Historic merger: GE and Cox Broadcasting
Anne Jones gets the nod for FCC

Nationally recognized news.

"...KSTP-TV has a top reputation in the broadcasting industry...
—The Wall Street Journal

...the dominant news operation in its market...
—Broadcasting

...the no. 1 rated station in all dayparts in its market...
—Advertising Age

...generally acknowledged to be the leading station in its market...
—Daily Variety"

And as the recognition goes on, so does our dominance. A July ARB ranking puts #1 Eyewitness News far ahead of any network programming. With six of the top eight shows watched, Prime time in the Twin Cities? It's local news. On the nationally recognized station: KSTP-TV.

ALIEN WORLDS
A DRAMATIC SERIES FOR RADIO FROM WATERMARK
Almost everybody knows that Denver has thinner air than any other major city in America. But almost nobody knows that only Los Angeles has dirtier air. Most of the people who breathe it everyday didn't know how dirty Denver's air was either. Until KIMN radio told them.

An awareness campaign was the first step of our Operation Blue Sky. We stepped up our campaign by initiating action that led to a Federal Grant to fund hourly pollution readings. We also started giving on-air recognition to businesses that take steps to reduce air pollution. And we've instituted a program designed to help alleviate traffic congestion during rush hour.

The world has grown too small for any of us to live in a vacuum. (As one sniff of Denver's air will testify.) We must all be considerate of one another and pull together to solve the problems facing our cities. When we do, things will get better as they have in Denver.

We're happy to report that a mile above sea level, the tide is turning.
GE WANTS COX □ In what would be the biggest deal in broadcast history, the giant electronics conglomerate would acquire the old-line broadcaster and newer-line cable operator for a price between $440 million and $488 million in stock, and operate it as a wholly owned subsidiary. PAGE 21.

UNLIVABLE □ If broadcasters were upset by the implications of the court remand of the WESH-TV decision, so is the FCC, which is likely to seek a rehearing by the full appeals bench. PAGE 25.

FAMILY GROWTH □ Living up to its promise of expansion when it entered broadcasting last year, American Family Corp. agrees to buy KFVS-TV Cape Girardeau, Mo., and WTOS-AM-FM-TV Savannah, Ga., for a total of more than $32 million. PAGE 26.

CPB WINS POINTS □ Conference committee works out conflicts in House and Senate version of the funding legislation for the Corporation for Public Broadcasting. New version eases some CPB concerns. PAGE 26.

REACHING OUT □ Independents WGN-TV Chicago and KTVU-TV Oakland would be the next super stations to be relayed nationally to cable systems under an application to the FCC by Southern Satellite Systems and its subsidiary. PAGE 30.

BOUNCED BACK □ An appeals court remands an FCC decision involving channel 9 in New York, telling the FCC to reconsider its rejection of a challenger. PAGE 30.

OK IN OAKLAND □ The FCC renews KTVU-TV there and rejects petition by a local group. There is a condition attached to the grant. PAGE 30.

GETTING CLOSE □ The long and complicated battle for the facilities of KRKA AM may be over as competitors near merger agreement. PAGE 32.

PESSIMISTS □ Aspen Institute task force concludes that future shock may be upon telecommunications regulation. PAGE 35.

DAYTIME DEFECTORS? □ HUT levels are holding steady, but network audience shares are declining. What's to blame? PAGE 43.

Next in line. Anne Jones, 43-year-old general counsel of the Federal Home Loan Bank Board, was nominated by President Carter last week to succeed Margita White on the FCC. Miss Jones, said by some to be a fourth vote for Chairman Ferris, fiercely insists, however, on her independence. It may be a while—the Senate might not act on her appointment before January—until she gets a chance to prove it. PAGE 22.

SAME OLD STORY □ The Sept. 25-Oct. 1 prime-time week was perhaps the first "normal" one of the season, with little or no stuntling, and some conclusions can be drawn: new series are in trouble, except for several at ABC, which is riding high over-all. PAGE 44.

CAPITAL IDEA □ ABC News breaks ground for a new $20-million studio/office building in Washington, the "primary news center" of the world. PAGE 48.

SO THERE □ Taylor Wine does a comparative TV spot, a no-no, according to the Bureau of Tobacco, Alcohol and Firearms. PAGE 50.

WINDOW SHOPPING □ At the International Broadcasting Convention in London, they came to look—and there was plenty to see—but not much buying. PAGE 52.

GIANT SIZE □ Large-screen TV looks as if it's here to stay, if in limited market at current prices. PAGE 55.

MIDWEST VIDEO AT HIGH COURT □ On the docket is the case in which the FCC's access channel and other construction requirements for cable systems were overturned. PAGE 57.

DOUBLE TIME FOR DOUBLEDAY □ That's the only work pace that Gary Stevens knows. Since becoming president of Doubleday Broadcasting Co. last December, he has combined that industrious nature with an aggressiveness that fulfills a "burning inner need." PAGE 81.
Famous Landmarks

To cover the Providence DMA - use WTEV

Reminiscent of turn-of-the-century architectural style and opulence, this magnificent 70-room mansion, "The Breakers," still stands in proud splendor overlooking Newport's world-famous Cliff Walk. Built by Cornelius Vanderbilt in the 1890's, the villa resembles some of the palaces built during the 15th century Renaissance in northern Italy.

This progressive station delivers unique, uniform coverage in one of the country's major market areas. Effective buying income is $10,162,219,000; retail sales total $5,392,988,000. To assure maximum returns from your advertising dollars spent in the Providence DMA you need WTEV. Be sure to include this station on your media list.

Game of giants

As surprise at news of General Electric-Cox Broadcasting negotiations (page 21) began to settle, name of GE competitor, Westinghouse Electric Corp., began to crop up in speculation—not only because two powerhouses in manufacturing would become closer rivals in broadcasting but also because it’s known that Westinghouse Broadcasting has long been interested in upgrading some of its radio properties.

Conjecture was that Westinghouse might be interested in acquiring some stations—especially FM’s—that would have to be spun off from GE-Cox combination. Westinghouse Broadcasting officials said they hadn’t had chance to analyze possibilities sufficiently to comment.

Nothing certain

Latest snarl in White House plans to replace FCC Commissioner Margita White with Anne Jones (see page 22) raises number of new questions regarding that seat. One is how long Mrs. White will serve. In absence of successor who is confirmed, she can serve as long as she likes. And although Commissioner White likes her job—and wanted reappointment—she could move on if right opportunity presented itself.

Jones nomination means decision process has been completed. But nomination will have to be resubmitted in January. Will new problems come up in meantime?

Where to turn?

Initial reactions of association leaders indicate WESH-TV decision by appellate court hasn’t shifted attitudes toward Communications Act rewrite. Shared opinion that decision is potentially more damaging than when decision years ago leads National Radio Broadcasters Association to conclude that rewrite, with indefinite licenses for radio, is more urgent than ever, but National Association of Broadcasters is still cool to it. Bill does away with comparative renewal situations, provision that NAB favors, of course, but association officials interpret other provisions as leaving commission discretion in TV renewals to consider media ownership questions that led in part to court’s action in WESH-TV.

And if rewrite author, Lionel Van Deerlin, were to take care of that problem for broadcasters in second rewrite draft, indications are NAB’s distaste for proposed license fee would still leave it cool to rewrite. Nevertheless broadcast representatives in Washington still look to Congress as place to go for cure to WESH-TV. They’ve forgotten that Senate Communications Subcommittee Chairman Ernest Hollings (D-S.C.) was one who tried to amend license renewal legislation in 1974 to insulate broadcasters from ownership questions at renewal.

Whether to try to revive renewal bill, fight to change rewrite, or take some other course are questions that doubtless will be raised at high-level meeting NAB plans to discuss aftermath of WESH-TV Invites to summit in Washington will be chief executives of all networks and major broadcast groups.

First heat

New competition for Distinguished Service Award of National Association of Broadcasters developed last week. Solid backing for selection of Jack W. Harris, president of KPRL Inc., Houston, surfaced at meeting of Association of Maximum Service Telecasters in Washington, preparatory to testimonial banquet honoring retired AMST president, Lester W. Lindow (see page 59). Mr. Harris has been prominent in AMST affairs since founding in 1956.

While there’s carryover list of nominees for U.S. broadcasting’s most prestigious award, front runner has been Stanley E. Hubbard, 81, first-generation owner of KSTP-AM-FM-TV St. Paul-Minneapolis and others in Hubbard station group. ("Closed Circuit," Sept. 18). NAB convention committee will screen nominees, and make its recommendation to joint board meeting in Maui, Hawaii, Jan. 14-19.

Geneva gyrations

"Two days a week aren’t enough" (to prepare wide-ranging U.S. proposal for World Administrative Radio Conference in Geneva next year). That was thrust of comment last week by Senator Harrison H. Schmitt (R-N.M.), scientist-astronaut, in rejecting position of Glen O. Robinson, chairman of U.S. delegation to WARC ’79, who says he can’t give full time to preparations until next April because of teaching commitments at University of Virginia Law School. With U.S. proposals due in Geneva by January, as prelude to consideration of allocations and regulations that will govern international communications (including satellites) for next two decades, Senator Schmitt’s observations coincide with those expressed (though not formally) by both Chairman Ernesi F. Hollings (D-S.C.) of Senate Subcommittee on Communications and Senator Barry Goldwater (R-Ariz.), himself schooled in communications.

Meanwhile support grows for designation of FCC Commissioner Robert E. Lee, who has served as delegate to five international conferences, as co-chairman of delegation, to effect liaison with other delegations while Professor Robinson concentrates on treaty functions.

Combination would strengthen U.S. position vis-a-vis Soviet bloc and third world nations. White House could name Mr. Lee as special emissary, for which there is ample precedent.

Numbered days

NBC-TV’s new midday experiment, America Alive, is languishing at second-to-last in recent daytime ratings, just above now-canceled NBC soap opera, For Richer, For Poorer. America’s co-producer, Woody Fraser, said shortly after show’s July 24 premiere that network, realizing difficulty of establishing new form in daytime, had given it year to get off ground (Broadcasting, July 31).

Not so, says Michael Brockman, NBC’s vice president of daytime programs. Weakness of 12-1 p.m. NYT program hasn’t helped NBC’s afternoon schedule fend off ABC-TV’s audience growth there, and Mr. Brockman says it would be "difficult to sustain America’s expensive format if ratings don’t improve by next January.

They won’t play

Networks’ Washington news bureau chiefs listened politely as Representative Charles Rose (D-N.C.) explained vision of network-quality TV coverage of House proceedings last week ("Closed Circuit," Oct. 2), but they have no intention of answering Mr. Rose’s request for their advice. It’s matter of principle: With or without their advice, House leadership is going to decide what to cover and how to do it. “That simply isn’t journalism,” said one news executive. On learning that noncommercial WETA-TV Washington has volunteered assistance for project, Ed Fohy, head of CBS Washington bureau, said he was “astonished at people who would be so insensitive to the principle.”

With public broadcasting dependent on Congress for funds, “I guess that would be an easy compromise for them to make,” he said.

What networks will do with feed of House when it is offered—expected in late February or March—hasn’t been decided. All bureau heads guessed they would use excerpts but clearly labeled as to source.
**Business Briefly**

**TV only**

**BRK** □ Electronics group starts two-month TV promotion for its First Alert smoke detector late this month. Grey-North, Chicago, will arrange spots in about 20 markets during fringe, news and sports time. Target: total men.

Radio: undersold on its own selling power

During a period of double-digit inflation and when national spot television showed increases of $203,400,000 or 21.2% (January through July 1978), we must ask why radio, in the same time, has shown an increase of only 4.7% in the top-10 markets or a 5% increase in the composite of 20 markets participating the market-billing pool through the Radio Advertising Bureau.

Regardless of the figures we look at, it’s obvious that the enormous dollar increases in television advertising would indicate that we in the radio business are doing something wrong.

I say “we” because we all have the responsibility of selling our medium to those advertisers interested in finding more efficient and more effective ways of moving their goods and services.

I don’t mean to say, either, that there isn’t anybody within the radio industry who isn’t doing or trying to do a good job of getting radio’s message across to prospective new customers. But the fact remains that, collectively, we just have not made it happen. It would seem, from reading through our various trade publications, that radio is considered today by too many important national advertisers to be a secondary medium. This, of course, is not the case.

Those of us in the radio business understand the potential effectiveness of our medium. It is our collective responsibility to sell it. The very fact that many successful radio advertisers have chosen for one reason or another, to move our broadcast dollars into television after successful radio efforts does not speak well for our capabilities to translate initial radio success into continuing radio success.

The advertiser attrition rate for radio has been estimated at 40% a year. In some markets, the figure is as high as 60%.

During the past few years I have listened with amusement on many occasions when people within our business tell me that Procter & Gamble is getting ready to “test” radio. It makes me wonder whether or not there is anybody left in Cincinnati that remembers Head of Life and Right to Happiness. At one time, P&G sponsored as many as 80 radio programs. It would be my guess that radio, as much as or more than any other advertising medium, helped make Procter & Gamble the giant it is today.

People seem to forget, too, that terms like Jello and Kleenex became parts of our language through the use of radio advertising.

However, we don’t have to go back to the 1920’s, 30’s and 40’s to find outstanding radio success stories. Today we have such national advertisers as Blue Nun, Kraft, American Express, Metropolitan Life Insurance Co., Life Savers—the list goes on and on—that are successfully using our medium. The fact that radio is capable of creating generic names attests to its ability to create within a listener’s mind an image that is limited only by that individual’s imagination.

Like any advertising medium, successful radio campaigns are well planned and well executed. Creative, meaningful copy is an absolute must. Jerry Della Femina, chairman of Della Femina, Travisano & Partners, recently said, “With radio I can transport a listener into the cockpit of a plane for Emery Air Freight” and, “With radio, the agency can conduct an interview with Boom-Boom LaTour, the stripper who owes everything to Kreischner wheat germ.”

Let’s look for a moment at radio and what it offers the advertiser as an advertising medium: Certainly, radio offers greater flexibility than any of the other mass-appeal media, and I am considering newspapers, magazines and television in this comparison. Jerry Light, executive vice president at BBDO, has characterized radio as being personal, convenient, instant, fun, varied, selective and portable.

Depending on an advertiser’s target audience, just a few radio stations can be used effectively, even in the largest markets, to reach the demographic profile that the advertiser must reach. For example, have we ever heard of a TV station that reaches, or is programmed to, a specific audience demographic such as teen-agers, young adults, upper-income adults, blue collar workers, etc., throughout the broadcast day?

Please don’t interpret my comments to mean that radio is the end-all medium or that it will do all things for all people. But certainly, radio—with its tremendous reach and frequency capabilities, its ability to pin-point specific target groups and its excellent cost efficiencies—should be a part of almost every serious advertising campaign.

Used properly, TV and radio are perfect companions. The imagery-transfer concept is as valid, or more so, today as it was 20 years ago.

There is a creative enchantment with television at most major advertising agencies and probably a disproportionate amount of attention paid to creative excellence than to advertising effectiveness.

As a young man in this business several years ago, I was privileged to work for the Radio Advertising Bureau and had, as my area of responsibility, the automobile manufacturers in Detroit. The presentations that we prepared for top-level automotive marketing people were predicated in large part on the success that auto dealers had had using radio, on a local basis, in virtually every city and town in the United States.

To think that a sophisticated, multimillion-dollar national advertiser cannot learn from the success of a local retailer would be ridiculous. Local radio advertisers apparently know better the effectiveness and sales power of radio than do some of the marketing professionals found within the top-100 national advertisers.

Still one really has to do understand the intimacy of radio is to relate to his or her own personal experience. I learned at 6:45 a.m. of the death of Pope John Paul I, and I don’t watch TV at that hour. When I reached the train station, there was not a single newspaper that carried that headline—it was radio that was there first, and that’s where most of us learn of major happenings.

Radio’s story in turn must also be told to the corporate executives who are able to relate advertising expenditures to bottom-line efficiencies.
"Sensational! We liked it. 'Elvis: Memories...' created lots of telephone inquiries."
CARL BRAZELL, JR.—KRLD—DALLAS, TEXAS

"'Elvis: Memories...' is dynamite! KIIS had fantastic audience reaction. It's super. Well done."
ED BOYD—KIIS—LOS ANGELES, CALIFORNIA

"Very well produced and very well researched. The show was great."
JOHN GEHRON—WLS—CHICAGO, ILLINOIS

"Fantastic. Great audience response—both calls and letters. Very favorable."
JIM CLEMENS—WPLO—ATLANTA, GEORGIA

"Excellent show. Could have sold 'Elvis: Memories...' two or three times!"
LARRY KNIGHT—WZZD—PHILADELPHIA, PENNSYLVANIA

"Very well done. Great emotional appeal. Listener letters are still coming in."
AL BRADY—WHDH—BOSTON, MASSACHUSETTS

"Super program. It has excellent quality. Good, good reaction from audience."
CHICK WATKINS—WGAR—CLEVELAND, OHIO

"WABC's audience response to 'Elvis: Memories...' was phenomenal."
GLENN MORGAN—WABC—NEW YORK, NEW YORK

"Excellent response!"
TED ATKINS—WTAE—PITTSBURGH, PENNSYLVANIA

"Excellent! Very good comments in letters from listeners."
KEN CURTIS—WLEE—RICHMOND, VIRGINIA

"Memorable and moving. Michael has put together a three-hour program that is technically and musically well produced. Through extensive interviews that wrap around the music, Michael has probably assembled as much information as an Elvis fan would ever want to know."
BILLBOARD—AUGUST 12, 1978

"Thank you, George Michael! (Producer/Host of 'Elvis: Memories...') I couldn't agree with Billboard more! You deserve every accolade on this page, and it's only a partial listing. Space doesn't permit us to include all the rave reviews and notices we've received since the airing of 'Elvis: Memories...'. And to our affiliates who so successfully promoted the show, and to the great radio network team that helped make it the outstanding show it is, my heartfelt praise and thanks."
EDWARD F. McLAUGHLIN ABC RADIO NETWORK
Oct. 8-9 — Kentucky CATV Association fall convention, Representative Lionel Van Deesten (D-Calif.) will be banquet speaker, Hyatt Regency hotel, Lexington, Ky.

Oct. 11-13 — Indiana Association of Broadcasters fall meeting, Brown County Inn, Nashville, Ind.

Oct. 12-14 — National convention of National Association of State Boards of Education. Part of agenda will be focus on “Broadcasters Are Educators, Too.” Speakers will include FCC Commissioner Abbott Washburn, NAB Board Chairman Donald Thurston, Televison Information Office Director Roy Daniel, U.S. Commissioner of Education Ernest L. Boyer and CBS's Bob Keenan.

Oct. 13-15 — Northeast area regional meeting, American Women in Radio and Television, Marriott/ Eastman Conference Center, Rochester, N.Y.

Oct. 15 — North Carolina Association of Broadcasters meeting, Radisson Plaza hotel, Charlotte, N.C.

Oct. 16-17 — National Association of Broadcasters fall conference, Atlanta Omni hotel.

Oct. 16-17 — Southwest chapter convention of National Religious Broadcasters, Sheraton-Century hotel, Oklahoma City Information: David Webben, PO Box 1144, Oklahoma City 73101.

Oct. 16-19 — Texas Association of Broadcasters engineering (16-17) and management (18-19) conference. Galleria Plaza, Houston.

Oct. 17 — Broadcast Town Meeting for public, sponsored by National Association of Broadcasters, Civic Center, Charlotte N.C.

Oct. 18 — International Radio and Television Society newsmaker luncheon on “Sports on Television.” Panelists will include Mike Burke, Madison Square Garden Center; James Spence, ABC Sports; Carl Lindemane Jr., CBS Sports; Stephen M. Leff, McCann-Erickson, and Robert Wussler, Pyramid Enterprises.

Oct. 18-19 — Annual broadcast clinic, coordinated by University of Wisconsin Extension. Clinics will include discussions by FCC officials and displays by equipment manufacturers. Madison, Wis.

Oct. 22-24 — Fall meeting of New York State Cable Television Association, Kutsher's Country Club, Monticello, N.Y.

Oct. 23 — Deadline for comments on FCC inquiry into broadcasters' practices involving public service announcements. Questions cover factual issues on presentation of PSAs and roles PSAs could or should play (Docket 78-251). Replies due Nov. 11.

Oct. 23-24 — South Central regional technical conference of the Society of Cable Television Engineers. Six other conferences will be held at other locations around the country throughout 1978 and 1979. This first meeting will concentrate on CATV construction.

Oct. 24-26 — Second annual "State of the Art" convention of the Kentucky chapter of the Society of Broadcast Engineers. Ramada Inn Bluegrass Center, Louisville, Ky.

Oct. 24-26 — Symposium on "The Future of Govern-

ASTRONOMICAL.

Mike Douglas has settled down among the stars. Television’s favorite host is now at home in Hollywood. Taping daily at CBS Television City. With a sparkling new look. And the biggest name guests ever. Like the stars above. They’re some of Mike’s guests during his first three weeks in Hollywood.

But that’s only half the change. Mike’s audience is growing younger and bigger. Just take a look at the first half of ’78 compared with the first half of ’77.

October

Oct. 27—National Broadcast Association for Community Affairs annual meeting. Copley Plaza hotel, Boston, information: Paul LaCamera, WCIV-TV Newhouse, Mass. 02192.

Oct. 28—Meeting of Connecticut Broadcasters Association Sonesta hotel, Hartford, Conn.

Oct. 27—Convention of San Francisco chapter of Society of Broadcast Engineers. LeBaron hotel, San Jose, Calif.

Oct. 29-Nov. 3—Society of Motion Picture & Television Engineers convention. Americana hotel, New York.

November

Nov. 1—Broadcast Town Meeting for public, sponsored by National Association of Broadcasters radio and TV boards. St. Louis County Heritage and Art Center, Duluth, Minn.

Nov. 2-3—Oregon Association of Broadcasters fall conference. Janitzek Red Lion, Portland, Ore.

Nov. 2-5—American Advertising Federation Western region conference. Waikiki Sheraton hotel, Honolulu.

Nov. 3-4—Sixth annual advertising conference of Wisconsin. Sponsored by state ad clubs, Wisconsin Newspaper Assn., Executives Association and University of Wisconsin Extension, Wisconsin Center, Madison.

Nov. 3-5—Ninth annual Loyola National Radio Conference, primarily for college and high school station personnel sponsored by Loyola's radio stations and communications art department. New Marriott hotel and Loyola University of Chicago's Marquette Center. Chicago, information: (312) 673-3128.

