Ready but waiting

Word from highest sources: CBS Inc. is in mood to merge, preferably with major corporation, but isn’t apt to make move until ITT-ABC merger clears government, as is expected. Not to be counted out in CBS considerations are companies as big as General Electric, IBM, General Telephone & Telegraph. Officials feel that if government approves ITT-ABC deal, it can hardly deny CBS right to join in combine, which would be big enough to compete with RCA in its present form and ITT-ABC in proposed consolidation.

KFWB to Group W?

Crowell-Collier sees television rather than radio in its future and, as consequence, will sell its No. 1 radio property, KFWB Los Angeles, at unprecedented price (about $11 million) for West Coast radio outlet and higher than existing record of $10.95 million paid by Storer for WTVX (then WMGM) New York in 1962. Currently negotiating for at least one unidentified major market VHF outlet, Crowell-Collier is about to accept offer from multiple owner (not won Inc. Chicago) for KFWB. Westinghouse Broadcasting Co. has been active bidder for station.

CC’s president, Raymond C. Hagel, has expanded company’s operations in educational field through acquisition of Berlitz schools, following earlier purchase of Macmillan, book publishers. Funds derived from KFWB sale (along with recently announced sale of KEWB Oakland-San Francisco for $2,459,000) would be used to finance expansion in television as well as in educational pursuits.

There’s still time

Though revision of commercial time standards of radio and television codes isn’t on agenda of boards of National Association of Broadcasters at meetings this week, use of codes as guidelines by FCC continues. In new batch of “commercialization” cases that staff has prepared for FCC is license-renewal of radio station that is AAB code subscriber and has proposed to broadcast more commercial time than code allows. Staff warns explanation and will recommend letter of inquiry.

In current cases, FCC staff is proposing one-year renewals for seven stations, one of them TV, in Cali-}

closed circuit

tifornia, New Mexico. Nebraska and Texas—all assertedly “overcommercial.” Letters of inquiry are recommended for five radio stations in Oregon and Washington, including that NAB code subscriber, on proposed commercial policies. Two other Oregon stations have been cited by staff for alleged discrepancies between promises and performance on commercials.

Only the beginning

Executive staff changes announced last week by FCC (see page 71) are prelude of others to come. Max D. Puglin, former general counsel who returns as executive director Feb. 1, may yet wind up as chief of Broadcast Bureau, FCC’s most controversial spot, although some months may elapse before this occurs.

Ralph J. Renton, who has been acting chief engineer of FCC since Jan. 1 and was named chief engineer, is expected to retire within year. William H. Watkins, chief of frequency allocations and treaty division, is slated to succeed Mr. Renton (CLOSED CIRCUIT, Jan. 17).

New, newer, newest

There are more premieres to come in ABC-TV’s “second season.” In addition to four new weekly half-hours introduced two weeks ago and new hour added last week, two new full-hour entries are up for time-period decisions this week and are expected to go into schedule soon. Both in color, they’re Avengers, described as involving spies and criminals, and Court Martial, with war setting. ABC programmers also say they’re stepping up number of specials to be presented this spring and summer and that, despite number of new shows going in now, they’ll probably introduce more new ones next fall than either CBS or NBC. It’s all part of strategy to make viewers think of ABC as network to which they can turn for “fresh material.”

Johnson’s scouts

John S. Hayes, president, Post-Newsweek Stations (WPOST-AM-FM-TV Washington: WJYX[TV] Jacksonville, Fla.), and Richard S. Salant, vice president, CBS Inc., depart Jan. 26 for Europe at request of McGeorge Bundy, special assistant to the President for national security affairs, on what is defined as study of “flow of information between East and West.” Both are experts in mass media. Mr. Hayes served as head of European operations of American Forces Radio Network in Europe during World War II and Mr. Salant is former president of CBS News.

No further details were announced but it is presumed inspection in other areas, including Pacific, will develop. Presumably outcome of European study, expected to take two-three weeks, will determine future areas of inspection. Mr. Hayes was television adviser to vice presidential candidate Lyndon B. Johnson in 1960 campaign and was adviser to LBJ during 1964 presidential campaign.

Creativity

Swarms of comic-book look-alikes may follow Batman to television. Perhaps next out of funny papers and onto tube will be “Green Hornet,” property acquired by 20th Century-Fox for Bill Dozier’s Greenway Productions, same team that transferred Batman to TV. Reportedly Fox-Greenway also are negotiating for “Wonder Woman,” comic-book character combining bulging sex with bulging muscles. Hanna-Barbera Productions has bought “Captain Marvel” for project time prime-time TV airing. Switch here is that H-B will do its version in straight comic-book form via animation. At least half dozen other comic-strip productions are being bandied about including “Li’l Abner.”

Slight easing

Though National Collegiate Athletic Association’s TV committee is firmly committed to stick by most of its controls over TV coverage, and so notified FCC last week (see page 71), there’s one point on which it may waver. In future it may permit substitution late in season of games of special prominence for those earlier scheduled on network. NBC-TV last season was refused permission to substitute ULCA-Southern California, Michigan State-Notre Dame and Princeton-Dartmouth for games of lesser interest that had been in original lineup. There’s feeling that similar request next season from ABC-TV, which now holds NCAA rights, would probably be approved.
NOW that we are

not just 7 years old, because we’re younger than that, but 7 stations in number... it’s appropriate to re-state our conviction:

As a relative newcomer to the broadcasting industry, with roots going back only to 1962, we continue to believe our natural interests in growth and advancement can best be served by functioning in each community with utmost responsibility.

“Responsibility” is our guiding light. It is what we intend will distinguish us in this dynamic industry as we presently serve four important markets with four television and three radio stations.

Man of Precision... he’s always sure of his bearings

He should be. He’s been intimately associated with them for a great many years. As a skilled employee of New Departure-Hyatt Bearings Division of General Motors, he operates a hydraulically controlled tracer lathe which machines the outer races of tapered roller journal bearings for railroad cars.

The workmanship is precise, the inspection process rigid, resulting in bearings as nearly perfect as the most highly refined production methods can make them.

Product quality and reliability are watchwords at New Departure-Hyatt. That’s why the people who build, test and inspect these essential bearings are vital to the welfare of General Motors and its customers.

General Motors Is People...making better things for you
Broadcast groups counter CATV drive

Capitol Hill became full-fledged battleground Friday (Jan. 21), when National Association of Broadcasters used mail to "restate" its position on community antenna TV regulation to members of Congress.

In letter from NAB President Vincent T. Wasilewski, legislators were told FCC's action last April in putting microwave-fed CATV's under commission jurisdiction has "not been injurious to already regulated CATV systems. We are confident that the FCC does not contemplate the adoption of rules regarding CATV which would be unreasonable or destructive."

Also Friday, Lester Lindow, executive director of Association of Maximum Service Telecasters, issued statement saying AMST is "confident that neither the Congress nor the commission will be intimidated by a hysterical campaign based upon misinformation."

Both broadcaster organizations were making their pitch to Congress in face of national pro-CATV mail and tele-

FCC trip aim is live CATV

FCC commissioners and members of their staff will journey to Harrisburg, Pa., tomorrow (Tuesday) to inspect Jerrold Electronics Corp.'s king-size community antenna television system.

Three commissioners were definitely scheduled to make trip as of Friday (Jan. 21)—Chairman E. William Henry, Kenneth A. Cox and Robert T. Bartley. However, legal and engineering assistants of all seven commissioners will attend, along with top staff members.

Jerrold system is kind that's of particular concern to commission in its consideration of CATV regulation. It is in large city (80,000 population), which is served by three UHF's, one VHF. And system is one of largest, providing channels of service to expected 15,000 customers by next summer.

...of regulation at this time certainly does not preclude future legislation."

AMST statement referred to "desperate high-pressure campaign" being conducted by CATV interests 'to avoid reasonable FCC regulation of their industry. Statements are being distributed to frighten and mislead both the public and local operators of CATV systems—statements which are patently ridiculous to anyone with any knowledge of the facts.... Public has been told that the FCC wants to dictate the family's choice of television programs and deprive viewers of their favorite shows."

At station level, rebuttal to CATV drive was taking various shapes. In central Texas, KCEN-TV Temple and KWTX-TV Waco had asked for and been given time on two Waco radio stations. Waco and KGHO to respond to statements made in series of spots purchased by CATV system in those cities. Spots were said to have been turned down by several stations and not offered to radio stations connected with TV outlets. Cable system was also taking ads in Temple and Waco newspapers and these were being met by KCEN-TV and KWTX-TV joint ads.

In addition to advertising campaign, it was said cable system, owned by American Cable Co., was using slide on its time-weather channel with word "urgent" on it urging subscribers to write to congressmen.

Gleason off next season; wants to ponder new ideas

Jackie Gleason's weekly one-hour show will not return to CBS-TV next season, network and Peekskill Enterprises Inc. (Mr. Gleason's production company) announced Friday (Jan. 21). Comedian, whose weekly show is in its fourth consecutive season on CBS-TV (Saturday, 7:30-8:30 p.m. EST), noted he had "recently agreed in principle" with network to be back next season but that he had subsequently asked CBS for "a hiatus to go to work on new ideas."

Michael H. Dann, CBS-TV vice president-programs, said decision was based on Mr. Gleason's desire to take time out to develop new concepts for future projects on CBS-TV. Mr. Gleason, who is under exclusive contract to CBS through September 1972, reportedly will receive over $100,000 for each year of contract, even if he may not necessarily make appearance on network.

NBC at new highs for 1965 net sales

Largest sales and profits in NBC's 39-year history were achieved in 1965, according to company's year-end report released today (Jan. 24).

NBC's net sales last year were placed at more than $488 million, exceeding 1964 figure by $53 million.

For 17th consecutive year, NBC TV said, it attracted more national advertisers than any other TV network in 1965, with 321 clients represented. New highs in sales and earnings were achieved by NBC-TV in 1965, with record profits in all four quarters of year, according to report.

NBC-TV began current — 1965-66 season with 96% of its nighttime schedule in color and by end of year all evening programs except one (half-hour I Dream of Jeannie) were presented in color. All major news shows and most sports coverage and special programs were carried in color by end of 1965, NBC pointed out.

Report emphasized that all five NBC operating divisions contributed to record performance in 1965. Divisions are NBC-TV, NBC Radio, NBC News and NBC Enterprises.

How measure city rank?

FCC invites suggestions

FCC is inviting comments on criteria it should use determining market rank, in connection with policy aimed at limiting spread of multiple TV owners into top 50 markets. Commission currently uses American Research Bureau's net weekly circulation ranking.

Invitation for comment on whether this or some other basis should be used was contained in order designating for oral argument application of WGN- Inc. to acquire KCTO-TV Denver, (channel 2) (Broadcasting, Jan. 17).

Application comes under policy which bars acquisition of three TV stations (no more than two VHF's) in top 50 markets without hearing, except for "compelling public interest reasons."

Denver, under present FCC criteria, is 45th market. WGN argued that city is 56th market if either total homes or total TV homes is used as criterion.

Written comments on question are due by Feb. 7. But participation in oral argument will be limited to applicants and to commission's Broadcast Bureau.

Carter gets area CATVs

Franchise for first community antenna TV system in Fort Worth area has been awarded to Carter Communications Inc., Fort Worth-Dallas, according to John Tyler, vice president. Suburb communities of Richland Hills (11,000 population) and White Settlement (13,000) will share 4% of gross income from CATV service as franchise payment. Beginning this year, subscribers will pay $5 per month for strengthened signals from area stations and 24-hour news and weather channel information provided by Carter firm. Carter Communications, subsidiary of Carter Publications (Fort Worth Star-Telegram), owns WBAP-AM-FM-TV Fort Worth-Dallas.

of directors will meet "in the near future" to fill vacancies created by resignation. GAC's TV division represents six prime time programs on 1965-66 network schedules.

Alan B. Miller Jr., VP, elected senior VP and member of board and review board of Geyer, Morey, Ballard, New York. He joined GMB in early 1965 and was elected VP in June.

John Blumenthal, formerly associate creative director at McCann-Erickson, New York, elected VP and creative director of William Esty Co., that city. Before joining M-E, Mr. Blumenthal was associate copy director at Young & Rubicam, New York.

Gerard Mulderrig, Midwest sales manager in Chicago of Metro TV Sales division of Metromedia Inc., elected VP-Midwest manager. George Diede-

rich, manager of Metro TV Sales, St. Louis, moves to New York as account executive. He is being replaced by Herman Lay, account executive with KMOV-TV St. Louis since 1959.

Robert H. Beisswenger, executive VP at Jerrold Corp., Philadelphia, elected president. Mr. Beisswenger joined firm in 1961 as general manager of Jerrold Electronics Corp. subsidiary. He later became VP and then executive VP of Jerrold Corp. He succeeds Milton J. Shapp, who is seeking Democratic nomination for governor of Pennsylvania. Mr. Shapp continues as board chairman.

For other personnel changes of the week see FATES & FORTUNES

Magic Chef moves into TV

Magic Chef Inc., Cleveland, Tenn. (gas range manufacturer), announced its first major TV buy Friday (Jan. 21) in participation with American Gas Association, New York, an NBC-TV's Peter Pan. Three more color specials in NBC are scheduled with AGA, whose budget for shows is reported at $3.5 million.

Complaint against WXUR being withdrawn by Media

Media, Pa., borough council will inform FCC that changes in telephone-interview program of wxur has removed basis for complaints against station.

Council in November relayed to commission views of residents who felt that moderator of telephone-interview program had used show to attack Negroes without offering them time for reply (BROADCASTING, Dec. 6, 1965).

Station at that time appointed new moderator of show and Council on Thursday night (Jan. 20) instructed its solicitor to inform commission that reason for original complaints had been removed.

WXUR is owned by Faith Theological Seminary, headed by Dr. Carl McIntire, whose conservative views are heard on more than 600 stations.

His followers are scheduled to hold convocation on steps of state capitol in Harrisburg, Feb. 12, to protest State House of Representatives' resolution denouncing station for alleged failure to present balanced discussion of controversial issues (BROADCASTING, Dec. 27, 1965).

Schick moves to D-F-S

Schick Electric Inc., Lancaster, Pa., announced Friday (Jan. 21) that it has named Dancer-Fitzgerald-Sample, New York, to succeed Norman, Craig & Kummel, that city, as advertising agency for its electric shaver and appliance products, which bill estimated $4 million yearly ($2.5 million in radio-TV).

In another account switch, Bankers Trust Co., New York, will move from West, Weir & Bartel, New York, to Doyle Dane Bernbach, same city, effective May 1. Bankers Trust, with annual billings of $2 million, is broadcast user in metropolitan New York area.

Buys daily radio series

Celanea Fibers Marketing Co., New York, through West, Weir & Bartel there, signs for daily 5-minute radio series, Fashion in the Air, in 10 major markets with schedule to be expanded later. Show is produced by Woman's Wear Daily trade paper of Fairchild Publications Inc.

Xerox adds one more special

Xerox Corp. Rochester, N. Y., said Friday, (Jan. 21) it will follow up its entertainment special on NBC-TV Feb. 7, that stars Mary Martin, with another, Ballet for Skeptics, on same network on March 11.

Company pointed out move toward entertainment area as contrasted to its association with documentaries, though it will continue to sponsor information and public affairs shows as well. March program includes ballets specially produced in Paris for TV. Papert, Koenig, Lois, New York, is agency.
Who's going to show them a way out?
The ABC Owned Television Stations.

Five years ago KGO-TV in San Francisco began caring for young people in a special way with a drive to help them find summer jobs. Since then, more than 75,000 teenagers have been helped. Last year, with the help of Chicago's WBKB-TV, 47,000 young people found summer jobs.

Detroit's WXYZ-TV and New York's WABC-TV have persuaded thousands of potential dropouts to stay in school with their annual "Careerathon" shows.

And for spring 1966, Los Angeles' KABC-TV is scheduling a "Career Exposition." Young and old alike will be able to find out about job opportunities, careers, and training programs. It will be the largest community service effort in the state's history.

We think you can't do anything better to help people than to show them a way out.

A matter of decency

EDITOR: Having seen the Johnny Carson Show myself, I can understand FCC Commissioner Robert E. Lee's criticism of talk bordering on indecency (Broadcasting, Jan. 17; Dec. 20, 1965).

It would seem that your editorial criticism of Commissioner Lee regarding this matter would be in defense of such possible indecency. After all, it's Commissioner Lee's appointed responsibility to retain some semblance of decency on our nation's television network programs. Although there are many good programs, there are some I would not let my wife begin to look at.

—C. Elwyn Platner, public relations director, Southeastern California Conference of Seventh Day Adventists, Riverside, Calif.

(Obviously Mr. Platner leads a sheltered wife.)

RCA antenna at WFLD(TV)

EDITOR: Thanks for the great story on our grand opening (Broadcasting, Jan. 10).

We have two Marconi 25-kw transmitters and an RCA traveling wave antenna, model TFU-30J. Happy to report that both pieces of equipment are working beautifully.

In fact, our channel 32 signal story continues to be a sensation and when we get the full results via a special study we are making we shall be sure you know about it first.—Sterling C. (Red) Quinlan, president of Field Communications Corp. and general manager, WFLD(TV) Chicago.

Eulogy for 'Buzzard'

EDITOR: I read with regret your report on the demise of "Doc Buzzard," who personified the National Association of Broadcasters' finest effort to date in selling the NAB code to broadcaster and layman alike (Broadcasting, Dec. 27, 1965). I am particularly downhearted to learn that the shelving of this highly informative and entertaining film resulted from "criticism of influential advertisers."

As a broadcast rep my job is to sell those advertisers' products through the medium of radio, and I'm not convinced...
Sir Joshua Reynolds said that EXCELLENCE is never granted to man, but as the reward of labor. We have always worked toward excellence. And we always will.

An initial difference

EDITOR: You have presented a very informative article entitled "Agencies urge clients to join parade." (Broadcasting, Jan. 3)

I would be delighted to be, at some time in the future, a contributor to one of Broadcasting's articles on an appropriate subject. However, I fact did not contribute to the specific article mentioned above. Therefore, you may consider an appropriate way to remove my picture from the list of contributors.

I suspect Mr. Edward G. Gallagher of N.W. Ayer will also have an interest in seeing my picture removed.—Edward M. Gallagher, senior vice president, Compton Advertising, New York.

EDITOR: We're not disturbed, and I hope you don't get that impression, that our Edward (Pat) Gallagher's name somehow got mixed up with another Edward Gallagher's photograph.

I am sending Pat's picture and a brief biographical sketch. Since I'm confident there'll be occasions in the future when Pat will be in the news, I just want to be certain you do have his photograph on file.—Frank Kenesson, Director of Information Service, N.W. Ayer & Son, Philadelphia.
Good taste in commercials is one of the Storer Standards.

Rejecting commercials when we think our listeners would want us to is just one of the ways Storer carries out its communications responsibilities. The exacting standards adhered to by all 12 Storer stations mean more worthwhile listening for the public and more successful selling for advertisers.

Storer Standards make every Storer station a great salesman.
Far above the Crowd

In transit strike, as in blackout and blizzard, it was once again evident that New Yorkers rise to crisis with good humor and determination. It was equally clear that, in time of emergency as in comparative normalcy, Channel 2’s coverage of events rises far above the crowd in quantity and quality. As the New York Herald Tribune said, WCBS-TV’s “was the most comprehensive coverage of all TV stations.”

For example: only Channel 2 had a helicopter sweeping the metropolitan area skies and providing live television coverage of parkways, bridges and streets. Equipped with a live television camera and an exclusive lens stabilizer, the WCBS-TV ship supplied viewers and authorities with the only clear, steady, live view from above. (Traffic authorities were so impressed that they asked for and got two-way radio communication with the helicopter, so that they could monitor crucial traffic points at will.)

For example: Channel 2, on the air 24 hours a day, sharply expanded its news coverage during the morning and evening rush hours throughout the strike—plus hourly reports day and night, plus special broadcasts whenever the news warranted, plus moving bulletins across normal programming at other times of the day and night.

For example: Channel 2 had television cameras at 16 key points throughout the area, supplying live coverage as news developed. Among the locations: the Americana Hotel negotiation site, City Hall, the Civil Jail and Bellevue Hospital, Grand Central and Penn Stations, the Traffic Control Center and eight different traffic points.

Perhaps it takes a crisis to dramatize and bring into true perspective the service a local television station can perform in keeping all members of the community fully informed. New York audiences well know, however, that the far-above-ordinary performance of Channel 2’s television journalism is indeed an everyday fact of New York life.
Smokey Bear: a voice in the wilderness

Smokey Bear was a "war baby". He first appeared on a poster in the forest fire prevention campaign which started in 1942 as an emergency project of The Advertising Council for War. The original illustration of Smokey bore little resemblance to the Smokey we know today. He was small, timid, uncertain—uncertain, we like to think in retrospect, because of the magnitude of the job he was about to undertake.

Each year, the nation was being subjected to over 200,000 forest fires—almost 600 every day. And 30 million acres, an area the size of New York, were burning annually. Smokey's job, as the new symbol of forest-fire prevention, was a formidable one.

Shortly after this introduction in print, Smokey began to steal his way into the hearts of Americans of all ages. As he became identified with the campaign, he developed into a more forceful animal. And he acquired a voice.

**Smokey Speaks** - A voice was needed because of the increasing importance of radio and television exposure for all Advertising Council projects. The voice selected belonged to Jackson Weaver, long-time showman and radio performer in Washington. His first performance as the voice of Smokey Bear took place in 1946 and he has been Smokey's spokesman ever since.

Mr. Weaver has worked as carefully in the development of Smokey's voice as the artists have through the years in their depiction of Smokey himself. Smokey in 1943 was a child of an early gruffness and growl (produced with Mr. Weaver's head in a pail) to a more friendly, understanding voice, consistent with the public's ever increasing acceptance and support of Smokey's program for forest-fire prevention.

The early television commercials featured an animated Smokey and appealed mainly to younger audiences. In recent years, we have also produced live-action commercials directed to adults and prime-time placement. The friendly fire-preventing bear was one of the first television stars to switch to color, one of his many firsts in public-service campaigning.

**Song and Stars** - Three years ago, the agency created and produced for radio a three-minute folk ballad, "The Crying Trees," the first time this technique had been used in an Ad Council project. Through the years, Smokey has been joined in his broadcast campaign by many other dedicated firefighters, ranging from celebrities such as Lorne Green, Raymond Burr (a one-time member of the Forest Service), Walter Brennan and Rod Serling to the Chipmunks and Kukla and Ollie.

Since the inception of the national campaign in 1943, Foote, Cone & Belding has been the volunteer agency. In 1959, Liller, Neal, Battle & Lindsey, of Atlanta, offered to help attack some unusual forest-fire problems in the South and has served since in that area. Both agencies provide the talent and resources of their staffs without charge.

The volunteer industry coordinator for 23 years, until his retirement from the position last May, was Russell Z. Eller, director of advertising, Sunkist Growers Inc. The new coordinator is James P. Felton, director of advertising, Seaboard Finance Co.

Each year new radio and television commercials are created in our copy department and presented to a committee of state foresters and U. S. Forest Service personnel at a meeting in Washington. Upon approval, the commercials are produced under agency supervision in Hollywood, then distributed in special kits by The Advertising Council in New York.

**Universal Use** - This year's radio kits went to the networks and 4,375 stations. Television kits were mailed to 660 stations and the three networks.

Special range fire prevention transmissions were distributed to 1,020 radio stations in the western and plains states. Liller, Neal, Battle, & Lindsey produced special fire-prevention commercials which were sent to 1,450 southern radio stations and 180 television stations.

Is the material used? Unquestionably. The Advertising Council reports that last year the Smokey Bear campaign received 614,979,000 radio and television home impressions through network programs alone. It is estimated that the additional support contributed by local stations more than doubled this figure.

Gordon Kinney, director of radio and television for The Advertising Council, says: "The Smokey Bear broadcasts have sparked the largest imaginative public service broadcasting of any campaign The Advertising Council has conducted."

**A Big Job Done** - How effective has Smokey been? Part of the story is told in this simple comparison of the number of man-caused fires when the campaign began, 200,000, and the number in 1964, slightly over 100,000. And in the same period visitors to our forests increased tenfold. The drop in acreage burned also is dramatic: from over 30 million acres when the campaign began, to 4 million acres in 1964.

Despite this success, the past two years have seen an upward trend in the number of fires and the acreage burned. This has been a result of unfavorable weather and an unusually heavy volume of travel to the forests. So, although Smokey has been on the job for more than 20 years, now, he's still got a big job ahead.

The U. S. Forest Service credits the campaign with saving America over $10 billion in timber that wasn't burned, watersheds that weren't eroded, recreation areas that weren't destroyed, all because of a new national conscience inspired by a voice in the wilderness—Smokey's.

