasting Co., signed on the air Jan. 24. The station is owned by Nathan L. and Robert W. Goetz, the former serving as general manager. Thomas Loughhead is station manager. WFAW is on 940 kc with 250 watts and WFAW-FM is on 107.3 mc with 3 kw. Address is P. O. Box 109, Ft. Atkinson.

Media reports...

New NBC Radio affiliate = KRMD Shreveport, La., has joined NBC Radio. The new network station, operating on 1340 kc with 250 watts, was previously unaffiliated. KRMD is owned by T. B. Lanford. Thomas A. Gresham is general manager.

New call letters = Beginning Feb. 5 WLOF-TV Orlando, Fla., will change its call letters to WFTV (TV). The new call, according to the station, means Wonderful Florida Tele-Vision.

Competition dates = Entries for American Heart Assn. Howard W. Blakeslee Awards for outstanding reporting on heart diseases must be submitted before May 1. Radio and television programs produced between March 1, 1962 and Feb. 28, 1963 will be eligible for the awards which carry $500 honorariums. Entry blanks are available at American Heart Assn., 44 E. 23rd St., New York.

Broadcast newsman saves innocent man

A well-publicized case telling how an airman was exonerated from murder charges after another man confessed to the crime failed to emphasize one of the most important facts — how the second man's confession came about.

Rick Raphael, assistant news director of KBOI-AM-FM-TV Boise, Idaho, was at the Ada County jail in that city last Nov. 19 making a station documentary film about escapes from the jail after a prisoner, Theodore T. Dickie, 22, escaped the night of Nov. 9 and voluntarily returned Nov. 10 after several hours. The prisoner was charged with raping and murdering a 10-year-old girl during his absence from the jail.

When the suspect learned Mr. Raphael was in the jail he requested that he be allowed to talk to the newsman in private. During this conversation, the prisoner told Mr. Raphael he had committed another crime six months earlier, on April 10 — the murder of Mrs. Nancy Joy Johnson, the wife of an airman, and her two-year-old son — at Mountain Home, Idaho, near Mountain Home Air Force Base. The prisoner said an innocent man was being held for the crime, airman Gerald M. Anderson, who lived next door to the victim and who had been the last person to report seeing her alive.

Mr. Raphael reported his talk with the prisoner to law enforcement authorities, who followed up with an investigation, and released Mr. Anderson Nov. 25. But the airman was rearrested by Air Force authorities and was held in a series of hearings until last week when the Air Force ordered his release. Mr. Anderson originally had been arrested last April by the Air Force and there were reports the prisoner's confession was extracted from him through the use of intimidation over a period of about a week in April before he was turned over to civil authorities.

Latest summary of radio-television dealings

The following individuals in radio-tv or allied fields traded in securities of companies in which they are officers or directors or both. The summary was announced last week by the Securities & Exchange Commission and covers the month of December, although some were concluded in November:

Simon B. Siegel, sold 2,500 shares of American Broadcasting-Paramount Theatres Inc., retains 6,626 shares; George L. Coleman, bought 200 shares, Chris Craft Industries, holds total of 23,050; Armand G. Erpf and J. Patrick Lann acquired 1,000 shares each of Crowell-Collier Publishing Co., giving them total of 41,945 and 12,702 respectively; Dan A. Kimball bought 1,000 shares and E. Willard Lutz, 489 shares of General Tire & Rubber Co. (RKO General), giving them total of 38,335 shares and 1,338 shares respectively.

Also T. B. Schriever, gift and sale of 5,000 shares of MCA, retaining 241,250 shares; David B., Gerald A., Lee B. and Melvin Bartell, by private purchase acquired 6,250 shares each, and Gerald A. Bartell acquired 1,108 shares of Macadden-Bartell, giving each the following totals: David B., 325,907; Gerald A., 326,629; Lee B., 324,611; Melvin M., 118,567; Marcus J. Austad (Mark Evans), bought 200 shares of Metromedia Inc., giving him total of 9,950 shares.

Also D. C. Hallford acquired 200 shares and Harry B. Solimson, 600 shares as custodian, of Plough Inc., giving Mr. Hallford a total of 2,200 and Mr. Solimson, 3,666 personally and 1,334 as custodian. Douglas C. Lynch, acquired 2,653, Theodore A. Smith, 2,000, Walter Watts, 8,701, and Robert L. Werner, 637 by option of RCA, giving following totals: Mr. Lynch, 2,742; Mr. Smith, 6,086; Mr. Watts, 11,886, and Mr. Werner, 4,969; Morris Selig bought 200 Reeves Broadcasting & Development Corp., for total of 300; Harry L. Petersen acquired $3,000 worth of Reeves 6% convertible subsidiary debentures for total of $9,000.

Also O. Wayne Rollins, as guardian, bought 100 common and sold 1,000 Class B common of Rollins Broadcasting Co. in private sale, giving him 7,780 common as guardian and 609,400 Class B common; Roy R. Coffin bought 300 shares of Rainbow Corp. for total of 1,300; Rainbow Corp. bought 1,800 shares of TelePrompTer Corp., for total of 3,000 shares.

National General sets annual meeting Feb. 19

National General Corp., diversified theatre and industrial company, will hold its annual stockholders meeting Feb. 19 in Hollywood.

National General holds 38% of National Telefilm Assoc. and is the largest single stockholder of that tv program production and distribution firm. The company also owns five catv systems — in Williamsport, Pa.; Hattiesburg, Miss.; Alpena, Mich.; Logan-Man and Bluefield, both West Virginia, and has substantial investments in real estate and vending-machine companies. It is in the process of acquiring Mobile Rentals Corp. National General President and Chairman Eugene V. Klein received $69,808 in aggregate remuneration for the fiscal year ended Sept. 25, 1962, according to a proxy statement which announced the meeting. Other payments to officers: Irving H. Levin, executive vice president, $38,030; Alan May, vice president-treasurer, $46,800, and Robert W. Selig, vice president in charge of theatre operations, $41,600.

BROADCASTING, February 4, 1963
Taft Broadcasting net up 36% for quarter

Taft Broadcasting Co. reported net earnings after federal income taxes for the third fiscal quarter, ended Dec. 31, 1962, up 36%—$863,343 (55 cents a share) compared to $635,624 (40 cents a share) for the same period last year.

Total revenues for the quarter rose to $3,600,444 from $3,079,328 for the same three months in 1961.

Taft directors declared a quarterly dividend of 15 cents a share, payable March 14 to stockholders of record Feb. 15. This is a 50% increase over the regular quarterly dividend of 10 cents a share declared in the past.

The board also declared a 2 1/2% stock dividend, with the same payment and record dates as announced for the cash dividend.

Fund's assets up $40 million

The assets of Television-Electronics Fund Inc. have increased to more than $373 million as of Jan. 15, up over $40 million since the end of the company's fiscal year on Oct. 31, 1962 when values reached $331,875,000, shareholders were told at their annual meeting in Chicago.

The stockholders reaffirmed an advisory and management contract with Television Shares Management Corp., clearing the way for the acquisition of approximately 40% of the management corporation by Kansas City Southern Industries Inc. The price for the 40% is over $4 million.

Shareholders elected John Hawkinson, president of the management corporation, as a vice president and a director of Television-Electronics Fund.

IRS clarifies new rules on deductible expenses

Commissioner of Internal Revenue Mortimer M. Caplin announced last week that new taxpayer's record keeping procedures for deductible expenses have been clarified and liberalized (Broadcasting, Jan. 28). Employees traveling under per diem allowances not exceeding $25 per day and mileage allowances not in excess of 15 cents a mile will not have to retain receipts to substantiate claims, he said.

He pointed out, however, that to obtain a deduction for travel expenses in the above cases it is always necessary that the time, place and business purpose of the travel be established. The per diem and travel allowance exemptions are not available to employees who are related to their employers or who are stockholders owning more than 10%, IRS announced. Clarifying an earlier misunderstanding, Mr. Caplin said that taxpayers should not send travel receipts, meal vouchers, etc., with the tax return but should retain such records in case of an audit by IRS.

Storer declares dividend

Storer Broadcasting Co. has declared quarterly dividend of 45 cents a share on common and 12 1/2 cents a share on Class B common, payable March 8 to stockholders of record Feb. 22.

The "three band system" makes it much easier to tune in adjacent shortwave stations on the Mitsubishi Electric 9X-900S. The "band spread" of the smartlooking 9X-900S is twice that of ordinary models since shortwave frequencies have been divided into upper and lower bands (Band 1: 4 MC-9 MC; Band 2: 9 MC-18.5 MC) so that "clustered" stations are much further apart on the dial. The fine-tuning adjustment, 9-transistor circuit and "three band system of the 9X-900S make its receptivity something spectacular. Ask your nearest dealer for a demonstration.

MITSUBISHI ELECTRIC MANUFACTURING COMPANY

Room for one more at Desilu's studios?

