WCCO TELEVISION

The Difference Between Good and Great in Twin City Television
cover those openings in your TV schedules...

the British way... BRITISH CALENDAR

...a continuing series of quarter-hour programmes for TV

An ideal programme. It gives your viewers a fresh and stimulating look at what's new in Britain. British Calendar ranges throughout England, Northern Ireland, Scotland, Wales, the Commonwealth... even the world, to gather its unique stories. Always topical. Always interesting. And the entire programme is the perfect answer for openings in your TV schedules... as so many stations have found out. It’s available every week or every two weeks on a continuous basis. Or if you prefer, weekly, using thirteen or twenty-six issues. And it's free... all you're asked to pay are the shipping charges. Write or telephone: British Calendar, 845 Third Avenue, New York, N.Y. 10022. Telephone number: 212 PL 2-8400.

BROADCASTING, September 27, 1965
BIG TEX is the symbol of the State Fair of Texas, biggest state fair in the world, celebrating the Exposition of the Americas in 1965.

“BIG TEX” dominates at the Fair, and KRLD-TV, quality leader in color, is the dominant television station in the nation’s 12th market . . . the dynamic Dallas-Fort Worth area.

Channel 4 delivers 31.7% more homes per average quarter hour 9:00 AM to Midnight, Monday thru Sunday, than the second station in the market, according to the June/July 1965 ARB estimate.

You get the dominance and reach of the leading station in the Southwest for your client when you buy from your ATS representative on KRLD-TV.
Sheridan denial

If James B. Sheridan, controversial chief of FCC Broadcast Bureau, intends to resign he hasn't confided in members of commission. In fact he denied such intention last week when asked about widespread reports of his imminent resignation by FCC Chairman E. William Henry. Reports had Mr. Sheridan leaving to join National Community Television Association—where his former boss and former commissioner, Fred W. Ford, is president.

CATV a utility?

When National Association of Railroad & Utilities Commissioners meet in New York this week, resolution calling on states to declare community television public utility will be presented to membership. If adopted, this would seek to give impetus to project to place CATV's under jurisdiction of state commissions, thus removing them from control of local city and town councils. Promote on adoption to be submitted by NARUC committee on communications? Good

Mayflower rapprochement?

Could social event scheduled Oct. 3 by National Community Television Association in honor of new chairman Ben Conroy Jr., Uvalde, Tex., CATV operator, herald rapprochement between NCTA and National Association of Broadcasters? There has been no formal communication between two organizations since NAB board last June in Buck Hill Falls, Pa. failed to endorse CATV proposals worked out by subcommittees of two organizations.

Invited by NCTA President Frederick W. Ford to private dinner at Mayflower hotel in Washington are John F. Dille Jr., NAB chairman; Vincent T. Wasilewski, NAB president; Douglas A. Anello, NAB general counsel, and all FCC commissioners, several Senators and Representatives. Joining Mr. Ford and Mr. Conroy will be Robert D. L'Heureux, NCTA general counsel, and Wally Briscoe, NCTA administrative assistant. Wives are included in invitation.

Mogen David big pop

Although Mogen David Wine Corp. will use chiefly print media initially to promote its new line of domestic champagnes, Chicago firm will make major comeback in network TV soon and shortly will also announce heavy spot TV campaign for some 100 markets through Edward H. Weiss & Co. All commercials will be in color, a "first" for wine industry, company will claim.

ABC's radio hype

Startling news is in store for radio advertisers—past, present and prospective—this week. They'll be told they haven't been using radio very effectively. That is one of findings of Daniel Yankelevich Inc., independent research firm, in major study for ABC Radio. Results of study, including guidelines to follow in creating radio commercials, will be given to agencies and advertisers at presentation at New York's Hotel Roosevelt Wednesday. Study is part of continuing project. It's described as noncompetitive, and representatives of stations—and other networks—have been invited to showing. In addition, ABC Radio officials say they'll promote findings with heavy advertising campaign.

Leap-frogging in color

Is FCC showing hand, in order due out this week, on one of unresolved policy questions involving community antenna television—should nonduplication protection be required when retransmitted programs are in color, local ones in black and white? Order denies in most aspects petition of Black Hills Video Corp. for reconsideration of decision imposing conditions on grants of microwave, to serve CATV's in communities in South Dakota, Texas and Missouri. However, FCC commission reportedly is relenting to extent of permitting duplication of satellite station when it is carrying program in black and white and CATV-relayed signal is in color.

FCC's CATV bill

Almost lost sight of amid welter of conflicting claims concerning FCC's jurisdiction—or lack of it—over community antenna television is fact that commission has own draft bill providing for explicit grant of authority. Bill was drafted by staff last spring (Broadcasting, April 19), as commission prepared to order adopting CATV rules. Commission then contended it had authority over all CATV's—nonmicrowave-fed as well as those using microwaves—but said it would welcome congressional "clarification" of jurisdiction question.

Bill, in effect, suggests kind of clarification commission wants; it provides for broad grant of explicit authority. Bill has been cleared by Budget Bureau, but has not yet been sent to Congress. And since House Commerce Committee has concluded committee hearings on CATV bill of Rep. Oren Harris (D-Ark.) and current session of Congress is fast fading, FCC bill won't be sent to Hill before start of second session in January.

Fairness: Part II

Rev. John M. Norris's suit to have FCC's fairness doctrine declared unconstitutional (see story page 65) is only Part I of the planned two-part assault on commission's regulatory policies affecting programming. Part II is scheduled to be suit aimed at knocking questions about religion out of commission's program-reporting form. Rev. Dr. Carl McIntire, whose 20th Century Reformation Hour appears on more than 600 radio stations, is behind suit expected to be filed "in matter of weeks."

Color blackouts

Some television stations are paying steep price for mass push by sponsors to color commercials. Big reason is clogged pipelines at commercial production facilities. One station representative says its San Francisco outlet lost $3,500 to $4,000 in one week alone through inability of commercial production house to deliver prints in time to meet their schedules. It's not just loss of color commercial placements, says station rep. Production companies are so busy with color orders that some black and white work isn't getting done on time.

No smoking, please

American Cancer Society is concerned about TV personalities who smoke cigarettes because of impression it makes upon juvenile admirers. In inter-organization memorandum, vice president Cliton R. Read, cited not only "network heroes but local sportscasters, newscasters, emcees and others who appear regularly on local programs" as making wrong impression on youngsters. Mr. Read urged quiet, no publicity appeal to local personalities who consistently smoke during TV appearances.
This man isn't dangerous just every hour on the half hour.

Mao Tse Tung has the bomb and 4 million soldiers. He can't be ignored. Every minute of the day he makes news that affects our lives. News that people shouldn't have to wait an hour or a half hour to hear. He's one of the reasons KYW Radio 1060 Philadelphia and 1010 WINS New York are broadcasting "all news all the time". Both KYW Radio and WINS Radio utilize the creative, managerial and news gathering resources of Group W. We are proud that people can tune to these stations and get news the minute they want it. It demonstrates how Group W keeps New York and Philadelphia informed every minute of every day.

How Can You Reach More Sports Fans In North and South Carolina?

Buy the station more North and South Carolina sports fans listen to — WBT Radio Charlotte.*

WBT has the three ingredients it takes to be the No. 1 sports station in any area—the POWER, the PROGRAMMING, the PERSONALITY.

The POWER: WBT's 50,000 watts reaches not only Metro Charlotte, but 75 miles beyond in all directions. This power creates a market of more than TWO MILLION people with $3.5 BILLION in effective buying power.

The PROGRAMMING: Major regional sports events — originating station of the Davidson Basketball Network and for over 100 stations during the World 600 and National 400 stock car races . . . Duke football . . . ACC basketball . . . the Greater Greensboro Open . . . the North-South Golf Tournament. PLUS important national sports events — the Master's . . . the Triple Crown of Horse Racing . . . Sebring and other important road races . . . to mention a few.

The PERSONALITY: WBT's sports programming is spearheaded by Sports Director Johnny Evans. When he talks about sports, more North and South Carolinians listen.

If you're interested in reaching more North and South Carolina sports fans in the great Charlotte market and beyond, talk with your BLAIR Radio man. He's a big fan of WBT Radio Charlotte.

BROADCASTING, September 27, 1965
Four are accredited by Ratings Council

First accreditations of rating services were issued Friday (Sept. 24) by Broadcast Ratings Council after two years of examination, auditing, revisions and review.

Accreditations went to C. E. Hooper Inc. and Pulse Inc. for their local radio services and to American Research Bureau and A. C. Nielsen Co. for both their local and their national television services.

New York instantaneous TV services of Nielsen, on which auditing has not been completed, and of ARB, which is revising its sample, were not up for council consideration Friday.

"The accrediting of these regular syndicated audience measurement sur-veys," said Council Chairman Donald H. McGannon of Westinghouse Broadcasting, "represents an important step forward in the process of assuring the industry users, the public and interested governmental bodies that the rating reports reflect what the services say they are doing.

Mr. McGannon cautioned that "we can't let the initial accreditation be the basis of apathetical or erosive drift in the future." He said it will be necessary for both auditors and rating services to "press for continuing improvement and upgrading in all elements of the existing measurement process."

Auditing of services will be continuing operation. Each of those accredited Friday have been through at least two complete auditing cycles since applications for BRC accreditation were filed in late summer and early fall of 1963.

Auditing thus far has not considered periodic or special-order services.

Madison groups merge, receive CATV franchise

Merger of competitors for community antenna franchise in Madison, Wis., paved way late Thursday for city council approval of 10-year nonexclusive franchise with 10-year options.

Franchise-holder, Complete Channel TV Inc., is made up of WISC-TV and WMTV-TV, all Madison in one group and John Walsh and Dr. Charles Hopkins, both Madison, and James Fitzgerald of Janesville, Wis., in second group.

Unusual feature of grant is that no installation fees or monthly charges were proposed. Complete Channel must submit full plan of distribution and operation in six months.

Approved proposal will give city $500 first year; 1% annually for next 4 years and 2% annually thereafter.

NBC gets Nielsen nod in 30-market average

NBC led ABC and CBS in that order in 30-market Nielsen average rating disclosed Friday (Sept. 24) by network sources and covering first week of new season (Sept. 13-19, 7:30-11 P.M. EDT). Ratings: NBC—18.5, ABC—17.9 and CBS—16.9 (excluding CBS Reports on ground it was sustaining that week) or 16.7 (if CBS Reports is included).

Meanwhile, CBS and NBC continued to fight for supremacy in Thursday night (Sept. 23) national Arbitron ratings, but ABC again led both in 26-city Trendex report for same night (for earlier ratings, see page 67). Arbitrons for 7:30-11 P.M. EDT Thursday gave CBS average 16.8 rating (32 share), NBC 16.7 (32) and ABC 15.7 (30).

Trendex showed ABC with 16.2 rating and 33.1 share, NBC 15.5 (31.6) and CBS 14.5 (29.6).

Top 40 programs reported in MNA are shown here without individual ratings but in their proper ranking:

1. Man Called Shenandoah (ABC)
2. Bewitched (ABC)
3. Run for Your Life (NBC)
4. Bonanza (NBC)
5. Fugitive (ABC)
6. Get Smart (NBC)

BROADCASTING, September 27, 1965
WEEK'S HEADLINERS

George W. Dick, president of American Research Bureau, Beltsville, Md., elected board chairman. He retains position as president and chief executive officer. Mr. Dick has served as executive VP of ARB's parent company, C-E-I-R Inc., Washington. Rodney Erickson, formerly senior VP and director of marketing for ARB, elected to newly created position of executive VP. Mr. Erickson is also board member.

Russ Stewart, VP-director of both Field Enterprises Inc. and subsidiary Field Communications Corp., Chicago, late Friday elected to new position of board chairman of Field Communications which is building new UHF station WFLD-TV there. Sterling C. (Red) Quinnian, VP-director of Field Communications and WFLD general manager, elected president of Field Communications succeeding late Marshall Field. Marshall Field Jr., elected director of both companies. Now with New York Herald Tribune he plans to return to Chicago soon.

For other personnel changes of the week see FATES & FORTUNES

UBS sets Nov. 8 date with 48 affiliations

Unisphere Broadcasting System announced Friday (Sept. 24) that it will begin on-air operations as UHF-TV network on or about Nov. 8.

Vincent C. Piano, board chairman of UBS, told news conference in New York that network has written contracts or verbal agreements from 48 stations on full or per-program basis. Affiliates are not required to take all programs to be offered by UBS though advertisers must make minimum buy, Mr. Piano said. He declined to discuss rates publicly at this time, but advertisers will be supplied with cost information. He indicated that at outset cost to advertisers will be "very low."

UBS has set up tentative program schedule covering both daytime and evening schedules. It includes feature films on thematic basis ("war," "spy," "prison," "jungle" movies); syndicated series, specials, sports, music-variety. Network will not be interconnected, except for special events.

Color set shortages?

Spurt in color TV set sales in September will result in industry falling at least 350,000 sets short of consumer demand by Christmas, according to report issued today (Sept. 27) by Raymond W. Saxon, vice president and general manager, RCA Victor Home Instruments Division.

Mr. Saxon added that industry now is expected to sell at least 2.5 million color sets in 1965, increase of 200,000 over forecasts of one month ago. Color receiver sales in third quarter of this year are twice that of comparable period last year, he said.

Kramer, consultant

Formation of Worth Communications Inc., to perform consulting services to selected broadcasting, advertising and marketing interests, shortly will be announced by Worth Kramer, former president of Goodwill Stations, sole stockholder. Firm will make headquarters in Fisher Building, Detroit. (Mr. Kramer has purchased, subject to FCC approval, WSPB Sarasota, Fla. for $300,000.)

WEOL set for hearing; faces fine, license loss

FCC has designated applications of WEOL-AM-FM Elyria, Ohio, for hearing in proceeding in which licensee, Elyria-Lorain Broadcasting Co., faces $10,000 fine and loss of licenses. Applications pending are for renewal of licenses and for transfer of control of license to Lorain Printing and Publishing Co. (CLOSED CIRCUIT, Sept. 20).

Commission, in announcement Friday (Sept. 24), said issues include questions of whether publishing company, which already owns 46.9% of stations, has assumed control without commission authorization, and whether transfer would result in concentration of control of media in area.

Chief parties in case appeared in earlier one before commission but in opposite roles. Elyria-Lorain last year opposed transfer of WWZ Lorain from Sanford A. Schafitz to Lorain Journal. Commission subsequently denied WWZ applications for renewal and transfer (BROADCASTING, April 6, 1964). That decision was upheld by U. S. Court of Appeals three weeks ago (BROADCASTING, Sept. 13).

David Lowe stricken

David Lowe, CBS Reports producer, died of heart attack Friday morning (Sept. 24) in New York. Before he joined CBS in 1960, Mr. Lowe was associated with NBC, DuMont Television Network, and had been executive program consultant to England's Granada Television Network, had produced plays on Broadway, and was producer-director-writer of Coke Time. He is survived by his wife, Harriet Van Horne, TV critic-columnist for New York World-Telegram & Sun and other Scripps-Howard newspapers, and by son and daughter.

Grey Advertising stock traded

Grey Advertising stock, issued to public last week, hit market at $19.50 Tuesday and by Thursday was trading in free market. Friday's closing price was 18 3/4 bid, 18 3/4 asked. Merrill Lynch, Pierce, Fenner & Smith heads list of underwriters of 290,000 share offering (BROADCASTING, Aug. 16).

Proceeds of issue go to 16 individuals, including Arthur Fatt, board chairman and chief executive officer of agency who sold 45,100 shares, and to two funds. Grey's public offering follows those of other agencies: Papert, Koenig, Lois; Foote, Cone & Belding; Doyle Dane Bernbach and Grant Advertising.

Fenkell heads Tigers' network

Detroit Tigers, owned by broadcaster John E. Fetzer, names Neal K. (Doc) Fenkell as operations and sales manager of its television network. He was traffic manager for club's regional hook-up this year.
The 100 top-quality cartoons in the Warner Bros. "Series '64" package are not only available in color, but they are first-run on television. These cartoons, starring Bugs Bunny and his world-famous friends, are fully-animated and were all produced during a period when the ever-popular Bugs ranked as the "No. 1 money-making short subject" in theatres all over the country.* Running 6 to 6½ minutes, they're also available in black-and-white. Now sold in more than 50 major television markets—including all of the top ten!

on camera — his majesty, the American citizen

And he gets royal treatment. KELO-LAND TV’s 19 hours a week of local, live programming are geared not simply as “public service,” but as top-caliber production. To accomplish this goal, KELO-LAND TV employs 4 portable videotape units, an 11-vehicle motorized fleet, full time correspondents in major centers, and 132 stringers throughout KELO-LAND’s nearly 75,000 square miles.

DATEBOOK

a calendar of important meetings and events in the field of communications.

Indicates first or revised listing.

SEPTEMBER

Atlantic Association of Broadcasters is holding its annual convention Sept. 26-28 — under chairmanship of R. J. Wallace, CKMR Newcastle N. B. Monday and Tuesday will be devoted to local sales and marketing problems. Lord Beaverbrook hotel, Fredericton, N. B.

Sept. 27 — FCC deadline for filing comments on Part II of its notice of inquiry and proposed rulemaking, issued April 23, looking toward regulating nonmicrowave community antenna TV systems. Among other areas of concern, Part II deals with (1) effect on development of independent (nonnetwork) UHF stations (2) generalized restrictions on CATV extensions of station signals (3) "leapfrogging" and (4) program origination or alteration by CATV, pay TV and combined CATV-pay TV operations.

Sept. 29-Oct. 2 — Annual convention, National Association of Railroads & Utilities Commissioners. Thursday panel on "CATV Jurisdictional Problems." will include FCC Commissioner Kenneth A. Cox as a speaker. FCC Chairman E. William Henry will address Friday session on "Communications Problems—1965." Hilton hotel, New York.

Sept. 30 — FCC’s deadline for reply comments on proposed rulemaking looking toward adoption of procedures for establishing antenna farm areas to accommodate growing number of tall broadcast antenna towers, while protecting safety air.

Sept. 30-Oct. 2 — Annual fall meeting of Minnesota Broadcasters Association. Speakers include: Sherrill Taylor, vice president for radio, National Association of Broadcasters; Robert Hurleigh, president, MBS; George Dick, president, American Research Bureau; Burt Russick, president, Mid-Continent Surveys.

OCTOBER

Oct. 4-5 — Society of Broadcast Engineers national convention, Lewiston, Mont.

Oct. 4-5 — Eighteenth annual convention and election of officers of New Jersey Broadcasters Association. Speakers include Douglas A. Anello, general counsel of National Association of Broadcasters and Howard Bell, director of NAB Code Authority. Panel on local radio measurement will feature Dr. Sidney Roslov, president of Pulse Inc.; Frank Stilser, president of C. E. Hooper Inc., and George Dick, president of American Research Bureau. Governor Morris hotel, Morristown.

Oct. 5 — Deadline for reply comments on FCC’s further notice of proposed rulemaking relating to fostering expanded use of UHF television frequencies by setting aside channels 70 through 83 inclusive for a new class of 10-kw community TV stations with a 300-foot antenna limitation.

Oct. 5 — FCC deadline for reply comments on Parts II and IV of rule proposals concerning frequency allocations for common carriers serving community antenna television systems and technical standards for proposed Community Relay Service. Old deadline was Aug. 3.

Oct. 5 — Deadline for reply comments on FCC’s proposed rulemaking relating to network programs not made available to certain television stations.

Oct. 5 — Deadline for comments on FCC’s notice into whether networks should be required to affiliate with, or offer programs to, stations in certain small markets.

Oct. 8-9 — Deadline for entries in first annual exhibition of advertising and editorial art conducted by the Art Directors Club of Los Angeles. Competition is for TV and print ads and editorial art used between Oct. 1, 1964, and Dec. 1, 1965, in states west of Mississippi River and in Western Canada. Entries should be sent to Adia, 301 S. Harvard Blvd., Los Angeles 90005.

Oct. 8-9 — James E. Webb of National Aeronautics and Space Administration will be featured at newsmaker luncheon held by the International Radio & Television Society, Grand Ballroom, Waldorf-Astoria, New York.

Oct. 8-10 — Fall conference of Florida Association of Broadcasters. Speakers include Paul Miller president Gannett newspapers and stations, and president of Associated Press; Charles Moore, National Association of Broadcasters radio code manager; Robert Hawn, chief of renewal and transfer division, FCC, Silver Springs.

Oct. 10-12 — Annual fall meeting and election of officers of North Carolina Association of Broadcasters. Speakers include Vincent T. Walsiewski, president, National Association of Broadcasters; Charles T. Tower, executive vice president, Corinthian Broadcasting Corp.; Dwight W. Martin, vice president, WDSU-AM-FM-TV, New Orleans.

Oct. 12 — University of Wisconsin’s 11th Wisconsin FM Station Clinic. University of Wisconsin, Madison.

NAB CONFERENCE SCHEDULE

Dates and places for the National Association of Broadcasters fall regional meetings:

Oct. 18-19 — Marriott motor hotel, Atlanta.

Nov. 11-13 — Sheraton-Chicago, Chicago.

Nov. 15-16 — Brown Palace, Denver.

Nov. 18-19 — Davenport hotel, Spokane, Wash.

Nov. 22-23 — Westward Ho hotel, Phoenix.
North Carolina's largest metropolitan market is served best by WSJS TELEVISION Winston-Salem Greensboro High Point
Oct. 13—Meeting of Association of Broadcasting Executives of Texas. Speaker will be Stephen B. Labunski, vice president in charge of the Radio Network division, Marriott hotel, Dallas.

Oct. 13-11th annual education-industry conference on public relations co-sponsored by the National Association of Manufacturers and the Henry W. Grady School of Journalism, University of Georgia, Athens. Featured speaker will be Ray Moore, director of news and local programming, WSB-TV Atlanta. Athenaeum, Ga.

Oct. 14—Fred Friendly, president of CBS News, will be guest speaker at third annual San Francisco Press Club radio-televisio. awards dinner.

Oct. 14-15—Fifth annual International Film & TV Festival of New York. Speakers include: Steve Krantz, president, Krantz Films; William Cooper Jr., director of film programming, WPX-TV New York; Tom Jones, program director, Triangle Station; Abe Mandell, president, ITC; Eli Feldman, president, Focus Presentations. Workshop session on UHF to be directed by Ed Cooperstein, president of WNUJ(TV) Newark, N. J. Americana hotel.

Oct. 14-23—Twelfth annual meeting of MIFED, Milano International Film, TV Film and Documentary Market, including first presentation of TV Pearl awards for best feature or serialized film and best short film produced for TV in 1964-65. During meeting MIFED is sponsoring EXCO, Congress and Exhibition on World Progress in Electronics for Cinema, TV and Associated Industries.

Oct. 20—New deadline for comments on the FCC's rulingmaking proposal looking toward adoption of new set strength (propagation) curves for the FM and TV broadcast services. The proposal would update the F (50, 50) curves now in the rule book to take advantage of additional measurements, especially in the UHF television band. Original deadline was Aug. 29.

Oct. 21—All-day conference dealing with “Profitable Road to Supermarket Marketing,” scheduled by New York chapter of American Marketing Association. Speakers include Thomas E. Butler, president, Grand Union Co.; Peter Vold, board chairman, King Korn Stamp Co.; Michael J. O'Connor, Supermarket Institute, and others. Waldorf Astoria.

Oct. 21—Deadline for comments on FCC's proposed rulemaking to limit three major television networks (ABC, CBS and NBC) to equity holdings in no more than 50% of all nonnews programming between 6 and 11 p.m., or to two hours of nonnews programming in same period, whichever is greater. Proposal would also prohibit three TV networks from domestic syndication and foreign sales of independently produced programs.

Oct. 21-31—San Francisco International Film Festival with special television competition for entertainment and documentary films. Masonic auditorium.

Oct. 22—Senator Robert F. Kennedy (D- N.Y.) to be featured at newsmaker luncheon held by the International Radio & Television Society, Grand Ballroom, Waldorf-Astoria, New York.

Oct. 22—Deadline for comments on the FCC’s notice of inquiry to determine if stereophonic sound transmissions could and would be used in televi. and broadcasting.

Oct. 25-27—National Electronics Conference, sponsored by the University of Illinois, Northwestern University, Illinois Institute of Technology and Institute of Electrical and Electronics Engineers. McCormick Place, Chicago.

Oct. 29-30—Theater Owners of America convention, Ambassador hotel, Los Angeles.

Oct. 28-30—Fall convention of Ohio Association of Broadcasters. Speakers include Vincent T. Wawlezki; president of the National Association of Broadcasters, The Christopher Inn, Columbus.

Oct. 28-30—Annual fall meeting of Missouri Broadcasters Association, Missouri hotel, Jefferson City.

Oct. 31-Nov. 1—41st annual convention of the National Association of Educational Broadcasters. Sheraton-Park hotel, Washington.

Oct. 31-Nov.—Annual technical conference and equipment exhibit, Society of Motion Picture & Television Engineers. The conference will be submitted on color TV in Europe, new UHF transmitter design, possible distribution of UHF signals, research work on quadrature distortion correction, vertical interval testing and monitoring, automatic channel fish, quality control procedures. Queen Elizabeth hotel, Montreal.

Oct. 31-Nov. 2—American Association of Broadcasting Agencies western region convention. Del Monte Lodge, Pebble Beach, Calif.

November

Nov. 1—FCC deadline for reply comments on proposed rulemaking limiting to three number of TV stations (not more than two of them VHF) an individual or corporation can have interest in or own in one or more of top 50 TV markets.

Datebook indicates first or revised listing.

RADIO MANAGEMENT CONFERENCES

Oct. 11-12—Pheasant Run Lodge, Chicago.

Only the sunshine covers South Florida better than WTVJ.

WTVJ, with South Florida's largest daily circulation, has color telecasting facilities to air your color tapes, films, or slides at regular black and white rates. Represented nationally by Peters, Griffin, Woodward, Inc. / A Wometco Enterprises, Inc. station. CBS affiliate.
Nov. 4—Deadline for reply comments in FCC's notice of inquiry into whether networks should be required to affiliate with, or offer programs to, stations in certain small markets.