Nov. 5-8—Gospel Music Association's Gospel Music Week and Dove Awards presentation, Opryland hotel, Nashville.

Nov. 8—National Association of Broadcasters radio code board meeting. New Orleans.

Nov. 8—Ohio Association of Broadcasters-Ohio Broadcasters Convention. Clevelandaht, Ohio. National Advertisers will speak. Columbus Sheraton, Columbus, Ohio.

Nov. 8-10—Satellite Communications Symposium sponsored by Scientific-Atlanta. Emphasis will be given to earth stations and video programming. Atlanta.

Nov. 9-10—National Association of Broadcasters fall conference. Fairmont hotel, New Orleans.

Nov. 9-12—National Association of Farm Broadcasters fall meeting. Kansas City Mo.

Nov. 11—Fall seminar of Radio Television News Directors Association of the Carolinas, Charlotte, N.C.

Nov. 15—Deadline for comments on FCC's proposed extension of multiple ownership rules to public broadcasting stations. Reply comments are due Dec. 15.

Nov. 16-18—Arizona Broadcasters Association fall convention and annual meeting. Radisson Resort, Scottsdale, Ariz.

Nov. 17-18—Board of directors meeting, American Women in Radio and Television, Atlanta Hilton.

Nov. 19-20—Meeting of board of trustees, Educational Foundation of American Women in Radio and Television, Atlanta Hilton.

Nov. 28-29—Association of National Advertisers annual convention, Camelback Inn, Scottsdale, Ariz.

Nov. 29-30—Western conference of Advertising Research Foundation, Hyatt Regency Los Angeles.

Nov. 30-Dec. 2—Meeting of UNDA-USA and presentation of Gabriel Awards. Bahia Mar Resort, South Padre Island, Tex.

December

Dec. 4-5—National Cable Television Association board meeting. Anaheim, Calif.

Dec. 8-9—Western Cable Television Show. Disneyland hotel, Anaheim, Calif.

Dec. 11—Deadline for comments on FCC inquiry into role of low power television broadcasting, including television translators, in over-all national telecommunications system (Docket 78-253).

Dec. 12-14—Midcon '78 electronics show and exhibit, Dallas Convention Center.

Jan. 15—Comments due in FCC inquiry and rulemaking proceeding on applicability of fairness doctrine and personal attack rule to use of broadcast facilities by political candidates under Section 315 of the Communications Act. (Docket 78-291). Replies are due Jan. 16.

Jan. 29—Deadline for comments on FCC proposal for standards for AM stereophonic broadcasting, to be submitted along with other things, effect of AM stereo signal on adjacent channel protection ratios, skywave service and out-of-band emissions (Docket 21313). Replies are due Jan. 31.

January 1979

Jan. 2—Comments due on FCC proposals to restrict amount of time devoted to on-air auctions and promotional fund-raising programs, other educational broadcasting proposals (Docket 21138). Replies are due Feb. 1.

Jan. 7-9—California Broadcasters Association midwinter meeting, Vincent Wasilewski, National Association of Broadcasters, will speak. Palm Springs Spa hotel, Palm Springs, Calif.

Jan. 8-9—Pacific Telecommunications Conference, featuring technology of communications and economic, social and regulatory aspects of communications. Liiikai hotel, Honolulu.

Jan. 15—Revised date for Federal Trade Commission hearing on children's advertising. Former date was Nov. 6, San Francisco.

Announcing the newest in video freedom:

all you want in a 1” VTR backed by total support from RCA.

Now you can have complete freedom from worry about helical-scan VTR support. That’s because your investment in the new RCA TH-100 1” VTR is protected by RCA. That protection means 24-hour parts replacement. Emergency service. TechAlert, for help as close as your phone at any time—day or night. Training support. Service manuals. You can be sure that RCA support is there, wherever your RCA equipment operates.

Quality to start with.
The new TH-100 is yours in the new SMPTE Type C non-segmented helical format. It’s available in three studio configurations—rack, console or T-cart. A small, lightweight, rugged portable—the TH-50—is available for field production. All models deliver the picture and audio quality you need for professional results.

Among the many TH-100 features are two high quality program audio channels for stereo/bilingual use; complete recording/playback of video and vertical blanking interval; one cue/SMPTE time code channel; automatic color framing; five servos for optimum tape handling; two flexible tape timers; plus much, much more.

The TH-100 offers economical first cost, economical head cost, and tape economy, too.

Simplified edit control.
One bi-directional search knob gives you forward and reverse editing control, with selectable shuttle speeds up to 60 times normal. You get a color picture to 7 times normal, a recognizable picture at full speed when used with the TBC-100 time base corrector. For more video freedom, you can manually jog frame-by-frame—again, with a color picture.

Video freedom is everything you need for quality television.
RCA offers a brilliant array of VTRs, cameras, mobile units, antennas and transmitters. For more facts about any RCA equipment, including the TH-100, just contact your RCA Representative, or write us. RCA Broadcast Systems, Building 2-2, Camden, NJ 08102.

New from TM! Updated version of The Evolution of Rock is expanded to 67 hours and now includes the rock milestones of 1977.

The Evolution of Rock is a ratings blockbuster. And it’s just in time for the October/November ARB survey. It can be sold to only one station in a market, so call TM Productions and order it for your station.

The Evolution of Rock maintains listenership because it’s chronological. After the introductory (pre-1955) chapter, each three-hour chapter covers an entire year. Listeners know what to expect, and they have something to look forward to.

The Evolution of Rock maintains listenership because it’s interesting. It includes rare interviews with artists, even recording session out-takes. Program Directors have nothing but the highest praise for the production values of this special: “The writing, pacing and announcing are all first-rate.

Here’s what broadcasters have said about The Evolution of Rock:

“I’ve heard them all, and The Evolution of Rock is the biggest, the best, the most complete documentary of Rock.”
- Chris Curtis, WZUU, Milwaukee

“The Evolution of Rock is an incredible audience grabber.”
- Robin Mitchell, KYYX, Seattle

“We ran it against ‘The History of Rock ‘n’ Roll’ and just obliterated them.”
- Don Roberts, WIXX, Green Bay

“In the dayparts where we ran The Evolution of Rock, we had up numbers, especially with Men 25-34.”
- Peter Booker, WHND, Detroit

“We ran The Evolution of Rock on a weekend, and it out-performed all other weekends in our book.”
- John Geron, WLS, Chicago

“The Evolution of Rock was sold out completely.”
- Larry Kirby, WSAI, Cincinnati

“You’re going to get a lot of listeners from other stations.”
- Bob Reich, WBYQ, Nashville

“A great money-maker, a great image builder.”
- R.C. Rogers, WRBR, South Bend

“It was very simple for the jock on the air to put together. Absolutely no problems.”
- Johnny London, WICH, Norwich

Here’s what you get with The Evolution of Rock:

- Four-hour introductory chapter and 21 three-hour chapters for programming flexibility. 67 one-hour discs in all. Air it straight through a weekend, or a chapter a day.
- 700 minutes of commercial availability for maximum profit potential.
- 10 on-air promos. They’re pre-produced and ready for you to customize.
- Fully produced jingles to build and maintain audience excitement.
- Over 100 promotional scripts.
- Operations manual, with everything you need to keep the program running smoothly.
- Sales presentation kit, to help you sell the program to local advertisers.
- News releases for the local media.
- Fully produced ads for newspapers, magazines and outdoor.
- Artwork for you to use in creating promotional materials for participating sponsors.

Call today and be ready for the fall ratings survey

If you call right now, TM can have The Evolution of Rock on your doorstep in less than 3 working days. This will give you time to promote and sell the program before the October/November survey begins on the 19th.

So don’t delay. Call TM collect and ask for Dennis Meeks. The number is 214-634-8511. Call right now.

“Our FM doubled its audience share with The Evolution of Rock”

-Rick McKee, KRKE, Albuquerque
GE+Cox= biggest ever broadcast buy in the works

If it goes all the way, merger would be worth from $440 million to $488 million; two companies together now own 28 stations, of which at least nine must be spun off; Kiriland would head new unit

A tentative agreement for General Electric Co. to acquire Cox Broadcasting Co. for $440 million to $488 million in GE stock, the biggest transaction in broadcasting history if it comes off, was announced last Thursday.

The companies said their respective boards of directors had authorized their officers to begin negotiating a definitive agreement under which Cox stockholders would receive no less than $65 nor more than $72 worth of GE stock for each Cox share—a price range 31% to 45% above the level at which Cox was trading just before the agreement was announced.

GE, ranked number one in Broadcasting's compilation of the top 100 companies in electronic communications (June 26 issue), owns three TV, five FM and three AM stations and operates 12 cable systems with 170,000 subscribers. Cox, 52nd in Broadcasting's top 100 and one of the oldest and biggest broadcasting and cable groups, owns five TV, seven FM and five AM stations and operates 44 cable systems with 550,000 subscribers. All the TV stations are VHF.

Under FCC's multiple-ownership rules GE would have to dispose of three TV stations and at least one AM and five FM stations. The announcement noted that the exact number of radio stations that would have to be sold depends on "several factors, including which television stations are retained," and that no decisions have been made as to which stations would be affected.

Some broadcasting specialists on Wall Street speculated, however, that GE would dispose of its own three TV stations—WRGB(TV) Schenectady, N.Y., KOA-TV Denver and WNGE(TV) Nashville—and probably could get $50 million to $60 million for the three. They estimated the probable market value of GE's current radio stations at $1.5 million to $20 million.

Whichever stations were sold, the new alignment would stand as one of the largest station group owners, after the networks, and would rank as the number-two cable operator in the country, behind Teleprompter. GE and Cox together could claim 720,000 subscribers. Teleprompter has over a million customers.

Authorities said the group would be based in Atlanta, Cox's headquarters, with Clifford M. Kiriland Jr., Cox's president, and chief executive officer, as chief operating officer. It is expected to be operated as a wholly owned subsidiary of GE, probably retaining the Cox name for the immediate future but not for the long haul.

Reid L. Shaw is president of General Electric Broadcasting Co. and General Electric Cablevision. What his role would be in the combined group was not made clear, but sources close to negotiations said, as one put it, "we feel that everybody in the two organizations will find a home in the new one."

Cox shares are publicly held, traded on the New York Stock Exchange, but slightly over 40% is owned by Mrs. Anne Cox Chambers, U.S. ambassador to Belgium, and Mrs. Barbara Cox Anthony, daughters of the late James M. Cox, and their families. Mrs. Anthony and Mrs. Chambers were said to favor the move to seek a combination with GE.

The sisters would own more than 3.5 million GE shares, presumably making them two of the biggest single stockholders. With 3.5 million shares they would hold approximately 1.6% of GE's outstanding stock.

Negotiations were authorized looking to a tax-free exchange of 1.3 shares of GE common stock for each share of Cox stock, within the $65 to $72 limits for each

The combined GE-Cox station lists: At least nine will have to go
Cox share. At those limits, the total could range from a low of $440 million to a high of $488 million. At market values just before the agreement was announced, the formula would result in issuance of about 8.8 million GE shares worth about $467 million. The final price would be 10 to 15 times Cox earnings.

The actual number of shares to be issued would be determined by the average of the closing prices of GE stock during a 20-trading-day valuation period immediately preceding the date of closing on the transaction.

Last Wednesday, the day before the announcement, GE stock closed at $3 on the NYSE, down a quarter-point for the day, while Cox closed at 49 1/2, up 1 1/2 on speculation that some major transaction was being planned. Trading of Cox shares did not open Thursday morning while the market awaited the announcement. After trading resumed, the price rose 9 1/2 points, closing at 59. On Friday, Cox shares closed at 57 1/4, GE at 52 5/8.

Garner Anthony, chairman of Cox's executive committee and husband of Barbara Anthony, said: "In my judgment, Mr. Cox's considering such a deal was 'the increasing regulatory pressure on common ownership of different media in the same market area.'"

The Cox family has extensive newspaper holdings, including overprinting interests with their radio-TV stations in Atlanta and Dayton, Ohio. The newspaper holdings—which include the Atlanta Journal, Atlanta Constitution, Dayton (Ohio) News and Dayton Journal-Herald, Miami News and some other papers in Arizona and Texas—are not part of Cox Broadcasting and not involved in the proposed sale.

Although existing combinations are not barred under the FCC's crossownership rule, Cox officials were said to be concerned lest theirs be increasingly challenged by the Justice Department or others at license-renewal times. In terms of GE's total stockholdings, it was felt, the Cox family's interests in the stations would be so small that no crossownership problem would be presented.

In addition to its broadcasting and cable interests, Cox operates wholesale used-car auctions in 13 cities through its Mannheim Services Corp.; publishes Electronic Products, Electronics Retailing, Office Products and Electronics News and more than a dozen other publications, chiefly in the electronics and photographic fields, through its United Technical Publications; and produces motion pictures through its Bing Crosby Productions. Among the movies have been Walking Tall, Walking Tall—Part II, Final Chapter Walking Tall, Willard, and, released early this year, Mean Dog Blues.

Reginald H. Jones, chairman of GE, said that 'General Electric has been a pioneer in radio and television broadcasting. We welcome this opportunity for General Electric to extend its broadcast services by building upon Cox Broadcasting's fine record of entertainment and public service through the electronic media.'

First discussions between GE and Cox officials were said to have been held about a month ago. Among the top-level executives involved were Executive Committee Chairman Anthony and President Kittland on behalf of Cox, and Chairman Jones and Senior Vice President Jack Welch on behalf of General Electric.

Although GE's portfolio of television and radio stations is sizable by conventional broadcasting standards, its contributions to GE's revenues and profits, although not precisely known, are probably small. GE, which in the Fortune 500 ranks ninth in sales and assets and fifth in net income, is primarily a supplier of consumer products and components, industrial products and components, power systems, technical systems and materials and natural resources. In 1977 it reported $1.1 billion in net profits, or $4.79 a share, on operating revenues of $17.5 billion.

Cox Broadcasting's net profit in 1977 came to $23.5 million, or $4.11 a share, on $186.4 million in operating revenues.

Completion of the GE-Cox transaction is subject to the negotiation of a mutually satisfactory agreement, approval by the boards of both companies and by the shareholders of Cox, and approvals by various regulatory agencies including the FCC.

A Justice Department official said that, as a matter of routine in a case of such magnitude, the Antitrust Division and the Federal Trade Commission will look into the transaction to see if either feels an investigation of potential antitrust problems is warranted.

GE stations are WGY (FM) Schenectady, N.Y.; KOAM-FM, Joplin, Mo.; and WGBI-TV, Scranton, Pa.; and WRGB (TV) Schenectady, N.Y.; WCOI (AM-FM) Lima, Ohio; and WQ-AM-FM, Steubenville, Ohio.

Cox stations: WSB-AM-FM-TV Atlanta; WHIO-AM-FM-TV Dayton; WSOC-AM-FM-TV Charlotte, N.C.; WICF-TV Pittsburgh; KYTITV Oakland, Calif. (San Francisco); WIOD (AM-FM) Miami; KFIA (FM) Los Angeles; WFLF (FM) Baltimore and WWFM (FM) Philadelphia.

Cox also owns the Telerep (TV) and the Crystal Co. (radio), station-representa-

If consummated, the GE-Cox merger will become the largest property exchange in broadcasting history. However, it's not the largest ever proposed. On Dec. 1, 1965, a merger agreement was announced between ABC and ITT with ITT to pay in stock the equivalent of $379,750,000. But objections by the Justice Department and various courts resulted in the closing only until, on Jan. 1, 1968, with changing stock values having increased the price to $661,200,000, ITT pulled out.

The GE-Cox merger is the second "super deal" of the year. Last spring the Gannett Co. and Combined Communications Corp. agreed to a $370-million merger that is still awaiting FCC approval (BROADCASTING, May 15).

President settles on Anne Jones for FCC post

Five months after her name first surfaced as a candidate, White House selects successor to Margrita White; she's now general counsel of Federal Home Loan Bank Board, had been officer of SEC; Goldwater objection may hamper approval in this Congress; ties to Chairman Ferris questioned

The White House has finally settled on its choice to succeed FCC Commissioner Margrita White, whose term expired more than three months ago. President Jimmy Carter is said to have "signed off" last Monday on a candidate naming the general counsel of The Federal Home Loan Bank Board, Anne Jones, who had long been considered the leading candidate, to a term ending in 1985.

But the nomination came too late to permit Miss Jones to join the FCC before the next Congress convenes in January. With Congress scheduled to adjourn by Oct. 14, Senator Barry Goldwater, a member of the Senate Commerce Committee, which would consider the nomination, said on Friday he would refuse to provide the unanimous consent that is needed to hold hearings without seven days advance notice. Later in the same day, however, the White House announced the appoint-ment. Even so, Commissioner White seems likely to remain in office for at least three more months.

What effect Miss Jones will have on commission policy is hard to predict. Communications attorneys and others, citing her link to FCC Chairman Charles D. Ferris—they were classmates at Boston College Law School, and he recommended her for the FCC spot—are uneasy over the prospect that she will provide him with the fourth vote he sometimes needs for a majority on key, and controversial, issues. "I'm not wild about the idea of her being a friend of Ferris," one communications lawyer said.

Actually, Miss Jones says she has not seen Mr. Ferris more than a half dozen times in the 17 years since she graduated from law school. The relationship, she said, has not been close. Moreover, she and others who know her say there is no basis for speculation that she would provide an automatic vote for Chairman Ferris, or anyone else.

Roderick Hills, who had been chairman of the House Banking and Exchange Commission when she was a high-ranking staff member there, and Robert McKinney, who heads the FHLLB, describe her as independent and strong-minded. "She speaks her mind, clearly and openly," Mr. McKinney said.

And Miss Jones demonstrated the kind of frankness with which her present and former bosses credit her, in responding to...
BROADCASTING discussing the predictions about the kind of role she would play at the commission. "What burns me up is the thought that I'm going to be a 'fourth vote'—that whatever Charlie wants, I'm going to do," she said last week, after word of the President's decision began circulating in Washington. I find that insulting. I didn't get to be general counsel of the FHLBB or director of the Division of Investment Management, at the SEC by saying yes to everything people said. The interesting point is, I hope he [Mr. Ferris] doesn't think so.

Then she added: "I'm 43, single and have managed to live a very happy life without depending on anyone else for anything. I am independent." Not only that, but whatever label may be pinned on Chairman Ferris, Miss Jones, by her own description, is a "fiscal conservative who believes in small government." And Mr. McKinney, for one, would not disagree. "Politically," he said a BROADCASTING reporter, "She's between the middle of the road and the right."

The likelihood that Miss Jones would not be able to demonstrate her asserted independence or political conservatism at the commission until January became apparent on Friday, only a few hours before the nomination was expected to be announced by the White House. Senator Goldwater who was polled along with other Republican members, said he would not agree to waive the seven-day rule. A spokesman said the senator indicated only that he presented the White House attempting to "push through" the nomination at the end of the session, when many other items of business demand attention. Beyond that, Senator Goldwater is known to have strongly backed Commissioner White for renomination.

Although Miss Jones is not considered controversial, there may be matters that could cause some senators to prefer that her nomination be subjected to more than perfunctory scrutiny. One is the matter of her alleged ties to Chairman Ferris.

Another issue, given currency in recent weeks by critics of the nomination, involves Miss Jones's role, while at the SEC, in backing legislation the Wall Street Journal denounced editorially as a threat to the First Amendment. The measure was a proposed amendment to the Investment Advisers Act, and one of its provisions called on the SEC to clarify the distinction between "bona fide" newspapers, which are exempt from the act's registration requirement, and publications that are not.

The Journal saw such an effort at "clarification" as violating the First Amendment, while the SEC saw it as attempting to provide guidance to persons asking whether particular publications were covered by the 1940 law. And although the proposed bill originated in the division Miss Jones headed, it had worked its way through the shop before she was named director. She says she never thought the measure a good idea—although not because of the First Amendment; that was not seen as a problem—

**Woman on the move**

Hanging on the wall of Anne Jones's office at the Federal Home Loan Bank Board is a caricature of her, in jogging togs against the background of the Washington Monumen, and with the legend: "On my way to greener pastures." The drawing was a gift from associates at the Securities and Exchange Commission, who had presented it in December, on the occasion of her departure for the FHLBB, where she was to become general counsel. But the donors were more prophetic, than they knew, for Miss Jones kept right on running, and is now President Carter's choice to fill a seven-year term on the FCC.

Her success is a function of a reputation as a federal civil servant who has performed well in demanding jobs, and of the small-world syndrome for which Washington is known. An old Boston College law school classmate, Charles Ferris, happens to be the chairman of the FCC and thought of her when the White House was looking for a replacement for Commissioner Margita White.

The fact that Miss Jones is a Republican and a woman was helpful, too—indeed essential—in view of the statutory limit on members of any one party serving on the commission and the evident concession to women of at least one FCC seat.

But Miss Jones, in whom a number of conflicting characteristics—like being Boston Irish and a Republican—reside comfortably, had been making her own way in the world long before Chairman Ferris mentioned her name to the White House.

Miss Jones, who in 1961 graduated cum laude and second in her law school class ("my mother was mad at me for dropping to number two after being number one the first two years"), moved through the ranks of the bureaucracy about as fast as anyone can.

After seven years in general corporate practice with Ropes & Gray in Boston, she joined the Securities and Exchange Commission staff in April 1968 as an attorney-adviser. Four years later, she was named associate director of the Division of Investment Management, which regulates mutual funds, and two years after that, in January 1976, director.

Then, last year, a friend suggested her for the job of general counsel of the FHLBB. Since she was a Republican—and the FHLBB people who contacted her asked her politics—she didn't expect to get the job. But the new chairman, Robert McKinney, not only offered it to her: "he sold me on it."

Thus, at 43, Miss Jones would appear to be the kind of role model the women's movement delights in holding up to the young women of the country. She is, she says with some vigor, single and happy and independent.

(The directness with which she talks is another indication of the contradictory elements embodied in Anne Jones. Where lawyers generally seem to prefer circumlocutions, she goes in for the short, declarative sentence. "I am not a liberal," she says. Or, "I am independent."
And if that weren't enough, she is something of an athlete; she jogs three miles every morning. (Hence the jogging clothes in the caricature.)

But, and here the conservative part of her nature may be showing, she is not a part of the women's movement. "I am a little concerned about women's lib groups," she said, "the organization, that is. I haven't been active."

Furthermore, she says that, even as she recognizes she has been helped by the consciousness-raising work of women's groups over the years. On her first job after law school, her annual salary was $1,000 less than that of young men being hired.