LUCY REPORTS COMPANY OPERATING AT 94% OF CAPACITY

With five pilots scheduled for completion by mid-February, Desilu is now operating at a production peak of 94% of capacity, with 1,700 employees on the payroll, President Lucille Ball said last week.

Filming the pilot of Trader Brown in color marks the studio's entry into color TV, Miss Ball announced. This series, starring Ethel Merman, was created by Cy Howard and Arthur Julian. Mark Goddard is featured in the half-hour pilot, written by Bill Manhoff, which is to go before the cameras today (Feb. 4).

Also scheduled to start filming on Feb. 4 is I Married a Martian, half-hour comedy which Phil Rapp will produce with Lee Karson as associate producer. Robert Cummings will co-star with Julie Newmar. Another half-hour series, Careful, My Love, a comedy-mystery, had its pilot put into production last week, with Sherman Marks as director and Glynis Johns starred for Jess Oppenheimer, producer-writer. Next week will mark the start of filming for A-OK O'Shea, half-hour comedy to be produced by Lee Karson with Gale Storm starred. An hour-long series, The Greatest Show on Earth, being produced in color in association with ABC-TV, was to wind up production last week in Hollywood after a week's filming.

Lawrence signs co-op deal with four producers

Four film production firms have entered into an agreement with Robert Lawrence Productions Inc., New York, whereby the four will use Lawrence's studio facilities and office personnel for their own accounts. The four are Robert Bendick Assoc., Illustro Films, McKeen Assoc., and Rose-Magwood Productions.

Two of the producers, Rose-Magwood and Illustro, which now operate their own studios, will supplement them with the Lawrence facilities.

Jack Cron, who joined Lawrence recently as executive vice president for new projects, organized the five-firm arrangement.

Desilu acquires Langford

Desilu Productions has acquired Langford Productions, owner of 25% of The Untouchables, in a stock-for-stock exchange between Desilu and Robert Stack, owner of Langford. Mr. Stack, who portrays Elliott Ness in the gangster TV series, received 77,691 shares of Desilu stock in exchange for all shares in Langford, which will continue to produce the series for Desilu for the remainder of the current season and possibly for a fifth year. If the series is not renewed for another year, it will be put into syndication in this country by Desilu Sales. In foreign syndication, The Untouchables has grossed nearly $1 million.

Robert Taylor adds Four Star holdings

Robert Taylor has become the fifth largest stockholder in Four Star Productions through exchange of his interest in his former network series, The Detectives, for Four Star stock. Four Star currently is syndicating 31 one-hour and 67 half-hour shows of The Detectives series which were originally seen on ABC-TV and NBC-TV. It has been sold in 25 markets.

The other four stockholders—all reportedly holding more stock than Mr. Taylor—are David Niven, Charles Boyer, Tom McDermott and the Dick Powell estate.

Mr. Taylor will be the star of a new NBC-TV series next season. He owns a share of that program, which will be produced by Four Star.

Daly to keep m.c. post on CBS-TV's 'Line'

John Daly will continue as host and moderator of What's My Line? on CBS-TV, Sunday, 10:30-11 p.m. EST. Mr. Daly last week signed a new contract with the network.

Differences had developed between Mr. Daly, who has had the m.c. role on the show for the 13 years it's been on the air, and the network over a new contract starting with the 1963-64 TV season (Broadcasting, Jan. 28). A meeting on Jan. 25 between James T. Aubrey Jr., president of CBS-TV, and Mr. Daly paved the way for new negotiations and the final signing.

NBC-TV sets changes in daytime programs

NBC-TV last week announced three additions to its Monday-Friday daytime programming, to become effective April 1, following the demise of The Merv Griffin Show and Young Doctor Malone.

The new programs and their time periods are:

Ben Jerrod (color, 2-2:25 p.m. EST), a dramatic series based on cases of a criminal lawyer.

A medical dramatic series presenting
a complete story every day (title to be announced, 2:30-3 p.m. EST).
You Don’t Say (color, 3:30-4 p.m. EST) audience participation show.

Mort Werner, vice president, programs, NBC-TV, referring to The Merv Griffin Show, said “the experiment of scheduling this type of show in the early afternoon hours has not worked out from an audience point of view.”

Also involved in the afternoon program shuffle is NBC News Early Afternoon Report, currently broadcast 2:55-3 p.m., which moves to 2:25-2:30 p.m., also effective April 1.

Film sales...
Cartoon Trilogy, Beetle Bailey, BarneyGoogle an’ Snuffy Smith and Krazy Kat (King Features Synd.) Sold to Triangle Publications for WFLF-TV Philadelphia, WFBG-TV Altoona and WLYH-TV Lebanon, all Pennsylvania; WNBN-TV Lansing, N. Y.; WNHC-TV New Haven and KERE-TV Fresno. Also sold to WTTV (TV) Indianapolis-Bloomington; KIRO-TV Seattle and KS1-TV Salt Lake City.

Leave It To The Girls (United Artists TV) Sold to WCPO-Tv Cincinnati; WMCT (TV) Memphis; WSL-TV Roanoke; WOOD-TV Grand Rapids and KVOS-TV Bellingham, Wash. Now in 42 markets.

Steve Allen Show (BWC Productions Inc.) Sold to WJIB-Tv Detroit. Now in 30 markets.

Girl Talk (ABC Films) Sold to WCKT (TV) Miami; WTVO (TV) Rockford, Ill. and KTNT-TV Tacoma-Seattle. Now in 69 markets.

Century I, 30 features films (20th Century-Fox TV) Sold to WABC-TV New York; KTVB (TV) Boise; WHFB-TV Rock Island; KONA (TV) Honolulu; WBT (TV) Charlotte; WSCS-TV Charleston, S. C.; WOTL-Tv Toled: WBRC-TV Birmingham; WTCN-TV Albany; KENS-TV San Antonio; KSD-TV St. Louis; WGN-TV Chicago; WJAR-Tv Providence; WBAP-Tv Ft. Worth-Dallas; WWL-TV New Orleans; WAGA-TV Atlanta; WSM-TV Nashville; WTVJ (TV) Miami; WKBW-TV Buffalo; KWT (TV) Oklahoma City; WTC-TV Hartford; WKB-K-Tv Kal- amazoo and WFB-Tv Greenville, S. C. Now in 23 markets.

Surfside 6 (Warner Bros. TV) Sold to WIZ-TV Baltimore; KIRO-Tv Seattle; WNYS (TV) Syracuse and WLOF-TV Orlando. Now in 37 markets.

Maverick (Warner Bros. TV) Sold to WSPD-TV Toledo; WTVN (TV) Columbus, Ohio; WSIL-TV Harrisburg, Ill. and WLOF-TV Orlando. Now in 38 markets.

Bronco (Warner Bros. TV) Sold to WSPD-TV Toledo; WSIL-TV Harrisburg, Ill. and WLOF-TV Orlando. Now in 18 markets.

The Roaring 20’s (Warner Bros. TV) Sold to WHBF-TV Rock Island and WSIL-TV Harrisburg, Ill. Now in 21 markets.

Lawman (Warner Bros. TV) Sold to WSPD-TV Toledo and WEAR-TV Pensacola. Now in 13 markets.

Suspicion (MCA TV) Sold to WINK-TV Ft. Myers, Fla. Now in 121 markets.

Brave Stallion (ITC) Sold to KCMT (TV) Alexandria, Minn. Now in 216 markets.

Ramar of the Jungle (ITC) Sold to KTRK-Tv Houston. Now in 77 markets.

SA 7 (MCA TV) Sold to KXXF-TV Butte, Mont. Now in 113 markets.

M-Squad (MCA TV) Sold to Ford Motor Co. for programming on WAFB-TV Baton Rouge; KRDO-TV Colorado Springs; KELO-TV Sioux Falls and KOLD-Tv Tucson; also sold to WISC-TV Madison. Now in 121 markets.

Directors Co. sets seven

The Directors Co., New York, will produce seven original one-hour dramas for NBC-TV’s Du Pont Show of the Week for the 1963-64 season. Directors has a contract for seven dramas on this season’s Du Pont show as well — four of which have already been telecast.

Adventists to expand use of radio and tv

Expansion of the Seventh-Day Adventist Church’s radio-tv plans was disclosed last week at a conference of 80 church radio-tv directors in Dallas. The weekly Adventist radio program, The Voice of Prophecy, will be presented on a daily basis and the church’s tv offering, Faith for Today, will be presented in color.

William A. Fagal, director of Faith for Today, said some of the 200 stations

FOR TOWERS of all kinds
CALL ROHN

For a complete line of towers ideally suited for radio, television and microwave use of all kinds, rely on ROHN.

Shown above is the final installation of a 100 foot antenna atop a 485 ROHN TV broadcast tower. The installation is the WMBD-TV translator station at LaSalle, Illinois, Channel 71.