Nov. 4—Second annual FM Radio Day and multiplex conference of Georgia Association of Broadcasters. Speakers include Abe Voron, WQAL-FM Philadelphia, chairman of National Association of FM Broadcasters; Robert Richer vice president, Quality Inc., New York; Martin Hollinger, assistant vice president and media director, Burke Dowling Adams, Atlanta. Americana motor hotel, Atlanta.

Nov. 5—National Association of Broadcasters president Vincent Wlasilewski will be featured speaker at the International Radio & Television Society newsmaker luncheon. Waldorf-Astoria, New York.

Nov. 5—6—Annual fall meeting and election of officers of Maryland-D.C.-Delaware Broadcasters Association. Washingtonian Country Club, Gaithersburg, Md.

Nov. 5—Missouri Associated Press Radio-TV Association meeting. Muehlebach hotel, Kansas City.

Nov. 5—Wisconsin Associated Press Radio-TV Association meeting. Milwaukee.

Nov. 8—Deadline for reply comments on the FCC's notice of inquiry to determine if stereophonic sound transmissions could and should be used in TV broadcasting.

Nov. 10—12—5th national convention, Sigma Delta Chi, professional journalistic society. Baltimore hotel, Los Angeles.

Nov. 11—Annual fall meeting of Oregon Association of Broadcasters. Benson hotel, Portland.

OPEN MIKE®

Sorry—but maybe later

Editor: Thanks for the instant presidency of the University of Southern California (Sept. 13, page 54) to the University of Southern California. Actually the president of the University of Southern California is Norman Topping. I serve that university's Department of Telecommunications as chairman—Kenneth Harwood, professor and chairman, Department of Telecommunications, University of Southern California, Los Angeles.

FM in Arizona

Editor: ...we've been reading for many years now about various and sundry FM stations increasing their hours of stereo programming from nothing to perhaps three or four hours a day and now, in the Aug. 16 issue, we notice a group of five stations spending a considerable amount of dollars to convert their stations to stereo.

For your information, and your readers, KNON (FM) Phoenix has broadcast in full-range multiplex stereo since it first went on the air, Christmas
Triangle stations are masters at getting response. Like WFBG Radio in Altoona, for example. When the station invited the community to join in its 40th anniversary celebration at a local amusement park, two-thirds of the population of Altoona turned out. It was the largest crowd in the amusement park's 26-year history. Why? Because people like WFBG. They believe in it. It's an important part of the community. If you want response in Altoona, or in any of the Triangle markets, let the Triangle station deliver the message. People listen. BUY SUCCESS. BUY TRIANGLE.

Day, 1961. We are the 42d FM station to include stereo broadcasting in our programming and among the very first few to be “full time stereo,” 18 or more hours a day.

KNIX has operated in the black for nearly three years. We have been credited with boosting stereo album sales to far above normal expectations in central Arizona...due to our stereo album sound...—Bob French, KNIX-(FM) Phoenix.

Pay-TV gamble

EDITOR: The cartoon in your Aug. 30 issue was especially amusing since our pay-TV experiment is such a big gamble.

If you could persuade your editors to give me the original by Mr. Hix, it will be displayed in my office with honor and appreciation.—John H. Pinto, vice president, RKO General Phonevision Co., New York.

(The original cartoon has been sent to Mr. Pinto. RKO General Phonevision Co. is licensee of pay-TV station WHCT(TV) Hartford, Conn.)

Longevity candidates

EDITOR: ...Dorothy Gibson just began her 36th year with KFPW [Fort Smith, Ark.] Sept. 20. Miss Gibson has worked in every department except engineering. Her titles have ranged from staff musician to manager. At present her title is bookkeeper.—Jack Freeze, general manager, KFPW Fort Smith, Ark.

EDITOR ... Mrs. Lillian M. (Pat) Roper, has been employed by WGBF [Evansville, Ind.] since April 1, 1929. She started her career in radio as organist and staff accompanist. In 1931 she was appointed program director of WGBF and has served in this capacity ever since. ...Martin L. Leich, general manager, WGBF Evansville, Ind.

EDITOR: ...Perhaps Bertha Hewlett of the WRVA Richmond, Va., staff may qualify for this record.

Miss Hewlett, who is now our office
In 1882, Edison had a great idea.

(And it wasn’t the electric light.)

Today it promises even greater things —for you!

It was the whole idea of investor ownership of electric light and power companies, which got its start when Thomas Edison and a small group of investors financed his first electric power plant 83 years ago.

Since then, millions of people like you have put their savings to work as shareholders in more than 300 electric light and power companies. As a result, American business management has built the greatest electric systems on earth.

Today there’s practically no limit on the electric service available to you—or on what it can do for you! And with investors, employees, customers and business management working together in the traditional American way to meet the future, you can be sure that good things will keep on happening—for you!

You’ve got good things going for you with service by Investor-Owned Electric Light and Power Companies*

Watch for HOLLYWOOD PALACE, with Milton Berle as guest host, Saturday, October 23, 9:30 P.M., Eastern Time, on ABC-TV.
Gemini 5: Why you saw it seconds after it happened.

For the first time since manned space flight began, you were able to see our returning astronauts seconds after their safe arrival on the U.S. Navy carrier Lake Champlain.

ITT’s VIDEX® data transmission equipment brought this historic event, and subsequent Gemini photographs, to the nation’s television screens.

The photographs were transmitted by the VIDEX equipment from the Lake Champlain via radiotelephone to New York. From there, they traveled over ordinary telephone lines to the TV networks’ facilities at NASA’s Manned Spacecraft Center in Houston.

The VIDEX receiver in Houston displayed the pictures. TV cameras then retransmitted them through the networks. Unique slow-scan television pictures took only seconds to unfold before your eyes, just as pages in a book.

VIDEX data transmission equipment is another example of how ITT helps people communicate. ITT, world’s largest international supplier of electronic and telecommunication equipment.
service manager, has been with WRVA since our first day of broadcasting on Nov. 2, 1925. She served as the first hostess of WRVA and then as hostess and "cheerleader" for the Corn Cob Pipe Club program which was fed to network from WRVA. Bertha was also known as the popular "Aunt Sammy" where she had a program giving out recipes and helpful household hints.—

Carl L. Haglund, promotion manager, WRVA-AM-FM Richmond, Va.

(In a letter last week to Miss Hewlett, Irene M. Pratt, whose 31 years at WLLH Lowell, Mass., had been suggested to Broadcasting as being a record for the longest continuous service in broadcasting, and one station [Broadcasting, Sept. 13], said that the women employed in broadcasting for a long time might be interested in forming a club similar to the men's Old Timer's Club. Future letters on this subject will be referred to her attention.)

BOOK NOTES

Whatever your question might be, if it can be described in figures or shown in a table, the answer will probably be in the government's 86th annual Abstract.

This year's Abstract contains 1,299 statistical tables and 50 maps describing the economic, social and political life primarily of the U.S. but also including foreign statistics for comparisons.

The extent of the book comprehensiveness is exemplified by its data on such subjects as medical costs in different cities, average charges and fees for full-time college students, percentage of population who use fluoridated water, percentage of people disqualified from the draft, etc.

Miss Torre's 10 days in jail for refusing to identify the source of a quote which assumed importance in the legal squabble several years ago between Judy Garland and CBS is the major episode in this autobiographical account of the trials and tribulations of a girl newspaper TV columnist (New York World-Telegram & Sun., New York Herald-Tribune) and TV news-caster (KDKA-TV Pittsburgh). As an author she is at her best when she recalls the highlights of her reportorial career, is most annoying when she pontificates on the shortcomings of performers, producers, sponsors, advertising agency executives and network officials. Either way, "Don't Quote Me" can provide an evening's entertainment for anyone engaged in any phase of the broadcast business.
Taft Broadcasting Company of Houston announces the appointment of AVERY-KNODEL INC. as national sales representative for KODA 1010 Radio for adult Houstonians KODA-FM Houston's first stereo station
Color TV has an ‘economic stimulator’ responsibility too

The television industry has a new responsibility to the viewer, to the consumer and to the American economy with the arrival of full-color television programming. It is to help stimulate economic progress through its programming as well as its advertising.

Color television will be the greatest single motivating factor for consumer goods. The television producers should be aware of this and should make every effort possible to show today’s “elegance in living” on their shows.

In the days of black-and-white television, a two-tone gray wall would look white when filmed. But now the American consumer has demanded, and will view, his favorite shows in color and the producers should set the pace with living environments that reflect the tremendous advances of our country.

Color Pioneer • For the past dozen years our stores have prominently displayed color television sets and kept every program which was broadcast in color timed in. Our advertising represented my belief that color television would be the greatest single consumer product since the marketing of television itself. We pioneered color commercials too.

Now in 1965 the age of color programming is in full swing and many advertising and television executives still do not own color sets. Many advertisers also show their products in black and white although researchers have spent millions developing packaging which will be attractive to the housewife’s eye.

In my 30 years of business we have endeavored to present the newest and best products to make life easier and to encourage others to enjoy the fruits of our national progress. We encouraged manufacturers by purchasing their newest styles and models. Latest projections for 1965 are for sales of 2.5 million color TV sets, compared to about 1.3 million last year. This is a contribution to the entire economy.

‘World’s Largest’ • At each of our dozen stores there are more models of nationally known name brands of color TV’s on display than anywhere else in the world. The networks are almost in full color and w hat the public demands the public will get. This consumer economy encourages greatness in products and should encourage greatness in marketing products too.

From the outdated comment, “we’ll wait until more shows are in color,” to the present day comment of “let’s see how this style will fit in our living room,” the change in attitude of the consumer’s acceptance of color is really sensational.

I have set up a special television industry service desk to sell color TV to advertising executives and station personnel. The account executive’s and the producer’s jobs are never finished. They must produce the commercial, have it placed on the air, and then watch it on TV as a consumer. Therefore both need color TV’s in their homes.

Our salesmen have had special color training classes since 1958 and are by far the experts in the field of TV sales. Our entire staff is color-minded and aware of the fact that this year is the color year of television.

Progress is News • Progress is the basic root of our economy and now color TV has again demonstrated that our nation can produce better products for the consumer. Thirty years ago one manufacturer produced one model of color TV. Today many nationally known manufacturers are producing a complete selection of models, styles, finishes, and a choice of tube sizes, from portables to family entertainment centers. When better products come on the market there is a responsibility to report and show them.

The people who are responsible for the set design should not be held back in borrowing from our national magazines which are several years ahead of the American public in creating demands for elegant living. Today almost everyone who is gainfully employed can afford the basic living environmental furnishings and appliances which contribute to our national growth.

For years the television producers have presented panel shows and newscasts in the same drab settings of a man behind a desk, without using the creativity which our furniture manufacturers have developed. The TV shows should be progressive in displaying the elegance of the American home on TV, and panel shows and newscasts should have frequent changes of interior design.

A selected artist of the week could have his art displayed on a newscast as part of the background. The public would get to know an artist, his style of work, and see it often enough to make up their minds if they like it. This could be done with sculptures too.

Just think, for example, of the public service a network could perform if it featured settings of modern living showing what great technical improvements are being made every day. The newspapers have new-products columns and highlight home furnishing, but very seldom do you see this on TV.

Whetting Appetites • The responsibility of the television industry to the consumer and to the economy of our country is to present entertainment plus the best of modern living. Television must awake to the importance of modern living and create the desire and demand for new ways to make family life easier and more enjoyable.

This concept is the foundation of competition and it has forced our appliance and furnishings industry to continue to produce better products. The television industry should support this concept and show elegant living at every opportunity.

Sol Polk is president of Polk Bros., Chicago retail appliance chain that now totals a dozen stores and has been a successful user of local broadcast advertising, including color commercials, since 1955. Mr. Polk has been a booster for color since the early 1950’s and he claims to sell more color sets than any other independent retail firm. Polk Bros. has been in business for three decades and has built its reputation as an aggressive merchandiser of national brand products.
A BADGE OF DISTINCTION

This badge will be worn by all contributors to the Opry Trust Fund who register at the 40th Anniversary Celebration of WSM’s Grand Ole Opry, October 21-22-23. It will identify those who give $10 for the purpose of providing loans or contributions during times of adversity to persons performing in the country music field. It must be worn to gain entrance to all scheduled events.

TV spot on the upswing again

After faltering early in month September totals are headed upward; and stations agree that final totals for the month will top 1964

The spot television business appears to have shaken off an unaccountable slowdown that puzzled sales executives earlier this month, and now seems headed back toward the peak sales levels that had been common since last spring.

This turnaround was documented last week in a Broadcasting survey of TV stations and a supplementary sampling of leading sales representation firms.

The extent of the slowdown was hard to assess, although it was clear that one had occurred and that it would keep this month's spot TV total from reaching the levels originally expected (CLOSED CIRCUIT, Sept. 20).

In some cases—among reps as well as stations—it pulled September totals below those for September a year ago. In most instances, however, the effects seemed less severe and were more apparent in comparison to the July-August and originally anticipated September sales pace than in relation to last September's results.

On the whole, almost three out of four TV stations reporting in Broadcasting's survey—and seven out of ten among the station rep firms sampled—said their September spot sales would exceed those of September 1964.

In addition, more than one station and rep out of ten said September business was on a par with last September's, while about the same proportions reported business down from September a year ago.

Better than 1964 • Many stations predicted voluntarily that their business for the full year would surpass 1964's record figures—often by as much as 10 to 20%, sometimes by 25%. Almost all of the reps queried also expected their 1965 totals to exceed 1964's.

Although there was little agreement on what caused the early September slowdown, the feeling was practically unanimous that it is over and that sales are moving again at the rapid pace originally expected for this time of year.

"Spot business is at a peak right now," said one leading rep who acknowledged his September totals this year would not match last year's. He predicted his sales for the last half of the year—and also for the full year itself—would be "slightly stronger" than in 1964.

Estimates of the onset and ending of the slowdown varied, but for the most part the beginning was put at about a week to two weeks before Labor Day and the lifting at a week to two weeks after Labor Day. A few reps, however, said they felt it more in August than September.

Many reasons—and combinations of reasons—were advanced to explain the unexpected lag. There was little general agreement and in some cases the explanations conflicted. The closest thing to agreement was on these two theories:

• Opening of the network season earlier than ever before (Sept. 12-13), and all three networks introducing their new schedules at the same time, caused a number of network advertisers to delay the start of their spot campaigns by a week or so.

• Political business was beginning to get heavy in September last year, a national election year, and the absence of political contests on a nationwide basis this year was therefore more noticeable.

Some reps disagreed, but most of those queried indicated that the slowdown was most evident in markets below the top 20 or 25 (some said the top 35-40). This seemed to be borne out by reports from reps whose markets are all in the high-ranking group; they said they'd seen no indication of any slowdown whatever.

A few reps said that stations affiliated with CBS, which took a tumble in last year's ratings, seemed to be hit more often than other stations on their lists, but this was contradicted by most firms. One representative said he found the slowdown concentrated primarily on the West Coast, but a strong majority found no regional patterns. Some contended there was no pattern at all—by market size or any other index.

This year's later-than-usual introduction of new automobile models was suggested by some representatives as a factor in the lag, but was discounted by others.

Whatever the cause, the representatives were overwhelmingly confident that, although business "lost" during the lag period would not be fully recouped in September, in all likelihood it would be made up in October, November and December. Most of them reported that October and November "already look great." It was emphasized that there have been no signs that spot budgets

Spot sales breakdown

National sales of spot television, which totaled $689,507,000 last year, were broken down for the Institute of Broadcasting Financial Management in Los Angeles (see page 54) by Edward R. Shurick, executive vice president of H-R Television as follows: close to 25% came from the network representative firms, with CBS Spot Sales billing more than the spot sales divisions of ABC and NBC combined; the five multiple-station group representatives accounted for 18% of the total; six independent reps—Blair, Petry, Katz, PGW, H-R Television and H-RP—accounted for 45%, leaving 13 other national station representative organizations (omitting the strictly regional firms) "scrambling for the remaining 13% of the spot dollars."
The thin line between publicity and advertising

When is publicity or "feature" material that is supplied to broadcast stations legitimate news and when is there a possibility it is advertising matter within the sponsor-identification and logging provisions of the FCC's rules? The question hasn't quite arrived at the split-hair point yet in the radio-TV field but it could as new innovations in ways to make publicity hay with stations continue to grow.

Corporations, organizations and public relations firms for years have been feeding news and informational materials to stations, some quite sophisticated or newsworthy like Chrysler Corp.'s television film clips or Buick's annual open golf championships. Others, like the Wine Institute and Wine Advisory Board, go the more traditional route with the beauty queen who is available for interviews during National Wine Week Oct. 23-30 plus the factsheets and feature program insert material like tips on "keeping cool about wine temperatures."

These have been the standard formats long known and accepted in the newspaper and magazine fields. From the print media's success with free syndicated column-type editorial materials supplied by major advertisers have evolved their broadcast versions.

One of the most successful of these is the Betsy Palmer Show produced by the Robert Jennings Corp., New York, with the costs underwritten by the J.C. Penny Co. which receives a credit line. A five-minute five-weekly show of fashion tips and related information, the program now is supplied free to some 300 radio stations and they can find local sponsors if they wish, sometimes the local Penny store.

Another by Jennings is the Bill Cullen Show in behalf of Grolier's Book of Knowledge, also supplied free to about 300 stations and which may be locally sponsored. Out of Chicago with still another Services Syndicate for two years came Robert St. John Reports in the same format for World Book Encyclopedia. In hiatus for several months, the series will resume next April. About 250 stations are on the list.

900-Station List • Broadcast Services Syndicate, which is affiliated in ownership with Sound Studios Inc., a commercial production firm, also assists in production and is the distributor for the American Security Council's Washington Report, the five-weekly five-minute radio series just renewed for its second year and which features Senator Thomas J. Dodd (D-Conn.) and Dr. Walter H. Judd (BROADCASTING Sept. 13). Washington Report goes free to about 900 stations and can be locally sponsored.

In the trade BSS considers the American Security Council as its "client" and the council in turn calls the Schick Stainless Steel Blade Division of the Schick Safety Razor Co. its "client," making the anti-Communist program a three-way split. Schick under a grant to the council is underwriting the program until September 1966.

General Media Associates, a sister operation to BSS and also located in ownership with Sound Studios, has come up with another innovation that hits the publicity market in buckshot fashion instead of rifle-style for a single client. General Media is soliciting clients to buy a series of one-minute to one-minute-plus feature vignettes called Accent that will be supplied to contracted stations free and which they in turn may sponsor locally if they wish.

Kickoff for Accent is due about November with one station in each of about 225 markets to be signed on an exclusive basis. GMA's sister BSS is soliciting stations to accept the material as a free news and feature service. Stations are to be apprised of the publicity buyer in each instance and must decide for themselves how they will log the show or identify its ultimate underwriter and whether to find their own local sponsor or use it in established programming.

General Solicitation • General Media wrote prospective publicity accounts several weeks ago, "This letter will introduce you to Accent, a dynamic and new way to obtain guaranteed public relations exposure on network radio at a cost of pennies per station." It continued:

"Accent is a regularly scheduled series of short features soon to appear on over 200 stations from coast to coast. Accent features... cover a wide range of interesting and topical subjects, based on materials furnished by clients of Accent. These features are written and voiced by broadcast professionals to convey public relations ideas effectively, while in harmony with the programming standards of the broadcasting industry. They will be programmed at regular intervals throughout the broadcast day, five days a week, as with NBC's Emphasis."

General Media told prospects that "Accent is the print medium's participation in Accent on radio assures exposure and is "carried by a national lineup of stations on a contractual basis, with proof of performance required as a condition for receiving the service."

General Media is to receive from $125 to $175 from the accounts for one-third said they "occasionally" do so. Fewer than one percent said they had encountered no interest. These proportions remained relatively constant regardless of market size.

In their questionnaires many stations suggested a September slowdown in business by speaking of "less activity than usual at this time of year," "slow start but should pick up," "slightly soft," "schedules being bought and started later," or "slight decline except in color areas-color is big."

These were offset by reports from other stations who said "spot business
Each program with contracts covering 13-week cycles. Per station exposure costs out to about 60 cents to 85 cents, General Media stated.

Jeff Smith, General Media vice president, explained that the program features are of a public service and institutional nature. No product or service usually advertised in the traditional manner will be accepted, he said.

One major insurance account is reported interested in the series to promote auto safety. The prospect doesn't care if its company name is completely missing, it was explained, because the show's purpose would be purely educational anyway.

is being placed earlier," "more inquiries this year," "business is up," "better than anticipated" or "very good, like through the ceiling."

Predominantly, even those who reported September business trailing last September's thought they would finish out the year with sales ahead of 1964's.

Similar patterns were found in Broadcasting's sampling of station representatives: softness in some markets earlier, a return to accustomed high sales levels already established or beginning, and expectations—in practically all cases—of full-year totals exceeding last year's.

Representative Opinion • Some typical rep views follow:

An official of one major firm said that after "extremely healthy" sales through August, spot business "fell out of bed" in September—in markets below the top 25, he said, availabilities are "sold out" and business is better than it was last September, but in markets below that level sales this month are lagging behind last September's.

He said there has been a "divided improvement." In sales for October, although not all of his stations below the top 25 markets are yet sharing fully in the upturn, and that he is bullish for October-November.

He attributed the slowdown to a "slight softening in smaller markets, not to a curtailment of spot TV budgets. Actually, he said, more money has been budgeted for spot than in the past. He expects 1965 as a whole to be "one of the best years" his firm has had, "most likely above last year."

Interest in color, he said, is "exceptional."

The president of a smaller firm, but representing only stations in the top 30 markets, saw no signs of a slowdown and said his business for September—and also for the full year—should be 8 to 10% higher than last year.

He reported a growing demand for prime-time 20-second announcements along with the usual "great demand" for one-minute availabilities, and said there is "a big push for placement of color commercials."

The head of one of the larger reps took the position that spot business "has been paced differently this year." He said there was a softening earlier this month that affected 50 to 60% of the markets, mostly the smaller ones. September for his firm will not measure up to last September, he said, but 1965 as a whole will be "slightly stronger" than 1964.

20's Popular • He also detected accelerating interest in prime-time 20-second availabilities for the fourth quarter, and reported steadily increasing interest in placement of color commercials.

The head of another leading firm reported that a softness occurred in spots in August, mainly in West Coast markets, but that the situation had righted itself and September business is well ahead of last September's. He predicted gains, averaging 10%, for all of his stations this year.

He blamed at least part of the earlier softness in spot on what he called widespread rate-cutting by networks. This, he said, caused a number of spot clients to withdraw or defer spot campaign plans.

The vice president and sales manager of one of the bigger firms found it difficult to characterize the condition of spot TV during September. There was a slowdown in some markets but brisk business in others, he said, and network affiliation, day part and market size were not consistent barometers of an up- or down-trend. He said overall business for the month probably was "slightly off" the September 1964 pace.

Business for the year as a whole, he continued, is "rather good," an estimated 12% over the comparable period of 1964. He said more and more advertisers are evincing interest in spot color TV, and that stations report more advertisers are producing and showing their commercials in color.

Another representative with stations only in the major markets, said sales have proceeded "very briskly" and not only is there no slowdown but September 1965 is "well ahead" of September 1964.

Late-night minutes, he said, are in most demand and shortest supply. He reported business in 20-second spots is "only fair," and added that it was his understanding that stations below the top 20 have "plenty of 20's available."

He said there is "a rush to color" by advertisers and in some instances the color laboratories cannot supply color prints rapidly enough. He would not pinpoint his firm's increase in sales over last year but said it was "very substantial."

A representative with stations in medium-sized markets reported that business generally is "running as we had expected." In the secondary markets that this organization represents, there are "always peaks and valleys" and this September is "no different from last year," he commented. Business generally is "good" with an estimated 5-7% jump over last year for the first nine months of 1965. There seems to be a "substantial number" of advertisers using or planning to use color TV, he reported.

An official of a large representative firm reported that although the large majority of stations on his list showed "comfortable" gains over last September, there were "some weak spots." Seven of 26 stations will show a decrease this September, and all but one are below the top 20 markets.

Overall business, he said, is "proceeding very well." He reported that sales to date are running approximately 12% ahead of last year, and said this percentage increase should be maintained.

He reported he has had only a few indications that advertisers are using color commercials but stressed that a rep often is not advised. He indicated there would be added spot color commercials from advertisers who have invested in color commercials intended originally for network use.
Full day for NAB radio code

Board discusses loud ads, personal products, limit of weekly commercial minutes

The National Association of Broadcasters radio code board last week dropped the 14-minute per hour average weekly maximum number of commercials as no longer valid or practical. But it retained its present maximums of 18 minutes of commercials in any one hour and 10 minutes in any 30-minute segment. The code board's decision will be offered as an amendment to the code and must be ratified by the NAB radio board at its January meeting.

The question of lifting the restrictions on the per-hour weekly maximum number of commercials was one of several topics considered at the code board's all-day session held in Washington last Tuesday (Sept. 21).

At the meeting the code board unanimously accepted the recommendation of a five-member subcommittee which said that in the programming and listening patterns of modern radio the 14-minute maximum was obsolete. This particular figure had been a sore spot among daytime stations which had complained that the restriction was more of a hardship on them than on fulltimers.

The code board said that lifting the restrictions would not affect fulltime standards since fewer commercials are usually aired in radio's "off hours" when there are fewer listeners.

The board also discussed loud commercials and told the code authority that it should serve as a clearing house for broadcasters who had complaints about commercials they considered to be "objectionably loud." The code would then pass the complaints on to the agencies responsible for the spots.

George Bartlett, NAB vice president for engineering, told the meeting that the long-awaited audio tests in Harrisonburg, Va., should be completed within a few weeks. The results, he said, should give an indication as to how "unbalanced audio," termed the real problem in loud commercials, can be eliminated.

Turning to the products that fall into the recently permissible-on-the-air personal product category, Howard Bell, code director, said that some of these advertisers have been asked to substantiate claims made in their commercials. Removal of the personal-product ban last June, he said, should strengthen the code since it puts those products under all the code regulations, not just those of good taste.

The code board also adopted a resolution backing the need for more funds, possibly through an across-the-board increase in subscribers' dues.