Now, the climate has changed; being a woman has helped. Indeed, she believes one reason Mr. McKinney hired her was that he was looking for a woman with managerial experience. In the end, Miss Jones's attachment to the women's movement is pragmatic, rather than ideological. "If I do a good job in the posts I hold, it helps," she said. "If I botch it, it hurts."

Then she offered this observation: "I'm sure that people think I'll be the woman commissioner. Those who do, don't know who I am."
and that, after it died in Congress, she advised the commission against supporting a subsequent version.

The process of selecting a successor to Commissioner White has been arduous. White House aides say the effort had been to find the best possible person for the job. It may be that it did not find its ideal; its talent scouts were known to be looking for someone with expertise in common carrier matters, and Miss Jones has no communications background.

Furthermore, her name first surfaced in May (Broadcasting, May 29). And although it appeared at the time that her selection was likely, the White House continued the search, generating a flock of new candidates who were checked out. Thus, some observers say the White House may have finally decided to settle on Miss Jones as the best available, if not the best possible, candidate.

If the nomination is not confirmed before Congress adjourns, Commissioner White could continue to serve until the next Congress convenes in January, and the Senate acts. Commissioners serve until their successors are nominated and confirmed.

The White House was operating under some constraints in its hunt. Not only was the search limited to Republicans—Democrats already hold the maximum of four that the law allows any one party—but to women. The seat, first held by former Commissioner Charlotte Reid from 1971 to 1976, then by Mrs. White, is now regarded as reserved for women.

Commissioner White, a Republican, was ready and willing to serve another term. But although White House aides had maintained that she was always in contention, that the final decision on whether she would be renominated would be made by the President, her chances always seemed slim.

As long ago as last fall, sources close to the administration indicated that the White House would probably not renominate her (Broadcasting, Dec. 5, 1977). Several reasons were given. One was that Mrs. White's background—an aide in the Nixon White House (she had been an assistant to Herbert Klein when he was director of the old office of communications) and the appointee of former President Ford—was against her. Another was that Chairman Ferris needed "a fourth vote." The reasoning was that while the chairman could count on the votes of two of the three Democrats on the commission—Joseph Fogarty and Tyrone Brown—on important issues, he could not depend on the vote of the fourth, James H. Quello, to provide the margin as much accomplished as we'd hoped," she said. Part of the difficulty, she added, was changing the attitude of some of the staff. But he said Miss Jones subscribes to the general notion of a free market. "I can't say she's a free-market advocate. But I would think she's more in that mold than a typical regulator is... I would expect she'd try to let the market do more and the FCC less."

**TOP OF THE WEEK**

If Congress convenes in January, and the Senate acts, Commissioners serve until their successors are nominated and confirmed. The White House was operating under some constraints in its hunt. Not only was the search limited to Republicans—Democrats already hold the maximum of four that the law allows any one party—but to women. The seat, first held by former Commissioner Charlotte Reid from 1971 to 1976, then by Mrs. White, is now regarded as reserved for women.

I would expect she'd try to let the market do more and the FCC less."

**In Brief**

New TV commercial time standards that eliminate many "nonprogram material" exemptions were voted by National Association of Broadcasters TV code board last week. New rules, which need full NAB board approval, permit nine minutes 30 seconds nonprogram material in each prime-time hour on network affiliates, allow another 30 seconds in some situations. Affiliates are allowed to average commercial time on 90-minute programs, but not allowed to run more than five consecutive announcements within program (no more than four of which can be commercials, no more than three during station breaks). Some types of promotions not now counted, such as for special movies, series being terminated and during ullits in sports shows, will be counted against standard now. Another new rule: Standards may be exceeded when, say, two-hour movie runs short, but only 12 times a year, and then added promos may not exceed two minutes per hour.

Senator Barry Goldwater (R-Ariz.), member of Senate Communications Subcommittee, says after west-northwest decision there is "pressing need" for legislation to clarify ground rules for renewals. Decision creates "practically insurmountable obstacles" for majority of broadcasters who have more than one station or other media interest; Mr. Goldwater says, leaves them vulnerable to "expropriation without compensation."

Ziff Corp. sweetened its bid for Rust Craft Greeting Cards Inc. again, to $33.50 per share from previous $30.50, and extended Nov. 9 deadline for completion of transaction to Feb. 28. Rust Craft, group station owner with diversified interests, announced Friday that it agreed to both changes. New offer would make $388.8-million deal. Stockholder-directors Jack and Myles Berkman, who have opposed Ziff offers as too low ever since first one at $25 per share, voted against amendment incorporating latest one.

**NBC-TV's W.E.B.** early last week became first series of new prime-time season to be canceled, followed late in week by ABC-TV's Apple Pie, W.E.B., Lin Bolen's 20th Century Fox production, is to be replaced by Columbia Pictures Television's David Cassidy—Undercover, beginning Nov. 2, with variety of shows, including Weekend, Sword of Justice and Quincy, to fill in Thursday 10-11 p.m. time period until then. Replacement for Tat's Apple Pie (Saturday, 8:30-9 p.m.) was not announced; cancelation is effective immediately, although only two episodes have aired and seven are completed. Tat spokesman NBC plans to put Tat's new sitcom, Different Strokes, on air in early November, which will cause further maneuvers in network's schedule.

**FCC last Thursday adopted litigation strategy in two cases in which U.S. Court of Appeals had overturned its decisions. It decided to ask court for rehearing in case in which court remanded commission action denying American Security Council Education Fund complaint that CBS had been unfair in coverage of national security issues (Broadcasting, Sept. 18), and agreed to accept demand of case in which court told commission to review equal employment opportunity complaints Los Angeles women's group had filed against three stations there. And in third court matter, commission decided to ask for remand of case in which its cable television-television crossownership shipping rule is being challenged. It is not thinking its report and order in case will withstand judicial review. Owners of cross ownerships ordered; opened up content that divestiture order goes too far; National Citizens Committee for Broadcast, that it does not go far enough.

Communications Act rewrite proposal to funnel money from license fees to public broadcasting will probably be "sacrilified" in next draft, House Communications Subcommittee Chairman Lionel Van Deerlin (D-Calif.) says. It seemed good way to insulate public broadcasting from government intrusion through annual appropriations process, he says, but no one liked it—including officials in public broadcasting. Fee itself will remain, however. Mr. Van Deerlin also feels sympathy with
Younger complaint gets thrown out  

FCC backs decision of California stations in dealing with equal time problem; among other meeting actions, networks allowed to deal directly with Comsat for international service

The FCC has upheld the judgment of 26 radio and television stations in California that rejected the demand of Republican gubernatorial candidate Evelle Younger for equal time after they covered a speech by Governor Jerry Brown on Proposition 13. But the issue sparked another debate within the commission over the propriety of the informal advisories the staff gives stations on fairness and equal time.

At issue was the Younger Campaign Committee’s complaint that the Brown speech carried by 21 television and five radio stations was political and that, therefore, Mr. Younger was entitled to equal time. But the commission found reasonable the stations’ judgment that the speech—a reaction to plans of the state legislature for dealing with the aftermath of Proposition 13—was a bona fide news event.

However, the commission divided 4-to-3—with Chairman Charles D. Ferris and Commissioners Joseph Pogarty and Tyrone Brown in the minority—on whether KGO-TV San Francisco should be asked the reason it changed its original decision to give Mr. Younger time.

The concern was whether KGO-TV had changed its mind in light of informal advice the staff had given a number of stations that the speech appeared to be a bona fide news event—and KGO-TV had referred to the staff’s position in denying Mr. Younger time. The minority felt that, in the event of a court appeal, the commission should have on the record the reason for the station’s change of mind.

Chairman Ferris has frequently expressed concern over the issuance of such staff advice; he feels that, in view of the broad discretion licenses have in political broadcasting matters, they should exercise it; that staff advisories inhibit the exercise of such discretion. On the other hand, members of the majority, including former broadcaster James Quello, argue that such advice is helpful in dealing with the commission’s rules. The issue was not resolved, and is to be discussed further.

In other matters, the commission:

- Changed long-standing policy to authorize the broadcast networks and others transmitting TV signals to deal directly with the Communications Satellite Corp. when seeking its international service.
- Adopted a notice of inquiry into whether the commission should amend its rules to include a new program category—"Community Service"—to the program service on which broadcast applicants are asked to report.
- Issued a public notice declaring that broadcasters who have argued that lighter ownership restrictions in bill will nip their acquisition plans while grandfathering existing group ownerships, perhaps forever. "It isn’t entirely fair," said CBS affiliates last month. "We’ll try to find our way out of this one, but it ain’t easy."

Another member of House subcommittee, Thomas Luken (D-Ohio) called rewrite "a revolution no one’s joining." He told convention of Ohio Association of Broadcasters last week that he doesn’t think radical changes are needed, says question facing rewrite forwards is not only when bill will pass, but if it will pass Congress.

Several of George Carlin’s seven dirty words showed up on television yesterday to advertise his CBS-TV's broadcast of movie “Network" on Wednesday (Oct. 4) used one of them three times. New documentary shown to select Washington audience, including FCC commissioners, by Golden West Broadcasters same evening—hour titled Scared Straight, detailing New Jersey program to deter juvenile delinquents from life of crime by sentencing them to several hours in prison; it airs on KLAY-TV Los Angeles next month—used obscenities in profusion. Golden West’s hour carries frequent advisories warning of crude language: CBS-TV’s movie did not.

Conant Broadcasting has sold, subject to FCC approval, WWEL-AM-FM Medford (Boston, Mass., to Heftel Broadcasting for $2.75 million plus $750,000 for consulting agreements. Seller is principally owned by Sherwood Tarlow, president, who has no other broadcast interests. Buyer, owned by Representative Cecil Heftel (D-Hawaii) and his wife, Joyce, owns KGBM Honolulu and has purchased, subject to FCC approval, WLPF-FM Chicago and WSM-JF-FM Greenfield, Ind. WWEL is 5 kw daytimer on 1430 kHz. WWEL-FM is on 107.9 MHz with 21 kw. Broker: Cecil L. Richards Inc.

FCC last week rejected petition by New Jersey Coalition for Fair Broadcasting against sale of WAGL-TW Lancaster, Pa., to Pullitzer Publishing Co. Group had urged commission to relocate channel to VHFS-less state. Commission also set renewal of KJAZ-FM Alameda, Calif., for hearing. Action was in accord with commission’s request for renewal of case from U.S. Court of Appeals.

WYBR-AM-FM-TV Richmond, Va. granted one-year renewals based on equal employment opportunity record of stations during 1969-1972 license period. Black Broadcasting Coalition of Richmond appealed to U.S. Court of Appeals for the D.C. Circuit an FCC decision granting 1972 renewals subject to EEO conditions: court remanded to commission. In granting short-term license, FCC administrative law judge Reuben Lozner said stations’ EEO efforts had improved and on basis of whole record short-term renewals were called for.

Total: 1977 income for public broadcasting was $482.1 million, up 15% from previous fiscal year. Nonfederal income was $346.8 million (up 14.4%) of which $191.3 million came from state and local tax sources and $63.7 million from subscribers and auctions. Federal income was $135.3 million, 28.1% more than last year. Since 1972, largest source of income has come from state and local tax sources, though its proportional share has dropped from 50% in 1972 to 39.7% last year, according to Corporation for Public Broadcasting.

Carter administration has announced as part of national space policy it will create program to increase satellite use by public service agencies. It was good news to members of Public Service Satellite Consortium meeting in Washington last week. Also, National Aeronautics and Space Administration official told conference NASA would perform research and development to help public service community get inexpensive satellite access. Satellite communications would be opened up more with FCC ruling for Western Union on expected filling to allow non-broadcast services on public broadcasting satellite facilities.

AP has appointed Henry Heilbrunn executive in charge of cable television services. He had been New Jersey bureau chief with headquarters in Newark, now moves to New York.
American Family makes major move into broadcasting

First buy was made last year, then it announces deals for stations in Cape Girardeau and Savannah worth $32 million

In two separate deals totaling more than $32 million, American Family Corp. last year reached agreements in principal to purchase KFVS-TV Cape Girardeau, Mo., and WTOC-AM-FM-TV Savannah, Ga. It will dispose of the Savannah radio properties.

Last year, AFC, a public traded, Columbus, Ga.-based holding company of American Life Assurance Co., acquired its first broadcast property, WYEA-TV Columbus, for $1.5 million. At the time, it announced it intended to establish a substantial position in the communications field. It was also reported to be a serious bidder for Mutual Broadcasting System before the network was picked up by Amway Corp. (Broadcasting, Aug. 15, 1977), and this year AFC bought WYURTVI, (now WAFBTVI) Huntsville, Ala., for $3.35 million.

The Missouri station, KFVS-TV, plus a 13-story office buildings in Cape Girardeau and as yet undetermined quick assets are being purchased from Hirsh Broadcasting Co. for $24.5 million. The seller is owned by Oscar C. Hirsh and family, who own KFVSAMH Cape Girardeau, KFMOSAMH Flat River, Mo., and WCOAMSA Spartia, Ill. KFVS-TV is a CBS affiliate on channel 12. Howard Stark was the broker.

WTOC-AM-FM-TV Savannah are being purchased from Savannah Broadcasting Co., for approximately $6.22 million plus $1.5 million in other cash considerations. The seller is owned by William T. Knight Jr. and family members. AFC will have to spin off the AM and FM to comply with the FCC's one-to-a-market rule. WTOC is on 1290 kHz with 5 kW full time, WTOC-FM is on 94.1 MHz with 80 kW and antenna height 370 feet above average terrain. WTOC-TV is a CBS affiliate on channel 11 with 316 kW visual, 31.6 kW aural and antenna 1,531 feet above average terrain. Blackburn & Co. acted as broker.

Conference committee works out conflicts in House-Senate versions, cuts matching ratio to $2/$1, drops some items that bothered PBS

Legislation extending federal funding for the Corporation for Public Broadcasting through 1983 made its way through a House-Senate conference committee last Wednesday and is ready for final passage in Congress this week.

The compromise that would grant CPB the more liberal funding levels of the House version. The chief gain for CPB was the lowering from the present $2.50 to $2 of the amount CPB must raise for a matching federal dollar in 1981-83.

The authors of the House bill had argued for the lower match (the Senate proposed $2.25/$1). The bill authorizes $180 million for CPB in 1981, $200 million in 1982 and $220 million in 1983.

The new compromise bill modified a House provision to say that a "substantial amount" of the funds for building and expanding public broadcasting facilities—$40 million annually from 1981 through 1983—is to go to radio stations. The report accompanying the bill will indicate that something in the neighborhood of 25% would be acceptable.

It also requires a "significant" portion of CPB's funds to be spent on program production, and a "substantial" amount of that to go specifically for independent producers. The report will make it clear that by "independent," the bill does not mean established Hollywood producers, but rather "small" operators not nationally known.

The bill does not contain the House's provision eliminating the current ban on editorializing by public stations. At the Senate's insistence, the ban will remain. In its development, the bill had generated considerable opposition from the Public Broadcasting Service, which, after the House's version gelled, complained bitterly that Congress was trying to interfere too much in public broadcasting. But PBS was all smiles last week. "We're very pleased with the outcome," said PBS President Lawrence Grossman.

The most significant items that were dropped was a House provision establishing new criteria for CPB to use in deciding how to dole out the "incentive" portion of community service grants, the funds that go directly to stations. PBS complained they were "subjective"; the conference committee took them out of the bill and inserted them as guidelines in the accompanying report.

PBS had also complained about provisions requiring stations to establish "representative" community advisory boards. What is "representative?" PBS asked. The conference committee directed the staff to say in the report that stations need only make a "good faith effort" to reflect community needs and interests in their boards.

The committee altered another controversial provision by grandfathering salaries of the highest paid CPB and PBS officials. All public broadcasting officials would be limited to cabinet-level salaries ($66,000) under the bill, but PBS President Grossman and Vice Chairman Hartford Gunn may continue to draw their present salaries, reported at $69,350. And incoming CPB President Robben Fleming will be permitted to draw an annual $70,000, reportedly the same amount paid past President Henry Loomis.
Happy birthday to you.
Happy birthday to you.
Happy birthday dear trademark.
Happy birthday to you.
"Programming is a reflection of the society we live in."

A. R. Van Cantfort, program manager of WSB-TV, Atlanta, Ga., President, National Association of Television Program Executives, looks at programming from the point of view of a man who knows both to and for the local audience.

"The program director has got to know his community. If he is a responsible broadcaster, he will. We have a tremendously loyal following, and we earn it. We have a community ascertainment program. Department heads go out and interview community leaders for an hour, one-on-one. They talk about the problems of the community. Every two weeks we have a community affairs luncheon with a group representing a particular problem area. We discuss their problems and how we can help. I make a speech or talk with some community leader about twice a week. There is always feedback. I always wind up with a question-and-answer period. I read every piece of mail that comes to me. The first thing every morning I read the call sheet—it lists every call that comes in complaining about a program. These are some of the ways I stay in touch with the community.

"I look at programming as pretty much a reflection of the society we are in. What we are depicting is what is happening. If you are upset by the amount of violence on television, you really ought to be upset about what is happening in society, and not necessarily blame the messenger. Parents have their responsibility not to just automatically say, 'Go watch TV.' Of course, the broadcasters have responsibility, too. And they have to accept that responsibility. Ours is the only industry in the world that has such a strict voluntary code.

"As long as I am program director, we will have a live local show. The people in Atlanta know they can get on our station. We are here to serve the community.

"I won't buy the premise there is nothing good on television. Nowadays the snob thing to say is, 'My kids don't even know TV exists.' I have to say you are wrong, because your kids are missing a lot of good things.

"Film will never go out of our business. It is the staple. We use both film and tape. Much of the choice has to do with which equipment is available. We might wind up on a given day with everything on film, or everything on tape. If we are going to go into the mountains, I am going to take film because it is more reliable. I don't have to worry about power or electricity or the batteries running down.

"If I were just starting out, I would look into the feature area. I would think of becoming a consumer reporter, an ecology reporter or a specialty reporter.

You can't just say, 'I want to work in TV.' Too many people want the same thing. You have to develop a skill or a specialty.

"If the local broadcaster doesn't make his service important to the community, and himself an asset to the community, somewhere along the line someone is apt to ask, 'What do we need him for?' The local broadcaster has got to stay involved with local programming. We need more choices, and we need to encourage the people willing to take chances."

In our publication, "Teck," leading broadcast industry professionals talk about their experience, and we tell you about our latest technical and product developments. If you would like to be on our mailing list, write Eastman Kodak Company, Dept. 640, 343 State Street, Rochester, New York 14650.

Kodak...Official motion picture consultant to the 1980 Olympic Winter Games.
WGN-TV, KTVU may be the next super stations

Satellite firms apply to FCC for permission to send out signals of two independents

Two more major independent television stations will be available to cable systems via satellite by the end of the year. They are WGN-TV Chicago and KTVU(TV) Oakland, Calif., next month.

Edward L. Taylor, president of two companies, said the signals of the two stations will be transmitted via the RCA Satcom I satellite to cable systems around the country. Southern Satellite currently distributes WTCG(TV) Atlanta, one of the pioneers in satellite programing.

And another comparative case goes back to FCC

Court remands WOR-TV decision, tells commission to reconsider challenger's financial qualifications

Multi-State Communications Inc., which the FCC had knocked out of a contest with RKO General Inc. for the channel 9 frequency on which RKO's WOR-TV New York operates, has asked for permission to continue the contest.

Judge Tuttle noted that Mr. Jones had "expressed the bank's continuing willingness to lend up to $4 million, as stated in the letter. When asked if the letter was 'a viable, subsisting letter' which the bank regarded as 'outstanding to Multi-State Communications,' Mr. Jones had replied, 'Yes, sir.'"

The commission "erred in construing the import of Mr. Jones's testimony," Judge Tuttle said, adding, "that letter should have been accepted by the commission as satisfying its requirement of reasonable assurance that the loan would be available."

Accordingly, he said the case was being sent back to the commission for "further proceedings in which the petitioner is not regarded as disqualified for financial reasons on the basis of the unavailability of the loan."

The third member of the panel, Judge Bazelion, concurred, but said his separate statement did not indicate disagreement with the conclusion reached by the majority. He said he would remand the case for reconsideration of a second financial commitment which Multi-State presented but which the commission did not accept.

FCC show and tell

The FCC last week announced that its Consumer Assistance Office will hold a series of "public participation workshops" in cities across the country, beginning in Chicago on Oct. 18 ("Closed Circuit," Oct. 2).

The workshops, part of what the commission describes as an effort to foster "thoughtful, informed and effective participation by the public in all FCC proceedings," will concentrate on the skills and mechanics required to participate in rulemaking proceedings. The inquiry into children's television programming and advertising practices will serve as a case study.

Thus far, plans are set for five one-day workshops. After Chicago, they will be held in Los Angeles Oct. 21 and 23, San Francisco Oct. 25 and Atlanta Nov. 6. Another workshop is planned for an East Coast city, but the location and time have not yet been set.

The workshops will be open to the public on a first-come, first-served basis, with a maximum of 100 participants.

The schedule is being worked out in a manner to permit Susan Greene, head of the commission's Children's Television Task Force, to participate in some National Association of Broadcasters regional fall conferences, as well as the workshops.

Among the NAB conferences she is expected to attend are those in Chicago Oct. 19-20 and San Francisco Oct. 26-27.

Conditional OK to KTVU

FCC renews license of Cox's Oakland TV and rejects petition by local group; it's hinged on outcome of court suit charging discrimination

The FCC last week conditionally renewed the license of Cox Broadcasting Co.'s KTVU(TV) Oakland, Calif., and, in the process, rejected a petition to deny filed by a local citizen group. Marcus Garvey Wilcher, on behalf of the Community Coalition for Media Change, had charged that the station discriminated against blacks in its employment and promotion practices, and that it "avoided black programming."

The commission said it found no basis for the charge of discrimination. However, an employment discrimination complaint by a station employee is pending in court, and the commission said it would condition KTVU's renewal on any action deemed appropriate on the outcome of the suit.

As for the programming issue, the commission said the coalition had failed to maintain its burden of showing that the station's over-all programming could not
Another first from the first name in broadcast automation:

First to take house calls

Your own personal rep is not only available by both computer and phone, but also available around the clock. You can call him at home in the middle of the night if you have an urgent problem. BIAS was first to offer this kind of super-personal service.

