Nickelodeon⁸⁹ is a service mark of Viacom International, Inc

WAN! CON.

The first commercial-free education and entertainment network dedicated to kids 8–16.

At WAM!, we've done our homework. Parents don't trust children's television.*

The ENID BLYTON ADVENTURE SERIES a U.S. Premiere from the internationally acclaimed children's author.

They're frustrated that kid's tv doesn't reflect their family values.

- They think it contains too many commercials and too little educational content.
- They don't know where to turn when their kids outgrow Nickelodeon.

WAM! fills the void. WAM! is the commercial-free network that will give your community image a boost. While other networks ask kids to grow up too fast, WAM! provides the positive educational programs parents want. Plus, engaging entertainment that kids actually helped select. WAM! features smash international hits like the U.S. premieres of <u>Elly &</u> <u>Jools</u> and <u>Legends of the Hidden City</u>. Plus family favorites <u>Our House</u>, <u>Eerie. Indiana</u>, movies, literary classics and more.

U.S. Premiere of SKY TRACKERS— features high-tech problem tolving.

OUR HOUSE warm-hearted family drama.

WAM! is committed to education. We deliver more hours of educational programming for kids than any other network—an unprecedented 60 hours per week. Each weekday WAM! has 12 hours of subject-specific programs cleared for teachers to tape and replay in the class-

room. At last there's a network that helps parents and teachers share in their kids' learning experience.

WAM! Kids love it. Parents trust it.

To launch WAM!, call your representative: Joe Boyle (NE) 908-499-9699 • Paul M. Galka (C) 847-827-0033 Kurt Heisler (W) 310-477-9922 • Cindy Felnberg (SE) 404-851-1355 Tom Snethen (TX) 214-417-2888 • Robin Feller (TC1) 303-267-4020 Leslie Nittler (New Media) 303-267-7382

*Summary of findings from a random nationwide survey conducted by Bruskin/Goldring Research (3/18/96), among 516 adult cable subscribers with children between the ages of 8 and 15.

Ownership rules on the way

Broadcasting & Cable

FCC decisions on pending station sales may set policy on TV signal overlaps and large TV-radio combinations before rulemaking gets under way this fall

By Chris McConnell WASHINGTON

The FCC later this fall plans to launch a review of its broadcast ownership regulations, but new rules could emerge much sooner.

FCC officials are considering station sales that could alter key local TV and radio ownership policies well before commissioners wrap up their rulemaking.

Some deals have officials wondering whether they should permit companies to own stations closer together than previously allowed. Others have FCC staff asking how they should apply new laws on owning TV and radio stations in the same market.

The questions arise from a series of requests by broadcasters to waive ownership restrictions and clear the way for planned station buys. While granting such waivers would allow the stations to close on their deals, it would also relax ownership policies for the rest of the business. "With each [waiver], you've got a new precedent," says an industry observer

That prospect worries some at the FCC. Commissioner Susan Ness says that she prefers to address the local ownership rules

FCC commissioners must balance broadcaster need for prompt action on station deals with desire to make policy in formal rulemakings.

this problem," says another FCC official, maintaining that the commission needs to find a "golden mean" between promptly processing applications and not undermining existing rules.

Commissioner James Quello maintains that

directly. "In general terms, I do not like to do rulemaking by waiver," Ness says. But she also acknowledges the interest of accommodating station transfers. "We try to balance the needs of broadcasters with good pub-

"We're constantly dealing with

1 Both stations are being bought; 2Woods owns both stations. Overlap will occur if wDFx-TV power increase and wcov-TV new antenna site applications are granted; 3Applicant argues that overlap would be substantially less due to obstructing terrain; 4 Figures assume grant of minor change application. new market conditions merit a fresh perspective on the broadcast waiver requests.

"As long as there is no market dominance, we have to review it with a new attitude," Quello says.

Several of the waiver requests concern the FCC's policy on owning television stations with overlapping signals. The so-called duopoly rules generally forbid it, but Fox, NBC and others are asking the FCC to waive the rule so that they can close on station acquisitions.

The duopoly rules bar companies from owning two or more stations in a market or even from owning two stations in adjacent markets with overlapping signals. The waiver requests ask the FCC, in essence, to relax the rule to permit overlap of the outer portion of signals—the grade B contour, in FCC parlance. The grade B signals extend up to 70 miles from a station transmitter.

The FCC is preparing to gut the duopoly rules. The 1996 Telecommunications Act requires the FCC to consider relaxing the duopoly rule to permit ownership of two UHF stations in a market or possibly one UHF and one VHF. And on its own initiative, the agency has proposed relaxing the rules to permit overlap of the grade B signals of any two stations.

But the completion of that rulemaking is months away. The agency plans to launch the rulemaking this month or next. That means it will probably not be ready to issue final rules until some time in the first quarter of next year.

Broadcasters looking to wrap up station acquisitions do not have that kind of time. Fox, NBC, US Broadcast Group and others are asking the FCC to waive the rule now in cases where it would block planned station buys.

Commission officials say the FCC grants waiver requests only when it sees a good reason for doing so. In several cases, for instance, the FCC has waived the duopoly restriction where one of the two stations faced bankruptcy, and the new ownership structure offered a possibility of reviving the station.

FCC officials, however, will not have such circumstances to point to if they decide to grant some of the pending applications. Broadcasters, instead, are relying on such factors as the distinctiveness of the different markets and the number of competing services.

The lack of a pending bankruptcy or a comparable circumstance has many puzzling over how the FCC will treat the waiver requests. "The staff has given no indication that these will be granted as a matter of course," says one observer.

Also pending at the agency are a series of applications by broadcasters seeking to own multiple radio stations and a TV station within the same market.

The new law allows the FCC to liberally grant requests in the top 50 markets by broadcasters seeking to hold TV/radio combinations. The law, however, does not say how the FCC should treat cases where the broadcaster would own several radio stations in the same market.

And applications to do so by Westinghouse, Jacor, Clear Channel and Cox Broadcasting have officials asking how the law should apply in such cases.

"They don't know the answer," says one broadcast lawyer. An FCC official agrees, adding that the commission will address the issue in its ownership rulemaking this fall.

The commission in the past has applied the liberal waiver policy only to cases involving a single radio station in a market, and has granted applications to combine a TV station with multiple local radio stations on a caseby-case basis.

What's new in the current batch of TV/radio applications is the sheer number of stations involved. A grant of

Clear Channel's latest radio acquisition in Memphis, for instance, would give the company ownership of one TV and seven radio stations in the market, plus control of another TV through a local marketing agreement. requests likely will wind up in the hands of commissioners before the final draft of that rulemaking for caseby-case analysis. "It's a matter of market dominance," Quello says. "The FCC has to look at the competitive situation in the market."

The question of how to treat such

FCC also has eye on Jacor

The Justice Department may have signed off on Jacor's bid to buy Citicasters Inc., but the FCC has not wrapped up its review.

Justice approved the \$774 million deal last month on the condition that Jacor limit its share of the Cincinnati radio revenue to 50% by spinning off one of its radio stations there. Some broadcasters now are concerned that the deal could attract additional limits from the FCC.

FCC officials are silent on the specifics of Jacor's application. But at least one commissioner insists that any Justice Department cap shculd not limit the FCC's review of broadcast merger applications.

"The commission is not bound by whatever position the Lustice Department has taken," says Commissioner Susan Ness. She acds that the FCC's evaluation of a deal's public interest implications differs from the Justice Department's antitrust analysis. -CM

Top of the Week

Justice looks at Rochester radio

ARS control of 62% of revenue, 49% of audience raises antitrust concerns

By Donna Petrozzeilo **ROCHESTER, N.Y.**

n his 23 years of radio broadcasting in Rochester. N.Y., WDKX(FM) owner Andrew Langston cannot remember a time when competition loomed so large.

Langston also can't remember a time

when the U.S. Department of Justice stepped in to investigate a possible antitrust violation by a Rochester radio station owner.

Yet American Radio Systems' control over eight signals in the market, pending its \$30.5 million acquisition of four stations from the Lincoln Group, has put the city's smaller broadcasters, and the feds, on alert.

"They have more or less a monopoly of the market, and that is not the American way." Langston says of

way," Langston says of ARS. "It is not a level playing field." Langston, with wife Gloria. has managed urban wDKX, Rochester's sole urban station. for 23 years.

"The day of the entrepreneur making an impact in a market like Rochester is over," says Alan Bishop, vice president and general manager of rock wMAX-FM Rochester.

With stations from the Lincoln Group, ARS will control wCMF-AM-FM, wRMM-FM, wHAM(AM), wVOR-FM, wPXY-FM,

Of the 20 radio stations licensed to Rochester, ARS would control eight. wDKX(FM) owner Andrew Langston says ARS may monopolize the market.

wHTK(AM) and wNVE-FM, all in Rochester. That cluster gives ARS control over roughly 62% of Rochester's nearly \$30 million in radio revenue for 1995 and nearly 49% of the market's estimated 146,500 averagequarter-hour audience.

Although ARS has not exceeded the number of stations it is permitted to hold in one market, questions remain about whether it is violating antitrust regulations.

In recent weeks, U.S. Department of Justice officials questioned several local broadcasters, advertisers and agencies about their concerns over ARS's proposed deal and its potentially adverse effect on competition. There is speculation that the DOJ may require ARS to divest one of its Rochester stations to

Sinclair re-ups Fox affiliations

HOLLYWOOD– Sinclair Broadcast Group signed five-year extensions with Fox for the eight Fox affiliates that Sinclair either owns or programs, the network announced last week.

"The Sinclair Broadcast Group is one of the most progressive media companies in the industry today," says Chase Carey, Fox chairman. "They share our commitment to the future of broadcasting, and we're pleased to be able to continue our relationship with them."

The agreements, each of which includes a five-year renewal option, cover wPGH-TV Pittsburgh; WBFF Baltimore; WTTE Columbus, Ohio; KABB San Antonio, Tex.; WSMH Flint, Mich.; WDKY-TV Danville/Lexington, Ky.; KDSM-TV Des Moines, Iowa, and WYZZ-TV Bloomington/Peoria, III.

Sinclair is one of the largest broadcast groups in the country, owning or providing programing or sales service to 28 TV and 25 radio stations in 26 markets. The television group reaches roughly 15% of U.S. TV households and also includes ABC, CBS and UPN affiliates. —LR bring the group's control over market revenue under 50%.

Broadcasters fear that ARS will dictate radio commercial rate structures in the market. either by raising or lowering rates, or by selling inventory on multiple stations in combination—or "package"—deals.

Langston says he fears that ARS will raise rates and offer

better contest awards to listeners, leaving him no alternative but to raise rates. From a programing standpoint, he also fears that ARS may change the format of one of its stations to urban to compete directly with wDKX.

Bishop worries that ARS will lower ad rates at its stations "to go after the largest share of the money [revenue], preferably money from agency-oriented advertisers, and shut the smaller stations out of business. If you are an advertiser and want to go with ARS stations and not buy anything else, you could. and not miss much."

Bishop is also concerned that ARS could attract Rochester's top radio sales executives with higher salaries and better benefits, spelling a loss to individual broadcasters.

Around the Rochester market, advertising agency executives and leading radio advertisers say that if ARS raised inventory rates, they might not buy commercial radio at all.

Randal Simonetti. vice president of public relations for Rochester Telephone, says "the fear is that when something appears monopolistic, it is possible that rates could be increased. But if one medium became noncompetitive because of pricing, we would consider using other media."

Jay Advertising's Mariann McCormick, director of marketing for the Rochester firm, says that if any radio group monopolized the market and raised rates, agencies "would look at alternatives to radio."

Regardless of the outcome of the DOJ investigation and ARS's pending station deal. Langston says, he will stick it out on his own. Other companies call daily with offers to buy wDKX, Langston says, but he has refused them: "I'll do whatever it takes, legally, to stay in the market."

Gabelli beefs up Cablevision holdings

Investor seen buying at bottom of market

By Price Colman **DENVER**

group led by Mario Gabelli has increased its ownership of Cablevision Systems Corp. Class A shares to 20.9% in moves apparently intended to capitalize on Cablevision's depressed stock price.

The group, which includes Gabelli Funds Inc. subsidiary GAMCO Securities Inc. as the largest investor, purchased 143,000 Class A shares between Aug. 7 and Aug. 29 for prices averaging \$40 a share.

The purchases bring the group's holdings to 2.4 million shares. Gabelli was traveling and unavailable for comment on his reasons for increasing his holdings in Cablevision. Some have speculated that he might be considering a takeover run at the cable MSO.

But the fact that his group has purchased Class A shares, with one vote per share, as opposed to "supervoting" Class B shares with 10 votes per share, makes that scenario unlikely. Cable industry analysts suggest instead that Gabelli simply is taking advantage of a buying opportunity.

Gabelli "is a smart investor," says Chuck Kersch of Neidiger Tucker Bruner in Denver. "This is a very intelligent move. He's showing a lot of foresight."

Over the past year.

Cablevision stock's performance has mirrored that of the cable sector as a whole, trending down as investors twitchy about telecommunications competition sold shares. Cablevision shares (Amex: CVC) have lost more than 38% of their value during that

a whole?

Mario Gabelli is buying low.

"I hope so," says Jessica Reif of Merrill Lynch. "I certainly think that will happen. I think this is the bottom, and Mario Gabelli typically has been a value in

time, dropping from a 52-week high of \$63 to a 52-week low of \$38,875. Does the Gabelli group's move signal a turnaround for the cable sector as

> Mario Gabelli typically has been a value investor. With the stock trading at a historic low of six times cash flow, it seems [that] for the value investor it's the right time to up holdings."

> Cablevision shares were hit particularly hard after the late February announcement of the US West/Continental Cablevision deal. There had been speculation, never confirmed, that US West was talk-

ing to Cablevision about a deal similar to the one the telco cut with Continental.

Because Cablevision is one of the few cable operators that have not struck a deal with a telco or other partner, it probably will continue to be the subject of rumor and speculation.

"They have a terrific cluster in New York City that is very attractive to a number of cable companies," says Reif. "It will always be an acquisition target as long as it remains an independent company."

That has rekindled speculation that Cablevision might spin off its Rainbow Programming arm into a separate, publicly traded company and then sell off cable holdings.

"I think [Chuck] Dolan is going to spin out Rainbow, then sell the cable holdings and keep Rainbow," says a source in the investment community. "He wants to be a provider of services instead of in the distribution business.... US West is the logical buyer for those holdings."

US West's perspective, however, is that the Continental deal will give the telco the critical mass in cable it seeks. "We're comfortable that we can achieve our strategic goals with the footprint we would have after the merger," says US West spokesman Steve Lang. "That's not to say there aren't trades and fine-tunings of clusters that wouldn't go on."

Viacom, Redstone buy back stock

NEW YORK—Viacom took a major step last week toward trying to boost investor confidence and its sagging stock price. Viacom and its parent, the Sumner Redstone-controlled National Amusements Inc., will buy up to \$250 million worth of Viacom stock (Amex: VIA) apiece.

The stock's value has dropped 30% in the past 12 months from a high of \$54.25 last September. The news was well received on Wall Street last week, with the stock rising \$2, to \$33 per share, on the news Thursday (Sept. 5) and closing at 33 on Friday. Analysts had anticipated that the company would take some action, given its \$10 billion in debt

would take some action, given its \$10 billion in debt and the lackluster results from its home video rental chain, Blockbuster Entertainment. The buy-backs, which will start immediately, could retire as much as 6% of the stock now in public hands, analysts said.

Smith Barney senior media analyst John Reidy said that the announcement also signaled "management confidence in the company's future performance. It's meant to drive the stock up, but nobody buys back just to make the stock go up. It reflects management's view that the issue was oversold, but also, trading in the low- to mld-30s, it's as good an investment as they see." The move comes shortly after Viacom spun off its cable system subsidiary to a new public company controlled by TCI.

That move was greeted warmly by investors because it removed some Viacom stock from the market and took about \$1.6 billion in debt off Viacom's books. The company has an Oct. 8 meeting with analysts. —SM

Matoian out, Roth in at Fox

By Cynthia Littleton and Lynette Rice

HOLLYWOOD

ox Entertainment Group President John Matoian abruptly ended his two-year tenure at the network last week and was replaced by Peter Roth, president of Fox's production arm, Twentieth Century Fox Television.

Rumors had circulated for months that Matoian would be replaced as Fox's head of programing, although insiders say it was his decision to leave. Sources say Matoian had another year on his contract, and that top brass wanted him to sign up for another three.

Matoian reportedly thought that his authority had been undercut by the July promotion of Fox Sports President David Hill to a new management post overseeing the network and other divisions within Fox Television. Sources close to the network say Hill began to take a more active role in marketing and promotion strategies for the new season and may even be reconsidering Matoian's decision to cancel America's Most Wanted.

Matoian put a positive face on his departure. "I have enjoyed my stay at Fox and am proud of my accomplishments and the team of people who helped me mature this 'weblet' into an aggressive, competitive network.."

Fox insiders say still more staff changes could be in the works.

Roth will mark the third new programing head to come into Fox since Peter Chernin left the post in 1992. Since then, Fox Chairman Rupert Murdoch has shown little patience with his programing chiefs.

Roth has been president of Twentieth Century Fox Television since June 1994. Prior to joining Fox in 1992, he was president of Stephen J. Cannell Productions for six years.

Matoian was hired in July 1994 to hroaden the network's demographic appeal, launching such comedies as *Ned and Stacey* and the drama *Party of Five*. He went to Fox after two years as head of movies and miniseries for CBS Entertainment.

Twentieth rolls out slate

HOLLYWOOD—Twentieth Television unveiled last week a wide-ranging development slate for 1997 that includes two strips for syndication, 10 TV movies for Fox and 32 episodes of A&E's Biography.

Twentieth offered the sneak peek at the proposed projects as a signal to the industry that the company is emerging from a quiet period

with ambitious production plans.

By early next year, Fox's syndication arm will be supplying programing to the largest station group in the country. When Fox parent News Corp.'s buyout of New World Communications Group is completed. Fox will have 22 major-market O&Os covering nearly 40% of the country. The latest round of station group mega-mergers has put control of the domestic syndication market in the

'Pretty Poison' is one of Twentieth's movies that will air on Fox.

hands of a few big broadcast players, led by Fox.

"There's a lot of production going on here," said Rick Jacobson, president of Twentieth, adding that the company is also pursuing first-look deals with outside producers.

In the works for syndication is the game show strip Your American Pop Quiz, described as a pop-culture quiz show. The Collectibles Show is a variation on fX's Personal fX, which invites viewers to bring in their collectibles and antiques for appraisal and auction. The show has interactive elements that involve the studio audience and viewers. Also planned are an action hour and a weekly sitcom set in a high school.

The Fox TV movie projects include two new installments of the *America's Most Wanted* franchise and two more *Alien Nation* sci-fit thrillers. In addition to the *Biography* order, Twentieth's cable projects include a history of 20th Century Fox for AMC and a two-hour special celebrating *Hollywood Aliens and Monsters* for A&E.

Last week's announcement marked Twentieth's first major procuction initiatives under the leadership of Jacobson and Peter Faiman, president of programing and production. Jacobson wiped most of Twentieth's production and development slate clean shortly after joining Twentieth late last year, canceling the long-running magazine *A Current Affair* and other first-run shows.

Twentieth also surprised the station community last month with the decision to pull the plug on late-night strip *Loveline* just a few weeks before its scheduled premiere. *Loveline* was one of three new first-run entries for the 1996-97 season that Twentieth will soon inherit from New World Entertainment.

Jacobson said the company has spent the past few months evaluating the programing needs of the Fox stations and opportunities in the overall marketplace. With off-network prices rising and fewer familyoriented sitcoms on the networks, Twentieth's weekly sitcom, for example, is designed to meet the demand for affordable afternoon/ evening transitional programing.

"We're looking at a business and marketplace that [are] very different from just a year ago," said Jacobson. "What we're trying to do is build some assets. —CL

Broadcasters campaign for Washington jobs

Talk show hosts, anchors target one Senate, five House seats

By Heather Fleming **WASHINGTON**

S ix broadcasters hope to parlay their communications skills and community ties into political careers this year. Five are running for the House; one, for the Senate.