In other business, Charles M. Stone, radio code manager, reported that there were 2,288 member stations as of Sept. 1, an increase of 196 stations over a year ago. It was also noted that 730 stations in 597 markets were monitored a total of 16,188 hours from April 1 to Aug. 31 and compliance among subscribers monitored was 96.8%.

ABC Radio 3d quarter up 18% over last year

ABC Radio last week reported a quarterly billing record for the third quarter with a heavy purchase by three divisions of the Campbell Soup Co. through BBDO and Needham Harper & Steers.

For the first three quarters of 1965 the network's sales are said to be up 18% over the corresponding period last year. ABC Radio President Robert Pauley says the business outlook for the remainder of 1965 and for next year is "equally impressive."

Mr. Pauley asserted radio's acceptance as an advertising medium has improved greatly this year and that ABC's growth by percentage is "from three to five times greater than that of the industry as a whole."

The network notes 30 new accounts joined it during the first three quarters of this year, among them Armour & Co., General Mills, North American Van Lines and Sterling Drug.

Ford buys 'Monitor' news

The Ford Division of Ford Motor Co., Dearborn, Mich., will sponsor the news on the hour on NBC Radio's weekend Monitor program for 52 weeks, beginning Oct. 2. Also on that date, Ford will place a four-week spot saturation campaign on Monitor to promote its 1966 models. J. Walter Thompson Co., New York, is agency.

Monitor broadcasts 32 newscasts and 16 hours of programming each weekend. According to NBC, business for the 10 years of the program's existence totals more than $75 million, with 25% of this sum during the past two years.

Ad tax proposed again

California circulates 48,000 letters recommending that broadcast advertisers be taxed for use of the air

Broadcasters, newspapers, magazines and others last week received letters asking their views on a plan to put a state and federal tax on radio and TV advertising at the source. Written on letterheads of the Abbott Co., Concord, Calif., and signed by R. H. Mitman, the letters said that the tax plan is based on three premises: that the broadcasters are using public property (the air) to deliver their advertising matter to the public and not paying delivery costs as printed media do; that most radio and TV advertising comes from luxury items which can stand the extra cost and equalize things for the small manufacturer who "can't afford bulk time," and that "effective taxation can control some of the objectionable practices of broadcasting, such as the increased volume bit."

The letter notes that after the survey is "evaluated," each state and federal congressman and senator "would then be asked to state publicly why he would be opposed to such a tax."

Mr. Mitman writes that a part of the survey is "to determine if the right to tax the transmission stations should lie only with the federal government or the state governments or with the more generally accepted theory that both state and federal governments would have a right to levy a tax against the stations. . . . The third part is to determine how much of the proposed program should be applied directly to the user of the advertising."

15%-150% • The proposed tax schedule for broadcast advertising is based on the time utilized, and ranges from a minimum of 15% of the one-time rate for less than six minutes to a maximum of 150% for more than 10 minutes.

To discourage one "objectionable practice," the overload commercial, a second scale of taxes is proposed, based on the decibel raise in volume over the volume preceding and following the announcement. The decibel tax would range from a minimum of 10% of the one-time rate for one decibel raise in volume to a 300% tax for a volume increase of seven decibels or over.

The letter begins: "We have been asked to conduct a survey into the feasibility of taxing radio and television advertising. . . ." Without explaining who wants the survey conducted and why.

Reached by telephone, Mr. Mitman explained that the Abbott Co. is a management engineering company whose main business is making industrial environmental studies, to determine where manufacturing plants should be located to best serve the interests of the plant owners. He is project engineer and general manager of surveys. "We had some spare time," he said, "so we took on this project for a retainer fee."

Mr. Mitman declined to reveal the identity of the client who had ordered the survey, but said it was a group of property owners in 14 states who are disturbed by high real estate taxes ("California taxes are the highest in the country, you know," he commented) and are looking for other sources of taxes to relieve their situation.

Asked about the mailing, Mr. Mitman said that about 48,000 letters were going out: 2,340 to owners and managers of radio and TV stations; 1,196 to newspapers and magazines; 78 to other research organizations; 560 to financial groups, and state and municipal groups that concern themselves with the problems of taxation.

Frank and Perry-Brown ad agencies merge

The merger of Clinton E. Frank Inc., Chicago, and Perry-Brown Advertising, Cincinnati, effective Oct. 1 was announced last week by principals of both agencies. Combined billings will total about $25 million and the Cincinnati firm will become a division of Frank.

Frank also has branch or affiliated offices in New York, Los Angeles, Houston and Richmond, Va. Both agencies have been active in the broadcast media. The merger is accomplished by exchange of stock.

Officers of Perry-Brown division will be Theodore Brown, chairman; Clinton E. Frank, president; Robert B. Maehr and Hill Blackett Jr., vice presidents, Carroll L. Cheverie, treasurer.

C-P sticks with ARB local-market reports

Colgate-Palmolive Co., and all but one of its advertising agencies, will continue to get local-market television reports from the American Research Bureau.

This news is considered especially significant to ARB at this time since several Procter & Gamble agencies, in particular, have signed for A. C. Nielsen Co.'s local-market service this fall. (Broadcasting, Sept. 13)

Ted Bates & Co., the largest agency in spot television and one which handles business for Colgate-Palmolive, reportedly decided last week to take the Nielsen service instead of ARB reports. Greg Lincoln, C-P's manager of radio-TV operations, said, "we've made our bed with ARB and don't wish to

Our Honda-riding grandmothers

Broadcasters must constantly revise their approaches to programing to take account of the growing sophistication and changing interests of the American woman, Myra Janco, president of Draper Daniels Inc., Chicago, told the Dallas chapter of American Women in Radio and Television.

She said the importance of the middle-age woman is diminishing because of the spreading purchasing power, greater education and higher discretionary income reaching both younger and older age groups today. Her talk to the AWRT was Sept. 18.

"Today's grandmothers live longer," she observed, and "they are a youthful-looking group and a young-thinking group that is cosmetics-conscious, clothes-conscious and furnishings-conscious."

Teen-agers have acquired large discretionary income, Miss Janco noted, while mature women who are returning to the work force also have greater financial resources that make them much less price-conscious than their mothers were. Since the woman's world is no longer homogenous, stations must aim their programs to more special interest groups within broad groups of women than ever before, she concluded.

change our sheets."

The company's "spot pool," a unit which coordinates spot TV schedules, has relied on and will continue to rely on ARB local data, Mr. Lincoln said.

He said that Bates's decision to go with Nielsen material rather than ARB information creates a problem, but not an insoluble one.

C-P agencies which will continue to order ARB's local TV service are D'Arcy, William Esty, Lennen & Newell, Norman, Craig & Kummel and Street & Finney.

RAB clinic offers more selling tips

The techniques used to boost sales in small and large markets were outlined last week in New Orleans by speakers at the second of the 1965 Management Conferences conducted by the Radio Advertising Bureau.

RAB is continuing its format of split-market sessions for large and small market stations. RAB President Miles David reported that registrations were "still running well ahead of last year."

The remaining 1965 conferences will be held in Atlanta (Sept. 29-30); Rye, N. Y. (Oct. 4-5); Chicago (Oct. 11-12) and San Francisco (Oct. 14-15).

At the major-market session, Arthur Carlson, vice president in charge of radio for Susquehanna Broadcasting Co. (WJCE Providence, R. I.; WJLO Akron, Ohio; WSBY York and WARM Scranton, both Pennsylvania) urged station operators to establish rapport with local and regional brokers for food and other advertisers as a means of increasing sales.

An investment in good copywriters by stations was called the "biggest unrealized area" for profit by Tom Harrell, president and general manager, WSTP Salisbury, N. C. He told executives at the small-market meeting that "good commercial copy can and does take the place of a steady stream of gimmicks and sales promotions to keep the gross up."

Mr. Harrell noted that a good copywriter is always alert to advertising messages. At WSTP copywriters and salesmen maintain excellent liaison and this close cooperation benefits both, he said.

Philip Spencer, vice president and general manager of WCSS Amsterdam, N. Y., maintained that "the best way to more radio advertising dollars—especially in smaller markets—is from advertisers already on the air." If you give advertisers "a good enough idea," they will spend money to cover it, he contended.

Rep. appointments...

- KSRF(FM) Santa Monica, Calif., appoints Advertising Sales West as San Francisco sales representative, effective Oct. 1.

Business briefly...

Carling Brewing Co., through Lang, Fisher & Stashower, both Cleveland, will sponsor live TV coverage of 37 Detroit Pistons professional basketball games on WKBD (TV) (ch. 50) Detroit.

The McCulloch Corp., through McCann-Erickson, both Los Angeles, last week began a 13 week schedule on CBS Radio consisting of twice-weekly participations in 5 p.m. News and three-times-weekly participations in 'The World Tonight' at 7 p.m., while Campana Corp., Batavia, Ill., through Foote, Cone & Belding, Los Angeles, will participate in CBS Radio's 'Arthur Godfrey Time' at the rate of one 10-minute unit per week for 26 weeks, beginning tomorrow (Sept. 28). Aunt Jane's Foods Division of The Borden Co., Dearborn, Mich., through Maxon Inc., Detroit, will also participate in 'Arthur Godfrey Time' at the rate of two commercials a week for 26 weeks, beginning Oct. 6.

The Savings and Loan Foundation, Washington, through McCann-Erickson, New York, will sponsor a repeat of 'The Capitol: Chronicle of Freedom' on NBC-TV on Sunday, Oct. 17, (6:30-7:30 p.m. EDT). The color program, which traces the history of the U. S. capitol, was originally telecast Jan. 12.

Also in advertising...

Moving = Grant Advertising, Chicago, moves from Palomolive Building to 10 South Riverside Plaza, effective Dec. 1. Grant's headquarters has been in Palomolive Building for nearly 30 years.

No longer there = Tobias & Olendorf Inc., Chicago, whose principal broadcast accounts has included Certified Grocers of Illinois, is no longer in operation. Agency previously had some 40 accounts.

'Broadcasting,' September 27, 1965
Want big, happy families? Mutual's got millions!

Happy news for advertisers! Mutual's audience is one big, happy family. Mutual has a higher percentage of its audience in the heavy-spending under-30 group than any of the other networks. The same is true for the all-important under-50 group. And for large-size families, too. So Mutual can deliver newlyweds, young marrieds, young marrieds with families, growing families and large families as no other network can. And in quantity! For two months in a row, the Mutual 6:30-evening-news audience exceeded 4,000,000, making it the largest audience for any time period of any of the four networks (Sindlinger).

No wonder Mutual is so big with family-minded advertisers. We're very big with family. Another reason why the wise money's on Mutual.

N.Y. adjusts to newspaper strike

With the prolonged 1962-63 strike in mind, many retailers quickly switch to radio, some to TV; both media increase news staffs and coverage

The New York City newspaper strike continued last week, with the area's broadcasters conducting stepped-up news operations. Radio stations appeared to be enjoying a new-business bonanza, but TV stations were getting relatively little added billing.

All the city's major newspapers except the Post closed down Sept. 17 when the Newspaper Guild struck the New York Times.

Retailers, with the experience of the long New York paper blackout of 1962-63 seemed to be taking to radio with greater ease this time, and with greater sums of money.

Radio Starters - One agency observer, who handles several retail store accounts in the city, said that in the earlier strike "they sat it out and got hurt. This time they've jumped in at the start."

Running down a list of stores that had come into radio, or increased their radio spending in the past week, he named Macy's, Gimbels, Bloomingdale's, Alexander's, E. J. Korvette and Orbach's as examples. Others mentioned were Lord & Taylor, Abraham & Strauss, S. Klein and W & J Sloane.

Macy's, Lord & Taylor and Abraham & Strauss, which used radio during the strike, said they would stay in the medium and become year-round users.

One observer, explaining the traditional reluctance of retailers to stick with radio, said that "there's nothing more stereotyped than a retail merchant. They don't know how to use radio and they're set in their ways."

But he noted some thawing attitudes with the current strike.

Edward Engle, sales promotion manager of the National Retail Merchants Association, said NRMA was buckling down to a study of just how advertising plans would be realigned because it appeared the strike would be a long one.

"A lot of money will be saved rather than reallocated," he predicted, while acknowledging that radio was apt to collect substantial amounts—more than they would have without the memory and lessons of the previous strike.

Those who don't have to come in on a crash basis will get more out of it than those starting fresh, he said.

A representative of Alexander's said his Manhattan store had used radio successfully for a special promotion and would use it again occasionally should the strike drag on.

One retailer noted difficulty in assessing the usefulness of radio in New York at this point. Unseasonably hot weather there, he explained, would normally dampen retail sales of heavy apparel, which he called the "key to September business."

The following is a summary of news coverage and advertising developments at New York TV-radio stations:

WNBC-TV: Has added 9 hours and 25 minutes of local news per week to its pre-strike schedule of 11 hours and 20 minutes. Has added 24 writers from local papers and may hire five more. On Sundays from 12-1 WNBC-TV has added The New York Times of the Air, featuring reports by regular Times contributors. Station has increased availability to accommodate advertisers who do not normally use the medium. New order has come from New York Bank for Savings. Interest expressed by Stern's, Gertz and New York League of Theaters.

WNBC: Will hold to current schedule of about 25 hours of news per week but has added headlines on half-hour during day. Spokesman said WNBC has added "quite a few" retailers not normally in radio, including Orbach's, S. Klein, Stern's and Loft's Candies. New York Democratic mayoral candidate Abraham Beame, who had not planned to buy radio spots until mid-October, is now placing them on WNBC. Pattern for advertiser buys is about the same as for last strike—advertisers waited about a week to see if strike would end.
then started seeking availabilities. Station has "package deal" with some advertisers, wherein they can buy spots at a cheaper rate when there are excess availabilities, but which can be preempted by advertisers buying at standard rate card rates.

WCBS-TV: Increasing its local news coverage by 85%—from 10 hours and 15 minutes per week to 18 hours and 37 minutes. For the duration of the strike, has hired four newspaper reporters as writers and has also added some researchers and technicians. No increase in advertising by retailers was reported. Station's advertising rates are too high and area covered by station too extensive for local retailers unless they have many suburban branches, a spokesman said. WCBS-TV has "some availabilities, but not too many," he added.

Wcas: Will hold to pre-strike schedule of 42 hours of network and locally originated news per week. Some of the network news feeds, however, will be replaced during the period by local newscasts. One newspaperman was hired. Retailers moving in, including some unidentified new ones. Station reports limited availabilities, most of which are in late evening and weekend time.

WABC: Has added 25 minutes of news per day on AM and 10 minutes per day on FM. Stations may add more news should strike continue. No additional news staffers hired but will be if news is expanded. Has adopted policy of taking care of regular advertisers who wish to expand schedule first. Remainder will be on first-come, first-served basis. Station is not accepting contingency orders and is in "acute situation" with few availabilities open. Among new advertisers: Gertz department stores, movie houses and theaters.

WABC-TV: Has stepped up local news from 4 hours and 50 minutes per week to 10 hours and 25 minutes. Has added 12 reporters from New York papers for both on-the-air and writing assignments. Has also added six technicians and three extra film crews during strike. Reports advertisers, which normally do not use TV, have expressed some interest during strike. There is little time available on station, with new season promotion spots scheduled to continue at least through next week.

WPX(NY): Plans no significant increase in its news coverage. Daytime schedule is "pretty well sewed up" with long-term advertisers, and nighttime schedule is also well filled, an executive reported. Retailers are asking for availabilities but not committing themselves and are also showing interest in TV more quickly than during last strike.

WPX-FM: Plans no increase in news coverage. Advertising picture is "bright," an official said. Macy's is a new advertiser, and TWA is doubling spots, and United Artists is using additional advertising. Availabilities being requested by savings banks, food chains, film distributors and merchandisers with premium contests.

WOR: Has expanded local coverage on its hourly 15-minute newscasts. Has hired two newspaper writers. A spokesman said there has been a "sizable increase" in business but would not name new accounts.

WOR-TV: Has tentative plans for an increase of 13 minutes a day of news coverage if strike continues for any length of time. There has been some increase in advertising, an official reported.

WINS: Station, which converted to all-news format in April, will not alter programing except to treat some items "in depth" where required, an executive stated. Station has some availabilities on a "day-to-day basis." New advertisers include: Macy's, Harvey Furniture. Macy's, Gimble's, Singer Sewing Machine Centers.

WPAT (Paterson, N. J.): Plans no expansion in news coverage. News reports are provided by Herald Tribune and are not affected by strike because of a previous agreement between the paper and the newspaper guild. An official said availabilities are "pretty tight," and station does not intend to expand its commercial schedule to accommodate new advertisers.

WNBC: Is expanding news coverage slightly if strike goes on, will increase substantially. Station is a subsidiary of the New York Times and news on radio is currently being written by Times editors and department heads not under guild jurisdiction. An executive said new advertisers included Macy's, Bloomindale's, Orbach's, and motion picture houses and theaters.

WNBC: Has not expanded news coverage during strike. New clients include Macy's, Times Square stores, theater and auto dealers. Station has "very few availabilities" but situation should change when baseball season ends Oct. 3 (WHN carries Mets games). Has "no set policy" on availabilities going to old or new advertisers. Feels new advertisers are using radio "about as fast" as they did during last strike but are better prepared in that some had radio material ready before the strike began. Does not plan to take contingency advertisers.

WMCA: Has doubled its rate of news from 48 to 96 hours per week, with newscasts scheduled every 15 minutes. Does not plan to add news people; station draws heavily from Radio Press International, which it owns. An execu-

Several 'New York Times' editors, critics, correspondents and columnists read their columns prepared for their paper on Sept. 19 on 'The New York Times of the Air' scheduled by WNBC-TV New York as a regular Sunday feature at noon-1 p.m. for the duration of the newspaper shutdown in New York. Waiting in the studio: (l to r): Jack Gould, TV and radio critic; Lester Markel, Sunday editor; John B. Oakes, editor of the editorial page; Sydney Gruson, foreign correspondent, and Harrison Salisbury, assistant managing editor. Program was also fed to WRC-TV Washington.
Cox: diversify control of media in small towns too

The question of concentration of control of media is a controversial one within the FCC not only where top-50 market television stations are concerned, but at the small-town level, where daytime-only AMs and Class A FM's are involved.

Commissioner Kenneth A. Cox made this point last week in dissenting to a commission action, on a 5 to 1 vote, to grant a construction permit for Class A FM station to the Purchase Broadcasting Co., of Benton, Ky. Purchase owns the town's only AM, WCB, a daytimer, and is half-owner of one of the two local weekly newspapers.

Commissioner Cox said he favored granting authority for FM operation to persons who would provide new and different programming and not merely duplicate the AM service of a commonly owned station.

He also said he would like to see FM authorizations made to persons with no other media interests in the area.

He said that he believes the majority would also have preferred an applicant with no other media interests and that it made the grant to Purchase simply because that was the first applicant for the FM.

But that attitude, Commissioner Cox said, would lead to a growing number of small communities with two radio stations but "one broad-cast point of view." He said it would also be feasible for an AM operator to add an FM affiliate in small towns sometime before an outsider found it "good business" to build a competing FM station.

Commissioner Cox, noting that some commissioners profess concern about concentration of control only at the national level, said he finds it a matter of concern at all levels.

"The man who controls all the local mass media in a small county seat town is likely to be much more successful in influencing political, social and other developments in his little area than the largest of our multiple owners in affecting national public opinion."

tive said there have been added pur-
chases by current advertisers, and new advertiser buys from Churchill Custom Hi-Fi, S. Klein and Carlyle builders.

WNEW: Has doubled its news cover-
age, but has not added news people be-
cause a spokesman said, station has "one of the largest news operations in the city." Advertising is "booked pretty solid," with few availabilities. WNEW plans to add "no more than 10%" to its commercial schedule to accommodate new advertisers.

KAYE protests silent treatment

The FCC's practice of publicly and promptly identifying stations that face forfeitures for apparent rule violations was roundly denounced last week by a station that read of its apparent liability in the local press.

KAYE Psallum, Wash., in a telegram to the FCC, said it had not had a chance to "preserve" its reputation before the commission announced the station was apparently liable for a $1,500 fine.

The commission two weeks ago said the station had failed to file copies of certain contracts concerning time brokerages, bulk sales, management agreements and options to purchase (BROADCASTING, Sept. 20). The station was given 30 days to contest the notice or pay the fine.

But Henry Perozzo, owner of the station, who first read of the apparent liability in a UPI dispatch, dashed off a telegram to the commission on Sept. 17, asserting that "formal service of charges or notice of violations involved has not been received by licensee and immediate notification is hereby demanded."

The announcement was made public Thursday, Sept. 16, and the wire service report was published before the commission's official notification reached Puallum.

"No opportunity has been given licensee to preserve public reputation prior to news release and licensee objects to this damaging and unduly oppressive method of notification via public press," Mr. Perozzo said in his wire. "Notice is hereby given that licensee is innocent until proven guilty by jury trial as provided by Seventh Amendment United States Constitution."

The law authorizing the commission to impose forfeitures provides for a jury trial in a federal court in cases where licensees refuse to pay. In those proceedings, the government has the burden of sustaining the charges leveled by the commission.

WHN switches rating services

WHN New York has dropped the Pulse and Hooper rating services and signed for the American Research Bu-
reau's new radio service instead, station officials disclosed last week.

John C. Moler, president and general manager of the station, a member of the Storer group, said the action was "less a cancellation of specific services than a cancellation of the research concepts they represent." He said he considered the diary system employed by ARB superior to either the roster-recall interview technique used by The Pulse Inc. or the telephone coincidental method of C. E. Hooper Inc.

He said that WHN, which has used the Hooper and Pulse services for many years, reached its decision after three to four months of study.

Mr. Moler said the Pulse and Hooper services sometimes showed audience fluctuations that seemed accountable except as stemming from their survey concepts and techniques.

Points favoring ARB's service in WHN's opinion, he said, include coverage of a large outside area as well as the metropolitan area itself, greater recognition of radio as a personal medium, more cumulative audience estimates, more audience-composition detail and in general more detailed answers to many questions that agencies have regarding radio.

Mr. Moler acknowledged that Mediastat, new radio service being offered by James Seiler and other former executives of ARB, also employs the personal diary to collect information and shares many of the advantages he sees for the ARB service. But he said he considered ARB's collection of data on four media—TV, magazines and newspapers as well as radio—as an especially strong point against Mediastat's collection of data on only two (radio and TV).

He did not rule out the possibility that WHN would also subscribe to Mediastat later, however.

He also preferred the form in which ARB presents its data, citing AM-FM separation.

More flak on CATV rules

Reply comments on FCC proposal range from AMST's plea for stiffer regulation to CATV stand that only Congress can write the rules

The FCC last week received another plethora of conflicting arguments in connection with its proposal to regulate all community antenna television systems in the interest of protecting TV from the unrestricted growth of the cable systems.

The arguments were obtained in reply comments in the rulemaking to extend to nonmicrowave-fed CATV's the same rules that the commission adopted in April for microwave-fed systems (BROADCASTING, April 26).

And as in the initial round of comments, the Association of Maximum Service Telecasters stood out as the advocate of the most restrictive CATV regulation. A Washington law firm with numerous CATV clients, Smith & Pepper, disputed the contention that the commission even has authority over nonmicrowave-fed CATV's. Various broadcasters took stands somewhere between those two positions.

The prospect of CATV one day developing into pay-television systems was also cited in the reply comments—but not, as in the past, as an argument in favor of tight CATV regulation. International Telemeter Corp., which has developed a wired system of subscription television, mentioned this possibility in comments opposing proposals to bar the use of CATV's to operators of pay-television systems.

A key issue in the proceeding is the question of whether the commission, without a specific grant of authority from Congress, has jurisdiction over CATV's which don't rely on microwave service. Microwaves are under commission authority.

AMST Position. AMST stressed again last week its view that the commission not only has that authority but should use it speedily to bring all CATV's under the same regulations. The present rules require microwave-served systems to grant local stations 15-day before-and-after nonduplication protection and to carry their signals on the cable.

AMST, in again urging the commission to impose tight restrictions on all CATV's, sought to refute some of the arguments of those who say that CATV's pose no serious economic threat to television (BROADCASTING, July 26).

CBS, in a "white paper" on CATV, said that only rarely will the rise in CATV development be so rapid and so large as to cause a decline in a station's revenues. AMST said the principal defect in the CBS study is that it fails to consider the burgeoning future of CATV, both in terms of systems being built and in terms of the number of channels of service being carried. AMST bolstered its argument with a study by Economic Associates Inc.

The report of that research organization also sought to rebut the CBS contention that the steady rise in advertising revenue earned by stations would be enough to offset losses to CATV competition. The Economic Associates report noted that the National Association of Broadcasters figures indicate that the typical (median) television station had an annual revenue increase of 8.8% for the years 1960-64 but an annual increase in broadcast expenses as well of 7.9%.

Slight Loss Serious. "Let CATV come in and shave the rate of revenue increase by even two percentage points...and the results are not increasing profit but decreasing profit or increasing loss," the Economic Associates report said.

AMST also opposed as inadequate a proposal by NBC that CATV's be made subject to the law requiring broadcasters to obtain permission of an originating station before transmitting its program. NBC says the economics of the television industry, rather than the complex rules proposed by the commission, can bring the system into balance (BROADCASTING, Aug. 2).

AMST favors bringing CATV's under the retransmission law. But the association said the network's proposal would not meet the basic problem of defining CATV's role in terms of the national television goals and public policies. AMST also said the NBC proposal would place in the hands of program distributors and major metropolitan stations the power to decide whether audiences of small-market stations will be fragmented.

Smith & Pepper, which had filed comments on behalf of more than 150 CATV systems, restated the arguments of the opponents of the commission's proposal that the agency lacks authority over nonmicrowave-served CATV's short of a specific grant of authority from Congress.

Supports CBS Conclusion. The firm also found support for CBS's economic analysis in the TV broadcast financial data made available by the FCC. "The 1964 data shows fantastic profits," the firm said. "The 1964 data shows incredible profits."

The commission reported pre-tax

What's CATV's role in small communities?

A broadcaster who serves as director of programing and engineering of a Denver, Colo., television station last week suggested that community antenna systems can do a better job of serving small communities than TV stations.

