Can cable hurt broadcasting? FCC starts study
The volatile prices in all advertising media

EVERY DAY AT FIVE, THIS NEWSMAN'S FEATURES ARE ENTIRELY DIFFERENT.

Ron Stone anchors our ten o'clock news. It's the most complete in Houston. But his features are entirely different when he reports at five. Each weekday afternoon, he gets a chance to present the lighter side of the day's happenings. And to take a longer, more human look at people and places in the headlines. It's a refreshing perspective. Presented in a refreshingly different fashion. And Houston loves it.

KPRC TV 2 in HOUSTON

Remember when Selznick and Hitchcock teamed up to make "Rebecca"?
Popcorn cost a nickel then. And a lot of great movies came out of that era.

Now Viacom has gathered a lot of those movies into one great collection of 48 titles that garnered 36 Academy Award nominations and numerous other honors.

**Great titles!**

Rebecca
Spellbound
Duel in the Sun
Notorious
The Paradine Case
Portrait of Jennie
The Farmer's Daughter
The Spiral Staircase
Since You Went Away
Indiscretion of an American Wife
I'll Be Seeing You
Ruby Gentry
and more.

**Great stars!**

Joan Fontaine
Laurence Olivier
Ingrid Bergman
Gregory Peck
Cary Grant
Ginger Rogers
Anthony Quinn
Judith Anderson
John Mills
Jennifer Jones
Joseph Cotten
Lionel Barrymore
Vivien Leigh
James Mason
Ethel Barrymore
Katharine Hepburn
Loretta Young
Laurence Harvey
David Niven
Dorothy McGuire
Henry Fonda
Rex Harrison
Claudette Colbert
Shirley Temple
Montgomery Clift
Marlene Dietrich
Charles Boyer
Carole Lombard
James Stewart
Charlton Heston
and more.

**Great credits!**

David O. Selznick
Alfred Hitchcock
Dore Schary
Ben Hecht
Robert Sherwood
King Vidor
Dimitri Tiomkin
Eric Ambler
Vittorio de Sica
Graham Greene
and more.

With so much greatness in one group, what else would we call it but

**Viacom Movie Greats**

Television's new major source for great movies.
Model 3274 is an improved version of the very popular 3273 BORDERLINE® Generator/Keyer System. The new model provides a variable rate fade-in/fade-out capability in addition to the matte, border, shadow, and outline modes of operation available in the previous model.

The system is designed for installation at the output of switching systems. Two types of remote control panels are offered for the 3274 - a compact version for installation in consoles, and a 1 - 3/4 inch by 19 inch rack mounting version. The latter is designed to match Model 1600-1A and 1600-1L Switching Systems.

BORDERLINE® Generators are available in NTSC, PAL, and PAL-M models.
The Week in Brief

NETWORK Boom □ Sales for the new season already approach the billion-dollar mark, despite increased prices and groans from the agencies. PAGE 27.

JUST THE FACTS □ The FCC has had enough of "intuition" on the economic relationship of cable to broadcasting; it wants hard data, and it starts an inquiry to get it. PAGE 28.

SEMANTIC DIFFICULTIES □ House Communications Subcommittee Chairman Van Deerlin and lawyer Shooshan attempt to set the record straight on their rewrite-review-reappraisal of the Communications Act. Broadcasters, meanwhile, meet with subcommittee staff and come away somewhat relieved about the project. PAGE 29.

STEP UP TO THE SOAPBOX □ Broadcasters, citizen group representatives and former FCC members air their opinions on communications matters ranging from reforming the FCC to doing away with it. The forum is the House Communications Subcommittee's panel hearings. PAGE 34.

ENTER THE G-MEN □ The Department of Justice files its comments in the FCC's network inquiry. It explains how it will participate and suggests commission generally follow course of 1959 FCC study. PAGE 38.

IN THE WINGS □ The U.S. Commission on Civil Rights' report about to be released raps FCC's treatment of EEO matters and minority participation in programing areas of broadcasting. FCC says the figures used are outdated. PAGE 44.

SWAN SONG FOR AN OLDTIMER □ Avco Broadcasting, in the business for 55 years, sells its last three stations to Seattle-based King Broadcasting for $4 million. Last to go are KYA-AM-FM San Francisco and WRTH(AM) Wood River, Ill., near St. Louis. PAGE 44.

ROUND THE WORLD □ Universal Pictures Television leads U.S. distributors in the number of shows it offers for international sale. Next in line is Viacom. PAGE 50.

READING THE TEA LEAVES □ Herb Jacobs reveals his annual predictions for the first 13 weeks of fall prime-time ratings. He picks ABC to win, CBS to place and NBC to show. PAGE 53.

APB IN ST. LOUIS □ Forecasts for the future of news abound at AP Broadcasters convention. Changes include parity between AM and FM stations, increase in influence of public broadcasting, decline in that of networks and growth of pay TV. PAGE 54.

OCCUPATIONAL HAZARD □ While covering a local story, four Dallas newsmen are assaulted and their equipment is smashed. PAGE 54.

BOOST FOR ENTERTAINMENT □ CBS Television Network takes the wraps off a new video-tape production and editing system that promises to outperform film on the shooting stage. It is said to offer increased quality, lowered costs and allow shorter lead-in time for new series. PAGE 55.

AR UP! LOOK UP □ The wire services are considering a plan to distribute to radio stations and newspapers via satellite instead of AT&T facilities. They say it would save $11 million a year. PAGE 55.

DOUBLE CAPACITY □ Engineers at the CBS lab in Connecticut have been granted a patent for a technique of transmitting two color TV signals on one channel and then splitting the signals back into two at the reception point. PAGE 56.

WELCOME WORDS FOR CABLE □ At Senate Communications Subcommittee oversight hearings, Chairman Hollings describes CATV as a regulatory "unwanted child" and promises corrective action. For three days witnesses recite a familiar litany of what's right and what's wrong with cable. PAGE 56.

AUTHORITY OVER PAY CABLE □ FCC goes to the Supreme Court for a review of the appeals court reversal that undercut the agency's jurisdiction over pay cable. The commission cites a list of earlier high court rulings to support its contentions. PAGE 60.

ALL THE WAY FOR BPA □ Those blessed with belief in radio and television will be truly motivated, says Lynne Grasz of KMOV-TV St. Louis. That's the credo that brought her up the ladder of broadcasting in 10 years and is being applied during her tenure as president of the Broadcasters Promotion Association. PAGE 81.
This extensive complex of buildings in Harrisburg, capital city of the Commonwealth of Pennsylvania, houses an unusually large number of men and women engaged in government work. In fact, of the 201,000 people in the Harrisburg SMSA, an impressive 26.9% are directly employed in a wide range of local, state, and federal government pursuits.

**WGAL-TV delivers strong buying power in a diversified area**

This pioneer TV station effectively covers the entire Lancaster-Harrisburg-York-Lebanon ADI. One of the country's fastest-growing areas, this prosperous market is outstanding for its economic and business diversity and resultant stability. Consider the facts: manufacturing production $6,603,130,000; agricultural production $365,294,000; effective buying income $6,878,735,000*. Cash in on this outstanding buying power - include WGAL-TV in your planning.

Straus to Voice?
Carter administration may reach into ranks of broadcasters for next director of Voice of America. Man said to be receiving prime consideration is R. Peter Straus, president of WMCAM (AM) New York. Mr. Straus, who has been active in Democratic politics in New York, served in Johnson administration in Agency for International Development.

Meanwhile, Robert Evans, of Atlanta, former CBS News correspondent who had been reported in lead for job ('"Closed Circuit,"' March 28), appears to be out of running. He was aide to late Ed Murrow when latter headed VOA's parent, U.S. Information Agency, in early 1960's. And in that job, Mr. Evans is said to have bruised some feelings of VOA officials who turned out to have long memories.

Not so easy
FCC lawyers have reviewed General Accounting Office's assessment of commission's ability to adopt fee schedule in accordance with court decisions (Broadcasting, May 16) and, not surprisingly, are not impressed. Where GAO says court decision overturning commission's 1975 fee schedule provides adequate guidance for developing legal schedule, commission lawyers say GAO authors apparently did not read Supreme Court 1974 decision overturning earlier fee schedule. That opinion held that commission must determine "value to the recipient." And figuring that out has been prime commission hang-up. GAO, commission lawyers say, did not deal with that.

They also say GAO, in contending that cost-accounting system can be established to determine refunds, ignores problem of calculating refunds for years going back to 1970, when first schedule was adopted and later found to be illegal. Commission's response to GAO report has been drafted by general counsel's office, and will be reviewed by commission bureaus before being submitted to commission for consideration at meeting next week.

Mobil network
Mobil Oil Corp. has chosen Between the Wars, 16 documentary half-hours dealing with America's international involvements from Treaty of Versailles (1919) to bombing of Pearl Harbor (1941), to alternate with 12 half-hours of ITC Entertainment's When Howie Struck for new Mobil Showcase series to begin next January. Mobil has assigned SFM Media Services Corp., New York, to line up stations in top-50 markets for prime-access time period, preferably same night in all markets to maximize advertising/publicity blitz.

Mobil will buy time periods outright and take all three commercial minutes in each half-hour. Between the Wars will be put together by Alan Landsburg Productions, Los Angeles.

Israel surfaces
Last touches were being put last week to contract for purchase of WNYS-TV Syracuse, N.Y., channel 9 ABC-TV affiliate, by not-for-profit organization operated by Larry H. Israel, former president of Washington Post Co. (Post, Newsweek, station group, other holdings), for $11 million. Station is owned 80% by Outlet Co. (department stores, station group) and 20% by local interests. Broker: Howard Stark.

Acquisition will be first of planned series. Associated with Mr. Israel is Steven Kumble, senior partner in New York firm in which former Mayor Robert Wagner is also partner.

Hoopla on rails
NBC is thinking of buying American Freedom Train, which toured U.S. during Bicentennial, to promote 1980 Olympics. Train consists of 20 baggage cars converted into traveling exhibit hall, with moving walkway going through middle, and three antique parlor cars. Train is now parked in Alexandria, Va., where NBC's Olympics man, Robert Mulholland, has looked it over. If he buys, he'll need engine—train has none.

Heavy weapon
In preparation is request by National Association of Broadcasters that general counsel of National Labor Relations Board prosecute American Federation of Television and Radio Artists for alleged secondary boycott against WPIC-AM-FM Morningside, Md. (Washington market), where AFTRA members are on strike. Charge is that AFTRA has told Washington advertising agencies to cancel advertising on struck stations or face suit for violation of AFTRA contracts with agencies.

If that tactic works, it's reasoned, it could be applied anywhere that AFTRA has labor contracts with advertising agencies. That's reason NAB wants to head this one off. Evelyn Freyman, head of Washington-Baltimore AFTRA chapter, authorized strike against WPIC stations, owned by Marriott family, last May 3.

New imports
American suppliers of broadcast transmission equipment are facing new competitor: Japan's giant Nippon Electric Co. (predicted 1977 sales: $2.4 billion). Broadcast division of Nippon's U.S. subsidiary, NEC America Inc., has filed for FCC type approval of FM transmitter, will soon move to clear VHF, UHF and AM transmitters with FCC. Company, which is to Japan's telecommunications industry as Western Electric is to Bell Telephone in U.S., is no stranger to broadcasting. Some 70% of signals in international radio broadcast are said to come from its transmitters, as well as major share of European UHF signals.

'Hartman' sequel
Highly placed sources at Norman Lear's TAT Communications say Fernwood U.S.A. will definitely go into production this summer for first-run syndication stripping next fall. Series is basically continuation of Mary Hartman, Mary Hartman without Louise Lasser as title character. (Ms. Lasser resigned two months ago to go on to other things.) Lear sources say enough Mary Hartman stations have made firm renewal offers to warrant production of Fernwood U.S.A.

Pierce's baby
White House and Department of Health Education and Welfare have picked up on ABC's idea for conference to discuss problems standing in way of providing television programming for deaf. ABC-TV's President Frederick W. Pierce made suggestion in letter responding to President Carter's request for suggestions as to how networks might help deaf get more out of television. Other two networks took largely negative position (Broadcasting, March 14). Mr. Pierce suggested HEW call conference of representatives of commercial and public broadcasting, electronic industries, program producers and others. HEW's Caption Films and Telecommunications Branch is working on conference along those lines.
TV only

Rival  □  Appliance manufacturer plans 14-week TV campaign starting in mid-September for its Crock Pot and Plate. Barickman Advertising, Kansas City, Mo., will buy spots in 53 markets during day and fringe periods, focusing on men and women, 25-49.

Calgon  □  Division of Merck & Co. will start 12-week spot-TV campaign for its Calgon water conditioner in late June. Cunningham & Walsh, New York, is buying spots in 46 markets during fringe time, looking for women, 25-49.

Gillette  □  Company will kick off 13-week TV campaign for its summer products in late June. Grey-North, Chicago, will seek spots in 50 top markets during fringe time, focusing on men and women, 18-49.

Curtis Mathes  □  Manufacturers of television sets, stereo and home entertainment centers is setting up eight-week TV campaign beginning late June. Curtis Mathes Advertising, Athens, Tex., is placing spots in 92 markets, focusing toward men 25-54.

Marriott □  Corporation is arranging 11-week spot-TV buy for its Marriott Great America Theme Parks, starting later this month. Clinton E. Frank, Chicago, will arrange for fringe and prime time, keyed to children, teen-agers and adults, 18-49, in 14 markets.

E-Z Painter Corp. □  Paint applicators will get three-week to four-week TV push starting in mid-July. Mandabach & Simms, Chicago, will arrange spots during early and late fringe time periods in about four markets, gearing toward men and women.

Elaine Powers □  Figure salon franchise will schedule two-to-four week spot-TV drive beginning in July. Stephan & Brady, Madison, Wis., plans to use about 20 markets during day prime and fringe time, seeking women, 18-34.

Alpha Beta □  Supermarket chain is starting 11-week TV drive later this month. Eisaman, Johns & Law, Los Angeles, is placing spots in about 10 markets during fringe, day and prime time, to reach women, 25-49.

Nalley's Fine Foods □  Food company is scheduling nine-week TV promotion for its 100% Natural Corn Chips, beginning in early July. Delta Femina, Travisano & Partners, Los Angeles, will slot spots in 13 markets including Seattle and Anchorage, aiming for women, 18-49.

General Mills □  Consumer Foods group will feature its Bisquick biscuit mix in 12-week TV campaign slated to start later this month. Needham, Harper & Steers, Chicago, will place spots in 16 markets, during fringe, day and prime time, zeroing in on women, 18-49.

Pizza Hut □  Speciality menu family restaurant is arranging three-week TV drive starting in mid-June. Foote, Cone & Belding, Chicago, will schedule spots in 60 markets during early and late fringe periods, seeking adults, 18-34.

Wilson Foods □  Food corporation will feature its Wilson meats in three-week TV promotion beginning in mid-June. Tracy-Locke, Dallas, will place spots in 25 markets during all day parts, targeted to women, 18-49.

Colgate □  Company is placing 11-week TV flight for its Curad adhesive bandages starting later this month. Kenyon & Eckhardt, New York, will handle spots during fringe, day and prime-time viewing periods in 15 markets, aiming for women, 18-54.

Bic Pen □  Corporation will feature its Bic disposable shaver in 11-week spot-TV flight starting in late June. Wells, Rich & Greene, New York, will buy in four markets during prime and late-fringe

Business Briefly
KPAX-TV8 Missoula.
Once a satellite...
Now a full-service local VHF station.

KPAX—A Missoula station.
Because of the boom in western Montana, it was time to convert KPAX-TV8 from a satellite of our Butte station to a completely local station.

The MTN Butte/Missoula combination rate still applies.
Even though Butte and Missoula are now separate stations, MTN continues to offer a combined rate for both markets. It will save you money because you get both markets for only a fraction more than Butte only. But if you want either market alone, we can handle your buy with individual market rates and availabilities.

Talk to our representative or Sarah Etchart.
Sarah Etchart, national sales manager for MTN, spent six years as a media buyer for one of the top ten agencies in the U.S. She has both national experience and local knowledge to give you all the information and answers you need.

BUY MONTANA ... BUY MTN.
Stations in Billings, Butte, Great Falls and Missoula

National Sales Manager, Sarah Etchart
Represented by Avery-Knodel, Inc., nationally; Art Moore & Associates, Seattle-Portland; Mountain Media, Inc., Denver; Andy McDermott Sales Ltd., Canada.

**Genovese Drugs** | Drug store chain launches three-week spot-radio buy beginning in mid-June. Lewis/Levine Advertising, New York, will select spots in four markets, targeted to women.

**AMTRAK** | National Railroad Passenger Corp. is placing four-week radio campaign to begin this month, Needham, Harper & Steers, New York, will use spots in five markets, reaching for adults, 35 and over.

*Broadcasting June 13 1977*
How effective is television in getting across messages of social value to young viewers?

To find out, we went to experts. For the past five years, educators and specialists in child development have helped us create programs that skillfully incorporate simple lessons in living within the framework of popular entertainment.

Does it work?

The CBS Office of Social Research, in collaboration with research firms specializing in the study of children, performed a series of five surveys, involving a total of more than 4,000 children, to find out what messages they received from the programs. Most of the children were aged 7 and 8 and 10 and 11; two surveys also included young teenagers.

The results may surprise you. And they’re yours for the asking. Write: "Learning While They Laugh," CBS Television Network, 51 West 52 Street, New York, NY, 10019, and ask for your free copy.

We think it's an eye-opener.

CETEC Sparta's Centurion Consoles are really worth listening to.

If you talk to a broadcaster who has a Centurion Console, you wouldn't have to read this. Centurions simply work — flexibly and reliably — for less money. A fact or two . . . Flexibility? Centurion I and II handle 12 mixers, with extender panels to 24 mixers. Each mixer has pushbutton selectivity from three audio sources. Furthermore, mixer input is not dedicated. A built-in switch provides change to any of three input levels! Incidentally, mono or stereo mixer modules are interchangeable. They can be turned off or on by a remote command. In turn, any mixer can turn remote equipment off and on. That's flexibility! Reliability? A quick example. Noiseless optically isolated switching. Motherboard and ground plane PC techniques eliminate crosstalk. Unfortunately, Centurions have many more features than we have room. To sum up, Cetec Sparta offers TWELVE consoles, from 4 to 24 mixers, with many, many options. Last word. Wouldn't you as a 'professional broadcaster', prefer to talk to a 'broadcast professional'? . . . about the good group of products from Sparta, Schafer and Jampro? We're ready to listen to you.

Centurion I and III are mono.
Centurion II and IV are stereo.

The Best is Getting Better...
Harris IF Modulated TV Transmitters now have MCP and TSB

Sophisticated, futuristic, the most advanced state-of-the-art design in color television transmission is IF (Intermediate Frequency) Modulation. And now—maximum color performance...fewer adjustments...in the new line of Harris IF Modulated TV transmitters, featuring the MCP solid-state visual exciter with TSB (Transversal SideBand) filter.

With the new Harris TV transmitters you'll get sharper, more vivid pictures...
Brighter colors...
Have greater reliability and stability...
Simplified operation and maintenance...
Ready for ATS...

See the difference for yourself, with the new line of Harris television transmitters.
For technical details, write to: Harris Corporation, Broadcast Products Division, Quincy, Illinois 62301.
Major meetings

June 13-15 - Broadcast Promotion Association 22nd annual seminar, Beverly Hilton hotel, Los Angeles, Calif. 1978 convention will be June 17-20, Radisson Downtown, Minneapolis; 1979 convention will be June 9-14, Queen Elizabeth hotel, Montreal.
June 27-30 - Meeting of National Association of Broadcasters, radio and TV boards, Williamsburg Lodge and Williamsburg Inn, Williamsburg, Va.
Sept. 15-17 - Radio Television News Directors Association annual conference, Hyatt Regency hotel, San Francisco. 1978 conference will be at Atlanta Hilton hotel, Sept. 20-22; 1979 conference will be at New Marriott hotel, Chicago. Sept. 11-14.
Sept. 18-21 - Institute of Broadcasting Financial Management 17th annual conference. Hyatt Regency, Chicago. 1978 conference will be held Sept. 17-20 in Las Vegas; 1979 conference will be in New York Sept. 16-19.
Oct. 4-6 - Second conference on satellite communications for public service users sponsored by the Public Service Satellite Consortium, Mayflower hotel, Washington.
Oct. 5-7 - Indiana Broadcasters Association fall meeting, Marriott Inn, Fort Wayne.
Oct. 5-8 - Information Films Producers of America national conference, trade show and awards festival, Holiday Inn, Chicago Film Center, Chicago. Contact: IFPA, 3518 Calhoun Boulevard West, Hollywood 90028; (213) 874-2268.
Oct. 5-10 - Women in Communications Inc. annual meeting, Sheraton-Wakiki hotel, Honolulu.
Oct. 9-11 - North Carolina Association of Broadcasters annual convention, Pinehurst hotel, Pinehurst.
Oct. 10-13 - Electronic Industries Association 53rd annual convention, Fairmont hotel, San Francisco.
Oct. 13-14 - National Association of Broadcasters fall regional meetings for radio, TV and engineering executives, Hyatt Regency hotel, Chicago.
Oct. 17-19 - Advertising Research Foundation 23rd annual conference will be held in New York.
Oct. 19-21 - Tennessee Association of Broadcasters annual convention and business meeting held in Chattanooga.
Oct. 20-21 - National Association of Broadcasters fall regional meetings for radio, TV and engineering executives, Peachtree Plaza hotel, Atlanta.
Oct. 20-22 - Mississippi Cable Television Association annual meeting, Broadwater Beach, Biloxi.

‘Common sense’ questioned
EDITOR: If anyone feels that a small station owner is justified [in building] or that the FCC is consistent in allowing a licensee to erect a tower without a construction permit, don’t bet the farm on it. I am referring to the owners of KVCM(FM) Montgomery City, Mo., who took it upon themselves to erect a tower without FCC approval (Broadcasting, May 30).

If a larger group owner did the same thing, the commission would have a hide up on the door as a lesson. I didn’t even see mention of a fine in the FCC decision. — George H. Diller, noncommercial WUS/FM Tampa-St. Petersburg, Fla.

(In the KVCM case, the commission by a 4-to-3 vote decided that it was “common sense” not to require the granaries to take down and then rebuild a tower that it had erected before receiving its construction permit, a procedure that the commission staff members said violated the law.)

More shooting
EDITOR: We of KQCR(FM) were interested to read your article on the “Shoot-out” in Cedar Rapids, Iowa (Broadcasting, May 9). You spent one-and-a-half pages describing what the AM stations are doing about the recent shake-up in Cedar Rapids ratings and one brief reference to the cause.

The fact is that KQCR in one year became the highest rated in teens and 18-34 and number two in 18-49.

One more point: Bill Moyes of Magid Associates “boasted” that he and three other Magid consultants (“all experienced disk jockeys”) are personally pulling weekend air stints on KQCR(FM). Do Mr. Moyes and friends intend to continue this through the remainder of the year?