If successful, they will join several former broadcasters on Capitol Hill: representatives Ron Klink (D-Pa.), Scott Klug (R-Wis.), J.D. Hayworth (R-Ariz.), Henry Bonilla (R-Tex.), Harold Rogers (R-Ky.) and Mike Ward (D-Ky.) and senators Conrad Burns (R-Mont.), Kay Bailey Hutchison (R-Tex.) and Jesse Helms (R-N.C.).

There are "really a lot of comparisons between the two jobs," says Klink. "You have to be a very quick study [and] a good listener, [and you] have to communicate your ideas to the populace."

Republican Ronna Romney is a Detroit radio talk show host taking on a

three-term incumbent, Michigan Democratic Senator Carl Levin. Recent polls conducted by Levin's campaign show Romney down by 10 points, with 46% supporting Levin. Romney, daughter-in-law of former Michigan governor and presidential candidate George Romney, says the numbers show it is a "winnable race."

Romney says that her talk show experience on wJR(AM) led her into politics by making her aware of people's frustrations with government. In 1994 she was narrowly defeated in the Senate Republican primary.

"There comes a time where you say it's time to put action behind words," she says. "It's easy to get behind a microphone and talk."

Sharing Romney's motivation is fel-

Ronna Romney (R), Detroit radio talk show host

Anita Rufus (D), Palm Springs, Calif., radio talk show host

low radio talk show host and Democrat Patrick Combs, of KLIN(AM) Lincoln, Neb. He's hoping to defeat Republican Doug Bereuter for a House seat in November. Bereuter, a well-financed nine-term incumbent, won the '94 election with 63% of the vote, leading Combs to refer to his effort as the "ultimate David-and-Goliath race."

"What really energized me this time was to hear the frustration [in] people's voices every day, and most of the time it focused on government," Combs says.

Another radio talk show host, Anita Rufus, will challenge freshman Republican Sonny Bono for the House seat representing Palm Springs, Calif.

Rufus began her career in 1992 at KPSI(AM) Palm Springs. Her radio experience helped to boost her name recog-

Patrick Combs (D), Lincoln, Neb., radio talk show host

Jay Johnson (D), Green Bay, Wis., TV news anchor

nition throughout the district, an important asset in a race against a former entertainer who enjoys 99% name recognition, a campaign spokesperson said.

Mark Baker, an anchor and reporter at wGEM-TV Quincy, III.,

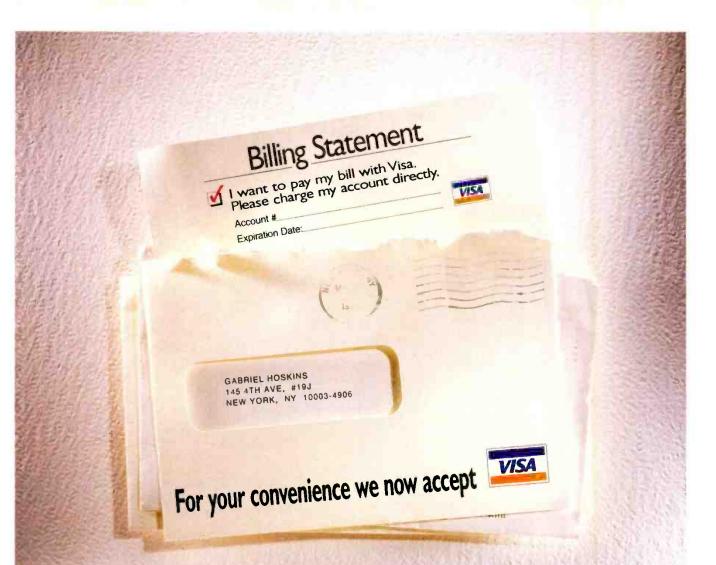

is the Republican candidate for the 17th congressional district in Illinois. He is running against seven-term Democrat Lane Evans. "As we started our family, I began to think a lot more about the future, and a lot of things bothered me about the direction our country is going," Baker says. "In journalism it is not my prerogative to make my point of view known."

Connie McBurney, a 24-year veteran of KCCI(TV) Des Moines, Iowa, is running against freshman Representative Greg Ganske (R). Her broadcast journalism experience includes working as chief weather anchor for the station, an important job in the farming state. Active in community activities, McBurney founded a community development program and worked with Blank Children's Hospital on children's advocacy issues.

Thirty-one-year TV

veteran Jay Johnson is one of a handful of Democrats seeking the party's nomination for the vacant seat in Wisconsin's 8th congressional district. The Sept. 10 primary will decide who will face off in November to fill retiring Representative Toby Roth's (R) seat. Johnson enjoys widespread name recognition from anchoring news since 1981 in Green Bay at wFRV-TV and WLUK-TV. He also is active in community affairs, having volunteered for the local United Way and Easter Seals. As an anchor and reporter, Johnson has "gotten into the homes and factories [in the district]. I've gotten to be involved in people's lives as a reporter," he says.

All six broadcasters have left their positions, at least temporarily, while they run for office.

Success comes from hard work, great customer relations and knowing how to decorate your bill.

In today's world, success isn't something that's guaranteed. That's why businesses are starting to accept and promote the

Visa[®] card for payment of recurring bills. Because by doing this, they reduce late payments and bounced checks. Plus, they can avoid costly

service interruptions. But the biggest advantage to biller merchants is that it strengthens customer

relations by providing exactly what they want—a fast, flexible and worryfree way to pay. So call 1-800-847-2577 ext. 10 for more information on how Visa can help your business.

It's Everywhere You Want To Be.

Time Warner/ Turner deadline extended

By Rich Brown NEW YORK

Time Warner and Turner Broadcasting expect to close their proposed merger by mid-October but have not yet settled on a management structure for the new operation, and on Friday the companies filed with the SEC to extend their deadline through the end of the year.

Under the deal's original terms, either company could terminate the merger if it were not completed by Sept. 30.

A shareholder vote on the deal will be held Oct. 10 (pending formal FTC approval, possibly as early as this weekthis week), and the decision to extend that deadline to the end of the year was designed "just to have some breathing room," according to a Time Warner spokesman. He also said that nothing has been determined about the structure of the combined companies.

"The deal will go through," says Fred Moran, president, Moran & Associates, one of several media analysts who participated in a conference call with the companies on Friday. "The government took their pound of flesh and left the deal intact."

Moran says the "pound of flesh" refers to the curtailed position of Turner shareholder Tele-Communications Inc. As described by company officials during the conference call, TCI's original plan to have a 20-year price advantage over competing video delivery services for all of the Time Warner/ Turner networks has been reduced to a five-year advantage for just Headline News and TNT.

"We are not upset with the shorter term." says Robert Thomson, senior VP, TCI. No one knows what the competitive situation will be in the programing arena after five years, plus we have certain options with respect to renewal that take the sting out of it for us."

"Six months ago," says Moran, "I thought there was a 50-50 chance the deal would not go through, because I didn't think John Malone would give up that power."

Gozzel Gravit

WASHINGTON

Keeney on hold

Confirmation hearings on Regina Keeney's nomination to fill the vacant FCC commissioner's slot have not yet been scheduled, and committee chairman Larry Pressler (R-S.D.) is unsure whether they will be. "I have to consult with my colleagues on the committee ... and with [Senate Majority Leader] Trent Lott to see what the thinking is." Pressler said last week. Lott (R-Miss.) sounded a more pessimistic note. "I don't think so," he responded when asked whether Keeney's nomination is going anywhere. A spokesperson for Lott said the nomination was "not on our radar screen," and the Commerce Committee staff said they were told that Lott's priority is to finish up appropriations bills before the beginning of the new fiscal year.

TCI searching for DBS home

Tele-Communications Inc. may be forced to look beyond Canada to launch its DBS service, some industry observers say. Last July, the FCC denied TCI's application to launch a DBS satellite in an orbital slot owned by Telesat Canada. The commission is scheduled to decide on TCI's reapplication by the end of September, but one well-placed industry source says it's unlikely to happen that soon. **TCI Senior Vice President Bob** Thomson acknowledges that TCl has "minimal flexibility" to stretch its end-of-September deadline for FCC approval. TCI's next option is to launch a U.S.-based satellite in its 119 degree orbital slot this December, but industry analysts say TCI also may be looking beyond North America for another international satellite partner. "If they don't get into the Canadian slots, there are lots of other slots out there," says Jim Schaeffler, chairman of DBS market research firm the Carmel Group. "Everybody is talking about Mexico, but there are other slots held by Bermuda and the Bahamas." Thomson says that although TCI is aware of other available DBS slots, "we do

not have active conversations with respect to any of those."

NEW YORK Just looking

A mong observers present last week for Fox News Channel's program unveiling in New York was former America's Talking programing chief Beth Tilson, who had been handpicked to head programing for America's Talking by former AT president Roger Ailes, who now heads Fox News. Despite her attendance, Fox insiders say she is not in line for a post at the new network.

SFX gets into syndication

S FX Broadcasting may take its first step toward syndicating its on-air talent. SFX acquired the 33-station John Boy and Billy Syndication Network (we're not making this up) last week through its purchase of the network's home station, wRFX(FM) Charlotte, N.C. The acquisition marks the company's first venture into distributing syndicated programing. Mike Ferrell, soon to be named president of SFX, said that "having the network as part of SFX increases our ability to potentially syndicate on-air talent at our stations."

DENVER

Troubled partners

The efforts to ease the friction in the Time Warner Entertainment/ US West partnership have been put on hold while Gerald Levin and Ted Turner work out control issues involving the Time Warner/Turner Broadcasting merger (see story, left). Those efforts should resume as soon as possible, suggest analysts who contend that it serves US West and Time Warner best to work out their differences. "Time Warner Entertainment is the most important thing on US West's plate right now," says an investment source. "US West is either going to end up with all or most of the cable systems, or majority control of that partnership." For the record, both US West and Time Warner say that talks about restructuring the partnership are on hold.

Free-TV coalition seeks roadblock for candidates

Group hopes for standardized approach to free airtime

By Chris McConnell WASHINGTON

B ackers of free political airtime who hope to convince broadcasters to put up a TV "roadblock" for candidate statements will need to overcome some obstacles of their own this week.

Network executives will convene in Washington on Wednesday to discuss coordinating their various free-time proposals and perhaps delivering simultaneous coverage similar to that of the President's State of the Union address. About 15 broadcast and cable industry executives—as well as Clinton and Dole campaign representatives have been invited to the meeting by the Free TV for Straight Talk Coalition.

The coalition, which includes former broadcasters Walter Cronkite and Roger Mudd and is led by former *Washington Post* reporter Paul Taylor, has been pushing the networks to offer free time. Now that Fox. ABC, CBS, NBC and PBS have all proposed a variety of free-airtime plans, the coalition wants to see if the networks can create a more standardized format.

PBS President Ervin Duggan and News Corp. Chairman Rupert Murdoch have said that they support creating a TV roadblock for the candidate statements, and several other industry sources say they are keeping an open mind about the roadblock issue.

But they also are keeping an eye on what they describe as a series of drawbacks to the idea.

CBS Executive Vice President Martin Franks cites last month's political conventions' low ratings as evidence against a homogenized offering. He says that a more varied approach—in which candidate statements air at different times of the day rather than all at once—will come closer to achieving the free-airtime initiative's objectives. "We are more likely to reach more voters," Franks says.

Sources at ABC and NBC also voice doubts about a roadblock, and some point to logistical hang-ups. One industry observer questions how all the networks could fit a coordinated candidate package into existing fall program and advertising schedules.

"It's difficult to do in this time frame," says the source, who also questions how the candidate statement will be produced and distributed to broadcasters. "There are just a lot of questions."

Coalition leader Taylor concedes that tough logistical issues exist, but he says there are also potential payoffs.

"It will drive journalistic coverage," Taylor says. He voices hopes that the free TV segments will provide a break from the scripted material that characterized the conventions.

Taylor and PBS's Ellen Hume maintain that the candidate segments could constitute a political miniseries if the opponents were to respond to each other's statements on alternating nights. Viewers, they say, could tune in at a certain time with the expectation of hearing an answer to the previous night's statement by the opposing candidate.

"There could be drama to it," says Hume, executive director of PBS's Democracy Project.

Time Warner loses at federal appeals court

Cable company had asked court to stay FCC must-carry order

By Chris McConnell

ime Warner New York City Cable Group last week lost a skirmish in the cable industry's war against the must-carry law.

The U.S. Circuit Court of Appeals in Washington, D.C., rejected the company's attempt to block an FCC ruling that required it to carry WMBC-TV Newton, N.J., on cable systems in Manhattan and Staten Island beginning Sept. 5. The company had asked the court to stay the ruling while Time Warner seeks review of the commission action at the FCC.

The company has maintained that the Manhattan and Staten Island cable systems do not fall within the area of dominant influence (ADI) of WMBC-TV, an Asian-language broadcaster.

"It's a station that no one in New York has even heard about," says Dick Aurelio, president of Time Warner New York City Cable Group. Aurelio Dick Aurelio says the FCC ruling will force his cable systems to drop the International Channel from the Manhattan system and the Travel Channel from the Staten Island system.

says the FCC ruling will force his cable systems to drop the International Channel from the Manhattan system and the Travel Channel from the Staten Island system.

The cable systems last week informed viewers of the possible switch in a message crawl that appeared on the Preview Channel in New York. "Time Warner Cable has been ordered by the FCC to add wMBC-TV on Sept. 5."

The company had hoped that the appeals court would allow it to put off dropping the two cable programers while it contested the FCC ruling. "A limited stay will avoid the harm caused to Time Warner by [the FCC ruling's] forcing it to drop established programers to make room for wBMC-TV," the company argued in its Aug. 28 petition to the court.

Time Warner also cited the Supreme Court's approaching review of the must-carry law. The high court is scheduled to hear oral arguments next month in the cable industry's challenge to the law.

The National Association of Broadcasters and the Association of Local Television Stations had argued against staying the FCC's ruling.

B. H. H. Day

Edited By Chris McConnell

NAB, MSTV prep broadcasters for digital allotment battle

The National Association of Broadcasters (NAB) and the Association for Maximum Service Television (MSTV) are prepping broadcasters for the approaching battle over the FCC's plan to allot each station a new channel for digital television. The two groups last week briefed about 40 lawyers on the plan, which includes a proposal to reallocate channels 60-69 away from broadcasting. Next month the groups will hold briefings on the allotment plan for

station executives across the country, beginning with an Oct. 1 meeting in Washington. Briefings in St. Louis and Los Angeles are scheduled for Oct. 4 and 9, re-

spectively. An NAB spokesperson says the groups hope the educational initiative will result in a coordinated industry effort when broadcasters offer their comments on the allotment plan later this fall.

How I spent my summer vacation

FCC Director of Public Affairs Susan Sallet and her counterpart at the National Telecommunications and Information Administration, Paige Darden, put their public relations skills to use at the Democratic convention. Using vacation time and their own money, both volunteered as flacks. Sallet—whose mother, Anne Lewis, is the Clinton/Gore deputy campaign manager for communications—worked for Clinton/Gore campaign manager Peter Knight.

Somewhere, over the rainbow

GOP presidential nominee Bob Dole's economic plan calls for offsetting tax cuts with \$34 billion in spectrum auction revenue, but not even Dole's former Senate Republican colleagues are clear what spectrum will pay for it. Senator John McCain (R-Ariz.) says the money could be raised "from a broad variety of auctions but...that digital TV would probably be part of it." Fellow Commerce Committee member Ted Stevens (R-Alaska) says he doesn't "think you have to talk about [specific spectrum] at all" because "you can still estimate what we're going to get is at least equal to what we've got so far [from spectrum auctions]."

New ALTV board members

The Association of Local Television Stations (ALTV) elected two new members to its board: Al DeVaney, general manager, wPwR-TV Chicago, and Adam Ware, executive vice president, Silver King Communications Inc. Reelected to a board seat was Norris Reichel, general manager, wOFL-TV Orlando, Fla.

Fields bill to be marked up

The House Telecommunications and Finance Subcommittee this week is scheduled to mark up Representative Jack Fields's (R-Tex.) last legislative shot at reforming the FCC before he retires. Bill co-sponsor Representative John Dingell (D-Mich.) is not budging on a provision that would restrict the FCC chairman from traveling farther than 50 miles from Washington on business purposes for the next two years, a Dingell aide said. It is unclear whether the Senate Commerce Committee will take up the bill this year. When asked if he would have a bill of his own or would consider the House bill, committee chairman Larry Pressler (R-S.D.) said, "I haven't done anything new on that. I'll have to talk to my colleagues."

Pressler pressed

Senate Commerce Committee Chairman Larry Pressler (R-S.D.) is taking a beating in the South Dakota press. Contrary to Pressler

campaign ads claiming the Telecommunications Act of 1996 is lowering telephone rates for South Dakotans, the *Rapid City Journal*

reported that "the legislation so far has helped push up telephone prices, and cable TV rates are climbing too, in South Dakota and across the nation." The *Rapid City Journal* also reported that Pressler's commercials

"designed to portray him as a down-to-earth, small-town South Dakotan" fail to show the "high-style trappings of limousines and corporate jets that are Pressler's preferred mode of transportation." A syndicated column by Jack Anderson and Michael Binstein appearing in the Aug. 30 *Watertown Public Opinion* accuses Pressler of flip-flopping on his position on the Snowe-Rockefeller Amendment which gives public schools, libraries and hospitals in rural areas access to telecommunications services at discounted rates. Although Pressler initially voted against the provision in Commerce Committee markup, he supported it "once it reached the light of day on the Senate floor.... Not surprisingly, a Pressler campaign commercial makes no mention of his original opposition to the Snowe-Rockefeller plan."

Telcos appeal interconnection rules

Two local telephone companies are taking on the FCC's interconnection rules. GTE and the Southern New England Telephone Co. are appealing the rules at the U.S. Court of Appeals in Washington. They asked the FCC to halt implementation. If the request is denied, the telcos say, they will ask the court for the stay. The rules govern how incumbent telephone companies must interconnect their facilities with those of upstart competitors. Congress mandated the rules in the 1996 Telecommunications Act to boost competition. But local telcos claim that the rules are unfair, that they require them to provide interconnection below cost. "Requiring local companies to subsidize resellers—some of whom will be among the nation's largest companies-would not create true competition, would not encourage investment in facilities or innovation and would not create any new jobs," GTE Senior VP William Barr says in a prepared statement.

Krieg advances at WCA

Andy Kreig has two new titles and expanded responsibilities at the Wireless Cable Association. Richard Alston, the new president, appointed Kreig general counsel; the board elected him vice president.

COVER STORY

React with new educational-television guidelines from Washington, the industry is entering an era of education with a Capitol E. But while the mandates are a recent addition, TV that informs as it entertains is nothing new. Ken Burns, who elevated the medium almost single-handedly with The Civil War, is traveling west this time for PBS, which continues to pursue its charter of teaching and delighting with TV. It is not alone, however. Cable's Mind Extension University and Cable in the Classroom, for example, are adding their own class acts. Meanwhile, commercial broadcasters are working on getting credit for the educational shows they already air and on developing new ones.

HOW THE WEST WAS DONE

romotional materials bill *The West* as "a Ken Burns film by Stephen Ives." It is no surprise that Ken Burns, master of the genre, took on a documentary series with the scope and complexity of the American West. But how did co-producer and director of the series Stephen Ives, who grew up in the shadow of Walden Pond, come to have a love affair with the West?

"If the Civil War was an adolescent, violent episode in our national experience," says Ives, "the West was our coming into maturity, and so I was intrigued by it. The story had traditionally been told through stereotypes; then it was turned on its ear as a catalogue of conquests. The truth," says Ives, "is infinitely more compelling."

"I am passionately involved with the path of our country—who we are. The series was conceived by me at the time I was also doing the baseball series," Burns says. "Stephen worked with me on *The Civil War* and *Baseball*, so I knew that he was a person I could work with and trust with a big job. He was the day-to-day producer/director; I was executive director and creative arbiter. I became the foster parent."