ROHN Manufacturing Co.
P. O. Box 2000
Peoria, Illinois

ROHN Representatives world-wide.
airing the weekly TV program already are presenting it in color and others will begin using the color prints soon. Voice of Prophecy now is on 500 U. S. and Canadian radio stations, according to Dr. Harold M. S. Richards, director. He said the program will be expanded to a daily basis because of requests by the stations.

Elmer R. Walde, radio-TV director, stressed that "intelligent and professionally-oriented programming" is demanded in the church's use of radio and television.

**WLIB plans salute to Negroes' achievements**

A music and drama festival, broadcast annually by WLIB New York, in conjunction with Negro History Week, will also be presented as a three-hour concert from Carnegie Hall this year, on Saturday (Feb. 9) from 3 to 6 p.m. WLIB will not carry any commercial announcements during the broadcast, which has been titled *Special Salute to the Artistic Achievements of Negro Performers.* The performers will include Ella Fitzgerald; Tyrone Phillips, 10-year-old pianist; singer Irma Franklin, and football star Roosevelt Grier.

**Program notes...**

McHale re-enlists *- ABC-TV has extended McHale's Navy (Thursday, 9:30-10 p.m.) for another 10 episodes. Extension of Revue Studio's comedy series brings season's total to 36 segments, of which 23 already are filmed.

'Phantom' to tv *- New tv series, The Phantom, based on the King Features cartoon strip, will be produced in color by Tele-Screen Productions, with Roger Creed and Madalyn Trahey as co-stars. A pilot with Pauline Goddard as guest star has been completed.

---

**CANADA'S RADIO-TV ADVERTISING UP**

*Rise In both radio, tv noted for 1962 by Elliott-Haynes*

Radio and television national advertising in Canada for the first ten months of 1962 was up over the similar 1961 period, according to reports made by Elliott-Haynes Ltd., Toronto market research firm, and published in the Toronto *Marketing* weekly.

Radio advertising was $16,685,229 for the January-October 1962 period, as against $14,813,927 in the similar 1961 period. Television advertising totaled $43,664,177 in the 1962 period as against $35,697,790 in the 1961 survey period.

The largest advertising group was food and food products in both media with $4,639,613 on radio ($4,559,527 in 1961), and $11,069,973 on television ($8,838,594 in 1961). Second in both media was drugs and toilet goods with $2,282,282 on radio ($2,065,181 in 1961) and $9,272,398 on television ($7,802,657 in 1961).

National and network Canadian radio advertising dropped in 1961 from the 1960 totals, according to a report just released by the Dominion Bureau of Statistics, Ottawa, Ont. In 1961 national and network radio totaled $21,266,000 as compared with $23,667,000 in 1960. But local radio advertising increased, the report points out, from $26,687,000 to $28,045,000 in 1961.

All Canadian television advertising was up in 1961 over 1960, the Dominion Bureau of Statistics reported. National and network advertising was up from $41,227,000 in 1960 to $43,950,000, while local tv advertising amounted to $10,135,000 in 1961 as compared with $8,636,000 in 1960.

Total radio and television advertising for 1961, according to these figures, was $103,396,000 as against $100,217,000 in 1960.

**CAPAC wins action in suit against KVOS**

The Composers, Authors and Publishers Assn. of Canada Ltd. (CAPAC) Toronto, the equivalent of ASCAP, was successful on Jan. 22 in the Supreme Court of Canada in an action associated with $250,000 damage suit against KVOS-AM-TV Bellingham, Wash., and its affiliate KVOS (Canada) Ltd., Vancouver, B.C. CAPAC placed its claim on production of scripts, tape, film and recordings in Canada for airing on the radio and television stations directed to Canadian audiences in the Vancouver area. CAPAC claimed that KVOS-AM-TV had no license from CAPAC and has not paid royalties on the use of its music. CAPAC started the case in 1959 and was granted an order of claim by Justice Jacques Dumoulin of the Exchequer Court of Canada in December 1959. In February 1961 Justice J. T. Thorson, president of the Exchequer Court reversed the ruling, and CAPAC took its claim to the Supreme Court of Canada.

**Government hurting tv abroad, says McCarthy**

It's the U. S. government that's hurting the image of American television abroad, not tv, John McCarthy, president of the Television Program Export Assn., told a meeting of film producers in Hollywood on Thursday (Jan. 31). The repeated attacks by Washington on the U. S. television industry in the form of congressional hearings, FCC hearings and the blanket indictment of the industry by the FCC has had widespread repercussions in foreign markets everywhere," he declared. "If Washington continues on its present course vis-a-vis the tv industry, we shall see increasingly in foreign markets the attitude that the programs of our industry carry some kind of stigma and that the audiences and populations of those markets must be protected from such tainted merchandise."
American techniques must be modified for overseas campaigns

It’s not enough simply to assume that because a product has a degree of acceptance in the American market, it will also suit the foreign consumer. I refer not only to formulation, in the case of packaged foods, but also to the price level at which the product must be sold. The old principle that success in the marketplace depends on giving the consumer what he wants at a price he can afford to pay is just as true overseas as it is here at home. And overseas, both standards are often unlike the American.

General Milk Co. processes and sells packaged foods through eleven major subsidiary overseas operations. We sell in the countries where our plants are located and we export from various places to over 100 markets around the world. Principal products are evaporated and sweetened condensed milk and powdered milk. As an affiliate of Carnation Co., we are responsible for all Carnation operations outside the United States, Canada and U.S. territorial possessions.

We are in a very competitive business and we believe in advertising—including radio and television. Fundamentally, our advertising philosophy leads to the application of American principles and techniques. But in foreign lands this concept is restricted severely by such things as legal considerations, media availability and sometimes even the literacy level of the consumer.

What’s In A Name • A brand name, even though it means nothing in the foreign language under consideration, must be easy to pronounce in the foreign tongue. Even the sound should be checked to be sure there can be no unfortunate connotation.

For us, American audio and video commercials generally won’t work well even after modifications for language and local consumption habits. For this reason our advertising is, for the most part, conceived and produced by the individual General Milk affiliate. Each works with its own advertising agency. Talent with a native “feel” for each separate market can, we think, best cope with our problems of variable brands, language, and product usage in the different countries. Where we can, we generally concentrate in three major media—radio, television and print—although we also sometimes use cinema and outdoor postings.

The quality of production we can get—particularly in Europe—is generally good to excellent. We do, however, occasionally use American photography and dubbed and edited American TV film. Then, too, once in a while one of our subsidiaries can contribute to the production of layouts and commercials of another. For example, a British TV commercial, or some variation of it, might be used in Australia.

Mostly Spots Abroad • Most countries we use spot time on both TV and radio—primarily because this is the only way commercial time is sold. A notable exception is the Philippines where we sponsor programs, both TV and radio, and where they “simulcast” audience participation programs on TV in Manila and on radio in Manila and the provinces. If the show is good, results are highly satisfactory.

Our use of TV depends, primarily, on availability. In most places, we have gotten in quite early and audience growth in recent years has justified our earlier decisions. The future of TV, particularly in the more sophisticated markets, is certainly assured. Like other advertisers, we invest in it substantially where visual product demonstration and pictorial brand identification are particularly important.

Beyond the availability factor, the relative importance to us of TV is quite variable between markets. Coupled with radio, it is the backbone of our advertising programs in Brazil and Mexico—but for different reasons. In Brazil we do not consider newspapers suitable and we cannot use national magazines because our selling, at the moment, is restricted to the Rio and Sao Paulo markets. In Mexico, TV is a good bet because we consider most print media available inadequate for our purpose and because there is a high concentration of sales potential in the Federal District.

Different Places, Different Media • In the United Kingdom, we spend about 50% of our budget in TV. In France, there is no commercial TV available, so we use commercial film in the cinema instead. Australia responds very well to TV, primarily because of the concentration of population in the Sydney and Melbourne areas. Germany, too, probably because the national coverage is good and there are so few commercials broadcast (only one commercial channel airs sales messages once a day during a half-hour news program).

We use radio extensively. It will deliver good coverage in many areas, but there are important exceptions like England and France where governments still prohibit its commercial use. You can get radio commercials into France from Luxembourg and Monte Carlo, but nothing like national coverage is possible. Of course, we are most interested in radio where pictorial representation of the brand is not too important, where the message can be brief and simple and, most of all, where we want broad and deep audience penetration.

An Effective Team • We like to use TV and radio together. We think the combination can be very effective, for example, in the Philippines where TV delivers “A” class homes only in the Manila area but where radio goes much deeper into Manila and at the same time covers the provinces too.

It’s evident that all of these factors represent a widely variable advertising opportunity as the marketing problems are studied country by country. To these variables must be added another—the changing development patterns of each individual medium. In this respect, it behooves us to constantly keep abreast of developments because both television and radio will surely have an even more profound effect in the years ahead on the free world’s constantly rising standard of living.