James Butts, KBTV(TV) Denver, also suggested that CATV systems in small markets should do local program origination to bring public service coverage to their customers.

Mr. Butts made his remarks at a panel on CATV held at the 15th annual broadcast symposium sponsored by the group on broadcasting of the Institute of Electrical & Electronics Engineers in Washington. Also on the panel were James B. Sheridan, chief of the FCC's Broadcast Bureau; Richard K. Blackburn, WHEC-TV Rochester, N. Y.; Archer S. Taylor, Cablesystems Inc., Washington; and H. Schaffly, Teleprompter Inc., New York.

Mr. Sheridan, in answer to a question from the floor, said that the FCC has "no fixed opinion" regarding the origination of programs by CATV systems. In some cases, he said, he could see where it would be beneficial.

Various members of the panel said that work is going on to determine the feasibility of extending cable lines to rural areas.

Before the CATV panel began its deliberations, the symposium heard Rodney Chipp, consulting engineer, recommend the establishment of technical standards for CATV systems.

39
The law firm also noted that, in view of the commission's concern about the prosperity of UHF stations, the agency "should be much relieved over the situation at about 92 UHF stations as a group reported profits of $2.7 million for 1964."

ABC and Westinghouse Broadcasting Co. reaffirmed their earlier position that the commission has and should assert jurisdiction over all CATV's. But both shrank from the hard line advocated by AMST. ABC said that most of the proposed changes in the commission proposal recommended by AMST are "unnecessarily harassing to CATV operators."

Too Tough * Both ABC and Westinghouse said AMST's proposed interim rule to bar the importation of signals beyond a station's grade B contour into almost any market is too severe. They had proposed interim rules, similar to those adopted by the commission pending the outcome of the rulemaking, that would bar the importation of distant signals into major markets.

Westinghouse said the AMST proposal would prohibit CATV's from performing their historic function, that is, carry service into underserved areas. WBC also opposed a proposal to extend the length of nonduplication beyond 15 days in some cases. WBC called this proposal "unreasonable and unrealistic."

Westinghouse's parent Westinghouse Electric Corp., has CATV and microwave company subsidiaries: Clearview of Georgia Inc. and Micro-Relay Inc. Both were parties to the WBC filing.

International Telemeter Corp., which argued that the commission has no present authority over nonmicrowave-served CATV's, said existing CATV's are not technically adaptable to pay-television operations, nor do they provide a sufficiently broad economic base for pay television.

But, International added, CATV's may be used for subscription television if certain conditions are met. International said a convertible system would be one that is located in a large metropolitan area with a high density of homes and which has multiple channels and technical equipment permitting a subscription service.

International, a subsidiary of Paramount Pictures Corp., which in April completed a five-year test of a subscription system in a Toronto suburb, said there is nothing "sacrosanct about the existing system of broadcasting."

The company added that the commission's goal of a truly competitive national system of television can best be served by a "far-sighted approach," not by protecting those with interests in the existing system. International said ABC's proposal for an interim rule to prevent the establishment of "wired television so extensive as to provide the basis for a significant system of pay television" is aimed at protecting and enhancing UHF stations.

The National Association of Educational Broadcasters renewed its plea for requiring CATV's to report educational as well as commercial stations. NAEB said "uncoordinated and unplanned repetition [of programming] is a gross distortion of proper instructive techniques, geared to a fully organized school curriculum. The association also said such unregulated repetition would harm any local educational television service.

The Association for Competitive Television, in a pleading filed by its president William Putnam, sharply rebuked the commission for not acting to control CATV's.

Promise and Performance * The commission, Mr. Putnam wrote, has let itself "be confused and due processed" in the CATV proceeding. "The commission knows full well that local service is incompatible with imported amusement by CATV; the commission knows full well what it has said about local services requirements, but there appears to be a large discrepancy between the commission's promise and the commission's performance."

Mr. Putnam is president of Springfield Television Broadcasting Co., which owns WMLP (TV) Springfield, WJZB (TV) Worcester, both Massachusett; WKEF (TV) Dayton, Ohio, and WLRP (TV) Keene, N.H.; Brattleboro, Vt.; Greenfield, Mass. All are UHF stations. Mr. Putnam is also getting into CATV operations in Massachusetts.

Conflicting views of the economic implications of the commission's proceeding were expressed by Midwest Television Inc., licensee of KPMB-TV San Angelo; CHS (TV) Champaign and WMBD-TV Peoria, both Illinois; and Rogers TV Cable Inc., of Rogers, Ark.

Midwest, in the initial filing of comments, submitted the results of a survey tending to show that CATV's carrying the programs of seven Los Angeles stations were fragmenting the audience of the three San Diego VHF stations. Since then, a permittee of a UHF due to go on the air in San Diego, Lawrence Shushan, wrote the commission that he welcomed CATV as a device for transmitting his station's programs into the 15,000 homes that are hooked to the CATV cable (Broadcasting, Sept. 6).

Midwest, in its reply comments, not only referred to that letter but to one written earlier by the permittee of yet another UHF station in San Diego, Jack Gross. Mr. Gross expressed serious concern about CATV's, saying the competition they would offer could "snuff out the life of a fledgling UHF station."

The Rogers filing was submitted by Fred J. Stevenson, president of the company and former chairman of the National Community Television Association. Mr. Stevens said that an across-the-board application of the commission's carriage and nonduplication rules to all CATV's would put the smaller ones out of business. Rogers has a five-channel capacity. He asked that the commission grant favorable consideration to requests for waivers of the rules.

NCTA's view of Part II

Says if cable can't relay freely then it should originate its own shows

The National Community Television Association says that if the FCC imposes crippling restrictions on community antenna television systems now provide, it should permit them to originate programming and advertising and to engage in pay-television operations.

NCTA expressed that position in comments scheduled for filing today (Sept. 27) in Part II of the commission's notice of proposed rulemaking and inquiry concerning CATV regulation.

Part I dealt with proposals to extend to nonmicrowave-served CATV's the same nonduplication and program carriage rules the commission adopted in April for systems fed by microwaves (Broadcasting, April 26). Reply comments in that proceeding were filed last week (see page xx). Part II requests comment on a variety of questions looking to additional CATV regulations.

NCTA restated its argument that the rules already adopted, requiring microwave-served systems to grant 15-day before and after nonduplication protection to local stations, would seriously hamper CATV operations, and said the commission should seek congressional guidance, as well as legislation, before attempting to assert jurisdiction over all systems.

It added that the commission "can't have it both ways. It cannot cripple the activities of CATV with rigid requirements with respect to reception of local TV stations and expect CATV systems to continue to provide a
COLORFUL EVENINGS
SAN FRANCISCO STYLE

A "Cavalcade of Color" appears on independent KTVU this Fall. Over 12 1/2 hours per week will be programmed in color by KTVU. Scheduled for colorcasting this Fall are—prime time movies, travel adventure shows, dramatic series, weekend sports events, late movies and cartoons.

This emphasis on color programming is just one more reason why KTVU is the Nation's LEADING Independent Television Station—and your best San Francisco Buy.

variety of sources of information and entertainment."

**Program Origination** NCTA said the commission should consider permitting CATV's to originate programing and to obtain the necessary production funds from advertising sales and revenue.

It also said that stringent regulations on simple retransmission operations would stimulate CATV operators' interest in pay television. Most CATV operators now interested in pay television and most systems would have to be rebuilt to accommodate that kind of service, NCTA said. But, it added, CATV operators might turn to it "as a matter of survival."

NCTA said the commission, "if granted authority" over CATV's should allow them to experiment with pay-TV systems, as it has allowed broadcasters to experiment.

NCTA also stressed again its position that there is no evidence to support the conclusion that CATV's have an adverse economic impact on local TV. The association urged the commission to require licensees to furnish evidence of such impact.

**Competition Helpful** NCTA also suggested that competition from distant stations, either off-the-air or by CATV, might spur local stations to do more local programing. NCTA took that thought another step, suggesting that the commission require stations to prove they are providing a substantial amount of local live programing before considering their complaint about CATV competition.

NCTA opposed proposals for barring "leapfrogging," that is, the practice of some CATV's of picking up the signals of distant stations and ignoring those of closer stations carrying the same programs. NCTA said a variety of factors, including the stations' relative signal strength, go into a CATV's choice of signals. Then NCTA added, tongue-in-cheek, the term leapfrogging apparently reflects the hope of those who want to ban them that CATV's "croak."

NCTA said the only gainer from an anti-leapfrogging rule would be the networks. It said they might feel such a ban would make less likely the development of fourth and fifth TV networks, which could be hooked together by CATV's.

**Technical Rules** NCTA said it doesn't believe rules setting standards for CATV reception are necessary. But in the event the commission adopts them it submitted guidelines for evaluating degradation of television signals within a CATV system. They were drafted by a special NCTA committee. NCTA expressed the belief that most complaints alleging degradation of signals by CATV's were filed by broadcasters to "harass" the cable systems.

In response to other questions in the notice of inquiry, NCTA said:

- CATV's carry the signals "of many" FM stations but "few" AM's. NCTA said it has no statistics on CATV's carrying radio, but its experience has been that radio broadcasters have expressed appreciation at being carried on the cable.

- If the FCC has the authority to regulate CATV's, it should require them to file data on ownership, control, management, subscribers served and channels carried, as well as information on economic impact on television. The commission, NCTA said, might then find that the CATV operators' position has been correct, and that the regulations do nothing for television but do "cripple" CATV service.

In another early filing, Triangle Publications Inc., one of a growing number of broadcast licensees with interests in CATV operations, urged the commission to hold an evidentiary hearing on the issues in the proposed rulemaking and notice of inquiry.

Triangle said the underlying facts have become "obscured in a miasma of contradictory and inconsistent assertions of fact and recommended policies." It said the commission can resolve the conflicting contentions only if it secures oral testimony, under oath and subject to further cross examination.

Triangle bolstered its arguments with tables containing representative statements made in various congressional and commission proceedings indicating the conflicts involved. Triangle said, in addition, that a number of uncontested and untested assertions have been made which should be tested in a hearing by the FCC.

**AMST Filing Due** Among those broadcasters and broadcast groups scheduled to file today, the Association of Maximum Service Telecasters, based on its past pleadings, is expected to submit comments most at odds with those of the NCTA.

AMST has recommended that CATV's be prohibited from originating programs and advertising, and from engaging in pay television. It also opposes leapfrogging and favors limits on the distance a station's signal can be carried by a CATV, with either the station's Grade B contour or a mileage factor, say 80 miles, being used as the limit.

AMST also favors rules barring CATV's from altering or deleting the programing it transmits, requiring the cable companies to file reports on ownership and management with the commission, and setting technical standards to assure high quality of service to subscribers.

**Illinois Bell proposes CATV rates for Chicago**

The Illinois Bell Telephone Co. has filed rates with the Illinois Commerce Commission for a new service offering transmission channels to community antenna television systems within the greater Chicago area similar to CATV transmission service offered elsewhere in the state.

Illinois Bell's proposal is to take effect Oct. 1 and covers an area ranging to about 30 miles from Chicago's loop. Feeder and distribution cable is to be available to any CATV system desiring to serve Chicago at a quarter-mile rate of 50c per month within the city itself and $1.650 per quarter-mile a month for service outside Chicago.

The $1.650 rate is the same that Illinois Bell will charge CATV operators for transmission service elsewhere in the state and is the rate it also proposes to charge in Porter and Lake counties of Indiana.

Illinois Bell emphasized that it does not intend to become an operator of CATV systems itself but is offering the transmission facilities to any CATV operator desiring them. The phone company has opposed the plan of the Central Illinois Electric and Gas Co. to invest in a proposed CATV system at Rockford, Ill., contending the phone company is better qualified to render the transmission services on a common carrier basis than the power firm.

Illinois Bell already has a number of pole attachment agreements with CATV systems throughout the state and will continue to make such agreements but ordinarily only one within any given community. Under the arrangements the CATV system installs its own distribution facilities on phone company poles.

**Rates for Conn. CATV explained at hearing**

Connecticut Television Inc., which owns and operates WHNB-TV Hartford-New Britain, completed the cross-examination phase of its community antenna TV hearing before the Connecticut Public Utilities Commission last Monday (Sept. 20).

William Relyea of Entron Corp., on loan to Connecticut TV as a consultant, testified that if the company is granted a certificate to operate CATV in 26 Connecticut communities, it will charge varying rates for different towns, depending on how much investment is required to bring signals into the town.

Pointing out that some communities will require microwave installations, he
Don’t buy KATV just because our new tower is the second tallest structure in the world.

Instead, buy KATV because our new 2,000 foot tower practically doubles our coverage area.
This means 301,000 TV homes in the growing $1.8 billion Arkansas market.
This means 74% of the total population of Arkansas.
This means 67% unduplicated network coverage.
This means outstanding ABC programming.
And this means more power to you for your money.
So keep your eye on KATV.
Most of Arkansas already is.
quoted typical proposed rates as follows: Greater Hartford, $4 a month; Manchester, Torrington, Waterbury, $4.25 a month; and Willimantic, Norwich, New London, $4.50 a month. He said the projected rates were the result of individual profit and loss statements compiled for each community.

Under cross-examination by Hugh M. Joseloff, counsel for Grossco Inc., Mr. Relyea said he was not aware that the firm's equity capital was to be increased from $1.5 million to $5 million. But Connecticut TV attorney W. Robert Hartigan stated that a revised financial statement would be filed with the utilities commission to reflect this increase.

Mr. Relyea also echoed testimony from Connecticut TV's vice president Elmer Balaban who last week said Connecticut TV preferred to construct and maintain its own CATV system rather than contract with the Southern New England Telephone Co. for the job.

N.J. PUC studies CATV jurisdiction

New Jersey's Public Utilities Commission is studying the question of whether it has jurisdiction in Bell Telephone's application to enter community antenna TV as a leaser of cable systems.

The question was raised by the New Jersey CATV Association at a short-lived resumption of public hearings on Bell's application for permission to establish rates and conditions for leasing cables to CATV firms. (Broadcasting, July 5 et seq.)

It is the position of the New Jersey association that what Bell wants to do is not the function of a telephone utility and, therefore, PUC has no jurisdiction in the matter.

State Senator Sido L. Ridolfi, Trenton Democrat, introduced a bill earlier this year to put CATV firms under PUC control, but it remains in committee.

E. Stratford Smith, Washington attorney representing the National Community Television Association, hinted at the Sept. 15 hearing that there would be a court fight if such a law is passed because it would "make a public utility out of a private business."

Attorney Harold H. Fisher, representing the state association, said PUC approval of the application might "place the CATV operators at the mercy of Bell Telephone."

Bell attorney Michael O'Neil said the firm has said it won't squeeze out the small operator.

Discussions begin on 1966 NAB convention

Plans for the National Association of Broadcasters, 1966 convention will be discussed Tuesday (Sept. 28) when the NAB convention committee meets at the Conrad Hilton hotel in Chicago, site of next year's March 27-30 conference.

Although the committee is expected to take a look at the needs for the 1967, 1968 and 1969 conventions—as a constantly increasing number of registrants and exhibitors has shown hotel facilities in the convention cities are already being severely taxed—its immediate objectives will be to decide if NAB should again hold a banquet, and the possibility of adjusting the agenda.

NAB, which had sponsored a closing-night banquet, gave up the tradition at the 1964 Chicago convention. In its place the association held a Wednesday evening cocktail party. The banquet was taken over by the Broadcast Pioneers.

A proposal that the concurrent radio and television sessions be switched from Wednesday morning to Monday afternoon will also be discussed. Although one-hour concurrent sessions were held Monday afternoon at the 1965 convention, the main portion of that day was devoted to joint assemblies and a luncheon. The proposal is said to be designed to give delegates interested in both radio and television sessions, the time to attend as many as they can, without stretching the convention into extra days.

Changing hands

ANNOUNCED • The following station sales were reported last week subject to FCC approval.

• KELP-AM-TV El Paso, Tex.: Sold by Joseph Harris and Norman Alexander, to John B. Walton Jr. Although the price was not disclosed, it is reported to be in the neighborhood of $2 million. Mr. Walton heads the John Walton Stations: KFIF, Tucson, Ariz.; KVOD Albuquerque, N. M.; KTVI-FM-TV Amarillo, and KVKM-AM-TV Monahans, both Texas. Gene Roth, general manager of the stations, will continue in that position. KELP operates on 920 kc with 1 kw day and 500 w night. KELP-TV operates on channel 13 with 209 kw visual, and 115 kw aural.

• WANE Fort Wayne, Ind.: Sold by Corinthian Stations to Shepard Broadcasting Corp., for $250,000. Principals of Shepard Broadcasting are John J. Shepard, president; Charles A. Sprague, treasurer, and Dan J. Duffy, secretary. The firm operates WLAV Grand Rapids, Mich. Mr. Sprague is one of three

"Let's get a Blackburn appraisal"  

What's it really worth? Blackburn's answer will depend on accurate market surveys and analyses, potential and projected as well as actual earnings, knowledge of the ever-changing market. What are the services of Blackburn, the reliable broker, really worth to you?
Partners who originally put WANE on the air in 1948. Corinthian retains ownership of WANE-TV Fort Wayne. WANE operates on 1450 kc with 1 kw day and 250 w night.

* WKMK Blountstown, Fla.: Sold by Apalachiola Broadcasting Co., Joe F. Durham, president, to Robert L. Maupin, for $45,000. Mr. Maupin is program director and chief engineer at WDMG Douglas, Ga. WKMK operates daytime on 1370 kc with 500 w. Broker: Chapman Co., Atlanta.

APPROVED * The following transfer of station interests was approved by the FCC last week (For other commission activities see For The Record, page 79).

* WMMB-AM-FM Melbourne, Fla.: Sold by Indian River Radio Inc., to Lee Rutwitch and Gordon Sherman of Broadcast Enterprises Inc., for $268,750. Broadcast Enterprises holds interests in WROD Daytona Beach, Fla. Mr. Sherman is the owner of WHY Orlando, Fla. WMMB operates on 1240 kc with 1 kw day and 250 w night. WMMB-FM operates on 102.3 mc with 3 kw.

New TV stations

As of Sept. 22 there were 127 television construction permits outstanding for stations not yet on the air. Of these 19 were commercial VHF's, 76 were commercial UHF's, 8 were educational VHF's and 24 permittees were educational UHF's.

News received from holders of CP's includes:

San Diego (ch. 29), San Diego Telecasters, permittee, will begin operation of the color-oriented station in late October. Station offices are at 8339 Engineer Rd., San Diego. President and general manager is Lawrence Shushan; Jim Bentley is station manager.

Concord, Calif. (ch. 42), Jerry Bassett Inc., permittee, has been assigned call letters, KCFT-TV, for the UHF outlet scheduled to begin operations Nov. 1. Programming for the station will originate at temporary studios at the transmitter site pending completion of the main studio construction. KCFT-TV will operate with 269 kw visual and 51.7 kw aural, with aid of translator, Contra Costa and Solano counties in California.

Straus plans new construction at WALL

The Straus Broadcasting Group next year plans to construct a $150,000 broadcast operations center for its WALL Middletown, N. Y., according to James M. Patt, the station's vice president and general manager.

On one level, the 77 by 50 foot building will contain both executive offices and studios for WALL-AM-FM, with an underground parking area. R. Peter Straus, president of the Straus Broadcasting Group, cited the plan as having originated "from our wholehearted belief in that area's continued growth and business development."

Straus holdings also include WMCA New York, and Radio Press International. Two other stations, WPGA Geneva, N. Y., and WTLR Rome-Utica, N. Y., have been acquired, subject to FCC approval (Broadcasting, Sept. 13).

Humphrey at Murrow Center

The Edward R. Murrow Center of Public Diplomacy, Tufts University, Boston, will have as its first lecturer, Vice President Hubert H. Humphrey. The vice president, Leonard H. Marks, director of U. S. Information Agency, and other guests will be on hand for the opening of the center Oct. 18. As part of Tufts' Fletcher School of Law and Diplomacy, the Murrow Center will be host to the 1965-66 Bernay's Foundation lectures which bring public opinion experts to discuss international affairs.

Futuristic studio planned for WFLD (TV)

Field Communications Corp.'s WFLD (TV) Chicago will be constructed as an integral part of the city's new Marina City complex.

WFLD's studio building will be of a futuristic design and will be situated between the two 60-story circular apartment towers and the 16-story rectangular office building. The Marina City complex covers 3.1 acres on the Chicago River. The studio building under lease to WFLD, will cost about $2 million.

WFLD will operate on channel 32 and is now under construction. The studio will be completed about this time next year but WFLD will go on the air sooner. The antenna of the station will share the top of the west apartment tower of Marina City with the channel 7 antenna of WKBA (TV) Chicago which already is functioning there.

Bertrand Goldberg, architect and engineer who designed the building that will house WFLD, described it as a catri- nary structure sweeping from a height of 110 feet at one end down to the 45-foot high entrance at the other. It will be hung with steel cables and sheathed in lead.
Another storm in Betsy's wake

Call for more modern weather bureau equipment made by broadcasters, bureau hits 'bureaucracy'

Hurricane Betsy, which earlier this month plowed her way through the Louisiana delta country, left more in her wake than loss of lives and property. Betsy left broadcasters and the weather bureau with an awareness that something has to be done to prevent future natural disasters from being felt as severely.

In what was termed a "mild" request by one broadcaster, the Louisiana Association of Broadcasters at its meeting in New Orleans last week, adopted a resolution calling on the U. S. Weather Bureau to install modern equipment so that more rapid and comprehensive reports of weather disturbances and major storms might be available for broadcast and for the warning of the general public.

John Vath, WSMR New Orleans and outgoing president of the LAB, said the resolution would be implemented by a committee which would seek to meet with weather bureau officials and to "call for an entirely new method for reporting." He said current weather bureau practices report the location of the "eye" of a hurricane, but fail to really spell out when the initial winds of a storm will strike. In Betsy's case, he said, the winds hit the city three hours before the eye.

In Washington, weather bureau spokesmen said Dr. George Cressman, director of National Meteorological Service, would welcome a meeting with broadcasters or any other civic group to hear complaints, to hear of the bureau's deficiencies and suggestions for improvement, and to hear ways to speed the reports to the public in the future.

Although some broadcasters had complained over the weather bureau's loss of communications shortly after Betsy hit, the bureau said it had kept its local surviving telephone line open to the National Hurricane Center in Miami throughout the night so that advisors could be moved on Teletype from the Miami office.

The weather bureau said the New Orleans office had up-to-the-minute reports that were available to broadcasters but "could never be used because of the power failure, the failure of the New Orleans city government to cooperate fully in establishing rapport" between the sources of information and emergency and public service agencies, and because of "the bureaucracy, itself, which turned down requests for additional auxiliary power supply because of the 'adequate' power supply of the three main trunk lines" serving the New Orleans office. A bureau spokesman said the General Services Administration repeatedly had turned down requests to update communications equipment in New Orleans.

Betsy damages WAEZ (FM)

WAEZ(FM) Miami Beach, reported $15,000 in damage to its stereo equipment and studio files as the result of Hurricane Betsy. And, according to WAEZ, the loss is not covered by insurance, since technically it resulted from "seepage." Studios are in the lower lobby of the Deauville hotel which became flooded by five feet of water. The 16th floor transmitter and the tower and antenna on the roof were undamaged although the downstairs flooding put the station off the air for 29 hours.

Media reports...

Milwaukee listings • More than 98% of the homes in the 11-county retail trading area of Milwaukee have radios and 64% have three or more radios, a new study by WTMU Milwaukee reports. Nearly 81% of the autos in the area have radios and 71% of the homes have portable radios used chiefly outside the home, the survey shows. Survey was conducted by Frank N. Magid Associates.

New Chicago daytimer • A new suburban Chicago radio station, WCLR Crystal Lake, Ill., assigned 500 w daytime directional on 850 kc, goes on the air Oct. 3 with "good music and news" format. Principal owners are George L. DeBeer, vice president of Foote, Cone & Belding, Chicago; Arthur Thorson, formerly with WBBM Chicago, and Lynn W. Renne, local real estate man. Mr. DeBeer is president of WCLR, Mr. Thorson vice president and Mr. Renne general manager. Address: 145 Virginia Street. Phone: (312) 459-7000.

Donation received • WTHS-TV Miami noncommercial station, received a check for $1,300 from Food Fair Stores Inc. It was presented to the station, which relies on donations and subscriptions as a major part of its budget, by Ronald L. Fine, chairman of civic affairs for the Southern division of the supermarket chain.

Betsy fund

Broadcasters around the nation are being asked to support the Betsy Fund, a "person-to-person" campaign designed with the admittedly "ambitious aim" of raising $50 million to aid southern Louisiana victims of the September hurricane.

John Vath, general manager of WSMR New Orleans, said the fund, which began with his station, has been publicly endorsed by the governor and had been declared deductible by the Internal Revenue Service. The Louisiana Association of Broadcasters endorsed the fund at its meeting last week in New Orleans.

Mr. Vath noted that flood insurance "can't be bought" in the southern part of the state and that the only money available to the thousands whose possessions were lost is available at 3% interest. But many of these people, he said, can't even meet their first mortgage payments.

However, he said, the fund had run afoul of the Red Cross and United Fund, both of which have stated in the newspapers that there are no additional funds being collected.

Contributions may be sent to Betsy Fund, New Orleans. No ZIP code is needed.

A CBS Owned radio station • Represented nationally by CBS Radio Spot Sales
While one week doesn't make a season, the NBC Television Network is extremely pleased by viewer response to the premieres of our 1965-66 schedule.

In terms of audience-size, NBC Television's over-all programming won more nights of the week than any other network.*

NBC Television placed as many programs in the top 15 of the season's new shows as the other two networks combined.**

As we've suggested, this is just the beginning of what promises to be a most eventful season. But this initial response is highly gratifying; and we trust that the strength of our new schedule will become even more evident as the weeks go by.

It's a strength that issues from several sources:

Never before has NBC Television presented so many of its programs (all but two of our prime-time shows) in color.

Never before has NBC Television added so many new shows to so solid a core of established favorites.

Never before has NBC Television presented a schedule of such diversity and balance.

We think these are pretty impressive advances. It's nice to realize that the public thinks so, too.