Edward Wilson joined the Los Angeles office of Foote, Cone & Belding 15 years ago. He is vice president and management supervisor for Angel Records, Capitol Records and Seaboard Finance Co. For the past four years, he has also been in charge of the Forest Fire Prevention account. Mr. Wilson is a member of the board of directors of the Pasadena Tournament of Roses Association and serves as chairman of the Rose Parade's television and radio committee.
Old-fashioned respect for its audience...that's why 960 KC WELI sells. The sound of New Haven.
A calendar of important meetings and events in the field of communications.

Jan. 1—Deadline for reply comments on FCC's proposed rulemaking to allow remote control operation of VHF stations.

Jan. 2—Deadline for entry deadline for fourth annual station award and second annual international award of National Academy of Television Arts & Sciences. Entries should be sent to 54 West 46th Street, New York.

Jan. 4—Entry deadline for proposed rulemaking on equity holdings in radio and television station making more than 83% of nonnews programming.

Jan. 5—Entry deadline for fourth annual station award and third annual international award of National Academy of Television Arts & Sciences. Entries should be sent to 11201 Park Boulevard, Brooklyn, N.Y. 11201.

Jan. 6—Board of Broadcast Directors meeting.

Jan. 7—Deadline for entry in the George Polk Memorial Awards competition for outstanding achievement in journalism sponsored by Long Island University. Proposals should be sent to Professor Jacob H. Jaffe, George Polk Memorial Awards, Long Island University, 2600 State University Drive, Lakefront Campus, Brooklyn, N.Y. 11201.

Jan. 11—Hallmark Hall of Fame Award dinner and presentation.

Jan. 15—Deadline for nominations for annual Russell L. Cecil Awards (500 national award and $100 regional awards) for outstanding script on arthritis by the Arthritis Foundation. Submit entries to: 1012 Avenue of the Americas, New York 10036.

FEBRUARY

Jan. 1—Entry deadline for annual Sigma Delta Chi awards for distinguished service in journalism. Submit entries to: 53 East Wacker Drive, Suite 556, Chicago 60601.

Jan. 12—Entry deadline for comments on proposed rulemaking to allow free access to emergency, nonbroadcast communications by television networks (ABC, CBS and NBC) to equity holdings in no more than 50% of nonnews networks during the hours of 7 p.m. to 11 p.m., or to two hours of nonnews programming in same period, whichever is greater.

Jan. 15—Proposed rulemaking would also prohibit three TV networks from domestic syndication and foreign sales of independently produced programs. Former deadline was Oct. 21.

Feb. 1—Deadline for reply comments on FCC's further notice of proposed rulemaking relating to formation of expanded use of UHF television frequencies. FCC is still considering additional channels 2 through 83 inclusive for new class of 10-kw stations with 300-foot antenna limitation. Former deadline was Jan. 5.

Feb. 1—Seminar series sponsored by the
Republic anticipates needs
of drastically new
mass transportation systems —
with modern steels

Radically faster public transportation systems are
among the most urgent needs of American society.
Present methods of intercity and suburban transpor-
tation, public and private, are seriously inadequate.
Hundreds of miles of almost continuous metropolitan
areas, in several areas throughout the country, are
rapidly building into grand-scale traffic jams.

To speed up the massive traffic flow through the
modern megalopolis, several leading American indus-
tries are developing a variety of fantastically high-
speed special systems for the future — on the ground,
above the ground, and underground . . . on rails, cush-
ions of air, and even in pneumatic tubes.

The modern technology and materials needed to
build these systems are already available — including
the lighter weight, higher strength steels developed by
Republic Steel. One dramatic example of the high-
speed mass transportation of the near future is a
supertrain proposed by The Budd Company. These
lightweight, streamlined cars, depending on such
steels for their structural strength, will ride complete-
ly on rubber and air, with a top speed of 160 mph.

Republic Steel research and production capabilities
continue to pioneer the long reach of steel into new
and vital uses, anticipating needs of the future. How-
ever, the expenditures on facilities for modern research
and new products can only be made when adequate
profits are available. Unfortunately, in the steel indus-
try profits are far below those of most other industries.
Our ability to continue to serve the nation in the
future as we have in the past will depend, in a large
degree, on the adequacy of our profits.

REPUBLIC STEEL
CORPORATION
CLEVELAND, OHIO 44101

Feb. 10—Television Commercials Production Workshop presented by the International Radio & Television Society. Panel will discuss video tape. Chairman is Charles Adams of Videotape Center. Johnny Victor theater (Rockefeller Center), New York.

Feb. 14-17—Broadcasting workshop seminar sponsored by the Phi Delta Kappa honorary professional radio-TV-drama fraternity at the University of Cincinnati. The theme will be "Radio and Television's Challenge of Tomorrow." Student Union building, University of Cincinnati.

Feb. 15—The second Elmer Davis Memorial Lecture presented by the graduate school of journalism of Columbia University. Speaker will be David Brinkley, NBC correspondent. Columbia University, New York.

Feb. 15—Deadline for submission of study from Arthur B. Little Inc., independent research organization, on the business of TV program production and procurement and TV program syndication. The study, which is being prepared for the three major TV networks, relates to the FCC's proposed equity holdings in more than 50% of all rulemaking to limit ABC, CBS and NBC to nonnews programming between 6 and 11 p.m., or to two hours of nonnews programming in the same period, whichever is greater.

Feb. 15—Annual stockholders' meeting of National General Corp. Fox Wilshire theater, Beverly Hills, Calif.

Feb. 24—Annual winter meeting and election of officers of Wisconsin Broadcasters Association. Park Manor Inn, Madison.

MARCH

March 1—Annual winter meeting and election of officers of New York State Broadcasters Association. Ten Eyck hotel, Albany.

March 5—Annual Hollywood Festival of World Television. Seminars are scheduled on color television, labor and finance, and programming and sales. Holiday Inn, Palm Springs, Calif.

March 8—"Five To Watch" annual banquet of the Detroit chapter of American Women in Radio and Television. Speaker will be Peter Jennings, ABC News, Recess Club, Detroit.

March 10—Second annual stockholders meeting, Cox Broadcasting Corp., Atlanta.

March 10—Television Commercials Production Workshop presented by the International Radio & Television Society. Panel will discuss the ingredients of a good commercial. Johnny Victor theater (Rockefeller Center), New York.

March 13-16—Board meeting, National Community Television Association. Del Monte Lodge, Carmel, Calif.

March 15—Deadline for entries for the Alfred P. Sloan Radio-TV Awards for Highway Safety offered to the broadcasting and advertising industries for their service in community traffic accident prevention and for their support of nationwide traffic safety programs. Send entries to Alfred P. Sloan Radio-TV Awards, 200 Ring Building, Washington 20006.

March 18-23—1966 International Television Programmes Market to be held in Cannes, France. For information contact Christopher Cross in New York at (212) F. Plaza 0830.

Indicates first or revised listing.

New horizons for broadcasters

More publicly held firms eager to follow those that have already expanded into other industries if they can find a deal that will match their requirements

Diversification and lots of it—much already executed and much anticipated—is turning the middle 1960's into broadcasting's "era of acquisition" and keeping the publicly owned station operators among the hottest performers on the stock market.

ABC agrees to be bought by ITT for $370 million. Storer Broadcasting buys Northeast Airlines for an estimated $25 million. Taft Broadcasting announces plans to buy Hanna-Barbera Productions at a price estimated over $10 million. Wometco Enterprises buys a refreshment company in Washington for a reported $1 million and takes a one-third interest in Grand Bahamas Theatres Ltd. for an undisclosed price. Community antenna systems are sought by station owners from East Coast to West.

Broadcasters are clearly in an unprecedented era of outside acquisition that shows no sign of decelerating. The publicly held broadcasters are continuing to wheel into new holdings and, while they do it, are maintaining the respect of Wall Street observers, who regard this group generally as one that knows how to keep on making a fancy return on equity.

Judging from the diverse opinions of security analysts, no pat formula covers the directions the movement is taking, but the motivation is clear. Broadcasting continues to be a high-profit, strong-cash-flow business. And with few expansion possibilities left in station acquisition these companies have revenues on hand that must be put to work in outside investments or be cut down by taxes.

In the past year deals seemed to pop as quickly as the rumors of their imminence, and 1966 looks apt to offer more of the same. Reports persist that Capital Cities Broadcasting is close to a deal with a service company, that Metromedia may soon announce a further media acquisition, that CBS is anxious to push its diversification efforts faster.

Reputation Good — One question raised over the past several years when surveying the new year's prospects for the broadcasting stocks has been: "How can they possibly do as well this year as last?" But this year there's a new twist on the question.

Analysts are agreed that the broadcasting issues are now highly respected. But with this respect has come a new situation—higher prices relative to earnings.

James Schuster, an analyst at Merrill Lynch, Pierce, Fenner & Smith, notes the group broadcasters' prices are moving up to 20 times earnings and over, although traditionally they've been well below that. One way of matching their past records is through broadening the base of their earning power with properties.

A researcher at Oppenheimer & Co., noting that diversification moves in the broadcasting industry have been "all over the lot," says: "If there's any recognizable pattern it's that these people are seeking businesses with a return on equity close to that achieved in broadcasting. Service companies follow this description because they involve relatively small capital investments and are suited to broadcasters' experience in marketing and merchandising."

A Clark Dodge analyst thinks the public broadcasters are faced by a real problem in knowing where to turn with their money. "They're real swingers," he says, "and they're used to fast growth. Most are empire builders."

CATV is something they might like to get into, he continues, but they'd damn whichever way they decide, because CATV's are so high-priced and troubled with copyright threats and impending government control that they don't really know what they're planning to if they can find a suitable deal, are listed below with their price ranges during 1965, the net change for the year, and the quotation as of the close on Jan. 19.

NEW HORIZONS FOR BROADCASTERS continued

buying.

More of the Same • Emanuel Gerard of Roth Gerard & Co., a close follower of the broadcasting industry, has this to say: "Diversification is inevitable. It is going to happen over and over again because of the kind of cash flow they have."

One industry analyst, clearly excited with the flux situation, offered this comment: "Cox Broadcasting could deal tomorrow morning. So could Capital Cities and Metromedia always. That guy (John Kluge, Metromedia board chairman and president) can do a deal any time."

George McLaughlin of Reynolds & Co. thinks the publicly owned broadcasters are going to find their future growth in unregulated industries, with Storer Broadcasting's purchase of Northeast Airlines (under the CAB wing) being a notable exception. But he also says the broadcasters won't go after just anything. Most of them would prefer to stay in the related business and the natural one has been community antenna television. It's his opinion that most of the public broadcasters feel there won't be any significant limits put on CATV that would prevent its continued growth.

Baker Weeks analyst Tomio Saito feels Storer's Northeast purchase is the most extreme sort of diversification that a broadcaster would undertake, and he doesn't look for any further surprises of this magnitude from the industry. It would have to be considered the major move of the year by a broadcaster, he says.

Most are now concentrating their acquisition efforts in service industry, programming and publishing areas, and his firm doesn't expect them to go into manufacturing, according to Mr. Saito. Again there are exceptions: the union of Kaiser and Cox Broadcasting for manufacture of CATV gear, for example.

Strong Base • For the group broadcasters, CATV at this point doesn't offer the kind of growth opportunities these people are looking for, according to the Baker Weeks analyst. The price of systems is getting too high, he says, and building systems from the ground up means fighting for franchises and long delays before any return on investment is realized.

Mr. Saito and other analysts still point to the underlying strength of broadcasting stocks, that is, their ability to continue growing at approximately 10% yearly in earnings merely on the strength of their station operations. And some researchers are willing to carry this prognosis through the next five years.

With the economy strong and demand for time growing, rate increases alone are expected to keep the broadcast issues buoyant. A 10% annual profit increase compares to approximately 4% gains expected for the average corporation.

Each of the major publicly held broadcasters has established its own expansion image on Wall Street.

Metromedia, for example, is considered essentially mass media-minded with an eye out for entertainment properties that could be aided by advertising efforts of its own media.

Cox Broadcasting is thought by analysts to be willing to range into areas outside of broadcasting although to date it has demonstrated its major interest in CATV.

Cox was also interested in getting

Prospering radio-TV firms diversity

SIZEABLE GAINS IN STOCK QUOTATIONS IS RECORDED BY MOST

Diversification is the order of the day among radio and television's publicly held companies. During 1965 a number broadened their earnings' base by acquiring firms in other fields or in communications industries. Several are exploring the possibilities of further diversification. In almost every case the market quotations on their stock (prices, page 29) showed substantial increases.

Following are capsule reports on the broadcast and other holdings of typical companies in this group. They are listed in alphabetical order.

American Broadcasting Companies Inc., New York:

Other holdings—Chain of motion picture theaters, Silver Springs, Weeki Wachee, both Florida (amusement centers), ABC-Paramount Records, Prairie Farmer, Wallace Farmer, Wisconsin Agriculturist (publications), 12% of Microwave Associates Inc., 19% of Technical Operations Inc., preferred stock convertible to maximum of 20% of common stock in Visual Electronics Corp. (electronics). Early in December 1965, ABC and ITT announced an agreement to merge in a transaction estimated to be valued at $370 million.

Avco Corp., New York:

Broadcasting holdings—Subsidiary Avco Broadcasting owns WLW and WLWT(TV) Cincinnati, WLWD(TV) Dayton, WLWC (TV) Columbus, all Ohio; WLWI(TV) Indianapolis; WOAI-AM-FM San Antonio, Tex.; and WVDC-AM-FM Washington. Also owns 50% of Avco-Meridith Inc. (community antenna television systems).

Other holdings—Avco is a diversified company which manufactures and operates aerospace structures, engines and motors for aircraft, marine and industrial use, electronics equipment, farm equipment, ordnance, radiation devices, research, financing, gas and electric ranges, refrigerators, clothes washers and dryers, heating equipment, abrasives.

Bartell Media Corp., New York:

Broadcast holdings—WOKY Milwaukee, KCBQ San Diego, WADO New York. Also Telecuracao, Curacao, and Telearuba, Aruba, Netherlands Antilles.

Other holdings—Publishes and distributes magazines, annuals and paperback books.

CBS Inc., New York:

an American Football League franchise in Denver and Atlanta but was thwarted in these attempts. Storer Broadcasting sought a football franchise in the National Football League.

**Fit the Mold** - One security analyst explains that football teams have a high cash-flow value, part of which stems from fast depreciation of player contracts. Outside their obvious value as entertainment vehicles for already owned media, athletic franchises may fit the broadcasters' financial mold.

Capital Cities Broadcasting is felt to be avidly interested in acquisition, but cautious in approach. General Wall Street opinion is that this company would prefer to merge with a service operation with a modest cash investment relative to the acquired company's potential demand. An example offered by one broker is a national cleaning contractor, where merchandising experience would be important.

Most security analysts following the broadcasting issues feel CBS is moving more slowly than it would like to in diversification. Most of them agree that the company doesn't seem interested in making the ITT-ABC type of deal; that it's interested in taking over, not in being taken over.

CBS Vice President Michael Burke, who works on the company's diversification program, says compatibility with present operations is the first rule when considering new properties. He says CBS has held no recent merger discussions with companies larger than itself, but acknowledges that this hasn't been set down as a formal company policy. Mr. Burke says CBS still has a strong interest in publishing companies and has been in discussions with a number of them.

Capital Cities Treasurer Donald Pels, reviewing recent diversification moves by broadcasters, points to hidden similarities between industries that make some seemingly wild moves a lot more reasonable. He cites the airline purchase by Storer as one example: "For one thing it's a government-regulated industry and for approximately the same reason broadcasting is. There are a limited number of competitors possible."

**The Profit Dollar** - There's also a similarity of internal economics, he continues. "The last sales dollar you make is always a profit dollar, whether it's from the last plane seat you sold or from the last TV spot you sold," Mr. Pels said.

Cowles Communications Inc., New York:

Broadcast holdings—KRMN-AM-TV Des Moines, WREC-AM-TV Memphis. Owns 76% of Universal Cablevision Inc. (community antenna systems in Florida). Purchase of wesh-TV Daytona Beach, Fla., pending FCC approval.

Cox Broadcasting Corp., Atlanta:

Broadcast holdings—WSB-AM-FM-TV Atlanta, WHIO-AM-FM-TV Dayton, Ohio; WSOB-AM-FM-TV Charlotte, N. C.; WWOZ-AM-FM Miami, WJCL-TV Pittsburgh, KTVU (tv) Oakland-San Francisco. Also owns community antenna television systems, is 50% owner of Kaiser-Cox Corp. (CATV equipment manufacturer).

The treasurer of another group broadcasting company said "the name of the game is 'make money on your equity.'"

"Within our own industry, we can go vertically or horizontally," he went on. "We could buy an advertising agency—I don't think any broadcaster has ever done it—or maybe an advertiser as Rollins did [Satin Soft Cosmetics, 1964], or we could expand further in media holdings."

Another financial man with one of the major group operators noted that three of the best performers among these stocks are still generating profit advances from recently acquired broadcast properties.

These are Cox, which acquired wicb-TV Pittsburgh; Capital Cities with its recently acquired Goodwill properties, and Taft, which took over the majority of Transcontinent properties in 1964. Nine-month profit figures showed Cox up 42%, and Capital Cities ahead 69% and Taft with a 31.5% gain.

The same industry observer said for these groups the only way to repeat that sort of growth is through broadening their profit base with new acquisitions.

General Electric Co., New York:

Broadcast holdings—WGY, WGRF (FM), WRGR-TV Schenectady, N. Y. Purchase of WSBX-AM-FM-TV Nashville pending FCC approval. Also community antenna television systems.

Other holdings—Manufactures electronic and electrical industrial and consumer equipment and products.

General Tire & Rubber Co., Akron, Ohio:

Broadcast holdings—Through RKO General Inc. owns WGMG-AM-FM-TV New York, WHAG-AM-TV and WRKO (FM) Boston, KJH-AM-FM-TV Los Angeles, KTVF-AM-FM San Francisco, WHBQ-AM-TV West Palm Beach, WFGM-AM-FM-FM Washington, WHTC-TV Hartford, Conn.; CKLW-AM-FM-TV Windsor, Ont. (Detroit); Yankee Network (New England); also community antenna television systems. RKO General Photovision Co., licensee of WHTC-TV Hartford, Conn., is engaged in over-the-air pay TV operation under experimental authorization from the FCC.

Other holdings—RKO General owns Independent Video Theaters Inc., Oklahoma City, which in turn owns chain of motion picture theaters in the Southwest, and is parent company of Vumore Inc. (group CATV owner); Independent Video Theaters owns 29.15% of H&B American Corp. (group CATV owner). Among other holdings RKO General owns 100% of RKO Pictures Inc., 82% of Pittsburgh Outdoor Advertising Corp., and 58.6% of Frontier Airlines Inc. General Tire & Rubber Co. (tires and rubber products) also owns 84.6% of Aerojet-General Corp. (aerospace engines and fuels).

Meredith Publishing Co., Des Moines:

Broadcast holdings—KCMO-AM-FM-TV Kansas City, KPHO-AM-FM Phoenix, KSTP-AM-FM-TV Sacramento, N. Y. Also 50% owner of Avco-Meredith Corp., engaged in community antenna television ownership.

Other holdings—Publishes Better Homes & Gardens, Successful Farming, text books, consumer books, manufactures world globes.

Metromedia Inc., New York:

Other holdings—Foster & Kleiser

**BROADCASTING**, January 24, 1966 31
PROSPERING RADIO-TV FIRMS

Inc., outdoor advertising; Metro Transit Advertising, Los Angeles and San Francisco; Ice Capades, Los Angeles; Diplomat Magazine, Washington; Raymond-Dickie Inc., Boston (direct mail), which it acquired Jan. 3, 1966 for sum said to be in excess of $3 million.

Natco Broadcasting Co., Augusta, Ga.: Broadcast holdings—WJBF-TV Augusta, Ga.; KTVE-TV El Dorado, Ark. (Monroe, La.), WROZ Evansville, Ind. Also owns community antenna television systems. Pending approval of stockholders of both companies is the merger of Natco Corp. (parent company of Natco Broadcasting Co.) and Polaris Corp., Milwaukee-based diversified company with broadcast holdings (WWV [tv] Evansville, Ind.; KTDI-TV Fargo-Grand Forks and KCDN-TV Pembina, both North Dakota; WAFI Louisville, KFLS Santa Rosa, and KXOA-AM-FM Sacramento, both California, as well as leasing, warehousing and real estate in a stock transaction with an overall valuation of $3.84 million. Tentative agreement calls for Polaris to sell off its North Dakota TV stations and its radio stations in Louisville and Santa Rosa before consummation.

Other holdings—Natco Corp. manufactures clay products for building and home use.

Rollins Broadcasting Co., Wilmington, Del.: Broadcast holdings—WAMS Wilmington, Del.; WNJR Newark, N. J.; WBBR Harvey, Ill.; WRAP Norfolk, Va.; WGBE-AM-FM Indianapolis, WCHS -AM-FM Charleston, W. Va.; WERV Pensacola, Fla.; KDAV Santa Monica, Calif.; WPTZ (TV) Plattsburgh, N. Y.

Other holdings—Orkin Exterminating Co., Atlanta; Satin Soft Cosmetics of Delaware Inc.; Rollins Outdoor Advertising (Texas, Delaware, Pennsylvania, District of Columbia, New Jersey, Maryland, Mexico), real estate (10,000 acres in Okeechobee county, Florida, with 500 acres in citrus fruit).

Other holdings—RCA manufactures television and radio receivers, phonographs, tape recorders, computers, engages in research. Also RCA Communications Inc. (international communications), RCA Institutes Inc. (technical training), RCA Service Co. (home instrument repairs and servicing), RCA Defense Electronics Corp., RCA Inter-

DIVERSIFY continued

national Service Corp., RCA Victor Distributing Corp., RCA Credit Corp. RCA announced early in January that it had reached an agreement in principle to purchase Random House Inc., New York book publishing firm, for RCA stock valued at $37.7 million.

Other holdings—Interlocking ownership with Reeves Industries Inc., New York (Reeves Soundcraft Division). Also owns real estate.

Other holdings—Owns 87% of Northeast Airlines which it bought July 30, 1965 for $25 million including notes. Also owns Nemir Industries Inc., Bethesda, Md. (plastic dishes).

Other holdings—Publishes Time, Life, Fortune, Sports Illustrated magazines; Time-Life Books; textbooks and instructional material (Silver Burdett Co.). Owns East Texas Pulp & Paper Co., Printing Developments Inc.

Other holdings—Manufactures electronic and electrical industrial and consumer equipment and products.

Other holdings—Motion picture theaters in south and central Florida, Beaumas, soft drink bottling companies in Tennessee, New York state and Nassau; automatic vending companies in Florida, Tennessee, South Carolina, District of Columbia, Maryland, Panama and Nassau; Sceraum Miami.

Commercials in production...

Listings include new commercials being made for national or large regional radio and television campaigns. Appearing in sequence are names of advertisers, product, number, length and type of commercials, production manager, agency with its account executive and producer.

When it comes to PEOPLE...

WHO Radio is your first, second, third and fourth choice in Iowa!

2,757,600 PEOPLE IN WHO RADIO'S "IOWA PLUS"

282,500 PEOPLE IN DES MOINES METRO AREA

In some parts of the country, you can "buy radio" with your eye on metro areas only — and reach astronomical numbers of people even with local or regional stations.

Not so in Iowa.

WHO Radio — the only 50,000-watt, 1-A clear channel station in Iowa (and located very near the state's center) covers 89.3% more people than live in the entire Des Moines metro area.*

(60.4% more people than live in all SIX of Iowa's metro areas, combined!)*

As a matter of fact, radio stations in only 22 other markets cover more people than does WHO Radio. That's why more and more national advertisers put WHO on their "top 25" list.

And this is not entirely a matter of power, tower, frequency, or other physical facts. WHO Radio has the same kind of prestige and impact in mid-America that is always accorded to those companies (in every industry) that have worked the hardest, and spent the most money, time and effort to be the best. And we are still doing just that. Ask PGW to prove it!

Source: ARB audience estimates (Nov. '65 vs. Nov. '64), subject to qualifications on request. Homes reached refer in each case to homes delivered by the Twilight Zone station in the Twilight Zone period.
In all size markets, in all time zones, in all day-parts — daytime, nighttime, anytime — TWILIGHT ZONE shoots ratings into orbit.

TWILIGHT ZONE has completely changed the indie-station picture in tough, competitive New York. Slotted vertically on WOR-TV, three prime-time half hours in a row, the series’ tremendous success has been publicly credited with helping to catapult the station into the prime-time number one rating spot among the market’s independents.

In Detroit, programmed once a week in prime time, TWILIGHT ZONE has practically tripled the number of homes its time period delivered last season. Programmed in prime time twice weekly, it upped “homes” 138% in Chicago and 44% in Boston.

Stripped “cross the board in late afternoon/early evening time, TWILIGHT ZONE boosted the number of homes delivered an impressive 210% in Los Angeles...35% in Portland (Ore.)...55% in San Francisco.

What’s more, TWILIGHT ZONE attracts all members of the family at any hour of the day. Even in early time periods, adults comprise an average 54% of its audience.