The eight-part, 12 1/2-hour series begins with European explorers converging on the Native American world in the 1500s and ends in 1806 with America transformed as an industrial nation. Viewers will see stories of people from all walks of life, cultures and The West,' an eight-part series produced by Ken Burns and Stephen Ives, premieres on PBS Sunday, Sept. 15.

occupations who built and shaped the West.

"The pendulum of Western history interpretation has swung widely from that of gunslingers fighting off Indians to cataloguing the crimes against indigenous people," says Burns. "The West is something in-between that speaks to the human spirit."

Ives summarizes their focus another way: "The West is a complicated place. It's tempting to look at it as black-andwhite stories, a simple morality tale. But ultimately, I see the West as the fourway stop sign of American history, a place of surprising collisions of cultures. These stories that embrace contradiction and ambivalence are at the heart of what makes this series work."

of *The West*, which cost roughly \$8 million to produce. Burns says that GM's commitment to the project went

beyond funding. Too often, says Burns, "these programs are like skywriting that blows away. GM was very dedicated." The National Endowment for the Humanities, the Corporation for Public Broadcasting, the Public Broadcasting Service and The Arthur Vining Davis Foundation all contributed funding for the project.

An educational goal of the series, says Burns, is to serve as a "broad popular arouser, to ignite a general interest." Toward that end, GM has established a dedicated Web site, New Perspectives on the West, as a resource for college students enrolled in American history courses. The site offers 100 hours of audio and video clips, photographs, maps, music, behind-the-scenes profiles and text not seen in the series.

"We need students in this country to grapple with some of the tough issues that *The West* presents. Ives says. "To have a clear-eyed view of some of the enormous achievements is essential, but we shouldn't ignore the fact that there were tragic examples of manifest destiny."

In making the film, Burns says, he

Cover Storv

'The West' is the third collaboration for lves and Burns, who also worked together on 'The Civil War' and 'Baseball.'

learned "a thousand tiny facts. I tried to take these huge stories and tell them from the inside out." The series uses diaries, personal accounts and family perspectives to tell the story.

One interactive feature of the Web site invites visitors to post comments, a virtual opportunity to create personal family history. "History is intimate," says Burns. "The building block is to tell me about your family. What we'll learn is a tolerant, ambiguous history.... It isn't about answers but about questions. You can really discover yourself in the past, filled with a great amount of emotional undertone."

Users can access the site (www.gm. com/The West).

Other offshoots include a mammoth coffee-table book, three books for children and the soundtrack on compact disk. Turner has packaged the video series for home and rental markets, and Time-Life is offering the series through its tape-at-a-time plan.

Despite the marketability of the project. Ives insists there are no plans to approach commercial networks with the series.

"We couldn't possibly do this without the incredible resources of PBS. They give us the time and freedom to do these films the way they should be made," says lves, whose father is pastpresident and current vice chairman of the board of wGBH-TV Boston.

"No broadcaster does that. I'm a child of PBS—*Masterpiece Theatre* was almost a religious experience for me. The shows on PBS profoundly shaped the way I feel about this country, about history. It's a privilege for me to come back and present this series to the station."

A General Motors Mark of Excellence presentation, *The West* premieres Sunday, Sept. 15, at 8-9:30 p.m. ET, with each episode repeating at 9:30-11 p.m.

Noncommercial network broadening efforts with new shows, Internet, teacher guides

By Michelle Y. Green, special correspondent

ith many broadcasters scrambling to fill the void of "core educational programing." the Public Broadcasting Service is extending its reach with targeted off-air educational services and a new fall lineup.

PBS, a cooperative of 346 member stations that reach 98 million Americans each week, has become synonymous with educational programing, or, as one PBS executive puts it, "Education with a capital E."

Educational programing for children is becoming a bumper sticker-like phrase, says Stu Kantor. PBS director of corporate communications. "It's the 1990s equivalent of 'Let's do lunch.' The word 'education' was used as much at the July 29 White House conference as 'l' and 'we,' but we need to stop for a moment and ask what it means to provide a truly educational service to the children of America."

Building on the educational value of its programing, PBS has developed an array of educational learning services that targets special groups.

Reaching the teachers

The Teacher Publication Project is a collaborative effort of PBS and the Corporation for Public Broadcasting aimed at making PBS programing more accessible to teachers. At the heart of the project is *PBS Teacher Connex*, a curriculum-based guide to PBS programs. The monthly magazine contains advance notice of PBS children's and general-audience programs, with expanded program descriptions, PBS video offers. Internet resources

and special features. A boon to teachers is the expanded videotaping rights for classroom use.

"For many years, PBS has worked with producers, underwriters and unions to insure that teachers had the right to tape our programs and use them for a reasonable period of time," says Sandra Welch, executive vice president, learning services. "Almost all national programs have at least one year of off-air taping rights. This is important because a subject aired in September may not be needed in the classroom until January."

The CPB Teachers' Digest, a companion magazine that binds in PBS Teacher Connex three times a year, features teacher-written articles on how to teach PBS-based shows across the curriculum. PBS and CPB developed the joint magazines after a year's

A compelling formula for children's programming alliances.

Experience counts, and for nearly three decades, PBS and its member stations have created, co-produced and scheduled the highest-quality children's programming in the industry. From "Sesame Street" to "Kratts' Creatures," "Mister Rogers' Neighborhood" to "Wishbone," PBS has established an incomparable record of programming that delights and informs, charms and teaches.

The catalyst of new rules and new industry interest in distinguished children's programming is yielding some exciting opportunities and challenges. A compelling idea: We offer our expertise through consultation and partnerships with our commercial colleagues.

In sum: Call Alice Cahn, PBS Director of Children's Programming, or Byron Knight, PBS Project Executive, New Program Services, at 703-739-5041.

PART OF A HAPPY CHILDHOOD SINCE 1969.

IF P8S DOESN'T DO IT, WHO WILL?

worth of research, consultation and market testing of more than 1,000 teachers across the country.

"As broadcasters, we get in the mode of thinking fast, watching the competition and getting the product out," Welch says. "Sure, there are other publications that are bigger and fancier, but we feel really good that we took the time to listen to teachers and give them what they want."

Local PBS licensees stand to benefit from the teacher-outreach initiative. To date, nearly half of PBS member stations are participating in the project, imprinting their co-brand on the front cover of the magazine and piggybacking on PBS local and national on-air spots. Stations also have access to subscriber lists of teachers in their area for additional local outreach.

Although the project officially launches with this month's return of teachers to the classroom, prepublication promotions for the magazines already have garnered nearly 6,000 teacher subscriptions. Inaugural issues of the two publications are being mailed to 50,000 teachers free in September; charter subscriptions are available for \$12 per year for *Teachers' Digest*, which includes the bound-in *PBS Teacher Connex*.

PTV

PTV is a direct outgrowth of the government's Education 2000 goal that all children start school ready to learn. PTV is a comprehensive package of resources that includes award-winning educational series for children 2-12, between-program educational messages, and print materials that provide information about programing, parenting/caregiving and hands-on activities.

Between-program messages reinforce the educational concepts of a program the young viewer has just watched. Animated P-PALS appearing in such segments as *Go Find Out*. *Stick to It* and *Work It Out* prompt kids to explore, finish tasks and negotiate conflict.

Member stations work with local education and social-service agencies to provide workshops on how to use television as an effective learning tool. KCOS(TV) El Paso, for example, is working with a local communitybased organization to help provide attractive, ongoing educational services to migrant children.

PTV's national rollout is slated for this month. PBS executives project that it will reach 77% of American households this year, 99% by 1997.

Cover Story

Other learning services targeting specific populations include Mathline, a two-year professional development program for math teachers that is available for the first time this year to elementary school teachers; Going the Distance, which offers adults a chance to earn associate degrees through distance learning, and Ready to Earn, an initiative that prepares adults for the work force. Targeted to older, working, and minority populations, adult learning telecourses and other media-based programs are now available to more than 130 colleges via 56 public TV stations. Tying it all together is PBS Online (www.pbs.org), which provides teacher and user guides and community outreach materials.

New for fall

The crown jewel of the PBS fall lineup likely will be *The West*, an eight-part series by executive producer Ken will be supported by advertising on the Turner Networks and print ads in the New Yorker, People, Entertainment Weekly and Esquire. The video series hits store shelves on Nov. 15.

Notable among PBS's children's fare this fall is the debut of Adventures from the Book of Virtues, based on William J. Bennett's best-selling anthology. The animated series of classic tales debuted as three hour-long prime time specials (Sept. 2-4, 8 p.m. ET) and has additional episodes in production for the PBS winter/ spring 1997 season. Also appearing this fall is Where in Time Is Carmen Sandiego? (weekdays, 5 p.m. ET, beginning Oct. 7), a history-based spin-off of the popular geography education show, and Arthur (weekdays, 8:30 a.m. ET, beginning Oct. 7), the popular aardvark hero of children's book fame.

On the horizon

Pioneering in educational programing has long been PBS's bailiwick. Enter PBS Horizons, a planned informational and cultural cable service co-produced by wGBH-TV Boston and wNET(TV)

'Adventures from the Book of Virtues,' based on William Bennett's best-selling anthology, debuted last week on PBS, but episodes will air through spring.

Burns and director/co-producer Stephen lyes. Following the same formula as Burns's award-winning documentaries The Civil War and Baseball, this epic saga uses diaries, letters, vintage photographs and commentary from modern historians to chronicle the people, places and events of the American frontier. The 12 1/2-hour series premieres at 8 p.m. ET on Sunday. Sept. 15, and is underwritten by General Motors Corp. A Web site (www.gm.com/The West) features clips from the series, behind-the-scenes looks at production and interactive resources and games. The broadcast New York. The format will spotlight the country's greatest thinkers, scientists, authors, artists and teachers during appearances at major universities, libraries, museums and other institutions. Now in development, the project is on hold pending channel availability.

What about competition from specialty cable channels now vying for a slice of the education market? PBS points out that from October 1994 to September 1995, public television pulled a 2.2 average Nielsen prime time rating, compared with a 1.3 for TNT, 1.0 for Nick at Nite, 0.9 for Lifetime and 0.7 for A&E and Discovery.

<u>Some Kids Naturally Love Science. How</u> Do You Make It Come Alive For The Rest?

Young Einstein or no, science should be an exciting voyage of discovery for every child.

Prove it to them through the power of cable. Turn them on to the mysterious vastness of the universe as imaged by the Hubble telescope. Help them follow Max Plank's own voyage of discovery into the subatomic universe or share Marie Curie's passion for medicine. They'll dig into their books with new inspiration—and it won't cost your school a penny.

Cable in the Classroom is a public service of America's cable television industry. We offer hundreds of commercial-free programs designed to engage and inspire kids.

Call 1-800-743-5355 for a free program guide and more information on how your school can participate. There's one way all kids can learn to be young Einsteins: They can share his powerful curiosity about our world.

Putting The Vision Back In Television

Cable in the Classroom is a public service of the cable television industry.

Networks: A touch of classroom

Most claim some educational fare; say they are working on more

By Lynette Rice

ost of the network broadcasters are entering the fall confident that young viewers will find something educational in their children's lineups or promising that new series now in the works will satisfy

regulators' desire for more educational shows.

The Fox Children's Network thinks it can already stand tall with such series as Where on Earth Is Carmen Sandiego?, Life with Louie and C-Bear and Jamal. Carmen Sandiego offers lessons on history and geography, Louie provides socialization skills and C-Bear serves up lessons of life and responsibility, FCN says.

The network also says that its practice of running captions with Bobby's World and Rimba's Island will boost its voung viewers' reading skills, FCN President Margaret Loesch started the practice after receiving a letter from a viewer who said that closed-captioning not only benefited his deaf child but

improved the reading skills of a hearing sibling.

"The irony of it is that we have had in excess of three hours [of children's educational programing] for several years, so it is not a tall request for us," Loesch says.

NBC calls on teen psychologists and educational consultants to insure educational programing for teenagers—its target market with Saturday morning shows such as Saved by the Bell: The New Class and California Dreams. Both tackle such subjects as self-esteem and teen smoking.

dren's lineups or promising that new "We will comply. We were the series now in the works will satisfy first network to address the Chil-

Schwartz says. "If you're going to preach to teenagers, they'll just turn on another channel. Our shows are definitely doing what we needed to do."

CBS is rolling out two new shows—Bailey Kipper's P.O.V. and Secrets of the Cryptkeeper's Haunted

> an additional hour of children's programing this fall. P.O.V. is a liveaction series about an 11-yearold who records. and consequently learns something from, the day's events, while Secrets is a liveaction game show that has teams of children facing a combination of questions, riddles and physical challenges.

House-that it

says will provide

The network continues to tout its Emmy Awardwinning Beakman's World, which provides a humorous spin on science, and CBS Storybreak, which adapts popular children's literature.

"We are particularly proud of the Saturday morning lineup because it fulfills CBS's commitment to present at least

A sampling of educational fare offered by broadcast networks (clockwise, from top left): CBS's 'Beakman's World,' ABC's 'Schoolhouse Rock,' Fox's 'Where on Earth Is Carmen Sandiego?' and NBC's 'Saved by the Bell.'

> dren's Act in 1990. *Bell* was cited in the first children's act," says Robin Schwartz, NBC's director, prime time series and Saturday morning programs. "We are definitely doing what we need to do."

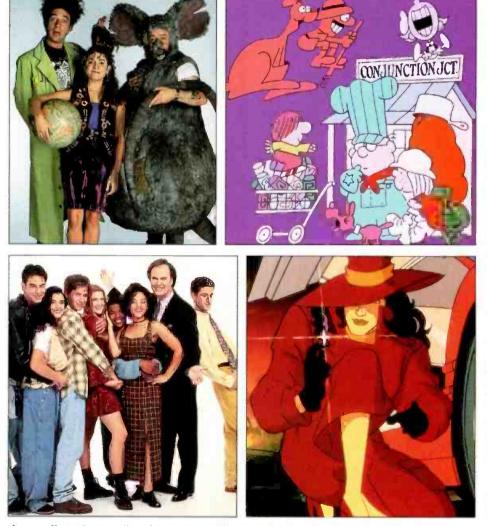

> In addition, NBC cites its *The More* You Know PSAs that emphasize family, school and voter registration.

"I can't say that it's easy,"

two hours of enriching children's programing—and it does it with entertaining programs that children will want to watch," says James Warner, president, CBS TV Network.

ABC expects tots to learn something from its new shows *Brand Spanking New Doug* and *Flash Forward*. The animated *Brand Spanking* follows a 12-year-old daydreamer who is trying

to figure out how he fits in life; the live-action *Flash* focuses on two 13-year-old girls as they embark on a rite of passage; eighth grade.

Other existing shows that ABC cites as educational are its ABC Weekend Special, Fudge, Free Willy and The New Adventures of Winnie the Pooh. Finally, the network will continue airing its Schoolhouse Rock series of musical vignettes that teach children about math, grammar, science and history.

The WB says it won't presume that

Broadcasters seek 'friendly' programing

Syndicators hope to fill need for mandatory educational shows

By Cynthia Littleton

utside of the children's arena, syndicators have largely ceded the field of educational programing to cable, but National Geographic Television remains an exception to the rule.

National Geographic Television's monthly first-run specials typically land on the high end of Nielsen's weekly top 10 list of syndicated shows. *National Geographic: On Assignment*, a magazine-style hour hosted by Robert Urich, averaged a 7.3 Nielsen household rating last season. NGT's first-run package, distributed for the past 10 years by Turner Program Services, is cleared in 172 markets covering more than 90% of the country.

"National Geographic is just one of those brand names that is so high in terms of recognition value, people feel compelled to watch," says Dick Kurlander, vice president, director of programing, Petry Television.

As a result, On Assignment commands premium advertising rates, in spite of its additional cable exposure on superstation wTBS(TV) Atlanta. Many broadcasters run the specials in weekend access and early fringe as a transition from news or sports.

The success of the On Assignment

any of the shows in its current kids lineup can be deemed A-OK by the FCC, so it will continue developing at least two educational shows for next fall. One of the series will be produced by Norman Lear, and both have the potential to be stripped over six days.

The network also will continue airing its *Crazy Careers* interstitials, which acquaint young viewers with various jobs.

"There are definitely parts of Animaniacs [that are educational], but we

don't know yet what the FCC is going to require, so everybody is staking out that this works or that works," says Jamie Kellner, The WB's CEO.

UPN this year will debut its first lineup of children's programing, but will not try to identify any of its new shows—which include an animated *The Incredible Hulk* and a series based on the motion picture "Jumanji"—as educational. A spokesperson says the network has shows in development for next fall that should keep the FCC happy.

The Power to Educate.

To be most effective, the power to educate must be matched with the desire to learn. **ITV** produces programming that fascinates, illuminates and educates, allowing your audience to spend quality viewing time that will stimulate and enhance their desire to learn. Available now are three educational series.

series led TPS to offer a new monthly package of wildlife and nature specials hosted by celebrities and wellknown documen-

tary filmmakers. TPS has cleared 12 one-hour Wild! Life Adventures specials in more than 85% of the country.

"There is a wide appetite for natural adventure programing on broadcast TV," says Susan Grant, TPS president.

But some distributors say that audience already is well served by public television, the Discovery Channel and other niche specialty 24-hour cable networks. On Assignment's ratings are a testament to National Geographic's reputation for quality.

Andrew Wilks, vice president of programing and production for National Geographic Television, was convinced of the universality of *National Geographic* a few years back when he found villagers in rural Tanzania who were familiar with the magazine.

Although the National Geographic Society has had a TV production unit for more than 30 years, the Washington-based National Geographic Television has only begun to capitalize on the brand name in the for-profit arena.

NGT was spun off into a taxable

subsidiary of the 108year-old nonprofit society last year to allow the unit to become more active in licensing, merchandising and other areas previously limited by the nonprofit status of the parent company.

Cover Story

During the past year, NGT has signed long-term deals to produce specials for NBC and TV movies with Hallmark Entertainment. A domestic National Geographic cable channel also is on the drawing board, although NGT has targeted Latin America as the first market for

as the first market for its branded programing service, Wilks says.

Children's programing also is a growth market for NGT, in light of last month's FCC ruling requiring broadcasters to air three hours of educational programing per week, Wilks says.

NGT is at work on *Amazing Planet*, a children's series that revolves around "three totally clueless aliens and their discoveries on Earth," Wilks says. No

What's friendly?

Among the syndicated children's programs likely to meet FCC guidelines for educational children's programing:

distributor has been signed for the project, but the show may be offered in syndication next year.

The FCC ruling has boosted broadcasters' demand for children's educational programing, but distributors say FCC-friendly syndicated shows are the hardest to market because few stations give the shows good time slots or much promotion.

Broadcasters counter that low ratings make children's educational programing a particularly tough sell with local advertisers, in part because many of the shows are geared toward preschool-age children.

Many programers also are perplexed by the FCC's vague definition of educational programing as "programing that furthers the educational and informational needs" of children under the age of 17.

"We look for programs that are interactive and encourage kids to find answers to questions and encourage pro-social values," says Liz Cheng, programing director of Hearst Broadcasting's wCVB-TV Boston, which has long aired children's educational programing at 5-8 a.m. on Saturday.

WCVB-TV also produces several of the block's most popular half-hours, including the nature program *Captain Bob* and *A Likely Story*, about a librarian's travels in her bookmobile.

"We look at these programs as an opportunity to give something back to the community [rather] than an opportunity to make money," Cheng says. "We produce these programs because it's the right thing to do."

Cable channels educate as well as entertain

Cable's lesson plans include history, science. computers and more

By Michael Katz

iewers with an appetite for information will find plenty on cable's menu, where channels with names like Discovery, History and Learning are true to their names.

