Cable TV in 1978: Ringing up the first billion

Nimitz and Nielsen agree. We won.
In the San Francisco Bay Area, Six Languages Speak as One on KTVU

Every month of the year, the Community Affairs Department of KTVU produces programs in Spanish, Korean, Tagalog (Philippine), Japanese, Chinese, and, of course, English. Many of the programs are bilingual to help inform people for whom English is a second language. Whether the subject is as sober as the Korean CIA or as joyous as a Mexican Posada, the goal of KTVU, in any language, is to enlighten the family of all peoples throughout Northern California.

Warner Bros. Television Distribution A Warner Communications Company
"The Love Experts"

A free-wheeling panel of celebrities with as much expertise on affairs of the heart as the Marx Brothers!

The laughs are spontaneous and unpredictable as the stars try to solve perplexing true-life love problems that would stump Dear Abby. Outrageously comic solutions and good-natured disharmony abound on television's freshest new attraction for young adult viewers. From Bob Stewart Productions, with host Bill Cullen.

For the fun of it, call Viacom today.
The Week in Brief

FAT CITY □ NCTA heads for its New Orleans convention riding high on a year’s worth of regulatory good news and continued industry growth. In advance of that gathering, BROADCASTING’s David Crook and Randy Moskop (seated on sofa) sat down with NCTA’s Jack Schmidt (I) and Tom Wheeler to reflect on the medium’s recent successes and speculate on its future. PAGE 28. On the eve of the convention, the FCC gives the cable industry something to talk about. PAGE 30.

PERFECTLY CLEAR □ At an appropriations hearing, FCC Chairman Ferris comes out more strongly than he did in Las Vegas for some sort of spectrum-use fee. He also indicates that the commission will be dropping most of its cable-certification requirements. PAGE 27.

TONGUE-LASHING □ Senator Weicker, in strong terms, and Senator Hollings, in his quiet way, let FTC Chairman Pertschuk know how little they think of that agency’s proposals for children’s advertising. PAGE 29.

BETWEEN THE LINES □ A Supreme Court decision striking down a Massachusetts law prohibiting corporations from spending their own money to influence public referendums has special significance for the media: It reinforces the free speech rights of advertisers and, in Chief Justice Burger’s opinion, gives “media conglomerates” same First Amendment protection against restrictions. PAGE 30.

FALL LINE-UPS □ The TV networks get ready to unveil their prime-time schedules for next season, an annual spring display maneuver that no one really believes will be intact in September. PAGE 34.

A SEASON’S WORTH □ ABC-TV ranks the 104 shows that made it on the three networks’ schedules since September. The list runs from the high flying Laverne and Shirley to a Mulligan Stew that went down the disposer. PAGE 38.

ABC WRIST SLAPPED □ That network takes its turn being admonished by the FCC for “negligent” handling of a boxing tournament in 1977. PAGE 36.

‘BORN INNOCENT” □ The Supreme Court won’t step in for a review, so the way is cleared for a trial in California as to whether or not a TV drama with a rape scene contributed to later real-life crime. PAGE 37.

SEVEN-DAY RUN IN CANNES □ A record number of participants streamed through these portals to do a record amount of programing business at MIP-TV ’78. Here’s an on-scene report of the April 21-27 bazaar in which it is estimated that at least $20 million in sales took place. PAGE 42.

MAGID VS. KSD-TV □ They’re trading law suits over fulfillment of terms for a survey, payment involved and a subsequent “false and defamatory” statement. PAGE 58.

TALK IT OUT □ The National News Council urges dialogue between the American Bar Association and the press on the latter’s proposed trial coverage guidelines. PAGE 62.

NCTA’S DAN AARON □ It’s been a vintage year for cable, and the National Cable Television Association’s outgoing chairman is pleased with the progress. But the Comcast executive is quick to point out that there is still plenty to do. PAGE 69.
Tuning in together.

Grandfather's memories live with the old set, but today, radio's vitality is a part of everyone's daily life. Radio is an important part of our life at Taft Broadcasting Company. Our radio stations continue to contribute both profit growth and important service to each of their communities.

People want entertainment and information, and that's our business. With radio and television stations, Hanna-Barbera Productions and themed amusement parks, we're in some of the best growth industries around.

For more information about our record breaking performance, drop a note on your letterhead to – Mr. John T. Lawrence, Jr., Taft Broadcasting Company, 1906 Highland Avenue, Cincinnati, Ohio 45219.

Informing and entertaining the American family.
Liability
Supreme Court’s refusal to hear *Born Innocent* case (story page 37) seems sure to revive affiliate agitation for better systems of previewing network programs. Donald H. McGannon, president and chairman of Westinghouse Broadcasting, has been a leading agitator in past and is expected to renew his efforts for still better preview/preclear procedures. Though it depends on how *Born Innocent* lawsuit turns out and what if anything Supreme Court does then, on worst-case basis Mr. McGannon sees potential for suits against broadcasters comparable to malpractice suits against doctors, with tremendous costs involved. “It could be horrendous,” he said last week.

Hollywood humming
West Coast production community is happier than usual in current development season. Substantial replacement needs of NBC-TV and CBS-TV, plus efforts of ABC-TV to keep pipeline full, have kept producers busy, and networks have reportedly been willing to pay well for what they buy. Contributing to good feelings, one source said, is belief that ABC should be easier to deal with now that Fred Silverman is gone, while NBC should be easier to deal with once he gets there. (Producers have long complained about bureaucratic approval process at NBC, and theory is that Mr. Silverman will change that.)

Test of how long relationship stays rosy may be how many series on networks’ new fall schedules get full 13-episode orders. Networks are pushing for commitments of only six episodes for some new shows, so they can quickly cancel losers cheaply. One head of major studio said he’d refuse short orders; independents may not be so firm.

Quandary
FCC decision on what to do about CBS and its problems with “winner-take-all” tennis matches seems to be on hold. Some commissioners say temps have cooled since majority month ago was in mood for action and Charles D. Ferris talked of short-term renewal for one or more CBS-owned stations (“Closed Circuit,” March 6). One commissioner said he was “impressed” by mea culpa broadcast of Gene J. Jankowski, president of CBS/Broadcast Group (Broadcasting, April 10).

Ferris at NCTA
There was tight security last week on speech FCC Chairman Charles D. Ferris will deliver this week at National Cable Television Association convention. It’s expected, however, that speech will be philosophical and deal with cable’s role in technological evolution he’s been talking about to others.

Rematch finds home
ABC Sports is expected to announce acquisition of TV rights to Muhammad Ali-Leon Spinks heavyweight championship fight on Sept. 15. CBS’ option for bout—whichever if it had been picked up, would have cost network some $7 million—lapsed last Thursday (April 27), and CBS then entered bidding on equal footing with ABC and NBC. ABC’s price was pegged by sports executive outside that network at “in excess” of $5 million. That’s at least million more than CBS paid for first Ali-Spinks match, on which network lost money.

Billion-dollar baby
Fund for public broadcasting proposed in pending legislation may not bear slightest resemblance to long-range proposals to emerge from Carnegie Commission. Headed by William J. McGill, president of Columbia University, Report, to update 1967 study that led to creation of Corporation for Public Broadcasting, is to go to White House next January.

Administration-endorsed legislation proposes federal appropriation of $180 million for first five years and $200 million in next four. Carnegie II may envisage federal funding in billion-dollar range and de-emphasis of corporate underwriting and on-air auctions. In addition to spectrum-franchise tax that others are proposing, there’s talk of excess taxes on advertising revenues, receiver and transmitter sales. This would take into consideration revenues and profits of commercial broadcasting ($7.2 billion and $1.4 billion, respectively, for radio and TV in 1976, latest year FCC has reported).

Tuning in the future
While planned system for broadcasting House chamber proceedings remains on shelf, awaiting Speaker Thomas P. (Tip) O’Neill’s (D-Mass.) bidding, work is more than half finished on cable system for Capitol and House office buildings. Primary intention is to make closed-circuit connection between members and House floor. But system has 39-channel capacity and antenna already functioning atop Senate office building to pick up outside world.

Right now antenna is being used to pull down local TV signals and cable them to House members’ sets. But potential is there for communications uses being talked about at many commercial cable systems, including two-way communications and computer data transfers with other government agencies and departments. System also has capacity to pick up floor proceedings for telecast to other cable systems, but like proposed broadcast feed, that awaits decision of Speaker. Expense so far has been about $150,000 for laying of cable.

Early starter
First suggestion heard inside National Association of Broadcasters for successor to Charles Jones as radio vice president (see “In Brief”) is Wayne Cornils, currently NAB vice president for membership. Mr. Cornils is radio man, having left position as president-general manager of KFXD-AM-FM Nampa, Idaho, in 1976 to join NAB staff. Other names will doubtless surface after search formally begins this week. Salary is reportedly in $43,000 range.

In and out
NBC-TV is expected to announce this week that it’s signed Ted Turner’s independent channel 36 WXET-TV Charlotte, N.C., as its affiliate to replace Cox Broadcasting’s channel 9 WSCC-TV, which is moving to ABC-TV (Broadcasting, Aug. 1, 1977). Change is effective July 1. Bahakel group’s channel 18 WCCS-TV, which has been ABC outlet there, turns independent.

Border tension
San Diego broadcasters are getting ready for another Mexican invasion of their market. XETRA-FM Tijuana is said to be setting up sales and programing office in San Diego and preparing to boost its power from 1 kw to 100 kw at 2,000 feet, which would enable it to compete on better than even terms with San Diego stations in their own backyard. If fears are realized, San Diegans will ask FCC to apply Section 325(b) of Communications Act, which prohibits delivery of programing to foreign country for broadcast to U.S. unless FCC approval is obtained.

San Diego AM, FM and TV broadcasters, operating as Committee for Equality of Radio Frequencies, urged FCC to enforce that provision several years ago, when Paul Schafer’s Time Sales operation was delivering cassettes of U.S.-style programing across border to two Tijuana FM’s. Provision is generally regarded as applying to electronic transmission, rather than physical delivery, of programing. In any case, Time Sales went into bankruptcy before commission could conclude case.

May 18-20—Third annual Upper Midwest Communications Conclave for record people and broadcast
GROUP

congratulates
The National Broadcasting Company and all those associated with

"HOLOCAUST"

the powerful, dramatic presentation of a tragic period of history.

120,000,000 people watched "Holocaust"... further affirmation of the public's desire for significant, substantive television programming.

The success of specials like "Holocaust," like "Roots" and "A Family Upside Down," the week-in, week-out popularity of "60 Minutes," demonstrate the American public's interest in meaningful television and underscore the need for more programming that heightens our understanding of the world and its problems.

As part of the television industry, we at Group W congratulate NBC.
June 6—Third Asian-Pacific television conference, sponsored by The Cultural and Social Centre for the Asian and Pacific Region, Seoul, Korea, with San Francisco State University as co-host. Satellite communications will be the theme. San Francisco State University, San Francisco.

June 7—NBC Radio Network regional affiliate meeting, Sheraton O'Hare motor hotel, Chicago.

June 7—Advertising Research Foundation midyear conference. Hyatt Regency O'Hare, Chicago.

June 8-10—Alaska Broadcasters Association spring convention. Gulf Park Resort, Gulf Shores, Ala.

June 8-10—Florida Cable Television Association annual convention, Dutch Inn at Lake Buena Vista, near Orlando, Fla.

June 8-11—Mississippi Broadcasters Association annual convention. MBA board will meet June 8. Sheraton-Biloxi hotel, Biloxi, Miss.

June 8-11—Combined meeting of Missouri Broadcasters Association and Kansas Association of Broadcasters. Kansas City International Airport.

June 11-13—Montana Broadcasters Association annual convention. Fairmont Hot Springs Resort, south of Butte, Mont.

June 14—Virginia Association of Broadcasters spring conference. Salishan Lodge, Gleneden Beach, Ore.

June 15-16—Oregon Association of Broadcasters spring conference. Salishan Lodge, Gleneden Beach, Ore.

June 15-17—South Dakota Broadcasters Association convention. Holiday Inn, Mitchell, S.D.

June 16-17—Broadcast Financial Management Association/RCA quarterly board of directors meeting. Opryland hotel, Nashville.

June 16-18—Annual convention and awards banquet of Chesapeake AP Broadcasters Association. Hilton Valley Inn, Cockeysville, Md.

July 12-16—Combined Colorado Broadcasters Association/Rocky Mountain Broadcasters Association meeting. Manor Vail, Colo.

July 15-16—California Broadcasters Association midsummer meeting. Del Monte Hyatt House, Monterey, Calif.

July 16-19—National Association of Farm Broadcasters summer meeting. Fairmont hotel, San Francisco.

August

Aug. 24-25—Third annual Chicano Film Festival, presented by Center for Visual arts University of Southern California. Entries must be received by July 15. Theatre for the Performing Arts and the La Mansion motor hotel, San Antonio, Tex. Inquiries: 285 Oblate Drive, San Antonio 78216.

Aug. 25—Tennessee Association of Broadcasters
Announcing the newest in video freedom:

all you want in a 1" VTR backed by total support from RCA.

Now you can have complete freedom from worry about helical-scan VTR support. That's because your investment in the new RCA TH-100 1" VTR is protected by RCA. That protection means 24-hour parts replacement. Emergency service. TechAlert, for help as close as your phone at any time—day or night. Training support. Service manuals. You can be sure that RCA support is there, wherever your RCA equipment operates.

Quality to start with.
The new TH-100 is yours in the new SMPTE Type C non-segmented helical format. It's available in three studio configurations—rack, console or T-cart. A small, lightweight, rugged portable—the TH-50—is available for field production. All models deliver the picture and audio quality you need for professional results.

Among the many TH-100 features are two high quality program audio channels for stereo/bilingual use; complete recording/playback of video and vertical blanking interval; one cue/SMPTE time code channel; automatic color framing; five servos for optimum tape handling; two flexible tape timers; plus much, much more.

The TH-100 offers economical first cost, economical head cost, and tape economy, too.

Simplified edit control.
One bi-directional search knob gives you forward and reverse editing control, with selectable shuttle speeds up to 60 times normal. You get a color picture to 7 times normal, a recognizable picture at full speed when used with the TBC-100 time base corrector. For more video freedom, you can manually jog frame-by-frame—again, with a color picture.

Video freedom is everything you need for quality television.
RCA offers a brilliant array of VTRs, cameras, mobile units, antennas and transmitters. For more facts about any RCA equipment, including the TH-100, just contact your RCA Representative, or write us. RCA Broadcast Systems, Building 2-2, Camden, NJ 08102.
Where Things Stand

FCC’s rejection of occasional use tariff, however, is seen by some as legally risky and commission’s order rejecting rate which was issued only last month, reflects that view as it attempts to plug every loophole in decision (BROADCASTING, April 10).

Automatic transmission systems. FCC has allowed automatic transmission service for non-directional AM and FM stations (BROADCASTING, Jan. 3, 1977). Commission expects to permit ATS at AM directional and TV stations by spring.

Bell bill. So-called “Bell bill,” named after its chief supporter, AT&T, to limit competition in business communications field, is currently being considered in context of House Communications Subcommittee’s rewrite of Communications Act. Association of Independent Television Stations and National Cable Television Association have opposed it (BROADCASTING, Apr. 18, 1977), arguing it would bestow unconscionable monopoly on telephone companies, could drive specialized common carriers they now use out of business. On related subject, House Communications Subcommittee Chairman Lionel Van Deerlin (D-Calif.) has suggested FCC cable/common carrier crossownership rules barring telephone companies from providing broadband video services should be eliminated for rural areas, if not altogether (BROADCASTING, Feb. 20).

Broadcasting in Congress. Following House vote last year to open chamber to live daily broadcast coverage, House Rules Committee has recommended that rather than allow pool of commercial and public broadcasting networks to run system, House should set it up and work broadcast controls itself. Recommendation accords with wishes of Speaker Thomas P. O’Neill Jr. (D-Mass.), who has final authority in matter, but he says he will put it to vote of full House at some point. Under Rules Committee recommendation, broadcast feed of proceedings would be available to all TV and radio stations after experimental period, length of which is unspecified. Speaker O’Neill says it won’t be

- Sept. 15—Deadline for entries in 13th annual Gabriel Awards competition, sponsored by UNDA-USA, Catholic association for broadcasters and allied communicators. Material initially aired in the year prior to June 30, 1978, and which treats issues concerning human values will be eligible. Information: J. Jerome Lackamp, Gabriel Awards, Catholic Radio-TV Center, 1027 Superior Avenue, Room 630, Cleveland 44114; (216) 579-1633.
- Sept. 17-20—Broadcast Financial Management Association’s 18th annual convention, Keamney, Neb.

YOU'VE GOT A SHOT AT THESE COPS.

Columbia Pictures Television
before end of this year. In Senate, meantime, there has been no action on similar proposals for live broadcast coverage, but that body took unprecedented step of letting radio in to cover its debate on Panama Canal treaties. National Public Radio has carried large portions of that event live (BROADCASTING, Feb. 13 et seq.).

Cable economic inquiry. FCC has opened investigation into economic relationship between cable television and over-air television. Its purpose, commission says, is to provide factual information where "intuition" has been used with respect to cable television's likely impact on local television stations. Comments were due March 15 (BROADCASTING, March 20). On Capitol Hill, meanwhile, Senate Communications Subcommittee Chairman Ernest Hollings (D-S.C.) has announced his panel will begin hearings on legislation "designed to give cable legislative mandate"; National Cable Television Association and ABC have offered possible versions (BROADCASTING, March 6).

CBS/telenee matches. Network, under FCC threat of short-term license renewals for one or more of its O&O's because of wrongly promoted "winner-take-all" Heavyweight Championship of Tennis matches, has apologized to public for secondment by CBS President Gene Jankowski (BROADCASTING, April 10). Network has also filed statement with commission contending it has made up for transgressions and that errors must be placed in context of CBS's long-time broadcasting service (BROADCASTING, April 24). Commission now must act on that issue and related one concerning improper sponsorship identification.

carter use of broadcasting. President has held 30 televised press conferences since assuming office, close to promise he made to hold them twice monthly. He has also made unprecedented radio-TV appearances in formats ranging from CBS Radio call-in show to "fireside chat" on energy last winter and one in February on Panama Canal to year-end interview with representatives of four national TV networks.

Children's advertising. Federal Trade Commission staff has proposed that commission ban advertising on television to children under age 8, prohibit ads for highly sugared products and require counteradvertising for sugared product spots that are permitted. Commission then voted to institute rulemaking inquiry on those proposals, and reaction from industry was immediate (BROADCASTING, March 13). Proposed rule was published in Federal Register April 27; comments, therefore, will be due 135 days hence.

Action for Children's Television, which got whole ball rolling with petition to FTC, has also gone to FCC with petition urging end of TV ads for children (BROADCASTING, Feb. 27).

closed captioning. FCC has adopted order opening door to system of closed captioning of television programs for benefit of hearing impaired. Closed captioning involves transmission of TV signal on line 21, field 1, and available half of line 21, field 2, of television blanking interval for captions that are visible only to those with decoding equipment.) President Carter wrote commercial networks last February, urging them to make use of system. However, only ABC offered positive response. CBS and NBC were at best tentative in their answer. Technical and cost problems are cited as obstacles to use of closed captioning system. However, administration is not giving up. Officials of Department of Health, Education and Welfare have not separated each of network producers and advertisers in ongoing discussion of problems.

Commercial practices at noncommerical stations. FCC has started inquiry that will examine whether public stations are stepping too far into realm of commerce. Last round of comments in this proceeding was filed last summer (BROADCASTING, July 25, 1977).

Communications Act rewrite. House Communications Subcommittee staff is currently working on a rewrite of Communications Act of 1934, to be introduced on or before June 1 by subcommittee Chairman Lionel Van Deerlin (D-Calif.), ranking Republican Lou Frey (R-Fla.) and possibly other subcommittee members. Meetings have been held to get subcommittee member's suggestions for legislation (BROADCASTING, March 13) and at least one more, on broadcasting and cable issues, is expected to be called. After bill is introduced, there will be more hearings. Broadcasters, on their own initiative, have expressed concern to broadcasters and subcommittee's hand-picked rewrite advisory committee, have maintained steadfast opposition to project, but have agreed to lower their guns until after they see first draft. How long it will take to get bill through subcommittee, full Committee of Conference and House— if it can be moved at all—is anybody's guess. So is what it will say. Chairman Van Deerlin knows what he wants to accomplish, however (BROADCASTING, Dec. 5, 1977): (1) to promote more diversity of broadcasting services; (2) to provide for more efficient use of spectrum, including, possibly fee for spectrum use; (3) to remove barriers to development of news communications technologies, and (4) to assure access to diverse viewpoints to media.

Crossownership (newspaper-broadcast). Supreme Court heard oral arguments Jan. 16 on question of whether FCC should permit common ownership of broadcast stations and newspapers in same market (BROADCASTING, Jan. 13). The Court, however, that crossownership case will finally be resolved not by Supreme Court but by Congress. Legislation (H.R. 5577) has been introduced by Representative Samuel Devine (R-Ohio) to prohibit changes from common ownership in broadcast license proceedings and bar divestiture of crossowned media. And, to some extent, events are overtaking courts and Congress. Actions threatening existence of crossowned media have been followed by quickening trend to dissolve crossowned media holdings. Last year, eight transfers or assignments of licenses involving crossowned stations were announced (BROADCASTING, Dec. 12, 1977): two, however—swap of Multimedia's W-FAC-TV Greenville, S.C., for McCratty Newspapers' (KTV) Stockton, Calif., and of WJJ-A TV Washington for koco-TV Oklahoma City plus preferred stock—have been called off (BROADCASTING, March 20, 27).

Crossownership (television broadcasting-cable television). FCC has amended its crossownership regulations to permit crossowned with TV station that is only commercial station to place city-grade contour over cable community (BROADCASTING, March 8, 1976). National Citizens Committee for Broadcasting is seeking appeals court review, arguing rule should be broader. Two system owners involved are appealing on appropriate grounds (BROADCASTING, April 26, 1976). Court is holding FCC's petition for summary judgment pending Supreme Court's disposition of petition for review in broadcast-newspaper crossownership case (BROADCASTING, April 25, 1977). Pending before appeal court are petitions by three crossowners for stay of deadline for divestiture.

EEO. One rulemaking proposal left over from administration of former FCC Chairman Richard E. Wiley which commission under Charles D. Ferris will resolve involves equal employment opportunity rules for cable television systems. Supreme Court, in decision involving Federal Power Commission and its role—or lack of one—in EEO matters, appeared to cast doubt on FCC authority to impose EEO rules on cable systems. So FCC general counsel's office under Chairman Wiley had felt. Whether new general counsel will feel the same, after reviewing comments that have been filed in proceeding, remains to be seen. In broadcast EEO arena, comments were filed last week on proposed order 395, which commission's annual employment reporting form, to reflect more accurately job positions in industry (see story, page 48). As for FCC's internal EEO: It's poor, according to report by Citizens' Communications Center, which contended that top jobs be held by white males (BROADCASTING, April 3).

Family viewing. Judge Walter Ferguson of U.S. District Court in Los Angeles has ruled that family-viewing self-regulatory concept is unconstitutional (BROADCASTING, Nov. 8, 1976) and National Association of Broadcasters could not enforce concept, which was embodied in its television code, and rewrite code to reflect more accurately job positions in industry (see story, page 48). As for FCC's internal EEO: It's poor, according to report by Citizens' Communications Center, which contended that top jobs be held by white males (BROADCASTING, Sept. 19, 1977).

FCC fees. Commission has embarked on effort to determine how much of $163 million in fees it received between 1970 and 1976 was collected illegitimately and to make necessary refunds. It is also undertaking task of developing another fee schedule to replace schedules overturned by courts. Under plan presented to commission by staff (BROADCASTING, Jan. 16), agency would begin making refunds in July to Broadcasters' surplus of fees paid to FCC estimated at $47.5 million. Still pending before U.S. Court of Claims is request by some 90 parties, including broadcasters, for refund of fees.