Pillsbury, Bayer, Ajax, Clorets and Breck think TWILIGHT ZONE is great. So do Micrin, Personna, Dristan, Philip Morris and Shell. And so do many, many more of the biggest national spot advertisers in the country. So why fight it? Give us a call, early or late! CBS FILMS

TV discounts down the drain?

What CBS-TV has in mind: fixed rates based on season, time of day, strength of show and its opposition—no matter how much the buyer spends

The CBS-TV network was reported last week to be near a decision on a revolutionary new “flat-rate” pricing system that would virtually eliminate discounts and could have far-reaching effects on price structures of all major media (Broadcasting, Oct. 25, 1965). The new system would set fixed prices that vary according to the season of the year, the time of day or night and the strength of the program and its opposition on the other networks. The only discount left, out of a combination that now can add up to 30% or more, would be one, averaging about 3%, for 52-week continuity.

CBS-TV spokesmen confirmed that a new rate card, No. 17, has been under development for more than two years and that it introduces a flat-price concept that would be a departure in media advertising. But they stressed that they did not know whether it would be adopted, much less when.

Although some CBS sources had reservations about whether the new concept would be put into effect, others at high management levels indicated it would be adopted within a few weeks and perhaps in a matter of days. If adopted, it is expected to become effective for daytime shows this spring or summer, possibly in May or June, and for nighttime shows with the start of the 1966-67 season next September.

Higher Rates? There were conflicting views of what the new price structure would mean to sponsors. CBS sources said that in revising the rates to reflect the loss of discounts their intent all along had been to “penalize” existing advertisers, that some time periods would go for higher and some for lower prices than the net paid now, and that if there should be any overall increase it would be “moderate,” not “substantial.”

Some agency and advertiser sources who had been briefed at least generally by CBS-TV authorities estimated, however, that in total the plan would increase advertising costs on CBS-TV by anywhere from 7% to 15%.

The increase for Procter & Gamble, TV's biggest customer, whose expenditures on CBS-TV during the first 10 months of 1965 were believed to approach $50 million, was put at 8% to 10% by one agency executive. A P&G official declined to confirm this estimate but said the company would have to “review” its advertising program if the increase was that much.

Mixed Opinion Some CBS competitors branded the new concept as a device to raise rates. Others looked on it as a logical move and said that, if it does invoke a price increase, “a lot of that increase would have come anyway”—to pay for color and because CBS is in a position to demand higher prices now than it was a year ago.

The move was also interpreted widely as intended to meet growing congressional concern over media discount practices. Senator Philip A. Hart’s Antitrust and Monopoly Subcommittee has been investigating the subject for months and has indicated plans to hold hearings this year.

It was reliably reported that Senator Hart (D-Mich.) has been “informally kept informed” of the CBS plan. Critics of existing discount policies, and of TV discounts in particular, contend that they discriminate in favor of the big advertiser and against the small one, at the same time tending to limit competition among networks and

Sears is warming toward national TV

Sears, Roebuck & Co.'s major plunge into network television on a regular weekly basis appears to be more of a question of when than whether.

Reports of the possibility that Sears may soon make a multimillion dollar commitment in network TV (Closed Circuit, Jan. 17) were strengthened last week by comments of Marvin C. Lunde, national retail sales promotion and advertising manager of Sears, in talks before the 14th annual national Retail Advertising Conference in Chicago.

Asked whether Sears may sign for a new Garry Moore series on CBS-TV, Mr. Lunde said the network had offered the program but it was only one of several presented and considered. He indicated, however, that it is inevitable that Sears will expand its share of advertising dollars for both television and radio.

During another session at the conference Mr. Lunde discussed the Sears philosophy in print advertising and pointed out that the retail giant is “concerned” about the soaring costs of print in the past couple of years. In talking about the need for better quality in print advertising generally and greater attention-getting copy, Mr. Lunde noted that “the reading time in newspapers today is probably fleeting.”

Until now Sears's use of radio and television has been chiefly at the discretion of local-store managers. Broadcast billings have totaled only about 2.5% of Sears's ad dollar. For more than a year, however, Sears has tested spot TV on more of a national basis. Sears's agencies include Ogilvy & Mather, New York, and North Advertising, Chicago.

Sears has no breakdown of actual broadcast dollars in its ad budgets. In 1964 the company spent $108 million in all media, with $76 million of this amount going into newspapers. In 1965 newspapers got over $80 million out of a total budget estimated to exceed $112 million. Sears's fiscal year ends this month.

"Advertising is nothing more than selling," Mr. Lunde told the conference. He said there is too much reliance on advertising as a "crutch" and explained there must be a balance with good planning, merchandising and sales promotion.

A banana seal with a lot of appeal

The little seal on United Fruit Co.'s Chiquita Brand bananas turns up in a variety of unlikely places in the color commercials scheduled for prime time in 50 top markets during 1966. In a swinging beach scene that is set to a musical back-

ground, everyone gets stuck with a seal: guitarist, life guard, the disinterested newspaper reader in the sand, little brother and girls doing the frog.

The campaign for the Boston firm, to run on TV and in magazines, is through BBDO, New York.

perhaps even among stations.

All Alike • Under the new CBS approach any given segment would carry the same price tag for all advertisers, big or small.

But CBS authorities insisted that the move, if adopted, would not be "a reaction to Washington" but would represent "a reaction to the realities of the marketplace."

The current rate card is "an anachronism," they said, and CBS has been considering the new concept for at least five years and actively working to develop it for more than two—in either case, since long before Washington began to show concern.

Well-placed sources said the new concept was designed to "bring the rate card into line with the way network sales are made these days." They specifically cited the decline in full and alternate sponsorships, dating back several years and the concurrent rise in participating or minute sales.

It was also noted that in practice some programs always bring better prices than others and that sometimes a network finds itself with "distress merchandise" on its hands and has to make extra concessions.

One result of the new approach presumably would be to eliminate or at least curtail haggling by making prices "more realistic" in the first place, according to some sources familiar with it.

The Plan • There would be two sets of prices.

One would be for time only and would be used by those advertisers, now relatively few, who bring their own programs to the network for presentation.

The other set would be prices, stated in terms of minutes, for advertisers who want to buy into programs provided by the network. The minute prices would vary from one period and program to another and, as minute prices do now, would cover both time and program costs without distinguishing between the two.

"The advertiser who doesn't bring his own program is interested in what he can get for his money, not how much of it goes for time and how much for production," one source explained. "He usually has a certain amount of budget available and wants to get as much for it as he can. With fixed prices, he can see very quickly what's available and what it will cost him—and our own bookkeeping is made easier, too."

The printed rate card would carry the time or facilities charges—those for use by advertisers when they sup-

ply their own program. Packaged minute prices are not now listed in the printed card and there appears to be no plan to list them under the new approach. They would be available, as now, "on request."

The facilities or time-only charges would be the ones most extensively affected by the virtual elimination of discounts. Packaged minutes do not now generally carry discounts, although in some cases the purchase of minutes may be applied toward discounts on other purchases.

Seasonal Rates • Prices would vary by season, with different levels for winter, for spring, for summer, and for 52 weeks. It was understood that, roughly, winter prices would apply from September through March, spring prices from about April into June, and summer prices from about July to about September.

This would be a refinement of the system now used in CBS-TV's so-called "morning minute plan," which establishes a differential ($400 a minute) between winter (September through May) and summer (June through August).

Packaged nighttime minutes under the new approach were reported unofficially to be pegged from a low of about $37,000 to a high of about $50,000 on the 52-week level. Of the three seasonal levels, winter prices would be highest, summer prices lowest and spring prices in between, following the seasonal patterns in audience levels.

Currently nighttime packaged minutes were said to vary between $35,000 and $40,000 at the low end and around $50,000 at the high end.

No CPM Guarantee • CBS sources vigorously rejected any suggestion that taking individual program strengths and time-period audience levels into consideration represented a move toward "guaranteed circulation" or "guaranteed cost per thousand."

"It's just a simple fact of life that 9:30 p.m. is worth more than 7:30 p.m.,” one source asserted. Similarly, he said, programs obviously vary in actual and potential strengths as well as in production costs. Some types of show do better than others, and the strength of a high-rated opposing show, such as NBC-TV's Bonanza, cannot be overlooked, either.

Although the plan would set up prices applicable to both big and small advertisers without discrimination, some sources acknowledged that sellers faced with two offers are always free to accept "the best order" and that "the biggest order is often the best."

Neither ABC nor NBC would comment on the CBS plan.

There was widespread speculation, however, that if CBS puts it into ef-

Trouble in the Batcave

Guest villain of the week is fourth commercial, as WJZ-TV pulls the switch

ABC-TV in the second week of its "second season" remained firm in its policy of accommodating four minutes of commercial time in its twice-weekly Batman series in the face of sharp protests of several affiliates and one outright refusal to cancel the program.

Affiliate WJZ-TV Baltimore has reshuffled its programing to fill the Batman 7:30-8 p.m. EST period on Wednesdays and Thursdays with other ABC shows. Batman is being shown in Baltimore on WBLV-TV, an NBC-TV affiliate, with two half-hours back to back, at 2:30 p.m. Saturday (started Jan. 22).

ABC spokesmen intimated the network believed it had the support of most of its affiliates. It noted that plans for revamping the Batman commercial format had been made known and discussed at affiliate meetings in Mexico City (Broadcasting, Nov. 15, 1965) and in regional sessions held later in major cities in this country.

The network as of last Thursday (Jan. 20) claimed Batman had a 178-station clearance (live and delayed), or about average for a show in the 7:30 p.m. period. Spokesmen added that the network has been receiving "congratulatory messages" from affiliates on the showing of increased ratings and shares achieved by the program (Broadcasting, Jan. 17).

ABC's position that the additional commercial time is being sold to obtain revenue needed to help defray the $150,000 weekly costs of the two-part shows brought a rebuttal. Said one detractor: "This is specious. If this reasoning is acceptable, would it not mean that if in the future a half-hour show cost say $90,000, the network would then have a choice to offer what—eight commercials in the period?"

No Extra Commercial • WJZ-TV indicated in December it would accept the program as a desirable entry in the schedule, but without the additional commercials. Within a week of the show's Jan. 12, start the station sharply protested the network's plan, suggesting it would slot the shows if the station could exclude one of the commercials each week by rotation.

The Westinghouse Broadcasting station maintains that while the four minutes of commercial time in prime time are technically and legally within National Association of Broadcasters count limits, the commercial format is contrary to standard practice.

ABC has provided for the extra commercial by cutting back on other non-program material. It has explained that the trimming of promos, logos and credits and deletion of billboards amounts to a loss of only three seconds of program but gives the viewer a feeling of seeing more of the show (Broadcasting, Jan. 3).

In its protests to ABC, WJZ-TV noted widespread current charges of high commercial content in TV and said it believed the network increase in commercials from three to four minutes would lead to further criticism. Fears were expressed that the other networks would follow suit, giving rise to an escalation as in the transition in the past of the piggyback commercial and the 40-second station break in prime time.

It was also reported last week that several ABC affiliates (in the Taft Broadcasting Group) had accepted the program only after formal protest.

WJZ-TV said that The Legend of Jesse James and A Man Called Shenandoah, which the station had pre-empted on Monday nights for a motion picture, have been returned to the nighttime schedule in the two 7:30-8 p.m. periods that would have been filled by Batman. The pre-empted programs had been slotted in the 4-5 p.m. period on Sundays. That time now will be filled by American Sportsman, an ABC show.

All of Miles billing headed for Tinker

The success of Jack Tinker & Partners, New York, in finding new creative advertising approaches to stimulate substantial sales increases for Alka Seltzer this past year appears to have been a chief reason why Tinker soon will get another $10 million-plus of product billings from Miles Laboratories, Elkhart, Ind.

The loser once again: Wade Advertising, Chicago, which had started Alka Seltzer on its big growth trend through radio over three decades ago. Wade lost the Alka Seltzer portion of the account to Tinker in late 1964. That move also involved more than $10 million in billings, chiefly TV.

Donald L. Bryant, president of the consumer products division of Miles, confirmed late Thursday (Jan. 20) that the remaining Miles products at Wade will move to Tinker. No date of transfer has been set, he said, and other

Ogilvy, 

is now Ogilvy & Mather.

The change in name, which became effective Jan. 1, also was adopted by Mather & Crowther, London, which merged with the U.S.-based Ogilvy agency in 1964. The international agency's billing last year totaled more than $151 million (Broadcasting, Dec. 20, 1965).

The new name was adopted for all seven agencies that had been involved in the international merger. This includes the agencies in Toronto; Frankfurt, West Germany (now becomes Heumann, Ogilvy & Mather GmbH & Co.); Zurich, Switzerland; Milan, Italy, and Vienna. The U.S. agency has branch offices in San Francisco, Chicago, Los Angeles and Atlanta.

The agency started in the U.S. in 1948 as Hewitt, Ogilvy, Benson & Mather.

Good results bring

Hotpoint back to radio

A pair of local saturation radio campaigns that produced an "unusually high" dealer and consumer response for Hotpoint, New York City appliance distributor (Broadcasting, Dec. 27, 1965), led to still a third campaign last week. The latest drive, for Hotpoint's 795 transistorized automatic washer, will include 135 one-minute commercials over a six-week period on New York stations WOR, WCBS and WNEW.

Hotpoint introduced the 795 last month with a wave of 350 one-minute announcements over a 10-day period. Later in the month it ran 65 announcements over a four-day period to offer free installation of Hotpoint's built-in dishwasher. Those commercials were on seven New York stations.

In the original use of radio by the distributor, its first time in four years, the saturation technique was selected because of a marketing situation. Hotpoint was being marketed in New York ahead of the national schedule and sufficient newspaper space could not be obtained. Shelton Fredericks Advertising, New York, is the agency for Hotpoint.

Honda bikes to get more TV exposure

Americans — especially westerners — have taken to motorcycles the way Europeans have accepted soft drinks. So American Honda Motor Co., Geneva, Calif., has allocated the biggest advertising budget in its six-year history. In 1966 the company will spend some $3 million for advertising and sales promotion. That's about $800,000 more than last year and approximately doubles its 1964 expenditures. Each succeeding year, broadcasting — particularly network television — has been the big gain.

This season's network-TV buys, to start in March and run through the summer, include participation on five NBC-TV prime-time shows. Reportedly, all of Honda's commercials will be shown in color. These buys add up to about a $600,000 slice of the company's total advertising purchases for the year.

Honda's radio plans call for an extensive national-spot campaign on top 40 music stations in major markets. Singing jingles will be used to promote the advertiser's product during peak selling periods.

Agency for Honda is Grey Advertising, Beverly Hills, Calif.

ABC O&O radios up 21% in '65 sales

Sales in 1965 of the six ABC-owned radio stations rose by 21% over 1964. Harold L. Neal Jr., president of the division, told the division's annual meeting with the management of the ABC Inc. in Dorado, P. R., last week that the division's total sales have more than doubled since 1960.

Mr. Neal said that a plan for the future, called Project 70, was outlined during the meetings. He reported that the project includes recommendations in the field of programing and sales research but did not provide details.

Company executives in attendance included Leonard H. Goldenson, president of ABC Inc.; Simon B. Siegel, executive vice president; Everett H. Erlick, vice president and general counsel; Alfred Schneider, vice president and assistant to the executive vice president and James G. Riddell, vice president in charge of the western division.

Business briefly...

American Motors, Detroit, through Benton & Bowles, New York, will sponsor Carol Plus Two, a CBS-TV color special starring Carol Burnett with guest stars Lucille Ball and Zero Mostel, on Tuesday, March 22 (8:30-9:30 p.m. EST).

Timex Watches, through Warwick & Legler, both New York, will sponsor NBC-TV's color special, The Greatest Show on Earth, Ringling Bros. and Barnum & Bailey Circus (April 7, 7:30-8:30 p.m. EST).

Firestone Tire and Rubber Co., Akron, Ohio, through Campbell-Ewald, Detroit, will sponsor Golf with Sam Snead, a series of 13 golf lessons featuring Mr. Snead, that will be colorcast on NBC-TV, beginning March 26 (5:30-6 p.m. EST). Produced by Independent Sports Inc. and filmed by Henry Ushijima Films Inc., both Chicago, the series will originate on the championship course at the Firestone Country Club in Akron.

The Chrysler Corp., Detroit, through Young & Rubicam, New York, will sponsor the final rounds of the Bob Hope Desert Golf Classic in black and

Lieberman sets up firm

Dr. Seymour Lieberman, vice president and director of research for Kenyon & Eckhardt, New York, has resigned to form his own public opinion and market research organization. The new organization, Lieberman Research Inc., of which Dr. Lieberman will be president, will engage in both commercial and noncommercial research projects. It will be located at 18 East 41st Street, New York 10017. Dr. Lieberman, who was on K&E's board of directors, also served on the agency's plans and creative review boards.

white on NBC-TV Saturday, Feb. 5 (4-5 p.m. EST) and in color the following day (3:30-5 p.m. EST). 

Campbell Soup Co. Camden, N. J., through Leo Burnett Co., Chicago, in a special Lenten season campaign built around meatless meals, will use daytime participations on all three networks and TV spots in 33 major markets to advertise Franco-American spaghetti and macaroni during March and April.

Telex Chemical Co., through Henderson Advertising, both Atlanta, for the second consecutive year will use participations in NBC-TV's Today and Tonight Show Starring Johnny Carson to advertise its K2r spot-lifter. The product, which was introduced two years ago, is also being advertised on NBC Radio's Monitor for the first time. 

General Foods Corp., White Plains, N. Y., through Young & Rubicam, New York, will sponsor An Evening with Carol Channing, or How You Can Watch Television Without Being Plugged In, a CBS-TV color special scheduled for Friday, Feb. 18 (8:30-9:30 p.m. EST).

Audit bureau branch may explore radio-TV

The board of directors of the Audit Bureau of Circulations has approved the creation of a new affiliated corporation, the Audit Bureau of Marketing Services, which will explore the expansion of the ABC's traditional print auditing role to other media, possibly including broadcasting. The expansion study move was voted by the ABC membership at its annual meeting last fall.

ABMS headquarters will be at the parent organization's offices in Chicago at 123 North Wacker Drive and initially will share staff services too. Additional fields of auditing to be explored include direct mail and trade-show attendances as well as radio-TV.

The new service also is to be available to advertising media or marketing service firms for special studies in circulation auditing.

Also in advertising . . .

Looking for agency • STP Division of Studebaker Corp., Des Plaines, Ill., maker of gasoline additives, has split with W. B. Doner & Co., Detroit, and is asking Chicago area agencies to make presentations for the account.

Advertising student awards • Cunningham & Walsh, New York, will provide two annual awards for excellence to advertising students of Syracuse (N. Y.) University's School of Journalism, according to agency president Carl W. Nicholas. An award of $200 will be given to the school's outstanding copy student, and a summer training position at C&W will be offered to another undergraduate. The agency plans to expand the awards program to include other colleges and universities.

Scholarship fund • Jack Melvin, president of the Melvin Co., Las Vegas and Reno advertising agency, has established an annual $500 scholarship fund for students interested in an advertising career studying at Brigham Young University, Provo, Utah. The university has set up the Jack Melvin Outstanding Junior Award in Advertising which, with a large portion of the scholarship money, will be given each spring. Several smaller awards will also be presented at that time.

Agency appointments . . .

- Nestle Co., White Plains, N. Y., names Leo Burnett Co., Chicago, to handle additional product billings of some $2.5 million, including instant tea lines, moving account from Warwick & Legler, New York. Burnett now handles nearly $12 million of Nestle advertising. Nestle also moves its Decaf instant coffee from Warwick & Legler to VanSant, Dugdale & Co., Baltimore.
- The United States Tobacco Co. has appointed Needham, Harper & Steers, both New York, as advertising agency for several of the company's tobacco brands and for its corporate trade advertising, effective Feb. 7. The tobacco products, currently handled by West, Weir & Bartel, New York, are: King Size cigarettes, Skol chewing tobacco, Model pipe tobacco, and Mapleton and Bowl of Roses aromatic smoking mixtures. NHTS has serviced United States Tobacco's Copenhagen schnuff and Old Briar and Dill's Best tobaccos accounts since 1961. The new accounts are estimated to bill around $1 million; about $100,000 in spot radio.
- American Enka Corp., last week moved its $2 million-plus account from Erwin Wasey, to Delehanty, Kurnit & Geller, all New York. An agency spokesman indicated that future media plans will include the use of TV.
- Schiefflein & Co., New York, wine and spirit distributors, has appointed Carl Alley, New York, to handle advertising for three brands: Cinzano French and Italian vermouths and Italian sparkling wines, Florio Marsala wines, and Gonzalez, Byass Tio Pepe sherry. The nationally distributed products, with estimated billings of $500,000, previously were handled by Lennen & Newell. Though broadcast billings were not disclosed, Cinzano is known to have used some radio.

Ads, shows line up for Prime Network

Prospects for starting the so-called "fourth network" next summer by Sylvester L. Weaver and Oliver Treyz appeared brighter last week as signs of advertiser support emerged for the project and programming plans were divulged to key agencies.

A source close to Prime Network said the organization had received verbal orders for a total of 12 commercial minutes, subject to station clearances and agency approval of the network's programming. Prime Network's charter advertisers will be paying $15,000 per minute for exposure on a hookup of 15 stations in major markets.

It plans to telescast on Sundays from 7:30 p.m. to 10:30 p.m., starting July 10, with two 90-minute blocks, one devoted to "simulated movies" and another, starting at 9 p.m. to a "comedy hour." The "movie" segment, which has the advertiser support, will be on color tape and will emphasize personal appearances by performers and humorous material rather than story lines (for example, a comic version of "Dracula"; a lampoon of "Peyton Place"; a musical version of "Dr. Jekyll and Mr. Hyde"). The "comedy hour," which has not attracted sponsor interest to date, is projected as a collection of sketches and comedy shorts.

One advertiser that had expressed interest in investing in Prime Network was Bristol-Myers. It had been learned though that B-M will not participate because it decided instead to make a contribution of $250,000 to noncommercial WNDT-TV Newark, N. J.-New York (Broadcasting, Jan. 17).

Rep. appointments . . .

- KSL Salt Lake City: Metro Radio Sales, New York, effective Feb. 1.
- WTK-TV Meridian, Miss.: Busby, Finch and Woods Inc., Atlanta.

44 (BROADCASTING)
Few composers produce works that are classics in their own time. There is, however, one who may claim this distinction. He is Walter Piston, acknowledged dean of today's American composers. Uniformly excellent are his eight symphonies, orchestral suites and his chamber music which critics have praised for their essential rightness as well as their magnificent craftsmanship. Audiences applaud them for their freshness and vigor. BMI honors this faultless musician, dedicated educator, winner of two Pulitzer Prizes, and feels privileged to license his music for public performance.

Among Walter Piston's musical contributions are:
Symphonies 1 through 8; The Incredible Flutist, Lincoln Center Festival Overture; String Quartets 1 through 5.
The flag still waves on the Hill

NCTA campaign bombards Congress with letters, phone calls, wires opposing regulation of CATV; FCC bends a little, will keep legislators informed

A one-week campaign instituted by the community antenna industry, alarmed at what it believes is the forthcoming assumption of jurisdiction over CATV by the FCC (BROADCASTING, Jan. 17), inundated Congress with letters, telegrams and phone calls from CATV operators and their subscribers. A good bit of the overflow fell onto the FCC, and at week's end this is how the matter stood:

- FCC Chairman E. William Henry informed the commerce committees of both the House and the Senate that the FCC intends to go ahead with its consideration of CATV, now scheduled for Feb. 10, but that it will keep both committees advised of each step. The implication is that Congress may call for an explanation whenever it feels that the commission is overstepping its authority.

- At the organization meeting of the House Commerce Committee, under its new chairman, Representative Harley O. Staggers (D-W. Va.), it was decided to sit tight on the CATV question, awaiting notification by the FCC of the steps it intends to take in dealing with the problem.

- Both the National Association of Broadcasters and the Association of Maximum Service Telecasters, which had urged FCC assumption of controls over all CATV's, played it cool. Neither intensified its efforts on Capitol Hill or at the FCC, although it was evident that their representatives were in constant touch with the situation as it developed.

The CATV industry's crash program was instituted following a special board meeting of the National Community Television Association in Washington on Sunday, Jan. 9. The meeting was called because of reports that the commission was to meet Feb. 7 on the CATV matter and that it proposed not only to impose the same conditions it imposes now on microwave-fed CATV's (carriage of local stations, 15-day before-and-after program protection to local stations), but also to limit the distance for signal reception and prohibit CATV in markets or cities with fewer than three operating TV stations.

During the weekend of Jan. 14 and 15, eight regional meetings of the NCTA were held throughout the country, addressed by NCTA board members. It was at these meetings that the campaign to persuade Congress to require the FCC to defer its meeting was inaugurated.