Discovery

The Discovery Channel aggressively enters the 1996-97 season having spent \$110 million on 952 hours of original programing. Among the new offerings are specials Immortality on Ice, debuting Oct. 20 at 9 p.m. ET, which looks at prolonging life through cryonics, and Destination Mars, premiering Dec. 1 at 8 p.m., which will feed off the recent Mars frenzy and explore the feasibility of sending people to the red planet. Discovery has new daytime series Interior Motives, which offers practical tips to help viewers fix up or design their homes. And returning is its popular prime time nature anthology series, Wild Discovery.

Discovery also has Assignment Discovery, its commercial-free contribution to Cable in the Classroom, the cable industry's public-service initiative. The network often works with teachers and makes its prime time shows suitable for the classroom. "Our philosophy is that we know television, but teachers know best what works in the classroom," says Linda Brown. Discovery Communications director of educational programing. "Teachers can use the programs to convey concepts in a much shorter time span than by using only traditional methods."

The History Channel

The History Channel has carved its own niche by focusing on a single educational subject. "The channel's goal is to inform people, to make them more aware of history," says Joe LaPolla, the channel's director of program acquisitions and scheduling. "The nature of history is to make people discover their

And on The History Channel, a historical novel about Lincoln by Gore Vidal is brought to life in a miniseries starring Sam Waterston and Mary Tyler Moore. past, and we try to present it in an enjoyable way."

Slated for this fall on The History Channel is November Warriors, a documentary hosted by Roger Mudd that follows some of the most exciting presidential campaigns in American history. It premieres Oct. 7 at 8 p.m. The Edison Effect is a three-part look at Thomas Edison's most famous inventions-the electric light, the phonograph and motion pictures-and how they changed the world. On Sept. 16-19 at 8 p.m., The History Channel will present Four Years of Thunder, a four-part series on aviation during World War I. Assassinations That Changed The World studies the killings of 10 political figures and their influence on history. It debuts Nov. 18 at 8 p.m.

AUTUMN ENTERPRISES (215) 887-3831

Original Programming Educational & Fun

Reel Truths reveals how some early newsreels sometimes depicted fake

news events unbeknown to the audience.

The History Channel also targets some of its shows toward children. Beginning this fall the channel will feature Inspector Gadget's Field Trip, a part-animated, part-live-action series as cartoon character Inspector Gadget (the voice of Don Adams) visits historical sites around the world. The History Channel is hoping to capitalize on a lack of similar material on broadcast television: "I think there has always been a lack of educational programing, and we are in a position to help fill a void that exists," says LaPolla.

Encore

Encore Media's WAM! network fea-

TLC spells success

Approaching the fifth anniversary of its relaunch, The Learning Channel has managed an impressive turnaround. It has become one of the fastest-growing networks, from 15.5 million subscribers in 1991 to more than 50 million today.

"We have been pleasantly surprised by how quickly and forcefully TLC has been able to grow in the past five years," says John Ford, senior vice president and general manager of The Learning Channel, referring to the time period since the network was purchased by Discovery Communications. "And to get us to 50 million in the middle of 1996 was way beyond expectations when we bought the channel."

Ford says TLC is doing well after a record August in reaching its target

audience of adults ages 25-54 and is investing more in original programing. TLC has plunked down \$70 million for 733 hours of original shows for the 1996-97 season, and another \$18 million over the next 18 months for marketing and promotion. This is from a network that spent almost nothing on original programing just five years ago.

Myth America, premiering on the channel's Oct. 1 anniversary, looks at facts of American history that have been stretched into myths. Debuting on Oct. 2, Seatek featuring new technologies for underwater

TLC's 'Seatek' is a half-hour weekly series boasting outstanding cinematography.

exploration as well as difficult aquatic endeavors. *Medical Detectives*, beginning Oct. 3, details how medical science is used to solve crimes. The channel's commercial-free children's educational programing block will add two new series beginning this fall. TLC also will put more money into current real-life drama series *Trauma*, which documents the hectic world of hospital emergency rooms.

Echoing the opinion of other educational-programing executives, Ford insists that educational doesn't have to be boring: "Our viewers say they love to be stimulated and to feel that they have been entertained and informed," he says. "They don't want a lecture or instructional television."

Creating engaging educational programs for adults and for children

can get tricky, and requires vastly different techniques to reach the two groups. For the programs aimed at two- to five-year-olds, Ford says they employ lots of color, some animation, singing, dancing and, of course, puppets. With adult-oriented programs, TLC emphasizes pacing, strong camera work and writing with good story arcs. "We pay a lot of attention to how well we write them and put the shows in a conversational style that doesn't appear scripted," Ford says. "Stilted, formal and instructional sounding is something we avoid like the plague." users, is a how-to series on software packages. Cable clears way for classroom TV

By Harry A. Jessell

here are plenty of documentaries and other TV programs that fit nicely into lesson plans. But if a teacher tapes a program and shows it to his class, he and his school could find themselves facing stiff fines for copyright infringement.

Such suits don't happen often, but they happen often enough to make teachers wary of using VCRs to supplement their textbooks.

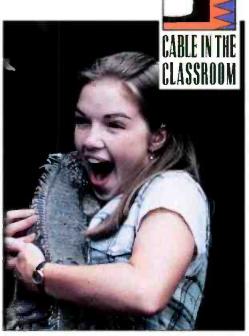

Enter Cable in the Classroom. Since 1989, the cable industry-sponsored group has been working with cable programers to identify commercial-free educational programs that teachers may tape without threat of copyright hassles.

The nonprofit group says that 31 networks now air 180 hours per month of copyright-cleared programs for teachers. Include C-SPAN and C-SPAN II and the hours swell to 540.

Because the shows are stripped of commercials, the networks usually air the shows late at night or early in the morning.

To make sure that teachers know what programs are available and when and where they will air, Cable in the Classroom distributes a monthly magazine through its member cable operators.

To belong to Cable in the Classroom, cable operators must agree to provide free cable service to every elementary and secondary school in their

Superstation wtbs(tv) Atlanta offers 'Feed Your Mind' through the Cable in the Classroom program.

service area. As a result, 75% of such schools in the nation—grades K-12—enjoy free cable.

A survey of some 800 teachers in April found that 70% used the Cable in the Classroom programing at least once during the last school year, and 25% said they used it one to four times a week.

"That's a good starting point," says Megan Hookey, who replaced Bobbi Kamil as head of Cable in the Classroom in July. "But it's also an opportunity to improve. We need to make the curriculum connection more clear to teachers."

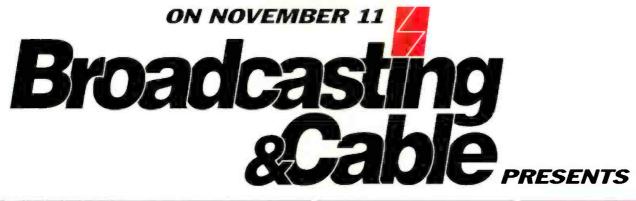

'Communication: The Human Imperative' is offered by ME/U.

ME/U turns tube into teacher

When it comes to educational TV. Jones Intercable's Mind Extension University (ME/U) remains a key player. A distance-education cable network, ME/U allows viewers to earn college credit or even bachelor's or master's degrees (12 degree programs are available) while watching classroom lectures on television. The network is affiliated with more than 30 universities and reaches roughly 26 million households. Viewers can choose from more than 170 classes. Last spring there were 27 ME/U graduates.

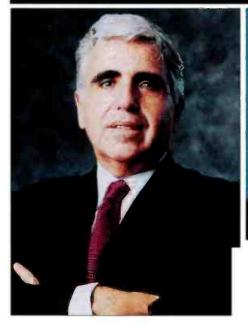

But Jones's commitment to educational TV has expanded beyond ME/U, created nine years ago. Indeed, Jones also offers ME/U Knowledge TV, a 24-hour service of educational programing in four categories: business, careers and finance; health and wellness; computers and technology, and global culture and language. Knowledge TV is advertiser supported, primarily by infomercials.

The cable company also has taken its educational network overseas. It delivers a computer training series to some 20 million Chinese households in conjunction with China Education Television. Other Jones educational activities include its ME/U Knowledge Store, which enables viewers to purchase educational products, and ME/U Knowledge Online, a computer Web site that offers products and services and online enrollment. —KM

CBS, NBC flirt with disaster

Miniseries about Titanic, deadly virus are planned for first sweeps showdown

By Lynette Rice

A n outbreak in the air and a disaster in the ocean are among the highlights as some network battle plans begin to take shape for the November sweeps.

CBS hopes to make a big splash in the season's first ratings period—Oct. 31 to Nov. 27—with its ambitious, four-hour *Titanic*. Set for Nov. 10

and 12, the miniseries starring George C. Scott and Peter Gallagher has drawn upon fictional and true-life accounts to retell that fateful day in 1912.

The miniseries is sure to be a spectacle, given all the production company has done to depict the disaster.

Co-executive producer Larry Sanitsky says that CBS spent a "fortune" building the doomed ship in a massive Vancouver water tank and sound

CBS hopes to raise ratings with 'Titanic' (right), while NBC is making time for 'Pandora's Clock.

stage, where special cranes and pulleys were used to help the ship sink. Producers also re-created the ship's opulent grand staircase and went to London to collect authentic period costumes.

"As we got into it, we learned there is a continued interest and fascination with the Titantic," says Sanitsky, adding that his take on the disaster is different from James Cameron's big-

screen version by Paramount, which is due out next summer. "I think that's partly because the scale of human tragedy is still relatable. By the same token, it's not like a bomb went off. It's a failure of technology [that] we all still reel from."

On Nov. 24 and 26, CBS will debut another original miniseries, starring Anthony Edwards, Eric Roberts and Sam Neill. The four-hour *In Cold*

Discovery to make nature shows for CBS

CBS has once again tapped Discovery Communications Inc., this time for three original prime time hature documentaries that could debut during the November sweeps.

Similar to an earlier deal that involves CBS's new Eye on People, the cable programing company will supply the one-hour "species-driven" specials for initial run during the network's 1996-97 season before airing them later on Discovery Channel, says Greg Moyer, Discovery Communications' president and chief editorial and creative off cer.

Discovery, which retains all international rights to the nature programs, already has penned a programing agreement with CBS's entertainment and ir formation cable channel, set to launch in 1997.

"These will be first-class documentaries that travel the globe and give breathtaking views of our natural world,"

Moyer says. "We're extremely excited to have this kind of programing on CBS. It reinforces what we think the cable subscribers already know—that we re a good producer of documentary programing. We also hope to talk to the 28 million homes that don't have subscriptions to cable."

CBS executives think the nature specials will appeal not only to families but to advertisers hungry for "h ghquality, documentary-like programing"

"We plan to target these as quarterly specials." says Terry Botwick, vice president, specials, CBS Entertainment. "In terms of a long-range view, we're intent on building a brand that can be sustained over time...so we're not targeting an end date."

In fact, the Maryland-based Discovery—which also owns The Learning Channel—already has begun to develop prime time nature documentaries for the 1997-98 season, Moyer says. —LR *Blood* from Hallmark Entertainment is based on Truman Capote's 1965 nonfiction novel about the investigation of the 1959 murders of the Clutter family in Kansas.

No word yet on which of CBS's theatricals, including "Dave," "The Pelican Brief" and "Philadelphia," may air during the sweeps.

NBC has announced that it has transformed the best-selling novel by John J. Nance into the four-hour miniseries *Pandora's Clock* for Nov. 10 and 11. Richard Dean Anderson, Robert Loggia and *Frasier*'s Jane Leeves will star in the thriller in which a passenger collapses from an unknown virus while en route to New York. The virus is so deadly that no airport will allow the 747 to land.

"We'll do well," says David Israel, who wrote and executive-produced the miniseries. "November numbers are never as high as [those in] February or May because, frankly, there is more competition [from] *Monday Night Football*. I know the bar has been set very high with last year's *The Beast* and *Gulliver's Travels*, but something in the good solid 20s—that would be something to shoot for."

NBC also has announced that it will finish the sweeps month with a *National Geographic* special at 8 p.m. Nov. 27, followed by a two-hour *World's Greatest Magic*. Fox and ABC are remaining mum about their plans for the November sweeps, although sources say the latter may pull a blockbuster such as "The Lion King" from the Disney animation vault to air during the critical ratings period. Other theatricals that ABC has on its plate are "Forrest Gump," "Four Weddings and a Funeral" and "The Flintstones."

UPN promises something tasty for its *Star Trek: Voyager* fans, since the network plans to run double episodes of the show during the November sweeps. One will feature an appearance by the character Q (John De Lancie), who comes back wanting to procreate with Captain Janeway (Kate Mulgrew).

Reorder in the court (TV)

Court TV revamps syndicated show

By Cynthia Littleton

he wheels of justice may turn slowly, but *Court TV: Inside America's Courts* is promising to deliver a verdict every day as the strip begins its second season this week.

The half-hour returns with a news magazine-style approach to covering real-life courtroom dramas and legal issues. Each episode will reveal the outcome of at least one trial, along with highlights from the proceedings and profiles of key players.

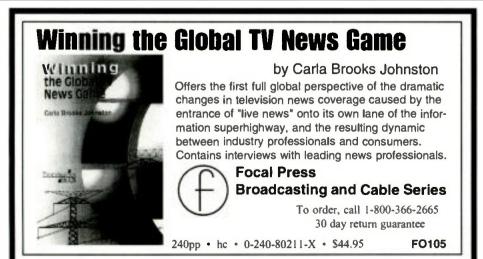

Court TV also has switched to a solo-anchor format with Gregg Jarrett, whose former co-host, Kristin Jeannette-Meyers, joined CBS News last spring.

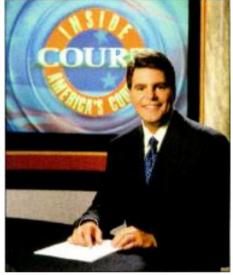

This season, *Court TV* will offer more in-depth features on legal personalities, trends and high-profile rulings. The new "News You Can Use" segment will zero in on reports of insurance scams, home repair rip-offs and other consumer-oriented topics. "Reel Law," a segment introduced during the summer, examines the accuracy of Hollywood's portrayal of lawyers and the law.

Court TV's shift from a reality-oriented approach to an emphasis on drama and storytelling was prompted by feedback from viewers, according to the show's executive producer, Andrew Regal.

Court TV averaged a 1.5 national Nielsen household rating last season, performing best when scheduled as a lead-in or lead-out to local newscasts.

Distributed by New Line Television, Court TV is cleared in 90% of the country, with a lineup that includes NBC O&Os in the top four markets and

Gregg Jarrett will be the sole anchor of 'Court TV: Inside America's Courts.'

Washington. In an effort to promote the show and boost the Court TV brand name, stations that carry the half-hour strip have free access to the cable network's courtroom footage for use in local newscasts.

This season, *Court TV* also will provide stations with a monthly package of legal-oriented vignettes and features. Additionally, New Line is distributing one-minute Court TV radio spots that feature Jarrett covering topical legal issues. *Court TV* stations have been asked to choose a radio partner for the free spots in each market.

"Building partnerships in the news area is really important to *Court TV*," says Chris Russo, senior vice president, marketing for New Line Television. "We can bring a lot of extra value to news operations and in that way differentiate ourselves from other shows in the marketplace."

Deal calls for talk show host to develop TV projects for studio

By Cynthia Littleton

ontel Williams has signed a wide-ranging new deal with the Paramount Television Group to keep hosting and producing his daytime talk show through the 2000-01 season.

The agreement also calls for Williams to develop and produce movie and TV projects for Paramount on a first-look basis under his Letnom Productions banner (Montel spelled backward). Williams's highly rated talk show, produced in association with Chris Craft/United Television, begins its fifth season this week.

Sealing a renewal deal with Williams was important to Paramount. The studio was taken by surprise earlier this year, when its other

Williams is looking to branch out beyond talk shows.

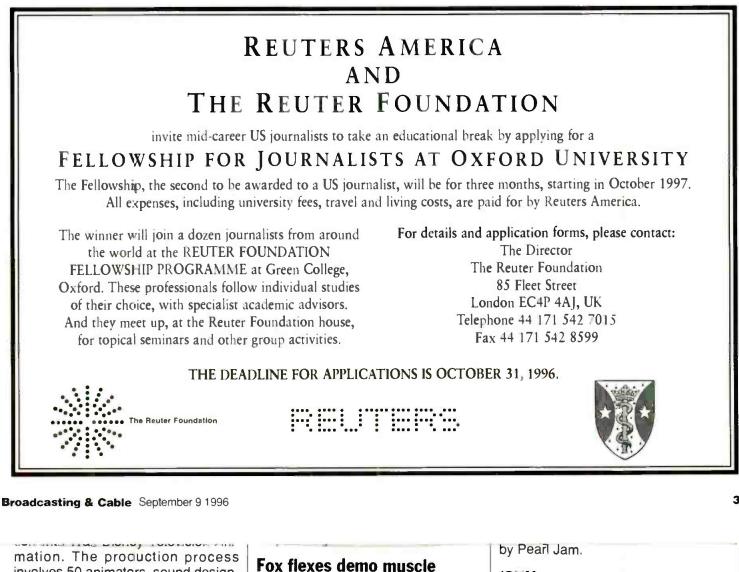

star talker. Maury Povich, announced plans to launch a show with a rival studio when his contract with Paramount expires at the end of next season.

Williams made headlines a few weeks later, when he was hit with a sexual harassment lawsuit filed by several former female employes of his show. He strongly denies the allegations, which have not had a noticeable impact on his ratings.

Williams, this year's Emmy winner for best daytime talk show host, has long expressed an interest in broadening his work in television. He made his first foray into prime time last season starring in the short-lived CBS drama Matt Waters.

Last week, Williams named producer Hamilton Cloud, a former vice president with Quincy

Jones/David Salzman Entertainment, senior vice president of development for Letnom.

involves 50 animators, sound designers, editors, writers and talent-to name a few. "It takes as long to create one minute of treats as it does to create one minute of 'Toy Story,' ' says producer Allison Murphy. "The

Fox flexes demo muscle

During the week of Aug. 26-Sept. 1, Fox grabbed the top spot among adults 18-49 for the first time ever as a seven-night-a-week network. Fox also won the week in other key demographics: adults/men/women 18-34 and men 18-49. The network weighed in with five of the top 20 programs for the week with adults 18-49: Beverly Hills, 90210 (number 6); New York Undercover (12); Party of Five (15); the Fox movie special Tornado! (17), and The X-Files (20).

'SNL' newcomers

Ana Gasteyer of the Los Angeles sketch group The Groundlings and stand-up comedian Tracy Morgan will join returning cast members Norm Macdonald, Mark McKinney and Cheri Oteri on the 22nd season of NBC's Saturday Night Live. The new season begins Sept. 28 and features quest host Tom Hanks and musical guest Tom Petty and the Heartbreakers.

SYNDICATION MARKETPLACE

Classic clears

Twentieth Television has cleared its Twentieth Classics I movie package in 40% of the country. The collection of 33 classic and contemporary 20th Century Fox titles—ranging from "How to Marry a Millionaire" to "Less Than Zero"—is being offered on a cash basis with short-term windows. "We found a growing need in the marketplace for cash titles," says Paul Franklin, senior vice president/ general sales manager, Twentieth. Buyers for Twentieth Classics I to date include eight stations in the Paramount Station Group.

'Oprah' takes off

Oprah Winfrey kicked off its 11th season last week (Sept. 3) with her highest first-day numbers ever, thanks in part to the drawing power of guest John F. Kennedy Jr. *Oprah* averaged an 11.8 overnight household rating in Nielsen's metered

Rysher gives green light to 'Soldier of Fortune'

By Cynthia Littleton

R shead with production on Soldier of Fortune, Inc., an action/adventure series developed with movie producer Jerry Bruckheimer.

Rysher says it will produce at least 13 episodes of the show, which revolves around an elite group of undercover agents who become mercenaries in the fight against crime. Rysher originally committed to a two-hour movie/pilot of *Soldier of Fortune, Inc.* last December, but the 13-episode order was approved on the strength of the first scripts and interest in the network and syndication marketplace.