FM quadraphonic. National Quadraphonic Radio Committee (NQRC) was formed in 1972 by industry groups. It submitted its conclusions to FCC in 1975, and commission has conducted tests at its laboratories since then. FCC issued notice of inquiry in June 1977 to study merits of various quadraphonic techniques. Comments were filed late last year (BROADCASTING, Dec. 19, 1977).

Format changes. FCC has concluded inquiry to determine whether it can or should be involved in regulating program formats with order concluding that it can't and shouldn't
Citizen determination should trolled enterprises. National Association filed ownership. Comments sale.

Among renewal bills pending and tee chairman Lionel License renewal mission lacks authority uncertain since 1977). Court has ment routine by position

that sell to several stations are擎, CB under obscenity (BROADCASTING, 1974. Senate continues which came close House broadcast
to increase programing, which brought commission. which brought

words" that overturned national license (BROADCASTING, 1977). Court has

in stereos) that Supreme renewed. Representative Minority broadcast enterprises. Representative (and representative Ceci Hefel (D-Hawaii) has in-

troduced legislation to allow SBA to exceed its $500,000 limit in loans to minority interests for purchase of Pay TV system. But also incorporates NAB's tax-clubment (BROADCASTING, Dec. 5, 1977). And, NAB and National Radio Broadcasters Association have also taken initiatives in this area, NRBA establishing program for members to help minorities set up task force to find funds to back new minority broadcast enterprises. NAB task force has met and formed two subcommittees, one for help support services, one for funding (BROADCASTING, Apr. 3).

Network exclusivity on cable, FCC order substituting 35- and 55-mile zones for signal contours as basis of protecting television stations has been affirmed by U.S. Court of Appeals in Washington (BROADCASTING, March 21, 1977). Appeals had been filed by CBS, NBC and ABC television affiliates associations, National Association of Broadcasters and number of individual broadcasters. Commission has denied petition for reconsideration of order. Commission has also begun inquiry to determine purpose, desirability and effect of exclu-
sionary rules in light of adoption of copyright law including limited cable liability (BROADCASTING, Nov. 9, 1976).

Network Inquiry. FCC's network inquiry is back on track after being derailed last summer when Senator Ernest Hollings (D-S.C.), chairman of Communications Subcommittee and the appropriations subcommittee, blocked transfer of FCC funds necessary to finance project. He wanted inquiry to be conducted by new Demo-

cratic chairman of commission. That chairman, Charles Ferris, has selected co-directors of staff for inquiry (BROADCASTING, Feb. 20), and they will sign on full time in June. Inquiry is in response to petition by Westinghouse Broadcast-

estaking examination of network-affil-

iate relationships.

NTIA. Executive order creating new National Telecommunications and Information Admin-
istration has been signed by President Carter (BROADCASTING, April 3). Positioned in Depart-
ment of Commerce, it will be headed by assis-
tant secretary; Henry Geller, one-time general counsel of FCC and noted for progressive-liberal approach to communications regulation, has been nominated to post. Hearings on nomina-
tion, before Senate Commerce Com-
mittee, have been held (BROADCASTING, April 17). New agency will have functions and responsibilities of White House's Office of Telecommunications Policy and Department of Commerce's Office of Telecommunications; it's expected to employ 300 persons, have annual budget of $12 million.

Operator licensing. Comments were filed in January in FCC rulemaking looking to drop require-
ment for tests for what are now third-class radio operator licenses (BROADCASTING, Jan. 9). Rulemaking has ended for dual (BROADCASTING, Dec. 26, 1976). Missouri license structure—one series for routine operation and one for maintenance of various classes of radio stations—for retitling of licenses and for new class of license for operation of television transmitters.

Pay cable; pay TV. U.S. Court of Appeals in Washington has overturned FCC rules de-
dsigned to protect broadcasters against siphoning of sports and movie programing (BROAD-
CASTING, March 28, 1977) and Supreme Court recently held that local broadcast stations cannot use authority to pre-empt pay-cable rate regulation has been upheld by U.S. Court of Appeals in New York (BROADCASTING, April 10). As industry, pay cable reached 1.2 million subscribers on 440 systems in 1977. Pay subscribers represent about 15% of cable viewers who pay $9 million in revenues monthly. There are two over-air pay TV stations currently telecasting: wnvr, Newark, N.J. and wscv Corona, Calif.

Payola. FCC investigation into pay-offs to station disk jockeys is currently behind closed doors after commission last year held open hearings into allegations of payola in Washington (BROADCASTING, Feb. 21, 1977). Commission says it is looking into similar charges in other cities. In unrelated case, Nat Tarnopol and three other Brunswick Record executives won reversal of federal convictions on multicolored charges. U.S. Attorney Philadel-
phia has remaried case to district court, how-

ever, for new trial on count relating to alleged payola (BROADCASTING, Aug. 29, 1977).

Performer royalties. Representative Robert Kastenmeier's (D-Wis) Judiciary Subcommit-
tee on Courts, Civil Liberties and the Adminis-
tration of Justice has held hearing in Los Angeles on Rep's new (D-Calif) legislation to create per-
former royalties, which broadcasters and other users of recorded music would have to pay record performers and manufactur-
ers (BROADCASTING, April 3). Another is expected to be introduced later in March by Congresswoman Barbara Ringer, who recommended that Congress pass Rep's bill (BROADCASTING, March 26).

TV violence and sex. Following hearings before Senate Communications Subcommittee and report by House Communications Sub-
committee on TV violence last year, there is no perceptible movement in Congress on issue of television violence. But controversy, which seems to be shifting from violence to sex on TV, is still heated in private sector, where most outspoken agitator for more family programing is national Parent Teachers Association. PTA has produced program rating guide scoring prime-time programing offensive to children and has announced a new program to create a school curriculum for teaching young people how to watch television critically. Association has received $30,000 contribution for project from CBS and has recruited Gene Jankowski, president of CBS/Broadcast Group, to help raise more. Meanwhile, University of Nickel's University of Anchorage's George Gerbner's annual TV violence "index found declining amounts of hard-ac-

tion programing (BROADCASTING, April 3).

UHF FCC's May 1975 notice of inquiry on UHF taboos to determine whether restriction on proximity of stations could be reduced is still outstanding (BROADCASTING, June 2, 1975). Commission has established task force to draft master plan for use of UHF spectrum (BROADCASTING, March 14, 1977). Task force has reported to commission that land-mobile pressure for UHF spectrum space can be eased technologically (BROADCASTING, Feb. 6). National UHF Broadcasters Association has held first membership meeting (BROADCASTING, May 1 1976
March 18, 1977). Texas Instruments has delivered prototype receiver; built under FCC contract, which is aimed at overcoming UHF taboos (Broadcasting, Feb. 20). Commission will hold panel discussions May 10 to discuss potential for lowering UHF noise level (Broadcasting, April 10).

VHF drop-ins. This FCC proceeding, of several years' standing, looks to short-spaced TV assignments in four markets and anticipates possibilities of further rulemakings for drop-ins in other markets (Broadcasting, March 14, 1977). Comments, most of them negative from broadcasters, were filed with commission late last year (Broadcasting, Dec. 19, 1977).

WARC. U.S. and 152 other member nations of International Telecommunication Union are in the recent National Association of Broadcasters convention and heard several broadcasters bemoan the lack of potential minority employees in or near their communities.

I teach at a predominantly black institution. Among my duties is searching out internships for our journalism students.

Consider this—students have hometowns. You may well have a resident of your community attending a distant university. This student is probably looking for a summer internship or a summer job.

You can trace potential applicants through the counselors at your local high schools and community colleges. You can also contact institutions, such as ours, to see if they have someone who would fit your needs.

Look into internships—they allow you and the minority student to get acquainted—within minimal obligation to either party. — Phillip G. Keirstead, associate professor, broadcast journalism, Florida A&M University, Tallahassee.

Stop the music?

EDITOR: I've read with interest the continuing arguments for and against the proposed performer royalty bill. It seems to me that there is a simple way to demonstrate the industry's position to the proponents of this bill, without alienating audiences in the process. If radio stations across the country, for a period of one month, refused to add any new recordings to their playlists, but simply relied on music released prior to that month, it would bring the popular music industry to a standstill. Such action initiated by a handful of major-market top-40 stations might encourage the rest of the broadcast industry to follow suit. Perhaps that would impress upon the music industry the effect such a permanent embargo might have upon them if the bill were to become a reality. — John F. Schneider, district sales manager, McMartin Industries, Kirkland, Wash.

Now on the Air Across the Nation

...a three-minute program that can open new sales horizons for you.

INSIGHT on the issues
with Larry Butler

The Mutual Broadcasting System and the National Association of Manufacturers present “INSIGHT on the Issues,” a daily, three-minute Mini-Feature that gives listeners both sides of complex economic and governmental policies being considered in Washington.

It’s excellent public affairs programming for stations, and “INSIGHT on the Issues” can open new sales avenues to stations in every market. Members of the NAM are spread throughout the country, and they’re receptive to sponsoring “INSIGHT on the Issues” in markets of every size. It’s a natural advertising vehicle for them; it’s a money-maker for you. Mutual offers “INSIGHT on the Issues” at no cost.*

Here are just a few of the advantages of carrying “INSIGHT on the Issues”:
1) It’s perfectly suited for news blocks in morning and afternoon drive times...and compatible for all station formats.
2) It’s a potential jumping off point for your local talk show.
3) “INSIGHT on the Issues” qualifies as public affairs programming.
4) “INSIGHT on the Issues” is brief (three minutes, including a one-minute local station commercial) and to the point.

Larry Butler

As part of Mutual Radio’s late afternoon news program, “The World Today,” award-winning author and reporter Jeffrey St. John presents “IMPACT of the World Today,” a programming feature designed to relate economic and political issues directly to listeners’ daily lives.

Sponsored in part by the National Association of Manufacturers, “IMPACT of the World Today” deals with news events behind the headlines and how those events affect your listeners. Stations clearing “IMPACT of the World Today” create new sales opportunities, too. NAM members throughout the country are aware of the organization’s commitment to this Mutual News exclusive and are anxious to join in the sponsorship on a local level.

Here’s an opportunity to add a new dimension to afternoon drive time programming and increase sales, too, with Mutual’s “IMPACT of the World Today.”

With consumer interest at an all-time high; with Americans growing more and more concerned about the economy, “IMPACT of the World Today” will be an excellent addition to your afternoon programming.

For clearance information in your market, call or write Mutual Station Relations at 703/685-2050.

*Non-affiliates must interconnect to the nearest point of Mutual Network Service.

Trying with TV to stand out in a crowd

The Straw Hat Restaurant Corp. could become a maverick in the fast-food industry. The Dublin, Calif., restaurant chain is bucking the trend toward look-alike television advertising and taking off at a gallop with a concept and coordinated campaign that are like no other.

When Straw Hat gave its advertising agency, San Francisco-based Hoefer Dieterich + Brown, the assignment to abandon the conventional fast-food type of advertising and give it an entirely fresh approach, there were several immediate problems.

Obviously fast-food advertising is in a rut. In most cases a competitor's name could be substituted in any fast-food commercial with no one the wiser. Straw Hat is also in the midst of a major remodeling project, with some restaurants converted, some not, thus compounding the identity problem. Finally, there was a challenge to create a concept that would implant the Straw Hat name and quality theme in the minds of viewers.

A research segmentation study told us that most consumers saw all pizza advertising as relatively alike, all following a similar format—people eating in a restaurant with a light, snappy jingle playing in the background. By creating a completely different advertising and marketing concept, we felt we would be giving Straw Hat new meaning, projecting it as a place you would think of as a fun place for lunch or dinner.

We gave the agency the assignment to develop a campaign that would give people a reason to want to go to Straw Hat restaurants and set our advertising apart from the industry with top-of-mind awareness that we are unique.

Television was chosen as the primary medium for several reasons. One, the competition is there. Two, television is especially suited to reach the target young-family audience Straw Hat is after. Three, the story Straw Hat has to tell is colorful and energetic—ideal for a visual medium.

The winning campaign was based on a make-believe Italian legend Hoefer Dieterich + Brown developed, which reinforced the type and nature of the product we serve. It is also indisputably tied to the Straw Hat name.

According to the "legend," there is a mythical village in southern Italy called Pizza which during the Middle Ages established a reputation for a distinctive culinary creation that featured a special blend of cheeses transported in nets of straw. One day in 1936 the king of Italy, Ferdinand 1, asked to sample the special product of Pizza.

The master baker of the small town traveled to the capital and baked his special pizza for the king, who was delighted beyond words. To show his appreciation, the king presented the baker with a wealth of treasures in a straw hat, which led to the creation of a secret "Society of the Straw Hat" (Societa del Capella di Paglia) and an annual parade and festival to celebrate the event, which legend has it still takes place in Pizza and culminates every year in the awarding of the straw hat to the best pizza baker in the village.

Such is the basis for the 60-second and 30-second TV spots that are the core of Straw Hat's exceptional new advertising effort. The campaign fits snugly into the national scope of the restaurant's aggressive marketing strategy for "New Generation," a concept currently being initiated that essentially revamps the restaurant chain's entire operation in line with a concentrated marketing study conducted over a two-year period.

Production of the new campaign proved to be a complicated and time-consuming procedure requiring the coordination of crews from Straw Hat, Hoefer Dieterich + Brown and the production company, Bill Alton Films, New York, for a two-week shoot in Italy aimed at recreating the pomp and ceremony inherent in the Straw Hat legend.

The majority of the footage was shot in the tiny southern Italian villages of Ravello, Amalfi, Minori and Cetara, which served as the mythical village of Pizza. The legendary parade and awarding of the straw hat were staged with entire villages enthusiastically joining in the spirit of the festivities. The results were genuine, exciting, and thrilling beyond our expectations.

One of the three principal spots, titled "The Society," features a solemn meeting of the secret society and focuses on the Hot Hat sandwich, an exclusive Straw Hat offering. Voice-over narrates: "Once a year in Pizza, Italy, they meet to dine on a special sandwich: the legendary Hot Hat. They swear never to reveal the recipe for this scrumptious roll of pizza dough baked around delicious fillings. For the Hot Hat sandwich is one of the society's most closely guarded secrets. And a true Hot Hat lunch can only be made by that secret group of master pizza bakers who wear the Straw Hat." Another spot highlights the parade that greets "the opening of the pizza season" in Pizza. As the parade sweeps by, voice-over explains that every year the town has a festival and a contest to choose the best pizza baker in the village, who is then awarded the coveted straw hat. As the winner wearing his Straw Hat passes by lifted high above the crowd, voice-over closes "So if there's a pizza maker in your town wearing this Straw Hat...well, you get the point."

The campaign rolled out in three flights that began on Feb. 20. The first phase continued to break in 10 markets during February and March with heavy fringe and prime-time spot TV exposure.

The California markets were blitzed included Sacramento, San Diego, Chico/Redding, Los Angeles, San Francisco, Fresno and Monterey/Salinas. Also included were Tucson, Ariz., and Reno and Las Vegas.

The second flight occurred last month and included fringe and prime-time TV at sustaining levels. It was extensively promoted with an Italian festival and sweepstakes tie-in. The final flight of the campaign will occur in late spring. Some radio, newspaper and direct mail is being used to back the TV campaign.

Straw Hat expects to see a 10% increase in sales within eight months as a result of its landmark Italian campaign. The concept and creative efforts were developed on a national level so that the campaign can be easily rolled out as Straw Hat expands nationally.

Cable in 1978: about to break $1-billion barrier

Industry heads for New Orleans riding a crest of regulatory good news and continued growth; Schmidt reflects on past victories, looks to battles of the future

The fortunes of cable television, whose past course has more closely resembled a rollercoaster’s than a rocket’s, are on the upswing again. Looking ahead—as Broadcasting did last week, on the eve of this year’s 30th annual convention of the National Cable Television Association—one can see the prospect of cable’s first billion-dollar year.*

No wonder then, that Robert Schmidt is going to New Orleans so optimistic about the future: The recent past has been so good to him and to NCTA.

In the government arena, cable’s progress has been swift. The legislative and court victories have come as steadily as the steps in a fast march, beginning in 1976 when the FCC rescinded its cable “leapfrogging” restrictions. That was followed by an appeals court decision early last year overturning the FCC’s restrictions on pay cable carriage of sports and movies. This year Congress passed a law establishing the FCC’s and the states’ authorities to oversee the reasonableness of rates charged to cable operators for pole attachments. And in another appeals court decision, the FCC’s rules governing cable’s access channels have been challenged.

There was another significant occurrence that on its face would not seem to be in cable’s favor—the passage in 1976 of a copyright law that made cable liable for the first time for the unauthorized use of copyrighted TV and radio programs. The programming that once came free now has to be paid for, although broadcasters would argue that cable operators were given significant discounts when Congress provided compulsory licenses for them.

The importance of the passage of copyright, Mr. Schmidt says, was that it gave recognition to cable for the first time as a member of the communications fraternity. The pole attachment bill, in turn, gave the industry some stability, he said. "No longer are we going to have to operate with hat in hand at the telephone and power companies."

At the same time the industry was collecting those medals to pin to its vest, it was putting money in its pocket. In two years, industry revenues grew by about $100 million, the number of systems grew by about 500 and the number of subscribers increased by about three million. Pay cable grew from about 600,000 subscribers to about 1.6 million ($144 million revenues).

Interests with money to lend to cable have multiplied in the last two years and activities such as Time Inc.’s purchase of American Television & Communications Corp. (see story, page 63) indicate to Mr. Schmidt that companies in related industries are accepting cable.

On the eve of NCTA’s annual conven-

Building boom. NCTA figures indicate that the rate of construction in the cable industry has increased more than 70% in the past two years. It projects that 21,600 miles of new cable will be laid this year, compared to 12,500 in 1976.

David O. Wicks, with the New York investment banking firm of Warburg Paribas Becker Inc., sees several factors contributing to that spurt, the primary one being that there is more money, especially for the major firms, which as a result have undertaken construction of systems that were on the shelves for years. One of the reasons money began to loosen up after the mid-1970’s “credit crunch,” Mr. Wicks says, is that the industry as a whole improved its planning and management techniques and brought in high-caliber recruits. Basically, it gradually developed more confidence in itself, and this spread to the investment community, he says.

Another major factor was the acceptance of pay cable, both within the industry and among the lenders. It’s a market-tested product now, Mr. Wicks says, and systems are finding pay cable a useful selling tool to shoehorn cable into markets where there is a plethora of over-the-air television signals. Finding the key to those markets has in fact provided the greatest impetus for growth. The suburbs are where the action is in cable these days; that’s where the big companies are building. ‘We’re not just talking about million-dollar systems. We’re talking about $10-, $15- and $20-million projects now,” Mr. Wicks says.

There is another factor that may affect the growth curve, but no one knows for sure how. That is new services, exemplified by Warner Cable’s Qube system in Columbus, Ohio. It is too early to tell how well that system’s two-way capacity will hold up with subscribers, Mr. Wicks says. “The glamour of something new hasn’t worn off.” But he says he isn’t as pessimistic about the experiment as some observers, if not a complete success, at least it will lead to the development of a Qube hybrid, he feels, which will be salable.

How long and how fast cable’s growth will continue depends partly on who is doing the building. If the major companies, with lots of money to spend, are active, then it will probably continue at a rapid rate. Mr. Wicks says. But regardless, it is his feeling that building won’t stop for five years, at least.

* NCTA estimates that total cable industry revenues were $985 million in 1977. Conservative estimates anticipate the industry will grow another 10% to 12% this year (cable’s annual growth has averaged over 14% since 1971), pushing it comfortably over the $1-billion mark. Additional growth in the pay cable area—which contributed $144 million in last year’s fortunes—may put the 1978 total even higher.

Copyright, Mr. Schmidt says, was that it gave recognition to cable for the first time as a member of the communications fraternity. The pole attachment bill, in turn, gave the industry some stability, he said. "No longer are we going to have to operate with hat in hand at the telephone and power companies."

At the same time the industry was collecting those medals to pin to its vest, it was putting money in its pocket. In two years, industry revenues grew by about $100 million, the number of systems grew by about 500 and the number of subscribers increased by about three million. Pay cable grew from about 600,000 subscribers to about 1.6 million ($144 million revenues).

Additional growth in the pay cable area—which contributed $144 million in last year’s fortunes—may put the 1978 total even higher.
TOP OF THE WEEK

Where to be if you don't have to be somewhere else. How to choose among the myriad workshops and speeches is a not-so-small task facing delegates attending the National Cable Television Association's annual gathering in New Orleans this week. With an agenda spanning four days and a cast of hundreds there will be constant competition for his and her time. The sessions fall under the general headings of management, engineering, financial and government relations, allowing the convention-goer to stick with one specialty or spread himself around. As an aid in making up minds, the editors offer this list of sessions that appear suited to just about everyone.

Sunday 1 p.m. Opening session with keynote address by House speaker Thomas P. (Tip) O'Neill Jr. (D-Mass.), followed by comments from FCC Cable Bureau Chief Philip Verwee.

Sunday 5-6 p.m. Exhibitors reception.

Monday 8:15-9:45 a.m. Workshop on "tailoring your approach to financing.

Monday 10:15-11:45 a.m. Workshop called "the future is today" with Representative Henry Waxman (D-Calif.) and former FCC Chairman Richard Wiley, among others.

Monday noon. Luncheon with Senate Communications Subcommittee Chairman Ernest Hollings (D-S.C.) speaking.

Monday 2:30 p.m. Annual membership meeting. Outgoing NCTA Chairman Daniel Aaron presiding.

Tuesday 8:15 a.m. Workshop on "franchise renewals and new approaches.

Tuesday 8:15 a.m. Workshop called "Washington Wire" with House Communications Subcommittee members John Murphy (D-N.Y.) and Charles Caney (D-Ohio), FCC Commissioner James Quello and Paul J. Bortz of the National Telecommunications and Information Agency.

Tuesday 8:15 a.m. Workshop on "making pay cable pay.

Tuesday 10:15 a.m. Workshop called "fiber optics: we're all waiting.

Tuesday 10:15 a.m. Workshop on "financing for the future.

Tuesday noon. Luncheon with FCC Chairman Charles Ferris speaking.

Tuesday 2:30 p.m. Workshop on the "the future of television" with television producers David Susskind and Norman Lear, among others.

Tuesday 8:30 p.m. NCTA chairman's reception with the by-then-new chairman, Robert Hughes.

Tuesday 7:30 p.m. NCTA anniversary banquet with Frank Gorshin entertaining.

Wednesday 8:15 a.m. Workshop on "other (competitive or compatible) pay services.

Wednesday 10:15 a.m. Workshop, "get ready for advertising."

Wednesday noon. Luncheon with House Communications Subcommittee Chairman Lionel Van Deerlin (D-Calif.) speaking.

under the category of general technologies in the marketplace," he said. Cable will take Mr. Ferris at his word about encouraging alternatives in the marketplace, he said. "We're ready. We want in the arena."

On the Hill, two key personalities are Communications Subcommittee Chairman Lionel Van Deerlin (D-Calif.) in the House and his opposite number in the Senate, Ernest Hollings (D-S.C.). Both have indicated sensitivity in general terms to cable's fight against FCC regulation. Both are in positions to act on cable's requests and, in fact, both have projects in the works that may do just that. Mr. Van Deerlin is masterminding his subcommittee's rewrite of the Communications Act, the purpose of which, he says, is to clear obstacles from the path of new technologies and promote diversity in communications. Mr. Hollings's staff is working on a new cable bill, introduction of which is expected soon.

NCTA hopes that the two projects will grant the association two of its legislative priorities: (1) a statement that cable is no longer ancillary to broadcasting and (2) a degree of homogeneity in the regulation of cable at all levels of government — federal, state and local.

All the foregoing is to state the positive side of Mr. Schmidt's view of cable. There are some additional realities that can temper that picture somewhat.

One is the power of broadcasting, which continues to hold a hard line against almost anything that might encourage cable. Mr. Schmidt continues to feel that there is no reason broadcast stations and cable should be adversaries. He is confident that the FCC's ongoing economic inquiry into the cable-broadcast relationship will demonstrate that although there may be evidence of some harm from cable to broadcasting in isolated markets, not enough will be demonstrated to justify general restrictions on cable across the board.