The campaign took the form of advertisements in newspapers, radio spots, direct letters and telephone calls to subscribers urging them to write, wire or phone their congressmen. The project resulted in a flood of mail to members of Congress, especially Chairman Staggers and Representative Walter Rogers (D-Tex.), chairman of the House Commerce Subcommittee on Communications.

This in turn sparked an avalanche of inquiries to the FCC from congressmen or their assistants. In some instances, FCC staffers recount, the inquiry was: "What is CATV?" The material used in the CATV campaign warned subscribers that the FCC's assumption of control threatened their choice of television programs.

One suggested letter (the same form was used in a pre-printed postcard) reads as follows:

"Dear Congressman..................:"

"I subscribe to a community antenna service (CATV) in.........................;

because it provides more stations and clearer pictures than I can receive otherwise. Without CATV, color reception is poor or impossible in.......................

"The Federal Communications Commission is prepared to upset my family's television viewing habits by restricting the present service provided by the CATV system."

"I understand they are taking this action without the authority of Congress, and even without the same thorough study of the CATV industry undertaken by the Senate & House subcommittees. Congress has studied the industry but has not reached a conclusion. How can the FCC, without thorough study and hearings take such action?"

"I understand the necessity of controlling transmission of radio and television, but am appalled to learn that an agency of the government now proposes to dictate which of the signals in the air I can watch."

"Please convey my concern to Congressman Walter Rogers and support any efforts he might undertake to stop the FCC's actions. A letter or call from you to Chairman Henry would also be helpful."

"Thank you very much."

"Sincerely,

"P.S. This is a form letter and you will be receiving others. But I have read it; I understand it;
**Facts about Ameco!**

Do you know AMECO equipment is used in over 80% of the CATV systems?

Do you know AMECO has turnkeyed over 7500 miles of CATV plant?

Do you know AMECO manufactures over 207 basic CATV products?

Do you know AMECO has overnight, off-the-shelf delivery on most products?

Do you know AMECO has more experienced CATV engineers than any other leading CATV manufacturer?

*Those are just a few of the facts...*

More important are the people... Ameco people, who really work for you. 1000 skilled people able to foresee the needs of CATV. People who produce over 250,000 connectors each month — who assemble 3500 solid state amplifiers every month.

So let's add one last fact: Ameco is built on PERFORMANCE, PRODUCTS AND PEOPLE. Can you ask for a better foundation for your CATV system? WHEN QUALITY COUNTS—COUNT ON AMECO!

*Performance-Proven Products*

**AMECO**

**OFFICES IN ALL PRINCIPAL CATV AREAS**

*BROADCASTING, January 24, 1966*
Staggers sets new lineup for Commerce Committee

The House Commerce Committee’s new chairman, Representative Harley O. Staggers (D-W.Va.) moved into the driver’s seat last week and gave the committee its new power alignments as well as its plans for the coming session (see page 46).

He told the committee he will relinquish his gavel as head of the Subcommittee on Transportation and Aeronautics. He will, however, fill the vacancy of his predecessor, Representative Oren Harris (D-Ark.), as chairman of the Subcommittee on Investigations. This subcommittee has the power to investigate any business dealing in interstate and foreign commerce, as well as investigative powers into practically all the government independent agencies, plus the sprawling complex of the Health, Education and Welfare Department.

Replacing him as chairman of the transportation subcommittee will be Representative Samuel N. Friedel (D-Md.), second ranking member of the full committee after Representatives Staggers and Walter Rogers (D-Tex.). Representative Rogers will remain as head of the Communications Subcommittee.

Representative John Jarman (D-Okla.) gives up his post on the transportation body to take over the chairmanship of the Subcommittee on Public Health and Welfare, a post formerly held by Representative Harris.

Two committee members, Representatives John Dingell (D-Mich.) and J. Oliva Huot (D-N.H.) will transfer their subcommittee memberships from the commerce and finance group to transportation subcommittee, filling all the committee’s seats except that of the one vacated by Representative Harris.

The committee’s new members most likely would be placed on the Subcommittee on Commerce and Finance, since it is the only subcommittee that doesn’t have a two-to-one ratio of Democrats to Republicans.

That group is headed by Representative Torbert MacDonald (D-Mass.). Representative Staggers told Broadcasting that a new staff member “with experience in community antenna television affairs” might be added to the committee.

He stressed that nothing was underway on the matter but said that “it’s a thought. There is a possibility that we might add a staffer with CATV background.”

Most of the communications specialists on the committee are broadcast oriented. They have been there during the development of radio and television and the CATV industry is a new factor for them, he said.

But he has pointed out repeatedly since he first learned he was moving to the chairmanship that the present committee staffers would keep their jobs if they desired.

and, I agree entirely with its content.”

Robert H. Beisswenger, now president of Jerrold Corp. (see page 10), wrote to all CATV franchise holders and applicants:

“By now, I’m sure you know that the adverse rules governing off-the-air fed CATV systems are scheduled for adoption by the FCC on Feb. 7, 1966.

“If this happens, the FCC may not allow you to put your system into operation. No new system will be permitted where the FCC guesses that CATV might injure a UHF channel that might some day go on the air.

“Even if they do allow you to install your system, the FCC rules will probably make it impossible for you to attract enough subscribers to make the venture viable. You will be told how many channels and which channels you can carry. This and the 15-day before-and-after nonduplication rules will definitely diminish the entertainment package you’re able to offer....

“This is a fight for survival,” Mr. Beisswenger declared. He urged his readers to follow the NCTA program, to persuade as many people as possible “to visit, write, phone, or telegraph their congressmen. Offer to pay for calls and telegrams.” Get local political leaders, councilmen, attorneys and business leaders to contact congressmen.

Partnership • The heat generated by the campaign is forcing the FCC to take on Congress as a partner in its deliberations on the complex issues involved—and a partner with the power to influence the final decisions.

Chairman Henry made no commitments in the separate discussions he had with Representative Staggers and with Nicholas Zapple, the Senate Commerce Committee’s staff expert on communications.

But the implication, clearly, was that any time either committee didn’t like the direction in which the commission was headed, it could call the commissioners up to a hearing on Capitol Hill to explain themselves.

This approach is the FCC’s understanding of what Chairman Henry told the Capitol Hill lawmakers.

Mr. Staggers’ understanding is slightly different, although in the main quite similar. The new House Commerce Committee chairman said last week that the committee would take no action on CATV until it receives a report from the FCC.

He said that Chairman Henry had come to see him (apparently on the FCC chairman’s own initiative) and had said that the commission would meet Feb. 10 to “discuss fully” all aspects of the CATV problem. “Then,” Mr. Staggers said, “the commission’s chairman will come to the committee with a list of recommendations and proposals on what steps the commission feels should be taken to solve the problem. These would be given careful consideration by the committee.

“But,” he added, “the commission in doing this would not continue to act on its rulemaking proceeding. It would,” he said, “defer to the committee, for now at least, before making any wide-
sweeping regulations."

Congressman Rogers agreed with Mr. Staggers' views and said he felt the FCC wanted to explain to the committee its authority to impose regulations on CATV before actually doing so.

Both lawmakers acknowledged that they had received numerous letters, telegrams and phone calls to have the committee stop the FCC from regulating CATV.

Mr. Rogers conducted the hearing on CATV last spring (BROADCASTING, May 31, June 7, 1965). It was based on the bill (HR-7715) introduced by former House Commerce Chairman Oren Harris (D-Ark.), who resigned two weeks ago to become a federal judge in Arkansas.

Pastore Glum * On the Senate side, Commerce Committee staff members seemed to take a different view, said to be the attitude of Senator John O. Pastore (D-R.I.), chairman of the Communications Subcommittee: "We told you so and you didn't believe us; now see if you can settle the matter yourselves."

Senator Pastore was floor manager of a bill to place CATV under the jurisdiction of the FCC in 1959-1960. The bill failed of passage by one vote (BROADCASTING, May 23, 1960).

The Senate unit would act, it is said, if the House passes a bill to govern CATV operations.

NAB sources said that while the NCTA barrage is continuing, it is quietly continuing to tell its story to congressmen. The NAB board last spring came out forcefully in support of placing all CATVs under FCC jurisdiction. Although NAB would welcome congressional guidelines, an NAB spokesman said, it still maintains that the FCC has the authority to act without explicit direction from Congress.

Deadline nears on Austin CATV option

A decision is expected to be made this week that may put the family of President Lyndon B. Johnson into the community antenna television business. Mr. Johnson and the Johnson daughters are the owners of Texas Broadcasting Co., licensee of KTBC-TV Austin. TBC holds an option to purchase 50% interest in Capital Cable Co., the CATV system in that city. The option expires Jan. 31.

Reports have been published that TBC intends to exercise the option. But principals in both the TV station and the cable company have declined to comment.

Originally, there were two cable companies operating in Austin; the other was TV Cable of Austin Inc. TV Cable of Austin, however, was operating under FCC-imposed conditions applicable to cable systems using microwave-relay facilities to bring in distant TV signals. Capital Cable Co. does not use microwave relay and thus was not limited by FCC proscriptions.

Because the FCC conditions require program duplication protection, TV Cable of Austin in 1964 sold out to Capital Cable Co. The price was understood to be $1.5 million.

The option held by TBC requires that it pay half the costs of Capital Cable's investment: this has been estimated to be $3 million, or $1.5 million for TBC. The option stems from the original franchise granted to Capital Cable after TBC, also an applicant, withdrew. Capital Cable is now owned by Midwest Video Inc., a group CATV operator, with headquarters in Little Rock, Ark.

The Johnsons' interest in TBC has been placed in an irrevocable trust while Mr. Johnson is President.

Less talk, more action

That's what Bill Henry says FCC needs, and he calls for war on trivia

FCC Chairman E. William Henry has called for "a war on trivia." He defined trivia as "an endless succession of words and data." If, he added, is clogging the gears of the commission's comparative-hearing processes and resulting in a waste of time and money for government and litigants.

But he indicated that he wouldn't be ready for total war, in terms of employing radical measures, in the immediate future.

For the present, he is asking the cooperation of the communications attorneys and is considering moderate solutions to the problem of trivia. He spoke last week at a luncheon meeting of the Federal Communications Bar Association.

"The simple truth," he said, "is that due process has been overdone."

He said that while hearings are designed to produce facts on which decisions can be based "... we are literally drowning in trivia—an endless procession of words and data ... that we do not care to know and do not need to know in order to decide where the public interest lies."

Hearings, he said, have become "mighty enterprises" involving a staggering amount of work—"interlocutory proceedings, monumental exhibits, examinations, cross-examinations, proposed findings, exceptions, oral arguments, petitions for reconsideration, appeals."

"Not Needed * And yet," he added, "the sad truth is that much of this great sound and fury signifies very little. Many of our hearing records and many of our decisions contain some of the world's greatest collections of useless information."

He noted that some steps have been taken to deal with the problem. Rules have been adopted to govern some matters previously dealt with on an ad hoc basis. And last summer the commission adopted a policy statement listing the criteria it would follow in determining winners in comparative hearings.

Many attorneys criticized the use of rules that precluded the use of judgment in all but exceptional cases in such matters as the FM and AM allocations. The chairman noted that attorneys said the rules amounted to an abdication of administrative responsibility on the part of the commission.

But, he said: "The tremendous time and effort expended in hearings prior to the rules simply could not be justified in terms of the results we achieved."

The policy statement on criteria is designed to "limit hearing differences to those with a real distinction . . . to reduce the piling up of minutiae by parties seeking some advantage," he said.

Radical Measures Coming * But if comparative hearings under it don't improve "over the next few years," he added, he would be prepared to consider more radical proposals made in the past: "award a facility to the first qualified applicant, auction it off to the highest bidder, choose a winner by lot among those meeting high minimum qualifications, enforce a merger of qualified applicants."

He said he was serious in raising those possibilities. "If . . . the whole tortured comparative hearing process is not substantially improved, then it is not in the public interest to waste our time, your time and everybody's money on a process that often resembles a hollow charade."

The Writing Job * One of the more moderate proposals for "oiling the gears" without changing the character of hearings would call for the commissioners to involve themselves more directly in the decision-writing process.

Commissioner Lee Loewinger has advanced this proposal many times. And Chairman Henry said he agrees with the commissioner that decisions would "more accurately reflect the agency's.
views—in better and more precise language"—if individual commissioners would assume responsibility for each agency decision. The commission now plays a collective and supervisory role, with actual writing done by the staff.

In this connection he chided the staff and commission on their draftsmanship and verbosity. "Decisions which are shorter, sharper and quicker would be twice as effective," he said, adding, with tongue in cheek:

"Let it be resolved for 1966 that no single paragraph in our decisions require more than three inches of type in Pike & Fisher; that no commission sentence run longer than, say, 2,500 words."

Fire razes WEMD's studio-transmitter

Fire caused an estimated $50,000 in damages to WEMD Easton, Md. According to manager Dick Lee, the station's 1-kw signal was back on the air last Friday (Jan. 21), six days after its entire studio-transmitter complex was destroyed.

While the fire was still burning Collins Radio Co.'s Washington office was on the telephone locating new equipment. A Collins 20-V3 transmitter was flown in from Dallas and was placed in a 60-foot trailer.

Now Mr. Lee is busy replacing a less easily obtained item. He is worriedly trying to press the wrinkles out of an undetermined number of records damaged by heat and water during the blaze.

The fire originated in a faulty oil burner. No one was injured.

Central Nine wants Orlando in interim

Another chapter was added to the 11-year-old Orlando channel 9 case last week. Central Nine Corp., a new applicant for the channel, asked that the temporary operating authority granted to Mid-Florida Television Corp. be terminated. After the U. S. Court of Appeals for the District of Columbian returned the case to the FCC for a new comparative hearing with new applicants the commission vacated its grant to Mid-Florida but authorized it to continue operation of its station, WFTV (tv), on a temporary basis.

Central Nine said that since it is the only applicant for permanent authority at this time it should be given interim authority to operate channel 9. If its request is granted, it said it will establish a distinct interim organization in which all qualified applicants for permanent authority will be able to participate on an equal basis.

The court held that reaffirmation of the FCC's 1957 grant to Mid-Florida, made in 1964, was based on a stale record (Broadcasting, March 8, 1965).

The case was returned to the FCC twice before because of ex parte charges involving the late Commissioner Richard A. Mack. The charges were made before the old House Legislative Oversight Subcommittee.

The deadline for filing new applications for permanent authority is March 1. Mid-Florida is expected to file for permanent authority before that date.

Central Nine, which is composed of a group of Orlando citizens, said the commission had stated in the past that a grant of exclusive interim authority to any one applicant seeking permanent authority prejudices the case of the other applicants. Interim authority should be granted to all applicants for permanent authority on a joint basis, it added.

Central Nine said that it had communicated with Mid-Florida in an effort to work out a lease arrangement for the channel 9 facilities. If an arrangement cannot be worked out, Central Nine said it planned to construct new facilities on a crash basis.

Changing hands

ANNOUNCED • The following station sales were reported last week subject to FCC approval.

• WCVS Springfield, Ill.: Sold by J. William O'Connor to Roger A. Neuhoff and associates for $700,000. Mr. O'Connor owns WBGW-AM-FM Terre Haute, WHUT Anderson, both Indiana, KASK and KKOY-FM Ontario, Calif. Mr. Neuhoff owns WCHI Charlottesville and WMAP Hopewell, both Virginia, and recently sold WALT Tampa, Fla., to Universal Broadcasting Co. for $360,000. WCVS went on the air in 1926 on 1450 kc and operates with 1 kw daytime and 250 w nighttime. Broker was Blackburn & Co.

• WMTW-FM-TV Poland Spring (Portland), Me.: 17.9% sold by John W. Guider to Jack Paar for $401,875. Mr. Guider is president of the licensee company, Mt. Washington TV Inc., and served as general manager of the operation from 1958 until 1965. The sale will give Mr. Paar 98.4% interest in the stations. Mr. Paar originally bought his 80.5% from Mr. Guider, Horace.
July appeals favor an incumbent licensee."

The commission on a 5-to-2 vote approved the transfer of control of KARK-AM-FM-TV (ch. 4) Little Rock, from Madeline M., Clark M., and T. K. Barton to Mullins Broadcasting Co., for $3,750,000. Mullins owns KBTR and KBTW (TV) (ch. 13) Denver.

Tentative approval had been voted two weeks ago (BROADCASTING, Jan. 17).

By a 6-to-1 vote, the commission approved the $2,375,000 sale of KELP-AM-TV El Paso to John B. Walton Jr. from Norman Alexander and Joseph Harris. Mr. Walton owns KVLM-AM-TV Monahans and KVII-FM-TV Amarillo, both Texas; KVOD Albuquerque, N.M., and KFIF Tucson, Ariz.

In approving the KARK-AM-FM-TV sale the commission dismissed a petition to deny filed by the Arkansas Citizens and Advertisers Protest Committee. The commission said the committee lacked standing to oppose the sale.

Renewal Look * The commission dealt, however, with the central argument in the petition—that Mullins would have to overcommercialize to pay off the $7.5 million debt it is incurring in connection with the acquisition. The commission said it could determine at license renewal time whether the stations had permitted their programing to deteriorate or whether they had exceeded their proposed commercial policies.

Commissioner Kenneth A. Cox, in a dissenting statement in which Commissioner Robert T. Bartley joined, said Mullins had not adequately explained the projected increased income and depreciation figures contained in the application for transfer. He said more information was needed before he could vote for a grant.

Commissioner Bartley was the lone dissenter in the KELP case. He said the material in the application for the assignment of licenses had not convinced him that the sale would result in an improvement in the general structure of broadcasting. He said a hearing was necessary to determine if the assignment would be in the public interest.

Little Rock, El Paso transfers approved

FCC DISMISSES LITTLE ROCK CITIZENS' PROTEST

The FCC in two split decisions last week approved the sale of radio and television stations in Little Rock, Ark., and El Paso.

The commission on a 5-to-2 vote approved the transfer of control of KARK-AM-FM-TV (ch. 4) Little Rock, from Madeline M., Clark M., and T. K. Barton to Mullins Broadcasting Co., for $3,750,000. Mullins owns KBTR and KBTW (TV) (ch. 13) Denver.

Tentative approval had been voted two weeks ago (BROADCASTING, Jan. 17).

By a 6-to-1 vote, the commission approved the $2,375,000 sale of KELP-AM-TV El Paso to John B. Walton Jr. from Norman Alexander and Joseph Harris. Mr. Walton owns KVLM-AM-TV Monahans and KVII-FM-TV Amarillo, both Texas; KVOD Albuquerque, N.M., and KFIF Tucson, Ariz.

In approving the KARK-AM-FM-TV sale the commission dismissed a petition to deny filed by the Arkansas Citizens and Advertisers Protest Committee. The commission said the committee lacked standing to oppose the sale.

Renewal Look * The commission dealt, however, with the central argument in the petition—that Mullins would have to overcommercialize to pay off the $7.5 million debt it is incurring in connection with the acquisition. The commission said it could determine at license renewal time whether the stations had permitted their programing to deteriorate or whether they had exceeded their proposed commercial policies.

Commissioner Kenneth A. Cox, in a dissenting statement in which Commissioner Robert T. Bartley joined, said Mullins had not adequately explained the projected increased income and depreciation figures contained in the application for transfer. He said more information was needed before he could vote for a grant.

Commissioner Bartley was the lone dissenter in the KELP case. He said the material in the application for the assignment of licenses had not convinced him that the sale would result in an improvement in the general structure of broadcasting. He said a hearing was necessary to determine if the assignment would be in the public interest.

EXCLUSIVE BROADCAST PROPERTIES! MIDWEST

Two midwestern daytime-only radio stations. These are not jointly owned and are being sold individually. Both need owner-operator attention to take advantage of the untapped potential in their respective markets. Both stations are now operating at break-even levels.

One is in an industrial and agricultural community of 10,000 and priced at $105,000 with liberal terms.

The other is in an industrial and educational complex with metro area population of nearly 200,000. This one is priced at $120,000 with 29% down.

*Contact—Richard A. Shaheen in our Chicago office.
The ups and downs of UHF operation

PUTNAM REVEALS FINANCIAL DETAILS OF SPRINGFIELD TV COMPANY

It's an unusual businessman who is willing to bare his balance sheet to public view. But William Putnam, president of Springfield Television Broadcasting, is such a man. What's more, his company's four UHF TV stations, taken together, are losing money.

A $40,000 profit in the manufacture and sale of UHF transmission equipment by a subsidiary operation, Townsend Associates, just kept Springfield's consolidated statement for 1965 in the black.

The prize property of the company, WVEL(TV) Springfield, Mass., grossed $1.8 million during 1965 and turned a profit of $500,000. But the poor boy of the organization, WLEX(TV) Dayton, Ohio, cost $450,000 to operate and billed only $150,000.

But it's in Dayton that the company sees a quickly changing competitive position—and a chance for the whole UHF industry to view in microcosm its future, just as long as Mr. Putnam is willing to keep his books open.

Dayton is a three-station market where two VHF signals, operated by two of the strongest group operators in the business, Cox (WHO-TV) and Avco (WLWD-TV) provide the competition.

UHF Homes * It's estimated that 32% of Dayton's TV homes are UHF-equipped. Mr. Putnam thinks this figure ought to reach 50% by the end of 1966 and that four years from now UHF should have set penetration virtually equal to that of VHF.

But for the present he will rattle off a list of troubles as long as your arm. He hasn't even gotten his WLEX call letters in a Nielsen Station Index report yet.

Being the third station in town means getting the network programs left after the VHF stations have had their pick.

And if the V's misjudge the popularity of a given network program they can change their minds. With 28 days notice from a network WLEX may have to give up a show to accommodate one of its competitors. Right now WLEX takes programming from all three networks. Six-sevenths of its prime-time hours are network-originated. How soon does it expect to have a firm affiliation with one of them? Mr. Putnam thinks this problem will be out of the way after two more years of growing UHF set ownership.

The highest-rated show ever carried by WLEX was an NBC-TV Saturday Night Movie that drew 13,200 homes, according to an American Research Bureau report. The station can boast only four occasions on which it attracted more than 10,000 homes.

Another problem for the U station is in purchasing syndicated programs and movies where the price starts at the rate the competition can pay.

Mr. Putnam doesn't foresee profits for WLEX for a while in 1966. But he thinks that by the end of the year the station will have had several months of black-in operation.

Income Creeps Up * He figures the break-even point comes when the station can gross $40,000 a month. Although still in the red, the income curve for the station is accelerating upward. In December 1964 WLEX billed $8,000; in December 1965, it was triple that at $24,000. The Dayton U went on the air in September 1964. "It's been rougher going than we expected," says Mr. Putnam.

Particularly disappointing has been the lack of attention from national advertisers despite a "charter plan," set up to attract national accounts who would join the station before it got on the air with the quid pro quo being a 50% discount for the first month, with the price going to 10% a month thereafter until it reached the full rate.

Some national clients came into this plan but got out after their discount franchise expired, according to Mr. Putnam. But he says national business is now picking up. Of the station's total billing, 60% is local and 40% national. WLEX's staff of 28 people, four of them salesmen, draw an annual payroll of about $200,000. Seven of the staff work on a part-time basis.

CATV Outlook * Community antenna television, which Springfield says has done untold damage to its WVEL(TV) Greenfield, Mass. (also losing money, according to Mr. Putnam), does not seem to be an immediate threat in Dayton.

The Dayton city council, reportedly after communication with the FCC, decided to table a proposal for a CATV operation. Cox Broadcasting's cable TV subsidiary has been interested in establishing a system in Dayton. Mr. Putnam says his company would prob-

Sarnoff biography set for February release

A biography of Brigadier General David Sarnoff, board chairman of RCA, will be published next month by Harper & Row Publishers Inc., New York. By Eugene Lyons, author and a senior editor of Reader's Digest, it is scheduled for publication on Feb. 28, the day following General Sarnoff's 75th birthday.

Also in 1966, General Sarnoff will observe the 60th anniversary of his entry into radio and electronics (as a messenger boy). The 384-page biography, entitled "David Sarnoff," details among other high points in General Sarnoff's career his role in stimulating RCA's growth and development and in founding NBC. The book contains a 16-page portfolio of photographs from General Sarnoff's early boyhood to the present.

General Sarnoff, meantime, was named last week as the 1966 recipient of the Concert Artists Guild award, which honors individuals "whose outstanding initiative has helped establish the musical heritage of the nation." Previous recipients have included famous musical artists and patrons (CBS Board Chairman William S. Paley is a past award recipient).

Noted by the concert artists was General Sarnoff's contribution through RCA and NBC to various musical programs beginning in 1928 with the Music Appreciation Hour on NBC, opera in 1931, the NBC Symphony in 1937 on up to the establishment of the NBC Opera Company in 1950.

The award will be presented April 27 in New York.

Agenda set for state presidents' meet

An extra afternoon of activities has been set up for delegates to the National Association of Broadcasters' 11th annual state presidents' conference in Washington, Feb. 17-18.

New to the agenda this year is a series of panel discussions on Thursday (Feb. 17), and a Friday afternoon
Relief two years away

president for national sales, Marriott Hotels, and Doris Potter, wxsc North Wilkesboro, N. C., president of the North Carolina Association of Broadcasters.