BIAS was also first to develop an on-line real-time computer system for broadcasting. And a flock of other firsts followed. First to offer your choice of computer services—as much or as little as you want—and what you take goes together because our systems are compatible. First with power backup system. First to offer scheduled training seminars. And more firsts are on the way. Is it any wonder so many stations call BIAS first? Call us today. Call Bill Boyce at 901-345-3544. have met the needs and interests of the people, including blacks, within the service area. What's more, the commission said it has consistently refused to require licensees to segregate their programming according to the racial make-up of the service area.

The dust is finally settling at KRLA

Agreement among seven competing applicants for Pasadena facility would give 40% to Western now, rest in three years for up to $9 million

The 14-year-old fight over the facilities of KRLA(AM) Pasadena, Calif., next door to Los Angeles, may be about over. The remaining seven parties—out of the 19 who had originally filed for the grant—have reached a merger agreement (BROADCASTING, Oct. 2). The agreement is expected to be filed with the FCC this week, but it will be another six weeks before necessary background documents and a request for commission approval will be submitted. Approval of several of the applicants' boards also is required.

But Western Broadcasting, which is headed by Bob Hope and Art Linkletter, would be the ultimate winner. It would become the 40%—and dominant—owner of the merged company initially, and in three years it would purchase the remaining 60% for a maximum of $9 million.

The merger agreement was reached in response to a suggestion from the administrative law judge that the parties in the case attempt to resolve the issue among themselves. That suggestion came after the commission in May, acting on an order of the U.S. Court of Appeals in Washington, vacated a grant that had made for Western, and sent the case back to the administrative law judge for a new round of hearings (BROADCASTING, May 15).

The parties to the agreement say they feel it is "in the best public interest, as well as their own private interest, to bring this proceeding to a close, so that a licensee" can be chosen to operate on the KRLA frequency. KRLA, which operates on 1110 kHz, with 50 kw day and 10 kw night, had originally been licensed to Eleven Ten Broadcasting Corp., owned by Donald R. Cooke. It lost its license after it was found to have broadcast fraudulent contests and engaged in log-tampering.

During the long comparative hearing, the station has been operated by a non-profit group, Oak Knoll Broadcasting Corp., which had pledged to use its profits for educational and other charitable causes. However, Oak Knoll faces the loss of its right to operate the station, as a result of charges it has failed to keep that promise (BROADCASTING, Sept. 19, 1977, et seq.).

Of the six applicants remaining besides Western, two would not become part of the merged corporation. Pacific Fine Music would dismiss its application and, with commission approval, be paid up to $100,000 for its expenses in prosecuting its application (One of Pacific's principals, A. Arthur Crawford, has died.)

The other applicant that would drop out is Orange Radio Inc., which is owned by some 15 residents of the area. It faces a character qualification issue, and if it is resolved in Orange's favor, the merged corporation would reimburse it for up to $1 million of its expenses, subject to commission approval. Besides legal fees, Orange had expenses in connection with the purchase of the former transmitter site.

The parties who would become part owners with Western of the station and the percentage of their interest are Voice in Pasadena (owned by some 50 Californians including Cal Smith, former principal in KLAC(AM) Los Angeles, and Carl Haverlin, retired president of Broadcast Music Inc.), 25%; Goodson-Todman Broadcasting Inc. (whose principals are the producer, Mark Goodson and Bill Todman), 15%; Pasadena Broadcasting Corp. (principally owned by the Tribune Publishing Co., licensee of KNTM(AM)-KBQM(FM) Tacoma, Wash., and publisher of the Tacoma News-Tribune), 15%; and Charles W. Jobbins, an individual, 5%.

Under the agreement Western, at the end of the first three years of operation, would purchase the 60% of stock held by the four other applicants at a price based on what appraisers determine to be the fair market value. But Western's maximum obligation would be $9 million.

Mr. Jobbins, who had proposed to operate KRLA as a daytime-only station, with 1 kw power, at Newport, Calif., about 50 miles south of Pasadena, won more than the right to 5% of the stock in the merged corporation. He would also be reimbursed up to $150,000 of allowable expenses, and would be retained by the station for three years as manager, at a salary "commensurate with the position and services rendered"—$30,000 annually is the figure "under good faith consideration."

Mr. Jobbins, as well as Orange, would not be required to provide any of the initial investment money—for capital, engineering and reimbursement and operational expenses. The total is estimated at almost vide 42.1%; Voice, 26.3%; Goodson-Todman, 15.8%, and Pasadena; 15.8%. Other matters, including acquisition of the KRLA transmitter site, now owned by Teleprompter Corp. (whose chairman is Jack Kent Cooke, brother of Donald R. Cooke), and the hearing of studio facilities are to be dealt with separately.

New, old owners feud over Fort Wayne outlets

Fort Wayne Radio, licensee of WFWR(AM)-WCMX(FM) Fort Wayne, Ind., is seeking $500,000 in actual and punitive damages from the former owner of the stations for what the licensee contends was the illegal repossession of station equipment which resulted in the stations going silent.

Fort Wayne Radio contends that the previous licensee, Fort Wayne Broadcasting Co. (WCMP(AM)-WXAX(FM) Elkhart, Ind.), owned by Clarence C. Moore, had no right to the station and dropped service. Fort Wayne Radio, which purchased the stations for $630,000, owes approximately $500,000 to the former owner and said it intends to sell the properties to repay the debt.

Fort Wayne Broadcasting asserts that the power to repossess is included in the sales contract and that when five persons entered the studios on Sept. 29 and partially dismantled transmitter equipment they were within their legal rights. The former owner has petitioned to place the stations in receivership.

Fort Wayne Radio has filed a counterpetition which, in addition to damage claims, asks for a temporary injunction to keep the former owner from "harassing" or "interfering with operations and which characterizes the former owner's actions in the incident as "malicious, wanton and reckless."

According to Terry Bobzien, general manager of the stations, replacement parts for the transmitters were found and the AM returned to the air last Monday morning, the FM Tuesday afternoon.

The case is being heard in Allen county circuit court.

FCC's books to get a going-over

Hollings asks for, and will get, GAO review of commission's operations; senator says Ferris 'strongly endorsed' his request

The General Accounting Office, at the request of Senate Communications Subcommittee Chairman Ernest Hollings (D-S.C.), will undertake a "full scale review" of the FCC.

In a letter to Comptroller General Elmer Staats, Senator Hollings referred to "recurrent and important questions relating to the activities of the FCC that prompted him to call for a review, and also pointed out its timeliness in light of the House Communications Subcommittee's proposals to restructure the commission in the Communications Act rewrite. The senator asked that the examination include the commission's organization; development of policy; long-term planning efforts, "and day-to-day operations, direction, procedures, control and internal coordination."

A legislator for the senator said last week that Mr. Hollings has no specific "axe to grind," but has found in his dealings with the FCC that "all is not peaches and cream." The spokesman referred to a deficiency in the commission's spectrum monitoring as one cause for Mr. Hollings' concern. In his letter, Mr. Hollings said the request for GAO review is "strongly endorsed" by FCC Chairman Charles Ferris. Mr. Hollings asked the GAO to finish
We want you to know the new WIND Radio. News and talk covering Chicago and the world. All news mornings and late afternoons. Daytime and evening telephone-talk with Chicago's favorite talk personalities. We want you to know Chicago's news and talk station, WIND.
the review by early spring 1979 so the Senate will be able to use them in considering the commission's fiscal 1980 appropriation. Aside from being chairman of the Communications Subcommittee, Mr. Hollings is chairman of the Appropriations Subcommittee on State, Justice, Commerce and the Judiciary, which has jurisdiction over the FCC's budget.

The GAO, meantime, is winding up another study initiated of the FCC's broadcasting regulation. Begun in August of last year, that report is due to be completed in December, a GAO staff member said last week.

Springfield UHF granted despite crossownership

FCC waives rule to allow FM's owners to participate in new television grant

The FCC has granted an application for a UHF station in Springfield, Ill., even though there will be some crossownership between the station licensee and the owners of an FM in Springfield. The commission said the public-interest benefits resulting from the grant warrant the departure from the one-to-a-market policy.

The grant, for a station on channel 55, went to Windmill Broadcasting Co. Four individuals, who own 13.34% of Windmill, own 100% of WFMB(FM) Springfield.

The commission, noting that the one-to-a-market restrictions are applied to UHF applications on a case-by-case basis, said the grant would serve the public interest.

It said the participation of the four individuals—Harold J. Hoskins, R.W. Deffenuaugh, W.F. Wingert and J.W. Johnson—was essential to the success of the UHF proposal; they are guaranteeing two bank loans and investing cash in the proposed UHF, and the bank is lending money in part because of the broadcast experience of two of the individuals who will manage the proposed station.

The commission also noted that the grant would provide Springfield with its first independent television station, a second local television station, and would advance the commission's policy of fostering UHF development. The channel has lain fallow since 1965.

FCC tables decision on new pay station

It wants to study over-all record of service to state before acting on application of Spanish-formatted WNJU-TV

The FCC has postponed action on a proposal by Columbia Pictures Industries' WNJU-TV (ch. 47) Linden, N.J., for permission to broadcast pay television programming. The commissioners want to consider the matter in connection with the review of the service that stations in New York City and Philadelphia, as well as New Jersey, are providing the residents of that state. The review is expected this month.

The subscription television franchisee under the proposal is National Subscription Television-New York Inc., a California partnership of Oak Television Inc. and Chartwell Communications Group. The same two parties own KBSC-TV Corona-Los Angeles, a pay-television station.

The proposal could raise a format issue. WNJU-TV now broadcasts a Spanish-language format, and the proposal pending before the commission would substitute pay television programming for much of the Spanish-language material now being aired in prime time.

FCC Chairman Charles D. Ferris, in a discussion of the matter, at the commission meeting on Sept. 22, expressed concern about the effect of the proposal on two million Spanish-speaking persons in the New York area. "We're making a judgment here to let a Spanish-speaking station go to pay television," he said.

Deputy Broadcast Bureau Chief Martin Levy noted that WNJU-TV is not the only Spanish-language station in the area. WXTV-VTV Paterson, N.J., which is owned by Spanish International Communications Corp., is a full-time Spanish-language station. He also said WNJU-TV would be required to carry some Spanish-language programming in prime time.

Chairman Ferris, however, suggested that considering the matter at the present time is premature. He said the commission should defer action until it reviews the question of television service to New Jersey generally.

TV and handicapped on L.A. conference agenda

Four organizations will sponsor an Oct. 14-15 Los Angeles conference on the human and legal rights of people with disabilities, focusing on television.

The initiating groups, the American Civil Liberties Union, Barristers of the Beverly Hills Bar Association, Beverly Hills Bar Association and Western Law Center for the Handicapped, plan two workshops dealing with legal, business and programming obligations of television licensees.

The legal panel will be led by the conference co-chairman, Stanley Fleishman, who recently filed a petition with the FCC charging failure to implement the "Civil Rights Act for the Handicapped," and Charles Firestone, head of a UCLA law school program on communications law and policy. Another panelist is Abe Gutfried, an attorney known for his efforts for television access for the deaf.

Other workshops involve legal obligations of equal employment for the disabled and the veteran; business responsibility under federal and state statutes, labor unions and people with disabilities and legal issues involving sexuality and the disabled.

Keynote speaker will be Max Cleland, administrator of the Veterans Administration, who is disabled.

FM growth continues, but slows down in the bigger markets

In the top 10, rate is up about 5% since 1975; but in some areas surveyed, gain is as much as 21%

FM radio is still gaining listenership ground on AM, but the trend may be slowing in the nation's larger markets, according to the results of a study released by Arbitron Radio.

The study compared FM listening in the top 10 markets to that in 10 markets Arbitron has previously used to represent a cross-section of the U.S. audience—Detroit; Minneapolis-St. Paul; Kansas City, Mo.; Orlando, Fla.; Oklahoma City; Raleigh-Durham, N.C.; Davenport, Iowa; Rock Island-Moline, Ill.; San Francisco; San Antonio, Tex., and Norfolk-Portsmouth-Newport News-Hampton, Va.

According to Arbitron, the average FM market share for those markets increased 11% in the last year—from 33.9% in 1975 to 39.8% in 1977 to 44% in 1978. But in the top 10 markets, FM has picked up only 5%—from 36.4% in 1975 to 39.8% in 1977 to 44.0% in 1978, Arbitron said.

Among the 10 markets chosen for their representative geographic and population distribution, four had more FM than AM listeners: Detroit, Oklahoma City, Orlando and Norfolk-Portsmouth-Newport News-Hampton. Markets in which FM listening increased by 10% or more were Orlando, which increased its FM audience by 21%, Minneapolis-St. Paul, up 16%, Raleigh-Durham, N.C., and Norfolk-Portsmouth-Newport News-Hampton, Va., both up 15%, and Kansas City, Mo., up 10%.

Arbitron said that of the 10 markets analyzed, Oklahoma City had the highest FM market share, 55%, while Davenport-Rock Island-Moline had the lowest with a 31.8%.

NAB pushes to rescue

The National Association of Broadcasters has gone to the aid of three licensees in Alaska whose 13 applications are under attack by a local citizen group (BROADCASTING, Aug. 7). The NAB, in a friend-of-the-court brief, has urged the FCC to give "special weight" to a brief filed in support of the stations by Friends of Alaska's Broadcasters, which says it expresses support of 4,000 Alaskan citizens for the three licensees—Midnight Sun Broad-
and be next year's #1 kid show

To screen a complete show, contact John Claster or Ken Gelbard, Claster Television Productions, 660 Kenilworth Drive, Towson, Maryland 21204. Telephone: (301) 825-4576 • JOIN THE STAR FORCE
casters Inc., Northern Television Inc. and Central Alaska Broadcasting Inc.

The NAB said it shares Friends' concern that the petitioner—Alaskans for Better Media—is abusing commission processes. The NAB noted Friends' finding that ABM represents a "very tiny group" and is not representative of the stations' audience, and said that it filed petitions only after the licensees rejected its demands, which included payment of money and "abdication of a substantial degree of control over station programming policies."

Keep up the good work

Broadcast Rating Council goes on record praising Arbitron for its tough stand against diary distortion promotions

The Broadcast Rating Council announced last week that it had adopted a policy resolution commending Arbitron for its stand against diary-distortion promotions and urging it to enforce its rules with "rigid and consistent application."

In this and other actions the council was following recommendations submitted by the BRC radio committee (BROADCASTING, Sept. 17). The council held—as the committee had recommended—that "such factors as ignorance of Arbitron's rating distortion policy, voluntary after-the-fact discontinuance of distortion activity or cooperation in disclosure should not be considered as mitigating circumstances in the application of rating distortion policies."

The council also asked Arbitron to provide as much guidance as possible to stations seeking advice on proposed activities that might conflict with Arbitron rules. In another area the council followed the radio committee's lead and went on record opposing "any attempt by stations to exhort the public to cooperate with station audience measurement services whether over the air or by other means," and recommended that syndicated rating services discourage such activities because of their "possible biasing effects."

Hugh M. Bleville Jr., executive director of the council, reported that four new radio services had applied for council accreditation: Arbitron's Intermediate Market Service, Burke Broadcast Research, RAM Research and Audits & Surveys' A&S/TRAC-7 (BROADCASTING, Sept. 4). Mr. Bleville estimated that accreditation procedures would take at least six months.

Simmons to use TRAC-7

The Simmons Market Research Bureau has agreed to use the radio-sponsored TRAC-7 research questionnaire in conducting its 1978-79 Simmons Media Study, the Radio Advertising Bureau has announced.

The decision, which followed conferences between Simmons and RAB officials, is regarded as significantly since Simmons is now the only multimedia service of its kind and, in the past, has tended to show radio audiences at much lower levels than other services ("Closed Circuit," Aug. 28).

"Adaptation of the TRAC-7 interview by Simmons means that a new radio questionnaire has been implemented in the spring 1978 radio field work for the '78-'79 study," RAB President Miles David said. "About the first seminar the sample has been tabulated, and initial data is reflecting listening levels in line with established industry norms."

Richard Montesano, RAB senior vice president for marketing and research, described Simmons's decision as "important to all segments of the radio industry, since Simmons radio reports include information for the over-all medium, network audiences and station formats."

"It is also likely that Simmons will be measuring individual station audiences approximately once a year within a number of major markets in the near future. We've also suggested to Simmons that an industry advisory group be instituted to insure further improvements in their radio audience measurement. The present Simmons radio methodology involves use of the TRAC-7 questionnaire for two week-day measurement days with the same respondents and employs a mathematical formula to extend the data to Monday-Friday curves." Simmons Market Research Bureau was formed several weeks ago by the merger of W.R. Simmons Associates and Axiom Market Reserach. It is now the only national syndicated study providing media-mix and product-usage data to agencies, advertisers and media. TRAC-7 was developed in a $100,000 feasibility study sponsored by RAB and the National Association of Broadcasters and is available for use by all researchers.

FTC launches 'how-to' course to increase public involvement in rulemakings

The first of what the Federal Trade Commission hopes to be a series of seminars on how to take part in its rulemaking proceedings was held in Chicago last week.

Isaiah T. Creswell, head of the FTC's Federal-State Consumer Relations office, said the first seminar, designed by the Center for Public Representation of Madison, Wis., cost about $10,000. He said he has asked for funds—at about $5,000 each—for six to seven seminars during the coming fiscal year beginning this week.

Through these programs, the agency hopes to increase the number and effectiveness and broaden the geographical distribution of public participants in rulemakings. The FTC emphasized its reimbursement program, which provides up to $500,000 a year to groups and individuals who could otherwise not afford to participate in rulemakings.

Don't do it

Arbitron asks Richmond stations not to go ahead with plan to air spots asking diary holders to be diligent and prompt

Arbitron Radio has moved to defer if not block a plan by Richmond, Va., broadcasters to carry announcements urging Arbitron Radio diary keepers in that market to fill out their diaries completely and accurately and return them promptly.

Arbitron officials said they feared such a venture would lessen the Arbitron rating reports' credibility and asked the stations to hold off as much as possible until Arbitron can evaluate results of a similar test already conducted in San Diego (BROADCASTING, July 17).

They acted in response to a letter from G. D. Pearson, station manager of WRNL(AM) Richmond, reporting that the Greater Richmond Broadcasters Association had adopted a resolution endorsing participation in such a project during the October-November rating period by "those stations who wish to participate."

"It is our feeling," Mr. Pearson wrote, "that many people being surveyed in Richmond are not recording their listening habits completely and accurately.

"The spot would be recorded by a voice not working at a Richmond radio station and would not mention any station's call letters or Arbitron by name."

Mr. Pearson also noted that San Diego broadcasters had conducted a similar promotion "without objection by Arbitron," and asked for Arbitron's comments.

"We are recommending and requesting that the broadcasters do not engage in such on-air announcements during the October-November survey," Michael Levine, Arbitron's mid-Atlantic manager for radio station sales, replied. He said the San Diego test was a special experiment conducted during the October survey period to determine whether survey response rates and listening levels would be affected. The results, he said, have not been tabulated.

"Instead of using valuable commercial time," Mr. Levine said, "wait for the test results so that Arbitron subscribers throughout the country can see if it's worth it."

Arbitron officials said the results should be completed this month.

Mr. Levine also told the Richmond group that the Arbitron Radio Advisory Council had surveyed subscribers and found that 48.5% of the respondents felt that Arbitron should not permit such promotions while 46.3% favored them.

In an unrelated development, the Broadcast Rating Council has adopted a policy resolution opposing "any attempt by stations to exhort the public to cooperate with station audience measurement services whether over the air or by other means." The BRC recommended that syndicated rating services, such as Arbitron, discourage such activities because of their "possible biasing effects."
THE NEW NEWS
IS GOOD NEWS!

Dr. Norman Vincent Peale's new radio series, The American Character, proves that good news on the air is good news for you.

The American Character is a series of 90-second daily reports on acts of courage, compassion and good neighborliness. Neither political nor religious, its purpose is simply to reveal what's good about Americans.

More good news for you is that it's offered without cost on an exclusive basis in the 357 metro markets. And in more than half these markets, audiences are already enthusiastically tuning in.

The American Character is funded in the public interest by the International Telephone and Telegraph Corp., and is logged 80 seconds, public affairs; 10 seconds, commercial (to satisfy FCC requirements.)

Your listeners have never been more eager for good news than now. Let them hear it. If your market is uncovered in our list, reserve your exclusive two-week option today. Call Gloria Scott collect for details and demo: (212) 725-2662.

Infocom Broadcast Services, Inc. 71 Park Avenue, New York, N.Y. 10016.
Church and state differences to air at FCC hearing

Commission has set inquiry for renewal application of Faith Center's KHOF-TV on ground it wouldn't supply financial data; Faith says as a church it shouldn't be forced to disclose such things.

Differences between the FCC and Faith Center Church Inc., a California-based religious broadcaster and programer, will be brought out in a hearing.

The center and the commission have been at odds over FCC attempts to investigate various financial operations of the religious broadcaster. This summer, the two appeared to come to something of an understanding when Faith Center agreed to meet with FCC investigators (BROADCASTING, Aug. 14).

However, last week the commission set for hearing the application of Faith Center for renewal of its license for KHOF-TV San Bernardino, Calif., one of three television stations (in addition to a radio station) it owns. The FCC said information before it raised serious questions as to whether Faith Center possessed the qualifications to be or remain the licensee of KHOF-TV.

Among issues to be addressed at the hearing are facts and circumstances surrounding Faith Center's failure to permit commission access to certain licensee books, records and employees; whether Faith Center failed to submit information requested by a commission letter in June (which included initial requests for information), and whether over-the-air fundraising broadcasts violated federal wire fraud statutes.

If denial of the license is not warranted, the FCC must determine whether a forfeiture in the amount of more than $20,000 is warranted.

In the June 15 letter, the FCC again asked for—with some exceptions—financial and other materials it has requested from Faith Center since October of last year. Faith Center has steadfastly maintained that it would cooperate with the FCC where broadcast and church activities are separate, but that the FCC had no business involving itself with the church's receipt and disbursement of religious offerings.

Ohio station owner in battle for control

A 66-year-old Westerville, Ohio, broadcaster, engaged in a dispute over his access to a radio station he owns (BROADCASTING, Jan. 23), has physically taken the station off the air twice in the last year.

The first time, Dec. 14 of last year, William (Wild Bill) Bates, reacting to a preliminary court order restraining him from having anything to do with operation of WBBY-FM Westerville, seized control of the station and held Delaware county sheriff's deputies at bay with a baseball bat. Somewhere, in the process, he knocked the station off the air for 20 minutes.