G. H. Matthew, vice president in charge of sales and advertising of General Milk Company, started in the food business—after a few post-college years in sales engineering—as a retail salesman for American Home Foods. Associated with Carnation Company since 1949, he was transferred in 1955 to General Milk, which handles Carnation’s overseas operations, after having served the parent company as regional sales manager, assistant general sales manager, and product manager.
SYNCOM SATELLITE READY TO GO

22,300-miles-high orbit to match earth rotation speed

Sometime in the next 10 days, the first 24-hour communications satellite will be launched from Cape Canaveral and it promises to open a new era in space communications.

The Syncom (synchronous communications) satellite is expected to be placed in orbit 22,300 miles above the earth. The satellite will revolve around the earth once every 24 hours, exactly in time with the earth's daily revolution. This means that Syncom will hover virtually over the same part of earth.

Since a single Syncom is expected to cover about one-third of the earth's surface, only three are needed to blanket the earth. Earlier communications satellites, like Telstar and Relay, are in relatively low orbit (500-3,500 miles high) and require 30-40 flying switchboards to give 100% coverage.

Syncom was built for the National Aeronautics & Space Agency by Hughes Aircraft Co. It weighs 86 pounds and will be used only for two-way telephone, teletype and facsimile communications between Lakehurst, N. J., and a U. S. Navy communications ship anchored at Lagos, Nigeria, on the west coast of Africa. Both stations are part of the Army Satellite Communications Agency. The Dept. of Defense is cooperating with NASA in the Syncom program. An advanced Syncom, under construction by Hughes, will be capable of transmitting TV programs.

If things go well, the satellite will reach the desired longitude within two weeks after launch. It is expected to be in position for testing about five days after launch, however.

The satellite carries a duplicate set of transponders and other gear. Transmission from the satellite, via a coaxial slot array and travelling wave tube transmitters, radiating 2 w, is at 1815 mc. Ground station transmitters, delivering 20 kw, will transmit at 7360 mc, and will be frequency modulated with a bandwidth of 80 kc. Ground stations will use 30-foot parabolic antennas and cooled parametric amplifier receivers.

Among advantages of the synchronous communications satellite is that it does not require large tracking antennas necessary to follow the low-flying satellites.

Syncom will remain in sunlight almost 99% of the time, feeding electrical energy from 3,840 silicon solar cells to nickel cadmium batteries.

Under development is a two-year program for bigger and more elaborate Syncom which will be able to relay TV programs as well as telephone and tele-type messages. The President has asked for $40 million for this project in the NASA budget submitted to Congress Jan. 17 (BROADCASTING, Jan. 21).

Technical topics...

New tuner • Altec Lansing Corp., Anaheim, Calif., a subsidiary of Ling-Temco-Vought Inc. in that city, has announced the production of a new stereo fm tuner designed for both professional and home use. New 314A "Emperor Royale" tuner can function as both a monitor and a network relay for an fm station. It is identical in circuitry and performance to Altec's "Astro," introduced last April. The "Emperor" sells for $359.

Film symposium • A semester-long symposium covering the operation of film processing labs is being offered as a non-credit course open to anyone who is interested by the U. of Southern California starting Feb. 13 and continuing each Wednesday evening through June 5. Tuition is $45.

New tiny tv set • Sharp Electronics Corp., New York, added its contribution to the growing tiny tv set market. It's an all-transistor portable set with eight and one-half inch picture tube that will sell for $229.95, made by Haya-kawa Electric Co., Osaka, Japan. The set weighs 10 lbs. excluding rechargeable battery unit which is an optional accessory.

BROADCASTING, February 4, 1963

Two of three 16 mm camera positions can be seen filming daredevil Japanese motorcycle act for use on NBC-TV's 'International Showtime' series (Fridays, 7:30-8:30 p.m. EST).

NBC has new color-film technique

NBC last week announced the development of a new production technique for color filming of television remotes. The network calls its process Synchro-16. It uses three 16 mm cameras which are operated simultaneously. The three films, shot from different angles, are then edited into one program.

Synchro-16's first successful use was last November in the production in Italy of International Showtime. Five color shows were filmed.

The filming, ordinarily expected to take 25 days using just one camera, was completed with the new multi-camera deployment in eight days. "Great Japanese Circus," one of five International Showtime programs produced with Synchro-16 later in Japan, was shown Feb. 1 and the second will be seen Feb. 15 (Friday, 7:30-8:30 p.m., EST).

NBC explained that most color TV programs are produced either on color tape or 35 mm color film. Ravenna, the location in Italy where the circus shots were taken, had no facilities for tape and 16 mm film cameras have more mobility than conventional 35 mm cameras. The system was further developed and used for five programs produced in Japan.

NBC credited Norman Grant, director of NBC-TV color coordination, with the system's creation. Joseph Cates and Lawrence White, executive producers, and Pat Pleven, producer, all with International Showtime, installed the system in their operations in Italy and Japan.
CHANGING TIMES
Record replaces newspaper at National Press Club

The traditional mock newspaper at the inauguration of a new president for Washington's National Press Club was replaced this year by a long-playing phonograph record.

The record, which honored Bryson Rash, NBC News Washington correspondent who became NPC president on Feb. 2, features NBC News correspondents David Brinkley, Robert McCormick and Richard Harkness as well as former press club officers and other Washington journalists.

The record, titled "Is Bryson Rash?", presents a humorous account of Mr. Rash's career with Messrs. Brinkley, McCormick and Harkness assisted by Patty Cavin, former women's editor of WRC Washington and president of the Women's Press Club; May Craig, Portland (Me.) Press-Herald, and Sarah McClendon, El Paso Times. WRC staff announcers Willard Scott and Ed Walker are heard imitating Mr. Rash as a boy and portraying his school teacher and others who affected his career.

The record was distributed at the inaugural dinner. Members not attending will receive it by mail.

ANA plans clinic on tie-ins

The Assn. of National Advertisers will sponsor a clinic on tie-in promotions to be held in New York, Feb. 14. The meeting will cover joint advertising and promotion programs involving two or more advertisers.

A committee headed by Edward L. Slater, director of advertising, Sylvania Electric Products, has scheduled these topics for formal discussion: How to avoid pitfalls and capitalize fully on your tie-in promotions; planning, executing and evaluating tie-in promotions; merits and problems of tie-ins from the standpoint of creativity and coordination; gaining the support of the sales force and trade for tie-in promotions, and the place of tie-in promotions in the marketing program.

'Lights for Life' promotes traffic safety

A trend of a rising traffic death toll throughout 1962 was reversed in the last half of December in the state of Virginia, according to WXEX-TV Richmond. In the Dec. 17-Jan. 2 period there were five fewer traffic deaths in the state than in the same period a year ago, though for the year there were 100 more traffic deaths than in 1961.

During the Dec. 17-Jan. 2 period, WXEX-TV conducted a "Lights for Life" safety campaign that urged motorists to keep their headlights on during daylight hours as a reminder to other motorists to drive with care. WXEX-TV promoted the campaign with 500 spot announcements, 10,000 bumper stickers and several hundred thousand leaflets. Local police officials, state patrolmen and accident victims were interviewed on local programs.

BBDO: a big agency with big and small accounts

Yes, we are not big, says BBDO. In a new promotional booklet, the agency in reciting "some of our vital statistics" assures the advertising industry that (a) BBDO is a big agency, but (b) BBDO is not a "big-account" agency.

The booklet points out that more than half of BBDO's clients (59%) bill under $1 million annually. The breakdown: 411 bill $1 million and over; 211, $500,000 to $1 million; 11, $250,000-500,000, and 27%, under $250,000.

Other vital statistics: the agency claims its regional-office setup is the "largest in the agency business" with half of BBDO's business originating in U.S. and Canadian regional offices; BBDO International is one of the "fastest-growing international agencies in the world" (four BBDO offices in Europe, 97 associated agencies in 54 countries), and about half of the business is in packaged goods, such as soap and soup, seeds and cigarettes, coffee, wine, beer and soft drinks.

BBDO also notes that two-thirds of its billing comes from clients who have been with the agency for 10 years or longer and that its accounts remain with the agency an average of 14 years.

$1.11 an hour STAFFS YOUR STATION with IGM SIMPLIMATION

Get the details! Find the way to bigger audiences, lower costs, higher profits with unparalleled flexibility and consistently better sound. Write for free folder, "The Sound of Money," IGM SIMPLIMATION, P.O. Box 945, Bellingham, Washington.
WPAT takes agency people to theatre

More than 70 Philadelphia agency and client executives were guests of WPAT-AM-FM Paterson, N. J., at a dinner and theatre party last week. Highlight of the evening was attendance at a Philadelphia performance of the pre-Broadway tryout of the play "Tovarich" with Janet Leigh and Jean Pierre Aumont. Among those attending were (sitting, l to r) Murray Firestone, president, Firestone-Rosen; Shelly Rosenman, Firestone-Rosen; Eileen Moore, Al Paul Lefton; (standing) Billie Farren, N. W. Ayer; Norm Flynn, WPAT account executive; Bette Kaufmann, N. W. Ayer, and Jim Egan, N. W. Ayer.