“Stateside Public Relations”—Hank Parkinson, executive secretary, Kansas Association of Radio Broadcasters; John Conley, director of public relations, National Automobile Dealers Association, and John Courie, NAB vice president for public relations.

“Future Plans and Projects”—Howard Mandel, NAB vice president for research; Ruth Jones, network and station relations, J. Walter Thompson, New York; Sherril Taylor, NAB vice president for radio, and Harvey Harkaway, assistant publisher, Standard Rate & Data Service.

Also set for Thursday are remarks from NAB President Vincent Wasilewski; a discussion of “State Associations and Regulation” by Douglas Anello, NAB general counsel; a luncheon talk by Mitch Miller, and the annual NAB government reception.

**FCBA Session** — The Friday morning program includes a two-hour roundtable discussion. Delegates to the conference will attend the Federal Communications Bar Association luncheon where Mr. Wasilewski will speak, and that afternoon will tour the Voice of America where they will hear from Leonard Marks, director of the U.S. Information Agency.

The members of the program advisory committee for the conference are: Elton Rule, WABC-TV Los Angeles, president of the California Broadcasters Association; Arnold F. (Doc) Schoen Jr., WDBO-TV Orlando, Fla., president of the Florida Association of Broadcasters; William Becker, wvow Logan, W. Va., president of the West Virginia Broadcasters Association, and Michael O. Lareau, wood Bridgman, Mich., president of the Michigan Association of Broadcasters.

**Religious broadcasters to hear FCC members**

Two commissioners of the FCC and a representative of the National Association of Broadcasters’ code authority will address the National Religious Broadcasters at their annual meeting in Washington, Jan. 25-27.

FCC Chairman E. William Henry and Commissioner Kenneth A. Cox, will be luncheon speakers on Jan. 26. Stockton Helfrich, manager of the NAB’s New York office, will speak during the morning session that day.

The meeting features seven different sessions and outstanding religious broadcasters will participate in each. All meetings will be in the Mayflower hotel.

What’s hot in Florida?

The issues facing NAB boards: commercial time, CATV, chairman’s function

Internal organization and the regulation of community antenna television appear to be two of the major topics facing the joint board of the National Association of Broadcasters meeting in Palm Beach Shores, Fla., Monday through Friday (Jan. 24-28). One is on the formal agenda; the other isn’t, but both are expected to come up at the Tuesday joint board meeting.

As it was earlier in the month (BROADCASTING, Jan. 3), the feeling among many board members is that the trial of a fulltime working chairman of the NAB in Washington will end in June when the term of John F. Dille Jr., wjtv(TV) Elkhart-South Bend, Ind., incumbent chairman, ends. However, the subject did not have a spot on the agenda last week, and Mr. Dille, as he has for weeks, was keeping his counsel to himself. His position has been that he has not decided whether to recommend continuing or discarding the working-chairman theory. Board members last week said they feel, and the membership has told them, that the NAB staff under President Vincent Wasilewski is doing a good job, that no chairman is needed at headquarters.

One board member noted that when the present concept was approved at the January 1965 board meeting: “I don’t think anyone anticipated it as a long-term arrangement, but we figured: Let’s give it a try.” He added that if there is too much top-level work for Mr. Wasilewski, the answer is to appoint an executive vice president.

A big part of the problem in picking a course of action, one commented, was that “Jack hasn’t made up his mind yet.”

The working chairman has been budgeted for $50,000 a year in salary and living expenses. This figure has caused sensitivity among smaller stations, which feel the money could be put to better use.

**Other Matters** — Aside from the role of the chairman, the radio and television boards have on their agenda a new CATV proposal, proposed dues increases for the radio and television codes and an increase in the public relations budget. And they are almost certain to be asked for an opinion on whether...
the time standards in the codes should be revised or dropped, although this is another nonagenda item.

The NAB has been pushing its CATV position: that the FCC has jurisdiction to regulate all CATV's, that congressional mandate is not required. Under this thinking, NAB has been urging, among its main points, 15-day before-and-after nonduplication and a rule on leaptfrogging.

This week the joint board will be asked to approve a Future of Broadcasting Committee report that would amplify the NAB's proposal for a CATV contour which would extend beyond the Grade B area. The plan, first broached publicly at last fall's regional conferences, would allow a CATV system to pick up signals from an independent station beyond the station's Grade B contour, provided certain technical requirements are met.

However, this is predicated on the system's first carrying service of all three networks. The basis of the proposal is that TV signals of measurable quality may extend beyond the grade B contour. How far a signal may go and how to measure it are still undecided.

A few board members said they don't look too favorably on the plan but are withholding final judgment until it is presented to them.

With the FCC planning to take some action on CATV on Feb. 10, perhaps along lines the NAB has recommended (see page 46), there are no signs of a radical change in the NAB's stand.

PR Funds The requested $87,000 public relations budget increase was by-passed at the finance committee meeting two weeks ago (Broadcasting, Jan. 17), and another meeting of the public relations committee will take place Tuesday morning.

It is expected that the committee will seek to get some additional PR funds, at least enough for one or two additional people on the five-man staff and possibly enough for one or two new projects. The PR request was said to have been pared in favor of an additional $50,000 allocation to the All Radio Methodology Study, which will cost $100,000 more than the $150,000 it had been budgeted for.

The radio and television boards will hear finance committee recommendations for a 50% and 15% dues increase, respectively. The radio code's dues scale is now set at one-half a station's highest one-minute rate. This would become three-fourths of the minute rate. The maximum radio fee, now $216, would also be increased slightly. There is no radio minimum.

In television the current yearly dues are the higher one-hour rate with the $300 minimum and $1,200 maximum. This would be increased to 115% of the hourly rate with "slight" increases in minimum and maximum.

Question on Time The code time-standards question, one board member said last week, "will definitely be brought up" (Closed Circuit, Jan. 17, 3). It was said that some board members are in favor of dropping specific time limitations and putting language in the codes that would make the matter one for the broadcaster's discretion. This principle is based on the broad-caster knowing his audience, his mar-ket and his competition better than any-one else and being better able to judge what would be within the bounds of good taste.

Also on the agenda are the reports of the building committee, American Values Committee, convention committee and editorializing committee.

The building committee, with a fi-nance committee recommendation, will propose that the NAB spend $1.8 mil-lion for a seven-story building on the current Washington site and the adjoining parking lot.

The American Values Committee is expected to seek funds for a small staff to promote an improved social and moral climate in the country.

Also before the joint board will be a progress report on NAB committee work in creating guidelines to be used in implementing the FCC's policy state-ments on loud commercials; a report on the engineering/management seminar held at Purdue University in November, with a recommendation that a second session be scheduled this fall, and a recommendation that the "NAB Engineering Handbook" be updated with a sixth edition.

The board will also be asked to re-new the Harold E. Fellows Memorial Scholarship, which carries an annual budget of $2,500 for two scholarships to students of broadcasting in member schools of the Association for Profes-sional Broadcasting Education.

Facing the radio board will be the report on the 1965 program clinics and a recommendation for another series this year, with the opening session be-

---

**Broadcasters and NCTA lock swords on CATV**

Lawrence H. Rogers, president of Taft Broadcasting, charged last week that some community antenna television systems are continuing to delete commercials from the programs they carry.

Benjamin J. Conroy Jr. chairman of the National Community Television Association, answered that he had never found a single instance of altered commercial transmission by a CATV. "It hasn't ever been documented," he said.

Messrs. Rogers and Conroy exchanged the comments at a debate on regulation of the CATV industry held at an International Radio and Television Society meeting in New York. In debate, Mr. Rogers did not offer any examples though he later suggested that the problem had come up in the Scranton-Wilkes-Barre, Pa., market. Taft operates WNEP-TV there.

"The fact is that programs are being altered by CATV's," Mr. Rogers charged, and that "CATV's do originate programs." He said that sometimes the protective attitude of a local chamber of commerce might pressure the CATV operator, who depends on the city's government for his franchise, to pull off the commercial of an out-of-town retailer to protect a local store. "Then you start to open up a can of worms," he said.

Mr. Rogers called for FCC as-sumption of regulation of community antenna TV.

"Nobody is really fooling anybody about the ultimate purpose of un-regulated CATV," he asserted. Representatives of Jerrold Electron-ics and H & B American, he added, "have gone on public record predicting that they would one day have the nation wired coast to coast, enabling them to compete at the source for their own programs."

Mr. Conroy answered that NCTA didn't stand for nonregulation of CATV. Some regulation is needed, he said, but not regulation assumed by the FCC. Some members of the FCC who want the commission to assert authority over CATV are "badly misreading the temper of Congress," he warned.

In rebuttal to Mr. Rogers's argu-ments, Mr. Conroy said that CATV's might be forced into originating their own programing if too much of what they're now allowed to carry is blacked out through gov-ernment regulation.
ginning on the West Coast; plans for the May Radio Month campaign with the theme "Radio . . . America's Sound Habit"; an ARMS report; the report on studies to determine the feasibility of publishing an encyclopedia of recorded sound, and a request to create a small-market radio committee.

Other items on the TV board's agenda will include the Television Information Office report, a staff recommendation to create a new-stations committee, and a report on TV music licensing.

More opposition on Cox's CATV plans

Cox Broadcasting Corp., whose increasing activity in community antenna television has involved it in a growing number of disputes with fellow broadcasters, has picked up another opponent from among its broadcasting colleagues.

Rust Craft Broadcasting Co. last week urged the FCC to deny or set for hearing a Cox subsidiary's application for authority to provide microwave service to CATV's in Toledo and Findlay, both Ohio. The microwave would relay the programs of WGN-TV Chicago, 225 miles away.

Rust Craft, which owns 16 broadcasting stations, including five television outlets, is concerned about the chance of success of the UHF station it holds a construction permit for on channel 54, in Toledo.

If the commission wants to see "the development of UHF stations in accordance with congressional intent and its own stated purposes," Rust Craft said, "then the application of Video Service Co. must be denied."

Other Opposition • Petitions from three other broadcasters opposing Cox-connected CATV plans are already on file at the FCC. Steinman Stations is opposing applications to relay signals of New York and Philadelphia stations to CATV's in Chambersburg and Tyrone, both Pennsylvania. Steinman is licensee of WGL-TV Lancaster, Pa.

Storer Broadcasting Co. and D. H. Overmyer have filed petitions opposing proposals for serving the Toledo and Findlay CATV's. Storer is licensee of WPIT-TV (ch. 13), and Overmyer holds a permit to construct WDKO-TV (ch. 29), Toledo.

The Cox microwave system, to which the Chicago link would be added, now serves CATV's in Logansport, Lafayette and Peru, all Indiana. Cox Cablevision, another subsidiary of the broadcasting company, holds a 45% interest in the Toledo CATV and a 50% interest in the one in Findlay.

Awaiting Policy • Indications are that

Long-Life, High Performance Television Camera Tube. An entirely new principle of operation, perfected by English Electric Valve, provides improved performance and increases tube life 3 to 4 times that of previous image orthicons.

LONG-LIFE Achieved Without any Corresponding Disadvantages—
- No burn-in or "sticking"  ■ Improved S/N  ■ "Crisp" live pictures
- Sensitivity, resolution and gray scale remain constant over the life of tube  ■ Reduced black compression.

This new ELCON tube can be used with existing image orthicon cameras, as well as in the newer transistorized zoom cameras built specifically to take maximum advantage of its performance.

For detailed information on this important technical breakthrough, write for Bulletin 410.

ELCON . . . stocked, tested and warranted only by VISUAL, the leader.

LOOK TO VISUAL FOR NEW CONCEPTS IN BROADCAST EQUIPMENT
Twin City stations beat fines

In what's called benchmark case, federal court
says FCC doesn't know what 'willfull and repeated'
mean, exonerates TV stations of FCC changes

The FCC last week flunked the first
court test of its system of levying fines
for alleged infractions of its rules. A
federal district judge ruled that the com-
mission erred in assessing fines of $500
each on Minneapolis-St. Paul television
stations that it had accused of violating
its regulations on sponsor identification.

The decision was hailed by broad-
casters and communications lawyers
as a setback to the commission's method
of imposing fines. It was issued on the
stations' motion to dismiss after the gov-
ernment had presented its case. U. S.
District Judge Edward Devitt, sitting in
Minneapolis, didn't even ask the sta-
tions' lawyers to rebut the argument that
the government presented in opposition
to the motion for dismissal.

The case arose when the FCC charged
four Twin City stations, WCCO-TV, KSTP-
TV, KMP-TV and WTCN-TV, with "will-
ful and repeated" violations of its spon-
or-identification rules. The stations had
broadcast only twice, and on the same
day, a taped message favoring a Sun-
day-closing law. The message contained
no mention of the sponsor.

The stations claimed their failure to
identify the sponsor of the message
was either willful or not repeated. They
refused to pay the fines (BROADCAST-

Under the procedures established by
law, the FCC may ask the Department of
Justice to sue for the collection of
fines that are challenged. The Depart-
ment of Justice, according to the FCC's
press release, instituted and conducted the
prosecution that ended last week in the
exoneration of the stations.

Only three of the accused stations
were involved in last week's decision,
which came after trial before a judge
without a jury. The fourth, WTCN-TV,
had asked for a jury trial which it was
awaiting. Lawyers conjectured that
since the facts were the same, the case
against WTCN-TV would also be dis-
missed.

Upholds Stations • In his ruling last
week Judge Devitt said from the bench
that the infractions cited by the FCC
were neither willful nor repeated and
seemed to him to be inadvertent, in-
significant and due to no negligence on
the part of the stations. He invited the
stations' lawyers to submit proposed
findings.

Government lawyers at the FCC and
the Justice Department did not hide
their disappointment at Judge Devitt's
ruling. Asked whether they were con-
sidering an appeal, they would say only
that they were awaiting the written
opinion; after reading it they would de-
cide whether to carry their three-and-
half year litigation to a higher court.

The Minneapolis-St. Paul case was
the first defiance by broadcasters of the
FCC's power to levy fines. The second
such action was taken by WHAS-TV
Louisville, which in mid-1964 was as-
sessed a $1,000 fine by the FCC on the
charge that it failed to correctly identi-
fy the sponsor of a political program.
The Louisville case has not yet been
tried. The Minneapolis-St. Paul ruling
may play a significant part in the Louis-
ville case.

Testimony Introduced • In the case
the commission will take no action on
any of the protests until it has resolved
basic CATV policy matters. It is sched-
uled to start discussing proposed policies
and rules Feb. 10.

Rust Craft, in its petition, said the
commission rules requiring CATV's to
carry the programs of local stations and
to afford them 15-day before-and-after
nonduplication protection would be in-
adequate in the Toledo situation.

It said the distribution of up to 10
television signals on CATV's in Toledo
and Findlay would cause its proposed
station "irreparable" economic damage.
Toledo is currently served by two VHF's
and one educational UHF station.

In addition to WON-TV, both CATV's
would carry the programming of the local
stations. The Toledo system, which is
not yet in operation, would also carry the
programs of four other distant stations.
The Findlay system, which is operating,
carrries the programs of seven outside
stations. Only the wow link depends on
microwave.

That amount of CATV service, Rust
Craft said, "would destroy" the "only
hope" its Toledo UHF has of attracting
viewers—the rebroadcasting of network
shows not released in Toledo.

Rust Craft plans to carry NBC and
CBS programs. But, it said, if a net-
work has the choice of releasing its
total program over a CATV through
the format of big-city stations or in
"piecemeal as unreleased programs on a
local UHF, the choice would be ob-
vious."

Now a new threat
to news production

Senator Edward V. Long, (D-Mo.)
who last year castigated the Internal
Revenue Service for its use of wire-
tapping to trap tax offenders, has an-
nounced plans to look into business
espionage this session, particularly as
conducted by means of electronic de-
vice.

A spokesman for the senator said last
week that "television and radio will not
be affected directly, but the industry
spokesman will probably want to come
before us to go on record against the
regulations we intend to write into legis-
lation."

Senator Long, who is chairman of the
Judiciary Committee's Subcommittee
on Administrative Practice and Pro-
cedures, reported the move to pro-
hibit the use of concealed microphones
and cameras without the permission of
the people concerned.

The spokesmen stated that CBS-TV's
Candid Camera was not an object of
the legislation. CBS, he pointed out,
doesn't use the pictures or voices of
any of the participants without first
getting their permission.

But he indicated that the networks
might come in for a blast or two for the
use of hidden cameras in shooting
documentaries on various subjects, and
that the use of the hidden camera or
microphone, per se, would be taken
under scrutiny and attempts to have
them banned would be started.

Asked about the specific business-
espionage practices that the subcom-
mittee would try to uncover and outlaw,
the spokesman said: "Anything dealing
with spying by use of electronic devices
will be studied."

He pointed out that these elements
and their use constitute "an invasion

BROADCASTING, January 24, 1966
A way to count auto radios?

ABC Radio says it has electronic measurer that ticks off ratings anywhere

A major step forward in the measurement of the automobile radio audience is being claimed today (Jan. 24) by Robert R. Pauley, president of the ABC radio network.

Mr. Pauley called it "the first step toward silent electronic measurement of the entire radio audience."

Research commissioned by ABC Radio, Mr. Pauley announced, has produced an electronic device that in preliminary tests has been successful in measuring (1) the number of cars passing by, (2) the time they pass, (3) the number having radio sets in use and (4) the frequency to which each operating set is tuned.

Mr. Pauley called upon the radio industry to take steps to begin measuring the auto radio audience as soon as possible.

He said he had been assured by the developers that the unit could be made mobile. Thus, he said, "it may reasonably be assumed that it can be taken to beaches and other public places to measure radio listening there, and that by moving up and down streets it could also measure home audiences."

There have been many attempts to devise a practical electronic method of tabulating auto radio listenership, one of the most elusive elements of the entire radio audience measurement problems. Observers thought that this was the first time, or certainly one of the few times, a device has been said to be capable of identifying not only automobile tune-in, but the station being tuned.

How It Works — The device was developed by the Franklin GNO Corp. of West Palm Beach, Fla., a scientific research and development company not previously involved in audience research. The firm was hired by ABC Radio last summer to "investigate all possible methods by which to measure electronically radio's listenership in cars" (BROADCASTING, June 14, 1965).

Mr. Pauley said the bill had come to $50,000.

Dr. Martin J. Cohen, vice president of Franklin GNO, said the new device measures the emission of the local oscillator radio frequency from the passing car's antenna.

This technique, he noted, has been used before but has been plagued by interference. The oscillator emissions are normally "very low," he explained, and noises due to atmospherics, power lines and local ignition have made accurate measurement difficult.

The new device overcomes this problem, Dr. Cohen told BROADCASTING, by employing dual antennas operating in opposite phase, so that the interference is cancelled out.

He said the device can be set up to measure any lane of traffic anywhere and can be operated automatically or by attendants. Depending on the complexity of the research, the cost of setting up the device in any desired location would range from $2,000 to $5,000, according to Dr. Cohen.

He said the time needed to get into production would depend upon a number of factors but that it probably would take at least a year.

He also said, in answer to further questions, that he thought it could be used for measurement of TV as well as radio audiences but that for TV it probably wouldn't need as many "special tricks"—presumably an allusion to the multiple-antenna setup.

Nobody Knows — Mr. Pauley, whose network has been a pioneer in several areas of radio audience research, was enthusiastic about the development, which he said would introduce the concept of "silent interrogation" into audience measurement. Unlike interviews, diaries and set-attached devices, he explained, the new technique measures listening without the listeners' knowledge.

"The ABC radio network spent $50,000 to underwrite this preliminary study in behalf of the industry," he said, "and we are completely satisfied that electronic automobile measurement, employing [this] technique, is now possible and practical."

"In my opinion, silent interrogation electronically is the answer to true broadcast research. Any known contact with a respondent—whether at home or in a car—conditions the listener and causes bias."

"Four years ago I was told that silent electronic measurement of automobile radios—without an instrument attached to each car—was too complex a process and could not be done. After consultations with numerous companies since 1962, it now is apparent to me that the radio industry can—and I heartily recommend that it does—appoint a major research firm to begin measurement of automobile radio listenership as soon as possible."

Mr. Pauley saw "enormous" short-term and long-term advantages for radio. "Broadcasters have talked for..."
FM committee stresses importance of AM-FM transistors

The industry move to put a transistor radio in every home was endorsed and enlarged last week by the National Association of Broadcasters' FM Committee, which called for those transistors to be of the AM-FM variety.

At its meeting in Washington last Wednesday (Jan. 19), the committee requested the NAB to seek support from manufacturers, civil-defense authorities and broadcasters in encouraging AM-FM transistors for everyone.

The committee also reaffirmed a year-old resolution calling on rating services to measure AM and FM adequately and properly. Everett L. Dillard, WASH(FM) Washington, committee chairman, added that the raters should consider FM "as a part of the total radio universe."

In other business, the committee heard a progress report on the All Radio Methodology Study, and made preliminary plans for the FM Day session at the NAB Chicago conven-

tion, March 27-30. The FM Day (Sunday, March 27) agenda is split with NAB taking the afternoon ses-

tion and the National Association of FM Broadcasters planning the morn-

ing meeting.

ACLU hits damage awards

The awarding of punitive damages in libel suits where the libel deals with public issues was opposed last week by the American Civil Liberties Union as a threat to freedom of speech and press. The ACLU board of directors said that the award of punitive damages is "inconsistent with the First Amendment principles."

FCBA says no to FCC

A move to allow members or employees of the FCC to become members of the Federal Communications Bar Association failed to muster the necessary two-thirds affirmative vote of the bar association's meeting on Jan. 14 and thus was defeated. The vote was on an amendment of the FCBA's constitution to extend membership eligibility to attorneys who are commissioners or staff members of the FCC.

Those opposing the proposal said that inclusion of FCC mem-

bers or lawyers would inhibit the association from taking positions which may be contrary to commis-

sion views.

years about the tremendous potential of electronic measurement of automobile radio listening," he said. "How many times have radio men been told by potential advertisers: 'But you people don't really know how many people can be reached in their autos.' Now, for the first time, broadcasters will have a positive reply for these advertisers."

As to the longer-range potential, he said: "This will be the most accurate count we have ever had of the number of car-radio listeners, due to a vastly enlarged audience sample and to the very fact that the system is electronic. "Broadcasters eventually will be able to determine the listening habits of drivers. They will be able to tell which shows drivers prefer at various times of the day and program accordingly.

"With such devices as camera attachments, the near future should bring about our determining the makes and ages of cars as well as program preference of the drivers of those cars.

"Various demographic studies could be undertaken to determine programming tastes based on locales, income levels and many others.

"And since these devices can readily be moved from highway to highway, it is reasonable to assume that in the not-too-distant future they can be moved off the highway and into beach areas and other public places to measure the vast transistor audience."

FM committee stresses importance of AM-FM transistors

The industry move to put a transistor radio in every home was endorsed and enlarged last week by the National Association of Broadcasters' FM Committee, which called for those transistors to be of the AM-FM variety.

At its meeting in Washington last Wednesday (Jan. 19), the committee requested the NAB to seek support from manufacturers, civil-defense authorities and broadcasters in encouraging AM-FM transistors for everyone.

The committee also reaffirmed a year-old resolution calling on rating services to measure AM and FM adequately and properly. Everett L. Dillard, WASH(FM) Washington, committee chairman, added that the raters should consider FM "as a part of the total radio universe."

Taft third quarter shows slight increase

Taft Broadcasting Co., Cincinnati, has reported an increase in revenues and income for the quarter ended Dec. 31, 1965. Net revenues for the fiscal quarter were $7,570,647 compared to $7,147,526 in the same quarter of 1964. Net income rose to $1,717,931 from $1,444,621 reported in the third quarter of the previous year. Profits before federal income taxes rose to $3,303,713 from $2,877,718. Earnings per share were 52 cents compared to 44 cents in the previous year.

The company also declared a quarterly dividend of 12½ cents a share payable March 14, to stockholders of record Feb. 15.

Nine months ended Dec. 31, 1965:

Disney earnings up 60% in 1965

Thanks to the spectacular success of the feature film "Mary Poppins" and to a lusty $14.8 million increase in theatrical and television revenues, Walt Disney Productions, Burbank, Calif., is basking in the reflection of fiscal 1965, its best year ever.

Fiscal 1965 was the first time Disney gross income exceeded $100 million. The company's 1965 net earnings were 335% greater than those registered in 1964.

Year ended Oct. 2, 1965:

Stockholders OK Capital Cities' split

Capital Cities Broadcasting stockholders have approved a two-for-one stock split and authorized the company to increase stock to 5 million shares. The actions took place at a special meeting held Jan. 17 in Albany, N. Y.

Capital Cities had noted that the split was intended to increase the market supply for its shares and to broaden the base of its stockholders (Broadcasting, Dec. 13, 1965). The stock is traded on the New York Stock Exchange.