The adversary relationship between broadcast stations and cable will not continue for long, Mr. Schmidt predicts — "not when you have the presence of so many broadcasters in our business."

But relations between cable and the networks is something else again. There Mr. Schmidt expects continued friction, focusing on pay cable, which the networks have long argued has the potential for outbidding them for what is now over-the-air entertainment programming.

Although it is feeling stronger all the time, cable cannot compete with broadcasting for sheer clout in Washington, Mr. Schmidt says. In response to broadcasters' fight, cable can respond just one way: "We can't go in and play a heavy game," he says. "We've got to sell [our position] on the merits."

That sets the scene for cable's fight, for instance, against FCC restrictions on distant-signal importation, which some operators feel are standing in the way of cable's development in urban markets. Those rules were designed, of course, to protect broadcast programming.

Although cable might be expected to be worried about competition from other developing technologies, Mr. Schmidt tosses that suggestion off with a shrug. When talking about fiber optics, video disks or satellites, one is talking about different ways of delivering video product, he says.

Cable, in his opinion, will find ways to adapt. He thinks, for instance, that if satellite distribution is adapted for home use, the signal will still have to travel at least part of its route through cable. "I don't think you will see the complete removal of a hard-wire system," he says.

From Mr. Schmidt's vantage point, cable's fight shouldn't be with broadcasting and isn't with other potential competitors. But it is with someone else—the telephone system. With wires already strung to virtually every home in the country, the telephone system seems to some suited to become a carrier for a variety of audio and video services, including those already carried by cable. Representative Van Deerlin raised a few hairs when he suggested in a speech last February that Congress and the FCC should re-examine restrictions on telephone-cable crossownerships, not just in rural areas, but "across the board."

NCTA members, in their convention in New Orleans this week, will be hearing from Mr. Van Deerlin as well as Mr. Hollings and Mr. Ferris. In sessions in between those appearances, they will doubtless be delighted with stories about the industry's present momentum. Perhaps from these men, they'll also get a glimpse of how far that momentum can carry cable.
Ferris on Hill:
Once more, with feeling, on a fee

FCC chairman, in appropriations testimony, says more concretely what he hinted at in Las Vegas—that spectrum users should be paying for their space; he also reveals that refund plan will be ready this summer and that cable certification likely will be dropped.

FCC Chairman Charles D. Ferris last week made it even more explicit than he did three weeks ago in his speech to the National Association of Broadcasters convention (Broadcasting, April 17). He "strongly" favors some "mechanism" to obtain from those who use the spectrum a "public dividend"—some form of fee.

He has no firm view on the form of the dividend—"a fee" or "percentage lease" or some other. He would leave that judgment to Congress. But he indicated he supported the idea of using the money raised to help support public broadcasting.

The matter came up during a Senate Appropriations Subcommittee hearing on the administration's request of $67,035,-000 for the commission in fiscal 1979. Senator Ernest F Hollings (D-S.C.), who is chairman of the Appropriations Subcommittee as well as of the Communications Subcommittee, which has oversight responsibility for the commission, asked how the chairman felt about a spectrum-use fee. "I'm trying to find money for public broadcasting," Mr. Hollings said.

The idea for raising public broadcasting money from users of the spectrum originated with Representative Lionel Van Deerlin (D-Calif.), chairman of the House Communications Subcommittee, in connection with that subcommittee's rewrite of the Communications Act. And he took Chairman Ferris's remarks in his Las Vegas speech about a mechanism to "yield a public dividend" from spectrum users as an endorsement of the idea.

Chairman Ferris last week indicated he is concerned with more than simply raising money. He discussed the spectrum-use fee in terms of "spectrum economics." "We waste spectrum," he said. And, as have others, he suggested that a spectrum fee would encourage the development of spectrum-saving technology.

The chairman made a couple of other noteworthy remarks in the hearing. He said the commission is proceeding "full speed" toward developing plans for refunding fees illegally collected between 1970 and 1977 from those the commission regulates. And he disclosed that the commission is moving toward the abolition of the present process of certifying cable television systems.

Chairman Ferris said the commission expects by August to have developed plans for refunding fees of more than $20, and to begin making refunds by the fall. The development of a computer program for refunding the far more numerous fees of less than $20, however, is probably a year away. Along with the refund machinery, the commission is developing a fee schedule—to replace the second of two the courts have declared invalid—to determine how much of the fees collected must be returned, and what the fees will be in the future.

The disclosure about the likely end of the cable certification process came early in the hearing, when Senator Hollings asked if it were necessary to have 22 Cable Television Bureau personnel assigned to the task of certification.

"We may have proposals before the commission in a couple of months to consider doing away with this," Chairman Ferris said.

The remark came as a surprise. But Chairman Ferris—and former Chairman Richard E. Wiley before him—have said that, if the agency were authorized to fine cable systems, in certifying commission rules, it would not need the control over systems the certification process provides. And Congress in the current session has provided the commission with that authority. (Cable Television Bureau Chief Philip Verveer suggested later that the staff may recommend relying on complaints by those adversely affected to police rule violations. But he also said the commission probably would continue to impose "informational and procedural requirements").

But Chairman Ferris indicated the commission is not ready to give up the 22 positions involved. Implementation of the forfeiture law "might require eight or 10 people," he said. However, he had no immediate comment as to where the remaining 12 or 14 might be reassigned.

In other matters, Chairman Ferris restated the views he had expressed a week earlier in his appearance on the Today program. He repeated that technology holds for the development of four more television networks and his commitment to help develop policies consistent with the realization of that potential. But he also said the potential would be a long time in being realized: "We won't have the results in my tenure as chairman." His term expires in 1984.

Chairman Ferris discussed the diversity of service he thinks technology can make possible when Senator Lowell Weicker (R-Conn.) asked if there wasn't something that could be done to improve the technical service of UHF, now the home of most public broadcasting stations. As network representatives in the hearing room listened, the senator made no bones about his feelings regarding commercial television. He equated it with "extremity, human or animal.

"When I think what it is our children are losing" as a result of the inability of UHF to compete, technically, with the VHF stations or commercial stations, he said—"the theater, music...I'm not for telling the networks what to do. But let public broadcasting"—which, he said, frequently offers "something of value"—"compete."

Pertschuk gets heat, if not comeuppance, on children's advertising ban

Senator Weicker, backed to degree by Senator Hollings, expresses grave reservations about proposals to limit expenditures in 'sugar and snack' area; broadcast and advertising interests are encouraged

Some of the heat being generated by the Federal Trade Commission proceeding aimed at the possible banning of a large amount of advertising from children's television programming was applied directly to FTC Chairman Michael Pertschuk last week, in a Senate Appropriations Subcommittee hearing on the administration's request for the agency's funding for 1979.

Two senators, apparently primed for the occasion, laced into the proceeding as wasteful and foolish. There was even the threat that the power of the purse might be used to persuade the FTC to drop the matter, or to punish it if it didn't.

Through it all, Mr. Pertschuk presented a determined front. No specific rule has been proposed and many difficult questions must be answered before a decision
is reached, he said. But, he added, "This is a serious problem ... and there is enough evidence for us to proceed." Indeed, he said that, although the commission chose not to do so, he favored proposing a specific rule for comment.

Senator Lowell Weicker (R-Conn.) initiated the discussion with a reference to the "national nanny" characterization the Washington Post applied to the FTC after the proceeding was initiated. Nor was he mollified after hearing Mr. Pertschuk's explanation and defense. "This is absurd, preposterous," he said.

Senator Ernest F Hollings (D-S.C.), chairman of the subcommittee, was, as is his custom, more low key. He raised questions about the legality of banning advertising--"difficult," Mr. Pertschuk conceded—but Senator Hollings also questioned the proceeding's value. He viewed it as "chasing rainbows." The FTC, he said, "has much good work to do."

The rulemaking, which the FTC approved on Feb. 28 and which was announced in the Federal Register on Thursday, seeks comment on several staff-proposed rules as some suggested by the commission. They deal with two questions--whether young children should be subjected to advertising, and whether and to what degree children should be made aware that some advertised products may be harmful.

The staff offered three recommendations—that the FTC ban as deceptive or unfair all television advertising aimed at children "too young to understand its purpose," as well as the television advertising of sugared products most likely to cause tooth decay when aimed at children under 12 years of age, and require sponsors of other sugared product to pay for the airing of nutritional and health messages. (Broadcasting, March 6).

The alternative remedial approaches offered for comment by the FTC call for disclosure of health or nutritional information, either in the body of advertisements for highly sugared products advertised to children or in separate messages (and paid for by advertisers of sugared products), or for various limitations on advertising aimed at very young children or advertising of highly sugared products aimed at all children.

The FTC, which has also invited interested parties to submit proposals of their own, has scheduled a legislative hearing to begin Nov. 6, in San Francisco and to continue in Washington Nov. 20.

The proceeding has aroused representa- tives of the broadcasting and advertising industry, and has few others initiated by either the FCC or the FTC. They have formed a joint committee to combat the proposals (Broadcasting, March 13). And broadcast industry representatives called on members of the Hollings subcommittee prior to the FTC hearing to express industry concerns.

To Senator Weicker, the FTC's interest in the matter smacked of the kind of government activity he feels is growing distasteful to the public. "People are getting tired of the regulation of all aspects of their lives," he said.

Mr. Pertschuk noted that with $600 million spent on children's advertising annually, a lot is at stake. But, he said, treating preschool children as consumers "should not be a subject of ridicule." And, he said, while the commission is "under a lot of heat," it has also "received a great deal of support, from parents."

Senator Weicker, referring to the subcommittee's responsibility for assessing requests for appropriations, said, "We have to decide what is a priority. You're telling me a priority is to take over a large duty of the parents."

That was not the senator's first linkage of appropriations and the children's advertising proceeding. At one point he warned Mr. Pertschuk that if his "verbal" explanation of the proceeding was not satisfactory, "there will be no money for your agency." The explanation didn't satisfy the senator.

Later, he scaled the warning down. The agency, which is seeking $64,485,000—some $4 million more than it received this year—hopes to add 66 positions. And it now has some eight staffers working on the controversial proceeding. "Can you fill some of the positions with the people working on this?" Senator Weicker asked. "You'll have to take 'em away," Mr.

In Brief

Austin, Tex.-based Communications Properties Inc., which operates 50 cable systems (300,000 subscribers), will be purchased by Los Angeles's Times Mirror Co., for $85 million cash—beginning with purchase of 53% of CPI's stock, now held by CPI Chairman Jack Crosby and director Fred Lieberman. Once that is completed and approved Times Mirror is to make tender for remaining 47% of CPI stock at same per-share price ($17). Deal is expected to take four to six months to conclude. CPI spokesmen said last week that management team will remain intact, with Robert Hughes, president and chief executive officer, remaining as chairman and chief operating officer of cable subsidiary Times Mirror is to establish. Times Mirror now owns 15 cable systems and two TV stations: KTXC-TV Austin and KFPE-TV Dallas.

The Pulse Inc., New York, which began in 1941 as radio measurement service using personal interview technique, ceased operations as of last Thursday (April 27). Richard Roslow, president, said firm's demise resulted from growing lack of support from radio stations in past five years. Staff numbered about 35 at closing.

Chairman Charles D. Ferris says that if FCC's top 50 policy makes sense, commission should transform it into rule; otherwise, it should either adopt more rational rule or eliminate "this unenforced policy." Statement was one of three accompanying text of notice of inquiry and proposed rulemaking regarding policy requiring broadcasters seeking fourth television station—or third VHF—in top 50 markets to support application with showing of compelling public interest (Broadcasting, March 20). Thirteen-year-old policy has not once been barrier to station acquisition. Commissioner Joseph Fogarty said commission needs to know more about "perceived public interest benefits of multiple ownership" as well as "problems of ownership concentration." And Commissioner Tyrone Brown expressed hope commission will either "loosen the hold which multiple owners have on television stations" in largest markets or offer "convincing reason why strict application" of multiple-ownership rule in those markets would not be in public interest.

House Communications Subcommittee has scheduled mark-up of public broadcasting legislation—White House's five-year authorization bill and Hollings-Van Deerin three-year authorization bill (Broadcasting, April 24)—tomorrow (May 2).

Hubbard Broadcasting Inc. hasn't given up yet. In what may be unprecedented move, it has applied for IA status for KOBAM Albuquerque, N.M., on clear channel 770 kHz, on which ABC's WABC New York is now dominant station. Hubbard filed application on Friday in conflict with ABC's license renewal bid; it had lost 36-year fight with ABC over respective nighttime operating rights on 770 kHz two weeks before when Supreme Court rejected petition for review of FCC order directing koba to operate as IIA and protect wabc at night (Broadcasting, April 24). Koa has been operating as IB, required to directionalize at night only if wabc did (it never has). Hubbard, which claims commission order would cost koba 100,000 listeners, says IA status will enable station to increase its nighttime service area substantially—it would provide first primary service to 118,000 people and second primary service to another 22,000, while its skywave service would reach 7,211,000 more people.

FCC Commissioner Margita White has called for elimination of comparative hearing in non-license-renewal proceedings and for retaining it in cases involving incumbents only when renewal applicant cannot demonstrate compliance with commission rules, standards and policies. Commissioner White's proposals, similar to those advanced by former Chairman Richard E. Willey two years ago (Broadcasting, March 29, 1976), are based on her view that present hearing process is "expensive, endless, unnecessary, and unimpressive; and, increasingly, potentially unfair." Commissioner White, in speech to Southern California Broadcasters Association in Pasadena Thursday, said lottery
Pertschuk replied, by way of making a point, "by breaking my arm."

It was far from clear that Congress would use the power it has over FTC funds to block the proceeding. Nevertheless, the representatives of the networks and the National Association of Broadcasters who were in the audience seemed pleased with what they had witnessed.

"I'd be less than candid if I said I was unhappy," said one. Said another, with an exuberance that was probably more typical of that felt by industry representatives: "Pertschuk had his head handed to him."

New militancy emerging in 4A's relations with Washington

In annual meeting in Arizona, group outlines new program of volunteer work with government, plans to improve member communications and enlarges office in capital

The American Association of Advertising Agencies geared itself last week for more aggressive action in its relations with government regulators.

David Mahoney of Norton Simon Inc., a one-time agency man himself, seemed to reflect the new attitude when he told the AAAA's annual meeting in a speech:

"Don't go to Washington as supplicants. Go as militants—equals demanding equal rights in the free-enterprise system."

Mr. Mahoney spoke Thursday, the second day of the annual meeting at Camelback Inn, Scottsdale, Ariz. The day before, in a closed session, AAAA leaders outlined details of "a broad new communications program to meet the challenge of escalating government involvement in business."

One phase of the plan provides that top

could be used to pick winner in nonrenewal proceeding once competing applicants are found to be qualified. Where incumbents are involved, she said, renewal process would better serve public interest if renewal applicants "first are evaluated on their past broadcast record."

Year-long study by Carter administration of federal audio-visual programs has turned up numerous cases of waste and inefficiency in expenditure of at least $500 million annually, and has led to development of directive to tighten up procedures. One example cited in report: agency spent $125,000 on motion picture, but has lost track of film.

House Appropriations Subcommittee on State, Justice, Commerce and the Judiciary last week voted to give FCC $1.5 million more than it asked for in fiscal 1979 to create 11 new positions for network inquiry and 36 new positions in Common Carrier Bureau. Total budget now comes to $68,535,000. It goes before full House Appropriations Committee May 23.

John A. Schneider, senior VP of CBS Inc., who for 13 years was dominant force in CBS broadcast operations, resigned last week to open broadcasting consultancy, with CBS one of his clients. Move was not unexpected, as he had been replaced as president of CBS/Broadcast Group last fall after eight years in post (Broadcasting, Oct. 24, 1977). He had also headed CBS-TV network and been CBS Inc. executive VP during 28-year CBS career. Mr. Schneider, 51, will maintain office at CBS's Holt, Rinehart and Winston headquarters, 383 Madison Avenue, New York 10017.

Thomas B. Cookerly, executive vice president and general manager of WLBV-Washington, named president of broadcast division of newly established Allbritton Communications Co., licensee of WJLA-TV and co-owned WCVT-TV Charleston, S.C., and WSET-TV Lynchburg, Va. He will continue to run Washington station. Joe L. Allbritton, publisher of Washington Star, is chairman and sole owner of new company.

Charles T. Jones Jr., vice president for radio affairs of National Association of Broadcasters, is resigning to become president of O'Connor Creative Services, Universal City, Calif. Member of NAB since 1972, when he was named director of Radio Information Office (he was promoted to vice president in 1974), he will leave in June.

Richard P. Verne, vice president-administration, NBC Radio Division, named VP-general manager of radio network, succeeding Marion Stephenson, who becomes VP-radio and industry relations of radio division. Robert Mouny, VP for sales and marketing of radio division, named VP in charge of stations groups.

David J. Saylor, 32, former Hogan & Hartson lawyer now with Federal Trade Commission, will be named FCC deputy general counsel. He's to join commission in mid-June, filling vacancy open since October.

Commission has approved reorganization of general counsel's office—subject to oversight committees of Congress—which consolidates five divisions into two: litigation, to be headed by Daniel M. Armstrong, who now heads smaller division dealing with litigation, and administrative law and legislation, expected to be headed by Louise Florencourt, now on staff of Opinions and Review.

At the top for the 4A's. John S. Pingel, president of Ross Roy Inc., Detroit, was elected chairman of the American Association of Advertising Agencies last week at its 60th annual meeting, held Wednesday through Saturday at Cameback Inn, Scottsdale, Ariz.

Stuart B. Upson, chairman and chief executive of Dancer-Fitzgerald-Sample, New York, was elected vice chairman. H. Smoot Fahlgren, president of Fahlgren & Ferriss, Parkersburg, W.Va., was named secretary-treasurer.

As chairman Mr. Pingel succeeds Edward N. Ney, chairman and chief executive of Young & Rubicam, New York, who becomes chairman of the AAAA advisory council. William R. Hesse continues as interim president pending selection of a successor to President John Crichton, who died last December.

The operations committee, which meets monthly when the board is not in session, will consist of the officers plus three directors-at-large: Eugene H. Kummel of McCann-Erickson Worldwide; David B. McColl of McCaffrey & McColl, and John P. Warwick of Warwick, Welsh & Miller.

Three directors-at-large were elected to three-year terms on the AAAA board last week: Charles F. Adams of D'Arcy-MacManus & Masius, Bloomfield Hills, Mich.; John O'Toole of Foote, Cone & Belding, New York, and Bradley H. Roberts of Neetham, Harper & Steers, Los Angeles.

The following regional directors were elected for one-year terms:

Western region—Paul F. Keye, Beverly Hills, Calif.

Top of the Week
agency volunteers—perhaps two next fall and two more next spring—would work for a year or more with legislative or regulatory agencies while remaining on their company payrolls, with the AAAA picking up the tab for their travel and living costs.

One of the features of the new program is designed to improve public understanding of advertising, improve member information service and improve member communications.

As part of its new militancy in regulatory affairs the AAAA plans to enlarge its Washington office space. William R. Hesse, a former president of Benton & Bowles, heads the Washington staff and is also serving as interim president of the AAAA pending selection of a successor to John Crichton, who died last December.

The search for a new president is being conducted by a committee led by Richard C. Christian, chairman of Marsteller Inc., Chicago. The committee was reported at Scottsdale last week to have set a new target date—the end of the year—for having a candidate selected, elected and in place. This was also an earlier target date but at one stage of the process there were reports that progress seemed to be moving faster than expected.

High court adds more protection to advertising

Decision in Massachusetts case cites First Amendment application; Burger opinion goes further, says ‘media conglomerates’ are no less covered by rights of free speech

The U.S. Supreme Court last week struck down a Massachusetts law that prohibited corporations from spending their funds to influence the outcome of public referendum. The court, by a 5-to-4 margin, said such laws violate the First Amendment guarantee of freedom of speech.

And Chief Justice Warren E. Burger, in a concurring opinion, suggested the court’s decision has special significance for “media conglomerates”: It serves as a bulwark against the imposition of restraints on those conglomerates which have “vastly greater influence.”

At issue in the case was a Massachusetts law that limited corporations and banks to the financing of campaigns for or against ballot propositions that “materially affect” their business interests. And it was aimed specifically at prohibiting the corporations and banks from opposing a legislative proposal to enact a graduated income tax.

The court majority, in an opinion written by Justice Lewis Powell, rejected the argument that the First Amendment loses its power to protect speech when the source of the speech is a corporation that cannot demonstrate, to the satisfaction of a court, “a material effect on its business or property.” The “materially affecting” requirement, the court said, “amounts to an impermissible legislative prohibition of speech.

The majority also added more gloss to the developing court view that commercial speech comes within the protection of the First Amendment. A commercial advertisement is constitutionally protected, “not so much because it pertains to the seller’s business as because it furthers the societal interest in the free flow of commercial information,” Justice Powell wrote.

Chief Justice Burger, who said in his opinion he was writing separately to raise questions “likely to arise in this area in the future,” said a disturbing aspect of Massachusetts’ position is “that it may carry the risk of impinging on the First Amendment rights” of corporations in the business of mass communications—media conglomerates.

He noted that a corporation may own the dominant newspaper in one or more communities, along with radio and television stations in the same areas and elsew here, a newspaper chain, news magazines with national circulation, news wire services and interests in book publishing and distribution enterprises. Indeed, he said, the corporate ownership could extend to organizations that manufacture and transport newspaper.

Such media conglomerates, Chief Justice Burger wrote, could be said “to pose a much more realistic threat to valid interests” than do the banks and corporations that opposed the Massachusetts law.

(And Justice Byron R. White, in a dissenting opinion in which Justices William Brennan and Thurgood Marshall joined, warned about the “unfair advantage” in the political system of corporations dominating the electoral process” that could result if corporations were not regulated.)

The chief justice also said—while acknowledging the lack of constitutional relevance—that managers and directors of media conglomerates are not more “venerable, wise or restrained” in the exercise of power than are corporate officers generally and added:

“Thus, no factual distinction has been identified as yet that would justify government restraints on the right of appellants to express their views without, at the same time, opening the door to similar restraints on media conglomerates with their vastly greater influence.”

However, while expressing concern about the possibly adverse consequences that upholding the Massachusetts law would have for media corporations, the chief justice also indicated he did not believe those corporations have any special First Amendment privilege not available to others. “The First Amendment does not belong to any definable category of persons or entities,” the chief justice said. “It belongs to all who exercise its freedoms.”

FCC gives ’em something to talk about in New Orleans

Commission redefines cable systems, turns down MPAA bid to limit satellite distribution and proposes rules to handle pole attachment complaints

With the nation’s cable operators getting ready to travel to New Orleans for the National Cable Television Association convention, the FCC last week put together a package of items for NCTA members to discuss this week. Generally, their reaction should be favorable.

The commission redefined a cable system to exempt from most commission regulations systems with fewer than 1,000 subscribers. Previously, the cut-off was 500. And it denied the Motion Picture Association of America’s petition to limit the distribution of television programs to cable systems by satellite.

The commission also issued a notice of proposed rulemaking looking to the adoption of regulations for dealing with complaints concerning cable television pole attachments. The rulemaking is designed to implement legislation passed by the current session of Congress.

One FCC action that greater joy to the telephone industry than to cable operators was the instruction given the staff to draft two notices of proposed rulemaking aimed at rolling back the current ban on telephone companies’ ownership of cable systems in areas they serve.

The commission’s redefinition of a cable system means that systems with up to 1,000 subscribers are free of such rules as those limiting the number of distant signals they can import and requiring that they blackout local sports events provided by a distant station if the events are not available to local television stations.

The action also exempts the systems from much of the paperwork now required. They will no longer be obliged to obtain a certificate of compliance from local authorities before beginning operations and they will be asked to notify the commission only of the owner’s name, the system’s location and the signals to be carried. Technical performance tests will no longer be required either.

The commission acted on the basis of studies and comments indicating that the relaxation of rules would have virtually no adverse effect on television stations in affected markets. Although 42% of the nation’s cable systems would benefit, they have only 6% of the nation’s cable subscribers.