Then, on Aug. 14, beginning at 1:05 a.m., Mr. Bates climbed 360 feet up the station's broadcast tower and removed a two-inch coupling device, taking the station off the air from about 2 a.m. to 10 a.m.

Mr. Bates built the station about 10 years ago and claims outside interests are trying to take it over. One of his sons is now running the station. Mid-Ohio Communications Inc., licensee of the station, went to court last week to permanently enjoinder Mr. Bates from an association with the station.

Among other findings, the judge issuing the temporary restraining order held that Mr. Bates was in need of medical attention for problems that interfered with the station operation.

Media Briefs

Penalized. FCC has notified WHNE(AM) Portsmouth, Va., of apparent liability for forfeiture of $5,000 for misleading public as to location of "buried treasure" during station contest. KIFW-AM-TV Sitka, Alaska, was fined $4,000 for "repeated or willfull falsification" of operating logs of KIFW-TV and logging and technical violations at both stations.

Primer reminder. FCC's director of consumer assistance, Belle B. O'Brien, has received word number of broadcasters have not received copies of political broadcasting primer—"The Law of Political Broadcasting and Cablecasting"—that was to have been distributed to all broadcast licensees in August. Those wanting copies should contact Consumer Assistance Office of FCC's Fairness/Political Broadcasting Branch. Address: 1919 M Street N.W., Washington 20554.

Won't give up. WADECO Inc., turned down by FCC in bid to supplant Belo Broadcasting Corp. as licensee of channel 8 (WFAA-TV) Dallas (BROADCASTING, Aug. 29), has appealed that decision to U.S. Court of Appeals in Washington.

Fancy food. Metromedia Inc., New York, and Chemed Corp., Cincinnati, have reached agreement in principle in which Metromedia will acquire Figi's, subsidiary active in sale of food delicacies, for about $30 million. Figi's had net income of $1.8 million on sales of $23.5 million in 1977.

Snag. Sonderling Broadcasting Corp., Miami, says that investment banking firm it had retained to advise on proposed merger with Viacom International Inc., New York, has concluded that financial terms should be revised in favor of Sonderling. Last June, parties signed definitive agreement for transaction estimated at $28 million (BROADCASTING, June 19). Sonderling spokesman said agreement signed was not final and pending approval of stockholders and FCC.

Gloomy forecast by Aspen people for ability of government to deal with changes in communications

A task force of specialists assembled by the Aspen Institute Project on Communications Policy to explore the major communications issues that are expected to emerge over the next two decades and the institutional capacities for dealing with them has produced a 526-page book that raises questions about the ability, let alone the will, of policymakers to keep up with technologies.

"Communications for Tomorrow: Policy Perspectives for the 1980's," contains, for instance, a chapter by Marc U. Porat, executive director of the institute's Program on Communications and Society, which maintains that information activities—broadly defined—are inefficient at best and necessarily politically feasible, and optical fiber transmission, among them.

But what of the ability of policymaking institutions to deal with the issues of the "information society"? Glen O. Robinson, the former FCC commissioner who edited the book and wrote three of its 15 chapters, is not particularly sanguine about the ability of the FCC.

Mr. Robinson, who now teaches law at the University of Virginia and has been named to head the U.S. delegation to the World Administrative Radio Conference next year, feels the commission staff is overloaded with lawyers and engineers and is lacking in economists. But he also feels the commission is making poor use of its resources—some regulatory chores (studying broadcast license renewal or issuing cable certificates of compliance, for instance) might be left undone in favor of more vigorous efforts in other areas, such as studying AT&T's interstate rate structure.

One fundamental problem, according to
Mr. Robinson, is the method used to select members of the commission, a method in which political criteria rather than ability and experience, he said, often predominate. However, while he feels it unlikely there will be any "radical transformation in public or political attitudes toward regulatory agencies in general or the FCC in particular" in the near future, he offers a suggestion for improving the appointments process: Establish a public selection and screening process for agency appointments. He said the review of candidates for federal judicial appointments by the American Bar Association's Committee on the Judiciary provides a precedent for such a mechanism.

Whatever the commission's problems in doing its job, the courts apparently do not constitute a major one, in Mr. Robinson's view. In a chapter on the judiciary, Mr. Robinson says it is difficult to find reliable evidence to justify uneasiness about the courts' role in communications law—uneasiness generated by the belief the courts are either too active, or not active enough. Mr. Robinson studied the rates at which appeals courts and the U.S. Supreme Court affirmed or reversed the commission during two seven-year periods—1950-1956 and 1970-1976— and found that the "vast majority of cases fall quite close to the center of what one would predict for the judicial pendulum."

Beyond the FCC, the book's authors found fault with the manner in which the Congress and the executive function in the area of communications policy.

Ernest Gelhorn, dean of the University of Washington School of Law, notes that Congress is attempting to rewrite basic communications law—the Communications Act of 1934. But he says that "until now, Congress has operated at only a secondary level in communications policy...[It] has failed to write basic communications policy or to demand more qualified FCC appointments."

And Forrest Chisman, director of plans and policy coordination of the National Telecommunications and Information Administration, suggests that the creation of that agency as a replacement for the old White House Office of Telecommunications Policy does not satisfy what he sees as the nation's need for strong executive leadership. There is little integration among executive agencies on such matters as the Communications Act rewrite, various "hot" FCC proceedings, national security and emergency preparedness and international policy development. What is needed, he says, is a mechanism to coordinate communications research and development.

But the danger of carrying the existing regulatory mindset over to the day when, as seems possible, electronic technology will gradually replace the mechanical technology that produces printed pages is pointed out by several of the authors.

Bruce Owen, professor of economics at Stanford University, says "the fundamental question" is whether "the electronification of print will result in greater or lesser freedom of expression."

One household can hurt you more in the courtroom than it ever could in the ratings.

As a broadcaster you worry about each household where ratings are concerned. But let one household take you to court with a libel suit and you may have something to really worry about. A typical settlement today could cripple your business.

That's why you need Broadcasters Libel Insurance protection from ERC—especially in this age of jumbo liability suits. We've been providing libel and copyright coverage for more than 40 years and today our policy doesn't have a single exclusion. You're even covered for punitive damages.

Although the incidence of claims is increasing our coverage continues to be comparatively inexpensive. But regardless of cost, not to have the coverage when you need it could be a real catastrophe.

If you (or your insurance representative) will mail us this coupon, we'll respond by mail with all the details. Do it today. It's a policy a broadcaster can't afford to be without.

Broadcasters Libel, Department 2
Employers Reinsurance Corporation

Kelly Segars who owns WVOM(AM)-WTIB(FM) Iuka, Miss. Buyer is principally owned by Robert M. Williamson, president, who is general manager of WNLA-AM-FM Indianaola, Miss. He has no other broadcast interests. WDSK is 1 kw daytimer on 1410 kHz. WDIL in on 92.7 mhz with 3 kw and antenna 225 feet above average terrain. Broker: Chapman Associates.

- Other station sales proposed last week include: KHEN-AM-FM Henryetta, Ohio, and WMIM(AM) Mount Carmel, Pa. (see page 62).

Approved

- WKOW-TV Madison, WIXY-TV La Crosse and WAOW-TV Wausau, all Wisconsin. Sold by Horizons Communications Corp. to Liberty Communications Inc. for $8 million. Seller is principally owned by Jerome R. Feniger, president; Edward W. Wood; William W. Mulvey and Tipton (Tipsey Stringer) Huntley, widow of Chet Huntley, who was NBC News correspondent. Horizon retains KRE-AM-FM Berkeley, Calif., and WALK-AM-FM Patchogue and WRI(AM) Riverhead, both New York. Buyer is owned by Durwood L. Boyles and Donald E. Tykeson, who own KZ-AM Eugene, Ore. WKOW-TV is on channel 27 with 871 kw visual, 174 kw aural and antenna 1,250 feet above average terrain. WIXY-TV is on channel 19 with 132.1 kw visual, 26.4 kw aural and antenna 930 feet above average terrain. WAOW-TV is on channel 9 with 204 kw visual, 20.4 kw aural and antenna 990 feet above average terrain. All are ABC affiliates.

- KDKB-AM-FM Mesa-Phoenix, Ariz.; sold by Dwight-Karma Broadcasting Co. to Sandusky (Ohio) Newspapers Inc. for $4 million. Seller is subsidiary of Natural Broadcasting System Ltd. which is partnership of C. Dwight Tindle and Eric Hauenstein. Natural owns KNOT-AM-FM Prescott and KWBW(AM) Williams, both Arizona. Buyer is owned by Dudley A. White, his mother, Alice S. White, his brother-in-law, Norman Rau, and other members of the immediate family. They publish Sandusky (Ohio) Register, Norwalk (Ohio) Reflector, Kingsport (Tenn.) Times and News and Grand Haven (Mich.) Tribune, daily newspapers, and owns KZAM(AM) Bellevue, Wash. KDKB is 10 kw daytimer on 1510 kHz. KDKB-FM is on 93.3 mhz with 100 kw and antenna 1,540 feet above average terrain.

- WLOB-AM-FM Portland, Me.: Sold by Donald L. Wilks and Michael Schwartz to Newport Communications Inc. for $800,000. Sellers own WXXY(AM) East Longmeadow-WAQG(FM) Springfield, Mass., and WPET(AM)-WRWK(FM) Greensboro, N.C. Buyer is principally owned by Peter W. Kuyper, former vice president of Paramount Pictures Corp.; Peter G. Mangone Jr., vice president of Paine Webber Jackson & Curtis, stock brokerage, and four others. Newport owns WADK(AM) Newport, R.I. WLOB is on 1310 kHz with 5 kw full time. WLOB-FM is on 99.9 mhz with 3 kw and antenna 300 feet above average terrain.

- KITE-AM-FM Terrell Hills, Tex.: Doubleday Broadcasting Co.'s AM sold to Lone Star Radio Inc. for $750,000 and FM to Lotus Texas Corp. for $750,000, respectively. Seller, wholly owned subsidiary of Doubleday & Co. publisher, is licensee of KHOW(AM)-KKXX(FM) Denver; KDWB(AM) St. Paul; KDWB-FM Richfield, Minn., and KWK(AM) St. Louis and recently sold KRIZ(AM) Phoenix, Ariz. (BROADCASTING, June 15). Lone Star is owned by Arthur and Ed Shadek (brothers) and Mrs. Arthur Shadek who also own Southwestern Broadcasters Inc., licensee of KRDS(AM) Tolleson, Ariz.; KBP(AM) San Diego; KYMS(FM) Santa Ana, Calif.; KBRN(AM) Brighten, Colo., and KZZY(FM) San Antonio, Tex. Lotus Texas Corp. is principally owned by Howard Kalmenson who is also principal owner of Lotus Communications Corp., licensee of 'Godfather' Lee. W PTY-TV Memphis, channel 24, which started telecasting on Sept. 12 (BROADCASTING, Sept. 25), honored FCC Commissioner Robert E. Lee as "the godfather of UHF" at a series of parties and other events shortly after the station went on the air. Commissioner Lee (left, wearing glasses) participated in WPTY-TV's one-hour Conversations program, along with general managers of five Memphis TV stations (l to r): M.E. Greiner, WMC-TV; D. A. Noel, WMC-TV; Charles Brakefield, WPRI-TV; Howard Holz, WPRT-TV, and John A. Serrao, WPTV (nearest camera). The one-hour taped program dealt with television in the 1980's and will be telecast later this month.

Network grip slipping on daytime TV?

HUT levels are holding constant but audience shares are declining

Is trouble brewing again for the networks in daytime TV?

Last year the problem was homes using television (HUT) levels, which showed an initially alarming but finally temporary erosion in daytime viewing from March through October (Broadcasting, Nov. 7, 1977, et seq.). Since then HUTs have remained within normal levels relative to previous years. But talk persists of shrinking daytime audiences, and now a different explanation for the problem is surfacing: The networks may be loosing audience shares.

Through the 1973-74 and 1974-75 daytime seasons (October-September), the three networks had a combined share of audience of 83%. During the 1975-76 season, their share dropped to 81%, then to 80% in 1976-77 and now to 78% in 1977-78. And since TV viewing over-all—HUT levels—have remained constant except for the eight-month mystery drop last year, viewers apparently are watching more of something other than network programming.

Michael Brockman, vice president of daytime programs for NBC Entertainment, says that of the 35 half-hours programmed in daytime by the three networks, only eight are pulling 30 shares or better. That's an improvement over a month ago, he said, when only five half-hours broke the 30 mark. And while figures hinting at the same conclusion are the number of top daytime programs pulling 30-plus shares from January through August of 1977, eight of the top 10 shows were pulling a 30 share or more; during the same period this year, only five reached that level.

Various sources say there are other possible explanations for declining network shares that do not involve overt viewer tune-out, such as the decision by NBC-TV no longer to program the 4:40 p.m. time period or decreases in network clearances by affiliates.

For the week ending Sept. 17, ABC's daytime shows were being cleared by an average of 91% of its affiliates, while CBS had 89% affiliate clearance average and NBC 86%.

Not everyone agrees there is a problem. Susan Auerbach, vice president and director of daytime negotiations for BBDO, one of the more active agencies in daytime, says shares over-all have not declined significantly, although there are always fluctuations within specific time periods, depending on the strength of shows that fill them.

But while the networks and others

FTC seeks balance for media symposium

Persons tentatively scheduled to appear at the Dec. 14-15 Federal Trade Commission symposium on media concentration and competition include many who have been critical of the media, but the FTC is looking for more industry participation.

Heather Kirkwood, attorney in the FTC Bureau of Competition, said she issued "an open invitation to the industry to participate in any way they see fit" in the symposium that includes a two-hour session on television and a one-hour session on crossownership.

Response from the media, including broadcasting, for comments and suggestions has been varied, with nonbroadcast segments of the media being more responsive. Mrs. Kirkwood said. Also, she said none of the topics or panels are set so that they can't be arranged to accommodate industry proposals and participation.

Among scheduled participants are media critic Ben Bagdikian; UCLA law professor Monroe Price, co-author of "Cable Television: A Guide for Citizen Action;" Stanford University economist Jim Rosse, former FTC consultant; university professors and economists Bruce Owen and Roger Noll, who will participate in a section on television economics; and Charles Firestone, former FCC attorney who represented the National Citizens Committee for Broadcasting in the crossownership case before the Supreme Court. Also tentatively scheduled is former FCC Commissioner Nicholas Johnson, now head of the NCCB.
In the course of a definitive answer, a number of conditions might help lure viewers away from the networks have been cited. The most obvious is the growing success of some nonnetwork programs, of which "The Multimedia Program Productions' Donahue" would probably be the best example.

When Donahue moved to Chicago from Cincinnati four and a half years ago, it was carried in just 37 markets. By May 1977 it was up to 92 markets a year later it was up to 134 and now is reaching 155. Of those stations, 37 are CBS affiliates, 66 NBC and 44 ABC. Audience growth has been as dramatic. In A.C. Nielsen's May 1977 syndicated programs report, Donahue was pulling an average of 2,457,000 households per quarter hour; in May of 1978 it reached an average of 4,556,000.

And increasingly, stations are pre-empting network programming with Donahue and winning, according to a spokesman for Multimedia. She said that in 91 markets the program was scheduled against some network competition, and was the number one rated show in its time period in 68 of those markets.

Donahue's is not the typical syndication success story, of course, but the amount as well as the diversity of syndicated programming available to stations has certainly increased the possible sources of competition to the networks, as last spring's National Association of Television Program Executives convention illustrated (Broadcasting, March 13).

NBC's Mr. Brockman has another theory. He believes that the networks' growing emphasis on one-hour afternoon soap operas may be driving more and more viewers who don't like soap operas to the local competition, whether it be old movies or off-network reruns. Contributing to that tendency, he said, is the fact that longer programs by definition require a greater investment of viewing time in an era when woman are thought to be spending less time at home.

A week without stunning, almost

ABC-TV maintains front spot as regular series dominate the schedules; exception is NBC-TV mini-series, 'Centennial', which takes Sunday night honors

The new prime time season rolled through its second week of full three-network competition (Sept. 25-Oct. 1) with the closest thing yet to regular, schedule. ABC- TV, which wasn't slowed much by the unloading of CBS-TV's and NBC- TV's premieres the previous week, had little trouble maintaining its stride. Rating averages gave ABC 21.2, NBC 17.7 and CBS 16.3. ABC won five nights of the week, had eight of the top 10 shows and 13 of the top 20, all series.

As it did during its premiere week, NBC stayed ahead of CBS with movies and events, (Broadcasting, Oct. 2). NBC aired series after 9 p.m. NYT on only two nights of the week — Thursday and Friday — and came in a distant third on both. The highest rating of the NBC long forms was the premiere of Centennial, since the network still has 22 hours of the mini-series scheduled to run on the most competitive night of the week, Sunday (8-10 p.m.). It got off to a fine start Oct. 1 with a three-hour special that pulled a 38 share at 8-11 p.m.

That was good enough to edge out ABC for the nightly win, although Battlestar Galactica was reborn from a 36 share the previous week to a 43 at 8-9 p.m. In the same time period, CBS's Mary nosedived from a 31-share premiere to a 21 share. ABC's Family bounced back to a 30 share at 9-9:30 p.m. and Alice held up behind it with another 30 at 9:30-10 p.m., but Mary dropped to a 23 share at 10-11 p.m., eight points off its previous outing.

Most mos had to continue to fare poorly during the week, except on ABC. Besides Galactica, ABC's Mork and Mindy and Taxi both made the top 10, while Vega$ was close at 12th place. ABC's other new show, Apple Pie, came in 67th, dead last (see box for ratings in week of all new series). NBC — which had only four series, new or old, in the top 10 — scored its highest new-program rating with Dick Clark's Live Wednesday. CBS had its best luck with People, despite the fact that the show dropped six share points from its premiere.

Sticking with the city

Learning Corp. of America has spun off a new firm, Highgate Pictures, which will be one of the few network TV production companies based in New York. The operation is headed by Linda Gottlieb, former vice president of production for LCA, now executive producer for the Highgate division. Formed last month, Highgate is to have its first prime-time exposure on Oct. 30, when NBC-TV's NBC Theater premiers with Highgate's "Summer of My German Soldier" ("The Triangle Factory Fire" originally scheduled as NBC Theater's first presentation, is to be rescheduled.)

Ms. Gottlieb has hired Dorothy Gilbert, formerly of Tomorrow Entertainment in New York, as director of development.

Program Briefs

Two-time loser. Judge William Hower of U.S. District Court in Miami has dismissed, primarily on First Amendment grounds, $25-million Zamora suit against ABC, CBS and NBC. Suit, on behalf of Ronny Zamora, teen-ager convicted of murder last year, and his parents, claimed network's programming had in effect turned him into a killer. Judge gave Zamora's attorney, Ellis Rubin, 20 days to narrow and amend complaint. Case also could be appealed to higher court.

ASCAP externs. All-Industry TV Stations Music License Committee announced that American Society of Composers, Authors and Publishers had agreed to extend TV stations' ASCAP licenses from Oct. 1 through Nov. 30. This gives committee "additional time to explore possibilities for reducing license fees" without its member stations risking infringement suits for playing ASCAP music. Committee had already obtained extension of Broadcast Music Inc. licenses through end of this year.

Police pick-up. NBC-TV has extended short order for David Gerber/Columbia Pictures TV series, tentatively titled Undercover Cop, to full 13 episodes. Program, starring David Cassidy, is scheduled to start four-part special run Nov. 4. (Saturday, 9-10 p.m. NYT). Gerber/Columbia also received short order from NBC-TV for four-hour episodes of Doctor's Private Lives.

Syndicated disco. Studio West, Newport, Calif., offers new Disco Fever music-library plus weekly and monthly updates for radio stations. Also available are customized station image packages. For information contact Jim Meeker at (714) 752-1918.

Merv on the move. Metromedia Producers Corp.'s Merv Griffin Show, already spending 10 weeks per year away from Los Angeles base for Las Vegas shows, also will be moving to New York for about six weeks each year. New Griffin contract through 1982 calls for 24 New York weeks in all; first taping from Ed Sullivan theater runs Oct. 22-Nov. 2.

Further football. Newly established Moon Radio Network is offering to provide U.S. stations and advertisers with coverage of Nov. 26 Grey Cup championship game of Canadian Football League. Harold Johnson, sports director of wbt (AM) Charlotte, N.C., has been signed to do play-by-play of game from Toronto (1:15 p.m. to conclusion). Russell E. Moon Jr. said that this will be first time Grey Cup
has been broadcast by U.S. radio network. 

Moon Radio Network, 2842 Shady Avenue, Suite 3, Pittsburgh 15217; (412) 421-5155.

Oscars with Carson. Johnny Carson has been signed by Academy of Motion Picture Arts and Sciences as host of 51st Oscar ceremonies, to be telecast by ABC-TV next April.

Latest for New Hampshire. WNH-P-TV Hanover, N.H., new station, joined NBC-TV as full-time affiliate on Sept. 20. Station operates on channel 31 and is owned by Northern New England Television (formerly named Taft Broadcasting Corp. of Houston). William Loftus is general manager.

Seaver to NBC. Tom Seaver, Cincinnati Reds pitching star, has signed multi-year contract as commentator for NBC Sports. His initial assignment will be to provide commentary during NBC-TV’s exclusive coverage of 1978 World Series. He has had experience as weekend sportscasters for WCBS-TV in New York and has served as commentator for ABC and CBS on coverage of baseball games and other sports events.

Addition. WJZIOH Hagerstown, Md., has joined CBS Radio Network.

Dialogue with educators. Key government officials, educators and broadcasters will participate in “Broadcasters Are Educators, Too,” part of 16th national convention of National Association of State Boards of Education, Oct. 12-14 in Hershey, Pa. Among those on agenda: FCC Commissioner Abby Washburn; Donald Thurston, board chairman, National Association of Broadcasters; Roy Danish, director, Television Information Office, U.S. Commissioner of Education Ernest L. Boyer and Bob Keeshan of CBS’s Captain Kangaroo. Entire convention will be held in conversation with “Hometown Cities”’s reading program; experiment to determine whether teaching about popular TV shows can produce gains in reading skills.

Peripatetic. Don Criqui, television and radio sportscaster, started daily sports commentary show on ABC’s American Information Radio Network on Oct. 2. Mr. Criqui is continuing his other assignments as director of sports for WOR(AM) New York; play-by-play announcer of NFL telecasts on CBS-TV; announcer of National Basketball Association and special events telecasts, and national radio and television spokesman for Trans World Airlines.