Soldier of Fortune, Inc. is being produced by Simpson/Bruckheimer Films and Neil Russell Productions, which acquired the rights to the project from the controversial magazine of the same name. Bruckheimer and his late partof talk pulled in a 15, compared with a 2 for *Rosie*.

Internet: Boon or bust?

Will the Internet ever become a viable source of revenue for broadcasters? That's the focus of the NATPE Educational Foundation's tele-workshop set for Wednesday, Sept. 25, originating from WDSU(TV) New Orleans. NATPE is due to release a report later this month on how its members are using the Internet and the World Wide Web. Panelists scheduled to take part in "TV and the Web-Revenue Stream or Revenue Dream" include Jim Moloshok, senior vice president, marketing and advertising, Warner Bros., and Phil Pikelny, new business development manager for KLAS(TV) Las Vegas. The initial satellite feed will be sent out at 1:30 p.m. ET on Ku-band SBS6, transponder 11, fre--CI quency 11.970.

ner, Don Simpson, produced such theatrical blockbusters as "Beverly Hills Cop" and "Top Gun," in addition to the more recent hits "The Rock," "Crimson Tide" and "Bad Boys."

Bruckheimer says he has been "selectively" looking for TV properties to develop and is enthusiastic about the prospects for *Soldier of Fortune*. His first TV series production—a TV spinoff of Simpson/Bruckheimer Films' 1995 hit "Dangerous Minds"—debuts on ABC this month.

EZ, SFX play musical stations

-Broadcasting

Evergreen also involved in 10-station swap in Philadelphia, Charlotte

By Elizabeth A. Rathbun

n a complicated swap involving 10 radio stations, three companies and two markets, EZ Communications

Inc. and SFX Broadcasting Inc. would command the airwaves in Charlotte, N.C.

As part of the deal, which requires FCC approval, Evergreen Media Corp. would completely bow out of Charlotte and give its stations there to EZ. In exchange, EZ would move out of Philadelphia, giving numberfive-ranked wUSL-FM and WIOQ-FM (13) Philadelphia to Evergreen. Evergreen already owns WYXR-FM (11) and WJJZ-FM (tied for 13) Philadelphia and is buying lowranking wFLN-FM. Rankings are from Arbitron's spring 1996 survey of listeners 12-plus, 6-10 a.m. weekdays.

The total Evergreen/EZ/SFX deal could be worth \$350 million or more, with \$110 million also changing hands, says broker Peter S. Handy of Star Media Group Inc. However, the stations' values have not been determined. The possibility of an Evergreen/EZ swap first was reported Aug. 12 in BROADCASTING & CABLE.

Key to last Wednesday's agreement is FCC approval for the swap of the Philadelphia and Charlotte stations. That would give EZ six FMs in Charlotte, one more than allowed by federal law.

To address that problem, EZ says it will bundle its wSSS(FM) Charlotte with Evergreen's wRFX-FM Kannapolis/ Charlotte and wNKS-FM Charlotte, then swap all three to SFX. SFX would then own four FMs in Charlotte—until SFX hands over its wTDR(FM) Statesville/Charlotte to EZ.

The final tally: EZ adds three FMs and two AMs to its wSOC-FM; SFX adds three FMs to its wLYT(FM).

Under this scenario, EZ and SFX would own eight of the market's top 11 stations and 70% of the market's estimated 1995 radio ad revenue. SFX would have 31%, while EZ would have 39%, according to *Duncan's American Radio*.

The cumbersome swapping choices raise questions. Why would EZ trade

cohesive and smart buy for advertisers," SFX Executive Chairman Robert F.X. Sillerman says.

EZ also was driven by its planned \$655 million merger into American

CHANGES ROCK CHARLOTTE

Format concentration seems to be the latest twist in radio consolidation. In Charlotte, N.C., EZ Communications and SFX Broadcasting want to reshuffle their stations so EZ gets the country- and urban-formatted stations, while SFX sticks to rock. Following is the list of affected station owners—current, interim and ultimate—arranged by format.

		Station	Share	Current owner	Interim owner	owner
Rock	AOR	WRFX-FM	1	Evergreen	EZ	SFX
	CHR	WNKS-FM	10	Evergreen	EZ	SFX
	Soft AC	WLYT(FM)	7	SFX		
	'70s	WSSS(FM)	11	EZ		SFX
COUNT	RY	WSOC-FM	2	EZ		
		WTDR(FM)	6	SFX	-	EZ
URBAN		WPEG(FM)	4	Evergreen	-	EZ
		WBAV-FM	9	Evergreen	-	EZ
		WBAV(AM)	15	Evergreen	-	EZ
SPORT	s	WFNZ(AM)	18	Evergreen	-	EZ

three FMs when it needs to get rid of only one? Why would EZ give up toprated wRFX-FM?

It seems to boil down to the desire to consolidate formats (see chart). After the swaps, EZ would own both country and both urban stations in Charlotte. SFX would have two FMs with rock formats and "sales-compatible" '70s and soft AC stations to boot, Handy says.

"EZ reshuffled the deck kind of how it wanted," Handy says. Its goal in Charlotte apparently was to "take the format positions [it] can make the most money with."

EZ wasn't interested in giving up that market's number-two country station, wSOC-FM, Handy says. So SFX jumped when EZ offered Evergreen's rock franchise, including the market's numberone station, wRFX-FM. EZ previously had no rock stations in the market.

"With the new order of Charlotte stations and our top-rated [country] station, wSOC-FM, our presence in the market is exceptional," EZ President Alan Box said in a news release.

As for SFX, "as a combined entity, we have the opportunity for significant cost savings as well as presenting a Radio Systems. Markets the size of Charlotte are more compatible than Philadelphia is with ARS's holdings, Handy says.

Meanwhile, Evergreen has set its sights on the nation's top 10 radio markets, so the Philadelphia-Charlotte was appealing, Handy says. Charlotte is Arbitron's 37th-largest market; Philadelphia is the fifth. It makes sense to give up four high-rated FM stations in Charlotte in exchange for "two full [FM] signals in market [number] five. Strategically, that's very smart," Handy says.

With the other stations

it owns or is buying in Philadelphia, Evergreen would capture about 20% of that market's radio revenue, Evergreen Chairman Scott K. Ginsburg says.

"Evergreen's cluster is the only fivestation FM cluster in the market," and Philadelphia is the third top 10 market where Evergreen has such a cluster, Ginsburg adds.

Ellis leaving Ellis/Raycom

The lingering question of Bert Ellis's plans once Raycom Media Inc. takes over his Ellis Communications Inc. have been answered. Ellis last week said that he will resign as president of Ellis Communications once its \$738 million merger into Raycom is completed Thursday (Sept. 12). Ellis will look for "other businesses to start or companies to buy" with Kelso & Co., which had backed Ellis Communications. Raycom is backed by Retirement Systems of Alabama.

"It is now time for me to move on," Ellis said in a news release. He added that he also wants to build up IXL, a multimedia company that he helped found.

Bryan Kent Hawkins, one-third shareholder of Raycom, will take over as interim CEO.

IT'S MOVED TO NEW YORK AND IT'S A TEN.

ON SEPTEMBER 24, 1996, THE BIGGEST NAMES IN THE TV & CABLE INDUSTRY WILL GATHER AT THE GRAND HYATT IN NEW YORK CITY FOR "INTERFACE X" TO DISCUSS ISSUES ESSENTIAL TO YOUR FUTURE AND THE BUSINESS OF TELEVISION.

FOR THIS OUR TENTH YEAR, INTERFACE WILL COVER THE "STATE OF OUR INDUSTRIES." THE 1996 CONFERENCE WILL FOCUS ON: PROGRAMMING, POLICY, FINANCE, NEWS AND ADVERTISING.

Latest perk for radio stations: live interviews with stars

Radio

By Donna Petrozzello

A lthough FM music listeners are accustomed to hearing a morning jock talk live with a musician plugging a tour or a new CD, they are increasingly likely to hear one-on-one interviews with an author, movie or television celebrity.

Major radio networks are clamoring to place a mike in front of pop culture's most-talked-about stars. Two large networks, Westwood One Radio Networks and SW Networks, have increased the array of artists they offer to affiliates in live, interactive interviews delivered via satellite.

The notion of providing musicians and comedians for live interviews with radio show talent was developed several years ago by NBC Broadcasting's Source network, known for its young-adult programing services. Nine years ago, when Westwood One purchased NBC Radio Networks along with other networks, Westwood One took over the Source and continued the tradition of "satellite-interactive" interviews.

"We've always fed the youth networks, but now we're doing it for adult networks and for adult contemporary, oldies and country music stations as well," says Denise Oliver, Westwood's vice president of programing.

Renamed the Celebrity Connection, the network is working to attract a wide range of celebrities to participate in interactive chats with radio talent, mainly during morning shows, Oliver says.

"The need is very simple; radio stations really love having stars on the air," Oliver says. "As time went on, it expanded into actors and movie stars and TV personalities. This is one of the most popular things we do."

In recent weeks, Westwood One has provided interviews with country artist Randy Travis, actors Keanu Reeves and Mario Van Peebles and comedian Phyllis Diller. Each week, artists visit Westwood One's New York or Los Angeles studios and spend an hour or two talking with up to a dozen West-

NBC-TV's Jeff Foxworthy talked with Westwood One stations. With him are Westwood's Andrea Dresdale (I) and Pam Green.

wood One affiliates in different cities. Westwood One also has offered to affiliates interviews with celebrities based in London.

At SW Networks, which debuted its satellite-interactive service last spring, the network works at delivering "a well-rounded blend of guests, both musically and in the overall world of entertainment," says Irene Minett, its vice president of entertainment program development. "The service is not so much musically targeted as psychologically targeted."

In recent weeks, SW has offered interviews with alternative rock band Stabbing Westward, Charlie Watts of the Rolling Stones, television personality Joan Lunden and author Clive Barker. SW houses the celebrities at its New York studios and makes them available to up to eight stations over the course of a two-hour visit, Minett says.

Corinne Baldassano, SW Networks

TV's Montel Williams with SW Networks President Susan Solomon

senior vice president of programing, says the thought of connecting stations with artists came from a "news division situation" where radio stations were clamoring to interview musicians, actors and authors who were making news and appearing for interviews with other media.

Despite a recent push to offer stations live interviews with a wider variety of guests, Westwood One and SW consistently offer interviews with musicians targeted to an affiliate's format.

Both networks offer the live interviews as part of their typical programing package and demand no additional payment or commercial time from the affiliates. But the networks determine which stations get interviews with particular artists.

"Most of the time, we're offering people that stations can't get," Baldassano says. "It is constant added value for the radio stations, which is what they are looking for."

Bouloukos joins ARS

American Radio Systems has hired Don Bouloukos, former president of CapCities/ABC's owned-and-operated stations, to oversee ARS stations in seven cities.

Bouloukos joins ARS as a co-chief operating officer to manage the group's holdings in Portland, Ore.; Rochester, N.Y.; Austin, Tex., and Dayton, Ohio. Once ARS's previously announced acquisition of EZ Communications is completed, Bouloukos will add oversight of stations in St. Louis, Kansas City and Seattle.

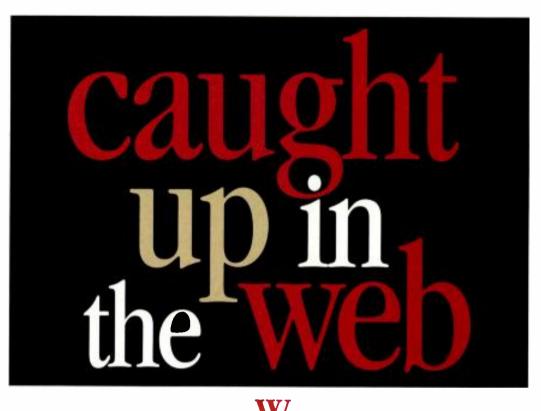

ARS has divided management of its properties in other cities between veteran co-COOs John Gehron and David Pearlman.

Bouloukos spent 10 years presiding over ABC's radio group and was president/GM of its flagship wabc(am) New York before resigning from the company in May.

After closing its acquisition of EZ, ARS will own and operate 38 stations in 20 markets.

Broadcasting & Cable Special Report

Web is changing the business of television. More and more broadcast and cable industry players add sites to the Internet every day; they hope to utilize this new outlet for promotion, increased audience affinity and, of course, profit.

On October 14, *Broadcasting & Cable* logs on to take a close look at the phenomenon of the "Net." Our in-depth report will review innovative entertainment web sites, examine the top reasons industry execs are investing in the Internet, explore its profit potential, investigate possible future Net technology and content, and identify key trends lending themselves to success in this medium.

If you are caught up in the Web, or would like catch up with those who are expanding their presence on the Internet, this special report is an excellent vehicle for your message. You'll reach 35,000 leading decisionmakers in television, cable, radio and related multimedia and new technology. Call your ad sales representative to reserve your space in this must-save issue today.

Fox unveils news channel lineup

Will feature 16 hours of live programing daily

By Rich Brown

ox News Channel will feature 16 hours of live programing weekdays when the network debuts to an estimated 12 million homes on Oct. 7.

Fox News Chairman Roger Ailes said at an unveiling of the network's programing lineup in New York on Sept. 4 that the company will be spending "north of \$100 million" on the planned service. He said it is hard to project how many subscribers will be needed to break even but that conventional wisdom in the cable industry generally puts the figure at 25 million. FNC also will look to expand distribution internationally, he said.

Ailes declined to discuss specifics on the advertising front. He said, however, that executives at the cable operation are in talks with Fox Broadcasting's Jon Nesvig, president of sales, about possible joint sales efforts. Ailes said there will be no infomercials on the new network.

A key element of FNC will be live news updates every half-hour around the clock. The news channel will start the day with continuous news updates (6-9 a.m. ET) and switch to an hour newswheel format from 9 a.m. to 5 p.m. Throughout the entire 6 a.m.-5 p.m. time period, FNC will provide updated news reports each half hour, followed by 20 minute segments focusing on a single topic (health. entertainment, business, culture, religion, crime, travel, psychology and politics).

Early evening and prime time hours will be filled with hour blocks of news programing hosted by key network personalities Neil Cavuto (formerly with CNBC's *Market Wrap*): former *Inside Edition* anchor Bill O'Reilly; Fox News political correspondent Mike Schneider; Catherine Crier (formerly with ABC and CNN), and con-

Fox News Chairman Roger Ailes and News Corp. Chairman Rupert Murdoch.

servative radio commentator Sean Hannity (alongside a yet-to-be-named liberal counterpart). During the overnight period (10 p.m.-6 a.m.) the network will feature repeat programing with news updates.

FNC weekend programing will include a mix of repeats and such originals as call-in show Pet News (Saturday, 9-11 a.m.); Fox on Sports (Sunday, 9 a.m.-noon); Fox on Medicine (Saturday, 11 a.m.-1 p.m.); archival series Fox Movietone News (Saturday, 1-2 p.m.); call-in show Money News Now (3-5 p.m.); Cavuto on Business (Saturday, 6 p.m.), and That Regan Woman, with publishing executive Judith Regan (Saturday and Sunday, 9-10 p.m.).

FNC already has 400 staffers in place, representing about 90% of the full team, said Ailes, adding that only one or two more anchors will be hired and that those discussions are drawing to a close.

Ailes, formerly a conservative campaign strategist and producer of *The Rush Limbaugh Show*, also provided a glimpse of the editorial thinking behind the planned news channel. He said that FNC will seek a balance that

 Liberal to be determined

often is lacking in TV news. Citing a recent example, he said that reporters repeatedly have asked presidential candidate Bob Dole how he will pay for his proposed 15% tax cut, but they have failed to ask President Clinton how he will pay for his proposed social programs.

Ailes said he also is emphasizing to his reporters that being first with a story

is not everything. He asked them last week to watch a videotape of the distraught mother of suspected (but never charged) Atlanta Olympics bomber Richard Jewell and to put themselves in her shoes.

Cahle

"There's too much of a quickness in TV news to find black hats and white hats," Ailes said. "It's important to be first, but it's even more important to be fair."

Ailes was hesitant to predict any shakeout among a growing list of news services that ranges from established player CNN to newcomer network MSNBC.

"There may be room for five or six," Ailes said. "We don't know."

USA to add live programing to daytime lineup

Network will broadcast two half-hours of USA Live daily

By Jim McConville

SA Networks will add live programing to its daytime schedule by expanding its interstitial concept, USA Live, into a one-hour daily programing block.

Introduced last October as segments wrapped around original and syndicated USA daytime programing, the show stretches this week into two half-hour programs that will serve as bookends to the network's afternoon shows.

USA Live will air at 1-1:30 p.m. and 3:30-4 p.m. daily weekdays, wrapping around USA's original relationship game show *The Big Date* and recycled episodes of *The People's Court* and *Love Connection*. Short segments will continue to run between shows.

USA Live also sports a new look, set and cast. The show will be hosted by comedian/talk show host Bertice Berry and a new ensemble of comedians and writers who will perform both live and taped segments.

The show, to air from the network's New York studios, has been refitted

from its original cafe decor to an informal commissary set.

Rod Perth, president of USA Networks Entertainment, says that USA Live will give the network its own daytime signature and will serve as an experimental laboratory for developing new

ratory for developing new USA talent.

"I've always felt that USA needed a personality," says Perth. "The whole opportunity of being live on television during daytime will create a sense of immediacy with viewers."

Perth says that the network will look to expand its live programing block: "Whenever it's possible, we'd like to extend the live franchise. USA should stand for live programing."

Since it was added last October, USA's afternoon block has averaged a 0.9 daytime Nielsen rating, essentially the same as its previous block of recycled game shows. However, Perth says, the block now attracts a younger female demographic (18-34 years old).

Bertice Berry hosts a revamped USA Live block.

Perth says that USA eventually will replace syndicated daytime shows with new original and licensed programing, including material from USA Live made into standalone shows for day or late-night slots.

One original daytime show in

development, Perth says, is a yet-to-betitled soap opera set in Miami Beach starring Dina Merrill. USA has not yet made a formal commitment to the show.

USA isn't the only cable network that has recently added original live programing. The Family Channel last May added a two-hour live day block called Home & Family, and Fox Network in August added *Fox After Breakfast*, a morning entertainment/talk show based on Fox cable network fX's former *Breakfast Time*.

Besides daytime, Perth outlined USA Network's plans for adding three new shows to its prime time schedule next January. Shows will include 13 episodes of *Claude's Crib*, a half-hour comedy starring comedian Claude Brooks as a student who runs a boarding house.

Other new shows include *Rudy*, a sitcom about a former TV anchorman now forced to work on a kids puppet show where the puppets are really aliens, and *La Femme Nikita*, a weekly action/ adventure series based on the 1993 French film of the same name.

USA also is rethinking its Saturday night program slate. "We're reassessing whether it's the right night for launching the comedies that we developed," Perth says.

Bertelsmann, CLT may take Disney/ABC to court

German broadcaster RTL's owners, CLT and Bertelsmann, are considering suing Disney/ABC International Television over a possible breach of contract following the recent Disney output deal with rival Kirch. Sources say that Bertelsmann and CLT think Disney/ABC broke a clause in the contract that prevented the U.S. studio from negotiating with other parties for a defined period. Sources also say the pair knew of the deal only when it was announced to the press. Last week, Etienne de Villiers, president of Disney/ABC International Television, said he hoped the deal would not affect the alliance, adding that "we are very respectful of that relationship."

Family adds original hours

Builds programing block

By Jim McConville

The Family Channel (FAM) is slated to add two more original hours to its schedule later this month.

As the next step in its plan to create a six-hour weekday block of original programing, the network, starting on Sept. 30, will add a two-hour block of game shows to its current three-hour original-programing block.

The block will fall between Home & Family, the network's two-hour daytime talk show block (1-3 p.m.), and *Family Challenge*, an hour (5-6 p.m.) game show added last year.

Family's 3-4 p.m. slot will be devoted to a favorite pastime—shopping with new game shows New Shop 'til You Drop (3-3:30 p.m.) and Shopping Spree (3:30-4 p.m.). For its 4-5 p.m. slot, the network will add kids-oriented shows Small Talk (4-4:30 p.m.) and Wait Until You Have Kids (4:30-5 p.m.).