WPAT hosts were Dan Weinig, vice president and general manager; Buck Johnson, sales manager, and Mr. Flynn, account executive for the Philadelphia area.

Drumbeats...

If I had a hammer = WFAB-TV Dallas asked its viewers to write letters telling why they liked the ABC-TV show, I'm Dickens, He's Fenster. The best letter won for its writer the services of two carpenters for one day.

Down to the sea = WMMM-AM-FM Westport, Conn., will send a reporter to sea in a "weather-boat" to broadcast 32 remote marine reports each weekend next summer. The station is outfitting a yacht for the job with weather equipment, broadcasting units and call letters painted on the hull. The reports will be supplemented by broadcasts of flying conditions from the Bridgeport, Conn., airport in addition to normal coastal weather reports.

Pittsburgh station gives orchestra to listener

The Pittsburgh Symphony Orchestra's Symphonette was given to a listener of WRTY, that city, for her own personal concert in a contest conducted by the radio station.

WRTY listeners wrote the station with reasons why they would like to have the orchestra's musicians play for them. Each letter included a contribution for the orchestra's maintenance fund campaign.

A young nurse at Presbyterian-University Hospital was declared the winner for her letter which asked that the Symphonette play a concert in the hospital's auditorium for shut-ins and hospital personnel who could not hear regular concerts.

A second letter, declared runner-up, won a quartet of symphony musicians performing for students at the Western Pennsylvania School for Blind Children.

 Freedoms Foundation plans Roll-Call campaign

Radio and television stations are being asked to support the annual Roll-Call campaign of the Freedoms Foundation, Valley Forge, Pa.

The campaign will be conducted Feb. 15-28 with the theme "Plant the Seeds of Freedom." Special radio and television kits containing taped and filmed spots on various aspects of the "American Credo" will be sent to network affiliates in the first week of February. Other stations desiring the kits should address their requests to Admiral W. Radford, Freedoms Foundation, Valley Forge, Pa.

Appearing in the radio-tv announcements will be Admiral Radford, John Wayne, Franky Laine, Jack Benny, Raymond Burr, Johnny Carson, Claudette Colbert, Frank Fontaine, Andy Griffith, Diana Lynn, E. G. Marshall, Mitch Miller, Peter Nero and Ed Sullivan.

KTRH turns to listeners to pick music schedule

KTRH Houston is going to its listeners to determine what kind of music they want to hear.

The station is preparing a "Music-Selector" ballot listing 1,000 music selections, compiled from a list of million sellers, standards, current popular tunes and best selling albums. Listeners are asked to check off their 100 personal favorites and mail the lists to KTRH for tabulation and evaluation. The station will then program its music from the personal preferences of its listeners.
BROADCAST ADVERTISING

Mr. Frost  Mr. Stroock  Mr. Hussey

Fred Frost, Mark Stroock and Robert Hussey elected vps of Young & Rubicam Inc., New York. Mr. Frost is supervisor of tv films; Mr. Stroock, contact supervisor, and Mr. Hussey, of agency’s Hollywood office, is associate director of programming in that city. Locke Turner, former account supervisor with Charles Bowes Adv., joins Young & Rubicam, Los Angeles, as executive on Southern California Edison account. He replaces Fred Gordon, who resigned to join Home Buyers’ Guide.

Stanley T. Peterson, account supervisor at Guild, Bascom & Bonfigil, San Francisco, elected vp.

Frank Scoopa, Frank Droesch and Howard Smith elected vps of Donahue & Coe, New York. Mr. Scoopa, who joined D&C in 1956, is executive art director. Mr. Droesch, administrative art director, came to agency 28 years ago. Mr. Smith, who has been controller of agency since 1945, is now vp-assistant secretary-treasurer. Reuben Siegal, who worked with controller and treasurer, succeeds Mr. Smith.

Jerome Rothblatt elected vp in charge of sales for Sealy Mattress Co., Chicago. He will direct Sealy-Chicago advertising and marketing programs, in addition to his responsibility for sales in company’s four-state area. Mr. Rothblatt, associated with furniture industry for 16 years, joined Sealy-Chicago as merchandise manager in 1958, and was appointed sales manager in June 1959.

John E. Carter, for past four years vp for client services of Fuller & Smith & Ross, Fort Worth, Tex., joins Dallas advertising agency of Norsworthy-Mercer (formerly Taylor-Norsworthy) as vp.

Russell S. Jones, senior account executive, promoted to supervisor on Adolph’s Ltd. account at McCann-Erickson, Los Angeles. Mr. Jones joined M-E in 1955 in Cleveland office.

Jack L. Fisher Jr., president of M. M. Fisher Assoc., Chicago, elected midwest regional director of National Federation of Advertising Agencies, succeeding Robert Maercklein, head of his own Milwaukee agency. NFAAA is comprised of 40 agencies in U. S. and Canada.

Edward Baczewski, vp and director of media planning at Cunningham & Walsh, New York, appointed account supervisor. Mr. Baczewski will be responsible for Johns-Manville account. He joined C&W in 1950 as media buyer. Arthur Wright, senior producer, promoted to executive producer in charge of commercial production.

Jon Werolin, former media director of J. Walter Thompson Co., San Francisco, joins Honig-Cooper & Harrington, that city, as assistant media director. Colleen Mattice has succeeded Mr. Werolin as media director of Thompson’s San Francisco office.

George H. Gribbin, chairman of Young & Rubicam, New York, appointed public information chairman for 1963 Greater New York Red Cross campaign. Mr. Gribbin will help direct program to secure members and funds.

Frank Bruguiere, from 1959 until 1961 editor of Western Advertising and more recently its senior editor, joins Hal Stebbins Inc., Los Angeles advertising and pr firm, as copy group head.

Stuart P. Erwin Jr., former tv program director of Benton & Bowles, New York, joins Ralston Purina Co., St. Louis, as advertising manager in Ralston division.

Richie Ashburn, former New York Mets ballplayer, appointed sportscaster for Philadelphia Phillies games on Atlantic Refining Co.’s baseball network of 25 radio and four tv stations.

Marjorie B. Williams, former senior copywriter with Chirurg & Cairns, New York, joins creative staff of Hill, Rogers, Mason & Scott, Chicago.

Janet Marie Carlson, copywriter at Kenyon & Eckhardt and writer-account executive at Malcolm Steinaufl Agency, both Los Angeles, joins creative staff of Fletcher Richards, Calkins & Holden, that city.

Patrick E. Rheume, director of membership department of Radio Advertising Bureau, New York, elected executive vp of Teen America Assoc., producers of annual Miss Teenage America pageant.

Ben Margolis, administrative assistant of Television Advertising Representatives, New York, elected vp. Prior to joining TVAR in August 1961, Mr. Margolis served with CBS since 1927.

Richard Swenson, member of Young & Rubicam’s film department in Hollywood, promoted to production staff.

Robert Heyn, former account executive at D’Arcy Adv., Los Angeles, appointed assistant advertising manager of Bekins Van & Storage Co., that city.

Glee A. Duff named radio-tv director of Gray & Rogers, Philadelphia.

FATES & FORTUNES

BROADCASTING, February 4, 1963
South Carolina's past presidents honored

Past presidents of the South Carolina Broadcasters Assn. were honored at a special reception during the annual winter meeting of SCBA late last month. With the plaques they received are (1 to r, seated) G. Richard Shafto, the first president of the association in 1947 and executive vice president of WIS-AM-TV Columbia and WSFA-TV Montgomery, Ala.; Mrs. Mildred Whitmire, widow of the late B. T. (Bevo) Whitmire of WFBQ Greenville; Walter J. Brown, WSPA-AM-FM-TV Spartanburg, and C. Wallace Martin, now director of development at the U. of South Carolina.

Standing (1 to r) are past presidents Lou Neale, WBEU Beaufort; James F. Coggins, WKDK Newberry; Edward Osborne, WBCU Union; Randy Davidson, WLOW Aiken; Charles A. Batson, WIS-TV; Frank Best, WDIX Orangeburg, and H. Moody McElveen Jr., WNOK-AM-TV Columbia. Past SCBA presidents not at the reception are Dan Crosland, WCRS Greenwood, and John M. Rivers, WCSC-AM-TV Charleston, both South Carolina.

THE MEDIA

Richard M. Dunn, former director of broadcasting at Wade Adv., Chicago, joins ABC-TV in newly created post of director of daytime tv program development. Prior to joining Wade, Mr. Dunn was with Compton Adv., serving as tv program department director. Irv Wilson, former general sales manager of WGN-TV Chicago, joins network as sports and special programs sales supervisor, also newly created position.