CATV coverage called unfair

FCC DEFINES LIMITS OF BROADCASTER’S DISCRETION

The FCC last week came down on the side of the Pennsylvania Community Antenna Television Association Inc. in complaints it brought against two of three television stations it said were unfair in programs dealing with CATV.

In the process, the commission indicated the limits of the discretion it would allow broadcasters in rejecting spokesmen seeking to air conflicting views on controversial subjects. It also made clear that not all pungently expressed views about a group necessarily constitute a personal attack under the fairness doctrine.

The commission, in letters to WREB-TV Wilkes-Barre-Scranton and WNEP-TV Scranton-Wilkes-Barre, both Pennsylvania, said they had violated the fairness doctrine in their coverage of the CATV issue. Both stations were given 15 days to state the steps they would take to insure compliance.

The commission denied the relief requested in the complaint against the third station, WDAU-TV Scranton-Wilkes-Barre. In a letter to the Pennsylvania CATV association, the commission said the station had met its fairness doctrine obligations.

The commission said all three had a particular responsibility to be fair since they have a personal stake in CATV. The three have formed an organization called Total Television Cable Inc. to apply for CATV franchises in Scranton, Wilkes-Barre, and other communities in Lackawanna and Luzerne counties, in Pennsylvania.

Issues • At issue in each of the cases was a program entitled Facts About the CATV Crisis the stations carried on different days in January. The association said the program contained statements that constituted a personal attack on CATV operators as a group and that held the CATV industry up to ridicule.

WNEP-TV and WDAU-TV also were said to have carried other programs that presented one-sided views of the CATV issue. The association said none of the stations afforded time for the airing of conflicting views. It had asked all three for time to reply.

WREB-TV, in its reply to the association’s complaint, had said it complied with the fairness doctrine by offering time for reply to the major applicants for CATV franchises in the Scranton-Wilkes-Barre area. It said that the offers didn’t result in the airing of conflicting views because of the refusal of two of the applicants to appear.

WNEP-TV said it had rejected the Pennsylvania CATV association’s request for time because it is located in Meadville, Pa., “hundreds of miles from Scranton-Wilkes-Barre . . .”

The commission, however, said both stations were unreasonable in rejecting the association’s request for time, and not only because it has CATV members in the Scranton-Wilkes-Barre area.

The association, the commission wrote WREB-TV, “apparently holds conflicting views on many, if not all,” of the issues raised in Facts About the CATV Crisis.

“While you have considerable discretion in the choice of an appropriate spokesman, we cannot find that you have acted reasonably in rejecting the association’s request for time.”

Association Could Reply • “There is no showing,” the commission wrote WREB-TV, “that the state association . . . could not have informed your public” on the views differing from those carried in the station’s programs on CATV.

In declaring that WDAU-TV had met its fairness-doctrine obligations, the commission noted that the station had carried a statement by an applicant for a CATV franchise, had carried a 15-minute daily program on the CATV issue on which letters containing contrasting views were read, and had offered to air the state association’s comments.

The personal attack complaint was based on a panelist’s statement in the Facts About the CATV Crisis program that CATV could be a springboard for pay television and said that, unless regulated, CATV could be used to supply off-track betting parlors with horse-race information.

The commission said the personal attack principle is applicable where statements are broadcast, in connection with controversial matters of public importance, that attack an individual’s or group’s integrity or character. The statement in question, the commission said, merely “sets forth arguments for regulation of CATV in order to prevent possible future abuses.”

The state association had also claimed the CATV operators were the victim of a personal attack as the result of a WDAU-TV interview with a UHF antenna manufacturer, who referred to cable television as “a scavenger, a parasite, where they get the programing for nothing and sell it to the people.”

The commission said the statement expressed, “in somewhat colorful terms, a position frequently taken against the CATV operator.

“The statement of a particular view, however strongly or forcefully made, does not necessarily result in a personal attack,” the commission said. “The gravamen of such an attack is . . . an assault on honesty, integrity, or character.”

FBI moves in on KNX tower case

The Federal Bureau of Investigation is investigating the vandalism that toppled the transmitting tower of KNX Los Angeles on Sept. 15 (BROADCASTING, Sept. 20). There had been some question of FBI jurisdiction, but because KNX is one of the stations making up the Emergency Broadcasting System that replaced Conelrad as a means of providing information and instructions to the public in time of national emergency, it was ruled the vandalism legally constituted interference with a government communications system and was therefore considered to be a proper area of investigation for the FBI.

Translators split on low-power TV's

Manufacturers and operators of translator systems expressed concern last week over the implications for translator operations in the FCC's proposal to establish a new class of low-power community television stations.

However, some translator operators' interest in applying for such stations was also evident in the comments filed with the commission in the rulemaking proceeding.

The Association of Maximum Service Telecasters suggested last week that the commission consider the proposal in connection with an overall review of supplementary TV services.

Comments of other broadcast industry representatives, including the National Association of Broadcasters, which favors the proposal, were received two months ago, before the deadline for filing was postponed (Broadcasting, July 26).

Under the proposal, channels 70 through 83 would be reserved for stations operating with a maximum of 10 kw and a maximum antenna height of 300 feet. Channels for the low-power stations would not be reassigned; rather, they would be allocated on the basis of demand. But no assignments would be made within 25 miles of a city with a full-power TV station, and only one commercial and one educational low-power station would be authorized for a community.

Protection Asked * K & M Electronics Co., which owns and operates television translator stations, and which installs and maintains such operations on a contract basis, said the commission should amend the proposal to prevent the low-power stations from being used as devices to run translators off the air.

K & M expressed concern about broadcast licenses of full-power stations and community antenna television systems. It said broadcasters might use the low-power stations only as satellites and that CATV's might use them as repeaters or might program them only for the minimum number of hours required.

Accordingly, K & M asked the commission to prohibit satellite or quasi-translator operations on the low-power stations. It also asked that CATV operators be barred from owning the stations—a proposal likely to draw the opposition of CATV operators who have expressed interest in the low-power station rulemaking.

Electronics, Missiles and Communications Inc., which manufactures translators and installs translator systems, also expressed concern about the use that CATV's could make of the low-power stations. The firm said CATV's could force translators off the air by simply applying for channels on which translators are operating.

Station in Their Future * However, EMC and the Oregon Association of Translator Corporations, saw a future in the low-power stations for translator operators. EMC said the commission should permit part-time use of the stations as translators. It said the advantage for the public is that translators, rather than community stations, could be expected to bring in network programs.

M. H. Thomas, business manager of the Oregon translator association, said nonprofit groups operating translators should be permitted to operate low-power stations as a means to support the translator operation.

AMST said that instead of attempting to deal with the matter of supplemental TV services piecemeal, FCC should consider them on an overall and coordinated basis. This study would include translator and CATV matters, AMST said.

However, if the commission decides to proceed with the low-power proposal, AMST said it should make two changes: Establish a table of assignments, which would enable the commission to know in advance those assignments which would have the least impact on other possible allocations in other communities; and lift the limit of one commercial and one educational station per community. AMST said the proposed limit might unduly restrict the service that could otherwise be given a community.

Deadline for comments in the proceeding was extended last week to Nov. 1. The National Association of Educational Broadcasters, which requested the extension, said it wants the corrected UHF table the commission intends to issue before commenting on the community-station proposal. The commission two weeks ago disclosed that an error in computer programming used to draft the table had been uncovered (Broadcasting, Sept. 27).

BMI condition tagged to FM station grant

The FCC is attaching conditions to authorizations it is granting licensees who are defendants along with Broadcast Music Inc. in a civil antitrust suit brought by the Justice Department.

The commission last week granted American Broadcasting Stations Inc. a construction permit for a new Class C FM station in Fort Dodge, Iowa, "without prejudice to such further action as the commission may deem appropriate" as a result of the pending suit.

American Broadcasting Stations hold 325 shares in BMI and is one of some 40 parties named in the suit along with the broadcasting-owned music licensing firm. The condition is the same as one the commission's Review Board attached to a CP for a television station on channel 10 in Duluth, Minn., to a company in which American Broadcasting has an interest (Broadcasting, Aug. 30).

Court hears appeal on CATV ruling

The imposition of conditions on common carrier microwave relay systems feeding broadcast television programs to community antenna TV systems was challenged last week in argument in the U. S. Court of Appeals for the District of Columbia.

Appealing from last year's FCC action granting a license, but with the customary requirements on 15-day protection to Twin Falls, Idaho, TV stations as well as local carriage, were Idaho Microwave Inc., the relay system, and Cable View of Burley, Idaho, the CATV system.

Idaho Microwave has been relaying Salt Lake City TV programs to CATV systems in Twin Falls and Jerome, Idaho, since 1958. Last year it asked for permission to also feed a Burley, Idaho, CATV. The commission granted this request in 1963 without conditions, but when it granted the license in 1964 it imposed the challenged conditions.

In the argument last week, John P. Cole Jr., attorney for the microwave system and the CATV, argued that the commission's action violated the "no censorship" provisions of the Communications Act, that the FCC has no jurisdiction over Idaho Microwave or Cable View because they both were intrastate-only activities, and that the commission has no jurisdiction over CATV systems.

Robert Hadl, FCC counsel, and William J. Potts Jr., attorney for KLIX-TV Twin Falls, Idaho, contended that the censorship issue was settled in the 1963 Carter Mountain case, and that since Idaho Microwave uses television signals the commission has jurisdiction.

In the Carter Mountain case, the appeals court upheld the FCC's right to impose conditions on microwave relay systems feeding TV to CATV. This decision was upheld by the U. S. Supreme Court later that year.

The court hearing the argument last week was composed of Circuit Judges Carl McGowan, Wilbur K. Miller and Edward A. Tamm.

Hear about use of computers by stations and reps, request for standardized billing invoices, latest developments in broadcast taxation

Computers, advertising agency relations and taxes were the principal topics on the agenda of the annual conference of the Institute of Broadcasting Financial Management, held last week in Los Angeles. About half of its 268 members (a gain of 60 in the past year) were in attendance for the three-day meeting (Sept. 21-23). The organization's membership is made up of the treasurer's, controllers and accountants who handle the financial affairs of many of the nation's radio and TV stations.

Henry C. Rogers, business manager of WWJ-AM-FM-TV Detroit, president of IBFM during the last year, was elected chairman of the board for 1965-66. He successors Richard S. Stakes, assistant treasurer and controller of WMAL-AM-FM-TV Washington, John C. Herklots, auditor and controller, WGN-AM-TV Chicago, is the new president. Leonard Bridge, business manager, WOOD-AM-FM-TV Grand Rapids, Mich., is vice president and Richard P. Guerin, controller, WSBA-AM-FM-TV York, Pa., is secretary-treasurer.

Three years ago, H-R Television decided to add an electronic data processing system to the business of station representation as the best solution to "the paperwork jungle," Edward P. Shurick, executive vice president, told the meeting. Since then, he reported, "over 60 programs have been written and tested for the H-R system to prepare proper availabilities for the salesman on request. Carefully programed into the system are all data necessary for the preparation of availabilities—rates, ratings, total homes, demographic data, cost-per-thousand, product conflict, etc."

The question is frequently asked, Mr. Shurick said, if a central bureau for all representatives wouldn't be more efficient and he answered that it might be in the area of contracts and billing. "But in the realm of station availabilities," he noted, "one cannot help but fall over the competitive complexities of the sales arena. . . . When the time has come for such centralization, quite possibly there will be no need for individual representatives or for individual buying sections of agencies themselves."

The role of data processing in station operation was discussed by Gardner Sullivan of International Business Machines, Los Angeles, at the opening session of the conference on Tuesday morning. Data processing is not an end in itself, he said, but only a means to an end, a tool that can contribute to profitable station operation. Using the practices of Los Angeles area stations as examples, Mr. Sullivan showed how KRLA Pasadena punch cards produce a log that shows the commercials in red, a practice said to inspire the station's personalities to put extra verve into the delivery of these spots; how KLAC Los Angeles gets its punch cards not only log and billing data but also a list of availabilities, future as well as current. At KJL-TV Los Angeles, he said, one pass of the cards through the machine will show the accounts receivable picture for 30, 60, 90 and 120 days.

At KTV-AM Los Angeles, punch cards control automatic switching of video and audio sources and also the special effect codes, in addition to recording the station's log and providing a source for billing.

An urgent request for a standardized invoice form for broadcast billing was presented by Hayes Bowers, secretary, treasurer and administrative vice president of Hixon & Jorgensen, Los Angeles. "Hardly any two radio or TV station invoices look alike," he commented, "and 20 to 25% of the ones we receive go back each month. Why? Because they don't show the time the commercial was broadcast, the product advertised. Makegoods are not shown. Networks don't identify the stations. Sometimes we have to dig hard to find out whether the bill is from a radio or a TV station. And why do you mix programs and spots?"

Reporting on a questionnaire to stations about billing practices and problems, Juliana Royal, business manager KCOL-TV Los Angeles, said that station business departments reported their major problems come from makegoods, co-op business, agency demands for product identification, film and transcription numbers and from salesmen and reps who give them too little information too late for it to be of much help.

The responses also revealed no standard practice on billing of makegoods. Some stations bill for the makegoods as they occur. Still others use whichever method the advertiser or agency prefers.

At a session on current developments in broadcast taxation, Laine Whipple, secretary-treasurer, KSL-AM-FM-TV Salt Lake City, reported on a meeting of an
1BFM committee with a group from the Internal Revenue Service. At the meeting the broadcasters pointed out that the IRS ruling that films broadcast by a station must be amortized on a straight line basis, divided equally for the length of the station contract, is out of line with facts of life of TV station operation, where each subsequent broadcast of a film is of less value than the one preceding it. The group is still waiting for word from IRS, Mr. Whipple reported, but he said he is optimistic about the outcome.

Robert W. Gelles, assistant treasurer of Capital Cities Broadcasting Corp., commented on the growing inclination of state and local taxing agencies to look at radio and TV stations as a possible source of revenue. He urged broadcasters to get together at the first threat of such move in their area to plan their defense. Mr. Stratford noted that not only their own states but neighboring states where their signal is heard present tax threats to broadcasters.

The third week every month, KCP (tv) Los Angeles compiles a complete analysis of its programs and commercials, posting the results on a one-page form that lists the hours of each of nine program categories, the percentage of total air time each one receives and the percentage proposed by the station management when it applied for its current license. The form also shows the percentage of commercial and sustaining programing during daytime and evening hours, with a similar breakdown for announcements, and again the actual number is compared with the proposed number.

The form is a "safeguard," according to John Hopkins, president of Chris Craft Industries Broadcast Division. (Chris Craft is licensee of KCP; KPTV (tv) Portland, Ore., and WTCN-Tv Minneapolis, and the form is in use at all three stations.) Distributed to all department heads (and to the company's Washington attorney, "who lets us know immediately if we're out of line in any way"), the form "gives us a continuing check on what we're doing," Mr. Hopkins said.

Mr. Hopkins told the IBFM conference about his monthly analysis at a session on FCC license renewals, at which Robert Rawson, chief of the FCC's renewal and transfer division, discussed the new AM-FM report forms. In reality, he said, the new forms are much like the old ones, with changes "that will make life easier for stations in some ways and more difficult in others." A lawyer's view of the new form was presented by Albert Dwyer, assistant general counsel of the CBS law department, who urged broadcasters to "do justice to yourselves when you fill it out."

Addressing a session on labor problems, William L. Walker, National Association of Broadcasters' director of broadcast management, urged the station financial men to respond to NAB's biennial surveys of wages, hours and employment. These, with the annual financial survey, give the broadcaster two sets of figures which should be of immeasurable value to him, Mr. Walker said. He also asked for copies of all labor arbitration decisions in which stations are involved, "no matter how it turned out," for use in NAB's newest service, the Arbitron Digest.

Roy Potts, attorney, who is also chairman of a committee managing KPPC-AM-FM Pasadena, Calif., for the Pasadena Presbyterian Church, urged the station men to take a realistic view of the situation when they enter labor negotiations. "The union negotiator will talk about justice and brotherly love," he said, "but you stick to the details of the specific things you want in the contract." He also advised them "to be prepared for a strike. If you are, the union is less likely to go out."

Tuesday afternoon concluded with three simultaneous discussion sessions on "Group Financial Problems," "Film, Talent and Other Contracts" and "Station Administration Problems."

The accounting manual the NAB now has in preparation is, "to a great extent, a costly duplication of the manual published in 1963 by the IBFM. Justin Liss, assistant auditor and controller, WGN-AM TV Chicago, reported. However, he noted that the NAB publication is written in nontechnical language and apparently is designed for managers rather than accountants and "there will be no real conflict as long as the manual stays in the manager's office."

Harvey radio profits up for first six-month period

Harvey Radio Inc., New York electronics distributor, last week reported increased sales and profits over the comparable 1964 period, for the first six months of 1965.

CBS's 5% idea is questioned

Metromedia and Insurance Securities Inc. criticize stand's 'reasonableness'

Reply comments were filed last week before the FCC on the commission's proposed rulemaking and inquiry dealing with conflict between institutional investor ownership in broadcasting corporations and the multiple ownership rules. ABC, Metromedia Inc. and Insurance Securities Inc., of San Francisco, presented opinions on comments filed earlier by broadcasting and investor interests.

Particularly at issue was the proposed 5% benchmark espoused in the CBS comments (BROADCASTING, Sept. 6). According to CBS, the 5% benchmark would be the proper limit of silent investor ownership in separate firms holding together more stations than FCC's multiple-ownership rules permit a single interest. In the earlier filing of comments CBS was the only voice to depart from the 10% ownership figure. All other opinions presented at that time felt that liberalization of the present 1% limit to at least 10% was necessary to insure healthy investor participation in the broadcasting industry.

In its reply comments last week, Metromedia reminded CBS that there was "no evidence as to [the 5% limit's] reasonableness"—a statement earlier made by CBS on the current 1% limit. Metromedia continued "[it is] apparent that CBS recommendation of the 5% benchmark solves all of its problems but disregards the need of other broadcast licensees."

Five percent of CBS stock at the current market rate is approximately equal to 50% of outstanding Metromedia stock. Firms with substantial stock value would be far more profitable investments on a 5% basis than would their small competitors. Metromedia pointed out. Both large and small interests, however, are bound by the same multiple-ownership regulations. An investor holding his limit of Metromedia stock under the 5% limit would hold interests less than one-half of one percent of outstanding CBS stock.

Insurance Securities Inc. stood very nearly the same position. The investment firm found the 5% limit un-
reasonable in application to small broadcast companies and the holdings of open-end investment companies. Referring to a federal statute authorizing government agencies other than the Securities & Exchange Commission to exercise jurisdiction in matters of ownership, ISI concluded that "it seems completely unnecessary to alter the 10% ownership provision [included in the 1940 SEC act], insofar as open-end investment companies are concerned."

Reply comments by ABC took issue with the wording of the commission's proposal in the matter of overlapping ownership. The problem of duopoly, with the wording of the proposal "inadvertently enlarged overlap provisions of the present rules," a result according to ABC is admittedly present.

More explicit wording in the section of the proposal dealing with concentration in that on overlapping yields the mistaken change in overlapping rules, ABC maintains. It states that the present issue is "not toward the broadening of overlap provisions of [the] rules so as to embrace non-contiguous minority interests" but to apply a numerical ceiling for investor interest.

**Paramount's ouster suit starts Wednesday**

Trial of a civil antitrust suit by Paramount Pictures Corp. against two disdident directors is to begin Wednesday (Sept. 29) in the U. S. District Court for the Southern District of New York.

The suit seeks to bar Directors Herbert Siegel and Ernest H. Martin, who control nearly 9% of the outstanding Paramount stock, from voting the stock, obtaining more stock, and acting as directors. Mr. Siegel is chairman and a large shareholder of Baldwin-Montrose Chemical Co., which, in turn, owns a controlling 70% interest in General Artists Corp., a leading talent agency. Mr. Martin is a Broadway producer.

The suit charges that Mr. Siegel is involved in a conflict of interest on the grounds that GAC allegedly is competitive with Paramount in certain areas of the entertainment business. Much of Paramount's case rests on a charge that Mr. Siegel promised but failed to divest the Baldwin-Montrose 70% interest in GAC at the time he was elected a director last May. The conflict of interest charge has also been made against Mr. Martin (BROADCASTING, Sept. 6).

In a counterclaim filed in the U. S. District Court last month, Mr. Siegel denied making any commitment to Paramount, but said Baldwin-Montrose is trying to sell its interest in General Artists Corp. Messrs. Siegel and Martin also accused the Paramount board of mismanagement. They were elected to the board last May after threatening a proxy fight for control of Paramount. Since that time they have been removed from the company's executive committee.

In affidavits filed with the court last week, several Paramount executives claimed that the presence of Messrs. Siegel and Martin on the board is hurting the company's business. They contended that independent film producers and talent agencies are reluctant to deal with Paramount because their projects might be improperly disclosed to competitors that Mr. Siegel and Mr. Martin represent.

**ABC bids for its own satellite**

Would provide four channels for its own feeds and one for an educational TV network

ABC last week asked the FCC to let it feed its programs to its TV affiliates from a communications satellite 22,300 miles above the equator, and the application is expected to stir a first-rate economic and legal storm on earth.

The move, heralded last May by ABC President Leonard H. Goldenson (BROADCASTING, May 17), seeks commission approval for the network to operate and own a five-channel TV satellite, similar to the Early Bird satellite now in use by the Communications Satellite Corp. over the Atlantic.

The satellite would be fed from two ground stations, one in New York and the other in Los Angeles, the ABC application stated. Affiliates would receive any one of four 25mc channels directly by means of 30-foot parabolic dish antennas. The fifth channel would be given free to the National Educational Television network, ABC said.

ABC's proposal is expected to draw vigorous opposition from AT&T, which stands to lose an estimated $50 million a year paid by the television networks for microwave links to affiliates, and by Comsat which maintains it alone has the right to own and operate communications satellites.

Neither AT&T nor Comsat, however, had any comment last week on the ABC proposal.

The only comment came from John F. White, president of NET. "It is highly likely," he said, "that NET will present comments to the FCC in support of the ABC plan."

In a statement, issued simultaneously with the filing, ABC president Leonard H. Goldenson said ABC is studying the feasibility of using a similar satellite system to feed its radio affiliates.

If the FCC deems it desirable that a satellite system be used by all the TV networks, ABC will be willing to share an expanded system with additional channels on a shared cost basis, the ABC chief said.

**Economical** The cost of launching the satellite, the spacecraft itself and its electronic components, was estimated by ABC (and by Hughes Aircraft Co. which is the technical consultant to the network) at $10.5 million.

The two ground stations for sending signals to the satellite, plus extra equipment to command the satellite and to receive telemetry signals were estimated at $2,480,000.

Construction of 30-foot dishes by affiliates was calculated to be about $40,000 each—the cost to be borne by the affiliates.

A backup launch vehicle and communications satellite were figured at $8.5 million. These would be used in case the first satellite failed to achieve orbit, or could be used to double the channel capacity of the domestic satellite.

ABC said that the annual operating and maintenance costs of the system, excluding the individual affiliate receiving stations, should run about $1.5 million a year over a 10-year period.

The network said that the annual cost of the proposed system, assuming a five-year replacement period for the satellite and 10 affiliates with ground receiving stations, would be $5.9 million a year.

This compares, ABC said, with the $11.9 million it pays to AT&T annually for leasing microwave lines to feed its programs to 131 primary and 137 secondary affiliates.

One of the advantages of the satellite system, ABC noted, is that all of its affiliates could pick up programs di-
General Electric 4-V color film cameras are now at work for five Triangle stations...providing color for 94 programs a week.

Since late 1963, Triangle has demonstrated its leadership in local color film origination by installing G-E 4-V systems at WFIL-TV, Philadelphia; WNBF-TV, Binghamton, N.Y.; WFBG-TV, Altoona, Pa., and KFRE-TV, Fresno, Calif.

Recently, Triangle decided to install a 4-V at WLYH-TV, Lancaster-Lebanon, Pa. Because of the reliable and highly satisfactory performance of the other four G-E units, Triangle ordered its fifth G-E 4-V...even though there is now a competitive 4-V unit on the market.

This is the kind of customer acceptance that will put more than 100 G-E 4-V's on the air by autumn. No other manufacturer can even approach this record of field-proven performance and market approval. For details on television's most-accepted 4-V color film camera—the G-E PE-24—contact your G-E Broadcast Equipment Representative, or: General Electric Company, Visual Communications Products, #7-315, Electronics Park, Syracuse, N.Y. 13201 (Phone AC 315, 456-2105).

G-E 4-V's "color" 94 programs a week—for Triangle
rectly when broadcast and could use them either immediately or record them for delayed broadcast.

At the present time, the network said, more than 100 of its affiliates are not served directly via AT&T lines.

In addition, the network added, its contract with AT&T is for only 14 hours a day. With the satellite all affiliates could receive programs 24 hours a day, a special advantage for news and emergency feeds.

The proposed satellite system, ABC said, would for the first time permit direct live feeds to TV stations in Hawaii, Alaska, Puerto Rico, the Virgin Islands and U. S. territories.

Intercity Relay • Filed on the FCC form used for requests for privately owned TV intercity relays, the application proposes a single, synchronous satellite positioned over the equator at 100° west longitude—which would place it about 1,500 miles west of Quito, Ecuador, and about the same distance due south of Mexico City. The 100° line runs through the Dakotas, Nebraska, Kansas and Texas.

The satellite would contain four receivers and one 100 w transmitter. The four receivers are a safety measure in case one or more cease operating.

Using FM, signals from the New York and Los Angeles 10 kw ground stations would go up on 5925-6425 mc; signals from the satellite to affiliate ground receiving stations would use 3700-4200 mc.

These are the frequencies assigned for space communications; they also may be used on earth for point-to-point transmissions on a sharing basis. There will be no interference to other satellite or ground point-to-point circuits, ABC said.

In the technical exhibit accompanying the ABC application, Hughes Aircraft also stressed that other satellites, separated by less than 1° could operate using the same frequencies without interference. As many as 25 such satellites, Hughes said, could be spaced within a 17° sector, using the same frequencies, without interference to each other or to point-to-point users on earth.

Hughes said that new developments in satellite technology made possible "significant" simplification in ground terminals, reducing costs drastically.