Another turn-off tryout

The National Federation for Decency, a Tupelo, Miss.-based citizen group that asked its members to turn off their television sets in March 1977, is planning another boycott next month—this time, however, against ABC-TV only.

The Rev. Donald E. Wildmon, executive director of the federation, said the action has been prompted by the “over-all low quality of programming on ABC” in terms of “excessive, gratuitous” sex and violence as well as the use of profanity. He predicted the boycott would cut ABC audience rating by the same margin, the equivalent, he said, of $30 million a year.

During the November Nielsen sweeps, the federation is asking supporters (about 10,000 members are claimed) to refuse to watch ABC-TV and when possible, to record that fact on Nielsen diaries.

Although the networks have disagreed, Mr. Wildmon said he believes his organization was “to a great deal responsible” for a decline in household viewing coinciding with the March 1977 boycott.

The federation also is continuing its boycott of Ford Motor Co. in disagreement with its program sponsorship. However, Mr. Wildmon said, “early monitoring of fall shows” leads him to believe that “Ford quietly is in the process of cleaning up its act.”

Earlier, Mr. Wildmon had led his organization in protest against Sears, Roebuck & Co. on grounds that Sears sponsorship had changed, that protest ended and the federation moved on to Ford.

Just noodling

Pressed for specifics about Silverman suggestion that advertisers and agencies get back into production, NBC won’t go beyond saying it’s only idea.

NBC President Fred Silverman’s invitation to the advertising community to get back into prime-time series development has left many agency executives unsure about what kind of party they’re being asked to attend. NBC says the invitation was meant that way.

In a special Young & Rubicam dinner, Mr. Silverman suggested that the agencies “get closer to the programing heart of a medium you helped build” by bringing series ideas to the network (Broadcasting, Sept. 18). But agency executives canvassed after the speech—besides being skeptical that any but the largest advertisers could support the costs and take the risks of production—wanted to know more specifics, such as who would pay for development of a project, who would control it, how much the advertiser would pay to get the program and its commercials on the air, and how much consideration of the advertiser’s needs the network would give in scheduling and supporting a program.

When these questions were relayed to NBC, a spokesman for the company said that details of that type were “not going to be hammered out by NBC,” and the speech was meant as a declaration of NBC’s “receptive ear” to whatever proposals the agencies might want to offer. “There won’t be specifically an NBC plan as to how it will work,” the spokesman said. “He [Mr. Silverman] specifically didn’t want to set up a rigid framework for how it would work.”

Told that many agency executives had expressed some suspicion about Mr. Silverman’s proposal, the spokesman said, “That’s what Edison found trying to market the light bulb,” adding, however, that some advertisers are anxious to try out ideas.

Viewers worry less about more sex on TV

Researchers find concern dropping, despite apparent increase in sexual content of programs

Interviews with 187 persons during the 1975-76 season and 216 during the last season have led two University of Connecticut at Storrs researchers to conclude that viewer concern over television violence and sex is declining.

Telephone interviews based on a random sampling of Connecticut observers over 18 reached during evening hours, were conducted by Sief van den Berg and James H. Watt Jr., assistant professors in the university’s speech department.

More than 60% of persons interviewed in the 1977-78 season said there was “too much violence” on television—that’s about 20% less than in the earlier sample. Almost 40% were “very concerned” about the violent content of television programing in the 1977-78 season—down 15% from the other study. When asked how concerned viewers should be with television violence, 46% in the second study said “very” while 79% gave that answer in the first.

When asked the same questions about sexual content of television, percentages varied from 6% to 12% with respondents in the earlier study showing the most concern.

“Sexual content on television did not change over time, with only about one-third or less of respondents perceiving too much sex on television and showing concern about it,” the authors said.

Mr. van den Berg and Mr. Watt said that although the majority of respondents in both samples thought there was too much violence on television, they also made clear in answers to other questions that regulation of program content should be accomplished either by the industry itself or by the audience. Respondents rejected government regulation of content—even those most concerned about the presentation of violence and sexually oriented materials.

In an analysis of their findings, the authors said: “Advocates of television programming reform must look on these results as presenting a fairly bleak picture. The au-
to support reform in only a lukewarm fashion, as program content is apparently perceived as only a peripheral problem, and then only violent programing.

“Attempts to institute governmental control of content are bound to be met with resistance if the strength of sentiment against governmental control in this survey is any indicator. Attempts by networks to changing programing practices would probably be met favorably by the audience, but the pressure to make these changes via boycott of specific programs or control of children’s viewing is not likely.”

Baseball wants to spice it up for television

League proposes football-type playoffs in anticipation of expiration of network contracts after 1979

Major league baseball is considering a switch to a National Football League-type set-up that would include interleague play, more playoffs prior to the World Series and the NFL’s “wild card” feature for the playoffs, all in the hopes of increasing interest in the sport and, obviously, greater TV audiences.

Baseball’s four-year, $92.8-million contract shared by ABC and NBC expires at the end of the 1979 season. The office of the commissioner of baseball has offered a so-far-silent ABC, CBS and NBC a plan for additional playoffs leading to the World Series; wild card teams that would allow more clubs to be in playoff contention, and even interleague competition that, for example could pit the American League’s New York Yankees against the National League’s New York Mets.

Central to the plan is the concept of three geographic divisions within each league, with the addition of a Midwest division. Playoffs would be held among division winners and the wild card teams.

As opposed to the one playoff competition in each league currently leading to a place in the World Series, the new plan would have two concurrent playoffs by four teams, and then another between the top two in each league.

The commissioner’s plan also assumes that viewers will be anxious to tune their sets to additional games between certain teams of different leagues.

According to Tom Villante, the television adviser to Bowie Kuhn, commissioner of baseball, a major thrust behind the proposal is to increase the ratings of baseball in September. He said that “baseball has its greatest growth potential” that month and the teams that do draw viewers then are those that look like they have a chance to make it to the World Series.

The idea, he explained, is to put “more clubs in pennant contention” and “heighten pennant race fever.”

At present, NBC has Saturday afternoon games on a nonexclusive basis (a local station within a franchise area can get priority) and ABC has Monday night games exclusively. While it has been said that bringing CBS into the baseball fold is crucial, Mr. Villante said it is “important” but not absolutely necessary that CBS share the increased schedule.

One stumbling block, he admitted, may come from teams that generally do well at the box office and would reject a proposal that necessarily would shorten the regular season to accommodate additional playoffs in September. Local TV broadcast rights also must be considered, he added.

Thou shalt not steal another’s satellite feed, says commission

Public notice is issued after ABC and RCA complain to FCC about cable system they say stole an ABC Sports transmission

With new communications technology comes new opportunities—for breaking the law as well as for providing service. Or so a public notice issued by the FCC last week makes it seem.

The subject was “unauthorized interception and use of satellite transmissions.” And of the purpose of the notice, the commission said, was to remind broadcast stations and cable television systems that they will violate the law if they intercept transmissions from satellites and make unauthorized use of them.

The notice followed commission receipt of complaints from ABC and RCA about a cable system they say “pirated” an ABC Sports production being transmitted by RCA Americom domestic satellite, and sent it to the system’s subscribers even before ABC had telecast the program (“Closed Circuit,” Sept. 4).

The complaint did not name the offending cable system.

Tennis syndication set for 37 weeks

January through September schedule to be bartered

World Championship Tennis returns for its eighth TV season—the third in syndication—Jan. 6 with tournament action from Jamaica launching 37 weekend telecasts through Sept. 15.

Already said to be on board are some 160 stations, representing clearance more than 75% of the U.S.

Being featured are three series of competition: “The $320,000 Challenge Cup,” 15 telecasts from Jan. 6 to April 14; “The $200,000 Tournament of Champions,” another 15 from April 21 to July 28, and “The $200,000 WCT Dallas Finals,” seven from Aug. 4 to Sept. 15. All telecasts are one-hour except for two-hour finals concluding each series.

WCT, primarily NBC-TV fare in previous years, broke into syndication with its 1977 season. Distribution, co-production and advertising sales responsibilities went to the Mizouf Television Network.

For the upcoming season characterized as $2-million undertaking, WCT is doing its own production of ten games. Under a barter arrangement, seven minutes each hour being held back for national advertising, with five minutes left for stations to sell locally. Lined up as national advertisers are Volkswagen, Pepsi, Rolex, Polaroid, Spalding and Canon.

Of the 23 markets within the top 25 agreed upon by last week, four NBC owned-and-operated stations could be counted on for WCT coverage. While WRC-TV Washington will take all three series, WNBC-TV New York, KNBC-TV Los Angeles and WMAQ-TV Chicago will have only the second and third series. Basketball commitments were given as the reason for the partial buys by those three stations. In those markets, the first series will go to WOR-TV New York KHJ-TV Los Angeles and WFLD-TV Chicago.

Unlike the 1978 season, no 1979 events will be offered live. According to Jon Doyle, WCT director of television, live tennis action proved impractical for syndication since there is no way to accurately predict the length of a match.

Directors of the WCT are Lamar Hunt and Al G. Hill Jr.
From the beginning

The Television Information Office is offering to TV stations a half-hour program tracing the development of children's programs from TV's early days up to the present.

The program, titled Children, Television and Change, will be sent by the TV networks via closed-circuit for station taping. TIO member stations will have first option on carrying the program, but nonmembers may carry it in the event of a refusal by a member outlet in the same market or at a subsequent date.

The narration is by Hugh Downs. The program examines some of the early-day TV programs, such as Kukla, Fran and Ollie, Captain Kangaroo and The Mickey Mouse Club, and covers how television has changed and is still changing to meet viewer needs.

Listeners are a faithful lot

Radio audiences have a few favorite stations, generally stick with them, says CBS study

Radio listeners tend to have favorite stations and stay with them rather than switch the dial often, according to a CBS Radio analysis of the April/May 1978 Arbitron reports.

In the top 10 markets, for example, the average number of radio stations used per person per week was 2.6. In markets 75 to 84 the comparable figure was 2.3 and in markets 159 to 168, 2.0.

According to Sylvia Hughes, director of CBS Radio research, the number of different listening choices found on a crowded AM-FM radio dial "apparently exerts only a minor influence toward raising the number of different radio stations the average person listens to in a week."

The following table shows the markets studied, the average number of radio stations used per person per week and the total number of stations reported for the market.

'Sesame Street' says it's still a winner with the younger set

Nielsen, Yankelovich data cited to show audience rise

The Children's Television Workshop's Sesame Street on PBS continues to gain in audience, both among the general population and among the "disadvantaged neighborhoods" that are its prime targets, according to two studies released last week by CTW.

An A.C. Nielsen Co. survey found that in the areas where Sesame Street is broadcast, 79.1% of the households with children 2 to 5 years old tuned in the show once or more during the six January-March 1978 weeks in which the study was conducted. CTW said this was the highest level, representing 9.39 million homes, in the eight years in which Sesame Street audience surveys have been conducted for the workshop. The highest previous total was 8.76 million in 1975.

A trend report on penetration in ghetto communities, conducted by the research firm of Yankelovich, Skelly & White, found that in New York's Bedford-Stuyvesant and East Harlem neighborhoods, 96% of the preschoolers watch the show, in Chicago 91% and in Washington 97%.

Compared with inner-city penetration levels in 1970, the new Yankelovich figures represent gains of six percentage points in Bedford-Stuyvesant, 17 points in East Harlem, three in Chicago and 64 in Washington.

The growth in Washington, according to CTW President Joan Ganz Cooney, "is probably due in part to the substantially increased transmitter power of WETA-TV over the past year, and to the increased efforts of CTW's Community Education Services division and WETA-TV to reach poverty-level families in the area and help them to recognize Sesame Street as a powerful learning tool for their children."

Although WETA-TV is a UHF station, CTW noted, penetration among Washington pre-schoolers increased from 67% in 1973 to 97% in 1978.

Of the ghetto children in Washington who had watched the show, two out of three had seen it within two days of the survey and 70% watched four or five times or more each week. In East Harlem, 85% of those who watched it regularly within the previous two weeks had watched four or more times per week.

CTW said the Nielsen statistics showed that 25% of the homes with children aged 2-5 were watching Sesame Street during the average minute, "making the series first among kid's shows." By comparison, CTW said, Scooby's Laff-Alympics on ABC-TV was ranked number one on Saturday mornings during the survey period with a 2.13 rating among such homes, and CBS-TV's weekday Captain Kangaroo had a 1.56.

Sesame Street starts its 10th broadcast year in November.
Ten stories for covering the big stories

ABC executives symbolically begin construction of $20-million news office in Washington, termed "primary news center" of the world

Outside the blue-and-white tent and off the Astroturf, the wet air and soggy ground contrasted well with the bright spirits and brighter promises of ABC's top brass as they gathered in Washington last Wednesday (Oct. 4) to break ground for the network's new 10-story news bureau there. It was a rare sight outside of New York—the chairman of the board, the presidents of the corporation, of the television division, of broadcast operations and engineering, of the news and sports division and numerous vice presidents.

The new building, which is scheduled for completion in early 1980, is to house the Washington news operations of ABC television and radio and, according to Chairman Leonard H. Goldenson, will be "the largest of its kind in the nation.

The $20-million headquarters (including furnishings and equipment) at 1717 DeSales Street N.W. will bring together the diverse operations of the network's news departments, which are now spread around a number of older structures in the downtown area. The new building will accommodate all the operations of the ABC bureau in the capital, including the Washington desk of the network's evening news program, Issues and Answers, Good Morning America and special events.

The 145,000-square-foot 10-floor facility could also house much of the New York news operations as well. While ruling out the possibility of such a move in the "foreseeable future," News and Sports President Roone Arledge said a transfer was "not a total impossibility." (Since the adoption of the network's new evening news format last July, there has been no regular anchor in New York—although production and editing are still handled there.) Mr. Arledge will maintain an office in the new building.

George Watson, vice president and Washington bureau chief, said the new building was being constructed in recognition of the dominance of the capital as the "primary news center" of the world—a position he said that was acknowledged by the other major networks as well. He called the occasion "frightened with meaning" for the future of ABC News.

The new building will include two television and three radio studios, 20 videotape editing rooms, six audio editing and production control rooms and two television control rooms. It also will have garage facilities for ENG vans and trucks.

The land on which the bureau will be built is principally owned by Sol Taishoff, editor, and Lawrence Taishoff, publisher, of Broadcasting magazine, which maintains its offices on the same block-long street, opposite the city's Mayflower hotel. The Lenkin Co. of Washington is the contractor.

The building was designed by the New York architectural firm of Kohn Pederson Fox Associates.

Among other notables at last week's ceremony were District of Columbia Mayor Walter E. Washington; Joseph L. Allbritton, chairman of ABC-TV-affiliated WJLA Inc. (Washington); Andy Ockershausen, executive vice president of ABC-owned WMAL Inc. (Washington); and Robert Bennett, executive vice president of WCVB-TV Boston and chairman of the ABC Television Network Affiliates Association.

ABC officials present included Elton H.
Hearing-room studio in new Hart building getting caught up in penny-pinning move

Senators may delete it from plans; it would have built-in facilities for radio and television coverage

A proposed new Senate hearing room equipped with extensive facilities for radio and television may never make it off the drawing boards, the victim of a movement to cut back on the more luxurious features of new Senate offices now under construction.

The whole project, a $121-million office extension named after the late Senator Philip Hart of Michigan, come under attack in August by a group of senators who saw it as a waste of taxpayer money. Their bill to stop the project was voted down, but some of the senators who opposed that measure have come back with their own to cut $9 million worth of what Senator Robert Griffen (R-Mich.) calls "frills and furbelows" from the building.

Among the targets of the cutback—a gymnasium, restaurant, wood paneling, marble—is the "multimedia" hearing room, a facility to be distinguished from all the other hearing rooms on Capitol Hill by its built-in equipment for radio and television. First proposed in the wake of the Senate Watergate hearings when Congress's exposure on television was at an all-time peak, the architect's plan envisioned rows of elevated glass booths to house radio and TV anchormen and hidden pathways to obscure the TV cables that clutter hearings now (BROADCASTING, Nov. 10, 1975).

The bill, sponsored by Senators Charles Percy (R-III.), Jake Garn (R-Utah), Daniel Moynihan (D-N.Y.), Strom Thurmond (R-S.C.) and Mr. Griffen, would eliminate the special facilities and keep the room as a bare hearing room. It may not be dealt with before the Senate adjourns this month, but Senate aides say it will be at some point. Only part of the funds for the office structure has been approved to date, and among sections that still need approval is the controversial hearing room.

The twain do meet

Former President Gerald Ford, a panelist at a "Media '78" conference co-sponsored by the Foundation for American Communications and the New York University Graduate School of Business Administration, encouraged business executives to be "aggressive, factual, candid, straightforward" if they want to improve their relations with the press.

Mr. Ford urged high-level business people to meet more with editorial boards, to "have a little practice" before appearing on such programs as NBC's Meet the Press and to use "advocacy advertising."

The conference, which drew about 150 public relations chiefs and other executives for a Ford luncheon with Washington Post Executive Editor Ben Bradlee, saw both corporations and press admitting each side must work harder for better business reporting.

A typical exchange, however, had Tom Brokaw, NBC-TV's Today show host, charging too much "suspicion and paranoia" on the part of business and a member of the audience responding that "the cutting room and the editing room" just as by fears.

WIC this week

Jack Landau, executive director of the Reporters Committee for Freedom of the Press, will speak on "Is The First Amendment in Danger?" at the opening luncheon of the annual meeting of Women in Communications, Oct. 12-15, in Detroit.

Among other activities at the meeting, Clarion awards in radio will be presented to Gale Cunningham, KKL-AM-FM Portland, Ore., for a documentary on human rights and the gay movement, and Susan Stamborg, National Public Radio, for her Interview of Susan Stamborg series. Clarion awards in TV will be given Stan Margulies, ABC, for Roots; Joan Konner, NBC News, for a documentary on radioactive waste; CBS News, for CBS Reports: The Fire Next Door; Beverly Williams and Cliff Abramowitz, KYW-TV Philadelphia, for a documentary on the issue of police brutality; Perry Miller Adato, WNET-TV New York, for a program on the life of artist Georgia O'Keeffe, and Susan Silk and Gary Armstrong, WNEC-TV Boston, for a series on Boston's emergency medical service.

In addition, Irma Kalish, executive producer of Carter Country will receive one of the 1978 Headliner Awards.

Journalism Briefs

In honor of Radio Television News Directors Association has instituted annual Michele Clark Award in memory of late CBS News correspondent killed in 1972 plane crash. Cash award of $500 will be provided by Michele Clark Memorial Foundation, but award will be overseen by RTNDA.

News to them. Live coverage of Canadian Broadcasting Corp.'s application to Canadian Radio-Television and Telecommunications Commission for renewal of its network broadcasting licenses is being carried throughout Canada. CBC and member companies of Canadian Cable Television Association are cooperating in coverage, which will be transmitted by satellite across Canada to some 35 cable operators for distribution. Hearings are Ottawa and will last through Oct. 13.

In-service training. National Oceanic and Atmospheric Administration has scheduled Oct. 13-14 workshop for radio and TV weathercasters. It will be held at National Meteorological Center, just outside Washington, and provide orientation on center.
activities and personnel. Similar workshops were conducted earlier at Hurricane Center in Miami, Severe Storms Center in Kansas City, Mo., and Severe Storms Laboratory in Norman, Okla. Further information: William J. Brennan, news chief, public affairs, NOAA, Rockville, Md. 20852; (301) 443-8243.

Going up, Reuters, currently distributing its high-speed information services by cable and microwave in and around New York City plans to go national Jan. 1 through $9 million-plus, 10-year satellite contract with RCA. Services, said to operate at speeds approaching five million words per minute, offer news and market quotations.

More awards. National Press Club's Excellence in Consumer Journalism Competition awards were presented in Washington by Senator Wendell Ford (D-Ky.). Broadcasting winner was WBBM-TV Chicago for best over-all and best TV/BROADCASTING, Oct. 2); citations went to WMAQ-TV Chicago and WBB-TV Boston for best coverage in TV and to WCBS-TV New York and NBC Nightly News for best TV program.

CPB's local winners

The cream of the PTV crop is announced with the top honor going to a St. Paul outlet

A program on a St. Paul public television station was named best program of the year at the annual Corporation for Public Broadcasting local television program awards ceremony.

KTCA-TV won with A Common Man's Courage, a historical biography of former Congressman John T. Bernard and his radical political career. WPBT-TV Miami's The State of Florida vs. Ronny Zamora was named the most innovative program of the year. The KTCA-TV program also won the CPB news and public affairs magazine category award and the WPBT program also won the news and public affairs special event category award.

Other categories and winners were:

News and public affairs documentary: WNET-TV New York for Dateline New Jersey: Rogues' Gallery; cultural documentary: KTEH-TV San Jose, Calif., for The Valley That Was; cultural performance: WMBR-TV Baltimore for We Ain't What We Was and also cultural drama for Bartleby, the Scrivener; target audience, WTTW-TV Chicago for Aunt Martha and the B.S. Love Counselor; children's instructional, KLTV-TV Las Vegas for First Grade Science and WEDH-TV Hartford, Conn., for Connecticut Heritage: to Govern or Contend; special interest, WNET for Help Yourself: A Patient Look at Surgery and post-secondary formal education, KBYU-TV Provo, Utah, for Worth of a Child and WPSX-TV Clearfield, Pa., for The Infinite Earth: the 29th Day.

Broadcast Advertising

Taylor puts ball in government's, winemakers' court with comparative TV advertising

Treasury Department unit, which has banned such spots, awaits complaints from other vintners

Taylor Wine Co. proceeded on Oct. 1 with a spot TV campaign that challenges a 24-year-old government ban on comparative taste tests in liquor advertising.

Government officials, prior to the start of the spot TV spurt in southern California and East Coast markets, had warned Taylor, a unit of the Coca-Cola Co., that the TV commercials might violate standards of the Treasury Department's Bureau of Alcohol, Tobacco and Firearms, which claims such ads could be misleading.

A highlight of the TV commercials, which introduce Taylor California Cellars wine, shows a panel of wine tasters judging wines that are named in the spots and expressing preference for Taylor.

A spokesman for the Bureau of Alcohol, Tobacco and Firearms said the unit will act if it receives a complaint from one of the wineries mentioned in the commercials. He said there had been no reaction in the first few days the spots ran.