Dick James, station manager of WBBW-AM-FM Youngstown, Ohio, elected vp of Mahoning Valley Broadcasting Corp., licensee of stations. Mr. James was appointed station manager in February 1961.

L. L. (Sonny) Stewart, manager of KOPY Alice, Tex., elected vp and general manager of station. Mr. Stewart, who joined KOPY in September 1962, formerly operated his own radio station engineering-consulting service with headquarters in Corpus Christi, Tex.

Richard Lewis Venturino, director of programming and production for American Freedom Network, Bonita, Calif., assumes additional duties as San Diego manager of XEMO Tijuana, Mexico.

Bob Kirby, salesman, promoted to assistant sales manager of WOOD-TV Grand Rapids, Mich.

Jack Lenz, in sales and production at WWIN Atlanta, joins local sales staff of WSB-AM-FM, that city, as account executive. Mr. Lenz is former vp and general manager of WBBT Lyons, Ga.

Norman Ginsburg, assistant director of sales promotion for CBS Radio Spot Sales, New York, promoted to director of sales promotion. Mr. Ginsburg joined CBS in 1959 from NBC, where he was director of advertising and promotion of film division.

Richard E. Jungers, midwest national sales manager of WGN-TV Chicago for past 10 months, promoted to general sales manager, succeeding Irv Wilson, who resigned to join ABC-TV (see story this page). Mr. Jungers began his broadcasting career with WGN Inc. as radio salesman. Other sales experience includes service with WMAQ Chicago and NBC Radio Spot Sales. Before entering broadcast field, Mr. Jungers was divisional manager of Storecast Corp. of America and district manager of Aluminum Co. of America.

Richard Freeman appointed Detroit office manager of Adam Young Inc., succeeding William Morgan, who resigns to become general manager of WPON Pontiac, Mich. Mr. Morgan had been with Young organization since 1960. Lewis S. Krone named radio account executive in Young's New York headquarters. Mr. Freeman for past three years has been salesman with WCAR Detroit. Mr. Krone has been account executive with Long Island Network (WGSM Huntington and WGBB Freeport, N. Y.).

Hugh J. MacPherson, former station manager of KNEW Spokane, joins sales of KLIV San Jose, Calif.

Robin Adrian, assistant traffic manager in sales department of KNXT (TV) Los Angeles, moves to station's sales research staff, replacing Gary Litaker, who is on leave of absence.

David Green, who just completed special project study for Metromedia's Illinois tv group—WTVP (TV) Decatur and WTVH (TV) Peoria—joins KMBC-TV Kansas City as director of advertising and promotion. Mr. Green held similar promotion post with KMBC radio in August 1961 when Metromedia purchased station. Walt Lockman Jr. joins KMBC-AM-FM's sales staff.

Edward M. Korry, former UPI newsman and presently manager of special projects and assistant to president of Cowles Magazines and Broadcasting Inc., was selected by President Kennedy
last week as United States Ambassador to Ethiopia.

Willis Grant appointed coordinator of corporate information, NBC, New York. Mr. Grant, formerly with Young & Rubicam and Ted Bates agencies, joined NBC in 1956 as research associate and was most recently research surveys manager.

Jack Mettrie, former operations manager of WESH-TV Orlando, Fla., joins WFGA-TV Jacksonville as sales development and promotion assistant.

Jerry Flessey, formerly with KOL Seattle, Wash., and KISN Portland, Ore., joins sales department of KMO Tacoma, Wash.

Harold E. Reigert, production supervisor of WFRV (TV) Green Bay, Wis., promoted to program director, succeeding J. W. Vickery, who resigned to accept post with University of Wisconsin, that city.

Joel Cohen, formerly with WJOL Joliet, Ill., joins WBAM-AM-FM Chicago as creative writer.

David Hart, promotion manager and night director of WLBZ-TV Bangor, Me., appointed promotion manager of WNBQ (TV) Chicago. He had been with WLBZ-TV for past six years.

Lynn Gibson, announcer at WDOM Dowagiac, Mich., assumes added duties of chief engineer, replacing Don Stuursma, who joins WKJR Muskegon, Mich., in similar capacity.

Kendall Smith, assistant program manager of WTIC-TV Hartford, Conn., promoted to program manager.

H. S. Owen, former comptroller of WPAT-AM-FM Paterson, N. J., joins Dickens J. Wright Assoc., New York, in similar capacity. Mr. Owen is fourth member to rejoin Mr. Wright, who was former owner and president of WPAT (Fates & Fortunes, Jan. 21).

Ed Sheppard joins WSIX-TV Nashville, Tenn., as production coordinator.

Alan J. Shalleck, formerly with CBS-TV, New York, joins production staff of WCAU-TV Philadelphia.

Joe Epley, news reporter with WLOS-TV Asheville, N. C., joins WBT (TV) Charlotte, N. C., as broadcast journalist.

Phyllis Lung, former woman's director of KYNO Fresno, Calif., has joined KABC-AM-FM Los Angeles as assistant to Jack Meyers, program director.

Victor Allan, associate producer with CBS-TV, New York, resigns after 16 years with network.

Donald Barnhouse, for two years producer and news writer for WCAU-TV Philadelphia, joins station's two nightly news broadcasts, Seven and Eleven O’Clock Report, with analysis of headline events.

Deloney Hull, member of sales staff of WSF-TV Atlanta, Ga., promoted to assistant sales manager. Dorothy Kirby appointed sales development manager, and Don Hicks, formerly with McGraw-Hill Publications, joins WSB-TV as account executive. Mr. Hull and Miss Kirby both joined station in 1948.

Edwin Weintraub, film editor, promoted to film director of WOKR (TV) Rochester, N. Y.

Ray H. Honaker Jr. joins WTAR-AM-FM Norfolk, Va., as announcer.

Arnold C. Johnson, former manager of WGEE Indianapolis when station began operating in 1956, returns as general manager.

Howard (Pat) Weaver, producer-director at WBAM Chicago since 1946,
appointed director of public affairs. He succeeds Paul Lazzaro, who has resigned to join Chicago pr firm of Don Young & Assoc.

John Hlavacek, NBC News' Havana correspondent, named to similar post in Miami. Hilda Watson, coordinator of NBC's public service announcements, retired Jan. 31 after 33 years with network.

Bernie Cosnoski joins WTTM-AM-FM Trenton, N. J., as host of Polka Make Believe Ballroom program.

Jimm Seaney, promotion manager of KLZ-TV Denver, Colo., assumes similar duties also for KLZ-AM-FM.

EQUIPMENT & ENGINEERING

Harry E. Houghton, former president, director and chairman of executive committee of *Encyclopaedia Britannica*, elected to board of directors of Reeves Soundcraft Corp. (Soundcraft magnetic tape and magnetic recording film), New York. Prior to his association with *Encyclopaedia Britannica*, Mr. Houghton served as president and director of Muzak Corp. for number of years.

Lionel H. Wheeler, vp in charge of technical operations of Colorvision Inc., promoted to vp and general manager of Glendale, Calif., firm. He is succeeded by Walter J. Washick, manager of Colorvision's engineering department. Mr. Wheeler is co-inventor of Colorvision Additive System of color photography.

Milt Parlen, former sales manager of Columbia Pictures' 8 mm division, New York, joins United Film Labs and Sherman Ginsberg Film Libraries, Hollywood, as executive vp. He succeeds Beatrice Dennis, who retires to semi-active position.

SCBA officers for 1963

Cleatus O. Brazzell, president-general manager of WELP Easley, was elected president of South Carolina Broadcasters Assn. at 16th annual convention fortnight ago. He succeeded Frank Hardin of WIS Columbia. Other newly elected SCBA officers: John Davenport of WESC Greenville, vp for radio; R. A. Jolly of WFBC-AM-FM-TV Greenville, vp for tv; Doug Youngblood of WFIG Sumter, re-elected secretary-treasurer. New board members include Redd Reynolds, WBLR Batesburg; Wayne Sawyer, WGCD Chester, and A. P. Skinner, WOLS Florence.

Frank P. Barnes, special assignments director for telecommunications at ITT, New York, elected vp-director of telecommunications marketing. Mr. Barnes joined ITT in January 1962 as special staff assistant in executive department from RCA's communications products department where he was general manager.

R. Kenyon Kilbon, editor of research and engineering information at RCA, New York, appointed manager of editorial and publication services. Mr. Kilbon joined RCA in 1953 as staff writer in department of information.

Robert Beck Jr. appointed manager of manufacturing for Lynchburg (Va.) operation of General Electric Co.'s rectifier components department.

INTERNATIONAL

R. A. Pitt named executive assistant of Transcanada Communications Ltd., Toronto, Ont., owners and operators of CKOC Hamilton, Ont.; CKRC Winnipeg, Man., and CKCK-AM-TV Regina, Sask.