It also referred to revisions of TV transmitting standards—transmission of a positive instead of a negative sync pulse, greater deviation of the carrier and changes in the limits on pre-emphasis—which permit "significant improvement" in picture quality.

Several sections of the Hughes document were deleted on the ground that they contained "proprietary" information.

Hughes Aircraft is the builder of the Syncom communications satellites, launched in 1963 and 1964 (Syncom 3 is still operating) by the National Aeronautics & Space Administration, and of Early Bird, launched for Comsat last April and now in use over the Atlantic Ocean.

Legal Argument • Anticipating legal objections by AT&T and/or Comsat, ABC noted that the FCC several years ago authorized TV stations to construct and operate their own intercity microwave relay facilities. The satellite system, ABC said, is in essence such a facility. The network also cited a recent AT&T report to the FCC which indicated that income from the leasing of lines for TV is less than 1/3 of 1% of the company's net earnings (Broadcasting, Sept. 13). This would indicate, ABC said, that AT&T does not rely heavily on income from TV.

As for Comsat's claim of jurisdiction over all communications satellites, ABC said that the 1962 Communications Satellite Act gave Comsat authority over only international communications satellites. Since ABC is proposing a domestic communications satellite, this does not conflict with Comsat's jurisdiction, the network said.

In a plea for favorable FCC action, ABC stated:

"A grant of ABC's satellite proposal is, therefore, clearly in the national interest. In this space age there is no reason that ABC and its affiliates should be restricted to mountain peak and tall-tower techniques of yore; they should be permitted to take advantage of space-age developments, such as synchronous stationary satellites, the utility and dependability of which have now been amply demonstrated. Neither AT&T nor Comsat has been or should be permitted a monopoly on the use of satellites for domestic purposes."

Ampex loses in antitrust suit

A bitter, four-month-long antitrust suit against Ampex Corp., Redwood City, Calif., ended last week with a federal court jury award of $600,000 each to Mach-Tronics Inc., Mountain View, Calif., and Precision Instruments Co., Palo Alto, Calif.

The jury of six men and six women found that Ampex, which pioneered the TV tape recorder in 1957, had violated the antitrust laws in establishing its international marketing practices. The case ran 58 days, with the jury deliberating nine hours.

Mach-Tronics and Precision Instruments brought the treble damage civil antitrust suit against Ampex on the charge that the firm had conspired to control the world market for television tape recorders. Named in the suit as co-conspirators, but not as a defendant, was RCA.

Ampex countersued, accusing Mach-Tronics and Precision Instruments of piracy and patent infringement. Mach-Tronics, which started four years ago with $90,000 capital, was formed by Kurt Machenh, former Ampex project engineer, who was soon joined by seven Ampex engineers and executives. In 1962 Mach-Tronics developed a 75-pound portable video-tape recorder selling for $10,000. Precision Instruments entered the litigation because it held a license from Mach-Tronics on the portable TV recorder.

Argument on a motion to dismiss Ampex's $3 million countersuit will be held Oct. 14 before U. S. District Judge Lloyd H. Burke.

Have You Heard The New “Rumble” In The West Today

Here
The Surfers,
waiting for a good set, photographed
with their own sound of
“Surfs Up”
“Flags Down”
“Outside! Outside!”
“Here come some boomers!”

and Hear
KRLA,
the sort of sound that makes you
want to toss this page to the floor,
go with the tide and walk a mile
with a board on your head.

KRLA/Los Angeles' most-listened-to radio station
IEEE opens meeting to broadcasters

The Institute of Electrical and Electronics Engineers has opened its doors to broadcasters and three other groups for participation in the IEEE communications conference in Philadelphia, June 15-17, 1966.

Last June at a similar conference in Boulder, Colo., IEEE restricted the program's technical scope to its own activities. The coming meeting will be an "inclusive" technical conference open to related fields, according to an IEEE spokesman.

Two IEEE groups, the communications technology group and the Philadelphia section, together with the University of Pennsylvania will sponsor 25-30 technical sessions and panels. Groups from broadcasting, audio, electronic computers and electromagnetic compatibility will add to the subject areas.

The broadcasting group will cover multiplexing and such distribution systems as closed-circuit TV, educational TV, video-recording and community antenna TV head-end design, cables, feeders, pickup practices, high-rise apartment installations and standards.

Ampex Cue-Matic goes into production

In July of 1964 prototype models of a new kind of audio recording and reproducing equipment were installed at KFYA San Francisco and KLIV San Jose for a 90-day test. This month, after a continuous use of over a year, those prototypes are being replaced with the first production models to come off the line at Ampex Corp.'s professional audio products division.

Called Cue-Matic, the Ampex AG-100 recorder-reproducer uses a magnetic recording mat instead of a tape or transcription on which to record a pop tune or a commercial. The thin mats are virtually unbreakable and can be stored in less space than transcriptions or tape cartridges. They are relatively inexpensive: 45 cents each in quantities from 50 to 250, 40 cents each in lots of over 250. They can take up to 3 minutes and 45 seconds of sound and can be erased and reused when the tune ceases to be popular or the commercial has completed its schedule.

Ease of play was emphasized by Paul Beck, chief engineer of KFYA, as a major advantage of the Cue-Matic process. "The manual cueing process necessary to get a transcription started at the right spot at the right time is eliminated with these mats. You just shove one into the machine and it is automatically centered and cued and ready to go at the push of a button."

KFYA has about 750 standard tunes and some 350 commercials recorded on mats, Mr. Beck said. The station has one Cue-Matic machine in its recording room, five in the studio where the disk jockeys put them on the air, along with the commercial records.

Ampex reports that others who received prototype Cue-Matic machines for 90-day tests over a year ago still have them in daily use and will continue to use them until they get delivery of the production models. More than 450 have been ordered, including one order for 16 machines from a broadcaster in Peru. The AG-100 recorder-reproducer is priced at $1,395.

FCC ponders remote control for VHF's

The FCC has established Oct. 22 as the deadline for comments on a petition for rulemaking to allow remote control operation of VHF stations. The change in rules, requested by the National Association of Broadcasters, would extend remote control privileges enjoyed by AM, FM and UHF facilities to VHF operations.

First submitted to the commission late in February, the NAB request is the result of extensive tests of wire-line and multiplex off-air systems of controlling transmitters. Tests were conducted over a period of two-and-a-half years at KTEN (TV) Colorado Springs-Pueblo, KFMB-TV San Diego, WABU-TV Bangor, Me., and WGEM-TV Quincy, III. (Broadcasting, March 1).

With the current divisions in the VHF band for FM and other services on band edges, the FCC has been apprehensive that technical standards might suffer if remote control were allowed. The NAB petition proposes that additional safety equipment be required to control any spurious out-of-band emissions which might compromise commission technical regulations.

Technical topics . . .

Specification catalogue = Switchcraft Inc., Chicago, has published new engineering and specification catalogue No. P-202 covering phone plugs, patch cords and related components used in broadcasting. The free booklet can be obtained from Switchcraft, 5555 North Elston Avenue, Chicago.

U. S.-Russia Telex exchange = ITT World Communications Inc., New York, has opened a "talk" exchange between the U. S. and Russia for subscribers.
It's 8 a.m., Tuesday, in Melbourne. It's 5 p.m., Monday, in Detroit. And here—at the "heart" of General Motors' new world-wide communications network, an operator speeds a message on its way to Australia. At the start of the business day a GM executive group will have available a vital report, ready to act upon.

Through advanced electronic switching gear in the GM Communications' network, virtually any GM location in the world may contact any other GM location, regardless of the type or speed of equipment at the other end, whether by magnetic tape, punched paper tape, punched cards or printed copy. Speeds vary from 60 words per minute to 3,000 and more!

Approximately 23,000 messages of all kinds flow through Central Office in Detroit on an average day. This system puts the facts, figures, orders and ideas of GM people within brief minutes of other GM people reached through 72 regional communication centers in the U.S. and Canada, plus overseas locations as widely removed as Sweden and South Africa.

Interplay within the GM team is vital to its progress. Thus, the "Communicator" fills a keystone position.

General Motors Is People...

making better things for you
Henry not married to 50-50 proposal

But to divorce him from it, some other approach will be needed to open up more program sources

FCC Chairman E. William Henry used the platform provided by the International Radio & Television Society in New York last week to commit himself to working for greater competition among the sources of programing aired by the TV networks.

He said he is not wedded to the commission's so-called 50-50 proposal, designed to break what he considers the networks' domination over programing. But he made clear he is determined to see the commission take that or some other approach to the problem of assuring greater diversity among programing sources.

Chairman Henry, who was appearing for the third year in a row at the first IRTS newsmaker luncheon of the season, devoted his speech to the background and reasons for the proposal to prohibit networks from producing or having exclusive exhibition rights in more than 50% of their prime-time programing.

The proposal, on which the commission invited industry comments last March (Broadcasting, March 29), is the culmination of a 10-year study of network program procurement practices. The deadline for filing comments, originally set for Oct. 21, was postponed by the commission last week to Jan. 31. NBC, with support from CBS and ABC, had asked for a postponement to Feb. 21.

Chairman Henry emphasized that the commission "has reached no decisions and has come to no conclusions." But he placed equal stress on his view that some action should be taken to open up the television schedules to independent, nonnetwork sources.

Little Time for Independents = Last year, he noted, networks owned or had proprietary interest in 93% of their prime-time programing—leaving only 7% of the prime time to be filled by independent suppliers.

These figures he said, indicate the networks not only choose the programs they broadcast but determine what programs are available for choice.

"The question for the commission, then, is whether this vast influence over program supply runs counter to basic national policy for the competitive development of a television service," he said.

The chairman at one point sought to spike allegations that the commission is concerned with the quality of programs being broadcast by the networks. The problem, he said, is one of principle—to foster diversity and competition and thus discharge what he said is the commission's historic responsibility.

"Programing per se, is not the dominant theme of this proceeding," he said. "Our aim is not to select or direct programing, but to promote the development of conditions that will lead to the widest possible program production and distribution."

Quality Discussed = But at another point he acceded to those "who are adamant on the subject, and insist on comparing the quality of present network programing with the anticipated results of the '50-50' proposal.

"How many regular television viewers are satisfied with their summer diet" of network television? he asked. "How many are content with the steady stream of network repeats, reruns and rejects? How many enjoy rechewing yesterday's cud? How many have developed tired television blood, without realizing that it is simply a long, long time from May to September?"

He suggested that the networks turn their "summer siesta" in a "summer workshop" to develop "new sources, new directions, new concepts, new formats, and new faces" which he said could provide the basis for new, regular-season programs for both networks and independents.

While inviting alternative proposals, the chairman said he has been unin-pressed by the arguments made thus far by those opposing the 50-50 rule. He likened some industry spokesmen to Groucho Marx is "Duck Soup" singing "whatever it is I'm against it."

Documentation Required = He also warned that networks intending to make an economic case had better be prepared to document predictions of gloom and disaster. He recalled that the networks made that kind of argument in 1941, when the chain-broadcasting rules were adopted, and again, in 1963, when option time was abolished.

And yet, he said the networks have gone on to increasing profits and prestige. Last year, he noted, the networks with their owned and operated stations, earned gross revenues of $929 million—52% of the television broadcast total.

In the course of fending off the arguments made against the 50-50 proposal, the chairman found himself in the position of defending the sponsors who would be expected to fill the network time the proposed rule would open up.

The view that increased sponsor control would be detrimental to program quality has frequently been expressed. But the chairman said his own impression is that the evils ascribed to sponsors are largely inherent in the nature of commercial television. "It is an advertising medium too often aimed at ever-increasing mass audiences."

Four Examples = He recalled four specific cases of programs being changed to avoid embarrassing spon-
sors. But, he noted, all of the programs involved were owned in whole or part by a network. "It therefore seems reasonable to conclude that the potential for such abuses exists in our system of commercial television regardless of the identity of a given program's owner and producer," he said.

In any event, the chairman said, the responsibility for programing would still rest with the individual licensee, not the sponsor or network. Furthermore, he said, networks can't have it both ways — "they cannot have sponsors as best friends and joint venturers one day, and make them their ogres and whipping-boys the next."

Program-control cult gets another needling

Loevinger restates his objections to too much government interference, says diversity of ownership within broadcasting is healthful

FCC Commissioner Lee Loevinger last week added another chapter to the case he is building against government regulation of programing. He did it in a speech before the Washington chapter of Sigma Delta Chi, the professional journalistic society.

The commissioner, who from his first days on the commission two years ago, has taken a libertarian attitude regarding programing, warned his audience that the nation's liberty is served by granting freedom and independence to a wide variety of broadcasters, not by relying on a governmental agency to promote diversity, quality and freedom.

At the same time, the commissioner, who has often caustically criticized decisions of his colleagues on programing as well as other matters, paid them high praise. He said the commission is "one of the best regulatory agencies that ever sat here or in any other country at any time."

But, he noted, decisions on whether to grant power to governmental agencies can't be made on the basis of their own current makeup.

The commissioner's speech was based largely on a memorandum he said prepared as a basis for discussion with "liberal friends" who have taken positions on program regulation with which the commissioner, who considers himself a liberal also, disagrees.

Personal Opinion ➤ In a brief question-and-answer session following the speech, he made clear, in salty terms, his personal opinion of television. Asked for his preferences, he replied: "Watch television? Why any adult who can read and write spends time watching television is beyond me... Don't you have any books in your house?" he asked his questioner. He has expressed similar views in the past.

But this attitude does not affect his concern with what he regards as the legal, as well as the practical, problems in government regulation of programing.

He would not rule out government regulation of programing entirely. He said the government has a responsibility under the law to punish or prevent "illegal utterances," such as broadcasts of obscenity, fraud, lotteries, incitement to crime and criminal libel.

And he does not quarrel with the equal-time law or the fairness doctrine, which has been written into the Communications Act. He said the precise scope of the doctrine has never been clearly defined, which requires broadcasters who air one side of a controversy to carry all sides, "and a good many troublesome questions arise in its application."

But he said the doctrine "seems to have rather widespread acceptance and approval and is not being seriously challenged at the present time." That, however, was written before WOAB Red

Court dismisses Walker libel suit

A federal judge last week dismissed a $2 million libel suit brought by former Major General Edwin Walker against the Louisville (Ky.) Courier-Journal and Times and its affiliated WHAS-AM-FM-TV Louisville.

U. S. District Court Judge James F. Gordon said that the U. S. Supreme Court decision in Sullivan vs. New York Times case held that a public official cannot sue for libel unless he can prove malice. This ruling, Judge Gordon said, is applicable to a "public man." General Walker was such a public man in the circumstances.

General Walker claimed he was libeled by news stories and radio and TV broadcasts about his activities in the 1962 disorders in Oxford, Miss., when Negro James Meredith enrolled at the University of Mississippi.

General Walker's attorney said the decision would be appealed to the U. S. Court of Appeals in Cincinnati.

Schwimmer gets 'Cisco'

Walter Schwimmer Inc., Chicago, announced Thursday (Sept. 23) the acquisition of all 156 half-hour full-color programs of The Cisco Kid from Interstate Bakeries and is offering the show to sponsors and stations on a national, regional or local basis. Last on the air in 1959, The Cisco Kid, starring Duncan Renaldo in the title role, and Leo Carrillo is Poncho, was circulated widely during the 1950's via monochrome prints but it originally was produced in color by Frederic W. Ziv Co. for Interstate. Mr. Schwimmer said it would cost $7 million to reproduce the same product today.
Lion, Pa., asked a Washington federal court to declare the doctrine unconstitutional (see page 65).

But No Further - But beyond these categories, the commissioner said, the commission should refrain from attempting to punish "objectionable programing" or to encourage the broadcast of desirable material—even assuming standards for defining those kinds of programing can be established.

He favors letting broadcasting operate as a medium of mass communication controlled by numerous diverse owners and licensees. "Some will be ignorant, stupid, venal, or—worst of all—politically opposed to our own enlightened views," he said.

"This has been true of newspapers... But there are more and more diverse broadcasters than there have ever been publishers of daily newspapers. If we do not rely upon the diversity achieved by affording these broadcasters a wide area of freedom and independence, then we must rest our hopes for diversity, quality and freedom entirely on...a government commission."

He said American tradition and philosophy "compel the conclusion that liberty cannot safely be rested on faith in the benevolence of a government agency."

He said that efforts to punish "objectionable programing" by denying license-renewal applications would constitute prior restraint upon any future programing of that kind by all licensees—and therefore violate their constitutional and statutory rights against censorship.

And if government attempts to encourage programing it considers desirable, he said, "practical distinction between mandatory or rewarding action and prohibitory or punitive is difficult to see."

The reward, he noted, would come through a license renewal; the punishment, through a denial. "Clearly these are merely different ways of speaking about the same thing."

He said the commission has attempted to require certain types of programing through its program-reporting form, which requires licensees to specify the percentage of time their stations devote to certain categories of programing. In any event, he said even strict compliance with the form doesn't assure quality or excellence of programing. "A program is classed as 'entertainment' regardless of whether it is based upon pornography, contemporary crime and violence or classical drama," he said.

As a practical matter, he said, it's doubtful the commission can secure the kind of programing "many high-minded and educated people demand" and even more doubtful that such programing would attract a large audience.

And the real problem, he said, is not insuring high quality on programing as much as acquiring sufficient material simply to fill television's insatiable demand for "presentable" programing. He noted that the ordinary commercial television station presents between 5,500 and 6,500 hours of programing each year.

This in turn, he said, suggests that "the supervision of the programing of more than 600 television stations and more than 5,000 aural broadcasting stations in the U.S. is beyond the capability of any moderate-sized government agency, as a purely practical matter."

Official syndicates

hour JFK documentary

Official Films Inc., New York, is syndicating a one-hour TV film documentary, Biography of John F. Kennedy, which includes film footage never televised before, according to Howard B. Koerner, vice president in charge of operations.

The biography, traces the late President's childhood in Boston and London, shows conversations on family life, his ambitions, and feeling for fellow men. One feature of the film is an interview with author Jim Bishop, who comments on his visit to the White House while writing A Day in the Life of President Kennedy. Narrated by Cliff Robertson, chosen by Mr. Kennedy to portray his role in the "PT 109" film, the biography is produced by Art Lieberman, with Malvin Wald, assistant producer.

AP discusses news capsules, 'bulletins'

Following broadcaster suggestions for tighter packaging of the news, the Associated Press broadcast wire is now making the five-minute news package "the order of the day."

John Aspinwall, AP broadcast news editor gave that word to the board of directors of the wire service's radio and television association at the board's annual meeting last week.

Reporting on the work of the association's fact finding committee, Mr. Aspinwall said a nationwide survey had shown almost unanimous sentiment in favor of the five-minute news package by subscribers.

He also noted concern among broadcasters at the number of stories which were being designated as "bulletins" and said the AP broadcast wire had sharply curtailed the use of this designation over the past year.

The association's committee on performance reported to the board that the AP "is providing an adequate product attuned to the desires of broadcast stations."

At last week's meeting a new slate of board members was elected (see page 76).

N.Y. organization

to promote film harmony

The Labor/Management Council on Motion Picture Production East Coast (COMPEC) was officially started last week as an organization designed to promote harmony between film producers and unions in the New York area.

COMPEC has set up machinery for uninterrupted studio and location shooting by the immediate referral of labor-management grievances to a disputes panel board. Associated with COMPEC are 35 members of the Film Producers Association of New York, who are active in TV commercials, industrial films and TV programing; approximately 15 independent producers and the locals of the International Alliance of Theatrical Stage Employees. It is hoped that other union locals and producers will join COMPEC.
An angry roar from Red Lion

Station asks court to stop FCC on fairness doctrine, sues Democratic party

The first federal court challenge to the FCC's 15-year-old fairness doctrine, made last week by a radio station, was filed by WGCC-AM-FM Red Lion, Pa., 80% owned by the controversial Reverend John M. Norris, filed suit in the U.S. District Court in Washington. The station seeks to have the FCC enjoined from enforcing its fairness doctrine. The civil complaint also asks for $5 million in damages from the Democratic National Committee and a court order prohibiting the committee from allegedly harassing the station.

The suit asks for a three-judge statutory court to hear the case.

Broadcast communications lawyers generally were loath to comment on the case until they had studied the complaint more carefully. Douglas A. Anello, general counsel of the National Association of Broadcasters, however, stated: "The NAB does believe that the fairness doctrine raises substantial constitutional issues." He declined however to discuss the WGCC complaint until he had had more time to study it.

Campaign Echo offers WGCC was one of the 10 stations questioned by the FCC during the 1964 presidential campaign on the complaint of the Democratic National Committee that they refused to make time available to present the Democratic position on public issues. WGCC maintained that since the challenged programs (Twentieth Century Reformation Hour, Life Line, Dan Smoot Reports) were sponsored, the Democratic National Committee could buy time to refute what it claimed were unfair presentations of national issues. Since the Democrats never responded to this offer, the FCC quashed its investigation but warned WGCC and other stations that both sides of a controversial issue must be presented, whether paid for or not, although the means are left up to the licensee (Broadcasting, July 19, 12).

The FCC first enunciated its policy requiring broadcasters to present both sides of controversial issues in 1949 in a report on editorializing by radio stations. In 1959, Congress, revising Section 315 to exempt newcasts, regularly scheduled interviews and documentaries from the requirements of the equal-time provisions involving political candidates, added the provision that broadcasters were not relieved of the obligation to present both sides of public issues. And last year the FCC issued a primer on the fairness doctrine (Broadcasting, July 6, 1964).

In his suit, Reverend Norris contends that the commission's policy violates constitutional guarantees on free speech, free assembly and against the taking of property without due process. He also maintains that the fairness doctrine violates the Federal Corrupt Practices Act which makes it a criminal offense for a corporation to contribute to political parties. Licensee of WGCC is Red Lion Broadcasting Co. Inc.

In addition to the FCC and the Democratic National Committee, other defendants in the action are E. William Henry, chairman, and the other members of the FCC; John M. Bailey, chairman of the Democratic National Committee; Samuel C. Brightman, deputy chairman for public affairs; Margaret Price, vice chairman; Richard Maguire, treasurer; Dorothy V. Bush, secretary.

Robert E. Manuel, Fairfax, Va., attorney, represents WGCC in the suit.

ABC Radio to syndicate new music program

ABC Radio will offer a new entry in the musical program syndication field with What's In, a half-hour series to be recorded at night clubs and other spots across the country. The first program, recorded at New York's Bitter End night club Oct. 3, features the Serendipity Singers, Carolyn Hester, Theodore Bikel, Dick Cabot, the Tarriers and Mike Settle, with Marshall Brickman as host. According to ABC Radio, the program will be offered to the network's affiliates first, and then, if offered in syndication "on a first-come, first-serve basis" in individual markets. The programs will be produced both stereophonically and monaurally.

Uniform cutoff at polls—Curtis

Senator to push for such a bill, but wants news media to have free hand

Senator Carl T. Curtis (R-Neb.) last week called the broadcasting of early election returns, "a type of campaignin," and said that he would work for a bill requiring a uniform time for the closing of polls in presidential elections in the next session of Congress. Senator Curtis expressed his views in an address to the Nebraska Broadcasters Association meeting in Omaha.

He said that he opposed the prohibition, either by law or regulation, of media from using news that they have in their possession. He also said that the broadcasting of election returns is purely a news reporting service. But, he told the NBA, when partial results of election returns are fed into computers in a manner that can lead to predictions of the outcome of the entire election, the reporting of an election becomes a broadcast "that has many of the aspects of campaigning."

The senator cited the prospect of persons in the West who would "let up" in their work for a candidate because they felt from predictions that he would win regardless of their efforts, or because they believed their candidate had no chance with the electorate.

As for the poll-closing uniform time bill, the senator suggested that the simultaneous time be based on 9 p.m. EST. He conceded that in Alaska and Hawaii this would require the polls to close quite early, but he felt that "something could be worked out."

** Nationwide broadcast services **

** AMERICA'S LARGEST RADIO AND TV EMPLOYMENT AGENCY **

announces the opening of the mid-west office in Chicago at 645 N. Michigan Ave., in the Blair Bldg.

Stations needing personnel and applicants seeking employment may write or call Area Code 312—337-7075
They're off and running

But which network is winning audience race depends on which rating sheet you read; both place NBC-TV in second place for first week

Overnight ratings continued to command widespread interest last week as the only measurements yet available on the new television season, which opened Sept. 12-13. The first national Nielsen report is due Oct. 11, and 30-market Nielsons were to be reported last Friday (Sept. 24).

CBS-TV appeared to have a slight lead in the Arbitron national overnight. In the first week of the season, covering 7:30-11 P.M. for the seven nights starting Sept. 13, CBS in the Arbitrons had a 17.1 rating and won in 23 half-hour periods, NBC had a 16.5 rating and won in 19 half-hour periods, and ABC had 15.0 and won in 7 half-hour periods.

But in the Trendex report, covering 26 (or fewer) cities when all three networks compete, ABC was out front in average rating for that same seven-day period with 16.5, NBC was second with 16. and CBS a full point behind the leader with a 15.5. In half-hour wins Trendex put NBC ahead with 18, followed by CBS with 15 and ABC with 14, in addition to one CBS-NBC tie and one ABC-CBS tie.

Though the two services disagreed on the outcome of the first week as a whole, they showed general agreement on leadership on four nights of the week.

Both services indicated CBS was the strongest on Friday night (Sept. 17), NFC on Saturday, ABC on Tuesday and CBS on Wednesday. They disagreed (though the wins were narrow) on Sunday and on Monday: Arbitron showed NBC and Trendex ABC as tops on Sunday, and Arbitron indicated CBS and Trendex NBC as number one on Monday.

Though no startling viewing habits were immediately ascertained, one development appeared noteworthy: NBC's Bonanza, last year's top audience-getter in nighttime TV, did not make Trendex's "top 15" listing for the first week of the season. Bonanza was third in the Arbitron top 15 for that period.

The Arbitron ratings averages nightly and the number of half-hour wins by network, starting with Friday night (Sept. 17) and ending with Wednesday night (Sept. 22) follow:

Friday (Sept. 17)—ABC 13.4 (27 share), CBS 17.2 (35), NBC 12.1 (24).