An official of Coca-Cola said the firm had not received any reaction to the commercials. But a spokesman in New York for National Distillers, parent of Aimaden Vineyards, whose wine is named in the ads said it was "actively considering" a law suit against Taylor.

NAB wants in on FTC antacid ad proceeding

It tells commission in comments that proposed broadcast warnings for such products may harm both broadcasters and drug producers, wants to cross examine witnesses

Requiring health warnings in radio and TV commercials for antacid products would confuse consumers and hurt broadcasters, the National Association of Broadcasters argued in a filing with the Federal Trade Commission.

NAB notified the FTC last week of its desire to participate in the examination and cross examination of witnesses in the commission's proceeding that would require some warnings now required on antacid product labels be included in broadcast advertising. The proceeding was introduced in 1976 (BROADCASTING, April 12, 1976).

In the filing, NAB said it agrees that people should be warned about the hazards connected with antacid products—but not in broadcast commercials. It said it is enough to put the information on product labels, and in the commercials to caution consumers to read the labels. To put specific cautions in the advertisements could cause confusion, it argued, because people wouldn't remember which warnings go with which products.

On the other hand, people do remember repeated "read-the-label" warnings, which the NAB radio and TV codes require, it argued.

NAB also argued that changing the content of commercials could have direct adverse affect on both the broadcast and over-the-counter-drug industries. Requiring lengthy descriptions would force commercials to become longer and drive up their cost, NAB said. Broadcasters could lose advertising that way, and costs might be so high for manufacturers as to prohibit entry of new firms in the drug marketplace.

Still another way to squeeze more sell into TV commercials

Push the fast-forward button, say NYU professors after tests of time compression technique; it doesn't hurt, can even help

Advertisers who want to say more in their commercials without paying additional time ought to try time compression. They might save money while maintaining the effectiveness of commercials.

That suggestion comes from two assistant professors of marketing at New York University's Graduate School of Business Administration. They offer it in an article in the current issue of the Advertising Research Foundation's Journal of Advertising Research, in which they report on experiments using time compression.

Time compression is a computerized electronic technique that eliminates the unnatural high and strident tones—the "Donald Duck effect"—that tape-recorded speech takes on when the speed of the tape recorder is increased. "The effect sounds quite subtle and natural as long as the speed is not increased by more than about 40%," according to the NYU researchers, James MacLachlan and Priscilla LaBarbera.

In their experiment, Professors MacLachlan and LaBarbera used a Lexicon Varispeech II to accomplish the time compression. Undergraduate students participating in the test saw three TV commercials played at normal speed and three commercials speeded up by 25%. Each student was asked to rate each commercial on a scale ranging from "very dull" to "very interesting."

The faster commercials, which took only 24 seconds rather than the conventional 30, produced "slightly better" results than the others.

This, the authors conclude, "would
Advertising Briefs

Buying in. Meeker Co. Inc., New York, reports that All-Canada Radio & Television Ltd., Toronto, has made unspecified financial investmens in Meeker, which represents 27 U.S. TV stations. Earlier All-Canada had made investment in another U.S. representative company, Selcom Inc., New York, which serves 75 radio-station clients.

Sony drops DDB. Sony Corp. of America, New York, is ending its 15-year relationship with Doyle Dane Bernbach, New York, because of product conflicts with General Telephone & Electronics, also handled by DDB. Termination date is Dec. 29. Sony spends about $10 million annually, of which about 65% is in broadcast.

Three to Burke. Latest group owner clients of new Burke Broadcast Research radio rating service are Won Continental Broadcasting, Chicago; Doubleday Broadcasting, New York, and Greater Media Inc., East Brunswick, N.J. These groups own radio stations in eight of 20 markets Burke will survey initially for rating period to close in December. First quarterly rating report will be published shortly thereafter.

For the kids. NBC has produced new series of seven 30-second children-oriented spots to be carried on TV network. New announcements explore such topics as nutrition, parental authority and the importance of being able to discern difference between TV commercial and program content.

From in-house to agency. WNY(FM) New York, NBC-owned station, has appointed Lewis, Huntley, Schmidt, Plapier & Beaver Inc., New York, as its agency. Advertising for station formerly was handled in-house.

Cigarette interests do a burn over HEW study of antismoking spots

Lobby says BAR monitoring amounted to 'surveillance' of TV

The Tobacco Institute has scooped the Department of Health, Education and Welfare on the results of a study HEW had commissioned Broadcast Advertisers Reports Inc. to do on TV antismoking commercials and uses it as a vehicle for lambasting HEW.

The institute describes the report as having been done "secretly," accuses HEW Secretary Joseph Califano of "'1984 Big Brotherism six years away ahead of schedule" and chalks it all up to another "frenzied, dictatorial effort" on the part of Mr. Califano "to force individual citizens to behave as he wishes and to destroy the tobacco industry in the process.

A copy of a page of a transcript of a House Commerce Committee hearing in February that the Tobacco Institute sent to the media along with a press release seems to put a different light on the study. During a discussion of efforts being made to warn the public about the hazards of smoking, Secretary Califano was asked if he was obtaining data on the amount of antismoking spots being broadcast.

He said he would submit for the record a method by which HEW would obtain such information. The transcript contains a note that HEW's Office of Smoking and Health had contracted to have a minimum of 250 television stations in top markets monitored for antismoking commercials for four weeks. The report was to be completed by June 14, and the results submitted to the committee.

Dr. Daniel Horne, retired director of what had been the National Clearing House on Smoking and Health, says he approved the study sometime after Mr. Califano's testimony but that negotiations with BAR on the contract had begun before that date. He also said BAR approached him with the proposal for the study.

"People make all sorts of claims about antismoking spots—how many are carried and at what times," Dr. Horne said last week. "We wanted to find out. Are people watching the spots? If not, why?" He said, if not, there is no point in using them, or perhaps we should have to figure out how to increase their use." He said similar, if less ambitious, studies had been done previously.

Dr. Horne expressed the view that broadcasters have a duty to carry public service announcements. "Public service is an obligation broadcasters assume in exchange for the right to broadcast over frequencies denied others," he said.

The BAR report is not public yet. But the Tobacco Institute obtained copies of BAR's material—from the Office of Smoking and Health—and made it public.

What the institute calls the "clandestine operation" involved the "surveillance" of the three commercial networks and 263 stations in 75 cities during the month of April.

The study shows that tax-exempt organizations, including the American Cancer Society, the American Lung Association and the American Heart Association receive what the Tobacco Institute projects to $5 million annually in free time for public service announcements warning of the health hazards of smoking. The report shows CBS provided $230,000 worth of time during April, ABC, $131,200, and NBC, $30,500. The total for the stations monitored was $272,587. The spots were carried throughout the broadcast day, but mostly during daytime.

"Putting it all together," said Horace Kornegay, president of the institute, "shows that the TV-radio assault on American smokers is a major advertising campaign, inspired by Califano himself, fueled by the requirement that broadcasters must obtain their operating licenses from the federal government, and exposed ironically to the very same audiences who are forbidden by federal law to see any cigarette commercials."

Mr. Kornegay noted that the FCC has instituted an inquiry into broadcasters' policies on presenting public service announcements, and that HEW was one of the parties urging the inquiry.

The Tobacco Institute said it will ask for a congressional investigation.

European broadcasters view latest in TV technology, show increased interest in ENG, do little buying

Digital video tape recorders, sophisticated second-generation and even third-generation switching systems, satellites and what may turn out to be the first real push toward ENG in Europe attracted most of the attention of the more than 4,000 engineers, manufacturers, journalists and other members of the international radio and television communities who attended the international Broadcasting Convention in London two weeks ago (Broadcasting, Oct. 2). Although little in the way of new equipment was seen at the five-day conference (with the exception of Great Britain’s Independent Broadcasting Authority’s showing of full-screen, continuous motion digital VTR), much of the hardware displayed was being introduced for the first time to markets outside North America. The IBA and its alternating show, the International Television Symposium at Montreux, Switzerland, generally are not on-site sales shows, as is the principal U.S. convention, that of the National Association of Broadcasters. But manufacturers display their new equipment there in order to familiarize engineers with the latest available technology.

And the latest last month belonged to the IBA, the quasi-government agency that oversees Great Britain’s commercial broadcasting system. In what is believed to be the first working demonstration, IBA displayed a continuous motion, digital VTR and announced that it had licensed Sony Corp. and Bosch Fernsreth to manufacture the unit. IBA said that a commercial digital unit was, perhaps, two to four years away, however.

Using a modified Fernsreth BNC one-inch analog recorder, John L. E. Baldwin of the IBA demonstrated a 10-bit-per-square-inch, full-screen picture (without sound). It was the first time, he said, that a digital picture of that density had been created. An acceptable error rate at that density, he noted, requires a signal-to-noise ratio of approximately 20 db. (The quality of the picture, one observer noted, was significantly below that of analog standards, but an IBA spokesman said this was because the image was transferred from film.)

IBA said that it had licensed Fernsreth and Sony to manufacture digital VTR units in the type B and C formats, respectively.

In a paper presented at the conference, Mr. Baldwin said that IBA had originally intended to introduce the digital VTR at last January’s meeting of the Institution of Electrical Engineers (Great Britain), but “the time scale proved to be much too optimistic.” Although about 30 seconds of full pictures were shown, he said, they “had an excessive error rate.”

Ken Tsunoda, president of the video products division of Sony Corp. of America, said that IBA’s demonstration and announcement had surprised him as much as any one else at the convention. He agreed that IBA’s estimate of a two to four year lead time before commercial distribution of the new units was a possibility but that marketing considerations could make “five years more realistic.” The digital VTR, he said, is still very much in “the development stage” and that Sony in America, as well as Tokyo where the unit will be developed, must “decide how to complement analog systems” now in use. Mr. Tsunoda said that he expected the U.S. market would have “first priority” for the new units when they finally are marketed.

IBA also demonstrated a new satellite relay. The point-to-point system transmitted signals from the Wembley Conference Center via a 2.5 meter portable antenna to locations in central London (about 10 miles away) and to Italy. It was one of the first European demonstrations of satellite relay of ENG signals. IBA also demonstrated its Oracle teletext system that is designed to compete with the BBC’s own Ceefax system. (Both are already available to British viewers.)

The BBC also presented its proposed Carafax system for roadside radio. Designed to interrupt regular broadcasts or even cassette programs with traffic advisories, the low-power transmitter in an area emits a signal that breaks into regular programming to inform motorists of road conditions and then, after the announcement, shuts off until another is necessary.

Anpex Corp. presented for inspection its BCC-10 studio camera in its PAL version and its VPR line of helical scan video recorders. Anpex announced as well that the BBC had ordered eight of its...
VPR-1 models and that ABC, the American network, had agreed to purchase 83 VPR-2 units. ABC will use the new equipment at its owned stations and at its production centers in New York and Los Angeles. The units will also be used by the network during its coverage of the 1980 Winter Olympics in Lake Placid, N.Y.

Sony introduced its BVP-300P three-tube ENG camera to the European market. This camera, which weighs about 13 pounds without lens, has a power consumption of 22 watts and can be powered for up to two hours by batteries.

And Marconi Communications Systems Ltd. showed the conference its new Mark IX camera family—which includes an extra-light ENG camera that operates "for a number of hours using two standard car batteries." The Marconi line was first seen at last spring's NAB in Las Vegas.

Thomson-CSF was also in the ENG picture with its eight-pound Microcam TTV 1600, which operates for up to five hours. The camera consumes 24 watts of power. Pye TVT Ltd., a division of Philips, also showed its LDK 14 ENG camera and accessories.

Digital switching systems were also much in evidence, and most of the larger manufacturers present displayed their versions. One of them was Vital Industries' Squeezezoom and its companion Production Switcher Automation System (PSAS). The Squeezezoom is designed to give the director in the control room a virtually unlimited number of special effects and sequences and, when tied to the programmable PSAS system, allow him to recall them at will. The units are designed to work with Vital's VIX-114-4A production switcher.

In spite of the overwhelming attendance at the IBC and the considerable interest in the products shown on the floor, the conference seemed to be a major order-taking session. Richard Sirinsky, managing director of Ampex's British operations, explained that many of the broadcasters outside of North America are government agencies or dependent on government funds, and those who attend the IBC are not likely to be empowered to make purchasing decisions. "You don't take orders as you do at NAB," Mr. Sirinsky said. As a consequence, the equipment booths are at the IBC primarily to introduce new products to the engineers who must make recommendations to the purchasing arms of their agencies.

If the degree of interest at IBC is any indication then, it appears likely that ENG is about to begin its long awaited drive into the European market. This is due primarily to the enhanced quality of today's ENG equipment. Europe, Mr. Sirinsky explained, tends to "have no real sense of urgency regarding news," and there has been little need for the time advantages offered by ENG. But with the improved performance of the newer equipment, it seems likely that the European broadcasters may start turning to ENG in the production of regular entertainment and public affairs programming.

**RCA Americom is flying high at two years old**

Carrier says its two birds now transmit 4,000 hours of TV a month, more than any other, announces NBC plan to feed shows from West Coast to New York and deal with cable program supplier

In marking its second anniversary last month, RCA Americom Communications Inc. announced that its two Satcom satellites now carry more than 4,000 hours of nationwide television programming than any other carrier's system. It was also announced that NBC has committed itself to use the RCA system for some of its West Coast program feeds and that Modern Cable Programs, a distributor of motion picture cassettes, will break into satellite distribution next year.

Americom's announcement said that its system now carries more than 4,000 hours of television each month—1,500 hours more than are carried by its principal competitor, Western Union. The monthly schedules of all three television networks total 1,200 hours a month, RCA Americom noted by comparison.

The two cross-polarized Satcoms have a combined capacity of Western Union's Westar satellites and are used in large part to relay programs to cable television systems. (Some of Satcom's users include Home Box Office, Showtime Entertainment Inc., WTCGTVI Atlanta and the Christian Broadcasting Network.) Westar has proved more popular with broadcasters, who have been slower turning to satellites than the cable operators. Robert Wood Co., Spanish International and the Public Broadcasting Service are among Westar's principal television users. (The new National Public Radio and Mutual Broadcasting System satellite distribution services also will use Westar.)

An Americom spokesman said that NBC is expected to join the others on its bird with five hours per day of transmissions of programs from Los Angeles production headquarters to New York where AT&T lines are used to place programs on the air. NBC has also exhibited interest in opening parts of both its radio and television networks to satellites and has solicited proposals from carriers (BROADCASTING, March 27).

Beginning Jan. 1, 1979, Satcom will add yet another customer when Modern Cable Programs, a Modern Talking Picture Service division, will forsake its cassette distribution system and begin relaying its packages of "informational motion pictures" via the satellite. Modern signed a $182,600 contract for five hours a day of off-peak time. It also took an option for use of RCA's videotape playback facilities at Vernon Valley, N.J., a satellite uplink site. Modern's service is currently used by 100 cable systems.

**AT&T wants to send its little piggyback to market**

**FCC asked to approve system that would permit stereo sound for TV as well as allow two-language aural transmission; however, immediate drawback is need to convert present sets**

If AT&T has its way, networks and others transmitting television programs will soon be able to present stereophonic sound. Not only that, but the same system could be used to transmit programs in two languages or to piggyback a signal destined for a radio audience on a television channel.

AT&T is seeking FCC authorization to construct the system, which it says could be in operation by the end of the year. However, how much of an audience there would be is another matter: Television sets would have to be converted to receive the new system.

And until television stations themselves are equipped to broadcast stereo, "simulcasting" would have to be employed—a system whereby viewers receive the stereo sound portion of the program from a local radio station. At present, such programs can be offered in a limited...
number of areas; AT&T says the new system would allow virtually all television stations to offer simulcasts.

Essentially, the system is a further improvement of the diplexing technique that was developed by a joint Bell System and television industry committee and that AT&T began making available last January. That system, which opened the door to presenting programs in high fidelity sound, involves the simultaneous transmission of audio and video signal along the same path. The conventional method is to transmit them along separate transmission facilities.

Under the system AT&T wants to introduce, a second audio channel is added to the video channel.

AT&T is promoting the technique as a means of providing stereophonic sound in television sets. But AT&T officials note that the system could be used to transmit, say, coverage of a baseball game in two languages—English version being taken by one station, a French version by another. Or a radio station could be served by one of the two audio channels that accompany a video channel being used to service a television station.

Schmitt keeps up criticisms of WARC preparations

Third-world nations will inject politics into conference, he says, and U.S. is not ready for that

Despite evidence of some progress, U.S. preparations for the World Administrative Radio Conference 1979 are fast becoming a case of too little too late, Senator Harrison Schmitt (R-N.M.) said last week.

Speaking to a conference about WARC in Washington Oct. 4, the senator proposed that the President's Domestic Council intervene in WARC policy preparations. The lack of cabinet-level participation to date, he said, "is indicative of the low priority that this administration so far places on telecommunications."

Senator Schmitt said he is particularly troubled with the state of the preparations because he expects the negotiations at WARC to be politically charged. Third-world countries are beginning to focus on communications and are likely to try at WARC to reserve more radio frequencies than they need, he said. The United States should go in ready "to play political hardball."

Senator Schmitt said he is also concerned that there are disagreements on technical points among the State Department, the National Telecommunications and Information Administration and the FCC. Valuable time for gaining international support for U.S. WARC views is "slipping by without our coming to grips with our own national interests," he said.

As a way of resolving the problems quickly, he suggested that a tripartite panel be formed composed of Glen Robinson, WARC delegation chairman; Henry Geller, head of NTIA; and Charles Ferris, FCC chairman.

Hearings on WARC had been proposed before the Senate Communications Subcommittee by Chairman Ernest Hollings (D-S.C.) but they won't take place this year, Senator Schmitt said last week. It would be "useful," he said, if they were scheduled early next year.

Canadian objects to AM stereo inquiry

Toronto FM operator claims U.S. service would violate NARBA provision, would disrupt FM pattern in his country

A Canadian FM radio station has asked the domination's minister of communications to "advise the FCC" that the introduction of AM stereo in the United States would involve a breach of the North American Regional Broadcasting Agreement that has existed, since the early days of radio, between countries of the northern portion of this hemisphere.

The FCC has begun a rulemaking proceeding, including all five proposed AM stereo systems, hoping to resolve the matter (Broadcasting, Sept. 25).

A letter, signed by I. Switzer, vice president of engineering of Canada's CKO-FM-2 Toronto, claims AM stereo service in the U.S. would create "an intolerable pressure on Canada" for a similar service. "It is our view," he said, "that an AM stereo service in Canada would be seriously detrimental to our interests as the operator of a national network of FM radio stations."

In a public statement, Mr. Switzer quoted NARBA as saying: "The form of modulation for broadcasting stations is amplitude modulation of an unsuppressed carrier of constant amplitude yielding two symmetrical sidebands."

He said CKO-FM-2 and Canada All-News Radio Ltd., its parent company, do not understand how the FCC could institute "a rulemaking proceeding that would probably result in a form of modulation inconsistent with NARBA broadcasting regulations without prior consultation with NARBA signatories."

The minister of communications and the Canadian Radio-Television and Telecommunications Commission are being asked to reject a change in NARBA regulations allowing AM stereo until "all the effects and ramifications in Canada have been studied and considered by affected broadcasters here and by Canadian agencies concerned with the public interest in Canada."

An FCC spokesman said four of the five competing AM stereo systems would probably require a change in the NARBA agreement. He said the FCC has held informal talks with Canada, but would not talk officially until it has chosen a system.

Energy saver. Wxwv-tv Buffalo, N.Y., owned by Capital Cities Communications, is scheduled to move into its new $3 million complex (Oct, 9). The operation is what Capcities calls "the first energy-oriented TV facility in the country." Shown in front of the reflective stainless steel building are Phil Beuth, vice president and general manager (top, l) and Don Holland (r), chief engineer. The building has no furnace; instead, two 10,000-gallon water storage tanks (labeled "gin" and "vermouth") hold water warmed by heat from the studios, master control and production facilities. A heat pump is then used to convert the water back to hot air and distribute it to needed areas. The system also works as air conditioning by passing warm air through the tanks of cool water. The heating and cooling system is not the only thing that is stale of the art. Mr. Holland (bottom, l) examines one of three Ampex one-inch video-tape recorders and (bottom, r) one of the production units incorporating a Grass Valley switcher and a custom designed McCurdy audio console.
Big deal over big screens

Less is not more when it comes to TV size, according to a growing number of set makers; while prices are still high, competition is growing quickly

Those who browse at gadgets in the window of retail electronics stores may have noticed an increase lately in large-screen TV projection systems for sale. Those same browsers might be hard pressed to think of anyone they know who actually owns one, other than the local tavern keeper.

That's pretty much the situation in the super-sized TV market these days: Dozens of companies, including some of the largest TV manufacturers, have entered the market, but at prices in excess of $2,000 few expect consumer demand to be overwhelming.

There are no official counts of just how many large-screen systems have been sold since Advent Corp. began marketing them five years ago. Sales in 1977 are roughly estimated to have been in the 50,000-75,000 unit range by various members of the industry, a market divided among as many as 75 different companies, not a few of which are thought to have been operating out of garages or post office box numbers.

But the recent or imminent entries in the competition of such major manufacturers as General Electric, Panasonic and Sony have spawned new optimism that, with their merchandising clout, the large-screen TV may finally be coming into its own.

General Electric’s rear-projection Wide-screen 1,000 (for 1,000 square inches of picture size) have been available since June for a suggested retail price of $2,800, and is the subject of probably the most aggressive promotional support in the field—fourth-quarter advertising is being placed in most of the major national magazines and on network TV, a spokesman for the company said.

Panasonic introduced its 60-inch-diagonal screen Cinemavision in August at $3,800, then pushed it up to $4,000 this month because of devaluation of the dollar in Japan (Panasonic’s parent company, Matsushita Electric of Japan, makes the units). And Sony plans to be out in time for the Christmas buying season with a 50-inch-diagonal screen system and a 72-inche diagonal system, although the company has not announced prices for either.

Besides being the most aggressive marketer so far, General Electric is also among the most bullish in terms of sales projections. The company forecasts that industrywide sales of large-screen systems will reach 125,000 in 1978, 220,000 in 1979 and 500,000 by 1983. "In terms of units, this is not a large segment of the industry," said Norman Schnell, GE’s manager of marketing. "But the dollar volume is high due to the price of the sets."

Walt Henry Jr., video marketing manager for Advent, calls those projections "loony." He says that Advent, even with customary sales increases of 30%-40% annually, will be lucky to sell 20,000 units this year, and he claims Advent has at least half the total market. Mr. Henry thinks 50,000 units industrywide would be an optimistic figure for 1978, and that 150,000 units in three years is possible—"but it will take real work," he said.