John R. Gorman named account executive at Needham, Louis & Brophy of Canada Ltd., Toronto.

David Coleman appointed chairman of BBC-TV magazine program Points North. He joined BBC staff as news assistant in 1954.

W. John Holden named promotion director of CHCH-TV Hamilton, Ont.

PROGRAMMING

Steve Brody, president of Allied Artists Pictures Corp.; James Cantien, vp of Pacific Telephone & Telegraph Co., and Elden Smith, vice chairman of Security First National Bank, elected to board of Community Television of Southern California, organization whose goal is establishment of tv station in Los Angeles.

James N. Manilla, producer-director at Filmex Inc., New York, elected vp. Prior to joining Filmex, Mr. Manilla was senior producer with McCann - Erickson, New York, from 1954-62.

Darryl Hickman was elected president of Los Angeles AFTRA Federal Credit Union board of directors. Other board members are: Joe Yocum, Don Hiatt, Lynne Allen and Bert Ziff. AFTRA Credit Union, organized last December, is said to be first of its kind in entertainment business.

Michael Rye, representing actors; Paul Fly, singers, and Beth Carter, dancers, have been appointed to board of directors of Los Angeles local of American Federation of Television & Radio Artists.

Harvey Barnhard, business administrator of Wolper Productions, Hollywood, elected vp-treasurer and member of board of directors.

Al Rush, legal and business affairs, network tv sales, MCA Ty, New York, elected vp. Mr. Rush served in legal department of NBC before joining MCA Ty.

Jack Stuart, representing Desilu Sales in Denver area, transferred to Atlanta, Ga., to head company’s office there. Ivan Genit, sales representative for Latin America based in Mexico City, moves to Dallas, Tex., to replace Vernon Christian, who resigned. Desilu Sales is syndication subsidiary of Desilu Productions.

Nick Albarano, formerly with Capitol Records, New York, joins Epic Records, that city, as manager of midwest region promotion. Mr. Albarano will coordinate his activities with radio stations, distributors and key retailers in that region.

Fred May, former program manager of KBLA Burbank, Calif., elected president of newly formed tv production company, Fred May Productions Inc., Los Angeles. Mr. May leaves for London this month to film pilot for semi-classical music series called The World of Music.

Joseph Wright appointed art director for 35th annual awards presentation of Academy of Motion Picture Arts & Sciences. Frank Sinatra will mc affair to be aired over combined radio and tv facilities of American Broadcasting Co. and Canadian Broadcasting Co.

Dave Garaway, better known as tv performer than as one-time astronomy instructor at Harvard, is host of Exploring the Universe, half-hour series of programs dealing with latest scientific theories and developments, being produced for National Education Television Network under grant from National Science Foundation.

David L. Wolper, president and executive producer of Wolper Productions, Hollywood, was honored by U. S. Junior Chamber of Commerce with its Distinguished Service Award in recognition of “outstanding community service for 1962.”

ALLIED FIELDS

J. Drayton Hastie, vp of broadcast and real estate divisions and director of Reeves Broadcasting & Development Corp., New York, elected president. Mr. Hastie was president and director of Southern Broadcasting Co., Charleston, S. C., prior to joining Reeves.

DEATHS

Hideo Yoshida, 59, president of Dentsu Advertising Ltd., Tokyo, died Jan. 27 in Tokyo after long illness. Mr. Yoshida joined Dentsu in 1928. He was elected director in 1942 and president in 1947. Mr. Yoshida was presented “Man of the Year” award in 1961 from International Advertising Assn., of which he was vp in charge of Far East.

Ralph G. Terrill, 58, general manager of KSKY Dallas, died Dec. 29 at his home in that city. Mr. Terrill was formerly manager of KGHI Little Rock, Ark.

BROADCASTING, February 4, 1963

Actions of Jan. 24

WBDU-FM Gainesville, Ga.—Granted lic-

enced covering changes in frequency, ERP,

ant. height, type trans. and type ant. alter-

KFAZ (FM) Tucson, Ariz.—Granted lic-

enced covering changes in ant.-trans., stu-

dio and remote control locations. Changes in ant. system, installation of new ant. and trans., decrease ERP and increase ant. height.

WTAG-FM Worcester, Mass.—Granted lic-

enced covering changes in hours of operation, installation of DA for nighttime use (DA-N) and make changes on form 11-

- Granted licenses for following fm stations:
  - KWEJ-FM New Britain, Conn., and speci-

flying type trans.; WIRC-FM Hickory, N. C.; WPKL (FM) Nashville, Tenn.; *WSRE-FM Ingham, Ill.; *WJSF-CA Wilberforce, Ohio, and speci-

flying type trans.;

- Granted mod. of cp to change type trans. for following stations: WMNT Mana-

tico, N. C.; WPTX and WSCC, S. C.

WBAY-FM Green Bay, Wis.—Granted cp to increase ERP and install new trans.

KERN-FM San Jose, Calif.—Granted cp to install new trans.

KBUR Livingston, Iowa.—Granted cp to install old main trans. of KMCQ Fairfield, Iowa, as aux. trans. at KBUR main site.

WIAB Athens, Tenn.—Granted cp to in-

stall old main trans. at main trans. location; remote control permitted.

WCKX Pawling, N. Y.—Granted cp to install aux. trans. at main trans. location.

WQJ Kansas City, Mo.—Granted cp to make changes in ant. system (add top loading); condition.

KETO-FM Seattle, Wash.—Granted mod.

of cp to increase ERP to 40 kw, decrease ant. height to 130 ft, and change type ant.; remote control permitted.

KJHJ Granada, Calif.—Granted ex-

tent of expiration date to March 1.

Actions of Jan. 23

WAML Laurel, Miss.—Granted increased
daylight power on 1340 kc, from 250 to 1 kw. continual daytime operation with 250 kw, and installation of new trans.: remote control permitted.

WJMZ Brookhaven, Miss.—Granted in-

creased daytime power on 1340 kc, from 250 kw, continual daytime operation with 250 kw, and installation of new trans.: remote control permitted; con-

ditions.

-KNSU (FM) Mankato, Minn.—Granted lic-

enced for non-commercial educational fm.

-KUEB (FM) Salt Lake City, Utah—Grant-

ed license covering changes in ant.-trans.

location, ERP, ant. height, ant. sys-
	

tem and station name of new ant.

- KPRP-FM Parsons, Kan.—Granted license covering change in main studio and trans. locations and ant. system.

-KNER (FM) Dallas, Tex.—Granted license covering changes in ERP, ant. height, trans. and studio location; installation of new trans. and change in name.

-WWFX-FM Hartford, Conn.—Granted li-

cence covering change of ant.-trans., loca-

tion, increase in ERP and ant. height, change type trans. in new changes in ant. system; remote control permitted.

WSLS-FM Roanoke, Va.—Granted license covering use of old main trans. as aux. trans.

KWQA Worthington, Minn.—Granted li-

ence covering installation of new ant. sys-

tem (increase height).

-WLRI Williamsport, Pa.—Granted li-

ence covering installation of new trans.

for aux. purposes; grant to continue for 1 year.

-WAKE Atlanta, Ga.—Granted license covering use of old alternate main trans.
Not until this moment has such a small price tag appeared on a full-size, full-featured electric office typewriter: NEW ROYAL ELECTRESS

Yes, this is a full-size, fully equipped machine, not a lightweight. It can withstand all the rigors of heavy office duty.

How is it possible to introduce such a machine for $95 under the price of any other true office electric? Basically, by simplification of the mechanism. Not by giving up any of the features.

An ingenious new cam, for example, did away with 645 parts in type-bar linkages. That means 645 fewer parts to pay for in the first place. And the fewer the moving parts, the sturdier the machine.

The motor is simplified and yet more powerful than motors half again its size.

Throughout, simplification not only saves you money but results in a strong, trustworthy machine. Quiet. Rugged.

But you do not merely save money. You get all the features you want—and a few found nowhere else. The new Magic Monitor™, for example, automatically adjusts to the thickness of the carbon pack. The result: print work as neat and uniform as a business card—with remarkably clear, crisp, carbon copies.

For full-featured ability with a small price tag, isn't the new Royal Electress™ the logical choice? A Royal representative will be proud to show you the Electress. He is in the Yellow Pages.

Or write Royal McBee Corporation, Dept. 89 BE, 850 Third Ave., N.Y., N.Y.
OUR RESPECTS to John Thomas Murphy

Television is a way of life for ex-page boy

Last spring an energetic historian undertook a basic research job—the stories of network page boys who have made good in broadcast management (Television, May 1962).

An important member of this group is John Murphy, executive vice president of Crosley Broadcasting Corp., a rank attained since he joined Crosley's WLWD (TV) Dayton, Ohio, in January 1949. He assumed his new role last Sept. 27.