Furthermore, the commission believes that fewer than 50% of the systems would add signals. Half of the systems are outside all television markets and, therefore, already exempt from the limitations or had

neither the incentive or channel capacity to increase the number of distant signals.

The Broadcast Bureau offered no objection to the commission's action.

But there were indications that the commission may not stop at the 1,000-subscriber level in exempting cable systems from regulations. Philip Verveer, the FCC's Cable Television Bureau chief, called the action taken last week "deregelation," in that it was designed to ease burdens not only on the small cable system operators but on the commission staff as well and is likely to have an impact on broadcast operators. But he also said it may be time to move on to "deregelation"—to consider whether the commission should "alter or eliminate signal carriage rules" as they apply to major-market systems. And Commissioner Joseph Foherty, for one, said he felt the record justified relaxing the rules for systems up to 3,500 subscribers. However, no one else seemed ready to move that fast.

The MPAA, which fears that widespread exposure of member companies' films will adversely affect their value in markets where they have not yet been sold, urged its petition on the commission on the ground that satellite distribution runs counter to the commission policy of "localism." MPAA said the station whose signals are being carried would tend to neglect local interests, while the stations whose markets are being invaded by the distant signals would lose audience and, consequently, revenue.

MPAA cited the example of WTCG(TV) Atlanta, whose programs are being delivered by satellite to 672 cable systems with a total of 1.2 million subscribers. But the commission was not impressed.

It said MPAA had provided no evidence that satellite use endangered local stations. And it said it was difficult to accept the argument that technological development should be stopped because the service it provides might be too good. The commission said it was persuaded the technology would improve programming generally and not threaten service to the public.

Furthermore, the commission noted that when it authorized Southern Satellite Systems Inc., on Dec. 15, 1976, to distribute WTCG's signal, it determined that such service was in the public interest—that it would permit a more efficient use of satellite facilities and increase diversity of cable programming—but that it would revalue satellite distribution of television after five years. Accordingly, the commission said, MPAA's request for evaluation at this time is premature.

The proposed rules dealing with pole attachment agreements are designed to keep commission involvement in the issue to a minimum. The rules would limit FCC activity to matters over which state and local authorities are not exercising jurisdiction and only to those matters brought to its attention. The commission expressed the hope the parties would resolve conflicts among themselves.

Under the proposal, the cable system complainant would be required to make a prime facie case that the terms being insisted upon by the telephone or power company are unreasonable, but the ultimate burden of justifying the rates would be on the utility involved.

The proposal would authorize the commission to suspend a rate it found to be unreasonable, and to substitute a "just and reasonable" one for it. It could also estimate costs without requiring full hearings or special studies. However, in view of its inexperience in the field, the commission asked for comments on developing guidelines to determine whether the rates, terms and conditions for cable television pole attachments "are just and reasonable in any particular case."

The new responsibility given the commission will be heavy, and expensive, since only four states now exercise authority over pole attachment agreements. The Common Carrier Bureau, which will do the staff work, says it will need another 13 positions, which will cost an additional $138,000 for the fourth quarter of fiscal year 1978 and $527,000 more in fiscal year 1979.

The telephone company-cable system crossownership matter began as a staff proposal simply to ease the present ban as a means of providing cable service in rural areas where it would not otherwise be available. It would have provided for waivers permitting such crossownership in areas where there are 25 or fewer potential subscribers per route mile.

However, FCC Chairman Charles D. Ferris suggested that the commission deal with the matter by rulemaking. And, when the staff pointed out the proposal was aimed at providing relief promptly, suggested two rulemakings—one dealing with rural areas and one with the question generally.

The commission had adopted the ban on telephone company-cable system crossownership in 1970 because of concern over the possibility of anticompetitive practices on the part of telephone companies that both owned systems and offered channel service to nonaffiliated companies.

However, over the years, the commission has been generous in granting waivers to telephone companies seeking ownership of cable systems in rural areas. Thirty-four requests for waivers have been made and granted over the years, six in the last two.

---

**A short course in cable, 1978**

There are close to 4,000 operating cable systems in the United States, serving over 9,000 communities. They reach roughly 13 million subscribers—perhaps 40 million people—and generate annual gross revenues expected to top $1 billion this year. Cable's penetration of total U.S. television households: 18%. Pennsylvania has the most systems (328) and California the most subscribers (1.7 million). Teleprompter is the largest multiple system operator (MSO), nearing 1.1 million subscribers on 110 systems. The largest single cable system, Cox's Mission Cable in San Diego, has about 130,000 subscribers; some small systems have fewer than 50 subscribers. Most cable systems offer 12 channels; those constructed after March 1972 must have at least 20 channels.*

Monthly fees in typical larger market systems range from $8 to $11 for conventional cable service; pay cable adds another $8 to the monthly bill. An average installation fee is $15. Costs of laying cable range from $6,000 per mile in rural areas to $10,000 in urban areas, and up to $100,000 where underground cable is required. Almost 2,600 cable systems originate some of their own programming. Past estimates suggest many or all of those accept advertising on local origination channels, with rates from $5 to $300 a minute. Pay cable is on approximately 600 systems and reaches 1.6 million subscribers in 46 states, producing revenues of approximately $144 million last year. Most pay cable operators report 25% penetrations of their subscriber counts. About 30% of all cable systems have ties with broadcast interests, almost 20% with program producers and distributors and approximately 12% with newspapers.

*This requirement was thrown into question by the Midwest Video Corp decision of the U.S. Court of Appeals for the Eighth Circuit (St. Louis), which earlier this year overturned the commission's rules on public access channels (BROADCASTING, March 6). The FCC is appealing that decision.

Programming
The first drafts: Networks get set for fall schedules

No one really believes they'll stay that way, but what does mean they have to start someplace; think of the buyer's dilemma

Former CBS-TV programer Mike Dann calls it a "ritual dance" that may be seeing its final performance. NBC-TV's chief programer Paul Klein calls it "pass." Advertisers don't trust it any more.

Nonetheless, executives at the three commercial television networks have been locked away in their screening rooms for the past several weeks, preparing once again for the annual unveilings of the fall prime-time program schedules. Two of those schedules are to be announced this week—ABC's on Monday and CBS's on Wednesday—while NBC is waiting until May 12 or 15.

The question is: How much resemblance will the line-ups presented now bear to what actually goes on the air next fall? Last year, the schedules announced in the spring lasted through the summer virtually intact. Program juggling then started almost immediately—another reason this year's fall schedule ritual is being viewed with some wariness. But another difference today is that few members of the industry seem at all convinced that this spring's program blueprints will survive until premiere week—whenver premiere week turns out to be.

The main reason for that attitude is Fred Silverman's scheduled arrival at NBC in June. Although it's considered unlikely that he will be able to get any new shows of his own ready by fall, it's taken for granted that he'll tinker with the product he has. CBS and perhaps even ABC will be ready to counterprogram those moves, in the opinion of many advertisers, and thus may be less than fully committed to their first line-ups even as they're announced.

Not everyone is so sure of Mr. Silverman's predictability. Michael Eisner, a former ABC program executive who worked with Mr. Silverman before becoming president of Paramount, believes the schedules will remain basically intact. He sees it as more in keeping with Mr. Silverman's style to get behind the schedule he inherits at NBC because he wouldn't want to "insult" the program executives who put it together. However, more representative of the general view was the comment of one agency executive, who said, "Silverman's nature doesn't allow him to do nothing."

Another factor seen by many as contributing to the likelihood of a fluid scheduling process is the sheer volume of potential programs on hand. The networks have for the most part finished the short run testing of contenders that have riddled prime time for the past two months or so, but many believe the ongoing analyses of those performances, the performance of pilots and their immediate run testings, will still go on and the changing competitive situation in general will increase the temptation to go on juggling as the summer wears on.

That scenario concerns the advertising agencies, both because it presents problems with their immediate buys and because it means they represent only a prelude to another year of constant program maneuvers. "Historically, 60%-70% of the advertising expenditures for the fourth quarter were made within days after the schedules were announced," says Mr. Dann. "There is no possibility that will happen now. The rhythm of the business has changed, and the agencies have to accept the revolution that has happened."

Not every agency executive accepts it, and some of them believe the networks don't either. Steve Leff, director of television programing for McCann-Erickson, is one of several who say they have received repeated assurances that it's going to happen right away, and that leaves some disagreement about how to proceed in the interim.

The consensus is that the sure shots, say a Laverne and Shirley will sell quickly in any event. Beyond that, however, many observers tend to agree with Mr. Dann that advertisers will hang back until they feel more certain about what they are buying into. "It will be a lot more drawn out and negotiable than in the past," says William Suter, broadcast analyst for Merrill Lynch, Pierce, Fenner & Smith. Ellen Berland Sachar, analyst for Mitchell Hutchins Inc., adds that uncerainty about the economy and irritation with the networks' prices may contribute to the cautious approach.

Some agency executives seem less willing to bank on that. They remembered that late buyers last year in some cases found themselves buying less desirable shows for more money simply because availability were scarce. They agree, however, that pricing will be an important factor in their decision to be more important than the certainty of scheduling.

As Eugene Accas, network director for Leo Burnett, put it, since advertisers never know whether the show they're buying will run or what its competition will be, they might as well buy anyway if prices are reasonable.

Mr. Leff hinted that he shares the Accas view, although he won't reveal his specific strategy. "There are two schools of thought," he says. "You can go up front or hold back. Somewhere between the two is probably the best course of action. But I always felt that betting on the come has proved to have significant advantages."

'Holocaust' gives week to NBC-TV

Three episodes plus 'Little House' take top four ratings slots; ABC-TV reruns and tryouts earn it third place

for week of April 17-23; 'Hulk' reinforcing its bid for placement in the fall

NBC-TV's Holocaust carried the network to its first weekly ratings win since 'The Godfather' aired in November, while ABC-TV, relying almost entirely on reruns and new series tryouts, came in third for the first time this season.

Averages for April 17-23 were 21.2 for NBC, 16.7 for CBS-TV and 16.1 for ABC. Holocaust swept the top three positions on the most-watched programs list (its initial episode was included in the previous week's scoring), followed by Little House on the Prairie. CBS-TV had three of the remaining top 10 shows—Alice, All in the Family and 60 Minutes—while ABC also had three, Happy Days, Laverne and Shirley and Three's Company.

With the fall schedules at the drafting stage, time is running out for many of the new entries that have been auditioning for the past several weeks. CBS-TV's The Incredible Hulk remains the strongest contender, with a 35 share performance on April 21. Spiderman, a more recent CBS fantasy entry, had scored 37 shares in its first two weeks on the air, but on Wednesday, April 19 (8-9 p.m. N.Y.T.), it slipped to a 29—possibly because its latter half hour faced Holocaust's final episode.

Of the new shows that didn't face

Sweeps away. Another ritual of network television programing that has been viewed with increasing suspicion by advertisers—the Nielsen and Arbitron sweeps—also kicks off this week. Nielsen starts counting on May 4 and continues until May 31; Arbitron starts and ends a day earlier (both have avoided the April 30 switch to daylight savings time). Viewers are likely to notice that something's up, as the program line-ups for the three commercial networks will suddenly be bursting with new or expanded episodes of regular series, big-name theatrical and made-for-TV movies, variety and comedy specials and pilots.

ABC is banking primarily on original episodes of its strong regular series, says vice president of programming Ted Harbert. First-run episodes will be going into reruns early, and the network said it plans to run more than 90% of original material during the sweep. NBC-TV and CBS-TV both have what they hope will be blockbuster mini-series coming in—the 10-hour Wheels for NBC and the six-hour Dain Curse for CBS. Among the theatrical movies to be unleashed by those two networks are "Alice Doesn't Live Here Anymore," "The Lincoln Conspiracy" and "Rosie O'Donnell" (all NBC): "It's a Mad, Mad, Mad, Mad World," "Breakheart Pass," and "The Alamo" (CBS). Specials to be aired will feature such talents as Bob Hope, Barbara Walters, David Frost, Alan King and Dean Martin, and there will be several theme specials including ABC's 'The Stars Salute Israel at 30 and NBC's Country Night of the Stars.'

A season’s worth of program standings

ABC ranks the 104 shows that made it onto the TV networks since September; not surprisingly, it scores heavily with top series.

Only on television could two bottle caps in a Milwaukee brewery be the superstars of the year. ABC-TV has compiled rankings of all the shows that made it to the prime-time schedules of the three commercial networks between Sept. 12, 1977, and April 9, the 30 weeks ABC defines as the 1977-78 season. As expected, Laverne and Shirley topped them all, and it was the network that broadcasts it, ABC-TV.

The network had five of the top-10 programs to CBS-TV’s four and NBC-TV’s one. But the depth of ABC’s dominance is more evident in the top-20 rankings where it had 12 programs to CBS’s six and NBC’s two. ABC’s lowest-ranked show of the year, 89th out of 104, was San Pedro Beach Bums, one of only two shows canceled by the network (The Red Fox Show was the other). CBS and NBC lost 10 each.

1. ABC Laverne and Shirley 32.0
2. ABC Happy Days 31.1
3. ABC Three's Company 28.4
4. ABC Charlie’s Angels 25.3
5. CBS All in the Family 24.7
6. CBS 60 Minutes 24.4

FCC cites ABC as ‘negligent’ in handling of boxing tournament

Network executives should have acted sooner than they did when irregularities in production of the matches became apparent, says commission, which lets matter go with letter of admonishment

Last week, it was ABC’s turn to take criticism from the FCC as a result of sports telecasts. But where CBS faces the possibility of a possible fine in the license renewal process for one or more of its stations as a result of its Heavyweight Championship of Tennis matches (BROADCASTING, March 20), ABC was “strongly admonished” by the commission for its conduct in connection with coverage of the U.S. Boxing Championships tournament broadcast in 1977.

The FCC, in a letter to ABC, said the commission’s investigation did not disclose any conscious wrongdoing on the part of ABC Sports personnel. But it said ABC was “negligent in not having acted sooner [than it did] to investigate fully” the rumors and allegations of tournament improprieties that had come to the attention of ABC executives.

Those rumors and allegations involved the integrity of Ring magazine rankings that were used as a basis for determining the fighters who would participate and concerned the involvement of personnel at Don King Productions, the promoter, in kickbacks or booking fees.

ABC Sports made some efforts to maintain the integrity of the tournament, the commission noted. But the affidavits ABC Sports obtained from the promoter, Ring and others, and the warnings to the promoter to obtain quality fighters, among other actions, the commission said, “do not negate ABC Sports’ failure to investigate thoroughly when information regarding irregularities was turned up by its own staff and outside sources.

The commission directed ABC to respond within 30 days as to steps taken—or to be taken—to prevent recurrence of the

Holocaust, performances were less encouraging. CBS’s Husbands, Wives and Lovers, despite Hulk’s hefty lead-in continued to languish with a 24 share, and its prospects for survival were viewed as nil by members of the advertising community. On Saturday night, CBS’s Ted Knight Show and Another Day turned in what have been their typical performances—25 and 20 shares, respectively. Another Day showed no improvement despite receiving some publicity over the subject matter of its episode—that week, teen-age sex (BROADCASTING, April 24). Also for CBS, Sam (Tuesday, 8-8:30 p.m.) continued to inch upward against Happy Days reruns, scoring a 27 share on April 18.

ABC’s A.E.S. Hudson Street on Thursday, which has been fluctuating just about above or below the 30 share mark, came in with a 27, while the premiere of the country and western variety show, Mel and Susan Together, pulled a 28 on Saturday (8-8:30 p.m.).

NBC’s newest entry, the Henna Barbara Happy Hour (Thursday, 8-9 p.m.) appears to be the weakest show of the lot, finishing its second week with a 20 share, five points down from its premiere. NBC has come up with one substantial hit in its second-season crop, however—Project UFO (Sunday, 8-9 p.m.). The show has been maintaining steady 30-plus shares for several weeks after what had looked to be a shaky start in February, coming in with a 34 share on April 23.

Broadcasting May 1 1978

PROCEDURAL FAILURES that came to light in connection with the boxing tournament. The tournament grew out of a contract signed in July 1976, under which ABC Sports was to pay Don King Productions $2,035,000 for the exclusive broadcast rights to the boxing championships—a series of elimination fights aimed at producing U.S. champions in eight weight divisions.

But after six broadcasts, ABC Sports announced on April 16, 1977, that the tournament had been suspended because of irregularities, including inaccurate ring numbers of numerous fighters.

ABC commissioned two investigations—one by Michael F. Armstrong, former chief counsel of the Knapp Commission (which investigated corruption in the New York City Police department) and the other by Philip R. Forlenza, of Hawkins, Delafield & Wood, outside counsel to ABC. And their findings were later corroborated by the commission's own investigation, according to the commission's letter. (However, the Armstrong report offered no judgment on whether ABC might have acted sooner; in the absence of a finding of gross negligence, that was said to be outside the scope of the report. And the Forlenza report said the question of whether ABC Sports could have reacted differently to the rumors cannot be answered without the wisdom of hindsight.)

The commission quotes ABC Sports President Roone Arledge as stating that, although he took what he thought at the time were "extraordinary actions" to guard against irregularities—requiring affidavits, for instance—they proved insufficient.

Mr. Arledge also sought to present some of the difficulties ABC Sports faced in guarding against irregularities. According to the commission, he said ABC Sports was not expert in boxing when the tournament began, and did not see its role as becoming intimately involved in the mechanics of the tournament. He cited past criticisms of networks for being directly involved in the scheduling or conduct of sports events.

To this, the commission said it appreciated ABC Sports' concern for divorcing itself from involvement in the sports events it covers. But, the commission added, "we do not believe that minimizing such involvement in any way relieves the network from fully investigating irregularities that come to its attention."

Beyond the question of whether ABC Sport was as alert as it should have been to the rumors and reports that were circulating, the commission expressed concern about the apparent minimizing such involvement in the ring numbers regard to the public."

These included descriptions of the tournament as open to qualified fighters who wanted to participate with entry based solely on Ring rankings. However, a clause in Don King Productions contracts offered the fighters—patterned after one in ABC Sports' contract with the promoter—gave Don King first negotiation/right refusal to the fighters' future bouts. And some fighters refused to participate because of that clause.

The commission said ABC Sports was "careless" in not anticipating that its agreement with Don King would result in the promoter's use of the same first negotiation/right refusal clause. Thus, "the public," the commission said, "was some-what misled as to what entry into the tournament involved.

Furthermore, the commission said, despite the title of the tournament, the last three broadcasts contained no mention of the fact that some ranked fighters—Muhammad Ali and Ken Norton, among them—were not participating. And Mr. Arledge is quoted as saying that commission investigators that ABC Sports should have informed the public on each broadcast.

The commission also noted that Don King, in an interview with Howard Cosell after the second broadcast, and Mr. Arledge, in an interview with the New York Post on Feb. 14, 1977, said that the tournament was still open to qualified fighters—that those who had not yet done so could still enter before the semifinals. However, on Feb. 24, the chairman of the tournament's rules committee held that permitting late entrants would breach contracts with fighters already in the tournament and, therefore, could not be permitted. The ruling, accepted by Mr. Arledge, was apparently not communicated to the public, according to the commission.

The commission vote was unanimous, but Commissioner Tyrone Brown concurred in the result and issued a separate statement expressing concern about those portions of the commission letter that "could be viewed as casting aspersions on the principals of Don King Productions Inc. or Ring magazine." He noted that the commission had based its comments in that regard on ABC-commissioned reports and had not given the individuals involved an opportunity to respond to the allegations.

A second article was also affected. The commission stated that ABC would have to return to the public an additional $1.25 million from its $30 million to ABC Sports from the ABC Sports' contract for the first broadcast.

The commission also said that ABC Sports was not a party to the contract and therefore could not be held liable. But it said that the commission would investigate further to determine whether ABC Sports should be held responsible for the commission's failure to inform the public.

The commission also said that ABC Sports should have informed the public on each broadcast that the tournament was still open to qualified fighters—that those who had not yet done so could still enter before the semifinals. However, on Feb. 24, the chairman of the tournament's rules committee held that permitting late entrants would breach contracts with fighters already in the tournament and, therefore, could not be permitted. The ruling, accepted by Mr. Arledge, was apparently not communicated to the public, according to the commission.

Publishers against anyone seeking damages as a result of an action committed in imitation of what the broadcaster or publisher had brought to the public’s attention (Broadcasting, Sept. 20, 1976).

Judge Ertola screened the film and concluded it did not advocate violent or depraved acts. Accordingly, he ruled in favor of the broadcasters without calling a jury.

The California Court of Appeal, however, overruled Judge Ertola. It directed him to hold a jury trial on questions of fact that had been raised (Broadcasting, Nov. 14, 1977). “Despite First Amendment protections,” it said, the plaintiff is entitled to show that the broadcast of the movie “resulted in actionable injuries.”

That opinion was supported in a friend of the court brief filed by the California Medical Association. It urged the Supreme Court to reject the petition for review, contending that the “profound social implications” of violence on television cannot be ignored.

The Supreme Court’s refusal to review the case does not foreclose broadcasters’ use of the First Amendment against such suits. The California appellate court said that the First Amendment argument could be considered following the trial.

Program Briefs

Paternity suit. Dennis Maitland, Carle Place, N.Y., alleges he went to ABC in November 1974 with idea for show called The Ultimate Trip, which he says was almost identical in concept to Fantasy Island. ABC was interested, according to Mr. Maitland, and he proceeded to script-writing stage, only to be told some months later that network had changed its mind. Spelling-Goldby Productions subsequently came up with Fantasy Island—now hit show on ABC—and Mr. Maitland is suing network and producers for $30 million.

FM drive changing? FM stations will be scheduling less music and more news and service features in drive time, according to Allen B. Shaw, Jr., president of ABC Owned FM Radio Stations. In talk at University of North Carolina in Chapel Hill, Mr. Shaw said ABC-owned FM outlets already are stressing news, traffic and weather reports and time checks in morning. He said preliminary research indicated that listeners wanted this type of coverage in morning drive.

Ole. NBC Sports has acquired TV rights to 1978 Fiesta Bowl, Christmas Day college football game from Tempe, Arizona, formerly broadcast by CBS-TV.

Liz to NBC. Elizabeth Taylor has been signed to appear in Hallmark Hall of Fame production of play, “Return Engagement,” to be aired on NBC-TV during 1978-79 season. Her co-star is to be Joseph Bottoms, who played Rudi Weiss in network’s Holocaust.

Crash course. NBC-TV is developing four-hour miniseries about 1929 stock market crash, to be called The Day America Died. The Production Company and 20th Century-Fox are producing show, and Doubleday & Co. plans book version.

The switcheroo in Washington

Eaton, about to lose AM outlet and black format, changed calls and programing over to FM, whose Spanish format moved over to other side of band—and went off the air! Local Hispanics get the attention of the FCC.

By order of the FCC, Richard Eaton’s WFXN(AM) Washington went off the air at midnight Saturday, April 22. And although nobody outside the Spanish-speaking community it served was expected to notice the station’s passing, the stranded audience is making the kind of noise that attracts attention in high places. The attention is focusing on Mr. Eaton’s surviving station in Washington, black-oriented WOOK-FM, and the history of the switch in call letters and formats of the two outlets.

Telephone calls to the FCC by representatives of the Hispanic community, and letters from members of Congress aroused by the community, have caused FCC Chairman Charles D. Ferris’s staff to convene meetings to consider the Spanish-speaking community’s problem.

What is involved is not only the demise of the city’s only Spanish-language station, which lost its license in a comparative hearing in which wook—as it was known at the time—was accused, among other things, of permitting persons to operate a numbers game through religious programs.

What is involved also is a swap of formats and call letters that took place about a year ago. The swap took the AM’s black format and wook call letters to the FM side, where WFXN-FM became WOOK-FM. The Spanish programing of WFXN-FM was switched to the AM, which then became WFXN. Now the AM—and its Spanish format—are off the air. It is to be replaced by a new station, owned by the successful challenger of Mr. Eaton, Washington Community Broadcasting, to go on the air with a black format in August.