I believe this that the super contest make Cedar Rapids a prime example of the very activity Arbitron and other rating services are diligently trying to stop. — Mike Dulaney, general manager, KQCR (FM) Cedar Rapids.

EDITOR: Thank you for your totally honest reporting in the article in the May 9 issue. It is a most interesting battle. — Ron Thompson, program director, KLW(AM) Cedar Rapids.

‘Required’ text
EDITOR: I have submitted an order to our university bookstore for 70 copies of your 1977 Broadcasting Yearbook as a “required” text for my broadcast management class next fall. I believe the YEARBOOK is a valuable resource, especially for graduating seniors. — Robert E. Yadon, instructor, Michigan State University, East Lansing.
An overwhelming community response.

In April, violent tornadoes devastated several communities just east of Kalamazoo, Michigan. Although the storm took no lives, many families were left without shelter and other essentials. From the first storm warning, WKZO Radio and Television devoted their facilities to alerting the community to the danger. Afterward, emphasis shifted toward helping victims by broadcasting appeals for aid.

Within hours, more food and clothing had been donated than could be used. WKZO Radio and Television were asked to suspend the appeals and simply refer callers to special aid centers. Through the generosity of their neighbors, the homeless were helped through a frightening and traumatic experience. Motivating our audiences to help others in need is all part of the Fetzer tradition of total community involvement.
The radio-TV egg and I: reflections of a chicken-man

My "celebrity" status after six years of appearances in my company's radio and TV commercials has certainly made an impact on my life. For the most part, I can say that it's been an enjoyable extension of my business career. I like people and find that most often my privacy is respected with just momentary intrusions, an autograph seeker or a friendly cocktail sent to the table compliments of an admirer across the room.

Perdue Farms began advertising in 1968 when we first started processing chickens. Prior to then, we had sold the chickens live at auctions to large market men like Swift and Armour to serve the New York market. We were well known in the industry because our live chicken quality had always been the best due to the care and expense we took concerning the health, nutrition, physical surroundings and handling of every bird.

Thus when we started to process chickens, I began to examine the idea of advertising our product. There seemed to me to be a much greater variation in the quality of chickens than in other heavily advertised products such as detergents, cigarettes and beer.

We first started advertising on New York radio with a meager $50,000 budget. After three years, I wanted to expand our media programs, a move which dictated that I return to Maryland and learn how to play the advertising game. I became versed in the business by reading all the top books, buying the best and most comprehensive guide sold and studying every aspect of advertising. I was determined to seek out those in the field who could advise me best. I also developed specific criteria for my company's next attempt to take the New York market by storm.

After scouring New York for 10 weeks, exposing upwards of 40 ad agencies and every media sales manager I could corner, we chose Scali, McCabe, Sobieski. This was our first major move. We began advertising on a national basis.

Sam Scali and Ed McCabe came down to spend a week touring our facilities to learn more about Perdue chickens. Having expanded so much energy and valuable time in my search, I had to trust their idea of using me in the ads. I theorized that had I spent as much time choosing a surgeon to perform an operation, I wouldn't try to tell him how to operate.

Although I thought my high-pitched voice alone was enough to eliminate me, in retrospect I think it has a uniqueness that causes people to recognize a Perdue commercial—even if they don't actually see it. That doesn't make my products any better, but it does make the advertising more memorable. In fact, on several occasions I have had people tell me that they think they are listening to me on radio when I am making a call in an adjacent telephone booth.

And so, I gave in to the direction of the agency that told me and New York that "it takes a tough man to make a tender chicken." We then began to expand our marketing areas, and soon we hired our first public relations firm. They suggested that we piggyback on the image already projected of me in the ads. Via print and broadcast interviews, I was able to expand on and lend greater credibility to our story.

In addition, I made more and more media appearances, my real personality came through. I wasn't just the hard-nosed chicken farmer any more—my personal appearance and my lifestyle came into play to a much greater degree. People interviewing me were fascinated that I should drive a Mercedes, that I bought my clothes in New York and that I wore Gucci shoes. I thought, considering that many businessmen in equally strange fields do the same.

An increasing number of people began to stop me on the street to say hello and tell me how much they enjoyed my commercials. (But what about my chickens?) What's more, I quickly learned that taxi drivers and cops are the best with faces—I've never been stopped by a trooper who didn't know who I am.

Nowadays my marketing activities have been expanded to include grand opening appearances for my top retailers. Hovering near the poultry counter, I find myself surrounded by consumers and often very valuable exchanges result. We swap recipes, discuss the preparation of my Cornish hens and Oven Stuffers, and I listen to their honest criticisms. The consumers, I have learned, are the last and the best in my line of quality control. Only they can tell me if something is really slipping. And they will.

Sure, I am told that I look like myself, that I sound like myself, and that I'm taller than on television. Often a woman will be so bold as to remark that I'm not as funny looking as the man on the tube. And everyone wants to know if I eat chicken. But most of the time my personal exchanges with consumers are straightforward and constructive appraisals of my products.

It is not only my input that has contributed to this company's maturation. It is a number of dedicated men and women who make Perdue Farms a high-quality product to be able to face the consumer head-on as we do. The power of the media, particularly broadcast, has also had a tremendous impact on the company's rate of growth.

During the past five years, Perdue has averaged a 17% growth in production over each previous year, compared to the industry's average rate of growth of 1% over the same period.

We have expanded our marketing area to include New York, Boston, Providence, Philadelphia, Baltimore and Washington, and now have 60% awareness in all our markets except Baltimore and Washington, which we entered in June 1976 and April 1977, respectively. Baltimore's awareness figure in a year's time has already reached 50%.

Our company's gross sales figures are a definite indication of our rapid acceptance in the marketplace. In 1970, before we started our present ad campaign, our net sales were $50 million. Seven years later, with the addition of public relations along the way, we estimate that our sales will reach $200 million.

Before the 1976 election, I attended a store opening in Ipswich, Mass. When I arrived, I was greeted by hundreds of well-wishers—all trying to get the chicken farmer to run for President. Placards, signs and posters reading "Frank Perdue for President" and "Put An Honest Man in the White House" adorned the entrance of one of my retailers.

In fact, many people suggest that politics is the next logical step for my career, although I renounce it constantly. My ambition is only to create the best chicken and do it consistently.
Mike's already up to 3800 episodes of America's No. 1 variety-talk strip. Fresher than ever with such current cohosts and guests as Sylvester Stallone, Peter Frampton, Ron Howard, Liv Ullmann, Dolly Parton, Kate Jackson, Neil Sedaka, Sean Connery, Elliott Gould, Burt Reynolds and many other of today's hottest personalities.

Soon to be the only early fringe variety-talk show on WCBS-TV, New York, and KNXT, Los Angeles.

THE STAR SHOW

Jimmie Walker of "Good Times" hosts an hour of non-stop comedy and entertainment.

Presenting the most talented young performers you've ever seen doing the wildest things you've never seen on television.

Cleared for prime-time or late-night in more than 80% of the U.S.

THE CORAL JUNGLE

Leonard Nimoy hosts these eight one-hour specials that are furnishing their own rating wonders in prime-time and early-fringe. For example:

No. 1 in its Sunday 5 pm period on KABC-TV, Los Angeles, with a 10 rating and 22 share.

The schedule figures shown are the net audience, subject to the estimation of the Nielsen Media Research Group for the service used.

LOOK WHAT WE'RE UP TO!

If up to now, you've associated us mainly with successful variety-talk shows, we understand that—and we appreciate the recognition. But please keep in mind that we're up to filling the expansive programming needs of stations. Some of our projects are on the air, some in development and some just might come about from our next conversation with you. Let's get together.

DOWN IN THE GREAT BARRIER REEF, the natural wonders of the underwater world provide the setting for the eye-popping real-life adventures of the husband-and-wife team of Ben and Eva Cropp.

27 FOR '77

Whatever they're up against our 27 feature films can deliver audience. They offer action, comedy, romance, Academy Award-winning stars. Recently sold to WCBS-TV, New York, WOR-TV, New York, KABC-TV, Los Angeles.

CALL IT MACARONI

These 24 half-hour young people's adventures, filmed across the country, have won critics' raves, major awards including the Peabody and enthusiastic family viewers. Some markets open.

THE PETER MARSHALL VARIETY SHOW

Weekly 90 minutes of music, comedy, top names. Now completing its year's run on stations covering more than 80% of the U.S. Still available in certain markets.

WESTINGHOUSE BROADCASTING COMPANY

90 PARK AVENUE NEW YORK 10016 (212) 983-5088
The BVH-1000.
Consider the advantages.

Last year, Sony Broadcast introduced the prototype of a new 1" high band video recorder. The BVH-1000.
The BVH-1000 produced picture quality difficult to believe. In fact, broadcasters didn't believe it. They had to see it for themselves. And they snapped up every prototype we could deliver.

Since then, we've made some changes. Added more features. Expanded the BVH concept to include a portable model, the BVH-500, for professional 1" production in the field.

And we've sold a lot of machines. If you're considering the move to 1", consider the advantages of the BVH-1000.

1. The Advantage of Shared Sector Scanning. The Sony Broadcast BVH-1000 and BVH-500 both use an exclusive system of scanning that records video and sync (lines 1-17) with separate heads. Which means the entire vertical interval is captured and available for encoding any signal required in the future by the FCC.

Color banding is eliminated. And generation after generation, the BVH-1000 picture retains incredible clarity and precision.

2. The Advantage of BIDIREX. Film editing techniques, with a professional video recorder?

That's what you get with the BVH-1000. Not one, but two control modes are provided to give editors a true "film" feeling. In shuttle mode, the tape can be moved in either direction, from stop to 30 times normal speed. With a recognizable picture, so you can make fast editing decisions.

In jog mode, the BVH-1000 lets you move the tape as though you were positioning the reels by hand—while you monitor a fully locked picture.

3. The Advantage of Interchangeability. 1 dB down is the specification. Need we say more?

Sony's interchange is guaranteed by a gimmick-free devotion to precision mechanics and supported by the experience of building several hundred thousand video recorders.

4. The Advantage of Color Framing. Some high end production recorders don't offer color framing. Others make it available as an expensive option.

But both the BVH-1000 and BVH-500 provide color framing capability as standard equipment. Add that to a logic system ideally suited for computer assisted editing, and the Sony BVH-1000 is your best bet to produce that "word from our sponsor."

5. The Advantage of High Fidelity Audio. Not one, not two, but three isolated audio tracks with frequency response from 50 Hz to 15 kHz. With over 50 dB isolation between tracks.

Never before has any production recorder offered the level of audio quality found in these two new Sony Broadcast machines.

And a special wide band amplifier is automatically switched onto the cue track in search mode, to accommodate SMPTE code playback in high speed.

But it is impossible to describe all the advantages of the Sony BVH-1000 and BVH-500 high band recorders. You must see them to believe them.

Contact Sony Broadcast today, and ask for a demonstration. You'll see why networks and production companies alike are buying this remarkable new recorder.

Sony Broadcast

Network sales brisk at C-P-M's 15-30% higher than last year

Some big advertisers hang back; station worries about drains on spot are countered by reps who see this as biggest year; prices also up in other media

The television networks are approaching the billion-dollar mark in selling their 1977-78 prime-time schedules, at cost-per-thousand that seemed to be running, late last week, 15% to 30% higher than a year ago.

Network sales were doing so well, in fact, that some station sources professed concern that advertisers, in paying the higher network prices, would deplete their budgets so much that spot TV would suffer. But station reps, acting through the Television Bureau of Advertising and in conjunction with a group of station executives, issued a statement after a two-day annual meeting proclaiming confidence that 1977 would be “a banner year.”

The 15%-30% range of estimated increases in C-P-M was so wide because the estimates varied from agency to agency. On the whole, however, the increases seemed to be somewhat lower than some earlier estimates, which had reached the 30%-and-up range, but they were still denounced by many agency executives as “outrageous” and “unbelievable.”

No one could project what the “average” prime-time C-P-M would prove to be. As it stood last week, each agency had its own average, based on the buys it had made thus far, and that average was changing, as one executive put it, “every time we make a new buy.” Nobody was saying where his average stood at any given moment.

Some agency sources did, however, disclose what they said were the highest and lowest C-P-M’s they had achieved so far. In terms of households for a 30-second commercial these tended to range from $3.25 to $3.64 on the low side and from $3.85 to $4.25 on the high.

The pricing patterns of the individual networks reflected, as usual, the networks’ positions in the ratings. ABC-TV, coming off a year in which it was unchallenged as number one, was said to have by far the highest priced tags and NBC-TV, third in the 1976-77 ratings, generally the lowest. In terms of the highly prized target audience, men and women 18-49, however, pricing by all three networks was said to be similar.

Agency sources said all three came out with what one executive called “unconscionably high” asking prices at the outset but subsequently retreated somewhat. NBC and CBS more than ABC. ABC was said to have lost some business to the other networks because of its “inflexibility.”

Yet ABC, because most buyers tended to see it as a clear winner again in 1977-78, was said to be considerably more widely bought, and to be included more often in multimarket buys, than either of its competitors. One source estimated that 55% of his agency’s budget commitments thus far had gone to ABC, 25% to NBC and 20% to CBS.

Agency sources disagreed on how near the networks were to winding up their up-front or long-term selling, and the networks weren’t saying. Some sources said more than half had been completed; others felt that virtually all of it had been done and that the second stage of the selling season, the offering of scatter plans, was practically ready to start. Late in the week an ABC source said scatter selling could start there this week.

It was widely agreed, however, that several advertisers normally in the up-front ranks are not yet committed—some reportedly in hopes of getting better prices, some because they wanted more time for appraisals. Those with major buys yet to be made were said—though in no case by a representative of one of its own agencies—to include Procter & Gamble, Ford, Chevrolet, Colgate-Palmolive and Warner-Lambert.

ABC-TV’s prime-time sales were reported by an ABC source late last week to have reached $425 million, and an NBC-TV source said his network’s were “approaching $300 million.” CBS-TV officials refused to make such estimates, as a matter of policy, but agency executives speculated that the CBS total was probably around $250 million.

Network sources have never denied that sizable price increases were in store this fall but they have insisted that in most cases the increases are “catch up” and in any case justified in terms of advertising effectiveness and in relation to the costs of other media.

BBDO’s new 1977 “Audience Coverage and Cost Guide” estimates that nighttime network C-P-M’s this year are 12% higher than in 1976, as compared with a 10% rise for daily newspapers, 6% for consumer magazines, and 11% for network radio and 10% for spot radio. But the BBDO table also goes back to 1967 and shows that the C-P-M increase since then has been 76% in the case of nighttime TV as against 125% for daily newspapers and 25% for consumer magazines 21% for network radio and 42% for spot radio.

(The “Guide” projects a $3.35 cost-per-thousand households for a prime-time 30 for this year’s fourth quarter, but the projection, BBDO spokesman noted, was made in February, before the 1977-78 schedules and pricing reached the market. The estimates being circulated last week suggested the projection will prove conservative.)

While the networks and agencies were concentrating primarily on 1977-78, a detailed look at the year to date and a general look at 1977 as a whole were provided last week by Merrill Lynch, Pierce, Fenner & Smith in its latest monthly analysis of the broadcasting business. The analysis was prepared by William P. Suter, vice president of the Wall Street firm.

On the strength of performance thus far
for television business.”

Among those indicators: continuing growth of the national economy; rising confidence among consumers; increases in personal savings, offering a big potential market for advertisers; gains in share of the market; a positive outlook for retailers; a big resurgence in new-product introductions, reaching an all-time high in May; continued growth in TV viewing levels, and increased use of TV by other media to build their own circulation.

The relationship between audience and revenue and the impact of audience loss on service to the public are not the only areas covered in the inquiry. It seeks information, also, on the demand and cost factors in the growth of CATV and the elements to be considered in measuring cable television-caused audience fragmentation. The staff draft included a total of 35 questions. Commissioner Joseph Fogarty suggested another, which was included: Are there situations in which cable television has helped a television station?

The notice of inquiry—which was originally proposed by Chairman Richard E. Wiley and which was drafted by the Cable Television Bureau with the assistance of the Broadcast Bureau and Office of Plans and Policy—is neutrally stated. And it pleads for the submission only of economic data and analysis—since the commission is “not interested . . . in arguments over burdens of proof, debate over the merits of the existing regulatory program or proposals for regulatory change.”

But the commission also says the goals of its regulatory program have not changed: “They are (1) to maintain our system of over-the-air broadcast service, and (2) to foster cable growth in order to provide diversity of programing and broadband communications service.” The commission says it continues to believe those goals are “compatible.” And in attempting to achieve them, the commission adds, its concern has been “not to extend to which cable service adversely affects television stations and, consequently, their ability to serve the public.”

As for the four principal aspects of the inquiry:

How is the relationship between audience and revenue to be determined? The commission notes that it has assumed a direct relationship between the two. But to test that, the commission feels it must examine all of the major factors that deter-

Back up. FCC commissioners last week instructed staff to draft notice of rulemaking whose issuance could result in commission being buried in avalanche of mail. Perhaps for that reason, commissioners later began thinking in terms of policy statement. At issue is question of religious broadcasters using noncommercial FM spectrum. Issue arose in connection with Moody Bible Institute applications for FM stations on noncommercial channels in East Moline, Ill., and Boynton Beach, Fla. FCC's research office in Chattanooga, Bureau stating that since Moody Bible did not have educational institution in those cities (as it does in Chicago, where it operates FM), commission rules prohibit it from operating FM's there. It recommended hearing. General counsel said religion and education are so closely related that commission would violate First Amendment provisions dealing with freedom of religion and speech and Fifth Amendment protection against discriminatory treatment in failing to grant application. Another complication was that commission had—by mistake—staff conceded, granted Moody Bible's FM in Chicago. Commissioners, agreeing situation was "a mess," decided to 0 to grant Moody applications but without order—aim was to avoid reversing policy—and to initiate rulemaking to establish clear rules. Two years ago, petition for rulemaking dealing with religious broadcasting touched off flood of opposition that has yet to ebb: more than five million have thus far been filed, almost two years after petition was denied in August 1975 (Broadcasting, Aug. 4, 1975).
mine the revenues of stations; it says the extent of audience fragmentation is "obviously" an important factor in determining relationships between revenue and audience. But it adds that the relationship may vary according to the source of revenue—local advertisers, for instance, or network compensation. The commission also wants to know all of the factors affecting revenue so that it can "more precisely measure" the impact of changes in audience on revenue.

Accordingly, the commission asks for comments on such matters as: What parts of the broadcast day are most often sold to local, regional and national advertisers? Are there particular dayparts where advertising is left unsold? What audience measures are most important in selling spot time to local, regional and national advertisers? What is the predictable long-term rate of growth in demand for television advertising time, and to what extent will that long-range growth rate be affected by increased cable penetration? What are the differences in the audience/revenue relationship between VHF and UHF stations?

As for the impact of cable penetration on broadcasters' service to the public, the commission notes that some broadcasters claim reductions in revenues may lead broadcasters to cut costs and that public-service programing may be the first to suffer the consequences of budget cutting. On the other hand, it adds, the market may be self-adjusting: The reduced revenues stations experience may force program suppliers to reduce their prices.

To explore those matters, the commission asks: To what extent will licensees attempt to protect profits by cutting costs? What is the relationship between a reduction in expenditures and service to the public? What types of service are likely to be reduced? Public service? Is there a relationship between revenue reduction in a market and the prices that program suppliers can command?

In attempting to discern cable television's future growth, the commission says it needs information on the alternative paths that the industry may follow, and on the effects that various "alternative environments"—geographic, demographic, technological, financial and regulatory—will have on the selection of the paths and on the rate of progress along them. For instance, it notes that the extent to which such factors as the number of signals and the diversity of signals receivable off the air will continue to be a major factor in the growth of cable television is not known. "Ancillary services such as pay television," the commission says, may cause sufficient demand in markets which previously thought to be unprofitable for cable television.

The commission asks for comment on these questions: How can ultimate cable penetration in station's entire service area be estimated? What effect will improvements in television signal transmission and/or television receivers have on future cable television growth? Will an increase in the number of television outlets affect cable television's growth? Can cable television be viable in large cities, and to what extent will it grow in sparsely populated areas? What are the effects of having only 50 homes to a mile? How would cable television expansion affect the key economic factors controlling the availability and price for programing paid by cable systems, broadcasters and others? What cost restraints do cable systems experience in originating entertainment and sports programing? What effect does the origination of such programing have on the growth of systems?

Measuring "the extent, if any, of local audience fragmentation" as a result of cable television presents problems, the commission says. And the principal one is that audience-survey samples are based on county populations rather than community populations. The commission says, for instance, that the number of diaries used to determine audience behavior within a county "is the minimum number allowed for a statistically specified audience level." It also notes that since there is often more than one cable system in a county, county data usually does not permit the analysis of the viewing of ancillary services, such as pay television or of distant signals.

To help it overcome such difficulties, the commission asks: To what extent do such ancillary services as pay cable and cable-casting affect a local broadcaster's audience? Are there surveys which quantify the impact? On average, what are the distinctive differences, if any, between the total viewing habits of cable television audiences versus noncable television audiences? What is the relationship between cable carriage of distant noncommercial educational broadcast stations and the audience levels for local educators? To what extent will the audience show loyalty to the local station when the same program is carried by a distant signal on the cable system? Is there any value to home local news lead-in? To what extent does diversity in programing cause an increase in total market viewing after all three network services are provided?

The commission is attempting a somewhat unorthodox procedure for conducting the inquiry. First, those who file will have an unusually long period in which to do so; the deadline for comments is Dec. 1. But the FCC is encouraging those who comment to break with tradition and beat the deadline by as comfortable a margin as possible. Comments or studies considered of "particular interest" or which may seem likely "to engineer further useful information" may be distributed for comment. The Cable Television Bureau is preparing studies of its own on which comments may be invited. The deadline for reply comments will not be set until the staff has some indication of the number and complexity of comments being received.

The commission also sought to make clear that the inquiry is not the kind of proceeding in which off-the-record contacts are barred. Sensitive to such matters as a result of the ruling by the U.S. Court of Appeals in the pay-cable case that ex-parte contacts are to be barred in rulemaking proceedings, it voted to add a statement to the effect that the inquiry "is not a restricted proceeding" in which off-the-record contacts are prohibited.

### Van Deerlin insists that only the words have changed

'Rewrite,' 'review' or whatever, the congressman says that his subcommittee is on the same track as before in working over the Communications Act; Shooshan blasts what he sees as scare talk in the broadcasting community

Representative Lionel Van Deerlin (D-Calif.), chairman of the House Communications Subcommittee, and the chief counsel of that panel are seeking to clear away some of the semantic confusion surrounding what it is they are up to in working over the Communications Act. Whatever label is attached to the work—"rewrite," "review" or "reappraisal"—the congressman said, legislation will emerge that will be "more than a patchwork" and will be designed to prepare the Communications Act "for the 21st century."

Questions concerning the scope of the project arose after Representative Van Deerlin, in an interview with Broadcasting last month, said it would be "more correct" to describe the work as a "reappraisal" or "review" rather than as a rewrite (Broadcasting, May 30). He had originally described the project as a "base-ment-to-penthouse revamping."

The subcommittee's chief counsel, Harry M. (Chip) Shooshan III, immediately sought to make clear that no change in direction was being signaled. He told Broadcasting two weeks ago he had received no new instructions ("Closed Circuits, June 6). And a few days later, in a speech to the Missouri Broadcasters Association he dealt at length with what he regarded as unfair or inaccurate reporting.
1927. Lindbergh winged his way to Paris. Babe Ruth hit 60 home runs. And George Storer entered broadcasting with a 50-watt radio station in Toledo, Ohio.

In 1927, President Calvin Coolidge spoke for many Americans when he pronounced, “The business of America is business.”

But he wasn’t exactly speaking for the late George Storer and his colleagues, and for all those who for the last 50 years have been building Storer Broadcasting into a vital force in the broadcasting industry. For them, Coolidge might have added, “The business of America is also involvement. In serving the community.” And for Storer Broadcasting, being conscientious members of each community it serves, has been good business.

We’ve been responding to community needs right through the years. From breadlines to welfare. From Prohibition to today’s teenage alcoholism. From the gang wars of the ’20’s to the organized crime of the ’70’s. The community’s problems, aspirations and achievements have been ours, too. We’ve thus built audiences that have confidence in us, and in our integrity.

Our advertisers have discovered they benefit from this climate of credibility. Our acceptance by the community enhances acceptance for their products. Being good neighbors has been good for everyone. For the communities. For us. No wonder we’re looking forward to 50 and more years of broadcasting that serves.

Fifty years of broadcasting that serves.

WAGA-TV Atlanta/WSBK-TV Boston/WJKW-TV Cleveland/WJBK-TV Detroit/WITI-TV Milwaukee/KCST-TV San Diego/WSPD-TV Toledo
WJW Cleveland/KTNQ and KGBS Los Angeles/WGBS Miami/WHN New York/WSPD Toledo
of the project—particularly that in the National Association of Broadcasters' house organ, *Highlights*—and criticized the broadcasting industry for what he regarded as its negative attitude toward the subcommittee's work.

In an apparent reference to Broadcasting and to broadcasters generally, Mr. Shooshan said in his remarks to the meeting at Table Rock Lake, Mo., “Wishing will not make it so.” Thus he saw the rewrite “dead and buried.” He said, “We are suffering from a lack of understanding of the project.”

Representative Van Deerlin made it clear there was no disagreement between him and Mr. Shooshan as to the continuing thrust of the subcommittee's work. He had dropped “rewrite,” he indicated, because it was interfering with the subcommittee’s work. It was “bugging” broadcasters, he said. His aim, he said, was “to make them [broadcasters] feel better.” If a word “achieves a buzz quality, that's an advantage to help my position,” he said. “I'll drop it.”

His announced plan for a top-to-bottom rewrite has indeed caused concern among broadcasters who are uneasy over the prospect of the rules under which they have lived being changed in some manner as yet unpredictable. Representative Van Deerlin said the 15 broadcasters who met with him, and other members of the subcommittee and staff on Wednesday had been worried: “They had been given unusually provocative information about the subcommittee and staff.” But, he said, “they went away satisfied” (see story above).

Labels aside, Representative Van Deerlin restated the position he had taken in the interview with Broadcasting—that the subcommittee does not intend to rewrite every clause in the Communications Act. But, he said, if sections are found to block the development of new technologies or the free play of the marketplace, “we'll see if we can't do something better.”

For his part, Mr. Shooshan told the Missouri broadcasters, he saw his problems with the rewrite as “microscopic” of what he considers an over-all misconception of his subcommittee's work on the Communications Act. “I think there's been a lot of distortions about the opinion papers,” causing unnecessary broadcaster fears, he claimed. And he accused the NAB of using its influence and its right to interfere with constant characterizations of the enterprise as “radical and revolutionary.”

Particularly, he took exception to the portrayal in the May 2 and 9 issues where, among other things, he said, the “entire truth” was not told or the message he wrote in the opinion paper on broadcasting was distorted. Mr. Shooshan claimed that *Highlights* reported only three opinions he offered on license renewal, leaving out the fourth that called for maintaining the status quo, with relatively minor changes. As to a *Highlights* statement that he questioned the ability to write that the “future . . . rests on the shoulders of local broadcasters” and that *Highlights* “downplays” that, on another count, he contended that the publication misrepresented the subcommittee's stance on First Amendment rights and that his subcommittee chairman, Lionel Van Deerlin (D-Calif.), for one, is “one of the most articulate advocates” in Congress for equality of print and broadcast rights.

After making several criticisms of the FCC, Mr. Shooshan asked the broadcasters if they wouldn't be better off seeing if the rewrite project came up with a better alternative. When the problems he faced were the “bottleneck at the commission” which he said causes unnecessary administrative delays; the “excessive” and “often meaningless paper-work” required of broadcasters and “regulatory uncertainty” stemming from “poorly articulated” and “inconsistent” policy that is not based on an adequate record, Mr. Shooshan said that broadcast regulatory policy “is in shambles.”

As for the industry as a whole, he charged that it has a “negative image in Washington” because, he said, it fights change and innovation. Adding that broadcasters had been pioneers in technology in the past, he said he hoped they would be “in the vanguard” of change in the future. He said that Mr. Van Deerlin and that technological innovations don't pass broadcasters by, and said that as long as broadcasting remains primarily an entertainment medium, it should “expect to be supplanted” by the likes of video disks and pay cable. He complimented the public broadcasters on their “outstanding” use of its planned use of satellite interconnection.

“Where is the broadcaster going to be,” he questioned, not in 1984, but in 1979, when he said there will be computer terminals in every home.

Mr. Shooshan further criticized the industry for allegedly standing behind the First Amendment only when it suits its purposes and characterized the NAB/FCC/network meetings on family viewing as “censorship” and “intimidation.” He said a “broadcaster worth his salt should have walked out of that room.” and added that “one network [participant] of a trade association” agrees with Mr. Van Deerlin that “the CIA in,” in apparent reference to CBS's permitting the Central Intelligence Agency to monitor news reports during Cold War days (Broadcasting, June 6).

Donald Zeifang, NAB's senior vice president, government relations, offered a paper to Mr. Shooshan at the MBA convention a day later. “I will make no apology for the rhetoric in Highlights,” he said, claiming that it is the “only medium we control.” Mr. Zeifang said that “on occasion, it is imperative that we go public” and that “we are in a battle.” He added: “I would like to think we are not misrepresenting the facts.”

As for the fourth option on licensing that Mr. Shooshan mentioned, Mr. Zeifang implied that it was the other three that were of concern to broadcasters since they are “radical and revolutionary to the whole range.”

And as for Mr. Shooshan's statement that broadcasters are perceived as being against technological change, he listed NAB stands he considers progressive: in favor of automatic transmitters, parity for UHF TV, additional AM frequencies and calls for legislation. He don't recommend Mr. Shooshan, however, for attacking “overregulation.”

Meanwhile, NAB's executive vice president and general manager, John Summers, was in Biloxi, Miss., telling the Mississippi Broadcasters Association that the Communications Act rewrite is “one of the most serious challenges to broadcasters in many years.” And in reference to his interpretation of the option paper on broadcasting, Mr. Summers said: “If localism means that listeners and viewers can tune into broadcasting and hear little Bertha Snodgrass down on Maple Street singing 'Home on the Range,' then we agree that localism has failed.”

Broadcasting June 13 1977 32
Senate Appropriations Subcommittee has called at least temporary halt to FCC's network inquiry. Subcommittee, in letter to be delivered at this week, will disallow commission's request to reprogram funds appropriated last year to finance staff of 10. (About $350,000 is involved.) Subcommittee, whose chairman is Senator Ernest Hollings (D-S.C.), who also heads Communications Subcommittee, will say network project should be deferred until new leadership—chairman to be appointed by President Carter—is installed at commission. Commission notified by telephone on Friday, is expected to ask subcommittee to reconsider. One official said all seven commissioners would endorse request.

- Cable television industry-wide revenues exceeded $944 million last year, according to FCC report issued for period ending Oct. 1976. Pre-tax net income was slightly above $27 million, and assets of operations nationwide were placed at approximately $2 billion. Commission said over 6,000 communities are now being served by cable.

Tinkering with 1977-78 prime-time schedules has already started. Last week NBC canceled Universal Pictures Television's "Off the Wall" sitcom (Sunday, 8-8:30 p.m., NYT), direct result of miserable Nielsens when show's pilot was telecast (8.1 rating, 19 share on Saturday, May 7, 8-8:30 p.m.). NBC won't have to rush to replace it because two-hour Walt Disney movies will occupy time period for first weeks of season. To mollify Universal, NBC ordered some new 80-minute episodes of series originally canceled, "Baa Baa Black Sheep," about World War II flying aces, and may try them in later time period next winter. NBC also gave Universal go-ahead for couple of episodes of "Richie Brockleman," tongue-in-cheek hour about private eye barely out of his teens.

Grayson Enterprises Inc. faces possible loss of its four television licenses. FCC last week designated for hearing renewal applications for KLBB-TV (ch. 13) Lubbock, KMOM-TV (ch. 9) Monahans, KMWB-TV (ch. 4) Big Springs, and KTXS-TV (ch. 12) Sweetwater, all Texas. Issues involve questions as to whether KTXS-TV's main studio was moved from Sweetwater to Abilene with commission approval, whether ownership or management officials lied to commission about location of that studio, whether owners engaged in fraudulent billing and whether owners or management engaged in falsification of KMWB-TV program logs, directly or through employees. Midland Telecasting Co., licensee of KCOO-TV (ch. 18) Midland, Tex. which pinpointed commission to deny renewals of KMOM-TV and KMWB-TV, was made party to proceeding.

Bill to establish Consumer Protection Agency is apparently dead for this year. Senate Democratic leader Robert Byrd (W.Va.) said bill would not be called up until House considered it. House version is still 20-25 votes short of majority and Speaker Thomas O'Neill (D-Mass.) said House would not act until Senate passes it.

FCC is considering, though with mixed feelings, proposal to permit cable television system at Eagle Mountain, Calif., to delete commercials from distant stations and substitute commercials from local enterprises. Proposal was filed by KTV Spot Sales, Los Angeles agency, which would sell time locally. It is negotiating with three Los Angeles stations whose commercials would be deleted but which would share in profits from arrangement. Cable Television Bureau recommends rule waiver to FCC to implement plan, noting that Eagle Mountain is beyond service area of any television station and is 40 to 50 miles from communities in which radio stations are located. Petition is opposed by National Association of Broadcasters and ABC, but not by broadcasters in area. However, Commissioners Robert E. Lee, James Quello and Abbott Washburn criticized proposal in meeting last week, saying approval could set dangerous precedent. Commissioner Benjamin L. Hooks also seemed cool to idea. One question unanswered is whether stations involved—KUH-TV, KTV and KLAA—have reached agreement with KTV. (Fourth station, KCOF withdrew from negotia-

tions.) So commission voted unanimously to determine status of negotiations before making decision on waiver request.

WILLIAM New Haven, Conn., and WHINKAM Springfield, Mass., went to court last week to stay distribution of Arbitron's April/May surveys for their respective areas. Only WEE was successful; Judge John Ward of U.S. District Court in New York asked Arbitron to defer issuing New Haven book—due out today June 13) until he issues decision on WEE's request for preliminary injunction, which he promised June 17. But in Springfield, Massachusetts Superior Court Judge Raymond Cross rejected WEE's request. Springfield book is due out this week. In both cases station complained about addition to their survey areas of adjoining counties that, they claim, will distort results of survey reports. WEL is complaining about Fairfield county, which station says is New York oriented, and WHIN is concerned about Hartford (Conn.).

Pivotal meeting of Society of Motion Picture and Television Engineers working group seeking to develop interchangeability standard for nonsegmented one-inch helical video tape recorders (contest is between Ampex and Sony designs) was held in Montreux, Switzerland, last Friday (June 10). Official communique said only that "no unresolvable problems" had emerged and that there was "continuing progress" toward solution. Next meeting is scheduled for Chicago in July. Should SMPTE group be unable to effect compromise, decision would be left to marketplace. In that event, RCA could hold trump card. It presently licenses Bosch-Fernseh VTR system in segmented helical format, has remained silent on nonsegmented version that has head start in U.S. RCA's NBC has chosen Sony format, as has CBS (see story page 55); ABC has made no commitment.

ABC-TV suspended new-season production late last week on its hit series, "Charlie's Angels," because Farrah Fawcett-Majors, show's most popular "angel," has failed to report for work. Spelling-Goldberg, production company, has already filed civil suit against Miss Fawcett-Majors in Los Angeles superior court (Broadcasting, March 21), and ABC said "ABC is also considering direct legal action against her."
Van Deerlin's unit hears from inside, outside and in between on the future of regulation

Communications Subcommittee receives input from panels representing industry, citizen groups, ex-FCC members

Former FCC commissioners, citizen-group types and members of the establishment appeared in a series of panels before the House Communications Subcommittee last week, as the subcommittee continued to seek knowledge and feelings for its planned revision of the Communications Act.

The talk, in three panels, ranged from pleas for lofty research and policy planning to complaints about the attitudes of the present commission, from proposals for radical surgery on the existing telecommunications regulatory system to suggestions for merely modifying it.

Some areas of agreement among the various panelists emerged in the talks presided over by Representative Lionel Van Deerlin (D-Calif.), chairman of the subcommittee. There was, for instance, unanimity on the need for long-range planning and research, though there were almost as many suggestions as to where that work might be done as there were panelists in favor of doing it.

But sharp differences emerged as to the wisdom of dividing the FCC in two, with one section dealing with broadcasting and cable television, the other with common-carrier and safety and special radio services.

The subcommittee is still at only the beginning of its task. Hearings on the Communications Act project will continue through the summer and into the fall.

With three former FCC commissioners who had served together in the late '60's and a fourth who was a member of the next generation at the FCC participating, the first panel session before the subcommittee was something in the nature of a reunion.

There were former Chairman Dean Burch (1969-1974) and former Commissioners Kenneth A. Cox (1963-1970), Nicholas Johnson (1966-1973) and Glen O. Robinson (1974-1976) discussing possible structural reform from the benefit of experience and in some cases the perspective of having dealt with the commission from the outside. (Mr. Burch is practicing law; so is Mr. Cox, who is senior vice president of MCI Telecommunications Corp. Mr. Johnson heads the National Citizens Committee for Broadcast-

Diversity. Praised by Chairman Van Deerlin at his hearing last week was this panel, for its "spirit of give and take." L-r are John Bankson, president of the Federal Communications Bar Association; Antonin Scalia, former head of the U.S. Administrative Conference and now a consultant to the FCC on its network inquiry; Donald McGannon, president of Westinghouse Broadcasting which petitioned the commission for the inquiry, and Charles Firestone, of the Citizens Communications Center.
FOUR MORE REASONS WHY YOU SHOULD CONSIDER A MARKETRON TRAFFIC & ACCOUNTING SYSTEM FOR YOUR STATION

In a major Northwest market a Marketron Minicomputer System replaced a PSI System. Why?

In New York, Los Angeles, Chicago and San Francisco Marketron Minicomputer Systems replaced Compunet Systems in five stations. Why?

In New York, Los Angeles, Sacramento, and Boston Marketron Minicomputer Systems replaced IBM System 3 software packages—including one designed by IBM—in eight stations. Why?

At Marketron we'll answer all your questions including these. Isn't it time you found out more about Marketron's Minicomputer traffic/accounting system?

Send for the complete story on the Marketron Act II System for broadcast traffic and accounting. Or call us at 415-854-2767.

It may be the most profitable signal you'll send out all year.

Marketron

search, in Boulder, Colo. Mr. Burch said
long-range planning was supposed to be
the Office of Telecommunications Policy's
job. Unfortunately, he said, referring to its
days under its first director, Clay T.
Whitehead, "it began as the Office of
Rhetoric."

A separate panel produced additional
discussion—and unanimity—on the need
for long-range communications policy. But
there were also some new and radical pro-
posals for restructuring the mechanism for
regulating the communications industries,
including the creation of a cabinet-level
department of communications.

Serving on the panel, which was charac-
terized by Representative Van Deestin as
the one that "more than any other caught
the spirit of give and take," were John
Bankson, president of the Federal Com-
 munications Bar Association; Charles
Firestone, of the Citizens Communications
Center; Donald McGannon, presi-
dent of Westinghouse Broadcasting Co.,
and Antonin Scalia, a former head of the
U.S. Administrative Conference, who will
begin teaching law at the University of
Chicago in the fall and who is now a con-
sultant to the FCC on its network inquiry.

The suggestion for a new cabinet-level
department of communications was Mr.
McGannon's. The proposal, originally
made during the subcommittee's hearings
on cable television last year (BROADCAST-
ING, Aug. 9, 1976), envisages a depart-
ment similar to the Department of
Transportation. And, as DOT has authori-
ty over the Civil Aeronautics Board and
the Interstate Commerce Commission,
the proposed department would divide the
regulation of broadcasting and cable
television on the one hand, and common
carriers and safety and special radio ser-
voes on the other, between two separate
agencies. Mr. McGannon likened the
structure to that now operating in Canada,
where long-range planning is carried out
by a top-level agency and day-to-day
operations by a subsidiary one.

(The creation of a cabinet-level depart-
ment of communications was discussed by
the four former commissioners, but re-
ceived no votes. The diversity of views
issuing from the various agencies dealing
with telecommunications is an advantage,
they seemed to feel, and Mr. Burch cited
the First Amendment problem that might
be created along with a cabinet-level
department dealing with communica-

Mr. Firestone would also wipe out the
FCC in its present form. In a written out-
line of his remarks entitled "Abolish the
FCC," Mr. Firestone questioned whether
the commission's functions could not be
conducted more efficiently within a
different structure. He said "the FCC is
not an expert agency . . . it is not neces-
sarily independent . . . [and is a] captive of
the industries it regulates."

Mr. Firestone suggested placing policy-
making and rule-making in an executive
agency and the commission's enforcement
powers in an independent general counsel
or a presidiently nominated public
counsel who would be confirmed by the
Senate. Prosecution of certain cases would
be conducted in U.S. district courts rather
than at the commission.

Other factors in Mr. Firestone's regula-
tory scheme would involve spectrum leasing,
with equal employment opportunity, access and programing provi-
sions written into the contract. Yearly
renewal would be pro-forma unless the
licensee violated the lease or was sued for
alleged violations.

Some panelists criticized the FCC for
alleged inefficiency. Mr. Bankson, who
said he was speaking for himself and not
the FCBA, for instance, noted that there
are 12 commission administrative law
judges and only one clerk. But Mr. Scalia,
who portrayed himself as a realist, warned
the others "not to hold forth any great
hope" for change.

And Representative Wirth also may
have dashed some hopes for major change
when he said that the "climate" in Wash-
ington and across the country would be
against creation of new agencies, but
rather for fine-tuning the present struc-
ture. Mr. Firestone claimed that unless
something new is created, there cannot be
a "new spirit."

As the session drew to a close, Mr.
Shooshan drew the group together by ask-
ing a question on behalf of Mr. Waxman,
who was absent: Where should long-range policy be carried out, at the Office of Telecommunications Policy, at the Department of Commerce's Office of Telecommunications, at the FCC? Messrs. Firestone, McGannon and Scalia opted for it to be handled within the executive branch. And Mr. Bankson appeared to speak for them all when he said the job ought to be "done somewhere."

A discussion by a panel of public-interest group representatives produced little testimony that reflected well on the FCC. Much of it was to the effect that the commission was more of a hindrance than a help in advancing public interest.

Kathy Bonk, national media coordinator for the National Organization for Women, for instance, said that, "with the present FCC, we're up against a stone wall. The present FCC is mediocre, at best." But she wasn't angry at broadcasters, however, and her point seemed to be that the potential for cooperation between broadcasters and citizen groups is greater than the National Association of Broadcasters wants to believe or that the commission realizes.

She noted that the commission meets with citizens in regional meetings and with broadcasters at state association meetings. "We have to make broadcasters and citizen groups cooperate in producing policy input," she said. That, she added, "is where the Office of Plans and Policy could help."

Then there was Ted Carpenter, of the National Citizens Committee for Broadcasting. He ticked off a number of matters in which the NCCB has become involved in the last couple of years—the commission's conglomerate inquiry, the proposed reimbursement of expenses of citizens groups interested in participating in commission proceedings and the media crossownership case, among them—and concluded, "We found the FCC an administrative barrier to action in the public interest, or else its actions were irrelevant."

The aim, he said, should be to involve the public in commission proceedings. But "there is no clear administrative procedure for us to interact with the FCC." Probably the commission's harshest critic was Pluria Marshall, chairman of the National Black Media Coalition. He said that "the commission makes a lot of moves as if it's allowing the public in, but it isn't." And he accused the commission of failing to grant relief to blacks who, he said, had been "shut out" of broadcast station ownership. (When Representative Van Deerlin asked whether the ownership problem involved racism or lack of money, Mr. Marshall said it was racism. "A lot of broadcasters can tell rags-to-riches stories," he said.)

As for structural reform, he said it is important to have the Communications Act rewritten "to make sure the public access to the public airwaves." He said the public's rights should be spelled out in law or regulation "to make sure the things that should happen do happen regularly, not as the result of a court case." Unless the FCC is "mandated," he said, "they'll stay in cozy partnership with the broadcast interests."

Harvey Shulman, of the Media Access Project, had some suggestions aimed at involving the commission deeply in the affairs of the public. He would, for instance, turn the tables on the commissioners and require them to do a formal ascertainment of public needs and then report on the 10 most significant.

But that's not the most far-reaching suggestion. He said the commissioners "are not interacting with the people" in Washington. "Here they just get in their cars and drive home to suburbia." Therefore, he said, the commission should be moved elsewhere, perhaps to Omaha.

Phil Watson, senior manager of the telecommunications division of the Booker T. Washington Foundation, expressed concern with what he saw as the commission's inability to promote minority ownership. He noted that less than 50 of the nation's 8,700 radio stations are minority owned and that of the 900 television stations, two are black-owned.

The subcommittee, he said, should seek to restructure the FCC in a manner that would permit it to focus on the problem of permitting minorities to achieve parity in ownership. "The structure should be integrated with a national policy that sets out more clearly certain mandates," he said.

This RCA option substantially improves signal-to-noise ratio, reduces moiré, and corrects banding errors. Master recordings look better than ever so that all your tapes can be produced with consistent high quality.

The complete quad.

It takes a great VTR to accommodate versatile options. That's the TR-600A. We designed in all-modular electronics. Included desirable features that cost up to $20,000 to add to other VTRs. The TR-600A offers a raft of options, such as exclusive integral on-line Time Code Editing, AE-600. All housed in a smart cabinet that fits in 7 sq. ft. of van or studio floor. In short, the complete quad at a surprisingly low price.

For the complete story of the TR-600A and all its options, see your RCA Representative now.
Through the eyes of Justice: the FCC’s probe into networking

Comments at commission pinpoint areas in which department will participate, emphasizing those that involve problems of competition; it also suggests that FCC generally follow pattern of 1959 inquiry and provides list of issues that it feels commission should pursue.

The Department of Justice last week began its participation in the FCC’s inquiry into television network practices. For the most part, the commission, filed one week after the June 1 deadline set by the commission (Broadcasting, June 6), suggests procedures for conducting the inquiry, as well as areas that should be investigated. But it also defines the role the department will play, suggesting, in the process, it might call for a modification of the industry’s structure.

It says it will provide a balance to the emphasis it sees licensees and networks placing on “the particular effects of network-licensee relations on licensee performance.” Licensees and networks do not deal with competitive performance “in its larger sense,” Justice says. “And neither the commission’s notice gives much attention to the possibility of enhancing competition by adjusting the present practices or structure of the industry.”

Justice adds that it will “draw attention to those facts that bear most heavily on problems of competition and to suggest ways that problems of licensee performance on be dealt with either through providing for greater competition or through regulations that impair it the least.”

The department’s principal procedural suggestion is that the commission borrow a leaf from the book of its 1959 network inquiry and authorize the chief administrative law judge to supervise and direct the fact-gathering under prescribed procedures. The department said the chief ALJ should be empowered to receive evidence, issue subpoenas and certify the record to the commission.

The commission is establishing a special staff, answerable to itself, to evaluate comments and gather evidence. The department says the creation of such a staff is essential but would not be enough to assure a thorough investigation of network-affiliate relations.

The department agrees with the commission on the need to study clearance of network programs and expansion of network schedules, previewing of network programs by affiliated stations, station compensation plans and the effect that network owned and operated stations have on those and other areas.

But it also indicates how it thinks six specific issues relate to the central questions:

- Network compensation to affiliates for carrying network programs. The Westinghouse Broadcasting Co. petition that triggered the inquiry and other material “gives strong evidence of an imbalance of bargaining power between individual stations and the national networks.” Not only the compensation itself but each element of the formula that determines the compensation should be examined closely.

- Affiliation agreements. The commission should go beyond network affiliation agreements themselves to determine how they are administered in practice, how they are negotiated, or whether there are collateral understandings.

- Program clearance. The commission should look into the causes of program-clearance rates that are considered “too high to be consistent with a licensee’s meeting its duty to select locally appropriate programming.”

- The relationship between network and affiliates in the sale of advertising time. Since artificially high clearance rates may benefit national advertisers at the expense of regional or local advertisers, the commission should determine whether network practices detract from affiliates’ ability to meet the demands of non-na-
FCC upheld in refusing Asheville FM to Basic

Three FCC decisions that add up to a denial of Basic Media Inc.'s effort to establish an FM station in Asheville, N.C., were affirmed by the U.S. Court of Appeals in Washington last week.

Basic Media's problem results principally from the fact that WAGI-FM Gaffney, S.C., operates with a transmitter in Forest City, N.C., 26 miles away. Basic Media's proposed station in Asheville would be short-spaced, by 13 miles, to WAGI-FM, under commission rules requiring a 65-mile separation.

Basic Media, which operates WISE(AM) Asheville, had petitioned the commission either to require WAGI-FM to move its transmitter to Gaffney or to deny its license-renewal application. It had also opposed the commission's decision to allocate an FM channel to nearby Waynesville, N.C., and had sought the allocation of a short-spaced FM channel in Asheville.

The commission rejected all petitions, and the court saw no reason to reverse. It said that the record before the commission supported renewal of WAGI-FM and that the station would serve about 560,000 fewer people in North Carolina and only some 50,000 more in South Carolina.

As for the "quality" of the service afforded South Carolina listeners, the court said the commission is "the best judge of an issue so incapable of quantification as quality of service, and of compliance with its own guidelines."

The court said Basic Media had failed to sustain "the very heavy burden" of demonstrating the justification of a waiver of the short-spacing rule, which has been followed consistently since its adoption in 1963 in the case-of applications for new stations. The court said "whatever persuasiveness" might be found in Asheville's needs is "substantially undercut" by the finding that the city is served by four AM's in the city and by four FM's located in neighboring communities.

Basic Media's objection to theWaynesville allocations fails, the court added, because it was "promised on the alternative desirability" of the Asheville allocation—that is, in the assumption its problems regarding Basic Media could be overcome.

Judge George E. MacKinnon wrote the court's opinion for himself and for Judges Edward A. Tamm and Harold Leventhal.

Cox promises to spin out Atlanta cable in five years

But citizen groups want FCC to give company only six months and deny cable-broadcast merger

The Atlanta branch of the National Association for the Advancement of Colored People and the American Civil Liberties Union of Georgia, which for more than a year have been seeking the break-
up of what they call the Cox media "monopoly" in Atlanta, have filed another pleading with the FCC aimed at achieving their goal. It is a petition requesting denial of the proposed merger of Cox Cable Communications Inc. with Cox Broadcasting Inc. and the companies' request for waiver in Atlanta of the FCC rule prohibiting co-located cable-television and television-station acquisitions.

And that isn't all—the petition asks the commission to require Cox Cable to dispose of its Atlanta-area system within six months.

The Cox companies have also filed a new document with the commission—a letter disclosing that Cox plans to get rid of the Atlanta-area system, though within five years, not six months. Government policies and economic considerations, they say, appear to militate against fuller development of a cable system under common ownership with WSB-TV Atlanta.

The local NAACP and ACLU chapters, on March 1, 1976, petitioned the commission to deny the renewal applications of WSB-AM-FM-TV Atlanta and the certificates of compliance Cox is seeking for CCCI's Atlanta cable system. The petition, noting that the Cox family controls the two daily newspapers in the city, refers to the Cox companies as "The Voice of Monopoly." Cox Broadcasting now owns 56.1% of Cox Cable, and stockholders of the two companies are to vote on July 22 on Cox Broadcasting's proposal to acquire complete control. That would result, the petitioners state in their latest pleading, in increasing the WSB-TV's licensee's holding in the Atlanta system from 44.9% to 80%, the amount now owned by CCCI.

"This proposal," the petitioners maintain, "is clearly contrary to the crossownership rule which is designed to bar the creation of new cable-TV and television-station crossownerships in the same market. And they say the arguments Cox has advanced for granting a waiver of the rules "are hollow at best." Among other things, Cox says the crossownership is already grandfathered, so the transfer is simply "pro forma" and does not involve the change of ownership that the crossownership rule would bar.

The petitioners say that, "if anything . . . the commission should waive its questionable grandfathering of Cox's cable-TV crossownership here, and require divestiture outright." They say the deadline should be 180 days.

They contend that Cox has "monopolized the media in Atlanta, giving rise to a strong need for greater diversity" and that Cox's continued retention of the properties and requests for waiver should be included in the commission's analysis of "economic monopolization" under the Sherman Act. They also say that "very little" of the Atlanta system has been built, and all of it in "predominantly white neighborhoods."

The Cox interests' letter to the commission, written by their counsel, William P. Sims, was filed on day one after the petition opposing the merger was submitted to the commission. Mr. Sims says that although Cox-owned companies have operated their communications businesses in Atlanta "fully consistent with the highest standards of public service and interest," nevertheless, "government policies plus economic considerations appear to portend restrictions and delays for fuller development of CATV in the Atlanta market under common ownership with WSB-TV."

Consequently, barring some change in commission policy, Mr. Sims adds, "the commission is advised that CCCI has decided to dispose of its CATV interest in Atlanta" within five years. Mr. Sims says the period is "reasonable" and represents an earlier termination date than would result from the divestiture that might be required as a result of pending legal proceedings—a reference to citizen group effort to overturn the FCC rule grandfathering the Cox cable-TV/television holdings.

However, counsel for the Georgia petitioners, Charles Firestone, of Citizens Communications Center, does not regard five years as a "reasonable" period in which to divest. "We're not going to drop dead because they're going to divest in five years," he said. He added that the groups would continue to press for a 180-day deadline.

The Atlanta system represents a relatively small part of CCCI's holdings. Of CCCI's 427,321 subscribers throughout the country, some 5,800 are in Atlanta.

---

**Changing Hands**

**Announced**

The following station sales were announced last week, subject to FCC approval:

- **KYA-AM-FM** San Francisco, WRTH(AM) Wood River, Ill. (St. Louis): Sold by Avco Broadcasting Corp. to King Broadcasting Co. for $4 million (see story page 44).
- **WRGA-AM-FM** Rome, Ga.: Sold by Rome Broadcasting Corp. to McDougald Broadcasting Corp. for $650,000, plus $100,000 covenant not to compete. Seller is principally owned by Mather M. Payne and three other members of his family. They have no other broadcast interests. Buyer is owned by Michael H. McDougald, former general manager of WAXA(AM)-WQEN(FM) Gadsden, Ala. WRGA is on 1470 kHz with 5 kW full time. WRGA-FM is on 102.3 mhz with 300 w and antenna 790 feet above average terrain.
- **WLWL(AM)-WQOL(FM)** Lynchburg, Va.: Sold by Griffith Broadcasting Corp. to Jamabro Corp. for $598,460.83. Seller is owned by estate of A. Huntley Griffith Jr., which has no other broadcast interests. Buyer is Jacksonville, Fla.-based real-estate investment firm owned by 19
stockholders. Principals are Mary E. Glover (27.1%) and her brothers, Robert T. and James V. Shircliff (21.3% and 21.4%, respectively). Family has various other business and investment interests but no other broadcast holdings. WLLL is 5 kw day and night on 930 kzh. WCOL is on 90.3 mhz with 3 kw and antenna 240 feet above average terrain.

**WQM(AM)** Memphis: Sold by Dalworth Broadcasting Co. to WQM Inc. for $550,000. Seller is Kurt A. Meer Sr., who has no other broadcast interests. Buyer is owned by F.W. Robbert Broadcasting Co., New Orleans. Robbert is owned by Fred P Westenberger and family, who also own wvog(AM) New Orleans. WQM is 5 kw daytimer on 1490 kzh.

**WDAT(AM)** Ormond Beach, Fla.: Sold by National Communications Industries Inc. to Hunter-Knight Daytona Inc. for $476,000, plus $35,000 covenant not to compete. Seller is owned by William P. Hunter and his wife, Shirley, who have no other broadcast interests. Buyer is owned by William A. Hunter (43%) and Philip Knight (21%). Remainder of stock is owned by four others, none of whom has any other broadcast interests. Buyer, Mr. Hunter (no relation to seller), is owner of wdot(AM) Burlington, Vt., and, with Mr. Knight, wwh(AM) Brooksville and wtm(AM) Ocala, both Florida. WDAT operates on 1380 kzh with 1 kw day and 2.5 kw night.

**KATY(AM)** San Luis Obispo, Calif.: Sold by Hill Radio Inc. to Riverside Broadcasting Co. for $400,000, plus $100,000 covenant not to compete. Seller is owned by Duane E. Hill and his former wife, Dee Anne Hill. Buyer is owned by Victor Armstrong, executive vice president of Riverside; Seymour Berns, Beverly Hills, Calif., movie and television producer; Robert Lewine, program executive with NBC-TV, Hollywood; Robert Heumann, president of Los Angeles clothing manufacturer; William Hallen, Lake Tahoe, Calif., builder, and Dr. Thomas Caicaterra, Palo Alto, Calif., surgeon and husband of actress Sandy Duncan. Riverside also owns KVLG-AM FM La Grange, Tex. KATY is on 1340 kzh with 1 kw day and 250 w night. Broker: W. John Grandy.

**KKOR(AM)** Brownsville, Tex.: Sold by Brownsville Broadcasting Co. to Stereo Broadcasting Corp. for $280,000, plus assumption of $45,000 in debt. Buyer is owned by Herbert L. Dewalt and Minor J. and Willis A. Wilson (brothers), none of whom has any other broadcast interests. Mr. Dewalt, brother-in-law of another two sellers, is father of two principals in buyer, Stephen A. and James W. Dewalt (64.3% and 7.1%, respectively). Other stockholders in buyer are Jerry D. Harrison and Eli Adams (14.3% each). Stephen Dewalt is president and principal owner of kiou(FM) Corpus Christi, Tex., and his brother is part owner of Brownsville two-way radio sales firm. Dr. Harrison is Corpus Christi dentist, and Mr. Adams owns outdoor and transit ad-

vertising firm there. Kkor is on 1440 kzh with 1 kw full time.

**KJOE(AM)** Shreveport, La.: Coastal Broadcasting Corp., licensee, sold by Interstate Venture Capital Corp. to Thomas J. and David J. Lynch (brothers) for $175,000, plus $111,600 covenant not to compete. Seller is owned by John D. Mitchell and Sherwin Brotman, who have no other broadcast interests. Buyers own kbye(FM-KFILEFM) Oklahoma City. Their brother, E.F. Michael Lynch, is principal stockholder of Wichita Great Empire Broadcasting Inc., which recently purchased kwh(AM-KROK(AM)) Shreveport (BROADCASTING, May 23). Michael Lynch, however, has no proposed ownership interest in kjoe. Kjoe is 1 kw daytimer on 1480 kzh.

**WHOU-AM-FM** Houlton, Me.: Sold by WHOU Inc. to Penobscot Broadcasting Corp. for $210,000. Seller is owned by Robert E. Smith, who also owns wody-AM-FM Calais, Me. Mr. Smith is better known as “Buffalo Bob,” host of syndicated Howdy Doody television children’s series. Buyer is primarily owned by James H. Goff and George Wildye, who also own wpbc(AM) Bangor, Me. WHOU is on 1340 kzh with 1 kw day and 250 kw night. WHOU-FM is on 100.1 mhz with 3 kw and antenna 300 feet above average terrain. Broker: Blackburn & Co.

Other station sales announced last week by the FCC include: wsu(AM) Patchogue, N.Y.; wlti(AM) Steubenville, Ohio, and kean(AM) Brownwood, Tex. (see page 67).

Approved
The following station sale was approved last week by the FCC:

**WRDU-TV** Raleigh-Durham, N.C.: Sold by Triangle Telecasters Inc. to Durham Life Broadcasting Service Inc. for $2,725,000 plus $10 covenant not to compete. Owners of financially troubled seller are Robinson O. Everett, his mother, Katherine R. Everett, and Emanuel Evans. Neither Mr. Everett nor his mother has other broadcast interests. Mr. Evans has minor holdings in several publicly traded station groups, broadcast owners, and Roland McClamrock Jr., 1.9% owner of Triangle, is principal in wchiam(AM) Chapel Hill, N.C., and wblg(AM)-wkgq(AM) Lexington, Ky. Buyer is wholly owned by publicly traded Durham Life Insurance Co., T.A. Upchurch, president and chairman of board. Durham Life also owns wptf(AM)-wqdr(AM) Raleigh and 3.5% of publicly traded Jefferson-Pilot Corp., newspaper and broadcast owner. WRDU-TV is NBC affiliate on ch. 28 with 1,000 kw visual, 214 kw aural and antenna 1,040 feet above average terrain.

Other station sales approved last week by the FCC include: wzzm-FM Grand Rapids, Mich. (see page 68).

### Doubleday Media Offers:

**APPETIZERS TO START**

Here are two superb reasons that will quicken your appetite for opportunity.

First: this Class A FM is located along the shores and bays of a middle Atlantic state. The service area is on the periphery of a top ten market with the surrounding communities all marked for suburban growth. A dedicated resident-manager should be able to improve all aspects of this well run station.

Second: a recent engineering study indicates the feasibility of moving the transmitter site closer to the major market.

The obvious potentials should stir your gastric juices for a chance to capitalize on a unique opportunity.

The price is $325,000 cash or terms to a qualified buyer.

The studio building on a large parcel of land is included in the sale. Call Dick Anderson if you want to whet your appetite with more details. 214/233-4334.

**DoubleDay Media**
Presenting Series III, "Young People's Specials."

12 Prime Access Programs with tremendous, proven appeal to adults as well as the 6 to 16 year old audience!

"Young People's Specials" have a proven appeal to stations and advertisers alike. Series III has already been scheduled by the NBC o&o stations, Meredith Broadcasting and Multimedia Broadcasting. They know the outstanding ratings and awards of Series I and II.

The success of "Young People's Specials" is firmly established. Both Series I and II achieved better than 80% coverage of the United States—and met the need for quality, half-hour prime access programs enjoyed by the whole family.

Now it's time to add the excitement and appeal of Series III to your September—August schedule! Here's further proof:

"The Americanization of Elias." An eastern European child in a strange new world: America at the turn of the century.

"Joshua's Confusion." An Amish boy torn between family traditions and the glitter of the Twentieth century.

"Palm Trees and Ice Bergs." A dramatic and funny report by children of Alaska and Hawaii.

"My Father...My Brother...and Me." The story of a father's devotion to a handicapped son.

"Common Sense." A modern child is transported back in time—to observe the struggles of Tom Paine in colonial America.

"Sacajawea." The story of a young Indian girl who guided the Lewis & Clark expedition to the Pacific.

"Nightmare: The Immigration of Joachim and Rachel." Two children escape from Nazi death camps and eventually reach America.

"Rock, Revere & Revolution." A group of modern city kids sing and dance their way back through history to the time of the American Revolution.

"Jenny and Me." The dramatic story of a boy who follows his father into the coal mines in 1929.

"The Sellin' of Jamie Thomas" (Part I). A slave child and his family make a desperate try to run north.

"The Sellin' of Jamie Thomas" (Part II). Jamie and his family try to begin a new life in a Quaker town.

Now is the time to get complete information about this highly entertaining series. And the fastest way to get it is to call 513/352-5955. Ask for Don Dahlman or Lee Jackoway. They will be happy to present the exciting facts and figures to you.

U.S. agency ready with report highly critical of FCC, broadcaster efforts in EEO

It's already being criticized, however, for use of outmoded data

Awaiting approval by the U.S. Commission on Civil Rights this week is a bulky report that is critical of FCC handling of equal employment opportunity matters, as well as of broadcasting's treatment of minorities and women in programming. Its title: "Window Dressing on the Set: The Portrait of Women and Minorities in Television."

The FCC staff reviewed a copy of the draft and responded, on May 16, with an eight-page letter in turn criticizing the report as being based on insufficient information and data and for taking issue with commission EEO procedures that have been superseded. The commission also supplied CCR with 1976 employment data to permit an updating of the report, which was based on 1975 figures.

What appeared to disturb the staff even more than allegations of inadequate performance by the commission in EEO matters was the section of the draft dealing with the depiction of minorities and women in television programming. The draft, according to the letter, says that although there has been an increase in the number of minorities and women in television programming, accelerated improvement is necessary. And the commission, the draft reportedly adds, should require such improvement, either through its rule-making procedures or on a case-by-case basis.

The suggestion, one commission staff member said privately last week, "is appalling."

The response apparently has had little impact on the CCR staff that prepared the report. Dr. Helen Franzwa, project director, said some changes were made as a result of the new data, but that they were simply in the form of "updating." The changes were not "substantive," she said. "There were no errors or inaccuracies." In fact, she said, the new data "shows the problem is worse" than was indicated by the 1975 data.

And the draft characterized the commission's role as evidencing a "lack of real commitment"—a characterization the commission, in its letter, said was "inaccurate and mistaken."

The commission's staff letter, which was signed by Wallace Johnson, chief of the Broadcast Bureau, criticizes the draft report for basing conclusions on experience at 40 television stations and on statements of four of eight station managers interviewed. The samples in both cases, he said, appear to be inadequate. And he noted that the draft deals with situations existing before the commission began requiring licensees to file EEO programs based on a model 10-point program and implementing new processing guidelines designed to screen out broadcast applicants with inadequate EEO programs.

"In short, we believe that any analysis of the commission's EEO regulation should be based upon the procedures we have adopted this year to strengthen and update our monitoring and enforcement techniques," said Mr. Johnson.

To buttress the argument as to the seriousness of the commission's concern with EEO matters, Mr. Johnson presented statistics: During fiscal 1976, petitions to deny containing allegations of employment discrimination were filed against 499 stations. After a staff analysis of the complaints, 119 stations were subject to further inquiry. And of these, 37 received license renewals conditioned on their submission of periodic EEO reports. In addition, 38 stations were renewed with similar conditions as a result of routine processing.

Dr. Franzwa said that, in the final draft, the new procedures are evaluated in terms of the new data and "their own internal logic" and, she indicated, found wanting. She said "weaknesses" were seen in them.

As for the draft's suggestion that the commission act to increase the number of women and minorities in television programming, Mr. Johnson said that, even putting aside the prohibitions of the First Amendment and the no-censorship provision of the Communications Act, "which are certainly applicable," the recommended approach would create a "regulatory nightmare." The commission "would almost certainly bog down hopelessly if it were to try to... overuse the day-to-day content of entertainment programs, judge role models, second-cast casting decisions, preview scripts, select news stories for coverage, regulate the assignment of reporters to those stories, and select guests and moderators for discussion programs. Surely, however serious the problem may have been (or is), the suggested cure would be worse. Indeed, carried to its logical conclusion, the suggested solution could also lead to the censorship of all free speech."

However, it was not clear last week whether the suggestion to which the staff took such exception is also contained in the section of the draft containing recommendations. Dr. Franzwa said that section was not offered to the commission for comment. However, she did say that the recommendations cover all areas of the report.

The report, in preparation three years ("Closed Circuit," April 1, 1974), will be discussed by the CCR this week.

Because of the size of the report—about 400 pages—it was not clear how soon copies would be generally available, even assuming it is approved in its present form.

Last Avco stations go to King group

Two AM's, one FM complete the emptying of portfolio

Avco Broadcasting Corp., a pioneer group broadcaster, has sold its last three stations—KWA-AM-FM, San Francisco and WRTI-AM Wood River, Ill. (St. Louis)—to King Broadcasting Co., Seattle, for $4 million.

In the last two years, Avco has sold off its group of four AM's, two FM's and five TV's for $59,850,000. Other stations in the Avco group were: WLW(AM)-WLW(TV) Cincinnati; WLW(DT) Dayton and WLW(TV) Columbus, both Ohio; WLW(TV) Indianapolis; WOAI-AM-TV San Antonio; KTX, and WWDC-AM-FM Washington.

The parent company, Avco Corp., announced its intention to sell off its broadcasting subsidiary after reporting a $20.6-million consolidated loss in 1974. Its other divisions include Avco Embassy Pictures, Carte Blanche, insurance and financial concerns and manufacturers of electronic products, airplane engines and farm implements.

King Broadcasting, the principal owners

Brand new WSAZ-TV Huntington (Charleston), WVa., has opened a new $500,000 facility in Huntington. The new building houses sales, news and production operations for the station which airs news from both cities. The main studios and administrative offices remain in Huntington.
BIAS is 163 radio and TV stations in 108 markets.

BIAS is people, too. We’re proud of the people who make our system work in large and small stations all across the U.S. and Canada. And BIAS is service—hassle-free traffic, increased sales and fast billing.

We’ll be glad to give you more information. So will any of our 163 customers. They’re committed to BIAS because we’re committed to them.

Call me, Skip Sawyer, at 901/332-3544.

KY is on 260 kHz with 5 kw day and 1 kw night. KY-FM is on 93.3 mhz with 25 kw and antenna 660 feet above average terrain. WRTI is on 590 kHz with 500 w day and 1 kw night.

R.C. Crisler & Co. was the broker.

Three in Va. on carpet

FCC has ordered a license-renewal hearing for WPCE(AM)-FM Portsmouth and WOW(FM) Norfolk, both Virginia, owned by the Rev. Levi Willis Sr., and a license-revocation hearing for WBUH(AM) Salem, Va., which Mr. Willis doesn’t own but is alleged to operate. One allegation in the first case is that coercion was used in selling time. An issue in the second is whether the licensee of WBUH transferred control to Mr. Willis without FCC approval.

CPB talks future money

The Corporation for Public Broadcasting board last week heard preliminary projections of the nonfederal money public broadcasting is expected to earn and use to secure federal matching funds. The board, meeting in Washington, was told to anticipate the following: in fiscal 1977, $332 million; 1978, $368 million; 1979, $406 million; 1980, $443 million; 1981, $483 million; 1982, $525 million, and 1983, $569 million. The figures, developed by staffers from CPB, National Public Radio and the Public Broadcasting Service, will be used by another joint group in planning a request for a five-year extension of law that is to provide federal matching funds until 1981.

(Present law provides a two-year lead time. Nonfederal money collected in 1978, for example, determines 1980 federal money. With an extension, public broadcasting is facing to pay for a $2 non-federal/$1 federal match, as opposed to the $2.50/$1 current scheme.)

Among other subjects discussed was next month’s CPB’s meeting in Seattle with Western station managers, which will also include a live broadcast scheduled for July 13 by KCTS-TV noncommercial there. On-air, board members will field questions from the public and pay tribute to Senator Warren Magnuson (D-Wash.).

More on WOR-TV. Multi-State Communications Inc. has appealed FCC decision denying its new-station application, which was mutually exclusive with RKO General Inc.’s application for renewal of license for channel 9 WOR-TV New York. Commission, in decision issued on Nov. 17 and affirmed in order denying reconsideration on April 12 (BROADCASTING, April 18), upheld administrative law judge’s finding that Multi-State is financially unqualified to build and operate its proposed station; judge said applicant had not proved it would receive $4 million bank loan. Multi-State’s appeal was filed with U.S. Court of Appeals in Washington.

OAB wants its say. Ohio Association of Broadcasters, Columbus, is forming state task force on proposed renewal of Communications Act by Congress. Group will work with Ohio congressional delegation and present state broadcasters’ views on planned renewal. OAB intends task force to work with National Association of Broadcasters and National Radio Broadcasters Association and other groups interested in review proposal.

New name naming. Institute of Broadcasting Financial Management, Chicago, organization of broadcasters concerned with financial aspects of radio and TV, will be changing its name in late July to call the organization what it is—an association, not an institute.” IBFM active and associate members have been invited through Broadcast Financial Journal, association’s official publication, to enter contest for name. Prize of $250 will be paid for selected name.

Relocated. Manning Slater, president and board chairman, Hercules Broadcasting, Seattle, has moved to Sacramento, Calif., to open new corporate office there at 1337 Howe Avenue, Suite 110; (916) 920-1151. Hercules owns and operates KRAK(AM)-KEWT(FM) Sacramento and KMPH(AM)-KEUT(FM) Seattle.

Pushing percentages. National Black Media Coalition and San Jose chapter of Committee for Open Media are appealing FCC action in proceeding which seeks to establish policy on comparative/license-renewal hearings. Citizen group’s objection is commission’s rejection of proposal that quantitative standards—nonentertainment program percentages—be used to determine whether renewal applicants have earned preference over challengers. Commission calls such standards “simplistic” approach to complicated problem (BROADCASTING, March 14).

Groups, whose petition for review was filed with U.S. Court of Appeals in Washington, contend that, lacking such standards, commission has no objective criteria for judging renewal applicant’s performance.

Double action. FCC granted renewal of KRLK(AM) Centerville, Utah, and permission to assign license to Harold S. Schwartz & Associates for $62,000. Seller was state of Utah, which had foreclosed on previous owner, Davis Broadcasting Co., and Utah loan company. FCC had held up renewal because of “serious questions of fact” involving ownership of Davis, but granted renewal and assignment after Mr. Schwartz demonstrated that none of previous owners would be included in his operation of station. Mr. Schwartz owns KREM(AM) Festus, Mo., and 25% of WTHE(AM) Mineola, N.Y.

Situation rectified. FCC has renewed license of WMLU(AM) Greenville, S.C., until end of regular license term, Dec. 1, 1978. In 1973, FCC had granted short-term renewal conditioned on licensee (Bob Jones University Inc.) refraining from active recruiting at Bob Jones University, school that refuses to admit black students. FCC noted that station’s 1975 and 1976 employment reports showed per-

*Change to great to be meaningful
30-second TV spot—client: Fortunoff's, N.Y.—Director/Cinematographer: Sedelmaier.

The national TV spot could be a hard act to follow. The film look can make a difference.

There's a lot of commercial competition going on during the commercial break, between the polished, expensive national television production and the locally planned and not-so-expensive local spot. Very often, there's a quality gap which can be closed simply and without excessive spending.

The key is creativity—and film helps you keep the freedom and flexibility you need to help sell your client's product. It's simple to use and doesn't need complicated lighting. It's portable and produces images of exceptional quality and excitement.

You don't need a million-dollar budget to look like a million dollars. Get the film look that sells.

For more on the film look and how it's bringing in business for retailers and clients, call or write your local Kodak office.

Eastman Kodak Company, Dept. 640
Rochester, New York 14650
If you'd like to find out more about the power of film for your clients' TV commercials, send for more information, today.

The creative film look. It sells.
PLOUGH BROADCASTING'S WHRK, Memphis, picks a new format and IGM's RAM to make it go!
The new "disco" sound of WHRK requires the capability to program three or four times as many events as the previous format. So, the 100,000-watt, 24-hour station went to IGM with the problem.
The solution is a RAM (Random Access Memory) Control System, three 48-tray instacarts and four reel-to-reel playback units with time announce capability.
Now, WHRK can program 4096 events—enough for seven days—and, at the same time, "flag" certain events to insert spot changes quickly.
WHRK is only one of five Plough Broadcasting stations to install RAM systems.
The whole story is in IGM News, No. 2-77. Send it for today.

The new "disco" sound of WHRK requires the capability to program three or four times as many events as the previous format. So, the 100,000-watt, 24-hour station went to IGM with the problem.

WORTHBUYING MGS, Sonderling Broadcasting Corp., Miami, will purchase 60% interest in MGS Services now held by Teletronics International. Purchase will be executed as of June 30, 1977, under terms of option agreement, for $1.5 million cash. Joint venture of Sonderling and Teletronics, MGS is distributor of television commercials.

Outlet has Flair. Outlet Co., Providence, R.I.-based group station owner and retail firm, is acquiring Flair Inc., eight-store women's specialty chain in Richmond and Newport News, both Virginia. Bruce Sundlun, president and chief executive officer of Outlet, said annual sales volume of Flair is $4.5 million. Mr. Sundlun made announcement of purchase June 2 while preparing to address Boston Stockbrokers' Club, where he said that he expects Outlet to be $500-million company with $20 million in income after taxes by 1982.

Academic projects funded by the NAB
The National Association of Broadcasters has awarded nine grants for research in broadcasting for 1977.
The winners, who receive out-of-pocket expenses for their work, are: Charles Atkin, Michigan State University, for "parental interpretation of television violence for child viewers;" Mu-Lan Hsu Cheng, Ohio State University, for "older Americans, commercial radio and commercial television;" Erik L. Collings and Lisa A. Fortini-Campbell, Ohio State University, for "elements of 'happy talk' on informal radio: the effects of content repetition, announcer interaction and vocal expression on retention and preference of radio news broadcast;" Felipe Korzeny, Michigan State University, for "styles of parent-child interaction as a factor in children's social learning from television violence;" Richard P. Neilsen, Boston University, for "managing slander protection;" Eugene F. Shaw, University of Tennessee, for "the all-news radio stations; airing the facts behind the news format;" Stuart H. Surlin and Alan Wurtzel, University of Georgia, for "viewer attitudes toward television advisory warnings;" Jacob J. Wadslag, Indiana University, for "stability in and noncontent factors affecting program ratings for children;" Robert E. Yaden, Michigan State University, for "financial behavior of standard metropolitan statistical area radio markets between 1965 and 1974;"

Another no-show for Conrad in court
Ex-chairman of RCA misses session on tax charges

Legal problems for former RCA Board Chairman Anthony L. Conrad cropped up last week after he failed for second time to appear for arraignment in Manhattan Criminal Court on income-tax evasion charges brought by the state of New York. Mr. Conrad resigned as chief executive officer of RCA last fall (Broadcasting, Sept. 20) after acknowledging he had not filed federal, state or local income taxes for five years through 1975. The state lodged the misdemeanor charge against Mr. Conrad in March, claiming he owed taxes for the years 1973 through 1975. He was scheduled for arraignment in April but did not appear and his attorney got the arraignment postponed to last week (Broadcasting, April 18). His attorney, Boris Kostelanetz, argued
304. AUDIO CONTROL HANDBOOK—for radio and television broadcasting, 4th edition. Revised and Expanded by Robert S. Quinlan. Closely following the format of the three earlier editions, the fourth has been almost entirely rewritten. Reflects changes in equipment and techniques, while digging deeper into all technical and electronic aspects of audio operation. 192 pages, illustrated. $10.00

306. RADIO BROADCASTING: An Introduction to the Sound Medium, Revised Edition by Irving E. Fang, Revised. 478 pages, 100 illustrations, notes, bibliography, appendices, glossary. $10.95

308. COLOR FILM FOR COLOR TELEVISION by Rodger J. Ross. Currently available color films and processes which enable television producers to meet different program requirements. 200 pages, 6 1/2 x 9 1/2, 75 diagrams, 7 photos. $12.90

310. DOCUMENTARY IN AMERICAN TELEVISION: Form - Function - Method by A. William Bluem. A critical examination of the documentary movement in American television. 312 pages, 6 1/2 x 9 1/4, illustrated, appendices, notes. $8.95

311. THE TECHNIQUE OF TELEVISION PRODUCTION, 9th Revised Edition by Gerald Milliston. How revised and updated throughout to reflect the latest techniques and with a new chapter on color TV, this book consolidates its leadership as the standard in the field. 440 pages, 1,160 Illustrations, bibliography. $14.95

312. THE FOCAL ENCYCLOPEDIA OF FILM AND TELEVISION: Techniques edited by Raymond Spottiswoode. Major reference work of 10,000 entries—will eventually comprise three or four volumes. 1,124 pages, 6 3/4 x 9 1/2, 1,000 diagrams, index. $37.90

313. THE TECHNIQUE OF THE SOUND STUDIO, Radio, Television, Recording, 3rd Revised Edition by Alec Hinchliffe. The basic approach of this widely-used text and guidebook emphasizing general principles rather than rule-of-thumb, has the latest technological developments. 558 pages, 5 1/2 x 8 1/2, 234 diagrams, glossary. $14.50

315. REBEL IN RADIO: The Story of WQXR by Elliott M. Sanger. This is not a technical book about radio, but the story of the many memorable events and personalities that shaped the station's history and how, despite great odds, WQXR made a notable place for itself in the history of broadcasting. Filled with interesting and instructive details of day-to-day station operations. Gives a vivid picture of the development of broadcast techniques over more than three decades. 192 pages, illustrated. $7.50

316. THE BROADCAST COMMUNICATIONS DICTIONARY edited by Lincoln Diamant. Pulls—at your fingertips—some 2,000 technical common and slang words in depth. Based on the latest usage and vocabulary on both sides of the Atlantic, ... many coined during the last decade. Including familiar words that mean the same thing (and the same words that mean different things) in English-speaking countries everywhere. An extremely useful tool. 128 pages. $8.95

317. THE LENS IN ACTION by Sidney F. Ray. Combines a review of the state-of-the-art for lens design with a survey of modern lenses and their application. The limits of specific lens designs and the requirements for special lenses are discussed. (Nature Mexico). 160 pages, 5 1/2 x 8 1/2, 64 pages of diagrams, glossary further readings. $7.95

318. VIDEOTAPE RECORDING: Theory and Practice by J.J. Robinson. Provides a comprehensive coverage of the whole field for the student and the professional. Discusses VTR equipment in current use, closed-circuit systems, materials on cassettes and cartridges, and a chapter on editing. (Library of Audio and Social Technology). 220 pages, 6 x 9, graphs, diagrams, bibliography, glossary. $18.90
at the hearing last week that Mr. Conrad was a resident of Maryland during the years in question and was not subject to New York state tax laws. The state replied that Mr. Conrad had voted in New York in 1973 through 1975.

Judge Jerome Vale postponed the arraignment until Thursday (June 16). He ruled that the June 16 hearing would decide whether a crime had been committed and ordered Mr. Conrad to appear in court or give his attorney a waiver in writing.

Under state law, if Mr. Conrad is found guilty of willful failure to file state income-tax returns, he could face penalties of one year in jail and a $1,000 fine, or both, for each of three counts on which he is charged.

When he resigned last fall, Mr. Conrad told the RCA board of directors that his five-year tax obligation had totaled $704,292, of which $684,618 was paid through payroll deductions and the deficiency of $19,674, plus interest of $1,429, was paid subsequently.

An independent investigation of Mr. Conrad's tax situation, conducted late last year at the behest of RCA, found that Mr. Conrad's failure to file personal income taxes was in no way related to the company's business. Neither the Internal Revenue Service nor the New York City Department of Tax Collection has taken any action against the former RCA chairman.

Universal goes abroad with largest portfolio from fall line-ups

It has most shows to sell in international market from new-season schedules; nonproducer Viacom is next

By virtue of its position as the leading supplier of prime-time programs on the three networks' new fall schedules, Universal Pictures Television is also the largest international distributor of television series.

Not counting the wide range of made-for-TV movies and miniseries Universal will put in production for the 1977-78 season, the company has 12-hour's worth of regularly scheduled series for sale outside the U.S. These include perennial big sellers such as The Six Million Dollar Man, Kojak and Baretta—all of which have been renewed for another season in prime-time—and a new series like NBC's The Oregon Trail, which is expected to do well in foreign markets because it will be the only 60-minute western, still a popular overseas, on the networks' schedules.

The major studios, like Universal, Warner Bros. and Paramount, automatically distribute the shows they produce themselves, but the bulk of the independent producers have also assigned the international syndication rights to their programs.

Viacom International has the lead among companies that do not actual prime-time production of their own but sign distribution deals with independent producers for foreign-syndication rights. A total of six hours of next fall's prime-time CBS schedule (Viacom is not involved in any ABC of NBC shows) will be syndicated abroad by Viacom: the veteran cop show, Hawaii Five-O, CBS News's 60 Minutes, the new one-hour Ed Asner Show, four returning sitcoms (All in the Family, The Bob Newhart Show, Rhoda and The Tony Randall Show) and two rookie sitcoms (The Betty White Show and We've Got Each Other, both from MTM Productions, which assigns all of its shows to Viacom for distribution within and outside the U.S.).

Two other major studios—Warner Bros. and Columbia Pictures Television—are well represented on the prime-time schedules because they've supplemented their own product with that of a few independents. Warner has a total of five-and-a-half hours, three-and-a-half of which are in-house productions: Wonder Woman, Alice, Rafferty and The Fitzpatricks. These are augmented by domestic and foreign distribution rights to Lorimar's The Waltons and two Jimmy Komack/David Wolper sitcoms, Chico and the Man and Welcome Back, Kotter.

Columbia managed to land only one regularly scheduled series on the networks' prime-time schedules, Police Woman on NBC. (Police Story will be back on NBC as an occasional two-hour dramatic special.) But Columbia has secured international distribution rights to Quinn Martin's Barnaby Jones; to a pair of sitcoms from Danny Arnold's production company, Barney Miller and Fish, and to the new Witt/Thomas/Harris sitcom on ABC, Soap.

By signing an exclusive international syndication deal with Spelling-Goldberg, Metromedia Producers Corp. has the rights to four hours' worth of next fall's prime-time schedules, all of them on ABC: Starsky and Hutch, Charlie's Angels, Family and a new series Mr. Spelling is producing on his own, The San Pedro Bums.

Another independent syndicator that's exclusively in the distribution business (it doesn't produce any shows for network prime time), Worldvision Enterprises, has three fall series for international sales: NBC's The Little House on the Prairie, Lorimar's Eight is Enough and Spelling-Cramer's Love Boat.

Rounding out the major studios' line-ups, MGM Television landed one new 60-minute series on CBS, Logan's Run; a new hour on NBC, CHiPs; and received a guarantee from ABC for production of 10 new two-hour episodes of How the West Was Won. Paramount Television has three...
WTEV New Bedford-Providence now represented by Katz American Television
returning sitcoms in its hopper: *Happy Days* and *Laverne and Shirley* on ABC and *Bustling Loose* on CBS. Twentieth Century-Fox Television got CBS to renew *M*A*S*H* and sold a new 60-minute series to CBS, *Young Don't Boone*. All of these series will be distributed internationally by the respective major studios, and Walt Disney's Buena Vista Productions will continue to handle *The Wonderful World of Disney*, going into its 17th year.

Two active independent producers—Norman Lear's TAT Communications and the company headed by Bud Yorkin, Saul Turtletaub and Bernie Orenstein—parcel out international distribution rights territory by territory. Both use Dana Murray in Canada and, for many of their shows, a company called Pacific Telecasters in Australia. They use different distributors in Europe. Bud Yorkin deals in Japan with syndicator Banjiro Usamura.

Filmways International, which sold *The New Hawaiians* to NBC, its first prime-time series in many years, will distribute it abroad, and Taft/H&B Productions, which sold its first prime-time series ever, NBC's *The Man from Atlantis*, will also handle its own foreign syndication.

Finally, a British company called Thames Television has foreign distribution rights to Nicoll, Ross and West's *Three's Company* sitcom on ABC because the series is adapted from a hit British comedy called *Man About the House*, which was originally produced by Thames.

---

**Norman Lear gets into off-network business**

His companies will begin syndicating *Maude*, *Good Times* and *Sanford*

Norman Lear's Tandem/TAT has taken the wraps off three of its strongest sitcoms—*Sanford and Son*, *Maude* and *Good Times*—and will begin offering them in syndication this week.

It's the company's first foray into the off-network rerun business, with 146 episodes of *Sanford* available for the fall of 1978 and 142 episodes of *Maude* available for fall 1978 (or, if it's renewed next year by the CBS network, 166 episodes for fall 1979). *Good Times* could be available as early as the fall of 1978 (109 episodes) or as late as the fall of 1980 (157 episodes), depending on whether CBS keeps renewing it or not. The company produces and syndicates two first-run serials, *Mary Hartman, Mary Hartman* and *All That Glitters*.

Gary Liebenthal, Tandem/TAT's vice president for syndication, said his research shows that *Sanford* is "the highest-rated show ever offered in syndication," having "averaged 30-plus ratings for three full years" on NBC. The presumption is that, at least with *Sanford*, Tandem/TAT will be asking stations to pay the kinds of record prices that they paid late last year forPara-

**ABC returns MPAA's fire**

Motion picture group's comments to FCC described as ploy to corner market for its members

ABC said last week that the Motion Picture Association of America's filing with the FCC against the networks *(BROADCASTING, June 6)* "vividly demonstrates the personal avarice of the major Hollywood producer-participants, and is void of any public interest concern."

In a statement, ABC said it "rejects all charges advanced by MPAA" in its filing, which asked FCC to tighten the limitations on the networks in their dealings with program producers.

"Existing ABC contractual arrangements with MPAA members and independent producers are consistent with all FCC rules and in the public interest," the statement said. "MPAA apparently seeks to use the FCC inquiry to bring about a captive market for the programs its members produce and to force price increases for those programs."

"ABC believes it would be unfortunate for the American viewing public if programming discretion were turned over to unlicensed movie companies. Under federal law, programming decisions are properly entrusted to those who are licensed to serve the public interest."

"ABC welcomes FCC consideration of MPAA's unfounded charges, and believes the commission will find them to be wholly without merit."

---

**Program Briefs**

**Pro grid series.** NFL Films and its distributor, Pro Sports Entertainment Inc., New York, are lining up TV stations and sponsors for three half-hour barter-syndication properties. First two—*The NFL Games of the Week* and *This Is the NFL*—will be ready in mid-September for telecast throughout end of football season in January. Third—*NFL Great Teams, Great Years*—contains 34 half-hour nostalgia features to run from January through September 1978. There'll be three national minutes in each half-hour and three minutes for stations, which will get programs free.

**Bock's new enterprise.** Lothar Bock, West German producer who secured U.S. broadcast rights to 1980 Olympics for NBC, is forming a production company, One World of Sport, to be based in Monaco. President is to be Samuel Leitch, head of television sports programming for British Broadcasting Corp. Mr. Leitch will not be working for NBC, as had been speculated, and network has no immediate deal with Mr. Bock's new company.

**Anti-pirating move.** Thieves who deal in pirated prints of theatrical- and made-for-TV movies were warned on notice by Frank Peterson, vice president and "treasurer of Warner Bros. Pictures, that he'll offer $5,000 reward to anyone whose information leads to arrest and conviction of film pirates. Mr. Peterson says he believes it's first time major studio has ever posted this kind of reward; he adds that bootleg prints, particularly those distributed illegally, are abroad, cost studios tens of millions in lost revenues each year.

**T-L movie package.** Time-Life Television has bought U.S. syndication rights to reruns of 41 made-for-TV movies produced by ABC-TV's Hollywood production arm. Titles include "Love Among the Ruins" (starring Laurence Olivier and Katharine Hepburn), "The President's Plane Is Missing" (Raymond Massey, Peter Graves), "The Man" (James Earl Jones, Burgess Meredith) and "The Night They Raided Minsky's" (Darren McGavin). Nine are two hours in length; rest are 90-minute movies.

**Black barter.** New syndicated barter television series directed toward black women premiers later this month. Called *For You Black Woman*, half-hour weekly series (39 episodes are contemplated) is being taped in New York by Perin Enterprises Inc., with Richard Perin as executive producer.

Series is financed by Nicholas Products, which will take two-and-a-half minutes in each half-hour for its line of cosmetics for black women. (Ad agency/distributor is Gerber/Carter Communications, New York.) Stations get series free and are accorded three-and-a-half minutes to sell spot or local. Twenty stations have accepted so far, among them: WDAF-TV (Kansas City), WPHG-TV (Pittsburgh), WCIX-TV (Cleveland) and WXIA-TV (Atlanta). They'll play it mostly in Saturday and Sunday morning time periods, according to sources.

---

**RIAA reports sales record of $2.74 billion in '76**

The Recording Industry Association of America announced that manufacturers' sales of phonograph records and pre-recorded tapes hit an all-time high in 1976 of $2.74 billion from unit sales of 592 million. That compared to $2.39 billion for 533 million units in 1975.

Sales of record albums in 1976 rose by 12% to $1.663 billion, compared with $1.485 billion the year before. Singles rose by 47% to $1.485 billion, compared with $1.663 billion the year before. Singles rose by 47% to $1.485 billion, compared with $1.663 billion the year before.

Dollar sales volume of cassette tapes increased by 47% to $145.7 million and eight-track cartridges accounted for $67.2 million, up 16%. Quadraphonic reel-to-reel tape sales declined in 1976.
Jacobs says ABC-TV will hold its lead in next season

He sees four-point spread between it and last-place NBC; last year he missed on place and show predictions

Herb Jacobs predicted last week that the 1977-78 prime-time schedules would go down in television history as the second year of "the ABC dynasty."

When the first 13 weeks of next fall's line-ups have run their course, he said, ABC will have established a 21.8 rating, CBS a 19.2 and NBC a 17.9.

Mr. Jacobs is president of Telicom Associates, a firm of broadcast consultants. He works out of Palm Springs, Calif., although the company is based in New York.

The magnitude of ABC's dominance, he continued, will be reflected in the night-by-night averages. ABC will win Tuesday, Wednesday, Friday and Sunday during the fourth quarter and finish even with CBS on Thursday, according to his forecast. NBC, he said, will capture Monday, and CBS will be first on Saturday.

Mr. Jacobs is putting his money on three new series to wind up first in their time periods: CBS's The Betty White Show (Monday, 9-9:30 p.m., NYT), ABC's Soap (Tuesday, 9:30-10 p.m.) and CBS's Lou Grant (Tuesday 10-11 p.m.). He's also predicting a few surprise successes among returning shows next fall, giving Eight Is Enough (Wednesday 8-9 p.m.) and Starsky and Hutch (Saturday, 9-10 p.m.) and ABC, Barnaby Jones (Thursday, 10-11 p.m.) on CBS and The Bionic Woman (Saturday, 8-9 p.m.) on NBC first place in their time periods.

Also surprising, Mr. Jacobs said, is that a total of nine holdover programs will probably end up last in their time periods. Five of these losers will be on CBS, he continued: Maude, Kojak, Switch, Wonder Woman and Busting Loose. Of the other four, two are ABC shows (Fish and The Hardy Boys/Nancy Drew Mysteries) and two NBC (Police Woman and CPO Sharkey).

Mr. Jacobs's crystal ball was a bit fuzzy at this time last year when he said that by Dec. 19, 1976, ABC would have a 20.3 rating, CBS a 19.1 and NBC an 18.0 (Broadcasting, May 10, 1976). He turned out to be right about ABC on top (although its rating was a heftier 20.9) but wrong about the second- and third-place finishers. NBC was actually in second place on Dec. 19, with a 19.6 rating, and CBS was third, with an 18.7. (CBS overtook NBC during the first week of February 1977 and wound up in second place by the mid-April cutoff point of the 1976-77 season.)

The accompanying charts show the new prime-time schedule with, half hour by half hour, Mr. Jacob's share predictions. New programs are indicated by an asterisk(*)

Broadcasting June 13 1977

53
AP meeting told powers will shift in broadcasting over next 10 years

Future forecasts are part of varied program in St. Louis

Problems of news coverage today and new directions for the future were explored at the four-day convention of the Associated Press Broadcasters which ended on June 4.

More than 400 news executives, meeting in St. Louis, heard Fred Walker, president of Broad Street Communications, New Haven, Conn., predict a decline in network influence and a growth of pay television as the blockbuster medium. In 10 years, Mr. Walker said, public broadcasting will also be a "force to reckon with." By then, the government will permit the use of noncommercial stations for institutional messages "for 90 seconds out of every 60-minute program—just like the op ed page of the New York Times."

Incentive compensation will be paid to advertising solicitors for public TV, he said.

Free television stations will seek out specialized audiences for lower-budget shows than those now on the air, said Mr. Walker. "TV will learn," he said, "as radio and magazines have learned, you can do very well by appealing to a specific target audience."

By 1987 distinctions between AM and FM will have disappeared, said Mr. Walker. It will be "just radio," he said, "each station in its market doing its own thing."

During a panel session on "Terrorism, Kidnapping and the Media," Sam Zelman, executive director of news for WILDA TV Washington, said he would discourage any attempts at self-imposed media guidelines to deal with this coverage area. He stated that self-censorship leads to an interruption of a free flow of information and "could start rumors flying." He added that coverage of terrorist activities does not incite to violence, as some claim, but rather helps "vent the terrorist's frustration and defuses his sense of violence."

Bill Ellingsworth, director of public affairs for the International Association of Chiefs of Police, said his organization supports a policy of "completely informing" newsmen of what is going on during hostage sieges. He acknowledged during the question-and-answer period that in some life-and-death situations, police might withhold information to facilitate the safe return of the hostage.

Richard Morris, a representative of the American Bar Association, said that in terrorism stories lawyers and the law cannot be of much help to reporters. He urged newsmen to remember that "the media aren't in business for themselves but to serve the public interest under the First Amendment."

Bill Small, CBS News senior vice president and director of news, said critics should do less worrying about the quality of broadcast news and should "start looking at all the newsmen." Mr. Small said that broadcast news is improving but "we really need more than a half hour to do the news at night and we need more staff locally." Mr. Small acknowledged he "worries some" about broadcast news but said he is beginning to worry more about newspapers.

"Newspapers in the next 10 years will present more of a dilemma to the American public that want information than we as broadcasters ever did," he contended.

FCC Chairman Richard E. Wiley told the group that during his seven years at the commission a speed-up in processing business has taken on new importance. Mr. Wiley, whose term expires this month, said he can't guarantee that the FCC will continue to move toward increased deregulation.

Ann Compton, White House correspondent for ABC News, said access to key officials in Washington remains difficult but should loosen up when the administration gains more confidence.

Robert Trout, special counsel for the FCC for ABC News, won the Robert Eunson award, which honors the memory of the vice president and assistant general manager in charge of broadcasting for the AP who died in 1975. Mr. Trout was cited for more than 40 years of service to broadcast journalism.

Representative Lionel Van Deerlin (D-Calif.) said the local community should be involved in the discussions of renewing television and radio station licenses. He said he would be willing to let a federal commission and the community decide if the broadcaster has done a good job in covering all issues fully.

Mr. Van Deerlin, who is chairman of the House Subcommittee on Communications, stressed there are "so many voices available" in radio that he doesn't believe "we need ... seven commissioners back there in Washington looking over the shoulders of every broadcaster in America."

Texas news crews suffer beatings

Four assaulted in two incidents in which equipment is destroyed during coverage of union story

Four Dallas newsman, two from KDFW-TV and two from WFAA-TV, were beaten June 5 outside Teamsters Union offices there while covering a union meeting. Jack Weber, cameraman for KDFW-TV, suffered a broken nose on the head. Greg Lefevre and WFAA-TV cameraman Mike Coscia and reporter Byron Harris were treated at a local hospital for face injuries.

The incident began with Messrs. Weber and Lefevre outside the union hall covering the return of the two dissident union members who, for two years, have been challenging expenditures by officers of the Teamsters Local 745. (At last month's union meeting, the two members, William Williams and Hall Nichols, were beaten and June 5 was the first time they had tried to return since.) One man from a group of onlookers, according to Mr. Lefevre, attacked Mr. Weber, grabbed his video-tape camera (an RCA model worth approximately $38,800) and smashed it to the ground destroying it. Mr. Lefevre said that he was then pushed against a nearby wall and his cassette tape recorder was destroyed.

Messrs. Harris and Coscia, who arrived an hour later from WFAA-TV to cover the meeting, were said to have received similar treatment. Mr. Harris has been covering the Teamsters for some time. He said he was the first and only reporter—print or broadcast—to do investigative reporting on the union and has won an award from the Texas AP Broadcasters for his work. (The WFAA-TV video-tape camera destroyed was an Ikegami model, worth about the same as the RCA.)

Both the RCA and the Ikegami were rolling when the beatings took place. Mr. Lefevre said, and positive identifications of the assailants were made and assault complaints filed.

Tell all. House Commission on Administrative Review plans review of more than $1 million in services Congress provides to news organizations gratis, according to its chairman, David R. Obey (D-Wis.). Representative Obey also wants to sponsor bill requiring news organizations and their reporters to file financial disclosure statements showing outside interests that could reflect on impartiality. He characterized as "cheap garbage" stories that condemn fringe benefits received by members of Congress without mention of reporters' benefits. Representative Obey has been subject of such stories. Among press benefits: space, telephones, office equipment and staff aids.

Boom-bopped. Crush of media coverage of President Carter's return to Plains, Ga., two weeks ago led to assault charge against ABC sound technician for concocting Newsweek photographer on head with boom mike. Bernard Gofryd, Newsweek man, charged ABC technician Robert Funk with assault in Sumter county court in Georgia. Justice of Peace J.W. Southwell allowed Mr. Funk, who denied charge, to go free pending trial after posting $300 bond.

ASCEF persists. FCC rejection of fairness complaint against CBS over its coverage of national security issues was attacked by American Security Council Education Foundation (ASCEF) chairman J.W. Carter, of Washington. Foundation said its study of network's programming between 1972 and 1976 shows failure to afford reasonable opportunity for presentation of contrasting views on security issue. ASCEF contends Soviet Union is outstripping U.S. in armaments.

Broadcasting June 13 1977 54
CBS innovation with video tape promises new era in production of entertainment

Production-editing system could outperform film on shooting stage; increased quality, lowered costs and shorter lead-time for series expected with network's new set-up

A new video-tape production and editing system designed as an alternative to film in the production of television entertainment series was announced last week by the CBS Television Network. The system will be put to use next month at the CBS Studio Center in Los Angeles, a facility until now devoted to film production.

The system's first application will be on two situation comedies out of MTM Productions, the Betty White Show and We've Got Each Other. New shows on the CBS-TV schedule next fall.

The disclosure was made by Joseph A. Flaherty, CBS-TV vice president, engineering and development, at the 10th International TV Symposium in Montreux, Switzerland. The system comprises four Sony BVH-1000 helical video-tape machines, four Thomson-CSF 1515 studio cameras and a post-production switcher housed in a specially designed trailer that can be moved from one sound stage to another.

There is no control room. Directors will work on the stage floor as in filming.

Four of the Sony VTR's will record the output of the four cameras. The fifth is to be used in assembling the first postproduction edits (some 80% of the total editing required). Final edits will be made with conventional video-tape techniques after transfer to two-inch quadruplex tape.

The new system represents the first challenge of video tape to film on the latter's turf: the sound stages that are the principal components of Hollywood's production plant. If the CBS-TV development meets the ambitions that Mr. Flaherty ascribed to it last week, it is bound to spread to the Universals, the Paramounts, the Warners and the others that supply the bulk of television entertainment.

The first application: those situation comedies that are now produced on film with the multiple-camera technique.

The hope: that the taping technique, when coupled with more sophisticated editing equipment, will eventually replace film in the production of action and more elaborate dramatic shows now produced with Hollywood's classic single-camera technique.

Mr. Flaherty estimated that the new taping technique would effect a 40% reduction in below-the-line costs. That could mean a $30,000 weekly saving for a half-hour series carrying a below-the-line average now of $75,000 a week—three-quarters of a million dollars for a 24-episode season.

Last week's announcement signaled at least one network's belief that helical-scan video tape, which saw its first professional use in electronic news gathering, has now progressed to the point of challenging 35-mm film for production quality. ENG until now has been compared to 16-mm film quality.

Mr. Flaherty showed side-by-side tests of 35-mm film, one-inch helical tape recorded off a Thomson 1515 camera and one-inch helical tape taken from a Thomson microcam. All three were recorded on a Bob Newhart Show set, the film camera being the one regularly used on that series. The version taped with the Thomson 1515 camera was considered to be at least equal in quality and perhaps superior to the 35-mm version when played on the monitors at last week's symposium. The microcam version was judged to be of lower quality.

Among the more conspicuous benefits seen in the new technique, aside from the cost savings, is that it could shorten by six weeks to two months the lead-time for a TV series, no small consideration in the new network scheduling practices that call for program changes constantly through the year.

Mr. Flaherty told Broadcasting that another advantage of the new technique is that it can be applied by the production skills now devoted exclusively to film.

Agreements worked out with Hollywood unions over recent years now permit the use of video equipment on sound stages formerly reserved for film under contracts with the International Alliance of Theatrical Stage Employees.

Wire services may go to air for distribution by satellite

Savings of $11 million a year below AT&T seen by AP and UPI

A plan to distribute their news services to radio stations and newspapers via satellite instead of AT&T facilities is being explored by AP and UPI, and both wire services are urging their members and clients to give it sympathetic study.

David Bowen, AP vice president and director of communications, disclosed the plan in a speech at the AP Broadcasters convention (also see page 54). He said it would cost the wire services about $1 million a year, plus operating expenses, while eliminating $12 million of their combined AT&T bills. Some of the savings, he said, would be passed along to participating broadcasters and newspapers.

The broadcasters and newspapers would put their own receive-only earth stations under the plan—at a cost of about $5,000 each, according to estimates presented by Mr. Bowen. Each earth station would be capable of receiving both hard-copy and audio news reports from both AP and UPI and would have a potential for additional services. No thought has been given to the prospect of making them capable of handling television transmissions, Mr. Bowen said later.

What will prove to be a bigger expense than the estimated $5,000 for each earth station, he told the APB convention, is the cost of getting a license to use it—unless some shortcut can be found "through the regulatory maze." But he said the services' satellite group had met with the FCC staff and was encouraged by its interest in and invitation to submit "a prototype application." He added that Chairman Richard Wiley had indicated that he, at least, was disposed to cooperate.

Mr. Bowen told the APB group that a new AT&T rate increase was slated to go into effect last Wednesday "unless delayed" and that it would cost the AP $2.1 million a year, or an increase of 70% in the rates for these one-way distribution networks. UPI faces a similar AT&T increase.

Actually the new rates were "delayed" by AT&T, at least until June 21. They would go into effect when AT&T discontinued its Telpak bulk private-line service, which had been set for June 21. However, AT&T notified the FCC last week that it would continue Telpak until June 21 and would continue it thereafter if the commission would exempt it from certain resale and sharing provisions.

Mr. Bowen said that the AP, UPI and the American Newspaper Publishers Association had been meeting on the satellite
question since last year, have conferred with earth-station suppliers and have conducted experiments bouncing AP and UPI signals off an RCA satellite in orbit and receiving them on a six-foot dish.

Further experiments, Mr. Bowen said, will be conducted at the ANPA convention this week at Anaheim, Calif., and he and his UPI counterpart—James Darr, vice president for systems development—"will keynote that convention talking up satellites [and] doing there what I am trying to do here: trying to promote your interest and enlist your cooperation in satellite distribution." If the move to satellites is undertaken, he said, specifications for the small earth stations would be approved by a committee of representatives of AP, UPI and the broadcasting and newspaper industries. He said indications are that as many as 8,000 earth stations may be needed and that by dealing with a single supplier the consortium might get them for around $4,000 each, plus shipping and installation costs of about $1,000 each.

Purchase, installation and maintenance of the earth stations and their supporting electronics would be borne by the individual broadcasters and newspapers, while the wire services would continue to be responsible for their terminations. The wire service would rent one satellite transponder with 24 voice-grade channels at an annual cost estimated at about $1 million.

"Using our satellite and your earth stations," he told the broadcasters, "we can discontinue thousands of miles of leased circuits. We will cut the wire-service telephone company bill by $12 million a year."

"At that point we are jointly ahead by $11 million annually. We will have some new expenses operating in the new configuration. But a portion of the $11 million can be turned back to the newspapers and broadcasters who installed earth stations."

"I think that if everybody cooperates we could, on this basis, finally gain control over the rising communication costs which have battered us since 1971."

If broadcasters and newspapers agree, he suggested, a trial run would be possible within six to 12 months. But he emphasized last week that it would be necessary for all or virtually all of AP and UPI members and clients to participate to the extent of getting their own earth dishes. Otherwise AT&T distribution lines would still be needed to serve whatever stations and papers failed to participate.

Reactions thus far, Mr. Bowen said, have been "very enthusiastic," especially from newspapers. "We had been worried about small broadcasters, and still are [as to whether they feel they can afford the earth-station outlays]," he added, but said response at the APB convention was "very encouraging."

CBS lab finds way to double capacity of one TV channel

Two signals transmitted as one and separated at reception

Three engineers working at the CBS Technology Center in Stamford, Conn., have been granted a patent for a technique of transmitting two color television signals simultaneously on a single channel and then splitting them back into two at the reception point.

The system, known as STRAP, Simultaneous Transmission and Recovery of Alternating Pictures, was developed by Arthur Kaiser, the center's manager of television development; Henny W. Mahler, senior program engineer at the center, and Renville H. McMann Jr., president of Thomson-CSF Laboratories, Stamford.

According to Mr. Kaiser, the encoder will take any two program sources (video tape, camera, slide, etc.) and using a delay technique fit them both in the same bandwidth of a normal channel so that the signal can then be sent via microwave, land line, satellite or video taped (either quad or helical). Then a decoder will separate the signal, revealing the original two channels.

Impetus for the plan, which has been in the works for about two years, came from CBS's growing involvement with electronic newspapering, according to Mr. Kaiser. With the large volume of news feeds coming into the network's New York headquarters just before the news shows go on in the evening, and the limited availability of channels on satellites from Europe, a more efficient method of transmission was wanted, one that would also accommodate late-breaking stories.

Transmission tests of the system have been made among Washington, Los Angeles and New York using both land lines and satellites with picture quality said to be acceptable for broadcast.

The technique doubles the volume of material that can be sent over a transmission circuit.

On guard. Widget Works, Medina, Ohio, is offering Automatic Transmitter Operator control device for automatic transmission system. Microprocessor-based unit monitors and controls power, modulation and hours of operation. Single unit can handle up to four transmitters for AM-FM combination with proper options. Remote control with wire line, STL or subauble links is build-in option. Prices start at $4,500 and vary with required configuration and options.

Going up. RCA Picture Tube Division, Lancaster, Pa., reports 4% increase in price of 25-inch (diagonal) color TV picture tubes, effective Aug. 1, with 25-inch 90-degree delta gun tube going from $78 to $81. Price hike attributed to continued rising costs and to large investments in new equipment and in development of new tube types.

In writing. Corporation for Public Broadcasting and consortium of banks, led by Bank of America, San Francisco, have finalized contract for $32.5-million line of credit to be used toward $39.5-million public broadcasting satellite interconnection. Signing follows CPB board's full project approval last month (Broadcasting, May 16). Bank of America is acting as agent for itself, Riggs National Bank, Washington; Chemical Bank of New York; Wells Fargo Bank of San Francisco, and Union First National Bank of Washington (D.C.).

Via satellite. Senate last week is said to have conducted first full hearing by satellite as witnesses' testimony from Springfield, Ill., was brought to Capitol Hill by U.S./Canadian CTS. Hearing was conducted by Science, Technology and Space Subcommittee on legislation to establish national climate program. Satellite experiment was conducted on other side of Capitol Hill last summer during cable hearings by House Communications Subcommittee (Broadcasting, July 26, 1976).

RCA unvelings in Chicago

RCA Corp. demonstrated three developmental tubes last week that are part of an announced $50-million program to be spent over the next few years to produce improved color picture tubes.

Shown at the Chicago Spring Convention of the Institute of Electrical and Electronics Engineers were a 19-inch (diagonal) 90-degree high focus voltage, bipotential in-line gun tube; a 25-inch (diagonal) 100-degree high focus voltage, bipotential in-line gun tube and a 25-inch (diagonal) 100-degree tripotential in-line gun tube.

Joseph H. Coigrove, division vice president and general manager of RCA picture tubes, said the $50 million allocated will be for new products, automation and improvement in productivity, quality, performance and reliability.

Technical Briefs

Two from one. At left, the two signals are combined as one image; the succeeding photographs are the signals as separated by CBS Technology's STRAP system.
These are the top songs in air-play popularity as reported by a select group of U.S. stations. Each has been "weighted" in terms of The Pulse Inc. audience ratings for the reporting station on which it is played. A ▲ indicates an upward movement of five or more chart positions between this week and last.

Teen-age idol. Shaun Cassidy, following his family's tradition, has become a star, not only of television (co-star of ABC's Nancy Drew Hardy Boys Mysteries), but of the record industry as well. Da Doo Ron Ron (Warner Bros.) is this 18-year-old's first U.S. release and it's proving itself a mover, as it did back in the early sixties when Phil Spector produced the song for the Crystals. Shaun's version entered "Playlist" less than a month ago and has bolted every week since (this week moving into the top 10). Requests for Da Doo Ron Ron come mainly from teenagers, according to many of the stations surveyed by Broadcasting. It hit the top spot at KRXV/AM Salt Lake City, Sandy Jones of WXIX/AM Oklahoma City reports it as the "biggest record I've got going right now. Doing just super good." It's the same story in Europe and Australia as well where his first two singles were released and made top 20. Shaun is the son of Shirley Jones and the late Jack Cassidy, and half brother to David Cassidy. Double entendre debut. With an innocent voice, Meri Wilson conveys a not-so-innocent message in her first record, Telephone Man (GRT). It's the story of a telephone installation and the lyrics are, according to GRT's Tom McEntee, "quite suggestive. But her reading makes it acceptable. She sounds zany, spacy and she giggles. Some stations are fighting it.' But other stations are finding it an instant success. At KXARN/AM Bakersfield, Calif., Bob Harlow reports the tune entered that playlist higher than any other record ever had. 'It's a novelty record. Really it's cute but it wears very fast," says Mr. Harlow. It enters "Playlist" at 49 and gets most of its play in the South, especially at stations such as KFMY/AM Dallas, KFMY/AM Houston, WXIX/AM Atlanta and WAYS/AM Charlotte, N.C.
Hollings offers to find a home for cable in regulatory scheme

In opening three days of hearings on CATV, he promises action and asks for help; witnesses recite litany of familiar pleas.

In his opening statement to last week's three days of Senate Communications Subcommittee oversight hearings on cable television, Subcommittee Chairman Ernest F. Hollings (D-S.C.) described cable as a regulatory "unwanted child." "The Communications Act did not contemplate cable," he said. "The competitors do not want it; the FCC, with the court looking over its shoulder, vacillates, and the Congress generally hopes the problems will go away. Well, the responsibility has been assumed. If changes are called for, we are prepared to act," he said.

Cable witnesses later called for plenty of changes, none of them particularly new. But Mr. Hollings seemed to mean what he said. In addition to questioning individual witnesses on their presentations, he invited debates among them and frequently requested witnesses to prepare draft legislation and statistical surveys and other data for submission to the subcommittee. And one thing most of the witnesses had in common was a desire for Congress to spell out specifically what the FCC's jurisdiction over cable is.

Anthony Oettinger, chairman of the Community Antenna Television Commission of Massachusetts, described the cable industry as one with the "potential for multiple and diverse services [that is] strangling at the straitjacket wrapped around cable facilities by mistakenly identifying them solely with retransmission services ancillary to broadcasting. And all this was done in so fanciful a climate that cable had the misfortune of becoming regulated even before it was born."

As lead-off witness at the hearings, FCC Chairman Richard E. Wiley gave a history of the commission's dealings with cable and a status report on several issues, and announced that a general economic inquiry into the relationship between broadcasting and cable would begin shortly. The chairman had expressed interest in such an inquiry at the National Cable Television Association's annual convention in April (BROADCASTING, April 25; also see "Top of the Week").

"Included within this inquiry," he said, "must be the question of the potential effect of signal carriage on the audience and revenue of broadcast stations. In assessing the impact of cable, we need to know more about this audience/revenue relationship. Does this relationship . . . operate differently in different markets, in different locations, with different types of stations, with different kinds of advertising support and with different degrees of cable penetration?"

Mr. Wiley continued, "And, turning the equation around to focus not only on possible harm to broadcasting but also positive benefits to it and possible harms to cable operations, we must also study intelligently what factors—regulatory and non-regulatory in nature—are now inhibiting or may later restrain the expansion of broadband capacity and the growth of the cable industry."

The chairman stressed the FCC's deregulation efforts and said the commission was "committed to removing every . . . regulation which, in our opinion, is not necessary to protect an established public interest value."

In line with this, Mr. Wiley said that he supported legislation that would give the FCC forfeiture authority (Such a provision is included in a pole-attachment bill introduced by Senator Hollings [BROADCASTING, May 23]). Enactment of such legislation, Mr. Wiley continued, "could well lead to new and substantial deregulatory efforts, such as the streamlining or perhaps even the elimination of the certification process."

He also said that he sees a possibility of elimination of all franchise standards for cable as well.

Forfeitures were also touched on by NCTA and the Community Antenna Television Association. Stephen Effros, NCTA's counsel, delivered that group's testimony, which had been prepared by its president, Kyle Moore. CATA suggested that "Congress first has the obligation to clarify the extent and purpose of the FCC's regulatory power over cable television before you give the FCC the authority to fine cable operators for violating rules that may not be legal or proper in the first place." Then, CATA said, it would support fines and forfeitures.

NCTA took the same position and said that "once the Congress addresses the basis of cable-television regulation, consideration of forfeiture authority for the FCC should be included."

An overburden of regulations, not only at the federal level but also at state and local governments was an often-heard lament of the cable witnesses. Federal regulations restrict cable's ability to compete freely with broadcasting, according to a stand long taken by the cable industry and echoed by Daniel Aaron, chairman of NCTA and president of Comcast Corp., Bala Cynwyd, Pa. Mr. Aaron said, "Underlying the FCC's entire regulatory scheme, one that has hobbled the cable television industry since 1962, and retarded the service it might have provided the public, is the myth of unfair competition against the broadcast industry."

Mr. Aaron then repeated NCTA's approach, which it announced last month before the same subcommittee (BROADCASTING, May 16): "Establish a standard of identifiable public harm as the criterion for initiating regulation. Operating under such a standard, cable television could compete in the marketplace free from artificial restrictions unless it could be clearly demonstrated that the additional programming provided by cable would result in a loss of over-all communications service to the public."

The burden of proof for such a demonstration of harm, Mr. Aaron added, should be placed on the broadcasters.

As for regulation by state and local authorities, NCTA and Mr. Aaron said that "a lack of clearly articulated congressional policy on cable has created an environment in which confusing and sometimes contradictory rules have flourished at the local, state and national level."

"We believe that congressional leadership is required," said Mr. Aaron. "We urge Congress to act promptly and decisively to identify federal objectives and give the FCC full authority over cable regulation. We would propound that local or state authorities still be permitted to choose who will provide service to the community, this choice would be subject to a federal requirement that due process and fair treatment be provided in the initial franchise award as well as in any renewal. Local authorities would still assess franchise fees so long as these were justified by the cost of local regulation."

"Any other areas," he continued, "which demand uniformity should be preempted at the federal level. These include signal carriage, nonbroadcast programming including pay cable, technical standards and access."

Another witness to address the regulatory matter was Sheila Mahony, executive director of the Cable Television Information Center, Washington. She said that the three-tier regulation problem "has been brought about by the federal government's unwarranted incursion into state and local affairs. Once federal jurisdiction over cable television is limited to those interests of a purely federal nature, the 'problem' of three-tier regulation will be resolved."

She then gave two examples of FCC intrusion into what she said were local prerogatives: limitation of franchise fees and...
From the text: 

"The commission's standard of proof is virtually impossible to meet... The practical result of this procedure is to protect the cable industry from local officials who are simply trying to assure that their citizens are not saddled with an outmoded system."

"Federal concerns, she said, "should be specifically defined and ample power to achieve them given to the FCC. But the FCC should not be given the broad discretion Congress gave it for broadcasting. That flexibility should be left to the states and local governments."

"Two basic stances were taken by four witnesses that made up a panel on the economic impact of cable regulations. Deregulation of cable at the federal level was what the cable interests saw as a necessity so that they could compete in a "free and open marketplace" and provide a greater diversity of programming. Broadcasters who testified warned, however, of cable "siphoning" programs from over-the-air TV so that only people who can afford cable will be able to view them. In addition the importation of distant TV stations by cable systems weakens the economic base of local stations, according to broadcasters."

Robert Worthington, president and general manager of KBMA-TV Kansas City, Mo., and vice chairman of the Association of Independent Television Stations, said the matter came down to a choice for the subcommittee members: "Is broadcasting going to stay local, with encouragement of new local stations and strong support of existing stations, or will alternate program choices be relegated to simply bringing in of the distant stations serving someone else's community?"

"He said that many TV stations, especially UHF independents, would be hurt by distant-signal importation. He cited a Rand Corp. report which, he said, "projects local independent station audience losses at 50% if two additional distant stations are imported."

"The course to follow, Mr. Worthington said, is the "continued orderly growth and development of the total communications industry—not just one facet of it, cable. Encourage local television, particularly on the UHF channels. Many channels are still available in most states... and mixtures of local independents, increased numbers of satellite and translator stations could provide widely increased, truly diversified programs to everyone... not just to those who could afford to pay for extra service."

"On this same subject, National Association of Broadcasters Chairman Wilson Wearn, president of Multimedia Inc., Greenville, S.C., said that "Congress should bear in mind that this universally available free TV service depends upon two ingredients for its continuance and growth: sufficient viewers and listeners and sufficient advertising revenues... The federal government in no way has an obligation to subsidize broadcasters, nor to protect broadcasters' profits (where they exist). It does have a duty to protect the public's stake in local broadcast service. Reasonable constraints on existing and developing technologies will serve that purpose," he said. Mr. Wearn also told the subcommittee that NAB was conducting a study on the economic impact of distant signals on local stations that should be finished by the year's end.

"On the other side of this fence was Russell Karp, president of Teleprompter Corp. Mr. Karp urged that the FCC free cable from regulation until it can be proved that it is needed. The existing regulatory scheme, he said, is based on "the principle that cable is merely an adjunct to broadcasting and, as such, must be kept continually in a subordinate role, where it cannot threaten broadcaster profits. This principle has led to the adoption of restrictions on the number of distant signals which cable may carry, on what programming on those distant signals may—and may not—be transmitted and on what movies and sporting events may be shown on pay cable."

"Mr. Karp then quoted a study of two groups of stations—one in an area with imported distant stations (cable was grandfathered there) and the other in an area that could only import the amount set by current FCC limitations.

"Cable penetration was four times as high in the group with grandfathered signals," he said. "Yet the broadcast stations in both groups showed almost the same revenue trend over the last 10 years. In other words cable has no discernible impact on broadcast profitability." In addition, he said, "In the top-50 markets, where, ironically, the FCC's restrictions on imported programing are most severe, broadcaster profits are so incredibly high that it is really impossible to conceive that broadcaster service could ever be affected by cable."

"Also calling for the freeing-up of cable was Stanley Besen, professor of economics at Rice University. He said that "cable is unlikely to alter substantially the nature of broadcasting given current, or even some what relaxed, regulations. And, while the effect of still greater deregulation is more difficult to determine, it is not correct to argue, as some have done, that restrictions on cable should not be removed unless the precise effect of their removal is known in advance. Risks are inevitable but there are potential rewards as well. One of these is an expanded range of choice for viewers. Perhaps more important, however, is the prospect of reducing the substantial concentration of power in broadcasting which it is so fashionable to decry but about which so little is done.""

"Coming to the aid of broadcasters was Jack Valenti, president of the Motion Picture Association of America. Mr. Valenti said that under the new copyright law cable systems do not have to negotiate with the program owners as do television stations whose signals the systems carry. Under the copyright law, the cable systems pay 1.1% of their revenue into a pool for copyright owners, he pointed out. It costs TV stations 25-35% of revenues for programing. "Without some restrictions on what cable can bring into television markets, the marketplace will be neither free.
nor fair," he said.

"The FCC's signal-carriage and exclusivity rules are a life not without which the program market would collapse," Mr. Valenti said.

Later in the hearings, Dan Aaron, NCTA chairman, was asked if cable would agree to an increase in copyright fees if the FCC would abandon its distant-signal rules. He responded that NCTA would consider a "reasonable" readjustment in fees in exchange.

Pay cable was touched on in a panel discussion and in a video-tape presentation by Warner Cable on its two-way project in Columbus, Ohio.

After telling of the multitude of program offerings to be provided in Columbus when the system goes into operation at the end of this year, Warner Chairman Gustave Hauser warned that restrictive regulation will discourage such experimentation by the cable industry.

"The FCC and other regulators have required cable to provide wholly uneconomical facilities or services for which no market or other requirement exists," he said, "to build physical capacity to deliver services it does not have and for which no market exists; to originate programming on a quantity rather than a quality basis and without regard for funding, and to reserve for local government channels they do not use."

Another deterrent Mr. Hauser and others saw to cable's development is "the threat of a planned separations requirement at some future time," that would not allow one firm to control both hardware and programing.

But Henry Geller, former FCC general counsel, now with the Aspen Institute, had another view of this separations matter. "... cable entrepreneurs should not be engaged in programing operations," he said, "but rather should be restricted to furnishing channel capacity to others... The cable industry can't have it both ways—it can't urge deregulation so that the market place can have full sway and at the same time oppose the separations principle."

In the pay panel and in some of the other comments during the hearings a point touched on again and again was the allegation by broadcasters that pay cable siphons movies and sports from free TV. That threat of over-the-air TV losing sporting events such as the World Series and the Super Bowl seemed a very important issue to Chairman Hollings, who questioned a number of witnesses on it.

Leo Beranek, president of WCVB-TV Boston, said that in the future, "pay-cable TV threatens to outbid free broadcast TV for the best sports events, the best movies and the best entertainment programs."

These fears of siphoning were rejected by Gerald Phillips, vice president of United Artists Corp., who called them "not a fact, but a mere rhetorical device used loosely by the opponents of pay cable to build their inconsistent and unsupported arguments." Just as movie theaters show films for a while, so would the runs on pay cable be only for a limited length, then they would air on commercial television, he said.

That the baseball leagues would even consider selling the World Series to pay cable was flatly denied by Baseball Commissioner Bowie Kuhn. He said, "I can foresee no circumstance where baseball's showcase events... would be marketed on a pay cable or subscription television basis."

Robert Schmidt, president of the NCTA, was upset that broadcasters keep bringing up the issue. Calling it a "red herring," he said the cable industry would put in writing that it doesn't want those games. "We believe that we can expand the viewership of sports, not hinder it," he added, through the pay cablecasts of home games and others not offered on commercial TV.

Warehousing of movies by the networks so that they are not available to pay cable was a problem raised by Ralph Baruch, president of Viacom International. With the number of movies released each year decreasing, Mr. Baruch said, "If pay cable is denied access to this limited number of films produced by the industry it will be unable to achieve its full growth potential and this is exactly what the networks hope to see happen."

Other items raised during the three days included:

■ The claim by Alan Greensstadt, presi-

dent of Optical Systems Corp., Burlingame, Calif., that the cable industry is closing off access to unused channels. Mr. Greensstadt cited recent experiences with the Cox Cable-owned Mission Cable in San Diego where Optical has been leasing a channel for its pay programming. He said he's been paying the system 10% of its revenue for the use of the channel. After five years his contract is up and Mission wants to increase the fee to 3,500.

■ A proposal by Anna Marie Hutchinson, president of Eagle North Cable TV, Oakhurst, Calif., that the commission's 1,000 subscriber cut off for providing nonduplication protection be raised to 3,500.

As was the case with an earlier hearing ("Closed Circuit," May 16), attendance by the subcommittee members was sparse. Only five of the 13 members were present at one time or another during the three days.

FCC says skeln of Supreme Court rulings supports its authority over pay cable

Commission again turns to that high court in petition for review of appeals court setback in March; filling places particular emphasis on harm that could occur if ban on ex parte contacts survives

The FCC contends its authority to regulate pay cable in the same manner as it does over-the-air pay television can be found in Supreme Court decisions. It also contends that the conclusion of the U.S. Court of Appeals in Washington that the commission has less authority under the First Amendment to regulate cable television than it does broadcast television conflicts with the views of other courts of appeals.

And it says that the appeals court has applied a standard of review for informal rulemaking proceedings that restricts the commission's ability to meet problems before they occur.

The commission makes those points in petitioning the U.S. Supreme Court to review the appeals court's decision that overturned the commission's pay-cable rules.

And in a section of the petition that deals with an aspect of the decision that appears to disturb the seven commissioners more than any other, the commission says, "The court's blanket prohibition of ex parte [off-the-record] contacts in informal rulemaking is contrary to law."

At stake in the commission's petition are rules designed to prevent pay cable from siphoning programing from conventional television, as well as others prohibiting pay-cable systems from devoting more than 90% of their programing to sports
and movies and from selling advertising. The commission has abandoned the fight to save the rule designed to guard against the siphoning of movies. However, broadcast industry representatives who are expected to file their own petitions for review may make an effort.

The commission's petition makes these arguments in requesting review:

- The commission's "long-established goal" of preserving conventional television service "received recognition and approval" by the Supreme Court in a decision affirming the commission's authority to adopt rules to prevent pay television from siphoning programs from conventional television.

- "Clearly, regulations adopted to achieve this objective" meet the high court's test for determining the legality of commission cable regulations: Are they "reasonably ancillary to the effective performance of the commission's various responsibilities for the regulation of television broadcasting?" The pay-cable rules, "which parallel the pay-broadcasting rules . . . clearly fall within this category, and therefore do not exceed the commission's authority."

- Other courts of appeal have rejected the argument, accepted by the court in Washington, that the commission has less authority under the First Amendment over cable television than it does over broadcast television, in view of the fact that cable systems do not use spectrum.

The Eighth Circuit Court of Appeals, in a decision issued in 1968, held that when cable systems "use radio signals and . . . have a license upon which the permission broadcast service," they have "the same constitutional status [as broadcast stations] under the First Amendment."

The appeals court in Washington appears to have applied a standard of review that requires backers of the rule "to prove their case" before the commission can act. Such a standard runs counter to the position of the Supreme Court and other appeals courts which have manifested a willingness to afford regulatory agencies some "latitude" in planning "in advance of foreseeable events even where the consequences of both action and inaction are admittedly uncertain." The standard used in the pay-cable case "would paralyze federal agencies." The question before the appeals court is not whether backers of the regulations proved their case but whether challengers demonstrated the regulations are "arbitrary and capricious." The arguments advanced in the section of the petition dealing with the ex parte contacts appear to be the ones on which the commission is principally pegging its hopes for obtaining review. For the ruling not only affects the commission's procedures in all rulemaking proceedings, but other agencies' procedures, as well.

The appeals court dealt with the issue in response to a friend-of-the-court brief filed by a former FCC general counsel, Henry Geller, who contended that the off-the-record conversations commission members and staffers held with interested parties during the course of the rulemak-
Antigun-control group opens fire

Organization is scheduling media campaign against programing and spots that are for control; James Drury serves as spokesman in message airing in three areas

A well-financed foundation opposing gun control is launching a campaign aimed at keeping "antigun propaganda" off television.

The group's strategy is to mobilize angry gun owners into "media action teams," which would protest what they consider offensive programming by demanding equal time for rebuttal, buying spot announcements and challenging license-renewal applications. Special targets are local station managers and CBS-ABC, according to the campaign's organizers, "is the network with the worst record for broadcasting blatant, unfair antigun propaganda."

Sponsoring the campaign is the Second Amendment Foundation of Bellevue, Wash. (The Second Amendment to the U.S. Constitution says that "...the right of the people to keep and bear arms shall not be infringed.") Alan Gottlieb, the foundation's president, said the 90-day campaign has already enlisted about 100,000 members, bringing in contributions of more than $17,000 a month.

Mr. Gottlieb expects to have the project in full swing by September and predicts as much as $25 million will be spent for TV and radio spots, newspaper and magazine ads, books and pamphlets advocating unrestricted gun ownership. At the present, the organization is concentrating its efforts in three test areas—Los Angeles, Houston and Indiana—because its research shows strong resistance to gun control in those areas.

The first phase of the campaign, in which gun owners are supplied with postcards both to notify the foundation of alleged propaganda and to complain to station managers, is already under way. Mr. Gottlieb said last week that 60 different on-air "propaganda" incidents have been identified, and the foundation is requesting time to respond on the stations that carried them.

Phase two of the foundation's plan is to place 30- and 60-second spot announcements on radio and TV, either as public service messages, if the station will take them, or as paid commercials. The Seattle advertising firm of Jacobson & McMahon Inc. is producing some spots now featuring James Drury, star of the syndicated television series, The Virginian. Mr. Drury, who according to Mr. Gottlieb is donating his time, opens the spot wearing a cowboy costume and asking, "Ever wonder why we don't have any horse rustlers? Because we hung 'em all." He then goes on to say that criminals should be controlled, not guns.

The third phase of the campaign, Mr.

Fun, radio-style. First annual NYMRAD Festival Day will be held on June 22 from 4 to 8 p.m. in Hotel Roosevelt in New York. NYMRAD (New York Market Radio), organization of 30 stations in metropolitan New York area, will be host to advertising agency and client guests for evening of games of skill or chance, and drinking and eating.

Going after GF. Action for Children's Television has filed complaint at Federal Trade Commission against General Foods Corp.'s TV commercials for its Cocoa Pebbles cereal. ACT claims that promoting product as "part of a balanced breakfast" may lead young children to believe that because cereal is "chocolatey," it’s nutritious.

Overnights for Bay Area. Overnight TV rating service will begin in San Francisco in fall 1978, Nielsen said last week. Market will be fourth with Nielsen Station Index's metered service, joining New York, Los Angeles and Chicago. Nielsen said all five of the San Francisco station subscribers endorsed launching of new service which will cover Designated Market Area (DMA). It will provide overnight household ratings and weekly summaries of household tuning date.

At last

Now you can buy an annual index of BROADCASTING, the authoritative and complete newsmarket of television, radio and allied arts. The index is being offered only after thorough testing in actual use by BROADCASTING's editors and writers. It is as accurate and comprehensive as the magazine itself.

Volumes for the years 1972, 1973, 1974 and 1975 are ready for immediate delivery. The 1976 edition will be off the presses soon. And to complete your reference library, BROADCASTING is now available on microfilm.

Act now while these limited editions last.

Please send me:
- 1972—226 pages, 40,000 entries, $80
- 1973—254 pages, 44,000 entries, $90
- 1974—298 pages, 52,000 entries, $105
- 1975—340 pages, 59,000 entries, $115
- All four for $350—a $40 saving

- Check enclosed

May seemed totion David manager, Hugh Barr, York named VP Boston, pointed Media Vriesman Antelo WGN-TV for Storer Television there, named tests full-time G. P. Adams, Mathis, Antelo, CBS-AM-FM San Francisco, ap-pointed director of administration.

**Broadcast Advertising**

Jerome F. Bln, president and chief operating officer, Tatham-Laird & Kudner, Chicago, elected chief executive officer, succeeding Charles R. Standen, who continues to serve as chairman of management committee. Mr. Bln is agency's first chief executive officer with creative background.

Gary T. Andrews, Fred A. Baxter, John R. McGarry Jr., and Lawrence Shapiro, management supervisors, Young & Rubicam, New York, and Raymond V. Dempsey, creative director, Y & R Detroit, named senior VP's, Young & Rubicam USA.

Ian Brookbanks, VP/account supervisor, Young & Rubicam, New York, joins Van Leeuwen Advertising there as senior VP/management supervisor for all accounts.

Robert L. Ficks Ill and Michael J. Jeary, account executives at Dancer-Fitzgerald-Sample, New York, named VP's/account supervisors.

Jack V. Signorelli, sight-sound director, Needham, Harper & Steers, Chicago, named VP.

Roger Alexander, manager of Detroit office, Harrington, Righter & Parsons, elected VP.

Linda Lender, print, production coordinator, Grey Advertising, Minneapolis, promoted to manager, creative service.

Ralph H. Heyward, general sales manager, KING(AM) Seattle, named office manager, Blair/Northwest Radio Representatives there.

Carroll F. Jackson, general manager, WXXI(AM) Jackson, Miss., rejoins WJS Advertising there as VP/media director.

Russell C. Doerner, VP/associate creative director, D'Arcy-MacManus & Masius, St. Louis, promoted to creative director. Frank R. Pringham, with Campbell-Ewald, Detroit, joins DM&M there as copywriter.

Nicholas DeSantis, media supervisor, Cunningham & Walsh, New York, and Joseph Rubino, media assistant at SCC&B there, appointed assistant media directors, SSC&B.

Saviero F. Verni, art director of print/TV/promotion, Doyle Dane Bernbach, New York, joins Sawdon & Bess there as art director, creative department.

Len Calderone, media planner, Needham, Harper & Steers, New York, joins Cunningham & Walsh there in same capacity.

Patty Lynch, assistant media planner, Tracy-Locke Advertising and Public Relations, Dallas, promoted to media planner.

Charles E. Luslig, writer/producer, Hansen & Langmac advertising Cedar Rapids, Iowa, joins Lord, Sullivan & Yoder advertising, Des Moines, Iowa, as copywriter. Pat Seifert, artist, Meek Printing, Des Moines, named production artist, L & S.

Tony Intellisano, research supervisor, Metro TV Sales, New York, appointed director of research and sales promotion. Paul W. Faser, head of his own company, Prime Time Marketing, rejoins Metro TV Sales as account executive.

Phyllis Seifer, director of advertising and creative services, WNEW-TV New York, named VP.
Eli Kaufman, eastern sales manager, CBS-FM Sales, New York, appointed general sales manager, WCS-FM there.

Joe Stewart, account executive and promotion director for McDonald's restaurant account, Davis Johnson Mogul & Columbato, Los Angeles, appointed director of advertising and promotion, KHTV there.

Thomas Wall, general sales manager, WHTV-TV Evansville, Ind., joins WRCO-TV Rochester, N.Y., in same capacity.

John M. Purcell, local-regional sales manager, WTVR-TV Richmond, Va., named general sales manager, WCLY-TV Largo, Fla.

Dave Littrell, account executive, WD9R-TV Louisville, Ky., joins WLS(FM) there as general sales manager.

Chuck Tweedle, local account executive, WLR(FM) Skokie, Ill. (Chicago), named assistant sales manager.

Gary Franklin, account executive, KIRO(FM) Seattle, appointed retail sales manager.

Gene Hester, VP/general manager, WKKFAM Asheville, N.C., named sales manager of co-owned WMPQ(FM) Ocala, Fla., not yet on air.

John Curran Jr., national sales representative, Petry Television, Dallas, joins sales staff of KXAS-TV Fort Worth.

Richard Zimmerman, sales director, WDCK(FM) Hanover, N.H., and member of board of directors, WDCK and co-owned WERD(FM) there, joins KEZY(FM) Asheville, N.C., named sales manager of co-owned WMPQ(FM) Ocala, Fla., not yet on air.

John Curran Jr., national sales representative, Petry Television, Dallas, joins sales staff of KXAS-TV Fort Worth.

Richard Zimmerman, sales director, WDCK(FM) Hanover, N.H., and member of board of directors, WDCK and co-owned WERD(FM) there, joins KEZY(FM) Asheville, N.C., named sales manager of co-owned WMPQ(FM) Ocala, Fla., not yet on air.

Charles Brogan, salesman, KLIN-AM-FM Lincoln, Neb., joins KRNA(FM) Iowa City, Iowa, in same capacity.

Programing

Norman Steinberg, executive producer/writer/director of comedy pilots, Universal Television, Universal City, Calif., joins T.A.T. Communications, Los Angeles, as VP, network comedy development.

William E. Miller, television VP, Time-Life Films, New York, elected senior VP.

Tom McIntyre, VP, Century 21 Productions & Programing, Dallas, assumes additional duties as general manager, replacing Dick Starr, who has entered into agreement with Toby Arnold & Associates there to provide programing production services for selected projects. Carole Starr, Century 21 operations manager, and Roy Nelson, assistant manager/co-producer, have also left company for personal reasons. Their future plans have not been announced.

John Benedict, program director, WVVIP(AM) Mount Kisco, N.Y., joins Radio Arts, radio program producer/distributor, Burbank, Calif., as regional account supervisor.

Nelson P. Hobdell III, operations director, WWV(AM-FM) Philadelphia; named program director, WRC(AM-FM) there.

James T. Donkel, program/music director, WCSS AM-FM Amsterdam, N.Y., joins WWF(AM) Toledo, Ohio, as program director.

Thomas Wood, program director/announcer, WWTV(AM-FM) Columbus, Ind., named to same position, WITY(AM) Danville, Ill.

Edward Fowler, producer/director, Maine Public Broadcasting Network, Orono, appointed TV production manager.

Broadcast Journalism

Rubens Renick

Max M. Dowell, director of CBS News special projects department for past 16 years and manager of its predecessor department before that, has retired after 41 years with CBS. She will continue as consultant to CBS News Almanac, compiled by CBS News and published by Hammond Almanac Inc.

Jo Moring, director, NBC Radio's News and Information Service, which closed May 29, named director, network radio news, NBC, New York.

Bobby Cole, from KMPX(AM) San Francisco, joins KQUP(AM) there (formerly KPBC-FM) as news director.

Dave Douglas, newsmen, KSTT(AM) Davenport, Iowa, named news director.

Gary W. Wescott, newsmen, WPTT-AM-FM Stevens Point, Wis., promoted to news director.

Bill Avery, news director, KELD-AM-FM-TV Sioux Falls, S.D., joins KEVIN-AM/FM Rapid City/Lex, S.D., in same post.

New staff additions, all-news WPON(AM) Riviera Beach, Fla. Larry Cohen, afternoon anchor, WNCR(AM) Worcester Mass., operations manager/news director; Dick Martin, news director, WCLX(AM) Cortning, N.Y., morning anchor; George Wenzler, evening anchor, WNUT(AM) West Springfield, Mass., morning editor; Joel Coran, sports reporter, WNCR, sports director; Terry Jenkins, night anchor, WBR(FM)
Jim Bennett, freelance writer/researcher, general assignment reporter, and Wayne Winkler newsman, both at Huntington, Ind., general assignment reporter.

Charles Rowe, anchor, KTYY(TV) Los Angeles, joins KATU(TV) Portland, Ore., as co-anchor.

Stephen Kott, reporter, WXVT(TV) Jacksonville, Fla., joins WPLG(TV) Miami in same capacity.

Robert V. Althage, reporter/producer/anchorman, WTVN-Columbus, Ohio, joins WPMI-PROVIDENCE, R.I., as reporter.

Bob Scott, correspondent, ABC Network News, Los Angeles, named staff broadcaster, news department, KXNN there, Monica Jung, reporter/announcer, KRDO-AM-FM-TV Colorado Springs. Joins KXNN as newswriter.

Steve Thompson, reporter, WTOPAM Washington, assumes additional duties as airborne traffic reporter.

James A. Skwarcan, local sales account executive, WSIV(TV) Elkhart, Ind., transferred to news department as reporter/photographer.

Gene Turney, KGKIAM San Angelo, named secretary.

Silverman's fan club. Fred Silverman, president of ABC Entertainment, was honored by ABC-TV affiliates at a surprise party in New York May 27 when eight present and past members of the ABC-TV affiliates board flew to New York to take him to lunch at 21 Club, joined by top ABC television officials. There they gave him a polished crystal cube inscribed: "Fred Silverman, TV's real star, who made us number one. The ABC Affiliate Association, May 1977." Mr. Silverman is shown above with the cube and William F. Turner (l) of Forward Communications and KCAU-TV Sioux City, Iowa, chairman of the affiliates board, who made the presentation, and Frederick S. Pierce (r), president of ABC Television.

Cable

Jeanne O'Grady, director of client services, Teleation Program Services, New York, joins Showcase Presentations there, producer/distributor of programming for cable TV, in same capacity.

Charlotte Schill Jones, executive VP and director, Manhattan Cable TV Inc., New York, joins People magazine as assistant publisher. Both are owned by Time Inc.

Dominic J. D'Alfonso, manager with Bond Stores Inc., New York, named to headquarters sales staff, Magnavox CATV, Manlius, N.Y., responsible for internal sales in mid-Atlantic states.

Stuart F. Chuzmir, former VP and assistant to president of Home Box Office, New York, has opened management consultancy service for cable and pay television at 230 Park Avenue, New York 10017, (212) 687-0872.

Allied Fields

Louis Coutolene, president and general manager of RCA, S.A. de C.V. (Mexico), named president of RCA Records, succeeding Kenneth D. Glancy, who has been given new responsibilities with RCA Records in Europe.

Jian Hiber, assistant to president, Rau Radio stations, Washington group owner, joins Arbitron, Beltsville, Md., as manager, radio syndication services.

Linda K. Hobkir, director of operations, Imcro Fiorentino Associates, production and lighting consultants, New York, appointed VP.

Thomas J. Lynch, VP/media director, Wilson, Haight & Welsh Advertising, Hartford, Conn., joins Creative Media Services, advertising media consulting firm, Wilmington, Conn., as manager of new office in Hartford.

Don Kramer, radio/television director and broadcast director, Parker Advertising, Palos Verdes, Calif., joins Charles H. Stern (talent) Agency, Los Angeles, working in voice-over department and developing expansion concepts for agency.

Thomas S. Murphy, chairman/executive officer, Capital Cities Communications, New York, elected director of Texas Inc.

Robert A. Bernstein, from Washington law firm of Henehan & Teague, becomes member of communications law firm of Brown, Cahill, Kaswell, Bernstein & Effros there, merger of Cahill & Kaswell and Brown & Effros.

Equipment & Engineering

Edward M. Mullin, engineering VP, Ampro Broadcasting, manufacturer of broadcast audio consoles and automatic tape cartridge equipment, Feastersville, Pa., named president.

Joseph Novik, sales manager, Belar Electronics Laboratory, Devon, Pa., joins Ampro in same capacity.

Miles G. Moon, manager, broadcast advertising and promotion, RCA's commercial communications systems division, Camden, N.J., promoted to manager, creative services.

Jim Bennett, chief engineer, transmitters, Pye TVT Ltd., Cambridge, England, appointed to board of directors as director of transmission engineering.

John J. Kornacker, in tool and industrial engineering department, Switch Division, Oak Industries, Crystal Lake, Ill., promoted to manager, tool and industrial engineering.

Stuart B. Mitchell, law clerk with Washington communications law firm of James A. Gammon, becomes associate firm.

Sandi Barclay, promotion assistant, WRCAM WYSSFM Washington, joins Radio Information Office of National Association of Broadcasters there as associate editor and special projects writer for Radioactive, monthly magazine.

Olga Zabludoff, freelance editor, joins National Association of Educational Broadcasters, Washington, as editor of association's bi-monthly magazine, PTRA (Public Telecommunications Review).

Deaths

Ralph Bucci, 59, corporate VP and chief financial officer of Outlet Co., Providence, R.I., group station owner, died of cancer at his home in Warwick, R.I., on June 3. He joined Outlet in 1955 as controller of broadcast division. He is survived by his wife, Angela, and three daughters.

Walter K. Scott, 62, due to retire June 30 as executive VP, Radio Free Europe/Radio Liberty, Munich, died of heart attack June 4 while vacationing at Lake Chiemsee, Alpine resort near Munich where he lived. He had been executive director of Radio Liberty there from 1965 to 1972, when he retired. However, he returned in 1975 to oversee consolidation and merger of RFE and RL operational centers in Munich. Survivors include his wife, Irene, and five children.

Joel Garcia, 36, producer/reporter, 28 Tonight news program for noncommercial KCTV Los Angeles, was shot to death May 30 in dispute with his estranged wife, according to Burbank, Calif., police. Mr. Garcia's wife, Lupe, has been booked on suspicion of murder. Before joining KCTV in January Mr. Garcia had been on news staff at KTTV Los Angeles for five years and was founding president of California Chicano News Media Association.

Erle Hughes, 52, Ottawa, district engineering manager, Global Television Network, died of heart attack there May 17. He began his broadcast career at Canadian Broadcasting Corp. in Toronto in early 1950's. Following 12 years with WGR-TV Buffalo, N.Y., and eight years as chief engineer of WMUR-TV Manchester, N.H., he joined Global in 1973 and helped put it on the air following year. He is survived by his wife, Thelma, and son, Lee.

Dr. Bernard Handler, 65, NBC medical director since 1942, died of cancer at Saranac Lake (N.Y.) hospital on June 2. He is survived by his wife, Elizabeth, and son, Dr. Richard Handler.

Eldon Lundquist, 61, sportscaster for WTRC&AM Elkhart, Ind., from 1935 to 1968, died in Elkhart of blood clot in his lungs June 1 after being hospitalized for cancer. He served in Indiana legislature for 16 years. last 10 as Senate Education Committee chairman. He retired in 1976. Survivors include his wife, Helen, and two children.

Robert Mohr, 67, former producer and general manager of KTLA(TV) Los Angeles, died of cancer May 29 at Santa Monica (Calif.) hospital. In early days of TV, he was producer of series including Bandstand Review, Frosty Prokles and The Spike Coley Show. He is survived by his wife, Jane; son, John, producer for National Subscription TV, and three daughters, Barbara, Patti and Nanci.
For the Record

and we are looking for extraordinary individuals to grow with us. You must be an extremely creative person with a strong background in television, public affairs, programming or promotion. You must be able to work with management, and be willing to work hard. If you meet all of these requirements and are also a highly motivated, self-starter send a resume to:

Mc. Leigh T. Stowell
Frank N. Magid Associates, Inc.
One Research Center
Marion, Iowa 52302

STREET REPORTER

Experienced, aggressive Street Reporter wanted. Must know how to initiate, film, produce and script TV news film stories. ENG knowledge valuable. Ability to work with close-knit, hard-driving news team, own as well as under Assignment Editor and Producers. We want a pro, and you'll have to prove it. If interested, please send resume, cassette, sample scripts to Ray Hasson, News Director, WBEN-TV, 207 Elmwood Avenue, Buffalo, New York 14207. NABET and AFTRA Shop. An Equal Opportunity Employer.

Investigative Reporter

Our man is leaving for CBS in New York. Buffalo's number one TV news operation is seeking an experienced investigative reporter. Our style is hard hitting with an aggressive approach to significant investigative topics involving government and consumerism. This is not a personal consumer problem solving position.

If you'd like to talk with us, we will be at the Annual Conference of Investigative Reporters and Editors in Columbus Ohio June 17-19. Call us for an appointment or send tape and resume to Joseph Barnes, News Manager, WKBW TV, 142 Main Street, Buffalo, NY 14209. 716-883-0770. Capital Cities Communications Inc. An Equal Opportunity Employer.
Help Wanted Sales

BPA's Lynne Grasz:
To believe
Is to be motivated

Dale Carnegie probably would have gone for Lynne Grasz in a big way. He might even have tried to steal her away from broadcasting by offering her a post in his motivation-training school. But even his powers of persuasion would have met with a formidable challenge in the youngest—and first female—president of the Broadcasters Promotion Association who lives, breathes and thinks radio and television.

Mr. Carnegie would have known a missionary when he saw one.

Holding the gavel at this week's BPA convention in Los Angeles is a 33-year-old Nebraskan who believes in the power of positive thinking. "You can make things happen for yourself if you believe in yourself," says Ms. Grasz.

"I really feel that I have a destiny... I already feel that I'm somebody very important. That's why my life has been easy. That things do happen for me. I always know the right alternative when I have a choice." To those who might perceive her remarks as reflecting an inflated ego, she retorts: "Believing in yourself is not egotistical!"

Ms. Grasz's motivation came not from any courses—she flunked college psychology twice—but, she says, from her family and perhaps an early scrape with death (misdiagnosed measles at age 2½).

"I was really given a second chance," she says.

Ms. Grasz "figured out once that I'd gone from kindergarten to college and I had never been more than three miles away from home." And it was in her hometown of Lincoln where she had an "austere beginning" in the media, circulating expiration dates for the Nebraska Farmer and the Colorado Rancher. As a recent high-school graduate, achieving her potential meant doing a good summer job for her next-door-neighbor circulation manager, and then enrolling at the University of Nebraska there as a pre-dental major.

The switch to journalism came a couple of college years later. And in 1966, it was her self-confidence that provided the antidote to the counsel she received from veteran broadcasters. As college graduation approached, the neophyte broadcast journalist began making the rounds, starting with the National Association of Broadcasters convention in Chicago.

(Eight years later, she was back on an NAB-panel in Houston.) She recalls being told on the phone by a top network news chief: "Women have whiny voices." "He was very derogatory toward women," Ms. Grasz recalls. "He said they have no authority. 'The audience does not want to get their news from a woman... She has no credibility.'"

Even one of the few women who was making it in broadcast journalism at the time was "very negative." She remembers being advised how rough it was for a female to break into the business, and if she did to be prepared to give up a lot of things in her life.

"I really wasn't willing to sacrifice anything," Ms. Grasz says, leading her to put aside broadcast journalism plans and accept an offer with the UPI Detroit bureau. (She interned for the news service in Omaha during college.) Although she was able to cover the Beatles, that wasn't enough to make up for the rewrite duties she disliked. And besides, the desire to be a broadcaster hadn't been fully stifled.

After three months with UPI, she was back at another place where she had interned during college: Fezer Stations' KOLN-TV Lincoln and its satellite, KGIN-TV Grand Island, in Nebraska. The job wasn't in broadcast journalism, but rather in a specialty she knew little of or nothing about—promotion. She worked her way to director of promotion and public relations and stayed until last summer, when KMOX-TV, CBS's St. Louis owned-and-operated outlet, offered her the job of director of information (now creative) services. Ms. Grasz moved in July; her husband, Mel Grasz, who had been a purchasing agent for the University of Nebraska, joined her in December. (There is a freedom from domestic responsibility that she prizes, giving her career mobility she believes impossible if she were at "home with three kids.")

Her CBS employers, however, knew from the start that they'd be taking on a person whose professional energies would also be spent outside the company. Last year, as BPA president-elect, her main focus for the trade group was "hustling members." Her goal of 600 by year-end was met. As president, gaining members is still her prime goal and soon after the convention in Los Angeles, she thinks the 700 figure may be reached.

In planning this week's agenda with convention chairman Fred Bergendorff of KNX-AM-FM Los Angeles, Ms. Grasz played up the new art/Graphics element and also realized "you have to have a session for practically everybody and their dog." And aside from taking advantage of the broadcast expertise on the West Coast (the main reason for having the convention there this year), Ms. Grasz hopes her membership will go away with a greater awareness of themselves that they can pass on to their general managers.

"Promotion has changed dramatically," she says, characterizing it as a "pivotal" element to a station, being the only department that works with every other department. She is out to convince small-market operations, especially in radio, that by hiring a sharp promoter, "it doesn't cost; it pays." Among the ways Ms. Grasz has won friends and influenced people in KMOX-TV's behalf was a local promotion for a group O&O venture, tying reading skills to a CBS special. It cost the KMOX-TV promotion department $10,190 to develop two pictures. Monsanto Fund picked up a $20,000 tab.

Within 10 years, Lynne Grasz wants to be in the general manager's seat at an O&O TV, preferably one of CBS's. She gives herself that much lead time because in television "the pickers and the choosers of the world are not quite ready to really think of putting a woman in a top management position." She sees herself, however, "riding right on the crest" of women's upward movement in broadcasting. However, so far, she claims not to have been stopped careerwise by sexism.

Should her dreams and goals come to naught, Ms. Grasz says it wouldn't be the end of the world. She'd "switch gears and use all my energies in another area." Dale Carnegie probably would approve.
Editorials

Consider the sources

The television networks have been cast as monsters in a horror story out of Hollywood. None of the standard characteristics has been overlooked. The networks are portrayed as representing the worst in rapacity, venality and cruel disregard for the innocent and helpless.

It would play better if the victims' roles had been more carefully cast. Here we are asked to believe that the innocent and helpless are Columbia Pictures, Metro-Goldwyn-Mayer, MCA, Paramount, 20th Century-Fox, United Artists, Warner Bros. and the Motion Picture Association of America. Next they will ask us to swallow Jack Valenti in the role of Little Nell.

As was reported here a week ago, the pitiable victims listed above have complained to the FCC about indecencies they have endured in their dealings with the networks. The charges are familiar, though seldom stated with more passion: Through their dominant negotiating power, the networks force producers, small and big, to sell programs below the cost of production and under conditions that guarantee networks a profit and producers a thin margin at best.

Well of course the networks have evolved shrewd ways of doing business. They would never have survived otherwise in a Hollywood community that has longer experience in the profitable application of savvy, perseverance and gall.

The last quality is in the ascendency when major studios tell the government they can be saved only if it strips the networks of all but the shreds of their negotiating powers.

The scale of regulation

The House Communications Subcommittee has been given all kinds of advice on how to reorganize the federal apparatus that regulates communications. As reported elsewhere in this issue, there are those who want the FCC enlarged and separated into specialized divisions. There are others who want regulation transferred to a new department of communications in the President's cabinet. Still others see nothing basically wrong with the current mechanism but think fine tuning may be needed after 43 years of operation in its current form.

The third option strikes us as the most reasonable.

The first thing to be considered is what the country wants from communications regulation.

Does it want an elaborate government bureaucracy that not only regulates but also creates new systems and devices that require added regulation? That seems to be the aim of those who opt for a bigger and more prestigious regulatory machine. It is especially the aim of those who argue for the creation of long-range planning and policy capacity within the federal government. Those advocates are looking to the government—not market forces—to plan the communications future and put the ingredients of the communications system into place.

The dreamers of large dreams share a common yearning for an orderly disposition of conflicting claims to spectrum space and access to the U.S. public. Somehow there must be a grand design that will tell us precisely how many VHF transmitters there will be in 1987 or 1999, how many miles of cable containing how many channels, how many strands of optical fibers, how many lasers, how many who know what else. Better yet, in the dreamer view, is a grander design that will not only forecast but also fashion the system.

A more realistic ambition will accept the limitations of mankind's ability to plan and the virtues of individual inventive-ness. That recognition is inherent in an American economic and social system that still offers rewards for initiative and daring. The system may occasionally fall into disorder as it responds to the perversities of human nature and caprices of the marketplace. It is, however, the system that created the profusion of communications available today and will create the improvements of tomorrow.

The government has a legitimate role to play, in our increasingly complex society, as arbiter and restrainer of abuse. That role can be successfully performed by a bureaucracy of manageable proportions.

The grandest design that could come from the Communications Subcommittee would be a regulatory apparatus dedicated to the avoidance of overregulation.

Day and night

The prime-time Emmy awards appear to be back on the track, though under new management and with an as yet unelected new name. NBC, which canceled the May 15 Emmy telecast after some of Hollywood's bigger television names threatened to boycott it, has signed with the Hollywood group, newly constituted as the Hollywood Academy of Television Arts and Sciences, to telecast a new TV awards program next fall (BROADCASTING, May 23).

For all the shining imperfections so often displayed by the prime-time Emmys, we are glad they didn't sink without a trace. But we are still faced with the rupture between the Hollywood and New York groups, which led to the Emmys' downfall, and now we have the prospect of the New York group, operating through the National Academy, presenting daytime Emmys while the Hollywood Academy presents its prime-time counterparts under another name.

This may make more sense than is at first apparent. At least it has each group doing what it knows best, for New York is the center for daytime dramas while Hollywood is where prime-time network television originates.

The National Academy insists that it will also present prime-time Emmys, even if no one telecasts the ceremony, and the Hollywood Academy expects to add daytime awards in 1978 if not this year. Our present inclination is to discourage both of these ambitions. One set of awards per day part may serve a purpose; two would be meaningless.

"But first let's have another look at the little old schedule."

WMAL-TV has a brand new calling: WMAL-TV.

But the programming goes on. No one can beat it except WMAL-TV.

ABC in Washington, D.C.
American technology prevails at NAB 77. Vital introduces for the first time in TV history the only four input frame synchronizer through digitization of video signals. In 1974 Vital introduced the Digital effects for video switching and is holder of Patent Numbers 3 821 468 and 3 758 712.

The "Squeezoom" opens new vistas in television production both in real time use or post production.

*Squeezoom*® VMU-1*

- Synchronizes up to 4 non-synchronous NTSC color video signals simultaneously to studio sync.
- Continuously corrects variations in subcarrier phase from remotes or doppler effects from satellite transmissions.
- Full frame real time compression and zooming of pictures to any size.
- Joystick positioners place up to 4 compressed pictures anywhere on the screen.
- Microprocessor control for wider mode of operation.
- Real time freeze frame.  *Zero delay in switcher.*
- Horizontal and vertical compression yield multiple effects.
- Eliminates tedious use of chroma keys in most cases.