This tallish executive, with a bit of wave in his dark hair, mixes an easy smile with his businesslike demeanor. His blue eyes often twinkle when the situation is suitable; and again they can blaze with unhappiness at the way things are going.

John Thomas Murphy was born Jan. 23, 1913 in Bronx, New York. Early loss of both parents forced him to go from Fordham Prep into his first job, NBC page boy at Radio City, during the early days of the depression when he was just 17. That started an 18-year NBC career. At NBC he met many top broadcasting and advertising figures, including Robert E. Dunville, now president of Crosley but serving as sales manager at that time. Also he met James D. Shouse, now Crosley board chairman, who advised the young man to take advantage of every chance to learn all he could about the broadcasting industry. Taking this advice seriously, he soon was advanced to NBC's station relations department as liaison with individual affiliates around the country.

This led to a liaison post between stations and the NBC sales department, another chance to learn the sales problems of stations and networks at close range. One of his assignments was negotiation of the first WLWT (TV) Cincinnati contract with the NBC-TV network.

In his last year at NBC he concentrated on television, coordinating and answering inquiries from affiliated radio stations with tv intentions. He attended opening day festivities when WLWT went on the air officially in February 1948.

Joined Crosley In '49 • When Crosley formulated plans to start WLWD in Dayton, Mr. Murphy was offered the salesmanship. On Jan. 1, 1949 he became manager of this station that wasn't yet on the air. All went well however, and before the first year had passed John Murphy had been called to Cincinnati to take charge of all three Crosley tv stations—WLWT, WLWD and WLWC (TV) Columbus. Later WLWA (TV) Atlanta and WLWI (TV) Indianapolis were added. (WLWA was sold in 1962.)

In 1951 he was named vice president in charge of television for Crosley as well as general manager of WLWT. When WLWA took the air in 1953 he was named a vice president of that station.

At Crosley he is credited with many developments, including the success of the whole tv structure. He was responsible for network appearances of many Crosley-originated programs, including 50-50 Club and Midwestern Hayride.

He had a major role in bringing color baseball and basketball to tv and in making Cincinnati famous as "Color-town, U. S. A."

Hot Licks • Once in a while he indulges himself by sitting down at a set of drums and showing a local orchestra a few tricks he learned while a page boy, when he came to know B. A. Rolfe, Benny Goodman, the Dorsey brothers and others. He had run a small orchestra while a page boy, financing three years at Fordham U.

One of John Murphy's friends gives his impressions in this vein: "He personifies television. His belief in the industry, his sheer love of it and its potential, is legendary around Cincinnati's Crosley Square. A man of intense drive, he uses every situation to gain more knowledge of tv. Actually, he lives tv. One Monday morning he is said to have written a memo to his sales manager that went like this, 'While I was relaxing at home with my family last night, I decided how we will attack the problem we're having with—'."

Way of Life • Television really is a way of life as well as a career with Mr. Murphy. With an extensive knowledge of the industry, he believes good, old-fashioned hard sell must be applied to tv advertising, coupled with creativity. "If an advertiser's message has both," he likes to say, "the product will move."

A decade ago, in prophetic words, he said in a talk to the Louisville Ad Club: "The time is coming when television will worry less about Fay Emerson's neckline (a topic of that era) and more about illiteracy; less about assaults on what tv is doing to education and more about the thoroughly apparent fact that it is the greatest educator of all." He actively aided establishment of WCET (TV) Cincinnati, one of the first ctv stations, for which Crosley provides transmitting facilities at a nominal fee of $1 a year.

Best People • As an executive Mr. Murphy believes first in finding the best people available and then delegating responsibility. He's also a firm believer in promotion from within, compensating an employee for diligence, effort and company loyalty.

He takes a dim view of order-taking salesmen but admires those who know how to fight the battle of adverse numbers. He considers them the most important people in a tv station.

As to tv programming, he's an advocate of creativity and originality with showmanship and flair and often talks of responsibility for the tremendous impact of tv programs on viewers. He likes special events and programs with local live personalities.

And of course his faith in color is unbounded. He remarks that Cincinnati has more color sets proportionately than any other city, with 10% of the nation's color homes located in the four Crosley tv markets.

Mr. Murphy has had numerous industry activities, including director of Television Bureau of Advertising, NBC affiliates committee, Broadcast Pioneers and International Radio & Television Society plus a yard-long list of local roles. He's an active member of St. Gertrude Catholic Church. He married Winifred M. Meehan, Brooklynn, an NBC traffic employee, in 1940. The Murphys have a daughter, Patricia Ann, 16. John's hobbies are golf, baseball and gardening.

Mr. Murphy Unbounded faith in color tv
What's behind the noses

They're rewriting the rule book for the numbers game. Big numbers are still important, but the trend among buyers is to wonder more about the composition of the numbers. More and more buyers are thinking like Armstrong Cork's advertising director, Max Banzhaf, who recently said that he was less interested in gross figures on cost per thousand than he was in "cost per thousand what?"

Mr. Banzhaf explains that he wants impact. This he describes as "finding the people who represent the prime target for a product" and presenting advertising that has real appeal for them.

A long step toward answering such needs was taken by CBS-TV (Broadcasting, Jan. 28, 1963) when it found a way to solve that heretofore unanswered puzzle—comparison of apples, or magazines, with oranges, or television.

Under the direction of Jay Eliasberg the research began with the concept of studying "total advertising effectiveness" rather than "audiences." This shift in target overcame the difficulty which had made such comparisons impossible.

By concentrating on the end result of effectiveness, CBS-TV found TV had high marks in "awareness" of the product, "certainty" of its values and "eagerness" to buy.

In cost efficiency the study determined television not only made twice as many people increase their evaluation of advertised brands as did magazines, but, more important, made double the number eager to buy.

That is the kind of information high-spending broadcast buyers can use. It is a must if broadcast is to continue to increase its share of the advertiser's dollar in face of the concentrated fire of the competition.

Both radio and television tend to fare extremely well when compared with other media by competent research. The problem is to have more of this research ready on national, regional and local levels.

If television and radio don't provide the right answers, other media will try to. Their way.

Oh, Henry

The nice words, the high-sounding statements of principle, the cultivated appearances of devotion to the "public interest"—all the attractive arguments that have been used to justify government intrusions into broadcast programming—blew up last week in the FCC majority's face. By inadvertence a member of the inner circle admitted just what has been going on.

We are indebted to E. William Henry, a dedicated New Frontiersman, for confirmation of the warnings that this publication has been shouting—to an audience with an astonishing incidence of deafness—for several years. Mr. Henry made the following observations in a news conference held last week while he was conducting hearings into the local programming of television stations in Omaha. The conference was held at the end of the second day of testimony.

Mr. Henry said that at that point the hearings were going "about as we had expected" and that they had shown that "most of the representative citizens of Omaha seem to be satisfied with the performance of all of the stations."

But, he said, in almost the next breath, it would have to be decided later, after the presentation of the testimony of the stations themselves, whether local programs in Omaha "are measuring up" to FCC "standards."

Here, for the first time, the semantic cover-up was removed from New Frontier thinking. To put it in still clearer words, the present majority of the FCC does not care whether the public is satisfied with television programming; what matters is whether programming conforms to the specifications of the FCC.

What the FCC majority is really doing is reserving the authority to decide whether the public knows what is good for the public. By Commissioner Henry's own description of the process, the FCC has assumed the considerable job of regulating not only television but also the television audience's tastes.

No matter the guise under which this process is conducted—to protect the public against "harmful" things, to expose the public to things that are "good," to move the public ahead in cultural and educational experience at a rate faster than the public is naturally disposed to go—the process is in fatal conflict with the fundamental traditions of American society. A government is no longer subject to the consent of the governed if it succeeds in arrogating the power to prescribe what the governed see and hear—if it is allowed to second-guess the TV audience of Omaha.

The dangers to an open society in the recent operations of the FCC are beginning to become apparent to many thoughtful people, including the architect of the FCC program policy that the regime of Newton Minow inherited and has put to censorship use. As reported here last issue, FCC Commissioner Fred Ford, who was the Republican chairman when the program policy of July 1960 was adopted, has disavowed the Omaha-type hearing on the grounds that the government is usurping the broadcaster's decision-making function. Mr. Ford has not, however, disavowed his program policy itself although it has become the instrument for all kinds of pressures on programming.

Yet the 1960 program policy must be disavowed, indeed must be eliminated, if the trend toward government intrusion in programming is to be reversed. Omaha is only the latest example of the mischief that can be worked under a policy of federal surveillance over programming. There will be more examples, and perhaps they will be more destructive, for the commission majority will act more cleverly now that it has been unmasked in Omaha.

As we have said repeatedly, the Congress must be persuaded to step in. Only by revisions in the law under which the FCC functions can the rush toward federal censorship be stopped.