Commission officials last week said there was nothing the commission could do about the Spanish-speaking community’s concern, at least for the immediate present. The commission does not review format changes during a license period. But one staffer noted that WFXN-FM’s license renewal application is due June 1. Among the questions to be considered, one staffer said, “is whether the format change served the public interest.”

Furthermore, members of the Spanish-speaking community were organizing an effort against Mr. Eaton. Silvero Coy, of a group called Washington Metropolita Coalition Pro-Radio Latina, said they were trying to put together a case against
The Emery Flyte-Pak® is just about the biggest thing in small packages.

For unlike its lighterweight competition, it can take up to five pounds of practically anything. Practically anywhere in the U.S. or Canada.

Overnight.

For just $10, airport to airport.

And it has more than size going for it, it has the name Emery. And Emery has more offices, more people, more flights and more experience than any other air freight company.

Plus a computer tracking system that keeps its eye on every package, large or small, every step of the way.

For Flyte-Pak information, call our toll-free number, 800-621-2222* or your local Emery office. If you're already sold, just ask for Flyte-Paks.

They're easy to put together. And unlike the envelopes offered by others, they stay together.

So if you have a small package that has to be somewhere fast, do yourself a big favor. Call Emery.

EMERY
THE AIR FORCE IN AIR FREIGHT.
IN ILLINOIS CALL TOLL FREE 800-621-4000

U.S. POSTAL REGULATIONS SPECIFY THAT IF YOU INCLUDE ANY FIRST CLASS (LETTER) MATERIAL IN THE FLYTE-PAK, PROPER POSTAGE MUST BE APPLIED AND CANCELED.
Today, over 200 radio stations are airing this news service — exclusive in their areas.
stations put the Monitor on the air.

Just one year ago, The Christian Science Monitor unwrapped its Radio News Service. On its first anniversary, the news service thanks the more than 200 stations who have added the Monitor's exclusive dimension to their programming. Isn't it time you looked into it?

From Boston to Honolulu
Weekly tapes of 20 news and feature stories researched by Monitor correspondents—and adapted for radio by broadcast writers—are sent to client stations throughout the U.S. and Canada. You'll hear news analysis, trends, interviews, consumer tips, and stories about education, urban problems, energy solutions, and other topics of strong listener interest. Stories range in length from 45 seconds to two minutes, about half with actualities. They're already being used by over 200 stations with formats from contemporary to all-news to country, in markets of every size. And we guarantee exclusive use to just one AM and one FM in your market area.

"an outstanding service"
Program director, Bob Gifford, of WHO and KLYF-FM in Des Moines notes that the Monitor's Radio News Service is "...an outstanding service offering good material, on-time service, and very professional moderators. [It] complements our newscasts."

In Houston, Program Director Jarrett Day of KEYH says the Monitor's service covers material, and in depth, which everyone else is "either ignoring or doesn't know how to do." KEYH recently won the Texas Associated Press Broadcasters award for the best extended newscast, an hour of listening which included a story from The Christian Science Monitor Radio News Service.

Three announcers prepare tapes
Dave Dunbar, editor of the radio syndication service, is a former news director from California where he won the Golden Mike Award from the Southern California Broadcasters Association. Fay McKenzie is a long-time actress with extensive experience in films, on Broadway, and on radio. And Paul Cunningham is a veteran news writer and broadcaster from Massachusetts.

Choice of payment methods
Client radio stations have two options for payment: commercial time for the Monitor or a cash payment.

For more information, call Dave Dunbar, toll free at 800-225-7090. Or return the coupon below.

Radio News Service
News. The way you need it.
Mr. Eaton of "misrepresentation for denying the Spanish-speaking community the services he was supposed to deliver."

Commentators on the panel were hoping that the market would solve the problem—that one or another of the stations in Washington would seek to serve the Spanish-language community, which is said to number 150,000. WEM(AM) licensed to nearby Alexandria, Va., has begun Spanish-language programming at night, from 11 p.m. to 6 a.m. But Mr. Coy said that was inadequate. "Nobody listens" at that time, he said.

There was a possibility that Georgetown University, which has given up on its WGTB-FM Washington—its programming has involved the university in controversy—would transfer the station to the Catholic Archdiocese of Washington for use as a Spanish-language outlet. However, Georgetown late last week was awaiting the response to an offer it had already made to the University of the District of Columbia.

**MIP: feeding the furnace of international TV**

It’s estimated that $20 million in business was done at annual Cannes program bazaar as number of participants and programs surged

The relentlessly upward growth in buying and selling of international television programming was evident again at MIP-TV—the Marche International des Programme de Television—which concluded a seven-day run in Cannes, France, last Thursday (April 27). The greatest growth was in participants up 28.1% from 1,979 at last year’s 13th annual event to 2,536 at this year’s 14th—but the escalations were across the board: exhibitors up 24% (from 321 to 398), programs up 18.7% (from 2,397 to 2,845), distributing and producing companies represented up 23% (from 448 to 551). Only the number of nations remained relatively stable: up only one, from 92 to 93.

U.S. representation also was on the upswing: that country placed 103 companies on the official roster this year, displacing the United Kingdom (with 99) from its traditional second place position at MIP. (France, the home country, fielded 143.)

As one major American distributor put it, "We’re here to feed the furnace of television." And ready to be consumed in the Palais des Festivals was everything from Starsky and Hutch and Holocaust from the United States to three-dimensional cartoons from Japan to musical productions from Sweden and Cuba to Padre Padrone, a feature film from Italy. By the time the week was out, MIP officials estimated the event had contributed an additional $20 million to the international cash flow.

By the third day of MIP, claimed Klaus Lehmann, vice president for international sales for Metromedia Producers Corp., the company "hit our first million" ($200,000 of that having been picked up during a stopover in West Germany the week before). Muir Sutherland, managing director of London-based Thames TV International Ltd, was projecting about $750,000 in sales at MIP.

From the American vantage the worldwide financial stakes are high, whatever the direct or indirect contribution of MIP. A 1977 estimate put U.S. program sales abroad at between $235 million and $245 million (Broadcasting, April 17). The bulk of that comes from seven countries: Canada, more than $50 million; Australia, about $35 million; Japan, $25 million; the United Kingdom, $24 million; Brazil, $22 million; West Germany, $20 million, and France, $15 million.

With production costs rising with international inflation, another word is becoming entrenched in the MIP vocabulary: co-production. From the largest to the smallest, producers and distributors were looking for financial partners. The MIP co-production stand—primarily a service for the smaller companies—was claiming records. As the festival neared its end 138 projects were listed on its boards, up from 80 last year, with producers looking not only to share expenses but technical know-how and territorial access. U.S. offers turned up in the listing with 14 proposals. Among the large distributors, Time-Life went to the Palais with a new co-production in hand titled The Africans, a joint effort with Network Nine of Australia in association with Meredith Broadcasting of the United States. With that property and other Time-Life products, Frank Miller, director of international sales, said that “I had anticipated [a certain] sales level and we tripped it.” Len Mauger, executive vice president of Network Nine, said that sales on The Africans have been strong enough to prompt discussions about a sequel.

Viacom, said Larry Gershman, vice president for international sales, specifically went to MIP to talk co-productions and said he had "serious and meaningful conversations." Although he was not ready to detail what and with whom the projects were involved, he said they included a made-for-TV movie, a miniseries and a two-hour special. Viacom’s pay cable subsidiary, Showtime, also factored into discussions on possible network-syndication-pay cable projects at various times. (A pay cable competitor, Home Box Office, also was on the MIP registration list.)

Public television also was involved. Midway through the festival came word of a co-production between Granada Television of England and WNET(TV) New York: a miniseries based on Evelyn Waugh’s Brideshead Revisited. Joint production costs for two 90-minute episodes and three hours are in the $1.8 million range. An earlier combined effort of the two broadcast units, Charles Dickens’s Hard Times, originally aired in 1977 and was bought by 40 countries including most major European and Latin American markets, France and the Soviet Union also had announcements, of co-productions between the Societe Francaise de Productions et Collections and the National Broadcasting Company.

**Senate bill would allow FCC to protect sports from siphoning**

Ford measure is designed to overcome constitutional challenge; need would have to be proved

A bill to reassert the FCC’s authority to restrict “siphoning” of over-the-air sports programming by pay cable television has been introduced in the Senate by Wendell Ford (D-Ky.), a member of the Communications Subcommittee.

In submitting the measure, Mr. Ford indicated that the Senate that it is not intended to extend carte blanche to the FCC to reinstate pay cable sports restrictions that were struck down in the courts last year. Under the Ford bill, the FCC would first have to make an evidentiary finding that siphoning is actually taking place—that programming is actually being withdrawn or denied, or is about to be—before it could issue any new regulations.

This requirement is necessary, Senator Ford said, to satisfy the constitutional requirement that any form of prior restraint on programming has to be based on clear need.

The burden of proof in establishing the need would rest on the payer, seeking the pay cable restriction—in this case presumably the broadcasters.

Senator Ford said he introduced his bill because he feels strongly that college and professional sports should be available to all television viewers without charge. And he argued that it would be in pay cable’s interest to support it: “The question of potential siphoning is one that creates negative feelings toward the pay television industries,” he said. “By acting on this question now instead of reacting later to a confrontation, the pay television industries will avoid being subjected to an overly negative reaction.”

WORLDVISION ENTERPRISES INC.
The World's Leading Distributor for Independent Television Producers

New York, Los Angeles, Chicago, Atlanta, London, Paris, Tokyo, Sydney, Toronto, Rio de Janeiro, Munich, Mexico City, Rome
and Soviet television for two series, Close-Up on the Soviet Union Republic (fifteen 52-minute shows) and Portrait of the U.S.S.R. Another upcoming co-production between those countries is an expected film on the Moscow Olympics.

For a foreign producer, a co-production deal with a domestic company is one way of cracking the U.S. market; that's how EMI Films' television department is trying to make a dent. Los Angeles-based Roger Gimbel Productions was acquired last year to give EMI U.S. facilities. Among Gimbel/EMI productions already aired is The Amazing Howard Hughes. Another upcoming miniseries is to be based on James Michener's The Source, hopefully by 1979-80. All the partners for that co-production, according to EMI TV sales director William Gilbert, haven't been firmed up, but "we are talking with TV stations around the world."

The widespread popularity of ITC Entertainment's The Muppets notwithstanding — it's easier to list countries not taking it (Russia and China, conspicuously) than those that do — discovering worldwide tastes isn't that easy. The U.S. influence, however, remains dominant. In some cases, U.S. programing may determine success of certain home grown products.

Both Merv Stone, manager of program purchasing for the Canadian Broadcasting Corp., and David Fowright, program controller and joint managing director of Granada Television of the United Kingdom, indicated that hot U.S. programing often is used as a lead-in to maximize audiences.

Alain Duvochel, an administrator in the program department of France's TF1 network, admitted that he and his associates are trying to look for foreign programing from countries other than the United States but "it is very difficult because most countries areimitating what the Americans do." Among the hot program on the French schedules, according to Mr. Duvochel, are Serpico, Columbo, Kojak and Charlie's Angels.

That's not to say that all U.S. programing aired abroad plays as it does at home. Slasky and Hutch for example, appears on German TV, but as Manfred Schutze, deputy chief of program buying for Germany's ZDF network, explains, it's a German version: only about half the episodes are accepted, and those are then cut down from 52 to 45 minutes. The dialogue often isn't just dubbed but changed.

Joseph Wallach, executive director of TV Globo in Brazil (one country, in particular, whose program capabilities are booming), claimed that about 85% of what goes on his network is produced at home while the remaining 15% is "pretty much American." As in the U.S., Mr. Wallach said, "right now we're experimenting with miniseries."

Of growing interest to foreign buyers

In Cannes, en masse. Anthony Black (I), a program buyer from Swaziland TV, checks out the Worldvision Enterprises stand manned by (standing, 1 to r) Gene Moss, vice president-promotion director, Michael Alexandor, Western European sales manager; Brian Rhys-Jones, Australia and Far East sales director; and Philippe Cousin, agent in France.

Teamwork. Of particular interest at the Time-Life Television booth was the miniseries, The Africans, a co-production of T-L and Nine Network of Australia, in association with Meredith Broadcasting. L to r: Wynn Nathan, vice president for worldwide syndication for Time-Life; Len Mauger, executive vice president of Nine Network; and Frank Miller, T-L director of international sales.
If we didn’t deliver extra-distance gas injected poly, someone else might be number one.

Introducing One Inch 'Lumifoam III.

Unlike other companies who merely talk about super low loss cable, Times delivers. Here is One Inch 'Lumifoam III with attenuation of .720 db/100 max @ 300 MHz. This is the inch that translates into many more yards between amplifiers.

You wanted this premier size in 'Lumifoam III so we perfected it, coupling the best electricals in the business to the proven mechanical characteristics of smaller sized 'Lumifoam III. A construction which makes it easier to strip, while maintaining immunity to moisture migration.

Call us for as much One Inch 'Lumifoam III as you want. Nobody works harder to stay number one than the company that is number one.
"By the street of By-and-By one arrives at the house of Never."

The street of By-and-By, like another metaphorical thoroughfare, is paved with good intentions. We are aware of our society's problems; we know the necessity of resolving them. But action is frequently hindered by procrastination and postponement. And, sadly, the delays often result in opportunities forever lost.

For example, while we vacillate in solving teenage unemployment, the potentials of a generation of young people may be blunted or permanently lost. While we endlessly debate the problems of energy, resources dwindle and fuel costs escalate.

Clearly, we must be constantly reminded of the job at hand. And we must be goaded, prodded, even shamed into action.

Broadcasting is uniquely equipped for that task. With their phenomenal reach and impact, radio and television can and must spotlight today's problems, present possible solutions and urge action. Repeatedly and relentlessly. In this way, broadcasting can help direct its vast audience away from the street of By-and-By to a road of vigorous action.

It would be sad indeed if our society, the most informed in history, were to end its days padding about the house of Never, mooning over the dusty relics of lost opportunities.

Cervantes

Cervantes
were children's programs and those shows stressing pro-social and family values. Hassaan Hammad, director of the Kuwait-based Technical Cooperation Co., said he was looking for shows along the lines of Young Pioneers, Little House on the Prairie, The Waltons and Eight Is Enough. Mr. Hammad's company, which buys programing and then resells it to various countries, is but one example of the burgeoning buying going on for the Middle East market. Last year Mr. Hammad went to MIP representing eight states. This year he said he was there for the entire Mideast (with the obvious exception of Israel). He now claims to have his eye on cracking the European market.

In the words of one MIP veteran, "there is a great deal of interest in post-gratuitous violence but the action [shows are] still damn appealing." The reduction in hard action in U.S. programing, according to one Venezuelan buyer, is a major reason why that country is "a much tighter market for U.S. products" now. He claimed that when the "guts" were taken out of U.S. shows Venezuelans were spurred to proceed more strongly into programing for themselves.

A successful U.S. reputation is often a major key to worldwide success, but not always. Take Paramount's Lost Island, for example. According to Bruce Gordon, senior vice president for worldwide distribution, it is Paramount's strongest money-making half-hour series (excluding Happy Days, which collected big sums in Canada). Lost Island garnered $990,000 in 63 markets even before MIP began. The children's program, co-produced with Channel 10 of Australia, has yet to be released in the U.S.

From the American front at least, resulting from network schedules, there was more comedy offered than ever. But "it's still a hard sell," according to Mr. Gordon. Should Fred Silverman (who moves to the NBC presidency in June) emphasize comedy as he did as ABC programing chief, Mr. Gordon said, the U.S. will have even fewer action-adventure shows to watch. Mr. Gordon said that was among the reasons why Paramount acquired the rights to the Australian action-adventure series, Chopper Squad.

In American booths the business beat was up. John Spires, MGM vice president for international sales, claimed that "renewals are following automatically" for How the West Was Won, for example, and that over-all sales at MIP have gone over "seven figures" (MGM is represented in the overseas TV world by CIC, based in Amsterdam). Most of his deals have been informal, Mr. Spires said, but he remarked that in the international world "in 99% of the cases our experience has been that if you have a handshake you have a deal."

Worldvision Enterprises, which planned for two screening rooms prior to MIP and rented another on the spot, went to the festival with many of the major countries locked in for its hottest property, Holocaust. An advance deal worked out just in advance of MIP was for a regional channel to supply it to the West German ARD network. Earlier, in Australia, according to Worldvision's Colin Campbell, Holocaust sold for the highest price ever in that country "even before the script was available." Among the series selling in Cannes were Little House on the Prairie (already sold "right across the board from Japan to Kenya"). He also claimed success with Love Boat and Eight Is Enough.

MCA TV's best-seller TV novels were frequently mentioned by foreign buyers, as was Kojak. And Ralph Franklin, vice president in charge of sales, said interest was "the gamut of his movies and series. The top-grossing American syndicator, MCA TV, had record foreign revenues of $42.8 million in 1977.

Richard Harper, 20th Century-Fox's vice president for international sales, was continuing to sell That's Hollywood and claimed to have received a good reception for Olympic Minutes, a series of four-and-a-half-minute to seven-minute vignettes on past Olympic games as well as athletes expected to be contenders in Moscow.

Other U.S. fare ranged from Airtime International's single product, The Unknown War, to Gold Key International's Alpha Chronicles and outdoor adventure films.

The first MIP sale of The Unknown War—20 hours concerning the Russian front during World War II—was made to a distributor for Austria, Germany and Switzerland. The series is a co-production of Airtime Sovinfilm (Soviet Union) distributed abroad by Bregin Film of Switzerland.
Until now you wouldn't consider buying a demod for $1775.

The remarkable Scientific-Atlanta 6250 falls about $7,000 short of the price you might normally pay for a comparable high quality demodulator. But it doesn't fall short in engineering and performance. We've sold over 300 6250 Demodulators since its introduction a year ago. In fact one group of station engineers wrote, "we are amazed at your demod's performance," after comparative bench tests against a unit close to the $10,000 range.

Consider the specs. 100 uv input sensitivity. Video response ±0.5 dB to 4.18 Mhz, ±2.5% differential gain and ±1° differential phase. With audio response ±0.5 dB 30 Hz to 15 KHz.

Consider the features: Zero chopper capable of operation from external as well as internal command. Envelope detector with optional synchronous detector. Intercarrier sound detection, also direct mode with synchronous detection option. Local or remote control of chopper on/off, envelope/synchronous detection, intercarrier/direct sound detection. Automatic switch-back to envelope mode if phaselock is lost in synchronous mode. AC operation with optional +DC standby powering. Optional powering from -DC.

Consider the organization. At the forefront of the companies who are revolutionizing world communications via satellite, Scientific-Atlanta has had to meet some of the toughest requirements for performance, reliability and economy. The results of this experience are evident in our advanced 6250 Demodulator.

For a demonstration, call Harry Banks at (404) 449-2000. Or write us.

The Sony BVH series.
Consider the accomplishment.

Two years ago, 1" helical-scan recording was just a gleam on the broadcast horizon. Now, there's the new SMPTE Type C Standard. We're kind of proud of that. From the start, Sony Broadcast was a leader in the 1" revolution. We pioneered many of the technical innovations incorporated into the 1" helical-scan VTR. And it's good to be part of a movement so beneficial to the broadcast industry.

How does our new SMPTE Type C machine differ from the more than one hundred BVH-1000's already in use across the nation? Frankly, very little.

And we're proud to be able to offer you SMPTE-standard 1" machines that maintain all the unique advantages of the Sony Broadcast equipment already in the field.

Consider the advantages. Advantages like BIDIREX, which gives you full bi-directional search capability in both shuttle and jog modes. And that means 100% post-production creative freedom, with all the ease and flexibility of 35mm film techniques.

Advantages like the incredible economy of the 1" tape format. Far lower acquisition costs. Smaller size, so you save valuable studio space. Lower maintenance costs. Plus major savings in 1" videotape alone.

Advantages like three high fidelity audio tracks. Color framing, to maintain perfect timing continuity during editing and animation sequences. And more.

Consider the possibilities. Think about the local programming capabilities that open up with the BVH-1000 and portable BVH-500. Capabilities quad can't match. With an economy that leaves film far behind.

Think about creating your own documentaries. Taping your own commercials. Think about taking 1" tape out into the field, then bringing it home and going directly on the air without the need for converting to another format.

Think about the kind of panoramic production once possible only on film. And think about what single-camera film editing techniques will mean to your creative effort.

Consider the source. There's one more thing you should think about as you consider the move to 1".

The source of your equipment. And when you consider Sony Broadcast, you'll find benefits no other source can give you. Like our years of experience in research, engineering, and production of advanced video systems.

And access to a complete family of professional video equipment from a single manufacturer. With the kind of reliability and performance only a single manufacturer system can guarantee.

The BVH Series, from Sony Broadcast. All things considered, it's quite an accomplishment.

Sony Broadcast
Sony Corporation of America, 9 West 57 Street, New York, New York 10019
New York: (212) 371-5800 Chicago: (312) 792-3600 Los Angeles: (213) 537-4300 Canada: (416) 252-3581

only might disclosure cause irreparable harm to the employee, but such documenta-
tion could possibly lay open the licensee to a charge of libel... Simply stated, the commission is ill equipped, nor is it its mission, to adjudicate each individual's case for dismissal."

On the other side of the fence was the joint filing by the Citizens Communications Center on behalf of a number of groups who said the earlier proposal will help the commission "make what now is nearly an empty excuse in paperwork into an effective tool of disclosing compliance with the commission's equal employment opportunity rules." Such amendments to the form, it continued, "would facilitate an accurate evaluation of the EEO performance of all broadcasters by the commission and the public, while encouraging self-regulation by individual broadcasters."

It also criticized the practice of applying EEO filings to stations with more than 5 employees and proposed a change. "The failure to require all broadcasters to file employment reports neglects important policy and public interest considerations. It prevents ascertainment of true station size. It allows distortion of the industry employment picture. It overlooks the importance of the small broadcaster to its local community, as well as to the industry." Thus, Citizens said, "in order to eliminate the possibility of any small station, either intentionally or uninten-tionally hiding its true size and employment policies and practices, the petitioners suggest that the commission should require all stations to submit annual employment reporting forms regardless of apparent size."

Citizens concluded that "the present form provides only incomplete and inaccurate statistical data that precludes effective interindustry comparison and it could be amended without imposing any additional burden on broadcasters."

Reply comments in the matter (Docket 21474) are due May 24.

Taft's turn to buy WDCA-TV; price this time is $13.5 million

Chicago's Tribune Co. made pass at $12-million level, but that deal fell through

WDCA-TV Washington, which was almost sold to Chicago's Tribune Co. for $12 million earlier this year, was contingently sold to Taft Broadcasting Co. last week for $13.5 million.

Taft announced it had signed a letter of intent to buy the channel 20 independent from Superior Tube Co., with the final transaction subject to execution of a definite agreement and approval by the FCC. Taft said the $13.5-million purchase price would be payable over four years.

Taft officials said the proposed acquisition reflected Taft's confidence in the future of independent UHF television. WDCA-TV would be the second such station for Taft, which already owns WTAF-TV Philadelphia, an independent on channel 29. WDCA-TV would also become Taft's seventh television station, the maximum allowed by FCC.

The Tribune Co., which owns the Chicago Tribune, New York Daily News and other papers and is also the parent company of WGN Continental Broadcasting and of WPXK Inc., announced in January that it was buying WDCA-TV (BROADCASTING, Jan. 16). The price was said to be $12 million.

The deal subsequently fell through from what a Tribune spokesman called "disagreement on the financial terms," although he denied published reports that the seller had wanted to jack up the sales price after the station showed ratings gains in January and February (BROADCASTING, March 6).

Superior Tube is a Philadelphia-based manufacturer of precision tubing and specialty metals. It is principally owned by the families of Clarence A. Warden Jr. and Robert H. Gavel. Superior bought WDCA-TV in 1969 from Capitol Broadcasting Co., headed by Milton Grant, now vice president and general manager of the station, for $4.8 million, including liabilities and an agreement not to compete. Mr. Grant will continue as general manager under the new ownership.