Saturday (Sept. 18)—ABC 16.0 (30), CBS 17.9 (33), NBC 18.1 (34).

Sunday—ABC 16.0 (30), CBS 17.9 (33), NBC 16.9 (31).

Monday—ABC 14.3 (26), CBS 17.9 (33), NBC 16.9 (31).

Tuesday—ABC 17.0 (32), CBS 15.5 (29), NBC 16.9 (31).

Wednesday—ABC 12.4 (24), CBS 19.3 (37), NBC 16.4 (31).

Thursday—ABC 0, CBS 5, NBC 2.

Saturday—ABC 14.3 (28), CBS 14.9 (30), NBC 18.1 (36).

Sunday—ABC 16.0 (30), CBS 17.9 (33), NBC 18.1 (34).

Monday—ABC 14.3 (26), CBS 17.9 (33), NBC 16.9 (31).

Tuesday—ABC 17.0 (32), CBS 15.5 (29), NBC 16.9 (31).

Wednesday—ABC 12.4 (24), CBS 19.3 (37), NBC 16.4 (31).

Thursday—ABC 0, CBS 5, NBC 2.

The Trendex nightly network averages and half-hour wins:

Friday (Sept. 17)—ABC 14.3 (30.7), CBS 15.0 (31.9), NBC 13.3 (28.4).

Saturday—ABC 15.2 (33.3), CBS 12.6 (26.3), NBC 17.9 (37.2).

Sunday—ABC 17.3 (34.4), CBS 16.5 (32.8), NBC 14.7 (29.7).

Monday—ABC 15.4 (29.6), CBS 15.7 (30.5), NBC 16.8 (32.4).

Tuesday—ABC 19.4 (37.5), CBS 13.4 (25.9), NBC 16.0.

Wednesday—ABC 13.3 (26.5), CBS 18.8 (37.7), NBC 15.8 (31.7).

The critics' view, part 2

A further sampling of opinions on the new TV season

When The Wackiest Ship in the Army concluded Sunday (Sept. 19), the new TV season was complete and by Tuesday (Sept. 21), the nation's radio and TV critics had finished their dissection of the network's offerings. Here are representative samples of their judgments of the shows that premiered Thursday, Friday, Saturday and Sunday.

\- O.K. Crackerby

"... very slickly done ..."—Rex Polier, Philadelphia Evening Bulletin.

"... there's a cracker of real wit to it, an inventive twist here and there ..."—Jack Anderson, Miami Herald.

"... has modest possibilities ..."—Rick Dunbar, UPI.

"... nothing has appalled us as much as the premise ... that money can buy anything ..."—Harry Harris, Philadelphia Inquirer.

"... the kind of writing that brings American television closer to its age of maturity ..."—Harold Rogers, Christian Science Monitor.

\- Laredo

"... one constructive step ought to be taken ... like using live ammunition on the writers."—Jack Anderson, Miami Herald.

"... a complete disaster area ..."—Larry Wolters, Chicago Tribune.

"... a full-hour travesty in color ..."—Ann Hodges, Houston Chronicle.

"... sharp improvement will be needed ..."—Bernie Harrison, Washington Evening Star.

"... passable enough for western fans ..."—Rex Polier, Philadelphia Evening Bulletin.

"... superior production ..."—James Flanagan, Cleveland Plain Dealer.

\- Mona McCluskey

"... ugh ..."—Rex Polier, Philadelphia Evening Bulletin.

"One way to enjoy the show is to turn off the sound and just watch Juliet."—Lawrence Laurent, Washington Post.

"... it isn't entertainment ..."—Bob Smith, Chicago Daily News.

Continued

“Juliet is an anachronism... but worth a very close look.”—Bob Hull, Los Angeles Herald-Examiner.

• The Long Hot Summer
  “... excellent...”—Bob Smith, Chicago Daily News.
  “It... emerges as an entertaining soaper of the Peyton Place type.”—Paul Jones, Atlanta Constitution.
  “Passion smoulders, violence threatens, magnolias decay, wisteria withers. But nothing much happens, except talk.”
  —Lawrence Laurent, Washington Post.
  “... Without [Edmond O'Brien] the show could be long and humid indeed.”
  “... superior.”—Harvey Harris, Philadelphia Inquirer.
  “... the show is sound and can be typed with Bonanza...”—Jerry Acker- man, Chicago's American.

• Dean Martin Show
  “This is variety with a ring and a ding.”—Bernie Harrison, Washington Evening Star.
  “... a cross between a stag party and an Ed Sullivan show...”—Aleene Macc- Minn, Los Angeles Times.
  “... you'd have to be a 14-carat party pooper not to be caught up in the fun...”—Jack Anderson, Miami Herald.
  “... no cohesion, sparkle or zing.”—Rex Polier, Philadelphia Evening Bulletin.
  “... a pleasant, fast-moving hour...”—Bill Irwin, Chicago's American.

• Wild, Wild West
  “... a sort of Napoleon Solo of the prairies.”—Dwight Newton, San Francisco Examiner.

“... indoor western with strong overtones of whoa, whoa seven...”—Agnes Ash, Miami News.

“... a production extravaganza of considerable quality...”—Bob Williams, New York Post.

“It’s going to take a lot of doing to save... if indeed it can be saved at all.”—Bill Irwin, Chicago's American.

• Camp Runamuck
  “... slickly produced abomination.”—Hal Humphrey, Los Angeles Times.
  “... pointless drive...”—Barbara Tirilli, Chicago's American.

“... it's not going to win any drama festivals.”—Henry Mitchell, Memphis Commercial Appeal.

“... makes the Beverly Hillbillies look like intellectuals and Soupy Sales like an egghead...”—Larry Wolters, Chicago Tribune.

continued
* Tammy

"ABC's Friday night bow to rustic stupidity." Barbara Delatiner, Newsday.

"... looks like a winner for the 6 to 16 set ..."—Michael Drew, Milwaukee Journal.

"... harmless near comedy ..."—Bob Smith, Chicago Daily News.

"... as bad as one would expect."—Walt Dutton, Los Angeles Times.

"She's so gosh-awful good it's plain sickenin' ..."—Bob Williams, New York Post.

* Hank

"... a refreshing slant ..."—Bill Irwin, Chicago's American.

"... disaster ..."—Bob Smith, Chicago Daily News.

"... the show needs help and so do the people who put it together."—Bernie Harrison, Washington Evening Star.

* Convoy

"... just one more muddled hour ..."—Bob Smith, Chicago Daily News.

"... worth seeing again ..."—Barbara Tritilli, Chicago's American.

"... deadly dull ..."—Harry Harris, Philadelphia Inquirer.

"... all rather obvious ..."—Hal Humperly, Los Angeles Times.

* Hogan's Heroes

"... life in a German POW camp can be beautiful ..."—Don Page, Los Angeles Times.

"... I consider it distinctly sick."—Henry Mitchell, Memphis Commercial Appeal.

... first program was hilarious."—Agnes Ash, Miami News.

"... wild, completely unbelievable and fun."—Frank Wilson, Indianapolis News.

"Maybe the little ones will be amused by the farce ..."—Cynthia Lowry, AP.

"... wildest, zaniest ..."—Bill Irwin, Chicago's American.

"... according to this show, all was riotous fun in those days."—Dwight

For Thursday ratings see "At Deadline"

BROADCASTING, September 27, 1965
Newton, San Francisco Examiner.

* Honey West
  "James Bond in skirts—also slack, evening gowns, leopard-skin bikinis and pajamas."—Dwight Newton, San Francisco Examiner.

  "... this is for dad, unless mom likes to look at bikinis."—Frank Wilson, Indianapolis News.

  "... may be remembered, not fondly... as Mickey Spillane in skirts."—Barbara Delatiner, Newsday.

  "... she's pretty—which tough—and pretty repulsive, as well."—Bob Williams, New York Post.

  "We may just be ready for something like this."—Allen Rich, Hollywood Citizen-News.

* Smothers Brothers
  "... one of the worst stumbles..."—Cynthia Lowry, AP.

  "... could be a delight..."—Rick DuBrow, UPI.

  "... a kind of 'Here Comes Mr. Jordan' in jive time."—Dwight Newton, San Francisco Examiner.

  "Tom is a probationary angel and so is the show."—Bill Irwin, Chicago's American.

  "... a howling half hour, even the commercials..."—Agnes Ash, Miami News.

  "... will have to be a lot funnier if they want to make me laugh..."—Hal Humphrey, Los Angeles Times.

* Mr. Roberts
  "... comparatively tolerable..."—Bob Williams, New York Post.

  "... a high school production..."—Bob Smith, Chicago Daily News.

  "... managed to capture some of the humor and flavor of the original..."—Paul Jones, Atlanta Constitution.

  "... for the purist, this is sacrilege..."—Frank Wilson, Indianapolis News.

  "... seemed a rerun..."—Harry Harris, Philadelphia Inquirer.

  "... you might have considerable amusement from it..."—Henry Mitchell, Memphis Commercial Appeal.

  "... more solid situations will be needed or the crew will be manning the lifeboats before the season is over."—Hal Humphrey, Los Angeles Times.

* I Dream of Jeannie
  "... a lot of viewers... will find it an absolute scream..."—Jack Anderson, Miami Herald.

  "... take it away..."—Ray Oviatt, Toledo Blade.

  "... predictable and labored..."—Bettelou Peterson, Detroit Free Press.

  "Barbara Eden, as a luscious something... is enough..."—Bob Hull, Los Angeles Herald-Examiner.

  "... pretty standard stuff..."—Rick DuBrow, UPI.

* Trials of O'Brien
  "... one of the superior comedies of the season..."—Jack Anderson, Miami Herald.

  "... well-produced hour show..."—Cynthia Lowry, AP.

  "... blend of third-rate imitation Damon Runyon and unpleasant New York affectation... a major disappointment."—Rick DuBrow, UPI.

* Get Smart
  "... the ha-ha, even ho-ho, quota is refreshing high."—Harry Harris, Philadelphia Inquirer.

  "... the wackiest farce..."—Martin Hogan Jr., Cincinnati Enquirer.

  "... he almost succeeds in being the straight man to himself."—Jack Anderson, Miami Herald.

  "... pure fun from start to finish."—Aleene MacMinn, Los Angeles Times.

  "... may be the best of the 30-minute comedies."—Allen Rich, Hollywood Citizen-News.

  "... great comic possibilities..."—Rick DuBrow, UPI.

  "... a little of this goes a long way..."—Cynthia Lowry, AP.

* The Loner
  "... just another mewing, moralistic western..."—Agnes Ash, Miami News.

  "... spirit of the Twilight Zone, but the show is weak."—Lawrence Laurent, Washington Post.

  "... when Serling tells it, it's worth listening to."—Bettelou Peterson, Detroit Free Press.

  "... a hokey affair throughout."—Hal Humphrey, Los Angeles Times.

  "... makes you wish [Lyloed Bridges] would stick to scuba diving."—Arthur E. Fetridge, Boston Herald.

* The FBI

  "... a fraud..."—Percy Shain, Boston Globe.

  "... easily the week's biggest disappointment."—Bernie Harrison, Washington Evening Star.

  "... one suspected that by FBI they meant the Federal Bureau of Idiocy."—Dwight Newton, San Francisco Examiner.

  "... they don't need Tommy guns any-
more. They need Ann Landers.”—Jack Anderson, Miami Herald.

“... could be a promising one.”—William Shriner, Baltimore News-American.

“... stilted dialogue and weak attempts at humor.”—Hal Humphrey, Los Angeles Times.

* The Wackiest Ship in the Army

“At a better time, this would be a winner.”—Bob Hull, Los Angeles Herald-Examiner.

“... mixture that someone found on the day-old shelf at the local supermarket.”—Robert J. Williams, Philadelphia Evening Bulletin.

“... promises to be rocky and amusing.”—Percy Shaw, Boston Globe.

“... weird blending of tedious, comedy and pseudo-suspense.”—Dwight Newton, San Francisco Examiner.

“... most successful of this season's many endeavors to capitalize on humor in uniform.”—Jack Gould, New York Times.

“... adventure and comedy that is the most refreshing of the week.”—Bet-telou Peterson, Detroit Free Press.

“... an amusing and adventurous sea yarn.”—Cynthia Lowry, AP.

A boxscore on the TV week that was

Of the seven, only one—Hogan's Heroes—showed up in Arbitron's top 20 programs for the first week, and only one—F Troop—appeared in Trendex's top 15 for the week.

Selected by the critics for generally unfavorable comments were:

**John Forsythe Show, Mona McCluskey on NBC; Legend of Jesse James, Gidget, The FBI on ABC; Lost in Space on CBS.** None showed up in the Arbitron or Trendex lists of top-rated programs.

Following are the new shows and *Broadcasting's* interpretation of the critics' reviews. When the New York newspaper strike began, the number of critiques fell sharply, and is generally evidenced by fewer reviews of shows that began later in the week.

NCAA seeks TV grid expansion

A revised and expanded television plan for college football in 1966-67 was approved last week by the television committee of the National Collegiate Athletic Association in Kansas City and is being put to a vote among member institutions. The referendum deadline is Oct. 1.

NBC-TV this year is in the second year of a two-year agreement with the NCAA for rights to cover the college games at a package price of $5.5 million annually. The NCAA package is estimated to be worth at least another million on top of that figure, possibly more. NCAA football has been packaged for TV since 1960.

The NCAA television committee, headed by H. J. Derricott, business manager of Western State College and former NCAA president, proposes that the new TV plan could be either negotiated or put to a bid at the committee's discretion. Heretofore the plan required bidding and all three networks competed for the rights.

The proposal also specifies that the 1966-67 plan at the discretion of the TV committee on Sept. 15, 1967, may be extended up to two years more on the same terms with the existing contracting network or put out for competitive bidding. The committee at that time also would have still a third alternative, proposing a completely new TV plan.

The first major change in the 1966-67 plan calls for eight national and six regional dates each year—13 Saturdays plus Thanksgiving—and increases the total games from 29 to 32 by adding three more regional games. The present plan provides for the nine national and five regional dates.

Exposure for Small Schools: The new plan also includes an incentive arrangement to get TV exposure for the NCAA's college division, representing the smaller schools, by offering the college division championship playoffs on Dec. 10, 1966, and Dec. 16, 1967, involving four games each date.

Another major change for greater network flexibility in the 1966-67 plan is the elimination of the appearance requirement for each of the NCAA geographic districts. Instead the new plan bases its appearance rule on the NCAA conferences and independents.

For example a conference with eight teams will be entitled to a minimum of three appearances in two years with a maximum of 14 appearances in each of the two years. Conferences with five to seven members have a minimum of two
appearances in two years but the same maximum as the larger conferences. Major independents or conferences under five get collectively a dozen appearances for a dozen schools and a maximum of 16 in each of two years.

Ballots on the new plan were mailed to 553 member colleges and two-thirds of those returning their votes must approve the plan for it to take effect.

**Odyssey, BBC plan color-TV series**

Color strides in TV programming and a worldwide sales distribution are among the factors leading to a new co-production agreement of Odyssey Productions Inc., New York, and the British Broadcasting Corp. to produce 39 half-hour episodes filmed in color and titled *The World of Lowell Thomas*.

The agreement was announced last week by Dennis Scuse, general manager of BBC Television Enterprises, London, and by Milton Fruchtman, president of Odyssey. Mr. Thomas, who founded Odyssey and is a majority stockholder, and his son, Lowell Thomas Jr., will narrate the films.

Mr. Fruchtman said in an interview that the new series would seek similar high production values of the *High Adventure with Lowell Thomas* one-hour filmed specials which were on CBS-TV in the 1958-59 season and rerun in the summer of 1964 on the network. The new series would show film never before seen in this country, Mr. Fruchtman said, noting that expeditions are now under way and editing in progress on film shot in the jungles of South America and in regions of the Middle East and in Southeast Asia. BBC officials said that BBC itself underwrites some 100 expeditions per year.

Also figuring in the agreement are the high production costs of the expeditions and of the filming. BBC in addition to co-financing will aid in the supply of facilities and creative personnel. BBC and Odyssey film units and explorers will be coordinated for the duration of the series preparation. BBC also will provide the worldwide distribution organization for the series sale.

Peter M. Robeck and Co., New York, which is the distribution representative for the BBC in the United States, will act in that capacity for Odyssey in the new series. Mr. Robeck indicated that a network period in the next season would be sought and that several major advertisers have expressed interest in the series.

**Awarded $51,000 in libel judgment**

A judgment of $51,000 was awarded by a jury to Dean Lupkey of Jefferson City, Mo., in a libel suit against the local newspaper, TV station and publisher-broadcaster.

Mr. Lupkey claimed he was libeled by an editor in the *Jefferson City Capital News* and *Post-Tribune*. In addition to the newspaper, *KRCG (TV)* Jefferson City was a defendant as was William H. Weldon who owns both the newspaper and the TV station. The newspaper had said that Mr. Lupkey was attempting to secure an exclusive community antenna franchise in Jefferson City for United Video Systems Inc., Kansas City, (a group CATV owner). He was to become the CATV manager. United Video dropped its plans for Jefferson City soon after the editorial appeared.

Mr. Weldon said last week that the judgment would be appealed.

**Radio series sales...**

*12 Hours of New Year's* (Triangle): WHAK Rogers City, Mich., and WCRD Bluffton, Ind.
Reiner heads new Four Star arm

International division will handle distribution of all TV programming; Firestone resigns during changeover

In a reorganization and expansion move, Four Star Television announced last week it has formed a new subsidiary, Four Star International, to handle both domestic and international distribution of its TV programming.

The new subsidiary will be headed by Manny Reiner, who has been vice president of Four Star Television International (see page 10). In the changeover Four Star Television International and Four Star Distribution Corp., which handled domestic sales of syndicated programs, have been absorbed by Four Star International.

Len Firestone, who has been vice president and general manager of Four Star Distribution Corp. since its founding in 1962, has resigned as a result of “policy differences” with the management of the company.

Jerry Weisfeldt who has been sales manager for Four Star Distribution since 1962, has been named vice president in charge of domestic sales for Four Star International, reporting to Mr. Reiner.

In announcing the changes, Thomas J. McDermott, president of Four Star Television, said Four Star International will step up its efforts in the acquisition, production and distribution of theatrical films and syndicated series for TV, the distribution of motion pictures to theaters and the establishment of a unit for the production of Broadway musicals and plays.

Four Star International has 17 filmed series and 59 motion pictures in domestic distribution, reaching 254 stations in 186 cities.

The company also has 5,100 hours of programming on the air in 54 foreign countries.

ABC Radio gets heavy weight title bout

ABC Radio last week purchased the radio rights to the Cassius Clay-Floyd Patterson heavyweight championship bout scheduled for Nov. 22 in Las Vegas, Nev. ABC Radio obtained the rights from Sportvision Inc., promoter of the contest, and no financial terms were disclosed.

A blow-by-blow announcer for the event will be named within two weeks. Howard Cosell, network director of sports, former heavyweight champion Rocky Marciano and sportscaster Tom Harmon will serve as color commentators.

Sportvision also granted rights to Telestar Products & Publications Inc., Westport, Conn., to produce and syndicate a 15-minute radio program and a 15-minute TV show, based on interviews with Messrs. Clay and Patterson and their aides. They will be available for broadcast on the day of the bout and the preceding day.

Film sales...

Nutcracker (Desilu Sales): WABC-TV New York; WRC-TV Washington; WHDH-TV Boston; KGO-TV San Francisco; KCOP (TV) Los Angeles; WFLD-TV Chicago; KCRA-TV Sacramento, Calif.; KPTV (TV) Portland, Ore.; WTVN-TV Minneapolis; WAGA-TV Atlanta, and WAFB-TV Baton Rouge.

B'wana Don & Jungle-La (Storer Programs Inc.): WORC-TV New York, 65 episodes.

'Mesta's Washington'

Now the "hostess with the mostest," Perle Mesta, is being projected as the start of her own television series. Seven Arts Television, in cooperation with the McCall's Corp., is preparing a half-hour, across-the-board series in color, Perle Mesta's Washington, designed for network showing.

The proposed series will be produced in Washington and will spotlight the former minister to Luxembourg in interviews with legislators, diplomats, government officials, entertainment personalities and businessmen. Occasionally the series will move out of the studio to locations of interest and to homes of guests, according to W. Robert Rich, executive vice president of Seven Arts TV.

Program notes...

Easter program = Woroner Productions Inc., Miami, has just completed a new holiday program entitled Easter—The Beginning. The program will re-create what a radio station would have broadcast had it been on the air during the days of the death and resurrection of Christ.

Pope at U. N. = CBS-TV will present an hour-long program Sunday, Oct. 3, Paul VI: A New Journey, An Ancient Mission in preparation for the Pope's impending visit to the U. N. The feature film will include biographical material on the Pope and interviews with UN, U. S., and church leaders concerning their expectations regarding the visit.

Triple-threat man = Universal Pictures reports that Jack Webb has been signed to a pact in which his services will be available to Universal as a producer, director and performer for motion pictures and television.

Offices opened = Program Production Syndicators, formed by Bob Bowman and Bill Edwards, has opened offices and studios at 102 South Vermont Avenue, Los Angeles 90004. Phone: 382-9951. New firm's initial radio program offerings include: The BB Bowman Sports Report, a 15-minute program; The Frank Laine Show, also 15 minutes, and Late Date with Sylvia, half-hour series.

Producers named = Mel Stuart has been named by Wolper Productions as executive producer and Jack Kaufman as producer of The Rise and Fall of the Third Reich, a series of three one-hour TV documentaries based on the best-selling book by William L. Shirer.

BROADCASTING, September 27, 1965
What to do about Emmy?

NATAS meeting fails to come up with any concrete suggestions

Television’s Emmy awards were back on the operating table last week but there was uncertainty as to whether major surgery or just a few stitches would be ordered.

The awards committee of the National Academy of Television Arts and Sciences, which doctored the awards structure last year, met last week in several closed sessions. The committee also asked for comments on the awards at an open membership meeting in New York Wednesday.

This followed a week in which feelings had run high between East and West Coast members of the organization over critical comment about the Sept. 12 Emmy telecast on NBC-TV and the award system (BROADCASTING, Sept. 20).

Rod Serling, president of the academy and prominent among those who had criticized this year’s program, explained his reaction this way:

“I sat through two deadly dull hours, then I reacted emotionally.” He denied he had ever said the awards, as presently conceived, could never work, and apologized to the awards committee for having reacted instantly without further consideration.

Mr. Serling said: “I hope we’ll retain the basic elements of the new structure.” And apparently most of the some 200 members present at the open meeting agreed with him.

Favor Revised Method — When national awards committee chairman Betty Furness asked for a hand vote at the meeting on the need for changes, a majority favored a revised system.

Miss Furness called on the membership to divorce the recent Emmy telecast from the method of selecting Emmy winners.

She suggested that the method of presentation in the Emmy program, might have been better explained and that the same awards could have been presented much more dramatically merely by enumerating the nominees before announcing the winners.

There was also a scattering of opinion in favor of returning to a category system, which, it was felt, lent itself more readily to a sense of competition and suspense and thus made the awards program more interesting to a national television audience.

One member claimed a comprehensive award program could never be combined successfully with an awards telecast. There are far too many programs to select from during a television year, he said. Trying to compress an awards program for a full year of TV into a single telecast, he suggested, would always remain a thankless and impossible task.

He noted that the academy depends on the award program for a substantial amount of income from the network which telecasts it (this year the academy was paid $250,000 for rights to the program by NBC-TV) and he said fund-raising ought to be handled apart from the award system.

KRLA introduces new group of Blore IDs

A new package of musical radio station identifications, including 19 individual songs adding up to 14 minutes of air time, has been prepared by Chuck Blore Creative Services, Hollywood, for use by one station in each market. The package includes a station anthem and special tunes using various themes. Special lyrics will be written for each station.

At KRLA Pasadena-Los Angeles, the recurring theme is “It’s Fun to Play KRLA.” There are also special musical tags for various times, such as the “KRLAZy weekend.”

Mr. Blore calls his package different from others because it “was designed by a programmer, not a jingle maker. Every song is a commercial for the radio station and each spot is designed to fulfill a specific programing function.” Stan Hoffman composed the music, Mr. Blore writes the lyrics and Dick Pierce is in charge of production.

BPA establishes a speakers bureau

Broadcasters and advertisers who require speech materials or speakers need look no further than a speaker’s bureau formed last week by Broadcasters Promotion Association, New York.

The BPA bureau is cataloguing and...
reprinting speech material on promotion, sales promotion, merchandising and publicity as provided by BPA members. In addition, BPA members are joining a list of assigned speakers within their own geographic areas. The service's mailing address, under Mel Grossman, is H-R Representatives Inc., 277 Park Avenue, New York.

'Wedding reception' planned

A half-hour television program will be the highlight of a party to be given by Perle Mesta in Washington on Nov. 1. The program is the "To Have and to Hold" episode of the ABC-TV series Farmer's Daughter and the occasion is the marriage of its leading characters, Katy Holstrum and Congressman Glen Morley.

Many people in the Washington political scene are expected to attend this "wedding reception" to congratulate Inger Stevens and William Windom, stars of the show.

Drumbeats ...

Future newscasts • WYMC Mt. Carmel, Ill., has developed an on-air promotion for the area's 150th anniversary celebration that pays dividends. It's a series of twice daily "newscasts" looking into the future 50 years as though it were the present. Series is sponsored by Dersch Oil Co., a Shell distributor.

Women's award • Krin Holzhauser, vice president of Goodwin, Dannenbaum, Litiman & Wingfield Inc., Houston advertising agency, has been awarded the Eastman Award for her activities in the American Women in Radio and Television organization. The award, given by Robert Eastman & Co., is presented to a woman in each of AWRT's areas. Mrs. Holzhauser is southwestern area vice president of AWRT.

Station promotion • Braverman-Mirisch Inc., has been named by KFRA, both Los Angeles, to handle advertising and public relations for the station. David Mirisch will be in charge of the public relations activities and Millicent Braverman will be in charge of advertising.

New agency • WBTW(TV), Florence, S. C., has appointed Cargill, Wilson and Acree, Charlotte, N. C., to promote the Florence market in a national campaign.