Filmways profit picture improves

Filmways Inc., New York, more than doubled its earnings in the quarter ending Nov. 30, 1965, compared to the same quarter a year earlier.

The company now lists eight film series on the networks: ABC-TV's The Double Life of Henry Phyle and The Addams Family; CBS-TV's The Beverly Hillbillies, Petticoat Junction, Green Acres, Mr. Ed and The Trials of O'Brien; and NBC-TV's Eye Guess. In pilot production, Filmways has; for ABC-TV, The Surfers and The Prufts of Southampton; and two game shows in cooperation with Bob Stewart Productions.

Kahn sells part of his Teleprompter stock

Irvig B. Kahn, Teleprompter board chairman and president, has sold 8,100 shares of Teleprompter stock, according to an insider trading report issued by the American Stock Exchange last week. Mr. Kahn retains 46,080 shares.

Hubert J. Schlaffly, senior vice president and a director of Teleprompter, sold 2,000 shares and acquired 2,500 shares in gifts and now holds 30,528.

Teleprompter's stock, trading in recent months around 11 points, rose sharply following a community antenna franchise grant from New York City (Broadcasting, Dec. 6, 1965), reaching 27 several days after the grant was made. Last week it fell to 17½.

JUMPING-OFF PLACE FOR EXCITEMENT

Sports entertainment at its thrilling best in 21 5-minute color shows featuring the world's champion and top Olympic skiers. Each film is packed with skiing action and instrumental information...ideal for use in conjunction with sportscasts, ski casts and interview shows, or as a complete and separate program.

**Budget Bureau gets FCC's TV form**

It has a close resemblance to earlier radio questionnaire, so quick approval is expected

The FCC's proposed program-reporting form for television took a long step toward enactment last week. The commission, by a 5-to-2 vote, cleared the form for submission to the Budget Bureau. The action had been foreshadowed on Jan. 7, when the commissioners reached agreement on issues then holding up approval (Broadcasting, Jan. 10).

Relatively quick clearance is expected since the form closely resembles the AM-FM questionnaire approved by the bureau last summer. The Budget Bureau, which must pass on all government forms issued to the public, will get the views of a broadcast industry advisory committee before it acts.

The commission's action last August in adopting the radio form broke the stalemate on the TV form, although it was not generally realized at the time. For in adopting the radio form, the commission had blocked out the shape and content of a form for TV that a majority of the commission would accept (Broadcasting, Aug. 16, 1965). Work on the AM-FM form started late in 1963 under the supervision of Commissioner Lee Loewinger. It was regarded as a simpler and less controversial project than the TV form, which was the center of a continuing controversy. And the radio form emerged as a questionnaire that was far less demanding than any of the TV-form versions that had been issued for comment.

**Unhappy Broadcasters** - Nevertheless broadcasters were still unhappy with the radio form, and the Budget Bureau's advisory committee filed a lengthy, strongly-worded criticism of it. But it moved along with relative speed to final adoption.

When that task was completed the commission turned back to the TV form. And it found the draft of that document had undergone a profound change. Most of the questions requiring detailed information about programing were gone, including one that would have required fact sheets on programs aired in each of three composite weeks (Broadcasting, Oct. 18, 1965).

What remained closely resembled the radio form. The staff, in drafting the TV form, had taken its cue as to what the commissioners would accept from what they said during their discussions of the radio form.

**Programing Question** - The TV form, as currently proposed, asks the amount of time devoted to news, public affairs and other programing, exclusive of entertainment and sports, and commercial practices in the composite week. It also asks how much time the station intends to devote to those categories in the future. The radio form asks the same question.

There are, however, some differences. Unlike radio licensees, TV broadcasters would be required to describe the programs they report in their composite week. They also would be asked to give the source of programing (local,

**Big 10 basketball gets color-TV coverage**

On Jan. 15 the Ohio State at Michigan State basketball game was fed in color to 46 stations in 11 states as part of collegiate basketball's oldest, continuous series, Big 10 Basketball.

Of the nine Saturday afternoon games on TV this season, four are scheduled for color. Kay Schultz, director of the Big 10 Service Bureau, Chicago, and producer of the series, said the only limitation on color is the lighting available at the various schools. Originations from Michigan State, Illinois and Ohio State are the only ones that can be shown in color. Several conference schools, however, are constructing new field houses and gymnasiums with sufficient lighting for color.

Big 10 Basketball, now in its 12th season, had one test game in color last season. Mr. Schultz said the audience response was very good. Sports Network Inc., which co-produces the series, said it would originate as many games as possible in color in the future.

Another new feature this season is the use of combined video tape and live half-time fill material. The tape was also used experimentally last year.

The remote pickups are fed to WGN-TV Chicago and from there to the network, which covers the Midwest. All tapes and spots are also fed from WGN-TV. The half-time tapes are made at the school the day preceding the game and recorded at the WGN-TV studios.

The series is one-half sponsored by Standard Oil of Indiana through D'Arcy Advertising, Chicago (now in its 10th year of sponsorship), one-sixth by the Dodge Division of Chrysler Corp. through BBDO, New York (in its third year) and one-third locally.

The Big 10 Basketball series began in 1954 on CBS-TV when that network had a package deal with the conference to cover football and basketball. In 1956 SNI and Sports Programs took the series. When Sports Programs became an arm of ABC Sports and found it was competing with ABC-TV's Wide World of Sports, it bowed out. The current production team has been together since 1963.

Bill Fleming, announcer for the games, is in his seventh season.

Although the schools do not get a lot of money—about $6,000 to $8,000 each—for the series, Mr. Schultz said they like it, especially the coaches. "To them it's a good recruiting gimmick." He added the
exchange, network, recorded) aired during various segments of the day.

The Vote • The same commissioners who opposed the radio form—Rosei H. Hyde and Robert T. Bartley—voted against sending the TV form to the Budget Bureau. The reasons for their opposition are the same as in radio.

Commissioner Hyde feels the form would permit the commission to regulate programing. Commissioner Bartley believes the form does not require broadcasters to make a sufficiently detailed survey of community needs.

The five commissioners in the majority are not entirely satisfied either. But after the more than seven years the commission has been struggling to revise the TV form, they feel the document on which they finally reached agreement on Jan. 7 is as good a compromise as they can hammer out.

AP membership climbs

Broadcast membership in the Associated Press rose to a new high of 2,780 in 1965 with a net gain of 65 TV-radio stations. This new figure was announced last week by Wes Gallagher, general manager, during a meeting in Santa Barbara, Calif., of the AP board of directors. He noted that newspaper membership rose to 1,221 dailies, a net gain of 18 over 1964.

series had also been a "good public-relations program."

He said an A. C. Nielsen survey of the 1965 games over nine weeks of conference play gave the series an average 12.8 rating and a 31.4% share of audience. The 1965 games were carried on 40 stations in 10 states.

Mr. Schultz said the series is naturally picked up by some community antenna television systems, although he doesn't know how many. But apparently they are far reaching. He recalled one letter from a group of men in International Falls, Minn., at least 150 miles from the nearest station carrying the games, who requested that the series be kept on the air. Their reason is that the games give them something to watch while inibing in a local bar.

NCAA plan kicked by FCC

Commissioners don't like blackout system and hope for more flexibility

If the National Collegiate Athletic Association was an immovable object, the FCC was something less than an irresistible force in a meeting on the NCAA's policy of restricting the televising of college football games.

FCC commissioners last week expressed their concern over the system. They feel it unduly restricts the televising of programs that the public wants to see.

But Asa Bushnell, program director of the NCAA TV committee, indicated the association intends to maintain the integrity of a plan that has stood the colleges in good stead. NCAA recently sold its football game-of-the-week television rights to ABC-TV for two years for $15.5 million.

Under the plan, games not carried on the network may be televised under two exceptions if they are sold out, and then only in the home areas of the teams involved and in the city in which the game is being played if that is neutral territory; games played 400 miles away from the visiting team campus may be televised in the visitor's town. But there is a blanket ban on local television if community antenna television systems pick up the signal.

The meeting, in FCC Chairman E. William Henry's office, was a direct outgrowth of the NCAA's action last fall in barring WNDU-TV South Bend, Ind., from broadcasting Notre Dame games (Broadcasting, Nov. 1, 1965). The exemption that had been granted was withdrawn when the station was unable to prevent the CATV's from retransmitting the televcasts.

Concern Over CATV • Mr. Bushnell relayed to the commission the association's concern with CATV and its potential impact on the efforts to protect the college football box office. The association at its annual convention in Washington two weeks ago voted to conduct an investigation of CATV "in all of its ramifications" (Broadcasting, Jan. 17).

Attending the meeting with Chairman Henry were Commissioners Kenneth A. Cox and Robert E. Lee and key staff members. NCAA TV committee members sitting in with Mr. Bushnell were William R. Reed of Chicago, a director of the Big 10 Conference, and William J. Flynn, of Boston College.

The commissioners were hopeful that NCAA, instead of tightening up its rule, would liberalize it to permit more stations to carry the nonnetwork games. In one incident that preceded the controversy over Notre Dame, the commission virtually ordered KRLD-TV Dallas to ignore NCAA rules and permit KLYV-TV Tyler, Tex., to rebroadcast its coverage of the Texas-Oklahoma game (Broadcasting, Oct. 18, 1965).

The commissioners last week recalled that not only was that game a sellout but that the station's signal didn't penetrate any area where a college game was being played. NCAA officials, however, expressed the view that exceptions of that sort could ultimately erode the plan.

Chairman Henry following the meeting said it had been useful in permitting the two sides to hear each other's views. He indicated future talks were probable and said he remained hopeful that NCAA would be more flexible in implementing the rule.

Ski championships new TV attraction

Professional skiing on an organized level will push off into TV this week with the opening of the 1966 world's professional skiing championships and with nearly half of the sponsorship of the telecast coverage already tied to a single advertiser.

Although professional skiers have appeared on network and local TV programs before, the frequency of their races and the subsequent coverage by TV have been neglected because of a lack of organization and money.

But a new group, the National Professional Ski League, hopes to change the picture. NPSL's promotion for the upcoming races—played off in three two-day meets—will include TV coverage on one-hour delayed tapes for each meet. Sports Network Inc., cooperating with the league, has arranged a regional hookup of 22 stations in the Northeast. NPSL's prize money for the three events totals a record $30,000.

Sponsors' interest in the TV exposure came quickly after NPSL's announcement of the contests last week. First commitment was made by F & M Schaeffer Brewing Co., Brooklyn, N. Y., for almost half the available time—three minutes in each of the three meets. Participations in the remaining four minutes in each meet were said to be under consideration, as of last Thurs-

Broadcasting, January 24, 1966

61
NAB to canvass stations on editorializing

A national survey of executives' opinions on broadcast editorials will be conducted by the National Association of Broadcasters this spring. The survey of all broadcast licensees, approved by the NAB editorializing committee at its meeting in Washington last Tuesday (Jan. 18), is planned for an April start.

Rex G. Howell, KREX-AM-FM-TV Grand Junction, Colo., committee chairman, said the questionnaire will be used by NAB to further assist the members in developing editorial practices. The questionnaire will be mailed to both member and non-member stations.

The national survey was approved by the committee after it had seen the results of a pilot study of about 85 stations conducted last fall by the Opinion Research Corp., Princeton, N. J. That survey was based on 90-minute in-depth interviews with radio and TV station executives in the Dallas, Chicago, San Francisco, Atlanta, New York and Denver areas.

Committee members at the NAB meeting were seated (l-r): George Whitney, KFMB-AM-FM-TV San Diego; Rex G. Howell, KREX-AM-FM-TV Grand Junction, Colo., and A. Louis Read, WDSU-AM-FM-TV New Orleans. Standing (l-r): George Comte, WTMJ-AM-FM-TV Milwaukee; John F. Dille Jr., Communication Group of Indiana, NAB joint board chairman; Oliver J. Keller, WTAX-AM-FM Springfield, Ill., and Eugene W. Wilkin, WGAN-AM-TV Portland, Me.

day (Jan. 20), by a tobacco company, an oil company, a credit card firm and others.

The contests, narrated by Marty Glickman, who will also conduct interviews, are scheduled at Stratton, Vt. (Jan. 26-27), Windham, N. Y. (Feb. 9-10) and Sugarbush, Vt. (March 2-3), with telecasts following on the Sundays after each event: Jan. 30, Feb. 13 and March 6, respectively.

SNI's regional TV lineup includes New York (WPTV), Boston (WNEA-TV), Providence, R. I. (WJAR-TV), and extends into upstate New York (WRGB-TV Schenectady, WNBF-TV Binghamton, WGR-TV Buffalo, WPTZ-TV Plattsburgh, WHEC-TV Rochester, WKTU-TV Utica, WNYN-TV Watertown and WNYS-TV Syracuse); Pennsylvania (WYH-TV Lebanon, WBAA-TV York, WJAC-TV Johnstown, WHP-TV Harrisburg, WMC-TV Pittsburgh, WDAU-TV Wilkes-Barre-Scranton and WFMF-TV Philadelphia); Maine (WLBZ-TV Bangor and WCSH-TV Portland); Connecticut (WNIHC-TV New Haven) and Massachusetts (WWLP-TV Springfield).

Stations change to C&W program format

The country-and-western sound has picked up volume according to reports received from stations. Plough Broadcasting Co. on Jan. 15 switched WPLO Atlanta to that format after more than a year of study of the country sound and how it should be applied to the market. Plough cited the successful record of its WJJD Chicago which was converted to country-and-western music in February 1965.

WENN Philadelphia also announced that, effective Jan. 17, it had included a Monday through Saturday, 6:30 to 10:30 p.m. segment of country-and-western into the station's middle-of-the-road musical format.

Earlier, the All-Tex Network changed its format to complete country-and-western programming. Network includes KAWA Waco, KEKS Gladewater, KDOX Marshall and KYAL McKinney, all Texas.

Storer consolidates feature-film buying

Storer Broadcasting Co. has centralized feature-film buying for its five television stations through its New York office. Robert Guy, program development manager, will be in charge of the operation, which will be located at 500 Park Avenue, Storer's present New York address.

Bill Michaels, Storer vice president for television, said last week about 75% of the stations' feature-film budgets will be spent through the coordinated purchases. The remainder will be for individual packages presented to the stations. The New York office will not buy syndicated products since that will be purchased locally according to a station's needs.

Storer's TV stations are: WJW-TV Cleveland, WITI-TV Milwaukee, WJBK-TV Detroit, WAGA-TV Atlanta and WSFD-TV Toledo, Ohio.

Rotation system brings Emmy show to CBS-TV

The Emmy awards telecast of the National Academy of Television Arts and Sciences, the subject of much controversy over the past two years, will be presented on CBS-TV May 22 (10-11:30 p.m. EDT) in color.

Under a new plan the Emmy program will be rotated among the three TV networks. In recent years the show has been telecast over NBC-TV. The carry-
GOP committee set up to 'reform' convention

Will the national political conventions be trimmed down to eliminate the periods of dullness in full-text television coverage?

This is the question facing both the Democratic and Republican national committees as they start planning for the 1968 elections.

Last week the Republicans, under the direction of their chairman, Ray C. Bliss, appointed a "convention reform committee" with the sole purpose of "modernizing and simplifying the GOP national conventions so that they are more attractive and effective in the eyes of the public."

The committee will meet in Washington Jan. 30 to make plans for the convention study, the chairman said.

The formation of the committee is an outgrowth of a speech made by former President Eisenhower to the Republican National Committee last June (Broadcasting, July 5, 1965).

The chairman reported that the committee will seek ways to improve its conventions and that the advice of correspondents in broadcasting and print will be sought. Also to be consulted are "the officials of the radio and television industry," Mr. Bliss said.

Fred C. Scribner Jr., general counsel of the RNC, will also serve on the 12-member committee on convention reforms. No broadcasters are on the committee, but they will be consulted after the organizational meeting at the end of January.

50-50 rule deadline

The new deadline for filing comments in the FCC's rulemaking to limit network ownership or control of programming is April 15. Broadcasting last week erroneously reported the deadline had been extended from Jan. 31 to March 15. Deadline for reply comments is May 16.

Lucy plays hard-to-get

Lucille Ball, is in an off-again mood in her relationship with CBS-TV. Reportedly she has notified both the network and her sponsors, Lever Bros. and the Tandem Co., that there isn't going to be a continuation of the Lucy series in the 1966-67 season. Miss Ball wants to do "other things." She's already signed to do at least two specials for CBS-TV next season.

The half-hour Monday night Lucy Show, which Miss Ball's Desilu Productions produces, is in its fourth season on CBS and still garnering winning ratings. The actress went through similar cliff-hanging negotiations with the network last winter before agreeing to a continuation of the series.

TV freed to cut Preminger film

New York court rules that television has the right to insert commercials and make appropriate changes

The New York State Supreme Court last week turned down a bid by producer-director Otto Preminger to prevent any cutting or commercial interruptions during TV presentations of his feature film, "Anatomy of a Murder."

Mr. Preminger later said that he planned to appeal the decision.

In rejecting Mr. Preminger's motion for a permanent injunction last Wednesday (Jan. 19), State Supreme Court Justice Arthur G. Klein cited two main points. He noted that the TV exhibition contract with the defendants, Columbia Pictures and Screen Gems, did not give the plaintiff [Mr. Preminger] the right to make cuts in the films or block the use of commercials. Secondly, Judge Klein decided that under the prevailing custom in the TV industry, the stations have the right to use their judgment and discretion as to which "minor cuts, eliminations, and interpolations are appropriate."

Mr. Preminger had charged that if the feature were shown on TV with what he called "excessive cuts and commercials," his reputation as a producer would be damaged and the commercial value of his film would be reduced.

Judge Klein referred at one point to the portion of the contract which contained the specific grant of TV rights and said it makes "no reference to 'cutting and editing.'" He continued:

"In these circumstances the court is inclined to the view that the right to the 'final' cutting and editing reserved to the plaintiffs is limited to the original or theatrical production of the picture and not to showings on television; and that as to such showings [on TV], in the absence of specific contractual provision, the parties will be deemed to have adopted the custom prevailing in the trade or industry. This view is confirmed by the authorities and fortified by the evidence."

Judge Klein acknowledged that viewers may resent commercial interruptions but voiced the opinion that "this resentment would be directed at the station or the sponsor of the program" and not at the film's producer or director.

"So standardized has the practice of interrupting films for commercials become," he pointed out, "that guidelines have been established in the TV industry as to the maximum number of commercials regarded as acceptable in a given time period."

The film, "Anatomy of a Murder,"
Reston shows how TV changed print news

The role of the newspaper and its reporters is changing toward a more interpretative approach to news events, a change in no small measure hastened by the presence of the TV camera.

James Reston, associate editor and columnist with The New York Times, took note of the change of that “square eye” in an interview conducted by Washington correspondent Paul Niven for telecast on stations affiliated with National Educational Television. The program, A Conversation with James Reston, was shown on WNDT(Tv) New York last week.

Mr. Reston said: “We can’t compete with the square eye looking at us here as reporters. If I go out now to write a descriptive story about, say, a presidential inauguration, how can I compete with this machine that sees the tears on Jackie Kennedy’s cheeks?”

“So we can’t compete in the same way. We have to do things. We have to deal with ideas, interpret thoughts and movements of policy, and things which the camera can’t get on.”

In noting that the newspaper reporter’s job has been forced to change by “modern developments,” Mr. Reston said that today’s news columns contain more interpretation compared with those of 20 years ago.

He also called attention to what he said was too little “aggressive and assertive” reporting. “As things get more and more complex,” he said, “a reporter has to do more and more interpreting.”

has been shown in several major markets in its entirety recently pending the court’s decision. The ruling is significant in that “Anatomy” is scheduled to be presented on approximately 100 local stations within the next few months.

FOI legislation introduced in House

House passage of the Senate-passed freedom of information bill was called for last week. Representative Robert Dole (R-Kan.) told the House: “At some point we must stop restating the problem... and come to grips with it.”

He introduced a bill similar to the one passed in the Senate under the guidance of Senator Edward V. Long (D-Mo.) (Broadcasting, Oct. 25, 1965).

He stressed that the government does have the right to withhold certain information and that the right of individual privacy must be upheld. But he added: “In a democracy, the public must be well informed if it is to intelligently exercise the franchise. There is little room in a democracy for secrecy.”

The office of the President, he said, by virtue of its constitutional powers in matters of national security and foreign affairs, “has some derived authority to keep secrets. But we cannot leave the determination of the answers to some arrogant or whimsical bureaucrat. They must be written into law.”

Congressman Dole emphasized that his bill would permit the President’s use of secrecy, but he charged that the balances “have been too long weighted in the direction of executive discretion and the need for clear guidelines is manifest. “I am convinced,” he said, “that the answer lies in a clearly delineated and justifiable right to know.”

He urged the House to place a “high priority” on the bill, which, he said, “perhaps failed to act in 1965 because of opposition from the White House and other administration leaders in the executive branch.”

The bill would provide for the right of a person to go to court when information other than confidential business information, information relating to foreign affairs or national defense, medical files on individuals, trade secrets or investigatory findings were denied him by the agency from which he sought the information.

Similar bills have passed the Senate on two other occasions but have failed to clear the House.

Film sales...

Tarzan Features (Banner Films): KBOI-TV Boise, Idaho.

The Big World of Little Adam (Banner Films): WITA San Juan, P. R.

WBBM-TV to seek viewers’ views of TV

CBS-owned WBBM-TV Chicago plans to survey its viewers to learn their feelings about television during a one-hour prime evening program next month. The project will be part of the station’s “Feedback” viewer opinion system initiated a year ago and now also being used by WCBS-TV New York.

The special program, part of the WBBM-TV documentary series called Eye on Chicago, will carry the title of “Television—Triumph, Treadmill or Trivia.” Parts of the show were taped last Tuesday (Jan. 18). Tentative air dates are Feb. 22 or 28.

Participants include FCC Commissioner Kenneth A. Cox; Jackie Cooper, executive vice president of Screen Gems; Roy Danish, director of the Television Information Office; Pat Levy, executive director of the Center of the Americas; and Aubrey Jones, assistant vice president and director of King Lawrence Productions, New York. The special will be available to sponsors and radio stations.

BROADCASTING, January 24, 1966

Dr. Henry Skornia, radio-TV department, University of Illinois and author of “Television and Society” Dwight Newton, TV critic, San Francisco Examiner, and Leonard S. Matthews, executive vice president, Leo Burnett Co.

A total of 26 questions on various aspects of TV will be presented to viewers at the conclusion of the program. They will give their answers by mail on special ballots to be printed in Chicago newspapers. Questions will delve into programming, commercials and political broadcasting, among other topics.

This project was the last to be worked out for WBBM-TV by the late Dr. Gary Steiner of the University of Chicago who died in a fall last week (see page 73).

Phyllis Diller series • Comedienne Phyllis Diller has signed for the lead of The Pruitts of Southampton, half-hour comedy project developed by former NBC-TV producing vice president David Levy. Taken from the novel, “House Party,” by Patrick Dennis, it’s scheduled for ABC-TV’s fall 1966-67 schedule.

Spy spoof • King Features TV has signed Bob Kane, creator of ABC-TV’s Batman, to originate a new half-hour TV color cartoon series entitled Cool McCool. According to Al Brodax, vice president and director of King Features, the series will be a “campy” spy spoof aimed at children in the 6-11-year old bracket, and will be offered to networks and national advertisers through the William Morris Agency.

‘Bomba’ in color • Production will begin shortly in Hollywood on the pilot of an animated color cartoon series, Bomba the Jungle Boy, designed for network and syndication sale. The series is being operated by Video Artists Inc. and producer Barry Lawrence, with Mr. Lawrence serving as executive producer. Episodes will run from five and one-half minutes to eight minutes long and the series will be available in segments or as half-hour programs.

On the house • Triangle Program Sales, syndication branch of Triangle Stations, will start distributing without charge the weekly radio series Family Living. Produced by Edwin Lee, programs with alternating moderators Kitty Carlisle and Pat Boone explore human problems and conditions, featuring gurus, versailites. Family Living had been an NBC Radio series for 11 years. ending last summer. The series is financed by Menley & James Laboratories through its Family Life Institute, a nonprofit foundation.

Health service • CBS Radio plans a five-minute Monday through Friday series, Dimension on Health, about information on public and private medicine, beginning Jan. 31 (11:30-11:35 a.m. EST). The series, with correspondent Charles Kuralt as anchorman, will feature CBS News correspondents around the world in visits to medical centers and interviews with authorities in the field. Mr. Kuralt will write the programs with science writer Earl Ubell, who also is producer. Joel Heller is executive producer.

TV critique • National Educational Television has inaugurated a half-hour editorial series, In My Opinion. The series will present journalists and writers from both free and Communist bloc countries, each expressing his editorial viewpoint in four-minute segments. First program features four American journalists, an international cartoonist and a Washington correspondent for an Iron Curtain country. Executive producer is Harry McCarthy with Howard Felsher as producer.