Taft said Ted Hepburn Co. assisted in getting the Taft and Superior Tube officials together. Taft television stations, in addition to WTAF-TV, are KRKR-TV Cincinnati; WTZY-TV Columbus, Ohio; WBRK-TV Birmingham, Ala.; WDAF-TV Kansas City, Mo., and WGR-TV Buffalo, N.Y. Taft also owns five AM and five FM stations.

FEATURED BY AMERICA'S OUTSTANDING MEDIA BROKER

West Coast AM/FM $325,000

Newly programed, fully automated stereo FM station just now starting to make impact along with successful non-directional AM daytimer. Located in growth area away from big city signal competition yet with easy access. Most every summer/winter recreation close by. Eight acres of transmitter real estate. First time offered. Mostly cash required.

Changing Hands

Announced

The following station sales were announced last week subject to FCC approval:

- WDCA-TV Washington: Sold by Superior Tube Co. to Taft Broadcasting for $13.5 million (see story above).

- WBNB(AM)-WRKJ(FM) New Bern, N.C.: Sold by First Capital Radio to Conway M. Smith for $850,000. Seller is owned by Ted J. Gray who also owns WKDE-AM-FM Altavista and WTXA-AM-FM Appomattox, both Virginia, and WRH(AM) Rock Hill, S.C. Mr. Smith also owns WDEC(AM)-WPE(AM) in Americus, Ga., and WTL(AM) Madisonville, Ky. WBNB is on 1490 kHz with 1 kw day and 250 w night. WRKJ is on 101.9 mhz with 100 kw and antenna 580 feet above average terrain.

- WEP(AM)-WES(AM) Martinsburg, W.
Va.: Sold by Martinsburg Broadcasting to Electra Broadcasting for $800,000. Seller is owned by C. Leslie Gollday, who has no other broadcast interests. Buyer, owned by Charles C. Thornton Sr., is also licensee of WTRI(AM) Brunswick, Md. WPIM is on 1340 khz with 1 kw day and 250 w night. WESM is on 97.5,mhz with 9 kw and antenna 1,010 feet above average terrain.

WPAL-AM-FM Appleton, Wis.: Sold by Badger Cities Broadcasting to the Telegraph-Herald Corp. for $160,000. Seller is owned by Thomas P. Moore and his wife, LaVonne, and Mr. and Mrs. Orville Saether who also own WBCO-AM-FM Bucyrus, Ohio, and WQOD-FM(AM) Albany, N.Y. Buyer is owned by Woodward family and publishes Dubuque, Iowa, Telegraph-Herald and also owns KDTH(AM)-KFDM(AM) there, KLMS(AM) Lincoln, Neb., WHBY(AM) Appleton, Wis., (Telegraph-Herald plans to spin off WPAL and keep WHBY). WPAL is 1 kw day timer on 1570 khz. WPAL-FM on 105.7 mhz with 50 kw antenna 310 feet above average and terrain.

WWRN(AM) West Palm Beach, Fla.: Sold by Sandpiper Broadcasting Co. to Pearl Broadcasting Inc. for $520,000. Seller is principally owned by John Keljikan (75%), Harcourt Brace Jovanovich Inc. publishers (15%), and Ralph Keesing (10%). Buyer is owned by Irving and Helen Pearl (married) who are equal partners with no other broadcast interests. WWRN on 92.1 mhz with 3 kw and antenna 280 feet above average terrain.

KTRT(AM) Truckee, Calif.: Sold by Trans-Sierra Broadcasters to Mira Shea for $160,000. Seller is owned by Herbert G. Crenshaw; his mother, Talma L. Crenshaw; Howard F. Brooks, and Eugene Gini, none of whom has any other broadcast interests. Buyer is account executive at KVOA(AM) Colorado Springs and has no other broadcast interests. Sale of KTRT previously announced to Vernon L. Lundquist (Broadcasting, Dec. 5, 1977) was not consummated. KTRT is on 1400 khz with 1 kw day and 250 w night. Broker: Chapman Associates.

Other station sales announced last week are on page 74.

Approved
The following station sales were approved last week by the FCC:
- KPRO(AM) Riverside, Calif.: Sold by Progress Broadcasting to Inland Broadcasters for $780,000. Seller, wholly owned subsidiary of Dick Clark Television Productions, is owned by music producer Dick Clark and has no other broadcast holdings. Buyer is principally owned by Howard N. Fisher, vice president and general manager of station who has no additional broadcast interests. KPRO is 1 kw daytimer on 1440 khz.
- KIXY-AM-FM San Angelo, Tex.: Sold by Solar Broadcasting Co. to CDI/Ardis Communications for $575,000 in cash and notes, $10,000 agreement not to compete and $30,000 consulting agreement. Seller is 100% owned by Walton A. Foster who has no other broadcast holdings. Buyer is Illinois limited partnership in which John H. Higgins, Gerald P. Mikitka and Don J. Wikses own equal amounts of stock. Mr. Higgins also has 10% interest in First Cable Communications Inc., operator of three CATV systems. Messrs. Wikses and Mikitka are president and senior vice president, respectively, of Capital Directions Inc., Illinois brokerage firm. KIXY is 1 kw daytimer on 1260 khz. KIXY-FM is on 94.7 mhz with 39 kw and antenna 140 feet above average terrain.
- WMGCA(AM) Brunswick, Ga.: Sold by Radio Brunswick to Burrows Broadcasting for $500,000. Seller is owned equally by William G. Brown and Clifton G. Moor, who also own 100% of WPFC(AM).

Brown’s two-way street between broadcasters and their communities
To FCC Commissioner Tyrone Brown, “dialogue between broadcasters and viewers is at the heart” of the television broadcasting system. He says he intends to do everything he can to keep the channels of communication open. And he indicated he wouldn’t be tough about it.

The commissioner made the comment in remarks prepared for delivery at a meeting of the Boston Community Media Council Inc., whose purpose is to bring together groups and broadcasters together—a function the commissioner applauded.

“There is a real value in result-oriented discussion among broadcasters and their viewers and listeners,” Commissioner Brown said. Both members of the public

and broadcasters, he said, have a duty to engage in the kind of dialogue that will result in better broadcast service.

And the commission, he added, is responsible for assuring that "the channels of communication are open so that meaningful dialogue" between the two groups can occur. It is also responsible, he said, for "requiring broadcasters to be reasonably responsive to the needs and interests of their viewers, not as individuals but as the community and as significant groups within the community."

"We commission are in a sense guardians of both the First Amendment rights of broadcasters and of the First Amendment rights of the community in free and open debate and the presentation of varying viewpoints and lifestyles over the public airwaves," he said.

Commissioner Brown promised to support broadcasters who are engaged in a meaningful dialogue and are meeting their public interest obligations. But he warned, "I also promise that when broadcast licensees come before the commission who are not taking their public interest obligations seriously, I will vote for transferring their license to someone else."

ACT gets together in Washington

Symposium marks 10th anniversary of organization, starts off with Kennedy Center bash, continues with big names in attendance

Action for Children's Television, which began 10 years ago as a group of Boston area housewives unhappy about the television programming their children were watching, is demonstrating in Washington this week the prestige and public relations sophistication it has acquired.

The occasion is a double event—ACT's seventh national symposium, which is being devoted to "TV Role Models and Young Adolescents," and the organization's 10th anniversary.

And as speakers, panelists and participants, ACT has managed to line up an array of attention-getting personalities. FCC Chairman Charles D. Ferris and author David Halberstam will be among the speakers at the symposium, which runs from April 30 to May 2.

Among the panelists are Alfred Schneider, ABC's vice president for broadcast standards; columnist Ellen Goodman; satirist Stan Freberg; former FCC Commissioner Nicholas Johnson, who now heads National Citizens Committee for Broadcasting; David Sontag, vice president of prime time television, Twentieth-Century Fox; Mike Dann, consultant to Warner Communications, IBM and Children's Television Workshop, and author Jeff Greenfield. They will be discussing such things as the ways that television producers might address issues of concern to teen-agers, advertising to adolescents and "Soaps and Sitcoms: Is That All There Is?"

Most of the events will be held at George Washington University, but the threeday event was to be kicked off Sunday on the Kennedy Center Concert Hall, with Mario Thomas, Ossie Davis, Buffy Sainte-Marie and LeVar Burton presenting a multimedia program. It is designed, ACT's press release says, "to illuminate the crucial issues of children's television, including the effects of TV role models on the attitudes and behavior of young people."

ACT will establish a first this week, using the symposium as a forum for the presentation of its annual "Achievement in Children's Television" awards. These will be announced on Tuesday.

The symposium is supported in part by grants from the Mary Reynolds Babcock Foundation and Sears, Roebuck.

Media Briefs

No way to do it. FCC has dismissed petition by WIOO Inc. for reconsideration or classification of its annual "Achievement in Children's Television," an application of Carlisle, Pa., license for hearing. Commission in January designated comparative hearing involving renewal application of WIOO(AM) and application for new station filed by Carlisle Broadcasting Associates. Commission said its rules did not provide for reconsideration of hearing orders, except in situations not applicable in WIOO case.

More ask stay. Spartan Radiocasting Co., licensee of WSPA-TV Spartanburg, S.C., is appealing FCC action in significant viewing case. Spartan has filed notice of appeal in U.S. Court of Appeals Fourth Circuit, in Richmond, Va. And along with WPLG(TV) Miami and WFSB-TV Hartford, Conn., it has asked FCC to stay May 24 effective date of order exempting from network nonduplication rule signals that are significantly viewed off air in community. They are requesting stay of order until petitions for reconsideration of order are acted upon or until judicial review is completed. Motion for stay pending action on petition for reconsideration had already been filed by Amaturo Group Inc., KCST Inc., McGraw-Hill Broadcasting Co. Inc., and NEP Communications Inc. Deadline for filing comments on request for stay is today (May 1).* 

Correction. Media law conference dealing with such subjects as Federal Trade Commission's proposed rules on children's television advertising, media antitrust actions and domestic satellites will be held May 11-12 at the Communications Media Center, New York Law School, New York. School was erroneously identified as New York University in BROADCASTING April 17. Erwin Krasnow, general counsel, National Association of Broadcasters, and Scott Robb, Robb & Reukauf, New York, will be co-chairmen.

Broadcast Advertising

Classical stations report big gains in ad revenues

But CMBA members are told their outlets are underused as an advertising medium

Advantages and problems of classical music radio stations were pointed up by an advertising panel at the 1978 conference of the Concert Music Broadcasters Association, held in New York April 17-20.

Ramon Gaulke, president of Marsteller Inc., New York, told a luncheon session that his agency had used classical music radio to sell products of all sizes and prices but that he had never been able to persuade a client to use it for corporate advertising. "I'll keep trying," he added.

George Norton, vice president of General Telephone & Electronics, which sponsors classical music programs nightly on five stations, said concert music "gets you an audience that is really loyal ... and responsive."

When some of the 60 classical music broadcasters at the conference protested that they often got very short shrift from agency buyers, Joyce Peters, media director of Media Specialists Inc., advised that they visit the timebuyers—and also send their research people to call on the agency planners. "When it's on the plan," she said, "the buyer is afraid not to buy."

Mr. Gaulke suggested that it was up to agency management people, like him, to tell agency creative and media people to use radio "whether they like it or not." Whenever it's in the best interest of a client. "Where you need more than 25 words," he said, "radio has a real advantage."

In other sessions of the CMBA's ninth annual conference, Teresa Gannon of Target Group Index reported that a national survey had set the number of adults who "prefer" classical music radio programming at 9,916,000, a gain of 10% in four years.

The 23 stations represented at the conference—out of a total of 52 AM and FM outlets that devote 30% or more of their air time to classical music—reported gains in time sales averaging 30%, according to Vinnie Webb of WGM-FM Newport News, Va., president of CMBA.

Chicago Symphony Orchestra broadcasts, presented by Amoco on 300 radio stations for the past two seasons, reached an unduplicated total of 24 million listeners a year, according to a study by D'Arcy-MacManus & Masius, Amoco's agency. The report was presented by Ray Nordstrand of WPM(AM) Chicago, which syndicates the broadcasts.

President Bernard Mitchell of U.S. Pioneer Electronics reported his company's first season of sponsorship of New York City Opera Company broadcasts was
A no-panic posture on media inflation

All things considered, price hikes aren't as bad as they might have been, says agency man

Despite all the talk, media price increases haven't been too bad, and besides, they're going to taper off, especially in television.

That message was offered to an Association of National Advertisers workshop last week by William H. Lynn, senior vice president and director of media services for Ketchum, MacLeod & Grove, New York.

Mr. Lynn, examining ways to beat rising costs, ventured that much more interest is going to center on the 10-second length for television commercials. But he cautioned that a mass move to 10's could increase clutter and reduce efficiency.

As for that "uncontrollable spiral" in media costs, he said that since 1970 broadcast costs have risen by 65%, thanks to a 91% rise in TV costs, and media prices generally have climbed by 66%. In the same period, he said, the cost of living has risen 60%, coffee prices 300%, housing over 1100%, gasoline 125%, an average food basket 70%.

Against those rises, he said, "the general media price increases of 66%—and even the TV 91% increase—don't look out of line. The world is getting to be a more expensive place to live in, and media are just one element involved."

Over the next two years, Mr. Lynn predicted, "we will see media costs—particularly television—plateau. In fact, it is highly probably that the 1978-79 broadcast season will find substantial advertiser resistance to any major marketplace cost increases, and in some instances negotiated costs might actually fall below this year's."

"And because the media market is a self-regulating entity, as far as pricing is concerned, the broadcast plateau will slow down the prices increases in other media as well."

Mr. Lynn spoke at an ANA advertising financial management workshop at Callaway Gardens, Pine Mountain, Ga.

Female life styles: will changes hurt TV?

C&W's Nichols says working women are reading more and viewing less

The changing role of women could lead to a decline in the use of television advertising and an increase in print advertising, according to Carl W. Nichols, president of Cunningham & Walsh, New York.

He developed this hypothesis during a talk to the Phoenix Advertising Club. He cited research undertaken by C&W that shows that women, more and more, are taking charge of family finances for such big-ticket items as cars, houses and vacations, as well as in supermarket shopping.

He noted that working women watch less TV and spend more time reading magazines than nonworking women. But he said nonworking women, who consider inflation their number-one problem, also are reading more "in a search for more helpful product information which most commercials simply can't provide in 30 seconds."

Mr. Nichols said he would not "go so far as to predict the decline and fall of TV." But he insisted that "there's certainly a stronger and brighter future for print media; it simply has to become more upfront in our marketing thinking and its growth undoubtedly will be at the expense of TV."

He told the meeting that many of today's copywriters have written only for television. Mr. Nichols announced during his speech that C&W is organizing a program of seminars on writing for print for its younger writers and summer interns.

Broadcasting role in coping with drug problems cited at Wolff committee hearing

"In general, public service advertising about drugs has no effect on the audience," Dr. Gerhard Hanneman of the Annenberg School of Communications, University of Southern California, has told a House Select Committee on Narcotics Abuse and Control. Among reasons for PSA ineffectiveness, according to the professor, are lack of pretesting of spots and a "laissez-faire distribution" of spots. He called the latter "a waste of taxpayer dollars."

Representatives from the National As-
Colorado's unusual Section 315 quandary

FCC rules DA facing recall must be considered a candidate since ballot also contained choices for his successor

New Section 315 questions never cease. The FCC last week was called upon to decide whether the district attorney of Pueblo county, Colo., was facing a recall election on Thursday, April 27, was to be considered a legally qualified candidate for public office.

Ordinarily, the answer would be no, since the question in recall elections is not who should hold office but whether an official should be removed from office.

But the situation in Pueblo county was different. For the voters were being asked not only whether the district attorney, Joseph E. Losavio Jr., should be recalled, but also, if he is, who of two alternative candidates—Patrick J. Maggio and Joe T. Ulbarri—should replace him.

Under those circumstances—with the two questions so interrelated—the present district attorney should be considered a candidate, the commission said. Otherwise, it added, the incumbent and the other candidates might suffer.

The commission noted that if the incumbent were not a legally qualified candidate, his paid announcements would be subject to censorship while the candidates' would not. Nor would the incumbent be entitled to the lowest unit charge that would be available to the others. On the other hand, the alternate candidates would not be entitled to equal time if the incumbent appeared on a station.

The question as to Mr. Losavio's status was raised by KOAA-TV Pueblo. It wondered whether tapes Mr. Losavio wanted aired could be considered "uses" under the equal-time law and, therefore, subject to the no-censorship provision of the equal-time law. The station said the tapes contained material that could be considered defamatory to persons supporting the recall.

The commission said that if the station had agreed to sell Mr. Losavio time, it could not withdraw the offer because of the material on the tapes. It also noted that the Supreme Court has ruled that since a station may not censor a broadcast by a legally qualified candidate, it could not sue for anything the candidate said.

Advertising Briefs

Bread for B&B. Quality Bakers of America Cooperative Inc., New York, which has used in-house Q.B.A. Advertising Inc. since 1942, when it introduced Miss Sunbeam Bread, has named Benton & Bowles, New York, as its first outside agency. Cooperative organization of 130-member companies has budget of about $6 million, primarily in spot TV in New England, Southeast and Southwest.

New honor. World Institute of Black Communications has been formed to present first awards to recognize excellence in print and broadcast advertising aimed exclusively at black audience. Institute, founded by National Black Network, will give CEBA (Communications Excellence to Black Audiences) Awards in 39 categories of print and broadcast advertising. Entries must be postmarked by May 19, 1978, to be eligible for this year's awards. Mail or deliver entries to CEBA Awards c/o National Black Network, 1350 Avenue of the Americas, 24th floor, New York 10019. Information on entry fees is available from NBN from Joan Logue Henry or Adrian Gaines at (212) 586-0610.

NAB to CAB. National Association of Broadcasters told Civil Aeronautics Board in comments last week that proposed rulemaking preventing airlines from passing costs of institutional advertising on to customers would affect their free speech rights, because rule would encourage CAB to review advertising content. Furthermore, rather than absorb costs of institutional ads, airlines would probably stop running them altogether, NAB predicted. Proceeding is in response to Aviation Consumer Action Project, which contends that some institutional ads, for which customers pay through their tickets, are primarily intended to lobby government on behalf of airlines.

New agency is tapped. F. & M. Schaefer Brewing Co., New York, has chosen Ogilvy & Mather, New York, as its new agency, replacing Warwick, Welsh & Miller, New York, effective June 30. Account bills more than $5 million, of which estimated $4 million is in broadcast. Warwick officials said they were surprised by move, saying they had been assured brewery was talking to other agencies only on matters involving new products.
A message from Nursing Home Professionals.

Health care abuses. Profit abuses. Bureaucratic fumblings. These and other attacks leveled at nursing homes have always appeared as front page news. When these stories appear, we are just as outraged at the shame and the scandal. We abhor the tales of unsafe facilities, inadequate diets, patient neglect.

Perhaps, unwittingly, we have built a serious communications gap. A gap between what most critics believe to be the facts and what actually are the facts related to the nursing homes in our nation today.

Nursing home care is a relatively recent development in this country. From the early community-sponsored shelters that served as poor houses, the nursing home was born. Usually a small family-run home that planted the seeds for today’s modern facility.

But as human life spans continued to increase, so did the problems of aging and the care for the aged and the chronically ill. So that by the early 1950’s, the need to improve conditions and facilities was critical. A major growth took place, not only aided by public awareness, but by the private investment of billions of dollars for land, construction and qualified personnel.

Suddenly, the number of long-term facilities tripled from 6,500 to 25,000.

Suddenly, from 172,000 available beds in 1953, the number of beds became 1.2 million by 1973.

Today, there are 20,000,000 Americans aged 65 and over. But, as many as 600,000 need nursing care and can’t get it. Because for all the growth, for all the improvements, the number of Americans needing professional health care has skyrocketed.

Where can these people go? As fast as new, modern, professionally staffed facilities are built, just as quickly the waiting lists multiply. Many remain residents of boarding houses, independent homes, some inadequate, too many unsafe.

The incidents that have stigmatized the entire health care industry are mainly focused on those homes.

But these stories mask the progress of the vast majority of AHCA members who provide a wholesome, enriching environment for their residents. We are constantly improving both the social and physical environment; we are working to build individual dignity to its highest level; we are recruiting more qualified full-time specialists, searching for methods to train and re-train doctors and nurses in geriatric care. The nursing home profession has outgrown the county poor farm.

Certainly the story of progress in health care is just as valid as the story of abuse. Let’s report them both.
Magid, KSD-TV trade suits over survey

He started first, asking for $9,000; station countered with bid for $18,000; now he is asking $3 million more

News consultant Frank Magid and one of his oldest clients, KSD-TV St. Louis, are suing each other over a $27,000 market survey Frank N. Magid Associates Inc. agreed to perform last year. The station wants to get back the $18,000 it has paid, claiming Magid failed to perform in accordance with the agreement. Magid, on the other hand, is countersuing not only to collect the remaining $9,000 but for another $3 million as a result of the allegedly "false and defamatory" statement of a KSD-TV executive that was published in a St. Louis newspaper.

At issue in the suit is an "attitudinal news research study" of a kind KSD-TV officials say they have obtained from Magid a number of times dating back to 1964. However, one delivered last August was not in accordance with an agreement reached last May, according to KSD-TV.

For one thing, the submission was late; KSD-TV said the report was to have been delivered the week of July 25. For another, it contained no recommendations (all other reports provided by Magid had contained recommendations, according to KSD-TV officials). The suit also alleges that errors in the survey questionnaire were discovered in preliminary testing but were not corrected, that the report did not include breakouts as to age and socioeconomic patterns, and that the analysis was "superficial."

A key issue in the case is KSD-TV's allegation that Magid refused to allow station personnel to verify and validate the authenticity of the survey data—a process that normally involves recontacting 20% of the sample to verify they had participated and had completed the questionnaire. Magid, in its countersuit, claims it offered to allow KSD-TV personnel to monitor the validation "in a manner consistent with the ethical standards of confidentiality."

Gary Chapman, KSD-TV's marketing director, said the two parties were continuing to discuss the validation issue when, "On Christmas Eve," Magid initiated the litigation with a suit in Linn county (Iowa) court seeking the $9,000 allegedly due. KSD-TV later asked for dismissal of that suit and filed its own in U.S. district court for the eastern district of Missouri, where the case is now being litigated.

Magid, in its countersuit, claims it performed all of its obligations. It says the study it performed "was comprehensive and complete," containing more than 234 pages of information and analysis and that KSD-TV was provided with a computer printout used in the study that included survey data by age and socioeconomic patterns.

The suit also cites, without elaboration, one finding of the study that was negative: "Positive viewer attitude toward KSD-TV was declining in the St. Louis metropolitan market," a conclusion said to have been supported in a November 1977 study conducted by Arbitron that showed a drop of 22,000 viewer homes.

The defamation aspect of the countersuit—Magid is seeking $1 million actual damages and $2 million in punitive damages—results from a column in the Feb. 10, 1978, St. Louis Globe-Democrat, in which Mr. Chapman is quoted as saying the research performed by Magid was "defective and incomplete," and as making other statements, "the reasonable interpretation of which," the suit says, "was that Magid had refused to allow KSD-TV to validate the authenticity of the questionnaires used in research."

This referred to a history of events given to the newspaper by Mr. Chapman that he repeated last week. He said that although Mr. Magid offered to permit KSD-TV officials to monitor the validation process, plans for KSD-TV personnel to travel to Magid's headquarters in Marion, Iowa, for that purpose were twice postponed at Magid's request and that, finally, late in October, Magid was advised by counsel not to permit the monitoring until the final $9,000 was paid.

The Magid suit said that as a result of the "false and defamatory statements, Magid has suffered in its business reputation and professional standing."

Utica station upheld in refusal to yield off-the-record tape

WLW Inc., licensee of WLW-AM-FM Utica, N.Y., has won a victory for reporter's privilege in a skirmish with a local Democratic political leader. WLW refused to turn over an audio tape of a county executive's remarks it considered privileged, and a state judge upheld the refusal.