GF's Ebel named winner of IRTS Gold Medal

Edwin W. Ebel, vice president in charge of advertising, General Foods Corp., White Plains, N. Y., has been designated winner of the International Radio & Television Society Gold Medal Award for 1966. The award will be presented in New York at the IRTS's 26th anniversary banquet on March 9.

IRTS's award has been made annually for the past six years. Past winners have been Brigadier General Perle Mesta, wife of late President Coolidge, and Congressman Richard Nixon (for his Great Debates on TV during the 1960 presidential campaign). Among others honored are John K. Cage of CBS, comedian Bob Hope, President Leonard H. Goldenson of ABC Inc., and FCC Commissioner Rosel H. Hyde, who was last year's winner.

Mr. Ebel, who also is currently serving as chairman of the Advertising Council, is being cited for his "staunch" advocacy of radio as an advertising medium and as a "courageous innovator" in its use and in programming and similar leadership in television, according to Thomas J. McDermott, radio-TV vice president of N. W. Ayer & Son, New York, and president of IRTS.

INTERNATIONAL

Canadians hit revamp plan

CAB: Fowler proposal would recreate 'dangerous' system of pre-1958 era

If general reaction is any criterion, there is little likelihood that the report on revision of Canadian broadcasting (BROADCASTING, Sept. 13,) will be fully implemented. Comments on the report within the industry and in the press have ranged from "a foul Fowler"—committee chairman was Robert Fowler of Montreal—to "a woolly-minded study."

The Canadian Association of Broadcasters sees the report's recommendations "as similar to and potentially more dangerous than the system that existed between 1936 and 1958. For more than a decade private broadcasters fought for correction of that unparalleled situation in which the Canadian Broadcasting Corp. and its board were at one and the same time competing with the private stations for business and audience and were the judge and jury of their daily existence and ultimate fate."

The CAB, representing most independently owned radio and television stations, is studying the report and the proposed Canadian Broadcasting Authority. CAB will insist upon continuation of a separate regulatory body, a tribunal not involved in the operation of broadcasting stations either public or private. CAB believes that if the Fowler report's recommendations on more Canadian-produced cultural programs are adopted, a majority of Canadian viewers and listeners would tune in U.S. stations.

Typical of press comments was that of radio-TV critic Dennis Braithwaite in the Toronto Globe and Mail, who pointed out that the report is destined for some dusty cupboard in the Parliament Building. He stated that in the opinion of informed persons in both the public and private sectors of the industry, the report is virtually useless as a blueprint or even a reasonable guide to any sound or meaningful overhaul of broadcasting. He felt it is "a long-winded, pretentious, muddled, inconsistent and shockingly ill-informed attack on the CBC and the private operators, a self-consciously literary treatise that not only failed to specify any of the programming sins it condemned, but offered not a single constructive suggestion for improvement." Among stations commenting on the findings of the report was CKVL-AM-FM Verdun, Que., which said that "by generalizing so much, the committee report was unfair to broadcasters trying to do a major job in using Canadian talent and programs." CKVL pointed out that the annual average of
$16,300 attributed to 49 French-language radio stations for talent was unfair to its operations. CKVL said it spent $500,000 on talent in 1963 and $400,000 in 1964 to bring live French-language programs to its listeners in the Montreal area.

Ottawa heeds pleas, retimes color start

Canadian TV stations are now able to apply for license to broadcast in color, which officially starts Jan. 1, 1967. The government has announced that experimental color telecasting can start July 1, 1966, and full programing on Oct. 1. By the beginning of 1967, Ottawa hopes that stations will have ironed the bugs out of color broadcasting and have their equipment in shape for the start of regular color telecasting.

The change in dates allowing a half-year earlier start for color TV is the result of presentations made by the Canadian Association of Broadcasters and individual broadcasters, pointing out that the advertising year begins in the fall rather than with the calendar year.

Canadian Broadcasting Corp. has announced its major color telecasting will not start until the opening of the Montreal World Fair in April 1967. CBS will have a full studio at Expo '67, from which international telecasts will also be made.

CAB apprehensive about renewal policy

Canadian broadcasters are worried about a new policy on station license renewals as developed by the Board of Broadcast Governors, the Canadian regulatory body.

"In recent months the BBG has changed its procedure with respect to license renewals," the Canadian Association of Broadcasters said in a statement issued in mid-September. "The BBG has accepted the theory that the licenses of long-established broadcasting stations are not renewable at expiry date but that the station is applying for an entirely new license. Following this reasoning to its logical conclusion, any applicant could apply for the license when it expires."

The CAB contends that present legislation does not allow this interpretation. It points to section 8 part 2 of the Canadian general radio regulations under the Radio Act that renewals are automatic upon good behavior of the licensee. It cites section 15 of the Broadcasting Act which provides for penalties by the BBG up to three months license suspension. The CAB wants clarification of the legislation and automatic renewal of licenses for stations which have not been penalized for breach of regulations.

FATES & FORTUNES

BROADCAST ADVERTISING

Homer C. Burrous, eastern U. S. sales manager for Fanta products, division of Coca-Cola Co., Atlanta, Charles K. Holmes, marketing assistant to VP of bottler sales of Coca-Cola, and De-Forrest Jackson, sales promotion of Fanta Beverage Co., named product managers of Coca-Cola Co. Mr. Burrous will handle Tab.; Mr. Holmes, Fresca and Fanta; and Mr. Jackson, Sprite and Chime.

KDFN Salinas, Calif.—Seeks assignment of license from KDON Inc. to M. Charles Braitbard, owner. Mr. Howard is principal of Bernard Howard & Co. radio station and Mr. Stevens is a former employee of WoJF and holds interest in WEFCC Harrisburg, Pa., and KFGJ Los Angeles. Ann. Sept. 15.

KMUZ(FM) Santa Barbara, Calif.—Seeks assignment of license from William C. Nelson, owner.

from Evansville, Ind., and reassign it to Hatfield, Ind.-Owensboro, Ky., as commercial channel. In so doing, commission stated that the applicant, WBXM, would be the only station in the Evansville, Ind., area that would have blighting effect on existing WBXM facilities and would be contrary not only to its efforts to improve WBXM facilities but to previous efforts to make WBXM a major station in the Evansville, Ind., area.

- Commission proposed amending sec. 73.189(b), as it appears in the April 27, 1965, Report and Order, to provide that applications for new AM and/or FM facilities incident to a reassignment after the effective date of this act would be considered in the regular manner except as provided in sec. 73.189(a).

- On its own motion, commission amended its report and order of July 27, 1965, authorizing the use of WSAU-TV Wausau, Wis., to operate with an ERP of 25 kw to 100 kw on Oct. 3 and 10, July and Oct. 7, 1965, to broadcast its fall sports games, conditions; Commission Barptly dissented.

- By memorandum opinion and order, commission denied petition by Birmingham Television Corp., WMBG Birmingham, Ala., to rule making to delete channel 8 from Selma, Ala., that Selma Television Inc. be required to show why its license should not be modified to specify channel 8 instead of channel 8 at Selma; and (2) motions by Montgomery Independent Telecasters, Inc., WKAQ Montgomery, Ala., to consacrate instant petition with petition for rulemaking by WTVY-TV Montgomery, Ala., to reassign channel 8 from Selma to either Atlanta or to Birmingham. Commissioner Barphey abstained, Action Sept. 15.

- By action of commission, has uncovered an obscure error in computer program used to prepare revised Uniform Form of data recently adopted by the commission. Although it did not cause any actual assign- ments to be made it did result in poor choice of channels for in tabulation, resulting in lesser number of potential assignments. After discovery of error, revised Uni- form Form of data has been corrected. Plan produced five additional assignments in those areas where hamden- urated, increased number of assignments on lower number of substan- tially greater number of channels available for assignment in major area of country. Comparison of this plan and one produced by plan previously made desirable to issue corrected plan. However, in order not to disrupt planning that has gone into preparation of applications based on assignments made in fourth round and order or to force changes in construc- tion which has gone forward on basis of permits granted, commission has decided to adopt assignments adopted in fourth report and order; in this plan all major next assignments for new FM stations have been made. Assistant for new applications as of Sept. 27.

- By memorandum opinion and order, commission denied petition by Lakeview Broadcasting Service Inc., Lakewood, and Evergreen Enterprises Inc., Loveland, Colo., to reconsider and set aside July 14, 1965, order which denied request by Lakeview Broadcasting Service Inc. to reassign AM to station KUHE, Whittier, Calif., to change time and method of operation to AM to 500 kw, continuous daytime operation with 1 kw, conditions and within- out cost to Lakeview Broadcasting Service Inc, by Commissioners. Commissioner Cox did not participate, Action Sept. 22.

- Waived sec. 15.96(b) of rules and accept to file application for FM Baker Radio, Calif., to change to trans- mission of opera- tion from 1 kw, continuous daytime operation with 1 kw, conditions and within- out cost to Baker Radio \& Television Corp., W. B. G. Baker Radio and Television Corp., to file application, Reconsideration granted petition,

Radio Staff Changes Create Three New Jobs

A major modernization and expansion program has created openings for two experienced announcers and one seasoned news man on our staff. We are in a brand new radio building in suburban Green Bay with excellent technical equipment.

Two Announcers

We are ready to hire immediately a new morning man and an afternoon man. Prefer first phone or willingness to acquire same with our help. Tight board, bright bright voices. Modern format but not rock and roll.

One Newsman

Must be experienced, able to do local interviews by tape or phone, Voice not as important as news gathering ability. You will be our second man working the afternoon and evening shift.

We are an NBC affiliate with strong emphasis on sports (The Green Bay Packers for example) and news. Our station is owned by the Green Bay Press-Gazette, a AAA Dun & Bradstreet rated firm. All salaries commensurate with ability, top fringe benefits and stability to bright people with imaginations.

We are on the way up and want people who can grow along with us. Send resumes, photos, tapes or anything you think will help us evaluate you.

Broadcasters Inc., for indefinite postponement of hearing in proceeding on its application for new FM in Pompano Beach, Fla., without prejudice to applicant's right to submit an amended petition in proper form at later date. Action Sept. 21.

Denied petition by WPTL Broadcasting Co., Fort Lauderdale, to intervene in proceeding on application of Boca Broadcasters Inc. for FM in Pompano Beach, Fla. Action Sept. 17.

Formalized by order ruling made at Sept. 15 prehearing conference in matter of revocation of license of Palmateer Communications Corp., San Francisco, Calif., and scheduled further prehearing conference for Sept. 30, to be held at 10 a.m. on Sept. 30 hearing to date to be set at prehearing conference on that date. Action Sept. 17.

By Hearing Examiner Walter W. Gunther

On its own motion, made various corrections to transcript in proceeding on application of WWOE, and Municipal Broadcasting Co., Inc., for new FM in Muskogee, Okla., granted petition by Triad Stations Inc., for license, to amend its application for new TV, to install its transmitter on channel 24A4 in lieu of channel 25A and to return amended application to processing line. Action Sept. 16.

By Hearing Examiner Herbert Sharfman

By Hearing Examiner Elizabeth C. Smith

Granted petition by The Superior Broadcasting Co., Inc., for license, to file, on or before Sept. 22, reply to Broadcast Bureau opposition to Superior’s petition for license for new TV to operate on channel 61 in Cleveland. Action Sept. 17.

Cancelled presently scheduled dates for ex-changes of exhibits, for notification to witnesses, and for evidentiary hearing, and scheduled further prehearing conference for Sept. 30, at which time, and on other things to be considered, new dates for exchange of exhibits, notification to witnesses, and hearing will be fixed in proceeding on applications of Fidelity Radio Inc., and WHAS Inc., for new FM in Louisville, Ky. Action Sept. 16.

By order of hearing examiner:

BROADCAST ACTIONS by Broadcast Bureau

By order of hearing examiner:

KENT-TV Anchorage—Granted CP to change vis. ERP to 26.9 kw, and change type of trans.

KBSN Los Alamos, N. M.—Granted CP to change ant. trans., and main studio loc., and make changes in ant. system.

KYNDE Temple, Ariz.—Granted CP to make changes in ant. system and main studio loc.

KABO Minden, La.—Granted CP to make changes in ant. system and main studio loc.

WMHR Jacksonville, Fla.—Granted CP to change ant. trans. location.

WORK-FM New York—Granted CP to install new trans. and new ant., increase ERP to 5.6 kw, and make changes.

WDHA-FM Dover, N. J.—Granted CP to increase ERP to 275 w, and install new trans.; remote control permitted; condition.

WHGT-FM Eatonown, N. J.—Approved engineering technical data submitted, pursuant to commission’s July 26, 1965 order and order in Dec. 1959, and modified CP of FM to specify operation on channel 299; ERP 1 kw, ant. height 210 ft.

Following stations were granted extensions of completion dates:

*WHY(B) Syracuse, N. Y.—Granted
COMMUNITY ANTENNA FRANCHISE ACTIVITIES

The following are activities in community antenna television reported to Broadcasting, through Sept. 22. Reports include applications for permission to install and operate CATV's and for expansion of existing CATV's into new areas andAdditional activities in frachises and sales of existing installations.

- Indicates a franchise has been granted.
- Indicates a franchise application has been made.
- Indicates an extension of a franchise has been granted.
- Indicates an extension of a franchise application has been made.

Jackson, Calif.—Valley Vision Inc., 1418 K Street, Modesto, Calif., has received a favorable first reading of its franchise application by the Modesto City Council. The agreement would yield the city $100,000 annually for 20 years, with the possibility of monthly gross receipts; customer charges would be $1.50 a month for installation. Valley Vision is also an applicant in the city of Merced, Calif., and Santa Maria, Calif.

Solead, Calif.—Central California Communications Corp. (group CATV owner— W. A. Prewitt, Battle Creek, Mich.), has received a 15-year franchise to operate a CATV system in Sonoita, a city of 1,000 residents. The franchise was granted as a result of the company's extensive studies of the area. The franchise agreement will yield the city $105,000 annually for 20 years.

Tehachapi, Calif.—Tehachapi TV Cable Communications Inc., which serves Kern county area immediately adjacent to the town of Tehachapi, has applied for a franchise in the city of Tehachapi, in which it already holds cable rights.

- KWSX-TV, West Sacramento, Calif.—Approved engineering technical data submitted, pursuant to terms of franchise and order in Doc. 14228, and modified CP to specify operation on channel 20; ERP 295 kw vis., and 58.9 kw aur.; area; assigned location to be determined.
- KSTP-TV, St. Paul, Minn.—Granted modified CP to change transfer conditions.

- WTLY-TV, Savannah, Ga.—Granted a 22-month and 19-day extension of license to reduce ERP to 31.6 kw vis.; and move to or from transfer.
- WHN-TV, Huntington, W. Va.—Granted modified CP to lower monthly and 65-day extension of license to reduce ERP to 31.6 kw vis. and reduce transfer conditions.
- WLDH-TV, Traverse City, Mich.—Granted assignment of license to a new operator, Tele-Globe Broadcasting Inc.

- KNOT-IN, Denver, Colo.—Modified CP to allow remote control permitted.

- WHA-FM Madison, Wis.—Granted CP to change aur., and ERP to 32 kw conditions and transfer changes.

- WRGA-FM Rome, Ga.—Granted modified CP to change aur., and transfer conditions; decrease ERP to 300 kw, and aur. height to 790 ft.; remote control permitted.

- WMBU-FM Oxford, Ohio—Granted CP to make changes in aur. ERPs to 760, and aur. height to 4840 ft.; all other conditions remain as specified.

- KNOX Grand Forks, N. D.—Granted CP and license for new low power auxiliary station.

- KVMU-FM Oxford, Ohio—Granted CP to make changes in aur. systems; increase ERP to 890 kw, and aur. height to 59,200 ft.; control permitted.

- WKZM-FM Mexico, N. M.—Granted renewal of license for following 20 years, to March 1, 1966; Granted renewal of license for following 20 years, to March 1, 1966.

- WWKL-TV New Orleans—Licensed covering changes; and, mod. of license to reduce aur. ERP to 16 kw; and modify aur. transfer conditions.

- WBBT Bardstown, Ky.—Granted renewal of license, for period ending Aug. 1, 1966. The Hearst Corp., Pittsburgh, Pa.—Granted CP and license for new low power auxiliary station.

- KXNO-FM, Oxford, Ohio—Granted CP to make changes in aur. systems; increase ERP to 850 kw, and aur. height to 58,000 ft.; all other conditions remain as specified.

- WKOM-FM Jackson, Miss.—Granted renewal of license for 20 years, to Aug. 1, 1966. By memorandum opinion and order, commission directed all stations within the Jackson, Miss., to modify contour to allow consideration of licensee's reply to April 21 notice of apparent liability for that station. Action Sept. 15.

- WMBU-FM Oxford, Ohio—Granted CP to make changes in aur. systems; increase ERP to 890 kw, and aur. height to 59,200 ft.; control permitted.

- WKLY-FM, Millville, N. J., to Dec. 31, 1965; Granted renewal of license for 20 years, to March 1, 1966; Granted renewal of license for 20 years, to March 1, 1966.

- Decatur, Ill.—Decatur Cablevision Corp., represented by Robert R. Hofland, Chicago, Ill., has applied for a 15-year franchise. Under the proposal the firm would pay 12% of the gross during the first five years and 13% of the gross for the next 10 years. Provisions include an order to the city commission's discretion, that the city's cable system is in fair condition. The proposal was submitted to the city commission.

- Battle Creek, Mich.—Wolverine Cablevision Inc., the exclusive subsidary of Time-Life Broadcast Inc., N. Y., and Peter Kaye of Battle Creek has applied for a franchise. The proposed contract gives the city 15% of the gross, for the duration of the franchise.

- Colombia, Mo.—Columbia Master Video Inc., 436 E. Ninth St., Columbia, Mo., has applied for a franchise. The franchise agreement would yield the city $3.58 for at least five years and the main-
BOB Rich decided 30 years ago that he wanted to become part of the burgeoning broadcasting industry. So he took his first step and joined the radio club at Oberlin College in Ohio. College radio was not the developed enterprise it is today with campus stations flourishing at many universities. While in the club, Mr. Rich and his fellow students helped to prepare and broadcast radio programs on stations in the Cleveland area.

From that modest beginning, Mr. Rich has nurtured a career that has included writing and editing for radio, station management, television programming and sales. In fact, his entire business career has been devoted to the TV-radio field, except for four years (1942-45) when he was in the U.S. Army.

Syndication Background • For the past 10 years Mr. Rich has played a key role in the topsy-turvy world of TV program syndication. During this time, he has been associated with Eliot Hyman, first in Associated Artists Productions, which subsequently became United Artists Associated. Then in 1960, with the formation of Seven Arts Associated by Mr. Hyman, Mr. Rich joined that organization as vice president and general sales manager.

The Seven Arts complex of companies, which operate under the umbrella of Seven Arts Productions Ltd., has had a meteoric rise since its founding. In 1963, gross income rose to more than $41 million from $19.5 million in 1962, with the TV gross accounting for 70% of the total. The gross dipped to $25 million in the fiscal year which ended last June (though net profit increased), because of a substantial reduction in the number of theatrical releases. However, the television business continued at a high level.

TV Branch Formed • Until last June Seven Arts' TV activities, handled through Seven Arts Associated, were concentrated in the distribution of post-48 feature films. This past summer, as part of an expansion and diversification move, Seven Arts Television was organized with Mr. Rich as executive vice president and general manager.

"I'm just starting to learn this new assignment," Mr. Rich remarked, "and I'm finding it most challenging. For the first time, our company has become active in producing for the networks, and we hope we can make as meaningful a contribution in that area as we have been making in station programming."

Mr. Rich is a tall, athletically built man whose appearance and manner project an image of quiet efficiency and thoroughness. He speaks easily, directly, but sparingly.

He is highly regarded as a salesman. An associate observed: "He is the direct opposite of the fast-talking, glib sales-World hopping for Seven Arts' new TV branch

man, but he gets excellent results." Since starting his new assignment, Mr. Rich has been on a whirlwind schedule hiring personnel and undertaking program-procurement assignments. To accelerate the company's plans in network TV production, Thomas D. Tannenbaum recently was appointed vice president of programs in Los Angeles, and Stanley Jaffe, director of programs in New York.

Mr. Rich has high hopes that Seven Arts Television will be represented on the TV networks next fall. He is reticent about discussing the company's plans in that area but said there are several projects under consideration.

This newly formed syndication division has jurisdiction over all of Seven Arts Production's TV programming except the feature films, which are under the control of Seven Arts Associated. The first new programs under the Seven Arts TV aegis have been the six-one-hour Man In Space specials and the half-hour across-the-board Gypsy Rose Lee Show.

Plans for Color • Color will play an important role in these syndicated shows, according to Mr. Rich. The initial Man In Space special was produced in black and white, but the remaining five will be made in color. He said Gypsy is slated to go into color within the next few months . . . as soon as the equipment and facilities are available.

"Color is an exciting dimension and is going to prove more attractive in the months ahead," he observed. "We plan to do a considerable amount of our future programs in color."

During the past few weeks Mr. Rich has been on a transcontinental and trans-Atlantic business spree hopping between New York, Hollywood and Europe. He stressed that Seven Arts TV is seeking program fare from all over the world, and believes that overseas, as well as domestic sources can make a contribution to television.

International • The first major international effort by Seven Arts Television is a co-production agreement signed recently with Bavaria Film Studios in Munich, Germany. The first program obtained was a one-hour color special, Nutcracker, which has been placed into distribution. The agreement calls for the production of a proposed network series and additional specials, all in color.

Mr. Rich asserts there is "a definite need" for first-run properties in syndication but "not just any first-run." He stressed that syndicators must devise a formula for first-run that would assure "saleable properties."

His latest assignment probably will play havoc with Mr. Rich's favorite pastime — attending Army football games. He is known in the broadcast industry as a number-one Army fan and has journeyed to all parts of the country on Saturday afternoons to root for his team.

"Unfortunately, Army won't be playing in the areas that I'll be visiting this fall," Mr. Rich said with a wry smile. "I'll be spending a good deal of my time during the next few months in Hollywood and Europe."

BROADCASTING, September 27, 1965

91
According to plan

The 1965-66 television season is now two weeks old, and everything thus far is following predictable patterns. Some programs show promise and some don't, as is always the case. On the whole it looks to be a fairly close three-network race, which is what the forecasts called for. And of course the entire season has been quickly written off as a poor job by most of the newspaper critics who had written it off as a poor job before it started, which certainly reflects no innovative trends among newspaper writers.

It is, of course, still much too early to judge. Ratings at this point are almost meaningless; viewers need several weeks to shop around before settling into the habits that they will follow, more or less, throughout the season. Except for relatively rare shows whose ratings start high and keep zooming, or fall dead and just lie there, the sampling season is inevitably a period of week-to-week fluctuations from which broad decisive judgments are drawn only by the reckless.

There is also the fact that some shows build slowly. And others slowly fall apart. Whether attributable to changing production values or to delayed reactions of viewers, this factor is an essential part of the sampling process but emerges only slowly from the ratings. Its importance can be sworn to by a considerable band, however, even if you count only those who originally (a) said Bonanza would never make it, (b) called I Love Lucy noncommercial, or (c) dismissed Bewitched as too improbable.

On the whole, the season at this stage seems to us to offer more innovation and higher production values than the previous one. Color also adds an element of excitement. The regularly scheduled series are, as always, the breadwinners; the glitter and shine will come from the specials. This arrangement never satisfies the highbrows and the critics, but viewing trends over the years have indicated it is eminently satisfactory to most viewers. We suspect that this year's audiences, like this year's critics, will behave predictably and that—no matter how they react to specific programs—in acceptance of the total schedule their reactions will be as dependably positive as the critics' have been dependably negative.

No pie in the sky

The proposal of ABC to launch its own satellite system to feed its network deserves prompt and serious consideration. It will no doubt arouse some opposition if for no other reason than its challenge to AT&T's primacy in domestic communications and Comsat's intention to act as chosen instrument for commercial traffic in space.

On the surface ABC's economic projections and technical specifications are persuasive. If a system can be created and maintained as ABC says it can, networking by satellite promises to be more flexible and more efficient than networking by current methods. Unless better arguments are made in opposition, it is hard to see how the public would get anything but benefit from the arrangement that ABC envisions.

The ABC proposal ought not to be confused with direct satellite-to-home television. What ABC wants is, for all practical purposes, a closed-circuit means of distributing its network schedules from origination points to affiliated stations. The public would still get its ABC shows from the stations it gets them from now.

Direct television from satellite to home is another matter. In that development, which must await technological advances before it can be seriously proposed, policy issues of grave importance to the public are involved. Could space stations capable of reaching the whole nation and, for that matter, neighboring nations as well, be successfully mixed with the land-based pattern of stations that now exist? If direct-to-home space stations are to be considered, who are to be the licensees? The answers to those and other questions of equal pertinence cannot be reached without extensive study and debate—but they need not be reached until someone makes serious application for the delivery of television from a satellite to the home receiver. They would not seem to require settlement in the case that ABC has presented to the FCC.

It may be to the interest of those organizations with a stake in existing systems of communication to prolong the FCC's consideration of the ABC petition. If delaying tactics are employed, they ought to be resisted. This proposal can be decided without reference to whatever problems the future may bring in the form of space stations capable of reception by anybody.

FCC: FYI

Ten years ago the British inaugurated the "American Plan" of commercial television by establishing the Independent Television Authority to compete with the non-commercial British Broadcasting Corp. ITA consistently has outstripped BBC in audience, with U. S. network and syndicated features among its most popular shows. Even the BBC, though it still does not sell time, uses a smattering of American syndicated programs.

The British government has been learning something about television too. You can take the word of the prime minister, Harold Wilson, on that.

In addressing the ITA 10th anniversary dinner at Guildhall on Sept. 16, Mr. Wilson commented:

"But one thing I do want to make clear, since the question of program content is continuously before the public. Indeed I receive a number of letters about it from would-be reformists. It is this: I do not believe it is the function of the government to decide or influence the content of the programs produced on television for the entertainment and instruction of the nation's viewers."

Hooray for the British prime minister. His enlightened statement makes it obvious that there are some officials in the U. S. government who can still learn something from the old country.
If you won't do it for yourself, do it for the kids