Lindsay chats • New York Mayor John V. Lindsay last Wednesday (Jan. 19) delivered the first of a planned series of television “fireside chats” to his constituents. He detailed the fiscal problems besetting the city in a talk carried live in prime-time by noncommercial WNET(TV) Newark, N. J.-New York and WYNC-TV, a city-owned UHF outlet. Mayor Lindsay is expected to speak to the city again within a few weeks on the results of his requests to the federal and state governments for financial aid.

Sword Play • A half-hour action film series, The Samurai, is being offered for sale to TV stations in the U.S. by Charles Michelson Inc., New York. The programs were produced in Tokyo and spotlight Samurai fighting by warriors. Mr. Michelson said that the series, begun recently on stations in Australia, has more than 100 episodes available.

Team to split • The comedy writing team of Arnie Rosen and Coleman Jacoby is calling it quits after 19 years of uninterrupted collaboration. They currently are producing the NBC-TV half-hour series Hank for Warner Bros. The series and the Rosen-Jacoby partnership are due to reach the end of the line in April. Mr. Rosen plans to remain in television while Mr. Jacoby will work on the book for a possible Broadway musical.

Comics on TV • Producers Robert Lawrence and Stephen Krantz have acquired TV animation rights from Marvel Comics group for two of its comic characters, Spider-Man and Captain America. Production of a half-hour pilot film is now under way at Grantray-Lawrence Productions, Hollywood.

New grant • A three-year grant of $6,000 a year, to be used as award money, has been presented to the Educational Television Stations Program
schwerin Research Corp. has developed a new audience testing technique for pilot films as well as series already on the air. Horace Schwerin, board chairman, said the new method uses a twin-screen approach.

Called "Channel Choice," it will be used exclusively in Schwerin Research theater laboratories where audiences representing a cross-section of TV viewers will be given a choice of two TV programs. At each session, viewers will be equipped with individual headsets and an electronic switching device so they may switch back and forth between channels. An electronic recorder diagrams each viewer's reactions for follow-up study and analysis.

Aaron Beckwith, director of program testing for SRC, said the company is convinced that "Channel Choice" will permit "far more productive and creative use of the millions of dollars which are gambled and lost every year on pilot films alone."

Studies already completed by SRC, he said, pointed out these multiple applications of the new technique:

Advance evaluation of actual competitive situations, with prospective new entries tested against established or similar shows they would face in a given time period; determining which episodes in a series should be scheduled at the beginning to build up interest among viewers; screen tests of actors for the leading role and supporting parts; testing of alternative titles and stock openings; providing information on the merits of introducing a new character into an established program.

Mr. Beckwith said the twin-screen approach already has been utilized by some producers, but emphasized that they have the option of using the long-established SRC single-screen testing method if they desire. Mr. Beckwith joined SRC last year to head a separate department for development and client service in program testing. He was a vice president of BBDO for six years as director of development for specials and documentaries, and earlier had been a vice president of MCA TV.

Encore = CBS-TV has renewed Leonard Bernstein's New York Philharmonic Young People's Concerts for four taped one-hour concerts during the 1966-67 season. Started on the network in the 1957-58 season, the series originates from Philharmonic Hall at Lincoln Center for the Performing Arts in New York.

A Kennedy special = A 90-minute film documentary, titled Kennedy, will be produced by David L. Wolper Productions in association with Theodore C. Sorensen. The program will be based on Mr. Sorensen's book, "Kennedy," which drew upon the author's association with the late President as special counsel and legislative assistant. Production is expected to be completed in the early next year.

Hawaii back = Hawaii Calls, a new 30-minute color TV series, based on the 30-year-old radio show of Webley Edwards, is now in production. Field Communications Corp., Chicago, with Paradise Productions, Hollywood, will produce the series to be ready for September.

Series for '67-'68 = Candid Productions, New York, has announced that it has acquired rights to the Rover Boys stories and plans to develop the property for a 1967-68 network TV series. Candid has been active in the production of sports specials for the past five years and currently is developing three color programs on sky-diving; a swimming championship and water skiing for network presentation, according to Paul Pegey, president of the production company.

Paper story = Southern Pulpwood Conservation Association, Atlanta, has available a new educational film, "The Paper Forest," which explains the operations of the South's pulp and paper industry. The movie is 28% sound color and can be obtained, with no fee, by writing Modern Talking Picture Service, 1212 Avenue of the Americas, New York.

Just the facts = Just the facts is a new reference volume, the "Richard Rodgers Fact Book" is now available at no cost to radio-TV program directors, and other professionally interested agencies and individuals. The 25-page book gives full details on all the song writer's productions to date, including TV and film versions. Contact: The Lynn Fennol Group Inc., 50 Rockefeller Plaza, New York 10020.

Wilding owns subsidiary

Wilding Inc., Chicago, has acquired full ownership of its Hollywood production subsidiary through purchase of the 10% interests held in Wilding-Feddersen studios there each by Don Feddersen and Jack Meyner. Price was not disclosed. Robert C. Ausbeck, Wilding president, said the West Coast studio will become Wilding Productions Inc. and will devote complete attention to TV commercials. Mr. Meyner continues as Hollywood manager.

Michaels to package sports

Jay Michaels, the man responsible for putting the Indianapolis 500 auto race on closed-circuit television for MCA Inc., is going to try to cash in on the lucrative sports-for-TV market on his own. He's resigned as supervisor for MCA TV Sports Division and is forming a new company, Trans-World Sport Inc., which will package and promote film and tape production of sports events. Partner in the firm, to be based in Beverly Hills, is Mark McCormack, attorney and personal manager for top golfers Arnold Palmer, Gary Player and Jack Nicklaus, among others. Mr. McCormack, as vice president, will establish headquarters in Cleveland. Mr. Michaels will be president of the company, which is expected to emphasize sportscasts of golf tournaments and auto races.

Vietnam TV special

A one-hour color special depicting the life of American soldiers in Vietnam, Or Give Me Death, has been sold by the Olas Corp., Cleveland, in seven major markets. The filmed program is described as a human interest portrayal of U.S. servicemen in the combat zone.

Initial sales of the Olas production have been made to WOR-TV New York, WJW-TV Cleveland, WWJ-TV Detroit, WAGA-TV Atlanta, WGR-TV Buffalo, and WHEC-TV Rochester, both New York, and KPTV(TV) Portland, Ore.
EQUIPMENT & ENGINEERING

SMPTE sets film color-TV standards

AIMS FOR QUALITY CONTROL BEFORE TINT TRANSMISSION

The Society of Motion Picture and Television Engineers has made new color-TV test films and slides available for use as reference prints in processing film for colorcasting (CLOSED CIRCUIT, Nov. 15, 1965).

SMPTE spokesmen also disclosed last week that efforts are under way to establish a more uniform lighting standard in color studios and in monitoring and screening rooms. The efforts are aimed at achieving consistency in quality control of color film before transmission by the broadcaster.

SMPTE said that “satisfactory reproduction of this [test] film or of the companion set of eight 2 x 2 [inches] slides containing similar scenes, should indicate good reproduction of other materials with similar color balance and contrast range.”

The engineering society said the film was produced in 16mm and 35mm, runs about four to four-and-a-half minutes and has a narrative sound track in addition to instructional literature supplied with the film.

SMPTE experts said the moves will help TV take a big step forward in reducing the frequent tendency of color tones on a TV set to get out of line when the viewer switches from one color program to another or when a filmed color commercial is run during a filmed color program.

The test film, it’s believed, will receive wide use by networks, stations, advertising agencies, producers, manufacturers and, most important, laboratories.

Engines have noted that up to this point, color correction in film has often been left to the subjective judgment of the print house.

SMPTE said the industry has been “striving for uniformity” and the use of the reference print should effect a more “consistent match of color release prints to be reproduced on television.”

The test film, SMPTE said in its announcement, will be used as “representative material to subjectively evaluate product for density and color balance and as a final subjective evaluation of the performance of color television transmission systems, after the chain has been properly set up.”

Engineers for some time have been plagued by a lack of color-tone standards, a void that has given rise to complaints from production houses in particular.

An objective is to render “a more pleasing and believable picture especially in facial tones,” SMPTE technicians said in pointing out the importance of the new reference print and the moves in standardizing lighting.

SMPTE said it was taking orders for the test film and expected that by next month the prints would begin circulating throughout the industry. The organization is located at 9 East 41st Street, New York.

Electronic imports show marked increases

Imports of television sets for the first 10 months of 1965 totaled $43,905,000, up 72.4% from the $25,462,000 in the comparable period of 1964. Electronic Industries Association figures for consumer products show they went up 37.7% from $160,165,000 in 1964 to $220,541,000 in 1965.

The 10-month figures show phonographs up 91.3% to $3,093,000; record players up 87.1% to $20,372,000; transistor radios up 30.1% to $80,504,000, and radio-phonographs up 28.1% to $8,293,000.

Components imports also showed marked increases. TV-picture tubes went from $478,000 during the 1964 period to $1,258,000 in 1965, up 163.2%. Radio tuners went up 68.6% to $21,503,000.

Success reported in better-reception drive

A nationwide organization of television antenna manufacturers — the American Institute for Better Television Reception (AIBTR) — reported last week that 47 television stations have participated in a campaign to improve the quality of TV reception through the installation of new and better home antennas.

The group also announced that 14 new markets will be the object of the program in the first quarter of this year. Among the cities: Baltimore, Houston, Indianapolis, Greenville-Spartansburg, S. C., Asheville, N. C., Charleston, S. C., and Sioux City and Cedar Rapids, both Iowa.

The reports were made at the quarterly meeting of the institute in Washington. It was also announced that 2,000 dealers had signed pledges to uphold the standards for antenna installations promulgated by the institute.

The group was formed last July and is headed by Robert R. Mullen, Mr. Mullen is a public-relations counselor. The group was luncheon host to FCC Commissioner Rosel H. Hyde and the following FCC staff members: Arthur Stabnier, special assistant to the chairman; Martin Levy, broadcast facilities division, and Louis Rein, rules and standards division, both Broadcast Bureau; Julian Dixon, technical division and Jules Dietz, research division, both Office of the Chief Engineer.

Also present were Lester Lindow, executive director, and Graydon Powers, assistant executive director, of the Association of Maximum Service Telecasters.

Representing member manufacturers were Sam Schlussel, Channel Master Corp.; Edward Finkel and Morton Leslie, JFD Electronics Corp.; Morris Finney, Finney Co.; Paul Wilson, S&A Electronics Co.; Joseph Ridge, Winegard Corp., and Alexander Berlin, Jerrold Electronics Corp.

Also present were Jack Galub, vice chairman of AIBTR (and a vice president of Mr. Mullen’s public-relations firm), and Benedict P. Cotton, Washington attorney for AIBTR.
Wider turnpike evokes plea
Four N.Y. area stations tell FCC they will lose towers as highway expands

The ever lengthening and widening rivers of asphalt and concrete that highway builders are laying across the country are creating problems for the broadcasters in their paths and for the FCC. This was brought home to the commission last week when four New York and New Jersey radio stations asked for help in connection with New Jersey Turnpike Authority plans to widen the northern stretch of that superhighway.

The stations also made the unprecedented suggestion that the commission appoint a commissioner to follow the activities of the turnpike authority and to report to the commission on applications filed by stations affected by the highway construction.

The joint appeal was made by WHN, WJZ Newark, N. J. Each has its tower in the so-called Meadows section of northern New Jersey. And it's believed that upward of a dozen more radio stations with towers in the same area may also be affected.

Potential Problems - Thus, a number of complex changes in station sites and in systems of operation may be in prospect, bringing with them problems of finding available land and of making necessary technical adjustments in operating procedures. It has not been unusual in recent years for broadcasters forced to move by highway construction to seek commission cooperation. But last week was the first time four appealed at one time or that a request was made for a commissioner to keep in direct touch with the problem.

The turnpike authority was authorized last month to widen the 30-mile stretch of road from Woodbridge, N. J., to the northern terminus near the George Washington Bridge. Twenty miles of road are to be widened from six to twelve lanes, the remaining 10 miles, from six lanes to ten.

The four stations said this construction may affect the locations of their towers, as well as the towers of other stations. And it may be necessary, they said, to apply for modification of their present system of operation or for authority to change their sites.

They said the applications may raise unusual problems and may require waiver of procedural rules "and other expeditious treatment in order to maintain service to the public."

The stations also said that in view of the "unique airspace considerations" involved—the area is surrounded by major airports—they may need commission assistance in dealing with the Federal Aviation Agency.

Color up everywhere, B&W drops in places

Distributor sales of color-TV sets and home radios showed increases in all geographical regions for the first nine months of 1965 compared to the like period in 1964. Monochrome TV set sales, however, showed comparatively small gains in six areas and decreases in three others.

The statistics, compiled by the Electronic Industries Association, show total distributor sales of color-TV sets in the 1965 period at 1,780,000 up 122% from the 804,846 in 1964. By region, the West South Central, up 165%; the East South Central, up 161%; the South Atlantic, up 156%, and West North Central, up 150%, showed the largest gains. The smallest color-TV gain was recorded in the Pacific region where sales were up 87.72%.

Total home-radio sales by distributors went from almost 7 million in 1964 to 8.7 million in 1965, an increase of 25%. The West South Central region showed the largest increase, 40%.

Overall monochrome-TV-set sales went up 4% from 5.4 million sets in 1964 to 5.6 million sets in 1965. The largest increase was in the East North Central, up 10%. Decreases were in the Pacific area, down 6%; the Mountain area, down 4% and the West North Central, down 1%.

Bigger exhibits for NAB convention

Broadcast-equipment displays at the 44th annual convention of the National Association of Broadcasters, will be bigger than ever (CLOSED CIRCUIT, Nov. 15, 1965).

Everett E. Revercomb, NAB secretary-treasurer, announced last week that 91 manufacturers, all NAB associate members, have signed up for approximately 50,000 square feet for the March 27-30 session at the Conrad Hilton hotel in Chicago. At $3.50 a square foot, space sales will total about $175,000.

The 1966 figures are about 30% higher than those for the 1965 Washington meeting and about 56% more in footage and 75% more in dollars than for the last Chicago convention in 1964.

In 1965, 94 exhibitors paid $134,484 for 38,424 square feet at $3.50 a square foot. In 1964, 90 exhibitors paid $100,478 for nearly 32,200 square feet at $3.15 a square foot.

Because of the increased space demands this year, NAB has enlarged the exhibit area of the East and West Exhibit Halls to include the Continental Room. In previous years this room housed the sessions of the concurrent Broadcast Engineering Conference.

Comments split on radiation proposal

The FCC received mixed reactions last week to its rulemaking proposal to establish a standard method of calculating radiation from AM directional antennas.

In calculating interference the commission now relies on the MEQV (maximum effective operating values) concept which instead of being a hard-and-fast rule, allows for the consideration of variables such as terrain.

CBS said it supports the proposal be-
cause it would enable the commission
to determine assignment questions on
the basis of the latest available technical
information and at the same time
would be conducive to administrative
efficiency by adapting directional-an-
tenna engineering data for use in com-
puters.

CBS said that there can be no doubt
that the present methods are inadequate
to give a realistic picture of the per-
formance of proposed antenna systems.

Robert A. Jones, a consulting en-
ingineer from LaGrange, Ill., said he
did not agree that a standard method
of calculation could be determined
when there is no such thing as a stan-
dard antenna system or a standard
antenna location.

E. Harold Munn Jr., a consulting en-
gineer from Coldwater, Mich.,
warned about the attempt to computer-
ize the calculation of coverage, black-
and-white interference. He said the com-
mission should not ignore the tools of
judgement and the developments of
engineering experience.

The deadline for comments on the
commission proposal was extended
last week to July 14 and the deadline
for reply comments to Aug. 15.

WITA-TV buys color gear

RCA has announced a $175,000
equipment order by El Imparcial Broad-
casting Co. for its WITA-TV San Juan.
The contract is said to give the UHF
outlet the first complete color-TV (stu-
dio) film system in Puerto Rico. The
station is scheduled to be operating in
color in March. RCA equipment: TK-27
24-tube color camera, three black-
and-white 4½-inch image orthicon TK-
60 cameras, projector and other color
film gear.

VHF remote control backed

Only NABET opposes

FCC's proposal;
radiation device criticized

Widespread support of the FCC's
proposed rulemaking to allow remote
control of VHF television transmitters
was expressed last week.

Most of those who supported the
proposal, however, said they did not agree
with the proposal that certain auto-
matic devices should be employed at
the transmitter site to detect and meas-
ure excessive out-of-band radiation.

The proposed rulemaking is the
result of a request from the National
Association of Broadcasters to extend the
remote control privilages now enjoyed
by AM, FM and UHF facilities to VHF
operations (BROADCASTING, March 1,
1965).

Of the 21 groups and stations which
filed comments last week only the Na-
tional Association of Broadcast Em-
ployees and Technicians, APL-CIO,
came out flatly against the proposal.
NABET said that the proposal will in-
evitably result in degradation of the
commission's technical standards.

Economics • The union also ex-
pressed concern about the economic
impact of the proposal on its members
and the loss to the national economy
of technical skills which may be of
crucial importance in times of national
emergency.

Among those who supported the pro-
ungal with Don Kemper Co., New York,
posing were ABC, CBS, NBC, Meredith
Broadcasting Co. and the National As-
sociation of Broadcasters. All five, how-
ever, said that out-of-band radiation
from VHF transmitters of modern de-
sign was not a significant problem and
that there was no necessity for the in-
stallation of detection equipment.

NBC said that since operational re-
liability is dependent on equipment
design and maintenance, a remotely op-
erated VHF TV transmitter is in no
more danger of producing out-of-band
radiation than one where an operator
is present. The network said that the
problem of spurious emissions is al-
day amply controlled by the commis-
sion's rules which require broadcast
equipment to be type-tested before in-
stallation and to be tested by a pro-
of-performance test before it is put
into operation.

Meredith Broadcasting Co. said re-
 mote control of VHF TV transmitters
would directly benefit the public by
allowing the flexibility necessary to
accommodate varying local conditions.
Transmitters could be located on sites
such as mountain tops, which are other-
wise not practical, to provide service to
larger populations and areas, Meredith
said.

Not 100% • The only broadcaster
that did not voice full support for VHF
remote control privileges was Spring-
field TV Broadcasting Corp., which is
the licensee of four UHF TV stations
and the permittee of two others. Spring-
field said that VHF stations had not as-
serted any economic need for the pro-
posed change.

Springfield said that if the commis-
sion adopts the proposed rules, it should
also adopt specific provisions which
would allow the commission to examine
the program service, the economic con-
siderations and other public-interest as-
pects of each before granting applica-
tions for remote-control authority.

FATES & FORTUNES

Mitchell Sherman,
account supervisor at
Cunningham & Walsh,
New York, appointed
VP. Richard Tousey,
senior account execu-
tive with C&W there,
named account super-
visor. Harold Long-
man, formerly VP
and associate creative
director at BBDO,
New York, named associate
creative director at C&W, same city. Charles
Camilleri, media buyer with Sullivan,
Stauffer, Colwell & Bayles, New York,
joins C&W, that city, as media buyer.

Daniel A. Packard has retired as VP
and manager of Detroit office of Geyer,
Morey, Ballard. He had been in market-
ing and advertising there for 40 years
and was with McCann-Erickson before
joining Geyer.

Mort Wimpie, formerly president
of Smith & Dorian Advertising, New York,
named VP, Howard Marks Advertising/
Norman, Craig & Kummel, New York.

Paul W. Whelchon,
formerly regional sales
manager at Falstaff
Brewing Corp., St.
Louis, appointed VP
sales manager at P.
Ballantine & Sons,
Newark, N. J.

Richard K. Jones,
account executive
with Don Kemper Co., New York,
named VP and general manager of
Winlus-Brandon Co., Cincinnati.

Leonard Ziegler, with E. S. Sumner
Corp., New York, appointed VP.

Herbert Fried, VP and general
manager at W. B. Doner & Co., Baltimore,
appointed executive VP.

Don Le Masurier, program director of
KDAL Duluth, Minn., promoted to
sales manager, replacing Jack Nugent
who joins KSTP Minneapolis-St. Paul
in similar post.

Richard McLoughlin, formerly na-
tional radio sales executive, named
national TV sales executive with RKO
General Broadcasting, New York.
Hugh Wallace, radio sales executive in
RKO General's Yankee division, Bos-
29 broadcasters nominated for NAB radio board

Twenty-nine broadcasters have been nominated for two-year terms to fill 12 seats on the National Association of Broadcasters radio board.

District 4: W. Frank Hardin, WIS Columbia, S. C., and Jack Younts, WBBB Southern Pines, N. C.

District 10: George W. Armstrong, WBB Kansas City, Mo. (incumbent), and George J. Volger, WKPC Muscatine, Iowa.

District 12: Grover S. Cobb, KVOS Great Bend, Kan. (incumbent), and Robert L. Pratt, KGOP Coffeyville, Kan.

District 14: Terry Clarke KALO Alamosa, Colo.; Al Ross, KGEX Sterling, Colo., and Gene Shumate, KREX Rexburg, Idaho.

District 16: Kenneth Harwood, noncommercial KUSC (FM) Los Angeles and James W. Ross, KOY Phoenix.

Class B: R. E. Lee Glasgow, WACO Waco, Tex., and Daniel W. Kops, WAVZ New Haven, Conn. (incumbent).

Class C: William S. Livesay, WLAB Mattoon, Ill., and Ben Sanders, KICD Spencer, Iowa.

FM: Everett L. Dillard, WASH Washington (incumbent), and David H. Polinger, WTMF Lake Success, N. Y.

Ballots will be mailed Feb. 7 and must be returned by Feb. 21. Results will be announced Feb. 23.

A special election for one-year term is underway in District 7, Kentucky and Ohio, to fill vacancy left by the death of Gene Trace, WBBW Youngstown, Ohio. Election result will be announced March 15.

Promotion

Chuck Mitchell, account executive at KALI San Gabriel, Calif., appointed sales manager of KRKD-AM-FM Los Angeles.

Jack Gelzer, local sales manager of WGR-AM-FM Buffalo, N. Y., appointed national sales manager. Bob French, account executive at WKRC-TV Cincinnati, also Taft Broadcasting station, succeeds Mr. Gelzer.

Gary E. Schonlaw, formerly division director with United Appeal of Central Maryland, joins WFBT Baltimore, as national sales coordinator.

Lee Leisinger, with WCAR-AM-FM Detroit, joins WMAX Grand Rapids, Mich., as sales manager.

Les Scott, sales manager at KOVO Missoula, Mont., named sales manager of KCAF Helena, Mont.

Alvin McGavin, formerly account executive with WKKX Wheeling, W. Va., named advertising sales manager of WOMP-AM-FM Bellingham, Ohio.

Earle K. Theimer, formerly head of own marketing consulting firm, joins Clinton E. Frank Inc., Chicago, as account executive.

Donald R. Adlam, account executive with WINS New York, appointed account executive with KDKA-AM-FM Pittsburgh.

Lynn E. Knox, formerly with WISH-TV Indianapolis, appointed account executive at WTBY-TV Bloomington-Indianapolis.

JAMES P. Carroll, Jim Catalano, Thomas J. Costello, account executives with Doremus & Co., New York, and Boiling W. Haxall, also with Doremus there, elected VP's.

Ron Granzow, account executive at KRTN-AM-TV Des Moines, Iowa, joins Carter Reynolds and Associates there as account executive.

William E. Waite, copywriter at Griswold-Eshleman Co., Cleveland, joins Chirurg & Cairns, New York, as copywriter.

Media

Peter C. Newell, station manager of
Max D. Paglin, former general counsel of the FCC, is returning to that agency on or about Feb. 1 as executive director, the commission announced last week. He replaces Curtis B. Plummer, who succeeds retired Frank M. Kratovil as chief of the Field Engineering Bureau.

The commission also announced the appointment of Ralph J. Renton, acting chief of the office of chief engineer, to be chief. He replaces Edward W. Allen, who retired (Broadcasting, Dec. 6, 1965).

Mr. Paglin resigned from the commission May 1, 1965, to become partner in Washington law firm of Grove, Paglin, Jaskiewicz, Gilliam & Putbrese. He had joined the commission in 1942 and held a number of posts including that of legal assistant to Commissioner Robert T. Bartley, before being named assistant general counsel in 1959. He was appointed general counsel in March 1961.

As executive director he will supervise commission procedures and administrative matters in order to recommend measures for improving the administrative process.

Mr. Plummer, an engineer, has already headed four major offices in the 26 years he has been with the commission. He was chief of the Broadcast Bureau from 1951 to 1955 and chief of the Safety and Special Radio Services Bureau from 1955 until his appointment as executive director in November 1962.

Mr. Renton, acting chief engineer since Mr. Allen's retirement, has been an associate chief since March 1958, when he was promoted from assistant chief. He has served the commission and its predecessor Federal Radio Commission in a number of capacities since 1929. He attended a number of international conferences and for several years was chairman of the North American Regional Broadcasting Engineering Conference.