Some might think Mr. Henry has a stake in making the market sound unappealing, but others share his conservatism. Sony expects to sell only 300-500 units per month in 1979, for example. And two of the biggest TV manufacturers, Zenith and RCA, are hanging back "observing" or "evaluating" the market’s prospects.

"They’re still too expensive for anyone other than the real videophile," said Robert Czepiel, electronics industry analyst for Cyrus J. Lawrence in New York. "It’s a long, long way from becoming an accepted product." Advent’s Mr. Henry agrees that price is the major obstacle. "The perceived value of the product is the essence of it," he said. "They’ve never heard of paying $4,000 for a color TV set before."

Mr. Henry believes prices of the better-quality systems—and everybody agrees that picture quality has been vastly improved over the early systems—will not fall significantly until true mass penetration is achieved. So what’s the percentage of jumping into such a tiny market now?

The conviction is that in the long run the large-screen set will become an essential part of the video entertainment center of the future—taking its place alongside the video tape recorder, the video disk, the home computer and other program sources expected to find their way into the home.

It is also thought by proponents of the system that consumers, once they become familiar with the advantages of the large screen, will consider it as necessary to viewing as color is today. "It entrances you," said a GE spokesman. "You just don’t want to go back to a 25-inch set." That’s why dealers are strongly advised to display the systems in specially-constructed "video rooms," and why Advent helps set up installment financing for its customers through Finance America—to encourage impulse buying, if such a thing exists for a $3,000 product.

By stimulating that kind of demand, the companies hope they can encourage the evolution of some home entertainment centers. Sony, in fact, plans to include its large screen system in a $4-million fall quarter advertising campaign for its Betamax video recorders, a company spokesman said, to promote the idea of a "theater in the home."

There’s one more reason many believe the major TV manufacturers are pushing the large screen systems—it gives them something new to talk about. "What’s really happening is that the television people have a very mature market for TV sets," said Ralph Jones, director of communications for the Electronics Industries Association’s Consumer Electronics Group. "So they’ve started to talk these things up, getting the dealers interested and so forth." Or, as Advent’s Mr. Henry envisions it, "They’ll get ’em into the store [with these systems], then they’ll sell ’em a 19-inch portable."

**Slow Time.** The fall Arbitron rating period is about to begin (Oct. 15) and traditionally it is a slow time for new music. Programmers stick with old favorites instead of breaking new records and new artists. As Jerry David Malloy of WHAS in Louisville, Ky., puts it: "Everybody gets cautious . . . [they're] afraid of adding the wrong song at the wrong time." But the picture is not that bleak: Columbia has released a rock album based on Jules Verne's "War of the Worlds." It's written by Jeff Wayne, narrated by Richard Burton and performed by a line-up of artists including Justin Hayward, Julie Covington, David Essex, Phil Lynott, Jo Partridge and Chris Thompson. Although it may not be creating quite the stir the Orson Welles version did on Oct. 30, 1938, it is nonetheless getting lots of attention—particularly the single, *Forever Autumn*, by Justin Hayward, lead singer for the Moody Blues. In Birmingham, Ala., "it's the hottest thing on the streets," says Steve Davis of WXXM. Steven B. Oliver of WBCAM in Duluth, Minn., says the single "has a Moody Blues flavor . . . it's a bluesy, sad, love ballad." And Gary Moore of WBBM is Bowling Green, Ky., calls it "incredible, the most perfectly timed record I've ever played. It's the classiest thing top 40 has had in a long time." **Looking good.** Starfuck, of Moonlight Feels Right fame, is out with a new single, Searching for a Thrill (United Artists), and WGN's M. Moore says "the group has matured a lot. The song is very up-tempo . . . almost progressive [yet] pretty commercial!" And `10cc, which had a hit with The Things We Do for Love, is picking up support with its new single, Dreadlock Holiday (Polydor). Pam Kobietus of W22-AM in Milwaukee calls it "a reggae type of tune, a completely new direction for them."

Latest test of FCC policy

Supreme Court will review Midwest Video case in which lower court threw out commission rules on cable access channels

The U.S. Supreme Court has agreed to review a lower court's opinion overturning FCC rules imposing access-channel and other construction requirements on cable television systems—a decision that was seen as casting doubt on the legitimacy of a number of other rules.

The commission, in petitioning for review, had said the decision of the U.S. Court of Appeals for the Eighth Circuit, in St. Louis, "eliminates the commission's role in formulating uniform and reasonable access standards and opens the door for disparate local or state regulation of the vital aspect of cable television's development." Thus, it said, the case presents a question "of great importance."

Directly at issue in the case are commission rules requiring cable systems with 3,500 or more subscribers to provide at least one access channel and up to four on a showing of demand—one for the public at no charge, two for education and government and the fourth for lease—and new systems to be equipped with two-way nonvoice communication and a minimum of 20 channels.

The appeals court said the commission lacked the authority to adopt such rules; it said they "burst through the outer limits of the commission's delegated jurisdiction" (Broadcasting, Feb. 27, March 6).

What's more, two of the three judges on the panel said the rules violated the constitutional guarantees of free speech and due process.

The appeal on which the appeals court ruled was taken by Midwest Video Corp. And it was the Supreme Court's decision in an earlier case involving the same cable system operator on which the commission relied heavily in seeking review.

The commission noted that the plurality of the high court in the earlier Midwest Video case had agreed that the commission's concern with cable systems' carriage of broadcast signals was not only a matter of avoiding adverse effects on television stations. The commission ruled that the high court had held that, under the "reasonably ancillary" test it laid down, that concern property applied as well to rules requiring cable systems "to promote the objectives" for which the commission has been given jurisdiction over broadcasting.

And the rules set aside by the appeals court, the commission added, were designed to increase the number of outlets for local self-expression, thus augmenting diversity of programs and the services available to the public.

The commission also said the constitutional issue is important. It noted that the high court has never had an opportunity to rule on whether the First Amendment ban on government efforts to impose access on a private medium not subject to extensive regulation—newspapers, for instance—extends to the commission's effort to apply an access requirement to cable television, which is subject to "pervasive" regulation.

The commission's position was generally supported by the solicitor general and, in a joint brief, by the National Black Media Coalition, Citizens for Cable Awareness in Pennsylvania and Philadelphia Community Cable Coalition.

The American Civil Liberties Union, in a separate petition for review, said the case offers the high court an opportunity to rule on where cable television fits into the system of freedom of expression; it said there are important differences between newspapers and cable systems.

Commission officials have said privately that more than the rules being challenged is at stake in the case. They say that if the appeals court opinion stands, it might be read as barring the commission from adopting any cable regulations other than those dealing with the conditions under which television signals may or must be carried.

There was some question, for instance, whether the opinion would prohibit the commission from adopting equal employment opportunity rules for cable; however, the commission concluded in an order adopted two weeks ago that it does have jurisdiction to adopt such rules (Broadcasting, Oct. 2). And there was some question, too, as to whether the decision might mean that the commission lacks the authority it has claimed to impose a limit on the amount of franchise fee that local authorities can impose on cable television systems.

Fates & Fortunes

Media

Jane Cahill Pfeiffer elected chairman of NBC, as officially proposed last month, and named to board of NBC's parent RCA, succeeding Julian Goodman in both posts (Broadcasting, Sept. 18). Mr. Goodman elected chairman of executive committee of NBC.

"As complete an index as I've ever seen . . ."

"A valuable research tool . . ."

"Saves me two to three hours of searching a week . . ."

Those are samples of compliments we've received from satisfied users since we began publishing an annual INDEX to BROADCASTING.

But we're not surprised that it works. The INDEX was released only after thorough testing in actual use by BROADCASTING's editors and writers. It is as accurate and comprehensive as the magazine itself.

It is even more than an INDEX to BROADCASTING. It is a yearly record of trends and events, transactions and transformations, fates and fortunes in broadcasting and allied businesses and arts. It is a book of record distilled from the magazine of record.

Entries are made under subject headings as well as personal or organizational names—all classified and cross-indexed for ready reference. Each entry summarizes a BROADCASTING item or article—and also identifies the issue and page number for those wishing to consult details in the magazine itself.

No library or reference shelf in radio, television and associated enterprises is now complete without its set of the INDEX to BROADCASTING. Limited editions for the years 1972 through 1976 are available now. The 1977 INDEX will be out soon. Order yours today.

Mail to Index, Broadcasting Publications, 1735 DeSales St., N.W., Washington, D.C. 20036

A Capital Cities Station
An Equal Opportunity Employer.

Situations Wanted Management

THE DIFFERENCE

...between "just average" and "very profitable" is usually the man in charge. Above average ratings and profits require a manager with ability and experience. I have both. And I have top level local and national references to prove it. Background includes G.M., S.M., and PD. in markets of all sizes including major market G.M. If you believe your station could—and should—be doing better, I’d like to meet with you. Please contact me in confidence at Box N-33.

Situations Wanted Announcers

Personality

Top rated personality. Excellent track record and top references. 20 years experience in major markets. I have much more to offer than just personality. Not a prima donna and willing to work. Prefer San Francisco Bay area. Box N-99.

CRAZY COMIC

I was on radio in Japan but my audience only understood 2 words of English. You Stink. Yes, I was a celebrity. People frequently walked up to me in the street and said Yamagouchi. English translation: Get Out of the Way. I am now in charge of snow removal for Miami Beach. I get audience with Off the Wall Comedy that breaks formats. If you’re serious Call Uncle Alvin mornings. 212—835-5081.

General Sales Manager
Major TV Market

We are a group owner, operating in the Top 20 Markets, and we are looking for an aggressive individual, presently employed in television, with either Sales Manager or General Sales Manager experience. Please send resume to Box N-50. All replies will be treated in strictest confidence. We are an Equal Opportunity Employer.

HELP WANTED MANAGEMENT

WANTED: a TONY

Tony C. Maiara, who has been manager of our Broadcast Division since 1971, is leaving us to become Vice President-Affiliate Services for CBS-TV.

We congratulate CBS on the wisdom of its decision. They could not have chosen a wiser, more industrious broadcaster, nor a nicer guy. He is a rare individual, and we will miss him.

And now we need a new Tony.

We operate WNNY-radio and WNNY-TV in Watertown, N.Y., and WMSM-radio in Massena, N.Y. We also operate a daily newspaper, the Watertown Daily Times. Our company is locally owned.

The job is Manager of the Broadcast Division. You will run our 3 stations under a broad authority to call the shots. You will operate from our modern Broadcast Center, and you will live in a lovely, hassle-free area, where a 10-minute drive is considered a long commute. We will pay you well and provide an excellent package of fringe benefits for you and your family. If you enjoy the job as much as Tony has, it will take a CBS Vice Presidency to pull you away.

Experience in television station operation would seem to be a necessity, but we'll listen to anybody who thinks he's qualified. We're looking for somebody who wants to put some roots down. (Enough of these short-timers like Tony; he was only with us 21 years.)

Please spare us the phone calls and apply only in writing. And do let us know everything significant about you when you write. All letters will be answered. If we want to know more about you, we may ask you to travel here at our expense.

If you think you can be our new Tony, address your letter to:

James W. Higgins
General Manager
Johnson Newspaper Corporation
260 Washington Street
Watertown, N.Y. 13601

SITUATIONS WANTED

Business Opportunity

Reach for a Star.

Bigname TV & Film Personalities Available For Personal Appearances (at opening, sales, celebrations, you name it!)

Face it—people who wouldn’t walk across the street to attend the opening of a new bank would drive miles to be there if a big film star was making an appearance.

Why are we telling you this? Because a radio station has much to gain by coming up with a Big Idea that turns a “nothing” occasion into something special...something the sponsor considers worth advertising. The reason major league talent seldom appears at the local level is because retail advertisers just don’t know how to go about lining up TV and Film Celebrities. But we do. That’s all we do. For particulars, including a list of available stars, call or write:

Pfeiffer, Anderson & Co.
Talent Arrangers: 8322 Beverly Blvd., Hollywood, CA 90048 (213) 658-5052

What makes Gary Stevens run Doubleday Broadcasting

“I’m a workaholic,” says Gary Stevens, president of Doubleday Broadcasting. “I’d rather live a short life,” he says, than “permit myself to be mediocre. If that’s Sammy Glick then that’s me.”

What makes Gary Stevens run? First and foremost it’s his nature—a drive he likely would exhibit if he were selling plumbing supplies or brokering real estate.

At 38 Mr. Stevens devotes his energies to Doubleday Broadcasting, the Minneapolis-based subsidiary of the Doubleday publishing house. Having taken over the helm last December, Mr. Stevens seems not the type to ride with the company to the top. But rather to get to the top himself and take the company with him.

The Doubleday Broadcasting Mr. Stevens now leads is not the company he would like it to be. Before taking over the president’s job, he says, “I felt our performance had been below average.” A bottom-line record that was “lackluster” and “missing the boat on acquisitions” were two fundamental mistakes he says he has already taken steps to correct.

Three loss operations, KRIZ(AM) Phoenix and KITE-AM-FM San Antonio, Tex., were spun off from the all-radio group, leaving KHOW(AM)-KXXX(FM) Denver, KDWB-AM-FM Minneapolis-St. Paul and KWK(AM) St. Louis. KWK, bought last year after it had gone bankrupt and went off the air under its former owners, is expected to resume operation soon. That will give Doubleday five major-market stations. Within three years—“being conservative”—Mr. Stevens expects to have a full complement of 14. As for television acquisition, he says it’s “not a primary direction,” but adds that “we would not be averse” to top-100 TV buys.

To any who might have perceived the station sales as an abandonment of radio broadcasting by Doubleday, Mr. Stevens is ready to “serve notice we are still in the business” and “highly acquisition” with $30 million-$35 million in assets. A St. Louis acquisition is expected shortly.

Mr. Stevens says profits are up and sales are up, which he attributes in large part to an “entire new management team.” And if he practices what he preaches, easy jobs aren’t available at Doubleday. Mr. Stevens reports no hobbies and a seven-day work week for himself, and says, “I want executives just like that.”

Mr. Stevens does give himself some time off during football season and every six months or so, he takes a few days to get away somewhere with his wife and children. He adds that Frankie, his wife of almost 12 years, has yet to understand why all the striving. Because she was raised in Britain, in a more go-to-work-and-get-paid environment, he explains, there has been a communications gap in describing to her that there’s more to it than money and the fringe benefits of power.

His joy of working and the desire to “build something, accomplish something” are feelings that he is trying to pass on to his children, Kristin, 9, and the 3-year-old “Minnesota twins”—Christopher and Victoria. Put simply, it is to let them know that when daddy goes to work, it’s not necessarily bad. He frequently takes one of his children traveling with him.

Raised in Buffalo, Gary Stephen Grossman (his pre-airwork name since legally changed) remembers his father, a department-store executive vice president, as another constant worker. He died when Gary was 14. But Mr. Stevens claims to take better care of himself physically than his father, whose drive apparently also was passed on to Mr. Stevens’s brother, a Pan Am senior vice president.

It was his older brother’s hobby of reading the broadcast trade press that got Gary Stevens interested in the radio business. He recalls his mother taking him to visit the studios of WBNJ(AM) Buffalo when he was 8.

He left Buffalo for the University of Miami, which he attended for three years, also spinning records for WFUN(AM) there. “Not a particularly good student” and eager to practice broadcasting rather than study it, Mr. Stevens quit school to go on the air at WIL(AM) St. Louis. A stint at WKNR(AM) Detroit came next; then Mr. Stevens became an air personality at WMCA(AM) New York in 1964.

By 1968, Mr. Stevens left WMCA to experience Europe for a while and set himself up as managing director of his Interprogram Film Sales, based in Lugano, Switzerland.

His connection with Doubleday came when he returned to the U.S. two years later and took over as general manager of the group’s KRIZ(AM) Phoenix. If his success came quickly as an on-air man, so it did as a behind-the-scenes manager. He’s been a company man ever since, rising through the ranks of vice president and general manager at KDWB-AM-FM Minneapolis-St. Paul, then a senior vice president for the group before taking over the top job.

Right now, Mr. Stevens says, “I have what I want. I have a forum.” Not only is there a better chance than ever for Gary Stevens to build that something but also to exert influence in shaping the industry. He’s just becoming active in the National Association of Broadcasters and the Radio Advertising Bureau, and readily expresses his concerns, be they the ratings services or AM operators “conceding their territory” to FM’s.

Despite the hail-fellow-well-met appearance, the frequent traveling, the invocation of executive team spirit, Mr. Stevens considers himself a “loner” with “no close personal friends.” With his “neck pretty far out” on his plans for Doubleday Broadcasting, he admits to having worries. Still Mr. Stevens is confident that “I never try to do anything I can’t do.”

There’s that “burning inner need. I want a good fight all the time,” he says, “if you make it, it’s worth it.”

And that, apparently, is what makes Gary Stevens run.
In fee not so simple

The FCC as currently composed is to be given credit for facing up to a problem that predecessors finessed or ignored—the reimbursement of fees illegally collected from broadcasters during one of those soak-the-licensee excursions by the bureaucracy. This commission proposes to return $33 million of $48 million that broadcasters paid under schedules that were twice declared unreasonable by the courts (BROADCASTING, Oct. 2).

Broadcasters naturally will wish for more. The National Association of Broadcasters has argued for a total return of the $48 million and perhaps will do so again in the comments that the FCC has solicited. Whatever the outcome, the FCC has at least made a serious effort to calculate a fair return according to its reading of the courts’ decisions.

It’s too bad the FCC didn’t stop at that. In the same procedure, the commission has undertaken to devise a new fee schedule that will, alternatively, return the costs of its operation or do that and in addition produce large sums for other uses. The latter project will run head-on into the House Communications Subcommittee’s rewrite of the Communications Act, where confusion enough already exists on the subject of fees, without the added venture into the same subject by the FCC.

In the long run, it seems to us, a decision about future fees must be made by the Congress. And perhaps it can be made in context with legislation to repair the disarray created by the appellate court two weeks ago in the WESH-TV case (BROADCASTING, Oct. 2). It is generally agreed that if that decision stands, no licensee with other media ties will be safe from challenge by an applicant without them.

Once again broadcasters may have to turn to Congress for license renewal relief—which they thought they had obtained in the FCC’s WESH-TV decision that has now been overturned. Is there some way to tie license equity into a license fee? Perhaps that is a question to think about.

Price of music

Aside from the uncertainty of predicting what any court will do, there is a danger, we think, that broadcasters may expect too much from the Supreme Court’s agreement, reported elsewhere in this issue, to review the so-called “per-use” music-license case initiated by CBS.

The idea of paying only for the music a broadcaster actually uses, instead of paying for an entire catalogue that goes largely unused, is attractive. CBS obviously thought so, and a court of appeals agreed—after a district court had disagreed—that the blanket licenses conventionally offered by the American Society of Composers, Authors and Publishers and Broadcast Music Inc. amount to illegal price-fixing. The court said ASCAP and BMI must offer per-use licenses, perhaps along with modified blanket licenses, to TV networks.

A Supreme Court ruling upholding that decision would obviously strengthen the hand of the All-Industry TV Stations Music License Committee in its efforts to get reductions in ASCAP and BMI fees. But since the appeals court’s decision dealt only in terms of per-use licenses for TV networks, its ultimate applicability to other broadcasters might depend on the Supreme Court’s language in sustaining it.

Just how many individual broadcasters would want a per-use license for local use, or have the manpower to use one efficiently, is far from clear to us. The filings on both sides paint a picture that seems especially bleak for smaller users. ASCAP warned of “sure turmoil” in the music-licensing world if the lower court’s decision is upheld. BMI envisioned “the destruction of the music-licensing organizations,” and CBS held out much the same prospect: a world in which music publishers would do the licensing and ASCAP and BMI would withdraw from the market, at least where networks were concerned. For a network organization with a large staff and enormous computer capacity, keeping track of individual uses of separately licensed musical works may promise lower music costs than are imposed by blanket licenses. It remains to be seen, however, whether, say, the average radio station would find that choice to be equally economical.

If the Supreme Court holds the blanket licenses to be legal, the case presumably will end right there; for broadcasters, nothing much will change. If the court affirms the appellate court’s decision, the case goes back to the district court for development of per-use guidelines—after which, we suppose, another round of appeals may be in order. The decision may, of course, find gradations somewhere between straight affirmation and complete reversal. Our own view is that all broadcasters ought to have an option between per-use and blanket, as the appeals court held. But it is a complicated case and could have complicated results.

Help wanted

In a “Monday Memo” in last week’s issue of this magazine, a prominent advertising agencyman challenged broadcasters to accept more of the advocacy advertising that is showing enormous growth—most of it in print media. Joseph Brouillard, president of the Corporate Communications Division of J. Walter Thompson, forecast that many companies will “take more public stands on issues affecting their business or industry,” but most of those messages will go to print.

“The broadcast media,” wrote Mr. Brouillard, “have studiously avoided anything even approaching controversy.”

Well, of course, there is a reason, and it is beyond the broadcasters’ control. It is the fairness doctrine imposed by the U.S. government. As long as that doctrine is on the books, broadcasters can accept no advertising that espouses a point of view on a controversial issue without encumbering themselves with an almost endless commitment to root out and present all other points of view.

If Mr. Brouillard wants to put his clients on the air, perhaps he will recruit them to stand with broadcasters in the fight for relief from government repression.
What was once a funny little idea is now a 1.6 billion dollar industry: Instant photography.

What was the essence of this genius? Open mindedness. The ability to step away from the rules of the day and see things in a new light, refusing to let preconceived notions stop you from seeing all your opportunities.

Open mindedness. The secret ingredient in every major business advance.

And for advertisers and agencies who are looking for a more effective way to use their media dollars the same principle applies. Especially in the way they buy spot television.

Because advertisers and agencies now have a major alternative to network affiliated stations: Independent television. 53 INTV member stations in 37 important markets coast to coast.

They significantly enhance your ability to reach quality target audiences with improved efficiency.

A national study by Arbitron compares the quality of network affiliated and independent television station audiences. It shows that in every significant measurement of audience quality, such as income, education, occupation, credit card ownership and airline travel, these audiences are comparable.

It sheds new light on the growing impact of independent television.

We'll be happy to provide details. Contact: INTV, 19 W. 44 St., N.Y., N.Y. 10036/(212) 575-0577

The same open mindedness that created a new camera industry can open new profit opportunities for you.