Family's long-term plan is to add another original hour series at 6-7 p.m. Like other cable networks, Family

'Family Challenge' (above) and game show 'Shopping Spree' are two of the shows that have been added to Family Channel's original programing block.

Channel has chosen to use more original programing for economic and strategic reasons.

"With all the vertical integration that's going on in the industry and the price escalation on licensed programing, part of our future is going to be in our own original programing," says Tony Thomopoulos, CEO of MTM Entertainment, parent company of Family.

Bob Boden, FAM's vice president of daytime programing, says the network's game show block is designed to

make a smooth transition from Home & Family and help expand upon FAM's traditional female daytime audience base.

Since its May launch, Home & Family has averaged a 0.3 Nielsen rating, about the same figure generated by a slate of FAM game shows that occupied the time slot last year. But Brad Adgate, sales research director for Family, says the show is up approximately 37% with its target audience—women 25-54—for its first five months.

Momentum buys Westinghouse library

Former Westinghouse executive Ray Donahue's new firm, Momentum Distribution Inc., has acquired rights to the entire library of Westinghouse international programs. Donahue left Westinghouse to form Momentum Distribution with equity partner Eyemark Entertainment, a subsidiary of Westinghouse-owned CBS.

NetHold gets new NVOD films

Pay-TV group NetHold has signed a deal with Benelux distributor Concorde Film giving NetHold's digital NVOD service, Movies on Demand, access to such features as "Mighty Aphrodite," "Prêt-à-Porter," "Smoke," "Showgirls," "Murder in the First" and "Richard III." Deals already have been signed with MGM/UA and PolyGram Filmed Entertainment, and more are expected shortly. Movies on Demand is expected to launch this fall.

MSNBC Europe

U.S. online news and information service MSNBC, a joint venture of NBC and Microsoft, is planning to

launch MSNBC in Europe in late 1997, according to Roger Ogden, president and managing director of NBC Europe (formerly NBC Super Channel). The keys to a successful launch will be to insure sufficient distribution and develop enough European programing, Ogden said. He was speaking Sept. 3 at the unveiling of NBC Europe's fall schedule. The cable TV network and online information service already has been launched as a program block on NBC-owned CNBC Europe and will be added as a block on CNBC Asia later this month.

ESPN2 goes south

ESPN International launched ESPN2, a 24-hour allsports cable network, in Mexico and Central America on Sept. 4, in association with Mexican programing broker PCTV. This is the fourth network launch for ESPN in Latin America. The channel will feature such U.S. events as Major League Soccer and Major League Baseball. ESPN has contracted with PCTV to package the signal and uplink it regionally.

MTV earmarks \$420 million for animation

Will expand Nickelodeon, MTV animation studios

By Jim McConville

n the face of increasing competition for the coveted children's TV market, Viacom-owned MTV Networks is heavying up its investment in animated programing.

The company plans to spend roughly \$420 million over the next five years to develop a dozen or more original animated programs for its cable networks Nickelodeon and MTV.

MTV Networks will use the new monies to develop animated series, feature films, interstitials and other programing. It plans to produce more than 850 half-hour animated episodes and expand Nickelodeon's Nicktoons animation studio in Los Angeles and MTV's animation studio in New York.

The new deal doubles Nickelodeon's animation production budget, adding another \$350 million, while increasing

MTV's spending 10%—or \$70 million—say MTV officials. Some of the money from each will go toward proposed Viacom animated movies.

Approximately 75% of Viacom's new animation investment will go toward Nickelodeon, says Herb Scannell, president of Nickelodeon. The network, with an estimated 66.2 million subscribers, now allocates approximately 50% of its daily schedule to animation.

Scannell describes MTV's decision to invest in more animation as "a kind of no-brainer. This is successful programing for kids, and it's a good business for Nickelodeon."

Upcoming Viacom animated TV projects will include previously announced Nickelodeon series *Hey Arnold!* and *Angry Beavers*. In addition, a new weekly MTV series *Daria* (based on the character from *Beavis*

and Butt-head) and a still-to-be-titled VH1 series will launch in 1998.

Scannell says Nickelodeon also will change how it launches new shows: "We'll look at five-day-a-week original strip animation, which we've never done before." We'll also look at launching animation in prime time, which we're starting to do this fall with *Hey Arnold!*"

MTV will create a joint animation council to oversee production, operations and talent development and coordinate the work of the two studios. Council members include Abby Terkuhle, executive vice presiden/creative director, MTV; Albie Hecht, senior vice president, Nick Productions; Mary Harrington, vice president, animation, Nickelodeon, and John Andrews, vice president, animation, MTV.

Four programers win Canadian OK

HGTV, Outdoor Life, Liberty Media, E! get licenses for services with Canadian partners

By Rich Brown

our of the six U.S. cable networks applying to launch services in Canada won government approval on Wednesday to begin broadcasting when the industry is ready to offer digital distribution.

Each of the four winning programers—Home & Garden Television Network, Outdoor Life Channel, Liberty Media and E!—were granted licenses in partnership with Canadian owners. Losing applicants included services backed in part by A&E Networks and ESPN.

Scripps Howard-owned HGTV will own 19.8% of the voting shares in HGTV Canada, a service controlled by a subsidiary of Atlantis Communications. Outdoor Life will have a 33.3% ownership stake in the Canadian Outdoor Life Channel in partnership with Baton Broadcasting, Rogers Programming Services and others. Liberty Media will own 20% of the shares in the new S3 regional sports service, and its partners will include CTV, Molson and Rogers. Liberty and partners CTV and Molson also won approval for a sports/specials PPV service. E! has an initial ownership of 10% in Star-TV an entertainment service owned by CHUM Limited—and an option to purchase an additional 9.9%.

Applying for licenses in the growing Canadian market has become more attractive than ever for U.S. programers. Earlier this year, the Canadian Radiotelevision and Telecommunications Commission agreed to allow foreign ownership of cable and terrestrial TV holding companies to increase from 20% of the voting shares to 33%.

The CRTC last week granted licenses to 23 of 44 applicants, bringing to 54 the number of specialized TV services approved by the agency since 1984. "It was a wise move for those of us who applied, because it would appear that there won't be another opportunity for years to come," says Susan Packard of Home & Garden Television.

Eight of the new licenses—four in English and four in French—won "priority access" approval to go to air whenever their marketing plans are completed. The other new licenses (including all four with U.S. backing) are licensed to begin broadcasting when the industry is ready to offer digital distribution.

"Today's decisions we hope will provide a strong incentive to roll out digital distribution," CRTC Chairperson Francoise Bertrand said on Wednesday. He added that larger Canadian cable companies are on their way to offering digital service in the near future. To insure that the additional services get to air, however, the CRTC has set September 1999 as the deadline for their distribution.

Digital audio has high hopes for satellite

Industry leaders hope DBS will take it further than cable; TCI proposes to buy DMX

By David Tobenkin, special correspondent

igital audio executives are hoping that direct broadcast satellite will bring their services the kind of growth that has eluded them through their long association with cable.

Their hopes for exploiting DBS's rapid growth follow years of languishing in the shadow of video programing on cable.

"What DBS has done by including music in its offerings to consumers is to drive all competitors in all forms of distribution to offer it." says Jerold H. Rubinstein, chairman of digital audio service DMX Inc. DMX offers 91 channels of music to 1.7 million subscribers domestically via cable and DBS systems including PrimeStar, AlphaStar and Tele-Communications Inc.'s HITS.

TCI must think there is growth potential in the business. Last week it proposed acquiring DMX through a new corporation owned by TCI and shareholders of the digital audio company. TCI already owns approximately 45% of DMX's outstanding stock.

"It's going great on DIRECTV," says David J. Del Beccaro, president of Music Choice, which offers 31 music channels-expanding to 90 channels in October-to DIRECTV's 1.6 million residential customers. "We have diary research we've conducted with DIRECTV viewers that shows that the average household that uses Music Choice uses it 19 hours per week. That's reassuring because it mirrors the results we've gotten of those who use [Music Choice] on cable. This is a very different service compared [with] any other-and one we think has a wider appeal than virtually any other."

DMX already had received a vote of confidence from TCI before last week's announcement. On May 15, TCI had boosted its interest in the company from 14% to 45%. Other DMX investors include Viacom, Scripps Howard and Shaw Communications.

DMX and Music Choice, however,

remain money losers. DMX reported a net loss of \$21.1 million on revenue of \$12.2 million for the fiscal nine months ended June 30, an increase in loss from a net loss of \$13.7 million for the yearearlier nine months on revenue of \$9.4 million. The company's SEC filings disclose that unless new outside-financing

arrangements can be secured, the company will close its European operations.

"[The European operations] are doing well, but we agreed at the board that future monies cannot be dedicated to support them because our stock price is too low to raise money," says Rubinstein.

Del Beccaro says that the privately held Music Choice is "close to profitability."

The potential of digital audio technology is less convincing to some. "This is a product that should be offered as a peripheral service free or for a very small fee, if any. It has not been well received in the marketplace." says one investment analyst. "For the [audio services and cable operators] it is a loselose situation, given that installation costs are high and the churn rate [listeners who subscribe and then drop the service] has also been very high."

DMX supplies 30,000 commercial establishments in the U.S. and Europe and 40 million households in the U.S., Canada, Europe, South Africa, Central and South America and Israel with 90-120 channels. Of that, roughly 1.7 million are subscribers—up from 350,000 a year ago. Digital music also is available through the PrimeStar, AlphaStar and HITS DBS systems.

Music Choice, backed by seven MSOs, has the potential to be in 27 million homes through those systems' subscribers and now has more than 1.6 million subscribers, says Del Beccaro. The network also is expanding its international offering into Venezuela and Brazil through the recently launched Galaxy Latin America DBS service.

Difficulties selling Music Choice as a premium service led the company to price it as a basic service, Del Beccaro says.

Rubinstein disputes the notion that DMX is priced as a premium service. He says that cable operators are charged a wholesale rate of \$2.50 per subscriber on premium services, and the system operator has discretion regarding how to pass on the charge.

DMX is also part-owner of SUPER-AUDIO Cable Radio Service, a nondigital audio service partly owned by Jones Galactic Radio. It bills itself as a

competitor to radio, airing 58 minutes of music per hour of scheduled programing on its nine channels. The service is carried in 335 cable systems and by PrimeStar and has a potential audience of 10 million listeners. It features a variety of music and some talk, such as interviews with artists. and some live-hosted shows. One difficulty of the service is

that it is not secure—listeners can splice their way into it.

Another service, Cable Radio Network, also claims to be better than the real thing. Rather than offer myriad exclusive music channels, CRN President/General Manager (and owner) Michael Horn has positioned his single network as a colorful radio station for cable channels without audio (such as program-guide channels) by offering such audio shows as a wrestling talk show, a UFO report and shows dedicated to hard-to-find music forms like the polka.

CRN's service has increased from 8 million to 10 million subscribers during the past year. It can be customized for each cable system at the headend.

The beauty of the CRN system is that it avoids all problems of channel space, Horn says: "If the customer has \$10 extra bucks, they aren't going to want to pay for more sound; they're going to want more video, so we won't be successful trying that. But we've positioned ourselves as a channel that doesn't take up channel space."

EchoStar buys balance of DBSC

Move gives it coverage of most of continental U.S., plus Alaska and Hawaii

By Price Colman

ederal regulators gave EchoStar Communications Corp. the green light to acquire the 60% stake in Direct Broadcast Satellite Corp. it does not already own.

The FCC's grant of the "instant merger application" means that EchoStar can consummate the combination cash-stock swap deal worth an estimated \$23 million.

As a result, EchoStar will receive DBSC's 11 transponder licenses for the 61.5 degree west and 175 degree west orbital slots that the FCC awarded DBSC, a subsidiary of DBS Industries.

Coupled with EchoStar's existing service at the 119 degree west full

CONUS slot and licenses for 24 transponders at the 148 degree slot, the additional orbital positions and frequencies give EchoStar overlapping coverage of much of the continental U.S. as well as coverage of Alaska and the Hawaiian Islands.

Perhaps more important, the DBSC licenses "could put EchoStar in position next year to do retransmission deals in some very significant markets," says Carl Vogel, president of EchoStar.

EchoStar hopes to use "spot beam" technology to transmit local broadcast signals. Current regulations prevent DBS providers from doing that. The U.S. Copyright Office has indicated that it won't oppose rebroadcast of local signals back into local markets, but it's unclear what role the FCC may play.

EchoStar also hopes to use some of its frequencies for data applications, such as Internet access. Although full ownership of DBSC helps EchoStar pave the way for local signal transmission and data applications, other hurdles may remain.

"The local thing is an interesting application," says Rick Westerman, UBS Securities. "The thing that should not be lost is that in order to pull this off, they'll have to sell you a second dish. They may give it away. But I think that's a stretch. The applications they're looking to develop at 61.5 are not a slam dunk."

EchoStar is scheduled to launch its EchoStar II bird into the 148 degree slot this week.

Behind door #3: No must carry

Pondering life in a post-must-carry cable world

By Price Colman

ust carry or no must carry. That is the issue the U.S. Supreme Court will begin considering in less than a month.

The court has essentially three options: Let the rule stand, remand it to the U.S. Court of Appeals in Washington or strike it down.

Although the first two options would effectively leave in place a law requiring cable operators to carry qualifying local broadcast signals, it is option number three that has cable operators most excited and broadcasters most anxious.

What happens if must carry goes away?

Leading up to the 1992 Cable Act, broadcasters argued effectively that the absence of must carry would irreparably harm the broadcast industry. The rationale: Cable operators would drop smaller local stations in favor of cable networks in which the cable operators might have an economic interest.

"There's a lot of evidence that must carry is necessary to preserve free overair broadcasting," says Jeff Baumann, general counsel for the National Association of Broadcasters.

The flip side, from the cable industry, is that must carry violates cable's constitutional right of free speech. Yes, some smaller fringe stations might get bumped, but cable operators understand the economic importance of providing a robust lineup of broadcast channels.

"The must carry fight is not about dropping popular broadcasters off a cable system, it's at the margins," says Paul Glist of Cole Raywid Braverman, a Washington law firm that represents the cable industry. Not having the mustcarry burden would "allow cable operators to evaluate broadcasters in the same way they evaluate cable networks. It would level out the field of play."

What makes the court's consideration of must carry especially timely for the cable industry is that it comes at a time

"My judgment is that...the local dominant stations would be carried regardless of must carry." Encore's John Sie

when analog channel capacity on cable systems is at a premium. With digital cable—and its greater but more expensive bandwidth—about to emerge, many cable systems are at analog capacity. Thus, when a broadcaster exerts its must-carry muscle, it's often at the expense of another programing service.

> That's exactly what happened with Time Warner Cable's Manhattan system. When the FCC's Cable Bureau ordered Time Warner Cable to carry WMBC-TV (a U.S. Court of Appeals in Washington last week denied a request by Time Warner New York City Cable Group to prevent the FCC from enforcing the ruling requiring it to carry WMBC-TV, a New Jer-

sey-based broadcaster that bills itself as a Korean-Christian service), Time Warner decided to drop Encore Media Corp.'s International Channel.

It's hardly surprising that Encore Media Corp. Chairman John Sie has strong feelings about must carry, which he calls social engineering in the extreme. "My judgment is that...the local dominant stations would be carried regardless of must carry," he says. "Without it, the common sense is there to carry local broadcasters, local with a capital L. I don't think truly local broadcasters have anything to be concerned about. But the fringes...don't pass the management-by-commonsense approach."

What's the nation's high court likely to do? That's anybody's guess, says Erwin Krasnow, former general counsel for the NAB and now with the Washington law firm Verner Lipfert. "The cable people are confident, and the broadcast people are confident," Krasnow says. "I think the broadcasters will be triumphant, but there's no way of anyone's knowing."

Others sense that must carry may be on its way out. "From people outside the loop, the consensus is that it is going to go away," says Michael Ruggiero of ATV Broadcast Consulting Inc., an Indianapolis firm that helps broadcasters with retransmission consent negotiations. "Broadcasters and cable operators [think] it's not going to stick around."

Compound question

According to one formula, cable TV rates have climbed 10.4% this year. A different formula shows that cable rates have climbed 4%-6.9% so far this year.

So which method is right? Both.

Cable

A *Wall Street Journal* story citing a 10.4% increase was a midyear projection based on what's called the compound annual rate of change. The formula used to calculate the compound annual rate of change is complex, to say the least.

Under the second method, which compares a specific month last year to its counterpart this year, the formula is considerably simpler.

Using the second formula, cable rates rose 4% in January, 4.5% in February, 4.2% in March, 4.6% in April, 4.5% in May, 5.1% in June and 6.9% in July.

Number crunchers warn that although the compound annual rate of change is a statistically valid method, the final tally typically comes in lower than the midyear projection. The reason: short-term variations and more complete data used to calculate the final number.

For the record, cable rates have increased roughly 5.3% since the first of the year, with the biggest bumps coming in June and July, when widespread rate increases went into effect. —PC

Jones IPO

Jones Education Networks Inc., the brainchild of cable education programing guru Glenn Jones, plans an initial public offering of 6.9 million shares of stock. In a filing Friday with the Securities and Exchange Commission, the company said it intends to sell 5.8 million shares, and current stockholders, including Jones, will sell 1.1 million shares.

The company is looking at a \$15-per-share price, which would bring in about \$78.4 million after expenses. The company plans to use the proceeds to expand marketing for education programing it distributes on two cable networks. Glenn Jones will own 75% of voting shares of the stock and a 50% equity interest in the company after the IPO.

Doria to head ESPNEWS

Cable sports network ESPN has given Vince Doria, assistant managing editor of ESPN, responsibility for the development of ESP-NEWS, ESPN's proposed sports news cable channel slated to debut later this year. Doria joined ESPN

in 1**99**2.

Classic partner

Classic Sports Network Inc., the cable channel that packages old sports events for nostalgic fans, has signed another partner in Warburg. Pincus Ventures LP, which has agreed to invest \$20 million in the cable network.

HEADENDINGS

Pincus, a \$2 billion fund controlled by E.M. Warburg Pincus, joins existing network partners Allen & Co., AT&T Ventures and Florida sports mogul H. Wayne Huizenga.

PrimeStar opens retail store

PrimeStar by Tele-Communications Inc. (TCI) last week opened its first retail store for renting PrimeStar DBS satellite systems. The Lafayette, La., store, the first of a series of stores planned by PrimeStar by TCI, will rent PrimeStar DBS receivers, which start at approximately \$30 a month.

Court TV to carry 'War Crimes on Trial'

Court TV will air *War Crimes on Trial*, a live nightly news and

analysis program, starting on Sept. 10. The show, to examine the daily developments from the International War Crime trial at the Hague, will be hosted by Court TV anchor Ray Brown. It will air Tuesday-Friday at 6-7 p.m. and repeat at 10 p.m.

USA names new director, original programing

USA Networks has named Fern Field director, original programing. Field's responsibilities will include supervising original series for both USA Network and Sci-Fi as well as series development for Sci-Fi. Before joining USA, Field developed and produced television movies with her own company, Brookfield Productions.

TCI goes shopping

TV home shopping programer Shop at Home says Tele-Communications Inc. will put its channel on systems reaching at least 4 million homes by November. Officials of Knoxville, Tenn.-based Shop at Home say the number could grow to 10 million in the first year of the contract with TCI. **—RB,JM**

Cable

New cable nets get Proving Grounds

By Michael Katz

imited channel capacity has made it tough for new cable services to get noticed. That's OK with EFC Startime, which leases cable time to programers who want to test-market their programing.

The Los Angeles-based company has spent almost \$2 million to purchase cable downtime on approximately 200 systems in major markets for its Cable Proving Grounds service.

"It's an opportunity for programers to test-market their programs and see if anyone is out there," says EFC Startime President Grace Leone. "It gives credibility with investors, and it's quite inexpensive." The company is adding systems each week.