WPRO-AM-FM Providence, R. I., elected VP of Capital Cities Broadcasting Corp., and general manager of WPRO-AM-FM. He joined station in October 1964.

Carlos Rivera, formerly sales representative of TISA, Latin American sales rep for CBS film programs, named general manager of WOLE-TV Agua- dilla-Mayaguez, P. R.

Richard D. Klinge, associate producer, D'Antoni/Bae Inc., New York, named contracts negotiator of CBS-TV network business affairs, New York. Mr. Klinge was formerly producer with Metromedia Inc. and before that was resident corporation counsel for Broadcast Music Inc., both New York.

William E. Rine, VP for administration at Storer Broadcasting Co., Miami Beach, Fla., retires after 33 years with company. Mr. Rine joined Storer in 1932 as salesman for WTVV Wheeling, W. Va. In 1957 he became director of company's radio division, and moved to administrative position in 1961. He will continue as public member of company's board of directors.

David J. Gardam, administrator, labor relations, RCA, New York, named director of personnel at NBC with responsibility for personnel activities at all NBC locations.

BROADCASTING, January 24, 1966
Broadcasters name Porter

Others elected to the board of directors: George W. Dick, American Research Bureau; John F. Dille Jr., Communica Group of Indiana; Andrew Haley, Bader & Potts, Washington; Peter B. Kenney, NBC, Washington; John Murphy, Avco Broadcasting Corp.; E. Stratford Smith, Smith & Pepper, Washington; and Messrs. Sternfeld and Malarkey.

Tom Dunn, program director at KMBC Kansas City, Mo., appointed program director of WHK-AM-FM Cleveland, all Metromedia stations.

Gil Cohen, assistant director of international sales at ABC Films Inc., New York, appointed director of domestic sales for foreign sales department of ABC Films.

Ray Schreiner, news director of WXEX-TV Petersburg-Richmond, Va., joins Virginia Department of Agriculture, Richmond, as information officer in charge of radio and television programming.

H. Gerry Girouard, formerly sales director with Co-Co TV, program producer, New York, named account executive with ABC Films. Mr. Girouard will be in charge of sales territory in northeastern U. S. based in Dewitt, suburb of Syracuse, N. Y.

Peter L. Anderson, production assistant at noncommercial WDEH-TV Hartford, Conn., appointed director.

Budd Wiener, director of sports at KTUU-TV Oakland-San Francisco, named director of operations.

Leonard Hirschfield, VP-staff cameraman at Video Pictures Inc., New York, joins MPO Videotronics there as cameraman-director.

Morton Braude, formerly head of own sales and marketing firm, appointed merchandising consultant for special projects division of United Artists Corp., New York.

Louise Carver, hostess for 12 years on daily Accent program at WKZO-TV Kalamazoo, Mich., has retired. She is succeeded on Accent by Jeanne Maurice.

Charles Peterson, operations manager at WOQ Tampa, Fla., joins KGAM-AM-FM Pittsburgh as production director.

NEWS

Russ Ford, newsman at WSOQ Charlotte, N. C., appointed news director.

Don La Vine, news editor at WJRZ Newark, N. J., appointed news director.

Richard Gottschalk news director of WEBC Duluth, Minn., named news director of WNOO-Duluth.

FANFARE

Robert Keven, weatherman at WTVO (tv) Rockford, Ill., appointed promotion manager.

Penny Martin, formerly with WTVX Rockville, Md., joins WAPA New Kensington, Pa., as publicity-promotions director.

EQUIPMENT & ENGINEERING

George W. Green, VP-finance, at Ameco Inc., Phoenix, appointed VP in charge of marketing.

Albert J. Eicholzer, chief engineer at WSYR-AM-FM-TV Syracuse, N. Y., appointed general manager of microwave operations at New Channels Corp., that city.

Mr. Morita

Mr. Schwarzenbach

Akio Morita, president of Sony Corp. of America, New York, elected chairman of board of directors. Ernest B. Schwarzenbach, formerly VP at Smith, Barney & Co., New York, succeeds Mr. Morita as president and chief executive officer.

Duane Crist, VP-contract sales, at Ameco Inc., Phoenix, appointed VP in charge of general administration and finance at Kaiser-Cox Corp., that city.

Dominick Bruno, Louis J. Climent and John E. Neeck, supervisory engineers, WPDX-TV New York, named assistant chief engineers for WPDX-FM-TV. They will be in charge of transmission.

Culligan Joins Burns

Matthew J. Culligan, who headed the NBC radio network and was top executive of the Interpublic Group of Companies before becoming head of Curtis Publishing Co. in 1962, went to work last week as consultant to William J. Burns International Detective Agency Inc., New York.

He will concentrate primarily on evaluation and expansion of use of electronic and electromechanical devices for protective and security purposes.

Mr. Culligan resigned as president and chief executive officer of Curtis in 1964 and as chairman last February, after internal policy squabble. Under terms of his settlement he was not free to take another job until last week, and then only in field not competing with Curtis. His Curtis contract assures him $110,000 this year and then he becomes Curtis consultant and will receive about $24,000 per year for 10 years under deferred-compensation plan.

BROADCASTING, January 24, 1966
operations and facilities, respectively.

Ken McGowan, formerly with WQAD-TV Moline, III., named engineering supervisor for WNAV-TV Boston.

Charles A. Anderson, formerly with Fischer and Porter Co., Warminster, Pa., named manager of sales control for community antenna systems division of Jerrold Electronics, Philadelphia.

Rodney E. Hunter, engineer at non-commercial WEDH-TV Hartford, Conn., named studio supervisor.

INTERNATIONAL

Paul Herriot, VP at Young & Rubicam Ltd., Toronto, named chief of broadcast production.

Max H. Kraus, formerly manager of communications systems division of Jerrold Philadelphia, named director of Jerrold International, that city.

Sam Ross, manager of the Ottawa Radio News Bureau, Ottawa, elected president of Parliamentary Press Gallery. He is first broadcaster elected to post. Tom Earle, Canadian Broadcasting Corp., Ottawa, elected VP.

Allan Slaight, program and promotion manager of CHUM-AM Toronto, appointed general manager.

Crawford U. Hall, VP of Stanfield, Johnson & Hill Ltd., Toronto advertising agency, joins Oneida Ltd., that city, as advertising and sales promotion manager.

Joan Watson, formerly of CFNB Fredericton, N. B., and CHFI-AM-FM Toronto, named to copy staff of F. H. Hayhurst Ltd., Toronto advertising agency.

ALLIED FIELDS

Milton C. Mumford, board chairman of Lever Brothers Co. and director at National Educational Television, both New York, named national volunteer chairman of United Community Campaigns of America there.

Joe E. Levitt, president of KRRX San Jose, Calif., named state chairman of California Council on Crime and Delinquency, Oakland, Calif.

DEATHS

Max F. Balcom, 78, chairman of board of Sylvania Electric Products Inc. from 1950 to 1953, died Jan. 17 at his home in Emporium, Pa. Mr. Balcom joined Sylvania’s predecessor, Novelty Incandescent Lamp Co., in 1918 as purchasing agent. When Novelty and Hygrade Lamp Co. of Massachusetts merged in 1931 to form Sylvania, Mr. Balcom became assistant secretary of new firm. He was elected Sylvania director in 1934 and VP and general manager of radio tube division in 1937. In 1944 he was named treasurer and in 1950 became chairman of board. Mr. Balcom retired as board chairman in 1953 but continued as director until 1962.

Archibald Granville Bush, 78, former chairman of executive committee of Minnesota Mining and Manufacturing Co., died Jan. 16 in his home in Winter Park, Fla. At Minnesota Mining, Mr. Bush became sales manager in 1914, company director and treasurer in 1921, and was elected VP in 1948. In 1949 he was elected chairman of executive committee. He is survived by his wife, Edythe.

William H. Horsley, board chairman of Pacific National Advertising Agency, Seattle, died Jan. 12 following brief illness. He was elected president of agency in 1937 and board chairman in 1954. He also served as chairman of Pacific region of American Association of Advertising Agencies from 1952 to 1955, and was president of Advertising & Marketing International Network from 1959 to 1960. Surviving are his daughter and son.

Vincent J. Donehue, 50, Broadway and TV director, died Jan. 17 of Hodgkins disease at Lenox Hill hospital, New York. Mr. Donehue, one of television’s most acclaimed directors in mid-1950’s, was most noted for his direction of Peter Pan with Mary Martin. He worked mostly on Broadway during past 10 years, but occasionally directed episodes of The Defenders and The Nurses.

Dr. Gary Steiner, 34, University of Chicago psychology professor and author, died Jan. 17 after plunging five floors from window in office building in downtown Chicago. Police said Dr. Steiner was apparently discussing marital problems with lawyer in building before he fell from window in vacant room. Dr. Steiner wrote “The People Look at Television, Human Behavior: An Inventory of Scientific Findings” (with Bernard Berelson), “The Creative Organization” and “The People Look at Commercials.”

Dr. Steiner

Rulemaking proceeding in Doc. 14229. Commissioner Wadsworth absent.
Action Jan. 19.

By memorandum opinion and order, commission remarneed proceeding on applications for new AM's of Tidewater Broadcasting Co., Smithfield, and Edwin R. Fishe, Newport News, both Virginia, to hearing examiner for further hearing on enlarged issues in light of new policy statements and for preparation of supplemental initial decisions.
Action Jan. 18.

By memorandum opinion and order, commission designated for hearing application of Central Coast Television Co. to change trans. site of KCOY-TV Santa Maria, Calif., because ERP and antenna plan raised other changes; on own motion, made further finding that new site is not beneficial to the public of Santa Barbara, objecting petitioners, parties to proceeding. Commissioner Wadsworth absent. Action Jan. 12.

OTHER ACTIONS

By memorandum opinion and order, commission (1) waived Sec. 1371 of rules and accepted amendment to application of Central DuPage County Broadcasting Co. for new daytime AM in Wheaton, Ill., to operate on 1350 kc, 500 w with directional unit (in lieu of non-DA with 250 w-C) and retained file number BP-1845; and (2) dismissed as moot opposing petition by WCKY Cincinnati and dismissed petition by DuPage County Broadcasting Inc. applicant for new AM in Elmhurst, Ill., to dismiss Central's application. Action Jan. 18.

By review board granted petition by Broadcast Bureau to extend time to Jan. 21 to file appeal from examiner's action of Jan. 6 in proceeding on application of Conrail Broadcasting Inc. for renewal of license of station WJNR Newark, N.J. Action Jan. 18.

By review board granted motion by South Dade Broadcasting Co. to extend time to Jan. 28 to file responsive pleadings to petition by Redlands Broadcasting Co. to enlarge issues in proceeding on their application for AM's in Homestead, Fla., and that of Seven League Productions Inc. for renewal of license of WII Homestead.

By review board granted request by Broadcast Bureau to extend time to Jan. 31 to file exceptions to initial decision in proceeding on application of International Panorama TV Inc. for new TV to operate on channel 40 in Fontana, Calif. Action Jan. 18.

By review board granted petition by Edgefield-Saluda Radio Co. (WJES), Johnston, S.C., to extend time to Jan. 30 to file motion to withdraw petition to file motion by WQIZ Inc. (WQIZ) St. George, S.C., that Norfolk, Va., is an enlarged service area in proceeding on their AM applications. Action Jan. 13.

By own motion, review board continued without date Jan. 20 oral argument pending disposition of pleadings now before review board in proceeding on AM applications of Norristown, Pa. (WNAR), Norristown, Pa. Action Jan. 12.

By memorandum opinion and order in proceeding on applications of Boardman Broadcasting Co. and Daniel Enterprises Inc. for new AM in Boardman and Warren, Ohio, respectively, in Doc. 15190-1, review board granted request to extend time to Jan. 20 to file opposition to proceeding to examine further for hearing and preparation of supplemental initial decision; (2) deleted issue added by board Jan. 15, 1965; (3) enlarged issues as to Boardman to determine whether its proposal will realistically provide local transmission facility for its specified station location or for another larger community; and (b) in Norristown, Pa., is concluded pursuant to issue (a) that proposal of Boardman will not specifically provide local transmission service for its specified station location, whether such proposal meets all of technical provisions of rules, including sections 73.36, 73.21 and 73.18 for standard broadcast stations assigned to most populous community for which it is determined that proposal will realistically provide local transmission service; and (c) as most petition by Broadcast Bureau to enlarge issues and remand proceeding. Action Jan. 12.

By order, commission further extended time Jan. 31 to file comments and from March 5 to May 16 for responses in matter of amendment of 73 of rules with respect to competition and responsibility in network television broadcasting.

Extension of time was requested by TV networks who have cooperated in independent research organization, Arthur D. Little Inc., to conduct study concerning TV program production and procurement and TV program syndication. In granting extension, commission noted specifically on representations made by petitioners that grant will be submitted for record on or before Feb. 15 in sufficient number of copies so that it may be made generally available. Action Jan. 12.

By memorandum opinion and order in proceeding on applications of Black Hills Video Corp. for renewal of licenses of seven AM's of Tidewater Broadcasting Co., Smithfield, and Edwin R. Fishe, Newport News, both Virginia, to hearing examiner for further hearing on enlarged issues in light of new policy statements and for preparation of supplemental initial decisions.
Action Jan. 18.

By memorandum opinion and order, commission designated for hearing application of Central Coast Television Co. to change trans. site of KCOY-TV Santa Maria, Calif., because ERP and antenna plan raised other changes; on own motion, made further finding that new site is not beneficial to the public of Santa Barbara, objecting petitioners, parties to proceeding. Commissioner Wadsworth absent. Action Jan. 12.

Routine Roundup

ACTIONS ON MOTIONS
By Commission

Commission on Jan. 13 granted petition by Associated Federal Communication Consulting Engineers and Clear Channel Broadcasting Inc. to extend time from Jan. 14 to July 14 to file comments and from Jan. 31 to Aug. 15 for responses in matter of amendment of rules with respect to CATV and is pending further order but subject to condition that simultaneous nonduplication protection prescribed Oct. 29 be afforded to KOTA-TV Inc. and Rapid City; and (3) denied in all other respects request of Black hills for stay of commission orders.
Commissioner Harkness on Jan. 13 concurred in the result but voted against request for granted relief; Commissioner Wadsworth dissented to grant of any stay. Action Jan. 12.

By Office of Opinions and Review

Granted request by KWPB Broadcasting Corp. (KWPB), Eugene, Ore., to extend time to Jan. 27 to file application for review of action of Jan. 10 by review board in proceeding on its AM application et al. Action Jan. 18.

Granted petition by Broadcast Bureau to extend time to Jan. 18 to file response to application for review in proceeding on application of Twin State Radio Inc. and Richland Broadcasting Co. for new AM's in Natchez, Miss., and Minden, La. scheduled (Continued on page 85)

**86 (FOR THE RECORD)**

**BROADCASTING, January 24, 1966**
To NBC, he's 'our man in Washington'

The road from Hartford, Conn., to Washington is generally pretty straight. But Pete Kenney made two long detours —both through Buenos Aires.

When the U. S. Army gave Sergeant Peter B. Kenney his ruptured duck and honorable discharge papers in 1946, he went back to his prewar employer, the Julian Gross Advertising Agency, Hartford.

At the time, Mr. Gross was principal owner of the New Britain Broadcasting Co., which had a construction permit for an AM in New Britain, Conn. After a short sojourn with the agency, Mr. Kenney went with the licensee corporation. One of the reasons the move was attractive, he recalls, was that there was an opportunity to be a stockholder in WKNB (now WRYM).

By 1952 he had been named executive vice president of the corporation and general manager of its radio stations, and he was working on a UHF plant. In February 1953 WKNB-TV (now WRYM-TV), the first UHF station in New England and one of the first 10 in the U. S., went on the air. When the stations were sold to NBC in 1956, he stayed on as general manager.

His NBC bosses were impressed with the way he managed WKNB-TV both before and after the network acquired it. One says he did a "superb job under difficult circumstances."

When the time came to pick the new Washington vice president they also recalled his skill in lobbying for UHF in Washington.

The network sold the stations in 1959, and Mr. Kenney was sent by NBC International to Buenos Aires to analyze TV investment potential in Latin America. NBC held a minority interest in channel 9 there and his job was to help get the station on the air.

Strong Control: This adventure gave him a real taste of strong government control over the mass media.

Mr. Kenney remembers that when the station went on the air, with more than 50% live programing as required by law, it had 300 employees. But this was less than half the number employed by more government-operated channels.

He recalls that labor disputes were "always tricky" since whenever one came up "you wound up taking on the government which was running its own station." Although he bought heavily of U. S. film series which were dubbed into Spanish, this area also required diplomacy. It was not considered good business to run programs that made fun of the army.

In 1960 Pete Kenney came back to the U. S. for a year as station manager of NBC's WRC-TV Washington. Then in July 1961, this time as vice president of NBC International, it was back to Argentina for another look at the market.

The purpose of his trip was to determine if it was worthwhile to expand into the interior of the country. Based on Argentinian politics and the fiscal situation he decided against expansion.

As one of the pioneers in UHF broadcasting, Mr. Kenney doesn't expect "too much" from new U's, at least in the beginning. "I'm less concerned about a UHF going into a major market than a UHF going into a market that is too small to support any station."

---

WEEK'S PROFILE

To NBC, he's 'our man in Washington'

THE FCC and congressional blast furnaces, which sometimes blow up in broadcasters’ faces, had a full head of steam up when Peter Bennett Kenney was named vice president of NBC Washington in January 1962.

Senator Thomas Dodd (D-Conn.) had concluded part one of his investigation into sex and violence on TV and was ready to begin part two. At the FCC, the staff was preparing for an inquiry into network programming practices.

During the first part of the Dodd hearing in June 1961, Mr. Kenney —also a Connecticut native—had appeared on the witness stand as station manager of NBC's WRC-TV Washington. When the hearing resumed in 1962 Mr. Kenney was in his new position and did not testify.

He was living up to the motto of all good Washington representatives that "though shall put out fires behind the scenes; thou shalt not take the witness stand and fan the flames."

One observer of the comings and goings on Capitol Hill refers to Mr. Kenney as a "natural for his job." He describes the 44-year-old NBC executive as a man with "affability, who is greatly devoted to the network. But he doesn’t take a parochial view. He represents NBC first, but he shows real interest in the problems of broadcasting in general."

On NAB Board: It would seem fitting for Mr. Kenney to be aware of the problems of the industry. In 1962 he began a three-year stint on the radio board of the National Association of Broadcasters. Last summer he switched to the television board replacing David C. Adams, NBC's senior executive vice president, who resigned the seat.

Mr. Kenney's move to the TV board was a logical one, since Mr. Adams had been a supporter of the decision to put the Connecticut broadcaster into the Washington troubleshooting spot.

When Mr. Kenney was proposed for the Washington vice presidency some associates dissented. But Mr. Adams, whose command includes the Washington operations, liked the idea, thought Mr. Kenney's lack of conventional facade would add to rather than detract from his effectiveness.

They say the once-skeptical associates are in agreement that the move has paid off. They say Mr. Kenney has won the confidence of Washington authorities at all levels.

For Pete Kenney the Washington post took him out of direct station contact and put him in "the type of job you can’t really measure." You move from broadcast operations, he says, "where you can tell by statistics whether you are doing a good or bad job to a hard-to-define post. Yet it's fascinating."

The road from Hartford, Conn., to Washington is generally pretty straight. But Pete Kenney made two long detours—both through Buenos Aires.

When the U. S. Army gave Sergeant Peter B. Kenney his ruptured duck and honorable discharge papers in 1946, he went back to his prewar employer, the Julian Gross Advertising Agency, Hartford.

At the time, Mr. Gross was principal owner of the New Britain Broadcasting Co., which had a construction permit for an AM in New Britain, Conn. After a short sojourn with the agency, Mr. Kenney went with the licensee corporation. One of the reasons the move was attractive, he recalls, was that there was an opportunity to be a stockholder in WKNB (now WRYM).

By 1952 he had been named executive vice president of the corporation and general manager of its radio stations, and he was working on a UHF plant. In February 1953 WKNB-TV (now WRYM-TV), the first UHF station in New England and one of the first 10 in the U. S., went on the air. When the stations were sold to NBC in 1956, he stayed on as general manager.

His NBC bosses were impressed with the way he managed WKNB-TV both before and after the network acquired it. One says he did a "superb job under difficult circumstances."

When the time came to pick the new Washington vice president they also recalled his skill in lobbying for UHF in Washington.

A case worth winning

The victory won by Minneapolis-St. Paul television stations over the FCC last week raises grave doubts about the justice being dispensed these days by the federal agency. As reported in detail elsewhere in this issue, a federal judge ruled that the FCC had no grounds on which to fine the stations $500 each for alleged violation of its sponsor-identification rules. The decision is significant enough to justify congressional re-examination of the law under which the FCC imposes sanctions.

To our knowledge this is the first test in federal court of the legitimacy of any of the multitude of fines that the FCC has levied since it was given the power to do so. This test occurred because the Minneapolis-St. Paul stations felt they had been unjustly accused and because they had the money and determination to fight for a principle. Their victory has cost them many times the $2,000 the four of them could collectively have paid to settle the matter at the outset.

How many other stations could also have won their cases if they had elected to resist the imposition of an FCC fine? This is the embarrassing question raised by the Minneapolis case. It is a question that is embedded in the law itself. As the FCC is now functioning, it is applying sanctions in much the manner of a police court. On the findings of its own investigators it levies fines that are cheaper to pay than to challenge. The practical response to the average FCC fine is the same as that to the levy of a justice of the peace in a small-town speed trap. Who wants to spend the time and money to take the case to a responsible court?

As the law is now written, it puts the FCC in the dual role of prosecutor and court of first resort. In that kind of environment justice triumphs only by accident.

If there must be sanctions for violations of FCC rules, let them be requested by the FCC but imposed or withheld by an established court, according to the standard rules for submission of evidence. Let the FCC prosecute, but insist that another authority judge.

The Minneapolis-St. Paul stations have performed a valuable service in exposing the fundamental unfairness of the present law. Their fellow broadcasters must take it from here. A legislative campaign must be undertaken promptly. We have no doubt that the National Association of Broadcasters, which had much to do with the original decision to fight this case, could, with the support of its members, obtain the legislative relief that is needed.

Off the track

The sponsorship by Bristol-Myers of $250,000 worth of educational television programing, described in this publication last week, illustrates how far ETV has strayed from the purposes to which it was originally assigned. ETV is becoming an image-building vehicle for major advertisers. The farther it moves in that direction, the farther it gets from its original objectives—and the closer it gets to the commercial system which it was never intended to imitate.

In concept, ETV was to be a cultural force, dealing in programs that could never find their way to the commercial channels. The original sponsors of the ETV plan dreamed of a profusion of arts and ideas pouring from stations that were romantically free of the hard realities of commercial broadcasting. Unfortunately their dreams contained no practical means of financing the flood of culture that they visualized. By government grant, foundation charity and now, in increasing representation, the public-relations budgets of image-minded businesses, ETV has built a physical plant of considerable dimension—and an overhead that alone requires immense funds. It now must turn more and more to the commercial world to find support. And the commercial world may be expected to respond. An ETV investment can earn a lot of Brownie points at relatively little expense.

Bristol-Myers, for example, has already gotten a substantial return on its $250,000 ETV campaign, and the first program won't be seen for six weeks. It has attracted widespread and friendly comment in publications reaching centers of influence in business, finance and government, all of which can have an effect on Bristol-Myer's balance sheet. By the time its campaign has run its course, the company will have been given prominent credit on the air and in other promotion in most if not all of the major markets.

Everybody connected with image-building ETV is trifling with the truth when denying, as everybody does, that ETV is moving away from its intended purposes. Whether they admit it, companies that sponsor ETV programs in exchange for air credit and associated promotion are doing so for private gain or, to put it more bluntly, commercial advantage. ETV stations that accept those programs on condition of identifying the sponsor on the air and in supporting promotion are in the advertising business.

That isn't what the federal government had in mind when it kept all those ETV channels immune from use by people who admit they are commercial broadcasters.

How to win the Hill II

Soon after Congress recessed last fall we observed that the two-year term for House members was unrealistic in these times. We urged broadcasters who felt likewise to editorialize in favor of a constitutional amendment for a four-year term. Many of them did.

We had no idea then that President Johnson would advocate the four-year tenure in his State of the Union message, and for the same reasons.

If there was valid reason for broadcasters to editorialize on the House tenures last November, their efforts now should be redoubled with the impetus given the project by the President and by Congress itself.
MORE THAN ¼ MILLION VIEWERS... (301,000 to be exact.)

That's the audience reached by KSTP-TV's News - Weather - Sports programming every Monday through Friday, 10:00 - 10:30 pm... more than the other two news stations combined!

And for the entire seven day week, KSTP-TV delivers an average 32% more viewers than the second station, 335% more than the third station.*

Ask your nearest Petry office or a KSTP-TV representative for more details on the best buy in the Twin Cities.

*Nielsen, November 1965. "Audience measurement data of all media are estimates only—subject to defects and limitations of source material and methods."