The controversy started when word got out of a press briefing by the county executive of Oneida county, William Bryant, on April 4. The remarks, which reportedly dealt with Mr. Bryant's reasons for not attending a breakfast conference between local political leaders and Senator Daniel P. Moynihan (D-N.Y.), were off the record, and were not reported.

But the attorney for the Democratic leader, Rufus P. Elefante, filed a motion in New York Supreme Court, asking that a tape the WLW reporter, Gary Kennedy, had made be turned over to Mr. Elefante. He was said to be contemplating a slander suit against the county executive.

When WLW's attorney opposed the motion, claiming reporter's privilege, the county executive was quoted in the press as saying he hoped the station would com-
Guaranteed overnight package service.

It doesn't just mean you can get your money back. It means you won't have to.

Next Day Express Mail guarantees overnight service by 10 a.m. Or your money back. All of it.

But we know you really want to get your package there on time. Not to get your money back.

This guarantee is our straightforward demonstration of confidence. After all, we handle millions of packages that have this guarantee. So you better believe we're going to be on time.

All you have to do is to get your package to an Express Mail Post Office before 5 p.m. Anything mailable, up to 70 pounds.

We'll get it to the destination Express Mail Post Office ready to be picked up as early as 10 a.m. the next business day.

For about two dollars more, we'll deliver it right to their door by 3 p.m. If not earlier. Weekends and holidays, too.

We've got over 1,000 Express Mail Post Offices in over 400 cities. So you'll probably find one that's located right near you.

Got something to ship in a hurry? Ship it Express Mail.

With our guarantee, we have to be tough on ourselves. And that makes it easier on you.

City to city,
Post Office to Post Office,
by 10 a.m. Guaranteed.

What does it cost? A lot less than you'd think. For example, it's only $8.50 to get a 5-lb. package from N.Y. to L.A.

U.S. Postal Service
CATV systems, earth stations, components. We can help you control acquisition costs and turn a profit.

We're Microwave.
At Microwave Associates, we're doing something about one of your prime concerns. CATV system acquisition costs.

With over 25 years of solid-state microwave technology behind us, we can offer you an unbeatable combination of high quality and low price in CATV equipment and systems. That means a complete, turnkey system or any of the individual components you may need for backup or expansion. You'll find that with a Microwave Associates CATV installation you can count on equipment reliability, low maintenance, and long service life. It's an excellent investment.

How do we give you a price advantage? For example, there's the VR-3 CATV satellite video receiver. This single-channel unit is a genuine bargain at under $4000.

Now we've just introduced the VR-4 all channel satellite receiver that sets a new standard of excellence. At $6500, you'll find that it has the others beat hands down in performance and versatility.

We also have a new, low cost CARS Band FM microwave system. It's the MA-12X transmit/receive system that incorporates state of the art, field proven, solid-state circuitry and provides great flexibility.

Through innovative design and engineering, we've come up with a quality system that costs one third the price of similar systems.

For long-haul relay, the MA-12G and FML systems are the standards of performance in the industry.

Whatever your CATV needs, Microwave Associates can fill them economically . . . from total, custom designed satellite and terrestrial systems to individual components.

For detailed literature and specifications, contact the Microwave sales office nearest you.

Time, ATC merger set at $140 million

Time Inc. signed an agreement last Wednesday (April 26) to acquire the balance of American Television & Communications Corp., Denver-based cable TV systems company, in a merger transaction valued at between $135 million and $150 million (Broadcasting, Jan. 2, et seq.).

Time, which already owns 26% of ATC's outstanding stock, plans to acquire the rest in an exchange-of-stock arrangement. Each outstanding share of ATC common not owned by Time will be converted into 1.55 shares of Time convertible preferred stock—which would have a cumulative annual dividend rate of $1.575 per share and a liquidation value of $30 per share—and be convertible into 0.72 shares of Time common, redeemable five years after the merger.

The merger terms include a cash alternative that will permit ATC stockholders to receive a cash payment in lieu of shares of Time Inc. convertible preferred stock. Time will not be required to make cash payments for more than about 22% of the outstanding ATC stock. A Time spokesman said the cash price will be determined prior to mailing proxy materials with respect to the merger, but will not be more than $50 nor less than $45 per share of ATC common stock.

The proposed merger, including the cash election alternative, will be subject to, among other things, approval by ATC's stockholders and the receipt of necessary regulatory agencies.

ATC operates more than 80 cable systems throughout the country.

Showtime and Columbia sign deal for pay specials

Showtime Entertainment Inc., New York, has entered into a nonexclusive agreement with Columbia Pictures Pay Television, New York, to acquire 11 original pay TV specials and to co-produce other entertainment specials with Columbia.

The 11 Columbia specials are: In Session: Seals & Crofts; In Session: Sarah Vaughan and Carman McRae; No Cover; No Minimum, starring blues singer Lee Dorsey; No Cover; No Minimum, starring Peter Allen; Orson Welles at the Magic Castle; The Johnny Mathis Christmas Special; Jamboree in the Hills; Scapino with Jim Dale; Abba, featuring the European rock group, and two rock concerts taped in London.

Showtime, a subsidiary of Viacom International Inc., New York, will distribute the specials via its satellite network to affiliated cable TV systems.

Another in the sky

Fanfare Television, a new consortium, has signed an agreement with RCA American Communications for satellite distribution of sports events, major motion pictures and special events to pay cable television systems in Texas, Louisiana, Arkansas, Oklahoma and New Mexico.

It is said to be the first satellite distribution agreement for regional pay television. According to Fanfare's president, Jack Williams, its service will begin in June 1978 and will include exclusive coverage of the Southwest Athletic Conference (football, basketball and other sports), Houston Rockets basketball, Houston Astros baseball and other sports and entertainment events. Fanfare will originate a daily program during the five hours between 7:30 p.m. and 12:30 a.m., central time, from its Houston headquarters for distribution by the RCA satellite.

Fanfare is a joint venture of Hollywood Home Theater; Kenneth Schmitz, Texas businessman and owner of the Houston Rockets and Houston Arrows hockey team, MCT Productions, Houston-based TV production firm, and Pace Management, Texas entertainment production company. Hollywood Home Theater, a joint pay TV programing venture of 20th Century-Fox and United Artists, will provide Fanfare with major motion pictures from Hollywood studios, it was said.

Some kidding on the square from Anselmo

Spanish International president, who wants to extend network via system of TV translators, assumes fictitious identity to make his point with the FCC

"First of all, I want to tell you how distasteful it is to me to even have to write to a member of the growing bureaucracy in this country... and have no doubts about it. Mr. Ferris, you are a member of this growing menace."

Thus began a letter to FCC Chairman Charles D. Ferris from one Caruthers P. Holdfast, president of "The Broadcasters & Cablecasters Benevolent Society of America," which, according to a line at the bottom of the stationery, is "An Affiliate of the NFL." At first, the letter—with its criticism of Chairman Ferris's encouragement, in his speech to the National Association of Broadcasters convention, of minorities to enter broadcast ownership—seems the work of an uninhibited bigot with a mad on for government. But a few sentences later it is evident that what is really driving the writer is not hate but sarcasm and irony. And it isn't long before Caruthers P. Holdfast is revealed as Rene Anselmo, president of Spanish International Network. Mr. Anselmo is the target of much of the criticism expressed in the letter, which bore the return address of 270 Park Ave., N.Y., SIN's national headquarters.

The letter was Mr. Anselmo's device to draw attention to his impatience with continuing delay in FCC consideration of his applications for four translators to extend the signals of SIN stations to distant cities. The applications were filed a year ago, and Chairman Richard E. Wiley indicated to Mr. Anselmo that approval could be granted in about three months. However, there were problems. The applications represented something new in translators. Normally, translators fill out blank spots in a regular station's service area; these were to provide service in new areas—Denver and Bakersfield, Calif., where the facilities would rebroadcast programming of SIN's KMX(TV) Los Angeles, Philadelphia, where the translator would be fed off the air from SIN's WXT(TV) Paterson, N.J., and Austin, Tex., where the translator would rebroadcast SIN's KTX(TV) San Antonio. SIN's plans also provided another new wrinkle: The Denver translator would be fed by satellite. Mr. Anselmo is considering extending the translator plan to other areas with large Spanish-speaking populations.

But the proposals provided policy questions the FCC staff felt needed pondering before action could be taken. And those questions were compounded when the National Cable Television Association, concerned about the competition translators could provide cable systems (a concern intensified when the commission in December authorized the use of FM microwave to transport signals to translators), complained that translators are free of the kind of restrictions familiar to cable operators. With the staff considering these matters, action on SIN's applications has been delayed.

At present, the Office of Plans and Policy and the Broadcast Bureau are attempting to draft a notice of inquiry to examine a wide range of translator-related issues. Last week, staffers could provide no indication of when a document would be ready for commission consideration. But at a minimum, it would appear that action on SIN's applications could be delayed for a year or more, particularly if the inquiry were to be followed by a notice of proposed rulemaking.

"That's why," SIN's counsel, Norman Leventhal, said, "Mr. Anselmo got fed up and wrote the letter." Mr. Leventhal telephoned the chairman's office as soon as he was informed the letter had been sent to make sure Mr. Ferris was aware of the letter. In effect, he says, Mr. Leventhal said last week, "was a joke, but with a serious purpose!"

Frequently in the letter, Mr. Anselmo, as "Caruthers P. Holdfast," uses the bigot's language to make a point: "All this talk about encouraging minorities to get into broadcasting can have a disastrous effect on people. [When former Chairman D. Boy Ballard] said "hold a pass on this theme," right away that guy Anselmo starts to go crazy dreaming up schemes how he can put more of those Spanish-speaking stations on the air."

And often, the letter directs sarcasm at cable interests. With the author of his letter cast as a former broadcaster who has acquired "a little unregulated cable system," Mr. Anselmo manages a jibe: "Mr. Wiley manages a b.s. at cable operators based on their success in persuading the commission to repeal prohibitions on cable systems' leapfrogging television signals and on cable's plea to the FCC to remove the restrictions that hinder them in competing with broadcasters: "How are you going to allow that Spanish International crowd to leapfrog their own signal?" he asks at one point. "Leapfrogging is the whole underpinning of the cable industry. That's unfair competition to let a broadcaster leapfrog. Isn't it bad enough that you're still allowing broadcasters to provide free service in markets where we are forced to charge people to bring them cable TV? Talk about unfair competition."

To what extent Mr. Holdfast-Anselmo managed to stir the commission to action on SIN's translator applications remains to be seen. The chairman's office had not yet seen the letter last week, but an aide to Chairman Ferris directed reporters looking for reaction to the chairman's comments favoring marketplace competition among technologies over regulation as a way of serving the public interest.

NBC raises objections to Mutual's filing for earth stations

Future problems with interference, effects on EBS, other networks must first be determined, FCC is told

Mutual Broadcasting System's plans to distribute its radio network programming via satellite have been questioned by NBC and opposed by the Texas State Network.

In comments on Mutual's application to construct 500 receive-only earth stations around the country (Broadcasting, Nov. 28, 1977), NBC raised several matters it said the commission should consider before it allows construction of the 10-foot dishes. TSN asks denial of the application on a number of legal and technical grounds.

"Our basic concern," said NBC, "is whether adoption of the policies proposed here and their application to similar systems in the future, possibly representing thousands of 4 ghz ground stations, could upset the efficient management of the vital 3.7-4.2 ghz frequency band."

NBC said it as well as CBS and ABC are studying the possibilities of satellite transmission on the same frequency. NBC is concerned that Mutual's earth stations may cause interference to systems later when the band is more crowded.

"The commission should also consider" NBC continued, "the restrictive implications of a dedicated nationwide system, possibly leading to many dedicated systems duplicating each other, in compatible standards among those systems, and the resulting inefficient use of the 4 ghz frequencies and satellites, not to mention the higher cost of duplicated facilities to the users, and indirectly to the public."

Another concern NBC expressed was over the possible effects of the satellite system on the broadcast television system. Currently, NBC said, the system is constructed as a combination of landlines, microwave hops and satellites. NBC said the Mutual system as proposed provides no EBS back-up capacity.

NBC also questioned whether the stations using the earth stations would be permitted to pick up signals other than the Mutual feeds, such as other networks, wire services, syndicators and so on. It wanted to know, for example, "if other services do begin to share the system... can Mutual remove its ground station and terminate those services when its radio stations discontinue affiliation with Mutual? Would Mutual's sharing rates be subject to regulation? What are the qualifications of those entitled to share Mutual's facilities?"

NBC concluded that it "believes that the most effective, flexible and desirable use of the 4 ghz satellites for radio purposes may involve earth stations that are: coordinated among several users, able to work with any satellite or satellite channel,
frequency coordinated where deemed necessary, fully compatible with the various broadcast and wire services normally used by radio stations, and possibly operated in association with a carrier who can make additional use of the ground station's capacity."

TSN targets Mutual's new parent, Amway Corporation, as well as Mutual in the petition to deny. It notes that Amway has been accused in a Federal Trade Commission proceeding of unfair and deceptive practices and says that a determination that one or more of the charges has been proved could "have a bearing of Mutual's licensee qualification."

Mutual, itself, according to TSN, is engaging in "anticompetitive practices in Texas and adjacent areas" with respect to TSN. The petition says that Mutual, which has obtained broadcast rights to the games of the Dallas Cowboys and (beginning in January) those of the Southwest Athletic Conference, eight of whose nine members are in Texas, is seeking to establish a regional subnetwork in Texas and adjoining states to which it would feed the games. But, TSN says, Mutual is "tying" the broadcast rights to a "regular Mutual affiliation and the acceptance" of Mutual network news and associated commercial material. And Mutual news, TSN says, is "relatively unattractive" in Texas.

TSN also says that Mutual's application "appears to contemplate" the operation of up to six, simultaneous, national network services, "a practice long ago found to be contrary to the public interest." And, it says, a grant would require the abandonment of a number of policies—by licensing Mutual, rather than the end-user of each earth station, for instance, "the commission would lose effective regulatory authority of the system and its use," since the commission would be reluctant to move against earth stations used by hundreds or thousands of broadcasters who "had nothing to do with Mutual's misconduct."

TSN has also petitioned the commission to deny Western Union Telegraph Co.'s application to use the Westar satellite system to interconnect Mutual's affiliates.

FCC will have its pick of testimony on UHF receiver noise limits

Next week (on May 10), a panel of experts will present their views to the FCC on the proposed lowering of the UHF receiver noise figure. The figure—now 18 db maximum—is a measure of one factor affecting the visual interference (snow) in a TV picture.

The panel, representing UHF stations, citizen groups, land mobile interests and the government's Council on Wage and Price Stability, will discuss how far the noise level can be reduced without creating more UHF taboos or limiting the development of electronic tuners, the effect on consumer prices of tuners, the number of viewers affected and whether the noise reduction can be achieved by Oct. 1, 1979, or sooner.

UHF station panelists include Harold L. Green, vice president for operations and engineering of Field Communications (representing the Council for UHF Broadcasting). Citizen groups include the Citizens Communication Center and the D.C. Media Task Force. Land mobile interests will be represented by the Utilities Telecommunications Council, Land Mobile Communications Council, The National Association of Business and Educational Radio and the Land Mobile Communications section of the Electronic Industries Association. Individuals taking part will include Dr. J. Brandinger, vice president, TV engineering, Consumer Electronics Division, RCA Corp.; Douglass D. Crombie, director, Institute for Telecommunication Sciences, National Telecommunications and Information Administration; William Detweiler, president, Helper Instruments Co.; Clinton S. Hartmann, manager, Surface Wave Device Branch, Advanced Technology Laboratory, Texas Instruments Inc.; Daniel R. Wells, senior vice president for engineering and operations, Public Broadcasting Service; Walter S. Wydra, CATV

The PD-II

Plays mono tapes in "A" size cartridges. Stops automatically on 1kHz cue. Big and small buy it for the same reason. Nothing else does this task so well, so long, so reliably, with so little maintenance. That's ITC Quality. Something money can't buy. Except from ITC. Also available in Reproducer Only for $590.

For information on our no-risk, 30-day trial offer on the PD-II, call TOLL-FREE: 800-447-0414. (In Alaska, Hawaii or Illinois, call collect (309) 828-1381.) A two-year warranty on all parts and factory labor is standard.

Technical Briefs

To Russia, with VTR's. Ampex says it has been chosen as "official supplier" to Soviets of one-inch video-tape recorders for 1980 Summer Olympics in Moscow. In its Olympics coverage NBC-TV will presumably use Sony-made model sold in licensing agreement by RCA.

Moscow in May. U. S. delegation of 15 members of Institute of Electrical and Electronic Engineers is to meet with Russian counterparts in Moscow May 16-18 for annual scientific and cultural exchange. Broadcasting is to be principal topic. U.S. delegation will be headed by George Jacobs, director of engineering of Board for International Broadcasting, Other members: Myron Blumberg of A. D. Ring consulting engineering firm and John H. Gayer, Colorado broadcaster and former member of International Radio Frequency Board in Geneva.

No dumping. Justice Department has dropped year-long antitrust investigation of Japanese television exports to U.S. John H. Shenefield told Senate Judiciary Committee that preliminary investigation did "not provide any reasonable basis for a full-scale" inquiry. He said Justice had found "no evidence of ongoing concerted activity by Japanese enterprises aimed at the United States market."

Trois oiseaux. Telesat Canada has signed $53.6-million contract with Hughes Aircraft Co., Los Angeles, to build three communications satellites for launching from U.S. space shuttle in 1981. Four Canadian firms will be major subcontractors—receiving almost $24 million of contract. About $20 million of that will go to Spar Aerospace Products Ltd., Toronto.

Up one. Hughes Television Network, which last season handled away games for 22 of 26 major league baseball teams, this year has tally of 23, having added San Diego Padres. Hughes anticipates work on more than 860 games, with more than 400 transmitted by Western Union Westar satellite and others by tandem lines.

New for automation. Broadcast Electronics, a Hughes firm, has introduced Control 16 microprocessor/CRT-based radio program automation system. Features include five CRT displays, 3000 event memory, self-correcting digital clock, 17 programable functions, easy change of source assignment, instant review of last 10 logging lines and monitoring of on-air programing.

N.J. congressmen trying to legislate VHF station into state

Members of the New Jersey congressional delegation have introduced legislation in the House and Senate that would require the FCC to make frequency reassignments so that every state would have at least one commercial VHF television station.

The FCC, emerging with distributing broadcast licenses fairly and equitably, said Senator Harrison Williams (D), co-chairman with Senator Clifford Case (R) of the New Jersey Coalition for Fair Broadcasting, but "New Jersey, the most densely populated, the most industrialized and the eighth most populous state in the nation, does not have a major television station."

Senator Case noted that the FCC's response to the coalition's appeals has been to have stations in New York and Philadelphia up and plans for providing better service to New Jersey viewers. "This has been tried before and it simply does not work," he said. "Voluntary commitments on the part of many television stations in New York City and Philadelphia are not carried out."

The bill, as explained by Representative Andrew Maguire (D), who introduced it in the House, would require the commission to pick a station now licensed to New York, determine its fair market value and see that the present owner gets paid that amount for the loss of his equipment and plant.

The bill is aimed at New Jersey, but would have the same impact on Delaware, which also has no commercial VHF within its boundaries.

Finance

CBS has its eye on $3 billion in sales in '78

Paley and Backe tell shareholders that if everything stays on track, revenues will break that barrier

CBS Inc. stockholders were treated to an optimistic report on the corporation's future, including the prediction that 1978 will be a $3 billion-plus year.

The glad tidings were included in a speech by William S. Paley, CBS chairman, before the annual shareholders meeting, held April 19 in St. Louis. He noted that it took CBS 42 years, until 1969, to attain the level of $1 billion in annual sales and added:

"We passed the $2 billion mark in 1976, only seven years later. Our latest first-quarter results gives me confidence to predict that CBS will be a $3 billion corporation by the end of the year. We will then have achieved another billion dollars of growth in only two years."

The first-quarter results to which Mr. Paley referred were for the period ended March 31, when he said, CBS's estimated net income reached $33.7 million on estimated net sales of $732 million. Mr. Paley reported that net income grew by 2% and sales by 15% over the first quarter of 1977.

He said that the 1977 net income was boosted by a tax rate significantly lower than this year's first-quarter taxes. On a pretax basis, he noted, the improvement over the first quarter of last year was greater, amounting to an 8% increase.

"Part of the disparity between sales increases and net income has been the intensifying competitive environment that has prevailed in the television network field," he continued. "But our heavier-than-usual costs in television during the first quarter are showing excellent results as will be pointed out to you by our president, John D. Backe, when he makes his report."

During his talk to shareholders, Mr. Backe said heavy television programing expenses reduced the CBS/Broadcast Group earnings though the division's sales rose by 10% over last year's record quarter. He pointed to positive results emerging from the TV network program-

ing development dollars, saying CBS-TV’s prime-time position in the first three months of 1978 was “substantially better” than a year ago.

Mr. Backe painted a bright picture for other components of the Broadcast Group, pointing out that advances have been made by CBS-Owned Television Stations and CBS Radio, both of whose sales were ahead of last year’s quarter.

Mr. Backe also said CBS’s other business groupings—CBS/Records Group, CBS/Columbia Group and CBS/Publishing Group—showed impressive gains in the 1978 first quarter.

In their comments to shareholders, both Mr. Paley and Mr. Backe noted that the quarterly earnings and sales point up the value of a balanced partnership of separate business groups.

At the meeting, a resolution was offered from the floor by Reed Irvine, chairman of Accuracy In Media Inc., an organization that frequently criticizes network news practices. His resolution, which was passed without dissent, praised CBS Radio for the diverse viewpoints represented on its Spectrum discussion series.

Viacom stockholders get a double treat

Ralph M. Baruch, president of Viacom International Inc., New York, brought bright news to the company’s annual meeting of stockholders. First quarter net income rose 34% to a record $1,556,000 (41 cents per share) on revenues of $18,097,000, as compared with $1,160,000 (31 cents per share) on revenues of $13,462,000 in the comparable 1977 period.

Mr. Baruch also outlined expansion moves Viacom is undertaking in both first-run syndication and network programming including a half-hour situation comedy, Please Stand By, for access time; The Love Experts, a five-times-weekly program for stations, and for network showing, Sticking Together (90 minutes), Fast Lane Blues (a one-hour pilot for a half-hour series) and a half-hour situation comedy based on the British series, Faulty Towers.

First-quarter record set in ABC finances

ABC Inc., riding the crest of prime-time television supremacy, achieved record results in the first quarter in both sales and net income.

Leonard H. Goldenson, chairman, and Elton H. Rule, president, noted it was the ninth successive quarter of earnings gains for ABC. They said net income climbed by 21% to $22.9 million, or $1.26 per share, from $18.9 million, equal to $1.05 per share, in the 1977 first quarter. Revenues increased 16% to $437.3 million from $378.0 million in the corresponding quarter last year.

Mr. Goldenson and Mr. Rule said the company’s broadcasting operations “were once again the principal contributors to our earnings improvement.” The ABC Television Network, the owned television stations and ABC Radio all achieved improved performances, they said, though FM profits were down.

TV: Time’s bright hope

Time Inc. President James R. Shepley told the company’s annual stockholders meeting that its video group is “our fastest growing business,” that it became profitable last year and should be “significantly” more so this year. He said the acquisition of American Television and Communications (page 63), although “currently under scrutiny by the Justice Department” and still subject to FCC approval, should enable the group to “compete more effectively with other larger companies in the communication and entertainment industry.” According to Time’s proxy statement, the company’s top TV executive, J. Richard Munro (video group vice president), received $175,539 in salary and bonus and accrued $15,004 under profit sharing plans in 1977.