Prices vary depending on the location of the system, the time slot and the day or month, Leone says. For example, an hour from Cable Proving Grounds on a San Diego system with 460,000 subscribers between 2 p.m. and 2 a.m. costs roughly \$2,000. An hour on a Hawaiian system with 264,000 subscribers costs about \$850.

There is a minimum purchase time of 30 minutes, and space can be booked up to one year in advance. Leone says that clients can tailor the distribution and have their programs shown in as many or as few markets as they wish.

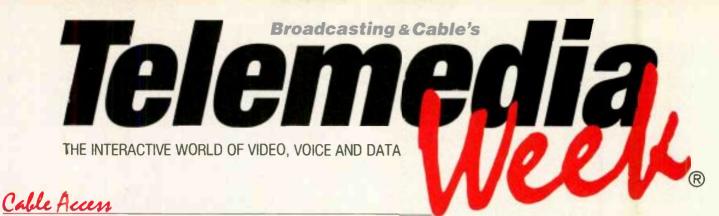

One Cable Proving Grounds client, who is using the time to present a show from his jazz club, is cross-promoting the show at the club, Leone says. Another client is using the service to show statistics that prove his financial case for a program to his investors.

Although the programs using the service don't receive ratings, Leone says, the clients use built-in response systems: "They may offer a free gift if the viewers call an 800 number, or may put up an 800 number for viewers to call if they like the show."

PEOPLE'S CHOICE Top Cable Shows

Following are the top 5D basic cable programs for the week of Aug. 26—Sept. 1, ranked by rating. All ratings are coverage area ratings within each basic cable network's universe.

@Home starts rollout in Fremont

Cable Internet access to be available to 16,000 TCI homes

By Richard Tedesco.

The high-speed @Home cable Internet-access service last week began what will start as a relatively low-speed rollout in Fremont, Calif.

The commercial introduction of the service, which was tested in the area during the past year, comes several months later than was originally slated. Initially, the service will be made available to some 16,000 of the 64,000 households TCI Cablevision of California passes in the area.

Standard @Home service is being priced in Fremont at \$34.95 per month, including unlimited Internet access, use of a high-speed cable modem, e-mail and chat functions, a customized Web browser and a menu of local information. TCI will charge an installation fee of \$150, which covers a dataport, ethernet card and @Home software. "Our months of preparation and testing mean that customers in Fremont can now receive @Home," said Bruce Ravenel, president of TCI Internet Services.

TCI plans to gradually offer access to the service to more Fremont neighborhoods. It also has plans to introduce the service in its Arlington Heights, Ill., and Hartford, Conn., systems before year's end.

The company's MSO partners in the venture will get into gear to launch @Home soon. A source at Comcast says that it will begin to roll out the service in the next two weeks, with Baltimore and Philadelphia the likely initial markets. Cox Cable plans to introduce the service in San Diego and Orange County, Calif., next year.

Although the initial TCI offering probably represents the business model for the near term, a variety of packages are being contemplated, says Will Hearst, former @Home

CEO and now a partner at Kleiner Perkins Caulfield & Byers, the other partner in the venture. Hearst recently suggested that the service might charge content providers for multicasting them in various formats on @Home and could split online revenue with others.

The venture recently announced as-yet-undefined relationships with 65 content

providers, including Discovery Channel Online, E! Online, iVillage, American Cybercast, the New York Times Electronic Media Co. and the Wall Street Journal.

NHL, IBM team up on ICE

Hockey fans will get instant updates, digital library

By Richard Tedesco

The National Hockey League is skating into cyberspace in a venture with IBM to present instant game updates online and create a comprehensive pro hockey digital library.

When the 1997-98 hockey season starts, NHL Interactive Cyber Enterprises (NHL-ICE) will launch its NHL/ IBM Real **Time Scoring Systems** to enable hockey fans to access up-to-the-minute information about games and digitized summaries of action. "Our fans want to follow the action as soon as it happens," Gary

Bettman, NHL commissioner, said during a press briefing last week.

NTERP

The league's official scorers will be trained to log game accounts through the new system, which records goals, assists, saves and all other stats with icons that effectively provide replays of game

action. A digital library will be created during the next few years, integratirg photos, aud.o and video with team and player data. "This is going to be a very

powerful mechanism to bring the strength of [this] sport to fans around the world," says Willam Moses, IBM vice president of sports and broadcasting.

As it ramps up the new scoring system and database, NHL-ICE also plans to introduce with the start of the season

Broadcasting & Cable September 9 1996

Calendar

Sept. 9-12—Internet Commerce Expo, trade show presented by International Data Group. Anaheim Convention Center, Anaheim, Calif. Contact: Ronald Milton, (508) 820-8661.

May 6-9, 1997—Multimedia '97 exposition and forum, presented by Multimedia Trade Shows Inc. Metropolitan Toronto Convention Centre, Toronto. Contact: Susan Blair, (905) 660-2491 NHL OpenNet, a league Web site on which real-time game coverage will be available. Fans will be able to access NHL historical information and purchase hockey merchandise online.

In financial terms, Bettman says, NHL-ICE is a multimillion-dollar venture, with IBM contributing technology and financing. IBM is now working with the NBA and the PGA on those associations' online content.

Internet Broadcasting

SportsLine scouting the syndicates

Service lining up personalities, games

By Richard Tedesco.

S portsLine USA, the online sports service, is hoping to strike some deals in the radio and TV syndication businesses.

The radio properties are a Monday night National Football League show and a National Basketball Association insider show in development, according to Ross Levinsohn, SportsLine vice president of programing and enterprises. Sportscaster Jim Lampley has been signed to host the hour-long Monday show, a Sunday review/Monday night preview of NFL action to air at 8 p.m. ET. Two prominent ex-NFL players are expected to join Lampley on Monday nights.

An hour-long Saturday night NFL show featuring Fox sportscaster Matt Millen debuted last week. A similar approach, combining sportscasters with veteran athletes, is planned for the NBA show.

SportsLine is talking to radio networks about syndicating both, but it doesn't want to overreach its market. "We don't want to be massmarket. We want to stay targeted so we don't cannibalize ourselves," Levinsohn says.

Radio remains its primary focus at the moment, since it will carry live audio cybercasts for the full slate of football games to be played by Penn State, the University of Miami, the University of Florida and Florida State during the regular season.

Meanwhile, SportsLine is talking to two broadcast networks about becoming a branded sports outlet for one of them, according to a source close to those discussions.

Bay Networks makes \$59M LANcity buy

Bay Networks last week brought a new dimension to its Internet-based businesses when it struck a deal to purchase LANcity

for \$59 million.

The pact leaves Bay Networks with the most prolific producer of cable modems in that growing market. LANcity claims to have deployed more than 30,000 cable modems worldwide. Under the agreement, to close before year's end, LANcity will become a division of Bay Networks' Internet/telecom unit. LANcity founder Rouzbeh Yassini will be Bay Networks' vice president/GM of cable access.

"Coupled with our worldwide sales, marketing support and service infrastructure, this merger of technologies will greatly simplify deployment and support issues for cable TV service providers as they launch cable modems within the marketplace," says Paul Severino, Bay Networks' chairman of the board. No estimate was available on LANcity's current orders for cable modems. It has been supplying its units to a number of MSOs, including Continental Cablevision, Cox Cable, Jones Intercable, Tele-Communications Inc. and Time Warner.

ESPNET goes to pager format

ESPNET to Go, a sports pager service, has launched through EMBARC, a Motorola subsidiary.

A scaled-down version of ESPN's Web service, ESPNET to Go provides updates of scores and other news from the major pro sports leagues at fiveminute intervals. EMBARC, which packages information services, is sublicensing the sports service to paging companies.

The ESPN pager service features graphics as well as text. The service also can be accessed online (www.espntogo.com), where users will find a simulated pager graphic. ESPNET to Go will regularly run online contests, a trivia game and a contest in which users pick winners of weekend football matchups.—**RT**

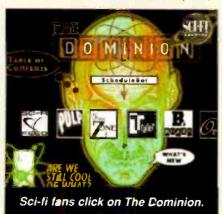

Surfing the 'Net

Sci-Fi convening SciFi.Con

The Sci-Fi Channel plans to host the world's first online science fiction convention, start-

ing on Halloween.

London-based Silicon Graphics will license the enabling technology, GTS Streaming Software, for the three-day online conference slated for Oct. 31–Nov. 2. The software will expand the bandwidth for Sci-Fi's Dominion Web site (www.scifi.com) to permit live audio/video carriage of celebrity author interviews and readings and simultaneous broadcasts of Sci-Fi Channel's International feeds from the U.S., Latin America and Europe.

WebTV sets pricing on 'Net service

WebTV Networks will launch its Internet service at a monthly fee of \$19.95 for unlimited usage.

The WebTV set-top boxes being produced by Sony Electronics and Philips Consumer Electronics are expected to appear in consumer electronics stores this month for \$330 to \$350. An Internet service provider, search engines, Web browser and e-mail are included in the cost of the turnkey service, which enables Internet access via TV.

WebTV features a best-of-the-Net directory and smart cards to enable secure purchases or bank transactions online.

Yamaha releases MIDPlug module

Yamaha Corp. of Japan has introduced the beta version of its Yamaha MIDPlug, a selfcontained MIDI (musical instrument digital interface) playback system for the World Wide Web.

In addition to playing back files, the MID-Plug features a General MIDI software-based music synthesizer that enables creation of high-quality music for inclusion in Web pages. Users require a Pentium processor running Windows 3.1 or a PowerMAC with 8MB of available RAM.

MIDPlug can be downloaded at Yamaha's

Web site (www.yamaha.com), where updates will be published as they become available.

IBM brings out first network computer

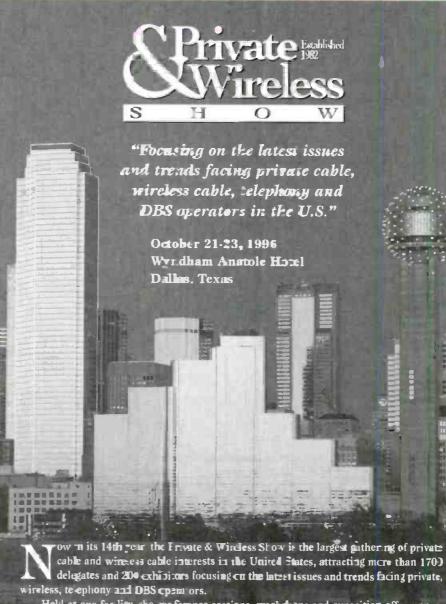

IBM last week introduced its first network computer, the IBM Network Station, intended for online business applications.

This initial entry in what IBM plans as a series of lower-cost and low-function devices costs \$700, and is designed for use in online commerce, collaboration or content manage-

ment related to the Internet or private intranets and local networks.

The company claims that the unit offers plug-and-play simplicity and an intuitive Windows-like graphical interface. "This is a product that will change the economics of connecting to networks," says Nicholas Donofrio, IBM senior vice president and group executive.

IBM did not indicate a timetable for release of any other products it plans in the series.—RT

Held at one fac liny, the conference sessions, workshops and exposition offer unparalle ed strategic opportunities — oringing exhibitors and delegates together in a targeted educational format. BBC taps **AP** in huge newsroom deal

New Electronic News Production System to be installed worldwide

By Glen Dickson

A fter evaluating proposals from more than 50 information technology companies, the British Broadcasting Corp. has selected the Associated Press to supply its new Electronic News Production System (ENPS), which combines text, audio and video in one desktop unit. The platform-independent newsroom system will be installed at more than 5,000 seats throughout the BBC's worldwide television and radio operations, replacing the BBC's old "dumb-terminal" Basys system.

According to Mel Martin, a former vice president of news for Post-Newsweek Stations who was hired by the BBC as project director for EPNS, the BBC couldn't find a newsroom sys-

A screen shot of the AP system's user interface

tem that it wanted. So the British broadcasting giant decided to design one itself, then see which vendor could produce it. The four semifinalists were NewsMaker Systems, Avid, AP and a consortium of NewsWire and Logica,

Fox SportsNet goes Digital-S

Fox SportsNet, the cable joint venture of Fox Sports and TCI/Prime Sports, has chosen JVC's Digital-S half-inch digital format as the house videotape format for its revamped regional cable and satellite sports production and

A JVC Digital-S editing deck

Ind satellite sports production and distribution service. Fox SportsNet is the second News Corp. cable operation to tap Digital-S for all its feed recording and editing, following on the heels of Fox News Channel, the 24-hour cable service that will launch next month (BROADCASTING & CABLE, Aug. 26).

"All of the sports news of the day, and all of the pregame high-

lights will be cut on Digital-S," says Andy Setos, executive vice president of News Corp.'s news technology group.

Dig tal-S recorders and editing controllers will be installed in Fox Sports-Net's new facilities in Los Angeles, where the studio will produce sporting events that originate from TCI/Prime Sports' 15 regional sports networks. Construction of the Los Angeles production studio is under way, with new, enharced pregame and sports news programing debuting Nov. 15. ---GD with AP beating NewsWire/Logica in the final evaluation.

"AP was very close to our vision of what we wanted," says Martin. While the BBC won't disclose the terms of the deal, Martin says it is a "multimillion-pound" purchase.

Martin projects a two-year time frame to convert the BBC's entire opera-

tion to ENPS. The BBC will conduct trials at one of its bigger operations in Bristol, England, this fall, with the first formal rollout of the system in early 1997. Prototype systems have been in place at the BBC since March.

The BBC had three main criteria for its new "content management system," Martin says. One, an intuitive, drag-and-drop user interface that wouldn't require formal training; two, the ability to work on both Windows and Macintosh platforms, and three, a data-

base browser that would allow easy access to text, audio and video clips without using a complicated file protocol.

The ENPS system uses a "briefing button" to retrieve information, allowing a journalist to type in or highlight a word and instantly access a catalogue of related material, including wire stories, pictures, sound clips and maps.

"The system indexes every word as it comes in, so the journalist doesn't have to waste time looking," says Martin, who compares the ENPS search engine to a Web browser. "In our system, every word is hyperlinked."

ENPS also will be able to retrieve thumbnail video images, stored at lowresolution on a 100 gigabyte Compaq server. "The goal is to keep 90 days of browse quality online," says Lee Perryman, deputy director of AP Broadcast Services. Perryman says that in the future, full-resolution video may be stored on a server such as the Quantel Clipbox, with links to nonlinear editors. "It has video, audio and still systems built in as research tools," he says. "But broadcast-quality playback can be snapped on later."

Perryman adds that the AP system

has rundown links to playback and machine control for robotic cameras, still stores, prompters, character generators and captioning systems.

ENPS also has the ability to port material to other media, such as Web pages or CD-ROMs. "Things in the old days weren't designed around multimedia," Perryman says. "But now, as broadcasters move into other businesses and different programing, they have to try to repurpose their news material. This system has HTML output built in."

Perryman hopes that multimedia capability will be one of the selling points for the new AP system when it hits the open market in June 1997. AP plans to target the international market as well as U.S. networks, using the BBC's credibility as a major marketing angle. "Outside the U.S., nobody ever gets fired for doing what the BBC does," Perryman says.

By Glen Dickson

Sony has selected C-Cube's CL9100 single-chip MPEG-2 digital video decoder for integration in its Digital CS Broadcast **Tuner DST-500JS** set-top receiver. The Sony set-tops are being used for Japan's PerfecTV program, which will deliver 70 channels of television programing and 100 radio channels to subscribers. The DST-500JS incorporates a communication modem for pay per view, TV shopping and other interactive operations, along with an electronic program guide. The Sony receiver also provides two S-Video/Audio outputs to allow for connection to a television set or VCR.

Starnet Development

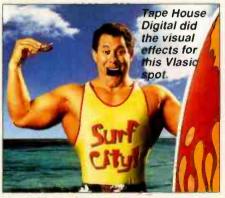

Inc.'s digital ad insertion system is up and running at TCI in Evansville, III., serving 50,000 cable subscribers. According to Randy Antes, general sales manager for TCI Media Services, Evansville, the SDI digital system is leading to increased revenue because of its quick turnaround time on spots. "There are clients who call us in the morning wanting to place an ad at the last minute," says Antes. "With the new system, we are able to accommodate them. The ad can be encoded, put on optical disk and then go straight to air. We actually can have the ad on-air the same afternoon."

Tape House Digital, New York, handled the

compositing on two new Vlasic Pickle spots for Londonbased Animus Productions. Animus delivered MORPH effects on

Syquest discs and multilevel animation on 35 mm film, which was then transferred to D-1 at Tape House. Tape House director of visual effects Michel Suissa and visual effects artist Cari Chadwick used the Discreet Logic Flame to composite multiple layers of animation and live action to create modeled 3-D imagery. The final spot was then conformed by Patrick Inhofer in Tape House's Kadenza suite.

Globo TV of Brazil has placed a \$1 millionplus order with FLIR Systems, Portland, Ore., for two UltraMedia gyro-stabilized aerial camera systems. The five-axis UltraMedia broadcast systems will be nose-mounted on Eurocopter HB350 helicopters and are expected to be operational in Globo's biggest markets, São

Paulo and Rio de Janeiro, in October. Each UltraMedia unit will include a Sony BVP-T70 camera and a Canon 33:1 zoom lens with a 2x extender, giving the camera an effective zoom ratio of 66:1. Complete with camera and lens, the gimbal weighs less than 75 pounds.

HELP WANTED FINANCE

INTERNATIONAL TV/MEDIA GROUP Station Finance Directors/Regional Finance Team Members

A clear leader in our field, we own, operate and develop national and regional private commercial television and radio stations in the emerging markets of Central/Eastern Europe and Germany and we have established ourselves as the prominent media group in the region. We seek station Finance Directors and Regional Finance Team Members for the Group.

THE ROLE:

- ✓ Station Finance Directors will oversee and manage all aspects of the TV Station's financial operations.
- Expected to recruit and develop local staff to assume positions of responsibility within the finance area.
- Regional Finance Team Members will assist and review the implementation of the above initiatives and be responsible for carrying out due diligence procedures of potential acquisitions.

IDEAL CANDIDATE:

- ✓ Must have minimum 5-10 years of industry experience combined with solid financial background. A CPA or MBA combined with work experience and/or Central European language skills would be a distinct advantage.
- Mature, hands-on approach combined with high degree of commercial acumen.

WE OFFER:

- ✓ Attractive package.
- ✓ Opportunity of getting in on "ground level" in a rapidly growing operation.
- ✓ Excellent career prospects.

Please apply in writing, sending a comprehensive, up-to-date CV along with a covering letter and daytime telephone number to Miss Amanda Pearce, 18 D'Arblay Street, London, W1V 3FP, UK or Fax on 44 171 292 7903, All applications will be dealt with in strictest confidence.

HELP WANTED PRODUCTION

That's all we ask.

Writers, Producers, Art Directors, Creative Directors, Designers

If you are:

- a team member who wants to produce high-profile promotions.
- a strategic thinker
- a professional with network, ad agency, or production experience.

And you seek:

- an atmosphere that nurtures the creative process
- other great stuff like Showtime's competitive compensation and benefics packages

Then you should:

 forward your resume and salary history and recuirements for confidential consideration to: Showtime Networks Inc: Attn: Human Resources Department (BO), 1533 Broadwey, New York, NY 10019.

We appreciate your interest, but can only respond to these we feel are juaified. We are in equal opportunity employer and an advocate of workforce dimers by.

Classifieds

As a member of the VIACOM corporate family and one of the world's largest entertainment companies, MTV Networks continues to set the world in motion - from the way we dress to the music we listen to and how we're entertained. The incredible success of VH1 creates an excellent opportunity for an experienced professional to work within an exciting, cutting edge environment that continues to set the pace for growth.

We put a whole new spin on the world of entertainment. Director • VH1

As Control Room Director for the VH1 Studio, you will direct VJ host segments, live special events and VHI in-studio acoustic music performance. Other responsibilities will include assisting in graphic design and implementation, camera blocking and rehearsals of all new sets in the studio, attending weekly Studio production meetings, pre-production planning for upcoming events and future programming.

To qualify, you must be a team player with at least 5 years of major market experience including live and live-to-tape events. The ability to work well under pressure coupled with effective leadership, management and communication skills are also essential. Music experience a plus.

For approximately the first 90 days, this position will be full-time freelance, after which the selected candidate will be reviewed for possible conversion to staff.

We offer a highly competitive compensation package designed to attract the best candidates in the industry. For confidential consideration, please send your resume with salary requirements to: Staffing Resources-GK/BC, MTV Networks, 1515 Broadway, 16th Fl., NY, NY 10036.

We regret we can only respond to candidates who meet the above requirements. We are an equal opportunity employer.

Veteran TV producer makes learning fun

roducer Mark Waxman uses the tools of television to speak to kids of the computer generation.

An educational message may be the last thing kids are looking for on Saturday mornings, but Waxman found a way to make extracurricular learning fun with the strange inhabitants of *Beakman's World*, now beginning its fourth year on CBS. This season, the veteran writer/director/ producer hopes to strike gold again with a new CBS Saturday morning series, *Bailey Kipper's P.O.V*.

"TV producers have such an advantage over the classroom teacher," says Waxman. "We can expand upon the blackboard by using visual effects, graphics, animation, music and other sound effects to create a fantasy world that kids can relate to. It's a friendlier approach to learning for kids who have grown up playing video games."

Waxman's 25-year career in television includes stints as a programing executive and producer for CBS and public television.

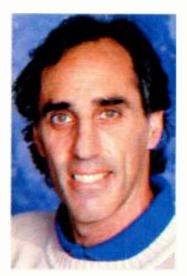

The Emmy-winning *Beakman's World*, often viewed through a fish-eye lens, revolves around the curiosity of its fans. Viewers send the show about a thousand pieces of mail per week.

The success of *Beakman's World*, based on a syndicated comic feature, proved there was a commercial market for children's educational programing long before the FCC established a three-hour weekly standard for broadcasters.

"I set out to make the best show I can," he says. "I don't target my ideas to demographic groups or men or women, boys or girls. I try to do the most entertaining show I can think of and execute it in a way that encourages the younger audience to reach up. I'm a great believer in the idea that kids are always trying to find out what the next group above them is learning."

While *Beakman's World* focuses on facts and theories, *Bailey Kipper's P.O.V.* aims to impart more subtle lessons in responsibility, ingenuity, conservation and cooperation. The live-action series is Waxman's first project under a new production pact with MTM Entertainment.

Bailey Kipper is an 11-year-old boy who keeps a secret video diary with the aid of "spyballs," or eyeball-shaped cameras he stashes around his neighborhood. The aspiring filmmaker assembles the material into diary entries, recording events as he would like to remember them, using old

"It's a friendlier approach to learning for kids who have grown up playing video games."

Mark Stewart Waxman

President, Victoria Productions, Los Angeles; executive producer, Bailey Kipper's P.O.V., Beakman's World; b. June 10, 1946, Los Angeles; BA, theater arts, motion picture production, UCLA, 1969; MFA, theater arts, motion picture production, UCLA, 1971; program executive, CBS, Los Angeles, 1969-70; director of program development, KCET(TV) Los Angeles, 1970-76; program director, KCET, 1976-78; CBS, Los Angeles: director, daytime programs, 1978-80; VP, children's programs, 1980-82; director, drama development, 1982-83; program executive, current programing, 1984-85; current position since 1985; m. Paula Kendall, 1980; children: David, 13; Taylor, 12.

editing equipment his father has brought home from his job at a local TV station.

Waxman says he became intrigued with the potential for using special effects to enhance his story-telling techniques while working on *Beakman's World*. But the inspiration for *Bailey Kipper's P.O.V.* stems from his childhood.

"When I was about [Kipper's] age I started to see the world in a film-style way," he says. "A lot of kids imagine the world in the way they'd like to see it. I kept the movie camera behind my eyes and put the effects in as I processed the film while I daydreamed."

Like many others in Hollywood, Waxman began his career as a studio tour guide, working on the same lot, CBS Radford Studios, where he now tapes *Bailey Kipper's P.O.V.* That exposure led to a job as an assistant to *Hawaii Five-0* producer Leonard Freeman. Within a few months, Waxman at 22 had become, at that time, the youngest programing executive in CBS's history.

Within a year, he left CBS to gain more hands-on production experience by serving as director of program development for Los Angeles's fledgling public TV station, KCET. During the next eight years, Waxman would produce more than 500 hours of programing, mostly documentaries and specials, for KCET and PBS.

"Educational television to me meant educating myself about television," Waxman says. Among his notable productions for KCET/PBS in the mid-1970s was the multipart series *Film Odyssey*, which broadcast the original versions of classic foreign films, augmented by interviews with such legendary directors as Alfred Hitchcock and Akira Kurosawa.

Waxman returned to CBS from 1978-1985, a period that included a two-year tenure as vice president of children's programing.

"On the network side, you're always saying to producers, 'Show me what's new and different out there,'" Waxman says. "You're always asking for different, but you end up putting on same. Same is safe, and with same you can predict fairly closely your result. To those who dare to risk goes either the prize or the door. Sometimes they're recognized as visionaries by higher-ups later on or, at the very least, as courageous souls. It takes those types in television to bring us the shows we remember best."

BROADCAST TV

Appointments at Fox News Channel, New York: **Douglas Kennedy**, investigative reporter, the *New York Post*, joins as general assignment reporter; **Kim Hume**, reporter, *World News Tonight*, joins as deputy bureau chief/senior producer.

Marty Miller, VP/director, sales. Pezold Broadcasting, joins WBNE(TV) New Haven, Conn., as GSM.

Charles Sherman, senior VP, television, National Association of Broadcasters, Washington, adds president, NAB's

Ed James, an editor's editor

Edwin H. James. 79, who retired as executive editor of BROADCASTING magazine in 1981 and continued as an editorial consultant until 1988, died Sept. I in Mission Viejo, Calif. The cause of death was prostate cancer.

James, a native of Montana, joined BROADCAST-ING'S New York office in 1946 after World War II service as a major on the staff of General Douglas MacArthur. He became managing editor in 1954 and James

executive editor in 1960. In addition to supervising the parent magazine, he directed the company's publication of TELEVISION magazine from 1960 through 1968, and was editorial chief of the annual BROADCASTING YEARBOOK.

Within the magazine James was known for the demands he made on the staff for accuracy and adherence to a taut, journalistic writing style. As editor of the editorial page he set and executed editorial policy in concert with the late Sol Taishoff, the magazine's editor/founder. In 1963 he won the Jesse H. Neal Award, the highest honor in the business press.

"Ed James was the backbone of BROADCASTING's newsgathering operation for more than 40 years. He taught me and many of us much of what we know," said Don West, editor of BROADCASTING & CABLE. "His sights were always higher than those of the guy next door. He read every word in the magazine and no story escaped his red pencil."

James is survived by his wife, Arabella, and three children from his first marriage: Patricia, Hugh and Michael. A memorial service was held in Mission Viejo last Saturday.

Education Foundation, to his responsibilities.

TELEMEDIA

Dave Payne, manager, spacecraft technology, space and technology division, TRW, joins Teledesic Corp., Kirkland, Wash., as industrial alliance manager.

Candice Meyers, executive producer. local and new media, KPIX-TV San Francisco, joins INFUSIONcom, New York, as in same capacity.

Sarah Cotsen, VP/GM, SPIV, Turner Broadcasting Systems, Atlanta, named VP/GM, Turner Online.

DEATHS

Raul Lefcovich, 74, former president of international syndication for Viacom Enterprises, died Aug. 27 of prostate cancer at Memorial Sloane Kettering Cancer Center in New York. Lefcovich joined United Artists Corp. in 1953, serving in a variety of executive capacities during the next 27 years. He then

joined Viacom and focused his efforts on international distribution of programing. Lefcovich is survived by his wife, Leda, two daughters and a sister.

George A. Heinemann, 78, program creator, died of a heart attack Aug. 21 in New York. Heinemann created Ding Dong School in 1952 while working for NBC in Chicago and Shari Lewis and Lambchop in

Heinemann in 1974

the late '50s at WNBC-TV New York. He also created a daily advice program with Dr. Joyce Brothers; World Wide 60 (a documentary series); *Update* (a news program for teens), and NBC Children's Theater.

Robert Eugene Miller, 76. former VP/GM, KALB-TV Alexandria, La., died Aug. 17 at home in Pineville, La., after a long illness. Miller worked at KALB-TV from 1954 to 1990. He is survived by his wife, Mildred, three children and eight grandchildren.

> -Compiled by Denise Smith e-mail: d.smith@b&c.cahners.com

King World Productions confirmed last week that **Stephen Palley has left his post as executive VP/COO** after 11 years with the company. Palley also has resigned from King World's board, which has formed a committee to find a successor. Michael King, president, will serve as act-

ng COO in the meantime. Palley will remain a consultant to King World through the end of the year.

General Motors Corp.'s Hughes Electronics unit (owner of DIRECTV) is talking with PanAmSat Corp., one the world's largest satellite TV operators, about acquiring PanAmSat for approximately \$3 billion. Such a deal would extend Hughes's worldwide satellite fingerprint and likely help to expand sales of DIRECTV's DBS service to other international markets. PanAm-Sat, which operates four satellites over Europe, India, China and East Asia,

owns rights to place satellites in four other orbital slots during the next two years.

USA Network has signed an exclusive six-year deal that will give the network cable coverage rights to the U.S. Open Tennis Championships through 2002. Financial terms were not disclosed, USA, which has carried the Open since 1984, splits TV coverage with CBS Sports. Last October CBS renewed its rights agreement, signing a five-year contract with the United States Tennis Association for an estimated \$31 million-\$33 million a year (it paid an average \$19 million a year for its 1991-95 contract).

Making its European debut, Fox Kids Network will launch as a basic channel on BSkyB's multichannel package Oct. 19. But the channel isn't stopping there, with a Latin American launch planned by year's end and talk of a four-language Asian version. FKN in Europe will share Astra 1A's transponder 7 with Sky 2, a new general entertainment channel that Sky launched on Sept. 1. Programing will include Goosebumps, Casper, The X-Men and Mighty Morphin Power Rangers. Margaret Loesch, president of Fox Kids Networks Worldwide, told BROADCASTING & CABLE that BSkyB will not take a stake in the kids service because Fox wants "full control" of the FKN brand. Sky and Fox still are hammering out details, but FKN primarily will handle ad sales and distribution in the UK. Cable carriage agreements have not vet been secured, and the per-subscriber fee is still being negotiated.

Representative Billy Tauzin (R-La.) told a meeting of religious broadcasters in Washington last week that they need to be leaders in the effort to promote "media literacy." Religious broadcasters have a "big challenge to get involved and to encourage parents to take responsibility" in educating their children about what they're seeing on TV, Tauzin told the group. "As the information age almost literally overwhelms us...we have to start focusing on being better media consumers."

The Battle of Troy, pitting cable giant TCI against the city of Troy, Mich., is turning ugly. In seeking relief from the FCC, TCI contends that Troy has violated the Telecommunications Act of 1996 by denying right-ofway permits to install hybrid fiber/coax lines. In comments filed with the commission last week, lawyers representing the city counter that TCI has used "distortions of fact and misinterpretations of law" to support its case. Weighing in on the side of TCI, the NCTA commented that "Troy's actions over the past two years represent an

Fran leaves stations scrambling

Hurricane-turned-tropical storm Fran managed to knock several TV stations in three states out of commission-temporarily-as it headed up the East Coast last week.

Wilmington and Raleigh, N.C., apparently were heaviest hit by Fran, with several TV stations reporting extended interruptions from Thursday night into Friday morning.

A Weather Channel spokesperson said an estimated 850,000 residents in the Caroli-

nas and Virginia still were without power on Friday morning.

WNCT-TV, a CBS affiliate in Greenville, N.C., suffered signal problems Thursday night after Fran knocked its studio-to-transmitter link (STL) out of alignment. "It took us awhile before we pulled up our live truck and were able to re-create an STL," said Edward.J. Adams, WNCT-TV GM.

NBC News executive producer Sharon Houston said none of the network's affiliates reported being knocked off the air, but wECT Wilmington couldn't be reached Friday morning.

In Virginia, NBC affiliate wwBT Richmond reported that damage to a power substation knocked out power there from 5 to 10 a.m. on Friday. John Shreves, wwBT VP/GM, said the station had been working with CBS affiliates wBTV Charlotte,

N.C., and wcsc-tv Charleston, S.C., to cover the storm.

wviR-Tv, an NBC affiliate in Charlottesville, Va., got a double wallop from the storm, losing power and experiencing flooding on three floors of the station. "We have backup generators, so we're doing fine," said Bob Jenkins, acting chief engineer. However, high winds knocked the station's mobile units out of commission early Friday morning. —JM,RT illegitimate use of its cable franchising power...and an abuse of its authority over rights-of-way."

Time Warner is leaning toward an appeal of last week's decision by the

week's decision by the U.S. Court of Appeals in Washington, D.C., upholding a slew of cable regulations contained in the 1992 Cable Act. Time Warner Cable was lead plaintiff in a 1993 suit filed against the FCC contending that a number of the act's provisions violate cable operators' First Amendment rights. Time Warner's challenge focused on rate regulation, set-aside channels for lease, public, education and government programing, and the programaccess rule. "At this point, we're reviewing the decision," says Time Warner Cable spokesman Mike Luftman. "But it's not unlikely that we would appeal."

Rysher Entertainment is expanding its international division with the creation of pay-TV and research units to manage worldwide sales of Rysher's TV and theatrical product. Eri June Morino has been appointed director, international pay television; Christopher Jacquemin has been tapped as director, international research and sales control. Rysher's international divsion, headed by senior VP Meggan Kimberly, has grown from three staffers in 1993 to 25.

Hurricane Fran netted The Weather Channel a record rating on Thursday, Sept. 6., when it recorded a 3.5 in the overnight Nielsens. That breaks the network's previous record of a 2.9 for its Jan. 7 coverage of the Northeast blizzard.

Brown Broadcasting Co. is close to finding a buyer for KKSF-FM and KDFC-AM-FM San Francis-

co. "I continue to be amazed at what very intelligent people...are willing to pay for broadcast facilities," says Phil Melrose, president of Brown's radio division. When Brown opened its "controlled bidding process," 18 companies sought information and 12 ended up expressing an interest, Melrose says, That eventually boiled down to four or five. Evergreen Media Corp. was one of the early dozen, but Melrose declined to say who's in the final four or five. The winner will be determined in a matter of days, he says.

The FCC Office of Engineering and Technology has scheduled an open meeting to discuss the agency's digital TV allotment plan. The session is slated for Thursday, Sept. 26, 9:30 a.m.-noon, in room 856 of the commission's Washington headquarters, 1919 M Street, NW.

Network radio's audience share improved 4.3% overall, according to SRI's spring 1996 RADAR report released last Thurs-

day. Among the top-threerated networks, ABC Radio Networks' share increased from 47.8% to 48.4% of listeners 12-plus; Westwood One Radio Networks' share dropped from 36.5% to 36.3%, and CBS Radio Networks' share dropped from 15.7% to 15.3%. ABC cinched nine of the top 10 network programs, and ABC Radio news correspondent Paul Harvey held fast to his usual top spot among network radio personalities.

Donald Gips has been named chief of the FCC's International

Bureau, which regulates communications satellites. Gips has been acting chief since May. Other bureau appointments: Ruth Milkman, deputy chief; Karen Kornbluh, assistant chief, and John Stern and Thomas Boasberg, senior legal advisers.

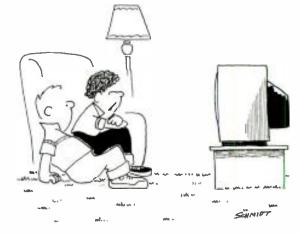

Ameritech Corp. and IBM will begin an ADSL modem trial in Chicago next month among 200 Ameritech telephone customers who also are on the IBM Global Network. The six-month test will utilize modem equipment from Westell Technologies capable of transmission speeds up to 1.5 mbps.

Time Warner Cable officially launches its highspeed cable modem service, Road Runner, in the Akron and Canton,

Ohio, metro areas this week. The service will be marketed to TW's 300,000 subs in the area for \$40 a month.

US West Communications began a market trial of its TeleChoice OnLine cable modem

service in Omaha last week. Initially, the service will be available to approximately 15,000 households in western Omaha, where US West TeleChoice provides cable service to 13,700 customers. The high-speed cable modem service costs \$59.95 per month with a \$125 installation fee. US West Tele-Choice subs can get the service for \$49.95. The price includes use of a LANcity modem, unlimited Internet access with Netscape's browser, email, and access to a Tele-Choice Web site of local information.

COMMITTED TO THE FIRST AMENDMENT AND THE FIFTH ESTATE

One of a kind

The professions of broadcasting and journalism lost a stalwart last week. Edwin Hugh James, who served this magazine in a succession of posts for 42 years, and for 21 years was its executive editor, died in retirement in California. He had corresponded with this page to the last, always exhibiting his characteristic wit and flair, and occasionally—using one of the red pens with which we had sent him into retirement—reminding us that we had strayed from the style book he had made our bible. (The less reverent among us called it the King James version.)

Ed James was a great writer. His leads were works of art, and his stories defied improvement. Even his headlines were classic: old hands here still remember one he wrote for an interview with Jack Benny—"Stars Shine Best When Polished."

But it was on the editorial page that he excelled. He was, arguably, the best editorial writer this field has seen. He had a controlled indignation that illuminated his arguments and a passion for the First Amendment that led the way for an industry that hasn't always matched his fervor, then or now.

Ed James was more an inside editor than an outside one. He didn't shake every hand in the industry, but he read every word of his magazine. He shared with the late Eric Sevareid a combination of extraordinary good looks, Old World refinement and enormous shyness. He treasured Sevareid's confession—in the introduction to one of his books—that if he had his life to live over he would have used more that's and fewer which's.

Perhaps the greatest James legacy was the staff he trained so unforgivingly. His insistence on accuracy could be intimidating and his love of the language infectious. No reporter who spent five years under his tutelage will ever again use less when fewer is the right choice. It is an honor to acknowledge this great journalist and courageous man. He gave the magazine backbone and class. The industry he fought for and we he left behind are forever fortunate that he spent his moment at our side.

Save the apologies

NBC may have set a troubling precedent last month when sportscaster Bob Costas apologized for remarks about China's poor human-rights record and its athletes' prior and documented—use of performance-enhancing drugs.

The network apologized for offending the Chinese, even though NBC stood by the accuracy of everything Costas said, which the network said had been verified. NBC explained it this way: "The apology was because they told us their feelings were hurt, and we wanted to make sure they were clear that that was not our intention."

Since when are television networks in the business of publicly apologizing for the sting of truth?

NBC, it is worth noting, has high hopes for its two new Pan-Asian channels, Hong Kong-based NBC Asia and CNBC Asia. And although the network denies any connection, the apology coincided with an agreement between NBC parent General Electric and state-owned China Telecom to build a network in China for electronic trading for banks and government bodies.

With less than 10 months before China takes control of Hong Kong, will Western media investors help the territory fight for freedom of the press or steer clear of insulting China in pursuit of future profit? China reportedly intends to charge all foreign financial news services that wish to operate in China and require all copy to pass muster with the official Xinhua news agency.

With many eying Asia as the next communications boom market, are Western-backed programing services ready to make such concessions?

Only one video server will put your

broadcast facility on the road into the future.

Don't get caught going down the wrong road. Some video servers will work for you today, but not in the future. Television

technology is changing rapidly, with new compression standards, increased storage needs, additional multi-channel feeds, new distribution technologies will impact your facility. Which video server will take you into the future?

Media Pool video server from Philips Broadcast Television Systems Company. The Media Pool's flexible and modular approach

Philips Broadcast Television Systems Company was designed to meet your growing needs today and in the future. Additional channels, more storage capacity, additional interfaces, and compression can all be added to the system so you can manage your capital cost and stay competitive.

For more information or a free demonstration, call: 1-800-962-4287.

Let's make things better.