Meatloaf's cooking. The group's latest recipe: Two Out of Three Ain't Bad (Epic). Neither is 42 out of 50, which is where the group places on this week's "Playlist." It's a legitimate smash," says Keith London of the Westar ... the record, ... it relates to their experiences and emotions," says Bob McNair of WORLAM Charleston, S.C. Jeff Gerber ... WORLAM Cleveland says Two Out of Three "sounds real good on the radio. ... it's probably a number two or number three record on The Money. "Eddie Money's new single, Baby Hold On (Columbia), bolts to 35 on "Playlist." It's basic, simple rock and roll and very well done at that," says Dave Bishop of WORLAM Columbus, Ohio. "I would be surprised if it didn't make top five." Ed Alexander of WORLAM Tucson agrees that Baby Hold On is "a good, basic clean rock song, not raunchy [with a good up beat]" it's like "the 1965 British isound invasion," he adds. Newcomer. A new name is showing up on playlists across the country. The name is Gerry Rafferty and his song is Baker Street (United Artists), drawn from the album, City to City. "I personally like it," says WORLAM's Mr. McLain. "I plan to play the hell out of it until it's a hit." And KXTC's Mr. Alexander says the song has a "basic jazz beat" and "it's going to grab people under the skin... it's going to cover all bases." "It looks like a major hit," says Bill McCown of WANSAM Anderson, S.C. "There's a good sax in it." And the saxophone is the key. Says Patti Sullivan of WORLAM Pittsburgh, echoing others' observations, Baker Street has a "great sax—in fact, it's the hook."
Media

Michael Eskridge, director of business affairs for NBC's WMAQ-TV Chicago, appointed VP-administration, NBC Television Stations Division, New York.

Vincent M. Cremona, VP/general manager, WICC-AM Bridgeport, Conn., assigned additional duties of general manager of co-owned WPIX-FM New York. He succeeds John Catlett who has resigned.

Ronald Gilbert, general sales manager, WICC, named station manager.

Donald M. Olson, VP/general manager, WDEF-AM-FM Chattanooga, appointed general manager, WAPI-AM-FM Birmingham, Ala.

William Stough, general sales manager, WISH-TV Indianapolis, named station manager of co-owned WANE-TV Fort Wayne, Ind.

Mary Perot Nichols, director of communications for Boston Mayor Kevin White, appointed VP of Municipal Broadcasting System's WYBC-AM-FM-TV New York. She is also former New York Village Voice city editor and she succeeds Arnold Labaton who moved to WNET-TV Newark, N.J. (New York), as director of special projects.

Dick French, general manager, WHBOAM Memphis, appointed VP.

Gerard J. Sperry, general manager, WORR(FM) Boston, appointed VP.

Harper Carraine, director of radio research, CBS/Broadcast Group, New York, retires after 40 years with CBS. Sylvia Hughes, ratings services manager in CBG radio research department, succeeds Mr. Carraine.

James R. Page, station clearance representative, affiliate relations, CBS Television Network, New York, appointed district manager, Southeast, affiliate relations.

Kenneth Tyler, first assistant film editor, NBC New York, named manager of community relations of NBC's WNBC-TV there.

Frances Ming, executive assistant, WPLJ(FM) New York, named director of community affairs, newly created position.

Everett L. Klosterman, assistant controller, WGN Continental Broadcasting Co., Chicago, named corporate controller, Midwest Radio-Television, Minneapolis.

Broadcast Advertising

Newly elected senior VP’s, Ogilvy & Mather, New York: Frederic S. Cuba, associate director; J. Brendan Ryan, VP and management supervisor; and Jennifer Stewart, project director.

Jass Korman, executive creative director, Los Angeles office of J. Walter Thompson, elected senior VP, Howard Willens, research and planning department, JWT, New York, named co-director of that department. Jack Scollay, merchandising director, JWT, Chicago, named senior VP, John McKee, associate creative director, named VP there.

A. Norman Young, president, Leber Katz Partners, Montreal, rejoins Ogilvy & Mather, New York, as senior VP and international personnel director. He was managing director of O&M's Montreal office before he joined Leber Katz.

"The person you describe is the person I'll deliver" Joe Sullivan

"Finding a first-rate executive isn't enough. You want the right one. Right for your company. Right for you. I understand your needs. I relate them to my own 18 years of executive responsibilities in media and communications. When you tell me what you want, I search out and deliver the right person. "I know where to look. How to evaluate critically in terms of your specific preferences. And how to create the right climate for successful recruiting. You get an effective, knowledgeable, professional search. And you get exactly the person you're looking for."

Joe Sullivan & Associates, Inc. Executive Search and Recruitment 111 East 58th Street, New York, N.Y. 10022 (212) 752-8888

THE INDUSTRY’S BEST
DROP CABLE

Take our aluminum tape-braid cable. It offers economy plus quality features engineers demand. Like 100% shielding. Excellent isolation. And durability. Plus the braid coverage over the tape is as high as 95%, to eliminate radiation and direct pick up.

With our bonded foil-braid drop cables, the foil is permanently bonded to the dielectric. Connectors slip on more readily without disturbing the foil. So there's less signal loss. Less direct pick up. And reduced installation time.

We also make copper braid drop. Plus a full range of CATV sizes, including mini-diameter.

In fact we’re the number one supplier of CATV drop cable in the world — offering a wider choice of sizes, shapes and conductor configurations.

Cerro drop cable. One of the CATV products in our line of trunk and distribution cable, drop cable, and RF devices.

KFDI TO MAKE CCA MILLION $ PROMOTION IN WICHITA IN 1978

"Unless John, our next CCA gross revenues drop (they never have in the past), this fall our 8th Annual CCA Campaign will make CCA a Million Dollar Promotion here in Wichita, Kansas," said Mike Oatman, KFDI, Co-owner/ manager, in a letter to Community Club Awards president, John C. Gilmore.

"In addition to our KFDI renewal agreement, enclosed is KTTS, Springfield, Missouri's agreement for their 20th year", Oatman said.

"Generally, we're well pleased with our first-time, CCA efforts for our newly acquired KYNN. Omaha and KWKH, Shreveport. Station management tells me that CCA has been helpful to the ranch-hands in launching and selling our new country format in both cities", concluded Mike Oatman.
CATV Systems, Manlius, N.Y. Mr. Faye will be in company's new office in Jenkintown, Pa.

Peter A. Newman, account executive, Frankfurt Communications, New York, named marketing services manager, Qube division, Warner Cable Corp.

Deaths

John B. (Steve) Conley, 84, retired broadcast executive of Westinghouse Broadcasting's KEKN (AM) Portland, Ore., and company's headquarters in Philadelphia, died April 10 at his home in Deerfield, Fla. He is survived by his wife and daughter.

Will Geer, 76, character actor who played grandfather in CBS-TV series, The Waltons, died April 22 of respiratory ailment at Midway hospital, Los Angeles. His career covered six decades and included Broadway shows Tobacco Road and many Shakespearean roles. Mr. Geer's role in The Waltons won him Emmy award in 1975. He also appeared in Mannix, Gunsmoke, Mission: Impossible and Bonanza.

John Holbrook Midlen, 67, senior partner in Washington communications law firm, Midlen & Reddy, died April 24 of cancer at Doctors hospital there. During World War II, he was lieutenant colonel in Army. After war, he entered private law practice and became senior partner of Midlen & Reddy in 1968. He is survived by his wife, Gertrude, son and daughter.

Lord Richard Valentine Cecil, 30, freelance television reporter who worked for United Press International but contributed to British newspapers as well, was killed April 20 while covering clash between Rhodesian soldiers and black nationalist guerrillas. He is said to be first journalist killed in five-and-a-half-year war. He is son of Marquess of Salisbury.

Ann Morrison, 62, character actress in radio, films and TV, died April 18 at Motion Picture Country Hospital, Los Angeles, after long illness. Her career began in 1930's with roles in radio serials, including Lux Theater, Woman in White and Calling All Cars. Surviving are two sons and one daughter.

Dick Strat, 47, whose Hollywood Profiles news feature ran two years on KTLA (TV) Los Angeles and other U.S. and Canadian stations, died April 23 at Brotman Memorial hospital, Los Angeles. Mr. Strat worked in radio and television for 20 years. He is survived by one brother.

For the Record

As compiled by Broadcasting for the period April 14 through April 20 and based on filings, authorizations, petitions and other actions announced by the FCC.

something this good gets a workout!

The main reason is that buyers and sellers alike agree that the material contained in NCA is invaluable as a planning tool.

Newspaper Rates and Data's 1978-1979 newspaper circulation analysis is a publication every buyer and seller of media should have.

It can be used to:

- Locate competitors' strengths & weaknesses
- Prepare more effective media plans, promotions, presentations
- Evaluate new markets
- Compare sales tactics with similar markets
- Apply the most current data to marketing approaches

Included are computerized tabulations of U.S. daily and Sunday adjusted circulation rates, market data and demographics arranged in five sections:

1. Newspaper circulation within TV market areas with open line rates.
2. Metro area circulation and penetration.
3. County-by-county circulation and penetration.
4. Circulation analysis of newspapers and newspaper groups; includes black & white page rates.
5. Ranking tables for 20% and 50% counties, daily and Sunday.

Additionally, NCA provides you line rates, page rates and a wide range of demographics including number of households, adults, teenagers and children. You'll also find retail, food store, drug store sales and consumer spendable income for each market area, ADI, metro and county.

Attention Traffic/Operations/Business Personnel, Paperwork Systems Inc. the nation's leading suppliers of minicomputer-based systems for traffic, accounting, billing and payroll processing now has openings for installation specialists. This challenging job offers excellent compensation plus full travel expenses, and medical coverage. The work is very demanding: travel is heavy, with field trips all over America averaging three weeks at a time to PSI System locations. Much of the work is done under substantial pressure, often with long hours. Outfetting these demands is the list of skills which we are looking for at your home between installations. Applicants need not move to a new location. Applicants should meet the following criteria: having radio and TV experience in the area of traffic and/or accounting; be an effective communicator with, and trainer of, people; be free to travel extensively, and be able to travel under pressure, work well with others, and work relationships clearly. You should not require close supervision. If accepted, you will be placed in a training program with one of the many regional offices of this new company. Send resume along with a detailed job history of your background and a resume that would be best filled by you to: Paperwork Systems Inc., PO. Box 38, Bellingham, Washington 98225. (Application period closes May 31, 1978)

WE'RE LOOKING FOR PEOPLE WHO AREN'T LOOKING FOR A NEW JOB.
You're the TV or Radio newspaper who has been too busy dealing with the present to think about "the future." But where do you want to be 10 years from now? You have been perfecting your skills—gaining the experience you need to move forward. You don't want just any new job, you want the right one.
That's where we can help. You can keep on dealing with the present—we'll concentrate on your future.
Whether you're a news director, anchor, weathercaster, sportscaster, reporter, editor, producer or photographer, there's a job we can do for you. The station that hires you pays our fees.
We think it's an offer that's too good to ignore. Because you've got nothing to lose, and probably a great job to gain.
Just call us at (313) 968-1416, or send a tape of your work (3¼" videocassette) to:
Newsperson, Inc.
26200 Greenfield, Suite 60, Oak Park, Michigan 48237

An office of Rymer & Geran Associates, Inc.

BOOKS

420. THE POWER TECHNIQUE FOR RADIO-TV COPYWRITING by Neil Treliff. Based on a series of workshop seminars developed and conducted by the author for professional broadcasters. 224 pages. $8.95

423. MANAGING TODAY'S RADIO STATION by Jay L. Holler. Outlines principles evolved by the author during his 20 years as a broadcaster. 258 pages. Illustrated. $12.95

454. TALK-BACK TV: TWO-WAY CABLE TELEVISION by Richard H. Watts. An expose of recent developments in two-way TV for those concerned with future personal convenience and security. The book covers electronic mail, video games, at-home shopping and banking, news at the push of a button (or turn of a dial), computer-assisted instruction, home security alarm monitoring services, radio—meter—plus entertainment programs, and the usual TV fare. Learn how to make these services available in your area. $19.95

441. YOU'RE ON THE AIR! by Sam Ewing. A practical do-it-yourself guide to a career in radio and TV for the student and beginning broadcaster. 224 pages. $7.95

405. BROADCAST STATION OPERATING GUIDE by Sol Robinson. This comprehensive reference encompasses every level of broadcasting. The secret to success in broadcasting, as in any other business, is knowing what to do and how to do it. This book tells you how to do it. 256 pages. $12.95

432. THE MINI-DOCUMENTARY—Satellite Telecasting TV News, by Bradley Field. How you can learn all about making a mini-documentary from experts who are engaged daily in the production of this newly emerging, and highly effective communications medium. The author presents the keys to the successful presentation of satellite documentaries, based on interviews with producers, broadcaster, editors and sound men—professionals with hands-on contact with the mini-documentary. 252 pages, 28 ill. $12.95

406. THE BUSINESS OF RADIO BROADCASTING by Eddy Roff. How to operate a station as a profitable business and serve the public interest as well. This is the first text to deal with broadcast station operation from beginning to end. Clearly explains proven techniques to follow, and cautions to avoid. 400 pages, illustrated. $12.95

437. RADIO STATION SALES PROMOTIONS by Jack McDonald. 300 merchandise-moving ideas! A compendium of creative selling ideas designed exclusively for radio stations—sales tools that work. A vast supply of ready-to-use ideas for producing sales in 43 categories, from air conditioning to washing machines. 72 pages, 8½" x 11", illustrated $10.00

434. RADIO PRODUCTION TECHNIQUES by Jay L. Holler. Here's an all-round book for everyone in radio—performers, producers and directork and sales and engineering personnel. Covers every phase of radio production from announcements to the overall station "sound"—in fact, every creative aspect of today's radio—, with special emphasis on sales. Tells how to produce results for an advertiser and how to develop production expertise, and how to use the elements of pacing and timing in every production. Covers record screening, jingle use, news, on-air promotion, public service, contests, public affairs, remotes, talk and interview shows, etc. Practical data on sales includes ideas development writing, and how to create more effective commercials. 240 pages, illustrated. $12.95

Dan Aaron: heading NCTA in a vintage cable year

Back in 1959, Daniel Aaron joined Milton Shapp, then president of Jerrold Electronics and now governor of Pennsylvania, in an appearance before the Senate Communications Subcommittee, then under the chairmanship of John O. Pastore (D-R.I.). "Milt and I prepared a map on which 526 pins located each of the nation's cable systems," recalls Mr. Aaron. "As we carried this six-foot exhibit into the hearing room, we brushed against the doorway, and most of the country's cable systems wound up on the floor.

"Much to Senator Pastore's surprise—and probably annoyance—we scurried about the hearing room for a frantic half hour picking pins off the floor in a mad scramble to reconstruct our industry. I would not dare repeat that feat today, for age has caught up with both me and the industry. It would take nimble youth and 3,500 pins."

Mr. Aaron, vice president and co-founder of Comcast Corp., Bala Cynwyd, Pa., and president of its cable operations, has served for the past year as chairman of the National Cable Television Association, which is holding its annual meeting this week in New Orleans.

His year at NCTA's helm, he says, has been exhilarating. He's pleased that he's "leaving behind an NCTA with the largest membership in its history, supported by an enthusiastic, smart, professional staff, representing a resurgent, unified industry with a new leadership drawn from this industry's second generation."

He is especially proud of that staff. "We now have a much better balance between the policy guidance responsibilities of the board and the staff's responsibility to carry out those policies." In the past, he believes, there was a power "vacuum" at NCTA that adversely affected the association's ability to get things done. Today, Mr. Aaron says, NCTA is "as good a shape as ever" under its president, Robert L. Schmidt, and has "more cohesively united" the cable industry. "We got our act together," says Mr. Aaron.

It has been a good year for Mr. Aaron and NCTA. Since he assumed office in 1977, the House of Representatives and the Senate passed, and the President signed, a long-sought pole attachment bill; NCTA drafted a cable bill in conjunction with the House's rewrite of the 1934 Communications Act; the courts upheld cable interests in the Home Box Office and Midwest Video cases, and NCTA presented the FCC with economic research that, Mr. Aaron says, substantiates the cable industry's long-standing position that cable television "has little detrimental effect on broadcast audiences, none on broadcast finances and substantially expands programing available to the public."

During this week's convention, Mr. Aaron will step down from his chairman-ship. In the 12 months he served, he represented NCTA before Congress, the FCC, the U.S. Copyright Office and various state and local government bodies. He has logged 50,000 miles traveling to meetings of state and regional cable associations. He also made several appearances on the Washington cocktail circuit. All of that while still managing to see Comcast's Cable Communications Division deliver a 23% increase in revenues. As president of that division, Mr. Aaron is especially pleased that for the first time in its history, Comcast earned more than $1 million.

So what will there be left for Mr. NCTA successor, Robert Hughes, president of Communications Properties Inc., Austin, Texas, to do? Plenty, Mr. Aaron says. Number one on NCTA's agenda for this year, he says, will be the Communications Act rewrite. "NCTA is committed to support a progressive [bill], one in which cable television will become 'an equal of' rather than 'ancillary to' broadcasting." He calls the NCTA cable bill model presented to the House and Senate subcommittees "as comprehensive and serious a legislative proposal as has been framed by an industry."

And, he believes, NCTA will still be pushing for deregulation. (It's "like motherhood," Mr. Aaron says.)

Serving as NCTA chairman, he says, was also a unifying experience for his family. "They all have taken a great sense of pride—to be modest—in whatever acclaim has accrued to me." And that's not all. His wife and several of his children have taken active interests in Mr. Aaron's position. Mrs. Aaron, for one, found a new tennis partner in Senator Ernest F. Hollings (D-S.C.), chairman of the Communications Subcommittee. His daughter, Allison, joined Mr. Aaron at last year's NCTA convention. One son, James, worked for Tele-Communications Inc.'s cable system at Boulder, Colo., while attending the University of Colorado, and another, Kenneth, spent six months selling cable subscriptions door-to-door in Flint, Mich. Mr. Aaron's year as chairman, he says, "gave my wife and five children a great sense of identification with my business activities."

All work and no play, of course, may lead to at least two chronic maladies among businessmen—dullness and heart conditions—neither one of which appears to be a problem Mr. Aaron must worry about. "My year's travels on behalf of NCTA took the boredom out of jogging. I jogged down many new streets as I took along my sneakers and sweat suit. The cable industry's state and regional tennis tournaments helped improve my tennis game if not my record, and most important, I did not permit my NCTA chores to interfere with my tap dancing lessons." (He says he closes himself in his basement to practice.)

It's been nearly 20 years since Mr. Aaron and Governor Shapp made that appearance on the Hill in Washington; two decades that have seen the cable industry grow into a truly "new medium" that, if Mr. Aaron has his way about it, will be "placed on par with broadcasting" in the eyes of the government, the public and the broadcaster.

And in his future? Mr. Aaron, coming down from his year at the top, says he would "like to establish a center for TV cable study at a major university to train young people in the skills of this industry, to develop a think tank for this industry and to provide an academic center for a progressive TV cable industry. And who knows, some day I might like to head that."
Year: 1976

**Party time**

A year ago the National Cable Television Association held its annual convention in an atmosphere of liberation. The FCC had loosened its distant-signal rules. The appellate court had overturned the FCC's restrictions on pay cable programming. The Congress had adopted a copyright law containing fee schedules low enough for cable systems to pass on to their subscribers but high enough to give cable an argument against other governmental controls.

If there were reasons for celebration last year, there are reasons for a bacchanal when the NCTA meets this week in New Orleans. The NCTA's principal legislative mission of the past year has produced a law that all but eliminates the bargaining power of local utilities in setting rates for cable systems' pole attachments. The FCC has continued to discard or liberalize cable rules.

There are, of course, enough other threats to keep the NCTA in business. The Senate Communications Subcommittee is working on a cable-regulation bill that will engage the association's close attention. The House Communications Subcommittee is rewriting the Communications Act, with a specific place for cable. In both of these proceedings, cable will be pitted on some points against the broadcasting interests with which it has historically conflicted.

The record of such encounters in the past two years, however, gives cable little to fear. If the whole NCTA membership dances down Bourbon Street behind a jazz band playing "Saints Come Marching In," Washington will understand.

**This year's winner**

By the criteria of audience size and media attention, NBC-TV's four-part miniseries, *Holocaust*, must be rated as the pre-eminent event of the 1977-78 television season. By the same criteria, ABC-TV's eight-part *Roots* was the pre-eminent event of 1976-77. *Roots* and *Holocaust*, in that order, now rank as the first and second events in all of television entertainment history.

The programs shared other qualities. Both were scheduled on successive nights. Both were massively promoted. Both dealt seriously with the darkest side of human nature, with inhumanity on an outrageous scale. Divining the reasons for the mass appeal—night after night—of these tragic dramas will give work into the future to sociologists as well as television network programmers.

It would be grossly wrong to assume that a formula has been discovered. As was demonstrated by NBC-TV's recent disaster, *King*, there is no magic in the selection of oppression as a theme for fictionalized history. The assumption here is that *Roots* and *Holocaust* succeeded not only because of their subject matter, scheduling and promotion but also because they were made with care.

One ingredient in television programming, as in any other form of creativity, can be neither faked nor imitated: class.

**Out of date**

A newspaper item the other day informed us that the Pulitzer Prize people are adding a 12th category, newspaper feature writing, to the list of journalism accomplishments upon which they bestow annual awards. This showed us that the Pulitzer rules can be changed, and it set us to wondering—again—why the Pulitzers for journalism are still confined, in this day and age, to newspapers.

We checked the Pulitzer experts at Columbia University, which administers the awards, and found out why. It's simple: Changes have to be approved by the advisory board, and the advisory board is made up of newspaper people. As a matter of fact, we were told, inclusion of television and radio has been proposed from time to time but has always been vetoed down.

We can understand that newspaper people, having lost so much ground to TV and radio journalism over the years, would be reluctant to admit those rivals to their most prestigious honors. But Pulitzers for distinguished TV and radio reporting need not compete with newspapers in any sense, and yet they would at least reflect a contemporary view of journalism. Until those categories are added, the Pulitzers for journalism remain blind to the realities of the second half of the 20th century.

**Dampener**

The U.S. Supreme Court has presented broadcasters with a new legal peril of destructive potential. The court refused to block the trial of a suit that is based on the novel theory that broadcasters are liable for damages if a real act of violence can be traced to an episode of violence on the air. NBC and its San Francisco affiliate, *KRON-TV*, are defendants in an $11-million suit brought by the mother of a 9-year-old girl who was allegedly assaulted by girls imitating an act on an NBC program, *Born Innocent*.

It was probably too much to hope that the high court would call off the case before it had been tried. The decision in no way denies NBC and *KRON-TV* the normal appellate procedures that will be available if the plaintiff wins in the trial. But surely it is not too much to hope that the judicial process will eventually establish the principle that NBC, *KRON-TV* and several supporting organizations wanted the Supreme Court to establish now: that the First Amendment frees broadcasters of the kind of liability the *Born Innocent* suit assumes.

Meanwhile, however, all broadcasters live in the danger of costly legal consequences if anyone is harmed by an assailant who is asserted to have been inspired by television. The possibilities of exploitation by unscrupulous lawyers and avaricious plaintiffs are endless.

It is unthinkable that the *Born Innocent* theory will prevail. At best, however, broadcasters face an extended period of uncertainty that will do nothing to stimulate creativity in entertainment programming or graphic action in news.
Again! KTXL-TV Sacramento-Stockton is America’s #1 UHF Independent!

KTXL's Metro Share of Audience,* (19), ranks along with such leaders as KPTV, Portland (21 Share); WTCN, Minneapolis-St. Paul (19 Share); and WTTG, Washington, D.C. (18 Share).

What's more, KTXL operates in a seven station market — three network V's, three independent U's, and a VHF educational station — plus encroachment by San Francisco stations. Still, KTXL ranks #2 among all U.S. Independents!

*Sign On-Sign Off per Feb. '78 Arbitron
When lighting is amateur, film should be pro.

Eastman Ektachrome video news film high speed 7250 (tungsten) is a story saver.

With its high-speed (EI 400) and force-processing capability there's plenty of room to maneuver with filters to correct for fluorescent lighting and still use lens settings that give good depth of field.

Back at the station you process it as you do Eastman Ektachrome video news film 7240. Eastman 7250 film is fully compatible with all process VNF-1 procedures.

When you're covering sports, sometimes the action is a lot better than the lighting. That's when the pro reaches for Eastman 7250 film. At air time it's better to show footage than to just report the score.

For more information, write:
